FEDERAL SUBSISTENCE CHINOOK SALMON FISHERY CLOSED IN THE SITUK RIVER

EMERGENCY SPECIAL ACTION

Under Authority of: 36 CFR 242.10 and .19
50 CFR 100.10 and .19

Emergency Special Action No: FSA 13-KS-03-22 Issued at: Yakutat, Alaska, May 12, 2022

Effective Date: 12:01 a.m. Wednesday, June 1, 2022
Expiration Date 11:59 p.m. Saturday, July 30, 2022 unless superseded by subsequent special action

EXPLANATION: This Emergency Special Action closes the Federal subsistence Chinook Salmon fishery in the Situk River from 12:01 a.m. Wednesday, June 1, 2022 through 11:59 p.m. Saturday, July 30, 2022 due to conservation concerns. During this closure, the use of bait and gillnets will not be allowed in the Situk River when fishing for other species, to minimize the incidental mortality of Chinook Salmon. Incidentally caught Chinook Salmon may not be removed from the water and must be released immediately. The Alaska Department of Fish and Game (ADF&G) has also taken actions in the State managed fisheries to reduce the harvest of Situk River Chinook Salmon.

REGULATION: 36 CFR 242.27(e)(12) and 50 CFR 100.27(e)(12) are temporarily modified to read, in addition:

(x) Situk River is closed to Chinook Salmon harvest from 12:01 a.m. Wednesday, June 1, 2022 through 11:59 p.m. Saturday, July 30, 2022. During this closure, the use of bait and gillnets will not be allowed in the Situk River when fishing for other species. All incidentally caught Chinook Salmon must be immediately returned to the water unharmed.

JUSTIFICATION:

ADF&G has set the biological escapement goal (BEG) for the Situk River drainage at 450-1,050 large (>28 inches) Chinook Salmon. Since 2010, the goal was achieved in 2013, 2014, 2017, 2019-2021 after restrictive management measures were implemented. The 2022 Situk River Chinook salmon preseason forecast is for a total run of 1,600 with a standard error of 1,020 large fish. Even though the 2022 forecast is within the escapement goal, the wide margin of error in the estimated run and chronic low returns require a conservative approach to ensure the BEG is achieved and allow as many Chinook Salmon as possible to reach the spawning grounds.

Federal Subsistence Board by delegation to:

Lee A. Benson
District Ranger
Yakutat Ranger District
May 12, 2022

DISTRIBUTION:

Anthony Christianson, Chair, Federal Subsistence Board; Southeast Alaska Regional Advisory Council; Jordan Rymer, L.E.O., USFS-Moose Pass; Paul Robbins, Public Affairs, USFS-Ketchikan; Robert Cross, Tongass Subsistence Program Leader, USFS-Petersburg; DeAnna Perry, Council Coordinator, USFS – Juneau; Greg Risdahl, Regional Subsistence Program Leader, USFS – Anchorage; Kevin Hood, Tribal Relations Program Manager, USFS – Juneau; Sue Detwiler, Assistant Regional Director, OSM – Anchorage; Robbin LaVine, Policy Coordinator, OSM – Anchorage; George Pappas, State Subsistence Liaison, OSM – Anchorage; Scott Ayers, Fisheries Division Lead, OSM – Anchorage; Kayla McKinney, Subsistence Outreach Coordinator/Public Affairs, OSM – Anchorage; Theo Matuskowitz, Regulations Specialist, OSM – Anchorage; Ben Mulligan, Deputy Commissioner, ADF&G; Mark Burch, Special Projects Coordinator, ADF&G; Jason Pawluk, Area Management Biologist, ADF&G Division of Sport Fish, Yakutat; Rick Hoffman, ADF&G Division of Commercial Fisheries, Yakutat; Andrew Gildersleeve Executive Director, Yakutat Tlingit Tribe; Jon Erickson, City Manager, City and Borough of Yakutat; James Capra, Chief of Police, Yakutat Department of Public Safety; Wendy Bredow, Chief Ranger, Glacier Bay National Park, National Park Service
