“Thomas Victor Jones.” In an editorial, the Wall Street Journal (1/15, Subscription Publication, 5.91M) eulogizes former Northrop Corp. Chief Executive and Chairman Thomas Victor Jones, praising him as a visionary who turned the faltering aviation company into an aerospace giant.

“Speechless in Massachusetts.” An editorial in the Wall Street Journal (1/15, Subscription Publication, 5.91M) discusses an upcoming Supreme Court case, McCullen v. Coakley, that challenges a Massachusetts law banning any protests within 35 feet of abortion clinics. The 2000 case Hill v. Colorado approved of a Colorado law that banned protests too close to any healthcare facility, though the editorial takes an extremely negative view of that precedent and hopes that the court will reverse it. The Journal quotes from Justice Anthony Kennedy’s dissenting opinion in which he argued the majority opinion “contradicts more than a half century of well-established First Amendment principles [and] mandates outright reversal.”

Washington Schedule:

TODAY'S EVENTS IN WASHINGTON.

White House:

PRESIDENT OBAMA — Travels to Raleigh, Durham, Raleigh-Durham International Airport, open press; tours Vacon, a company that manufactures AC drives, which are used to control the speed of electric motors to maximize energy efficiency; delivers remarks, North Carolina State University; meets with the Senate Democratic Caucus, The East Room, closed press.

VICE PRESIDENT BIDEN — No Scheduled Events.

FIRST LADY MICHELLE OBAMA — hosts a discussion with education stakeholders, open press.

US Senate: 10 a.m. MEDICARE BILL — U.S. Sens. Ron Wyden, D-Ore., and Johnny Isakson, R-Ga., and U.S. Reps. Erik Paulsen, R-Minn., and Peter Welch, D-Vt., will announce bipartisan, bicameral legislation aimed at providing better care at lower cost for the millions of Medicare beneficiaries living with multiple chronic illnesses. Location: 366 Dirksen.

9:30 a.m. ARMED SERVICES — CLOSED: Situation in Iraq and Syria. Witnesses: Derek H. Chollet Assistant Secretary of Defense for International Security Affairs; Vice Admiral Frank C. Pandolfe, USN, Director for Strategic Plans and Policy, Joint Staff; Gerald M. Feierstein, Principal Deputy Assistant Secretary of State, Bureau of Near Eastern Affairs; Alan R. Pino, National Intelligence Officer for Near East, Office of the Director of National Intelligence. Location: Room SVC-217, the Capitol Visitor Center.

10 a.m. CONGRESSIONAL-EXECUTIVE COMMISSION ON CHINA — CECC Hearing: "Chinas Compliance With the World Trade Organization and International Trade Rules." Witnesses: David Horn, Executive Vice President and General Counsel, AK Steel Holding Corporation; Elizabeth Drake, Partner, Stewart and Stewart; Tea Lee, Deputy Chief of Staff, Presidents Office, American Federation of Labor and Congress of Industrial Organizations. <http://www.cecc.gov/sites/chinacommission.house.gov/files/AR13DJ.PDF> Location: 538 Dirksen.

10 a.m. FINANCE — Hearing to consider the nominations of R. Gil Kerlikowske to be the commissioner of U.S. Customs and Border Protection; and L. Paige Marvel and Tamara W. Ashford to be judges on the U.S. Tax Court. The committee will also hold an open executive session during the hearing to vote on the nominations of Sarah Bloom Raskin to be deputy secretary of the Treasury Department and Rhonda Schnare Schmidlein to be a member of the U.S. International Trade Commission. Location: 215 Dirksen.

2 p.m. BANKING, HOUSING, AND URBAN AFFAIRS — Full Committee Hearing, "Regulating Financial Holding Companies and Physical Commodities." Witnesses: Norman Bay, Director, Office of Enforcement, Federal Energy Regulatory Commission; Vince McGonagle, Director, Division of Market Oversight, Commodity Futures Trading Commission; Michael Gibson, Director, Division of Banking Supervision and Regulation, Board of Governors of the Federal Reserve System. http://www.banking.senate.gov/public/index.cfm?FuseAction=Hearings.Hearing&Hearing_ID=0e55dd8e-8589-4120-8c3e-2c6dc95f7f40 Location: 538 Dirksen.

2 p.m. FOREIGN RELATIONS — Business meeting on S____, Support for United States-Republic of Korea Civil Nuclear Cooperation Act, and nominations, followed by hearing on the Implications of the Crisis in Ukraine, with Victoria Nuland, assistant secretary for European and Eurasian Affairs, U.S. Department of State; Thomas Melia, deputy assistant secretary of state, Bureau of Democracy, Human Rights, and Labor; and Dr. Zbigniew K. Brzezinski, former national security adviser, counselor and trustee, Center for Strategic and International Studies. Location: 419 Dirksen.

2:15 p.m. AGING — Hearings to examine aging in comfort, focusing on assessing the special needs of America's Holocaust survivors. Witnesses include Elihu Kover, VP, Selfhelp Nazi Victim Services, (of New York).

<http://www.aging.senate.gov/hearings/aging-in-comfort-assessing-the-special-needs-of-americas-holocaust-survivors> Location: 562 Dirksen.

2:30 p.m. COMMERCE, SCIENCE, AND TRANSPORTATION — Full Committee Hearing, “The Future Of Unmanned Aviation In The U.S. Economy: Safety And Privacy Considerations,” examining the growth of unmanned aerial systems (UAS), commonly referred to as “drones,” in the United States, including the potential economic benefits of drone operations, and the progress of steps taken to facilitate the development of the industry through the FAA Modernization and Reform Act of 2012 (P.L. 112-95). The hearing will include consideration of safety and privacy issues surrounding the operation of drones in the United States. Witnesses include Michael Huerta, Administrator, Federal Aviation Administration (FAA). Location: 253 Russell.

3 p.m. SENATE DRUG CAUCUS — Holds Hearing on Future of U.S. Counternarcotics Efforts in Afghanistan. Witnesses: William Brownfield, Assistant Secretary of State for International Narcotics and Law Enforcement Affairs; James Capra, Chief of Operations for the Drug Enforcement Administration; Erin Logan, Principal Director, Office of the Deputy Assistant Secretary of Defense for Counternarcotics and Global Threats; John Sopko, Special Inspector General for Afghanistan Reconstruction. www.drugcaucus.senate.gov. Location: 138 Dirksen.

US House: 10:45 a.m. PRO – CHOICE CAUCUS — Reps. Louise Slaughter, D-N.Y., and Diana DeGette, D-Colo., co-chairs of the House Pro-Choice Caucus, hold a news conference and lead a protest against the House Judiciary Committee markup of H.R. 7. Location: Outside House Judiciary hearing room, 2141 Rayburn.

1 p.m. FEDERAL HEALTH EXCHANGE NAVIGATORS — Press Conference to announce and discuss the letter from members of the Texas Democratic Congressional Delegation delivered to Attorney General Eric Holder seeking legal action by the Department of Justice to enjoin the State of Texas from preventing Navigators to do their job when it comes to helping individual obtain affordable healthcare coverage. Reps. Sheila Jackson Lee; Gene Green; Al Green; Eddie Bernice Johnson; Joaquin Castro; Marc Veasey; other members of the Texas Democratic Delegation. Location: HVC Studio B.

1:30 p.m. MINIMUM WAGE — House Democratic Leader Nancy Pelosi, Labor Secretary Thomas Perez, Democratic Whip Steny Hoyer, and House Democratic Members will hold a press event “on the need to raise the minimum wage to \$10.10 for hard-working Americans and call for the passage of H.R. 1010, the Fair Minimum Wage Act.” Members will also announce the kick-off of the “Time For \$10.10” campaign to “galvanize public support and pressure Congress to take immediate action to pass the legislation.” Location: Capitol Visitor’s Center, HVC-215.

3 p.m. TERRORISM RISK INSURANCE ACT — Congresswoman Maxine Waters (D-CA), Ranking Member of the House Financial Services Committee, will moderate a bipartisan panel discussion on the need to reauthorize of the Terrorism Risk Insurance Act (TRIA). Panel: Jeff DeBoer, President & CEO, Real Estate Roundtable; Ed Walter, President & CEO, Host Hotels & Resorts, Inc.; Molly Campbell, Deputy Executive Director of Finance and Administration, Port of Los Angeles; Ethan Sonnichsen, Government Relations, National Association of Insurance Commissioners (NAIC). Location: 2168 Rayburn (Gold Room).

10 a.m. — The House will meet for morning hour and at 12:00 p.m. for legislative business. First votes expected: 1:45 – 2:30 p.m. Last votes expected: 3:45 – 4:30 p.m.

9:30 a.m. OVERSIGHT AND GOVERNMENT REFORM — Full Committee Hearing, “Strengthening Agency Oversight: Empowering the Inspectors General Community.” Location: 2154 Rayburn.

10 a.m. ENERGY AND COMMERCE — Subcommittee on Communications and Technology Hearing, “CommActUpdate: Perspectives from Former FCC Chairmen.” Location: 2123 Rayburn.

10 a.m. FINANCIAL SERVICES — Financial Services Committee hearing to examine the impact and potential unintended consequences of the recently finalized Volcker Rule. Location: 2128 Rayburn

10 a.m. FOREIGN AFFAIRS — Full Committee Hearing: “South Sudan’s Broken Promise?” Location: 2172 Rayburn.

10 a.m. HOMELAND SECURITY — Hearing on A False Narrative Endangers the Homeland. Witnesses: Joe Lieberman, former Connecticut Senator; Jane Hamman, former California Congresswoman; Director, Wilson Center; General (Ret.) Jack Keane, former Vice Chief of Staff of the United States Army.

<http://homeland.house.gov/hearing/hearing-false-narrative-endangers-homeland> Location: 311 Cannon.

10 a.m. TRANSPORTATION AND INFRASTRUCTURE — Railroads, Pipelines, and Hazardous Materials Subcommittee Hearing, "A Review of the Challenges Facing California High Speed Rail." Location: 2167 Rayburn.

10 a.m. VETERAN'S AFFAIRS — Subcommittee on Oversight & Investigations hearing on "Vendors in the OR – VA's Failed Oversight of Surgical Implants". <http://veterans.house.gov/hearing/vendors-in-the-or-vas-failed-oversight-of-surgical-implants> Location: 334 Cannon

10:15 a.m. JUDICIARY — Full Committee Markup of: H.R. 7, the "No Taxpayer Funding for Abortion." Location: 2141 Rayburn.

1 p.m. SMALL BUSINESS — The Power of Connection: Peer-to-Peer Businesses. Witnesses: Dr. Arun Sundararajan, Professor and NEC Fellow, Stern School of Business, Head, Social Cities Initiative, New York University, New York, NY; Beth Stevens, Assistant General Counsel, Sidecar Technologies, Inc., San Francisco, CA; Alan Mond, CEO, 1000 Tools, Inc., Ann Arbor, MI. <http://smallbusiness.house.gov/calendar/eventsingle.aspx?EventID=364939> Location: 2360 Rayburn.

2 p.m. FOREIGN AFFAIRS — Subcommittee on the Western Hemisphere Hearing, "NAFTA at Twenty: Accomplishments, Challenges, and the Way Forward." Location: 2172 Rayburn.

2 p.m. FOREIGN AFFAIRS — Subcommittee on Africa, Global Health, Global Human Rights, and International Organizations Hearing, "A Report on the G-8 Dementia Summit." Location: 2200 Rayburn.

2 p.m. HOMELAND SECURITY — Subcommittee on Cybersecurity, Infrastructure Protection, and Security Technologies Markup of H.R. 3696, the "National Cybersecurity and Critical Infrastructure Protection Act of 2013," introduced by Chairman Michael McCaul (R-Texas) and Subcommittee Chairman Patrick Meehan (R-PA), to amend the Homeland Security Act of 2002 to make certain improvements regarding cybersecurity and critical infrastructure protection, and for other purposes. Location: 311 Cannon.

Other: Jan. 12 – 16. TRB ANNUAL MEETING — The Transportation Research Board (TRB) 93rd Annual Meeting will be held. The program will attract nearly 12,000 transportation professionals from around the world to Washington, D.C. The spotlight theme for the 2014 TRB Annual Meeting is "Celebrating Our Legacy, Anticipating Our Future." <http://www.trb.org/AnnualMeeting2014/annualmeeting2014.aspx> 1:15 p.m. U.S. Department of Transportation Secretary Anthony Foxx will address transportation leaders in the Regency Ballroom at the Omni Shoreham Hotel, 2500 Calvert St. NW. Location: The Washington Marriott Wardman Park, Omni Shoreham, and Washington Hilton hotels.

ATLANTIC – 'SHRIVER REPORT' — 8:30 a.m. – 5 p.m. The first annual "The Atlantic Presents: The Shriver Report LIVE" will mark a new partnership between The Atlantic and "A Woman's Nation," the nonprofit organization founded by Maria Shriver and devoted to raising awareness on the key issues facing American women. The marquee event will gather a group of leaders from a variety of backgrounds to discuss the findings and implications of the latest Shriver Report, "A Woman's Nation Pushes Back from the Brink," in partnership with the Center for American Progress. Featured speakers include House Democratic Leader Nancy Pelosi; Maria Shriver, Founder of A Woman's Nation; Senator Kirsten Gillibrand (D-NY). 11:45 a.m. House Democratic Leader Nancy Pelosi. 2:30 p.m. Senator Kirsten Gillibrand (D-NY) Location: The Newseum, Knight Conference Center, 555 Pennsylvania Avenue, NW.

TECHNOLOGY POLICY INSTITUTE – DATA PRIVACY — 8:30 a.m. – 10 a.m. "The Big Data Revolution: Privacy Considerations." Congresswoman Marsha Blackburn, Republican chair of the House Privacy Task Force, will give opening remarks FTC Commissioner Maureen Ohlhausen will offer closing remarks. Confirmed panelists are: Thomas Lenard, President and Senior Fellow, Technology Policy Institute; Adam Thierer, Senior Research Fellow, Mercatus Center, George Mason University; Catherine Tucker, Mark Hyman, Jr. Career Development Professor and Associate Professor of Marketing, MIT Sloan School of Management; Daniel Weitzner, Director, Computer Science and Artificial Intelligence Laboratory, Decentralized Information Group, MIT and former United

States Deputy Chief Technology Officer for Internet Policy; Alan Raul (moderator), Partner, Sidley Austin LLP. Location: City Club, 555 13th St., NW.

U.S. CHAMBER – ENERGY WORKS PLATFORM — 9:15 a.m. The U.S. Chambers Institute for 21st Century Energy will unveil its comprehensive new “Energy Works for US” policy platform. “Energy Works for US” will be the basis for the Chambers work to build support for a commonsense energy policy across the nation in 2014 and beyond. Speakers: Thomas J. Donohue, President and CEO, U.S. Chamber of Commerce; Karen Harbert, President and CEO, Institute for 21st Century Energy, U.S. Chamber of Commerce. RSVP: Credentialed members of the media are invited to attend. To register, email mletourneau@uschamber.com or call 202-463-5682. Location: U.S. Chamber of Commerce, 1615 H Street, NW.

EDUCATION DATAPALOOZA — 9:30 a.m. – 2 p.m. The White House and the U.S. Department of Education will host an Education “Datapalooza,” highlighting innovators from the private, nonprofit, and academic sectors who have used freely available government data to build products, services, and apps that advance postsecondary education, empower students with information, and help colleges innovate in creative and powerful ways. Key speakers: Arne Duncan, U.S. Secretary of Education; Cecilia Munoz, Assistant to the President, Director of the Domestic Policy Council; Dan Tangherlini, Administrator, U.S. General Services Administration; Nick Sinai, U.S. Deputy Chief Technology Officer. Location: Ronald Regan Building and International Trade Center, 1300 Pennsylvania Ave. NW.

‘WAGE THEFT’ COMPLAINT — 10 a.m. Telephonic press announcement of new ‘Wage Theft’ complaint and briefing on what the President can do to address income inequality by executive order. US Reps. Keith Ellison (DFL – MN) and Raul Grijalva (D-AZ), Co-Chairs, Congressional Progressive Caucus; Amy Traub, DEMOS Senior Policy Analyst, and ‘wage theft victims.’ (Low-wage federal contract workers at Union Station will file a formal complaint with the U.S. Department of Labor alleging widespread wage theft and other violations of labor law on Wednesday morning.) Protest to follow at Union Station at 11:30 a.m., lower level food court in front of Subway.

BURMESE, BHUTANESE REFUGEE — 10 a.m. The Asian & Pacific Islander American Scholarship Fund (APIASF), in collaboration with the Association for Asian American Studies and the Congressional Asian Pacific American Caucus, is hosting a briefing to discuss findings from its new report, “Invisible Newcomers: Refugees from Burma/Myanmar and Bhutan in the United States.” With Congresswoman Judy Chu (D-Calif.), Chair, Congressional Asian Pacific American Caucus; Congressman Mike Honda (D-Calif.) (Invited); Neil Horikoshi, President and Executive Director, APIASF; Myra Dahgaypaw, Board Member, Karen American Communities Foundation; Janelle Wong, Ph.D., Associate Professor, University of Maryland, College Park. Location: 121 Cannon.

FAMILY RESEARCH COUNCIL – ABORTION DEMOGRAPHICS — 12 p.m. Family Research Council (FRC) hosts a lecture to release an analysis of the demographics of abortion. FRC’s Marriage and Religion Research Institute (MARRI) director, Pat Fagan, will discuss the findings with Rep. Chris Smith, R-N.J., co-chairman of the House Pro-Life Caucus. Location: FRC Media Center, 801 G St. NW.

Last Laughs:

LATE NIGHT POLITICAL HUMOR.

Jay Leno: “Today, New Jersey Governor Chris Christie delivered his State of the State Address. He said the state is improving, but admitted, it’s still New Jersey. No, he said he wants to do all he can to keep people from leaving New Jersey. That’s why he closed the bridge.”

David Letterman: “And you know, the Mayor of Fort Lee upset the Governor of New Jersey, so he got back at him by allegedly blocking traffic on the George Washington Bridge. But usually when Chris Christie is blocking the line, it’s the buffet at Golden Corral. That’s a different story.”

Conan O’Brien: [Referencing the George Washington Bridge closing] “Today, New Jersey Governor Chris Christie gave his State of the State Address. Christie started the speech by saying, ‘Sorry I’m late, but I can’t control the traffic.’”

Conan O'Brien: "Today was big news. It was announced that President Obama is going to visit Pope Francis. Obama said he can't wait to tell the Pope, 'You know, they liked me a lot, too, that first year. Good times.'"

INTERIOR:

Jewell keeps battle-tested Beltway insiders close at hand

Phil Taylor and Robin Bravender, E&E reporters

Published: Tuesday, January 14, 2014

Second in a series.

Interior Secretary Sally Jewell's office looks a lot like her predecessor's.

Unlike many department heads who fill their offices with their confidants and former colleagues, Jewell's staff is still packed with holdovers from former Secretary Ken Salazar. That's likely in part to help guide the Washington outsider and keep continuity as the agency seeks to continue its broad expansion of renewable energy, oil and gas development and conservation on public lands in the Obama administration's second term.

SPECIAL SERIES

In this series, E&E pulls back the curtain for a look at key agency staffers.

Her staff have plenty of congressional and policy chops to help her navigate the terrain and complement the business savvy that the former REI executive brings to the table.

While the Interior Department's geographical footprint is broad -- it controls one-fifth of the U.S. landmass and essentially all of its oceans -- policy decisions radiate from Interior headquarters at 1849 C Street N.W. in Washington, D.C.

Here's a look at some of the behind-the-scenes players helping to guide Interior's policies on everything from landscape-scale mitigation to hydraulic fracturing and oil and gas exploration in the Arctic.

Laura Daniel-Davis, chief of staff

As chief of staff to the Interior secretary, Laura Daniel-Davis sits in on almost every important policy meeting. Photo courtesy of Interior.

Daniel-Davis is a Washington, D.C., native but came to Interior after working as a top aide to then-Rep. Mark Udall (D-Colo.). She was Salazar's deputy chief of staff until early 2011, when she replaced outgoing Chief of Staff Tom Strickland. Daniel-Davis was critical in Jewell's transition and helped hire new staff, and people close to the agency say her keen political sense supplements Jewell's business background.

The chief of staff wields significant power at Interior, sitting in on almost every policy discussion Jewell has with her deputies in D.C. and beyond. "Inevitably, they make or break what you want to do," a former Interior official said.

Daniel-Davis is described as having gravitas. She worked under former Deputy Secretary David Hayes during the Clinton administration, rubbing shoulders with political heavyweights like Secretary Bruce Babbitt and Solicitor John Leshy.

A graduate of Wake Forest University, Daniel-Davis in 2001 followed Hayes to the law firm Latham & Watkins LLP and later returned to Interior to serve as Hayes' associate deputy secretary in 2009.

Elizabeth Klein, associate deputy secretary

Klein was recruited to Interior in 2010 by Hayes and Daniel-Davis after serving nearly four years at Latham & Watkins. She also spent nearly three years at the National Park Foundation, a philanthropic group, and as an assistant to Babbitt.

She's a fixture in the deputy secretary's hallway at Interior and was Hayes' right-hand aide. Aides say she has kept that wing operational since Hayes' departure. Sources expect her to stay on after the Senate confirms Michael Connor to replace Hayes, who left last summer to teach law at Stanford University.

Klein's portfolio includes multi-agency, cross-cutting issues, whether it's the Fish and Wildlife Service and Bureau of Land Management coordinating sage grouse protections or Interior's offshore bureaus writing rules for oil and gas exploration in the Arctic. Her portfolio also includes climate change adaptation and streamlining infrastructure permitting. Klein is charged with interfacing with the White House Office of Management and Budget, and she helps make sure agencies are on task with rulemaking priorities.

In 2012, she was one of two Interior staffers named to an interagency steering team to implement President Obama's executive order promoting safe development of unconventional shale gas and tight oil resources (*Greenwire*, April 13, 2012).

Nikki Buffa, deputy chief of staff for policy

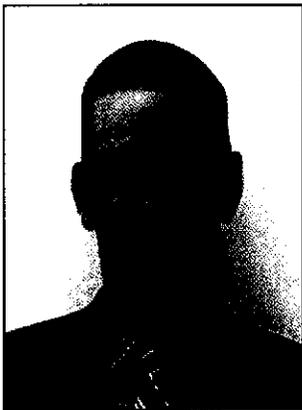

Nikki Buffa's White House connections make her a key cog in Jewell's policy agenda during President Obama's second term. Photo courtesy of Interior.

Policies rarely emerge from Interior without Buffa's stamp of approval, according to agency insiders. She came to Interior from the White House, where she worked as deputy director for Cabinet affairs under Chris Lu and helped develop and manage policy issues before EPA and the departments of the Interior, Agriculture, Energy and Transportation.

Buffa has less experience in public lands policy, but her White House connection gives her an influential role in Jewell's agenda. Another Hayes loyalist, Buffa worked about two years at Latham & Watkins at the end of the George W. Bush administration and later served at the White House Council on Environmental Quality (CEQ).

A graduate of the University of California, Los Angeles, School of Law, Buffa also served a short stint as a legal extern for the Environmental Defense Fund for course credit. Before law school, Buffa worked about five years in EPA's Pacific Southwest region as an environmental protection specialist.

Ted Boling, deputy solicitor for parks and wildlife; Jack Haugrud, deputy solicitor for energy and mineral resources

Deputy Solicitor Ted Boling could play a role in Interior's conservation of sage grouse and the siting and permitting of renewable energy. Photo courtesy of Interior.

Boling and Haugrud have their fingerprints on almost every rule or decision that leaves the secretary's desk, and their office will play an important role in Obama's second term in ensuring that regulations are legally bulletproof.

Boling was previously counselor to the assistant secretary for land and minerals management and also spent a decade as deputy general counsel at CEQ during the George W. Bush administration. He also served as a trial attorney at DOJ for much of the 1990s and as a counselor to Interior's assistant secretary for parks and wildlife at the end of the Clinton administration. This year, he could help craft policies involving sage grouse conservation, national monument designations or National Environmental

Policy Act reviews for renewable energy, among others.

Haugrud had a long career at DOJ before coming to Interior, where he's viewed as a practical, trusted legal adviser. His portfolio includes American Indian issues as well as regulations for surface mining, oil and gas royalties, offshore drilling and Arctic exploration, among other issues. "Jack is the point of the spear on natural resource law," said one former Interior aide.

Jim Lyons, counselor to the assistant secretary for land and minerals management

Jim Lyons was hired to implement Jewell's vision for landscape-scale mitigation. He spent several years in the Clinton administration conserving national forests. Photo courtesy of Lyons.

Lyons joined Interior in July after working for three years at Defenders of Wildlife promoting wildlife-friendly renewable energy on public lands. One source likened him to Interior's new Steve Black, formerly one of Salazar's top advisers on renewable energy at the agency, who now works at the law firm Bingham McCutchen LLP in San Francisco.

Lyons said he was brought in to help implement Jewell's secretarial order on landscape-scale mitigation planning, which includes working closely with her on sage grouse conservation, in addition to promoting development of commercial-scale wind, solar and geothermal on public lands. He accompanied the secretary on her trip last month to the Western Governors' Association meeting in Las Vegas, where she delivered a keynote speech on mitigation.

Lyons was a lightning rod for controversy during his time as Agriculture undersecretary for natural resources and environment during the Clinton administration, when he played a key role in the Forest Service's 2001 roadless rule and the 1994 Northwest Forest Plan, which protected the northern spotted owl from old-growth logging.

Lyons, who holds a master's degree from the Yale School of Forestry, where he still teaches part-time, began his career at the Fish and Wildlife Service and also served stints with the Society for American Foresters and as a staff member for the House Agriculture Committee.

Linda Lance, deputy director of policy and programs, BLM

Like Lyons, Lance is a relative newcomer at Interior with decades of Beltway policy experience. She was senior counsel for former Senate Energy and Natural Resources Chairman Jeff Bingaman (D-N.M.) before becoming BLM's second in command this fall. She was associate director at CEQ during the Clinton administration and a lobbyist for the Wilderness Society from 2001 to 2008.

Given her background at the Senate energy panel, it's likely Lance will carry a heavy energy workload that could involve finalizing BLM's controversial hydraulic fracturing rule as well as crafting landscape-scale mitigation plans for solar.

One source called her "a classic, quintessential Washington insider," while another said she was viewed as one of the more ideologically rigid staffers at ENR. She's described as amiable and sharp in agency meetings and is carrying a huge workload at BLM that includes being a liaison with Capitol Hill.

While at CEQ, Lance worked with then-Chairwoman Kathleen McGinty on the Clinton administration's designation of the 1.7-million-acre Grand Staircase-Escalante National Monument in Utah, a designation that incensed many Republicans.

BRIEFING MEMORANDUM FOR THE SECRETARY

INTERNAL SAGE GROUSE MEETING

DATE: January 16, 2014
LOCATION: Secretary's Office
TIME: 2:15PM – 3:00PM
FROM: James Lyons, Counselor to the A/S LM, 202-208-4318
Michael Bean, Counselor to the A/S FWS, 202-208-7400
Sarah Greenberger, Senior Advisor to the Secretary, 202-219-2140
SUBJECT: Status of Greater Sage Grouse Planning Efforts, Update on Key Activities, and Colorado Trip Background

I. PURPOSE

This memo provides an update on the status of DOI's work on the Greater Sage Grouse (GSG) conservation strategy including: (1) an update on key activities over the next 6 months; (2) BLM/FWS project management structure; and (3) progress on key issues/activities. Also included is background on the Colorado Grouse (Greater Sage Grouse, Gunnison Sage Grouse, and Lesser Prairie Chicken) in preparation for your travel to Colorado and meeting with Governor Hickenlooper next week.

II. DISCUSSION

Six Month Timetable for Key Activities

BLM (and FWS) have put together a tentative schedule of key deadlines, meetings and milestones for GSG strategy. The strategy provides a roadmap for collaboration between BLM, FWS, and USFS over the next 6 months. Revising draft BLM and FS plans will constitute the bulk of the work through June commencing with individual plan reviews/revisions leading to the roll-up of BLM/FS/state plans for each WAFWA zone to identify gaps/weaknesses (i.e., a failure to reduce substantially a COT-identified major threat to a PAC or populations) between all of the sub-regional administrative proposed plans with time to address remaining concerns before the plans are finalized. We will provide and walk through the 6-month, detailed timeline and list of key deadlines and meeting dates in the internal meeting on Thursday.

BLM/FWS Project Management Structure

BLM and FWS have reviewed and revised the management structure for their efforts to coordinate review and development of the final BLM RMPs. BLM has established a new position – National Sage Grouse Project Manager – to track and coordinate all aspects of the GSG strategy. Kathy Stangl, the project manager, will be housed in Washington DC at the MIB. FWS and FS are reviewing their current management structures to ensure that they will meet our collective needs for completing the GSG strategy.

Progress on Key Issues/Activities

Metrics for Assessing Conservation Efforts: The FWS has led an effort, in collaboration with the states, to develop a common set of metrics for measuring conservation actions in response to COT-identified threats across the range of the SGS. This becomes an important yardstick for FWS to assess conservation efforts across the 11 state range of the GSG to aid the agency in making their listing decision. It also provides an important tool for monitoring implementation of conservation commitments and evaluating the efficacy of conservation actions over time – a key to implementing the adaptive management strategy which will be a part of each GSG plan. Efforts are continuing to bring closure to this discussion and agree on the key metrics to be used. FWS is working with USGS to provide a geospatial display of the conservation efforts captured by these metrics.

In December, FWS presented a list of 35 quantitative measures that would be reported on by each state (although some measures may not be applicable to all states). These measures would serve as a common core of quantitative data, although states would be free to supplement this data with narrative explanations or additional quantitative or qualitative information.

Utah and Wyoming expressed concern that the FWS quantitative measures would be elevated in importance over other information, and requested that the metrics working group be asked to explore the Utah and Wyoming proposals in more detail. FWS expressed a willingness to continue to explore longer term monitoring and reporting measures, but for purposes of the listing decision due in 2015, it needed to bring the metrics discussion to a close soon. To that end, FWS asked to receive any suggestions to change its list by the end of this week, and stated its intention to make a decision on that list the following week.

Resolving Differences in Advice for Conservation Requirements: To ensure consistency where necessary between BLM plans and FWS comments on those plans (e.g., the “cap” on disturbance for a given area may vary, typically from 3% to 5%) a meeting is now scheduled for the “federal family” – i.e., BLM, FWS, FS GSG leadership – to meet in Portland, OR in mid-February to discuss these concerns as they relate to GSG plans in the Great Basin. A similar meeting will also be scheduled for the Rocky Mountain states.

Mitigation: Several of the states have developed sage grouse conservation plans that include a significant role for compensatory mitigation (i.e., offsetting the impacts of authorized detrimental activities by carrying out beneficial activities, usually at a different site). As previously reported, the FWS has provided to the Task Force a memo setting forth its recommendations for a general framework for compensatory mitigation for the sage grouse which was welcomed. BLM is in the process of finalizing its comments on the draft mitigation framework and working toward developing national guidance for mitigation.

Colorado Grouse (Greater sage grouse, Gunnison sage grouse, Lesser Prairie Chicken)

Colorado Grouse

Colorado has the dubious distinction of being the only state that is both in Greater sage grouse (in NW CO) and Lesser Prairie Chicken (LPC) habitat (in SE CO). It is also home to the distinct Gunnison sage grouse (in SW CO). **FWS must make final listing determinations on the Gunnison SG and the LPC by the end of March.** Below is a brief overview of the state of play on each species in Colorado.

Map of LPC habitat (including CO) and map of CO Sage Grouse Habitat (Gunnison and Greater) are attached.

Greater sage grouse: Next week you will travel with Governor Hickenlooper to visit a ranch in Northwest Colorado implementing conservation practices that benefit the Greater sage grouse. Details of that visit will follow in a separate memo. BLM manages more than 1.7 million acres of Colorado's Greater sage-grouse habitat, almost half of the entire Greater sage-grouse habitat in Colorado. Habitat fragmentation resulting primarily from infrastructure related to energy development and urbanization poses the primary threat to the bird.

State Strategy: Colorado has spent \$40 million on sage grouse conservation efforts and implemented a significant easement acquisition effort, protecting over 74,000 acres and is protecting additional acres through other means. The State wildlife agency has strong conservation recommendations to the oil and gas commission, but they are advisory and there is no data to show whether those recommendations have been followed. The state has begun that an assessment and expects to have the results in the next few months.

Status of BLM planning effort: The BLM/FS published their Draft Northwest Colorado RMP/EIS on August 16, 2013. The comment period closed December 2. On November 26, after a town hall meeting in northwest Colorado, the Governor's office asked for more time to submit state comments. Because BLM regulations allow for it, BLM agreed.

Overview FWS Comments on BLM plan: The FWS submitted comments on the BLM/FS draft plan on December 2 that questioned BLM's selection of a 5% versus 3% disturbance cap, the scope of the exemption process from that cap, and the manner in which mitigation was counted under that cap among other issues.

State Comments/Alternative: On January 14 (yesterday), Governor Hickenlooper's office submitted a four page letter with their comments calling them the "state alternative" along with much more detailed comments from Colorado Parks and Wildlife (CPW). The Governor's letter says it "serves as the Colorado state alternative," however, the letter addresses very few of the issues in the PRMP/DEIS, and provides little detail on the issues that it does address. More significantly, however, the Governor's letter is hard to reconcile with accompanying CPW comments. The discrepancies among the two are particularly evident with respect to the issue of disturbance caps. The Governor's letter describes disturbance caps as "one of the most troubling tools being proposed in the PRMP" and urges BLM "to reconsider the use of disturbance caps unless they can be implemented with site-specific flexibility." In contrast, although the comments from CPW note that disturbance caps are largely untested, they go on to say that a

“3% disturbance cap is more scientifically defensible than a 5% limit,” and discuss published studies that “lend support to a disturbance cap less than 5%.” Moreover, CPW states that it is “concerned about the potential unlimited use of exceptions to the disturbance cap,” noting that “oil and gas operators have the ability to request unlimited exceptions to the cap, effectively rendering the cap meaningless.”

In general, the CPW comments strike a more cautious tone than is reflected in the Governor’s letter. For example, CPW asserts that BLM’s proposed “required design features” and “preferred design features” are not “sufficient to mitigate indirect effects. The Governor’s letter makes no mention of this. Similarly, the CPW comments urge BLM to “apply increased protection to existing leases,” whereas the Governor’s letter warns that measures that impact valid existing leases are “a clear violation of property rights.”

DOI will have to work with the state to reconcile these documents.

Gunnison sage grouse: The Fish and Wildlife Service proposed to list the Gunnison sage grouse as endangered in January of 2013. Due to the MDL settlement agreement, the final listing determination is due by the end of March of this year. The FWS proposal to list the species as endangered was based on an analysis of the threats contributing to the species’ decline across much of its range including: loss or fragmentation of habitat; lack of linkages or habitat connectivity between populations; invasive weeds; small populations; and the potential for disease, fire, or development to drastically affect an individual population’s viability.

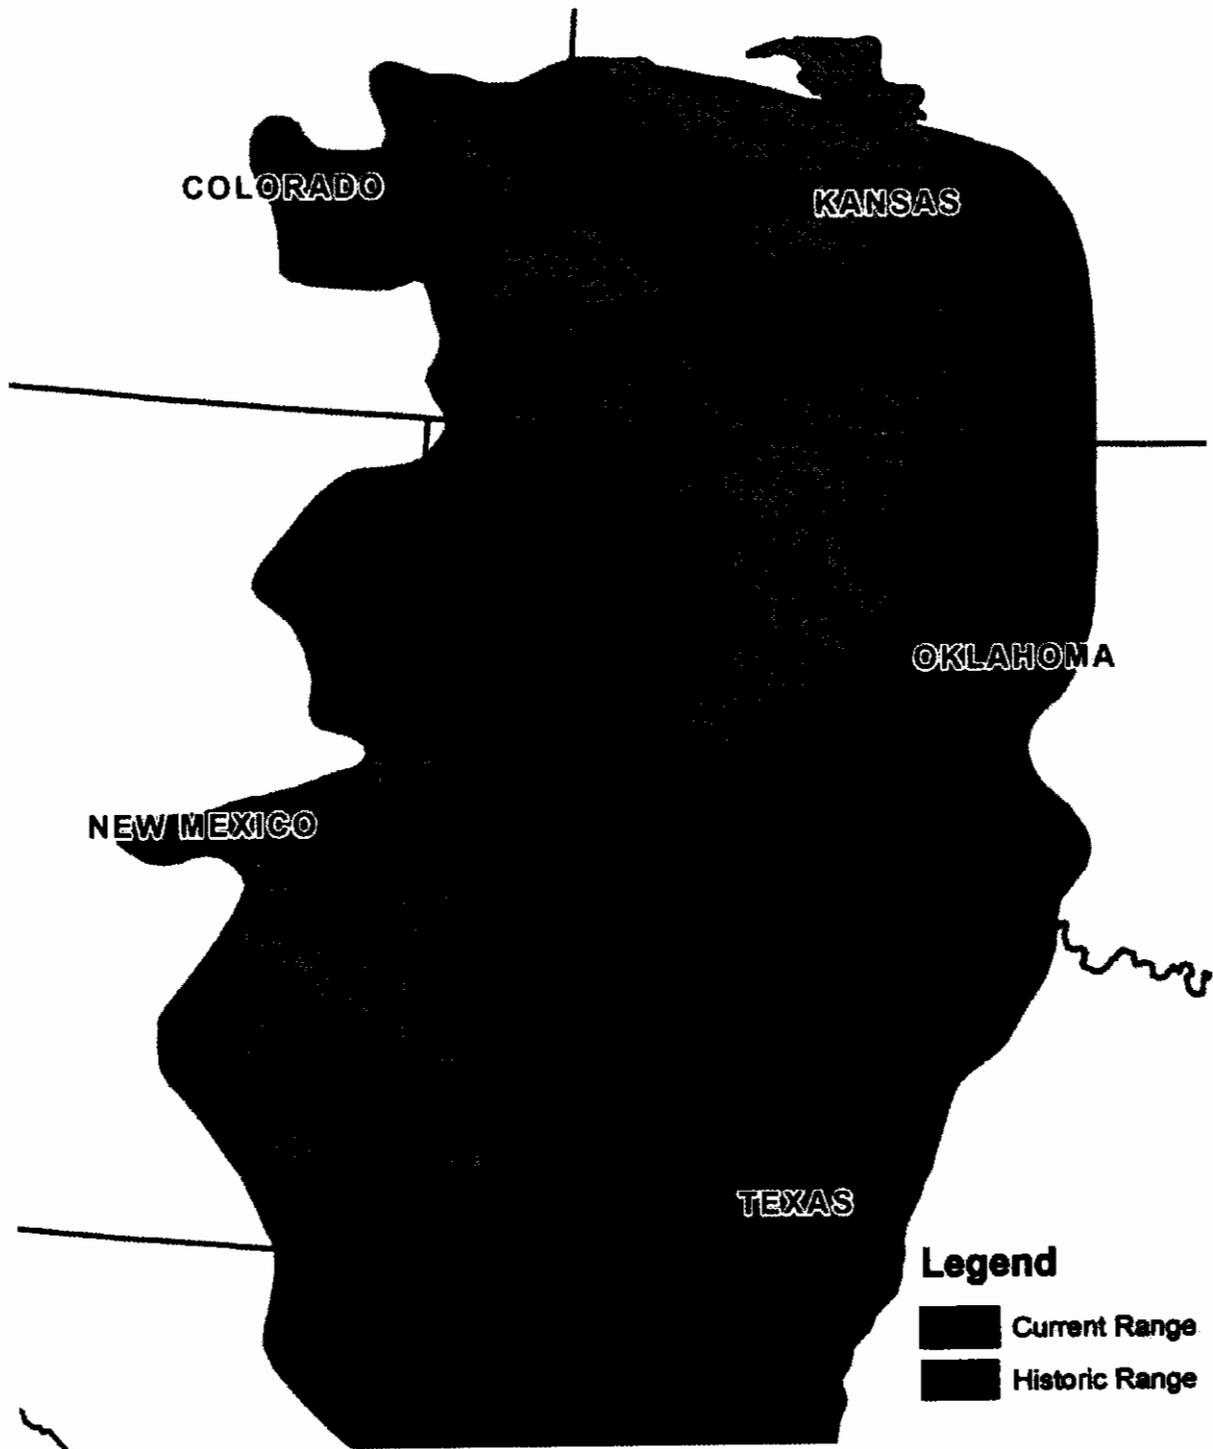

Since the proposed rule was published in January 2013, the Service has received and continues to receive substantive comments and information regarding the status of the species and the threats to it and its habitat that are relevant to the Service’s final determination of whether the species is endangered, threatened, or neither. The Service is currently reviewing these comments and information to inform its final analysis and listing decision.

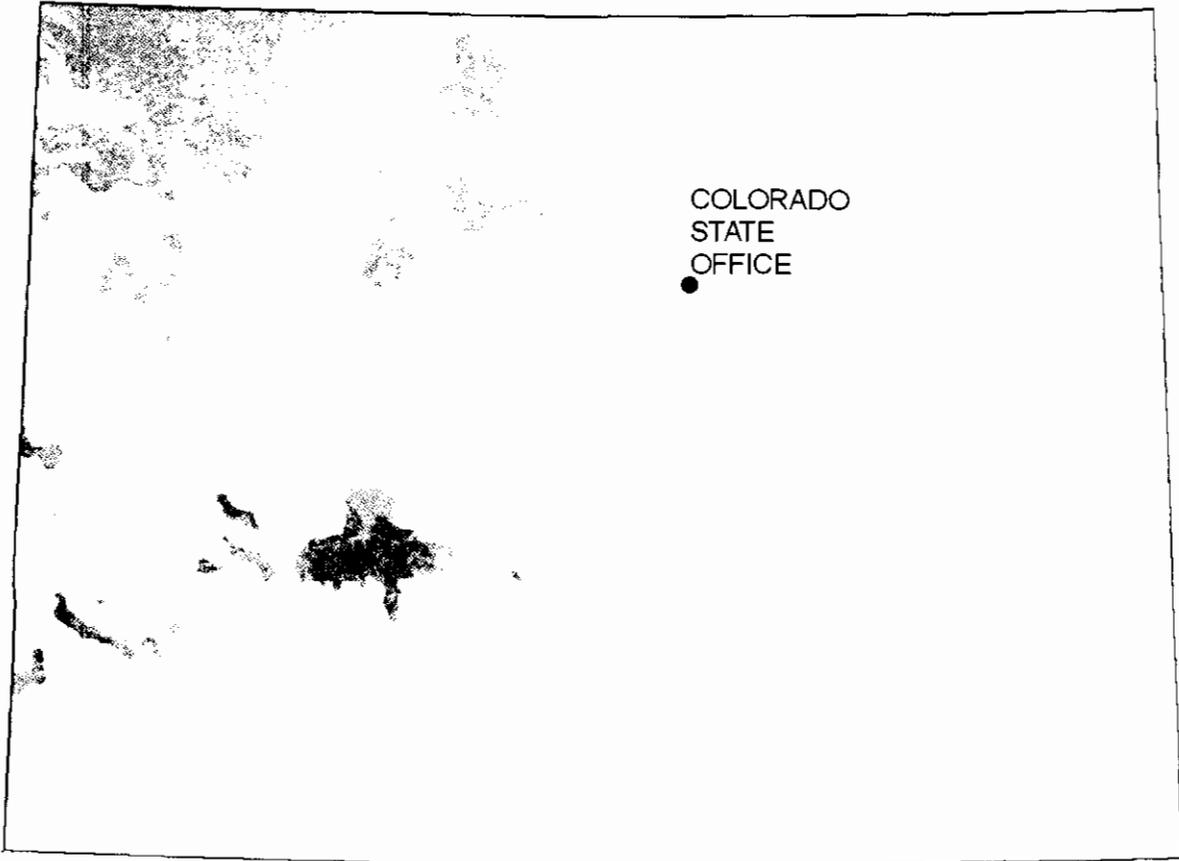

There is extreme frustration in the state about the listing proposal because Gunnison County has developed and implemented a conservation plan that FWS considers to be a good start. All agree that threats in the Gunnison Basin have been effectively ameliorated are no additional actions landowners in that county should be taking. The FWS must take into account, however, the failure of other counties to implement similar plans that would protect the species range-wide. Local frustration is in part what led the Governor to invite you to see firsthand the good work ranchers in the state are doing on the ground because in their eyes the FWS may not be taking that work sufficiently into account.

Lesser Prairie Chicken: The FWS has proposed to list the LPC as threatened with a final listing decision due THIS MARCH. The FWS has also proposed a special 4(d) management rule based on a five state conservation plan developed by the Western Association of Fish of Wildlife Agencies. There is only a small population of LPC in Colorado and in a small corner of the state. The potential for land use conflicts is also less significant than for the grouse.

4.
INTERIOR:

Jewell keeps battle-tested Beltway insiders close at hand

Phil Taylor and Robin Bravender, E&E reporters

Published: Tuesday, January 14, 2014

Second in a series.

Interior Secretary Sally Jewell's office looks a lot like her predecessor's.

Unlike many department heads who fill their offices with their confidants and former colleagues, Jewell's staff is still packed with holdovers from former Secretary Ken Salazar. That's likely in part to help guide the Washington outsider and keep continuity as the agency seeks to continue its broad expansion of renewable energy, oil and gas development and conservation on public lands in the Obama administration's second term.

SPECIAL REPORT

In this series, E&E pulls back the curtain for a look at key agency staffers.

Her staff have plenty of congressional and policy chops to help her navigate the terrain and complement the business savvy that the former REI executive brings to the table.

While the Interior Department's geographical footprint is broad -- it controls one-fifth of the U.S. landmass and essentially all of its oceans -- policy decisions radiate from Interior headquarters at 1849 C Street N.W. in Washington, D.C.

Here's a look at some of the behind-the-scenes players helping to guide Interior's policies on everything from landscape-scale mitigation to hydraulic fracturing and oil and gas exploration in the Arctic.

Laura Daniel-Davis, chief of staff

As chief of staff to the Interior secretary, Laura Daniel-Davis sits in on almost every important policy meeting. Photo courtesy of Interior.

Daniel-Davis is a Washington, D.C., native but came to Interior

after working as a top aide to then-Rep. Mark Udall (D-Colo.). She was Salazar's deputy chief of staff until early 2011, when she replaced outgoing Chief of Staff Tom Strickland. Daniel-Davis was critical in Jewell's transition and helped hire new staff, and people close to the agency say her keen political sense supplements Jewell's business background.

The chief of staff wields significant power at Interior, sitting in on almost every policy discussion Jewell has with her deputies in D.C. and beyond. "Inevitably, they make or break what you want to do," a former Interior official said.

Daniel-Davis is described as having gravitas. She worked under former Deputy Secretary David Hayes during the Clinton administration, rubbing shoulders with political heavyweights like Secretary Bruce Babbitt and Solicitor John Leshy.

A graduate of Wake Forest University, Daniel-Davis in 2001 followed Hayes to the law firm Latham & Watkins LLP and later returned to Interior to serve as Hayes' associate deputy secretary in 2009.

Elizabeth Klein, associate deputy secretary

Klein was recruited to Interior in 2010 by Hayes and Daniel-Davis after serving nearly four years at Latham & Watkins. She also spent nearly three years at the National Park Foundation, a philanthropic group, and as an assistant to Babbitt.

She's a fixture in the deputy secretary's hallway at Interior and was Hayes' right-hand aide. Aides say she has kept that wing operational since Hayes' departure. Sources expect her to stay on after the Senate confirms Michael Connor to replace Hayes, who left last summer to teach law at Stanford University.

Klein's portfolio includes multi-agency, cross-cutting issues, whether it's the Fish and Wildlife Service and Bureau of Land Management coordinating sage grouse protections or Interior's offshore bureaus writing rules for oil and gas exploration in the Arctic. Her portfolio also includes climate change adaptation and streamlining infrastructure permitting. Klein is charged with interfacing with the White House Office of Management and Budget, and she helps make sure agencies are on task with rulemaking priorities.

In 2012, she was one of two Interior staffers named to an interagency steering team to implement President Obama's executive order promoting safe development of unconventional shale gas and tight oil resources (*Greenwire*, April 13, 2012).

Nikki Buffa, deputy chief of staff for policy

Nikki Buffa's White House connections make her a key cog in Jewell's policy agenda during President Obama's second term. Photo courtesy of Interior.

Policies rarely emerge from Interior without Buffa's stamp of approval, according to agency insiders. She came to Interior from the White House, where she worked as deputy director for Cabinet affairs under Chris Lu and helped develop and manage policy issues before EPA and the departments of the Interior, Agriculture, Energy and Transportation.

Buffa has less experience in public lands policy, but her White House connection gives her an influential role in Jewell's agenda. Another Hayes loyalist, Buffa worked about two years at Latham & Watkins at the end of the George W. Bush administration and later served at the White House Council on Environmental Quality (CEQ).

A graduate of the University of California, Los Angeles, School of Law, Buffa also served a short stint as a legal extern for the Environmental Defense Fund for course credit. Before law school, Buffa worked about five years in EPA's Pacific Southwest region as an environmental protection specialist.

**Ted Boling, deputy solicitor for parks and wildlife;
Jack Haugrud, deputy solicitor for energy and mineral
resources**

Deputy Solicitor Ted Boling could play a role in Interior's conservation of sage grouse and the siting and permitting of renewable energy. Photo courtesy of Interior.

Boling and Haugrud have their fingerprints on almost every rule or decision that leaves the secretary's desk, and their office will

play an important role in Obama's second term in ensuring that regulations are legally bulletproof.

Boling was previously counselor to the assistant secretary for land and minerals management and also spent a decade as deputy general counsel at CEQ during the George W. Bush administration. He also served as a trial attorney at DOJ for much of the 1990s and as a counselor to Interior's assistant secretary for parks and wildlife at the end of the Clinton administration. This year, he could help craft policies involving sage grouse conservation, national monument designations or National Environmental Policy Act reviews for renewable energy, among others.

Haugrud had a long career at DOJ before coming to Interior, where he's viewed as a practical, trusted legal adviser. His portfolio includes American Indian issues as well as regulations for surface mining, oil and gas royalties, offshore drilling and Arctic exploration, among other issues. "Jack is the point of the spear on natural resource law," said one former Interior aide.

Jim Lyons, counselor to the assistant secretary for land and minerals management

Jim Lyons was hired to implement Jewell's vision for landscape-scale mitigation. He spent several years in the Clinton administration conserving national forests. Photo courtesy of Lyons.

Lyons joined Interior in July after working for three years at Defenders of Wildlife promoting wildlife-friendly renewable energy on public lands. One source likened him to Interior's new Steve Black, formerly one of Salazar's top advisers on renewable energy at the agency, who now works at the law firm Bingham McCutchen LLP in San Francisco.

Lyons said he was brought in to help implement Jewell's secretarial order on landscape-scale mitigation planning, which includes working closely with her on sage grouse conservation, in addition to promoting development of commercial-scale wind, solar and geothermal on public lands. He accompanied the secretary on her trip last month to the Western Governors' Association meeting in Las Vegas, where she delivered a keynote

speech on mitigation.

Lyons was a lightning rod for controversy during his time as Agriculture undersecretary for natural resources and environment during the Clinton administration, when he played a key role in the Forest Service's 2001 roadless rule and the 1994 Northwest Forest Plan, which protected the northern spotted owl from old-growth logging.

Lyons, who holds a master's degree from the Yale School of Forestry, where he still teaches part-time, began his career at the Fish and Wildlife Service and also served stints with the Society for American Foresters and as a staff member for the House Agriculture Committee.

Linda Lance, deputy director of policy and programs, BLM

Like Lyons, Lance is a relative newcomer at Interior with decades of Beltway policy experience. She was senior counsel for former Senate Energy and Natural Resources Chairman Jeff Bingaman (D-N.M.) before becoming BLM's second in command this fall. She was associate director at CEQ during the Clinton administration and a lobbyist for the Wilderness Society from 2001 to 2008.

Given her background at the Senate energy panel, it's likely Lance will carry a heavy energy workload that could involve finalizing BLM's controversial hydraulic fracturing rule as well as crafting landscape-scale mitigation plans for solar.

One source called her "a classic, quintessential Washington insider," while another said she was viewed as one of the more ideologically rigid staffers at ENR. She's described as amiable and sharp in agency meetings and is carrying a huge workload at BLM that includes being a liaison with Capitol Hill.

While at CEQ, Lance worked with then-Chairwoman Kathleen McGinty on the Clinton administration's designation of the 1.7-million-acre Grand Staircase-Escalante National Monument in Utah, a designation that incensed many Republicans.

DOI in the News:

CONTINUING COVERAGE: PILT PROGRAM LEFT UNFUNDED IN BUDGET BILL. [Politico](#) (1/16, Hopkinson, 464K) reports that House Republican leaders are trying "to use the farm bill" to fund the PILT program.

Also, the [Steamboat \(CO\) Pilot & Today](#) (1/15, 30K) notes that Sens. Mark Udall and Michael Bennet have introduced a new bill to permanently fund PILT. Udall said, "The PILT program is essential for rural communities and counties near Colorado's public lands. Although these stunning natural resources attract tourists and support

Main Street businesses, these lands do not directly contribute to the local tax base."

Meanwhile, the Ogden (UT) Standard-Examiner (1/15, 147K) reports that "although Davis County has little in the way of public lands, its county leaders have jumped head first into a fray with Washington officials when it comes to counties continuing to receive the benefit of the Payment In Lieu of Taxes program." The Davis County Commission on Tuesday "approved a letter requesting the House and Senate Appropriations committees fully support the PILT program, which provides critical funding to nearly 1,900 counties in 49 states and three US territories."

The Canon City (CO) Daily Record (1/16, 22K) reports that "more than \$1 million could be diminished from Fremont County's General Fund if legislation isn't soon passed to restore" the PILT program.

New York Senators Laud Funds For Stream Gauges. The Washington Times (1/16, 417K) reports that "New York's senators say \$33.7 million for the national stream gauge network is included in the appropriations before Congress this week." Sens. Charles Schumer and Kirsten Gillibrand say "the \$6 million increase in funding will help strengthen stream gauges in upstate New York that provide flood warnings during extreme weather." The lawmakers say the money will help the USGS "keep existing gauges online and allow the USGS to add more gauges in high-risk flood zones in upstate New York."

Bill Funds Land And Water Conservation Fund. The Seattle Post-Intelligencer (1/15, 768K) reports that the Land and Water Conservation Fund has "survived Congress' budget battles, and is funded to the tune of \$306 million in a \$1.1 trillion omnibus appropriations bill which passed the House of Representatives on a 359-67 vote late Wednesday."

Bill Includes \$452 Million For Fuels Reduction. The Bend (OR) Bulletin (1/16, 94K) reports that "federal hazardous fuels reduction efforts will receive \$150 million more than the Obama administration requested for 2014 in the \$1.1 trillion spending bill that Congress is poised to pass this week." The budget for hazardous fuel reduction was "set at \$452 million." According to the article, "between the Department of Agriculture, which includes the Forest Service, and the Department of the Interior, the budget contains \$3.9 billion in wildfire suppression and prevention."

Bill Includes \$18.5 Million To Replace Beatrice Rafferty School. The Bangor (ME) Daily News (1/15, 166K) reports that "the omnibus budget bill passed in the House of Representatives that same afternoon included funding to replace the Beatrice Rafferty School." The legislation "includes funding for just one Bureau of Indian Education School in the entire country." according to a Pingree spokesman, "the amount of the appropriation will be \$18.5 million," which will "fully fund the project."

White House: Climate Agenda Intact In Spending Bill. Bloomberg News (1/15, Adragna, 1.91M) reports White House Assistant Press Secretary Matt Lehigh said in a statement that "some limited environmental riders were included" in the fiscal year 2014 appropriations bill, but "our ability to continue to move our environment and climate agenda forward is very much intact." Provisions on emissions standards were excluded, as were riders that would have undercut energy efficiency standards. The bill still limits the power of the Export-Import Bank and the Overseas Private Investment Corporation to prohibit funding for overseas coal plants. It also requires "the White House to file a report to Congress outlining federal spending on climate change programs," and prohibits "the EPA from using appropriated funding to promulgate regulations requiring the issuance of permits under Title V of the Clean Air Act."

Republicans Slammed For Export-Import Bank Provision. Bloomberg News (1/15, Flavelle, 1.91M) criticizes Republicans for including the Export-Import Bank provision, which will require the bank to consider applications for funding from middle-income countries, in addition to the poorest countries and those implementing carbon-capture technology. It predicts that the move will inhibit the development of the technology, because plants will be now able to obtain US funding without using it. This shows that the "Republican insistence on global action as a precursor to U.S." emissions reductions measures is a "ruse," because this spending bill provision will deprive the US of an opportunity to curb overseas emissions, writes Bloomberg News.

SECRETARY JEWELL RECEIVES AWARD FROM OUTDOOR INDUSTRY WOMEN'S COALITION. The Outdoor USA Magazine (1/16) reports that the Outdoor Industry Women's Coalition (OIWC) has announced the

winners of its 2014 Pioneering Woman and First Ascent Awards. Interior Secretary Sally Jewell has won the Pioneering Women Award. Jewell will be honored at the OIWC Keynote and Awards Presentation at Outdoor Retailer Winter Market.

Also reporting on the story is the [SportsOneSource](#) (1/16, 71).

INTERIOR ANNOUNCES TWO MEMBERS FOR COBELL SCHOLARSHIP BOARD. The [Indianz](#) (1/16) reports that the Interior Department has picked "its two members for the board that will oversee the scholarship fund that was created by the \$3.4 billion Cobell trust fund settlement." According to the article, "Jean O'Brien (White Earth Ojibwe) of the University of Minnesota and Pam Agoyo (Kewa / Cochiti / Ohkay Owingeh) of the University of New Mexico will serve on the five-member board." Interior Secretary Sally Jewell said, "It is with great pleasure that I announce the selection of these two outstanding educational leaders whose accomplishments have opened the doors of higher education to all American Indians and Alaska Natives. Their experience and expertise will be exceptionally valuable to the Board of Trustees as the scholarship fund helps students across Indian Country access the higher education they need to succeed in today's world. The fund will help strengthen Indian communities, advance tribal progress and secure a better future for Native Americans, honoring Eloise Cobell's vision and perseverance."

SECRETARY JEWELL TO PRESENT CONSERVATION AWARD TO SUU'S IIC. The [Southern Utah News](#) (1/15) reports that Southern Utah University's Intergovernmental Internship Cooperative program has been "recognized as one of the top three conservation programs in the country." Interior Secretary Sally Jewell will "present the Partners in Conservation Award to Briget Eastep, director of the Harry Reid Outdoor Engagement Center, and Seth Ohms, IIC coordinator, in Washington, D.C. today."

SEN. BEGICH INTRODUCES IZEMBEK ROAD BILL. The [Alaska Public Radio Network](#) (1/15, 2K) reports that Sen. Mark Begich has introduced legislation "to allow a road from King Cove to Cold Bay, just weeks after Interior Secretary Sally Jewell rejected the idea because it would run through a wildlife refuge." Begich says he chose "one of the options scrutinized in a recent environmental assessment."

The [Ketchikan \(AK\) SitNews](#) (1/16) reports that "King Cove Tribal and Community leaders are praising the introduction of legislation." King Cove Mayor Henry Mack said, "We are very grateful to Senator Begich, Senator Murkowski, Congressman Young and Governor Parnell for their continued commitment to fight for the people of King Cove. Protecting the lives of our elders, children and everyone else in our community so we have safe, reliable access to the Cold Bay Airport for health and quality-of-life reasons have always been at the heart of this matter. We don't want to see any further loss of life or tragedy because of extreme weather conditions standing in the way of critically-needed health care."

The [Fairbanks \(AK\) News-Miner](#) (1/16, 44K), Frank Murkowski criticizes the decision "to deny to the people of King Cove road access to the all-weather Cold Bay airport" as "outrageous." According to Murkowski, Interior has "chosen to disregard the fundamental right of access to this small group of mostly Alaska Natives."

REP. HASTINGS TO PRESS PROBE OF WILDLIFE POLICIES, SECURE RURAL SCHOOLS, STREAM PROTECTION RULE. The [Environment & Energy Publishing](#) (1/16, 705) reports that House Natural Resources Chairman Doc Hastings will "seek subpoena authority to investigate the Obama administration's implementation of wildlife protection laws as well as 'apparent conflicts of interest' by current and former Interior Department employees, according to a subpoena motion the committee released today." Hastings will also "seek subpoena authority to compel additional documents and testimony from Obama officials on their implementation of the Secure Rural Schools program and revisions to a stream protection rule."

CONNECTICUT RIVER TO REMAIN NATION'S ONLY BLUEWAY. The [Greenfield \(MA\) Reporter](#) (1/16, 666) reports that "it appears the Connecticut River will enjoy the distinction of being the only federally designated 'National Blueways' river." The Blueways program "came undone earlier this month because of a controversy that erupted over the 700-mile long White River through Arkansas and Missouri." The Connecticut River Watershed Council says "now the nation's only 'National Blueway,' will continue to 'carry on that idea that protecting watersheds creates viable economies and sustainable environments.'"

TEXAS TECH CLIMATE RESEARCH PROJECTS RECEIVE \$157,000 IN FEDERAL FUNDING. The [Lubbock](#)

(TX) Avalanche-Journal (1/15, 160K) reports that "two Texas Tech research projects will receive \$157,000 in funding from the US Department of the Interior's South Central Climate Science Center." Dylan Schwilk, an associate professor in the Department of Biological Sciences, will "receive \$99,937 for his two-year project that investigates how different tree species survive in semi-arid landscapes." According to the article, "Schwilk will work with Anne Stoner, a postdoctoral researcher, who herself received \$56,700 for a year-long project examining how to downscale climate projection models so local impact can be assessed."

INTERIOR OFFICIAL TO LEAD NOAA'S FISHERIES SERVICE. The Environment & Energy Publishing (1/16, 705) reports that Eileen Sobeck, currently the acting assistant secretary of Interior's Office of Insular Affairs, will join the National Oceanic and Atmospheric Administration as the assistant administrator of the National Marine Fisheries Service on Jan. 27. Sobeck will "take over for Samuel Rauch, who has been the acting assistant administrator of NMFS since 2012."

SOME SUBMERGED LANDS TO BE RETURNED TO COMMONWEALTH OF THE NORTHERN MARIANA ISLANDS. The Pacific (GUM) Daily News (1/16, 61K) reports that the Interior Department has announced that "some submerged lands will be returned to a neighboring island after being occupied by the federal government for years." President Barack Obama "signed a proclamation to go into effect on Jan. 16 stating the Commonwealth of the Northern Mariana Islands will 'receive title to submerged lands extending three geographical miles seaward from the islands' coasts.'" Acting Assistant Secretary for Insular Affairs Eileen Sobeck said, "The conveyance reflects this administration's longstanding, strong support for granting the CNMI rights similar to those accorded other territories for their surrounding submerged lands. We have also consulted extensively with CNMI leaders and gained an understanding regarding the need for a protective management plan for the submerged lands off military-use islands and in the national marine monument."

GOVGUAM RECEIVES 2.81 PERFORMETER SCORE. The Pacific News Center (1/16) reports that "GovGuam has received a score of 2.81 on the most recent Performeter score released by the Office of Public Accountability." The score "remains Guam's highest score in eight years, but it is still the lowest score among the eight insular areas analyzed." The article notes that "the analysis was conducted by Crawford & Associates for the US Department of the Interior, Office of Insular Affairs [DOIOIA]."

CHAMBER CALLS FOR ENERGY REFORM. The Rigzone (1/16, Boman, 12K) reports the U.S. Chamber of Commerce's Institute for 21st Century Energy revealed its new Energy Works for U.S. platform, which updates "its 2008 Blueprint for Securing America's Energy Future, to reflect the current boom in unconventional oil and gas exploration in the United States." In its recommendations, the institute called for the Interior Department to "propose a new plan for the Outer Continental Shelf (OCS) that would open the eastern Gulf of Mexico, Atlantic and Pacific oceans to leasing and exploration and make significantly more onshore federal lands available for energy development." It also urged Congress to "provide a 37.5 percent share of royalty revenues from all new production on the OCS to the states adjacent to development areas." The institute also called for the BLM to "delay finalizing a proposed rule for hydraulic fracturing on federal lands until BLM works with state and industry officials to ensure a future rule addresses an existing regulatory gap, and not just to demonstrate its ability to regulate."

The Upstream Online (1/16, 20K) reports the Chamber said that "oil and gas production 'faces barriers that are holding back its full potential, costing America jobs and government revenue," so "the presumed 'era of energy abundance' is thus 'far from a foregone conclusion.'" The Chamber calls for the Interior Department to allow oil and gas developers greater access to Federal lands, avoiding rules on hydraulic fracturing, and not imposing "punitive taxes' on the oil and natural gas industry."

CONGRESS URGED TO REAUTHORIZE LAND AND WATER CONSERVATION FUND. For "The Blog" of the Huffington Post (1/16, Wilkes, 11.54M), Brent Wilkes, LULAC National Executive Director and Jose Calderon, President of the Hispanic Federation, urges Congress to put Land and Water Conservation Fund "reauthorization and full funding high on the agenda for 2014." According to the authors, "for the Latino community, LWCF is critical in the fight to eliminate childhood obesity." They conclude that "reauthorization and full funding of the Land and Water Conservation Fund will be a step forward for our families and our communities."

ENERGY BOOM SEEN AS AMAZING STORY. In his column for the Washington Post (1/16, 4.28M), David Ignatius writes of the "amazing fact" that "on nearly every front, America's energy prospects have improved in

ways that would have been unimaginable just a decade ago." He says that President Obama's "all of the above" strategy is "actually happening." The changing "energy picture" was "summarized for me recently by Energy Secretary Ernest Moniz." Ignatius went on to say "I'd worry that Moniz was just blowing smoke, but he backed up his claims with extensive statistics." After reviewing the gains, Ignatius says it is an "almost ridiculously upbeat story."

America's Great Outdoors:

National Park Service:

DRAKE'S BAY OYSTER FARM TO ASK SUPREME COURT TO TAKE UP APPEAL. The San Jose (CA) Mercury News (1/16, 731K) reports that Drakes Bay Oyster Co, owner Kevin Lunny says "he'll ask the US Supreme Court to hear his case challenging a federal decision not to renew the facility's lease." Lunny said "he remains committed to his fight."

The San Francisco Examiner (1/16, 412K) reports that "the appeals court has allowed the farm to continue operating during its appeal, but after Tuesday's order takes effect, the farm would need a new stay from either the 9th Circuit or the Supreme Court to remain open while the high court decides whether to take up the case."

AP coverage was also picked up by Yahoo! (1/16, 17.91M), ABC News (1/16, 3.68M), the Minneapolis Star Tribune (1/16, 1.14M), the Washington Times (1/16, 417K), the Boston Herald (1/16, 643K), and the Eureka (CA) Times Standard (1/16, 76K).

GREAT SMOKY MOUNTAINS NATIONAL PARK RANGERS SEARCHING FOR WANTED MAN. The Knoxville (TN) News Sentinel (1/15, 366K) reports that Great Smoky Mountains National Park Rangers are searching for a Sevierville, TN man wanted in connection to a first degree murder charge in Pinellas County, FL where authorities have issued a warrant for his arrest. According to the park, "James Quilliams may have been left near Gatlinburg early Wednesday by a woman companion who was arrested on a DUI charge about 6:45 a.m. by Pigeon Forge police." According to park authorities, "Quilliams is not thought to be a threat to the public or park employees because he has shown no threatening behavior."

Also reporting on the story are the Maryville (TN) Daily Times (1/16, 64K) and the Sevierville (TN) Mountain Press (1/16, 28K).

NPS SEEKS TO KILL 100 DEER IN ROCK CREEK PARK. The Georgetown (DC) Patch (1/16, 1K) reports that the NPS "launched another round of deer reduction in Rock Creek Park at the start of this month." According to the article, "periodic killings of White-tailed deer in the park are expected to continue until March 31." Tara Morrison, superintendent of Rock Creek park, said that "the goal of the 'lethal reduction efforts' is to reduce the population by 100 deer by the end of March."

Also reporting on the story is WAMU-FM Washington (1/16, 36K).

NPS TO HOLD PUBLIC MEETINGS ON OZARKS RIVERWAYS PLAN. The Washington Times (1/16, 417K) reports that "a series of public meetings on the National Park Service's proposed management plan for the Ozarks National Scenic Riverways in southern Missouri begins Thursday in Eminence."

Also reporting on the story is the Springfield (MO) News-Leader (1/16, 27K).

EVERGLADES SEEKS ART FOR VISITORS CENTER DISPLAY. The Washington Times (1/16, 417K) reports that "artists can apply to have their work on display at the visitor's center at Everglades National Park." The park "announced Tuesday that artists – especially local, amateur artists – can submit their applications by March 31." Superintendent Dan Kimball says "the mission of the gallery is for visitors to leave 'feeling inspired to explore the Everglades and wanting to help protect this fragile place.'"

GRAND TETON NATIONAL PARK RECEIVING COMMENTS ON MOOSE-WILSON ROAD. The Washington Times (1/16, 417K) reports that Grand Teton National Park officials are receiving "lots of opinions as they study

the future of the Moose-Wilson Road." Teton County commissioners "want a bicycle path to be built along the 7-mile road." However, "park officials are concerned that quick, silent cyclists could trigger an attack by the increasing number of grizzly bears there."

NEW CLIMBING PLAN APPROVED AT ARCHES NATIONAL PARK. The Deseret (UT) News (1/16, 274K) reports that the NPS "recently approved a climbing and canyoneering management plan for Arches National Park." The agency "reached the decision last month after review of the environmental impact analysis and consideration of public comments on the environmental assessment released in June 2013." According to the article, "canyoneering and rock climbing activities in Arches National Park will be actively managed and monitored to maintain desired resource and visitor experience conditions."

Bureau of Land Management:

GOV. HICKENLOOPER URGES CONSIDERATION OF LOCAL SAGE-GROUSE ALTERNATIVE. The Glenwood Springs (CO) Post Independent (1/16, 27K) reports that Colorado Gov. John Hickenlooper is urging the BLM "to consider a state alternative as the agency prepares its final plan for managing the greater sage-grouse on federal lands in northwestern Colorado." In a letter sent Tuesday to BLM Northwest District Manager Jim Cagney, Hickenlooper "stressed the adoption of a plan that 'both safeguards the economic engine of northwestern Colorado and protects the greater sage-grouse sufficiently to preclude a listing under the Endangered Species Act by the US Fish and Wildlife Service.'" Hickenlooper said "such an alternative has been offered by local governments in the region, along with input from energy, ranching and conservation interests."

OFFICIALS SAY PREFERRED SAGE GROUSE PLANS WOULDN'T CLOSE IDAHO GRAZING. The Salem (OR) Capital Press (1/15, 113K) reports that "no allotments in Idaho or southeast Montana would be closed to grazing under the two preferred land management alternatives being considered to protect declining sage grouse populations, federal land managers said during a Jan. 13 public meeting." The BLM and the US Forest Service are "updating about 120 land management plans throughout 11 western states to better protect sage grouse."

OREGON RANCHERS CONCERNED OVER SAGE GROUSE CONSERVATION PLANS. The Oregon Public Broadcasting (1/16, 4K) reports that "in response to dwindling greater sage grouse populations in the western United States," the BLM has "announced an initiative across ten states to increase numbers of the species." However, "while many conservation groups are pleased with the BLM's initiative, cattle ranchers who make use of public grazing lands are less enthused." Groups like the Oregon Cattlemen's Association claim "that, while only a very small number of ranchers will be affected by the changes, those that use the lands will be devastated."

COYOTE KILLING COMPETITION PLANNED IN OREGON. The Washington Times (1/16, 417K) reports that "a coyote killing contest is scheduled this weekend in Eastern Oregon." The article notes that "the event near Burns is called the JMK Coyote Hunt, and this year's event is the eighth." Organizer Duane Freilino says "the contest will begin and end on private property, but where hunters go to kill coyotes is up to them." The BLM said "such a commercial event would need a permit to be on land the agency manages." However, spokeswoman Tara Martinak said the bureau "hadn't been aware of Freilino's hunt, nor of a similar hunt last month sponsored by the Harney County chapter of the Oregon Hunters Association."

AP coverage was also picked up by the Everett (WA) Herald (1/15, 152K).

HOMELAND SECURITY HAS LENT BORDER DRONES TO OTHER AGENCIES. WTVQ-TV Lexington, KY (1/16, 975) reports that "government records show that the US Homeland Security Department has lent its border drones to other state, local and federal agencies nearly 700 times in the past three years." according to the Electronic Frontier Foundation, "Customs and Border Protection flew its 10 drones 687 times for agencies including the Bureau of Land Management, the Navy and Coast Guard and local law enforcement agencies."

ADDITIONAL COVERAGE OF LAWSUIT AGAINST BLM OVER WILD HORSES. Additional coverage of the lawsuit filed by the Nevada Association of Counties and the Nevada Farm Bureau Federation over wild horse management policies was provided by the Southwest Farm Press (1/16, 86K) reports,

Fish and Wildlife Service:

HUNTER WHO WON PERMIT TO KILL RARE RHINO TO “CONSIDER ALL SIDES.” [Yahoo!](#) (1/16, Tucker, 17.91M) reports that “the hunter who placed the winning bid of \$350,000 for the right to kill one of Namibia’s 1,800 remaining black rhinos has taken to Facebook to let people know he is ‘considering all sides and concerns involved in this unique situation.’” Corey Knowlton has “asked that people don’t rush to judgment after he won an auction for the hunting permit on Saturday at the Dallas Safari Club.” Knowlton wrote, “I deeply care about all of the inhabitants of this planet and I am looking forward to more educated discussion regarding the ongoing conservation effort for the Black Rhino.”

CONSTRUCTION FOR KENAI NATIONAL WILDLIFE REFUGE VISITOR CENTER ON SCHEDULE. The [Homer \(AK\) News](#) (1/15, 9K) reports that “despite an interruption from nature, construction for the new \$6 million Kenai National Wildlife Refuge Visitor Center in Soldotna is on schedule with the completion date set for the end of September.” The article notes that “a bald eagle nesting in the project area halted construction on the building for 45 days late last spring.” Jason Hayes, FWS project manager, said “when the nest was abandoned in early June, refuge biologist Todd Eskelin gave the OK for work to continue.”

WHOOPEE RECUPERATING AT SAN ANTONIO ZOO DIES. The [Victoria \(TX\) Advocate](#) (1/15, 77K) reports that “an injured whooping crane captured by biologists in Lamar and treated at the San Antonio Zoo died Monday.” According to Tracy Levine, San Antonio Zoo bird department II supervisor, “the exact cause of the bird’s death is unknown.” Levine said “an initial report and appropriate samples have been sent to a pathologist who will make a determination for cause of death.”

EUROPEAN PARLIAMENT URGES MEMBER STATES TO DESTROY THEIR IVORY. The [LiveScience](#) (1/16, 670K) reports that “to help combat elephant poaching, the United States crushed its stockpile of illegal ivory for the first time last year,” and “now European Union member states could be poised to follow suit.” The European Parliament “passed a non-binding resolution Wednesday (Jan. 15) — 647 to 14 votes — urging member states to destroy their illegal ivory stockpiles and establish bans on commercial imports, exports and domestic sales of ivory to help fight the killing of rhinos, elephants and other animals for profit.”

US Geological Survey:

STUDY FINDS OLD TREES GROW FASTER WITH EVERY YEAR. The [Los Angeles Times](#) (1/15, Boxall, 3.07M) reports “scientists who gathered decades of measurements from hundreds of thousands of trees all over the world are punching a hole in the common assumption that large, old trees are biologically pretty much over the hill.” Rather, “researchers found that the senior trees have rapid growth rates and keep capturing carbon – lots of it.” Study leader Nate Stephenson, a California-based research ecologist with the USGS, said, “The growth rate just keeps increasing as trees get bigger.” The findings, “published Wednesday in a letter in the journal *Nature*, are based on repeated measurements of 673,046 trees belonging to 403 species across every forested continent.”

Also reporting on the story is [NPR](#) (1/16, Harris, 465K).

Securing America’s Energy Future:

Renewable Energy:

NEXTERA BLYTHE SOLAR POWER PLANT APPROVED TO USE SOLAR PHOTOVOLTAIC TECH. Reuters (1/16) reports that the California Energy Commission, in a 5-0 vote, approved a plan by NextEra Energy to use solar photovoltaic technology at the proposed 485 MW Blythe solar power plant. NextEra spokesman Steve Stengel said that the project still needs approval from the US Bureau of Land Management and needs a firm to purchase the power.

The Palm Springs (CA) Desert Sun (1/15, Kaufmann, 110K) also covers the story.

AMERICAN WIND ENERGY ASSOCIATION CEO SAYS WIND FARMS SUPPORT EAGLE CONSERVATION. For “The Blog” of the [Huffington Post](#) (1/16, Kiernan, 11.54M), Tom Kiernan, CEO, American Wind Energy

Association, claims that "the wind industry is committed to, and strives for, further reducing...impacts and does more to address risks to eagles than any of the other, far greater human sources of eagle fatalities that exist in the landscape today." According to Kiernan, "the administrative change allowing for permits of up to 30 years, with check-ins required at least every five years, will encourage these much-needed, long-term eagle conservation efforts, while allowing wind companies to increase the affordable and renewable energy they supply to American consumers." He also notes that "wind energy already reduces US carbon dioxide pollution by nearly 100 million tons a year, and it's one of the most affordable and readily scalable ways to address climate change – the single greatest threat to eagles and wildlife, say leading wildlife experts."

Eagle Rule Criticized. On the other hand, the Scranton (PA) Times Tribune (1/16, 137K) editorializes that the new rule "should be rescinded." According to the paper, "the rule itself begs the question: If operators have to establish additional protective measures if they kill too many eagles, why not just mandate those measures in the first place?" It concludes that "rather than giving the industry a pass, the Department of the Interior should mandate use of all available technology to protect birds and that wind farm siting decisions take into account potential harm to eagle populations."

Onshore Energy Development:

OBAMA ADMINISTRATION REASSURES ENVIRONMENTALISTS ON DRILLING OVERSIGHT. The Environment & Energy Publishing (1/16, 705) reports that the Obama Administration is "seeking to reassure the environmental community that US EPA is on top of the shale drilling boom, even though it has bailed out on three major enforcement cases." According to the article, "in letters being sent to the leaders of national environmental groups, EPA Administrator Gina McCarthy is stressing its efforts to raise standards industrywide." McCarthy said "her agency is developing model regulations for hydraulic fracturing in the form of guidance, is assisting the Bureau of Land Management with rules for fracking and drilling on public land, and is working closely with state agencies."

EPA VOWS TO BOOST ENVIRONMENTAL SAFETY OF FRACKING. The National Journal (1/15, Geman, Subscription Publication, 427K) reports that the Environmental Protection Agency (EPA) is seeking to take steps towards boosting the environmental safety of fracking. The National Journal says that EPA Administrator Gina McCarthy wrote in a letter to the Natural Resources Defense Council defending past decisions made by the agency and laying out pending initiatives concerning fracking.

Offshore Energy Development:

BOEM SEEKS MORE DETAILS ON SHELL'S ARCTIC DRILLING PLANS. KUCB-FM Unalaska, AK (1/16) reports that "federal regulators still don't have enough detail on Shell Oil's latest Arctic drilling plans to judge whether the company is ready to proceed this summer." The BOEM "went to Shell on Tuesday seeking more information about the company's operating and exploration plans for the Chukchi Sea." According to the article, much of BOEM's "requests have to do with air emissions data for Shell's fleet."

Tackling America's Water Challenges:

GOVERNMENT DATA SHOW WORSENING DROUGHT IN WESTERN STATES. The New York Times (1/16, Fountain, Subscription Publication, 9.61M) reports the National Climatic Data Center said Wednesday that drought conditions in the western US "intensified last year...adding to concerns about water supplies in the region." Their data show that California "had almost two and a half inches less precipitation than it had in the previous record year, 1898," with snowpack levels just one-quarter of the norm.

Op-Ed: Blame For Drought Should Not Be Placed On Congress . In an op-ed for the Sacramento (CA) Bee (1/16, Hayes, 749K), David J. Hayes, former deputy secretary of the Interior Department, writes that "the governor will soon make it official: California is experiencing a drought." According to Hayes, "although Mother Nature is responsible for the drought, the political spin game will soon begin with factions in the Central Valley trotting out their now-familiar drought refrain: It's Congress and the Endangered Species Act that are creating California's water shortage, and not Mother Nature." However, Hayes argues that "Congress' environmental laws restrict the movement of water when – as now – Mother Nature has provided the state of California with virtually no water to

work with."

MEETING HELD ON GILA RIVER DIVERSION PROJECT. The [Silver City \(NM\) Sun-News](#) (1/16, 24K) reports that representatives of the ISC, the BOR and engineers from Bohannon Huston "sat on the Cliff High School basketball court Monday listening to the audience's many questions about what a Gila River diversion project will mean for residents and the environment." According to the article, "the questions from the crowd ranged from what would happen to the river water once it was diverted to Deming to how much control such a large diversion project would allow the federal government to have in the region." However, by the end, "tempers began to flare," and "more than once a member of the crowd shouted out comments such as 'the spirit of Geronimo is alive and well.'"

Also providing coverage are the [Albuquerque \(NM\) Journal](#) (1/16, 288K) and the [Deming \(NM\) Headlight](#) (1/16, 10K).

ADDITIONAL COVERAGE OF BAY DELTA CONSERVATION PLAN. The [Sacramento \(CA\) Bee](#) (1/16, 749K) reports that "a statewide series of twelve informational open houses about the controversial Bay Delta Conservation Plan kicks off today in Bakersfield."

Additional coverage of the Bay Delta Conservation Plan was provided by the [Fresno \(CA\) Bee](#) (1/15, 327K) and the [Stockton \(CA\) Record](#) (1/15, 123K).

GLEN CANYON INSTITUTE WANTS TO FILL LAKE MEAD. In his column for the [Elko \(NV\) Daily Free Press](#) (1/16, Mitchell, 22K), Thomas Mitchell writes that the Glen Canyon Institute "describes itself as dedicated to the restoration of Glen Canyon and the Colorado River to their natural states prior to the construction of Glen Canyon Dam and the filling of Lake Powell." According to Mitchell, "while the institute's primary focus is on Arizona and Utah, one of its ideas for changes would have significant impact on Nevada, where the Las Vegas water agencies continue to press for access to groundwater from four valleys in rural Nevada." The institute wants to fill Lake Mead first, and the "objective is to lower Lake Powell, thereby uncovering natural and cultural sites such as Davis Gulch, Anasazi Canyon, Cathedral in the Desert, Moqui Canyon and Gregory Natural Bridge." This would also "speed up the flow of the Colorado River and restore the ecology of the Grand Canyon."

Empowering Native American Communities:

EPA REPORT: ALASKA'S PEBBLE MINE COULD DEVASTATE BRISTOL BAY SALMON, NATIVE CULTURE. The [Eugene \(OR\) Register-Guard](#) (1/16, 172K) reports that the EPA on Wednesday "released its final assessment of the impact of mining in the Bristol Bay region." Its conclusion are "similar to those of an earlier draft report, concluding that, depending on the size of the mine, up to 94 miles of streams would be destroyed in the mere build-out of the project, including losses of between 5 and 22 miles of streams known to provide salmon spawning and rearing habitat." The article notes that "up to 5,350 acres of wetlands, ponds and lakes also would be lost due to the mine footprint." The report "indicates a large-scale copper and gold mine in Alaska's Bristol Bay region could have devastating effects on the world's largest sockeye salmon fishery and adversely affect Alaska Natives, whose culture is built around salmon."

In an editorial, the [Fairbanks \(AK\) News-Miner](#) (1/16, 44K) argues that EPA Administrator Gina McCarthy "shouldn't use the contents of this final watershed assessment to preclude Alaskans from deciding what's best for this state." It notes that "the conclusion of the assessment's summary points out that the study itself contains many uncertainties and unknowns about the impact on land, fish and people."

Also reporting on the story is the [Los Angeles Times](#) (1/16, Ganga, 3.07M).

BIA INVESTIGATING SANTA FE INDIAN SCHOOL SECURITY RUMOR. The [Santa Fe New Mexican](#) (1/16, 58K) reports that the Santa Fe Indian School Superintendent Roy Herrera said that BIA officers were "investigating a rumor that a student walked onto campus Wednesday with a firearm, though no evidence has been found to support that."

Top National News:

OBAMA TOUTS NEW FEDERALLY FUNDED MANUFACTURING HUB IN NORTH CAROLINA. President Obama's appearance in Raleigh, North Carolina on Wednesday to tout a manufacturing hub made possible by \$70 million from the Department of Energy generated relatively light national media coverage. None of the three network newscasts mentioned the event. However, Al Sharpton, on MSNBC's Politics Nation (1/16, 894K), called the President's remarks in Raleigh "an important speech" in which he "threw down the gauntlet to Congress," and "offered concrete solutions to get Americans back to work."

In the lead story for MSNBC's Ed Show (1/16, 449K), Ed Schultz noted the President's remarks on the need to create more manufacturing jobs, but only in the context of blasting him for supporting the Trans-Pacific Partnership, which Schultz says would hasten the erosion of the US's manufacturing base. Schultz said, "Mr President, you can't have it both ways; you can't say that you are for manufacturing jobs...and then turn around and do exactly what NAFTA did, except it's going to be on steroids." Schultz went on to interview TPP opponent Brian Schweitzer, the former governor of Montana and a potential 2016 presidential candidate, who has derided the President as a "corporatist."

The AP (1/16, Superville) reports that in Raleigh, the President was "making good on a promise from last year's State of the Union to help create good-paying American jobs" when he "announced a new public-private manufacturing hub in North Carolina to develop next-generation power electronics." According to the AP, the President "also used the occasion to jawbone Congress to reinstate long-term unemployment benefits." However, the AP says the President's "quick stop in North Carolina...comes after the government reported last Friday that employers added just 74,000 jobs in December," which "raised fresh concerns about the pace of the economic recovery."

USA Today (1/16, Jackson, 5.82M) reported that on Wednesday, the President's message was: "the nation is poised for a big economic year if he and Congress do their jobs right." USA Today said the President, "making his first out-of-town trip of the year...kept the focus on the economy, telling the crowd at N.C. State that the economy is continuing to recover from the financial crisis." According to USA Today, the President "characterized" the manufacturing hub in Raleigh as "an example of the kind of executive action he plans to take in the absence of congressional legislation," saying, "Where I can act – on my own, without Congress – I'm going to do so."

Politico (1/16, Epstein, 464K) said the President "illustrated the White House economic message in about 30 seconds Wednesday." According to Politico, "After reiterating his call for Congress to renew long-term unemployment benefits," he "said he's going to move on without legislators wherever possible." Politico says the President "couched the unemployment benefit extension as central to his economic message for the middle class." However, Dana Milbank, in his column for the Washington Post (1/16, 4.28M), criticizes the President for discussing the lapsed jobless benefits for "all of 47 seconds, a third of the way into his speech."

Under the headline "Obama Says He'll Bypass Congress To Boost Economy," the Raleigh (NC) News & Observer (1/16, Frank, Owens, 113K) also reports that the President is "embracing a do-it-yourself approach to reviving the nation's economy, saying Wednesday...that he will bypass Congress where he can to help accelerate the recovery." The News & Observer says the \$140 million Next Generation Power Electronics Institute will be paid for with \$70 million from the US Department of Energy "to be matched by at least \$70 million in nonfederal money by the businesses and universities and the state of North Carolina."

The Washington Times (1/16, Wolfgang, 417K) reports that the Raleigh manufacturing hub's "research will be focused on wide-bandgap semiconductors, touted by the president as more powerful and efficient than the semiconductors currently used in computers, cell phones and other products." Bloomberg News (1/16, Bender, 1.91M) reports that North Carolina State University "is leading a consortium of universities, laboratories and 18 companies, including agriculture and construction equipment manufacturer Deere & Co. and vehicle component manufacturer Delphi Automotive Plc, that is being set up to foster innovations in manufacturing." Bloomberg notes that on Wednesday, the President announced that "two more such hubs will be announced in the coming weeks," and "urged Congress to pass a bill" from Sens. Roy Blunt and Sherrod Brown "that he said would create 45 additional manufacturing hubs around the country."

Reuters (1/16, Felsenthal) quotes the President as saying, "I don't want the next big job creating discovery, the

research and technology, to be in Germany, or China or Japan; I want it to be right here in the United States of America.”

According to the Los Angeles Times (1/16, Hennessey, 3.07M), “After months of playing defense on the bungled rollout of” the Affordable Care Act, “the White House is hoping to...publicize other elements of his domestic agenda, particularly those popular with voters likely to hold sway in the November elections.” The Times says the President’s “remarks represented the White House’s attempt to point to some progress on the economy while still expressing concern for those not yet feeling the effects of the recovery.”

The New York Times (1/16, Landler, Subscription Publication, 9.61M) reports that on Wednesday, President was “hasten[ing] to make good on a pledge from last year’s” State of the Union address, but the White House “defended the time it took to announce the first manufacturing institute, saying these ventures require extensive planning and are chosen through competitions.” White House Press Secretary Jay Carney told reporters, “If we had announced everything in a week, you would have said it wasn’t serious, it wasn’t real, and the assessments made about where to launch these initiatives weren’t rigorous and substantive.”

The Wall Street Journal (1/16, Nelson, Subscription Publication, 5.91M) covers the President’s stop in North Carolina under the headline “Obama Addressing Last Year’s To-Do List: Only Days Before State of Union Speech, President Lauds Manufacturing Institute He Talked About a Year Ago.”

Zachary Goldfarb, in a piece for the Washington Post (1/16, 4.28M), writes that “despite the lofty language,” the President “begins 2014 with none of the boundless hope that characterized the start of his second term last year.” According to Goldfarb, “Now...Obama and his senior aides are fighting the perception that they are out of time to make progress on his priorities.” Goldfarb says that while the President “touted the manufacturing gains under his tenure,” the “true numbers are far less rosy than they seem.” Goldfarb says the President’s “stated objective of adding 1 million new factory workers during his term...seems out of reach, with only 77,000 new workers last year.”

Citing Senate Votes, Hagan Declines To Appear With Obama In Raleigh. The New York Times (1/16, Landler, Subscription Publication, 9.61M) reports that in a “reliable barometer of Mr. Obama’s diminished popularity” in North Carolina, Sen. Kay Hagan, “who faces an uphill re-election battle this year, skipped [the President’s Wednesday] speech, citing the press of Senate business in Washington.” Reuters (1/16, Felsenthal) notes that the RNC released a statement reading: “Kay Hagan is suddenly reluctant to associate herself with Obama.”

Linda Feldmann, in a piece for the Christian Science Monitor (1/16, 540K), says the President “didn’t do any favors for” Hagan, “one of the most vulnerable incumbents in the fall midterms,” by traveling to North Carolina. Neil Munro, in a piece for the Daily Caller (1/16, 422K), says that the President nevertheless “wrapped his arms tightly around...Hagan Wednesday,” telling the crowd in Raleigh: “Sen. Kay Hagan couldn’t be here, but I wanted to thank her – publicly – for the great work she’s been doing.”

HOUSE EASILY PASSES OMNIBUS SPENDING BILL 359-67. None of the broadcast networks covered the House’s passage of a \$1.012 trillion spending bill that includes all 12 appropriations measures, though all major newspapers report on the passage, with most of their coverage focusing on the easy passage of the measure. The AP (1/16, Fram) reports that “with none of the drama and conflict of recent budget battles, lawmakers approved the measure 359-67,” with Senate approval expected Friday. The AP says “the 1,582-page bill provides money for virtually every federal agency.” Three Democrats and 64 Republicans opposed the measure.

USA Today (1/16, Davis, 5.82M) reports the passage came “with little protest or debate. ... This omnibus is even more extraordinary in that it includes all 12 of the annual spending bills. It’s the first time since at least 1989 – when legislative records are readily available – that Congress did not complete any of the individual spending bills in a fiscal year.”

Under the headline “In Defeat For Tea Party, House Passes \$1.1 Trillion Spending Bill,” the New York Times (1/16, Weisman, Subscription Publication, 9.61M) says 166 Republicans voted for the spending bill, “shrugging off the angry threats of Tea Party activists and conservative groups whose power has ebbed as Congress has moved toward fiscal cooperation.” The Washington Post (1/16, O’Keefe, 4.28M) says although “a large bloc of

House conservatives" voted against the package, it "easily passed." The Wall Street Journal (1/16, Hook, Subscription Publication, 5.91M) says that while current funding was originally set to expire at midnight Wednesday, a three-day stopgap measure was passed earlier in the week as work on the plan continued.

Politico (1/16, Rogers, 464K) says "the ghost of past shutdowns still haunted Wednesday's debate – together with a weariness that has seemed to infect the press coverage as well." Reuters (1/16, Lawder), Bloomberg News (1/16, Wallbank, 1.91M), The Hill (1/16, Kasperowicz, Wasson, 194K), and Roll Call (1/16, Dumain, Subscription Publication, 87K) also report on the votes.

OBAMA EXPECTED TO RETAIN MOST SURVEILLANCE PROGRAMS, BUT ASK CONGRESS FOR REFORMS. The CBS Evening News (1/15, story 5, 0:50, Pelley, 5.58M) previewed President Obama's Friday speech on government surveillance programs, with Major Garrett reporting that while "the White House insists no final decisions have been made, numerous sources tell us the President will preserve most of the existing surveillance, technology, and tactics, but will require more additional government oversight." However, he "will keep the storage of phone and Internet data under the supervision of the National Security Agency."

The Washington Post (1/16, Nakashima, Nakamura, 4.28M) says the President "is expected to announce some new limits" on NSA data-mining, "but he will call on Congress to help determine the program's future, according to current and former officials." They say the President "has concluded that the program has value as a counterterrorism tool," but is also "confronting difficult political realities" due to privacy concerns in Congress and among the public.

The AP (1/16, Braun, Pace) says the President "is expected to back the idea of changing the program" but will "leave the specifics to Congress, according to U.S. officials briefed on the White House review." The Los Angeles Times (1/16, Dilanian, Parsons, 3.07M) reports one "senior intelligence official" said, "He will say, 'The program has to change... Over to you, Congress.'"

USA Today (1/16, Madhani, 5.82M) says "privacy and civil liberty advocates say they are bracing for disappointment." The Washington Times (1/16, Dinan, Boyer, 417K) reports the ACLU "lashed out" at the reports that the President "won't make major changes to government surveillance programs." ACLU Executive Director Anthony Romero said, "If the speech is anything like what is being reported, the President will go down in history for having retained and defended George W. Bush's surveillance programs rather than reformed them."

The New York Times (1/16, A1, Baker, Subscription Publication, 9.61M) looks back on Obama's history on surveillance issues, writing that in 2007, Obama "described a surveillance state run amok and vowed to rein it in. 'That means no more illegal wiretapping of American citizens,' he declared. 'No more national security letters to spy on citizens who are not suspected of a crime.'" But as president, Obama is "presiding over a surveillance state that some of his own advisers think has once again gotten out of control."

Bloomberg News (1/16, Goldman, 1.91M) also has a report.

More Commentary. The Wall Street Journal (1/16, Subscription Publication, 5.91M) says in an editorial that while it is good news that Obama will not eliminate programs it considers essential to protecting the nation, his likely proposal to extend privacy protections to foreigners is dangerous. The Journal hopes Congress will retain the necessary programs.

Former NSA career professionals William Binney, Thomas Drake, Ed Loomis, and Kirk Wiebe, and former House Intelligence Committee employee Diane Roark, whose homes were raided by the FBI in 2007, "falsely accusing them of leaking part of the NSA program to The New York Times in 2005," write in USA Today (1/16, 5.82M), "While we've been paying attention to other things, our intelligence agencies have been tearing holes into the Bill of Rights." There is "little reason for hope" that Obama's "proposals will go far enough." They offer multiple proposals, writing that "under both the Bush and Obama administrations, unconstitutional powers have been abused."

Editorial Wrap-Up:

NEW YORK TIMES. "Mixed Results For Mideast Democracy." In an editorial, the New York Times (1/16, Subscription Publication, 9.61M) opines that Egypt is "on the verge of enacting a Constitution that would effectively legitimize last year's coup and further enable the kind of authoritarian system that the 2011 revolution was intended to displace." The Times argues that Egypt's election process "was anything but free or fair," and adds that while "General el-Sisi's election as president may well bring stability," it will do so "at the cost of democracy." The Times contrasts the situation in Egypt with Tunisia, which has "largely avoided political score-settling against its former elite and kept its military under civilian control."

"A Disappointing Internet Decision." The New York Times (1/16, A26, board, Subscription Publication, 9.61M) says in an editorial that the US Court of Appeals for the District of Columbia's Tuesday ruling on net neutrality was "discouraging," writing that if it stands, "broadband providers would be free to strike deals with companies like Netflix and Apple to pay to have their movies, software and other data streamed to customers faster than or ahead of other content. Such deals would hurt smaller businesses or start-ups who cannot afford to pay for preferential treatment."

"False Reasons For Filibustering Jobless Aid." In an editorial, the New York Times (1/16, Subscription Publication, 9.61M) says that GOP senators are "pulling out every fake excuse they can think of for filibustering an extension of jobless benefits for the long-term unemployed on Tuesday." The Times says that the GOP is "happy to give out government benefits, but not to those who need them the most."

"Dissent, Guns & Ammo." The New York Times (1/16, Subscription Publication, 9.61M) editorializes that Guns & Ammo magazine revealed itself to be on the extreme edge of the gun debate by firing "a respected columnist...after he dared to write the obvious – that all constitutional rights, including the right to bear arms, are and 'need to be' subject to legitimate regulation." The Times writes that polls have shown that "even a majority of members" of the NRA "support safer regulation" and "no less a conservative than Supreme Court Justice Antonin Scalia has written that 'the right secured by the Second Amendment is not unlimited,'" but the NRA and Guns & Ammo play to the extremes.

WASHINGTON POST. "Milking The Federal Government." In an editorial, the Washington Post (1/16, 4.28M) writes that the farm bill is being held up by a "battle over dairy policy," which "pits the Democratic-majority Senate, which wants to boost dairy farm incomes in part by limiting milk supplies, against the Republican-led House," where it is opposed. The debate, the Post says, obscures the fact that the dairy industry doesn't deserve government support at a time when milk consumption is down.

"Turning Point In Thailand." The Washington Post (1/16, 4.28M) editorializes that demonstrations against democracy in Thailand should receive criticism from the US. The editorial points out that demonstrators are demanding an "unelected council" to replace the "freely chosen" government. A spokeswoman for the State Department has reportedly called for the crisis to be "resolved through a 'democratic process' and praised the government's 'restraint' in responding to the demonstrators." Nonetheless, the editorial criticizes past responses from the Obama Administration, calling them "weak." The Post urges the Administration to make it publicly clear that "a coup...would be unacceptable...or that it would result in suspension of aid and security cooperation."

"The People's Choice." The Washington Post (1/16, 4.28M) editorializes that the District of Columbia needs to begin considering an election reform. The editorial claims that the upcoming Democratic primary for mayor will likely yield a winner who gains "as little as 30 percent of the total vote." The Post notes a recent poll, which showed Mayor Vincent Gray leading with 27 percent of the likely vote, while his top three challengers each had 12-13 percent. The Post says that it is "troubling" to know that it is possible for a candidate to be elected into public office with less than a third of the vote.

WALL STREET JOURNAL. "The Surveillance Moment." The Wall Street Journal (1/16, Subscription Publication, 5.91M) says in an editorial that while it is good news that Obama will not eliminate programs it considers essential to protecting the nation, his likely proposal to extend privacy protections to foreigners is dangerous. The Journal hopes Congress will retain the necessary programs.

"Fighting Back In Wisconsin." The Wall Street Journal (1/16, Subscription Publication, 5.91M) editorializes that Wisconsin prosecutors who are investigating associates and allies of Gov. Scott Walker are overstepping their authority. Targets of the campaign finance probe have publicly accused the prosecutors of violating their

constitutional rights, and the Journal agrees.

"Barbara Boxer's Oversight." In an editorial, the Wall Street Journal (1/16, Subscription Publication, 5.91M) criticizes Sen. Barbara Boxer for praising EPA Administrator McCarthy following the discovery of John Beale, the former EPA employee who was found guilty of stealing government property. Boxer reportedly thanked McCarthy for her role in discovering the actions of Beale. The Journal adds that Sen. David Vitter has been pushing for a hearing on the case but notes that McCarthy and Boxer will be hosting a hearing to discuss climate change soon but not the Beale case. The editorial suggests that Senate Democrats are willing to grow government but not hold it accountable when it fails.

Location: HVC 210. Contacts: 202-225-3599. On the Net: tlhrc@mail.house.gov

Other: TRB ANNUAL MEETING — Jan. 12 – 16. The Transportation Research Board (TRB) 93rd Annual Meeting

will be held. The program will attract nearly 12,000 transportation professionals from around the world to Washington, D.C. The spotlight theme for the 2014 TRB Annual Meeting is "Celebrating Our Legacy, Anticipating Our Future." Location: The Washington Marriott Wardman Park, Omni Shoreham, and Washington Hilton hotels. Contacts: Dana Korsen, Chelsea Dickson, 202-334-2138. Russell Houston rhouston@nas.edu, 202-334-3252

CFR – TREASURY SECRETARY LEW — 8:30 a.m. – 9:15 a.m. Secretary Lew will discuss the U.S. economy, next steps for financial reform, and the Department of the Treasury's international agenda with John C. Bussey, The Wall Street Journal. Location: Council on Foreign Relations, 1777 F Street NW. Contacts: Tricia Miller Klapheke, 202-509-8525. Notes: RSVP REQUIRED. Reply by: 12:00 p.m., Wednesday, January 15 to: dcpresrsrvp@ CFR.org. Camera Set-up Time: 6:00 – 8:00 a.m. Reception and Press Registration: 8:00 – 8:30 a.m.

NATIONAL ARCHIVES – SOCIAL INTRANET — 8:30 a.m. – 11:30 a.m. "Driving Employee Engagement Through A Social Intranet," a National Archives event, with special guests, the Federal Communicators Network. With Kelly Osborn, Web Developer and Community Manager for NARAs Internal Collaboration Network. Location: 700 Pennsylvania Ave. NW. (Visitors should plan to arrive 15 minutes before the event, and enter through the Pennsylvania Ave. NW Researcher entrance.)

PENTAGON – MLK OBSERVANCE — 9 a.m. Secretary of Defense Chuck Hagel delivers remarks at the 29th Annual Dr. Martin Luther King Jr. Observance in the Pentagon Auditorium. Location: BH-650. Notes: Journalists without a Pentagon building pass will be picked up at the Pentagon River Parking Pedestrian Bridge only. Plan to arrive no later than 45 minutes prior to the event; have proof of affiliation and two forms of photo identification. Please call 703-697-5131 for escort to the auditorium.

USIP – AFGHANISTAN — 9 a.m. – 11 a.m. The United States Institute of Peace launches its latest book on Afghanistan, "Getting it Right in Afghanistan," by hosting a panel discussion on what needs to be done in 2014. Panelists include Ghost Wars author Steve Coll, former Afghan Ambassador Omar Samad, former U.N. envoy to Afghanistan Kai Eide, and USIP's Moeed Yusuf. The panel discussion will be preceded by a statement via video link from Kabul by Minister Masoom Stanekzai, an introduction by Andrew Wilder, and a brief presentation of the book by Scott Smith. Location: 2301 Constitution Ave, NW. Contacts: Steven Ruder (sruder@usip.org), 202-429-3825

BROOKINGS – CENTRAL BANKING — 9 a.m. – 12 p.m. Live Webcast, "Central Banking after the Great Recession: Lessons Learned and Challenges Ahead." Papers will be presented by: San Francisco Federal Reserve President and CEO John Williams on unconventional policy, with a response by Harvard University's Martin Feldstein; former Deputy Governor of the Bank of England Paul Tucker on regulation, with a response by Sullivan & Cromwell's H. Rodgin Cohen; and a panel discussion on central bank independence with Brookings' Donald Kohn, Harvard's Kenneth Rogoff, and the University of California's Christina Romer. Following the panel, Federal Reserve Chairman Ben Bernanke will be interviewed about the Federal Reserve's first and next century by Brookings Trustee Liaquat Ahamed. Highlights: 11:10 a.m. Fed Chairman Ben Bernanke. Location: The Brookings Institution, 1775 Massachusetts Avenue, NW. Contacts: DJ Nordquist, djnordquist@brookings.edu. Notes: Media must register in advance.

AMERICAN GAS FOUNDATION – NATURAL GAS — 9:45 a.m. The American Gas Foundation and IHS CERA will release a new study titled "Fueling the Future with Natural Gas: Bringing it Home." Speakers: Dave McCurdy, president and CEO, American Gas Association; Chris Johns, president, Pacific Gas & Electric Company and chairman, American Gas Foundation; Tim Gardner, vice president of Power, Gas, Coal and Renewables Research with IHS CERA. RSVP by emailing crysta.jentile@edelman.com. Location: 101 Constitution, NW, Rotunda Room, 9th Floor

ABA – MONETARY POLICY PREDICTIONS — 10 a.m. Chief economists from the nation's largest banks present their monetary policy predictions and consensus economic forecast at a news conference. Members of the 2014 ABA Economic Advisory Committee are: EAC Chair Christopher Low, chief economist, First Horizon National Corps FTN Financial, New York; Scott A. Anderson, SVP and chief economist, Bank of the West, San Francisco, Calif.; Scott J. Brown, SVP and chief economist, Raymond James & Associates, Inc., St. Petersburg, Fla.; Robert A. Dye, SVP and chief economist, Comerica Bank, Dallas; Ethan S. Harris, co-head of global economics research, Bank of America Merrill Lynch, New York; Stuart G. Hoffman, chief economist, PNC Financial Services Group, Pittsburgh; Peter Hooper, managing director and chief economist, Deutsche Bank

Securities Inc., New York; Nathaniel Karp, EVP and chief economist, BBVA Compass, Houston; Bruce C. Kasman, chief economist, JP Morgan Chase & Company, New York; Christopher Low, chief economist, First Horizon National Corps FTN Financial, New York; Gregory L. Miller, SVP and chief economist, SunTrust Banks, Inc., Atlanta; George Mokrzan, director of economics, Huntington National Bank, Columbus, Ohio; Richard F. Moody, SVP and chief economist, Regions Financial Corporation, Birmingham, Ala.; and; Carl R. Tannenbaum, SVP and chief economist, Northern Trust, Chicago. RSVP REQUIRED: Please contact Blair Bernstein at (202) 663-5315 or bbemste@aba.com to RSVP or request dial-in information. Location: American Bankers Association, Alexander Room, 7th Floor, 1120 Connecticut Ave. NW. Contacts: Jeff Sigmund jsigmund@aba.com ((202) 663-5439).

NATIONAL SECURITY NETWORK – IRAN — 10 a.m. The National Security Network invites reporters to a press call to discuss the recent diplomatic progress made towards a nuclear-free Iran and the Senatorial legislation “which would severely inhibit negotiations going forward.” With Ambassador William H. Luers, Director, The Iran Project and adjunct professor at Columbia University; Dr. Suzanne Maloney Senior Fellow, Brookings Saban Center for Middle East Policy; Ali Nader, Senior Policy Analyst at the RAND Corporation. Contacts: Kate Brown, KBrown@nsnetwork.org, 202-213-7051

NTSB ‘MOST WANTED LIST’ — 10 a.m. The National Transportation Safety Board will hold a press conference to unveil its 2014 Most Wanted List of transportation safety improvements. only mode. To join the Q&A portion of the meeting, callers are instructed to press (star)1 on their touch tone phone.

SOCIAL SECURITY GUARANTEE — 12 p.m. Hall of Famer Fran Tarkenton and Dan Weber, founder and president of the Association of Mature American Citizens, will lay out plans to “shake up the establishment” in order to achieve Social Security reform in 2014. Location: National Press Club, 529 14th Street NW. Contacts: John Grimaldi, jgrimaldi@verizon.net, 917-846-8485

PUBLIC CITIZEN – NSA — 12 p.m. – 1 p.m. Symposium with Geoffrey Stone, University of Chicago's Edward H. Levi Distinguished Service Professor of Law, one of five top-echelon experts in law and intelligence appointed by President Barack Obama to a panel charged with assessing the National Security Agency's “overreaching” surveillance policies in the wake of revelations by Edward Snowden. Location: 1600 20th St. NW. Contacts: Barbara Holzer, 202-588-7716 Karilyn Gower, 202-588-7779. Notes: Due to limited seating, please register for the event as soon as possible by emailing bholzer@citizen.org.

AMERICA'S FISCAL CHALLENGES — 12 p.m. – 1:30 p.m. “The Moral Case for Addressing America's Fiscal Crises,” discussion hosted by the Committee for a Responsible Federal Budget. Panel: Marc Goldwein, The Committee for a Responsible Budget; Josh Good, Values and Capitalism Project, American Enterprise Institute; Rev. John Allen Newman, Senior Pastor, The Sanctuary at Mt. Calvary Church; Dr. Jay Richards, Distinguished Fellow, Institute for Faith, Work and Economics; Mark Tooley, President, Institute for Religion and Democracy. Location: 1899 L Street, NW, Suite 400. Notes: RSVP to Peggy Cusack at Cusack@crfb.org.

U.S. CHAMBER – CANADA — 12 p.m. – 1:30 p.m. Days after the 20th anniversary of NAFTA's implementation, the U.S. Chamber of Commerce will host a luncheon with Canadian Minister of Foreign Affairs John Baird to highlight “the importance of North American market integration and its related opportunities and benefits.” Location: U.S. Chamber of Commerce, 1615 H Street, NW. Notes: Credentialed members of the media are invited to attend. To register, email press@uschamber.com or call 202-463-5682.

STIMSON – TACTICAL NUCLEAR WEAPONS — 1 p.m. – 2:30 p.m. “Benefit or Burden? The Future of US Tactical Nuclear Weapons.” Former Air Force Chief of Staff Norton Schwartz and former Ambassador to Germany Richard Burt discuss the logic for and the military and diplomatic utility of these weapons and explain why they joined 15 other defense thinkers on the Peterson Defense Advisory Committee in calling for reductions in tactical nuclear weapons. Location: 2456 Rayburn. Contacts: Rich Robinson, communications@stimson.org, 202-478-3419

CENTER FOR SECURITY POLICY – NSA — 2 p.m. On the eve of the unveiling by President Obama of changes to U.S. intelligence policy and practice, a former Chairman of the House Permanent Select Committee on Intelligence and a former National Counterintelligence Executive joined other intelligence and national security practitioners will release an open letter arguing that the world is too dangerous for American intelligence capabilities to be further degraded. Pete Hoekstra, former Chairman, House Permanent Select Committee on Intelligence; Frank J. Gaffney Jr., former Assistant Secretary of Defense (Acting) and President, Center for Security Policy; Fred Fleitz, Senior Fellow, Center for Security Policy. Fleitz served in U.S. national security positions for 25 years at the CIA, DIA, Department of State and the House Intelligence Committee staff; Clare Lopez, Senior Fellow, Center for Security Policy. Location: National Press Club, Bloomberg Room, 529 14th Street NW. Contacts: Alex VanNess, vanness@securefreedom.org, 202-719-2421

. CSIS – INTERNATIONAL DEVELOPMENT ASSOCIATION — 2 p.m. – 3:30 p.m Building an IDA for the Future: Perspectives on the 17th Replenishment of the International Development Association. Panel Discussion with: Joachim von Amsberg, Vice President of Congressional Finance and Global Partnerships, World Bank Group; Jim Kolbe, Senior Transatlantic Fellow, German Marshall Fund of the United States; Former Member of Congress; Sara Avel, United States Alternate Executive Director, World Bank; Amelia Matos Sumbana 1/8invited3/8, Ambassador of the Republic of Mozambique to the United States. Moderator: Daniel Runde, Director of the Project on Prosperity and Development and William A. Schreyer Chair in Global Analysis, CSIS. Location: Conference Room 212-B/C, CSIS 1616 Rhode Island Ave. NW. Contacts: RSVP to PPD@csis.org

POLITICO – ROBERT GATES — 6 p.m. Former Secretary of Defense Robert Gates talks on politics and his new book “DUTY: Memoirs of a Secretary at War” with POLITICO Chief White House Correspondent Mike Allen.

Location: The Mayflower, 1127 Connecticut Ave. NW. Notes: RSVP to booking@politico.com.

EMBASSY OF GREECE – BYZANTINE ART — 6 p.m. – 7:30 p.m. On the occasion of Greece's Presidency of the European Union Council, the Embassy of Greece and the Delegation of the European Union to the U.S. present, "Conversations in Culture: Celebrating Byzantine Art in the Nation's Capital." With Drs. Susan Arensberg and Eugenia Halkia, two of the main curators of the exhibition: "Heaven and Earth: Art of Byzantium from Greek Collections." Location: Delegation of the European Union to the United States, Press Room, 2175 K Street NW. Contacts: Christos Failadis (Embassy of Greece), 202-332-2727

WFGP – MEXICO – AMBASSADOR MEDINA MORA — 6 p.m. – 8 p.m. Embassy series with H.E. Eduardo Medina Mora Icaza, Ambassador of Mexico to the United States. Location: Mexican Cultural Institute, 2829 16th Street, NW.

Last Laughs:

LATE NIGHT POLITICAL HUMOR.

David Letterman: "How about that Chris Christie, ladies and gentlemen. ... Yesterday, had the annual State of the State Address and he said, he emphasized that he has stopped, single-handedly...jobs from leaving New Jersey. Of course, he closed the bridge. He said crime in New Jersey is down, of course, he closed the bridge. They can't get in. He said he created a single biggest turnaround in the history of the state. You can't turn around, he closed the bridge!"

Jon Stewart: [Discussing the potential Iran nuclear agreement] "For the first time in decades, we would have diplomatic relations with Iran and a means of insuring that they would not obtain a nuclear weapon, just as long as nobody comes in and figuratively throws eggs at the entire thing." Unidentified Speaker: "The greatest threat to the long-awaited deal is taking place on Capitol Hill. Lawmakers are inching towards slapping Iran with new harsh sanctions." Stewart: "Congress is the Justin Bieber of our government...throwing away a tremendous opportunity because of immaturity and a lack of self control. We have Great Britain, France, Russia, China and Germany and Iran to all agree to this. What are you doing?"

Jimmy Fallon: "That's right. New Jersey Governor Chris Christie is still digging himself out of this scandal. Bridgegate. In fact, some experts are now saying he could be impeached. When he heard that, Christie said, 'Mm, peach.'"

Jay Leno: "Well, New Jersey Governor Chris Christie gave his State of the State Address yesterday. Christie said that the George Washington Bridge-closing incident does not define New Jersey, the smell does. But not – not – you know. Despite the scandal, most New Jersey Republicans are standing behind the governor. See, that is why we couldn't see them. They were standing behind...the governor."

Wow, Kip! These videos are fantastic and reinforce your values of respect, authenticity and action.

Coincidentally, I went to the Holocaust Museum this past weekend. While the experience is intense, the message that they are delivering is very similar to yours. Their theme and motto is: What you do matters! It's a wonderful reminder that our actions have an impact and we can all make a difference in our communities and world. It's powerful and empowering, just like your videos.

Thanks for sharing them and congratulations on your advertising campaign. You're truly making a difference and aware that "what you do matters".

Sincerely,
David

On Thu, Jan 16, 2014 at 7:01 PM, Kip Tindell <kip@containerstore.com> wrote:

Thanks for reaching out, David. I know that you and Audrey will connect very soon as we're excited to learn even more about the initiative. In meantime, we're super proud of some ads (full page in today's NYT, USA Today and WSJ) and videos that launched today to try and communicate to an even broader audience what we stand for – and to hopefully inspire others to build their organizations where everyone associated with them can thrive...obviously something that you and Sally are so familiar with. Kind of ironic to think of this content in the Wall Street Journal – never thought I'd see that day.

Here are the videos...and hopefully you had a chance to see the ads in person. If not, let me know and we'll send one to you online.

Hi Kip and Audrey,

I just wanted to follow up with you to confirm that you received my message and provide an update on Sally's youth agenda. We had a wonderful event last week at the FDR Memorial announcing our first public-private partner and \$1M dollar commitment from American Eagle Outfitters. Attached is a link from a segment that was aired on NPR: <http://www.npr.org/player/v2/mediaPlayer.html?action=1&t=1&islist=false&id=260979925&m=261064938>

Please don't hesitate to contact me if you'd like to learn more about the effort and how you can get involved. I'd also like to learn more about the Conscious Capitalism event and any requests that you have of Sally regarding attendance and participation.

Thanks so much!

Sincerely,

David

On Wed, Nov 27, 2013 at 9:46 AM, Jayo, David <david_jayo@ios.doi.gov> wrote:

Hello, Kip and Audrey,

Thanks so much for the invitation to the Conscious Capitalism event as well as your interest in the 21st Century Conservation Service Corps (21CSC). I'd love to set up time to talk a bit about the effort and explore ways that The Container Store could join the movement. Just give me a couple of options that work for you and I'll do everything possible to accommodate.

As you know, the Secretary has a strong commitment and inspirational vision for preparing the next generation of outdoor champions, advocates and leaders. She has set metrics for each component of the plan (play, learn, serve and work). Attached is a document that provides a high-level overview of the youth agenda including goals. The "work" category is getting the most attention from private sector as Sally has truly added depth and dimension to the term "public-private partnership".

By working collaboratively, we know that we can make significant strides and have a lasting impact. This is about creating a bold national movement to get more young people outdoors, connected to nature, caring for our public lands, employed and learning skills for future employment.

I will also flag the dates of the Conscious Capitalism event for the scheduling team. It would be an honor to attend and engage with the attendees. Thanks again for the invitation.

In the meantime, have a wonderful Thanksgiving and holiday season! I hope that your sales are through the roof and look forward to working with you.

Sincerely,

David

Hello! And nice to meet you, David! Let's connect on another email and we'll determine a time to talk more about this incredible program.

In the meantime, the dates for the Conscious Capitalism event are April 9-11, 2014 - in San Diego. If you think that there's even a *glimmer* of a chance that you could attend to talk about 21CSC, let me know and I'll get in touch with the Conference organizers and start that conversation. Thanks so much – could be so wonderful!

Cc: David Jayo
Subject: Re: thank you

Dear Kip and Audrey -

It was a real pleasure to speak with you today. Congrats again on the IPO - it is wonderful to know that another public company will bring the principles of conscious capitalism to Wall Street!

I have copied David on this so he can connect directly with Audrey. As I mentioned, David joined me from REI to lead our efforts on 21CSC and engaging youth to play, learn, serve and work outside. It would be wonderful to work with The Container Store, along with other enlightened businesses, to engage many more people in service on our public lands.

With regard to the CC event in San Diego, please let us know the dates and we can see if it works with our travel. I fully agree that this would be a wonderful audience for 21CSC.

Happy Thanksgiving and keep in touch!

Warmly,

Sally

On Nov 26, 2013, at 10:58 AM, Kip Tindell <kip@containerstore.com> wrote:

Sally,

Thanks so much for your time today – can't tell you how much I enjoyed our conversation! Truly there isn't a better person our President could have so thoughtfully selected to lead our Dept. of Interior. Thank you for all that you're doing for our beloved country's present and future. It was thrilling to hear what you're working on and towards and know that Audrey will be eager to connect with David soon. After the call, Audrey and I also discussed maybe you or David coming to the big Conscious Capitalism event in April in San Diego to talk a bit about the 21CSC (is that the official name?) just thinking that audience of companies would be ripe for the message. That particular event is open to a much broader group of companies with many representatives coming from each organization versus, say, the CEO Summit that takes place in Austin each year with about 200 CEOs (although that could be a great audience as well – that takes place each October). The Conscious Capitalism events are a far cry from where they were in their humble beginnings when we were there together outside of Austin. They now include key business leaders from virtually every single business sector.

Lastly, here's a link to our blog I mentioned we started after that get together in Austin many

years ago – it's evolved into having a great presence in all of our catalogs and really, in everything we use to talk with our customers...the response has been delightful. And the fact that we have a blog about our culture and what we stand yet nothing yet on "getting organized" I think makes people REALLY understand how important...how core...this is to us and to them... as it obviously translates to their experience with The Container Store. <http://standfor.containerstore.com/>

Again, thank you for reaching out...let's stay in touch.

Kip

PS – and of course thank you for letting me bend your ear on the Gunnison Sage-Grouse ☺.

DOI in the News:

SECRETARY JEWELL PRESENTS 2013 PARTNERS IN CONSERVATION AWARDS. The [Bloomberg BusinessWeek](#) (1/17, 4.93M) reports that Interior Secretary Sally Jewell "presented the Departments 2013

Partners in Conservation awards at a ceremony in Washington, DC." Jewell "honored 20 partnership projects that have demonstrated exemplary natural resource conservation efforts through public-private cooperation." The article notes that four partnerships nominated by the FWS "involving nearly sixty individuals and organizations located in California, Oregon, Kansas and Texas received awards." The Services partnerships receiving the 2013 Partners in Conservation award were the Great Plains Nature Center, the Edwards Aquifer Recovery Implementation Program, and the Center for Land-Based Learning Partnership.

Projects Nominated By FWS Recognized. The Sacramento (CA) Bee (1/16, 749K) reports that board members of Winters' Center for Land-Based Learning recently learned that its Student and Landowner Education and Watershed Stewardship program will receive an award from Interior Secretary Sally Jewell. Mary Kimball, the agency's executive director, will receive the Partners in Conservation Award in Washington, D.C. According to the article, "the program begins with teachers educating students on everything from the water cycle to the role that native fish play in improving water quality." Then Kimball, the staff at the FWS, "farmers, ranchers and other partners lead students in real-world projects: They have planted hundreds of trees. They have set up drip irrigation systems. They have performed wildlife surveys and more."

Also reporting on the story is the Modesto (CA) Bee (1/16, 208K).

The San Antonio Express-News (1/17, 746K) reports that the Interior Department recognized the Edwards Aquifer Recovery Implementation Program on Thursday with a Partners in Conservation award at a ceremony in Washington, D.C. The program "helped prevent the federal or state government from taking over management of the aquifer."

Also reporting on the story is the New Braunfels (TX) Herald-Zeitung (1/17, 26K).

Partnerships Involving NPS Recognized. KCSG-TV St. George, UT (1/17, 43) reports that "various efforts to protect natural resources in and around national parks have been recognized by the Department of the Interior with Partners in Conservation and Environmental Achievement awards." NPS Director Jonathan B. Jarvis said, "The National Park Service constantly seeks to improve conservation practices and partnerships in an effort to protect our natural resources and provide additional opportunities for all Americans to enjoy the great outdoors. These award recipients really lead the way and serve as outstanding examples of all we can accomplish collaboratively to make our public lands accessible and sustainable." The article notes that partnerships involving the NPS sites and programs included the American Samoa Rainforest Partnership, the Groundwork USA Network, the Appalachian Regional Reforestation Initiative Flight 93 Reforestation Project, the Cultural Resources Team of the Southern Nevada Agency Partnership, the Intergovernmental Internship Cooperative, and the Cienega Watershed Partnership.

BOR Employees Recognized. The Street Insider (1/17, 7K) reports that BOR Commissioner Michael L. Connor joined Interior Secretary Sally Jewell in "commending Reclamation employees who were recipients of the Department of the Interior's 2013 Partners in Conservation Award." Recognized were "the Minute 319 Bi-National Partnership and the Cultural Resources Team of the Southern Nevada Agency Partnership." Connor said, "I am proud to recognize these outstanding partners – including many Reclamation employees – for their dedication and hard work to achieve the goals of their respective programs. The significance of these awards cannot be overstated. From an historic agreement on the Colorado River between Mexico and the United States to a multi-agency endeavor to preserve cultural history, these types of partnerships demonstrate the model by which Reclamation will successfully do business as we move to the future." Also included in the award recipients "were two projects in which Reclamation employees partnered with other agencies and stakeholders to enhance conservation efforts," which included the Pacific Northwest Aquatic Monitoring Partnership and the Restoring Threatened and Endangered Fishes of the Truckee River Watershed Partnership.

Also reporting on the story is the National Geographic (1/17, 40.49M).

Partnership Involving USGS Recognized. The Pechanga (1/17) reports that the Pacific Northwest Aquatic Monitoring Partnership (PNAMP) was recognized for its conservation achievements focused on federally listed salmon species.

SECRETARY JEWELL ANNOUNCES TWO MEMBERS FOR COBELL SCHOLARSHIP BOARD. The Native

American Times (1/17, 337) reports that the Interior Secretary Sally Jewell announced the selection two members for the board that will oversee the scholarship fund that was created by the \$3.4 billion Cobell trust fund settlement. According to the article, Jean O'Brien of the University of Minnesota and Pam Agoyo of the University of New Mexico will serve on the five-member board. Jewell said, "It is with great pleasure that I announce the selection of these two outstanding educational leaders whose accomplishments have opened the doors of higher education to all American Indians and Alaska Natives. Their experience and expertise will be exceptionally valuable to the Board of Trustees as the scholarship fund helps students across Indian Country access the higher education they need to succeed in today's world. The fund will help strengthen Indian communities, advance tribal progress and secure a better future for Native Americans, honoring Eloise Cobell's vision and perseverance."

Also reporting on the story is the Pechanga (1/17).

SECRETARY JEWELL SAYS DOCUMENT REQUESTS BY REP. HASTINGS COST INTERIOR \$1.5 MILLION.

The Environment & Energy Publishing (1/17, 705) reports that Interior Secretary Sally Jewell told House Natural Resources Chairman Doc Hastings on Wednesday that his panel's numerous document requests are burdening the department and cost taxpayers \$1.5 million in 2013. In a letter to Hastings, Jewell said the department "conservatively estimates" that in 2013 it spent 19,000 staff hours and \$1.5 million of "taxpayer resources" responding to the committee's document requests.

Also reporting on the story is Politico (1/17, Guillen, 464K).

SENATE PANEL ADVANCES INTERIOR, ENERGY NOMINATIONS. The National Journal (1/17, Foran, Subscription Publication, 427K) reports the Senate Energy and Natural Resources Committee "voted to advance a slate of nominations for high-ranking Interior and Energy Department posts on Thursday."

The Las Vegas Review-Journal (1/17, 437K) reports that a Senate panel on Thursday advanced the confirmation of Neil Kornze to lead the BLM. The Senate Energy and Natural Resources Committee approved Kornze's nomination, 19-3, and sent it to the Senate floor for final confirmation.

ALASKA VILLAGE RENEWS CALL FOR ROAD THROUGH IZEMBEK NATIONAL WILDLIFE REFUGE. The AP (1/17, Joling) reports that in a letter, community leaders in King Cove are asking Interior Secretary Sally Jewell to "reconsider her decision rejecting a one-lane gravel road through Izembek National Wildlife Refuge so that sick or injured residents could have land access to an all-weather airport at nearby Cold Bay." They claim that Jewell "received bad information before rejecting" the road. Meanwhile Sen. Mark Begich "on Wednesday announced he was introducing a bill that would require approval of the land exchange and allow the state to build the road."

Also covering the story are the Environment & Energy Publishing (1/17, 705), the Alaska Dispatch (1/16, 7K), the Seattle Post-Intelligencer (1/17, 768K), the Fort Mill (SC) Times (1/16, 54K), and WRAL-TV Raleigh, NC (1/17, 117K).

FIRST LAND ACQUISITIONS FOR EVERGLADES HEADWATERS REFUGE EXPECTED SOON. WMFE-FM

Orlando, FL (1/17, 8K) reports that "in the next few weeks environmentalists and federal leaders expect to announce the first land acquisitions for the Everglades Headwaters National Wildlife Refuge and Conservation Area." Interior Secretary Sally Jewell, who "visited the area last week," said the FWS will begin "buying land and conservation easements later this month."

DOG ADVOCACY GROUPS TAKE GGNRA DOG MANAGEMENT PLAN TO SECRETARY JEWELL. The Half Moon Bay (CA) Patch (1/17) reports that "a coalition of dog groups working to preserve dog walking on parklands" are asking Interior Secretary Sally Jewell "for help to fix the dog management plan being proposed by the Golden Gate National Recreation Area (GGNRA)." Bill Bechtell of the Montara Dog Group said, "We have essentially written off attempting to work with the people at the National Park Service, and are going over their heads to Department of Interior and Congress." In a letter to Jewell, the group "asks for help to fix the proposed plan that will deny people with dogs 'access to 99.9% of the GGNRA' and 'fails to manage the GGNRA for the recreation needs of the people of the Bay Area, in direct contradiction to its 1972 enabling legislation, and incorrectly treats the GGNRA as if it were remote wilderness, when it's actually located within a large and heavily populated major urban area.'"

US PRODUCING MORE OIL, BUT STILL IMPACTED BY RANGE OF VARIABLES. The Washington Post (1/16, Plumer, 4.28M) reports the US "is suddenly awash in crude oil" after domestic oil production "rose by 2.5 million barrels per day" from 2008-2013 in the "biggest five-year increase in the country's history." The Post notes that "last year, U.S. produced more oil than it imported for the first time since 1995." The Post says the increase "probably doesn't mean that Americans can now safely ignore the Middle East," because the US economy "is still heavily reliant on oil, and prices are still largely swayed by what goes on in the global markets," according to a report by a commission of former generals and senior officials. Former Director of National Intelligence Adm. Dennis Blair said, "The oil boom has sparked a lot of loose talk about how we can now ignore what goes on in the Middle East. But that's just not true." However, Blair said the boom "likely allowed the United States and Europe to impose stricter sanctions on Iran without worrying as much about resulting price spikes."

ENVIRONMENTAL GROUPS CALL ON ADMINISTRATION TO MORE AGGRESSIVELY ADDRESS CLIMATE CHANGE. The Washington Post (1/17, Eilperin, Bernstein, 4.28M) reports that a group of 18 leading environmental organizations, including the Sierra Club and the Environmental Defense Club, is arguing that the Obama Administration "needs to apply a strict climate test to all of its energy decisions or risk undermining one of the president's top second-term priorities." The groups' decision to break with the White House over its energy policy "signals that the administration is under pressure to confront the fossil fuel industry or risk losing support from a critical part of its political base during an already difficult election year."

ADDITIONAL COVERAGE: SECRETARY JEWELL WINS OIWC AWARD. Additional coverage that Interior Secretary Sally Jewell has won the Pioneering Women Award bestowed by The Outdoor Industries Women's Coalition was provided by the [Bicycle Retailer](#) (1/16)

EDITORIAL: UTAH COUNTIES DESERVE PILT FUNDS. The Salt Lake (UT) Tribune (1/17, 343K) editorializes that "the sudden loss of \$35.4 million in annual aid to Utah counties is a both a cruel surprise and an abdication of the federal responsibility to help local governments make up for the fact that the federal lands within those jurisdictions are not subject to local taxes." According to the paper, "Utahns such as Reps. Chris Stewart, Jason Chaffetz and Rob Bishop are right to cry foul at the fact that budget negotiations between leaders of their own Republican Party and the Democrats left that aid out of the compromise \$1.1 trillion budget."

Additional coverage of the PILT program was provided by the [Colorado Springs \(CO\) Gazette](#) (1/17, 160K), the [Sky-Hi Daily News \(CO\)](#) (1/17, 728), the [Cortez \(CO\) Journal](#) (1/16, 646), the [Idaho Mountain Express](#) (1/17, 36K), and the [Albuquerque \(NM\) Journal](#) (1/17, 288K).

OP-ED: ENDANGERED SPECIES ACT NEEDS REVISION. In an op-ed for the [Wall Street Journal](#) (1/17, Male, Subscription Publication, 5.91M), Timothy D. Male, the former vice president of policy at Defenders of Wildlife, argues that the Endangered Species Act's mixed record on wildlife restoration and its impact on business have made the law vulnerable to critics. In light of this, Male claims that the law is in need of a major revision. For example, he suggests that Congressional action or a directive from Interior Secretary Sally Jewell could raise the standard on federal projects to a "net benefit" level requiring that federal projects leave species better off.

America's Great Outdoors:

National Park Service:

OGLALA SIOUX TRIBE TO DISCUSS PROPOSED TRIBAL NATIONAL PARK. The [Rapid City \(SD\) Journal](#) (1/17, 103K) reports that "members of the Oglala Sioux Tribe can learn more about the proposed tribal national park at a series of meetings called by President Bryan Brewer." A representative from the OST Land Office and Eric Brunneman, superintendent of Badlands National Park will attend the meeting along with members of the core team. The article notes that "a series of six informational meetings at district sites are scheduled to begin on Sunday and continue through next week."

PAYETTE RIVER WATER TRAIL RECEIVES PLANNING ASSISTANCE FROM NPS. The [Ontario \(OR\) Argus Observer](#) (1/17, 19K) reports that the West Central Highlands Resource Conservation and Development Council recently learned it has won a 2014 award of planning assistance from the NPS Rivers Trails and Conservation

Assistance (RTCA) Program to "help build the water trail coalition and create an Action Plan." The council is "excited to be working on the Payette River Water Trail with National Park Service Community Planner, Sue Abbott; members of the Snake River Water Trail Coalition; and organizations and individuals with an interest in the Payette River watershed."

NPS UNVEILS DYKE MARSH RESTORATION PLAN. The Examiner (1/17, 1.16M) reports that a plan to restore the Dyke Marsh Wildlife Preserve has been unveiled by the NPS. On Wednesday, the agency "officially announced the proposed Draft Environmental Impact Statement for the Dyke Marsh Restoration and Long-Term Management Plan along the George Washington Memorial Parkway along the Potomac River south of Alexandria, Virginia."

NPS AND OUTSIDE EXPERTS COLLABORATE ON INITIATIVE TO CONSERVE MIGRATORY WILDLIFE. The Newswise (1/17, 1K) reports that "a new paper details a collaboration between" the NPS and "outside experts, including Wildlife Conservation Society (WCS) scientists, in developing recommendations to conserve aerial, marine, and terrestrial populations of migrating wildlife that move in and out of US national parks, often coming from distant regions of the globe." The study, "Optimism and Challenge for Science-based Conservation of Migratory Species in and out of US National Parks," appears in "the online version (early view) of the international journal, Conservation Biology."

RESEARCHERS TARGET SEA LEVEL RISE TO SAVE YEARS OF ARCHAEOLOGICAL EVIDENCE. The Science Daily (1/17, 53K) reports that "prehistoric shell mounds found on some of Florida's most pristine beaches are at risk of washing away as the sea level rises, wiping away thousands of years of archaeological evidence." Shawn Smith, a senior research associate with the Center for Ocean-Atmospheric Prediction Studies at Florida State University, said, "The largest risk for these ancient treasure troves of information is sea level rise." However, a joint project between Smith and the NPS is "drawing attention to the problem to hopefully minimize the impact on the state's cultural sites."

CHURCH HOSTS GUN VIOLENCE DOCUMENTARY SCREENING. WDEF-TV Chattanooga, TN (1/17, 3K) reports that the NPS, Atlanta police, the King Center and other organizations are "partnering to host a free screening of a film intended to spark discussions on gun violence." According to organizers, "Trigger: The Ripple Effect of Gun Violence" will be "shown at Ebenezer Baptist Church Thursday at 7:30 p.m. and will be followed by a panel discussion."

Bureau of Land Management:

BLM SELLS 160 ACRES AT AUCTION FOR NEARLY \$24 MILLION. The Las Vegas Review-Journal (1/17, 437K) reports that the BLM held a major land auction Thursday at its northwest Las Vegas field office, selling more than 160 acres of property. The auction brought in nearly \$24 million. The article notes that Thursday's auction was the second-biggest local bureau land offering since November 2005, when the bureau auctioned nearly 3,000 acres valleywide.

BLM SEEKS PUBLIC COMMENTS ON CO2 PIPELINE PROPOSED FOR CATRON, SOCORRO COUNTIES. The EI Defensor Chieftain (NM) (1/16, 10K) reports that the BLM is seeking public comments for the proposed Kinder Morgan Inc. Lobos CO2 Pipeline. According to the article, "the 213-mile pipeline will transport CO2 being produced at the St. Johns field in Arizona to the existing Kinder Morgan Cortez CO2 pipeline in Torrance County."

ADDITIONAL COVERAGE: GOV. HICKENLOOPER QUESTIONS BLM'S SAGE GROUSE PLAN. Additional coverage of Colorado Gov. John Hickenlooper's stance on the BLM's sage grouse proposal was provided by the Craig (CO) Daily Press (1/16, 10K).

Fish and Wildlife Service:

FWS DIRECTOR ASHE APPEARS BEFORE SENATE ENVIRONMENT AND PUBLIC WORKS COMMITTEE. The Guardian (1/16, 1.59M) reports that "four of Obama's top climate change officials appeared before the Senate Environment and Public Works Committee on Thursday to try to build momentum behind Obama's use of federal government agencies to cut greenhouse gas emissions and prepare for future climate change." FWS Director

Dan Ashe told the hearing the service "was working to protect lands and wildlife from future sea-level rise and to plan for a future of more frequent and intense wildfires."

FWS STATE DIRECTOR KOCH SAYS SAGE-GROUSE LISTING WON'T DESTROY ECONOMY. The Elko (NV) Daily Free Press (1/17, 22K) reports that "a sage-grouse endangered species listing won't destroy the local economy, but it might require more adaptability," according to Ted Koch, state director of the FWS. Koch, "one of six speakers at an information session Tuesday night, spoke to a full room in the Nannini Administration Building." According to the article, "contrary to what some local leaders believe, Koch said a listing would bring about more regulation, but it doesn't mean the end of mining, ranching or oil exploration."

NEW YORK CITY HAS ONLY THREE STATE INVESTIGATORS TO FIGHT IVORY TRADE. The New York Times (1/17, Dwyer, Subscription Publication, 9.61M) reports that a "dire situation exists even though international commercial trade in ivory has been outlawed by treaty since 1989." The article notes that New York City is "a hub of trade for international poachers, who sell to both American and foreign markets." However, the city has "a grand total of three state investigators."

Meanwhile, the LiveScience (1/17, 670K) reports that at a public hearing in Manhattan, "state lawmakers discussed the need to tighten restrictions on the sale of ivory in New York, with some raising the possibility of a statewide ban on the trade." According to the article, "a diverse panel of diplomats, law enforcement officials, research scientists and activists testified before the New York State Assembly Standing Committee on Environmental Conservation to evaluate the effectiveness of existing laws and regulations to protect endangered species and halt the illegal sale of ivory." William Woody, assistant director of the Office of Law Enforcement at the FWS, said, "You have big ports here; our inspectors here in New York are extremely busy."

TO SAVE NORTHERN SPOTTED OWL, BARRED OWLS ARE SHOT. NPR (1/17, Shogren, 465K) reports that "in desperation to save the rare northern spotted owl, biologists are doing something that goes against their core — shooting another owl that's rapidly taking over spotted owl territory across the northwest." According to the article, "the decision to shoot the more aggressive barred owls has been wrenching for biologists and the federal government." However, "one of the biologists says the consequence of not stepping in would be so dire that it justifies what he calls this Sophie's Choice."

WINNER OF BLACK RHINO HUNTING AUCTION RECEIVING DEATH THREATS. CNN (1/16, Lavandera, 14.53M) reports that Corey Knowlton is trying to "why he spent \$350,000 for the chance to hunt a black rhinoceros in the southern African nation of Namibia." Knowlton said, "If I sound emotional, it's because I have people threatening my kids. It's because I have people threatening to kill me right now [that] I'm having to talk to the FBI and have private security to keep my children from being skinned alive and shot at." However, "despite the backlash, Knowlton has decided to engage the raging debate over how to protect an endangered species, such as the black rhino, by putting down his own money to help save the species and raise awareness about wildlife conservation."

Also reporting on the story is the Reno (NV) Gazette-Journal (1/16, 165K).

REWARD OFFERED FOR INFORMATION ON KILLING OF RARE WHOOPING CRANES IN KENTUCKY. CNN (1/16, Smith-spark, 14.53M) reports that "the hunt is on for the killers of two extremely rare whooping cranes, shot as they spent the winter in Kentucky." The animals are "thought to have been illegally shot in a single incident in November," the FWS Service and the Kentucky Department of Fish & Wildlife Resources said Thursday. Now, a reward that currently stands at \$7,200 is "being offered to help track down the killers."

Also reporting on the story are Reuters (1/16, Ghianni), the Louisville (KY) Courier-Journal (1/16, Bruggers, 449K), KCCI-TV Des Moines, IA (1/17, 191K), and WCTV-TV Tallahassee, FL (1/17, 60K).

DOCUMENT OUTLINES WHY HATCHERY SHOULD NOT CLOSE. The Chaffee County (CO) Times (1/17, 9K) reports that "a document with a series of arguments for keeping the Leadville National Fish Hatchery open has been distributed by Mark Cole of Friends of the Leadville National Fish Hatchery." According to the article, the "document describes how the National Fish Hatchery System Strategic Hatchery and Workforce Planning Report, released in November by the US Fish and Wildlife Service, will likely be used to justify the closure of numerous federal fish hatcheries around the country."

WYOMING SUPREME COURT HEARS GRIZZLY RECORDS CASE. The [AP](#) (1/17, Gruver) reports that lawyers argued before the Wyoming Supreme Court on Thursday “over whether Gov. Matt Mead’s administration properly withheld from an environmentalist state records concerning federal endangered-species protections for grizzly bears.” The court “took the arguments under advisement and will rule in writing later.”

Also reporting on the story are the [Casper \(WY\) Star-Tribune](#) (1/17, 90K) and the [Billings \(MT\) Gazette](#) (1/17, 206K).

TWO ANGLERS ON SAGINAW WATERWAYS HAVE CAUGHT STURGEON THIS WINTER. The [MLive](#) (1/17, 334K) reports that two anglers have reported “catching a live sturgeon on the Saginaw River or Bay” this winter. FWS biologists have asked one angler “to send the lure to Central Michigan University to see if DNA left on the lure can conclusively determine the sturgeon’s species.”

US Geological Survey:

LOS ANGELES BUILDINGS VULNERABLE 20 YEARS AFTER NORTHRIDGE EARTHQUAKE. The [Washington Post](#) (1/16, 4.28M) reports that “two decades after a magnitude-6.7 earthquake shattered Los Angeles and surrounding communities, buildings around the region remain vulnerable.” According to the article, “while there has been progress to rebuild and shore up freeways and hospitals, there has been less attention paid to concrete buildings and housing with ground-floor parking.” Earlier this week, Los Angeles “announced it would partner with the USGS to develop a plan to address seismic safety, including ways to get privately-owned buildings to be more quake-proof.”

Securing America’s Energy Future:

Renewable Energy:

GROWING NUMBER OF LARGE SOLAR PLANTS COMING ONLINE. The [Washington Post](#) (1/17, Bernstein, 4.28M) reports on the growing number of “utility-sized solar plants” coming online across the nation, noting that there are “232 under construction, in testing or granted permits, many in the Southwest and California, according to the Edison Electric Institute, which represents utilities.” However, experts say that while “the largest plants are helping utilities meet state requirements for renewable energy, the appetite for them may be waning.” As solar development moves into its next phase, particularly in the East, there are likely to be “smaller projects located closer to cities.”

Onshore Energy Development:

SG SEEKS THOMPSON DIVIDE LEASE EXTENSIONS. The [Glenwood Springs \(CO\) Post Independent](#) (1/17, 27K) reports that the Wilderness Workshop on Thursday called for the BLM to “deny a request to further extend oil and gas leases in the Thompson Divide area and instead to allow the leases to expire.” On the other hand, SG Interests “sent a letter on Tuesday asking the BLM to extend the expiration date on its 18 Thompson Divide leases by two more years, to April 1, 2016.” SG Interests, “in its Jan. 14 letter to the BLM, cites several reasons in support of its extension request, including that the BLM has not yet begun its NEPA review and that the agency failed to respond to the company’s requests during 2012 for an application for a permit to drill.”

COAL MINE COMPANY ORDERED TO STOP LOGGING. The [Southern Illinoian](#) (1/17, 12K) reports that “a Peabody coal company was cited Monday by the state for logging at a proposed mine location without a permit and ordered to stop.” The article notes that “the order came the same day Illinois mining officials learned of a new federal interpretation that now considers tree clearing as a pre-surface mining activity.” According to the article, “the interpretation was handed down after residents of the area and an environmental group complained to the US Office of Surface Mining.”

Also reporting on the story is the [SNL Financial](#) (1/17, 22K).

Offshore Energy Development:

BOEM ASKS SHELL FOR MORE INFORMATION ON ARCTIC DRILLING. The FuelFix (1/16, 7K) reports that the BOEM is "scrutinizing Shell's bid to resume Arctic drilling next summer are pressing the company for more evidence it has fixed the problems that plagued its last search for black gold in the region." The bureau "asked Shell to shed more light on changes under way to its leased drillship, the Noble Discoverer, which is being overhauled in an Asian shipyard." The bureau "made clear it wants Shell to demonstrate it won't let similar problems go unnoticed and unfixed if it is allowed to drill in the region again."

Also reporting on the story is the Alaska Journal of Commerce (1/17, 14K).

REP. DUNCAN FILES NEW VERSION OF EXPAND ACT. The Greenwood (SC) Today (1/17, 542) reports that Rep. Jeff Duncan on Thursday "filed a new version of the Energy Exploration to Achieve National Demand (EXPAND) Act which would open up area off the Atlantic Coast for energy exploration, potentially creating thousands of jobs and bringing billions of dollars in revenue to South Carolina." The BOEM is "considering whether to allow new seismic studies along the Atlantic coast from Delaware to halfway down the coast of Florida." According to Duncan, the new testing would "allow more accurate estimates of oil and natural gas reserves off the South Carolina coast."

Tackling America's Water Challenges:

CALIFORNIA DROUGHT DECLARATION COULD EXACERBATE POLITICAL DIVISION. McClatchy (1/17, Doyle, 95K) reports that "an official California drought declaration" will "soon test lawmakers' ability to legislate." Gov. Jerry Brown is "preparing to formally declare a drought," and "Interior Department officials, meanwhile, are preparing to announce irrigation water allocations in late February for customers of the sprawling Central Valley Project, a federal water management effort. Farmers and their friends in Congress expect little." According to the article, "the conditions are attracting the kind of national attention that can drive political action."

BILL TO REMOVE SPENDING CEILING FOR DAM SAFETY COULD HELP FIXES AT SCOGGINS DAM. The Oregonian (1/17, 751K) reports that a bill by Sen. Ron Wyden to "remove the spending ceiling on dam safety improvements might help a costly seismic fix at Scoggins Dam move closer to reality." The proposed legislation would "amend the Reclamation Safety of Dams Act of 1978 and remove spending caps for construction work to improve the safety of 476 dams and dikes managed by the US Bureau of Reclamation across the western United States." The article notes that "a seismic fix would cost around \$340 million, according to preliminary estimates," and the BOR "currently has \$400 million before it reaches a \$1.4 billion spending cap for dam safety projects in its entire district, which spans across 17 states, said spokesperson Peter Soeth."

BOR PLANS \$26 MILLION ADDITION FOR BULL LAKE DAM. The Riverton (WY) Ranger (1/17, 167) reports that the BOR is "planning to build a \$26.4 million spillway for Bull Lake Dam." The bureau "informed parties involved in the project and gathered comments at a public meeting Jan. 14." Mahonri Williams, Wyoming BOR water and lands coordinator, said, "Reclamation wants to take action to fix it before something potentially fails out there."

STUDY FINDS GREEN STURGEON THREATENED BY WATER DIVERSIONS. The Central Valley (CA) Business Times (1/17, 206) reports that "young green sturgeon may be killed by unscreened pipes that divert water from the Sacramento River into adjacent farm fields, according to researchers at the University of California, Davis." The research "confirms that the ancient protected fish species may be jeopardized by the current system of water diversion pipes, the university says." The article notes that "the findings also suggest that the threat could be lessened by diverting river water more slowly and over longer periods of time, meeting agricultural needs while conserving the green sturgeon populations."

ADDITIONAL COVERAGE OF BAY DELTA CONSERVATION PLAN. Additional coverage of the Bay Delta Conservation Plan was provided by the San Luis Obispo (CA) Tribune (1/15, 126K), the Stockton (CA) Record (1/15, 123K), the Bakersfield Californian (1/17, 140K), and The Verge (1/17, 451K).

Empowering Native American Communities:

TRIBAL JUDGE DISMISSES LAWSUIT ON SALAZAR SETTLEMENT. The Missoulian (1/17, 104K) reports that “a tribal judge this week dismissed a lawsuit that challenged how the Confederated Salish and Kootenai Tribes handled petitions that sought to distribute 100 percent of what’s known as the Salazar settlement to individual CSKT members.” Judge BJ Jones wrote, “The Salazar settlement simply did not vest any individual tribal members with a legal right to demand any of the settlement proceeds.”

MILLE LACS COUNTY APPEALING BIA’S DECISION TO PUT LAND IN TRUST. The Mille Lacs County (MN) Times (1/16, 9K) reports that Mille Lacs County has filed an appeal of an Interior Department “decision to allow the Mille Lacs Band of Ojibwe to place the Sher parcel, in Kathio Township in northern Mille Lacs, into trust status for the Band.”

Top National News:

OBAMAS MEET WITH HIGHER EDUCATION LEADERS TO PUSH FOR GREATER AFFORDABILITY.

President Obama and the First Lady hosted higher education leaders at the White House on Thursday in a push to make college more affordable for minority and low-income students. While coverage of the event focuses mainly on the specifics of the event and the commitments the schools are making to meet the challenge, many reports also say the “Call To Action On College Opportunity” is the latest high-profile effort by the White House to enact change that does not require the approval of a recalcitrant Congress. Coverage was somewhat light, with none of the broadcast networks covering the event, and only some major newspapers doing so. There was, however, some local newscast coverage.

The AP (1/17, Kuhnhen) reports the President “tested his persuasive powers Thursday, summoning university presidents to the White House to win their commitments to expanding access to higher education and to demonstrate a new determination to use his own presidential authority in the face of legislative roadblocks.” The President told the gathering, “We still have a long way to go to unlock the doors of higher education to more Americans and especially lower-income Americans. We’re going to have to make sure they’re ready to walk through those doors.” The AP says Michelle Obama also attended the event, and “both the president and the first lady spoke in personal terms, saying they had benefited from a national commitment to expand opportunities for young people that led them to attend elite universities.”

The New York Times (1/17, Calmes, Subscription Publication, 9.61M) says “mobilized by the Obama administration, and egged on by both the president and the first lady, scores of college presidents, along with corporate and nonprofit leaders,” agreed to “new initiatives and money toward enrolling and graduating more low-income minority students.” The President said, “That’s an extraordinary accomplishment, and we didn’t pass a bill to do it.”

The Washington Post (1/17, Anderson, 4.28M) says “dozens of leaders came even though there was, in essence, an entry fee” in pledging such initiatives and funding. McClatchy (1/17, Schoof, 95K) reports National Economic Council Director Sperling told reporters on a late Wednesday conference call that “the event is part of what the president calls his ‘year of action,’ even if cooperation with Congress isn’t possible.”

Coverage of the President and Mrs. Obama’s college summit received nationwide news coverage, but was not generally the top story in the broadcast. Coverage generally noted the President’s “new determination” that he will act on his own “if Congress remains deadlocked,” stating his belief that “education is the surest bet to a stable, middle-class life.” Some examples of typical reporting can be found on WFXL-TV, Albany, GA (1/16, 10:31 p.m. EST, 11K) KTVI-TV St. Louis (1/16, 9:20 p.m. CST, 65K), WPMT-TV Harrisburg, PA (1/16, 10:13 p.m. EST, 75K) and KABC-TV Los Angeles (1/16, 5:45 p.m. PST, 182K).

Other reports, such as those on WJW-TV Cleveland (1/16, 7:12 p.m. ET, 81K) and WLS-TV Chicago (1/16, 4:11 p.m. CST, 191K), added that the President announced billions of dollars of private commitments to help low-income students, saying, “The government is not going to be able to continually subsidize a system in which higher education inflation is going up faster than healthcare inflation.” He has “laid out a plan to bring down costs and make sure that students are not saddled with debt before they even start out in life.” The President is also reported as saying that “improving college access could transform economic mobility.”

The Chicago Tribune (1/17, Skiba, Cohen, 2.32M) says the President "sounded an appeal for the country to do more to ensure low-income students go to college." The President said he "grew up with a single mother who was only 18 when he was born but who ultimately obtained a Ph.D.," while the First Lady "said she never would have gotten to Princeton had the school not recruited her older brother to play basketball there. Not knowing anyone but him when she arrived, she felt 'a little overwhelmed and a little isolated.'"

The Washington Times (1/17, Wolfgang, 417K) says the event was "part of a larger plan to work around a recalcitrant Congress." The U-T San Diego (1/17, Kucher, 647K) reports the President "said he was using a pen and a phone – instead of legislation in a gridlocked Congress – to help more low-income students not only attend but graduate from college and get on the path to a stable, middle-class life."

The San Francisco Chronicle (1/17, Asimov, 2.88M) says the educators agreed to "waive more college application fees. They'll reach down into middle schools to show children what classes they'll need for college. And they'll visit more homes to walk families through complicated financial aid forms." The Christian Science Monitor (1/17, Khadaroo, 540K) says the "'Call to Action on College Opportunity' is part of the administration's larger push to make college more affordable, invest in higher education as an engine of economic mobility, and make the United States a world leader in the share of citizens earning degrees by 2020."

The New Haven (CT) Register (1/17, Shelton, 217K) reports Yale University President Peter Salovey, who attended, said the school "will send 300 current Yale students from minority and lower-income backgrounds to make presentations in their home communities about Yale admissions and financial aid. It also will send mailings to 20,000 high-achieving, low-income students." The Rochester (NY) Democrat & Chronicle (1/17, Gearan, 387K) reports Hobart and William Smith Colleges President Mark Gearan, who also attended, said, "It was a kind of a momentous day."

Reuters (1/17, Rampton, Nawaguna) and the Time (1/17, Rhodan, 21.77M) and MSNBC (1/17, 7.96M) websites also have reports.

BUDGET COMPROMISE CLEARS SENATE, HEADS TO PRESIDENT'S DESK. A day after the House acted, the Senate on Thursday evening easily passed the compromise omnibus spending, sending it to the President's desk for his signature. Media coverage of the event is almost universally positive, focusing on the outbreak of bipartisanship in Congress and the potential for it to continue into the FY2015 budgeting process. However, several news outlets suggested that the quick compromises that marked the process may not survive the next round of budget work, potentially meaning a showdown of the forthcoming debt limit debate.

ABC World News (1/16, story 4, 0:10, Sawyer, 7.43M) reported the Senate "has passed a big, new budget deal. The compromise, which effectively avoids another government shutdown."

The CBS Evening News (1/16, story 5, 0:15, Pelley, 5.58M) reported, "Late today the Senate gave final congressional approval to that compromise \$1.1 trillion spending bill to keep the government running past a midnight Saturday night deadline." The measure "now goes to the President for his signature."

The AP (1/17, Taylor) reports the bill "easily" passed 72-26. The House "easily passed the bill on Wednesday." The "huge" bill "funds every agency of government, pairing increases for NASA and Army Corps of Engineers construction projects with cuts to" the IRS, while it "pays for implementation of Obama's health care law."

The Los Angeles Times (1/17, Mascaro, 3.07M) reports that Sen. Ted Cruz "kept senators in suspense throughout the afternoon as he considered his options for blocking the bipartisan measure." Eventually, 17 Republicans backed the measure while 26 opposed it. All Democrats and independents back the legislation.

Bloomberg News (1/17, Hunter, 1.91M), noting the wide Senate margin and the 359-67 vote in the House, says that the "bipartisan cooperation marks a turnaround from the Tea Party-fueled discord that caused a 16-day partial government shutdown in October." The effort "went smoothly in part because both parties conceded points that led to acrimony in past debates." Republicans dropped demands to defund Obamacare, while Democrats "accepted far less spending than they had proposed." However, among the Republicans opposing the bill were Sens. Rand Paul and Marco Rubio, both "potential 2016 presidential aspirants."

Reuters (1/17, Lawder) quotes Senate Appropriations Chairman Barbara Mikulski saying, "We're a little late, but we have gotten the job done."

The Hill (1/17, Kasperowicz, 194K) reports that "most senators" spent Thursday "praising the level of cooperation that allowed both parties in both chambers of Congress to agree to the bill." Sen. Richard Shelby, ranking member on the Appropriations Committee, said the legislation is a "pretty good appropriation considering where we are." Both Shelby and Mikulski hope that "they hope getting spending for fiscal 2014 out of the way will let Congress get back to regular order as it takes up 2015 spending."

On its website, CNN (1/17, Desjardins, 14.53M) calls the passage a "notable departure from chronic, partisan-fueled budget battles in recent years that included the government shutdown last October."

The Daily Caller (1/17, Levinson, 422K) reports that the passage "marks the culmination of months of bipartisan work following the government shutdown in October." Senate Budget Chairman Patty Murray and House Budget Chairman Paul Ryan "crafted a compromise budget with which both sides had objections but on which both could agree."

The Wall Street Journal (1/17, Hook, Subscription Publication, 5.91M) warns that the bipartisanship that was evident on this spending bill may not necessarily occur in future. Still, the Journal says it shows that the combative tone of the debate has ebbed somewhat.

McClatchy (1/17, Lightman, 95K) says that while the "burst of partisan cooperation may not last," for the "moment at least," it suggests that Congress has "heard its constituents' message: Stop all the partisan battles, find common ground and do your job." AFP (1/17) says that the passage by both chambers marks "a truce after years of fiscal feuding in Washington."

Roll Call (1/17, Lesniewski, 87K) reports that the "allure of recess" won over senators who "sped up the timeline" to pass the legislation. Roll Calls says that "true regular order is the hope and aspiration of many a veteran appropriator" for the FY15 budget. However, despite the "good feelings," there was "no shortage of complaints about the closed process, though moving the single catch-all bill was rather inevitable since it is already mid-January – three and a half months late."

Striking a discordant note, USA Today (1/17, Davis, 5.82M) reports that Sen. John McCain, who voted against the bill, said it was a "shameful way to do business." He added, "We cannot continue this process where massive, un-amendable, thousand-plus page spending bills totaling trillions of dollars are voted on two days after being made available to members of this body."

Politico (1/17, Rogers, 464K) reports that the vote came after Cruz "dropped his insistence on a vote on funding" the ACA. Looking at the contents, Politico says that the ACA and Wall Street reforms "will endure but with far less money" than the President wanted. While about \$20 billion "is restored for domestic programs cut under sequestration last spring," in inflation-adjusted dollars, Obama "is still left with less than Congress approved six years ago for his Republican predecessor."

Debt Limit Increase Next On Agenda. The Washington Post (1/17, Montgomery, 4.28M) reports that Senate leaders are "already anticipating the next deadline: raising the debt limit, the final fiscal hurdle that lawmakers must clear before they stand for midterm elections this fall." As of yet, congressional Republicans haven't settled on a strategy on that issue. Further complicating the matter, there is an apparent disconnect on when the limit needs to be raised. Senate Majority Leader Reid said on Thursday that the Treasury Department "can manage until May," adding that "this is not urgent." However, Treasury Secretary Lew warned that borrowing authority could would be more likely to run dry in late February than it would in March.

Legislation Does Not Include IMF Reforms. The New York Times (1/17, Weisman, Subscription Publication, 9.61M) reports that the spending bill doesn't include an overhaul of the IMF, "leaving behind what might have been" the Administration's "best chance" to pass it and "meet its obligations to the world's other economic powers." Administration officials "concede that Congress's decision not to make the changes will be an embarrassment" to the President "internationally" and could undermine "future efforts to reach global economic

accords.”

MEDIA SEES MOSTLY GOOD IN ECONOMIC REPORTS. Media coverage of economic reports was generally positive on Thursday. In particular, reports on inflation and new jobless claims were seen as positives. Even the drop in the Bloomberg consumer confidence measure was downplayed in that new outlet's coverage of the data.

Despite Small Jump, Inflation Remains Tame. Reuters (1/17) reports that the Labor Department said on Thursday that its Consumer Price Index, a measure of inflation at the retail level, rose 0.3% in December following a flat reading in November. That's the largest increase in six months. For all of 2013, the CPI was up 1.5%. However, the core CPI, which excludes volatile food and energy prices, rose only 0.1%, down from a 0.2% rise in November. Over the past 12 months, the core is up 1.7%.

The AP (1/17, Rugaber) reports inflation “has been held back in recent years by sluggish growth and high unemployment, which makes it harder for retailers and other businesses to raise prices.” Consistently low inflation has allowed the Fed to “pursue its extraordinary stimulus program,” and Fed leaders could continue their bond purchases for longer if “inflation doesn't move closer to their 2% target.”

Jobless Claims Ticked Down Last Week. Reuters (1/17, Mutikani) reports that first-time claims for jobless benefits fell 2,000 last week to 326,000. Economists expected claims to come in at a similar 328,000. Reuters said that the decline suggests that the sharp drop in the rate of job growth in December (when the economy added just 74,000 new positions) is likely only temporary.

The Los Angeles Times (1/17, Puzzanghera, 3.07M) reports that the four-week moving average, which irons out week-to-week volatility, fell 13,500 last week to 335,000. Economists “say weekly claims below 350,000 indicate moderate labor-market growth.”

Bloomberg News (1/16, Stilwell, Smialek, 1.91M) says the report is a “sign the labor market continues to strengthen.” Bloomberg adds that rising business and consumer spending are “boosting growth prospects, allowing employers to hold the line on firings in anticipation of stronger demand” and adds that fewer job losses “typically precede a pick-up in hiring, as companies take on more workers to help production keep pace with improving momentum in the world's largest economy.”

The AP (1/16, Boak) also calls the report “a sign that layoffs are weighing less on the job market and economic growth.”

Mortgage Rates Fall After Week December Jobs Report. Bloomberg News (1/17, Gopal, 1.91M) reports that new data out Thursday from Freddie Mac shows US mortgage rates down “after a weaker-than-expected jobs report drove investors to the safety of the government bonds that guide borrowing costs.” The average rate on a 30-year fixed mortgage dropped to 4.41% this week from 4.51% the prior week. That's the lowest level since November. Meanwhile, the average rate on a 15-year fixed loan fell to 3.45% from 3.56%.

The AP (1/17) says that rates are “edging closer to historically low levels.” The AP says that rates have gone up “about a full percentage point since hitting record lows a year ago” on speculation that the Fed would cut its bond-buying. The AP says that the increase in mortgage rates has “slowed home sales, which have fallen for three straight months.”

Foreclosures Down Nationwide Last Year. USA Today (1/17, Schmit, 5.82M) reports that foreclosure activity in 2013 fell to its lowest level in six year nationwide, but “increased in some states where foreclosures tend to take longer.” About 1.4 million homes received a “foreclosure filing last year, down 26% from 2012 and down 53% from the peak foreclosure year of 2010, market researcher RealtyTrac says.” However, states including Maryland, New Jersey, New York and Connecticut posted increases.

ABC World News (1/16, story 5, 0:15, Sawyer, 7.43M) reported that home foreclosure rates, “once soaring, that symbol of American's on the edge of the country headed towards a recession, are finally down to the level they were before the real estate meltdown.”

Consumer Confidence Down, But Views Of Economy Approved. Bloomberg News (1/16, Jamrisko, Peralta,

1.91M) reports that its Consumer comfort Index fell to a "one-month low" of minus 31 for the period ending January 12. Still, respondents in January "became the least pessimistic about the economic outlook in five months amid signs the expansion was gaining momentum heading in 2014." The "gap between positive and negative expectations for the economy shrank to minus 5 this month, its best reading since August, from minus 11 in December."

Dow, S&P Down On Thursday, But Nasdaq Ticked Up. The AP (1/16) reports that a "batch of negative company news gave investors something to fret about" on Thursday. As a result, the Dow Jones Industrial Average fell 64.93 points to 16,417.01, while the S&P 500 fell 2.49 points to 1,845.89. Meanwhile, the Nasdaq Composite index rose 3.80 points to 4,218.89.

Reuters (1/17, Valetkevitch) reports that the Dow and S&P 500 fell after earnings from Goldman Sachs and other banks were less than expected. Goldman's earnings fell 21%, while Citigroup's profits were less than expected. Both said that lower bond trading revenue reduced their profits.

The Wall Street Journal (1/17, Kieman, Subscription Publication, 5.91M) also reports that the disappointing performance of Citigroup and Goldman Sachs was responsible for pushing down stocks.

USA Today (1/17, Krantz, 5.82M) says that investors "were expecting volatility in 2014, but this is ridiculous." While the overall market is "somewhat tranquil," underneath "the quiet surface, some individual stocks are already giving their owners a sickening ride. Thursday was the latest day in a week full of some head-turning big drops in stocks, including consumer electronics seller Best Buy and skin treatment maker Nu Skin." For example, Best Buy shares fell 29% on Thursday, while Nu Skin was down 26%.

Editorial Wrap-Up:

NEW YORK TIMES. "A 'Preventable' Tragedy." The New York Times (1/17, Subscription Publication, 9.61M), in an editorial, says that the Senate Benghazi report found that "it is the State Department that must bear most of the blame for failing to provide adequate security and not preventing the preventable."

"Contaminated Water In West Virginia." In an editorial, the New York Times (1/17, Subscription Publication, 9.61M) says the West Virginia chemical spill "has exposed serious defects in state and federal environmental protections that allow many facilities and chemicals to escape scrutiny." Noting West Virginia regulators' "long history of coddling the coal and chemical industries," and Federal government's "checkered record on chemical safety," the Times calls for "meaningful reform like the Safe Chemicals Act of 2013."

"Healthcare Reform Survives A Lawsuit." In an editorial, New York Times (1/17, Subscription Publication, 9.61M) says that the dismissal of a lawsuit "brought with the help of conservative legal groups and cheered on by Congressional Republicans eager to disable the Affordable Care Act," as "well-deserved." The Times argues that the plaintiffs' contention that the ACA's wording "allowed federal subsidies (in the form of tax credits) only for those buying insurance on the 14 health exchanges managed by a state," was "ridiculous on its face." The Times adds that while the plaintiffs have vowed to appeal the ruling, the "well-reasoned decision deserves to be upheld."

"The Convention And The Damage Done." The New York Times (1/17, Subscription Publication, 9.61M) editorializes about Wednesday's settlement between New York City and about 1,600 plaintiffs over mass arrests at the 2004 Republican National Convention. The Times notes that the settlement brings to \$35 million the amount the city will pay for "the damage inflicted by the New York Police Department to the constitutional rights of innocent people swept up in mass arrests." The Times notes that that amount is "an expensive legal course in basic civil liberties."

WASHINGTON POST. "The Free-Trade Lift." The Washington Post (1/17, 4.28M) writes in an editorial that while "America's increasingly skewed income distribution is finally getting the attention it deserves," the "bad news is that some people might use the issue to justify otherwise unjustifiable policy agendas" such as the campaign against the proposed Trans-Pacific Partnership. The Post says the US "has been made more productive by broader international competition and more secure by broader international prosperity."

"Modify Recess Appointments Process." An editorial in the Washington Post (1/17, 4.28M) notes that the Supreme Court appears likely to "place limits, perhaps severe ones," on the President's recess appointment power. The Post argues that while the power was probably not intended to be used "as a way around intransigent lawmakers," the Court "ought to show some caution in approaching the balance of power that the other two branches have forged over the subsequent two centuries." The Post also calls on lawmakers to use the "advice-and-consent powers more responsibly," and notes that if they do not, "it would be worth revisiting reforms that could reduce the opportunity for senatorial mischief."

"A Place On The Move."

WALL STREET JOURNAL. "Iran Sanctions Showdown." The Wall Street Journal (1/17, Subscription Publication, 5.91M) says in an editorial that the interim agreement with Iran does nothing to prevent Iran from developing a nuclear weapon, and that the secrecy the Obama Administration has insisted upon will not build confidence at home about the accord. The Journal says war is more likely if the US proceeds with the plan, possibly leading to a regional arms race and unilateral Israeli military action against Iran.

"Kansas Democracy Lesson." The Wall Street Journal (1/17, Subscription Publication, 5.91M) editorializes about efforts in Kansas to persuade the state Supreme Court to overrule the legislature funds spent on state schools. The Journal strongly opposes judicially imposed school spending, and argues that additional education funding will not lead to better results.

Washington Schedule:**TODAY'S EVENTS IN WASHINGTON.**

White House:

PRESIDENT OBAMA – The President and Vice President receive the Presidential Daily Briefing; the President will deliver remarks presenting the outcomes of the Administration's review of our signals intelligence programs, Department of Justice, pooled for TV, open to pre-credentialed stills and correspondents.

VICE PRESIDENT BIDEN – The Vice President will deliver remarks at the launch of the 100,000 Strong in the Americas Innovation Fund at the Department of State. This event is open press. The Vice President will ceremonially swear-in Catherine M. Russell as US Ambassador-at-Large for Global Women's Issues at the Department of State. Dr. Jill Biden will also attend. This event is closed press.

US Senate: Not in session.

US House: 1 p.m. – The House meets in a pro forma session.

CONGRESSIONAL INTERNET CAUCUS ADVISORY COMMITTEE – 12 p.m. – 1:15 p.m. Luncheon briefing, "Court Strikes Down FCC Open Internet Rules, What Does It Mean for the Net?" Location: 2226 Rayburn. Notes: RSVPs are appreciated. RSVP@netcaucus.org

WOLF PRESS CONFERENCE – 2014 OMNIBUS – 1 p.m. Rep. Frank Wolf, R-Va., chairman of the Commerce-Justice-Science Appropriations subcommittee, holds a press conference to highlight a number of provisions in the 2014 Omnibus Appropriations bill approved by the House Wednesday. Location: HVC Studio A.

Other: SURGEON GENERAL REPORT ON SMOKING – 9:30 a.m. Health and Human Services Secretary Kathleen Sebelius, Assistant HHS Secretary Howard Koh, Acting Surgeon General Boris Lushniak and Tom Frieden, director, US Centers for Disease Control and Prevention release a report, "The Health Consequences of Smoking 50 Years of Progress: A Report of the Surgeon General." Location: White House, South Court Auditorium. Contacts: HHS Assistant Secretary for Health, 202-205-0143

ROCKEFELLER INSTITUTE – PENSION CRISIS – Jan. 16 – 18. 1 p.m. – 2:30 p.m. The crisis in the underfunding of state and local government defined benefit pension systems and recommendations for relieving the crisis will be the subject of a report presentation by the Nelson A. Rockefeller Institute of Government.

Location: National Press Club, 529 14th Street NW. Notes: To attend, obtain a copy of the embargoed report and arrange interviews with the report's authors in advance of the event, contact Robert Bullock, deputy director of the Rockefeller Institute, at (518) 443-5837 or at Robert.bullock@rockinst.suny.edu.

NSA WHISTLEBLOWERS – NEWS CONFERENCE – 12:30 p.m. NSA veterans and whistleblowers hold a news conference on NSA surveillance. Speakers: Bill Binney, former technical director of the NSA's World Geopolitical and Military Analysis Reporting Group and co-founder of the SIGINT (Signals Intelligence) Automation Research Center; Russ Tice, former NSA analyst and a source for the New York Times' pieces published in 2005 about NSA surveillance; J. Kirk Wiebe, former senior analyst with the NSA's SIGINT Automation Research Center. Location: Zenger Room, National Press Club. Contacts: Sam Hussein Institute for Public Accuracy (samhousseini@gmail.com), 202-421-6858

ACTUARIES – RETIREMENT-INCOME SYSTEMS – 1 p.m. – 2 p.m. Capitol Hill Briefing: "Retirement for the AGES: Building Enduring Retirement-Income Systems." Speakers from the American Academy of Actuaries will unveil a new approach to evaluating systems, which will help stakeholders design better systems and improve existing ones. Briefing will include Q-and-A. With Donald Fuerst, MAAA, FSA, FCA, EA Senior Pension Fellow, American Academy of Actuaries; Eli Greenblum, MAAA, FSA, FCA, EA, Vice-President, Pension Practice Council; Cindy Levering, MAAA, ASA, EA, Member, Forward Thinking Task Force. Location: Capitol Visitor Center, SVC- 202. Notes: Media are asked to RSVP to David Mendes at 202-384-2075 or mendes@actuary.org so that they can be credentialed on-site.

VOTING RIGHTS ACT – BACKGROUND CALL – 2 p.m. The day following the bipartisan, bicameral introduction of the Voting Rights Amendment Act, staff leads of key co-sponsors will join legislative experts from diverse civil rights groups to explain key provisions of the bill and field questions from the media. This call will be for background information only and media that wish to listen or participate may not use quotes from the call. Nancy Zirkin, executive vice president of The Leadership Conference on Civil and Human Rights; Bart Forsyth, chief of staff to Congressman Jim Sensenbrenner; Perry Apelbaum, minority staff director and chief counsel to the House Judiciary Committee; Deborah Vagins, senior legislative counsel at the ACLU Washington Legislative Office; Tanya Clay House, director of public policy at the Lawyers Committee for Civil Rights Under the Law; Erin Hastings, senior policy analyst at the National Association of Latino Elected and Appointed Officials (NALEO) Educational Fund. Notes: Media interested in joining must submit a request to Scott Simpson at Simpson@civilrights.org, 202-466-2061. Capacity is limited.

BROOKINGS – NSA REFORMS – 2 p.m. – 3:30 p.m. Governance Studies and Foreign Policy at Brookings will hold a forum to examine the impact of President Obama's speech on NSA reforms and the implications on privacy, Internet commerce and national security. A panel of experts will discuss questions raised by these proposed reforms and what the President's speech means for how the NSA conducts its surveillance. After the program, speakers will take audience questions. Location: Saul/Zilkha Rooms, Brookings Institution, 1775 Massachusetts Ave. NW. Contacts: RSVP, 202-797-6105.

Last Laughs:

LATE NIGHT POLITICAL HUMOR.

David Letterman: [Commenting on the George Washington Bridge controversy] "And people are asking Chris Christie. ... This is what they want to know from Governor Chris Christie. ... They want to know what...did Chris Christie know? That's what they are saying. What did Chris Christie know and when did he eat it?"

Stephen Colbert: "As you know if you watch the show, then you know I am a huge fan of the heroes that work at the NSA. They have kept America safe. In fact, thanks to them, so far there has never been another September 11th, 2001. Don't believe me? Check your calendars. A recent study by the nonpartisan New America Foundation backs me up." Unidentified Speaker: "A new analysis of 225 individuals linked to al Qaeda and charged with terrorism since September 11th says NSA surveillance programs quote, 'Had no discernible impact on preventing acts of terrorism.'" Colbert: "See? I don't understand what people like Edward Snowden are so mad about. Is violating everyone's privacy really that bad if it doesn't even work?"

Stephen Colbert: "Besides, it does not have to work. It just has to feel like it's working. Because of what Director of National Intelligence James Clapper calls the 'peace of mind metric.' Now folks, I get that. NSA surveillance is just like the handful of placebo sugar pills I take every morning to prevent canine hip dysplasia. So far, so good, though I have developed type-two diabetes."

Jimmy Fallon: "This is what's going on in Washington. Of course, everyone's talking about the speech from President Obama, where he talks about Edward Snowden and how he wants to stop leaks like that from happening ever again. Well, he actually hasn't given the speech, yet. I just found it online. It looks like it's going to be good. Really good."

Jimmy Fallon: "First Lady Michelle Obama is making news over a recent interview, where she said that she is not ruling out plastic surgery or botox in the future. When asked to comment, Barack was like, 'Nope.'"

Jay Leno: "Well, a special New Jersey state assembly committee investigating Governor Chris Christie and this whole bridge deal is now getting ready to deliver subpoenas to former Christie aides. That is, unless traffic is so bad they couldn't get through."

Jay Leno: "Well, I read today that China is holding over \$1.3 trillion in US Treasury bonds, which is a new record – \$1.3 trillion. Economists say we should be concerned. Why? We're not going to pay them back."

Conan O'Brien: "Chris Christie busy dealing with his bridge scandal. He's responded to the crisis by hiring the legal team of Gibson, Dunn and Crutcher. Team Christie typically works with Ben and Jerry. He's a heavy man."

Conan O'Brien: "A prominent gay conservative says he's leaving the Republican Party because he now believes it is intolerant. Friends describe the gay conservative as slow to notice things."

EVENT MEMORANDUM FOR THE SECRETARY

TOUR OF BORD GULCH RANCH

DATE: January 21, 2014
LOCATION: Bord Gulch Ranch, Craig, Colorado
TIME: 1:30PM – 3:00PM
FROM: Sarah Greenberger, Senior Advisor, O/S (202)208-6726; Jim Lyons, Counselor to A/S LM (202)208-4318; Michael Bean, Counselor to A/S FWS (202)208-7400

I. PURPOSE

Governor Hickenlooper invited you to visit the Bord Gulch Ranch in Northwest Colorado to see first-hand an example of the conservation efforts being made across Colorado that benefit the Greater Sage Grouse.

II. PARTICIPANTS

- Governor Hickenlooper
- Ray Owens, Ranch Manager
- Neil Kornze, Acting Director, BLM
- Blake Androff, Deputy Director, O/S Communications
- Dan Ashe, Director, FWS
- Jim Cagney, BLM Northwest Colorado District Manager

III. AGENDA

This event will be open press; reporter(s) TBD to come along for tour.

11:40AM Wheels Up Denver, CO en route Craig, CO
12:29PM Wheels Down Craig-Moffat Airport, Craig, CO
1:15PM Arrive Bord Gulch Ranch
1:30PM Driving Tour of Bord Gulch Ranch
3:00PM Departure en route Colorado Northwest Community College for Stakeholder event

IV. BACKGROUND

Bord Gulch Ranch

Bord Gulch Ranch has been nominated CPW Wildlife Landowner of the Year – 2014 (the ranch is actually one of two winners and has been notified as such, but the formal announcement is on January 23, two days after the visit!). The ranch totals almost 16,000 acres with approximately 10,000 acres of that being privately deeded property, and its remainder being BLM lands. This Ranching for Wildlife Property is geographically separated, but in close proximity with north and south units. The north is the larger of the two, as it's in excess of 10,000 acres. This NE Moffat County Ranch is NW of Craig and directly south of Great Divide, the closest community in this sparsely populated portion of Colorado.

Historically, the property has been used for agricultural purposes. Portions of it had been in wheat, with other areas used for cattle and sheep grazing. Proving that a highly competent land manager and owner can still build a large working ranch in present times, Bord Gulch Ranch is a shining example. The process took 4 years to compile current acreages, and many more to refine its management. Manager Ray Owens excels at bringing in the right people to further develop his ideas, and works hard to personally implement the necessary actions to benefit the ranch. Sadly this year the owner, Tom Gilliland, passed away. Tom's wife and two sons continue their strong support of the Ranch.

Bord Gulch Ranch is actively pursuing a Conservation Easement due to their desire of protecting the property in perpetuity. With an eye on protection and promoting greater sage grouse populations in this core range with its largest sage grouse population in the state, they have implemented a variety of conservation actions that directly benefit the species. Although sage grouse are the impetus, a host of sage-steppe obligate species as well as big game species are also benefitting from the actions that have been taken.

The NRCS Sage Grouse Initiative (SGI) has been the key Conservation Program that provided much of the technical and financial ability for the wildlife improvements. The USFWS Partners for Fish and Wildlife Program (PFW) has also been a significant part of the overall effort leading to implementations of the SGI (see background, below). PFW now also has a second Agreement with the Ranch to further improve habitat conditions with additional water storage and artificial spring locations. Colorado Parks and Wildlife, HPP Program, provided funding for a previous water project and later fence work that occurred. The infrastructure improvements provide livestock access to a wider array of forage across the landscape. That improves overall residual grass and forb cover for nesting, early brood rearing, hiding, food, and thermal cover. In dealing with a landscape-level species, it's important to implement landscape-level improvements, these wildlife improvements benefit the entire Ranch and beyond.

Brood rearing habitats: springs, wet meadows, and riparian areas have been identified as a limiting factor for the regions sage grouse. Not long ago, there were just 3 reservoirs that provided all watering opportunities for livestock on the large property. Riparian habitats that are identified as limiting factors for the sage grouse populations in the region were over utilized, and the nearby upland locations were often more dirt than vegetation. In order to disperse and manage livestock over the 10,000 acres of private deed lands, a variety of practices were implemented. In dealing with landscape-scale species, the improvements not only directly benefit all the private acres, but also the Public Lands by their association. 18 pastures now have water to facilitate the required rest-rotation grazing plan. This is done in order to improve the grass understory and thereby improve nest success and brood rearing. In association with that work, artificial springs were created to increase insect production for chicks and improve residual grass and forb cover for adult birds

NRCS Sage Grouse Initiative

Launched by the NRCS in 2010, the Sage Grouse Initiative (SGI) is a partnership of ranchers, agencies, universities, non-profit groups, and businesses that embrace a common vision: wildlife conservation through sustainable ranching. You can get a sense for the scope of the partnership and the kind of work being accomplished by browsing their site: www.sagegrouseinitiative.com.

The NRCS states that the same conservation practices that promote healthy grazing lands also benefit the sage grouse and other wildlife. The same factors that negatively affect sage-grouse also affect the sustainability of native grazing lands:

- Land fragmentation
- Invasive species
- Unsustainable grazing systems
- Sod-busting
- Conifer encroachment

Farmers and ranchers can proactively work to conserve the sage grouse and help keep it from being listed under the Endangered Species Act (ESA). The NRCS uses Farm Bill conservation programs, including the Environmental Quality Incentives Program (EQIP) and the Wildlife Habitat Incentive Program (WHIP), to help ranchers improve habitat for the sage-grouse.

FWS Partners for Fish and Wildlife Program

The FWS Partners Program provides technical and financial assistance to private landowners and Tribes who are willing to work with us and other partners on a voluntary basis to help meet the habitat needs of our Federal Trust Species. The program's FY13 funding level was \$51.7 million.

The Partners Program can assist with projects in all habitat types which conserve or restore native vegetation, hydrology, and soils associated with imperiled ecosystems such as longleaf pine, bottomland hardwoods, tropical forests, native prairies, marshes, rivers and streams, or otherwise provide an important habitat requisite for a rare, declining or protected species. Locally-based field biologists work one-on-one with private landowners and other partners to plan, implement, and monitor their projects. Partners Program field staff help landowners find other sources of funding and help them through the permitting process, as necessary. This level of personal attention and follow-through is a significant strength of the Program that has led to national recognition and wide support.

V. BIOGRAPHY

Ray Owens is on the state level Colorado Association of Conservation Districts (CACD); Soil and Land Committee. In this capacity, he participates in promoting Agriculture Resolutions that benefit the membership statewide. Ray is also the Yampa/ White River/ North Platte/ Watershed President. He oversees and meets with each of the 5 Conservation Districts involved to further State Resolutions while providing a voice for landowners in these locations while working on specific watershed concerns. As a member in the Colorado First Conservation District in Moffat County, Ray is working locally with his neighbors in educating, promoting, obtaining funds, and providing information for enhancing and protecting the areas natural resources. Most recently, this includes representing their interests in working with the local Sage Grouse Working Group. As the CPW HPP Committee Sportsman Representative, Ray reviews each application brought to the group from the sportsman point of view and provides his recommendation to the larger committee. In this capacity, he also promotes landscape scale habitat improvements to alleviate wildlife conflicts.

EVENT MEMORANDUM FOR THE SECRETARY

MEETING WITH UTAH GOVERNOR GARY HERBERT

DATE: January 22, 2014
LOCATION: State Capitol, Governor's Office
TIME: 2:00PM – 2:45PM MST
FROM: Neil Kornze, Principal Deputy Director, BLM (202)208-3801; Juan Palma, BLM-Utah State Director, (801)539-4010

I. PURPOSE

To discuss public lands issues with the Governor, including Rep. Rob Bishop (UT-1)'s Public Lands Initiative.

II. BACKGROUND

In February 2013, Congressman Bishop sent letters to local elected officials representing Utah's public lands counties, inviting them to participate in an effort to develop Federal legislation that tackles many of Utah's land management issues using a new approach. The Public Lands Initiative would address the need for balanced conservation and development on a larger, multi-jurisdictional geographic basis—in this case, counties in eastern Utah. Four counties—Carbon, Daggett, Emery, and Grand—volunteered to participate in the initiative. Over the last 15 months, Representatives Bishop, Jason Chaffetz (R-3-UT), Chris Stewart (R-2-UT) and their staffs, have participated in more than 400 meetings with elected officials, tribal leaders, individuals, and a wide-range of other stakeholders to discuss the Public Lands Initiative. According to the Rep. Bishop, five shared objectives emerged from the hundreds of stakeholder meetings:

- Conservation - Provide meaningful, permanent conservation designations to protect Utah's most pristine and beautiful lands;
- Local Participation - Facilitate local involvement to ensure local communities are heard and have a seat at the planning table;
- A Voice in the Process - Ensure Utahns and concerned citizens across the country have their opinions taken into account when land management decisions are made;
- Certainty - Create certainty for local communities and land users by resolving long-standing public land disputes; and
Economic Opportunity - Accelerate energy development and boost outdoor recreation and tourism in appropriate locations to increase state education revenue, improve Utah's economy, and provide jobs.

When you met with Rep. Bishop in mid-April and again in late June 2013, you discussed with him his proposal for a “grand bargain” for public lands in multiple counties in eastern Utah. Rep. Bishop has indicated that he believes that a legislative proposal that includes wilderness and other conservation designations can “act as a currency” for other public land proposals including land exchanges, land transfers to counties for public purposes, control over roads, and designation of zones for oil and gas and other resource development.

As you have said before, the Department is happy to provide technical assistance including mapping and information on resources. We look forward to reviewing a written proposal in the future. The Department is always willing to work with locally driven stakeholder processes and to find solutions that make sense for all taxpayers and public land users.

The Department and the BLM are eager to resolve the lingering Wilderness Study Areas (WSAs) issues in Utah and throughout the West. WSAs were first established in the 1980s under the direction of section 603 of FLPMA; however, only Congress can make final decision to either designate these areas as wilderness or release them from WSA status.

There are a number of areas where we anticipate a divergence of approach between the Administration and Rep. Bishop including:

- Land exchanges with the State of Utah's School and Institutional Trust Land Administration (SITLA)—SITLA has lobbied for land exchanges without appraisals to move the process forward more quickly, the BLM consistently argues for a standard process using the Uniform Appraisal Standards.
- Wilderness designation and WSA release—no specifics have been discussed but numbers of acres. We can also anticipate a renewed discussion on hard vs. soft WSA release.
- NEPA Exemptions—this Administration has consistently opposed any exemptions from NEPA. We can expect a number of such provisions in any “grand bargain” legislation.
- Energy development—we expect that the proposal may include dedicated oil and gas development zones with energy development as a primary use.

On May 21, Rep. Bishop held a hearing before the House Resources subcommittee on Public Lands and Environmental Regulation (which he chairs) on “Perspectives on the Management of Federal and State Land.” Utah Governor Gary Herbert, who chairs the Western Governors Association, was the sole witness. Governor Herbert indicated that while he backed the notion of a “grand bargain,” he also wants the transfer of all public lands in Utah to the state government. The Governor indicated that he thought the two proposals were “complimentary.”

Much of the impetus for Mr. Bishop's proposal comes from the fear among counties in Utah that the Federal government will designate another monument in Utah, without the input of local stakeholders or governments. Specifically, Greater Canyonlands and the Red Rocks Wilderness Bill draw the attention of local advocates.

III. OTHER UTAH HOT TOPICS

BLM-UT Utah Recreational Land Exchange

- The Utah Recreational Land Exchange Act of 2009 directs the equal value exchange of State of Utah lands for BLM lands in eastern Utah.
- In addition to consolidating Federal and state ownership patterns, the exchange would provide the Federal government with valuable recreation and conservation lands and the state with lands that have a high potential for energy development.

- The BLM would acquire 58 parcels of high value recreation and conservation lands totaling 25,034 acres primarily in Grand County, while Utah would acquire 34 parcels of lands with high development potential totaling 33,516 acres primarily in Uintah County.
- The BLM-UT Moab Field Office will receive world class recreation lands, including Corona Arch on the side of Bootlegger Canyon and Morning Glory Arch, which is the 4th longest arch in the world.
- Recreation tourism contributes indirectly and directly to the economy of gateway communities like Moab, and the acquisition of high value recreation lands like those included in the exchange will be a socioeconomic boon to the region.
- Following approval to complete the exchange, the BLM-UT will sign the Decision Record and publish the Notice of Decision (NOD), initiating a 45-day public protest period and a 60-day Governor's consistency. The NOD will also include a notice of availability for the appraisal reports and revised exchange maps for 30 days.
- The legislation sunsets on Aug. 18, 2014.

BLM-UT Greater Sage-Grouse Planning Effort

- In March 2010, FWS ruled that listing the Greater sage-grouse under the Endangered Species Act was warranted but precluded due to the need to focus on higher priority species. FWS plans to reassess the status of sage-grouse populations and habitat by September 2015.
- Based on the identified threats to the species, the BLM is working through a collaborative land use planning effort to incorporate species and habitat conservation measures into approximately 98 existing BLM Resource Management Plans (RMPs) by September 2014. In Utah, the effort will revise 14 BLM RMPs and six Forest Service land use plans.
- The Utah draft EIS planning area includes 3,313,800 acres of sage-grouse habitat on surface lands administered by BLM-UT and the Forest Service and an additional 694,880 acres of sage-grouse habitat with underlying, Federally administered public mineral estate. The planning area also includes the portions of the Uinta-Wasatch-Cache and Ashley National Forests that extend into Wyoming.
- The planning effort includes all mapped occupied sage-grouse habitat in Utah for which the BLM and Forest Service have land management decision-making authority.
- On Oct. 31, 2013, the BLM Utah, working jointly with the Forest Service, issued a draft Environmental Impact Statement (EIS) for a 90-day public review and comment period that ends Jan. 29, 2014. In Utah, this planning effort will revise or amend 14 BLM RMPs and six Forest Service Land Use Plans (LUPs).
- The proposed management direction in the draft EIS applies only to BLM- or Forest Service-administered lands in the planning area. It does not apply to private lands.

Grand Staircase-Escalante National Monument (GSENM) Grazing EIS

- GSENM manages livestock grazing on 2.2 million acres of Federal lands in Kane and Garfield Counties, Utah and Coconino County, Ariz. These lands also include 319,000 acres of NPS lands in the Glen Canyon National Recreation Area and parts of the BLM-UT Kanab and BLM-Arizona Arizona Strip Field Offices.
- The BLM-UT is preparing an MMP amendment and EIS to replace existing grazing management decisions and to clarify livestock grazing use on GSENM for all stakeholders.

- The planning effort and analysis will be limited to decisions specific to livestock grazing management issues.
- On Nov. 4, 2013, the BLM Utah published a Notice of Intent to prepare a draft MMP amendment and EIS in the *Federal Register*, which initiated a public scoping period that ended Jan. 12, 2014.
- In mid-January, the BLM also hosted socioeconomic workshops in Escalante, Kanab and Cannonville, Utah. Participants provided information that BLM-UT will use as the basis for economic analysis to be included in the EIS.
- In 2000, the BLM began a planning effort to reauthorize grazing permits on Monument allotments that culminated with the October 2008 release of a draft EIS. After thorough review and consideration, the BLM-UT determined that the 2008 draft EIS was too broad, and did not accomplish its identified purpose or meet its identified need. The BLM decided to prepare a new draft MMP amendment and EIS.
- The BLM Utah proactively engaged the DOI Office of Collaborative Action and Dispute Resolution (CADR) to expand opportunities for public involvement and stakeholder engagement. With CADR assistance, the BLM Utah identified a third-party neutral to facilitate a successful planning effort through early and consistent public outreach that seeks to achieve broader stakeholder buy-in and build some level of consensus among affected communities and stakeholders.
- The BLM-UT anticipates releasing the draft EIS for public review in August 2014 and signing the ROD in mid-2017.

2008 Richfield RMP Litigation (Southern Utah Wilderness Alliance v. Burke)

- The Richfield RMP is the first of six Utah RMPs challenged in the SUWA v. Burke litigation.
- On Nov. 4, 2013, the U.S. District Court for the District of Utah held that the 2008 Richfield RMP and Travel Plan violated the National Historic Preservation Act (NHPA) and Off Highway Vehicle (OHV) "minimization criteria" regulations.
- The Court held that BLM's reliance on a Class I cultural resources survey to identify and inventory cultural resources on or adjacent to 4,277 miles of routes was not a reasonable and good faith effort to comply with Section 106 of the NHPA and directed the agency to conduct a more costly and time consuming Class III survey.
- The Court requested additional documentation on specific Wild and Scenic River decisions as well as further explanation for why a particular Area of Critical Environmental Concern was not included in the BLM's final RMP.
- The Court upheld the RMP and Travel Plan against plaintiffs' remaining claims holding that the agency took a "hard look" at the environmental impact of OHVs; adequately considered OHV damage in the context of climate change; and found that the Richfield planning area would meet all Federal and state air quality standards.
- Activist groups and environmental stakeholders have heralded the decision as "overturning" the entire Richfield RMP, while residents, local communities, and elected officials in southern Utah have vocally expressed their opposition due to fears that it will significantly impact socioeconomics in a rural area that is heavily dependent on the economic boost that ATV-driven tourism provides.
- BLM and Plaintiffs must simultaneously brief remedy by January 30, 2014.

Oil And Gas Production

- As of Jan. 15, 2014, there were 3,509 authorized oil and gas leases covering 3,713,547 acres in Utah. Authorized leases broken out by surface managing entity:
 - BLM-Utah Leases: 3,018
 - BLM-Utah Acres Under Lease: 3,124,547
 - U.S. Forest Service Leases: 240
 - U.S. Forest Service Acres Lease: 409,000
 - Tribal Surface Leases: 202
 - Tribal Surface Acres Under Lease: 117,595
- Additionally, 49 authorized leases are comprised of mineral estate underlying other surface-managing agencies, including the Bureau of Reclamation, National Wildlife Refuges, and National Parks.

Applications for Permit to Drills (APDs) Processed by BLM-UT Field Offices

- The figures below cover FY 2009-2014*. Of the 3,357 APDs that were approved between Jan. 15, 2012, and Jan. 15, 2014, 954 have not been drilled. As of Jan. 15, 2014, the BLM-UT had an APD backlog of 1,386.

Field Office	FY 2009	FY 2010	FY 2011	FY 2012	FY 2013	FY 2014*
Salt Lake	10	6	4	0	4	0
Moab	12	35	13	18	9	2
Price	23	56	112	123	68	2
Vernal – Tribal	121	216	208	334	441	122
Vernal Non-Tribal	730	422	602	868	1,050	196

*As of Jan. 15, 2014

Economic Impact of Oil And Gas Production In Utah

- The BLM-UT State Office currently administers approximately 3.9 million acres of public mineral estate that is leased for oil and gas development; since FY2010, the extraction of oil and gas resources and their introduction into the market generated more than \$15.1 billion in direct economic benefits and \$22.7 billion in total economic impacts.
- In FY2012, the State of Utah received more than \$164 million from royalties, rentals, and bonus bid payments for federal minerals, including oil and gas. The extraction of oil and gas resources and their introduction into the market generated more than \$5.5 billion in direct economic benefits and nearly \$8.3 billion in total economic impacts in FY2012.

IV. ATTACHMENT

- Biography of Governor Herbert

Gary Richard Herbert is Utah's 17th Governor. He took the Oath of Office on August 11, 2009.

Governor Herbert is focused on four cornerstones to strengthen Utah's economy: Education, energy, jobs, and the ability of the State to solve its own problems. Utah is considered a premier destination for business, jobs, and an enviable quality of life. Under Governor Herbert's leadership, Utah has been recognized as the "Best State for Business and Careers" by Forbes magazine and the "best State to live in" by GALLUP.COM, among other accolades.

The Governor currently serves as the Chair of the Western Governors Association (WGA), on the Executive Committee of the National Governors Association (NGA), and on the Education and Workforce Committee of the NGA.

Prior to becoming the state's chief executive, Governor Herbert served as Lieutenant Governor for five years. In 1990, the Governor was appointed to the Utah County Commission. During his 14 years as county commissioner, he served as president of the Utah Association of Counties and the Utah Association of Realtors, and as a board member of the Provo Orem Chamber of Commerce and Utah Water Conservancy District.

EVENT MEMORANDUM FOR THE SECRETARY

STAKEHOLDER MEETING ON SAGE GROUSE

DATE: January 21, 2014
LOCATION: Shadow Mountain Clubhouse, 1055 County Road 7, Craig, Colorado
TIME: 3:30PM – 4:30PM MST
FROM: Sarah Greenberger, Senior Advisor, O/S (202)219-2140; Terri Johnson

I. PURPOSE

The purpose of this event is for you to join Governor Hickenlooper in meeting with local stakeholders and elected officials, provide an overview of your visit to Bord Gulch Ranch, and lead a discussion with the group on the importance of these practices and the partnerships between the Federal government, states, private landowners, and other stakeholders in creating and implementing a conservation strategy for the sage grouse.

II. PARTICIPANTS

See attached list of participants.

III. AGENDA

This event will be closed press. We are still finalizing details but anticipate the following:

- The Governor will open the meeting and introduce you
- You will make brief remarks about your Ranch Visit
- Governor will open for Q & A, comments limited to 2 minutes.
- You will give closing remarks
- Governor will close

IV. Q&A

1) **“We're not getting enough credit for our conservation actions.”**

Suggested Response:

- Around 40 percent of greater sage grouse habitat is on private lands and those of you like Ray Owens who are taking actions to conserve that habitat are doing the most important thing you can to reach a place where the bird is conserved and a listing is not necessary.
- We greatly value your efforts and your partnership.
- But, you need to understand two considerations will guide how the FWS gives credit for those actions: first, the likelihood that they will be implemented, and second, the likelihood that the measures will be effective.
- There are lots of scientists at work proving these measures are effective.
- We need your help to demonstrate they are likely to continue into the future.
- One way you can do that is establish a track record of action year after year. That will get you credit.

- A way to get even more credit is to make a commitment to continue this work maybe through an easement or an agreement with the FWS.

2) “The Sage Grouse National Technical Team (NTT) report is terrible b/c . . .”

Suggested Response:

- It’s important to understand why the NTT Report exists.
- The BLM commissioned that report, using a team of state and federal experts to give guidance on how to protect that sage grouse until the planning process was complete. It was meant to preserve decision space for the bureau.
- BLM will consider measures for protecting sage grouse habitat contained in the NTT report, but it will also consider other alternatives and science submitted during the NEPA process.
- *[NOTE: Though it may not come up, you can note if it does that: The FWS’s Conservation Objectives Team (COT) Report will guide the FWS Service listing determination process.]*

3) “BLM’s maps and science are wrong.”

One of the counties, Garfield County, has put together its own “alternative” using paid consultants. The major contention from Garfield County officials has been that the BLM’s identification of Priority and General Habitat is overstated in the county. Their consultants have suggested that the overall habitat area is 93 percent smaller than what BLM used in its analysis. Other counties are paying consultants to do more detailed mapping though it is not clear any others have come up with such wildly different proposals.

Suggested Response:

- The BLM is evaluating this information along with other comments and input received from the public as it develops its final plan.
- We understand how important it is to get it right and that means taking all information and science submitted and evaluating it to the best of our abilities. BLM is doing that.

V. TALKING POINTS

- Banking background brought me to ranches across the west, and there are no better conservationists than farmers and ranchers.
- Threats to the land are threats to their livelihood.
- True here too where some threats to the sage grouse also threaten the sustainability of grazing lands, whether it’s invasive species or conifer encroachment.
- Visiting Bord Gulch Ranch today gave me a great sense of what’s possible, and I want to thank the Governor for bringing me.
- Committed partners like Ray and all of you are essential if we are going to develop and implement a scientifically sound and legally defensible landscape-level conservation

strategy for the sage grouse consistent with the need to maintain traditional uses of the land and support economic growth.

- Seeing what I did today provides an inspiration that we can get the job done both for the sage grouse and for those who derive their living from the land here in Colorado and throughout the West.
- I look forward to hearing more from you about the conservation actions your taking and what you see working well here in Northwest Colorado.

VI. BACKGROUND

Map of LPC habitat (including CO) and map of CO Sage Grouse Habitat (Gunnison and Greater) are attached.

Greater sage grouse: BLM manages more than 1.7 million acres of Colorado's Greater sage-grouse habitat, almost half of the entire Greater sage-grouse habitat in Colorado. Habitat fragmentation resulting primarily from infrastructure related to energy development and urbanization poses the primary threat to the bird.

State Strategy: Colorado has spent \$40 million on sage grouse conservation efforts and implemented a significant easement acquisition effort, protecting over 74,000 acres and is protecting additional acres through other means. The State wildlife agency has strong conservation recommendations to the oil and gas commission, but they are advisory and there is no data to show whether those recommendations have been followed. The state has begun that an assessment and expects to have the results in the next few months.

Status of BLM planning effort: The BLM/FS published their Draft Northwest Colorado RMP/EIS on August 16, 2013. The comment period closed December 2. On November 26, after a town hall meeting in northwest Colorado, the Governor's office asked for more time to submit state comments. Because BLM regulations allow for it, BLM agreed.

Overview FWS Comments on BLM plan: The FWS submitted comments on the BLM/FS draft plan on December 2 that questioned BLM's selection of a 5% versus 3% disturbance cap, the scope of the exemption process from that cap, and the manner in which mitigation was counted under that cap among other issues.

State Comments/Alternative: On January 14, Governor Hickenlooper's office submitted a 4-page letter with their comments calling them the "state alternative" along with much more detailed comments from Colorado Parks and Wildlife (CPW). The Governor's letter says it "serves as the Colorado state alternative;" however, the letter addresses very few of the issues in the PRMP/DEIS, and provides little detail on the issues that it does address. The State would like to include an opportunity to consult on site-specific projects and include exception criteria for stipulations designed to protect the grouse. Colorado wants to ensure the science used to make decisions in the EIS are sound and defensible.

The Governor's letter is also hard to reconcile with accompanying CPW comments. The discrepancies among the two are particularly evident with respect to the issue of disturbance caps. The Governor's letter describes disturbance caps as "one of the most troubling tools being

proposed in the PRMP” and urges BLM “to reconsider the use of disturbance caps unless they can be implemented with site-specific flexibility.” In contrast, although the comments from CPW note that disturbance caps are largely untested, they go on to say that a “3% disturbance cap is more scientifically defensible than a 5% limit,” and discuss published studies that “lend support to a disturbance cap less than 5%.” Moreover, CPW states that it is “concerned about the potential unlimited use of exceptions to the disturbance cap,” noting that “oil and gas operators have the ability to request unlimited exceptions to the cap, effectively rendering the cap meaningless.”

In general, the CPW comments strike a more cautious tone than is reflected in the Governor’s letter. For example, CPW asserts that BLM’s proposed “required design features” and “preferred design features” are not “sufficient to mitigate indirect effects. The Governor’s letter makes no mention of this. Similarly, the CPW comments urge BLM to “apply increased protection to existing leases,” whereas the Governor’s letter warns that measures that impact valid existing leases are “a clear violation of property rights.”

DOI will have to work with the state to reconcile these documents.

Affected counties and commercial interests are concerned that the plan amendments will place too much restriction on activities on public lands and have a significant negative socioeconomic impact. Some counties have expressed concern that their local, voluntary conservation plans are adequate and additional measures are not necessary. Garfield County in particular has taken this position, submitting its own alternative. Garfield County has also hired Americans for Civil Liberties to assist them during the sage grouse EIS.

Conservation groups have stated that they feel the anticipated conservation measures will not be strong enough to adequately protect the Greater Sage-grouse and its habitat.

Note: Included below is information on the Gunnison sage grouse and the Lesser Prairie Chicken in case the Governor raises these topics with you. We don’t expect them to come up in the meeting.

Gunnison sage grouse: FWS proposed to list the Gunnison sage grouse as endangered in January of 2013. Due to the MDL settlement agreement, the final listing determination was due by the end of March of this year. If the judge grants an extension requested on January 15, that deadline will move to May. The FWS proposal to list the species as endangered was based on an analysis of the threats contributing to the species’ decline across much of its range including: loss or fragmentation of habitat; lack of linkages or habitat connectivity between populations; invasive weeds; small populations; and the potential for disease, fire, or development to drastically affect an individual population’s viability.

Of the approximately 940,000 acres of occupied habitat for Gunnison Sage Grouse: 54 percent occurs on Federal lands, 41 percent occurs on private lands, 5 percent on State lands. **BLM Colorado manages 49 percent (389,495 acres) of habitat for the Gunnison Sage-Grouse.**

Since the proposed rule was published in January 2013, the Service received much information during the subsequent comment periods that has improved their understanding of the level of threats and the degree to which they have been ameliorated in the Gunnison Basin population.

The Governor's office has made it clear that they strongly oppose listing and there is extreme frustration in the state about the listing proposal because Gunnison County has developed and implemented a conservation plan that FWS considers to be a good start. All agree that threats in the Gunnison Basin have been effectively ameliorated and no additional actions by landowners in that county should be taken. Gunnison Basin contains over 87 percent of the total number of Gunnison Sage Grouse birds and has the largest remaining population. The Gunnison Basin Strategic Committee, a diverse stakeholder group, and Gunnison County Commissioners, are be complimented for their leadership in conservation of this largest population.

The FWS must take into account, however, the failure of other counties to implement similar plans that would protect the species range-wide. The other counties that support six smaller satellite populations of the Gunnison sage-grouse have recently become more active in seeking conservation options. However, work remains to be done to ensure remaining threats are alleviated in some of these six areas to ensure viability of the species as a whole. The Service is committed to working with stakeholders to identify necessary actions.

Local frustration is in part what led the Governor to invite you to see firsthand the good work ranchers in the state are doing on the ground because in their eyes the FWS may not be taking that work sufficiently into account.

Lesser Prairie Chicken: The FWS has proposed to list the LPC as threatened with a final listing decision due THIS MARCH. The FWS has also proposed a special 4(d) management rule based on a five state conservation plan developed by the Western Association of Fish of Wildlife Agencies. There is only a small population of LPC in Colorado and in a small corner of the state. The potential for land use conflicts is also less significant than for the grouse.

STATE OF COLORADO

OFFICE OF THE GOVERNOR

136 State Capitol
Denver, Colorado 80203
Phone (303) 866-2471
Fax (303) 866-2003

John W. Hickenlooper
Governor

January 14, 2014

Mr. Jim Cagney
District Manager
Northwest District Office
U.S. Bureau of Land Management
2815 H Road
Grand Junction, CO 81506

Dear Mr. Cagney:

Thank you for all of your hard work developing a Preliminary Resource Management Plan (PRMP) regarding the U.S. Bureau of Land Management's (BLM) conservation of the Greater Sage-Grouse (GrSG). We know that the Department of Natural Resources and Colorado Parks and Wildlife (CPW) have been working closely as Cooperating Agencies throughout the process, and we welcome the emphasis on science throughout the draft document.

Additionally, we appreciate your willingness to give the State of Colorado additional time to explore elements of GrSG conservation that might not have been adequately addressed in the PRMP. This letter serves as the Colorado state alternative, and we ask for your consideration as you move forward with developing a final plan. It is our hope that a management alternative can be developed that both safeguards the economic engine of northwestern Colorado and protects the GrSG sufficiently to preclude a listing under the Endangered Species Act by the U.S. Fish and Wildlife Service (USFWS).

Since 2000, the State of Colorado has spent over \$40 million on GrSG conservation efforts for the species. These expenditures include conservation planning and implementation, land protection, population and habitat monitoring, habitat treatments, restoration, research, and communications. Since 2004, CPW state wildlife managers have protected more than 74,000 acres of GrSG habitat, primarily through conservation easements. About 24,000 additional acres are managed by other conservation interests such as The Nature Conservancy and Cattleman's Land Trust. More than 50,000 acres of GrSG habitat have been improved through treatment since 2000. Working closely with private landowners, CPW has contributed to the 273,000 acres now managed through Wildlife Mitigation Plans, Grazing Plans, Ranch Management Plans, and Habitat Suitability Plans. These public/private partnerships are essential for managing resources in our state, and we hope to maximize their potential in future conservation efforts.

In 2008, when the GrSG was designed "warranted but precluded" from listing under the Endangered Species Act, a diverse group of Colorado stakeholders developed the statewide Conservation Plan for Greater Sage Grouse. This detailed plan was updated just this year, and our results clearly demonstrate the broad scope of work that is underway for conservation. That

update, called the Colorado Package, was submitted to both the BLM and the USFWS. Regulatory certainty is evident for many of our existing provisions, and we feel confident in the effectiveness of these measures. We urge our federal agencies to consider the progress documented there on state and private lands in any approach to conservation on federal lands.

We must keep the local context for this conservation challenge foremost in our minds. The communities of northwestern Colorado rely on access and productivity associated with public lands for their livelihood. With that in mind, any plan that the BLM ultimately promotes must accurately assess the socio-economic values that link people to the land in that area. Ranching and energy development are the two most important economic drivers in the region; the final RMP should propose an adaptive management approach that will conserve habitat for the GrSG while continuing to allow those industries to thrive. Such an approach will favor site-specific review and the consistent incorporation of new science over a one-size-fits-all management regime.

Grazing has not been identified as a primary threat to the stability of the species, and we must be vigilant that none of the conservation measures have unintended negative consequences for agriculture. In many parts of the range, existing grazing practices are working in concert with conservation efforts, and we should stick with these successful tools whenever possible. Alternative A, the "no action" alternative, provides some useful management guidance on this issue, but only where existing plans have been updated. Areas that are still operating under decades-old grazing regimes can be updated to reflect successful practices embodied in more recent plans.

Loss of habitat is the primary threat facing the long term viability of the species. Oil and gas development is a contributor to that loss, but the energy industry also provides necessary economic stability for the region. Any provisions the BLM advances must consider both dimensions of this resource issue. We are prepared to support conservation measures necessary to preclude a listing, but we do not want to see overly restrictive measures that would irreparably harm the energy industry. Indeed, the industry has a vested interest in conserving GrSG habitat because nothing would do more harm to their future operations than a listing. With that in mind, we suggest an approach that favors consultation over prohibitions on occupancy; within the 4 mile buffer from a lek, energy companies should be required to consult with wildlife experts (either BLM or CPW) before beginning operations. If Best Management Practices have been identified that can minimize the impact of energy access, operators should be required to adopt those once a site visit has been conducted. Our existing wildlife consultation regulations are administered by the Colorado Oil and Gas Conservation Commission; we are currently conducting a review of those practices and anticipate fresh insight into their effectiveness in the first quarter of 2014.

One of the most troubling tools being proposed in the PRMP is the use of disturbance caps. This is an untested management approach, and it raises at least four implementation questions.

- First, what percentage will define the cap? It is our understanding that there is limited scientific evidence that supports either of the two numbers currently in play for anthropogenic disturbance (3% and 5%). With that in mind, we urge the BLM to pursue a flexible approach that allows managers to learn as they go. Imposing an arbitrary cap on the landscape could have catastrophic impacts on resource use.
- Second, how will the cap be measured and enforced? We've heard widespread concerns about lack of staffing at BLM. Developing and tracking a complex new management tool will require a consistent and long term investment of time and resources; if the BLM lacks these resources, perhaps another approach should be considered. We also understand that federal agencies do not have jurisdiction over private property, and this should be made explicit in the final RMP. Calculations of disturbance toward a cap should not include private property.
- Third, how will we know if the cap is working to conserve habitat? Already, we see that some of the management zones with the healthiest GrSG populations are the same zones with the highest disturbance percentage. We should learn from these circumstances and not seek to undermine them. Rigorous monitoring and a feedback loop will help us fine-tune implementation.
- Finally, will the establishment of a disturbance cap lead to a cascade of unintended consequences? For example, valid existing energy leases may be impacted, especially if buffer distances from leks are restricted and overlaid on disturbance cap limitations. This is a clear violation of private property rights; we can't support it, and we suspect the courts will share our view. Similarly, grazing lessees may find their permits changed when it comes time to renew.

Given the critical importance of these industries to the economic health of the region, we urge the BLM to reconsider the use of disturbance caps unless they can be implemented with site-specific flexibility.

Mitigation is a promising approach for allowing industrial access without compromising aggregate habitat quantity and quality. However, the existing plans for mitigation in the PRMP are incomplete. Without more detailed information about how this program would work, we are hard pressed to support it. Please work closely with the appropriate state agencies engaged in the development of the Colorado Habitat Exchange; this emerging program may be a good fit for the BLM.

Page Four

Adaptive management is a widely accepted tool for managing resources. Rather than imposing a one-size-fits-all prescription, we urge the BLM to consider local conditions before, during, and after any tools are deployed. In places with healthy and thriving bird populations, restrictions should be more flexible; in locations with struggling bird populations, restrictions should be tighter. Those parameters should then be revisited regularly. Evolving science will help us better understand what the species needs to succeed. Our improved understanding can then inform future regulatory terms, and the cycle of adaptive management will allow us to be both responsive and proactive.

Lastly, we urge the BLM to maximize the benefits available through public-private partnerships. We believe opportunities exist to protect additional acres of private land, and are working closely with industry, landowners, and land trusts to secure new easements. The Colorado Habitat Exchange exemplifies the gains to be made by connecting private landowners, energy companies, and state and federal natural resource agencies. When industry and agriculture are key players in the development of a conservation plan, we all stand to benefit. Reconstituting and strengthening the role for local working groups in the northwestern region is one way we might guarantee a seat at the table for all stakeholders as this effort progresses.

The state has been, and will continue to be, an active partner through the Cooperating Agency process. We remain committed to the use of science in protecting imperiled species; this approach is central to who we are as Coloradoans. Attached are two documents that together comprise Colorado's best available science: a cover letter from CPW and a detailed matrix that parses each of the provisions in the PRMP. Throughout, CPW has tried to walk a narrow line, identifying parameters that are restrictive enough to preclude a listing, but not too restrictive for the socio-economic health of the region. Colorado has a long track record of success working across party lines to find cooperative agreement in how we manage our iconic natural resources.

We look forward to ongoing discussions as we build a final plan from this initial draft.

Sincerely,

A handwritten signature in black ink, appearing to read "John Hickenlooper". The signature is fluid and cursive, with a large initial "J" and "H".

RE: CPW Comments for the Draft Greater Sage-Grouse Programmatic Resource Management Plan/Environmental Impact Statement, December 2, 2013

Dear Mr. Cagney:

Colorado Parks and Wildlife (CPW) appreciates the opportunity to work with the Bureau of Land Management (BLM) on the review of this Draft Greater Sage-Grouse Programmatic Resource Management Plan/Environmental Impact Statement (PRMP/EIS). CPW believes that it is in the best interest of the people of Colorado to cooperate with the Bureau of Land Management (BLM) in the development of the PRMP/EIS with the goal of providing sufficient protections for the greater sage-grouse (GrSG) and their habitats, so that a listing of the grouse will not be necessary. We also believe that the effects of a listing on the landscape and economies of northwest Colorado would be far more onerous than most of the measures currently being contemplated to avoid the need to list the species.

Since 1995, CPW has worked with federal, state, local governments as well as local working groups to develop local conservation plans and management actions with the purpose of protecting the GrSG and avoiding a listing under the Endangered Species Act. Beginning in early winter 2012, CPW has engaged with the BLM as a Cooperating Agency on the development of a Northwest Colorado PRMP/EIS. CPW staff have attended all of the Cooperator Meetings and assisted with the development of the draft PRMP/EIS.

CPW recommends the creation of a new, hybrid alternative, crafted largely with provisions from Alts. B and D. Specific line-by-line comments are detailed in the CPW comment table (attached). Here, we offer a broad summary of topics that we focus on throughout that table.

Disturbance Cap Threshold

The use of disturbance caps is a new management technique. This conceptual approach is largely untested, and CPW requests that the BLM use a cautious approach toward implementation. Two dimensions of the concept warrant discussion here: 1) the appropriate proportion of disturbance, and 2) the types of ecological sites to which the disturbance cap should apply.

- 1) We believe that the U.S. Fish and Wildlife Service (FWS) would likely consider a 3% disturbance cap threshold with only minor discretion for exemptions more protective of sage-grouse than a 5% cap with essentially unlimited discretion for exemptions. We hold that opinion because minor discretion offers more regulatory certainty than a large degree of discretion and because 3 % is more directly tied to findings and recommendations published in the body of scientific research related to oil and gas development in GrSG habitats. The 3 % disturbance cap is more scientifically defensible than a 5 % limit; still, research on this topic is largely limited to impacts from oil and gas well pad densities only.

Existing practices are not sufficient to conserve greater sage-grouse. Sage-grouse literature contains evidence that oil and gas development and other disturbances can be detrimental to the species. For example, recent peer-reviewed literature (Doherty et al. 2010, Harju et al. 2010) has shown that at well pad densities of 1 to 2 per square mile, negative effects are detectable either in the form of lek persistence or number of males attending leks. Both papers cited began to detect effects once surpassing 1 pad per section within 2 (Doherty) to 5 (Harju) miles of a lek. These findings lend support to a disturbance cap less than 5%, although we recognize that Wyoming's core area strategy relies upon a 5% threshold (albeit with limited exceptions). We urge the BLM to confer with CPW and the FWS on this important threshold.

- 2) CPW supports the use of ecological sites as described in Alt. D, if; 1) the language is changed to say "ecological sites capable of supporting "*Sage-grouse* habitat" – rather than "sagebrush" habitat – in PPH and 2) that this phrase be used consistently throughout the document. In Colorado, other vegetative types in addition to sagebrush are critical components of sage-grouse habitat in several populations. While this is particularly true in the PPR population, sage-grouse in several other populations make extensive use of other vegetative types including grasslands and mountain shrub communities.

Exception Language (Cap Management and Lease Stipulations)

Alt. D frequently references exception language contained in Appendix E. The exception language of Appendix E, Stipulations Applicable to Fluid Mineral Leasing and Land Use Authorizations, describes the terms and conditions in which an exception may be granted. The language is as follows:

Exception: "Where data-based documentation is available to warrant a conclusion that, a) GRSG populations in the applicable Colorado MZ are healthy and stable at objective levels or increasing, and b) an exception, modification, or waiver would not adversely affect GRSG population due to habitat loss or disruptive activities, the Authorized Officer may grant an exception, modification, or waiver."

We are concerned that the exception language has not been fully examined for unintended consequences that are likely to result from its liberal application. Generous provisions for exemptions also reduce the degree of regulatory certainty sought by the FWS. The next four sections describe some of these unintended consequences.

Population Numbers as Criteria

CPW believes that using population-based thresholds as a measure for granting exceptions is flawed. For example, localized lek/population counts are not a reliable predictor of long-term species viability and provide an inadequate criterion for site-specific management decisions. CPW believes the exception criteria should be focused on the threats, thus measuring habitat loss and disruptive activities rather than sage-grouse population trends. Focusing on threats rather than the status of the population will enable BLM and all involved stakeholders to effectively participate in conservation of all populations of GrSG within all Colorado Management Zones (MZ).

As written in Alt. D, the exception criteria language will be difficult to apply effectively. Populations vary in response to environmental conditions and are not a good tool for directing land use decisions without an appropriate long-term population trend analysis. Populations fluctuate over a ten-year period (more or less) and it would be inaccurate for BLM or CPW to state at any given point in time that the population is “healthy and stable at objective levels or increasing,” since we know that short-term upward fluctuations may mask an overall downward trend (and vice versa). Similarly, numerous exceptions granted for disturbance above the cap would not show impacts to GrSG populations for several years after the exceptions were granted. Recent findings in scientific literature suggest that impacts from energy development and detection of declines in male lek counts have a time lag that may take at least 4 years (Walker et al. 2007) and up to 9 years to occur (Harju et al. 2010) and should be incorporated and analyzed in the Environmental Consequences section.

Appendix E, Stipulations

CPW recognizes the need for exceptions to stipulations. However, we believe the language as proposed in this draft document (Appendix E) is insufficient to provide adequate protection for GrSG. Furthermore, we feel protection under Alt. D (with the opportunity for liberal exceptions) does not provide sufficient regulatory certainty that implementation of protections will be sufficient.

Unlimited Exceptions to the Disturbance Cap

CPW is concerned about the potential unlimited use of exceptions to the disturbance cap. As we understand the application of the exception criteria, oil and gas operators have the ability to request unlimited exceptions to the cap, effectively rendering the cap meaningless and potentially undermining the regulatory certainty advocated for by the FWS. CPW believes the exceptions above the cap should be extremely limited in number and scope, should be approved at a level above that of the Field Office (preferably at the District Office level to provide consistency and assure regulatory certainty) in consultation with the CPW and FWS and should be tracked when they do occur.

A range of creative solutions could be applied to remedy the cap exception dilemma. For example, the BLM could create a two tiered exception cap. The two tiers would consist of a tier for all exceptions while the second tier would be more restrictive and be applied when

disturbance reaches one percent below the cap. The process would not preclude development but would effectively “apply the brakes” to the existing rate of development as the disturbance cap is approached and would be administered by individual CO Management Zones (MZ).

Lack of Feedback Mechanism

CPW requests that a feedback mechanism be included in the EIS so that BLM and others can determine the effectiveness of the disturbance cap process. The feedback mechanism should include a threshold disturbance amount that triggers the feedback process and it should include changes resulting from the process. The feedback mechanism can easily be tied to BLM’s five-year RMP review as outlined in the BLM’s Land Use Planning Handbook, H-1601-1 (BLM 2005a).

We are uncertain if the spatial tracking mechanism for disturbance will be developed in a timely manner to satisfy the FWS desire for regulatory certainty. We question whether the proposed five-year period (the period the White River FO has given themselves to build and implement a tracking system) will be satisfactory to the USFWS. We are also unclear whether the system developed for the White River RMPA is transferrable to all of NW Colorado. Cap tracking could be problematic where FO boundaries and management zone boundaries overlap (e.g., within MZ 17, PPR, there are three BLM FOs vying for a composite cap).

Percent of Canopy Cover

CPW agrees with the idea of managing sage-grouse habitat integrity at a landscape scale (70-30 % disturbance cap) as proposed in Alt. D. However, BLM’s proposed sagebrush canopy cover values are below the minimums for breeding and winter habitat in Colorado as defined in the Colorado Conservation Plan (2008). Alt. D suggests 12-15% cover, which is insufficient; in North Park, birds have been documented nesting in sagebrush with canopy cover up to 40 %. Ecological Sites Supporting Sagebrush, Appendix B, Figure 2-1, and used in Alt. D excludes areas that support lek sites in Middle Park. CPW is aware of four lek sites in Middle Park that occur in what is mapped as irrigated agricultural land.

Additionally, we are concerned that the BLM will be unable to map 12 to 15 % canopy cover throughout Northwest Colorado. Fine scale mapping of canopy cover over a large area will be time consuming and the timeline may exceed the conclusion of this PRMP/EIS.

Mitigation

Alts. B and D frequently refer to “effective mitigation” but fail to define it. To date, sagebrush mitigation projects have not demonstrated effectiveness. In addition, recovery from disturbance takes a long time (up to 20 or more years) (Hess and Beck, 2012) to achieve proper function and condition for GrSG nesting and winter use. Given the mitigation proposals in Alternative B and D, CPW believes that mitigation protocols should be developed that incorporate the following priorities in order of importance, 1) habitat **creation**, 2) habitat **restoration**, or 3) habitat **enhancement**.

- **Creating new habitat** will likely have the greatest population and landscape-level response. Creation of habitat in areas not currently occupied (i.e., “vacant or unknown”) or in areas that are potentially suitable should concentrate on relatively large-scale efforts, as opposed to numerous small-scale efforts. Efforts to create habitat should focus on areas that (1) have been type-converted, such as cheatgrass monocultures, extensive areas lost to fire, etc.; or (2) have experienced successional progression to non-productive habitat for GrSG.
- **Restoring degraded sites to healthy plant communities** (e.g., mismanaged rangelands or riparian areas) will have the second highest population and landscape-level response. Restoring degraded habitats should focus at the landscape-level where habitat improvement can result in restoration of ecological function and biotic diversity. Careful analysis must be given to the root causes of the current community condition, the local site capability, whether ecological thresholds have been crossed, and address likely limiting factors for GrSG populations. Treatments should be large in spatial extent, range, scope or quantity. However, in occupied habitats, size and distribution of treatments should be designed to minimize impacts to existing greater sage-grouse populations. Initially, GrSG individual and population-level responses to treatments in degraded habitat may not be positive.
- **Enhancing functioning habitats.** These types of treatments will have a low or non-measurable population and landscape-level response, and should be avoided where other options are available. If adopted for mitigation, treatments of functioning habitats should be small and distributed irregularly across the landscape. The exception may be where treating functional habitats is necessary to maintain connectivity between two large blocks of habitat at risk from current or future development. This mitigation approach has a limited subset of mitigation opportunities.

Reclamation and Cap Management - Appendix F and G

Disturbance cap management as described in various locations in the DRMP/EIS is confusing. As CPW staff understands the cap management process, there are two (maybe three) measurement standards to determine when reclamation has reached a stage where the reclaimed acreage can be removed from the cap accounting process. There is an anthropogenic disturbance cap (5 % as proposed in Alt. D, 3% as proposed in Alt. B) and a total disturbance cap of 30 %. Criteria for the removal of disturbed acres from the anthropogenic disturbance cap are set forth in Appendix G, while criteria for removal of disturbed acres from the total disturbance cap are described in Appendix F. This creates some confusion as to when and where these standards are applied to cap management. It is also unclear to CPW where (e.g., PPH, ADH or as stated on page G-27 “on sage-grouse habitats”) standards would be applied. CPW requests that BLM clarify where the different standards are applied; CPW suggests a table comparing the various mechanisms to improve clarity and understanding.

In most cases, newly-reclaimed habitat is not representative of pre-disturbance habitat and not sufficient to meet the basic habitat requirements of greater sage-grouse. Some measure of habitat suitability should be required before reclaimed habitat acreage is removed from the

calculated proportion of disturbed acreage. Otherwise the percentage of disturbed habitat could significantly exceed the intended 3-5% anthropogenic disturbance cap or 30% total disturbance cap.

Appendix G, Reclamation Applicability to NW Colorado

CPW is concerned that Appendix G, which was developed for the White River Field Office (WRFO) may not be directly transferrable to all of CO MZ's in Northwest Colorado. The WRFO reclamation plan was developed based on an estimate of up to 2,556 well pads, with an average of eight wells per pad. Additionally, the WRFO projected rate of development would be much higher than would be expected in other Northwest Colorado Field Offices. The reclamation plan was designed to expedite reclamation in a high density, fast rate of development area, and while this may work well for the WRFO, it should be modified for other FOs in Northwest Colorado.

Appendix G should be revised so that it will focus on GrSG habitat instead of exclusively meeting minimal reclamation standards (soil stabilization and erosion control). If implemented as proposed, the criteria and time frame for reclamation would effectively result in setting back functional sagebrush habitat to an early seral stage across Northwest Colorado which ultimately may be detrimental to all life stages of GrSG.

In addition to the development rate, CPW believes that the precipitation zones and vegetation communities in the WRFO are significantly different than other areas of Northwest Colorado and that Appendix G should be modified to include the differences.

CPW would like BLM to include stronger language requiring shrub plantings as COA in the reclamation plan. CPW recognizes that there may be some economic objections to this request; however, CPW staff believes that the short-term cost will be far outweighed by the long-term benefit of removing disturbance from the cap space. CPW believes that shrub plantings will shorten the time interval necessary to remove acres of disturbance from the cap.

Existing Leases

CPW understands that valid, existing rights are subject to original lease provisions. CPW believes that within PPH and specifically within the 0.6 mile NSO buffer described in Appendix E, stipulation GRSG ADH NSO-46d should be voluntarily applied by the lease holder (requested by BLM); if that does not occur, then BLM should evaluate and apply the NSO 46d stipulation according to the guidance provided in the "Yates" Case which allows BLM to apply increased protections to existing leases.

The vast majority of PPH is already leased and contains few conservation measures for sage-grouse. According to Table 3.4, page 300, only 471,970 acres of unleased Federal Mineral Estate remain available for lease within PPH. Application of GRSG ADH NSO-46d, or a review for the applicability of the "Yates" IBLA decision, would provide some assurance that existing leases are examined and afforded the opportunity for adequate protections for GrSG.

Grazing

CPW believes the threat of grazing on GrSG in Colorado is minimal. In general, we support the current grazing management regimes administered by BLM. Current grazing practices are better for sage-grouse than what is contained in existing plans. Thus, we support current practices as opposed to Alternative A (No Action), because endorsing the no action alternative could suggest the BLM needs to revert to outdated grazing standards. We believe that Alt. D more closely represents current grazing practices than any of the other alternatives. CPW recommends that allotments be maintained to optimal land health standards and incorporate best management practices that benefit GRSG. Allotments that may be available for retirement and reassignment as grass banks should be selected carefully and with full buy-in from the Lessee. Retired allotments should be managed for the maximum benefit of GRSG.

Indirect Impacts

Indirect impacts (e.g., noise disturbance) are marginally accounted for in Alt. D through Required Design Features (RDF), attached as a Condition of Approval (COA). CPW does not believe that RDF and preferred design features (PDFs), (Appendix I) are sufficient to mitigate indirect impacts. The document describes PDFs as being incorporated into management activities where necessary, appropriate, and/or technically feasible: CPW believes the language applied to PDFs should be more rigorously applied (as a COA) to help ensure regulatory certainty. Indirect impacts are one of the primary reasons for imposing a disturbance cap and are the reason that exceptions to any disturbance cap should be limited in number and extent.

Power line right-of-ways

CPW staff has actively participated in cooperating agency meetings for this PRMP/EIS as well as the TransWest Project/EIS and Gateway South Project/EIS. CPW has been actively engaged with the BLM and project proponents and have provided significant input and comments for alignments. The specific alignments of both lines and the relationship to GrSG habitat and impact mitigation are still largely unknown to CPW staff. As CPW staff understand, the two power lines originating in Wyoming will propose different criteria for GrSG mitigation than what is being proposed in the Colorado PRMP/EIS. CPW would like clarification as to which mitigation measures will be applied so that CPW and BLM are assured that adequate protections are provided. CPW expects that the two Wyoming projects will incorporate sufficient protective measures for greater sage-grouse and will be consistent with the Colorado Programmatic Greater Sage-Grouse EIS. CPW expects that impacts from construction of these two power lines within NW Colorado will be mitigated within NW Colorado

Other specific errors in the EIS that need to be corrected are identified in Appendix A.

As a cooperating agency and state partner, Colorado Parks & Wildlife appreciates the opportunity to provide these recommendations for inclusion in your analysis of the alternatives in the Draft PRMP/EIS. We believe this important project is a matter of great interest to the residents of Colorado.

Sincerely,

A handwritten signature in black ink, appearing to read "Bob D. Broscheid". The signature is fluid and cursive, with a large, dark, teardrop-shaped flourish at the end.

ENDANGERED SPECIES:

Colo. governor urges BLM to be more flexible on sage grouse protection

Scott Streater, E&E reporter

Published: Wednesday, January 15, 2014

Colorado Gov. John Hickenlooper (D) has raised concerns that a federal plan to manage greater sage grouse habitat across the northwest corner of the state does not properly balance existing land uses such as energy development and ranching with species conservation.

Hickenlooper, in a four-page letter sent yesterday to the Bureau of Land Management, wrote that he is concerned that the proposal covering greater sage grouse habitat across 1.6 million acres of federal lands is too restrictive on surface activity.

Specifically, Hickenlooper wrote that he is concerned about surface disturbance caps across nearly two dozen proposed management zones that could restrict surface disturbance inside the zones to between 3 and 5 percent. BLM's proposal also evaluates no surface occupancy inside 4-mile buffers around grouse breeding areas, called leks.

The proposals are outlined in a voluminous draft environmental impact statement (EIS) and draft resource management plan amendments released last summer (E&ENews PM, Aug. 15, 2013). A final sage grouse plan for federal lands in northwest Colorado is not expected to be finalized until next year.

"The communities of northwestern Colorado rely on access and productivity associated with public lands for their livelihood," Hickenlooper wrote in the letter, addressed to Jim Cagney, BLM's Northwest District manager in Grand Junction, Colo.

"With that in mind, any plan that the BLM ultimately promotes must accurately assess the socio-economic values that link people to the land in that area," he wrote. "Ranching and energy development are the two most important economic drivers in the region; the final RMP should propose an adaptive management approach that will conserve habitat for the [grouse] while continuing to allow those industries to thrive. Such an approach will favor site-specific review and the consistent incorporation of new science over a one-size-fits-all management regime."

Hickenlooper wrote that the possible disturbance caps are "an untested management approach," and he labeled them one of "the most troubling tools being proposed" by BLM. He also questioned how the caps would be enforced and how the agency would gauge their effectiveness. And he noted that the caps could lead to "a cascade of unintended consequences," such as interfering with valid existing energy leases, which could lead to litigation.

"This is a clear violation of private property rights; we can't support it, and we suspect the courts will share our view," he added. "Given the critical importance of these industries to the economic health of the region, we urge the BLM to reconsider the use of disturbance caps unless they can be implemented with site-specific flexibility."

Instead, he highlighted in the letter a number of state and private efforts and partnerships that have proved successful in protecting or restoring tens of thousands of acres of grouse habitat without severely restricting land-use activities, even before the Fish and Wildlife Service in 2010 placed the grouse on a list of candidate species for federal protection.

Hickenlooper's letter underscores the enormous challenge the Obama administration faces in trying to protect the greater sage grouse and its dwindling sagebrush steppe habitat, which stretches across 11 Western states from Colorado to Oregon.

The proposed EIS/RMP for the agency's Northwest District in Colorado is one of 15 separate draft EIS/RMP amendments released last year as part of the Obama administration's ongoing effort to develop a "National Greater Sage-Grouse Planning Strategy" that would stretch across 10 Western states and cover the estimated 47 million acres of sage grouse habitat under BLM control.

BLM's plan for the Northwest District in Colorado covers 1.6 million acres, much of it prime grouse habitat. Nearly half the grouse's habitat in Colorado is on federal land in the district.

That's one reason why Hickenlooper's criticisms of the proposed disturbance caps are incorrect, said Mark Salvo, director of federal lands conservation for Defenders of Wildlife in Washington, D.C.

Salvo said the best available science recommends limiting surface disturbance and development density in priority sage grouse habitat and implementing protective lek buffers to conserve breeding, nesting and brooding habitat.

"Sage grouse are highly sensitive to habitat disturbance and require large expanses of healthy sagebrush steppe to survive," he said. "This means protecting the last, best sagebrush habitat and locating future development elsewhere."

But BLM's proposal as outlined is too restrictive, said Kent Holsinger, a Denver natural resources lawyer who has represented the energy and agricultural industry in litigation involving sage grouse.

Holsinger said he appreciates the governor's leadership on the complicated grouse issue, in part because he said he believes "states are much better suited to manage wildlife than the federal government."

"Federal agencies are proposing draconian measures that indicate the public lands are closed for business," he said. "The 'science' they use to justify these restrictions is fundamentally flawed and fails to meet their own standards of quality, integrity and objectivity. Proposed changes to land-use management plans for sage grouse -- whether the bird is listed or not -- will harm public land use, the environment and the economy for potentially decades to come."

BLM response

Hickenlooper's letter did not catch BLM officials by surprise.

The agency has been working closely with the state on the grouse plan, and officials have been "aware of their concerns" about it for some time, said David Boyd, a BLM spokesman in the Northwest District in Silt, Colo.

"We will continue to coordinate with them and the other cooperating agencies, which include a number of counties, as we develop the proposed plan and final EIS," Boyd said.

In the meantime, he said, "We are currently reviewing the 7,000 comments we received on the draft EIS."

Hickenlooper's comments and suggestions are not out of line with a number of comments BLM has received on the proposed EIS and RMP amendments since August.

"The disturbance caps ... are overly broad," and the "oil and gas industry is being specifically and unfairly targeted" in the plan, Andy Nickel, director of the Grand Junction-based Western Colorado Jobs Alliance, wrote in a Nov. 19 letter to BLM.

The public comment period deadline on the draft EIS and RMP amendments was Dec. 2, and a final EIS is expected to be released this summer, Boyd said.

Hickenlooper concluded in his letter to BLM that the state will continue to work with federal regulators but that he hopes the final plan will be flexible.

"Rather than imposing a one-size-fits-all prescription, we urge the BLM to consider local conditions before, during, and after any tools are deployed," he wrote. "In places with healthy and thriving bird populations, restrictions should be more flexible; in locations with struggling bird populations, restrictions should be tighter. Those parameters should then be revisited regularly.

"Evolving science will help us better understand what the species needs to succeed," he added. "Our improved understanding can then inform future regulatory terms, and the cycle of adaptive management will allow us to be both responsive and proactive."

Cc: Jayo David <david_jayo@ios.doi.gov>, Androff Blake <blake_androff@ios.doi.gov>

All -

Below is a message that David received from Kip Tindell, CEO of the Container Store. I know Kip from before and David and I have been pitching his company for support of the youth initiative. When I spoke first with Kip about that, he mentioned that he has a large ranch in Gunnison Sage Grouse territory and expressed some concern about assumptions the FWS was using in its analysis. One reference he made was that there are no birds above 9k ft., even though the FWS was looking at that habitat as important. I mentioned this to Dan at the time and he said he would look into it.

In this message from Kip, he is asking that I meet with Doug Washburn, head of Gunnison Stock Growers Assn. on my upcoming trip.

So, I turn this over to you for consideration (mainly Dan for content and Booch to consider the scheduling). We owe Kip an answer and Dan is probably in the best position to respond so I don't get in the middle of things. It is pretty clear that the information that Kip expresses regarding the bird is different from the reports I have heard.

Please let me know how we should handle and whether a meeting is possible and/or advisable, at least for Dan and possibly for me (I defer to Dan and Laura on that). In the meantime, I will ask David to quickly respond and say that he has passed the message along to trip organizers to consider whether it works with a very packed schedule. Also to clarify that my meetings are to discuss the Greater Sage Grouse (and not the Gunnison).

Thanks,

Sally

Thanks, David – so appreciate the feedback! Means a lot coming from you! So... on a completely separate note and one I had mentioned to Sally in our last call, if you don't mind, can I share some thoughts about another topic I'm passionate about? The Gunnison Sage Grouse and its potential listing. My wife and I are so proud of our ranch in Gunnison and over the years and years of being there, we have developed some wonderful relationships with our "neighbors"- with one of our shared causes being the Gunnison Sage Grouse.

I heard from our closest neighbor and dear, dear friend Burt Guerrieri that Sally is headed to Denver next Tuesday to meet at John Salazar's office concerning Greater Sage Grouse. Well, it turns out Doug Washburn, the President of the Gunnison Stockgrowers Assoc., will be in Denver that same day.

What do you think the chances are of arranging a meeting where Sally and Doug can visit about the Gunnison Sage Grouse? I'd imagine her schedule is packed full but thought I'd ask. As you probably know the final decision to list or not list the Gunnison Sage Grouse as an Endangered or Threatened species is this coming March.

For more than a decade the Gunnison community, led by Gunnison County and Gunnison Stockgrowers, has put forth an extraordinary effort to help the Gunnison Sage Grouse and preempt the need for a federal Endangered listing. There have been numerous on the ground projects and changes in our community to accommodate Sage Grouse habitat. Literally millions of dollars have been spent. This proactive effort is unmatched anywhere in the United States. We're so proud that a representative of the US Fish & Wildlife Service has been a participant at the table during this orchestrated effort the entire time.

The purpose of a meeting would NOT be to "plead" to Sally but to just have a conversation so that we can all be on the same page operating from the same information. It turns out locally the Gunnison Sage Grouse is thriving and has clearly established a long term trend of population increase. Although some Gunnison Sage Grouse populations in other parts of the Colorado are smaller, the Gunnison Sage Grouse as a species has a miniscule statistical chance of trending toward actually being extinct. I know that the US Fish & Wildlife service actually agrees with the previous sentence and states so many times in their documentation on the issue.

With all of that said, what do you think? Feel free to contact me or Burt Guerrieri (b)(6) cell) or Doug Washburn (b)(6) with any more questions. I know that Doug could be available to whatever schedule is necessary to meet.

If this Tuesday doesn't materialize with a meeting I'm confident that the group there is available and amenable to anything that will precipitate a meeting before the March decision.

Look forward to your thoughts. Have a wonderful weekend!

Kip

Hi Kip and Audrey,

I just wanted to follow up with you to confirm that you received my message and provide an update on Sally's youth agenda. We had a wonderful event last week at the FDR Memorial announcing our first public-private partner and \$1M dollar commitment from American Eagle Outfitters. Attached is a link from a segment that was aired on NPR: <http://www.npr.org/player/v2/mediaPlayer.html?action=1&t=1&islist=false&id=260979925&m=261064938>

Please don't hesitate to contact me if you'd like to learn more about the effort and how you can get involved. I'd also like to learn more about the Conscious Capitalism event and any requests that you have of Sally regarding attendance and participation.

Thanks so much!

Sincerely,

David

On Wed, Nov 27, 2013 at 9:46 AM, Jayo, David <david_jayo@ios.doi.gov> wrote:

Hello, Kip and Audrey,

Thanks so much for the invitation to the Conscious Capitalism event as well as your interest in the 21st Century Conservation Service Corps (21CSC). I'd love to set up time to talk a bit about the effort and explore ways that The Container Store could join the movement. Just give me a couple of options that work for you and I'll do everything possible to accommodate.

As you know, the Secretary has a strong commitment and inspirational vision for preparing the next generation of outdoor champions, advocates and leaders. She has set metrics for each component of the plan (play, learn, serve and work). Attached is a document that provides a high-level overview of the youth agenda including goals. The "work" category is getting the most attention from private sector as Sally has truly added depth and dimension to the term "public-private partnership".

By working collaboratively, we know that we can make significant strides and have a lasting impact. This is about creating a bold national movement to get more young people outdoors, connected to nature, caring for our public lands, employed and learning skills for future employment.

I will also flag the dates of the Conscious Capitalism event for the scheduling team. It would be an honor to attend and engage with the attendees. Thanks again for the invitation.

In the meantime, have a wonderful Thanksgiving and holiday season! I hope that your sales are through the roof and look forward to working with you.

Sincerely,

David

Dear Kip and Audrey -

It was a real pleasure to speak with you today. Congrats again on the IPO - it is wonderful to know that another public company will bring the principles of conscious capitalism to Wall Street!

I have copied David on this so he can connect directly with Audrey. As I mentioned, David joined me from REI to lead our efforts on 21CSC and engaging youth to play, learn, serve and work outside. It would be wonderful to work with The Container Store, along with other enlightened businesses, to engage many more people in service on our public lands.

With regard to the CC event in San Diego, please let us know the dates and we can see if it works with our travel. I fully agree that this would be a wonderful audience for 21CSC.

Happy Thanksgiving and keep in touch!

Warmly,

Sally

On Nov 26, 2013, at 10:58 AM, Kip Tindell <kip@containerstore.com> wrote:

Sally,

Thanks so much for your time today – can't tell you how much I enjoyed our conversation! Truly there isn't a better person our President could have so thoughtfully selected to lead our Dept. of Interior. Thank you for all that you're doing for our beloved country's present and future. It was thrilling to hear what you're working on and towards and know that Audrey will be eager to connect with David soon. After the call, Audrey and I also discussed maybe you or David coming to the big Conscious Capitalism event in April in San Diego to talk a bit about the 21CSC (is that the official name?) just thinking that audience of companies would be ripe for the message. That particular event is open to a much broader group of companies with many representatives coming from each organization versus, say, the CEO Summit that takes place in Austin each year with about 200 CEOs (although that could be a great audience as well – that takes place each October). The Conscious Capitalism events are a far cry from where they were in their humble beginnings when we were there together outside of Austin. They now include key business leaders from virtually every single business sector.

Lastly, here's a link to our blog I mentioned we started after that get together in Austin many years ago – it's evolved into having a great presence in all of our catalogs and really, in everything we use to talk with our customers...the response has been delightful. And the fact that we have a blog about our culture and what we stand yet nothing yet on "getting organized" I think makes people REALLY understand how important...how core...this is to us and to them...as it obviously translates to their experience with The Container Store.

<http://standfor.containerstore.com/>

Again, thank you for reaching out...let's stay in touch.

Kip

PS – and of course thank you for letting me bend your ear on the Gunnison Sage-Grouse ☺.

Hello, Kip and Audrey,

Thanks so much for the invitation to the Conscious Capitalism event as well as your interest in the 21st Century Conservation Service Corps (21CSC). I'd love to set up time to talk a bit about the effort and explore ways that The Container Store could join the movement. Just give me a couple of options that work for you and I'll do everything possible to accommodate.

As you know, the Secretary has a strong commitment and inspirational vision for preparing the next generation of outdoor champions, advocates and leaders. She has set metrics for each component of the plan (play, learn, serve and work). Attached is a document that provides a high-level overview of the youth agenda including goals. The "work" category is getting the most attention from private sector as Sally has truly added depth and dimension to the term "public-private partnership".

By working collaboratively, we know that we can make significant strides and have a lasting impact. This is about creating a bold national movement to get more young people outdoors, connected to nature, caring for our public lands, employed and learning skills for future employment.

I will also flag the dates of the Conscious Capitalism event for the scheduling team. It would be an honor to attend and engage with the attendees. Thanks again for the invitation.

In the meantime, have a wonderful Thanksgiving and holiday season! I hope that your sales are through the roof and look forward to working with you.

Sincerely,

David

Hello! And nice to meet you, David! Let's connect on another email and we'll determine a time to talk more about this incredible program.

In the meantime, the dates for the Conscious Capitalism event are April 9-11, 2014 - in San Diego. If you think that there's even a *glimmer* of a chance that you could attend to talk about 21CSC, let me know and I'll get in touch with the Conference organizers and start that conversation. Thanks so much – could be so wonderful!

Subject: Re: thank you

Dear Kip and Audrey -

It was a real pleasure to speak with you today. Congrats again on the IPO - it is wonderful to know that another public company will bring the principles of conscious capitalism to Wall Street!

I have copied David on this so he can connect directly with Audrey. As I mentioned, David joined me from REI to lead our efforts on 21CSC and engaging youth to play, learn, serve and work outside. It would be wonderful to work with The Container Store, along with other enlightened businesses, to engage many more people in service on our public lands.

With regard to the CC event in San Diego, please let us know the dates and we can see if it works with our travel. I fully agree that this would be a wonderful audience for 21CSC.

Happy Thanksgiving and keep in touch!

Warmly,

Sally

On Nov 26, 2013, at 10:58 AM, Kip Tindell <kip@containerstore.com> wrote:

Sally,

Thanks so much for your time today – can't tell you how much I enjoyed our conversation! Truly there isn't a better person our President could have so thoughtfully selected to lead our Dept. of Interior. Thank you for all that you're doing for our beloved country's present and future. It was thrilling to hear what you're working on and towards and know that Audrey will be eager to connect with David soon. After the call, Audrey and I also discussed maybe you or David coming to the big Conscious Capitalism event in April in San Diego to talk a bit about the 21CSC (is that the official name?) just thinking that audience of companies would be ripe for the message. That particular event is open to a much broader group of companies with many representatives coming from each organization versus, say, the CEO Summit that takes place in Austin each year with about 200 CEOs (although that could be a great audience as well – that takes place each October). The Conscious Capitalism events are a far cry from where they were in their humble beginnings when we were there together outside of Austin. They now include key business leaders from virtually every single business sector.

Lastly, here's a link to our blog I mentioned we started after that get together in Austin many years ago – it's evolved into having a great presence in all of our catalogs and really, in everything we use to talk with our customers...the response has been delightful. And the fact that we have a blog about our culture and what we stand yet nothing yet on "getting organized" I think makes people REALLY understand how important...how core...this is to us and to them...as it obviously translates to their experience with The Container Store. <http://standfor.containerstore.com/>

Again, thank you for reaching out...let's stay in touch.

Kip

PS – and of course thank you for letting me bend your ear on the Gunnison Sage-Grouse 😊.

Hi Kip,

There are so many interesting intersections in this job! Thanks for suggesting this as part of Sally's trip. I know that her schedule is packed and the Colorado portion with Gov. Hickenlooper deals with the Greater Sage Grouse and other matters related to the energy development activities in the state, however, I have passed along your request to the trip organizers for consideration. I do know that the head of the Fish and Wildlife Service, Dan Ashe, will be traveling with Sally to Colorado. They will consider whether Dan can meet with Doug, even if it doesn't work into Sally's schedule, so stay tuned.

All the best,
David

On Jan 17, 2014, at 8:03 PM, Kip Tindell <kip@containerstore.com> wrote:

Thanks, David – so appreciate the feedback! Means a lot coming from you! So...on a completely separate note and one I had mentioned to Sally in our last call, if you don't mind, can I share

some thoughts about another topic I'm passionate about? The Gunnison Sage Grouse and its potential listing. My wife and I are so proud of our ranch in Gunnison and over the years and years of being there, we have developed some wonderful relationships with our "neighbors"- with one of our shared causes being the Gunnison Sage Grouse.

I heard from our closest neighbor and dear, dear friend Burt Guerrieri that Sally is headed to Denver next Tuesday to meet at John Salazar's office concerning Greater Sage Grouse. Well, it turns out Doug Washburn, the President of the Gunnison Stockgrowers Assoc., will be in Denver that same day.

What do you think the chances are of arranging a meeting where Sally and Doug can visit about the Gunnison Sage Grouse? I'd imagine her schedule is packed full but thought I'd ask. As you probably know the final decision to list or not list the Gunnison Sage Grouse as an Endangered or Threatened species is this coming March.

For more than a decade the Gunnison community, led by Gunnison County and Gunnison Stockgrowers, has put forth an extraordinary effort to help the Gunnison Sage Grouse and preempt the need for a federal Endangered listing. There have been numerous on the ground projects and changes in our community to accommodate Sage Grouse habitat. Literally millions of dollars have been spent. This proactive effort is unmatched anywhere in the United States. We're so proud that a representative of the US Fish & Wildlife Service has been a participant at the table during this orchestrated effort the entire time.

The purpose of a meeting would NOT be to "plead" to Sally but to just have a conversation so that we can all be on the same page operating from the same information. It turns out locally the Gunnison Sage Grouse is thriving and has clearly established a long term trend of population increase. Although some Gunnison Sage Grouse populations in other parts of the Colorado are smaller, the Gunnison Sage Grouse as a species has a miniscule statistical chance of trending toward actually being extinct. I know that the US Fish & Wildlife service actually agrees with the previous sentence and states so many times in their documentation on the issue.

With all of that said, what do you think? Feel free to contact me or Burt Guerrieri (b)(6) cell) or Doug Washburn (b)(6) (b)(6) with any more questions. I know that Doug could be available to whatever schedule is necessary to meet.

If this Tuesday doesn't materialize with a meeting I'm confident that the group there is available and amenable to anything that will precipitate a meeting before the March decision.

Look forward to your thoughts. Have a wonderful weekend!

Wow, Kip! These videos are fantastic and reinforce your values of respect, authenticity and action. Coincidentally, I went to the Holocaust Museum this past weekend. While the experience is intense, the message that they are delivering is very similar to yours. Their theme and motto is: What you do matters! It's a wonderful reminder that our actions have an impact and we can all make a difference in our communities and world. It's powerful and empowering, just like your videos.

Thanks for sharing them and congratulations on your advertising campaign. You're truly making a difference and aware that "what you do matters".

Sincerely,

David

Secretary Jewell to Join Gov. Hickenlooper for Tour of Sage Grouse Conservation Efforts Underway at Colorado Ranch

Will Highlight Importance of Conservation Partnerships to Improve Habitat for Sage Grouse

CRAIG, CO – On Tuesday, January 21, Secretary of the Interior Sally Jewell will join Colorado Governor John Hickenlooper and other Interior Department officials at the Bord Gulch Ranch in Craig, Colorado, to tour innovative sage grouse conservation efforts being undertaken by ranch manager Ray Owens. Owens was recently named one of two recipients of Colorado Parks and Wildlife's 2013 Wildlife Landowner of the Year award.

Jewell and Hickenlooper will highlight the importance of partnerships between the federal government, states, private landowners and other stakeholders in creating and implementing a landscape-level conservation strategy for the species, which will be considered for possible protection under the Endangered Species Act by the U.S. Fish and Wildlife Service

WHO: **Sally Jewell**, U.S. Secretary of the Interior
John Hickenlooper, Governor of Colorado
Dan Ashe, Director of the U.S. Fish and Wildlife Service
Neil Kornze, Principal Deputy Director of the Bureau of Land Management
Ray Owens, Colorado Parks and Wildlife's Wildlife Landowner of the Year

WHAT: Ranch tour and brief media availability

WHEN: Tuesday, January 21
1:00 p.m. MST – Media check-in
1:15 p.m. MST – Ranch tour followed by brief media availability

WHERE: Bord Gulch Ranch
County Road 7 (Between Mile Markers 17 & 18)
Craig, CO 81625

RSVP: Credentialed members of the media who wish to attend the ranch tour and media availability are required to RSVP here no later than 6:00 PM MST on Monday, January 20.

DOI in the News:

JEWELL: US TO NOMINATE SAN ANTONIO MISSIONS TO BE UN WORLD HERITAGE SITES. *Reuters* (1/17, Forsyth) reported the Interior Department said that it will nominate the Alamo and other colonial missions to be listed by the United Nations Educational, Scientific and Cultural Organization as UN World Heritage sites. In a statement, Secretary of the Interior Sally Jewell said, "The San Antonio Missions represent a vital part of our nation's Latino heritage and the contributions of Latinos to the building of our country."

The *San Antonio Express-News* (1/18, Huddleston, 746K) reported that in a release, Jewell said, "World Heritage Sites represent an incredible opportunity for the United States to tell the world the whole story of America and the remarkable diversity of our people and beauty of our land." Previously "Rep. Joaquín Castro, D-San Antonio, said he was 'disappointed' that an omnibus bill appropriating funds for fiscal 2014 did not include some \$700,000 to resume payment of dues to" UNESCO, which ceased in 2011 under a law forbidding funding of any UN branch admitting Palestine as a full member. He and others are concerned this will hurt the nomination, although a UNESCO spokesperson said it would not.

Also covering this story are the AP (1/18), the *Fort Worth (TX) Star-Telegram* (1/19, Recio, Tinsley, 596K), the *San Antonio Business Journal* (1/18, Bailey, Subscription Publication, 27K), the *Longview (TX) News-Journal* (1/18, 69K), *KSAT-TV San Antonio* (1/17, 91K), and *KWTX-TV Waco, TX* (1/17, 48K).

JEWELL, OTHER OFFICIALS TO SEE SAGE GROUSE CONSERVATION EFFORTS. The *Craig (CO) Daily Press* (1/20, Fenner, 10K) reports Secretary of the Interior Sally Jewell will be "in Moffat County Tuesday to talk sage grouse." She and Gov. John Hickenlooper, will tour the Bord Gulch Ranch's sage grouse conservation efforts, as well as exploring "how to protect the species while still leaving the land open to ranchers, the mining industry and other businesses."

The *Grand Junction Daily Sentinel* (1/21, Webb, 73K) reports that, besides Jewell and Hickenlooper, US Fish and Wildlife Service director Dan Ashe and Neil Kornze, principal deputy director of the BLM, will be on the tour. Meanwhile, "Fish and Wildlife is considering whether to list the bird for protection under the Endangered Species Act, and the Bureau of Land Management is considering land-management measures aimed at keeping it from needing to be listed."

The AP (1/21) and the *Denver Post* (1/21, Bartels, 949K) also cover this story.

JEWELL VOLUNTEERS AT MLK MEMORIAL. On its website, *WTOP-FM Washington* (1/18, Stewart, 172K)

reported on events during the weekend that celebrated the life and legacy of Dr. Martin Luther King Jr. On Saturday, almost 150 volunteers gathered at the Martin Luther King Jr. Memorial in Washington, DC. Secretary of the Interior Sally Jewell "volunteered and worked the area around the MLK Memorial." She said, "We're going to beautify the site. We're going to pick up leaves, we're going to weed the garden," adding, "And make sure it represents Dr. King and everything we're proud of about his contributions to the country." Jewell also "challenged her colleagues to roll up their sleeves as well," saying "I welcome all my cabinet colleagues from the cabinet to come out and join us."

DOG ADVOCATES APPEAL TO JEWELL FOR INTERVENTION ON GOLDEN GATE NATIONAL

RECREATION AREA. Tom Stienstra wrote in the *San Francisco Chronicle* (1/20, Stienstra, 2.88M) that advocacy groups have written to Interior Secretary Sally Jewell requesting "intervention to keep several areas in the Golden Gate National Recreation Area open to dogs." Stienstra added that the government "means a lot of new rules and enforcement" and that rangers today often don't live in the community of the parks they patrol but instead are "from out of town and then impose their will on people they do not know, without a responsibility to or consequence within that community." He cites a ranger that r stun-gunned a man walking his dogs and "another ranger whose top priority appears to be hunting down dog walkers."

Christa Bigue writes in the *Mill Valley (CA) Patch* (1/21, Hickman, 636) the Montara Dog Group is asking "for help to fix the proposed" dog management plan, which they say "will deny people with dogs 'access to 99.9% of the GGNRA.'"

America's Great Outdoors:

National Park Service:

NATIONAL PARKS OFFERING NINE DAYS WITH COMPLIMENTARY ADMISSION. *USA Today* (1/17, Stapen, 5.82M) reported there will be "nine days of complimentary admission to America's national parks—the first is Jan. 20." Spokesperson Kathy Kupper said, "The entrance fees aren't that expensive, but the National Park Service wants to eliminate any barrier to enjoying the parks." Kupper added, "Most Americans live within an hour or two of a national park."

The *St. George (UT) Spectrum* (1/19, DeMille, 48K) reports, "The U.S. Forest Service is also waiving fees at day-use sites." US Forest Service Chief Tom Tidwell said in a release, "Our public lands are open to everyone, and we hope these free days offer an incentive to all people to visit any of the 193 million acres of land held in trust for their enjoyment and use."

Also covering this story are the *Denver Post* (1/20, 949K), the *AP* (1/20), another *AP* (1/21) article, the *Southern Illinoisan* (1/20, 12K), and the *Salem (OR) Statesman Journal* (1/18, Miller, 104K).

TOWNS, ENVIRONMENTALISTS OPPOSE GIVING NPS OPTION TO ADD SAND TO SHACKLEFORD BANK.

The *AP* (1/18) reported that "an odd coalition of towns" and environmentalists oppose "a proposal to give the National Park Service the option of using dredging material to fight erosion on North Carolina's pristine Shackleford Bank." The towns want the sand on their beaches, and the environmentalists don't want human interference with the Shackleford Bank. Pat Kenney, superintendent of the Cape Lookout National Seashore, said the plan would allow the park service to have the option of using the dredge material in the next 20 years; "it doesn't require it to do so."

COMPANY APPEALS ACADIA CONCESSIONS CONTRACT AWARD. The *Bangor (ME) Daily News* (1/20, Trotter, 166K) reports Acadia Corp., which provided retail and food services in Acadia National Park for decades but lost the concessions contract last fall, says the bid evaluation process was a "sham" and is appealing the decision in Federal claims court. The company says that Dawnland LLC, which received the ten-year contract, received "a high score based upon extensive promises Dawnland made that later were rejected by other National Park Service officials because the promises or commitments were 'either infeasible, of no benefit to the government, or unenforceable.'"

OP-ED: COMMISSION NEEDED TO MAKE NEW PLAN FOR NATIONAL MALL. Judy Scott Feldman, founder

and chair of the National Coalition to Save Our Mall, in an op-ed in the *Washington Post* (1/18, 4.28M), argued, "Management agencies should not dictate the purpose and meaning of the Mall." Feldman criticized the National Park Service as caring more about the health of the Mall's grass than public use, noting that the new grass regulations are preventing the National Book Festival from returning. The Mall "is not a national park and was never intended to be," and Feldman called for "an independent McMillan-type commission to provide an updated, unified plan for this nationally significant landscape."

Bureau of Land Management:

NEW MEXICO CONSIDERS BUYING LAND FROM BLM. The *Las Cruces (NM) Sun-News* (1/21, Nott, 59K) reports New Mexico Commissioner of Public Lands Ray Powell told the Legislative Education Study Committee that purchasing 800,000 acres of land from the Bureau of Land Management "could generate up to \$50 million for education." He said that the agency is selling the land because it "no longer fits into the bureau's mission and is sitting idle, often close to urban centers." The state Land Office manages land "for the benefit of schools and other facilities."

Fish and Wildlife Service:

DIRECTOR ASHE: JUMP IN WILDLIFE TRAFFICKING. The *Voice of America* (1/19, 34K) reported Dan Ashe, the Director of US Fish and Wildlife Service, said, "we have seen dramatic escalation in wildlife trafficking" in the last few years, and it is increasingly "sophisticated, highly organized, syndicated trafficking." He called for implementing the Convention on International Trade in Endangered Species of Wild Fauna and Flora and reducing demand.

FEDEX, OTHER CARGO CARRIERS TRANSPORT LIVE WILD ANIMALS. *McClatchy* (1/20, 95K) reports that "there are some decidedly more exotic and unusual cargoes that are shipped through Miami International Airport," such as "live Florida lobsters destined for China, monkeys, blueberries from Chile, gold artifacts, stacks of currency, tissue and blood samples, and tropical fish in super-oxygenated water." In addition, "cargo carriers such as Tampa Air Cargo, LAN Cargo, DHL Express, and FedEx fly even bigger animals, including manatees, race horses and polo ponies." Sandy Cleva, of the U.S. Fish and Wildlife Service's Office of Law Enforcement at MIA, explained that "for animals traveling internationally, air cargo is typically the best alternative. And Miami is the second busiest U.S. airport, after Los Angeles, for transporting live wild animals."

Securing America's Energy Future:

Onshore Energy Development:

OP-ED PRAISES MASTER LEASING PLANS. In an op-ed in the *Salt Lake (UT) Tribune* (1/20, Nimkin, 343K), David Nimkin, southwest senior regional director for the National Parks Conservation Association, writes in support of the US Department of the Interior's oil and gas Master Leasing Plans (MLPs), which seek "to study and discuss impacts to areas where the most potential conflicts exist between oil and gas development, recreation and conservation." Nimkin notes Interior Secretary Sally Jewell's upcoming visit to Salt Lake City, adding, "it's vital she hear from Utahns about the best way to provide for responsible oil and gas production while protecting Utah's national parks." Nimkin concludes that her "support for the MLP process is crucial" and hopes "she will continue to press for MLPs, urging the BLM and the NPS to undertake the process in areas where national parks may be affected."

Offshore Energy Development:

BOEM SEEKING MORE INFORMATION FROM SHELL ON ARCTIC DRILLING. The *Juneau (AK) Empire* (1/19, Joling, 21K) reports the Bureau of Ocean Energy Management "wants more information on plans for Arctic Ocean drilling in 2014 by Royal Dutch Shell PLC, which has not decided whether it will resume operations this year" in the Chukchi Sea. According to regional supervisor David Johnston, the agency sought "assurances of management changes that previously had allowed the deficiencies to remain unresolved on the drill vessel." BOEM asked for steps the company would take to prevent repeat problems on the Aiviq, an anchor handler that

lost tow lines and had four engines fail. The agency also wants drill logs and technical information on how the company concluded a pilot hole lacked permafrost or hydrates, and "BOEM also asked for additional emissions compliance data."

The *San Antonio Express-News* (1/20, Dlouhy, 746K) reports "Shell appears to have addressed many of the questions" BOEM raised in November when the company first asked for permission to resume drilling, "pushing the agency closer to a formal declaration that the proposed exploration plan's paperwork is complete."

The *Alaska Dispatch* (1/17, Quaille, 7K) and the *Rigzone* (1/17, Boman, 12K) also cover this story.

Tackling America's Water Challenges:

CALIFORNIA GOVERNOR DECLARES DROUGHT EMERGENCY. The drought in California saw significant coverage in major network newscasts over the weekend, although much of the coverage was devoted to the drought's effect on wildfires like the one fought in that state during the same period. *ABC World News* (1/18, story 2, 2:05, Muir, 7.43M) reported the Sierra Nevada Mountains are "bone dry, no snow to melt to keep the land there from becoming so dry." ABC (Roy) added that California officials are calling it "a drought for the record books." California Gov. Jerry Brown was shown saying, "We're facing perhaps the worst drought that California has ever seen." Roy continued, "This drought is now covering two-thirds of the state, which is why residents are being urged to cut their water use by 20 percent."

The *CBS Evening News* (1/18, story 2, 1:55, Axelrod, 5.58M) reported, "The drought is making the fight against wildfires even more difficult, as we've seen all this week in California." CBS (Evans) added that "forecast is grim," and "rainfall in Los Angeles in 2013 was the lowest in more than 100 years." *NBC Nightly News* (1/18, story 4, 2:15, Holt, 7.86M) reported, "In California a state of emergency is now in effect because of the extreme drought there." NBC (Fryer) added that the drought "now covers parts of 11 states, including a majority of California seeing the least amount of rainfall in more than a century."

ABC World News (1/17, lead story, 2:30, Sawyer, 7.43M) reported that in California the water is "running so low there, it's now officially the worst drought in 100 years."

Carter Evans reported on the *CBS Evening News* (1/17, story 4, 2:20, Pelley, 5.58M), "Drought has caused parts of 11 states to be designated as natural disaster areas."

Bloomberg News (1/17, Marois, 1.91M) reported California has seen "three years of little rain." The declaration of drought emergency "may make it easier to divert water from fisheries and ecologically sensitive areas to farms and ranches." However, "If the drought persists, mandatory rationing may be ordered in some areas."

Among the other outlets covering this story are the *AP* (1/17), the *San Francisco Chronicle* (1/21, Alexander, 2.88M), the *New York Times* (1/18, Onishi, Subscription Publication, 9.61M), and the *Los Angeles Times* (1/18, Boxall, York, 3.07M).

Empowering Native American Communities:

INTERIOR TO CONSIDER RECOGNIZING LITTLE SHELL TRIBE. On its website, KFBB-TV Great Falls, MT (1/20, Biega, 2K) reported the US Department of the Interior said it "will consider the Little Shell Tribe's eligibility for Federal tribal recognition." The tribe previously had been "turned down based on Federal legal requirements that the tribe have not met." Besides DOI, the tribe could be recognized through a congressional vote.

KPAX-TV Missoula, MT (1/18, Grimes, 1K) reported Sen. Jon Tester and Max Baucus (D-MT), as well as Rep. Steve Daines are working on such legislation.

ALASKA NATIVES SEEK FEDERAL AID ON EROSION. The *Juneau (AK) Empire* (1/19, D'Oro, 21K) reported that five residents of the Inupiat Eskimo community of Shishmaref, Alaska to meet with the state's "congressional delegation and officials from federal agencies to talk about the effects of erosion," which is eating away at the town. They are seeking Federal aid in dealing with the issue, and possibly with relocation. "Nedra Darling, an

Indian affairs spokeswoman for the Interior Department, said officials are in the early stages of working with the community."

YAKAMAS TO REGAIN CIVIL, CRIMINAL AUTHORITY ON TRIBAL LAND. The Yakima (WA) Herald-Republic (1/18, Prengaman, 86K) reported Washington state "Gov. Jay Inslee on Friday signed a proclamation that returns almost all civil and criminal authority over tribal members on the reservation back to the Yakama Nation." However, the move still requires approval from the Bureau of Indian Affairs. Still, "in preparation, the Yakamas already signed memorandums of understanding with the cities and counties that overlap the reservation."

VIRGINIA TRIBE MOVES CLOSER TO FEDERAL RECOGNITION. The Indian Country Today Media Network (1/17, Degraded, 21K) reported, "Assistant Secretary – Indian Affairs Kevin K. Washburn announced the Pamunkey Indian Tribe is one step closer to becoming the first tribe from Virginia to be federally recognized." A public comment period on the matter will now start, followed by a response period and then the agency's final determination.

OTGLALA SIOUX TO MEET WITH BADLANDS NATIONAL PARK ON PROPOSED PARK. The Indian Country Today Media Network (1/18, 21K) reported the Oglala Sioux Tribe is "meeting with the Badlands National Park to discuss the details of the United States' first tribal national park." The revocation of Oglala tribal ranchers' grassland leases in preparation of reintroducing bison has "sparked controversy on the reservation."

SECOND PAYMENTS IN LAND TRUST BENEFICIARIES SUIT TO ARRIVE. The AP (1/20) reported members of the Eastern Shoshone and Northern Arapaho tribes will, in a few weeks, receive a "second set of payments stemming from a settlement between the federal government and Native American land trust beneficiaries." The settlement stems from a lawsuit over the mishandling of trust funds, assets, and tribal land in which Elouise Cobell was the lead plaintiff

Top National News:

OBAMAS HONOR KING BY VOLUNTEERING AT DC CENTRAL KITCHEN. The First Family's community service outing in honor of Dr. Martin Luther King Jr. Day received a substantial amount of largely positive media coverage. Brian Williams, in a brief item for NBC Nightly News (1/20, story 9, 0:35, Williams, 7.86M), said that on Monday, the President "volunteered for service." The CBS Evening News (1/20, story 4, 0:15, Dubois, 5.58M) also noted that the First Family "went to a soup kitchen as part of a national day of service."

However, the Obamas' volunteering is also one of the focuses of a piece by Sheryl Gay Stolberg in the New York Times (1/21, Stolberg, Subscription Publication, 9.61M) titled, "2 Birthdays And 2 Ends Of The Income Spectrum" that places Monday's events alongside the White House party in honor of the First Lady's 50th birthday on Saturday. The Times reports that Princeton historian Julian Zelizer says while "all presidents hobnob with celebrities...for Democrats — and for Mr. Obama in particular — doing so carries particular risks...because imagery of mingling with the wealthy 'becomes a clash with their values and claims they are making in the public sphere.'" According to the Times, "the two events — one a very public effort to promote community service, the other a private affair that carried a whiff of celebrity and secrecy — spotlight the often contradictory worlds that modern presidents inhabit." The New York Daily News (1/21, Larson, 3.94M) also notes the First Family's MLK Day activities, writing that it "looks like the Obamas have recovered from Saturday's epic dance fest to celebrate the First Lady's 50th birthday."

The AP (1/20, Superville) reports that on Monday, President Obama "honored Martin Luther King Jr.'s legacy of service...by helping a soup kitchen prepare its daily meals and a host of administration figures fanned out across the capital to appear at holiday events." According to the AP, the President, First Lady and the two Obama girls went to DC Central Kitchen, "which is a few minutes away from the White House," and then "joined an assembly line that was churning out burritos." The Washington Times (1/21, Boyer, 417K) reports that "at one point, the president shouted down the line that they were running out of burritos" and "joked that he was 'very proud' of Sasha's technique."

Politico (1/21, McCalmont, 464K) notes that the First Family was "joined by senior adviser Valerie Jarrett." According to Politico, "Other members of the Obama administration also took time to take part in the Day of

Service, including" Vice President Biden, "who delivered remarks at the National Action Network's Annual Martin Luther King Jr. Day Breakfast." *Politico* (1/21, Drusch, 464K) reports that at the National Action Network breakfast, Biden "said he never imagined the country would once again be fighting over the Voting Rights Act." Biden is quoted as saying, "I never thought we'd be fighting the fight again on voting rights, I really didn't."

Al Sharpton, on *MSNBC's Politics Nation* (1/20, 894K), said that on Monday morning, "the National Action Network, my civil rights organization, held our annual Martin Luther King Day breakfast," during which Biden "got specific about a challenge we must fight." Biden was shown saying, "I never thought we'd be fighting the fight again on voting rights. I never believed – I really didn't. I really didn't. This has been the ultimate fight because our opponents know, they know the single most dangerous thing to give us is the right to vote. They know what that is." *USA Today* (1/20, Jackson, 5.82M) reported that on Monday, Biden also "joined members of the Catholic Volunteer Network to prepare hot lunches at another kitchen, So Others Might Eat."

According to *The Hill* (1/21, Neff, 194K), "Other Cabinet secretaries undertaking service projects included Secretary of the Treasury Jack Lew, who packed clothes for homeless veterans at the VA Medical Center in Washington, and Secretary of Commerce Penny Pritzker, who served food at Food and Friends."

The *AP* (1/20, Lucas) reports that in Atlanta, "hundreds of people filled Ebenezer Baptist Church...to remember and reflect on the legacy of Martin Luther King Jr., who preached at the church." According to the *AP*, Georgia Gov. Nathan Deal (R) vowed to "work with state legislators to find an appropriate way to honor King at the Georgia Capitol, which drew a standing ovation from the audience," but "did not give any specifics." *USA Today* (1/20, Copeland, 5.82M) reports that Deal spoke at "a nearly four-hour jubilee of speeches and songs that drew some of the state's top political figures," including Sen. Johnny Isakson, Reps. John Lewis (D-GA) and Hank Johnson (D-GA), and Atlanta Mayor Kasim Reed.

Reuters (1/20) reports that New York City Mayor Bill de Blasio, who has made it his goal to address income inequality in the city, said, "Dr. King would tell us we can't wait" to "start the work of changing this city."

In his opening monologue for *Fox News' The O'Reilly Factor* (1/20, 2.53M), Bill O'Reilly noted that President Obama, in his recently published interview with *The New Yorker*, was quoted as saying, "There is no doubt that there is some folks who just really dislike me because they don't like the idea of a black president. Now, the flip side of it is that there are some black folks, and maybe some white folks, who really like me and give me the benefit of the doubt precisely because I'm a black president." According to O'Reilly, "That assessment" is "100% correct." O'Reilly went on to say that, "to his credit," the President "has not used race in his quest for power," and, "in the public arena, has been cautious and responsible on the race issue."

DeWayne Wickham, in his column for *USA Today* (1/21, 5.82M), says that last week, "a small, bipartisan group of congressmen offered" King "– and this country – an unexpected gift." According to Wickham, the "surprising mix of Republicans and Democrats introduced a bill to fix much of the damage the Supreme Court did last year to the Voting Rights Act" when it "struck down a portion of the nearly 50-year-old law that required mostly Southern states with a history of voting rights abuses to get federal clearance before making any election changes."

Christina Villegas, an adjunct professor at California State University, San Bernardino, and a visiting fellow at the Independent Women's Forum, in an op-ed for *USA Today* (1/21, 5.82M), says King "rightfully recognized racial discrimination as a tragic stain on our country's past," but "still found reason to esteem and identify with America and its promise of liberty and justice for all."

Sebelius Ties ACA Enrollment Drive To MLK's Legacy. According to the *Washington Times* (1/21, Chasmar, 417K), HHS Secretary Sebelius "took the opportunity Monday to celebrate Martin Luther King Day while pleading with Americans to sign up for Obamacare." Sebelius issued a press release saying: "As we celebrate the inspirational life of Dr. King, please join us in this historic effort by helping your friends, neighbors, and loved ones get covered through the Marketplace."

Palin Calls On Obama To Avoid "Playing The Race Card." *Politico* (1/21, Mccalmont, 464K) reports that in a Facebook post on Monday, Sarah Palin wrote: "Mr. President, in honor of Martin Luther King, Jr. and all who commit to ending any racial divide, no more playing the race card." Robin Abcarian, in a piece for the *Los*

Angeles Times (1/20, Abcarian, 3.07M), says Palin "show[ed] pure contempt for the ideals that the Rev. Martin Luther King Jr. embraced."

OBAMA DETAILED PROPOSED NSA REFORMS IN GERMAN TV INTERVIEW. David Jackson, in an online piece for *USA Today* (1/20, 5.82M), wrote that President Obama "must be concerned about relations with Germany amid reports of past U.S. surveillance on" Chancellor Merkel because he "went on German television to explain his new National Security Agency surveillance policies, the only interview Obama has given since his big NSA speech Friday." Jackson says that "in the session with ZDF television, which aired in Germany on Saturday," the President "said he would not let U.S. surveillance operations damage the trust among the United States, the German people, and Merkel." President Obama is quoted as saying, "As long as I am president of the United States, the German chancellor need not worry about that."

Analysts: Implementation Of Obama's Proposed NSA Reforms In Doubt. The AP (1/20, Braun) reports that, according to "legal experts," some of President Obama's proposed "surveillance reforms...face complications that could muddy the proposals' lawfulness, slow their momentum in Congress and saddle the government with heavy costs and bureaucracy." The AP says that in regard to the President's "plans to shift the National Security Agency's mass storage of Americans' bulk phone records elsewhere, telephone companies do not want the responsibility," and there are likely to be "privacy and structural hurdles in relying on any other entity to store the data." The AP adds that "constitutional analysts also question the legal underpinning of Obama's commitment to setting up an advisory panel of privacy experts to intervene in some proceedings of the secret Foreign Intelligence Surveillance Court."

Under the headline, "No One Is Sure How Public Advocate At Spy Court Would Work," McClatchy (1/20, Doyle, Kumar, 95K) also reports that "serious questions shadow" the President's "proposal to add a public advocate to the secret court that oversees surveillance programs." According to McClatchy, in October, the Congressional Research Service "said in a report...that the 'novel' public advocate proposal raises 'several difficult questions of constitutional law' that ultimately might undermine the advocate's authority."

Former US Attorney General Michael Mukasey, in an op-ed for the *Wall Street Journal* (1/21, Subscription Publication, 5.91M), chides the President for not addressing what steps he thinks the government should take to prevent leaks like those from Edward Snowden. Mukasey goes on to contend that such leaks would be actually more likely to happen if the NSA were to transfer its databases to a third-party entity, as the President proposed on Friday.

PRESIDENT'S REMARKS ON MARIJUANA CONTINUE TO SPARK COMMENTARY. President Obama's comments on marijuana being no more dangerous than alcohol, reported in the *New Yorker* piece released this weekend, continues to generate media coverage in the latest cycle. *NBC Nightly News* (1/20, story 8, 2:35, Williams, 7.86M) reported on the President's comments, with Chuck Todd remarking that Obama's "live and let live attitude is in stark contrast to past White House positions on the drug." For example, Nancy Reagan "appeared in a popular sitcom to boost her 'Just Say No' campaign." NBC (Todd) looks at the evolution of views on marijuana, saying that in 1969, "84 percent of Americans were against legalization of marijuana. Today 58 percent are in favor. And the President may have just helped that number grow." Michael Beschloss of NBC News was shown saying, "And the President says marijuana is no more dangerous than alcohol, that's going to affect a lot of people, could change history."

The *CBS Evening News* (1/20, story 5, 0:30, Dubois, 5.58M) reported that in the *New Yorker* piece, Obama said "I don't think it is more dangerous than alcohol," but "did call it a vice" and added, "smoking pot is not something I encourage and I've told my daughters I think it's a bad idea." Obama also "urged caution in changing marijuana laws."

USA Today (1/20, Weise, 5.82M) reports that physicians and "drug policy groups are sharply at odds" over the President's statement. On one side, Stuart Gitlow, director of the Annenberg Physician Training Program in Addictive Disease at Mt. Sinai School of Medicine said that Obama is "not familiar with the science and frankly doesn't know what he's talking about," adding that there is "no benefit" to marijuana and it is "simply that people want the freedom to be stoned." On the other side, Donald Abrams, chief of oncology at San Francisco General Hospital said, "That's a good start from the president but it's still misinformed. In my 37 years as a physician, the number of patients I've admitted to the hospital with complications from marijuana use is zero. The number I've

admitted due to alcohol use is profound.”

In his column for the *Washington Post* (1/21, Cohen, 4.28M), Richard Cohen uses the President's comments on marijuana as an opening to discuss the dangers of smoking. After reviewing the latest reports on the extreme dangers of smoking, Cohen suggests that the debate should be not about marijuana's dangers, but instead focus on the harm caused by smoking cigarettes.

Editorial Wrap-Up:

NEW YORK TIMES. “Pre-K On The Starting Blocks.” In an editorial, the *New York Times* (1/21, Subscription Publication, 9.61M) backs NYC Mayor Bill de Blasio's plan for the city to offer full-day preschool for all four-year olds, but only if it is done properly. The city “will have to persuade parents to sign up, make sure there is a qualified teaching corps with classes small enough to be effective, and tightly integrate the program” with primary schools. The Times says that skeptics “may say that the benefits of preschool tend not to last, but that doesn't have to be true, if done right and sustained by good schooling in later years.”

“A Potentially Harmful Merger.” The *New York Times* (1/21, Subscription Publication, 9.61M) editorializes that a proposed merger between Sysco and US Foods, “two of the largest suppliers of food to restaurants, hotels and school cafeterias could significantly reduce competition and drive up prices of the meals Americans eat outside their homes.” The Times argues that by “reducing meaningful competition, the new company would be able to demand higher prices to deliver food to restaurants and cafeterias, forcing them to charge their customers and users more.” The Times urges antitrust regulators at the Justice Department and the Federal Trade Commission to “consider blocking the deal or requiring the companies to first divest parts of their distribution networks.”

“Detention Must Be Paid.” In an editorial, the *New York Times* (1/21, Subscription Publication, 9.61M) writes that “millions” are unemployed and have lost extended jobless benefits because Congressional Republicans say the government “can't afford to help them,” but “there is no shortage of money when it comes to hunting down unauthorized immigrants.” Noting the boost for immigration enforcement in the omnibus spending bill, the Times says it is “mindless to keep throwing billions at border enforcement and detention at a time when illegal immigration is at historic lows, when other, more pressing government functions are being starved and when none of the money spent actually goes toward solving the problem.”

“Saratoga Springs Doesn't Need A Casino.”

WASHINGTON POST. “Under Cyberattack.” In an editorial, the *Washington Post* (1/20, board, 4.28M) writes that that “massive Target data breach” is a “warning of a persistent and deepening cybertheft problem that needs to be confronted.” Congress has “debated cybersecurity bills,” but they failed, “in part because of opposition by some in the business community who called the requirements too intrusive or burdensome.” Congress “must now get serious about cybersecurity” as already, “millions of consumers are paying the price of inaction.”

“A Bill To Be Proud Of.” An editorial in the *Washington Post* (1/21, 4.28M) notes that House Ways and Means Committee chairman Dave Camp and incoming Senate Finance Committee Chairman Ron Wyden “will face pressure to pass an unpaid-for” tax extenders bill, “with the excuse that all tax breaks must be dealt with in a grand bargain on tax reform.” The Post argues that this is a “fiscally irresponsible cop-out,” and calls on lawmakers to “break with past practice and pay for the bill.”

“D.C.'s Missing Audit.” In an editorial, the *Washington Post* (1/21, 4.28M) says that over a year ago, the DC Office of Campaign Financed finished its review of Mayor Vincent Gray's 2010 campaign, but “the report has yet to be published.” The Post says that the “reasons are hard to fathom and raise troubling questions about how seriously this office takes its duty to police the city's politics.” The Post says that the campaign finance office “should release its findings before another election has come and gone.”

WALL STREET JOURNAL. “The Young And The ObamaCare-less.” An editorial in the *Wall Street Journal* (1/21, Subscription Publication, 5.91M) argues that while ACA enrollments have improved since the launch of the exchanges, they are still far below the level necessary to ensure a workable insurance market. The Journal notes that only 24% of enrollees are between ages 18 and 24 and that the number needs to be closer to 40% or rates

will surge over time. The Journal adds that HHS is unilaterally rewriting the rules to help insurers deal with the problem, and notes that Republicans are right to criticize the effort as a "taxpayer bailout" for the insurance industry.

"Coburn's Principles." In an editorial, the *Wall Street Journal* (1/21, Subscription Publication, 5.91M) lauds Coburn as a man of principle during his tenure in the Senate, saying that – among other things – he has fought to limit the size of government, called out the GOP on the issue of earmarks, and was instrumental in the killing of the ethanol tax credit. The Journal also applauds Coburn for speaking out against conservatives' attempt to defund the Affordable Care Act by using a government shutdown as leverage.

"The Court And Union Coercion." The *Wall Street Journal* (1/21, Subscription Publication, 5.91M) editorializes that the Supreme Court should strike down agreements with state governments that allow taxpayer-funded home-care workers to unionize, arguing that they violate constitutional free speech and association guarantees.

Hi Kip,

There are so many interesting intersections in this job! Thanks for suggesting this as part of Sally's trip. I know that her schedule is packed and the Colorado portion with Gov. Hickenlooper deals with the Greater Sage Grouse and other matters related to the energy development activities in the state, however, I have passed along your request to the trip organizers for consideration. I do know that the head of the Fish and Wildlife Service, Dan Ashe, will be traveling with Sally to Colorado.

They will consider whether Dan can meet with Doug, even if it doesn't work into Sally's schedule, so stay tuned.

All the best,

David

On Jan 17, 2014, at 8:03 PM, Kip Tindell <kip@containerstore.com> wrote:

Thanks, David – so appreciate the feedback! Means a lot coming from you! So... on a completely separate note and one I had mentioned to Sally in our last call, if you don't mind, can I share some thoughts about another topic I'm passionate about? The Gunnison Sage Grouse and its potential listing. My wife and I are so proud of our ranch in Gunnison and over the years and years of being there, we have developed some wonderful relationships with our "neighbors"- with one of our shared causes being the Gunnison Sage Grouse.

I heard from our closest neighbor and dear, dear friend Burt Guerrieri that Sally is headed to Denver next Tuesday to meet at John Salazar's office concerning Greater Sage Grouse. Well, it turns out Doug Washburn, the President of the Gunnison Stockgrowers Assoc., will be in Denver that same day.

What do you think the chances are of arranging a meeting where Sally and Doug can visit about the Gunnison Sage Grouse? I'd imagine her schedule is packed full but thought I'd ask. As you probably know the final decision to list or not list the Gunnison Sage Grouse as an Endangered or Threatened species is this coming March.

For more than a decade the Gunnison community, led by Gunnison County and Gunnison Stockgrowers, has put forth an extraordinary effort to help the Gunnison Sage Grouse and preempt the need for a federal Endangered listing. There have been numerous on the ground projects and changes in our community to accommodate Sage Grouse habitat. Literally millions of dollars have been spent. This proactive effort is unmatched anywhere in the United States. We're so proud that a representative of the US Fish & Wildlife Service has been a participant at the table during this orchestrated effort the entire time.

The purpose of a meeting would NOT be to "plead" to Sally but to just have a conversation so that we can all be on the same page operating from the same information. It turns out locally the Gunnison Sage Grouse is thriving and has clearly established a long term trend of population increase. Although some Gunnison Sage Grouse populations in other parts of the Colorado are smaller, the Gunnison Sage Grouse as a species has a miniscule statistical chance of trending toward actually being extinct. I know that the US Fish & Wildlife service actually agrees with the previous sentence and states so many times in their documentation on the issue.

With all of that said, what do you think? Feel free to contact me or Burt Guerrieri ((b)(6) cell) or Doug Washburn ((b)(6)) with any more questions. I know that Doug could be available to whatever schedule is necessary to meet.

If this Tuesday doesn't materialize with a meeting I'm confident that the group there is available and amenable to anything that will precipitate a meeting before the March decision.

Look forward to your thoughts. Have a wonderful weekend!

Wow, Kip! These videos are fantastic and reinforce your values of respect, authenticity and action. Coincidentally, I went to the Holocaust Museum this past weekend. While the experience is intense, the message that they are delivering is very similar to yours. Their theme and motto is: What you do matters! It's a wonderful reminder that our actions have an impact and we can all make a difference in our communities and world. It's powerful and empowering, just like your videos.

Thanks for sharing them and congratulations on your advertising campaign. You're truly making a difference and aware that "what you do matters".

Sincerely,

David

Hi Kip and Audrey,

I just wanted to follow up with you to confirm that you received my message and provide an update on Sally's youth agenda. We had a wonderful event last week at the FDR Memorial announcing our first public-private partner and \$1M dollar commitment from American Eagle Outfitters. Attached is a link from a segment that was aired on NPR: <http://www.npr.org/player/v2/mediaPlayer.html?action=1&t=1&islist=false&id=260979925&m=261064938>

Please don't hesitate to contact me if you'd like to learn more about the effort and how you can get involved. I'd also like to learn more about the Conscious Capitalism event and any requests that you have of Sally regarding attendance and participation.

Thanks so much!

Sincerely,

David

On Wed, Nov 27, 2013 at 9:46 AM, Jayo, David <david_jayo@ios.doi.gov> wrote:

Hello, Kip and Audrey,

Thanks so much for the invitation to the Conscious Capitalism event as well as your interest in the *21st Century Conservation Service Corps (21CSC)*. I'd love to set up time to talk a bit about the effort and explore ways that The Container Store could join the movement. Just give me a couple of options that work for you and I'll do everything possible to accommodate.

As you know, the Secretary has a strong commitment and inspirational vision for preparing the next generation of outdoor champions, advocates and leaders. She has set metrics for each component of the plan (play, learn, serve and work). Attached is a document that provides a high-level overview of the youth agenda including goals. The "work" category is getting the most attention from private sector as Sally has truly added depth and dimension to the term "public-private partnership".

By working collaboratively, we know that we can make significant strides and have a lasting impact. This is about creating a bold national movement to get more young people outdoors, connected to nature, caring for our public lands, employed and learning skills for future employment.

I will also flag the dates of the Conscious Capitalism event for the scheduling team. It would be an honor to attend and engage with the attendees. Thanks again for the invitation.

In the meantime, have a wonderful Thanksgiving and holiday season! I hope that your sales are through the roof and look forward to working with you.

Sincerely,

David

Dear Kip and Audrey -

It was a real pleasure to speak with you today. Congrats again on the IPO - it is wonderful to know that another public company will bring the principles of conscious capitalism to Wall Street!

I have copied David on this so he can connect directly with Audrey. As I mentioned, David joined me from REI to lead our efforts on 21CSC and engaging youth to play, learn, serve and work outside. It would be wonderful to work with The Container Store, along with other enlightened businesses, to engage many more people in service on our public lands.

With regard to the CC event in San Diego, please let us know the dates and we can see if it works with our travel. I fully agree that this would be a wonderful audience for 21CSC.

Happy Thanksgiving and keep in touch!

Warmly,

Sally

Sally,

Thanks so much for your time today – can't tell you how much I enjoyed our conversation! Truly there isn't a better person our President could have so thoughtfully selected to lead our Dept. of Interior. Thank you for all that you're doing for our beloved country's present and future. It was thrilling to hear what you're working on and towards and know that Audrey will be eager to connect with David soon. After the call, Audrey and I also discussed maybe you or David coming to the big Conscious Capitalism event in April in San Diego to talk a bit about the 21CSC (is that the official name?) just thinking that audience of companies would be ripe for the message. That particular event is open to a much broader group of companies with many representatives coming from each organization versus, say, the CEO Summit that takes place in Austin each year with about 200 CEOs (although that could be a great audience as well – that takes place each October). The Conscious Capitalism events are a far cry from where they were in their humble beginnings when we were there together outside of Austin. They now include key business leaders from virtually every single business sector.

Lastly, here's a link to our blog I mentioned we started after that get together in Austin many years ago – it's evolved into having a great presence in all of our catalogs and really, in everything we use to talk with our customers...the response has been delightful. And the fact that we have a blog about our culture and what we stand yet nothing yet on "getting organized" I think makes people REALLY understand how important...how core...this is to us and to them...as it obviously translates to their experience with The Container Store.

<http://standfor.containerstore.com/>

Again, thank you for reaching out...let's stay in touch.

Kip

PS – and of course thank you for letting me bend your ear on the Gunnison Sage-Grouse ☺.

Although some Gunnison Sage Grouse populations in other parts of the Colorado are smaller, the Gunnison Sage Grouse as a species has a miniscule statistical chance of trending toward actually being extinct. I know that the US Fish & Wildlife service actually agrees with the previous sentence and states so many times in their documentation on the issue.

With all of that said, what do you think? Feel free to contact me or Burt Guerrieri (b)(6) cell) or Doug Washburn (b)(6) (b)(6) with any more questions. I know that Doug could be available to whatever schedule is necessary to meet.

If this Tuesday doesn't materialize with a meeting I'm confident that the group there is available and amenable to anything that will precipitate a meeting before the March decision.

Look forward to your thoughts. Have a wonderful weekend!

Kip

Wow, Kip! These videos are fantastic and reinforce your values of respect, authenticity and action. Coincidentally, I went to the Holocaust Museum this past weekend. While the experience is intense, the message that they are delivering is very similar to yours. Their theme and motto is: What you do matters! It's a wonderful reminder that our actions have an impact and we can all make a

difference in our communities and world. It's powerful and empowering, just like your videos.

Thanks for sharing them and congratulations on your advertising campaign. You're truly making a difference and aware that "what you do matters".

Sincerely,

David

Thanks for reaching out, David. I know that you and Audrey will connect very soon as we're excited to learn even more about the initiative. In meantime, we're super proud of some ads (full page in today's NYT, USA Today and WSJ) and videos that launched today to try and communicate to an even broader audience what we stand for – and to hopefully inspire others to build their organizations where everyone associated with them can thrive... obviously something that you and Sally are so familiar with. Kind of ironic to think of this content in the Wall Street Journal – never thought I'd see that day.

Here are the videos...and hopefully you had a chance to see the ads in person. If not, let me know and we'll send one to you online.

Hi Kip and Audrey,

I just wanted to follow up with you to confirm that you received my message and provide an update on Sally's youth agenda. We had a wonderful event last week at the FDR Memorial announcing our first public-private partner and \$1M dollar commitment from American Eagle Outfitters. Attached is a link from a segment that was aired on NPR: <http://www.npr.org/player/v2/mediaPlayer.html?action=1&t=1&islist=false&id=260979925&m=261064938>

Please don't hesitate to contact me if you'd like to learn more about the effort and how you can get involved. I'd also like to learn more about the Conscious Capitalism event and any requests that you have of Sally regarding attendance and participation.

Thanks so much!

Sincerely,

David

Hello, Kip and Audrey,

Thanks so much for the invitation to the Conscious Capitalism event as well as your interest in the 21st Century Conservation Service Corps (21CSC). I'd love to set up time to talk a bit about the effort and explore ways that The Container Store could join the movement. Just give me a couple of options that work for you and I'll do everything possible to accommodate.

As you know, the Secretary has a strong commitment and inspirational vision for preparing the next generation of outdoor champions, advocates and leaders. She has set metrics for each component of the plan (play, learn, serve and work). Attached is a document that provides a high-level overview of the youth agenda including goals. The "work" category is getting the most attention from private sector as

Sally has truly added depth and dimension to the term "public-private partnership".

By working collaboratively, we know that we can make significant strides and have a lasting impact. This is about creating a bold national movement to get more young people outdoors, connected to nature, caring for our public lands, employed and learning skills for future employment.

I will also flag the dates of the Conscious Capitalism event for the scheduling team. It would be an honor to attend and engage with the attendees. Thanks again for the invitation.

In the meantime, have a wonderful Thanksgiving and holiday season! I hope that your sales are through the roof and look forward to working with you.

Sincerely,

David

Hello! And nice to meet you, David! Let's connect on another email and we'll determine a time to talk more about this incredible program.

In the meantime, the dates for the Conscious Capitalism event are April 9-11, 2014 - in San Diego. If you think that there's even a *glimmer* of a chance that you could attend to talk about 21CSC, let me know and I'll get in touch with the Conference organizers and start that conversation. Thanks so much – could be so wonderful!

Dear Kip and Audrey -

It was a real pleasure to speak with you today. Congrats again on the IPO - it is wonderful to know that another public company will bring the principles of conscious capitalism to Wall Street!

I have copied David on this so he can connect directly with Audrey. As I mentioned, David joined me from REI to lead our efforts on 21CSC and engaging youth to play, learn, serve and work outside. It would be wonderful to work with The Container Store, along with other enlightened businesses, to engage many more people in service on our public lands.

With regard to the CC event in San Diego, please let us know the dates and we can see if it works with our travel. I fully agree that this would be a wonderful audience for 21CSC.

Happy Thanksgiving and keep in touch!

Warmly,

Sally

Sally,

Thanks so much for your time today – can't tell you how

much I enjoyed our conversation! Truly there isn't a better person our President could have so thoughtfully selected to lead our Dept. of Interior. Thank you for all that you're doing for our beloved country's present and future. It was thrilling to hear what you're working on and towards and know that Audrey will be eager to connect with David soon. After the call, Audrey and I also discussed maybe you or David coming to the big Conscious Capitalism event in April in San Diego to talk a bit about the 21CSC (is that the official name?) just thinking that audience of companies would be ripe for the message. That particular event is open to a much broader group of companies with many representatives coming from each organization versus, say, the CEO Summit that takes place in Austin each year with about 200 CEOs (although that could be a great audience as well – that takes place each October). The Conscious Capitalism events are a far cry from where they were in their humble beginnings when we were there together outside of Austin. They now include key business leaders from virtually every single business sector.

Lastly, here's a link to our blog I mentioned we started after that get together in Austin many years ago – it's evolved into having a great presence in all of our catalogs and really, in everything we use to talk with our customers...the response has been delightful. And the fact that we have a blog about our culture and what we stand yet nothing yet on "getting organized" I think makes people REALLY understand how important...how core... this is to us and to them...as it obviously translates to their experience with The Container Store.

<http://standfor.containerstore.com/>

Again, thank you for reaching out...let's stay in touch.

Kip

PS – and of course thank you for letting me bend your ear on the Gunnison Sage-Grouse ☺.

Sec. Jewell and Gov. Hickenlooper Tour Innovative Efforts to Conserve and Enhance Habitat for Sage Grouse

Commend Colorado Ranch Manager Ray Owens for Being Named Colorado's Wildlife Landowner of the Year

CRAIG, CO – Secretary of the Interior Sally Jewell and Colorado Governor John Hickenlooper today visited northwestern Colorado as part of the Secretary's commitment to working with states and private landowners toward developing conservation efforts for sage grouse in the region. U.S. Fish and Wildlife Service Director Dan Ashe and Bureau of Land Management Principal Deputy Director Neil Kornze joined Jewell and Hickenlooper for a tour of the Bord Gulch Ranch, as well as for a stakeholder meeting with local landowners and officials.

After the ranch visit, Jewell commended its manager, Ray Owens, for the innovative conservation efforts to promote habitat for sage grouse that led him recently to being named one of two recipients of Colorado Parks and Wildlife's (CPW) 2013 Wildlife Landowner of the Year award.

"Ray Owens is a model of the 21st century western rancher with his outstanding stewardship of this working landscape," said Jewell. "He represents the spirit of partnership that can be replicated across the West as we develop landscape-level strategies to lessen the threats to the sage grouse and conserve its habitat."

"The Bord Gulch Ranch is a terrific example of the significant progress made through public/private partnerships in conservation for the greater sage grouse," Gov. John Hickenlooper said. "Some rural residents rely on access and productivity on public land as part of their livelihood. We thank everyone involved in the effort to protect and preserve this iconic species while providing for continued and future economic vibrancy for rural Colorado."

Working with federal and state agencies, including the CPW, the U.S. Fish and Wildlife Service, and the Natural Resources Conservation Service, Owens has implemented a variety of conservation actions that directly benefit the species on the 16,000-acre ranch. These conservation efforts include water projects, fencing, and other infrastructure improvements designed to improve habitat conditions for the bird.

“Ray has committed countless hours working on these projects in the field, in agency offices, and leading tours of his ranch to share his experience with others and lead by example,” Jewell said. “We have an opportunity to work together to develop and execute a conservation strategy, rooted in partnerships, that effectively addresses the threats to the sage grouse.”

The partnership of landowners is at the heart of a joint effort by the federal government and western states to develop and implement a landscape-level conservation plan for the sage grouse before the U.S. Fish and Wildlife Service has to make a decision whether to protect the bird under the Endangered Species Act in 2015.

Two years ago, then-Secretary Ken Salazar and western governors formed the Sage Grouse Task Force to develop a cooperative approach to conserving the species across the West. This approach offers the best opportunity to conserve the species consistent with traditional land uses such as ranching and energy development.

Jewell emphasized that the development of this approach has reached a critical time, and that states in particular must work with private landowners and their federal partners to develop comprehensive strategies that can be demonstrated to reduce the threats to the bird and its habitat.

Additionally, Jewell and Hickenlooper earlier today met in Denver with representatives from the oil and gas industry, non-government organizations, and Colorado officials in a roundtable discussion of federal and state efforts to reduce methane emissions during the production, storage and transportation of oil and gas. As called for in President Obama's Climate Action Plan, Interior is working collaboratively with state governments, as well as the private sector, to reduce emissions across multiple sectors, improve air quality, and achieve public health and economic benefits.

DOI in the News:

SECRETARY JEWELL TOURS COLORADO RANCH TO LEARN ABOUT SAGE GROUSE EFFORTS. The [AP](#) (1/22) reports that Interior Secretary Sally Jewell is "visiting Colorado to learn about efforts by ranchers to help conserve sage grouse." Jewell is "scheduled to join Gov. John Hickenlooper on Tuesday on a tour of a ranch in Craig." Hickenlooper is seeking to persuade BLM "to change its proposed plan for protecting the birds." Additional coverage was provided by the [Scottsbluff \(NE\) Star-Herald](#) (1/22, 36K), [KUSA-TV](#) Denver (1/22, 171K), [KULR-TV](#) Billings, MT (1/22, 2K), and [KCNC-TV](#) Denver (1/21, 26K).

The [AP](#) (1/22) reports that Jewell said that "federal officials want to hear from Colorado farmers and ranchers on their efforts to protect sage grouse as federal land managers consider ways to preserve the bird's habitat." Jewell said the BLM and the FWS "want suggestions from Colorado as the BLM evaluates sage grouse habitat in 11 states." She said, "People really respect and want to learn from the people who work the land." Additional coverage was provided the [Columbus \(IN\) Republic](#) (1/22, 80K), the [Washington Examiner](#) (1/22, 319K), the [Denver Post](#) (1/22, 949K), the [Washington Times](#) (1/22, 417K), the [Seattle Post-Intelligencer](#) (1/22, 768K), [KGWN-TV](#) Cheyenne, WY (1/22, 519) and [KFQX-TV](#) Grand Junction, CO (1/22, 1K).

The [Grand Junction Daily Sentinel](#) (1/22, 73K) reports that joining Jewell were FWS Director Dan Ashe and Neil Kornze, principal deputy director of the BLM. Hickenlooper said, "We had everybody right here ... everybody that mattered. And they listened, is the most important thing."

The [Steamboat Springs \(CO\) Pilot](#) (1/21, 26K) reports that "following the tour, the crew of high-up officials led a meeting at the American Legion Clubhouse in Craig to talk more about sage grouse issues." According to the article, "more than 40 people attended, including all three Moffat County commissioners and other elected officials, but press was barred from the discussion." Eric Brown, director of communications for Hickenlooper's office, said, "Secretary Jewell's office decided the meeting should be closed to press to help foster an open and frank discussion." Also reporting on the story is the [Craig \(CO\) Daily Press](#) (1/21, 10K).

In an editorial, the [Denver Post](#) (1/22, 949K) lauds Hickenlooper's efforts. According to the paper, Hickenlooper's suggestions are reasonable and achievable.

SECRETARY JEWELL TO ADDRESS OUTDOOR RETAILER WINTER MARKET. The [Salt Lake \(UT\) Tribune](#) (1/22, 343K) reports that Interior Secretary Sally Jewell will address the breakfast meeting of the Outdoor Retailer Winter Market on Wednesday. Jewell is "expected to address the need for the private sector to work with government to promote the economic importance of conservation and outdoor recreation." Also, she is "expected to talk more about her goal of providing 100,000 work and training opportunities to young people and veterans on public lands."

Also reporting on the story is the [Deseret \(UT\) News](#) (1/22, 274K).

SECRETARY JEWELL TO VISIT LAS CRUCES. [KRWG-FM](#) Las Cruces, NM (1/22, 5K) reports that on January 24, Interior Secretary Sally Jewell will join Sens. Tom Udall and Martin Heinrich in "a visit to the Organ Mountains region of south-central New Mexico." Jewell will "spend time exploring the area and will attend a public meeting hosted by Senators Udall and Heinrich regarding the community's vision to preserve, protect and enhance some of the public lands located in Doña Ana County." Also, "Jewell will join Udall and Heinrich, as well as Principal Deputy Director at the Bureau of Land Management Neil Kornze, for a public listening session on the community's conservation priorities in the area."

CAPITOL HILL VET TO BE INTERIOR'S DIRECTOR OF INTERGOVERNMENTAL AND EXTERNAL AFFAIRS. The [National Journal](#) (1/22, Subscription Publication, 427K) reports that the Interior Department is bringing on John Blair, "a veteran of Capitol Hill and President Obama's 2008 campaign," this week "to work with states, conservation groups, and other outside parties." Blair will be the director of intergovernmental and external affairs at Interior, "where he will manage relationships with governors, mayors, and groups like the Sierra Club and the Wilderness Society, the department said."

Also providing coverage is the [Government Executive](#) (1/22, 28K).

ADDITIONAL COVERAGE: SAN ANTONIO MISSIONS MAY GET WORLD HERITAGE STATUS. Additional coverage of the nomination of the San Antonio Missions to be recognized as a World Heritage site was provided by the [Summit County \(CO\) Citizens Voice](#) (1/21, 506).

ADDITIONAL COVERAGE OF PARTNERS IN CONSERVATION AWARDS. Additional coverage of the Partners in Conservation Awards was provided by the [St. George \(UT\) Spectrum](#) (1/21, 48K), the [New Jersey](#) (1/22, 526K), [KOLD-TV](#) Tucson, AZ (1/22, 19K), and [WTLX-TV](#) Tallahassee, FL (1/22, 1K).

SUPPORT FOR PILT PROGRAM URGED. In an editorial, the [Aspen \(CO\) Times](#) (1/22, 46K) expresses doubt the funds for the PILT program will ever "materialize." According to the paper, "if the program disappears forever, we believe the pressure will increase on the federal government to sell off federal lands to help with rural economies." The paper wants "national forests, magnificent red-rock canyons and seashores to remain firmly under federal government control," and it argues that "in a small way, the continued federal support of PILT can help achieve that goal."

Additional coverage of the PILT program was provided by the [Denver Post](#) (1/22, Sherry, 949K).

America's Great Outdoors:

National Park Service:

DRAKES BAY OYSTER CO. FILES COURT ACTION TO REMAIN OPEN WHILE PREPARING SUPREME COURT CASE. The [Marin \(CA\) Independent Journal](#) (1/22, 88K) reports that the Drakes Bay Oyster Co. has "filed a legal motion to allow it to continue to operate while it prepares a case to bring to the US Supreme Court." Owner Kevin Lunny would have been "forced to begin dismantling his operation" beginning Tuesday after the 9th US Circuit Court of Appeals declined to re-hear the Drakes Bay case last week, but "the new court motion filed Monday will buy him more time while a case to the high court is developed." The article notes that "it could be days to weeks before the 9th Circuit issues a ruling on the latest filing," and "if Drakes Bay is denied, it can make the same request of the Supreme Court."

Additional coverage was provided by the [AP](#) (1/22), the [St. Paul \(MN\) Pioneer Press](#) (1/22, 540K), and the [SF Weekly](#) (1/22, 249K).

EIGHT PILOT WHALES FOUND DEAD OFF FLORIDA COAST. The [AP](#) (1/22, Wides-munoz) reports that eight pilot whales found beached in shallow waters off Florida's southwest coast will be examined in the hopes of unraveling an underwater mystery as to how they died, authorities said Tuesday. They added that "six others remain unaccounted for." The article notes that "in December, more than 50 pilot whales stranded in Everglades National Park."

Also reporting on the story are [USA Today](#) (1/21, Cepero, Gillis, 5.82M) and the [Boston Herald](#) (1/22, 643K).

SIERRA NEVADA BEARS AWAKE EARLY DUE TO WARM WINTER. The [E&E Daily](#) (1/21) reports that "California's winter is so mild this year that Sierra Nevada black bears that normally would be deep in hibernation are instead roaming through areas frequented by humans." According to the article, "wildlife officials are working to notify visitors in popular areas like Lake Tahoe and Yosemite National Park after a series of unusual interactions with bears." The article notes that "a bear ran across a ski run earlier this month at Heavenly Mountain Resort in South Lake Tahoe, Calif., and wildlife officials in Nevada euthanized a 260-pound male bear after it broke into several cars last month."

PROPOSED BIKE PATH IN GRAND TETON NATIONAL PARK SPURS DEBATE. The [E&E Daily](#) (1/21) reports that conservationists and bike advocates are battling over a proposed cycling path in Grand Teton National Park. Supporters argue "the \$2 million pathway and other road improvements would make the stretch safer for cyclists." However, "critics argue the construction project would disturb a pristine section of the park where grizzly bears have made a comeback in recent years."

ROCKY MOUNTAIN PARK CONSIDERS ALLOWING BIKES ON LAKE TRAIL. The [AP](#) (1/22, 417K) reports that Rocky Mountain National Park is "considering allowing bicycles on a 2-mile-long section of the East Shore Trail along Shadow Mountain Lake." Park officials said Tuesday that "they will hold public meetings on the proposal on Feb. 11 in Grand Lake and Feb. 24 in Boulder."

Also reporting on the story is the [Fort Collins \(CO\) Coloradoan](#) (1/21, 85K).

GRAY WOLF SHOT WITHIN GRAND TETON NATIONAL PARK. The [AP](#) (1/22) reports that officials are investigating after a gray wolf was shot and killed within Grand Teton National Park boundaries. According to park

officials, "the person who fired the lethal shot Monday notified Wyoming Game and Fish Department wardens, who in turn notified park rangers."

Also reporting on the story is [KPVI-TV](#) Idaho Falls, ID (1/22, 1K).

YELLOWSTONE ASKS WYOMING TO ADOPT "ORPHAN" STRETCH OF BEARTOOTH HIGHWAY. The [Billings \(MT\) Gazette](#) (1/22, 206K) reports that Yellowstone National Park Superintendent Dan Wenk visited Cheyenne, Wyo., "last week to ask Wyoming Gov. Matt Mead and state transportation officials to participate in a unique adopt-a-highway program." Wenk "asked Wyoming to take ownership of an 'orphan' stretch of the Beartooth Highway." However, "neither Mead nor members of the Wyoming Transportation Commission — which governs the state's Department of Transportation — appear eager to take on the financial burden that would come with assuming responsibility for the road."

SHIFTING QUINAULT RIVER THREATENS BUILDING IN OLYMPIC NATIONAL PARK. The [AP](#) (1/22) reports that Olympic National Park "says the shifting Quinault River has come within a foot-and-a-half of undercutting the historic Enchanted Valley Chalet." According to spokeswoman Barb Maynes, "officials are monitoring the building by air until someone is able to hike in."

MAN CHARGED IN ARIZONA ATTACK ON NPS EMPLOYEE. The [AP](#) (1/22, 949K) reports that "a man who is already in federal custody has been indicted in an attack on a National Park Service employee in southeastern Arizona last year, authorities said Friday." According to the article, "a Cochise County grand jury on Thursday indicted Gil Gaxiola, 33, on charges of attempted first- and second-degree murder, armed robbery, aggravated assault, kidnapping and theft of means of transportation." The NPS employee, Karen Gonzales, was "found unconscious from head trauma in a picnic area restroom at Chiricahua National Monument on Aug. 28."

WOMAN CHARGED WITH BURNING DOWN TREE COULD BE OFFERED PLEA DEAL. [WOFL-TV](#) Orlando, FL (1/22, 26K) reports that the woman "accused of burning down a historic tree in Seminole County could be offered a plea deal as early as Tuesday," according to officials. Sara Barnes is accused of lighting "a fire at the base of the 3500 year old Bald Cypress named 'The Senator' located in Longwood's Big Tree Park back in January 2012."

PERMISSION SOUGHT FOR WORLD CUP VIEWING PARTIES IN DUPONT CIRCLE. The [Washington Post](#) (1/21, Goff, 4.28M) reports that Dupont Festival, a non-profit group, has applied to FIFA and the NPS for permission to organize large-scale viewing of the World Cup in Dupont Circle this summer Aaron DeNu, the festival's principal organizer, said he is seeking "to host at least one all-day watch party, on a Sunday (June 22), culminating with the United States vs. Portugal at 5 p.m." DeNu is "also looking into other possible dates, including the July 13 final."

PILGRIM CHURCH ADDED TO NATIONAL REGISTER OF HISTORIC PLACES. The [Boston](#) (1/22, 750K) reports that Pilgrim Church in Dorchester has been added to the National Register of Historic Places.

Bureau of Land Management:

LAND COMMISSIONER SUPPORTS PURCHASE OF BLM SITES TO BENEFIT EDUCATION. The [Alamogordo \(NM\) Daily News](#) (1/22, 19K) reports that the acquisition of "800,000 acres of excess federal land could generate up to \$50 million for education in New Mexico, Commissioner of Public Lands Ray Powell told the Legislative Education Study Committee last week." Powell said he backs "a bill, sponsored by Sen. Michael Sanchez, D-Belen, that would appropriate \$250,000 for a two-year feasibility study about acquiring the land from the Bureau of Land Management." Powell supports the acquisition because, he said, "I think we need more money for education and early-childhood education. We can't grow the permanent fund without acquiring new land."

Fish and Wildlife Service:

REMOVING BARRED OWLS CHEAPER AND EASIER THAN THOUGHT. The [AP](#) (1/22, Barnard) reports that "the mechanics of shooting invasive barred owls to make room for threatened northern spotted owls" has turned out to be "cheaper and easier than some people had imagined." According to the article, "equipped with a

specially modified shotgun and a remote-controlled digital owl caller, biologist Lowell Diller found that once he arrived at a known site, it took two hours and 23 minutes to call in, shoot and process a barred owl." Diller "estimates direct costs at \$100 to \$150 per bird."

Additional coverage was provided by [KATU-TV](#) Portland, OR (1/22, 105K).

JUDGE ORDERS AGENCIES TO PROTECT WILD SALMON FROM HATCHERY-BRED FISH. The [E&E Daily](#) (1/21) reports that "federal and Oregon officials must work with conservationists on a plan to better prevent hatchery fish from interfering with native endangered stocks in the Pacific Northwest, a federal judge ruled last week." Officials from the National Marine Fisheries Service and the Oregon Department of Fish and Wildlife this week will have to "present a proposal on how they will deal with the release of salmon raised at the Sandy River Hatchery into the river basin this year." However, "if government officials are unable to come to an agreement with conservationists, they will have to present a schedule for how they plan to resolve their disputes," US District Judge Ancer Haggerty held.

FWS CONSIDERING LIFTING PROTECTIONS FOR RELOCATED CANADIAN GRAY WOLVES. The [Toronto \(CAN\) Globe and Mail](#) (1/22, 1.1M) reports that the FWS is considering "lifting protections for transplanted Canadian grey wolves across the United States." According to the article, "almost two decades ago, the wolves were relocated to Yellowstone National Park in an effort to return them to where the animals had been hunted to extinction" But "as the wolf population increased, the repercussions – good and bad – were seen far and wide." The article notes that "elk declined but beavers increased," and "coyotes declined but their prey increased."

FWS PLANS TO RELEASE 750,000 SALMON INTO SACRAMENTO RIVER. The [YubaNet \(CA\)](#) (1/22, 1K) reports that "as the Brown administration declared a drought state of emergency in California, the Coleman national fish hatchery plans to release another 73,000 baby salmon next week to almost certain death in the drought-stricken Sacramento River." The article notes that "the planned release follows releases of almost 750,000 baby salmon over the last five weeks ignoring warnings from salmon advocates the fish are unlikely to survive." According to the article, "federal officials overseeing the controversial releases admit conditions are very bad for salmon but insist on releasing the fish at the hatchery anyway."

ENVIRONMENTAL GROUP SEEKS ENDANGERED STATUS FOR SEVEN SPECIES. The [Cronkite News](#) (1/22) reports that the Center for Biological Diversity is petitioning the FWS to "put seven amphibians and reptiles on the endangered species list, including four native to Arizona." Citing declining populations, the group filed a formal notice of intent to sue the FWS on Jan. 16. According to the article, "the list includes the Arizona toad, which is also found in New Mexico, Nevada and Utah; the Arizona night lizard, found in rocky areas of Yavapai County; the Bezy's night lizard, found mostly in desert highlands and woodlands; and the Yuman Desert fringe-toed lizard, found in southwestern Arizona." The article notes that "the other species on the list are the Cascade Caverns salamander, native to Texas; the Rio Grande cooter, a turtle native to Texas and New Mexico; and the Reticulate collared lizard, native to Texas."

ENVIRONMENTALISTS FIGHT DECISION TO REMOVE PROTECTIONS FOR GRAY WOLF. The [Denton Publications](#) (1/21) reports that the Adirondack Council "has placed themselves front and center in the fight against" the FWS' "pending decision to remove the gray wolf from its endangered species list and their decision to list the eastern wolf as a new separate species with a distinct evolutionary heritage, an action that means that the eastern wolf is no longer technically endangered and doesn't warrant federal protection." The group argues that "a viable wolf population hasn't yet been reestablished in the northeast" and "delisting them not only is poor public policy based on shoddy science, but also a violation of the Endangered Species Act." However, "the FWS said current scientific research has shown that there are no resident populations of eastern wolf or any wolf species in the northeastern United States."

FWS RELEASES COMPREHENSIVE CONSERVATION PLAN FOR BENTON LAKE NATIONAL WILDLIFE REFUGE COMPLEX. [KXLO-FM](#) Lewiston, MT (1/22) reports that the FWS has announced publication of the final Comprehensive Conservation Plan for the Benton Lake National Wildlife Complex. The plan "addresses all units of the refuge complex, including 2 refuges, 1 wetland management district containing 22 waterfowl production areas, and 3 conservation areas over the next 15 years."

SUCCESSSES OF ENDANGERED SPECIES ACT TOUTED. In an op-ed for the [Jonesborough \(TN\) Herald and](#)

Tribune (1/22, Lamberts, 13K), Frances Lamberts touts the importance of the Endangered Species Act. According to Lamberts, "the law's successes in recovering such wildlife species as the blackfooted ferret, wood stork, California condor and others are known." However, "of far greater importance yet is its keeping more than 1,500 plants and animals from becoming extinct within our borders."

FERAL NATURE OF CATS SPARKS DEBATE. In his column for the [Washington Post](#) (1/21, Milloy, 4.28M), Courtland Milloy writes about the feral nature of cats. He notes that a New York Times report on cat kills that was published in January 2013, "which was based on a major study, blamed cats — house cats roaming outside as well as feral cats — for killing 'a median of 2.4 billion birds and 12.3 billion mammals a year' in the United States." Milloy also writes that scientists at the Smithsonian Conservation Biology Institute and the FWS "had used a 'mathematical model' to distill 'existing scientific literature on cat-wildlife interactions.'"

US Geological Survey:

USGS CONFIRMS ZEBRA MUSSELS IN LAKE LAVON. The [San Angelo \(TX\) Standard-Times](#) (1/21, 67K) reports that the USGS has confirmed the presence of Zebra mussels in Lake Lavon. According to the article, "the presence of live zebra mussels or veligers, their larvae, has now been confirmed in six Texas water bodies: Lakes Texoma, Ray Roberts, Lewisville, Bridgeport, Belton, and Lavon." The article notes that "a team of USGS scientists led by Dr. Christopher Churchill has been monitoring North Texas reservoirs and rivers for the presence of juvenile and adult zebra mussels as well as for the presence of zebra mussel DNA," and "Lake Lavon's water samples recently tested positive for zebra mussel DNA and a veliger was also positively identified."

Also providing coverage is the [Gilmer \(TX\) Mirror](#) (1/22, 12K).

Securing America's Energy Future:

Renewable Energy:

FIRST SOLAR OFFICIALS SAYS INDUSTRY THRIVING IN NEVADA. In an op-ed for the [Las Vegas Sun](#) (1/21, Woodruff, 155K), Jim Woodruff, vice president of state and local government affairs for First Solar, writes that the Los Angeles Times article "Solar power's future not as bright after initial building boom" runs "contrary to clear evidence that the large-scale solar industry is thriving in the Western US, particularly in Nevada." According to Woodruff, "although the article includes a small list of California solar thermal projects that have failed because of poor siting decisions resulting in environmental opposition, it omits numerous photovoltaic projects that have succeeded, including several projects First Solar has in development or under construction, or which First Solar has already delivered to owners in the Southwest." He concludes that "Nevada's abundant solar resource, favorable policy environment, skilled workforce, elected leadership, and effective state and federal agency personnel clearly make it today's front-running solar market in the western US"

Onshore Energy Development:

REP. DAINES SEEKS ANSWERS ON COAL RULES. The [Fairfield \(MT\) Sun Times](#) (1/21) reports that Rep. Steve Daines "recently continued his fight to stop the Obama Administration's War on Coal by pressing a top Department of Interior Office of Inspector General (OIG) official for answers about the Administration's efforts to implement damaging coal regulations that stand as a direct threat to Montana's coal industry and the jobs it supports." According to the article, "during the House Natural Resources Committee oversight hearing on 'Obama Administration's War on Coal: The Recent Report by the Office of the Inspector General,' Daines questioned Robert A. Knox, Assistant Inspector General for Investigations at the US Department of Interior, about why the Administration has spent millions of dollars rewriting with little public input or oversight." Daines said, "I find it very troubling here, that OSM's actions are being determined by court settlements with habitual litigants. And I think this particular situation just demonstrates a broader theme with this Administration—where the agency agrees to settle and then is bound by the arbitrary and unrealistic demands of these organizations. We see the same with ESA litigation. We see the same in the timber industry. The process is not transparent, and it's not how rulemaking is supposed to be conducted. And it's hurting jobs, and its hurting taxpayers."

Offshore Energy Development:

FORMER HALLIBURTON MANAGER SENTENCED TO PROBATION IN SPILL PROBE. The AP (1/22, Kunzelman) reports from New Orleans that former Halliburton manager Anthony Badalamenti was sentenced on Tuesday "to one year of probation for destroying evidence in the aftermath of BP's massive 2010 oil spill in the Gulf of Mexico." Badalamenti, of Katy, TX, "had faced a maximum of one year in prison at his sentencing by U.S. District Judge Jay Zainey. Badalamenti pleaded guilty in October to one misdemeanor count of destruction of evidence."

Bloomberg News (1/21, Calkins, Feeley, 1.91M) reports that Badalamenti "was a supervisor for Halliburton Energy Services Inc., which provided cementing operations on offshore wells. He admitted in October that he ordered a subordinate to delete the results of computer simulations run on the cement seal of BP's Macondo well after it blew up in April 2010, triggering the biggest offshore oil spill in U.S. history."

Tackling America's Water Challenges:

EXPERTS SAY CALIFORNIANS FACE "NEW REALITY" OF WATER SCARCITY. The E&E Daily (1/21) reports that after Gov. Jerry Brown on Friday officially declared California's "record-shattering water shortage," experts are saying that "living with long-term drought could become the 'new reality' for California." In fact, "some fear not only that the drought's effects will be more pronounced than previous dry spells, but that the populous state might be forced to adjust to less precipitation on an ongoing basis." In light of this, experts asserted that "the drought should be seen as a catalyst for making needed changes to how California handles its water."

Additional coverage of the drought was provided by the High Country (CO) News (1/22, 74K), the Fresno (CA) Bee (1/21, 327K), the Rancho Santa Fe (CA) Review (1/21, 21K), KBFX-TV Bakersfield, CA (1/22, 12K), KQED-FM San Francisco (1/20, 13K), and KTXL-TV Sacramento, CA (1/21, 19K).

WATER MANAGERS KEEPING EYE ON LAKE POWELL. KUTV-TV Salt Lake City (1/22, 7K) reports that "disappointing snow pack levels across Utah have water officials predicting 2014 to be yet another below-average water year." Meanwhile, "water managers and observers are also keeping a close eye on the level of Lake Powell as an indication of the region's overall water situation." The article notes that "Powell is expected to keep dropping this year," prompting the Interior Department "to enact, for the first time ever, water-shortage management protocols on the Colorado River."

ARKANSAS VALLEY CONDUIT PROJECTS STALLED. The Pueblo (CO) Chieftain (1/22, 94K) reports that "federal processes have slowed the completion of a record of decision" for the Arkansas Valley Conduit, a master storage contract and interconnection of outlets on Pueblo Dam. According to Christine Arbogast, lobbyist for the Southeastern Colorado Water Conservancy District, sponsors of the projects, "an environmental impact study was finalized in August, but changes in the Bureau of Reclamation leadership and a federal shutdown have delayed the ROD for five months." Arbogast said "a decision could be made in a few weeks." The article notes that "this year's federal budget includes \$1 million for the conduit, but larger appropriations are needed in future years to move the project ahead."

BOR SEEKS PUBLIC INPUT ON PLAN FOR LAKE PUEBLO STATE PARK AND LAKE PUEBLO WILDLIFE AREA. The Pueblo (CO) Chieftain (1/22, 94K) reports that the BOR, "in cooperation with Colorado Parks and Wildlife, is seeking public input on a resource management plan for Lake Pueblo State Park and the Lake Pueblo Wildlife Area." The agencies will begin "a 30-day public comment period with an open house at the Lake Pueblo State Park Visitor Center Wednesday from 5:30 to 8:30 p.m."

STATE SEN. GRIFFIN TOURS YUMA DESALTING PLANT. The Sierra Vista (AZ) Herald (1/20, 30K) reports that "with an eye to explore new solutions to Arizona's long-term water supply challenges, State Sen. Gail Griffin recently joined representatives from the Central Arizona Project on a tour of the US Bureau of Reclamation's Yuma Desalting Plant to learn more about the facility and the viability of desalination as new source of water for the state." Griffin said, "As chairman of the Senate Government and Environment Committee, I am keenly aware of the importance of water to our state's economy and enjoyed the opportunity to learn more about an existing desalination facility here in Arizona. While thoughtful planning and policy-making have protected Arizona from the

kinds of water shortages faced in other states like California, it is important to explore new sources of water to ensure that our economy and our population continue to grow."

ADDITIONAL COVERAGE OF BAY DELTA CONSERVATION PLAN. Additional coverage of the Bay Delta Conservation Plan was provided by the [Santa Clarita Valley \(CA\) Signal](#) (1/22, 13K) and the [Salem \(OR\) Capital Press](#) (1/21, 113K).

Empowering Native American Communities:

COURT UPHOLDS CALIFORNIA'S BAR AGAINST BIG LAGOON RANCHERIA CASINO. The [Courthouse News](#) (1/21, 7K) reports that "barring a big casino from environmentally sensitive land in California did not violate federal Indian gaming regulations, the 9th Circuit ruled Tuesday." The article notes that "the Big Lagoon Rancheria and California have been embroiled in a tug-of-war over a proposed Humboldt County casino since 1998 when the tribe rejected a statewide tribal gaming compact," and "the tribe claimed in a federal complaint that the compact violated the Indian Gaming Regulatory Act's requirement of good-faith negotiations for any proposed casinos."

INTERIOR BOARD OF INDIAN AFFAIRS DETERMINES HALFTOWN STILL CAYUGA NATION'S FEDERAL REPRESENTATIVE. The [Auburn \(NY\) Citizen](#) (1/22, 34K) reports that "in two rulings issued Jan. 16, the Interior Board of Indian Affairs determined that Clint Halftown remains" the Cayuga Indian Nation's representative to the federal government.

Top National News:

US OFFERS ANTI-IED TECHNOLOGY TO RUSSIA AS OLYMPIC TERROR CONCERNS GROW. As has been the case for several days, concerns about terrorists' threats to disrupt the upcoming Winter Olympics in Sochi, Russia continue to generate a great deal of media coverage in the US. Reports last night and this morning emphasize the perception – fed, in part, by President Obama's call to Russian President Vladimir Putin on Tuesday – that the US and Russia are cooperating on security measures. On CNN's *The Situation Room* (1/21, 554K), Wolf Blitzer reported that the White House had confirmed that on Tuesday, President Obama spoke to Putin about the threats to the Sochi Olympics, and "offered" Putin the US government's "full assistance."

McClatchy (1/21, Clark, 95K) reports that the White House released a statement saying the two presidents "discussed 'how best to advance shared US-Russian interests, including a safe and secure Sochi Olympics, for which the United States has offered its full assistance.'" McClatchy notes that the State Department "has issued a travel warning for Americans heading to the Winter Games and the White House has said it would like 'closer cooperation' with Russia to ensure the safety of" Americans in Sochi. The Hill (1/21, Sink, 194K) reported that "the Kremlin characterized the conversation as 'businesslike and constructive.'"

AFP (1/22) reports that President Obama's call "came amid signs of subtle but rising pressure on Russia over securing the Games from Washington." USA Today (1/22, 5.82M) noted that the White House's "readout" said Obama and Putin "also discussed Syria, trade and investment, and negotiations over Iran's nuclear program." Reuters (1/21) also briefly describes the White House's characterization of Tuesday's conversation.

On NBC Nightly News (1/21, story 5, 2:10, Williams, 7.86M), Andrea Mitchell reported that "the State Department's Diplomatic Security officers will be in Sochi," along with "FBI agents, primarily to protect the US delegations," and "two US war ships will be positioned in the Black Sea in case Americans need to be evacuated." Mitchell added that "the State Department has issued a travel warning for Americans going to Russia." According to the AP (1/22), the State Department "is telling those attending the games to remain attentive to personal security."

On CNN's *Anderson Cooper 360* (1/21, 687K), Phil Black reported that Gen. Martin Dempsey, the chairman of the Joint Chiefs of Staff, "met with his Russian counterpart, and they talked about sharing...American technology to detect and jam improvised explosive devices." Black added that "while the American version of [the] conversation" between Obama and Putin "mentions Sochi and the US offer to help in any way it can, the Russian version of that call does not mention that." According to Black, "The Russians will not easily admit that they need

help, or they are not up to the task of securing these Games.”

Mark Philips, reporting for the *CBS Evening News* (1/21, story 6, 2:20, Pelley, 5.58M), also noted that the Pentagon “says it’s in discussions with Moscow about providing technology, developed in Iraq and Afghanistan, for jamming phone signals used to set off explosive devices.” However, according to Philips, “there are still technical issues to overcome...and there isn’t much time.”

Bloomberg News (1/21, Lerman, Kravchenko, 1.91M) reports that the US military “has developed ground-penetrating radar to detect explosives,” and “a Pentagon task force to combat homemade bombs has deployed robots and other tools to disrupt mobile phone and other wireless signals used for detonation.” Bloomberg reports that “it isn’t clear how receptive” the Russian government “would be to the US offer.” However, according to the *New York Times* (1/22, Shanker, Subscription Publication, 9.61M), it was Russian military officials who “first raised the prospect of gaining access to the American technology.” The Times adds that “the potential for a technological exchange was part of an extensive discussion...on Tuesday” in Brussels, where Dempsey “held his first face-to-face meeting with his Russian counterpart, Gen. Valery V. Gerasimov, chief of the general staff.” The Times goes on to report that, “even with their extensive agenda on bilateral security issues, the question of safety at the Olympics was thoroughly discussed, including a description by General Gerasimov of the close cooperation between the Russian military and its civilian law enforcement and intelligence services” ahead of the Opening Ceremony.

According to *AFP* (1/22), Defense Secretary Hagel “already offered American support during a January 4 phone call with his Russian counterpart Sergei Shoigu.” Richard Engel, on *NBC Nightly News* (1/21, story 4, 2:45, Williams, 7.86M), said, “On the one hand, Russia says that there is no security problem” ahead of the Winter Olympics in Sochi, Russia, and “that everything is under control, but it also says that several suicide bombers are on the loose.” Likewise, on *ABC World News* (1/21, story 4, 2:25, Sawyer, 7.43M), Brian Ross reported that Russia “continues to insist it has security issues in hand and counterterrorism officials in Moscow said today they had killed one of the leaders of the Islamic terror groups targeting Sochi in this military raid conducted over the weekend in Dagestan.”

The *Washington Post* (1/22, A1, Lally, 4.28M) reports that the Russian government “has deployed up to 60,000 police personnel, troops and special forces to Sochi – double the number Britain enlisted in London for the 2012 Summer Games.” The Post also reports that Prime Minister Dmitry Medvedev has allowed “the collection of telephone and e-mail metadata from foreign journalists, Olympic officials and athletes.” Nevertheless, McClatchy (1/22, Douglas, Barrett, 95K) says “some security experts aren’t sure whether Russia’s security and intelligence efforts are geared toward handling a large-scale event like the Olympics.” McClatchy adds that Jeffrey Mankoff of the Center for Strategic & International Studies contends that “Russia’s security apparatus is designed to insulate the regime as its top priority, not necessarily protect the public.”

On *CNN’s The Situation Room* (1/21, 554K), Phil Black reported that “Russian authorities believe they have detected two separate terror plots involving so-called ‘black widows,’ or female suicide bombers,” who intend to stage attacks in Sochi. According to *USA Today* (1/22, Scott, 5.82M), it has been reported that “authorities in Sochi are searching for Ruzanna ‘Salima’ Ibragimova, the widow of a member of a militant group from the Caucasus region, and two other black widows,” and that “there is concern Ibragimova made it past the Olympic security ring.” *USA Today* reports that “threats to the Games have primarily come from the Caucasus Emirates, an Islamist militant group led by Doku Umarov, whose death was reported last week” although “there has been no proof of his death.” According to the *AP* (1/21, Heintz), “For more than a decade, women have committed many of Russia’s worst terror attacks,” including “downing airliners” and “blowing up subway cars.”

The *AP* (1/21, Vasilyeva) reports that Rep. Michael McCaul, chairman of the House Homeland Security Committee, who “was in Sochi on Tuesday to assess the situation,” said he is “impressed by the work of Russian security forces but troubled that potential suicide bombers had gotten into the city.” McCaul is quoted as saying, “We know some of them got through the perimeter.” McCaul added, “The one improvement I would ask of the Russians is to allow our intelligence services to coordinate and cooperate better with theirs.”

OBAMA REFRAINS FROM BLAMING REPUBLICANS FOR STALLED IMMIGRATION REFORM. *Politico* (1/22, Epstein, 464K) reports that in regards to immigration, the White House “is trying to dial down the partisan rhetoric,” and is “asking its allies to do the same.” *Politico* says that according to “White House officials,”

President Obama "won't threaten to take unilateral executive action — at least not yet —" because he "wants to give House Republicans some breathing room to try to pass legislation this year." As a result, "While Obama is blaming Republicans for blocking the rest of his domestic agenda," he "won't use his bully pulpit to embarrass or chasten the GOP on immigration" during his State of the Union address. An anonymous "White House official" is quoted as saying, "We're focused more on the result and less about the process," so "if they have to jump through a series of hoops, we're happy to let the House work its will."

NYTimes A1: New Boehner Adviser Is Close To Former Kennedy Aide Directing White House Immigration Strategy. In a front-page article titled, "2 Friends Reach Across the Aisle on Immigration," the *New York Times* (1/21, A1, Shear, Subscription Publication, 9.61M) profiles Esther Olavarria, Deputy Assistant Secretary of Homeland Security for Policy of the United States, and Rebecca Tallent, who was recently hired by Speaker Boehner to help him win passage of immigration reform in the House. According to the *Times*, Olavarria "is charged with finding a compromise that Democrats and activists can live with." The *Times* reports that Tallent and Olavarria "began working together on immigration in 2003" when Olavarria "was the top immigration adviser to" the late Sen. Edward Kennedy, and Tallent "held a similar position under Republican lawmakers, including" Sen. John McCain.

Amid Immigration Push, US Chamber Lobbying Spending Topped \$50 Million Last Year. *The Hill* (1/21, Bogardus, 194K) reports that the US Chamber of Commerce "funneled" about \$52.7 million to lobbying efforts last year, according to disclosure files, including "almost \$16.5 million" in the fourth quarter. *The Hill* says that some of that funding "went toward lobbying on immigration reform, which is a top legislative priority for the business community." The Chamber, *The Hill* says, "played an instrumental role" in pushing the Senate bill through last year. Now the group's focus has turned to moving the legislation in the House.

REPORT LAYS OUT CLIMATE CHANGE ACTIONS PRESIDENT CAN TAKE ON HIS OWN. *Reuters* (1/22, Volcovici) says that a new 207-page report by the Center for the New Energy Economy at Colorado State University argues that President Obama can take a number of actions to combat climate change that do not require Congressional backing. For example, the report says that Administration could have Federal agencies to work with electrical utilities and regulators to remove barriers for clean energy technologies. *Reuters* says that the White House coordinated with the group on the report.

UN Report Blames West For Rise In CO2 Emissions In Developing Companies. *The Daily Caller* (1/22, Bastasch, 422K) reports that a "draft report" from the UN argues that growing global economies "through expanded trade between rich and poor countries is driving global warming." The report says that wealthy companies are "outsourcing" CO2 emissions to poorer nations "through increasing international trade." The report says that increased emissions from coal plants in China "and other developing countries" are "used to power factories that produce goods" for US and European consumers.

2013 Tied For 4th Warmest On Record. *The CBS Evening News* (1/21, story 5, 0:15, Pelley, 5.58M) reported that on Tuesday, "scientists at the National Oceanic and Atmospheric Administration told us that 2013 tied 2003 as the fourth warmest year on record," going back to 1880. The "average worldwide temperature last year was just over 58 degrees."

Despite a headline reading, "One Hot Planet: Earth Sets Record In 2013," *USA Today* (1/22, Rice, 5.82M) similarly reports that 2013 was the fourth-warmest year on record in 2013. The "average temperature across global land and ocean surfaces was 1.12 degrees above the 20th-century average." *USA Today* says that 2013 was "one of the warmest years on record that did not include the warming influence of an El Niño climate pattern," according to a NOAA official.

Editorial Wrap-Up:

NEW YORK TIMES. "Another Syria Peace Conference." The *New York Times* (1/22, Subscription Publication, 9.61M) editorializes that while "few peace conferences have been set up amid the unrelenting pessimism that surrounds the talks involving Syria" and "a peace agreement is unlikely to be reached anytime soon, the meeting can still produce useful results." The *Times* says the parties' "early goals should include a cease-fire" and getting humanitarian assistance to citizens. The *Times* also says "it is unfortunate that some diplomatic solution could

not have been found to include Iran" in the discussions.

"A Rebuff to Overbroad Watch Lists." The *New York Times* (1/22, Subscription Publication, 9.61M) editorializes that although "public trials are a cornerstone of a democratic society," people who successfully show they were mistakenly placed on government terror watch lists "have no easy path around the walls of official secrecy and obstruction." The Times says that "terror watch lists remain pointlessly overbroad, with more than 875,000 names scattered among about a dozen lists." The Times notes that in a recent trial that resulted in US District Court Judge William Alsup finding that Stanford professor Rahinah Ibrahim was mistakenly placed on a no-fly list, the judge told the government lawyers, "Trials are important. Trials are supposed to be public," after they attempted to classify evidence that was already public.

"How Gov. Christie Moves Forward." In an editorial, the *New York Times* (1/22, Board, Subscription Publication, 9.61M) writes that New Jersey Gov. Chris Christie's "gauzy message of bipartisanship, long one of his favorite themes, had a hollow ring to it this time around." The Times says it "will take more than talk of political harmony to wipe away the mounting evidence and accusations of aggressive bullying by his administration."

WASHINGTON POST. "Mr. Putin's Playground." In an editorial, the *Washington Post* (1/22, 4.28M) suggests that, in passing measures aimed at opposition demonstrators, President Viktor Yanukovich is following the strategy Russian President Vladimir Putin "used to crush mass demonstrations against his regime," once again allowing "Putin to be his puppeteer." The Post calls for the West to do more "to prevent a nation that was headed toward integration with the democratic West from becoming an autocratic Kremlin colony." The paper argues sanctions against Yanukovich and his circle should be ready in the event of violence against protesters and calls for dispatching a special envoy to encourage negotiations. The Post also urges Obama "to recognize Mr. Putin's role...and hold him accountable."

"When A Child Dies." In an editorial, the *Washington Post* (1/22, 4.28M) writes that the decision of a judge in Virginia to sentence a woman "to just five years in prison for the felony murder of a 23-month-old boy in her care brought an angry reaction." The Post says that some child advocates argue that such short sentences are not anomalous. The Post says that the Commission to Eliminate Child Abuse and Neglect, "created by Congress in 2012," should "examine are how crimes against children are prosecuted and adjudicated and whether the right message is being sent about the value of children's lives."

"McDonnell's Atrocious Behavior." The *Washington Post* (1/22, 4.28M), in an editorial, credits Virginia Gov. Bob McDonnell for having "achieved important, ground-breaking accomplishments," but adds that, at the same time, he also "exercised atrocious judgment" by "putting himself in the private pay of a favor-currying businessman."

WALL STREET JOURNAL. "The President Inhales." In an editorial, the *Wall Street Journal* (1/22, Subscription Publication, 5.91M) says that in his *New Yorker* interview, the President essentially endorsed legalizing marijuana. The Journal says that there should be an open debate about legalizing marijuana, but that debate should be clear about the drug's risks and downsides. The Journal says that now that Obama is president, he needs to serve as a better role model for adolescents.

"A Government Warning To S&P." In an editorial, the *Wall Street Journal* (1/22, Subscription Publication, 5.91M) writes that the government should, as S&P seeks, share documents relevant to the claims the lawsuit is retaliatory, and suggests that former Treasury Secretary Timothy Geithner's alleged statement could provide the motive for the government's resistance to such a move. The editorial concludes that both S&P shareholders and taxpayers have a right to know the government's response to criticism.

"The Syria Peace Follies." The *Wall Street Journal* (1/22, Subscription Publication, 5.91M) editorializes that the UN's rescinded Syria peace-talks invitation to Iran highlights the confusion that has surrounded the entire negotiation process. The Journal highlights conflicting statements from US officials and the UN. According to the Journal, US officials said they were surprised by UN Secretary General Ban Ki-moon's invitation to Iran, while the UN says the White House knew about the offer before it occurred. The Journal argues that even without the confusion over the invitation, Syria's government has little incentive to reach an agreement because it believes it is winning the conflict and believes it can move forward without fear of Western military intervention.

Washington Schedule:**TODAY'S EVENTS IN WASHINGTON.**

White House:

PRESIDENT OBAMA — The President and the Vice President receive the Presidential Daily Briefing; the President and the Vice President meet with the President's Commission on Election Administration, Roosevelt Room, pool spray at the top; the President and the Vice President convene a meeting with select Cabinet Secretaries of the Council on Women and Girls, Oval Office, stills only pool spray at the top; the President and the Vice President meet for lunch; the President and the Vice President host an event for the Council on Women and Girls, East Room, pooled press; the President and the Vice President meet with Secretary of the Treasury Lew, Oval Office, closed press. Notes: Press Briefing by Press Secretary Jay Carney.

VICE PRESIDENT BIDEN — In the evening, the Vice President will host Speaker al-Nujaifi for dinner at the Naval Observatory. This dinner is closed press. The Vice President will meet with Australian Foreign Minister Julie Bishop at the White House. This meeting is closed press. The Vice President will meet with Iraqi Council of Representatives Speaker Osama al-Nujaifi at the White House. There will be a pool spray at the top of this

meeting in the Roosevelt Room. Notes: Refer to The President's Schedule for other events.

US Senate: SEN. SANDERS – VETERANS — 1:30 p.m. Sen. Bernie Sanders, chairman of the Senate Committee on Veterans' Affairs, will hold a telephone conference call with reporters to discuss the "most comprehensive" veterans legislation in recent years. The measure would restore military pensions and address other long-standing concerns of the veterans' community. Notes: CALL-IN NUMBER: (202) 228-0808 or (855) 428-0808. CONFERENCE ID: 9811238. Please RSVP at (202) 228-6492 if you plan to join.

COMMITTEE MEETINGS

AGING – FIELD HEARING — 11 a.m. "Medicare Advantage: Changing Networks and Effects on Consumers." Location: Legislative Office Building, 300 Capitol Avenue, Hartford, CT.

US House: REP. SCHAKOWSKY – MEDICARE CUTS — 11:30 a.m. Rep. Jan Schakowsky (D-IL) will lead a telephone press conference call with Social Security Works and the Medicare Rights Center for local and national reporters to release new research on the impact of Medicare benefit cuts. Speakers include: Dr. Ben Veghte (Vek-Tee) Social Security Works; Stacy Sanders, Medicare Rights Center. DIAL IN: (712) 432-0900 Code: 242574. Contacts: Blair FitzGibbon 202-503-6141 mobile

Other: 2014 NSA/MCSA WINTER CONFERENCE. — Jan. 20 – 25. The National Sheriffs Association and the Major County Sheriffs' Association host the 2014 NSA/MCSA Winter Conference. <http://www.sheriffs.org/content/2014-winter-conference> Highlights: MCSA Town Hall Meeting – NSA attendees are invited to attend. Location: J. W. Marriott Hotel, 1331 Pennsylvania Ave. NW. Contacts: 800-424-7827 (www.sheriffs.org) Notes: MCSA (Major County Sheriffs' Association) meetings and functions will be held on Jan. 20-22, prior to the official start of the NSA Winter Conference.

WASHINGTON AUTO SHOW — Jan. 21 – Feb. 2. Annual auto show and related events, including Public Policy Preview Days which offer registered members of the media access to industry executives, legislators, administration officials and automotive technology innovators plus a sneak peek at the latest models and technology advancements. Show opens to the public on Jan. 23. Highlights: 9 a.m. Keynote by Mark Fields, chief operating officer, Ford Motor Company. (Contact Ashley. Duncan@directimpact.com). 9:30 a.m. Toyota's first hydrogen fuel cell electric vehicle will make its East Coast debut at the Auto Show. Nihar Patel, Vice President, North American Business Strategy, Toyota Motor Sales U.S.A., will discuss the technology and market distribution for the vehicle at a press conference, where it will be on display. CONTACT: Tucker Warren; twarren@hamiltonps.com; 202-276-4163. 1:40 p.m. Remarks by Energy Secretary Ernest Moniz. Location: Walter Washington Convention Center, 801 Mt. Vernon Place NW (unless otherwise noted). Contacts: Barbara Pomerance (bp@pomeranceassociates.com), 800-697-7574. On the Net: <http://www.washingtonautoshow.com>. Notes: Media must register by Friday, Jan. 17. Online registration at: <http://www.washingtonautoshow.com/media>.

REPUBLICAN NATIONAL COMMITTEE — Jan. 22 – 24. Annual winter meeting, The theme for the week is "Building To Victory." Location: Renaissance Washington Hotel, 999 9th St. NW. Notes: RSVP to Jillian Rogers at jrogers@mchq.org or 954-829-5988

SAE 2014 GOVERNMENT/INDUSTRY MEETING — Jan. 22 – 24. 2014 Theme: "Continuing Collaboration for the Protection of Road Users and the Environment." <http://www.sae.org/events/gim/> Location: Walter Washington Convention Center, 801 Mt. Vernon Place, NW. Contacts: n/a, 202-463-7318

U.S. CONFERENCE OF MAYORS — Jan. 22 – 24. The 82nd Winter Meeting. More than 280 of the nation's mayors will convene to meet with congressional leaders and administration officials and to urge Congress "to continue to work in a bipartisan fashion to spur job creation and economic growth in America's cities and metropolitan areas." <http://www.usmayors.org/> Highlights: 11:45 a.m. Opening press conference, 2nd Floor Foyer outside the Presidential Ballroom. 12:30 p.m. U.S. Secretary of Commerce Penny Pritzker will deliver keynote remarks at the opening plenary luncheon. Media must RSVP to the Office of Public Affairs at publicaffairs@doc.gov. 3:30 p.m. Gangs – Assistant Attorney General for the Office of Justice Programs Karol V. Mason will participate in a panel discussion on gangs in mid-size American cities at the Mayors and Police Chiefs Task Force meeting during the U.S. Conference of Mayors 82nd Winter Meeting. NOTE: Press inquiries regarding logistics should be directed to Elena Temple-Webb at 202-861-6719 or etemple@usmayors.org. 3:30 p.m. Education Secretary Arne Duncan participates in a working meeting of the Education Reform Task Force, discussing a cradle-to-career education agenda, including increasing access to high-quality early learning

opportunities and ensuring that all students have access to, and complete, postsecondary pathways. Location: Capitol Hilton, 16th and K Streets NW. Contacts: Elena Temple, etemple@usmayors.org, 202-286-1100. Karen Hinton, Karen@hintoncommunications.com, 703-798-3109. Lina Garcia, Igarcia@usmayors.org, 202-341-6113

FAMILY RESEARCH COUNCIL – PROLIFECON — 8:30 a.m. Family Research Council (FRC) will host its 9th annual ProLifeCon on the day of the 41st March for Life, marking the 41st anniversary of the U.S. Supreme Court's Roe v. Wade decision that legalized abortion nationwide. Confirmed speakers include: U.S. Rep. Vicky Hartzler (R-Mo.); U.S. Rep. Andy Harris (R-Md.); Tony Perkins, President, Family Research Council; Sen. Rick Santorum, Founder, Patriot Voices. <http://frc.org/prolifecon>. Location: Family Research Council Media Center, 801 G Street, NW. Contacts: J.P. Duffy, 866-372-6397

AAAS – CBRN HAZARDS — Jan. 22 – 23. 9 a.m. The use of science and technology to prevent or respond to chemical, biological, radiological or nuclear (CBRN) disasters will be the focus of a workshop at the American Association for the Advancement of Science. The workshop will provide U.S. and South Korean perspectives on CBRN disasters and is co-hosted by the AAAS Center for Science, Technology, and Security Policy and the Asan Institute for Policy Studies, an independent think tank in South Korea. Location: AAAS Auditorium, 12th and H Sts. NW. Contacts: Earl Lane, elane@aaas.org, 202-326-6431. Notes: RSVP is available at: http://www.aaas.org/page/cstsp_event_asan.

NIHS – MINICARS – CRASH TEST RESULTS — The Insurance Institute for Highway Safety will release crash test results for 11 minicars. This will be the first time minicars have undergone a more challenging small overlap front crash test implemented by the Institute in 2012. Contacts: Russ Rader (703) 247-1530

AFA AIR FORCE BREAKFAST – JAMES — 7:30 a.m. – 9 a.m. AFA Air Force Breakfast Program with Deborah Lee James, Secretary of the Air Force. <http://www.afa.org/AFA/EVENTS/AFAAFBreakfastProgram>. Location: Sheraton Pentagon City Hotel, 900 South Orme Street, Arlington, Virginia 22204. Contacts: Mary Ellen Dobrowolski Mdobrowolski@afa.org

STEM FORUM — 9 a.m. U.S. News & World Report and Pharmaceutical Research and Manufacturers of America (PhRMA) will jointly present "STEM Saves Lives," a half-day forum about building a 21st century workforce educated in science, technology, engineering and math (STEM) to maintain global competitiveness in biomedical research and deliver medical advances to patients. Keynote remarks by Dr. Mae Jemison, former NASA astronaut and national advocate for Bayer's Making Science Make Sense program. Location: National Press Club Ballroom, 529 14th Street NW. Notes: For more information, please visit <http://www.phrma.org/stem-saves-lives>. To register, please email phrma@usnewsstemsolutions.com.

DOJ REPORT – PRISON SEXUAL ASSAULT — 10 a.m. Department of Justice To Release Reports On Sexual Victimization Reported By Adult Correctional Authorities, 2009-11, And Survey Of Sexual Violence In Adult Correctional Facilities, 2009-11 – Statistical Tables. EMBARGOED until 10:00 A.M. EST, THURSDAY, JANUARY 23, 2014. To access the embargoed news release and the full report now available on the BJS website, send an email to bjspress@usdoj.gov. You must type PREA in the subject line to receive a user ID and password. Following publication the report and press release can be found at <http://www.bjs.gov/>. Contacts: Kara McCarthy (202) 307-1241

NATIONAL ACADEMY OF SCIENCE – MAZUR — 11 a.m. Assistant Secretary for Tax Policy Mark Mazur delivers remarks at a Meeting of the National Academy of Sciences, "Determinants of Market Adoption of Advanced Energy Efficiency and Clean Energy Technologies." Media must RSVP to Aquila Coulthurst at acoulthurst@nas.edu. For additional information, please visit <http://www8.nationalacademies.org/cp/meetingview.aspx?MeetingId=6955>. Location: Keck Center, 500 5th Street, NW.

TAR SANDS PIPELINE — 11 a.m. Landowners along the route of TransCanada's Gulf Coast tar sands pipeline (aka the Keystone XL Southern Segment) will host a press call to discuss the start-up of the pipeline, their "disappointment" in the President's decision to fast-track the construction and their ongoing efforts to monitor the line for spills and defects. Hosted by Bold Nebraska and Public Citizen. With Julia Trigg Crawford, Texas landowner along pipeline route; Kathy DaSilva, Texas advocate; Jane Kleeb, Bold Nebraska Executive Director; Anthony Swift, Natural Resources Defense Council International Program Attorney; Tom Smith, Texas Public Citizen Director. Contacts: Nancy Nusser, 410-934-9588. Notes: Dial: 866-952-1908, Passcode: PIPELINE

HIGHWAY SAFETY REPORT CARD — 1 p.m. Advocates for Highway and Auto Safety releases its 11th annual report card grading all 50 states and the District of Columbia on their performance in adopting 15 basic highway safety laws on adult and child-occupant protection, impaired and distracted driving, and teen driving. Location: National Press Club, Zenger Room, 529 14th St. NW. Contacts: Beth Weaver (beth_weaver@verizon.net), 301-814-4088. Notes: NEW TIME – Live webcast of the news conference at <http://www.visualwebcaster.com/highwaysafetylaws>

MARCH FOR LIFE RALLY — 12 p.m. – 1 p.m. Marking the 41st anniversary of the Supreme Court's Roe v. Wade decision legalizing abortion. Speakers include House Majority Leader Eric Cantor (R-VA). <http://marchforlife.org/march-with-us/details>. Location: National Mall.

NASA – EARTH SCIENCE 2014 PREVIEW — 12:30 p.m. NASA will host a media teleconference to outline the agency's Earth science activities planned for 2014, which include five mission launches. Speakers: Michael Freilich, director, Earth Science Division, NASA Headquarters, Washington; Julie Robinson, International Space Station chief scientist, NASA's Johnson Space Center, Houston. <http://www.nasa.gov/press/2014/january/media-briefing-to-preview-big-year-ahead-for-nasa-earth-science/>

HIGHWAY SAFETY REPORT CARD — 1 p.m. Advocates for Highway and Auto Safety releases its 11th annual report card grading all 50 states and the District of Columbia on their performance in adopting 15 basic highway safety laws on adult and child-occupant protection, impaired and distracted driving, and teen driving. Location: National Press Club, Zenger Room, 529 14th St. NW. Contacts: Beth Weaver (beth_weaver@verizon.net), 301-814-4088. Notes: NEW TIME – Live webcast of the news conference at <http://www.visualwebcaster.com/highwaysafetylaws>

NHTSA – CHILD PASSENGER SAFETY — 1 p.m. National Highway Traffic Safety Administration (NHTSA) Acting Administrator David Friedman will make "an important announcement" concerning child passenger safety during his address at the SAE Government/Industry Meeting. Location: Walter E. Washington Convention Center, Room 150 AB. Contacts: Nathan Naylor, Public.Affairs@dot.gov, 202-366-9550. Notes: Press conference call for media unable to attend event at 4:30 p.m. — to receive call-in information for the media-only conference call, please RSVP to NHTSA Public Affairs at public.affairs@dot.gov.

DR. JILL BIDEN – CAREGIVERS — 1 p.m. – 2:30 p.m. The Center for American Progress hosts Dr. Jill Biden for a discussion on the Challenges Facing Caregivers and the Policy Solutions. Speakers: Neera Tanden, President, Center for American Progress Opening remarks: Dr. Jill Biden, Second Lady of the United States. Then: Dr. Barbara Bedney, The Jewish Federations of North America; Henry Claypool, American Association of People with Disabilities; Faith Culbreath, Service Employees International Union, or SEIU. Dr. Henry Pacheco, National Hispanic Council on Aging, or NHCOA. Moderator: Jocelyn Frye, Senior Fellow, Center for American Progress. Contact: Madeline Meth at mmeth@americanprogress.org or 202.741.6277. Location: Center for American Progress, 1333 H St. NW, 10th Floor. On the Net: <http://www.americanprogress.org/>

CSIS – DEVELOPMENT — 1:30 p.m. – 2:30 p.m. Chevron Forum on Development: "Bilateral Donor Engagement in the Shifting Development Landscape." Featuring Jennifer Adams, Director, Office of Donor Engagement, Bureau for Policy, Planning and Learning, USAID; Keiichiro Nakazawa, Chief Representative, JICA U.S.A. Office; Andrew Preston, Development Counsellor, Foreign Policy and Security Group, British Embassy. Location: Center for Strategic and International Studies, 1616 Rhode Island Avenue, NW. Contacts: Christina Perkins, 202-775-3236

TRUMAN NATIONAL SECURITY PROJECT – TURKEY — 2:30 p.m. – 4:30 p.m. Rumi Forum and Truman National Security Project Present "Turkey 2014: Challenges and Prospects Ahead." Panel with Ihsan Dagi, Joshua Walker and Alp Aslandogan. Moderated by Caitlin Howarth. https://docs.google.com/forms/d/1JzrS7KikFC1qsZOazlb662A7C7oBhdaagjQ_nxEjYmU/viewform. Location: Truman National Security Project, 1250, Street NW, Suite 500.

Last Laughs:

LATE NIGHT POLITICAL HUMOR.

David Letterman: [Referring to international criticism of anti-gay laws in Russia] "Because of the controversy, Vladimir Putin says that gay athletes will not be targeted during the Olympics. Whoa, thanks a lot, Vlad. I think we can take your word for it!"

David Letterman: "You know what happened today? Governor Chris Christie re-inaugurated. ... He won reelection and it was a beautiful ceremony. They had that phony sign-language guy there. And the Governor was sworn in. They put his right hand on a menu. Immediately following the ceremony, he closed the Holland Tunnel."

David Letterman: "A couple of months ago, he decided it would be good if his staff closed down the George Washington Bridge and didn't tell him they closed it down. They prank him a lot like that. But anyway, he says the scandal – this is a quote now from Governor Christie – he says the scandal has made him 'readier to be president.' Has made him readier. R-e-a-d-i-e-r. Has made him readier. That's one of those made-up words like, McRib."

Jimmy Fallon: "There is a new interview where Chris Christie said he was shocked by the bridge-gate scandal and it felt like getting hit in the head with a two-by-four. Of course, in New Jersey that is how people say hello."

Jimmy Fallon: "The scandals keep coming for the governor. Now, Olympic gold medalist Carl Lewis is claiming Chris Christie pressured him to back out of the Senate race in 2011, because he was up against one of Chris Christie's allies. That makes sense. If there is one thing he's good at, talking someone out of running."

Jay Leno: "Hey, some terrific football over this past weekend. Wasn't it? Congratulations to the Seattle Seahawks and Denver Broncos going to the Super Bowl. Very good. You know it's interesting. Both teams come from states with legalized marijuana. Well, this has caused a problem for President Obama. He doesn't know who to root for."

Jay Leno: "And President Obama getting serious about this NSA spying scandal. He told the nation that the NSA will not be used for the purposes of suppressing or burdening criticism or dissent. That's what the IRS is for. That's why we have those people. That's their job."

Jay Leno: "And we are so lucky to live here in California. Huge snowstorm back east. Actually, Governor Chris Christie very happy about this weather. Sure, he's got something else to blame road closures on. 'See, it's not my fault.'"

Jay Leno: "Well, today was Christie's inauguration. During his inaugural address, he said, 'We will make it our priority that every child in New Jersey gets a good education.' He wants to make sure a TV show like 'Jersey Shore' can never happen again."

Conan O'Brien: "Republican Party now worried, worried about Chris Christie's viability as a candidate. ... Donald Trump said that Chris Christie is quote, 'One email away from disaster.' Bill Clinton said, 'Aren't we all?'"

Conan O'Brien: "Carl Lewis said Chris Christie canceled a position for him after Lewis said something that Christie didn't like. ... When asked what he did that Christie didn't like, he said, 'A sit-up.'"

Conan O'Brien: "In Washington, D.C., the Federal government has had to shut down due to snow. ... It's being called the biggest shutdown since the Tea Party."

Gunnison Sage Grouse (GUSG) and Elevation

Dan Ashe <d_m_ashe@fws.gov>

Wed, Jan 22, 2014 at 11:52 AM

To: Sally Jewell (b)(6)@ios.doi.gov>

Cc: Laura Davis <Laura_Davis@ios.doi.gov>, Nikki Buffa <nicole_buffa@ios.doi.gov>, Michael Bean <michael_bean@ios.doi.gov>, David Jayo <david_jayo@ios.doi.gov>

Sally, you asked about this question, which I believe Kip Tindell had raised to you. Here's what our folks have explained to me.

First, we do recognize that sage grouse, including GUSG, can and do live at elevations up to and even above 10,500', where habitat exists to support them. Here's an excerpt:

science indicates the species' distribution is influenced primarily by the distribution of sagebrush and other suitable habitats (including mountain shrub communities). Where those habitat types are present in sufficient quantity and configuration, the species' may occur. Big sagebrush (mountain) can occur up to 10,500' or more, with appropriate soils, moisture, aspect, etc. Likewise, mountain shrub communities (generally serviceberry, mountain mahogany) can occur up to about 10,000'. That said, the upper limit of the current known occupied range of GUSG is about 9,500' in the Gunnison Basin population area, and we've cited this figure in our past rules for GUSG.

We have identified critical habitat that is currently "unoccupied" including unoccupied habitat that is above 9,500 feet elevation. Here is an excerpt explaining that:

Our critical habitat proposal and mapping criteria are based on occupied, unoccupied, and potential habitats. We included suitable unoccupied habitats in close proximity to occupied areas, to facilitate migration/ movement of birds and future migration or expansion of range (think climate change). However, all mapped critical habitat occurs within the species' potential historic range (based on sagebrush distribution, historical records, and museum specimens) (Schroeder *et al.* 2004). Thus, areas above the current occupied range of 9,500 feet in the Gunnison Basin were included in the proposed designation where habitat is suitable and in close proximity to currently occupied range.

Hope this helps. Thanks for sharing a great day up in Craig, CO. Good luck in UT and NM!

Dan.

Subject: GUSG elevational limit and CH

Dan,

You asked about proposed CH about 9500 feet. The answer is we did propose some above 9500 feet and the explanation is below. Please let us know if you want to discuss it or need additional information.

Subject: Fwd: GUSG elevational limit

Noreen, Here is an explanation of the GuSG issue. I was pretty sure we didn't say they couldn't exist in suitable habitat above a certain elevation but that the current range does not show presence at this time. Let me know if you need more.

Cc: Patty Gelatt <Patty_Gelatt@fws.gov>, Charles Sharp <charles_sharp@fws.gov>

Mike,

We are not aware that we've ever identified an elevational limit to GUSG distribution/ survival, either verbally or in writing. Rather, the science indicates the species' distribution is influenced primarily by the distribution of sagebrush and other suitable habitats (including mountain shrub communities). Where those habitat types are present in sufficient quantity and configuration, the species' may occur. Big sagebrush (mountain) can occur up to 10,500' or more, with appropriate soils, moisture, aspect, etc. Likewise, mountain shrub communities (generally serviceberry, mountain mahogany) can occur up to about 10,000'. That said, the upper limit of the current known occupied range of GUSG is about 9,500' in the Gunnison Basin population area, and we've cited this figure in our past rules for GUSG.

Our critical habitat proposal and mapping criteria are based on occupied, unoccupied, and potential habitats as defined in the Rangewide Conservation Plan (RCP). We included suitable unoccupied habitats in close proximity to occupied areas, to facilitate migration/ movement of birds and future migration or expansion of range (think climate change). However, all mapped critical habitat occurs within the species' potential historic range (based on sagebrush distribution, historical records, and museum specimens) (Schroeder *et al.* 2004). Thus, areas above the current occupied range of 9,500 feet in the Gunnison Basin were included in the proposed designation where habitat is suitable and in close proximity to currently occupied range.

Let me know if there are any further questions.

Susan

Copying three articles. The article from the Grand Junction Daily Sentinel reporter who attended the tour. In addition, they printed another story (with the headline) based on a subsequent conversation with the Craig Daily Press reporter who was asked to leave. The Craig Daily Press article (that we discussed) also below.

Federal delegation sees sage-grouse issue from view of regulatory critics

By Dennis Webb

Wednesday, January 22, 2014

CRAIG — Peering across the heart of greater sage-grouse country Tuesday, Interior Secretary Sally Jewell and the heads of the U.S. Fish and Wildlife Service and Bureau of Land Management praised the joint conversation that's taking place in an effort to protect the bird and manage its habitat.

"The fact that everybody is around the table is really impressive," Jewell said.

For everyone from Moffat County Commissioner Tom Mathers to Gov. John Hickenlooper, what was impressive was that Jewell, Fish and Wildlife director Dan Ashe and Neil Kornze, principal deputy director of the BLM, all came to this remote part of northwestern Colorado to join in the discussion.

"To have all the top brass here at one time, it was amazing," Mathers said.

"We had everybody right here ... everybody that mattered," Hickenlooper said. "And they listened, is the most important thing."

As an agency in her department considers whether to list the greater sage-grouse as an endangered species, U.S. Interior Secretary Sally Jewell, right, looked at the bird's habitat northwest of Craig on Tuesday with Ray Owens, manager of a ranch where measures have been undertaken for sage-grouse conservation. Photo by Noelle Levitt Riley/Craig Daily Press

The federal trio came to see firsthand voluntary sage-grouse conservation measures being undertaken at the Bord Gulch Ranch, far up Moffat County Road 7 northwest of town. Their visit comes as the Fish and Wildlife Service faces a 2015 decision on whether to list the greater sage-grouse for protection under the Endangered Species Act, and as the BLM weighs land-management measures it hopes will help persuade its fellow Interior Department agency that such a listing isn't warranted.

Both the prospect of a listing and the measures being considered by the BLM have caused consternation among several northwest Colorado counties, and among oil and gas, agricultural, recreation and other interests.

Their concern ultimately came to be shared by Hickenlooper himself, and last week he sent the BLM a letter urging it to take an adaptive management approach that protects the greater sage-grouse while safeguarding energy, agriculture and other economic engines of the region. He also pointed to the benefits of public/private partnerships, and on Tuesday Jewell, Ashe and Kornze were able to witness the results of one such partnership.

They stopped at the Bord Gulch Ranch to view sage-grouse conservation measures undertaken under the leadership of ranch manager Ray Owens. He's one of two 2013 recipients of Colorado Parks and Wildlife's Wildlife Landowner of the Year honor, and the ranch, owned by the Gilliland family, has been working in cooperation with agencies such as Parks and Wildlife and the Fish and Wildlife Service.

Owens described fencing, watering, sagebrush treatment and other measures that benefit not just the birds but other wildlife. He said he doesn't just manage for a single species.

"You have to manage it for everything," said Owens.

He went on to detail efforts such as maintaining a variety of ages of sagebrush to avoid ending up with big, old stands susceptible to wildfire, and also maintaining fields without sagebrush because they provide places for elk to feed.

Owens spoke Tuesday from a hilltop in a seeming sagebrush ocean with waves extending to Wyoming and Utah.

"People are changing. The neighbors are seeing the benefit of what we're doing," he said.

He believes approaches such as the one the Bord Gulch Ranch is involved in make more sense than the government handing down rules.

"Just like your kid — you start giving them rules and they rebel," he said.

Hickenlooper's role

Rebellion isn't an entirely foreign concept in Moffat County. Upset over some state-level actions, commissioners there asked voters in November whether they wanted to pursue secession from the state, although the measure failed.

Still, a number of residents and elected officials in the county have considered Hickenlooper part of the problem, thanks in part to his support for things such as stricter gun laws and higher renewable-energy standards for rural electricity. But the governor's recent actions on greater sage-grouse, which included appointing John Swartout as a point person on the issue and ultimately formulating the position presented to the BLM last week, have drawn the notice of Mathers.

"I am so impressed with our governor right now," said Mathers.

Jewell also had praise for the role Hickenlooper has been playing on sage-grouse.

"Governor Hickenlooper has been a real leader in this process," she said.

For his part, Hickenlooper said he hadn't expected Jewell to come to Craig, and it was a generous move on her part. He said he also respects her private-sector roots.

"She understands how the real world works," said Hickenlooper, who said it appears she'll lead a team that wants to consider local concerns.

Jewell has been on the job less than a year, having replaced Coloradan Ken Salazar. She said she's learning every day and that it's important to listen closely to people such as Owens.

"We don't pretend to have all the answers," she said.

At the same time, Ashe emphasized the Fish and Wildlife Service is obligated to make a decision based on the

science about the potential listing of the sage-grouse.

"We're making a diagnosis. It's either threatened or endangered, or it's not," he said.

But he said if the bird ends up being listed, there's a lot of flexibility to recognize efforts being undertaken by individual properties, counties and states, and determine in some circumstances that further efforts aren't needed.

Meanwhile, the BLM has its own sage-grouse conservation plan decisions to make both in Colorado and other states. Fish and Wildlife has submitted comments saying the BLM's Colorado proposal doesn't go far enough, even as it has heard lots of other concerns that the proposal is too restrictive.

Komze, who is President Obama's nominee to be the BLM's director and is leading the agency in the interim, said the BLM is working on 15 plans across the West.

"It's a large balancing act. ... It's both local and it's West-wide at the same time," he said.

Energy officials

Jim Cagney, who heads the BLM in Northwest Colorado, said the important thing will be to look at the details of the comments that have been submitted in trying to find a workable approach.

Ashe said he's never seen an effort like the one occurring regarding the greater sage-grouse.

"We have everybody sitting around the same table, working together. ... People are working in good faith with one another," he said.

Jewell, who noted that she had sat down in Denver earlier Tuesday with the oil and gas industry and others to talk about how to reduce methane emissions related to drilling and production, said she thinks the sage-grouse conversation can serve as a model for how to deal with other issues, including the methane concern.

"What's happening here around sage-grouse is an extraordinary effort," she said.

U.S. Rep. Scott Tipton, R-Colo., urged Jewell to work with local officials who already are working to conserve the greater and Gunnison sage-grouse.

"Secretary Jewell's visit to Craig today is welcome, and I am hopeful that she will truly take into consideration all of the work being done in Colorado to preserve the sage grouse, and will work with state and local conservation efforts by providing long-awaited measurable expectations for species recovery so that we can ensure those goals are being met at the local level," Tipton said.

Tipton was in Durango when Jewell visited Craig on Tuesday. He already had other commitments when Jewell's schedule was announced, Tipton's staff said.

Listing the grouse as endangered would "put private lands off-limits to most use and development, including agriculture production and grazing, without providing any compensation," Tipton said. "These listings would kill jobs, devastate communities, and disrupt effective species preservation efforts currently underway. They won't, however, more effectively preserve the grouse."

Interior Secretary Jewell visits Moffat County to discuss sage grouse

Story by Erin Fenner

Originally published January 21, 2014 at 09:23p.m., updated January 21, 2014 at 10:04p.m.

Photo by Erin Fenner

Gov. John Hickenlooper, right, joins U.S. Interior Secretary Sally Jewell on a tour of Bord Gulch Ranch in Moffat County. The ranch is owned by Ray Owens, who highlighted efforts he's made to help sage grouse, mule deer and elk populations thrive in Northwest Colorado. Moffat County Commissioner Tom Mathers, left, talks about sage grouse in the region.

Craig — What might ease the tensions between sage grouse conservationists, private landowners and businesses is a concept needed in politics: collaboration.

U.S. Interior Secretary Sally Jewell and Colorado Gov. John Hickenlooper stopped in Moffat County on Tuesday to take part in such collaboration. Jewell came with the head of the U.S. Fish and Wildlife Service and the head of the Bureau of Land Management to tour the Bord Gulch Ranch, owned by Ray Owens. His ranch, nestled in the northwest corner of Colorado, is an example of how a private landowner can further a conservationist goal, Jewell said.

"Ray Owens is a model of the 21st-century Western rancher with his outstanding stewardship of this working landscape," Jewell said in a press release. "He represents the spirit of partnership that can be replicated across the West as we develop landscape-level strategies to lessen the threats to the sage grouse and conserve its habitat."

The governor also celebrated Owens' efforts in taking a completely new approach to conservation.

"I think we are creating a new model of how to preserve species," Hickenlooper said. "We're modeling for all the other ranchers and farmers in the West. There are solutions. This isn't hopeless."

The Bureau of Land Management is in the process of evaluating sage grouse habitat in Colorado and 10 other states. They need to present their recommendation to the U.S. Fish and Wildlife Service — the federal agency evaluating the bird for the endangered species list — by September. The

pressure is on federal departments to decide how much protection the birds need, how to regulate that protection and how to do so while not threatening the economy of areas near sage grouse habitats.

Moffat County is one of those areas. Seventy-five percent of the county is made up of land that would be affected by a sage grouse endangered species listing.

But while listing the bird as endangered is a possibility, the population is stable enough to likely avoid that list, Fish and Wildlife Service Director Dan Ashe said.

"Endangered is always a possibility," Ashe said. "The greater sage grouse is still in relatively good shape, so

it would seem like an endangered determination absent some major catastrophe is probably not where we would head."

But the birds still can be listed as a threatened species, which could come with regulations that affect private landowners and businesses.

Jewell reassured the attendees of the tour that the BLM and Fish and Wildlife Service were in Colorado to get input from farmers and ranchers.

"People really respect and want to learn from the people who work the land," Jewell said.

Hickenlooper praised the tour as an opportunity for high-level officials to meet and seek a solution with ranchers, farmers and leaders who understand the economic issues of the area.

"We have everybody that matters right here on this little hilltop," Hickenlooper said. "If you noticed: They listened."

Moffat County Commissioner Tom Mathers went on the tour as an elected official and as a lifelong rancher. He was encouraged by the conversations and ideas exchanged during the tour.

"It's overwhelming to have this much power all in one setting," Mathers said. "I'm so impressed with our governor."

Mathers said he was optimistic they could work out a way to protect the sage grouse species while also protecting people's livelihoods.

"It's going to take everyone working to get them to keep the bird from getting listed," he said. "We need multi-use on all these grounds."

Following the tour, the crew of high-up officials led a meeting at the American Legion Clubhouse in Craig to talk more about sage grouse issues. More than 40 people attended, including all three Moffat County commissioners and other elected officials, but press was barred from the discussion.

"I just assumed it was a public meeting," Mathers said.

But Jewell said it was closed.

"Secretary Jewell's office decided the meeting should be closed to press to help foster an open and frank discussion," said Eric Brown, director of communications for Hickenlooper's office.

Press booted as Interior chief Jewell meets Moffat officials

By Rachel Sauer

Tuesday, January 21, 2014

A meeting about greater sage-grouse that had been touted as open to the press and public was closed to the press Tuesday afternoon, in seeming violation of Colorado's Sunshine Law.

Erin Fenner, a Craig Daily Press reporter, was told to leave a meeting with U.S. Secretary of the Interior Sally

Jewell that followed a Tuesday morning tour of Moffat County sage-grouse habitat on Bord Gulch Ranch. Fenner said she'd heard that the 3:30 p.m. meeting at the Craig American Legion was going to be closed, "but (Tuesday) morning all three county commissioners said (the meeting) was going to be open and the press should come," Fenner said.

A man who didn't identify himself, but whom Fenner said she thought works in the Secretary of the Interior's office and was acting on Jewell's behalf, escorted her from the room and told her she couldn't be there because she was with the press, Fenner recalled.

After Fenner returned to the newspaper office, managing editor Noelle Leavitt Riley called Moffat County Commissioner John Kinkaid on his cell phone and he told her, "Send her back to the meeting," Leavitt Riley said, Kinkaid referring to the reporter Fenner.

Fenner returned to the meeting, she said, and was told to leave once again by the same man. She said she brought up Colorado's Sunshine Law "and he said that we weren't going to argue about it any more and said I had to get out," Fenner said.

She said all three Moffat County commissioners were at the meeting, which she said appeared to be a standard question-and-answer session.

According to the state Open Meetings Law — a part of Colorado's Sunshine statutes — "all meetings of a quorum of three or more members, whichever is fewer, at which public business is discussed or formal action might be taken are open."

Leavitt Riley said she then went to the American Legion building and the doors were locked, so she pounded on the window until someone let her in, "but by that time the meeting had adjourned," she said. "So, I go over to (Moffat County Commissioner) Tom Mathers and said, 'Did you know Erin was kicked out of this meeting?' And he said, 'No, this was an open meeting.'"

As she was leaving, Leavitt Riley said she saw Jewell in a car in the parking lot and the driver-side door was open, so she approached Jewell "and she said the press was not allowed at this meeting," Leavitt Riley recalled.

"I said, do you realize more than a dozen elected officials were in it? She said the tour was open to the press but this was a closed meeting" and then drove away, Leavitt Riley said.

She said the newspaper is pursuing the matter with the Colorado Press Association. No one with the U.S. Secretary of the Interior's office was available for comment Tuesday night.

Well, here's the verdict from my old high school football buddy out in Gunnison County.

Well you had a great meeting in Moffat County looks like. Here is the headline in grand junction!!! I liked your response about using science and "best practices" in the diagnosis of the listing. Thought you might like this!!!

DOI in the News:**SECRETARY JEWELL PITCHES 21ST CENTURY CONSERVATION SERVICE CORPS AT OUTDOOR RETAILER WINTER MARKET.**

The [AP](#) (1/22) reports that Interior Secretary Sally Jewell "made a pitch Wednesday for a privately funded youth conservation corps and sought donations for the effort from executives" at the Outdoor Retailer Winter Market. Jewell said "budget paralysis in Washington has forced her to seek help from the private sector." Jewell said, "We're not waiting for Congress to act. We want to get started this spring."

The [Salt Lake \(UT\) Tribune](#) (1/23, 343K) reports that Jewell reflected on President Franklin Roosevelt's Civilian Conservation Corps Wednesday as "she delivered the keynote to the Outdoor Industry Association's Industry Breakfast before the start of the annual Outdoor Retailer Winter Market trade show at the Salt Palace in downtown Salt Lake City." Jewell's "goal is to raise \$20 million in private funds and to recruit 1 million volunteers in the next four years to help do maintenance on public recreation facilities and complete conservation projects across the country while giving youths and veterans meaningful work." At a news conference after the breakfast,

Jewell said, "The difference between the old CCC and the 21st Century CCC is the original was 100 percent paid for by the US government. We are in a different era where the federal government is not going to write a big check for this to happen. So we are calling on the private sector to be a partner with us, not just in providing financial resources, but engaging companies with us as volunteers. There is nothing better than working with your team in the great outdoors."

The [Deseret \(UT\) News](#) (1/23, 274K) reports that "at a press conference afterward, Jewell weighed in on a variety of Utah-related topics, noting that the use of the Antiquities Act to designate new national parks or monuments should be used sparingly; rules regarding methane emissions from oil and gas industry activity need to be updated to help improve air quality in places like the Uinta Basin; and political movements to wrest control of public lands contravene the idea they belong to everyone." Jewell "added that the value of those public lands was no more apparent in Utah than when the federal government shutdown forced the closure of its national parks, leading to 'frantic calls' to Utah Gov. Gary Herbert." Jewell said, "It is clear the citizens of Utah and its communities get tremendous benefit from public lands."

The [Bicycle Retailer](#) (1/22) reports that "sprinkling her 30-minute speech with quick quips delivered with a smile, Jewell returned again and again to the need for youth to get outside." Jewell said, "Children need time to play and it's best to play outside in an unstructured environment."

AP coverage was also picked up by the [Washington Times](#) (1/23, Foy, 417K), the [Washington Examiner](#) (1/23, 319K), [Yahoo!](#) (1/23, Foy, 17.91M), [Yahoo! News Canada](#) (1/23, 76K), the [Quincy \(IL\) Herald-Whig](#) (1/23, 82K), the [Billings \(MT\) Gazette](#) (1/23, 206K), the [Cache Valley \(UT\) Daily](#) (1/23, 639), the [Columbus \(IN\) Republic](#) (1/23, 80K), and [KOB-TV](#) Albuquerque, NM (1/23, 59K).

Also reporting on the story are [Politico](#) (1/23, Guillen, 464K), the [Spokane \(WA\) Spokesman-Review](#) (1/22, 214K), the [Yellowstone \(WY\) Gate](#) (1/23), the [Bicycle Retailer](#) (1/22), [KSTU-TV](#) Salt Lake City (1/22, 42K), [KTVX-TV](#) Salt Lake City (1/23, 15K), and [KSL-TV](#) Salt Lake City (1/23, 242K).

In an editorial, the [Boston Globe](#) (1/23, 1.75M) lauds Jewell for the "innovation" shown in "coping with diminished resources." According to the paper, Jewell's "success would certainly provide relief some for the young people looking for work today." But more importantly, "cultivating a new generation of American conservationists could have an even more lasting impact."

In an editorial, the [East Oregonian](#) (1/23, 24K) lauds the proposal to create "a modern incarnation of the CCC and create 100,000 new jobs for young people and military veterans on public lands."

INTERIOR OFFICIALS TOUR COLORADO RANCH TO LEARN ABOUT SAGE GROUSE EFFORTS. The [E&E Daily](#) (1/22) reports that Interior Secretary Sally Jewell, FWS Director Dan Ashe, BLM Principal Deputy Director Neil Kornze and Colorado Gov. John Hickenlooper visited the 16,000-acre Bord Gulch Ranch "to discuss what landowners can do to improve habitat for the sage grouse and other native species." According to the article, "for Hickenlooper, the tour was an opportunity to showcase public-private partnerships he argued should be considered as BLM finalizes its sage grouse conservation plans and as FWS nears its listing decision." For Jewell, the tour was "an opportunity to mend rifts with Western states as BLM tries to preserve tens of millions of acres of sagebrush habitat without stifling the grazing, oil and gas drilling, and mining that fuel many rural economies."

Meanwhile, the [Craig \(CO\) Daily Press](#) (1/22, 10K) reports that it has "looked into a possible violation of Colorado Sunshine Law following a meeting about sage grouse conservation." According to the article, Jewell "did not acknowledge whether or not she had violated the law."

Also reporting on the story are the [AP](#) (1/23, 2.88M), the [Grand Junction Daily Sentinel](#) (1/23, 73K), the [Grand Junction Daily Sentinel](#) (1/23, 73K), and the [Steamboat \(CO\) Pilot & Today](#) (1/22, 30K).

INTERIOR OFFICIALS TO VISIT NEW MEXICO. The [E&E Daily](#) (1/22) reports that Interior Secretary Sally Jewell, joined by Neil Kornze, who leads the BLM, "on Friday will visit the Organ Mountains region of southern New Mexico, a signal the Obama administration is considering designating the area as a national monument." Jewell will tour "the area and attend a public meeting hosted by New Mexico Democratic Sens. Tom Udall and

Martin Heinrich 'regarding the community's vision to preserve, protect and enhance some of the public lands located in Doña Ana County,' according to Interior."

Also reporting on the story is the [Albuquerque \(NM\) Business First](#) (1/23).

SECRETARY JEWELL ASKED TO TRANSFER MINERAL RIGHTS TO CNMI. The [Pacific News Center](#) (1/23) reports that CNMI Congressman Kilili Sablan is calling on Interior Secretary Sally Jewell to "take action on the transfer of oil, gas, and other mineral rights to the Northern Mariana Islands" now that "the transfer of submerged lands to the CNMI has begun." According to the article, "in addition to reminding Jewell of the responsibility to transfer oil, gas, and mineral rights, Sablan also asked for an accounting of any existing leases or permits that the federal government may have issued in areas now owned by the Commonwealth."

Also reporting on the story is the [Pacific News Center](#) (1/23).

WORLD HERITAGE DESIGNATION FOR SAN ANTONIO MISSIONS COULD BE PREVENTED BY POLITICS. The [San Antonio Business Journal](#) (1/23, Subscription Publication, 27K) reports that "America's decision to cancel its membership in 2011 in United Nations Educational Scientific Cultural Organizations (UNESCO) could negatively affect the Alamo and San Antonio Missions National Park's inclusion on the World Heritage Site list." According to Suzanne Dixon, Texas regional director for the National Parks Conservation Association, "the US lost its voting privileges with the UNESCO General Conference in November — two years after cutting off dues payments to the organization." Dixon said "there are no procedural hurdles in place that would prevent the Tentative List nomination of San Antonio's missions from advancing," but "it's clear the US has lost some leverage."

ADDITIONAL COMMENTARY ON PILT FUNDS. Additional commentary on the PILT funds was provided by Thomas Mitchell in his column for the [Elko \(NV\) Daily Free Press](#) (1/23, Mitchell, 22K).

America's Great Outdoors:

National Park Service:

DRAKES BAY OYSTER CO. TO ASK SUPREME COURT CASE TO REVIEW CASE. The [E&E Daily](#) (1/22) reports that the Drakes Bay Oyster Co. "indicated this week that it will ask the Supreme Court to take up its ongoing fight with the Interior Department to keep its doors open." The farm has "asked the 9th Circuit to delay the enforcement of that ruling while it petitions the Supreme Court to take up the case." According to the article, "in court documents that are likely similar to those the company will submit to the Supreme Court, the company claims there is a good chance the highest court will want to review the lawsuit."

Additional coverage was provided by the [San Jose \(CA\) Mercury News](#) (1/23, 731K).

NPS OBJECTS TO PALISADES TOWER. The [New York Times](#) (1/23, Pogrebin, Subscription Publication, 9.61M) reports that "two months after work began on LG Electronics USA's new headquarters in Englewood Cliffs, N.J., new opponents have jumped in the battle to scale back the project, which they see as a blight on the Hudson River landscape." According to the article, "the environmental activist Robert F. Kennedy Jr., the Natural Resources Defense Council and a New Jersey conservation group said they planned to join a legal challenge on Thursday," and the NPS has "registered its objections to the project's scope." The article notes that "the Defense Council — for which Mr. Kennedy is senior lawyer — together with the New Jersey Conservation Foundation planned to file a motion on Thursday to join a lawsuit challenging the company's plan to build a tower on the Palisades cliffs north of the George Washington Bridge."

APOSTLE ISLANDS SEA CAVES A WALK AWAY. The [AP](#) (1/23) reports that "for the first time in five years, you can visit the Apostle Islands sea caves by walking across frozen Lake Superior." Apostle Islands National Lakeshore superintendent Bob Krumanaker said "the experience of walking on a frozen Great Lake is remarkable, both physically and psychologically." According to the NPS, "with the current conditions," the caves are a "fairyland of needle-like icicles."

NPS DEVELOPING PLAN TO PROTECT MIGRATING WILDLIFE. [The Missoulian](#) (1/23, 104K) reports that the NPS and "the country's leading wildlife experts are developing a plan to conserve migrating wildlife as it moves through protected areas, sometimes crossing vast regions of the globe to reach birthing and feeding grounds." According to the article, "unveiled in a paper published last week in *Conservation Biology*, the plan details the need for more collaboration between the NPS, local governments and public landowners." Joel Berger, a professor at the University of Montana and the new paper's leading author, said, "Our national parks attract as many people as professional football, baseball and basketball games combined. Putting this on the public's radar is a good place to start, so 20 years from now we're still looking at these species."

ENVIRONMENTALISTS WELCOME \$130 MILLION INVESTMENT FOR EVERGLADES. The [Sunshine State \(FL\) News](#) (1/23, 3K) reports that "Gov. Rick Scott's announcement during Wednesday morning's Cabinet meeting that Florida will invest \$130 million to continue work on restoring the Everglades and South Florida's ecosystem won cheers from state environmental leaders." The article notes that "less than a year after Scott announced an \$880 million long-term Everglades restoration plan, the \$130 million investment for the Everglades and South Florida's ecosystem include \$40 million to speed up completion of the C-44 Stormwater Treatment Area for Martin and St. Lucie counties." In addition, the "\$130 million investment includes \$30 million for a three-year installment for the Tamiami Trail project, which will provide necessary water to Everglades National Park, \$32 million in recurring funding as part of the Governor's Everglades Water Quality Restoration Plan and funds to complete the Kissimmee River restoration project, which will store and clean water heading into Lake Okeechobee."

IRVING PRESENTS CIVIL RIGHTS LEGACY AWARD TO NPS. The [Dallas Morning News](#) (1/23, 1.13M) reports that in honor of Dr. Martin Luther King Jr., the city of Irving presented its Civil Rights Legacy Award to the NPS.

Bureau of Land Management:

ENVIRONMENTAL GROUPS SUE TO BLOCK BLM "ECOLOGICAL FORESTRY" PROJECT. The [E&E Daily](#) (1/22) reports that "two environmental groups have filed a federal lawsuit to block" a BLM plan "to harvest timber in western Oregon, a move that further hobbles the agency's plan to implement 'ecological forestry' projects." The groups, Oregon Wild and Cascadia Wildlands, "argued BLM took shortcuts in its environmental review of the 187-acre project." According to the article, "it's the latest bid by environmental groups to stall the agency's efforts to allow some patches of clearcuts in western Oregon as a way to increase timber harvests while mimicking natural disturbances like fire."

Additional coverage of by the [AP](#) (1/23, Barnard) was picked up by the [Columbus \(IN\) Republic](#) (1/23, 80K), the [Washington Times](#) (1/23, Barnard, 417K), [KATU-TV](#) Portland, OR (1/23, 105K), and [KVAL-TV](#) Eugene, OR (1/23, 31K).

BLM NETS \$38 MILLION IN SALE FROM FEDERAL HELIUM RESERVE. The [E&E Daily](#) (1/22) reports that the BLM "announced this week it netted \$38 million in a sale from the federal helium reserve, the latest in an ongoing effort to eventually draw down the reserve and compel the private sector to secure its own helium supply." In all, "eight companies purchased a total of 400 million cubic feet of crude helium from the reserve near Amarillo, Texas, at a price of \$95 per thousand cubic feet." Neil Kornze, BLM's principal deputy director, said in a statement, "We're pleased with the results of this helium sale. It's critical that we get a fair return on this national resource that is so important for health care innovation and technology development."

BLM IN COLORADO GETS NEW ACTING DIRECTOR. The [Denver Business Journal](#) (1/23, Subscription Publication, 71K) reports that Ruth Welch, currently the director of the BLM's National Operations Center in Lakewood, will become the new temporary director at the BLM's office in Colorado. Welch will take over from "John Mehlhoff, who was named the BLM's acting state director for Colorado in October."

Fish and Wildlife Service:

ENVIRONMENTAL GROUP THREATENS LAWSUIT IF COLORADO DOES NOT INCREASE RIO GRANDE FLOWS. The [E&E Daily](#) (1/22) reports that "an environmental group has notified Colorado officials that it plans to file a federal lawsuit against the state if it does not increase the volume of water it sends down the Rio Grande to

New Mexico, claiming low water flows are harming two endangered species downstream." WildEarth Guardians has "sent a 60-day notice of intent to sue to Mike King, executive director of the Colorado Department of Natural Resources, and others, arguing that the result of the state's policy of diverting much of the Rio Grande instead of allowing the river to flow into New Mexico is harming the endangered Rio Grande silvery minnow and the Southwestern willow flycatcher that live downriver." According to the article, "the group claims that diverting much of the Rio Grande to irrigate crops in Colorado's San Luis Valley during peak river flows in May constitutes a 'take' of the two species, requiring the state to obtain a permit under the Endangered Species Act to harm or kill them."

Additional coverage was provided by the [AP](#) (1/23, Bryan).

FWS TO CONSIDER PROTECTIONS FOR 19 ANIMALS. The [E&E Daily](#) (1/22) reports that the FWS will "consider endangered or threatened listings for 19 species, it announced today." According to a notice published in today's Federal Register, "the proposals for the listings of 15 species of foreign bats, along with the emperor penguin, Flores hawk-eagle, Ridgeway's hawk and Virgin Islands coqui, come from five different petitions received" by the agency.

TRAPS SET FOR SNOWY OWLS AT GERALD R. FORD INTERNATIONAL AIRPORT. The [AP](#) (1/23, 417K) reports that "traps are being used to catch snowy owls alive at Gerald R. Ford International Airport after staff members shot nine in the last two months to ensure aircraft safety." The article notes that the airport has a FWS "permit to control snowy owls if they are deemed a safety hazard."

US Geological Survey:

USGS, TEXAS RAILROAD COMMISSION INVESTIGATING EARTHQUAKES. [KXAS-TV](#) Dallas (1/23, 155K) reports that the USGS and the Texas Railroad Commission are "investigating a series of small earthquakes in Parker County." Since the beginning of the month, there have been a total of 10 quakes. Dr. Ken Morgan, PhD, the head of TCU's Energy Institute, said "there are dozens of fault lines in North Texas," but he added that "there is a possibility the quakes are being caused by human activity." However, in his belief, Morgan said that "fracking is not a possible cause of the Parker County earthquakes."

Securing America's Energy Future:

Renewable Energy:

CAPE WIND FACES NEW LAWSUIT. The [E&E Daily](#) (1/22) reports that "opponents of the Cape Wind project are arguing in a federal lawsuit that state regulators did not have the right to broker an agreement to have utility NStar buy the power generated from the farm." They claim that "only the Federal Energy Regulatory Commission has that power."

Meanwhile, the [E&E Daily](#) (1/22) reports that "federal appellate judges today rejected a challenge to the controversial Cape Wind offshore wind farm project from Massachusetts residents." The US Court of Appeals for the District of Columbia Circuit "upheld the Federal Aviation Administration finding that the proposed 130-turbine farm would not pose a risk to aeronautical navigation over Nantucket Sound."

Additional coverage was provided by the [Cape Cod \(MA\) Times](#) (1/22, 92K).

Cape Cod Wind Farm Would Be Built With European Components. The [New York Times](#) (1/23, Cardwell, Subscription Publication, 9.61M) reports that the politicians and the developers of the proposed \$2.6 billion wind farm of the shores of Cape Cod "promised" that "much of the work" would go to US companies. However, a Massachusetts company "lost a bid to build support structures to a German company it had brought in as a partner, and last month Cape Wind completed arrangements for other major components, including the giant blades, towers and turbines, to be built in Denmark." The Times says that the problems "illustrate the difficulty of creating a new energy industry from scratch," even if it is backed by the government.

ANALYSIS FINDS GROWTH IN RENEWABLE ENERGY GENERATION. The [E&E Daily](#) (1/22) reports that

"renewable energy generation in the United States grew 23 percent from 2009 to 2012, a new analysis shows, led by an increase in wind and solar power." According to SNL Energy, "wind accounted for 74 percent of the uptick in utility-scale renewable generation." Also, solar generation "has taken off, ever since posting a 33 percent year-over-year increase in 2010, the study said."

FWS DISCUSSES GREAT BAY WIND ENERGY'S APPLICATION FOR EAGLE TAKE PERMIT. The [Delmarva \(MD\) Daily Times](#) (1/22, 26K) reports that "a packed room of Somerset County residents" and FWS officials "debated the possible implementation of Great Bay Wind Energy's application for an eagle take permit at the J.M. Tawes Technology Center." FWS representative Julie Slocum "encouraged the audience to 'put numbers into context' and observe the intent of Pioneer Green's project." She said, "The project's main purpose is for clean energy."

OP-ED: OBAMA ADMINISTRATION'S PUSH FOR RENEWABLE ENERGY HURTS TRIBAL LANDS. For "The Blog" of the [Huffington Post](#) (1/23, King, 11.54M), consultant Tom King writes that the Obama Administration "runs roughshod over tribal cultural and spiritual values." He notes that the Interior Department is "expediting industrial-scale wind and solar energy development on public lands," and "the locations chosen for many such projects are landscapes that tribes have valued and used for millennia, that remain critical to their cultural identity." But according to King, "Interior effectively ignores such tribal concerns, while pretending to do the consultation required by law and (supposedly) administration policy."

Onshore Energy Development:

BLM CONSIDERS LEASE OF LAND IN COLORADO FOR COAL MINING. The [E&E Daily](#) (1/22) reports that the BLM is "moving forward with environmental reviews for the potential leasing of more than 14,000 acres of federal land in western Colorado for coal mining." According to the article, "CAM Colorado LLC, a unit of Rhino Resource Partners LP, in 2006 requested the so-called Book Cliffs tract, which is said to contain almost 80 million tons of in-place coal." Although Rhino executive Corey Heaps said that that company "welcomed BLM's decision to move forward with consideration of a potential lease of the Book Cliffs tract," environmental groups are "sounding the alarm."

SOME WATER WELLS RECOVERING AMID POWDER RIVER BASIN METHANE BUST. The [Columbus \(GA\) Ledger-Enquirer](#) (1/22, 127K) reports that "a new report shows water levels in some monitoring wells" in the Powder River Basin are "rising now that gas production is falling." According to the article, "a report released Tuesday by the Wyoming Geological Survey shows falling water levels in about three-quarters of 62 wells the US Bureau of Land Management uses to monitor groundwater in the various coal and sandstone layers that underlie the basin." However, "water levels rose in 15 of the wells."

PLAN TO ALLOW FRACKING IN VIRGINIA NATIONAL FOREST DRAWS OPPOSITION OVER WATER CONCERNS. The [Los Angeles Times](#) (1/23, Banerjee, 3.07M) reports the US Forest Service is considering making George Washington National Forest in Virginia "the first national forest to permit high-volume hydraulic fracturing." However, about 4 million people, including those in Washington, DC, depend on water from the forest, and fracking's potential risk to that water "has drawn widespread opposition...from most of the towns and counties nearby, members of Virginia's congressional delegation and Washington's mayor."

Offshore Energy Development:

APPEALS PANEL REJECTS INTERIOR'S ARCTIC LEASE SALE. The [E&E Daily](#) (1/22) reports that federal appellate judges have "ruled that the Interior Department's environmental assessment of its lease sale for oil and gas development in Alaska's Chukchi Sea was flawed and sent it back to the agency to reconsider." The 9th US Circuit Court of Appeals held that "the department failed to adequately justify its estimate that there are 1 billion barrels of total recoverable oil available." According to the article, "the 2-1 divided panel sent the agency's environmental impact statement for the controversial Lease Sale 193 back to the Bureau of Ocean Energy Management for further consideration."

The [Washington Post](#) (1/23, Mufson, 4.28M) reports that the panel "sent the case back to District Court Judge Ralph R. Beistline, who could ask the Interior Department to revise the environmental impact statement"

according to the article, "if that process takes a prolonged time, then it could postpone Shell's drilling plans."

The [National Journal](#) (1/23, Subscription Publication, 427K) reports that environmental groups applauded "the ruling and quickly sought to use it as political ammunition in their campaign against Arctic drilling, which they contend is too risky." National Audubon Society CEO David Yarnold said, "This decision gives the White House a chance to reconsider drilling in the Chukchi."

In its "E2 Wire" blog, [The Hill](#) (1/23, 194K) reports that "the environmental groups that challenged Interior's analysis in Wednesday's case say the federal appeals court decision offers President Obama a chance to lead on climate change. Erik Grafe, an attorney for Earthjustice, said, "This ruling provides an opportunity for the administration to reconsider its decision to open up Chukchi sea to oil and gas drilling. It provides an opportunity for the administration to consider leaving oil in ground that would otherwise exacerbate climate change." Obama can take a leadership role. The Arctic presents opportunity for him to lead on climate change and take different path than the administration has up to this point."

Also reporting on the story are the [AP](#) (1/23, Joling), [Reuters](#) (1/23, Quinn), [Bloomberg News](#) (1/22, 1.91M), the [Bloomberg BusinessWeek](#) (1/22, 4.93M), the [FuelFix](#) (1/22, 7K), [FOX News](#) (1/22, 6.72M), the [Los Angeles Times](#) (1/23, Ganga, 3.07M), the [Washington Times](#) (1/23, Joling, 417K), the [Washington Examiner](#) (1/23, 319K), the [Seattle Post-Intelligencer](#) (1/22, 768K), the [Anchorage \(AK\) Daily News](#) (1/22, 198K), the [Alaska Dispatch](#) (1/22, 7K), the [Daily Telegraph \(UK\)](#) (1/23, Trotman, 3.22M), the [Courthouse News](#) (1/22, 7K), the [Law 360](#) (1/23, 18K), and [KUCB-FM Unalaska, AK](#) (1/23).

FORMER HALLIBURTON MANAGER SENTENCED TO PROBATION IN SPILL PROBE. The [E&E Daily](#) (1/22) reports that "a federal judge sentenced former Halliburton Energy Services Inc. engineer Anthony Badalamenti to one year of probation yesterday for deleting data in the aftermath of the 2010 Deepwater Horizon disaster, as BP PLC opened a new legal front in its efforts to limit a massive settlement with residents and businesses in contaminated parts of the Gulf." Badalamenti "admitted to deleting results from computer simulations that showed the extent of the oil spill." He will "be required to perform 100 hours of community service and pay a \$1,000 fine."

Tackling America's Water Challenges:

CALIFORNIA OFFICIALS CALL FOR DROUGHT BILL. The [AP](#) (1/22) reports that House Speaker John Boehner and three San Joaquin Valley Republican congressmen on Wednesday called on their Senate colleagues to approve emergency drought legislation they say would bring more water to the region. The proposed bill, which is temporary and would likely sunset sometime in the summer of 2015, would allow the Sacramento-San Joaquin Delta pumps to operate as long as water is available. It would also temporarily halt the San Joaquin River restoration. Finally, it would establish a joint House-Senate committee of 10 members that would meet over the rest of the year to come up with longer-term solutions to deal with California's drought, now in its third year.

Additional coverage of the drought was provided by the [Fresno \(CA\) Bee](#) (1/22, 327K), the [Bakersfield Californian](#) (1/23, 140K), [KFBX-TV Bakersfield, CA](#) (1/23, 12K), [KERO-TV Bakersfield, CA](#) (1/23, 4K), and [KRCR-TV Redding, CA](#) (1/23, 3K).

BILLS INTRODUCED TO PROTECT GILA RIVER. The [Las Cruces \(NM\) Sun-News](#) (1/23, 59K) reports that State Sen. Peter Wirth "introduced legislation last Thursday that would guide how the Interstate Stream Commission (ISC) can expend funds under the Arizona Water Settlements Act (AWSA) of 2004." According to the article, "Senate Bill 90 requires beneficiaries to secure and guarantee all funding necessary to construct a large-scale diversion and pipeline on the Gila River before the ISC can notify the Secretary of the Interior of its intent to begin construction." Also reporting on the story is the [Silver City \(NM\) Sun-News](#) (1/23, 24K).

Meanwhile, the [Deming \(NM\) Headlight](#) (1/23, 10K) reports that "three hundred business owners across the state have signed a letter to Gov. Susana Martinez asking that she support cost-effective, non-diversion alternatives to diverting the Gila River."

WORKER INJURED AT GRAND COULEE DAM TO BE RELEASED FROM HOSPITAL. The [Star of Grand Coulee \(WA\)](#) (1/22, 169) reports that "a worker burned in an accident at Grand Coulee Dam last November is due to be released from hospital today, the Bureau of Reclamation has informed an irrigation district."

CALIFORNIA INITIATIVE OFFERS GRANTS FOR WATER EFFICIENCY. The [Salem \(OR\) Capital Press](#) (1/21, 113K) reports that farmers in California are "being offered about \$18 million for projects that conserve water and preserve habitat for wildlife." The Bay Delta Conservation Initiative is "offering money through 15 water districts throughout the Central Valley, including newly added districts in Tehama, Kern and Stanislaus counties and in the Lower Colusa Drain."

ADDITIONAL COVERAGE OF BAY DELTA CONSERVATION PLAN. The [Sacramento \(CA\) Bee](#) (1/23, 749K) reports that during Wednesday's State of the State speech, Gov. Jerry Brown pushed for "further progress on the Bay Delta Conservation Plan." He said that "it is what we must do to get through this drought and get ready for the next one."

Additional coverage of the speech was provided by the [Ventura County \(CA\) Star](#) (1/22, 196K), the [Central Valley \(CA\) Business Times](#) (1/23, 206), and the [Sacramento \(CA\) Bee](#) (1/22, 749K).

Empowering Native American Communities:

NEW MEXICO PANEL REVIEWS NAVAJO GAMBLING COMPACT. The [AP](#) (1/23, Massey) reports that "a proposed gambling compact with the Navajo Nation ran into opposition Wednesday from other tribes and pueblos in New Mexico because it would allow the Navajos to open additional casinos." According to the article, "in testimony to a legislative committee, leaders from Laguna and Acoma pueblos and the Jicarilla Apache Nation said that more casinos would dilute their share of a saturated gambling market, possibly forcing them to cut tribal services and reduce the workers in their casinos." However, Navajo President Ben Shelly "defended the compact negotiated with Gov. Susana Martinez's administration." Shelly said, "We need economic development and employment."

AP coverage was also picked up by the [Arizona Daily Star](#) (1/23, 335K).

CATAWBA INDIAN NATION ARGUES EXISTING SOUTH CAROLINA LAW ALLOWS RESERVATION GAMBLING. The [AP](#) (1/23, Kinnard) reports that the Catawba Indian Nation "argued before the state's Supreme Court Wednesday that current law allows them to have a reservation casino – even though video gambling is banned elsewhere within the state's borders." The tribe is "appealing a circuit judge's 2012 ruling that, not only does the law that allows those vessels not give the Catawbans the right to gamble, but that the tribe gave up that right voluntarily in its settlement agreement."

AP coverage was also picked up by the [Augusta \(GA\) Chronicle](#) (1/22, 184K).

FORT SILL APACHE STILL PURSUING SOUTHERN NEW MEXICO CASINO. The [Las Cruces \(NM\) Sun-News](#) (1/23, 59K) reports that "despite setbacks," the Fort Sill Apache tribe still has "aspirations to carry out gaming on the 30-acre parcel." According to the article, "the tribe had poured its energies in recent years into applying for the right to game via a two-part test that requires approval from both the US Department of the Interior and a state's governor."

INDIAN LAW AND ORDER COMMISSION REPORT OFFERS RECOMMENDATIONS TO IMPROVE SAFETY. The [Indian Country Today Media Network](#) (1/22, 21K) reports on the Indian Law and Order Commission's report "A Roadmap to Making Native America Safer." The commission "presented its report in November," saying that it had "concluded that criminal jurisdiction in Indian country is an indefensible morass of complex, conflicting, and illogical commands, layered in over decades via congressional policies and court decisions and without the consent of tribal nations." The report offers "more than three-dozen recommendations about how to change things, some of them breathtaking."

Top National News:

LEW: CONGRESS MUST RAISE DEBT CEILING EARLIER THAN PREVIOUSLY ANTICIPATED. Treasury Secretary Lew's letter to House Speaker Boehner advising him that Congress needs to increase the Federal debt ceiling by the end of next month did not generate a great deal of media coverage apart a smattering of generally brief print and online reports. None of the network newscasts mentioned the letter on Wednesday evening, and Lew's warning did not prompt debate over Federal spending on the cable news channels.

The *New York Times* (1/23, Weisman, Subscription Publication, 9.61M) reports that on Wednesday, in his letter to Boehner, Lew "warned...that the government would most likely exhaust its ability to borrow in late February, setting up the latest fiscal showdown earlier than Republican leaders anticipated." According to the *Times*, Lew told Boehner that "a surge of February spending, mainly tax refunds for 2013, would leave the Treasury with little room to maneuver after the official debt limit is reached on Feb. 7." The *Times* goes on to report that while Boehner "has said he does not want to have another showdown on the debt ceiling," other House Republicans "still want to force concessions from the White House, possibly on controlling the growth of entitlement...or easing the path to an overhaul of the tax code." *USA Today* (1/22, Korte, 5.82M) notes that "the debt limit is now more than \$17 trillion."

McClatchy (1/23, Cockerham, 95K) quotes Lew as writing: "Protecting the full faith and credit of the United States is the responsibility of Congress, because only Congress can extend the nation's borrowing authority. No Congress in our history has failed to meet that responsibility." The *Wall Street Journal* (1/22, Paletta, Subscription Publication, 5.91M) notes that Lew emphasized that Congress must act quickly, "and certainly before late February."

However, according to *USA Today* (1/22, Korte, 5.82M), Lew himself "previously said that Treasury could run out of money to pay its bills by 'late February or early March.'" On *CNBC's Closing Bell* (1/23, 191K), Hampton Pearson reported that "the interesting thing about [Lew's] letter" is that he said "there's going to be a lot more money going out in early February to pay for tax refunds and there's a lot less borrowing authority available than in 2011 and 2013, the last time Congress and the Administration locked horns on the whole issue of raising the debt ceiling."

The *Hill* (1/23, Schroeder, 194K) reports that deal reached in October "to end the government shutdown also suspended the nation's \$16.7 trillion borrowing cap until Feb. 7." The *Hill* adds that on February 7, "the borrowing limit will be automatically increased to cover all governmental borrowing done during the suspended period," and, "without an increase, the Treasury will begin to employ its set of 'extraordinary measures' to free up room under the cap."

Reuters (1/23) reports that in his letter to Boehner, Lew wrote, "We do not foresee any reasonable scenario in which the extraordinary measures would last for an extended period of time" after February 7.

According to *Roll Call* (1/23, Lesniewski, Subscription Publication, 87K), "Response on Capitol Hill to Lew's latest warning was swift and predictable, with Democrats pushing for a 'clean' increase in borrowing authority and Republicans calling for" offsets. *Roll Call* also notes that just "last week," Senate Majority Leader Reid "indicated the nation wasn't likely to hit the debt ceiling until May."

Jim Puzzanghera, in a piece for the *Los Angeles Times* (1/23, Puzzanghera, 3.07M), says Reid's time-frame "conflicts with estimates from the Treasury," as well as the Bipartisan Policy Center, which "reiterated its deadline of 'late-February to mid-March'" after Reid said Congress might have until May.

Politico (1/22, Sherman, 464K) reports that the House "is out of session this week and in session for only two-and-a-half days next week," and adds that "as of right now, there doesn't appear to be a plan to lift the debt limit." *Politico* goes on to report that Boehner spokesman Michael Steel "hinted in an email that Republicans will again demand concessions from Democrats to raise the borrowing limit." Steel wrote: "The speaker has said that we should not default on our debt, or even get close to it, but a 'clean' debt limit increase simply won't pass in the House."

The *AP* (1/22) notes that President Obama has repeatedly insisted that he "will not negotiate over the debt limit." According to *Bloomberg News* (1/23, Klimasinska, 1.91M), House Republicans "are expected to decide on their negotiation strategy at a party conference next week." Sam Stein, in a piece for the *Huffington Post* (1/22, Sam

Stein Posted: 01/22/2014 3: Est, 11.54M), notes that last year, the House Republican leadership has "pushed for policy riders, such as one authorizing the construction of the Keystone XL pipeline."

OBAMA ESTABLISHES TASK FORCE ON COLLEGE CAMPUS SEXUAL ASSAULTS. NBC Nightly News (1/22, story 7, 1:00, Williams, 7.86M) reported President Obama "called for new attention today to the problem of sexual assault on our college campuses," announcing the "creation of a task force on the issue, pointing some sobering facts these days, like one in five college students sexually assaulted, but only 12% of the victims reporting the attacks." NBC ran quotes from both Obama and Vice President Biden, who said, "Men have to step up to the bar here. Men have to take more responsibility. Men have to intervene."

USA Today (1/23, Jackson, 5.82M) says in receiving the report from the White House Council on Women and Girls, the President said, "It's totally unacceptable." The New York Times (1/23, Calmes, Subscription Publication, 9.61M) reports that "while both the administration and the news media have paid greater attention recently to sexual assaults in the military, rape is most common on college campuses, according to the council's report. The problem, it says, is exacerbated by students' alcohol and drug use."

MAYORS PREDICT ECONOMIC GROWTH. Gannett News Service (1/23, Kelly, 7K) reports Mesa, Arizona Mayor Scott Smith, president of the US Conference of Mayors, predicted at the group's annual winter meeting that US cities "will begin to see real economic growth in 2014 after years of struggling through the recession." A recent report by IHS Global Insight for the Conference, the Council on Metro Economies, and the New American City forecast 356 of 363 US metro areas will "experience true, inflation-adjusted economic growth this year." The group also wants Congress to act on immigration reform, with Smith saying, "The status quo is not acceptable." On trade, Smith plans to meet with Eduardo Medina Mora, Mexico's ambassador to the US, and Smith already talked with" DHS Secretary Johnson "about increasing US Customs and Border Protection staffing to reduce border crossing wait times

The Washington Post (1/23, Henneberger, 4.28M) reports that at the meeting, Commerce Secretary Pritzker promised her department will help expand exports "and energetically invited them to compete to become one of a dozen designated 'manufacturing communities.'"

The AP (1/23, Thomas) reports Smith also called on Congress "to work together to promote 'confidence in our markets.'"

Youth Unemployment Rate Remains Elevated. The Huffington Post (1/23, 11.54M) reports that while the stock market has recovered, the unemployment rate for those ages 18 to 29 remains in double digits and the percentage of young workers lacking employment is almost double what it was before the recession. Meanwhile, Yale University President Peter Salovey said in an interview that his is concerned about the effect of public universities' increasing tuition on student debt, making it more difficult for young people to afford the degree needed for many jobs. Salovey said that for middle-class and working-class students, "if they're admitted to a place like Yale University, their families will pay less for that college education than typically if they went to the state university in their own state as state tuition payers."

CEOs At Davos Concerned About Underemployment, Wage Stagnation, Healthcare Cuts. The Wall Street Journal (1/23, Ball, Glazer, Subscription Publication, 5.91M) reports that, at the Wall Street Journal's CEO Council during the World Economic Forum, chief executives at top companies predicted that 2014 will see wage stagnation and underemployment in the US. Healthcare executives say that uncertainty over the healthcare overhaul has them expecting to cut jobs. Meanwhile, the economic recovery in Europe still has issues, and uneven growth is predicted for the developing world.

Stock Benchmarks Mixed. The Wall Street Journal (1/23, Scaggs, Subscription Publication, 5.91M) reports the Dow Jones Industrial Average fell 41.10 points (0.3%) to 16,373.34, the S&P 500 rose 1.06 points (0.1%) to 1,844.86, and the Nasdaq Composite Index was up 17.24 points (0.4%) to 4,243.00. Investors remain focused on corporate earnings reports, seeking profit growth following last year's record-setting rally.

Editorial Wrap-Up:

NEW YORK TIMES. "Political Rumble Over Pre-K." In an editorial, the *New York Times* (1/23, Subscription Publication, 9.61M) writes that New York Gov. Andrew Cuomo and New York City Mayor Bill de Blasio "are locked in a contest over" providing free, full-day prekindergarten, something they both agree on. De Blasio would raise taxes to pay for it, while Cuomo is promising to pay for it all over the state without a tax increase. The *Times* argues that, for de Blasio, "the smart thing is to accept the offer and declare political victory." Meanwhile the *Times* calls for the Governor to offer more money for the program, create guidelines to ensure it is "more than babysitting or day care," and find the space and teachers needed to make the programs work.

"A Plan To Make Voting Easier." The *New York Times* (1/23, Subscription Publication, 9.61M) says in an editorial that the Presidential Commission on Election Administration offered "a superb report," saying the commission "did far better than expected in showing the many ways that the nation's patchwork of state and local election laws has contributed to low turnouts. ... The most important idea in the report, endorsed by members of both parties on the panel, is that these are national problems requiring a national solution. It is no longer tenable for voting to be difficult in one state but easy next door."

"Ukrainian Standoff." In an editorial, the *New York Times* (1/23, Subscription Publication, 9.61M) says that a meeting between Ukraine President Viktor Yanukovich and opposition leaders was "a positive development," but "it was difficult to see what agreement could end the standoff peacefully and properly." The *Times* says that the West "must also make abundantly clear to Mr. Yanukovich and his lieutenants that they will pay a price if they try to use the talks simply to gain time, or if they order a bloody crackdown."

WASHINGTON POST. "Leading To Failure In Syria." The *Washington Post* (1/23, 4.28M) says in an editorial that the diplomatic initiative Secretary of State Kerry "launched offers no means to hold the regime of Bashar al-Assad accountable" for atrocities, "or even to stop them. On the contrary: It may serve to prop up the Assad government by treating it as a legitimate party to negotiations about Syria's future." Kerry "insists the talks will lead to a transitional government that excludes Mr. Assad, but the Syrian delegation flatly rejects this premise, and there is no indication that its allies Russia and Iran think otherwise." That President Obama "refuses to consider options between Mr. Kerry's feckless diplomacy and an Iraq-style invasion only ensures that the Geneva 2 conference will fail and that the atrocities will continue."

"Not A Bailout." In an editorial, the *Washington Post* (1/23, 4.28M) argues that it is likely that the Federal government will implement Affordable Care Act safeguards to spread risk "among insurance companies by transferring money from those that see relatively low claims costs to those that see relatively high costs" and to help "pay very high medical bills from individual patients." The *Post* says that this is not a sign that the ACA is failing, but an example of "smart contingency planning."

"From Felon To Voter." In an editorial, the *Washington Post* (1/23, 4.28M) writes that while "Virginia is making meaningful progress" in allowing felons "to reestablish themselves as full members of society" with restored "voting and other civil rights," more needs to be done. The paper praises former Gov. Robert F. McDonnell for his efforts on the issue and calls for Gov. Terry McAuliffe to continue the effort and make sure it receives "adequate funding and attention."

WALL STREET JOURNAL. "Detroit's Bankruptcy Retreat." In an editorial, the *Wall Street Journal* (1/23, Subscription Publication, 5.91M) criticizes the proposed Detroit pension deal, arguing that Federal bankruptcy judge Steven Rhodes needs to hold firm to his insistence that settlements address Detroit's systemic problems. The *Journal* focuses on the defined-benefit public pensions as one of these. The paper argues that leading pension system as is would hurt the city's recovery and contravene the purpose of bankruptcy.

"An Obama Foreign Policy IQ Test." In an editorial, the *Wall Street Journal* (1/23, Subscription Publication, 5.91M) says that the Administration should learn from the Iraqi withdrawal and keep troops in Afghanistan as part of an open-ended commitment. The *Journal* says that by withdrawing from Iraq too soon, the Administration allowed chaos to develop there, and believes the result would be the same for Afghanistan if US forces are withdrawn at the end of the year.

"Scalia Agonistes." In an editorial, the *Wall Street Journal* (1/23, Subscription Publication, 5.91M) writes that Justice Antonin Scalia appears to be the swing vote in *Harris v. Quinn*, which the paper casts as pitting union power against First Amendment rights. The paper attempts to sway Scalia, arguing that the government should

not be allowed to compel works to pay dues, as private employers are allowed. The Journal contends that being forced to join a public union is politically coercive for free speech, contending that taking any bargaining position with the government is a kind of speech that dues-payers may disagree with.

Washington Schedule:

TODAY'S EVENTS IN WASHINGTON.

White House:

PRESIDENT OBAMA – The President and the Vice President receive the Presidential Daily Briefing. The President delivers remarks at a reception with US mayors; the Vice President also attends, the East Room, pooled press. Notes: Press Briefing by Press Secretary Jay Carney, 12:45 p.m.

VICE PRESIDENT BIDEN – No public schedule.

US Senate: Not in session.

US House: 9 a.m. – The House meets in pro forma session.

Other: "CONGRESS OF TOMORROW" – Deadline to register for the Congressional Institute's 2014 "Congress of Tomorrow" Issues Conference to be held from Wednesday, January 29 until Friday, January 31 in Cambridge, MD. Registration is required to attend.

2014 NSA/MCSA WINTER CONFERENCE. – Jan. 20 – 25. The National Sheriffs Association and the Major County Sheriffs' Association host the 2014 NSA/MCSA Winter Conference. Highlights: 9 a.m. Keynote by John F. Sopko, Special Inspector General for Afghanistan Reconstruction. Location: J. W. Marriott Hotel, 1331 Pennsylvania Ave. NW. Contacts: 800-424-7827. Notes: MCSA (Major County Sheriffs' Association) meetings and functions will be held on Jan. 20-22, prior to the official start of the NSA Winter Conference.

WASHINGTON AUTO SHOW – Jan. 21 – Feb. 2. Annual auto show and related events, including Public Policy Preview Days which offer registered members of the media access to industry executives, legislators, administration officials and automotive technology innovators plus a sneak peek at the latest models and technology advancements. Show opens to the public on Jan. 23. Highlights: Eleven-day show opens to the public. Location: Walter Washington Convention Center, 801 Mt. Vernon Place NW (unless otherwise noted). Contacts: Barbara Pomerance (bp@pomeranceassociates.com), 800-697-7574.

REPUBLICAN NATIONAL COMMITTEE – Jan. 22 – 24. Annual winter meeting. The theme for the week is "Building To Victory." Highlights: 12:30 p.m. Lunch with Mike Huckabee – Open Press. 2 p.m. Townhall Meeting: GOP Rising Stars – Open Press. 3 p.m. Rules Committee Meeting – Open Press. Location: Renaissance Washington Hotel, 999 9th St. NW. Notes: RSVP to Jillian Rogers at jrogers@rnchq.org or 954-829-5988.

US CONFERENCE OF MAYORS – Jan. 22 – 24. The 82nd Winter Meeting. More than 280 of the nation's mayors will convene to meet with congressional leaders and administration officials and to urge Congress "to continue to work in a bipartisan fashion to spur job creation and economic growth in America's cities and metropolitan areas." Highlights: President Barack Obama meets with US mayors. Time TBA.

Assistant Attorney General for the Office of Justice Programs – 11:30 a.m. Karol V. Mason will deliver remarks to the Criminal and Social Justice Committee. Press inquiries regarding logistics should be directed to Elena Temple-Webb at 202-861-6719 or etemple@usmayors.org. Location: Capitol Hilton, 16th and K Streets NW. Contacts: Elena Temple, etemple@usmayors.org, 202-286-1100. Karen Hinton, Karen@hintoncommunications.com, 703-798-3109. Lina Garcia, lgarcia@usmayors.org, 202-341-6113

FAMILIES USA CONFERENCE – Jan. 23 – 25. Hundreds of healthcare experts, advocates and professionals from around the nation come together for Families USA's annual conference. Health Action 2014 will be the 19th edition of this annual gathering of healthcare professionals. Highlights: 9 a.m. Vice President Joe Biden is scheduled to speak at the opening plenary session. Press arrival 7a.m. Final access for equipment is 7:30 a.m. Media Entrance: Hyatt Employee Entrance. Corner of 1st and D Streets NW. General Media Parking: Garage or Street Parking Available. Contact for logistical and planning purposes (media only): Lennon Duggan at lennonduggan@gmail.com (202)253-0494. Location: Hyatt Regency on Capitol Hill, 400 New Jersey Ave. NW.

Contacts: Dave Lemmon, Bob Meissner, Bryan Fisher, 202-628-3030

DOD – AFGHANISTAN BRIEFING – 9 a.m. Army Lt. Gen. Mark A. Milley, International Security Assistance Force Joint Command, will brief the media live from Afghanistan in the Pentagon Briefing Room (2E973) to provide an update on operations and the status of the Afghan National Security Forces development. Journalists without a Pentagon building pass will be picked up at the River Entrance only. Plan to arrive no later than 45 minutes prior to the event; have proof of affiliation and two forms of photo identification. Please call 703-697-5131 for escort into the building.

ATTORNEY GENERAL – VETERANS – 10 a.m. US Attorney General Eric Holder will visit the Veterans Treatment Court (VTC) program in Roanoke, Va., and deliver remarks on the Justice Department's "Smart on Crime" initiative that seeks to reform the criminal justice system and improve reentry programs to curb repeat offenses and re-victimization. Location: US District Court for the Western District of Virginia, 210 Franklin Rd., Roanoke, VA. Notes: Media must RSVP to Brian McGinn at Brian.McGinn@usdoj.gov or 434-295-8672 or 540-293-4928. All media equipment must arrive by 9:00 a.m. the day of the event for a mandatory security sweep at 9:30 a.m. Once the security sweep is complete, additional media equipment will NOT be permitted to enter and swept equipment will NOT be permitted to exit. Pen and pad reporters may arrive by 9:45 a.m. Press inquiries regarding logistics should be directed to Brian McGinn.

PENTAGON – ADM. LOCKLEAR – 10 a.m. Commander, US Pacific Command Adm. Samuel J. Locklear III will conduct a press briefing in the Pentagon Briefing Room (2E973). Notes: Journalists without a Pentagon building pass will be picked up at the River Entrance only. Plan to arrive no later than 45 minutes prior to the event; have proof of affiliation and two forms of photo identification. Please call 703-697-5131 for escort into the building.

ATLANTIC COUNCIL – NATO – 10 a.m. – 11 a.m. "Regional Defense Cooperation and the Transatlantic Link." An address and discussion with Carl Haglund, Minister of Defense, Republic of Finland. Location: 1030 15th Street, NW, 12th Floor. Notes: RSVP to press@AtlanticCouncil.org to reserve your spot.

ARLINGTON – ACTIVE DUTY BURIAL – 10:30 a.m. Burial service for US Army Sgt. Peter C. Bohler who was supporting Operation Enduring Freedom at the time of his death is open for media coverage. (meet on Memorial Avenue by 10:30 a.m.) All media intending to cover the service must contact Melissa Bohan, Arlington National Cemetery public affairs, for an escort: melissa.bohan@us.army.mil or (703) 614-1091. Location: Arlington National Cemetery, Arlington, Va. 22211. Contacts: 1st Infantry Division Public Affairs Office (785-240-1796)

REGIONAL CLUSTERS – ENERGY – 10:30 a.m. – 11:45 a.m. Sen. Ed Markey will headline a Capitol Hill briefing on the use of regional clusters to improve energy innovation. The event is cosponsored by the Information Technology and Innovation Foundation and the New England Clean Energy Council. It will bring together leading regional clean tech innovation programs from across the country to discuss their efforts and the policy reforms necessary to enhance impact. Location: Capitol Visitor Center (SVC201-00). Contacts: William Dube, wdube@itif.org, 202-626-5744.

WORLD BANK – SUB-SAHARAN AFRICA – 12:30 p.m. – 2 p.m. "Youth Employment in Sub-Saharan Africa." Chair: Francisco H. G. Ferreira, Chief Economist, Africa Region, World Bank. Speakers: Deon Filmer, Lead Economist, Development Economics Research Group, and Human Development Department, Africa Region, World Bank; Louise Fox, Former Lead Economist, Africa Region, World Bank. Discussant: Mwangi S. Kimenyi, Senior Fellow and Director of the Africa Growth Initiative, Global Economy and Development Program, Brookings Institution. Location: Auditorium J1-050, World Bank J Building, 701 18th St. NW. Notes: RSVP to infoshopevents@worldbank.org

CARBON POLLUTION – LATINOS – PRESS CALL – 1 p.m. Discussion on Survey To Analyze Latino Support For Action On Carbon Pollution, Climate Change. Participants: Adrianna Quintero, senior attorney, Natural Resources Defense Council and Founder, Voces Verdes; Dr. Matt Barreto, principal co-founder, Latino Decisions, and associate professor of political science/adjunct professor of law, University of Washington, Seattle, WA; Nina Vaca, board member, US Hispanic Chamber of Commerce; and Maria Cardona, political commentator and founder, Latinovations. MEDIA CONTACTS: Ailis Wolf, 703-276-3265, aawolf@hastingsgroup.com; Jake Thompson, (202) 289-2387, jthompson@nrdc.org DIAL IN: 1-877-418-4267. Ask for the "Latino views on EPA and pollution" news event.

LATINOS – CLIMATE CHANGE – 1 p.m. Teleconference on a new survey by Latino Decisions conducted for the Natural Resources Defense Council (NRDC) which will explore why Latinos "are among the strongest supporters of federal action to reduce carbon pollution and to curb the impacts of climate change." With Adrianna Quintero, senior attorney, Natural Resources Defense Council and Founder, Voces Verdes; Dr. Matt Barreto, principal co-founder, Latino Decisions, and associate professor of political science/adjunct professor of law, University of Washington, Seattle, WA; Maria Cardona, political commentator and founder, Latinovations; Elianne Ramos, principal and CEO of Speak Hispanic Communications, and vice-chair of Marketing and PR for Latinos in Social Media (LATISM). Contacts: Ailis Wolf, aawolf@hastingsgroup.com, 703-276-3265. Notes: Reporters may join the phone-based news conference by dialing 1-877-418-4267. Ask for the "Latino views on EPA and pollution" news event.

JUSTICE SOTOMAYOR – MOOT COURT – 3 p.m. The George Washington University Law School will host the Van Vleck Constitutional Law Moot Court Competition. Student competitors will argue before a distinguished panel of judges, including Justice Sonia Sotomayor of the US Supreme Court, Judge Robert Katzmann, chief judge, US Court of Appeals for the Second Circuit and Judge Lee Rosenthal, district judge, US District Court for the Southern District of Texas, Houston Division. Location: The George Washington University, Lisner Auditorium, 730 21st St., NW. Contacts: Nicole Carlotto, nfcarlotto@gwu.edu, 202-994-6466. Notes: RSVPs are required for credentials. Media interested in attending should contact Angela Olson at 202-994-3087 or olsona@gwu.edu.

YFPF – NAFTA – MEXICO – 6:30 p.m. Twenty years after the implementation of NAFTA, Young Professionals in Foreign Policy is joining with the Embassy of Mexico for a panel discussion reviewing the trade agreement's impact and looking ahead at the future of North American trade. Panelists include: Kenneth Smith, Director of the Trade and NAFTA Office at the Embassy of Mexico; and Antonio Ortiz-Mena, Head of Economic Affairs at the Embassy of Mexico. Location: 1911 Pennsylvania Ave. NW. Notes: To RSVP email samantha.powell@ypfp.org with your full name, affiliation, and whether you are a member of the press. This event is off the record.

Last Laughs:

LATE NIGHT POLITICAL HUMOR.

David Letterman: "New Jersey Governor Chris Christie won reelection...and now they swore him in yesterday, and...they swore him in. And I think he raised his right hand, put his left hand on a cook book. And then, instead of the oath of office, by mistake, he recited Red Lobster's pledge to customers."

Jon Stewart: [Referring to corruption charges against former Virginia Gov. Robert McDonnell (R)] "Ah, the old governor and his wife get you to pay them to promote your dietary supplement. We've seen this before. It explains the state's new motto: Virginia is for 10,000 milligrams of Niacin."

Jimmy Fallon: "This storm is affecting everyone, including Chris Christie who had to cancel his inauguration gala because of all the snow, which got weird when someone found an email from God that said, 'Time for some traffic problems in New Jersey.'"

Jimmy Fallon: "But everyone is still talking about the bridge-gate scandal. In fact, yesterday, Donald Trump said that Chris Christie is under so much pressure, he's just one email away from a disaster. As opposed to Trump, who's one gust of wind away from a disaster."

Jay Leno: "In a new interview, President Obama said he doesn't think marijuana is any more dangerous than alcohol. How about that? So, I guess we know what Michelle has been growing in that White House garden, huh? Yeah. We have gone from hope and change to toke and bake. That's what happened."

Jay Leno: "Well, President Obama is giving the NSA new guidelines on gathering data on American citizens. He said the NSA can no longer violate anyone's constitutional, protected right to privacy. That, of course, will be Target's job."

Jay Leno: "Oh, the President also said the United States will no longer spy on leaders of friendly foreign nations. You know what that means? The best way to protect yourself – become the leader of a friendly foreign nation."

Jay Leno: "Well, you know, here's something I find hard to believe. I read this in 'The New York Post.' Listen to this. Anthony Weiner makes between \$300,000 and \$400,000 a year as a political consultant. Anthony Weiner. How bad are you doing in the polls when you start saying to yourself, 'Now what would Anthony Weiner do?'"

Jay Leno: "Well, more problems for Chris Christie. And you know they are coming out of the woodwork now with these scandals. Olympic runner Carl Lewis says that Christie dropped a plan to appoint him as the state's first physical-fitness ambassador, when Lewis decided to run for the Senate against a Christie friend. See, I'm sorry. I find that hard to believe. Don't you? Huh, Chris Christie had a physical-fitness plan? I don't think so."

Conan O'Brien: "The big story, despite his recent scandals, Chris Christie has some good news. He is getting a lot of support from New Jersey Hispanics. Some like his moderate conservatism. Others believe if you hit him, he'll break open and spill out candy."

Blake, Kate and Booch -

Thanks for forwarding these articles - and for arranging the meetings. I do think they were a positive reflection on our ongoing commitment to gaining stakeholder input.

It would be helpful to review our process for the future to assure we are in compliance with all state sunshine laws. I am familiar with them from my previous work and if there was indeed a quorum of local commissioners, I feel we should consider issuing an apology in this instance and reflect our commitment to assure our process takes this into account. Given the importance of collaborative stakeholder input and the potential for this happening in the future (and the difficulty of us knowing who is and isn't in the room), we may want to rethink whether we should make large meetings like this closed press. We could certainly facilitate smaller meetings to assure that those who may be reluctant to speak up in an open meeting have an opportunity to voice their views.

Thanks,

Sally

Copying three articles. The article from the Grand Junction Daily Sentinel reporter who attended the tour. In addition, they printed another story (with the headline) based on a subsequent conversation with the Craig Daily Press reporter who was asked to leave. The Craig Daily Press article (that we discussed) also below.

Federal delegation sees sage-grouse issue from view of regulatory critics

By Dennis Webb

Wednesday, January 22, 2014

CRAIG — Peering across the heart of greater sage-grouse country Tuesday, Interior Secretary Sally Jewell and the heads of the U.S. Fish and Wildlife Service and Bureau of Land Management praised the joint conversation that's taking place in an effort to protect the bird and manage its habitat.

As an agency in her department considers whether to list the greater sage-grouse as an endangered species, U.S. Interior Secretary Sally Jewell, right, looked at the bird's habitat northwest of Craig on Tuesday with Ray Owens, manager of a ranch where measures have been undertaken for sage-grouse conservation. Photo by Noelle Levitt Riley/Craig Daily Press

"The fact that everybody is around the table is really impressive," Jewell said.

For everyone from Moffat County Commissioner Tom Mathers to Gov. John Hickenlooper, what was impressive was that Jewell, Fish and Wildlife director Dan Ashe and Neil Kornze, principal deputy director of the BLM, all came to this remote part of northwestern Colorado to join in the discussion.

"To have all the top brass here at one time, it was amazing," Mathers said.

"We had everybody right here ... everybody that mattered," Hickenlooper said. "And they listened, is the most important thing."

The federal trio came to see firsthand voluntary sage-grouse conservation measures being undertaken at the Bord Gulch Ranch, far up Moffat County Road 7 northwest of town. Their visit comes as the Fish and Wildlife Service faces a 2015 decision on whether to list the greater sage-grouse for protection under the Endangered Species Act, and as the BLM weighs land-management measures it hopes will help persuade its

fellow Interior Department agency that such a listing isn't warranted.

Both the prospect of a listing and the measures being considered by the BLM have caused consternation among several northwest Colorado counties, and among oil and gas, agricultural, recreation and other interests.

Their concern ultimately came to be shared by Hickenlooper himself, and last week he sent the BLM a letter urging it to take an adaptive management approach that protects the greater sage-grouse while safeguarding energy, agriculture and other economic engines of the region. He also pointed to the benefits of public/private partnerships, and on Tuesday Jewell, Ashe and Kornze were able to witness the results of one such partnership.

They stopped at the Bord Gulch Ranch to view sage-grouse conservation measures undertaken under the leadership of ranch manager Ray Owens. He's one of two 2013 recipients of Colorado Parks and Wildlife's Wildlife Landowner of the Year honor, and the ranch, owned by the Gilliland family, has been working in cooperation with agencies such as Parks and Wildlife and the Fish and Wildlife Service.

Owens described fencing, watering, sagebrush treatment and other measures that benefit not just the birds but other wildlife. He said he doesn't just manage for a single species.

"You have to manage it for everything," said Owens.

He went on to detail efforts such as maintaining a variety of ages of sagebrush to avoid ending up with big, old stands susceptible to wildfire, and also maintaining fields without sagebrush because they provide places for elk to feed.

Owens spoke Tuesday from a hilltop in a seeming sagebrush ocean with waves extending to Wyoming and Utah.

"People are changing. The neighbors are seeing the benefit of what we're doing," he said.

He believes approaches such as the one the Bord Gulch Ranch is involved in make more sense than the government handing down rules.

"Just like your kid — you start giving them rules and they rebel," he said.

Hickenlooper's role

Rebellion isn't an entirely foreign concept in Moffat County. Upset over some state-level actions, commissioners there asked voters in November whether they wanted to pursue secession from the state, although the measure failed.

Still, a number of residents and elected officials in the county have considered Hickenlooper part of the problem, thanks in part to his support for things such as stricter gun laws and higher renewable-energy standards for rural electricity. But the governor's recent actions on greater sage-grouse, which included appointing John Swartout as a point person on the issue and ultimately formulating the position presented to the BLM last week, have drawn the notice of Mathers.

"I am so impressed with our governor right now," said Mathers.

Jewell also had praise for the role Hickenlooper has been playing on sage-grouse.

"Governor Hickenlooper has been a real leader in this process," she said.

For his part, Hickenlooper said he hadn't expected Jewell to come to Craig, and it was a generous move on her part. He said he also respects her private-sector roots.

"She understands how the real world works," said Hickenlooper, who said it appears she'll lead a team that wants to consider local concerns.

Jewell has been on the job less than a year, having replaced Coloradan Ken Salazar. She said she's learning every day and that it's important to listen closely to people such as Owens.

"We don't pretend to have all the answers," she said.

At the same time, Ashe emphasized the Fish and Wildlife Service is obligated to make a decision based on the science about the potential listing of the sage-grouse.

"We're making a diagnosis. It's either threatened or endangered, or it's not," he said.

But he said if the bird ends up being listed, there's a lot of flexibility to recognize efforts being undertaken by individual properties, counties and states, and determine in some circumstances that further efforts aren't needed.

Meanwhile, the BLM has its own sage-grouse conservation plan decisions to make both in Colorado and other states. Fish and Wildlife has submitted comments saying the BLM's Colorado proposal doesn't go far enough, even as it has heard lots of other concerns that the proposal is too restrictive.

Komze, who is President Obama's nominee to be the BLM's director and is leading the agency in the interim, said the BLM is working on 15 plans across the West.

"It's a large balancing act. ... It's both local and it's West-wide at the same time," he said.

Energy officials

Jim Cagney, who heads the BLM in Northwest Colorado, said the important thing will be to look at the details of the comments that have been submitted in trying to find a workable approach.

Ashe said he's never seen an effort like the one occurring regarding the greater sage-grouse.

"We have everybody sitting around the same table, working together. ... People are working in good faith with one another," he said.

Jewell, who noted that she had sat down in Denver earlier Tuesday with the oil and gas industry and others to talk about how to reduce methane emissions related to drilling and production, said she thinks the sage-grouse conversation can serve as a model for how to deal with other issues, including the methane concern.

"What's happening here around sage-grouse is an extraordinary effort," she said.

U.S. Rep. Scott Tipton, R-Colo., urged Jewell to work with local officials who already are working to conserve the greater and Gunnison sage-grouse.

"Secretary Jewell's visit to Craig today is welcome, and I am hopeful that she will truly take into consideration all of the work being done in Colorado to preserve the sage grouse, and will work with state and local conservation efforts by providing long-awaited measurable expectations for species recovery so that we can ensure those goals are being met at the local level," Tipton said.

Tipton was in Durango when Jewell visited Craig on Tuesday. He already had other commitments when Jewell's schedule was announced, Tipton's staff said.

Listing the grouse as endangered would "put private lands off-limits to most use and development, including agriculture production and grazing, without providing any compensation," Tipton said. "These listings would kill jobs, devastate communities, and disrupt effective species preservation efforts currently underway. They won't, however, more effectively preserve the grouse."

Interior Secretary Jewell visits Moffat County to discuss sage grouse

Story by Erin Fenner

Originally published January 21, 2014 at 09:23p.m., updated January 21, 2014 at 10:04p.m.

**Photo by Erin Fenner**

Gov. John Hickenlooper, right, joins U.S. Interior Secretary Sally Jewell on a tour of Bord Gulch Ranch in Moffat County. The ranch is owned by Ray Owens, who highlighted efforts he's made to help sage grouse, mule deer and elk populations thrive in Northwest Colorado. Moffat County Commissioner Tom Mathers, left, talks about sage grouse in the region.

Craig — What might ease the tensions between sage grouse conservationists, private landowners and businesses is a concept needed in politics: collaboration.

U.S. Interior Secretary Sally Jewell and Colorado Gov. John Hickenlooper stopped in Moffat County on Tuesday to take part in such collaboration. Jewell came with the head of the U.S. Fish and Wildlife Service and the head of the Bureau of Land Management to tour the Bord Gulch Ranch, owned by Ray Owens. His ranch, nestled in the northwest corner of Colorado, is an example of how a private landowner can further a conservationist goal, Jewell said.

"Ray Owens is a model of the 21st-century Western rancher with his outstanding stewardship of this working landscape," Jewell said in a press release. "He represents the spirit of partnership that can be replicated across the West as we develop landscape-level strategies to lessen the threats to the sage grouse and conserve its habitat."

The governor also celebrated Owens' efforts in taking a completely new approach to conservation.

"I think we are creating a new model of how to preserve species," Hickenlooper said. "We're modeling for all the other ranchers and farmers in the West. There are solutions. This isn't hopeless."

The Bureau of Land Management is in the process of evaluating sage grouse habitat in Colorado and 10 other states. They need to present their recommendation to the U.S. Fish and Wildlife Service — the federal agency evaluating the bird for the endangered species list — by September. The pressure is on federal departments to decide how much protection the birds need, how to regulate that protection and how to do so while not threatening the economy of areas near sage grouse habitats.

Moffat County is one of those areas. Seventy-five percent of the county is made up of land that would be affected by a sage grouse endangered species listing.

But while listing the bird as endangered is a possibility, the population is stable enough to likely avoid that list, Fish and Wildlife Service Director Dan Ashe said.

"Endangered is always a possibility," Ashe said. "The greater sage grouse is still in relatively good shape, so it would seem like an endangered determination absent some major catastrophe is probably not where we would head."

But the birds still can be listed as a threatened species, which could come with regulations that affect private landowners and businesses.

Jewell reassured the attendees of the tour that the BLM and Fish and Wildlife Service were in Colorado to get input from farmers and ranchers.

"People really respect and want to learn from the people who work the land," Jewell said.

Hickenlooper praised the tour as an opportunity for high-level officials to meet and seek a solution with ranchers, farmers and leaders who understand the economic issues of the area.

"We have everybody that matters right here on this little hilltop," Hickenlooper said. "If you noticed: They listened."

Moffat County Commissioner Tom Mathers went on the tour as an elected official and as a lifelong rancher. He was encouraged by the conversations and ideas exchanged during the tour.

"It's overwhelming to have this much power all in one setting," Mathers said. "I'm so impressed with our governor."

Mathers said he was optimistic they could work out a way to protect the sage grouse species while also protecting people's livelihoods.

"It's going to take everyone working to get them to keep the bird from getting listed," he said. "We need multi-use on all these grounds."

Following the tour, the crew of high-up officials led a meeting at the American Legion Clubhouse in Craig to talk more about sage grouse issues. More than 40 people attended, including all three Moffat County commissioners and other elected officials, but press was barred from the discussion.

"I just assumed it was a public meeting," Mathers said.

But Jewell said it was closed.

"Secretary Jewell's office decided the meeting should be closed to press to help foster an open and frank discussion," said Eric Brown, director of communications for Hickenlooper's office.

Press booted as Interior chief Jewell meets Moffat officials

By Rachel Sauer

Tuesday, January 21, 2014

A meeting about greater sage-grouse that had been touted as open to the press and public was closed to the press Tuesday afternoon, in seeming violation of Colorado's Sunshine Law.

Erin Fenner, a Craig Daily Press reporter, was told to leave a meeting with U.S. Secretary of the Interior Sally Jewell that followed a Tuesday morning tour of Moffat County sage-grouse habitat on Bord Gulch Ranch. Fenner said she'd heard that the 3:30 p.m. meeting at the Craig American Legion was going to be closed, "but (Tuesday) morning all three county commissioners said (the meeting) was going to be open and the press should come," Fenner said.

A man who didn't identify himself, but whom Fenner said she thought works in the Secretary of the Interior's office and was acting on Jewell's behalf, escorted her from the room and told her she couldn't be there because she was with the press, Fenner recalled.

After Fenner returned to the newspaper office, managing editor Noelle Leavitt Riley called Moffat

County Commissioner John Kinkaid on his cell phone and he told her, "Send her back to the meeting," Leavitt Riley said, Kinkaid referring to the reporter Fenner.

Fenner returned to the meeting, she said, and was told to leave once again by the same man. She said she brought up Colorado's Sunshine Law "and he said that we weren't going to argue about it any more and said I had to get out," Fenner said.

She said all three Moffat County commissioners were at the meeting, which she said appeared to be a standard question-and-answer session.

According to the state Open Meetings Law — a part of Colorado's Sunshine statutes — "all meetings of a quorum of three or more members, whichever is fewer, at which public business is discussed or formal action might be taken are open."

Leavitt Riley said she then went to the American Legion building and the doors were locked, so she pounded on the window until someone let her in, "but by that time the meeting had adjourned," she said. "So, I go over to (Moffat County Commissioner) Tom Mathers and said, 'Did you know Erin was kicked out of this meeting?' And he said, 'No, this was an open meeting.'"

As she was leaving, Leavitt Riley said she saw Jewell in a car in the parking lot and the driver-side door was open, so she approached Jewell "and she said the press was not allowed at this meeting," Leavitt Riley recalled.

"I said, do you realize more than a dozen elected officials were in it? She said the tour was open to the press but this was a closed meeting" and then drove away. Leavitt Riley said.

She said the newspaper is pursuing the matter with the Colorado Press Association. No one with the U.S. Secretary of the Interior's office was available for comment Tuesday night.

Well, here's the verdict from my old high school football buddy out in Gunnison County.

Well you had a great meeting in Moffat County looks like. Here is the headline in grand junction!!! I liked your response about using science and "best practices" in the diagnosis of the listing. Thought you might like this!!!

SECRETARY JEWELL TO TOUR PROPOSED MONUMENT AREA. The [El Paso \(TX\) Times](#) (1/24, 247K) reports that Interior Secretary Sally Jewell and New Mexico's senators on Friday will "tour Doña Ana County lands being proposed to become a national monument" Sens. Tom Udall and Martin Heinrich invited Jewell to the area. According to the article, "in the morning, Jewell will visit some proposed sites that would be granted a national monument status," and "in the afternoon, she'll attend a public 'listening session' about conservation priorities in the area."

The [AP](#) (1/24) reports that "the Southwestern Border Sheriffs' Coalition, which represents more than two dozen sheriffs' offices along the border, is leading the charge against the legislation." Dona Ana County Sheriff Todd Garrison, the group's chairman, said he has "concerns about drug cartels, gangs and other illegal activity in the area." However, "supporters of the legislation have dismissed the sheriffs' concerns, pointing to a clause in the bill

that would allow federal the U.S. Department of Homeland Security to continue with border-security activities."

Coverage by the AP was also picked up by the [Las Cruces \(NM\) Sun-News](#) (1/24, 59K), the [Artesia \(NM\) News](#) (1/24, 10K), and [WRAL-TV](#) Raleigh, NC (1/24, 117K).

Also providing coverage are the [Las Cruces \(NM\) Sun-News](#) (1/24, 59K) and the [Silver City \(NM\) Sun-News](#) (1/24, 24K).

Poll Finds Strong Majority Of Doña Ana County Voters Support Organ Mountains Proposal. The [E&E Daily](#) (1/23) reports that "a strong majority of voters in Doña Ana County, N.M., support the designation of a national monument to protect the Organ Mountains and surrounding landmarks and archaeological sites along the Mexican border, according to a new poll commissioned by a veterans group." The poll also "found that 60 percent of voters favor a bill by Sens. Tom Udall (D-N.M.) and Martin Heinrich (D-N.M.) to protect roughly half a million acres in Doña Ana, compared to 24 percent who favor a bill by Rep. Steve Pearce (R-N.M.) to protect about 55,000 acres." In total, "nearly three-fourths of Doña Ana voters said they favor a monument to protect landmarks including the Butterfield stagecoach trail, Apollo space mission test sites, World War II-era bombing targets, Geronimo's Cave and hundreds of other archaeological sites, as well as other natural areas surrounding Las Cruces, according to the poll commissioned by Vet Voice Foundation."

Paper Urges President Obama To Take Action. In an editorial, the [Santa Fe New Mexican](#) (1/24, 58K) says that Jewell's "visit is likely one of the last steps before action is taken — in this instance, a declaration from President Barack Obama through the Antiquities Act to create the Organ Mountains-Desert Peak National Monument." Claiming that "the action is worthwhile and long overdue," the paper urges "President Obama to listen to the people of the Las Cruces region and save the Organ Mountains-Desert Peak region — for today's residents, but most importantly, for the future."

FWS ANNOUNCES \$16.5 MILLION IN GRANTS FOR COASTAL WETLAND PROJECTS. The [E&E Daily](#) (1/23) reports that the FWS has announced \$16.5 million in grants for coastal wetland projects "aimed at curbing the loss of shoreline habitat." The National Coastal Wetlands Conservation Grants will "draw an additional \$18.2 million in private and local funds for the acquisition, restoration or enhancement of coastal wetlands and adjacent uplands," according to the agency. Interior Secretary Sally Jewell said in a statement, "Coastal wetlands not only provide key habitat for fish and wildlife but they also improve water quality, support local economies through jobs and improve community resilience through flood and storm surge protection. These grants, funded through excise taxes paid by anglers and boaters, give us the opportunity to join with states and territories and other partners to conserve and restore these areas that are so vital to our environment and our quality of life."

[KCET-TV](#) Los Angeles (1/24, 15K) reports that "four coastal wetlands in California will benefit from \$3 million." The funds will "be used to buy unprotected wetlands and adjoining uplands, as well as working to heal damage to already protected land." According to the article, "two of the wetland areas are in the southern end of San Francisco Bay, with the others in San Luis Obispo and Humboldt counties."

[KTUU-TV](#) Anchorage, AK (1/24, 4K) reports that "a project to protect wetlands on Afognak Island near Kodiak will receive a \$1 million federal grant, after being named one of 21 projects nationwide to receive support under an Interior Department program." The funds were awarded to the state Department of Natural Resources and the Great Land Thursday, as part of the National Coastal Grants Wetlands Conservation Grants Program.

The [Portland \(ME\) Daily Sun](#) (1/24, 35K) reports that the FWS "announced Thursday that a \$1 million grant will conserve coastal wetlands across 86 acres on Middle Bay in Harpswell." The agency said that "an additional \$424,980 will be provided by partner contributions." According to the article, "the Maine Department of Inland Fisheries and Wildlife, in partnership with Harpswell Heritage Land Trust, will conserve three parcels through acquisition of fee title and conservation easements."

PROPOSED BOULDER-WHITE CLOUDS MONUMENT RECEIVES BLAINE COUNTY'S SUPPORT. The [Idaho Statesman](#) (1/23, 205K) reports that the Blaine County Commission said Wednesday "it's drafting a resolution in support of the concept" of a Boulder-White Clouds National Monument. The commission "held a public hearing Wednesday that brought 50 people out to speak about the proposal to turn the two mountain ranges and elk and deer winter habitat to the east into a national monument." According to the article, "the commissioners want the

monument patterned after Republican Rep. Mike Simpson's Central Idaho Economic Development and Recreation Act, which would have protected more than 300,000 acres of the area as wilderness."

PILT FUNDING REMAINS UNRESOLVED. The [Billings \(MT\) Gazette](#) (1/24, 206K) reports that "Congress for 40 years has compensated counties with big federal holdings by providing Payment In Lieu of Taxes," but PILT was "left out of the one-year budget deal that Congress passed last week." Although "there has been talk of grafting PILT funding onto the 2014 farm bill, which could get a congressional vote in the next few weeks," according to the article, "nothing is certain."

[The Oregonian](#) (1/24, 888K) reports that "progress on a long-stalled farm bill in Congress means that Oregon may soon get millions of dollars to help counties cover the costs of public services on federally owned land." House Agriculture Committee Chairman Frank Lucas "told reporters last week that the PILT money could be included."

Also covering the issue is [KUSA-TV Denver](#) (1/24, 171K).

LIBRARY OF CONGRESS LAUNCHES REGISTRY OF HISTORIC VEHICLES. The [Detroit Bureau](#) (1/24) reports that the Library of Congress has "launched a national registry of historically significant vehicles, each one of which will be arrived at and certified" by the Interior Department "through collaboration with the Historical Vehicle Association." The announcement came at the Washington D.C. Auto Show Day. The article notes that "the first vehicle to be entered onto the registry will be displayed for the public at the show—the 1964 Shelby Daytona Coupe—number CSX2287—one of six such race cars produced by Carol Shelby to take on Ferrari in the GT Series."

Also reporting on the story is the [AutoWeek](#) (1/23, 898K).

PRESIDENT OBAMA TO TALK CLEAN ENERGY IN ADDRESS. [USA Today](#) (1/23, Madhani, 5.82M) reports that "when President Obama heads to Capitol Hill on Tuesday to deliver the State of the Union address," he is expected "to touch on executive action he can take to bolster clean energy in the USA." According to the article, "ahead of next week's speech, Energy Secretary Ernest Moniz and Interior Secretary Sally Jewell also received more than 200 recommendations from a panel of outside experts on action that the president can take without Congress on energy efficiency, renewable markets, renewable-energy financing, alternative-fueled vehicles, new business models and natural-gas rule-making."

SEN. REID WORKED FOR A DECADE TO BRING A 235-MILE-LONG POWER LINE TO NEVADA. The [National Journal](#) (1/24, Subscription Publication, 427K) reports that "for the better part of the last decade, Senate Majority Leader Harry Reid has gone out of his way—and dipped into federal funds—to help get a massive, cross-state transmission line built in his home state of Nevada." On Thursday, Reid will "attend the opening of the 235-mile line, which at the beginning of this year started carrying large amounts of electricity produced from renewable sources rather than coal, just as Reid envisioned seven years ago." The article notes that "when concerns arose about the transmission line's potential impact on sage-grouse habitat and a historic Japanese-American internment camp in Idaho, Reid inserted language into the summer jobs bill of 2010 that directed the Interior Department to change the line's route to avoid both these areas."

INTERIOR'S SOCIAL MEDIA SHOWS POWER OF INNOVATION. The [Fed Tech Magazine](#) (1/24, 204K) reports that "government hasn't always been recognized for its social prowess, but that is starting to change." The article notes that the Interior Department is "almost single-handedly proving that social media can be a workhorse for agencies."

SCIENTISTS CONCERNED NEW BILLS COULD KEEP THEM FROM ATTENDING VITAL CONFERENCES. The [E&E Daily](#) (1/23) reports that federal scientists are concerned that "a bill aimed at boosting government transparency will inadvertently bar them from attending conferences important to their research." According to the article, the "Digital Accountability and Transparency Act" is "beginning to gain bicameral support, with one version (H.R. 2061) passing the House in November and another (S. 994) making it through the Senate Homeland Security and Governmental Affairs Committee." The legislation would "greatly expand the amount of spending information available to the public, requiring, among other things, that each recipient of federal funds gets a unique code across the federal government." However, the Assembly of Scientists says "one section of the bill could be 'deleterious' to the ability of federal scientists to accomplish their missions." Section 9 of the House bill

would "set various restrictions on federal conferences, such as limiting attendance at international events to 50 employees and requiring each agency to publicly post detailed information on any presentation made at a conference."

ADDITIONAL COVERAGE OF 2013 PARTNERS IN CONSERVATION AWARDS. Additional coverage of the 2013 Partners in Conservation awards was provided by the [Hays \(KS\) Post](#) (1/23), the [Arizona Daily Star](#) (1/24, 335K), and the [Reno \(NV\) Gazette-Journal](#) (1/23, 165K).

SECRETARY JEWELL CRITICIZED FOR CLOSING SAGE GROUSE MEETING TO REPORTERS. In an editorial, the [Denver Post](#) (1/24, 949K) criticizes Interior Secretary Sally Jewell for disregarding Colorado's open meetings laws this week in prohibiting reporters from an event in Craig. According to the paper, such actions are indefensible and could possibly raise suspicions about the federal government's intent.

Also, the [Craig \(CO\) Daily Press](#) (1/23, 10K) editorializes that "what's concerning about the situation is that members of the public were allowed in the sage grouse meeting but not the media." The paper argues that the decision "set a bad precedent on the nation's First Amendment rights." According to the paper, "if every elected official in America decided to close the press out of meetings to foster frank discussion, well, we would not have a democracy."

In his column for the [Steamboat Springs \(CO\) Pilot](#) (1/23, 26K), Rob Douglas says the decision by Jewell and Gov. John Hickenlooper has "raised questions about their commitment to a free and unfettered press as enshrined in the US and Colorado Constitutions." According to Douglas, "Jewell and Hickenlooper acted in a manner contrary to the inclusive image they were trying to project by barring reporters from what, under any fair assessment, was an open public meeting at American Legion Post 62 in Craig." Douglas hopes that "they will both acknowledge that excluding the press from Tuesday's meeting was wrong and take steps to make certain that it never happens again."

Meanwhile, the [Grand Junction Daily Sentinel](#) (1/24, 73K) reports that a spokesman for Jewell "noted Thursday that a Colorado newspaper had concluded there was no violation of Colorado Sunshine laws and also noted that the question of press access was high on the list of things considered by the Interior Department." Spokesman Blake Androff noted that The Craig Daily Press had "concluded on the advice of Colorado Press Association attorney Steve Zansberg that there had been no violation of Colorado's Sunshine laws." However, Daily Sentinel Publisher Jay Seaton disagreed. The article notes that "Zansberg dealt with whether a federal official must comply with Colorado open meetings law, and whether a meeting between a federal official and state or local officials must be open to the press." However, "the overriding questions...are whether a federal official has authority to close a noticed, public meeting that is required to be open under Colorado law and whether a federal official has authority to hold a hearing open to the public, yet selectively exclude members of the press."

America's Great Outdoors:

National Park Service:

MOUNTAIN LION KILLED ON ROAD IN SANTA MONICA MOUNTAINS. The [Los Angeles Times](#) (1/23, Stevens, 3.07M) reports that "a young mountain lion was struck by a car and killed earlier this week on Kanan Road in the Santa Monica Mountains," the NPS said Thursday. The animal was "not tagged, leading officials to believe that it is not one of the lions being tracked by the NPS." Officials said "the appearance of an untagged kitten suggests an untagged adult female mountain lion also is living in the mountains with a litter of kittens."

Also reporting on the story is the [AP](#) (1/24).

UNITED STATES MINT TO RELEASE GREAT SMOKY MOUNTAIN NATIONAL PARK QUARTER SOON. The [Knoxville \(TN\) News Sentinel](#) (1/24, Kilroy, 366K) reports that the United States Mint has "announced that they will be producing a Great Smoky Mountain National Park Quarter as part of the America the Beautiful Quarters Program." The coin will "depict a historic log cabin in a scene with a large forest and mountains in the distance." The United States Mint will join NPS officials and "hundreds of local area school-aged children for a ceremony at Mills Auditorium-Gatlinburg Convention Center on January 29."

PARK RANGER SHOOTING DETAILS TO REMAIN SEALED INDEFINITELY. The [Spokane \(WA\) Spokesman-Review](#) (1/24, 214K) reports that "investigative details in a September shooting by National Park Service rangers trying to break up a noisy houseboat party at a remote campground near Kettle Falls will remain sealed indefinitely by a federal court order." The NPS has "remained mum about which of its employees fired during a confrontation with Michael Sublie, who now faces two federal misdemeanor charges." According to the article, "in the run-up to his trial next month, Sublie will only be able to view 'investigative reports' in the presence of his lawyer and will be unable to share copies with anyone."

Bureau of Land Management:

BLM'S COLORADO GETS NEW LEADERSHIP. The [E&E Daily](#) (1/23) reports that the BLM's Colorado office is "undergoing another round of leadership changes, with no word on when a permanent director will be appointed to lead a state office that manages 8.4 million acres of public land and almost 29 million acres of subsurface mineral estate." John Mehlhoff, "the acting BLM Colorado state director since October and a 30-year agency employee, is leaving next month to take a senior position at the Interior Department's Office of Natural Resources Revenue in Denver." Mehlhoff will be "replaced as acting state director by Ruth Welch, who since early 2012 has served as director of BLM's National Operations Center in Denver."

Also reporting on the story is [Politico](#) (1/24, Guillen, 464K).

ADDITIONAL COVERAGE: GROUPS FILE SUIT IN EFFORT TO STOP LOGGING. Additional coverage of the lawsuit by two environmental groups to block logging on BLM land was provided by the [Salem \(OR\) Statesman Journal](#) (1/23, 104K), the [Clark County \(WA\) Columbian](#) (1/23, 116K), and the [Medford \(OR\) Mail Tribune](#) (1/23, 67K).

Fish and Wildlife Service:

FWS FINDS PURPLE LINE WON'T HARM TWO RARE CRUSTACEANS. The [Washington Post](#) (1/24, Shaver, 4.28M) reports that "after reexamining the impact a Purple Line could have on springs in Chevy Chase and Rock Creek Park," the FWS has "found that the light-rail line's construction would not harm an endangered species living nearby." According to the article, "the finding — outlined in a Jan. 7 letter to the Federal Transit Administration — could spark a lawsuit over Maryland's plan to build a 16-mile Purple Line between Montgomery and Prince George's counties." John M. Fitzgerald, an environmental lawyer, said "the nonprofit Center for Sustainable Economy and some Chevy Chase residents are preparing a 'notice of intent to sue.'"

FLINT HILLS NATIONAL WILDLIFE REFUGE ANNOUNCES CROP SHARE OPPORTUNITIES. The [Emporia \(KS\) Gazette](#) (1/24, 17K) reports that Flint Hills National Wildlife Refuge has "announced crop share opportunities to interested members of the public." The refuge has "1,192 acres of farm ground near Hartford available," and "the farm ground will be offered in six Farming Units through Cooperative Farming Agreements."

TEXAS COMPTROLLER ANNOUNCES PLAN TO SUPPORT RESEARCH ON THREE SPECIES. The [Houston Chronicle](#) (1/24, 2.26M) reports that Texas Comptroller Susan Combs on Thursday "announced plans to provide \$5 million for research on three species that could potentially be listed by the US Fish and Wildlife Service as endangered or threatened." Combs will "solicit research proposals from all Texas public universities before awarding the funding." According to the article, "based on recommendations of a science working group, the first species selected for research are: freshwater mussels (12 mussels total); the spot-tailed earless lizard; and the desert massasauga (a snake)."

Also reporting on the story is [KCIT-TV](#) Amarillo, TX (1/24, 428).

KANSAS SECRETARY OF STATE SEEKS TO END PRAIRIE CHICKEN PROTECTION. The [AP](#) (1/24) reports that Kansas Secretary of State Kris Kobach is supporting "a bill that would exclude the lesser prairie chicken from federal protection." Kobach told the Senate Natural Resources Committee on Thursday that the legislation "would likely lead to a legal battle that pits state rights against federal law." According to the article, "the bill would assert state sovereignty over nonmigratory wildlife and declare null and void any federal law in Kansas on

the lesser prairie chicken."

ANALYSIS TARGETS COMMERCIAL FISHING'S ROLE IN MANATEE DEATHS AND INJURIES. The [Tampa Bay \(FL\) Times](#) (1/24, 78K) reports that commercial fishermen in Florida can injure or kill fourteen manatees "every year without affecting the future" of the species, according to an analysis the FWS unveiled Thursday. But the FWS "says the annual average number of deaths and injuries due to commercial fishing is 99," and "that calculation doesn't include the record 829 manatees overall that died in 2013." However, "compared with everything else, commercial fishing's impact on the manatee population is 'pretty minimal,'" said Chuck Underwood, a spokesman for the FWS.

US Geological Survey:

STUDY SAYS NEW MADRID FAULT ZONE ALIVE AND ACTIVE. The [AP](#) (1/23) reports that "the New Madrid fault zone in the nation's midsection is active and could spawn future large earthquakes, scientists reported Thursday." USGS seismologist Susan Hough, "who was part of the study published online by the journal Science," and USGS geophysicist Morgan Page "analyzed past quakes in the New Madrid region and used computer modeling to determine that the continuing tremors are not related to the big quakes two centuries ago." Hough said, "Our new results tell us that something is going on there, and therefore a repeat of the 1811-1812 sequence is possible."

Securing America's Energy Future:

Renewable Energy:

NEW EAGLE POLICY FACES BLOWBACK. The [National Journal](#) (1/24, Subscription Publication, 427K) reports that "an ongoing battle over an Interior Department rule-making that allows wind-energy producers to kill bald and golden eagles without prosecution has created a rift between environmental advocates and the wind industry." David Yarnold, president and CEO of the National Audubon Society, said, "We're between a rock and a hard place. We support a move away from fossil fuels, but there's no question that this issue has strained our relationship with the wind industry." However, "contrary to what some environmentalists say, FWS insists that the permitting process actually works to protect wildlife." David Cottingham, senior adviser to the director of the service., said, "We're not going to issue a permit unless we think there's an overall conservation value."

Additional coverage of the rule was provided by the [Watertown \(NY\) Daily Times](#) (1/24, 63K).

Onshore Energy Development:

BLM ASKED AGAIN TO EXTEND CONTESTED LEASES IN COLORADO'S THOMPSON DIVIDE. The [E&E Daily](#) (1/23) reports that a second company is requesting that the BLM "extend for the second time in less than a year the expiration date of a group of contested oil and natural gas leases in west-central Colorado's pristine Thompson Divide." Ursa Resources Group "submitted a six-page letter to BLM's Colorado State Office formally requesting an additional two-year extension of seven leases the company owns inside the 221,000-acre Thompson Divide." The submission follows a request by SG Interests last week for "a second extension on its 18 leases in a letter to BLM Colorado officials."

Also reporting on the story are the [Grand Junction Daily Sentinel](#) (1/24, 73K) and the [Aspen \(CO\) Times](#) (1/24, 46K).

SPORTSMEN WARY OF FOSSIL FUEL DEVELOPMENT IN SOUTHWEST WYOMING MOUNTAINS. The [Casper \(WY\) Star-Tribune](#) (1/24, 90K) reports that "about 100 hunters, anglers, politicians, ranchers and recreationists" attended a BLM open house Tuesday night in Rock Springs to learn more about potential energy development in the greater Little Mountain area. Sportsmen's and conservation groups are concerned that "if development starts without a clear plan for the future, one of southwest Wyoming's most naturally diverse areas could suffer death by a thousand cuts."

VIRGINIA LEGISLATORS ARGUE FOR END TO "WAR ON COAL." In an op-ed in the [Richmond \(VA\) Times-Dispatch](#) (1/24, Kilgore, Puckett, 333K), Virginia House Del. Terry Kilgore and state Sen. Phil Puckett blast the Obama Administration's 'war on coal,' saying that the Administration has harmed the state's economy while wasting "billions of taxpayer dollars on wind and solar projects." The two say that the EPA's "draconian caps on carbon emissions" will make it "impossible to build any new coal plants in the U.S. for the foreseeable future," threatening the jobs of coal miners and coal industry workers in the state and "putting an enormous strain on our nation's energy supply." Kilgore and Puckett argue for "a sensible energy policy that strikes an appropriate balance between traditional and renewable energy sources" and includes coal-fired generation and nuclear power. The op-ed concludes, "we cannot afford to eliminate coal as a part of our energy mix. Doing so will only lead us down the road to energy poverty."

RESPONSIBILITY OF FRACKING FOR TEXAS EARTHQUAKES EXAMINED. [Fortune](#) (1/24, Elkind, 2.51M) examines whether fracking is causing earthquakes around the town of Azle in rural Texas. Fortune says that since November 1, "more than 30 small temblors have struck" and "many residents are blaming the quakes on underground disposal wells, used to get rid of wastewater generated during the fracking and production process." The piece suggests that the evidence points to fracking being at fault, but that it is not yet certain.

Offshore Energy Development:

SEN. BEGICH CONFIDENT ON PROSPECTS OF ARCTIC DRILLING THIS SUMMER. The [FuelFix](#) (1/23, 7K) reports that Sen. Mark Begich is "optimistic that a federal court ruling against the government's handling of offshore drilling leases won't stop oil drilling in Arctic waters this summer." Begich said, "I remain confident that we will see continued safe exploration in the Arctic this summer. The Arctic has already been and will continue to be subjected to unprecedented safety standards and (this) announcement does not delay the important progress we have made." Begich also said he's "optimistic that we will see safe, responsible development in the Arctic this summer."

Also covering the ruling is [CNN](#) (1/23, Smith, 14.53M), the [Bloomberg BusinessWeek](#) (1/24, 4.93M), [Reuters](#) (1/24), the [Raw Story](#) (1/23, 70K), the [Summit County \(CO\) Citizens Voice](#) (1/23, 506), the [Offshore Engineer](#) (1/24), and [KTOO-FM](#) Juneau, AK (1/23).

EX-BP ENGINEER'S ATTORNEY SEEK TO FORCE JUDGE'S RECUSAL. The [E&E Daily](#) (1/23) reports lawyers for "an ex-BP PLC engineer who was convicted of interfering with an investigation into the 2010 Gulf of Mexico oil spill are petitioning to disqualify the federal judge who presided over the trial." Kurt Mix's attorneys "argue that US District Judge Stanwood Duval Jr. must recuse himself because a spill-related civil claim was filed last year on his behalf." According to the article, "in 2012, Duval said he told lawyers on both sides that he was entitled to seek compensation from BP because his family owns a beachfront home in Grand Isle, La., and that he didn't see a reason to recuse himself from the Mix case."

Tackling America's Water Challenges:

BOR RELEASES DOCUMENTS ON PATTERSON-TO-WESTLANDS WATER TRANSFER. The [Fresno \(CA\) Business Journal](#) (1/24, 160K) reports that the BOR has "released environmental documents on a requested water transfer of 1,500 acre-feet of water from Patterson Irrigation District north of Los Banos to Westlands Water District in Fresno." Comments are being received "for the environmental documents and if approved, Westlands Water District would take delivery of the water no later than Feb. 28 of this year."

BOR, COLORADO OFFICIALS EXAMINE RECREATION ISSUES AT LAKE PUEBLO STATE PARK. The [Pueblo \(CO\) Chieftain](#) (1/24, 94K) reports that the BOR and Colorado Parks and Wildlife are "researching the best uses for Lake Pueblo State Park." According to the article, "comments on the resource management plan for Lake Pueblo will be accepted until Feb. 21." Kara Lamb, spokeswoman for the BOR, said, "We'll take the feedback we get tonight and in the next month, and use that data to develop a resource management plan."

SMALL FIRE AT SHASTA DAM EXTINGUISHED. The [Redding \(CA\) Record-Searchlight](#) (1/23, 92K) reports that firefighters on Thursday "extinguished a small blaze that broke out on the temperature control device on the face of Shasta Dam." According to the article, "driftwood had accumulated and become stuck in some equipment on

the device, sparking the fire."

ADDITIONAL COVERAGE OF CALIFORNIA DROUGHT RELIEF EFFORTS. Additional coverage of a proposal to ship more water out of the Delta and temporarily block plans to restore the San Joaquin River was provided by the [Sierra \(CA\) Sun Times](#) (1/24), the [Stockton \(CA\) Record](#) (1/23, 123K), the [San Jose \(CA\) Mercury News](#) (1/24, 731K), the [Columbus \(OH\) Dispatch](#) (1/23, 609K), [KMJ-AM](#) Fresno, CA (1/24, 13K), [KMPH-TV](#) Fresno, CA (1/24, 3K), and [KPBS-TV](#) San Diego (1/23, 14K).

ADDITIONAL COVERAGE OF BAY DELTA CONSERVATION PLAN. Additional coverage of the Bay Delta Conservation Plan was provided by the [Redding \(CA\) Record-Searchlight](#) (1/23, 92K).

Empowering Native American Communities:

FEDERAL RECOGNITION PROCESS CRITICIZED. The [Indian Country Today Media Network](#) (1/23, 21K) reports that the BIA's Federal Acknowledgment Process (FAP) has "been described as broken, long, expensive, burdensome, intrusive, unfair, arbitrary and capricious, less than transparent, unpredictable, and subject to undue political influence and manipulation." According to indigenous leaders and others involved in recognition efforts, "it reflects a culture of neglect on the part of the federal government." In light of this criticism, "on January 16 and 17 close to 200 tribal leaders and representatives of both federally recognized and 'unrecognized' indigenous nations, attorneys and consultants specializing in the FAP, and federal officials gathered at Arizona State University's Sandra Day O'Connor College of Law for a unique conference called 'Who Decides You're Real? Fixing the Federal Recognition Process.'"

NORTHERN ARAPAHO TRIBE URGES EPA TO REJECT WYOMING LAND REQUEST. The [E&E Daily](#) (1/23) reports that the Northern Arapaho Tribe is asking the EPA to reject "Wyoming's petition to reconsider an agency decision to leave 1 million acres of land around Riverton under Indian Country domain." Attorneys for the tribe "told federal officials that the state's request was full of errors and misconceptions." The tribe's lawyers told EPA, "Worse yet, the letter manufactures mythical consequences for local communities that appear to be designed to inflame racial division and conflict."

Also reporting on the story is the [Riverton \(WY\) Ranger](#) (1/24, 167).

BIA APPROVES ROAD REPAIR FUNDING FOR SUGAR ISLAND. The [Sault Ste. Marie \(MI\) Evening News](#) (1/23, 17K) reports that the BIA has approved the Sault Ste. Marie Tribe of Chippewa Indians "up to \$820,000 in Emergency Relief funds to help the Chippewa County Road Commission repair Sugar Island roads damaged by flooding in the natural disaster last September."

APPEALS COURT'S DECISION ENDS CASINO PLANS BY BIG LAGOON RANCHERIA. The [Eureka \(CA\) Times Standard](#) (1/24, 76K) reports that the Big Lagoon Rancheria will not be constructing its Big Lagoon Casino and hotel "as planned after the 9th US Circuit Court of Appeals found that acres owned by the rancheria were not considered 'Indian lands,' according to the Tuesday court decision." The article notes that "the 11-acre parcel of land set to house the new casino was purchased by the Bureau of Indian Affairs 'in trust' for Big Lagoon in 1994." However, "according to the three-judge panel, the bureau only had the authority to purchase lands in trust for tribes who were placed under federal jurisdiction before 1934."

Also providing coverage is the [Humboldt Beacon](#) (1/24, 13K).

Top National News:

OBAMA DISAGREES WITH PRIVACY BOARD'S ASSESSMENT OF LEGALITY OF NSA PROGRAM.

Coverage of the Privacy and Civil Liberties Oversight Board's report on the National Security Agency's telephone records program says that while the board has no authority to alter policy, its recommendation that the program be abandoned puts further pressure on President Obama and Congress to make changes beyond what the President announced last week. However, several reports note that the five-member panel adopted the report on a 3-2 vote, saying that this is another indication of how divisive the program is within the Federal government and intelligence community, and the White House was quick to say that Obama disagrees with the board's

conclusion that the data-gathering is illegal.

While every major newspaper except for the New York Times, which had an advance report in its Thursday edition, covers the release of the report, only one of the three broadcast networks did. ABC World News (1/23, story 3, 0:55, Muir, 7.43M) reported on the "major development" of "a damaging new report: a government panel calling" the records program "both illegal and ineffective." ABC (Karl) added, "They say flatly it is illegal and they directly contradict the President on how effective it has been. Just this last year, the President said that this program was saving lives. ... But look at what this report says. It says, 'We have not identified a single instance involving a threat to the United States in which the program has made a concrete difference.'"

The AP (1/24, Braun) reports that in the 234-page report, the panel warned that the NSA's "daily collection of Americans' phone records is illegal" and recommended that President Obama "abandon the program and destroy the hundreds of millions of phone records it has already collected." Two of the board's five members, "former Bush administration national security lawyers," dissented.

Bloomberg News (1/23, Talev, Strohm, 1.91M) says the "divided" board's conclusions "present a challenge" for Obama, "who is being pressed by phone and Internet companies, foreign governments, civil libertarians and some members of Congress to restructure the NSA's surveillance activities." While the panel "has no authority to change the programs," by "questioning the program's legality, the panel may give ammunition to critics in Congress and fuel legal challenges." Reuters (1/24, Selyukh) also says the report could put pressure on Obama and Congress to revise the programs, while Politico (1/24, Romm, 464K) also says the "recommendation adds to pressure" on Obama.

USA Today (1/24, Johnson, 5.82M) says the report is "yet another challenge to the legitimacy of the National Security Agency program." But the two Bush Administration Justice Department officials on the panel said "they believed the program was supported by the law and had been reauthorized repeatedly" by the Foreign Intelligence Surveillance Court.

The Washington Post (1/24, Nakashima, 4.28M) reports that the White House said President Obama "disagrees" with the "independent watchdog group's conclusion" that the data-gathering program is illegal. White House Press Secretary Jay Carney said, "We simply disagree with the board's analysis on the legality of the program." Carney "cited two federal court rulings that upheld the program's constitutionality, as well as the findings of at least 15 judges on the Foreign Intelligence Surveillance Court over the past seven years."

The Los Angeles Times (1/24, Dilanian, 3.07M) says "critics" of the program and the President's policy "got a boost" from the assessment, but the dissents reflect the "larger disagreements in Congress and the public" and help to "explain why Obama gave mixed messages about what he called 'the program that has generated the most controversy these past few months.'"

While most of the coverage focused on the call for the end to data collection, the Wall Street Journal (1/24, Favole, Gorman, Subscription Publication, 5.91M) notes that the panel also recommended a reduction in the length of time telephone databases are kept from five years to three, and that the government require the NSA to seek Foreign Intelligence Surveillance Court approval before phone data searches.

McClatchy (1/24, 95K) said the board "has been a backstage voice in the nationwide debate" over the surveillance programs. The Washington Times (1/24, Dinan, 417K) says "the board's ruling now joins with the author of the Patriot Act, a federal district court in Washington, D.C., and President Obama's own internal review board in concluding that the NSA program violates the law and could even be unconstitutional."

The Hill (1/24, Hattem, 194K) reports in its "Hillicon Valley" blog that Senate Judiciary Chairman Patrick Leahy said "the board's determinations 'add to the growing chorus calling for an end to the government's dragnet collection of Americans' phone records.'"

Time (1/24, Rayman, 21.77M) reports on its website that the report "goes a step farther than last month's report from a panel" appointed by the "in rejecting the option to move bulk data out of the hands of the government and requiring communication providers or a third party to hold the data." The Christian Science Monitor (1/24, Clayton, 540K) and The Guardian (UK) (1/24, Roberts, 1.59M) also have reports.

Podesta Working Group Will Review "Big Data" Collection, Use. The Los Angeles Times (1/24, Parsons, 3.07M) reports Counselor to the President John Podesta "took on a new role Thursday as the administration's 'big data' point person, launching a sweeping review of how the government and businesses use large caches of personal information – and what effect that has on privacy." Podesta "said he would spend the next 90 days looking at the way personal data are collected, stored and analyzed." His working group includes Commerce Secretary Pritzker and White House Office of Science and Technology Policy Director John Holdren.

More Commentary. The New York Times (1/24, Subscription Publication, 9.61M) editorializes, "Once again, a thorough and independent analysis of the government's dragnet surveillance of Americans' phone records has found the bulk data collection to be illegal and probably unconstitutional," and "virtually useless at stopping terrorism." The Times says this raises "the obvious question: Why does President Obama insist on continuing a costly, legally dubious program when his own appointees repeatedly find that it doesn't work?"

Kim Strassel writes in her Wall Street Journal (1/24, Subscription Publication, 5.91M) column that the biggest impediment to improving intelligence is Congress, which forced its way into intelligence oversight in the 1970s and has failed to do the job properly or to resist using intelligence oversight as a political weapon. Strassel says the nation should be debating whether Congress' role in intelligence oversight should continue.

SOTU EXPECTED TO HIGHLIGHT MINIMUM WAGE, IMMIGRATION. USA Today (1/24, Madhani, 5.82M) reports that when President Obama delivers his State of the Union Address on Tuesday, "expect him to endorse gradually raising the minimum wage and offer a gentle plea to Republicans for cooperation on an immigration deal." The President's team has "signaled in conversations with Democratic lawmakers and other allies their hopes to use the speech to offer a mix of big bets and pragmatic outreach to Republicans" as he lays out his priorities. USA Today says that "perhaps highest" on his priority list is "brokering a long-elusive deal to overhaul the nation's immigration laws."

The New York Times (1/24, Calmes, Subscription Publication, 9.61M) says that the President "has an opening" with his SOTU to "advance his argument to Congress that the rising inequality of economic opportunities is America's 'defining challenge of our time.'" Among the President's proposals, which "have so far been blocked" by the GOP: "a higher minimum wage, as a quick fix to raise incomes, and universal free prekindergarten for all 4-year-olds, to help more children realize their potential over time."

McMorris Rodgers To Give GOP Response To SOTU. USA Today (1/24, Camia, 5.82M) reports that Rep. Cathy McMorris Rodgers (R-WA), "the highest-ranking woman in the House GOP leadership," will deliver the official Republican response to the President's State of the Union Address. She is chair of the House Republican Conference, and her "assignment was announced Thursday" by House Speaker Boehner and Senate Minority Leader McConnell.

Roll Call (1/24, Newhauser, Subscription Publication, 87K) reports that with the Democrats looking to "make hay of income inequality and how government policies can help the middle class," McMorris Rodgers will deliver the Republican "side of the narrative, focusing on self-determination and small government." Boehner said in a statement that McMorris Rodgers is "proof that with humility, hard work and dedication, you can overcome any obstacle – a story to which many Americans can relate."

Reuters (1/24, Cowan) reports McMorris Rodgers has established a solidly conservative voting record and is also the only woman to give birth to three children while in Congress.

THURSDAY'S ECONOMIC DATA CONTAINS FEW SURPRISES. There was little significant news in Thursday's economic data. In the weekly reports, jobless claims, mortgage rates, and consumer confidence were little changed. On the housing front, existing home sales rebounded from five months of declines, notching a small increase, while home prices were up only slightly. Despite this, the markets faced a significant sell-off as concern rose about the state of the Chinese economy.

Existing Home Sales Resumed Growth In December. Bloomberg News (1/24, Woellert, Stilwell, 1.91M) reports that sales of existing homes rose in December for "the first time in five months," making 2013 the "best year since 2006" and showing that the market is beginning to adjust to higher mortgage rates. December sales

rose 1% to a 4.87 million unit annual rate, according to data released by the National Association of Realtors on Thursday. Bloomberg says that a total of 5.09 existing homes were sold in 2013, up from 4.66 million in 2012.

Home Prices Ticked Up Only Slightly In November. Bloomberg News (1/24, Gopal, 1.91M) reports that housing prices rose 0.1% in November, the "smallest monthly gain in almost two years." The data, released by the Federal Housing Finance Agency, indicates the "real estate recovery may be losing strength." Economists surveyed by Bloomberg expected prices to rise 0.4% in November. Over the previous 12 months, prices were up 7.6%.

Mortgage Rates Edged Down This Week. Bloomberg News (1/23, Gopal, 1.91M) reports that mortgage rates fell this week, "decreasing borrowing costs for homebuyers as investors weighed whether the economy is strong enough for the Federal Reserve to make more cuts to its stimulus." According to data released Thursday by Freddie Mac, the average rate for a 30-year fixed mortgage fell to 4.39% from 4.41% the prior week. The average rate on a 15-year loan fell to 3.44% from 3.45%.

The AP (1/23) reports that rates "have risen about a full percentage point since hitting record lows roughly a year ago." The increase was driven by "speculation" that the Fed would cut its bond-buying program, something that began in December.

Jobless Claims Remain Relatively Low. Bloomberg News (1/23, Jamrisko, Woellert, 1.91M) reports that first-time claims for jobless benefits fell 1,000 for the week ending January 18 to 326,000, according to data released Thursday by the Department of Labor. Economists surveyed by Bloomberg expected claims to come in at 330,000. The level of claims "held near a six-week low, showing firings remain muted following the holidays." The four-week moving average, which irons out week-to-week volatility, fell 3,750 to 331,500, the lowest level since late November.

The AP (1/24) says that claims are at "a level consistent with steady job gains." However, the report contained one "sour note:" almost 1.4 million Americans "who have been unemployed longer than six months lost benefits in the week that ended Jan. 4, the latest period for which figures are available."

Consumer Confidence Unchanged Last Week. Bloomberg News (1/23, Peralta, 1.91M) reports that the Bloomberg Consumer Comfort Index was "little changed last week at a one-month low as Americans confronted having to pay holiday bills." The index held at minus 31 for the four-week period ending January 19. A "drop in the buying-climate gauge that sent it to a two-month low was offset by rebounding attitudes on the current state of the economy."

Disappointing Chinese Data Triggers Market Decline. The Wall Street Journal (1/24, Kilgore, Subscription Publication, 5.91M) reports that US stock markets fell sharply on Thursday, driven downward by weak economic numbers from China with raised investors' concerns. The Dow Jones Industrial Average fell 175.99 points to 16197.35, while the S&P 500 fell 16.40 points to 1828.46. The Nasdaq Composite Index, meanwhile, fell 24.13 points to 4218.87.

Bitter Temperatures Leading To Higher Heating Bills. USA Today (1/24, Strauss, 5.82M) reports that "bitter cold" is has been enveloping much of the nation for the last month, so "millions of people with skyrocketing utility bills are likely to see another spike this month and next." The Energy Information Administration "have some home heating bills rising as much as 23.5%," and even that "may be low." For example, propane, the primary heat source for "8 million homes and businesses," rose almost a \$1 to \$4.37 a gallon on Thursday "at one of the nation's prime trading hubs."

Editorial Wrap-Up:

NEW YORK TIMES. "End The Phone Data Sweeps." The New York Times (1/24, Subscription Publication, 9.61M) editorializes, "Once again, a thorough and independent analysis of the government's dragnet surveillance of Americans' phone records has found the bulk data collection to be illegal and probably unconstitutional," and "virtually useless at stopping terrorism." The Times says this raises "the obvious question: Why does President Obama insist on continuing a costly, legally dubious program when his own appointees repeatedly find that it

doesn't work?"

"Even More Addictive Cigarettes." In an editorial, the *New York Times* (1/24, Subscription Publication, 9.61M) says regulators should provide a "strong response" to the recent surgeon general's report that says change in cigarettes design results in a higher risk to smokers and make them more addictive. According to the Times, the report, published in *Nicotine and Tobacco Research*, found that while the content of nicotine remains the same, the new cigarette designs increase the efficiency of delivering nicotine to the smoker. The Times says "regulators will need to find ways to block the designs, ingredients and marketing strategies that increase the amount of nicotine taken in by smokers."

"Progress On Predatory Lending." In an editorial, the *New York Times* (1/24, Subscription Publication, 9.61M) argues "rules issued in November to stop banks from emulating predatory payday lenders have yielded promising results." The rules issued by the FDIC and Office of the Comptroller of the Currency have led to several banks discontinuing "'deposit advance' loans that are specifically designed to trap people in debt." According to the Times, "consumers will remain vulnerable to versions of the debt trap until another agency, the Consumer Financial Protection Bureau, issues rules of its own to protect consumers of small loans from excessive and unaffordable costs." The Times suggests adopting recent suggestions by the Pew Charitable Trusts' Safe Small-Dollar Loans Research Project to "limit monthly loan payments to 5 percent of the borrowers' pretax income, spread the costs of fees and interest over the life of the loan and require clear disclosure of all costs."

"Quick Work On Paid Sick Leave." In an editorial, the *New York Times* (1/24, Subscription Publication, 9.61M) says New York Mayor Bill de Blasio and City Council Speaker Melissa Mark-Viverito proposed to revise the city's law on paid sick leave is "broader" and "better" than the bill passed last year on the same subject. According to the Times, the newly proposed bill applies to companies with five or more workers, rather than 20, which impacts "360,000 more people than the existing law." The Times says the new bill also "eliminates the current law's 18-month phase-in period and a trigger to delay implementation if the economy lags." According to the Times, the bill highlights a shift by the "city's political center of gravity has shifted toward working families and the poor."

WASHINGTON POST. ***"Rich People's Republic."*** In an editorial, the *Washington Post* (1/24, 4.28M) says China's communist leaders should consider "activists like Xu Zhiyong as allies in their effort to reform the country's economy, root out corruption and create a more representative and sustainable political system." The Post notes that rather than viewing Xu's New Citizens Movement "as constructive, the regime of Xi Jinping is 'terrified' of it. As Mr. Xu told a court." According to the Post, the recent report about leaders' offshore accounts might highlight why China's leaders are afraid. The Post argues the "persecution" of Xu shows Xi "mainly intends to protect what has become a massive network of official corruption."

"Contempt For Poor Kids." In an editorial, the *Washington Post* (1/24, 4.28M) says some of Virginia's "biggest school districts, particularly in Northern Virginia, have been slow of the mark" in enabling poor children to attend pre-kindergarten. The Post notes that Virginia has "made strides" overall in this area, and the classes "are widely credited with improving learning skills, including reading readiness." According to the Post, Prince William County is the "worst laggard, by far," because it "has managed to find funding for just 4 percent of the eligible 4-year-olds under a state-subsidized program." The Post argues that the county is "ignoring those eligible poor children – more than two-thirds of them minorities" and "turning its back on more than \$6 million in state funding."

"Allow Room For Snow In School Calendars."

WALL STREET JOURNAL. ***"The Apple Inquisition."*** The *Wall Street Journal* (1/24, Subscription Publication, 5.91M) editorializes that a decision by the Second Circuit Court of Appeals temporarily suspending court-appointed Apple antitrust compliance monitor Michael Bromwich is a rebuke to prosecutorial overreach in the Justice Department's case against Apple's e-book pricing. The Journal contends that Bromwich has sought privileged documents and interviews with Apple officials and board members who have nothing to do with the case, and urges the court to remove Bromwich as monitor.

"Reckoning In Caracas." In an editorial, the *Wall Street Journal* (1/24, Subscription Publication, 5.91M) says that Venezuela's bonds suffered on Wednesday based on news of the devaluation of the bolivar and blames the country's socialist system for its current financial troubles. The Journal notes Economy Vice-President Rafael Ramirez said the country's central bank will no longer sell dollars to airlines or travelers at the official exchange

rate. The Journal highlights the central bank holds less money in reserves than a year ago, and half is in gold; therefore, a large devaluation combined with price controls will drive many importers out of business and lead to more shortages.

"Whistling Past The Wind Farm." In an editorial, the Wall Street Journal (1/24, Subscription Publication, 5.91M) argues the US should learn from Europe's recent decision to abandon country-by-country targets for greenhouse-gas emissions. According to the Journal, Europe made this decision because the attempt to greatly reduce emissions also damaged the economy. The Journal says that European leaders believe America's shale natural gas boom gives the US an energy cost advantage and many European countries are shifting production to the US in an effort to remain competitive. The Journal also notes the increase in fracking has also greatly reduced US carbon emissions, because coal power plants were replaced by less expensive natural gas.

COMMITTEE MEETINGS

SMALL BUSINESS – FIELD HEARING – 2 p.m. Subcommittee on Economic Growth, Tax and Capital Access – Field Hearing in South Carolina: Getting Rural America Back to Work: Solutions to Lower Unemployment. Location: Dillon Wellness Center, Multi-Purpose Room, 1647 Commerce Drive, Dillon, South Carolina. 29536. Other: 2014 NSA/MCSA WINTER CONFERENCE. – Jan. 20 – 25. The National Sheriffs Association and the Major County Sheriffs' Association host the 2014 NSA/MCSA Winter Conference. Highlights: 9 a.m. Director James B. Comey, Federal Bureau of Investigation (FBI). Location: J. W. Marriott Hotel, 1331 Pennsylvania Ave. NW. Contacts: 800-424-7827. Notes: MCSA (Major County Sheriffs' Association) meetings and functions will be held on Jan. 20-22, prior to the official start of the NSA Winter Conference.

REPUBLICAN NATIONAL COMMITTEE – Jan. 22 – 24. Annual winter meeting. The theme for the week is "Building To Victory." Highlights: 10 a.m. General Session – Open Press. Includes remarks by RNC Chairman Reince Priebus. 12:30 p.m. Lunch with Tim Scott – Open Press. 2 p.m. Strategic Initiatives Press Conference – Open Press. Location: Renaissance Washington Hotel, 999 9th St. NW. Notes: RSVP to Jillian Rogers at jrogers@mchq.org or 954-829-5988

US CONFERENCE OF MAYORS – Jan. 22 – 24. The 82nd Winter Meeting. More than 280 of the nation's

mayors will convene to meet with congressional leaders and Administration officials and to urge Congress "to continue to work in a bipartisan fashion to spur job creation and economic growth in America's cities and metropolitan areas." Highlights: 11:30 a.m. Homeland Security Secretary Jeh Johnson delivers remarks. Open press. Contact: DHS Press Office, 202-282-8010. Location: Capitol Hilton, 16th and K Streets NW. Contacts: Elena Temple, etemple@usmayors.org, 202-286-1100. Karen Hinton, Karen@hintoncommunications.com, 703-798-3109. Lina Garcia, lgarcia@usmayors.org, 202-341-6113

FAMILIES USA CONFERENCE – Jan. 23 – 25. Hundreds of healthcare experts, advocates and professionals from around the nation come together for Families USA's annual conference. Health Action 2014 will be the 19th edition of this annual gathering of healthcare professionals. Location: Hyatt Regency on Capitol Hill, 400 New Jersey Ave. NW. Contacts: Dave Lemmon, Bob Meissner, Bryan Fisher, 202-628-3030

CHRONIC FATIGUE SYNDROME – 9 a.m. Press conference to increase awareness on Chronic Fatigue Syndrome. Speakers: Dr. Andreas Kogelnik, director, the Open Medicine Institute, Mountain View, CA, expert on molecular medicine and chronic disease, and supporter of the medical internship program for Chronic Fatigue Syndrome; Ryan Prior, patient and creator of the Blue Ribbon Foundation, based in Atlanta, GA, which will manage and coordinate the medical intern program. Facilitator: Llewellyn King, executive producer and host, "White House Chronicle" on PBS, and columnist, Hearst-New York Times Syndicate. For more information, call Llewellyn King at (202) 441-2702. To arrange a broadcast interview with either Ryan Prior or Dr. Andreas Kogelnik, email Llewellyn King at lking@kingpublishing.com. Location: The National Press Club, 529 14th St., NW.

CSIS – FRENCH DEFENSE MINISTER – 9:30 a.m. – 10:30 a.m. The Center for Strategic & International Studies (CSIS) Europe Program will host French Minister of Defense Jean-Yves Le Drian to discuss France's role in NATO and recent security challenges in Mali and the Central African Republic. Location: 1616 Rhode Island Avenue, NW. Contacts: H. Andrew Schwartz (aschwartz@csis.org), 202-775-3242

NATURALIZATION CEREMONY – 10 a.m. Associate Attorney General Tony West will deliver remarks at a special naturalization ceremony for more than 400 citizenship candidates. Secretary of Homeland Security Jeh Johnson will administer the Oath of Allegiance and deliver remarks. Location: Northern Virginia Community College, Rachel Schlesinger Concert Hall, 3001 North Beauregard St., Alexandria, Va. Notes: Press inquiries regarding logistics should be directed to the Dan Cosgrove of the Office of Communications at 202-604-9839. Credentialed media planning to attend must RSVP to Joanne Ferreira at Joanne.M.Ferreira@uscis.dhs.gov or 202.272.8114 no later than 5 p.m., Thursday, Jan. 23.

CAP – EXPENSIVE MEDICINE – 10 a.m. – 11:30 a.m. "High-Priced Drugs and Medical Devices: Do They Provide Added Benefit?" Featured speaker: Joe Selby, M.D., M.P.H., Executive Director, Patient-Centered Outcomes Research Institute (PCORI). Panelists: Ezekiel Emanuel, M.D. Ph.D., Senior Fellow, Center for American Progress; Vice Provost, University of Pennsylvania; Peter Bach, M.D., Attending Physician, Memorial Sloan Kettering Cancer Center; Sergio Viroslav, M.D., Orthopedic Surgeon, Baptist Medical Center. Location: Center for American Progress, 1333 H St. NW, 10th Floor.

STATE OF CLIMATE ACTION – 11 a.m. Former EPA Administrator and Center for American Progress Distinguished Senior Fellow Carol M. Browner and League of Conservation Voters President Gene Karpinski will look back on 2013 and look ahead at the state of climate action in 2014 during a tele-press conference. The two will discuss the progress made with the Administration's Climate Action Plan, milestones in 2014, and the upcoming elections. Contacts: Benton Strong, bentonstrongcac@gmail.com, 202-650-0287. Noreen Nielsen (Center for American Progress), 202-478-6346. Notes: Dial-In Info: 855-508-8964. Conference ID: 47039288

NASA – ROSETTA COMET MISSION – 12 p.m. NASA will host a media teleconference to discuss the road ahead for the three US science instruments, as well as other NASA support, that are part of the European Space Agency's (ESA) Rosetta mission. James Green, director of planetary science, NASA Headquarters, Washington; -Mark McCaughrean, ESA senior scientific advisor, Noordwijk, Netherlands; Matthew Taylor, ESA Rosetta project scientist, Noordwijk; -Claudia Alexander, US Rosetta project scientist, Jet Propulsion Laboratory (JPL), Pasadena, Calif.; Art Chmielewski, US Rosetta project manager, JPL. Notes: To participate by phone, reporters must send an email providing name, media affiliation and telephone number to Dwayne Brown at dwayne.c.brown@nasa.gov or call Brown at 202-358-1726 by 11:45 a.m. Friday.

ALLIANCE FOR HEALTH REFORM – MEDICARE – 12:15 p.m. – 2 p.m. "Beyond the SGR (Sustainable Growth Rate): Alternative Models." With Gail Wilensky, senior fellow, Project HOPE, who will discuss her recent paper on developing a viable alternative to the SGR; David Share, senior vice president, Blue Cross Blue Shield of Michigan, who will describe his health plan's incentive program for physicians that bases payments on value; Mark McClellan, senior fellow and director of the Healthcare Innovation and Value Initiative, Brookings Institution, who will assess various payment models for physicians. Location: G-50 Dirksen. Contacts: Marilyn Serafini, mserafini@allhealth.org, 202-789-2300

IMMIGRATION REFORM – BLOOMBERG, JOHNSON, GUTIERREZ, SNYDER – 1:30 p.m. The US Chambers Senior Vice President of Labor, Immigration, & Employee Benefits Randy Johnson will join Michigan Governor Rick Snyder, former New York City Mayor Michael Bloomberg, and former Secretary Carlos Gutierrez for a panel discussion to make the economic case for passing immigration reform in 2014. Location: National Press Club, Murrow Room, 529 14th St NW, 13th Floor. Contacts: Blair Latoff Holmes bholmes@uschamber.com

PENTAGON – FRANCE – 2 p.m. Secretary of Defense Chuck Hagel hosts an honor cordon to welcome France's Minister of Defense Jean-Yves Le Drian to the Pentagon. The cordon will be held on the steps of the Pentagon River Entrance. Secretary Hagel and Minister Le Drian will conduct a press conference at 3 p.m. in the Pentagon Press Briefing Room (2E973). Notes: Journalists without a Pentagon building pass will be picked up at the Pentagon River Parking Pedestrian Bridge only. Plan to arrive no later than 30 minutes prior to the event; have proof of affiliation and two forms of photo identification. Please call 703-697-5131 for escort to the cordon.

PENTAGON – AIR FORCE SECRETARY – 4:15 p.m. Secretary of Defense Chuck Hagel delivers remarks at Secretary of the Air Force Deborah Lee James' swearing-in ceremony in the Pentagon Auditorium (BH-650). Notes: Journalists without a Pentagon building pass will be picked up at the Pentagon River Parking Pedestrian Bridge only. Plan to arrive no later than 45 minutes prior to the event; have proof of affiliation and two forms of photo identification. Please call 703-697-5131 for escort to the ceremony.

Last Laughs:

LATE NIGHT POLITICAL HUMOR.

Jay Leno: "Well, in an interview...with the 'New Yorker,' President Obama said marijuana is no more dangerous than alcohol. But doctors warn that pot smoking impairs young peoples' thinking, which, of course, makes them more likely to sign up for Obamacare."

Jay Leno: "In a letter to Congress, Treasury Secretary Jack Lew said the US is about to exhaust its borrowing authority and we have to raise the debt ceiling. First of all, why are we calling it a debt ceiling? Is there a ceiling anymore? Aren't we looking at the sky at this point, really? Isn't this the debt is the sky limit? The ceiling disappeared years ago. Just call it the debt sky."

Jay Leno: "Well, in his State of the State Address, California Governor Jerry Brown said California has experienced a big comeback. He said, once again, California is a state worth illegally sneaking into."

Jay Leno: "Oh, and this week, in his inaugural address, the New Jersey Governor Chris Christie said...well he spoke of wanting to bring the people of Jersey together. He wanted to bring them together by having them all trying to merge into one lane. That was the idea. Just try to make them...they would all merge into one lane."

Jay Leno: "It is so cold, Virginia Governor Bob McDonald is talking to the Feds, just so he can stay in hot water. That's how cold it is."

Jay Leno: "Well, this is a huge story. Ex-Virginia Governor Bob McDonald and his wife were indicted by a Federal grand jury on charges of accepting more than \$160,000 in loans and gifts in exchange for helping political patrons. Now, I know that's illegal, but isn't it kind of nice to see a politician doing something with his wife for a change? At least they're stealing together, right? You rarely see that anymore. It is nice to see."

Conan O'Brien: "A top Republican said Chris Christie should resign as chair of the Republican Governors Association. Yeah, he refused. He said, 'I made it a matter of principle to never get out of a chair.'"

Conan O'Brien: "MSNBC has come under fire for creating its own Chris Christie attack ad. However, later it just turned out to be an ad for Jenny Craig."

U.S. Department of the Interior

Dear Friend,

Here's what happened this week at Interior: Secretary Jewell celebrates the life and legacy of Martin Luther King, Jr. with a Day of Service in Washington DC; the Secretary visits Colorado to discuss sage grouse conservation efforts, and touts her youth initiative at an outdoor retailer market in Salt Lake City, Utah; the Secretary wraps up her western swing with a visit to south central New Mexico; and \$16.5 million in grants are announced to help conserve critical coastal wetlands sites.

[Click here to watch this week's episode.](#)

Thanks,

Tim Fullerton

Information Memo regarding Questions for the Record following the HNR hearing on 7 17 13

Ossowski, Elizabeth <elizabeth_ossowski@ios.doi.gov>

Fri, Jan 24, 2014 at 6:45 PM

To: Sally Jewell, (b)(6)@ios.doi.gov, Laura Davis <laura_davis@ios.doi.gov>, Nicole Buffa <nicole_buffa@ios.doi.gov>, Erin Walls <erin_walls@ios.doi.gov>, Katherine Rupp <katherine_rupp@ios.doi.gov>

Cc: Zaina Javaid <zaina_javaid@ios.doi.gov>

Secretary Jewell,

Attached is an Information Memo from OCL regarding Questions for the Record following the House Natural Resources Committee on July 17, 2013. This has been uploaded to Google Drive in your Information Memos folder.

Thank you,

Elizabeth

68K

INFORMATION MEMORANDUM FOR THE SECRETARY

DATE: January 23, 2014
FROM: Chris Salotti, Legislative Counsel, OCL (202)208-7619; Sarah Neimeyer,
Director, OCL (202)208-7693
SUBJECT: Responses to Questions for the Record following the House Natural Resources
Committee hearing on July 17, 2013

Attached for your review are responses to Questions for the Record (QFRs) that we received following your appearance before the House Committee on Natural Resources on July 17, 2013. These have been reviewed internally and reviewed and cleared by the Office of Management and Budget, and we can make any additional changes that you would like to make following your review before submitting to the Committee.

You testified at three oversight hearings in 2013. This is the last of the three hearings for which QFRs will be submitted. You previously reviewed responses to the Senate Energy and Indian Affairs Committees.

**Questions for Secretary Jewell
House Natural Resource Committee
July 17, 2013**

DRAFT

Questions from Rep. Lamborn

1. In reviewing permits, the U.S. Fish and Wildlife duplicate the efforts of state agencies. Shouldn't Federal Fish and Wildlife avoid duplication and waste of taxpayer resources by delegating permit review to state agencies? State Fish and Wildlife agencies are in the best position to understand what is appropriate for their state.

Response: The U.S. Fish and Wildlife Service's permit issuance and review is carried out in accordance with federal laws and therefore in most cases cannot be delegated to states. The FWS works closely with local, state, and federal government partners to ensure that review processes are conducted in a timely manner, making the best use of taxpayer resources. The Department agrees that it is important to seek ways to increase efficiencies, including by institutionalizing best practices and strengthening collaboration with local and state stakeholders, as well as tribes.

**Questions for Secretary Jewell
House Natural Resource Committee
July 17, 2013**

DRAFT

Questions from Rep. DeFazio

Drilling Safety

2. Secretary Jewell, in February 2012, the House natural Resources Committee Democratic staff released a report that examined safety and environmental violations that occurred relating to oil and gas drilling on federal lands over a decade beginning in the late 1990s. The report indicated that significant and potentially dangerous activities were occurring on federal lands without consistent or adequate federal oversight and enforcement. Since this report was issued what policies has the Department put in place to strengthen the inspection, oversight and enforcement program for onshore oil and gas activities?

Response: The Bureau of Land Management places a high priority on the oil and gas Inspection and Enforcement program. In July 2012, the BLM issued policy and guidance requiring additional oversight of the inspection and enforcement program. The BLM's Fiscal Year 2013 oil and gas inspection and enforcement strategy uses a risk-based system that identifies high priority drilling wells for technical inspection. In addition, the BLM is drafting comprehensive replacement regulations for Onshore Oil and Gas Orders 3 (site security), and 4 (oil measurement). The replacement regulations will update the minimum operating requirements as consistent with current law, technologies, and industry best management practices. Additionally the BLM is preparing a new Onshore Oil and Gas Order 9 (waste prevention) to establish standards to minimize the amount of venting and flaring of natural gas that takes place on oil and gas production facilities on federal and Indian lands. The BLM is also updating internal automation technologies, increasing the effectiveness and efficiency of inspection staff. In addition, the BLM is drafting a final rule regulating hydraulic fracturing that will establish a baseline standard for safety and environmental protection across all federal and Indian trust lands throughout the country.

3. Secretary Jewell, the report indicated that monetary penalties for safety violations were almost never issued, and when they were issued, they were issued inconsistently and amounted to very little. Over the thirteen year period evaluated in the report the average fine was only \$135 per violation for an industry where the top 5 companies made \$119 billion last year. That is not a real deterrent for these companies.

DRAFT

The fines that BLM can levy on oil and gas companies who violate regulations are set by a 30 year old law that has not been updated. The Interior Department and the American Petroleum Institute have both agreed that these low fines are not a sufficient financial deterrent for companies who violate the law. Former BLM Director Bob Abbey agreed that fine amounts are too low, and former Secretary Salazar committed to reviewing and evaluating ways the Department could increase the dollar amounts of fines. Do you agree that these fines are too low and has the DOI instituted any changes to provide additional deterrents for bad behavior?

Response: The BLM shares your concern over safety violations. The BLM is revising regulations relating to hydrocarbon measurement and accountability and these regulations would establish minimum standards to ensure hydrocarbons are accurately measured and reported. Onshore Order 4 was last updated in 1989, and since then changes in technology have allowed for more accurate fluid measurement.

Fracking Rule

4. Secretary Jewell, isn't it true that there is currently a wide variety in the stringency and efficacy of state regulations with respect to drilling or hydraulic fracturing on state lands? For example:

Wyoming requires pre-fracking disclosures of all hydraulic fracturing chemicals, no other state requires pre-frack disclosure of everything (some states have more limited disclosure requirements).

Colorado and West Virginia require advanced notice of fracking to landowners and/or residents, no other state has this requirement.

Wyoming has strong rules for surface casing setting depth and protecting drinking water and Texas has good rules for intermediate and production casing cementing. Other states do not have these prescriptive requirements. Furthermore, the existence of these requirements hasn't hindered oil and gas development in CO and TX.

Colorado and New Mexico have tight restrictions on the use of wastewater pits, New York has proposed rules require that all flowback be collected in tanks rather than pits. Other states do not have these requirements.

Despite the claims of the Majority, isn't it true that the revised draft proposed BLM hydraulic fracturing rule would not be a duplicative layer of regulation but would rather

DRAFT

be implemented by individual state BLM offices in a way that dovetails with existing state standards not on top of them?

Response: The BLM's proposed regulations are expected to integrate with existing state standards for hydraulic fracturing by establishing consistent standards for wellbore integrity, chemical disclosure, and flowback fluid management on public lands. While certain states have an established regulatory framework addressing hydraulic fracturing, a number of states with federal oil and gas leases do not. BLM is coordinating with the appropriate state regulatory agencies to minimize duplication and redundancy in the regulatory processes and to provide clarity to the industry.

5. Secretary Jewell, the discrepancies in state standards are why a federal standard, to act as a floor, is needed. But the revised draft rule BLM recently issued is weaker in a number of important ways that the draft rule issued last year. For example:

In the revised draft rule, cement evaluations don't have to be submitted until after the well is fracked (vs before in the last rule).

In the revised draft rule, operators don't have to provide BLM with information (depth, volume of fluids, chemicals, water source, size of fracturing) about each well and instead can just use one packet of generic information to be submitted for all "similar wells"

In the revised draft rule, disclosure of fracking chemicals would not have to be disclosed until after a well is drilled and could be done using the website Frac Focus, which, while it is undergoing changes, remains a database not run by the federal government that has been criticized for preventing easy access, aggregation, and download of data.

The waiver provisions (called variances) have been expanded to allow entire areas or states to be exempt from some requirements.

I am concerned that despite the fact that a number of Democratic Members wrote to then-Secretary Salazar calling for the initial draft rule to be strengthened, the revised draft rule appears to have been weakened in these critical ways. I would hope that as you continue to work through this rulemaking process you incorporate suggestions of Members of this Committee and the public to strengthen the rule to protect public health and the environment.

Response: The Department and the BLM have made clear that it is important that the public has confidence that the right safety and environmental protections are in place. The revised

Questions for Secretary Jewell
House Natural Resource Committee
July 17, 2013

DRAFT

proposed rule will modernize BLM's management of hydraulic fracturing operations and help to establish baseline environmental safeguards for these operations across all public and Indian lands.

BLM believes that the post-fracturing disclosures and certifications contained in the revised proposal would provide adequate assurances that fracking operations protect public health and safety and protect federal and Indian resources, and will ensure that the public is informed about the specifics of the actual fracking operations which are ultimately performed.

The BLM proposed for comment that where the cement evaluation log (CEL) data for a "type well" shows no indications of cement problems, the operator could construct the other wells in an approved group within the same field using the same well design and construction without getting prior approval for the other wells. However, the operator would be required -- for all wells -- to monitor and record the flowrate, density, and treating pressure, when cementing well casings and to submit a cement operation monitoring report to the BLM. The required monitoring data would provide important indications of problems with the cementing of casings and would help to verify the results of a CEL and for wells where no CEL is required and will provide the primary assurance that cementing operations conformed to those of a proven type well. If the monitoring information provides indications of an inadequate cement job, the operator would also be required to notify the BLM within 24 hours, submit a written report within 48 hours, and to certify that the inadequate cement job had been corrected and that usable water zone isolation had been achieved prior to starting hydraulic fracturing operations.

The BLM took comment on all aspects of the rule including whether this approach is sufficient to determine adequate cementing to protect usable water aquifers.

Regarding the use of FracFocus, BLM recognized and understood that FracFocus is in the process of improving the database with enhanced search capabilities to allow for easier reporting of information when including submission of data through this system. Moreover, information submitted to the BLM through FracFocus will still be required to comply with this federal rule, including its requirements that the operator must certify the information submitted is correct. For operators and the public, FracFocus provides a consistent venue that allows for ease of reporting and accessing data.

Finally, as noted in the question, the revised proposed rule would allow the BLM to approve a variance that would apply to all lands within a field, a basin, a state or within Indian lands and that would be based on the BLM's determination that it will meet or exceed the objectives of the regulation. The variance process would allow the BLM to work with states or tribes to appropriately adapt the regulatory requirements to the unique geology of an area or defer to a

**Questions for Secretary Jewell
House Natural Resource Committee
July 17, 2013**

DRAFT

standard, technology, or process required or allowed by state or tribal government, as long as application of the standard, technology, or process meets or exceeds the objectives of the hydraulic fracturing rule. The BLM would issue the variance in cooperation with the state or tribe. The variance would apply only to the requirements of the hydraulic fracturing regulations, and all requirements of the Mineral Leasing Act, or the Mineral Leasing Act for Acquired Lands, other federal statutes and other all regulations, would continue to apply to all lessees and operators.

Mining Reform

6. As you know, the Mining Law of 1872 – a law signed into law by President Ulysses S. Grant – allows free hardrock mining on federal public lands.

Oil and gas companies have to pay the American taxpayers a royalty when extracting oil and gas from federal lands. Coal companies have to pay a royalty when mining coal on federal lands. But if you are mining for gold, silver, copper, uranium and other valuable hardrock minerals – you pay nothing.

Of course, states, tribal nations, and private landowners aren't foolish enough to give away their hardrock minerals for free – they all charge a royalty – some as high as 12 percent.

We also have the issue of abandoned hardrock mines. According to the GAO there are more than 160,000 abandoned mines in the West alone – some estimates put that total as high as 500,000 mines and each can cost tens of millions of dollars to clean up.

Secretary Jewell, would your department support – and will you commit to working with this committee on – real mining reform that includes royalties as a source of income for the U.S. Treasury and abandoned mine reclamation?

Response: Yes, the Department looks forward to working with the Congress on reform of the mining law. The Administration supports legislative efforts to address the problem of abandoned hardrock mine lands, and has proposed creating a program similar to that for coal mines for abandoned hardrock sites. The Administration also supports efforts to provide a fair return to the taxpayer from hardrock production on federal lands, and has proposed developing a leasing program under the Mineral Leasing Act of 1920 for certain hardrock minerals including gold, silver, lead, zinc, copper, uranium, and molybdenum, currently covered by the General Mining Law of 1872.

DRAFT

Oil and Gas Development

7. The Majority has brought a number of bills to the floor to require new oil and gas leases on lands under your jurisdiction. These efforts have included bills to require leasing off the West Coast, Atlantic Coast, and in sensitive areas like Bristol Bay – home of the most productive salmon fishery on the planet.

But the truth is that a substantial portion of federal lands – both onshore and offshore – are already under lease for oil and gas development. As I mentioned in my opening statement, there are currently 25 million acres onshore and 30 million acres offshore – for a total of 55 million acres – already under lease that are not producing a drop of oil and gas.

Would your department and President Obama support legislative action to incentivize the development of existing oil and gas leases? In other words, do you believe we should be pushing the industry to use what it already has – 55 million acres – or giving them access to more access to federal land?

Response: Yes. The Administration has proposed legislative reforms to bolster and backstop administrative actions being taken to reform the management of Interior's onshore and offshore oil and gas programs, with a key focus on improving the return to taxpayers from the sale of these federal resources. This includes proposals to encourage the diligent development of oil and gas leases (e.g., requirements for shorter primary lease terms, stricter enforcement of lease terms, and monetary incentives to get leases into production).

Pebble Mine

8. As you know, a Canadian mining corporation is proposing to develop “Pebble Mine,” which would be the largest open pit gold-copper mine in North America in the headwaters of two of the most critical wild salmon producing drainages in the world that help support a \$2 billion per year sustainable fishery.

Although the Department of the Interior is not directly involved in the approval process of the proposed mining operation, I would strongly encourage you to engage with the EPA and to get involved in this issue. The sheer size of the mine has implications for BLM holdings along the potentially impacted rivers and tributaries of the region as well as the fish and wildlife – like moose, caribou, ducks, geese, and other migratory birds.

And, if the native salmon populations are impacted you potentially have repercussions for the many wildlife species in the food chain that salmon support. If you haven't already, I

DRAFT

would encourage you to have a conversation with Gina McCarthy – if and when the Senate does its job and confirms her – and stay active on this issue.

Response: This is an important issue for the Department. While the proposed development is on land owned and managed by the State of Alaska and the watershed assessment is being carried out by the Environmental Protection Agency, the assessment does include some lands managed by Departmental agencies. As such, the Department and its agencies will continue to monitor the process closely.

Public Lands/Wilderness

9. In 2011 DOI issued a report highlighting 18 backcountry areas deserving congressional protection as Conservation Lands or Wilderness, including two of my bills in Oregon – the Rogue Wilderness Area Expansion Act and Devil’s Staircase Wilderness Act.

At that time, former Secretary Salazar noted the local and bipartisan support for these proposals and challenged the 112th Congress to pass them, stressing the importance of balancing land conservation with energy development. Unfortunately, not a single one of these bills passed either the House or the Senate – the first time Congress failed to protect a single acre of wilderness in seven decades.

The Obama Administration has been under pressure from the Majority over its use of the Antiquities Act. But I assume the President would much prefer to sign bipartisan conservation bills – passed by Congress – into law instead of using the Antiquities Act as the sole means available in the last two years to preserve and protect sensitive areas and landscapes.

Response: The Administration has testified in support of both the Devil’s Staircase and Rogue Wilderness Expansion Acts, and we encourage the Congress to move these bills forward. The Administration is committed to engaging local citizens and getting public input; to understanding how communities feel; and to connecting with local communities in an effective way so that local sentiments about these spectacular places inform decisions about recognizing American treasures. The monument designations the President has made under Antiquities Act authority have followed this community-based approach. It is also worth noting that the Antiquities Act has been used by 16 presidents, from both parties, to recognize the importance of such areas as the Grand Canyon and the Statue of Liberty.

DRAFT

Endangered Species

10. I am concerned about the Fish and Wildlife Service's proposal to delist the gray wolf from the Endangered Species list throughout the United States. Before the proposal was released, I organized a letter signed by more than 50 of my House colleagues to Service Director Dan Ashe urging him to keep protections for wolves in place as they continue to rebound. The lack of sound scientific evidence to support the Service's claim that the wolf is recovered, even though it only exists in a small portion of its historic range, indicates that a decision has been made to shift the goalposts and declare a victory. What are you doing to review this decision? Will you require the Service to produce additional scientific evidence to prove that wolves no longer warrant protection under the ESA?

Response: The Fish and Wildlife Service evaluated the classification status of gray wolves currently listed in the contiguous United States and Mexico under the Endangered Species Act. Based on that evaluation, and consistent with the ESA, the FWS published two proposed rules on June 13, 2013, to remove the gray wolf from the List of Threatened and Endangered Wildlife but to maintain endangered status for the Mexican wolf by listing it as a subspecies. These actions are proposed because the best available scientific and commercial information indicates that the currently listed entity is not a valid species under the ESA and that the Mexican wolf is an endangered subspecies.

On September 30, 2013, the FWS announced that it has reinitiated a scientific peer review process to obtain an independent and objective peer review of the science behind the proposal. The peer review process will be sponsored and conducted by the National Center for Ecological Analysis and Synthesis, a respected interdisciplinary research center at the University of California – Santa Barbara. The center will vet prospective reviewers to verify that they are able to provide an objective review and have no conflict of interest, culminating in the selection of 5 or 6 well-qualified scientists with professional qualifications and relevant experience.

The Department recognizes the significant public interest in this issue and is focused on ensuring that all interested parties have the opportunity to provide comments concerning the proposed rule. With that in mind, FWS extended the public comment period on the proposed rule for a second time. In addition, to provide a forum for additional stakeholder input, the FWS also held five public hearings on the proposal, including in Sacramento, CA, Denver, CO, Albuquerque, NM, Pinetop, AZ, and Washington, DC.

Additional details of the proposed rules and public hearings, and links to submit comments to the public record can be found here: www.fws.gov/graywolfrecovery062013.html.

**Questions for Secretary Jewell
House Natural Resource Committee
July 17, 2013**

DRAFT

DRAFT

Questions from Rep. Hanabusa

11. Madame Secretary, since 2009 Indian country's highest legislative priority has been passage of a legislative fix to the *Carcieri v. Salazar* decision. I introduced bipartisan legislation in the House this year that would provide a clean fix to that misguided decision.

a. It has been suggested that a clean *Carcieri* fix is impossible, due to concerns related to so-called "off reservation" gaming. Does the Administration continue to support a clean *Carcieri* fix – that is, restoring Secretarial authority to place land into trust for any federally recognized Indian tribe, regardless of when that tribe was federally recognized?

Response: A *Carcieri* fix is a top priority for the Administration. The Department believes that this decision frustrates the U.S.'s trust responsibility to Indian tribes by hindering the Department's ability to take land into trust for some tribes. The President's 2014 Budget included language that, if enacted, would resolve the issue. The Department stands ready to assist Congress in passing legislation to fix the decision.

b. What administrative measures has the Department taken to ensure that tribal homelands are restored pending Congressional action?

Response: Despite the *Carcieri* decision, which has placed unnecessary and substantial administrative burdens on the Department and tribes and has significantly increased litigation risks, the Department over the last four years has processed more than 1,100 separate applications and acquired over 205,000 acres of land in trust on behalf of Indian tribes and individuals.

The Department is also currently engaged in both federal court and administrative litigation regarding the Secretary's authority to acquire land in trust pursuant to the Indian Reorganization Act of 1934 following the *Carcieri* decision.

c. What steps has the Administration taken or proposed to take in order to work with Congress on passing a clean fix in the 113th Congress?

Response: The Administration continues to support a legislative solution to address the negative impacts and increased burdens on the Department and on Indian Country resulting from this decision. The President included in the Administration's Fiscal Year 2014 Budget language that, if enacted, would resolve this issue.

**Questions for Secretary Jewell
House Natural Resource Committee
July 17, 2013**

DRAFT

12. Last month, President Obama signed an executive order establishing the White House Council on Native American Affairs, furthering this Administration's already firm commitment to greater engagement and collaboration with Indian tribes. The National Congress of American Indians lauded the establishment of the Council, which you will chair as Secretary of the Interior.

a. The executive order establishing the Council states that the Council "shall improve coordination of federal programs and the use of resources available to tribal communities." As Council chair, how do you intend to achieve this purpose? What specific goals would you like to see achieved?

Response: The Executive Order, signed by President Obama on June 26, is further evidence of this Administration's commitment to advancing self-determination. As noted in the question, the intent is to improve interagency coordination, efficiency, and expand efforts to leverage federal programs and resources available to tribal communities.

The Council will convene at least three times a year and will work collaboratively toward advancing five priorities that mirror the issues tribal leaders have raised during previous White House Tribal Nations Conferences, including promoting sustainable economic development; supporting greater access to and control over healthcare; supporting the efforts to improve the effectiveness and efficiency of tribal justice systems; expanding and improving educational opportunities for Native American youth; and protecting and supporting the sustainable management of Native lands, environments, and natural resources.

b. How could Council recommendations impact reservation-level conditions, such as greater access to and control over tribal nutrition and healthcare and tribal justice systems, as well as protecting tribal lands, environments and natural resources?

Response: As noted in the testimony for this hearing, the Council will include more than 30 federal departments and agencies and will work across governments and executive departments, agencies, and offices to develop policy recommendations and expand efforts to leverage federal programs and resources available to tribal communities. The goal is that the Council, through this improved coordination and use of resources will focus on key activities, such as promoting sustainable economic development; supporting greater access to and control over healthcare; improving the effectiveness and efficiency of tribal justice systems; expanding and improving educational opportunities for Native American youth; and protecting and supporting the

**Questions for Secretary Jewell
House Natural Resource Committee
July 17, 2013**

DRAFT

sustainable management of Native lands, environments, and natural resources, will have a positive impact on issues of importance to tribes.

13. This Committee has received extensive testimony on the important distinction between federally-owned public lands and Indian country held in trust by the federal government. The recently revised BLM regulations on hydraulic fracturing now allow for a “variance” that enables tribes to be the relevant authority in hydraulic fracturing decisions, after a showing that the tribal regulations are at least as stringent as federal standards.

a. Does this inclusion in the regulation stem from outreach from the tribes? Have you received feedback on this specific provision from tribes? Do you think that this provision adequately distinguishes tribal lands from public lands and respects tribal sovereignty?

Response: The variance provision in the BLM’s proposed hydraulic fracturing rule was informed by tribal consultations. The BLM contacted over 180 tribal governing bodies and had significant exchanges with over 30 tribes in multiple states during the drafting of the rule. The BLM fully embraces the statutes, Executive Orders, and other statements of governmental or departmental policy in favor of promoting tribal self-determination and control of resources. The Indian Mineral Leasing Act, however, subjects all oil and gas operations on trust or restricted Indian lands to the Secretary’s regulations and does not authorize the Secretary to allow tribes to opt out of regulatory oversight. This rule applies to Indian lands so that these lands and communities receive the same level of protection provided on public lands.

DRAFT

Questions from Rep. Grijalva

14. The New York Times recently reported that one of the poorest tribes in the country, the Oglala Sioux Tribe of the Pine Ridge Indian reservation, is ending its low income housing program due to sequestration cuts even though over 1500 tribal families are in need of and awaiting basic housing on the reservation. The tribe is cutting back on Headstart, healthcare and programs for the elderly. Ninety (90) percent of the tribe's annual budget is comprised federal funds, so the mandatory cuts due to sequestration are indeed devastating to this tribe. But this is just one example of many real stories about sequestration's impacts on the First Americans

When you hear about Oglala and other tribes struggling to survive sequestration, do you believe that this administration is doing everything in its power to fulfill the fiduciary obligations it has to tribal nations? Furthermore, what steps are you and this administration going to take to address the increasing cuts in the country's already poorest areas, including tribal reservations?

Response: Poor communities often suffer worse when tightening the fiscal belt. The sequestration's impacts are indiscriminate as applied under the law. Indian Country already experiences needs that exceed the ability to meet them, and these communities are arguably the least equipped to absorb the losses sequestration is imposing. At the Department we are trying to prioritize and find a way forward. President Obama also signed Executive Order 13647 in June establishing the White House Council on Native American Affairs, which will be chaired by the Secretary of the Interior and will include more than 30 federal departments and agencies.

The Council will work across governments and executive departments, agencies, and offices to develop policy recommendations and expand efforts to leverage federal programs and resources available to tribal communities. The goal is that the Council, through this improved coordination and use of resources will focus on key activities, such as promoting sustainable economic development; supporting greater access to and control over healthcare; improving the effectiveness and efficiency of tribal justice systems; expanding and improving educational opportunities for Native American youth; and protecting and supporting the sustainable management of Native lands, environments, and natural resources, will have a positive impact on issues of importance to tribes.

DRAFT

15. The Department of the Interior is one several federal agencies that entered into an MOU with the Advisory Council on Historic Preservation to improve the protection of and tribal access to Indian sacred sites through enhanced interagency coordination. What role is the DOI taking in order to enforce the goals of this MOU? Beyond this MOU, what steps, if any, are being taken by this administration to support tribal nations in their efforts to protect and preserve their sacred sites and objects?

Response: The Departments of the Interior, Energy, Defense, and Agriculture, and the Advisory Council on Historic Preservation entered into a Memorandum of Understanding on November 30, 2012. This action was in response to tribal requests to improve the protection of and tribal access to Indian sacred sites through improved interdepartmental coordination and collaboration. Implementation of the MOU is through a three-tiered group approach: an interagency executive group, a core group of interagency staff coordinating work, and five subgroups of subject-matter experts that work on different aspects of implementing the MOU. During the first two years of this MOU, the Department of the Interior is the chair of both the core working group and the subgroup working on confidentiality standards for sacred sites.

The agencies are working together on strategies for sacred sites protection, including the creation of: a training program for federal staff; guidance for best practices, a public outreach plan, and recommendations for the confidentiality of and tribal access to sacred sites. The agencies are also working to establish mechanisms for the collaborative stewardship of sacred sites with tribes; identifying impediments and making recommendations to address the protection of sacred sites; and building tribal capacity. This interagency effort is being accomplished using the existing resources within each of the agencies.

16. Tribal consultation is a major component in the relationship between tribal nations and the federal government. What steps is this administration taking in order to uphold their responsibility in consulting with tribes for any federal, state, and corporate initiatives that will impact tribes and their homelands which may extend beyond reservation borders?

Response: This Administration has taken its responsibility to ensure consultation with Indian tribal governments on policies that have tribal implications seriously. Early in the Administration, the President signed a Presidential Memorandum on tribal consultation that made the importance of meaningful and regular consultation clear and directed agencies to submit a plan for implementing the policies and directives contained in Executive Order 13175, on Consultation and Coordination with Indian Tribal Governments.

Questions for Secretary Jewell
House Natural Resource Committee
July 17, 2013

DRAFT

The Department's official consultation policy was announced in December 2011, and it was developed in close coordination with tribal leaders. It sets out detailed requirements and guidelines for Interior officials and managers to follow to ensure they are using the best practices and most innovative methods to achieve meaningful consultation with tribes. And, as indicated in a previous response, in June the President signed Executive Order 13647, establishing the White House Council on Native American Affairs, which will be chaired by the Secretary of the Interior. The intent of the Council is to improve interagency coordination, efficiency, and expand efforts to leverage federal programs and resources available to tribal communities. In signing the Executive Order, the President noted that greater engagement and meaningful consultation with tribes is of paramount importance in developing any policies affecting tribal nations.

DRAFT

Questions from Rep. Gosar

17. Grand Canyon Air Tours

The one year anniversary of the passage of the Moving Ahead for Progress in the 21st Century Act (MAP-21, P.L. 112-141), recently passed. Senator McCain and I have inquired several times about the delay in the implementation of the law as it pertains to the quiet technology incentive requirements of the Act. As of March of this year, we were told that the National Park Service and the FAA were still working to identify options to implement these incentives. I believe a year is more than enough time. Coming from the private sector, I am sure you would not have stood for this type of delay. I know I wouldn't have in my dental practice.

Can you please tell me when my colleagues and I can expect to hear from the NPS and the FAA that the incentives are ready for implementation? We have been very patient but our patience is running thin. These incentives are critical to the long term economic health of Northern Arizona and Southern Nevada.

Response: Effective January 1, 2014, the NPS has implemented air tour fee adjustments as an initial incentive for operators conducting air tours at Grand Canyon National Park to convert to the use of quiet technology aircraft. These fee adjustments will also be made available to air tour operators who already have converted to the use of quiet technology aircraft. The FAA plans to announce a second incentive that would release FAA held allocations for the use of quiet technology aircraft in time for the busy part of 2014 tourist season. The NPS and FAA are continuing to work together on additional incentives that will require noise analysis to ensure compliance with the mandate set forth in MAP-21 that the impact of increased operations resulting from the incentives does not increase noise at Grand Canyon National Park.

18. Long-Term Experimental and Management Plan (LTEMP) for Glen Canyon Dam

My question is about the Long-Term Experimental and Management Plan (LTEMP) for Glen Canyon Dam that is being undertaken by the Bureau of Reclamation and the National Park Service as co-lead agencies.

My understanding is that Reclamation currently has ten years of NEPA compliance for Glen Canyon operations – from two Environmental Assessments and Findings of No Significant Impact issued just last year. Given this, and given that the endangered humpback chub population in the Grand Canyon is continuing to increase and currently

**Questions for Secretary Jewell
House Natural Resource Committee
July 17, 2013**

DRAFT

exceeds recovery goal requirementswhy is the Department proceeding with another EIS at this time?

Response: The 2012 Environmental Assessments and associated Findings of No Significant Impact focused on specific aspects of the operations of Glen Canyon Dam, including high flow experiments and nonnative fish management through 2020. In contrast, the Long Term Experimental and Management Plan Environmental Impact Statement (LTEMP) announced by the Secretary in December 2009 will update a 1996 Record of Decision and considers potential modification of many aspects of Glen Canyon Dam operations beyond those considered in the 2012 Environmental Assessments. The LTEMP will incorporate scientific information developed by the Glen Canyon Dam Adaptive Management Program. The resulting Record of Decision from the LTEMP will allow the Secretary to meet statutory responsibilities for protecting and improving Glen Canyon National Recreation Area and Grand Canyon National Park resources and values, as well as statutory responsibilities under the Law of the River and the Endangered Species Act.

The President's budget contains \$3.5 million for the Glen Canyon Dam LTEMP EIS. Given today's fiscal struggles, why would Interior spend \$3.5 M on an EIS that basically is unnecessary since 1) BOR has NEPA compliance for the next 10 years; 2) USFWS has issued a fresh biological opinion showing current Glen Canyon operations are not jeopardizing the endangered Humpback Chub?

Response: As noted in the response to the previous question, the LTEMP EIS is a separate process focused on a different aspect of Glen Canyon Dam operations.

19. National Monument Designations via Antiquities Act authority in Arizona

I want to quickly ask about National Monuments. While I am not opposed to monuments, I firmly believe any designation should go through a public process and ultimately be codified by Congress.

I have introduced legislation, the Arizona Land Sovereignty Act, which would ensure a public process for monument designations. I know there are groups in my state urging the department to declare parts of my district as monuments. Does the Administration have any plans or are you considering any proposals to designate a National Monument in Arizona, under Antiquities Act authority?

Response: At a hearing in June 2013, the Administration strongly opposed efforts to weaken Antiquities Act authority, which has been used by 16 presidents from both parties to recognize

Questions for Secretary Jewell
House Natural Resource Committee
July 17, 2013

DRAFT

the importance of such areas as the Grand Canyon and the Statue of Liberty. While there are no current plans to designate monuments in Arizona under this authority, it is worth noting that this Administration is committed to engaging local citizens and getting public input; to understanding how communities feel; and to connecting with local communities in an effective way so that local sentiments about these spectacular places inform decisions about recognizing American treasures. The monument designations the President has made under Antiquities Act authority have followed this community-based approach.

DRAFT

Questions from Rep. Napolitano

20. Madam Secretary, last week the House passed its version of the Energy and Water Appropriations. As you know, the legislation guts the WaterSMART program by 53%, including the elimination of all funding for WaterSMART grants. These grants have helped conserve over 600,000 acre-feet in the past three years.

a. Where does the money go?

b. Why is WaterSMART a priority for the department, and what would the cuts, if enacted, mean to program?

Response to a. and b.: As competition for water resources grows for crop irrigation, growing cities and communities, energy production, and the environment, the need for information and tools to aid water resource and land managers grows. WaterSMART is a Department of the Interior initiative that leverages and directs existing expertise and resources within the USGS and the Bureau of Reclamation towards addressing complex, national and regional-scale water challenges. WaterSMART uses scientific and financial tools to promote collaborative efforts to help balance water supply and demand.

Over the last three years, the WaterSMART program has enabled the Department to act aggressively in response to near term and immediate water shortages and apply scientific findings to plan for longer term needs. Funded at \$35.4 million, WaterSMART promotes sustainable solutions and economic productivity in the western United States. It addresses current and future water shortages; degraded water quality; increased demands for water from growing populations and energy needs; amplified recognition of environmental water requirements; and the potential for decreased water supply availability due to drought and climate change.

Cuts of that magnitude would significantly hinder actions under the WaterSMART program that could help address water supply shortages in the Colorado River Basin and elsewhere, and would undermine the government's ability to partner with local communities on improving resilience against climate-related impacts that threaten a range of economic and environmental interests.

21. The Natural Resources Committee is the authorizing committee for the Department of the Interior. As part of the Energy and Water Debate, programs and authorizations that

DRAFT

were vetted by House and enacted into law are now being defunded by the appropriators despite being requested by the Administration.

a. Energy and Water zeros out funding for Indian Water Rights Settlements. Why is it important that we prioritize Indian Water Rights Settlements?

Response: Water settlements secure tribal water rights helping to fulfill the United States' promise to tribes that Indian reservations will provide Indian people with permanent homelands. Indian water rights settlements are also consistent with the general federal trust responsibility to American Indians and with federal policy promoting Indian self-determination and economic self-sufficiency. The certainty that Indian water settlements provide is, in the words of the Western Governors Association, "a crucial element of effective water supply planning and management in the West." Achieving certainty through negotiated settlement is far superior to decades of expensive and disruptive litigation. Congress has agreed with tribes, states and non-Indian water users about the value of Indian water rights settlements by enacting 23 settlements spanning a period of over 30 years.

b. What would be the effects of zeroing out the San Joaquin "Settlement"?

Response: The Settlement's two primary goals are to restore and maintain fish populations and restore and avoid adverse water impacts. Eliminating funding for the Settlement creates an uncertain future for more than just river restoration but also for traditional water delivery operations from Friant Dam and the San Joaquin River. The Settlement effectively ended 18 years of litigation associated with water deliveries from the San Joaquin River. Eliminating funding risks encouraging the settling parties to return to court to pursue other avenues and disrupt the underlying long-term goals of restoring the San Joaquin River according to the processes and timelines spelled out in the Settlement.

c. What do these cuts mean for Reclamation's traditional construction budget, which majority claims to support?

Response: The elimination of funding for the Indian Water Rights Settlements and the San Joaquin Settlement would jeopardize ongoing construction activities, including the construction of seepage mitigation projects on the San Joaquin River or the construction of water supply projects to Tribes who have settled long-standing disputes through negotiated settlement.

**Questions for Secretary Jewell
House Natural Resource Committee
July 17, 2013**

DRAFT

22. As part of the sequestration, several of USGS's streamgages have been discontinued. Why is it important that we support the streamgage system?

Response: Streamgages are critical and vital for meeting federal responsibilities associated with forecasting floods, tracking flows in major river basins, and assessing long-term climatic, land-use, and human impacts on streamflow and water quality. Increasing the number of streamgages is a high priority for the USGS. We look forward to working with you to explore possibilities for restoring recently discontinued USGS streamgages throughout the nation and to take steps to help make the network more stable so that water-resource managers have the streamflow information they need to make informed decisions.

**Questions for Secretary Jewell
House Natural Resource Committee
July 17, 2013**

DRAFT

Questions from Rep. McClintock

23. Madam Secretary, you may be aware that FWS recently proposed a rule for Categorical Exemption from NEPA mandates regarding “Injurious Wildlife Listings” under the Lacey Act. This Committee understands well the challenges in dealing with invasive species, however, I am concerned that exempting the FWS from addressing the environmental, economic and social impacts of proposed additions to the list could be extremely damaging to small business; as several of the species FWS seems to be targeting are widely traded and would have a significant economic impact. I’d like your commitment to look into this matter and get back to me before the service finalizes their rule making on this issue. Do I have that commitment?

Response: A final determination on this proposed rule will be made once the public comments received are analyzed and addressed. Regardless of whether or not a categorical exclusion is finalized and applied to the listing of injurious wildlife under the Lacey Act, the Fish and Wildlife Service will continue to carry out the analysis required under the National Environmental Policy Act and other laws applicable to federal regulatory action, including the Lacey Act itself, the Administrative Procedures Act, the Regulatory Flexibility Act, and Executive Order 12866, Regulatory Planning and Review. These laws account for much of the analyses made when carrying out the regulatory listing process.

The proposed categorical exclusion would give FWS the flexibility to forego the preparation of an Environmental Assessment under NEPA when, absent extraordinary circumstances, listing a species as injurious under the Lacey Act. The proposed categorical exclusion meets the Council on Environmental Quality guidelines, which provide that a categorical exclusion may apply to actions that are administrative and repetitive in nature and for which Environmental Assessments continually result in “Findings of No Significant Impact.”

**Questions for Secretary Jewell
House Natural Resource Committee
July 17, 2013**

DRAFT

Questions from Rep. Lowenthal

24. How can and will the BLM guarantee that FracFocus and all of its current and historic data will exist in perpetuity if it is a private website?

Response: The Bureau of Land Management's revised hydraulic fracturing rule would require operators to disclose the chemicals used in the fracturing process and provide that information to the BLM after the fracturing operation is completed. Operators may submit this information to the BLM through FracFocus, which is already used by some states for reporting mandatory chemical disclosure of hydraulic fracturing chemicals as a single reporting location. FracFocus was initiated as a project with the Department of Energy and managed by the Ground Water Protection Council and Interstate Oil and Gas Compact Commission. It was endorsed in the Secretary of Energy Advisory Board 90-day report of best practices. Use of this website allows an operator to provide the information to the BLM, as well as the public and state and tribal regulators. This approach also has the benefit of reducing reporting burdens for oil and gas operators by avoiding duplicative reporting requirements and administrative duties for the BLM in many instances. The data submitted to FracFocus is managed by the Ground Water Protection Council (GWPC) and in partnership with the Interstate Oil and Gas Compact Commission; the data is provided to the BLM and other regulators on a regular basis, and BLM would also maintain permanent possession of a set of this data.

25. How can the BLM ensure that FracFocus has all of the proper data search, sort, and aggregation tools – which we have heard from other witnesses before this committee it still does not have, thus making it nearly impossible to effectively use?

Response: The FracFocus website was launched in April 2011 by the GWPC, a private nonprofit organization governed by state drilling and water quality officials. As states have expanded requirements for disclosure, FracFocus has evolved into a standardized, easily accessible repository of public information. FracFocus 2.0 was recently released with the added data search capability from a XML database platform. Users have the option of using the GIS mapping technology to identify chemicals used in the wells, as well as search and develop reports by date ranges, chemical names or Chemical Abstract Service numbers. The BLM will continue to work with GWPC to improve the FracFocus website to meet the expectations of the final BLM hydraulic fracturing rule.

26. BLM's Revised Draft Rule ambiguously states, "The BLM understands that the [FracFocus] database is in the process of being improved and will in the near future have enhanced search capabilities and allow for easier reporting of information." The BLM's

**Questions for Secretary Jewell
House Natural Resource Committee
July 17, 2013**

DRAFT

draft rule specifically references FracFocus as an acceptable compliance repository of data for oil and gas operators. What does it mean for the BLM to “understand” that FracFocus will provide additional tools? Has FracFocus provided written commitment to BLM to do so much? If so, please provide this documentation to the committee. Does the BLM have any recourse if FracFocus does not do what BLM “understands” that it will do?

Response: The BLM’s proposed regulation (§3162.3-3(i)) requires submission of the data through FracFocus or another database specified by the BLM. The GWPC has a successful track record in development of similar risk-based data management systems reliably used by the U.S. Environmental Protection Agency, the Department of Energy, and other state agencies. FracFocus 2.0 was developed with a number of additional tools, such as dashboard access for individual users and configuration module for XML file download. The BLM has met on numerous occasions with the GWPC regarding FracFocus, and will continue meeting with the GWPC in the future as the final rule is being completed.

27. What is the oversight process for ensuring that operators are using the trade secret exception to chemical disclosure properly? In other words, what is the cross-check verification of whether these chemicals are in fact trade secrets? Will there be an internal BLM verification that those chemicals are in fact trade secrets? And will Congress and the public be excluded from providing oversight to the trade secret process? Please explain how the BLM and the public will not be relying on the world of operators without verification of the legitimacy of operators’ trade secret exception claims? Do you think the BLM’s broadening of the trade secret exception may erode the public’s confidence and trust in hydraulic fracturing?

Response: The BLM must follow the Trade Secrets Act (TSA). Although operators may have their own list of chemicals that could fall under the TSA, the BLM would have the authority to validate the trade secret determinations. The BLM can issue a notice to the operator and move forward with the disclosure of the chemicals considered invalid for protection under the TSA if the operator does not appeal such a decision within 10 days of receipt of the notice.

DRAFT

Questions from Rep. Sablan

28. As you are aware, the United States and the Republic of Palau signed an agreement on September 10, 2010, to extend the financial terms of the Compact of Free Association between our two nations until 2024. Since then, there has been little success in securing ratification of the agreement by Congress, largely due to the inability to find a suitable offset. After a recent visit to Washington by newly elected Palau President Tommy Remengesau, you joined Secretary of Defense Chuck Hagel, and Secretary of State John Kerry in sending a letter to Senate President Joe Biden and House Speaker John Boehner in support of the ratification of the Compact Review Agreement. In the letter, you and your fellow cabinet members pointed out that “approving the results of the Agreement is of import to the national security of the United States, to our bilateral relationship with Palau, and to our broader strategic interests in the Asia-Pacific region.” Madam Secretary, what update can you give us regarding your department’s efforts to secure passage of the Palau agreement?

Response: As noted in the question, approving the results of the Agreement is of critical importance to the national security of the United States, to our bilateral relationship with Palau, and to our broader strategic interests in the Asia Pacific region. As such, the Administration transmitted legislation to Congress that would approve the Agreement and has worked with the Committee to try to identify appropriate offsets for funding the Agreement. The Administration stands ready to work with Congress to approve this critically important piece of legislation.

29. I commend DOI on its ongoing development of a 15-year Management Plan for the Marianas Trench Marine National Monument, which was established by then-President Bush in 2009. Please explain what other proposals your agency intends to take or is currently undertaking to support the monument?

Response: The U.S. Fish and Wildlife Service manages the Marianas Trench Marine National Monument, including the Trench Unit and the Volcanic Unit, as National Wildlife Refuges under Secretarial Order 3284, dated January 16, 2009. Management activities include convening the Marianas Trench Monument Advisory Committee, consulting with the National Marine Fisheries Service on their responsibilities for fisheries-related issues, and coordinating with the Commonwealth of the Northern Mariana Islands on monument planning. On an operational basis, the Service fulfills its primary management responsibility by issuing special use permits that allow scientists and explorers like James Cameron’s historic expedition to the trench. The FWS routinely consults and coordinates with the National Oceanic and Atmospheric Administration, the Commonwealth of the Northern Mariana Island, the U.S. Coast Guard, the Department of Defense, and the Friends of the Trench.

DRAFT

30. In January 2012, President Obama signed an Executive Order and announced new initiatives to significantly increase travel and tourism in the U.S. Back in October 2011, the Department of the Interior released a 50-state report outlining some of the country's most promising ways to reconnect Americans to the natural world. Unfortunately, the U.S. territories were left out. And then DOI rolled out the improved Recreation.gov website and the website did not include treasures such as the American Memorial Park managed by the National Park Service or the Marianas Trench National Monument Volcanic and Trench units managed by the U.S. Fish and Wildlife Service. However, your staff worked with our office for months to update the website to reflect these areas. I am asking for your commitment to include the U.S. Territories when applicable in all reports, promotions, etc. This will complement the President's initiatives to increase travel and tourism in every state and territory.

Response: Yes, the Administration is committed to the empowerment and economic growth of US-affiliated insular communities.

31. The illegal international trade in timber and wildlife has skyrocketed in recent years, and has been linked to organized crime syndicates and terrorist groups. While the Lacey Act has proven successful in keeping these criminal elements out of the United States, forests and wildlife in other countries are being decimated. Will you work with other federal agencies, foreign governments, and the conservation community to fight illegal trafficking of wildlife and timber?

Response: In addition to being one of the lead federal agencies enforcing the Lacey Act, the FWS works closely with the other land managing agencies within the Department that enforce the Lacey Act across hundreds of millions of acres of public and tribal lands, as well as with other Departments and foreign governments. The FWS also enforces many other U.S. laws that protect wildlife, including the Endangered Species Act, the Marine Mammal Protection Act, and the Migratory Bird Treaty Act. The FWS will continue to work with its partners to ensure the success of the Lacey Act.

In July of this year, President Obama signed Executive Order 13648 on Combating Wildlife Trafficking that establishes a cabinet-level Task Force, led by the Attorney General and the Secretaries of State and Interior. Under the terms of that Executive Order, the Administration is developing a comprehensive program to work with African nations to combat wildlife poaching; prioritizing the targeting and prosecution of international syndicates engaged in illegal trafficking of wildlife for sale in consumer countries; and working with receiving countries to

**Questions for Secretary Jewell
House Natural Resource Committee
July 17, 2013**

DRAFT

stop the transshipment and sale of ivory and other illegal wildlife parts. The Task Force is in the process of developing a National Strategy to address this problem. The first meeting of the Advisory Council on Wildlife Trafficking, which will make recommendations to the task force, was held December 16, 2013.

32. From the brown tree snake on Guam and the Mariana Islands, to pythons in the everglades, to Asian carp in the Mississippi River, invasive species cost the United States over \$120 billion a year. What are your thoughts on the severity of our problems with invasive species, and how will you work to minimize the damage they cause? What additional tools do you need?

Response: Addressing invasive species is a high priority for the Department. The Department requested an overall increase of about \$23 million for invasive species prevention, management, control, and coordination in the Fiscal Year 2014 Budget. Invasive species impact the Department's mission and purposes for which we manage public lands and their resources in myriad ways, including the services these lands offer, such as recreation, hydropower, water supplies, agriculture, and ranching. They also impact ecosystem functions including pollination, water filtration, climate stability, pest control, and erosion protection, wildfires, and other natural hazards. The environmental, economic, and social impacts of invasive species and their control or eradication can be costly, controversial, and complex. Prevention of their introduction, establishment, and spread is the most cost effective and least disruptive approach to managing the threats these species pose to the nation's public trust resources.

The Department has forged strong partnerships with local, state, tribal, and other federal agencies in order to manage invasive species impacts on the resources it manages. The Department addresses a wide variety of invasive species through prevention, Early Detection and Rapid Response, control and management, restoration, research, and education and public awareness. This has resulted in tangible improvements in water quality, species recovery, habitat restoration, and overall invasive species management in ecosystems.

The Department is also working on several new tools to more effectively address the threat of invasive species through preventative and management efforts. These include an ongoing effort to improve the efficiency and effectiveness of regulations and regulatory processes used to implement our existing authorities to address invasive species. We are developing an MOU with several key industry and state partners that will lead to voluntary actions to better manage the risks associated with harmful non-native species. We continue to improve our ability to detect, assess, and control key invasive species through research and environmental modeling. We have also become more effective at assessing the risk of invasive species more rapidly while

**Questions for Secretary Jewell
House Natural Resource Committee
July 17, 2013**

DRAFT

maintaining scientific accuracy and public transparency. The Department is also reviewing several other options for improving its ability to prevent invasive species introductions, and we appreciate Congressional interest in this issue. We look forward to working with Congress and other stakeholders and partners to tackle the significant problems that invasive species cause.

DRAFT

Questions from Rep. Wittman

33. Do you see any inherent conflict between the development of the five-year OCS leasing plan as mandated by the OCS Lands Act and the National Ocean Policy (NOP) and its call for regions to develop marine spatial plans that you as Secretary are subsequently bound to follow per the Executive Order establishing National Ocean Policy? What impact would NOP have on permitted activities like energy development?

Response: Neither the National Ocean Policy nor marine planning creates or changes existing regulations or statutory authorities that the Department's bureaus operate under. The final Implementation Plan for the NOP was developed with extensive stakeholder input and gives states and communities greater input in federal decisions, among other things. The Implementation Plan supports voluntary regional marine planning, which will bring together ocean users to share information to plan how we use, sustain and better understand our ocean resources.

34. Do you support the goal of wetland restoration and would you support continued authorization of the North American Wetlands Conservation Act?

Response: The Department supports the goal of wetland restoration and reauthorization of the North American Wetlands Conservation Act. The Department testified in strong support of H.R. 2208, the North American Wetlands Conservation Extension Act, at a hearing before the House Natural Resources Subcommittee on Fisheries, Wildlife, Oceans and Insular Affairs, on August 2, 2013. The Department also supports legislation to increase the price of the Federal Duck Stamp, funding from which is also critical to protecting wetlands that offer breeding, feeding, and resting areas for migratory waterfowl.

35. In June the Wildlife and Hunting Heritage Conservation Council (WHHCC) federal advisory council sent a letter to you asking for the creation of a dedicated spot for hunting and recreational shooting on the Bureau of Land Management Resource Advisory Councils (RACs). What is your position on providing sportsmen with this opportunity to have a dedicated voice in policy decision impact federal lands?

Response: The Bureau of Land Management takes seriously the work of the Resource Advisory Councils, which provide an opportunity for individuals from a wide-range of backgrounds and

**Questions for Secretary Jewell
House Natural Resource Committee
July 17, 2013**

DRAFT

interests to have a voice in the management of public lands. Under BLM regulations, each RAC must include balanced representation of the following three broad categories:

Commercial/commodity interests; Environmental/historical groups (including wild horse and burro and dispersed recreation); and state and local government, Indian tribes, and the public at large. Hunting and recreational shooting interests may be represented in any of the three categories (as noted on the RAC application):

- Category 1: Developed outdoor recreation, off-highway vehicle users, or commercial recreation activities;
- Category 2: Dispersed recreation interests
- Category 3: Public at large

One-third of RAC member positions become open each year, generally between January and March. The BLM's senior management will continue to consider changes to categories or the addition of special subcategories for interests like hunting and shooting sports. The Department recognizes that sportsmen and women care deeply about the public lands and we encourage them to apply for RAC appointments.

DRAFT

Questions from Rep. Young

36. As you know, the State of Alaska recently submitted a very comprehensive Exploration Plan and Special Use Permit Application to the Department pursuant to Section 1002(e) of the Alaska National Interest Lands Conservation Act or “ANILCA.” Section 1002(e) is very clear on what must happen when such a plan is submitted, including a requirement that the Secretary of the Interior “shall promptly publish notice of the application and the text of the plan in the Federal Register and newspapers of general circulation in the State.” When do you anticipate publishing this notice?

37. Section 1002(e) also states that “the Secretary shall hold at least one public hearing in the State for purposes of receiving the comments and views of the public on the plan.” When do you anticipate holding such a hearing (or hearings)?

Response to 36 and 37: Based on long-standing legal interpretation, FWS has found that the underlying statute and its 1983-84 implementing regulations bar the Service from considering the exploration plan and permit application.

38. In June 2013, during a speech, former Deputy Secretary, David Hayes, announced that the Interior Department will soon be asking the general public to identify areas that should and should not be open to oil and gas leasing. While listening and receiving feedback from the public is important, without access to extensive data and teams of biologists, geophysicists, engineers, and geologists, what level of importance will be placed on an individual’s suggestions in determining where is most appropriate for oil and gas leasing? Can you provide more information regarding this change in policy?

Response: The Department, as steward of our public lands and waters and through rigorous dialogue with stakeholders, must strike the right balance of meeting the interests of local communities and public owners of the resources as the President’s “all of the above” energy strategy is advanced. The Department’s management actions will continue to be developed and implemented in accordance with applicable law and regulations and supported by the best available science.

DRAFT

Questions from Rep. Bordallo

39. Given the current fiscal climate, priorities need to be made. In general, where do you place invasive species prevention and mitigation in your list of priorities? Specifically, the brown tree snake is responsible for many bird extinctions, loss of pollinating bats and increased power outages on our island. In response, the Refuge has installed the Multispecies Barrier Fence to keep out them out of 125 acres of the refuge. Unfortunately, with only six full time refuge staff we cannot do any intensive invasive species removal inside the fence. The refuge's Comprehensive Conservation Plan entails removal of the brown tree snake and eventual reintroduction of our birds. Do you foresee continued funding and support for brown tree snake mitigation?

Response: Addressing invasive species is a high priority for the Department. The Department's FY 2014 Budget Request sought an overall increase of about \$23 million for invasive species prevention, management, control, and coordination. The USGS requested an increase of \$500,000 to address the highest priority needs for control and management of brown tree snake, including research on the development of landscape scale methods to suppress or eradicate snakes on Guam and to detect and eradicate incipient populations of snakes accidentally transported to other islands such as Hawaii and the Northern Mariana Islands.

While the budget request reduces FWS's invasive species control and management funding by \$507,000, the FWS will dedicate a small portion of Aquatic Invasive Species funding to continue to support the program. We intend to continue to provide funding for this effort, but priorities have shifted with growing concerns about the spread of continental aquatic invasive species, such as Asian carp.

The FWS also continues to work closely with the U.S. Department of Agriculture's Wildlife Services' brown tree snake program on Guam. Since its implementation, the rate of snake captures associated with cargo shipped to Hawaii has declined dramatically. The growth in United States military presence on Guam is causing increased air and sea traffic between Guam and other regions in the Pacific, including the continental United States. As a result, the Department of Defense's responsibility for brown tree snake control and interdiction at military and commercial facilities related to the military build-up on Guam was a component of a recently completed ESA Section 7 consultation with the FWS.

40. Guam is a beautiful island for both residents and our many tourists. It is also strategically important for the U.S. military. Recently, the Interior announced the Sentinel Landscape Partnership, a Public-Private collaboration aimed at preserving agricultural

DRAFT

lands, assisting military readiness and protecting wildlife habitat. I believe Guam may be a prime candidate for the program and am very interested in seeing how the pilot program fares at Base Lewis-McChord. Is this integrated approach something we may see more of from the Interior and what is the timeline for expansion of the program?

Response: This pilot program is a great example of coordination and collaboration between federal and local governments while showing how Farm Bill programs help support agriculture, rural America, the environment and national defense. Military readiness and wildlife habitat protection can go hand-in-hand with interagency, local government and private collaboration. The Sentinel Landscapes pilot will preserve the land's natural character and permanently protect critical habitat for declining species that could be listed under the Endangered Species Act, which is important for national defense, local economies and the conservation of natural resources. The goal is to restore and permanently protect critical habitat for three species that are proposed for listing under the Endangered Species Act, protect private and agricultural lands from development, and enable DoD's training mission to continue.

41. In Guam, the U.S. War in the Pacific National Historical Park houses some of our most beautiful places but more importantly it commemorates the WWII battles held in the Pacific Theatre. In response to sequestration there have been hiring freezes and program cutbacks. Like you mentioned in your statement and in addressing a similar question by Congresswoman Tsongas, these are unsustainable actions. If we do not solve the whole of sequestration will we be looking at permanent closure of some of our National Parks and refuges?

Response: The sequester was designed to be inflexible, damaging, and indiscriminate, and it is. The process put in place by the sequestration undermines the work that needs to be done on many fronts, and we will continue to see impacts across the country in all our bureaus during the coming months. The Department faces challenges across our bureaus to deal with the impacts of the sequestration. The short term steps that we will take –freezing hiring, eliminating seasonal positions, and cutting back on our programs and services – are not sustainable, as these actions which are eroding our workforce, shrinking our summer field season, and deferring important work cannot be continued in future years without further severe consequences to our mission.

42. The budget also affects the maintenance and improvement of our refuge. The roads in the refuge are in deplorable condition with potholes so extensive that traffic has moved to the dirt shoulder. The refuge has yet to be connected to an outside source of water and operations are dependent on roof rainwater collection and trucking in water during the dry

**Questions for Secretary Jewell
House Natural Resource Committee

DRAFT

season. Needless to say, visitation has decrease by 10% due to these factors. How will the Interior keep up with maintenance of the current parks and refuges?

Response: We have to balance addressing the most urgent needs, including for recreation; species and habitat conservation; and preservation of landscapes and historic and cultural resources with addressing the deferred maintenance backlog. The deferred maintenance backlog of the National Park Service and the Fish and Wildlife Service, as well as challenges faced by other bureaus, will only increase as a consequence of the sequester. The NPS is prioritizing capital investment funding to address its most important assets, such as mission-critical infrastructure and historic buildings and is removing non-essential assets, which reduces the number of structures that contribute to the backlog. The FWS is continuing to refine its condition assessment process, using maintenance action teams, actively pursuing local partnerships, carefully prioritizing budgets, and disposing of unneeded assets.

43. On Guam, there is already increased pressure on our resources due to global climate change. Steps need to be taken to both address the causes of climate change and prepare for climate change impacts. The refuge recently connected an 84 solar panel array to the grid to both offset the 40% rise in electric rates this fall and to help decrease carbon emissions. I commend you for your commitment to massive renewable energy projects in Nevada and Arizona but global climate change is a problem for everyone. What plans does the Interior have to expand its alternative energy infrastructure in more local settings to decrease our carbon footprint? Does the Interior have plans to seek partnerships either public or private to accomplish this goal?

Response: Interior is working broadly to implement energy efficiency and renewable energy at all levels. On Guam, the Office of Insular Affairs (OIA) and National Renewable Energy Laboratory (NREL) assisted the Guam Energy Task Force in developing a strategic energy plan that sets a goal of reducing Guam's dependence on fossil fuels by 20% by the year 2020 ("20x20 goal"). With continued funding from OIA and with the support of NREL staff, the Guam Energy Task Force recently completed an energy action plan that identifies near-term strategies that will likely have the greatest impact on reducing Guam's fossil fuel energy consumption. Through a partnership with the NREL, the Department is supporting the design, development, and ultimate deployment of small-scale, modular, renewable energy/diesel hybrid systems that harness local renewable energy resources and will reduce dependence on expensive diesel fuel in remote communities around the world.

DRAFT

Questions from Rep. Cramer

44. Secretary Jewell, as you know, the development of oil and gas is important for our energy security and high standard of living, not just in North Dakota, but the entire nation. Many of my constituents are justifiably concerned about the Interior Department's actions relating to the greater sage grouse, which would affect more than 800 square miles in three southwestern counties in North Dakota. I am greatly concerned about the Bureau of Land Management amending resource management plans to include "priority habitat areas" in resource management plans, which have a statutory responsibility to ensure multiple use activities, including mining, grazing, energy development, and agriculture. I understand that the BLM has already delayed or cancelled many projects in several western states as a result of this process. Can you assure me that your Department will follow its multiple-use mandates under the Federal Land Policy and Management Act and the Multiple-Use and Sustained Yield Act with regard to sage grouse under other ESA activities?

Response: The Department and the Bureau of Land Management are fully committed to sustainably managing public lands for multiple uses both now and in the future. The Federal Land Policy and Management Act of 1976 defines multiple-use as "the management of the public lands and their various resource values so that they are utilized in the combination that will best meet the present and future needs of the American people." Conservation of fish and wildlife habitat are important uses for which the Bureau of Land Management manages the public lands, as are mining, grazing, energy development, and many other uses. The land use planning process helps us determine the best use of resources on a local level.

The BLM, the U.S. Fish and Wildlife Service, and the U.S. Forest Service are currently working through the unprecedented task of amending resource management plans in several western states to identify and incorporate appropriate conservation measures to conserve, enhance, and restore greater sage-grouse habitat by reducing, eliminating, or minimizing threats to habitat. In North Dakota, the BLM is working in close cooperation with the North Dakota Game and Fish Department in developing the draft Environmental Impact Statement covering sage-grouse population areas within the state. The goals of this effort are to provide better protections for greater sage-grouse while continuing to support the use of public lands for mineral extraction, recreation, and other uses.

45. Secretary Jewell, within the Endangered Species Act "The Secretary may exclude any area from critical habitat if he determines that the benefits from such exclusion outweigh the benefits of specifying such area as part of the critical habitat, unless he determines,

DRAFT

based on the best scientific and commercial data available, that the failure to designate such area as critical habitat will result in the extinction of the species concerned.” In making a determination to exclude certain areas as critical habitat will you give considerable weight to not only private landowner interests, but the interests of individuals and employees of industries utilizing our nation’s vast resources? Will you take this ability to exclude certain areas seriously?

Response: Under the Endangered Species Act, the FWS and the National Oceanic Atmospheric Administration’s Fisheries Service designate critical habitat for each listed species; these are areas that are needed for the species’ conservation and recovery. Critical habitat does not create a refuge nor necessarily restrict development. It only affects federal lands or lands where there is a federal nexus such as the issuance of a permit or federal funding. Along with the benefits to listed species, the Services must also consider the economic impacts, the impacts on national security, and other relevant potential impacts in making designations of critical habitat. Probable economic impacts resulting from the designation of critical habitat are assessed in an economic analysis.

On August 28, 2013, the Services published a final rule to revise the regulations implementing the ESA so that a draft economic analysis of the probable impacts of a critical habitat designation is completed and made available for public comment at the same time the critical habitat proposal itself is published. Publishing a proposed critical habitat rule and making available the associated economic analysis at the same time means that public stakeholders will have more information at the time they are reviewing critical habitat proposals.

Under the new regulations, a summary of each economic analysis will be published in the Federal Register along with the proposed critical habitat designation, while the analysis itself will be made available on the Web (www.regulations.gov and other appropriate venues). The final rule also codifies standard Services’ practices for assessing the likely impacts of proposed critical habitat designations.

The Services are also planning to publish a proposal in the near future that will provide more clarity on the process for excluding lands from critical habitat designation. We recognize that understanding this process is important for the public, and we will request public input on the proposal. This proposal represents one important part of our efforts to improve the implementation of the ESA.

46. Secretary Jewell, on June 13, 2013, the Fish & Wildlife Service issued a Federal Register notice proposing to de-list (remove from the Endangered Species Act list) the gray

**Questions for Secretary Jewell
House Natural Resource Committee
July 17, 2013**

DRAFT

wolf in most areas of the United States, an action I agree with – and I want to confirm you stand by this action. Do you? I understand this rule is expected to be finalized in September, correct? If the Fish & Wildlife Service is sued by environmentalists, will you defend the agency's actions on this delisting?

Draft Response: The actions that were published in June 2013 – to remove the gray wolf from the List of Threatened and Endangered Wildlife but to maintain endangered status for the Mexican wolf by listing it as a subspecies – were proposed because the best available scientific and commercial information indicates that the currently listed entity is not a valid species under the ESA and that the Mexican wolf is an endangered subspecies.

The Department is committed ensuring that the public is well informed about the agency's actions related to the gray wolf and has the opportunity to provide comments regarding the proposed rule. On September 30, 2013, the FWS announced that it has reinitiated a scientific peer review process to obtain an independent and objective peer review of the science behind the proposal. The peer review process will be sponsored and conducted by the National Center for Ecological Analysis and Synthesis, a respected interdisciplinary research center at the University of California – Santa Barbara. The center will vet prospective reviewers to verify that they are able to provide an objective review and have no conflict of interest, culminating in the selection of 5 or 6 well-qualified scientists with professional qualifications and relevant experience.

Because of the significant public interest in this issue, it is important to ensure that all interested parties have the opportunity to provide comments concerning the proposed rule. With that in mind, FWS extended the public comment period on the proposed rule for a second time. In addition, to provide a forum for additional stakeholder input, the FWS also held five public hearings on the proposal, including in Denver, CO, Albuquerque, NM, Pinetop, AZ, and Washington, DC.

47. On April 2, 2013, OSM Director Joe Pizarchik responded to a letter from Chairman Hastings stating that since 2009 OSM has spent approximately \$8.6 million in developing a new stream buffer zone rule. The 2008 rule that has yet to be implemented took five years to complete, including 40,000 public comments, two proposed rules, and 5,000 pages of environmental analysis from 5 different agencies. Is such a comprehensive rewrite of OSM regulations justified or warranted at this time?

Response: While the Surface Mining Control and Reclamation Act of 1977 has resulted in significant improvements in contemporary mining, recent studies have substantiated that adverse environmental impacts continue in certain situations long after mine reclamation has been

DRAFT

completed. Streams have been adversely affected biologically from continuing water-quality discharges from reclaimed mines. In some cases, streams have been dewatered due to underground mining activities. Forest lands that sustain water quality and habitat have been fragmented or lost. Therefore, the Department, through the Office of Surface Mining Reclamation and Enforcement, has undertaken this rulemaking initiative, which is using the best science to modernize the bureau's rules in order to better protect streams from adverse effects of surface coal mining. OSM is currently developing a Draft Environmental Impact Statement for the rule that will analyze alternatives to address the impacts of burying and mining through streams, including the protection of aquatic communities in streams located on, adjacent to, and downstream from coal mining operations. The draft will also analyze alternatives to provide for the restoration of native forests eliminated during future mining. Finally, it will consider alternatives to further enhance restoration of mined lands to their approximate original contour in accordance with SMCRA.

48. The 2008 stream buffer rule has never been implemented nationwide since OSM agreed to rewrite the rule as part of a settlement agreement. A legal challenge to OSM's existing rule was recently reinstated. Do you plan to defend OSM's existing rule against legal challenge, or allow anti-coal groups to "sue and settle" the case as they did in 2010?

Response: The Federal government has filed motions for summary judgment in this litigation (*National Parks Conservation Ass'n v. Jewell* and *Coal River Mountain Watch et al. v. Jewell*), requesting, among other things, that the court vacate the 2008 Stream Buffer Zone Rule, reinstate the prior regulations, and remand the matter for further rulemaking because the defendants confessed legal error in failing to conduct consultation with the U.S. Fish and Wildlife Service under Section 7 of the Endangered Species Act.

49. In BLM's proposed rule governing the use of hydraulic fracturing on public lands, trade secret information can be withheld from disclosure rather than being submitted to BLM. However, the rule requires operators to make trade secret claims and provide the required justification for those claims. The rule even indicates that one of the tests for determining whether something is a trade secret is whether the disclosure of the information would harm the operator's competitive position. In fact, isn't it true that typically it is the service companies actually performing a hydraulic fracturing job that would hold the trade secret information, rather than the operators? Why did the BLM choose not to give service companies or other trade secret holders the opportunity to make and support their own claims? Does the BLM care about harm to a service company's competitive position? States like Colorado, upon which BLM based its rule, allow service companies to make and substantiate their own trade secret claims.

**Questions for Secretary Jewell
House Natural Resource Committee
July 17, 2013**

DRAFT

Response: The BLM holds the operator as the responsible party for any of the oil and gas operations and activities approved and permitted by the BLM in its name.

The personnel and service companies that the operator chooses for their operation have to meet the same conditions of the permit. The operator as the permitted party is responsible to fulfill the terms of the permit, but may claim trade secret protection on behalf of its suppliers and subcontractors, assuming that the information constitutes a trade secret.

50. In its cost-benefit analysis for the hydraulic fracturing rule, BLM estimates the likelihood of an incident resulting from a fracturing operation is 0.03 percent for a major incident and 2.70 percent for a minor incident. BLM does not indicate what it considers to be “major” or “minor” incidents. Would you be able to clarify in order to help us to determine whether these estimates are consistent with the findings of other organizations, such as the Groundwater Protection Council and the American Petroleum Institute that have also studied the environmental risks from fracturing operations?

Response: The BLM used those figures to illustrate the likelihood of possible risks associated with hydraulic fracturing. The BLM reviewed an Energy Institute survey of violations that occurred on shale wells and tight sands and shales in Louisiana, Michigan, New Mexico, and Texas. According to the BLM, data in the Energy Institute survey do not distinguish between minor versus major impacts across the hydraulic fracturing risks that the BLM's rule is intended to address. Nonetheless, the BLM looked at the violations classified as surface spills of fracturing fluids, casing and cementing, fracturing, groundwater contamination complaints, and characterized them as minor or major incidents. For purposes of the BLM rule, a major incident means noncompliance which causes or threatens immediate, substantial, and adverse impacts on public health and safety, the environment, production accountability, or royalty income. A minor incident means noncompliance which does not rise to the level of a major violation. The agency will continue to examine impacts cited by other groups, including the Groundwater Protection Council and the American Petroleum Institute.

DRAFT

Questions from Rep. Daines

51. Sage Grouse and Resource Management Plans:

As you know, Montana is heavily reliant on our resource management pretty heavily – for economic development, including for resource extraction, and outdoor recreation and tourism. I share your vision that these two goals (resource development and outdoor recreation) can co-exist. Another vital piece component of land management in Montana is local involvement. Land management decisions are best made right at home in Montana instead of here in Washington.

As you know, recently, the Bureau of Land Management issued three Resource Management Plans for public comment. The comment periods for these plans – Billings, Miles City, and the Hi-Line – were short. Both of our Montana Senators and I requested an extension of the comment period, as well as many of our constituents, due to the serious implications for resource management outlined in the RMPs, especially on Greater Sage Grouse conservation planning, outlined in the RMPs. Much of the proposed boundaries for priority concern and the Bureau's restrictions on activities in these areas have potential to impact the livelihoods of many Montanans. We're learning development is projected to increase and bring more economic benefits to our communities and grazing continues to be a central part of life throughout proposed Greater Sage Grouse habitat. Conserving this species is a high priority for our state and local communities. They have a lot to say about it and have much to contribute to your Department's planning process.

On May 22, 2013, I sent my a letter to you requesting a 120 day extension on the comment period for the Billings-Pompeys Pillar, Hi-Line, and Miles City Resource Management Plans on May 22, 2013. And did not receive a response until later in the day on July 17th. Why is that?

Can you explain why the Bureau refused to extend the comment period?

Response: The Department and the BLM apologize for the delay in the response. We appreciate the importance of these plans as they relate to the economies of local communities and states. For this reason, the BLM has emphasized participation by the public, partners, and other agencies. In accordance with planning regulations, all of the draft plans were made available for public review and comment for a full 90 days, with administrative review copies available to cooperating agencies at various times throughout the planning process. While we acknowledge the large scope of the documents, the 90-day public comment period could not be extended without jeopardizing the BLM's commitment to addressing greater sage-grouse habitat conservation in the time-frame necessary to inform the U.S. Fish and Wildlife Service's

**Questions for Secretary Jewell
House Natural Resource Committee
July 17, 2013**

DRAFT

Endangered Species Act listing decision which must be completed by the court-mandated date of September 30, 2015.

In addition to the formal 90-day comment period, the BLM held 34 formal public scoping meetings, conducted five community economic workshops, and provided numerous briefings for cooperating agencies, user groups, environmental organizations, industries, county commissions, tribes, congressional staffs, other agencies, and the BLM's Resource Advisory Councils. Collectively, the Montana plan revisions involved 57 cooperating agencies, including counties, state and federal agencies, tribes and grazing/conservation districts. Our managers and planning teams addressed and incorporated public scoping comments and issues submitted throughout the planning process and have provided newsletters and website updates to keep our stakeholders informed of our progress. We value public input and will continue to accept substantive comments throughout the process.

In the mega-settlement which you had referenced in a response letter to my constituents as the reason you could not extend the comment period, was just only the timing of the listing of the GSG species agreed to in that settlement? Or was the timing and issuance of proposed RMPs part of the settlement?

Response: The issuance of the proposed RMPs was not specifically part of the settlement of the ESA Deadline Multi-District Litigation filed against the Fish and Wildlife Service, but it is a critical component in the larger effort to conserve greater sage-grouse and potentially avoid the need for a listing at the time of the required decision.

Moving forward with Sage Grouse conservation in Montana, how closely is the BLM going to rely on state data?

Response: Sage-grouse conservation in Montana and the Dakotas is a multi-jurisdictional challenge due to fragmented land ownership patterns across large portions of sage-grouse habitat, making a collaborative approach essential. The BLM has been working with state fish and wildlife agencies, local working groups, and other organizations throughout the BLM's National Greater Sage-Grouse Planning Strategy process. The BLM has a long history of working cooperatively with the State of Montana, including using their data and mapping of sage-grouse habitat in the BLM plans. The Montana/Dakotas BLM is also involved in the Montana Governor's Greater Sage-Grouse Habitat Conservation Advisory Council, and we will consider the final state management plan when we formulate our proposed management actions for each land use plan.

DRAFT

52. Sage Grouse and Hard Rock Mining:

Madame Secretary: I have a quote from the HiLine Draft Resource Management Plan and this is what it says:

“The management of wildlife resources and habitat outside of special designations would seldom prevent locatable mineral development, but in order to avoid significant impact to wildlife, special conditions and possible relocation of exploration or mining development could occur. This relocation, as well as any additional mitigation, would create time delays and further expenses for locatable mineral development if not closing the area to mineral entry through withdrawal.”

It’s my understanding that the determining factor in the location of mineral deposits is the geology of an area. So if that’s the case how do you propose to relocate [mineral] “exploration or mining development” in a manner that’s practical and consistent with that does not seem like a practical solution to me nor does it seem to be consistent with the Federal Land Policy and Management Act of 1976?

Did you have any economic (mining) geologist or mining engineers work on this document? If there had been, I don’t understand how doubt the preceding s type of statement could would have been included in the Resource Management Plan.

Response: The BLM uses an interdisciplinary team, including solid minerals specialists, in the development of its RMP revisions and amendments. Information in the RMP is used to guide activities on BLM lands. When a Notice or Plan of Operations for a mine is filed with the BLM, the proposed exploration or mining of locatable minerals is reviewed to confirm that the operations conducted will comply with the RMP and not cause unnecessary or undue environmental degradation. If necessary, conditions or mitigating measures may be applied. Such measures, as referenced in the RMPs, could include relocation of infrastructure such as access routes, power lines, tailings impoundments, or leach pads. As analyzed in the quoted RMP section, these conditions of approval or modifications may be more likely in areas identified as valued wildlife habitat. Therefore, mineral development in wildlife habitat may be delayed or modified to include more prescriptive mitigation measures.

DOI in the News:

SECRETARY JEWELL TOURS PROPOSED NATIONAL MONUMENT AREA. The [AP](#) (1/26) reports that Interior Secretary Sally Jewell on Friday "toured Broad Canyon outside of Las Cruces before headlining a public meeting centered on federal legislation for protecting the Organ Mountains and other scenic areas in Dona Ana County." Jewell said "the area has a rich history as well as many opportunities for enjoying the outdoors through hiking and hunting." Jewell said, "Over the past few years, we've seen a groundswell of support from many in the community to ensure that these landscapes are celebrated and passed on to the generations of New Mexicans to come. Those efforts also have the potential to drive significant economic benefits to the region through a boost in tourism and outdoor recreation." AP coverage was also picked up by the [Washington Times](#) (1/24, 417K), the [Houston Chronicle](#) (1/24, 2.26M), and the [San Francisco Chronicle](#) (1/26, 2.88M).

In a separate story, the [AP](#) (1/26) reports that "several hundred people were expected to join Jewell, officials with the Bureau of Land Management and New Mexico's two US senators for a public hearing Friday afternoon in Las Cruces to talk about the proposed Organ Mountains-Desert Peaks National Monument."

The [El Paso \(TX\) Times](#) (1/26, Soular, 247K) reports that "supporters speculated" the visit "meant the Obama administration was at least considering a proposal to create the monument via a sometimes-controversial 1906 law that gives US presidents the power to grant monument status to public lands without approval from Congress." Also, "many opponents to the proposed Organ Mountains-Desert Peaks National Monument interpreted Jewell's visit in the same light, saying they worried Obama may be on track to declare the lands a national monument." Opponents "argued that the president should allow the national monument issue to be decided via the legislative route." The story also appeared at the [Las Cruces \(NM\) Sun-News](#) (1/26, 59K) and the [Silver City \(NM\) Sun-News](#) (1/27, 24K).

The [El Paso \(TX\) Times](#) (1/26, Soular, 247K) reports that "some 750 people packed into a ballroom at the Ramada Palms Hotel in Las Cruces to express their views to Jewell and to US Democratic Sens. Martin Heinrich and Tom Udall, who are sponsoring a congressional bill to create the half-million-acre monument. Some people were turned away at the door because the building was at capacity." According to the article, "attendees had wide-ranging reasons for supporting the measure, such as preserving wildlands for future generations, providing places for recreation and keeping it from development." However, "there was also diversity among opponents. Some criticized the national monument measure, contending it would hurt future growth, negatively impact ranching and result in more federal governmental control in the area." The story also appeared at the [Las Cruces \(NM\) Sun-News](#) (1/26, 59K).

The [Albuquerque \(NM\) Journal](#) (1/26, 288K) reports that "cheers and jeers erupted at a packed public meeting Friday in which US Interior Secretary Sally Jewell heard opinions for and against proposals to designate a ribbon of land in southern New Mexico a national monument." According to the article, "applause and shouts accompanied nearly every comment, both for and against the broader monument footprint." The article notes that "to close the two-hour meeting, Jewell asked for a show of hands in the somewhat thinned crowd: who supported no monument at all, a smaller monument or a larger monument – and the last show of hands won by far."

Also covering the story are the [Albuquerque \(NM\) Journal](#) (1/26, 288K), [KDBC-TV](#) El Paso, TX (1/26, 139) [KTSM-TV](#) El Paso, TX (1/26, 970), and [KFOX-TV](#) El Paso, TX (1/26, 2K).

HOUSE DEMOCRATS URGE INTERIOR TO TAKE ACTION, PROTECT NEW LAND. The [Environment & Energy Publishing](#) (1/26, 705) reports that a group of 109 House Democrats is urging Interior Secretary Sally Jewell to push President Obama "to use his executive authority to bypass a deeply divided Congress and designate more national monuments." According to the article, "led by Reps. Peter DeFazio of Oregon and Raúl Grijalva of Arizona, the top Democrats on the Natural Resources Committee and the Subcommittee on Public Lands and Environmental Regulation, respectively, the group submitted a letter today to Jewell urging the president to use the Antiquities Act of 1906 to designate more national monuments." In the "letter, signed by more than half the House Democratic Caucus, including pro-energy Democrats like California Rep. Jim Costa, they wrote that in the current partisan environment, 'it's becoming nearly impossible for Congress to make critical conservation decisions.'"

The [Huffington Post](#) (1/24, Sheppard, 11.54M) reports that "the letter notes that the House Natural Resources Committee had hearings on eight of 37 proposed land designations in the 113th Congress, and only one was passed in the House." In a statement, they wrote, "With only 121 legislative days scheduled for 2014, the time to

act is running out.”

Also reporting on the story is [The Oregonian](#) (1/26, 888K).

SECRETARY JEWELL ANNOUNCES NEW APPOINTMENTS TO BLM ADVISORY COUNCIL. The [Meade County \(SD\) Times Tribune](#) (1/26, 3K) reports that Interior Secretary Sally Jewell has “announced new appointments to the Bureau of Land Management citizen-based Dakotas Resource Advisory Council, which advises the BLM on public land issues.” BLM State Director Jamie Connell said, “The Resource Advisory Councils provide invaluable management advice and expertise to the BLM in Montana and the Dakotas. I’m happy to welcome our new members. I want to thank them for their commitment and service, and I look forward to their ideas and input as we strive toward reaching the common goal of effective, multiple-use land management across our region.”

BLAINE COUNTY COMMISSIONERS SUPPORT BOULDER-WHITE CLOUDS NATIONAL MONUMENT. The [Idaho Statesman](#) (1/27, 205K) reports that the Blaine County commissioners are “drafting a resolution in support of the concept of a Boulder-White Clouds National Monument after 50 people gave their views on the issue Wednesday night.” According to the article, “many in the crowd agreed with former Idaho Gov. Cecil Andrus and a coalition of environmental, sportsmen and recreation groups that the time has come for more protection for the two mountain ranges and the public lands in the East Fork of the Salmon River watershed.”

INTERAGENCY GROUP ON INSULAR AREAS TO HOLD MEETING. The [Samoa News](#) (1/26, 682) reports that “governors and Congressional delegates from US territories will convene later next month in Washington D.C. for the annual meeting of the federal Interagency Group on Insular Areas, and the session, which will be held at the US Department of Interior’s conference room, covers a wide range of issues, according to the meeting agenda.” The IGIA co-chairs by Interior Secretary Sally Jewell and David Agnew, Deputy Assistant to the US President & Director of Intergovernmental Affairs will “provide speeches at the opening of the one-day meeting on Feb. 24, after which governors and delegates will make their presentations.”

PRESIDENTIAL TASK FORCE ON WILDLIFE TRAFFICKING DISCUSSING IVORY TRADE. The [Maine Antique Digest](#) (1/26) reports on The Proposal for a National Ban on Ivory. The article notes that a Presidential Task Force on Wildlife Trafficking was created by Executive Order and signed by President Obama on July 1, 2013. Jessica Kershaw, spokeswoman for the Interior Department, discussed “what was currently being considered by the advisory council to the task force.” Kershaw said: “Ideas being considered and discussed by the advisory council include administrative actions that the US Fish and Wildlife Service could take to increase restrictions on import and export; and to impose strict controls on domestic elephant ivory trade, effectively ending commercial ivory trade within the United States.”

INTERIOR MAP PROVIDES ONGOING AWARENESS OF NATURAL HAZARDS. The [Directions Magazine](#) (1/26, 114K) reports that “a new Interior Department website offers the public as well as federal, state and local emergency management communities online maps containing the latest available information on earthquakes, earthquake shakemaps, streamflow data and floods, volcanoes and wildfires, as well as information on severe weather hazards.” According to the article, “the Interior Geospatial Emergency Management System (IGEMS), managed by the department’s Office of Emergency Management, provides ongoing awareness of natural hazards, enabling individuals to monitor and analyze natural hazard events as they occur.”

PALAU AMBASSADOR SEEKS APPROVAL OF FUNDING AGREEMENT. The [Islands Business](#) (1/27) reports that “Palau Ambassador to the United States Hersey Kyota is asking American officials to approve the 2010 Compact funding agreement between their two countries.” According to the article, “the agreement would provide steadily decreasing US assistance to Palau, totaling approximately US\$215 million, for fiscal years 2011 through 2024” Kyota’s letter was “addressed to U.S. Senate Majority Leader Harry Reid, Secretary of State John Kerry, Secretary of Defense Chuck Hagel and Secretary of the Interior Sally Jewell.”

ADDITIONAL COVERAGE OF OUTDOOR RETAILER WINTER MARKET. The [AP](#) (1/26, Foy) reports that Peter Metcalf, CEO of Salt Lake City-based Black Diamond Inc., introduced Interior Secretary Sally Jewell to “his company’s ‘soft’ and ‘sensual’ line of jackets and stretch-woven pants as the Outdoor Retailer Winter Market opened Wednesday.”

ADDITIONAL COVERAGE OF COASTAL WETLANDS GRANTS. Additional coverage of the "\$16.5 million in grants to support 21 critical coastal wetland projects in 12 states" was provided by the [Kansas City \(MO\) infoZine](#) (1/26, 175), the [Portland \(ME\) Press Herald](#) (1/27, 279K), and the [RealEstateRama](#) (1/24, 210).

ADDITIONAL COVERAGE OF PILT FUNDING. Additional coverage of PILT funding was provided by [USA Today](#) (1/24, Chebium, 5.82M) and the [AP](#) (1/24, Neary).

ADDITIONAL COVERAGE OF SAGE GROUSE MEETING IN COLORADO. Additional coverage of the sage grouse meeting attended by Interior officials in Colorado was provided by the [Washington Times](#) (1/27, Wolfgang, Richardson, 417K) and the [Steamboat Springs \(CO\) Pilot](#) (1/24, 26K).

IZEMBEK ROAD DECISION CRITICIZED. In an op-ed for the [Alaska Dispatch](#) (1/24, 7K), former governor of Alaska Frank Murkowski writes that the decision by the FWS "to deny to the people of King Cove road access to the all-weather Cold Bay airport" in order to protect birds is "outrageous." He notes that "at the same time", FWS is "planning to disturb the peace of a long established bovine population, sending a very different message to the cows on Chirikof Island." In conclusion, Murkowski asks: "Can't the Fish and Wildlife Service take care of the people at King Cove with a one-lane gravel road to provide them safe, reliable, and affordable medical access in times of bad seas or bad weather in the area? And for that matter, can't we carve out one small island and leave the cows alone to rule themselves without being milked by big government?"

CONGRESS URGED TO PAY UNESCO DUES. The [San Antonio Express-News](#) (1/26, 746K) editorializes that "the assertion recently by a spokeswoman for UNESCO that US nonpayment of dues will not affect the nomination of San Antonio's missions for World Heritage Site designation was good to hear." However, the paper notes that "politics dictate the United States' refusal to pay dues and it is not then far fetched that political payback might result." According to the editorial, "this is part of the reason San Antonio Democratic Rep. Joaquín Castro, a member of the House Foreign Affairs Committee, recently urged resumption of the dues in the recent omnibus spending bill." Although the "\$700,000 didn't make it into the bill," the paper argues that "it should have."

SKI INDUSTRY SUPPORTS "WATER RIGHTS PROTECTION ACT." For the "Water Currents" blog of the [National Geographic](#) (1/24, 40.49M), Amy Kober of Amercian Rivers writes that the Aspen Skiing Company and the National Ski Areas Association are "currently supporting a bill that could dry up rivers, damage fish and wildlife habitat, and hurt fishing and boating." The HR 3189, the "Water Rights Protection Act," would "allow private water users to dry up rivers on public lands with no regard for other uses or needs." According to Kober, "the bill would prevent federal agencies within the Department of Agriculture and the Department of the Interior from ensuring enough water flows in our rivers – which is essential for healthy streams, local economies, and endangered species."

America's Great Outdoors:

National Park Service:

LAWMAKERS PROPOSE NATIONAL PARK STATUS FOR PULLMAN. The [AP](#) (1/24) reports that "members of Illinois' congressional delegation say they're introducing federal legislation to create a national park in Chicago's historic Pullman neighborhood." Sens. Dick Durbin and Mark Kirk, along with Rep. Robin Kelly, "announced Friday that they're introducing a proposal that'd give Pullman national park status." AP coverage was also picked up by the [Washington Times](#) (1/24, 417K).

The [Chicago Tribune](#) (1/26, Skiba, 2.32M) reports that "the lawmakers' proposal calls for the state to give the National Park Service the Pullman Factory Complex, including the clock tower building and other edifices on about 13 acres of land. Future land and buildings could be given to the federal government by donation, transfer or exchange only, the proposal says."

The [Chicago Sun-Times](#) (1/26, Schlikerman, 1.15M) reports that Sen. Dick Durbin said, "Creating the Pullman National Historical Park will allow the National Park Service to better represent America's cultural and ethnic diversity while providing a boost to the local economy." Rep Robin Kelly said, "This bill is for the Pullman community, where countless residents have worked heroically over decades to preserve and restore this national

treasure. And this bill is for future generations of Americans, who will one day visit Pullman and learn about the vital role it played in our nation's labor history and civil rights history."

Also reporting on the story is the [Crain's Chicago Business](#) (1/24, 158K).

FUTURE OF OZARK NATIONAL SCENIC RIVERWAYS UNDER DEBATE. The [St. Louis Post-Dispatch](#) (1/26, 866K) reports that the Ozark National Scenic Riverways is "caught in a bitter battle over its future." Supporters of a plan released by the NPS argue "the park has been overwhelmed by visitors, especially during the summer, and the activity needs to be reined in." On the other hand, opponents "say that's nonsense," and "some of them — mostly people living near the rivers — want the entire park to be stripped of federal control and handed over to the state." With the public comment period ending Feb. 7., "the last of four public meetings, held in places ranging from Van Buren, Mo., to Kirkwood, recently wrapped up," attracted "more than 1,500 people."

RIM OF THE VALLEY NATIONAL PARK PROPOSAL FACES OPPOSITION. The [San Gabriel Valley \(CA\) Tribune](#) (1/25, 128K) reports that "designating nearly 400,000 acres from the coastal edge of the Santa Monica Mountains through Simi Hills, the Santa Susanna, Verdugo and San Gabriel mountains as a new National Recreation Area managed by the US National Park Service will be an uphill battle." The proposal "faces opposition from property rights groups, anti-government activists and the NPS itself which has said it doesn't have the money to take on new parks." and "although many grass-roots and even national environmental groups support the proposal, it suffers from confusion over where to place the boundaries and what to name it."

9/11 MUSEUM OFFICIALS DEFEND ADMISSION CHARGE. [Newsday](#) (1/26, 1.52M) reports that "officials at the 9/11 museum stood firm on their \$24 admission charge Friday, saying the fee will keep the 'world-class museum' that showcases 'the best of humanity in the worst of times' open and financially secure." Joe Daniels, president of the National September 11 Memorial & Museum, "said the museum has applied for additional federal funding," and "if the museum receives federal assistance, officials will 'absolutely' consider offering discounts." Meanwhile, "some other 9/11 families are opposed to a plan to entomb at the museum the unidentified remains of people killed in the attacks," and "they are asking elected officials to support a plan to have the National Park Service take over the memorial and museum."

GRAND TETON HAD STRONG YEAR DESPITE SHUTDOWN. The [AP](#) (1/27) reports that "Grand Teton officials say the national park had a strong year in 2013, despite a partial federal government shutdown and stagnating budgets." The park "saw 4.1 million visitors compared to 3.9 million in 2012." Park spokeswoman Jackie Skaggs said "the fact that we were shut down in a relatively popular month was encouraging and pleasantly surprising to be up by that much."

NPS EXCAVATING CASTLE ROCK CUT. The [AP](#) (1/26) reports that "a popular shortcut for Lake Powell boaters is being dredged as the National Park Service capitalizes on the lake's low water level." The article notes that "Castle Rock Cut has been closed since February 2013 because of low water." The NPS "hopes that deepening the cut will allow it to be used more often in the future."

Also reporting on the story is the [AP](#) (1/26, Betz).

HATTERAS LIGHTHOUSE FOUNDATION STONES THREATENED. The [AP](#) (1/26, Waggoner) reports that "as erosion continues to threaten the area" near the Cape Hatteras Lighthouse "and sand from storms such as Isabel and Sandy covers" the foundation stones, "Hatteras Island residents now want the stones moved to the lighthouse." However, "moving them is no easy job and probably expensive, especially since the Cape Hatteras National Seashore budget is \$2 million less than it was in 2010." Instead, the NPS "says the stones will be uncovered one more time in the spring, making sure they still form a circle, and then will be mostly left to nature's forces."

ANNUAL TALLY FINDS 132 BALD EAGLES AT LAKE MEAD. The [AP](#) (1/26) reports that "an annual tally found 31 fewer bald eagles this year in the Lake Mead National Recreation Area than in 2013, but the number was still the fifth-highest total since counts began in 1991, officials said." Ross Haley, an NPS wildlife biologist, said, "It's lower, but it's not anything to be concerned about."

MULE DEER POPULATION DECLINES IN SOUTHWEST COLORADO. The [AP](#) (1/26, Mimiaga) reports that

"mule deer numbers are declining in Southwest Colorado, with populations near Groundhog Reservoir and Mesa Verde National Park suffering the largest declines." According to the article, "trends for the past 15 years show a consistent drop in estimated populations in the region."

MOUNT RUSHMORE SOCIETY'S GIFTS HELPS NPS. The [Rapid City \(SD\) Journal](#) (1/26, 103K) reports that the Mount Rushmore Society's contributions to the Mount Rushmore National Memorial "totaled \$432,745 by the end of its 2013 fiscal year." The article notes that "the society's 2013 contributions included a \$100,000 donation for continued sculpture maintenance, which is the first of five \$100,000 gifts pledged for sculpture preservation."

EARHART RETIRES FROM FORT DONELSON NATIONAL BATTLEFIELD. The [Clarksville \(TN\) Leaf Chronicle](#) (1/24, 59K) reports that after thirty years with the NPS, Mitchell Earhart retired from the Fort Donelson National Battlefield on Jan. 9. Earhart started "his career at the national park as a Park Aide, soon being promoted to National Park Ranger, where he interpreted the resources of the battlefield, its stories, and of the national significance of the 1862 engagement and campaign." According to the article, "the preservation legacy that Earhart has left behind includes the various historic monuments, earthworks, stone walls, and buildings, on which he worked with his colleagues on numerous projects."

NPS RETHINKS APPROACH TO MIGRATORY SPECIES. For the "Goat" blog of the [High Country \(CO\) News](#) (1/26, 74K), Ben Goldfarb writes about "a new analysis, published by a team of wildlife experts last week in the *Journal Conservation Biology*, that identifies a fundamental problem facing park managers around the country: 'The fragmented system of national parks is not sufficient to maintain migratory species or processes.'" The paper "offers a blueprint for addressing that challenge – one that could substantially change how America's best idea pursues its mission." He notes that "among the paper's strongest recommendations is for the 'functional (not statutory) expansion of park boundaries' – expanding NPS' influence without expanding its holdings."

Bureau of Land Management:

BLM SEEKS IDEAS TO HELP MANAGE WILD-HORSE OVERPOPULATION. The [Washington Post](#) (1/27, Bernstein, Dennis, 4.28M) reports that the BLM is tasked with the "decades-old problem" of managing the nation's wild horses. According to the article, "already it manages 50,000 horses and burros it has rounded up and sent to pastures and corrals," but the bureau is "rapidly running out of places for more." Now, by allocating "about \$1.5 million from the new budget agreement for fiscal 2014, the agency is ready to take another shot at one of the West's most intractable wildlife problems." The BLM is "inviting anyone with a legitimate idea of how to curb the horse and burro populations to step up and propose it." The BLM will "study the ones it finds most promising and try again to find a solution."

REP. WALDEN SEEKS SAGE GROUSE COMMENT EXTENSION. The [Ontario \(OR\) Argus Observer](#) (1/26, 19K) reports that Rep. Greg Walden has announced that he has urged the BLM "to extend its comment period for its draft proposal for sage-grouse management." In a letter to BLM Deputy Director Neil Komze, Walden wrote, "Many Oregonians have told me about the drastic impact this draft plan could have on rural communities throughout the West. They've also told me that complying with the deadline for comments is challenging due to the lack of availability of the document and complexity of the matter." He continued, "Extending the public comment period by 30 days would provide those wishing to provide comment the time they need to review the document and provide thorough comments. Local communities are most affected by the land management decisions, and residents deserve the opportunity to have their input incorporated into the final decisions."

Also reporting on the story is [KTVZ-TV](#) Bend, OR (1/26, 1K).

FEDERAL AGENCIES WORKING ON PLAN TO SAVE SAGE GROUSE. The [Twin Falls \(ID\) Times-News](#) (1/26, 56K) reports that "as sage grouse numbers and habitat shrink," the BLM and Forest Service have "scrambled to create a plan to save the bird from being listed as endangered." According to the article, "at stake is the management of mining, grazing, off-road travel, power lines, renewable energy and oil and gas development on more than 11 million acres in Idaho." But "while grazing is of primary concern locally, federal biologists don't consider it one of the state's top threats to sage grouse."

NEW MANAGER OF SAN JUAN ISLANDS NATIONAL MONUMENT NAMED. The [Journal of the San Juans](#)

[\(WA\)](#) (1/26) reports that Marcia deChadenedes has been named "the full-time manager of the San Juan Islands National Monument." The announcement was made Jan. 23 by BLM Spokane District Manager Daniel Picard. Picard said, "Marcia comes to us from the Colorado State Office, where she has been the National Conservation Lands Program Lead. She has several years of experience with the BLM in the NCL and National Monuments arena. Marcia also has an extensive background in museum management/ curation, national scenic trails, and cultural/heritage program development and management."

Fish and Wildlife Service:

FEDERAL GOVERNMENT OFFERS DEAL TO LANDOWNERS IN PRAIRIE CHICKEN AREAS. The [AP](#) (1/26, Plushnick-masti) reports that "the federal government is offering first-of-its-kind legal protections for landowners who implement conservation measures to protect the lesser prairie chicken's dwindling populations across five states." Under the deal, "those who take steps to conserve and preserve habitat will receive a letter guaranteeing they will not be fined or prosecuted if lesser prairie chickens are found dead on their property." The decision is "designed to ease the concerns of landowners, ranchers and the energy industry that they would no longer be able to operate in the bird's habitat if the prairie grouse is listed as threatened under the Endangered Species Act." According to the article, "the agreement could also serve as a model for other areas where industry and landowners could be impacted by a threatened or endangered animal." FWS Director Dan Ashe said, "As long as they continue to implement the ... conservation plan then they have nothing to fear from the Endangered Species Act or the US Fish and Wildlife Service."

NEVADA PROTECTS 3,800 ACRES IN CONSERVATION DEAL. The [AP](#) (1/26) reports that "thousands of acres of ranchland along a scenic river in southern Douglas County will be protected under a conservation easement." An agreement "announced last week preserves about 3,800 acres of the Fairfield Ranch, a move conservationists and land managers say will protect critical sage grouse habitat and the area's natural values." The article notes that "ranch owners Alan and Cindy Horn donated the conservation easement along with a stewardship endowment to The Nature Conservancy." Ted Koch, Nevada supervisor for the FWS, said "the deal demonstrates the value of conservation easements in protecting habitat for the bistrate sage grouse, which experts say number only about 5,000 birds."

REP. HASTINGS CALLS FOR REFORMS TO ENDANGERED SPECIES ACT. The [Yakima \(WA\) Herald-Republic](#) (1/26, 86K) reports that Rep. Doc Hastings is calling for reforms to the Endangered Species Act. Hastings said, "Very generally, those of us in the Northwest have been hit by impacts of the Endangered Species Act more than anybody. The economy that is based here is natural-resource based, with water, and with the timber industry, so whenever you have laws that impact natural resources, they are going to impact the economy." Hastings "believes the law takes too much of an economic toll, leaves too much room for litigation by environmental groups and lacks an emphasis on getting species recovered and off the list," and "he called legislation to reform the act a priority for the year."

REWARD MORE THAN DOUBLES IN SHOOTING OF WHOOPING CRANES. The [AP](#) (1/24) reports that "the reward being offered for information in the shooting and death of a mated pair of whooping cranes in western Kentucky has more than doubled with contributions from conservation and animal protection groups." The FWS "initially announced a \$7,200 reward for information in the case but said Friday it has grown to \$15,250."

NEVADA URGED TO FIGHT SAGE GROUSE DESIGNATION. The [Ely Daily Times](#) (1/24, 776) editorializes against the proposal by the FWS to propose the bi-state greater sage grouse as threatened. The paper claims that the agency "has been known to alter the data to satisfy its environmental constituency, who balk at the idea of killing one species to protect another." It concludes that Nevada "should attack this problem from all fronts, including filing suit in federal court to point out the duplicity of the federal agencies making decisions that should be, and already have been, made by the states and counties."

US Geological Survey:

USGS TEAM TO STUDY TRINIDAD-AREA EARTHQUAKES. The [AP](#) (1/24) reports that a USGS research team "plans to visit the Las Animas County area around Trinidad to study a recent series of minor earthquakes, which in the past have been blamed on wastewater injection wells from drilling projects." According to seismologists,

"there were three earthquakes Wednesday and four more this month." Justin Rubinstein of the USGS said "five of the recent quakes were at least a magnitude of 2.5 and need to be studied."

ADDITIONAL COVERAGE OF NEW MADRID FAULT ZONE. Additional coverage of the New Madrid fault zone was provided by the [AP](#) (1/24) and [NPR](#) (1/24, Neuman, 465K).

Securing America's Energy Future:

Renewable Energy:

GOP SPLIT ON SOLAR ENERGY. The [New York Times](#) (1/26, Schwartz, Subscription Publication, 9.61M) reported that "solar energy is fast becoming one of the fracture lines dividing the conservative movement's corporate and libertarian sides." Conservatives, such as Barry Goldwater Jr., son of the 1964 Republican nominee for president, and former Arizona Republican Part chairman Tom Morrissey have rushed to defend solar energy against utilities who feel that solar users aren't "paying their fair share to maintain the power grid." Meanwhile, the American Legislative Exchange Council, "which helps pro-business Republicans across the country write legislation," continues to support utilities in the solar energy debate and "has successfully urged several states to fight Federal mandates for adopting."

BOR RELEASES SUSTAINABLE ENERGY STRATEGIC PLAN. The [Hydroworld](#) (1/26, 151) reports that the BOR has "released a sustainable energy strategic plan that includes hydroelectric power as a means of increasing the western US' power supply."

EAGLE TAKE POLICY CRITICIZED. The [Hazelton \(PA\) Standard Speaker](#) (1/26, 1K) editorializes that a new Interior Department of rule, giving the wind "industry a nearly free pass for the deaths of bald and golden eagles, should be rescinded." According to the paper, "the rule itself begs the question: If operators have to establish additional protective measures if they kill too many eagles, why not just mandate those measures in the first place?" In conclusion, it argues that "rather than giving the industry a pass, the Department of the Interior should mandate use of all available technology to protect birds and that wind farm siting decisions take into account potential harm to eagle populations."

The [Watertown \(NY\) Daily Times](#) (1/27, 63K) also criticizes the rule.

Onshore Energy Development:

EIGHT ACTIVE COAL FIRES BURN IN PENNSYLVANIA. The [AP](#) (1/26) reports that there are "eight active coal fires in Lackawanna and Luzerne counties on record with the state Department of Environmental Protection." According to USGS research geologist Allan Kolker, "carbon dioxide, carbon monoxide, sulphur dioxide, nitrogen oxides, fine particles and toxic trace elements such as arsenic, mercury and selenium, are all byproducts of coal fires." The article notes that "extinguishing these fires would cost \$1 million to \$2 million on the low end, ranging up to more than \$20 million for the fires at Laurel Run."

AP coverage was also picked up by the [New Jersey Herald](#) (1/26, 60K) and the [Wilkes-Barre \(PA\) Citizens' Voice](#) (1/26, 132K).

CBO: BILL BLOCKING STREAM BUFFER ZONE WOULD NOT HAVE IMPACT ON BUDGET. [Politico](#) (1/26, Guillen, 464K) reports that the Congressional Budget Office says "H.R. 2824, a bill blocking the Interior Department from issuing any new stream buffer zone rules for at least five years and directing it to implement a 2008 rule the administration is currently re-writing, would not have a significant impact on the federal budget." According to the article, that's because "the existing federal proceeds from the area affected by this bill are small, and because it is unclear whether the rule imposed by this bill would be more or less restrictive than the rule that OSM will impose under current law."

BLM DEVELOPING MANAGEMENT FOR WYOMING'S PUBLIC LANDS. The [Casper \(WY\) Star-Tribune](#) (1/27, 90K) reports that the BLM is "developing a once-every-20-years resource management plan for some 13 million acres of public land in Wyoming, including the Red Desert." The article notes that "the stakes for this round of

rulemaking are especially high." It notes that "domestic oil and gas production is booming," and "energy companies are exploring more federal lands for potential development, bolstered by new technology capable of unlocking previously inaccessible reservoirs of hydrocarbons."

ANALYSTS FORECAST INCREASE IN COAL PRODUCTION. The [Gillette \(WY\) News Record](#) (1/26, 19K) reports that Wyoming's Consensus Revenue Estimating Group and the US Energy Information Administration both forecast slight increases in coal production in 2014. However, the article notes that BLM "coal lease sales drew attention this year in the form of a low bid in one case and no bidder in another."

ENERGY INDUSTRY STILL WAITING IMPLEMENTATION OF NEW BEETLE RULE. The [Oklahoman](#) (1/26, 345K) reports that "the American Burying Beetle, classified as an endangered species since 1989, has slowed pipeline construction and inflated project costs throughout the eastern third of the state." The FWS "more than a year ago suspended its established practice of requiring companies to bait and trap beetles before moving the insects away." The article notes that "new rules still awaiting implementation are expected to require companies to obtain an 'incidental take' permit for the beetle by purchasing conservation credits," but "the rules have been delayed more than a year."

EPA ADMINISTRATOR DEFENDS AGENCY'S HANDLING OF THREE FRACKING INVESTIGATIONS.

[Bloomberg News](#) (1/24, Kovski, 1.91M) reported that EPA Administrator Gina McCarthy wrote a letter in response to Natural Resources Defense Council President Frances Beinecke, who accused the agency of "a troubling trend of abandoning investigations of hydraulic fracturing before they are completed," referring to the three withdrawn investigations near Range Resources Inc. gas wells in Texas, Encana Corp gas wells in Wyoming and Cabot Oil & Gas Corp. gas wells in Pennsylvania. McCarthy said in the letter that "the EPA in its investigations worked closely with individual states, 'which have key capacity and regulatory authority relevant to unconventional oil and natural gas extraction.'"

Offshore Energy Development:

ENVIRONMENTAL GROUPS PLAN TO PRESSURE WHITE HOUSE TO BLOCK ARCTIC DRILLING. The [Washington Examiner](#) (1/24, Colman, 319K) reports that "environmental groups plan to pressure the White House to block offshore drilling in the Arctic as Royal Dutch Shell gears up to start drilling there this summer." According to the article, "in a Jan. 16 letter, 18 green groups urged President Obama to ditch his 'all of the above energy' strategy, including Arctic drilling, saying that the policy 'would be fundamentally at odds with your goal of cutting carbon pollution and would undermine our nation's capacity to respond to the threat of climate disruption.'"

Court Decision Rejecting Environmental Analysis Of Arctic Drilling Welcomed. For "The Blog" of the [Huffington Post](#) (1/24, Sakashita, 11.54M), Miyoko Sakashita, Oceans Director, Center for Biological Diversity, writes that an appeals court decision saying "the federal Interior department wrongly sold leases to drill for oil and gas in the Chukchi Sea off the north coast of Alaska." According to Sakashita, "the decision confirms what so many of us have known all along: we have no business approving offshore drilling in the Arctic – a high-risk environment where an oil spill would be impossible to clean up and put wildlife directly in harm's way."

Additional coverage of the Ninth Circuit ruling rejecting a federal environmental analysis of Arctic drilling was provided by [Salon](#) (1/26, 613K), [Penn Energy](#) (1/26, 128), and the [Law 360](#) (1/26, 18K).

LOCAL WORKSHOP TO FOCUS ON MINORITIES, BP RESTORATION. The [Pensacola \(FL\) News Journal](#) (1/27, 151K) reports that representatives of the Interior Department and the state Florida will "visit Pensacola on Tuesday to discuss how minorities can influence the use of millions of dollars in fines arising from the BP oil spill." The workshop will "focus primarily on early restoration funding allocated through the Natural Resource Damage Assessment process." The article notes that "a town hall meeting will be held later in the day to get public input on the use of about \$26.6 million in NRDA funds for early restoration projects in Escambia and Santa Rosa counties."

Tackling America's Water Challenges:

BOR STRESSES CONSERVATION DURING PRESENTATION. The [Fresno \(CA\) Bee](#) (1/24, 327K) reports that "federal water leaders Friday painted a dire picture for California's water managers – key reservoirs down to 58% of average and Sierra watersheds with less than 15% of expected rain and snow at this point." The BOR "made a presentation at the annual regional water-users gathering in Reno." According to the article, "after two below-average winters and a record-setting dry spell this winter, conservation was the urgent message."

Also reporting on the story is the [Red Bluff \(CA\) Daily News](#) (1/26, 20K).

BOR CUTS COLORADO RIVER FLOW. The [East County \(CA\) Magazine](#) (1/26) reports that "for the first time ever," the BOR has ordered that supplies of water from the Colorado River and Glen Canyon Dam be slashed. Upper Colorado Regional Director Larry Walkoviak noted, "This is the worst 14-year drought period in the last hundred years." Water released from Glen Canyon Dam at Lake Powell will be cut "by 750,000 acre-feet this year—enough water to supply three quarters of a million homes."

LAWMAKERS SEND LETTER TO BOR ON CALIFORNIA WATER POLICIES. The [Ridgecrest \(CA\) Daily Independent](#) (1/25, 23K) that "California lawmakers in the Central Valley, including Sen. Jean Fuller and Sen. Andy Vidak, co-authored a letter" to BOR Commissioner Michael Connor and David Murillo, the regional director for the BOR's Mid Pacific Regional Office "regarding water flow to the Central Valley." They raised concerns "about the possibility of the Bureau of Reclamation not providing rescheduled water which was held over from the 2013-2014 contract year." The lawmakers argued that the BOR "cannot responsibly make this decision in contravention of their long standing policy on rescheduled water."

SEN. FRANKEN CONTINUES TO FIGHT FOR LEWIS & CLARK WATER SYSTEM. [KELO-TV](#) Sioux Falls, SD (1/26, 25K) reports that Sen. Al Franken said "he cares about the Lewis and Clark Regional Water System," and he "also admits that he is frustrated with local areas paying its share of the cost and the federal government not picking up the rest of the bill." Franken said, "The Bureau of Reclamation has to announce within 30 days of the signing of that thing where this \$27 million is going to be spent. There's six water projects that it could be spent for. We're going to be making the argument for a large part of that, hopefully the majority of that going towards Lewis and Clark."

Also reporting on the story is [KELO-TV](#) Sioux Falls, SD (1/26, 25K).

EDITORIAL: CALIFORNIA FACES THREE DROUGHTS. The [Los Angeles Times](#) (1/26, 3.07M) editorializes that "Southern Californians are facing not one drought but three, interconnected yet distinct, each bringing its own hazards and each requiring its own emergency and long-term responses." According to the paper, "the first drought is regional, caused by the lack of rain in our own mountains and our own backyards," the second drought is in Northern California, and "the third drought is occurring across the Western United States, and especially in the Rocky Mountains, which feed the Colorado River and by extension the other major component, after the Central Valley, of California's agricultural wealth." The paper argues that "the kind of system envisioned by the Bay Delta Conservation Plan would help all parts of California deal with global climate change and its inevitable result: precipitation that falls on the Sierra less like the snow that generations have come to rely on and more like the rain that comes, when it does, to Southern California in unmanageable torrents."

Additional coverage of the drought was provided by the [Stockton \(CA\) Record](#) (1/24, 123K), the [Los Banos \(CA\) Enterprise](#) (1/24, 11K), the [Rocklin & Roseville Today](#) (1/26), the [Sacramento \(CA\) Bee](#) (1/26, 749K), the [Tracy \(CA\) Press](#) (1/26, 55K), [KCRA-TV](#) Sacramento, CA (1/26, 122K), and [WBUR-FM](#) Boston (1/24, 64K).

Additional coverage of the Bay Delta Conservation Plan was provided by the [Stockton \(CA\) Record](#) (1/24, 123K) and the [Vacaville \(CA\) Reporter](#) (1/26, 57K).

GOV. MARTINEZ URGED TO REJECT GILA RIVER WATER DIVERSION PROJECTS. In an op-ed for the [Albuquerque \(NM\) Journal](#) (1/26, 288K), Duane Mosley, Market Manager, Farmers and Crafts Market of Las Cruces, write that "more than 300 New Mexico business owners and leaders across the state" have "sent a letter to Gov. Susana Martinez asking her to reject expensive and unpopular water diversion projects as she decides on best approaches to secure southwestern New Mexico's future water supply and to instead consider cost-effective, common sense alternatives." The letter was sent "as the New Mexico Interstate Stream Commission weighs options to divert water from the Gila River, a project permitted by the Arizona Water Settlements Act of

2004." Mosley argues that "any such project is an incredibly expensive undertaking," and "diverting water from the Gila would harm wildlife, limit recreation opportunities and almost certainly wither an important part of our local economy."

WSJOURNAL: CALIFORNIA WATER PROBLEMS EXACERBATED BY GOVERNMENT. In an editorial, the *Wall Street Journal* (1/27, Subscription Publication, 5.91M) writes that the California water shortage has been exacerbated by government interference. In particular, the diversion of water to aid the Delta Smelt and the environmental-group pressure to avoid building or expanding reservoirs have harmed the state's ability to deal with water shortages. The WSJ endorses House GOP legislation that would force water to be used for humans and less for green projects.

Empowering Native American Communities:

BIA AGAIN BACKS MECHOOPDA CLAIM TO LAND. The *Chico (CA) Enterprise-Record* (1/26, 90K) reports that the Mechoopda Indian Tribe has "received the go-ahead...to place 626 acres in Butte County in federal trust, with 91 acres of the site for gaming purposes." In the decision delivered Friday, the BIA said "the tribe is allowed to acquire land under the Indian Reorganization Act." Assistant Secretary of Indian Affairs Kevin Washburn wrote, "In reaching today's decision, the Department conducted a thorough review of the Tribe's history and application, and determined that the lands meet the 'restored lands exception' of the Indian Gaming Regulatory Act and the Department's implementing regulations, and that the Department is authorized to acquire the proposed lands in trust pursuant to the Indian Reorganization Act."

Also reporting on the story is the *Oroville (CA) Mercury-Register* (1/26, 1K).

PAYMENTS FROM COBELL SETTLEMENT ON THE WAY TO WYOMING. The *Casper (WY) Star-Tribune* (1/26, 90K) reports that "the second set of payments stemming from a settlement between the federal government and American Indian land trust beneficiaries is due to be distributed to members of the Eastern Shoshone and Northern Arapaho tribes within a few weeks."

COURT DISMISSES DESERT WATER AGENCY LAWSUIT. The *Palm Springs (CA) Desert Sun* (1/24, 110K) reports that "a federal judge has rejected a lawsuit brought by Desert Water Agency against the US government, saying the agency failed to show it was harmed by new regulations involving Indian land leases." In her decision dismissing DWA's lawsuit against the Interior Department, US District Court Judge Dolly Gee said that "while DWA contends that the regulations required it to stop imposing certain fees, it's undisputed that the water agency hasn't changed its practices."

INDIAN LAW AND ORDER COMMISSION REPORTS FINDS TRIBAL JUVENILE JUSTICE OUTDATED. The *Durango (CO) Herald* (1/25, 28K) reports on the findings from the final report, "Roadmap for Making Native America Safer," from the national Indian Law and Order Commission. The article focuses on the report's findings on tribal juvenile justice. Former US Attorney Troy Eid, who chairs the commission, said, "Juvenile justice for Native kids has not changed since the 1930s. They're automatically transferred into federal jurisdiction. It's just extraordinary no one has reassessed that. There isn't juvenile justice within the Bureau of Prisons. It doesn't exist there. There's no diversion, no drug courts, no education. There are no books, no programs to reintegrate into society, nothing. It's really very sad."

Top National News:

WHITE HOUSE WARNS IT WILL "BYPASS CONGRESS WHERE NECESSARY" IN 2014. Media coverage of the Sunday morning interviews of top White House aides Dan Pfeiffer and Jay Carney, in which they previewed Tuesday's State of the Union address, highlights their suggestion that President Obama may be forced to circumvent Congress this year in order to enact his agenda. The White House's comments on executive power generated reports on the two network newscasts that aired last night, as well as in print media, most of which forecast a dim fate for the President's agenda, while also casting GOP outrage over the warning that the White House would "bypass Congress where necessary" as an indication of continuing bickering and gridlock in Washington. Typical of much of the coverage was the *AP* (1/27, Elliott), which says the White House's "act-or-else posture bristled Republicans," and that with "the campaigns for November's election on the horizon, there's

scant reason for the White House to be optimistic about Republican support" for its agenda.

One exception was *ABC World News* (1/26, story 5, 1:10, Muir, 7.43M), where Jonathan Karl reported on "some reason for optimism at the White House" that "at least some Republicans" may be willing "to work with the President" on immigration reform. ABC, however, earlier in the story described the President's job approval rating in the latest ABC News/WPost poll (37%) as "brutal...for any president, but especially for one going into a State of the Union address where he hopes to get his agenda back on track." ABC then showed Carney saying on ABC's *This Week* yesterday, "The President sees this as a year of action. To work with Congress and bypass Congress where necessary to lift folks who want to come up into the middle class." On *NBC Nightly News* (1/26, story 7, 0:55, Holt, 7.86M), the *New York Times*' John Harwood also cited a "decent chance for immigration reform" and "long-shot hope for" most everything else in the President's agenda.

Reuters (1/27, Mason), meanwhile, notes that Pfeiffer said on CNN's *State Of The Union* that "the public ended 2013 very frustrated," and on *Fox News Sunday* that the President will say on his speech Tuesday that "he's going to have the pen and he's going to use those to move the ball forward to create opportunity."

The *New York Times* (1/27, Huetteman, Subscription Publication, 9.61M) leads its report on the interviews by saying the White House "aides" emphasized "Obama's willingness to bypass a gridlocked Congress to achieve his goals," and later notes that "the discussion of maneuvering around congressional gridlock comes less than two weeks before the Treasury Department expects to exhaust its authority to borrow money, potentially setting up another fiscal showdown on Capitol Hill." *USA Today* (1/26, Jackson, 5.82M) likewise notes that "aides took to Sunday interview shows to argue that Obama will stress the ability to take executive action if Congress balks at his proposals," though his "biggest agenda items – an immigration bill, an increased minimum wage, various jobs and education programs – require legislation from Congress, including the Republican-run House."

According to some media analyses, the White House's true intent, both with the speech and its warning about sidestepping Congress, is to better position Democrats for this November's midterm contests. *Politico* (1/26, Brown, 464K) reports that President's 2014 agenda "is expected to be a mix of initiatives designed to energize the Democratic base of women, students and blue-collar workers, and to attract independent voters," with the aim of highlighting "differences with the GOP" and providing "fodder for Democrats along the campaign trail – even though those measures stand little chance of winning approval in Congress." The *Washington Times* (1/27, Boyer, 417K) also describes Obama's speech as "an election-year rallying cry to his Democratic base to fight for income equality in America, even as the gap between rich and poor grows during his presidency." DCCC chair Rep. Steve Israel told *Reuters* (1/27, Holland) in an interview that Tuesday's speech "will define the battlefield of our debate, by clarifying for the American people about who's on their side. ... The more the president talks about building the middle class and the more Republicans talk about protecting special interests, the better the battlefield for us."

Along those lines, another *Politico* (1/26, Dove, 464K) story states that "for progressives," the speech "isn't so much about what...Obama says, but how forcefully and expansively he says it." On the issue of equality, progressives are "looking for some attention to the generally agreed-upon progressive wish list: an executive order raising the minimum wage for government contractors, a vocal defense of his job creation record along with a proposal for a new jobs bill, a fresh case for fresh infrastructure investment and a new call for immigration reform." The *Christian Science Monitor* (1/27, Knickerbocker, 540K), meanwhile, reports that the President's "poll numbers have gone way down since his reelection in 2012," and "Republicans seem inclined to wait him out, strengthening their congressional power this year and looking ahead to 2016."

The White House, *Bloomberg News* (1/27, Bender, Talev, 1.91M) reports, used yesterday's interviews "to signal a backup strategy of executive action, even as a new Washington Post-ABC News poll showed 63 percent of Americans lack confidence in Obama's ability to make the right decisions for the country's future." Bloomberg adds that "the strategy risked antagonizing Republicans even before Obama gets his chance Jan. 28 to make the case for his legislative agenda in a prime-time televised address." The *Washington Times* (1/27, Howell, 417K), for example, notes that GOP Sen. Rand Paul said on CNN *State of the Union* yesterday, "It sounds vaguely like a threat, and it has a certain amount of arrogance." In a similar story, the *Wall Street Journal* (1/26, Da Costa, 5.91M) quotes Paul as adding, "The president's not allowed to write legislation. He's not allowed to amend legislation. He's not allowed to initiate war. And he's not allowed to tell us when we're in recess and when we're not." *Reuters* (1/27, Mason), meanwhile, quotes Senate GOP leader Mitch McConnell as saying on *Fox News*

Sunday, "The President has sort of hung out on a limb and tried to get what he wants through the bureaucracy as opposed to moving to the political center."

Picking up on the parties' differing assessment of Obama's use of presidential power, the *Christian Science Monitor* (1/27, Feldmann, 540K) runs a story titled "Is Barack Obama An Imperial President?" in which it notes that "to critics, Obama is...willfully violating the Constitution to further his goals," while "to others, he is exercising legitimate executive authority in the face of an intransigent Congress." Ultimately, adds the Monitor, "the course of Obama's final three years in office...will be shaped by this debate." The *Daily Caller* (1/27, Munro, 422K) headlines its story on the interviews "Obama To Bypass Congress In 2014, Rule By Agency Decree."

Chuck Todd said on NBC's *Meet The Press* (1/26, Gregory), "The key word that the White House is trying to put out there is 'opportunity.' It's actually a word borrowed from the Clinton years. It used to be an obsession particularly in the second term of Bill Clinton. ... The *New York Times*" on Sunday "previewed the State of the Union and said it's going to be a modest State of the Union, which is exactly what the White House fears. ... They see it actually as their last State of the Union that can have an impact."

The *Los Angeles Times* (1/26, Hennessey, 3.07M) reports that "most initiatives Obama can push on his own are incremental, while most large-scale proposals move at glacial pace, or not at all." Meanwhile, "Republicans on Capitol Hill are no more likely this year than last to endorse expensive programs – even in the name of job creation."

Brit Hume said of Tuesday's speech on *Fox News Sunday* (1/26, Wallace), "I don't expect this one to be particularly memorable. His agenda has basically been frozen since the Republicans took control of Congress in 2010. There's not a lot he can do. That's why you hear him talking about pens and telephones because he can't get anything through Congress."

Bill Daley said on CBS' *Face The Nation* (1/26, Schieffer, 2.64M), "I think what the President is going to do, and what I think is a smart move, is to try to figure out how to use the government...in a way that you don't have to go to legislation and get mired in this craziness that has been going on on the Hill for too long."

Joe Davidson writes in the *Washington Post* (1/27, 4.28M) that Federal employees "shouldn't get their hopes up too high" before the address, as "Obama has given scant attention to federal employees in his previous...speeches" and they shouldn't "expect this year to be different."

Sen. Ted Cruz said on CBS' *Face The Nation* (1/26, Schieffer, 2.64M), "We've got the lowest labor force participation in over three decades, since 1978. And if President Obama wants to give an honest, candid State of the Union address this week, he'll address the fact that his economic policies are not working and that they're exacerbating income equality. They're hurting the people who are struggling the most."

Peggy Noonan said on CBS' *Face The Nation* (1/26, Schieffer, 2.64M), "I think people have gotten to the point where, at the beginning of the sixth year of the Obama Administration, people are managing to restrain their excitement when the President speaks in a big speech or not. ... He is overexposed, as all presidents are by this point. But he more than others in the past."

The *New York Times* (1/27, Peters, Subscription Publication, 9.61M) reports that the response to the speech, "a once careful attempt at stagecraft fashioned under the close watch of party chiefs to be as uniform and on message as possible, has given way to political free agency." While Rep. Cathy McMorris Rodgers will deliver the GOP's official response, Paul "plans to spend part of Tuesday in a television studio off Capitol Hill recording his own unsanctioned rebuttal to Mr. Obama's address that night," while Sen. Mike Lee "will have top billing for the newest – and to some Republicans the most unwelcome – post-State of the Union event, the official Tea Party response." Sen. Cruz "got rolling last week when he released a statement in which he demanded that Mr. Obama answer accusations on a variety of issues," including the NSA, the ACA and the IRS controversy.

White House Working To Promote State Of The Union Address On Social Media. The *Washington Post* (1/27, Farhi, 4.28M) reports that in the run-up to Tuesday's speech, the White House is "taking its message directly to the public" and "selling" it "with the same arsenal of social-media tools it deployed to sell candidate Obama during two national campaigns." The White House "has devoted a multimedia page of the official

WhiteHouse.gov Web site to the address," as well as "Obama's Twitter feed" and other "promotional material" which "appears on Obama and the White House's Facebook pages and Tumblr blog." The Post adds that the according to Nathaniel Lubin, "acting director of digital strategy for the White House," the goal "is 'greater public engagement' and clarity about the ideas and policies Obama advances." Adds Lubin, "First and foremost...we're trying to provide content that reflects the mission of the president's speech."

Drive Against Inequality Sparks Commentary. Politico (1/27, Nather, 464K) says that President Obama, by focusing on economic inequality, is "building his new agenda around an issue that has been in the making for decades." However, inequality is "kind of a big topic — as Obama himself acknowledges" and "would require a gigantic response, cutting across a broad swath of issues, everything from education and tax policy to wages, job skills and even the quality of the jobs themselves." And right now, Washington is in "no mood for a gigantic response to anything."

E.J. Dionne Jr. writes in the *Washington Post* (1/27, 4.28M) that the address' "purpose should be to influence the next decade of American political life and begin shaping the post-Obama era," particularly as "for the first time since his early days in office, Obama has the philosophical winds at his back," with polls showing the public agrees with him on the issue of income inequality.

John Harwood, writing for the *New York Times* (1/27, Harwood, Subscription Publication, 9.61M), says that Obama "has made little headway on the goal he values most: government action to lift long-term economic prospects for average Americans." In fact, "as aides draft their 2015 budget plan, their 2014 version shows this bottom line for Mr. Obama's sixth year in office: Government investments in infrastructure, research and development, and education and training, at 3.3 percent of the nation's economy, match the level from President George W. Bush's sixth year in office."

In an op-ed for the *Wall Street Journal* (1/26, Kaus, Subscription Publication, 5.91M), Mickey Kaus, an author on inequality and a blogger for The Daily Caller, writes that the Democrats are focusing on the wrong kind of inequality in the current quest to combat it. He says the Democrats are focused on economic inequality, while the real issue is social inequality. Kaus says that economic inequality is likely to increase no matter what everyone does; social inequality, however, he says can be challenged.

In his column for the *New York Times* (1/27, Subscription Publication, 9.61M), Paul Krugman writes that "extreme" economic inequality "creates a class of people who are alarmingly detached from reality — and simultaneously gives these people great power." Citing a letter to the WSJ by "billionaire investor" Tom Perkins in which he "lamented public criticism of the 'one percent' — and compared such criticism to Nazi attacks on the Jews," Krugman says that Perkins "isn't that much of an outlier." Krugman says that many of the very wealthy put forth political and economic views "that combine paranoia and megalomania in equal measure."

OBAMA AND DEMOCRATS ACROSS COUNTRY EMPHASIZE MINIMUM WAGE DEBATE. The AP (1/27, Hill) reports that "lawmakers in at least 30 states are sponsoring or are expected to introduce wage hike measures," and notes that on Tuesday, in his State of the Union address, President Obama "is expected to mention the minimum wage." According to the AP, "Even in Republican-dominated capitals where the bills are longshots," Democrats will still have an opportunity "to hammer home the popular theme of fair wages in...an election year." The AP notes that a new Quinnipiac poll "found 71 percent of Americans in favor of raising the minimum wage — including more than half of Republicans polled."

Administration Backs Hike in Minimum Wage For Those Who Get Tips. The *New York Times* (1/27, Greenhouse, Subscription Publication, 9.61M) reports that the Administration, along with "some Democratic senators...are...backing increases to the tip wage (at \$2.13, it is 29 percent of the minimum wage)," but "the restaurant industry is fiercely opposed to a mandated increase." Labor Secretary Thomas Perez points out that the tip wage "hasn't been raised for more than two decades despite increases in the cost of living." The Times reports that "advocates for restaurant workers" also note that "the tip wage alone has gone unchanged since 1991," and, "taking inflation into account, the \$2.13 enacted back then is worth \$1.24 today." The Times adds that a bill introduced By Sen. Tom Harkin, and "supported by the Obama administration, would increase the minimum wage to \$10.10 an hour and raise the tip wage by 95 cents a year until it reached \$7.10 an hour."

House Democrats Hope To Return Focus To Lapsed Jobless Benefits. The *Washington Times* (1/27, Klimas,

417K) reports that Congressional Democrats "are returning to Washington...armed with stories from some of the 1.6 million unemployed Americans back home who are desperate to have the federal government resume paying unemployment benefits for the long-term jobless." According to the Times, Democrats "have made extending benefits an early priority in 2014, but have met Republican opposition over finding a way to pay for the extension." The Times notes that Speaker Boehner has said he is "still waiting for a plan from the president that offsets the cost and includes job creation."

Drop In Unemployment Rate May Give Workers More Wage Leverage. USA Today (1/27, Mullaney, 5.82M) reports with unemployment rates likely to fall near pre-recession levels by the end of the year, 2014 "could be the Year of the Raise – at least for some people." While "middle-class incomes have lost ground to inflation for decades, workers have opportunities to catch up during the sweet part of economic cycles." In the "strongest position" are those workers with "scarce skills in cities or industries where nearly full employment will arrive by year-end."

WPost Backs Minimum Wage Hike, Calls For Expansion Of Earned Income Tax Credit. In an editorial, the Washington Post (1/27, Board, 4.28M) reports that while raising the minimum wage, as proposed by President Obama, "would help many hard-pressed low-income Americans," it is "easy to overstate the impact." In particular, "80 percent of the beneficiaries would not be poor," according to a recent Brookings report. To make a real difference, the Post endorses an expansion of the Earned Income Tax Credit.

FARM BILL'S FINAL PASSAGE EXPECTED BY THE MIDDLE OF NEXT MONTH. Politico (1/27, Rogers, 464K) reports that "after a two-year struggle...Congress should see a new farm bill this week as House-Senate negotiators worked through the weekend in hopes of filing the legislation by Monday night." According to Politico, on Sunday, there was some "final skirmishing over livestock regulations and new, tighter caps on farm subsidies," but "Democrats have won significant compromises on food stamp funding" and Speaker Boehner "is promising a real push to deliver the needed Republican votes." Politico adds that "if the farm bill is filed Monday night, the leadership is proposing to call it up as early as Wednesday."

Ed O'Keefe, in an online article for the Washington Post (1/26, 4.28M) reports that "according to several aides familiar with the talks," the farm bill's "final passage likely" will come "before a mid-February recess." O'Keefe says "final passage of the bill would cap years of sensitive talks led by Senate Democrats and House Republicans that continued in a relatively cooperative fashion" although "negotiations teetered on the brink of collapse last summer when" House Republicans "split apart the omnibus bill and held separate votes to dramatically cut funding for the federal food stamp program and another to deal with most farming-related policy."

Under the headline, "US Farm Bill Agreement Could Come Within Days," Reuters (1/27, Cooney) quotes House Agriculture Committee Chairman Frank Lucas (R-OK) as saying, "We remain optimistic that we can reach agreement in time to be on the floor next week."

Demographics Suggest Growth Of Food Stamp Spending Is Unlikely To Slow Soon. The AP (1/27, Yen) reports that "working-age people now make up the majority in US households that rely on food stamps," which is "a switch from a few years ago, when children and the elderly were the main recipients." According to the AP, the "slow economic recovery with high unemployment, stagnant wages and an increasing gulf between low-wage and high-skill jobs...plays a big role," which "suggests that government spending on the \$80 billion-a-year food stamp program – twice what it cost five years ago – may not subside significantly anytime soon." The AP adds that the program, "formally called" SNAP, "now covers 1 in 7 Americans."

Last Laughs:

LATE NIGHT POLITICAL HUMOR.

Jay Leno: "Well, a Federal appeals court has ruled that prospective jurors may not be excluded because of sexual preference. You cannot be kicked off a jury because you're gay. You know who was really upset about this? Gay people trying to get out of jury duty."

DOI in the News:

OBAMA ADDRESS TO HIGHLIGHT CONGRESSIONAL INACTION ON ENERGY, CLIMATE. The [E&E Daily](#) (1/27) reports that "when it comes to energy," President Obama's State of the Union addresses have "gotten increasingly pugnacious toward the deeply divided legislative branch, which has failed to act on measures with broad bipartisan support – and has even struggled to keep the government's doors open, thanks to bitter budget disputes." Obama is expected "to tout domestic production – including the natural gas boom – highlight the importance of energy efficiency and call for upgrades to the nation's aging energy infrastructure." Meanwhile, "Obama's critics in the GOP and industry stand ready to rip into his speech tomorrow, and they're not likely to

respond kindly to any announcements about bypassing their branch of Congress when it comes to energy and climate."

Also covering the State of the Union speech is the [National Journal](#) (1/27, Geman, Subscription Publication, 427K).

Sealed Gulf Bids To Be Opened In March. The [FuelFix](#) (1/24, 7K) reports that "oil companies that hope to nab new drilling leases near the US-Mexico boundary in the Gulf of Mexico will have to wait a little longer to see if they were successful." Interior Secretary Sally Jewell has "made the decision not to immediately open sealed bids for the transboundary area that were received during an offshore oil and gas lease sale in August." Instead, the "bids will be opened during two back-to-back lease sales planned for March 19." Interior spokeswoman Jessica Kershaw said, "The department has provided the companies an option to have their bid opened in March at the upcoming Gulf of Mexico lease sale. Companies also have the option to withdraw their bid up to the day prior to the sale on March 19."

Influential Oilman To Headline Senate Committee's Promised Hearing On Crude Export Curbs. The [E&E Daily](#) (1/27) reports that "Congress' first public reckoning with the volatile politics of crude export curbs comes this week in the Senate Energy and Natural Resources Committee, where a focus on how lifting the ban on overseas oil sales would affect US consumers promises to spotlight regional alliances rather than purely partisan ones." The "hearing Thursday makes good on Chairman Ron Wyden's (D-Ore.) vow earlier this month to examine the issue before his expected transition to lead the Senate Finance Committee following the departure of its current chairman, Sen. Max Baucus." The article notes that "while no witness will represent the Obama administration at the ENR hearing, the panel's most high-profile guest is a proponent of lifting the 39-year-old domestic crude export ban who holds considerable sway among Republicans: oilman Harold Hamm, whose Continental Resources Inc. is the biggest producer in the titanic Bakken Shale region of North Dakota."

Booming US Oil Production Sends Mexico To Seek New Buyers. The [E&E Daily](#) (1/27) reports that "booming US oil production has forced the country's third-largest international source of fuel to seek out new buyers." According to the article, "Mexico's state oil company, Petróleos Mexicanos, will next month for the first time send a shipment of its extra-light crude to a Swiss refinery." The company is "seeking other buyers in Europe and elsewhere as the United States imports less and less gas."

COLORADO MEDIA GROUPS SAY SECRETARY JEWELL VIOLATED SPIRIT OF 1ST AMENDMENT. The [Craig \(CO\) Daily Press](#) (1/27, 10K) reports that the Colorado Press Association and the Craig Daily Press on Monday sent a letter to Interior Secretary Sally Jewell "expressing their disappointment that Jewell's staff barred reporters from attending a public meeting in Craig about the future of the sage grouse." Colorado Press Association Executive Director Samantha Johnston said Monday, "Certainly we have a vested interest in reporters' access to government meetings. We're the eyes and ears of the public, and when we're not allowed to be that, then the public is less informed." According to the article, "the letter penned by media attorney Steve Zansberg asks Jewell to take steps in the future to ensure reporters aren't prevented from attending meetings that should be open to all members of the public."

Also reporting on the story is the [Steamboat \(CO\) Pilot & Today](#) (1/27, 30K).

HOUSE PASSES BILL EXPANDING ACCESS FOR SEARCH-AND-RESCUE TEAMS. The [E&E Daily](#) (1/27) reports that House lawmakers on Monday were "expected to vote on three public lands bills, including one that would allow quicker access to federal lands during search-and-rescue missions." H.R. 2166 "directs the Interior and Agriculture secretaries to expedite access to certain federal lands during such missions." The legislation would "allow private, nonprofit rescue teams to search for people lost on federal lands."

The [Las Vegas Review-Journal](#) (1/28, 437K) reports that the House on Monday passed a bill cutting red tape that has hindered rescue searches on federal lands. Lawmakers voted 394-0 to direct public land managers to expedite permits and waive insurance requirements for accredited search outfits helping locate missing people.

HOUSE PANEL TO MARK UP WILDERNESS, LAND DISPOSAL BILLS. The [E&E Daily](#) (1/27) reports that the House Natural Resources Committee on Tuesday "will mark up its first wilderness bills since the 111th Congress, taking up measures that would designate nearly 120,000 acres in Michigan and Nevada while selling

or releasing other lands for development." The panel will "also vote on controversial measures to require the Bureau of Land Management to identify and pursue the sale of millions of acres of federal lands in 10 Western states." A separate bill would require the Interior Department to "allow nonmotorized boating in pristine lakes and streams in Yellowstone and Grand Teton national parks."

Also reporting on the story is the [Reno \(NV\) Gazette-Journal](#) (1/27, 165K).

CONGRESS URGED TO FUND PILT PROGRAM. The [Salinas Californian](#) (1/27, 27K) reports that local officials who "fear Congress may scrap" the PILT program are "lobbying Congress to provide \$425 million in payments due in fiscal 2014, which ends Sept. 30." A group of 750 county officials wrote in a letter to House and Senate appropriations committees, "Unless Congress acts, counties will have received their last fully funded PILT disbursement in June of 2013. We urge you to consider the economic hardship that counties will face if PILT is not given consistent funding."

MARIJUANA STILL ILLEGAL ON PUBLIC LANDS, DESPITE RELAXED COLORADO DRUG LAW. The [E&E Daily](#) (1/27) reports that while "voters in Colorado legalized recreational marijuana use via a 2012 ballot initiative," the drug "remains illegal under federal law on all public lands, a wide swath of territory in the Centennial State." According to the article, "that division creates a unique scenario at the state's numerous ski resorts, which operate their businesses via contracts on US Forest Service lands." US Forest Service Rocky Mountain Region spokesman Chris Strebbig said, "It's like someone who might break any other law: You run the risk of being cited or arrested. We want people to be aware that ... whether you're on a Forest Service campground or a ski area, it's still the same. The law didn't affect us, and we will still enforce the prohibition on marijuana."

MINNESOTA RIVER GROUP SEEKS TO CONTINUE WITH "BLUEWAY" WORK. The [West Central Tribune \(MN\)](#) (1/28, 50K) reports that "the Minnesota River appeared to be on the verge of becoming the third designated Blueway when that decision was made" to end the program. Ted Suss of Wabasso, in a post on the Minnesota River Watershed Alliance blog, wrote, "Although the Department of the Interior discontinued the National Blueway Program, to the great disappointment of those who worked so hard to obtain a National Blueway designation for the Minnesota River Valley, the Minnesota River Blueway Initiative is still an active program." Suss said the Alliance "hopes to enter into a memorandum of understanding with the Department of Interior and other federal agencies that will outline a working arrangement and include commitments of federal agency support that will very nearly match the working arrangements and federal commitments of support as a National Blueway designation would have provided."

ADDITIONAL COVERAGE: SECRETARY JEWELL TOURS PROPOSED NATIONAL MONUMENT AREA. Additional coverage of Interior Secretary Sally Jewell's trip to New Mexico was provided by the [Fronteras](#) (1/28).

ADDITIONAL COVERAGE OF COASTAL WETLANDS GRANTS. Additional coverage of the \$16.5 million in grants to support 21 critical coastal wetland projects in 12 states was provided by the [Bangor \(ME\) Daily News](#) (1/28, 166K).

PROPOSAL FOR PRIVATELY FUNDED CCC PRAISED. The [Salt Lake \(UT\) Tribune](#) (1/28, 343K) editorializes that "even as the economy slowly improves, unemployment remains stubbornly high," and "national parks and forests have long lists of maintenance and improvement projects that aren't getting done." The editorial notes that Interior Secretary Sally Jewell "wants to raise \$20 million from the private sector and recruit one million volunteers in the next four years, and she puts a particular focus on young people and veterans." According to the paper, "logistically, that \$20 million doesn't seem like enough to build a lasting infrastructure, so Jewell needs to ensure she isn't creating something that will eventually turn to Washington for help." However, it concludes that "if it's seed money for growing an even larger private effort, the fruits will be enjoyed for another 80 years and beyond."

NPS URGED TO ENGAGE BLM ON MASTER LEASING PLANS. For "The Blog" of the [Huffington Post](#) (1/28, Richard, 11.54M), Ellis Richard writes that "one of the ways to protect America's public lands for recreation is through an important tool recently developed by a BLM team." According to Richard, "the concept of a master leasing plan was developed as a means to insure both the thoughtful and balanced extraction of oil and gas reserves on public lands, but also as a tool to protect landscapes important for recreation and wildlife, often in national parks, that could be negatively impacted from ill planned development on neighboring federal lands, principally BLM lands." He notes that Interior Secretary Sally Jewell has "gone on record as supporting master

leasing plans as a means to insure both oil and gas extraction on federal lands but also the preservation of important landscape values on both BLM properties as well as national parks." Richard adds that "it would also be encouraging to see more commitment from the National Park Service to engage the BLM in this issue," and he urges the NPS "to recognize the opportunity and walk through the door that the BLM has opened."

CASE SHOWS MERIT SYSTEMS PROTECTION BOARD REVIEWING DIRECTED GEOGRAPHIC REASSIGNMENTS. For the [Federal Times](#) (1/27, 120K), attorney Debra L. Roth writes that the Merit Systems Protection Board decisions in the case of Mary A. Miller v. Department of the Interior shows "that directed geographic reassignments are getting a fresh look by the board." Roth concludes that "at a minimum, and for the good of workplace morale and engagement, it may be time to work on changing the perception that geographic reassignments are being used to force a resignation rather than a legitimate management need for that person to fill that position."

America's Great Outdoors:

National Park Service:

DRAKES BAY OYSTER CO. GIVEN MORE TIME TO PREPARE FOR SUPREME COURT. The [San Francisco Chronicle](#) (1/28, Egelko, 2.88M) reports that the Drakes Bay Oyster Co. has been granted a legal stay to allow it to continue to operate over the next 90 days while it prepares a case to bring to the US Supreme Court. The high court could grant further extensions while it decides whether to take up the case.

Also reporting on the story is the [Marin \(CA\) Independent Journal](#) (1/28, 88K).

In an editorial, the [Marin \(CA\) Independent Journal](#) (1/28, 88K) notes that "politicians such as U.S. Sen. Dianne Feinstein and Marin Supervisor Steve Kinsey have fought to save the oyster farm." Whatever the courts decide, the paper concludes, "there's no question the oyster farm has a lot of local support and the park service needs to mend fences with a community that has not been shy about showing its support for a local farming family."

PROPOSAL TO BUILD WELCOME CENTER ON THE GROUNDS OF THE BREAKERS DIVIDES COMMUNITY. The [AP](#) (1/27) reports that "a proposal to build a visitors center on the grounds of The Breakers, the Gilded Age Vanderbilt family mansion and national historic landmark, is dividing Newport's preservationists, neighbors, and even some family members in this seaside city where tourism is a lifeblood." The Preservation Society of Newport County claims "the center is badly needed to serve The Breakers' 400,000 annual visitors." The article notes that "many opponents agree something is needed, but they want it across the street in the parking lot or elsewhere, not on the 13-acre grounds of the property, which they say would be irreparably damaged."

Coverage by the AP was also picked up by [FOX News](#) (1/27, 6.72M) and the [Boston Globe](#) (1/28, Smith, 1.75M).

NPS PLANS TO INSTALL PARKING METERS NEAR NATIONAL MALL. [WRC-TV](#) Washington (1/28, 291K) reports that "in an effort to encourage use of public transportation, officials are doing away with free parking near the National Mall in several months." The NPS is planning to "install its own parking meters on roads controlled by the federal government." According to the article, "the meters will be similar to the ones used by the District and will also cost \$2 per hour." The NPS says "they're installing the meters for several reasons; encouraging use of public transit and other alternative transportation modes, using parking revenue to amp up visitor experiences and managing the public parking turnover to allow more access to more people."

NPS SHELVES PROPOSED EXTENSION OF WESTERN MARYLAND RAIL TRAIL. The [AP](#) (1/27) reports that the NPS has "shelved a proposed extension of the Western Maryland Rail Trail to Paw Paw because it could threaten bats that roost in three tunnels along the route." Chris Stubbs with the agency said "that the bat populations in the tunnels don't have white nose syndrome," but that "disturbing their habitat would make them susceptible to the fungus that causes the deadly illness."

NPS PROPOSES OFF-HIGHWAY VEHICLE USE PLAN FOR GLEN CANYON NATIONAL RECREATION AREA. The [Cronkite News](#) (1/28) reports that the NPS has "proposed making 17 areas of Glen Canyon National Recreation Area available for off-highway vehicle use, saying the plan would help attract a wider range of park

users." The article notes that "the preferred alternative for Glen Canyon includes adding 15-25 mph speed limits, quiet hours, noise restrictions and new signage." However, conservation groups "consider the preferred alternative detrimental to the environment" and would "prefer a more restrictive alternative for Glen Canyon."

NPS GIVES SAINT-GAUDENS HISTORIC SITE SEVEN YEARS TO PURSUE GRANTS. The [New Hampshire Union Leader](#) (1/28, 129K) reports that the NPS has "made a decision regarding the future of the Blow-Me-Down Farm at Saint-Gaudens National Historic Site, giving the historic site seven years to pursue grants and partnerships to renovate and add programming as an expansion of Saint-Gaudens." The article notes that "the decision concludes the park's environmental assessment planning process for the 42.6 acres property with nine historic structures abutting the Saint-Gaudens National Historic Site."

FUNDS EARMARKED FOR NEW JERSEY'S HISTORIC D&R CANAL. The [Guardian Liberty Voice](#) (1/14, 64K) reports that the New Jersey Office of Budget and Management said that \$14 million from the Interior Department will be "appropriated for the maintenance and upkeep of the D&R Canal, part of the New Jersey State Park system." The funds will "ensure that this landmark piece of history on the National Register of Historic Places will continue to be preserved."

Bureau of Land Management:

COALITION URGES BLM TO ALLOW UTAH TO LEAD ON STATE SAGE GROUSE AID. The [E&E Daily](#) (1/27) reports that "a coalition of mostly local government and energy advocates says a federal plan to protect the greater sage grouse across Utah is 'fundamentally flawed' and goes well beyond what's needed to save the imperiled bird." The Utah Public Lands Multiple Use Coalition has sent a six-page letter to top officials with the BLM and Forest Service in Utah. The coalition in the letter "take aim at a plan developed by BLM and the Forest Service whose environmental impact statement (EIS) includes proposed land-use plan amendments in an area covering 3.3 million federal acres across Utah."

NEW MEXICO FACILITY SEEKS TO BE FIRST TO SLAUGHTER HORSES. The [E&E Daily](#) (1/27) reports that "despite agricultural roots in Roswell, N.M., not everyone is happy about a local facility's push to be the first US slaughterhouse in years to start processing horses." Valley Meat Co. owner Rick De Los Santos "hopes to start slaughtering horses in his now-shuttered cattle processing facility." But "he alleges that he has been subject to threats and even arson by out-of-town animal rights activists."

BLM COULD FACE LAWSUIT OVER WILD HORSES. The [St. George \(UT\) Spectrum](#) (1/27, 48K) reports that "failure to manage wild horses on public lands could result in a lawsuit against" the BLM, according to Iron County Commissioner Dave Miller. Miller said "the wild horses have been allowed to multiply and overgraze to a point where the ground is barren of feed for livestock." Miller said, "They (BLM officials) come to the ranchers and ask them to cut their grazing allotments in half. That's literally a taking. Those grazing permits are like property."

BLM OFFERS \$500 REWARD FOR INFORMATION ON STOLEN TARGETS AT SHOOTING RANGE. The [Grand Junction Daily Sentinel](#) (1/28, 73K) reports that the BLM is "offering a \$500 reward for information leading to the arrest and conviction of people who stole 3,000 pounds of steel range targets from the shooting range at 27 1/4 Road." According to the article, "the thefts occurred sometime between Sept. 15, 2013, and Jan. 14."

Also reporting on the story is [KFQX-TV](#) Grand Junction, CO (1/28, 1K).

Fish and Wildlife Service:

FWS SEEKS TO ERADICATE ALASKA ISLANDS' COW HERDS. The [E&E Daily](#) (1/27) reports that the FWS wants to remove cows from the Chirikof and Wosnesenski islands in Alaska, "arguing that the bovines are bulldozing the agency's mandate to protect native birds and fish." However, the proposal has "stirred opposition from local residents who say the cattle are part of the state's pioneering history and are genetically unique." FWS officials say "they won't make any decision until ownership is resolved, though they believe the agency has the authority to remove the cows no matter what."

FWS TEAM INSPECTS LIVE ANIMALS SHIPPED THROUGH MIAMI AIRPORT. In a 2,300+ word article, the

Miami Herald (1/27, Whitefield, Mann, 806K) reports on the animals that are shipped through Miami International Airport. According to the Herald, Sandy Cleva, of the FWS' Office of Law Enforcement at Miami International Airport, said after Los Angeles, Miami is the second busiest airport in the US for transporting live wild animals. Cleva is "part of a team at MIA that includes 10 wildlife inspectors and a wildlife detector dog." According to the article, "they keep busy enforcing federal air cargo regulations on shipping live animals, checking for disease and watching for attempts to import or export endangered species."

SENATE PANEL CONTINUES EXPLORATION OF MAGNUSON-STEVEN'S LAW. The E&E Daily (1/27) reports that on Thursday, members of the Senate Commerce, Science and Transportation Subcommittee on Oceans, Atmosphere, Fisheries and Coast Guard will continue to examine the Magnuson-Stevens Fishery Conservation and Management Act. According to the article, "managers, fishermen, academics and others are expected to testify on how the law has affected fisheries in California, Oregon, Washington, Idaho, Hawaii, American Samoa and the Mariana archipelago." The article notes that "this week's hearing will be the third held by subcommittee Chairman Mark Begich (D-Alaska), who has repeatedly said he intends to hear from all stakeholders across the country before proposing any legislation that would reauthorize the law."

FWS RELEASES BALLVILLE DAM DRAFT EIS. The Fremont (OH) News-Messenger (1/27, 24K) reports that the FWS has "published its draft environmental impact statement for the Ballville Dam project Monday and listed four conceptual alternatives for review, as the agency prepares for a February public meeting to present the draft EIS to the public." According to the article, "of the four, there are alternatives that involve either the removal or the repair of the dam, as well as scenarios that would require the installation of an ice control structure to break up ice jams on the Sandusky River." The public meeting will be held "Feb. 19 from 7 to 9 p.m. at Terra State Community College."

COMMENT DEADLINE APPROACHING ON STUDY ON KILLING EGRETS, BARN OWLS. The Big Island (HI) Now (1/27) reports that "next Monday is the deadline for the public to comment on an environmental study for a plan" by the FWS to "'control' populations of cattle egrets and barn owls in Hawaii because of their impacts on native birds."

REWARD OFFERED FOR INFORMATION ABOUT MONTGOMERY COUNTY BALD EAGLE DEATHS. WTOP-FM Washington (1/28, 172K) reports that The Humane Society of the United States "wants to figure out who shot and killed two bald eagles in Montgomery County in December – and it is willing to pay thousands of dollars for information leading to an arrest." The funds "pledged to the Maryland Natural Resources Police investigation, added to the financial commitment by three private citizens, brings the reward total to \$8,000."

IDAHO LAWMAKERS BACK FUNDS TO KILL MORE THAN 500 WOLVES. The AP (1/27) reports that "Republicans promoting Gov. C.L. 'Butch' Otter's proposed \$2 million taxpayer-financed fund to kill wolves hope the cash helps reduce Idaho's population of these canine predators by more than 500 animals, to just 150 wolves in 15 packs." Rep. Marc Gibbs of Grace and Sen. Bert Brackett of Rogerson on Monday "told the House Resources and Conservation Committee the money set aside with Otter's proposal, along with smaller contributions from the Idaho Department of Fish and Game and livestock producers, will bolster Idaho's predator arsenal and help it reach a 150-wolf goal."

Securing America's Energy Future:

Renewable Energy:

SOLAR INDUSTRY SEES 20% JUMP IN JOB GROWTH. The E&E Daily (1/27) reports that "employment in the US solar industry jumped 20 percent in 2013, adding almost 24,000 jobs from the previous year, according to a report released today from the Solar Foundation, a research and education nonprofit group." Lyndon Rive, the CEO of SolarCity Corp., noted that the "142,000 total jobs in the solar industry were distributed throughout the United States, something that is unusual compared with other growth industries usually found in one geographic location." Rive said "the report will help push back against the efforts by utilities and other organizations to 'abruptly' end state incentives for solar energy."

RENEWABLE FUELS' SHARE OF SOUTHEAST'S ENERGY MIX POISED TO GROW. The E&E Daily (1/27)

reports that renewable fuels' share of the Southeast region's energy mix is "poised to grow – though it's unclear to what amount – because of cracks in the Southeast's rigid regulatory foundation that have allowed some light in the form of solar power to shine through." According to the article, "falling costs of solar and environmental regulations are some reasons," and "other ones are mounting bipartisan political, shareholder and consumer pressure on utilities to add more solar to the power grid."

UTILITIES CHALLENGE SOLAR POWER COMPANIES IN UPPER MIDWEST. The *E&E Daily* (1/27) reports that "two states best known for their development of wind power and biofuels – Iowa and Minnesota – have emerged as battlegrounds in the national debate over whether solar power can claim a larger share of electricity markets traditionally dominated by large, rate-based utilities." According to the article, "in separate but similar cases, two renewable energy firms – Eagle Point Solar of Dubuque, Iowa, and Geronimo Energy of Edina, Minn. – are asking authorities to allow for the expansion of solar energy in their respective states over objections from utilities that have their own ideas about how electricity markets should work." Last week, the Iowa Supreme Court "heard arguments in a case pitting Eagle Point Solar against the Iowa Utilities Board and the state's three dominant electricity providers – Interstate Power and Light (IPL), MidAmerican Energy and the Iowa Association of Electric Cooperatives" on "what constitutes a 'public utility' under Iowa law and whether third-party solar ownership agreements infringe on Iowa utilities' exclusive service territories."

OFFSHORE WIND COMPANIES SEEK TO DELAY LEASING OFF NEW JERSEY. The *Offshore Wind* (1/27) reports that New Jersey Governor Chris Christie and legislative leaders have been "warned to delay leasing offshore wind tracts along the Jersey coast." According to the article, "top companies from this industry, including Deepwater Wind and Offshore MW, wrote a letter saying that the state could 'lose the opportunity of offshore wind entirely, should the winners of the Bureau of Ocean Management (an agency located within the US Department of Interior) auction be unable to construct their projects, as could be the case if the winning bidders are found to be ineligible under the Offshore Wind Economic Development Act.'"

Onshore Energy Development:

MANAGEMENT PLANS IN WYOMING STIR DEBATE OVER NATURAL RESOURCES. The *E&E Daily* (1/27) reports that "the latest round of federal rulemaking on the use of public lands in Wyoming has stirred up debate between environmental groups and energy producers eager to tap the state's oil and natural gas resources." The BLM and US Forest Service are "reviewing management plans for 13 million acres of public land in Wyoming, or roughly 20 percent of the state."

AMID NEW "PR ASSAULT," COAL INDUSTRY ADVISED TO EMBRACE REALITY. The *Christian Science Monitor* (1/27, Silverstein, 540K) "Energy Voices" section reports that the US coal industry's "new public relations assault" is asserting coal can help developing countries go through their own industrial revolutions, with the benefits outweighing any environmental costs. However, the piece notes, those economies could also make progress "using other, less carbon-heavy fuels." It quotes Roger Bezdek, "author of a new report sponsored by the American Coalition for Clean Coal Electricity," as saying the billions of people living in poverty are the ones "we need to be concerned about and they need affordable and reliable power sources." He says the coal industry has reduced pollution by investing in emissions controls, but the piece points out that "such investments were driven by federal environmental regulations, which the coal industry routinely fought." What the industry should do, according to Sen. Jay Rockefeller (D) of West Virginia, is "to step up and lead by embracing the realities of today and creating a sustainable future."

Offshore Energy Development:

SCIENTISTS DISCUSS IMPACTS OF BP DEEPWATER HORIZON SPILL ON GULF FISHERIES. The *New Orleans Times-Picayune* (1/28, Alexander-Bloch, 700K) reports that scientists at the 2014 Gulf of Mexico Oil Spill & Ecosystem Science Conference "discussed the potential impacts of the BP Deepwater Horizon oil spill on Gulf fisheries, often describing the fishery as better off than many think but always adding that there still remains much ongoing research." Scientists discussed the importance of identifying biomarkers within species to measure the persistence of oil in their systems, determining how fish become exposed to the oil, and the short versus long-term effects of exposure.

BP TARGETS JUNEAU IN LETTER TO FORMER FBI DIRECTOR. The [Wall Street Journal](#) (1/28, Fowler, 5.91M) reports that BP has taken aim at Patrick Juneau, who was appointed by a Federal judge to administer claims related to the Deepwater Horizon oil spill, sending a letter to former FBI Director Louis Freeh last week, saying that "a strong tone on ethical issues from top management is lacking" in his reports on the alleged fraud in the Deepwater Horizon claims office.

KURE BEACH MAYOR RECEIVES BACKLASH FOR SEISMIC TESTING SUPPORT. The [Wilmington \(NC\) Star News](#) (1/27, 123K) reports that "hundreds of people descended Monday night on Kure Beach Town Hall, standing for more than two hours in the meeting room and parking lot, waiting for a chance to protest Mayor Dean Lambeth's decision to sign a letter endorsing seismic testing for oil and gas off the North Carolina coast." According to the article, "hundreds of people, many wearing matching blue Oceana T-shirts, filled the town hall meeting room and overflowed into the parking lot."

Tackling America's Water Challenges:

FARMERS FEAR BOR COULD SEIZE WATER FROM SAN LUIS RESERVOIR. [McClatchy](#) (1/28, Doyle, Grossi, 95K) reports that with California "extremely dry, the farmers fear federal officials could effectively seize for other purposes the water set aside primarily in San Luis Reservoir on the valley's west side." According to the article, "affected farmers say that would be wrong," but "unfortunately for them, it might also be legal." However, "joined by Republican Reps. Kevin McCarthy, David Valadao and Devin Nunes, as well as Democratic Sen. Dianne Feinstein, Costa is urging the Interior Department not to redirect the so-called carryover water to other purposes." The piece also appears at the [Fresno \(CA\) Bee](#) (1/27, 327K), the [Modesto \(CA\) Bee](#) (1/27, 208K), the [Bellingham \(WA\) Herald](#) (1/27, 113K), the [Biloxi \(MS\) Sun Herald](#) (1/27, 154K), and the [Chicago Tribune](#) (1/27, Doyle, Grossi, 2.32M).

Meanwhile, the [Biloxi \(MS\) Sun Herald](#) (1/27, 154K) reports that "the California drought will soon expose the geographic, political, personal and institutional divisions that complicate meaningful congressional action." According to the article, "the first try comes this week when GOP lawmakers will introduce California water legislation." The article notes that "Republicans have promised a bill to temporarily stop San Joaquin River restoration, keep the Sacramento-San Joaquin pumps operating and establish a special 10-member House and Senate committee."

Additional commentary on the drought was provided by the [Santa Rosa \(CA\) Press Democrat](#) (1/27, 156K) and John Powell Jr. in an op-ed for the [Palm Springs \(CA\) Desert Sun](#) (1/25, 110K).

BOR REDUCES FLOW INTO LAKE MEAD. [FOX News](#) (1/27, 6.72M) reports that "this year, for the first time in history, lower flows in the Colorado River have prompted the federal government to reduce the amount of water flowing into Lake Mead reservoir outside Las Vegas." BOR officials say "if the river's level doesn't increase soon, there's a 50 percent chance that by next year, residents in Arizona, southern Nevada and California will have to start rationing water." Larry Walkowiak, regional director with the BOR, explained, "There's a great deal of dependence upon the water supply from the Colorado River. There are seven states in the United States, but we also have the Republic of Mexico. So you have more than 30 million people that rely on the use of the water for municipal purposes, agricultural purposes, industrial purposes."

ADDITIONAL COVERAGE OF BAY DELTA CONSERVATION PLAN. Additional coverage of the Bay Delta Conservation Plan was provided by the [Contra Costa \(CA\) Times](#) (1/28, Fitzgerald, 302K).

Empowering Native American Communities:

NIPMUC NATION FILES LAWSUIT SEEKING RECOGNITION AS TRIBE. The [Boston Business Journal](#) (1/27, Subscription Publication, 64K) reports that the Nipmuc Nation has "asked a federal court to overturn prior government decisions and grant the nation official status as an Indian Tribe — an effort that if successful could add a new wrinkle to the process of awarding casino licenses in Massachusetts." In its filing, "the tribe argues government officials who ultimately rejected the bid for tribal status 'acted arbitrarily and capriciously and have abused their discretion in the handling, consideration and determination of the Nipmuc Nation's Petition for Federal Acknowledgment, wrongfully rendered a Final Determination that is contrary to law and not supported by

substantial evidence, denied the Nipmuc Nation due process of law by applying the incorrect legal standard in its consideration of the standard and burden of proof, and by disregarding substantial evidence duly presented in support of the Petition and denied the Nipmuc Nation equal protection of the law by its refusal to apply federal law and regulations as to the Nipmuc Nation in the same or similar manner that it has applied such laws and regulations to other similarly situated petitioning tribes.”

DEADLINE APPROACHES FOR FIRST COBELL LAND CONSOLIDATION OFFERS. The [Nation Sun News](#) (1/28) reports that “deadlines are fast approaching for Indian landowners to accept offers being made under the Land Buy-Back Program for Tribal Nations.” The article notes that “the first offers went out last month to members of the Oglala Sioux Tribe of South Dakota,” and “responses are due starting this Wednesday.” In addition, “offers went out to members of the Makah Nation of Washington last month,” and “responses are due at various times, until February 10, according to a reminder from the Interior Department.”

Top National News:

OBAMA EXPECTED TO FOCUS ON JOBS AND HIS EXECUTIVE POWERS TONIGHT. Preview coverage of tonight’s State of the Union address includes front-page articles in the [New York Times](#) (1/28, A1, Lowrey, Subscription Publication, 9.61M) and the [Washington Post](#) (1/28, A1, Goldfarb, 4.28M) that touch on aspects of the President’s anticipated themes. However, of the three network newscasts Monday evening, only the [CBS Evening News](#) (1/27, story 3, 3:05, 5.58M) featured a segment tied explicitly to tonight’s address.

Much of the coverage draws attention to the White House messaging regarding the President’s stated willingness to use his executive authority to advance his priorities, including his efforts to address income inequality. Scott Pelley, on the [CBS Evening News](#) (1/27, story 3, 3:05, 5.58M), reported that “jobs will be a theme in the President’s State of the Union address,” and that he is “expected to say that he will bypass Congress, if necessary, and use executive powers to bring relief to the long-term unemployment.”

On [Fox News’ Special Report](#) (1/28, 2.15M), Bret Baier said “all indications are the President will come out on the attack” Tuesday night. According to Ed Henry, the President’s “top aides are signaling the speech will be a much more aggressive power play,” and that he “stands ready to bypass [Congress] with unilateral executive action on issues like the economy, environment, and healthcare.” White House press secretary Jay Carney was shown saying, “Mindful of Congress’s reluctance to be cooperative at times, the President is going to exercise his authority; he’s going to use his pen and his phone.”

Ed Schultz, in his opening monologue for [MSNBC’s The Ed Show](#) (1/28, 449K), said that the President is expected to “focus on income inequality,” and noted that “this is supposed to be the ‘year of action’” when the President will use all the power available to him to bypass Congress when need be. Schultz added, “it sounds good, but really it’s a lot of generic talk, isn’t it?” – because “the White House really hasn’t made fully clear when and where this executive action is going to be taking place.” Schultz went on to argue that when it comes to increasing the minimum wage, the President “is exactly right to take action without Congress,” and that he “would be inept if he did not do it on the part of the progressive movement because that’s what he ran on.”

However, other analyses buttress the perception that the White House wants to diminish expectations regarding the scope of the agenda that the President intends to outline. For instance, the [AP’s](#) (1/27, Pace) Julie Pace says the White House is hoping to “avoid...a repeat of 2013, when a long list of unfulfilled policy goals – including gun control and an immigration overhaul – dragged” the President “down like an anchor.” According to Pace, this year’s address “will focus instead on redefining success for Obama – not by what he can jam through Congress but rather by what he can accomplish through his own presidential powers.”

Jackie Calmes, in a piece for the [New York Times](#) (1/28, Subscription Publication, 9.61M) titled, “Obama’s Puzzle: Economy Rarely Better, Approval Rarely Worse,” says that “never during [Obama’s] time in office has the state of the economy been better — yet rarely has he gotten such low marks from the public for his handling of it.” According to Calmes, “taking credit” for economic improvements is “complicated” because “many Americans have not seen much improvement for themselves or their family members.” White House senior adviser Dan Pfeiffer is quoted as saying, “For the average person sitting at home watching news on TV and the Internet, they have seen their president spend the last six months or so dealing with N.S.A., a government

shutdown and a malfunctioning website."

On Fox News' Special Report (1/28, 2.15M), Bret Baier described the President as "an embattled leader hemorrhaging approval numbers whose party could possibly lose its tenuous grip of the Senate, virtually cementing his lame-duck status." However, former Democratic strategist Carter Eskew, in an online piece for the Washington Post (1/27, Eskew, 4.28M), notes that "for all the damage done recently to the president's image, on the question of who Americans have 'confidence in to make the right decisions for the country's future,'" the President "leads Congressional Democrats by 10 points and Republicans by 18 points, according to the Post-ABC news poll."

In an interview with USA Today (1/27, Page, 5.82M), Jon Favreau, who served as the President's chief speechwriter and "drafted his previous State of the Union addresses," says he expects the President to sketch "a plan to get [his] ideas through — not just Congress but, as he's been saying and as the White House has been saying for the last couple weeks, he can use the pen and he can use the phone." Asked by Susan Page, "'The pen and the phone' — doesn't that sound like a smaller presidency than before?" Favreau replies, "I don't think it's a smaller presidency. He's had a recalcitrant Congress for a couple years now," and so "you have to find other ways to get things done."

In his opening monologue for Fox News' The O'Reilly Factor (1/28, 2.53M), Bill O'Reilly said the President "has promised that if Congress does not cooperate more with him, that he'll sign a bunch of executive orders, getting stuff done by fiat." According to O'Reilly, "that's not going to make many people happy."

Katrina Vanden Heuvel, in her column for the Washington Post (1/28, Heuvel, 4.28M), notes that "conservative businessman" Ron Unz is "fund[ing] a ballot measure that would raise California's minimum wage to \$12 an hour," and that "58 percent of Americans who identify as Republicans support a higher minimum." Vanden Heuvel adds that "even" Fox News' O'Reilly, who will interview the President before the Super Bowl, "thinks it's a good idea!"

Gerald Seib, in his column for the Wall Street Journal (1/28, Seib, Subscription Publication, 5.91M), says the recent passage of the bipartisan spending deal could signal that the President and Congress can achieve something in the coming year — even if there is no hope for a "grand bargain" that would slow the increase of the Federal debt — potentially including immigration reform or infrastructure investments. But Rutgers political science professor Ross K. Baker, in an op-ed for USA Today (1/27, Baker, 5.82M), says that in his address last year, the President "was far too optimistic about the willingness of many Republicans to put their nation's interests ahead of the party."

WPost A1: Some Democrats Have Urged Obama To De-Emphasize Income Inequality Rhetoric. In a front-page article, the Washington Post (1/28, A1, Goldfarb, 4.28M) reports that Democrats hope Tuesday night's address is the "launching point for a year of sustained assault on Republicans over a populist economic agenda, part of an effort to focus more on bread-and-butter issues and less on income inequality." But, according to the Post, "some Democratic lawmakers and strategists have urged the White House to focus less on academic-sounding discussions of income inequality." Sen. Charles Schumer is quoted as saying, "The American people are more concerned about how they are doing as opposed to how someone else is doing. So simply saying, 'We're going to raise taxes on the wealthy' is not going to be the kind of answer that satisfies the middle class."

On the other hand, The Institute for Policy Studies' Sam Pizzigati, in an op-ed for USA Today (1/27, Pizzigati, 5.82M), notes that according to Gallup, "only 7% of Americans...currently feel 'very satisfied' with our nation's distribution of income and wealth," and, according to Pew, "only 26%...feel that the government should do 'not much' or 'nothing' to reduce the gap between the rich and everyone else." According to Pizzigati, these polls are evidence that "out beyond the Beltway...we have overwhelming public support for taking meaningful action against inequality."

USA Today (1/27, Board, 5.82M) in an accompanying editorial, says "income inequality is fodder for all manner of ideological...political gamesmanship," but "no one has yet come up with a convincing plan for reversing it." Bret Stephens, in his column for the Wall Street Journal (1/28, Stephens, Subscription Publication, 5.91M), mocks the President's campaign for income inequality by equating it with the government in Kurt Vonnegut's science fiction short story "Harrison Bergeron," which imposed a comically broad conception of equality through

legislation.

NYTimes A1: Obama's "Promise Zones" May Not Have Much Of An Impact. Annie Lowrey, in a front-page article for the *New York Times* (1/28, A1, Lowrey, Subscription Publication, 9.61M) titled, "Job Aid Zones Face A New Test In Coal Country," reports from Hazard, Kentucky that President Obama has "named the region a 'promise zone,' which means it will garner renewed attention from Washington." However, according to Lowrey, these "promise zones, which are part of the larger agenda to fight inequality and poverty that he plans to unveil Tuesday night...are just the latest version of an old idea: the politically popular enterprise zone." Lowrey says that in Kentucky, "experts are broadly skeptical that any federal initiative would be enough to combat...the immediate economic upheaval caused by the loss of coal jobs or the long-term economic torpor that is a product of remoteness, poor infrastructure and an undereducated work force."

Obama Plans Multi-Day Swing To Expand On Themes He Will Address Tuesday Night. The *Washington Times* (1/28, Dinan, 417K) reports that according to Nielsen, last year, the SOTU television audience was "33.5 million people, down from the 52.4 million who saw Mr. Obama's first address...in 2009." According to the *Times*, the White House "is desperate to turn the speech into a multiday event in an effort to bolster interest in Mr. Obama's policies, even if people don't tune in to hear his words." The *Times* notes that the President "has travel planned for Wednesday and Thursday with stops in Prince George's County, Md., Pittsburgh, Milwaukee, and Nashville, Tenn."

Republicans Claim Jobless Benefits Extensions Are Often Counterproductive. Scott Pelley, on the *CBS Evening News* (1/27, story 3, 3:05, 5.58M), said, "there's a debate...between Democrats and Republicans over whether extending unemployment benefits encourages people to stay unemployed." Nancy Cordes reported from North Carolina that "six months ago, the state's Republican-led legislature cut unemployment insurance from 26 weeks to 20 and slashed the weekly payment by 35 percent." According to Cordes, North Carolina Gov. Pat McCrory "argues the new law has given the jobless more incentive," and "points to the state's unemployment rate which fell from 8.9% last July to 7.4% today – the steepest drop in the country." Cordes said "a similar argument is playing out...on Capitol Hill" where "Republicans say the nation cannot afford these extended long-term benefits...while Democrats argue it can still take a year or more to find a job in some hard-hit industries."

Bloomberg News (1/27, Przybyla, 1.91M) reported that Congressional Democrats, including Rep. Sander Levin (D-MI) "think high poverty rates in Republican-held districts will soften opposition to restoring the jobless aid that expired Dec. 28 for more than 1.3 million Americans." However, according to *Bloomberg*, many "local Republican leaders and voters, even in areas with high unemployment, don't endorse a short-term fix," which has the effect of "easing pressure on House members to extend benefits." *Bloomberg* adds, "If anything, lawmakers are being lobbied against" extending the lapsed benefits by constituents who are "skeptical that restoring the benefits will help the jobless in their communities in the long run."

White House Asks Corporations Not To "Discriminate Against The Long-Term Unemployed." *USA Today* (1/27, Madhani, Jackson, 5.82M) reports that on Tuesday evening, the President "plans to urge major businesses...to pledge not to discriminate against long-term unemployed Americans." According to *USA Today*, "Several large...corporations confirmed that the Obama administration has called on them to sign a...pledge agreeing not to discriminate against the long-term unemployed when making hiring decisions." *USA Today* adds that the President is also "likely to call on Congress to pass an immigration bill and raise the minimum wage."

The *Wall Street Journal* (1/28, Leubsdorf, Subscription Publication, 5.91M) notes that nationally and at the state level, there have been more than two dozen attempts to ban the practice of not hiring applicants solely because they have been out of work for an extended period of time, but only in New Jersey and Oregon have they been successful.

McMorris Rodgers Preparing For National Prominence. McClatchy (1/28, Bureau, 95K) reports that Rep. Cathy McMorris Rodgers (R-WA) "will join a long list of big names who've given the opposition response to the president's State of the Union speech since the tradition began 48 years ago." McClatchy notes that McMorris Rodgers "posted a photograph of herself on Instagram, holding her speech in one hand...and her 2-month-old daughter, Brynn, in the other" with the caption: "It really doesn't get much better than this!" According to McClatchy, McMorris Rodgers "has become the highest-ranking woman in the House of Representatives leadership," and is "taking a lead role in helping to shape the message as the GOP tries again to overhaul" the

Affordable Care Act.

In a piece for *Politico Magazine* (1/28, Farrell, 464K) titled, "The State of the Union Curse," John Aloysius Farrell says "being handed ...the opportunity to offer a retort to the president is generally thought to be an honor wrapped up in an opportunity," but "rather than propelling" Sen. Marco Rubio or Louisiana Gov. Bobby Jindal "to stardom, their ripostes to Obama's SOTU speeches bloodied none but themselves." The *Weekly Standard's* Fred Barnes, in an op-ed for the *Wall Street Journal* (1/28, Barnes, Subscription Publication, 5.91M) titled, "The Curse Of The State-of-the-Union First Responder," notes that no one has gone from delivering the opposition party's response to winning the presidency.

FARM BILL COMPROMISE WOULD CUT FOOD STAMPS BY 1%. Coverage of the Congressional deal on a new farm bill tends to focus on the expected cuts to the food stamps program. *USA Today* (1/27, Doering, 5.82M) reports the measure "would save an estimated \$24 billion over 10 years, with about a third of the spending cuts coming from the popular food stamp program." The House is expected to vote on the bill Wednesday, with the Senate following suit next week. The *AP* (1/27, Jalonick) says the food stamp cuts will amount to "about \$800 million a year, or around 1 percent." The food stamp cuts, according to *Reuters* (1/28, Beech), would add up to \$9 billion over 10 years – compared to the \$40 billion previously sought by House Republicans.

The *Washington Post* (1/27, O'Keefe, 4.28M) notes the criticism of the food stamp cuts from "advocates for low-income families," who "blasted the deal Monday as unfair to the nation's poorest." Meanwhile, "several urban state lawmakers have said they likely will vote against the overall bill because of the...cuts." The *New York Times* (1/28, Nixon, Subscription Publication, 9.61M) cites comments from Joel Berg, of the New York City Coalition Against Hunger, who said yesterday, "This vote is a tragic, heartless and economically counterproductive departure from America's bipartisan history of fighting hunger. ... Members of Congress who voted for this should be ashamed."

According to a preliminary CBO scores "provided to the *Washington Times* (1/27, Klimas, 417K) by a congressional aide," the measure "will reduce the deficit by about \$23 billion," cutting "\$19 billion from farm subsidy programs" and saving "\$6 billion by increasing efficiency in conservation programs" in addition to the food stamp cuts. The deal, however, "spends an additional \$10 billion in risk management and job creation and training." *Bloomberg News* (1/27, Bjerga, 1.91M) notes the accord "would be a third bipartisan deal by the current Congress, which passed a budget last month and cleared a \$1.1 trillion spending bill on Jan. 16."

In a brief report on the story, the *CBS Evening News* (1/27, story 4, 0:25, Pelley, 5.58M) said the agreement "matters a lot because now farmers will be able to make plans knowing how much they'll be receiving in subsidies."

The *Wall Street Journal* (1/28, Peterson, Subscription Publication, 5.91M) quotes House Agriculture Committee Chairman Frank Lucas as saying, "We are putting in place sound policy that is good for farmers, ranchers, consumers, and those who have hit difficult times." *Roll Call* (1/28, Lesniewski, Subscription Publication, 87K) reports Senate Agriculture Chairwoman Debbie Stabenow said yesterday, "I'm confident we will have a majority of the conferees, and you know, we had strong bipartisan support." However, *Politico* (1/28, Rogers, 464K) reports, "the powerful meat industry was threatening to derail the giant measure when it comes to the House floor, possibly as early as Wednesday," and "the vehemence of the anger expressed by major beef, pork, and poultry lobbies left the House Republican leadership edgy." The *Hill* (1/28, Wasson, 194K) notes that the meat industry was upset after "language aimed at curtailing a meat country-of-origin labeling (MCOOL) requirement and one aimed at restricting activities by the Grain Inspection, Packers and Stockyards Administration (GIPSA) was left out" of the deal. In addition, *McClatchy* (1/28, Doyle, 95K) reports, "lawmakers dropped a controversial House provision that would have blocked California and other states from imposing stricter animal confinement rules."

Bill Allows Industrial Hemp Growth. The *Washington Post* (1/27, O'Keefe, 4.28M) that "aides confirmed that the bill authorizes colleges and universities to grow industrial hemp for research purposes in states that permit growth and cultivation of the plant." Those states are Colorado, Hawaii, Kentucky, Maine, Maryland, Montana, North Dakota, Oregon, Vermont, Washington and West Virginia.

NEW HOME SALES DOWN SHARPLY IN DECEMBER. *Bloomberg News* (1/27, Woellert, 1.91M) reports that new home sales fell 7% in December to a 414,000 unit annual rate, following a 445,000 rate in November.

December's sales were "lower than any estimate of economists" surveyed by Bloomberg, and November's report was also revised downward. Still, 2013 as a whole saw new home sales rise 16.4% to 428,000, the highest rate in five years. Bloomberg says that the housing rebound "has cooled as bad weather slowed the market and as buyers adjust to higher borrowing costs and rising property values."

Reuters (1/28, Mutikani) reports the numbers, but says that thin inventories and regular price gains argue that the housing market recovery continues. Reuters also said that economists largely dismissed the two consecutive months of declines, blaming it on the cold weather that has blanketed the nation.

Stocks Continued Decline On Monday. The Wall Street Journal (1/27, Strumpf, Subscription Publication, 5.91M) reports that stocks fell again on Monday as investors looked to determine if the problems in emerging markets that hinder the markets last week had run its course. The Dow Jones Industrial Average fell 41 points to 15838, its fifth consecutive decline, while the S&P 500 fell nine points to 1782. The Nasdaq Composite Index, meanwhile, fell 45 points to 4,084.

Minnesota Fed Chief Pushes For More Fed Action. The New York Times (1/28, Appelbaum, Subscription Publication, 9.61M) reports that Narayana R. Kocherlakota, President of the Federal Reserve Bank of Minneapolis, was in the past a top opponent of Fed stimulus activity, but he has now "emerged as the only senior official arguing publicly that the Fed should do even more." Kocherlakota spent "recent months crisscrossing the Midwestern region served by the Minneapolis Fed," arguing that the Fed faces a challenge in dealing with "persistent unemployment," but so far, "the Fed is falling short."

Bernanke Led Determined Response To Financial Crisis. McClatchy (1/28, Hall, 95K) reports that outgoing Fed Chairman Ben Bernanke "ends his second four-year term as Fed chairman on Jan. 31, a stretch that to him might have felt like it was measured in dog years." After the financial collapse, Bernanke "was determined not to repeat the Fed's passive response of the 1930s." Instead, Bernanke "attacked the crisis with aggressive and creative moves designed to keep the economy moving forward at all cost."

More Commentary. In an editorial, the Wall Street Journal (1/28, Subscription Publication, 5.91M) considers Bernanke's legacy, noting that many in the economics sphere consider him one of the greatest Fed chairs in history. However, the Journal says that while Bernanke has been one of the most important Fed chairs, how good he is remains to be seen. The ultimately judge, the Journal says, is how well the Fed's taper goes.

Editorial Wrap-Up:

NEW YORK TIMES. "The Mayor Pushes Back, For Pre-K." In an editorial, the New York Times (1/28, Board, Subscription Publication, 9.61M) criticizes the House GOP for approving a "package of bills that could undercut an environmental law that has helped clean some of the most polluted places in the nation." The legislation would allow states to "apply their own standards to the cleanup of hazardous waste sites," which would likely be "considerably weaker" than required by the Federal Superfund program. The Times hopes that the legislation dies in the Senate.

"Turkey's Wrong Turn." The New York Times (1/28, Subscription Publication, 9.61M) editorializes that Turkish Prime Minister Recep Tayyip Erdogan "has created a political disaster at home, transforming Turkey into an authoritarian state that poses dangers not just for itself but for its allies in NATO, including the United States." The Times notes that while the ongoing corruption probe in Turkey may be "politically motivated" as Erdogan has claimed, Erdogan should be "insisting that the probe be fair and transparent, not trying to derail it." The Times calls on the Obama Administration "to send a strong message about the damaging course Mr. Erdogan is pursuing," noting that whether Turkey "nurtures its hard-won democracy" or "turns authoritarian is as critical to regional stability and to its NATO allies as it is to Turks."

"Contraception Before The Court." The New York Times (1/28, Board, Subscription Publication, 9.61M) editorializes about the Supreme Court's "disappointing order on Friday" extending "a temporary injunction barring the Obama administration from enforcing paperwork rules against a Colorado nuns' group in connection with a federal law that requires employer health plans to cover birth control without a co-payment." To the Times, "the real threat to religious liberty is the unjustified effort by employers to impose their religious views on their

employees.”

“The House Targets Superfund.” In an editorial, the *New York Times* (1/28, Board, Subscription Publication, 9.61M) reports that NYC Mayor Bill de Blasio “went to Albany on Monday to answer the naysayers and skeptics — chief among them, Gov. Andrew Cuomo — who want him to abandon his prekindergarten plan and his tax on wealthy residents.” The Times says that de Blasio “has a lot more to do” to make his plan work, but “he is pushing in the right direction.”

WASHINGTON POST. “Murder At The Mall.” The *Washington Post* (1/28, Board, 4.28M) editorializes on Saturday’s shooting in Columbia, noting that the killed appears to have chosen his victims at random, something which “defies comprehension, no matter how often we have witnessed similar spectacles.”

“E.U.’s Choice On Cuba.” An editorial in the *Washington Post* (1/28, 4.28M) calls on the European Union, which is Cuba’s “second-most important trading partner and biggest external investor” to “take advantage of that leverage” to influence Cuba on the issue of human rights. The Post notes that when EU ministers meet in Brussels in February to consider “whether to begin a negotiation toward a new ‘political and cooperation agreement’ with Cuba,” they should “take a stand for human rights and send a message to Raúl Castro and his brother Fidel that investments and aid are linked to progress toward democracy and an end to repression.”

“Pollution Goes Global.” An editorial in the *Washington Post* (1/28, 4.28M) notes the spread of pollution across borders and says that climate change “must ultimately be solved by many nations — particularly the emissions behemoths, the United States and China — moving in the same direction.” The Post argues that there are “dozens of cross-border environmental issues, and they will require overcoming global political tensions and short-term economic incentives that discourage different countries from cooperating.” While the world has tackled “the phaseout of emissions that thin the ozone layer,” world leaders “have many more to see to.”

WALL STREET JOURNAL. “The Bernanke Legacy.” In an editorial, the *Wall Street Journal* (1/28, Subscription Publication, 5.91M) considers outgoing Fed Chairman Ben Bernanke’s legacy, noting that many in the economics sphere consider him one of the greatest Fed chairs in history. However, the Journal says that while Bernanke has been one of the most important Fed chairs, how good he is remains to be seen. The ultimately judge, the Journal says, is how well the Fed’s taper goes.

“Obama’s Trade Test.” The *Wall Street Journal* (1/28, Subscription Publication, 5.91M), in an editorial, says that, with a few reservations aside, the TPP would benefit the US economy substantially. The Journal also says trade promotion authority is absolutely necessary to pass the TPP, or any other trade deal. The Journal goes on to say that a majority of House Republicans will back the President, but they need the President to secure support from House Democrats so that the trade votes are less likely to be used as a partisan campaign issue. The Journal faults the President for not making his case for his trade agenda more forcefully, and urges him to personally speak out on the issues in the future.

Last Laughs:

LATE NIGHT POLITICAL HUMOR.

Jay Leno: "Well, tomorrow night President Obama will deliver his State of the Union address. Aides say he won't mention the war on drugs, because he's still not sure which side he's on."

Jay Leno: "Well, according to a new study, prolonged sitting around can be as unhealthy for you as smoking. They say sitting around all day and doing nothing can actually kill you. Naturally, these findings scare the hell out of Congress."

Conan O'Brien: "Last week, a New Jersey state Senator said he will introduce a bill to legalize marijuana in New Jersey. Today, New Jersey Governor Chris Christie promised to veto it, saying, 'You do not want to see me get the munchies.'"

Jimmy Fallon: "Get this, after the President's State of the Union address, there will be three separate Republican rebuttals. Obama said, 'Yeah, I live with two daughters, my wife and my mother-in-law. Three people telling me I'm wrong is a holiday. I look forward to that. Three is easy.'"

Jimmy Fallon: "Big new announcement from NSA leaker Edward Snowden. In a new interview, he said he no longer has any confidential documents in his possession. Then he said, 'Hey, where's everybody going?'"

- + Today's Events In Washington.

LAST LAUGHS:

- + Late Night Political Humor.

DOI in the News:

OBAMA HIGHLIGHTS ENERGY IN STATE OF THE UNION ADDRESS. Reuters (1/29, Volcovici) reports that in his State of the Union address, President Obama highlighted the role natural gas played in cutting greenhouse gas emissions and creating jobs, but did not address whether he will approve the Keystone XL pipeline. Instead, President Obama emphasized new and existing measures to expand clean energy production, primarily by using executive powers rather than depending on action by Congress. President Obama also reaffirmed his commitment to his Climate Action Plan and said that the EPA will continue to work with states and cities to develop new carbon pollution standards to cut domestic emissions from existing power plants.

The Hill (1/29, Barron-Lopez, 194K) notes in its "E2 Wire" blog that President Obama said that "climate change is a fact" in his State of the Union address, winning a "standing ovation from the majority of Democrats."

In another "E2 Wire" blog post, the Hill (1/29, Barron-Lopez, 194K) adds that President Obama credited his "all of the above" energy strategy "for bringing the U.S. closer to energy independence for the first time in decades."

The *Washington Times* (1/29, Wolfgang, 417K) adds that President Obama focused on "smaller goals" for climate and energy during his State of the Union address, vowing that "his administration would act to limit carbon emissions." The Times notes that these smaller measures are achievable "through executive action," rather than depending on "Congress taking serious action anytime soon."

This story is also reported by the *US News & World Report* (1/29, Neuhauser, 620K) and *Forbes* (1/29, McMahon, 6.03M).

Environmental Groups Prod Obama To Act On Conservation. The *Washington Examiner* (1/29, 319K) reports that environmental groups are pressing President Obama to "say he will use his pen to draw a border around lands they feel deserve special protection during his Tuesday State of the Union address." The organizations are "amping up a push aimed at getting Obama to use executive authority to designate national monuments and establish wilderness zones across the country." Proponents of "such an effort note that last Congress was the first since World War II to not designate a national monument through legislation – a product of Tea Party groups refusing to roll more land into federal management and also to keep such areas open to potential energy development."

The *San Francisco Chronicle* (1/29, Lochhead, Marinucci, 2.88M) reports that "in a single sentence, Obama promised to use his executive power to set aside more public lands – and high on the list is the Point Arena-Stornetta Public Lands off the coast of Mendocino, which Interior Secretary Sally Jewell visited last summer." Also, "with a nod to the Western drought, Obama vowed to press ahead on his own with efforts to combat climate change, promising new fuel efficiency standards for trucks, touting US emergence as 'a global leader in solar' and vowing to set carbon emission limits on coal-fired power plants."

Meanwhile, the *Indian Country Today Media Network* (1/28, 21K) reports that "on January 24, the Fort Sill Apache tribe issued a resolution of support for the establishment of the Organ Mountains-Desert Peaks national monument located in tribe's aboriginal homeland." Tribal Chairman Jeff Haozous said, "As the people of this land we strongly believe that this region should be permanently protected to preserve valuable tribal cultural resources that originated on these territories. National monument designation would allow our children and future generations the opportunity to understand and appreciate the bounty and beauty of their cultural heritage and aboriginal homelands." According to the article, "in addition to protecting the Organ Mountains-Desert Peaks, the Tribe desires to participate in the management of the monument based on their cultural, historical and modern day connection with the former tribal lands."

Forbes Criticizes Obama's Energy Comments In State Of The Union. *Forbes* (1/28, Helman, 6.03M) argues that President Obama's "all of the above" energy strategy is not responsible for bringing the US closer to energy independence, instead crediting "the boom in the production of oil and natural gas." *Forbes* notes that President Obama did not mention fracking, nuclear power, wind power, or coal power, and criticizes his Administration's pressure on the coal industry.

SENATE PANEL ANNOUNCES SECOND HEARING ON INTERIOR NOMINATIONS. The *Environment & Energy Publishing* (1/29, 705) reports that "President Obama's picks to lead the Interior Department's wildlife, parks and mineral programs will return to Capitol Hill next week for a second hearing before the Senate Energy and Natural Resources Committee." According to the article, "the Feb. 4 hearing will give members another chance to vet Rhea Suh for assistant secretary for fish and wildlife and parks, and Janice Schneider for assistant secretary for land and minerals management." Committee ranking member Lisa Murkowski (R-AK) said "she requested the hearing to ask Suh more questions about Interior's management of federal lands in Alaska." Also, "Murkowski remains concerned with Interior Secretary Sally Jewell's decision last month to reject a proposed road through an Alaskan wildlife refuge that she argues her constituents badly need."

FARM BILL INCLUDES EXTENSION OF PILT FUNDING. The [Elko \(NV\) Daily Free Press](#) (1/29, 22K) reports that Sen. Harry Reid has "announced that the Farm Bill agreement includes a one-year extension of Payments in Lieu of Taxes funding." Reid said, "As a rural Nevadan, I know how important PILT funding is for our counties. That's why I worked to ensure this one-year extension was included in the Farm Bill agreement. It is a matter of fairness that in a state like Nevada, where the federal government owns over 85 percent of the land, our counties receive the revenue they deserve from this land. Counties are able to use these funds to provide vital services such as fire-fighting, law enforcement, and healthcare. I look forward to working with my colleagues to pass the Farm Bill and extend this important program and I stand committed to ensuring PILT's continued funding in the years to come."

Also reporting on the story is the [Farmington \(NM\) Daily Times](#) (1/29, 46K).

UTAH LAWMAKERS MAKING PLANS TO MANAGE NOW-FEDERAL LAND. The [Salt Lake \(UT\) Tribune](#) (1/29, 343K) reports that "the Legislature two years ago passed a law demanding that the federal government transfer most of its public lands within Utah to the state," and "now lawmakers are writing a package of bills to show how they would actually manage the land if the shift occurred." Rep. Keven Stratton said "the House GOP is working on bills, for example, that will outline how Utah would define and set aside wilderness areas on public lands it obtained." Legislators are "drafting another bill that would outline the use of revenues coming from the lands," and "another piece of legislation would set up a sort of task force, with legislators as members, to work with other states and the federal government to figure out next steps toward bringing about the transfer."

OBAMA ADMINISTRATION WORKING TO COMBAT WILDLIFE TRAFFICKING. The [Antiques And The Arts](#) (1/28) reports on the measures taken by the Obama Administration to combat illegal wildlife trafficking. The article notes that President Barack Obama's Executive Order 13648 "seeks to protect endangered wildlife, especially African elephants and rhinoceroses, which are being killed for their ivory tusks and horns, and to stem 'illegal trade in wildlife and derivative parts and products' in a variety of ways, one of which could ultimately result in a blanket ban on the trade of ivory as a way to reduce both illegal poaching and illegal trade, as well as the demand that fuels those activities." Also, "in issuing the order, the administration also established an advisory council charged with developing a national strategy." Jessica Kershaw, spokeswoman for the Interior Department said, "The Federal Advisory Council on Wildlife Trafficking held its first meeting in December to discuss efforts currently under way and to generate new ideas about actions that federal agencies can take to combat wildlife trafficking both domestically and internationally. Ideas being considered and discussed by the advisory council include administrative actions that the US Fish & Wildlife Service could take to increase restrictions on import and export; and to impose strict controls on domestic elephant ivory trade, effectively ending commercial ivory trade within the United States. These proposals, if adopted into the national strategy, would be one part of a broader set of efforts to reduce demand for ivory within the United States. Those efforts, in turn, would be included in a larger federal effort to combat wildlife trafficking worldwide."

FEDERAL GOVERNMENT RECOGNIZES HISTORIC AMERICAN AUTOMOBILES. In a piece for [Automobile Magazine](#) (1/29, 2.83M), David Kiley, President of the International Motor Press, write that the Interior Department has "approved creation of a registry of historically significant automobiles to be recorded at the Library of Congress, a list which will quickly number in the hundreds within a few years." Kiley says that the move will jumpstart debates "in every car museum, bar, auto show, repair shop and backyard barbecue as to what cars should be included."

ADDITIONAL COVERAGE: COLORADO PRESS ASSOCIATION CRITICIZES SECRETARY JEWELL OVER MEETING. Additional coverage of the criticism by Colorado Press Association against Interior Secretary Sally Jewell for closing a public meeting in Craig to reporters was provided by the [Grand Junction Daily Sentinel](#) (1/29, 73K).

America's Great Outdoors:

National Park Service:

HOUSE PANEL PASSES BILL TO OPEN RIVERS IN YELLOWSTONE, GRAND TETON TO MORE VESSELS. The [AP](#) (1/29, Brown) reports that the House Natural Resources Committee on Tuesday "unanimously passed a

measure that would lift longstanding restrictions on canoes, rafts and other 'hand-propelled' vessels in rivers and streams in Yellowstone and Grand Teton national parks." The Interior Department "opposes the proposed changes," and "agency officials contend the existing restrictions allow visitors to experience the solitude and wildness of the parks' pristine waterways without the 'intrusion' of watercraft." However, "the bill's sponsor, Republican Wyoming Rep. Cynthia Lummis, said she wants to allow more paddling access so people can have 'a truly unforgettable experience' when they visit the parks."

AP coverage was also picked up by the [Washington Times](#) (1/29, Brown, 417K), the [Fort Mill \(SC\) Times](#) (1/28, 54K), and the [Idaho Statesman](#) (1/28, 205K).

Parks Crowded Despite Cutbacks. The [AP](#) (1/29) reports that "Grand Teton and Yellowstone national park officials say they were crowded over the past year, despite smaller staffs, decreased services and a government shutdown." The article notes that "Grand Teton, with an estimated 2.7 million recreational visitors, had the sixth-busiest year in its history." Also, "Yellowstone reported about 3.2 million visitors, the fifth-busiest year in its storied history."

NPS TO HOLD MEETING ON PROPOSED MALL METERS. The [DCist](#) (1/29, 21K) reports that the NPS will "hold a public meeting next month to discuss the proposed installation of parking meters on parts of the Mall, where public parking is currently free." The article notes that "a public meeting will be held on February 11 from 6 p.m. to 7:30 p.m. in the cafeteria of the NPS headquarters (1100 Ohio Drive SW) to discuss the proposal."

Also reporting on the story are the [Gothamist](#) (1/29, 145K) and [WJLA-TV](#) Washington (1/29, 118K).

NPS CALLS FOR MORATORIUM ON PRESIDIO PROJECT. The [San Francisco Examiner](#) (1/29, 412K) reports that "any decisions about the proposals for the former commissary site in the Presidio, including a plan by filmmaker George Lucas to build a museum, already have been delayed for months," but now the NPS is "calling for a moratorium of several years on the decision for what could be built across from Crissy Field." Golden Gate National Recreation Area General Superintendent Frank Dean wrote in the Dec. 12 letter to the Presidio Trust, "We must again express our strong recommendation, echoed by many others, that the Trust defer any decision for several years to allow the site to develop a more comprehensive, thoughtful, integrated and planned manner."

PLAN FOR WELCOME CENTER ON GROUNDS OF THE BREAKERS TO GO FORWARD. The [AP](#) (1/28, Press) reports that "a proposal to build a welcome center on the grounds of The Breakers, a Gilded Age mansion once home to Cornelius Vanderbilt, cleared a critical hurdle on Monday." According to the article, "in a 4-1 vote, members of Newport's Zoning Board of Review overturned an earlier decision that had found the project incompatible with local historic standards." The NPS "in a letter last week expressed concerns that the plan constitutes a significant change that could damage the national historic landmark and asked the Preservation Society to reconsider," but on Monday, the agency "retracted the letter." The NPS said that "while it had concerns about the project, it hopes to work in partnership with the group."

EPA PROPOSES EMISSIONS STANDARDS FOR SIX ARIZONA FACILITIES. According to the [AP](#) (1/29, 417K), the EPA has put forward emissions controls for "six facilities in Arizona to improve visibility at national parks and wilderness areas." The article continues, EPA will hold public meetings in the coming months, but it "estimates the proposals would reduce sulfur dioxide," for instance, "by almost 30,000 tons per year and nitrogen oxides by 3,100 tons annually."

ANNIVERSARY OF JOHNSTOWN FLOOD TO BE MARKED. The [AP](#) (1/29) reports that the Johnstown Area Heritage Association and "its partners are planning a season full of events to mark the 125th anniversary of Johnstown's 1889 flood." Organized by JAHA and dozens of partners, including the NPS, "events will include special Johnstown Symphony Orchestra concerts in May; a daylong June 1 'Community Day' heritage festival featuring music, vendors and carriage rides at Peoples Natural Gas Park; and historic programs May 22 featuring descendants of flood survivors and victims."

AP coverage was also picked up by the [Washington Times](#) (1/29, Hurst, 417K).

TOWN SAYS IT HAS ADDRESSED FEDERAL COMPLAINTS ABOUT BARE COVE PARK. The [Boston.com](#) (1/29, 750K) reports in response to a letter that Hingham officials received from the Interior Department saying

that "the town had mishandled parkland deeded to Hingham for passive use in 1972," Hingham officials said "most of the problems were misunderstandings, and any outstanding issues are being rectified." Also, in the letter, federal officials "had questions about delineating the boundary between the condo and parkland, creating long overdue signage for the park entrances, and ensuring proper use of the 475 acres of wooded land, including that of several buildings on the property." But overall, officials said "the fixes are minor, and views the dispute as a means to kickstart a new relationship between the town and the federal government."

NPS RECREATES PANORAMAS EIGHTY YEARS LATER. The [Imaging Resource](#) (1/28, 7K) reports that "in the early days of the 1930s," the NPS and the Forest Service "set up a series of panoramas from lookout points in order to set up maps for watching for fires." Now, "some 80 years later, they've returned to those same locations to take the same photographs, and see the way the landscape has changed." The article notes that "the modern photos were taken from 2007 to 2009, and rather than rely on the monochromatic film of the originals, the Park Service instead used infrared film." The NPS explained, "The crew used infrared film primarily in an effort to cut through any haze that was in the atmosphere. This produced a higher contrast image of the 'background' which was the primary focus of the images taken."

RINEHART BUILDING ADDED TO NATIONAL REGISTER OF HISTORIC PLACES. The [AP](#) (1/29) reports that the Rinehart Building in Portland "that served as the heartbeat of the city's black social scene during a time of racial and housing discrimination has been listed in the National Register of Historic Places."

SILT HOME ADDED TO NATIONAL REGISTER OF HISTORIC PLACES. The [Glenwood Springs \(CO\) Post Independent](#) (1/29, 27K) reports that Chris Classen's home at 311 N. Seventh St. "was officially placed on the National Register of Historic Places on Dec. 3, 2013, after a process that lasted more than a year."

ADDITIONAL COVERAGE: DRAKES BAY OYSTER CO GIVEN MORE TIME TO PREPARE FOR SUPREME COURT. Additional coverage that the Drakes Bay Oyster Co. has been granted a legal stay to allow it to continue to operate over the next 90 days while it prepares a case to bring to the US Supreme Court was provided by the [San Francisco Chronicle](#) (1/29, Egelko, 2.88M) and the [Santa Rosa \(CA\) Press Democrat](#) (1/28, 156K).

Bureau of Land Management:

HOUSE COMMITTEE PASSES LAND BILL. The [Reno \(NV\) Gazette-Journal](#) (1/28, 165K) reports that "after being consolidated with six other land bills, the Lyon County Economic Development and Conservation Act was part of an omnibus bill that was reported favorably out of the US House of Representatives Committee on Natural Resources following a hearing Jan. 28." The article notes that "one of the other bills included in the package was Fernley Economic Self-Determination Act, which would allow the city to purchase federal land within the city limits." According to the article, "the bill would allow the city of Yerington to acquire 10,400 acres of federal land east of Yerington now under the Bureau of Land Management."

ECOTERRORIST SENTENCED TO READ BOOKS. The [Los Angeles Times](#) (1/28, Kellogg, 3.07M) reports that "ecoterrorist Rebecca Rubin was sentenced Monday to five years in prison – and to read a book by Malcolm Gladwell." Rubin "admitted in her plea agreement to freeing horses at a Bureau of Land Management facility and failed attempts to set fire to a US Forest Industries facility in Medford, Ore., and to buildings and ski lifts in Vail, Colo." US District Court Judge Ann Aiken "ordered Rubin to read two books: Gladwell's 'David and Goliath' and 'Nature's Trust' by Mary C. Wood." According to the article, "Gladwell is on her reading list, the judge explained, because it would help Rubin learn nonviolent means to protest against systems she perceives as unjust."

RETIRED BIOLOGIST ARGUES FOR BENEFITS OF GRAZING, PREDATOR CONTROL. In an op-ed for the [Elko \(NV\) Daily Free Press](#) (1/29, 22K), Mike Laughlin, a retired federal wildlife biologist, writes that today's biologists "have no clue what happens when you take large numbers of predators out of the equation." He claims that "they also do not know that range domestic sheep were a buffer between the predators and mule deer." Laughlin urges citizens to "flood the Governor's office with letters and phone calls, contact your congressional representatives and ask them to work on this predator problem" and "to de-list the raven from the Federal Migratory Protection Bird List."

Fish and Wildlife Service:

LAWMAKERS ASK FWS TO ADD MORE GIANT SNAKES TO BAN LIST. The [AP](#) (1/29) reports that "eighteen representatives signed a bipartisan letter sent Monday" to Interior Secretary Sally Jewell asking for the FWS to "add boa constrictors, reticulated pythons and three species of anacondas to the ban." FWS spokesman Ken Warren said that "the agency appreciates the lawmakers' interest." Warren said, "We're working toward a final decision on the remaining five large constrictor snakes, which is pending."

AP coverage was also picked up by the [San Francisco Chronicle](#) (1/29, 2.88M), the [Daytona Beach \(FL\) News-Journal](#) (1/28, 190K), and the [York \(SC\) Enquirer-Herald](#) (1/28, 18K).

SEN. HELLER REAFFIRMS OPPOSITION TO SAGE GROUSE LISTING. The [Reno \(NV\) Gazette-Journal](#) (1/28, 165K) reports that Sen. Dean Heller "recently confirmed his strong stance against the listing of the greater sage grouse or its cousin, the Bi-State Distinct Population Segment that includes southern Lyon County, from listing as threatened or endangered according to the Endangered Species List." Heller said he and Sen. Harry Reid "both oppose the listing, but there is also a federal lawsuit that means Nevada must have a plan to combat this action."

SPENDING BILL ALLOCATES FUNDS FOR FISH HATCHERIES. The [Johnson City \(TN\) Press](#) (1/29, 76K) reports that "the operations of national fish hatcheries throughout the country" are "secure through the remainder of the 2014 federal fiscal year as previously promised with the recent passage of an omnibus spending bill." According to the article, "funding to keep the hatcheries afloat through the rest of the year is spelled out in the Consolidated Appropriations Act of 2014." The article notes that the "\$1.1 trillion bill includes more than \$50 million for national fish hatchery operations."

RESULTS OF CAPTIVE BREEDING OF WOOD RATS COULD INFLUENCE FUTURE PROGRAMS. [Yahoo!](#) (1/29, Conniff, 17.91M) reports that the FWS "began taking wood rats from the wild in 2002, to establish the first captive breeding colony of the species, at Lowry Park Zoo in Tampa." However, "when 41 wood rats born in captivity were released back into the wild over a two-year period, they almost immediately fell victim to cats and other predators." The FWS could use these results when "it decides whether to establish a captive breeding program in the Everglades for the Florida grasshopper sparrow."

ACTIVISTS PLAN TO SUE IF NEW ENVIRONMENTAL IMPACT STUDY NOT CONDUCTED FOR PURPLE LINE. The [Gaithersburg \(MD\) Gazette](#) (1/28, Blum, 131K) reports that environmental lawyer and activist John Fitzgerald claims the FTA "failed in its obligation to conduct a biological assessment of the" Purple Line's impact "on two small shrimp-like creatures, called amphipods, in the area." According to the article, Fitzgerald, the nonprofit Center for Sustainable Economy and "some Chevy Chase residents" are planning to file a lawsuit if a new environmental impact study is not conducted, and "the 'Record of Decision' is filed." Later, the report notes that "Fitzgerald disputes the claims of" a letter the US Fish and Wildlife Service sent to the FTA earlier this month, which indicates that the Purple Line project "would not hurt the amphipods."

CONSERVATION PROGRAMS URGED TO PROTECT GRASSLAND SPECIES. In an op-ed for the [Emporia \(KS\) Gazette](#) (1/29, 17K), Brandy Nance criticizes the support by Kansas Secretary of State Kris Kobach of "a state Senate bill that would exclude the lesser prairie chicken from federal protection and give the state the authority to charge federal officials if they try to enforce federal laws pertaining to the rare bird." According to Nance, "without protections, this species could be lost forever," and "other species will undoubtedly follow." She argues that "to preserve these rapidly declining species, conservation programs must be put into place."

Securing America's Energy Future:

Renewable Energy:

BLM PROPOSES MOJAVE PROJECT TO RESTORE HABITAT. The [Environment & Energy Publishing](#) (1/29, 705) reports that the BLM is "hoping the solar industry can help mend the ecological wounds" in "a desert ripped several years ago by wildfires that charred native plants, fragmented critical tortoise habitat and created a foothold for noxious weeds." The plan is for "solar companies that build power plants at the Dry Lake solar energy

zone 30 miles west of here" to "agree to pay a mitigation fee for every acre of habitat they destroy." The BLM would "use that cash to restore lands of similar character at the Gold Butte Area of Critical Environmental Concern." The article notes that "Interior's landscape-scale mitigation effort, piloted by former Secretary Ken Salazar and expanded by Secretary Sally Jewell, signals a shift in public land management in the West."

MARYLAND DEVISES OFFSHORE WIND RULES. The [reNews](#) (1/29) reports that the Maryland Public Service Commission is "conducting stakeholder consultation as it develops regulations to implement the Maryland Offshore Wind Energy Act of 2013." The measure, "which requires utilities to buy offshore renewable energy credits (ORECs), is designed to spur wind energy development in Maryland's coastal waters." The BOEM "expects to auction off a 1.45GW offshore wind lease area in early 2014."

Onshore Energy Development:

KANSAS RESIDENTS, SCIENTISTS WONDER IF INCREASE IN EARTHQUAKES IS LINKED TO FRACKING. The [Chicago Tribune](#) (1/28, Hendricks, 2.32M) reports that "a swarm of tremors" last fall that shook "south-central Kansas sporadically over a couple of months" has some wondering if the earthquakes are linked to hydraulic fracking. The article notes that USGS scientists "think that the frequency of earthquakes increases when wastewater floods fault zones, causing pieces of Earth's fractured crust to slip more often than they might otherwise." The USGS "points to a steep increase in the number of earthquakes in the last few years in regions of the country where oil and gas production through fracking has ramped up."

TOP OIL COMPANIES STRUGGLING TO OPEN NEW PRODUCTION ECONOMICALLY. In a front-page story, the [Wall Street Journal](#) (1/29, A1, Gilbert, Scheck, Subscription Publication, 5.91M) reports that Chevron, Exxon Mobil and Royal Dutch Shell spent about \$120 billion last year looking to boost oil and gas output, but they have not had a great deal of success. All three are expected to report that profits fell in 2013 compared to 2012, despite high oil prices. One of the big problems, the Journal says, is that many of the megaprojects they are pursuing are seeing their costs soar. The three companies have mostly missed out on the shale-oil boom, leaving them to seek replacements for depleted wells elsewhere.

NORTH DAKOTA LOOKING TO INCREASE PUBLIC INVOLVEMENT IN SOME DRILLING DECISIONS. The [Wall Street Journal](#) (1/29, Dawson, Subscription Publication, 5.91M) reports that while North Dakotans are generally in favor of oil drilling in their state, there is a new effort underway to protect historic sites from encroachment by the petroleum industry. As part of that, state regulators are looking to create a system that includes increased public input into drilling decisions.

Offshore Energy Development:

JUDGE REFUSES TO DISMISS MANSLAUGHTER CHARGES AGAINST BP WELL MANAGERS IN DEEPWATER HORIZON EXPLOSION. [Reuters](#) (1/29, Stempel) reports that US District Judge Stanwood Duval rejected efforts by Robert Kaluza and Donald Vidrine, former site managers of BP 's Macondo well, to have charges of manslaughter in the 11 deaths on the Deepwater Horizon rig dismissed. Kaluza and Vidrine argued that there was no clear standard which they violated. Judge Duval wrote that the defendants should have known that "general negligent conduct," particularly "grossly negligent conduct," would be "sanctioned." They are accused of having failed to oversee practices on the well as well as failing to notify BP of danger signs. Their trial is scheduled for June 2.

US SAYS BAN ON GOVERNMENT CONTRACTS FOR BP SHOULD CONTINUE. [Bloomberg News](#) (1/29, Calkins, 1.91M) reports on a suit in which "BP is fighting a 2012 ban imposed on 20 affiliates by the U.S. Environmental Protection Agency, which prevents all BP entities from bidding on any new government supply contracts or oil leases," but government attorneys argue that the ban "should continue because" BP "hasn't demonstrated it's a responsible contractor." BP has pleaded guilty to "11 counts of felony seaman's manslaughter, two pollution violations and one count of lying to Congress" in the Deepwater Horizon explosion and spill, as well as a felony air pollution violation "after a 2005 explosion at its Texas City, Texas, refinery killed 15 workers."

EPIDEMIOLOGIST SAYS GULF COAST RESIDENTS HAVE CHEMICAL EXPOSURES SIMILAR TO THOSE

OF US AS A WHOLE. The [New Orleans Times-Picayune](#) (1/29, Alexander-Bloch, 700K) reports that Dale Sandler, chief of the Epidemiology Branch of the National Institute of Environmental Health Sciences, said that "Gulf Coast residents in areas affected by the BP Deepwater Horizon oil spill don't appear to have higher chemical exposure than others across the nation." She said that while area residents "worry about health symptoms," blood tests show that they have "levels of benzene, toluene, and other oil-related volatile organic compounds" like those of the US population as a whole. Sandler was speaking at the Gulf of Mexico Oil Spill & Ecosystem Science Conference.

ADDITIONAL COVERAGE: KURE BEACH MAYOR RECEIVES BACKLASH FOR SUPPORT OF SEISMIC TESTING. Additional coverage of the protest against Kure Beach Mayor Dean Lambeth's support of seismic testing was provided by the [AP](#) (1/29), which was also picked up by the [Charlotte \(NC\) Observer](#) (1/28, 713K) and the [Hampton Roads \(VA\) Virginian-Pilot](#) (1/29, 422K).

Tackling America's Water Challenges:

REPUBLICANS FAIL IN BID TO INSERT CALIFORNIA DROUGHT MEASURE IN FARM BILL. The [San Francisco Chronicle](#) (1/27, 2.88M) reports that "House Republicans failed in their last-minute effort to insert a policy rider into the farm bill that would have diverted water from the Sacramento-San Joaquin River Delta to parched farms in the Central Valley." The legislators "may still seek out another legislative vehicle or attempt to move a stand-alone bill."

BILL COULD RAISE SPENDING LIMIT FOR BOR DAM SAFETY IMPROVEMENTS. The [Hydroworld](#) (1/29, 151) reports that "a bill introduced to the Senate this past week would adjust the spending cap on dam safety improvements for infrastructure managed" by the BOR. Senate Bill 1946 would amend the Reclamation Safety of Dams Act of 1978. according to the article, "changes made by S.B. 1946...would allow for additional spending should dam safety projects require money than the operator might be able to contribute."

ADDITIONAL COVERAGE: BOR COULD SEIZE WATER FROM SAN LUIS RESERVOIR. Additional coverage that the BOR could seize water from the San Luis Reservoir was provided by the [Fresno \(CA\) Bee](#) (1/28, 327K) and the [Hanford \(CA\) Sentinel](#) (1/29, 25K). Also providing coverage is the [AP](#) (1/29), which was also picked up by the [Denver Post](#) (1/29, 949K), the [Chico \(CA\) Enterprise-Record](#) (1/29, 90K), and [KQVR-TV](#) Sacramento, CA (1/28, 47K).

Empowering Native American Communities:

DEADLINE APPROACHES FOR PINE RIDGE, MAKAH RESERVATION LAND BUY-BACK OFFERS. The [Indian Country Today Media Network](#) (1/28, 21K) reports that "owners of fractioned land interests at the Pine Ridge and Makah reservations have until January 29, 2014...to participate in the first round of purchase offers in the Department of the Interior's voluntary Land Buy-Back Program for Tribal Nations." Kevin K. Washburn, Assistant Secretary – Indian Affairs, said, "We have been working closely in partnership with the Oglala Sioux Tribe to provide fractionated interest holders within the Pine Ridge Reservation the opportunity to participate in the DOI's Land Buy-Back for Tribal Nations Program. If you wish to participate in this program, the deadline for this first wave of purchase offers for interest holders within the Pine Ridge Reservation is January 29, 2014. By taking advantage of this opportunity you will be contributing to the greater good of the Oglala Sioux people for generations to come."

Also reporting on the story is the [Native American Times](#) (1/29, 337).

EFFORTS TO REDUCE CRIME ON INDIAN RESERVATIONS SEES SUCCESS. The [Governing](#) (1/29, 2K) reports on the efforts of the Interior Department to reduce crime on reservations. To begin, the Interior Department "focused on reducing violent crime on four reservations: the Sioux Standing Rock Reservation, the Chippewa-Cree Tribe's Rocky Boy's Reservation in Montana, the Mescalero Apache Tribe's Reservation in New Mexico, and the Shoshone and Arapahoe Tribes' Wind River Reservation in Wyoming." Despite budget constraints and "short-staffing of the BIA's teams," the four reservations "achieved an astounding 35 percent cut in crime." According to the article, "part of the improvement came from strategic investment—not to saturate the streets with cops but simply to bring staffing levels up to the national averages." The article notes that "the central part of the story,

however, was the careful work of Charles Addington, the BIA's associate director for field operations, whose crime-fighting strategy made him a finalist for a Partnership for Public Service Sammie award."

RULING LAUDED AS VICTORY FOR MECHOOPDA. In an editorial, the [Chico \(CA\) Enterprise-Record](#) (1/29, 90K) lauds "the federal government's reaffirmation of the Mechoopda Indians' right to having a few hundred acres of land held in trust." The paper hopes that a letter by Kevin K. Washburn, assistant secretary of the Interior for Indian Affairs, "and the research behind it will finally put to rest one of the most shameful acts of Butte County's government in the last few years."

Top National News:

OBAMA PREVIEWS "YEAR OF ACTION" IN HIS FIFTH STATE OF THE UNION ADDRESS. Coverage of last night's State of the Union address tended to cast it as a reflection of the President's diminished political standing in early 2014. Much of the analysis of the address indicates that Obama implicitly acknowledged that he is unlikely to achieve anything on the scale of the Affordable Care Act for the rest of his term due to Congressional obstinacy, and that, instead, he has been reduced to working towards "modest" achievements. In a front-page analysis, for example, the [New York Times](#) (1/29, A1, Subscription Publication, 9.61M) called the speech "a study in scaled-down ambition," while the [AP](#) (1/29, Pace) says his proposals "were slim and largely focused on old ideas."

On all three networks last night, the commentary immediately following the address focused on the President's tribute to Sgt. First Class Cory Remsburg. As the President acknowledged applause from his audience last night, [NBC News](#)' (1/29, 6.79M) Brian Williams said it was the President's "quote that 'we must move off a permanent war footing' which brought us to easily the emotional high point of the evening." Just as the President concluded, [CBS News](#)' (1/29, 3.87M) Scott Pelley noted the President's "rousing tribute to" Remsburg, "who the President met when he was able-bodied and then met again after...Remsburg's tenth deployment – tenth deployment – when he was wounded by a roadside bomb in Afghanistan." Bob Schieffer added, "Clearly the highlight of this speech was seeing that young sergeant stand up. ... I mean, that is what people will take away from this speech. The rest of it? We'll see how it works out." As the audience was still clapping, [ABC News](#)' (1/29, 3.68M) Diane Sawyer said, "It was so moving...when he talked about...Remsburg's tenth deployment for the US military – so severely injured – and he got a one minute and 34 second standing ovation."

While the President was still shaking hands from behind his lectern, [MSNBC's](#) (1/28, 7.96M) Chris Matthews said the President had delivered "a masterful address...that I believe reminds many people why they voted for him." Matthews went on to say that "the greatness of the speech, I believe, was the ability...deliver a center-left proposal for lots of government action in the language of the center-right." Al Sharpton agreed that the President gave a "a masterful speech."

Immediately following the President's address on [Fox News](#) (1/28, 6.72M), Bret Baier said the President "vowed to act 'whenever and wherever' he can with a series of executive actions," but, according Baier, "his orders are mostly rather modest."

[CNN's](#) (1/29, 14.53M) Wolf Blitzer said the President had been "telling members of Congress... 'let's work together,'" but, "in effect, 'we can do this the easy way or the hard way' – pass legislation...otherwise, I'll take unilateral action on my own." Jake Tapper added, "We've already heard grumbling from Republicans, people taking issue with his approach, with the discussion of doing things through executive order, taking action if he cannot find bipartisan compromise."

This morning's coverage emphasizes the President's insistence that he will use his executive authority whenever possible to advance his priorities. Representative of this morning's coverage is the lead sentence from the [Chicago Sun-Times](#)' (1/29, Korecki, 1.15M) report on the address. The Sun-Times says, "From lifting the minimum wage to overhauling immigration to closing Guantanamo Bay once and for all," the President "put forth...a sweeping call for a 'year of action.'" [Reuters](#) (1/29, Holland), in a report titled, "Obama Warns Divided Congress That He Will Act Alone," quotes the President as saying, "I'm eager to work with all of you, but America does not stand still – and neither will I. So wherever and whenever I can take steps without legislation to expand opportunity for more American families, that's what I'm going to do."

Under the front-page headline, "Obama Taking Up Economic Issues On His Authority," the [New York Times](#) (1/29, A1, Baker, Subscription Publication, 9.61M) says the President "declared independence from Congress...as he outlined a series of limited initiatives on jobs, wages, retirement and the environment that he will take without legislative approval." However, the Times adds that "the defiant, go-it-alone approach was more assertive than any of the individual policies he advanced." According to the [Washington Times](#) (1/29, Boyer, 417K), the President "hasn't used his presidential pen as often as his predecessors," but "new White House counsel John Podesta, an advocate of executive authority," says the President "has 'warmed up' to the idea."

According to [McClatchy](#) (1/29, Clark, Kumar, 95K), the President "offered a mix of new and old ideas...calling for a 'Year of Action' and saying he wants to work with Congress but will act on his own when he can, if necessary." McClatchy goes on to say that despite having been in office for more than five years, the President "worked to tie economic woes to a long tide of history rather than his own record."

The [Wall Street Journal](#) (1/29, A1, Lee, Nicholas, Subscription Publication, 5.91M), in a front-page article titled, "Obama Seeks To Jump-Start Stalled Plans," reports that Sen. John Thune said the President "ought to work with us on bipartisan measures," including approving the Keystone XL pipeline, but, "instead, he's talking about taking unilateral action on a whole range of things." [Roll Call](#) (1/29, Sanchez, Lesniewski, Subscription Publication, 87K) notes that the President "didn't mention the Keystone XL oil pipeline" during his address. The [Wall Street Journal](#) (1/29, Subscription Publication, 5.91M), in an editorial this morning, claims that the Keystone pipeline would help those Americans looking for work more than an extension of lapsed Federal jobless benefits.

Under the headline, "Obama Plans To Use Executive Powers To Drive 'Year Of Action,'" the [Washington Post](#) (1/29, Nakamura, Fahrenthold, 4.28M) reports that the President "sought...to restore public confidence and trust in his presidency after a dispiriting year, pledging to use his White House authority with new force to advance an agenda that Congress has largely failed to support." The Post says the President "sketched out more than a dozen ways in which he intends to use executive powers to try to boost the economy on his own," which "seemed to be a recognition...that he is running out of time to achieve his goals in the face of hardened Republican opposition." [Politico](#) (1/29, Epstein, 464K) says the President "took on a more pragmatic tone than in previous State of the Union addresses, acknowledging that getting his agenda past House Republicans was unlikely and therefore he would use his power to do what he can on his own."

On Tuesday night, the networks' anchors highlighted the President's remarks about the minimum wage and the gender pay gap. [NBC News](#)' (1/29, 6.79M) Brian Williams said, "A lot of things will perhaps be remembered from this speech, including the call for the middle class to finally make headway as the president declares 'war on income inequality'" and "the President's quote about doing away with workplace policies that belong in a 'Mad Men' episode." [CBS News](#)' (1/29, 3.87M) Pelley said, "The President's speech had an optimistic tone; it was sort of a can-do speech coming at a time when much of the country is in a doubtful mood, having recently watched the government shutdown and the troubled rollout of the Affordable Care Act's web site." [ABC News](#)' (1/29, 3.68M) George Stephanopoulos also said the President was "trying to strike a note of optimism" by "talking up the economy at the beginning of the speech – something he had been reluctant to do through the campaign – giving the American people credit for that." Stephanopoulos added that the President got a "huge reaction – we're already starting to see this online and Facebook – when he talked about raising the minimum wage, 'give America a raise,' and equal pay for equal work for women."

[The Hill](#) (1/29, Parnes, Sink, 194K) reports that "throughout the speech, Obama stressed that the government should work to provide 'opportunity for all,'" and that the White House "decided on that theme after speaking to a wide-swath of people on policy, including lawmakers up for reelection in 2014." According to The Hill, "While White House officials maintained the strategy" was "born out of a sincere desire to advocate for the poor and middle class," they also "admitted they wanted to demonstrate their commitment to act to a public frustrated by stagnation in Washington."

[USA Today](#) (1/29, Jackson, 5.82M) reports that "one theme of the speech" was "income inequality," and notes that the President "promoted the idea that the federal government can help create economic opportunity through job training and college education programs."

[Bloomberg News](#) (1/29, Talev, Doming, 1.91M) reports that the President "said he supports lowering the

corporate tax rate and curtailing tax breaks," but, according to Bloomberg, "that plan is stalled in Congress" due to "a partisan dispute over whether wealthy individuals should pay more."

[Roll Call](#) (1/29, Sanchez, Lesniewski, Subscription Publication, 87K) also reports that "areas where [Obama] believes Democrats and Republicans can work together include the farm bill, overhauling immigration laws, restoring expired unemployment insurance, an overhaul of Fannie Mae and Freddie Mac, a patent overhaul and trade promotion authority." However, [McClatchy](#) (1/29, Lightman, 95K) says the President's executive actions "probably will chill further his relations with" Congress. McClatchy also says "the Senate's center-left Democrats are inching away from a president highly unpopular in their states."

The [Detroit Free Press](#) (1/29, Spangler, 794K) covers the President's speech under the headline, "President Obama: Let's Find Common Ground, But I'll Act On My Own If Needed." Similarly, the [Detroit News](#) (1/28, 619K) titles its report, "Obama Pushes For Economic Action, But Vows To Act On His Own If Congress Doesn't."

The [AP](#) (1/29, Pace) reports that the President "unveiled an array of modest executive actions that included increasing the minimum wage for some federal contract workers and making it easier for millions of low-income Americans to save for retirement." According to the AP, "the address was...aimed at convincing an increasingly skeptical public that he still wields power in Washington," but his "proposals for action...were slim and largely focused on old ideas that have gained little traction over the past year."

Carl Hulse, in a front-page analysis piece for the [New York Times](#) (1/29, A1, Subscription Publication, 9.61M) titled, "Executive Order May Be Only Option, But It Comes With Limits," says Tuesday night's address "represented a study in scaled-down ambition." Hulse says the President "entered the White House yearning for sweeping achievements," but is now "essentially acknowledging both the limits of his ability to push an agenda through Congress and the likelihood that future accomplishments would be narrow."

Susan Page, writing for [USA Today](#) (1/28, Page, 5.82M), also says the President's address "reflects a political journey from the aspirational to the achievable." According to Page, the President's "ability to get big things through Congress is demonstrably limited, and he's more likely to lose clout than gain it" in the remaining years of his second term.

Likewise, [CBS News](#)' (1/29, 3.87M) Scott Pelley said the President "talked about the numbers of areas where he would act if Congress would not, but it really reminded many people of the limits of presidential power." CBS News political director John Dickerson agreed that "absolutely, it was a very modest list of things that he can do himself," and "very small bore stuff compared to the claims the President's...aides have been making."

Appearing on [Fox News](#) (1/28, 6.72M) after the speech, Charles Krauthammer said, "There wasn't a lot in the speech – of course, he's playing a very weak hand." Krauthammer then quipped, "I was impressed by the fact that he delivered it with conviction, because, again, there and wasn't a lot in it." USA Today's Kirsten Powers said, "The speech was definitely oversold by the White House in the sense that we were told to expect sort of this 'urgency,' and I really did not hear any urgency."

The [Washington Post's](#) (1/29, A1, 4.28M) Scott Wilson, in a front-page article titled, "Obama Prepared To Avoid Congress, Go It Alone On Carrying Out Modest Initiatives," says, "This wasn't the presidency Barack Obama had in mind," as the "areas he identified for possible cooperation with a divided Congress have shrunk, leaving an agenda filled out by a growing number of modest initiatives that he intends to carry out alone." According to Wilson, the President's speech "reflect[ed] the White House's conclusion that Obama spent too much time last year in conflict with recalcitrant lawmakers." But Wilson adds that the President "risks further antagonizing Congress and resting part of his legacy on executive actions that do not have the permanence, or breadth, of major legislation."

The [AP](#) (1/29, Benac), in an analysis under the headline, "Obama's Agenda More Bite-sized Than Bold" describes the President's address as "an amalgam of modest proposals," and adds, "an executive order on job training...doesn't have the zing of an \$800 billion stimulus plan or a historic overhaul of the health care system."

Paul Davidson, in an analysis for [USA Today](#) (1/28, Davidson, 5.82M), says while the President "vowed...to use as many executive powers as possible to push his agenda" if Congress blocks his progress, "those

powers...don't always work as quickly as presidents think." Likewise, William Galston, in a column for the [Wall Street Journal](#) (1/29, Galston, Subscription Publication, 5.91M) under the headline, "Obama and the Limits of Unilateral Action," emphasizes the relatively limited range of executive actions available to the President, and says that it is impossible for a president to achieve substantial policy victories without the acquiescence of Congress.

Dana Milbank, in his column for the [Washington Post](#) (1/29, 4.28M), says the President's address "was an implicit acknowledgment that his once-grand legislative ambitions are over," but "instead of" welcoming "his admission of legislative defeat, congressional Republicans either complained that he wasn't engaging with them, mocked him for being out of ideas or accused him of constitutional violations." Likewise, the [Washington Post](#) (1/29, Board, 4.28M), in an editorial, says if the President's "proposals for executive action did not live up to the hype, they also did not justify the fear-mongering."

Progressives Welcome Obama's Iran Sanctions Veto Threat. On Tuesday night, [MSNBC's](#) (1/28, 7.96M) Chris Matthews praised the President for saying "he would veto any attempt to screw up his attempt to avert a war with Iran." Al Sharpton also praised the President for vowing to veto additional sanctions on Iran.

At 10:04 PM EST, [Andrew Sullivan](#) (1/28, 27K) wrote: "Obama is now channeling his inner Eisenhower who understood better than any neocon the limits of American force. This is why I supported him in 2008." Sullivan quotes the President as saying, "If John F. Kennedy and Ronald Reagan could negotiate with the Soviet Union, then surely a strong and confident America can negotiate with less powerful adversaries today."

The [Washington Times](#) (1/29, Swarts, 417K) reports that the President's "claim that American diplomacy had 'halted the progress of Iran's nuclear program' has been challenged from an unusual source – the Iranian government itself." The Times notes that just last week, Iranian Foreign Minister Mohammad Javad Zarif said, "We did not agree to dismantle anything," which "call[s] into question whether or not American and Iranian leaders are on the same page when it comes to the arms agreements."

[USA Today](#) (1/28, Board, 5.82M), in an editorial, says, "the nuclear talks with Iran could result in a huge breakthrough — or yet another war in the world's most volatile region."

Obama Directs Treasury To Offer "MyRAs" To Encourage Saving. [USA Today](#) (1/28, Korte, 5.82M) reports that on Tuesday night, President Obama announced "a new savings plan will allow Americans to buy savings bonds in a starter retirement account that 'guarantees a decent return with no risk of losing what you put in.'" According to USA Today, the President "said he would direct the Treasury Department to create new 'MyRA' accounts to allow people to more simply invest in Treasury bonds," calling it a "new savings bond that encourages folks to build a nest egg."

The [Wall Street Journal](#) (1/29, Paletta, Tergesen, Subscription Publication, 5.91M) reports that the President is expected to discuss his "MyRA" plan in more detail on Wednesday during an event in Pittsburgh. The Journal reports that Secretary Lew, who will direct the effort for the President, will also be in Pittsburgh Wednesday.

AP Fact Check: Obama Minimum Wage Order Covers Just "A Sliver Of The Workforce." In a "Fact Check" analysis, the [AP](#) (1/29, Woodward) says the President is "ordering a higher minimum wage for a sliver of the workforce, which affects no one now and not many later" because "it doesn't apply to existing federal contracts, only new ones." The AP notes that "most employees of federal contractors already earn more than \$10.10."

However, under the headline, "Obama's Pitch Is Aimed At November," the [Wall Street Journal](#) (1/29, O'Connor, Nelson, Subscription Publication, 5.91M) reports that an [NBC News/WSJ poll](#) released Tuesday found that 51% of respondents said raising the minimum wage ought to be a priority of the President's this year.

Cruz, WSJournal Criticize Obama's Minimum Wage Hike Order. Sen. Ted Cruz, in an op-ed for the [Wall Street Journal](#) (1/29, Cruz, Subscription Publication, 5.91M) titled, "The Imperial Presidency Of Barack Obama," argues that the President's decision to raise the minimum wage for Federal contractors is more evidence that the Administration does not respect the Constitution's separation of powers. Cruz goes on to detail instances in which the President unilaterally modified aspects of the Affordable Care Act. In an editorial, the [Wall Street Journal](#) (1/29, Subscription Publication, 5.91M) blasts the President's decision to raise the minimum wage for

government contractors as an abuse of power and predicts that it will cause the few Federal contractors who have minimum-wage workers to eliminate positions.

Obama's Relatively Brief Remarks On The ACA Noted. David Nather, in a piece for [Politico](#) (1/29, Nather, 464K), notes that the Affordable Care Act "didn't show up in the State of the Union address until over halfway through, and it encompassed all of nine paragraphs in an hour-plus stemwinder." However, Nather adds that those passages represented "the biggest sales pitch Obama has made in a State of the Union address since the law passed."

[Politico](#) (1/29, Gerstein, Samuelsohn, 464K) also reports that during his address, the President said, "More than 9 million Americans have signed up for private health insurance or Medicaid coverage." According to [Politico](#), "a casual listener could get the impression that all those people got health coverage for the first time because of Obamacare," but "it's not yet clear how many of those people were uninsured – and gained coverage for the first time – and how many were just replacing old insurance, such as policies that were canceled because they didn't meet Obamacare standards."

The [Washington Times](#) (1/29, Boyer, 417K) notes that the President "didn't mention the program's troubled start in October or the continuing concerns about it." Neil Munro, in a piece for the [Daily Caller](#) (1/29, Munro, 422K), says the President's speech "included Obama's familiar condescension toward Republicans' opposition to Obamacare."

According to the [Washington Times](#) (1/29, Howell, 417K), "Rather than dwell on the law's struggles," the President "rebuked House Republicans for holding dozens of votes to repeal all or part of his main domestic achievement." The Times adds that the President "also doubled down on his vision of health reform by pointing to the likes of Kentucky Gov. Steve Beshear, a Democrat who leads the only Southern state to both expand Medicaid and set up its own health exchange."

AP Analysis: McMorris Rodgers Offers A "Gentler" More "Hopeful" GOP Message. The [AP](#) (1/29, Cassata) reports that in her response to the President's address, Rep. Cathy McMorris Rodgers (R-WA) "offered a gentler, more hopeful vision of Republicans who are determined to empower Americans and close the gap 'between where you are and where you want to be.'"

[Politico](#) (1/29, Everett, 464K) says McMorris Rodgers "delivered the promise of a 'hopeful' agenda from the Republican Party aimed at closing the opportunity gap, expanding school choice and lowering taxes." [Politico](#) adds that "rather than offering specific policy prescriptions," McMorris Rodgers "presented a sweeping GOP vision and a gaffe-free delivery."

The [Washington Post](#) (1/29, Costa, Kane, 4.28M) notes that Sens. Mike Lee and Sen. Rand Paul, "two tea party favorites, also delivered high-profile responses," while Rep. Ileana Ros-Lehtinen (R-FL), "an ally of" Speaker Boehner, "delivered...much of McMorris Rodgers's leadership-approved speech in Spanish."

Republican House Member Calls Obama A "Socialist Dictator." The [Huffington Post](#) (1/28, Wing, 11.54M) noted that prior to the President's address, Rep. Randy Weber (R-TX) "took to Twitter to let everyone know that he was getting impatient, while simultaneously becoming the first GOP congressman on Tuesday to call the president a 'socialistic dictator.'" Weber tweeted: "On floor of house waitin on 'Kommandant-In-Chef... the Socialistic dictator who's been feeding US a line or is it 'A-Lying?'"

The [New York Times](#) (1/29, Parker, Subscription Publication, 9.61M) reports that on Twitter, "Congressional Republicans rallied around hashtags like #CloseTheGap, to push their message of reducing income inequality, and #YearOfAction" although "after the president called for a 'year of action' in his address, the #YearofAction took off among Republicans and Democrats alike."

Top Republicans Appear With "Duck Dynasty" Stars. The [Washington Times](#) (1/29, Klimas, 417K) reports that Rep. Vance McAllister (R-LA) "brought...Willie Robertson" of Duck Dynasty "as his guest to the State of the Union." The Times notes that Robertson "endorsed Mr. McAllister leading up to the special election in Louisiana." The Times adds that "several GOP lawmakers, including Rep. Paul Ryan, snapped photos or got autographs from" Robertson, whose wife was a guest of Sen. Lindsay Graham.

More Commentary On Obama's Speech. Appearing on [MSNBC](#) (1/28, 7.96M) about half an hour after the President finished speaking, White House senior adviser Valerie Jarrett said the President is "going to take action on his own" and "look for other opportunities for executive actions." Jarrett added that the President, while "still working with Congress," is not "going to put all of his eggs in one basket."

[CNN's](#) (1/29, 14.53M) Candy Crowley commented that what "struck" her "the most was none of these are new issues," and, "in fact, if you go back through the last State of the Union addresses...you will hear all of these issues again." Newt Gingrich said it was "a very good speech" that "had real power to it."

Roger Simon, in his column for [Politico](#) (1/29, 464K), says the President "couldn't give a bad speech if he tried, but he did his best Tuesday night." Simon criticizes the President for having "devoted" just "67 words to gun control, offering no specifics in a speech that was stuffed with specifics on other issues."

The [New York Times](#) (1/29, Board, Subscription Publication, 9.61M), in an editorial, chides the President for having "left out an executive ban on discrimination by contractors against employees based on sexual orientation and gender identity," which the Times says "would have made a strong statement about fairness in spending taxpayer money."

Appearing on [MSNBC](#) (1/28, 7.96M) following the President's address, Steve Schmidt, who managed John McCain's 2008 campaign, said, "the tone of the speech was very conciliatory." Addressing Mathews, Schmidt said, "I agree with you completely. He proffered a center-left agenda, but with center-right rhetoric." Rachel Maddow added, "I thought the President was surprisingly – and I don't mean this in a bad way, to say I was surprised – but I was struck by how energetic he was, almost playful. ... He seemed comfortable in his own skin."

In a piece for [Politico](#) (1/29, Purdum, 464K), Todd Purdum says the President "acquitted himself with the requisite dignity on Tuesday night, speaking in mostly upbeat — if none too ambitious — terms."

CONGRESSIONAL LEADERS EXPECT QUICK FARM BILL PASSAGE. [Reuters](#) (1/28, Beech) reports that both House and Senate leaders are confident that the farm bill will pass both chambers. House passage, though, is expected to be a bit more difficult than Senate passage. In a call with reporters on Tuesday, House Ag Chair Frank Lucas said that there are a number of opponents of the bill on the right and the left, but that a coalition of moderates from both sides will push the bill through.

[Bloomberg News](#) (1/29, Bjerga, Bykowicz, 1.91M) reports that a "coalition spanning grocer Kroger Co. to Iowa soybean growers" is "on the verge" of significant win in the farm bill. The bill, "which lawmakers estimate will save \$23 billion over 10 years, reflects the clout of urban-rural allies who hung together even when the House of Representatives split them apart, as well as lots of lobbying money." Overall, groups spent \$100 million lobbying on the bill in just the first nine months of last year.

Bill Includes Pilot Hemp Program. The [Washington Times](#) (1/28, Dinan, 417K) reports that the farm bill "includes a pilot program that would allow universities and state agricultural departments to legally grow industrial hemp." Marijuana advocates have "long pushed for hemp legalization," but "industrial hemp's production has been illegal under federal controlled substances laws, since it is a cultivar of the same plant species that produces marijuana." While some states have allowed hemp production, growers "have still had to face the federal ban," including obtaining a permit from the DEA.

Conservatives Felt "Steamrolled" During Debate. [Roll Call](#) (1/29, Newhauser, Dumain, 87K) reports that a "new narrative against taking up an immigration overhaul is forming in House conservative circles: Just look at the farm bill." Some conservative Republicans "feel they were steamrolled" by the farm bill conference report and it is "now giving them pause about passing immigration bills in the House."

In an editorial entitled, "A Bipartisan Taxpayer Raid," the [Wall Street Journal](#) (1/29, Subscription Publication, 5.91M) is highly critical of the farm bill, saying that its bipartisan authors are highlighting its savings, which the paper argues are very minor. Among its complaints, the Journal takes issue with the failure to split food stamps out into separate legislation, along with the lack of reform in the program. The Journal also says that the end of

the direct payment programs to farmers has been replaced by a shallow-loss insurance that is likely to be equally costly.

POSITIVE NEWS ON HOME PRICES, CONSUMER CONFIDENCE. Tuesday saw a series of positive economic reports, including a rise in home prices and an unexpected boost in consumer confidence, while the stock market broke its losing streak. The only sour note was the drop in durable goods orders.

The [Wall Street Journal](#) (1/28, Madigan, Subscription Publication, 5.91M) reports that the new edition of the S&P/Case-Shiller home price index shows that prices rose 13.8% in the 10-city index and 13.7% in the broader 20-city index over the 12 months ending November 2013. The indexes show that home prices have now risen to levels similar to mid-2004. The Journal says that the increase is good for the economy, as higher home values boost new home construction and boosts homeowners' ability to spend.

[Bloomberg News](#) (1/29, Peralta, 1.91M) reports that the Conference Board's consumer confidence index rose to 80.7 in January from 77.5 in December. Economists surveyed by Bloomberg expected the index to come in a 78.0. The reading is a five-month high, as "optimism about the economy and labor market improved." However, December's reading was revised downward from an originally-reported 78.1.

Durable Goods Orders Down Unexpectedly. [Bloomberg News](#) (1/29, Stilwell, 1.91M) reports that durable goods orders "unexpectedly slumped" last month by the "most in five months." This reflects "a broad-based retreat that raises the risk business investment will cool in early 2014." According to Commerce Department data released on Tuesday, durable goods orders fell 4.3% in December following a 2.6% rise in November "that was smaller than previously reported." Economists surveyed by Bloomberg expected orders to rise 1.8%. The report is "the first to indicate that the slowdown in growth last month went beyond the unusually cold temperatures."

Economists Expect Q4 Growth To Come In At 3.2% Rate. [Reuters](#) (1/28, Mutikani) reports that increased household spending combined with exports likely pushed the US economy ahead at a solid pace during the 4th quarter. Analysts surveyed by Reuters expect that the economy grew at a 3.2% annualized rate, down from the 3rd quarter's 4.1% rate. Reuters said that despite the drop, the drivers behind the Q4 growth are considered more stable than the inventory boom that boosted Q3's numbers.

Stocks End Losing Streak. [NBC Nightly News](#) (1/28, story 6, 0:10, Williams, 7.86M) reported, "This was for what it's worth a good day on Wall Street in New York. The Dow was up more than 90 points, the NASDAQ gained more than 14. S&P 500 was almost 11 points higher at the end of trading."

The [Wall Street Journal](#) (1/28, Kieman, Subscription Publication, 5.91M) reports that stocks broke their five-session streak of declines on Tuesday, with investors pausing to await this week's Fed action. The Dow Jones Industrial Average rose 90.68 points to 15928.56, while the S&P 500 rose 10.94 points to 1792.50. The Nasdaq Composite Index rose 14.35 points to 4097.96.

Editorial Wrap-Up:

NEW YORK TIMES. "The Diminished State Of The Union." The [New York Times](#) (1/29, Board, Subscription Publication, 9.61M), in an editorial chides the President for having "left out an executive ban on discrimination by contractors against employees based on sexual orientation and gender identity," which the Times says "would have made a strong statement about fairness in spending taxpayer money."

"Argentina On The Brink." In an editorial, the [New York Times](#) (1/29, Subscription Publication, 9.61M) says that Argentina's current financial crisis was "caused largely by misguided government policies." Noting President Cristina Fernández de Kirchner's recent efforts to "preserve the country's dwindling foreign reserves," the Times says that Argentina "needs to do a lot more to address inflation and other underlying economic problems that have led investors and ordinary citizens to bet against the peso." Kirchner, the Times argues, "will have to take much bolder steps to repair the damage."

"Roadblocks On Health Reform." The [New York Times](#) (1/29, Subscription Publication, 9.61M) editorializes in support of a Federal judge in Missouri who has blocked "onerous" restrictions imposed by the state "on federally

approved counselors who help people understand and enroll in health insurance plans under the Affordable Care Act." The Times argues that although the ruling "applies only to Missouri, its reasoning applies to similar laws or regulations adopted by more than a dozen Republican-led states that are doing their best to sabotage health care reform," and urges consumer advocates "to challenge such laws in other states."

WASHINGTON POST. *"Obama's Muted 'Call To Action.'"* The [Washington Post](#) (1/29, Board, 4.28M), in an editorial, says if the President's "proposals for executive action did not live up to the hype, they also did not justify the fear-mongering."

"Justice For Criminals." The [Washington Post](#) (1/29, 4.28M) editorializes that Texas "hasn't been living up to its lock-'em-up reputation for a while now; it is one of many states that has been looking for safe ways to reduce the number of people behind bars – saving money and wasted lives." The Post notes that state lawmakers, mindful of budget constraints, "crafted an alternative to perpetually feeding money into prison construction to warehouse non-violent offenders, rather than investing in drug treatment or better parole programs." Texas "offered more power to specialized drug courts" and "revamped parole to swiftly punish violations without automatically sending people back to jail for long terms." The Post urges other states to follow Texas' lead in such matters.

"Dwindling Options." In an editorial, the [Washington Post](#) (1/29, 4.28M) is concerned that the District of Columbia is struggling to determine what to do with the 380 students at the troubled Options Public Charter School, as they were the students "no other school wanted." In the long run, the Post says school officials "must address whether locating needy, high-risk students at a school of last resort is the best way to serve them, or whether it simply gets them out of sight."

WALL STREET JOURNAL. *"A Bipartisan Tax Payer Raid."* In an editorial, the [Wall Street Journal](#) (1/29, Subscription Publication, 5.91M) is highly critical of the farm bill, saying that its bipartisan authors are highlighting its savings, which the paper argues are very minor. Among its complaints, the Journal takes issue with the failure to split food stamps out into separate legislation, along with the lack of reform in the program. The Journal also says that the end of the direct payment programs to farmers has been replaced by a shallow-loss insurance that is likely to be equally costly.

"Republican National Nonsense." An editorial in the [Wall Street Journal](#) (1/29, Subscription Publication, 5.91M) decries an RNC resolution condemning NSA surveillance as an unconstitutional "dragnet" program "against its own citizens," and calling on Republican lawmakers to demand an investigation into the "extent of this domestic spying." The Journal argues that the RNC would be better served by raising money and learning how to use social media in order to avoid the embarrassment it suffered in 2012.

"Obama's Sixth Year Pitch." In an editorial, the [Wall Street Journal](#) (1/29, Subscription Publication, 5.91M) blasts the President's decision to raise the minimum wage for government contractors as an abuse of power and predicts that it will cause the few Federal contractors who have minimum-wage workers to eliminate positions.

"The Wages Of Power." The [Wall Street Journal](#) (1/29, Subscription Publication, 5.91M), in an editorial this morning, claims that the Keystone pipeline would help those Americans looking for work more than an extension of lapsed Federal jobless benefits.

Debbie Wasserman Schultz (D-Fla); others. <https://www.eventfarm.com/tokens/event/7fff5387-0000-452d-ae8f-fd0bac4734d8/?trVmltSnTrJ5aeLDqGqHbZBYT2aF7ax5aSSjBk6uCG0cUbfKi6RTwTIP&trVmltSnTrJ5aeLDqGqHbZBYT2aF7ax5aSSjBk6uCG0cUbfKi6RTwTIP> Location: Capital Hilton, 1001 16th St., NW.

REPS. HOYER, SCHOCK – STATE OF THE UNION DEBRIEF — 8 a.m. Confirmed speakers to date include Sen. Richard Blumenthal (D-CT), Rep. Joaquin Castro (D-TX), House Democratic Whip Steny Hoyer (D-MD), and Rep. Aaron Schock (R-IL). Molly Ball, Staff Writer for The Atlantic; Ronald Brownstein, Senior Editorial Director of Atlantic Media; and Steve Clemons, Editor-at-Large of The Atlantic, will moderate the event. The morning's discussions will examine the President's address and will forecast how the policies and issues he raises will impact the nation moving forward. **ADDED SPEAKERS:** Rep. Diana DeGette (D-CO), Sen. Deb Fischer (R-NE), and Sen. John Hoeven (R-ND) join Sen. Richard Blumenthal (D-CT), Rep. Joaquin Castro (D-TX). Location: Newseum Knight Broadcast Studio (C Street Entrance), 555 Pennsylvania Avenue, NW.

U.S. CHAMBER – 2014 INTERNATIONAL INTELLECTUAL PROPERTY INDEX — 8:30 a.m. – 1 p.m. The U.S. Chamber of Commerces Global Intellectual Property Center (GIPC) will host an event to unveil its 2014 International Intellectual Property Index. Speakers: Orrin Hatch (R-UT), United States Senate; Mark Elliot, Executive Vice President, Global Intellectual Property Center, U.S. Chamber of Commerce; Aaron Brickman, Deputy Executive Director, SelectUSA; Douglas Lippoldt, Senior Trade Policy Analyst, Organization for Economic Co-operation and Development; David Torstensson, Senior Consultant, Pugatch Consilium. **RSVP:** Trinh Nguyen at trnguyen@uschamber.com or 202-463-5379 for more information. Location: U.S. Chamber of Commerce, Hall of Flags, 1615 H Street, NW.

CRIMINAL DIVISION AWARDS CEREMONY – HOLDER — 2 p.m. Attorney General Eric Holder, Deputy Attorney General James M. Cole and Acting Assistant Attorney General for the Criminal Division Mythili Raman will deliver remarks at the Criminal Division Awards Ceremony. All media must present government-issued photo I.D. (such as a drivers license) as well as valid media credentials. Media must RSVP to Stephen Ratner at 202-514-2007 or Stephen. Ratner@usdoj.gov no later than 5:00 p.m. EST, Tuesday, January 28, 2014. Media must enter the department at the visitors entrance on Constitution Avenue between 9th and 10th Streets. Media may begin arriving at 1:00 p.m. EST. All cameras must be pre-set by 1:45 p.m. EST. Press inquiries regarding logistics should be directed to the Office of Public Affairs at 202-514-2007. Location: Department of Justice, Great Hall, 950 Pennsylvania Ave., N.W.

Last Laughs:

LATE NIGHT POLITICAL HUMOR.

Jay Leno: [Referring to President Obama's State of the Union Address] "This was a very important speech for the President tonight and he gave it at a time when he's losing support from his own party. In fact, congressional Democrats were warned tonight that if they didn't applaud the President's speech, he would go out and campaign for them."

Jay Leno: "Here's a little bit of State of the Union trivia. Did you know the State of the Union speech is also called 'date night' on Capitol Hill? Senators and House members pair up as dates. They pair up with someone with the other party and sit next to each other during the President's speech. They try to sit next to someone who is the complete opposite of what they are. For example, Harry Reid sat with someone who is alive."

Conan O'Brien: "President Obama's chief speechwriter said the President started working on his State of the Union address around Thanksgiving. Yeah. In a related story, today, Joe Biden finished giving a speech he started around Thanksgiving."

Jimmy Fallon: "During a speech yesterday, Hillary Clinton said she still doesn't know if she's running for president in 2016. You know. Just like I don't know if I'm going to be having a beer on St. Patrick's Day."

DOI in the News:

SECRETARY JEWELL INTERVIEWED BY EARTH MAGAZINE. In an interview with [Earth Magazine](#) (1/30), Interior Secretary Sally Jewell talked "about transitioning from the private to the public sector; the challenges inherent in leading an agency charged with both conserving and developing the nation's natural resources; and inspiring the next generation of geoscientists." Jewell also discussed the importance of the "21st Century Conservation Corps." She noted that "we have a lot of deferred maintenance and we need people to roll up their sleeves and help us take care of these public lands." Also, Jewell said that "there is also no shortage of young people who want to get to work on public lands — either with a minor stipend or as a volunteer — and I want to leverage that excitement and energy to put these young people to work."

Secretary Jewell Calls For Public-Private Partnership At Outdoor Retailer. The [Outdoor Retailer Daily](#) (1/23) reported on Interior Secretary Sally Jewell's appearance at the Outdoor Retailer, where she called for a "public-private partnership" to create "educational, volunteer and work opportunities" on public lands for "members of the millennial generation." Jewell's vision is for the "Civilian Conservation Corps 2.0." and she's "not going to wait for Congress to act." While Jewell is "asking for private companies from the outdoor industry to get involved," she will also "make sure" the Interior Department has "volunteer coordinators and projects ready for these youth corps."

INTERIOR BLAMES COMMUNICATIONS BREAKDOWN FOR CONTROVERSIAL GROUSE MEET. The [Grand Junction Daily Sentinel](#) (1/30, 73K) reports that the Interior Department “blamed a “breakdown in communications” for an incident last week in which Interior Secretary Sally Jewell barred reporters from attending a public meeting in Craig.” Interior Department communications director Kate Kelly “wrote to a newspaper and the Colorado Press Association that the department will ‘redouble our efforts’ to work with local governments and respect press freedoms.” Kelly wrote that Jewell “attended what our office had understood to be a small meeting with community leaders. It appears there was a breakdown in communications with the (Moffat) County commissioners about the parameters of the meeting.”

The [Craig \(CO\) Daily Press](#) (1/29, 10K) reports that the letter added, “The misunderstanding was also unfortunate because it has distracted from the original purpose of the Secretary’s visit: to highlight the work that is being done on the ground through private landowners and at all levels of government on these critical sage grouse efforts.” Craig Daily Press Managing Editor Noelle Leavitt Riley was “satisfied with the correspondence from the Department of the Interior, believing they will improve on similar visits in the future.” Leavitt Riley said, “I’m very pleased with the Secretary of Interior’s response. Not only does she and her staff acknowledge that the situation was handled poorly, but they said they’ll strive to do better in the future. This situation is an example of how the press and federal officials can solve breakdowns in communication and work together in getting important news to the community.”

Also reporting on the story is the [Steamboat \(CO\) Pilot & Today](#) (1/29, 30K).

Meanwhile, the [Daily Caller](#) (1/30, Campbell, 422K) reports that “a bill that would have strengthened protections for journalists and their sources was killed in committee by Colorado Democrats.” The article notes that “the bill was killed during a period of tension between Colorado Democrats and the media.” On Monday, the Colorado Press Association sent a letter to Interior Secretary Sally Jewell, “complaining that her barring the media from a public meeting in Colorado caused local officials to violate the state’s open meetings laws and it trampled on the barred reporter’s First Amendment rights.”

OBAMA INTENDS TO USE EXECUTIVE AUTHORITY ON CONSERVATION. The [Washington Times](#) (1/30, Boyer, 417K) reports that in his State of the Union address Tuesday night, President Barack Obama “included land conservation in a long list of issues on which he intends to use his executive authority without input from Congress.” Obama said, “I’ll use my authority to protect more of our pristine federal lands for future generations.” The sentence “set off alarm bells for lawmakers such as Rep. Rob Bishop, Utah Republican.” Bishop said, “It’s almost surreal to have someone say he wants to work with you as long as you’re willing to do it his way, and if you don’t, then he’ll do it anyway. He needs to get local input before taking that route. Congress has to be a player in that.”

For “The Blog” of the [Huffington Post](#) (1/30, Morgan, 11.54M), Ann Morgan, Executive director of the National Wildlife Federation regional office in Boulder, Colorado lauded Obama’s vow to protect more public lands. She notes that “Congress has before it more than three dozen land protection bills with broad public support, yet none have passed.” Since “the process is broken,” Morgan urges Obama to “use his authority under the Antiquities Act to create new national monuments to protect the iconic lands identified in the bills languishing before Congress.” Morgan looks “forward to Interior moving forward on responsible decision making so that our air and water will be protected, wildlife can safely migrate across their historic ranges and hunters, anglers, wildlife watchers, hikers and others can continue to enjoy our public lands for generations to come.”

INTERIOR, EPA LOST EMPLOYEES EVEN AS OVERALL FEDERAL EMPLOYMENT INCREASED. The [Environment & Energy Publishing](#) (1/30, 705) reports that the Interior Department and the EPA “saw their workforces shrink between 2004 and 2012, even as the overall number of federal employees increased by 14 percent, according to a new report from the Government Accountability Office.” The article notes that “the report tackles trends in civilian employment and compensation as Congress looks for places to save money.”

LIST RANKS MOST MEMORABLE POLITICIAN-REPORTER CONFRONTATIONS. For “The Fix” blog of the [Washington Post](#) (1/29, Sullivan, 4.28M), Sean Sullivan picks eight of the most memorable confrontations between politicians and the media. Of note, former Interior Secretary Ken Salazar’s run-in with reporter Dave Phillips is ranked third.

PRESIDENT'S CLIMATE ACTION PLAN SEEN AS "FATALLY FLAWED." In the [National Review](#) (1/30, White, 805K), Texas Public Policy Foundation Distinguished Senior Fellow Kathleen Hartnett White writes a highly critical 1,500-word piece about "the fatal flaws in President Obama's current climate policies." Despite scientific evidence that climate change might not be anthropogenic, she says, "the president doubles down on what he calls the 'unequivocal' dictates of science" by pursuing "broad executive action without a congressionally legislated foundation." In her view, the Administration's Climate Action Plan is incoherent, "futile, wasteful, and redundant," and if the Environmental Protection Agency's "unachievable" emissions regulations foreshadow the agency's "future CO2 agenda, expect energy scarcity in this country." In conclusion, White suggests that the US replace the UN's Intergovernmental Panel on Climate Change with a body that would pursue observational research instead of imposing dogma.

Study: Climate Change Directly Impacting Seabirds. The [New York Times](#) (1/29, Fountain, Subscription Publication, 9.61M) reports that a long-term study of Magellanic penguins "is one of the first to show a direct impact of climate change on seabirds." Lead author P. Dee Boersma with the University of Washington said the number of breeding pairs in the colony at Punta Tombo, Argentina has fallen 24 percent since 1982. Researchers found that, in addition to predation and starvation, Magellanic chicks must now contend with higher temperatures, as well as intense storms that can lead to deadly hypothermia. The Times notes the study "showed that the mortality caused by storms was in addition to those from other causes." The study was published online Wednesday in the journal PLoS ONE.

ADDITIONAL COVERAGE: FARM BILL INCLUDES PILT PAYMENTS. Additional coverage that the farm bill includes a one-year extension of PILT payments was provided by the [AP](#) (1/29), which was also picked up by the [Washington Times](#) (1/30, Daly, 417K).

The [AP](#) (1/30, Barnard, 417K) notes that "the bill passed the House on Wednesday and goes to the Senate."

The [Palm Springs \(CA\) Desert Sun](#) (1/28, 110K) editorializes that "there's no question Congress should help pay for the impact of federal land on local communities."

America's Great Outdoors:

National Park Service:

SLEEPING BEAR DUNES WILDERNESS BILL MOVES FORWARD. The [AP](#) (1/30) reports that "a bill that would designate 32,000 acres of Sleeping Bear Dunes National Lakeshore as wilderness is moving closer to congressional approval." The bill "won unanimous backing this week from the House Committee on Natural Resources," but "a floor vote has not been scheduled."

HALEAKALA NATIONAL PARK PLAN ADVANCES. The [AP](#) (1/30) reports that Haleakala National Park is "implementing a plan to cut back on the number of commercial visitors that aims to ensure preservation of the resources at the park." The plan also "seeks to ensure high-quality experiences in the next 10 to 15 years." Under the plan, "commercial bicycle tours will continue to be prohibited," and "other offerings, including horseback riding and astronomy tours, will be limited." The NPS "last month made a finding of no significant impact for the plan and accompanying environmental assessment."

ARIZONA WITHDRAWS PLAN TO EXPAND TERMINAL AT AIRPORT NEAR GRAND CANYON. The [AP](#) (1/30) reports that Arizona has decided to withdraw "a plan to expand the existing terminal at the airport just south of Grand Canyon National Park." The article says the state's decision comes after the FAA told Arizona's Department of Transportation "that it would need an environmental assessment before adding 2,000 square feet to the terminal." According to the AP, state Department of Transportation spokesman Ryan Harding said Arizona "determined that the assessment wasn't worth the effort or money."

ADDITIONAL COVERAGE: DRAKES BAY OYSTER CO GIVEN MORE TIME TO PREPARE FOR SUPREME COURT. Additional coverage that the Drakes Bay Oyster Co. has been granted a legal stay to allow it to continue to operate over the next 90 days while it prepares a case to bring to the US Supreme Court was

provided by the [AP](#) (1/30), which was picked up by the [Columbus \(IN\) Republic](#) (1/30, 80K), the [San Jose \(CA\) Mercury News](#) (1/30, 731K), the [San Luis Obispo \(CA\) Tribune](#) (1/29, 126K), the [Humboldt Beacon](#) (1/30, 13K), and [KFMB-TV](#) San Diego (1/30, 15K).

ADDITIONAL COVERAGE: NPS TO HOLD MEETING ON PROPOSED MALL METERS. Additional coverage that the NPS is planning "to install parking meters at various points around the National Mall later this year" was provided by the [Washington Post](#) (1/29, Thomson, 4.28M) and the [Washingtonian Magazine \(DC\)](#) (1/30, 338K).

Bureau of Land Management:

BLM SEEKS SHOOTER AFTER TWO WILD BURROS KILLED IN ARIZONA. The [Arizona Republic](#) (1/29, 1.19M) reports that the BLM is searching for the suspects in the shooting of two wild burros in Arizona. Rem Hawes, the BLM's Hassayampa field manager, said the bureau is "committed to the protection and management of wild burros and horses and is asking for any information regarding the illegal shootings."

Also reporting on the story is [KTVK-TV](#) Phoenix (1/30, 88K).

BLM CRITICIZED FOR WILD HORSE POLICY. In his column for the [Elko \(NV\) Daily Free Press](#) (1/30, 22K), Thomas Mitchell writes that "when it comes to carrying out the instructions from Congress on the management of wild horses and burros under the Wild Free-Roaming Horses and Burros Act of 1971, the BLM is so bold and so brazen as to write on its own website that it doesn't care one whit what the law says." According to Mitchell, "under a section of its website labeled Myths and Facts the BLM denies that it is selling or sending wild horses to slaughter," and "in another 'Fact' the agency admits there are 14,000 too many horses currently roaming the West." Mitchell claims that "these are just two of the myriad misdeeds by the federal land management agency revealed in a recent federal lawsuit filed by the Nevada Association of Counties and the Nevada Farm Bureau Federation against the Department of Interior, the BLM, Secretary of the Interior Sally Jewell and others."

Fish and Wildlife Service:

INTERIOR TO RELEASE PLAN FOR GROWING REFUGE SYSTEM. The [Environment & Energy Publishing](#) (1/30, 705) reports that the Interior Department will "soon release a draft policy to guide the growth of the National Wildlife Refuge System in the face of climate change, ecological threats and tight budgets." According to the article, "the agency tomorrow will announce the release of a draft strategic growth policy that will spell out how the system prioritizes land acquisitions and the conservation of endangered species, migratory birds and waterfowl." The agency said in a Federal Register notice to be published tomorrow, "This draft policy instructs the Refuge System to focus its protection measures on priority conservation features in order to ensure that our limited resources are directed to make the greatest contribution to the conservation of species in a strategic, cost-effective, and transparent manner."

FWS DIRECTOR ASHE TO SPEAK AT NORTH AMERICAN WHITETAIL SUMMIT. The [Harrisburg \(PA\) Patriot-News](#) (1/30, 339K) reports that "declining deer herds and other threats to North America's deer-hunting heritage will be the focus of the first North American Whitetail Summit being convened by the Quality Deer Management Association March 3-6 at Big Cedar Lodge in Branson, Mo." The group has "invited leaders and stakeholders from the entire whitetail community, including deer hunters, state and federal agencies, conservation organizations, the hunting industry, media, universities and landowners." Notably, "featured speakers will include internationally acclaimed conservationist Shane Mahoney; Dan Ashe, director of the US Fish and Wildlife Service; and Dan Forster, president of the Association of Fish and Wildlife Agencies."

ENDANGERED FISH MAY PREVENT RAISING LAKE CUMBERLAND TO NORMAL SUMMER LEVEL. The [AP](#) (1/30) reports that an endangered fish in the headwaters of Lake Cumberland has "federal officials trying to decide what to do about the lake's water level, which was due to rise this year after dam repairs kept the water lowered the last few years." The FWS and the Army Corps of Engineers are "delaying an increase until determining how to minimize the effect on the duskytail darter." Senate Minority Leader Mitch McConnell "said in a news release Wednesday the local economy has been hurt by the lower water level and resulting decline in visitors and he wants the agencies to reconsider the delay."

Also reporting on the story are the [Lexington \(KY\) Herald-Leader](#) (1/29, 320K), the [Louisville \(KY\) Courier-Journal](#) (1/29, Bruggers, 449K), and [WKYT-TV](#) Lexington, KY (1/30, 69K).

FWS AWARDS GRANT TO MIDDLE BAY WETLANDS PARTNERSHIP. The [Falmouth \(ME\) The Forecaster](#) (1/29, 60K) reports that the FWS has “awarded \$1 million to a local effort seeking to preserve more than 86 acres of coastal wetlands around Middle Bay.” According to the article, “the Middle Bay Wetlands Partnership was one of 26 conservation projects across the country – and the only one in Maine – that shared \$26.5 million in grants” from the FWS. The article notes that “funding from the grant and some local sources will help the Harpswell trust buy nearly 14 acres of land off Harpswell Neck Road from the Lowell family.”

FWS REMOVES SHIPWRECK DEBRIS FROM PACIFIC REFUGES. The [AP](#) (1/30) reports that the FWS says it’s “removed nearly one million pounds of decades-old shipwreck debris from two remote national wildlife refuges in the Pacific.” The service said Wednesday said the “removal is the first phase of coral reef restoration work at Palmyra Atoll and Kingman Reef National Wildlife Refuges.” According to the article, “the iron in the wrecked ships was fueling the growth of invasive organisms that were smothering once-healthy, diverse coral.”

RESIDENTS WEIGH IN ON REMOVAL OF WILD CATTLE. [KUCB-FM](#) Unalaska, AK (1/30) reports that on January 15, the FWS “held an open house in Sand Point as part of a public process to address unauthorized wild cattle herds.” Alaska Maritime National Wildlife Refuge manager Steve Delehanty said, “To learn what the perspectives are of the people who live right here in Sand Point and are closer to the issue and know a lot about it. We haven’t made any decision about what we’re doing [with] these two islands. They’re called Chirikof and Wosnesenski.”

COURT GRANTS EXTENSION ON DEADLINE FOR JAGUAR CRITICAL HABITAT DETERMINATION. The [Willcox \(AZ\) Range News](#) (1/30, 11K) reports that the FWS “requested and recently received an extension of the deadline to reach a final determination on critical habitat for the jaguar.” According to the article, “the previous settlement agreement date for publishing a final decision was December 16; the new publication date is February 14, 2014.”

IDAHO CALLS OFF HIRED HUNTER TO KILL WOLVES IN WILDERNESS. [Reuters](#) (1/29, Zuckerman) reports that Idaho has called off a professional hunter hired to kill wolves in a federally protected wilderness area because he had succeeded in reducing the population enough to protect the elk prized by hunters. The hunter killed nine wolves since mid-December, but none since mid-January.

SAGE GROUSE EIS CRITICIZED. In an op-ed for the [Elko \(NV\) Daily Free Press](#) (1/30, 22K), Ralph R. Sacrison, a senior mining engineer and member of the Elko County Natural Resources Management Advisory Commission, criticizes the EIS following the Nevada and Northeastern California Greater Sage-Grouse Draft Land Use Plan Amendment/Environment Impact Statement for failing to “show clear and specific closure with consistency proscriptions of the Federal Land Planning and Management Act (43 USC 1712).” According to Sacrison, “if they cared about protecting the sage grouse, they would take measures against its predators,” but “they are willing to prolong the slaughter of 1.4 million embryos and nestlings every year in order to enact their habitat control.” Sacrison claims that “they have allowed that slaughter for decades, yet continue to blame ranchers, miners, and energy and land developers for the most severe problems which face the sage grouse.”

[Securing America’s Energy Future:](#)

[Renewable Energy:](#)

RECREATIONAL ANGLERS EXPRESS CONCERNS ABOUT BLOCK ISLAND WIND FARM. For the [Warwick \(RI\) Beacon](#) (1/30, 31K), Capt. Bellavanc and Capt. Dave Monti discuss the Rhode Island Ocean Special Area Management Plan (SAMP) that serves as a federally recognized coastal management and regulatory tool. According to the authors, “overall anglers were very supportive of the SAMP program,” but “they expressed concerns about the five turbine wind project being built by developer Deepwater Wind three miles off the south coast of Block Island.” They conclude that “Deepwater Wind, government officials and regulators just have to keep the process transparent and open and keep the information flowing to recreational and commercial fishermen as well as other stakeholders.”

Onshore Energy Development:

BLM OIL, GAS LEASES IN NORTH DAKOTA NETS \$17.5 MILLION. The [AP](#) (1/30) reports that the BLM says "its most recent sale of oil and gas leases in North Dakota totaled more than \$17.5 million." The bureau says "40 federal leases were sold Wednesday."

AP coverage was picked up by [KXMC-TV](#) Minot, ND (1/30, 1K) and additional coverage was provided by [KPAX-TV](#) Missoula, MT (1/30, 1K).

Offshore Energy Development:

US SIGNS AGREEMENT ON OIL SPILLS WITH MEXICO, CUBA, BAHAMAS, AND JAMAICA. The [Tampa \(FL\) Tribune](#) (1/29, Guzzo, 520K) reports on the "Tampa roots" of a new US-Cuba agreement on oil spills. That agreement, the Multi-Lateral Technical Operating Procedure, was also signed by Mexico, the Bahamas, and Jamaica. The paper credits "Al Fox of Tampa, who has worked from here to encourage normalization of relations with Cuba through his Alliance For Responsible Cuba Policy Foundation." The article offers a detailed history of the agreement.

DEEPWATER HORIZON SPILL SEEN AS REASON FOR GREATER COOPERATION AMONG GOVERNMENT, INDUSTRY, AND SCIENTISTS. The [New Orleans Times-Picayune](#) (1/30, Alexander-Bloch, 700K) reports that at the Gulf of Mexico Oil Spill & Ecosystem Science Conference in Mobile, Alabama, panelists said that "the 2010 BP Deepwater Horizon oil spill showed scientists that they need to get better at landing funding for on-the-ground research sooner after environmental disasters, so they can better measure its impact." They also said that there needs to be greater cooperation among "academic scientists, government agencies and oil and gas industry officials."

RESIDENTS, ACTIVISTS MEET TO DISCUSS SEISMIC AIRGUN TESTING ALONG NORTH CAROLINA COAST. The [Wrightsville \(NC\) Lumina News](#) (1/30, 16K) reports that during a Kure Beach Town Council meeting, "about 150 community members and activists" convened to discuss "Mayor Dean Lambeth's Dec. 19 letter to the Bureau of Ocean Energy Management in support of seismic airgun testing along the North Carolina coast." While "environmentalists argue the testing could kill or injure thousands of marine mammals," API senior policy advisor Andy Radford "said the message being touted by environmentalists was overblown." Radford commented, "Those are estimates of numbers of animals that the tests could potentially be exposed to. Decades of seismic surveys all over the world have shown no impact to marine life."

Tackling America's Water Challenges:

PRESIDENT OBAMA CALLS GOV. BROWN FOR CALIFORNIA DROUGHT UPDATE. The [San Francisco Chronicle](#) (1/29, 2.88M) reports that President Barack Obama called California Gov. Jerry Brown "regarding the drought situation facing California." Obama "reinforced his commitment to providing the necessary federal support to the state and local efforts."

LAWMAKERS WARN BOR AGAINST HALTING WATER DELIVERIES. The [Porterville \(CA\) Recorder](#) (1/30, 27K) reports that San Joaquin Valley congressmen Kevin McCarthy, Devin Nunes, David Valadao and Jim Costa released a "joint statement in reaction to reports that the Bureau of Reclamation may refuse to provide rescheduled water for farmers from California's San Joaquin Valley." The statement read: "If the Bureau of Reclamation were to refuse to provide rescheduled water, these responsible farmers would be devastated. ... In the midst of a severe drought created by the government itself, this action would be like throwing gasoline on a fire. To withhold by government fiat hundreds of thousands of acre feet of water that these growers had already paid for, without compensation to those affected, would be an injustice that is impossible to ignore. If the bureau takes this unprecedented action, which smacks of an attempt to manufacture a crisis, we would call for a full investigation, including requests to see all internal communications of the officials responsible for making this decision."

CALIFORNIA SMALL BUSINESS ASSOCIATION PRESIDENT SUPPORTS BAY DELTA CONSERVATION

PLAN. In an op-ed for the [Sacramento \(CA\) Bee](#) (1/30, 749K), Betty Jo Toccoli, president of the California Small Business Association, writes that the Bay Delta Conservation Plan is needed because “the water system is broken and long overdue for an upgrade.” She notes that “California is entering the third, critical year of a severe drought,” and “water shortages affect every kind of business, small and large. Without water, consumers won’t be able to count on getting the fresh produce grown to California’s exacting standards.” Toccoli concludes that the Bay Delta Conservation Plan “as part of the broader state water plan represents a reasonable path forward.”

[Empowering Native American Communities:](#)

INTERIOR BEGINS IMPLEMENTATION OF LAND BUY-BACK PROGRAM. On the website of [Karnopp Petersen](#) (1/30), Lauren Lester writes that the Interior Department has begun to implement the land consolidation requirements contained in the Cobell Settlement. Interior “entered into its first cooperative agreement in December with the Oglala Lakota Nation, and has made purchase offers on the Pine Ridge Reservation and the Makah Indian Reservation.”

Meanwhile, on the website of [Galanda Broadman](#) (1/30), Gabriel “Gabe” Galanda writes that he visited the University of Arizona College of Law in Tucson for a speech at the 2nd Annual Tribal Lands Conference, and a Professorship in Residence at the Indigenous Peoples Law & Policy Program. Gabe “explained that ‘while Interior’s plan disclaims any facilitation of forced sales under 25 U.S.C. 2204(a), the \$1.55 Billion in ‘buy back’ monies will catalyze controversial intra-tribal forced sales.’” He “further explained how any such forced sale could violate various federal laws, including the Fifth Amendment of the U.S. Constitution and the United States’ trust fiduciary duty at common law, as well as international human rights law, including Articles 1 and 10 of the United Nations Declaration on the Rights of Indigenous Peoples and Article 11 of the Rights of Man and of the Citizen.”

INTERIOR RELEASES INDIAN COUNTRY LABOR FORCE REPORT. The [Indian Country Today Media Network](#) (1/29, 21K) reports that the Interior Department has “published the latest report on the American Indian population and labor force, updating and improving on the previous report that was published in 2007 with data from nine years ago.” The 2013 American Indian and Labor Force Report “presents findings from the 2010 Labor Force Survey of American Indians and Alaska combined with statistics produced by the 2010 US Census—the most recent year for which adequate statistics were available.” The article highlights “some of the report’s main findings.” It notes that “approximately 28.1 percent of the Native population is below 16 years of age, with slightly more boys than girls,” and “about 50 percent of all the Native Americans studied, who are 16 years or older, are employed either full or part time in civilian jobs.” Assistant Secretary for Indian Affairs Kevin Washburn said “he hopes the report, together with other data, will be useful in determining relative needs for resources in different regions across Indian country.”

FEDERAL APPEALS COURT REJECTS CHALLENGE TO AMADOR CASINO. The [Sacramento \(CA\) Bee](#) (1/29, 749K) reports that a federal appeals court has “rebuffed an Amador County citizens group challenging federal recognition of a tribe seeking to build a casino near Lone.” The 9th US Circuit Court of Appeals “upheld a lower court ruling affirming that the Buena Vista Rancheria of Me-Wuk Indians is a federally recognized tribe.”

Also providing coverage is the [Modesto \(CA\) Bee](#) (1/29, 208K).

SEN. MURKOWSKI URGES EXPANSION OF TRIBAL SELF-GOVERNANCE OVER PUBLIC LANDS IN ALASKA. The [Alaska Business Monthly](#) (1/30) reports that Sen. Lisa Murkowski has called on the NPS and the FWS to “recommit themselves to advocate and advance self-governance agreements with Alaska’s regional tribal organizations in order to strengthen Alaska Native participation in the management of public lands surrounding their communities.” During a hearing of the Senate Committee on Indian Affairs discussing the “Tribal Self-Governance Act of 2013,” Murkowski said, “Indian Self-Determination has been, in my mind, the most successful federal Indian policy, given the difficult history of our Nation’s indigenous people. When our tribes can manage their own programs, they are better equipped to address the disparities that exist within our Native populations. Many of our Native communities live next to and within the boundaries of public lands, national parks and wildlife refuges. As Ranking Member of the Energy and Natural Resources Committee with oversight responsibility of public lands in Alaska, I would like to see self-governance agreements supported and expanded by the Administration.”

Top National News:

ON SOTU FOLLOW-UP SWING, OBAMA CALLS ON CONGRESS TO “GIVE AMERICA A RAISE.” On Wednesday evening, all three broadcast network newscasts covered President Obama’s stops in Maryland and Pennsylvania where he reiterated some of the themes he emphasized in Tuesday’s State of the Union address. Reports last night and this morning noted that in addition to calling on Congress to increase the Federal minimum wage, as he did Tuesday, the President also signed a memo establishing a new program making it easier for working-class Americans to begin saving for their retirements.

While immediate reaction to Tuesday’s speech suggested that the President had implicitly acknowledged the realistic limits of his ambitions for the remainder of his term, this morning’s coverage, focused as it is on two broadly popular initiatives, portrays the President in a much more positive light.

On [ABC World News](#) (1/29, story 3, 1:40, 7.43M), George Stephanopoulos reported that “more than 30 million of us tuned in to” the President’s State Of The Union address, “a high stakes speech at the low point of his presidency that he used to confront Congress and demand, what he called ‘a raise for America.’” Jonathan Karl went on to report that on Wednesday, the President “was out there hitting that ‘Give America A Raise’ theme hard...in campaign-style events, both in Pennsylvania and Maryland.” According to Karl, the White House “believes this is a win/win issue for the President even if he cannot get Congress to go along with an increase to the minimum wage” because Democratic candidates “will have a campaign issue for the fall.”

The [Wall Street Journal](#) (1/30, Lee, Nicholas, Subscription Publication, 5.91M) quotes the President as saying, “Give America a raise. ... If you put in a hard day’s work, you deserve decent pay for it. That’s a principle everybody understands, that everybody believes.”

In a brief segment for [NBC Nightly News](#) (1/29, story 4, 0:35, 7.86M), Brian Williams reported that on Wednesday, President Obama “went on the road...and quickly made good on part of what he promised” in his State of the Union address. Williams noted that the President “signed a presidential memo to create the ‘myRA’ retirement program he mentioned in his speech,” and “then at a Costco in suburban Maryland, he said he would sign an executive order in coming weeks raising the minimum wage to over \$10 for new Federal contract workers.”

On the [CBS Evening News](#) (1/29, story 5, 2:15, Pelley, 5.58M), Nancy Cordes reported that just “sixteen hours after the President’s address,” Senate Majority Leader Reid “vowed to quickly bring a bill to the floor that raises the Federal minimum wage by nearly three dollars from \$7.25 an hour to \$10.10 an hour.” Cordes added that “the White House thinks this...will be a political winner,” and noted that “according to the most recent CBS News poll...72% of Americans believe it’s a good idea to raise the Federal minimum wage...including 48 percent of Republicans.”

Under the headline “Barack Obama’s Forget-Me-Not Tour,” [Politico](#) (1/30, Brown, Epstein, 464K) reports that on Wednesday, the President tried to “remind voters he isn’t a lame duck yet.” Politico says that “as part of a postmortem on what went wrong last year, senior administration officials concluded that” the President “got wrapped up in issues that weren’t the top priorities of voters.” Politico says that in an effort to heed that analysis, the President “plans to travel outside Washington at least once a week and to unveil dozens of new executive actions in the coming months.”

Likewise, the [New York Times](#) (1/30, Baker, Subscription Publication, 9.61M) reports that the President’s aides says he “want[s] to escape the shackles of being a virtual prime minister, absorbed by what Congress is doing, and demonstrate a broader leadership less dependent on the legislative process.” However, according to the Times, on Wednesday in Maryland, the President “quickly conceded that gridlock in Washington may prevent progress on his economic agenda.”

[McClatchy](#) (1/30, Kumar, 95K) reports that on Thursday, the President “will give speeches in Milwaukee and Nashville,” and then on Friday, he will meet with CEOs “to talk about an initiative to secure commitments from major corporations not to discriminate against the long-term unemployed during hiring.”

The [Washington Post](#) (1/30, Branigin, 4.28M) reports that on Wednesday in Maryland, “before an enthusiastic crowd in a suburban county where the local government recently passed legislation to raise the minimum wage,” the President “said he would lead by example” and “sign an executive order requiring new federal contractors to pay their workers a minimum wage of \$10.10 an hour.”

[USA Today](#) (1/30, Jackson, 5.82M) notes that the President “endorsed a proposed congressional bill” sponsored by Sen. Tom Harkin and Rep. George Miller (D-CA) “that would increase the minimum wage from \$7.25 per hour to \$10.10 over time.” However, according to USA Today, “some economists said an increase in the minimum wage will discourage businesses from taking on entry-level employees.” USA Today adds that Republicans “also criticized Obama’s emphasis on executive orders.”

The [Washington Post](#) (1/30, Hicks, 4.28M) reports that while “labor and civil rights groups celebrated...when” the President “said he would require a \$10.10 minimum wage for new federal contracts,” the Professional Services Council, which “advocates for government contractors, said the administration seems to have singled out federal contractors among the nation’s employers.” The Post says it is anticipated that “the wage increase is likely to affect only a small subset of companies that do business with the government.”

[USA Today](#) (1/30, O’Donnell, McElhane, 5.82M) reports that Costco CEO Craig Jelinek “has been an outspoken proponent of a minimum wage increase,” and that “labor union officials” contend that “other retailers, such as Walmart, could learn from the way Costco treats its workers.” However, according to USA Today, “others say” Costco has “such a different business model and customer base that Costco can’t be compared with other retailers.” Richard Berman, who USA Today says “runs a business advocacy group opposed to a minimum wage increase,” points out that Costco “has half the number of employees per square foot (of Walmart), is a much smaller company, its stores are only in affluent areas and people are buying in bulk.”

The [Washington Times](#) (1/30, Wolfgang, 417K) notes that while the President “had plenty of nice things to say about Costco,” he “left the store...without buying anything, even though he’d promised to walk out with some of the bulk items Costco is famous for.”

Obama Signs Memorandum Establishing Savings Program. The [AP](#) (1/30, Superville, Pickler) reports that at a US Steel plant near Pittsburgh on Wednesday, the President “signed a presidential memorandum to create the ‘myRA’ program, which he told employees would go toward ‘making sure that after a lifetime of hard work you can retire with some dignity.’” The AP adds that the President then gave the memorandum to Treasury Secretary Lew, whose “initial task is to set up a pilot program with accounts available through some employers by the end of the year.” The AP quotes Lew as saying afterwards, “We think this fills a space that, very importantly, we can do by our own authority.”

Under the headline “Obama Promotes Retirement Savings Plan On State Of Union Road Trip,” [Reuters](#) (1/30, Mason) quotes the President as saying, “If you worked hard all your life, you deserve a secure retirement.”

According to the [New York Times](#) (1/30, Bernard, Subscription Publication, 9.61M), the myRA program is “in keeping with [Obama’s] theme of providing financial relief to the middle class to try to bridge what is widely acknowledged as a growing income equality gap.” The Times says the Treasury Department’s “goal is to get people saving, particularly lower-income workers, who otherwise might not save at all.”

However, [Bloomberg News](#) (1/30, Rubin, 1.91M) says the establishment of the myRA program is just “a limited step,” that “lack[s] the broader investment options and employer match of workers’ 401(k) retirement accounts.” Bloomberg also notes that the program “is a narrower version of the automatic IRA proposal he has included in his budget,” which “would have cost the government an estimated \$17.6 billion in forgone revenue over 10 years.”

The [Pittsburgh Tribune-Review](#) (1/30, Wereschagin, 636K) notes that the President “touted the...steel plant’s retirement options.” According to the Tribune-Review, US Steel “offers employees 401(k) plans and most union workers are eligible for a defined-benefit pension – something Obama acknowledged Tuesday most workers don’t have.”

The [Pittsburgh Post-Gazette](#) (1/30, O’Toole, 725K) reports that at the West Mifflin, Pennsylvania plant, the President was “greeted by US Steel President & CEO Mario Longhi, United Steelworkers International President

Leo Gerard and Anthony Bridge, the firm's vice president of engineering, research and development." The Post-Gazette says that on a tour of the plant, the President "conducted conversations with a handful of plant workers before heading back to a makeshift stage where plant employees in orange and white hard hats formed a backdrop."

Polls Find Overwhelming Support For Obama's SOTU Address. The [Christian Science Monitor](#) (1/30, Grier, 540K) reported that in "a snap CNN/ORC survey, 44 percent of viewers who'd watched Mr. Obama said they had a 'very positive' response to his SOTU address," while 32% "said they had a 'somewhat positive' response, and 22 percent disliked it." The Monitor adds that a "CBS poll shows 83 percent of responding viewers said they approved of the proposals outlined in the speech," while just "17 percent disapproved."

SOTU Television Audience Was Obama's Smallest. [USA Today](#) (1/30, Jackson, 5.82M) reported that Tuesday night's speech "drew 33.3 million television viewers," which was "slightly less than the 33.5 million who tuned into last year's State of the Union," and "the smallest audience he has had" since taking office.

Obama Chided By Allies For Failing To Use Executive Orders More Liberally. The [AP](#) (1/30, Pace), in an article titled "Obama Executive Omissions Leave Some Allies Angry," reports that "gay rights advocates are seething over Obama's refusal to grant employment discrimination protections to gays and lesbians working for federal contractors." Fred Sainz, vice president of Human Rights Campaign, said, "In the absence of congressional action, an executive order that prohibits discrimination by contractors is a tailor-made solution to the president's expressed aims." According to the AP, Sainz says "his frustration with the White House's inaction...was 'growing by the day.'" The AP add that, for their part, "some immigration overhaul supporters were disappointed that he did not act on his own to halt deportations" of illegal immigrants. Ben Monterroso, executive director of Mi Familia Vota, is quoted as saying, "The president said he is going to use executive orders to act where Congress fails, and we expect him to do the same with immigration reform."

[USA Today](#) (1/30, Madhani, 5.82M) also reports that the President is "taking flak from some LGBT advocates for failing to address stalled legislation that would prohibit discrimination based on sexual orientation by federal contractors." According to USA Today, Heather Cronk, co-director of GetEQUAL, "said she was 'disappointed, saddened and offended' by the omission."

The [Washington Post](#) (1/30, 4.28M), in an editorial, says of Tuesday's address, "sadly there was not one word about how people who live in the nation's capital...are denied their basic rights as US citizens."

Veterans Groups Upset Obama Did Not Demand Restoration Of Benefits. The [Washington Times](#) (1/30, Klimas, 417K) reports that "veterans' groups criticized" the President "for not demanding a full repeal of cuts to military retirement benefits" in his State Of The Union address. The Times notes that the recently passed "budget deal included a provision to reduce working-age military retirees cost-of-living adjustment to one percent below inflation until a retiree reaches age 62." Daniel M. Dellinger, the American Legion's national commander, said, "The American Legion is disappointed that President Obama did not show more leadership in dealing with the COLA issue." Dellinger added, "He promised us, back in August 2011 at our national convention, that he would not balance the federal budget on the backs of America's veterans, but that is exactly what he is allowing Congress to do."

Obama EITC Expansion Proposal Is Similar To Rubio Plan. The [AP](#) (1/30, Kuhnhen) reports that "the only new legislative proposal in Obama's State of the Union" his suggestion to "expand the earned-income tax credit to childless workers, broadening benefits that now mainly go to low-income working parents." The AP notes that Sen. Marco Rubio "has put his own spotlight on the tax credit," and "has called for replacing the earned income tax credit with a 'wage enhancement' tax credit that would incorporate both low-income working families and more childless workers."

House Republicans Object To The President's Use Of Executive Actions. [McClatchy](#) (1/30, Lightman, 95K) reports that on Wednesday, House Republicans "headed to a Maryland retreat...looking to shape a unified message on immigration, debt and health care that could offer voters an alternative rather than just persistent opposition to" President Obama's agenda. According to McClatchy, the President "gave Republicans new ammunition...Tuesday night, as he vowed to use his executive power to implement policies Congress won't." Rep. Steve Scalise (R-LA), chairman of the Republican Study Committee, is quoted as saying, "Rather than

trying to write laws from the Oval Office, he should put down his pen, pick up the Constitution, and start working with Congress to solve the problems facing our nation.”

The [Wall Street Journal](#) (1/30, Hook, 5.91M) reported that on Wednesday, Rubio said, “All presidents get frustrated with Congress [but] this president seems to have extra frustration, and he reacts to it with unilateral actions that are unproductive and, in my option, borderline unconstitutional.”

[Politico](#) (1/30, Gibson, 464K) reported that some House Republicans are “pushing a resolution to bring legal action against” the President “for overstepping his authority in executive orders.” According to Politico, Rep. Tom Rice (R-SC) has sponsored the “STOP (Stop This Overreaching Presidency) resolution,” which “targets Obama for allowing a year extension health care policies that were ended because of Obamacare; delaying the employer mandate for one year; deferring the deportation of illegal immigrants...and waiving part of the welfare work requirement.”

The [Daily Caller](#) (1/30, Pappas, 422K) reported that Rep. Michele Bachmann (R-MN) said, “He may think he’s a king, he may declare himself king, but that’s not what he is under our Constitution.”

Costa Praises McMorris Rodgers’ SOTU Response. Robert Costa, in an analysis for the [Washington Post](#) (1/30, Costa, 4.28M) titled “Rep. Cathy McMorris Rodgers Comes Through For GOP In SOTU Response,” says Rep. Cathy McMorris Rodgers (R-WA) “had one of the more difficult tasks in politics, delivering the official Republican response to” the State Of The Union address, and “to the surprise of many insiders,” she “largely succeeded – mixing plain-spoken platitudes with tenderly told stories about her children and her blue-collar roots.” According to Costa, McMorris Rodgers displayed an “easygoing populism and an emphasis on jobs and her family, which includes a son with Down syndrome and a Navy veteran husband.”

Tribute To Injured Ranger Acclaimed As High Point Of Address. George Stephanopoulos, on [ABC World News](#) (1/29, story 9, 2:40, 7.43M), reported that on Tuesday night there was “a rare moment of absolute unity in Washington” following President Obama’s “deeply personal tribute to Army Ranger Cory Remsburg, drawing the longest ovation of the night from Democrats and Republicans.” ABC’s Martha Raddatz added, “If the nation remembers nothing else from last night, we will remember Cory Remsburg.” The tribute to Remsburg was also briefly noted on the [CBS Evening News](#) (1/29, story 6, 0:35, Pelley, 5.58M).

Former Bush Speechwriter Says Tuesday’s Speech Was Similar To Bush’s 2007 Address. [Politico](#) (1/30, Gold, 464K) reports that Washington Post columnist Marc Thiessen, who was a speechwriter for President George W. Bush and “the lead writer on Bush’s 2007 State of the Union address, said he found Obama’s speech Tuesday night ‘eerily familiar.’” Thiessen is quoted as saying, “Barack Obama has gone from blaming George W. Bush to plagiarizing George W. Bush.” According to Thiessen, “There were lines like ‘Our job is to help Americans build a future of hope and opportunity, a future of hope and opportunity begins with a growing economy, a future of hope and opportunity requires that all citizens have affordable and available healthcare, extending opportunity and hope depends on a stable supply of energy,’ all of that came from the 2007 State of the Union from George W. Bush.”

More Commentary On Tuesday’s Address. Clan Berman, vice president of the American Foreign Policy Council, in an op-ed for [USA Today](#) (1/30, 5.82M), claims that the Tuesday’s address “included a number of blatant mischaracterizations of just what the White House has (and has not) done on the foreign policy front.” Berman goes on to say that while the President asserted that Israel “knows America will always be at their side,” in fact, “no president has presided over a steeper decline in bilateral ties than Obama,” whose “choices...have significantly, and adversely, affected Israeli security.”

In a [Politico Magazine](#) (1/30, 464K) piece, National Review’s Rich Lowry says, “The fight against inequality...was supposed to be a generation-defining struggle and consume the rest of...Obama’s presidency as of a couple weeks ago.” However, according to Lowry, the President only “used the word ‘inequality’ three times.” Lowry suggests that the President’s “pollsters...let him in on the fact that Americans don’t naturally resent other people’s good fortune.”

Charles Blow, in a column for the [New York Times](#) (1/30, Subscription Publication, 9.61M) titled “The Incredible Shrinking Presidency,” says that on Tuesday night, the President “outlined goals that didn’t ask America to

dream as much as adjust to the paralysis, abandoning big moves for smaller ones.”

E. J. Dionne, in his column for the [Washington Post](#) (1/30, 4.28M) reports that the President intends to “demonstrate that government can take sensible steps – on wages, job training and income supplements, on infrastructure, savings, pensions and education – and encourage voters to ask Republicans why they would prevent such initiatives from being enacted on a larger scale.”

Daniel Henninger, in his column for the [Wall Street Journal](#) (1/30, Subscription Publication, 5.91M), claims the President’s willingness to use executive action stems from his general antipathy to the Constitution’s separation of powers.

Karl Rove, in a column for the [Wall Street Journal](#) (1/30, Subscription Publication, 5.91M) titled “Channeling Valerie Jarrett,” imagines White House senior adviser Valerie Jarrett’s inner monologue following Tuesday’s address.

FED CUTS BOND PURCHASES BY ANOTHER \$10 BILLION. The Federal Reserve announced on Wednesday that it is continuing to ease away from its bond-buying program, as expected by the financial community. Still, the markets resumed their decline on the news, something noted by most media coverage.

The [CBS Evening News](#) (1/29, story 8, 0:20, Pelley, 5.58M) reported that the Fed announced that it is “going ahead with plans to ease up on its economic stimulus. It will cut monthly bond purchases starting next month from \$65 to \$10 billion. Wall Street didn’t like that much. The Dow lost 189 points today to close at 15,738.”

The [New York Times](#) (1/30, Appelbaum, Subscription Publication, 9.61M) reports that the Federal Reserve, at its last meeting chaired by Ben Bernanke, announced on Wednesday that it would reduce its monthly bond-buying program by another \$10 billion in February to \$65 billion. The Fed attributed the decision to “growing underlying strength in the broader economy.” The statement “reflected the optimism of Fed officials that the economy is finally poised for faster growth after years of false starts and setbacks.” The Fed Open Market Committee members were unanimous in backing the move, the first such decision since 2011.

The [Christian Science Monitor](#) (1/30, Trumbull, 540K) reports that the Fed is still, “on balance,” attempting to use its policies to “stimulate economic growth amid high unemployment and the protracted recovery that has followed the deep recession that ended in 2009.” The Fed, noting improvements in the economy, said, “Household spending and business fixed investment advanced more quickly in recent months.” However, it warned that government “fiscal policy is restraining economic growth, although the extent of restraint is diminishing.”

[Bloomberg News](#) (1/30, Zumbur, Ito, 1.91M) reports that the unanimous backing of the move by the FOMC members shows that the tapering “strategy has brought together policy makers concerned the Fed’s record \$4.1 trillion balance sheet risks causing asset price bubbles with those who, like Vice Chairman Yellen, say more needs to be done to reduce unemployment.”

[Reuters](#) (1/30, Spicer, Lange) reports that the recent market downturn and weak December jobs report did not deter the Fed from continuing to taper its bond-buying.

Stocks Fall After Fed Announcement. The [Wall Street Journal](#) (1/30, Scaggs, Subscription Publication, 5.91M) reports that in the wake of the Fed announcement, the Dow Jones Industrial Average fell 189.77 points to 15,738.79, while the S&P 500 fell 18.30 to 1,774.20. The Nasdaq Composite Index, for its part, fell 46.53 points to 4,051.43.

[Reuters](#) (1/30, Valetkevitch) reports that the market decline was broad-based. In addition, the piece notes that the S&P 500 is down 4% for the month, a sharp change from 2013, when the index rose 30%.

Markets Shift Focus As Fed Makes Its Move. In a front-page story, the [Wall Street Journal](#) (1/30, A1, Lauricella, Martin, Stubbington, Subscription Publication, 5.91M) reports that a month into 2014, investors worldwide are seeing stock markets dropping sharply. The end of the Fed’s massive stimulus program that has been boosting the world financial markets is complicating already difficult economic situations in many emerging markets, particularly with sliding currency values. In addition to fleeing those markets, investors are also exiting

to US stock market to some extent, with much of that money heading for US Treasuries.

Bernanke's Legacy Debated. In an editorial, [USA Today](#) (1/30, 5.82M) says that Bernanke has proven to be "the right man at the right time." Along with the Treasury, the Bernanke-led Fed was able to halt the damage from the financial crisis. While the ultimate impact of the taper may change things, from "today's vantage point," Bernanke "looks like a clear candidate for the top ranks of the 14 men who have run the Fed in its 100-year history."

In an opposing op-ed for [USA Today](#) (1/30, Schiff, 5.82M), Peter Schiff, an author and CEO of Euro Pacific Capital, writes that the idea that Bernanke "deserves credit for saving the nation from an economic catastrophe omits two possibilities: that we haven't really recovered from anything, and that his policies have laid the foundation for even bigger problems ahead." Schiff warns that Bernanke was "lucky that the inflation he unleashed pushed up asset prices far more noticeably than it did consumer prices," but "eventually," that inflation will "hit consumers hard."

FARM BILL EASILY CLEARS HOUSE, HEADS FOR SENATE. [Bloomberg News](#) (1/30, Bjerga, 1.91M) reports that on Wednesday, the House easily passed the farm bill on a [251-166 vote](#). Bloomberg News says that rural Republicans and urban Democrats "overcame objections about farm subsidies and food-stamp cuts." The measure now moves on to the Senate, where Senate Majority Leader Reid said the measure will be taken up shortly, perhaps this week.

The [Washington Post](#) (1/30, O'Keefe, 4.28M) reports that the legislation was opposed by liberals, "who said that the food stamp cuts go too far," and conservatives, who were "concerned that the legislation failed to further curtail government spending." The Post says that the Senate is expected to pass the bill on Friday and send it to President Obama's desk. The votes "cap more than three years of negotiations on a new five-year agreement."

The [Los Angeles Times](#) (1/30, Memoli, 3.07M) says that conservatives "had stymied efforts to pass a farm bill in the House last year, arguing in part that agriculture subsidy programs should be considered separately from food stamps," while some "also called for a controversial work requirement to be included for food stamp recipients."

[McClatchy](#) (1/30, Doyle, 95K) says that the bill is "huge," as it will "cost \$956 billion over 10 years," according to the CBO. The legislation "trims nutrition spending by \$8 billion over 10 years, primarily by tightening certain eligibility standards" for food stamps "in some states."

[Politico](#) (1/30, Rogers, 464K) reports that the bill was "given up for dead just months ago." Unlike the Post, Politico says that the bill is likely to clear the Senate sometime before the middle of next week. The "giant" bill "combines a landmark rewrite of commodity programs together with bipartisan reforms and savings from food stamps."

[Gannett News Service](#) (1/30, Doering, 7K) reports that the 20-year-old "direct-payment subsidy program for farmers, which doles out \$5 billion annually regardless of need, would end, and some of the savings" will go to expand crop insurance programs, while an additional \$6 billion "would be saved by combining 23 conservation programs into 13."

[Reuters](#) (1/30, Beech) reports Senate Agriculture Chair Debbie Stabenow said that the bill "eliminates unnecessary subsidies, creates a more effective farm safety-net and strengthens our commitment to conservation of land and water." She was on the House floor after the vote. For his part, House Speaker Boehner said, "All Americans stand to benefit in some way from this farm bill. This is an improvement over current law, and there are no earmarks."

The [Washington Times](#) (1/30, Klimas, 417K) reports that 89 Democrats and 162 Republicans backed the legislation. House Agriculture Chairman Frank Lucas said, "While everyone may not agree with every word, every line, every policy in it, this bill reflects how it should be done. ... I hope this reflects a change in how we do our business here across the board, but I'm proud of what we've done and I'm proud of how we've done it."

Pryor Hits Cotton Over Vote Against Bill. [Roll Call](#) (1/30, Trygstad, Subscription Publication, 87K) reports Arkansas Sen. Mark Pryor "intends to make the farm bill a driving issue in his competitive re-election race" against Republican Rep. Tom Cotton. Just after Wednesday's vote, Pryor called Cotton's opposition to the bill

"reckless and irresponsible." Pryor "noted that Cotton was the only member of the state's all-Republican House delegation to oppose the legislation." Pryor is "battling his own ties to an unpopular president," but his campaign is highlighting the vote "as evidence that Cotton would be an unpalatable alternative."

Major Overhaul Of Dairy Policy Included. The [Milwaukee Journal Sentinel](#) (1/30, Barrett, 798K) reports that Wisconsin farmers are "hopeful" that the "long fight" over Federal dairy subsidies "has ended with the biggest overhaul of the milk pricing system in a generation." The new system consists of "subsidized insurance that would pay farmers when the difference between milk and feed prices shrinks too much." Dairy farmers "would pay insurance premiums based on the level of risk they chose."

WPost Urges Veto Of Bill. In an editorial, the [Washington Post](#) (1/30, 4.28M) is disdainful of the farm bill, saying that the President should veto it. The Post says that the legislation "gives to the rich and takes from the poor." The Post says that the cut to food stamps, while "both modest and justified," is "hard to swallow" when "attached to so much corporate welfare."

In contrast, the [New York Times](#) (1/30, Subscription Publication, 9.61M) has tentative praise for the bill, which "makes some of the most significant reforms to wasteful agriculture subsidies in many years," and "contains dozens of important provisions designed to increase employment in rural areas and save lives with farsighted crop research." The Times says that if the Senate or the President were to reject the farm bill, it would mean "rolling the dice that the next Congress will do a better job" and in "today's environment, that's a tough bet."

Editorial Wrap-Up:

NEW YORK TIMES. "Secrecy Behind Executions." The [New York Times](#) (1/30, Subscription Publication, 9.61M) says in an editorial that while it is "bad enough that the death penalty is barbaric, racist and arbitrary in its application," it is also "becoming less transparent as the dwindling number of death-penalty states work to hide the means by which they kill people." A Federal appeals court last week denied a condemned Missouri inmate's "constitutional claim that he is entitled to basic information about the drugs that would be used to put him to death." The Times says the secrecy is due to a shortage in execution drugs, which "often means turning to compounding pharmacies, which exist in a largely unregulated world."

"The Farm Bill Could Have Been Worse." In an editorial, the [New York Times](#) (1/30, Subscription Publication, 9.61M) offers tentative praise for the farm bill, which "makes some of the most significant reforms to wasteful agriculture subsidies in many years," and "contains dozens of important provisions designed to increase employment in rural areas and save lives with farsighted crop research." The Times says that if the Senate or the President were to reject the farm bill, it would mean "rolling the dice that the next Congress will do a better job" and in "today's environment, that's a tough bet."

"President Karzai's Perfidies." An editorial in the [New York Times](#) (1/30, Subscription Publication, 9.61M) argues that Afghan President Hamid Karzai appears to believe there is "something to be gained in destroying his relationship with the United States," and while his behavior "may serve his interests, it does not serve his long-suffering country's." The Times calls on the CIA to "quickly rethink — and possibly stop — the regular cash deliveries it has been making to Mr. Karzai for more than a decade." The Times adds that the candidates running to succeed Karzai "owe voters a vision of how they will improve governance, reduce corruption and work more productively with the United States and its allies."

WASHINGTON POST. "Out Of Step On Afghanistan." In an editorial, the [Washington Post](#) (1/30, 4.28M) notes the President's "commitment to leave behind U.S. trainers and logistical support to assist the Afghan army, as well as a counterterrorism force to 'pursue any remnants of al-Qaeda' — which presumably would involve military action," and takes issue with his claim in the State of the Union address that "we will complete our mission there by the end of this year." The Post says that if the President wants public support and Congressional funding for a continued US mission in Afghanistan, he must "make the case why it is in the national interest for troops to remain." By doing "virtually the opposite," the Post argues, the President is "complicit with Mr. Karzai in undermining a major national security interest."

"A Rotten Farm Bill." In an editorial, the [Washington Post](#) (1/30, 4.28M) is disdainful of the farm bill, saying

that the President should veto it. The Post says that the legislation “gives to the rich and takes from the poor.” The Post says that the cut to food stamps, while “both modest and justified,” is “hard to swallow” when “attached to so much corporate welfare.”

“An Unmentioned Problem.” The [Washington Post](#) (1/30, 4.28M), in an editorial, says of Tuesday’s State of the Union address, “sadly there was not one word about how people who live in the nation’s capital...are denied their basic rights as U.S. citizens.”

WALL STREET JOURNAL. “Perkinsnacht.” In an editorial, the [Wall Street Journal](#) (1/30, Subscription Publication, 5.91M) examines the backlash against venture capitalist Tom Perkins after the newspaper printed a recent letter by Perkins defending the rich and warning of what he called rising hatred against the wealthiest. The Journal says that in their harsh condemnation of Perkins, his liberal critics proved his point.

“Immigration Breakout.” In an editorial, the [Wall Street Journal](#) (1/30, Subscription Publication, 5.91M) says that the GOP is correct to pursue immigration reform. The most important reason, the WSJ says, is that immigration laws need to be reformed to boost economic growth and prosperity. The Journal says reform would allow the US to compete for the world’s best human capital.

“Harry Reid’s Trade Veto.” The [Wall Street Journal](#) (1/30, Subscription Publication, 5.91M), in an editorial, notes that Senate Majority Leader Reid’s declaration of opposition to fast track is a bad sign for one of the President’s professed 2014 pro-growth priorities. The Journal suggests that Reid’s comments may have been a calculated move which enables the President to appeal to corporate CEOs while Democrats delay action and collect election year campaign funds from business.

Rubenstein senior fellow for energy and environment at the Council on Foreign Relations. Francesca Di Marco in the Office of Communications at 202.663.5644 or fdimarco@jhu.edu. Location: Room 500, Bernstein-Offit Building, 1717 Massachusetts Ave. NW.

Last Laughs:

LATE NIGHT POLITICAL HUMOR.

Jimmy Kimmel: "Did any of you watch President Obama's State of the Union Address last night? Why don't I believe any of you? President Obama said the state of the union is strong, which is something the President says every year. Just once I would like to hear a president say the state of the union is dope. We could use some dopeness."

Jimmy Kimmel: [Referring to incident in which Congressman Michael Grimm threatened a reporter] "That's not appropriate behavior for a public servant. You don't threaten them. You close a bridge in their town. That's how you do it."

Stephen Colbert: [Referring to President Obama's State of the Union Address] "Obama said other stuff too, but the real highlight of every State of the Union is the Republican response. And last night was so historical. The Republicans brought their A-game, as in a lot of people talking. You had your Mike Lee for the tea partiers, Rand Paul for the other tea partiers and Cuban American Congresswoman Ileana Ros-Lehtinen for Los Party Grande del Tea. No matter what kind of Republican you are, there was a speech for you, like your own personal sleep number, but for rage."

Jon Stewart: [Referring to President Obama's State of the Union Address] "So, to sum up the 2014 State of the Union: a litany of vague pledges, a justified venting of frustration with Congress, and capping it, the world's [expletive] Republican open-mike night."

Jimmy Fallon: "Last night, of course, was the State of the Union Address. And during his speech, President Obama promised to focus on economic growth, education, and healthcare. Or as people tuning in put it, 'Oh, crap. It's a rerun.'"

Jay Leno: "Hey, as you know, President Obama gave his State of the Union address last night. I thought he had a very good speech. Very good speech. President Obama said he wants to give America a raise. Just waiting, of course, for final approval from China. As soon as they say it's okay, then we'll move ahead."

Jay Leno: "The President said that unemployment is dropping, but critics claim it doesn't include people who

have left the work force. Hey, how about people who are asked to leave the work force like me?"

Jay Leno: "During an interview after President Obama's speech last night, New York Republican Congressman Michael Grimm threatened to throw a reporter over the Capitol balcony when the reporter asked him about an investigation of campaign finances. He swore at the guy and he threatened to throw him over the balcony. See, I don't think the reporter has anything to worry about. When is the last time a congressman kept his word?"

Jay Leno: "It was a pretty impassioned speech last night. President Obama asked the Americans to pitch in and help those who are most down on their luck. Like the Lakers. I think he mentioned them by name."

Conan O'Brien: "A former speechwriter for George W. Bush accused President Obama of plagiarizing one of the speeches. He denied the claim and so did his speechwriter, Shia Labeouf."

Conan O'Brien: "In a new interview that just came out, Jerry Springer said that he would want President Obama as a son. In response, Obama said, 'Thanks, but I'll stick to not having a dad, ok? I'm good.'"

DOI in the News:

SECRETARY JEWELL INTERVIEWED BY EARTH MAGAZINE. In an interview with [Earth Magazine](#) (1/30), Interior Secretary Sally Jewell talked "about transitioning from the private to the public sector; the challenges inherent in leading an agency charged with both conserving and developing the nation's natural resources; and inspiring the next generation of geoscientists." Jewell also discussed the importance of the "21st Century Conservation Corps." She noted that "we have a lot of deferred maintenance and we need people to roll up their sleeves and help us take care of these public lands." Also, Jewell said that "there is also no shortage of young people who want to get to work on public lands — either with a minor stipend or as a volunteer — and I want to leverage that excitement and energy to put these young people to work."

Secretary Jewell Calls For Public-Private Partnership At Outdoor Retailer. The [Outdoor Retailer Daily](#) (1/23) reported on Interior Secretary Sally Jewell's appearance at the Outdoor Retailer, where she called for a "public-private partnership" to create "educational, volunteer and work opportunities" on public lands for "members of the millennial generation." Jewell's vision is for the "Civilian Conservation Corps 2.0." and she's "not going to wait for Congress to act." While Jewell is "asking for private companies from the outdoor industry to get involved," she will also "make sure" the Interior Department has "volunteer coordinators and projects ready for these youth corps."

INTERIOR BLAMES COMMUNICATIONS BREAKDOWN FOR CONTROVERSIAL GROUSE MEET. The [Grand Junction Daily Sentinel](#) (1/30, 73K) reports that the Interior Department “blamed a “breakdown in communications” for an incident last week in which Interior Secretary Sally Jewell barred reporters from attending a public meeting in Craig.” Interior Department communications director Kate Kelly “wrote to a newspaper and the Colorado Press Association that the department will ‘redouble our efforts’ to work with local governments and respect press freedoms.” Kelly wrote that Jewell “attended what our office had understood to be a small meeting with community leaders. It appears there was a breakdown in communications with the (Moffat) County commissioners about the parameters of the meeting.”

The [Craig \(CO\) Daily Press](#) (1/29, 10K) reports that the letter added, “The misunderstanding was also unfortunate because it has distracted from the original purpose of the Secretary’s visit: to highlight the work that is being done on the ground through private landowners and at all levels of government on these critical sage grouse efforts.” Craig Daily Press Managing Editor Noelle Leavitt Riley was “satisfied with the correspondence from the Department of the Interior, believing they will improve on similar visits in the future.” Leavitt Riley said, “I’m very pleased with the Secretary of Interior’s response. Not only does she and her staff acknowledge that the situation was handled poorly, but they said they’ll strive to do better in the future. This situation is an example of how the press and federal officials can solve breakdowns in communication and work together in getting important news to the community.”

Also reporting on the story is the [Steamboat \(CO\) Pilot & Today](#) (1/29, 30K).

Meanwhile, the [Daily Caller](#) (1/30, Campbell, 422K) reports that “a bill that would have strengthened protections for journalists and their sources was killed in committee by Colorado Democrats.” The article notes that “the bill was killed during a period of tension between Colorado Democrats and the media.” On Monday, the Colorado Press Association sent a letter to Interior Secretary Sally Jewell, “complaining that her barring the media from a public meeting in Colorado caused local officials to violate the state’s open meetings laws and it trampled on the barred reporter’s First Amendment rights.”

OBAMA INTENDS TO USE EXECUTIVE AUTHORITY ON CONSERVATION. The [Washington Times](#) (1/30, Boyer, 417K) reports that in his State of the Union address Tuesday night, President Barack Obama “included land conservation in a long list of issues on which he intends to use his executive authority without input from Congress.” Obama said, “I’ll use my authority to protect more of our pristine federal lands for future generations.” The sentence “set off alarm bells for lawmakers such as Rep. Rob Bishop, Utah Republican.” Bishop said, “It’s almost surreal to have someone say he wants to work with you as long as you’re willing to do it his way, and if you don’t, then he’ll do it anyway. He needs to get local input before taking that route. Congress has to be a player in that.”

For “The Blog” of the [Huffington Post](#) (1/30, Morgan, 11.54M), Ann Morgan, Executive director of the National Wildlife Federation regional office in Boulder, Colorado lauded Obama’s vow to protect more public lands. She notes that “Congress has before it more than three dozen land protection bills with broad public support, yet none have passed.” Since “the process is broken,” Morgan urges Obama to “use his authority under the Antiquities Act to create new national monuments to protect the iconic lands identified in the bills languishing before Congress.” Morgan looks “forward to Interior moving forward on responsible decision making so that our air and water will be protected, wildlife can safely migrate across their historic ranges and hunters, anglers, wildlife watchers, hikers and others can continue to enjoy our public lands for generations to come.”

INTERIOR, EPA LOST EMPLOYEES EVEN AS OVERALL FEDERAL EMPLOYMENT INCREASED. The [Environment & Energy Publishing](#) (1/30, 705) reports that the Interior Department and the EPA “saw their workforces shrink between 2004 and 2012, even as the overall number of federal employees increased by 14 percent, according to a new report from the Government Accountability Office.” The article notes that “the report tackles trends in civilian employment and compensation as Congress looks for places to save money.”

LIST RANKS MOST MEMORABLE POLITICIAN-REPORTER CONFRONTATIONS. For “The Fix” blog of the [Washington Post](#) (1/29, Sullivan, 4.28M), Sean Sullivan picks eight of the most memorable confrontations between politicians and the media. Of note, former Interior Secretary Ken Salazar’s run-in with reporter Dave Phillips is ranked third.

PRESIDENT'S CLIMATE ACTION PLAN SEEN AS "FATALLY FLAWED." In the [National Review](#) (1/30, White, 805K), Texas Public Policy Foundation Distinguished Senior Fellow Kathleen Hartnett White writes a highly critical 1,500-word piece about "the fatal flaws in President Obama's current climate policies." Despite scientific evidence that climate change might not be anthropogenic, she says, "the president doubles down on what he calls the 'unequivocal' dictates of science" by pursuing "broad executive action without a congressionally legislated foundation." In her view, the Administration's Climate Action Plan is incoherent, "futile, wasteful, and redundant," and if the Environmental Protection Agency's "unachievable" emissions regulations foreshadow the agency's "future CO2 agenda, expect energy scarcity in this country." In conclusion, White suggests that the US replace the UN's Intergovernmental Panel on Climate Change with a body that would pursue observational research instead of imposing dogma.

Study: Climate Change Directly Impacting Seabirds. The [New York Times](#) (1/29, Fountain, Subscription Publication, 9.61M) reports that a long-term study of Magellanic penguins "is one of the first to show a direct impact of climate change on seabirds." Lead author P. Dee Boersma with the University of Washington said the number of breeding pairs in the colony at Punta Tombo, Argentina has fallen 24 percent since 1982. Researchers found that, in addition to predation and starvation, Magellanic chicks must now contend with higher temperatures, as well as intense storms that can lead to deadly hypothermia. The Times notes the study "showed that the mortality caused by storms was in addition to those from other causes." The study was published online Wednesday in the journal PLoS ONE.

ADDITIONAL COVERAGE: FARM BILL INCLUDES PILT PAYMENTS. Additional coverage that the farm bill includes a one-year extension of PILT payments was provided by the [AP](#) (1/29), which was also picked up by the [Washington Times](#) (1/30, Daly, 417K).

The [AP](#) (1/30, Barnard, 417K) notes that "the bill passed the House on Wednesday and goes to the Senate."

The [Palm Springs \(CA\) Desert Sun](#) (1/28, 110K) editorializes that "there's no question Congress should help pay for the impact of federal land on local communities."

[America's Great Outdoors:](#)

National Park Service:

SLEEPING BEAR DUNES WILDERNESS BILL MOVES FORWARD. The [AP](#) (1/30) reports that "a bill that would designate 32,000 acres of Sleeping Bear Dunes National Lakeshore as wilderness is moving closer to congressional approval." The bill "won unanimous backing this week from the House Committee on Natural Resources," but "a floor vote has not been scheduled."

HALEAKALA NATIONAL PARK PLAN ADVANCES. The [AP](#) (1/30) reports that Haleakala National Park is "implementing a plan to cut back on the number of commercial visitors that aims to ensure preservation of the resources at the park." The plan also "seeks to ensure high-quality experiences in the next 10 to 15 years." Under the plan, "commercial bicycle tours will continue to be prohibited," and "other offerings, including horseback riding and astronomy tours, will be limited." The NPS "last month made a finding of no significant impact for the plan and accompanying environmental assessment."

ARIZONA WITHDRAWS PLAN TO EXPAND TERMINAL AT AIRPORT NEAR GRAND CANYON. The [AP](#) (1/30) reports that Arizona has decided to withdraw "a plan to expand the existing terminal at the airport just south of Grand Canyon National Park." The article says the state's decision comes after the FAA told Arizona's Department of Transportation "that it would need an environmental assessment before adding 2,000 square feet to the terminal." According to the AP, state Department of Transportation spokesman Ryan Harding said Arizona "determined that the assessment wasn't worth the effort or money."

ADDITIONAL COVERAGE: DRAKES BAY OYSTER CO GIVEN MORE TIME TO PREPARE FOR SUPREME COURT. Additional coverage that the Drakes Bay Oyster Co. has been granted a legal stay to allow it to continue to operate over the next 90 days while it prepares a case to bring to the US Supreme Court was

provided by the [AP](#) (1/30), which was picked up by the [Columbus \(IN\) Republic](#) (1/30, 80K), the [San Jose \(CA\) Mercury News](#) (1/30, 731K), the [San Luis Obispo \(CA\) Tribune](#) (1/29, 126K), the [Humboldt Beacon](#) (1/30, 13K), and [KFMB-TV](#) San Diego (1/30, 15K).

ADDITIONAL COVERAGE: NPS TO HOLD MEETING ON PROPOSED MALL METERS. Additional coverage that the NPS is planning "to install parking meters at various points around the National Mall later this year" was provided by the [Washington Post](#) (1/29, Thomson, 4.28M) and the [Washingtonian Magazine \(DC\)](#) (1/30, 338K).

Bureau of Land Management:

BLM SEEKS SHOOTER AFTER TWO WILD BURROS KILLED IN ARIZONA. The [Arizona Republic](#) (1/29, 1.19M) reports that the BLM is searching for the suspects in the shooting of two wild burros in Arizona. Rem Hawes, the BLM's Hassayampa field manager, said the bureau is "committed to the protection and management of wild burros and horses and is asking for any information regarding the illegal shootings."

Also reporting on the story is [KTVK-TV](#) Phoenix (1/30, 88K).

BLM CRITICIZED FOR WILD HORSE POLICY. In his column for the [Elko \(NV\) Daily Free Press](#) (1/30, 22K), Thomas Mitchell writes that "when it comes to carrying out the instructions from Congress on the management of wild horses and burros under the Wild Free-Roaming Horses and Burros Act of 1971, the BLM is so bold and so brazen as to write on its own website that it doesn't care one whit what the law says." According to Mitchell, "under a section of its website labeled Myths and Facts the BLM denies that it is selling or sending wild horses to slaughter," and "in another 'Fact' the agency admits there are 14,000 too many horses currently roaming the West." Mitchell claims that "these are just two of the myriad misdeeds by the federal land management agency revealed in a recent federal lawsuit filed by the Nevada Association of Counties and the Nevada Farm Bureau Federation against the Department of Interior, the BLM, Secretary of the Interior Sally Jewell and others."

Fish and Wildlife Service:

INTERIOR TO RELEASE PLAN FOR GROWING REFUGE SYSTEM. The [Environment & Energy Publishing](#) (1/30, 705) reports that the Interior Department will "soon release a draft policy to guide the growth of the National Wildlife Refuge System in the face of climate change, ecological threats and tight budgets." According to the article, "the agency tomorrow will announce the release of a draft strategic growth policy that will spell out how the system prioritizes land acquisitions and the conservation of endangered species, migratory birds and waterfowl." The agency said in a Federal Register notice to be published tomorrow, "This draft policy instructs the Refuge System to focus its protection measures on priority conservation features in order to ensure that our limited resources are directed to make the greatest contribution to the conservation of species in a strategic, cost-effective, and transparent manner."

FWS DIRECTOR ASHE TO SPEAK AT NORTH AMERICAN WHITETAIL SUMMIT. The [Harrisburg \(PA\) Patriot-News](#) (1/30, 339K) reports that "declining deer herds and other threats to North America's deer-hunting heritage will be the focus of the first North American Whitetail Summit being convened by the Quality Deer Management Association March 3-6 at Big Cedar Lodge in Branson, Mo." The group has "invited leaders and stakeholders from the entire whitetail community, including deer hunters, state and federal agencies, conservation organizations, the hunting industry, media, universities and landowners." Notably, "featured speakers will include internationally acclaimed conservationist Shane Mahoney; Dan Ashe, director of the US Fish and Wildlife Service; and Dan Forster, president of the Association of Fish and Wildlife Agencies."

ENDANGERED FISH MAY PREVENT RAISING LAKE CUMBERLAND TO NORMAL SUMMER LEVEL. The [AP](#) (1/30) reports that an endangered fish in the headwaters of Lake Cumberland has "federal officials trying to decide what to do about the lake's water level, which was due to rise this year after dam repairs kept the water lowered the last few years." The FWS and the Army Corps of Engineers are "delaying an increase until determining how to minimize the effect on the duskytail darter." Senate Minority Leader Mitch McConnell "said in a news release Wednesday the local economy has been hurt by the lower water level and resulting decline in visitors and he wants the agencies to reconsider the delay."

Also reporting on the story are the [Lexington \(KY\) Herald-Leader](#) (1/29, 320K), the [Louisville \(KY\) Courier-Journal](#) (1/29, Bruggers, 449K), and [WKYT-TV](#) Lexington, KY (1/30, 69K).

FWS AWARDS GRANT TO MIDDLE BAY WETLANDS PARTNERSHIP. The [Falmouth \(ME\) The Forecaster](#) (1/29, 60K) reports that the FWS has "awarded \$1 million to a local effort seeking to preserve more than 86 acres of coastal wetlands around Middle Bay." According to the article, "the Middle Bay Wetlands Partnership was one of 26 conservation projects across the country – and the only one in Maine – that shared \$26.5 million in grants" from the FWS. The article notes that "funding from the grant and some local sources will help the Harpswell trust buy nearly 14 acres of land off Harpswell Neck Road from the Lowell family."

FWS REMOVES SHIPWRECK DEBRIS FROM PACIFIC REFUGES. The [AP](#) (1/30) reports that the FWS says it's "removed nearly one million pounds of decades-old shipwreck debris from two remote national wildlife refuges in the Pacific." The service said Wednesday said the "removal is the first phase of coral reef restoration work at Palmyra Atoll and Kingman Reef National Wildlife Refuges." According to the article, "the iron in the wrecked ships was fueling the growth of invasive organisms that were smothering once-healthy, diverse coral."

RESIDENTS WEIGH IN ON REMOVAL OF WILD CATTLE. [KUCB-FM](#) Unalaska, AK (1/30) reports that on January 15, the FWS "held an open house in Sand Point as part of a public process to address unauthorized wild cattle herds." Alaska Maritime National Wildlife Refuge manager Steve Delehanty said, "To learn what the perspectives are of the people who live right here in Sand Point and are closer to the issue and know a lot about it. We haven't made any decision about what we're doing [with] these two islands. They're called Chirikof and Wosnesenski."

COURT GRANTS EXTENSION ON DEADLINE FOR JAGUAR CRITICAL HABITAT DETERMINATION. The [Willcox \(AZ\) Range News](#) (1/30, 11K) reports that the FWS "requested and recently received an extension of the deadline to reach a final determination on critical habitat for the jaguar." According to the article, "the previous settlement agreement date for publishing a final decision was December 16; the new publication date is February 14, 2014."

IDAHO CALLS OFF HIRED HUNTER TO KILL WOLVES IN WILDERNESS. [Reuters](#) (1/29, Zuckerman) reports that Idaho has called off a professional hunter hired to kill wolves in a federally protected wilderness area because he had succeeded in reducing the population enough to protect the elk prized by hunters. The hunter killed nine wolves since mid-December, but none since mid-January.

SAGE GROUSE EIS CRITICIZED. In an op-ed for the [Elko \(NV\) Daily Free Press](#) (1/30, 22K), Ralph R. Sacrison, a senior mining engineer and member of the Elko County Natural Resources Management Advisory Commission, criticizes the EIS following the Nevada and Northeastern California Greater Sage-Grouse Draft Land Use Plan Amendment/Environment Impact Statement for failing to "show clear and specific closure with consistency proscriptions of the Federal Land Planning and Management Act (43 USC 1712)." According to Sacrison, "if they cared about protecting the sage grouse, they would take measures against its predators," but "they are willing to prolong the slaughter of 1.4 million embryos and nestlings every year in order to enact their habitat control." Sacrison claims that "they have allowed that slaughter for decades, yet continue to blame ranchers, miners, and energy and land developers for the most severe problems which face the sage grouse."

[Securing America's Energy Future:](#)

Renewable Energy:

RECREATIONAL ANGLERS EXPRESS CONCERNS ABOUT BLOCK ISLAND WIND FARM. For the [Warwick \(RI\) Beacon](#) (1/30, 31K), Capt. Bellavanc and Capt. Dave Monti discuss the Rhode Island Ocean Special Area Management Plan (SAMP) that serves as a federally recognized coastal management and regulatory tool. According to the authors, "overall anglers were very supportive of the SAMP program," but "they expressed concerns about the five turbine wind project being built by developer Deepwater Wind three miles off the south coast of Block Island." They conclude that "Deepwater Wind, government officials and regulators just have to keep the process transparent and open and keep the information flowing to recreational and commercial fishermen as well as other stakeholders."

Onshore Energy Development:

BLM OIL, GAS LEASES IN NORTH DAKOTA NETS \$17.5 MILLION. The [AP](#) (1/30) reports that the BLM says "its most recent sale of oil and gas leases in North Dakota totaled more than \$17.5 million." The bureau says "40 federal leases were sold Wednesday."

AP coverage was picked up by [KXMC-TV](#) Minot, ND (1/30, 1K) and additional coverage was provided by [KPAX-TV](#) Missoula, MT (1/30, 1K).

Offshore Energy Development:

US SIGNS AGREEMENT ON OIL SPILLS WITH MEXICO, CUBA, BAHAMAS, AND JAMAICA. The [Tampa \(FL\) Tribune](#) (1/29, Guzzo, 520K) reports on the "Tampa roots" of a new US-Cuba agreement on oil spills. That agreement, the Multi-Lateral Technical Operating Procedure, was also signed by Mexico, the Bahamas, and Jamaica. The paper credits "Al Fox of Tampa, who has worked from here to encourage normalization of relations with Cuba through his Alliance For Responsible Cuba Policy Foundation." The article offers a detailed history of the agreement.

DEEPWATER HORIZON SPILL SEEN AS REASON FOR GREATER COOPERATION AMONG GOVERNMENT, INDUSTRY, AND SCIENTISTS. The [New Orleans Times-Picayune](#) (1/30, Alexander-Bloch, 700K) reports that at the Gulf of Mexico Oil Spill & Ecosystem Science Conference in Mobile, Alabama, panelists said that "the 2010 BP Deepwater Horizon oil spill showed scientists that they need to get better at landing funding for on-the-ground research sooner after environmental disasters, so they can better measure its impact." They also said that there needs to be greater cooperation among "academic scientists, government agencies and oil and gas industry officials."

RESIDENTS, ACTIVISTS MEET TO DISCUSS SEISMIC AIRGUN TESTING ALONG NORTH CAROLINA COAST. The [Wrightsville \(NC\) Lumina News](#) (1/30, 16K) reports that during a Kure Beach Town Council meeting, "about 150 community members and activists" convened to discuss "Mayor Dean Lambeth's Dec. 19 letter to the Bureau of Ocean Energy Management in support of seismic airgun testing along the North Carolina coast." While "environmentalists argue the testing could kill or injure thousands of marine mammals," API senior policy advisor Andy Radford "said the message being touted by environmentalists was overblown." Radford commented, "Those are estimates of numbers of animals that the tests could potentially be exposed to. Decades of seismic surveys all over the world have shown no impact to marine life."

Tackling America's Water Challenges:

PRESIDENT OBAMA CALLS GOV. BROWN FOR CALIFORNIA DROUGHT UPDATE. The [San Francisco Chronicle](#) (1/29, 2.88M) reports that President Barack Obama called California Gov. Jerry Brown "regarding the drought situation facing California." Obama "reinforced his commitment to providing the necessary federal support to the state and local efforts."

LAWMAKERS WARN BOR AGAINST HALTING WATER DELIVERIES. The [Porterville \(CA\) Recorder](#) (1/30, 27K) reports that San Joaquin Valley congressmen Kevin McCarthy, Devin Nunes, David Valadao and Jim Costa released a "joint statement in reaction to reports that the Bureau of Reclamation may refuse to provide rescheduled water for farmers from California's San Joaquin Valley." The statement read: "If the Bureau of Reclamation were to refuse to provide rescheduled water, these responsible farmers would be devastated. ... In the midst of a severe drought created by the government itself, this action would be like throwing gasoline on a fire. To withhold by government fiat hundreds of thousands of acre feet of water that these growers had already paid for, without compensation to those affected, would be an injustice that is impossible to ignore. If the bureau takes this unprecedented action, which smacks of an attempt to manufacture a crisis, we would call for a full investigation, including requests to see all internal communications of the officials responsible for making this decision."

CALIFORNIA SMALL BUSINESS ASSOCIATION PRESIDENT SUPPORTS BAY DELTA CONSERVATION

PLAN. In an op-ed for the [Sacramento \(CA\) Bee](#) (1/30, 749K), Betty Jo Toccoli, president of the California Small Business Association, writes that the Bay Delta Conservation Plan is needed because “the water system is broken and long overdue for an upgrade.” She notes that “California is entering the third, critical year of a severe drought,” and “water shortages affect every kind of business, small and large. Without water, consumers won’t be able to count on getting the fresh produce grown to California’s exacting standards.” Toccoli concludes that the Bay Delta Conservation Plan “as part of the broader state water plan represents a reasonable path forward.”

[Empowering Native American Communities:](#)

INTERIOR BEGINS IMPLEMENTATION OF LAND BUY-BACK PROGRAM. On the website of [Kamopp Petersen](#) (1/30), Lauren Lester writes that the Interior Department has begun to implement the land consolidation requirements contained in the Cobell Settlement. Interior “entered into its first cooperative agreement in December with the Oglala Lakota Nation, and has made purchase offers on the Pine Ridge Reservation and the Makah Indian Reservation.”

Meanwhile, on the website of [Galanda Broadman](#) (1/30), Gabriel “Gabe” Galanda writes that he visited the University of Arizona College of Law in Tucson for a speech at the 2nd Annual Tribal Lands Conference, and a Professorship in Residence at the Indigenous Peoples Law & Policy Program. Gabe “explained that ‘while Interior’s plan disclaims any facilitation of forced sales under 25 U.S.C. 2204(a), the \$1.55 Billion in ‘buy back’ monies will catalyze controversial intra-tribal forced sales.’” He “further explained how any such forced sale could violate various federal laws, including the Fifth Amendment of the U.S. Constitution and the United States’ trust fiduciary duty at common law, as well as international human rights law, including Articles 1 and 10 of the United Nations Declaration on the Rights of Indigenous Peoples and Article 11 of the Rights of Man and of the Citizen.”

INTERIOR RELEASES INDIAN COUNTRY LABOR FORCE REPORT. The [Indian Country Today Media Network](#) (1/29, 21K) reports that the Interior Department has “published the latest report on the American Indian population and labor force, updating and improving on the previous report that was published in 2007 with data from nine years ago.” The 2013 American Indian and Labor Force Report “presents findings from the 2010 Labor Force Survey of American Indians and Alaska combined with statistics produced by the 2010 US Census—the most recent year for which adequate statistics were available.” The article highlights “some of the report’s main findings.” It notes that “approximately 28.1 percent of the Native population is below 16 years of age, with slightly more boys than girls,” and “about 50 percent of all the Native Americans studied, who are 16 years or older, are employed either full or part time in civilian jobs.” Assistant Secretary for Indian Affairs Kevin Washburn said “he hopes the report, together with other data, will be useful in determining relative needs for resources in different regions across Indian country.”

FEDERAL APPEALS COURT REJECTS CHALLENGE TO AMADOR CASINO. The [Sacramento \(CA\) Bee](#) (1/29, 749K) reports that a federal appeals court has “rebuffed an Amador County citizens group challenging federal recognition of a tribe seeking to build a casino near Lone.” The 9th US Circuit Court of Appeals “upheld a lower court ruling affirming that the Buena Vista Rancheria of Me-Wuk Indians is a federally recognized tribe.”

Also providing coverage is the [Modesto \(CA\) Bee](#) (1/29, 208K).

SEN. MURKOWSKI URGES EXPANSION OF TRIBAL SELF-GOVERNANCE OVER PUBLIC LANDS IN ALASKA. The [Alaska Business Monthly](#) (1/30) reports that Sen. Lisa Murkowski has called on the NPS and the FWS to “recommit themselves to advocate and advance self-governance agreements with Alaska’s regional tribal organizations in order to strengthen Alaska Native participation in the management of public lands surrounding their communities.” During a hearing of the Senate Committee on Indian Affairs discussing the “Tribal Self-Governance Act of 2013,” Murkowski said, “Indian Self-Determination has been, in my mind, the most successful federal Indian policy, given the difficult history of our Nation’s indigenous people. When our tribes can manage their own programs, they are better equipped to address the disparities that exist within our Native populations. Many of our Native communities live next to and within the boundaries of public lands, national parks and wildlife refuges. As Ranking Member of the Energy and Natural Resources Committee with oversight responsibility of public lands in Alaska, I would like to see self-governance agreements supported and expanded by the Administration.”

Top National News:

ON SOTU FOLLOW-UP SWING, OBAMA CALLS ON CONGRESS TO "GIVE AMERICA A RAISE." On Wednesday evening, all three broadcast network newscasts covered President Obama's stops in Maryland and Pennsylvania where he reiterated some of the themes he emphasized in Tuesday's State of the Union address. Reports last night and this morning noted that in addition to calling on Congress to increase the Federal minimum wage, as he did Tuesday, the President also signed a memo establishing a new program making it easier for working-class Americans to begin saving for their retirements.

While immediate reaction to Tuesday's speech suggested that the President had implicitly acknowledged the realistic limits of his ambitions for the remainder of his term, this morning's coverage, focused as it is on two broadly popular initiatives, portrays the President in a much more positive light.

On [ABC World News](#) (1/29, story 3, 1:40, 7.43M), George Stephanopoulos reported that "more than 30 million of us tuned in to" the President's State Of The Union address, "a high stakes speech at the low point of his presidency that he used to confront Congress and demand, what he called 'a raise for America.'" Jonathan Karl went on to report that on Wednesday, the President "was out there hitting that 'Give America A Raise' theme hard...in campaign-style events, both in Pennsylvania and Maryland." According to Karl, the White House "believes this is a win/win issue for the President even if he cannot get Congress to go along with an increase to the minimum wage" because Democratic candidates "will have a campaign issue for the fall."

The [Wall Street Journal](#) (1/30, Lee, Nicholas, Subscription Publication, 5.91M) quotes the President as saying, "Give America a raise. ... If you put in a hard day's work, you deserve decent pay for it. That's a principle everybody understands, that everybody believes."

In a brief segment for [NBC Nightly News](#) (1/29, story 4, 0:35, 7.86M), Brian Williams reported that on Wednesday, President Obama "went on the road...and quickly made good on part of what he promised" in his State of the Union address. Williams noted that the President "signed a presidential memo to create the 'myRA' retirement program he mentioned in his speech," and "then at a Costco in suburban Maryland, he said he would sign an executive order in coming weeks raising the minimum wage to over \$10 for new Federal contract workers."

On the [CBS Evening News](#) (1/29, story 5, 2:15, Pelley, 5.58M), Nancy Cordes reported that just "sixteen hours after the President's address," Senate Majority Leader Reid "vowed to quickly bring a bill to the floor that raises the Federal minimum wage by nearly three dollars from \$7.25 an hour to \$10.10 an hour." Cordes added that "the White House thinks this...will be a political winner," and noted that "according to the most recent CBS News poll...72% of Americans believe it's a good idea to raise the Federal minimum wage...including 48 percent of Republicans."

Under the headline "Barack Obama's Forget-Me-Not Tour," [Politico](#) (1/30, Brown, Epstein, 464K) reports that on Wednesday, the President tried to "remind voters he isn't a lame duck yet." Politico says that "as part of a postmortem on what went wrong last year, senior administration officials concluded that" the President "got wrapped up in issues that weren't the top priorities of voters." Politico says that in an effort to heed that analysis, the President "plans to travel outside Washington at least once a week and to unveil dozens of new executive actions in the coming months."

Likewise, the [New York Times](#) (1/30, Baker, Subscription Publication, 9.61M) reports that the President's aides says he "want[s] to escape the shackles of being a virtual prime minister, absorbed by what Congress is doing, and demonstrate a broader leadership less dependent on the legislative process." However, according to the Times, on Wednesday in Maryland, the President "quickly conceded that gridlock in Washington may prevent progress on his economic agenda."

[McClatchy](#) (1/30, Kumar, 95K) reports that on Thursday, the President "will give speeches in Milwaukee and Nashville," and then on Friday, he will meet with CEOs "to talk about an initiative to secure commitments from major corporations not to discriminate against the long-term unemployed during hiring."

The [Washington Post](#) (1/30, Branigin, 4.28M) reports that on Wednesday in Maryland, “before an enthusiastic crowd in a suburban county where the local government recently passed legislation to raise the minimum wage,” the President “said he would lead by example” and “sign an executive order requiring new federal contractors to pay their workers a minimum wage of \$10.10 an hour.”

[USA Today](#) (1/30, Jackson, 5.82M) notes that the President “endorsed a proposed congressional bill” sponsored by Sen. Tom Harkin and Rep. George Miller (D-CA) “that would increase the minimum wage from \$7.25 per hour to \$10.10 over time.” However, according to USA Today, “some economists said an increase in the minimum wage will discourage businesses from taking on entry-level employees.” USA Today adds that Republicans “also criticized Obama’s emphasis on executive orders.”

The [Washington Post](#) (1/30, Hicks, 4.28M) reports that while “labor and civil rights groups celebrated...when” the President “said he would require a \$10.10 minimum wage for new federal contracts,” the Professional Services Council, which “advocates for government contractors, said the administration seems to have singled out federal contractors among the nation’s employers.” The Post says it is anticipated that “the wage increase is likely to affect only a small subset of companies that do business with the government.”

[USA Today](#) (1/30, O’Donnell, McElhaney, 5.82M) reports that Costco CEO Craig Jelinek “has been an outspoken proponent of a minimum wage increase,” and that “labor union officials” contend that “other retailers, such as Walmart, could learn from the way Costco treats its workers.” However, according to USA Today, “others say” Costco has “such a different business model and customer base that Costco can’t be compared with other retailers.” Richard Berman, who USA Today says “runs a business advocacy group opposed to a minimum wage increase,” points out that Costco “has half the number of employees per square foot (of Walmart), is a much smaller company, its stores are only in affluent areas and people are buying in bulk.”

The [Washington Times](#) (1/30, Wolfgang, 417K) notes that while the President “had plenty of nice things to say about Costco,” he “left the store...without buying anything, even though he’d promised to walk out with some of the bulk items Costco is famous for.”

Obama Signs Memorandum Establishing Savings Program. The [AP](#) (1/30, Superville, Pickler) reports that at a US Steel plant near Pittsburgh on Wednesday, the President “signed a presidential memorandum to create the ‘myRA’ program, which he told employees would go toward ‘making sure that after a lifetime of hard work you can retire with some dignity.’” The AP adds that the President then gave the memorandum to Treasury Secretary Lew, whose “initial task is to set up a pilot program with accounts available through some employers by the end of the year.” The AP quotes Lew as saying afterwards, “We think this fills a space that, very importantly, we can do by our own authority.”

Under the headline “Obama Promotes Retirement Savings Plan On State Of Union Road Trip,” [Reuters](#) (1/30, Mason) quotes the President as saying, “If you worked hard all your life, you deserve a secure retirement.”

According to the [New York Times](#) (1/30, Bernard, Subscription Publication, 9.61M), the myRA program is “in keeping with [Obama’s] theme of providing financial relief to the middle class to try to bridge what is widely acknowledged as a growing income equality gap.” The Times says the Treasury Department’s “goal is to get people saving, particularly lower-income workers, who otherwise might not save at all.”

However, [Bloomberg News](#) (1/30, Rubin, 1.91M) says the establishment of the myRA program is just “a limited step,” that “lack[s] the broader investment options and employer match of workers’ 401(k) retirement accounts.” Bloomberg also notes that the program “is a narrower version of the automatic IRA proposal he has included in his budget,” which “would have cost the government an estimated \$17.6 billion in forgone revenue over 10 years.”

The [Pittsburgh Tribune-Review](#) (1/30, Wereschagin, 636K) notes that the President “touted the...steel plant’s retirement options.” According to the Tribune-Review, US Steel “offers employees 401(k) plans and most union workers are eligible for a defined-benefit pension – something Obama acknowledged Tuesday most workers don’t have.”

The [Pittsburgh Post-Gazette](#) (1/30, O’Toole, 725K) reports that at the West Mifflin, Pennsylvania plant, the President was “greeted by US Steel President & CEO Mario Longhi, United Steelworkers International President

Leo Gerard and Anthony Bridge, the firm's vice president of engineering, research and development." The Post-Gazette says that on a tour of the plant, the President "conducted conversations with a handful of plant workers before heading back to a makeshift stage where plant employees in orange and white hard hats formed a backdrop."

Polls Find Overwhelming Support For Obama's SOTU Address. The [Christian Science Monitor](#) (1/30, Grier, 540K) reported that in "a snap CNN/ORC survey, 44 percent of viewers who'd watched Mr. Obama said they had a 'very positive' response to his SOTU address," while 32% "said they had a 'somewhat positive' response, and 22 percent disliked it." The Monitor adds that a "CBS poll shows 83 percent of responding viewers said they approved of the proposals outlined in the speech," while just "17 percent disapproved."

SOTU Television Audience Was Obama's Smallest. [USA Today](#) (1/30, Jackson, 5.82M) reported that Tuesday night's speech "drew 33.3 million television viewers," which was "slightly less than the 33.5 million who tuned into last year's State of the Union," and "the smallest audience he has had" since taking office.

Obama Chided By Allies For Failing To Use Executive Orders More Liberally. The [AP](#) (1/30, Pace), in an article titled "Obama Executive Omissions Leave Some Allies Angry," reports that "gay rights advocates are seething over Obama's refusal to grant employment discrimination protections to gays and lesbians working for federal contractors." Fred Sainz, vice president of Human Rights Campaign, said, "In the absence of congressional action, an executive order that prohibits discrimination by contractors is a tailor-made solution to the president's expressed aims." According to the AP, Sainz says "his frustration with the White House's inaction...was 'growing by the day.'" The AP add that, for their part, "some immigration overhaul supporters were disappointed that he did not act on his own to halt deportations" of illegal immigrants. Ben Monterroso, executive director of Mi Familia Vota, is quoted as saying, "The president said he is going to use executive orders to act where Congress fails, and we expect him to do the same with immigration reform."

[USA Today](#) (1/30, Madhani, 5.82M) also reports that the President is "taking flak from some LGBT advocates for failing to address stalled legislation that would prohibit discrimination based on sexual orientation by federal contractors." According to USA Today, Heather Cronk, co-director of GetEQUAL, "said she was 'disappointed, saddened and offended' by the omission."

The [Washington Post](#) (1/30, 4.28M), in an editorial, says of Tuesday's address, "sadly there was not one word about how people who live in the nation's capital...are denied their basic rights as US citizens."

Veterans Groups Upset Obama Did Not Demand Restoration Of Benefits. The [Washington Times](#) (1/30, Klimas, 417K) reports that "veterans' groups criticized" the President "for not demanding a full repeal of cuts to military retirement benefits" in his State Of The Union address. The Times notes that the recently passed "budget deal included a provision to reduce working-age military retirees cost-of-living adjustment to one percent below inflation until a retiree reaches age 62." Daniel M. Dellinger, the American Legion's national commander, said, "The American Legion is disappointed that President Obama did not show more leadership in dealing with the COLA issue." Dellinger added, "He promised us, back in August 2011 at our national convention, that he would not balance the federal budget on the backs of America's veterans, but that is exactly what he is allowing Congress to do."

Obama EITC Expansion Proposal Is Similar To Rubio Plan. The [AP](#) (1/30, Kuhnhen) reports that "the only new legislative proposal in Obama's State of the Union" his suggestion to "expand the earned-income tax credit to childless workers, broadening benefits that now mainly go to low-income working parents." The AP notes that Sen. Marco Rubio "has put his own spotlight on the tax credit," and "has called for replacing the earned income tax credit with a 'wage enhancement' tax credit that would incorporate both low-income working families and more childless workers."

House Republicans Object To The President's Use Of Executive Actions. [McClatchy](#) (1/30, Lightman, 95K) reports that on Wednesday, House Republicans "headed to a Maryland retreat...looking to shape a unified message on immigration, debt and health care that could offer voters an alternative rather than just persistent opposition to" President Obama's agenda. According to McClatchy, the President "gave Republicans new ammunition...Tuesday night, as he vowed to use his executive power to implement policies Congress won't." Rep. Steve Scalise (R-LA), chairman of the Republican Study Committee, is quoted as saying, "Rather than

trying to write laws from the Oval Office, he should put down his pen, pick up the Constitution, and start working with Congress to solve the problems facing our nation.”

The [Wall Street Journal](#) (1/30, Hook, 5.91M) reported that on Wednesday, Rubio said, “All presidents get frustrated with Congress [but] this president seems to have extra frustration, and he reacts to it with unilateral actions that are unproductive and, in my option, borderline unconstitutional.”

[Politico](#) (1/30, Gibson, 464K) reported that some House Republicans are “pushing a resolution to bring legal action against” the President “for overstepping his authority in executive orders.” According to Politico, Rep. Tom Rice (R-SC) has sponsored the “STOP (Stop This Overreaching Presidency) resolution,” which “targets Obama for allowing a year extension health care policies that were ended because of Obamacare; delaying the employer mandate for one year; deferring the deportation of illegal immigrants...and waiving part of the welfare work requirement.”

The [Daily Caller](#) (1/30, Pappas, 422K) reported that Rep. Michele Bachmann (R-MN) said, “He may think he’s a king, he may declare himself king, but that’s not what he is under our Constitution.”

Costa Praises McMorris Rodgers’ SOTU Response. Robert Costa, in an analysis for the [Washington Post](#) (1/30, Costa, 4.28M) titled “Rep. Cathy McMorris Rodgers Comes Through For GOP In SOTU Response,” says Rep. Cathy McMorris Rodgers (R-WA) “had one of the more difficult tasks in politics, delivering the official Republican response to” the State Of The Union address, and “to the surprise of many insiders,” she “largely succeeded – mixing plain-spoken platitudes with tenderly told stories about her children and her blue-collar roots.” According to Costa, McMorris Rodgers displayed an “easygoing populism and an emphasis on jobs and her family, which includes a son with Down syndrome and a Navy veteran husband.”

Tribute To Injured Ranger Acclaimed As High Point Of Address. George Stephanopoulos, on [ABC World News](#) (1/29, story 9, 2:40, 7.43M), reported that on Tuesday night there was “a rare moment of absolute unity in Washington” following President Obama’s “deeply personal tribute to Army Ranger Cory Remsburg, drawing the longest ovation of the night from Democrats and Republicans.” ABC’s Martha Raddatz added, “If the nation remembers nothing else from last night, we will remember Cory Remsburg.” The tribute to Remsburg was also briefly noted on the [CBS Evening News](#) (1/29, story 6, 0:35, Pelley, 5.58M).

Former Bush Speechwriter Says Tuesday’s Speech Was Similar To Bush’s 2007 Address. [Politico](#) (1/30, Gold, 464K) reports that Washington Post columnist Marc Thiessen, who was a speechwriter for President George W. Bush and “the lead writer on Bush’s 2007 State of the Union address, said he found Obama’s speech Tuesday night ‘eerily familiar.’” Thiessen is quoted as saying, “Barack Obama has gone from blaming George W. Bush to plagiarizing George W. Bush.” According to Thiessen, “There were lines like ‘Our job is to help Americans build a future of hope and opportunity, a future of hope and opportunity begins with a growing economy, a future of hope and opportunity requires that all citizens have affordable and available healthcare, extending opportunity and hope depends on a stable supply of energy,’ all of that came from the 2007 State of the Union from George W. Bush.”

More Commentary On Tuesday’s Address. Clan Berman, vice president of the American Foreign Policy Council, in an op-ed for [USA Today](#) (1/30, 5.82M), claims that the Tuesday’s address “included a number of blatant mischaracterizations of just what the White House has (and has not) done on the foreign policy front.” Berman goes on to say that while the President asserted that Israel “knows America will always be at their side,” in fact, “no president has presided over a steeper decline in bilateral ties than Obama,” whose “choices...have significantly, and adversely, affected Israeli security.”

In a [Politico Magazine](#) (1/30, 464K) piece, National Review’s Rich Lowry says, “The fight against inequality...was supposed to be a generation-defining struggle and consume the rest of...Obama’s presidency as of a couple weeks ago.” However, according to Lowry, the President only “used the word ‘inequality’ three times.” Lowry suggests that the President’s “pollsters...let him in on the fact that Americans don’t naturally resent other people’s good fortune.”

Charles Blow, in a column for the [New York Times](#) (1/30, Subscription Publication, 9.61M) titled “The Incredible Shrinking Presidency,” says that on Tuesday night, the President “outlined goals that didn’t ask America to

dream as much as adjust to the paralysis, abandoning big moves for smaller ones."

E. J. Dionne, in his column for the [Washington Post](#) (1/30, 4.28M) reports that the President intends to "demonstrate that government can take sensible steps – on wages, job training and income supplements, on infrastructure, savings, pensions and education – and encourage voters to ask Republicans why they would prevent such initiatives from being enacted on a larger scale."

Daniel Henninger, in his column for the [Wall Street Journal](#) (1/30, Subscription Publication, 5.91M), claims the President's willingness to use executive action stems from his general antipathy to the Constitution's separation of powers.

Karl Rove, in a column for the [Wall Street Journal](#) (1/30, Subscription Publication, 5.91M) titled "Channeling Valerie Jarrett," imagines White House senior adviser Valerie Jarrett's inner monologue following Tuesday's address.

FED CUTS BOND PURCHASES BY ANOTHER \$10 BILLION. The Federal Reserve announced on Wednesday that it is continuing to ease away from its bond-buying program, as expected by the financial community. Still, the markets resumed their decline on the news, something noted by most media coverage.

The [CBS Evening News](#) (1/29, story 8, 0:20, Pelley, 5.58M) reported that the Fed announced that it is "going ahead with plans to ease up on its economic stimulus. It will cut monthly bond purchases starting next month from \$65 to \$10 billion. Wall Street didn't like that much. The Dow lost 189 points today to close at 15,738."

The [New York Times](#) (1/30, Appelbaum, Subscription Publication, 9.61M) reports that the Federal Reserve, at its last meeting chaired by Ben Bernanke, announced on Wednesday that it would reduce its monthly bond-buying program by another \$10 billion in February to \$65 billion. The Fed attributed the decision to "growing underlying strength in the broader economy." The statement "reflected the optimism of Fed officials that the economy is finally poised for faster growth after years of false starts and setbacks." The Fed Open Market Committee members were unanimous in backing the move, the first such decision since 2011.

The [Christian Science Monitor](#) (1/30, Trumbull, 540K) reports that the Fed is still, "on balance," attempting to use its policies to "stimulate economic growth amid high unemployment and the protracted recovery that has followed the deep recession that ended in 2009." The Fed, noting improvements in the economy, said, "Household spending and business fixed investment advanced more quickly in recent months." However, it warned that government "fiscal policy is restraining economic growth, although the extent of restraint is diminishing."

[Bloomberg News](#) (1/30, Zumbur, Ito, 1.91M) reports that the unanimous backing of the move by the FOMC members shows that the tapering "strategy has brought together policy makers concerned the Fed's record \$4.1 trillion balance sheet risks causing asset price bubbles with those who, like Vice Chairman Yellen, say more needs to be done to reduce unemployment."

[Reuters](#) (1/30, Spicer, Lange) reports that the recent market downturn and weak December jobs report did not deter the Fed from continuing to taper its bond-buying.

Stocks Fall After Fed Announcement. The [Wall Street Journal](#) (1/30, Scaggs, Subscription Publication, 5.91M) reports that in the wake of the Fed announcement, the Dow Jones Industrial Average fell 189.77 points to 15,738.79, while the S&P 500 fell 18.30 to 1,774.20. The Nasdaq Composite Index, for its part, fell 46.53 points to 4,051.43.

[Reuters](#) (1/30, Valetkevitch) reports that the market decline was broad-based. In addition, the piece notes that the S&P 500 is down 4% for the month, a sharp change from 2013, when the index rose 30%.

Markets Shift Focus As Fed Makes Its Move. In a front-page story, the [Wall Street Journal](#) (1/30, A1, Lauricella, Martin, Stubbington, Subscription Publication, 5.91M) reports that a month into 2014, investors worldwide are seeing stock markets dropping sharply. The end of the Fed's massive stimulus program that has been boosting the world financial markets is complicating already difficult economic situations in many emerging markets, particularly with sliding currency values. In addition to fleeing those markets, investors are also exiting

to US stock market to some extent, with much of that money heading for US Treasuries.

Bernanke's Legacy Debated. In an editorial, [USA Today](#) (1/30, 5.82M) says that Bernanke has proven to be "the right man at the right time." Along with the Treasury, the Bernanke-led Fed was able to halt the damage from the financial crisis. While the ultimate impact of the taper may change things, from "today's vantage point," Bernanke "looks like a clear candidate for the top ranks of the 14 men who have run the Fed in its 100-year history."

In an opposing op-ed for [USA Today](#) (1/30, Schiff, 5.82M), Peter Schiff, an author and CEO of Euro Pacific Capital, writes that the idea that Bernanke "deserves credit for saving the nation from an economic catastrophe omits two possibilities: that we haven't really recovered from anything, and that his policies have laid the foundation for even bigger problems ahead." Schiff warns that Bernanke was "lucky that the inflation he unleashed pushed up asset prices far more noticeably than it did consumer prices," but "eventually," that inflation will "hit consumers hard."

FARM BILL EASILY CLEARS HOUSE, HEADS FOR SENATE. [Bloomberg News](#) (1/30, Bjerga, 1.91M) reports that on Wednesday, the House easily passed the farm bill on a [251-166 vote](#). Bloomberg News says that rural Republicans and urban Democrats "overcame objections about farm subsidies and food-stamp cuts." The measure now moves on to the Senate, where Senate Majority Leader Reid said the measure will be taken up shortly, perhaps this week.

The [Washington Post](#) (1/30, O'Keefe, 4.28M) reports that the legislation was opposed by liberals, "who said that the food stamp cuts go too far," and conservatives, who were "concerned that the legislation failed to further curtail government spending." The Post says that the Senate is expected to pass the bill on Friday and send it to President Obama's desk. The votes "cap more than three years of negotiations on a new five-year agreement."

The [Los Angeles Times](#) (1/30, Memoli, 3.07M) says that conservatives "had stymied efforts to pass a farm bill in the House last year, arguing in part that agriculture subsidy programs should be considered separately from food stamps," while some "also called for a controversial work requirement to be included for food stamp recipients."

[McClatchy](#) (1/30, Doyle, 95K) says that the bill is "huge," as it will "cost \$956 billion over 10 years," according to the CBO. The legislation "trims nutrition spending by \$8 billion over 10 years, primarily by tightening certain eligibility standards" for food stamps "in some states."

[Politico](#) (1/30, Rogers, 464K) reports that the bill was "given up for dead just months ago." Unlike the Post, Politico says that the bill is likely to clear the Senate sometime before the middle of next week. The "giant" bill "combines a landmark rewrite of commodity programs together with bipartisan reforms and savings from food stamps."

[Gannett News Service](#) (1/30, Doering, 7K) reports that the 20-year-old "direct-payment subsidy program for farmers, which doles out \$5 billion annually regardless of need, would end, and some of the savings" will go to expand crop insurance programs, while an additional \$6 billion "would be saved by combining 23 conservation programs into 13."

[Reuters](#) (1/30, Beech) reports Senate Agriculture Chair Debbie Stabenow said that the bill "eliminates unnecessary subsidies, creates a more effective farm safety-net and strengthens our commitment to conservation of land and water." She was on the House floor after the vote. For his part, House Speaker Boehner said, "All Americans stand to benefit in some way from this farm bill. This is an improvement over current law, and there are no earmarks."

The [Washington Times](#) (1/30, Klimas, 417K) reports that 89 Democrats and 162 Republicans backed the legislation. House Agriculture Chairman Frank Lucas said, "While everyone may not agree with every word, every line, every policy in it, this bill reflects how it should be done. ... I hope this reflects a change in how we do our business here across the board, but I'm proud of what we've done and I'm proud of how we've done it."

Pryor Hits Cotton Over Vote Against Bill. [Roll Call](#) (1/30, Trygstad, Subscription Publication, 87K) reports Arkansas Sen. Mark Pryor "intends to make the farm bill a driving issue in his competitive re-election race" against Republican Rep. Tom Cotton. Just after Wednesday's vote, Pryor called Cotton's opposition to the bill

"reckless and irresponsible." Pryor "noted that Cotton was the only member of the state's all-Republican House delegation to oppose the legislation." Pryor is "battling his own ties to an unpopular president," but his campaign is highlighting the vote "as evidence that Cotton would be an unpalatable alternative."

Major Overhaul Of Dairy Policy Included. The [Milwaukee Journal Sentinel](#) (1/30, Barrett, 798K) reports that Wisconsin farmers are "hopeful" that the "long fight" over Federal dairy subsidies "has ended with the biggest overhaul of the milk pricing system in a generation." The new system consists of "subsidized insurance that would pay farmers when the difference between milk and feed prices shrinks too much." Dairy farmers "would pay insurance premiums based on the level of risk they chose."

WPost Urges Veto Of Bill. In an editorial, the [Washington Post](#) (1/30, 4.28M) is disdainful of the farm bill, saying that the President should veto it. The Post says that the legislation "gives to the rich and takes from the poor." The Post says that the cut to food stamps, while "both modest and justified," is "hard to swallow" when "attached to so much corporate welfare."

In contrast, the [New York Times](#) (1/30, Subscription Publication, 9.61M) has tentative praise for the bill, which "makes some of the most significant reforms to wasteful agriculture subsidies in many years," and "contains dozens of important provisions designed to increase employment in rural areas and save lives with farsighted crop research." The Times says that if the Senate or the President were to reject the farm bill, it would mean "rolling the dice that the next Congress will do a better job" and in "today's environment, that's a tough bet."

Editorial Wrap-Up:

NEW YORK TIMES. "Secrecy Behind Executions." The [New York Times](#) (1/30, Subscription Publication, 9.61M) says in an editorial that while it is "bad enough that the death penalty is barbaric, racist and arbitrary in its application," it is also "becoming less transparent as the dwindling number of death-penalty states work to hide the means by which they kill people." A Federal appeals court last week denied a condemned Missouri inmate's "constitutional claim that he is entitled to basic information about the drugs that would be used to put him to death." The Times says the secrecy is due to a shortage in execution drugs, which "often means turning to compounding pharmacies, which exist in a largely unregulated world."

"The Farm Bill Could Have Been Worse." In an editorial, the [New York Times](#) (1/30, Subscription Publication, 9.61M) offers tentative praise for the farm bill, which "makes some of the most significant reforms to wasteful agriculture subsidies in many years," and "contains dozens of important provisions designed to increase employment in rural areas and save lives with farsighted crop research." The Times says that if the Senate or the President were to reject the farm bill, it would mean "rolling the dice that the next Congress will do a better job" and in "today's environment, that's a tough bet."

"President Karzai's Perfidies." An editorial in the [New York Times](#) (1/30, Subscription Publication, 9.61M) argues that Afghan President Hamid Karzai appears to believe there is "something to be gained in destroying his relationship with the United States," and while his behavior "may serve his interests, it does not serve his long-suffering country's." The Times calls on the CIA to "quickly rethink — and possibly stop — the regular cash deliveries it has been making to Mr. Karzai for more than a decade." The Times adds that the candidates running to succeed Karzai "owe voters a vision of how they will improve governance, reduce corruption and work more productively with the United States and its allies."

WASHINGTON POST. "Out Of Step On Afghanistan." In an editorial, the [Washington Post](#) (1/30, 4.28M) notes the President's "commitment to leave behind U.S. trainers and logistical support to assist the Afghan army, as well as a counterterrorism force to 'pursue any remnants of al-Qaeda' — which presumably would involve military action," and takes issue with his claim in the State of the Union address that "we will complete our mission there by the end of this year." The Post says that if the President wants public support and Congressional funding for a continued US mission in Afghanistan, he must "make the case why it is in the national interest for troops to remain." By doing "virtually the opposite," the Post argues, the President is "complicit with Mr. Karzai in undermining a major national security interest."

"A Rotten Farm Bill." In an editorial, the [Washington Post](#) (1/30, 4.28M) is disdainful of the farm bill, saying

that the President should veto it. The Post says that the legislation “gives to the rich and takes from the poor.” The Post says that the cut to food stamps, while “both modest and justified,” is “hard to swallow” when “attached to so much corporate welfare.”

“An Unmentioned Problem.” The [Washington Post](#) (1/30, 4.28M), in an editorial, says of Tuesday’s State of the Union address, “sadly there was not one word about how people who live in the nation’s capital...are denied their basic rights as U.S. citizens.”

WALL STREET JOURNAL. “Perkinsnacht.” In an editorial, the [Wall Street Journal](#) (1/30, Subscription Publication, 5.91M) examines the backlash against venture capitalist Tom Perkins after the newspaper printed a recent letter by Perkins defending the rich and warning of what he called rising hatred against the wealthiest. The Journal says that in their harsh condemnation of Perkins, his liberal critics proved his point.

“Immigration Breakout.” In an editorial, the [Wall Street Journal](#) (1/30, Subscription Publication, 5.91M) says that the GOP is correct to pursue immigration reform. The most important reason, the WSJ says, is that immigration laws need to be reformed to boost economic growth and prosperity. The Journal says reform would allow the US to compete for the world’s best human capital.

“Harry Reid’s Trade Veto.” The [Wall Street Journal](#) (1/30, Subscription Publication, 5.91M), in an editorial, notes that Senate Majority Leader Reid’s declaration of opposition to fast track is a bad sign for one of the President’s professed 2014 pro-growth priorities. The Journal suggests that Reid’s comments may have been a calculated move which enables the President to appeal to corporate CEOs while Democrats delay action and collect election year campaign funds from business.

Rubenstein senior fellow for energy and environment at the Council on Foreign Relations. Francesca Di Marco in the Office of Communications at 202.663.5644 or fdimarco@jhu.edu. Location: Room 500, Bernstein-Offit Building, 1717 Massachusetts Ave. NW.

Last Laughs:

LATE NIGHT POLITICAL HUMOR.

Jimmy Kimmel: "Did any of you watch President Obama's State of the Union Address last night? Why don't I believe any of you? President Obama said the state of the union is strong, which is something the President says every year. Just once I would like to hear a president say the state of the union is dope. We could use some dopeness."

Jimmy Kimmel: [Referring to incident in which Congressman Michael Grimm threatened a reporter] "That's not appropriate behavior for a public servant. You don't threaten them. You close a bridge in their town. That's how you do it."

Stephen Colbert: [Referring to President Obama's State of the Union Address] "Obama said other stuff too, but the real highlight of every State of the Union is the Republican response. And last night was so historical. The Republicans brought their A-game, as in a lot of people talking. You had your Mike Lee for the tea partiers, Rand Paul for the other tea partiers and Cuban American Congresswoman Ileana Ros-Lehtinen for Los Party Grande del Tea. No matter what kind of Republican you are, there was a speech for you, like your own personal sleep number, but for rage."

Jon Stewart: [Referring to President Obama's State of the Union Address] "So, to sum up the 2014 State of the Union: a litany of vague pledges, a justified venting of frustration with Congress, and capping it, the world's [expletive] Republican open-mike night."

Jimmy Fallon: "Last night, of course, was the State of the Union Address. And during his speech, President Obama promised to focus on economic growth, education, and healthcare. Or as people tuning in put it, 'Oh, crap. It's a rerun.'"

Jay Leno: "Hey, as you know, President Obama gave his State of the Union address last night. I thought he had a very good speech. Very good speech. President Obama said he wants to give America a raise. Just waiting, of course, for final approval from China. As soon as they say it's okay, then we'll move ahead."

Jay Leno: "The President said that unemployment is dropping, but critics claim it doesn't include people who

have left the work force. Hey, how about people who are asked to leave the work force like me?"

Jay Leno: "During an interview after President Obama's speech last night, New York Republican Congressman Michael Grimm threatened to throw a reporter over the Capitol balcony when the reporter asked him about an investigation of campaign finances. He swore at the guy and he threatened to throw him over the balcony. See, I don't think the reporter has anything to worry about. When is the last time a congressman kept his word?"

Jay Leno: "It was a pretty impassioned speech last night. President Obama asked the Americans to pitch in and help those who are most down on their luck. Like the Lakers. I think he mentioned them by name."

Conan O'Brien: "A former speechwriter for George W. Bush accused President Obama of plagiarizing one of the speeches. He denied the claim and so did his speechwriter, Shia Labeouf."

Conan O'Brien: "In a new interview that just came out, Jerry Springer said that he would want President Obama as a son. In response, Obama said, 'Thanks, but I'll stick to not having a dad, ok? I'm good.'"

New York (b)(6)

Strategic Plan

Haze, Pam <pam_haze@ios.doi.gov>

Thu, Jan 30, 2014 at 7:25 PM

To: "Jewell, Sally" (b)(6)@ios.doi.gov

Cc: Laura Davis <Laura_Davis@ios.doi.gov>, Fay Iudicello <Fay_ludicello@ios.doi.gov>

Dear Secretary: Fay Iudicello has given Erin a red-line version of the Strategic Plan for your review. I am told that you plan to review the Plan is on your plane ride tomorrow night.

In order to assist you in your review - attached are two versions that you can use on the plane ride. The "Strategic Plan (final clean...)" file is the plan with all changes incorporated. This is probably the easiest one to look at. The "Strategic Plan (final comments...)" file includes the line-in and line-out edits based on the reviews of the Assistant Secretaries, bureau and office directors and OMB.

We welcome all of your comments, but suggest you focus on pages 16-21, where we identify the actions plans for priority initiatives. This is the new section in the plan that reflects the work that Mike Connor has been doing with the Assistant Secretaries to develop a focused set of actions to achieve your goals. Mike took one last look at this on Tuesday and gave us comments.

As to the rest of the Plan, we had your leadership surname the document to make sure we had thier attention. We tried to develop a plan that addresses your comments, with a balance in the number of strategies and metrics and with goals for 2018 that sustain or exceed current performance.

Please feel free to email comments or questions. I'll be monitoring email. As to timing, the GPRA Modernization Act directs that we issue a new strategic plan on the first Monday of February of the year following the year the term of the President commences. That date is February 3.

Although I'm sure this is by far the most fun you could have on a plane ride on a Friday night, I really appreciate your time and attention on this. Thank you.

GOAL #1 Protect America’s Landscapes.....	26
GOAL #2 Protect America’s Cultural and Heritage Resources	28
GOAL #3 Enhance Recreation and Visitor Experience.....	29
MISSION AREA 2 STRENGTHENING TRIBAL NATIONS AND INSULAR COMMUNITIES	31
GOAL #1 Meet Our Trust, Treaty, and Other Responsibilities to American Indians and Alaska Natives	31
GOAL #2 Improve the Quality of Life in Tribal and Native Communities.....	32
GOAL #3 Empower Insular Communities.....	34
MISSION AREA 3 POWERING OUR FUTURE AND RESPONSIBLE USE OF THE NATION’S RESOURCES	36
GOAL #1 Secure America’s Energy Resources	36
GOAL #2 Sustainably Manage Timber, Forage, and Non-energy Minerals	38
MISSION AREA 4 ENGAGING THE NEXT GENERATION	40
GOAL #1 Play Develop or enhance outdoor recreation partnerships in a total of 50 cities over the next 4 years to create new, systemic opportunities for outdoor play for over 10 million young people.	40

GOAL #2 Learn In 4 years, provide educational opportunities to at least 10 million of the Nation’s K-12 student population annually.40

GOAL #3 Serve In 4 years, attain 1,000,000 volunteers annually on public lands.41

GOAL #4 Work Provide 100,000 work and training opportunities to young people over the next 4 years.....41

MISSION AREA 5: ENSURING HEALTHY WATERSHEDS AND SUSTAINABLE, SECURE WATER SUPPLIES42

GOAL #1 (b)(5)42

GOAL #2 Extend the Supply of Water through Conservation43

GOAL #3 Availability of Water to Tribal Communities43

MISSION AREA 6 BUILDING A LANDSCAPE-LEVEL UNDERSTANDING OF OUR RESOURCES45

GOAL #1 Provide Shared Landscape-level Management and Planning Tools.....45

GOAL #2 Provide Science to Understand, Model, and Predict Ecosystem, Climate, and Land Use changes at targeted and landscape-levels (biota, land cover, and Earth and ocean systems)46

GOAL #3 Provide Scientific Data to Protect, Instruct, and Inform Communities48

GOAL #4 Provide Water and Land Data to Customers.....49

APPENDIX51

(b)(5)51

BUILDING A 21ST CENTURY DEPARTMENT OF THE INTERIOR.....52

Goal #1 Build a 21st Century Workforce52

Goal #2 Sustainability of Interior’s Operations52

Goal #3 Dependability and Efficiency of Information Technology53

Goal #4 Improve Acquisition and Real Property Management.....53

Goal #5 Promote Small and Disadvantaged Business.....54

LETTER FROM THE SECRETARY

I am pleased to present the Department of the Interior's Strategic Plan for FY 2014-2018. The DOI's broad mission responsibilities span the Nation, from the northern tip of Maine and the Arctic Ocean in Alaska to the southern tip of Florida, west to east, the lands we manage stretch from Midway Island in the Pacific Ocean to the Virgin Islands in the Caribbean. We manage 500 million acres of lands primarily located in the western states and 1.7 billion acres on the Outer Continental Shelf. The activities of DOI are an economic engine. In 2012, DOI's programs contributed an estimated \$371 billion to the U.S. economy and supported 2.3 million jobs in activities including outdoor recreation and tourism, energy development, grazing and timber harvesting.¹

The DOI's programs contribute to the quality of life for many people and communities across the Country and help to advance goals for stewardship and energy independence. Nearly every American lives within an hour's drive of lands or waters managed by DOI. In 2012, there were 417 million visits to DOI managed lands. Recreational visits to DOI's lands had an economic benefit to local communities, particularly in rural areas, contributing an estimated \$45 billion in economic activity in 2012. The DOI oversees the responsible development of 23 percent of U.S. energy supplies, is the largest supplier and manager of water in the 17 Western States, maintains relationships with 566 federally recognized tribes, and provides services to more than 1.7 million American Indian and Alaska Native peoples.

The context for this Plan reflects the complex mission of DOI and how it affects the lives of all Americans. The DOI's 70,000 employees work in partnership with other Federal agencies, states, tribes, industry, and a rich diversity of stakeholders to preserve and interpret the Nation's rich heritage and history; manage diverse Federal lands, waters, and wildlife and fishery resources; provide world-class science that protects us from hazards and provides the public with critical information on the earth, energy, water, and resource conservation; ensure the conservation and delivery of water for diverse users; and deliver a suite of programs for American Indian and Insular communities.

Developed with input from our stakeholders, the Plan demonstrates how we integrate and align diverse and geographically dispersed programs and projects to effectively and efficiently deliver services to the American public.

Effective management of DOI requires dynamic and modern strategies to confront major trends including the likelihood of continued and increasingly constrained funding resources, the changing demographics of the population that is becoming more urban, diverse, and technologically advanced, and a changing climate that will continue to have impacts on land, water, wildlife, and tribal communities.

In early FY 2014, I realigned DOI's strategic goals to guide and focus DOI's efforts in FY 2014 and beyond. The Plan presents these priorities in 6 mission areas that capture responsibilities administered by 10 bureaus and multiple offices.

¹ U.S. Department of the Interior Economic Report FY 2012; July 29, 2013; available at http://www.doi.gov/ppa/economic_analysis/upload/FY2012-DOI-Econ-Report-Final-2013-09-25.pdf

- Celebrating and Enhancing America's Great Outdoors. The DOI's efforts included in this mission area foster the intrinsic link between healthy economies and healthy landscapes with goals and strategies to increase tourism and outdoor recreation in balance with preservation and conservation. Collaborative and community-driven efforts and outcome-focused investments will focus on preserving and enhancing rural landscapes, urban parks and rivers, important ecosystems, cultural resources, and wildlife habitat. The goals and strategies incorporate the best available science, a landscape-level understanding, and stakeholder input to identify and share conservation priorities.
- Strengthening Tribal Nations. The goals and strategies build upon progress made over the past 4 years to establish strong and meaningful relationships with tribes, strengthen the government-to-government relationships, deliver services to American Indians and Alaska Natives, and advance self-governance and self-determination. The DOI efforts in this mission area restore tribal homelands, fulfill commitments for Indian water rights, develop energy resources, expand educational opportunities, and assist in the management of climate change.
- Powering Our Future and Responsible Use of Our Resources. The DOI plays a significant role in the President's all-of-the-above energy strategy to secure an energy future for the Nation that is cleaner and more sustainable. The goals and strategies take a landscape-level approach to energy development, modernizing programs and practices, improving transparency, streamlining permitting, and strengthening inspection and enforcement.
- Engaging the Next Generation. To address the growing disconnect between young people and the outdoors, the goals and strategies in this area to promote public-private partnerships and collaborative efforts across all levels of government to connect young people with the land and inspire them to play, learn, serve, and work outdoors. The DOI efforts encompassed by the goals and strategies include the 21st Century Conservation Service Corps to leverage public investment and private philanthropy to build job skills, improve national parks and public lands, create opportunities for veterans, and create connections to the land for the next generation.
- Ensuring Healthy Watersheds and Sustainable, Secure Water Supplies. The DOI's efforts in this mission area recognize the importance of water as the foundation for healthy communities and healthy economies and the challenges resulting from climate change, drought conditions, and increasing demand. The goals and strategies position the Department to work with states in managing water resources, raising awareness and support for sustainable water usage, maintaining critical infrastructure, promoting efficiency and conservation, supporting healthy rivers and streams, and restoring key ecosystems.
- Building a Landscape-Level Understanding of Our Resources. This mission area includes DOI's efforts to harness existing and emerging technologies and elevate understanding of resources on a landscape-level by advancing knowledge in the fields of ecosystem services and resilience, energy and mineral resource assessments, hazard response and mitigation, water security, sacred sites, climate change adaptation, and environmental health. Landscape-level approaches to management hold the promise of a broader based and more consistent consideration of development and conservation. This mission area includes goals and strategies that advance this approach including applied and basic scientific research and the development of science products to inform decision making by DOI's bureaus and offices and local, state, national, and international communities. The DOI's science agency, the U.S. Geological Survey, generates essential scientific information and data that is used as the basis for decision making, including earth observation satellite imagery and stream gage and seismic data. The DOI leverages its role as the managing partner for the National Geospatial Platform to turn vast amounts of data into

usable information and advance broader-based and more consistent landscape and resource management, aligning the scientific programs to complement each other and other agencies to better support the Nation's research and development priorities.

This Strategic Plan presents our vision, emphasizing the areas where we will focus our efforts over the next 4 years and allow the American public to hold us accountable. The Plan complies with the Government Performance and Results Modernization Act of 2010, presenting the goals, strategies, and performance measures that will be used by DOI's employees to achieve desired outcomes and gauge the performance of contributing programs and their personal performance. The Plan informs our actions, guides resource allocations, and is the basis to assess progress and inform the public about our priorities.

You will note that the Plan is reformatted to more clearly present our principles and focal areas. A new section in the Plan, *Highlighted Initiatives to Achieve Secretarial Priorities*, displays detailed action plans for achievement of goals in each of the mission areas. This section includes DOI's Agency Priority Goals that track with Presidential commitments as reported on www.performance.gov. To complement the Plan, the DOI's Annual Performance Plan and Report will accompany the President's budget to identify annual performance increments, funding investments consistent with DOI's program inventory, and a comprehensive assessment of performance across all the mission areas with trend data for prior years.

I hope you will read the Plan and follow our progress in the Annual Performance Plan and Report as we continue to work toward accomplishment of the ambitious goals we have set for DOI. You can follow our progress on www.doi.gov or www.performance.gov.

Sincerely,

Sally Jewell

MISSION AND ORGANIZATION

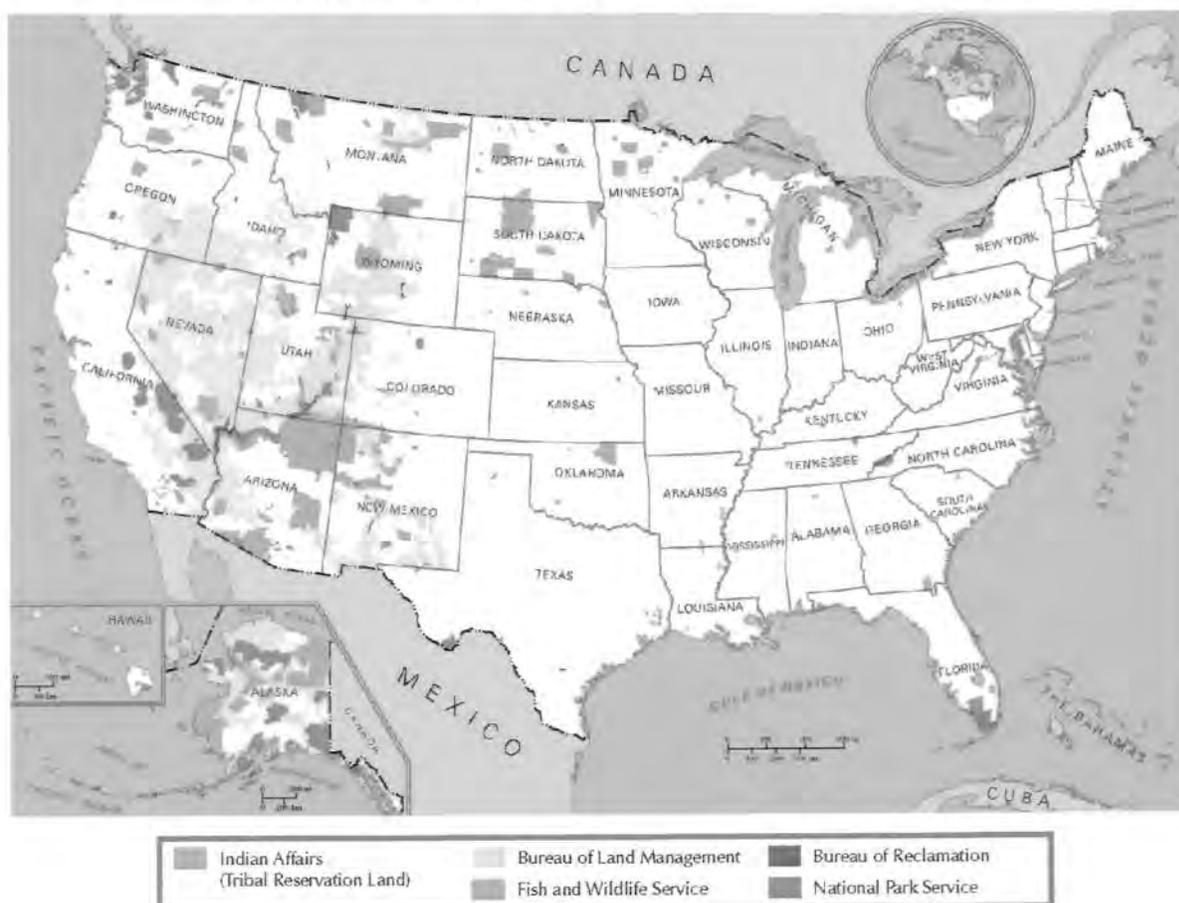

Mission

The DOI protects and manages the Nation's natural resources and cultural heritage; provides scientific and other information about those resources; and honors the Nation's trust responsibilities or special commitments to American Indians, Alaska Natives, and affiliated island communities.

History

In 1849 President Polk signed the bill creating the Home Department. The DOI was charged with managing a wide variety of programs, which included overseeing Indian Affairs, exploring the western wilderness, directing the District of Columbia jail, constructing the National Capital's water system, managing hospitals and universities, improving historic western emigrant routes, marking boundaries, issuing patents, conducting the census, and researching the geological resources of the United States. As the Country matured during the last half of the 19th Century, so did the Department and its mission began to evolve as some of these functions moved to other agencies.

Surface Lands Managed by the Department of the Interior

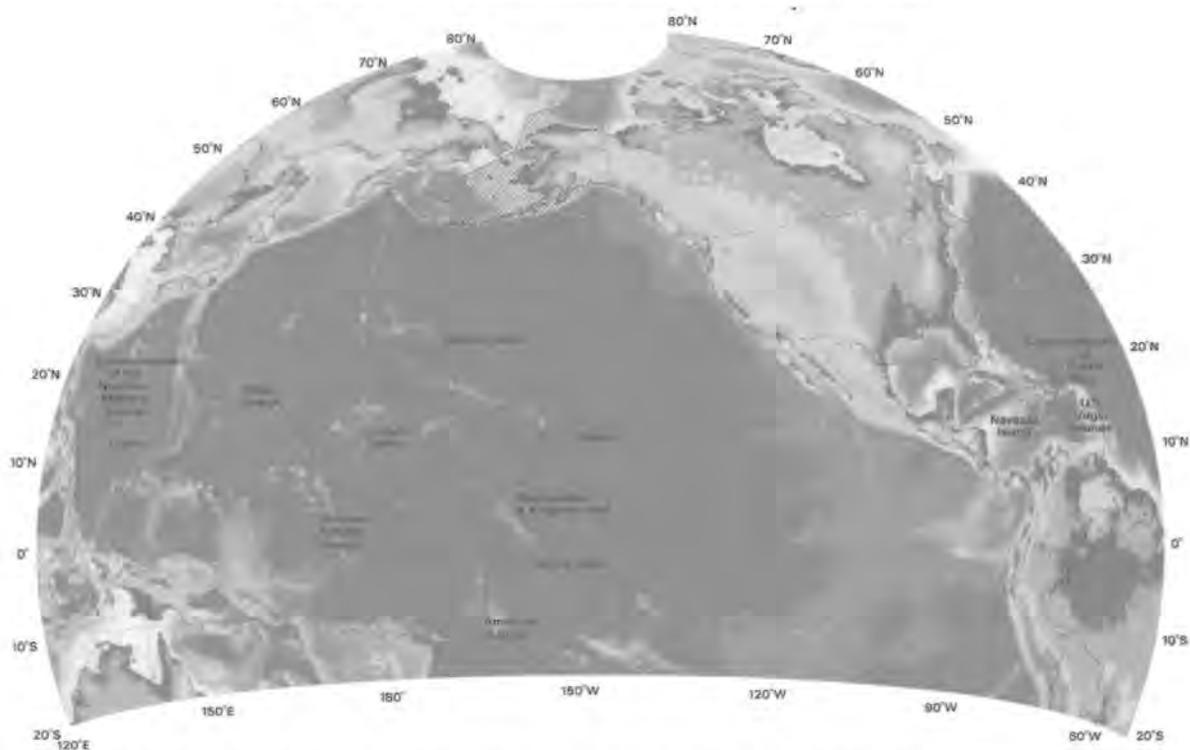

Following Theodore Roosevelt's conservation summit and the conservation movement at the beginning of the 20th Century, there was an increasing urgency and expanding congressional mandate to protect and more effectively manage the Country's natural resources. Accordingly, DOI's mission shifted to focus on the preservation, management, understanding, and use of public lands, natural and cultural resources,

responsible management of energy and water resources, and responsibilities related to Indian nations and scientific discovery.

Today, DOI manages the Nation's public lands and minerals, including providing access to more than 500 million acres of public lands, 700 million acres of subsurface minerals, and 1.7 billion acres of the Outer Continental Shelf. The DOI is the steward of 20 percent of the Nation's lands, including national parks, national wildlife refuges, and public lands; manages resources that supply 23 percent of the Nation's energy; supplies and manages water in the 17 Western States and supplies 17 percent of the Nation's hydropower energy; and upholds Federal trust responsibilities to 566 federally recognized Indian tribes and Alaska Natives. The DOI is responsible for migratory bird and wildlife conservation; historic preservation; endangered species conservation; surface-mined lands protection and restoration; mapping, geological, hydrological, and biological science for the Nation; and financial and technical assistance for the insular areas.

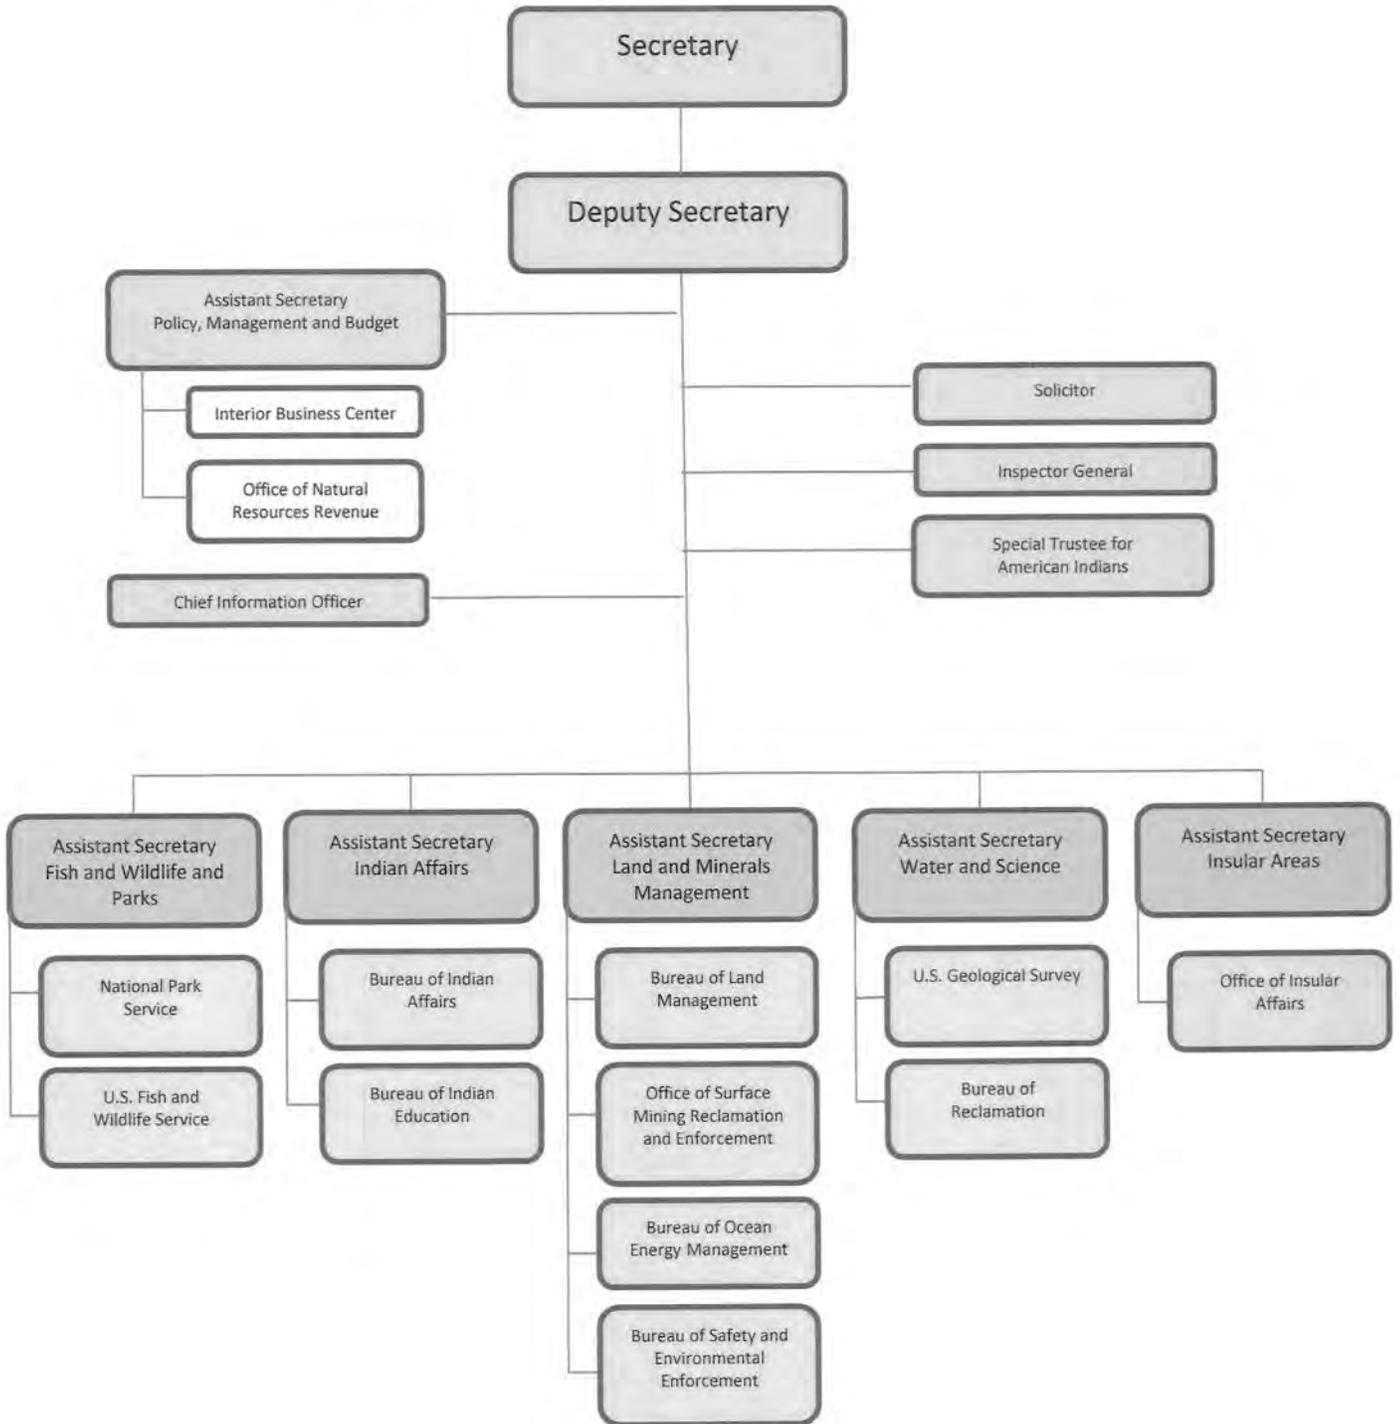

United States Continental Shelf Boundary Areas

Robert Utley and Barry Mackintosh, *The Department of Everything Else: Highlights of Interior History*, 1988, pp. 1-2.

The DOI's programs encompassed in this Strategic Plan cover a broad spectrum of activities that are performed by 10 bureaus and multiple offices and are captured in the following presentation of each entity's unique mission and set of responsibilities. The Strategic Plan's 6 mission areas capture the vitality, inventiveness, and potential of the bureaus and offices and the Department's 70,000 dedicated and skilled employees. Along with employees, almost 280,000 volunteers contribute their time in support of bureau and office missions, bringing unique local knowledge to park operations, assisting in recovery from natural disasters, and participating in environmental education, among other activities.

U.S. Department of the Interior Organization

Bureau and Office Summary

Bureau of Land Management (BLM)

- ▶ Manages and conserves resources for multiple use and sustained yield on approximately 248 million acres of public land, and an additional 700 million acres of subsurface federal mineral estate, including the following:
 - ▷ Renewable and conventional energy and mineral development
 - ▷ Forest management, timber and biomass production
 - ▷ Wild Horse and Burro management
 - ▷ Management of diverse landscapes for the benefit of wildlife, domestic grazing, and recreational uses
 - ▷ Resource management at sites of natural, scenic, scientific, and historical value including the National Landscape Conservation System

Bureau of Ocean Energy Management (BOEM)

- ▶ Manages access to renewable and conventional energy resources of the Outer Continental Shelf (OCS)
- ▶ Administers over 6,400 active fluid mineral leases on approximately 35 million OCS acres
- ▶ Issues leases that provide 24 percent of domestic crude oil and eight percent of domestic natural gas supply.
- ▶ Oversees lease and grant issuance for off-shore renewable energy projects

Bureau of Safety and Environmental Enforcement (BSEE)

- ▶ Promotes safety, protects the environment, and conserves resources offshore through regulatory enforcement of offshore oil and gas facilities on the 1.7 billion acre US Outer Continental Shelf (OCS)
- ▶ Oversees oil spill for US facilities in state and federal waters and operates the Ohmsett National Oil Spill Response Research test facility
- ▶ Supports research to promote the use of best available safest technology for oil spill response

Office of Surface Mining Reclamation and Enforcement (OSMRE)

- ▶ Protects the environment during coal mining through Federal programs, provides grants to states and tribes, and oversight activities
- ▶ Ensures the land is reclaimed afterwards
- ▶ Mitigates the effects of past mining by pursuing reclamation of abandoned coal mine lands

U.S. Geological Survey (USGS)

- ▶ Conducts scientific research in ecosystems, climate and land use change, mineral assessments, environmental health, and water resources to inform effective decision making and planning
- ▶ Produces information to increase understanding of natural hazards such as earthquakes, volcanoes, and landslides
- ▶ Conducts research on oil, gas, and alternative energy potential, production, consumption, and environmental effects
- ▶ Leads the effort on climate change science research for the Department
- ▶ Provides access to natural science information to support decisions about how to respond to natural risks and manage natural resources

Bureau of Reclamation (BOR)

- ▶ Manages, develops, and protects water and related resources in an environmentally and economically sound manner in the interest of the American public
- ▶ Largest wholesale supplier of water in the Nation
- ▶ Manages 476 dams and 337 reservoirs
- ▶ Delivers water to 1 in every 5 western farmers and more than 31 million people
- ▶ America's second largest producer of hydroelectric power

Fish and Wildlife Service (FWS)

- ▶ Manages the 150 million-acre National Wildlife Refuge System primarily for the benefit of fish and wildlife
- ▶ Manages 70 fish hatcheries and other related facilities for endangered species recovery and to restore native fisheries populations
- ▶ Protects and conserves:
 - ▷ Migratory birds
 - ▷ Threatened and endangered species
 - ▷ Certain marine mammals
- ▶ Hosts approximately 47 million visitors annually at 561 refuges located in all 50 states and 38 wetland management districts

National Park Service (NPS)

- ▶ Maintains and manages a network of 401 natural, cultural, and recreational sites for the benefit and enjoyment of the American people
- ▶ Manages and protects over 26,000 historic structures, over 44 million acres of designated wilderness, and a wide range of museum collections and cultural and natural landscapes
- ▶ Provides outdoor recreation to over 286 million annual park visitors
- ▶ Provides technical assistance and support to state and local natural and cultural resource sites and programs, and fulfills responsibilities under the National Historic Preservation Act

Indian Affairs (IA)

- ▶ Fulfills Indian trust responsibilities
 - ▶ Promotes self-determination on behalf of 566 federally recognized Indian tribes
 - ▶ Funds compacts and contracts to support natural resource education, law enforcement, and social service programs that are delivered by tribes
 - ▶ Operates 182 elementary and secondary schools and dormitories, providing educational services to 42,000 students in 23 states
 - ▶ Supports 29 tribally controlled community colleges, universities, and post-secondary schools
- Note: IA includes the Bureau of Indian Affairs and the Bureau of Indian Education*

Departmental Offices

- ▶ Immediate Office of the Secretary and Assistant Secretaries
- ▶ Policy, Management and Budget provides leadership and support for the following:
 - ▷ Budget, Finance, Performance and Acquisition
 - ▷ Public Safety, Resource Protection and Emergency Services
 - ▷ Natural Resources Revenue Management
 - ▷ Human Capital and Diversity
 - ▷ Technology, Information and Business Services
 - ▷ Policy and International Affairs
 - ▷ Natural Resource Damage Assessment
 - ▷ Wildland Fire Management
 - ▷ Central Hazardous Materials Management
- ▶ Office of Inspector General
- ▶ Office of the Solicitor
- ▶ Office of the Special Trustee for American Indians
- ▶ Assistant Secretary for Insular Areas and the Office of Insular Affairs

DEPARTMENT-WIDE PRINCIPLES

The DOI operates based on a set of key principles and tenets that guide the efforts of 70,000 employees, volunteers, and other stakeholders that deliver a broad spectrum of services and programs. These principles serve as the standard of operations throughout DOI and ensure achievement of the highest of ideals while performing the mission.

Stewards of the Nation's Natural, Cultural, and Heritage Assets

The DOI is committed to being an outstanding steward of approximately 500 million acres of public lands and 700 million subsurface acres including magnificent vistas, unique ecosystems, and treasured natural, cultural, and heritage assets. The management and oversight of these resources require a dedicated cadre of employees, the contributions of volunteers, and the input of stakeholders to inform decision making. The challenges of managing for a diverse constituency while meeting national goals for energy development and sustaining high levels of recreation and access require technical expertise, the best available science, and a landscape-level understanding of the balance of development and conservation.

Effective and Efficient Operations

The DOI is committed to achieving effective and efficient management. Executives and managers rely extensively on collaboration and partnerships that leverage resources. The DOI utilizes an extensive framework of internal controls to protect against fraud and waste and implements recommendations from the Government Accountability Office and the Office of Inspector General. On an annual basis, DOI reviews program activities for opportunities to eliminate lower priority programs, re-engineer under-achieving programs, and investigate new ideas to increase the effectiveness and efficiency of program delivery. Through the President's SAVE awards program and other efforts that incentivize creative cost cutting, DOI is focused on specific management initiatives, which are described in greater detail in the Appendix.

Department of the Interior Headquarters, Washington, DC

Financial Integrity and Transparency

The DOI is committed to effective financial operations and accountability including high quality and timely reporting, robust internal controls, clean audits, and effective follow-up on audit and internal control findings. The DOI utilizes the Financial and Business Management System for the integration of business functions including budget execution, finance, acquisition, and others with single sign on, improved internal controls, a secure information technology environment, and a community of business innovation, efficiency, and transparency.

Ensuring High Ethical Standards

Key to maintaining public trust and confidence in the integrity of government is the adherence of high ethical standards and ensuring that government business is conducted with impartiality and integrity. The DOI embodies this principle, follows the law and holds people accountable. Accountability is a key theme – DOI expects to be held accountable. The DOI does not tolerate lapses that detract and distract from good, honest service to the American people. Decisions are based on sound science and the best interest of the public. The Department promotes and supports transparency, accountability, and

efficiency.

Making DOI the Best and Most Inclusive Place to Work in America

The DOI is committed to making the Department the best and most inclusive place to work. Changing demographics of the population, generational shifts, increased urbanization, and increased use of technology makes the management of a changing cadre of employees challenging. The DOI will foster an environment that is open and accepting of individual differences and encourages employees to maximize their potential and to provide quality public service. The DOI will ensure that policies, practices, and systems do not benefit any one group over another and that the differences that each employee brings to the Department are respected and can enhance the organization's capacity, service, and adaptability.

Safety, Security, Preparedness, Response, and Recovery

One of DOI's top priorities is to focus on safety, security, and preparedness activities. The DOI will uphold its responsibilities for protecting lives, resources, property, and the environment through a wide variety of program areas, including law enforcement, health and safety, security, aviation, environmental compliance and emergency management. The DOI will provide technical expertise and capability for interagency preparedness, response and recovery activities as defined in Presidential Policy Directive 8 and the five National Frameworks (Protection, Prevention, Response, Recovery, and Mitigation), and as required by other interagency plans such as the *National Oil and Hazardous Substance Pollution Contingency Plan*. The DOI resources are frequently called upon for wildland fire and oil spill response, public works and engineering activities, search and rescue operations, protection of natural and cultural resources and historic properties expertise, rebuilding after storm and hazard events, and law enforcement missions. Interior has the third largest contingent of Federal law enforcement officers in the Executive Branch with 3,500 officers that patrol vast acres of federal lands, national parks, wildlife refuges, and Indian communities. To ensure DOI is prepared to meet its preparedness, response, and recovery obligations, the Department and Bureaus maintain plans for all-hazards to safeguard the environment.

Respecting Tribal Self-Governance

The DOI recognizes the importance of the nation-to-nation relationship with tribes and will continue to encourage tribal management of resources and self-determination; consultation and support for effective management of the tribal trust; and the need to uphold commitments to tribes and Indian communities. Building coalitions will be an important aspect of these principles, including respect for the viewpoints of the 566 Indian tribes and the importance of maintaining strong tribal communities.

Consultation is a key component of respecting Tribal self-governance and supporting the nation-to-nation relationship. The DOI upholds the principles set forth in the President's *Executive Order 13175 Consultation and Coordination with Indian Tribal Governments*. All of DOI's bureaus and offices operate under a policy consistent with the Executive Order that considers the impacts of policies, processes, rulemaking, and legislation regarding tribes and tribal communities.

International Engagement and Leadership

The DOI participates in the United States' efforts to address climate change; protect biodiversity; sustainably manage energy, water, and natural resources; empower indigenous communities; protect cultural heritage; and ensure sound science as the basis for decisionmaking. The resources for which DOI is responsible cross jurisdictional boundaries and DOI is a key player in the international community confronting the exploitation of natural resources, trade in wildlife, spread of invasive species, the arctic,

and in a multiplicity of scientific issues. The DOI is committed to maintaining its relevance and will engage in international efforts as a core mission responsibility, consistent with its unique expertise and mandate.

Increasing Climate Change Preparedness and Resilience

The DOI's responsibilities for management of lands, waters, and wildlife provide first-hand experience of the impacts of a rapidly changing climate. Impacts observed by Federal resource managers include drought, severe flooding, interrupted pollination of crops, changes in wildlife and prey behavior, warmer rivers and streams, and sea level rise. The DOI will bring the best science to bear to understand these consequences and will undertake mitigation, adaptation, and enhancements to support natural resilience and will take steps to reduce carbon pollution, including through the responsible development of clean energy. The DOI will be a national leader in integrating preparedness and resilience efforts into its mission areas, goals, strategies, and programs; identifying vulnerabilities and systematically addressing these vulnerabilities; and incorporating climate change strategies into management plans, policies, programs, and operations.

CLIMATE CHANGE - THE DEPARTMENT OF THE INTERIOR

The DOI is committed to adaptively manage resources to mitigate the impacts of climate change, consider climate change on a landscape-level to improve resiliency, and work across agency lines to develop and provide data, information and decision support tools. The Strategic Plan utilizes goals, strategies, and metrics that support DOI's integrated approach to climate change as demonstrated by the following examples:

MISSION AREA #1 CELEBRATING AND ENHANCING AMERICA'S GREAT OUTDOORS

Climate change can act as a stressor and impacts efforts to protect America's landscapes, sustain fish and wildlife species, and protect cultural and heritage resources. The occurrence of wildland fire is exacerbated by the effects of climate change. Fire managers implement a comprehensive strategy that aligns Federal, state, tribal, and local efforts in preparedness, suppression, hazardous fuels reduction, and habitat restoration programs that consider the impacts of climate change.

MISSION AREA #2 STRENGTHENING TRIBAL NATIONS AND INSULAR COMMUNITIES

Climate change has a particular impact on American Indians and Alaska Natives that rely on resources for subsistence and economic development. The Strategic Plan includes goals, strategies and measures to gage the effective management of agriculture, grazing, timber, hunting, and fishing. The DOI resource managers consider the impacts of climate change in the management of these programs.

MISSION AREA #3 POWERING OUR FUTURE AND RESPONSIBLE USE OF THE NATION'S RESOURCES

The DOI's Strategic Plan includes goals, strategies and metrics that promote the development of energy and sustainable management of timber, forage, and non-energy minerals. Climate change is a factor that is considered in the planning and management of resources for utilization of energy, timber, and forage.

MISSION AREA #4 ENGAGING THE NEXT GENERATION

The DOI is committed to increasing the engagement of youth as active stewards of the environment and to promote youth employment, education, community service, and volunteerism. The DOI Strategic Plan include goals and strategies to gage performance of these efforts, which incorporate activities focused on climate change.

MISSION AREA #5 ENSURING HEALTHY WATERSHEDS AND SUSTAINABLE, SECURE WATER SUPPLIES

Water is a precious commodity that is increasingly impacted by climate change. The DOI's strategies for healthy watersheds and sustainable water supplies considers these impacts, promoting water conservation and partnerships for the responsible management of water supplies.

MISSION AREA #6 BUILDING A LANDSCAPE-LEVEL UNDERSTANDING OF OUR RESOURCES

The DOI is committed to assessing climate change impacts on a landscape scale, incorporating collaborative approaches and leveraging efforts with others to inform decisionmaking. The DOI Strategic Plan includes goals and strategies that promote data availability and use, leveraging the DOI's role in management of the geospatial platform.

Throughout the performance of its mission areas, DOI is a responsible steward for the significant land, water, and wildlife resources for which DOI is entrusted. The DOI has an obligation to ensure the sustainability of its own operations to promote energy efficiency and reduce greenhouse gases and the carbon footprint. The Strategic Plan promotes fulfillment of DOI's commitment to these efforts reducing its potential contributions to the causes of climate change.

HIGHLIGHTED INITIATIVES FOR ACHIEVING SECRETARIAL PRIORITIES

The following initiatives are highlighted as select activities considered particularly important to help fulfill the priorities that have been identified by the Secretary of the Interior. While this list is not all inclusive of the full range of activities being conducted throughout the DOI, these are identified to provide emphasis on select programmatic initiatives that are considered to play significant roles in furthering the DOI mission over the timeframe of this Strategic Plan (FY 2014-2018) especially for those priority areas identified by the Secretary in her letter. These highlighted initiatives have been arranged according to the corresponding mission areas and strategic goals which are more fully discussed later in the Plan. Embedded within the set of initiatives are the DOI's "Agency" Priority Performance Goals that are further highlighted in www.performance.gov.

MISSION AREA #1 CELEBRATING AND ENHANCING AMERICA'S GREAT OUTDOORS

Protect America's Landscapes and Species: Initiatives under this goal protect and restore America's large landscapes; conserve and restore wildlife populations; and improve efforts to manage lands and resources for resiliency.

- Climate change and resilience
 - Incorporate climate change projections into analyses of resource threats, trends, data, and monitoring needs, future planning needs, and other resource needs of National Park Service foundational planning documents.
 - Increase climate change resiliency and green infrastructure by implementing 30 storm mitigation projects in the Northeast and work collaboratively to prioritize science driven restoration projects to conserve the Gulf of Mexico watershed.
 - *PRIORITY GOAL*. Demonstrate a "maturing" level of implementation of climate change adaptation, as scored when implementing strategies in the Strategic Sustainability Performance Plan by September 30, 2015.
- Conserve sage-grouse
 - Conserve Greater Sage-Grouse and the sagebrush ecosystem it occupies by amending or revising Resource Management Plans and implementing restoration actions that address the needs of the sage-grouse.
- Restore the Everglades
 - Restore the quantity, quality, timing, and distribution of water to the Everglades; preserve and restore native Everglades habitats and species; and foster compatibility of built and natural systems in and affecting the Everglades by:
 - Initiating efforts to plan for and construct the Tamiami Trail 2.6-Mile Bridge in cooperation with the State of Florida and others.
 - Initiating development of an operations plan for the Modified Water Deliveries Project to provide more natural water delivery to Everglades National Park.
 - Developing a framework for detection and early response to invasive exotic species.
- Restore bison populations
 - Restore and sustain three ranging bison populations in collaboration with states, tribes, private landowners, and other public land management agencies in:
 - Great Sand Dunes National Park/Preserve and Baca National Wildlife Refuge in southern Colorado
 - The South Unit of Badlands National Park on the Pine Ridge Reservation in South Dakota
 - Public and State lands near Grand Canyon National Park in Arizona
- Combat wildlife trafficking

- Finalize and begin implementation of the National Strategy for Combating Wildlife Trafficking, in cooperation with the Departments of State and Justice.

Protect America's Cultural and Heritage Resources: Initiatives will advance historic preservation and understanding of the Nation's heritage.

- Prepare for the NPS Centennial
 - Improve the condition of 469 of the National Park Service highest priority facilities in preparation for the NPS Centennial in 2016.
- Enhance historic preservation
 - Complete implementation of the Report on the Federal Historic Preservation Tax Incentives Program recommendations to promote economic development and community revitalization, especially in urban areas.
- Enhance management of Indian cultural interests
 - Develop a revised FWS Native American Policy in collaboration with tribal representatives from across the Nation.
 - Finalize a rule to allow members of federally recognized Indian tribes to gather plants and minerals for traditional cultural purposes within units of the National Park System.

Enhance Recreation and Visitor Experience: Initiatives will improve outdoor recreation access and increase opportunities for public enjoyment of Federal lands, waters, and shorelines, and help connect urban populations to parks and green spaces.

- Recreation on public lands
 - Develop a strategy to expand recreational opportunities on national wildlife refuges, BLM conservation lands, and national parks.
- Urban Recreation
 - Increase the number of close-to-home outdoor recreational and wellness programs:
 - Facilitate 300 or more community-led natural resource conservation and outdoor recreation projects in over 800 communities.
 - Increase the number of Urban Wildlife Refuge Partnerships.

MISSION AREA #2 STRENGTHENING TRIBAL NATIONS AND INSULAR COMMUNITIES

Initiatives will improve the nation-to-nation relationships with tribes and fulfill the United States' trust responsibilities through partnerships to build stronger economies and safer Indian communities.

- 
- Economic opportunity
 - Promote economic opportunity by converting 500,000 acres from fee to trust.

MISSION AREA #3 POWERING OUR FUTURE AND RESPONSIBLE USE OF THE NATION'S RESOURCES

Initiatives will promote responsible development of domestic energy resources.

- Ensure environmental compliance and safety
 - Finalize OSMRE's Stream Protection Rule, BOEM/BSEE Alaska standards, and BSEE Production Safety Rule and Blowout Preventer Rule.
 - Modernize offshore leasing and diligence requirements for deepwater Gulf of Mexico.
- Develop renewable energy potential

(b)(5)

- Improve hydropower plant efficiency with software upgrades, new turbines, and pumping station operation flexibility.
- Responsibly develop conventional energy potential
 - Automate onshore Application for Permit to Drill tracking and processing.
 - Develop ePlans and ePermits for offshore exploration and development.
 - Develop and publish the Outer Continental Shelf Oil and Gas Leasing Program for 2017-2022.
- Manage energy production and revenue
 - Finalize the Hydraulic Fracturing Rule, Onshore Order 9 (waste prevention, venting, and flaring), and revisions to onshore oil and gas royalty rates.

(b)(5)

MISSION AREA #4 ENGAGING THE NEXT GENERATION

Initiatives will promote the engagement of young people as active stewards of the environment.

- Play:
 - Develop or enhance outdoor recreation partnerships in a total of 50 cities to create new, systemic opportunities for outdoor play for over 10 million young people.
- Learn:
 - Provide educational opportunities to at least 10 million of the Nation's K-12 student population annually.
- Serve:
 - Attain 1,000,000 volunteers annually on public lands.
- Work:

(b)(5)

MISSION AREA #5 ENSURING HEALTHY WATERSHEDS AND SUSTAINABLE, SECURE WATER SUPPLIES

Manage Water and Watersheds for the 21st Century: Initiatives will support reliable delivery of water for multiple purposes, help balance competing water resource goals, and build collaborative partnerships with Federal and non-Federal stakeholders.

- Basin studies
 - Complete 17 basin studies to develop strategies for managing watersheds, including adapting to the effects of climate change.
- California water resources
 - Complete CALFED feasibility storage studies for potential enlargement of two major California river basins (Shasta and Upper San Joaquin) while continuing work on other storage studies, and begin San Joaquin River construction projects addressing water supply and fishery needs.

(b)(5)

- Colorado River basin management
 - Publish a draft Environmental Impact Statement for the Colorado River Basin long term experimental and management plan.
 - Extend the current five-year Colorado River Basin agreement by renegotiating and implementing “Minute 319” and implemented related drought strategies.
- Restore urban rivers
 - Promote the current eighteen pilot locations of the Urban Water Federal Partnership and examine ways to strengthen the existing program and provide additional opportunities to other cities and towns as appropriate.
- Manage water and related resources in the Columbia River
 - Provide support for negotiations to renew Treaty.
- **(b)(5)**
- Elwha River
 - Create an adaptive management decision support tool for Elwha River Restoration.
- Klamath Basin
 - Finalize and begin implementation actions consistent with Klamath Basin Restoration and related agreements and applicable Federal legislation.
- USGS National Water Census and Environmental Flows
 - Provide data to inform decisions on water delivery for multiple use

Extend Water Supplies Through Conservation: The WaterSmart (Sustain and Manage America’s Resources for Tomorrow) program assists communities in stretching water supplies while improving water management and increasing the efficient use of water.

- Enable water conservation capability

(b)(5)

Enhance Availability of Water to Tribal Communities: The Department ensures the availability of water to tribal nations by implementing Indian water rights settlements, providing technical assistance to tribes, and undertaking tribal ecosystem restoration and rural water projects consistent with the goal of strengthening tribal nations.

- Indian water settlements

(b)(5)

- Begin water deliveries to Navajo Nation through the Navajo Gallup Water Supply Project.

MISSION AREA #6 BUILDING A LANDSCAPE-LEVEL UNDERSTANDING OF OUR RESOURCES

Provide Shared Landscape-Level Management and Planning Tools: Initiatives will leverage data and capability to improve decision making.

- Geospatial Platform
 - Develop high priority landscape-level applications in the areas of climate resilience, ecosystem restoration, and sustainable resource management.

- Landsat Data and Science
 - Provide biological carbon sequestration capacity for the lower 48 states, Alaska, and Hawaii through a visualization tool.
 - Make available Nationwide natural resource management products for wildfire burned area, surface water extent, and snow covered area.
 - Update the National Land Cover Database 30-meter resolution information on urban, agriculture, forested, and impervious areas, including tree canopy.
- Inventory and Monitoring
 - Make Fish & Wildlife Service Inventory and Monitoring Program data available to partners, state and local governments, academia, and other resource management groups, to further conservation efforts .
 - Complete BLM Rapid Eco-regional assessments including integrating shrub and grassland vegetation monitoring protocols and survey strategy with the Natural Resource Conservation Service.
 - Complete the Tennessee Land Unsuitability Petition for mining.

Provide Science to Understand, Model, and Predict Ecosystem, Climate, and Land Use Change: Initiatives will assist Federal, state, local, and tribal entities by monitoring water quality and quantity; analyzing energy and mineral resources potential and environmental effects of their extraction and use; and analyze and monitor changes to the land and ocean environments.

- Mississippi River
 - Update the Nutrient transport/transformation model for the Mississippi River Basin (SPARROW) to reduce hypoxia in the Gulf of Mexico.
- Sacramento- San Joaquin River Delta
 - Produce a 3-D Geologic Framework and Seismic Velocity Model for use across the Sacramento- San Joaquin River Delta.
- Chesapeake Bay
 - Assess water quality and wildlife including: factors affecting health of fisheries, ground water-quality and conditions resulting from management actions, effects of hydro-geochemical processes on water nutrients and quality, biogenic duck habitat model and effects of toxic contaminants on fish-eating birds, and combined effects of land and climate change on streamflow.
- Sage Grouse
 - Support Landscape Science and Conservation planning providing:
 - Evaluation of the impacts of energy development on sage grouse.
 - Better understanding the threat of altered fire regimes, spread of invasive plants, and climate change.
 - Analysis of population and habitat connectivity.
 - Updating geospatial mapping of sagebrush landscape.
 - Developing a comprehensive database of research and monitoring data.
- DOI Climate Science Centers (CSC)
 - Complete an ecosystem model to understand climate impacts on Alaskan natural resources.
 - Integrate scenarios for future climate, hydrology, and vegetation for the Northwest.
 - Assess climate sensitive ecosystems in the Southeastern US.
 - Develop regional drought impact scenarios for the North Central and South Central CSC's to facilitate planning of adaptation actions.

Provide Scientific Data to Protect, Instruct and Inform Communities: The USGS will lead the scientific research on the environment and natural hazards and provide information to partners and stakeholders for use in making decisions that will protect lives.

- Coastal resiliency
 - Update forecasts of erosion vulnerability to hurricanes for the Gulf and Atlantic Coasts including topography and bathymetry, analysis of shoreline changes due to Hurricane Sandy, modeling coastal change scenarios, and restoring sand deposits on the south island of the Chandeleur Islands.
- Landscape Conservation Cooperatives (LCC)
 - Develop adaptation strategies that identify alternative management approaches for identified conservation priorities
 - Produce spatially-explicit conservation designs that reflect the ability of current and future landscapes to support priority resources.
 - Deliver decision support information and tools to various decision makers that influence landscape conditions relevant to priority resources.
 -
- Support for Energy Resource Planning
 - Integrate landscape-level perspective into energy resource planning for:
 - Desert Renewable Energy Conservation Plan developed with mitigation strategies for the Western Solar Energy Plan.
 - Conventional energy siting through development of Master Leasing Plans by BLM.
 - Transmission Planning for BLM to revise its “Section 368” corridor study.
 - Development of a BLM “Planning 2.0” framework allowing for more effective response to environmental and social changes at multiple scales.

OVERVIEW OF THE FY 2014-2018 STRATEGIC PLAN

The DOI's FY 2014-2018 Strategic Plan provides the framework for the programs and activities that are performed by 10 bureaus and multiple offices, and take place at approximately 2,400 locations throughout the Nation.

The Strategic Plan facilitates the integration of programs, the allocation and alignment of resources, and collaboration and coordination with stakeholders to achieve key goals. A set of 6 mission areas, 24 goals, 38 strategies, and 117 performance measures will guide the DOI's activities for the next 4 years. These mission areas reflect the Secretary of the Interior's priorities, while the goals and strategies describe the means by which those priorities will be achieved.

The mission areas, goals, and strategies that compose the Strategic Plan are displayed in the Strategic Plan Framework, followed by a description of the mission areas, goals, and strategic objectives, and performance measures. An FY 2018 goal is provided for each performance measure that reflects a desirable annual level of achievement that DOI aspires to by FY 2018 assuming the availability of a reasonable level of resources. The anticipated level of performance for these measures on an annual basis beginning in FY 2014 in consideration of actual resource levels will be reported in the DOI's Annual Performance Plan and Report, to be released with the FY 2015 President's budget and available at www.doi.gov/bpp.

The Strategic Plan was developed based on collaboration among personnel of the DOI, in collaboration with tribes and other stakeholders. There is a high degree of continuity of performance measures from the FY2011-2016 Strategic Plan, in order to ensure an ongoing ability to gauge trends in performance and assist decision makers to assess the likely impact of program changes. Trends in performance related to funding and programmatic plans are available in the DOI's FY 2014 Annual Performance Plan and Report available at www.doi.gov/bpp.

Mission Area 1 Celebrating and Enhancing America's Great Outdoors

Goal 1: Protect America's Landscapes

- Improve land and water health by managing wetlands, uplands, and riparian areas
- Sustain fish, wildlife, and plant species
- Manage wildland fire for landscape resiliency, strengthen the ability of communities to protect against fire, and provide for public and firefighter safety in wildfire response

Goal 2: Protect America's Cultural and Heritage Resources

- Protect cultural and historical assets and related resources

Goal 3: Enhance Recreation and Visitor Experience

- Enhance the enjoyment and appreciation of our natural and cultural heritage

Mission Area 2 Strengthening Tribal Nations and Insular Communities

Goal 1: Meet Our Trust, Treaty, and Other Responsibilities to American Indians and Alaska Natives

- Protect reserved Indian treaty and subsistence rights
- Fulfill fiduciary trust

Goal 2: Improve the Quality of Life in Tribal and Native Communities

- Support self-governance and self-determination
- Create economic opportunity
- Strengthen Indian education
- Make communities safer

Goal 3: Empower Insular Communities

- Improve quality of life
- Create economic opportunity
- Promote efficient and effective governance

Mission Area 3 Powering Our Future and Responsible Use of the Nation's Resources

Goal 1: Secure America's Energy Resources

- Ensure environmental compliance and safety of energy development activities
- Develop renewable energy potential
- Manage conventional energy development
- Account for energy revenue

Goal 2: Sustainably Manage Timber, Forage, and Non-Energy Minerals

- Manage timber and forest product resources
- Provide for sustainable forage and grazing
- Manage non-energy mineral development

Mission Area 4 Engaging the Next Generation

Goal 1: Create new, systemic opportunities for outdoor play

- Develop or enhance outdoor recreation partnerships that provide outdoor play

Goal 2: Provide educational opportunities

- Reach the Nation's K-12 population

Goal 3: Provide volunteers on public lands

- Enable the ability to engage more young volunteers

Goal 4: Develop the next generation of lifelong conservation stewards and ensure our own skilled and diverse workforce pipeline

- Provide conservation work and training opportunities for young people

Mission Area 5 Ensuring Healthy Watersheds and Sustainable, Secure Water Supplies

Goal 1: Manage Water and Watersheds for the 21st Century

- Improve reliability of water delivery
- Better ensure the future of watersheds against the impacts of climate change

Goal 2: Extend Water Supplies Through Conservation

- Expand water conservation capabilities

Goal 3: Availability of Water to Tribal Communities

- Protection of tribal water rights
- Improve infrastructure and operational efficiency of tribal water facilities

Mission Area 6 Building a Landscape-level Understanding of Our Resources

Goal 1: Provide Shared Landscape-Level Management and Planning Tools

- Ensure the use of landscape-level capabilities and mitigation actions

Goal 2: Provide Science to Understand, Model and Predict Ecosystem, Climate and Land Use Change

- Identify and predict ecosystem changes at targeted and landscape-levels (biota, land cover, and Earth and ocean systems)
- Assess and forecast climate change and its effects

Goal 3: Provide Scientific Data to Protect, Instruct, and Inform Communities

- Monitor and assess natural hazard risk and resilience
- Provide environmental health to guide decisionmaking

Goal 4: Provide Water and Land Data to Customers

- Monitor and assess water availability and quality
- Generate geologic maps
- Assess national and international energy and mineral resources

**DESCRIPTION OF MISSION
AREAS
(WITH SUPPORTING GOALS, STRATEGIES,
AND PERFORMANCE MEASURES)**

MISSION AREA 1 CELEBRATING AND ENHANCING AMERICA'S GREAT OUTDOORS

GOAL #1 Protect America's Landscapes

We will ensure that America's natural endowment – America's Great Outdoors – is protected for the benefit and enjoyment of current and future generations. Through collaborative, community-driven efforts, and outcome-focused investment, we will work to preserve and enhance rural landscapes, urban parks and rivers, important ecosystems, and essential wildlife habitat.

STRATEGY #1 Improve land and water health by managing the wetlands, uplands, and riparian areas that comprise our national parks, wildlife refuges, and BLM lands.

The Bureau of Land Management, the Fish and Wildlife Service, the National Park Service, and the Bureau of Reclamation are stewards of the lands and waters managed by the Department. These Bureaus maintain and restore uplands, wetlands, and streams through efforts that include controlling invasive plants and animals, restoring land to a condition that is self-sustaining, and ensuring that habitats support healthy fish and wildlife populations. The DOI's Natural Resource Damage Assessment and Restoration program works with the bureaus to assess the impacts of oil spills and hazardous waste sites and coordinates restoration efforts.

Annually, Bureaus administer resource protection programs on more than 400 million acres of upland, wetland, and aquatic lands within their jurisdiction. Many of these lands have special status as national parks, seashores, monuments, wildlife refuges, wilderness areas, or wild and scenic rivers. They are protected because of their important and often unique ecological characteristics, physical geography, or historical features. The DOI manages these lands on a landscape-scale basis because of increasing stressors such as climate change, habitat fragmentation, exotic invasive species, and other broadly influencing factors. The DOI also works in partnership with others by providing and leveraging resources for conservation activities on non-Federal lands.

Bureaus Reporting	Supporting Performance Measures	2013 Actual	2018 Goal
BLM, FWS, NPS	Percent of DOI acres that have achieved desired conditions where condition is known and as specified in management plans.	325 million DOI managed acres (74%)	335 million DOI managed acres (76%)
BLM, FWS	Percent of DOI riparian (stream/shoreline) miles that have achieved desired condition where condition is known and as specified in management plans.	444 thousand DOI managed stream/shoreline miles (94%)	444 thousand DOI managed stream/shoreline miles (94%)
BLM, BOR, FWS, NPS	Percent of baseline acres infested with invasive plant species that are controlled.	330 thousand acres controlled (1%)	350 thousand acres controlled (1%)
FWS, NPS	Percent of invasive animal species populations that are controlled.	298 invasive animal populations controlled (10%)	409 invasive animal populations controlled (14%)
OSMRE	Number of Federal, tribal, and private land and surface water acres reclaimed or mitigated from the effects of natural resource degradation from past coal mining.	11,347 acres reclaimed	14,000 acres reclaimed
FWS, BOR	Number of non-DOI acres restored, including through partnerships, as specified in plans or agreements that involve DOI.	640,000 non-DOI acres restored (annual avg)	640,000 non-DOI acres restored (annual avg)

		excluding AK)	excluding AK)
FWS	Number of non-DOI acres managed or protected to achieve desired condition, including through partnerships, as specified in plans or agreements that involve DOI.	1.7 million non-DOI acres managed (annual avg excluding AK)	1.7 million non-DOI acres managed (annual avg excluding AK)
FWS	Number of non-DOI riparian (stream/shoreline) miles restored, including through partnerships, as specified in plans or agreements that involve DOI.	411 non-DOI stream /shoreline miles restored	900 non-DOI stream /shoreline miles restored
FWS	Number of non-DOI riparian (stream/shoreline) miles managed or protected to achieve desired condition, including through partnerships, as specified in plans or agreements that involve DOI.	1,665 non-DOI stream /shoreline miles managed or protected (annual avg excluding AK)	1,665 non-DOI stream /shoreline miles managed or protected (annual avg excluding AK)
BIA, BLM, BOEM, BOR, FWS, NPS, OSMRE, USGS	Priority Goal = Demonstrate maturing implementation of climate change adaptation strategies in the DOI Strategic Sustainability Performance Plan	NEW	200 points achieved on scorecard by end of FY 2015

STRATEGY #2 Sustain fish, wildlife, and plant species by protecting and recovering the Nation's fish and wildlife populations in cooperation with partners, including states.

The Fish and Wildlife Service is tasked with the conservation and protection of populations of fish, wildlife, plants, and their habitats. The FWS conducts these activities in partnership with others including NPS, BLM, Reclamation, and state and local agencies. The strategy to sustain species focuses on identifying and implementing corrective actions that will lead to species recovery.

The DOI's responsibility to protect fish, wildlife, and native plants transcends jurisdictional boundaries, and includes efforts that affect almost 1,500 species with special status under the Endangered Species Act and more than 1,000 migratory birds that receive Federal protection under the Migratory Bird Treaty Act. The DOI is instrumental in combating domestic and international wildlife trafficking by improving enforcement of domestic laws, strengthening international cooperation and global enforcement, and helping to reduce demand for illegal wildlife products.

Bureaus Reporting	Supporting Performance Measures	2013 Actual	2018 Goal
FWS	Percent of threatened and endangered (T&E) species that have improved based on the latest 5-year status review recommendation.	48 T&E species improved (4%)	51 T&E species improved (5%)
FWS	Percent of threatened and endangered (T&E) species recovery actions implemented.	24,285 T&E species recovery actions implemented (68%)	24,300 T&E species recovery actions implemented (68%)
BLM, FWS, BOR	Number of threatened and endangered species (T&E) recovery activities implemented.	3,290 T&E species recovery activities implemented (annual avg)	3,463 T&E species recovery activities implemented
FWS	Percent of migratory bird species that are at healthy and sustainable levels.	726 migratory bird species healthy & sustainable (72%)	726 migratory bird species healthy & sustainable (72%)

FWS	Percent of fish species of management concern that are managed to self-sustaining levels, in cooperation with affected states, tribes, and others, as defined in approved management documents.	39 fish species of management concern at self-sustaining levels (annual avg) (21%)	39 fish species of management concern at self-sustaining levels (21%)
FWS	Number of international species of management concern whose status has been improved in cooperation with affected countries.	247 international wildlife species improved	247 international wildlife species improved

STRATEGY #3 Manage wildland fire for landscape resiliency, strengthen the ability of communities to protect against fire, and provide for public and firefighter safety in wildfire response.

The Department's Office of Wildland Fire coordinates fire programs across four Bureaus (BLM, FWS, NPS, and BIA) that manage and operate wildland fire programs along with the Department of Agriculture's Forest Service. The DOI Bureaus deploy strategies to mitigate the effects of wildland fire and restore burned acres, support communities that are at highest risk from fire by assisting in the development of fire action plans, and respond quickly when fire strikes. The DOI strives to achieve a technically effective fire management program that meets resource and safety objectives, while minimizing the cost of suppression and damage to resources.

Ensuring resilient landscapes and fire-adapted communities depends on the implementation of a broad-based, intergovernmental, collaborative, and national cohesive strategy to better address the mounting challenges of escalating fire behavior, increased risk to responders, greater home and property losses, and increased threats to communities. The DOI is a leading agency in this collaborative approach with the Forest Service and other Federal, state, tribal, and local governments and stakeholders. Three supporting performance measures were developed to demonstrate and evaluate progress in achieving the national goals to restore and maintain resilient landscapes, promote fire-adapted communities, and respond to wildfires.

Office Reporting	Supporting Performance Measures	2013 Actual	2018 Goal
OWF	Percent of DOI-managed landscape acres that are in a desired condition as a result of fire management objectives.	160,066,449 acres managed in desired condition (36%)	171,310,000 managed acres in desired condition (38%)
OWF	Percent of DOI-managed treatments that reduce risk to communities that have a wildland fire mitigation plan.	1,597 treatments (76%)	1,597 treatments (76%)
OWF	Percent of wildfires on DOI-managed landscapes where the initial strategy(ies) fully succeeded during the initial response phase.	6,330 wildfires successfully managed (98%)	6,525 wildfires successfully managed (99%)

GOAL #2 Protect America's Cultural and Heritage Resources

We will ensure that our Nation's rich cultural heritage and abundant historic and prehistoric resources are preserved for the enjoyment and enlightenment of current and future generations.

STRATEGY #1 Protect and maintain the Nation's most important historic areas and structures, archaeological sites, and museum collections.

A cornerstone of DOI's mission is the protection of America's cultural heritage and resources for future generations and the obligation to honor and protect cultural resources of tribal communities. The Department maintains over 29,000 historic structures among 5 Bureaus – NPS, BLM, BOR, FWS, and BIA. The largest portion of historic structures on DOI lands is found in the National Park System. The Department also protects many of the Nation's most important cultural heritage sites. They range in size from pioneering homesteads to the massive granite carvings of Mount Rushmore. The DOI is the steward of millions of cultural and natural artifacts, including those from the earliest days of North American occupation over 15,000 years ago through colonial and westward expansion settlements to those from monuments commemorating recent heroic events, such as the Flight 93 National Memorial in Pennsylvania. These valued collections tell the history of the Nation. These Bureaus work closely with Native American tribes, Alaska Native corporations, and Native Hawaiian communities to help ensure respect for and preservation of the sacred cultural sites of our native peoples, as well as repatriation of Native American cultural items.

The Department, universities, historians, and others use America's cultural and heritage resources to expand understanding of our culture. They remind us of who we are and where we came from.

Bureaus Reporting	Supporting Performance Measures	2013 Actual	2018 Goal
BIA, BLM, FWS, NPS	Percent of historic structures in DOI inventory in good condition.	15,390 historic structures in good condition (53%)	16,175 historic structures in good condition (56%)
BIA, BOR, BLM, FWS, NPS	Percent of collections in DOI inventory in good condition.	1,214 collections in good condition (46%)	1,225 collections in good condition (46%)
BIA, BLM, FWS, NPS	Percent of archaeological sites in DOI inventory in good condition.	107,814 archeological sites in good condition (64%)	108,000 archeological sites in good condition (64%)
NPS	Number of completed historic rehabilitation tax credit projects (since 1976)	39,662	43,600

GOAL #3 Enhance Recreation and Visitor Experience

We will encourage the appreciation and use of our lands by facilitating visitor use and recreational experiences. We will support tourism and outdoor recreation—powerful economic engines that bolster communities across the Nation. We will strive to provide visitors with beneficial physical, mental, and social opportunities, including those that result from outdoor recreational experiences.

STRATEGY #1 Enhance the enjoyment and appreciation of our natural and cultural heritage by creating opportunities for play, enlightenment, and inspiration.

About 417 million Americans and foreign visitors traverse public lands each year. The Bureaus that provide recreational opportunities – BLM, FWS, and NPS – are particularly dedicated to ensuring that visitors have the best possible experiences through interpretive guides, displays, videos, and other materials, in addition to the spectacular land, water, wildlife, and cultural features themselves.

In a national dialogue about America's Great Outdoors, citizens reiterated the importance of open spaces

and recreation to their quality of life, health, and commitment to conservation. National parks, FWS refuges, and BLM public lands provide recreation experiences that include many forms: camping or hiking; catch and release trout fishing; canoeing; bird watching; biking, swimming, and many other activities. Many water-related recreational activities are also available as a result of Bureau of Reclamation projects. These Bureaus make special accommodations to address the need for accessibility to public lands and to better engage underserved communities, especially in response to the increasing urbanization and shifting demographics of America's population. This requires focused research and close coordination with existing partners, as well as cultivating new partnerships with organizations representing diverse constituents.

By focusing on visitor services, increasing volunteer opportunities, and ensuring access for recreation, education, and contemplation, the Department ensures that the public is offered valuable, high-quality experiences at our sites.

Bureaus Reporting	Supporting Performance Measures	2013 Actual	2018 Goal
BLM, FWS, NPS	Percent of visitors satisfied with the quality of their experience.	94% visitors satisfied	94% visitors satisfied
BLM, NPS	Percent of satisfaction among visitors served by facilitated programs.	95% participating visitors satisfied	95% participating visitors satisfied

MISSION AREA 2 STRENGTHENING TRIBAL NATIONS AND INSULAR COMMUNITIES

GOAL #1 Meet Our Trust, Treaty, and Other Responsibilities to American Indians and Alaska Natives

We will restore the integrity of nation-to-nation relationships with tribes and work diligently to fulfill the United States' trust responsibilities. We will work in partnership with tribes to build stronger economies and safer Indian communities.

STRATEGY #1 Protect reserved Indian treaty and subsistence rights.

The DOI will assist American Indian tribes and Alaska Natives in developing the most effective practices for responsible and successful use of subsistence resources and treaty reserved rights to natural resources. For the purposes of this measure, subsistence means the gathering and harvest, processing, consumption, and use of all wild resources – birds, mammals, fish, and plants – from all the varied environments found throughout tribal communities.

For American Indians and Alaska Natives, subsistence use embodies a culturally significant lifestyle and is an important component of Indian communities. Subsistence resources are important to these economies and for the continuation of traditions and practices that are a part of these diverse cultures. The term “customary and traditional” is included in the Code of Federal Regulations to describe the historic and current use of wildlife and fisheries resources for subsistence by residents of rural communities.

Bureau Reporting	Supporting Performance Measures	2013 Actual	2018 Goal
BIA	Percent increase in the number of federally-recognized American Indian Tribes and Alaska Native organizations involved with studies and projects to improve Federal and tribal management of treaty reserved rights and subsistence resources.	17 Tribes supported (4%)	100 Tribes supported (44%)

STRATEGY #2 Fulfill Fiduciary Trust

The DOI has ongoing responsibilities for timely reporting of Indian trust ownership information to its beneficiaries. We will ensure that trust and restricted Federal Indian-owned lands are managed effectively and accurately account for revenues in a timely and efficient manner. The Office of the Special Trustee for American Indians and Bureau of Indian Affairs oversee fiduciary trust activities.

Bureaus Reporting	Supporting Performance Measures	2013 Actual	2018 Goal
BIA	Percent of active, supervised Individual Indian Monies (IIM) case records reviewed in accordance with regulations.	710 IIM case records reviewed (98%)	861 IIM case records reviewed (100%)
OST	Percent of financial information initially processed accurately in trust beneficiaries' accounts.	(b)(5)	
OST	Percent of oil and gas revenue transmitted by ONRR recorded in the Trust Funds Accounting System within 24 hours of receipt.	\$628 million transmitted efficiently (99%)	\$635 million transmitted efficiently (100%)
OST	Percent of timeliness of financial account information provided to trust beneficiaries.	(b)(5)	

		(b)(5)
--	--	---------------

GOAL #2 Improve the Quality of Life in Tribal and Native Communities

With self-governance and self-determination as our North Star, the Department will work to restore tribal homelands, settle Indian water rights claims, increase opportunities for renewable and conventional energy on Indian lands, expand educational opportunities for Native American youth, and protect natural and cultural resources in the face of climate change.

STRATEGY #1 Support self-governance and self-determination.

The DOI is strengthening the nation-to-nation relationship between the Federal Government and tribal nations because self-determination, sovereignty, self-government, and self-reliance are the tools that will enable tribal nations to shape their collective destiny. Tribes have also assumed an expanded role in the operation of Indian programs through Public Law 93-638 contracting. Tribes contract with the Federal Government to operate programs serving their tribal members and other eligible persons.

Bureau Reporting	Supporting Performance Measures	2013 Actual	2018 Goal
BIA	Percent of P.L. 93-638 Title IV contracts/compacts with clean audits.	79 compact tribes with clean audits (71%)	138 compact tribes with clean audits (100%)
BIA	Percent of Single Audit Act reports submitted during the reporting year for which management action decisions on audit or recommendations are made within 180 days.	405 audit reports addressed in time (99%)	405 audit reports addressed in time (99%)

STRATEGY #2 Create economic opportunity.

The DOI assists Indian Nations in developing capacity and infrastructure needed to attain economic self-sufficiency on reservations to enhance their quality of life. One critical path is economic development and job creation. The BIA coordinates development of comprehensive tribal programs with the Departments of Labor and Health and Human Services. The DOI offers programs and financial services that encourage start-ups and help position Indian businesses and individuals to compete in today's economy. The Department supports tribal communities in increasing opportunities to develop conventional and renewable energy resources (e.g. solar and wind) and non-energy mineral resources on trust land.

An integral part of building stronger economies within American Indian and Alaska Native communities is developing conservation and resource management plans that ensure sustainable use of trust land. Income is derived from leasing the land for timber and forest biomass harvests, grazing, and farming. These plans are reviewed by BIA to help safeguard the income-generating assets that sustain the economy of communities.

Bureau Reporting	Supporting Performance Measures	2013 Actual	2018 Goal
BIA	Total average gain in earnings of participants that obtain unsubsidized employment through Job Placement employment, training, and related services funding, in accordance with P.L. 102-477.	\$10.40 average gain in earnings of participants	\$11.00 average gain in earnings of participants

BIA	Loss rates on DOI guaranteed loans.	\$28,912 loan losses	\$28,000 loan losses
BIA	Fee to trust: Increase in the percentage of submitted applications with determinations.	TBD	1,025 applications processed
BIA	Percent of grazing permits monitored annually for adherence to permit provisions, including permittee compliance with requirements described in conservation plans.	3,387 grazing permits monitored / inspected (24%)	8,943 grazing permits monitored / inspected (64%)
BIA	Percent of active agricultural and grazing leases monitored annually for adherence to lease provisions, including lessee compliance with responsibilities described in conservation plans.	9,154 leases monitored / inspected (35%)	17,078 leases monitored / inspected (69%)
BIA	Percent of range units assessed during the reporting year for level of utilization and/or rangeland condition/trend.	1,247 range units assessed (32%)	2,646 range units assessed (74%)
BIA	Percent of sustainable harvest of forest biomass utilized for energy and other products.	2 million tons of biomass harvested (50%)	3.4 million tons of biomass harvested (85%)

STRATEGY #3 Strengthen Indian education.

The DOI is allocating funds to improve its Bureau of Indian Education (BIE) funded schools, and improve the learning environment of BIE students. Improving performance in BIE schools is a challenge the DOI is addressing through initiatives aimed at increasing student achievement with a focus on reading and math. Schools are assessed for their Adequate Yearly Progress (AYP) which is defined by each state based on judging reading and mathematics proficiency along with attendance for elementary and middle schools, and graduation rates for high schools.

Bureau Reporting	Supporting Performance Measures	2013 Actual	2018 Goal
BIE	Percent of BIE schools achieving AYP (or comparable measure).	45 schools achieving AYP (26%)	66 schools achieving AYP (38%)
BIE	Percent of BIE school facilities in acceptable condition as measured by the Facilities Condition Index.	147 facilities in acceptable condition (81%)	164 facilities in acceptable condition (90%)

STRATEGY #4 Make communities safer.

The DOI will strengthen law enforcement in Indian Country by putting more officers on the streets, bolstering tribal courts, and helping fight violent crime and drug abuse. Crime control, however, is only one component of a safe community. New construction, renovation, and maintenance of facilities, including detention facilities and roads and bridges, also contribute to the safety and well-being of the tribal populace.

Tribal justice systems are an essential part of tribal governments, which interface with BIA and tribal law enforcement activities. Congress and the Federal courts have repeatedly recognized tribal justice systems as the appropriate forums for adjudicating disputes and minor criminal activity within Indian Country. It is important that the BIA and tribal law enforcement activities complement the operations of the tribal courts to ensure that justice in the tribal forums is administered effectively.

Bureau Reporting	Supporting Performance Measures	2013 Actual	2018 Goal
BIA	Percent of law enforcement facilities that are in acceptable condition as measured by the Facilities Condition Index (FCI).	46 facilities in acceptable condition (92%)	50 facilities in acceptable condition (100%)
BIA	Percent of BIA funded tribal judicial systems receiving an acceptable rating under independent tribal judicial system reviews.	77 tribal justice systems rated acceptable (42%)	173 tribal justice systems rated acceptable (92%)
BIA	Part I violent crime incidents per 100,000 Indian Country inhabitants receiving law enforcement services. (b)(5)	442 violent crimes per 100,000 residents	At or below national average (387 per 100,000 residents)
BIA	Percent of miles of road in acceptable condition based on the Service Level Index.	5,048 miles of roads in acceptable condition (17%)	5,200 miles of roads in acceptable condition (17%)
BIA	Percent of bridges in acceptable condition based on the Service Level Index.	622 bridges in acceptable condition (68%)	622 bridges in acceptable condition (68%)

GOAL #3 Empower Insular Communities

The Department empowers insular communities by improving the quality of life, creating economic opportunity, and promoting efficient and effective governance. The U.S.-affiliated insular areas include: the territories of American Samoa, Guam, the U.S. Virgin Islands, and the Commonwealth of the Northern Mariana Islands. The DOI also administers and oversees Federal assistance provided to the three Freely Associated States: the Federated States of Micronesia, the Republic of the Marshall Islands, and the Republic of Palau. The Assistant Secretary for Insular Affairs and the Office of Insular Affairs carry out these responsibilities on behalf of the Secretary.

STRATEGY #1 Improve quality of life.

The DOI will assist the insular areas to improve the quality of life by pairing access to financial resources for capital improvements and public services with robust oversight, and by improving interagency coordination on insular issues. We will also pursue sustainable, indigenous energy strategies to lessen dependence on oil imports and provide more reliable and affordable energy. In addition, we are working with other partners, such as the Department of Health and Human Services, to improve the quality of healthcare across the insular areas.

Office Reporting	Supporting Performance Measures	2013 Actual	2018 Goal
OIA	Percent of Community Water Systems (CWS) that receive health-based violation notices from the U.S. Environmental Protection Agency.	28 community water systems out of 148 water systems (19%)	No more than 9% of systems with health-based violations
OIA	Residential cost per kilowatt hour for power compared to the national average.	3X the national average	2X the national average
OIA	Percent of schools in acceptable condition based on specified safety and functionality standards.	701 schools in acceptable condition (37%)	750 schools in acceptable condition (40%)

STRATEGY #2 Create economic opportunity.

The DOI will help create economic opportunity by forging partnerships that bolster tourism and attract industry by promoting the unique island cultures, natural resources, and by preparing the next generation of business leaders. We will pursue economic development initiatives that encourage private sector investment in the insular areas.

Bureau Reporting	Supporting Performance Measures	2013 Actual	2018 Goal
OIA	Real mean GDP per capita in the 4 US Territories compared to the real mean GDP per capita for the US.	Real mean GDP per capita of 4 US territories (\$20K) compared to real mean versus national GDP (\$43K) (47%)	Real mean GDP per capita of 4 US territories (\$24K) compared to real mean versus national GDP (\$43K) (55%)

STRATEGY #3 Promote efficient and effective governance.

The DOI will work with the insular areas to ensure that local and Federal funding is being used efficiently and effectively by improving insular government financial policies and procedures, financial management systems, and technical planning abilities. We will also strive to equip insular area leadership with the statistical tools necessary for informed decisionmaking.

Bureau Reporting	Supporting Performance Measures	2013 Actual	2018 Goal
OIA	Number of insular governments with on-time and unqualified single audits.	4 (of 7 insular area governments)	5 (of 7 insular area governments)

MISSION AREA 3 POWERING OUR FUTURE AND RESPONSIBLE USE OF THE NATION'S RESOURCES

GOAL #1 Secure America's Energy Resources

As manager of one-fifth of the Nation's landmass and energy resources on 1.7 billion acres of the Outer Continental Shelf (OCS), the Department plays a central and essential role in powering America's future through the responsible development of our Nation's abundant domestic energy resources. Through early planning, thoughtful mitigation, and the application of sound science, DOI can ensure that the Administration's "all-of-the-above" energy strategy includes not only traditional sources, but also the further development of new, cleaner resources to help mitigate the causes of climate change. Included in this development is a reliable, resilient, and well-planned energy transmission system that forms the backbone of the Nation's energy economy and is crucial to bringing both conventional and renewable energy to households across America. By modernizing practices, leveraging technology, and looking across the government and industry for best practices, DOI is improving the transparency and timeliness of the resource development permitting process while providing greater certainty to industry and strengthening inspection and regulatory enforcement programs.

STRATEGY #1 Ensure environmental compliance and the safety of energy development.

One of the keys to further expanding safe and responsible energy development is maintaining the public's confidence that this activity can be conducted in an environmentally responsible manner and is subject to strong oversight. The DOI is pressing forward with a reform agenda, both onshore and offshore, and is bolstering oversight and inspections. The DOI is focused on risk and is appropriately devoting limited oversight resources based on robust assessments of risk.

Bureaus Reporting	Supporting Performance Measures	2013 Actual	2018 Goal
OSMRE	Percent of active coal mining sites that are free of off-site impacts.	6,568 mining sites free of off-site impacts (89%)	6,665 mining sites free of off-site impacts (90%)
OSMRE	Percent of coal mine acreage reclaimed.	5.1 million acres reclaimed (76%)	5.6 million acres reclaimed (77%)
BLM	Percent of oil and gas acres reclaimed to appropriate final land condition.	1,661 acres reclaimed (24%)	2,000 acres reclaimed (25%)
BLM	Percent of producing fluid mineral cases that have a completed inspection during the year. (b)(5)	10,204 cases inspected (37%)	10,715 cases inspected (39%)
BSEE	Amount (in barrels) of operational offshore oil spilled per million barrels produced.	<1 barrel spilled per million produced	< 1 barrel spilled per million produced
BSEE	Number of recordable injuries per 200,000 offshore man hours in DOI-regulated activities.	0.3 injuries per 200,000 offshore workhours	< 0.3 injuries per 200,000 offshore workhours

STRATEGY #2 Develop renewable energy potential.

The DOI is working to move America to a clean and sustainable energy future and, as called for in President Obama's Climate Action Plan, will re-double efforts on renewable energy as we transition to a landscape-level approach to wind, solar, geothermal, and hydropower energy development. Standing up new sources of clean energy generation and facilitating the construction of new or upgraded transmission networks are helping to create new industries and supply chains, driving economic growth and job creation. Connecting renewable energy projects to the grid and key markets is central to making renewable energy generation projects viable. Through partnerships and close coordination, the DOI works to site renewable energy projects in the right places where potential environmental and social conflicts can be minimized and potential effects mitigated, consistent with landscape-level planning.

Hydropower is the Nation's largest renewable energy resource, and the Bureau of Reclamation is the second largest hydropower producer in the United States. Our 53 power plants generate more than 40 billion kilowatt hours annually, enough electricity to serve 3.5 million homes. Over the next 12 years, Reclamation is initiating major rehabilitation and upgrades to many of its large hydropower assets which will yield over 250 Megawatts of additional capacity via increased efficiencies. These actions may affect peak availability of units in a given year during this period.

Bureaus Reporting	Supporting Performance Measures	2013 Actual	2018 Goal
BOR	Percent of hydropower facilities in good condition as measured by the Facility Reliability Rating.	45 facilities (82%) in good condition	45 facilities (82%) in good condition
BOR	Percent of time that BOR hydroelectric generating units are available to the inter-connected western electrical system during daily peak demand periods.	85% operational during peak periods	85% operational during peak periods
BLM, BOEM	Number of megawatts of approved capacity authorized on public land and the OCS for renewable energy development while ensuring full environmental review (cumulative). (b)(5)	(b)(5)	(b)(5)

STRATEGY #3 Manage conventional energy development.

The DOI oversees vast resources that, when developed the right way and in the right places, support "all of the above" energy strategy that expands the production of energy at home, promotes energy security, and helps drive the economy and job growth.

Bureaus Reporting	Supporting Performance Measures	2013 Actual	2018 Goal
BOEM	Number of offshore lease sales held consistent with the Secretary's 5-Year Oil and Gas Program (2012-2017; lease sales subject to change under Section 18(e) of the OCS Lands Act).	5 lease sales held (cumulative 2012-2013)	15 lease sales held (cumulative 2012-2017)
BLM	Percent of coal lease applications processed.	6 applications processed (15%)	6 applications processed (15%)
BLM	Percent of pending fluid minerals Applications for Permit to Drill (APDs) which are processed.	4,892 applications processed (60%)	5,135 applications processed (62%)

STRATEGY #4 Account for energy revenue.

The DOI is committed to providing reasonable assurance that it is collecting every dollar due from Federal and Indian lands leased for energy development. The Department will fulfill its role by accurately and efficiently collecting, accounting for, analyzing, auditing, and disbursing revenues associated with offshore and onshore energy production. Revenues generated from these activities are distributed to states and tribes, fund land protection and historic preservation, and are deposited in the U.S. Treasury. The DOI also is committed to working with industry, as well as public and non-governmental entities, as part of the international Extractive Industries Transparency Initiative (EITI), which offers a voluntary framework for governments to disclose revenues received from oil, gas, and mining assets, with parallel disclosure by companies of what they have paid governments in royalties, rents, bonuses, taxes and other payments. The Department is working diligently towards obtaining compliance with the international EITI standards and in December 2013 submitted the U.S. Candidacy Application to the International EITI Board.

Office Reporting	Supporting Performance Measures	2013 Actual	2018 Goal
ONRR	Percent of Federal and Indian revenues disbursed on a timely basis per statute.	99% (of \$2.5B annual avg 2009-2012)	99% (of \$2.5B annual avg 2009-2012)
ONRR	Percent of Payors and Operators covered by a completed ONRR Compliance Activity.	90% (of 3,400 payors and operators)	90% (of 3,000 payors and operators)

GOAL #2 Sustainably Manage Timber, Forage, and Non-energy Minerals**STRATEGY #1 Manage timber and forest product resources.**

The DOI's forests or woodlands are managed by BLM for the benefit of the American public. The BLM maintains a permanent source of timber supply, which supports the production of commodities such as lumber, plywood, and paper, while also protecting watersheds, regulating stream flow, contributing to the economic stability of local communities and industries, and providing recreational opportunities.

Bureau Reporting	Supporting Performance Measures	2013 Actual	2018 Goal
BLM	Percent of allowable timber sale quantity offered for sale consistent with applicable resource management plans.	162 million board feet of timber (80%)	162 million board feet of timber (80%)
BLM	Volume of wood products offered consistent with applicable management plans.	243 million board feet of wood products offered	243 million board feet of wood products offered

* million board feet of timber

STRATEGY #2 Provide for sustainable forage and grazing.

The BLM manages livestock grazing on over half of its public lands. The BLM's overall objective is to ensure the long-term health and productivity of these lands. The BLM uses a variety of methods to accomplish this objective – periodic rest or deferment of grazing in pastures in specific allotments during critical growth periods; vegetation treatments; and projects such as water development and fences. The terms and conditions for grazing on BLM managed lands, such as stipulations on forage use and season of use, are set forth in the permits and leases issued by the Bureau to public land ranchers.

Bureau Reporting	Supporting Performance Measures	2013 Actual	2018 Goal
BLM	Percent of grazing permits and leases processed as planned consistent with applicable resource management plans.	1,344 grazing permits and leases processed (21%)	3,500 grazing permits and leases processed (60%)

STRATEGY #3 Manage non-energy mineral development.

Non-energy minerals development on DOI lands and waters, such as gold, zinc, lead, copper, iron, salt, sand, potassium, phosphate, stone, gravel, and clay, support a broad array of uses, including medical applications, computer production, coastal restoration, automobile production, and highway construction and maintenance. The DOI is committed to sustaining mineral development in an environmentally

responsible way by ensuring the reclamation of areas that have been mined and minimizing environmental impacts during the mining process.

Bureau Reporting	Supporting Performance Measures	2013 Actual	2018 Goal
BLM	Percent of non-energy mineral exploration and development requests processed.	114 requests processed (24%)	114 requests processed (24%)
BLM	Number of mined acres reclaimed to appropriate land condition and water quality standards.	2,279 acres reclaimed	2,300 acres reclaimed
BOEM	Number of sand and gravel requests processed for coastal restoration projects	NEW	10

MISSION AREA 4 ENGAGING THE NEXT GENERATION

“For the health of our economy and our public lands, it’s critical that we work now to establish meaningful and deep connections between young people – from every background and every community – and the great outdoors.”

Secretary Sally Jewell

October 31, 2013

The future of our public lands depends upon young people serving as active stewards of the environment throughout their lives. However, there is a growing disconnect between young people and the great outdoors – and it’s a gap that DOI has the power to help bridge. The Department has a unique opportunity to harness the strong spirit of community service and volunteerism that is alive within our Nation’s youth, and encourage them to use their time, energy, and talent to better our natural and cultural treasures. Through public-private partnerships and in conjunction with all levels of government, DOI will expand its efforts to inspire millions of young people to play, learn, serve, and work outdoors.

GOAL #1 Play Develop or enhance outdoor recreation partnerships in a total of 50 cities over the next 4 years to create new, systemic opportunities for outdoor play for over 10 million young people.

By participating in recreation opportunities on public lands, our youth strengthen their ties to America’s backyard. However, nearly 80 percent of the United States’ population lives in cities. The DOI can leverage our experience and expertise to help communities engage more young people on all public lands. To increase the number of youth who play outside, we must overcome the major obstacles including a lack of access in communities, a lack of interest from children, and a lack of time for young adults. To address these problems, DOI will develop or enhance outdoor recreation partnerships in 50 cities with the goal of creating new systemic opportunities for outdoor play for over 10 million young people.

This goal will build upon the National Park Service’s plan for the Centennial. As part of the NPS Call to Action for the Centennial, the NPS has committed to developing proactive Rivers, Trails and Conservation Assistance Programs and collaborative park-based programs in the 50 largest urban areas and those with the least access to parks. The NPS is also establishing 50 formal partnerships with health and medical providers across the Country.

Bureaus Reporting	Supporting Performance Measures	2013 Actual	2018 Goal
(b)(5)	Number of young people in 50 cities that participate in an outdoor plan activity on public lands	NEW	10 million participants since after FY 2013

GOAL #2 Learn In 4 years, provide educational opportunities to at least 10 million of the Nation’s K-12 student population annually.

Our public lands and waters are our outdoor laboratories, and by getting students—from grammar school to graduate school—to learn about our public lands and waters, we can develop their interest in nature and the science, technology, engineering, and mathematics (STEM) education fields that are essential to our future. There are approximately 50–55 million K-12 students in the US. The DOI currently reaches at least 3 million students a year through its education programs. With new online education resources, we have the ability to reach more teachers and students than those that can come for an in-person visit.

Leveraging the NPS' newly launched teacher portal, DOI will provide educational opportunities to at least 10 million of the Nation's K-12 student population annually.

Bureaus Reporting	Supporting Performance Measures	2013 Actual	2018 Goal
(b)(5)	Number of K-12 students who participate or access educational materials or opportunities provided by the Department of the Interior	NEW	10 million participants after FY 2013

GOAL #3 Serve In 4 years, attain 1,000,000 volunteers annually on public lands.

Currently 332,000 volunteers provide 9.6 million hours of service annually valued at \$209 million per year. We know that many more people are interested in volunteering but there is insufficient volunteer coordination and management capacity. By prioritizing volunteer management and coordination positions as part of our efforts to expand youth work opportunities and leveraging the expertise of partners like the Corporation for National and Community Service, we will expand volunteer opportunities across DOI's public lands.

Bureaus Reporting	Supporting Performance Measures	2013 Actual	2018 Goal
(b)(5)	Number of people volunteering on DOI managed lands	NEW	1 million volunteers annually

GOAL #4 Work Provide 100,000 work and training opportunities to young people over the next 4 years.

To develop the next generation of lifelong conservation stewards and ensure our own skilled and diverse workforce pipeline, DOI will provide 100,000 work & training opportunities to young people (ages 15 to 25) over 4 years. In order to achieve the goal, we will utilize public-private partnerships to leverage additional resources and provide additional work and training opportunities than those we could do on our own. Our work and training opportunities will support the 21st Century Conservation Service Corps (21CSC) which is a multi-agency effort to provide work and training opportunities in stewardship of our public lands to young people and veterans, helping them develop skills to serve both the Nation's natural and cultural resources, but also their own futures. The other 21 CSC Federal agency partners are Agriculture, Commerce, Labor, Environmental Protection Agency, Army, Council on Environmental Quality, and the Corporation for National and Community Service.

Bureaus Reporting	Supporting Performance Measures	2013 Actual	2018 Goal
(b)(5)	Number of work and training opportunities provided to young people (b)(5)	15,546 Participants in FY 2013	80,000 opportunities after FY 2013

MISSION AREA 5: ENSURING HEALTHY WATERSHEDS AND SUSTAINABLE, SECURE WATER SUPPLIES

Healthy watersheds provide sustainable, secure water that is the foundation for healthy communities and economies, but water supplies are challenged by climate change, record drought conditions, and increasing demands. Recognizing the states' primary role in managing water resources, the Department will work as a partner to increase reliability of water supplies, for the benefit of the people, the economy, and the environment by providing better tools for water management, promoting water conservation and efficiency, and wisely maintaining and improving infrastructure. To achieve this goal it will be critical to inculcate these concepts in the next generation of water managers.

GOAL #1 Manage Water and Watersheds for the 21st Century

We deliver water in the 17 Western States for agriculture, municipal and industrial use, and providing flood control and recreation for millions of Americans. To achieve these goals, BOR balances water supply demands, promotes water conservation, improves water management, and protects the environment through the safe and effective performance of our facilities. The Department has a role in developing innovative approaches to meet water needs and anticipate future challenges.

STRATEGY #1 Improve reliability of water delivery

The BOR and its managing partners operate and maintain its water facilities in a safe, efficient, economical, and reliable manner, and assure that systems and safety measures are in place to protect the facilities and the public. The BOR's Facility Reliability Rating (FRR) system was established to score and provide a general indication of BOR's ability to maintain the reliability of its facilities. The BOR uses FRR data, on both reserved and major transferred facilities, to focus on activities that help ensure water storage and delivery for its customers. Approximately 40% of the total facilities subject to FRR are managed by Reclamation's water partners. These partnerships create significant operational efficiencies but will also require close coordination to effectively utilize available Federal and non-Federal resources needed to achieve the stated goal.

Bureau Reporting	Supporting Performance Measures	2013 Actual	2018 Goal
BOR	Percent of water infrastructure in good condition as measured by the Facility Reliability Rating.	274 facilities rated in good condition (79%)	275 facilities rated in good condition (79%)

STRATEGY #2 Better ensure the future of watersheds against the impacts of climate change

The BOR is currently conducting assessments of existing and future water supply demand imbalances in watersheds within its 17 Western States through Basin Studies and Impact Assessments. When completed, these studies will analyze the risks and impacts of climate change to water resources and identify actions to adapt to the potential effects of climate change. To address projected imbalances in supply and demand, the studies identify adaptation strategies, including strategies for non-structural and structural changes. A wide range of Federal and non-Federal stakeholders participate in the basin studies, which are selected through a competitive process using established criteria.

Bureau Reporting	Supporting Performance Measures	2013 Actual	2018 Goal
BOR	Percent of basin studies that have been completed.	4 basin studies completed (20%)	17 basin studies completed (89%)

GOAL #2 Extend the Supply of Water through Conservation

STRATEGY #1 Expand Water Conservation Capabilities

The American West is now the fastest growing region of the Country and faces serious water challenges. Competition for finite water supplies is increasing as a result of population growth, agricultural demands, and water for environmental needs. An increased emphasis on domestic energy development will place additional pressure on limited water supplies, as significant amounts of water may be required for unconventional and renewable energy development.

Impacts of climate change, as evidenced by increases in temperature, decreases in precipitation and snowpack, extended droughts, and depleted aquifers and stream flow in several Reclamation river basins are reducing water supplies. Water is vital for the environment and the economies of rural and urban communities in the west. The DOI will “increase” water supplies through BOR’s Priority Goal conservation programs.

Office Reporting	Supporting Performance Measures	2013 Actual	2018 Goal
BOR	Acre feet of water conservation capacity enabled through Reclamation’s Priority Goal conservation programs. (b)(5)	734,851 acre-feet of water conservation capacity grants approved	1,000,000 acre-feet of water conservation capacity grants approved

GOAL #3 Availability of Water to Tribal Communities

STRATEGY #1: Protection of tribal water rights

The BIA water program functions are divided into two distinct but overlapping elements. The Water Rights Negotiation/Litigation Program defines and protects Indian water rights and settles claims through negotiations if possible, or alternatively, through litigation. The Water Management Program assists tribes in managing, conserving, and utilizing trust water resources.

Bureau Reporting	Supporting Performance Measures	2013 Actual	2018 Goal
BIA	Annual percent of projects completed in support of water management, planning and pre-development	36 projects completed (39%)	71 projects completed (77%)

STRATEGY #2 Improve infrastructure and operational efficiency of tribal water facilities

The BIA Irrigation, Power and Safety of Dams program operates and manages irrigation, power, and dam infrastructure. The program sets high standards for maintenance, collaboration with stakeholders, and effective water and power distribution. The BIA manages facilities to ensure they do not present an unacceptable risk to downstream lives and property; and are managed in an economically, technically, environmentally, and culturally sound manner.

Bureau Reporting	Supporting Performance Measures	2013 Actual	2018 Goal
BIA	Number of linear miles of functional BIA irrigation project canals servicing irrigated lands.	3,927 linear miles of irrigation canals	4,570 linear miles of irrigation canals
(b)(5)			

MISSION AREA 6 BUILDING A LANDSCAPE-LEVEL UNDERSTANDING OF OUR RESOURCES

To effectively carry out its mission, the Department of the Interior must understand and make decisions at the landscape-level. Decisions affecting the siting of energy development, water resource management, recreation, the conservation of habitat for sensitive flora and fauna, the identification of transmission line rights-of-way, mitigation for development activities, and other land uses are increasingly interconnected with one another on an ever changing, climate-impacted landscape.

The Department conducts science to inform these decisions; develops tools to analyze, visualize, translate, and extrapolate science; and is leading efforts to apply it at multiple scales and across multiple landscapes and jurisdictions to inform land and resource planning, policy, mitigation, and management. Additionally, as the managing partner for the Geospatial Platform, DOI can leverage 21st Century Geographic Information System (GIS) tools to transform vast amounts of data regarding our landscapes and resources into useful information to inform decisions about powering our future and ensuring healthy landscapes and sustainable supplies of water.

GOAL #1 Provide Shared Landscape-level Management and Planning Tools

Harnessing emerging technologies, tools, and methodologies, DOI works with partners to elevate understanding of resources on a landscape-level. The DOI will leverage these partnerships and its role as the managing partner for the National Geospatial Platform to turn vast amounts of data into usable information and advance broader based and more consistent landscape and resource management.

STRATEGY #1 Ensure the use of landscape-level capabilities and mitigation actions.

Landscape-level approaches to management hold the promise of a broader-based and more consistent consideration of both development and conservation, as opposed to a piecemeal approach. Over the last few decades, ecologists and conservationists have increasingly worked at larger geographic scales to improve their ability to characterize and combat complex threats and stressors such as habitat fragmentation and human population growth. When conservation is planned for and carried out at these larger scales, it is often easier to detect ecological patterns and population dynamics than with conservation undertaken within smaller units of habitat, improving the ability of conservationists to address limiting factors and achieve long-term benefits to species. The rigorous science underlying our landscape-scale databases, tools, and methodologies provides the foundation for a new generation of citizen scientists, professional experts, and organizations to better understand and care for our landscapes. By improving coordination with partner agencies, a landscape-level understanding of resources will be available for these needs.

Strong science based evidence will allow DOI to make strategic decisions relative to conservation priorities and maximize our conservation investments to achieve the best possible outcomes, while learning from our experience and new evidence on changing conditions. Changes in ecosystems and habitats in the face of changing climatic conditions require that future conservation strategies include vulnerability assessments, scenario planning, and explicit statements of expected biological outcomes. This information can be used to identify conservation targets and objectives that best represent our desired outcomes and then to develop landscape conservation designs, long-term strategies, and forward-looking resource management decisions to achieve them. Implementation occurs using a collection of tools and methodologies including the Geospatial Platform, Landscape Conservation Cooperatives,

Climate Science Centers, (b)(5)

(b)(5)

Mapping and imagery tools facilitate sound planning and management, ensuring the functionality of entire ecosystems, the resiliency of species and the predictability of decisions for industry. The Geospatial Platform offers an Internet-based tool for sharing trusted geospatial data. It provides services and applications for use by the public, government agencies, and partners to meet their mission needs. This resource facilitates landscape-level planning by providing a platform for integrated data from Federal and non-Federal partners (e.g., universities, private organizations, and tribal, state, and local governments). By centralizing such critical inputs as habitat characteristics, risk vulnerabilities, mineral resources, energy potential, conservation priorities, cultural resources, water resources, surface elevation, and property ownership, these tools will provide policy and decision makers from Federal and state governments, local communities, businesses, and non-profit organizations with reliable, transparent, science-based information to effectively manage the resources and enable integrated early analysis in a programmatic way.

The National Map, a collection of geospatial data of the Nation's topography, natural landscape and built environment is also available. Updating high-resolution geospatial databases such as surface water and elevation data and topographic map images on a 3 year cycle supports public purposes such as resource management, climate and environment, infrastructure and human services, energy, disaster response, and public safety.

Bureau Reporting	Supporting Performance Measures	2013 Actual	2018 Goal
USGS	Number of communities on the Geospatial Platform that provide information relevant to landscape level decision making.	NEW	TBD
USGS, OSMRE	Number of tools registered on the Geospatial Platform that can be used to support landscape level decision making.	NEW	TBD
FWS, NPS	Number of landscape conservation designs available to inform management decisions	NEW	TBD
FWS	(b)(5)	NEW	TBD
FWS, BLM, BOR, OSMRE, BOEM, BIA	Number of landscape-level mitigation strategies and actions that provide for the conservation of natural resources occurring before, during, or after development activities.	NEW	TBD
USGS	Percent of the lower 48 states, Hawaii, District of Columbia, and Puerto Rico published as high resolution geospatial databases.	35,789 topographic map cells published (67%)	38,652 topographic map cells published (72%)

GOAL #2 Provide Science to Understand, Model, and Predict Ecosystem, Climate, and Land Use changes at targeted and landscape-levels (biota, land cover, and Earth and ocean systems)

We will support scientific research to assess, understand, model, and forecast the impacts of climate change and other environmental drivers on our ecosystems, natural resources, and communities. Our Bureaus will develop and construct strategies for adapting to climate change based on

scientific analysis. The DOI will assist Federal, state, local, and tribal entities by monitoring water quality and quantity; analyzing energy and mineral resources potential and environmental effects of their extraction and use; and analyzing and monitoring changes to the land and ocean environments.

STRATEGY #1 Identify and predict ecosystem and land use change

The DOI will conduct ongoing research to support and inform decisions related to ecological systems for land, water, and fish and wildlife population management. Climate and land use changes are the key drivers of changes in ecosystems, and strategies for protecting climate-sensitive ecosystems will be increasingly important. The USGS uses satellite data such as Landsat to detect, analyze, and monitor changes on the land, study the connections between people and the land, and provide society with relevant science information to inform public decisions. These data are necessary to provide a baseline composite of the characteristics and geographic variability of land cover, such as seen in the National Land Cover Database. Terrestrial and aquatic populations and their habitats are studied to understand their condition and function within ecosystems and provide information to improve management and conservation actions. Managing and protecting the biological and physical components that support ecosystem services and processes is a priority of the DOI, especially as it relates to the impacts of climate change.

Bureau Reporting	Supporting Performance Measures	2013 Actual	2018 Goal
USGS	Percent of targeted fish and aquatic populations and their habitats for which information is available regarding limiting factors such as migratory barriers, habitat, and effects of disturbance (fire, flood, nutrient enhancement).	51 of 118 fish and aquatic populations supported (43%)	60 of 118 fish and aquatic populations supported (51%)
USGS	Percent of targeted wildlife populations for which science information is provided for management decision making to inform and improve conservation.	216 of 354 wildlife populations supported (61%)	240 of 354 wildlife populations supported (67%)
USGS	Percent of targeted species for which monitoring and decision support information on their status and trends are available.	187 of 645 species supported (29%)	190 of 645 species supported (29%)
USGS	Percent of critical science information products available for successful control and management of targeted groups of invasive species.	27 of 60 critical science information products (45%)	30 of 60 critical science information products (50%)
USGS	Percent of targeted ecosystems with information products forecasting ecosystem change.	3 of 9 ecosystems supported (33%)	5 of 9 ecosystems supported (56%)
USGS	Percent of U.S. surface area with contemporary land cover data needed for major environmental monitoring and assessment programs.	354 total path/rows from 2011 dataset complete (78%)	377 total path/rows from 2016 dataset complete (83%)

STRATEGY #2 Assess and forecast climate change and its effects

The extent to which U.S. communities and ecosystems may be affected by climate change will depend on the nature of the impacts and the sensitivity of the ecosystem to the changes. Successful adaptation to climate change will depend on access to a variety of options for effective management responses. The DOI will support research and monitoring initiatives of carbon, nitrogen, and water cycles, and their effects on ecosystems. The USGS will provide tools for managers to develop, implement, and test

adaptive strategies, reduce risk, and increase the potential for ecological systems to be self-sustaining, resilient, and adaptable to environmental changes. The DOI also considers the application of traditional knowledge when making decisions affecting tribal communities. The Department and the USGS strategies and measures align to achieve the goals of the Climate Action Plan.

The USGS will, through its existing scientific assets and the DOI Landscape Conservation Cooperatives and Climate Science Centers, implement partner-driven science to improve understanding of past and present land use change, develop relevant climate and land use forecasts, and identify lands, resources, and communities that are most vulnerable to adverse impacts of change from the local to global scale.

Bureau Reporting	Supporting Performance Measures	2013 Actual	2018 Goal
USGS	Number of natural resource and cultural habitat, population, or ecosystem models, assessments, or major datasets developed by scientists and in cooperation with land managers.	10 models, assessments, or datasets developed	20 models, assessments, or datasets developed
USGS	Percent of Climate Research & Development Program products cited/used within 3 years of publication.	354 R&D products cited/used within 3 years (94%)	354 R&D products cited/used within 3 years (94%)

GOAL #3 Provide Scientific Data to Protect, Instruct, and Inform Communities

We will support scientific research to improve the resilience of communities to natural hazards and wildlife diseases in order to preserve the quality of life and reduce the likelihood of fatalities and economic losses. The USGS will lead the scientific research on the environment and natural hazards and provide information to partners and stakeholders for use in making decisions that will protect lives.

STRATEGY #1 Monitor and assess natural hazards risk and resilience

The DOI's monitoring and assessments provide information and the scientific understanding that will help protect communities by significantly reducing the vulnerability of millions of people to natural hazards. For example, USGS, working with many partners, collects accurate and timely data from modern earth observation networks and surveys, analyzes those data to assess areas that are at risk due to natural hazards, and conducts focused research to improve hazard predictions.

Bureau Reporting	Supporting Performance Measures	2013 Actual	2018 Goal
USGS	Percent completion of earthquake and volcano hazard assessments for moderate to high hazard areas.	76 assessments completed (38%)	80 assessments completed (40%)
USGS	Percent implementation of optimal earthquake and volcano monitoring for moderate to high hazard areas.	68 measurement sets completed (34%)	78 measurement sets completed (39%)
USGS	Percent of regional and topical ocean and coastal studies that cite USGS products within 3 years of study completion.	20 studies cited (80%)	20 studies cited (80%)

STRATEGY #2 Provide environmental health science to guide decisionmaking

Human health is often related to the health of the environment and wildlife. The emergence of diseases from exposure to environmental contaminants and diseases transferred between animals and humans is a

growing concern. The DOI is taking a leadership role in providing the natural science information needed by health researchers, policy makers, and the public to safeguard public health by monitoring the quality of the environment and wildlife disease reservoirs, by identifying emerging environmental quality concerns and emerging threats from disease transmitted from animals to humans, and by providing critical knowledge that helps guide actions to manage, mitigate, and prevent adverse impacts on the environment, wildlife, and human health.

Bureau Reporting	Supporting Performance Measures	2013 Actual	2018 Goal
USGS	Number of knowledge products on the quality and health of the environment that inform the public and decision makers.	224 products produced (80%)	238 products produced (85%)

GOAL #4 Provide Water and Land Data to Customers

The Department, through USGS, will lead the effort to provide water and land data to customers for their various uses. The USGS will gather and present data at targeted and landscape-levels to advance and refine our understanding of the earth and its geologic and ecologic systems. Three dimensional models of ground water aquifers and energy and mineral deposits in the subsurface will be generated to help identify prospective areas for exploration and utilization. We will produce vegetation maps and data to support and inform risk management of wildland fires, wildlife, and other natural resources. We will deliver high resolution geospatial databases and topographic map images to support public purposes and enhance resource management.

STRATEGY #1 Monitor and assess water availability and quality

The Nation faces an increasing set of water resource challenges. The DOI will continue to monitor and conduct research to generate a more precise estimate of water availability and use for meeting current and future human, environmental, and wildlife requirements. These research and monitoring activities will help identify water resources for use by humans and the environment while also developing tools to forecast likely outcomes for landscape-level planning needs including water use and quality, and aquatic ecosystem health affected by changes in land use and land cover, natural and engineered infrastructure, water use, and climate. State and local governments rely heavily on the monitoring data that is provided by USGS monitoring systems that operate across the Country.

Bureau Reporting	Supporting Performance Measures	2013 Actual	2018 Goal
USGS	Percent of U.S. with current groundwater quality status and trends information.	1,369 well networks inspected (7%)	8,500 well networks inspected (45%)
USGS	Percent of U.S. with groundwater availability status and trends information.	8 studies completed (20%)	12 studies completed (20%)
USGS	Percent of U.S. with current streamwater quality status and trends information.	1,546 site visits (3%)	9,600 site visits (16%)
USGS	Percent of USGS planned streamgages that are fully operational by the National Streamflow Information Program.	446 streamgages fully operational (9%)	666 streamgages fully operational (14%)
USGS	Number of water monitoring sites supported jointly with state, local or tribal cooperators.	18,500 monitoring sites	19,425 monitoring sites
USGS	Percent of U.S. with completed, consistent water availability products.	none	1,056 water availability

			products (50%)
--	--	--	----------------

STRATEGY #2 Generate geologic maps

As the DOI's science arm, USGS produces accurate geologic maps and three-dimensional geologic frameworks that provide indispensable data for sustaining and improving the quality of life and economic vitality of the Nation. Geologic maps and research are foundational for exploring, developing, and preserving mineral, energy, and water resources; evaluating and planning for land management and environmental protection; supporting DOI's land management decisions, reducing losses from natural hazards, including earthquakes, volcanoes, landslides, and other ground failures; mitigating effects of coastal and stream erosion; placement of critical infrastructure and facilities; and conducting basic earth science research. The geologic maps and interpretive products produced through the USGS and its state partners are served through the National Geologic Map Database, which is an authoritative and landscape-level data source for the general public, scientists, and decision makers.

Bureau Reporting	Supporting Performance Measures	2013 Actual	2018 Goal
USGS	Percent of the U.S. that is covered by at least one geologic map available to the public through the National Geologic Map Database.	1,814,735 square miles covered by geologic maps (51%)	2,000,000 square miles covered by geologic maps (57%)

STRATEGY #3 Assess national and international energy and mineral resources

The Nation faces increasing demands for energy and mineral resources, particularly in light of concerns about our dependence on resources imported from other countries. The DOI's energy and mineral resources research, assessments, and information will improve our understanding of resource occurrence, distribution, quality, and supply and foster multidisciplinary analyses of the broad economic, environmental, and societal consequences of resource extraction and use. The outcomes of these activities will inform decision making with respect to such issues as natural resource protection, environmental health, economic vitality, and responsible resource management on DOI and other lands.

Bureau Reporting	Supporting Performance Measures	2013 Actual	2018 Goal
USGS	Number of times USGS Energy Resources Program products were (successfully) accessed online (millions)	4.8 million products accessed	5.5 million products accessed
USGS	Number of times USGS Mineral Resources Program products were (successfully) accessed online (millions)	20.5 million online hits to USGS products	22.5 million online hits to USGS products

**APPENDIX
MANAGEMENT
INITIATIVES**

BUILDING A 21ST CENTURY DEPARTMENT OF THE INTERIOR

The Department's vision for a 21st Century workforce is one that includes highly skilled and diverse staff reflective of the Nation and is effectively and efficiently managed. Attainment of the Department's strategic goals will be facilitated by the cross-cutting efforts that are highlighted here.

Goal #1 Build a 21st Century Workforce

The DOI's vision for a 21st Century includes a highly skilled and engaged workforce that reflects the diversity of the Nation and ensures that the Department achieves its mission area goals. Success will be assessed through the Best Places to Work rating that is based on the Federal Employee Viewpoint Survey. This measure is strategic and comprehensive and is a nationally recognized measure of the quality and satisfaction of the workforce.

Our organization meets the needs of the Nation, with a significant number of employees and volunteers at the local level and a variety of models for service delivery that are unique to DOI's 10 bureaus and multiple offices. Over 70,000 employees, plus a cadre of seasonal employees, and over 300,000 volunteers perform a spectrum of duties that require highly skilled individuals in unique disciplines able to conduct specialized activities such as firefighting, inspection of oil and gas operations, management of wild horse and burros, migratory bird aerial surveys, wildlife disease necropsy, and others.

The DOI benefits from a workforce that is passionate about the mission, dedicated to public service, highly skilled, and knowledgeable. A workforce, reflective of the diversity of the Nation, is the Department's greatest asset. Differences in background, thought, education, and experience contribute to the varied perspectives in the workplace and create a synergy for higher performance and success in the achievement of DOI's mission goals. The DOI is challenged by factors which include an aging workforce, need for technology, requirement to transfer knowledge, and improving workforce management and planning. The Department is focused on improvement in these key areas through strengthening human capital processes and tools and strategies that can be utilized at all levels of the Agency to ensure the growth and sustainment of a 21st Century workforce. This includes knowledge of current and future workforce requirements, marketing and branding to attract skilled talent at all levels, and ensuring employees are proficient to perform their jobs and managers and employees have the tools and resources required to be successful in supporting the Department's mission.

Strategies for achieving this Goal are outlined in the Department's Human Capital Plan as well as in supporting documents at the Agency and bureau level.

Office Reporting	Supporting Performance Measures	2013 Actual	2018 Target
PHR	Improvement in the National Best Places to Work Rating (Partnership for Public Service), as compared to the 2012 baseline.	Index Score = 59	Index Score = 64

Goal #2 Sustainability of Interior's Operations

The DOI completed its fourth Strategic Sustainability Performance Plan in 2013, mapping out strategies to reduce its environmental footprint with a goal to integrate sustainable practices into day-to-day operations and more effectively utilize resources and protect the environment.

The DOI is complying with the requirements of *Executive Order 13514, Federal Leadership in Environmental, Energy, and Economic Performance* by aligning sustainability goals with mission goals and focusing on strategies to reduce greenhouse gas emissions, build and rehabilitate facilities based upon

sustainability principles, and reduce water consumption. The Department's Sustainability Council links the efforts of employees with those of senior management to modify policies and practices for best results such as cooperative efforts (e.g., inviting employees to submit their ideas for improving sustainable practices) that will foster an inclusive and transparent process to promote sustainability.

Offices Reporting	Supporting Performance Measures	2013 Actual	2018 Target
PEP/PAM	Reduction in direct and indirect GHG emissions from sources that are owned or controlled by DOI and from consumption of purchased electricity, heat or steam (i.e. 20% reduction in Scope 1 and 2 GHG emissions by 2020)*	-18.2%	-16%
PEP/PFM	Reduction in indirect GHG emissions from sources including transmission and distribution losses, business travel, employee commuting, contracted wastewater treatment and contracted solid waste disposal (i.e. 9% reduction in Scope 3 GHG emissions by 2020)*	- 18.1%(E)	-20%

*Cross Agency Priority Goals

Goal #3 Dependability and Efficiency of Information Technology

Information technology is a key tool that supports the accomplishment of mission goals; technology can significantly advance the effectiveness and efficiency of programs and help employees to be more productive. Information technology can also help DOI to address increasingly complex challenges in managing a large and geographically dispersed organization. The DOI's vision is developing and providing the right mix of information technology products and services at a lower cost while delivering greater service to employees and customers.

The DOI is implementing a series of technology innovations and efficiencies to deliver improved services at a lower cost, including consolidation of infrastructure and shifting commodity technology services from in-house delivery mechanisms to capable external providers. These efforts will yield benefits in improved sustainability, reduced carbon footprint, and energy and efficiency savings.

Office Reporting	Supporting Performance Measures	2013 Actual	2018 Target
(b)(5)	Percentage of the 95 DOI committed data centers consolidated.*	62% (59 consolidated / 95 data centers)	100%

(b)(5)

Goal #4 Improve Acquisition and Real Property Management

The Department relies on the skills and services of the private sector for effective mission delivery, with approximately \$4 billion expended annually for contracted goods and services. Over 50 percent of the Department's annual prime contract awards are made to small businesses. The mission goals of the Department are significantly advanced through effective management of contracts in a manner that reduces risk, and achieves desired results that cost less. Through a combination of innovative procurement methods, the Department is focused on the achievement of goals that will leverage purchasing power, promote efficient business practices, and focus on development and retention of a skilled acquisition workforce.

The Department of the Interior's real property portfolio includes approximately 43,000 buildings and 75,000 structures, valued at more than \$240 billion, as well as nearly every type of asset found in a local community. Interior's assets are treasured for their cultural and historic significance; scenic, recreational, and environmental values; functional purposes like hydroelectric power and water management; and in some cases the revenues they provide. The Department's asset management program focuses on appropriate stewardship, maintenance, and capital investment for these assets in support of mission goals.

Program achievements are tracked utilizing both industry standard performance metrics and through initiatives to promote cost savings and the effective operation and management of facilities, such as space consolidation and the disposal of excess assets.

Office Reporting	Supporting Performance Measures	2013 Actual	2018 Target
PAM	Percentage of actions processed through existing contract sources (includes Federal Supply Schedule, Government-wide Acquisition Contracts, Indefinite Delivery Vehicles, and Blanket Purchase Agreements).	44%	44%
PAM	Percentage of acquisitions for IT hardware and land mobile radios made through Department-wide strategic sourcing vehicles.*	NEW	95%
PAM	Percent change from FY 2012 square footage baseline for buildings predominantly used as Offices and Warehouses	1.5% (E)	4.5%
PAM	Overall condition of buildings and structures, that are mission critical (based on the Asset Priority Index (API), as measured by the Facility Condition Index (FCI)	0.038	0.035

*Cross Agency Priority Goal

Goal #5 Promote Small and Disadvantaged Business

The DOI promotes small and disadvantaged businesses in the execution of \$4 billion in annual contract awards, and awards over 50 percent of its prime contract awards to small businesses annually. . The DOI's program managers, acquisition specialists, and small business advocates promote the use of small businesses; conduct outreach with small businesses to inform them of upcoming contracting opportunities; and provide advice and counseling about the contracting process.

Office Reporting	Supporting Performance Measures	2013 Actual	2018 Target
PSD	Percentage of total prime contract awards made to small businesses.*	53%	60%

LAST LAUGHS:

- + Late Night Political Humor.

DOI in the News:

SHELL TO SUSPEND ARCTIC OIL EXPLORATION. The Washington Post (1/30, Mufson, 4.28M) reports Royal Dutch Shell says that, "despite having made extensive preparations with upgraded rigs and support vessels," it doesn't plan to drill in Alaska's Arctic waters this year. Shell spokesman Curtis Smith "blamed 'uncertainty'" stemming from a 9th Circuit Court of Appeals decision that the Post says challenged the validity of the lease sale in the Chukchi Sea. However, some analysts say the move is consistent with new CEO Ben van Beurden's plans to invest in projects with more immediate payoffs following recent setbacks that caused the company to write down projects' values.

The Wall Street Journal (1/31, Scheck, Subscription Publication, 5.91M) reports that van Beurden says he's moving the company from a focus on increasing production to cost reduction. He added that, after the court's ruling that the Federal government used inadequate information to award exploration licenses for the Arctic, "The lack of a clear path forward means that I am not prepared to commit further resources for drilling in Alaska in 2014."

The Los Angeles Times (1/30, Vartabedian, 3.07M) notes that Shell has suffered "enormous technical and weather-related problems" over the past few years of Arctic oil exploration.

The AP (1/31, Sterling) casts the announcement as "a setback" to the "rush" to discover reserves in the arctic, adding that "Shell's troubles may indicate that the difficulties outweigh the potential economic benefits" of drilling in Arctic waters.

The FuelFix (1/30, Dlouhy, 7K) reports the company's move "effectively removes some heat from the politically sensitive issue of Arctic drilling during a midterm election year."

McClatchy (1/31, Cockerham, 95K) reports that "environmental groups hailed Shell's decision to suspend the

effort." Meanwhile, Sen. Lisa Murkowski said "she was disappointed that Shell wouldn't be going ahead this year." Sen. Mark Begich "blamed 'judicial overreach' for the situation." Begich said, "I'll be talking with Interior Secretary Sally Jewell today, and expect her agency to move quickly to address the court's questions and concerns and do everything possible to get this process back on track." Coverage by McClatchy was also picked up by the Chicago Tribune (1/30, Cockerham, 2.32M) and the Everett (WA) Herald (1/30, 152K).

For the Los Angeles Times (1/30, Martelle, 3.07M), Scott Martelle writes that "Shell's decision to give up on Arctic Ocean oil drilling for 2014 is good news for the environment." He notes that "Shell announced Thursday that it was scrapping plans to drill this year after a Jan. 22 ruling by the U.S. 9th Circuit Court of Appeals, which said the government violated the law when it opened the Arctic to drilling in the first place." According to Martelle, "though the decision doesn't preclude Shell and other oil companies from ultimately drilling on leases they bought from the federal government, maybe the court's ruling will lead the Obama administration to revisit its head-scratching conclusion that such efforts are safe."

Also covering this story are Bloomberg News (1/30, Swint, 1.91M), Reuters (1/31), the National Journal (1/31, Geman, Subscription Publication, 427K), the AP (1/31), the Environment & Energy Publishing (1/31, 705), the FuelFix (1/30, 7K), CNN (1/30, Smith, 14.53M), the Seattle Post-Intelligencer (1/30, 768K), the Alaska Journal of Commerce (1/31, 14K), the Anchorage (AK) Daily News (1/30, 198K), the Alaska Business Monthly (1/31), the Alaska Business Monthly (1/31), Yahoo! Finance (UK and Ireland) (1/31, 5K), the Oil and Gas Journal (1/31, 1K), the Rigzone (1/31, 12K), the Marine Link (1/31, 1K), and the Pipeline Magazine (ARE) (1/31).

GROUP PRESSES SECRETARY JEWELL ON CLIMATE ACTIONS, METHANE LEAKS. *Politico* (1/31, Guillen, 464K) reports that Interior Secretary Sally Jewell "needs to do more than her predecessors to tackle climate change, make oil and gas drilling safer and mitigate the impacts of development, the Center for Western Priorities says in a report out today making recommendations for Jewell's tenure." The group "recommends she increase onshore oil and gas royalty rates, utilize more master leading plans on federal lands, write rules for oil and gas producers on plugging methane leaks and give more protections to certain conservation areas."

BUSINESS, ENERGY COALITION TO CAMPAIGN AGAINST ADMINISTRATION'S CLIMATE ACTION PLAN.

The Washington Post (1/30, Eilperin, 4.28M) reports in its "Post Politics" blog, on the Partnership for a Better Energy Future and its aim to campaign against the Obama Administration's climate action plan. The coalition of energy, business and farm advocates which includes the US Chamber of Commerce's Institute for 21st Century Energy along with 77 other organizations, said in a news release that "it will present 'a unified strategy and message' in order to combat upcoming greenhouse gas regulations." National Association of Manufacturers spokesman Jamie Hennigan said that "members of the coalition collectively plan to dedicate millions of dollars towards this issue."

Reuters (1/31, Volcovici) reports that the coalition is led by NAM and the US Chamber of Commerce's Institute for 21st Century Energy and it plans to lobby lawmakers at all levels while educating the public on the regulations consequences on the economy. Institute for 21st Century Energy president and CEO Karen Harbert said the coalition will allow for a nationwide effort that is amplified and unified as there will be focus via grassroots networks and in Washington.

The Hill (1/30, Goad, 194K) reports in its "E2 Wire" blog that Harbert said that the coalition has "agreed to dedicate necessary resources to 'vigorously participate' in every facet of President Obama's effort to tackle climate change through regulation." "We plan to be present every step of the way," she said, adding, "We do this because we want a better outcome . . . Not because we want to throw obstacles in the way."

The Indianapolis Star (1/31, Groppe, 603K) quotes Harbert as saying, "We will block anything that is not in the interest of the American economy." Harbert "said the coalition will try to influence the regulatory process and seek congressional intervention" and will resort to litigation if necessary. "There's always the ultimate end game of litigation," she said, "There's not a tool that is off the table."

Environmental Groups Criticize Administration On Global Warming. The AP (1/31, Cappiello, 1.26M) reports that the President's State of the Union address shows that he is "sticking to a fossil-fuel dependent energy policy," and so rejecting "a monthslong, behind-the-scenes effort by nearly every major environmental group to convince the White House that the policy is at odds with his goals on global warming." The groups argue

that there is "a contradiction in increased American production of energy from oil and natural gas at the same time the government is attempting to reduce the pollution blamed for global warming." A letter sent to the White House January 16 is being seen as a significant change in the public stance of the groups, now said to be "united" as well as being "sharply critical" of the Administration. Leaders of various environmental groups are quoted criticizing the Administration.

UTAH GOV HERBERT ASSERTS STATE SOVEREIGNTY DURING STATE OF THE STATE ADDRESS. The St. George (UT) News (1/30, 3K) reports that during the State of the State address Wednesday, Gov. Gary Herbert identified "three primary challenges" facing Utah: growth, asserting state sovereignty, and expanding the economy. On the topic of state sovereignty, Herbert "touched on public lands." He said, "More effective management of our public lands is also critical to our state. At no time was this more evident than during the federal government shutdown. Our national parks were closed, tourists were turned away and the livelihoods of Utah business owners were put in peril. Yet we were told by many in Washington there was nothing we could do to solve this problem." Herbert continued, "We do a lot of things well in Utah, but 'doing nothing' is not one of them. I was determined to open the parks, and I told Interior Secretary Sally Jewel we simply had to find a way -- and that's exactly what we did. It took a little common sense and a lot of hard work. It took people of good will, including Representative Brad Dee, and legislators on both sides of the aisle working together to find the solution. ... As the opening of our national parks proved, Utah is in the best position to optimize the use of our public lands."

Additional coverage was provided by KCSG-TV St. George, UT (1/31, 43).

ADDITIONAL COVERAGE: INTERIOR APOLOGIZES FOR CLOSED MEETING ABOUT SAGE GROUSE.

Additional coverage of Interior's "letter of regret over miscommunications that led to Craig Daily Press reporter Erin Fenner twice being asked to leave" while Interior Secretary Sally Jewell "met with Gov. John Hickenlooper, Moffat County commissioners and other officials on Jan. 22" was provided by the AP (1/31), which was picked up by the Washington Times (1/31, 417K), the Columbus (IN) Republic (1/31, 80K), and KGWN-TV Cheyenne, WY (1/31, 519).

The Loveland (CO) Reporter-Herald (1/31, 52K) editorializes that it is not Jewell "who broke the law." Rather, "it was the county commissioners," because "they are the ones bound by statute to conduct their business in public, and they failed to do so." According to the paper, if elected officials "are being told a federal official will not meet with them unless it's private, their choice is clear: they must avoid the meeting." The paper concludes that "it's unfortunate the public was denied observation of important public policy issues," and "it's more unfortunate that it was their federal government who had the hand that pulled the curtain on the window of transparency."

America's Great Outdoors:

National Park Service:

NEW MEXICO PROPOSES SALE OF NATIONAL HISTORIC LANDMARK. The AP (1/31) reports that "a Western outpost made famous by the Buffalo Soldiers and the US military's campaign to capture Geronimo is up for sale, one of a number of landmarks nationwide facing the wrecking ball amid tight budgets and a shift in Washington about what history is worth saving." According to the article, "Fort Bayard has become a drain on New Mexico's coffers and the state is desperate for ideas as historic preservation has lost funding under the Obama administration." The article notes that "historic preservation was championed during the Clinton and Bush years, first with Hillary Clinton's founding of the Save America's Treasures program and later through Laura Bush's support for a program focused on preserving the country's cultural and natural heritage." But the Obama Administration "pointed to the two programs for elimination in 2010, saying the benefits were unclear."

AP coverage was also picked up by the Washington Times (1/31, Bryan, 417K).

DOG OWNERS CRITICIZE GOLDEN GATE NATIONAL RECREATION AREA RESTRICTIONS. The San Francisco Chronicle (1/31, Jones, 2.88M) reports that "the Bay Area's dogs should not see their off-leash zones shrunken to benefit birds and other wildlife in the Golden Gate National Recreation Area, an overflow crowd of about 120 dog owners told park officials Thursday morning." Rep. Jackie Speier "hosted the forum at the Stem

Grove clubhouse for the public to sound off on the National Park Service's plan to restrict dogs in the park, which spans 18,000 acres along the San Mateo, San Francisco and Marin county coasts." Martha Walters of the Crissy Field Dog Group, one of the panelists at Thursday's event, said, "Everyone needs socialization and exercise. Being able to run freely, it's called having a healthy dog and a healthy human. For a lot of us, dogs are the fabric of our families, and we want to treat them well."

NPS WORKS FOR HISTORIC PRESERVATION. For "The Blog" of the [Huffington Post](#) (1/31, 11.54M), the National Trust for Historic Preservation offers a "primer" on "who does what in the preservation world." For the NPS, the trust says that "parks and sites are only the tip of the iceberg when it comes to the Park Service's work in preservation." The agency is also "responsible for the National Register of Historic Places, preservation grant programs, the certification program for federal historic tax incentives, and management of the certified local government program (more on this last one later)."

WOLF-WATCHING IN YELLOWSTONE NATIONAL PARK TOUTED. For the "Travel" section of the [Washington Post](#) (1/31, Mishev, 4.28M), Dina Mishev, the editor in chief of Jackson Hole magazine, writes about the "wonders" of wolf-watching in Yellowstone National Park Mishev "saw pups playing, the pack feeding on an unidentified carcass and even the alpha pair mating." The experience left Mishev "addicted."

Bureau of Land Management:

ENVIRONMENTAL GROUPS LINE UP AGAINST OREGON LOGGING BILL. The [AP](#) (1/31) reports that "environmental groups are lining up against Sen. Ron Wyden's bill to promote logging on federal forests in Western Oregon to help struggling timber counties." According to the article, "leaders from 10 national environmental groups, including the Sierra Club and Natural Resources Defense Council, signed a letter urging members of the Senate to oppose the bill." The groups "say its measures to streamline environmental reviews threaten the foundations of laws like the Endangered Species Act."

BLM TO FURTHER ANALYZE 16 PARCELS. The [Albuquerque \(NM\) Journal](#) (1/31, 288K) reports that the BLM is "deferring for further analysis 16 parcels nominated for oil and gas leasing in eastern Rio Arriba County, totalling about 13,300 acres of federal mineral estate near Cebolla." This move "follows an information gathering by the BLM and its cooperators to understand potential conflicts, including a 45-day public scoping period."

NEW MEXICO PANEL SUPPORTS STUDY ON BID TO ACQUIRE BLM LANDS. The [Albuquerque \(NM\) Journal](#) (1/31, 288K) reports "the State Land Office's request for \$250,000 to study whether it makes sense for New Mexico to acquire federal lands as a moneymaker for education was endorsed Thursday by a Senate committee." The Conservation Committee "unanimously approved the bill sought by Land Commissioner Ray Powell, sending it next to the Finance Committee."

BLM FINING HIKERS WHO IGNORE LAND CLOSURES. The [AP](#) (1/31) reports that BLM rangers are "issuing \$275 tickets to people who break the rules by entering winter refuges for mule deer and elk around Durango, saying it's interfering with the animals feeding habits." According to the AP, "the low-elevation areas are closed to the public in the winter to give elk and mule deer alternatives to find food when they come down from heavy snow in the highlands." BLM spokeswoman Shannon Borders said Wednesday that "better weather is bringing more people outdoors, but the rules still stand."

Coverage by the AP was also picked up by the [Denver Post](#) (1/31, 949K). Also reporting on the story is the [Durango \(CO\) Herald](#) (1/29, 28K).

Fish and Wildlife Service:

COUNCIL ADVISES MONTANA TO LIMIT DEVELOPMENT IN SAGE GROUSE HABITAT. The [AP](#) (1/31) reports that "a governor's council recommends Montana restrict new development in sage grouse habitat to avoid federal protections that would lead to tighter rules." The Greater Sage Grouse Advisory Council "outlined its recommendations in a 73-page report given to the governor on Wednesday." According to the article, "the groups' recommendations include a 'no surface occupancy' zone within one mile of active sage grouse breeding grounds and a quarter-mile buffer zone in less critical habitat." The council also "recommended the state fund a program

to give landowners incentives for habitat conservation and that state firefighting crews make immediate suppression of wildfires a priority in sage grouse habitat.”

AP coverage was also picked up by the Washington Times (1/31, 417K), the Rapid City (SD) Journal (1/31, 103K), and the San Jose (CA) Mercury News (1/31, 731K).

SPACE X IDENTIFIES TEXAS CITY AS FINALIST FOR ORBITAL LAUNCH SITE. NPR (1/31, Burnett, 465K) reports that “the space company SpaceX has identified a remote spot on the southern tip of Texas as its finalist for construction of the world’s newest commercial orbital launch site.” However, the NPS is “concerned that rocket launches will disturb the “viewshed” of nearby Palmito Ranch Battlefield, the site of the last land battle of the Civil War.” Also, the FWS “owns a wildlife refuge on the fence line of the proposed launch site.” FWS spokesperson Lesli Gray said “the tidal flats, thorn scrub and adjacent Gulf waters are home to 10 endangered species, including the ocelot and the aplomado falcon and Kemp’s Ridley sea turtle. We obviously are looking at what the potential impacts are, and we’ve been working with SpaceX to minimize any impact from the SpaceX facility being there.”

Securing America’s Energy Future:

Renewable Energy:

NEW LAWS BOOST HYDROPOWER. The Bloomberg BNA (1/31, 7K) reports that “a pair of bills signed by President Barack Obama to streamline the approval process for small hydropower facilities has led to an increase in project investment and calls by proponents for more legislative fixes.” According to Matt Nocella, assistant manager of strategic communication for the National Hydropower Association, “the Hydropower Regulatory Efficiency Act (P. L. 113-23) and the Bureau of Reclamation Small Conduit Hydropower Development and Rural Jobs Act (P. L. 113-24) will speed up the approval process for small hydropower projects, which typically can involve dozens of state and federal agencies and take up to five years.” However, “a conservation group has warned the industry against assuming the new laws indicate broad public support for all new hydropower, regardless of impacts.”

WIND ENERGY CONSTRUCTION AT ALL-TIME HIGH, BUT FUTURE MAY DEPEND ON RENEWING TAX CREDIT. Bloomberg News (1/31, Martin, 1.91M) reports that according to the American Wind Energy Association (AWEA), “more than 12,000 megawatts of U.S. wind farms were under construction at the end of 2013,” yet just 1,084 megawatts were put online last year, which was attributed to a “halt” in construction due to Congress having “let the production tax credit lapse briefly at the start of last year.” In 2012, 13,131 megawatts was brought online. Of the construction going at the end of 2013, 10,900 megawatts was started in the fourth quarter. The reason for that was that the tax credit applied to construction begun before the end of the year.

Gannett News Service (1/30, Doering, 7K) also reports that “wind energy construction in the United States is at an all-time high,” yet further construction “is uncertain” due to Congress’ failure so far to extend the production tax credit. AWEA CEO Tom Kieman said that a “stable tax policy” was necessary to “avoid the boom-bust cycle” and help the industry to “thrive.”

Onshore Energy Development:

PROTESTERS DEMAND BETTER ENFORCEMENT OF WEST VIRGINIA WATER QUALITY REGULATIONS. The Charleston (WV) Daily Mail (1/31, Constantino, 75K) reports that “a group of more than 50 demonstrators converged upon West Virginia Gov. Earl Ray Tomblin’s front office Thursday to deliver a petition asking for better enforcement of water quality regulations.” The West Virginia Citizen Action for Real Enforcement (CARE) Campaign “gathered more than 2,000 signatures from West Virginia residents,” and “the petition was given to Becky Neal, director of intergovernmental affairs for the Tomblin administration, and Senate President Jeff Kessler, D-Marshall.” Johanna de Graffenreid, coordinator for CARE, said, “It is requesting the Office of Surface Mining Reclamation and Enforcement intervene with the West Virginia Department of Environmental Protection mining program to ensure real enforcement of surface mining regulation and protect our communities and our clean drinking water.”

Offshore Energy Development:

ENVEN WORKING TO KILL WELL FLOWING OUT OF CONTROL OF LOUISIANA COAST. The AP (1/30) reports that the US Bureau of Safety and Environmental Enforcement said that the crew of an EnVen Energy Ventures "natural gas well being drilled off the Louisiana coast" was evacuated, and EnVen COO Jonathan Garrett said that "gas, water and sand are flowing," but that "gas is being vented off the rig while crews work to kill the well." The Coast Guard said that there was no "sheen" on the water.

The New Orleans Times-Picayune (1/31, Schleifstein, 700K) reports, "The well is located at Vermilion Block 356, about 108 miles south of Lafayette." The well was being drilled from the Rowan rig "Louisiana."

Bloomberg News (1/30, Wethe, Chediak, 1.91M) cites Garrett saying that "there has been no fire, explosion or oil spill," and no injuries have been reported. Garrett said, "We are circulating seawater to try to get it under control," adding, "We're very concerned about a fire and taking all the precautions we can to keep that from happening."

AP coverage was picked up by the Washington (DC) Times (1/31, 417K), Yahoo! (1/31, 17.91M), and ABC News (1/31, 3.68M). Also providing coverage are NBC News (1/31, 6.79M), the Lafayette (LA) Daily Advertiser (1/30, 111K), Rigzone (1/31, 12K), Marine Link (1/31, 1K), KATC-TV Lafayette (LA) Lafayette, LA (1/31, 16K), and KLFY-TV Lafayette (LA) Lafayette, LA (1/31, 6K).

PAPER WARNS PRESIDENT OBAMA'S SPEECH COULD UNNERVE ANWR OIL SUPPORTERS. The Fairbanks (AK) News-Miner (1/31, 44K) editorializes that President Obama's statement that he will use his "authority to protect more of our pristine federal lands for future generations" during his State of the Union speech "may have unnerved many development-minded Alaskans." According to the paper, the line "will most certainly raise alarm — and rightly so — among those who hope that Congress will someday authorize oil production in the coastal plain of the Arctic National Wildlife Refuge." The paper concludes that doing so would "be unfortunate for our state and for our energy-hungry nation."

Tackling America's Water Challenges:

CALIFORNIA DEALING WITH DROUGHT. The Huffington Post (1/30, 11.54M) reports that California is dealing with its "driest year since the state started measuring rainfall in 1849." The article notes that "Gov. Jerry Brown has declared an emergency, President Barack Obama has pledged his support, and state and federal officials are stepping in to protect the state's most vulnerable groups. Californians of various faiths have taken to holding prayer sessions, looking to the heavens for rain."

The Sacramento (CA) Bee (1/28, 749K) reports that "San Joaquin Valley congressional Republicans took aim this week and missed their stated goal of helping California cope with drought." Now, "having unsuccessfully tried a long-shot, last-minute farm bill maneuver, the GOP lawmakers are regrouping." According to the article, "their next steps are unclear, though some are certainly on the way."

Additional coverage of the drought was provided by the San Francisco Chronicle (1/31, Fimrite, 2.88M) and the San Luis Obispo (CA) Tribune (1/30, 126K).

BOR Decides To Give Westside Farmers Banked Water. The Merced (CA) Sun-Star (1/30, 86K) reports that the BOR has decided to give Westside farmers the water they had banked in San Luis Reservoir. However, BOR "leaders also had been considering seizing water now in Millerton Lake, another part of the federal Central Valley Project," and "no announcement has been made on that water."

The Imperial Valley (CA) News (1/31, 1K) reports that Sens. Dianne Feinstein and Barbara Boxer both "praised" the BOR "for its decision to preserve rescheduled water supplies that Central Valley Project farmers have banked as a hedge against dry conditions." Feinstein said, "I commend Reclamation Commissioner Michael Connor for his decision to preserve rescheduled water for CVP contractors who invested in additional supplies. With farmers already suffering from extraordinary drought conditions, it would be unfair to take away water they set aside at great expense and upon which they are depending to get through this year. I fully support Reclamation's decision to stand with these farmers." Boxer said, "I am so pleased that the Bureau of Reclamation has heeded our call

and honored its commitment to Central Valley Project contractors. These contractors prudently saved water during wetter years and today's announcement will ensure that they are able to use those resources as promised during this unprecedented drought."

The [Fresno \(CA\) Bee](#) (1/30, 327K) applauds the "display of the bipartisanship that is needed to keep our country moving forward." According to the paper, the "power of bipartisanship — three Democrats and three Republicans — signing their names to the same letter" pleading with BOR Commissioner Michael Connor carried "considerable weight."

Also reporting on the story are the [Hanford \(CA\) Sentinel](#) (1/31, 25K) and the [Southern California Public Radio](#) (1/30, 57K).

Additional Coverage Of Bay Delta Conservation Plan. The [Vacaville \(CA\) Reporter](#) (1/31, 57K) reports that Congressman John Garamendi has reaffirmed that "he's doing everything to stop the Bay Delta Conservation Plan that calls for constructing two very large tunnels in the Sacramento-San Joaquin River Delta to transfer water south."

BOR PROVIDES REPORT ON WATER SUPPLY CONDITIONS FOR CENTRAL VALLEY PROJECT. The [Red Bluff \(CA\) Daily News](#) (1/31, 20K) reports that "in preparation for the Bureau of Reclamation's initial water year 2014 water allocation announcement in late-February, Reclamation is providing information on water supply conditions for the federal Central Valley Project." According to the article, "the CVP's carryover storage from WY 2013 into WY 2014 was 5.1 million acre-feet, which is 43 percent of capacity and 75 percent of the 15-year average for Oct. 1 in six key CVP reservoirs Shasta, New Melones, Trinity, Folsom, Millerton and the federal portion of San Luis."

NEGOTIATORS NEAR SETTLEMENT ON LAWSUIT OVER TRINITY RIVER FISH HATCHERY OPERATIONS. The [Two Rivers Tribune](#) (1/31) reports that "a host of negotiators with a stake in Trinity River fish, including the Hoopa and Yurok Tribes, are reportedly close to settling a lawsuit over hatchery operations." The Environmental Protection Information Center (EPIC) sued the BOR, and the California Department of Fish and Wildlife over how the Trinity River Hatchery was being run. EPIC claimed that "the facility was being run without a Hatchery Genetic Management Plan (HGMP), which is a violation of Endangered Species Act (ESA) regulations." Gary Hughes, EPIC's executive director, said, "There was a settlement conference and the parties arrived at an agreement in principle. The terms were agreed on, but it still needs to be approved by the respective councils."

BOR OFFICIALS ATTEND IDAHO WATER USERS ASSOCIATION CONVENTION. The [Idaho Business Review](#) (1/30, 35K) reports that "the 77th annual convention and general meeting of the Idaho Water Users Association was Jan. 21-23 at the Riverside Hotel in Boise." The article notes that "the three-day gathering featured an array of speakers and panels examining a wide range of water and environmental topics," including BOR Commissioner Michael Connor and Lomi Lee, Pacific Northwest regional director for the BOR.

Empowering Native American Communities:

INTERIOR REACHES Land Buyback Agreements With Montana Tribes. The [AP](#) (1/31) reports that the Confederated Salish and Kootenai Tribes of Montana and the Northern Cheyenne Tribe have signed cooperative agreements as part of the Land Buy-Back Program for Tribal Nations. According to Chairman Ronald Trahan, on the Salish and Kootenai's Flathead Reservation, "tribal leaders plan to buy more than 38,000 acres of trust land." Northern Cheyenne President Llevando Fisher said "the program offers a chance to acquire property that will preserve the tribe's homeland for future generations." AP coverage was also picked up by the [Helena \(MT\) Independent Record](#) (1/31, 45K), the [Great Falls \(MT\) Tribune](#) (1/30, 90K), the [Flathead \(MT\) Beacon](#) (1/31, 15K), the [Montana Kaimin](#) (1/31, 11K), the [Seymour \(IN\) Times Tribune](#) (1/31, 31K), the [Kansas City \(MO\) Star](#) (1/30, 1.11M), and the [Miami Herald](#) (1/31, 806K).

The [Missoulian](#) (1/31, 104K) reports that the announcement of the agreements was made by Interior Secretary Sally Jewell. Jewell said "Interior intends to deliver purchase offers at the Flathead and Northern Cheyenne reservations later this year."

KPAX-TV Missoula, MT (1/31, 1K) reports that Jewell said, "We hope it's a catalyst for the tribes to sign on to help bring those resources that you have to bear – to reach out to members of your tribe no matter where they live."

An editor's comment for the Round House Talk (1/31) says "this isn't really significant." According to the comment, "these tribes don't have highly fractionated interest as other tribes in Indian Country." Also, it says that "DOI and BIA aren't tackling the highest fractionated Indian land yet and that's what the Cobell Settlement was intended to do."

Also reporting on the story are KECI-TV Missoula, MT (1/31, 2K), the Nation Sun News (1/31), the Native American Times (1/31, 337), and the Native News Online (1/31).

ANOTHER ROUTE PROPOSED FOR "A YEAR OF ACTION" IN INDIAN COUNTRY. For the Indian Country Today Media Network (1/30, 21K), Mark Trahan, the 20th Atwood Chair at the University of Alaska Anchorage, writes "in a year of action there needs to be another route forward." Trahan notes that the NCAI said, "However, the trend in funding for Indian Affairs in the Department of the Interior does not reflect Indian self-determination as a priority in the federal budget." But he says that "it's not the Interior Department." Rather, "it's all of government and especially the Congress." Trahan proposes that "President Obama, when he visits Indian country this year, partners with tribal leaders to raise private money for tribal colleges."

Top National News:

OBAMA ORDERS REVIEW OF JOB TRAINING PROGRAMS. President Obama's post-State Of The Union stops in Wisconsin and Tennessee generated very light national media coverage. For instance, on Wednesday, all three network newscasts covered the President's appearances in Maryland and Pennsylvania to push themes from his Tuesday speech, but none of the three mentioned his appearances on Thursday.

Some of the print coverage this morning emphasizes the perception that the President's current set of agenda priorities is much less expansive than the ideas he pitched upon first taking office. The Los Angeles Times (1/31, Parsons, 3.07M) calls the job-training order signed by the President on Thursday "decidedly smaller bore," Peter Baker, in an analysis for the New York Times (1/31, A17, Baker, Subscription Publication, 9.61M) says the President is "advancing relatively small or incremental ideas," and David Brooks, in his column for the New York Times, asserts that "the legislating phase of [Obama's] presidency is now pretty much over."

In an interview with Jake Tapper for CNN's The Lead (1/31, 568K), President Obama said, "My big push is making sure we're focused on opportunity, making sure that every single day all of us in Washington are trying to think about ways that we can help folks get good jobs, make sure that they are trained for the good jobs that are out there, make sure that those jobs pay, make sure our kids are getting a great education."

The AP (1/31) reports from Waukesha, Wisconsin that on Thursday, President Obama, "stressing the importance of having job-training programs that work...ordered a 'soup to nuts' review of federal workforce training initiatives and pledged to copy the most successful ones." The AP says that while he was at a GE engine plant, "he signed a presidential memo directing Vice President Joe Biden to lead the review," which "will be applied later in the year to a competition to award \$500 million in existing funds to design programs that pair community colleges with industry." The AP adds that House Speaker Boehner claimed "Biden's review was duplicative because the Government Accountability Office identified redundancies in a comprehensive review it completed in 2011."

The New York Times (1/31, A17, Baker, Subscription Publication, 9.61M) reports that House Republicans "called the training review an example of Mr. Obama's go-it-alone refusal to work with them, noting that they have already passed legislation intended to overhaul job training programs, but that the bill has not been taken up in the Senate." The Times adds that the White House dismissed that criticism, arguing that "the Republican bill would ultimately mean less money for training programs and therefore was not acceptable."

In an article titled "On Policy Tour, Obama Pledges To Revamp Job Training," Reuters (1/31, Mason) reports that in Waukesha, the President said, "We've got a lot of programs, but not all of them are doing what they should be doing to get people filled for jobs that exist right now." The President added, "We've got to move away from what

my labor secretary calls 'train and pray.' You train workers first, and then you hope they get a job."

The Milwaukee Journal Sentinel (1/31, Glauber, 798K) reports from Waukesha that the President "showed a serious, fiery side" as he "returned to what has become a central theme of his presidency: 'Restoring opportunity to every single person.'" The Journal Sentinel adds that the President also "made a pitch for Congress to increase the minimum wage to \$10.10 an hour," and "spoke about the need for wage equality among women," saying, "If a woman is getting cheated, that's a family issue for the whole family."

Bloomberg News (1/31, Runnigen, 1.91M) notes that the President "spoke hours after the Commerce Department reported that" the US economy "expanded at a 3.2 percent pace in the fourth quarter, following a 4.1 percent advance in the previous three months." According to Bloomberg News, the President said, "the economy's growth, while a positive sign that the recovery is accelerating, hasn't been evenly distributed." The President is quoted as saying, "Most folks' wages haven't gone up in over a decade."

The Washington Times (1/31, Wolfgang, 417K) reports that the President said he is "fully willing to work with Congress to spur economic growth and aid a struggling middle class, but he's done waiting for lawmakers to get on board." The President is quoted as saying, "Wherever I can take steps to expand opportunity to help working families, that's what I'm going to do, with or without Congress."

According to the Washington Post (1/31, Eilperin, 4.28M), "The entire scene – complete with cheering, well-paid industrial workers...was aimed at conveying the president's central message this year: that he can accomplish a range of policies outside Congress with the help of the private sector." The Post says "the stops on Obama's two-day trip have embodied not just the specific policies he is arguing will improve the lives of middle-class Americans, but the kind of communal approach to politics he has espoused from the start of his career." The Post adds that White House Press Secretary Jay Carney says the President is "determined to broaden the political conversation on economic and social issues."

However, the Los Angeles Times (1/31, Parsons, 3.07M) says the President's "jobs proposal was decidedly smaller bore," and reports that he "acknowledged as much" on Thursday. The Times also says the President's "order illustrates how limited his power is to affect the job market."

Obama Meeting With CEOs At The White House Today. Bloomberg News (1/31, Runnigen, 1.91M) reported that on Friday, the President is "convening a meeting of company chief executive officers at the White House tomorrow to advance a program he laid out in his State of the Union address." According to Bloomberg News, Wal-Mart, Apple and Ford "are among about 300 companies that have pledged to take part in an initiative to help the long-term unemployed find jobs."

In his interview with Jake Tapper for CNN's The Lead (1/31, 568K) that was taped on Thursday, the President said, "Tomorrow is a great example of something that we are doing that doesn't involve legislation or funding. We know that one of the biggest problems right now in the jobs market is the long-term unemployed. Because they have been unemployed for some long, people are being looking for a gap in the resume and they are weeding them out before they get a chance for an interview. So what we have done is gathered together 300 companies, just to start with, including some of the top 50 companies in the country – companies like Wal-Mart and Apple and Ford and others – to say, 'let's establish best practices.' Do not screen people out of the hiring process just because they have been out of work for a long time."

Regarding the President's efforts on behalf of the long-term unemployed, Ed Schultz, on MSNBC's Ed Show (1/30, 449K), said, "I think this is one of the best things the President has done." Rep. Elijah Cummings (D-MD) said, "I agree," and "I like the idea that the President is going directly to these companies and saying, 'we can do better, and it's in your best interests for all of our workers to do better.'"

NYTimes Analysis: Obama Has Adopted Clintonian Strategy He Once Derided. In an analysis for the New York Times (1/31, A17, Baker, Subscription Publication, 9.61M) under the headline "Obama Once Disdained Clinton's Small Steps and Now Takes His Own," Peter Baker says that in 2009, President Obama was quoted as saying, "I wasn't sent here to do school uniforms." According to Baker, the President's "implication was clear: He did not want to govern like" former president Clinton, but now the President "has a new appreciation for Mr. Clinton's style of leadership." Baker continues, "Much as" Clinton "adjusted his approach after running into

roadblocks in Congress, so is" the President "advancing relatively small or incremental ideas in hopes of circumventing opposition and making change one step at a time."

David Brooks, in his column for the New York Times, says the President now has "the opportunity to build what he himself...an Opportunity Coalition" that can "formulate, lobby for, fund and promote opportunity and social mobility agendas for decades to come."

Obama Draws Attention To Nashville High School's Achievements. The Tennessean (1/31, Gang, 417K) reports that at Nashville's McGavock High School, President Obama "pushed his plan for expanding early childhood education...and praised Nashville and Tennessee for the educational gains made." According to the Tennessean, McGavock was "selected for [Thursday's] speech in part because" it is "among the top schools in the state for student growth and has combined college-preparatory courses with work- and project-based learning." The President is quoted as saying, "If Nashville can bring schools, teachers, business and parents together for the sake of our young people, then other places can."

The Washington Times (1/31, Wolfgang, 417K) notes that in Nashville, the President "repeated his promise to put wireless internet access at every school in America and said more schools should focus on the kind of real-world job training that prepares students for careers in the 21st century." According to the Times, the President "highlighted McGavock's system of 'academies,' partnerships with local businesses that allow students to pick specialty areas such as aviation, health science, digital design and communication, and others."

Politico (1/31, Epstein, 464K) reported that on Thursday, the President "met...with the family of the Tennessee teenager who was shot and killed by a classmate Tuesday," and "briefly acknowledged the shooting death...during his remarks at...McGavock High School," but "made no further reference to gun control, or to changing gun laws."

Perez Touts Minimum Wage Hike At Hardware Store. Melinda Henneberger, in a piece for the Washington Post (1/31, Henneberger, 4.28M), notes that Labor Secretary Perez visited Ace Hardware in Washington's Mount Vernon Square, "where all employees are paid more than the minimum wage," in order to "highlight President Obama's State of the Union message about raising the federal minimum wage." Perez is quoted as saying, "Paying folks a fair wage is the essence of growing a small business." According to Henneberger, Perez "disputed a reporter's question about how unlikely it is that a Republican-controlled Congress will pass legislation to raise the wage," saying, "People in red states and blue states understand no one who works full-time should live in poverty."

Lew: MyRAs Offer Workers Without A Retirement Plan A Way To Save. In an op-ed for McClatchy (1/31, Lew, 95K) under the headline "The Difference With A MyRA," Treasury Secretary Lew notes that "only about half of all workers have access to an employer-based retirement plan, such as a 401(k)," and when "left on their own, few workers save." Lew says that with this in mind, the Administration "has designed a new way for working Americans to start saving for the future," myRA or My Retirement Account, which is "designed to help low- and middle-income workers...begin saving for retirement." Lew notes that "contributions are made through automatic payroll deductions, making them hassle-free," and "there are no fees."

The Wall Street Journal (1/31, Subscription Publication, 5.91M), in an editorial, says that if it is true that that myRA accounts have no fees associated with them, then the money that it will take to administer them will have to come from Treasury's budget although Congress never appropriated any funds for the program, which did not exist until this week.

Federal Unions Have Suggestions For More Executive Actions. Joe Davidson, in his column for the Washington Post (1/31, Davidson, 4.28M) reports that "Federal labor leaders" have "a wish list waiting for presidential action." According to Davidson, NTEU president Colleen Kelley "wants Obama to propose a 3.3 percent pay raise for federal workers," while AFGE, "the largest federal union, has a top 10 list of actions," including "align local pay boundaries for blue-collar and white-collar feds," and "enforce the annual cap on taxpayer subsidies for contractor compensation."

Marcus: Obama Needs To Address Debt Crisis. Ruth Marcus, in her column for the Washington Post (1/31, Marcus, 4.28M), criticizes the President for failing to address "the intertwined issues of dealing with the debt and

controlling entitlement spending” during the State Of The Union address. According to Marcus, the President “once...promised to stop kicking the can down the road,” but “now...acts as if there is no can.”

Obama Quip About The Value Of An “Art History Degree” Draws Criticism. Politico (1/31, Epstein, 464K) reports that on Thursday in Wisconsin, the President said, “I promise you that folks can make a lot more potentially with skilled manufacturing or the trades than they might with an art history degree. Now, there’s nothing wrong with an art history degree; I love art history, so I don’t want to get a bunch of emails from everybody.” Politico notes that in response, Linda Downs, the executive director and CEO of the College Art Association, called the President’s comment “just awful.”

BOEHNER OFFERS IMMIGRATION REFORM PRINCIPLES THAT INCLUDE PATH TO LEGAL STATUS, BUT NOT CITIZENSHIP. House Speaker Boehner raised the touchy issue of immigration reform with the House Republican caucus at its annual retreat, offering a one-page list of principles for reform. While none of the broadcast networks covered the outline, major newspapers did, with their focus mainly on the House GOP leadership’s proposal for a path to legal status, though not citizenship, for those who are in the US illegally. Several reports call this a major shift in GOP messaging on immigration as midterm elections loom – and one that could further fracture the party’s divisions. The language of the coverage is generally upbeat, saying that the statement of principles represents real movement on the key issue.

The AP (1/31) reports House Republicans “wrestled” with the immigration issue, “sharply divided” over both the issue itself “and the political wisdom of acting on it in an election year.” Boehner outlined several principles toward reform, “the most divisive” of which is a proposal for a “pathway to legal status for millions of adults who live in the U.S. unlawfully and would be required to pay back taxes as well as fines to come out of the legal shadows.” Reuters (1/31) says that while Boehner was seeking unity, a source said the principles are open to change.

USA Today (1/31, Davis, Gomez, 5.82M) reports that according to “a source who attended the retreat,” Boehner said, “I believe these standards represent a fair, principled way for us to solve this issue, beginning with securing our borders and enforcing our laws. We will address this issue in a step-by-step, common sense fashion that starts with securing our nation’s borders and enforcing our nation’s laws.” Boehner said he opposed a single comprehensive bill of the sort passed in the Senate last year.

The New York Times (1/31, Parker, Subscription Publication, 9.61M) says the one-page document was careful to point out that those in the country illegally would be offered “a path to legal status – but not citizenship.” The Times says the principles are intended to help Boehner “gauge the [GOP] conference’s willingness to embark” on immigration legislation. Roll Call (1/31, Newhauser, Subscription Publication, 87K) says while the leadership has been discussing the issue “for months,” the document is their first draft for how they “want to take on the contentious issue, which is splitting their party” at the retreat.

The Washington Post (1/31, Nakamura, Kane, 4.28M) says that it was the first time the House Republican leadership has said it was open to legal status. The principles also include “increased border security, new workplace hiring verification and changes to the current visa programs for foreign workers and families.” The Los Angeles Times (1/31, Bennett, Memoli, 3.07M) says those brought to the US as children “would be allowed to apply for legal residence and citizenship.”

The Hill (1/31, Berman, 194K) reports that “according to a person in the room,” Boehner warned that the GOP would not go beyond legal status. Boehner reportedly said, “These standards are as far as we are willing to go. Nancy Pelosi said yesterday that for her caucus, it is a special path to citizenship or nothing. If Democrats insist on that, then we are not going to get anywhere this year.”

McClatchy (1/31, Lightman, 95K) looks at the principles from a political perspective, saying the document is “aimed at helping the party overcome suggestions that it’s intolerant,” though threatening “to further divided an already-torn Republican party.” The Washington Times (1/31, Dinan, 417K) similarly says party leaders “have a tricky needle to thread” in trying “to tamp down on harsh rhetoric they believe hurt them” with Latino voters in 2012 while avoiding “a vicious split within the party that could prompt primary challenges” and keep the base at home this fall.

The Christian Science Monitor (1/31, Kiefer, 540K) considers the timing, writing that while "some Republicans say the House is simply picking up where it left off last year," others fear raising the issue during the midterm election season. Those "in the 'move now' faction" say winning Latino support is important this year, and argue that the usually Republican business community, and the US Chamber of Commerce in particular, want action on reform. The Daily Caller (1/31, Munro, 422K) says business groups "lauded" the document.

The Huffington Post (1/31, Foley, 11.54M) says the single-page document is considered "a jumping-off point for discussion."

McCain: "I Will Support Everything They're Doing." The Hill (1/31, Bolton, 194K) reports Sen. John McCain, the co-author of the Senate bill that Boehner and other House Republicans have criticized, "praised" the House leadership for issuing the principles. McCain said, "I think they're fine. I will support everything they're doing and certainly will not take shots from the sidelines."

Cruz Says House GOP Should Not "Support Amnesty." The Hill (1/31, Trujillo, 194K) reports in its "Blog Briefing Room" blog that Sen. Ted Cruz said at a Bloomberg News breakfast, "I think it would be a mistake if House Republicans were to support amnesty for those here illegally." He added, "In my view we need to secure the borders, we need to stop illegal immigration. And we need to improve and streamline legal immigration."

Evangelicals Run Pro-Reform Ads On Conservative Websites. Politico (1/31, Kim, 464K) reports that the National Association of Evangelicals is also pressing for immigration reform through the Evangelical Immigration Table, which launched new online ads on conservative websites Thursday after running a full-page ad in USA Today earlier this week.

Many Immigration Reform Advocates Pleased By GOP Shift. The Washington Post (1/31, Constable, 4.28M) says many immigration reform advocates responded "positively" to the "new Republican overtures," signaling that they "may back off on their longtime insistence that legislation must include a 'special path' to citizenship." While some "said they would continue to insist on a full path to citizenship," Boehner's principles "seemed to signal a sea change in the party's stance, and many major immigrant advocate groups seemed eager to respond in kind." Clarissa Martinez of the National Council of La Raza said, "To see the Republicans moving from self-deportation to legalization is a major shift."

Union Says CIS Would Not Be Able To Handle Workload From Legal Status Applications. The Washington Times (1/31, Dinan, 417K) reports that the National Citizenship and Immigration Services Council, the labor union representing US Citizenship and Immigration Services employees, said Thursday that CIS cannot "handle the workload" that would come from granting legal status to 11 million people, "and said the change would guarantee criminals and others would be approved to remain in the country." Union President Kenneth Palinkas said in a letter to House Judiciary Chairman Robert Goodlatte, "USCIS is not equipped to handle this workload, and due to political interference in its mission, is not empowered to deny admission to all those who should be denied due to ineligibility."

Survey Shows Many Latinos Believe Strongly In American Dream. The Washington Post (1/31, Constable, Clement, 4.28M) reports that a recent national poll by the Post and the University of Virginia's Miller Center indicates that in many cases, Latinos' "faith in the American Dream exceeds that of whites and African Americans – an optimism that contrasts sharply" with the group's economic status. The Post says the poll shows that many Latinos have a "determination to succeed and faith that education and work" will "lift their families from humble circumstances."

NYTimes Sees Boehner's Principles As Step In Right Direction. The New York Times (1/31, Subscription Publication, 9.61M) editorializes that "principles are no substitute for actual legislation, and we're still a great distance from a deal" on immigration, but Boehner's list is welcome "after years of stalemate." Proposing legal status "is a big step away from neo-nativism," and the principles "also acknowledge that children should not be punished for their parents' acts." But the Times says "any legalization plan has to include the real possibility of immigrants' becoming Americans." The Times also criticizes President Obama as "the deporter-in-chief," writing that his Administration "has expelled nearly two million people, breaking up thousands of the families the president has repeatedly promised to protect."

More Commentary. Columbia University professor of history and Asian-American studies Mae Ngai writes in a New York Times (1/31, Subscription Publication, 9.61M) op-ed that the principles are “a welcome sign that seven months after the Senate passed a comprehensive bill...there might be movement on the issue this year.” Ngai writes that even the call for legal status “is likely to raise hackles among conservatives,” but they “are blind to the lessons of history. The United States has a long track record not only of legalizing illegal immigrants...but also of pairing legalization with a grant of permanent residency, the prerequisite for naturalization.”

ECONOMIC NEWS GENERALLY POSITIVE ON THURSDAY. In general, the economic news out on Thursday is being seen as positive by the media, particularly the strong GDP numbers. However, there was some concern about the drop in an index of pending home sales and by the unexpected increase in new jobless claims, though media coverage tended to discount the latter.

GDP Grew At 3.2% Annual Rate In Fourth Quarter Of 2013. The CBS Evening News (1/30, story 5, 1:45, Pelley, 5.58M) reported that in “good news,” the economy “grew 3.2 percent in the last three months of last year, not gangbusters, but economists consider it healthy,” and “Wall Street liked it.” CBS (Mason) says that the economy “may finally be gaining momentum. The growth rate in the second half of last year, 3.7 percent, was the strongest in a decade.”

The New York Times (1/31, Schwartz, Subscription Publication, 9.61M) reports that the US economy “finished 2013 on a healthy note,” with the GDP rising at a 3.2% annual rate during the 4th quarter, according to data released Thursday by the Department of Commerce. While the Q4 growth “was a deceleration from the pace of expansion in the summer,” it was “still well above the anemic rate of growth in the first half of 2013.”

In a front-page story, the Washington Post (1/31, A1, Mui, 4.28M) reports that “unprecedented spending cuts and the first government shutdown in nearly two decades significantly slowed economic growth at the end of 2013 even as the private sector proved surprisingly resilient.” The Post says that the “pace of growth would have been a percentage point higher without the political chaos on Capitol Hill.”

The Wall Street Journal (1/31, Portlock, Subscription Publication, 5.91M) says that the economy closed the last six months of 2013 with one of its best periods of growth in the past decade as consumer spending was solid, backed by an increase in business investment and exports soared. The Journal says that the 3.2% rate was in line with the expectations of economists it had surveyed.

In an editorial, the Wall Street Journal (1/31, Subscription Publication, 5.91M) says that the economy has now grown at 2.5% or better for the past three quarters. The Journal says that it good news, and better news is that the growth come almost entirely from the private sector, as public sector spending dropped sharply during recent months. The Journal says that fact is a rebuke to Keynesians, who argued that a drop in spending by the government would cripple the economy.

Pending Home Sales Down Sharply. The Wall Street Journal (1/31, Timiraos, Hudson, Subscription Publication, 5.91M) reports that the National Association of Realtors index of pending home sales fell 8.7% in December, hitting its lowest rate in two years. Over the past 12 months, sales are down 8.8%. A pending home sale is one for which a contract has been signed by the deal not yet closed, and the index covers existing homes, not new construction. The Journal says that the index is a sign that the market has cooled significantly in recent months, under the combined impact of rising mortgage rates, rising prices and limited inventory.

Bloomberg News (1/31, Woellert, 1.91M) reports that in December, “tight inventory” and “unusually cold weather discouraged prospective buyers, according to the group.” Bloomberg News says that addition gains in “hiring, household wealth and consumer confidence would help boost the housing recovery and the economy.”

Jobless Claims Rose Last Week. Bloomberg News (1/30, Smialek, 1.91M) reports that first-time claims for jobless benefits rose 19,000 for the week ending January 25 to 348,000, according to new data out from the Department of Labor. Economists surveyed by Bloomberg News expected claims to come in at 330,000. Claims are at their “highest level in more than a month, partly reversing a post-holiday slump.” The four-week moving average, which irons out week-to-week volatility, rose 750 to 333,000.

The AP (1/31) reports that the four-week average “is close to pre-recession levels and suggests that, despite last

week's rise, layoffs remain low" but "hiring will need to pick up to cut the still-high 6.7% unemployment rate."

Mortgage Rates Down This Week. The AP (1/30) reports that the rates on fixed mortgages "slipped this week." According to data released by Freddie Mac on Thursday, the average rate for a 30-year loan fell to 4.32% from 4.39% the prior week. The average rate on a 15-year loan fell to 3.40% from 3.44%. The AP says that rates are up "about a full percentage point" since "hitting record lows roughly a year ago." The rise was "driven by speculation that the Federal Reserve would reduce its \$85 billion a month in bond purchases."

Bloomberg News (1/30, Gopal, 1.91M) reports that the rates "fell to a two-month low, cutting borrowing costs for homebuyers prior to a Federal Reserve move to further scale back stimulus measures that have helped keep loans inexpensive."

Consumer Confidence Down Last Week. Bloomberg News (1/31, Peralta, 1.91M) reports that its Consumer Comfort Index "dropped last week to the lowest level in two months as more Americans said it was not a good time to shop." The index fell to minus 31.8 for the week ending January 26 from minus 31.0 the prior week. Bloomberg News says that falling stock prices "are probably damping sentiment among upper-income groups, while higher gasoline costs at the pump hurt the nation's lowest earners."

Stocks Rallied On Thursday. The Wall Street Journal (1/31, Dieterich, Subscription Publication, 5.91M) reports that stocks bounced back on Thursday, boosted by stronger than expected earnings reports. The Dow Jones Industrial Average rose 109.82 points to 15,848.61, while the S&P 500 rose 19.99 points to 1,794.19. The Nasdaq Composite Index rose 71.69 points to 4,123.13.

Tech Bubble Said To Be Building. USA Today (1/31, Swartz, 5.82M) reports that the "tech bubble is alive and well, expanding." The "latest upswing, unlike its predecessor in the late 1990s, is benefiting from speculation and real revenue and profits." Charles King, principal analyst for market researcher Pund-IT, said, "It's deja vu all over again, but this time we have thriving markets for smartphones, social media, cloud computing and e-commerce. Before, it was just pure speculation about e-commerce's promise."

US Banks Easing Lending Standards. In a front-page story, the Wall Street Journal (1/31, A1, Tracy, Chaudhuri, Subscription Publication, 5.91M) reports that big US banks are starting to loosen their lending standards, potential easing the path for consumers and businesses to borrow. That, in turn, could provide a significant economic boost. The OCC on Thursday released data showing that banks started to relax their lending standards for businesses and consumers during the 18 months prior to July, 2013.

Editorial Wrap-Up:

NEW YORK TIMES. "Fixing Immigration, In Principle." The New York Times (1/31, Subscription Publication, 9.61M) editorializes that principles for immigration reform offered by House Speaker Boehner "are no substitute for actual legislation, and we're still a great distance from a deal" on immigration, but Boehner's list is welcome "after years of stalemate." Proposing legal status "is a big step away from neo-nativism," and the principles "also acknowledge that children should not be punished for their parents' acts." But the Times says "any legalization plan has to include the real possibility of immigrants' becoming Americans." The Times also criticizes President Obama as "the deporter-in-chief," writing that his Administration "has expelled nearly two million people, breaking up thousands of the families the president has repeatedly promised to protect."

"A New Day For New Yorkers." The New York Times (1/31, Subscription Publication, 9.61M) editorializes that New York Mayor Bill de Blasio "closed a divisive chapter in New York City history" by his announcement that the city will settle a stop and frisk lawsuit, and notes that the city "can now set about taking the corrective steps that Judge Scheindlin ordered," which "should help to bring police policies fully in line with the Constitution."

"Football, Pain And Marijuana."

WASHINGTON POST. "Obama's Free-Trade Hurdle." The Washington Post (1/31, 4.28M), in an editorial, says that while Senate Majority Leader Reid "sounded as if he were rejecting" Trade Promotion Authority "that might be a stretch." The Post notes that Reid "has never been much for free-trade deals," but "has nevertheless

permitted such legislation to move through the Senate in the past, and he stopped short of an explicit threat to block it this time."

"Argentina's Coming Collapse." The Washington Post (1/31, 4.28M), in an editorial, argues that Argentina appears headed toward another financial bust as a result of "the populist policies pursued in recent years by President Cristina Fernández de Kirchner." The Post calls it "good news" that "the economic slide contributed to a defeat for Ms. Kirchner's faction in elections last fall, meaning that she will be forced to leave office when her presidential term expires at the end of next year," and notes that Kirchner and her economic team should "use this status to take measures that could set the stage for a future recovery," but instead their strategy "appears aimed at avoiding an immediate default rather than addressing the economy's underlying problems."

"Callous Disregard."

WALL STREET JOURNAL. "Barack's New Bond Fund." The Wall Street Journal (1/31, Subscription Publication, 5.91M), in an editorial, says that if it is true that that myRA accounts have no fees associated with them, then the money that it will take to administer them will have to come from Treasury's budget although Congress never appropriated any funds for the program, which did not exist until this week.

"Assad's Chemical Charade." In an editorial, the Wall Street Journal (1/31, Subscription Publication, 5.91M) argues that is not surprising that once Syrian President Assad was given a role in his chemical disarmament, he would take every opportunity to delay and deceive. The Journal dismisses the State Department's comments on the matter as mild and argues that the Obama Administration is unlikely to raise the issue at the UN or to follow through on the President's pledge to use military action "if diplomacy fails."

"Less Government, Faster Growth." In an editorial, the Wall Street Journal (1/31, Subscription Publication, 5.91M) says that the economy has now grown at 2.5% or better for the past three quarters. The Journal says that it good news, and better news is that the growth come almost entirely from the private sector, as public sector spending dropped sharply during recent months. The Journal says that fact is a rebuke to Keynesians, who argued that a drop in spending by the government would cripple the economy.

Washington Schedule:**TODAY'S EVENTS IN WASHINGTON.**

White House:

PRESIDENT OBAMA – In-town pool call; receives the Presidential Daily Briefing with the Vice President, Oval Office, closed press; the President and Vice President meet with CEOs, State Dining Room, stills only, pool spray; the President delivers remarks outlining new efforts to help the long-term unemployed, the Vice President also attends, East Room, open press; the President participates in a virtual road trip across the country via Google+ Hangouts to discuss his State Of The Union address, Roosevelt Room, live streamed on WhiteHouse.gov, YouTube.com/whitehouse and the White House Google+ page. Notes: 12:30 p.m. press briefing by Jay Carney.

VICE PRESIDENT BIDEN – Receives the Presidential Daily Briefing with the President, Oval Office, closed press; the President and Vice President meet with CEOs in the State Dining Room, stills only, pool spray; attends the President's East Room speech on efforts to help the long-term unemployed, open press.

MICHELLE OBAMA – Michelle Obama visits Los Angeles and San Francisco.

US Senate: Not in session.

US House: 3 p.m. – House meets in pro-forma session.

Other: WASHINGTON AUTO SHOW – Jan. 21 – Feb. 2. Annual auto show and related events, including Public Policy Preview Days which offer registered members of the media access to industry executives, legislators, Administration officials and automotive technology innovators plus a sneak peek at the latest models and technology advancements. Show opens to the public on Jan. 23. Location: Walter Washington Convention Center, 801 Mt. Vernon Place NW (unless otherwise noted). Contacts: Barbara Pomerance (bp@pomeranceassociates.com), 800-697-7574.

HOUSE REPUBLICAN ISSUES CONFERENCE – Jan. 29 – 31. Congressional Institute's 2014 "Congress of Tomorrow Issues Conference." Reporters wishing to cover the event must have a congressional press ID and complete registration form no later Thursday, Jan. 23. Location: Cambridge, Md. Contacts: Nate Hodson 202-226-9000 (202-360-2042)

HEALTH INFORMATION TECHNOLOGY ROUNDTABLE – 8 a.m. – 12 p.m. Network for Excellence in Health Innovation (NEHI) and Prescriptions for a Healthy America host a roundtable discussion on the potential of Health Information Technology to improve patient care, outcomes, safety and to lower costs through improved medication management and adherence. Location: The Americas Room, Pew Conference Center, 901 E St. NW. Notes: To RSVP or schedule media interviews please contact Nick King of NEHI at nking@nehi.net, 617-225-0857 or Sloane Salzburg for Prescriptions for a Healthy America at sloane.salzburg@cahc.net, 202-618-3797.

HEALTH INSURANCE EXCHANGES – 9 a.m. Media-Only Breakfast on "Health Insurance Exchanges – Where We Are Now? State of Exchanges and Enrollment." Speakers: Christine Ferguson, Director, Rhode Island Health Benefits Exchange Audrey Haynes, Secretary, Kentucky Cabinet for Health and Family Services; Heather Howard, Director, State Health Reform Assistance Network; Mila Kofman, Executive Director, DC Health Benefit Exchange Authority; Peter Lee, Executive Director, Covered California. RSVP to: Genevieve Rupp at grupp@gymr.com, 202-745-5118. Location: National Press Club, Fourth Estate Room, 529 14th St NW. Contacts: Virginia Bader vbader@gymr.com (202-745-5059)

NASA – CHALLENGER CEREMONY – 9 a.m. NASA will pay will tribute to the crews of Apollo 1 and space shuttles Challenger and Columbia, as well as other NASA colleagues, during the agency's Day of Remembrance on Friday, Jan. 31. NASA's Day of Remembrance honors members of the NASA family who lost their lives while "furthering the cause of exploration and discovery". NASA Administrator Charles Bolden and other agency senior officials will hold an observance and wreath-laying at Arlington National Cemetery Friday morning. There will be several locations in Arlington National Cemetery beginning at 9 a.m. Location: Arlington National Cemetery. Contacts: Allard Beutel allard.beutel@nasa.gov (202-358-2191).

SAIS – WESTERN BALKANS – 10 a.m. "A Fresh Perspective on the Western Balkans" with Jonathan Moore, director for the Office of South Central European Affairs at the US Department of State; Edward Joseph, senior fellow at the Center for Transatlantic Relations (CTR), and Sasha Toperich (moderator), senior fellow at the Center for Transatlantic Relations. Location: Room 500, Bernstein-Offit Building, 1717 Massachusetts Ave., NW. Contacts: Francesca Di Marco SAIS (fdimarco@jhu.edu)

CONSUMER DATA BREACHES – PRESS CALL – 10 a.m. – 10:30 a.m. ABA, CBA, FSR, ICBA to Host Background Call on Recent Consumer Data Breaches – the American Bankers Association (ABA), the Consumer Bankers Association (CBA), the Financial Services Roundtable (FSR), and the Independent Community Bankers of America (ICBA) will host a joint background conference call for members of the media on the recent data breaches at retailers such as Target, Nieman Marcus and Michaels. This call, which is for background purposes only, will focus on the shared responsibility between banks and merchants for securing consumer data. Speakers: Kenneth Clayton, Executive Vice President and Chief Counsel, ABA; Paul Smocer, President of BITS – Financial Services Roundtable; Viveca Ware, Executive Vice President, Regulatory Policy – ICBA. RSVP Tom Crosson at tcrosson@cbanet.org to receive the conference call number and passcode. Contacts: Tom Crosson tcrosson@cbanet.org ((703) 869-1246)

K-12 EDUCATION ISSUES IN 2014 BRIEFING – 12 p.m. – 1:30 p.m. Capitol Hill briefing on the California School Boards Association on K-12 Education issues in 2014. The briefing will be presented by Dennis Meyers, Assistant Executive Director for Governmental Relations, and Erika Hoffman, Legislative Advocate, of the California School Boards Association. It will cover Governor Brown's state budget proposal and its implications for K-12 education, the state's new Local Control Funding Formula (LCFF) and issues regarding the Federal

Elementary and Secondary Education Act (ESEA) reauthorization. RSVP to sullivan@calinst.org or 202-785-5456. Location: B369 Rayburn.

MEI – USAID SHAH – SYRIA – 12:30 p.m. – 1:45 p.m. The Middle East Institute will host Dr. Rajiv Shah, Administrator of the US Agency for International Development, for a keynote discussion on USAID efforts to address the humanitarian crisis in Syria. Location: The National Press Club, 529 14th St. NW, 13th Floor. Contacts: information@mei.edu (202) 785-1141

ANNUAL SILVER ARCHER AWARDS – 6 p.m. 3rd Annual Silver Archer – USA Awards Ceremony. Among invited guests are representatives of the diplomatic mission of Russia in the US, Trade Representation of the Russian Federation in the US, Russian center for science and culture in Washington, D.C., Russian-American Chamber of Commerce, journalists and communications professionals. Location: National Press Club, Ballroom, 529 14th Street NW.

Last Laughs:

LATE NIGHT POLITICAL HUMOR.

Jimmy Kimmel: "Once again this year, President Obama will grant an interview to a journalist from the network broadcasting the game [Super Bowl]. The game is on FOX this year, so Bill O'Reilly is going to do the interview. That makes sense, because, you know, Super Bowl Sunday, most people just want to get together with their friends, eat nachos, drink beers and watch people fight about healthcare reform. I'm taking O'Reilly with the points."

David Letterman: "You know, President Obama – by the way, I wouldn't give that guy's troubles to a monkey on a rock. They had the State of the Union address, and the ratings were very low for the State of the Union address. And I gave this some thought. I think I know why the ratings were low. Because it's the State of the Union address. That's why. Next year it will be presented by Tina Fey and Amy Poehler."

Jimmy Fallon: "And I just read this today. The [Denver] Broncos safety Mike Adams, you guys know that guy? He says that if his team wins the Super Bowl, he's going to walk 12 miles to his hometown in Paterson, New Jersey, after the game. That's pretty good. Thanks to Chris Christie, it's probably the fastest way to get there anyway."

Jimmy Fallon: "Did you guys hear about this? NSA leaker Edward Snowden was just nominated for a Nobel Peace Prize. Yeah. When Snowden asked where he could pick up the award, the organizers said, 'Um, 1600 Pennsylvania Avenue? Come alone. Come alone.'"

Jimmy Fallon: "Some more political news this week. Joe Biden said that Hillary Clinton's decision to run for president won't affect his decision to launch a campaign. While Hillary says Joe Biden's decision to run for president won't affect her becoming president."

Jay Leno: "Well, folks, I want to say – oh, my God. Our hearts go out to the people in the South. This terrible storm just crippled that part of the country, pretty bad. Atlanta came to a standstill. You probably saw this. Roadways were blocked, thousands of abandoned cars all over the highway. A lot of people are blaming the mayor. But today, an email surfaced from a Chris Christie aide that said, 'Time for weather problems in Atlanta.' So I don't know."

Jay Leno: "Well, this week in New Orleans, Hillary Clinton said she still doesn't know if she's running for president in 2016. Isn't that unbelievable? There are 315 million Americans. What are the odds? She's the only one in the country who doesn't know she's running for president in 2016. It's amazing."

Jay Leno: "And Hillary Clinton spoke to the Automobile Dealers Association the other day, and she told them she has not driven a car in 18 years. You know what else is an amazing record? The [Los Angeles] Lakers haven't driven to the basket in over two months. You know that?"

Jay Leno: "Well, this has become a huge story. After the President's State of the Union address, Republican Representative Michael Grimm of New York got into some hot water after he threatened to throw a reporter off a balcony. He said, 'I'll throw you off the effing balcony.' That's what he said. This happened after the reporter questioned him about alleged misuse of campaign funds. So, the good news – any injuries suffered by the reporter would be covered under Obamacare. So that worked out okay."

Jay Leno: "According to 'The New York Post', New York Governor Andrew Cuomo is cracking down on welfare recipients who use their government credit cards for things like strip clubs, alcohol, and gambling. Cuomo was very clear. He said, 'You want to use taxpayer money for that kind of thing, you become a congressman, okay? That's what you do.'"

Jay Leno: "You probably heard about this. A petition to have Justin Bieber deported got over 100,000 signatures, which means the White House now has to legally rule on it. So, finally a chance for Obama to issue an executive order that both Republicans and Democrats can agree on. Finally, this could be the thing that brings the country together."

Conan O'Brien: "The Super Bowl this year will be played in Governor Chris Christie's home state of New Jersey. It's a state that lately has gotten used to 300-pound guys blocking things."

DOI in the News:

INTERIOR NOMINEES TO APPEAR BEFORE SENATE PANEL HEARING. The [Environment & Energy Publishing](#) (2/4, 705) reports that the Senate Energy and Natural Resources Committee will consider two of President Obama's nominations to the Interior Department: Rhea Suh as assistant secretary for Fish and Wildlife Parks and Janice Schneider to be assistant secretary for Land and Minerals Management. They both "appeared before the committee in December, but Republicans requested a second hearing to ask additional questions about federal land management in Alaska and coalmining regulations, among other topics." The article notes that "committee ranking member Lisa Murkowski (R-Alaska) has made no secret of her reservations about Suh, who since 2009 has been Interior's assistant secretary for policy, management and budget."

Also reporting on the story are [Politico](#) (2/4, Guillen, 464K), the [National Journal](#) (2/4, Subscription Publication, 427K), the "Ballot Box" blog of [The Hill](#) (2/4, 194K) and the "E2 Wire" blog of [The Hill](#) (2/4, 194K).

BILL SETS FEES TO SHOOT IN NATIONAL PARKS. [Bloomberg News](#) (2/3, 1.91M) reports that "in the era of user fees helping to pay the government's way, film companies and commercial photographers could be charged \$200 a year to shoot in national parks, under legislation headed to the House floor this week." However, the fee would be "\$250 — per month — if the Obama administration had its way." The bill, HR 3590, "also covers other fees such as those for hunting and fishing on federal lands and the duck stamp program."

TWO AGENCIES FAULT GE HUDSON-DREDGING REPORT AS MISLEADING. [Bloomberg News](#) (2/3, 1.91M) reports that General Electric Co.'s "report on its cleanup of contaminants in New York's Hudson River was called

misleading and inaccurate by two US agencies involved in monitoring the project's progress." The Interior Department and the National Oceanic and Atmospheric Administration said "GE didn't recognize damage to fish and waterfowl from the chemicals it dumped in the river and wasn't accurate about recommendations for expanded dredging." In a letter to the company, Thomas Brosnan, the Hudson River trustee for NOAA, and Kathryn Jahn, the Hudson River case manager for the Interior Department, wrote, "We believe it is important for the public to understand our disagreement with a number of statements in the report."

OBAMA ADMINISTRATION URGED TO BALANCE ENERGY DEVELOPMENT WITH CONSERVATION. For "The Blog" of the Huffington Post (2/4, Cizik, 11.54M), Rev. Richard Cizik, President, The New Evangelical Partnership for the Common Good, writes that he has "faith in the president's commitment to using his executive authority to protect 'our air, our water, our communities.'" He notes that in his State of the Union address, President Obama "heeded the call of more than a dozen Evangelical faith leaders and others who have asked that Interior Secretary Sally Jewell and his Administration to take steps to balance energy development with conservation of our public lands." Cizik urges the president "to get more engaged in making sure this happens."

Meanwhile, in an op-ed for the Washington Examiner (2/4, 319K), Simon Lomax, western director of Energy In Depth, an industry advocacy group, writes that environmentalists are fuming over President Obama's State of the Union because of his support of fracking and fossil fuel production. However, Lomax claims that "the problem for anti-fracking activists is the facts just don't support their political ideology." He notes that "even the Obama administration – which opposes the oil and gas industry politically on issues like taxation, the role of federal regulation and developing energy on public lands – accepts the consensus that hydraulic fracturing is fundamentally safe."

PAPER SUPPORTS BAN ON SALE OF INVASIVE SNAKES. The Miami Herald (2/4, 806K) editorializes that "large, exotic snakes have infested the Everglades, decimating its native mammal population and discouraging the less adventurous from visiting the national park." But "unlike so many other problems plaguing the Everglades ecosystem," the paper argues that "controlling, if not yet eradicating, the increasing snake population there has an easy solution: a federal ban on the sale of nine nonnative invasive snakes called constrictors." The editorial notes that "eighteen members of Congress, including many from South Florida, have sent a letter to Interior Secretary Sally Jewell asking that the US Fish and Wildlife Service extend its ban on sales of four types of constrictors to include five more: reticulated pythons, DeSchauensee's anacondas, green anacondas, Beni anacondas and boa constrictors."

America's Great Outdoors:

National Park Service:

NPS TO ASSIST 350 COMMUNITIES WITH CONSERVATION AND OUTDOOR RECREATION PROJECTS.

The Asheville (NC) Mountain Xpress (2/4, 51K) reports that the NPS has "announced that it will help more than 350 communities improve local parks, establish trails, access, and protect special places through its Rivers, Trails, and Conservation Assistance program this year." NPS Director Jonathan B. Jarvis said, "The National Park Service Rivers, Trails, and Conservation Assistance program helps all Americans get outdoors. This year, we're connecting youth with national parks in Alaska, planning a community trail system for mountain biking in Michigan, and getting people paddling on Texas rivers."

Also reporting on the story are KCSG-TV St. George, UT (2/4, 43) and WOWT-TV Omaha, NE (2/4, 104K).

BILL INTRODUCED TO CREATE NATIONAL PARK IN PULLMAN'S HISTORIC DISTRICT. The Columbia (IL) Chronicle (2/4) reports that Sens. Mark Kirk and Dick Durbin and Rep. Robin Kelly have "introduced legislation in Congress to create a national park in Pullman's historic district near the 95th/Dan Ryan Red Line stop in hopes that it will create jobs and preserve the neighborhood's place in US history." Congress is expected to vote on the bill during its Feb. 3 session. According to Lorraine Brochu, president of the Pullman Civic Organization, "most Pullman residents are supportive of the possible designation."

ACADIA NATIONAL PARK OFFICIALS SAY CONCESSIONS CONTRACT NOT YET FINALIZED. The Bangor (ME) Daily News (2/3, 166K) reports that "federal officials have yet to sign a final contract with a concessions

vendor for Maine's only national park, which has raised concerns about whether the park's gift shops and restaurant will open on time this summer." Officials with Acadia National Park told members of the park's advisory panel Monday that the NPS has "yet to sign a final contract with Dawnland LLC, the firm that has been selected to take over the park's concessions contract from Bar Harbor-based Acadia Corp." Officials said that the "contract issue threatens to delay opening of gift shops at Cadillac Mountain, Thunder Hole and Jordan Pond, and of the Jordan Pond House restaurant, all of which usually open their doors in May."

NEW SUPERINTENDENT OF PADRE ISLAND NATIONAL SEASHORE NAMED. KIII-TV Corpus Christi, TX (2/4, 11K) reports that Mark Spier, a 36-year veteran of the NPS, has been named the new superintendent of the Padre Island National Seashore, and will begin duties on Feb. 9.

ANNIVERSARY OF ROCKY MOUNTAIN NATIONAL PARK CREATION CELEBRATED. In an editorial, the Loveland (CO) Herald-Reporter (2/4, 731K) celebrates the birthday of Rocky Mountain National Park, which "officially begins Sept. 4, the 99th anniversary of the opening ceremony of the park."

Bureau of Land Management:

BLM PROPOSES TO ADD SAGE GROUSE PROTECTIONS. The Wyoming Public Media (2/4) reports that the BLM is "proposing to cap the amount of disturbance that can happen on public land where" the sage grouse "lives, and to impose other rules designed to protect sage grouse habitat." The BLM's Lisa Solberg Schwab said "part of their plan involves adopting the core area strategy that Wyoming has already established." Schwab said, "It's not duplicating; it's utilizing those tools, and it's adding to them. It's a whole host of management actions over our different program areas that we manage." The bureau has "released a draft Environmental Impact Statement on the plan and is hosting a series of public meetings across the state, beginning Monday."

BLM AND FOREST SERVICE ANNOUNCE 2014 GRAZING FEE. The Sioux Falls (SD) Tri-State Neighbor (2/4, 79K) reports that "the Federal grazing fee for 2014 will be \$1.35 per animal unit month (AUM) for public lands administered by the Bureau of Land Management and \$1.35 per head month (HM) for lands managed by the US Forest Service." The article notes that "the 2014 fee is the same as last year's."

Fish and Wildlife Service:

FWS TAKES OFF OREGON CHUB FROM ENDANGERED LIST. The AP (2/4) reports that "a tiny minnow that lives only in Oregon backwaters is the first fish ever taken off U.S. Endangered Species Act protection because it is no longer threatened with extinction." The FWS "was to announce Tuesday that the Oregon chub was recovered, 21 years after it went on the endangered species list." The service will "monitor the fish for nine years to make sure populations continue to grow."

WATER DELIVERIES TO SAN LUIS NATIONAL WILDLIFE REFUGE COMPLEX CUT OFF. The Merced (CA) Sun-Star (2/3, 86K) reports that the wetlands at the San Luis National Wildlife Refuge Complex and the Merced National Wildlife Refuge are "drying up." According to the article, "last week, refuge officials said they were told the Merced Irrigation District would be cutting off water deliveries to the San Luis National Wildlife Refuge Complex, East Bear Creek unit." San Luis National Wildlife Refuge Complex "still receives water from the Grassland Water District and the San Luis Canal Company."

IF DELISTED, GRIZZLY BEARS COULD GET PROTECTIONS SHOULD PROBLEMS ARISE. The Cody (WY) Enterprise (2/4, 20K) reports that "if delisted this year, grizzly bears in Wyoming could get protection status again if problems arise." Chris Servheen, FWS grizzly bear recovery coordinator, said, "If there was some unforeseen problem, like a rapid population decline that threatened the grizzly bear population, the Endangered Species Act provides the US Fish and Wildlife Service with authority to emergency list them by publishing a notice doing so in the Federal Register."

ARIZONA LAWMAKER PUSHING BILL ALLOWING SHOOTING TO MEXICAN GRAY WOLVES. The AP (2/4, Christie) reports that an Arizona lawmaker is "pushing a bill allowing the state agriculture department or a rancher to shoot any Mexican gray wolves they believe have killed livestock regardless of any federal law protecting the endangered species." The legislation "targeting grey wolves was prompted by the reintroduction of the animal in

Arizona and New Mexico and a proposal to allow their numbers to increase." Sen. Gail Griffin "said her push-back against the federal wolf recovery efforts is needed to protect people and livestock in rural Arizona."

ADDITIONAL COVERAGE: GRAY WOLF POPULATION GROWING. Additional coverage of the FWS survey that found an increase in the number of Mexican gray wolves roaming eastern Arizona and western New Mexico was provided by the [Cronkite News](#) (2/4).

Securing America's Energy Future:

Renewable Energy:

FWS APPROVES MEASURES TAKEN BY WIND PROJECT TO REDUCE BAT DEATHS. The [Baltimore Sun](#) (2/3, Wheeler, 812K) reports that Exelon Generation, which owns and operates the 28-turbine Criterion wind project built in 2010 in Garrett County, has formalized conservation measures to avoid and minimize effects of the wind project on endangered Indiana bats and other wildlife. The firm "also has agreed to install a protective gate over a bat cave in a neighboring state as mitigation for its turbines possibly killing one or more Indiana bats." Julie Slacum of the FWS said "bird kills have come down dramatically by turning off lights on the turbines and outbuildings at night."

Also reporting on the story is the [Cumberland \(MD\) Times-News](#) (2/4, 71K).

Onshore Energy Development:

BLM EXTENDS PUBLIC COMMENT PERIOD FOR PROPOSED GAS PROJECT. The [Deseret \(UT\) News](#) (2/4, 274K) reports that the BLM is "extending the public comment period to review the Monument Butte Draft environmental impact statement and submit written comments until March 5." Juan Palma, BLM Utah state director, said, "We remain committed to facilitating oil and gas development on public lands in Utah using a balanced approach that ensures we are managing BLM Utah lands with full public input and participation."

ADDITIONAL COVERAGE: GROUP SUES TO GAIN ACCESS TO FRACKING DOCUMENTS. Additional coverage of the lawsuit by Montana Environmental Information Center seeking documents concerning Attorney General Tim Fox's joining other states in protesting BLM plans to regulate hydraulic fracturing on federal land was provided by the [Bozeman \(MT\) Daily Chronicle](#) (2/4, 54K), the [Flathead \(MT\) Beacon](#) (2/4, 15K), the [Montana Standard](#) (2/4, 41K), and [KECI-TV](#) Missoula, MT (2/4, 2K).

Offshore Energy Development:

SHELL STOPPED FROM ARCTIC DRILLING BY NATURE AND COURT. The [Environment & Energy Publishing](#) (2/4, 705) reports that "in the years since Shell acquired its oil-rich Chukchi leases, the need for a comprehensive federal Arctic policy has become increasingly obvious." Now, after "the Circuit Court ruling in January invalidated the 2008 lease sale that launched Shell's six-year Arctic drilling program," the Interior Department's "Arctic drilling program may have to start from scratch." According to the article, "if the administration decides not to challenge the court decision, regulators will face the long and controversial task of rewriting the environmental impact statement that was used to support the nation's first Arctic oil development program in 30 years."

The [Seattle Times](#) (2/4, 1M) editorializes that Shell has been impeded from drilling in offshore Alaska in 2014 by "Mother Nature" and the Ninth US Circuit Court of Appeals. According to the paper, "Shell and others in the industry with drilling aspirations for coastal Alaska are getting some serious reality checks."

LEAKING GULF OF MEXICO WELL CAPPED. Bloomberg News (2/4, Wethe, 1.91M) reports that workers have successfully "halted the flow of natural gas from a blowout well in the Gulf of Mexico" after Rowan Companies "lost control while drilling in shallow waters." The Bureau of Safety and Environmental Enforcement said on February 1 that a plan by EnVen Energy Ventures, "the owner of the well, to pump weighted drilling fluids into the well had been successful."

INDUSTRY OFFICIAL ARGUES FOR OPENING VIRGINIA TO ENERGY EXPLORATION. In an op-ed for the Roanoke (VA) Times (2/4, 259K), Jason Nye, a Roanoke native and senior VP for Statoil, writes that Virginia needs to open up its offshore territory to energy exploration. He says that an API and National Ocean Industries Association study finds that "opening up access off Virginia's coast could generate thousands of new jobs and contribute \$1.9 billion in cumulative revenue to the commonwealth's economy by 2035."

Tackling America's Water Challenges:

CALIFORNIA GOV. BROWN WANTS REPUBLICANS TO BACK OFF DROUGHT PROPOSAL. The Los Angeles Times (2/3, Megerian, 3.07M) reports that California Gov. Jerry Brown said Monday that a Republican effort in Congress to address California's unprecedented drought an "unwelcome and divisive intrusion" in the state's efforts to address the crisis by pitting water users against one another. The Republican proposal, HR 3946, "would send some of the state's water to farmers in the Central Valley." Brown wrote, "It would override state laws and protections, and mandate that certain water interests come out ahead of others. It falsely suggests the promise of water relief when that is simply not possible given the scarcity of water supplies."

The AP (2/4, Williams) reports that Brown sent the letter to "leadership of the House Committee on Natural Resources and California's entire congressional delegation asking them to oppose HR3964, which is scheduled to be taken up this week." However, the House Majority Whip, Rep. Kevin McCarthy, said the "Brown administration's decision puts unsustainable pressure on already dangerously low reservoirs and groundwater reserves," and he "urged the governor to relax state environmental regulations, such as those that protect fish, to allow more water to flow to the parched Central Valley."

Meanwhile, the Environment & Energy Publishing (2/4, 705) reports that "as California's record-breaking drought continues, organic farmers are facing shortages that could jeopardize their production of beef, milk and cheese."

Additional coverage of the drought was provided by the Richmond (CA) Confidential (2/3) and the Riverside (CA) Press Enterprise (2/3, 465K).

Drought Raises Stakes For Bay Delta Conservation Plan. Bloomberg News (2/3, 1.91M) reports that "California's worsening drought is raising the stakes for a \$15 billion plan endorsed by Governor Jerry Brown to build two 30-mile (48-kilometer) water tunnels under an ecologically sensitive river delta east of San Francisco Bay."

The Central Valley (CA) Business Times (2/4, 206) reports that "digging two massive 35-mile-long water tunnels to siphon Sacramento River water into the state and federal irrigation systems will violate air pollution standards, says tunnels critic Burt Wilson of Sacramento." Also, Wilson said that "the real reason for the water tunnels has nothing to do with saving farmers from the drought." Wilson said, "Very nearly on, it became clear to me that the water they wanted to send south was going to be used for fracking purposes."

Commentary. In an editorial, the Los Angeles Times (2/4, 3.07M) criticizes Republicans for bringing "a tired political tactic barely, and laughably, disguised as a remedy for the lack of rainfall." In particular, the paper criticizes the term "man-made California drought" that "House Republicans use to describe the state's current dry condition, as if it were somehow the hand of humankind, environmentalists or, even worse, Democrats that has stopped the snowfall over the Sierra and kept the dams that store water for fields, orchards and homes from being replenished." The Times concludes that "California has a plan — the Bay-Delta Conservation Plan — that has brought together representatives of the competing interests who recognize that they must work together to sustain one another with limited supplies of water," and "the Republican bill would undermine that effort by demonstrating that any agreement can be broken at any time by legislation."

In an op-ed for the Highland (CA) Community News (2/3, 38K), Rick Manning, vice president of public policy and communications for Americans for Limited Government, urges lawmakers "to put partisan wrangling aside and pass legislation that stops the waste of water while still protecting" the Delta smelt. He notes that "the House of Representatives is considering action to help deal with this emergency by considering a measure that would provide for alternative ways of protecting the Delta smelt — a fish that a federal Court has ruled must be protected even at the cost of the state's vast food production capacity." According to Manning, "without Congressional

action to allow the water to return to irrigate crops, the current drought puts the agricultural infrastructure in California at risk."

BOR ANALYZING DEMAND FOR RESORTS AT LAKE BERRYESSA. The [Napa Valley \(CA\) Register](#) (2/4, 36K) reports that "as it prepares to line up long-term contractors for the resorts at Lake Berryessa," the BOR will be analyzing the figures "to gauge the potential tourist demand for recreation at the lake." However, "if the financial analysis isn't favorable," the bureau will "consider shuttering some resorts and focusing on providing great recreational services at the others," according to Peggi Brooks, chief of the agency's Recreation Resources Division.

BOR TO SHUT DOWN SAN JOAQUIN RIVER WATER RELEASES. The [Merced \(CA\) Sun-Star](#) (2/4, 86K) reports "federal authorities are shutting down water releases for the San Joaquin River restoration, making the water available for 30,000 people in small communities who face the possibility of summer with dry taps."

Empowering Native American Communities:

INTERIOR FILES MOTION FOR SUMMARY JUDGMENT IN FREEDMEN CASE. The [AP](#) (2/3) reports that the Interior Department is "asking a federal court to grant tribal citizenship rights to certain descendants of black slaves once owned by members of the Cherokee Nation." Interior Secretary Sally Jewell "filed the motion Friday in federal court in the longstanding case between the descendants, known as freedmen, and the Cherokees." The Interior Department "believes the federal court should declare that the Treaty of 1866, signed between the US government and the Cherokees, gives certain freedmen and their descendants the same rights of native Cherokees."

AP coverage was also picked up by the [Washington Times](#) (2/4, 417K), the [Fresno \(CA\) Bee](#) (2/3, 327K), the [St. Louis Post-Dispatch](#) (2/4, 866K), the [U-T San Diego](#) (2/3, 647K), the [Minneapolis Star Tribune](#) (2/4, 1.14M), the [Ravalli \(MT\) Republic](#) (2/4, 19K), [ABC News](#) (2/4, 3.68M), [Yahoo!](#) (2/4, 17.91M), and [KAAL-TV Austin, MN](#) (2/4, 1K).

COMPACT BETWEEN MASSACHUSETTS, MASHPEE WAMPANOAG TRIBE TO TAKE EFFECT AS FEDERAL LAW. The [Taunton \(MA\) Gazette](#) (2/3, 36K) reports that the BIA on Monday "officially posted notice in the federal register that the gambling compact between the state and the Mashpee Wampanoag tribe is going into effect." Tribal Chairman Cedric Cromwell said in a statement, "It's now official. Today is a day of great significance for the Mashpee Wampanoag Tribe. The Tribal State Compact was officially placed in the Federal Register today and will now take effect as federal law. This is another important step towards the Mashpee Wampanoag Tribe bringing Project First Light destination resort Casino to the Great City of Taunton, creating much needed jobs, and a tremendous economic uplift for the people of Southeastern Massachusetts, City of Taunton and the Mashpee Wampanoag Tribe."

TRIBE, FAMILY IN DISPUTE OVER SEWER PUMP. The [U-T San Diego](#) (2/3, 647K) reports that "members of a family on the Pala Indian Reservation say the tribe put a large sewer pump on their property without their knowledge or permission." According to the article, "Vincent Maruffo, whose family owns a 2-acre property north of state Route 76, said the pump was built on the land seven years ago but no one contacted the family for permission." Now, "the tribe and the family are talking about how to resolve the problem." Doug Elmetts, a spokesman for Pala, said tribal leaders are working with the BIA to reach an agreement with the family.

NATIVE AMERICAN ORGANIZATIONS SEEK CHILD WELFARE PROBE. The [AP](#) (2/4, Wozniacka) reports that "four national Native American organizations on Monday asked the US Department of Justice to launch an investigation into the treatment of American Indian and Alaska Native children in the private adoption and public child welfare systems, saying civil rights violations there are rampant." The organizations "also called for the federal government to take a stronger role in enforcing compliance of the Indian Child Welfare Act."

Also reporting on the story is the [New York Times](#) (2/4, Frosch, Subscription Publication, 9.61M).

COBELL LAND BUY BACK PLAN CRITICIZED AS "FLAWED". For the [Indian Country Today Media Network](#) (2/3, 21K), Jay Daniels writes that the "present Cobell Land Buy Back Program is very flawed." Daniels raises

questions about the recent offers "issued to acquire interest on the Pine Ridge and Makah reservations." He claims that "they most likely conducted a market analysis which doesn't value property which should be based on improvements individually on each tract such as utilities and access." Daniels argues that "if this program can be salvaged, BIA needs to place folks in those positions who have worked for years in the land acquisition program to make the process faster and smoother."

The piece is excerpted at the [Nation Sun News \(2/4\)](#).

Top National News:

LEW WARNS CONGRESS THAT THE DEBT CEILING MUST BE RAISED WITHIN WEEKS. Treasury Secretary Lew's Monday comments on the need for Congress to approve an increase in the debt ceiling no later than the end of the month generated print and online coverage but were not covered on any of the network newscasts Monday evening – nor did Lew prompt much discussion about the related issues on cable news.

Lew's comments were the subject of a segment on Fox News' Special Report (2/4, 2.15M). Fox's Bret Baier said, "We are less than 100 hours away from another deadline over the Federal budget," and "this time it's the debt ceiling, which once again is hanging over the government's head." Correspondent Mike Emanuel went on that on Monday, Lew said "failure to extend the debt ceiling is not an option." Lew was shown saying, "It's not acceptable, and frankly, it's not acceptable to the leadership on either side, which is why I am confident it will be addressed." Several reports this morning interpret that remark as a sign that, despite his warnings about the impact of a sovereign default, Lew is relatively optimistic about the eventual outcome of the process.

On Bloomberg TV's Taking Stock (2/4), Bloomberg chief Washington correspondent Peter Cook reported that "both Republicans and Democrats say they do not have an appetite for another showdown...but no one, so far, has come up with a deal that would allow...the Administration to increase the debt ceiling, yet still give Republicans something in return, something to show for their efforts."

USA Today (2/4, Korte, 5.82M) reports that on Monday during a speech at the Bipartisan policy Center, Lew "renewed his call for Congress to extend the debt limit before it 'can cause harm to our economy, rattle financial markets and hurt taxpayers.'" Lew warned that Treasury "expect[s] our outlays over the coming weeks to exceed our net inflows." According to USA Today, House Republicans "have been using the debt limit as a bargaining chip," but "appear to be less likely to force the issue this time around." The Los Angeles Times (2/4, Puzzanghera, 3.07M) quotes Lew as saying, "The fact is, simply delaying action on the debt limit can cause harm to our economy, rattle financial markets, and hurt taxpayers."

Bloomberg News (2/4, Katz, Klimasinska, 1.91M) noted that Lew "said some measures that the Treasury has previously used to remain under the debt limit aren't available this time," and reiterated that "no administration should have to 'pay a ransom so that the United States can pay its bills.'" Bloomberg reported that Lew also made the case that the economy is "poised for growth in 2014." Under the headline, "Treasury's Lew Warns That U.S. Default Could Happen Quickly," Reuters (2/4, Lange) reports that Lew said Monday, "I'm not sure this is the year for the long-term fiscal challenge to be dealt with. . . We have a little time to deal with the longer term." AFP (2/4) has a report on Lew and the debt ceiling, and the AP (2/4, Crutsinger) also briefly notes Lew's BPC speech.

NPR (2/4, Memmott, 465K) reported that in an interview for NPR's All Things Considered on Monday, Lew said Treasury "can make adjustments to its accounts that allow the government to keep paying its bills a bit beyond this week — but only through the end of the month at most." NPR says Lew was "optimistic that an agreement to raise the debt limit above its current level – approximately \$17.2 trillion – will be reached soon," but also "pointed to what he believes is the flaw in the argument by some lawmakers that the limit should not be increased unless equivalent spending cuts are made." Lew said, "Just a few weeks ago, Congress enacted a budget — a two-year blueprint. Just a few days ago, Congress enacted an appropriations bill pursuant to that two-year budget. Now the question is, will we pay the bills that that budget calls to be racked up? I think that the notion that after Congress passes a budget, to then demand additional budget cuts in order to pay the bills that were already incurred, doesn't make any sense."

The Wall Street Journal (2/4, Paletta, Subscription Publication, 5.91M), in an article titled, "Treasury's Lew Says

'Time Is Short' For Debt-Ceiling Fix," also reports that Lew says he objects to twinning any sort of budget negotiations with Congress's periodic votes on raising the debt ceiling.

The Washington Post (2/4, Yang, 4.28M) reports that in regards to the debt ceiling, "Congress...is moving at a relatively glacial pace." The Post adds that last week, House Republicans "emerged from their annual policy retreat without a strategy for raising the debt limit," but "the most popular option under discussion...would combine a one-year extension of the debt limit with a ban on 'bailouts' for health insurance companies under the Affordable Care Act."

On Fox News' Special Report (2/4, 2.15M), correspondent Mike Emanuel reported that on Sunday, Rep. Paul Ryan (R-WI) said the Administration "shouldn't be surprised lawmakers want something in exchange" for raising the debt ceiling. Rep. James Lankford (R-OK) was shown saying, "We should bring Harry Reid and the President and the House of Representatives to the table and say how do we get our nation out of debt? This is the moment to talk about this."

The Los Angeles Times (2/4, Puzanghera, 3.07M) reports that on Sunday, House Majority Leader Eric Cantor said, "I'm hopeful that the president and the Senate will work with us in the House to actually do what has typically been done with debt ceilings, which is making some progress toward addressing the spending problem in Washington, making some progress toward trying to grow the economy around the debt ceiling."

Bloomberg News (2/4, Katz, Klimasinska, 1.91M) noted that last week, Sen. John Thune said, "I suspect that with Democrats, there are probably enough Republicans in the Senate that would vote for a clean debt limit increase."

TIME's (2/4, 21.77M) Charlotte Alter says a "debt stand-off" last year "caused a plummet in consumer confidence and rattled financial markets." But Mark Trumbull, in a piece for the Christian Science Monitor (2/4, Trumbull, 540K) titled, "Oh No! US Is Near Debt Ceiling Again. So Why Isn't Anyone Panicking?" says that "whatever else investors are worried about...it's not fear that the US will default on its national debt."

PRESIDENT SAYS HE IS AWAITING KERRY'S INPUT ON KEYSTONE XL. Reuters (2/4, Rampton, Holland) reports that in a Fox News interview, President Obama stressed that he would make the final decision on the Keystone XL pipeline, while also downplaying the number of jobs the project was likely to create. He also suggested that he was waiting for the Secretary of State's input. On Fox News Channel's The O'Reilly Factor, the President said, "The process now goes: agencies comment on what the State Department did, public's allowed to comment, Kerry's going to give me a recommendation."

Politico (2/4, Guillen, 464K) reports that Bill O'Reilly "said the proposed pipeline would create 42,000 jobs, but Obama cut in." Obama said, "First of all, it's not 42,000. That's not correct. It's a couple thousand to build the pipeline." However, the final Environmental Impact Statement released on Friday by State "concluded that building the pipeline would support 42,100 jobs during construction." Still, "critics of the proposed pipeline have long pointed out that those jobs are short lived."

IMF Says New Pipelines Key To Boosting Canada's Economy. AFP (2/4) reports that an IMF report released Monday predicted that Canada's economy will gain strength in 2014, but "it is crucial for growth that new pipelines are built to transport its oil to new markets." The IMF said, "Broadening market access to Canada's energy resources are key to boost growth potential," adding, "The energy sector could be a source of both downside and upside risks, largely depending on progress in addressing infrastructure bottlenecks."

Producers Develop More Options, Reducing Demand For Keystone. Bloomberg News (2/4, van Loon, Penty, 1.91M) says that now that the Federal government "has cleared" the pipeline "of any dire environmental impact," attention is turning to the economic reasons for its creation. However, after waiting five years for approval, the need for the pipeline "isn't as urgent" for companies such as Suncor Energy, Cenovus Energy, and Canadian Natural Resources. Producers have become "less reliant" on the pipeline as "new rail terminals increase their ability to ship oil on trains, said Todd Kepler, an analyst at Cormark Securities Inc."

State Department Report Highlighted Risk Of Oil Trains. Reuters (2/4, Leff, Rampton) reports that if Keystone is not built, the surge of oil trains from Canada may result in an average of six additional rail-related deaths each

year, according to the State Department report. The report said that shipping the Keystone crude via trains "would result in an estimated 49 additional injuries and six additional fatalities for the No Action rail scenarios compared to one additional injury and no fatalities" if the pipeline was built.

STOCKS TANK ON WEAK MANUFACTURING REPORT. The sharp drop in the stock market was by far the leading economic story of the latest news cycle. NBC Nightly News (2/3, story 2, 0:35, Williams, 7.86M) reported that Monday "was the worst day of our still new year on Wall Street" in what "has so far been a bad year already." NBC says that "All of this will be on the mind of Janet Yellen, sworn in today as the new head of the Federal Reserve."

The CBS Evening News (2/3, story 3, 1:55, Pelley, 5.58M) also reported that the "stock market has had its worst day in more than seven months." CBS (Christoforous) added that the drop "followed a weaker-than-expected manufacturing report that said growth in orders from machinery and other large factory goods dropped by the most 33 years." In addition, "slower growth in China and in other developing economies added to investor pessimism." The piece did feature an analysts saying that the drop was a "healthy thing," as "we can't have the markets always moving up in one direction. There has to be a two steps forward one step back approach to our market."

ABC World News (2/3, story 3, 1:50, Sawyer, 7.43M) reported on the "stock market falling," and ABC (Jarvis) added, "Driving the big drop, news, today, that American factories are turning out products at their weakest pace in eight months." Also impacting the markets is "the weather," with "cold and snow grinding businesses to a halt," which has "investors worried it will have a spillover effect on jobs."

The New York Times (2/4, Popper, Subscription Publication, 9.61M) reports that "disappointing" economic data on Monday pushed the stock market to "its worst day in an already bad year." Stocks started the day "up slightly" but "fell steadily after a closely watched survey of sentiment in the manufacturing sector fell much more than expected in January, setting off fears that the broader economy may be weaker than anticipated."

The Wall Street Journal (2/4, Strumpf, Subscription Publication, 5.91M) reports that the Dow Jones Industrial Average fell 326 points, or 2.1%, to 15,373, while the S&P 500 was down 40 points, or 2.3%, to 1,742. The Nasdaq Composite Index dropped 107, or 2.6%, to 3,997.

McClatchy (2/4, Hall, 95K) calls the decline "an auspicious start of Janet Yellen's first day on the job as chair of the Federal Reserve." Stocks "dipped sharply after a weak report on manufacturing, coming on the heels of other recent soft data and a dismal December jobs report." The data together "puts a heightened expectation on January hiring numbers," expected from the Department of Labor on Friday. Monday "marked the seventh time since the start of 2014 that stocks posted triple-digit daily losses."

The Washington Post (2/4, Schneider, 4.28M) reports that the markets "continued a dreary 2014 with another broad decline as investors hedged against the possibility that the economic recovery is on shaky ground." The drop on Wall Street and "in other major trading centers come at a delicate time for U.S. and world economies," as the Fed has begun to taper its stimulus programs, "leaving investors guessing about how the transition to more normal monetary policy will work and what weaknesses it might expose in countries or companies that have become dependent on easy money."

In an editorial, the Wall Street Journal (2/4, Subscription Publication, 5.91M) writes that stocks soared last year, up about 30% including dividends, so the 5% selloff last month seems like normal profit taking. However, the sharp drop on Monday suggests that something else may be at work. However, the Journal says that it expects the economy to continue to grow modestly, but warns that government taxes and regulations are hindering productivity and business growth.

In an op-ed for the Wall Street Journal (2/4, Subscription Publication, 5.91M), Edward C. Prescott and Lee E. Ohanian, both professors of economics, write that the President said that Washington needs to do more to boost small businesses and entrepreneurs, and they argue he should begin by reviewing his own policies. The argue that the slowdown in productivity growth in recent years is likely to have long-term effects on standard of living, and could cause serious harm if the trend continues. In addition, they write that the nation needs more business startups, but many government policies favor existing businesses, crowding out newcomers.

Manufacturing Sector Growth Slowed Sharply In January. Bloomberg News (2/4, Stilwell, 1.91M) reports that the Institute for Supply Management's manufacturing index fell to 51.3 in January from 56.5 in December, a far sharper decline than the drop to 56.0 expected by economists. Still, a reading above 50.0 indicates that the sector is still expanding. The drop, Bloomberg says, came as "older-than-usual winter weather slowed demand and production, bringing a halt to recent momentum in US manufacturing."

Weather Blamed For Poor January Auto Sales. The New York Times (2/4, Trop, Subscription Publication, 9.61M) reports that on Monday, automakers reported "sharp declines" in US sales in January as "a harsh freeze and winter storms thwarted purchases across much of the country." GM sales fell 12% last month, while Ford reported a 7% decline. However, Chrysler reported its sales rose 8% "for its best January sales performance in six years." The Times says that "automakers and analysts blamed the extreme weather for the drop, explaining January's performance as a blip unlikely to dampen the automotive recovery."

The Wall Street Journal (2/4, Ramsey, Kell, Subscription Publication, 5.91M) also says that the weather was behind the drop in sales. In addition to the three US automakers, Toyota, Honda and Volkswagen sales also fell. Overall, auto sales were down 3.1% in January from a year earlier.

Bloomberg News (2/4, Trudell, 1.91M) reports that industry "trailed analysts' estimates that had called for the eking out of a sales increase during the coldest January in the contiguous US states since 1994, according to Commodity Weather Group LLC." Still, the top 3 US brands, GM, Ford and Toyota "have forecast a fifth straight year of rising deliveries in 2014 after the industry totaled 15.6 million in 2013, its best annual result since 2007, according to researcher Autodata Corp."

Reuters (2/4, Klayman, Woodall, Seetharaman) also reports that analysts believe that January's drop is simply a bump in the road.

Fed Says Banks Eased Lending Standards Towards End Of Last Year. The Wall Street Journal (2/4, Leubsdorf, Subscription Publication, 5.91M) reports that US banks at the end of last year made it easier for businesses to borrow, while companies also sought more loans. Business borrowing for capital expenditures was up in Q4 2013, while the demand for commercial real-estate loans was also up. However, the consumer lending was mixed.

Business Revenue Hit By Falling Prices. The Wall Street Journal (2/4, Francis, Subscription Publication, 5.91M) reports that US companies are seeing the prices on a number of their key products fall, limiting their revenue growth. Companies ranging from GE to Kimberly-Clark to McDonald's said that a combination of lower demand, stiffer competition and pressure from penny-pinching consumers are responsible.

Tax Changes May Be Setting Markets Up For Volatile Year. In an op-ed for the Wall Street Journal (2/4, Subscription Publication, 5.91M), Red Jahncke, president of the Townsend Group, writes that the sharp drop in the markets so far this year may presage a volatile year. While the slowdown in US manufacturing and trouble in emerging markets play a part, the activity is also being driven by tax code changes. Jahncke writes that near the end of the 2012, many investors sold off long-term positions to take advantage of Bush-era 15% long-term cap gains tax rate, which rose to 23.8% in 2013. Consequently, as the market surged last year, a higher-than-normal portion of investments were short-term positions. Given the far higher tax rates on those investments, investors were hesitant to sell them. Throughout this year, those investments will cross the 12-month threshold to be considered long-term investments, allowing investors to realize their gains at a lower tax rate, and likely to spur selling.

USA Analysis: Tech Jobs Driving American Dream. USA Today (2/3, Shinal, 5.82M) reports that a new report from the National Bureau of Economic Research "calculated how likely it was for a US family to go from the bottom fifth in annual income to the top fifth in one generation." The top two locations for that to happen were in San Jose and San Francisco, where 12.9% and 12.2% of people respectively made the advance. What the top ten list of cities in that study all have in common is "a lot of high-paying tech jobs, according to separate data from the Bureau of Labor Statistics." The number three city was Washington DC and the number six was New York, the only metro areas that had "even more tech workers than San Jose, as of 2010."

Editorial Wrap-Up:

NEW YORK TIMES. "The Mayor And The Unions." The New York Times (2/4, Subscription Publication, 9.61M) in an editorial writes on Mayor Bill de Blasio's coming budget. Key to the success of his plans is "negotiating new contracts with nearly all the city's labor unions." The unions in question are seeking "retroactive pay totaling more than \$7 billion." The Times says that if de Blasio is hoping to preserve any money for his policy goals, he will have to "take the lead to demand more of his friends by changing work rules and extracting savings in runaway health care and pension costs." The paper suggests that to succeed, he must "be bold to the point of confrontational, to endure name-calling, resentment and lower poll numbers."

"Democracy In Thailand, Interrupted." In an editorial, the New York Times (2/4, Subscription Publication, 9.61M) decries the disruption of Thailand's election by protesters which means that the country "will remain in a limbo for months as election authorities try to conduct elections in those districts where protesters prevented a vote from taking place." The Times notes that indefinite delay of the elections would make Thailand's "deep divisions" worse "and the continuing political strife would further undermine Thailand's already shaky economy." The Times adds that if the opposition is serious about "reducing corruption and strengthening the democracy, it should end the protests and propose clear and detailed reforms that voters can accept or reject."

"A Chill On Speech." An editorial in the New York Times (2/4, Subscription Publication, 9.61M) argues against a bill in the New York Legislature to "bar state financing for academic groups that have taken official action to boycott higher-education institutions in Israel," calling it "would trample on academic freedoms and chill free speech and dissent."

"Firearms' Toll Among The Young." The New York Times (2/4, Subscription Publication, 9.61M) editorializes about gun violence, noting that while the "world at large heard instantly about the school massacre in Newtown, Conn., where 20 youngsters were murdered in 2012 in a terrifying spree of gunfire," less notices "but no less horrific is the unending toll from the more routine bursts of gunfire that each day send an average of 20 American children and adolescents to hospitals, many of them for long-term treatment." The Times concludes that "the wounding and death of youngsters is a national health crisis that deserves far more attention — no easy task when the gun lobby continues to block research and data collection about guns."

WASHINGTON POST. "A Syrian Reset." An editorial in the Washington Post (2/4, 4.28M) says that if reports that Secretary of State Kerry acknowledged that the Administration's Syria policy is failing are true, "he would deserve credit for finally recognizing realities that he and President Obama have glossed over for too long." The Post argues that the Administration should reconsider its Syria policy and suggests that as a start, it "could join an effort by allies on the U.N. Security Council to win passage of a resolution that calls on Syria to cooperate with the delivery of humanitarian supplies and authorizes U.N. agencies to operate in areas outside government control."

"An Opportunity For Va. Dreamers." In an editorial, the Washington Post (2/4, 4.28M) criticizes Virginia for not allowing illegal immigrants to attend public universities at "heavily subsidized" in-state rates. The state, "having invested heavily in educating undocumented students through high school, squanders their potential by making college prohibitively expensive." The Post says that Republicans in Richmond "face a moment of self-definition," with an opportunity to "embrace the new tolerance" that Boehner "advocated in urging immigration reform, including opportunity for undocumented immigrants brought to the United States as children through no choice of their own."

"Too Many Cooks." The Washington Post (2/4, 4.28M) in an editorial criticizes Washington, DC Council member and mayoral candidate David A. Catania (I-At Large), who, it says works by identifying "something that is working reasonably well and offer proposals that threaten to undo that success." As an example, the Post says his recent proposal for "a new program of college scholarships," may threaten the existing and "popular D.C. Tuition Assistance Grant (TAG) program" which is funded by the Federal government. Catania argues that his plan "will supplement, not supplant, the federal program." The Post urges the DC Council to reject the plan and develop one "that doesn't risk" harming the TAG program.

WALL STREET JOURNAL. "The Great Chinese Internet Crash." An editorial in the Wall Street Journal (2/4,

Subscription Publication, 5.91M) cites an attempt by China to keep Chinese Internet users from accessing websites which help users evade firewalls which accidentally crashed Internet service in China and argues that an appropriate US response to the Chinese government's crack down on foreign media might be to increase government support for the kind of firewall-circumvention tools the Chinese were trying to suppress. The Journal notes that doing so could help breach China's firewall, or even bring it down altogether.

"The 2014 Selloff." In an editorial, the Wall Street Journal (2/4, Subscription Publication, 5.91M) writes that stocks soared last year, up about 30% including dividends, so the 5% selloff last month seems like normal profit taking. However, the sharp drop on Monday suggests that something else may be at work. However, the Journal says that it expects the economy to continue to grow modestly, but warns that government taxes and regulations are hindering productivity and business growth.

"Voting Rights Rewind." The Wall Street Journal (2/4, Subscription Publication, 5.91M) editorializes that liberals in Congress are trying to play racial politics with some states by introducing a bill to revise a section of the Voting Rights Act of 1965 that was struck down by the Supreme Court last year. The section required that electoral changes in states with a history of racial bias in voting had to be pre-approved by the Justice Department. The new law would reinstate that requirement for Texas, Louisiana, Mississippi and Georgia for what the lawmakers argue is evidence of racial bias in those states' voting laws. The Journal argues that this is simply another example of the political abuse of the Obama Administration, and urges Congress to vote it down.

Witnesses: Panel I: Gino Costa, Ph.D., President, Ciudad Nuestra, (Appearing via teleconference). Panel II: Celina B. Realuyo, William J. Perry Center for Hemispheric Defense Studies, Professor of Practice of National Security Affairs, National Defense University; Douglas Farah, Senior Associate, Americas Program, Center for Strategic and International Studies; Michael Shifter, President, Inter-American Dialogue. <http://foreignaffairs.house.gov/hearing/subcommittee-hearing-terrorist-groups-latin-america-changing-landscape> Location: 2172 Rayburn.

2 p.m. **RULES** — Hearing on H.R. 3964 Sacramento-San Joaquin Valley Emergency Water Delivery Act; H.R. 2954 To authorize Escambia County, Florida, to convey certain property that was formerly part of Santa Rosa Island National Monument and that was conveyed to Escambia County subject to restrictions on use and reconveyance. Location: H-313 The Capitol.

2 p.m. **SCIENCE, SPACE, AND TECHNOLOGY** — Subcommittee on Space hearing on “Necessary Updates to the Commercial Space Launch Act.” Witnesses: Dr. George Nield, Associate Administrator for Commercial Space Transportation, Federal Aviation Administration; Alicia Cackley, Director of Financial Markets and Community Investment Team, Government Accountability Office; Dr. Henry Hertzfeld, Research Professor of Space Policy and International Affairs, Elliot School of International Affairs, George Washington University. <http://science.house.gov/hearing/subcommittee-space-hearing-necessary-updates-commercial-space-launch-act> Location: 2318 Rayburn.

Other: Feb. 3 – 4. **DEPARTMENT OF JUSTICE** — 9 a.m. National Commission on Forensic Science meets. 11 a.m. Deputy Attorney General James M. Cole will deliver remarks. All media must present government-issued photo I.D. (such as a drivers license) as well as valid media credentials. Media must RSVP to Stephen Ratner at 202-514-2007 or Stephen.Ratner@usdoj.gov. Press inquiries regarding logistics should be directed to the Office of Public Affairs at 202-514-2007. Location: Office of Justice Programs, 3rd floor ballroom, 810 7th St. NW.

NYS SCHOOL BOARDS ASSOCIATION — 8 a.m. Acting Deputy Secretary of Education Jim Shelton will give remarks and participate in a question and answer session at the New York State School Boards Association’s Congressional Breakfast. (The breakfast is being hosted by New York’s U.S. Sens. Charles Schumer and Kirsten Gillibrand.) Location: Kennedy Caucus Room, 325 Russell.

BLOOMBERG – REPRESENTATIVE SHUSTER — 8:30 a.m. – 11:30 a.m. Bloomberg Government Event February 4th vAmerica on the Move: Investing in U.S. Infrastructure. Speakers: Chairman Bill Shuster (R-PA), House Committee on Transportation and Infrastructure; Victor Mendez, Acting Deputy Secretary, U.S. Department of Transportation; Governor Ed Rendell, Co-Chair, Building Americas Future; Secretary Ray LaHood, Co-Chair, Building Americas Future. Media Credentials: contact Lindsay Bomar at lbomar1@bloomberg.net Location: Bloomberg Government, 1101 K St. NW Suite 500.

UI BENEFITS — 9:30 a.m. U.S. Senator Jack Reed (D-RI) and AFL-CIO President Richard Trumka will lead a press conference call to help rally support for renewing unemployment insurance (UI), just before an expected

vote on a straight-forward continuation of UI for three months, retroactive to December 28. Also with Americans United for Change President Brad Woodhouse.

POLICY LINK – POVERTY SOLUTIONS — 10 a.m. Education Secretary Arne Duncan, Housing and Urban Development Secretary Shaun Donovan, Agriculture Secretary Tom Vilsack and White House Domestic Policy Director Cecilia Munoz participate in Policy Links panel discussion “Going Local: Place-Based Solutions to Combat Poverty.” The discussion will focus on Promise Zones, the president’s initiative to bring together local communities and businesses to create jobs, increase economic security, expand educational opportunities, increase access to affordable housing and improve public safety. Location: Columbus Club, Union Station, 50 Massachusetts Ave. NW.

BPC – FOREIGN POLICY – CONGRESS — 10 a.m. – 11:30 a.m. On Leadership: Foreign Policy in Congress. John Hempelmann President, Henry M. Jackson Foundation. Panel discussion featuring: Senator Richard Lugar (R-IN), President, The Lugar Center; Congressman Norm Dicks (D-WA), Senior Policy Advisor, Van Ness Feldman. Moderator: John Fortier, Director, BPC’s Democracy Project. <http://bipartisanpolicy.org/events/2014/02/leadership-foreign-policy-congress> Location: 1225 Eye St. NW.

USDA – CALIFORNIA PRODUCERS — 12:45 p.m. Agriculture Secretary Tom Vilsack, Congressman Jim Costa and California Department of Food and Agriculture Secretary Karen Ross will host a media conference call to announce additional USDA assistance for California producers affected by the prolonged west-coast drought.

Last Laughs:

LATE NIGHT POLITICAL HUMOR.

Jay Leno: [In reference to the Denver Broncos’ Super Bowl performance] “In fact, the team was so ineffective, today they were invited to join the Obama Administration.”

Jay Leno: [Referencing the bridge scandal] “And while he was at the game, Governor Chris Christie was up to his old tricks. Turns out he blocked three lines at the concession stand. Yeah, people couldn’t get around.”

Jay Leno: “Well, before the game yesterday, President Obama was interviewed by Bill O’Reilly. And when asked about the IRS scandal, President Obama told O’Reilly there wasn’t even a smidgen of corruption at the IRS. You know what that means? Even the President of the United States is afraid of the IRS. Okay, how scary is that?”

New deputy director known as 'solid problem solver'

Phil Taylor, E&E reporter

Published: Wednesday, February 5, 2014

The Bureau of Land Management today named Steve Ellis as its deputy director for operations, the agency's second-highest post.

Ellis, who has served as acting deputy director since July, previously spent more than three years as BLM's state director in Idaho, a post that oversees nearly 12 million acres in the Gem State.

PEOPLE

An Illinois native, Ellis has served more than three decades in the federal government, including posts with BLM and the Forest Service in Idaho, Alaska, Oregon, Nevada and Washington, D.C.

"He will bring to his new position not only a tremendous work ethic, but also 21 years as a line officer in both the Forest Service and the BLM," Neil Kornze, the agency's nominated director, said in an email this morning to BLM employees. "Steve brings with him a passion for the land and a love of the outdoors learned at an early age growing up on the family farm in Illinois."

Ellis is BLM's first permanent deputy director since Mike Pool retired in February 2012 after leading the office for nearly three years.

Steve Ellis has worked 21 years as a line officer both for BLM and the Forest Service, including in Idaho, Alaska, Oregon, Nevada and Washington, D.C. Photo courtesy of BLM.

Ellis joined BLM after leaving graduate school in 1979, serving as a forester in Burley, Idaho. While in college, he served as a seasonal wildland firefighter, and he has also worked as budget officer in BLM's headquarters.

In his tenure as Idaho state director, Ellis oversaw tough policy decisions, including protecting sage grouse from energy developments like wind farms – an issue BLM is now grappling with on a national scale.

Ellis also oversaw the controversial siting of the 1,000-mile-long Gateway West transmission line and the renewal of 68 grazing permits under order of a federal district court. BLM reduced grazing levels in southwest Idaho, drawing the ire of some public land ranchers.

Craig Gehrke, regional director for the Wilderness Society, called Ellis a "very solid problem solver" who doesn't get caught up in ideology.

"Steve is one of the best directors we've had here," said Gehrke, who also worked with Ellis on off-highway vehicle issues when Ellis was supervisor of the Wallowa-Whitman National Forest in Oregon. "I appreciate his candor and open-door policy."

As deputy director, Ellis will now oversee the day-to-day activities of an agency that controls about 250 million acres and nearly one-third of the nation's mineral estate. BLM has approximately 10,000 employees and is funded at just above \$1 billion.

He will help oversee BLM's efforts in Western states to prevent an Endangered Species Act listing of the greater sage grouse, amid concerns that those steps could stifle other land uses.

BLM is also in the midst of finalizing a sweeping hydraulic fracturing rule designed to strengthen wellbore integrity and assuage public concerns over the chemicals injected underground in the development of oil and gas.

Ellis earned a bachelor's degree in forestry from Southern Illinois University and a master's degree in geography from Northern Illinois University.

He enjoys riding and packing horses in western Idaho and eastern Oregon and has adopted one BLM wild horse, Saylor. He and his wife, Linda, a nurse practitioner, have raised three children.

DOI in the News:

OREGON TO GET FIVE FLOATING WIND TURBINES. The AP (2/6, Wozniacka) reports that Seattle-based Principle Power has announced plans to build five floating windmill turbines off the Oregon coast which would be the first offshore wind farm on the West Coast. The was announced at a press conference by Gov. John Kitzhaber, Interior Secretary Sally Jewell and BOEM Director Tommy Beaudreau. This is a pilot project that is "not going to be economic out of the gate" according to Beaudreau. Belinda Batten, director of the Northwest National Marine Renewable Energy Center at Oregon State University, says that the initial prices of energy produced on the wind farm will be more expensive than the hydropower from Oregon's dams, but she believes that could change in the future saying "as we learn how to deploy and maintain them, the price will come down." The turbines are expected to be 15 miles off shore in 1,400 feet of water and be 600 feet high.

Bloomberg News (2/5, 1.91M) reports that Jewell said, "There are no floating offshore wind-energy projects in the

United States. How they interact with the fishing industry, how they interact with the marine ecosystem, all of these things need to be understood."

The Oregon Public Broadcasting (2/6, 4K) reports that Jewell said, "Here in the Pacific you have tremendous wind. I have flown kites myself on the Oregon coast, and it gets even windier as you get offshore. ... This pioneering project would demonstrate floating wind turbine technology capable of tapping the rich wind energy resources in deep waters offshore Oregon."

The Los Angeles (CA) Times (2/5, Vartabedian, 3.07M) reports that Principle Power's Vice President for business and government affairs Kevin Banister said that they expect the turbines to operate at "40 percent of their maximum potential generating capacity" which compares to 20-30 percent for California land-based wind farms. The Times also quoted the Sierra Club's western director for its Beyond Coal campaign Bill Corcoran who said "Offshore wind in the right locations is a very promising technology."

Additional coverage by the AP was picked up by the Washington Post (2/5, Press, 4.28M), the Washington Times (2/6, Wozniacka, 417K), the Seattle Times (2/6, 1M), The Oregonian (2/6, 888K), the Eugene (OR) Register-Guard (2/6, 172K), the Lebanon (OR) Express (2/6, 285K), the Spokane (WA) Spokesman-Review (2/6, 214K), the Everett (WA) Herald (2/6, 152K), the Bend (OR) Bulletin (2/6, 94K), the Eugene (OR) Register-Guard (2/6, 172K), the Minneapolis Star Tribune (2/6, Wozniacka, 1.14M), the Durango (CO) Herald (2/5, 28K), the Dubois (PA) Courier-Express (2/6, 1K), the Hanover (PA) Evening Sun (2/6, 38K), the Prince Albert (CAN) Daily Herald (2/5), ABC News (2/6, 3.68M), Yahoo! (2/6, Wozniacka, 17.91M), Yahoo! News Canada (2/6, 76K), Yahoo! Singapore News (2/6, 14K), the Huffington Post (2/5, 11.54M), and KATU-TV Portland, OR (2/6, 105K).

Additional coverage was provided by the reNews (2/6), the Recharge News (2/6, 633), the North American Windpower (2/6, 43K), the Power Engineering (2/6).

SECRETARY JEWELL SUGGESTS PRIZE TO MAKE BETTER WILD HORSE BIRTH CONTROL. The East Oregonian (2/6, 24K) reports that Interior Secretary Sally Jewell calls the nation's wild horse crisis an "intractable problem." During an appearance in Portland, Jewell "suggested that the government needs to offer a big prize to get drug companies to make better birth control for wild horses." At a news conference, Jewell said, "We'd love to have an effective birth control method, we're thinking of sort of an 'X-Prize' type of thing to inspire the pharmaceutical industry to come up with an effective birth control method for horses."

Also reporting on the story are the Centralia (WA) Chronicle (2/6, 41K) and the Oregon Public Broadcasting (2/6, 4K).

BACKCOUNTRY SKIING COULD BENEFIT FROM MODERN-DAY CIVILIAN CONSERVATION CORPS. The Boston Globe (2/6, Thornton, 1.75M) reports that the modern-day Civilian Conservation Corps proposed by Interior Secretary Sally Jewell could boost backcountry skiing and Alpine touring. The article notes that the first CCC "planted the infrastructure for recreational skiing in the Northeast." David Goodman, a ski historian, said, "The ski industry in the Northeast really owes its origin to the Great Depression. It's a very unusual link that people might not be aware of. Were it not for the CCC, we would not have what are now the iconic ski areas of the Northeast."

INTERIOR NOMINEES GRILLED BY REPUBLICAN LAWMAKERS DURING HEARING. The Environment & Energy Publishing (2/6, 705) reports that "in her second round of vetting before the Energy and Natural Resources Committee," Rhea Suh, Interior's assistant secretary for policy, management and budget, was "challenged over grants for energy projects issued by the William and Flora Hewlett Foundation, her previous employer, and her positions on thorny land management decisions facing Interior in Alaska." According to the article, "while Suh is supported by Democrats including committee Chairman Ron Wyden of Oregon and more than a dozen conservation, environmental and sportsmen's organizations of various political persuasions, her responses yesterday did not appear to assuage concerns from Sen. John Barrasso (R-Wyo.) or ranking member Lisa Murkowski (R-Alaska)." Republican lawmakers also "pressed Janice Schneider, the president's pick to become Interior assistant secretary for land and minerals management, on how she would assess the job impacts of a forthcoming agency regulation to protect streams."

INTERIOR SHARES BEST PRACTICES FOR FEDERAL USE OF SOCIAL MEDIA. The Fierce Mobile Government (2/6) reports that Tim Fullerton, digital strategy director at the Interior Department, "spoke last fall

during a DigitalGov University webinar about the benefits of Instagram for federal agencies." According to the article, "picking up more than 130,000 followers since June 2012, DOI is considered something of an Instagram power user in the government space. Instagram is the department's most-followed social account." Fullerton suggests "agencies getting started 'follow back' the first users to follow the account up to a certain point, to grow the accountm," and "he also said agencies should post content that is unique and not available elsewhere, and use relevant and timely hashtags to drive the audience."

SEN. MURKOWSKI WANTS PRESIDENT OBAMA TO "PERSONALLY RECONSIDER" IZEMBЕК DECISION.

Politico (2/6, Guillen, 464K) reports that Sen. Lisa Murkowski wants President Barack Obama to "personally reconsider" the Interior Department's "rejection of a road through the Izembek National Wildlife Refuge to provide emergency access to a rural community."

USDA TO CREATE REGIONAL "CLIMATE HUBS." The AP (2/6, Lederman) reports Agriculture Secretary Vilsack said Wednesday that climate change "is already hurting American farmers and rural residents," citing recent storms, droughts, and extreme cold. Vilsack said, "The combination of all those factors convinces me that the climate is changing, and it's going to have its impact, and will have its impact, and is having its impact on agriculture and forestry."

The New York Times (2/6, Davenport, Subscription Publication, 9.61M) says the USDA is creating "seven regional 'climate hubs' aimed at helping farmers and rural communities respond" to the problem. The hubs will be located in Ames, Iowa; Corvallis, Oregon; Davis, California; Durham, New Hampshire; El Reno, Oklahoma; Fort Collins, Colorado; and Raleigh, North Carolina.

Reuters (2/6, Mason) says the purpose of the hubs will be to provide information and offer risk aid. The Los Angeles Times (2/6, Hennessey, 3.07M) and Washington Times (2/6, Boyer, 417K) also have reports.

ADDITIONAL COVERAGE OF SECRETARY JEWELL'S ROUNDTABLE DISCUSSION ON CLIMATE CHANGE.

Additional coverage of Interior Secretary Sally Jewell's roundtable discussion on climate change at the University of Washington was provided by the Sierra (CA) Sun Times (2/6), KUOW-FM Seattle (2/6, 15K), and KPLU-FM Tacoma, WA (2/6, 16K).

America's Great Outdoors:

National Park Service:

PROPOSAL TO EXPAND WALNUT CANYON NATIONAL MONUMENT REJECTED. The AP (2/6, 417K) reports that the NPS and the Forest Service have rejected a proposed expansion of Walnut Canyon National Monument. Federal officials "concluded that cultural resources in the proposed expansion area don't meet federal requirements for natural significance." The decisions by the agencies "have left expansion supporters hoping for congressional action."

Also covering the story is the Arizona Republic (2/5, 1.19M).

FAA TO PERMIT MORE AIR TOURS AT GRAND CANYON. The AP (2/5, Press, 4.28M) reports that "air tour operators that use aircraft with quiet technology will be able to fly more people over the Grand Canyon." The Federal Aviation Administration said "it plans to release 1,721 flight allocations this year that had been abandoned to those commercial tour operators, as long as their active fleet doesn't increase noise in the park overall."

Coverage by the AP was also picked up by the Washington Times (2/6, Fonseca, 417K) and the Columbus (IN) Republic (2/6, 80K).

NPS CELEBRATING ST. LOUIS' 250TH ANNIVERSARY. The St. Louis Post-Dispatch (2/6, 866K) reports that "on Saturday, February 15, in celebration of the city of St. Louis' 250th anniversary, the National Park Service will host free special events to recognize the rich history of the city and the deep passion of its early founders." Ann Honious, Chief, Museum Services and Interpretation, Jefferson National Expansion Memorial, said, "We are

ecstatic to celebrate St. Louis' 250th anniversary, and are committed to retelling the story of St. Louis' founders and the early days of the city. In conjunction with events organized by stl250, we encourage residents and visitors alike to take this time to learn about St. Louis' fascinating beginnings."

ADDITIONAL COVERAGE: ARIZONA TO BE REIMBURSED FOR GRAND CANYON REOPENING. Additional coverage of Interior Department Assistant Secretary Rhea Suh's commitment that Arizona will be reimbursed for money spent reopening the Grand Canyon during the government shutdown was provided by KTAR-FM Glendale, AZ (2/6, 17K).

ADDITIONAL COVERAGE: RENOVATION OF ST. LOUIS ARCH DELAYED. Additional coverage of the delay in the renovation project on the Gateway Arch in St. Louis was provided by the AP (2/6, 417K).

Bureau of Land Management:

NEW DEPUTY DIRECTOR OF OPERATIONS FOR BLM NAMED. The Twin Falls (ID) Times-News (2/6, 56K) reports that Steve Ellis is the BLM's deputy director of operations. Neil Kornze, the BLM's principal deputy director and acting director, wrote in a letter to staff, "He will bring to his new position not only a tremendous work ethic but also 21 years as a line officer in both the Forest Service and the BLM." Tim Murphy will continue to act as BLM Idaho State Director.

Also reporting on the story is the Idaho Statesman (2/5, 205K).

BLM EXTENDS COMMENT PERIOD ON RIO GRANDE DEL NORTE NATIONAL MONUMENT PLAN. The Albuquerque (NM) Journal (2/6, 288K) reports that the BLM has extended the public comment period on a management plan for the Rio Grande del Norte National Monument in Taos County until March 6.

UTAH LOSES FEDERAL FIRE TRAINING MONEY. The Ogden (UT) Standard-Examiner (2/5, 147K) reports that "faced with the loss of federal revenue, the state forester is asking the Legislature to consider picking up the \$75,000 cost to maintain a training program for local fire departments." The article notes that "the yearly training has been funded with money" from the BLM.

Fish and Wildlife Service:

NEVADA PANEL WEIGHS IN ON SAGE GROUSE OPTIONS. The AP (2/6, Chereb, 417K) reports that "a state panel appointed by Gov. Brian Sandoval to try to head off protections for sage grouse asserts that a course of action preferred by two federal agencies contradicts mandates to manage public lands for multiple use." According to the article, "the Sagebrush Ecosystem Council, in a Jan. 24 response to the federal government, also says a draft environmental impact statement should address beneficial aspects of livestock grazing and predator control." The article notes that a preferred option identified by the BLM and Forest Service would, "among other things, exclude or restrict new recreational facilities, wind and solar energy development, and mineral development in sage grouse habitat." Council Chairman J.J. Goicoechea said, "This appears to be regardless of sage grouse population density, consideration of seasonal habitat requirements or importance of habitat to individual populations." Coverage by the AP was also picked up by the Houston Chronicle (2/6, Chereb, 2.26M) and WRAL-TV Raleigh, NC (2/6, 117K).

The Elko (NV) Daily Free Press (2/6, 22K) reports that Sen. Dean Heller "on Tuesday defended a bipartisan plan based off Gov. Brian Sandoval's sagebrush ecosystem council's recommendations to keep sage grouse off the endangered species list in Nevada." According to the article, "Heller said Tuesday on a conference call with rural reporters he didn't agree sage grouse warranted a listing, but added he believes they will be." Heller said "he'd rather put Nevada land decisions in the hands of Sandoval with input from the sagebrush ecosystem council."

ENVIRONMENTALISTS CLAIM WATER NEEDS OF MINNOW NOT MET. The Albuquerque (NM) Journal (2/6, 288K) reports that "the federal agencies overseeing the Rio Grande have repeatedly failed to meet their legal requirement to ensure river flows and habitat for the Rio Grande silvery minnow, the environmental group WildEarth Guardians claimed in legal notices filed this week." The group alleged "violations of the federal Endangered Species Act" and the notices started "a 60-day clock ticking toward possible litigation."

EXPERT FAULTS FWS' ENFORCEMENT OF BIRD LAW. KCET-TV Los Angeles (2/6, 15K) reports that "there's a problem with the way" the FWS enforces The Migratory Bird Treaty Act, according to a new article in the William and Mary Environmental Law and Policy Review. In his article "Dying For A Solution: Incidental Taking Under The Migratory Bird Treaty Act," environmental attorney and law professor Andrew Ogden claims that the agency "doesn't enforce the law across the board," and instead, it "relies on the discretion of its in-house law enforcement staff to select which MBTA violations it will pursue" Ogden argues "that selective enforcement of the MBTA not only lets many violators off scot-free, but the agency's lack of public oversight into its enforcement decision-making may violate some of the country's most important environmental laws."

KANSAS OFFICIAL EXPECTS FEDERAL ACTION TO PROTECT LESSER PRAIRIE CHICKEN. The Lawrence (KS) Journal World (2/5, 102K) reports that "despite grouching from Gov. Sam Brownback and many legislators, Kansas will face some kind of federal action to protect the Lesser Prairie Chicken, according to the state's top wildlife official." Kansas Department of Wildlife, Parks and Tourism Secretary Robin Jennison told a legislative committee that the FWS will "either put in place a rangewide conservation plan to protect the bird, or list the Lesser Prairie Chicken as a threatened species under the Endangered Species Act." Jennison said, "Kansas would be far better off with the rangewide plan than to have it listed."

CHIRIKOF CATTLE COMMENT PERIOD EXTENDED. The Alaska Dispatch (2/5, 7K) reports that "people concerned about the future of cattle abandoned on two remote Alaska islands will have additional time to come up with ideas about how to manage the animals and the damage they are inflicting on the natural habitat." The manager of the Alaska Maritime National Wildlife Refuge, Steve Delehanty, "has extended to Feb. 20 a deadline for public suggestions about possible solutions to the problems posed by an estimated 800 cattle on Chirikof Island and another 200 on Wosnesenski Island."

HAYING, GRAZING INFORMATION AVAILABLE FOR PUBLIC REVIEW. The Muscatine (IA) Journal (2/6, 20K) reports that the FWS at Port Louisa National Wildlife Refuge has announced that "draft compatibility determinations assessing the use of haying and grazing on refuge lands are available for public review and comment."

COAL-ASH SPILL AT DUKE FACILITY NOT YET CONTAINED. The AP (2/6, Biesecker, 4.28M) reports that Duke Energy crews were still working "to plug a hole in a pipe at the bottom of a 27-acre" coal-ash pond that had already allowed about "27 million gallons of contaminated water" to enter the Dan River. On Wednesday, Federal and state regulators, including the FWS, and Duke Energy personnel collected samples for safety tests, writes the AP, noting that coal ash contains many "toxic chemicals, including lead, arsenic, mercury and radioactive uranium." The company's Dan River facility switched from coal to natural gas in 2012. In a statement Wednesday Duke said "We are committed to closing the ash basins at many of our retired coal plants across North Carolina." In the meantime, Duke insists that the ponds are safe, though critics warn of "the potential for calamity."

Bloomberg News (2/6, Polson, 1.91M) reports that environmental groups accused Duke of doing "nothing to contain the spill," but spokeswoman Meghan Musgrave affirmed that stopping the leak was a priority. She said, "The rate of spillage declined yesterday after the pond emptied and has fluctuated since then because of rain and repairs." A Danville city spokesman told reporters that initial testing had detected no arsenic or other heavy metals. State Department of Environment and Natural Resources Secretary John Skvarla said treated water would be safe to drink. The piece notes that the Environmental Protection Agency is expected to issue coal-ash regulations soon.

Editorial: Delaying Coal-Ash Cleanup Is Negligent. A Charlotte (NC) Observer (2/6, 713K) editorial calls on Duke Energy to clean up its unlined coal-ash ponds, because no amount of monitoring can prevent the unexpected. The clean up will be expensive, "but it's nowhere near the legal and financial cost of a coal ash failure that contaminates a water supply." The Observer points out that two large lagoons near Duke's Riverbend plant hold much more coal ash than the Dan facility pond, and a leak from those lagoons would threaten the drinking water of 800,000 people in the Charlotte area. Duke has said it will clean up the ponds at some point, the piece notes, "But it's becoming negligent to wait."

ADDITIONAL COVERAGE OF OREGON CHUB. Additional AP coverage of the Oregon chub was provided by the Christian Science Monitor (2/5, Barnard, 540K) and the Yamhill Valley (OR) News-Register (2/6, 33K). The

Oregon Herald (2/6) and the Mother Nature Network (2/6, 93K) also reported on the story.

US Geological Survey:

USGS SAYS EARTHQUAKE ACTIVITY AT YELLOWSTONE NATIONAL PARK NOT UNUSUAL. The Newsroom America (2/6) reports that the USGS "says a story circulating across the Internet over the past few days reporting abnormally strong earthquake activity in Yellowstone National Park is wrong." The agency says "earthquake activity in Yellowstone has been at normal levels for the past several months."

USGS SAYS HELICOPTER WILL BE FLYING LOW TO SURVEY GEOLOGY IN MISSOURI. The AP (2/6) reports that the USGS says "it will be sending a low-flying helicopter over portions of eastern Missouri to survey the region's geology." The agency says "the helicopter will be surveying rock layers and mineral deposits under sections of Washington, Franklin and Crawford counties later this month." According to the article, "the survey is expected to lead to maps that will help USGS researchers understand the geology and concealed deposits of important iron-oxide, copper, cobalt, gold and rare earth elements."

Securing America's Energy Future:

Onshore Energy Development:

FORMER ADMINISTRATION OFFICIALS SPEAK IN FAVOR OF KEYSTONE. ABC News (2/6, Weinberg, 3.68M) reports in its "The Note" blog that "several former White House officials are" speaking out in favor of the Keystone XL pipeline. Former Interior Secretary Ken Salazar joined the ranks Wednesday while speaking at an energy conference. The piece says FuelFix.com quoted him: "At the end of the day, we are going to be consuming that oil. So is it better for us to get the oil from our good neighbor from the north, or to be bringing it from some place in the Middle East?" ABC News notes that former national security adviser Tom Donilon expressed tentative support for the project in January, and former Energy Secretary Steven Chu told the Oil & Gas Journal this Monday, "I don't have a position on whether the Keystone pipeline should be built. ... But I will say that the decision on whether the construction should happen was a political one and not a scientific one."

The Hill (2/6, Sink, 194K) reports in its "E2 Wire" blog on the comments made by Salazar and Chu, placing more emphasis on the White House's rejection of the premise that the Keystone decision will be a political one. It says Press Secretary Jay Coney responded to Chu by saying, "The process is designed to be insulated from politics. ... That doesn't prevent people from trying to politicize it."

Separately, The Hill (2/6, Barron-Lopez, 194K) writes in its "E2 Wire" blog, "Salazar told the Associated Press that the pipeline has the potential to be a 'win-win' project," in terms of both conservation and energy security, as long as the "operator was required to meet environmental standards and pay for conservation programs along its route." The Hill also notes Chu's comment, and it adds that Canadian Prime Minister Stephen Harper characterized President Obama's vagueness on the matter as "punting," though Harper said he remains confident the project will eventually proceed.

The AP (2/6, Daly) and FOX News (2/5, 6.72M) also covers this story.

Salazar Believes Fracking Is Safe. FuelFix (2/6, Holeywell, 7K) reports that former Interior Secretary Ken Salazar, speaking at the North American Prospect Expo, said, "I believe hydraulic fracking is, in fact, safe." He also said that there is "not a single case" in which fracking "created an environmental problem for anyone." Salazar said that the energy boom created by fracking is "creating a secure world for ourselves and for our children." Natural Resources Defense Council senior attorney Kate Sinding said, "His comments are a disservice to the people around the country who continue to report problems when fracking comes to town," citing problems with drinking water, property values, population, and "even exploding homes." Salazar also said that he believes the Keystone XL pipeline should be built.

The Washington Examiner (2/6, Schow, 319K) reports that, in his comments, Salazar reaffirmed his support for fracking, "pointing out that there has not been 'a single case where hydraulic fracking has created an environmental problem for anyone.'"

The Daily Caller (2/6, Bastasch, 422K) also quotes Salazar, as well as Chicago Mayor Rahm Emanuel, who said regarding the energy boom brought on by fracking, "The biggest revolution equal to the Internet is the energy independence in the United States."

ENZI TOUTS GAO REPORT AS EVIDENCE COAL IS GOOD FOR ECONOMY. The "Floor Action" blog of The Hill (2/6, 194K) reports that on Tuesday, Sen. Mike Enzi said that a report from the Government Accountability Office "shows his 'anti-coal' colleagues that coal is needed to generate federal revenue." He stated, "Some of my anti-coal colleagues requested a report on the coal leasing program and when the report showed that each year it adds around \$1 billion to the treasury, the coal opponents concentrated on misleading people into thinking the program is not competitive." The report on the coal-leasing program of the Bureau of Land Management "found that more than 40 percent of U.S. coal production in 2012 came from federal leases, which generate revenue."

Additional coverage of the GAO report was provided by the SNL Financial (2/6, 22K) and the Billings (MT) Gazette (2/6, 206K).

WATER DEMAND ASSOCIATED WITH FRACKING RAISING CONCERNS. USA Today (2/6, Schmit, 5.82M) reports fracking is "increasing demands on water supplies already under pressure from drought and growing populations," according to a new report from Ceres, a "green investment group." The "water-intensive process" has "required almost 100 billion gallons of water to drill more than 39,000 oil and shale gas wells in the U.S. since 2011." The report says that 55% of those wells were in "drought-stricken areas, and nearly half were in regions under high or extremely high water stress, such as Texas."

Offshore Energy Development:

SALAZAR TOUTS SAFETY OF OFFSHORE DRILLING. The Oil & Gas Financial Journal (2/6, 425) reports that former Interior Secretary Ken Salazar, speaking at the North American Prospect Expo, said he expects foreign oil imports to "fall to 25% by 2016." He also said that he believes that, following the Deepwater Horizon incident, the Gulf of Mexico is "now one of the safest places to operate in the world."

Also reporting on the story is the Upstream Online (2/6, 20K).

ACTIVISM HINDERING SHELL EXPLORATION, US ENERGY DOMINANCE. Author and consulting meteorologist Anthony J. Sadar writes in an op-ed for the Washington Times (2/6, Sadar, 417K) that "activist environmentalists and activist courts" are preventing Americans from benefiting from Alaska's bountiful oil resources. Despite the establishment of "a successful balance between energy needs and a clean environment," an unspecified decision by the 9th US Circuit Court of Appeals is forcing Royal Dutch Shell to postpone plans for "exploratory drilling in the Chukchi Sea off Alaska's northwest coast." Sadar says Shell is up to the challenge of working in such a hostile environment, but the ideological opposition from activists could threaten US potential as an energy supplier to the world.

PUBLIC CITIZEN BACKS EPA AGAINST BP SUSPENSION SUIT. National Journal (2/6, German, Subscription Publication, 427K) reports that Public Citizen, an advocacy group, is fighting BP's effort to "end its suspension from receiving new federal contracts, a sanction that stems from the oil giant's 2010 Gulf of Mexico spill." The group filed a brief on Tuesday in defense of the EPA in BP's suit "against the agency to overturn the suspension." The amicus brief says that Public Citizen "believes that EPA's suspension decision reflects an appropriate exercise of EPA's express statutory and regulatory authority and will have the effect of protecting the public by preventing expenditures of government funds to benefit an enterprise whose history demonstrates that its corporate practices create ongoing threats to the environment, to U.S. workers, and to the public at large."

Tackling America's Water Challenges:

FEDERAL OFFICIALS ANNOUNCE ANOTHER \$14 MILLION FOR CALIFORNIA DROUGHT. The AP (2/5, Press, 4.28M) reports that "federal officials on Wednesday pledged more money to help California cope with its severe drought as state fishing regulators shut down recreational angling on portions of two water-starved rivers because of concerns about the survival of salmon and steelhead trout." The BOR and Natural Resources

Conservation Service "announced another \$14 million for water management improvements in the state, a day after Agriculture Secretary Tom Vilsack committed \$20 million."

Also reporting on the story is Bloomberg News (2/5, 1.91M), FOX News (2/5, 6.72M), KFSN-TV Fresno, CA (2/6, 2K), and KTVU-TV San Francisco (2/6, 128K).

House Passes Legislation To Allocate More Water For Irrigation. Bloomberg News (2/5, 1.91M) reports that "the US House passed legislation that would allocate more water for irrigation in parts of California to help ease a worsening drought, a measure opposed by President Barack Obama's administration." According to the article, "the legislation is part of a longstanding fight in California over water rights that pits farmers against fishermen." The Obama Administration said in a statement that the House measure would "undermine years of collaboration between local, state and federal stakeholders to develop a sound water quality control plan."

Also reporting on the story is the McClatchy (2/5, Doyle, 2.32M).

Additional Coverage Of Drought. Additional coverage of the drought was provided by the Fresno (CA) Business Journal (2/6, 160K) and the Visalia (CA) Times-Delta (2/5, 42K).

CONTRACTOR WORKING TO CLEAR ELEPHANT BUTTE RESERVOIR CHANNEL OF SEDIMENT. The AP (2/6, 417K) reports that the BOR and the Interstate Stream Commission are "working with a contractor to clear sediment from a 20-mile-long channel that leads to Elephant Butte Reservoir." According to officials, "having the channel clear allows for more water to make it to southern New Mexico farmers and for the state to meet its water delivery obligations to Texas." The maintenance is expected to continue through March.

Also reporting on the story is the Fort Worth (TX) Star-Telegram (2/5, 596K).

Additional coverage by the AP was picked up by the Columbus (IN) Republic (2/6, 80K).

LEWIS & CLARK WATER PROJECT WAITING ON FUNDING. The Sioux Falls (SD) Tri-State Neighbor (2/6, 79K) reports that the Lewis & Clark Regional Water System is "playing a waiting game this month to see whether it will receive any additional funding from the federal government so that construction can resume on water pipelines." The article notes that "a bill approved last month as part of the government's budget for this year provides \$3.2 million for project construction, but Troy Larson, the system's executive director, said that's far short of what's needed to resume construction." Instead, project officials are hoping "on obtaining more funding from an additional \$27 million that was included in the budget bill."

BOR TO REDUCE FLOWS FROM PALISADES RESERVOIR. KIFI-TV Idaho Falls, ID (2/6, 23K) reports that the BOR is cutting flows from Palisades Reservoir starting Wednesday. According to the article, "flows on the South Fork of the Snake River will be decreased from 1200 cubic feet per second to 900 cfs through Saturday."

BOR ACCEPTING RESERVATIONS FOR BLACK CANYON DAM PARK FACILITIES. The Emmett (ID) Messenger-Index (2/6, 22K) reports that the BOR is now "accepting reservations for the gazebos and shelter facilities at the five parks near Black Canyon Dam in advance of its summer season from May 19 to Sept. 1." Supervisory park ranger Doug Goff said, "We are thinking ahead to warm summer days and getting ready to assist people who want to reserve the park facilities. Anyone who would like to reserve the gazebos in advance is invited to contact us for help."

BOR TESTING CHANGES TO CANYON FERRY LAKE CAMPGROUND RESERVATIONS. KXLH-TV Helena, MT (2/6, 1K) reports that the BOR is "going to test a new reservation system on Hellgate and Court Sheriff campgrounds and all their recreation shelters." To begin, "about half of all sites at both Court Sheriff and Hellgate will remain first-come-first-served," according to the BOR. If the system is successful, the bureau "will look at implementing it for all their campgrounds."

Also reporting on the story is KBZK-TV Butte, MT (2/6, 785).

Empowering Native American Communities:

FEDERAL AGENCIES PROVIDE REPORTS TO USET. The Cherokee One Feather (2/6, 8K) reports that “reports on the status of Indian Budget, gaming, tax reform, and Indian programming through the US Department of Interior, Farm Bill, and Housing Bill are a few updates the USET Board of Directors received from federal agencies on Tuesday, Feb. 4.” Assistant Secretary of Indian Affairs Kevin Washburn. Said Indian programs in the BIA “may have received a boost in the 2014 budget compared to 2013, but some issues are still lingering to place a strain on the budget.” Washburn explained, “So, if we fully fund contract support costs we have to get that money from somewhere. We will have to find the money in the budget and we are going to have to move things around a bit.”

MENOMINEE TRIBE CONTINUING TO WORK WITH WALKER ADMINISTRATION ON KENOSHA CASINO.

The Milwaukee Business Journal (2/5, Subscription Publication, 12K) reports that the Menominee Indian Tribe of Wisconsin said Wednesday that “it continues to work with Gov. Scott Walker’s administration toward an approval of its proposed \$800 million casino on the former Dairyland Greyhound Park property in Kenosha.” Menominee spokesman Michael Beightol said in a statement, “We wish to see the decision made in the most expeditious manner possible so that the state benefits from a large-scale construction project, the creation of thousands of new jobs on the Wisconsin side of the border with Illinois, and new income to help the Menominee along the path of self-determination.”

Top National News:

CBO’S ELMENDORF: ACA “CREATES A DISINCENTIVE FOR PEOPLE TO WORK.” For a second day, on Wednesday, Republicans and Democrats sought to put forth their own characterizations of a Congressional Budget Office report released Tuesday, which forecast that the Affordable Care Act would cause the equivalent of more than two million full-time employees to leave the US workforce in the next decade. While the debate generated a great deal of partisan analysis from both sides, and CBO Director Elmendorf’s appearance before the House Budget Committee was widely noted, the volume of coverage diminished substantially from the previous news cycle. For instance, on Tuesday evening, all three network newscasts devoted segments to the report, but on Wednesday, none of the three aired continuing coverage, nor did they cover any aspect of the broader healthcare reform debate.

As was the case on Tuesday, it is generally accepted by media analysts that Republicans are the chief political beneficiaries of the CBO’s report. According to McClatchy (2/6, Lightman, 95K), in the “political world,” the CBO’s analysis “was largely a gift for Republicans,” who are “buoyed...by ongoing skepticism about the law.” Likewise, USA Today (2/6, Moore, 5.82M) says Republicans “are leaping on [the CBO’s] new report...as a weapon to argue the health insurance overhaul will hurt the economy.” USA Today notes that Republican Dan Sullivan, who is challenging Sen. Mark Begich, released a statement reading: “BegichCare is a job killer.” In what might have been the most cited piece on the controversy Wednesday, the Washington Post’s (2/6, 4.28M) Chris Cillizza wrote, “the Republican message is cleaner, simpler and more digestible than the Democratic one,” and “it’s not close.”

In the lead story for Fox News’ Special Report (2/5, 2.15M), Shannon Bream reported that on Wednesday, Washington was still “reverberating from the [CBO’s] prediction” that the ACA “will result in more than 2 million people not working full-time.” Elmendorf was shown saying, “By providing heavily subsidized health insurance to people with very low income, and then withdrawing those subsidies as income rises, the act creates a disincentive for people to work.” White House correspondent Ed Henry went on to report that “after a day on defense over the report, Democrats went on offense” Wednesday, “pushing back hard on Republican charges [that] the CBO was confirming the law is killing jobs.” Rep. Chris Van Hollen (D-MD): “When the media immediately takes the Republican talking points and prints them, it does a great disservice to the public.”

The Washington Post (2/6, Branigin, 4.28M) reports that Democrats “countered what has emerged as a key GOP talking point by eliciting testimony from” Elmendorf “that the [ACA] would reduce unemployment over the next few years by boosting overall demand for goods and services.” The Post says Van Hollen “cited the CBO’s finding that the law will ‘boost overall demand for goods and services over the next few years.’” Van Hollen asked Elmendorf, “When you boost demand for labor in this kind of economy, you actually reduce the unemployment rate, because those people who are looking for work can find more work, right?” Elmendorf replied, “Yes, that’s right.”

Chris Hayes drew attention to this exchange in the lead segment for MSNBC's All In (2/6, 510K) Wednesday night. According to Hayes, "the real effect of Obamacare on the labor market will actually be the opposite of those initial sloppy false reports" suggesting that the CBO forecast that it would lead to the elimination of more than 2 million "jobs" over the next decade.

Calvin Woodward, in a "Fact Check" piece for the AP (2/6), says "some Republicans picked their words more carefully than others in reacting to" the CBO's report. Woodward notes that House Speaker Boehner, "for example, said the report backs up Republican arguments that Obamacare 'hurts take-home pay,'" which Woodward says is a "plausible point as far as it goes."

The Hill (2/6, Wasson, 194K) reports that during the House Budget Committee hearing Wednesday, Republicans said the CBO report "shows the healthcare law is making the 'poverty trap' worse, while Democrats countered that the GOP is completely misreading the CBO's findings." The Wall Street Journal (2/6, Paletta, Subscription Publication, 5.91M) quotes House Budget Chairman Paul Ryan as saying, "These changes...disproportionately affect low-wage workers. ... Translation: Washington is making the poverty trap worse."

The Hill (2/6, Wasson, 194K) says Van Hollen was "visibly angered by Ryan's argument," and countered that the CBO report "really finds that workers will have increased choices after 2017," adding, "That is not a bad thing. It's a good thing." But The Hill notes that the CBO's Elmendorf confirmed that the report "does find that the healthcare law creates a disincentive for working," saying, "The act creates a disincentive to work relative to the case were the law not in place."

According to the Wall Street Journal (2/6, Paletta, Subscription Publication, 5.91M), Van Hollen said, "More Americans will be able to voluntarily, choose – choose – to work fewer hours or not take a job because they don't depend on that job any more for the provision of health insurance. ... Before the Affordable Care Act, if you lost your job, you lost your health insurance."

Under the headline, "Why The CBO Report Is (Still) Bad News For Democrats," the Washington Post's (2/6, 4.28M) Cillizza said Republicans are more likely to score political points with their characterization of the CBO report because while the "Republican ad on this CBO report writes itself," the "Democratic one is WAY more complicated as it relies on explaining the idea that a decline in the labor market isn't the same thing as job losses and that all of this could well wind up being a good thing for the public." Similarly, the Washington Times (2/6, Boyer, 417K) says "reviving the argument over the perils of an entitlement program in Obamacare is the last thing Democrats want in this election year."

E.J. Dionne, in his column for the Washington Post (2/6, 4.28M), says, "Too often, the media go along by highlighting" the "political impact" of a report like the one released by the CBO on Tuesday "rather than focusing on what it actually says."

Perez: CBO Confirmed ACA Will Ease "Job Lock." When asked, on NPR's Diane Rehm Show (2/6), about the CBO's report, Labor Secretary Perez noted that since the ACA's passage, the US economy has added 8.1 million private-sector jobs. Perez added, "What the CBO report points out is that, in the long run, people are going to have choice" due the ACA, including "a lot of people who are in what economists call 'job lock,'" meaning "they are in a job because they need the healthcare." Echoing Perez's point, Chris Matthews, on MSNBC's Hardball (2/6, 689K), said the ACA "is not leading to mass layoffs, it's giving people the freedom to leave jobs they are in only because those jobs...provide health insurance."

Likewise, Michael Hiltzik, in his column for the Los Angeles Times (2/6, 3.07M), contends that "it's now becoming plain that the CBO finding creates a problem for" Republicans "because relieving millions of Americans of 'job-lock,' which is what the CBO is talking about, is something the GOP has favored for years." Hiltzik notes that in 2009, Ryan said the "key question that ought to be addressed in any healthcare reform legislation is, are we going to continue job-lock or are we going to allow individuals more choice and portability to fit the 21st century workforce?"

National Review's Rich Lowry, in a piece for Politico Magazine (2/6, 464K), acknowledges that "there is a little something to" the "job lock" argument from the Administration and its allies, but Lowry adds that "the main

problem with Obamacare" is that it has "created a vast apparatus of subsidies, penalties and taxes that is effectively anti-work."

Similarly, the Wall Street Journal (2/6, Subscription Publication, 5.91M), in an editorial, says Democrats are mistaking the genuine "job lock" phenomena, which keeps workers from taking new jobs because of the benefits tied to their existing position, with what it says is an ACA-generated phenomena of workers choosing not to work at all because they are better off collecting government benefits.

Elmendorf Says ACA Is Contributing To "Central Factor In Slowing Economic Growth." Byron York, in a piece for the Washington Examiner (2/6, York, 319K), says that at Wednesday's House Budget Committee hearing, "there were plenty of lawmakers, Republican and Democrat, who wanted to make points about Obamacare," but those "points had been pretty much exhausted by the time" Rep. Diane Black (R-TN) asked the CBO's Elmendorf: "What effect [will] the reduced labor force participation have on the economy?" According to York, Elmendorf's reply was "simple, short, and devastating." Elmendorf said, "It is the central factor in slowing economic growth." According to York, "the fact is," the CBO believes the ACA is "slowing down the key measure of health in the American economy for a long time to come."

HOUSE GOP REPORTEDLY WILL NOT TIE KEYSTONE OR ACA CHANGES TO DEBT CEILING. According to Bloomberg News (2/6, Wallbank, Rowley, 1.91M), the House Republican leadership is "giving up efforts to couple a U.S. debt-limit increase with measures backing the Keystone XL pipeline or revoking" the Affordable Care Act's "risk corridors." Citing an anonymous "Republican aide," Bloomberg News says "a debt-ceiling increase without conditions hasn't been ruled out," but "it's difficult to identify the 30 Republicans needed to join Democrats to pass a 'clean' debt limit increase." Rep. Jim Jordan (R-OH) "said his party could get enough support for a debt-ceiling increase 'if you address the underlying problem' of long-term spending," but, "short of that...it's tough to get the votes."

The AP (2/6, Taylor) reports that the House Republican leadership is now "exploring another idea: repealing a recent cut to the pensions of working age retirees of the military." According to the AP, that option "appears aimed at winning the support of both Democrats and GOP conservatives." The Washington Post's (2/6, Costa, 4.28M) Robert Costa reports that it is House Speaker Boehner who is "encouraging" his caucus to "demand a restoration of recently cut military benefits." Costa says Boehner "did not formally endorse the idea as his own," but "did ask his lieutenants to test it among rank-and-file Republicans."

Politico (2/6, Sherman, 464K) reported that Boehner is "considering attaching a whole laundry list of provisions to the debt ceiling that do precious little to decrease the deficit," including "attach[ing] a nine-month patch of the Sustainable Growth Rate," or "doc fix," which is "the formula by which the federal government reimburses doctors who treat Medicare patients." Politico goes on to say that all the options under consideration represent a "massive departure from the trillions of dollars" Boehner and President Obama "cut in 2011."

The Hill (2/6, Berman, Schroeder, 194K) reported that on Wednesday, House Majority Leader Cantor "told Senate Republicans at their policy retreat to expect the House to send over a bipartisan debt ceiling bill." According to The Hill, an unidentified Republican senator "stood up to propose structuring the expansion of borrowing authority in such a way that would shift the entire responsibility for the vote to Democrats – a move that some House conservatives have advocated in recent days." However, The Hill says Cantor "shot down the proposal, noting that Republicans control the House and have to vote for the debt-limit increase."

USA Today (2/6, Page, 5.82M) reports that on Wednesday, Sen. Mike Lee said he would like to see some offset paired with an increase in the debt ceiling, but added, "I think there won't be this time around." The Washington Times (2/6, Hill, 417K) reports that on Wednesday, Moody's Investors Service, "one of Wall Street's three top credit raters," said "it expects Congress ultimately to raise the legal debt ceiling after the Treasury runs out of borrowing authority but before it exhausts other extraordinary measures it can take to keep paying the government's bills."

Despite the numerous reports in recent days suggesting that House Republicans are unlikely to provoke a showdown over the debt ceiling this year, Ed Schultz used the lead segment of MSNBC's Ed Show (2/5, 449K) to denounce Republicans for "again...planning to hold our nation hostage with the debt limit." Schultz said, "After a credit downgrade for the same stunt back in 2011, it's amazing John Boehner would think about risking it

again." Rep. Chris Van Hollen (D-MD) also maintained that Republicans "seem to be up to their same old games, which is trying to hold the economy, trying to hold the full faith and credit of the United States, hostage."

The Washington Post (2/6, Costa, 4.28M) reported that on Tuesday, Rep. Justin Amash (R-MI) said, "It's going to end up being clean anyway. I don't see anything they can put on the table that I would support as some sort of trade-off." Likewise, according to the Huffington Post (2/6, Siddiqui, 11.54M), on Wednesday, Rep. Raul Labrador (R-ID) said, "I don't want a ruse, I don't want us to just claim we're fighting for something and then capitulate in the end." On the other hand, the Washington Times (2/6, Sherfinski, 417K) reports that Rep. Joe Barton (R-TX) "said passing a clean debt ceiling extension would be 'capitulation.'" The Times says Barton calculated that only about "50 or 60" House Republicans would back a "clean" increase.

WEAK ADP JOBS REPORT WEIGHS ON STOCKS. Media coverage of the economy was generally downbeat, with news outlets, as well as traders, given more weight to the disappointing ADP jobs report than to the solid ISM service sector report.

ADP Private Sector Payroll Report Disappoints. Bloomberg News (2/6, Chandra, 1.91M) reports that ADP said on Wednesday that private sector employers added 175,000 jobs in January, less than the 185,000 expected by economists. In addition, December's originally-reported gain of 238,000 was revised downward to 227,000. Bloomberg News says that companies "added fewer workers than projected in January as colder-than-normal weather limited progress in the U.S. job market." The Department of Labor will release the data for the full economy on Friday.

Service Sector Growth Accelerated In January. Reuters (2/6) reports that the Institute for Supply Management's Non-Manufacturing Index, a measure of service sector economic activity, rose to 54 in January from 53 in December. That indicates that the sector is expanding at a more rapid rate. ISM's NMI had fallen for the prior two months.

Stocks Little Changed On Wednesday. The Wall Street Journal (2/6, Scaggs, Subscription Publication, 5.91M) reports that the Dow Jones Industrial Average was little changed on Wednesday, fallen 5,01 points to 15,440.23, while the S&P 500 fell 3.56 points to 1,751.64. The Nasdaq Composite Index, meanwhile, fell 19.97 points to 4,011.55. The Journal says that ADP's December report had a dampening effect on the markets.

Bloomberg News (2/6, Wang, Taborek, 1.91M) reports that stocks were tepid as the ADP report showed "companies added fewer jobs than forecast overshadowed acceleration in service industries."

Analysts Say Severe Winter Has Cost Economy \$10 Billion. The CBS Evening News (2/5, story 3, 2:15, Pelley, 5.58M) reported, that analysts "estimate that the weather this season has cost the economy about \$10 billion," which includes "lost productivity, workers who just can't get to work, and money going to heating bills instead of down to the corner restaurant." CBS (Reynolds) adds that the weather this winter "could slow national economic growth by half a percent this quarter— a significant snowball in an economy that grew only 2.7 percent last year."

USA Today (2/6, Jones, 5.82M) reports that the weather that has "pounded the U.S. and led to the delay or cancellation of thousands of flights this year have taken a financial toll not only on those in the business of flying but also on those dependent on a plane ride to get them to the next business meeting." In January, 49,000 flights were canceled by US carriers, "more than four times the number canceled in January 2013," according to data from masFlight, while "another 300,000 failed to take off on time." The flight problems "disrupted plans of roughly 30 million fliers and cost them over \$2.5 billion in lost work time and out-of-pocket costs."

More Than One-Sixth Of Prime Working Age Men Out Of A Job. In a front-page story entitled "More Men In Prime Working Ages Don't Have Jobs," the Wall Street Journal (2/6, A1, Peters, Wessel, Subscription Publication, 5.91M) reports that 10.4 million men in prime working ages, more than 1-in-6, don't have jobs. The Journal says it is partly a symptom of the slow recovery of the US economy, but it is also a chronic condition that shows the problems that can result from globalization and the growth of technology.

Atlanta Fed's Plosser Pushes For Quicker Taper. Reuters (2/6, Hughes, Spicer) reports Philadelphia Fed President Charles Plosser is pushing for the Fed to wind-down its bond-buying program faster than it currently

plans to and complete the process by the middle of this year. However, new Fed Chair Yellen is seen as unlikely to be moved by the argument, particularly as the current pace of the taper was publicly backed by Atlanta Fed Chair Dennis Lockhart on Wednesday.

In addition, Bloomberg News (2/6, Matthews, 1.91M) reports that Lockhart, a "consistent supporter of record stimulus," also argued that the unemployment rate is not the best indicator of the health of labor markets, and suggested that the Fed should commit to keeping interest rates low until a broader picture of labor market health emerges.

Regulators Consider Easing Volcker Rule On Collateralized Loan Obligations. The Wall Street Journal (2/6, Ackerman, Subscription Publication, 5.91M) reports that Fed Governor Daniel Tarullo to the House Financial Services Committee on Wednesday that regulators are considering easing a provision of the Volcker rule that impact collateralized loan obligations, which are securities consisting of a group of loans made to companies with poor credit ratings. Members of both parties had pressed Tarullo for action on CLOs during the hearing.

Editorial Wrap-Up:

NEW YORK TIMES. "Detroit's Immigration Solution." The New York Times (2/6, Subscription Publication, 9.61M) says in an editorial that while Michigan Gov. Rick Snyder's "unusual plan" to offer 50,000 high-skilled worker visas to those settling in Detroit is "appealing on a gut level," there is "something unsettling about it. ... There's something oddly defeatist about saying: Our citizens have been done wrong for so long, let's bring in Chinese and Indians." It also "seems strange" to tie Federal immigration policy "to one well-meaning municipal project: Why just Detroit? Why not Baltimore or Brownsville, Tex.?" The Times credits Snyder for proposing the idea, but says the immigration reform bill that passed the Senate last year is a better option.

"A Missing Argument On Contraceptives." The New York Times (2/6, Subscription Publication, 9.61M), in an editorial, notes that next month, the Supreme Court is "scheduled to hear two cases brought by secular, for-profit corporations whose owners want an exemption, based on their religious beliefs, from the requirement that employers' health plans cover the full range of contraceptive services without a co-payment." The Times goes on to say that, "oddly, the Justice Department has relegated to a footnote what may be the strongest single argument against allowing the two companies to deny their workers contraceptive coverage that they would otherwise be entitled to," which is, according to the Times, "the Constitution's establishment clause...barring government from favoring one religion over another or nonbelievers."

"The U.N. Confronts The Vatican." The New York Times (2/6, Subscription Publication, 9.61M) editorializes that a UN panel's findings that the Roman Catholic Church shielded priests who have sexually abused tens of thousands of children worldwide were "a well-deserved judgment, particularly as Vatican officials continue to insist the many thousands of cases of child rape and abuse by clergy were a matter outside their domain," and "went to the heart of the matter in rejecting the church officials' claims that they were responsible" for enforcing the UN Convention on the Rights of the Child "only within the geographical limits of Vatican City."

WASHINGTON POST. "Common Sense With Keystone." In an editorial, the Washington Post (2/6, 4.28M) says a State Department report on the Keystone XL pipeline "largely confirms" other independent examinations of the impact of the pipeline. The Post writes that environmentalists have "drawn a line in the sand" on the pipeline, but it is "the wrong line in the wrong sand, far away from any realistic assessment of the merits." The piece says it is "past time" for President Obama to "set aside politics and resolve this bizarre distraction of an issue."

"Options On Syria." An editorial in the Washington Post (2/6, 4.28M) argues that despite the President's view, the US "has a number of options for action in Syria that would be more robust than the current policy but fall well short of the use of U.S. ground forces." The Post argues that while US "inaction over the past three years has left the administration with more difficult options," options "still exist" and it is "not too late to stand against the regime's atrocities and the growing terrorist threat."

"A Bad Deal For D.C. Charters." In an editorial, the Washington Post (2/6, 4.28M) says that a new study on District of Columbia school funding "validates the long-held suspicion that public charter school students have not been funded equitably compared with their peers in the traditional school system," which is "contrary to DC law."

The Post praises the District's public charter school system, and argues for rapidly equalizing funding.

WALL STREET JOURNAL. "Obama's IRS 'Confusion.'" The Wall Street Journal (2/6, Subscription Publication, 5.91M) editorializes that though President Obama argues that IRS targeting of nonprofits was due to the confusing nature of relevant tax law, a Wednesday hearing of a House Ways and Means subcommittee showed this to be false. The Journal says IRS Commissioner John Koskinen should postpone implementation of new rules until congressional hearings are complete.

"Turkey's Tribulations." The Wall Street Journal (2/6, Subscription Publication, 5.91M), in an editorial, argues that while Turkish Prime Minister Recep Tayyip Erdogan's AK Party did much to help Turkey's economy since it came to power, but Erdogan's recent actions and conspiracy theories are threatening those advances. The Journal adds that Erdogan's disregard for the rule of law and treatment of his rivals as enemies is putting Turkey's economy at risk.

"ObamaCare's New Theory Of Employment." The Wall Street Journal (2/6, Subscription Publication, 5.91M), in an editorial, says Democrats are mistaking the genuine "job lock" phenomena, which keeps workers from taking new jobs because of the benefits tied to their existing position, with what it says is an Affordable Care Act-generated phenomena of workers choosing not to work at all because they are better off collecting government benefits.

Ask for the "Loyalsock Forest/Anadarko" news event.

WAXMAN – CARBON POLLUTION STANDARD – POWER PLANTS — 11 a.m. Rep. Henry Waxman, D-Calif., joins representatives from coal country and the Latino community outside the EPA Headquarters in support of a

carbon pollution standard for new power plants. Speakers: Representative Henry A. Waxman, California 33rd District; Nick Mullins, Fourth Generation Coal Miner, Berea, KY; Roger Rivera, President, National Hispanic Environmental Council. Location: Environmental Protection Agency Headquarters, 1201 Constitution Ave, NW.; Event will be outside, at the corner of 12th and Constitution NW. Contacts: bentonstrongcac@gmail.com Benton Strong (206-856-2309). lauren.randall@sierraclub.org Lauren Randall, Sierra Club (781-608-1485). Notes: Inside the building, the EPA will be hearing comments from the public on the carbon pollution standard.

MILITARY SEXUAL ASSAULT – NEWS CONFERENCE — 11:30 a.m. A bipartisan group of senators, survivors of sexual assault in the military and advocates call for passage of the Military Justice Improvement Act ahead of an expected Senate vote next week. Location: 485 Russell. Contacts: Bethany Lesser, 202-224-3873

CAP ACTION FUND – MIDDLE CLASS — 12 p.m. – 1:15 p.m. The Center for American Progress Action Fund will host a discussion with Mayor Mark Kleinschmidt of Chapel Hill, North Carolina; Mayor Bill Peduto of Pittsburgh, Pennsylvania; and Hector Figueroa, president of 32BJ Service Employees International Union, or SEIU, about what cities can do to increase mobility, strengthen the middle class, and get the country back on track to broadly shared prosperity. Joel Rogers, director of the Center on Wisconsin Strategy, or COWS, will also present a new report, titled "Cities at Work: Progressive State Policies to Rebuild the Middle Class." Location: 1333 H St. NW, 10th Floor. Contacts: Katie Peters, 202-741-6285.

ECONOMIC COMPETITIVENESS – TRENDS — 1 p.m. Teleconference on The last decade has seen an erosion of the United States long-standing predominance in science and technology (S&T), as several Asian nations particularly China and South Korea rapidly increased their innovation and competitive capabilities. These trends are outlined in a new report that will be released February 6 by the National Science Board, the policymaking body for the National Science Foundation and an independent advisor to the President and Congress. Participants: Dan Arizu, Chairman, National Science Board, (Director and Chief Executive of the National Renewable Energy Laboratory); Kelvin Droegemeier, Vice Chairman, National Science Board, (Vice President for Research, University of Oklahoma); Ray Bowen, Chairman, National Science Boards Committee on Science and Engineering Indicators. DIAL IN: 866-844-9416, code NSBSEI

SAIS – CHINA AND MARITIME SECURITY — 4:30 p.m. Andrew Erickson, associate professor in the Strategic Research Department at the U.S. Naval War College and founding member of the China Maritime Studies Institute (CMSI) at the U.S. Naval War College. RSVP to the Reischauer Center for East Asian Studies at reischauer@jhu.edu. Location: Room 806, Rome Building, 1619 Massachusetts Ave., NW.

GEORGETOWN LAW – ASYLUM ADJUDICATION — 5 p.m. Georgetown University Law Center presents a discussion of Lives in the Balance: Asylum Adjudication by the Department of Homeland Security, a new book by Georgetown Law Professor Philip G. Schrag and Visiting Professor Andrew I. Schoenholtz, and Temple Law Professor Jaya Ramji-Nogales. Media RSVP: mediarelations@law.georgetown.edu. Location: Georgetown University Law Center, Gewirz Student Center, 12th Floor, 120 F Street, NW.

CNAS – UNCONVENTIONAL ENERGY – NATIONAL SECURITY — 5:15 p.m. – 7:30 p.m. Center for a New American Security hosts remarks on energy and national security by former National Security Advisor Thomas E. Donilon and the rollout of a major new report of the CNAS Unconventional Energy and U.S. National Security Task Force, Energy Rush: Shale Production and U.S. National Security. Location: Willard InterContinental Hotel, 1401 Pennsylvania Ave NW.

SFS – SOCHI — 6:30 p.m. – 8:30 p.m. The Center for a Secure Free Society hosts discussion on Are the Sochi Olympics Safe? Analyzing security threats in the North Caucasus. Speaker: Dr. Evgueni Novikov, SFS Senior Fellow, former senior official in the Communist Party of the Soviet Union and author of the new book Rethinking the Reset Button: Understanding Contemporary Russian Foreign Policy; Ilan Berman, Vice President of the American Foreign Policy Council, author of the new book Implosion: The End of Russia and What it Means for America. Moderator: Bryan Bender, Defense correspondent, The Boston Globe, author of You Are Not Forgotten: The Story of a Lost World War II Pilot and a 21st Century Soldiers Mission to Bring him Home. Location: 509 C Street N.E.

ST. ALBAN'S LECTURE – GLOBAL TRENDS — 7 p.m. Speaker: Scott Aughenbaugh, Multimedia Manager with the Seven Revolutions Project at the Center for Strategic and International Studies. Topic: Seven Resolutions:

Global Trends That Will Change the Way We Work, Think, and Live. Location: Trapier Theater, Marriott Hall, St. Albans School. Contacts: Molly Meinhardt rsvp@cathedral.org ((202) 537-5582).

Last Laughs:

LATE NIGHT POLITICAL HUMOR.

David Letterman: "The office of Governor Chris Christie is extremely displeased with the sloppy reporting displayed by 'The New York Times' in their coverage of the accusations made by former Port Authority Chief David Wildstein. The Governor would also like to take this opportunity to highlight a few other things he believes are sloppy: meatloaf with gravy, nachos, barbecue ribs, meat lover's pizza, buffalo wings, hot fudge sundaes, and chili dogs."

David Letterman: "Yeah, the Russians are not ready. You heard it here first. They are not ready for the Olympics. The Russians are not ready. You know, I'm blaming it on Obamacare."

Stephen Colbert: "Oh, nobody believed me when I said Obamacare was a job killer. And now it is. It's only a matter of time before they roll out the death panels and elder catapults."

Stephen Colbert: "...Obamacare gives people healthcare options allowing them to work less if they choose. But what looks better on a bumper stick: 'Obamacare job killer. Vote GOP.' Or 'Obamacare's estimated reduction in the workforce stems almost entirely from a net decline in the amount of labor that workers choose to supply rather than from a net drop in businesses' demand for labor. Vote Democrat.' Besides, besides, people should be chained by their need for insurance to jobs they hate. That is what built this country. You think anyone wanted to be a pilgrim? No! But they stuck it out for the buckle insurance."

Jay Leno: "Well, the Olympics start on Friday as you know and Russia's implementing the most intensive security in Olympic history. During the [Winter] Games, the government will monitor every email. They will monitor every social media message and they listen in on every phone call. In fact, people now comparing Russia to the United States. That is how bad it is."

Re: Information Memo regarding Questions for the Record following the HNR hearing on 7 17 13

Jewell, Sally (b)(6) <[REDACTED]@ios.doi.gov>

Sat, Feb 8, 2014 at 10:40 AM

To: "Walls, Erin" <erin_walls@ios.doi.gov>, Christopher Salotti <chris_salotti@ios.doi.gov>

Cc: Sarah Neimeyer <sarah_neimeyer@ios.doi.gov>

Dear Chris -

Attached are the QFRs, with comments and a few edits. I know the hearing was long ago, and some of the answers reflect sequestration in the present vs. past tense. Also, I have noted where it appears our answers have gaps. I appreciate how hard you have been working with all of our nominees and the interminable lists of QFRs on all of them. Feel free to let me know if you want to discuss any of these.

Thanks,

Sally

Secretary Jewell,

Attached is an Information Memo from OCL regarding Questions for the Record following the House Natural Resources Committee on July 17, 2013. This has been uploaded to Google Drive in your Information Memos folder.

Thank you,

Elizabeth

 **1 23 14_Information Memo regarding Questions for the Record following the HNR hearing on 7 17 13 w SJ comments.docx**
72K

INFORMATION MEMORANDUM FOR THE SECRETARY

DATE: January 23, 2014
FROM: Chris Salotti, Legislative Counsel, OCL (202)208-7619; Sarah Neimeyer,
Director, OCL (202)208-7693
SUBJECT: Responses to Questions for the Record following the House Natural Resources
Committee hearing on July 17, 2013

Attached for your review are responses to Questions for the Record (QFRs) that we received following your appearance before the House Committee on Natural Resources on July 17, 2013. These have been reviewed internally and reviewed and cleared by the Office of Management and Budget, and we can make any additional changes that you would like to make following your review before submitting to the Committee.

You testified at three oversight hearings in 2013. This is the last of the three hearings for which QFRs will be submitted. You previously reviewed responses to the Senate Energy and Indian Affairs Committees.

**Questions for Secretary Jewell
House Natural Resource Committee
July 17, 2013**

DRAFT

Questions from Rep. Lamborn

1. In reviewing permits, the U.S. Fish and Wildlife duplicate the efforts of state agencies. Shouldn't Federal Fish and Wildlife avoid duplication and waste of taxpayer resources by delegating permit review to state agencies? State Fish and Wildlife agencies are in the best position to understand what is appropriate for their state.

Response: The U.S. Fish and Wildlife Service's permit issuance and review is carried out in accordance with federal laws and therefore in most cases cannot be delegated to states. The FWS works closely with local, state, and federal government partners to ensure that review processes are conducted in a timely manner, making the best use of taxpayer resources. The Department agrees that it is important to seek ways to increase efficiencies, including by institutionalizing best practices and strengthening collaboration with local and state stakeholders, as well as tribes.

Questions for Secretary Jewell
House Natural Resource Committee
July 17, 2013

DRAFT

Questions from Rep. DeFazio

Drilling Safety

2. Secretary Jewell, in February 2012, the House natural Resources Committee Democratic staff released a report that examined safety and environmental violations that occurred relating to oil and gas drilling on federal lands over a decade beginning in the late 1990s. The report indicated that significant and potentially dangerous activities were occurring on federal lands without consistent or adequate federal oversight and enforcement. Since this report was issued what policies has the Department put in place to strengthen the inspection, oversight and enforcement program for onshore oil and gas activities?

Response: The Bureau of Land Management places a high priority on the oil and gas Inspection and Enforcement program. In July 2012, the BLM issued policy and guidance requiring additional oversight of the inspection and enforcement program. The BLM's Fiscal Year 2013 oil and gas inspection and enforcement strategy uses a risk-based system that identifies high priority drilling wells for technical inspection. In addition, the BLM is drafting comprehensive replacement regulations for Onshore Oil and Gas Orders 3 (site security), and 4 (oil measurement). The replacement regulations will update the minimum operating requirements as consistent with current law, technologies, and industry best management practices. Additionally the BLM is preparing a new Onshore Oil and Gas Order 9 (waste prevention) to establish standards to minimize the amount of venting and flaring of natural gas that takes place on oil and gas production facilities on federal and Indian lands. The BLM is also updating internal automation technologies, increasing the effectiveness and efficiency of inspection staff. In addition, the BLM is drafting a final rule regulating hydraulic fracturing that will establish a baseline standard for safety and environmental protection across all federal and Indian trust lands throughout the country.

3. Secretary Jewell, the report indicated that monetary penalties for safety violations were almost never issued, and when they were issued, they were issued inconsistently and amounted to very little. Over the thirteen year period evaluated in the report the average fine was only \$135 per violation for an industry where the top 5 companies made \$119 billion last year. That is not a real deterrent for these companies.

Questions for Secretary Jewell
House Natural Resource Committee
July 17, 2013

DRAFT

The fines that BLM can levy on oil and gas companies who violate regulations are set by a 30 year old law that has not been updated. The Interior Department and the American Petroleum Institute have both agreed that these low fines are not a sufficient financial deterrent for companies who violate the law. Former BLM Director Bob Abbey agreed that fine amounts are too low, and former Secretary Salazar committed to reviewing and evaluating ways the Department could increase the dollar amounts of fines. Do you agree that these fines are too low and has the DOI instituted any changes to provide additional deterrents for bad behavior?

Response: The BLM shares your concern over safety violations. The BLM is revising regulations relating to hydrocarbon measurement and accountability and these regulations would establish minimum standards to ensure hydrocarbons are accurately measured and reported. Onshore Order 4 was last updated in 1989, and since then changes in technology have allowed for more accurate fluid measurement.

(b) (5)

Fracking Rule

4. Secretary Jewell, isn't it true that there is currently a wide variety in the stringency and efficacy of state regulations with respect to drilling or hydraulic fracturing on state lands? For example:

Wyoming requires pre-fracking disclosures of all hydraulic fracturing chemicals, no other state requires pre-frack disclosure of everything (some states have more limited disclosure requirements).

Colorado and West Virginia require advanced notice of fracking to landowners and/or residents, no other state has this requirement.

Wyoming has strong rules for surface casing setting depth and protecting drinking water and Texas has good rules for intermediate and production casing cementing. Other states do not have these prescriptive requirements. Furthermore, the existence of these requirements hasn't hindered oil and gas development in CO and TX.

Colorado and New Mexico have tight restrictions on the use of wastewater pits, New York has proposed rules require that all flowback be collected in tanks rather than pits. Other states do not have these requirements.

Despite the claims of the Majority, isn't it true that the revised draft proposed BLM hydraulic fracturing rule would not be a duplicative layer of regulation but would rather

Questions for Secretary Jewell
House Natural Resource Committee
July 17, 2013

DRAFT

be implemented by individual state BLM offices in a way that dovetails with existing state standards not on top of them?

Response: The BLM's proposed regulations are expected to integrate with existing state standards for hydraulic fracturing by establishing consistent standards for wellbore integrity, chemical disclosure, and flowback fluid management on public lands. While certain states have an established regulatory framework addressing hydraulic fracturing, a number of states with federal oil and gas leases do not. BLM is coordinating with the appropriate state regulatory agencies to minimize duplication and redundancy in the regulatory processes and to provide clarity to the industry.

(b) (5)

5. Secretary Jewell, the discrepancies in state standards are why a federal standard, to act as a floor, is needed. But the revised draft rule BLM recently issued is weaker in a number of important ways that the draft rule issued last year. For example:

In the revised draft rule, cement evaluations don't have to be submitted until after the well is fracked (vs before in the last rule).

In the revised draft rule, operators don't have to provide BLM with information (depth, volume of fluids, chemicals, water source, size of fracturing) about each well and instead can just use one packet of generic information to be submitted for all "similar wells"

In the revised draft rule, disclosure of fracking chemicals would not have to be disclosed until after a well is drilled and could be done using the website Frac Focus, which, while it is undergoing changes, remains a database not run by the federal government that has been criticized for preventing easy access, aggregation, and download of data.

The waiver provisions (called variances) have been expanded to allow entire areas or states to be exempt from some requirements.

I am concerned that despite the fact that a number of Democratic Members wrote to then-Secretary Salazar calling for the initial draft rule to be strengthened, the revised draft rule appears to have been weakened in these critical ways. I would hope that as you continue to work through this rulemaking process you incorporate suggestions of Members of this Committee and the public to strengthen the rule to protect public health and the environment.

Response: The Department and the BLM have made clear that it is important that the public has confidence that the right safety and environmental protections are in place. The revised

**Questions for Secretary Jewell
House Natural Resource Committee
July 17, 2013**

DRAFT

proposed rule will modernize BLM's management of hydraulic fracturing operations and help to establish baseline environmental safeguards for these operations across all public and Indian lands.

BLM believes that the post-fracturing disclosures and certifications contained in the revised proposal would provide adequate assurances that fracking operations protect public health and safety and protect federal and Indian resources, and will ensure that the public is informed about the specifics of the actual fracking operations which are ultimately performed.

The BLM proposed for comment that where the cement evaluation log (CEL) data for a "type well" shows no indications of cement problems, the operator could construct the other wells in an approved group within the same field using the same well design and construction without getting prior approval for the other wells. However, the operator would be required -- for all wells -- to monitor and record the flowrate, density, and treating pressure, when cementing well casings and to submit a cement operation monitoring report to the BLM. The required monitoring data would provide important indications of problems with the cementing of casings and would help to verify the results of a CEL and for wells where no CEL is required and will provide the primary assurance that cementing operations conformed to those of a proven type well. If the monitoring information provides indications of an inadequate cement job, the operator would also be required to notify the BLM within 24 hours, submit a written report within 48 hours, and to certify that the inadequate cement job had been corrected and that usable water zone isolation had been achieved prior to starting hydraulic fracturing operations.

The BLM took comment on all aspects of the rule including whether this approach is sufficient to determine adequate cementing to protect usable water aquifers.

Regarding the use of FracFocus, BLM recognized and understood that FracFocus is in the process of improving the database with enhanced search capabilities to allow for easier reporting of information when including submission of data through this system. Moreover, information submitted to the BLM through FracFocus will still be required to comply with this federal rule, including its requirements that the operator must certify the information submitted is correct. For operators and the public, FracFocus provides a consistent venue that allows for ease of reporting and accessing data.

Finally, as noted in the question, the revised proposed rule would allow the BLM to approve a variance that would apply to all lands within a field, a basin, a state or within Indian lands and that would be based on the BLM's determination that it will meet or exceed the objectives of the regulation. The variance process would allow the BLM to work with states or tribes to appropriately adapt the regulatory requirements to the unique geology of an area or defer to a

**Questions for Secretary Jewell
House Natural Resource Committee
July 17, 2013**

DRAFT

standard, technology, or process required or allowed by state or tribal government, as long as application of the standard, technology, or process meets or exceeds the objectives of the hydraulic fracturing rule. The BLM would issue the variance in cooperation with the state or tribe. The variance would apply only to the requirements of the hydraulic fracturing regulations, and all requirements of the Mineral Leasing Act, or the Mineral Leasing Act for Acquired Lands, other federal statutes and other all regulations, would continue to apply to all lessees and operators.

(b) (5)

Mining Reform

6. As you know, the Mining Law of 1872 – a law signed into law by President Ulysses S. Grant – allows free hardrock mining on federal public lands.

Oil and gas companies have to pay the American taxpayers a royalty when extracting oil and gas from federal lands. Coal companies have to pay a royalty when mining coal on federal lands. But if you are mining for gold, silver, copper, uranium and other valuable hardrock minerals – you pay nothing.

Of course, states, tribal nations, and private landowners aren't foolish enough to give away their hardrock minerals for free – they all charge a royalty – some as high as 12 percent.

We also have the issue of abandoned hardrock mines. According to the GAO there are more than 160,000 abandoned mines in the West alone – some estimates put that total as high as 500,-- mines and each can cost tens of millions of dollars to clean up.

Secretary Jewell, would your department support – and will you commit to working with this committee on – real mining reform that includes royalties as a source of income for the U.S. Treasury and abandoned mine reclamation?

Response: Yes, the Department looks forwarding to working with the Congress on reform of the mining law. The Administration supports legislative efforts to address the problem of abandoned hardrock mine lands, and has proposed creating a program similar to that for coal mines for abandoned hardrock sites. The Administration also supports efforts to provide a fair return to the taxpayer from hardrock production on federal lands, and has proposed developing a leasing program under the Mineral Leasing Act of 1920 for certain hardrock minerals including gold, silver, lead, zinc, copper, uranium, and molybdenum, currently covered by the General Mining Law of 1872.

Questions for Secretary Jewell
House Natural Resource Committee
July 17, 2013

DRAFT

Oil and Gas Development

7. The Majority has brought a number of bills to the floor to require new oil and gas leases on lands under your jurisdiction. These efforts have included bills to require leasing off the West Coast, Atlantic Coast, and in sensitive areas like Bristol Bay – home of the most productive salmon fishery on the planet.

But the truth is that a substantial portion of federal lands – both onshore and offshore – are already under lease for oil and gas development. As I mentioned in my opening statement, there are currently 25 million acres onshore and 30 million acres offshore – for a total of 55 million acres – already under lease that are not producing a drop of oil and gas.

Would your department and President Obama support legislative action to incentivize the development of existing oil and gas leases? In other words, do you believe we should be pushing the industry to use what it already has – 55 million acres – or giving them access to more access to federal land?

Response: Yes. The Administration has proposed legislative reforms to bolster and backstop administrative actions being taken to reform the management of Interior's onshore and offshore oil and gas programs, with a key focus on improving the return to taxpayers from the sale of these federal resources. This includes proposals to encourage the diligent development of oil and gas leases (e.g., requirements for shorter primary lease terms, stricter enforcement of lease terms, and monetary incentives to get leases into production).

Pebble Mine

8. As you know, a Canadian mining corporation is proposing to develop “Pebble Mine,” which would be the largest open pit gold-copper mine in North America in the headwaters of two of the most critical wild salmon producing drainages in the world that help support a \$2 billion per year sustainable fishery.

Although the Department of the Interior is not directly involved in the approval process of the proposed mining operation, I would strongly encourage you to engage with the EPA and to get involved in this issue. The sheer size of the mine has implications for BLM holdings along the potentially impacted rivers and tributaries of the region as well as the fish and wildlife – like moose, caribou, ducks, geese, and other migratory birds.

And, if the native salmon populations are impacted you potentially have repercussions for the many wildlife species in the food chain that salmon support. If you haven't already, I

Questions for Secretary Jewell
House Natural Resource Committee
July 17, 2013

DRAFT

would encourage you to have a conversation with Gina McCarthy – if and when the Senate does its job and confirms her – and stay active on this issue.

Response: This is an important issue for the Department. While the proposed development is on land owned and managed by the State of Alaska and the watershed assessment is being carried out by the Environmental Protection Agency, the assessment does include some lands managed by Departmental agencies. As such, the Department and its agencies will continue to monitor the process closely.

Public Lands/Wilderness

9. In 2011 DOI issued a report highlighting 18 backcountry areas deserving congressional protection as Conservation Lands or Wilderness, including two of my bills in Oregon – the Rogue Wilderness Area Expansion Act and Devil’s Staircase Wilderness Act.

At that time, former Secretary Salazar noted the local and bipartisan support for these proposals and challenged the 112th Congress to pass them, stressing the importance of balancing land conservation with energy development. Unfortunately, not a single one of these bills passed either the House or the Senate – the first time Congress failed to protect a single acre of wilderness in seven decades.

The Obama Administration has been under pressure from the Majority over its use of the Antiquities Act. But I assume the President would much prefer to sign bipartisan conservation bills – passed by Congress – into law instead of using the Antiquities Act as the sole means available in the last two years to preserve and protect sensitive areas and landscapes.

Response: The Administration has testified in support of both the Devil’s Staircase and Rogue Wilderness Expansion Acts, and we encourage the Congress to move these bills forward. The Administration is committed to engaging local citizens and getting public input; to understanding how communities feel; and to connecting with local communities in an effective way so that local sentiments about these spectacular places inform decisions about recognizing American treasures. The monument designations the President has made under Antiquities Act authority have followed this community-based approach. It is also worth noting that the Antiquities Act has been used by 16 presidents, from both parties, to recognize the importance of such areas as the Grand Canyon and the Statue of Liberty.

Questions for Secretary Jewell
House Natural Resource Committee
July 17, 2013

DRAFT

Endangered Species

10. I am concerned about the Fish and Wildlife Service's proposal to delist the gray wolf from the Endangered Species list throughout the United States. Before the proposal was released, I organized a letter signed by more than 50 of my House colleagues to Service Director Dan Ashe urging him to keep protections for wolves in place as they continue to rebound. The lack of sound scientific evidence to support the Service's claim that the wolf is recovered, even though it only exists in a small portion of its historic range, indicates that a decision has been made to shift the goalposts and declare a victory. What are you doing to review this decision? Will you require the Service to produce additional scientific evidence to prove that wolves no longer warrant protection under the ESA?

Response: The Fish and Wildlife Service evaluated the classification status of gray wolves currently listed in the contiguous United States and Mexico under the Endangered Species Act. Based on that evaluation, and consistent with the ESA, the FWS published two proposed rules on June 13, 2013, to remove the gray wolf from the List of Threatened and Endangered Wildlife but to maintain endangered status for the Mexican wolf by listing it as a subspecies. These actions are proposed because the best available scientific and commercial information indicates that the currently listed entity is not a valid species under the ESA and that the Mexican wolf is an endangered subspecies.

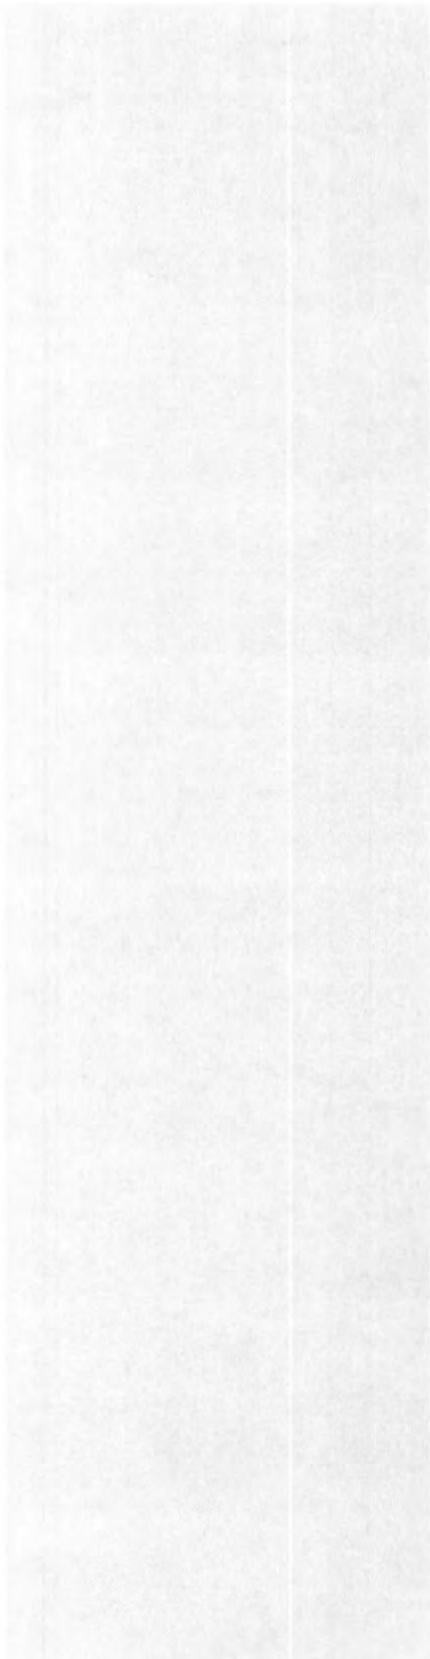

On September 30, 2013, the FWS announced that it has reinitiated a scientific peer review process to obtain an independent and objective peer review of the science behind the proposal. The peer review process will be sponsored and conducted by the National Center for Ecological Analysis and Synthesis, a respected interdisciplinary research center at the University of California – Santa Barbara. The center will vet prospective reviewers to verify that they are able to provide an objective review and have no conflict of interest, culminating in the selection of 5 or 6 well-qualified scientists with professional qualifications and relevant experience.

The Department recognizes the significant public interest in this issue and is focused on ensuring that all interested parties have the opportunity to provide comments concerning the proposed rule. With that in mind, FWS extended the public comment period on the proposed rule for a second time. In addition, to provide a forum for additional stakeholder input, the FWS also held five public hearings on the proposal, including in Sacramento, CA, Denver, CO, Albuquerque, NM, Pinetop, AZ, and Washington, DC.

Additional details of the proposed rules and public hearings, and links to submit comments to the public record can be found here: www.fws.gov/graywolfrecovery062013.html.

July 17, 2013**

DRAFT

**Questions for Secretary Jewell
House Natural Resource Committee
July 17, 2013**

DRAFT

Questions from Rep. Hanabusa

11. Madame Secretary, since 2009 Indian country's highest legislative priority has been passage of a legislative fix to the *Carcieri v. Salazar* decision. I introduced bipartisan legislation in the House this year that would provide a clean fix to that misguided decision.

a. It has been suggested that a clean *Carcieri* fix is impossible, due to concerns related to so-called "off reservation" gaming. Does the Administration continue to support a clean *Carcieri* fix – that is, restoring Secretarial authority to place land into trust for any federally recognized Indian tribe, regardless of when that tribe was federally recognized?

Response: A *Carcieri* fix is a top priority for the Administration. The Department believes that this decision frustrates the U.S.'s trust responsibility to Indian tribes by hindering the Department's ability to take land into trust for some tribes. The President's 2014 Budget included language that, if enacted, would resolve the issue. The Department stands ready to assist Congress in passing legislation to fix the decision.

b. What administrative measures has the Department taken to ensure that tribal homelands are restored pending Congressional action?

Response: Despite the *Carcieri* decision, which has placed unnecessary and substantial administrative burdens on the Department and tribes and has significantly increased litigation risks, the Department over the last four years has processed more than 1,100 separate applications and acquired over 205,000 acres of land in trust on behalf of Indian tribes and individuals.

The Department is also currently engaged in both federal court and administrative litigation regarding the Secretary's authority to acquire land in trust pursuant to the Indian Reorganization Act of 1934 following the *Carcieri* decision.

c. What steps has the Administration taken or proposed to take in order to work with Congress on passing a clean fix in the 113th Congress?

Response: The Administration continues to support a legislative solution to address the negative impacts and increased burdens on the Department and on Indian Country resulting from this decision. The President included in the Administration's Fiscal Year 2014 Budget language that, if enacted, would resolve this issue.

Questions for Secretary Jewell
House Natural Resource Committee
July 17, 2013

DRAFT

12. Last month, President Obama signed an executive order establishing the White House Council on Native American Affairs, furthering this Administration's already firm commitment to greater engagement and collaboration with Indian tribes. The National Congress of American Indians lauded the establishment of the Council, which you will chair as Secretary of the Interior.

a. The executive order establishing the Council states that the Council "shall improve coordination of federal programs and the use of resources available to tribal communities." As Council chair, how do you intend to achieve this purpose? **What specific goals would you like to see achieved?**

Response: The Executive Order, signed by President Obama on June 26, is further evidence of this Administration's commitment to advancing self-determination. As noted in the question, the intent is to improve interagency coordination, efficiency, and expand efforts to leverage federal programs and resources available to tribal communities.

The Council will convene at least three times a year and will work collaboratively toward advancing five priorities that mirror the issues tribal leaders have raised during previous White House Tribal Nations Conferences, including promoting sustainable economic development; supporting greater access to and control over healthcare; supporting the efforts to improve the effectiveness and efficiency of tribal justice systems; expanding and improving educational opportunities for Native American youth; and protecting and supporting the sustainable management of Native lands, environments, and natural resources.

b. How could Council recommendations impact reservation-level conditions, such as greater access to and control over tribal nutrition and healthcare and tribal justice systems, as well as protecting tribal lands, environments and natural resources?

Response: As noted in the testimony for this hearing, the Council will include more than 30 federal departments and agencies and will work across governments and executive departments, agencies, and offices to develop policy recommendations and expand efforts to leverage federal programs and resources available to tribal communities. The goal is that the Council, through this improved coordination and use of resources will focus on key activities, such as promoting sustainable economic development; supporting greater access to and control over healthcare; improving the effectiveness and efficiency of tribal justice systems; expanding and improving educational opportunities for Native American youth; and protecting and supporting the

(b) (5)

**Questions for Secretary Jewell

DRAFT

sustainable management of Native lands, environments, and natural resources, will have a positive impact on issues of importance to tribes.

13. This Committee has received extensive testimony on the important distinction between federally-owned public lands and Indian country held in trust by the federal government. The recently revised BLM regulations on hydraulic fracturing now allow for a “variance” that enables tribes to be the relevant authority in hydraulic fracturing decisions, after a showing that the tribal regulations are at least as stringent as federal standards.

a. Does this inclusion in the regulation stem from outreach from the tribes? Have you received feedback on this specific provision from tribes? Do you think that this provision adequately distinguishes tribal lands from public lands and respects tribal sovereignty?

Response: The variance provision in the BLM’s proposed hydraulic fracturing rule was informed by tribal consultations. The BLM contacted over 180 tribal governing bodies and had significant exchanges with over 30 tribes in multiple states during the drafting of the rule. The BLM fully embraces the statutes, Executive Orders, and other statements of governmental or departmental policy in favor of promoting tribal self-determination and control of resources. The Indian Mineral Leasing Act, however, subjects all oil and gas operations on trust or restricted Indian lands to the Secretary’s regulations and does not authorize the Secretary to allow tribes to opt out of regulatory oversight. This rule applies to Indian lands so that these lands and communities receive the same level of protection provided on public lands.

Questions for Secretary Jewell

July 17, 2013

DRAFT

Questions from Rep. Grijalva

14. The New York Times recently reported that one of the poorest tribes in the country, the Oglala Sioux Tribe of the Pine Ridge Indian reservation, is ending its low income housing program due to sequestration cuts even though over 1500 tribal families are in need of and awaiting basic housing on the reservation. The tribe is cutting back on Headstart, healthcare and programs for the elderly. Ninety (90) percent of the tribe's annual budget is comprised federal funds, so the mandatory cuts due to sequestration are indeed devastating to this tribe. But this is just one example of many real stories about sequestration's impacts on the First Americans

When you hear about Oglala and other tribes struggling to survive sequestration, do you believe that this administration is doing everything in its power to fulfill the fiduciary obligations it has to tribal nations? Furthermore, what steps are you and this administration going to take to address the increasing cuts in the country's already poorest areas, including tribal reservations?

Response: Poor communities often suffer worse when tightening the fiscal belt. The sequestration's impacts are indiscriminate as applied under the law. Indian Country already experiences needs that exceed the ability to meet them, and these communities are arguably the least equipped to absorb the losses sequestration is imposing. At the Department we are trying to prioritize and find a way forward. President Obama also signed Executive Order 13647 in June establishing the White House Council on Native American Affairs, which will be chaired by the Secretary of the Interior and will include more than 30 federal departments and agencies.

The Council will work across governments and executive departments, agencies, and offices to develop policy recommendations and expand efforts to leverage federal programs and resources available to tribal communities. The goal is that the Council, through this improved coordination and use of resources will focus on key activities, such as promoting sustainable economic development; supporting greater access to and control over healthcare; improving the effectiveness and efficiency of tribal justice systems; expanding and improving educational opportunities for Native American youth; and protecting and supporting the sustainable management of Native lands, environments, and natural resources, will have a positive impact on issues of importance to tribes.

Questions for Secretary Jewell
House Natural Resource Committee
July 17, 2013

DRAFT

15. The Department of the Interior is one several federal agencies that entered into an MOU with the Advisory Council on Historic Preservation to improve the protection of and tribal access to Indian sacred sites through enhanced interagency coordination. What role is the DOI taking in order to enforce the goals of this MOU? Beyond this MOU, what steps, if any, are being taken by this administration to support tribal nations in their efforts to protect and preserve their sacred sites and objects?

Response: The Departments of the Interior, Energy, Defense, and Agriculture, and the Advisory Council on Historic Preservation entered into a Memorandum of Understanding on November 30, 2012. This action was in response to tribal requests to improve the protection of and tribal access to Indian sacred sites through improved interdepartmental coordination and collaboration. Implementation of the MOU is through a three-tiered group approach: an interagency executive group, a core group of interagency staff coordinating work, and five subgroups of subject-matter experts that work on different aspects of implementing the MOU. During the first two years of this MOU, the Department of the Interior is the chair of both the core working group and the subgroup working on confidentiality standards for sacred sites.

The agencies are working together on strategies for sacred sites protection, including the creation of: a training program for federal staff; guidance for best practices, a public outreach plan, and recommendations for the confidentiality of and tribal access to sacred sites. The agencies are also working to establish mechanisms for the collaborative stewardship of sacred sites with tribes; identifying impediments and making recommendations to address the protection of sacred sites; and building tribal capacity. This interagency effort is being accomplished using the existing resources within each of the agencies.

16. Tribal consultation is a major component in the relationship between tribal nations and the federal government. What steps is this administration taking in order to uphold their responsibility in consulting with tribes for any federal, state, and corporate initiatives that will impact tribes and their homelands which may extend beyond reservation borders?

Response: This Administration has taken its responsibility to ensure consultation with Indian tribal governments on policies that have tribal implications seriously. Early in the Administration, the President signed a Presidential Memorandum on tribal consultation that made the importance of meaningful and regular consultation clear and directed agencies to submit a plan for implementing the policies and directives contained in Executive Order 13175, on Consultation and Coordination with Indian Tribal Governments.

Questions for Secretary Jewell
House Natural Resource Committee
July 17, 2013

DRAFT

The Department's official consultation policy was announced in December 2011, and it was developed in close coordination with tribal leaders. It sets out detailed requirements and guidelines for Interior officials and managers to follow to ensure they are using the best practices and most innovative methods to achieve meaningful consultation with tribes. And, as indicated in a previous response, in June the President signed Executive Order 13647, establishing the White House Council on Native American Affairs, which will be chaired by the Secretary of the Interior. The intent of the Council is to improve interagency coordination, efficiency, and expand efforts to leverage federal programs and resources available to tribal communities. In signing the Executive Order, the President noted that greater engagement and meaningful consultation with tribes is of paramount importance in developing any policies affecting tribal nations.

Questions from Rep. Gosar

17. Grand Canyon Air Tours

The one year anniversary of the passage of the Moving Ahead for Progress in the 21st Century Act (MAP-21, P.L. 112-141), recently passed. Senator McCain and I have inquired several times about the delay in the implementation of the law as it pertains to the quiet technology incentive requirements of the Act. As of March of this year, we were told that the National Park Service and the FAA were still working to identify options to implement these incentives. I believe a year is more than enough time. Coming from the private sector, I am sure you would not have stood for this type of delay. I know I wouldn't have in my dental practice.

Can you please tell me when my colleagues and I can expect to hear from the NPS and the FAA that the incentives are ready for implementation? We have been very patient but our patience is running thin. These incentives are critical to the long term economic health of Northern Arizona and Southern Nevada.

Response: Effective January 1, 2014, the NPS has implemented air tour fee adjustments as an initial incentive for operators conducting air tours at Grand Canyon National Park to convert to the use of quiet technology aircraft. These fee adjustments will also be made available to air tour operators who already have converted to the use of quiet technology aircraft. The FAA plans to announce a second incentive that would release FAA held allocations for the use of quiet technology aircraft in time for the busy part of 2014 tourist season. The NPS and FAA are continuing to work together on additional incentives that will require noise analysis to ensure compliance with the mandate set forth in MAP-21 that the impact of increased operations resulting from the incentives does not increase noise at Grand Canyon National Park.

18. Long-Term Experimental and Management Plan (LTEMP) for Glen Canyon Dam

My question is about the Long-Term Experimental and Management Plan (LTEMP) for Glen Canyon Dam that is being undertaken by the Bureau of Reclamation and the National Park Service as co-lead agencies.

My understanding is that Reclamation currently has ten years of NEPA compliance for Glen Canyon operations – from two Environmental Assessments and Findings of No Significant Impact issued just last year. Given this, and given that the endangered humpback chub population in the Grand Canyon is continuing to increase and currently

**Questions for Secretary Jewell
House Natural Resource Committee
July 17, 2013**

DRAFT

exceeds recovery goal requirementswhy is the Department proceeding with another EIS at this time?

Response: The 2012 Environmental Assessments and associated Findings of No Significant Impact focused on specific aspects of the operations of Glen Canyon Dam, including high flow experiments and nonnative fish management through 2020. In contrast, the Long Term Experimental and Management Plan Environmental Impact Statement (LTEMP) announced by the Secretary in December 2009 will update a 1996 Record of Decision and considers potential modification of many aspects of Glen Canyon Dam operations beyond those considered in the 2012 Environmental Assessments. The LTEMP will incorporate scientific information developed by the Glen Canyon Dam Adaptive Management Program. The resulting Record of Decision from the LTEMP will allow the Secretary to meet statutory responsibilities for protecting and improving Glen Canyon National Recreation Area and Grand Canyon National Park resources and values, as well as statutory responsibilities under the Law of the River and the Endangered Species Act.

The President's budget contains \$3.5 million for the Glen Canyon Dam LTEMP EIS. Given today's fiscal struggles, why would Interior spend \$3.5 M on an EIS that basically is unnecessary since 1) BOR has NEPA compliance for the next 10 years; 2) USFWS has issued a fresh biological opinion showing current Glen Canyon operations are not jeopardizing the endangered Humpback Chub?

Response: As noted in the response to the previous question, the LTEMP EIS is a separate process focused on a different aspect of Glen Canyon Dam operations.

19. National Monument Designations via Antiquities Act authority in Arizona

I want to quickly ask about National Monuments. While I am not opposed to monuments, I firmly believe any designation should go through a public process and ultimately be codified by Congress.

I have introduced legislation, the Arizona Land Sovereignty Act, which would ensure a public process for monument designations. I know there are groups in my state urging the department to declare parts of my district as monuments. Does the Administration have any plans or are you considering any proposals to designate a National Monument in Arizona, under Antiquities Act authority?

Response: At a hearing in June 2013, the Administration strongly opposed efforts to weaken Antiquities Act authority, which has been used by 16 presidents from both parties to recognize

Questions for Secretary Jewell
House Natural Resource Committee
July 17, 2013

DRAFT

the importance of such areas as the Grand Canyon and the Statue of Liberty. While there are no current plans to designate monuments in Arizona under this authority, it is worth noting that this Administration is committed to engaging local citizens and getting public input; to understanding how communities feel; and to connecting with local communities in an effective way so that local sentiments about these spectacular places inform decisions about recognizing American treasures. The monument designations the President has made under Antiquities Act authority have followed this community-based approach.

DRAFT

Questions from Rep. Napolitano

20. Madam Secretary, last week the House passed its version of the Energy and Water Appropriations. As you know, the legislation guts the WaterSMART program by 53%, including the elimination of all funding for WaterSMART grants. These grants have helped conserve over 600,000 acre-feet in the past three years.

a. Where does the money go?

b. Why is WaterSMART a priority for the department, and what would the cuts, if enacted, mean to program?

Response to a. and b.: As competition for water resources grows for crop irrigation, growing cities and communities, energy production, and the environment, the need for information and tools to aid water resource and land managers grows. WaterSMART is a Department of the Interior initiative that leverages and directs existing expertise and resources within the USGS and the Bureau of Reclamation towards addressing complex, national and regional-scale water challenges. WaterSMART uses scientific and financial tools to promote collaborative efforts to help balance water supply and demand.

Over the last three years, the WaterSMART program has enabled the Department to act aggressively in response to near term and immediate water shortages and apply scientific findings to plan for longer term needs. Funded at \$35.4 million, WaterSMART promotes sustainable solutions and economic productivity in the western United States. It addresses current and future water shortages; degraded water quality; increased demands for water from growing populations and energy needs; amplified recognition of environmental water requirements; and the potential for decreased water supply availability due to drought and climate change.

Cuts of that magnitude would significantly hinder actions under the WaterSMART program that could help address water supply shortages in the Colorado River Basin and elsewhere, and would undermine the government's ability to partner with local communities on improving resilience against climate-related impacts that threaten a range of economic and environmental interests.

21. The Natural Resources Committee is the authorizing committee for the Department of the Interior. As part of the Energy and Water Debate, programs and authorizations that

(b) (5)

Questions for Secretary Jewell
House Natural Resource Committee
July 17, 2013

DRAFT

were vetted by House and enacted into law are now being defunded by the appropriators despite being requested by the Administration.

a. Energy and Water zeros out funding for Indian Water Rights Settlements. Why is it important that we prioritize Indian Water Rights Settlements?

Response: Water settlements secure tribal water rights helping to fulfill the United States' promise to tribes that Indian reservations will provide Indian people with permanent homelands. Indian water rights settlements are also consistent with the general federal trust responsibility to American Indians and with federal policy promoting Indian self-determination and economic self-sufficiency. The certainty that Indian water settlements provide is, in the words of the Western Governors Association, "a crucial element of effective water supply planning and management in the West." Achieving certainty through negotiated settlement is far superior to decades of expensive and disruptive litigation. Congress has agreed with tribes, states and non-Indian water users about the value of Indian water rights settlements by enacting 23 settlements spanning a period of over 30 years.

b. What would be the effects of zeroing out the San Joaquin "Settlement"?

Response: The Settlement's two primary goals are to restore and maintain fish populations and restore and avoid adverse water impacts. Eliminating funding for the Settlement creates an uncertain future for more than just river restoration but also for traditional water delivery operations from Friant Dam and the San Joaquin River. The Settlement effectively ended 18 years of litigation associated with water deliveries from the San Joaquin River. Eliminating funding risks encouraging the settling parties to return to court to pursue other avenues and disrupt the underlying long-term goals of restoring the San Joaquin River according to the processes and timelines spelled out in the Settlement.

(b) (5)

c. What do these cuts mean for Reclamation's traditional construction budget, which majority claims to support?

Response: The elimination of funding for the Indian Water Rights Settlements and the San Joaquin Settlement would jeopardize ongoing construction activities, including the construction of seepage mitigation projects on the San Joaquin River or the construction of water supply projects to Tribes who have settled long-standing disputes through negotiated settlement.

Questions for Secretary Jewell
House Natural Resource Committee
July 17, 2013

DRAFT

22. As part of the sequestration, several of USGS's streamgages have been discontinued. Why is it important that we support the streamgage system?

Response: Streamgages are critical and vital for meeting federal responsibilities associated with forecasting floods, tracking flows in major river basins, and assessing long-term climatic, land-use, and human impacts on streamflow and water quality. Increasing the number of streamgages is a high priority for the USGS. We look forward to working with you to explore possibilities for restoring recently discontinued USGS streamgages throughout the nation and to take steps to help make the network more stable so that water-resource managers have the streamflow information they need to make informed decisions.

Questions for Secretary Jewell
House Natural Resource Committee
July 17, 2013

DRAFT

Questions from Rep. McClintock

23. Madam Secretary, you may be aware that FWS recently proposed a rule for Categorical Exemption from NEPA mandates regarding "Injurious Wildlife Listings" under the Lacey Act. This Committee understands well the challenges in dealing with invasive species, however, I am concerned that exempting the FWS from addressing the environmental, economic and social impacts of proposed additions to the list could be extremely damaging to small business; as several of the species FWS seems to be targeting are widely traded and would have a significant economic impact. I'd like your commitment to look into this matter and get back to me before the service finalizes their rule making on this issue. Do I have that commitment?

Response: A final determination on this proposed rule will be made once the public comments received are analyzed and addressed. Regardless of whether or not a categorical exclusion is finalized and applied to the listing of injurious wildlife under the Lacey Act, the Fish and Wildlife Service will continue to carry out the analysis required under the National Environmental Policy Act and other laws applicable to federal regulatory action, including the Lacey Act itself, the Administrative Procedures Act, the Regulatory Flexibility Act, and Executive Order 12866, Regulatory Planning and Review. These laws account for much of the analyses made when carrying out the regulatory listing process.

The proposed categorical exclusion would give FWS the flexibility to forego the preparation of an Environmental Assessment under NEPA when, absent extraordinary circumstances, listing a species as injurious under the Lacey Act. The proposed categorical exclusion meets the Council on Environmental Quality guidelines, which provide that a categorical exclusion may apply to actions that are administrative and repetitive in nature and for which Environmental Assessments continually result in "Findings of No Significant Impact."

**Questions for Secretary Jewell
House Natural Resource Committee
July 17, 2013**

DRAFT

Questions from Rep. Lowenthal

24. How can and will the BLM guarantee that FracFocus and all of its current and historic data will exist in perpetuity if it is a private website?

Response: The Bureau of Land Management's revised hydraulic fracturing rule would require operators to disclose the chemicals used in the fracturing process and provide that information to the BLM after the fracturing operation is completed. Operators may submit this information to the BLM through FracFocus, which is already used by some states for reporting mandatory chemical disclosure of hydraulic fracturing chemicals as a single reporting location. FracFocus was initiated as a project with the Department of Energy and managed by the Ground Water Protection Council and Interstate Oil and Gas Compact Commission. It was endorsed in the Secretary of Energy Advisory Board 90-day report of best practices. Use of this website allows an operator to provide the information to the BLM, as well as the public and state and tribal regulators. This approach also has the benefit of reducing reporting burdens for oil and gas operators by avoiding duplicative reporting requirements and administrative duties for the BLM in many instances. The data submitted to FracFocus is managed by the Ground Water Protection Council (GWPC) and in partnership with the Interstate Oil and Gas Compact Commission; the data is provided to the BLM and other regulators on a regular basis, and BLM would also maintain permanent possession of a set of this data.

25. How can the BLM ensure that FracFocus has all of the proper data search, sort, and aggregation tools – which we have heard from other witnesses before this committee it still does not have, thus making it nearly impossible to effectively use?

Response: The FracFocus website was launched in April 2011 by the GWPC, a private nonprofit organization governed by state drilling and water quality officials. As states have expanded requirements for disclosure, FracFocus has evolved into a standardized, easily accessible repository of public information. FracFocus 2.0 was recently released with the added data search capability from a XML database platform. Users have the option of using the GIS mapping technology to identify chemicals used in the wells, as well as search and develop reports by date ranges, chemical names or Chemical Abstract Service numbers. The BLM will continue to work with GWPC to improve the FracFocus website to meet the expectations of the final BLM hydraulic fracturing rule.

26. BLM's Revised Draft Rule ambiguously states, "The BLM understands that the [FracFocus] database is in the process of being improved and will in the near future have enhanced search capabilities and allow for easier reporting of information." The BLM's

Questions for Secretary Jewell
House Natural Resource Committee
July 17, 2013

DRAFT

draft rule specifically references FracFocus as an acceptable compliance repository of data for oil and gas operators. What does it mean for the BLM to “understand” that FracFocus will provide additional tools? Has FracFocus provided written commitment to BLM to do so much? If so, please provide this documentation to the committee. Does the BLM have any recourse if FracFocus does not do what BLM “understands” that it will do?

Response: The BLM’s proposed regulation (§3162.3-3(i)) requires submission of the data through FracFocus or another database specified by the BLM. The GWPC has a successful track record in development of similar risk-based data management systems reliably used by the U.S. Environmental Protection Agency, the Department of Energy, and other state agencies. FracFocus 2.0 was developed with a number of additional tools, such as dashboard access for individual users and configuration module for XML file download. The BLM has met on numerous occasions with the GWPC regarding FracFocus, and will continue meeting with the GWPC in the future as the final rule is being completed.

27. What is the oversight process for ensuring that operators are using the trade secret exception to chemical disclosure properly? In other words, what is the cross-check verification of whether these chemicals are in fact trade secrets? Will there be an internal BLM verification that those chemicals are in fact trade secrets? And will Congress and the public be excluded from providing oversight to the trade secret process? Please explain how the BLM and the public will not be relying on the word of operators without verification of the legitimacy of operators’ trade secret exception claims? Do you think the BLM’s broadening of the trade secret exception may erode the public’s confidence and trust in hydraulic fracturing?

Response: The BLM must follow the Trade Secrets Act (TSA). Although operators may have their own list of chemicals that could fall under the TSA, the BLM would have the authority to validate the trade secret determinations. The BLM can issue a notice to the operator and move forward with the disclosure of the chemicals considered invalid for protection under the TSA if the operator does not appeal such a decision within 10 days of receipt of the notice.

Questions for Secretary Jewell
House Natural Resource Committee
July 17, 2013

DRAFT

Questions from Rep. Sablan

28. As you are aware, the United States and the Republic of Palau signed an agreement on September 10, 2010, to extend the financial terms of the Compact of Free Association between our two nations until 2024. Since then, there has been little success in securing ratification of the agreement by Congress, largely due to the inability to find a suitable offset. After a recent visit to Washington by newly elected Palau President Tommy Remengesau, you joined Secretary of Defense Chuck Hagel, and Secretary of State John Kerry in sending a letter to Senate President Joe Biden and House Speaker John Boehner in support of the ratification of the Compact Review Agreement. In the letter, you and your fellow cabinet members pointed out that “approving the results of the Agreement is of import to the national security of the United States, to our bilateral relationship with Palau, and to our broader strategic interests in the Asia-Pacific region.” Madam Secretary, what update can you give us regarding your department’s efforts to secure passage of the Palau agreement?

Response: As noted in the question, approving the results of the Agreement is of critical importance to the national security of the United States, to our bilateral relationship with Palau, and to our broader strategic interests in the Asia Pacific region. As such, the Administration transmitted legislation to Congress that would approve the Agreement and has worked with the Committee to try to identify appropriate offsets for funding the Agreement. The Administration stands ready to work with Congress to approve this critically important piece of legislation.

29. I commend DOI on its ongoing development of a 15-year Management Plan for the Marianas Trench Marine National Monument, which was established by then-President Bush in 2009. Please explain what other proposals your agency intends to take or is currently undertaking to support the monument?

Response: The U.S. Fish and Wildlife Service manages the Marianas Trench Marine National Monument, including the Trench Unit and the Volcanic Unit, as National Wildlife Refuges under Secretarial Order 3284, dated January 16, 2009. Management activities include convening the Marianas Trench Monument Advisory Committee, consulting with the National Marine Fisheries Service on their responsibilities for fisheries-related issues, and coordinating with the Commonwealth of the Northern Mariana Islands on monument planning. On an operational basis, the Service fulfills its primary management responsibility by issuing special use permits that allow scientists and explorers like James Cameron’s historic expedition to the trench. The FWS routinely consults and coordinates with the National Oceanic and Atmospheric Administration, the Commonwealth of the Northern Mariana Island, the U.S. Coast Guard, the Department of Defense, and the Friends of the Trench.

Questions for Secretary Jewell
House Natural Resource Committee
July 17, 2013

DRAFT

30. In January 2012, President Obama signed an Executive Order and announced new initiatives to significantly increase travel and tourism in the U.S. Back in October 2011, the Department of the Interior released a 50-state report outlining some of the country's most promising ways to reconnect Americans to the natural world. Unfortunately, the U.S. territories were left out. And then DOI rolled out the improved Recreation.gov website and the website did not include treasures such as the American Memorial Park managed by the National Park Service or the Marianas Trench National Monument Volcanic and Trench units managed by the U.S. Fish and Wildlife Service. However, your staff worked with our office for months to update the website to reflect these areas. I am asking for your commitment to include the U.S. Territories when applicable in all reports, promotions, etc. This will complement the President's initiatives to increase travel and tourism in every state and territory.

Response: Yes, the Administration is committed to the empowerment and economic growth of US-affiliated insular communities.

(b) (5)

31. The illegal international trade in timber and wildlife has skyrocketed in recent years, and has been linked to organized crime syndicates and terrorist groups. While the Lacey Act has proven successful in keeping these criminal elements out of the United States, forests and wildlife in other countries are being decimated. Will you work with other federal agencies, foreign governments, and the conservation community to fight illegal trafficking of wildlife and timber?

Response: In addition to being one of the lead federal agencies enforcing the Lacey Act, the FWS works closely with the other land managing agencies within the Department that enforce the Lacey Act across hundreds of millions of acres of public and tribal lands, as well as with other Departments and foreign governments. The FWS also enforces many other U.S. laws that protect wildlife, including the Endangered Species Act, the Marine Mammal Protection Act, and the Migratory Bird Treaty Act. The FWS will continue to work with its partners to ensure the success of the Lacey Act.

In July of this year, President Obama signed Executive Order 13648 on Combating Wildlife Trafficking that establishes a cabinet-level Task Force, led by the Attorney General and the Secretaries of State and Interior. Under the terms of that Executive Order, the Administration is developing a comprehensive program to work with African nations to combat wildlife poaching; prioritizing the targeting and prosecution of international syndicates engaged in illegal trafficking of wildlife for sale in consumer countries; and working with receiving countries to

**Questions for Secretary Jewell
House Natural Resource Committee
July 17, 2013**

DRAFT

stop the transshipment and sale of ivory and other illegal wildlife parts. The Task Force is in the process of developing a National Strategy to address this problem. The first meeting of the Advisory Council on Wildlife Trafficking, which will make recommendations to the task force, was held December 16, 2013.

32. From the brown tree snake on Guam and the Mariana Islands, to pythons in the everglades, to Asian carp in the Mississippi River, invasive species cost the United States over \$120 billion a year. What are your thoughts on the severity of our problems with invasive species, and how will you work to minimize the damage they cause? What additional tools do you need?

Response: Addressing invasive species is a high priority for the Department. The Department requested an overall increase of about \$23 million for invasive species prevention, management, control, and coordination in the Fiscal Year 2014 Budget. Invasive species impact the Department's mission and purposes for which we manage public lands and their resources in myriad ways, including the services these lands offer, such as recreation, hydropower, water supplies, agriculture, and ranching. They also impact ecosystem functions including pollination, water filtration, climate stability, pest control, and erosion protection, wildfires, and other natural hazards. The environmental, economic, and social impacts of invasive species and their control or eradication can be costly, controversial, and complex. Prevention of their introduction, establishment, and spread is the most cost effective and least disruptive approach to managing the threats these species pose to the nation's public trust resources.

The Department has forged strong partnerships with local, state, tribal, and other federal agencies in order to manage invasive species impacts on the resources it manages. The Department addresses a wide variety of invasive species through prevention, Early Detection and Rapid Response, control and management, restoration, research, and education and public awareness. This has resulted in tangible improvements in water quality, species recovery, habitat restoration, and overall invasive species management in ecosystems.

The Department is also working on several new tools to more effectively address the threat of invasive species through preventative and management efforts. These include an ongoing effort to improve the efficiency and effectiveness of regulations and regulatory processes used to implement our existing authorities to address invasive species. We are developing an MOU with several key industry and state partners that will lead to voluntary actions to better manage the risks associated with harmful non-native species. We continue to improve our ability to detect, assess, and control key invasive species through research and environmental modeling. We have also become more effective at assessing the risk of invasive species more rapidly while

(b) (5)

**Questions for Secretary Jewell
House Natural Resource Committee
July 17, 2013**

DRAFT

maintaining scientific accuracy and public transparency. The Department is also reviewing several other options for improving its ability to prevent invasive species introductions, and we appreciate Congressional interest in this issue. We look forward to working with Congress and other stakeholders and partners to tackle the significant problems that invasive species cause.

Questions for Secretary Jewell
House Natural Resource Committee
July 17, 2013

DRAFT

Questions from Rep. Wittman

33. Do you see any inherent conflict between the development of the five-year OCS leasing plan as mandated by the OCS Lands Act and the National Ocean Policy (NOP) and its call for regions to develop marine spatial plans that you as Secretary are subsequently bound to follow per the Executive Order establishing National Ocean Policy? What impact would NOP have on permitted activities like energy development?

Response: Neither the National Ocean Policy nor marine planning creates or changes existing regulations or statutory authorities under which ~~that~~ the Department's bureaus operate ~~under~~. The final Implementation Plan for the NOP was developed with extensive stakeholder input and gives states and communities greater input in federal decisions, among other things. The Implementation Plan supports voluntary regional marine planning, which will bring together ocean users to share information to plan how we use, sustain and better understand our ocean resources.

34. Do you support the goal of wetland restoration and would you support continued authorization of the North American Wetlands Conservation Act?

Response: The Department supports the goal of wetland restoration and reauthorization of the North American Wetlands Conservation Act. The Department testified in strong support of H.R. 2208, the North American Wetlands Conservation Extension Act, at a hearing before the House Natural Resources Subcommittee on Fisheries, Wildlife, Oceans and Insular Affairs, on August 2, 2013. The Department also supports legislation to increase the price of the Federal Duck Stamp, funding from which is also critical to protecting wetlands that offer breeding, feeding, and resting areas for migratory waterfowl.

35. In June the Wildlife and Hunting Heritage Conservation Council (WHHCC) federal advisory council sent a letter to you asking for the creation of a dedicated spot for hunting and recreational shooting on the Bureau of Land Management Resource Advisory Councils (RACs). What is your position on providing sportsmen with this opportunity to have a dedicated voice in policy decision impact federal lands?

Response: The Bureau of Land Management takes seriously the work of the Resource Advisory Councils, which provide an opportunity for individuals from a wide-range of backgrounds and

**Questions for Secretary Jewell
House Natural Resource Committee
July 17, 2013**

DRAFT

interests to have a voice in the management of public lands. Under BLM regulations, each RAC must include balanced representation of the following three broad categories:

Commercial/commodity interests; Environmental/historical groups (including wild horse and burro and dispersed recreation); and state and local government, Indian tribes, and the public at large. Hunting and recreational shooting interests may be represented in any of the three categories (as noted on the RAC application):

- Category 1: Developed outdoor recreation, off-highway vehicle users, or commercial recreation activities;
- Category 2: Dispersed recreation interests
- Category 3: Public at large

One-third of RAC member positions become open each year, generally between January and March. The BLM's senior management will continue to consider changes to categories or the addition of special subcategories for interests like hunting and shooting sports. The Department recognizes that sportsmen and women care deeply about the public lands and we encourage them to apply for RAC appointments.

Questions from Rep. Young

36. As you know, the State of Alaska recently submitted a very comprehensive Exploration Plan and Special Use Permit Application to the Department pursuant to Section 1002(e) of the Alaska National Interest Lands Conservation Act or "ANILCA." Section 1002(e) is very clear on what must happen when such a plan is submitted, including a requirement that the Secretary of the Interior "shall promptly publish notice of the application and the text of the plan in the Federal Register and newspapers of general circulation in the State." When do you anticipate publishing this notice?

37. Section 1002(e) also states that "the Secretary shall hold at least one public hearing in the State for purposes of receiving the comments and views of the public on the plan." When do you anticipate holding such a hearing (or hearings)?

Response to 36 and 37: Based on long-standing legal interpretation, FWS has found that the underlying statute and its 1983-84 implementing regulations bar the Service from considering the exploration plan and permit application.

38. In June 2013, during a speech, former Deputy Secretary, David Hayes, announced that the Interior Department will soon be asking the general public to identify areas that should and should not be open to oil and gas leasing. While listening and receiving feedback from the public is important, without access to extensive data and teams of biologists, geophysicists, engineers, and geologists, what level of importance will be placed on an individual's suggestions in determining where is most appropriate for oil and gas leasing? Can you provide more information regarding this change in policy?

Response: The Department, as steward of our public lands and waters and through rigorous dialogue with stakeholders, must strike the right balance of meeting the interests of local communities and public owners of the resources as the President's "all of the above" energy strategy is advanced. The Department's management actions will continue to be developed and implemented in accordance with applicable law and regulations and supported by the best available science.

Questions for Secretary Jewell
House Natural Resource Committee
July 17, 2013

DRAFT

Questions from Rep. Bordallo

39. Given the current fiscal climate, priorities need to be made. In general, where do you place invasive species prevention and mitigation in your list of priorities? Specifically, the brown tree snake is responsible for many bird extinctions, loss of pollinating bats and increased power outages on our island. In response, the Refuge has installed the Multispecies Barrier Fence to keep out them out of 125 acres of the refuge. Unfortunately, with only six full time refuge staff we cannot do any intensive invasive species removal inside the fence. The refuge's Comprehensive Conservation Plan entails removal of the brown tree snake and eventual reintroduction of our birds. Do you foresee continued funding and support for brown tree snake mitigation?

Response: Addressing invasive species is a high priority for the Department. The Department's FY 2014 Budget Request sought an overall increase of about \$23 million for invasive species prevention, management, control, and coordination. The USGS requested an increase of \$500,000 to address the highest priority needs for control and management of brown tree snake, including research on the development of landscape scale methods to suppress or eradicate snakes on Guam and to detect and eradicate incipient populations of snakes accidentally transported to other islands such as Hawaii and the Northern Mariana Islands.

While the budget request reduces FWS's invasive species control and management funding by \$507,000, the FWS will dedicate a small portion of Aquatic Invasive Species funding to continue to support the program. We intend to continue to provide funding for this effort, but priorities have shifted with growing concerns about the spread of continental aquatic invasive species, such as Asian carp.

The FWS also continues to work closely with the U.S. Department of Agriculture's Wildlife Services' brown tree snake program on Guam. Since its implementation, the rate of snake captures associated with cargo shipped to Hawaii has declined dramatically. The growth in United States military presence on Guam is causing increased air and sea traffic between Guam and other regions in the Pacific, including the continental United States. As a result, the Department of Defense's responsibility for brown tree snake control and interdiction at military and commercial facilities related to the military build-up on Guam was a component of a recently completed ESA Section 7 consultation with the FWS.

40. Guam is a beautiful island for both residents and our many tourists. It is also strategically important for the U.S. military. Recently, the Interior announced the Sentinel Landscape Partnership, a Public-Private collaboration aimed at preserving agricultural

Questions for Secretary Jewell
House Natural Resource Committee
July 17, 2013

DRAFT

lands, assisting military readiness and protecting wildlife habitat. I believe Guam may be a prime candidate for the program and am very interested in seeing how the pilot program fares at Base Lewis-McChord. Is this integrated approach something we may see more of from the Interior and what is the timeline for expansion of the program?

Response: This pilot program is a great example of coordination and collaboration between federal and local governments while showing how Farm Bill programs help support agriculture, rural America, the environment and national defense. Military readiness and wildlife habitat protection can go hand-in-hand with interagency, local government and private collaboration. The Sentinel Landscapes pilot will preserve the land's natural character and permanently protect critical habitat for declining species that could be listed under the Endangered Species Act, which is important for national defense, local economies and the conservation of natural resources. The goal is to restore and permanently protect critical habitat for three species that are proposed for listing under the Endangered Species Act, protect private and agricultural lands from development, and enable DoD's training mission to continue.

41. In Guam, the U.S. War in the Pacific National Historical Park houses some of our most beautiful places but more importantly it commemorates the WWII battles held in the Pacific Theatre. In response to sequestration there have been hiring freezes and program cutbacks. Like you mentioned in your statement and in addressing a similar question by Congresswoman Tsongas, these are unsustainable actions. If we do not solve the whole of sequestration will we be looking at permanent closure of some of our National Parks and refuges?

Response: The sequester was designed to be inflexible, damaging, and indiscriminate, and it is. [The process put in place by the sequestration undermines the work that needs to be done on many fronts, and we will continue to see impacts across the country in all our bureaus during the coming months. [The Department faces challenges across our bureaus to deal with the impacts of the sequestration. The short term steps that we will take –freezing hiring, eliminating seasonal positions, and cutting back on our programs and services – are not sustainable, as these actions which are eroding our workforce, shrinking our summer field season, and deferring important work cannot be continued in future years without further severe consequences to our mission.

42. The budget also affects the maintenance and improvement of our refuge. The roads in the refuge are in deplorable condition with potholes so extensive that traffic has moved to the dirt shoulder. The refuge has yet to be connected to an outside source of water and operations are dependent on roof rainwater collection and trucking in water during the dry

Questions for Secretary Jewell
House Natural Resource Committee
July 17, 2013

DRAFT

season. Needless to say, visitation has decrease by 10% due to these factors. How will the Interior keep up with maintenance of the current parks and refuges?

Response: We have to balance addressing the most urgent needs, including for recreation; species and habitat conservation; and preservation of landscapes and historic and cultural resources with addressing the deferred maintenance backlog. The deferred maintenance backlog of the National Park Service and the Fish and Wildlife Service, as well as challenges faced by other bureaus, will **only increase as a consequence of the sequester**. The NPS is prioritizing capital investment funding to address its most important assets, such as mission-critical infrastructure and historic buildings and is removing non-essential assets, which reduces the number of structures that contribute to the backlog. The FWS is continuing to refine its condition assessment process, using maintenance action teams, actively pursuing local partnerships, carefully prioritizing budgets, and disposing of unneeded assets.

(b) (5)

43. On Guam, there is already increased pressure on our resources due to global climate change. Steps need to be taken to both address the causes of climate change and prepare for climate change impacts. The refuge recently connected an 84 solar panel array to the grid to both offset the 40% rise in electric rates this fall and to help decrease carbon emissions. I commend you for your commitment to massive renewable energy projects in Nevada and Arizona but global climate change is a problem for everyone. What plans does the Interior have to expand its alternative energy infrastructure in more local settings to decrease our carbon footprint? Does the Interior have plans to seek partnerships either public or private to accomplish this goal?

Response: Interior is working broadly to implement energy efficiency and renewable energy at all levels. On Guam, the Office of Insular Affairs (OIA) and National Renewable Energy Laboratory (NREL) assisted the Guam Energy Task Force in developing a strategic energy plan that sets a goal of reducing Guam's dependence on fossil fuels by 20% by the year 2020 ("20x20 goal"). With continued funding from OIA and with the support of NREL staff, the Guam Energy Task Force recently completed an energy action plan that identifies near-term strategies that will likely have the greatest impact on reducing Guam's fossil fuel energy consumption. Through a partnership with the NREL, the Department is supporting the design, development, and ultimate deployment of small-scale, modular, renewable energy/diesel hybrid systems that harness local renewable energy resources and will reduce dependence on expensive diesel fuel in remote communities around the world.

**Questions for Secretary Jewell
House Natural Resource Committee
July 17, 2013**

DRAFT

Questions from Rep. Cramer

44. Secretary Jewell, as you know, the development of oil and gas is important for our energy security and high standard of living, not just in North Dakota, but the entire nation. Many of my constituents are justifiably concerned about the Interior Department's actions relating to the greater sage grouse, which would affect more than 800 square miles in three southwestern counties in North Dakota. I am greatly concerned about the Bureau of Land Management amending resource management plans to include "priority habitat areas" in resource management plans, which have a statutory responsibility to ensure multiple use activities, including mining, grazing, energy development, and agriculture. I understand that the BLM has already delayed or cancelled many projects in several western states as a result of this process. Can you assure me that your Department will follow its multiple-use mandates under the Federal Land Policy and Management Act and the Multiple-Use and Sustained Yield Act with regard to sage grouse under other ESA activities?

Response: The Department and the Bureau of Land Management are fully committed to sustainably managing public lands for multiple uses both now and in the future. The Federal Land Policy and Management Act of 1976 defines multiple-use as "the management of the public lands and their various resource values so that they are utilized in the combination that will best meet the present and future needs of the American people." Conservation of fish and wildlife habitat are important uses for which the Bureau of Land Management manages the public lands, as are mining, grazing, energy development, and many other uses. The land use planning process helps us determine the best use of resources on a local level.

The BLM, the U.S. Fish and Wildlife Service, and the U.S. Forest Service are currently working through the unprecedented task of amending resource management plans in several western states to identify and incorporate appropriate conservation measures to conserve, enhance, and restore greater sage-grouse habitat by reducing, eliminating, or minimizing threats to habitat. In North Dakota, the BLM is working in close cooperation with the North Dakota Game and Fish Department in developing the draft Environmental Impact Statement covering sage-grouse population areas within the state. The goals of this effort are to provide better protections for greater sage-grouse while continuing to support the use of public lands for mineral extraction, recreation, and other uses.

45. Secretary Jewell, within the Endangered Species Act "The Secretary may exclude any area from critical habitat if he determines that the benefits from such exclusion outweigh the benefits of specifying such area as part of the critical habitat, unless he determines,

**Questions for Secretary Jewell
House Natural Resource Committee
July 17, 2013**

DRAFT

based on the best scientific and commercial data available, that the failure to designate such area as critical habitat will result in the extinction of the species concerned.” In making a determination to exclude certain areas as critical habitat will you give considerable weight to not only private landowner interests, but the interests of individuals and employees of industries utilizing our nation’s vast resources? Will you take this ability to exclude certain areas seriously?

Response: Under the Endangered Species Act, the FWS and the National Oceanic Atmospheric Administration’s Fisheries Service designate critical habitat for each listed species; these are areas that are needed for the species’ conservation and recovery. Critical habitat does not create a refuge nor necessarily restrict development. It only affects federal lands or lands where there is a federal nexus such as the issuance of a permit or federal funding. Along with the benefits to listed species, the Services must also consider the economic impacts, the impacts on national security, and other relevant potential impacts in making designations of critical habitat. Probable economic impacts resulting from the designation of critical habitat are assessed in an economic analysis.

On August 28, 2013, the Services published a final rule to revise the regulations implementing the ESA so that a draft economic analysis of the probable impacts of a critical habitat designation is completed and made available for public comment at the same time the critical habitat proposal itself is published. Publishing a proposed critical habitat rule and making available the associated economic analysis at the same time means that public stakeholders will have more information at the time they are reviewing critical habitat proposals.

Under the new regulations, a summary of each economic analysis will be published in the Federal Register along with the proposed critical habitat designation, while the analysis itself will be made available on the Web (www.regulations.gov and other appropriate venues). The final rule also codifies standard Services’ practices for assessing the likely impacts of proposed critical habitat designations.

The Services are also planning to publish a proposal in the near future that will provide more clarity on the process for excluding lands from critical habitat designation. We recognize that understanding this process is important for the public, and we will request public input on the proposal. This proposal represents one important part of our efforts to improve the implementation of the ESA.

46. Secretary Jewell, on June 13, 2013, the Fish & Wildlife Service issued a Federal Register notice proposing to de-list (remove from the Endangered Species Act list) the gray

**Questions for Secretary Jewell
House Natural Resource Committee
July 17, 2013**

DRAFT

wolf in most areas of the United States, an action I agree with – and I want to confirm you stand by this action. Do you? I understand this rule is expected to be finalized in September, correct? If the Fish & Wildlife Service is sued by environmentalists, will you defend the agency’s actions on this delisting?

Draft Response: The actions that were published in June 2013 – to remove the gray wolf from the List of Threatened and Endangered Wildlife but to maintain endangered status for the Mexican wolf by listing it as a subspecies – were proposed because the best available scientific and **commercial information** indicates that the currently listed entity is not a valid species under the ESA and that the Mexican wolf is an endangered subspecies.

(b) (5)

The Department is committed to ensuring that the public is well informed about the agency’s actions related to the gray wolf and has the opportunity to provide comments regarding the proposed rule. On September 30, 2013, the FWS announced that it has reinitiated a scientific peer review process to obtain an independent and objective peer review of the science behind the proposal. The peer review process will be sponsored and conducted by the National Center for Ecological Analysis and Synthesis, a respected interdisciplinary research center at the University of California – Santa Barbara. The center will vet prospective reviewers to verify that they are able to provide an objective review and have no conflict of interest, culminating in the selection of 5 or 6 well-qualified scientists with professional qualifications and relevant experience.

Because of the significant public interest in this issue, it is important to ensure that all interested parties have the opportunity to provide comments concerning the proposed rule. With that in mind, FWS extended the public comment period on the proposed rule for a second time. In addition, to provide a forum for additional stakeholder input, the FWS also held five public hearings on the proposal, including in Denver, CO, Albuquerque, NM, Pinetop, AZ, and Washington, DC.

47. On April 2, 2013, OSM Director Joe Pizarchik responded to a letter from Chairman Hastings stating that since 2009 OSM has spent approximately \$8.6 million in developing a new stream buffer zone rule. The 2008 rule that has yet to be implemented took five years to complete, including 40,000 public comments, two proposed rules, and 5,000 pages of environmental analysis from 5 different agencies. Is such a comprehensive rewrite of OSM regulations justified or warranted at this time?

Response: While the Surface Mining Control and Reclamation Act of 1977 has resulted in significant improvements in contemporary mining, recent studies have substantiated that adverse environmental impacts continue in certain situations long after mine reclamation has been

**Questions for Secretary Jewell
House Natural Resource Committee
July 17, 2013**

DRAFT

completed. Streams have been adversely affected biologically from continuing water-quality discharges from reclaimed mines. In some cases, streams have been dewatered due to underground mining activities. Forest lands that sustain water quality and habitat have been fragmented or lost. Therefore, the Department, through the Office of Surface Mining Reclamation and Enforcement, has undertaken this rulemaking initiative, which is using the best science to modernize the bureau's rules in order to better protect streams from adverse effects of surface coal mining. OSM is currently developing a Draft Environmental Impact Statement for the rule that will analyze alternatives to address the impacts of burying and mining through streams, including the protection of aquatic communities in streams located on, adjacent to, and downstream from coal mining operations. The draft will also analyze alternatives to provide for the restoration of native forests eliminated during future mining. Finally, it will consider alternatives to further enhance restoration of mined lands to their approximate original contour in accordance with SMCRA.

48. The 2008 stream buffer rule has never been implemented nationwide since OSM agreed to rewrite the rule as part of a settlement agreement. A legal challenge to OSM's existing rule was recently reinstated. Do you plan to defend OSM's existing rule against legal challenge, or allow anti-coal groups to "sue and settle" the case as they did in 2010?

Response: The Federal government has filed motions for summary judgment in this litigation (*National Parks Conservation Ass'n v. Jewell* and *Coal River Mountain Watch et al. v. Jewell*), requesting, among other things, that the court vacate the 2008 Stream Buffer Zone Rule, reinstate the prior regulations, and remand the matter for further rulemaking because the defendants confessed legal error in failing to conduct consultation with the U.S. Fish and Wildlife Service under Section 7 of the Endangered Species Act.

49. In BLM's proposed rule governing the use of hydraulic fracturing on public lands, trade secret information can be withheld from disclosure rather than being submitted to BLM. However, the rule requires operators to make trade secret claims and provide the required justification for those claims. The rule even indicates that one of the tests for determining whether something is a trade secret is whether the disclosure of the information would harm the operator's competitive position. In fact, isn't it true that typically it is the service companies actually performing a hydraulic fracturing job that would hold the trade secret information, rather than the operators? Why did the BLM choose not to give service companies or other trade secret holders the opportunity to make and support their own claims? Does the BLM care about harm to a service company's competitive position? States like Colorado, upon which BLM based its rule, allow service companies to make and substantiate their own trade secret claims.

**Questions for Secretary Jewell
House Natural Resource Committee
July 17, 2013**

DRAFT

Response: The BLM holds the operator as the responsible party for any of the oil and gas operations and activities approved and permitted by the BLM in its name.

The personnel and service companies that the operator chooses for their operation have to meet the same conditions of the permit. The operator as the permitted party is responsible to fulfill the terms of the permit, but may claim trade secret protection on behalf of its suppliers and subcontractors, assuming that the information constitutes a trade secret.

50. In its cost-benefit analysis for the hydraulic fracturing rule, BLM estimates the likelihood of an incident resulting from a fracturing operation is 0.03 percent for a major incident and 2.70 percent for a minor incident. BLM does not indicate what it considers to be "major" or "minor" incidents. Would you be able to clarify in order to help us to determine whether these estimates are consistent with the findings of other organizations, such as the Groundwater Protection Council and the American Petroleum Institute that have also studied the environmental risks from fracturing operations?

Response: The BLM used those figures to illustrate the likelihood of possible risks associated with hydraulic fracturing. The BLM reviewed an Energy Institute survey of violations that occurred on shale wells and tight sands and shales in Louisiana, Michigan, New Mexico, and Texas. According to the BLM, data in the Energy Institute survey do not distinguish between minor versus major impacts across the hydraulic fracturing risks that the BLM's rule is intended to address. Nonetheless, the BLM looked at the violations classified as surface spills of fracturing fluids, casing and cementing, fracturing, groundwater contamination complaints, and characterized them as minor or major incidents. For purposes of the BLM rule, a major incident means noncompliance which causes or threatens immediate, substantial, and adverse impacts on public health and safety, the environment, production accountability, or royalty income. A minor incident means noncompliance which does not rise to the level of a major violation. The agency will continue to examine impacts cited by other groups, including the Groundwater Protection Council and the American Petroleum Institute.

Questions for Secretary Jewell
House Natural Resource Committee
July 17, 2013

DRAFT

Questions from Rep. Daines

51. Sage Grouse and Resource Management Plans:

As you know, Montana is heavily reliant on our resource management pretty heavily – for economic development, including for resource extraction, and outdoor recreation and tourism. I share your vision that these two goals (resource development and outdoor recreation) can co-exist. Another vital piece component of land management in Montana is local involvement. Land management decisions are best made right at home in Montana instead of here in Washington.

As you know, recently, the Bureau of Land Management issued three Resource Management Plans for public comment. The comment periods for these plans – Billings, Miles City, and the Hi-Line – were short. Both of our Montana Senators and I requested an extension of the comment period, as well as many of our constituents, due to the serious implications for resource management outlined in the RMPs, especially on Greater Sage Grouse conservation planning, outlined in the RMPs. Much of the proposed boundaries for priority concern and the Bureau's restrictions on activities in these areas have potential to impact the livelihoods of many Montanans. We're learning development is projected to increase and bring more economic benefits to our communities and grazing continues to be a central part of life throughout proposed Greater Sage Grouse habitat. Conserving this species is a high priority for our state and local communities. They have a lot to say about it and have much to contribute to your Department's planning process.

On May 22, 2013, I sent my a letter to you requesting a 120 day extension on the comment period for the Billings-Pompeys Pillar, Hi-Line, and Miles City Resource Management Plans on May 22, 2013. And did not receive a response until later in the day on July 17th. Why is that?

Can you explain why the Bureau refused to extend the comment period?

Response: The Department and the BLM apologize for the delay in the response. We appreciate the importance of these plans as they relate to the economies of local communities and states. For this reason, the BLM has emphasized participation by the public, partners, and other agencies. In accordance with planning regulations, all of the draft plans were made available for public review and comment for a full 90 days, with administrative review copies available to cooperating agencies at various times throughout the planning process. While we acknowledge the large scope of the documents, the 90-day public comment period could not be extended without jeopardizing the BLM's commitment to addressing greater sage-grouse habitat conservation in the time-frame necessary to inform the U.S. Fish and Wildlife Service's

**Questions for Secretary Jewell
House Natural Resource Committee
July 17, 2013**

DRAFT

Endangered Species Act listing decision which must be completed by the court-mandated date of September 30, 2015.

In addition to the formal 90-day comment period, the BLM held 34 formal public scoping meetings, conducted five community economic workshops, and provided numerous briefings for cooperating agencies, user groups, environmental organizations, industries, county commissions, tribes, congressional staffs, other agencies, and the BLM's Resource Advisory Councils. Collectively, the Montana plan revisions involved 57 cooperating agencies, including counties, state and federal agencies, tribes and grazing/conservation districts. Our managers and planning teams addressed and incorporated public scoping comments and issues submitted throughout the planning process and have provided newsletters and website updates to keep our stakeholders informed of our progress. We value public input and will continue to accept substantive comments throughout the process.

In the mega-settlement which you had referenced in a response letter to my constituents as the reason you could not extend the comment period, was just only the timing of the listing of the GSG species agreed to in that settlement? Or was the timing and issuance of proposed RMPs part of the settlement?

Response: The issuance of the proposed RMPs was not specifically part of the settlement of the ESA Deadline Multi-District Litigation filed against the Fish and Wildlife Service, but it is a critical component in the larger effort to conserve greater sage-grouse and potentially avoid the need for a listing at the time of the required decision.

Moving forward with Sage Grouse conservation in Montana, how closely is the BLM going to rely on state data?

Response: Sage-grouse conservation in Montana and the Dakotas is a multi-jurisdictional challenge due to fragmented land ownership patterns across large portions of sage-grouse habitat, making a collaborative approach essential. The BLM has been working with state fish and wildlife agencies, local working groups, and other organizations throughout the BLM's National Greater Sage-Grouse Planning Strategy process. The BLM has a long history of working cooperatively with the State of Montana, including using their data and mapping of sage-grouse habitat in the BLM plans. The Montana/Dakotas BLM is also involved in the Montana Governor's Greater Sage-Grouse Habitat Conservation Advisory Council, and we will consider the final state management plan when we formulate our proposed management actions for each land use plan.

Questions for Secretary Jewell
House Natural Resource Committee
July 17, 2013

DRAFT

52. Sage Grouse and Hard Rock Mining:

Madame Secretary: I have a quote from the HiLine Draft Resource Management Plan and this is what it says:

“The management of wildlife resources and habitat outside of special designations would seldom prevent locatable mineral development, but in order to avoid significant impact to wildlife, special conditions and possible relocation of exploration or mining development could occur. This relocation, as well as any additional mitigation, would create time delays and further expenses for locatable mineral development if not closing the area to mineral entry through withdrawal.”

It’s my understanding that the determining factor in the location of mineral deposits is the geology of an area. So if that’s the case how do you propose to relocate [mineral] “exploration or mining development” in a manner that’s practical and consistent with that does not seem like a practical solution to me nor does it seem to be consistent with the Federal Land Policy and Management Act of 1976?

Did you have any economic (mining) geologist or mining engineers work on this document? If there had been, I don’t understand how doubt the preceding s type of statement could would have been included in the Resource Management Plan.

Response: The BLM uses an interdisciplinary team, including solid minerals specialists, in the development of its RMP revisions and amendments. Information in the RMP is used to guide activities on BLM lands. When a Notice or Plan of Operations for a mine is filed with the BLM, the proposed exploration or mining of locatable minerals is reviewed to confirm that the operations conducted will comply with the RMP and not cause unnecessary or undue environmental degradation. If necessary, conditions or mitigating measures may be applied. Such measures, as referenced in the RMPs, could include relocation of infrastructure such as access routes, power lines, tailings impoundments, or leach pads. As analyzed in the quoted RMP section, these conditions of approval or modifications may be more likely in areas identified as valued wildlife habitat. Therefore, mineral development in wildlife habitat may be delayed or modified to include more prescriptive mitigation measures.

WOOLRICH INC. LOOKS TO SUPPORT 21ST CENTURY CONSERVATION SERVICE CORPS. The Lock Haven (PA) Express (2/11, 26K) reports that Woolrich Inc. executives say "they are committed to finding ways to get today's youth engaged in outdoor activities." The company is "going so far as to partner with federal officials to seek help from the private sector to create new opportunities for young people and veterans on public lands." Recently, Nick Brayton, president of clothing and outdoor accessory manufacturer Woolrich, met with Interior Secretary Sally Jewell to "discuss Jewell's youth initiative that she had outlined to the National Press Club last October, emphasizing the importance of the outdoors for disconnected young people." Brayton said, "Secretary Jewell and I are very aligned in our goal to find ways to get our youth engaged in the outdoors as a whole. As a father of young children, I realize more every day the need to get our children back outside and unplugged. We plan to spend more time with the Secretary's office in the coming months to help drive this initiative home locally."

BOOTSTRAPS PROGRAM RECEIVES 2013 PARTNERS IN CONSERVATION AWARD. The Prairie (MT) Star (2/11) reports that the University of Nevada Cooperative Extension's Bootstraps Program has been recognized with the 2013 Partners in Conservation Award from the Interior Department. According to the article, the Bootstraps Program "gives at-risk young adults, ages 18 to 25, the opportunity to be involved in natural resource

project work, such as restoring sage-grouse habitat." Aaid at a January awards ceremony, Interior Secretary Sally Jewell said, "The Department of the Interior is proud to recognize the accomplishments of those who are innovating and collaborating in ways that address today's complex conservation and stewardship challenges. These partnerships represent the gold standard for how Interior is doing business across the nation to power our future, strengthen tribal nations, conserve and enhance America's great outdoors and engage the next generation."

SECRETARY JEWELL APPROVES NORTHERN RÍO GRANDE NATIONAL HERITAGE AREA PLAN. The [Taos \(NM\) News](#) (2/11, 31K) reports that Interior Secretary Sally Jewell has approved the management plan for Northern Río Grande National Heritage Area. The article notes that "the approval makes the heritage area eligible to receive a large increase in federal funds, up to \$300,000 each year through the National Park Service."

SECRETARY JEWELL MAKES APPOINTMENTS TO BLM-ALASKA RESOURCE ADVISORY COUNCIL. The [Delta \(AK\) News Web](#) (2/10) reports that Interior Secretary Sally Jewell has "made appointments to fill four vacancies on the 15-member Bureau of Land Management Alaska Resource Advisory Council (RAC)."

SEN. LANDRIEU'S ENERGY PANEL ASCENSION WELCOMED BY INDUSTRY LOBBYISTS. Bloomberg News (2/11, Litvan, 1.91M) reports that Louisiana Sen. Mary Landrieu (D) is set to take the gavel of the Senate Energy and Natural Resources Committee, joining Sen. Lisa Murkowski (R), the ranking member. They are from "two of the nation's top oil-producing states" and are "about to begin a partnership that has environmentalists uneasy and industry lobbyists counting on a shift in energy policy." While little pro-energy action is expected while the Democrats control the Senate, "analysts say the two lawmakers could jump-start discussion on some issues that could come to fruition after 2014." The piece notes that both back the Keystone pipeline and look favorably on lifting the ban on crude exports.

USA Today (2/11, Moore, 5.82M) reports that Landrieu accession to the chairmanship "could be good news for her re-election bid this fall, considered one of the Democrats' toughest challenges." It could "give her some ammo" for her bid, but she "still faces a battle to win in a state that President Obama lost by 17 percentage points." Landrieu is gaining the post because of the shuffle following Max Baucus' move to be the new Ambassador to Japan.

New Cruz Legislation Looks To Expand Domestic Energy Production. The Hill (2/11, Goad, 194K) reports in its "Regwatch" blog that Texas Sen. Ted Cruz (R) "detailed a plan to expand domestic energy production by beating back a slate of Obama administration regulations that he says are standing in the way of a national oil and gas boom." The plan "contains provisions that would block forthcoming federal regulations on hydraulic and power plants" and would "also require approval from Congress for the most costly government rules." Cruz, a potential 2016 candidate, "has devoted much of his time to gun rights and healthcare issues" and by "pivoting to energy, the conservative firebrand is expanding his policy portfolio."

SEN. MURKOWSKI BLASTS WHITE HOUSE ON ARCTIC POLICY LEADERSHIP. The [E&E Daily](#) (2/10) reports that Sen. Lisa Murkowski "accused" the Obama Administration of "dragging its feet in crafting an action plan for the nation's upcoming two-year chairmanship of the Arctic Council." Speaking Friday at the Seattle University Law School's Arctic symposium, Murkowski said "she was particularly disappointed in the White House's recent Arctic strategy implementation plan and dismissed the paper as a 'snapshot of existing programs.'" She said, "There's nothing here that demonstrates leadership in the Arctic, particularly leading up to our chairmanship."

ADDITIONAL COVERAGE OF PILT FUNDING. The [Taos \(NM\) News](#) (2/11, 31K) reports that Taos County will benefit from the PILT funding included in the Farm Bill. The county could have lost "12 percent of its budget for next year." However, the article notes that New Mexico is "expected to receive" \$34 million in 2014, which is "nearly \$700,000 less...than it did it 2013."

America's Great Outdoors:

National Park Service:

ENVIRONMENTAL GROUP PUSHES FOR RESTORING BREACHED POND AT JAMAICA BAY WILDLIFE REFUGE. The [New York Times](#) (2/11, Foderaro, Subscription Publication, 9.61M) reports that after Hurricane Sandy broke through a berm on Oct. 29, 2012, the NPS, which manages the Jamaica Bay Wildlife Refuge as part of Gateway National Recreation Area, has been debating "what to do with West Pond." According to the article, "some contend that the federal government should leave it alone, citing the pond's artificial provenance, as well as the risk of more breaches in the future with rising sea levels associated with climate change," but "a growing chorus of birders and environmentalists is arguing just the opposite." The article notes that "New York City Audubon will release a report on Tuesday that makes the case for restoring at least a portion of the pond to freshwater."

ASHLAND BREAKWATER LIGHTHOUSE MAY BE TRANSFERRED TO APOSTLE ISLANDS NATIONAL LAKESHORE. The [Ashland \(WI\) Daily Press](#) (2/11, 18K) reports that Congress could transfer the Ashland Breakwater Light from the Coast Guard to the Apostle Islands National Lakeshore "if bills sponsored by Senator Tammy Baldwin and Congressman Sean Duffy pass." Duffy said, "It's important that the great history of our community and the lakes are preserved. And to include that lighthouse into the National Park is really important. I'm honored that Senator Baldwin wants to work with me."

EVERGLADES NATIONAL PARK CONDUCTS PRESCRIBED BURN. The [AP](#) (2/11) reports that the Everglades National Park is "burning about 2,475 acres as part of its resource management." The prescribed burn will be conducted Tuesday and Wednesday along the eastern boundary of the park.

NEW SUPERINTENDENT INDIANA DUNES NATIONAL LAKESHORE NAMED. The [AP](#) (2/11, 417K) reports that Paul Labovitz, the superintendent at the Mississippi National River and Recreation Area, has been named the next superintendent at the Indiana Dunes National Lakeshore. Labovitz will begin at the Dunes Lakeshore on May 18. Save the Dunes executive director Nicole Barker said her organization is "energized by the announcement." Barker said the group is "hoping for a stronger and more collaborative connection between the park and local communities."

Also reporting on the story is the [Times of Northwest Indiana](#) (2/11, 283K).

ADDITIONAL COVERAGE OF FUNDING APPROVAL FOR SMOKIES HISTORY AND ARCHIVE FACILITY. Additional coverage of the approval of a \$4.3 million archive of the Great Smoky Mountains National Park was provided by the [AP](#) (2/11, 417K), which was also picked up by the [Kingsport \(TN\) Times-News](#) (2/11, 110K) and the [Bristol \(TN/VA\) Herald Courier](#) (2/11, 81K).

Bureau of Land Management:

BLM SEEKS INPUT ON PROPOSED WHITEWATER PARK ON COLORADO RIVER. The [Glenwood Springs \(CO\) Post Independent](#) (2/11, 27K) reports that the BLM is seeking public input on its environmental assessment of the proposed Gore Canyon Whitewater Park at the Pumphouse Recreation Site on the upper Colorado River. According to the article, "Grand County was recently awarded historic water rights for constructing this water park," and "the County has submitted a right of way application with the BLM to build the feature across the full width of the river upstream of the Pumphouse boat launch 2." BLM Kremmling Field Manager Stephanie Odell said, "The project would provide a unique recreational experience for the 60,000-70,000 people that visit the area each year. It would also provide permanent protection for water flows supporting recreational floatboating."

BLM INVITES PUBLIC TO VIEW AERIAL SEEDING. The [Elko \(NV\) Daily Free Press](#) (2/11, 22K) reports that the BLM, Elko District Office, is "completing Emergency Stabilization and Rehabilitation work on 2013 fire areas within the district, and on Wednesday is offering the public an opportunity to view aerial seeding of lands near Lee that were impacted by the Smith Ranch Fire." According to the article, "seeding treatments include both rangeland drills and aerial application, and focus on the rehabilitation of greater sage-grouse and other critical wildlife habitat, such as Lahontan cutthroat trout, mule deer and pronghorn."

BLM SEEKS VOLUNTEERS FOR RAPTOR SURVEY IN UTAH. The [Deseret \(UT\) News](#) (2/11, 274K) reports that the BLM is seeking volunteers to help conduct the annual Raptor Inventory Nest Survey this spring in Utah.

Fish and Wildlife Service:

FWS COMMENDS FRANCE FOR IVORY CRUSH. The [AllAfrica](#) (2/11, 18K) reports that the FWS has commended France for “destroying 3 tons of illegal ivory seized by customs and law enforcement officials between 1987 and 2007 as a step in reducing the demand for ivory that threatens the existence of African elephants.” In a statement, FWS Director Dan Ashe said, “France now joins the United States, China, Kenya, Gabon and the Philippines in sending a message to wildlife traffickers and poachers that their ivory is worthless. If African elephants continue to be killed at current rates to fuel the demand for ivory, their extinction in the wild is inevitable in just a matter of a decade or two.” He added, “The survival of the African elephant can only be assured with the support of every nation to halt both the demand for and the supply of ivory. I am greatly encouraged that the first European Union country has now underscored that support with this symbolic event, and I hope that others will follow.”

FWS FLOATS REVISED RECOVERY PLAN FOR WYOMING TOAD. The [E&E Daily](#) (2/10) reports that the FWS has released a proposed update to its recovery plan for the Wyoming toad. According to the article, “the proposed draft, which has been in the works for the past couple of years, lays out a 10-year plan that includes finalizing a conservation area in the southern Laramie River, as well as creating reintroduction and habitat management protocols.” The article notes that “in the fourth and fifth years of the plan, three self-sustaining populations would be established at Wyoming’s Mortenson Lake and along the Laramie River,” and “the final years of the plan call for three more reintroduction sites and populations.”

CALIFORNIA’S LACK OF RAIN THREATENS COHO SALMON. The [E&E Daily](#) (2/10) reports that “California’s ongoing drought has prevented coho salmon from following their regular migratory routes.” Jonathan Ambrose, a National Marine Fisheries Service biologist, said last week, “This is the first animal that will feel the impacts of the drought. It’s going to take a lot of rain to bust this thing open. And if they can’t get in by the end of February or March, they’re gone.”

FOUR WHOOPING CRANES SHOT IN RECENT MONTHS. The [E&E Daily](#) (2/10) reports that that “in recent months, four whooping cranes have been shot, hampering efforts to rehabilitate the population,” according to wildlife officials. Most recently, “two cranes were found shot last week in southwestern Louisiana.” The article notes that “one of the birds died, and another was scheduled for surgery.”

PUBLIC RESTRICTED FROM ACCESSING CAT ISLAND CHAIN. The [Milwaukee Journal Sentinel](#) (2/11, 798K) reports that “officials from local, state and federal agencies who are coordinating” project to re-create a chain of barrier islands in Green Bay have “decided to prohibit public access to the Cat Island chain because the land is a sanctuary for wildlife.” Gary VanVreede, a biologist from the FWS, one of the agencies managing the project, said, “The idea of this whole project is for bird habitat. It was never designed for public recreation.” He explained, “If we open it to birders, then are we going to open it up to cyclists and for hiking. If we let one group out there, then we pretty much have to open it to everyone.”

MULTINATIONAL OPERATION ENSNARES POACHERS. The [China Daily](#) (2/11, 31K) reports that “a multinational operation – in which China played a leading role – resulted in the arrests of hundreds of wildlife poachers and was of global significance for the intelligence it gathered,” experts said. Edward Grace, deputy chief of the FWS’ office of Law Enforcement said that “the operation, Cobra II, involved 28 countries from Asia, Africa and North America and sent a powerful message to poachers and smugglers.” The article notes that “more than 400 suspects were arrested and tons of products were seized in the month-long operation that sent poachers a clear signal of China’s zero-tolerance policy toward traffickers.”

NEW WILDLEAKS WEBSITE INVITES WHISTLE-BLOWERS ON WILDLIFE CRIME. The [National Geographic](#) (2/11, 40.49M) reports that “the first secure, online whistle-blower platform dedicated to wildlife and forest crimes, called WildLeaks,” was launched on February 7. the article notes that “wildlife law enforcement officers around the world welcome this new tool.” Patrick Bosco, special agent with the FWS, said, “Anything created to encourage others to provide information on wildlife crime, regardless of its ultimate usefulness, is a good idea.”

ADDITIONAL COVERAGE: REVIEW PANEL REBUKES FWS PROPOSAL TO DELIST GRAY WOLF.

Additional coverage of a peer review committee’s conclusion that science does not support the plan to delist

wolves was provided by the [Huffington Post](#) (2/11, Huta, 11.54M), the [Oregon Public Broadcasting](#) (2/11, 4K), and the [Prairie \(MT\) Star](#) (2/11).

OVERHAUL OF ENDANGERED SPECIES ACT URGED. In an op-ed for the [Hawaii Reporter](#) (2/11, 8K), Sydney Ross Singer claims that the Endangered Species Act is more concerned about the quantity of species, rather than the quality. Singer asserts that losing species with “no special qualities will not make the world a worse place.” Singer concludes that “it’s time to revisit the ESA and end its bloody mandate.”

The [Albuquerque \(NM\) Journal](#) (2/11, 288K) editorializes that the law “has had very limited success, resulting in just 2 percent of protected species being taken off the list.” In light of this, the paper argues that “relying on it to save the Rio Grande silvery minnow, sans science and a rational balance of environmental and human needs, likely has as much promise as ESA-driven efforts to save the northern spotted owl.” It concludes that “forty years after the act was signed into law, a review of what has worked and what hasn’t is long overdue.”

Securing America’s Energy Future:

Renewable Energy:

OFFSHORE WIND FARM PROJECT QUALIFIES FOR TAX CREDIT WITH TURBINE SUPPLY AGREEMENT.

The [E&E Daily](#) (2/10) reports that “a offshore wind farm being developed off the coast of Rhode Island has qualified for a lucrative federal tax credit by signing a turbine purchase contract.” The Block Island project being developed by Deepwater Wind will use “five 6 MW turbines supplied by French manufacturer Alstom,” the companies have announced. The purchase should allow Deepwater to “qualify for the federal investment tax credit (ITC), which would cover 30 percent of its costs,” according to Jeffrey Grybowski, the company’s CEO.

Onshore Energy Development:

CONSERVATION GROUPS APPLAUD BLM DECISION TO DEVISE OIL, GAS PLAN FOR COLORADO AREA.

The [E&E Daily](#) (2/10) reports that the BLM has “agreed to conduct a long-term plan for managing oil and natural gas development in a pristine area of south-central Colorado, drawing cheers from sporting and conservation groups that have long championed such an effort.” BLM officials say “they have committed to develop a master leasing plan (MLP) for the South Park region, which is renowned among outdoors groups for its world-class fisheries and pronghorn, mule deer and elk herds.” Environmental groups, “including the Colorado Wildlife Federation and National Wildlife Federation, along with leaders in Park County, argued that offering the parcels in the February lease sale would likely harm sensitive wildlife habitat in the region.”

INVESTOR SAYS MLPS FACE “TEMPORARY HEADWIND” FROM RISING RATES. The [E&E Daily](#) (2/10) reports that “rising interest rates will take some of the shine off midstream investments in 2014, according to a leading fund manager in the space.” However, “they’ll still be profitable, especially relative to other investment options,” said Kayne Anderson. Kevin McCarthy, who heads Kayne’s four publicly traded funds, wrote in a letter to shareholders last month, “While we expect that rising interest rates could lead to higher yields for MLPs (which would reduce total returns), we believe this will be a temporary headwind. Ultimately, the sector’s attractive yields and prospects for many years of distribution growth will lead to a continuation of strong returns.”

BLM SEEKS INPUT ON OIL, GAS LEASES. The [Elko \(NV\) Daily Free Press](#) (2/11, 22K) reports that the BLM Battle Mountain District is “making available for public review an environmental assessment on 139 parcels of public land nominated for lease in the July 2014 Competitive Oil and Gas Lease Sale.” The bureau “received nominations for 166 parcels of public land to offer for leasing, totaling more than 285,000 acres,” and it “deferred several of the nominated parcels to protect sage-grouse habitat.”

Offshore Energy Development:

ADDITIONAL COVERAGE: SHELL HALTS ARCTIC OFFSHORE DRILLING PLANS. Additional coverage of Shell’s decision to shelve its Arctic offshore drilling plans was provided by the [Cordova \(AK\) Times](#) (2/11, 2K).

Tackling America's Water Challenges:

STORM EASES CALIFORNIA DROUGHT. The CBS Evening News (2/11, 111) reported, "A phenomenon known as the pineapple express brought moisture from Hawaii" to relieve the West Coast's "historic drought." CBS (Blackstone) added this was the first rain in 14 months. Mike Swayze, watershed manager at Marin County's Mount Tamalpais reservoirs, said, "We saw a 25 percent increase in the water in our reservoirs out of this storm which is saving our bacon." However, Blackstone notes that the storm also caused flooded roads and heavy snow for some. Meanwhile, in California "rainfall totals statewide are still only about 40 percent of normal."

The San Francisco Chronicle (2/10, 2.88M) reports that "the gully washer that swept through California left a heaping of powdery snow in the Sierra, but it fell far short of filling the state's depleted reservoirs." According to water officials, "the downpour was a good thing, but California is still in the midst of a drought and the water supply situation is abysmal." The article notes that "the state's reservoirs are, for the most part, well below normal for this time of year despite the weekend storm."

The Sacramento (CA) Bee (2/10, 749K) reports that the BOR was "able to take advantage of increased runoff from the wet weekend storms to boost water diversions from the Sacramento-San Joaquin Delta." The bureau "tripled its diversions from the Delta on Sunday and expects to increase that pumping a little more on Tuesday."

Reuters (2/11, Gorman) reports that Louis Moore, a spokesman for the BOR, said, "We'd need another one of these storms weekly for the next several weeks to get back to where we want to be with our water supply."

President Obama Expected To Offer Financial Aid. The Fresno (CA) Bee (2/10, 327K) reports that when President Barack Obama visits Fresno on Friday, he is "expected to talk about the federal government's role in coping with the drought." According to the article, "many water experts say they expect Obama to offer some kind of financial aid and cooperation of federal agencies with state and local authorities."

Drought Causing Spike In Early California Wildfires. Bloomberg News (2/11, Chediak, 1.91M) reports that the drought in California has led to an early start to what could become a "devastating wildfire season," noting that there have been 487 wildfires so far in 2014, "compared with only two for the same period a year ago." Bloomberg notes that state utilities "are implementing plans normally reserved for high-fire season, such as stepping up patrols of electrical lines and bringing fire crews along for routine repairs." Edison International CEO Ted Craver said that the utility "will need to be extra vigilant if the dry conditions continue," stating in a telephone interview, "You can't say there wouldn't be some combination of events, a heat storm and a fire that takes out a transmission line." Craver did note that new gas generation and network upgrade will help "the grid to be able to withstand the shocks." This story was also carried by Bloomberg BusinessWeek (2/11, Chediak, 4.93M).

Low Rainfall Will Lead To Coal, Gas Use In Western States. In his column in Reuters (2/11), John Kemp argues that lower than average rain and snowfall in the western half of the United States will limit the use of hydropower in the region and force states to increase their coal and natural gas use this year. Kemp says that some paths out from the Columbia River can generate up to 12 percent of the peak power demand in California, but this year the Columbia River Basin has seen its precipitation drop by 30 percent of its annual average. He says the lack of precipitation has been especially bad in California where a state of emergency was declared due to drought conditions. He concludes by saying that the western states will likely have to look to coal to offset the lack of hydropower and the increasing price of natural gas.

Additional commentary on water issues was provided by the Bakersfield Californian (2/11, 140K), the Orange County (CA) Register (2/11, 675K), the Marysville (CA) Appeal-Democrat (2/11, 70K), and the Imperial Valley (CA) News (2/11, 1K).

HOUSE SET TO REAUTHORIZE FEDERAL DROUGHT INFORMATION PROGRAM. The E&E Daily (2/10) reports that "with all eyes on the entrenched Western drought," the House is "set to vote tonight on a bill to reauthorize a federal drought information program." Rep. Ralph Hall's H.R. 2431 would extend the National Integrated Drought Information System (NIDIS) through 2018, "authorizing a \$13.5 million annual budget." The Senate has approved a similar measure (S. 376) from Sen. Mark Pryor, "amended to cut the program's budget to \$12 million a year."

BOR NAMES NEW SCIENCE ADVISER. The E&E Daily (2/10) reports that the BOR has “named an engineer with a background in climate change and water management to be its scientific adviser.” BOR Commissioner Michael Connor “tapped David Raff for the post, which includes serving as the agency’s scientific integrity officer.” In a statement, Connor said, “Science and the scientific process are important at Reclamation. Dave’s experience and understanding of climate change and its influences on hydrology will be a great benefit as Reclamation and its partners confront widening imbalances between water supply and demand throughout the West.”

BOR SEEKS PUBLIC INPUT ON WATER SUPPLY STRATEGIES FOR EASTERN IDAHO. KIFI-TV Idaho Falls, ID (2/11, 23K) reports that the BOR is seeking input on how to improve water supply to the upper valley in Idaho. According to the article, “the Henry’s Fork Basin study was released Monday and includes 12 ways to help water supply.”

Empowering Native American Communities:

UPDATED FEDERALLY RECOGNIZED TRIBES LIST PUBLISHED. The Indian Country Today Media Network (2/10, 21K) reports that BIA published a notice January 29 in the Federal Register announcing this year’s updated list of federally acknowledged tribes. Assistant Secretary – Indian Affairs Kevin K. Washburn said, “The Bureau of Indian Affairs notice in the Federal Register of Indian entities recognized and eligible to receive services from the BIA is the official listing of all federally recognized tribes in the United States. The publication of this list is vital to the United States for its government-to-government relationship with the federally recognized tribes, to Indian Affairs and other agencies who work with them, and to inform the general public of who they are. The BIA works diligently with all of the listed tribal entities to ensure each name is accurate and complies with the tribes’ governing documents.”

BILL WOULD ALLOCATE MONEY TO FIGHT RULING THAT RIVERTON IS ON WIND RIVER INDIAN RESERVATION. The Casper (WY) Star-Tribune (2/11, 90K) reports that “state lawmakers introduced legislation that would earmark money for the state of Wyoming to fight the federal government over the Environmental Protection Agency’s recent ruling that Riverton is part of the Wind River Indian Reservation.” The bill, House Bill 78, “expands the state’s ability to fight federal regulating agencies in court.” The Northern Arapaho Tribe “slammed the bill as unnecessary saber rattling.” Mark Howell, a spokesman for the tribe, said, “The bill can be described as the state of Wyoming’s war powers act against the tribes in its efforts to attack the EPA. If it’s passed, they are really declaring war against the tribes on the Wind River Reservation.”

Top National News:

EMPLOYER MANDATE ONCE AGAIN DELAYED FOR SOME BUSINESSES. The announcement from the Administration on Monday that enforcement of the Affordable Care Act’s employer mandate will be delayed by another year received a great deal of coverage, including front-page articles in this morning’s Washington Post (2/11, A1, Eilperin, Goldstein, 4.28M) and New York Times (2/11, A1, Subscription Publication, 9.61M), as well as mentions on all three network newscasts Monday evening. In a very brief, 25-second item for NBC Nightly News (2/10, story 4, 0:25, Pelley, 7.86M), Brian Williams reported that the Administration had “announced...it is delaying another part of the President’s healthcare law.” Williams said “medium-sized businesses – that means those with between 55 and 99 employees...will not have to provide health insurance for full-time employees until 2016,” one year “later than previously announced.”

Much of this morning’s coverage reflects the perception that the White House was trying to insulate Democratic candidates from criticism in a midterm election year. On the CBS Evening News (2/10, story 5, 1:20, Pelley, 5.58M), Scott Pelley described the delay as “an election year concession to some businesses,” and Major Garrett said, “In a midterm election year...the White House simply did not need any more healthcare headaches.” Likewise, the AP (2/11, Alonso-Zaldivar) says the Administration was “trying to limit election-year damage on health care.”

The Washington Post (2/11, A1, Eilperin, Goldstein, 4.28M) reports that “by offering an unexpected grace period...administration officials are hoping to defuse another potential controversy” ahead of “this year’s midterm

election." Bloomberg News (2/11, Wayne, 1.91M) notes that as a result of the Administration's decision, "many small businesses won't have to worry about complying with the law's requirement next fall, about the same time voters are going to the polls in congressional elections." The Washington Times (2/11, Howell, 417K) says the delay "is sure to renew political recriminations among Republicans who feel the White House is protecting Democratic allies in a key election year."

Reports also suggest that the Administration's decision is further evidence that the ACA remains in need of policy tweaks. George Stephanopoulos, in a brief segment for ABC World News (2/10, story 4, 0:25, Stephanopoulos, 7.43M), said "after all of those glitches, all of those false starts," there is "a new delay for Obamacare," and McClatchy (2/11, Pugh, Subscription Publication, 95K) reports that Monday's announcement was the "the latest in a series of revised, delayed or discarded provisions that have characterized the tortured rollout of the contentious health law." At the opening of Fox News' Special Report (2/11, 2.15M), Bret Baier said, "Another day, another delay: President Obama slamming the brakes on another key part of his namesake healthcare law."

Republicans were quick to argue that ordinary Americans deserve relief from the individual mandate. Business Insider (2/11, LoGiurato, 1.39M) reported that Speaker Boehner said, "Once again, the president is giving a break to corporations while individuals and families are still stuck under the mandates of his health care law." Brendan Buck, a spokesman for Boehner, tweeted (2/11): "I'm old enough to remember when the House voted to delay the employer mandate, and the White House threatened to veto it."

The AP (2/11, Alonso-Zaldivar) reports that "in one of several concessions in a complex Treasury Department regulation...companies with 50 to 99 employees will have an additional year to comply with the coverage mandate," although for employers "with 100 or more employees the requirement will still take effect in 2015." The AP says "some major business organizations were quick to praise" the announcement, and quotes Neil Trautwein, vice president of the National Retail Federation, as saying, "These final regulations secured the gold medal for greatest assistance to retailers, and other businesses, and our employees." On the other hand, USA Today (2/11, A1, Kennedy, 5.82M) reports that Republicans, "many of whom co-sponsored a bill asking that the employer mandate be delayed...immediately denounced the move and called for the delay to be extended to individuals." House Majority Leader Eric Cantor is quoted as saying, "Much like the individual mandate, the business mandate is bad for middle-class families and will harm economic growth, but the answer to this problem is not random unilateral changes, stoking uncertainty."

Echoing Boehner's and Cantor's complaints, Politico (2/11, Norman, Nather, 464K) says "now that businesses are getting another break, the Obama administration will have to brace for the return of a huge political problem: the demands for regular people to get a break from" the individual mandate, which "will be a major test of the new White House congressional operation." House Majority Whip Rep. Kevin McCarthy (R-CA) is quoted as saying, "It's time we give every American the same relief from the law that the President has granted to businesses by working toward a legislative solution to delay Obamacare for everyone."

The Washington Examiner (2/11, Hughes, 319K) reports that as "this is the second time the administration has delayed the employer mandate," it has "stok[ed] GOP charges that the White House wasn't prepared to implement President Obama's signature domestic achievement." The Examiner notes that Senate Minority Leader Mitch McConnell said, "The White House seems to have a new exemption from its failed law for a different group every month."

Under the front-page headline, "Health-Law Mandate Put Off Again: No Fines For Most Employers Until 2016 As Firms Pressure White House In Wake Of Troubled Rollout," the Wall Street Journal (2/11, A1, Radnofsky, Francis, Subscription Publication, 5.91M) reports that Administration officials insist that the decision to delay the employer mandate once again was made in response to the concerns of the business community, rather than as a result of political considerations.

Roll Call (2/11, Lesniewski, Subscription Publication, 87K) reported that also on Monday, Sens. Tom Coburn, Lamar Alexander, Jeff Sessions, John Cornyn, John Barrasso and Jerry Moran "wrote...to IRS Commissioner John Koskinen questioning how the IRS plans to enforce the individual mandate." Roll Call says the senators noted that the ACA "restricts the ways in which the IRS enforces tax compliance," writing, "under the law, the IRS does not have the authority to file a notice of federal tax lien or bring forth criminal prosecutions in order to

enforce the tax payment.”

Robert Pear, in a front-page article for the New York Times (2/11, A1, Subscription Publication, 9.61M), writes that on Monday, the Treasury Department “laid out a three-tier approach.” Pear says that “for larger employers with 100 or more employees...seventy percent of employees must be offered coverage in 2015, and in later years at least 95 percent of employees must be offered coverage,” while “employers with 50 to 99 employees...will have an extra year,” and “small businesses with fewer than 50 employees...will not be required to provide coverage or fill out any forms in any year.” Pear adds that in response to those who “asked how the president could unilaterally waive provisions of the law,” J. Mark Iwry, Deputy Assistant Treasury Secretary for Health Policy, “said the administration had broad ‘authority to grant transition relief’ under a law that directs the Treasury secretary to ‘prescribe all needful rules and regulations for the enforcement’ of tax obligations.”

Sarah Kliff, in a Wonkblog piece for the Washington Post (2/11, Kliff, 4.28M), noted that “there had been some tussling on Capitol Hill over whether certain volunteers – mostly volunteer firefighters – would count as full-time employees, for purposes,” and that on Monday, Treasury “clarif[ie]d that they do not count as employees – which eliminates any incentives to get rid of volunteer positions” in order to escape the employer mandate.

Bloomberg News (2/11, Wayne, 1.91M) reports that Mark Mazur, Treasury’s Assistant Secretary for Tax Policy, released a statement reading: “While about 96 percent of employers are not subject to the employer responsibility provision, for those employers that are, we will continue to make the compliance process simpler and easier to navigate.”

According to The Hill (2/11, Goad, 194K), an anonymous “senior Treasury Department official stressed that the new language on the mandate was not meant to influence decisions about hiring or downsizing.” The Hill also reports that the International Franchise Association, “which represents the owners of popular chains such as McDonald’s and Dunkin’ Donuts, accused the administration of ‘picking winners and losers.’” IFA CEO Steve Caldeira said, “This announcement is just another delay that while positive in the short term for some franchises, only postpones the inevitable and demonstrates the Affordable Care Act remains a significant problem for employers to implement.”

The Wall Street Journal (2/11, Subscription Publication, 5.91M), in an editorial, argues that the Administration does not have the power to make such unilateral changes to a law written by Congress, and notes that many of the Administration’s changes to the ACA have benefited corporations, not individual Americans. As did many conservative outlets, the Washington Times (2/11, Wolfgang, 417K) noted that earlier on Monday, during a tour of Monticello with French President Francois Hollande, President Obama had been quoted as saying, “That’s the good thing as a president. I can do whatever I want.”

DEBT LIMIT BILL TIED TO MILITARY PENSION CHANGE EMERGING AS GOP PREFERENCE. The likely GOP vote on Wednesday on a debt-ceiling increase is drawing significant attention, particularly as a sign of the significant change in strategy by the GOP leadership in not attaching significant cuts. In addition, there is some doubt expressed in the coverage about whether or not the legislation can draw enough Democratic support to pass it.

The Washington Post (2/11, Costa, Kane, 4.28M) reports that House GOP leaders spent Monday working to rally members behind a “proposal that ties a debt-ceiling increase to a plan to restore full pension benefits for some military veterans.” House Speaker John Boehner called a “special conference meeting:” to try to find “the right policy mix that would attract enough Republican and Democratic support for the measure to be approved, possibly as soon as Wednesday.” However, Republicans “stressed that Boehner’s team had made no final decision and that the proposal’s fate remained uncertain.”

In a piece posted later, The Hill (2/11, Berman, Wasson, 194K) reports that House Republican leaders are “pushing for a Wednesday vote” on the debt ceiling and military pension bill. The bill “suspends the debt ceiling until March 15, 2015,” which would “allow the government to continue borrowing without limit, and the new debt ceiling would be whatever the debt is at the end of that date.” The bill “represents a remarkable shift” for the GOP leadership, who “once demanded deep spending cuts in exchange for raising the nation’s debt limit.”

Politico (2/11, Sherman, 464K) reports that if the plan does pass, “it could increase pressure on the Senate to

take up the bill, despite objections from Democratic leaders there to attaching any policy to legislation that raises the debt ceiling." However, if the House rejects the bill, it could allow Boehner to "pivot to a clean debt ceiling bill — one without attached policy — just days before the nation is set to run out of borrowing authority."

Roll Call (2/11, Dumain, Fuller, Newhauser, Subscription Publication, 87K) reports the deal is "designed to attract Democratic support, which became necessary when GOP leaders found last week that none of their plans could garner 218 votes from Republicans alone."

The Wall Street Journal (2/11, Hook, Peterson, Subscription Publication, 5.91M) also says that it is not clear if the legislation will draw sufficient support from Democrats.

The Washington Post (2/11, Costa, Kane, 4.28M) reports that if no legislation is passed by Wednesday, the House "is not slated to return for legislative action for nearly two weeks, just days before" Treasury Secretary Lew's deadline. The Post notes that the "benefits for retired military personnel were reduced in last year's bipartisan budget agreement, which cut \$6 billion in payments to veterans over the next 10 years."

USA Today (2/11, Davis, 5.82M) reports that Republicans would offset the cost of the military pension rollback "would pay for it by extending certain mandatory spending cuts, known as the sequester, through 2024." The pension cuts "have sparked outrage from lawmakers in both parties as well as veterans' groups who say the cut breaks a fundamental promise made to military veterans."

The New York Times (2/11, Weisman, Subscription Publication, 9.61M) reports that the Senate "voted Monday evening to take up a bill that reverses the same spending cut." The move by both chambers "starkly illustrate how difficult it will be to wring savings from automatic government programs — like pension and health care 'entitlements' — which are swelling with an aging population but remain politically untouchable."

White House Won't Commit To Signing Bill. The AP (2/11, Taylor) reports that White House spokesman Jay Carney "sidestepped a question" about whether the President would sign the House proposal, "reiterating the White House position that Obama would not negotiate on raising the borrowing limit." Carney said, "I'm not going to get into a 'what if this were in the bill or that were in the bill. Our position has not changed. It hasn't changed for a long, long time. We're not negotiating over Congress' responsibility to pay its bills."

Cruz Calls Debt Increase Without Cuts "Irresponsible." The Washington Post (2/11, Blake, 4.28M) reports in its "Post Politics" blog that Sen. Ted Cruz (R) said on Monday that it would be "irresponsible" for House GOP leaders to "allow for a debt ceiling increase without "significant" progress toward reducing spending." Cruz said, "I think that's irresponsible. I hope the House doesn't go down that road."

US Chamber Calls On House To Quickly Raise Debt Ceiling. The Hill (2/11, Bogardus, 194K) reports in its "On The Money" blog that the US Chamber of Commerce on Monday "called on the House to raise the debt ceiling, increasing pressure on Republicans to move a bill forward." Bruce Josten, the Chamber's "chief lobbyist," wrote that increasing the debt ceiling "would eliminate the threat of default and allow credit markets to function properly" and would also "allow the economy to 'finally to achieve some long-awaited momentum.'"

Investors Betting Debt Ceiling Increase Gets Through. Bloomberg News (2/11, McCormick, 1.91M) reports that Treasury bill rates "suggest that investors are betting US lawmakers will agree to raise the nation's borrowing limit and avoid the budget logjam that resulted from last year's partial US government shutdown." The one-month rates "dropped about four basis points to 0.06 percent, even after the Feb. 7 expiration of an agreement that suspended what's known as the debt ceiling."

WHITE HOUSE: OBAMA IS NOT TO BLAME FOR STALLED IMMIGRATION REFORM. The Washington Times (2/11, Wolfgang, 417K) reports that on Monday, White House press secretary Jay Carney said that "if the House doesn't take action on immigration, the chamber's Republican leadership shouldn't use a lack of trust in President Obama as an excuse." Carney is quoted as saying, "I don't think it stands up to scrutiny that the troubles Republicans have on this issue are the president's fault. Nor could they be attributed to a lack of trust." The Times notes that Carney's "comments come amid growing" concern that the President "cannot be trusted to enforce tough new border security measures."

The Hill (2/11, Sink, 194K) notes that Carney noted, "When comprehensive immigration reform came up as an issue in 2006, when President George W. Bush was in office, Republicans killed it because of their internal divisions."

Eugene Robinson, in his column for the Washington Post (2/11, 4.28M), says the President "has done everything humanly possible to make it easier for Republicans to support sensible reform."

Cruz's Campaign Against Boehner's "Amnesty" Push Noted. Humberto Sanchez, in a piece for Roll Call (2/11, Subscription Publication, 87K), says Sen. Ted Cruz "continues to do" Speaker Boehner "no favors – and some of Boehner's allies think the tea party Texan should mind his own business." According to Sanchez, "as Boehner unveiled his leadership team's immigration principles at the House GOP's retreat two weeks ago, Cruz and his staff simultaneously torched the push for an immigration overhaul this year...immediately playing the 'amnesty' card." Cruz is quoted as having said, "Anyone pushing that right now should go ahead and put a Harry Reid for majority leader bumper sticker on the back of their car."

Dana Milbank, in his column for the Washington Post (2/11, Milbank, 4.28M), says "even" former senator Jim DeMint, the president of the Heritage Foundation, "says he wants immigration reform — but not now, because he doesn't trust Obama." DeMint is quoted as saying, "With this president, what he's done with Obamacare...to give the president the authority that would come with this giant amnesty bill just does not make sense."

Kristol: Schumer May Have Inadvertently Help Kill Immigration Reform. In a piece published Monday, the Weekly Standard's (2/11, Kristol, 736K) Bill Kristol wrote that Sen. Chuck Schumer, "an author of the Senate immigration bill, may have succeeded in helping Republicans kill his own bill" when he suggested on Sunday that its implementation could be delayed until 2017 in order to assuage Republican concerns that President Obama would use executive actions to dilute its enforcement provisions. Kristol said, "in other words," Schumer, "who has previously pretended immigration reform is urgently important, is acknowledging that in fact there is no urgency to act."

Immigration Activists Plan To "Punish" Congressional Republicans. According to Politico (2/11, Palmer, Kim, 464K), "Immigration reform advocates are done playing nice," and now, "after holding their fire...at the urging of the Obama administration, several immigration reform groups now plan to unleash their anger at the right." Politico reports that on Tuesday, "these groups say they will begin confronting Republican lawmakers at public appearances, congressional hearings and events back in home districts." Politico adds that activists "plan to target House Republicans in swing districts with a wide section of Latino voters – even if they've expressed support for immigration reform before" – which "means that lawmakers such as Rep. Jeff Denham (R-Calif.), who has gone as far as to sign onto a Democratic-backed comprehensive bill, aren't safe from the wrath of the pro-reform groups." Kica Matos, a spokeswoman for the Fair Immigration Reform Movement, is quoted as saying, "What we are now doing is to switch tactics from persuasion to punishment."

Study: Food Prices Would Rise if Immigration Laws Were More Strictly Enforced. The New York Times (2/11, Nixon, Subscription Publication, 9.61M) reports that a study commissioned by the American Farm Bureau, the "largest farm lobby organization," concluded that "immigration reform that focuses solely on enforcement would cut agriculture production and cause a sharp rise in food prices" due to "a lack of workers to harvest crops." According to the AFB-commissioned study, border enforcement "would cost the agriculture sector as much as \$60 billion over" five years.

USA Today (2/11, Doering, 5.82M) notes that the report forecast that, "under an enforcement-only scenario, fruit production would plummet in the United States by 30% to 61%, vegetable output by 15% to 31%." USA Today says "farmers are pushing to overhaul H-2A visas, which allow the agriculture industry to hire temporary workers" who are not US citizens.

Nebraska Town Voting On Whether Or Not To Retain Restrictions On Illegal Immigrants. The AP (2/11, Funk) reports "almost four years after" Fremont, Nebraska "tried to crack down on illegal immigration," it is "having second thoughts about requiring all renters to swear that they have legal permission to be in the United States." The AP adds that on Tuesday, "voters in Fremont will have a chance to repeal the housing restrictions, which critics say are less effective and more costly than anyone expected and damaging to the city's image."

Nearly Three-Quarters Of Babies Born In US Territory Of Saipan Have Chinese Parents. On ABC World News (2/10, story 6, 2:35, Stephanopoulos, 7.43M), George Stephanopoulos reported that Saipan, a "US territory...3,700 miles west of Honolulu, has become the hot destination for more and more families from China" who want their children to be US citizens. Gloria Rivera went on to report that visitors to Saipan, which is "just four hours by plane from China," do not need a visa, which makes it attractive for "pregnant Chinese women have what they call an ABC – an American-born Chinese baby." According to Rivera, "Full packages start around \$27,000, promising Social Security cards, birth certificates and, most importantly, an American passport." Rivera reported that "a full 71 percent of babies born in Saipan are ABC's."

WPost Blasts Virginia Republicans Who Oppose In-State Tuition Rates For Illegal Immigrants. The Washington Post (2/11, 4.28M), in an editorial, writes, "Even if undocumented students grow up in Virginia and graduate from a high school in the state, Republican leaders in Richmond insist that they pay out-of-state tuition rates at public colleges and universities." The Post notes that "legislation that would allow these students to pay in-state rates recently cleared the Education Committee in the House of Delegates with broad bipartisan support," but, according to the Post, William Howell, the speaker of Virginia's House of Delegates, "saw to it that the bill was sent to die in the Appropriations Committee."

Editorial Wrap-Up:

NEW YORK TIMES. "Gay Rights And The Justice Department." The New York Times (2/11, Subscription Publication, 9.61M) editorializes that since the Supreme Court ruling striking down DOMA, "the Justice Department has been helping federal agencies change their practices," and now the department "is adjusting its own policies and programs, bringing significant advances for gay couples and American justice." The Times notes that under the new policies, "in court cases and criminal investigations, same-sex couples will be covered for the first time by the 'spousal privilege,' a rule that prevents spouses from being forced to testify against each other," and that same-sex "spouses of police officers or firefighters killed or catastrophically injured in the line of duty will be eligible for a special benefits program the Justice Department administers." The Times expresses disappointment with the Administration for "hesitating to move forward with another important anti-discrimination measure: barring federal contractors from refusing to hire workers on the basis of sexual orientation or gender identity."

"The Message From Homes." In an editorial, the New York Times (2/11, Subscription Publication, 9.61M) argues that while it is a "long shot," a "political solution leading to a transitional government remains the best outcome" in Syria. The Times adds that such a solution "is not out of the question if some right choices are made." The US, the Times argues "should drop its opposition to including Iran, which supplies arms and other assistance to Mr. Assad, in the negotiations." Russia "could send a powerful message to Mr. Assad by suspending its arms deliveries." Saudi Arabia and Qatar "could send the same message to Mr. Assad's opposition by ending weapons deliveries to the rebels." Meanwhile, Turkey "could close its border to the foreign fighters that have turned Syria into a cauldron of extremist elements that threaten the entire region."

"The State Of Mr. De Blasio's City." In an editorial, the New York Times (2/11, Subscription Publication, 9.61M) writes that New York City Mayor Bill de Blasio's State of the City speech had "a few promising specifics" on housing, education, and wages, but the mayor's "societal critique and statements of noble ambitions" crowded out from the speech "details of a broader agenda," such as what he will do on "parks, sanitation, transportation, the arts, infrastructure and climate change."

"Army Auditors' Shock And Awe." In an editorial, the New York Times (2/11, Subscription Publication, 9.61M) calls the recruiting bonus fraud, in which suspects are accused of claiming rewards for recruiting men and women who had already planned to enlist, "seems especially shameful." The paper calls for "the fullest accounting of this blot on the home front, however war-weary the nation is."

WASHINGTON POST. "Oppressed In Nigeria." An editorial in the Washington Post (2/11, 4.28M) describes Nigeria's new law against homosexuality as "extraordinarily repressive," and notes that it appears "to violate Nigeria's constitution, which, as Secretary of State John F. Kerry has pointed out, guarantees freedom of assembly." The Post argues that the US and Britain "should be aggressively using their leverage to protect the vulnerable gay community," starting with letting President Goodluck Jonathan "know he and his government will

be unwelcome in Washington and London until the law is repealed.”

“Bring On The Chip-And-PIN.” In an editorial, the Washington Post (2/11, 4.28M) writes that transitioning to chip-and-PIN technology “involves costs that stores, card companies and banks have been reluctant to bear.” The paper concludes that consumers “ought to be angry at the industry’s lag.”

“Where Dreams Go To Die.” The Washington Post (2/11, 4.28M), in an editorial, writes, “Even if undocumented students grow up in Virginia and graduate from a high school in the state, Republican leaders in Richmond insist that they pay out-of-state tuition rates at public colleges and universities.” The Post notes that “legislation that would allow these students to pay in-state rates recently cleared the Education Committee in the House of Delegates with broad bipartisan support,” but, according to the Post, William Howell, the speaker of Virginia’s House of Delegates, “saw to it that the bill was sent to die in the Appropriations Committee.”

WALL STREET JOURNAL. “Obama Rewrites ObamaCare.” A Wall Street Journal (2/11, Subscription Publication, 5.91M) editorial criticizes the Administration’s delay of the ACA’s employer mandate, decrying the move as hypocritical. The Journal asserts that liberals initially dismissed arguments that the provision would hurt job creation and the economy, but now have come to embrace that logic, using it as justification for the delay. The editorial also questions the legality of the White House’s actions, saying that Congressional approval is needed to make such changes and suggesting that the President disregards the law when he pleases.

“Wisconsin Punch Back.” In an editorial, the Wall Street Journal (2/11, Subscription Publication, 5.91M) says that the Wisconsin prosecutors conducting a secret probe of conservative groups were warned last month that their actions might draw a Federal lawsuit, and on Monday, it did. The suit was filed on behalf of the Wisconsin Club for Growth and lays out the partisan motivations behind the investigation, which is apparently looking into illegal aid to Gov. Scott Walker (R). The suit argues that the point of the investigation is to silence conservative political groups during the 2014 election campaign. The Journal says that as a first move, the Federal judge should unseal the records of the investigation.

“Big Labor’s Quickie Election Gambit.” In an editorial, the Wall Street Journal (2/11, Subscription Publication, 5.91M) says that the NLRB last week rolled out a proposal to speed up union elections. The Journal says that the proposal had failed once before and that the new version is no better. Under the new proposal, a company is required to give a union the full list of contact information for its employees and also cuts the time before a vote. The WSJ says that the point of the new rule is to limit workers’ freedom to debate unionization.

Other: Feb. 10 – 11. PRESIDENT HOLLANDE — Official visit of French President Hollande to Washington.

FRENCH PRESIDENT – ARLINGTON CEMETERY — 3 p.m. French President Francois Hollande and Maj. Gen. Jeffrey S. Buchanan, commanding general, U.S. Army Military District of Washington, lay a wreath at the Tomb of the Unknowns and present the Legion of Honor Medal to the World War II Unknown. This year commemorates the 70th Anniversary of the Allied Forces' D-Day landing in Normandy. Immediately following the Arlington National Cemetery ceremonies, President Hollande will proceed to the Fort Myer Officers Club where he will present the Legion of Honor to six WWII veterans. A reception will be held for the veterans and their families at

the Officers Club.

Location: Tomb of the Unknowns, Arlington National Cemetery, and Fort Myer Officers Club, Bldg. 214, Koran Room, Joint Base Myer-Henderson Hall, Arlington, Va.

Feb. 10 – 12. SO/LIC SYMPOSIUM AND EXHIBITION — Theme: “Seamless SO/LIC: Government and International Partnerships, Supported by Industry, for Global Employment.” <http://www.ndia.org/meetings/4880/Pages/default.aspx> 8:15 a.m. U.S. Special Operations Command Commander Navy Adm. William McRaven delivers remarks on “Enabling SOCOM Partnership.” 1:15 p.m. Assistant Secretary of Defense for Special Operations/Low-Intensity Conflict Michael Lumpkin delivers remarks on “New Policy, Strategy and Resources for Global Posturing.”

SMART ON CRIME – HOLDER — 8:15 a.m. Attorney General Eric Holder will deliver remarks at the Georgetown University Law Center criminal justice forum, where he will discuss the departments “Smart on Crime” initiative and strategies to remove barriers to reentry for formerly incarcerated individuals. This is a Bipartisan symposium on criminal justice reform with policymakers, advocates, and thought leaders featuring Attorney General Eric Holder, Senator Mike Lee (R-UT), Senator Rand Paul (R-KY), Senator Sheldon Whitehouse (D-RI) and leaders from the ACLU, Heritage Foundation, Justice Fellowship, and Aleph Institute. Event is sponsored by The Leadership Conference Education Fund and the Vera Institute of Justice. All media must present government-issued photo I.D. (such as a drivers license) as well as valid media credentials. Media must RSVP to Scott Simpson at Simpson@civilrights.org or 202-466-2061 no later than 12:00 p.m. EST on MONDAY, Feb. 10, 2014. Registered media will receive an email including further logistical information. Press inquiries regarding logistics should be directed to Scott Simpson at Simpson@civilrights.org or 202-466-2061. Location: Georgetown University Law Center, Gewirz Student Center, 10 F St., N.W.

FIRST RESPONDER TECHNOLOGY DEMONSTRATION — 8:30 a.m. Science & Technology Directorate (S&T) Acting Under Secretary Daniel Gerstein will deliver remarks to welcome representatives from across the homeland security enterprise, first responder community, and emergency management practitioners at the S&T First Responder Technology Demonstration. Location: U.S. Immigration and Customs Enforcement Headquarters, 500 12th St., SW.

ATLANTIC COUNCIL – US – CUBA — 9 a.m. – 10:30 a.m. The Atlantic Council hosts a discussion of poll results on American public opinion toward Cuba, with Sens. Jeff Flake, R-Ariz., and Patrick Leahy, D-Vt.; CNN political analysts Paul Begala and Alex Castellanos; Paul Maslin, Democratic pollster, FM3 Strategies; Glen Bolger, Republican pollster, Public Opinion Strategies; moderated by Enrique Acevedo, anchor, Fusion. Location: Atlantic Council, 1030 15th St. NW, 12th Floor.

AFRICAN AMERICAN HISTORY MONTH – HOLDER — 11 a.m. Attorney General Eric Holder, Bureau of Alcohol, Tobacco, Firearms and Explosives Director B. Todd Jones, Bureau of Prisons Director Charles E. Samuels and U.S. Attorney for the Eastern District of New York Loretta Lynch will deliver remarks at the departments African American History Month event. All media must present government-issued photo I.D. (such as a drivers license) as well as valid media credentials. Media must RSVP to Stephen Ratner at 202-514-2007 or Stephen.Ratner@usdoj.gov no later than 5:00 p.m. EST, Monday, Feb. 10, 2014. Media must enter the department at the visitors entrance on Constitution Avenue between 9th and 10th Streets. Media may begin arriving at 10:00 a.m. EST. All cameras must be pre-set by 10:45 a.m. EST. Press inquiries regarding logistics should be directed to the Office of Public Affairs at 202-514-2007. Location: Department of Justice, Great Hall, 950 Pennsylvania Ave., N.W.

US CHAMBER – EGYPTIAN TRADE MINISTER — 12 p.m. – 1:30 p.m. The U.S. Chamber of Commerce U.S.-Egypt Business Council hosts Egyptian Minister of Trade and Industry Mounir Fakhry Abdel Nour at an event highlighting the importance of growing the economic relationship between the United States and Egypt. During remarks, Minister Abdel Nour will discuss specific Egyptian government investments that could provide opportunities for U.S. companies to participate in Egypt's economy. Speakers: H.E. Mounir Fakhry Abdel Nour, Egyptian Minister of Trade and Industry; Mohamed Tawfik, Egyptian Ambassador to the United States; Khush Choksy, Vice President of Turkey and Middle East Affairs, U.S. Chamber of Commerce. Location: U.S. Chamber of Commerce, 1615 H St. NW.

SOLAR INDUSTRY JOB CENSUS — 2:30 p.m. – 4 p.m. The Environmental and Energy Study Institute (EESI) hosts a briefing on The Solar Foundation's National Solar Jobs Census 2013, which found record growth in the U.S. solar industry. Since the start of the annual census in 2010, U.S. solar industry employment has increased 53 percent and now employs more than 142,000 Americans. Speakers: Rep. Anna G. Eshoo, D-Calif.; Andrea Luecke, president and executive director, The Solar Foundation; Amit Ronen, director, GW Solar Institute, professor, GWU Trachtenberg School of Public Policy; Jason Walsh, senior adviser, Energy Department Office of Energy Efficiency and Renewable Energy. Location: 2226 Rayburn.

Last Laughs:

LATE NIGHT POLITICAL HUMOR.

Jon Stewart: [Referring to the conditions of hotels in Sochi] "One, that doesn't really address the curious and apparently dangerousness of the yellowness of the water. And number two, when you're mounting a defense of your country's Olympic preparations, I would leave out the part where you say you have cameras in everyone's bathroom."

Stephen Colbert: [Referring to Russia's anti-gay policies] "Now last year, President Putin took a hard line against this threat by banning all gay propaganda. Protesters can now face jail time [for] promoting anything pro-gay, from a pride flag to a reclaimed barn-wood coffee table."

Subject: Utah lawmakers seek \$2 million to lobby against grouse listing

To: Gary Frazer <gary_frazer@fws.gov>, Dan Ashe <d_m_ashe@fws.gov>

This in addition to the \$1M sought by Governor's Public Lands Policy office to prepare for litigation.

<http://shar.es/Fmy3V>

A federal decision whether to list greater sage grouse as a protected species is at least 18 months away, but some Utah lawmakers are angling for \$2 million in state money to crank up a lobbying campaign to get the federal government to delay listing for 10 years. This request comes on top of another \$1 million the state Public Lands Policy Coordination Office is seeking to gather data and ...

DOI in the News:

INTERIOR SEEKS \$7 MILLION IN OVERPAYMENTS FROM THREE MONTANA SCHOOL DISTRICTS. The [AP](#) (2/19, Volz, 417K) reports that the Interior Department is "seeking the return of \$7 million paid over the last 37 years to three Montana school districts near Yellowstone National Park, saying they were overpayments from a program that should have ended decades ago." According to Interior spokeswoman Jessica Kershaw, "officials only recently learned of the overpayments, and the department is legally obligated to recover the money." However, "Montana's congressional delegation is seeking a waiver, saying the schools will be unable to repay that amount." Interior officials said "they are working with the delegation and the schools to find a solution."

Coverage by the AP was also picked up by the [Atlanta Journal-Constitution](#) (2/19, 1.26M), the [San Francisco Chronicle](#) (2/19, Volz, 2.88M), and the [Seattle Post-Intelligencer](#) (2/19, 768K). Also reporting on the story is the [Bozeman \(MT\) Daily Chronicle](#) (2/19, 54K).

SECRETARY JEWELL ASKED TO RECONSIDER ROAD PROPOSAL AFTER MEDEVAC. [KTUU-TV](#)

Anchorage, AK (2/19, 4K) reports that "a recent medical emergency has reignited the debate over a proposed road between the communities of King Cove and Cold Bay." Proponents of the road, "which would run through

part of the Izembek National Wildlife Refuge, say a medevac flight in dangerous weather conditions proves the necessity of the road for emergency scenarios." However, "opponents of the road, bolstered by Interior Secretary Sally Jewell's December rejection of a land swap to facilitate the project, claim construction isn't the best option." Sen. Lisa Murkowski sent Jewell "a letter on Tuesday, once again urging her to reverse her decision." A spokeswoman for Jewell said in an email that "her office has attempted to schedule a meeting with Murkowski, but would not comment on whether Jewell would reconsider."

WESTERN LAWMAKERS PUSH LEGISLATION TO FREE UP FUNDS TO PREVENT WILDFIRES. USA Today (2/18, Kelly, 5.82M) reports that "with record droughts fueling fears of devastating wildfires in the West, members of Congress from the region are trying to boost chronically underfunded federal fire prevention efforts." Sen. Ron Wyden is working with Sen. Mike Crapo to "offer a bill that would stop the vicious cycle of federal agencies raiding fire prevention funds to pay for emergency firefighting efforts." The Wildfire Disaster Funding Act, "which was also introduced in the House this month, would create a special disaster fund to fight huge 'mega-fires', which make up about 1% of wildfires but use up 30% of fire suppression funds." According to "the funding change would free up as much as \$412 million a year in the Forest Service and Interior Department budgets to prevent fires by thinning the overgrown tree stands and underbrush that fuel the blazes."

WORLD POLITICS COULD HINDER ALAMO DESIGNATION. KCEN-TV Waco, TX (2/19, 922) reports that "world politics may get in the way" of the Alamo's designation as a UNESCO World Heritage Fund site. The article notes that "last fall, UNESCO, a United Nations international agency, recognized Palestine as a state, and the US stopped paying its UNESCO dues, which help support the World Heritage Fund," and "as a result, the US lost its voting rights in the organization." Rep. Joaquin Castro "tried to include a provision in spending legislation that would allow the US to pay World Heritage Fund dues without having to pay the larger UNESCO fees," but "the omnibus bill passed in January did not include the provision."

NORTH DAKOTA GOV. DALRYMPLE PLANS TO MEET WITH SECRETARY JEWELL. The Forum of Fargo-Moorhead (ND) (2/19, 15K) reports that Gov. Jack Dalrymple will visit Washington, D.C., "on Thursday for the National Governors Association's annual winter meeting." According to Jeff Zent, a spokesman for the governor, Dalrymple "also plans to meet with administrators, agency heads and possibly some Cabinet members, including Secretary of Agriculture Tom Vilsack, Secretary of the Interior Sally Jewell and Environmental Protection Agency Administrator Gina McCarthy."

NEW ZEALAND ENERGY MINISTER PLANS TO MEET WITH SECRETARY JEWELL. Yahoo! (2/19, 17.91M) reports that Energy and Resources Minister Simon Bridges is leaving "for Norway, the United States and Canada to meet ministerial counterparts and industry experts." In the US, he will meet Interior Secretary Sally Jewell, "and other senior officials in Washington, before heading to Houston."

EPA'S MCCARTHY: OBAMA WILL NOT WAIT FOR CONGRESS TO ADDRESS CLIMATE CHANGE.

Appearing on MSNBC's All In (2/19, 510K), EPA Administrator Gina McCarthy said, "The President's been very clear that he's eager to work with Congress, but he's not waiting. We're going to take action, and there's a lot of ability for the Administration...when we work with businesses and the industries and the states, to actually make a significant dent in carbon emissions." McCarthy added, "We're going to get international action moving forward, and we're going to be working to make this a significant benefit to the economy of the US" because, "after all, climate change isn't just an environmental challenge, it's a serious economic challenge."

America's Great Outdoors:

National Park Service:

INVESTIGATION QUESTIONS BROWN FOUNDATION SPENDING. The AP (2/19, 417K) reports that the Office of Inspector General/US Department of the Interior has found numerous instances of "unallowable, unreasonable and unsupported" spending by the Brown Foundation of Education Equity, Excellence and Research. The probe "began after an audit last year questioned nearly \$620,871 in spending by the foundation, which used to receive most of its funding from the National Park Service, from October 2008 to September 2011." However, "investigators said it was impossible to conduct a complete review of the Brown Foundation's spending because of poor financial management, commingling of funds and missing documentation to justify expenses."

The Topeka (KS) Capital-Journal (2/18, 194K) reports that "the Brown Foundation, represented by Topeka attorney Clint Patty, issued a statement Tuesday saying the OIG report identified 'only a small fraction of the initial 'questioned expenses' as not in compliance with applicable federal rules and guidelines.'" The foundation said "the report confirms its position that 'reimbursements and expenditures involving federal dollars received the prior approval of the National Park Service.'"

The Topeka (KS) Capital-Journal (2/18, 194K) reports that "the financial position of the Brown Foundation rapidly eroded in recent years as it relied on cash advances from its founder to stay afloat." According to the article, "audits posted on the website of the Brown Foundation for Educational Equity, Excellence and Research and publicly available tax forms showed the foundation's expenses had already begun to deplete before the National Park Service ended its contract related to the Brown v. Board of Education National Historic Site on Sept. 30, 2011."

Also providing coverage are summaries by the Topeka (KS) Capital-Journal (2/18, 194K) and the Topeka (KS) Capital-Journal (2/18, 194K).

RETIRED NPS MANAGER RECALLS MAP IN FIGHT OVER BOSTON RESTAURANT. The Boston Globe (2/19, Murphy, 1.75M) reports that the Boston Redevelopment Authority was "so close to realizing its vision of a restaurant on the tip of Long Wharf that you could almost smell the fried clams." However, "it seems that BRA officials, in their zeal to promote waterfront dining, failed to take into account an old map outlining the edge of Long Wharf as protected space." A retired NPS manager, Edward Rizzotto "reading about the controversy in the Globe, remembered the map and made a call." According to the article, the NPS "found the 1980s map in a federal archive in Philadelphia, prompting a state judge to put the restaurant plans on hold in late December and leaving the BRA with ketchup on its face."

ZION NATIONAL PARK PROPOSES TO MANAGE BIGHORN SHEEP. The Deseret (UT) News (2/19, 274K) reports that Zion National Park has "proposed to manage bighorn sheep within the park in conjunction with the Utah Division of Wildlife Resources." According to the article, "since the core population exists both within and outside the park, DWR will perform management actions both inside and outside of the Park; however, the proposal will focus on management actions within the Park."

ROCKY MOUNTAIN NATIONAL PARK BEGINS OSPREY SATELLITE TRANSMITTER TRACKING PROJECT. The Estes Park (CO) Trail-Gazette (2/19, 13K) reports that Rocky Mountain National Park has "begun a three year joint project between the park, Rocky Mountain Bird Observatory (RMBO), and the Arapaho and Roosevelt National Forests that allows school children and the public to follow the migration path of osprey from their breeding grounds to their wintering grounds." The data will "help biologists learn about the birds' migration routes, stopover sites and winter ranges to further our coordination with other landowners in the conservation of this species."

NEW SUPERINTENDENT NAMED FOR CUMBERLAND GAP NATIONAL HISTORICAL PARK. The Knoxville (TN) News Sentinel (2/19, Simmons, 366K) reports that "Sula Jacobs, formerly the assistant superintendent at Biscayne National Park in South Florida, has been named the new superintendent of Cumberland Gap National Historical Park." Jacobs, who "begins her new post at the end of the month," replaces Mark Woods, "who served as superintendent at Cumberland Gap for 16 years before taking over as superintendent of the Blue Ridge Parkway last year."

CARNEGIE LIBRARY ADDED TO NATIONAL REGISTER OF HISTORIC PLACES. The Lake County (IL) News-Sun (2/19, 42K) reports that the Carnegie Library in Illinois has been added to the National Register of Historic Places.

LATIMES PUSHES FOR WILDLIFE CROSSING AT VENTURA FREEWAY FOR MOUNTAIN LIONS. The Los Angeles Times (2/19, Board, 3.07M) editorializes that the "isolation" of the mountain lions that live in the Santa Monica Mountains "imperils their long-term survival." The paper notes that research by the NPS has "shown that L.A.'s roads and sprawl not only make it nearly impossible for young male cats to move into new terrain to avoid clashes with larger males, but also that they lead to inbreeding." The editorial argues that "the solution is to build a wildlife crossing at the Ventura Freeway, which would benefit many kinds of animals but especially mountain lions."

Bureau of Land Management:

VIDEO SHOWS KILLING OF MAN AFTER SCUFFLE WITH AUTHORITIES. The [AP](#) (2/18, Press, 4.28M) reports that "dramatic witness videotape shows federal land management rangers and a Nevada Highway Patrol trooper scuffled with a 20-year-old man before he was shot dead during a confrontation on a road outside Las Vegas." According to the article, the cellphone video recording "shows a man trying to open the door of an NHP vehicle before he is shot and killed about noon Friday on State Route 159 near Red Rock Canyon National Conservation Area." The video shows the confrontation evolving slowly, with two BLM rangers confronting D'Andre Berghardt Jr. "standing in the highway and one apparently squirting Berghardt with pepper spray with little apparent effect."

Coverage by the AP was also picked up by the [Washington Times](#) (2/19, 417K), [ABC News](#) (2/19, 3.68M), the [Elko \(NV\) Daily Free Press](#) (2/19, 22K), and the [Huffington Post](#) (2/19, Moye, 11.54M). Also reporting on the story is the [Daily Mail \(UK\)](#) (2/19, 2.92M).

INTERIOR SPENDS \$76 MILLION ANNUALLY ON WILD HORSE ROUNDUPS. In a list of "20 Things The Government Buys With Your Money" the [Deseret \(UT\) News](#) (2/19, 274K) notes that the Interior Department "spends \$76 million annually on rounding up wild horses on public land." The BLM "spends more money on maintaining temporary corrals than actually catching the horses."

BLM TO HOLD PUBLIC MEETINGS FOR SAN PEDRO RESOURCE PLAN. The [Sierra Vista \(AZ\) Herald](#) (2/17, 30K) reports that the BLM will "hold two more meetings on the Resource Management Plan for the San Pedro Riparian Conservation Area, as well as a field trip to get more input from concerned residents." The "meetings in February and March will be a chance for the public to give input on the range of activities that would be allowed along the river trails and within the San Pedro Riparian National Conservation Area." Vi Hillman, the new field manager for the Tucson office, said, "These meetings are an opportunity for the public to work with the BLM on developing strategies to address issues identified during scoping."

BLM, FOREST SERVICE TO APPLY FOR OFF-ROAD FUNDING. The [Victorville \(CA\) Daily Press](#) (2/19, 3K) reports that the BLM and the Forest Service, "which are in play for off-highway motor vehicle recreation grants," will "host public workshops on Wednesday as they prepare to submit applications for the funding by March 3."

Fish and Wildlife Service:

NC OFFICIALS ORDER DUKE TO SEAL SECOND PIPE LEAKING COAL ASH. The [Charlotte \(NC\) Business Journal](#) (2/19, Downey, Subscription Publication, 45K) reports in its "Power City" blog that the NC Department of Environment and Natural Resources has ordered Duke Energy to halt discharges from a second, smaller leak from a stormwater pipe containing coal ash. Director of the N.C. Division of Water Resources Tom Reeder said, "Given what we've seen, we're concerned that this second stormwater pipe on site may also be leaking water contaminated with coal ash pollutants into the Dan River." The state, Reeder notes, continues to test water downstream as arsenic levels in the river did not pose a threat to aquatic life or drinking water downstream. Duke is working to plug the leak, according to DENR, but could not be reached for comment.

The [AP](#) (2/19, Biesecker) adds that Duke "had downplayed concerns water flowing from the pipe was contaminated." In a separate article, the [AP](#) (2/19) reports that Duke's director of environmental and legislative affairs George Everett, when asked by state legislators whether ratepayers or shareholders would pay for cleanup costs, said, "We're focused on stopping the discharge and initiating the remediation of the river. But when costs do come into play, when we've had a chance to determine what those costs are, it's usually our customers who pay our costs of operation."

The [Los Angeles Times](#) (2/19, Zucchini, 3.07M) also reports the story.

Regulators And Duke Energy Brief North Carolina Officials On Coal Ash Spill. The [AP](#) (2/18, Biesecker, 333K) reports that North Carolina Department of Environment and Natural Resources Secretary John Skvarla briefed North Carolina Gov. Pat McCrory about the Feb. 2 Duke Energy coal ash spill. The AP reports that Duke had settled with the state for \$99,000 in October over Duke's handling of their coal ash ponds, but the state has "put its proposed settlement on hold" since the spill. The AP extensively lists McCrory's ties to Duke Energy, reporting that they were his previous employer, contributed more than \$1.1 million to his gubernatorial campaign, and that he has "gained authority to make numerous decisions that could affect Duke's bottom line."

The [Raleigh \(NC\) News & Observer](#) (2/17, Murawski, 475K) reports that a Duke Energy executive and state

environmental regulators told North Carolina lawmakers that the coal ash spill "poses no immediate threat to public health." State Rep. Ruth Samuelson said that the federal government has requested four years of communications between Duke and the NCDENR which could help lawmakers determine how to proceed.

McCrorry Denies Involvement In Duke Coal Ash Settlement. The Atlanta Journal-Constitution (2/18, 1.26M) reports that Gov. McCrorry denied on Friday that he participated in talks with Duke Energy executives or lobbyists about his administration's failed deal to settle Duke Energy's coal ash violations. Although McCrorry previously worked at Duke for 28 years, disclosures that his investment portfolio includes Duke stock valued in excess of \$10,000, and the fact that he has the authority to make decisions effecting Duke's bottom line, McCrorry said on Friday that "he sees no conflict of interest in his role as elected official and corporate shareholder."

UTAH GOV. HERBERT WARNS OF COSTS FROM SAGE GROUSE LISTING. The Deseret (UT) News (2/19, 274K) reports that Utah Gov. Gary Herbert "kicked off a two-day sage grouse summit Tuesday, bringing together hundreds of people throughout the state who have been working nearly two decades to restore the imperiled bird's habitat." Herbert said that "despite assurances in 2011 from then-Interior Secretary Ken Salazar that federal government preferred a states-based solution to saving the bird, Utah's plan and several other state efforts have been rejected out of hand." Herbert "added that an indication that Utah's on-the-ground conservation efforts are working should be the welcome news that the bird's population actually increased last year and more than 350,000 acres of habitat have been improved."

Also providing coverage is KSL-TV Salt Lake City (2/19, 242K).

LAWSUITS COULD LEAD TO CHANGES AT FISH HATCHERIES. The AP (2/18, Press, 4.28M) reports that "the practice of populating rivers with hatchery fish rather than making greater efforts to restore wild runs is facing a battery of court challenges in Oregon, California and Washington state." According to the article, "the disputes illustrate a crucial tension in the Pacific Northwest, where salmon and steelhead are iconic fish — of enormous cultural and nutritional significance to tribes, job creators for commercial fishermen and big draws for recreational anglers."

FWS PROPOSES REMOVING PROTECTIONS FOR IO UNDER ENDANGERED SPECIES ACT. The West Hawaii Today (2/19, 26K) reports that "the io population is secure so this revered Hawaiian hawk can be removed from the federal list of threatened and endangered species," the FWS said in a proposal "that's ruffling feathers with some residents." According to the article, "under its delisting proposal, FWS stated all protections provided by the Endangered Species Act would be removed, but the io would remain protected under the Migratory Bird Treaty Act, a federal law prohibiting the killing, selling or otherwise harming migratory birds, their nests or eggs." The agency "would also be required to monitor the io for not less than five years," and "if at any time during this monitoring period data indicates ESA protection should be reinstated, FWS can initiate listing procedures, including an emergency listing."

FWS URGED TO REVERSE COURSE ON WOLVES. For "The Blog" of the Huffington Post (2/19, Clark, 11.54M), Jamie Rappaport Clark, President & CEO, Defenders of Wildlife, argues that "the recent peer review report on wolf delisting from a panel of independent scientists" shows that "the delisting proposal is premature and shortsighted, and above all, based on bad and incomplete science." Clark, who was director of the FWS from 1997 -2001, argues that "the gray wolf delisting proposal represents a disappointing and flawed departure from the scientific standards that we embraced when I used to work for the Service." Clark notes that Interior Secretary Sally Jewell and FWS Director Dan Ashe have "repeatedly asserted that the Service will base decisions on the status of wolves only on the best available science." Clark concludes that "in light of this damning peer review report on wolves, the Service should withdraw its current delisting proposal, and instead chart a sustainable recovery path for wolves that is truly based upon the best science on the subject."

IVORY-TRADE REGULATIONS CRITICIZED. In an op-ed for the Washington Times (2/19, Bandow, 417K), Doug Bandow, a senior fellow at the Cato Institute and a former special assistant to President Reagan, criticizes preparations by the Obama Administration to ban "the sale of all ivory objects." Bandow argues that "doing so will weaken conservation efforts and enrich those engaged in the illegal ivory trade." He concludes that "the administration's new regulations will divert enforcement resources, and push owners of legal ivory into the illegal trade, meaning more elephants are likely to die."

Securing America's Energy Future:

Renewable Energy:

DOMINION RESOURCES TO BID ON MARYLAND OFFSHORE WIND SITE. The [AP](#) (2/18, 4.28M) reports that on Tuesday, Dominion Resources announced that it had filed with the Bureau of Ocean Energy Management "to be among the bidders for the nearly 80,000 acres off the coast of Maryland" that is set aside for wind farm development. Dominion said that the site has up to 1,450 megawatts of potential wind power. The AP notes that the area "will be auctioned in two separate leases," with the auction expected to take place this year. Mary Doswell, senior vice president for Dominion's Alternative Energy Solutions unit, is quoted as saying in a press release, "Offshore wind shows the most promise for building utility-sized renewable energy projects in the mid-Atlantic region. ... Given the proximity to our leased area off of Virginia and the excellent port in Hampton Roads, there should be economies of scale that could benefit both regions."

[WVEC-TV](#) Hampton Roads, VA (2/18, 5:36 p.m. EST, 57K) broadcast, "Dominion Power is looking to the skies for energy. Dominion plans to bid on a lease for 80 thousand acres of ocean off Maryland's coast. The energy company wants to develop wind farms there. So far an auction date hasn't been set, but is expected to happen this year. Dominion says the site would be 10 to 30 miles east of Ocean City." [WBOC-TV](#) Salisbury, MD (2/18, 11:02 p.m. EST, 20K) and [News Channel 8 \(DC\)](#) (2/18, 2:47 p.m. EST, 2K) also covered this story in their broadcasts.

Onshore Energy Development:

GROUP CLAIMS FWS OFFICIALS SKEWED DATA TO BENEFIT KEYSTONE XL PIPELINE. The [International Business Times](#) (2/19, 237K) reports that "senior government officials inaccurately portrayed the habitat range of an endangered beetle living along the proposed Keystone XL pipeline path and retaliated against colleagues who objected, according to claims in a report released this month by Public Employees for Environmental Responsibility (PEER)." FWS "scientists filed a complaint in May 2012 against two managers in the agency, Dixie Porter and Luke Bell, under the Department of Interior's scientific integrity policy, according to summary reports obtained this month by PEER through Freedom of Information Act requests." Jeff Ruch, PEER's executive director, said Tuesday, "The FWS has been under pressure from a lot of different angles, pressure that causes them to be less protective of wildlife than [people] would say is their statutory responsibility. In many cases, the wild life service has skewed science."

Native American Tribes Organizing Against Keystone. The [Chicago Tribune](#) (2/19, Hotakainen, Subscription Publication, 95K) reports that Native American tribes in South Dakota "are busy preparing for nonviolent battle" against TransCanada's proposed Keystone XL pipeline, over concerns about the pollution and crime they expect it to bring. Some tribe members welcome the pipeline: Winner, SD Mayor Jess Keesis sees it as an economic boon. The Tribune notes, however, that "the economic argument is a hard sell for many tribal members in South Dakota, where history is still raw." Both Administration officials and TransCanada representatives are working with tribes likely to be impacted by Keystone, reports the Tribune, but pipeline opponents "hope that they have the ultimate trump card with a president who just happens to be an adopted Indian," a reference to "Barack Black Eagle, who was formally adopted by Hartford and Mary Black Eagle of Montana's Crow Indian Tribe in 2008."

GOVERNORS PUSH FOR STATES TO TAKE LEAD ON DRILLING REGULATIONS. [Bloomberg News](#) (2/19, 1.91M) reports that "a dozen US governors are pushing for states, not the federal government, to lead regulation of oil and gas drilling." The governors "argue they know their territories best, even as environmentalists question whether they're doing enough – or doing the industry's bidding." According to the article, "with federal rules on hydraulic fracturing pending, the bipartisan group created the States First initiative to promote states as the 'primary and appropriate regulators,'" and "they've started a website to publicize their efforts and programs to share expertise such as a regulatory exchange and certification for inspectors."

EARTHQUAKES IN OKLAHOMA MAY BE RESULT OF FRACKING. [TIME](#) (2/19, Nicks, 21.77M) reports that 115 earthquakes have been recorded in Oklahoma this week, and the frequency of the earthquakes is leading some to question whether the cause is hydraulic fracturing used in oil and gas drilling. Austin Holland, a research seismologist with the Oklahoma Geologic Survey, says "we do know there have been some earthquakes caused by oil and gas activity in the state. The hard part is figuring out which is which." Eric King, an attorney who works with the oil and gas industry, says that people in the business "are of the opinion that [fracking] is not causing the earthquakes."

In a separate article on the subject, [TIME](#) (2/19, Walsh, 21.77M) reports that the process of injecting fracking

wastewater into the ground at high pressures "may nudge previously dormant faults out of their locked position," and notes that research in Ohio and Oklahoma have raised such concerns. Time also reports that Kansas, Arkansas, and Texas have experienced similar earthquakes in areas of intensive drilling.

Offshore Energy Development:

STUDY TO BE CONDUCTED FOR OFFSHORE DRILLING IN VIRGINIA. The [Hampton Roads \(VA\) Virginian-Pilot](#) (2/19, 422K) reports that "drilling for gas and oil off Virginia's coast is still forbidden, but proponents hope a federal study due within two weeks will let them at least start looking for places to set up drilling rigs." The article notes that "industry officials are seeking federal permits to conduct seismic testing – using airguns to bounce sound waves off the ocean floor and deeper formations – to explore anomalies that could indicate the presence of oil and gas deposits." According to the BOEM, "a long-awaited environmental impact statement needed in advance of the testing will be released this month."

Tackling America's Water Challenges:

IMPERIAL IRRIGATION DISTRICT SEEKS TO SAVE SALTON SEA. The [National Geographic](#) (2/19, 40.49M) reports on the challenges facing the Imperial Irrigation District in its efforts to save the Salton Sea. The article notes that "the sea's decline will accelerate dramatically in 2018, when the IID must stop sending 'mitigation water' to the lake as part of a pact known as the Quantification Settlement Agreement, or QSA." According to the article, "citing fears that California's grand plan will not be adequately funded, the IID and other groups are drafting their own schemes for smaller-scale restoration projects that are aimed at saving ecologically important parts of the sea." However, "as with its push for improved on-farm water efficiency, the biggest challenge the IID faces with its plans for the Salton Sea is time."

BOR RELEASES DRAFT STUDY FOR IDAHO'S HENRYS FORK BASIN. The [Salem \(OR\) Capital Press](#) (2/18, 113K) reports that the BOR has "released a draft study outlining a dozen options for increasing storage and better conserving water throughout eastern Idaho's Henrys Fork Basin." John Redding, spokesman for BOR's Snake River area office, said, "We're heading into an era where there's closer attention being given to intense water usage. It now falls to the State of Idaho to decide which way they want to go on a pathways forward."

Empowering Native American Communities:

INTERIOR APPROVES MECHOOPDA'S TRUST LAND FOR GAMING. The [Indian Country Today Media Network](#) (2/18, 21K) reports that "on January 24, Assistant Secretary – Indian Affairs Kevin Washburn approved a request by the Mechoopda Indian Tribe of Chico Rancheria to acquire 626 acres in trust in Butte County, California, near the city of Chico for gaming purposes." The tribe will "construct and operate a modest gaming facility on 91 acres of the site." Washburn said, "The Mechoopda Tribe has pursued this initiative for more than a decade. The acquisition of the land into trust for the purpose of establishing a class III gaming establishment will result in substantial financial benefits to the tribe and help stimulate economic development."

REP. YOUNG WELCOMES BIA-IHS DECISION TO NO LONGER DENY FULL FUNDING FOR SERVICES RENDERED. The [National Journal](#) (2/19, Subscription Publication, 427K) reports that Rep. Don Young has "welcomed the decision by the Bureau of Indian Affairs (BIA) and Indian Health Services (IHS) to no longer deny full funding for Contract Support Costs (CSC) of American Indian and Alaska Native organizations that provide healthcare services to tribal members on behalf of the federal government." Young said, "The agencies' decision represents much more than a victory for the many tribal healthcare providers who will receive full compensation for Fiscal Year 2014, it also represents a large step forward for improving the health and well-being of our nation's first peoples. For far too long, the federal government has failed its obligation to allocate the financial resources that these providers are due, which has meant that many American Indians and Alaska Natives have been shortchanged when it comes to receiving the high quality healthcare that they are entitled to. Tribal health programs have always been underfunded, and it is time for our federal government to hold up its end of the bargain. The BIA and IHS spending plan is an important step in upholding the Supreme Court's Ramah decision."

SPOKANE CITY COUNCIL URGED TO STAY OPPOSED TO AIRWAY HEIGHTS CASINO. The [Spokane \(WA\) Spokesman-Review](#) (2/19, 214K) editorializes that the Spokane City Council "should not reverse its opposition to construction of the Spokane Tribe's proposed casino in Airway Heights." According to the paper,

"asserting that the city should be neutral in the face-off between the Spokanes and the Kalispel Tribe, owners of the Northern Quest Casino & Resort, ignores what should be the paramount interest of the council and all city officials: What is best for the city of Spokane."

Top National News:

OBAMA: NEW TRUCK FUEL STANDARDS WILL HELP THE ECONOMY AS WELL AS THE ENVIRONMENT. President Obama's appearance on Tuesday in Maryland to announce new fuel-efficiency standards for commercial trucks received relatively light national media coverage, and was not mentioned on any of the three network newscasts Tuesday evening. The President's remarks were noted on a handful of cable news shows, which cast them as part of an election-year effort to remind voters of the Administration's commitment to addressing climate change.

Several reports this morning note that the President framed the new rules as part of his increasing reliance on executive action to move priorities of his that are stalled in Congress. In a front-page article titled, "Obama Orders New Efficiency For Big Trucks," the [New York Times](#) (2/19, A1, Baker, Davenport, Subscription Publication, 9.61M) reports that Tuesday's event was part of "what aides say will be an increasingly muscular and unilateral campaign to tackle climate change through the use of the president's executive power." The Times says it was "the latest in a series of actions intended to cut back on greenhouse gases without the sort of comprehensive legislation the president failed to push through Congress in his first term."

Likewise, the [Washington Post](#) (2/19, Eilperin, 4.28M) says the new fuel-efficiency standards are "part of an ongoing effort to use his executive authority to address climate change and spur domestic manufacturing." Frank O'Donnell, president of Clean Air Watch, is quoted as saying, "What the president plans is a classic example of using executive power to make further reductions in greenhouse gases from one of the most notorious emission sources."

In a segment for [MSNBC's The Ed Show](#) (2/19, 449K) mostly devoted to discussion of the proposed Keystone XL pipeline, Ed Schultz said the President had spent the day "working...to solidify his Democratic base by taking a strong stance on the environment." However, on [Fox News' Special Report](#) (2/19, 2.15M), Charles Krauthammer argued that "the idea that [the Administration is] going to pivot to climate change as a way to save...Senate seats is quite insane." According to Krauthammer, "The people who care about climate change" are "not found in the states which the Democrats have to hold on to win the Senate."

The [AP](#) (2/19, Anderson) reports that on Tuesday, the President "link[ed]...reduced fuel consumption and climate change" as he announced that "his administration will issue tougher fuel-efficiency standards for delivery trucks by March 2016." According to the AP, the President "said helping these vehicles use less fuel would have the triple benefit of making the U.S. less dependent on imported oil, keeping more money in consumer pockets and reducing...greenhouse gas emissions." The AP notes that the President emphasized that "heavy-duty trucks make up just 4 percent of the vehicles on the nation's roadways...but are responsible for about 20 percent of the climate-changing gases that are spewed into the atmosphere by the transportation sector."

On [MSNBC's The Ed Show](#) (2/19, 449K), President Obama was shown saying, "Improving gas mileage for these trucks are going to drive down our oil imports even further. That reduces carbon pollution even more, cuts down on businesses' fuel costs, which should pay off in lower prices for consumers. So it's not just a win-win, it's a win-win-win. You got three 'wins.'" Joe Romm of Climate Progress praised the President's announcement, said afterwards, "There is nothing like fuel efficiency, lowering oil consumption, reducing pollution, saving people money."

On [MSNBC's All In](#) (2/19, 510K), Chris Hayes said, "Something pretty remarkable is happening in American politics right now; we are seeing – right now and for the first time in a long time – some real forward momentum on climate change." Hayes noted that the President's announcement on Tuesday "follows some provocative comments from Secretary of State John Kerry...over the weekend." According to Hayes, "What Kerry said, which is 1,000% absolutely true, is that climate change is its own weapon of mass destruction."

According the [New York Times](#) (2/19, A1, Baker, Davenport, Subscription Publication, 9.61M), "experts" believe that "cumulatively...the à la carte approach should enable Mr. Obama to meet his target of cutting carbon pollution in the United States by 17 percent from 2005 levels by 2020," although he "would still be far short of his goal of an 80 percent reduction by 2050."

On Fox News' Special Report (2/19, 2.15M), correspondent Carl Cameron reported that the President's "use of executive orders to fight climate change instead of letting Congress legislate ensures his unilateral action and climate change will both be feisty campaign issues this year." Cameron noted that in 2009, "the last time Congress voted on climate change, the Democrats lost the House majority the next year." Ron Bonjean, a Republican strategist, was shown saying that vulnerable Senate Democrats are "going to have to distance themselves from that executive order big time in order to prevent some of the damage, but it's really too late."

Echoing a line of attack from Republicans on Tuesday, the Washington Times (2/19, Wolfgang, Boyer, 417K) says the President's "visit to suburban Maryland...to announce new fuel-efficiency standards for trucks was anything but efficient, as the commander-in-chief took a 15-vehicle caravan on an hour-long round trip just to deliver a 17-minute speech."

Reuters (2/19, Beech) notes that EPA Administrator Gina McCarthy and Transportation Secretary Anthony Foxx joined the President, who said, "Everybody who says you can't grow the economy while bringing down pollution, it's turned out they've been wrong." Reuters notes that the President added, "The goal we're setting is ambitious, but these are areas where ambition has worked out really well for us so far. Don't make small plans, make big plans."

USA Today (2/19, Madhani, 5.82M) says the President's announcement "follows his State of the Union pledge last month to set new fuel standards for trucks 'so we can keep driving down oil and imports and what we pay at the pump.'" USA Today goes on to report that the President "ordered the Environmental Protection Agency and Transportation Department's National Highway Traffic Safety Administration to develop and issue new...standards by March 31, 2016." USA Today also notes that the Administration "is offering tax credits to manufacturers of heavy-duty alternative fuel vehicles as well as to companies that are building infrastructure, so vehicles that running on alternative fuels have places to fill up."

Bloomberg News (2/19, Talev, Plungis, 1.91M) reported that the President claimed that the "new standards will mean 'thousands of dollars in savings every year' for truck operators." Bloomberg notes that the President was speaking at "a Safeway Inc. distribution center today in Upper Marlboro, Maryland, where he was highlighting the grocery chain's efforts to improve truck efficiency." According to Bloomberg, Safeway "participates in a partnership with" the EPA "that includes investing in trucks that get better mileage." Bloomberg also reports that the American Trucking Association, which "supported an earlier round of efficiency standards," called on the Administration "to proceed cautiously."

The Wall Street Journal (2/19, Lee, Stevens, Subscription Publication, 5.91M) reports that the Owner-Operator Independent Drivers Association went further, with its executive VP Todd Spencer saying, "Shock and awe may be the best way to describe what's happening to the vast majority in trucking with these proposed regulations."

According to the Los Angeles Times (2/19, Hennessey, 3.07M), the President's announcement on Tuesday "was the latest in a series of efforts to show he won't be hemmed in by a Congress unable to find consensus on how – or whether – to tackle climate change." However, Politico (2/19, Martinson, 464K) notes that while the President said the Administration will be "offering new tax credits...for companies that manufacture heavy-duty alternative-fuel vehicles," those credits would actually "require the approval of Congress." The Los Angeles Times (2/19, Hennessey, 3.07M) also reports that the President "plans to ask Congress to create a \$2-billion energy security trust fund to support research and development of more fuel-efficient vehicles," and that he "made a similar request last year but was rebuffed by Congress."

The Baltimore Sun (2/19, Fritze, 812K) notes that Tuesday's appearance in Upper Marlboro was "the fourth time Obama has spoken in Maryland in as many weeks." The Sun goes on to report that "Republicans pounced on the administration's decision to visit a Safeway site, noting that a union representing many of the grocer's workers had lobbied against a company proposal to force its employees to purchase health insurance through exchanges set up under" the Affordable Care Act.

The National Journal (2/19, Geman, Subscription Publication, 427K) reports that in addition to his appearance on Tuesday, the President also "personally promoted...his climate-change agenda" on Friday in California, where he "touted a proposal to create a \$1 billion 'Climate Resilience Fund' to help communities and farmers prepare for extreme weather that's expected to be worsened by global warming."

David Unger, in a piece for the Christian Science Monitor (2/19, Unger, 540K), says that while "truck fuel economy may not have the technological sheen of solar photovoltaics, or the geopolitical repercussions of North America's shale gas boom," it has nevertheless "played a big role in reducing foreign oil imports and cutting US

carbon emissions." Unger adds that the President is taking advantage of "a rare, largely uncontroversial opportunity for Obama to advance both his environmental and economic goals."

Appearing on [Fox News' Special Report](#) (2/19, 2.15M), NPR's Mara Liasson maintained that if the President "agrees to the Keystone pipeline, it won't matter that he raised the fuel efficiency standard for trucks." According to Liasson, "the most important thing" Obama could do for Democratic candidates is "approve the Keystone pipeline – that's going to help [Sen.] Mary Landrieu."

EPA's McCarthy: Obama Will Not Wait For Congress To Address Climate Change. Appearing on [MSNBC's All In](#) (2/19, 510K), EPA Administrator Gina McCarthy said, "The President's been very clear that he's eager to work with Congress, but he's not waiting. We're going to take action, and there's a lot of ability for the Administration...when we work with businesses and the industries and the states, to actually make a significant dent in carbon emissions." McCarthy added, "We're going to get international action moving forward, and we're going to be working to make this a significant benefit to the economy of the US" because, "after all, climate change isn't just an environmental challenge, it's a serious economic challenge."

Gingrich: Kerry's View On The Threat Of Climate Change Is "Delusional." Asked on [CNN's The Situation Room](#) (2/18, 554K) about his tweet, "Every American who cares about national security must demand Kerry's resignation – a delusional secretary of state is dangerous to our safety," Newt Gingrich derided Kerry for having said in Jakarta last weekend that "the greatest threat is global climate change." According to Gingrich, "The secretary of state ought to be held to a standard of seriousness that this speech totally falls short of." Gingrich paraphrased Kerry as saying, "everybody who disagrees" with his view on climate change "should be kicked out of the room" and that climate change is "more dangerous than a nuclear war." Gingrich added, "that's a delusional statement," and "it is dangerous to have a person who believes that as secretary of state."

High Court To Consider EPA Emission Rules. The [Wall Street Journal](#) (2/19, Kendall, Subscription Publication, 5.91M) reports that the Supreme Court, in a case scheduled for oral arguments next week, will consider whether the Environmental Protection Agency has overstepped its authority in applying new emissions rules. The court ruled seven years ago that the EPA was authorized to regulate greenhouse gases, but the extent of the agency's authority has been challenged by businesses who argue that the EPA is going too far. The case to be heard is one of two major Clean Air Act cases on the court's docket, and focuses on the agency's 2010 greenhouse gas rules imposing pollution control requirements on facilities that are expanded or modernized.

CBO: MINIMUM WAGE HIKE COULD ELIMINATE 500,000 JOBS, LIFT 900,000 OUT OF POVERTY. A new report from the non-partisan Congressional Budget Office released on Tuesday found that the President's plan to raise the minimum wage would lead to a significant loss of jobs, but also raise many out of poverty. While the consensus in the coverage is that the report contains ammunition for both sides, the stories also indicate the report may have provided the GOP with a strong political argument for opposing the increase.

The [CBS Evening News](#) (2/18, story 4, 1:20, Pelley, 5.58M) reported that on Tuesday, "We got a fascinating report today on one of the President's top priorities," as the CBO "looked at what would happen if the minimum wage was raised to \$10.10." The report "said that nearly one million people would be lifted from poverty," but "another half a million would lose their jobs altogether." CBS (Cordes) adds that Republicans argued that the report "is evidence that raising the minimum wage will lead to fewer jobs, something they say the economy just can't afford right now." Democrats and the White House "chose to highlight some of the more favorable aspects, like the fact that 16.5 million Americans would see their wages increase."

[USA Today](#) (2/19, Davis, 5.82M) reports that the CBO report estimates that President Obama's plan to raise the minimum wage to \$10.10 an hour "could help lift 900,000 workers out of poverty, but at a cost of as many as 500,000 jobs." Democrats "took issue with the politically sensitive report" and argued that the findings are "inconsistent with the prevailing view among economists that raising the minimum wage does not impact employment."

[Reuters](#) (2/19, Cowan) reports that White House Council of Economic Advisers Chairman Jason Furman said that the report failed to consider that a higher wage would lead to higher productive activity from workers, saving businesses money through things such as lower absenteeism. Meanwhile, however, a spokesman for House Speaker John Boehner said, "With unemployment Americans' top concern, our focus should be creating, not destroying, jobs for those who need them most."

[The Hill](#) (2/19, Wasson, 194K) reports in its "On The Money" blog that the White House and left-wing economic

groups "immediately pushed back at the CBO's conclusions on jobs" while also hailing findings on poverty. For example, Furman wrote in a blog post, "CBO's estimates of the impact of raising the minimum wage on employment does not reflect the current consensus view of economists. The bulk of academic studies, have concluded that the effects on employment of minimum wage increases in the range now under consideration are likely to be small to nonexistent."

The Washington Times (2/19, Dinan, Boyer, 417K) reports White House press secretary Jay Carney "said the country shouldn't accept a minimum wage that leaves workers below the poverty level." Carney said, "There are far greater economic minds than this one who can attest to the fact that raising the minimum wage, certainly in the way that has been proposed and the president supports, is the right thing to do for the economy and that does not have a significant impact on jobs."

The Washington Post (2/19, Goldfarb, 4.28M) says that while the report "confirmed the arguments of both sides, the report appeared to put the White House on the defensive." The President "his senior aides have argued that boosting the minimum wage would not cause employers to cut jobs."

The Los Angeles Times (2/19, Puzanghera, Hennessey, 3.07M) reports that the new projections "set off a flurry of statements and analyses. People on both sides of the issue quickly pointed to evidence in the report to back up their arguments."

The AP (2/19, Fram) says the report contains "ammunition" for both supporters and opponents of the President's plan to raise the minimum wage. The study was released as the Senate prepares to debate legislation next month from Sen. Tom Harkin (D) to increase the minimum wage to \$10.10 by 2016 by increasing it in three steps. The report "put authoritative weight behind longtime GOP claims that increasing the minimum wage would cost jobs by forcing companies to spend more on wages, putting Democrats on the defensive."

Politico (2/19, Faler, 464K) reports that both parties "seized on the findings to make their case." Sen. John Cornyn (R) said the report shows "yet again what we know to be true of government overreach in the marketplace: raising the minimum wage would slash jobs and harm an already fragile workforce." Meanwhile, House Minority Leader Nancy Pelosi said, "No matter how the critics spin this report, the CBO made it absolutely clear: raising the minimum wage would lift almost one million Americans out of poverty, increase the pay of low-income workers by \$31 billion and help build an economy that works for everyone."

The New York Times (2/19, Lowrey, Subscription Publication, 9.61M) says that the "complicated, nuanced analysis provides fuel for both supporters and critics of the policy, which would affect millions of low-wage workers and businesses — showing it might lead to fewer jobs, but also higher incomes." The Times also reports that some Democrats criticized the analysis, such as Rep. George Miller (D), who called it "outdated."

The Wall Street Journal (2/19, Morath, Subscription Publication, 5.91M) reports that the study also examined a smaller increase in the minimum wage to \$9 per hour, which would cut employment by 100,000 but lift 300,000 out of poverty. The Journal adds that the report's conclusions are in line with other academic studies.

Roll Call (2/19, Fuller, Subscription Publication, 87K) says that the CBO report said of those impacted, "Most of them would receive higher pay that would increase their family's income, and some of those families would see their income rise above the federal poverty threshold. But some jobs for low-wage workers would probably be eliminated, the income of most workers who became jobless would fall substantially, and the share of low-wage workers who were employed would probably fall slightly." Democrats have looked at the issue as a "winning election-year" argument, but Republicans "now have the talking point they've been looking for on raising the minimum wage: it will cost jobs, and the CBO says so."

In an editorial, the Wall Street Journal (2/19, Subscription Publication, 5.91M) says that the CBO is run by Democrats, which makes the report particularly stinging for the Administration and Congressional Democrats. The Journal says that the President is selling the minimum wage increase as a matter of economic justice, but the report shows that for many of the poor, it will do significant harm.

HOUSING MARKET INDEX RAISING CONCERNS ABOUT ECONOMY AS A WHOLE. Reuters (2/19, Lange) reports that the National Association of Home Builders announced on Tuesday that its Housing Market Index fell 10 points in February to 46. While the group said that weather contributed to the decline, rising prices also kept many out of the market. Overall, Reuters says that the data is the latest weak report among many, raising concerns that the economy is beginning to slow.

Old Foreclosure Problems Now Emerging From Servicers. The [New York Times](#) (2/19, A1, Silver-Greenberg, Corkery, Subscription Publication, 9.61M) reports on its front page that a rising number of homeowners looking to prevent foreclosure "are confronting problems on a new front as the mortgage industry undergoes a seismic shift." Some of the "same abuses" that "dogged" the nation's largest banks and resulted in a \$26 billion settlement with the Federal government in 2012 are "now cropping up among the specialty firms that collect mortgage payments." These servicers "have great power in deciding whether homeowners can win a mortgage modification or must hand over their home in a foreclosure" and the companies have been "buying up servicing rights at a voracious rate." Now, some state and Federal regulators "are worried that the rapid growth could create new setbacks like stalled modifications for millions of Americans just as many were getting back on track from the housing crisis."

Household Debt Up Sharply. In a piece of good news for the economy, the [Wall Street Journal](#) (2/19, Shah, Chaudhuri, Subscription Publication, 5.91M) reports that Americans are starting to take advantage of easier lending conditions to increase their borrowing, according to new data from the Federal Reserve Bank of New York. The data shows that in the fourth quarter of 2013, household debt rose \$241 billion to \$11.52 trillion compared to the prior quarter, and was up \$180 billion from the same period in 2012. The Journal says that the borrowing may provide a prop for the economy as it faces new headwinds.

The [New York Times](#) (2/19, Dewan, Subscription Publication, 9.61M) is more undecided on whether the report is good for the economy. Wilbert van der Klaauw, senior VP and economist at the New York Fed, asked if the report is good or bad for the economy, said, "Good or bad, it's hard to say. In a steady state you would expect, in nominal terms, household debt to grow." The Times says it was a "measured statement that glossed over the complexity of the report." The Times says that while a willingness to borrow "can be an indication that households are more confident in their economic futures, it can also indicate that they are struggling to maintain spending levels in the face of high unemployment and stagnant wages."

Labor Department Set To Roll Out Revamped Producer Price Index. [Bloomberg News](#) (2/19, Chandra, 1.91M) reports that the Department of Labor is set to release its first edition of a revamped Producer Price Index on Wednesday. The PPI, a measure of prices at the wholesale level, is getting its "first major overhaul of the gauge since 1978" which "more than doubles its reach and provides a more comprehensive view of U.S. inflation at the wholesale level." The new PPI will "include prices received for goods, services, government purchases, exports and construction, encompassing 75 percent of the economy." The old version "reflected the costs of goods alone, representing about a third of all production."

Stocks Mixed On Tuesday. The [Wall Street Journal](#) (2/19, Kieman, Subscription Publication, 5.91M) reports that stocks were mixed on Tuesday, as investors paused after a strong week and considered a new batch of relatively weak economic reports. The Dow Jones Industrial Average fell 23.99 points to 16130.40, while the S&P 500 rose 2.13 points to 1840.76. The Nasdaq Composite Index rose 28.76 points.

Editorial Wrap-Up:

NEW YORK TIMES. "Change The Rules On Secret Money." In an editorial, the [New York Times](#) (2/19, Subscription Publication, 9.61M) argues that the liberal 501(c)(4) groups have now joined conservative groups in opposing proposed IRS regulations on them. They are "afraid that they will be caught in the same crackdown, and will be unable to engage in political activity." The Times says that the "best thing" the IRS can now do is "to ignore both sides and proceed swiftly ahead, making its proposed rules even stronger to squeeze the influence of money out of politics."

"What Next For Syria?" In an editorial the [New York Times](#) (2/19, Subscription Publication, 9.61M) notes that while the President "has asked his advisers to review old and new options for bolstering opposition forces and easing the desperate humanitarian crisis" in Syria, so far, "no one has come up with surefire remedies or even new ideas that would not draw the United States into war." The Times notes that the President "has resisted being pushed into a war by critics who seem to believe that force is the ultimate sign of leadership." Leadership, the Times argues, "sometimes means not going to war," adding that in this case, it also means "persisting in the frustrating search for a peaceful solution and, short of that, some means of lessening the misery of the Syrian people."

"Gov. Cuomo's Bold Step On Prison Education." The [New York Times](#) (2/19, Subscription Publication, 9.61M) editorializes that one of the biggest obstacles "to reducing America's enormous prison population is the stubbornly high rates of recidivism," and the Times argues that "one solution has long proved to be both reliable

and cost-effective: education behind bars." The Times notes that New York Governor Andrew Cuomo on Sunday "took a bold step to restore some common sense to this contorted debate, announcing new funding for college classes in 10 state prisons." The Times notes that "several Republican legislators are opposing" Cuomo's plan, "calling it a 'slap in the face' to law-abiding New Yorkers," but, the Times argues, more than 700,000 inmates "walk out of state and federal prisons across the country every year, and it is in everyone's interest to make sure they stay out."

WASHINGTON POST. "Ukraine Boils Over." An editorial in the Washington Post (2/19, 4.28M) argues that despite Tuesday's violence in Ukraine, "a political settlement may still be possible — if only because it is the only solution to the crisis" in Ukraine. Tuesday's violence, the Post notes, showed again "that Ukraine will be ungovernable unless Mr. Yanukovich accepts reasonable opposition demands for political and economic reforms." If Yanukovich does not accept that "and pull back his security forces, Western governments should be prepared to apply the sanctions they have been threatening."

"A Fair Shake Getting A Job." The Washington Post (2/19, 4.28M) editorializes that some 60,000 residents of Washington, DC, "about 10 percent of the population, have a criminal history." Many of these are unemployed, and are hindered in their efforts to find a job by a question on many employment applications about previous convictions for crime. The Post notes that legislation to prohibit that question "is pending before the D.C. Council and deserves thoughtful consideration." The Post concedes that it is "important that the council be careful in calibrating this legislation so as not to subvert the ability of employers — who have a duty to protect their businesses and workplaces — to make informed judgments about their workers," and urges the council to consider the bill carefully "as it works to open the workplace to people who pose no danger, have paid their debt to society and now only want to be productive."

"Venezuela Unravels." In an editorial, the Washington Post (2/19, 4.28M) criticizes Venezuelan President Nicolas Maduro, noting that "the extremists in Venezuela are not the opposition leaders or students, but Mr. Maduro and his regime." The Post argues that the deteriorating situation in Venezuela "should be a frightening sight to neighbors such as Brazil, which has stubbornly supported Mr. Maduro and his predecessor Hugo Chavez even as they wrecked what was once Latin America's richest country." Arguing that the Obama Administration "has little leverage," the Post calls on Venezuela's neighbors "to use their influence, before the chaos becomes uncontainable."

WALL STREET JOURNAL. "Hurting The 0.3%." In an editorial, the Wall Street Journal (2/19, Subscription Publication, 5.91M) says that the CBO is run by Democrats, which makes yesterday's minimum wage report particularly stinging for the Administration and Congressional Democrats. The Journal says that the President is selling the minimum wage increase as a matter of economic justice, but the report shows that for many of the poor, it will do significant harm.

"Fixing the 'Doc Fix.'" In an editorial, the Wall Street Journal (2/19, Subscription Publication, 5.91M) argues that Congress should move ahead and end the "sustainable growth rate," which automatically cuts payments to doctors from Medicare by 25%. The Journal points out that its a farce, as it is overridden every single year, and it would be better just to acknowledge the true cost of Medicare.

Washington Schedule:**TODAY'S EVENTS IN WASHINGTON.**

White House:

PRESIDENT OBAMA — Travels to Toluca, Mexico, to participate in the North American Leaders Summit. At the Summit, the President will discuss a wide range of issues including economic competitiveness and citizen security with Mexican President Pena Nieto and Canadian Prime Minister Harper.

VICE PRESIDENT BIDEN — Travels to Granite City, Illinois, to visit Americas Central Port. The Vice President's visit will mark the fifth anniversary of the American Recovery and Reinvestment Act. Secretary of Transportation Anthony Foxx and former Secretary of Transportation Ray LaHood will also attend.

US Senate: No Scheduled Events.

US House: 9 a.m. **WAYS AND MEANS – FIELD HEARING** — Subcommittee on Human Resources FIELD hearing on Washington States efforts to prevent child sex trafficking and protect youth in foster care from becoming victims of this crime. www. WaysandMeans. House. Gov Location: Council Chambers of the Auburn

City Hall, 25 West Main Street in Auburn, Washington.

Other: **BEYOND THE DOT** — 8 a.m. – 5 p.m. Conference on what will come after .com, bringing together innovators, policymakers, students, business leaders, academics to discuss what's beyond the Dot. Keynote by President Obama's 2012 campaign advisor Jim Messina. Visit www.beyondthedot.com to learn more about new gTLDs. <https://events.r20.constantcontact.com/register/eventReg?llrhgd5amab&oeidka07e8mvryk45f74987f>
Location: Newseum, Knight Conference Center – 7th floor, 555 Pennsylvania Ave. NW.

Feb. 19 – 21. U.S. DEPARTMENT OF EDUCATION — 9 a.m. – 5 p.m. The first of three negotiated rulemaking sessions being convened by the U.S. Department of Education, which will focus on Program Integrity and Improvement. The purpose of the committee will be to assist the Department in developing proposed regulations that deter fraud and ensure proper use of Federal Student Aid program funds, especially within the context of current technologies. 9 a.m. Opening remarks by Acting Under Secretary Jamieenne Studley. Location: 1990 K Street, NW, Eighth Floor Conference Center.

NPC – SECRETARY MONIZ — 12:30 p.m. NPC Luncheon with Secretary Ernest Moniz, U.S. Department of Energy. Secretary Moniz will address the challenges posed by unprecedented domestic supplies of energy and the demands in some quarters to push for more exports. This is a ticketed event. Location: National Press Club, 529 14th Street NW.

CSIS – DEPUTY SECRETARY OF STATE BURNS — 12:30 p.m. – 2 p.m. The Center for Strategic & International Studies (CSIS) Middle East Program will host Deputy Secretary of State Ambassador William J. Burns for a Gulf Roundtable luncheon discussion on the future of the U.S.-Gulf partnership. Credentialed members of the press who would like to attend must RSVP to aschwartz@csis.org Location: Second Floor Conference Center, CSIS, 1616 Rhode Island Ave. NW.

NASA – SUPERNOVAS – TELECONFERENCE — 1 p.m. NASA will host a news teleconference to announce new observations from its high-energy X-ray mission, the Nuclear Spectroscopic Telescope Array (NuSTAR). Participants: Paul Hertz, director of NASA's Astrophysics Division in Washington; Fiona Harison, NuSTAR principal investigator, California Institute of Technology (Caltech), Pasadena, Calif.; Brian Grefenstette, astronomer, Caltech; Robert Kirshner, astronomer, Harvard-Smithsonian Center for Astrophysics, Cambridge, Mass. DIAL IN: media should email their name, affiliation and telephone number to J.D. Harrington at j.d.harrington@nasa.gov by noon Feb. 19th. For more information: <http://www.nasa.gov/press/2014/february/nasa-hosts-media-teleconference-about-supernovas/>.Uv0QBPIdWGw

BROOKINGS – CYBERSECURITY FRAMEWORK — 2 p.m. -3:30 p.m. Improving Critical Infrastructure Cybersecurity: The Cybersecurity Framework and Beyond. Moderator: Ian Wallace, Visiting Fellow, Center for 21st Century Security and Intelligence, The Brookings Institution. Panelists: Patrick D. Gallagher, Under Secretary of Commerce for Standards and Technology and Director of NIST, U.S. Department of Commerce; Cameron Kerry, Distinguished Visiting Fellow, Governance Studies, The Brookings Institution; Dean Garfield, President and CEO of the Information Technology Industry Council. Location: The Brookings Institution, Falk Auditorium, 1775 Massachusetts Ave, NW.

SCHOOLKIDS – INTERNATIONAL SPACE STATION — 2:02 p.m. Ft. Belvoir Elementary School children to have radio contact with the International Space Station, where astronaut Dr. Koichi Wakata of Japan will answer a variety of questions. This event is coordinated through Amateur Radio on the International Space Station (ARISS), a cooperative venture of NASA, the American Radio Relay League, the Radio Amateur Satellite Corporation, and other international space agencies that schedule radio contacts between astronauts and schools.

Last Laughs:

LATE NIGHT POLITICAL HUMOR.

Conan O'Brien: "It's been reported in the news that President Obama asked HBO for copies of the upcoming season of 'Game of Thrones.' You know things are bad in this country when even the White House can't afford HBO."

Conan O'Brien: "Two former members of the Russian punk band 'Pussy Riot' were detained by police in Sochi. If found guilty, they could be sentenced to two weeks in a Sochi hotel room."

EVENT MEMORANDUM FOR THE SECRETARY

INTERNAL PREP FOR WGA BREAKFAST

DATE: February 21, 2014
LOCATION: Office of the Secretary
TIME: 3:00PM – 3:45PM

WESTERN GOVERNORS' ASSOCIATION BREAKFAST

DATE: February 23, 2014
LOCATION: U.S. EPA, 1200 Pennsylvania Avenue N.W., Green Room, 3rd Floor
TIME: 7:00AM – 9:10AM
FROM: John Blair, Terri Johnson, Francisco Carrillo, OIEA

I. PURPOSE

You will attend the WGA Breakfast on Sunday, February 23 in Washington, D.C. Gov. Hickenlooper is the WGA Chairman and Gov. Sandoval is the WGA Vice Chairman. Each year, the Governors are hosted by one of the Federal agencies- last year DOI hosted the breakfast and the year prior USDA hosted it. You participated in the WGA Winter Meeting in Las Vegas, NV this past December and the Annual Meeting in Park City, Utah in June, 2013.

II. PARTICIPANTS

Governors

Governor Jan Brewer, AZ
Governor Lolo Moliga, AS
Governor John Hickenlooper, CO
Governor Steve Bullock, MT
Governor Brian Sandoval, NV
Governor Susana Martinez, NM
Governor Jack Dalrymple, ND
Governor Eloy Inos, CNMI
Governor Mary Fallin, OK
Governor John Kitzhaber, OR
Governor Dennis Daugaard, SD
Governor Gary Herbert, UT
Governor Jay Inslee, WA
Governor Matt Mead, WY

Cabinet Officials

Thomas Vilsack, Secretary, U.S. Department of Agriculture
Sally Jewell, Secretary, U.S. Department of the Interior
Ernest Moniz, Secretary, U.S. Department of Energy
Gina McCarthy, Administrator, U.S. Environmental Protection Agency

Department/Agency Staff

Dr. Kathryn Sullivan, Acting Under Secretary of Commerce and Acting NOAA Administrator
Bob Perciasepe, Deputy Administrator, EPA
Mark Rupp, Deputy Associate Administrator for Intergovernmental Relations, EPA
Jack Bowles, Director, State & Local Government, EPA
Janet McCabe, Office of Air and Radiation, EPA (likely)
Shaun McGrath, EPA Region 8 Administrator, EPA (likely)
Nancy Stoner, EPA, Acting Assistant Administrator for the Office of Water (tentative)
Robert Bonnie, Under Secretary, USDA
Meryl Harrell, Chief of Staff to Under Secretary for Natural Resources and Environment, USDA
Jennifer Yezak, Director, Office of External & Intergovernmental Affairs, USDA

Michelle Wyman, Director of Intergovernmental Affairs, US DOE
Roger Pulwarty, NOAA
Linda D. Belton, Policy Advisor for Intergovernmental Affairs and Tribal Liaison, NOAA
Dan Ashe, Director, Fish & Wildlife Service, DOI
Tommy Beaudreau, Director, Bureau of Ocean Energy Management & Acting Assistant Secretary for Land and Minerals Management, DOI
Neil Kornze, Principle Deputy Director, Bureau of Land Management, DOI
Michael Connor, Commissioner, Bureau of Reclamation, DOI
Francisco Carrillo, Deputy Director of Intergovernmental and External Affairs, DOI

WGA Staff

James Ogsbury, Executive Director
Holly Propst, Policy Director
Laura Wilkeson, Manager of Federal Relations

Pending

Chuck Hagel, Secretary, U.S. Department of Defense
Governor Sam Brownback, KS
Governor Dave Heineman, NE
Governor Butch Otter (ID) – unlikely

III. AGENDA

7:00AM	Breakfast Available
7:15AM – 7:25AM	Welcome, Introductions Gina McCarthy, Administrator, U.S. EPA
7:25AM – 7:45AM	Opening Remarks Tom Vilsack, Secretary, U.S. Department of Agriculture You Ernie Moniz, Secretary, U.S. Department of Energy John Hickenlooper, Governor of Colorado & WGA Chair Brian Sandoval, Governor of Nevada & WGA Vice Chair
7:45AM – 9:00AM	Open Dialogue on Western Issues

Floor will be open for Governors' questions for Cabinet officials, comments, and discussion on issues.

9:00AM – 9:10AM

Wrap Up, Next Steps

Governor Hickenlooper will summarize any follow up needed on issues discussed.

IV. TALKING POINTS

- Thank you to: Chairman John Hickenlooper and Vice Chairman Brian Sandoval for invitation to participate in the annual WGA breakfast, Gina McCarthy for hosting the breakfast
- It was great to be with so many of you at the Winter Meeting this past December- thank you Gov. Sandoval for hosting us in your state.
- I joined Gov. Hickenlooper just this past January to visit with private landowners in CO that are developing conservation efforts for Sage Grouse.
- Earlier this month, Gov. John Kitzhaber and I announced the first offshore wind project on federal waters off of the West Coast.
- DOI is working tirelessly to develop renewable and traditional sources of energy, and last year I met with Gov. Jack Dalrymple as I toured his state to witness the responsible development of oil and gas in the Bakken Formation.
- Droughts and wildfires are having a tremendous impact on the people, infrastructure and economies of your states. Last summer, Gov. Jan Brewer and I attended the memorial service for 19 firefighters who gave their lives fighting fires in AZ.
- Our natural resources are critical to the economies of our nation, and I was pleased to attend the Outdoor Retailers Winter Market last month in UT and also meet with Gov. Gary Herbert.
- I look forward to having an opportunity to visit with all of you in your states- thank you Gov. Lolo Moliga for inviting me to your 114th Flag Day celebration, and I was glad to join you at the Pacific Islands Forum last September.

V. HOT TOPICS

Key issues we expect to be raised at this event are detailed in the attached Information Memo on WGA Issues of Interest.

VI. BACKGROUND

Western Governors' Association

The Western Governors' Association was established in 1984 and is an independent, nonprofit organization representing the Governors of 19 states and three US-Flag Pacific islands. Through their Association, the Governors identify and address key policy and governance issues that include natural resources, the environment, human services, economic development, intergovernmental relations and international relations. The current chairman of is Colorado Governor John Hickenlooper, who was elected in June 2013.

Current initiatives of the Association are energy generation; regional transmission expansion; weather and climate risk; water: supply, transfers, and drought; forest health; outdoor recreation and tourism; and wildlife corridors and crucial habitat.

Gov. Jan Brewer: In her State of the State Address, Gov. Brewer identified the high water demand of her state and linked it to job creation, capital investment and promoting a sustainable future. She also discussed the challenges of preparing young people for the competitive workforce. Gov. Brewer has developed a new program, "Student Success Funding" that will reward improved student performance.

Gov. John Hickenlooper: In his State of the State, Gov. Hickenlooper mentioned his work with you around Sage Grouse conservation efforts. He also highlighted how Colorado developed the nation's strongest frack fluid disclosure rule in 2011. The Governor also said he plans to make the penalties for violating oil and gas development rules higher in the future. He also discussed the state's water and drought plans.

Gov. Steve Bullock: In January of this year, Gov. Bullock signed an executive order that called for the establishment of the Greater Sage Grouse Habitat Conservation Advisory Council. "It's important that the State of Montana maintain control over the management of the Greater Sage-Grouse. Our state wildlife managers know how to do this and we can do a better job of ensuring the viability of the species because our people live and work in Montana every day," said Bullock.

Gov. Brian Sandoval: The Governor sent you a letter on January 17 requesting an extension of public comment period for the Nevada and Northeastern California Sub-region Greater Sage-Grouse Draft Land Use Plan. He highlighted that Nevada has undertaken substantial initiatives to protect the Greater Sage Grouse. More on this issue is contained in the attached info memo.

Gov. Susanna Martinez

In her State of the State address, the Governor discussed how NM is dealing with the drought. She is encouraging the state to invest 60% of capital dollars on critical water projects throughout the state. Information on the drought in NM is contained in the attached info memo.

Gov. Jack Dalrymple

The Governor sent a letter to you and OMB Director Sylvia Burwell regarding Mineral Leasing Act payments to North Dakota. (OMB is responding to the letter) The Governor recently announced the start of a project to develop a 375-mile natural gas pipeline set to raise take-away capacity. The pipeline, which can transport a total 400 million cubic feet each day, will cover a route stretching all the way from western North Dakota to eastern North Dakota where the region is filled with industrial, commercial, and residential clients.

Gov. Mary Fallin

Gov. Fallin serves as the Chair of the National Governors Association. Last month, the Governor requested that the Administration approve the Keystone XL Pipeline project. "The Keystone pipeline project is important to our nation's energy security as well as the individual

economies of our states,” said Fallin. “In Oklahoma alone, the pipeline represents a billion dollar investment with the potential to create thousands of jobs.”

Gov. John Kitzhaber

Governor Kitzhaber publicly announced this past month a drought emergency that four counties are currently dealing with. “We are already seeing the effects of the ongoing and prolonged drought in southern Oregon counties, with snowpack in the Klamath Basin only 20 percent of normal,” said Governor Kitzhaber. “We face these severe water shortages after a dry year in 2013. The drought will not be resolved without prolonged, substantial snow and rainfall.”

Gov. Dennis Daugaard

The Governor plans to thank you for working with his state to re-open Mount Rushmore Park. In his State of the State Address, the Governor discussed the actions he is taking to make sure the young people of South Dakota are educated, trained, and prepared to enter the workforce. The South Dakota Workforce Initiative, or South Dakota WINS, was enacted to provide programs meant to inform and help young people with choosing their career path.

Gov. Gary Herbert

In his State of the State Address, Governor Herbert talked about the state’s current agenda for environmental conservation especially their use of water resources and how his state maintains good air quality. Governor Herbert also discussed how education offered in Utah classrooms should match what is required in the present workforce, stating that students must be equipped with knowledge of science, technology, engineering, and math. He is working towards funding these specific areas of education, “Last year we provided \$10 million to the STEM Action Center, and my budget this year calls for another \$4.5 million” said Herbert.

Gov. Jay Inslee

Gov. Inslee discussed climate change in his State of the State address and the need for WA state to reduce its carbon pollution. Gov. Inslee has also established a STEM Education Innovation Alliance. You will be provided with a separate briefing memo for your meeting with him.

Gov. Matt Mead

In his State of the State Address, Governor Mead highlighted how Wyoming has the cleanest air in the country and acknowledges how they have developed a state energy strategy. One project in particular he is asking for support for is a test center for carbon capture and sequestration research. “We need to develop commercially viable uses for CO2. We want to assure that we have a complete mix of energy sources in the future – and coal should be a big part of that future”

VII. ATTACHMENTS

- Information Memo on WGA Issues of Interest

INFORMATION MEMORANDUM FOR THE SECRETARY

DATE: February 20, 2014
FROM: Sarah Greenberger, OS, (202)208-6726; Michael Bean, AS-FWP office (202) 208-7400; Letty Belin, Counselor to the D/S (202) 208-6291; John Blair, Director, OIEA (202) 208-1923 James Lyons, Counselor, ASLM (202) 208-4318; Neil Kornze, BLM; Mike Conner, BOR; Libby Washburn, BOR; Dionne Thompson, BOR (202)513-0570; Anne J. Castle, A/S W&S; Neil Kornze, BLM
SUBJECT: Western Governors Association (WGA) Issues of Interest

In preparation for the upcoming 2014 Western Governors Association breakfast, below are western issues of interest to the Governors planning to attend.

COLORADO RIVER BASIN DROUGHT

The Colorado River Basin drought that began in 2000 is one of the worst in more than a thousand years. While demand for water continues to grow, drought and climate change are causing supplies to dwindle. Over the last 14 years, the water in the reservoirs has declined from nearly full to about half of capacity. Entities that rely on the River are concerned about the ongoing drought, declining reservoirs, the potential for the first ever shortages in the Lower Basin (earliest projection is water year 2016) and the potential for loss of hydroelectric generation at Lake Powell (earliest projection is water year 2016).

Despite these dry conditions, Reclamation was able to make the required delivery commitments, including environmental releases, in the Upper Basin (Utah, Colorado, Wyoming and New Mexico) in water year 2013 and anticipates meeting those commitments in 2014. In accordance with the 2007 Interim Guidelines for the coordinated operation of Lake Powell and Lake Mead, the annual release from Lake Powell will be 7.48 million acre-feet (maf) in water year 2014. This is the first time since the filling of Lake Powell that its annual release will be less than 8.23 maf. In the Upper Basin, junior priority water users in sub-basins above major Reclamation reservoirs have experienced local shortages throughout the drought.

In water year 2014, snowpack in the Upper Basin has been tracking near average (111% of median on February 12). The probable forecast for inflow into Lake Powell is currently 96% of average. At this point, significant uncertainty still exists regarding the 2014 water supply. The current forecast for inflow into Lake Powell ranges from 73 to 124% of average, with a projected total Basin storage ranging from 45 to 56% of capacity for end of water year 2014.

Throughout history, there has never been a shortage condition determined in the Lower Basin (Nevada, Arizona and California). A shortage is deemed to occur when Lake Mead reaches elevation 1075 feet. The elevation is currently around 1106 feet, but is forecast to reach 1084 feet by next October. Reclamation met all water orders from U.S. water users in the Lower Basin and Mexico in 2013, and all delivery orders in the Lower Basin will be met in 2014. However, over the next 5 years, the potential for a Shortage Condition exists, with probabilities ranging from less than 1% in 2015, to 44% in 2016, 54% in 2017, and 53% in 2018.

In June 2013, you met with Basin States water representatives at the WGA meeting in Park City, and they committed to work together to identify solutions. Since that time, the Basin States have been actively engaged in a process to identify actions to avoid reaching critical elevations in Lakes Powell and Mead should drought conditions continue. Reclamation has been providing technical expertise and support. The workgroup has identified broad categories of actions targeted at generating volumes of water to protect critical elevations in Lakes Powell and Mead including conservation, temporary demand reduction, and increased system efficiency.

Although the Basin States remain committed to continuing discussions, there does not yet appear to be a consensus on which actions should be pursued at this time. The Basin States agree that DOI is a key partner in each and every action under consideration, and privately some would concede that a push from DOI might help move things forward. Your team believes that we must accelerate contingency planning and be ready to implement actions in 2014 designed to avoid reaching critical elevations in Lakes Mead and Powell and putting at risk the system's ability to meet water delivery obligations and continue to generate needed hydropower. Our goal is to have a consensus plan that the Basin States support, but a plan is required regardless.

Minute 319

Implementation of the historic Minute 319 agreement between the U.S. and Mexico on the Colorado River is well underway. Significant effort is currently focused on planning for a potential environmental pulse flow in the spring of 2014 to benefit the riparian ecosystem in the Colorado River Delta. This is a joint effort involving the governments, scientists, and NGOs from both countries to design, execute, and monitor the ecological response to an unprecedented one-time pulse flow (i.e., simulated flood). All water for the pulse flow will be generated in Mexico through conservation and deferred delivery under Minutes 318 and 319; DOI will provide funding to generate 50 percent of that water. While we are working to finalize necessary approvals for a pulse flow in 2014 (the Minute anticipates but does not require the flow take place next year), there are still issues to be resolved with Mexico and within the U.S. We strongly believe that a pulse flow in March/April 2014 is the best option. Negotiating an extension of Minute 319 by December 2016 is a high priority, and we believe a successful pulse flow will help pave the path to reaching an agreement.

Management of Glen Canyon Dam

The second high flow experimental release from Glen Canyon Dam under the new multi-year protocol took place in November. This is a significant achievement, one that has the support of a very wide spectrum of interests. In addition, there is continued progress in developing the Long Term Experimental and Management Plan for Glen Canyon, the first comprehensive planning effort in eighteen years. Reclamation and NPS are serving as co-leads for the LTEMP Environmental Impact Statement in keeping with their respective authorities for dam operations and park management.

SAGE GROUSE

The effort to complete Federal land management plans and state conservation plans continues. Meetings are occurring in the Great Basin and Rocky Mountain regions this month to address plan criteria and ensure harmony among plans in each region. The most recent Sage Grouse

Task Force meeting was held in Denver on February 5-6. Topics covered included: the FWS metrics for measuring conservation, mitigation strategies, adaptive management and fire. The most heated conversation occurred around states' concerns with the metrics proposed by the FWS. Wyoming, Idaho, Utah, and Nevada would like an additional few months to take Wyoming's system and tweak it to be applicable to other states. There was also frank discussion about the state of the science. Anticipated questions include:

What do you have to say about legislative efforts?

Suggested Response: I think we are best off to focus our energy and resources on something that we can control - using this collaborative process between states and the feds to put in place strong, science-based, legally defensible measures to conserve the Greater sage grouse. That said, I and my team are happy to review any legislative efforts which bolster our efforts to conserve the species. I am very concerned any effort to delay the deadline could be counterproductive. Kicking the can down the road could leave us in a situation where the habitat and the bird are in worse shape than they are today.

I understand the FWS intends to ask the states to supply data on conservation efforts that the states believe may be incomplete or misleading. Will you direct FWS to accommodate the concerns of the states?

Suggested Response: Beginning last July, FWS has been working with the 11 sage grouse states to develop a set of metrics or common measures by which to quantify on-the-ground conservation efforts. A common means of reporting will enable FWS to aggregate these collective conservation efforts in a more meaningful way than if FWS gets data reported in eleven different ways. FWS believes this information will ensure that the states are getting appropriate credit for the on-the-ground activities that help the sage grouse. In addition to these measures, the FWS welcomes additional information from the states about other aspects of the implementation of their sage grouse plans and regulatory measures and will continue working with the states to ensure that such information is effectively captured.

Why the delay in releasing the Lander resource management plan?

Suggested Response: The Lander resource management plan is the first greater sage grouse plan. It is also one of the most significant. Given that, we want to make sure we get this plan right and be sure it makes sense with our other plans. We are working to review all of the plans to be sure that the cumulative conservation effort of the Federal agencies as well as what we know of the state and voluntary efforts on private lands add up to a conservation strategy that will conserve the bird. Since we know each plan is likely to be litigated, we believe this comprehensive analysis will put us on more solid legal ground for when we begin rolling out final plans. We know the delay is frustrating, but hope for your patience.

How can we best cooperate in addressing the threat of fire to sage grouse habitat?

Suggested Response: I am very encouraged to see the introduction of bipartisan bills in the Congress that would address the very real problem that the costs of fighting fires often eat up the budgets for preventing fires. Senators Wyden and Crapo have introduced a bill that would treat certain large scale fires the same way we treat other major disasters - as emergencies that are funded separately from normal smaller scale firefighting efforts. There are practical steps that can be taken to make both our forests and our sagebrush landscapes less likely to be lost to fire.

But in order to take those steps, we must have secure budgets that are not drained away by the costs of fighting a few monster fires. If we can halt the cycle of loss of sagebrush habitat to fires and associated cheatgrass invasion, we will have addressed a major threat to the sage grouse.

(Possible Questions from Governor Sandoval): Given the work done on the bi-state population of the sage grouse by so many, especially the State of Nevada, what will you accomplish by listing this bird other than alienating all the groups that have been working to conserve it?

Suggested Response: We appreciate all the hard work that has been done by so many, and I point out that FWS has yet to make a final decision on the listing. However, the ESA requires that the listing determination be made on 5 threat factors at the time of the decision, not at a future date. Despite the good work and good intentions of all the parties that have contributed to conservation efforts, last September FWS determined that the threats to the bi-state population were still too great and that listing is warranted.

However, FWS also proposed a special rule that would exempt from ESA regulation any impacts to sage-grouse in the bi-state population incidental to implementing these ongoing conservation efforts. We acknowledge the good work of those partners and want to avoid any disincentive for those partners continuing their conservation efforts.

MITIGATION

You issued Secretarial Order 3330 on October 31, 2013, to improve the mitigation policies and practices of DOI by making mitigation decisions more consistent, transparent, and efficient, while improving environmental outcomes. Your address to the WGA meeting in Las Vegas on December 12 generally described the Order and the purposes behind it. Although your Order directed the Department's Energy and Climate Change Task Force to report back to you within 90 days (i.e., by January 31), you have given the Task Force a few more weeks in order to expand its outreach to state and federal agencies and affected interests.

On January 21, the WGA sent a letter enclosing a list of 30 questions about Secretarial Order 3330 and BLM's related mitigation policy. The group designated by the Task Force to work on the Secretarial Order discussed these questions with WGA staff on February 7. The Governors' letter made two principal points about DOI's mitigation policy efforts:

- (1) They should be developed in cooperation with the Governors; and
- (2) Mitigation requirements should be clearly defined and predictably implemented so that reasonable mitigation can be included in project planning.

The specific questions enclosed with the Governors' letter emphasized the first of these points in several different ways by asking: (1) whether state mitigation strategies would inform DOI's review of mitigation practices, (2) whether states would be engaged early in the process of mitigation planning, (3) what role states will have in determining mitigation sites, and (4) how DOI mitigation policies would affect state-recognized water rights.

Suggested talking points to respond to these questions include:

- Thank WGA for submitting questions about DOI's efforts to revise and improve its mitigation policies – **they were among the most useful comments we have received thus far.** DOI staff have discussed them with WGA staff and plan to continue to engage with WGA to work through key issues.
- Remind the Governors that you joined them in Las Vegas last December in announcing the availability of **WGA's West-wide CHAT** (crucial habitat assessment tool) to help steer development toward areas of little or no environmental conflict and away from areas of high conflict. **These are precisely the goals of any intelligent mitigation policy**, and we anticipate that our forthcoming mitigation policies will reinforce and complement the efforts of the Western states through their CHATs.
- DOI wants to learn from States' experiences in crafting effective mitigation policies. **Oregon** has been a leader in improving mitigation outcomes. It dramatically cut mitigation costs associated with bridge modernization by developing rigorous baseline information and performance standards that were integrated into project planning. **California** has extensive experience with wetland and endangered species mitigation banking from which DOI can learn.
- We are working with the various sage grouse states to ensure that state and Federal plans for conserving the species **effectively protect the most sensitive areas** (the "core areas" and/or "priority habitat" or PACs) **and offset adverse impacts that are not avoided.** The BLM will work closely with states to ensure that state-led compensatory mitigation programs, where they are consistent with agreed-upon principles, may be utilized to offset impacts occurring on BLM lands.
- As the Governors know, we are engaged in efforts to develop a comprehensive sage grouse conservation strategy to conserve the species. Continued coordination among the Federal land management agencies, the states, and the FWS is critical to our success.
- Although your Secretarial Order called for an initial report within 90 days, you wanted to ensure that the task force charged with responding to the Order had an opportunity to reach out broadly to state and Federal agencies and other affected interests.
- You are expecting to receive within the next week or so a draft report outlining the principles that will guide DOI's effort to modernize its mitigation policies and practices, as well as the specific deliverables to be accomplished over the coming months. This initial draft report is only a first step. DOI will be doing more outreach with WGA and individual states and other stakeholders as we continue to develop new mitigation policies and practices.

MINERAL LEASING ACT FUNDS

The Federal government collects royalties and lease payments for energy development on public lands. By law, these revenues are shared with states. Western Governors believe these shared revenues should not be treated as Federal expenditures, subject to sequestration.

PMB's Office of Natural Resources Revenue (ONRR) collects and disburses Mineral Leasing Act (MLA) and other revenue payments to States and others. In FY 2013, ONRR disbursed over \$14.2 billion in revenue generated from energy production on public lands and offshore areas, a \$2 billion increase over the prior year. In FY 2013, Mineral Leasing and other revenue payments were subject to sequester at a rate of 5.1%.

The Bipartisan Budget Act of 2013 eliminated the sequester of discretionary funds, but did not impact the legally required sequester of mandatory funds. In 2014, MLA payments are subject to sequester at a rate of 7.2%, consistent with the “OMB Sequestration Preview Report to the President and Congress for Fiscal Year 2014” and “OMB Report to the Congress on the Joint Committee Reductions for Fiscal Year 2014” issued May 20, 2013. In accordance with the Balanced Budget and Deficit Reduction Act of 1985 Mineral Leasing Act, funds are not exempted from sequester. MLA funds totaling \$101 million that were sequestered in FY 2013 were disbursed in the first payments made in FY 2014.

UTAH

San Rafael Land Swell withdrawal

In November 2013, the BLM-UT deferred a total of 99,960 acres comprised of 57 parcels in the Price and Vernal Field Offices from the Nov. oil and gas lease sale. The deferral would provide additional time to address concerns including cultural resources, sensitive species, potential impacts to the Old Spanish Trail, and lands with wilderness characteristics.

1.1 million acres of land nominated for leasing by industry were evaluated for wilderness, wilderness study areas, occupied sage grouse habitat, areas included in proposed Master Leasing Plans and to ensure statutory availability for leasing. A preliminary list of 664,756 acres (407 parcels) was sent to the Green River District, which considered workloads and determined that the Environmental Assessments (EAs) would analyze 143,981 acres (82 parcels) for potential leasing. The EAs were posted for public comment in June 2013 and received 11. The BLM-UT posted responses to the comments concurrently with the proposed final parcel list on Aug. 16, 2013. Posting the proposed final list and the Notice of Competitive Lease Sale initiated a 30-day public protest period that closed on Sept. 16, 2013. The BLM-UT received 431 timely filed protests from groups and individuals, including the Southern Utah Wilderness Alliance, Sierra Club, Natural Resources Defense Council, and Rocky Mountain Wild. Protests stated concerns with air quality, climate change, sensitive species, lands with wilderness characteristics, visual resources, and the Nine Mile Canyon Area of Critical Environmental Concern.

In November, the BLM-UT offered 35 parcels covering 44,021—three parcels covering 743 acres in the Vernal Field Office and 32 parcels covering 43,278 acres in the Price Field Office. The BLM-UT sold 29 of the 35 offered parcels, grossing \$3,399,486 in total receipts.

Environmental groups and concerned citizens who opposed the proposed parcel list posted on Aug. 16, 2013, were generally satisfied with BLM-UT’s Nov. 14 deferral decision. However, industry, some county governments, and the Western Energy Alliance were critical of the decision to defer these lands, as well as lands deferred earlier in the oil and gas leasing process. The Utah Congressional delegation was also critical of the deferral decision.

On Jan. 9, 2014, the Western Energy Alliance and Castle Valley Holdings appealed BLM-UT’s Nov. 14 deferral decision with the Interior Board of Land Appeals. The appeal is particularly focused on the deferral of 10 parcels nominated by Castle Valley and deferred due to cultural resources concerns raised by the Utah Rock Art Research Association (URARA). The appeal

notes that the URARA letter identifying concerns with impacts to rock art was received on Nov. 7, 2013, well after the close of the protest period on Sept. 16, 2013.

Applications for permit to drill (APD) pilot office reauthorization

The Energy Policy Act of 2005 (Section 365) established the Federal Permit Streamlining Pilot Project, with the intent to improve the efficiency of processing oil and gas use authorizations and environmental stewardship on Federal lands. It designated 7 pilot project offices: Miles City, Montana; Buffalo and Rawlins, Wyoming; Vernal, Utah; Grand Junction/Glenwood Springs, Colorado; and Farmington and Carlsbad, New Mexico. These offices accounted for roughly 60% of the BLM drilling permit approvals during FY 2013.

As part of this pilot project, the Permit Processing Improvement Fund was established to support the project for 10 years. The provision directs 50% of the income derived from Federal onshore oil and gas lease rental payments outside of Alaska to the Fund. Amounts are approximately \$15 million annually. For FY 2006-FY 2015, the Fund is available to the BLM for expenditure without further appropriation to process oil and gas use authorizations on Federal land under the jurisdiction of the designated pilot project offices. This was the first time Congress enabled a portion of the revenues generated be used to support the onshore program.

It also authorized the transfer of monies to the FWS, BIA, FS, EPA, Army Corps, and the states of Wyoming, Montana, Colorado, Utah, and New Mexico. These transfers have provided resources dedicated to assisting the BLM in processing the use authorizations.

The agencies have made significant progress:

- Additional personnel have enabled an increase in the pace of permitting and completing environmental reviews, particularly given the complex resource issues involved.
- The time for interagency consultations has been reduced due to improved communication and through programmatic streamlining efforts, which have been used in multiple projects and permits.
- The BLM has increased inspection and enforcement capability as a result of the hiring of additional skilled specialists. The increase has led to better compliance by the industry and a reduction in major violations due to the increased number of inspectors. It has allowed the BLM to identify issues early; intervene in developing violation situations; and improve interim reclamation work.

Section 365 prohibits the BLM from establishing cost recovery fees for processing applications for oil and gas permits. The BLM is prohibited from beginning the process of preparing the regulations, which will be needed to implement cost recovery once the provision expires or is repealed. Congress has implemented permit fees through appropriations language for the last several years. These flat fees are paid by applicants when submitting their application.

The President's 2015 Budget Request includes a proposal to extend and revamp the Pilot Office authority by granting BLM the flexibility to re-designate pilot offices as needed based on changing permitting demands, and a proposal to repeal the prohibition on establishing cost recovery fees for processing applications for oil and gas permits to drill. The proposal assumes that upon repeal of the prohibition on cost recovery fees, the BLM will engage in a rulemaking

process to establish the procedures for collecting cost recovery fees. These fees would ultimately replace the termination of the Fund, which is set to expire in 2015. Once the Administration's budget proposals are enacted, or by October 1, 2015, when the Fund expires, the BLM will begin the process of writing regulations to establish cost recovery. This process typically takes from 18 months to two years to complete.

States and local communities understand that the Pilot Office program helps foster jobs, the economy and adds revenues from leasing and royalties. Industry is supportive and realizes the benefits of the added capacity for these offices. They support extension of the Act, especially for areas that experience exploration and development activity; although they continue to demand more permits approved with faster processing times. The BLM has 6,711 approved drilling permits available to industry, and are developing the new automated permitting database module pilot that would use electronic submittal of permits to improve efficiency. The NGOs and other groups recognize that BLM needs stronger inspection capacity to provide oversight of the ongoing field operations. The Administration position, while supportive of the Pilot Office concept, has been to replace the legislated funding mechanism with one funded through cost recovery process.

The Omnibus Appropriation Act of 2014 expanded the scope of the Pilot Office program to include Casper (WY) and Dickinson (ND) offices that are linked to the Niobrara and Bakken Shale, respectively. The broadened geographic scope is allowing the BLM to address the increased demands placed upon these two offices.

Antiquities Act legislation

The Antiquities Act of 1906 authorizes the President to designate national monuments by way of public proclamation in order to protect historic landmarks, historic and prehistoric structures, and other objects of historic or scientific interest. The Act has been used by 16 Presidents to designate 103 national monuments administered by six Federal agencies, mostly in the NPS.

The BLM administers 19 national monuments (17 designated by proclamation, two by Acts of Congress), which cover about 5.1 million acres of public lands in 9 states: Arizona, California, Colorado, Idaho, Montana, New Mexico, Oregon, Utah, and Washington. The oldest -- Grand Staircase-Escalante in southern Utah -- was designated in September 1996, by President Clinton, and the newest -- Rio Grande del Norte in northern New Mexico and San Juan Islands off the northwest coast of Washington State -- were designated on March 2013 by President Obama.

Several bills regarding the Antiquities Act are currently before Congress, including H.R. 1459 sponsored by Representative Rob Bishop (R-UT). Bishop's bill would make several changes in the Antiquities Act, including: (1) requiring the President to consider proposals for national monument designation subject to NEPA, (2) allowing for designations of less than 5,000 acres to expire after 3 years unless enacted into law, and (3) limiting the President to one declaration per State during any 4-year term of office without an express Act of Congress. Application of NEPA to a discretionary decision by the President would be unprecedented and extraordinary because the President is not a Federal agency.

Use of the Antiquities Act was addressed in listening sessions on America's Great Outdoors in 2010, and the public voiced strong support. One of the recommendations in the AGO report, issued in February 2011, was to implement a transparent and open approach in new monument designations. The Administration has supported conducting an open, public process that considers input from local, state, and national stakeholders before any sites are considered for designation. National monument designations respect valid existing rights on Federal lands and any other relevant provisions of law.

The Antiquities Act was the first U.S. law to provide general protection for objects of historic or scientific interest on Federal lands. It set a precedent by asserting a broad public interest in the preservation of natural and cultural resources on Federal lands. The law provided much of the legal foundation for cultural preservation and natural resource conservation and created the basis for the Federal government's efforts to protect archeological sites from looting and vandalism. Most recently, President Obama used the Act to establish 5 national monuments in 2013. In these cases, DOI engaged in discussions with national, state, local, and Tribal stakeholders, and each monument enjoyed a broad spectrum of enthusiastic support.

NEW MEXICO

Drought in New Mexico

New Mexico is in an extended drought with below average runoff for several years. Water supplies continue to decline, resulting in shortages for irrigation districts along the Rio Grande and Pecos. Reclamation continues to struggle to meet ESA requirements in both the Rio Grande and Pecos basins in New Mexico. Runoff projections currently range from 30 to 50% of average for the Middle Rio Grande and 30 percent for the Pecos. Reservoir storage on the Rio Grande is extremely low after three years of drought. Depending on runoff, the Middle Rio Grande Conservancy District could cease operations for irrigators as early as June. Then they would operate primarily to meet the needs of the six Middle Rio Grande pueblos, which could be difficult given current conditions. On the Rio Grande Project, irrigation districts are forecasting for an allocation to farmers that is 20 to 30 percent of average. Heavy rains in September 2013 helped to fill reservoirs on the Pecos. The Carlsbad Irrigation District will likely issue an allotment of at least three acre-feet of water per acre, which they have not done since 2010.

- Reclamation continues work with partners and the Minnow Action Team under the Middle Rio Grande Endangered Species Collaborative Program to develop options to meet flow targets and create a silvery minnow spawn.
- Reclamation has worked out an exchange whereby water stored to meet the needs of the six Middle Rio Grande pueblos was exchanged with the Albuquerque Bernalillo County Water Utility Authority's San Juan-Chama Project water intended to be moved to Elephant Butte Reservoir to augment a spring peak. If a spring peak does not occur naturally, Reclamation plans to move the 12,000 acre-feet of San Juan-Chama Project water to Elephant Butte Reservoir to augment natural flows.
- San Juan-Chama Project supplies also face a shortfall, which could impact the amount of supplemental water available to meet the flow requirements of the Middle Rio Grande biological opinion. Without additional sources, current supplemental water supplies to meet the flow requirements range from 24,000 to 40,000 acre-feet, depending on actual

runoff volumes. Demand could exceed 65,000 acre-feet. Reclamation will be working with FWS to ensure compliance with the permitted incidental take for the 2014 irrigation season. Reclamation will continue working with Collaborative Program partners on the new consultation and implementation of a Recovery Implementation Program.

- Reclamation will continue to work closely with stakeholders and the Service to meet demands and ESA requirements in another dire water year.

NORTH DAKOTA

Northwest Area Water Supply (NAWS) Project

NAWS is a municipal and rural water project authorized by the Garrison Diversion Reformulation Act of 1986 and the Dakota Water Resources Act of 2000, and construction of project features began in April 2002. When complete, the project would deliver water from the Missouri River to communities and rural water systems in North Dakota located in the Hudson Bay Basin.

In October 2002, the Province of Manitoba, Canada, filed a legal challenge in U.S. District Court in Washington, D.C., to compel DOI to complete an environmental impact statement (EIS) on the project. In February 2005, the case was remanded to Reclamation for completion of additional environmental analysis. The Court allowed construction to continue on project features that would not prejudice future decisions on water treatment. In 2006, Reclamation initiated preparation of an EIS to evaluate water treatment techniques to further reduce the risks of a project-related transfer of non-native species from the Missouri River Basin into the Hudson Bay Basin. On January 15, 2009, Reclamation signed a Record of Decision. In February 2009, the Province of Manitoba filed a Supplemental Complaint arguing that the final EIS was insufficient. The State of Missouri filed a complaint against DOI and the ACOE in the same U.S. District Court over concerns about Missouri River water withdrawals. The Court combined the Missouri suit with the Manitoba suit. In March 2010, the Court issued an order in favor of Manitoba and Missouri. Once again, the case was remanded to Reclamation to take a “hard look” at (1) cumulative impacts of water withdrawal on the water levels of Lake Sakakawea and the Missouri River, and (2) consequences of biota transfer into the Hudson Bay Basin, including Canada. However, the Court allowed construction to continue on features that would not prejudice future decisions on water treatment.

Construction continues on the Minot Water Treatment Plant Improvement Project. On March 1, 2013, Judge Collyer issued a ruling on the issue of whether to allow further work to be bid for continued construction of distribution facilities. The ruling will allow completion of the upgrades at the Minot Water Treatment Plant. However, the modified injunction “will not permit new pipeline construction or new pipeline construction contracts.”

Progress continues on the preparation of the draft SEIS. The cooperating agencies completed their review of the Alternatives chapter and Reclamation is reviewing the comments and revising the draft chapter as appropriate. Cooperating agencies include the EPA, ACOE, State of North Dakota represented by the State Water Commission, the Garrison Diversion Conservancy District, and the City of Minot.

The analysis of the potential consequences of the No Action Alternative, as well as the potential impacts associated with the proposed action alternatives has been completed. The analyses are documented in the draft Environmental Impacts chapter which has been provided to the cooperating agencies for review. An overview of the impacts was presented to the cooperating agencies at a meeting on January 29, 2014. The scope of comments provided by the cooperating agencies will influence the schedule of releasing the draft SEIS to the public. Reclamation will work collaboratively with the cooperating agencies to incorporate their input and publish the draft SEIS for public review in a timely manner. A late spring/early summer publication of the draft SEIS is anticipated.

Red River Valley Water Supply Project

The Red River Valley Water Supply Project is a proposed municipal, rural, and industrial bulk water supply designed to meet water quantity and quality needs in the Red River Valley in North Dakota and Minnesota. Studies predict that present water supplies in the region would be inadequate during a severe drought.

Reclamation and the State of North Dakota completed the Red River Valley Water Supply Project Final Environmental Impact Statement in 2007, identifying an alternative that would import treated water from the Missouri River. Because Congress has not authorized the preferred alternative, a Record of Decision has not been signed. The State of North Dakota is considering building the Red River Project without Federal funding or using Federal facilities. Minnesota, Missouri, Province of Manitoba, and the Canadian Federal Government are opposed to the project.

Background: The preferred alternative identified in the Final EIS would import water from the Missouri River basin into the Hudson Bay basin, which extends into Canada. Authorizing legislation, Dakota Water Resources Act, requires explicit Congressional approval of a Missouri River import alternative. The Province of Manitoba, Canadian government, and the State of Minnesota oppose transfer of aquatic invasive species into Hudson Bay basin. The State of Missouri is concerned that Project withdrawals would deplete the Missouri River and subsequently impact Missouri and Mississippi river shipping. In January 2009, Secretary Kempthorne signed a formal determination finding that the proposed water treatment for the importation of Missouri River water for the project was adequate under applicable Federal law and treaty provisions. Water treatment was developed in close consultation with EPA and the Department of State, as required by Dakota Water Resources Act. The preferred biota treatment alternative identified in the final environmental impact statement meets or exceeds treatment goals proposed by the Province of Manitoba.

Current Status: In March, the North Dakota State Water Commission is contracting for a value engineering study of the Red River Project to identify an alignment to complete the Red River Project as a State funded project. The Garrison Diversion Conservancy District, another State agency, has acquired option agreements for 76% of the original preferred alternative right-of-way. The Garrison Diversion Conservancy District wants Reclamation to sign the Record of Decision.

EVENT MEMORANDUM FOR THE SECRETARY

MEETING WITH GOVERNOR INSLEE

DATE: February 23, 2014
LOCATION: EPA – WJCN-3428
TIME: 9:15AM – 9:35AM
FROM: John Blair, Director, OIEA (202)208-6649; Francisco Carrillo, Deputy Director, OIEA (202)208-5541

I. PURPOSE

You are meeting with Gov. Inslee to discuss a number of issues in which he has been in communication with DOI, including the Yakima Basin Integrated Water Resources Plan, the Pacific Northwest Regional Infrastructure Team, Sage Grouse, climate, and the ESA/Gray Wolf. We were unable to find a time for you to meet with the Governor on your last trip to Washington State because of the distance between your events and his residence.

You had a phone call with Gov. Inslee on September 23, 2013, to discuss the Yakima Basin Integrated Water Resource Management Plan. You also had a call with the Governor in May 22, 2013 to discuss fire preparedness and the Gray Wolf delisting for which we were seeking his support.

II. PARTICIPANTS

- Governor Inslee
- Trudi Inslee, spouse
- Sam Ricketts, Director, D.C. Office of Governor Inslee
- Joby Shimomura, Chief of Staff, Governor Inslee
- DOI Staff: Nikki Buffa, Francisco Carrillo

III. HOT TOPICS

Sage Grouse: There are only about 1,000 sage-grouse in all of Washington State. They occur in three small populations: (1) the largest is in Douglas County (712 birds) where they are mostly on private land and are utilizing grassland enrolled in USDA's Conservation Reserve Program; (2) on the Army's Yakima Training Center (221 birds, and declining); and (3) in Lincoln County where a small population (65 birds) has been established through reintroductions on BLM and WDFW lands.

BLM lands are relatively insignificant for the sage-grouse in Washington, comprising only about 4% of priority habitat. Because of this fact, the BLM Resource Management Plan is not being revised as part of the overall sage-grouse conservation effort. Rather, it is being revised on its own separate schedule and will not be completed in time to affect the 2015 listing decision.

Because the birds in Washington are isolated from other populations, they may comprise a “distinct population segment,” the listing status of which could be different from that of greater sage-grouse elsewhere. FWS will have to address this issue when it makes its 2015 listing decision.

Yakima Basin Integrated Water Resource Management Plan (IP): Governor Inslee invited you to attend an event on October 29, 2013, to recognize the Manastash Creek Project. Given the pressure for substantial Federal funding, Anne Castle recommended that you not participate in this event because it would set unrealistic expectations. Tom Iseman, Deputy Assistant Secretary for Water & Science, participated in this event.

The Washington State Legislature passed a policy bill supporting the IP which calls for a 50/50 cost-share with Federal, local, and private organizations for the entire IP project and a 2013-2015 state budget that includes \$132 million for the IP. The State is providing \$26M to Reclamation to continue exploration and refinement of infrastructure projects. For example, Reclamation is continuing its commitment to study and implement juvenile and adult fish passage at Cle Elum Dam, with the potential to open nearly 30 miles of spawning/rearing habitat to native species, including ESA listed Steelhead. Continued cost-share with the State will be critical to successful implementation of fish passage at Cle Elum Dam. Governor Inslee is particularly interested in increased federal funding to complement current and expected future State funding contributions to the IP.

Odessa Project, Columbia Basin Project: The Odessa Project will provide surface water to approximately 70,000 acres of land currently irrigated with groundwater. Reclamation, the Washington State Department of Ecology and the East Columbia Basin Irrigation District are coordinating implementation of the Odessa Project. With Reclamation’s approval, the State continues work on the Odessa Project, including expansion of the East Low Canal, a feature of the Columbia Basin Project. This work will maintain agriculture in the area while providing relief to the declining Odessa Aquifer from groundwater pumping.

Climate: Gov. Inslee was appointed to President Obama’s Task Force on Climate Preparedness and Resilience on Nov. 1, 2013 where he, along with other state and local leaders, will be responsible for advising the Administration on how the Federal Government can respond to the needs of communities nationwide that are dealing with the impacts of climate change.

Gray Wolf Delisting: FWS proposed in June 2013 to remove the gray wolf from the list of threatened and endangered species. The proposal came after a comprehensive review confirmed its successful recovery following management actions undertaken by Federal, state and local partners following the wolf’s listing under the ESA over three decades ago. FWS concurrently proposed to maintain protection and expand recovery efforts for the Mexican wolf in the Southwest, where it remains endangered.

Under the proposal, state wildlife management agency professionals would assume responsibility for management and protection of gray wolves in states where wolves occur. It focuses the protection of the ESA on the Mexican wolf, the only remaining entity that warrants protection under the Act, by designating the Mexican wolf as an endangered subspecies. FWS’s proposal

was supported by governors and state wildlife agency leadership in each of the states with current wolf populations, as well as those that will assume responsibility for managing wolves dispersing into their states, such as Washington, Oregon, Colorado, Utah and North Dakota.

FWS knows of no issues that Governor Inslee may raise regarding gray wolf conservation in Washington State. The state has been very supportive of the Service's delisting proposal and is implementing their own gray wolf conservation strategy designed to establish and maintain a secure wolf population throughout the state. At the time of the delisting proposal, the State offered the following quote for the press release:

"The Washington Department of Fish and Wildlife is firmly committed to the long-term persistence of wolves in Washington," said Miranda Wecker, Chair of the Washington Fish and Wildlife Commission. "The Washington Fish and Wildlife Commission believes the state should be responsible for the management of wolves and supports the U.S. Fish and Wildlife Service's consideration of delisting gray wolves under the federal Endangered Species Act. By publishing the proposed rule, the Service ensures this important consideration can take place in an open and public process."

Pacific Northwest Regional Infrastructure Team: On May 24, 2013, you signed a Declaration of Cooperation with the States of Oregon and Washington to expedite the review and permitting of energy generation, power transmission and other vital infrastructure development in the Pacific Northwest. On May 21, 2013, Governors Inslee and Kitzhaber (OR) sent you a letter regarding their commitment to work with DOI on the Pacific Northwest Regional Infrastructure Team, which was established through Presidential Executive Order 13605 on *Improving Performance of Federal Permitting and Review of Infrastructure Projects*.

Proposed Washington State – Yakama Nation PL 280 Retrocession (if raised): In 1963, pursuant to a Congressional act called Public Law 280, Washington received a Federal delegation of criminal and civil jurisdiction over Indian reservations within the state. As a result, state and county agencies (rather than the BIA, FBI and federal officials) have been handling some of the criminal matters on the Yakama Indian Reservation for the past 50 years. (Federal officials had retained jurisdiction over trust lands within the reservation.)

The Yakama Nation has maintained concurrent criminal jurisdiction, but that jurisdiction was limited to misdemeanors crimes by Indians until two recent laws broadened that authorization (to lesser felonies over Indians in the Tribal Law and Order Act of 2010 and to non-Indian domestic violence offenders in the 2013 VAWA Reauthorization Act).

On July 17, 2012, the Yakama Nation petitioned Governor Kristine Gregoire to retrocede jurisdiction within the exterior boundaries of the Yakama Reservation and ceded lands to the Yakama Nation (excluding mental illness and civil commitment of sexually violent predators as well as non-Indian defendants). Governor Gregoire discussed the petition requesting the retrocession in Government-to-Government meetings, but left office before acting.

Governor Jay Inslee continued the discussions and, after a six-month extension, issued Proclamation 14-01, granting the retrocession of civil and criminal jurisdiction to the Yakama

Tribe within the Exterior Boundaries of the Yakama Indian Reservation. The Governor did NOT retrocede jurisdiction outside the exterior boundaries of the Yakama Indian reservation retaining the jurisdiction it assumed in 1963 over the Yakama Nation's off-reservation Indian lands.

The next step is the Secretarial determination as to whether to accept the retrocession. In making that determination, we are required to consult with the Department of Justice. We have reached out informally to Mike Ormsby, the U.S. Attorney for the Eastern District of Washington in Spokane, to begin these discussions. This may be a decision that is within the broad delegation to the Assistant Secretary - Indian Affairs. (These occur only about once a decade, so we do not have well-beaten path for these kinds of decisions).

III. TALKING POINTS

Yakima Basin Integrated Water Resource Management Plan (IP)

- The IP's balanced approach and broad stakeholder involvement is the right strategy.
- The Manastash Creek Project is a great example of an IP project that provides multiple benefits and is cost-shared by multiple stakeholders, including Reclamation and the State.
- Implementation of the IP will require funding partnerships across Federal, state, local and private and non-governmental organizations.
- To date, the Department has provided \$3.8M for IP activities.
- The 2014 President's budget requested, and the Omnibus provided, \$1M to Reclamation for IP activities, part of an overall investment of \$8M in the Yakima River Basin. However, Reclamation is attempting to identify additional fiscal year 2014 funding for IP activities, including for the Manastash Creek Project.
- In addition, the Department demonstrates its commitment to the IP by spearheading ongoing efforts to coordinate among Federal agency regional and national leadership, including Reclamation, FWS, BLM, NRCS, USFS, NOAA and BPA, to collectively identify potential funding sources and creatively provide in-kind contributions.
- At the suggestion of the ASWS, the Yakima Basin Implementation Committee hosted a Funding Opportunity Workshop in October with various Federal and non-governmental stakeholders to explore other funding opportunities and encourage IP contributions from other stakeholders.
- Given the Federal presence in the Yakima River Basin, we are committed to continuing the cooperative relationship with the State to collaboratively further the goals of the IP. However, our contributions are likely to continue to be constrained to near current levels by Federal budget realities.

Gray Wolf Delisting

- As you may know, the Fish & Wildlife Service (FWS) has been coordinating with your state wildlife agency for some time now on wolf management issues, and they are appreciative of the hard work that has been done in WA to develop comprehensive wolf management plans.
- Given the successful recovery of the gray wolf in the western Great Lakes and the Northern Rocky Mountains, FWS removed the gray wolf from the Endangered Species

Act list throughout the U.S., including in WA. FWS will continue federal protection and expand recovery efforts for the Mexican wolf in the Southwest.

- Although we know that some in the NGO community will be concerned about this announcement, we think it is a great success story for the ESA, and our close work together highlights how the federal government and states can combine forces to protect and recover endangered species in the U.S.

IV. BIOGRAPHY

Jay Inslee is a fifth-generation Washingtonian who grew up in the Seattle area. His father, Frank, was a high school teacher and coach. His mother worked as a sales clerk at Sears & Roebuck. Jay worked his way through college and graduated from UW with a degree in economics before earning his law degree at Willamette University. He and his wife, Trudi, then moved to Selah where Jay worked as a prosecutor and they raised their three sons.

Jay first became involved in public service in 1985 when he and Trudi helped lead the effort to build a new public high school in Selah. Motivated to fight against proposed funding cuts for rural schools, Jay went on to represent the 14th Legislative District in the state House of Representatives. He continued serving communities in the Yakima Valley when he was elected to Congress in 1992. The Inslees later moved back to the Puget Sound area where Jay was elected to Congress in 1998, serving until 2012.

During his time in Congress, Jay became known as a forward-thinking leader, especially on issues of clean energy and the environment. He co-wrote a book, "Apollo's Fire: Igniting America's Clean-Energy Economy," about the job-creating potential of the clean tech industry. As governor, Jay's top priority is growing Washington's innovative industries such as clean energy, IT and life sciences, and strengthening existing industries such as aerospace, agriculture, maritime and military.

To grow these industries, Jay knows we must strengthen our schools so we can better equip our children to compete for these good-paying jobs. And we must bring a new culture of efficiency and performance to state government to more efficiently serve the people and businesses throughout Washington state. Jay and Trudi are proud grandparents to two toddlers. Besides writing and illustrating books for his grandchildren and sketching scenes from around Washington, Jay is an avid cyclist and charter member of Hoopaholics.

INFORMATION MEMORANDUM FOR THE SECRETARY

DATE: February 21, 2014
FROM: Letty Belin, Counselor to the Deputy Secretary (202) 208-6291
James Lyons, Counselor, ASLM (202) 208- 4318
Michael Bean, Counselor, ASFWP (202) 208-7400
Joel Clement, Director, Office of Policy Analysis (202) 208-3295
SUBJECT: Requested Talking Points regarding mitigation SO and Report

The purpose of this memo is to provide talking points on the Mitigation Report for your coming meetings with Governors and other stakeholders. You also asked for a few examples to illustrate the principles described in the report.

TALKING POINTS AND EXAMPLES

- **Project-by-project planning and development is inefficient, can slow down the permitting process and create undue operational uncertainty.** Studies show the benefits of coordinated landscape approaches to mitigation, both in terms of planning and permitting efficiencies and in more coordinated conservation efforts. The goal of modernizing DOI's approach to mitigation is to be more strategic about mitigation investments; improve collaboration and coordination with states and other stakeholders, and provide more timely, effective, and durable outcomes.
- **We are committed to ensuring that this modernization strategy will not add bureaucratic layers or processes;** we have heard loud and clear that additional processes will stifle opportunity. The intent of this reform is to make existing processes smarter, to improve certainty for project proponents, and to ensure that we're being as effective as possible with mitigation efforts and investments in conservation.
- **Developing this new approach is an ongoing process that does not stop with the publication of this first report.** Not only will there be ongoing policy deliverables to implement this approach, there will be ongoing outreach and communication among the many partners with whom we work.\
- **We recognize the key role played by state agencies and other stakeholders in getting this right, and will seek their ongoing counsel throughout the process.** In particular, we seek to work closely with states in compiling the information and tools that will be necessary to ensure that mitigation efforts are supported by the best available science. Our ongoing work in California on the DRECP and across the western states to develop a conservation strategy for sage grouse is evidence of the partnership approach we seek.
- **The foundation of this landscape-scale mitigation approach is geospatial data and tools assembled in collaboration with federal and state agencies, academic institutions and others.** Much of this work has already been done (e.g., CHATs, USGS products, etc.) and needs only to be compiled and organized so that it can be used to identify existing and potential resource conservation priorities and development opportunities nationwide.

- **DOI's mitigation initiative will do the following:**
 - Leverage use of mapping technologies and capabilities
 - Establish an over-arching mitigation **strategy** for DOI --- not a new **planning requirement**
 - Allow DOI and other agencies to work with local communities to conserve priority areas while also developing available resources
 - Provide incentives for pre-application collaboration among developers and agencies to identify best opportunities to advance proposed project while appropriately protecting natural and cultural resources

- **DOI's mitigation initiative will not do the following:**
 - Create additional levels of NEPA requirements
 - Establish "zoning" requirements for federal lands

EXAMPLES OF STATE-SPONSORED LANDSCAPE-SCALE MITIGATION SHOWN TO WORK WELL:

- **Advance Permitting for Bridge Modernization in Oregon.** In 2003 the Oregon State Legislature enacted the third Oregon Transportation Investment Act (OTIA III), an infrastructure and economic stimulus law that established a State Bridge Delivery Program requiring advance permitting and environmental mitigation planning prior to design and construction. In 2008 the Oregon Department of Transportation conducted a cost/benefit comparison of a traditional project permitting approach with the programmatic process developed for the OTIA III State Bridge Delivery Program. The analysis noted that "the expected need for mitigation as a result of bridge construction has been a fraction of what was anticipated at the beginning of the program due to the avoidance of resources during the development process by having baseline information and performance standards for the design teams to work with at the beginning of the project development process."

- **The Maryland Water Resources Registry (WRR)** is a collaborative effort by multiple federal and state agencies to streamline permitting processes while simultaneously enhancing ecological outcomes. The stated objective of the WRR is to "map natural resource areas that are a priority for preservation" and to "identify sites best-suited for ecosystem preservation and restoration". The WRR interagency team worked in partnership to 1) Integrate agency conservation priorities associated with the Clean Water Act; 2) Develop criteria for prioritizing areas suitable for conservation and restoration; and 3) Publish a web site where mitigation "opportunities" can be explored via a Geographic Information System. The WRR uses science-based criteria to measure ecological health. Published mitigation opportunities include the protection or restoration of wetlands, uplands, streamside areas, and storm water infrastructure areas. The interactive-mapping tool uses a scoring system to rate mitigation

opportunities with the goal of attracting developers towards mitigation opportunities with the highest ecological value. The benefits of the WRR include the following:

- *Permit applicants can easily identify priority mitigation opportunities during the planning phase, before the review process is initiated.*
 - *Private developers can guide their land use and mitigation decisions based on multi-agency priorities.*
 - *Public land trusts and wetland bankers can target areas for purchase and preservation.*
 - *Local and County planners can inform resource protection, zoning, and land use plans.*
- The Registry Web site is <http://www.watershedresourcesregistry.com>.*

- **North Carolina Ecosystem Enhancement Program.** In North Carolina, the state's Ecosystem Enhancement Program (EEP), an in-lieu fee program that provides offsite compensatory wetland and stream mitigation offsets, has allowed the state's Department of Transportation (NCDOT) to integrate their transportation planning with landscape-level watershed planning in order to streamline the overall mitigation process. In doing so, the EEP has reduced wetland mitigation expenses, as a percent of NCDOT project costs, from 8 percent to less than 3 percent, representing an annual cost savings of \$32.5 to \$65.0 million. The North Carolina Department of Environment and Natural Resources reports that, since 2003, the EEP has allowed the NCDOT to advance nearly \$14 billion in transportation projects without a single delay due to mitigation permitting (from: <http://portal.ncdenr.org/web/eep/why-EEP-matters>).

EXAMPLES OF DEPARTMENTAL LANDSCAPE –SCALE MITIGATION INITIATIVES CURRENTLY UNDERWAY:

- **Dry Lake Pilot Regional Mitigation Plan**

In conjunction with the Western Solar Energy Plan, the BLM developed a pilot mitigation strategy for solar energy projects that may occur in the Dry Lake Solar Energy Zone. The Solar Energy Plan calls for the development of mitigation plans for each solar energy zone (SEZ) to identify opportunities for compensatory mitigation to offset the impacts of projects on resource values in the SEZ. Through the development of these mitigation plans, project proponents will have a better understanding of the mitigation measures required, and the associated costs, for compensatory mitigation actions in conjunction with development in the particular SEZ. Lessons learned from the Dry Lake Pilot Regional Mitigation Plan will be used to inform the development of future mitigation strategies for other solar energy zones.

- **Desert Renewable Energy Conservation Plan.** The Desert Renewable Energy Conservation Plan (DRECP) is a comprehensive and coordinated State/Federal effort to provide effective protection and conservation of California's desert ecosystems while guiding

the development of appropriate renewable energy projects throughout the region (over 22,585,000 acres).

Goals and objectives for the DRECP: Provide for the long-term conservation and management of Covered Species; preserve, restore, and enhance natural communities and ecosystems; build on the Competitive Renewable Energy Zones identified by previous studies; further identify the most appropriate locations for utility-scale renewable energy projects; provide a framework for a more efficient process for regulatory authorization resulting in greater conservation than project-by-project or species-by-species reviews can obtain; provide durable and reliable regulatory assurances; identify and incorporate climate change adaptation research, management objectives, and/or policies into the final plan document.

- **Landscape Planning and “Advance Mitigation” for Species Trending Toward ESA Listing.**

Greater Sage Grouse

In conjunction with the development of a conservation strategy for the **Greater Sage Grouse**, federal and state land management agencies are developing guidance for measures to mitigate the effects of development activities that may pose a threat to the species continued existence. This strategy will apply to all management actions on BLM, Forest Service, and state lands within the remaining range of the species while providing each state the flexibility to develop tools (e.g., mitigation banks, fee structures) to meet the desired mitigation outcomes.

Lesser Prairie Chicken

The five states with lesser prairie-chickens (CO, KS, NM, OK, and TX) have developed a rangewide conservation plan that relies heavily on a mitigation program in which agricultural landowners will be paid to undertake conservation measures on their lands. Funds for these payments will come from assessments on oil and gas and other development activities. Under the special 4(d) rule proposed by the Fish and Wildlife Service, development activities that result in the taking of prairie-chickens will be authorized, provided that those development activities are covered by the mitigation program. Thus, even if the prairie-chicken becomes a federally listed threatened species, the state-developed rangewide conservation plan and its mitigation program will effectively leave the states with the authority to continue to manage and conserve the species.

BUILDING A LANDSCAPE LEVEL UNDERSTANDING OF OUR RESOURCES

Today we have an unprecedented opportunity, using science and technology, to create a better understanding of landscapes than ever before, to advance important conservation goals and achieve our development objectives together. It's not an either/or. It can't be. We're already seeing this approach work, as we seek to meet President Obama's goal of approving 20,000 megawatts of renewable energy on public lands by 2020.

*Sally Jewell, Secretary of the Interior
October 31, 2013*

The complexity of natural resource issues and the rates of change to landscapes, both naturally and human induced, are increasing faster than anyone could have predicted just a decade ago. The Department of the Interior recognizes in order to effectively carry out its mission and priorities it must understand and make decisions at the landscape, rather than local scale. Interior provides applied and basic scientific research, monitoring, information, and tools to inform decisionmaking by Interior bureaus and offices as well as local, tribal, State, national, and international communities.

Interior conducts basic and applied science to inform these decisions. It develops the tools to analyze, visualize, translate, and extrapolate science, and is leading efforts to apply science at multiple scales and across multiple landscapes to inform land and resource planning, policy, mitigation, and management. Interior employs some of the Nation's premier scientists. The U.S. Geological Survey and the scientists of the Department's land and resource management agencies provide baseline information regarding the health of our ecosystems and environment, natural hazards, and the impacts of climate change. This expertise is shared and leveraged with other Federal agencies, State and local governments, Tribes, and communities.

As the managing partner for the Geospatial Platform, Interior leverages 21st century geographic information system tools to transform vast amounts of data on landscapes and resources into useful information to inform decisions to help power the future, ensure healthy landscapes, and achieve sustainable supplies of water. Decisions affecting the siting of energy development, water resource allocations, recreation, conservation of habitat, identification of transmission line rights-of-way, mitigation for development activities, and other land uses are increasingly interconnected on an ever changing, climate-impacted landscape.

Interior's landscape level understanding of the Nation's resources is focused on tools and technologies to gather and deliver data and information, develop a scientifically-

robust foundation for landscape understanding, and apply science to support Interior responsibilities.

Developing and Sharing the Scientific Tools for Landscape Level Understanding

Interior's science programs provide an array of tools for analyzing management and resource trade-offs, and understanding the long-term impacts of management decisions. Interior is incorporating the use of tools such as geospatial data, remote sensing, predictive modeling, scenario development, forecasting and simulation into land management activities.

The 2015 budget includes \$888.7 million for research and development activities throughout the Department, an increase of \$61.0 million from the 2014 enacted level. Activities supported by this funding range from scientific observations of the earth, streams, and wildlife populations, to applied research in the field to better address the impacts of a changing climate on Interior's lands and address species-specific problems such as white nose syndrome in bats. Complementing this request are two components of the President's Opportunity, Growth and Security Initiative. The Initiative proposes an investment of \$140 million for Interior research and development as part of a government-wide effort to jumpstart growth spurred by scientific discovery. The Initiative also includes funding for investments to address climate resilience. This effort proposes funding for additional research to better understand and project the impacts of climate change to better prepare communities and infrastructure, and breakthrough technologies and resilient infrastructure to help the Nation become more prepared in the face of a changing climate.

Research and Development (dollars in thousands)
(b) (5)

The following examples are but a few of the many landscape-scale data sets, research, and tools supported by Interior.

The Geospatial Platform – The Geospatial Platform facilitates landscape-level planning by integrating data from Federal agencies and partners such as universities, private organizations, and tribal, State, and local governments. This data integration increases the applicability and value to identify potential land-use conflicts up front, saving time, resources, and litigation expenses, while allowing Interior to make better and timelier management decisions.

Landsat Data and Science Inform Resource Management and Climate Change Response – The USGS has 41 years of high resolution Landsat data that is used to document over time natural phenomena, such as drought and wildfire, and human activities, such as agriculture and urban development. The USGS uses Landsat data to examine land use and land cover change with significant benefits to land resource managers. In 2014 and 2015, USGS will release important new products providing scientific data coverage of the United States. Examples of these products include: an assessment and visualization tool that can be used to help guide the national biological carbon sequestration assessment; Landsat datasets to illustrate wildfire burned areas, surface water extent, and snow covered areas for monitoring current and predicting future drought and fire conditions; and the National Land Cover Database to provide modelers and researchers the ability to estimate potential impacts of land management decisions.

SPARROW-Informing Landscape Nutrient Management Decisions – The USGS SPARROW decision support system allows modelers and water resource managers to experiment with hypothetical scenarios and develop science-based estimates of the effects specific contaminant sources or changes may have on water quality across landscapes. This tool will be available over the Internet in a user friendly interface. The SPARROW model of the Mississippi River basin will be used to inform decisions related to hypoxia in the Gulf of Mexico. Over the next three years, USGS will initiate watershed studies to better understand nutrient transport and transformation and conduct regional stream-water quality studies to better inform models.

Three Dimensional Geologic Framework and Seismic Velocity Model – The Sacramento-San Joaquin River Delta is a critical locus of water resources and endangered/threatened species. The ecosystem and the water resources are strongly affected by an extensive set of levees enclosing artificial islands created for agricultural use. Over the next three years, a landscape-scale 3-D geologic map and 3-D seismic velocity model will be completed for the entire Sacramento-San Joaquin River Delta. This information will enable a broad range of stakeholders to make landscape decisions with better

information about possible impacts to water quality and quantity, earthquake hazards, the protection of lives and property, and the overall economic vitality of the region.

Department of the Interior Climate Science Centers Research Support Decisionmaking – The CSCs provide science and technical expertise to help improve understanding of climate impacts on fish, wildlife, and landscapes. The CSCs provide meaningful linkages between research and specific decisions that Tribes, Federal, State, and local agencies make at a landscape scale. The Northeast and Southeast CSCs have begun research to evaluate coastal flooding impacts to migratory water birds along the eastern seaboard while considering the complex needs of local landowners, jurisdictions, and resource managers. In 2015, the North Central and the South Central CSCs will work with stakeholders to develop regional drought impact scenarios, create a common understanding of likely futures in the region, and coordinate adaptation actions.

Applying Science and Analysis at the Landscape Level

A landscape level approach allows Interior bureaus and offices to work more efficiently and effectively together and with other resource managers. Sharing information at this scale promotes collaboration to evaluate resource conditions and trends, identify potential opportunities and conflicts associated with conservation and resource development goals, and use this information to better inform and guide policy and management decisions.

The Mitigation Secretarial Order – Secretarial Order No. 3330 establishes a Department-wide mitigation strategy that focuses on mitigation opportunities at the landscape level. The Order is part of a larger effort required by President Obama's May 17, 2013, memorandum for all Federal agencies to reduce by half the aggregate timelines for major infrastructure projects by modernizing Federal infrastructure review and permitting policies, promoting interagency coordination and planning, and enhancing both efficiency and predictability for project applicants.

Order No. 3330 is intended to encourage early integration of mitigation measures in project design and planning, a landscape-scale approach to conservation, transparency and consistency of mitigation measures, and recognition of the effects of climate change on the environment. The Order is aimed at increasing permit efficiencies and financial predictability for developers while improving state and Federal regulatory agencies' ability to plan for long term and large-scale conservation investments. The Order's emphasis on landscape-scale mitigation is intended to allow agencies to more efficiently target mitigation resources to support critical, existing conservation goals at the landscape scale, rather than identify and fund smaller mitigation projects on a piecemeal basis as has been done in the past.

The Mitigation Secretarial Order – Secretarial Order No. 3330 establishes a Department-wide mitigation strategy that focuses on mitigation opportunities at the landscape level. The Order is part of a larger effort required by President Obama’s May 17, 2013, memorandum for all Federal agencies to reduce by half the aggregate timelines for major infrastructure projects by modernizing Federal infrastructure review and permitting policies, promoting interagency coordination and planning, and enhancing both efficiency and predictability for project applicants.

Order No. 3330 is intended to encourage early integration of mitigation measures in project design and planning, a landscape-scale approach to conservation, transparency and consistency of mitigation measures, and recognition of the effects of climate change on the environment. The Order is aimed at increasing permit efficiencies and financial predictability for developers while improving state and Federal regulatory agencies’ ability to plan for long term and large-scale conservation investments. The Order’s emphasis on landscape-scale mitigation is intended to allow agencies to more efficiently target mitigation resources to support critical, existing conservation goals at the landscape scale, rather than identify and fund smaller mitigation projects on a piecemeal basis as has been done in the past.

Sage Grouse Landscape Planning Pilot – In support of the work of the Bureau of Land Management and the U.S. Fish and Wildlife Service to manage the sagebrush landscape, USGS in collaboration with partners recently completed a sage grouse National Research Strategy defining high priority science needs for landscape scale decisionmaking. Over the next few years, USGS will conduct a pilot project to use geospatial information on a landscape level to aid in the refinement of the interagency sage grouse strategy and will serve to assist FWS in making its upcoming listing decision.

Coastal Vulnerability – Decision makers require tools to forecast the vulnerability of coastal resources and communities to erosion and the increasing impacts of climate change and sea level rise. In 2014, USGS will document topography and bathymetry and analyze shoreline changes due to Hurricane Sandy that will inform future response and recovery actions. The USGS will also begin to model coastal change scenarios in 2014 and work to create a conservation plan in collaboration with FWS to use offshore sand deposits in the Gulf of Mexico as a source for replenishing the south island of the Chandeleur Islands as a way to decrease storm energy and enhance protection of coastal habitats.

Factors Affecting Water Quality and Wildlife in Priority Ecosystems – Improving our knowledge to facilitate planning and effective management of ecosystems is critical to the well-being of the Nation. Coastal and marsh ecosystems like the Everglades and the Chesapeake are nurseries for a diverse number of fisheries and support uses that are a

significant contributor to local economies. To understand the dynamics of these ecosystems and better predict the impacts of changes, Interior bureaus are implementing cross-agency strategies to pilot locally managed, public-private projects to restore ecosystem functions.

[Text Box]

Landscape Level Collaboration in the Chesapeake Bay

Interior has a key role in implementing the President's Chesapeake Bay Executive Order. The FWS and USGS are using landscape level science to investigate the relationships between habitats, water-quality conditions, and fish and wildlife in the Bay ecosystem in order to improve management regimes for habitat that is essential to sustain natural systems and local communities. The NPS and USGS are working with partners to expand a watershed-wide system approach for landscape and local level collaboration on resource conservation. In 2014, USGS will identify factors affecting the health of fisheries in the Bay watershed; analyze groundwater response to water-quality conditions and management practices; and investigate the natural processes affecting nutrients and implications for water-quality improvements. In 2015, USGS will implement and test a duck habitat model and the effects of toxic contaminants on fish-eating birds. The USGS will also analyze the combined effects of land and climate change on streamflow in the Bay watershed.

[End text box]

Global Warming Impacts on Key Natural Resources — Studies to collect data and understand the impacts of global climate change are funded by grants from Interior's regional CSCs and support President Obama's Climate Action Plan. The studies focus on how climate change will affect natural resources as well as management actions that may be taken to help mitigate such impacts. The research will help guide managers of parks, refuges and other cultural and natural resources to plan ways to better help species and ecosystems adapt to climate change.

Landscape Conservation Cooperatives — The LCCs integrate scientific data and knowledge about the implications of management actions to improve understanding of climate change and other landscape scale management challenges. The 22 LCCs bring together Federal, State, and local governments along with Tribes, non-governmental organizations, universities, and interested public and private organizations to share information and collaboratively identify adaptive landscape-scale strategies. For example, the five LCCs in Alaska are working to update Alaska's National Hydrography Dataset to meet the needs of managers and guide infrastructure development and protect fish and wildlife populations.

The FWS employs its Science Investment and Accountability Schedule, comprised of eight interrelated Conservation Activity Areas and associated benchmarks, to guide its support for individual LCCs. Using a strategic habitat conservation framework, SIAS facilitates an iterative process of adaptive management, including biological planning, conservation design, delivery of conservation actions, decision-based monitoring, and assumption-driven research.

National Park Service Inventory and Monitoring Program – The I&M Program provides NPS managers with a broad-based understanding of the status and trends of natural resources under their purview. The NPS inventories natural resources under its stewardship and integrates the results into planning and resource management decisions. Over the next three years, NPS will complete vegetation-mapping inventories across the United States. This will assist park managers in the control of invasive species, restoration of natural habitats, and efforts needed to sustain wildlife populations.
