hey brooke, i would like to ask for a special action request through the eastern RAC, for No harvest for coming 2024 fall season for sheep in unit 20E south, on NPS lands in Yukon-Charley preserve. Justification the 2022 survey season show'd a 79% decline in sheep pop. NPS used a special action request to close 20E south in 2023 for no harvest, Requested by NPS staff at Feb.20 federal subsistence NPS working group eagle, ak, I hope my intent to go thru the council will give this more priority, another action item from this meeting is the need of a eastern interior sheep manag. Plan and NPS was very interest to look into it.
