

**Unmanned Aircraft System COA**  
**Public Agency**  
2023-WSA-11904 REV 3-COA

<small>DEPARTMENT OF TRANSPORTATION FEDERAL AVIATION ADMINISTRATION (FAA)</small> <b>CERTIFICATE OF WAIVER OR AUTHORIZATION (COA)</b>	
<small>ISSUED TO</small> U.S. Department of the Interior	Part 91
<small>ADDRESS</small> 300 East Mallard Drive Suite 200 Boise, ID 83706	
<p>This certificate is issued for the operations specifically described hereinafter. No person shall conduct any operation pursuant to the authority of this certificate, except in accordance with the standard and special provisions contained in this certificate, and such other requirements of the Federal Aviation Regulations not specifically waived by this certificate.</p>	
<small>OPERATIONS AUTHORIZED</small> Operation of the Hylio AG230, L3 FVR-90, Aerovel Flexrotor, Freefly Alta X, and various small Unmanned Aircraft Systems (UAS) in Class G airspace, at or below 1,199 feet above ground level (AGL), under jurisdiction of the Federal Aviation Administration (FAA) and local Air Traffic Control (ATC) facilities for the purpose of Public Aircraft operations.	
<small>LIST OF WAIVED REGULATIONS BY SECTION AND TITLE</small> 14 CFR 91.113(b) beyond visual line of sight (BVLOS) (see G.4.a.)	
<b>STANDARD PROVISIONS</b>	
<ol style="list-style-type: none"><li>1. A copy of the application made for this certificate shall be attached and become a part hereof.</li><li>2. This certificate shall be presented for inspection upon the request of any authorized representative of the FAA or of any state or municipal official charged with the duty of enforcing local laws or regulations.</li><li>3. The holder of this certificate shall be responsible for the strict observance of the terms and provisions contained herein.</li><li>4. This certificate is nontransferable.</li></ol>	
<b>Note:</b> This certificate constitutes a waiver of those Federal rules or regulations specifically referred to above. It does not constitute a waiver of any state law or local ordinance.	
<b>SPECIAL PROVISIONS</b>	
Special provisions A through H are set forth on the reverse side hereof.	
This certificate is effective from <u>November 18, 2024</u> to <u>March 5, 2025</u> and is subject to cancellation at any time upon notice by the Administrator or his/her authorized representative.	
<b>BY DIRECTION OF THE ADMINISTRATOR</b>

	<u>Tactical Operations Manager</u> (Title)

**Unmanned Aircraft System COA**  
**Public Agency**  
2023-WSA-11904 REV 3-COA

**Purpose:** To prescribe UAS operating requirements in the National Airspace System (NAS) for the purpose of Public Aircraft Operations. The holder of this COA will be referred herein as the “Proponent.”

Public Aircraft

1. A public aircraft operation is determined by statutes 49 U.S.C. § 40102(a)(41) and § 40125.
2. All public aircraft flights conducted under a COA must comply with the terms of the statute.
3. All flights must be conducted per the declarations submitted in the application and as specified in the following standard/special provisions.
4. This COA provides an alternate means of complying with Title 14 CFR § 91.113(b) for unmanned aircraft operations.
5. All operations will be conducted in compliance with Title 14 CFR § 91 and the conditions of the authorization issued herein. If the operator cannot adhere to any of these requirements, a separate FAA Form 7711-2 waiver application may be required.

**SPECIAL PROVISIONS**

**A. General.**

1. All personnel connected with the UAS operation must read and comply with the contents of this authorization and its provisions.
2. A copy of the COA including the special limitations must be immediately available to all operational personnel at each operating location whenever UAS operations are conducted.
3. This authorization may be canceled at any time by the Administrator, the person authorized to grant the authorization, or the representative designated to monitor a specific operation. As a general rule, this authorization may be canceled when it is no longer required, if there is an abuse of its provisions, or when unforeseen safety factors develop. Failure to comply with the authorization is cause for cancellation. The proponent will receive a written notice of cancellation.
4. During the time this COA is approved and active, a site safety evaluation/visit may be accomplished to ensure COA compliance, assess any adverse impact on air traffic control (ATC) or airspace, and ensure this COA is not burdensome or ineffective. Deviations accidents/incidents/mishaps, complaints, etc., will prompt a COA review or site visit to address the issue. Refusal to allow a site safety evaluation/visit may result in cancellation of the COA.

**Note:** This section does not pertain to agencies that have other existing agreements in place with the FAA.

5. Radiofrequency spectrum authorization is independent of the COA process and requires the proponent to obtain equipment certification and frequency assignments (licenses) in the Aeronautical Radionavigation, Aeronautical Mobile (Route), or Aeronautical Mobile Services, as appropriate, from the National Telecommunications and Information Administration (NTIA) for all radiofrequency devices, including the control link, ATC radios, transponders, detect and avoid systems, and navigation systems, used to support this COA (47 CFR Part 300).

**B. Operations.**

1. Unless otherwise authorized as a special provision, a maximum of one UA will be controlled:
  - a. From a single control station; and
  - b. By one pilot at a time.
2. When necessary, transit of airways and routes must be conducted as expeditiously as possible. The UAS should not plan to loiter on Domestic VOR Federal airways (Victor airways), Jet Routes, United States Area Navigation Routes (Q and T routes), or IFR and VFR Military Training Routes (IRs and VRs).
3. For flights operating on an instrument flight rules (IFR) clearance, the pilot in command (PIC) must ensure positional information in reference to established National Airspace System (NAS) fixes, navigational aids (NAVAID), and/or waypoints are provided to ATC. The use of latitude/longitude positions is not authorized, except oceanic flight operations.
4. Unless installed as part of a detect and avoid (DAA) system, the use of a traffic collision avoidance system in traffic advisory or traffic advisory/resolution advisory modes while operating an UA is prohibited.

**C. Safety of Flight.**

1. The operator or delegated representative is responsible for halting or canceling activity in the COA area if, at any time, the safety of persons or property on the ground or in the air is in jeopardy, or if there is a failure to comply with the terms or conditions of this authorization.
  - a. Any crew member responsible for performing see-and-avoid requirements for the UA must have and maintain instantaneous communication with the PIC.
  - b. Visual observers must be used at all times except in Class A airspace, active restricted areas, and warning areas designated for aviation activities, or as authorized in the special provisions (see provision (G.4a.)). Observers may either be ground-based or airborne in a chase plane. Visual Observers:
    - (1) Must be able to communicate distinctly to the pilot any instructions required to remain clear of conflicting traffic, using standard phraseology as listed in the Aeronautical Information Manual when practicable.
    - (2) The PIC is responsible to ensure visual observers are able to see the aircraft and the surrounding airspace throughout the entire flight.
    - (3) The PIC is responsible to ensure visual observers are able to provide the PIC with the UA's flight path, and proximity to all aviation activities and other hazards (e.g., terrain, weather, structures) sufficiently to exercise effective control of the UA to:
      - Comply with 14 CFR § 91.111, § 91.113, and § 91.115;
      - Prevent the UA from creating a collision hazard; and
      - Comply with all conditions of this COA.

**D. Notice to Air Missions (NOTAM).**

1. A Distant (D) NOTAM must be issued, not less than 24-hours but not more than 72-hours, in advance of conducting routine UAS operations, unless operations are contained within Class A airspace, active restricted areas, or warning areas that are designated on the appropriate aeronautical chart or airport directory. This requirement may be accomplished:
  - a. Through the operator's local base operations or (D) NOTAM issuing authority; or
  - b. By contacting the NOTAM Flight Service Station at 1-877-4-US-NTMS (1-877-487-6867). The issuing agency will require:
    - (1) Name and contact information of the pilot filing the (D) NOTAM request;
    - (2) Location, altitude, and operating area; and
    - (3) Time and nature of the activity.
2. The area of operation defined in the (D) NOTAM must only be for the actual area to be flown for each day defined by a point and the minimum radius required to conduct the operation.
3. Operator must cancel (D) NOTAMs when UAS operations are completed or will not be conducted.
4. For first responders only. Due to the immediacy of some emergency management operations, the (D) NOTAM notification requirement may be issued as soon as practicable before flight. If the issuance of a (D) NOTAM may endanger the safety of persons on the ground it may be excluded. If the (D) NOTAM is not issued, the proponent must be prepared to provide justification to the FAA upon request.

**E. Reporting Requirements.**

1. Documentation of all operations associated with UAS activities is required regardless of the airspace in which the UAS operates.
2. The proponent must submit the number of flights on a monthly basis through the COA application processing system (CAPS).

**F. Special Use Airspace.**

1. Coordination and de-confliction between Military Training Routes (MTR) and Special Use Airspace (SUA) is the operator's responsibility. When identifying an operational area, the operator must evaluate whether an MTR or SUA will be affected. In the event the UAS operational area overlaps an MTR or SUA, the operator will contact the scheduling agency in advance and as soon as practicable to coordinate and de-conflict. Approval from the scheduling agency is required for regulatory SUA, but not for MTRs and non-regulatory SUA. If there is no response to coordination efforts, the operator must exercise extreme caution and remain vigilant of all MTRs and/or non-regulatory SUAs.
2. Scheduling agencies for MTRs are listed in the Area Planning AP/1B, *Military Planning Routes, North and South America*. If unable to gain access to the AP/1B, contact the FAA with the instrument routes/visual routes affected at the following email addressing: [9-AJV-115-UASOrganization@faa.gov](mailto:9-AJV-115-UASOrganization@faa.gov). The FAA will provide the scheduling agency information. Scheduling agencies for SUAs are listed in the FAA Order JO 7400.10, *Special Use Airspace*.

**G. Air Traffic Control Requirements.**

1. Coordination Requirements:
  - a. Direct coordination with ATC is not required.
  - b. When operating within the confines of the following National Parks, the U.S. Department of the Interior must coordinate with aviation management and dispatch centers to ensure de-confliction from other aircraft:
    - (1) Grand Canyon National Park – Williams Dispatch
    - (2) Yosemite National Park – Yosemite Dispatch
    - (3) Sequoia-Kings Canyon National Park – Sequoia/Kings Dispatch
    - (4) Denali National Park – Alaska Regional Communications Center
    - (5) Glacier Bay National Park – Alaska Regional Communications Center
    - (6) Big Bend National Park – Big Bend Dispatch
2. Communication Requirements:
  - a. Unless otherwise directed, the issuance of the (D) NOTAM will satisfy ATC Communication requirements.
  - b. PIC should monitor as necessary the appropriate Common Traffic Advisory Frequency (CTAF) frequency.
3. Flight Planning Requirements:
  - a. The operator is responsible for ensuring that proposed UAS operating area does not enter a UAS flight restricted areas as described under CFR 14 Part 99.7, Temporary Flight Restriction (TFR), Special Security Instruction (SSI). Location and contact information for the TFR SSI is depicted on the FAA website: <https://udds-faa.opendata.arcgis.com>. Proponent must request permission and receive authorization via the contacts listed on the website prior to entering a TFR SSI.
  - b. It is the operator's responsibility for obtaining authorization from the appropriate authority for any operations that that may result in launching and/or landing from lands or waters administered by a Federal, State, or Public agency (National Park, State Park, Wilderness Area, and Wildlife Refuge, etc.).
  - c. Operations must only be conducted beyond the following distances from the airport reference point (ARP) of a public use airport, heliport, gliderport, or water landing port listed in the Airport/Facility Directory, Alaska Supplement, or Pacific Chart Supplement of the U.S. Government Flight Information Publications:
    - (1) 5 nautical miles (NM) from an airport having an operational control tower, or
    - (2) 3 NM from an airport having a published instrument flight procedure, but not having an operational control tower, or
    - (3) 2 NM from an airport not having a published instrument flight procedure or an operational control tower, or
    - (4) 2 NM from a heliport.

4. Procedural Requirements:

- a. Operations may be conducted Beyond the Visual Line of Sight (BVLOS) of the pilot under the following conditions:
  - BVLOS operations are authorized when conducted within a 14 CFR § 99.7 or 14 CFR § 91.137 TFR. The TFR and COA will serve as acceptable mitigations to 14 CFR § 91.113. It is the responsibility of the incident/on scene commander to develop approved airspace segregation and/or de-confliction plans within the TFR for manned/unmanned operations.
- b. Extended Line of Sight operation within a polygon is authorized if the following provisions are met:
  - (1) Observers must be stationed no farther than 2NM apart.
  - (2) PIC/observers can monitor 100% of airspace where UAS is operating.
  - (3) PIC/observers are not prevented from detecting traffic due to obstructions, i.e., terrain or vegetation.
  - (4) PIC is tracking the location of UAS at all times on the Ground Control Station (GCS).
  - (5) PIC has the ability to take evasive action to avoid conflict with an intruding aircraft based on feedback from the observer(s).
  - (6) PIC has the ability to immediately terminate the flight.
- c. Extended Line of Sight Operation from a single point up to 2NM from the GCS is authorized if the following provisions are met:
  - (1) PIC/observers must have visual contact down to the surface within the UAS operating polygon.
  - (2) PIC/observers are not prevented from detecting traffic due to obstructions, i.e., terrain or vegetation.
  - (3) PIC is tracking the location of UAS at all times on the GCS.
  - (4) PIC has the ability to take evasive action to avoid conflict with an intruding aircraft based on feedback from the observer(s).
  - (5) PIC has the ability to immediately terminate the flight.

**H. Lost Link/Emergency/Contingency Procedures.**

1. Lost Link Procedures: ATC does not need to be notified provided the PIC complies with the following provisions:
  - a. The aircraft must fly back to the home point and land.
  - b. The UAS lost link must be programmed to ensure that lost link flight does not fly over persons and the landing location is within the view of the PIC.
  - c. Lost link procedures must be programmed to remain within the operations area and approved altitude.
2. Loss of Sight: If a VO loses sight of the UAS, the PIC must be notified immediately, unless operating in accordance with provision G.4.a. If the UAS is visually reacquired promptly,

the mission may continue. If not, the PIC must immediately terminate the operation and the UAS must return to land at home point.

3. Loss of Communication between the PIC and VO: The PIC must execute lost link procedures. If communications are reestablished, the mission may resume. If communication cannot be promptly re-established, the flight must be terminated and the UAS must return to land at home point.
4. Fly-Away Procedures: In the event of a fly-away toward an area or airport where the PIC has determined the UAS may create a hazard to aviation or persons on the ground, the PIC will immediately notify the appropriate ATC facility. The PIC will provide the following information:
  - a. Approximate location.
  - b. Direction of flight.
  - c. Last known altitude.
  - d. Maximum remaining flight time.

#### **AUTHORIZATION**

This COA does not, in itself, waive any Title 14 CFR not specifically stated, nor any state law or local ordinance. Should the proposed operation conflict with any state law or local ordinance, or require permission of local authorities or property owners, it is the responsibility of the proponent to resolve the matter. This COA does not authorize flight within Temporary Flight Restrictions, Special Flight Rule Areas, regulatory SUA, or the Washington DC Federal Restricted Zone without pre-approval. The Proponent is hereby authorized to operate UAS in the NAS within the areas defined in the Operations Authorized section of the cover page.
