P R O C E E D I N G S

(Teleconference - 2/22/2022)

(On record)

MS. WESSELS: This is Katya back. I am not able so far to get in touch with Della. Della, did you join us by any chance while I was off the phone.

(No comments)

MS. WESSELS: Let's see which Council members are online right now. I know that Pat is online. Other Council members please identify yourself if you're online.

MS. SKINNER: Yes, Katya, this is Rebecca Skinner and I'm prepared to step in as Vice Chair if need be if we can't get a hold of Della.

MS. WESSELS: Okay. Thank you, Rebecca. Anyone else besides Rebecca and Patrick.

MR. ROHRER: Good morning, Sam Rohrer is here.

MS. WESSELS: Good morning, Sam.

MR. ROHRER: Good morning.

MS. WESSELS: Anyone else.

MR. KOSO: Yeah, this is Rick Koso, I'm online.

MR. PRICE: Hi, good morning. This is Chris Price in Unalaska.

MS. WESSELS: Okay, so we have Pat, Rick, Sam, Chris, Rebecca, anyone else.

MS. CHERNOFF: This is Coral Chernoff.

MS. WESSELS: Good morning, Coral.

Natasha are you online.

(No comments)

0003

1 MS. WESSELS: Okay. Rebecca, do you  
2 think -- let's wait until about 8:40 and if Della  
3 doesn't join us then let's begin the meeting, is that  
4 okay with you?

5  
6 MS. SKINNER: Yes, that sounds good.

7  
8 (Pause)

9  
10 MS. SKINNER: Della just texted that  
11 she'll need to call in at 9:00.

12  
13 MS. WESSELS: Okay. Let's just begin  
14 the meeting and then she can join us when she can.

15  
16 MS. SKINNER: Okay. Well, let's go  
17 ahead and get started then. The first item -- and,  
18 Katya, if there's something that I need to announce  
19 that I have skipped just let me know, but we'll go  
20 ahead and get the -- this is the February 22nd and  
21 23rd, Kodiak Regional Subsistence Advisory Council  
22 meeting, and the first item on the agenda is the  
23 invocation.

24  
25 I didn't have a chance to doublecheck  
26 who's going to do this but I think Pat, this is  
27 something you've done before, are you willing to do the  
28 invocation this morning.

29  
30 MR. HOLMES: Yes, I am.

31  
32 (Invocation)

33  
34 MS. SKINNER: All right, thank you,  
35 Pat. We'll go ahead then and call the meeting to  
36 order. This is Rebecca Skinner, Vice Chair, for the  
37 record. It's 8:41 a.m. Third item on the agenda is  
38 the roll call and establish quorum, Katya, if you could  
39 do that.

40  
41 MS. WESSELS: Thank you, Madame Chair.  
42 I am going to do the roll call. Pat Holmes.

43  
44 MR. HOLMES: Yep.

45  
46 MS. WESSELS: Rick Koso.

47  
48 (No comments)

49  
50

0004

1 MS. WESSELS: Rick Koso. I think I  
2 heard you earlier.

3  
4 MR. KOSO: Yeah, I'm sorry, I was on  
5 mute.

6  
7 MS. WESSELS: Oh, that's okay, thank  
8 you.

9  
10 Sam Rohrer.

11  
12 MR. ROHRER: I'm here.

13  
14 MS. WESSELS: Thank you. Chris Price.

15  
16 MR. PRICE: Here.

17  
18 MS. WESSELS: Coral Chernoff.

19  
20 MS. CHERNOFF: Here.

21  
22 MS. WESSELS: Thank you.

23  
24 Rebecca Skinner.

25  
26 MS. SKINNER: Here.

27  
28 MS. WESSELS: Thank you.

29  
30 Della Trumble.

31  
32 (No comments)

33  
34 MS. WESSELS: Della is going to join us  
35 shortly, thank you.

36  
37 Natasha Hayden.

38  
39 MS. HAYDEN: Here.

40  
41 MS. WESSELS: Thank you. With seven of  
42 the eight seated members present a quorum has been  
43 established. Thank you, Madame Chair.

44  
45 MS. SKINNER: All right, thank you,  
46 Katya. The next item on the agenda is the welcome and  
47 introductions. So first of all I'll welcome everyone  
48 to our RAC meeting today. For introductions I'll start  
49 with the Council and then I think usually we go on to  
50

0005

1 see who else is on the phone. Council member reports  
2 will be later on the agenda so for the introductions  
3 you can keep it brief, state your name, what area  
4 you're from and anything else you want the Council and  
5 public to know about yourself as we start the meeting  
6 here.

7

8 So I'm going to go in the order that I  
9 wrote people down on my list which is not any  
10 particular kind of order. But the first name I'd  
11 written down was Sam.

12

13 MR. ROHRER: Okay, thanks, Rebecca.  
14 Yeah, my name is Sam Rohrer. I live on Kodiak and I  
15 live in the town of Kodiak. I spend about six or seven  
16 months out of the year on the west side of the island  
17 though. So thanks.

18

19 MADAME CHAIR TRUMBLE: All right, thank  
20 you, Sam. Next up is Pat.

21

22 MR. HOLMES: Yeah, Pat Holmes. I live  
23 in Kodiak and since '63 I've lived and worked in almost  
24 every community and a lot of ones that don't exist  
25 anymore from Cape Douglas to Attu and up in the Pribis  
26 and I've rattled around a lot. Now I'm almost 80 and I  
27 don't travel as much but -- most of my acquaintances  
28 have passed away and anyway, but, subsistence remains a  
29 passion for me.

30

31 Thank you.

32

33 MS. SKINNER: Thank you, Pat. Next up  
34 is Rick.

35

36 MR. KOSO: Yeah, I'm Rick Koso  
37 representing Adak. I spend quite a bit of time in Cold  
38 Bay during the summers. I still commercial fish out of  
39 King Cove on and off there during the summers. I'm  
40 still a resident and a voting member of Adak. So  
41 that's all I have to say, thank you.

42

43 MS. SKINNER: Thank you, Rick. Next up  
44 is Chris.

45

46 MR. PRICE: Hi, good morning. Hi, this  
47 is Chris Price from Unalaska. Privileged to be on the  
48 Council with you folks and I appreciate all your time.  
49 I am a subsistence harvester here in Unalaska and work  
50

0006

1 for the tribe here and, again, it's a great privilege  
2 to be a part of this group.

3

4 Thank you.

5

6 MS. SKINNER: Thank you, Chris. Next  
7 up is Coral.

8

9 MS. CHERNOFF: Hi, I'm Coral Chernoff.  
10 I live here in Kodiak, Alaska. I raised three boys who  
11 are currently all out on the Chain fishing, they're  
12 fishermen. I am an indigenous artist and I have a  
13 studio where I teach art now. And I'm very much  
14 involved in subsistence hunting and eating, as well as  
15 I do medicinal plants. Yeah, and I'm very happy to be  
16 here.

17

18 MS. SKINNER: All right, thanks, Coral.  
19 Next up is Natasha.

20

21 MS. HAYDEN: Good morning. Natasha  
22 Hayden. I am Alutiiq/Supiaq born and raised in Kodiak.  
23 My family comes from the old village of Afognak. I'm  
24 on the tribal council for eight years and I've been  
25 part of (indiscernible - cuts out) pretty much my whole  
26 life.

27

28 Thank you.

29

30 MS. SKINNER: Thanks, Natasha. And  
31 just so you know your line was cutting out pretty badly  
32 so that may be -- I don't know if you can -- if it's a  
33 reception issue. Okay.

34

35 And my name is Rebecca.....

36

37 MS. HAYDEN: I'll -- go ahead, sorry  
38 Rebecca. I'm going to go ahead and hang up and try  
39 calling back in.

40

41 MS. SKINNER: Okay, thank you. All  
42 right. And my name is Rebecca Skinner. I was born and  
43 raised in Kodiak. And I think I've been on the RAC  
44 here, maybe this is going on my seventh or eighth year  
45 and very happy to be here today.

46

47 Okay. So to do the rest of the  
48 introductions in a fairly orderly manner, I'm going to  
49 go down the list of agencies that are -- that appear on  
50

0007

1 Page 2 of the agenda. I'm just going to go in order of  
2 what's listed there.

3

4 So the first agency listed is tribal  
5 governments. Do we have representatives from tribal  
6 governments on the call today.

7

8 (No comments)

9

10 MS. SKINNER: All right, hearing none,  
11 the next group is Native organizations. Do we have any  
12 representatives from Native organizations on the line  
13 today.

14

15 MS. PETERSON: Good morning. This is  
16 Amy Peterson. I'm the Community Affairs Liaison for  
17 Koniag. And my primary position is cross sharing  
18 information between the Kodiak island rural  
19 communities, tribes and corporations, as well as the  
20 Kodiak National Wild [sic] Refuge and other  
21 stakeholders. I have -- I am re -- I am currently  
22 living in Kodiak part-time and Old Harbor part-time.  
23 I'm a resident of Old Harbor for 31 years. Thank you  
24 for having me.

25

26 MS. SKINNER: All right, thank you,  
27 Amy. Are there any other tribal Native organization  
28 representatives.

29

30 (No comments)

31

32 MS. SKINNER: Okay, hearing none. The  
33 next grouping is the U.S. Fish and Wildlife Service,  
34 and I'll start with the Maritime National Wildlife  
35 Refuge.

36

37 (No comments)

38

39 MS. SKINNER: Do we have anyone on from  
40 the Maritime National Wildlife Refuge.

41

42 (No comments)

43

44 MS. SKINNER: Okay, hearing none. The  
45 next is Izembek National Wildlife Refuge.

46

47 (No comments)

48

49 MS. SKINNER: Okay, hearing none. The

50

0008

1 next is the Kodiak National Wildlife Refuge.

2

3 MR. BRADY: Good morning. This is Mike  
4 Brady, I'm the Refuge Manager at Kodiak National  
5 Wildlife Refuge.

6

7 MS. SKINNER: Good morning, Mike.

8

9 MR. PYLE: Good morning. This is Bill  
10 Pyle, Supervisory Wildlife Biologist with Kodiak  
11 Refuge.

12

13 MS. SKINNER: Good morning, Bill.  
14 Okay, it sounds like that's it from the Kodiak National  
15 Wildlife Refuge. The next grouping is the Alaska  
16 Department of Fish and Game.

17

18 MS. KRUEGER: Good morning. This is  
19 Kelly Krueger and Mark Witteveen with the Alaska  
20 Department of Fish and Game, Division of Sportfish here  
21 in Kodiak.

22

23 MS. SKINNER: Good morning, Kelly.

24

25 MR. LAWSON: Good morning. This is  
26 Tyler Lawson and Lisa Fox with CommFish in Kodiak.

27

28 MS. SKINNER: Thank you. Anyone else  
29 from.....

30

31 MR. BURCH: Hello. This is Mark Burch  
32 from the Palmer office, Department of Fish and Game.  
33 Thank you.

34

35 MS. SKINNER: Yep, thank you, Mark. Is  
36 there anyone else on from Fish and Game.

37

38 (No comments)

39

40 MS. SKINNER: Okay, hearing none. The  
41 next group is the Office of Subsistence Management.

42

43 MS. WESSELS: Good morning. This is  
44 Katya Wessels, and I'm the Council Coordination  
45 Division Supervisor with the Office of Subsistence  
46 Management. Today I'm serving as the Designated  
47 Federal officer for this meeting. But I also would  
48 like to introduce to you your new Coordinator that --  
49 we just hired a new Coordinator so the Kodiak/Aleutians  
50

0009

1 Council has a new Coordinator, her name is Leigh Honig  
2 and she is not leading this meeting because she just  
3 started about a week and a half ago so it would be kind  
4 of hard for her to lead this meeting but she is here,  
5 she's listening, she's taking notes, she's helping as  
6 much as she can. And, Leigh, could you please  
7 introduce yourself.

8

9 Thank you.

10

11 MS. HONIG: Good morning, Madame  
12 Chairwoman and members of the Board. Very nice to meet  
13 all of you. And like Katya said my name is Leigh Honig  
14 and I am very excited to be working with all of you.

15

16 Thank you.

17

18 MS. SKINNER: Welcome, Leigh. All  
19 right, so those are all of the agencies that are listed  
20 on the agenda there, are there other agencies that  
21 didn't list that would like to introduce yourselves at  
22 this point.

23

24 MS. WESSELS: Madame Chair, this is  
25 Katya. There might be other Office of Subsistence  
26 Management employees online.

27

28 MS. SKINNER: Oh, right, yes I  
29 apologize, go ahead.

30

31 MR. LIND: (In Native) Good morning,  
32 Madame Chair. This is Orville Lind, Native Liaison  
33 from Office of Subsistence Management. Good morning,  
34 everyone.

35

36 MS. SKINNER: Thank you, Orville. I  
37 apologize. In my fervor to be efficient I should not  
38 have stepped on introductions there. Are there other  
39 individuals from OSM on the line.

40

41 MR. STONE: Good morning. This is  
42 Jarred Stone, Fisheries Biologist with the Office of  
43 Subsistence Management.

44

45 MS. SKINNER: Good morning, Jarred.

46

47 MR. ROBERTS: Good morning. This is  
48 Jason Roberts, Anthropologist with the Office of  
49 Subsistence Management.

50

0010

1 MS. SKINNER: Good morning.

2

3 MS. LAVINE: Good morning. This is  
4 Robbin LaVine, Subsistence Policy Coordinator with the  
5 Office of Subsistence Management.

6

7 MS. HOLMAN: Good morning. This is  
8 Kendra Holman, Wildlife Biologist with the Office of  
9 Subsistence Management.

10

11 REPORTER: Yeah, hangon, sorry but.....

12

13 MS. SKINNER: I'm sorry whoever.....

14

15 MS. WESSELS: Sorry, this is Katya. We  
16 could barely hear you.

17

18 MS. HOLMAN: Is this any better?

19

20 REPORTER: No. So Kendra, when you  
21 come in you have a loud buzz that's coming with your  
22 phone. I've noticed that at other meetings and I've  
23 asked.....

24

25 MS. HOLMAN: Interesting. Interesting.  
26 I'll have to see what I can do about that.

27

28 REPORTER: Thank you.

29

30 MS. HOLMAN: This is Kendra Holman,  
31 Wildlife Biologist with the Office of Subsistence  
32 Management.

33

34 MS. SKINNER: All right, thank you,  
35 Kendra.

36

37 MR. PAPPAS: Good day. This is George  
38 Pappas OSM.....

39

40 MR. VICKERS: Good morning everyone.  
41 This is Brent.....

42

43 MR. PAPPAS: .....State Subsistence  
44 Liaison.

45

46 MS. SKINNER: Thank you, George.

47

48 MR. VICKERS: I'll try again. This is  
49 Brent Vickers. I am the Supervisory Anthropologist at  
50

0011

1 OSM and I'll also be representing the Leadership Team  
2 today for OSM so good morning.

3

4 MS. SKINNER: All right, good morning.  
5 All right, are there anymore.....

6

7 MR. GERKEN: Good morning. This is  
8 John Gerken -- sorry, Rebecca.

9

10 MS. SKINNER: Sorry, go ahead.

11

12 MR. GERKEN: This is John Gerken with  
13 the Fish and Wildlife Service. I'm the Fisheries  
14 Biologist, Federal In-Season Manager for the Aleutians  
15 area. Good morning.

16

17 MS. SKINNER: Thank you. All right, and  
18 I realize -- is there anyone from BIA online.

19

20 MS. PETRIVELLI: Yes. Pat Petrivelli,  
21 Subsistence Anthropologist from Anchorage.

22

23 MS. SKINNER: All right, good morning,  
24 Pat.

25

26 MS. PETRIVELLI: Good morning.

27

28 MS. SKINNER: Okay. Are there any  
29 other agency representatives that have not introduced  
30 themselves yet.

31

32 MR. HARRIS: Good morning. This is  
33 Frank Harris. I'm.....

34

35 MS. WILLIAMS: Yes, good morning. This  
36 is Allison Williams. I'm a Wildlife Biologist at  
37 Izembek National Wildlife Refuge. And we also have  
38 Letecia Melendez, our Deputy Refuge Manager on the  
39 line. I apologize for not being quick enough to hit  
40 the mute button earlier but we are present and excited  
41 to be here.

42

43 MS. SKINNER: All right, thank you,  
44 Allison.

45

46 MR. HARRIS: Good morning. This is  
47 Frank Harris with the U.S. Fish and Wildlife Service.  
48 I'm a Fish Biologist with the Southern Alaska Fish and  
49 Wildlife Service Field Office.

50

0012

1 MS. SKINNER: All right, thank you.  
2 All right, is there anyone else.

3  
4 MS. KLEIN: This is Jill Klein. I'm  
5 also with U.S. Fish and Wildlife Service out of the  
6 Anchorage office. I'm the Regional Subsistence  
7 Coordinator.

8  
9 MS. SKINNER: Thank you. All right,  
10 anyone else.

11  
12 (No comments)

13  
14 MS. SKINNER: Okay. And then if  
15 there's anyone else on the phone regardless of your  
16 affiliation, anyone who would like to introduce  
17 themselves I'll open the floor for that.

18  
19 (No comments)

20  
21 MS. SKINNER: Okay. All right so that  
22 was the welcome and introduction section. We've got  
23 about three minutes before 9:00 o'clock when hopefully  
24 Della will be joining. The next item is review and  
25 adopt the agenda. And I just want to note that Katya  
26 did send out an updated agenda this morning via email  
27 so hopefully all of the RAC members have the agenda.  
28 Is there a motion to adopt the agenda.

29  
30 MR. ROHRER: This is Sam. I'll make a  
31 motion to adopt the agenda.

32  
33 MS. SKINNER: Thank you, Sam.

34  
35 MR. KOSO: I'll second that, this is  
36 Rick.

37  
38 MS. SKINNER: Is there a second --  
39 okay.

40  
41 MR. KOSO: Yeah, this is Rick, second.

42  
43 MS. SKINNER: Okay, thank you, Rick.  
44 Katya, can I just ask if there's.....

45  
46 MS. WESSELS: Madame Chair, this is  
47 Katya.

48  
49 MS. SKINNER: Yes, go ahead. Yep, go  
50

0013

1 ahead.

2

3

4

5

6

7

8

9 MS. WESSELS: I was going to say, may I  
10 read into the record the additions to the agenda.  
11

12

13

14

15

16

17

18

19

20

21

22

23

24

25

26

27

28

29

30

31

32

33

34

35

36

37

38

39

40

41

42

43

44

45

46

47

48

49

50

MS. WESSELS: I was going to say, may I read into the record the additions to the agenda.

MS. SKINNER: Yes, please do.

MS. WESSELS: So the new updated agenda is to add an item 10B under old business, Council application and nomination open season update. That's the first item.

The next item is to add under new business, Item 11C, Fishery Closure Review Discussion by OSM.

And then add under new business, Item 11D, Call for Nonrural Determination Proposals. Also presented by OSM.

Then next item to add under 12, agency reports, under tribal governments, add Qwalangin Tribe update on McLees Lake Project.

The next item to add also under agency reports, under C(3) Kodiak National Wildlife Refuge Proposed Administrative and Regulatory Changes to the Kodiak Fishing Regulations for 2023/2025, and you have that in your supplemental materials. They were mailed to you, priority mail, about a week or so ago. Hopefully you received it. They're also available on our website.

Then under agency reports as well, under 12D(3) Update on the Alaska Peninsula Island Salmon Fisheries presented by ADF&G Tyler Lawson.

And that's all of the agenda items that are proposed to be added to the earlier published agenda.

Thank you.

MS. SKINNER: All right, thank you, Katya.

MADAME CHAIR TRUMBLE: Good morning everybody this is Della, sorry I was late but I am here now so go ahead.

0014

1 MS. SKINNER: All right, Della. Okay,  
2 well, I'll finish the agenda Item No. 5 and then I'll  
3 hand it back over to you then. So we had a motion and  
4 a second, is there any further discussion.

5  
6 MR. HOLMES: Pat here.

7  
8 MS. SKINNER: Go ahead, Pat.

9  
10 MR. HOLMES: Yeah, on the Kodiak Refuge  
11 -- nevermind -- I didn't receive the -- I'm down in the  
12 States, Patty had to have an operation on her back a  
13 couple weeks ago but I've been playing catch up.  
14 George Pappas got things forwarded down to me but I  
15 don't think that my -- that proposed Administrative  
16 Regulatory Changes to Kodiak Fishing Regs from the  
17 Refuge, I didn't receive that. And I'll try and get it  
18 out once we have a break here, off of my 94 year old  
19 mother-in-law's computer, which is -- you almost have  
20 to crank it.

21  
22 But my main thought is I had talked to  
23 a lot of folks over the last four months, and, in  
24 particularly, recently, about the Federal closure  
25 reviews and they were not on the original agenda and so  
26 I think that might catch some people short because, you  
27 know, if you looked on the website and looked at the  
28 agenda that wasn't on there previously. So I guess  
29 we'll get an update as to what's going on but I think  
30 that -- I tried to contact the local Fish and Game  
31 Advisory Chair, they did have a meeting with -- or a  
32 question and answer with OSM prior to our last meeting,  
33 I believe, and had some questions -- or maybe it was  
34 shortly after -- I'm sorry I'm getting old, on that,  
35 that they hadn't had answered, but I don't know that  
36 there's been success with communicating with that. And  
37 I believe Chris can update us later on, I think they  
38 may still be short a quorum out at Unalaska because we  
39 were going to try for some outreach through the Fish  
40 and Game Advisory Committees and through the other  
41 folks. So I think getting this on the agenda this  
42 morning, it's deserving of discussion, but I think it  
43 might catch some of the public unaware.

44  
45 Thank you, Madame Chair.

46  
47 MS. SKINNER: Okay. And just to  
48 clarify, Pat, that was more of a comment, you're not  
49 asking to pull anything off of the agenda, are you?  
50

0015

1 MR. HOLMES: No, ma'am. I'm just  
2 making a comment for the record.

3  
4 MS. SKINNER: Okay, thank you, Pat.  
5 Any further discussion.

6  
7 (No comments)

8  
9 MS. SKINNER: Okay. Is there any  
10 objection to approving the agenda as presented.

11  
12 (No objections)

13  
14 MS. SKINNER: Okay, hearing none, the  
15 agenda is adopted. And, Della, I will hand it back  
16 over to you.

17  
18 MADAME CHAIR TRUMBLE: Thank you,  
19 Rebecca. Good morning, everyone. I'm sorry I'm late.  
20 I have to be honest with you, I thought this meeting  
21 started at 9:00 but apparently it's 8:30. The next  
22 item that you have on your agenda is the election of  
23 officers, so, Katya, I think this gets turned over to  
24 you.

25  
26 MS. WESSELS: Yes, thank you, Madame  
27 Chair. Members of the Council. For the record, my  
28 name is Katya Wessels and I'm the Council Coordination  
29 Supervisor with the Office of Subsistence Management.  
30 And for the purposes of this meeting I am the  
31 Designated Federal Officer.

32  
33 So the Council has the charter as was  
34 approved in 2021 and in accordance with the Council  
35 charter Council members elect the Chair, Vice Chair and  
36 Secretary for a one year term. The term starts at the  
37 beginning of the calendar year. I'm going to open, in  
38 a second, the nominations for the Council Chair, but  
39 first I would just like to let you know that Council  
40 meetings are usually run according to the Robert's  
41 Rules of Order and the Robert's Rules of Order says  
42 that nominations need not to be seconded. When we call  
43 for nominations, you just nominate a Council member to  
44 be a Chair and I will repeat their name and then after  
45 the nominations are closed we will put those  
46 nominations to vote.

47  
48 So at this point I would like to open  
49 the floor for nominations of the Council Chair.

50

0016

1 MR. HOLMES: This is Pat, I'd like to  
2 nominate Della for Chair.

3  
4 MS. WESSELS: Okay. Della Trumble has  
5 been nominated for Council Chair. Any other  
6 nominations.

7  
8 (No comments)

9  
10 MS. WESSELS: Okay, hearing none, I  
11 would like to close this call for nominations for the  
12 Council Chair. Ms. Della Trumble has been nominated to  
13 serve as the Council Chair, all in favor say aye.

14  
15 IN UNISON: Aye.

16  
17 MADAME CHAIR TRUMBLE: All right,  
18 everyone, thank you. Thank you, Katya.

19  
20 MS. WESSELS: Okay. Yeah, anyone  
21 opposed say -- same sign.

22  
23 (No opposing votes)

24  
25 MS. WESSELS: No opposition. Madame  
26 Chair, I'm going to pass this gavel to you. Thank you.

27  
28 MADAME CHAIR TRUMBLE: Thank you,  
29 Katya. And thank you everyone. I hope I'll be able to  
30 do due diligence. This past year has been pretty busy  
31 for me but we'll continue forward and thank you  
32 everyone. Thank you, Rebecca, for Chairing the meeting  
33 until I got here.

34  
35 Vice Chair. I'll open the floor for  
36 Vice Chair, do we have any nominations.

37  
38 MR. KOSO: I'd like to nominate  
39 Rebecca.

40  
41 MADAME CHAIR TRUMBLE: Nomination made  
42 by Rick Koso. Are there any other nominations.

43  
44 (No comments)

45  
46 MADAME CHAIR TRUMBLE: Hearing  
47 none.....

48  
49 MR. HOLMES: No, I.....  
50

0017

1 MADAME CHAIR TRUMBLE: Oh, Pat, go  
2 ahead.

3  
4 MR. HOLMES: Oh, I was just going to --  
5 I don't know if we need to second it but I'd second it  
6 because Rebecca has a unique ability to be able to do  
7 four things at once and still keep track so she's a  
8 good Vice Chair.

9  
10 MADAME CHAIR TRUMBLE: Thank you, Pat.  
11 Hearing no other nominations, Rebecca, are you good  
12 with the Vice Chair.

13  
14 MS. SKINNER: I am. And thank you  
15 everyone.

16  
17 MADAME CHAIR TRUMBLE: Okay, thank you.  
18 Then we'll go ahead, anybody opposed.

19  
20 (No opposing votes)

21  
22 MADAME CHAIR TRUMBLE: We'll go ahead  
23 and move. Open nominations on the floor for Secretary.

24  
25 MR. HOLMES: I'd like to nominate.....

26  
27 MS. SKINNER: Madame Chair, I'd like to  
28 nominate -- sorry, go ahead.

29  
30 MR. HOLMES: I was going to do Melissa  
31 Berns.

32  
33 MS. SKINNER: I was going to do Chris  
34 Price because I don't think Melissa -- she's not listed  
35 on the roster.

36  
37 MR. HOLMES: Oh, okay, I missed that.

38  
39 MADAME CHAIR TRUMBLE: Pat, Melissa  
40 didn't renew her application to reapply, so, yeah.

41  
42 MR. HOLMES: Okay, well, in that case I  
43 will -- I'd like to nominate Natasha.

44  
45 MADAME CHAIR TRUMBLE: So Pat nominated  
46 Natasha, Rebecca nominated Chris, are there any other  
47 nominations.

48  
49 MS. HAYDEN: This is Natasha. I would  
50

0018

1 like to defer to Chris if possible.

2

3 MADAME CHAIR TRUMBLE: Okay.

4

5 MR. PRICE: Natasha I was going to  
6 defer to you.

7

8 (Laughter)

9

10 MS. HAYDEN: I beat you to it Chris.

11

12 (Laughter)

13

14 MR. PRICE: I don't know if there's any  
15 other nominations for the -- we're talking about the  
16 Secretary?

17

18 MADAME CHAIR TRUMBLE: That's correct,  
19 Chris.

20

21 MR. PRICE: Yeah.

22

23 MADAME CHAIR TRUMBLE: Okay, hearing  
24 no other nominations, Chris, I believe you are the  
25 Secretary, is there anyone that opposes.

26

27 (No opposing votes)

28

29 MADAME CHAIR TRUMBLE: Hearing none,  
30 the officers are myself as Chair, Rebecca as Vice Chair  
31 and Chris Price as Secretary.

32

33 (Teleconference interference -  
34 participants not muted)

35

36 MADAME CHAIR TRUMBLE: So, Katya, just  
37 for the record, do we need a motion to approve the  
38 officers as elected.

39

40 MS. WESSELS: No, we do -- Madame  
41 Chair, thank you. No, we do not need a motion.

42

43 MADAME CHAIR TRUMBLE: All right, thank  
44 you. Moving on we have the review and approve previous  
45 meeting minutes, Tab No. 3. Do I hear a motion to  
46 approve the minutes and then we can go into discussion.

47

48 MS. SKINNER: I would move to approve  
49 the minutes for the September 27th, 28th, 2021 RAC

50

0019

1 meeting.

2

3

MR. KOSO: I second that.

4

5

6

MR. HOLMES: I'm going to make a couple comments.

7

8

9

MADAME CHAIR TRUMBLE: Okay. Motion's been -- go ahead, Pat.

10

11

12

13

14

15

16

17

18

19

MR. HOLMES: On the minutes that we had, at our previous meeting, I noted and some of the other folks that our agenda has moved into a very strict active minutes, is that what you call, where you only have the topics down and very little discussion. And I had suggested that we have a little more discussion on items, so it's in the record, so then a person doesn't have to go and request the transcript through the Federal government.

20

21

22

23

24

25

26

27

And one of the items that, too, that I'd like to comment on is that there wasn't any discussion about the RAC members comments on closures and difficulties that that might involve. And then the -- we did get some comments from the Fish and Game Local Advisory Committee, and, anyway some of those things didn't show up.

28

29

30

31

32

And so I really think that there should be a little more meat in these so that it accurately reflects what was discussed rather than just saying there was a discussion.

33

34

35

36

37

38

39

40

41

42

43

44

45

46

47

48

49

50

And, let's see, pardon me it's just hard to remember -- oh, discussed that I said my daughter and her family came down with Covid, I don't have a daughter and so maybe that was in reference to somebody I fished with. I haven't any idea. And just little details like that that really need to have a little more work. Like when we get down to the 2022 Fisheries Resource Monitoring Program, probably could have used some editing down at the end of that. It says -- it's discussing Resource Monitoring Program and then down at the end it says the proposed subsistence harvest survey should be inserted there, Ouzinkie and Port Lyons, because it doesn't make any sense to say proposed subsistence harvest in Ouzinkie and Port Lyons -- I mean the whole question was monitoring it.

0020

1                   And I think that's the gist of my  
2 comments, but it could use a little more work, and  
3 maybe bounce the minutes off of the Secretary or --  
4 anyway, it needs more meat the next time.

5

6                   Thank you.

7

8                   MADAME CHAIR TRUMBLE: Thank you, Pat.  
9 Are there any other comments in regards to the minutes.

10

11                   (No comments)

12

13                   MADAME CHAIR TRUMBLE: And maybe just  
14 for the record I do recall Pat bringing this up last  
15 time, so hopefully we can take note of it and be able  
16 to reflect his points that he has brought up. Hearing  
17 that we had a motion to approve the minutes, Rebecca  
18 can we just change that to as amended by Pat, or  
19 recommended amendments.

20

21                   MS. SKINNER: Yeah, I think as  
22 corrections are noted I think it would not be  
23 inappropriate to just reflect those and those would be  
24 encompassed in the motion>

25

26                   MADAME CHAIR TRUMBLE: Okay, thank you.  
27 Motion made by Rebecca, second by Rick Koso. Call for  
28 question.

29

30                   MR. KOSO: Question.

31

32                   MADAME CHAIR TRUMBLE: Question's been  
33 called. All in favor signify by saying aye.

34

35                   IN UNISON: Aye.

36

37                   MADAME CHAIR TRUMBLE: Opposed, same  
38 sign.

39

40                   (No opposing votes)

41

42                   MADAME CHAIR TRUMBLE: Motion carried.  
43 The next item on the agenda are Council member reports,  
44 let me find my list here.

45

46                   Pat, do you want to go ahead and start  
47 with you, I'll just go down the list by the names we  
48 have on our roster.

49

50

0021

1 MR. HOLMES: Okay. I'd like to put in  
2 some thanks to the Sunaq Tribe because this year they  
3 implemented a subsistence home pack program from their  
4 little fish processing plant for elders in the  
5 community. And I also didn't -- wasn't able to get out  
6 for silver season and commercial fishermen, and former  
7 school teacher, Nate, and his wife, asked me if I  
8 needed some silvers and they brought me 20 and so I  
9 gave two-thirds of those away to other old geezers that  
10 needed some.

11  
12 A few folks got some deer. Not too  
13 many, it still needs time to recover. All I do anymore  
14 is maybe a goat hunt, or if somebody takes me out to  
15 their cabin, but the only two bucks that I saw were  
16 right in the middle of Woodland Acres, they were as fat  
17 as could be.

18  
19 But anyway it would be great, I hope,  
20 and if our Council doesn't have a lot to say about who  
21 gets to replace things, but it would be really good,  
22 because traditionally we've had somebody from Old  
23 Harbor, to replace -- hopefully to replace Melissa  
24 Berns, and I was hoping maybe somebody from the  
25 Peninsula, like down at the False Pass, maybe the  
26 Hoblet family, they've always been active in fisheries  
27 and local subsistence and commercial fishing and  
28 hunting issues, so that would be another good spot or  
29 maybe we could get some applicants from the Pribilofs  
30 again because we had Mr. Zuch (ph), and was quite  
31 active when he was on so I just hope we can find some  
32 good replacements.

33  
34 Thank you, Madame Chair and sorry to  
35 talk so much.

36  
37 MADAME CHAIR TRUMBLE: Thank you, Pat.  
38 Rick Koso.

39  
40 MR. KOSO: Yeah, hi, Board Members,  
41 this is Rick Koso here. You know Adak is, we've had a  
42 little bit of problems out there since we didn't have  
43 the fish plant working the last couple of years. Being  
44 a member of the Adak Community Corporation we've been  
45 working on that to try to get a fish plant reopened, at  
46 least on the commercial side.

47  
48 As far as the subsistence goes on the  
49 fisheries, you know, there's plenty of halibut and  
50

0022

1 salmon and stuff that people are able to get without  
2 too much of a problem outside of logistics getting  
3 there, and the expense of that.

4

5                   But overall -- and I did speak to Lisa  
6 Spittler (ph) in Adak there, she's been living there  
7 and working for the Feds for quite some time now,  
8 probably as long as I've been here since 2001, on and  
9 off, and she's brought up a problem of the ptarmigan  
10 out there. That the birds have really dropped in  
11 numbers, she's a little concerned about that, or I  
12 guess I should say she's a lot of concerned. She's  
13 been dealing with a couple of the local guides there  
14 and they said they cut back on getting their bag  
15 limits, daily limits, which is 20, 40 in possession so  
16 they cut that in half on their own and dropped it to  
17 10. So they've been working with her to try to get it  
18 down. But, you know, we don't see that that's going to  
19 solve that problem, but unfortunately we don't have  
20 another -- our next submittal of proposals for that  
21 wouldn't be until 2023. So I don't know what we can do  
22 right now. I think a couple options is to cut the  
23 season shorter and get the bag limit down but this has  
24 been happening on a lot of the other islands too. So  
25 the ptarmigan are just disappearing. So they don't  
26 really have a clue why that happened.

27

28                   So anyways as far as the caribou goes,  
29 we're always concerned on the caribou, especially for  
30 the locals out there. They've been using the caribou  
31 for years for their survival on meat because of the  
32 expense of getting anything in Adak. So that's very  
33 important to them. But I've been working with Steve,  
34 we have a meeting coming up March 1st with Steve  
35 Delehanty and the Aleut Corporation Board and a couple  
36 other entities that are involved in the caribou and so  
37 we'll be talking about the caribou on March 1st of this  
38 year here.

39

40                   I don't have any more to say.

41

42                   Thank you.

43

44                   MADAME CHAIR TRUMBLE: Thank you, Rick.  
45 Is there any comments in regards to Rick's report.

46

47                   (No comments)

48

49                   MADAME CHAIR TRUMBLE: Sam, are you

50

48

49

50

MR. ROHRER: Yes, I am, thanks, Della.

I don't have a lot to report. I do want to say sorry to have missed the fall meeting. The fall meetings are always tough for me with hunting schedules and we had a lot of challenging weather and I was goat hunting and it was -- well, it was a challenging season just due to the weather but, anyway, sorry to have missed that meeting, but happy to be back here for this one.

Not a whole lot to report. Just to talk a little bit briefly about field observations for deer numbers. You know Kodiak's continued to have reduced deer numbers. Pat kind of alluded to that there. Particularly on the west side where I spend most of my time, we've just been hit by a series of bad winters. We're starting to see some recovery. This last winter we saw a few more than normal, than what we've seen in the last few years so that was good. This winter, it's just been a mixed bag. We've had a lot of really cold weather but then we've had some pretty warm spells like we're in right now. So it'll be interesting to see what happens with our deer. I was just communicating with a friend of mine who's down on the west side last night and the snow level's up and things are warm over there, snow's melting and he is finding some winterkill deer but not a whole lot. So we're optimistic that our numbers will continue to just slowly creep back.

The only other thing is just hearing in the community a lot of complaints about charter -- the charter fleet hitting deer pretty hard, and that was complaints coming from island-wide. Probably the most complaints focusing on the south end of the island but up and down the east and west side as well, just lots and lots of charter boats bringing lots of folks over to shoot deer on the beaches late in the season. So quite a bit of frustration -- we're hearing quite a bit of frustration from locals on that.

Other than that, that's all I have.

(Pause)

MS. SKINNER: Della, did we lose you.

(No comments)

0024

1 MS. SKINNER: Can anyone else hear me.

2

3 MADAME CHAIR TRUMBLE: Hello.

4

5 MS. SKINNER: Oh, there you are.

6

7 MADAME CHAIR TRUMBLE: I'm sorry, this  
8 is Della. For some reason my phone disconnected, this  
9 is Della. We've been having issues out here between  
10 phone and internet so hopefully it won't be too much of  
11 a problem, I apologize.

12

13 MR. ROHRER: No problem, Della. This  
14 is Sam, I wrapped up my report there so I'm done.

15

16 (Pause)

17

18 MR. ROHRER: Did we lose Della again.

19

20 MS. WESSELS: Madame Chair, are you on.

21

22 (No comments)

23

24 MS. WESSELS: We might have lost her  
25 again. Madame Chair Trumble, are you on.

26

27 MS. SKINNER: Okay.

28

29 MS. WESSELS: Rebecca, would you mind  
30 to take over temporarily.

31

32 MS. SKINNER: Yep, that's fine. The  
33 next person on the list is Chris Price.

34

35 MR. PRICE: Good morning. Well, I'd  
36 just like to let you guys know that it has been a  
37 challenge not to meet in person and I've looked forward  
38 to us getting back to in-person meetings. But we've  
39 been doing well to keep our meetings going, so I  
40 appreciate that too. Not everybody's been able to keep  
41 all their meetings going.

42

43 The Unalaska Fish and Game Advisory  
44 Group has not been meeting and so it has created a gap  
45 for us locally with the community input process that  
46 we've had in place with the group. So we're fortunate  
47 with our, UNFA, Unalaska Native Fishermens Association  
48 have been meeting. We have a new president that has  
49 been elected, his name is Nick Tutiakoff and he's a  
50

0025

1 long-time, I think, Vince, his dad, was on the RAC in  
2 the past, so many of you may know Nick. He's some of  
3 our next generation moving up into the leadership  
4 position with the Unalaska Native Fishermens  
5 Association which represents commercial, subsistence  
6 and sportfishing interests in our community.

7  
8 I would like to let you guys know that  
9 we are going to have a report from the tribe later on  
10 in the meeting under tribal government reports so  
11 there's going to be a good discussion about our McLees  
12 Lake Project that many of you have supported in the  
13 past and helped us advocate for getting that project up  
14 and running and so I want to thank you guys again for  
15 that. A lot of times people don't realize how many  
16 years it took to get these things going and in place  
17 and even my Staff now, they don't really realize all  
18 the hard work and effort in to trying to make it a  
19 reality so you'll get to hear that later today. I'm  
20 excited for you guys to get that update. I don't know  
21 if we're going to have Tyler on the phone as well with  
22 Fish and Game, but we have a really important  
23 partnership that we've developed out there at McLees  
24 and the tribe is -- and we're moving into year three of  
25 our grant, we're starting to transition into the  
26 leadership role and the staffing and the procurement  
27 and the management of getting the weir up so you guys  
28 will hear more about that. So, anyway, that's been  
29 important for us.

30  
31 You know another subsistence issue  
32 would be, we do have some issues with sea otters here  
33 locally that have been a little bit not in check. We  
34 are working with the local subsistence hunters to try  
35 to address that situation a little bit better. We're  
36 concerned that it might be getting a little bit out of  
37 hand with our sea otter populations here locally.

38  
39 As you guys have heard -- you probably  
40 did hear about the closure of the commercial red king  
41 crab season that we had out here and that's affecting  
42 us locally and our economy and so and then the  
43 reduction in the opilio crab fishery as well on the  
44 commercial side.

45  
46 So as far as halibut, last summer we  
47 did have a pretty successful year for subsistence and  
48 so that's a positive sign and indicator for us and so  
49 we really rely on the halibut to feed our local  
50

0026

1 community. And we're glad to see some of the potential  
2 management techniques that have been put into place are  
3 working well, and so we're appreciative of that.  
4 Whenever subsistence fishermen can actually catch fish  
5 in our local bay that's a really big win for us.  
6 Because as soon as you leave the bay you're in the  
7 Bering Sea so it's a challenge in a small boat as you  
8 guys know.

9  
10 One issue that I spoke to Tyler about  
11 with Fish and Game about our situation out at McLees,  
12 and I'm almost going to wrap it up here, was that we do  
13 have a need to coordinate with charter boats on the --  
14 the -- how do I say this, where we move gear back and  
15 forth annually to get the weir set up and just moving  
16 Staff and supplies and that kind of stuff. You know we  
17 use a charter vessel because we need a bigger boat out  
18 there to do that type of work. And we tried to make it  
19 in partnership with the Coast Guard but they really are  
20 more -- they can't use their vessels, they can supply  
21 us with some labor, but they can't really give us the  
22 vessels. So we've had to make arrangements with local  
23 charter groups to supply our shipping and the  
24 coordination of all the -- it's a big -- you'll hear  
25 more about it today, there's a lot of work that goes  
26 into putting up a fish camp and then taking it down  
27 annually. But one of the issues that came up is that  
28 we have elders in the community that are unable, you  
29 know, to harvest fish and so we inquired with the  
30 charter boat captains if they would be able to  
31 accommodate the subsistence practices that we have here  
32 which are to use a small skiff to set the net. And  
33 speaking to local charter captains and Tyler, that the  
34 regulations say that that's not an allowable activity  
35 and so I'd like, you know, maybe Tyler could speak to  
36 it a little bit more on the legal side of it, but for  
37 us, you know, we need to be able to hire some bigger  
38 boats to help us out because we really can't supply  
39 that -- that trip back in a small skiff it's not safe  
40 and then we've had a number of accidents with boats out  
41 there. So that's part of the reason behind that and  
42 I'll let Tyler speak to that a little bit more.

43  
44 That's about it for my report, I  
45 appreciate your time, you guys. Thank you.

46  
47 MADAME CHAIR TRUMBLE: Thank you,  
48 Chris. And Tyler is on the agenda farther down.  
49 Coral.

50

0027

1 MS. CHERNOFF: Yeah, this is Coral. I  
2 don't have too much to report. I guess I haven't been  
3 out that much this winter but when I do drive out to  
4 the Flats I do notice emperor geese are pretty healthy  
5 stocks of emperors on the way out of town.

6  
7 And then this year we've noticed --  
8 which we haven't noticed in a couple of years, the big  
9 flocks we used to see, all the time, big flocks of  
10 scoters and scaup and goldeneye, and we haven't seen  
11 that in a while. And this year, a couple times out in  
12 the bay I've seen some pretty big flocks of those so  
13 those are kind of nice to see. As you know we have  
14 pretty healthy eagle populations, they're all over the  
15 place right now.

16  
17 And this year it seemed like there was  
18 salmon pretty late, I think even into December, there  
19 was still salmon, quite a few salmon in Buskin River  
20 that the bears were there eating so that was kind of  
21 fun. I didn't personally go -- I saw one off the  
22 bridge driving by once but it was a great opportunity  
23 for photographers especially during some -- I think  
24 there was one bear, I think they called it Icy Bear or  
25 Frosty Bear and all its hair was all frosted so there  
26 was some beautiful photographs of that, it was cold and  
27 wet and eating fish. So that was fun.

28  
29 And then I have a friend on the other  
30 side of the island, he's been -- had friends out,  
31 they've been chasing goats around, the goat population  
32 seems to be fine, they haven't seen any deer kill  
33 anywhere.

34  
35 Everything they catch -- they catch a  
36 couple crab now and then, so everything seems to be  
37 just right where it should be, not noticing anything  
38 unusual. Yeah, we'll see how the rest of the winter  
39 goes, it's pretty mild now. We had maybe two really  
40 cold -- really cold weeks, I think, in winter, but  
41 other than that it's been snowy, rainy, and sunny. I  
42 think the other day it was 47 and I'm guessing it's  
43 going to be around that today so we've had some pretty  
44 nice and warm weather. So that'll just help everything  
45 be healthy.

46  
47 And I guess that's it for me.

48  
49 I haven't been out clam digging. And I  
50

0028

1 don't know if there is -- I haven't been out clam  
2 digging so I haven't seen -- I haven't heard about the  
3 PSP numbers, either, so I haven't kept up on that or I  
4 don't know if they post that so I don't know how the  
5 clams are doing.

6  
7 So that's all I have, thank you.

8  
9 MADAME CHAIR TRUMBLE: Thank you,  
10 Coral. Rebecca.

11  
12 MS. SKINNER: Thanks, Della. So I  
13 wanted to make some comments that are a little bit  
14 higher level than just the Kodiak/Aleutians. But  
15 because Kodiak is really dependent on commercial  
16 fishing and with the changing ocean conditions,  
17 unexpected changes, I think we are, even in our region,  
18 are seeing some of the impacts.

19  
20 So the first thing, Chris Price had  
21 mentioned, the crab seasons out in the Bering Sea, so  
22 the red king crab and the opilio, those were  
23 significant reductions in commercial fishing  
24 opportunities and from what I'm hearing they are most  
25 likely due to ocean conditions, although it's not  
26 completely clear what exactly caused the, I guess, I'll  
27 use the word, crash, for the crab.

28  
29 The other thing this past summer, I  
30 think everyone's probably heard about up in the  
31 Northwest Alaska, the chinook and chum runs were  
32 greatly reduced. I think chinook has been low for  
33 awhile, but chum was unexpected as far as I understand,  
34 as far as the severeness of the reduction. And, again,  
35 I haven't heard a definitive reason behind those  
36 reductions but I think from what I am hearing people  
37 suspect, again, it's ocean conditions. So there's  
38 these environmental changes that are impacting the  
39 marine resources. And I think we'll hear more about it  
40 later but for Kodiak, in the past summer, we had, I  
41 think, unexpectedly low subsistence runs out at Buskin  
42 for the sockeye.

43  
44 On the brighter side, the Pacific cod  
45 in the Gulf of Alaska seems to be on the rebound from  
46 the significant reductions on the fisheries side that  
47 occurred in 2018. So it looks like the cod is  
48 recovering.

49  
50

0029

1                               And then for halibut, the International  
2 Pacific Halibut Commission did set the halibut limits a  
3 little bit higher. So it -- halibut is looking  
4 promising. there's some strong year classes that are  
5 coming up that haven't disappeared so that's good news  
6 on the halibut side.

7  
8                               And other than that I am looking  
9 forward to our meeting today and tomorrow.

10  
11                              Thank you.

12  
13                              MADAME CHAIR TRUMBLE: Thank you,  
14 Rebecca and thank you for all the information.

15  
16                              Natasha.

17  
18                              MS. HAYDEN: Good morning, Madame  
19 Chair, can you hear me.

20  
21                              MADAME CHAIR TRUMBLE: Yes, go ahead.

22  
23                              MS. HAYDEN: Okay, good. Well, good  
24 morning everybody. I have, I think, quite a bit to  
25 report. I agree with Coral that we've seen lots of --  
26 I don't know I'm not familiar enough with the seabirds  
27 to call them out by species, but we've seen lots and  
28 lots of ducks everywhere in the -- like Shuyak,  
29 Afognak, so the southern coast of Afognak, pretty much  
30 out anywhere in Marmot Bay, lots and lots of birds,  
31 which has been really great.

32  
33                              I was able to go -- wasn't on the  
34 Refuge land but I was able to go deer hunting, when was  
35 it, I think it was the beginning of November. I didn't  
36 see a huge amount of deer but the ones that we did see  
37 were really healthy looking. And I think Coral said  
38 there was a couple of weeks of very cold weather, I  
39 think it was longer, I think it was about two months of  
40 very, very cold weather there in October and November,  
41 it was really hard. And I was kind of worried that if  
42 things continued like that that we were going to see a  
43 lot of stress on our deer but, thankfully, like she  
44 said it has warmed up significantly, hopefully that's  
45 going to stick and we're through the worst of it.

46  
47                              I also wanted to comment about the, not  
48 just the hunting charters, the pressure seen from the  
49 hunting charters but what the -- what we've seen over  
50

0030

1 in Port Lyons and they're starting to see in Ouzinkie  
2 is the traffic that is a result of the marine highway  
3 going into those communities directly from the  
4 mainland. That we didn't see very much in 2020 because  
5 of Covid, but last year the residents thought that it  
6 would -- that the trend would still stay down but they  
7 saw a huge spike in hunting traffic from the mainland  
8 where people were just riding their ATVs and side-by-  
9 sides on to the ferry and then riding them off in Port  
10 Lyons and they did some in Ouzinkie this year as well,  
11 and just kind of a revolving door of traffic with  
12 taking huge amounts of deer out of the area. So that  
13 is also a concern. I mean everybody on the phone knows  
14 that there's no grocery store in those communities so  
15 all of the food is either harvested or having to be  
16 brought in so residents are concerned about food  
17 security for themselves there with all of that  
18 increased pressure on the resource in the region.

19  
20 Fish. Yeah, looking forward to this  
21 spring. The fisheries, like I just wanted to talk  
22 about the -- I'm glad that Rebecca brought up the  
23 commercial fisheries and the collapse of the salmon  
24 returns in Western Alaska and it is indeed a lot of  
25 conversation and speculation about the ocean conditions  
26 and the changing -- changing ocean conditions but  
27 there's also a lot of concern around bycatch. The  
28 Governor established a task force on bycatch. They  
29 don't really have any authority to do anything. I  
30 believe they're going to be making some recommendations  
31 to the Governor regarding potential actions or strategy  
32 around bycatch. But bycatch is a big problem both in  
33 the groundfish for the halibut wastage and salmon. And  
34 I know there isn't any existing limits on chum bycatch  
35 in the Bering Sea and that's a concern considering the  
36 collapse of the chum concerns on the Yukon River.

37  
38 I was able to participate in the Yukon  
39 River Drainage Fisheries Association -- invited me to  
40 participate in a panel to talk about the collapse of  
41 the salmon returns along the Yukon and there were  
42 residents that called in on that call from the Bering  
43 Sea all the way through British Columbia, so there's  
44 dozens and dozens of communities that were impacted by  
45 that last year and, you know, they're waiting on baited  
46 breath. They've only got, you know, I don't know, six  
47 or eight weeks before things start to break up and they  
48 start to see salmon returns and start to get a feel for  
49 what things are going to look like this year. I'm not  
50

0031

1 sure -- I think we're going to get a report about the  
2 projections for our returns here in our region coming  
3 up this summer but I'm hoping the Buskin will see some  
4 improvements for the sockeye return which would  
5 hopefully alleviate some of the pressure over in  
6 Afognak, over at Alitnik, there was a huge amount of  
7 fishing activity, both subsistence and sportfishing  
8 over at Afognak last year and people going over to  
9 Ouzinkie and Port Lyons to get their subsistence.

10

11 So looking forward to hopefully the  
12 worst of winter is behind us and look forward to a good  
13 spring.

14

15 Thanks.

16

17 MADAME CHAIR TRUMBLE: Thank you,  
18 Natasha. The next person who is no longer on our  
19 Council is Melissa but I think for the record I would  
20 like to thank Melissa for her past involvement with  
21 this Council. She contributed a lot and the lady is  
22 just so busy and involved in so many amazing projects  
23 that hat's off to her and we'll definitely miss her.

24

25 Pat did mention Old Harbor earlier and  
26 I think, and just for the record I'd like to recognize  
27 Al Cratty who was a member on this Council for many,  
28 many years and has recently passed away and the  
29 hardships I think that's going to contribute to the  
30 community of Old Harbor, and just the fact that we  
31 really appreciated what he contributed in the past for  
32 Kodiak.

33

34 And, with that, I think I'll go ahead  
35 with my report, not a lot to report.

36

37 Winter, it's been interesting, it was  
38 cold early and then we've had so much rain, just a  
39 tremendous amount of rain. And, again, the effects  
40 without the king crab and small amounts of opilio,  
41 fortunately the guys did get to do some crab fishing.  
42 The cod season was short and getting ready for the next  
43 one.

44

45 Interesting enough we've had a lot of  
46 ptarmigan. People are harvesting a bit of ptarmigan.

47

48 The silvers, like I think someone  
49 mentioned earlier, Coral, maybe, that even into

50

0032

1 December there were still silvers basically around.

2

3 Bears have been out. It's been cold  
4 and they -- yeah, they've been out, so I'm thinking  
5 it's more of a hungry kind of thing there more than  
6 anything else.

7

8 But other than that I guess we just  
9 keep moving forward. The people are harvesting clams,  
10 and thankfully we don't have an issue with sea otters  
11 here but, yeah, the clams are good.

12

13 But other than that, caribou, I think  
14 there were a few people earlier in the year that did  
15 harvest caribou and recently I haven't heard of anybody  
16 so -- but we've had a lot of storms so people don't  
17 necessarily get out and about with that.

18

19 So that's all I have, are there any  
20 other comments in regard to the Council reports.

21

22 MS. HAYDEN: Madame Chair, this is  
23 Natasha.

24

25 MADAME CHAIR TRUMBLE: Go ahead  
26 Natasha.

27

28 MS. HAYDEN: Sorry, I forgot to  
29 mention, I wanted to draw or just mention that one of  
30 the most prominent reliable furriers called New Method  
31 in California, has closed permanently. We don't have  
32 any -- they're a sea otter -- they do sea mammal hide  
33 processing, tanning, and so one of our issues that we  
34 have here in our region is we don't have any tanners,  
35 tanneries here and we don't -- I don't know what the  
36 prospects are of the available tanneries in the future.  
37 So it's one of the things that when people talk about  
38 the increasing sea otter population, is that, for us to  
39 be able to harvest and then have our hides process, we  
40 need to be able to figure out how that's going to --  
41 it's just going to be a bottleneck in the system.

42

43 MADAME CHAIR TRUMBLE: Thank you.

44

45 MR. HOLMES: Madame Chair.

46

47 MADAME CHAIR TRUMBLE: Go ahead, Pat.

48

49 MR. HOLMES: One question for Natasha

50

0033

1 on the sea otters, does the Tlingit Tribe in Sitka, are  
2 they kind of maxed out on their hide processing, is  
3 that an option?

4

5 MS. HAYDEN: I believe so. You know  
6 one of the problems is getting them there and then  
7 getting them back, like it was probably was cheaper to  
8 ship it to California than some places Southeast. So  
9 that's just one of the issues.

10

11 MR. HOLMES: Thank you. Madame Chair,  
12 could I do one brief anecdote about Al Cratty, Jr.

13

14 MADAME CHAIR TRUMBLE: Yes, Pat, go  
15 ahead.

16

17 MR. HOLMES: Al was really active on  
18 our committee for many, many years and really was a  
19 good representative for Kodiak Natives. And he, at  
20 times, would get quite frustrated with bureaucracy but  
21 he was always able to laugh about things. And so we  
22 had one good discussion about how things take so long  
23 and get so complicated and when he went to -- we had a  
24 break, and I don't know if it was Pat Petrivelli or one  
25 of the other gals, but I got some flowers and put them  
26 in a little vase and put them at his place at the table  
27 and I asked her to write a little note for him just to  
28 kind of perk him up a little bit. And so she, whoever  
29 she was, lady, in a very fine hand, you are really hot,  
30 and exclamation points and said, a government gal, and  
31 he came back and he looked at that and he looked at the  
32 vase and he looked at the notes and he just cracked up  
33 because, you know, not only hot in terms of emotion in  
34 terms of the process but also, you know, about just  
35 saying he was a cool guy and he must have laughed for  
36 three or four minutes. His sense of humor and his  
37 passion I think will be well remembered.

38

39 Thank you.

40

41 MADAME CHAIR TRUMBLE: Thank you, Pat.  
42 His, definitely sense of humor. I recall a meeting in  
43 Sand Point one time when I was Chairing the meeting and  
44 I'm not sure, I stepped out of the room but I do know  
45 that when I left for lunch that day, him and Vince  
46 Tutiakoff stuffed my hood in my coat full of leaves and  
47 stuff and I didn't realize it, they had it completely  
48 full, I put my coat on and these dried alder leaves  
49 were everywhere. But, yeah, his definitely sense of  
50

0034

1 humor and he cared a lot about his community and the  
2 Kodiak region and people in general so, yeah, big loss,  
3 and definitely we will miss him.

4  
5 Chair's report. There's not a lot to  
6 report. There was one statewide meeting mainly just to  
7 go over a couple of things. Chairs weren't really  
8 involved, we were -- could call in and listen but  
9 basically it's not a lot on that level.

10  
11 And then No. 10 old business we have,  
12 it looks like, the charter update, Katya Wessels.

13  
14 MS. WESSELS: Madame Chair, thank you,  
15 this is Katya Wessels. Do you want me to provide the  
16 Council Coordinator report, is that what you're asking?

17  
18 MADAME CHAIR TRUMBLE: Hold on here.  
19 Basically it has under old business.

20  
21 MS. WESSELS: Oh, okay. We didn't have  
22 public and tribal comment on non-agenda items yet.

23  
24 MADAME CHAIR TRUMBLE: Oh, I'm sorry.  
25 I am sorry.

26  
27 MS. WESSELS: Yeah.

28  
29 MADAME CHAIR TRUMBLE: I found it,  
30 sorry. So we do have public and tribal comment on non-  
31 agenda items, and then for the record if people want to  
32 testify over the course of the meeting you're welcome  
33 to, just let me know and we've always made a time for  
34 anybody to speak when they would like to make  
35 testimony. So given that, are there any public or  
36 tribal comments on non-agenda items.

37  
38 (Teleconference interference -  
39 participants not muted)

40  
41 UNIDENTIFIED VOICE: What's non-agenda  
42 items.....

43  
44 REPORTER: Could we please mute our  
45 phone if we're not directly talking. You could do that  
46 by star, six or the mute button on your phone. We're  
47 hearing some background conversation.

48  
49 MADAME CHAIR TRUMBLE: I think I heard  
50

0035

1 a question being asked what are non-agenda items?

2

3

(No comments)

4

5

MADAME CHAIR TRUMBLE: No, okay,

6

7

MS. WESSELS: Madame Chair, this is  
8 Katya.

9

10

MADAME CHAIR TRUMBLE: Go ahead.

11

12

13

14

15

16

17

18

19

20

Thank you.

21

22

23

24

MADAME CHAIR TRUMBLE: Thank you. Okay,  
hearing none, we'll continue on to No. 10 old business,  
Council charter update, Katya.

25

26

27

28

29

30

MS. WESSELS: Thank you, Madame Chair.  
For the record my name is Katya Wessels. And your  
Council's charter can be found in your meeting  
materials under Tab 15. It's also available online in  
the Council's meeting materials.

31

32

33

34

35

36

37

38

39

40

41

42

43

44

This is renewed charter, it was renewed  
in 2021. And all 10 Subsistence Regional Advisory  
Councils in Alaska were chartered under the Federal  
Advisory Committee Act, we also abbreviate that as  
FACA, Federal Advisory Committee Act is FACA. The  
Council charters are renewed every two years. Last  
year the Councils reviewed the charters and proposed  
some changes. It was in 2021 when you reviewed your  
charters. The Federal Subsistence Board supported most  
of the Council proposed changes and forwarded its  
recommendations to the Secretaries of the Interior and  
Agriculture for review and renewal of the charters.

45

46

47

48

49

50

Nine out of 10 Councils requested to  
add a carryover terms clause to all Council charters to  
avoid temporary vacancies on the Councils that occur  
between the expiration of the current member terms and  
the annual set of Secretarial appointments. The

0036

1 Secretaries supported these charter requests -- these  
2 charter change request. And if you look in your  
3 charters, the clause on the carryover terms was added  
4 to your charter and it can be found in your charters in  
5 Section 12 which is titled, Membership and Designation.  
6 I will read the language that was added. So this  
7 language is:

8  
9 If appointments for a given year have  
10 not yet been announced, a member may continue to serve  
11 on the Council following the expiration of his or her  
12 term until such appointments have been made. Unless  
13 reappointed, the members service ends on the date of  
14 announcement, even if that member specific seat remains  
15 unfilled.

16  
17 So this is a very good change that will  
18 help us in the situations when the Secretarial  
19 appointments are late.

20  
21 So the other charter change that was  
22 made, and it was actually recommended by the North  
23 Slope Council. The North Slope Council recommended to  
24 strike subsection 4(h) and 4(i), of Section 4,  
25 description of duties, from all the Council charters.  
26 The Board agreed with the Council's opinion that this  
27 language of these subsections was irrelevant to the  
28 Council mission and ANILCA mandates. These subsections  
29 were inserted in all the Council charters during 2017  
30 charter renewal by the previous Administration. Some  
31 of the Executive Orders cited in these subsections were  
32 either irrelevant or revoked by the newly issued  
33 Executive Order. So the Secretaries approved this  
34 change request as well. And the section 4(h) and for  
35 (i) were removed. In some charters they are numbered a  
36 little bit differently, in almost all the charters  
37 they're 4(h) and 4(i). So that, you know, made your  
38 charters a little bit shorter, which is also good,  
39 easier to comprehend.

40  
41 This concludes my presentation to the  
42 Council on the charter change updates and I'm ready to  
43 answer any questions the Council might have about the  
44 charter changes. The only thing I want to say is the  
45 next review of the charter will be happening now in  
46 2023.

47  
48 Thank you.  
49  
50

0037

1                   MADAME CHAIR TRUMBLE:       Thank you,  
2   Katya. Are there any comments or questions in regard  
3   to her report.

4  
5                   (No comments)

6  
7                   MADAME CHAIR TRUMBLE:       Hearing none,  
8   Item B, Council application nomination open seat,  
9   Katya.

10  
11                   MS. WESSELS: Thank you, Madame Chair.  
12   As the Council might recall during your last meeting in  
13   the fall of 2021 we appealed to the Council to help us  
14   to solicit more applications for the -- to serve on the  
15   Council. And, you know, the application season is open  
16   right now. It will remain open just a little bit under  
17   a week, it will close on February 28th. And I remember  
18   that during one of the previous meetings the Council  
19   wanted to ask to update them on the situation with the  
20   applications in your region. So when it's going to be  
21   December of this year the Council will have four vacant  
22   or expiring terms and right now we have less than a  
23   week before the open season closes on February 28th and  
24   we only have one application for the Kodiak/Aleutian  
25   region.

26  
27                   There are three incumbents on this  
28   Council whose seats expire, so if you are planning on  
29   reapplying please make sure you submit your incumbent  
30   applications before February 28th. Your incumbent  
31   applications have been mailed to you. And also if the  
32   Council knows of any potential applicants to serve on  
33   the Council and I would like to ask for your help to  
34   encourage these people to apply or if you would like to  
35   nominate them, you can nominate them as well. You can  
36   always call me or email me if you need any help with  
37   any of this or have any questions. My number to call  
38   is (907) 786-3885.

39  
40                   Yeah, so we would like to keep the  
41   Council strong and all the seats filled and to have  
42   representatives from all parts of your region, you  
43   know, Kodiak, Aleutian Chain, Pribilof, and we appeal  
44   to the Council to help us with filling out these seats  
45   because you are the representatives of your communities  
46   and all people in your communities that can be very  
47   good on the Council, that will be contributing members,  
48   so we would appreciate this help.

49  
50

0038

1 Thank you.

49

50

Thank you.

MADAME CHAIR TRUMBLE: Thank you, Katya. And the three members that are currently coming up is that Pat Holmes, Rick Koso and Sam Rohrer; is that correct?

MS. WESSELS: Let me just open this. Yes, Pat, Rick and Sam, that's correct.

MR. HOLMES: Madame Chair.

MADAME CHAIR TRUMBLE: Go ahead, Pat.

MR. HOLMES: Point of clarification. We need to fill out that form and send it in because I am not getting my mail down here to Seattle and some of it's up in Kodiak and I know I want to continue and we've lost -- one time I think we lost Rick Koso for a couple years because of some confusion as to whether he was reapplying and I believe he had tried to do so but it didn't make it to the right spot and so we had that slot open. And we should be -- can we do that online or whatever. I just don't understand because I am not ready to quit and I don't think Rick is or Sam and, you know, I would assume on this list here we have Della and Natasha being done in 2021 so I would assume that you wonderful ladies are going to continue. And so we're vacant one seat completely because we didn't have it filled that says 2022 expires and then I guess we'll need to find somebody for Melissa. So assuming that all of us that are on are going to continue then we need to find at least two people to replace those vacancies; is that correct?

MS. WESSELS: Madame Chair.

MADAME CHAIR TRUMBLE: That's correct. Go ahead, Katya.

MS. WESSELS: Yes, Pat -- Madame Chair Trumble and Natasha Hayden have been approved to serve on the Council and now their term expires in 2024. I think when we sent the documents originally we might have had the older roster for the Council, and, yeah, the Council currently has two vacant seats.

MR. HOLMES: Okay. And then my other question, I'm sorry, I ramble around too much, I'm just

0039

1 old, so do I need to go online and get the application  
2 and renew it, and same with Rick and Sam?

3

4 MS. WESSELS: Well, we will work  
5 directly with incumbents so we will reach out to you  
6 personally and talk to you. We don't need to talk  
7 about that in the Council meeting. Mostly my  
8 presentation is to request the help from the Council  
9 members to solicit additional applications.

10

11 MR. HOLMES: Roger that. Well, I  
12 understand that but I'm down in Seattle and I won't be  
13 back to get any mail in Kodiak and so if I have.....

14

15 MS. WESSELS: Yeah.

16

17 MR. HOLMES: .....to have a piece of  
18 paper in then I need to know where to get it.

19

20 MS. WESSELS: Pat, either me or.....

21

22 MADAME CHAIR TRUMBLE: And, Katya.....

23

24 MS. WESSELS: .....the new Coordinator  
25 will reach out to you then today or tomorrow and we'll  
26 clarify it.

27

28 MR. HOLMES: Okay, use my cell phone.

29

Thank you.

30

31 MS. WESSELS: Thank you.

32

33 MADAME CHAIR TRUMBLE: Thank you, Pat  
34 and thank you, Katya.

35

36 MR. KOSO: Madame Chair.

37

38 MADAME CHAIR TRUMBLE: Go ahead, Rick.

39

40 MR. KOSO: Yeah, I did send in an  
41 incumbent application, emailed it back but I'm not sure  
42 if they got it or not so I emailed it back a few days  
43 ago and I don't know that they got it. I got a feeling  
44 that they didn't for some reason. So anyway if she  
45 could check on that to see if she received my  
46 application, it's been emailed in.

47

48 MADAME CHAIR TRUMBLE: Thank you, Rick.

49

50

0040

1 MS. WESSELS: Thank you.

2

3

4 MADAME CHAIR TRUMBLE: And this kind of  
5 happened with Rick last time. So my recommendation,  
6 Katya, is to continue to directly contact the three  
7 members to make sure that their paperwork has been  
8 received in a timely -- you know, on time, so we don't  
9 lose the three members. Sam, we haven't heard from you  
10 but we are hoping you are going to continue to stay on  
11 the Council. And then I will try to get a hold of the  
12 Hublets in False Pass and see if I can get somebody  
13 from there to fill out an application. And as far as  
14 the Pribilofs, I can check maybe with Richard or  
15 somebody out there to see if they know of anybody that  
16 might want to apply. And any other help, I guess, we  
17 can do from the Kodiak side for Melissa would be great.  
18 Does that sound like a plan?

18

19 MS. WESSELS: Yes, thank you, Madame  
20 Chair.

21

22 MS. SKINNER: Della, I have a -- yeah,  
23 Della, I have a question.

24

25 MADAME CHAIR TRUMBLE: Is that Rebecca.

26

27 MS. SKINNER: It is.

28

29 MADAME CHAIR TRUMBLE: Go ahead.

30

31 MS. SKINNER: And this might be a  
32 little unfair because it involves the Bristol Bay RAC.  
33 But I see that -- so I looked at the notice for new  
34 appointments that came out on February 4th or February  
35 2nd and I see that Bristol Bay RAC is down to six  
36 people and the Kodiak/Aleutian RAC is down to eight  
37 people, which was very alarming to me when I first saw  
38 it compared to the other RACs, which look much more,  
39 you know, fully Staffed or fully seated. Does anyone  
40 know if the Bristol Bay RAC is having the same problem,  
41 in that, they're just not getting enough applicants and  
42 I guess I'll give some context for my question.

43

44 My first thought was, oh, like they're  
45 intentionally making Bristol Bay and the  
46 Kodiak/Aleutian smaller, maybe they're going to squish  
47 them together into one RAC. So I guess what I'm  
48 looking for is reassurance that that's not what's  
49 happening, it really just is that applications are not  
50

50

0041

1 coming in for either the Bristol Bay RAC or the  
2 Kodiak/Aleutian RAC.

3

4 MS. WESSELS: Madame Chair, may I  
5 answer.

6

7 MADAME CHAIR TRUMBLE: Go ahead, Katya.

8

9 MS. WESSELS: Yes, thank you. Yeah,  
10 the situation with Bristol Bay is as you described.  
11 They currently have actually five vacant seats and, you  
12 know, last cycle we did not receive many applications  
13 for Bristol Bay and the situation is kind of similar to  
14 the last year with Bristol Bay. There is no  
15 intentional at all to combine Kodiak/Aleutian and  
16 Bristol Bay Councils. There will be -- the Councils  
17 will remain. And, you know, we want to get more  
18 applications for your regions and, you know, that's why  
19 we're trying to do more outreach. I guess, you know,  
20 just because -- perhaps because of the pandemic,  
21 perhaps for other reason, we're not able to reach  
22 people that would be interested and willing to apply to  
23 serve on the Councils. And that's why we're appealing  
24 to the Council members since you are the representative  
25 for your communities, you live there, you know people,  
26 you know who might be interested, who might be good in  
27 serving on the Councils. So, you know, there is --  
28 but, again, I will ensure that there is no intention to  
29 combine two Councils together, not at all. You know  
30 those are vast regions, there's no reason to combine  
31 these two Councils. That's not what the -- originally  
32 the 10 Councils were established, the 10 Councils will  
33 remain there. We just need to have more applications.  
34 We need to have more representatives from across the  
35 region. This is a very big issue that, you know, not  
36 just Bristol Bay and Kodiak/Aleutian are facing, there  
37 are a few other Councils that are facing the same  
38 situation.

39

40 And, you know, now that you will have  
41 the permanent Coordinator, hopefully the situation will  
42 change. They also will be able to do more outreach in  
43 the future. We are looking at some other, you know,  
44 some other avenues to increase this outreach. It's  
45 just, you know, right now we only have less than a week  
46 before the open season closes so the season, you know,  
47 was opened in September and we're trying to reach the  
48 public through newspaper ads and other, radio  
49 announcements and other advertisements but, you know,  
50

0042

1 as a result so far we only have one application for  
2 Kodiak/Aleutian region. I am just being open about it  
3 and, you know, hopefully we will get more applications  
4 within the last few days. But that's what the  
5 situation is.

6

7

Thank you.

8

9 MS. SKINNER: All right, thank you,  
10 Katya. That makes me feel a lot better. Thank you for  
11 the reassurances on that.

12

13

14

15

16

17

18

19

20

21

22

23

24

25

26

27

Thanks.

28

29

MS. WESSELS: This is Katya.

30

31

MADAME CHAIR TRUMBLE: Go ahead.

32

33

34

35

36

37

38

39

40

41

42

43

44

45

46

47

48

49

50

MS. WESSELS: You know, I think it will  
be up to the Council, really, you know, I mean the  
Council can still function with just eight seated  
members. If you feel it's important for you to have  
all the seats filled then it doesn't matter that, you  
know, maybe most of them will come from Kodiak, but if  
it's important for the Council to have, you know, all  
the seats filled then, you know, I would encourage the  
Council members to reach out to the people that they  
know that might be good serving on the Council. Just  
remember that, you know, Council members are usually  
appointed for a three year term. It sometimes happens  
when the seats remain vacant for awhile that when the  
Council members are appointed, that seat specifically  
will only have two, or one year term left, so then that  
person will need to reapply. But like the Council  
needs to really think about if they want to uphold what

0043

1 the request added to their charter, which is a  
2 membership balance for different parts of the region,  
3 because your region is so vast, geographically, or  
4 perhaps you have some people, you know, in Kodiak that  
5 also have knowledge of the subsistence needs and  
6 resources in other regions. Because, you know, even if  
7 you get the Council members from the other parts of the  
8 region, the Council members are appointed for their  
9 knowledge and experience in five categories. You know,  
10 the knowledge of subsistence resources, and use and  
11 knowledge of commercial/sport use, and, you know, their  
12 ability to communicate with the public, their ability  
13 for leadership. So that's kind of a balance, you know,  
14 we don't know who.....

15

16 MADAME CHAIR TRUMBLE: Katya.

17

18 MS. WESSELS: .....these new people  
19 will be applying.....

20

21 MADAME CHAIR TRUMBLE: Katya.

22

23 MS. WESSELS: .....on the Council --  
24 yes.

25

26 MADAME CHAIR TRUMBLE: I think Rebecca,  
27 maybe just a short answer to your question. We have 10  
28 seats and the goal would be, in all reality, to have  
29 five from Kodiak and five from the Aleutians, however,  
30 in the past we haven't been able to get five people  
31 from the Aleutians and a lot of times even if they  
32 applied for some reason they actually got more out-  
33 weighted on the Kodiak side, but I think the goal here  
34 would be -- and ideally we would like five and five,  
35 however, I think if we don't it's good to have those 10  
36 seats filled regardless of where they're coming from.  
37 And is that maybe Chris or Rick who can comment in  
38 regard to that.

39

40 MR. PRICE: Rick, you want to go.

41

42 (No comments)

43

44 MADAME CHAIR TRUMBLE: I think Rick  
45 might have stepped away. So Chris do you want to.....

46

47 MR. ROHRER: Della, this is.....

48

49 MADAME CHAIR TRUMBLE: .....go, I think

50

0044

1 just.....

2

3

MR. KOSO: Yeah, you hear me Della.

4

5

6

MADAME CHAIR TRUMBLE: Oh, yeah, we hear you now Chris -- or Rick, go ahead.

7

8

9

MR. KOSO: Yeah, okay, this is Rick, Della.

10

11

12

MADAME CHAIR TRUMBLE: Go ahead.

13

14

15

16

17

18

19

20

21

22

23

24

25

26

MR. KOSO: You know I don't have a problem with having the 10 members from other regions. I think our problem came when we confronted this a few years back to where we were having not so much on the subsistence of it but our meeting side of it. We were kind of being outgunned when it came to selecting a spot to have our next meetings and we felt sometimes that Kodiak was overriding to have their meetings in Kodiak versus having them in Cold Bay or Dutch Harbor. I think that was a reality that we ran into a few years back. But outside of that I don't see where there would be a problem with filling it up with some other areas in our region.

27

28

29

30

31

32

MADAME CHAIR TRUMBLE: Yeah, I think, Rick, that might have fell into when they were trying to cut back on travel and saying that our main area, or hub was Kodiak. That's kind of where that whole process fell into place a few years back.

33

34

35

36

Thank you.

37

38

39

40

41

42

43

44

45

46

47

48

49

50

MR. PRICE: Yeah, I mean I'm not the expert in this because I'm more new to the Council but I do encourage, you know, the Aleutian region to be more active and participate and I always, you know, want to work with the Pribilofs and encourage them to participate. I mean I like that we have a way to make openings for communities that may not be engaged at this time but in the future may wish to participate more and be full members. So, you know, I don't have all the answers here and, you know, you guys are the experts so I'll listen in and hear what you guys have to say.

0045

1 MADAME CHAIR TRUMBLE: Okay. Rebecca,  
2 we'll try do some due diligence on our side too to get  
3 try to get people to apply. It's not always easy. I  
4 do know that I'm aware of people that have applied in  
5 the past that didn't get appointed so we'll do the best  
6 we can, I guess and see where we end up, we don't  
7 necessarily have the choice in the final decisionmaking  
8 of who is selected.

9  
10 MR. ROHRER: Della, this is Sam. I just  
11 want to jump in real quick and say I do plan on  
12 reapplying. I have the application sitting on my desk,  
13 I've just been a little bit busy and sidetracked with  
14 some other stuff going on, but I will get that in here  
15 before the deadline. So just wanted to let you know.

16  
17 MADAME CHAIR TRUMBLE: Okay, thank you.

18  
19 MS. SKINNER: Madame Chair.

20  
21 MADAME CHAIR TRUMBLE: And I'm going to  
22 do a couple -- one person in Cold Bay I have in mind,  
23 too, that I'll get a hold of in the next day or two and  
24 see if I can get him possibly interested. And then  
25 Rebecca, I hear you.

26  
27 MS. SKINNER: Yeah, I just wanted to  
28 say that your response was very helpful and that's  
29 exactly the kind of feedback I was looking for so thank  
30 you for that.

31  
32 MADAME CHAIR TRUMBLE: Thank you. Any  
33 other comments.

34  
35 (No comments)

36  
37 MADAME CHAIR TRUMBLE: Thank you, Katya  
38 and Council.

39  
40 MS. WESSELS: Thank you.

41  
42 MADAME CHAIR TRUMBLE: Hearing none we  
43 will move on to sea otter discussion. We have this on  
44 the agenda, there was some, I think emails back and  
45 forth on whether to keep this on the agenda or not, so  
46 it's up to the Council, for Council discussion.  
47 However, you know, I will say it's starting to come  
48 more like Chris just mentioned in Unalaska in regard to  
49 sea otters so with that I think I'm going to ask Katya  
50

0046

1 to talk about why this discussion is up and her emails  
2 in regards to this and the Council can tell us what  
3 they want to do in the future.

4

5 MS. WESSELS: Thank you, Madame Chair.  
6 In one of the previous Council meetings the Council  
7 voted actually to have sea otter as a topic on their  
8 agenda, like a permanent topic, so I reached out to  
9 Council members that are on the sea otter working group  
10 to see if, you know, you would like to have this on the  
11 agenda and to see if the Fish and Wildlife Marine  
12 Mammal Management could present anything on this topic  
13 and, you know, it seemed like there was no request for  
14 Marine Mammal Management to present anything and it  
15 wasn't clear to us if the Council would like to see the  
16 sea otter for a topic for this particular meeting on  
17 the agenda so that's why we left it on the agenda. And  
18 the Council can speak up now and if you would like to  
19 have this discussion, there is no presentation  
20 associated with it, nothing like that, but if the  
21 Council would like to discuss anything right now about  
22 sea otters you can or we can just move on to the next  
23 agenda item.

24

25 MS. SKINNER: Madame Chair.

26

27 MADAME CHAIR TRUMBLE: Go ahead,  
28 Rebecca.

29

30 MS. SKINNER: Yeah, thanks. So I think  
31 that part of the circumstances leading up to this  
32 meeting is that our sea otter working group, I think is  
33 what we're calling it, was not able to meet prior to  
34 this meeting and so it wasn't as clear what specific  
35 issues or questions or information we would want Marine  
36 Mammals to share in a presentation. I do think -- and  
37 so there was correspondence prior to the meeting today  
38 to see if we -- if it was feasible to try and have that  
39 working group meeting and my sense was rather than  
40 trying to squish in a last minute working group  
41 meeting, that we would aim to do that after this RAC  
42 meeting. And I think that when we have the working  
43 group meeting it will become more clear what kind of  
44 discussion or information we want to have at our next  
45 RAC meeting. And so when Katya says there wasn't --  
46 there didn't seem to be a lot of interest in having the  
47 sea otter discussion today, I do think a big part of  
48 that was just lacking, again, the working group coming --  
49 the sea otter working group coming together and being  
50

0047

1 able to have more focused conversation ahead of time.  
2 So I think it's really useful to hear that, you know,  
3 there's more sea otter issues out along the Chain,  
4 which I'm not sure we heard of much before, so I'm  
5 looking forward to our sea otter working group and,  
6 again, I think that will help define -- you know better  
7 define what we want to hear from Marine Mammals at our  
8 next RAC meeting.

9

10 Thank you.

11

12 MS. CHERNOFF: This is Coral, Madame  
13 Chair.

14

15 MADAME CHAIR TRUMBLE: Thank you,  
16 Rebecca. Coral.

17

18 MS. CHERNOFF: Yeah, for myself, I  
19 don't know, I was just thinking, oh, where are these  
20 emails, I might not have responded. This fall -- yeah,  
21 we didn't get together as a working group because we  
22 had -- as you all know we had the new Omicron going  
23 through and just everything was disrupted again. And  
24 so -- but I do think I would like to see this be on the  
25 agenda every time and we will get our working group  
26 together. There's also things to work on -- I just  
27 found out through a friend who works in government, or  
28 she's a lobbyist in Washington and they are trying to  
29 get a law passed to ban fur in Washington, which should  
30 be a really big concern for us here also if people are  
31 going to start trying to ban fur. That would be major --  
32 there's not that many sea otters taken now but, of  
33 course, if you ban fur -- or people start banning furs  
34 and they start getting the word out against -- the word  
35 starts getting out that furs are bad, you know, that's  
36 not good for our -- you know we do cull a little bit of  
37 our population and I think Sealaska was trying to get  
38 something started. So I think there are, definitely  
39 issues to work on, that is definitely something new  
40 that we should keep our eyes on.

41

42 Yeah, and then I think we just haven't  
43 really met. I know the Burke Museum, too, has got -- I  
44 don't know what they're doing, they're doing sea otter  
45 studies on something. The Burke Museum they just got a  
46 bunch of sea otter skulls, I think, and then they were  
47 going to do a bunch of studies on them so it'd be nice  
48 to keep updated on everything that's going on with sea  
49 otters even though we are not the governing body, we  
50

0048

1 don't report to the governing body that deals with  
2 them. We do know it concerns us and concerns our  
3 subsistence foods so we do have to, I think, have  
4 conversation to figure out how to talk to people about  
5 it and how to -- yeah, I guess just to talk to people  
6 about it.

7

8 And, yeah, so I'm interested in keeping  
9 it on every time and I'm sure we'll get started up with  
10 our sea otter working group soon.

11

12 MADAME CHAIR TRUMBLE: Okay, thank you,  
13 Coral. Any other comments.

14

15 (No comments)

16

17 MADAME CHAIR TRUMBLE: Hearing none,  
18 we'll keep it on the agenda. And maybe whoever -- we  
19 do have our new Coordinator, I don't know if she's been  
20 introduced, I believe she's online listening, but to  
21 maybe -- we need to make a little more effort, I think,  
22 in getting the working group together prior to our  
23 meetings, would be probably a good idea.

24

25 All right. My suggestion at this time  
26 is to go ahead and take a 10, 15 minute break. Let's  
27 take 15 before we start on new business, if everybody  
28 is okay. We'll come back in 15 minutes.

29

30 MS. HAYDEN: Thank you, Della.

31

32 MR. PRICE: Thank you.

33

34 MADAME CHAIR TRUMBLE: Okay, 15 minutes  
35 guys.

36

37 (Off record)

38

39 (On record)

40

41 MADAME CHAIR TRUMBLE: Let's call our  
42 meeting back to order from our break and continue on.  
43 I think the next item on the agenda is new business,  
44 11A, Fisheries Resource Monitoring Program information  
45 update, Jarred Stone.

46

47 MR. STONE: Okay, thank you. Good  
48 morning, Madame Chair and members of the Council. For  
49 the record my name is Jarred Stone, I am a Fisheries  
50

0049

1 Biologist here at the Office of Subsistence Management.  
2 I work in the Kodiak/Aleutian region but I also work in  
3 the Bristol Bay and Southcentral regions. I'm joined  
4 here today with my anthropologist colleague Jason  
5 Roberts. Today I will provide updates on three  
6 fisheries programmatic areas. I'll begin with the  
7 Fisheries Resource Monitoring Program and then I'll  
8 switch over to the fishery call for proposals for the  
9 upcoming regulatory cycle, and then I'll finish by  
10 providing additional details regarding the fisheries  
11 closure review process. These will be brief updates  
12 but please ask questions as we move along and I'll do  
13 my best to help answer them.

14  
15 For the Fisheries Resource Monitoring  
16 Program update, this is not an action item for today,  
17 and as I mentioned there are no associated materials  
18 for this discussion in your Council meeting books.

19  
20 We are currently in the final stage of  
21 the 2022 Monitoring Program funding cycle. The Federal  
22 Subsistence Board met in early February and made  
23 recommendations about the Monitoring Plan. Once the  
24 Office of Subsistence Management has a final budget,  
25 the Assistant Regional Director will then approve the  
26 funding plan and all applicants will be notified of the  
27 status of their submissions.

28  
29 With the 2022 cycle coming to an end,  
30 it's time now for the Councils to begin developing  
31 priority information needs for the 2024 Fisheries  
32 Resource Monitoring Program, which will happen at your  
33 next meeting in the fall. We are asking for Council  
34 members from both the Bristol Bay Regional Advisory  
35 Council and your Council to consider volunteering and  
36 to meet by telephone this summer to identify knowledge  
37 gaps and information needed for the management of  
38 subsistence fisheries for the Southwest region. The  
39 draft list of priority information needs will then be  
40 presented to the Councils for their final approval  
41 during their fall 2022 meeting.

42  
43 This isn't an action item but if  
44 there's anyone on the Council that would like to  
45 volunteer to help develop the draft priority  
46 information needs for the next cycle it would be  
47 greatly appreciated.

48  
49 This concludes my presentation  
50

0050

1 regarding the Fisheries Resource Monitoring Program.  
2 Are there any questions or volunteers who would like to  
3 help draft the priority information needs for the fall  
4 2022 meeting.

5  
6 Thank you.

7  
8 MS. SKINNER: Madame Chair.

9  
10 MADAME CHAIR TRUMBLE: Go ahead,  
11 Rebecca.

12  
13 MS. SKINNER: Yeah, thank you. I would  
14 like to volunteer to help draft the PINS.

15  
16 MADAME CHAIR TRUMBLE: Thank you,  
17 Rebecca, anyone else.

18  
19 MR. STONE: Thank you, Rebecca.

20  
21 MADAME CHAIR TRUMBLE: I'll go ahead  
22 and put my name in, too, Jarred.

23  
24 MR. STONE: Thank you, Madame Chair.

25  
26 MADAME CHAIR TRUMBLE: Does anybody  
27 have any comments or questions for Jarred in regard to  
28 this agenda item.

29  
30 (No comments)

31  
32 MADAME CHAIR TRUMBLE: I guess hearing  
33 none, we'll.....

34  
35 MR. STONE: Madame Chair, if I may.

36  
37 MADAME CHAIR TRUMBLE: Go ahead,  
38 Jarred.

39  
40 MR. STONE: So for the Bristol Bay  
41 region, Council Member Dan Dunaway had volunteered so  
42 I'll work with the three of you to try and coordinate a  
43 time this summer that works best for the three of you  
44 and that will be it. So look for an invitation on my  
45 part to try and coordinate a time that works best.

46  
47 MADAME CHAIR TRUMBLE: Okay, thank you,  
48 Jarred. Do you want to go ahead and move on to Item  
49 No. B.

50

0051

1 MR. STONE: Okay. Again, for the  
2 record, my name is Jarred Stone and I'm a Fisheries  
3 Biologist with the Office of Subsistence Management.

4  
5 I'll now give an update on our call for  
6 Federal fisheries and shellfish proposals. This is an  
7 action item for your Council. Once we work through  
8 this item I will then provide an update on the upcoming  
9 Federal subsistence fisheries closure reviews that were  
10 deferred by the Board in 2021. You can find the  
11 materials on how to submit regulatory proposals on Tab  
12 4 of your meeting books.

13  
14 The Federal Subsistence Board will be  
15 accepting proposals this winter and into spring to  
16 change the Federal regulations for the subsistence take  
17 of fish and shellfish on Federal public lands and  
18 waters for the 2023 through 2025 regulatory cycle. The  
19 Board will consider proposals to change Federal fish  
20 and shellfish seasons, harvest limits, methods and  
21 means and customary and traditional use determinations.  
22 The current window of opportunity to submit proposals  
23 is not quite open yet, however, as a Council you may  
24 vote on fisheries proposals and then submit the  
25 proposals to the Council Coordinator at any time during  
26 our Council meeting. Coordinators will then hold on to  
27 the proposals until the window for fisheries proposals  
28 is officially opened and then submit them. The general  
29 public will need to wait until the window for fisheries  
30 proposals has officially opened, which should be some  
31 time soon, and stay open for a period of at least 30  
32 days.

33  
34 Proposals need to be submitted to the  
35 regulations website by going to [www.regulations.gov](http://www.regulations.gov).  
36 The proposals will be analyzed and presented to the  
37 Councils during the upcoming fall 2022 meetings for  
38 Council recommendations. Proposal analysis and Council  
39 recommendations will be presented to the Federal  
40 Subsistence Board for their final action at the January  
41 2023 fisheries regulatory meeting.

42  
43 This concludes my presentation. Are  
44 there any questions or regulatory proposals that the  
45 Council would like to put forward before I move into  
46 the fisheries closure update.

47  
48 MR. HOLMES: Madame Chair, Pat.

49  
50

0052

1 MADAME CHAIR TRUMBLE: Go ahead, Pat.

2

3 MR. HOLMES: Yeah, I'm sorry I lost you  
4 folks there for awhile. I couldn't call out on my cell,  
5 it went nuts on me. I would like to be on that  
6 planning group and I don't have any other questions. I  
7 participated in every one in the last 20 years and I'd  
8 like to continue on that. And I found that Dan Dunaway  
9 was a really good link on that.

10

11 Thank you.

12

13 MADAME CHAIR TRUMBLE: Thank you, Pat.

14

15 MR. STONE: Thank you, Mr. Holmes.  
16 Council Member Holmes I'll add you to the list of  
17 volunteers for the upcoming draft of the priority  
18 information needs.

19

20 MR. HOLMES: Thank you.

21

22 MADAME CHAIR TRUMBLE: Okay, Jarred, I  
23 don't hear any other comments if you want to continue  
24 on.

25

26 MR. STONE: Okay, thank you, Madame  
27 Chair. Again, for the record, this is Jarred Stone and  
28 I am a Fisheries Biologist with OSM.

29

30 In addition to the upcoming fisheries  
31 regulatory cycle OSM Staff will review closures to  
32 Federal subsistence fisheries similar to what wildlife  
33 closure reviews had done during the last cycle.

34

35 So Title VIII of ANILCA establishes a  
36 priority for the taking of fish and wildlife on Federal  
37 public lands and waters for non-wasteful subsistence  
38 uses over the taking of fish and wildlife on such lands  
39 or other purposes. Under certain circumstances  
40 specified in Title VIII, the Board is authorized to  
41 restrict, close and reopen Federal public lands and  
42 waters to the taking of fish and wildlife. Like other  
43 Board established rules closures are subject to change  
44 during the regulatory cycle. It is the Board's policy  
45 that Federal public lands and waters should be reopened  
46 as soon as practicable once the conditions that  
47 originally justified the closure have changed to such  
48 an extent that the closure is no longer necessary. To  
49 help ensure that the closures do not remain in place

50

0053

1 longer than necessary, the Board has directed OSM to  
2 review existing closures.

3  
4 OSM will review half of all closures  
5 during each applicable regulatory cycle. Closure  
6 reviews will include analysis of all relevant  
7 considerations and OSM will recommend an action for the  
8 Council's consideration on the closure. The types of  
9 actions that the Council can recommend include, to  
10 retain, which means the closure remains in the  
11 regulations unchanged. The second option is to modify,  
12 which means a change directly related to the actual  
13 closure, an example of that would be adjusting the  
14 dates the closure's effective, or perhaps assigning an  
15 expiration date or broadening a closure to both  
16 subsistence and non-subsistence users. A third option  
17 is to rescind, which means to remove the closure from  
18 the regulations. If a season harvest limit exists in  
19 the regulations, that season or harvest limit will then  
20 once again become effective. If none exists, a  
21 proposal must be submitted to establish a season and/or  
22 harvest limit. If no parallel proposal is submitted  
23 with the closure review, existing State sport  
24 regulations would be as applicable for fish or there is  
25 no harvest season until a proposal is submitted. And  
26 the last option is to defer, which means that the  
27 closure then would remain in place until that time the  
28 Board takes up the closure again, normally no longer  
29 than the next applicable regulatory cycle.

30  
31 There are currently 20 fisheries  
32 closure reviews statewide under review for the upcoming  
33 fisheries regulatory cycle. Of the 20 reviews, 14 will  
34 be considered for the Kodiak/Aleutian Regional Advisory  
35 Council during the fall 2022 Council meeting.

36  
37 Here is a brief list of the fisheries  
38 closures that will be under review for the cycle.  
39 First I'll go over the list of deferred closure reviews  
40 from 2021, all of which pertain to the harvest of  
41 salmon.

42  
43 That includes FCR21-08 Unalaska Lake.

44  
45 FCR21-09 Unalaska Bay, including  
46 Summers and Morris Lake.

47  
48 FCR21-11 McLees Lake drainage.

49  
50

0054

1 FCR21-13 Alaska Peninsula, Russell  
2 Creek and Nurse Lagoon.

3  
4 FCR21-16 Kodiak Island Buskin River.

5  
6 FCR21-18 Afognak Bay drainage.

7  
8 FCR21-19 Afognak Island freshwater  
9 drainages.

10

11 There are an additional seven closure  
12 reviews to be considered, and OSM Staff will draft the  
13 analysis for these during the summer and provide  
14 preliminary conclusions to your Council during the fall  
15 meeting. These additional closure reviews for the  
16 upcoming cycle include:

17

18 Unalaska Bay streams for salmon.

19

20 Adak/Kagalaska freshwater streams for  
21 salmon.

22

23 Trout Creek on the Alaska Peninsula for  
24 salmon.

25

26 Womens Bay for salmon.

27

28 Selief Bay Creek for salmon.

29

30 Little Kitoi Creek for salmon.

31

32 Womens Bay for king crab.

33

34 As you recall an outreach team made up  
35 of volunteers from your Council and OSM Staff helped to  
36 create outreach materials to help generate additional  
37 feedback from the affected communities. This included  
38 community fliers which were sent to local communities  
39 showing summaries of each of the closures, the OSM  
40 website was then updated with additional maps depicting  
41 the areas along with guidance on how to submit a public  
42 comment and meetings were held with the State's local  
43 Advisory Committees and tribal organizations.

44

45 If you're interested in viewing the  
46 analysis and would like to submit a public comment, you  
47 can visit our website by going to  
48 [www.doi.gov/subsistence/krac](http://www.doi.gov/subsistence/krac), and that's spelled KRAC /  
49 closures.

50

0055

1 We are hopeful that this outreach will  
2 generate thoughtful feedback concerning these closure  
3 reviews to allow the Council and the Board to make an  
4 informed decision for each of the 14 closure reviews to  
5 be considered. If anyone wishes to modify any of these  
6 closure reviews in any way, other than the four options  
7 I had described earlier, a parallel proposal must be  
8 submitted during the call for fisheries regulatory  
9 proposals, such as during this meeting. The window of  
10 time to submit a proposal is not yet open, however, the  
11 Council can choose to provide proposals directly to the  
12 Council Coordinator to have submitted when the window  
13 of opportunity opens.

14  
15 This concludes my update on the  
16 fisheries closure review process and the status of the  
17 upcoming closure reviews to be considered for the fall  
18 2022 meeting.

19  
20 Thank you, Madame Chair.

21  
22 MADAME CHAIR TRUMBLE: Thank you,  
23 Jarred. Are there any comments or questions for  
24 Jarred.

25  
26 MS. SKINNER: Yeah, Madame Chair, this  
27 is Rebecca.

28  
29 MADAME CHAIR TRUMBLE: Go ahead, Rebecca.

30  
31 MS. SKINNER: Thanks. Yeah, I have  
32 three questions right now and I think they're  
33 clarifying questions. So the first question I have, I  
34 thought that I heard you say in the presentation right  
35 now that OSM would provide recommendations to the RAC  
36 and I wanted to make sure I understand that correctly  
37 because I thought in previous discussions about this  
38 item, there was some back and forth about whether OSM  
39 could provide a recommendation or perhaps the nature of  
40 that recommendation. So I wanted to make sure that,  
41 one, I heard you correctly and, then, two, what does  
42 that mean, that OSM will provide or can provide a  
43 recommendation to the RAC.

44  
45 MR. STONE: Thank you. Through the  
46 Chair, Council Member Skinner. You are correct. So  
47 OSM, in the fall, will have finished all of the Staff  
48 analysis on each of the closure reviews, very similar  
49 to what the regulatory proposals look like. And at the  
50

0056

1 very end of the analysis, OSM will provide what we call  
2 a preliminary conclusion. And that is, you know, a  
3 recommendation to the Council for their consideration.  
4 And so I hope that addresses your question.

5

6 MS. SKINNER: Yes. So just to dig into  
7 this one a little bit more. So would that be along the  
8 lines of, for example, OSM recommends rescinding the  
9 closure, or is it going to be a higher level statement  
10 that doesn't get into one of the specific options that  
11 you outlined?

12

13 MR. STONE: Thank you for the question.  
14 Boy, to answer that I think it -- our preliminary  
15 recommendation or conclusion that we offer for our  
16 Staff analysis will likely only involve one of the four  
17 options that I had mentioned before, to either rescind,  
18 or retain or modify or defer. You know, we'll often --  
19 similar to what we've done last time during the  
20 previous regulatory cycle, a majority of those closure  
21 reviews we had opted or recommended for allowing those  
22 closures to be opened and for allowing the fisheries to  
23 essentially mirror what the State sportfish regulations  
24 would look like.

25

26 It's a little early for me to make any  
27 recommendations on the upcoming new fisheries closures  
28 just because Staff have not had a chance to provide  
29 their full analysis on those particular fisheries  
30 closures.

31

32 (Teleconference interference -  
33 participants not muted - hold)

34

35 MR. STONE: And so this fall when we  
36 come in front of you again for our fall meeting, we'll  
37 likely discuss to a great extent each of the fisheries  
38 in detail and then make a preliminary conclusion or a  
39 recommendation to the Council for your consideration  
40 and it will include one of those four actions.

41

42 MS. SKINNER: Yep, that's very helpful.  
43 So two more questions. My next question has to do with  
44 timing. So at our upcoming fall RAC meeting, we will  
45 be reviewing all of the -- and correct me if I'm  
46 misstating this, we will be reviewing all 14 of the  
47 closure reviews, or all the closures, but if we -- as a  
48 Council, if we wanted to put forward regulations that --  
49 proposed regulations that related to these closures  
50

0057

1 and we wanted to do that as a Council, would we need to  
2 suggest those at this meeting, because it's going to be  
3 too late in the fall to generate a proposed regulatory  
4 change, or if I've got the timing on that wrong, if you  
5 could comment on that.

6  
7 MR. STONE: Thank you. Through the  
8 Chair. And, Council Member Skinner. That's a great  
9 question and, you know, unfortunately the timing of our  
10 call for proposal and our review process are a bit  
11 awkward. We are very much open to receiving comment  
12 from the Council in regards to how to maybe make this  
13 process more streamlined or to make it easier, but you  
14 are correct, in that, if there are changes you would  
15 like to make to any of the closures then you would have  
16 sort of two opportunities. One would be right now  
17 during this Council meeting. The next opportunity then  
18 would be, you know, during our next regulatory cycle,  
19 which would be in two years. So, again, I apologize  
20 for the awkwardness or the nature of this in the way  
21 that it's rolling out, but you are correct that the  
22 call for proposals will be this spring, and you will  
23 not see the Staff analysis of the next seven closure  
24 reviews until this fall.

25  
26 MS. SKINNER: Okay. Thank you, that's  
27 helpful. And then my last question is, can you explain  
28 again -- I know you just explained this in your  
29 presentation but I did not completely follow it; if a  
30 closure is rescinded and there is no current Federal  
31 subsistence regulation to fall back on, I heard you say  
32 if that was the case then the State sport regulations  
33 would be kind of the default, but then I thought you  
34 said something right after that, like it was an either  
35 or. Can you explain again what happens if a closure is  
36 rescinded and there is no Federal subsistence  
37 regulation to fall back on.

38  
39 MR. STONE: Thank you. Through Madame  
40 Chair. Council Member Ms. Skinner. If a closure is  
41 rescinded and there are no existing regulations in  
42 place to fall back on, it would require a proposal to  
43 establish a harvest season. If -- again, and I'll just  
44 state that again: If there's no regulations in the  
45 background, or none exist, a proposal must be submitted  
46 to establish a season and/or harvest limits, and if no  
47 parallel proposal is submitted with the closure review,  
48 existing State sport regulations would be followed.  
49 And so from my understanding, if no parallel was  
50

0058

1 submitted, maybe come this Council meeting in the  
2 spring, then in the fall the Council decides to rescind  
3 the closures, then what would likely happen is that  
4 those fisheries would then revert to mirror State sport  
5 regulations.

6  
7 MS. SKINNER: All right, thank you.  
8 That's all I had, Madame Chair.

9  
10 MR. HOLMES: Madame Chair, Pat here.

11  
12 MADAME CHAIR TRUMBLE: Go ahead, Pat.

13  
14 MR. HOLMES: You said it would revert  
15 to State sport regulations, what does that have to do  
16 with it? I mean that's part of it, but it seems like  
17 my recollection that all of these closures originally  
18 came from the State and all of those were originally  
19 from the various agencies within the State and the  
20 Board of Alaska Department of Fish and Game; is that  
21 not correct?

22  
23 MR. STONE: Madame Chair.....

24  
25 MR. HOLMES: None of them originated  
26 with OSM.

27  
28 MR. STONE: To answer your question  
29 Council Member Mr. Holmes. You are correct in that a  
30 lot of these regulations were adopted during the time  
31 when the Federal regulations were first enacted. And  
32 in certain circumstances some of these State fisheries  
33 do allow a sportfishing opportunity, whereas they do  
34 not allow for an opportunity for Federal subsistence  
35 users. And we're hoping to address this, and to allow  
36 for more rural subsistence priority for folks that live  
37 in the rural parts.

38  
39 Thank you.

40  
41 MR. HOLMES: I have a point that I'd  
42 like to make on this whole section of which I raised  
43 earlier on our minutes from our meeting and that the  
44 two previous times this has been presented to our  
45 Council, many comments have been made and none of them  
46 have shown up in the minutes. And I would question the  
47 fact, in our region, that sportfish would be allowed  
48 when subsistence is closed. Because in the time that  
49 I've been with the Department and living here, which is  
50

0059

1 like combined over 50 years, 60 years, almost every  
2 single closure in our region, both sportfish,  
3 commercial -- commercial closes first, and then there's  
4 a decision to make on subsistence and sport, but in our  
5 region I don't recall any single time where sportfish  
6 has been allowed to continue if the subsistence is  
7 closed. And there are several reasons why, and,  
8 particularly in Unalaska why those are implemented the  
9 way they were, they were done in coordination between  
10 the State and the local Advisory Committees and  
11 presently since the Subsistence Management Program was  
12 developed, all the ones that are within jurisdiction of  
13 the Federal government, are all consulted with prior to  
14 the closure.

15

16 And so tell me where there has been a  
17 sportfish allowed in our region when the subsistence is  
18 closed, I just don't recall that.

19

20 MADAME CHAIR TRUMBLE: Jarred, do you  
21 have an answer?

22

23 MR. STONE: Madame Chair. Mr. Holmes  
24 -- Council Member Holmes, would you mind just maybe  
25 restating that so I understand the question.

26

27 MR. HOLMES: Well, yes. A, okay, the  
28 regulations in place were originally from the State,  
29 okay. B, and my recollection, let's say the Buskin,  
30 for instance, there is no commercial fishery allowed  
31 for red salmon near there by the Alaska Fish and Game.  
32 If there is any closure then the area biologist, James  
33 Jackson, calls up Bill Pyle at the Refuge and he says,  
34 gee, the escapements are way down, we're going to have  
35 to close things up and both the commercial -- the  
36 commercial fishery is already closed and then the  
37 sportfish and commercial -- and the subsistence are  
38 closed at the same time. And you made the statement  
39 that this process is to avoid the problems that would  
40 occur, would provide for subsistence fishing if its  
41 closed by the State, and I do not recall ever -- it  
42 might have happened sometime, but that the subsistence  
43 has been closed and the sportfish left open, it just  
44 doesn't happen. It's almost a matter of policy. And I  
45 checked with the area biologist and the regional  
46 biologist and sportfish and commercial fisheries and  
47 tell me where this has happened and why is it a  
48 problem.

49

50

0060

1 MR. AYERS: Madame Chair.

2

3 MADAME CHAIR TRUMBLE: Go ahead,  
4 Jarred.

5

6 MR. AYERS: Madame Chair, this is Scott  
7 Ayers, I'm the Fish Division Supervisor at OSM. Could  
8 I speak up to the question?

9

10 MADAME CHAIR TRUMBLE: Yes, go ahead.

11

12 MR. AYERS: Hi, thank you. And thank  
13 you for allowing me to be part of this meeting today,  
14 it's exciting to be here and I'm still -- while I spent  
15 time at OSM, I've been gone for a few years and I'm  
16 happy to be returning and am happy to see the Council  
17 so invigorated in these discussions.

18

19 To Mr. Holmes' question. The fisheries  
20 that we're talking about aren't fisheries that were  
21 closed as a matter of, even the season adjustments,  
22 these are fisheries that are closed by regulations and  
23 have been closed for a number of years. And I believe  
24 what Jarred was bringing up was that there are some of  
25 these closures that are closures to both State and  
26 Federal subsistence that do have allowances for  
27 sportfishing, I believe, in some of the freshwaters in  
28 Unalaska, that's the case, and I believe that was what  
29 Jarred was bringing up as part of his discussion. The  
30 closure review process as was stated earlier by the  
31 other member is a little bit awkward right now, in  
32 that, our timing is not optimal to bring these closures  
33 and this discussion to you, letting you know that  
34 there's going to be an analysis conducted that you'll  
35 be in the fall, but also letting you know that if you  
36 want to make changes beyond the scope of those four  
37 options you have to do it now and we recognize this and  
38 this is something that we've been discussing internally  
39 about attempting to see if we can make changes to the  
40 timing of this process for the next cycle.  
41 Unfortunately we're just too far along right now to  
42 make those changes.

43

44 Our intent today to bring this forward  
45 with you was mostly to provide some discussion on the  
46 front end that these closure reviews would be coming to  
47 you in the fall and to provide opportunity for the  
48 Council members to consider what the options will be,  
49 and also to let you know which closures were going to  
50

50

0061

1 be up for review so that there was ample opportunity to  
2 consider those and reach out to others in the area as  
3 appropriate for their feedback before the fall came.

4  
5 Thank you, Madame Chair.

6  
7 MADAME CHAIR TRUMBLE: Thank you. So  
8 any other comments.

9  
10 MR. KOSO: Madame Chair.

11  
12 MADAME CHAIR TRUMBLE: Go ahead, Rick.

13  
14 MR. KOSO: Yeah, I guess I got a -- I  
15 guess I'm more confused than anything. I think in Cold  
16 Bay there just north of Trout Creek, I know they put  
17 markers out this last couple of years for 500 yards  
18 from the entrance to the creek there and it was closed  
19 down to -- as far as I understand, I could be wrong, it  
20 was closed down to subsistence users but not for  
21 sportfishing, they were able to sportfish there, but we  
22 were not able to do the subsistence fishing in that  
23 area. So that's one of the deals that I was concerned  
24 about.

25  
26 And then in Adak, you know, it kind of  
27 got me that they were closed down in Kagalaska, you  
28 know, streams there, ADF&G, when there's not a  
29 commercial fishery that's been out there since the  
30 1960s so I don't know why they would close that down  
31 to, you know, subsistence fishermen.

32  
33 Those are the only places that I know  
34 that people go from Adak that they're able to get red  
35 salmon so that would be a real hit to the local people  
36 in Adak.

37  
38 MADAME CHAIR TRUMBLE: Thank you. This  
39 is Della, I have to admit I'm a little -- I get a more  
40 confused, I swear, the more we discuss this particular  
41 issue. So correct me if I am wrong. As stated, if we  
42 rescind these closures from regulations, aren't these  
43 closures basically State regulations?

44  
45 MR. STONE: Madame Chair. Yeah, so  
46 when there are existing State regulations, if there are  
47 no Federal regulations to back them, then, yes, they  
48 would revert to State sportfish regulations. A lot of  
49 times, with these closure reviews, if they're rescinded  
50

0062

1 they would then fall back on to the area, or the region  
2 area regulations.

3

4 MADAME CHAIR TRUMBLE: Okay. So given  
5 that answer, if this Council voted to rescind these  
6 regulations and then we have to go through a process,  
7 our Staff would need to determine whether there are  
8 regulations or in place or whether or not we have to  
9 create ones, would that be the next process prior to  
10 the fall meeting?

11

12

13 MR. STONE: Thank you, Madame Chair.  
14 Yes. You know, I think in the ideal situation in the  
15 fall when we come to you next with our Staff analysis  
16 and our preliminary conclusions that we have sort of a  
17 formulated stance, or approach for the Council to  
18 consider so that they can consider opening these  
19 waters. That was our intent with our last seven  
20 fisheries closure reviews that we reviewed last cycle,  
21 our intent then was to allow sort of a limited  
22 opportunity to mirror State fishing regulations to have  
23 rod and reel fisheries in each of those closed waters.  
24 And as Council Member Koso had mentioned, you know,  
25 currently as the regulations sit right now, you know,  
26 as a Federal subsistence user you cannot fish in these  
27 waters, however as a sport fisher you can, so we were  
28 hoping to address this rural priority issue and to  
29 allow opportunity for Federally-qualified to  
30 participate in these fisheries.

31

32

33

34 Thank you, Jarred. I agree with Rick also because I do  
35 hear -- that question has been brought to my attention  
36 from other residents in Cold Bay and King Cove.

37

38

39 So basically at this particular moment  
40 in time what are we, as a Council, needing to do?

41

42

43 MR. STONE: Madame Chair. Right now if  
44 the Council wishes to submit a proposal for any of the  
45 14 closure reviews, you can do that today or tomorrow  
46 or any time during the call for proposal, when that  
47 window opens. You can choose to do nothing for now and  
48 come fall wait for our Staff analysis and make a  
49 decision at that time. The timing of it, like Mr.  
50 Ayers had mentioned, is a bit awkward, in that, the  
call for proposals will then be over in the fall and so

0063

1 then to take action or modify any of the closures you  
2 would have to wait until the next cycle which would be  
3 in two years.

4

5 MADAME CHAIR TRUMBLE: Okay. So maybe,  
6 Council, my recommendation might be that we review  
7 what's in front of us and if there are or is a  
8 particular one you would like to see rescinded then we  
9 can try to draft a proposal, maybe a time tomorrow,  
10 before the closing of the meeting, that we do so.  
11 Would that be agreeable?

12

13 MS. CHERNOFF: Madame Chair.....

14

15 MR. HOLMES: I think we.....

16

17 MS. SKINNER: Della, this is.....

18

19 MR. HOLMES: .....should wait for the  
20 analysis, Madame Chair.

21

22 MADAME CHAIR TRUMBLE: Pat, if we wait  
23 for the analysis.....

24

25 MR. HOLMES: Madame Chair.

26

27 MADAME CHAIR TRUMBLE: Yeah, Pat it was  
28 brought up that if you want for the analysis it would  
29 be another basically two years. Rebecca, I believe I  
30 heard you.

31

32 MS. SKINNER: Yep, you did. Can I  
33 defer to Coral because I think I've already spoken at  
34 least once on this and then I can go after Coral.

35

36 MADAME CHAIR TRUMBLE: Okay, go ahead,  
37 Coral.

38

39 MS. CHERNOFF: I -- yeah, I don't have  
40 -- well, maybe -- no, I don't have anything to say on  
41 this question but I do have a comment, maybe after we  
42 cover this question I do have a comment on something  
43 that was talked about before so I'll just wait until  
44 we're finished on this subject.

45

46 MADAME CHAIR TRUMBLE: Okay. Rebecca.

47

48 MR. STONE: Yeah, so in -- I guess in  
49 regards to what the Council needs to do or can do right  
50

0064

1 now and then what we need to do or can do in the fall,  
2 on the one hand I do appreciate Della's suggestion to  
3 look at the closures reviews and take advantage of the  
4 timing opportunity to propose regulatory changes that  
5 would need to go into effect if the result of the  
6 closure review is to rescind the closure. So I mean in  
7 some ways I do like that suggestion.

8  
9 On the other hand, reflecting back to  
10 Pat's comments at the beginning of the meeting, that  
11 the closure reviews weren't originally included on the  
12 agenda and also just thinking about the amount of  
13 information involved with each of these closure  
14 reviews. So having participated in the previous  
15 discussions with the RAC and then also the small sub-  
16 group that talked about, and developed kind of an  
17 outreach plan regarding the closures, there's a lot of  
18 information. And so I am concerned about trying to  
19 quickly digest that and come up with cohesive  
20 regulatory proposals in the middle of the RAC meeting  
21 that's happening.

22  
23 I did ask the questions of Jarred, you  
24 know, what happens if we don't have regulations and his  
25 response was that the default would be whatever's  
26 allowed under State sport regulations for the area,  
27 that would be the default. I'm actually fairly  
28 comfortable with that because I do support a  
29 subsistence priority so at least if subsistence users  
30 get the same access as sport users under State regs I'm  
31 okay with that, understanding that it would then take  
32 another two years to get back to the fishery proposal  
33 cycle.

34  
35 So I guess I just want to be clear in  
36 my understanding, at the meeting today, we're not  
37 taking action on closure reviews; that's something  
38 we're going to do at the fall meeting and, in fact, we  
39 don't even have any materials in the agenda packet  
40 regarding the closure reviews. What is on the agenda  
41 for potential action today would be proposing potential  
42 changes to fishery proposals, which technically the  
43 call for proposals hasn't opened yet, but if we want to  
44 take action as a Council, this meeting is the time we  
45 would have to do it because by the time we get to our  
46 fall meeting the window would have closed. So we could  
47 generate some potential proposals at this meeting for  
48 fisheries, that then would be kind of the fallback  
49 position if some of the closures were actually  
50

0065

1 rescinded. And I think the situation probably isn't  
2 that complicated but, yeah, the awkward timing isn't --  
3 isn't helping, I think that actually makes it a lot  
4 more confusing, you know, oh, well, what are we doing  
5 today, it's almost like the step that's in front of us  
6 today is really the second step in the process, we  
7 haven't even acted on the closure reviews yet and we  
8 are not going to at this meeting.

9

10 So after all of that talking, like I  
11 said, I see merits to Della's' suggestion, I also see  
12 some challenges and I will be quiet and let some other  
13 people talk.

14

15 Thank you.

16

17 MADAME CHAIR TRUMBLE: Are there any  
18 other comments.

19

20 MR. HOLMES: If there's not I'd like to  
21 make a brief one.

22

23 MADAME CHAIR TRUMBLE: Go ahead, Pat,  
24 and then I had.....

25

26 MR. PRICE: Pat, this is Chris, I had a  
27 brief comment.

28

29 MADAME CHAIR TRUMBLE: Okay.

30

31 MR. PRICE: So I just want to clarify.  
32 So the closure reviews and the review of those are  
33 going to happen at the September meeting in Cold Bay  
34 and then based on those discussions and decisions we'll  
35 see how they -- what the recommendations are at that  
36 point; is that correct?

37

38 MR. AYERS: Madame Chair.

39

40 MADAME CHAIR TRUMBLE: Go ahead.

41

42 MR. AYERS: Hi, this is Scott again.  
43 Thank you, again, for the opportunity. That is  
44 accurate. Right now there is no action required of the  
45 Council on the closures as was described earlier, just  
46 a few moments ago by the Council member. We are  
47 providing you with a list of closures that are going to  
48 be brought to you in the fall with analysis, with  
49 relevant information for the Council to make a  
50

0066

1 recommendation, they would then go through the same  
2 process to the Board as the regulatory proposals do and  
3 the Board would give deference to the Councils related  
4 to these issues.

5  
6 The closures are -- again, if there is  
7 no relevant Federal subsistence regulation in place for  
8 the area, they would defer next to State subsistence  
9 regulations. As all of these areas, I believe have  
10 that same closure, in both Federal and State  
11 subsistence regulations, they would then defer to State  
12 sportfish regulations. They would not -- they would  
13 incorporate those into the Federal regulations, if that  
14 makes sense. This is the opportunity right now to  
15 submit a parallel proposal, if the Council so chooses,  
16 that would allow you to put one of the other options  
17 out there beyond the four options that Jarred described  
18 earlier, however, you may also choose to make no --  
19 take no action -- there's no action to be taken on the  
20 closures, you may choose to not submit proposals at  
21 this point in time if you so choose.

22  
23 Please let me know if that clarified  
24 anything or if I've just muddied the waters further.

25  
26 MADAME CHAIR TRUMBLE: So basically  
27 that leads me to -- this is Della. Leads me to the  
28 point or question is, if you look at Jarred's memo and  
29 he basically said that you're seeking input whether to  
30 recommend lifting local fishery closures in the  
31 Kodiak/Aleutian region and then the Federal Subsistence  
32 Board relies upon public comments to better inform the  
33 decisionmaking process. The Board options during a  
34 closure review are retain, modify, rescind or defer.  
35 If we were to recommend to rescind, technically if it  
36 went through the process then it would revert to  
37 subsistence utilizing whatever the State sportfish  
38 regulation is in place; is that correct?

39  
40 MR. AYERS: Yes, I believe that is the  
41 correct answer.

42  
43 MADAME CHAIR TRUMBLE: And the other  
44 question I guess I have is an issue of timing.  
45 Whatever decision is made today and if we request to  
46 put a proposal into place there's a deadline and that  
47 needs to be done prior to our fall meeting, is that  
48 correct, or can it be done at that fall meeting, or do  
49 we have to wait another two years for the fisheries  
50

0067

1 cycle.

2

3

MR. AYERS: Madame Chair.....

4

5

6

MR. STONE: Madame Chair, this is Jarred. Are you talking about the -- at what time you can submit a proposal for the change of regulations?

7

8

9

MADAME CHAIR TRUMBLE: That's correct.

10

11

12

13

14

15

16

17

18

19

20

21

22

23

24

25

26

27

28

29

Thank you.

30

31

32

33

34

35

36

37

38

39

40

41

42

43

44

45

46

47

48

49

50

MADAME CHAIR TRUMBLE: Thank you, that helps. I'll be honest with you I'm looking at Russell Creek and Nurse Lagoon. Because -- and I don't particularly know the real answer to this but what was brought from a resident in Cold Bay was, you know, they have the sportfish, most of us go over -- I, myself, go over and I sportfish for my subsistence in reality. I use that fish for subsistence. But the question was is how come there's not a subsistence regulation in place but there is sport in place and doesn't subsistence -- isn't subsistence a priority, so that's basically the question. And I think if you get to -- I think it comes up more and more and I think as we all know, is if there is a shortage of salmon, which I think about-- as I recall, but maybe Rick could help me, maybe about four years ago there definitely was a shortage. So I just want to make sure that I understand so if I talk to somebody in Cold Bay and they suggest that we put in a proposal then I want to be able to work with them to

0068

1 do so but I wanted to make sure that I got the dynamics  
2 of this whole process in place.

3

4 MR. STONE: Thank you, Madame Chair.  
5 Yes, as a Council you can put together a proposal today  
6 or tomorrow but if you work with individuals outside of  
7 the Council they would have to wait until the window of  
8 opportunity opens for the call for proposals, and any  
9 individual can submit a proposal to change or modify  
10 these fisheries regulations.

11

12 Thank you, Madame Chair.

13

14 MADAME CHAIR TRUMBLE: Thank you,  
15 Jarred.

16

17 MR. HOLMES: Madame Chair.

18

19 MADAME CHAIR TRUMBLE: Go ahead, Pat.

20

21 MR. HOLMES: I appreciate the  
22 difficulties here. But as Rebecca pointed out and I  
23 mentioned earlier, we had our agenda published and it  
24 was revised today and maybe we can make changes without  
25 going to the public. This review process that we  
26 worked on for getting more input from the communities  
27 was to be making presentations to the Advisory  
28 Committees. Before that decision was made, there was  
29 an informal one with the Kodiak AC that I listened to  
30 and they had some questions that I don't believe were  
31 answered for them. They were hoping to have them back,  
32 so did, A, did we have briefings in the communities  
33 other than what has gone on through our RAC? And then  
34 I'll go on with my questions, or my comment on the need  
35 for more information. What groups have you met with  
36 since that casual meeting where the AC called you in  
37 Kodiak, has there been one for Sand Point, Unalaska, or  
38 meetings with the tribes?

39

40 MR. STONE: Thank you. Through the  
41 Chair. Council Member, Mr. Holmes. So, you know, at  
42 the direction of the Kodiak/Aleutian Regional Advisory  
43 Council, OSM Staff and volunteers from the Council  
44 began reaching out to the communities and tribes and  
45 the State Advisory Committees for their  
46 representatives. A meeting was held with tribal  
47 representatives from Kodiak Island back in January of  
48 2021. Seven representatives were in attendance. All  
49 tribal representatives expressed gratitude for the  
50

0069

1 notice and they withheld any comments or  
2 recommendations until they had more time to consider  
3 the closure reviews.

4

5 OSM Staff then met with the Kodiak Fish  
6 and Game Advisory Committee on February 9th, 2021 to  
7 present fishery closure reviews and get feedback.  
8 This, I believe, was the meeting that you are  
9 referring to, Mr. Holmes, and OSM Staff had also  
10 attended the Dutch Harbor/Unalaska Fish and Game  
11 Advisory Committee meeting held on February 22nd last  
12 year, however, that was the meeting that was cancelled  
13 due to the Committee not having a quorum.

14

15 So during that time, during last  
16 summer, members of the Kodiak/Aleutian Regional  
17 Advisory Council had volunteered to assist OSM Staff in  
18 outreach efforts and we met twice last summer to  
19 develop this outreach plan that would encourage local  
20 residents and stakeholders to consider providing  
21 comments regarding each of the closure reviews.  
22 Various outreach materials were crafted, some of which  
23 you have seen. We had posted shorter summaries on our  
24 website that had described the closures, and offered up  
25 additional maps that helped clarify the actual areas  
26 that were closed. We had drafted some radio and  
27 newspaper advertisements, however, we withheld those  
28 until we were thinking closer in time towards the fall  
29 meeting just to generate more public interest and the  
30 timeframe of it was going to work out better we thought  
31 if we waited for those to go out this summer.

32

33 And then lastly we had created the  
34 community flier. And I sent out most of those  
35 community fliers to various communities just before  
36 Christmas, I believe. And I tried to get some of the  
37 Council members feedback as to where exactly I should  
38 be sending this fliers and I had generated a list of a  
39 large amount of contacts, actually, from various  
40 communities and had sent these community fliers out, as  
41 I mentioned, just before Christmas. And they really  
42 were just aimed at the general public to help inform  
43 them of our process and where and how to submit a  
44 public comment.

45

46 And as of last week we have not  
47 received any public comments regarding any of the  
48 fishery closure reviews thus far.

49

50

0070

1 Thank you.

2

3 MR. HOLMES: Yeah, I -- Madame Chair,  
4 Pat.

5

6 MADAME CHAIR TRUMBLE: Go ahead, Pat.

7

8 MR. HOLMES: Yeah, I'd like to commend  
9 you on your efforts. I did printout that information  
10 and then I also emailed and talked to everybody that I  
11 possibly knew about this topic and that it would be  
12 coming up if it were going to be on our fall agenda.  
13 And I mean like at least 50 people and all the way out  
14 west, and really didn't get any response at all on it.

15

16 I think that we really do need more  
17 information.

18

19 I believe that ADF&G has some reports  
20 coming up, I believe, Lisa Fox who is the area  
21 biologist for the Alaska Peninsula, might be able to  
22 explain to you the closures there in Cold Bay and why  
23 they're there and I believe that she and her assistant  
24 have come up with some solutions so we might want to  
25 wait until we hear from Fish and Game later in our  
26 meeting to see what's going on there. And you could  
27 also ask them about any problems that you perceive,  
28 Rick, out at Unalaska.

29

30 And then I think also as far as  
31 information goes, the Unalaska subsistence survey is  
32 being conducted now but won't be summarized until later  
33 on and so that'll be questioned where people will say,  
34 gee, there is a problem. And so those are things I  
35 think that should be kept in mind.

36

37 And I'd like to make one comment on the  
38 stream that most people think about in Unalaska and  
39 that's Iliuliuk that comes out of Unalaska Lake and the  
40 drone surveys that they've been doing show that there  
41 and the other systems on the road for reds, which is  
42 the main target for subsistence in Unalaska are still  
43 down after more than 25 years. Morris has like about  
44 100 fish going back to that lake, 100 fish and Unalaska  
45 Lake has like 400. The community has reduced their own  
46 harvest on Towne Beach with gillnets and many years ago  
47 they worked with the area biologist Arnie Shawl and I  
48 also worked with them on the closures for Iliuliuk and  
49 only allowed fishing -- red fishing in that stream to  
50

0071

1 the Church Hole and that's because there's only 400  
2 fish that have come back to that, usually less. And  
3 these places are stressed out and so -- and I'd be open  
4 to having sport gear for subsistence if it wouldn't  
5 potentially cause difficulties in the returns, but when  
6 you have very small returns and let's say you have -- I  
7 think a question you should have for the sportfish data  
8 is do they have any data on what the sport catch is,  
9 would that double the catch in-stream for what gets  
10 into the Iliuliuk and then what's going to happen to  
11 the returns in the future.

12

13 So that's my point, is, thinking about  
14 the fish and adding another harvest level. So I  
15 honestly think we should explore this future when we  
16 get the State people making their reports, asking them  
17 questions about what have been reported as problem  
18 areas, King Cove, Adak and then just see what the  
19 options are. And then also we'll probably have the  
20 sportfish biologist, regional one, Tyler Polum, I think  
21 should be on there somewhere and ask him some very  
22 pointed questions about what's allowed and what's taken  
23 and -- before we go on this.

24

25 And so at that I'll just close with  
26 Becky's main point, if it wasn't on the agenda, if  
27 we're firing up a new proposal, are we going to run  
28 amuck. So thank you and I'm sorry to be so gabby.

29

30 Thanks a lot, bye-bye.

31

32 MADAME CHAIR TRUMBLE: Thank you, Pat.  
33 And if I may make a comment, this is Della. 11B item  
34 on the agenda is call for Federal fish and shellfish  
35 proposals. Item C is the closure discussion. So this  
36 particular meeting basically is a discussion to call  
37 for any proposals or an action item whether to propose  
38 regulatory changes, which we're allowed to do and this  
39 was noticed -- this stuff was given to the public, it's  
40 part of the notice and this process for this meeting.  
41 And the point of the awkwardness of this timing is  
42 correct but there's a lot of awkwardness with a lot of  
43 stuff we got going on due to Covid and it's just things  
44 we need to work with.

45

46 I understand, Pat, you getting the  
47 information, I think it's great to look at what the  
48 State's reports are and I agree to wait until the  
49 following meeting, but I don't necessarily agree to put  
50

0072

1 this totally aside and if there's something that can be  
2 put into place, possibly, and then to work with the  
3 State through the course, prior to our fall meeting, I  
4 would just like that opportunity. I think that's what  
5 this call for Federal proposals is.

6

7 If somebody could help me if I'm  
8 getting this all wrong.

9

10 MR. KOSO: Yeah, Madame Chair.

11

12 MS. SKINNER: Madame Chair.

13

14 MADAME CHAIR TRUMBLE: Go ahead, I  
15 think I thought I heard Rick, and then maybe -- I don't  
16 know who the lady was behind him.

17

18 MR. KOSO: Yeah, this is Rick here,  
19 Madame Chair. Yeah, you know, I'm all for ADF&G and  
20 their regulation, but I question some of their actions,  
21 you know, we really feel it in Cold Bay, probably the  
22 only place that I feel it and I think everybody else  
23 does that's a subsistence fisherman. They closed  
24 Mortensens Lagoon down to subsistence fishermen and  
25 left it open for sportfishing, unless I'm wrong on that  
26 but I'm pretty sure I'm not, and we get hundreds of  
27 people that come in, you know, through Anchorage and go  
28 down and sportfish there and so they're catching a  
29 tremendous amount of fish out of there and the  
30 subsistence people are not able to go and catch their  
31 fish and we've been fishing Mortensens Lagoon for 50  
32 years that I could remember in my lifetime for  
33 subsistence, so they closed that down, I think it was  
34 last year for subsistence and so I think it's  
35 conservation but to leave it open for sportfishermen, I  
36 think ADF&G needs to follow the regulation too on  
37 priority where the subsistence users are, you know,  
38 above the sportsfishermen. So I think they need to get  
39 in line on how that works and I think they should be  
40 giving the subsistence fishermen priority over  
41 sportfishing.

42

43 So that's all I have to say, I don't  
44 want to prolong this anymore.

45

46 MADAME CHAIR TRUMBLE: Thank you, Rick.  
47 There was a lady starting to make a comment.

48

49 MS. SKINNER: Yeah, it was Rebecca.

50

0073

1 MADAME CHAIR TRUMBLE: Okay, Rebecca,  
2 go ahead.

3  
4 MS. SKINNER: Yep, thank you. So a  
5 couple of things and then a suggestion. I just wanted  
6 to clarify that we -- it was noticed to the public that  
7 as a RAC we were going to discuss and have the  
8 opportunity to propose regulatory changes related to  
9 fisheries. So there's no question in my mind that that  
10 was properly noticed and, in fact, that's one of the  
11 big things that we're going to do at this meeting, this  
12 particular meeting. My caution, as far as what was not  
13 noticed to the public, was getting into a significant  
14 RAC discussion about the pros and cons of the specific  
15 fishery closure reviews because that was not on the  
16 agenda well in advance, and there's no materials as  
17 part of the packet, and so I would be concerned if we  
18 were having significant RAC discussion about whether  
19 the closures should be rescinded or not and getting  
20 into a lot of detail.

21  
22 I do acknowledge that that's probably a  
23 very awkward and fine distinction because the proposals  
24 we might be talking about, you know, are related to the  
25 closure reviews. But I did just want to clarify that  
26 those are two different things, they're going to be two  
27 different RAC actions. So the RAC can take action to  
28 propose regulatory changes; in the fall the RAC will  
29 take action to, you know -- you know on the closure  
30 reviews, to recommend one of the four options that  
31 Jarred went over. So that's comment one.

32  
33 The suggestion is, and I don't know if  
34 you need a motion to this but I would suggest that we  
35 table the regulatory discus -- the regulatory changes  
36 discussion until at least tomorrow and that will give  
37 some opportunity for some offline discussions to  
38 develop some actual regulatory language if any RAC  
39 members want to propose, you know, put some language  
40 together for the RAC to consider as far as a proposed  
41 regulation. Because I think that that's going to be a  
42 more efficient development process to do offline as  
43 opposed to trying to do it in the middle of the  
44 meeting. So if it is appropriate and you need a motion  
45 I'd be happy to move to table this particular item  
46 until tomorrow.

47  
48 MR. HOLMES: I'll second that.

49  
50

0074

1 MADAME CHAIR TRUMBLE: So Rebecca I'm  
2 going to assume that's a motion since Pat seconded it.

3  
4 (Laughter)

5  
6 MS. SKINNER: Yep.

7  
8 (Laughter)

9  
10 MADAME CHAIR TRUMBLE: Okay. All  
11 right. We have a motion made and second. Discussion.

12  
13 (No comments)

14  
15 MADAME CHAIR TRUMBLE: Call for  
16 discussion.

17  
18 MS. CHERNOFF: No, I guess -- this is  
19 Coral.

20  
21 MADAME CHAIR TRUMBLE: Okay, Coral.

22  
23 MS. CHERNOFF: I don't have discussion  
24 particularly on this motion but I still -- I was  
25 waiting to make comment still.

26  
27 MADAME CHAIR TRUMBLE: Okay. Do you  
28 want to go ahead and make that comment now before we  
29 vote on this, Coral?

30  
31 MS. CHERNOFF: No. No, I think we can  
32 vote on it and then I'll just make another comment.

33  
34 MADAME CHAIR TRUMBLE: Okay. All  
35 right. All in favor signify by saying aye.

36  
37 IN UNISON: Aye.

38  
39 MADAME CHAIR TRUMBLE: Opposed, same  
40 sign.

41  
42 (No opposing votes)

43  
44 MADAME CHAIR TRUMBLE: Motion carried.  
45 We will table this until tomorrow. Now, Coral, do you  
46 have a comment.

47  
48 MS. CHERNOFF: Yeah, I guess my comment  
49 is I -- it seems like there's really still this sort  
50

0075

1 of, I don't know how much lack of understanding there  
2 is over these closures and I don't know how we can  
3 clear up that before we come to our next meeting.  
4 There seems to be confusion.

5  
6 And then I guess I have a little  
7 confusion, too, in when we're talking about if this --  
8 let me look at my notes -- so if this gets rescinded we  
9 keep sort of jumping over -- we do say if there's no  
10 regulations then it goes to sports regs, but we're all  
11 in areas where we all have subsistence so I'm not under  
12 -- so my understanding is why do we keep jumping over  
13 that then we go right into whatever our subsistence  
14 regulations are for our area. So I think then there  
15 seems to cause this panic that we jump right over into  
16 -- then it'll -- then we'll go right into method and  
17 means and times and what do you call, how many you  
18 keep, limits, then we'll go into sport but we keep  
19 skipping over the fact that we all do have subsistence  
20 areas with subsistence rulings. So I think that's  
21 causing a little bit of confusion and if somebody wants  
22 to address that maybe we can address that.

23  
24 Because I know when I look in the  
25 Kodiak area, of course, we have subsistence take of  
26 salmon in our area so I'm assuming that we would just  
27 go right into that and we may have -- nope, outside of  
28 that area we have customary and traditional -- some you  
29 might have customary and traditional use determinations  
30 already in the area, so I guess that, to me, is causing  
31 some lack of understanding.

32  
33 And then I think if people want to go  
34 back to what they're doing on this Board, we're  
35 representing subsistence and the kind of upholding of  
36 the Title VIII, which gives subsistence priority, so  
37 I'm not quite understanding -- it seems like that's  
38 kind of a no-brainer that all of that probably today,  
39 if that's what we are to do, is to uphold these  
40 subsistence priorities we could all just go ahead and  
41 vote to rescind all these today because that's kind of  
42 what we're here to -- sports is already open in all  
43 these areas and subsistence is not and so that seems  
44 like a no-brainer to me, and then in the fall just --  
45 we look at whether -- how our local subsistence applies  
46 to these areas and if it's not sufficient then work on  
47 proposals that gets submitted in addition to these.

48  
49 And so that's all my comments and then  
50

0076

1 if anybody would like to comment about, I guess, my  
2 perception of why we just kind of keep jumping over the  
3 -- we have subsistence in our area and how would that  
4 apply if these are rescinded. I think that might  
5 be.....

6  
7 MS. GREDIAGIN: Yeah, Madame Chair.

8  
9 MS. CHERNOFF: .....a helpful  
10 (indiscernible - cuts out)

11  
12 MADAME CHAIR TRUMBLE: Thank you,  
13 Coral. Is that you Katya.

14  
15 MS. GREDIAGIN: Oh, no, this is.....

16  
17 MS. WESSELS: No, it wasn't me, Madame  
18 Chair.

19  
20 MS. GREDIAGIN: .....Lisa Grediagin  
21 with OSM. I'm the Wildlife Division Supervisor. But  
22 we deal with the same closure review issues on the  
23 wildlife side. So I would just like to respond to  
24 Coral's question because I think the Council has gotten  
25 a little confused on how rescinding the closures work.

26  
27 And so if there's a closure under  
28 Federal regulations that's to all users, so there's no  
29 harvest limit or season under Federal regulations, but  
30 the Board -- the Council recommends rescinding that  
31 closure to everyone, then there are still no Federal  
32 regulations but then because there is no closure --  
33 Federal closure anymore then everyone can still fish  
34 under the State regulations. So I think that's where a  
35 little confusion came when people were saying revert to  
36 the State regulations, is just because there is no  
37 longer a Federal closure in place then people can fish  
38 or hunt under the State regulations but there would  
39 still need to be a Federal proposal to establish the  
40 harvest limit and season under the Federal regulations.

41  
42 MADAME CHAIR TRUMBLE: Thank you.

43  
44 MS. GREDIAGIN: Thank you.

45  
46 MADAME CHAIR TRUMBLE: And I think if  
47 you look into the fisheries closure review in our  
48 minutes it basically says Mr. Stone gave an update on  
49 the outreach effort and that all of these were deferred  
50

0077

1 by the Federal Subsistence Board from the last  
2 fisheries regulatory cycle at the request of the  
3 Council, and that was for the purpose of trying to have  
4 public meetings and Advisory Council meetings, but  
5 we're actually now going into the second year of this  
6 process and we still have not made headway. So that's  
7 basically the next issue. If the Council makes a  
8 decision to ask to have those lifted as a whole and try  
9 to determine what the process would be for a proposal  
10 or, you know, what exactly -- you know, what would  
11 happen if we agreed at this point to recommend to the  
12 Federal Board that those closures be lifted.

13

14 (No comments)

15

16 MADAME CHAIR TRUMBLE: Hello.

17

18 MS. GREDIAGIN: Madame Chair, this is  
19 Lisa. And, yeah, I would have to defer to Jarred or  
20 Scott for the specifics of those closures because I'm  
21 just, yeah, more familiar with the process and the  
22 wildlife regulations, but, yeah, it would depend  
23 whether there's -- I mean, yeah, I guess I would think  
24 you would still need to submit a proposal to establish  
25 the harvest limit and season under the Federal  
26 regulations if it's currently a closure to all users.

27

28 MS. WESSELS: Yeah, Madame Chair, this  
29 is Katya.

30

31 MADAME CHAIR TRUMBLE: Go ahead, Katya.

32

33 MS. WESSELS: Yes, I just wanted to let  
34 the Council members know and the public, that the  
35 information on the fisheries closure reviews that the  
36 Council addressed during the fall of 2020 for the first  
37 time, and that the Council decided to defer is actually  
38 now on the Council meeting materials page, it's  
39 supplemental material No. 3, and if you click on that  
40 link there is information on the first seven closure  
41 reviews that the Council addressed in 2020.

42

43 That's all, thank you.

44

45 MADAME CHAIR TRUMBLE: Okay.

46

47 MR. STONE: Madame Chair, this is.....

48

49 MS. LAVINE: Madame Chair.....

50

0078

1 MR. STONE: .....Jarred.

2

3 MADAME CHAIR TRUMBLE: Okay, Jarred.

4

5 MR. STONE: Thank you, Madame Chair. I  
6 guess I would just maybe caution the Council in making  
7 a broad sweep in rescinding all of them as sort of a  
8 package. You know the previous cycle we had Staff do  
9 the analysis on the first seven of the closure reviews,  
10 and the upcoming new closure reviews for this next  
11 cycle have not had Staff analysis yet and so I just  
12 want to preface that by saying I -- as a Council I  
13 would recommend maybe only considering those first  
14 seven since there's available information surrounding  
15 those fisheries.

16

17 Thank you, Madame Chair.

18

19 MADAME CHAIR TRUMBLE: Thank you,  
20 Jared. That's what I was recommending. For some  
21 reason I've got a letter from you and then I've got  
22 seven pieces of document that says Federal Subsistence  
23 Board public comment opportunity and it's all the same  
24 page so I don't know -- which is fine, I got lots of  
25 copies -- but, anyway, I think maybe as a  
26 recommendation, we've all contributed to this  
27 discussion and a recommendation, or a motion was made  
28 by Rebecca and seconded by Pat, to keep this on the  
29 agenda but to maybe look at it tomorrow.

30

31 So it was a lot of information for  
32 everybody and maybe we kind of just think about all of  
33 this between now and then and definitely have it on the  
34 agenda before we close our meeting. Would that be  
35 appropriate -- maybe the last item on the agenda after  
36 agency reports, that way we've got everybody's report  
37 to help with making any kind of decision.

38

39 MS. SKINNER: Yeah, that makes sense to  
40 me Della, this is Rebecca.

41

42 MADAME CHAIR TRUMBLE: Okay. And I  
43 guess maybe given that it is noon, so if we break for  
44 lunch, what does everybody want to come back at 1:00,  
45 does that work for everybody or 1:15.

46

47 MS. CHERNOFF: Yes, that works for me,  
48 1:00.

49

50

0079

1 MADAME CHAIR TRUMBLE: Okay. All  
2 right, maybe we break for lunch and everybody be back  
3 at 1:15 and good discussion. Okay, thank you all.

4  
5 (Off record)

6  
7 (On record)

8  
9 MADAME CHAIR TRUMBLE: Hi, this is  
10 Della. Katya, could we get a count of Council members,  
11 please.

12  
13 (No comments)

14  
15 MADAME CHAIR TRUMBLE: Katya, are you  
16 online.

17  
18 (No comments)

19  
20 MADAME CHAIR TRUMBLE: I wonder if she  
21 maybe thought 1:15, I don't know.

22  
23 MR. HOLMES: Hello.

24  
25 MADAME CHAIR TRUMBLE: Hi.

26  
27 MR. HOLMES: Hello.

28  
29 MADAME CHAIR TRUMBLE: Pat, is that  
30 you.

31  
32 (No comments)

33  
34 MADAME CHAIR TRUMBLE: Pat, can you  
35 hear me.

36  
37 (No comments)

38  
39 MADAME CHAIR TRUMBLE: Hello.

40  
41 (No comments)

42  
43 MADAME CHAIR TRUMBLE: Is anybody  
44 online.

45  
46 REPORTER: I'm on here Della.

47  
48 MR. PRICE: I'm here Della.

49  
50

0080

1 MS. HAYDEN: This is Natasha.

2

3 MADAME CHAIR TRUMBLE: Okay, I think  
4 we're waiting for Staff, maybe they thought we were  
5 going at 1:15.

6

7 (Pause)

8

9 MADAME CHAIR TRUMBLE: Okay. Should we  
10 do a tentative call on who's here for the record.  
11 Let's go ahead and do that.

12

13 MS. WESSELS: Yes, we can do that,  
14 Madame Chair. Yes, I'll do the roll call. Pat Holmes,  
15 are you on.

16

17 MR. HOLMES: Here.

18

19 MS. WESSELS: Thank you.

20

21 Rick Koso, are you back.

22

23 (No comments)

24

25 MS. WESSELS: Okay, we can get back

26 Rick.

27

28 Sam Rohrer, are you on.

29

30 (No comments)

31

32 MS. WESSELS: Okay, it looks like he's  
33 not on either.

34

35 Chris Price, are you back.

36

37 MR. PRICE: Here. I'm here.

38

39 MS. WESSELS: Thank you.

40

41 Coral Chernoff.

42

43 MS. CHERNOFF: Here.

44

45 MS. WESSELS: Thank you.

46

47 Rebecca Skinner.

48

49 MS. SKINNER: Here.

50

0081

1 MS. WESSELS: Della. Natasha Hayden.

2

3 MS. HAYDEN: Here.

4

5 MS. WESSELS: Thank you. So we have,  
6 let's see, six out of eight members present, Della, so  
7 we have a quorum. I will ask again if Rick Koso or Sam  
8 Rohrer rejoined the meeting.

9

10 (No comments)

11

12 MS. WESSELS: It doesn't look like  
13 they're back on yet. So you may proceed if you would  
14 like, Madame Chair, or we can wait another few minutes.

15

16 MADAME CHAIR TRUMBLE: We can kind of  
17 start and proceed. Maybe, just for the record I'd call  
18 for any public or tribal comments. Is there anybody  
19 online that would like to speak to that. And just a  
20 reminder, that that option is open, and if you would  
21 like to speak just let me know.

22

23 (No comments)

24

25 MADAME CHAIR TRUMBLE: So, Jarred, are  
26 you online.

27

28 MR. STONE: Yes, Madame Chair, this is  
29 Jarred, I am online.

30

31 MADAME CHAIR TRUMBLE: Okay, thank you,  
32 Jarred. Just maybe before we close out I just have a  
33 couple questions in regard to our last discussion.

34

35 No. 1 on the call for fish and  
36 shellfish proposals and also the fisheries closure  
37 reviews.

38

39 Just so we're all clear, because I have  
40 to be honest with you, I've been through this I don't  
41 know how many times and I still get confused and that  
42 may just be the case with me forever, I can blame it on  
43 age. But can you tell me, and maybe the State can also  
44 answer in regard to this. Let's start with the  
45 fisheries closure review.

46

47 If we look at those, and I'm looking  
48 specifically at Russell and Nurse Lagoon. Now, on  
49 these, for consideration, these are State subsistence  
50

0082

1 closures, does the Federal government -- can the  
2 Federal government set a subsistence fishery for those  
3 waters or are they all under State jurisdiction?

4

5 MR. STONE: Thank you, Madame Chair.  
6 So to my understanding the waters are under both  
7 Federal and State jurisdiction. So there is a Federal  
8 fisheries closure for Federal subsistence users. And  
9 to my knowledge some of these fisheries are closed as  
10 well for State subsistence as well. Where it's awkward  
11 is that there are State sportfishing regulations that  
12 allow people to participate in those waters.

13

14 Does that answer your question.

15

16 MADAME CHAIR TRUMBLE: It does. And I  
17 wanted to make sure we're clear on that. And then  
18 there was, I think, another question, I don't think I  
19 wrote it down -- so if we were to create some sort of  
20 proposal -- and I'll talk to Rick -- I'll talk to Rick  
21 after we break, later, in regards to that. Does  
22 anybody else have another question -- any other  
23 questions on this before we.....

24

25 MS. SKINNER: Yeah, Della, this is  
26 Rebecca.

27

28 MADAME CHAIR TRUMBLE: Go ahead. Go  
29 ahead, Rebecca.

30

31 MS. SKINNER: Thank you. So the  
32 question that I have for clarification, you -- in your  
33 presentation you made it clear that if the fisheries  
34 closures are rescinded, if there is not Federal  
35 regulations in place then the default set of  
36 regulations will be State sportfishing. That made  
37 sense to me, as far as at least understanding what's  
38 the basic, you know, floor that we're looking at. But  
39 over lunch I went in and looked at the regulations just  
40 for the Kodiak area for the Buskin closure to see, you  
41 know, with the language of the regulation, how would  
42 this work, and it looks like for the Buskin area, at  
43 any rate, to remove -- if the closure were rescinded,  
44 the paragraph having to do with the Buskin closure  
45 would be removed and the general subsistence  
46 regulations that otherwise apply to the Kodiak area  
47 would then go into place because the Buskin closure was  
48 basically an extra rule that was put in, so if you  
49 remove the extra rule then, you know, the regular  
50

0083

1 subsistence rules apply. If that were the case it  
2 looked like to me that there wouldn't be a need to fall  
3 back to the State's sport regulations because there  
4 actually would be Federal subsistence regulations  
5 already in place.

6  
7 So I guess it's a two part question.

8  
9 One is, do you know, for each of the  
10 seven areas that have already been analyzed whether  
11 there are Federal regulations that would go -- that  
12 would serve as that fallback or not, and then if you do  
13 have that answer, do you have or is it possible to  
14 quickly get kind of a summary of what those regulations  
15 would be.

16  
17 So I mean I can do that, I can look  
18 through the regulations but I barely had time at lunch  
19 just to find the Buskin one because depending on what  
20 the response is we may or may not need to do  
21 additional, you know, proposed regulatory language at  
22 this meeting. We may be satisfied that, okay, if it  
23 just falls back to the Federal subsistence regs for  
24 whatever area we're talking about, that that's fine and  
25 we're comfortable with that. But at this point I think  
26 we just --we don'tknow thestatus for eachof theseareas.

27  
28 So that was a very long-winded question  
29 but did that make sense?

30  
31 MR. STONE: Thank you, Council Member  
32 Ms. Skinner. Yes, it does. I think right now the  
33 Council is at sort of a crossroads in trying to decide  
34 what to do with these closure reviews. And I would ask  
35 that I work with my team quickly and try to get this  
36 answer for you so that when we circle back to having  
37 the idea of crafting proposals we have a clear answer  
38 for you so that we're not having your Council generate  
39 proposals that are maybe not necessary if it's, indeed,  
40 just maybe rescinding the closures is going to be ample  
41 for moving forward.

42  
43 Again, I need to probably sit down and  
44 work with our folks in-house and just make sure I have  
45 a perfectly clear response for that.

46  
47 MS. SKINNER: Okay, yeah, that -- that  
48 makes sense. Thank you. Thank you, Madame Chair.

49  
50

0084

1                   MADAME CHAIR TRUMBLE:       Thank you,  
2 Rebecca. Any other question or comments before we move  
3 on.

4  
5                   MS. FOX:     Madame Chair, this is Lisa  
6 Fox with Fish and Game.

7  
8                   MADAME CHAIR TRUMBLE:   Go ahead, Lisa.

9  
10                  MS. FOX: I just wanted to address a  
11 question that Coral had had earlier and this is a super  
12 complicated topic, even within the Department and it  
13 sounds like there's a lot of confusion all around.

14  
15                  But one of the questions that had come  
16 up was where does the State subsistence fishery kind of  
17 fit into it. And so I guess there's the State sport  
18 fishery in the freshwater and then the State  
19 subsistence fishery, at least in the areas that I  
20 manage, which is the South Alaska Peninsula and the  
21 Aleutian Islands, those subsistence fisheries are all  
22 in the salt water, and for the State sportfishery,  
23 that's rod and reel, and for the State subsistence  
24 fishery is gillnet. So two different gear types and  
25 two different areas within the water.

26  
27                  And so if the Federal closures were  
28 rescinded, the State sportfishery would be in effect,  
29 and the State subsistence fishery with gillnet in the  
30 saltwater would be in effect still.

31  
32                  So I just wanted to clarify that a  
33 little bit.

34  
35                  MADAME CHAIR TRUMBLE: Thank you. And,  
36 Lisa, can you help me with this, if you look at that  
37 list, using basically Russell Creek and Nurse Lagoon,  
38 on the closures on 21-13, weren't those implemented by  
39 the State -- are those State regulations?

40  
41                  MS. FOX:     So, Madame Chair, those are  
42 the State regulations for using subsistence gillnet  
43 gear and not for where the sportfisheries are. And  
44 that's kind of the confusing part, is each one of these  
45 systems, you know, is a case by case scenario. So like  
46 in Unalaska it says -- in Iliuliuk, it says that that's  
47 open to sportfishing but it's actually closed to all  
48 salmon fishing, it's just for trout fishing in  
49 Unalaska. And then in Russell Creek, it doesn't have  
50

0085

1 any of the areas that are open for gillnet fishing for  
2 subsistence. So there's kind of a part of the picture  
3 that's missing in each one of these -- each one of  
4 these graphics. And we're happy to go through each of  
5 those on a case by case basis from the State side and  
6 Tyler's going to talk a little bit about this later on  
7 when he gives his presentation. I just wanted to try  
8 to clarify a little bit of the State subsistence versus  
9 sport and then Federal kind of the question.

10

11 MADAME CHAIR TRUMBLE: Okay, thank you.  
12 Thank you, that helps.

13

14 MR. KOSO: Madame Chair.

15

16 MADAME CHAIR TRUMBLE: It sounds like,  
17 go ahead, Rick, Rick you're online now.

18

19 MR. KOSO: Yeah, I got cut off, I don't  
20 know what happened. Anyway, a question for Lisa on  
21 that subsistence sportfishing in Cold Bay there. I know  
22 that you put some markers up on the creek, on the beach  
23 going up toward the head of Cold Bay, I think it's 500  
24 yard closures there for subsistence fishing but it was  
25 open to sportfishing, but outside of those markers  
26 there I think it was legal to do subsistence fishing.  
27 Is that right or am I missing something?

28

29 MS. FOX: Yeah, through the Chair.  
30 Rick. Yeah, that's kind of a complicated one, too, in  
31 Cold Bay, that Swan Lake Creek has been kind of a hot  
32 topic the last couple of years. That stream has had a  
33 lot of sockeye salmon harvested from out around in  
34 front of it near the mouth but that stream is actually  
35 not in the anadromous catalog so it doesn't fall under  
36 some of the regulations we have for the State and we're  
37 trying to clean that up. Tyler's going to talk about  
38 this a little bit later too, but we have a couple  
39 proposals to kind of clean up some of the issues that  
40 have been going on up at Swan Lake Creek.

41

42 But, yes, it was open to subsistence  
43 fishing and we didn't have any closures at all for  
44 subsistence fishing. There's just another complicated  
45 regulation and I hate to make it even more confusing  
46 but in the Alaska Peninsula area the subsistence  
47 fisheries closures get tied in with the commercial  
48 fishery closures and we're also going to submit a  
49 proposal to try to clean that up so it only pertains to  
50

0086

1 people who have a commercial fishery permit and not  
2 just the general public. But, yeah, the subsistence  
3 fishing was open and that's for the State, that's with  
4 gillnet gear, so just outside of the markers residents  
5 could put up a gillnet and put up fish with that  
6 method, but not with rod and reel for State. As the  
7 regulations stand right now that's not a -- that's not  
8 a gear type that's allowed in the Alaska Peninsula  
9 area, but sportfishing was allowed and subsistence  
10 fishing was allowed right there.

11

12 MR. KOSO: Thank you, Lisa.

13

14 MS. SKINNER: Madame Chair.

15

16 MADAME CHAIR TRUMBLE: Go ahead,  
17 Rebecca.

18

19 MS. SKINNER: Thank you. I just wanted  
20 to get clarification on something that, again, may  
21 influence how the Council moves forward with whether to  
22 propose new regulations at this meeting. So my  
23 question for clarification is, in areas that are --  
24 that have both -- or I guess are subject to both State  
25 and Federal jurisdiction as Jarred had clarified,  
26 Russell Lagoon fit into that, if the State regulations  
27 are more stringent or limiting than the Federal  
28 subsistence regulations, if a closure is rescinded -- I  
29 just want to clarify, I guess, my understanding that in  
30 that case, the more liberal Federal subsistence  
31 regulations would control for that area, provided if,  
32 you know, a Federal subsistence user engaging in  
33 Federal subsistence, can -- can we just get  
34 clarification whether that's the case or not.

35

36 Thanks.

37

38 MR. STONE: Through the Chair.

39

40 MS. FOX: Oh, go ahead Jarred.

41

42 MR. STONE: Well, I was just going to  
43 say I don't know the answer to that off -- shooting off  
44 the top of my head but maybe, Lisa, maybe you do.

45

46 MS. FOX: Yeah, this is Lisa Fox with  
47 Fish and Game. My understanding from the discussion  
48 and from what I read is that if the Federal closure  
49 review decides to rescind the closures in freshwaters  
50

0087

1 then there wouldn't be a Federal subsistence fishery  
2 until a proposal was submitted to define what that  
3 would look like, but the State sportfishery would  
4 continue as it is and the State subsistence fishery  
5 would continue as it is.

6  
7 MS. SKINNER: Yeah, I think that that  
8 didn't.....

9  
10 MS. FOX: So in order to.....

11  
12 MS. SKINNER: .....yeah, that didn't  
13 actually.....

14  
15 MS. FOX: .....in order to increase the  
16 Federal.....

17  
18 MS. SKINNER: .....get to my.....

19  
20 MS. FOX: .....subsistence.....

21  
22 MS. SKINNER: Yeah, that didn't  
23 actually get to my.....

24  
25 MS. FOX: Well.....

26  
27 REPORTER: Okay, I need just one at a  
28 time please.

29  
30 MS. SKINNER: Yeah, thank you. But I  
31 think that you do raise a good point. And this is  
32 something that we asked Jarred to try to get some  
33 clarification on, that, if the closures are rescinded,  
34 whether the fallback is the general Federal subsistence  
35 regulations that are already in place for the area, or  
36 whether new regulations need to be, you know, proposed  
37 and promulgated. So at this point it seems like that's  
38 an open question. So we've heard two different  
39 perspectives on that. But I do think Jarred's going to  
40 clarify that.

41  
42 My specific question was if it's just  
43 really -- if there's State and Federal jurisdiction and  
44 the Federal regulations are more liberal as far as  
45 subsistence harvest those -- that's what applies to  
46 Federal subsistence users, and I'm looking for either  
47 yes, that's the case, or no, that's not the case. And  
48 the reason I ask is I swear I read it in the Federal  
49 subsistence book, the summary regulation book for fish  
50

0088

1 and shellfish and I'm trying to where I read it but I  
2 haven't been able to find it again yet.

3

4

Thank you.

5

6

MS. FOX: Through the Chair. Again,  
7 this is Lisa Fox. I believe that if you -- if there  
8 were a Federal subsistence fishery and you were  
9 Federally-qualified and had a permit, you could fill  
10 your Federal subsistence permit and if you had a  
11 sportfishing license you could also go State  
12 sportfishing, which is part of the complication of this  
13 issue.

14

15

MR. KOSO: Madame Chair.

16

17

MADAME CHAIR TRUMBLE: Go ahead, Rick.

18

19

MR. KOSO: Yeah, quick question, Lisa.  
20 Is there actually a Federal subsistence in freshwater,  
21 I'm not aware there is. There may be one in Adak on  
22 Lake Andy but I don't know if anybody goes there and  
23 does any Federal fishing. So I'm not aware of any, you  
24 know, freshwater subsistence fishing.

25

26

MS. FOX: Through the Chair. The only  
27 freshwater Federal subsistence fishing that I know of  
28 is actually outside of my management area and it's in  
29 Chignik Lake and I have not had any Federal subsistence  
30 fisheries in the south Peninsula or Aleutian Islands so  
31 far while I've been in this position. So I'm not aware  
32 of any in my area but I do know of one in Chignik.

33

34

MR. KOSO: Would Lake Andy and Adak be  
35 considered a freshwater lake there's lots of reds and  
36 silvers going there, would that be considered a Federal  
37 fishery?

38

39

MS. FOX: Through the Chair. I'm not  
40 familiar with what the Federal regulations would be for  
41 that lake. I imagine it would be State sportfishing  
42 regulations. And I don't even know what the State  
43 subsistence regs would be. But it would be -- the  
44 State subsistence would be in saltwater and the State  
45 sport would be in freshwater but I don't know what the  
46 Federal regulations are for Andy Lake.

47

48

MR. KOSO: All right, thanks, Lisa.

49

50

0089

1 MS. FOX: You're welcome.

2

3 MADAME CHAIR TRUMBLE: Any other  
4 questions or comments.

5

6 (No comments)

7

8 MADAME CHAIR TRUMBLE: I guess hearing  
9 none, thank you, Lisa. Yeah, boy there's a lot to all  
10 of this. So Jarred's going to do all his homework  
11 and.....

12

13 MS. LAVINE: Madame Chair.

14

15 MADAME CHAIR TRUMBLE: .....have all  
16 the answers for us tomorrow. Go ahead.

17

18 MS. LAVINE: This is Robbin. And I do  
19 hope to work closely with Jarred in preparation for  
20 this discussion tomorrow. I think that would be a  
21 wonderful way to tackle this during this meeting, is to  
22 let Staff regroup and review and also to remind  
23 ourselves of some of the options that you may have. So  
24 while we are trying to recognize what would happen if  
25 you did lift a closure, some of these closures, what  
26 regulations would be in place when that is done. In  
27 some cases there could be minimal regulations which are  
28 good enough for now and then you can recommend changes  
29 during the next fisheries regulatory cycle. Some  
30 though, if you lift the closure, could potential be  
31 detrimental to some of these watersheds, some of these  
32 fisheries. And I think those ones, those potentially  
33 detrimental regulations to vulnerable fisheries, are  
34 the ones you want to get ahead of so we'll be looking  
35 into those between now and tomorrow.

36

37 I do want to flag for your  
38 consideration that if we -- if we move forward and find  
39 that you don't make any proposals to change regulations  
40 this cycle and you review the closures in the fall,  
41 let's say you suggest to rescind the closures, if you  
42 think there would be helpful regulations to put in  
43 place after that rescinding, you can propose special  
44 actions, so you can put some temporary regulations in  
45 place until the next call for proposals. So that is  
46 something I want to remind you that you would have,  
47 that's an option, a tool that you will have. And the  
48 Staff will work together between now and tomorrow  
49 morning to make sure we have some clear guidance and  
50

0090

1 messaging for you.

2

3 Thank you, Madame Chair.

4

5 MADAME CHAIR TRUMBLE: Okay, thank  
6 you. Yeah, this is.....

7

8 MS. CHERNOFF: Della, this is.....

9

10 MADAME CHAIR TRUMBLE: Go ahead. Is  
11 this Coral.

12

13 MS. CHERNOFF: Yeah. I just want to  
14 say that I wanted to thank Rebecca for looking through  
15 her book and sort of restating what I stated before,  
16 which was it seems like we already do have subsistence  
17 in place and to me that has always looked like that's  
18 what we would fall back on. So I guess, that, in  
19 looking to what Robbin was just saying, I'm not sure  
20 what they're going to look into but I think the one  
21 thing we definitely ask for in all these areas, do we  
22 have a subsistence already in place that this could  
23 fall back on to. I think that's the only question  
24 unless somebody else wants to -- unless Rebecca wants  
25 to say again what she was asking for, but I think that  
26 was kind of really -- yeah, before even putting in any  
27 proposals or anything, we first need to know what will  
28 happen if we rescind the Kodiak area, we already have  
29 subsistence in the Kodiak area, does that just fall  
30 under it. To me it looks like it does but I guess  
31 other people might see it a different way. So that's  
32 what we need clarification on. And then if we want to  
33 go about changing other things then we can decide.

34

35 But, yeah, I just wanted to clarify  
36 that. That is one thing we were definitely asking for  
37 in each of these areas, is do we already have  
38 subsistence in place once we rescind because then the  
39 issue is not complicated at all.

40

41 And I don't think -- and I guess I'll  
42 just say, too, I don't think this issue is complicated  
43 at all in already that if there's sportfishing already  
44 open in these areas and we have Title VIII in place and  
45 that's part of our duties, this Subsistence Board, is  
46 to uphold subsistence rights, to me it's kind of a no-  
47 brainer to kind of rescind these.

48

49 So that's all I have to say, thank you.

50

0091

1 MADAME CHAIR TRUMBLE: Okay, thank you.  
2 Maybe we'll go -- maybe just as a thought we can bring  
3 this up first thing in the morning, that way whatever  
4 discussion is brought to our attention, we have a  
5 little bit of time to think of before we close, if  
6 there's any proposals that we want to put in place,  
7 would be a recommendation.

8  
9 So hold on a second.

10  
11 (Pause)

12  
13 MADAME CHAIR TRUMBLE: Okay, sorry  
14 about that. Sam, did you get online.

15  
16 MR. ROHRER: Yes, Della, sorry I was  
17 like a minute late dialing in but, yep, I've been here  
18 the whole time listening.

19  
20 MADAME CHAIR TRUMBLE: Okay, thank you.  
21 All right, I guess maybe at this point we could move  
22 on. Thank you everybody for the discussion. It's  
23 pretty healthy and it doesn't look like it's an easy  
24 one but every little bit we learn helps making a  
25 decision.

26  
27 So the next item on the agenda says  
28 call for nonrural determination proposal, Jason  
29 Roberts.

30  
31 MR. ROBERTS: Hi, thank you, Madame  
32 Chair and members of the Council. My name is Jason  
33 Roberts, new Anthropologist here at the Office of  
34 Subsistence Management in Anchorage. And as I get  
35 under way one of my key priorities will be working on  
36 subsistence issues with the Kodiak/Aleutian region and  
37 the Southcentral region. But today I'm here to provide  
38 a brief overview of the current call for proposals for  
39 nonrural determination in Federal regulations and this  
40 is an action item, but these materials are not in your  
41 Council book.

42  
43 A nonrural determination is the process  
44 for formally changing in Federal regulations a  
45 community's status from nonrural to rural or from rural  
46 to nonrural. This is the second call for proposals for  
47 nonrural determinations since 2018. Any valid nonrural  
48 determination proposals submitted this year will be  
49 acted on by the Board in 2025. So the call for  
50

0092

1 nonrural determination proposals occurs every four  
2 years concurrent with every other fisheries regulatory  
3 cycle. So the next call for proposals for nonrural  
4 determinations will be in 2026.

5

6 As you just heard from our colleagues  
7 in the Fisheries Division, the call for proposals has  
8 not yet published due to a lengthy clearance process in  
9 Washington. When it gets published the public comment  
10 proposal to change rural or nonrural regulations will  
11 be open for at least 30 days.

12

13 There's a flier on our website on how  
14 to submit proposals to change nonrural determinations.  
15 The flier includes information on where to submit a  
16 proposal and lists items a proposal must contain to be  
17 accepted for consideration by the Board. The website  
18 address is [www.doi.gov/subsistence/faqs](http://www.doi.gov/subsistence/faqs). This flier  
19 can be found near the bottom of the frequently asked  
20 questions page. Additional information should soon to  
21 be published proposed rule for the 2023 to 2025  
22 subsistence fish and shellfish proposed rule.

23

24 And, again, this is an action item so  
25 thank you very much for your attention and me, and my  
26 colleagues from OSM will try to answer your questions  
27 if you have any.

28

29 MADAME CHAIR TRUMBLE: Thank you. Are  
30 there any questions or comments.

31

32 (No comments)

33

34 MADAME CHAIR TRUMBLE: Thank you.  
35 Hearing none, we'll go ahead and move on, thank you.

36

37 Next item on the agenda, review and  
38 approve FY2021 annual report. Katya. That is Tab 5.

39

40 MS. WESSELS: Sorry I had myself on  
41 mute, I apologize for that. Thank you, Madame Chair.  
42 Members of the Council. The Council developed topics  
43 for the annual report during their fall meeting. The  
44 draft annual report is located in Tab No. 5 of your  
45 meeting materials and it is also available online on  
46 our website. At this point we just will open the floor  
47 to the Council members to see if there is any  
48 additions, changes, edits to the current draft and  
49 after that we would entertain a motion from the Council

50

0093

1 to approve this annual report to be submitted to the  
2 Federal Subsistence Board.

3

4 Thank you.

5

6 MADAME CHAIR TRUMBLE: Thank you,  
7 Katya. Are there any comments, questions in regard to  
8 the draft report.

9

10 MS. SKINNER: Madame Chair, this is  
11 Rebecca.

12

13 MADAME CHAIR TRUMBLE: Go ahead,  
14 Rebecca.

15

16 MS. SKINNER: Yeah, thanks. I think  
17 it's just a typo under Item No. 5, the invasive  
18 species.

19

20 MS. WESSELS: Okay.

21

22 MS. SKINNER: The second to the last  
23 line where it says, in going forward we would like to  
24 see a FRMP project to eradicate, either remove the  
25 word, A, or take the S off of projects.

26

27 MS. WESSELS: Okay, thank you.

28

29 MR. PRICE: Hi, this is Chris, I had a  
30 comment on the food security, No. 3.

31

32 MS. WESSELS: Okay.

33

34 MADAME CHAIR TRUMBLE: Go ahead, Chris.

35

36 MR. PRICE: The way it reads is pretty  
37 general. I'm assuming that means you're referring to  
38 the entire region when you're talking about -- yeah, it  
39 says, region, but, you know, Unalaska, particularly is  
40 having some challenges, you know, with our food  
41 security and subsistence at this time. I just wanted  
42 to mention that.

43

44 MS. WESSELS: So may I clarify, would  
45 you like to add Unalaska specifically to this topic.

46

47 MR. PRICE: I mean if that would be  
48 okay with the Chair, but, you know, I would -- I  
49 wouldn't mind if it was mentioned specifically.

50

0094

1 Because we write it in to a lot of our grants  
2 currently.

3

4 MS. WESSELS: What does the rest of the  
5 Council think.

6

7 MADAME CHAIR TRUMBLE: Basically this  
8 is overall for the Kodiak and Aleutians, the food  
9 security. I guess I'm a little bit confused, Chris,  
10 about what you're asking.

11

12 MR. PRICE: Maybe we could just write  
13 in Kodiak/Aleutians region, it just says region, but I  
14 just want to make the point that we have a number of  
15 food security issues that we've been addressing over  
16 the last two years and would like, you know, to make  
17 sure that that's understood here. That's all.

18

19 MS. WESSELS: Okay. We can certainly  
20 add -- yeah, we can certainly add specifically that  
21 instead of saying affected food security in our region,  
22 we can say affected food security in the  
23 Kodiak/Aleutian region, if you would like that to be  
24 added there.

25

26 MR. PRICE: Okay.

27

28 MS. WESSELS: We can do that if that is  
29 satisfactory for you.

30

31 MR. PRICE: Yeah, I'd appreciate that.  
32 Thank you.

33

34 MR. HOLMES: Madame Chair.

35

36 MADAME CHAIR TRUMBLE: Yeah, I think --  
37 go ahead, Pat.

38

39 MR. HOLMES: On Item 1, level of  
40 Staffing in Refuges in our region and at the Office of  
41 Subsistence Management, and at OSM. I think that's  
42 very good. It would be good to have a short sentence  
43 in there, at the end it says the Units 9 and 10 have  
44 been Federal special actions have -- have been Federal  
45 special actions recently and the caribou populations  
46 and subsistence uses should be closely monitored so  
47 that the importance of the resource and other  
48 subsistence resources can be sustained and subsistence  
49 can be maintained. Somewhere in there there should be

50

0095

1 a statement, because of the shortages that we've had,  
2 Staff shortages -- Staff shortages have resulted in  
3 annual surveys of critical subsistence species not  
4 being completed. And I believe that's happened in  
5 Kodiak as well as Izembek.

6  
7 MS. WESSELS: Okay. Is the rest of the  
8 Council okay with Pat's suggestion to add a sentence  
9 that because of the Staff shortages annual surveys have  
10 not been completed?

11  
12 MADAME CHAIR TRUMBLE: I don't have a  
13 problem, that sounds good.

14  
15 MS. WESSELS: Okay.

16  
17 MADAME CHAIR TRUMBLE: Any other  
18 comments or additions.

19  
20 (No comments)

21  
22 MADAME CHAIR TRUMBLE: Okay, I think  
23 we're good.

24  
25 MS. WESSELS: Okay, Della -- Madame  
26 Chair, we need to have a motion to approve this annual  
27 report.

28  
29 MADAME CHAIR TRUMBLE: Okay. Do I hear  
30 a motion to approve the FY2021 annual report as  
31 amended.

32  
33 MR. ROHRER: Della, this is Sam,  
34 I'll.....

35  
36 MS. SKINNER: I'll make that motion.

37  
38 MR. ROHRER: .....make the motion.

39  
40 MADAME CHAIR TRUMBLE: Okay, motion  
41 made by Sam, is there a second.

42  
43 MS. SKINNER: Yeah, Rebecca will  
44 second.

45  
46 MR. PRICE: Second, Chris.

47  
48 MADAME CHAIR TRUMBLE: Okay, Rebecca  
49 second and Chris, but I heard Rebecca first.

50

0096

1 Discussion.

2

3

(No comments)

4

5 MADAME CHAIR TRUMBLE: Question. All  
6 in favor signify by saying aye.

7

8

IN UNISON: Aye.

9

10 MADAME CHAIR TRUMBLE: Opposed, same  
11 sign.

12

13

(No opposing votes)

14

15

MADAME CHAIR TRUMBLE: Motion carried.  
16 Okay, moving on, Item F, Federal Subsistence Board  
17 annual report reply process review and revision,  
18 discussion and Council comments and feedback. Robbin  
19 LaVine.

20

21

22

23

24

25

26

27

28

29

30

31

This is an action item.

32

33

34

35

36

37

38

39

40

41

42

43

44

45

46

47

48

49

50

As you are aware, ANILCA Section .805  
authorizes the Councils to prepare an annual report  
containing information related to important subsistence  
resource issues within their regions. These reports

0097

1 are invaluable as they provide the Board with a broad  
2 holistic picture of local resource conditions and the  
3 most up to date subsistence issues facing communities  
4 across rural Alaska. With this knowledge the Board can  
5 make informed decisions.

6  
7 Historically, the Board has strived to  
8 provide responses to every topic listed in annual  
9 reports regardless of its authority to address the  
10 issue raised. However, it's unclear if Board responses  
11 on all annual report topics are helpful to the Councils  
12 while also taking considerable Staff time to complete.  
13 The ISC has suggested process revisions.

14  
15 1. To maintain annual reports as a way  
16 to inform the Board of local conditions, issues and  
17 needs, and

18  
19 2. They propose that letter writing be  
20 a way to request a response from the Board on topics of  
21 concern.

22  
23 We do recognize that Councils already  
24 write letters to the Board and to other agencies  
25 outside of the annual report process. Under the ISC  
26 scenario the only change is how the Board responds to  
27 issues within your annual report. This change might  
28 allow for more substantive and timely responses from  
29 the Board on topics of critical concern to the Council,  
30 for example, a separate letter requesting Board  
31 response could be written and submitted to the Board  
32 more quickly than including the issue in the annual  
33 report as the annual report requires a longer time for  
34 both preparation of the report as well as for  
35 preparations of the Board's response.

36  
37 So these suggested revisions are not  
38 intended to diminish the ability of the Councils to  
39 communicate with the Board. The Board relies upon your  
40 knowledge and expertise and annual reports are a way to  
41 ensure the Board remains up to date on important  
42 developments in your region.

43  
44 To that end, we are asking you to think  
45 about what you want from the Board in response to your  
46 annual report. To help guide your discussion I suggest  
47 we first; we're going to review the ISC's suggestions;  
48 2, we can open the floor to questions and Council  
49 discussions, and, then; 3, ask you to take action  
50

0098

1 developing your comments to forward to the Board.

2

3

4 So I'll start with step one and review  
5 the ISC's suggestions and those are: annual reports  
6 remain as a means to keep the Board informed of  
7 important conditions, issues and needs, and letter  
8 writing is proposed as a way to request Board response  
9 on important topics and concerns.

9

10 Thank you, Madame Chair and members of  
11 the Council. I'm ready for your questions and your  
12 comments.

13

14 MADAME CHAIR TRUMBLE: Do I hear any  
15 questions or comments for Robbin.

16

17 (No comments)

18

19 MADAME CHAIR TRUMBLE: Hearing none,  
20 Robbin, do you have -- are you.....

21

22 MS. LAVINE: Madame Chair, this is  
23 Robbin.

24

25 MADAME CHAIR TRUMBLE: Go ahead.

26

27 MS. LAVINE: Madame Chair and members  
28 of the Council. We actually did bring this up at your  
29 fall meeting and I gave a bit of a briefing and there  
30 was actually a pretty good discussion and some of the  
31 Council members, while I can't summarize, but you  
32 provided feedback on this, you know, your -- if I  
33 recall your comments were interested in the process and  
34 acknowledging the challenges that the Board faces when  
35 reviewing your annual reports and recognizing that  
36 there are issues on your reports the Board has no  
37 authority to address, I mean other than to say, wow,  
38 that is so important because we understand it affects  
39 your subsistence way of life, so, again, it serves to  
40 inform the Board more than the Board can actually  
41 respond on some of those issues.

42

43 I remember that this Council was kind  
44 of open to these suggestions but that's all I can say.

45

46 If the Council does not feel strongly  
47 about a discussion today you can also suggest we review  
48 the transcript and forward those comments to the Board.

49

50

0099

1 Thank you, Madame Chair.

2

3

4 MADAME CHAIR TRUMBLE: So, Robbin,  
5 maybe help me out a little bit here today. I know we  
6 discussed this a little bit the other day. You're  
7 saying, in regard to the RACs report, annual report, if  
8 we are looking at something like using migratory birds  
9 as an example, and it's in our letter to the Federal  
10 Board, that we shouldn't be using that, but that those  
11 are issues that pertain to subsistence that are outside  
12 of our purview so to speak but when we need assistance,  
13 are you basically saying we shouldn't be doing that --  
14 what exactly are you saying?

14

15

16

17

18

19

20

21

22

23

24

25

26

27

28

29

30

31

32

33

34

35

36

37

38

39

40

41

42

43

44

45

46

47

48

49

50

MS. LAVINE: Madame Chair. First I'm  
saying that every single issue that you feel impacts  
your subsistence way of life and the resources that you  
depend on in your region should absolutely be in the  
annual report, all of it. It's -- it is really  
important for our Federal Subsistence Management  
Program to really understand all the different context  
and, you know, regulatory and management complexities  
that impact you, we can only address a small arena and  
that's fish and wildlife regulations and we defer to  
you in circumstances of take. What -- so that won't  
change, and please don't change any of the information  
you share with us, it's really, really important.  
Again, it helps all of us to be informed and all of us  
to better understand what you're working with in your  
regions.

We're looking at the process of  
replies. So in the fall, right now what you're doing  
is you're confirming your annual report and you're  
going to send it to the Board and in our -- usually in  
our summer work session, the reports -- all the reports  
are presented to the Board members, the Board members  
read them and the Staff listens and reads them and from  
there, we also, develop replies, or at that time they  
confirm replies. Not all the replies can be useful.  
Title VIII of ANILCA, Section .805 requires as part of  
your authority of your Councils to forward reports to  
the Board, but it doesn't require the Board to respond.  
We have consistently responded because, of course, we  
value your annual reports. What we are interested in  
is the utility of that response, and then we're asking,  
rather, forward the annual reports and, you know, we  
present them to the Board and the Board says thank you  
so much and the Staff says thank you so much, this is

0100

1 really important it'll help us track issues across the  
2 state of Alaska, but we don't give you individual  
3 responses. If you want individual issue responses, you  
4 can write a letter, you can say Board take action, this  
5 was in our annual report, and now it's in a letter,  
6 please respond to us. And I think that's what the ISC  
7 is recommending.

8

9 Thank you, Madame Chair.

10

11 MADAME CHAIR TRUMBLE: Thank you. Thank  
12 you, Katya [sic]. Are there any questions or comments  
13 for Katya in regard to this item.

14

15 MS. SKINNER: Yeah, Madame Chair, this  
16 is Rebecca.

17

18 MADAME CHAIR TRUMBLE: Go ahead,  
19 Rebecca.

20

21 MS. SKINNER: Thank you. I think I  
22 agree with the approach of not expecting the Federal  
23 Subsistence Board to reply to each item in our annual  
24 report. For one, the reply that we get usually comes  
25 so far after the issue first came up, because for  
26 example we had discussion or we're going to have  
27 discussion at this meeting and then -- sorry, let me  
28 back up. Today we approved our 2021 report but that  
29 covered issues all the way back to our meeting a year  
30 ago and then by the time that report gets submitted and  
31 then we get a reply from the Federal Subsistence Board  
32 there's quite a lag in time so sometimes the response  
33 we get, the value of it is somewhat attenuated just  
34 because there's such a big time gap.

35

36 Two. I do like the idea of sending a  
37 letter instead of putting something in the annual  
38 report, if it's an issue where we are looking for a  
39 response because that gives us two chances a year. So  
40 we could decide at this meeting -- well, now I'm making  
41 an assumption, maybe this is a question for  
42 clarification -- I'm assuming that either meeting  
43 during the year we could generate a letter directed to  
44 the Federal Subsistence Board asking for something, or  
45 asking for clarification or asking for a response and  
46 that would allow responses to be more timely as opposed  
47 to right now it seems like our correspondence or our  
48 dialogue with the Federal Subsistence Board is on this  
49 much longer timeframe where we do an annual report and  
50

0101

1 then wait for responses, so I do like that there's the  
2 potential for faster responses. And also if it's an  
3 issue that's important we may need more than a  
4 paragraph to describe the issue. And I think when we  
5 do our annual report there is a certain -- it seems  
6 like it makes sense, you know, to have, you know, kind  
7 of brief paragraph for each issue because if we wrote  
8 two pages on every issue our report would be 12 pages,  
9 you know, that's a very lengthy report, but if we've  
10 identified an issue that's very important and we've had  
11 nuance discussion and we want to put together a good,  
12 you know, one and a half, two page letter about it,  
13 that works well in a letter. And if we send a letter,  
14 to me, that is a signal to the Federal Subsistence  
15 Board that we care enough about this issue, it's  
16 important enough to take the time to write and approve  
17 a separate letter.

18  
19 So in general I think going in this  
20 direction is not a bad thing. I guess I will say it  
21 has been nice to get a response back to the annual  
22 reports just because then we know somebody took the  
23 time to read it, somebody took the time to respond, so  
24 I will somewhat miss those responses to the annual  
25 report but I understand the point that it takes, you  
26 know, a lot of Staff time to respond to each of those  
27 issues, sometimes we have very disparate issues that we  
28 bring up and it does take time to understand the issue  
29 and then draft a response back and perhaps that Staff  
30 time is better spent on other things.

31  
32 And that's all I had, thank you, Madame  
33 Chair.

34  
35 MADAME CHAIR TRUMBLE: Thank you,  
36 Rebecca. Any other comments.

37  
38 MR. HOLMES: Madame Chair, Pat.

39  
40 MADAME CHAIR TRUMBLE: Go ahead, Pat.

41  
42 MR. HOLMES: I can understand all the  
43 rationale and Becky's really good at that, however, I  
44 still think that often there are things that should  
45 come to their attention and sometimes they respond,  
46 sometimes they don't, but we didn't get any response,  
47 even though it's not our turf on the sea otters for  
48 four years, until we finally had somebody at the Board --  
49 and I was going through -- a lot of times I'll read  
50

0102

1 their minutes and we had somebody that said, gee, this  
2 has come up before, why don't we have somebody on Staff  
3 call up Marine Mammals and have them get together and  
4 brief folks, even though it's not the turf, and so I  
5 would think we should just have a normal letter and if  
6 there's something that requires an immediate response  
7 or something that has more in-depth then we have, you  
8 know, our Secretary or somebody work with OSM or to  
9 fill it out and have more detail, and I think a lot of  
10 the detail gets lost because we've had such poor  
11 minutes in the last four years and it's not the  
12 function, the responsibility of the folks that are in  
13 that niche right now because I can emphasize losing,  
14 you know, 40 percent of your Staff and making it more  
15 difficult. But if we think that the most important  
16 thing is closures at Unalaska Lake and it needs more  
17 in-depth discussion then we put an asterisk on it and  
18 say, letter to follow. But I think that they should  
19 know what is of concern to people in our region, and  
20 I'm sorry that Staff time is difficult but they can go  
21 through and pull out the important ones if they are  
22 marked and get back to us on that and then the other  
23 ones, if there's no response, just come back with the  
24 thing, Item No. 2, no response, and let it go at that.

25

26 Thank you.

27

28 MADAME CHAIR TRUMBLE: Thank you, Pat.  
29 Any other questions or comments.

30

31 (No comments)

32

33 MADAME CHAIR TRUMBLE: Okay, hearing  
34 none, thank you, Robbin.

35

36 MS. LAVINE: Thank you, Madame Chair  
37 and Council members. And your comments were really  
38 helpful and specific. Thank you, Council Member Holmes  
39 and Skinner. Thank you.

40

41 MADAME CHAIR TRUMBLE: Okay. Next item  
42 on the agenda, receiving public testimony protocol,  
43 guided discussion, Brent Vickers.

44

45 MR. VICKERS: Hello, Madame Chair.  
46 Members of the Council. This is Brent Vickers, OSM.  
47 Can everyone hear me just fine.

48

49 MADAME CHAIR TRUMBLE: Loud and clear.

50

0103

1 MR. VICKERS: Okay, great, thank you.  
2 Sometimes it's hard to know if I'm just speaking into  
3 the air or if anyone can hear me. Thank you for that  
4 confirmation. I've got a few things for you today.  
5 The first of which will be update you on receiving  
6 public testimony protocol and we're going to have a  
7 little bit of a discussion at the end of this before  
8 getting into the next topic. We're going to have a  
9 series of questions that we'd like to get comments back  
10 from you if you have any.

11  
12 First let me give you the update.

13  
14 Receiving public testimony protocol  
15 guided discussion.

16  
17 All 10 Subsistence Regional Advisory  
18 Councils were formed under Title VIII of Alaska  
19 National Interest Lands Conservation Act, or ANILCA,  
20 and chartered under the Federal Advisory Committee Act.  
21 ANILCA gives each Regional Advisory Council an  
22 authority to 1; provide a forum for the expression of  
23 opinions and recommendations by persons interested in  
24 matter related to subsistence uses of fish and wildlife  
25 within the region; and, 2, encourage local and regional  
26 participation pursuant to the provisions of Title VIII  
27 of ANILCA in the decisionmaking process affecting the  
28 taking of fish and wildlife on public lands within the  
29 region for subsistence uses.

30  
31 The Federal Advisory Committee Act  
32 stipulates that any member of the public is permitted  
33 to file a written statement with the Advisory Committee  
34 and may speak to or otherwise address the Advisory  
35 Committee if the agency guidelines so permit.

36  
37 During each regulatory cycle there are  
38 several opportunities for the public to provide their  
39 oral and written comments to the Federal Subsistence  
40 Board, or Board and to the Councils.

41  
42 First opportunity commences after the  
43 call for the proposals, officially known as the  
44 proposed rule, after it's published in the Federal  
45 Register. This is an opportunity to submit proposals,  
46 or any significant comments to the Board. The first  
47 comment window is open anywhere from 45 up to 90 days  
48 or longer.

49  
50

1                   Second opportunity for public comments  
2 on submitted proposals begins when the proposal  
3 submission window closes and validated proposals are  
4 published on the Federal Subsistence Management Program  
5 website.

6  
7                   The third opportunity for public  
8 comments on proposals is during the Council meetings.

9  
10                  The fourth opportunity for public  
11 comments on proposals during the Board regulation  
12 meeting -- the Board regulatory meeting -- sorry.  
13 These comments are used by the Board in their  
14 decisionmaking process.

15  
16                  Now I will explain the third  
17 opportunity for public comments on proposals during the  
18 Regional Advisory Council meetings in more detail  
19 because this is the subject of our guided discussion  
20 today.

21  
22                  The public comments on proposals  
23 accepted at the Council public meetings are for use by  
24 the Council in making their recommendations to the  
25 Board. The Council Chair or your Council Coordinator  
26 presents the Council recommendations and any supporting  
27 data to the Board in its regulatory meeting. This round  
28 of public comments on proposals are part of the record  
29 for the Council meeting, not the Board of meeting.  
30 Public comments on proposals are accepted after the  
31 presentation of each proposal analysis. These include  
32 oral comments provided by the public attending the  
33 meeting and written comments provided by the public  
34 during the meeting. The latter will be read or  
35 summarized to the Council. Again, these comments are  
36 for the Council and not to be included in the Board  
37 proposal analysis. Public comments on non-agenda items  
38 are accepted at the start of each day of a Council  
39 meeting. All right, now in the past when the Councils  
40 met in person, the public brought their written public  
41 comments to the meeting to be distributed to Council  
42 members and other meeting participants. During the  
43 fall 2021 meeting cycle since all meetings were held  
44 via teleconference, the OSM leadership deemed it  
45 necessary to establish a temporary procedure for the  
46 submission of written public comments during the  
47 Council meeting. The public was directed to submit  
48 written comments to centralized OSM email during the  
49 meeting as it was indicated in that years proposed rule  
50

0105

1 published in the Federal Register. The OSM Staff read  
2 these comments into the record verbatim during the  
3 meeting. This was an interim procedure.

4

5 Now, prior to the Councils fall 2022  
6 meeting cycle, when the Councils are going to discuss  
7 fisheries proposals and closure reviews we are  
8 requesting the Councils input on how the Councils would  
9 prefer receiving written public comments submitted to  
10 them after the proposed rule deadline. These are  
11 comments the Council may want to consider in  
12 formulating their recommendations to the Board. Once  
13 OSM receives input from the Councils on permanent  
14 guidance we will then update the written framework  
15 accordingly. This is not an action item but the  
16 Council's discussion is encouraged.

17

18 And for the Council's feedback we  
19 developed a number of questions that we would like the  
20 Council members to respond to. Remember, that we are  
21 talking about the written public comments submitted  
22 only to the Council. These comments are used by the  
23 Councils to make their recommendations to the Board.  
24 The comments themselves will not be shared with the  
25 Board.

26

27 Okay so now I have five questions for  
28 discussion, they're related questions and we're really  
29 looking just to get feedback on this comment period  
30 process.

31

32 No. 1. In the Council's opinion, what  
33 are the best ways to encourage public feedback to the  
34 Councils.

35

36 MADAME CHAIR TRUMBLE: Are you  
37 basically looking for some answers now or are you going  
38 to.....

39

40 MR. VICKERS: Yeah, we are, sorry.  
41 Yes, I should have clarified. Yeah, so we're just  
42 going to try to get, you know, some of your thoughts,  
43 concerns you've had, some ideas that you might have and  
44 what might improve the process we have given how things  
45 were done in-person and how they have been done in the  
46 last two years. We're trying to make better guidelines  
47 going forward. And so I was just going to ask some  
48 questions and you guys can just shoot out ideas as you  
49 have them, have a discussion, I'll try to get the notes

50

0106

1 down, we're going to take these ideas and then try to  
2 use them to make a better guideline going into the fall  
3 2022 meetings.

4

5 MS. SKINNER: Madame Chair, can I ask a  
6 question.

7

8 MADAME CHAIR TRUMBLE: Go ahead,  
9 Rebecca.

10

11 MS. SKINNER: Yeah, thank you. Thank  
12 you, Brent. I think you covered this but I missed it.  
13 Prior to Covid times, so back when we had in-person  
14 meetings, how were written comments handled because I'm  
15 going to be honest I was wracking my brain trying to  
16 receive written comments, and I know this came up  
17 during the working group that was working on the  
18 fishery closure outreach, just how is written comment  
19 taken and I couldn't remember how we ended up receiving  
20 public comment. So can you just go over again how did  
21 it used to work prior to Covid times.

22

23 MS. WESSELS: Madame Chair, this is  
24 Katya.

25

26 MR. VICKERS: Yeah, this.....

27

28 MS. WESSELS: May I reply.

29

30 MR. VICKERS: Thank you. Please,  
31 Katya, that was going to be my suggestion, thank you.

32

33 MS. WESSELS: Madame Chair.

34

35 MADAME CHAIR TRUMBLE: Go ahead, Katya.

36

37 MS. WESSELS: Is that okay.

38

39 MADAME CHAIR TRUMBLE: Yeah, go ahead.

40

41 MS. WESSELS: Thank you for the  
42 question. You know prior to when we started meeting  
43 teleconference during the pandemic, usually the written  
44 comments were brought to the meetings and handed to the  
45 Council Coordinators and then Council Coordinators made  
46 copies of these written comments, they were given to  
47 all Council members in person and additional copies  
48 were made to put on the public table. Some of you  
49 might remember, you know, that we used to have the  
50

0107

1 public table because all the materials that are shared  
2 with the Council are public documents as well. So  
3 that's kind of what, you know, our dilemma when we  
4 started meeting via teleconference, you know, we're  
5 trying to figure out how we're going to share the  
6 written public comments with the public. During the  
7 last meeting cycle we advised all the public that they  
8 could email all their comments during the meeting to  
9 our general email inbox subsistence@fws.gov, and then  
10 we tried to either read them verbatim into the record  
11 or summarize them on the record. But for some regions  
12 it didn't work because some regions received very large  
13 number of written public comments so it extended their  
14 meetings tremendously. It wasn't the case for  
15 Kodiak/Aleutian. But in the past, you know, like I  
16 said they were brought to the Council meetings and they  
17 were distributed there.

18

19 I just want to emphasize also, any oral  
20 or written public comments provided during the Council  
21 meetings, they're there to help the Council to help  
22 make their decisions. Those comments are not usually  
23 shared with the Federal Subsistence Board. They're  
24 just for the Council's information and decisionmaking  
25 process.

26

27 Thank you.

28

29 I hope I answered your question, thank  
30 you.

31

32 MS. SKINNER: Yeah, you did, thank you.  
33 So I'm going to have a comment or suggestion that  
34 relates -- I guess it relates more to how information  
35 and/or our meeting materials are distributed. Is one  
36 of the five questions you have, are you going to get to  
37 that topic or should I go ahead and share my comment  
38 now.

39

40 MS. WESSELS: I think you can go ahead  
41 and share your comment now. You know I don't remember  
42 all of the five questions we're asking but any kind of  
43 feedback from the Council on improving this public  
44 process would be very helpful to us.

45

46 Thank you.

47

48 MS. SKINNER: Okay, thank you. So my  
49 comment is, and I'm just speaking for myself, I

50

0108

1 understand that other people have different ways that  
2 work better for them. But for me I would prefer to  
3 have all of the meeting materials posted online. So  
4 right now I do think all of the meeting materials are  
5 posted online and if written comments are received in  
6 advance of a RAC meeting, I would like to have those  
7 posted online so that we can access it off of the  
8 website. For myself, personally, I would rather access  
9 the materials through the website directly rather than  
10 receiving hard copy materials that are mailed to me. I  
11 think every time I get a big binder in the mail I feel  
12 kind of bad that there was the cost and the carbon that  
13 was spent mailing the thing to me. And I also think,  
14 kind of taking a step back, that maybe if our meeting  
15 materials were posted online perhaps we could relax the  
16 scheduling a little bit. I think that in order to get  
17 everything received, printed and mailed out, the  
18 deadlines for submitting that information are so early  
19 in the process that I think that my perception is that  
20 that creates challenges. And so part of my perspective  
21 on this is, well, if the materials are posted online  
22 that actually gives more time for more information and  
23 reports to be received, rather than having -- and I'm  
24 not sure how many weeks in advance it is, but I think  
25 it's quite a few weeks in advance of our RAC meetings.

26  
27 And then -- but I guess to get back to  
28 the question that was poised, I think it was, what do  
29 we think is the most effective way to solicit public  
30 comment, it's hard right now because we are between --  
31 we're between in-person meetings, which is how we used  
32 to do it and then during Covid times we've had these  
33 virtual meetings and I think that the answer kind of  
34 depends what format you're using. I think during in-  
35 person meetings, it was very easy if there was an in-  
36 person meeting in your community and you had time, you  
37 could come to the meeting, you could sit in the  
38 audience or stand by the doorway, whatever you felt  
39 comfortable with and there were opportunities to talk  
40 to RAC members at break, before or after, and/or you  
41 could make a comment in the room. And in some ways I  
42 think that feels more accessible and more informal.

43  
44 Now that we're in virtual meetings,  
45 that's not possible, so the -- you know unless you have  
46 the contact information for the individual RAC Members  
47 you don't necessarily have that individual kind of  
48 communication option and you can call in -- honestly, I  
49 don't have a better suggestion but I do -- I do think  
50

0109

1 there's probably better outreach options to let people  
2 know that these meetings are happening. But, again, I  
3 don't have an immediate suggestion. But it does seem  
4 like, you know, putting things in the newspaper, a lot  
5 of people don't read the newspaper or putting a flier  
6 up, I don't know, sometimes especially these days  
7 people just aren't going where the fliers are. For  
8 Kodiak, Facebook, like friends of Kodiak is very  
9 popular so putting stuff up there can reach a wider  
10 range of people.

11

12 All of that being said I think the  
13 kinds of topics we talk about maybe are, you know,  
14 going towards a niche market and we're not going to get  
15 300 people in Kodiak showing up, you know, there might  
16 be a smaller number of people who are very interested  
17 in the kind of stuff we talk about and maybe they  
18 already-- youknow they'realready alerted tothe meeting.

19

20 So I kind of wandered there in my  
21 response but I'll be quiet and give other people a  
22 chance to talk.

23

24 Thanks.

25

26 MS. WESSELS: Thank you. Thank you for  
27 your feedback. That was actually great, you know, this  
28 is exactly what we're looking for, the kind of feedback  
29 that you provided.

30

31 MR. ROHRER: Madame Chair, Sam here. I  
32 have come comments to make.

33

34 MADAME CHAIR TRUMBLE: Go ahead, Sam.

35

36 MR. ROHRER: Thanks. Yeah, I'll echo a  
37 lot of what Member Skinner said. Having -- you know  
38 it's sometimes hard to follow along when you're just  
39 listening and you don't have a person you're looking  
40 at, it's really helpful for me to be able to have an  
41 actual report to follow along with, even like these  
42 five questions, to have them written out where I can be  
43 looking at them while they're being read is helpful.  
44 Having everything posted on the website where we can go  
45 to, we can download them, we can open up the documents  
46 from there, whether it be for comments or whether it be  
47 for reports that were too late to be mailed out is  
48 really important to me. Having them emailed out, even  
49 the morning of the meeting is just fine, you can -- as  
50

0110

1 we're sitting here at our computer listening in we can,  
2 you know, open those documents up from there. So  
3 somehow having them either emailed or on the website,  
4 one central location on the website would be helpful.

5

6 Again, to echo what Member Skinner  
7 said, the hard copies, I mean it's fine, I'm following  
8 along with my meeting book but I could just as easily  
9 be following along online, it's not necessary for me to  
10 have those mailed to me. I think we could -- think  
11 there's.....

12

13 (Teleconference interference -  
14 participants not muted - hold)

15

16 MR. ROHRER: .....probably better use  
17 of Staff's time, in my case.

18

19 (Teleconference interference -  
20 participants not muted - hold)

21

22 MR. ROHRER: Can you still hear me  
23 there, I hear a dial tone coming through.

24

25 REPORTER: I do. So either somebody's  
26 put us on hold or is trying to make another call. So  
27 if everybody could take a moment, mute your phone,  
28 star, six, please don't put us on hold if you're going  
29 to listen to this meeting.

30

31 MR. ROHRER: Yeah, I have more  
32 comments, I'll just wait until the dial tone is done.

33

34 MS. SKINNER: That may be awhile.

35

36 REPORTER: Yep.

37

38 MS. WESSELS: Tina, could you isolate  
39 that phone call through an operator and disconnect  
40 them.

41

42 REPORTER: I will. But, please, I  
43 can't record while I'm doing that so hold your  
44 comments. Just a moment.

45

46 (Off record)

47

48 (On record)

49

50

0111

1                   MADAME CHAIR TRUMBLE: I think as we  
2 come back into session here we left with Sam making  
3 comments. So Sam.

4

5                   MR. ROHRER: Della, this is Sam, do you  
6 want me to finish my comments.

7

8                   MADAME CHAIR TRUMBLE: Yeah, I think  
9 we're good go ahead.

10

11                   MR. ROHRER: Okay. The only additional  
12 thing I was going to add, again, to echo what Member  
13 Skinner said, the idea of maybe expanding how we're  
14 advertising these meetings. Certainly I get the local  
15 Kodiak paper and so I see the ad in there but I think  
16 making use of social media, it seems most of our rural  
17 communities have community centered social media pages  
18 that they use on Facebook that have quite a lot of  
19 folks that interact on them and I think making use of  
20 those pages would certainly help.

21

22                   The one other aspect that I think would  
23 help is maybe in those ads if we listed the local  
24 people who are members of those Councils and would let  
25 the public know who to reach out and ask questions of.  
26 You know there's three or four of us from Kodiak who  
27 are on the Council, if that ad for this meeting listed  
28 us as being members it might help some of the folks who  
29 maybe aren't exactly sure what the Subsistence  
30 Council's meeting about, what things we discuss, if  
31 they have point of contacts on there for us maybe those  
32 folks would reach out to individual Council members and  
33 then help them be a little bit more informed about the  
34 process.

35

36                   So those would be my suggestions.

37

38                   Thanks.

39

40                   MADAME CHAIR TRUMBLE: Thank you, Sam.  
41 I have a question for you, Katya, and do you -- I know  
42 Sand Point has KSDP, Sand Point radio, I think  
43 Unalaska, Chris, isn't there some sort of radio or  
44 something or do you use KDLG from Dillingham, and Rick  
45 I don't know if there's anything farther out west, but  
46 do you utilize the radio stations that are available at  
47 all, in Kodiak.

48

49                   MS. WESSELS: Yes, thank you, Madame

50

0112

1 Chair. I can't tell exactly which radio stations we're  
2 utilizing but I don't have this information in front of  
3 me but, yes, we do utilize the public announcements on  
4 the radio, before the Council meetings and also for  
5 when we're having open RAC application cycle, we also  
6 utilize the radio public announcements. So I can get  
7 that information to you exactly which stations we put  
8 those announcements on but I can't tell right now.

9

10 MR. HOLMES: Madame Chair.

11

12 MADAME CHAIR TRUMBLE: Go ahead, Pat.

13

14 MR. HOLMES: Yeah, an old geezer  
15 perspective. Through the years I usually try to call  
16 somebody in each of the villages, particularly if  
17 there's been somebody that's on our Council for Kodiak  
18 and try to hit a few places out west and then I always  
19 give a call to KMXT, the public radio and also to Ellen  
20 Simeonoff at KVOK, which is our private radio and Ellen  
21 was one of our big supporters when we were doing the  
22 arguments on Kodiak staying rural, an old born Kodiak  
23 family, so that's -- but also I mean you're talking  
24 about new generation, millennial solutions, which are  
25 great and probably cover a lot of folks, but I think  
26 that personal contact with people. Like I said I  
27 usually try to those folks, I couldn't when I was down  
28 here in the States but I think that personal contact is  
29 important.

30

31 And then on receiving information,  
32 everyone's expressed their preferences, but I don't  
33 have a tablet and I don't have a portable computer and  
34 sometimes I end up going down to the library and asking  
35 for a separate room so I can use their computer so  
36 having a paper copy of most of the materials is  
37 important to me just because I don't have sort of the  
38 spry brain like the young folks do of being able to  
39 look at a tablet and a computer and deal with that  
40 information. I like to have a piece of paper to  
41 scribble on and then I can go back over it again. So  
42 you need to provide for both types of levels for  
43 communication.

44

45 Thank you.

46

47 MADAME CHAIR TRUMBLE: Thank you, Pat.

48 Any other comment.

49

50

0113

1 (No comments)

2

3 MADAME CHAIR TRUMBLE: Hearing none,  
4 Brent, do you want to go on to your second item.

5

6 MR. VICKERS: Yeah, that's -- would you  
7 like me to -- you guys have touched on most of the  
8 material that was in the list of five questions. Would  
9 you just like me to go through the rest of the  
10 questions to see if you have anything else to add. Like  
11 I said you really have touched on most of it but if  
12 anyone has a comment -- would you like me to do that or  
13 just go ahead to the next item.

14

15 MADAME CHAIR TRUMBLE: Yeah, let's just  
16 go ahead and cover them and then if somebody wants to  
17 speak to something that hasn't already been addressed  
18 they can add to it.

19

20 MR. VICKERS: Okay. That's great,  
21 thank you. Okay, again, this is Brent Vickers for the  
22 record.

23

24 The second question was, would the  
25 Council prefer to receive comments from the public  
26 orally or in writing.

27

28 And I think -- well, go ahead, if you  
29 have anything else to say?

30

31 MADAME CHAIR TRUMBLE: I thought you  
32 were just going to go ahead and go through all your  
33 questions and then we can comment.

34

35 MR. VICKERS: Oh, okay, I'll just go --  
36 all right, I'm sorry, I'll read all the questions and  
37 then let me know if you have anything. Thank you for  
38 clarifying. Sorry.

39

40 No. 3. Would it be helpful to the  
41 Council if OSM requests the written public comments  
42 submitted to your Council Coordinator prior to the  
43 meeting within a certain time period and the  
44 Coordinator, in turn, will summarize the comments and  
45 present them to the Council during the meeting.

46

47 No. 4. Is it better for the Council if  
48 received public comments are read verbatim into the  
49 record or summarized.

50

0114

1                   No. 5.     Do you have any other  
2 suggestions regarding the ways of improving written or  
3 oral public testimony procedures during the Council  
4 meetings.

5  
6                   Those are all the questions.

7  
8                   MR. HOLMES:  Madame Chair.

9  
10                  MADAME CHAIR TRUMBLE:  Go ahead, Pat.

11  
12                  MR. HOLMES:  Yeah, I've followed the  
13 RAC for five years longer than I've been on it, tried  
14 to sit in on all the ones in Kodiak and very seldom do  
15 we ever get anything written from anybody.  They, you  
16 know, and I think with Covid then that might happen a  
17 bit more but I think mostly people will call in and  
18 it's verbal in my perspective.

19  
20                  Thank you.

21  
22                  MADAME CHAIR TRUMBLE:  Thank you, Pat.

23  
24                  Any other comments.

25  
26                  (No comments)

27  
28                  MADAME CHAIR TRUMBLE:  I think I got a  
29 couple here.  It doesn't -- from my perspective it  
30 doesn't bother me whether they're in person or written,  
31 I'm happy to get the comments and I think that helps  
32 with any decisionmaking.  One of the things I think  
33 that we have, the tribal liaison, that does take public  
34 comments and having meetings with the various  
35 organizations, or tribes, those hearings continue and  
36 it seems like that effort, in some cases in regions  
37 they get a lot of response and others not so much and I  
38 think it depends on exactly what the item on the agenda  
39 is being up for public comment is possibly part of the  
40 issue here.  I think sometimes when you don't get a lot  
41 of comments people are just -- means people are just  
42 fine with what is as is.

43  
44                  Those are the only comments that I can  
45 think of.  I like all the comments that were made in  
46 regard to on other opportunities to get the message out  
47 more or interact with people about the various issues.  
48 And I know, Pat, for sure has always called people, or  
49 called around to check with them prior to our meeting  
50

0115

1 and if there's something that has an effect on your  
2 community he does call people and that's much  
3 appreciated by people.

4  
5 Other than that I don't have any other  
6 comments.

7  
8 MS. SKINNER: Madame Chair.

9  
10 MADAME CHAIR TRUMBLE: Go ahead,  
11 Rebecca.

12  
13 MS. SKINNER: Yeah, thanks. So I'm  
14 going to go ahead and make these comments with the  
15 assumption that these five questions are being posed to  
16 all of the Regional Councils and that the responses are  
17 going to be compiled together somehow and used in  
18 decisionmaking around the process.

19  
20 So in response to the question do we  
21 prefer written or oral comments. I prefer comments. I  
22 don't care how they come in. If somebody -- if they're  
23 more comfortable submitting a written comment, I'm fine  
24 with that, if they're more comfortable either calling  
25 in or showing up to a meeting, I'm fine with that as  
26 well. However, we need to meet the public in order to  
27 make it a less confronting process for them, I'm in  
28 favor of that.

29  
30 In response to the question about -- it  
31 had to do with would I like the Coordinator to  
32 summarize the comments. Personally if written comments  
33 are coming in, I would not like a summary of the  
34 comments, I would like to actually read the written  
35 comments as they were written by the member of the  
36 public writing the comment. That being said, as I said  
37 earlier, I don't think that the Kodiak/Aleutian RAC has  
38 received very much written comment at all over the time  
39 that I've been on it. If in response to the question  
40 that had to do with the written comments being read  
41 into the record verbatim, for myself, I would just  
42 prefer to read the comment myself rather than have it  
43 read into the record -- on the other hand, I guess now  
44 that I think about it, I understand that reading it in  
45 verbatim is how it would get into the record of the RAC  
46 meeting, but I think my preference would be, as I said  
47 at the very beginning of this conversation, if the  
48 comments are basically published as part of our meeting  
49 materials and they're on the website then they will be  
50

0116

1 part of the record in their entirety. And if it did  
2 get to the point where we were receiving hundreds of  
3 written comments, you know, I'm very, I guess  
4 sympathetic to not taking hours and hours and hours  
5 reading into the record verbatim public comment.  
6 There's probably a better way to handle that. But like  
7 I said our RAC just hasn't received a lot of written  
8 comment so it hasn't been an issue. But for myself, I  
9 prefer to read the comments myself and I'd like to read  
10 the words as they were written by the person that took  
11 the time to comment on the subject.

12

13 And I think you had another question in  
14 there that I didn't specifically address but those were  
15 the points that I did just want to get on the record.

16

17 Thank you.

18

19 MADAME CHAIR TRUMBLE: Thank you,  
20 Rebecca. Any other comments.

21

22 (No comments)

23

24 MADAME CHAIR TRUMBLE: Hearing none, I  
25 think that should cover that. Do you have any other  
26 questions for us in regard to this issue or -- Brent.

27

28 MR. VICKERS: No, you guys have really  
29 covered it. You have actually excellent comments so I  
30 really appreciate your thoughts. And, Rebecca, is  
31 right, we're asking these questions, same questions,  
32 same ordeal with all the Regional Councils and we're  
33 going to get together with all the comments and meet  
34 and discuss and take what we can do and try to make an  
35 overall better process for everyone. So we'll see  
36 exactly what happens. But those are really thoughtful  
37 and great comments, I really appreciate it, thank you.

38

39 And if you're ready I can go into the  
40 next item.

41

42 MADAME CHAIR TRUMBLE: Yeah, go ahead,  
43 I see you're on the next two items so go ahead.

44

45 MR. VICKERS: Yeah, you'll get a lot of  
46 me. All right. So the next item is briefing the  
47 Council comment -- Council comments on proposed actions  
48 to automate Federal subsistence permits. This is not  
49 an action item.

50

0117

1                   One of the many governing statutes that  
2 cover the Federal Subsistence Management Program is the  
3 Paperwork Reduction Act, commonly referred to as the  
4 PRA. This law requires all Federal departments and  
5 agencies to gain approval through the Office of  
6 Management and Budget, or OMB, prior to the collection  
7 of information from the public. In regards to our  
8 Program, this collection of information can be the  
9 information you provide on your permits, the data  
10 supplied to be nominate to serve, or to continue your  
11 service on the Regional Advisory Councils, but it also  
12 covers the signage used for fishwheels, nets and buoy  
13 markers. Even the requirements to submit a lower moose  
14 jaw, the sealing of untanned animal skins, and other  
15 biological submissions are covered under this statute.

16  
17                   This law was designed to protect you,  
18 the public, from unreasonable requirements to provide  
19 data and/or personal information without justification.  
20 The process to gain approval to collect information  
21 from OMB generally takes a year, but can be as long as  
22 18 months. An agency must, in short, provide the  
23 reasons this information will be collected, what it  
24 will be used for, how it may be used outside of the  
25 original intent, who will have access to the  
26 information, and how it will be stored. This clearance  
27 is valid for three years and must be resubmitted prior  
28 to the expiration date.

29  
30                   Another governing statute that covers  
31 our Program is the E-Government Act. The purpose of  
32 this law is to improve the management and promotion of  
33 electronic government services and requires using  
34 Internet-based information technology to improve  
35 citizen access to government information and services.  
36 You see this is in our Program, in our webpage,  
37 providing news releases, meeting materials, and other  
38 information, and in the use of social media which  
39 allows for the swift notifications regarding special  
40 actions, meetings, and submissions of regulatory  
41 proposals. Our webpage and social media sites are  
42 monitored by DOI 24/7 to ensure we meet all  
43 requirements of the law and departmental policies.

44  
45                   After the most recent OMB clearance to  
46 collect information from the public, OMB contacted OSM  
47 tasked us with exploring the use of automated permits  
48 within our Program. Many issues would accompany the  
49 use of automated permits and must be addressed before  
50

0118

1 any attempt is made to use internet permits.

2

3 OSM is asking the Councils and the  
4 public for ideas as to how the issuing of permits might  
5 look in the future. Any and all ideas are welcome.  
6 There are several overriding factors that must be  
7 understood. All Federal permits must be issued by a  
8 Federal agency and cannot be delegated to a non-Federal  
9 entity, such as a local or State entity or a tribal  
10 government. The cost must be considered, the Program  
11 has limited budget and excessive costs cannot be  
12 absorbed to the detriment of Board and Council meetings  
13 or the Fisheries Resource Monitoring Program. A paper  
14 permit will still have to be carried into the field for  
15 proof when addressing LE or field Staff.

16

17 Some of the issues that must be  
18 addressed.

19

20 How can we verify a person is a  
21 Federally-qualified user.

22

23 How do we address the lack of or  
24 substandard infrastructure in rural communities if  
25 internet permits are used.

26

27 How will managers address quotas,  
28 and/or limit the amount of permits issued in the case  
29 of conservation concerns.

30

31 How will managers deal with the lack of  
32 reporting of harvesting results in the case of power  
33 failures or lack of the internet. Especially when  
34 reporting requirements are listed as 48 or 72 hours due  
35 to severe conservation concerns.

36

37 How would this possible change affect  
38 subsistence users.

39

40 And what method of issuing permits  
41 would be preferred by subsistence users.

42

43 While this is not a formal request for  
44 comments, we ask that any comments be sent to  
45 subsistence at fws.gov by November 15th, 2022. More  
46 information will be provided to the Councils as this  
47 process moves forward.

48

49 And that is all I have to say about

50

0119

1 that. Are there any questions or comments.

2

3 MS. CHERNOFF: This is Coral.

4

5 MADAME CHAIR TRUMBLE: Go ahead, Coral.

6

7 MS. CHERNOFF: Could I just ask you to  
8 repeat that where -- where are suggestions sent to,  
9 subsistence at something?

10

11 MR. VICKERS: Yes, no problem. The  
12 email address is subsistence@fws, as in Fish and  
13 Wildlife Services dot gov. And we're requesting these  
14 be sent to that email address by November 15th, 2022.

15

16 MS. CHERNOFF: Thank you.

17

18 MR. VICKERS: Do you have it.

19

20 MS. CHERNOFF: Yes, thank you.

21

22 MR. VICKERS: Thank you.

23

24 MADAME CHAIR TRUMBLE: Any other  
25 comments or questions.

26

27 MS. SKINNER: Madame Chair.

28

29 MADAME CHAIR TRUMBLE: Go ahead,  
30 Rebecca.

31

32 MS. SKINNER: Thanks. So that was a  
33 lot. Can you distribute or post what you just read or  
34 something that generally covers what you just read so  
35 that we can cogitate -- I'm going to use one of Pat's  
36 words, cogitate on it and formulate responses?

37

38 MR. VICKERS: Hi, this is Brent.  
39 You're not the first to ask for this, it is a lot of  
40 information and as you mentioned before it's hard to  
41 hear it just get read verbatim. I will get -- I will  
42 see what we can do. If this was, like actually was  
43 mentioned I think by you earlier, a matter of timing,  
44 and getting all the information after the publishing  
45 date and so I'll get back to you with whatever we can  
46 provide to you in writing as soon as possible, is that  
47 okay.

48

49 MS. SKINNER: Okay, thank you.

50

0120

1 MR. VICKERS: Thank you.

2

3 MADAME CHAIR TRUMBLE: Any other  
4 comments.

5

6 MR. HOLMES: Yes, Madame Chair, Pat.

7

8 MADAME CHAIR TRUMBLE: Go ahead, Pat.

9

10 MR. HOLMES: One of the things getting  
11 on -- on Federal permits would be probably really handy  
12 for villagers and what not, to be able to do it online,  
13 but it's also -- I wouldn't remove it from any places  
14 where, like at Kodiak, you can get it out the Refuge  
15 and they have a lady now that will be handling that. I  
16 don't think you would want to suspend all personal  
17 interactions, particularly in rural areas because that  
18 provide a point for person getting a permit to ask  
19 questions and sometimes, you know, you run into folks  
20 that really aren't adept to the modern media and so  
21 it's good for them to still have a physical source for  
22 the permit, as well as for information.

23

24 Thank you.

25

26 MADAME CHAIR TRUMBLE: Thank you, Pat.  
27 Other comments.

28

29 MR. KOSO: Madame Chair.

30

31 MADAME CHAIR TRUMBLE: Go ahead, Rick.

32

33 MR. ROHRER: Yeah, I know like down in  
34 the Aleutians or Cold Bay, Adak, I know we were able to  
35 get on the phone and call ADF&G and they would issue us  
36 a permit, send it through the email too back to us or  
37 mail it to us, but it was always kind of nice that we  
38 could pick up the phone and talk to them and they would  
39 get a permit to us. So that was really good for at  
40 least in the Adak and the Cold Bay area there.

41

42 MADAME CHAIR TRUMBLE: Thank you, Rick.  
43 Any other comments.

44

45 (No comments)

46

47 MADAME CHAIR TRUMBLE: Okay, hearing  
48 none, I think, Brent, we can move on.

49

50

0121

1 MR. VICKERS: Thank you, Madame Chair.  
2 All right, my last for today I think -- I believe.  
3 Briefing on the Secretarial regulations proposing the  
4 inclusion of identified submerged lands in the Tongass  
5 National Forest. Again, this is not an action item.  
6 This is an informational brief only and no action is  
7 required on the part of the Council.

8  
9 This is the second rulemaking on this  
10 subject. The first taking place with the publication  
11 of a proposed rule in June 2016 and the final rule in  
12 May 2018.

13  
14 To comply with a court order,  
15 Peratrovich, et al., versus United State and the state  
16 of Alaska. The Secretaries were directed to initiate  
17 regulatory proceedings to identify those submerged  
18 lands within the Tongass National Forest that did not  
19 pass to the state of Alaska at statehood, and,  
20 therefore, remain Federal public lands subject to  
21 Federal subsistence provisions. This task was  
22 forwarded to the Federal Subsistence Board by the  
23 Secretaries. This proposed rule would add to the list  
24 of submerged parcels in the Federal subsistence  
25 regulations that have been identified through agency  
26 review. The purpose of this proposed rule is to comply  
27 -- is to complete regulatory proceedings addressing  
28 submerged public lands within the Tongass National  
29 Forest, as directed by the court.

30  
31 The majority of these submerged lands  
32 are low-water lines, reefs, rocks and very small  
33 islands, 100 yards to a half a mile in length.

34  
35 This document is expected to be  
36 published in the Federal Register in February 2022 and  
37 will have a 60 day comment period. The exact dates  
38 will be announced by news release and social media.

39  
40 If you or the public desires to comment  
41 on this proposed rule you may submit comments by one of  
42 the following methods:

43  
44 Electronically. Go to the Federal  
45 erulemaking portal <https://www.regulations.gov>. In the  
46 search box enter the docket number -- I can provide  
47 that if anybody wants to, it's a long string of letters  
48 and numbers, then click on the search button. On the  
49 resulting page, in the search panel on the left side of  
50

0122

1 the screen, under the document type heading, check the  
2 proposed rule box to locate this document. You may  
3 submit a comment by clicking comment.

4  
5 And you can do this by hard copy. I  
6 can -- this would be submitted U.S. Mail or hand  
7 delivery and I can provide you with the mailing address  
8 which is in Falls Church Virginia if you would like.

9  
10 Would anyone like me to repeat any of  
11 the docket number for the erule portal or for the  
12 physical address for making these comments.

13  
14 (No comments)

15  
16 MR. VICKERS: As a Council, if you  
17 desire to comment on this proposed rule you may submit  
18 your comment to the Council Coordinator. And that  
19 concludes that update. Thank you. Let me know if you  
20 have any questions or comments.

21  
22 MADAME CHAIR TRUMBLE: I do have a  
23 comment, or maybe a question. You made the comment  
24 that you could submit them to your Council Coordinator  
25 if you are on the Council -- the Council, as a whole  
26 wanted to make a comment then that's the process, but  
27 individually as a Council member we can't do that  
28 unless we make -- take action as a whole to proceed; is  
29 that correct.

30  
31 MR. VICKERS: Thank you for the  
32 question. That is my understanding but, of course,  
33 Katya, would be able to respond to that better, with  
34 more authority. Katya.

35  
36 MS. WESSELS: This is Katya. Would you  
37 please -- Della, would you repeat your question,  
38 please, because I got temporarily distracted here.

39  
40 MADAME CHAIR TRUMBLE: This discussion  
41 is in regard to the Briefing on the Secretarial  
42 regulations proposing the inclusion of identified  
43 submerged lands in the Tongass National Forest. Brent  
44 gave where it can be pulled up and reviewed, which we  
45 don't have that information in front of us. And so his  
46 comment at the end was if we wanted to make any  
47 comments in regards to this that we could do it through  
48 the Coordinator. I guess my comment was, we really, in  
49 the past, have not made any comments -- or, you know,  
50

0123

1 we don't unless we approve it as a whole to do so, as a  
2 unit, and then it goes forward, but in this case I  
3 don't see any documentation for us to even make comment  
4 on.

5  
6 MS. WESSELS: Yes, well, thank you,  
7 Madame Chair. What I would just say about this  
8 specific agenda item, since this is a proposed rule,  
9 this is going to be presented to all the Councils  
10 (indiscernible - cuts out) to just Southeast  
11 Subsistence region because that's where the Tongass  
12 National Forest is. You know we are talking about  
13 (indiscernible - cuts out) trying to post online what  
14 we have, what we can currently provide to the Council.  
15 So it's not really an action item for the Council, that  
16 is, you know, more of a briefing, but if Council wants  
17 to provide some kind of a comment of course it's your  
18 prerogative. So I just would suggest that, you know,  
19 let us discuss it here, we might have something to you  
20 later today, or -- and online, you know, and then the  
21 Council can address that item again if you would like  
22 to. I think at this point it would be kind of  
23 difficult for the Council to provide any kind of  
24 comment, I completely agree with you.

25  
26 MR. HOLMES: Madame Chair, Pat.

27  
28 MADAME CHAIR TRUMBLE: Go ahead, Pat.

29  
30 MR. HOLMES: I would suggest that we  
31 deal with this like we have historically and if it's  
32 something in another region that doesn't relate to us  
33 that we just defer to the SERAC on that and let the  
34 Tlingit and Haida and I don't know if the Tsimshian  
35 folks are in that neck of the woods or not, but differ  
36 to the Southeast RAC and not take a position.

37  
38 Thank you.

39  
40 MS. SKINNER: Madame Chair.

41  
42 MADAME CHAIR TRUMBLE: Thank you, Pat.  
43 Go ahead, Rebecca.

44  
45 MS. SKINNER: Yeah, thanks. So I  
46 either have one or two questions. If the docket number  
47 is available I think Brent offered to give us the very  
48 long docket number; is that open now so if I went on  
49 could I -- could I, you know, ask the Federal Register  
50

0124

1 system to send me an update when the rule is actually  
2 published; and maybe you don't know the answer to that,  
3 but either way I think I would like the docket number.  
4 You could either read it or is that something that  
5 could be emailed to our new Coordinator, Leigh, and  
6 then she can forward it out to the RAC.

7

8 And then I guess I do have a third  
9 part, I'm wondering when the rule is published, will  
10 that information be posted, or can it be posted  
11 somewhere on the kind of the general RAC website so if  
12 people do want to comment, there's a place they can go  
13 that would link them to the Federal Register. Because  
14 I know it can be -- sometimes it can be challenging  
15 trying to find things in the Federal Register so if  
16 there was an easier way to link to it if the public is  
17 interested, I think that would be handy.

18

19 So, sorry, that ended up being multiple  
20 questions in there.

21

22 MS. WESSELS: Madame Chair, this is  
23 Katya.

24

25 MADAME CHAIR TRUMBLE: Go ahead, Katya.

26

27 MS. WESSELS: To answer your question,  
28 I don't really know if that docket number is active  
29 right now. We definitely can send to the Council that  
30 information in an email and we definitely can provide  
31 that link on our website to the Federal Register. Like  
32 I said earlier, we are just discussing right now behind  
33 the scenes how to provide this information in the best  
34 way possible to the Council because we realize that,  
35 you know, that's a pretty complicated topic and it's  
36 the first time you hear about them and I'm sure it's  
37 very difficult to the Council to just comprehend, you  
38 know, the topic in its entirety just listening to a  
39 presentation without having any written information in  
40 front of you. So our apologies for that. That was not  
41 thought through very well, and we will try to correct  
42 that as we go.

43

44 MS. SKINNER: All right, thank you,  
45 that will be really helpful. And I understand the rule  
46 isn't published yet so I'm not sure how much more you  
47 could have shared but, yeah, appreciate getting an  
48 email on that when that does become available.

49

50

0125

1 Thank you.

2

3 MADAME CHAIR TRUMBLE: Any other  
4 comments.

5

6 (No comments)

7

8 MADAME CHAIR TRUMBLE: Okay, thank you,  
9 Brent.

10

11 MR. VICKERS: Madame Chair, this is  
12 Brent Vickers. I just wanted to ask, Chair Member  
13 Skinner [sic], would you like me to read out the docket  
14 number while I'm here or do you just prefer the email.

15

16 MS. SKINNER: Yeah, I think email would  
17 probably be easier just in case I miss -- you know  
18 miss.....

19

20 MR. VICKERS: Okay.

21

22 MS. SKINNER: .....you know transpose  
23 something you say. Thank you.

24

25 MR. VICKERS: Understand, well, no  
26 problem. Thank you.

27

28 MADAME CHAIR TRUMBLE: Okay. Brent are  
29 you good, we're done.

30

31 MR. VICKERS: I'm done, if you guys are  
32 done with me.

33

34 MADAME CHAIR TRUMBLE: Okey-dokey.

35

36 MR. VICKERS: Thank you very much,  
37 appreciate your time.

38

39 MADAME CHAIR TRUMBLE: Thank you.  
40 Thank you. Okay, moving on, we have agency reports and  
41 the first one is tribal governments, Qwalangin Tribe,  
42 update on McLees Lake project.

43

44 MS. POE: Hi, Madame Chair, this is  
45 Chandra Poe with the Qwalangin Tribe.

46

47 MADAME CHAIR TRUMBLE: Hi, welcome, go  
48 ahead.

49

50

0126

1 MS. POE: Hi. And I would like to give  
2 an update from Qwalangin Tribe, tribal government on a  
3 couple of topics and our Fisheries and Outreach  
4 Coordinator Jenny Rene will be giving very more  
5 detailed information about the McLees fish run  
6 measurements from last summer. So we'll look forward  
7 to hearing from Jenny, I think, a little further on  
8 down the line, probably about when Tyler is speaking  
9 for Fish and Game. But with your permission, I do have  
10 some other updates that I would love to share.

11  
12 MADAME CHAIR TRUMBLE: Go ahead.

13  
14 MS. POE: Thank you. So, again, my  
15 name is Chandra Poe, and I am a Environmental Program  
16 Instructor at Qwalangin Tribe and I've been working for  
17 the tribal government for about two years. And I just  
18 wanted to share some of the ongoing work that we've  
19 been involved with and I'll just move on through my  
20 list.

21  
22 I think that probably throughout the  
23 time that I've been working at the tribe, in our  
24 Qwalangin Tribe updates, we have shared our plans to  
25 have our Coastal Community Forum, and that was  
26 successfully held this November -- November 2021. I  
27 think that several people on this call were actually  
28 able to attend for at least part of that event, which  
29 we held virtually, and so I want to thank everyone for  
30 their support. It was a really successful regional  
31 event even though it was mainly virtual with a couple  
32 of communities able to gather there together locally  
33 and we were able to introduce many topics related to  
34 changing climate conditions and impact to many  
35 different aspects of which subsistence is, of course,  
36 the highest priority for the tribe. So thank you to  
37 everybody for your support on that event. And if  
38 anybody is interested in any materials from that, I'd  
39 be happy to speak with you more or provide some more  
40 information on that.

41  
42 As a follow on to that Coastal  
43 Community Forum that Qwalangin Tribe hosted with a lot  
44 of great partners, I also wanted to let this group know  
45 that there will be a regional workshop on food security  
46 and climate adaptations with Aleutians Pribilof Islands  
47 Association in April, April 12th through the 14th,  
48 again, just for your information. If anyone would like  
49 additional information, very, very happy to share about  
50

0127

1 that, and working with great partners at APIA for that  
2 next regional effort on food security and climate  
3 adaptation.

4  
5 I would also like to share just a few  
6 updates. One of the really exciting developments for  
7 us as a tribal government Staff is a lot of increasing  
8 collaboration between environmental programs and  
9 culture and wellness and I was given some updates to  
10 share from our culture and wellness team. And one of  
11 the really rewarding things that they've been able to  
12 accomplish the last couple of years is berry picking  
13 for elders and both tribal Staff and community members  
14 will go out at the appropriate time and harvest and  
15 share the harvest with elders who may not be able to  
16 access the areas where the berries are anymore. So  
17 this year that effort was able to share the harvest  
18 with 21 elders of the 36 who currently live in  
19 Unalaska. They did find the berries were less abundant  
20 this year and one elder asked, where did you find them  
21 so it was, again, as it's been for the past couple  
22 years, a very wonderful event that we were very happy  
23 to be able to accomplish.

24  
25 And also to share an update from last  
26 summer. Camp Q, our summer camp was back on in-person,  
27 thankfully, and those activities were able to be  
28 completed, including sharing with the youth, the  
29 process and fish and seal harvest processing, language  
30 and dance among many other important sharing  
31 opportunities. So very happy to say that that was able  
32 to be in-person again last summer.

33  
34 And other than that, I think I'll  
35 probably close there except to say, again, that Jenny  
36 Rene will give more detailed information about the  
37 McLees Lake results from last summer. And I would like  
38 to say here that we've been very pleased with the  
39 partnership that we are developing and continuing to  
40 work with Fish and Game. We're very thankful to be  
41 involved in the Partners Fisheries Monitoring Program  
42 and have been able to really expand some good capacity  
43 and are really looking forward to what that's going to  
44 mean for being able to continue to work on important  
45 subsistence issues for the tribe and community. And we  
46 are really looking forward to another great season at  
47 the salmon weir and continuing to develop additional  
48 project work.

49  
50

0128

1                               That is all that I had on my list. I  
2 will thank you for your time and ask if there are any  
3 comments or questions.

4

5                               MADAME CHAIR TRUMBLE: Thank you,  
6 Chandra. Any comments or questions for Chandra.

7

8                               MR. HOLMES: Yeah, this is Pat.

9

10                              MADAME CHAIR TRUMBLE: Go ahead, Pat.

11

12                              MR. HOLMES: Yeah, I was wondering if  
13 you folks have talked with Lisa and Tyler, I know  
14 you're kind of working on a -- you know, getting as  
15 many folks from the community involved, but Mark  
16 Witteveen and Tyler Polum here with Sportfish in Kodiak  
17 have had a program ongoing there for, gosh, 20 years,  
18 on trying to work in high school interns for part of  
19 their program and they've had tremendous success with  
20 those young folks eventually getting jobs with the  
21 Department and then going out to other agencies. I  
22 just wondered if you had a chance to explore a similar  
23 relationship or maybe some time in the future.

24

25                              Thank you, very much.

26

27                              MS. POE: Thank you, Pat. Wonderful.  
28 We are fortunate to be often able to host interns for  
29 the summer through a (Indiscernible) Program and we  
30 also are working with ANSEP, with Alaska Native Science  
31 and Engineering Program and we are hopeful to be able  
32 to have a summer Bridge student at the weir this  
33 summer, is our -- is our goal, to start involving more  
34 youth. And we definitely appreciate that observation  
35 and look for those opportunities to involve youth.  
36 It's especially wonderful to have the hatchery program  
37 in Unalaska and I think that gives us some really good  
38 strong connections and inspires a lot of interest in  
39 the Unalaska youth specific for salmon fisheries.

40

41                              MADAME CHAIR TRUMBLE: Thank you. Any  
42 other questions or comments.

43

44                              (No comments)

45

46                              MADAME CHAIR TRUMBLE: Okay, hearing  
47 none, thank you for your report Chandra. Glad to hear  
48 everything is moving forward and going good.

49

50

0129

1 MS. POE: Thank you.

2

3 MADAME CHAIR TRUMBLE: Are there any  
4 other Native organizations online that would like to  
5 speak or give a report at this time.

6

7 (No comments)

8

9 MADAME CHAIR TRUMBLE: Is there anyone  
10 from Kodiak.

11

12 (No comments)

13

14 MADAME CHAIR TRUMBLE: Okay. Well, if  
15 somebody does, as the meeting goes on, just let us  
16 know. The next item on the agenda is Tab No. 6, U.S.  
17 Fish and Wildlife Maritime National Wildlife Refuge  
18 winter 2022 report.

19

20 (No comments)

21

22 MADAME CHAIR TRUMBLE: Hello.

23

24 MS. WESSELS: Della, this is Katya.  
25 Perhaps they're not online.

26

27 MADAME CHAIR TRUMBLE: Okay. Okay.  
28 How about Izembek National Wildlife Refuge. Is there  
29 someone online for that report.

30

31 MS. FOSADO: Hi, good afternoon, yes,  
32 this is Maria, can you hear me?

33

34 MADAME CHAIR TRUMBLE: We can hear you.  
35 You might get a little closer to the phone though.

36

37 MS. FOSADO: Good afternoon, Madame  
38 Chair and members of the Board. This is Maria Fosado  
39 from Izembek National Wildlife Refuge. Can you hear  
40 me?

41

42 MADAME CHAIR TRUMBLE: Yes we can hear  
43 you.

44

45 MS. FOSADO: Perfect. All right, well,  
46 we're going to share just a few of the activities that  
47 have taken place since we last met. I hope everybody  
48 has a copy of our report but I'll just start off with  
49 the caribou Federal subsistence hunt for Unit 9D on the  
50

0130

1 Southern Alaska Peninsula. Izembek Refuge during  
2 2021/2022 the Federal subsistence caribou hunt in Unit  
3 9D which covers the hunting periods of August 1st  
4 through September 30th and then again opens November  
5 15th and ends March 31st. The hunt, you know, was  
6 available to folks, however, to-date we have not  
7 received any harvest reports. None have been submitted  
8 to the Refuge.

9  
10 As far as the Federal subsistence hunt  
11 on Unimak Island, Unit 10D, the period -- the hunting  
12 period was open August 15th through October 15th, 10  
13 permits were allotted, five permits were issued and we  
14 received reports that three caribou were harvested for  
15 Unit 10.

16  
17 We were able to conduct our annual bear  
18 stream survey. The 2021 brown bear survey took place  
19 over the course of six days during the end of August  
20 into the beginning of September. The survey covered  
21 all the major watersheds in Izembek Refuge and Unimak  
22 Island where the bears are most likely to be  
23 concentrated while feeding on salmon runs. The minimum  
24 population counts for the Izembek area was 162 bears,  
25 which made up about -- which was made up of 89 single  
26 bears, 21 sows with cubs and 52 cubs. Compared to the  
27 2020 count, total count for brown bears at Izembek  
28 decreased by three and a half percent. The count of  
29 single bears was the same, however, the count for sows  
30 with cubs decreased.

31  
32 The minimum -- we also surveyed on  
33 Unimak Island the minimum population count for Unimak  
34 Island area was 108 bears, it consisted of 72 single  
35 bears, 12 sows with cubs and 24 cubs. Compared to the  
36 2020 counts the total on Unimak Island also showed a  
37 decrease of 18.2 percent. There's some additional  
38 details in the report but I just want to note that the  
39 survey -- it's important to note that this survey is  
40 used to understand the minimum numbers of bears present  
41 in the area and the general population trends but it's  
42 not intended for use as a population estimate. There's  
43 a lot of variables such as, you know, the time of day,  
44 the tides, the weather, the individuals that are  
45 conducting the survey so I just wanted to make that  
46 disclaimer known.

47  
48 Moving on to waterfowl. We were able  
49 to conduct a reduced scale brant age ratio. We had  
50

0131

1 planned to continue operations as we had historically  
2 and we had planned to bring in employees from -- Fish  
3 and Wildlife Service employees from King Salmon,  
4 Anchorage and Fairbanks, however, due to the pandemic  
5 we reduced our efforts and it was Izembek Staff that  
6 carried out the survey. Historically we've done it  
7 both from shore counts and boat counts, however, since  
8 it was just Izembek Staff all of our observations were  
9 shore based operations. Over the course of seven days,  
10 five Staff members traveled to locations along Izembek  
11 Lagoon and we counted and aged 8,911 birds to  
12 understand the ratio of juvenile and adult birds in the  
13 population. We shared the data with USGS and it's used  
14 to develop modeled estimates of productivity of Pacific  
15 black brant populations. And there's a link in the  
16 report but data is available for viewing and download  
17 at the annual data modeled based estimate link provided  
18 in the report.

19

20 Waterfowl commercial guiding. In 2021  
21 Izembek issued four permits to commercial hunt  
22 operations. Our permits -- permit, guiding clients  
23 using Refuge lands. Each operation reports the number  
24 of client use days at the conclusion of the hunting  
25 season, which are the number of hunts -- excuse me,  
26 which are the number of days the hunter was taken on  
27 the Refuge by a commercial guide. Since 2009 the  
28 number of reported client use days has increased and we  
29 did provide a figure in our report. And as you can see  
30 since 2009 the overall trend has been one of  
31 increasing. And I just want to note that the client  
32 use days are the number of days the hunter was taken on  
33 the Refuge by a commercial guide. So this does not  
34 account for any non-commercial waterfowl hunting. And  
35 a single trip to the Refuge will contribute multiple  
36 client use days when multiple clients are guided at  
37 once. In addition to that multiple trips by the same  
38 client on the same day only constitutes a single day.  
39 So it's important to note that this is merely an index  
40 of the commercial use of the Refuge as it illustrates  
41 the number a client was guided on the Refuge but does  
42 not account for the area hunted, the methods used, the  
43 birds harvested or the amount of time spent on the  
44 Refuge.

45

46 Moving on to our habitat efforts.  
47 Eelgrass abundance and productivity monitoring. Due to  
48 Covid19, we had to cancel our lagoon-wide eelgrass  
49 survey, however, retired biologist -- USGS biologist  
50

0132

1 David Ward was able to come out to Cold Bay and he did  
2 spend a week training our Staff on the survey protocol.  
3 And although we weren't able to conduct a full Izembek  
4 Lagoon eelgrass abundance monitoring survey, we were  
5 able to conduct the eelgrass transect sampling along  
6 Grant Point, and this has been conducted in the spring  
7 and summer since 2007 and so those efforts are ongoing.

8

9 Moving on to invasive species. The  
10 Fish and Wildlife Service Staff from the invasive  
11 species program conducted surveys on and around Izembek  
12 and the Alaska Peninsula National Wildlife Refuge  
13 during summer of 2021. The surveys included sampling  
14 of road ways for terrestrial invasive species, major  
15 bodies of water for invasive aquatic species and  
16 surveying for invasive European green crab in Cold Bay.  
17 Surveys uncovered no species of high concern on the  
18 Refuge itself or signs of European crab, however,  
19 several populations of aggressive and invasive orange  
20 hawkweed, Canada thistle and oxeye daisy were found  
21 within the city limits of Cold Bay.

22

23 We hope to continue these efforts in  
24 2022. Izembek Staff and the invasive species program  
25 members hope to work with the community of Cold Bay to  
26 compile a treatment plan for the invasives that were  
27 surveyed during the summer of 2021. In addition to  
28 that Izembek Staff will be reaching out to the  
29 community of King Cove to share the information on the  
30 project and to discuss potential opportunities for  
31 partnering and conducting similar surveys around King  
32 Cove. Early detection and treatment of invasive  
33 species, which can have severe ecological consequences  
34 for habitat and wildlife will reduce the likelihood of  
35 spread into the remote areas and wilderness areas of  
36 the Refuge.

37

38 Moving on to upcoming work, we had  
39 actually scheduled our mid-winter caribou survey for  
40 this week, however, we're still pending a pilot, we're  
41 keeping an eye on weather and we're hopeful that we  
42 will be able to still carry it out but stay tuned for  
43 more. We'll see if it's able to -- if we're able to  
44 carry that out.

45

46 And the same for the Pacific Flyaway  
47 Pacific winter brant survey, we had planned on hosting  
48 Migratory Bird crew members here in Cold Bay over the  
49 course of the last couple weeks, however, unforeseen  
50

0133

1 issues have come up, whether it's weather or just  
2 planning logistics and they haven't been able to make  
3 it down to Cold Bay. So we're hoping that that will  
4 materialize still this winter but stay tuned on that.

5

6 That is all.

7

8 Are there any questions.

9

10 MADAME CHAIR TRUMBLE: Any questions or  
11 comments for Maria.

12

13 MR. HOLMES: Madame Chair, Pat.

14

15 MADAME CHAIR TRUMBLE: Go ahead, Pat.

16

17 MR. HOLMES: Thank you for the very  
18 nice report and glad what you've been doing what you  
19 have been doing for your research programs, and I  
20 understand that because of Covid you haven't been able  
21 to do as much of your normal outreach over in King Cove  
22 or in town with the school kids. But I was quite  
23 interested in your reported game bird client use days  
24 because at our last meeting we had quite a talk  
25 reviewing the State proposals in which they seemed to  
26 me that non-resident hunters were trying to get more  
27 emperor geese which they use mainly for trophies versus  
28 the King Cove folks and residents there in Cold Bay,  
29 using them there for food, and so our Council made  
30 comments to the Game Board not to do that. So this  
31 continuing up creep certainly shows that there is a  
32 whole lot more demand for that resource.

33

34 I'll just leave it at that because I'm  
35 sure you're sensitive to what local folks feel about  
36 the emperor geese in hopes to try to get the numbers up  
37 for a better subsistence harvest, so thank you very  
38 much for your report.

39

40 MADAME CHAIR TRUMBLE: Thank you, Pat.

41

42 MS. FOSADO: Thank you for sharing.

43

44 MADAME CHAIR TRUMBLE: Any other  
45 comments.

46

47 MR. KOSO: Madame Chair.

48

49 MADAME CHAIR TRUMBLE: Go ahead Rick.

50

0134

1 MR. KOSO: Yeah, Madame Chair.

2

3 MADAME CHAIR TRUMBLE: Go ahead, Rick.

4

5 MR. KOSO: Yeah, I just got a question  
6 on this decrease, this three and a half percent  
7 decrease on the bear surveys that you did on 9 and 10D.  
8 Is that due to more guided bear hunts or is that just  
9 natural?

10

11 MADAME CHAIR TRUMBLE: I think maybe,  
12 Rick, to add to that.....

13

14 MS. FOSADO: Good afternoon, Rick.....

15

16 MADAME CHAIR TRUMBLE: .....because I  
17 was going to.....

18

19 MS. FOSADO: .....I'm jumping to that  
20 part of the report.

21

22 MADAME CHAIR TRUMBLE: .....bring that  
23 up.

24

25 MS. FOSADO: I would venture to say  
26 that right now I can't answer whether or not it's tied  
27 directly to hunter harvest but I would venture to say  
28 that based on the variables that I mentioned such as  
29 the time of day we're surveying, the individuals who  
30 are surveying, the weather, the transects that we're  
31 flying, the surveys aren't necessarily always capturing  
32 the exact same areas and so I just don't have enough  
33 information to really give you a really concrete answer  
34 on the decrease.

35

36 MADAME CHAIR TRUMBLE: And, Rick, this  
37 is Della. To add to that, if you recall, I think it  
38 was in 2020 there was not a bear season, 2021 had a  
39 spring and fall hunt, which I think, in my opinion,  
40 probably contributed to those numbers.

41

42 Did you have anything else, Rick.

43

44 MR. KOSO: Yeah. I just wanted to  
45 know, is this the bear survey, the 162 that you  
46 surveyed, is that within your realm of where you want  
47 to be with bear, is that high or is that low?

48

49 MS. FOSADO: Hi, Rick, yes, this is

50

0135

1 Maria. I'll defer to the -- I don't know if there's  
2 folks from ADF&G that want to speak to the bear  
3 population.

4

5 MR. BURCH: Madame Chair, this is Mark  
6 Burch.

7

8 MADAME CHAIR TRUMBLE: Go ahead.

9

10 MR. BURCH: Yeah, as I introduced  
11 myself, I'm with the Department of Fish and Game, but  
12 I'm a generalist kind of coordinator, unfortunately I'm  
13 not familiar with the bear management in great detail.  
14 And the biologist that normally does that is not online  
15 as far as I know. So we'd have to put that on the  
16 agenda and get it scheduled in order to be able to get  
17 into that subject very deeply, I'm afraid.

18

19 Thank you.

20

21 MADAME CHAIR TRUMBLE: Thank you.

22

23 MR. ROHRER: Della, Sam here. I have a  
24 comment -- a couple comments on that that might help  
25 shed a little bit of light on Rick's question.

26

27 MADAME CHAIR TRUMBLE: Go ahead, Sam.

28

29 MR. ROHRER: Yeah, if you look at the  
30 survey data from Izembek, the total count was down but  
31 it says -- in the third paragraph there it says the  
32 count of single bears was the same, so 89 single bears  
33 were counted in 2021 and then 89 single bears counted  
34 the year before in 2020 so there's no decline in single  
35 bears. It looks like the decline came from the sow and  
36 cubs count. So certainly that wouldn't have been  
37 contributed to by hunting.

38

39 And then I'll just mention, Unimak saw  
40 the bigger decline in count but I'll point out, Unimak  
41 is managed by strict drawing for resident and non-  
42 resident hunters alike. And I don't remember with the  
43 cancelled seasons for 2020 -- I'm trying to remember  
44 off the top of my head how that worked on Unimak, the  
45 non-resident portion of that hunt was cancelled so  
46 harvest would have been down for non-residents,  
47 residents could still show up. But I don't think there  
48 was any special seasons like the rest of the Peninsula  
49 had some special seasons, but Unimak didn't have those,  
50

0136

1 it would have just stuck with its normal drawing. So  
2 the numbers have held pretty close on Unimak. So I  
3 would say that it's pretty unlikely that bear hunting  
4 led to any of those decreases, it's probably more  
5 likely -- like Letecia said, due to inconsistencies in  
6 the actual surveys.

7

8 MR. KOSO: All right, thank you, Sam.  
9 That cleared things up for me, so I appreciate that.

10

11 MR. HOLMES: Madame Chair.

12

13 MADAME CHAIR TRUMBLE: Any other  
14 comments -- go ahead, Pat.

15

16 MR. HOLMES: Yeah I was just wondering,  
17 these are rather small but I'm just curious because if  
18 you do -- you probably don't do any surveys outside of  
19 the Refuge for the -- on the Peninsula but I can recall  
20 that the area biologist there in the past when --  
21 commenting on when they've had significant changes in  
22 the returning salmon on seeing a larger number of  
23 bears, I forget the name of that lagoon that's west of  
24 Cold Bay, on the other side of the Peninsula there but  
25 sometimes I think the number of chums and silvers in  
26 there can fluctuate a lot so, you know, I think your  
27 numbers there in relation to the harvest and what's  
28 available seem to be pretty reasonable. But I'm just  
29 wondering if you've ever noticed or if your reports --  
30 if you correlate those at all with the -- Lisa Fox'  
31 salmon surveys.

32

33 Thank you.

34

35 MS. CHERNOFF: Della, this is.....

36

37 MS. FOSADO: Good afternoon, Madame  
38 Chair and.....

39

40 MS. CHERNOFF: .....Coral.

41

42 MS. FOSADO: .....members of the Board.  
43 We have -- I'm sorry.

44

45 MADAME CHAIR TRUMBLE: I think Pat had  
46 some questions I don't know if they were towards Lisa  
47 or Maria so maybe we can get those answers and then I  
48 think it was maybe Coral after that.

49

50

0137

1 MS. FOSADO: Okay. That I'm aware of  
2 in recent years we have not looked at any salmon  
3 escapement and tried to correlate the runs with our  
4 annual bear stream surveys but that could something  
5 that could be looked at into the future.

6  
7 MS. FOX: Yeah, good afternoon, Della  
8 -- Madame Chair, this is Lisa Fox. There have been  
9 some low sockeye numbers at Christianson's Lagoon on  
10 Unimak Island, I believe that's the one you're talking  
11 about but last year there was some decent escapement  
12 and the year before I think there was really, really  
13 good escapement. I don't know if the escapement at  
14 Christianson's would change the population of the bears  
15 that much, so much that it would just concentrate them  
16 right on that river there. Sometimes there's bears  
17 side by side on that whole stream. But we definitely  
18 can start sharing those escapement numbers with the  
19 folks at Izembek in-season because we fly that survey,  
20 you know, six times a year probably.

21  
22 MADAME CHAIR TRUMBLE: Thank you. Pat,  
23 is that good -- are you good?

24  
25 MR. HOLMES: Yes, ma'am, thank you. I  
26 think that's really swell. I know they -- 20 years  
27 ago, well before Lisa, but, you know, there was a lot  
28 of communication between -- we've had a lot of  
29 turnover, and so I think that's just really swell for  
30 the ladies to be working together on that.

31  
32 Thank you, very much. And thanks for  
33 your answers, ladies, thank you.

34  
35 MADAME CHAIR TRUMBLE: Okay, thank you.  
36 Coral, was that you.

37  
38 MS. CHERNOFF: Yes.

39  
40 MADAME CHAIR TRUMBLE: Okay, Coral go  
41 ahead.

42  
43 MS. CHERNOFF: Yeah, I had a question  
44 about your graph here with the reported game bird use  
45 days. There's quite a large jump from 2019 to 2020.  
46 2019 it looks like there was less than 300, maybe 275  
47 client use days and then 2021 there was over 800. So  
48 does that cause any concern for you out there within  
49 the Izembek communities or is that something then you  
50

0138

1 have -- or do you have conversations with biologists  
2 and stuff, like is that number a concern, and if it's  
3 not have you ever discussed at what point that number  
4 would become a concern that you might have to limit  
5 permits or lower amounts of birds taken.

6  
7 MS. FOSADO: Good afternoon, Madame  
8 Chair and members of the Council. Yes, we do -- to  
9 answer your question, we do have continuous  
10 conversations in-house of, you know, the uses that are  
11 occurring on the Refuge, whether it's commercial uses  
12 or any other recreational uses. We would, of course,  
13 become concerned if there starts to be noticeable  
14 impacts to the resource and/or to wildlife increase  
15 disturbance. I know that that has been a conversation  
16 that has been, I believe, discussed at previous RAC  
17 meetings and we have fielded some concerns from the  
18 public either via -- mainly via phone calls of folks  
19 that have called in and relayed how they've perceived  
20 things changing throughout the years as they've visited  
21 and hunted here. So, yes, we have in-house  
22 conversations.

23  
24 As far as our permits are non-  
25 competitively issued permits. And in order to look at  
26 restricting any use or the number of guides we would  
27 have to move from a non-competitively issued special  
28 use permit, so a competitively issued special use  
29 permit and that would require, of course, going through  
30 the NEPA process and either an environmental assessment  
31 or an environmental impact statement on the disturbance  
32 and the potential impacts that the use is causing and  
33 that information would be fed into competitively  
34 determinations. But I'd also like to note that the  
35 Lagoon waters, Izembek Lagoon, below the mean high tide  
36 is actually State jurisdiction so if there is concern  
37 over damage to the resource and/or disturbance to  
38 wildlife the first step would be for the Refuge and the  
39 State to start having discussions and fielding some of  
40 those concerns and working through discussions between  
41 the State and the Refuge here to see where we go from  
42 here.

43  
44 I don't know if I captured all your  
45 questions or if I answered all your questions, if not,  
46 please let me know.

47  
48 MS. WESSELS: Madame Chair, this is  
49 Katya.  
50

0139

1 MADAME CHAIR TRUMBLE: Go -- let's see,  
2 first, Coral, did she answer your questions.

3  
4 MS. CHERNOFF: Not -- well, I guess it  
5 sounds like it's just kind of up in the air, open  
6 process, there are no numbers they're looking at  
7 exactly of birds taken. But if they got to be more  
8 concerned they would have to change the process to a  
9 limited process for game guides. I think that's what I  
10 understood.

11  
12 MADAME CHAIR TRUMBLE: Okay. Okay.  
13 Katya.

14  
15 MS. WESSELS: Yes, I just wanted to let  
16 the Council know that Dave Crowley with ADF&G is online  
17 so he's able to answer any bear questions if the  
18 Council would like. Thank you.

19  
20 MADAME CHAIR TRUMBLE: Okay. Before we  
21 move to bear, can you -- does the impact of the amount  
22 of hunting days on birds contribute to more hunters  
23 going into the -- they're after basically the emperor  
24 goose and while they're there they are harvesting other  
25 birds because they have a daily limit, do you think  
26 there's possibly -- some of that impact coming from  
27 that at all.

28  
29 MS. FOSADO: Madame Chair, I'm not sure  
30 I completely understood the question. So we permit the  
31 commercial operation but we don't set any of the  
32 harvest limits. So as long as hunters are operating  
33 legally and following the regulations, getting the  
34 necessary permits -- I'm making the assumption that the  
35 regulations that are being -- the harvest regulations  
36 and the limits that are being set are essentially  
37 capturing the concern for specifically as you mentioned  
38 the emperor goose.

39  
40 MADAME CHAIR TRUMBLE: Thank you.

41  
42 MR. HOLMES: Madame Chair, another  
43 question relating around the non-residents.

44  
45 MADAME CHAIR TRUMBLE: Go ahead, Pat.

46  
47 MR. HOLMES: Yeah, I was wondering  
48 there, Maria, if does either Fish and Game or your shop  
49 do any monitoring of the number of sportfishermen  
50

0140

1 around there, or Cold Bay, because we've had some  
2 complaints about competition with non-residents  
3 sportfishing and difficulties with locals getting their  
4 food. I was just wondering if we've seen that big of  
5 an increase in guided hunters, if there's been a  
6 similar increase particularly at that time of the year  
7 in non-resident sportfishermen. And probably nobody  
8 has any data but I was just curious.

9

10 Thank you.

11

12 MADAME CHAIR TRUMBLE: Thank you, Pat.

13

14 MS. FOSADO: Good afternoon, Madame  
15 Chair and members of the Board. We do -- we do issue  
16 some sportfishing commercial permits. I don't have all  
17 the data available that I -- I would need additional  
18 time and I could report back on client use days. But  
19 as far as the concerns that have been discussed at past  
20 RAC meetings and some of the concerns that we field via  
21 phone calls here at the office, they seem to be  
22 revolving around the waterfowl, the commercial  
23 waterfowl guiding client use days. I haven't heard  
24 anything specific to commercial sportfishing, as far as  
25 guiding and Refuge issued permits.

26

27 MR. HOLMES: Thank you.

28

29 MR. LAWSON: Madame Chair.

30

31 MADAME CHAIR TRUMBLE: Go ahead.

32

33 MR. LAWSON: Hi. This is Tyler Lawson  
34 with Fish and Game. In some related conversations with  
35 the Sportfish Division, they do have some harvest  
36 estimates for Cold Bay and I think Tyler Polum is out  
37 sick today but maybe tomorrow he'll be back in and he  
38 might be able to share some of those harvest numbers.

39

40 MADAME CHAIR TRUMBLE: Okay, where --  
41 is Tyler online.

42

43 MR. LAWSON: Yes, were you able to hear  
44 me okay.

45

46 MADAME CHAIR TRUMBLE: No, go ahead and  
47 repeat that please.

48

49 MR. LAWSON: Sure, sorry about that. So

50

0141

1 I was just saying that related to some of the other  
2 conversations we've had with Cold Bay fishing, which  
3 I'll discuss more during my update, I know that  
4 Sportfish does have some harvest estimates for the  
5 sportfish harvest in Cold Bay waters, however, Tyler  
6 Polum, I believe is out sick today and he might,  
7 hopefully, be back in the office tomorrow and he might  
8 be able to share some of those numbers with the RAC.  
9 So I know it's out there, I'm just not sure about  
10 sharing that graph with you because he has it  
11 currently.

12  
13 MADAME CHAIR TRUMBLE: Okay, perfect,  
14 thank you.

15  
16 MR. LAWSON: Uh-huh.

17  
18 MS. SKINNER: Madame Chair.....

19  
20 MS. KRUEGER: Madame Chair, this is  
21 Kelly Krueger with Department of Fish and Game.

22  
23 MADAME CHAIR TRUMBLE: Okay, I had two  
24 people online so.

25  
26 MS. KRUEGER: This is Kelly Krueger.

27  
28 MS. SKINNER: Madame Chair.....

29  
30 MADAME CHAIR TRUMBLE: Let's start with  
31 Kelly, I caught her name.

32  
33 MS. KRUEGER: Thank you. I am just  
34 going off of what Tyler Lawson was just saying. There  
35 are numbers online for the Cold Bay area under the  
36 statewide harvest survey and that data is available to  
37 the public on the Fish and Game website. And it's  
38 updated as recently as 2020.

39  
40 MADAME CHAIR TRUMBLE: Okay, thank you.  
41 And there was another lady on that was trying to speak  
42 at the same time.

43  
44 MS. SKINNER: It was, it was Rebecca.  
45 I think I have two questions. One question is, in the  
46 report that we got from Izembek we do have data on  
47 client use days but I'm not seeing data on harvest of  
48 game birds. Is that correct that we don't have harvest  
49 data in the report?

50

0142

1 MS. FOSADO: Madame Chair. Members of  
2 the Council. The only thing that we recorded was the  
3 client use days.

4  
5 MS. SKINNER: Okay. And then this  
6 relates to my second question, and this is a bigger  
7 process question, because I feel like I haven't been  
8 directly involved in one of these, if there starts to  
9 be or if there is a big concern with the resource, and  
10 local subsistence users, or subsistence users access to  
11 an adequate amount of resource where -- how does that  
12 usually come to light, so the data for that? Is that  
13 something that normally the resource managers would  
14 alert the RAC to so we would have data that shows  
15 there's a resource issue and that maybe we need to go  
16 towards limiting it to a customary -- or, you know, a  
17 C&T, customary and traditional use, or does that  
18 usually come about based on feedback that the RAC has  
19 gotten from people in the community and then do we need  
20 to request specific data that would help show whether  
21 there's a resource problem or not? And so that is kind  
22 of a higher level question, again, because I realize I  
23 am not completely sure how this process is supposed to  
24 unfold.

25  
26 Thank you.

27  
28 (Pause)

29  
30 MADAME CHAIR TRUMBLE: Maria.

31  
32 MS. FOSADO: Madame Chair. Members of  
33 the Council. This is Maria at Izembek.

34  
35 MADAME CHAIR TRUMBLE: Go ahead.

36  
37 MS. FOSADO: I would venture to say  
38 that that would be on a case by case basis. It could  
39 stem from internal conversations identifying potential  
40 impacts to the resources, or to wildlife, and then  
41 looking internally at our process and us starting to  
42 reach out to our partners and to our biologists to  
43 ensure that we have the data that we need to address  
44 some of the potential impacts. So it could start from  
45 in-house, from within Fish and Wildlife Service as far  
46 as our permits are concerned, and trying to assess if  
47 there are impacts occurring, what impacts are incurring  
48 and how to best mitigate for those impacts.

49  
50

0143

1                   Or, Option B, as you mentioned, could  
2 be concerned members of the public reaching out to the  
3 RAC, as has been done I believe in the past.

4

5                   I don't know if there is any one right  
6 answer, but I would venture to say it's on a case by  
7 case basis.

8

9                   MS. SKINNER: Okay. And then just to  
10 confirm, based on the report, I didn't get the sense  
11 that Izembek itself has any concerns with the  
12 resources, was that a correct interpretation of the  
13 report because you did provide the graph on the client  
14 use days, is that raising a little bit of a red flag  
15 for you guys or is this just merely informational, the  
16 fact that it was included in the report?

17

18                   MS. FOSADO: Madame Chair. Members of  
19 the Council. This is Maria. It's both. It's an  
20 informa -- I know that this subject has come up at  
21 historic -- at the past couple RAC meetings so I wanted  
22 to be transparent in the information that we're  
23 providing. So we -- it is some -- it is an issue that  
24 we are keeping an eye on, we are trying to collect the  
25 data as best as we can and starting to have some of  
26 those internal conversations. I believe -- well, I  
27 don't know if this was shared at the last Regional  
28 Advisory Council meeting, I can't recall, but we have  
29 had a few conversations with our State partners but  
30 nothing that has really -- it's just initial  
31 conversations I guess is where we would be at.

32

33                   MS. SKINNER: Okay. All right, thank  
34 you for that context. Thank you, Madame Chair.

35

36                   MADAME CHAIR TRUMBLE: Thank you,  
37 Rebecca.

38

39                   MR. HOLMES: Madame Chair.

40

41                   MS. CHERNOFF: This is Coral.

42

43                   MADAME CHAIR TRUMBLE: Okay, Pat.

44

45                   MR. HOLMES: Okay, do Coral first.

46

47                   MADAME CHAIR TRUMBLE: Pat and then  
48 Coral.

49

50

1 MR. HOLMES: Okay. Probably Coral is  
2 going to hit on the same thing. Because of the Covid I  
3 haven't made as many of the AMBCC meetings as I would  
4 like to, but what I've heard is the numbers of emperor  
5 geese are down, over -- statewide, and so the overall  
6 management of that is raising questions, and I may be  
7 wrong, but -- so I'm glad to hear, Maria, that you  
8 folks are starting to think about it and looking at  
9 towards what information is available because Izembek  
10 is definitely one of the major places for emperor geese  
11 to stop and have a little snack before they head this  
12 way or go up into the Western Alaska. So thank you  
13 very much for starting to think about that.

14  
15 MADAME CHAIR TRUMBLE: Coral.

16  
17 MS. CHERNOFF: Yes. So I guess I would  
18 suggest -- I guess what I would like to see, Della, for  
19 us for our next meeting, I don't know where we would  
20 get this information but the bird game guides, when  
21 you're a guide I believe you have to fill out some  
22 paperwork for your clients, and send it into the State,  
23 and I'm wondering if at our next meeting we could get  
24 our information for the guides in our area, like  
25 Kodiak, Izembek, and if we could get the bird numbers,  
26 because we've never seen those and I think that would  
27 make a difference. Even though we're not -- we don't  
28 deal with migratory birds, that's a separate thing, we  
29 are, you know, we're very much involved in it in our  
30 subsistence lifestyles, and so I would like to see our  
31 Councils get those numbers if we can at our next  
32 meeting.

33  
34 And to me, that's pretty startling, the  
35 number of use days, how much it has increased and  
36 somehow there needs to be an actual conversation  
37 started, to go from less than 300 client days to over  
38 800 in two years and then who knows where it's going to  
39 go next year and next year. So I think we should  
40 definitely get some numbers in front of us and start  
41 talking about this.

42  
43 And that's all I have.

44  
45 MADAME CHAIR TRUMBLE: Thank you,  
46 Coral. I think a lot of very good points brought  
47 forward. Any other comments in regard to this for  
48 Izembek.

0145

1 (No comments)

2

3 MADAME CHAIR TRUMBLE: Appreciate your  
4 report and your time, Maria.

5

6 MR. BURCH: Madame Chair, this is Mark  
7 Burch.

8

9 MADAME CHAIR TRUMBLE: Go ahead, Mark.

10

11 MR. BURCH: Yeah, I just wondered if  
12 you wanted to get back to Dave Crowley, the bear  
13 biologist, since he is for that part of the state,  
14 since he is on the line.

15

16 MADAME CHAIR TRUMBLE: Yeah, yeah, I  
17 agree, let's go ahead and do that, thank you.

18

19 (Pause)

20

21 MR. CROWLEY: Hello, Madame Chair, good  
22 afternoon. This is Dave Crowley, can you hear me okay.

23

24 UNIDENTIFIED VOICE: Yes. Della,  
25 stepped out for just a second but she will be right  
26 back, she had to run to the bathroom real quick.  
27 Sorry.

28

29 MR. CROWLEY: Okay, thanks, I'll be  
30 here.

31

32 (Pause)

33

34 MADAME CHAIR TRUMBLE: This is Della,  
35 I'm back here. I had to run and get something.

36

37 MS. WESSELS: Della, we have Dave  
38 Crowley online, he's available to talk, we were just  
39 waiting on you.

40

41 MADAME CHAIR TRUMBLE: Okay, yeah, I'm  
42 here. I heard him start but I had to step out, so,  
43 yeah, go ahead.

44

45 MR. CROWLEY: Okay. Good afternoon,  
46 Madame Chair and Committee members. This is Dave  
47 Crowley, Alaska Department of Fish and Game. I'm the  
48 Area Biologist out of King Salmon. I understand there  
49 were some questions. Were there some specific  
50

0146

1 questions on bears down in Unit 9E or 9E?

2

3 MR. BURCH: This is Mark Burch -- oh,  
4 go ahead.

5

6 MADAME CHAIR TRUMBLE: Go ahead, Mark.

7

8 MR. BURCH: Since Dave was not online I  
9 was just going to try and summarize. I think I heard  
10 the question, about the affect of the pandemic on the  
11 hunting pressure and harvest and overall population.  
12 Whoever asked that question in the first place might  
13 want to clarify it.

14

15 MS. SKINNER: Madame Chair, this is  
16 Rebecca. I have another question if we don't get  
17 clarification on that other question.

18

19 (Laughter)

20

21 MADAME CHAIR TRUMBLE: Go ahead,  
22 Rebecca. I'm sorry, I'm in the office and sometimes I  
23 have to stop and deal with a couple things but I think  
24 we're good now so go ahead.

25

26 MS. SKINNER: Okay. Yeah, and then  
27 whoever did have the original questions this may give  
28 them more time to think about it. But since we do have  
29 the bear biologist for the -- that would cover the area  
30 that's in the Izembek report here, I was wondering as  
31 far as the lower numbers of sows with cubs, so for  
32 example the Unimak brown bear counts between '20 and  
33 '21 there was a 42 percent decrease in sows with cubs,  
34 is that a big decrease, I mean is that an alarming  
35 number or is it just normal, sometimes, that's how much  
36 they decrease. And then if it is alarming or it is  
37 significant, do we know, do we have any sense of why  
38 there was that decrease.

39

40 MR. CROWLEY: Yeah, Madame Chair. I  
41 have not seen the recent data from Izembek, I'm  
42 assuming you're referring to their surveys of Unimak  
43 Island. And those surveys can vary quite a bit from  
44 year to year because they're not repeated. Normally  
45 when we do bear composition surveys we do repeated  
46 surveys during the week, we'll survey the same thing as  
47 many as, you know, four or five times, and pool that  
48 data because it can vary so much day to day. And so  
49 with the data from Izembek and Unimak Island, I kind  
50

0147

1 of, you know, take a long range look at those surveys  
2 and it could be that their survey this year jumps right  
3 back up to a normal level. So a decline in one or two  
4 years in the number of cubs doesn't really concern me  
5 much.

6  
7 From what we've seen on our ungulate  
8 surveys -- we haven't gotten down to Cold Bay since,  
9 oh, I think a parturition survey a couple years ago, or  
10 a composition survey a couple years ago but the cubs  
11 were coming back. We actually did see -- I don't think  
12 in 9D or Unimak, but elsewhere in Unit 9 we saw a  
13 decline in cubs during our ungulate surveys but boy  
14 they've come screaming back at least in Units C and E.  
15 We haven't spent as much time down in 9D yet or Unimak  
16 but -- so, yeah, short answer, no, that wouldn't  
17 concern me from one year to the next, but if it was a  
18 longer term decline, if we saw that over, you know,  
19 three, four, five years then I'd be concerned.

20  
21 Thank you.

22  
23 MS. SKINNER: Okay, thanks. Yeah, that  
24 context was exactly what I was looking for. Thank you,  
25 Madame Chair.

26  
27 MADAME CHAIR TRUMBLE: Thank you,  
28 Rebecca. Thank you.

29  
30 MR. KOSO: Madame Chair.

31  
32 MADAME CHAIR TRUMBLE: Go ahead, Rick.

33  
34 MR. KOSO: Yeah, no, that answered my  
35 question too on Unimak and 9D area. It doesn't sound  
36 like they're too concerned about it. Like I said, my  
37 concern was this three and a half percent decline, so I  
38 think I got my answer from them, they don't seem very  
39 concerned about it so I guess there's nothing to worry  
40 about as far as that goes, so thank you.

41  
42 MADAME CHAIR TRUMBLE: Thank you. Do we  
43 see the State -- does the State report on the bear part  
44 of this reporting process for our meetings, or can we  
45 get that in the future?

46  
47 MR. BURCH: Madame Chair, this is Mark  
48 Burch.

49  
50

0148

1 MADAME CHAIR TRUMBLE: Go ahead, Mark.

2

3 MR. BURCH: I would just say in  
4 general, of course, the Department of Fish and Game has  
5 a place on the agenda for agency reports. In the case --  
6 if we have population level concerns we'll sometimes  
7 initiate a report to bring that to your attention but  
8 often it turns out to be by request. So if you have  
9 concerns about a population and want to let us know  
10 what those concerns are and would like to have that  
11 added to the agenda, you know, a situation where we  
12 could of course prepare ahead of time and line up the  
13 biologist, we're happy to do that. But we wouldn't  
14 normally present on bears on Unimak, for instance, at  
15 every meeting. Hopefully that makes sense, thanks.

16

17 MADAME CHAIR TRUMBLE: Yeah. Well, I  
18 guess I'm looking at more the, you know, how you  
19 sometimes do the joint survey on caribou, I think in  
20 this case you most likely don't do a joint survey on  
21 bear but it's just that when those reports are  
22 available, I guess it's nice to be able to see what  
23 they are. But at this particular point it doesn't  
24 sound like there's a concern on anything, it was just a  
25 question.

26

27 Okay, any other comments or questions.

28

29 (No comments)

30

31 MADAME CHAIR TRUMBLE: I think hearing  
32 none, do we want to go ahead -- thank you, everyone, on  
33 the Izembek, reports.

34

35 MS. WESSELS: Madame Chair.

36

37 MADAME CHAIR TRUMBLE: Go ahead, Katya.

38

39 MS. WESSELS: Yes, we have Steve  
40 Delehanty with Maritime National Wildlife Refuge online  
41 if you would like to return to Maritime now.

42

43 MADAME CHAIR TRUMBLE: Okay, thank you.  
44 Steve, do you want to go ahead with Maritime National  
45 Wildlife Refuge winter report.

46

47 MR. DELEHANTY: Yes, thank you very  
48 much for the opportunity. I just want to make sure  
49 that you have a copy of the report to the Council  
50

0149

1 members and can hear me all right.

2

3 MADAME CHAIR TRUMBLE: Yes, we can hear  
4 you well and it is Tab No. 6 in your binder.

5

6 MR. DELEHANTY: Perfect. Thank you,  
7 very much. So I wanted to -- we spent, as so many  
8 people have, a lot of time worrying about Covid and  
9 being safe and keeping your communities safe and that  
10 remains our focus. But we are planning a more active  
11 field season, summer season coming up. So last year,  
12 if you perhaps remember from our fall report, we did  
13 all of our work that was ship-based departing from  
14 Homer only, and arriving Homer. So basically we did  
15 big giant long, six, eight weeks long sweeps around and  
16 would return to Homer, we did not stop in Adak or  
17 Unalaska or Sand Point or Cold Bay or any place else  
18 and we didn't fly anybody anywhere. This year we are  
19 hoping to stay safe and conservative but to have some  
20 ports of call other than Homer, particularly once we  
21 have our field camps dropped off in the spring. So  
22 will be in Adak and Unalaska, for example.

23

24 We are doing, as you can see from that  
25 first topic, Snow On The Ground, Summer on Our Minds,  
26 we're doing a lot of planning trying to figure out how  
27 to get as much done as we can with what everybody is  
28 saying, which is not enough resources to be able to do  
29 the work, so we're having a hard time finding people to  
30 get the projects done and we're -- but we're excited  
31 about our plans. And it includes, I'm happy to say,  
32 besides our normal biological monitoring and oversight  
33 of the Refuge management issues, we are hoping this  
34 year, and are planning this year to reengage in person  
35 with the youth culture in camp science and camps and we  
36 -- in recent years, traditionally, pre-Covid, have had  
37 active participation in the Pribilof Islands as well as  
38 Sand Point and Unalaska so we hope to do that this year  
39 as well. We're working a with Maria a little bit to  
40 try and figure out the best way to help support the  
41 Sand Point camp. We expect to receive some money for  
42 that and invest some Staff time in that.

43

44 We also are planning on a youth hiring  
45 program that we've done for quite a few years now.  
46 It's complicated. And it's particularly complicated  
47 now doing it safely and smartly but we've been really  
48 pleased and proud of the program in the past where  
49 we've been able to take young people from remote  
50

0150

1 communities and bring them together with Refuge Staff  
2 and have them experience biological field work and ship  
3 operations and just sort of how we do things, they  
4 typically get a short trip, a week or so aboard the  
5 Tiglax, so we're hoping for that again this year. With  
6 all of this we're reaching out to the communities and  
7 making sure that we're welcome, but so far we've gotten  
8 nothing but positive information from communities,  
9 they'd be glad to have us back and participating more  
10 actively.

11

12 I know I heard Rick on earlier, he  
13 knows this already, but we are -- we do have a meeting  
14 planned with Rick and Dave Crowley and the Aleut  
15 Corporation and myself to talk about the Adak caribou  
16 issue. So I don't have any new information for you  
17 other than we have a meeting date and time set up to  
18 have that discussion about caribou in Adak and hear  
19 what people have to say.

20

21 We continue our work, moving down in  
22 the report, on invasive species. Just -- I believe it  
23 was last week or the week before, we did a rather  
24 intensive plant species workshop so that's something  
25 that we have never ever dealt with effectively at  
26 Alaska Maritime National Wildlife Refuge, we're pretty  
27 famous for our work removing introduced foxes from  
28 islands and rats and things like that but we've tended  
29 to not do much with plants, if anything. And so we  
30 brought some plant experts and others to just kind of  
31 go through an evaluation and figure out which are the  
32 most difficult plants and which islands should we --  
33 you know, how should we be looking at this. We really  
34 haven't made any decisions yet but we hope it will help  
35 us figure out where we can best make an investment and  
36 do good work for plant, you know, invasive plants,  
37 either eradication or controlled. So that is going on  
38 actively right now.

39

40 And then as you know we maintain this  
41 vision for a rat free Aleutians some day. That full  
42 implementation of that vision is a long ways out and I  
43 may not live to see it but every journey starts with a  
44 single step. So we are continuing planning to look at  
45 the feasibility of possible eradication on Great Sitkin  
46 Island most intensely but we're also looking at  
47 Amchitka and Kiska and Attu just in kind of more of  
48 conceptual desktop exercise. But it was delayed  
49 because of Covid so we will be going out there this  
50

0151

1 summer and.....

2

3 (Teleconference interference -  
4 participants not muted)

5

6 REPORTER: Okay, hang on Dave. Dave.  
7 Hang -- or, no, not Dave, Steve. I'm sorry, Steve.  
8 Steve, hold on, could you hold on just a moment. Could  
9 everybody check their lines and make sure they're  
10 muted, I have a lot of background noise and I cannot  
11 hear him talking right now, it's not picking up on the  
12 recorder.

13

14 MR. DELEHANTY: Thank you. Just let me  
15 know when you'd like me to proceed.

16

17 REPORTER: Okay, go ahead, I think  
18 somebody muted. Sorry to interrupt you.

19

20 MR. DELEHANTY: Oh, that's fine, thank  
21 you. So we are planning on some field work on Great  
22 Sitkin Island this summer. And that relates to  
23 studying the -- not only looking to figure out how,  
24 like for example, how high up elevation rats live on  
25 the island but also things like how quickly the bait  
26 breaks down in the real environment out there. We're  
27 not actually putting any poison on the island but using  
28 the little kernels, the grain-based products that would  
29 be very similar to what some day could be -- could  
30 include the toxicant, the chemical in it, but for this  
31 year there's no chemical or anything it's just the  
32 grain-based bait trying to figure out what happens in  
33 the aquatic environment, invertebrate take and things  
34 like that and -- and there's also parallel work being  
35 done in a lab to understand the effects on salmon of  
36 this particular pesticide that likely would get used in  
37 a future project.

38

39 So that work is going on and we're  
40 excited to be going out and interacting with some  
41 communities again this summer. And really that's all I  
42 wanted to report on but I'd be happy to take any  
43 questions and thank you, as always, for the work that  
44 you all do to help take care of this wonderful  
45 landscape out here.

46

47 Thanks.

48

49 MADAME CHAIR TRUMBLE: Thank you. Any

1 comments or questions.

2

3

MR. HOLMES: Pat.

4

5

MADAME CHAIR TRUMBLE: Go ahead, Pat.

6

7

MR. HOLMES: Yeah, I'm sorry there, I was having to deal with something else on a different phone but you were mentioning something about rats and I lost you and then pesticides and salmon, I just wonder if you could briefly repeat that.

MR. DELEHANTY: Yes, hi Pat. So as part of our feasibility project to learn whether or not it's really possible to try and eradicate rats from Great Sitkin Island in the Aleutians we've got kind of a two-part research going on that the U.S. Department of Agriculture is doing for us. Part one is laboratory-based, so they're studying the effects of rodenticide (ph) on salmon because the islands that we're looking at, like Great Sitkin and Attu, for example, have salmon runs on them and so we want to understand what, if any, what the impact on those fish. And then the second part of the research is actually on the island will be occurring this late summer this year, which is examining how non-toxic, just grain pellets that resemble the grain-pellets that some day could contain the rodenticide, how those break down and move through the, particularly the aquatic food chain, so that research is going on this summer on Great Sitkin Island.

Yeah, and I think that's it if that answers your question.

MR. HOLMES: Yeah, thank you very much. I did survey the Chain in '82 and looked at a lot of those streams and have followed your rat attempts at different places and I did, at one point, in the '80s there, get -- I forget where they were working, but one of the golden king crab fishermen that was working out there, said they noticed some -- several dead eagles and so I think you're finding your way of distributing the rodenticide is going to be an important thing, particularly the question of using pellets and whether or not that might get into the stream is certainly a good thing to check out before you do that. And I'm glad that, hopefully things will loosen up for you folks, I know my friends at Atka were really

0153

1 appreciative of the trip you folks took them out to  
2 Attu to get grass and I finally was able to afford to  
3 buy an Attu basket made by an Atkan lady with Attu  
4 grass for my wife for Christmas last year. So anyway  
5 that helped -- that was good for the folks there, not  
6 only for their culture but for their own personal  
7 income. So thanks a lot for all your hard work, bye.

8

9 MADAME CHAIR TRUMBLE: Thank you, Pat.  
10 Any other comments or questions for Steve.

11

12 (No comments)

13

14 MADAME CHAIR TRUMBLE: Okay, hearing  
15 none, thank you for your report.

16

17 MS. CHERNOFF: Madame Chair.

18

19 MADAME CHAIR TRUMBLE: Oh, I'm sorry,  
20 go ahead, Coral.

21

22 MS. CHERNOFF: Yeah, I guess I just  
23 wanted to -- I don't know at this point, about putting  
24 my two cents in worth, but I don't think that any sorts  
25 of poisons or toxins are ever a great idea to put into  
26 the environment but I don't know what we have to say  
27 about that but that's my comment.

28

29 MADAME CHAIR TRUMBLE: Okay, thank you.  
30 Okay, Council, I think we're -- the next item is the  
31 Kodiak National Wildlife Refuge, my question to you is  
32 do you want to continue on today and do this or do you  
33 want to do it the first thing in the morning.

34

35 MR. HOLMES: Morning would be fine for  
36 me.

37

38 MR. KOSO: Yeah, morning's fine for me,  
39 Della, I'm going to have to check out right now.

40

41 MADAME CHAIR TRUMBLE: Okay.

42

43 MR. PRICE: Yeah, and for me too.

44

45 MADAME CHAIR TRUMBLE: Okay, that  
46 works, we don't have a whole lot left on this agenda so  
47 I think we'll be fine. So 8:30 in the morning.

48

49 MR. KOSO: Was that 8:30.

50

0154

1 MADAME CHAIR TRUMBLE: Yeah, 8:30.

2

3 MR. KOSO: Okay.

4

5 MADAME CHAIR TRUMBLE: And we will talk  
6 to you all then, have a very good evening everybody and  
7 thank you all for the reports and work today.

8

9 MS. HAYDEN: Thanks Della.

10

11 MR. ROHRER: Have a good evening,  
12 thanks.

13

14 MR. PRICE: Thanks, Della.

15

16 MADAME CHAIR TRUMBLE: You too, have a  
17 good evening, bye.

18
