

No. 98-06

Subject:

Vandalism/Sabotage to Aircraft

Distribution:

All DOI Aviation Activities

Discussion:

Occasionally, aircraft are tampered with while parked and left unattended. Since aircraft security is always a concern, it is imperative that pilots and mechanics be alert to this possibility.

Recommendation:

1. By the book, preflights are essential.
2. When possible, park in a secure area and lock the aircraft.
