The Los Angeles Times (6/29, Simon, 692K) adds that, according to Republicans, "the new bill would help lower fuel prices, create jobs, generate \$1.5 billion over 10 years for the US Treasury and enhance the nation's energy security." The "measure also would offer states 37.5% of the revenues from energy production off their coasts. That provision drew opposition from taxpayer watchdogs that said it would siphon off money the federal government needs."

Also reporting on the story are the Wall Street Journal (6/28, Tracy, Johnson, Subscription Publication, 2.29M), Bloomberg News (6/29, Gamer), FuelFix (6/28), and the Houston Chronicle (7/1, 434K).

BOEM REMAINS OPTIMISTIC OVER PROSPECTS OF ALASKAN DRILLING. Reuters (6/28, Rosen) reported that although Royal Dutch Shell spent a tumultuous 2012 in the Gulf of Alaska due to the forced cessation of its operations on a drillship, its receipt of safety and environmental citations on a separate rig, and equipment failures, along with a self-imposed moratorium on drilling there by ConocoPhillips, the BOEM remains optimistic that oil exploration will continue across north Alaskan waters. The agency has pointed to numerous exploratory efforts that are expected to take place there, the applications for many of which remain pending with the BOEM, as evidence that the companies plan to continue drilling once conditions are conducive to doing so.

US GOVERNMENT, BP REPORTS DIFFER ON TOTAL OIL BARRELS SPILLED DURING DEEPWATER HORIZON DISASTER. Forbes (6/28, Helman, 928K) reported on the disparity between the estimate of how much oil was spilled in the 2010 Deepwater Horizon accident that the US government has reported and that which BP has stated. The government believes 4.9 million barrels of oil were spilled in the explosion. However, a study done by a British engineer hired by BP suggested that 3.3 million barrels of oil were spilled. The actual tally of total barrels spilled is set to be "a huge factor" in determining how much BP will actually owe for Clean Water Act penalties in its ongoing trial in US District Court. BP may be paying \$17.6 billion if the government's tally is accurate, but if the engineer's estimate is right, that amount could be closer to \$9 billion.

Tackling America's Water Challenges:

PUBLIC REVIEW PERIOD BEGINS FOR SHASTA LAKE PROJECT. The Chico (CA) Enterprise-Record (6/30, 30K) reports that the 90-day public review period for the draft environmental impact statement concerning the Shasta Lake Water Resources Investigation has begun. The BOR says that the purpose of "the project is to increase fish populations, increase water supply and water reliability."

PROPRIETORS: CONGRESS MUST ACT TO PRESERVE 'LIFEBLOOD OF THE SOUTHWEST'. In an op-ed in the Arizona Republic (6/28, Thevenin, 308K) Alex and Fred Thevenin, owners of Arizona Raft Adventures, which is a member of Protect the Flows, a business coalition that supports the Colorado River, called on Congress and Federal agencies to take their lead from the BOR's Colorado River Basin Supply and Demand Study and "build a future that includes healthy rivers, state-of-the-art water conservation for cities and agriculture, and water reuse and sharing mechanisms that allow communities to grow, prosper and adapt to water demands and availability." Because the river "supplies drinking water for 36 million people, irrigates 4 million acres and 15 percent of our nation's crops, and drives nearly a quarter million sustainable, American jobs...effective programs like the BOR's WaterSMART and Title XVI Water Reclamation and Reuse programs" must continue. There is too much at stake not to take measures to preserve the "lifeflood of the southwest."

Empowering Native American Communities:

WASHBURN'S DRAFT PROPOSAL LAUDED BY INDIAN GROUPS. The Indian Country Today Media Network (6/28, Toensing) reported that DOI Assistant Secretary for Indian Affairs Kevin Washburn's draft of proposed changes to the department's process for Federally recognizing Indian groups "is being hailed as the best thing to happen in decades to a system that's been described as 'broken, long, expensive, burdensome, intrusive, unfair, arbitrary and capricious, less than transparent, unpredictable, and subject to undue political influence and manipulation.'" Although those who have seen the draft admit that there is much work to be done, it is being lauded as a measure that "provides hope to the many tribes...whose Federal acknowledgments were undone by political influence, presidential and congressional shifts and simple neglect by uncaring administrations."

Also reporting on the story are the Juneau (AK) Empire (6/28, 4K), the New London (CT) Day (6/30, 28K), and the

Westerly (RI) Sun (7/1, 9K).

WASHBURN TO TOUR PROPOSED ROAD SITE IN KING COVE. The Dutch Harbor (AK) Fisherman (6/28, Restino, 1K) reported that following efforts by King Cove residents to convince former DOI Secretary Ken Salazar and Sens. Lisa Murkowski (R-AK) and Mark Begich (D-AK) of the need for a road through the Izembek National Wildlife Refuge, DOI Assistant Secretary Kevin Washburn will visit King Cove to tour the area first-hand. While criticism of the project has centered around the threat of damage to the refuge and wildlife in the area, along with the estimated \$33 million it will cost taxpayers, the community said the trip will offer Washburn a chance "to fully appreciate the challenges its residents face because of the lack of road." "It is crucial that the Department of the Interior take the human factor into consideration, which it has not done up until now," said Della Trumble, spokesperson for the Agdaagux Tribal Council and the King Cove (Native) Corporation.

STUDY PRESENTS MAIN INFLUENCES ON INDIAN EDUCATION. The Indian Country Today Media Network (6/28) reported that a new study conducted by Hollie J. Mackey, University of Oklahoma assistant professor of education, and Linda Sue Wamer, special assistant to the president on Indian affairs at Northeastern A&M College in Miami, Oklahoma has identified which "organizations, universities and people influence American Indian/Alaska Native education the most." The study found that The Kennedy Report of 1968 and the Merriam Report of 1928 continue to be the most influential aspects of Indian education, which appears to suggest "that similar problems remain identified and unsolved." Moreover, the study said that it was "interesting to note that neither the Department of Education's Office of Indian Education Programs or the Bureau of Indian Education...were included in participants' responses as influential organizations."

OMDAHL: CHANGES MUST BE MADE TO ICWA. In an op-ed posted in Bismarck (ND) Tribune (6/30, Omdahl), former North Dakota Lieutenant Governor Lloyd Omdahl criticizes the effects that the enforcement of the Indian Child Welfare Act has had on Native American children of the Spirit Lake Reservation. Although the BIA controls the tribe's child protection program, Omdahl notes that "tragic incidents continue to unfold, most recently the deaths of several children." Moreover, while the law was designed to prevent "cultural genocide" by keeping Indian children in Native American homes, the ICWA "was improperly named because it was not a law for children's welfare at all" as children are being placed in "unsuitable homes" and in some instances are being used as "cash cows" where financial incentives to adopting the child are involved. Omdahl demands that changes be made to the law "so that the emphasis of care can be shifted back to the children," even if that means placement outside of Native American homes.

Top National News:

OBAMA: US AID TO AFRICA IS EVOLVING INTO A "PARTNERSHIP." President Obama's trip to Africa was covered by all three network newscasts Sunday, but, in general, the trip has not been generating a great deal of coverage. Last night and this morning, many reports focus on the First Family's trip to Robben Island, where Nelson Mandela was held captive, rather than the subsequent speech delivered by the President at the University of Cape Town in which he described a shift in US assistance to African nations from traditional "foreign aid" to public/private partnerships. This morning's Washington Post (7/1, Raghavan, Nakamura, 489K), meanwhile, has an article in which it is reported that "many Africans wish Obama was more like" president George W. Bush "in his social and health policies, particularly in the fight against HIV/AIDS."

On ABC World News (6/30, story 4, 2:40, Muir, 7.43M), David Muir reported that the President "paid an emotional visit to Robben Island, the prison where Nelson Mandela spent most of his 27 years behind bars," and "spent a few moments alone in that tiny prison cell." Muir noted that the President said he is "humbled by those who 'faced down injustice and refused to yield.'" Correspondent Jonathan Karl went on to report that as Mandela "clings to life," the President "has spoken of him at every stop." President Obama: "Nelson Mandela showed us that one man's courage can move the world. And he calls on us to make choices that reflect not our fears, but our hopes." Karl added that the President "receive[d] a warm welcome from" Bishop Desmond Tutu, "another aging hero of the anti-apartheid movement." The AP (7/1) notes that the President visited Tutu at the Desmond Tutu HIV Foundation Youth Centre.

NBC Nightly News (6/30, story 5, 2:05, Holt, 7.86M), in its segment on the President in South Africa, also emphasized the visit to Robben Island, but briefly mentioned the President's speech at the University of

Capetown, and showed him echoing Robert Kennedy's 1966 speech in the same location, saying, "Each time a man stands up for an idea or acts to improve the thought of others or strikes out against injustice." Chuck Todd also reported that on Monday in Tanzania, the President and First Lady are expected to appear with former president George W. Bush and Laura Bush, who will be there "to open up a women's clinic on Tuesday."

White House correspondent Major Garrett, on the CBS Evening News (6/30, story 4, 2:00, Glor, 5.58M), said that in 1966, the US "mostly sent cash and food to Africa," but the President is "under pressure to counter investments from China, Brazil and India – and, as such, announced a \$16 billion program to bring electricity to 80% of the continent." USA Today (7/1, Cassim, Today, 1.71M) reports that the President has "outlined a U.S. policy toward Africa that focuses on increasing the region's ability to support itself."

The New York Times (7/1, A4, Shear, Subscription Publication, 1.68M), in a piece focused on the President's visit to Robben Island, says that afterwards, at the University of Cape Town, the President described Mandela as "the ultimate testament to the process of peaceful change." The Times notes that the President also "announced" that the Administration is "creating American programs to help" African nations "develop more sustainable food programs, better health care networks and more reliable power grids." In particular, according to the Times, the President said the US will "invest \$9 billion to help double the access to reliable electricity in sub-Saharan Africa."

The Hill (7/1, Geman, 21K) reports that on Sunday, the President said, "America has been involved in Africa for decades, but we are moving beyond the simple provision of assistance – foreign aid – to a new model of partnership between America and Africa, a partnership of equals that focuses on your capacity to solve problems and your capacity to grow."

McClatchy (7/1, Kumar), under the headline, "Obama To Africa: You Need To Do More," reports that the President "cautioned" that in Africa, "much needs to be done to eradicate poverty, shed corruption and eliminate conflict." McClatchy says the President went on to say that the US "would do its part, not by offering a handout, but by partnering with African governments and private companies." According to McClatchy, the partnership "come[s] in the form of a new \$7 billion program to double access to electricity" as well as "continu[e] efforts to produce new food technologies and reduce illnesses including AIDS and HIV." The President is quoted as saying, "We are moving beyond the simple provision of assistance, foreign aid, to a new model of partnership." McClatchy says the \$7 billion will be provided by USAID, the Overseas Private Investment Corporation, and the Export-Import Bank. According to The Hill (7/1, Geman, 21K), \$5 billion of the \$7 billion will come from the Ex-Im Bank.

The Wall Street Journal (6/30, Nelson, Vogt, Hinshaw, Senegal, Subscription Publication, 2.29M), in an article titled, "Obama Promises Africa A New Partnership," reports that the partnership envisioned by the President, Power Africa, will be funded with \$9 billion from unspecified private sector entities as well as the \$7 billion from the US government. The Journal quotes deputy national security adviser Ben Rhodes as saying, "If we're going to get investment from international development banks, from private sector partners, they need to have the predictability that comes with the rule of law and governance." For his part, in his speech on Sunday, the President said, "I'm calling for America to up our game when it comes to Africa." According to the AP (6/30, Pickler, Pace), General Electric and Symbion Power are among those corporations partnering with Power Africa. The AP also notes that the commitments announced by the White House "fall well short of the \$300 billion" that the IEA has said "would be required to achieve universal electricity access in sub-Saharan Africa by 2030."

Mike Pflanz, in a piece for the Christian Science Monitor (6/30, Pflanz, 47K), said the President intended to "signal a shift in US policy that would leave the world's poorest continent less 'a dependent' or 'a charity case' and more 'a partner.'" Pflanz adds that "in these times of austerity," the President's "new approach to foreign aid – 'the least popular part of the federal budget,' Obama concedes – is also cheaper." Pflanz adds that on Monday in Dar es Salaam, Tanzania, "at a round-table for local CEOs," the President "will talk trade, and add details of the new electricity access initiative at a visit to a power station."

The Washington Times (7/1, Boyer, 76K) reports that throughout his trip to Africa, the President has also "been warning Africans not to automatically trust foreign powers offering help, including the U.S." In Johannesburg, the President said, "When we look at what other countries are doing in Africa, I think our only advice is make sure it's a good deal for Africa. ... Don't just assume that folks come here and they're automatically benefiting Africans"

– and that includes the United States.” On the other hand, the AP (6/30, Pickler, Pace) reports that the President “dismissed the notion that the U.S. sought to meddle in Africa’s affairs.”

Aislinn Laing, in a piece for the Christian Science Monitor (6/30, Laing, 47K), says the President “was unable to make the trip to Africa earlier in his term when his star was at its highest,” and while “he is welcome still...for many Africans the realities of his time in high office has taken the shine off.” According to Laing, “some commentators” contend that the President “has done far less for Africa than” former president Clinton, “who won friends all over the continent by scrapping trade tariffs for its goods.”

Obama Takes Aim At Political Corruption. AFP (7/1) calls the President’s Cape Town speech a “strident call for democratic change and good governance,” and notes that “in a line that drew loud and prolonged cheers from his audience,” the President said, “History shows us that progress is only possible where governments exist to serve their people and not the other way around.” AFP says “judging by the rousing reception,” the President’s message “spoke to the frustrations felt by many in the room” about the “largess” of the administration of South African president Jacob Zuma, which range from “expensive security upgrade to his private home to irregularities in the granting of deals to do business with the state.” AFP also reports that the President “condemned” Zimbabwean president Robert Mugabe, whose “promise of liberation gave way to the corruption of power and the collapse of the economy,” according to the President.

The AP (7/1) reports that on Sunday at the University of Cape Town, the President, “citing Muslim nations like Mali and Somalia,” warned that “too often terrorism perverts the meaning of Islam,” and maintained that the US “military presence in Africa is focused on putting muscle behind African efforts.”

However, Reuters (7/1, Mason, Felsenthal) reports that the President’s foreign policy has drawn criticism while he has been in Africa, and outside his Speech Sunday, protesters held signs saying, “Obama mass killer” and “End drone wars now.”

“Many Africans,” Activists Critical Of Obama’s Handling Of PEPFAR. The Washington Post (7/1, Raghavan, Nakamura, 489K), in an article titled, “Bush AIDS Policies Shadow Obama In Africa,” reports from Cape Town that “many Africans wish Obama was more like” president George W. Bush “in the fight against HIV/AIDS.” Bush “poured billions of dollars into” a campaign against HIV/AIDS in Africa, and “for Obama, the success of Bush’s program has proved a tad awkward,” as “AIDS advocates” claim that “Obama administration budget cuts...threaten to turn back years of progress.” Since 2010, PEPFAR funding “has fallen 12 percent” and is now “at its lowest funding level since 2007.” The Post goes on to report that on Sunday, the President “hinted at [his] frustration” regarding the comparisons to Bush, saying, “Given the budget constraints, for us to try to get the kind of money that President Bush was able to get out of the Republican House for massively scaled new foreign aid program is very difficult.”

Mandela Heirs In Dispute Over His Burial Place. The Los Angeles Times (6/30, Dixon, 692K) reports that Nelson Mandela reportedly wants to be “buried next to his children,” three of whom have predeceased him, and now a “family dispute over the burial site” has “deepened” after Mandla Mandela, described as Nelson Mandela’s “controversial grandson” and “chief of the Mvezo area in the Eastern Cape Province,” moved the bodies of the three Mandela children to Mvezo, “where Nelson Mandela was born.”

SCHUMER: BOEHNER WILL IGNORE HASTERT RULE TO PASS IMMIGRATION REFORM. Appearing on Fox News Sunday (6/30), Sen. Chuck Schumer predicted that the House will “pass the Senate bill by the end of this year even though most House members don’t think so.” Schumer said he is confident that House will eventually approve the Senate bill due to pressure from unspecified members of “the national Republican leadership.” Schumer went on to contend that, “within several months,” Speaker Boehner “will find two choices: no bill, or let a bill pass with a majority of Democratic votes and some Chamber of Commerce-type Republicans – and he’ll find that the better choice.” Schumer added, “Three times in the last six months, Speaker Boehner has violated the so-called ‘Hastert Rule’” and the “dynamics” of the immigration debate will “force him to abandon that Hastert Rule” once again.

Despite Shumer’s prediction, on Friday, the New York Times, and many other outlets, reported that Boehner has explicitly ruled out the scenario sketched by Schumer. According to the Times, last Thursday, Boehner “insisted” that he will not allow a vote on an immigration reform bill that is not “supported by a majority of his Republican

conference.”

On CBS's Face The Nation (6/30), the Washington Post's Michel Gerson, who served as a senior adviser to President George W. Bush, commented that “68 votes in the Senate is a good start for immigration reform, but there were some warning signs there as well.” Gerson noted that “two-thirds of Republican senators voted against the immigration reform” last week, which is “actually higher than it was last time around when they voted on comprehensive reform.” However, like Schumer, Gerson added “there is a path here to make this happen, but it's going to require, eventually, Speaker Boehner to pass this with majority Democratic support in the House.” Gerson called such a potential move “a huge risk to [Boehner's] speakership.”

Appearing on Fox News Sunday (6/30), Rep. Trey Gowdy (R-SC) described himself as a supporter of “immigration reform,” but said that in regards to Schumer, “we're not going to take his advice.” Gowdy quipped, “I was moved almost to the point of tears by Sen. Schumer's concerns for the future prospects of the Republican Party.” Gowdy said House Republicans are already “making progress” on immigration reform, and noted that they have “passed four separate bills out of [the] House Judiciary [Committee] and an additional bill out of” the House Homeland Security Committee tied to immigration. Referring to the Senate bill, Gowdy said, “I cannot sell, in South Carolina, a border security plan where the security comes after the legalization” nor one “where [DHS Secretary] Janet Napolitano gets to tell us the border is secure.”

Also on Fox News Sunday (6/30), Sen. John McCain claimed that “it's a fact that the overwhelming majority of people in America support” the Senate immigration reform package “once it's explained to them,” and “Republicans realize the implications of the future of the Republican Party...if we don't get this issue behind us.”

House minority leader Nancy Pelosi, in an interview shown on NBC's Meet The Press (6/30), said, “I'm very optimistic that we will – before too long and certainly this year – have comprehensive immigration reform.” Pelosi went on to praise the “courage of those on the Republican side, especially, who made the tough vote,” and added that expects that as for the House, Speaker Boehner “will have his way to bring legislation to the floor and hopefully it will be in a form that takes it to conference.” Pelosi added that “we wouldn't even be where we are right now had it not been that 70% of Hispanics voted for President Obama, voted Democratic in the last election,” and predicted that a sufficient number of House Republicans “– many more than are directly affected themselves by the number of Hispanics in their district – will do what is right...and it's certainly right for the Republicans if they ever wanna win a presidential race.”

Goodlatte Prefers “Pathway To Legalization” Rather Than “Pathway To Citizenship.” Asked, on CNN's State of the Union (6/30), if “comprehensive” immigration reform is “dead in the House,” Rep. Bob Goodlatte (R-VA), the chairman of the House Judiciary Committee, said, “I don't think so; we're taking a step-by-step approach to immigration reform, but we want to solve all three major problems with immigration reform.” Goodlatte said the three “major problems” are the current system's perceived drag on economic growth, the need for existing immigration laws to be “actually enforced,” and the lack of “appropriate legal status for people who are not here lawfully.” Goodlatte also said the House is unlikely to approve any immigration bill including a “pathway to citizenship,” but might back a “pathway to legalization” because House Republicans do not want to “people who are here unlawfully get something that people who have worked for decades to immigrate lawfully do not have.”

The AP (7/1, Elliott) reports that Goodlatte said the House “cannot offer a ‘special pathway to citizenship’ for those in the United States illegally.” The Wall Street Journal (7/1, Dooren, 2.29M) reports that on Sunday, several House Republicans stressed that they do not intend to take up the Senate bill.

Appearing alongside Goodlatte on CNN's State of the Union (6/30), Rep. Luis Gutierrez (D-IL), a member of the House's so-called “Gang of Seven” at work on a bipartisan immigration plan, said, “What the House Republicans are doing is giving a Republican solution, and a Republican solution isn't what we saw was successful in the Senate.”

In an appearance on ABC's This Week (6/30), the Wall Street Journal's Peggy Noonan argued that the “essential problem with this [Senate] immigration bill is that Americans have a problem trusting Congress with anything called ‘comprehensive.’” Noonan added, “I can imagine the Republicans in the House now starting to tease out good parts of the bill that everybody can agree on and saying, ‘let's vote on that.’”

Gowdy And Gutierrez's "Newfound Camraderie" Noted. Gannett News Service (6/30, Troyan) reports that the "newfound camaraderie" between Gowdy and Gutierrez, a liberal Latino, "could help seal the deal on a sweeping immigration overhaul this year." Their friendship "may offer the U.S. House its best chance to find agreement on how to secure the border, overhaul procedures for legal immigration and deal with the 11 million people in the country illegally."

Bush, Bolick: House Should Pass Senate Bill. In an op-ed for the Wall Street Journal (7/1, Bush, Bolick, Subscription Publication, 2.29M), former Florida Gov. Jeb Bush and Clint Bolick, the vice president for litigation at the Goldwater Institute, write that while the Senate immigration bill could be improved, it would, according to the CBO, reduce the deficit and help the economy.

ANALYSIS: HIGH COURT MOVING TO THE RIGHT. USA Today (6/30, Wolf, 1.71M) cites recent Supreme Court decisions as evidence that under Chief Justice Roberts the court is moving to the right. While the court's ruling on the Defense of Marriage Act "was in many ways the ideological opposite of the voting rights ruling," what tied it to the decision on the Voting Rights Act "was a deference to states' rights — but not to Congress." USA Today notes that Roberts has "kept the court on its even keel, inching it to the right without appearing to do so — at least not to the general public." According to polls, "liberals are slightly more satisfied with the court's actions than conservatives."

Barnes: Ginsburg, Thomas Provided Only Debate On Race In Affirmative Action Case. In his column for the Washington Post (7/1, Barnes, 489K), Robert Barnes writes that the only real debate over the issue of race in last week's Supreme Court decision on affirmative action "came from [Justice Ruth Bader] Ginsburg, the only justice willing to say that UT's policy passed muster, and Justice Clarence Thomas, the only one who wrote to say that the university's use of race is categorically prohibited by the Constitution." In her dissent, Ginsburg "said that racial considerations should be allowed, and that the use should be freely acknowledged." In his concurring opinion, Thomas argued that affirmative action "is simply another form of racial discrimination and that it imposes a 'stigma' on those who benefit from it." Barnes added that the High Court's direction for courts "to rigorously examine universities' race-conscious plans should spawn additional challenges."

Editorial Wrap-Up:

NEW YORK TIMES. "Stuck In Purgatory." The New York Times (7/1, Subscription Publication, 1.68M), in an editorial, says "one of the most formidable obstacles" delaying President Obama's "regulatory agenda" is his own Administration's "resistance to finalizing new rules, even when it has expressed support for the causes those rules would address." The Times adds that in 2012, as the President was seeking reelection, and Republicans "hammered the administration for its allegedly 'job killing' regulations, the number of rules receiving final approval hit a historic low," and now, according to the Times, "even though Mr. Obama won, delays persist." The Times goes on to say that the White House is either "still driven by election-year motives," or, "worse, its commitment to new rules is suspect."

"Secretary Kerry's Quest." An editorial in the New York Times (7/1, Subscription Publication, 1.68M) notes a "sense of fatalism in Washington about Secretary of State John Kerry's quest to revive Israeli-Palestinian peace talks." The Times argues that many experts believe "the conditions for peace don't exist and are unlikely to exist anytime soon," and adds that "there may come a point when Mr. Kerry and President Obama will have to decide whether it continues to make sense to invest this level of energy in this project indefinitely without a commensurate commitment by Israel and the Palestinians."

WASHINGTON POST. "Farewell, Fannie And Freddie?" An editorial in the Washington Post (7/1, 489K), praises new housing finance reform legislation from Sens. Mark Warner and Bob Corker, noting, that such reform is needed and it is "good that someone's willing to try." The Post argues that as Fannie and Freddie are beginning to produce profits, the time to start "unwinding and replacing" them "is now — before Congress develops an irreversible dependence on this deceptively easy source of cash," and calls the Warner, Corker bill "a serious proposal for a serious issue."

"A Boost For Government Workers." In an editorial, the Washington Post (7/1, 489K) calls the President's

decision to suspend the Presidential Rank Award program, which provides a salary bonus to certain Federal executives, "pound foolish." The Post cites a report from the Partnership for Public Service which found that "only four out of 10 federal employees believe they will be rewarded or promoted for doing good work," and notes that this sort of "low morale" will "will cost the government in the long run": as good people "leave or decide not to come in the first place." The Post adds that the Administration should "defend, reward and recognize federal employees who every day tackle our most complex problems."

"D.C.'s Wise Surplus Investments." An editorial in the Washington Post (7/1, 489K) praises a decision by D.C. Mayor Vincent Gray to use the city's revenue surplus "to address some of the deficiencies in a program that provides child-care subsidies to the working poor." The Post also praises the D.C. Council for approving that use the funds as well as its decision to use some of the "swelling revenue for tax relief." In addition, the Post praises a council decision not to spend the funds on a proposal "to adjust the per-pupil spending formula in public schools" until more analysis can be conducted.

WALL STREET JOURNAL. "Egypt Erupts Again." An editorial in the Wall Street Journal (7/1, Subscription Publication, 2.29M) says that a threat of further violence against Egyptian protesters by the Muslim Brotherhood is an attempt to hide its weakness. The Journal adds that if the protests become more violent and Egypt's economy continues to decline, another coup is possible and argues for a compromise under which Morsi and the Brotherhood share power with their opponents, draft a new, more liberal constitution, and make efforts to revive Egypt's economy.

"China's Reform Movement." In an editorial, The Wall Street Journal (7/1, Subscription Publication, 2.29M) argues that China's old economic model is breaking down and Beijing must implement bold reforms that include the privatization of state enterprises and ending the monopolies under which many of those enterprises operate. The greatest hindrance to implementing such reforms, the Journal says, will be politics because the reforms will require less political control.

"Tax Reform From Scratch." An editorial in the Wall Street Journal (7/1, Subscription Publication, 2.29M) praises an announcement from Sens. Max Baucus and Omin Hatch that they intend to rewrite the tax code from scratch and that backers of every tax preference will be required to justify its continued existence. The Journal notes that because the President is demanding another tax increase, tax reform is unlikely, but Baucus and Hatch should be credited for trying in the absence of presidential leadership.

Washington Schedule:**TODAYS EVENTS IN WASHINGTON.**

White House:

PRESIDENT OBAMA —Departs Cape Town with the First Family, Cape Town International Airport, open press; arrives with the First Family, Dar Es Salaam, Tanzania, Julius Nyerere International Airport, open press; participates with the First Lady in an official arrival ceremony, State House, Dar Es Salaam, Tanzania, pool coverage; holds a restricted bilateral meeting with President Kikwete, State House, Dar Es Salaam, Tanzania, closed press; holds an expanded bilateral meeting with President Kikwete, State House, Dar Es Salaam, Tanzania, travel pool spray at the top; holds a press conference with President Kikwete, State House, Dar Es Salaam, Tanzania, open press; participates in a tree planting ceremony with President Kikwete, State House, Dar Es Salaam, Tanzania, pool coverage; takes part in a CEO Roundtable, Hyatt Kilimanjaro, Dar Es Salaam, Tanzania, pool spray at the top; delivers remarks at a Business Forum, Hyatt Kilimanjaro, Dar Es Salaam, Tanzania, pool coverage; attends an official dinner with President Kikwete along with the First Lady, State House, Dar Es Salaam, Tanzania, pool spray of toasts.

VICE PRESIDENT BIDEN —No Public Events Scheduled.

US Senate: No Scheduled Events

US House: No Scheduled Events

Other: NATIONAL CHARTER SCHOOLS CONFERENCE — June 30 – July 3. National Alliance for Public Charter

Schools National Charter Schools Conference. Location: Washington Convention Center, 801 Mt. Vernon Pl. NW, 3rd Floor/Ballrooms A, B and C.

BROOKINGS WEBCAST – SHELBY COUNTY V. HOLDER — 10 a.m. – 4 p.m. The Governance Studies program at Brookings will host a live webcast featuring scholars of the Voting Rights Act, the parties in the case, Shelby County v. Holder, experts on Congress, representatives from the civil rights community, and members of the media for a series of discussions on the Supreme Courts ruling, its impact on voting rights and election administration, and prospects for future legislative action.

CHINA DEVELOPMENT — 8 a.m. – 11:45 a.m. The Economic Strategy Institute hosts the China Financial Centre Development Summit. Opening remarks: Clyde Prestowitz, President, Economic Strategy Institute; Feng Yueqiu, Director China Development Institute. Panel discussion with: Clyde Prestowitz, President, Economic Strategy Institute. Speakers: Dr. Guo Wanda, Executive Vice President, CDI, The Prospect of RMB Internationalization; Zhou Guoyou, Director, Issuer Marketing, Department of Shenzhen Stock Exchange Development of Chinas Capital Market. Panel discussion with: John Prout, Former Treasurer – Credit Commercial de France (Paris). Speakers: Dr. Zhang Jiansen, Director, Center for Financial Studies, China Development Institute, Innovation of Financial System & Development of China Financial Centre; Joseph Gagnon, Senior Fellow, Peterson Institute for International Economics. Location: Cosmos Club, 2121 Massachusetts Ave. NW.

KIDS AGAINST HUNGER EVENT — 9 a.m. – 4 p.m. Kids Against Hunger., a humanitarian food-aid organization whose goal is to end world hunger by providing nutritious food to hungry children and families in the United States and around the world, and Events DC kick off the DC Million Meal Pack. Events DC President & CEO Gregory A. Odell and Kids Against Hunger Executive Director/Chief Operating Officer Ron Osterbauer will launch the two-day DC Million Meal Pack with a ribbon cutting and VIP meal packaging, and will be available for photos and interviews. Location: Walter E. Washington Convention Center – Hall A, 801 Mount Vernon Place NW.

PREVENTING HEAT-RELATED DEATHS, ILLNESSES — 10:30 a.m. – 11 a.m. With the peak of summer heat beginning, the U.S. Department of Labors Occupational Safety and Health Administration and NOAAs National Weather Service will hold a teleconference exclusively for broadcast meteorologists and weather reporters to discuss the danger of heat to workers and provide life-saving information to share with outdoor workers in their communities. With Dr. David Michaels, assistant secretary of labor for occupational safety and health; Dr. Louis Uccellini, director, NOAAs National Weather Service. Maureen OLeary Notes: Dial-in: 888-790-2055, Passcode: HEAT.

RAINFOREST PROTEST — 12 p.m. Two salmon and two bear mascots flanked by Alaska Wilderness League staff will rally outside of the U.S. Department of Agriculture Building to call for protections for the very large old-growth trees that remain in the Tongass National Forest — Americas rainforest. Location: Between 14th and 15th Streets SW along Jefferson Drive.

Last Laughs:

LATE NIGHT POLITICAL HUMOR.

Jay Leno: "Well, the big news is the Senate passed an immigration bill. The bill got 68 si, 32 nadas. Yeah. And now it goes to the House. I mean, la casa."

Jay Leno: "Another IRS official took the fifth this week after news reports came out they found that IRS credit cards were being used to buy alcohol and pomography. Finally, a government agency that isn't wasting our money, huh? At least I can see the benefits."

Sally -

DOI will be issuing the below press release this afternoon shortly after 1pm EDT in conjunction with USDA to outline the highlights from the *2013 State of the Birds Report on Private Lands Report*.

You have a quote in the release which I've pulled here for your awareness:

"Our nation's most effective conservation efforts are partnerships in which federal, state and local governments work hand-in-hand with private landowners and other stakeholders," said Secretary Jewell. "The programs highlighted in this report help build these voluntary partnerships to conserve the vital habitat of our many bird species. Many of these partnerships provide direct benefits to people such as improving water quality and supporting jobs and economic growth."

DOI and USDA Highlight Successes of Protecting Bird Habitat on Private Lands

WASHINGTON, D.C. – U.S. Department of the Interior Secretary Sally Jewell and U.S. Department of Agriculture Secretary Tom Vilsack today announced the release of the *2013 State of the Birds Report on Private Lands*. A collaborative effort as part of the U.S. North American Bird Conservation Initiative, involving federal and state wildlife agencies and scientific and conservation organizations, the report shows how private land conservation incentives positively impact bird habitat.

"Our nation's most effective conservation efforts are partnerships in which federal, state and local governments work hand-in-hand with private landowners and other stakeholders," said Secretary Jewell. "The programs highlighted in this report help build these voluntary partnerships to conserve the vital habitat of our many bird species. Many of these partnerships provide direct benefits to people such as improving water quality and supporting jobs and economic growth."

Individuals, families, organizations and corporations, including two million ranchers and farmers and about 10 million woodland owners own and manage 1.43 billion acres, roughly 60 percent of the land area of the United States. Private lands are used by virtually all of the terrestrial and coastal birds of the United States, 251 of which are federally threatened, endangered or of conservation concern. Many privately owned working lands that produce a bounty of food, timber, and other resources for society also provide valuable habitat for birds.

"Sixty percent of U.S. land is in private hands, making the efforts of farmers, ranchers and landowners critical when it comes to creating, restoring and protecting bird habitat," Secretary Vilsack said. "Today's report highlights the positive impact of voluntary conservation measures for birds, including those made possible by Farm Bill programs. The need for a long-term commitment to conservation is just one more good reason why we need Congressional passage of a multi-year Food, Farm and Jobs Bill as soon as possible."

The State of the Bird Report on Private Lands shows that private lands have critical conservation value, and that

landowners and managers can measure their yield not only in bushels and head and cords, but also in bluebirds, hawks and canvasbacks.

The success stories highlighted in this report demonstrate that these voluntary efforts on private lands are resulting in meaningful bird conservation results:

- **Conservation Reserve Program (CRP):** Henslow's Sparrow populations, which have declined more than 95 percent since the mid-1960s, have rebounded in areas through CRP. In Illinois, regional Henslow's Sparrow spring bird counts are now about 25 times greater than 30 years ago, prior to CRP. The Illinois counties with the highest percentage of CRP acreage also have the highest Henslow's Sparrow population gains. A recent study in the Dakotas suggested that if CRP acres were put back into annual crop production, populations of several species of grassland birds (including Sedge Wren, Grasshopper Sparrow, Bobolink and Western Meadowlark) would experience significant population declines, ranging up to 56 percent.
- **Wetlands Reserve Program (WRP):** The Wetland Reserve Program has restored 2.6 million acres of private wetlands across the nation. WRP-conserved wetlands provide essential breeding habitat for waterbirds such as Wood Duck and Hooded Merganser, wintering habitat for 3.5 to 4.5 million waterfowl every winter; and migratory stopover habitat for shorebirds such as Black-necked Stilt and Greater Yellowlegs.
- **Natural Resources Conservation Service Landscape Conservation Initiatives:** The Sage Grouse Initiative has targeted Farm Bill conservation funding to enroll more than 700 ranchers and implement sustainable grazing systems that improve habitat on more than 2 million acres in 11 western states. The Migratory Bird Habitat Initiative, delivered through various Farm Bill conservation programs, is providing inland habitats for migratory waterbirds on more than 470,000 acres of private lands in eight states from Florida and Georgia to Texas and Missouri.
- **Chippewa Flowage Forest Conservation Easement:** This Forest Legacy project—a partnership of the Forest Legacy Program, Wisconsin Bureau of Forest Management and Trust for Public Land—created an 18,000 acre conservation easement of forest, wetlands, and exceptional wildlife habitat especially important for forest birds like Wood Thrush, Rose-breasted Grosbeak, and Black-throated Green warbler, and water birds like the Bald Eagle, Osprey and Common Loon.
- **Machias River Project:** This project in Maine is a good example of conservation easements protecting the futures of both birds and working forests. This Forest Legacy project—a partnership of the Forest Legacy Program, Maine Bureau of Parks and Lands, The Nature Conservancy Maine Chapter, and others—protected 60,000 acres through fee purchase and easements. These acres connect to over 340,000 acres of other protected lands, creating a mega block of contiguous habitat for 28 bird species of conservation concern.
- **Foresters for the Birds:** Helping Landowners Integrate Timber and Forest Bird Habitat Management, this project, with financial support from the USDA Forest Service, is a partnership between the Vermont Department of Forests, Parks and Recreation and Audubon Vermont. Audubon biologists and over 100 foresters in Vermont and the surrounding region have begun working together to help landowners integrate timber and songbird habitat management.

TODAY'S TABLE OF CONTENTS

DOI IN THE NEWS:

- + Washington Monument Illuminated.
- + Procession Brings Remains Of 19 Firefighters To Prescott, Arizona.
- + Court Rejects Challenge To Public Land Designation In Alaska.
- + Interior Moves Data To Cloud.
- + Additional Coverage Of Decision To Rescind White River's Blueway Designation.
- + Thoming's Mixed Review Of Obama Climate Change Initiative.
- + Owens Chastises Obama Climate Change Plan.
- + Freeman: Obama Climate Change Strategy "Could Have Been Bolder."

AMERICA'S GREAT OUTDOORS:

National Park Service:

- + Airplane That Went Missing In 2012 Found In Yosemite National Park.
- + House Committee To Hold Hearing On Merced River Plan.
- + NPS Consolidating Ferries At Cape Lookout National Seashore.
- + NPS Reopens Fort Pickens.
- + Herring Cove Beach Bathhouse Set To Open Thursday.
- + Savannah Museum Denies Entry Because Of Wheelchair.
- + Central Kansas Properties Added To National Register Of Historic Places.
- + Canadian Climber Injured Descending Mount Rainier.
- + Boy Drowns In Delaware River.
- + Additional Coverage Of Gettysburg.
- + Additional Coverage Of Manhattan Project National Historical Park.
- + Public Urged To See Statue Of Liberty.

Bureau of Land Management:

- + BLM To Restrict Area To ORV Use To Protect Rare Plant.
- + BLM To Host Fire Rehab Tour.
- + BLM To Close Towell Falls At Escure Ranch.
- + BLM Seeks Public Input On Glass Buttes Towers Plan.
- + BLM Seeks Input For New Draft Management Plan.
- + Public Input Sought On TriCounty Draft Resource Management Plan.
- + Professor Urges Congress To Pass Helium Bill.

Fish and Wildlife Service:

- + FWS Director Ashe Attends Western Governors' Association Meeting.
- + Lawsuit Seeks Protection For Bicknell's Thrush.

- + FWS To Protect Texas Invertebrates.
- + FWS Announces Extension For Listing Of Lesser Prairie-Chicken.
- + FWS Allows Expanded Use Of Carolina Beach Sand Rake.

SECURING AMERICA'S ENERGY FUTURE:

Renewable Energy:

- + Obama Advisers Would Recommend Veto Of House GOP Energy Bill.
- + Additional Coverage Of Decision To Bar Mining In Solar Energy Zones.

Onshore Energy Development:

- + EnergyWire Study Suggests Onshore US Spills Increasing.
- + Additional Coverage Of Western Expansion Pipeline III Project.

Offshore Energy Development:

- + BP Asks Court To Stop "Feeding Frenzy" Of "Fictitious" Spill Claims.

LAST LAUGHS:

- + Late Night Political Humor.

DOI in the News:

WASHINGTON MONUMENT ILLUMINATED. The [Washington Post](#) (7/8, 489K) reports that "while the

Washington Monument is closed for earthquake damage repairs over the next year, 488 lamps will restore the marble tower's glow each night on the National Mall." The NPS "lit up the monument for the first time on Monday evening – and will continue to do so each night at dusk." NPS Director Jonathan Jarvis "and philanthropist David Rubenstein, who donated \$7.5 million to fund half the cost of repairs, took part in the first lighting."

Also reporting on the story are the Washington Post (7/9, Shapira, 489K), the Boston Herald (7/9, 91K), the Miami Herald (7/9, Zongker, 139K), the San Francisco Chronicle (7/9, Zongker, 220K), the St. Paul Pioneer-Press (7/9, Zongker, 201K), the Oakland (MI) Press (7/8, 53K), USA Today (7/8, 1.71M), USA Today (7/8, 1.71M), Politico (7/9, 25K), NBC News (7/9), NBC News (7/8), the Winnipeg (CAN) Free Press (7/9, 895K), the Global Post (7/9), the Seattle Daily Journal of Commerce (7/9, 4K), the Washington Business Journal (7/9, Subscription Publication), Yahoo! (7/8, Zongker), Yahoo! Finance (7/9, Zongker), Yahoo! News Canada (7/9, Zongker), WJZ-TV Baltimore (7/8), WJLA-TV Washington (7/9), WRC-TV Washington (7/9), WJBK-TV Detroit (7/9, Zongker), KGTV-TV San Diego (7/9), WUSA-TV Washington (7/9), WVIT-TV New Haven, CT (7/9), WRC-TV Washington (7/9), WTTG-TV Washington (7/9, Zongker), KSL-TV Salt Lake City (7/9, Zongker), KNTV-TV San Jose, CA (7/9), and WHEC-TV Rochester, NY (7/9).

Providing local TV coverage were WNC8-TV (7/9) and WJLA-TV (7/9).

PROCESSION BRINGS REMAINS OF 19 FIREFIGHTERS TO PRESCOTT, ARIZONA. In continuing coverage, NBC Nightly News (7/8, story 6, 0:25, Williams, 7.86M) broadcast that there will be a memorial service held today for 19 firefighters who recently died trying to fight a wildfire in Arizona. This past weekend, a "procession of 19 hearses" brought the remains of the firefighters to Prescott, Arizona. The "procession took five hours, traveling a route stretching 125 miles."

Also providing coverage of wildfires were the AP (7/8) and NBC News (7/9, Dedman).

Meanwhile, the AP (7/9) reports on "several small wildfires" burning "across Idaho on Monday morning that were keeping crews from federal firefighting agencies as well as rural fire departments busy amid temperatures in the 90s and dry, gusty conditions."

COURT REJECTS CHALLENGE TO PUBLIC LAND DESIGNATION IN ALASKA. The Courthouse News (7/8) reports that "to preserve Alaska's scenic, historic and culturally significant landscapes, as well as the traditional subsistence hunting and fishing lifestyle of rural citizens, Congress established 'national parks, preserves and other federal reservations' with the Alaska National Interest Lands Conservation Act (ANILCA) in 1980." Then, "almost two decades after the act passed, the secretaries of the US Departments of the Interior and of Agriculture amended its scope in 1999 Final Rules." The 9th Circuit upheld the lower court's ruling that "the secretaries acted lawfully by initiating rulemaking to identify waters for subsistence management," and also held that "secretaries acted reasonably in including certain water bodies and excluding others from the public lands determination."

INTERIOR MOVES DATA TO CLOUD. For Forbes (7/8, 928K), Hilary Kramer writes that "as the US must learn to do more with fewer dollars, one Washington, D.C.-based privately-held company, IQ Business Group (IQBG), has led the way in bringing one of the largest federal agencies, the Department of the Interior (DOI), into the 21st century." Last year, IQBG "scored a \$53 million contract with the DOI, the federal agency that is responsible for federal land and natural resource conservation." The eight-year deal "for IQBG's software as a service (SaaS) platform is part of DOI's IT Transformation initiative, which is expected to save \$100 million annually."

ADDITIONAL COVERAGE OF DECISION TO RESCIND WHITE RIVER'S BLUEWAY DESIGNATION.

Additional coverage of the decision to rescind the White River's Blueway designation was provided by the Las Vegas Sun (7/8, 41K).

THORNING'S MIXED REVIEW OF OBAMA CLIMATE CHANGE INITIATIVE. In a post in the "Congress Blog" of The Hill (7/9, Thorning, 21K), senior vice president and chief economist at the American Council for Capital Formation Dr. Margo Thorning says that President Obama's climate change regulations "couldn't have come at a worse time" as "America needs economic growth and job creation" but "the President's plan will only have the opposite effects, while also failing to have any substantial impact on the environment." Thorning also notes that "DOE data show that new electric generating capacity using wind and solar power tends to be considerably more expensive than conventional natural gas and coal resources" and thus Obama's "goal of doubling renewable

electricity generation by 2020 will raise electricity prices and slow U.S. economic growth." However, Thorning also says that because DOE data has shown "skyrocketing" GHG emissions from India, China, and Brazil, a "positive feature" of the Obama plan is working with those countries to reduce emissions.

OWENS CHASTISES OBAMA CLIMATE CHANGE PLAN. In a post in the "Congress Blog" of The Hill (7/9, Owens, 21K), editor of Orbis, the Foreign Policy Research Institute's quarterly journal of international affairs Mackubin Owens says that despite "the inconvenient truth" that "global temperatures essentially have been flat for the last 15 years," with his climate change agenda President Obama "will, in effect, be taking over the American economy to protect 'humankind' from climate change." Owens says that the economic costs of the Obama plan "will be immense" as it "will drive up the cost of electricity and will have no effect on global climate." Owens goes on to speculate that the reason Obama is "forcing such onerous policies upon the United States" is that "by artificially raising the cost of carbon energy, he can make his beloved, but heavily subsidized, 'renewables' competitive." Owens also notes that any reduction in emissions for which Obama is taking credit has been because of the natural gas revolution, which has "occurred despite the president's best efforts."

FREEMAN: OBAMA CLIMATE CHANGE STRATEGY "COULD HAVE BEEN BOLDER." In an op-ed for the Los Angeles Times (7/9, Freeman, 692K) Jody Freeman, a counselor for energy and climate change in the White House in 2009 and 2010, argues that President Obama's new climate strategy which will "regulate carbon pollution from the nation's power plants for the first time" will not be enough, and calls for Congress to step up and get involved. Freeman notes the EPA has authority under the Clean Air Act to enact even bigger policies that will help combat climate change, however, due to a fear of "backlash" in Congress, the EPA has "consistently rejected this approach." Freeman argues that the government will be sued over this latest greenhouse initiative as it has over every other initiative in the past, and calls for Congress to stop sitting "on the sidelines"

America's Great Outdoors:

National Park Service:

AIRPLANE THAT WENT MISSING IN 2012 FOUND IN YOSEMITE NATIONAL PARK. The [Lompoc \(CA\) Record](#) (7/9, 3K) reports that "the body of Solvang pilot Nicol Wilson, missing since December, has been found in Yosemite National Park," according to a spokeswoman. Kari Cobb, a spokeswoman for Yosemite National Park, said that "a park visitor Saturday near Vogelsang High Sierra Camp, an area in the rugged high country of Yosemite National Park, spotted the plane, which was largely intact." Cobb said that "on Sunday, Yosemite National Park Rangers hiked to the location and the body has been positively identified as Wilson."

Also reporting on the story are [Reuters](#) (7/8, Whitcomb) and the [Modesto \(CA\) Bee](#) (7/8, 59K).

HOUSE COMMITTEE TO HOLD HEARING ON MERCED RIVER PLAN. The [MyMotherLode.com](#) (7/9, Ambler) reports that the US House of Representatives Committee on Natural Resources "will hold a hearing about the proposed Merced River Plan tomorrow, July 9." Rep. Tom McClintock "said that the Subcommittee will look at what legal actions can be taken." McClintock said, "One thing that we want to do is to impress upon the parks Management that they work for the public and that their job is to welcome and accommodate the public not to restrict and harass them."

NPS CONSOLIDATING FERRIES AT CAPE LOOKOUT NATIONAL SEASHORE. [WCTI-TV New Bern, NC](#) (7/9) reports that "private ferry operators for Cape Lookout National Seashore will soon no longer be able to take visitors to the park." The NPS "has decided to consolidate the ferry system to one private ferry company, contracted by the park." According to the article, "consolidation is meant to make things more organized in the park and provide the public good and reliable transportation to the park."

NPS REOPENS FORT PICKENS. The [Pensacola \(FL\) News Journal](#) (7/8, Thompson, 38K) reports that the NPS "has reopened Fort Pickens Road in the Gulf Islands National Seashore on Pensacola Beach after closing it due to flooding over the weekend." Park superintendent Dan Brown said, "We're keeping a close eye on it. The ground is pretty saturated, right now, causing the rain to drain slowly ... I imagine if the rain persists, we may see water begin to pond in some areas."

HERRING COVE BEACH BATHHOUSE SET TO OPEN THURSDAY. The Cape Cod (MA) Times (7/8) reports that "the grand opening of the new Herring Cove Beach bathhouse in the Cape Cod National Seashore will be held at 3 p.m. Thursday."

SAVANNAH MUSEUM DENIES ENTRY BECAUSE OF WHEELCHAIR. The Athens (GA) Banner-Herald (7/8, 27K) reports that "a Charlotte, NC couple said their 11-year-old daughter was told she couldn't use her wheelchair at a Savannah museum because it would get the carpet dirty." The article notes that "the museum is housed in a historic home and doesn't have an elevator or a lift because of conflicts between city regulations and rules from the Department of the Interior on historic sites, according to a statement on the museum's website."

CENTRAL KANSAS PROPERTIES ADDED TO NATIONAL REGISTER OF HISTORIC PLACES. The Hays (KS) Post (7/8) reports that on Monday, the Kansas Historical Society announced "that a Mitchell County farmstead and a former high school in Belleville are among the newest Kansas properties added to the National Register of Historic Places."

CANADIAN CLIMBER INJURED DESCENDING MOUNT RAINIER. The Bellingham (WA) Herald (7/8, 16K) reports that "a Canadian climber was injured in a fall Sunday while descending from the summit of Mount Rainier." NPS spokeswoman Patti Wold said that "he was at the 13,500-foot level at the top of Emmons Glacier when he fell."

BOY DROWNS IN DELAWARE RIVER. WNEP-TV Scranton, PA (7/8) reports that "a nine-year-old boy drowned Monday afternoon in the Delaware River near Bushkill in Pike County." According to the NPS, "the boy from Bushkill was fishing in the Delaware Water Gap National Recreation Area, just downstream from Bushkill Access."

ADDITIONAL COVERAGE OF GETTYSBURG. Additional coverage of Gettysburg was provided by the Chambersburg (PA) Public Opinion (7/9, Reed, 15K), the Lebanon (PA) Daily News (7/9, 20K), the York (PA) Daily Record (7/9, Burger, 63K), and Forbes (7/8, 928K).

ADDITIONAL COVERAGE OF MANHATTAN PROJECT NATIONAL HISTORICAL PARK. Additional coverage of Manhattan Project National Historical Park was provided by the Pacific Standard (7/9, Todd).

PUBLIC URGED TO SEE STATUE OF LIBERTY. In his column for Scripps Howard News Service, Dale McFeatters urges "every American who's able to...visit the Statue of Liberty and climb up to the crown – once." He notes that NPS "worked heroically to get the island reopened for the Fourth of July," and "the public responded in kind by snapping up all the tickets to climb to the crown and all but same-day tickets to climb to the top of the base."

The column was picked up by the Erie (PA) Times-News (7/9, McFeatters, 50K) and the Evansville (IN) Courier & Press (7/9, McFeatters, 50K).

Bureau of Land Management:

BLM TO RESTRICT AREA TO ORV USE TO PROTECT RARE PLANT. The San Francisco Chronicle (7/9, 220K) reports that the BLM "announced Monday its restrictions apply to public land next to Big Willow Creek in Payette County." The agency aims "to limit off-road vehicle travel to protect a rare plant that grows only in a 10-square-mile area in southwestern Idaho." The FWS has designated the Packard's milkvetch "a candidate for Endangered Species Act protections."

BLM TO HOST FIRE REHAB TOUR. The Elko (NV) Daily Free Press (7/9, 7K) reports that the BLM "is hosting a tour showing residents how the land can rehabilitate" after a fire. The bureau's Elko District "is hosting its fourth open communications forum Saturday to provide an opportunity for the public to learn more about rehab projects."

BLM TO CLOSE TOWELL FALLS AT ESCURE RANCH. The Spokane (WA) Spokesman-Review (7/8, 69K) reports that "increasing fire danger has prompted" the BLM "to close Towell Falls Road in the Bureau of Land Management Spokane District's Rock Creek management area to motorized traffic for the summer."

BLM SEEKS PUBLIC INPUT ON GLASS BUTTES TOWERS PLAN. KTVZ-TV Bend, OR (7/9) reports that the BLM Prineville District Office is "asking for public comments on a proposed project to establish a Right-of-Way agreement with each of Bonneville Power Administration, a federal entity under the US Dept. of Energy and American Towers LLC, a private company, to construct two new communication facilities (of up to 100 feet height, with non-reflective material) on the top of Glass Buttes, 15 miles east of Hampton." The bureau "is preparing an Environmental Assessment to identify a range of alternatives to address the potential of granting the ROWs, including a No Action alternative that would deny the proposed actions."

BLM SEEKS INPUT FOR NEW DRAFT MANAGEMENT PLAN. In a letter to the Rapid City (SD) Journal (7/9, 24K), Marian Atkins, the Field Manager for the BLM South Dakota Field Office, announces that the "South Dakota Draft Resource Management Plan and Environmental Impact Statement" (RMP/EIS) "is ready for public review." According to Atkins, "in this Draft RMP/EIS, we address conservation measures and actions for the Greater Sage-Grouse through the range of alternatives." She notes that "Alternative D is identified as the BLM's preferred alternative."

PUBLIC INPUT SOUGHT ON TRICOUNTY DRAFT RESOURCE MANAGEMENT PLAN. In an op-ed for the Las Cruces (NM) Sun-News (7/9, Childress, 22K), Bill Childress, the Las Cruces district manager for the BLM, writes that the Las Cruces District "works to balance the nation's competing demands for resources in a sustainable manner." He notes that "on April 12, 2013, the BLM released the TriCounty Draft Resource Management Plan/Environmental Impact Statement (RMP/EIS) for a public review and comment period."

PROFESSOR URGES CONGRESS TO PASS HELIUM BILL. In a piece for CQ Roll Call (7/9, Chan, Subscription Publication, 19K), Moses Chan, an Evan Pugh Professor of physics at Penn State University, writes in support of "legislation to continue sales of helium from the Federal Helium Reserve and" and its "benefits to US taxpayers and America's leading industries and scientific researchers." He warns of a "significant disruption to advanced manufacturing and research in the United States that would result from a failure to enact legislation before the October deadline." Pugh also notes "the conclusions of the National Academies of Sciences and the inspector general of the Department of Interior, both of which called for reform of the federal helium program."

Fish and Wildlife Service:

FWS DIRECTOR ASHE ATTENDS WESTERN GOVERNORS' ASSOCIATION MEETING. The BYU Daily Universe (7/8) reports that "governors, Canadian Premiers and agencies within the Department of the Interior (DOI) met together this month to discuss public lands and endangered species issues that span across state lines." At the Western Governors' Association (WGA) 2013 Annual Meeting, FWS Director Dan Ashe "proposed a perspective to negotiate a middle ground between the state-federal perspectives." Ashe "said the various state and federal agencies involved should avoid shortchanging their financial resources while depending on other overlapping services to take up the slack."

LAWSUIT SEEKS PROTECTION FOR BICKNELL'S THRUSH. The Burlington (VT) Free Press (7/8, Murray, 29K) reports that "the Center for Biological Diversity filed a lawsuit against the US Fish and Wildlife Service and the US Secretary of the Interior Sally Jewell on June 27 for failure to make a final decision" on the protection of Bicknell's thrush. The FWS "has 60 days from the lawsuit filing date to respond."

FWS TO PROTECT TEXAS INVERTEBRATES. The Houston Chronicle (7/9, 434K) reports that the FWS "says it will protect six species of aquatic invertebrates native to West Texas as endangered and is designating 450 acres of land as critical habitat for these species" The FWS "said Monday that four species of spring snails and two of amphipods – minute crustaceans – are in danger of extinction due to the loss of the natural springs where they live."

FWS ANNOUNCES EXTENSION FOR LISTING OF LESSER PRAIRIE-CHICKEN. KEYO-AM Lubbock, TX (7/9) reports that the FWS "has announced a six-month extension on their determination of whether to name the lesser prairie-chicken as a threatened species." The agency "allowed the extension to solicit additional scientific information and public comment before making the final listing determination."

FWS ALLOWS EXPANDED USE OF CAROLINA BEACH SAND RAKE. The [Wilmington \(NC\) Star News](#) (7/7, Withers, 36K) reports that “a \$40,000 beach rake that has sat basically unused for almost a decade will finally get to see some action in Carolina Beach.” According to the article, “the town recently received a letter from the” FWS “that would allow it to use the rake year-round with some restrictions.”

Securing America’s Energy Future:

Renewable Energy:

OBAMA ADVISERS WOULD RECOMMEND VETO OF HOUSE GOP ENERGY BILL. The “E2 Wire” blog of The Hill (7/9, 21K) reports that the White House has threatened “to veto House Republicans’ Energy Department spending bill” because of its “sharp cuts to green energy programs.” Advisers to President Obama “would ‘recommend’ that he veto the fiscal year 2014 spending bill if it reached his desk, the White House Office of Management and Budget said late Monday afternoon.” The bill “funds the Energy Department, the U.S. Army Corps of Engineers, and Interior Department water programs” and will hit the House floor today.

Reuters (7/9) reports that the White House said in a statement, “The bill would leave U.S. competitiveness at risk in new markets for clean energy industries such as advanced vehicles, advanced manufacturing, energy efficiency for homes and businesses, and domestic renewable energy such as wind, solar, and biomass. ... If the President were presented with H.R. 2609, his senior advisors would recommend that he veto the bill.”

ADDITIONAL COVERAGE OF DECISION TO BAR MINING IN SOLAR ENERGY ZONES. Additional coverage of the decision to bar mining in solar energy zones was provided by the [Denver Business Journal](#) (7/9, Subscription Publication), the [Tucson \(AZ\) Citizen](#) (7/8, 19K), and [KSL-TV](#) Salt Lake City (7/9).

Onshore Energy Development:

ENERGYWIRE STUDY SUGGESTS ONSHORE US SPILLS INCREASING. EnergyWire (7/9, Soraghan, Subscription Publication) reports that following four months of internal investigation into “data for the most comprehensive report available” on oil and gas well spills in the US in 2012, EnergyWire found that there were over 6,000 “spills and other mishaps” for onshore sites, or an average of 16 spills daily. Of the 12 states where data was available for 2010 and 2012, spills were up 17% in 2012.

ADDITIONAL COVERAGE OF WESTERN EXPANSION PIPELINE III PROJECT. Additional coverage of the Western Expansion Pipeline III Project was provided by [Platts](#) (7/9, Magill).

Offshore Energy Development:

BP ASKS COURT TO STOP “FEEDING FRENZY” OF “FICTITIOUS” SPILL CLAIMS. AFP (7/9) reports British Petroleum has asked a US appeals court to stop a “feeding frenzy” of “fictitious” compensation claims coming from the 2010 Gulf of Mexico oil spill. Although BP has reached a settlement of \$7.8 billion, now the issue is “how the administrator accounts for lost revenues” and whether claimants “should be allowed to pick and choose which periods to use as a benchmark.” The appeals court has not given a time frame on when it will rule on this issue.

Nocera Criticizes Louisiana Justice System. In his column for the New York Times (7/9, Nocera, Subscription Publication, 1.68M), Joe Nocera argues that the Louisiana justice system has taken advantage of BP, following the oil spill in the Gulf of Mexico in 2010. After describing BP’s experience with the Louisiana justice system, Nocera argues that “what is going on in Louisiana today is not all that different than when a corrupt Russian official creates a fake tax liability to line his pockets at the expense of some hapless company operating in Russia.”

Tackling America’s Water Challenges:

CALTRANS CONFISCATING ANTI-TUNNEL SIGNS IN DELTA. The [Central Valley \(CA\) Business Times](#) (7/9)

reports that "Caltrans crews are confiscating 'Save the Delta! Stop the Tunnels!' signs displayed by land and business owners in the Sacramento San Joaquin Delta, even though the signs are posted on private property." According to Jeff Bennett, supervisor at the Caltrans Rio Vista office, "display of such signs is in violation of Streets and Highways Code 54053, because the message is supposedly a political campaign message and political messages cannot be displayed within 660 feet of a public right of way."

"WET JUNE WEATHER" HELPED PRESERVE WATER SUPPLY IN YAKIMA RIVER BASIN. The Tri-City Herald (WA) (7/8, 28K) reports the final monthly forecast for the season by the Federal Bureau of Reclamation stated that "all users will receive a full supply of water." However, natural runoff "continued to lag below normal" and is expected to do so for the remainder of the summer, according to Chuck Garner, river operations supervisor for the Yakima Irrigation Project. Garner also said he expects low reservoir storage at the end of the irrigation season.

ASH FROM WILDFIRES THREATENS NEW MEXICO FARMERS. The AP (7/9) reports that recent thunderstorms have "washed wildfire ash into the upper end of the Elephant Butte Irrigation District System" causing concern for farmers. Ash coming downstream could "clog farmers' drip irrigation systems and municipal treatment plants" which were installed to conserve water due to the drought.

GUERIN: LAKE POWELL RETREAT CAUSES CONCERN FOR THE FUTURE. In a blogpost for The High Country (CO) News (7/9, Guerin, 25K) Emily Guerin examines the Glen Canyon Dam's decreasing hydropower and reminds readers to be conscious that "water is never too far behind the flick of a switch." According to the Bureau of Reclamation, the Glen Canyon reservoir was only 48% full and "is expected to drop 11 feet before September." Guerin says the "severe to extreme" drought in Colorado, as well as the "record heat" is not "exactly helping" the current situation.

ELIAS EXPLORES RELATIONSHIP BETWEEN WATER TUNNELS AND FRACKING. In his column for the Redding (CA) Record Searchlight (7/8, Elias) Tom Elias explores how the Monterey Shale which contains oil and natural gas in "Saudi Arabian-style quantities" can be harvested, citing fracking as the most plausible way in which it could be achieved. Elias suggests that water tunnels, in particular, the Bay Delta Conservation Plan which would include "two parallel 35-mile-long freeway-width tunnels to bring Sacramento River water under the Delta formed by that river and the San Joaquin" could provide the "reliable source of water" the oil drilling companies would need in order to begin fracking. However, he notes that the Endangered Species Act could now make that water supply "unreliable" and, coupled with a fear of fracking, could stall the project altogether.

Empowering Native American Communities:

\$500 MILLION TAUNTON CASINO PROJECT STALLED. The New Bedford (MA) Standard-Times (7/8, Brennan, 21K) reports that efforts made by the Mashpee Wampanoag Tribe to move forward with the \$500 million Taunton casino are being stalled as "no vote has been scheduled" in order to move the renegotiated compact to the BIA. Back in March, Governor Patrick "filed the renegotiated compact he reached with the Mashpee tribe about payments the state would receive" from the casino, which needs full support of legislature in order to move forward. It has been two and a half months "and counting." During this time, the Massachusetts Gaming Commission has been "accepting applications from commercial casino developers in Southeastern Massachusetts," which effectively ends the tribe's "exclusive hold over the region."

Historic Documents Question Tribe's Land Claims. The Taunton (MA) Gazette (7/9, Tuoti, 6K) reports that tribal casino opponents have found "historic government documents" stating that the Mashpee were "not under federal jurisdiction" which could damage the tribe's bid to open a Casino in Taunton. These documents show that the tribe "doesn't meet the requirements to have land taken in trust," according to Taunton resident and casino opponent, Michelle Littlefield. According to the Indian Gaming Regulatory Act, a tribe cannot open a casino without land in trust. Interior Associate Solicitor Michael Berrigan stated that the "historical exhibits will be considered by the department, and included in the record for its decision on the Tribe's application."

KENT FACES BATTLE OVER RECOGNITION OF SCHAGHTICOKE INDIANS. The Waterbury (CT) Republican-American (7/9, 42K) reports that the Department of Interior Assistant Secretary of Indian Affairs proposed changes that would "alter how Indian tribes obtain federal recognition." This has caused an uproar in Kent, which

is "gearing up for a major legal battle" claiming the new rules would make it easier for the Schaghticoke Indians to be recognized.

NORTH FORK INDIAN CASINO MOVES FORWARD. The Las Vegas Review-Journal (7/9, Stutz, 228K) reports that California Governor Jerry Brown signed a bill which will allow North Fork Rancheria of Mono Indians to move ahead with their \$350 million casino project, which is backed by Station Casinos. The proposed casino project has faced opposition by rival tribes, however, the North Fork compact with California is still pending approval from the US Department of the Interior, while Station Casinos management deal needs a signature from the National Indian Gaming Commission.

BARSTOW CASINO TALKS ONGOING. The Barstow (CA) Desert Dispatch (7/9, Self) reports the process of opening an Indian casino in Barstow was "still in preliminary talks," according to Barstow Mayor Julie Hackbarth-McIntyre. The Los Coyotes Band of Cahuilla and Cupeno Indians Tribe, based out of San Diego, still needs approval of the fee-to-trust application which is pending in the US Department of Interior. There has been a consistent effort on behalf of Barstow to bring Indian gaming to the city for 10 years, "citing economic benefits and job creation" to combat its 12% unemployment rate recorded for May.

CALIFORNIA GOV. BROWN APPROVES MADERA INDIAN CASINO. The Merced (CA) Sun-Star (7/8, 12K) reports that California Gov. Jerry Brown "approved a compact that will allow construction of California's first off-reservation casino on 305 acres north of Madera." Brown's "approval comes on the heels of last week's state Senate approval of the compact." The Interior Department, "which helped negotiate the compact, also must approve it in a final action expected early next year."

AUTHORITIES SEARCHING FOR MISSING TRIBAL MEMBER. KTVQ-TV Billings, MT (7/9) reports that "authorities are searching for" Hanna Harris, "an enrolled tribal member has been missing since Friday July 5, 2013." According to BIA spokesperson Nedra Darling, "an attempt to locate Harris was made the same day she was reported missing." Along with the BIA, "numerous friends and family members are helping with the search."

FORMER INDIAN AFFAIRS OFFICER WHITE EAGLE STILL GUILTY, SAYS 9TH CIRCUIT. The Courthouse News (7/8) reports the 9th Circuit Court "affirmed Florence White Eagle's bribery and misprision of a felony convictions" after they reversed four of her six convictions on Friday. Although White Eagle had "turned a blind eye to fraud and facilitated its cover up" the court found "little evidence to sustain her convictions for conspiracy to convert tribal credit program proceeds, theft and conversion from an Indian Tribal organization, concealment of public corruption and public acts affected a personal financial interest." White Eagle was involved in a government-loan scam of \$1.2 million, allegedly run by the late Toni Greybull who died in 2008.

WESTERLY SUN: MODIFIED PROCEDURE FOR INDIAN RECOGNITION A LOW OF THE WEEK. In an editorial, the Westerly (RI) Sun (7/9, 9K) argues that a low of last week was the Federal Bureau of Indian Affairs considering "relaxing" the criteria for recognition, which currently say that a group "must have functioned throughout history." Under the proposed regulations, "throughout history" is replaced with "from 1934." Public hearings on the proposed regulations are scheduled to take place nationally between July 23 and August 6.

Top National News:

OBAMA REVIVES PUSH FOR "SMARTER," "MORE INNOVATIVE" FEDERAL GOVERNMENT. President Obama's remarks at the White House Monday on his renewed efforts to streamline the Federal bureaucracy generated very little coverage and were not mentioned on any of the three network newscasts Monday evening.

USA Today (7/8, Jackson, 1.71M) reports that the President said Monday that he had "told his staff to continue efforts to develop a 'smarter' and 'more innovative' government, using new technology to deliver better services and save money." USA Today noted that the President said OMB director Sylvia Mathews Burwell will "head up the continuation of an effort made in his first term to modernize government." The President said Congress "can help...by giving him more authority to re-organize and streamline executive branch agencies." According to Bloomberg News (7/8, Runnigen), the President claimed that in his first term, the Administration "identified more than \$2.5 billion in savings by ending overlapping programs and improving efficiency."

Correspondent Peter Doocy, on Fox News' Special Report (7/9), reported that "new technology enabled Obama supporters to organize themselves so well in 2008 and 2012 that" the President "thinks the government should operate more like his campaigns." Doocy went on to report that "economically significant regulations – the ones that have an impact of more than \$100 million a year – have increased 148% in the last decade," and analysts warn that the President's "promises will not slow down the damage caused by years of regulation."

The Washington Post (7/9, Goldfarb, 489K) reports that the President wants the Federal government to "work a little bit more like a Silicon Valley start-up – or at least a modern technology company" – and said Monday that the Administration "has already made progress by hiring technology experts from the private sector and introducing policies to make government more efficient." The Los Angeles Times (7/8, Parsons, 692K) reports that the President will also be relying on chief technology officer Todd Park, "who co-founded the health information technology company Athenahealth," and chief information officer Steve VanRoeke, formerly a Microsoft senior director.

The AP (7/8, Lederman) notes that the President was accompanied by Vice President Biden and "nearly a dozen Cabinet members" on Monday. Among the "innovations" touted by the President were a FEMA app that "allow[s] hurricane victims to register for help, the truncating of an insurance application prototype for new health care exchanges, and more than 75,000 sets of government data posted to" data.gov. However, the AP adds that data.gov "has frustrated many users who say the data is limited, error-prone and hard to use." And, according to the AP, the Administration "pruned the insurance application from 21 pages to five – three, by Obama's count – only after widespread griping that they were as bad as tax forms and might cause" the uninsured "to give up in frustration."

CQ Roll Call (7/9, Dennis, Subscription Publication, 19K), in an article titled, "Obama Zings Congress On Reorganization Authority," reports that the President requested from Congress "fast-track authority to reorganize the federal government" after having done so previously last year. CQ Roll Call says "lawmakers in both parties poured cold water on that plan a year ago." The President is quoted as saying, "We sure could use Congress' help, particularly at a time when Congress is saying they want more efficient government – they give a lot of lip service to it – and we're operating under severe fiscal constraints." According to CQ Roll Call, the President wants "the ability to get up-or-down votes within 90 days in the House and Senate on legislation consolidating and reorganizing" Federal agencies, which "would bypass committees and limit individual lawmakers' ability to kill provisions they don't like."

According to Politico (7/9, Epstein, 25K), the President's 2012 "effort to get reorganization authority didn't go far...in part because of bipartisan opposition to the president's plan to merge the Office of the US Trade Representative with trade functions in the Commerce Department." On Monday, the President said, "We sure could use Congress's help, particularly at a time when Congress is saying they want more efficient government – they give a lot of lip-service to it – and we're operating under severe fiscal restraints. It makes sense for us to be able to redesign government so it can deliver on the functions the American people are looking for."

The Hill (7/9, Easley, 21K) reports that Rep. Darrell Issa, the chairman of the House Oversight Committee, said, "This time, instead of trying to find a way to work around Congress, President Obama needs to approach Congress as a partner in reorganizing federal agencies." Issa added, "This is something that Congress has said, on a bipartisan basis, it wants to do. There is common ground on this issue and members of both parties and both chambers stand ready to work as partners with the President."

The Washington Times (7/9, Boyer, 76K) reports that according to Politifact, since taking office, the President has "kept 11 of 32 promises to improve government efficiency...broken nine of those promises" and "compromised on another 11 issues."

Jim Treacher, in a post for the Daily Caller (7/9, Treacher) notes skeptical responses on Twitter to the President's pledge to create "a smarter, more innovative, and more accountable government" featuring the hashtag #SmarterGov. Ta-daaaaaa!

The Wall Street Journal (7/9, Subscription Publication, 2.29M), in an editorial, says the President's commitment to cheaper and more efficient government is belied by the cost and rocky rollout of the Affordable Care Act.

OBAMA, CBC TO DISCUSS ECONOMIC ISSUES. The AP (7/9, Lederman) reports that as the President seeks to "shift focus back to the economy and an immigration overhaul," he plans "to meet with black members of Congress about the economy and other issues." According to the White House, the President and the CBC "will discuss economic issues, immigration, implementation of Obama's health care law and voting rights." The meeting will be the first between the President and the caucus since last month's Supreme Court decision which "stripped a key provision of the Voting Rights Act."

Bloomberg News (7/9, Nichols, Preciphs) reports that CBC Chairwoman Marcia Fudge and other lawmakers "plan to press the president on what he's doing to lower black unemployment," which rose in June to 13.7 percent from 13.5 percent.

MARKETS UP AS INVESTORS GROW COMFORTABLE WITH IDEA OF FED PULLBACK. The Wall Street Journal (7/9, Scaggs, Subscription Publication, 2.29M) reports that stocks were up on Monday as investors appeared to believe that they could weather an easing of the Fed's bond-buying program. The Dow Jones Industrial Average rose 88.85 points to 15224.69, while the S&P 500 rose 8.57 points to 1640.46. The NASDAQ Composite Index rose a more modest 5.45 points to 3484.83.

The Wall Street Journal (7/9, Jakab, Subscription Publication, 2.29M) reports that domestic US stocks are currently hot among investors as weakness overcomes a number of overseas markets, but cautions that investors could get burned by pushing to hard in that direction.

Consumer Borrowing Up Sharply in May. Bloomberg News (7/8, Smialek) reports that US consumer borrowing rose \$19.6 billion in May, far higher than the \$12.5 billion expected by economists or the \$10.9 billion increase notched in April. Bloomberg says that increase came as Americans "put more purchases on their credit cards and took out more school and automobile loans." Bloomberg also says that the increase in the stock markets and in real estate values has made US consumers more able to borrow money.

USA Today Analysis: Jobs Picture Not "As Rosy As It Seems." USA Today (7/9, Davidson, 1.71M) reflects on last Friday's "better-than-expected" June jobs report, saying it raises the question as to why businesses are hiring "in a weakening economy." USA Today says that one explanation is that the employment picture "isn't as rosy as it seems," because many of the new jobs "have been low-wage, part-time slots in industries such as retail, restaurants and hotels." Another reason is that firms "are still making up for shedding too many workers in the recession."

Early Economic Data Feeds Facing Scrutiny. The Wall Street Journal (7/9, Rothfeld, Subscription Publication, 2.29M) reports that Thomson Reuters announced Monday that it would end its practice of sending a two second advance release of the University of Michigan's Consumer Confidence Index to high speed traders following an investigation by New York's Attorney General. Meanwhile, a spokeswoman for Iowa Sen. Charles Grassley (R) said her boss will send a letter to the University seeking information on the arrangements. The Journal says that many traders and hedge funds pay non-governmental organizations for early looks at key economic data that may impact markets.

Editorial Wrap-Up:

NEW YORK TIMES. "The Laws You Can't See." The New York Times (7/9, Subscription Publication, 1.68M) raises questions about the NSA's conduct and findings of the Foreign Intelligence Surveillance Court. The Times writes that it believes that significant rulings need to be declassified and adds, "We don't know what we'll find." The court "may be strictly adhering to the limits of the Fourth Amendment as interpreted by the Supreme Court" or not, and that is "the problem." It has "morphed into an odd hybrid that seems to exist outside the justice system, even as its power grows in ways that we can't see."

"Bloodshed in Egypt." The New York Times (7/9, Subscription Publication, 1.68M), in an editorial, says that the evidence suggests that the Egyptian military "fired on hundreds of Mr. Morsi's supporters as they were praying" without provocation.

"Spitzer Redux." In an editorial, the New York Times (7/9, Subscription Publication, 1.68M) takes a dim view of

Eliot Spitzer's new campaign, writing that there will always be candidates who are "ethically compromised, temperamentally unsuitable and politically incompetent, but if they insist on running anyway, who has the right to tell them not to?" However, Spitzer's bid "to recycle himself" is "unnering on many levels," and not just because of the prostitution issue – there are also his "colossal failures in what he did and didn't do as governor of New York."

WASHINGTON POST. "Runaway Train." In an editorial, the Washington Post (7/9, 489K) says that the train crash in Quebec shows that there are "real and oft-ignored dangers involved in the transfer of crude oil by rail." The Post says that in the midst of the "boom" in North American oil production, the amount of crude oil shipped by rail has "skyrocketed." The Post says that the Quebec tragedy "is a reminder that no transportation method is without risk" and pipelines, "properly built and maintained, offer the most secure, as well as most efficient, method."

"A Vote For Mali." In an editorial, the Washington Post (7/9, 489K) warns that although the French military intervention in Mali has been an overall success, the current situation is not ideal to conduct early elections. The Post notes the French are "eager to be out" and "pressing" for a July 28 election date, although the electoral commission has said that it "cannot properly prepare voter registry and distribute ballots" by that time. The Post goes on to offer praise for the success of the French initiative, but concludes that the Mali election process should be given "more time."

"D.C.'s Business Buster." In an editorial, the Washington Post (7/9, 489K) is highly critical of the DC city council's plan to impose a "super minimum wage" for large retailers, saying it "will prompt companies to think twice about coming to the District, particularly to struggling neighborhoods that most need jobs and services." The Post says that existing businesses will worry that they "will be next in line for prejudicial treatment from lawmakers catering to special interests."

THE WALL STREET JOURNAL. "The Spitzer Method." In an editorial, the Wall Street Journal (7/9, Subscription Publication, 2.29M) says that Elliot Spitzer behaved in a lawless manner as governor, and therefore should not be trusted as comptroller, where he would oversee the city's finances. The Journal says that as both governor and attorney general, Spitzer abused his power for political gain and to target his enemies.

"You're Too 'Cynical.'" The Wall Street Journal (7/9, Subscription Publication, 2.29M), in an editorial, says the President's commitment to cheaper and more efficient government is belied by the cost and rocky rollout of the Affordable Care Act.

"Unions Don't Like Farm Workers." In an editorial, the Wall Street Journal (7/9, Subscription Publication, 2.29M) criticizes California unions and their Democratic allies for pushing a scheme to allow unions to force contracts into bind mediation, skipping the entire collective bargaining process. The Journal portrays the policy as highly destructive and very unfair to both workers and employers, and calls on Democrats to block the policy.

and challenges at a Cyber, Space & Intelligence Association event. Location: Tortilla Coast on Capitol Hill, 400 1st St., SE.

Last Laughs:

LATE NIGHT POLITICAL HUMOR.

Jay Leno: "Hope you all had a nice Fourth of July. As you know, last Thursday we celebrated our 237th year of independence from Great Britain. And our tenth year of dependence on the Chinese. So it has worked out very nice."

Jay Leno: "According to the Census Bureau, more Asians are immigrating to this country than any other minority group. And they assimilate quickly, considering when they get here; most of them don't even speak Spanish."

Jay Leno: "Former New York Governor Eliot Spitzer – remember him? He announced he is running for New York City controller, and one of his opponents is the madam who supplied him with hookers. She is running against him. There's a tough choice for the voters, huh? I mean, one is involved in the most degrading profession of all time, and the other ran a whore house."

Jay Leno: "Federal prosecutors say an immigration officer in Santa Ana, California, right down the road here, has been indicted on charges that she took 200 egg rolls as a bribe from an immigrant seeking citizenship and a green card. She took 200 egg rolls. In fact, she would have gotten away with this crime, but she got greedy and made the guy go back for the little soy sauce packets. See, it's always the greed."

David Letterman: "It's hot in New York City, am I right? ... You know that guy, the NSA leaker guy, that Edward Snowden? Here's how hot it is. He's seeking asylum in Antarctica."

David Letterman: "Frankly, I'm surprised about Eliot Spitzer running for city comptroller. Because the comptroller, this guy couldn't even comp-trol himself."

Conan O'Brien: "I can't believe this; the next presidential election is still like three years away. They're already starting. They're already starting. Here's the latest, the Republicans are already trying to paint Hillary Clinton as too old to be President. In fact, the new ad claims she's so old, she could be a Republican."

Jimmy Fallon: "This week at the White House, President Obama will present George Lucas with the National Medal of Arts while Joe Biden will present him with some fan mail for Yoda."

Jimmy Fallon: "You guys read about NSA whistleblower Edward Snowden? Yeah. Well he's been offered asylum in Venezuela, Nicaragua and Bolivia. Or as Snowden put it, 'Prison it is.'"

Jimmy Kimmel: "Former President Bush and First Lady Laura Bush were in Africa last week. They were there on a humanitarian visit. And this to me is the worst part about being President. It's not deciding whether to send troops to war or the daily scrutiny or the schedule. Worst part of being President I think is being forced to dance with villagers. Imagine if Lincoln had to do this? He wouldn't be on money."

Sally -

The Seattle Times preview story is up:

Interior Secretary Jewell dives into pressing issues

Since her confirmation as Interior secretary in April, former REI Chief Executive Sally Jewell has immersed herself in the pressing issues facing her vast agency.

By Kyung M. Song

Seattle Times Washington bureau

WASHINGTON — Since her confirmation as Interior secretary in April, former REI Chief Executive Sally Jewell has immersed herself in the pressing issues facing her vast agency, from updating hydraulic-fracturing regulations to protecting sage grouse and opening more lands and waters to oil and gas exploration.

During that time, perhaps the biggest news from Jewell's former employer was Recreational Equipment Inc.'s decision to replace its lifetime merchandise-return policy with a one-year limit.

Even for an engineer-turned-banker-turned-retail-executive, Jewell's venture into public service has been quite a shift.

"This is an enormous job," she said in an interview Thursday.

Saturday marks Jewell's 100th day as the nation's 51st Interior secretary. Coincidentally, she'll be making her first public appearance as secretary in Washington state that same day, at a summit for youth and the outdoors at the University of Washington.

Connecting children and families with nature is a priority for Jewell, one of the only Cabinet secretaries who travels with a backpack.

Jewell has devoted much of her first months in office familiarizing herself with Interior's far-flung operations.

She has toured an offshore-drilling rig in the Gulf of Mexico, checked on restoration progress at the Everglades National Park and attended the memorial for 19 firefighters killed in an Arizona wildfire.

She also has met frequently with Senate and House members, tending to the political business that is no small part of her job.

Republicans, chief among them Rep. Doc Hastings of Pasco, chairman of the House Natural Resources Committee that has oversight of Jewell's department, has been agitating for the Obama administration to open up more federal waters that ring the coastal states to oil and gas drilling.

In 2012, the Interior Department collected \$12.2 billion in revenue from oil, gas and other leases. Jewell has said in congressional testimony and on Capitol Hill that the administration will pursue energy exploration safely and

responsibly while meeting the nation's security needs.

She said her previous careers, especially her days as a petroleum engineer and a commercial banker, have served her well in her new role.

"To actually know what (hydraulic fracturing) is, having done it myself and recognizing the risks" has been extremely valuable, she said.

Jewell said she plans to follow advice she received to focus on a few key issues that would mark her tenure at Interior, adding that she was still working on that list.

But she mentioned the 2016 centennial of the National Park Service, one of her department's agencies. She called it a chance to celebrate the national-park system's cultural and natural treasures.

Jewell also talked about Interior Department's responsibility to American Indians and Alaska natives. The Interior's Bureau of Indian Affairs is charged with upholding treaty obligations with tribes on self-governance, education for native students and other matters.

DOI in the News:

SECRETARY JEWELL DEFENDS FRACKING RULE. Bloomberg News (7/17, Drajem) reports that "appearing before the House Natural Resources committee," Interior Secretary Sally Jewell "faced criticism from Republican lawmakers arguing that the department's proposed rule to govern fracking on public lands will cause unnecessary delays." She "drew on her past experience to answer criticism from Democrat Alan Lowenthal of California, who complained that the Interior proposal relies on the independent FracFocus for disclosure of chemicals used in fracking." Jewell said that FracFocus "is imperfect, but it's being updated," and "if it's not providing adequate disclosure, 'we will look for other ways to do it.'"

For Forbes (7/18, Steffy, 928K), Loren Steffy writes that "while many environmentalists argue the rules don't go far enough, Jewell is trying to strike a balance between environmental protection and the concerns of the oil industry, where she once worked." Steffy argue sthat "while the industry may balk at Jewell's pragmatic approach, it has no one to blame but itself when it comes to fracking regulation."

Additional coverage of Interior Secretary Jewell's defense of "her department's proposal to implement a new rule governing hydraulic fracturing on federal lands" was provided by the E&E Daily (7/18), Inside Climate News (7/18), and the Akron (OH) Beacon Journal (7/19, 85K).

SECRETARY JEWELL PRESSED FOR COAL LEASE MORATORIUM. The E&E Daily (7/18) reports that environmental groups are pressing Interior Secretary Sally Jewell for a moratorium on coal lease sales. The groups' "letter calling for Jewell to act comes weeks after an Office of Inspector General report said the Bureau of Land Management might be losing out on more than \$60 million from leasing federal coal to mining companies." They wrote, "The report points to the need for a moratorium on new coal leasing so these improvements can be made. As we have before, we call on you to take action to fully restore the integrity of the American coal management program."

Also, the Grist (7/19) reports that Interior Department employees "were greeted during their lunch break today by youth climate activists distributing memos from a made-up government agency, the 'Department of Climate Action,' to highlight that the federal coal leasing program is undermining President Obama's Climate Action Plan."

WITNESSES FEAR REGULATIONS IN OPPOSING BLUEWAYS ORDER. The E&E Daily (7/18) report that "witnesses from Arkansas and Missouri yesterday said they fear a national designation of the White River in their states could lead to unwanted regulations that could harm the area tourism and timber industries." However, "when pressed repeatedly by Democrats on the panel, none of the order's critics could name any examples of how such a designation would lead to new federal regulations."

Additional coverage was provided by the Northwest Arkansas Online (7/18), the Springfield (MO) News-Leader (7/18), the Baxter (AR) Bulletin (7/18, 8K), the Springfield (MO) News-Leader (7/18), the Wayne County (MO) Journal-Banner (7/19, 3K), and the Farmington (MO) Daily Journal (7/19).

OFFICIALS TO UNVEIL WILDFIRE PARTNERSHIP. The Northern Colorado Business Report (7/18) reports that Sen. Mark Udall, "together with US Department of Agriculture Secretary Tom Vilsack and US Interior Secretary Sally Jewell, will visit Larimer County Friday" to "unveil a partnership to protect Colorado water from wildfire."

Also covering the story is Politico (7/19, Bade, 25K).

SECRETARY JEWELL TACKLES PRESSING ISSUES. The Seattle Times (7/19, Song, 236K) reports that "since her confirmation as Interior secretary in April, former REI Chief Executive Sally Jewell has immersed

herself in the pressing issues facing her vast agency, from updating hydraulic-fracturing regulations to protecting sage grouse and opening more lands and waters to oil and gas exploration." The article notes that "Saturday marks Jewell's 100th day as the nation's 51st Interior secretary," and on that day, "she'll be making her first public appearance as secretary in Washington state that same day, at a summit for youth and the outdoors at the University of Washington."

JUDGE ORDERS DRAKES BAY OYSTER CO. TO PERFORM CLEANUP. The [San Francisco Chronicle](#) (7/19, Egelko, 220K) reports that "a Marin County judge has ordered" the Drakes Bay Oyster Co. "to comply with Coastal Commission cleanup orders on its property at Point Reyes National Seashore while awaiting a federal court ruling on the Obama administration's attempt to shut the operation down." Superior Court Judge Lynn Duryee told the company "on Wednesday to obey the state commission's directives, dating from 2007, that found the company responsible for plastic debris, disruptions to the habitat of harbor seals and the planting of nearly 2 million Manila clams, an invasive species." According to environmental advocates, "the order requires Drakes Bay to clean up pollution and remove the clams while awaiting its fate at the Ninth US Circuit Court of Appeals, which heard arguments May 14."

The [Los Angeles Times](#) (7/19, Cart, 692K) reports that the California Coastal Commission "has twice ordered the oyster farm to submit detailed operational plans in accordance with the state's Coastal Act." Lisa Haage, the Coastal Commission's chief of enforcement, "welcomed the judge's ruling." According to Haage, "the ruling means that the court is compelling the oyster company to comply with the Coastal Commission's edicts."

SECRETARY JEWELL MENTIONED IN ARTICLE ABOUT NEW EPA ADMINISTRATOR. Reuters (7/19, Gardner), covering the confirmation of Gina McCarthy by the Senate as the new administrator of the EPA, notes that McCarthy will join Jewell on President Obama's energy and environment team.

BUFFALO TRACE DISTILLERY NAMED NATIONAL HISTORIC LANDMARK. A press release carried by [KION-TV](#) Monterey, CA (7/19) announces that Buffalo Trace Distillery "has been named a National Historic Landmark by the United States Department of the Interior."

INTERIOR RELEASES NEW MAPPING TOOL TO TRACE WATERSHEDS. The [Milwaukee Journal Sentinel](#) (7/19, 221K) reports that the Interior Department has released a new tool that "allows you to trace rivers the entire length of the watershed." The tool "also gives you detailed information on specific watersheds, including this report for the Milwaukee River."

OBAMA ADMINISTRATION TAKING STEPS TO IMPLEMENT CLIMATE CHANGE PLAN. The "E2 Wire" blog of The Hill (7/19, Geman, 21K) reports the Obama Administration on Thursday took several steps "that officials say will advance the energy efficiency portion of the White House climate change plan unveiled in late June." The "incremental" steps "are a piece of what officials call wide-ranging efforts to help double U.S. energy 'productivity' by the year "2030, while working with other nations to boost efficiency, too."

Also covering the climate change plan is [FOX News](#) (7/18, Russell).

Reid: Climate Change To Blame For Nevada Wildfires. The National Journal (7/19, Harder, Subscription Publication, 12K) reports Harry Reid, Senate Majority Leader, "blamed climate change" for this summer's wildfires in Nevada that have ravaged almost 28,000 acres. This has been the second occasion this week that Reid has blamed the fires on climate change, although Reid "normally doesn't talk about climate change at press conferences."

US Coasts Should Prepare For A Longer, Hotter Summer. Bloomberg News (7/19, Sullivan) reports the Climate Prediction Center says the US Northeast, parts of the mid-Atlantic, and "much of the western half of the country all have a chance to be warmer than normal through the next three months." The two coasts of the country "may have temperatures above normal," although the prediction is not "as clear" for the northern Great Plains, Midwest and Southeastern US. The higher temperature forecast "can affect energy markets as more people turn to air conditioners to keep cool."

AGENCIES PARTNER TO BENEFIT AGRICULTURAL LANDS, WILDLIFE HABITAT AND MILITARY READINESS. Additional coverage of the "federal, local and private collaboration that will preserve agricultural

lands, assist with military readiness and restore and protect wildlife habitat" was provided by the [Aberdeen \(SD\) News](#) (7/19, 15K).

ADDITIONAL COVERAGE: UTAH REPEALS LEGISLATION LIMITING FEDERAL POWER. Additional coverage of Utah's repeal of legislation limiting federal power was provided by the [Los Angeles Times](#) (7/18, Glionna, 692K).

INTERIOR OFFICIALS INTERVIEWED ON CONSERVATION MOVEMENT. For the [La Crosse \(WI\) Tribune](#) (7/19, 27K), Sam Scinta writes about people he interviewed "involved in the conservation movement ahead of the 50th anniversary of the Wilderness Act in 2014, for a documentary film being produced." Among the officials he talked to were FWS Director Dan Ashe and NPS Director Jon Jarvis. Ashe "emphasized the importance of passing on the legacy of wilderness preservation, respect and enjoyment to the young generation, and is leading efforts, as are many at the Department of the Interior, in building bridges to our young citizens." Jarvis "noted that regardless of budget realities, it was the job of his team, along with more than 180,000 NPS volunteers across the country, to do all that is necessary to preserve and share our nation's 'jewels.'"

America's Great Outdoors:

National Park Service:

ARTS COMMISSION APPROVES GEHRY'S EISENHOWER MEMORIAL DESIGN. The [Washington Post](#) (7/18, 489K) reports that "a powerful commission overseeing civic art and architecture in the nation's capital voted Thursday to approve the general concept and layout of Frank Gehry's design for a national memorial honoring Dwight D. Eisenhower." According to the article, "the US Commission of Fine Arts reviewed Gehry's plans for stone or bronze statues of the 34th president, and members voted 3-1 to approve the major elements." The article notes that "one commissioner voted no, saying the memorial's landscape design needed to be further developed."

Also reporting on the story is the [Denver Post](#) (7/19, Zongker, 443K).

In an editorial, the [Wichita \(KS\) Eagle](#) (7/19, 68K) says the approval was "encouraging." According to the paper, "though the \$142 million project also needs congressional reauthorization and National Park Service approval, the arts commission's 3-1 vote should help its momentum."

TOMATO BATTLE DRAWS FIRE. The [New York Times](#) (7/18, Miller, 1.68M) reports that the Tomato Battle "makes its New York debut on Saturday at an outdoor space at Aviator Sports and Events Center at Floyd Bennett Field, after having played cities including Denver, San Diego and Portland, Ore." But some critics "believe such events don't belong in a national park." For instance, Don Riepe, the Jamaica Bay guardian for the American Littoral Society, said, "It just seems like a bad public image" for the NPS "to allow such frivolity and silliness in a national park."

BOY RESCUED FROM INDIANA DUNE UPGRADED TO SERIOUS CONDITION. The [Seymour \(IN\) Times Tribune](#) (7/19, Coyne, 8K) reports that "the condition of the 6-year-old boy rescued from a northwest Indiana dune was upgraded to serious Thursday," while NPS "officials continued to try to figure out what caused him to become trapped under 11 feet of sand." Dr. Rachel Wolfson said that Nathan Woessner "has been removed from a ventilator, is recovering from sedation and he continues to respond to commands." He "is expected to make a full neurological recovery, though he may suffer lingering lung problems from inhaling sand."

MOUNT RAINIER OFFICIALS REMIND CLIMBERS OF CHANGES IN RESCUE PROCEDURES. The [Bellingham \(WA\) Herald](#) (7/18, Mayor, 16K) reports that Mount Rainier National Park officials have "issued a news release reminding climbers the park has changed its rescue procedures, especially those involving helicopters."

MYSTERY SUBSTANCE REAPPEARS IN WATER AT PORTER BEACH. The [Chesterton \(IN\) Tribune](#) (7/19, Nevers, 5K) reports that the Indiana Department of Environmental Management is "investigating yet another occurrence at Porter Beach of a mystery substance found in the offshore waters." IDEM spokesman Dan Goldblatt said "that the decision to close Porter Beach belongs to the National Park Service (NPS)."

GRAND CANYON NATIONAL PARK MONITORS 3 SMALL FIRES. The [Springfield \(OH\) News Sun](#) (7/19, 18K) reports that officials at Grand Canyon National Park “say they’re monitoring three small lightning-caused fires on the canyon’s north rim.” For now, park officials are “allowing the fires to burn.”

LIGHTNING STRIKES INJURE ONE WOMAN IN COLORADO, THREE HIKERS IN MONTANA. The [Washington Post](#) (7/18, 489K) reports that on Thursday, “a 65-year-old woman was struck by lightning near a trailhead in Rocky Mountain National Park.” The NPS “says the woman was taken to Estes Park Medical Center. Her condition wasn’t immediately released.” In Montana, “two adults and a child were injured Wednesday after lightning struck nearby as they hiked on a trail in Glacier National Park.”

Also reporting on the story are the [Washington Post](#) (7/18, 489K) and the [Denver Post](#) (7/19, 443K).

MAN DIES WHILE FISHING IN YELLOWSTONE NATIONAL PARK RIVER. The [Washington Post](#) (7/18, 489K) reports that a 73-year-old man “has died while fishing in Yellowstone National Park.” The NPS “says the man, whose name has not been released, lost his footing while fishing in the Yellowstone River and was swept away in the swift current on Wednesday.”

BODY OF MISSING HIKER FOUND IN YELLOWSTONE PARK. The [Macon \(GA\) Telegraph](#) (7/18, 42K) reports that “the body of a 23-year-old solo hiker has been found near the summit of an 11,000 foot mountain in Yellowstone National Park.” The NPS says Joseph Austin Parker “was reported missing about 7:30 p.m. Tuesday, about five hours after he called friends saying he was descending Electric Peak because of nearby lightning.” According to the article, “an aerial and ground search turned up nothing until Thursday morning when his body was discovered below the summit of Electric Peak.”

NPS PROPOSAL FOR YOSEMITE CRITICIZED. In an editorial, the [U-T San Diego](#) (7/18, 242K) criticizes an NPS “proposal to end bike, horse and river rentals, scrap ice skating and remove the swimming pools at the Yosemite Lodge and Ahwahnee Hotel.” The paper argues that “Yosemite is fine as it is” and “environmental extremists should go peddle their lunacy elsewhere.”

Bureau of Land Management:

BLM LAND SALE IN NEVADA BRINGS IN \$21.4 MILLION IN BIDS. [Yahoo!](#) (7/19) reports that “a federal land sale in southern Nevada has netted \$21.4 million.” The BLM “offered 134 acres of federally-owned land, as authorized under the Southern Nevada Public Land Management Act.” The bureau “sold seven parcels encompassing 109 acres.”

Also reporting on the story is the [Las Vegas Review-Journal](#) (7/19, 228K).

BLM DELIVERS WATER TO HORSES. The [Deseret \(UT\) News](#) (7/19, 105K) reports that “since late June,” the BLM “has orchestrated the delivery of water to troughs some 22 miles into the hills off state Route 196.” According to the article, “the herd of about 570 animals was draining the trough, which operates on a float system — a float valve that controls the water coming in — and is fed through a pipe.” The bureau “in Utah is trying to avoid the untenable situation that has confronted its counterpart in Nevada, where many members of the Seaman herd are in extremely poor condition and at imminent risk of dying.”

Also reporting on the story is [KSL-TV Salt Lake City](#) (7/19).

TREATMENT OF WILD HORSES CRITICIZED. The [Headline News](#) (7/18) reports that wild horses “are not being properly cared for during bouts of extreme weather, with temperatures over 100 degrees in some places,” according to critics. The article notes that “one facility near Reno, Nevada has been pinpointed by critics for not providing adequate shelter in sweltering heat.” The BLM “said they recently installed sprinklers in this facility, and have a vet visiting regularly.”

ILLEGAL DUMPING ON BLM LAND CRITICIZED. In an editorial, the [Farmington \(NM\) Daily Times](#) (7/19, 14K) says that “the report of a septic tank business illegally dumping waste on” BLM property is “infuriating.” According to the paper, “what would have cost \$119.34 to legally dump in the landfill will cost an estimated

\$28,500 to cleanup.”

CONGRESS URGED TO RENEW AUTHORITY FOR AGENCIES TO ENTER INTO STEWARDSHIP

CONTRACTS. In an op-ed for the Verde (AZ) Independent (7/19, Flake), Sen. Jeff Flake notes that the BLM and the Forest Service “are about to lose one of their most valuable tools in reducing wildfire threats.” He warns that “unless Congress acts, the authority to enter into” stewardship contracts “will expire at the end of September.” Flake urges Congress to “waste no time in renewing this beneficial tool.”

SOLUTION SOUGHT FOR SUSTAINABLE TIMBER HARVESTS. The Dalles (OR) Chronicle (7/18, 3K) reprints an editorial from the Roseburg News-Review noting that “the state and federal forests that count for 55 percent of Douglas County’s land saw another decline in harvest.” On BLM “forests, the harvest dipped by 13 percent in the Roseburg district.” The paper concludes that “the lopsided state of sustainable timber harvests in Oregon is another reminder of how important it is for Congress to devise a solution.”

Fish and Wildlife Service:

NATIONAL MARINE FISHERIES SERVICE PROPOSES CRITICAL HABITAT FOR LOGGERHEAD TURTLES.

The E&E Daily (7/18) reports that the National Marine Fisheries Service “proposed habitat protections yesterday for loggerhead sea turtles in the Atlantic Ocean and Gulf of Mexico.” It “includes 36 breeding and migration areas off North and South Carolina, Georgia, Florida, Alabama and Mississippi.” The proposal “complements the onshore critical habitat proposed by the Fish and Wildlife Service last year to protect 739 miles of loggerhead nesting beaches.” Also reporting on the story is the Summit County (CO) Citizens Voice (7/18).

FWS Releases Cost Of Loggerhead Designation. The State (SC) (7/17, 71K) reports that the FWS “on Wednesday released the cost of designating almost 750 miles of beaches as critical habitat for endangered loggerhead sea turtles.” The agency “estimated it will cost about \$150,000 a year to administer the Endangered Species Act along the designated beaches.” The figure “reflects the costs of government reviews of projects such as beach renourishment that might affect the turtles.”

FWS ADDS SIX MORE MONTHS TO GUNNISON SAGE GROUSE REVIEW. The Oil and Gas Journal (7/19, Snow) reports that the FWS “said it will take another 6 months to decide whether to designate the Gunnison sage grouse as an endangered species, and areas of southwestern Colorado and southeastern Utah as critical habitat for the bird.” FWS Mountain-Prairie Regional Director Noreen Walsh said, “We heard loud and clear from many people invested in Gunnison sage grouse conservation that there is additional scientific information we should consider during our decision-making process.”

FWS REOPENS PUBLIC COMMENT PERIOD FOR PROPOSALS ON YOSEMITE TOAD, OTHER

AMPHIBIANS. The Sierra (CA) Sun Times (7/19) reports that the FWS “is reopening the public comment period for 120 days for the proposal to list the Sierra Nevada yellow-legged frog and the northern distinct population segment of the mountain yellow-legged frog as endangered and the Yosemite toad as threatened under the Endangered Species Act (ESA).” The agency “is also reopening the public comment period for 120 days for the proposal to designate critical habitat for these three amphibian species in California.”

FWS LAUDED FOR RECOVERY OF WOLVES. For the Yale Environment 360 (7/19, Williams), Ted Williams writes that the FWS’ “brilliant politicking over the last 30 years is the reason wolves in the northern Rockies and Lake States really are recovered.” Now, thanks to the FWS “and no thanks to the perennial plaintiffs, there are an estimated 1,674 wolves in the northern Rockies and 4,432 in the Lake States.” Although Williams says that the agency’s draft plan is lacking, he is confident that the FWS will listen to concerns.

US Geological Survey:

BILL AIMS TO HELP AGENCIES ADAPT TO CLIMATE CHANGE. The Missoula (MT) Independent (7/18, 22K) reports on the legislation recently introduced “to jumpstart climate adaptation on federal lands.” The Safeguarding America’s Future and the Environment (SAFE) Act “aims to make climate adaptation planning a requirement of all federal natural resources agencies.” The bill “would also establish a National Climate Change and Wildlife Science Center within the USGS, to focus efforts on helping public land and natural resources stand up to

climate change.”

USGS TO USE CAL STATE BUILDING DEMOLITION TO STUDY HAYWARD FAULT. The San Jose (CA) Mercury News (7/19, Parr, 539K) reports that “scientists are taking advantage of next month’s implosion of a 13-story Cal State East Bay building to study a portion of the Hayward Fault using seismic monitors they will place throughout nearby neighborhoods.” According to Leslie Gordon, USGS communications specialist, “the implosion of Warren Hall will produce energy similar to a very small earthquake and because scientists know when and where the quakelike event will occur, they can closely monitor the event.” The article notes that “the data collected will help them better understand the Hayward Fault zone, which lies a little more than 750 yards west of the building.”

Securing America’s Energy Future:

Renewable Energy:

FWS APPROVES BUCKEYE WIND CONSERVATION PLAN FOR INDIANA BAT. The Urbana (OH) Citizen (7/19, 5K) reports that the FWS “approved an extensive habitat conservation plan and issued an incidental take permit to Buckeye Wind LLC in the Buckeye Wind Farm projects according to a press release issued on Thursday.” It “allows for the incidental ‘take’ of a small number of endangered Indiana bats at its proposed wind power project in eastern Champaign County.” According to the article, “to offset the loss of Indiana bats, Buckeye Wind must follow the approved habitat conservation plan designed specifically for the Indiana bat.”

Onshore Energy Development:

BLM CRITICIZED FOR SELLING LEASES UNDER CONTESTED MANAGEMENT PLAN. The E&E Daily (7/18) reports that “several of the oil and gas leases sold at a” BLM “lease sale here yesterday fall under an almost 30-year-old management plan and therefore should have stayed on the shelf,” critics charge. According to the article, “at its quarterly lease sale, which included parcels in New Mexico, Oklahoma and Texas, Red Dirt Energy LLC of Oklahoma City snagged leases for five parcels in southern New Mexico’s Otero County totaling 1,166 acres.” Several environmental groups claimed the bureau “should not have leased the five Otero County parcels because they are managed under a resource management plan that dates back to 1986, before industry showed much interest in the area.”

MARCELLUS SHALE DEVELOPMENT LEADING NORTHEAST TOWARD NATURAL GAS SELF-SUFFICIENCY. The E&E Daily (7/18) reports that a recent report by commodity analysts at Citigroup said that “shale gas development across Pennsylvania, Ohio and West Virginia is driving at future regional self-sufficiency and in the meantime changing the dynamic of US gas pricing out of the Henry Hub in Louisiana.” According to the report, “the need to fill underground natural gas caverns in the eastern United States to prepare for frigid New England winters could come to an end if pipelines keep building on their capacity to move Marcellus Shale gas.”

“HABITAT EXCHANGE” PROPOSED FOR PRAIRIE CHICKEN. The Upstream Online (7/19, Johnson, 7K) reports that “a recent report by Texas Tech University” and the USGS “found that the lesser prairie chicken, which nests in the grasslands of the Texas Panhandle and surrounding areas, could by 2050 see its reproductive opportunities decrease to a level below what is required to sustain its current population.” The report “pointed to climate change as the primary culprit,” but “rampant drilling activity in the Permian basin, Granite Wash and Rocky Mountain areas, among others, also poses a threat, and could accelerate the bird’s already decreasing ranks.” According to the article, “to address the potential conflict, ranchers and oil companies, along with the Environmental Defence Fund, are proposing a ‘habitat exchange’ that would allow both prairie chickens and oil producers to thrive.”

AGENCIES ADMITS FAULT IN STREAM BUFFER ZONE RULE SUIT. The Law 360 (7/19, Rodriguez) reports that the Interior Department and the Environmental Protection Agency “on Wednesday admitted they violated the Endangered Species Act by not consulting with the Fish and Wildlife Service before approving a 2008 rule limiting surface coal mining near streams.”

FRACKING IN WYOMING UNDER FIRE. The Casper (WY) Star-Tribune (7/19, 22K) reports the method of

fracking to extract oil and natural gas in Wyoming is drawing a heated debate as critics say it could "pollute groundwater supplies." Wyoming is the first state to establish rules on fracking, which were challenged in March by environmental groups, saying that the Wyoming Oil and Gas Conservation Commission has been "too quick to offer trade secret exemptions to companies that want to protect the identity of chemicals in fluids pumped underground as part of the fracking process." The EPA "tentatively linked" fracking to contaminated wells last year and was attacked by "industry and state officials" who claimed their testing methods were false.

SOUTH DAKOTA BEATS NORTH DAKOTA IN LEASE OF OIL AND GAS FIELDS. The Rapid City (SD) Journal (7/19, 24K) reports "optimistic signs of expanded energy development" in South Dakota oil and gas fields. South Dakota actually beat North Dakota in the "total acres of Bureau of Land Management oil and gas leases sold" on Wednesday, selling 50 out of 87 oil-and-gas leases. However, BLM spokeswoman Kristen Lenhardt warned not to read too much into the numbers as "a variety of factors determine the amount of acreage up for lease."

Offshore Energy Development:

INTERIOR EXPECTED TO ASK FOR PUBLIC COMMENT ON ARCTIC OIL EXPLORATION IN COMING WEEKS. The E&E Daily (7/18) notes the ongoing speculation about the future of US Arctic exploration following Shell's mishaps during its 2012 drilling season. Some analysts believe that Shell's experiences "have seriously damaged" prospects for others to explore the area. Still, "most energy experts" believe Arctic oil exploration off the US coast will pick up in the future. However, drilling may not happen for awhile. As Kevin Casey of the Arctic Institute notes, Arctic development moves slowly, with companies spending between 10 and 20 years on exploration, financing, planning, and development before any oil is drilled. Regulatory battles are also key, with the industry prepared to fight environmental groups "over Alaska's future." Meanwhile, the Obama Administration is "paving the way for new Arctic drilling." Soon, the Interior Department is "expected to formally ask for public comment on which regions of the Chukchi Sea should be opened for future exploration and development."

REPORT BY COAST GUARD ON KULLUK EXPECTED IN MID-AUGUST. The Alaska Journal of Commerce (7/19, Bradner, 5K) reports the US Coast Guard plans to have a report out on the grounding of Shell's drillship Kulluk by the middle of August, according to a senior Coast Guard official. The Kulluk, used in Shell's arctic drilling in the summer of 2012 was "damaged...after being caught in a Gulf of Alaska storm" and the report may "fault Shell's decisions on the timing of moving the rig and equipment deployed for towing."

MARITIME SENIOR LEADERSHIP ROUNDTABLE ANNOUNCED. The Marine Link (7/19) reports the program for its Environmental Intelligence in Maritime Senior Leadership Roundtable has been announced. It "will be held in Anchorage, Alaska on August 8th, 2013, at the Captain Cook Hotel." According to the article, "giving updates on Coast Guard expectations will be RADM Tom Ostebo, followed by the Bureau of Safety and Environmental Enforcement's RADM James Watson."

Tackling America's Water Challenges:

BOR APPROVES \$5 BILLION INTEGRATED WATER PLAN. The Yakima (WA) Herald-Republic (7/19, Lester, 28K) reports that the BOR has approved "an ambitious and expensive plan to meet future Yakima River Basin water needs for people and fish." The bureau "has adopted the potentially \$5 billion proposal as the approach it intends to pursue over what could be the next 30 years if Congress provides authorization and funding." Its "decision is based on an environmental review that looked at the potential impact of those seven elements as a whole and not each individually."

SACRAMENTO-SAN JOAQUIN DELTA PLAN DRAFT CRITICIZED BY FEDERAL AGENCIES. The Los Angeles Times (7/19, Boxall, 692K) reports California's proposal to "re-plumb the Sacramento-San Joaquin Delta" are being criticized by Federal agencies. The Federal comments say the work is "insufficient, biased and confusing." The project is estimated to cost \$24 billion and the urban and agricultural water contractors who will be funding most of it "are hoping to get relief from environmental restrictions on their deliveries."

DELTA RESIDENTS HAVE SIGNS CONFISCATED. The Vacaville (CA) Reporter (7/19, Murphy, 17K) reports residents living near the Sacramento-San Joaquin River Delta had signs in their front yards "pulled out and confiscated" by Maintenance crews from Caltrans District 4. The signs were put up to "draw attention" to The Bay

Delta Conservation Plan and read "Save the Delta, Stop the Tunnels" in a reaction against Governor Brown's BDCP. The signs were "strategically placed on private property."

COLORADO COURT RULES TO GO AHEAD WITH PIPELINE. The Colorado Springs (CO) Independent (7/18, 36K) reports that the Colorado Court of Appeals has ruled to uphold the state's "approval of a certification for the Southern Delivery Pipeline water project." The ruling means a "hurdle that has been cited by Pueblo County in correspondence with the Interior Department as a roadblock for SDS has been removed." SDS program director John Fredell said that "today's decision is one more major milestone for the SDS project, which is proceeding on schedule and under budget."

ADDITIONAL COVERAGE OF COLORADO RIVER. Additional coverage of the Colorado River was provided by the Durango Herald (7/16, Jones, 8K), the Laramie (WY) Boomerang (7/18, 5K), the Casa Grande (AZ) Dispatch (7/19, 7K), and the Arizona Capitol Times (7/18, Eaton).

STUDIES DON'T HELP SALMON SURVIVE. In an opinion article for the Modesto (CA) Bee (7/18, 59K) Steve Knell, the general manager of the Oakdale Irrigation District, and Jeff Shields the general manager of the South San Joaquin Irrigation District argue that the countless studies done on the "health of our native salmon and steelhead populations" are not helping their survival. They argue that the problem is that there is "no active program in California addressing non-native predator fish" who threaten the salmon population. They claim that "additional studies at the expense of immediate action are no longer appropriate" and that districts should support "House Resolution 2705, which would establish a five-year pilot program to remove non-native predator fish from the Stanislaus River" proposed by Rep. Jeff Denham.

Empowering Native American Communities:

SUPPORT GROWS FOR TRIBAL CONTROL IN CHILD WELFARE. The Sioux Falls (SD) Argus Leader (7/19, Young, 34K) reports that Gov. Dennis Daugaard has "sent a letter to Health and Human Services Secretary Kathleen Sebelius saying he supports tribal efforts in South Dakota to run their own child welfare and foster care services." The move "is a positive sign to Danny Sheehan, chief counsel for the Lakota People's Law Project, a nonprofit that has provided expertise to the tribes since 2006 on the Indian Child Welfare Act." The article notes that "after a report by National Public Radio in 2011, concern had been building among the tribes that the Department of Social Services repeatedly had violated ICWA," and that a Rapid City conference was attended by Kevin Washburn, the U.S. Interior Department's assistant secretary for Indian Affairs in May

PROPOSED BIA RULE COULD CREATE NEW CASINOS IN CONNECTICUT. The Greenwich (CT) Time (7/19, 7K) reports the BIA's proposed change in how tribes are recognized could "revive long dormant plans to build an Indian casino along the western I-84 corridor, Bridgeport and elsewhere" in Connecticut. Both the Schaghticoke and Golden Hill Paugussett tribes would benefit from the change, as it would make it easier for them to gain recognition, and "the ability to offer gambling on federally held reservation land."

MEDFORD VOICE THEIR OPPOSITION TO BIA RULE CHANGE. The Medford (OR) Mail Tribune (7/18, 21K) reports Medford City Council is opposing the BIA's effort to "speed up the process for tribes seeking to open casino." This comes as no surprise, as the council has previously "voiced its opposition to a Coquille Indian Tribe proposal to place land in southern Medford into trust." The Coquille eventually designed to build a casino there.

FORMER NORTHERN CHEYENNE PRESIDENT WAITS FOR BIA DECISION. The Helena (MT) Independent Record (7/19, 12K) reports ousted president of the Northern Cheyenne tribe, John Robinson, is waiting to see whether the BIA "signs off on the tribal council's decision to remove him." The BIA will review the council resolution that fired Robinson to "ensure the language is correct and the constitution followed."

JUDGE RULES TRIBAL CLAIMS SUBMITTED TOO LATE. The Courthouse News (7/18) reports that a Federal judge ruled that Quapaw tribal members "waited too long to accuse the US government of failing to protect their land." The Quapaw claim the Federal government leased their land to "lead and zinc mining activities in the late 1800s" which caused a by-product, "chat" which is environmentally hazardous. The tribe claims that the "chat accumulation contaminated tribal soil and ground water, and destroyed the land for agricultural use."

SPIRIT LAKE TRIBE COUNCIL APPEALS YANKTON REINSTATEMENT. The Bismarck (ND) Tribune (7/19) reports the Spirit Lake Nation tribal council has appealed a court ruling that would reinstate "embattled chairman" Roger Yankton Sr. Yankton had been removed earlier in July due to petitions accusing him of "corruption, intimidation and ineffective leadership." Although Yankton "returned briefly" as chairman on Wednesday, his opponents "obtained an emergency injunction from the Northern Plains Intertribal Court of Appeals" to throw him out of office.

TULE TRIBE PRESS FOR NEW CASINO. The Modesto (CA) Bee (7/17, 59K) reports the Tule River Indian Reservation government is "considering building a casino and resort at a more accessible location off tribal lands" despite already owning Eagle Mountain Casino in the mountains. The tribe told the county Board of Supervisors that if the tribe "finds a potential site...presumably near Porterville" it will "gladly work with county planners to mitigate traffic, public safety and other development concerns." County officials "greeted the statement as a warming of relations between county and tribe."

Top National News:

OBAMA TOUTS ACA HEALTH INSURANCE REBATES FOR 8.5 MILLION AMERICANS. President Obama's East Room event Thursday touting a provision of the Affordable Care Act that means approximately 8.5 million Americans will receive rebates averaging \$100 from insurance companies was covered by just one broadcast network but did get coverage in most major national newspapers. While reports focus mainly on the President's remarks, some suggest a level of urgency and defensiveness given continued Republican attacks on the law and ongoing issues in implementation as the October 1 deadline for state-level insurance exchanges nears.

The CBS Evening News (7/18, story 9, 3:05, Pelley, 5.58M) reported that on Thursday, the President "promised what he called more 'bang for your buck' when a major part of his health insurance program opens for enrollment in October. The Affordable Care Act is facing public doubts and technical setbacks, but the President said today costs are already falling and will fall even more when uninsured Americans begin enrolling in healthcare exchanges, where insurance companies will compete for customers."

The AP (7/18, Superville) reports the President "drew attention to \$500 million in rebates going to nearly 9 million people under a provision of the law he said is holding insurance companies more accountable to their customers." Speaking in the East Room with "a group of healthcare consumers" on hand, the President said, "if they're not spending your premium dollars on healthcare, they have to give you some money back." The Hill (7/19, Baker, 21K) says the President also promised to "blow through" Republican criticisms of the law, saying, "If the folks who have been trying to make political hay out of this thing, if they had some better ideas, I've already told them I'm happy to hear them. But I haven't heard any so far."

The New York Times (7/19, Landler, Subscription Publication, 1.68M) says the President returned to "his episodic role as a vigorous campaigner" for the ACA, "flanked by families who have benefited" from a provision of the law that requires insurers to spend at least 80% of premium revenue on medical care, not overhead, and requiring those who do not do so to pay refunds. The President said, "Last year, millions of Americans opened letters from their insurance companies, but instead of the usual dread that comes with getting a bill, they were pleasantly surprised with a check."

The Washington Post (7/19, Tumulty, 489K), in its report, highlights the difficulties the President faces in implementing his "most crucial piece of unfinished business, with much of his presidential legacy riding on whether it is deemed to have succeeded or failed." While his predecessors "have managed to overcome intense opposition to major new social initiatives," Obama "faces a degree of difficulty with health care that has no historic parallel." The Post says there was therefore "a certain urgency" in his Thursday remarks.

USA Today (7/19, Madhani, 1.71M) says as the October 1 deadline for healthcare exchanges to be set up approaches, the Administration and Capitol Hill Republicans "are exchanging barbs and rewing up outreach efforts to make their case to the public in the most highly partisan policy battle" of the Obama presidency. The Wall Street Journal (7/19, Favole, Subscription Publication, 2.29M) reports the President questioned why Republicans continue to strive to dismantle the ACA, saying, "We're refighting these old battles. Sometimes I just try to figure out why. Maybe they think it's good politics." Reuters (7/18, Lawder) reports more and more

House Republicans say they will oppose the stopgap government funding bill or a debt ceiling increase unless the measures withhold funds for ACA implementation.

The Los Angeles Times (7/19, Levey, 692K) reports HHS said about 8.5 million Americans will receive rebates totaling about \$504 million. McClatchy (7/19, Douliery) says nearly 13 million people received rebates last year based on 2011 premiums, but the number has fallen as more companies came into compliance with the 80% rule. The New York Daily News (7/19, Warren, 543K) says the President "fought back rising criticism...with a defiantly simple message Thursday: the check is in the mail."

The Minneapolis Star Tribune (7/19, Diaz, 335K) notes that the provision the President touted Thursday was authored by Minnesota Sen. Al Franken. The President "said the provision has lowered premiums and provided rebates averaging \$100 each. Much of that money, however, goes to employers who provide insurance."

Bloomberg News (7/18, Runnigen, Lerer), Reuters (7/18, Felsenthal), the Washington Times (7/19, Boyer, 76K), Politico (7/19, Nather, 25K), and Huffington Post (7/18, Young) also report on the President's remarks.

HHS Report: Insurance Premiums At Exchanges To Be 18% Lower Than Previous Estimate. Reuters (7/18, Morgan) says an HHS report released Thursday forecast health insurance costs at state healthcare exchanges at lower rates than previously anticipated. HHS, examining data from 10 states and the District of Columbia, said preliminary 2014 premiums will be 18% lower on average than previous estimates. Bloomberg News (7/18, Lerer, Wayne) says monthly rates for so-called silver-level plans will average \$321, down from the earlier Congressional Budget Office estimate of \$392.

Iwry Says Treasury Has No Current Plans For Further ACA Implementation Delays. The Hill (7/19, Viebeck, 21K) reports Deputy Assistant Secretary of Treasury for Retirement and Health Policy J. Mark Iwry told the House Energy and Commerce subcommittee on Oversight and Investigations Thursday that Treasury "has no current plans to delay additional provisions" of the ACA. He said, "We don't have any specific provision that we've identified for which we would give some relief."

Sebelius Urged NAACP To Push For ACA Implementation This Week. The Washington Times (7/19, Chumley, 76K) notes that in her speech to the NAACP convention in Florida Tuesday, HHS Secretary Sebelius urged the civil rights group to press for ACA implementation "with the same furor they sought equal rights." Sebelius said, "Start spreading the word. Download tool kits and customize fliers to hang up at local businesses and restaurants and barbershops and beauty salons."

Donnelly Urges Revision Of ACA's Definition Of "Full-Time." Sen. Joe Donnelly writes in the Wall Street Journal (7/19, Subscription Publication, 2.29M) that because the ACA defines full-time employees as anyone working an average of 30 hours per week, many businesses are reducing employees' weekly hours to 29 or less, when part-time workers used to get 35 or more. This ACA definition, Donnelly argues, is inadvertently hurting part-time employees. He urges the passage of the "Forty Hours Is Full Time Act Of 2013," which would lift the ACA definition of full-time to an average of 40 hours per week.

More Commentary. The Wall Street Journal (7/19, Subscription Publication, 2.29M) says in an editorial that though the latest House votes to block ACA implementation were widely dismissed, the vote counts showed increasing Democratic dissatisfaction with parts of the law, with 35 Democrats voting to delay the employer mandate and 22 Democrats voting to repeal the individual mandate. While the repeal bills are certain to never become law, the Journal says the Democratic defections are significant because House Minority Leader Pelosi worked hard to keep her caucus in line.

The New York Times (7/19, Subscription Publication, 1.68M) says in an editorial that the House vote to repeal the ACA's individual mandate was "symbolic" and "designed purely for the campaign trail," but if it did become law, it would "harm the very people whose interests the Republicans claim to champion" since HHS said this week that the individual mandate is reducing consumer costs.

Kim Strassel writes in her Wall Street Journal (7/19, Subscription Publication, 2.29M) column that while Democrats had hoped 2014 would be the year when doubts about the ACA abated and the public's skepticism was overcome, instead supporters of the healthcare law are now confronting implementation delays, technical

glitches, funding shortfalls, and more.

Chapman University's Ronald Rotunda, "co-author of a six-volume treatise on constitutional law," writes in a Washington Post (7/19, 489K) op-ed that President Obama's decision to suspend the ACA employer mandate "has no support in precedent and dramatically shifts the arc of presidential power" since the law has a set implementation date and does not give the President "power to suspend or postpone" it. Rotunda writes, "If the president has the discretion to ignore laws that he prefers not to exist, the constitutional limits of presidential authority have the restraining power of air."

BERNANKE AGAIN SAYS END OF EASING NOT IMMEDIATELY LIKELY, COMMENTS ON INTEREST RATES. The New York Times (7/19, Appelbaum, Subscription Publication, 1.68M) reports that Fed Chairman Bermanke said on Thursday that it is "way too early to make any judgment" about a move to end his organization's easy-money policy "in September." Bermanke, speaking before the Senate, "largely repeated the themes and often the words of Wednesday's testimony."

USA Today (7/19, Davidson, 1.71M) reports Bermanke also "downplayed a recent report of sharp divisions among Fed policymakers over when to pull back its extraordinary economic stimulus." Bermanke said that members of the FOMC "generally support a tentative plan to pare back the Fed's monthly bond purchases later this year and end them by mid-2014."

The Wall Street Journal (7/19, McGrane, Subscription Publication, 2.29M) reports Bermanke said that the financial tightening that has come with the recent increase in interest rates is "unwelcome." Bermanke said that the primary reason is the winding down of the "leveraged and perhaps excessively risky" positions adopted by investors taking advantage of the Fed's easy-money policy. Referring to the interest rate rise, Bermanke said, "It's probably a good thing to have that happen, although the tightening that's associated with that is unwelcome." He added that the rate increase has also eased concern among some Fed governors that their policy was creating a new financial bubble.

Yellen Seen As Most Likely Replacement For Bernanke. The Wall Street Journal (7/19, Hilsenrath, Izzo, Subscription Publication, 2.29M) reports economists they surveyed believe that Fed vice chairwoman Janet Yellen as the most likely replacement for Bermanke when his term ends in January. Thirty-five of 42 economists surveyed expected the President to select Yellen, while five believed that Lawrence Summers would get the post.

Partisan Leanings Color View Of Economy. The AP (7/18, Raum) reports that politicians and economists are "straining to get a clearer view" of what the economy will look like when the mid-term elections heat up next summer, and while Republicans "see the glass half empty," Democrats see it as "half full," while economists "aren't sure." Economists' forecasts are "suddenly all over the map." Some see US growth "stuck below 2 percent for some time, while others – among them the Federal Reserve and the White House – predict it will climb above 3 percent as soon as next year."

Index Of Leading Indicators Unchanged In June. Bloomberg News (7/18, Woellert) reports the Conference Board's Index of Leading Indicators was unchanged in June, "indicating the world's largest economy will follow a fitful path in shaking off the effects of federal spending cuts and tax increases that slowed growth in the first half of 2013." Bloomberg says that the median expectation of economists it surveyed was for a 0.2% increase to the index.

Jobless Claims Plummet. Reuters (7/19) reports first-time claims for jobless benefits fell 24,000 to 334,000 last week, the lowest reading since May. The four-week moving average, which irons out week-to-week volatility, fell 5,250. Economists told Reuters that the numbers were indicative with moderate job growth.

Western States Tops In Job Creation. The Wall Street Journal (7/19, Morath, 2.29M) reports that nine of the 10 states with the fastest rate of employment growth lie west of the Mississippi. According to new Department of Labor data released Thursday, payrolls in Idaho were up 3% over the last year, followed by Texas, Colorado and North Dakota, all whom saw greater than 2.5% growth.

Dow, S&P Hit New Highs. The Wall Street Journal (7/19, Dieterich, Subscription Publication, 2.29M) reports that the Dow Jones Industrial Average rose 78.02 points to 15,548.54, while the S&P 500 rose 8.46 points to

1,689.37, both record highs. The Journal credits positive economic reports for the increase. Meanwhile, the Nasdaq rose 1.28 points to 3,611.28.

DETROIT BECOMES LARGEST US CITY IN HISTORY TO FILE FOR BANKRUPTCY. Detroit became the largest city to file for bankruptcy protection in US history Thursday, a development that receives wide national and regional coverage. While reports focus on the specifics of Detroit's municipal woes, coverage also considers the city's long decline from its place as a center of American industry and innovation to its current malaise.

ABC World News (7/18, story 3, 1:45, Sawyer, 7.43M) said Detroit is "waving the white flag." ABC (Avila) added, "Once America's fourth largest city, Detroit now a stunning \$18 billion in debt." NBC Nightly News (7/18, story 3, 2:30, Williams, 7.86M) called Detroit "a great American city, once the engine of prosperity," now facing "such hard times the city is filing for bankruptcy, becoming the largest US city to do so. It is the latest chapter in what's been a slow-moving tragedy of decline." The CBS Evening News (7/18, story 8, 0:25, Pelley, 5.58M) ran a brief item on the filing.

The Detroit News (7/19, 119K) reports the White House said President Obama "is closely monitoring Detroit's financial situation." Politico (7/19, Epstein, 25K) reports spokesperson Amy Brundage said, "The President and members of the President's senior team continue to closely monitor the situation in Detroit. While leaders on the ground in Michigan and the city's creditors understand that they must find a solution to Detroit's serious financial challenge, we remain committed to continuing our strong partnership with Detroit as it works to recover and revitalize and maintain its status as one of America's great cities."

The AP (7/18) reports Detroit emergency manager Kewyn Orr filed for Chapter 9 bankruptcy protection in US Bankruptcy Court in the Eastern District of Michigan Thursday afternoon. The city "lost a quarter-million residents between 2000 and 2010. A population that in the 1950s reached 1.8 million is struggling to stay above 700,000." In recent months, the city "has relied on state-backed bond money to meet payroll for its approximately 10,000 employees."

The Detroit News (7/19, 119K) says the bankruptcy plan "was expected to closely follow" a restructuring proposal Orr outlined to creditors last month. The Wall Street Journal (7/19, Dolan, Subscription Publication, 2.29M) says the city is expected to report long-term liabilities of nearly \$20 billion, but the documents filed Thursday say only that assets and liabilities each exceed \$1 billion.

The Detroit Free Press (7/19, Kaffer, Henderson, Helms, 280K) reports Michigan Gov. Rick Snyder said, "The fiscal realities confronting Detroit have been ignored for too long. I'm making this tough decision so the people of Detroit will have the basic services they deserve and so we can start to put Detroit on a solid financial footing that will allow it to grow and prosper in the future."

The New York Times (7/19, Davey, Walsh, Subscription Publication, 1.68M) says for "the cradle of America's automobile industry," the filing "comes as a painful reminder of a city's rise and fall."

USA Today (7/19, Healey, Meier, Woodyard, 1.71M) says the bankruptcy filing "apparently won't affect the Detroit Three automakers." Chrysler, Ford, and General Motors all expressed support for the city Thursday and said their operations will continue as normal.

The Washington Post (7/19, Fletcher, 489K) similarly says the city has faced a "five-decade slide." Bloomberg News (7/18, Church, McCarty), Reuters (7/18, Carey), the Washington Times (7/19, Chasmar, 76K), and Huffington Post (7/18, Williams, White) also have reports.

More Commentary. USA Today (7/19, 1.71M) says in an editorial, "Though rare, municipal bankruptcy reorganizations have been on the rise of late." While the reasons differ, they "tend to have something that unites them: a decision to make unrealistic and inflexible pension promises for their public workers. As pension costs skyrocket, driven up by elected officials long gone when the bills come due, cities are forced to raise taxes or cut services to meet their obligations. ... The rest of the country needs to learn its lessons."

The Wall Street Journal (7/19, Subscription Publication, 2.29M) says in an editorial that Detroit's bankruptcy will be a drawn-out process, likely to be fought in the courts as unions try to protect their pension plans, and in the

meantime the city will see little improvement in services and safety.

The Detroit Free Press (7/19, 280K) editorializes, "We never thought Kewyn Orr was crying wolf. And we suspect that residents and creditors who argue that the emergency manager has been exaggerating the severity of Detroit's fiscal plight or poor-mouthing its capacity to satisfy their claims are about to get the rudest possible awakening. ... Everyone – Orr, and especially residents – has to be disappointed that it came to this."

Editorial Wrap-Up:

NEW YORK TIMES. "The Good News On Insurance Premiums." The New York Times (7/19, Subscription Publication, 1.68M) says in an editorial that the House vote to repeal the ACA's individual mandate was "symbolic" and "designed purely for the campaign trail," but if it did become law, it would "harm the very people whose interests the Republicans claim to champion" since HHS said this week that the individual mandate is reducing consumer costs.

"Mr. Putin Tries To Crush Another Rival." A New York Times (7/19, Subscription Publication, 1.68M) editorial criticizes the conviction of anti-corruption campaigner and critic of President Vladimir Putin Alexei Navalny, arguing that Putin "seems weak and insecure" and noting that the image is "reinforced every time he manipulates the system to crush a potential political rival."

"Judging Rolling Stone By Its Cover." In an editorial, the New York Times (7/19, Subscription Publication, 1.68M) condemns the "hysteria" over the Rolling Stone magazine cover featuring accused Boston Marathon bomber Dzhokhar Tsarnaev arguing that "singling out one magazine issue for shunning is over the top." The Times notes that Time magazine covers have featured Adolf Hitler and Osama bin Laden, and that Charles Manson "appeared on Rolling Stone's cover 40-some years ago." The Times argues that the outcry on social media and the merchants who have refused to sell the magazine have ensured that "this issue should sell quite well."

"You (And Your Cell Phone) On Candid Camera."

WASHINGTON POST. "Power v. Power." In an editorial, the Washington Post (7/19, 489K) shows support for UN Ambassador-designate Power's previous stance against non-intervention in the Syrian civil war, while pointing out that President Obama has shown "passivity" in the conflict. The Post believes the UN will be unable to act while Assad still has a chance to succeed and "Assad's downfall seems increasingly unlikely unless the United States provides more assistance to the Syrian opposition than Mr. Obama has favored so far." The editorial board says the Senate should confirm Power and expresses hope that she will be able to work to resolve the Syrian conflict.

"Your Raisins Or Your Life." The Washington Post (7/19, 489K) editorializes that laws compelling the surrender of certain farm goods to the government under the Agricultural Marketing Agreement Act of 1937 are "relics of a long-gone era." The Post uses the example of Marin Home, a raisin farmer who took his claim against the USDA to the Supreme Court, which sent the case back to a Federal appeals court. Laws such as the one Home is fighting, the Post argues, are not worth the cost to farmers and lead to inflated prices for US customers. Because farms are larger and less numerous than in the past, the Post suggests that Congress "reconsider" the law altogether.

"Watergate In Prince George's."

THE WALL STREET JOURNAL. "ObamaCare's Eroding Support." The Wall Street Journal (7/19, Subscription Publication, 2.29M) says in an editorial that though the latest House votes to block ACA implementation were widely dismissed, the vote counts showed increasing Democratic dissatisfaction with parts of the law, with 35 Democrats voting to delay the employer mandate and 22 Democrats voting to repeal the individual mandate. While the repeal bills are certain to never become law, the Journal says the Democratic defections are significant because House Minority Leader Pelosi worked hard to keep her caucus in line.

"Carbon Politics Down Under." In an editorial, the Wall Street Journal (7/19, Subscription Publication, 2.29M)

argues that Australian Prime Minister Rudd's decision to revoke the carbon tax was made simply to make him look like he's against taxes, and revive the image of a moderate he campaigned under in the 2007 election. The Journal is eager to see if Australians will respond to this tactic in the next election.

"Free Alexei Navalny." An editorial in the Wall Street Journal (7/19, Subscription Publication, 2.29M) criticizes the Russian government's conviction of anti-corruption campaigner and critic of President Vladimir Putin Alexei Navalny and likens him to other political prisoners and dissidents like Mandela, Walesa, Havel, Sakharov, and Sharansky. The Journal calls on Europe and Canada to pass their versions of the Magnitsky Act and urges Western leaders to raise Navalny's case as often as possible with Putin.

"Down And Out In Detroit." The Wall Street Journal (7/19, Subscription Publication, 2.29M) says in an editorial that Detroit's bankruptcy will be a drawn-out process, likely to be fought in the courts as unions try to protect their pension plans, and in the meantime the city will see little improvement in services and safety.

CATO – MEDICAID – SEBELIUS; TACTICS — 1:30 p.m. “A Gun to the Head: Secretary Sebelius Coercive Tactics to Expand Medicaid” with Michael F. Cannon, Director of Health Policy Studies, Cato Institute; moderated by Laura Odat, Cato Institute. <http://www.cato.org/events/gun-head-secretary-sebelius-coercive-tactics-expand-Medicaid> REGISTER AT: events@cato.org, fax (202) 371-0841, or call (202) 789-5229 by 1:30PM on Thursday, July 18, 2013. Location: 2325 Rayburn.

Last Laughs:

LATE NIGHT POLITICAL HUMOR.

David Letterman: “Edward Snowden, the guy who leaked things from the NSA and is now living at the Moscow airport, I mean think about that. Living...I mean isn't that like every JetBlue flight? We were supposed to take off Wednesday, aren't we? Why are we still at the airport?”

David Letterman: “But apparently the staff of the Moscow airport is treating the guy very nicely. Every night they leave a mint on his neck pillow.”

David Letterman: “And they're even saying now that this Edward Snowden guy could be nominated for a Nobel Peace Prize. Whoa, how about that. Yeah. It's between him and the team that brought back Twinkies. Very close.”

Stephen Colbert: “Nation, today marks the 25th day that NSA leaker Edward Snowden has been holed up in the Moscow international airport. He has been there so long he has finished his second Cinnabon.”

Stephen Colbert: “And now, folks, we may never get our hands on this traitor because he has officially petitioned Russia for asylum. Of course Russia was his fallback. He couldn't get asylum in Ecuador or Dartmouth.”

Stephen Colbert: (Referring to the sexual harassment accusations against San Diego Mayor Bob Filner) “Now despite his admission, Mayor Filner has announced will not resign. And folks I'm not surprised. These days the public is very forgiving of politicians and sex scandals, Mark Sanford has been re-elected to Congress and right now in New York City's mayoral race, city council speaker Christine Quinn and former penis self-portraitist Anthony Weiner are running neck and what I hope is his neck. Now no surprise, folks, no surprise New Yorkers are willing to overlook Weiner's previous indiscretions. I mean if they were disturbed by seeing exposed genital they wouldn't ride the subway.”

Jay Leno: “Just a few hours ago, Detroit became the largest city in US history to file for bankruptcy. That's financial bankruptcy. Don't confuse that with L.A. That's moral bankruptcy.”

Jay Leno: “Here's a sign of the times. Obesity is becoming such a huge problem in this country a lot of people are literally too fat for ambulances or getting too heavy even for rescue helicopters to airlift them to the hospital. Can you imagine? You know something? We need to forget about Obamacare. What we need in this country is Chris Christie-care. That's what we need.”

Conan O'Brien: “Get this, a conservative consultant meant to send Michele Bachmann a massager for her migraines but accidentally sent her a vibrator. Yeah. Bachmann was outraged, but an hour later she was calm and...serene.”

Conan O'Brien: “In a new interview about the New York elections, Eliot Spitzer, who you remember was caught frequenting prostitutes, described himself as a feminist. Yes, the famed interviewer, Anthony Weiner, describes himself as a photographer.”

Interesting. Great headline and positive advance piece - but knowing what material she had to work with (background, 20-min interview), this falls short. (b)(5).

The Seattle Times preview story is up:

Interior Secretary Jewell dives into pressing issues

Since her confirmation as Interior secretary in April, former REI Chief Executive Sally Jewell has immersed herself in the pressing issues facing her vast agency.

By Kyung M. Song

Seattle Times Washington bureau

WASHINGTON — Since her confirmation as Interior secretary in April, former REI Chief Executive Sally Jewell has immersed herself in the pressing issues facing her vast agency, from updating hydraulic-fracturing regulations to protecting sage grouse and opening more lands and waters to oil and gas exploration.

During that time, perhaps the biggest news from Jewell's former employer was Recreational Equipment Inc.'s decision to replace its lifetime merchandise-return policy with a one-year limit.

Even for an engineer-turned-banker-turned-retail-executive, Jewell's venture into public service has been quite a shift.

"This is an enormous job," she said in an interview Thursday.

Saturday marks Jewell's 100th day as the nation's 51st Interior secretary. Coincidentally, she'll be making her first public appearance as secretary in Washington state that same day, at a summit for youth and the outdoors at the University of Washington.

Connecting children and families with nature is a priority for Jewell, one of the only Cabinet secretaries who travels with a backpack.

Jewell has devoted much of her first months in office familiarizing herself with Interior's far-flung operations.

She has toured an offshore-drilling rig in the Gulf of Mexico, checked on restoration progress at the Everglades National Park and attended the memorial for 19 firefighters killed in an Arizona wildfire.

She also has met frequently with Senate and House members, tending to the political business that is no small part of her job.

Republicans, chief among them Rep. Doc Hastings of Pasco, chairman of the House Natural Resources Committee that has oversight of Jewell's department, has been agitating for the Obama administration to open up more federal waters that ring the coastal states to oil and gas drilling.

In 2012, the Interior Department collected \$12.2 billion in revenue from oil, gas and other leases. Jewell has said in congressional testimony and on Capitol Hill that the administration will pursue energy exploration safely and responsibly while meeting the nation's security needs.

She said her previous careers, especially her days as a petroleum engineer and a commercial banker, have served her well in her new role.

"To actually know what (hydraulic fracturing) is, having done it myself and recognizing the risks" has been extremely valuable, she said.

Jewell said she plans to follow advice she received to focus on a few key issues that would mark her tenure at Interior, adding that she was still working on that list.

But she mentioned the 2016 centennial of the National Park Service, one of her department's agencies. She called it a chance to celebrate the national-park system's cultural and natural treasures.

Jewell also talked about Interior Department's responsibility to American Indians and Alaska natives. The Interior's Bureau of Indian Affairs is charged with upholding treaty obligations with tribes on self-governance, education for native students and other matters.

DOI in the News:

INTERIOR ANNOUNCES SEPTEMBER AUCTION DATE FOR OFFSHORE WIND FARMS. The AP (7/22, Szkotak) reports that on Monday, the BOEM announced that "eight energy companies will bid Sept. 4 on a lease for a vast expanse of ocean off Virginia's coast set aside for the development of wind farms." The auction "is a critical step in establishing what would be among the first offshore wind turbines in US waters, possibly rising above the ocean surface by the end of the decade." In a statement, Interior Secretary Sally Jewell said, "Responsible commercial wind energy development has the potential to create jobs, increase our energy security

and strengthen our nation's competitiveness."

In its "E2 Wire" blog, [The Hill](#) (7/22, Colman, 21K) reports that "the planned Virginia site is 23.5 nautical miles from Virginia Beach, Va., and could generate 2,000 megawatts — enough to power roughly 700,000 homes, according to Interior." According to the article, "the Monday announcement could hint that Interior is ready to charge ahead with offshore wind." However, "Jewell has cautioned that it will take time to develop a domestic offshore wind industry."

[Platts](#) (7/23, Scheid) reports that BOEM Director Tommy Beaudreau said, "After careful review, [the Bureau of Ocean Energy Management] has determined that these companies are legally, technically and financially qualified to participate in the upcoming lease sale. We applaud their leadership and look forward to overseeing a fair and competitive leasing process."

The [Newport News \(VA\) Daily Press](#) (7/23, Dietrich, 62K) reports that "the move was praised by federal and state officials and environmental groups for its potential to create jobs, strengthen the country's energy security and competitiveness and develop large-scale clean energy projects." The office of Gov. Bob McDonnell's said it is "an exciting and significant step in our bipartisan effort to advance Virginia's 'all-of-the-above' energy strategy."

The [Hampton Roads \(VA\) Virginian Pilot](#) (7/23, Harper) reports that "environmental groups applauded the auction date in Virginia but said they worried about the winner-take-all guidelines." In particular, "they fear that Dominion will gain control of the wind zone and then wait to develop wind farms until the economics are more suitable." Beth Kemler, Virginia director of the Chesapeake Climate Action Network, said, "We don't want the company to buy up the whole lease block and then sit on it for years and years. We need companies to develop large-scale clean energy products as quickly as possible."

Also reporting on the story are the [Washington Post](#) (7/22, Szkotak), the [San Francisco Chronicle](#) (7/23, Szkotak, 220K), the [Miami Herald](#) (7/23, Szkotak, 139K), [Yahoo!](#) (7/23, Szkotak), the [Richmond \(VA\) Times-Dispatch](#) (7/22, 113K), the [Portland \(ME\) Press Herald](#) (7/23, Szkotak, 46K), the [Richmond \(VA\) Times-Dispatch](#) (7/23, Springston, 113K), the [Northern Virginia Daily](#) (7/22, 15K), the [Baltimore Daily Record](#) (7/22, 10K), the [Charlottesville \(VA\) Daily Progress](#) (7/22, 28K), the [Hampton Roads \(VA\) Virginian Pilot](#) (7/22), the [King George \(VA\) Journal Press](#) (7/23, 2K), the [Virginia Business Magazine](#) (7/23, 27K), the [International Business Times](#) (7/23), [reNews](#) (7/23), [Recharge News](#) (7/22, Kessler), [North American Windpower](#) (7/23, 15K), [Power Engineering](#) (7/23), the [Investor's Business Daily](#) (7/22, Szkotak, 122K), the [Law 360](#) (7/23, Goldberg), and the [HotAir.com](#) (7/22).

HOUSE SPENDING BILL PROPOSES SIGNIFICANT CUTS FOR INTERIOR, EPA, AND FOREST SERVICE.

The [E&E Daily](#) (7/22) reports that House's fiscal 2014 Interior, Environment and Related Agencies spending bill proposes significant budget cuts for Federal environmental and natural resources programs. It "would provide \$24.3 billion for the Interior Department, US EPA and the Forest Service – a cut of \$4 billion compared with current levels even after sequestration took effect in March." Republican lawmakers "said in a statement that the low budget numbers were part of the House's commitment to shrink the federal debt by cutting spending and that efforts had been made to prioritize."

In a separate story, the [E&E Daily](#) (7/22) reports that the Interior Department "would be barred from establishing new national wildlife refuges without the consent of Congress under" the bill. For years, "House Republicans have complained...that new wildlife refuges stretch limited federal funding thin and that Congress should have oversight over which lands are designated." According to the article, "many believe Congress will simply extend current funding levels through a continuing resolution at the end of September, though the fate of policy riders such as the moratorium on new refuges would be unclear."

The [Washington Post](#) (7/22, 489K) reports that the bill "takes a more modest approach to the national parks with a slight increase over levels mandated by sequestration, the across-the-board cuts forced by Washington's failure to strike a bipartisan budget accord." Also, "firefighting efforts would benefit from \$1.5 billion in 'emergency' funds on top of the spending limits set by the GOP's austere budget plan."

[Politico](#) (7/23, Rogers, 25K) reports that for the NPS, "the bill adds back about \$24 million to operating accounts to keep facilities open next year." Rep. Mike Simpson, who chairs the natural resources subcommittee, said,

"Simply put, this bill makes very difficult choices in an extremely tough budget environment. We are going to see these kind of dramatic reductions as long as we keep trying to reduce the debt by cutting discretionary spending alone, rather than also tackling mandatory spending, which is the real driver of our debt."

Also reporting on the story are the Denver Post (7/23, Taylor, 443K), the Boston Herald (7/23, 91K), FOX News (7/22), the Chambersburg (PA) Public Opinion (7/23, Taylor, 15K), the Pasadena (CA) Star-News (7/23), and the Talking Points Memo (7/23, Kapur).

ASSISTANT SECRETARY SOBECK: NO PLANS TO STOP OMBUDSMAN SHUTDOWN. The Saipan Tribune (7/23) reports that "Interior Assistant Secretary Eileen Sobeck's vehicle drove past but she did not roll down her window nor stop by to talk to a small group of ralliers in Garapan who are pressing the Interior Department to retain the Federal Labor Ombudsman's Office in the CNMI beyond fiscal year 2013." Later, Sobeck said "that the plan to close the office remains and that a transition plan is now underway." When "asked which agencies will absorb all the functions of the ombudsman's office," said Sobeck answered, "We're working on that."

Also reporting on the story is the Pacific News Center (7/23).

HISTORIC REMOVAL OF VEAZIE DAM BEGINS. The Penobscot (ME) Bay Pilot (7/23) report that contractors have begun "to remove the Veazie Dam from the Penobscot River, the second largest river in New England, reconnecting the river with the Gulf of Maine for the first time in nearly two centuries." According to the article, "the project first originated when PPL Corporation, a Pennsylvania-based energy company, purchased the Penobscot dams in 1999." The article adds that "PPL, along with the US Department of the Interior, the Penobscot Indian Nation, the State of Maine, and several conservation groups, worked to develop a comprehensive solution to a large number of issues involving hydropower relicensing, migratory fish passage and ecological restoration on the Penobscot River."

INTERIOR'S INSTAGRAM ACCOUNT ATTRACTS 70,000 FOLLOWERS. The Huffington Post (7/22, Grenoble) reports that the Interior Department's "well curated Instagram account" offers "photos from a smattering of professional photographers and DOI staffers, typically alongside a description of when, where, and (sometimes) how the photo was taken." It "has racked up just shy of 70,000 followers with nearly 700 posts, earning a thumbs-up from professionals and buzz-hungry internet fiends alike."

FWS AWARDS GRANTS TO CONSERVATION PROJECTS. The Kaua'i (HI) Garden Island News (7/23, 10K) reports that, last week, the FWS "awarded a pair of grants totaling nearly \$1 million to local conservation projects." According to the article, "more than \$508,000 will go toward developing an island-wide Habitat Conservation Plan for incidental take of the federally endangered Nene, or Hawaiian Goose" Also, "the Kauai Seabird Habitat Conservation Program will receive more than \$445,000." In a release, Interior Secretary Sally Jewell said, "Our nation's most effective conservation efforts are partnerships in which federal, state and local governments work hand-in-hand with private landowners and other stakeholders. The cooperative grants announced today will make it possible to build these voluntary partnerships to conserve the vital habitat of diverse threatened and endangered species."

SECRETARY JEWELL VOWS TO WORK ON PRAIRIE DOGS. The St. George (UT) Spectrum (7/22, Wentz, 15K) reports that "after Rep. Chris Stewart, R-Utah, questioned" Interior Secretary Sally Jewell "last week about the status of the Utah prairie dog's listing as a threatened species, Jewell has agreed to work with Stewart to ensure prairie dogs living on private and public lands will be counted when assessing the species' listing with the Endangered Species Act." According to Allison Barker, communications director for Stewart's Washington, DC, office, "the next step after Jewell's agreement with Stewart to reconsider the method of counting the dogs has not yet been determined."

HOUSE APPROVES CALIFORNIA COASTAL NATIONAL MONUMENT EXPANSION ACT OF 2013. The San Jose (CA) Mercury News (7/23, Halstead, 539K) reports that the House has approved the California Coastal National Monument Expansion Act of 2013 "on a voice vote." The bill "instructs the Secretary of the Interior to finalize an amendment to the monument's management plan within two years for the long-term protection and management of the 1,255 acres." The legislation "would add 10 miles to the California Coastal Trail and includes the Garcia Estuary and two miles of the Garcia River, a critical habitat for salmon and steelhead."

The Los Angeles Times (7/23, Simon, 692K) reports that "once the bill clears Congress and is signed into law by President Obama, as expected, the Mendocino County site would be the first onshore addition to the monument, established in 2000 by President Clinton to protect small islands, reefs, rocks and pinnacles off California's coast." The article notes that "Republicans have been critical of President Obama's creation of national monuments when Washington has a backlog of unfunded park maintenance projects." However, "most of the land in the proposed expansion is already owned by the federal government and the expansion would not have a significant effect on the federal budget."

AGENCIES ASSESS PINE NUT MOUNTAINS FOR REHABILITATION. The Gardnerville (NV) Record Courier (7/23, 6K) reports that "federal and state agencies are assessing the areas of the Pine Nut Mountains burned in the Bison fire to determine places suitable for rehabilitation and stabilization." The BLM, Carson City District and BIA Western Nevada Agency are "leading an interagency planning effort to address fire impacts caused by the fire." According to the article, "among the 24,136 acres burned by the fire, which was started by lightning on July 4, were more than 11,000 acres of bi-state greater sage-grouse habitat."

ACTIVIST APPEALS WYOMING GOV. MEAD'S DENIAL OF GRIZZLY RECORDS. The Casper (WY) Star-Tribune (7/23, 22K) reports that "a dispute over an activist's request to inspect documents regarding grizzly bears sets the stage for another round of arguments at the Wyoming Supreme Court over whether public officials have the right to withhold materials they use in reaching final decisions about policy matters." Grizzly activist Robert Aland "filed a brief with the state Supreme Court last week arguing that Gov. Matt Mead and Scott Talbott, director of the Wyoming Game and Fish Department, were unjustified in withholding records he requested regarding grizzly bear management." According to the article, "Aland had filed a request for records supporting Mead's conclusion that grizzly population is healthy enough that federal Endangered Species Act protections are no longer needed." Mead "made the statement in a May 2012 letter to then-Interior Secretary Ken Salazar."

CONTINUING COVERAGE OF SEQUESTER. On its website, MSNBC (7/22, Noah) reports that "visitors to the Washington Monument during this summer of sequestration may think the Obama administration, which wants to restore the automatic budget cuts that took effect in March, is playing (and winning at) some version of" the Washington Monument syndrome. But "as it happens, though, the cause" of the monument's closure "is not budgetary brinkmanship, but rather a freak earthquake that occurred in 2011" However, "a shutdown of White House tours—which arguably was an Obama ploy to turn the public against the sequester—backfired politically (or is backfiring at least for now)."

ADDITIONAL COVERAGE OF WESTERN WATERSHED ENHANCEMENT PARTNERSHIP. Additional coverage of the Western Watershed Enhancement Partnership was provided by the Cortez (CO) Journal (7/22), the Suwannee (FL) Democrat (7/23, 5K), the Central Valley (CA) Business Times (7/23), and the Circle of Blue WaterNews (7/23).

NATIVE AMERICAN ELDER HOPES SECRETARY JEWELL WILL BRING CHANGE. In an op-ed for the Elko (NV) Daily Free Press (7/23, Coochum, 7K), Manuel Coochum, an elder of the Elko Indian Colony, writes that "our Indian people's sovereign rights have been violated for years by the bureaucrats, but today some of our present Indian elders are still waiting for that word of forgiveness from the bureaucrats." He notes that "today there is a new leader, Interior Secretary Sally Jewell, finding the balance and the understanding of our issues past and present." Coochum hopes "there is a change in all Indian Country because of her."

America's Great Outdoors:

National Park Service:

YOSEMITE TAKES STEPS TO PREVENT ANOTHER OUTBREAK OF HANTAVIRUS. The Milwaukee Journal Sentinel (7/23, 221K) reports that DNC Parks & Resorts of Yosemite, "which operates the lodgings and other businesses in Yosemite National Park, has gone to great lengths to prevent another outbreak" of last year's hantavirus. According to the article, 91 Signature Tent cabins, "the relatively new structures that turned out to be well-suited for harboring infected mice, were torn down earlier this year." Also, "park employees now take more time to clean structures — at least 15 minutes for the Curry Village tent cabins — and watch for mouse droppings." And "park authorities also have redoubled efforts to educate visitors about the importance of stowing

food so mice, as well as bears, deer and other animals, can't get to it."

BILLS SEEK TO BOOST BUFFALO SOLDIER HISTORY IN NATIONAL PARKS. For the "Goat" blog of the High Country (CO) News (7/23, Wiles, 25K), Tay Wiles writes that "two bills awaiting review in the Senate could mean" that the NPS "will recount the history of African-American soldiers in a more complete way." According to the article, "the legislation would enable a \$400,000 deep-dive research project to unearth the history of Buffalo Soldiers' stewardship in the parks, consider how to better share that narrative in the parks, and evaluate the feasibility of creating a national historic trail commemorating the soldiers' treks from San Francisco's Presidio to Yosemite and Sequoia Parks, where they served in the summers of 1899, 1903 and 1904."

MAMMOTH CAVE SEEKS PUBLIC COMMENTS. WBKO-TV Bowling Green, KY (7/23) reports that "despite budget cuts and weather that's not normal for this time of year, Mammoth Cave National Park is hosting several tourists from all over the country." But "while the park is seeing great numbers in terms of visitors, they're also asking for your help." The park is "preparing a foundation document that Craighead says involves revisiting the park's core mission."

Also reporting on the story are WYMT-TV Hazard, KY (7/23) and WHAS-TV Louisville, KY (7/23).

BOY BURIED BY SAND DUNE CONTINUES IMPROVEMENT. WTSP-TV St. Petersburg, FL (7/23) reports that Nathan Woessner, "the little boy buried alive by a sand dune less than two weeks ago, is making a strong recovery, walking alongside his father for the first time in the hospital on Monday." Dr. Diana Mitchell of The University of Chicago Medicine Comer Children's Hospital, "where Nathan is being treated," said, "Nathan is listed as in good condition and continues to improve. He returns to a regular diet today and can leave his room to visit the playroom."

ADDITIONAL COVERAGE OF WORK TO REMOVE QUOTE FROM MLK JR. MEMORIAL. Additional coverage of the work to remove the controversial quote from the Martin Luther King Jr. Memorial was provided by the Washington Times (7/23, Somers, 76K).

YOSEMITE MERCED RIVER PLAN CRITICIZED. In an editorial, the Victorville (CA) Daily Press (7/23) criticizes environmentalists who are pushing "to end bike, horse and river rentals, scrap ice skating and remove the swimming pools at the Yosemite Lodge and Ahwahnee Hotel." The paper says that "California congressmen were right to heatedly denounce the plan at a recent House hearing."

Bureau of Land Management:

DUNES FEE MEETING POSTPONED. The Riverside (CA) Press Enterprise (7/22, 130K) reports that "a July 27 meeting of the" BLM's "Desert Advisory Committee in Riverside has been postponed." It "was to consider a proposed fee increase for the Glamis off-roading." According to BLM officials, "the meeting will be rescheduled for some time in August, and a notice will be posted in the Federal Register at least 15 days in advance."

RED CLIFFS RECREATION AREA TEMPORARILY CLOSED DUE TO FLOOD DAMAGE. The St. George (UT) Spectrum (7/22, 15K) reports that the BLM Utah St. George Field Office is "temporarily closing the Red Cliffs Recreation Area campground and day-use area until flood damages are repaired." Crews are "evaluating the damage and will begin necessary repairs in the near future."

ADDITIONAL COVERAGE OF PLAN TO ROUND UP 1,300 WILD HORSES. Additional coverage of the plan to round up 1,300 wild horses in the West this summer was provided by KRQE-TV Albuquerque, NM (7/23).

Fish and Wildlife Service:

RESEARCH QUESTIONS ENDANGERED CLAIM FOR WHITE BLUFFS BLADDERPOD. The Tacoma (WA) News Tribune (7/22, Folsom, 77K) reports that "a DNA test, funded largely by area farmers" has concluded that "there was no genetic deviation between the White Bluffs bladderpod and...other samples – meaning genetically it is the same as the common Douglas's bladderpod." According to West Richland agronomist Stuart Turner, "that means the plant is not endangered and that Fish and Wildlife has no legal basis to push forward with its

endangered species listing for the bladderpod, which would declare up to 419 acres of private land near the Hanford Reach National Monument in Franklin County as critical habitat.”

FWS EXTENDS COMMENT PERIOD FOR PROPOSED FROG LISTING. The [Salem \(OR\) Capital Press](#) (7/23, 38K) reports that the FWS “has granted a 120-day extension for comments on proposed Endangered Species Act protections for the yellow-legged frog and Yosemite toad.”

DRUNK DRIVER FACES MANSLAUGHTER CHARGE FOR CRASH THAT KILLED FWS WORKERS. The [Sioux Falls \(SD\) Argus Leader](#) (7/22, 34K) reports that “a drunk driver was behind the wheel of a Pickstown car crash earlier this month that killed two researchers with the US Fish and Wildlife Service, authorities allege.” A warrant for Ronald Ray Fischer Jr.’s “arrest was issued Friday,” but “apprehending the 28-year-old, who checked out of Avera McKennan Hospital in Sioux Falls more than a week ago, may take some time because he lives on the Yankton Indian Reservation, outside the sheriff office’s jurisdiction.”

FWS PARTNERS TO PROTECT FLORIDA’S FISH AND WILDLIFE. For “The Blog” of the [Huffington Post](#) (7/23, Wiley, Dohner), Nick Wiley and Cindy Dohner write that the FWS and Florida’s Fish and Wildlife Conservation Commission “took an important step last year to streamline and simplify a process to protect threatened and endangered species.” They claim that “the amendment to our long-standing cooperative agreement – the first of its kind – represents a cooperative, load-sharing arrangement that consolidates two permitting processes into one, serves our citizens more efficiently and enhances our conservation work to protect imperiled species.” According to the two, “it represents our strong partnership and the belief that the agreement will allow both agencies to concentrate our resources on what matters most: conserving Florida’s unique fish and wildlife for the continuing benefit of Floridians from the Panhandle to the Keys.”

Securing America’s Energy Future:

Onshore Energy Development:

BLM PROPOSED FRACKING RULES COULD COST DRILLERS AN ADDITIONAL \$354M PER YEAR. Reuters (7/22) reports that according to an economic analysis released last Thursday by Western Energy Alliance and the Independent Petroleum Association of America, amended BLM proposals for fracking on public lands could cost oil and gas companies more than \$345 million per year in additional costs, 90 percent of which would be attributed to requirements that drillers improve casing in wells. The article notes that the BLM originally estimated the costs at only \$12 million to \$20 million per year. The piece quotes Kathleen Sgamma, a vice president of government affairs for the Western Energy Alliance, as saying in a release, “While there are improvements in the second version of the rule, it still remains fundamentally flawed from an engineering perspective, as well as bad regulatory policy.”

Also reporting on the story are the [Upstream Online](#) (7/23, 7K) and the [Oil and Gas Journal](#) (7/23, Snow).

HOUSE PANEL TO HOLD HEARING ON FRACKING RULE. In its “E2 Wire” blog, [The Hill](#) (7/23, Geman, 21K) reports that on Thursday a House Natural Resources Committee panel will “hold a hearing on GOP legislation that would thwart planned Interior Department regulation of hydraulic fracturing, or ‘fracking,’ on public lands.”

HOUSE PANEL TAKES AIM AT MINING RULE. In its “E2 Wire” blog, [The Hill](#) (7/23, Colman, Geman, 21K) reports that a House Natural Resources panel will target “potential Interior Department rules that would tighten restrictions on disposal of waste from mountaintop removal coal mining.”

COLORADO AG SAYS FEDERAL WITHHOLDING OF MINERAL LEASING FUNDS IS “UNLAWFUL.” The AP (7/22) reports that, in a letter to the Americans for Prosperity Foundation, which the article calls “a free-market advocate,” Colorado Attorney General John Suthers wrote that “given the lack of articulated authority to sequester funds, I believe the sequester” of millions of dollars from Federal mineral leases “is unlawful, especially as it relates to royalty payments due to states under the federal Mineral Leasing Act.” The AP also says that “energy and mining companies pay royalties to the federal government for the rights to produce minerals from lands administered by the BLM, the U.S. Forest Service and other agencies,” which are to be split between the Federal government and “states and the local governments to help localities deal with the effects of energy and mineral

development” but that millions are “being withheld from the states...to reduce the federal budget deficit.”

DOMESTIC OIL PRODUCTION BOOMING ACROSS THE COUNTRY. FOX News (7/23, Burke) reports that “according to the Energy Information Administration, since 2010 oil production has increased 64% in Colorado, 51% in Oklahoma, 46% in New Mexico, 45% in Utah and 23% in Wyoming.” The article attributes technology to “the reason behind the boom” and quotes a BLM statement that said, “Domestic production from over 99,000 federal onshore oil and gas wells accounts for almost 13 percent of the nation’s natural gas production and 5 percent of its oil. In FY 2012, this amounted to about \$2.5 billion in royalties from onshore federal oil and gas production.” The article also notes, however, that “while industry critics say those figures are insignificant compared to what they could be, some conservationists believe the administration has gone too far in opening up federal lands in the West to oil and gas production.”

BLM IDENTIFIES COMPANY BEHIND LA PLATA DRILLING PLAN. A story by the AP in the Denver Post (7/23, 443K) reports that the BLM “has identified Mark A. O’Neal and Associates, based in Baton Rouge, La.,” as the firm “behind a request for more than 10,000 acres in La Plata County that are set to be leased for natural-gas and oil development in November.” The article notes that “the leases for eight parcels” of BLM-owned “minerals south and west of Hesperus were originally going to be auctioned off in February, but have been delayed over regulatory issues.”

Offshore Energy Development:

BOEM ANNOUNCES GULF LEASE AWARDS FROM MARCH 20 AUCTION. Platts (7/22, Gentile) reports that on Monday, the BOEM said it “awarded 307 leases from the March 20 Central Gulf of Mexico lease sale for a value of \$1.2 billion” and also threw out “13 high bids totaling \$15.6 million it said were ‘insufficient to provide the public with fair market value for the tracts.’” The article says that according to the BOEM, “those tracts will be re-offered at the next Central Gulf lease sale, tentatively scheduled for March.”

Also reporting on the story is the Marine Link (7/23).

DEEPWATER ACTIVITY IN GULF OF MEXICO EXPECTED TO CLIMB. Rigzone.com (7/23, Boman) reports that Barclays Capital analyst James C. West predicts “deepwater U.S. Gulf of Mexico drilling activity will continue to rise,” assuming the “continued strong permitting environment” continues in the Gulf, “especially in light of recent, very successful discovery announcement in the Lower Tertiary.” Additionally, “Barclays believes that near-term momentum for awards for ultra-deepwater rigs is building.” The piece cites the BOEM’s issuance of 45 permits for floating rigs in the Gulf in April, 36 in May, and 37 in June as proof of that momentum, which West expects “to persist in the coming months.”

SHELL PLANS SONAR SURVEYS OF CHUKCHI SEA. KTUU-TV Anchorage, AK (7/22, Klint) reports that Shell Oil is planning to “conduct sonar work in the Chukchi Sea this year, inspecting seafloor sites where it might build pipelines to offshore oil wells if its exploration plans for the Arctic” are successful. The article says that “the survey indicates Shell’s continued interest in Arctic drilling, despite its decision in February to shelve its 2013 plans for exploratory drilling in the Beaufort and Chukchi seas.” The BOEM has said that because the work is “considered ancillary to Shell’s Arctic exploration plan...it has no objection” to the survey work, “provided that they comply with Federal law.”

CHEVRON, OTHERS BUILDING NEW GULF OIL PLATFORMS. FuelFix (7/22, Shauk) reports, “Royal Dutch Shell, Chevron, Anadarko Petroleum and others are rushing to finish” oil platforms under construction at yards in Ingleside, “employing thousands amid a resurgence of activity aimed at oil riches in the Gulf.” Chevron’s Jack/St. Malo and Big Foot platforms are among the largest vessels being built. These new offshore vessels will produce from wells in the Gulf of Mexico “that weren’t reachable or even visible in the past” and “are multibillion dollar manifestations of the huge investments and profits in deep-water oil production, where interest from the biggest companies remains high.”

Tackling America’s Water Challenges:

FOLSOM LAKE, AMERICAN RIVER APPROACH 5-YEAR LOWS. The Merced (CA) Sun-Star (7/22, Weiser,

12K) reports that according to the BOR, the water level in Folsom Lake "will fall to a storage level of 241,000 acre-feet by December," which "is about one-fourth of total capacity." The article also says that "a shrunken lake also means less water to maintain flows in the American River. By October, the BOR estimates, flows will drop to about 1,000 cubic feet per second, or about one-third of where they are today." The Sun-Star says that "the lake has not reached such lows since December 2008, the last extended drought period, when it fell to as low as 199,000 acre-feet."

Also reporting on the story are the [San Luis Obispo \(CA\) Tribune](#) (7/22, Weiser, 32K), the [Woodland \(CA\) Daily Democrat](#) (7/23, 8K), and the [Inside Bay Area \(CA\)](#) (7/23).

BOR BEGINS DROPPING LUCKY PEAK RESERVOIR WATER LEVELS. Boise State Public Radio (7/22, Bamhill) reports that although it's five weeks earlier than usual, with water "supplies at about 50 percent of normal," the BOR "has started dropping water levels" in the Lucky Peak Reservoir "and is diverting the water for irrigation." The article says that the main effects of the action will be exposed boating ramps and, according to Brian Sauer, who manages water operations for the BOR, "the hydroelectric plant will also be affected" as "less water flowing through the system...means there's less power that will be generated."

BOR CONTRACTS WITH COMPANY TO HELP RESTORE ENDANGERED SPECIES IN MANASTASH CREEK. [KNDO-TV](#) Yakima, WA (7/23) reports that "in an effort to restore an endangered species to the Yakima Basin," the BOR "is taking on a big project." The agency "contracted with a Florida based construction company to help conserve water in Manastash creek." The BOR "said the Kittitas County creek dries up each year when farmers draw water to irrigate their crops, leaving fish without access to a stretch of natural habitat." Walter Lamick with the BOR said, "It's one of the critical tributaries or creeks in the Upper Valley, so it's a real special creek. It will help the steelhead. They're listed as a threatened species, and this is one step we can do to improve their conditions."

ADDITIONAL COVERAGE OF BAY DELTA CONSERVATION PLAN. Additional coverage of the Bay Delta Conservation Plan was provided by the [Willits \(CA\) News](#) (7/23, 3K) and the [Lake County Record-Bee](#) (7/23, 6K).

EDITORIAL: BAY DELTA CONSERVATION PLAN WILL PROTECT FROM ECONOMIC COLLAPSE. In an editorial posted in the [Inland Valley \(CA\) Daily Bulletin](#) (7/23, 52K), the Los Angeles News Group says that the proposed Bay Delta Conservation Plan will serve "two so-called co-equal goals: restoring the Delta ecology and securing the water supply upon which most of the state relies." The Group says that despite likely objections from Northern Californians, the plan "seeks reliability of the water supply, not a bigger share for Southern California," can fortify the Delta and thereby "prevent a Superstorm Sandy kind of disaster in an extreme event," and can work because "SoCal residents are not greedy water-chuggers." The piece concludes by calling the "water-supply reliability" plan a "protection from economic collapse."

Empowering Native American Communities:

BIA CHIEF WASHBURN TO SPEAK ON TRIBE RECOGNITION PROPOSAL. The [Santa Maria \(CA\) Times](#) (7/23, 13K) reports that BIA chief Kevin K. Washburn is "scheduled to speak Thursday in Solvang about proposed changes to federal acknowledgment regulations for Native American tribes." Washburn "is expected to speak about the availability of a discussion draft of potential changes to the Part 83 process of the Department of the Interior (DOI) for acknowledging certain Indian groups as federally recognized tribes." In a statement, Washburn said, "The discussion draft is a starting point in the conversation with federally recognized tribes, petitioners and the public on how to ensure that the process is fair, efficient and transparent. We are starting with an open mind and no fixed agenda, and we're looking forward to getting input from all stakeholders before we move forward with a proposed rule that will provide additional certainty and timeliness to the process. In many parts of the discussion draft, we have made no fixed recommendations in order to have the benefit of that input in formulating a proposed rule."

NORWICH FIRST SELECTMAN CALLS FOR HEARINGS ON PROPOSED RECOGNITION CHANGES. The [Norwich \(CT\) Bulletin](#) (7/22, Mosher, 15K) reports that Preston First Selectman Robert Congdon is demanding that the BIA "hold hearings in Connecticut on proposed changes that would make it easier for two local tribes to become federally recognized" and is "calling for an extension of the public comment period past the August 24

deadline set by the DOI." The piece says that according to the BIA, "there are no hearings scheduled to be held in Connecticut on the proposed changes." Consequently, the Bulletin quotes Congdon as saying, "The process should be fair, transparent, and open and so far it hasn't been."

WHITE EARTH LAND TRANSFERS COMPLETED. The Park Rapids (MN) Enterprise (7/22, Larson, 5K) reports that the final two parcels, comprising of 77.75 acres total, have "finally" been transferred to White Earth. The article says that the land transfer was completed under the White Earth Land Settlement Act of 1986 and throughout the process, economic development on the White Earth Reservation was supported by the State of Minnesota and the DOI, which contributed \$500,000 and \$6.6 million, respectively.

WYOMING INDIAN SCHOOL MAKING CUTS TO DEAL WITH LOSSES IN FUNDING. Youth Today (7/22, Feemster, 6K) reports that "two things were in short supply at St. Stephens Indian School on Wyoming's Wind River Indian Reservation even before the sequester began in March 2013: federal funding, and information about when that funding was coming." The article says that "even when the money comes, there is less of it than in previous years. The school's funding was cut 5.96 percent from 2011-12 levels when the sequester began in March 2013. This year, the school is budgeting for an additional eight percent cut." The article says that the BIE has acknowledged changes in available funding and, accordingly, the school "is eliminating jobs and cutting salaries" in order to deal with the loss of funds.

LINCOLN COUNTY APPEALS TRIBAL LAND TRANSFER. The Flathead (MT) Beacon (7/22, Franz, 5K) reports that the "Lincoln County Commissioners are appealing a decision by the DOI and Northwest Regional Office of the BIA that confers 8.3 acres of land at Kootenai Falls to the Confederated Salish and Kootenai Tribes." The article says that the county is arguing "that the county would lose tax revenues, which would harm its already stretched budget" and that because the land is located "more than 125 miles from the nearest border of the Flathead Reservation...greater scrutiny should be given to the request" to transfer the land to the tribes.

NATIVE AMERICAN CUSTODY BATTLE CONTINUES. The CBS Evening News (7/22, story 6, 2:20, Pelley, 5.58M) reported on the ongoing legal wrangling in the custody battle pitting "a Native American man against a couple who wants to adopt" his biological daughter. CBS (Quijano) reported that Dusten Brown has raised three-year-old Veronica for the past year and a half. Brown "had surrendered his parental rights before Veronica was born," and her "unmarried biological mother then gave permission for her to be adopted" by Matt and Melanie Capobianco, who raised the child for the first two years of her life. Brown, a Cherokee Indian, objected to this case, and a South Carolina court ruled last week that the adoption should go through. CBS reported that Brown and the Cherokee Nation have "filed separate requests in South Carolina for new hearings in the case."

Top National News:

OBAMA NOT EXPECTED TO UNVEIL NEW ECONOMIC PROPOSALS IN UPCOMING SPEECHES. Sunday's announcement that on Wednesday, President Obama will give the first two of a series of speeches on the economy has generated relatively light coverage. The upcoming speeches were not mentioned during any of the network newscasts Monday, nor is it front-page news in this morning's papers. However, the President's "need to pivot from scandals that have plagued the Administration...to the US economy" was the lead story on Fox News' Special Report (7/23). Fox's chief White House correspondent Ed Henry went on to place the revival of the President's economic initiatives in the context of Detroit filing for bankruptcy last week.

Both the volume and tenor of what coverage there is serves to lower expectations for the speeches. Nearly all the previews this morning note that the White House has said that the President will not be presenting new plans to stimulate economic growth. The New York Times (7/23, Shear, Subscription Publication, 1.68M) says White House officials have made it clear that the President's speeches "will not contain sweeping new proposals," and, "instead, they are largely repackaged economic proposals that the president has offered for years."

Similarly, the AP's (7/23) Julie Pace, under the headline, "Obama's Latest Economic Push Has Familiar Feel," says that since he was first inaugurated in 2009, the President "has been launching – and re-launching – initiatives on the economy." Pace continues, "Remember 2011's 'Winning the Future' campaign? Or the 'We Can't Wait' initiatives..?" Pace adds that "just a few months ago," the President was "headlining the 'Middle Class Jobs and Opportunity Tour.'"

Jim Mitchell, an editorial writer for the Dallas Morning News (7/23, Mitchell, 430K), says he does not "have a lot of faith in the president's new push," which he "expect[s] will be heavy on politics, modest on substance and sorely lacking on leverage." Mitchell adds, "If all [Obama] does is repackage economic proposals, what's the point?"

The Hill (7/22, Sink, 21K) reported that in his daily briefing Monday, White House press secretary Jay Carney was "repeatedly pressed...about what was new or special about the president's speeches," and, according to The Hill, Carney "offered...little to refute the general assumption that this week's events would generally rehash some of Obama's previous proposals and philosophies."

At the same time, while reports say the President will tout positive economic developments, it is mentioned repeatedly that US economic growth is still weak and the unemployment rate remains persistently elevated. USA Today (7/22, Madhani, 1.71M) says the President "hopes to return the focus to an economy that, while significantly better than the one he inherited, continues to limp along."

Michael Shear, in a piece for the New York Times (7/23, Shear, Subscription Publication, 1.68M) titled, "Obama Seeking To Take Credit And Set Course For Economy," says the speeches are part of a "strategy aimed at giving him credit for the improving job market." Shear notes that on Monday, Carney said, "We have come a long way since the depths of the Great Recession." However, according to Shear, the White House's strategy "brings risks, given that the economy is not yet close to full recovery."

Roll Call (7/23, Dennis, Subscription Publication, 19K) reports that an unidentified "senior administration official" says the President "believes...the economy has reached a level of stability," and intends to "tout a combination of new proposals, pieces of his agenda that have stalled in Congress and items he can do on his own." Roll Call adds that the same official "expressed deep frustration with the House and its inability to pass much of anything," but "offered no new way the president could take to change that in the short-term."

USA Today (7/22, Madhani, 1.71M) notes that the President's first speech will be delivered Wednesday at Knox College in Galesburg, Illinois, "the site of [his] first major economic speech as a freshman senator," and "will focus broadly on his economic philosophy." USA Today adds that the President "will amplify those remarks with speeches in Warrensburg, Mo., and Jacksonville this week."

According to the Kansas City (MO) Star (7/22, Helling, 197K), it is "becoming increasingly clear" that the President's December 2011 speech in Osawatomie, Kansas, in which he "made an explicit appeal to the middle class, arguing it had been short-changed by decades of financial decisions," will "eventually be considered one of the most important of his presidency." The Star reports that White House officials are saying that this week's speeches in Galesburg and Warrensburg, Missouri "will focus in broad strokes on the economy," which "immediately brought comparisons to the Osawatomie speech."

The Quad-City (IA) Times (7/23, 43K) reports that Carney said Monday that Wednesday speech in Galesburg "would have 'thematic continuity' with the 2005 commencement address that then-Sen. Barack Obama gave at Knox College, as well as a 2011 speech in Osawatomie." Reuters (7/23, Rampton), in an article titled, "Obama To Talk Jobs In Struggling Illinois Town," recounts some of the economic blows suffered by Galesburg, in particular, the loss of 900 jobs after a Maytag factory closed in 2004, and notes that Wednesday's speech comes just a week after Detroit filed for bankruptcy. The Galesburg (IL) Register-Mail (7/23, 10K) reports on the residents of Galesburg who waited in line for tickets to see the President's speech Wednesday.

The Florida Times-Union (7/22, Bauerlein, 100K) reports that on Thursday, the President will be appearing at the port of Jacksonville, and Jacksonville Port Authority officials "hope to make a personal appeal...about one of the port's most pressing needs - fixing the Mile Point navigation hazards that limit the port's ability to get more business from ocean-crossing ships." The Times-Union notes that later this week, Rep. Corrine Brown (D-FL) will talk about the project with Transportation Secretary Foxx. According to the Miami Herald (7/23, Klas, 139K), the President's speech in Jacksonville Thursday, though expected to be focused on economic issues, is "likely to be viewed in the context of the racial issues festering since the Zimmerman verdict."

Obama Previews New Initiative In Speech To OFA. USA Today (7/22, Jackson, 1.71M) reports that in a

Monday night speech at an event for Organizing For Action, described as "a group of volunteers created from the remnants of 2008 and 2012 [Obama] campaigns," the President said the economy is "recovering from its near-collapse in 2008, but more work remains before middle class families can feel fully secure."

The Washington Post (7/23, Gold, 489K) reports that the President told OFA "volunteers, staff members and donors" that the Administration has "succeeded in clearing 'away the rubble' of the economic crisis." According to the Post, the President previewed his upcoming speeches, which "will be aimed at refocusing Washington and the news media on the economy," and "stressed that he needed grass-roots help to drive home his message." The Post notes that the President was "joined at the event by" Senate Majority Leader Harry Reid, House Minority Leader Nancy Pelosi and Planned Parenthood's Cecile Richards.

Politico (7/23, Tau, 25K) reports that in reference to his planned remarks for Wednesday, the President said, "Here's the thing: It'll be a pretty good speech," but he added that he needs his "grassroots volunteers...to help translate his words into action." According to Politico, the White House's new initiative, "Action August," will "launch" on August 4, which is the President's birthday, "with health care events designed to tout the benefits of the Affordable Care Act."

The Washington Times (7/23, Boyer, 76K) reports that ahead of the President's address Monday, OFA Executive Director Jon Carson sent out an email telling supporters that "at the top of the list," for the next month is pushing the House to pass a "comprehensive immigration reform bill."

The AP (7/22) reported that OFA's August initiative "may also be an attempt to pre-empt what Democrats anticipate will be a concerted effort by conservatives to show lawmakers they want Obama's agenda stopped in its tracks."

The Los Angeles Times (7/22, Mascaro, 692K) reports that for her part, Pelosi has "rolled out an ambitious economic agenda for women," including "family-friendly policies, such as paycheck fairness for women, an increased federal minimum wage," and an "early childhood education initiative."

Obama Approval Rating Down To 41% in New Marist Poll. McClatchy (7/23, Lightman) reports that according to a new McClatchy-Marist poll, President Obama is "suffering his lowest job approval numbers in nearly two years" as the White House "looks to turn the national conversation back to the economy." The President's job approval is now just 41%, "Overall, the poll found Obama's job approval at 41 percent last week, a sharp drop from April's 50 percent and his worst showing in the poll since 39 percent in September 2011."

Obama Utilizes "Middle Out" As New "Catchphrase" To Describe His Economic Philosophy. Annie Lowrey, in a piece for the New York Times (7/23, Lowrey, Subscription Publication, 1.68M), says the White House has developed a "catchphrase" to describe the President's belief that "prosperity does not trickle down, and a rising tide does not necessarily lift all boats." According to Lowrey, the new catchphrase employed by the President is "prosperity needs to come from the 'middle out' rather than the top down." Lowrey says that in his planned speeches on the economy, the President will "elaborate on the middle-out theory," which Lowrey calls an "intellectual counteroffensive against the supply-side economics that has dominated conservative thinking for decades."

Economists Expect Fed To Begin Scaling Back QE In September. Bloomberg News (7/23, Keams, Zumbun, Saraiva) reports that half of the 54 economists who participated in its July 18-22 survey said that the Fed "will begin trimming its \$85 billion in monthly bond purchases in September." That marks an increase "44 percent in last month's poll."

Existing Home Sales Down From Last Month; Number Of First-Time Home Buyers Declining. The Wall Street Journal (7/22, Mitchell, Subscription Publication, 2.29M) reports that the National Association of Realtors said Monday that sales of existing homes declined 1.2% in June from a month ago to an annual rate of 5.08 million. Despite the decline, June marked the second-best month of home sales since November 2009. The Journal notes that higher home prices and higher mortgage rates could have a negative impact on sales in coming months.

The Wall Street Journal (7/23, A1, Dougherty, Wotapka, Subscription Publication, 2.29M) also notes in a front-

page story that the number of first-time home buyers is declining. Over the past year, first-time buyers represented about 30% of home sales. Over the last 30 years, on average, they represented 40% of sales and in 2009, they represented more than 50%. The Journal notes that over the long term, the declining number of first-time buyers could have a negative impact on the housing recovery as well as the larger economic recovery.

"Missing Households" Have Increased 4% Over The Past Year. The Wall Street Journal (7/23, Mitchell, Subscription Publication, 2.29M) reports that the number of so-called "missing households," which are adults living in someone else's home due to economic factors, has increased 4% over the last year. According to the Journal, there are around 32.4 million such people including adults living with their parents, seniors living with adult offspring, and people renting rooms from an unrelated person. The Journal notes that the phenomenon could be a problem for the housing market and the overall economic recovery because it is keeping down demand in the housing market.

Study: Parents Relying More On Loans, Grants To Pay For College. USA Today (7/22, Kowalski, Malcolm, 1.71M) reports that Sallie Mae's How America Pays for College study, which is to be released Tuesday, says that in the wake of the economic recession, families are relying more on grants and scholarships rather than their own incomes or savings "to finance a college education than in previous years." According to the study, which "surveyed a group of 1,602 undergraduates and parents of undergraduates earlier this year," grants and scholarships "are used more than any other type of funding, covering 30% of total college costs for a typical family." At the same time, parents "are contributing less of their income and savings toward college costs, covering 27% of college costs compared with 37% in 2010, the study shows."

Study Shows Odds Of Attaining American Dream By City. NBC Nightly News (7/22, story 6, 2:10, Taibbi, 7.86M) reported that a study of earnings records by economists at Harvard and the University of California at Berkeley "shows the odds of attaining the American dream by region and even city." According to the study, it is "a slow climb in cities like Atlanta, Charlotte, Memphis, Indianapolis, Cincinnati and Columbus and a faster climb in New York, Boston, Pittsburgh, Salt Lake City, Seattle and large parts of California." The study shows that "moving up is linked to several factors, mixed income neighborhoods, good schools, two-parent households and involvement in community and religious life."

Average Gas Price Rises To \$3.68 Per Gallon. ABC World News (7/22, story 7, 2:20, Sawyer, 7.43M) reported that the average price for a gallon of regular gas increased to \$3.68 this week, "up five cents from a week ago." ABC also noted that electricity bills are on the rise as a result of "the massive heat wave last week."

Stocks Post Modest Gains. The Wall Street Journal (7/22, Scaggs, Subscription Publication, 2.29M) reports that stocks posted modest gains Monday amid weak earnings reports and indications of a slowdown in the housing recovery. The Dow Jones Industrial Average added 1.81 points to end the day at 15545.55. The S&P 500 increased 3.44 points to close at 1695.53, marking a record close for the index. The Nasdaq gained 12.78 points, finishing at 3600.39.

More Commentary On The Economy. In an op-ed for the Wall Street Journal (7/23, Subscription Publication, 2.29M) David Malpass, who served as deputy assistant Treasury secretary in the Reagan Administration and deputy assistant secretary of state in the George H.W. Bush Administration, writes that the US economy may be ready to accelerate above the 2% average growth rate it has posted since 2009. Malpass makes a case for the Fed scaling back its bond-buying program, arguing that doing so would help bring the economy out of the so-called "new normal."

In his column for the Wall Street Journal (7/23, Subscription Publication, 2.29M), Gerald Seib writes that there are reasons to hope that the US economy is emerging from the recession in a strong position.

An editorial in USA Today (7/22, 1.71M) praises Sens Max Baucus and Omin Hatch for their efforts to "overhaul the nation's disgracefully complex tax code," arguing that Baucus's "blank slate" approach is "the best, and perhaps only, way to start what is sure to be a difficult endeavor," because it "puts the onus on lawmakers to justify their favorite tax breaks," and to "propose higher tax rates to pay for their breaks."

In an accompanying op-ed in USA Today (7/22, 1.71M) Steve Wamhoff, legislative director of Citizens for Tax Justice, argues that Baucus and Hatch "have not addressed a crucial problem — our desperate need for

increased revenue to fund public investments." Wamhoff writes that the tax code's biggest problem is that "it doesn't raise enough money." He adds that while we "do need a simpler, fairer tax system," the "most important goal should be to make sure we're collecting enough revenue to pay for Medicare, roads, bridges, schools, research and all the other investments that we need to build our country."

HOUSE GOP'S AUGUST STRATEGY GUIDE EMPHASIZES "FIGHTING WASHINGTON." Roll Call (7/23, Fuller, 19K) reports that House Republicans have been issued an "August House Republican Conference planning kit," called "Fighting Washington for All Americans," which, according to Roll Call, "offers a rare glimpse into the constituent outreach efforts of the GOP." Roll Call adds that "of the many topics Republicans could delve into – the impending debt ceiling debate, immigration or, perhaps, the sequester –" the kit "focuses on safer ground: Obamacare, jobs and the fierce hatred of all things Washington."

Brian Williams, in a brief item for NBC Nightly News (7/22, story 8, 0:25, Williams, 7.86M), noted that over the weekend, Speaker Boehner said Congress "should not be judged on how many new laws we create. We ought to be judged on how many laws we repeal." Williams added, "Of course, that's been a rallying cry of many in his caucus."

HOUSE DEMOCRATS FACE DILEMMA OVER GOP VERSION OF DREAM ACT. Roll Call (7/23, Dumain, Subscription Publication, 19K) reports that House Democrats are facing a dilemma over whether to vote against "a new, Republican version of the DREAM Act." Top Democrats are concerned that GOP leaders' effort to move the new version of the DREAM Act "will undercut their push for a comprehensive immigration overhaul." While the measure "would likely fail" without Democratic votes, the "risk" for Democrats "is if they block a partial win on immigration...the overhaul efforts could fall apart altogether."

Key DHS Vacancies Could Have Big Impact On Immigration Debate. The Washington Times (7/23, Waterman, 76K) reports on vacancies at the Department of Homeland Security, noting that it "soon will have 15 key vacancies" following the departures of Secretary Napolitano and ICE Director John Morton. These vacancies "could affect everything from airport screening to the Secret Service, but they are likely to be felt most keenly in immigration," and "analysts said leaving acting officials in place is no way to run a department." Christian Beckner, deputy director of George Washington University's nonpartisan Homeland Security Policy Institute, commented, "If enough positions are open for a long enough period of time, it can lead to significant operational and management risks. I am afraid that the Department of Homeland Security is now at the point where it is facing these risks."

Illegal Immigrants Want Deportations To Stop While Congress Debates Reform. The Washington Post (7/23, Constable, 489K) reports that illegal immigrants facing deportation are in Washington this week "as part of a campaign by the National Day Laborer Organizing Network (NDLON) and several other organizations to call attention to the problems of working immigrants who are in the country illegally." Organizers of the visit said that "thousands continue to be deported, even though many illegal immigrant students were granted a reprieve from deportation by the president last year." The group wants the Administration to "stop all workplace raids and suspend noncriminal deportations while Congress is grappling with immigration reform."

Number Of Bodies Found Along US-Mexico Border On The Rise. USA Today (7/23, Jervis, 1.71M) reports that the number of bodies found along the US-Mexico border is "rising at a startling rate." Last year, Brooks County, Texas Sheriff's deputies "picked up 129 bodies," believed to be immigrants crossing into the US. That is a "nearly 100% jump from 2011 and the most ever recorded in the county, according to sheriff's office statistics." USA Today notes that the bodies indicate "a disturbing trend: more people dying as they try to enter the USA illegally even as the overall number of undocumented immigrants declines."

Editorial Wrap-Up:

NEW YORK TIMES. "Getting Detroit Back On Its Feet." In an editorial, the New York Times (7/23, Subscription Publication, 1.68M) argues that even if Detroit is able to eliminate "much of its debts in bankruptcy court," city and state officials "will have to develop a much more comprehensive and far-reaching plan to deal with the city's problems."

"A Terrible Precedent For Press Freedom." The New York Times (7/23, A20, Editorial by the New York (NY), Times, Subscription Publication, 1.68M) editorializes that an "egregious appeals court ruling on Friday" has "dealt a major setback to press freedoms by requiring the author of a 2006 book to testify in the criminal trial of a former Central Intelligence Agency official charged with leaking classified information." The Times argues that the ruling "and the Justice Department's misplaced zeal in subpoenaing James Risen, the book's author and a reporter for The Times, carry costs for robust journalism and government accountability that should alarm all Americans." The Times calls the Justice Department's statement approving of the ruling "dismaying," and argues that Attorney General Holder "should reopen the question" of Risen's subpoena.

"Opportunity And Risk In Japan." In an editorial, the New York Times (7/23, Subscription Publication, 1.68M) says that Japanese Prime Minister Shinzo Abe should not treat his coalition's election victory "as an endorsement of his disturbingly right-wing foreign-policy views," noting that the election "was about economics." The Times argues that Abe "has to stop rubbing raw the wounds of World War II," and his government should not "divert budget resources into military muscle flexing," because doing so would "erode the economic progress and promise of stable political leadership Mr. Abe has just worked so hard to achieve."

WASHINGTON POST. "Obama's Press Freedom Hypocrisy." The Washington Post (7/23, Editorial by the Washington (DC), Post, 489K) editorializes that the Obama Administration "seems to be of two minds when it comes to freedom of information and the role of the press." Noting that President Obama early on "committed his administration to 'creating an unprecedented level of openness in government,'" and recently "proclaimed" that "a free press is essential to democracy," the Post also notes that the Administration "has conducted the most far-reaching campaign against leaks in recent memory, with twice as many prosecutions as in all previous administrations combined." The Post endorses the media shield legislation recently introduced by Senators Charles Schumer (D-NY) and Lindsey Graham (R-SC), which "would introduce a 'balancing test' for a court to use before compelling disclosure from a reporter."

"China's Wrong Turn." In an editorial, the Washington Post (7/23, 489K) says that early hopes that China's President Xi Jinping would be "a political reformer are vanishing," as Xi "seems determined to impose more Communist Party control on both state and society while still pursuing economic modernization." The Post notes that while Xi "seems to want to pursue economic modernization without giving an inch to its political equivalent," the more the Chinese people "taste economic good times" the more they "may feel empowered and entitled to a political voice."

"Censure, At Long Last" The Washington Post (7/23, 489K) editorializes about the "antics" of Eugene Delgaudio, "the homophobic buffoon" on the Loudoun County, VA Board of Supervisors. Delgaudio (R), "has continued to conduct himself as if no one took notice of his clownish persona, unhinged, hateful rhetoric and, it turns out, sleazy public ethics." The Post notes that a state grand jury last month "took the highly unusual step of issuing a damning report" on Delgaudio's "shenanigans in abusing the authority of his office," and the Board of Supervisors last week "followed suit by formally censuring" Delgaudio. The Post argues that Delgaudio "has repeatedly embarrassed the county and constituents he serves, saddling Loudoun with an ill-deserved aura of hayseedery," and urges Loudoun County voters to "send him packing."

THE WALL STREET JOURNAL. "A Global Revenue Grab." An editorial in the Wall Street Journal (7/23, Subscription Publication, 2.29M) criticizes the Organization for Economic Cooperation and Development's plan to combat "base erosion and profit shifting" or BEPS and the G-20 ministers' endorsement of the plan, saying it amounts to a coordinated international effort to increase taxes on businesses and remove money from the private economy.

"Stand Whose Ground?" In an editorial, the Wall Street Journal (7/23, Subscription Publication, 2.29M) notes that when he was an Illinois state senator, the President supported a measure that was similar to so-called Stand Your Ground laws.

"The Spitzer Method: A Case Study." An editorial in the Wall Street Journal (7/23, Subscription Publication, 2.29M) criticizes Eliot Spitzer's actions as New York State Attorney General, arguing that he exploited cases for publicity. As an example, the Journal cites Spitzer's prosecution of Braulio Baeza, the assistant clerk of scales for the New York Racing Association, who Spitzer accused of allowing jockeys at New York horse-racing tracks to exceed permitted weight limits. The Journal says that Spitzer made his case in the media, which, given the

acing association's history of corruption, was ready to believe the allegations. A judge dismissed the charges after Spitzer was elected governor.

NTSB – SCHOOL BUS, TRAIN CRASH — 9:30 a.m. The National Transportation Safety Board will hold a Board meeting to determine the probable cause of a school bus and truck crash near Chesterfield, New Jersey. The Board will also be hearing information regarding a crash that occurred in Port St. Lucie, Florida on March 26, 2012 in which a school bus was hit by a truck-tractor semitrailer. As a result of the crash, one student passenger was fatally injured, four sustained serious injuries and twelve others were transported to the hospital. Due to the similarities between the Port St. Lucie, Florida and Chesterfield, New Jersey crashes, school bus occupant protection issues from both crashes will be reviewed and the Board will consider possible recommendations to improve school bus safety nationwide. Location: NTSB Board Room and Conference Center, 429 L'Enfant Plaza, SW.2

SENATOR GRAHAM – ISRAEL — 9:30 a.m. Senator Lindsey Graham will address the Christians United for Israel Summit. Location: Walter E. Washington Convention Center, Ballroom ABC, 801 Mount Vernon Place NW.

CAP – WYDEN – DOMESTIC DATA COLLECTION — 10:30 a.m. – 11:30 a.m. Senator Ron Wyden, D-OR on Domestic Data Collection and Privacy Rights. Location: Center for American Progress Action Fund 1333 H St. NW, 10th Floor.

DOMESTIC WORKER – WORKPLACE STANDARDS RULE — 11 a.m. Countdown to Dignity rally and petition delivery, calling on the White House and Department of Labor to release new regulations extending minimum wage and other basic workplace protections to in-home care workers. Location: Upper Senate Park, at the corner of Constitution and Third Ave (across from the Department of Labor).

NRDC – KEYSTONE – REPORT RELEASE — 11 a.m. The Natural Resources Defense Council, 350.org Founder Bill McKibben and others will discuss Keystone XL's climate impact and release the most recent

technical analysis on the Keystone XL climate implications under Presidents New directive. Location: Bloomberg Room, National Press Club, 529 14th Street NW, 13th Floor.

PETERSON – REP. LEVIN — 11:30 a.m. The Peterson Institute will host Representative Sander M. Levin, for a speech on The Challenges and Opportunities of International Trade – Past, Present, and Future. Location: Bergsten Conference Center, Peterson Institute, 1750 Massachusetts Avenue, NW.

ECONOMIC CLUB OF WASHINGTON – VALERIE JARRETT — 12 p.m. Senior Advisor to President Barack Obama and Assistant to the President for Public Engagement and Intergovernmental Affairs will make remarks and participate in a conversation-style interview with David Rubenstein, President of The Economic Club. Location: JW Marriott, The Grand Ballroom, 1331 Pennsylvania Avenue, NW.

NASA – HURRICANE RESEARCH FLIGHTS — 2 p.m. NASA will host a Google+ Hangout from several NASA centers as the agency prepares to fly two unmanned aircraft over Atlantic Ocean hurricanes this summer. Participants: Scott Braun, HS3 principal investigator, NASA's Goddard Space Flight Center, Greenbelt, MD; Tom Miller, Global Hawk pilot, NASA's Dryden Flight Research Center, Edwards, CA; Marilyn Vasques, HS3 project manager, NASA's Ames Research Center, Moffett Field, CA; Brian McNoldy, senior research associate, University of Miami, FL., Rosenstiel School of Marine and Atmospheric Science.

Last Laughs:

LATE NIGHT POLITICAL HUMOR.

Jay Leno: "In a recent interview in 'GQ' magazine, Vice President Joe Biden says, he can 'die a happy man never having been President of the United States.' And you know something? Woo, so can we."

Jay Leno: "Well, a new study is found that employees who smoke cigarettes earn 17.5% less than employees who don't smoke. They also learned that crack smokers tend to earn 100% less than people who don't smoke crack."

David Letterman: "Anthony Weiner, you know former Congressman, now running for the mayor. He's on the campaign trail now. Or as he calls it, 'The Tour de Pants.' That's right. That's what he calls it."

Conan O'Brien: "The TSA just announced that passengers can pass through security without taking their shoes off if they are willing to pay an extra \$85. That explains the TSA's new motto: 'We Catch Terrorists Who Don't Have an Extra \$85 on Them.'"

Jimmy Fallon: "Oh, and we also have former New York governor, Eliot Spitzer, on the show tonight! And he'll only be here for about five minutes, but we're charging him for the full hour."

John Oliver: "Hold on. If you get shot in Detroit, you can get a pizza faster than you can get a cop. In fact maybe that's the only way to survive there. 'Hey, Dominoes I would like one large pizza with two policemen and a side of paramedics, please. And can you stuff the crust with gauze because I'm bleeding terribly. Thank you.'"

Stephen Colbert: "Nation, I've always been suspicious of the minimum wage. I've said it before. Minimum is a misnomer. \$7.25? I can think of wages a lot lower. \$3.28., \$1.19. A pat on the back and a handful of mints. There are literally dozens of other things you could give them. A bam owl."

Stephen Colbert: "And when it comes to opposing the minimum wage, I'm in good company with guys who own companies. For example, billionaire industrialist and my future face twin Charles Koch in an interview with 'The Wichita Eagle,' said he wants to eliminate the minimum wage because it creates a culture of dependency and keeps people with limited capital from starting their own business. He is right. Having to pay your employees really hurts small business. I mean, look at our nation's forefathers. Many arrived with nothing but the blouse on their back but thanks to no minimum wage, they started a booming cotton industry."

>> proposal to collect an additional \$48 million through inspection fees.
>>
>> The bill also provides \$410 million for a one-year extension of payments in
>> lieu of taxes, a program that compensates rural counties with large blocks
>> of tax-exempt federal lands. That provision has a significant impact on the
>> subcommittee's bill given that no discretionary funds were provided for the
>> program last year.
>>
>> The bill contains \$2.3 billion for the National Park Service. While that is
>> 9 percent less than the 2013 enacted level, the agency's operating accounts
>> for national parks are funded at \$24 million above the current
>> sequestration level, the committee said.
>>
>> The bill would provide \$1.06 billion for the Fish and Wildlife Service, a

>> steep cut of \$401 million, or 27 percent, below 2013 enacted levels.
>>
>> The Forest Service would be funded at \$5.3 billion, a \$149 million bump
>> over the 2013 enacted level, though much of that comes from the significant
>> increases in wildfire prevention and suppression.
>>
>> The bill also contains a few policy riders regarding public lands.
>>
>> It would prevent lands agencies from closing federal lands to hunting,
>> fishing and recreational target shooting; it would prevent FWS from
>> preparing or issuing an Endangered Species Act rule for the greater sage
>> grouse; and it again prohibits BLM from carrying out former Interior
>> Secretary Ken Salazar's wild lands order.

U.S. DEPARTMENT OF THE INTERIOR NEWS BRIEFING

Mobile version and searchable archives available at interior.bulletinnews.com.

DATE: THURSDAY, AUGUST 1, 2013 7:00 AM EDT

TODAY'S TABLE OF CONTENTS

DOI IN THE NEWS:

- + New England Firm Tops Bid In First US Offshore Wind Lease Sale.
- + House Panel Votes To Thwart Interior's Plan To Expand Fracking Rule.
- + Michael Connor Nominated As Deputy Secretary For Interior.
- + Interior Approves Plan To Expand Gettysburg National Military Park.
- + Sens. Reid And Heller Meet With Interior Officials On Sage Grouse.
- + Appropriations Committee Debate Funding Measure.
- + House Committee Debates Over Naming Ocean Waters After Reagan.
- + Interior Seeks Actual Revenue History Evaluation.
- + Glacier Bay Lodge Struggling To Stay Open.
- + Additional Coverage Of Blueways Program.
- + Additional Coverage Of Water-rights Deal.
- + Call To Review Cadiz Water-pumping Plan Supported.
- + Paper: Alaska's Arctic National Wildlife Refuge Request Deserves Full Hearing.
- + Secretary Jewell Places Priority On Fighting Climate Change.
- + Tax Advocacy Group Seeks To Block Expansion Of Fracking Rules.

AMERICA'S GREAT OUTDOORS:

National Park Service:

- + NPS Tries To Combat Yosemite Congestion.
- + Continuing Coverage Of Work On MLK Memorial .
- + Site On Outer Banks To Be Added To NPS' Underground Railroad Sites.
- + Renovated Benjamin Franklin Museum Reopening In August.
- + NPS Announces Federal Disaster Relief Funding.
- + NPS Recognizes Boots Court Reconstruction.
- + Continuing Coverage Of Lincoln Memorial Vandalism.
- + Additional Coverage Of Court's Ruling In Lassen Case.
- + NPS Director Jarvis Praised For Decision On Alaska Fish.
- + Shenandoah National Park Superintendent Reacts To Plan To Improve Access.

Bureau of Land Management:

- + Court Rules BLM Must Survey Roads, Airstrips In Breaks.
- + House Panel Approves O&C Lands Proposal.
- + Campers Evicted From Bertelsen Nature Park.
- + BLM To Hold Emergency Roundup Friday.
- + Chaves County Rejects Prairie Dog Relocation.
- + Additional Coverage Of Agreement To Advance Opportunities For Veterans.

+ BLM Criticized For Contemplating Allowing Development In Four Corners Region.

Fish and Wildlife Service:

+ Diamond Darter Gets Protection.

SECURING AMERICA'S ENERGY FUTURE:

Renewable Energy:

+ Continuing Coverage Of SunZia Project.

Onshore Energy Development:

- + BLM Halts Plan To Open Blue Rock State Forest To Fracking.
- + Federal Agents Raid Colorado Drilling Office.
- + BLM Oil And Gas Lease Sale Nets Nearly \$50 Million.
- + Shale Drilling In Seismically-Active Chinese Province Elicits Fears Of Earthquake Risks.
- + GOP Bill Would Force EPA To Alter Ongoing Fracking Study.

Offshore Energy Development:

- + BSEE Investigation Into Rig Blowout Preventers Intensifies After Natural Gas Rig Blowout.
- + BOEM In Pact To Restore Coastal Area In Virginia Beach.
- + Halliburton To Plead Guilty To Destroying Gulf Oil Spill Evidence.

TACKLING AMERICA'S WATER CHALLENGES:

- + Daines Hydropower Bill Clears House Natural Resources Committee.
- + Bureau Of Reclamation Finalizes Reclamation Manual Policies.
- + Navajo Nation In Pact To Extend Navajo Generating Station Lease.

EMPOWERING NATIVE AMERICAN COMMUNITIES:

- + Connecticut Towns Back Sen. Blumenthal's Move To Block Revision To Tribe Recognition.
- + Town Of Middleboro Seeks \$1 Million From Tribe For Casino Termination.
- + Police Continue With Investigation Of \$65,000 Theft From Eastern Pequots.
- + Paper Backs Napa County Stance In Legal Fight Against Tribe.

TOP NATIONAL NEWS:

- + Obama Decries Criticism Of Summers From The Left.
- + GDP Grew 1.7% In Second Quarter, Beating Expectations.
- + House Passes Student Loan Bill.

EDITORIAL WRAP-UP:

- + New York Times.
- + Washington Post.
- + The Wall Street Journal.

BIG PICTURE:

- + Headlines From Today's Front Pages.

WASHINGTON SCHEDULE:

- + Today's Events In Washington.

LAST LAUGHS:

- + Late Night Political Humor.

DOI in the News:

NEW ENGLAND FIRM TOPS BID IN FIRST US OFFSHORE WIND LEASE SALE. The Boston Globe (8/1, Ailworth, 250K) reports a New England company has won the "rights to develop offshore wind farms in nearly

165,000 acres of specially designated federal waters off the coasts of Massachusetts and Rhode Island." The company bid \$3.8 million for the rights. Deepwater Wind LLC of Providence proposes to set up to 200 turbines "capable of producing enough energy to power roughly 350,000 homes, with a transmission system linking Long Island, N.Y., to southeastern New England."

FuelFix (7/31) reports the Interior Department said that over the next nine months, leases will be offered for areas off Virginia, Maryland, New Jersey and Massachusetts.

The Washington Post (7/31, 489K) reports that Director Tommy Beaudreau "calls it a historic moment in the future of clean energy in the US and says the final bid was higher than expected."

NPR (8/1) reports that the US "has no offshore wind farms, but some industry experts say the fact that there was competition for these leases shows that despite all the setbacks, the offshore wind industry might soon take off." Also, "some environmental groups cheered the auctions as a sign that the country is moving toward cleaner energy."

Additional coverage was provided by the Wall Street Journal, the Bloomberg BusinessWeek (7/31, Drajem, Hemdon, 921K), the Bloomberg BusinessWeek (7/31, 921K), Bloomberg News (8/1, Drajem), Yahoo! Finance (8/1), Yahoo! News Canada (8/1), the Boston Herald (8/1, 91K), the Providence (RI) Journal (7/31, 114K), the Providence (RI) Journal (8/1, 114K), the Providence (RI) Business News (8/1, 10K), the Providence (RI) Business News (8/1, 10K), the New Bedford (MA) Standard-Times (7/31, 21K), the Cape Cod (MA) Times (7/31), the Cape Cod (MA) Times (7/31), the Contra Costa (CA) Times (8/1, 174K), Recharge News (8/1), and the Law 360 (8/1),

HOUSE PANEL VOTES TO THWART INTERIOR'S PLAN TO EXPAND FRACKING RULE. The Hill (8/1, Geman, 21K) reports in its "E2 Wire" blog the House Natural Resources Committee voted mainly "along party lines Wednesday for GOP legislation" aimed at thwarting Interior Department efforts "to expand regulation of oil-and-gas 'fracking' on public lands." The blog posting says the Interior unveiled draft fracking rules in May. Supporters of "tougher federal oversight say minimum Interior standards are needed to prevent water pollution in cases where states don't have rules or they're too weak."

FuelFix (7/31) also covers the news.

MICHAEL CONNOR NOMINATED AS DEPUTY SECRETARY FOR INTERIOR. The E&E Daily (7/31) reports that the White House has nominated BOR Commissioner Michael Connor "as the next deputy secretary of the Interior." Interior Secretary Sally Jewell said, "Mike will bring a wealth of knowledge and experience to the position after two decades in public service working on energy, conservation and water issues. He has proven himself to be a thoughtful and collaborative leader on some of the toughest challenges at the department – including finding sustainable solutions to water challenges in the West and resolving Indian water rights claims." Connor's "nomination drew praise from Capitol Hill," including from Sens. Ron Wyden and Lisa Murkowski.

KCIT-TV Amarillo, TX (8/1) reports that Sen. Tom Udall (D-NM) issued a "statement praising President Obama's nomination of Michael Connor to serve as Deputy Secretary of the Interior Department. Connor, of New Mexico, currently serves as commissioner of the Bureau of Reclamation."

The Pechanga (8/1) reports that the National Congress of American Indians (NCAI) released a statement supporting the nomination. Also, the Pechanga (8/1) reports that Tribal Chairman Mark Macarro issued a statement supporting the nomination.

Also reporting on the story are Politico (8/1, Guillen, 25K), the Native American Times (8/1), the Hydroworld (8/1), the Recharge News (8/1), and Indianz (8/1).

INTERIOR APPROVES PLAN TO EXPAND GETTYSBURG NATIONAL MILITARY PARK. The Washington Post (7/31, 489K) reports that the Interior Department "has endorsed a plan to expand Gettysburg National Military Park." The plan "would incorporate the Lincoln Train Station in downtown Gettysburg as part of a 45-acre expansion at the southern end of the battlefield."

Also reporting on the story are the Minneapolis Star Tribune (8/1, 335K), the Philly.com (8/1), the Hanover (PA)

Evening Sun (8/1, 19K), and the New Jersey Herald (8/1, 17K).

SENS. REID AND HELLER MEET WITH INTERIOR OFFICIALS ON SAGE GROUSE. Roll Call (8/1, Lesniewski, Subscription Publication, 19K) reports that Sens. Harry Reid and Dean Heller met "with Interior Department officials" for a "Sage Hen Summit." In a statement, Reid said, "Conservation and restoration of sagebrush habitat in Nevada and throughout the West is vital to maintaining healthy sage grouse populations and thwarting a threatened or endangered listing that will negatively affect Nevadans and our rural economies." Also, Heller said, "Should the sage grouse be listed as an endangered species, Nevada's way of life and our state's economic recovery will be in jeopardy. I am committed to working with Governor Sandoval and the rest of the delegation to take steps on the federal level that complement and reinforce strategies developed in the state to prevent such a listing."

Also reporting on the story are the Gardnerville (NV) Record Courier (8/1, 6K) and the CarsonNow.org (Carson City, NV) (8/1).

APPROPRIATIONS COMMITTEE DEBATE FUNDING MEASURE. The AP (8/1) reports that "on Wednesday, a bitterly divided Appropriations Committee debated a \$24.3 billion measure funding the Interior Department and the Environmental Protection Agency at levels 19 percent below those passed earlier this year."

Also reporting on the story are the Petoskey (MI) News-Review (7/31, 8K) and the Milwaukee Journal Sentinel (8/1, 221K).

HOUSE COMMITTEE DEBATES OVER NAMING OCEAN WATERS AFTER REAGAN. In its "E2 Wire" blog, The Hill (8/1, Geman, 21K) reports that the House Natural Resources Committee debated Wednesday on a "GOP bill that would name 3.4 million square nautical miles of ocean after the late President Ronald Reagan." The committee "is weighing Rep. Darrell Issa's (R-Calif.) bill that would rename the country's Exclusive Economic Zone (EEZ), which generally extends from 3 miles to 200 miles offshore, as the Ronald Wilson Reagan Exclusive Economic Zone."

INTERIOR SEEKS ACTUAL REVENUE HISTORY EVALUATION. The Insurance News Net (7/31) reports that the Interior Department's National Business Center "has issued a combined synopsis/solicitation notice (D13PS00375) for the evaluation of actual revenue history of the Citrus Pilot Crop Insurance program."

GLACIER BAY LODGE STRUGGLING TO STAY OPEN. The Juneau (AK) Empire (8/1, 4K) reports that the NPS is "in negotiations with Aramark to extend a concessions contract at the Glacier Bay Lodge." The article notes that "Senators Lisa Murkowski and Mark Begich have since taken an interest in the issue." In June, "Murkowski wrote a letter to Secretary of the Interior Sally Jewell," and "Begich sent a letter to NPS director Jonathan Jarvis stressing the importance of the lodge to the community of Gustavus and the Southeast tourism industry."

ADDITIONAL COVERAGE OF BLUEWAYS PROGRAM. Additional coverage of the continuing opposition to the National Blueways program was provided by the Washington Post (7/31, 489K), the Minneapolis Star Tribune (8/1, Hollingsworth, 335K), Yahoo! (8/1, Hollingsworth), Yahoo! News Canada (8/1), the Franklin (IN) Daily Journal (8/1, 16K), and the Arkansas Business (8/1).

ADDITIONAL COVERAGE OF WATER-RIGHTS DEAL. Additional coverage of the water-rights agreement signed by the federal government and White Mountain Apache tribe was provided by the Tucson (AZ) Sentinel (8/1, Bell), the Casa Grande (AZ) Dispatch (8/1, 7K), the Arizona Republic (7/30, 308K), and the Arizona Capitol Times (7/31, Bell).

CALL TO REVIEW CADIZ WATER-PUMPING PLAN SUPPORTED. In an editorial, the Inland Valley (CA) Daily Bulletin (8/1, 52K) supports "Rep. Paul Cook's call for a federal review of the" Cadiz water-pumping proposal. It notes that "the Cadiz Valley Water Conservation, Recovery and Storage Project hopes to use railroad right-of-way that crosses federal land for a 43-mile section of pipeline, which could give the federal government purview," and "much more importantly, the project has potential impacts on nearby, protected federal lands." The paper urges the Interior Department to "heed Cook's request that the US Geologic Survey analyze the project area's hydrology and make sure the proposed pumping is sustainable."

Also editorializing are the [San Gabriel Valley \(CA\) Tribune](#) (8/1, 57K) and the [San Bernardino \(CA\) Sun](#) (8/1, 53K).

PAPER: ALASKA'S ARCTIC NATIONAL WILDLIFE REFUGE REQUEST DESERVES FULL HEARING. The [Fairbanks \(AK\) News-Miner](#) (8/1, 12K) editorializes that "the rejection" by the FWS "of a plan to conduct research about oil and gas potential in the Arctic National Wildlife Refuge was expected, but the Parnell administration is appealing the move." The paper argues that "the nation would be better off knowing what the resource potential of the refuge is and the state plan would help meet that goal." The paper notes that Alaska's "appeal of the decision should include this quote from the 2001 opinion: 'The primary argument against expiration of the statutory authority for 'exploratory activity' as defined in 1002 rests mainly on the fact that nowhere in the section is there any express statement of expiration. Most specifically, in 1002(a)'s statement of purpose, no end point for the exploratory activity being authorized is expressly set.'"

SECRETARY JEWELL PLACES PRIORITY ON FIGHTING CLIMATE CHANGE. For [GlobalWarming.org](#) (7/31, Lewis), Marlo Lewis writes that Interior Secretary Sally Jewell "told employees today that combating climate change is a 'privilege' and 'moral imperative,' adding: 'I hope there are no climate change deniers in the Department of Interior.'" However, according to Lewis, "Jewel's anti-'denier' sermonizing is morally vacuous," and "it will...discourage candor and independent thought in an important and powerful agency."

TAX ADVOCACY GROUP SEEKS TO BLOCK EXPANSION OF FRACKING RULES. In an opinion piece in Reuters, (7/31) Grover G. Norquist, president of Americans for Tax Reform, and Patrick Gleason, the organization's director of state affairs, lament that the White House and liberal critics will continue to cast Republicans as anti-environment despite their efforts in cutting emissions and saving public funds at the state level. They say Obama Administration officials continue to interfere with states even when they have successfully implemented policies such as raising natural gas production through fracking. They complain that the Bureau of Land Management is now considering expanding regulation of fracking on Federal lands, which would hurt production.

America's Great Outdoors:

National Park Service:

NPS TRIES TO COMBAT YOSEMITE CONGESTION. NBC Nightly News (7/31, story 8, 2:40, Williams, 7.86M) reported that the National Parks Service, in what is a "controversial idea," is trying to make "Yosemite a road less traveled" to reduce congestion. NBC's Harry Smith said that, in particular, the NPS wants to give "the 81 miles of the Merced, which runs through the park, more space" by "moving a number of the concessions, bike rental, horseback rides and rafting." Some including Rep. Tom McClintock (R-CA) say that it's a "bad idea." But environmentalists "say the park needs to do much more."

Continuing Coverage Of Yosemite Draft Plan. In an op-ed for the [U-T San Diego](#) (7/31, Greenhut, 242K), Steven Greenhut writes that the "tension between traditional conservationists and modern-day green purists is being played out now in a contentious battle over the future of the public's access to Yosemite." The NPS "is pushing forward a plan that would restore 200 acres of land within highly visited sections of Yosemite and close many commercial facilities including swimming pools, skating rinks, and rental shops for bicycles, rafts and horses." However, Greenhut argues that "reducing facilities will no more reduce congestion at this popular park than shutting down lanes will reduce congestion on California's crowded freeways."

In an op-ed for the [Monterey County \(CA\) Herald](#) (8/1, Hoss, 28K), Peter T. Hoss, a retired lawyer, writes that "the draft plan adds a layer of conflicting regulation that spawns litigation and produces nothing positive." He also calls the draft plan "visitor unfriendly" and claims that "it restricts traditional recreation enjoyed by generations for no valid reason and incorrectly labels visitor amenities provided by a concessioner 'commercial' and therefore bad." Hoss also argues that "the draft plan is discriminatory against seniors, the handicapped, people of modest means, families and foreign visitors," and it "will eliminate jobs and hurt the economy of surrounding communities."

CONTINUING COVERAGE OF WORK ON MLK MEMORIAL . The [Washington Post](#) (8/1, 489K) reports that the

NPS "and sculptor Lei Yixin are discussing how they will remove a disputed inscription from the Martin Luther King Jr. Memorial on the National Mall." The NPS "has scheduled a news conference Thursday to discuss the work."

Also covering the story are the Miami Herald (8/1, 139K) and the Washington Business Journal (8/1, Subscription Publication).

For the "On Faith" blog of the Washington Post (8/1, Junior, Ware, 489K), Nyasha Junior, Assistant Professor of Hebrew Bible/Old Testament at Howard University School of Divinity, and Frederick Ware, Associate Professor of Theology at Howard University School of Divinity, praises the work to remove the controversial inscription on the Martin Luther King, Jr. Memorial. However, they write that "although the removal is a welcome step; there is, unfortunately, another very serious problem with the memorial that cannot be fixed by erasing." That is, "the King Memorial is devoted solely to a man— not to the movement that made him great." According to the two, "in depicting King by himself, the King Memorial fails to acknowledge the many people who were involved in the Civil Rights Movement."

SITE ON OUTER BANKS TO BE ADDED TO NPS' UNDERGROUND RAILROAD SITES. The Washington Post (8/1, 489K) reports that "a site on the Outer Banks is being added" to the NPS's Underground Railroad Network to Freedom. According to the article, "a monument is scheduled for dedication Wednesday at the Graveyard of the Atlantic Museum in Hatteras to the Hotel De Afrique."

Also reporting on the story are the Minneapolis Star Tribune (8/1, 335K), Yahoo! (8/1), and the Times Colonist (8/1).

RENOVATED BENJAMIN FRANKLIN MUSEUM REOPENING IN AUGUST. The Washington Post (7/31, 489K) reports that the Benjamin Franklin Museum "is reopening after nearly two years of renovations." The museum "will welcome its first visitors on Aug. 24." The NPS "said the museum's official grand opening celebration is scheduled for Sept. 19."

NPS ANNOUNCES FEDERAL DISASTER RELIEF FUNDING. The New London (CT) Day (7/31, 28K) reports that "more than \$8 million in new federal disaster relief funding is available" from the NPS "for repairs to historic and archaeological properties in New London County and the state's three other shoreline counties that were damaged by Superstorm Sandy, Gov. Dannel P. Malloy announced today." The article notes that "eligible properties are those listed or eligible for listing on the National Register of Historic Places." In a news release, Malloy said, "These funds are an investment in our irreplaceable historic resources — which are major drivers of our tourism industry — and will go a long way toward repairing many of these damaged treasures so they can be enjoyed by generations to come."

NPS RECOGNIZES BOOTS COURT RECONSTRUCTION. The Carthage (MO) Press (7/30, 3K) reports that Kaisa Barthuli, program manager for the Route 66 Corridor Preservation Program with the NPS, "joined Harvey, Carthage City Administrator Tom Short, City Clerk Lynn Campbell, City Council member Steve Leibbrand, Fire Chief Chris Thompson, Chamber of Commerce President Mark Elliff, Tommy and Glenda Pike, with the Missouri Route 66 Association, and others to celebrate the completion of a grant project that funded the removal of the gabled roof from the two buildings that make up the Boots." The NPS "provided \$12,000 to match \$12,000 from Harvey to pay for removing the roof and restoring the Boots to the flat-roofed look it sported from the mid-1930s until the mid-1970s." Barthuli said that "removing the gabled roof makes the Boots eligible to be included on the National Register of Historic Places and brings on the protections and the funding opportunities the National Register brings."

CONTINUING COVERAGE OF LINCOLN MEMORIAL VANDALISM. Continuing coverage of the Lincoln Memorial vandalism was provided by WUSA-TV Washington (8/1). Carol Johnson with the NPS "said they are evaluating security at the Lincoln Memorial, but unfortunately, there are times it is going to be unattended, and if someone is really determined to do something, sometimes it's hard to stop."

Also reporting on the story is WJLA-TV Washington (8/1).

ADDITIONAL COVERAGE OF COURT'S RULING IN LASSEN CASE. Additional coverage of the court's ruling in

the case of a boy's death at Lassen Volcanic National Park was provided by [USA Today](#) (7/31), the [San Francisco Chronicle](#) (8/1, Ho, 220K), the [Chesterton \(IN\) Tribune](#) (8/1, 5K), and the [Chico \(CA\) Enterprise-Record](#) (8/1, 30K).

NPS DIRECTOR JARVIS PRAISED FOR DECISION ON ALASKA FISH. The [Juneau \(AK\) Empire](#) (8/1, 4K) reprints an editorial by the Fairbanks Daily News-miner on July 28. The paper notes that in response to questioning by Sen. Lisa Murkowski, NPS Director Jon Jarvis responded, "What I am willing to do is to change the guidelines so it includes Alaska wild-caught fish. I think that's the simple fix here. The guidelines were drawn broadly to give some guidance to our concessioners. We want a park visit to be a healthy experience. The food was the key component. And you have extraordinary food in Alaska. I mean, I lived up there. I know. I lived on the Copper River. I want that Copper River salmon in those concessions. So this is a simple change to the guideline. It's not a withdrawal of our guideline."

SHENANDOAH NATIONAL PARK SUPERINTENDENT REACTS TO PLAN TO IMPROVE ACCESS. In an op-ed for the [Charlottesville \(VA\) Daily Progress](#) (8/1, Northup, 28K), Shenandoah National Park Superintendent Jim Northup writes in response to the "May 6, 2013 proposal regarding management of the Rapidan Road within Shenandoah National Park." He agrees "that portions of the lower section of the Rapidan Road are currently in rough condition and would be willing to discuss with all involved stakeholders some modest improvements in maintenance for this road, but cannot support a proposal to change the fundamental character or use of the road." He adds that "we cannot support opening the upper Rapidan Road to public motor vehicle use, but support its current use as an entrance for hikers and horseback riders." Also, "we cannot support opening the upper Rapidan Road to guided tours by motor vehicle but would be willing to discuss a Commercial Use Authorization for a reputable tour company to offer a guided walking tour from the current trailhead to Rapidan Camp."

Bureau of Land Management:

COURT RULES BLM MUST SURVEY ROADS, AIRSTRIPS IN BREAKS. The [Miami Herald](#) (8/1, Brown, 139K) reports that a federal appeals court held Wednesday that "the government must closely examine roads, airstrips and other travel routes in the Upper Missouri River Breaks National Monument to prevent potential damage to cultural and historical properties." The 9th US Circuit Court of Appeals' decision "came in a lawsuit filed by environmental groups, who in 2009 challenged the Bureau of Land Management's resource management plan for the 590-square-mile area in north-central Montana." The court ruled that "federal officials must conduct an intensive survey of roads, airstrips and other travel routes to identify historical and cultural sites at risk of damage."

Also reporting on the story are the [Great Falls \(MT\) Tribune](#) (7/31, Puckett, 25K) and the [Courthouse News](#) (7/31).

HOUSE PANEL APPROVES O&C LANDS PROPOSAL. The [Eugene \(OR\) Register-Guard](#) (8/1, 52K) reports that a US House committee has "advanced legislation aimed at increasing timber harvests on former Oregon & California Railroad lands in Western Oregon." The measure "was included in a sweeping federal forests bill that passed the Natural Resources Committee in a voice vote."

The [Salem \(OR\) Statesman Journal](#) (7/31, Chebium, 35K) reports that Rep. Peter DeFazio "and two other Oregon House members who sponsored the plan – Democrat Kurt Schrader and Republican Greg Walden – say it would protect some of America's oldest and biologically diverse forests, provide consistent payments to 18 western counties and create jobs in the struggling region, which contains 2.6 million acres that once belonged to the Oregon and California Railroad Co. and are now federally owned."

Also reporting on the story is the [Roseburg \(OR\) News-Review](#) (8/1, 18K).

CAMPERS EVICTED FROM BERTELSEN NATURE PARK. The [Columbus \(IN\) Republic](#) (8/1, 21K) reports that the BLM "has completed the eviction of about 90 campers in the Bertelsen Nature Park in west Eugene."

Also reporting on the story is [The Oregonian](#) (8/1, 237K).

BLM TO HOLD EMERGENCY ROUNDUP FRIDAY. NBC News (8/1) reports that the BLM "and several other agencies will begin an emergency horse gather in the Blue Wing Complex area west of Lovelock this Friday." According to the bureau, "the emergency round up is due to a lack of water sources in the area." The article notes that "the round up will take several days and a helicopter will be used. Currently, there are more than 1,500 wild horses within parameter."

CHAVES COUNTY REJECTS PRAIRIE DOG RELOCATION. The Albuquerque (NM) Journal (8/1, 83K) reports that "a federal plan to relocate an unwanted population of prairie dogs is getting no support from Chaves County officials." The article note sthat "commissioners earlier this month declined a request by an Albuquerque group to capture the squirrel-like creatures and move them to Bureau of Land Management property."

ADDITIONAL COVERAGE OF AGREEMENT TO ADVANCE OPPORTUNITIES FOR VETERANS. Additional coverage of the agreement to expand outdoors access for veterans was provided by KRXI-TV Reno, NV (8/1) and KRWG Las Cruces, NM (8/1).

BLM CRITICIZED FOR CONTEMPLATING ALLOWING DEVELOPMENT IN FOUR CORNERS REGION. In an op-ed for the Durango (CO) Herald (7/31, Randolph, 8K), Dan Randolph, executive director of San Juan Citizens Alliance, writes that the BLM "is faced with easy and difficult choices in how to manage our public lands on an ongoing basis," but "sometimes, it chooses...the momentary...over...the basic." One choice the BLM is facing is whether to "allow oil and gas, or other developments, that will diminish" the "cultural and archaeological treasures of the Four Corners region are world-renowned." He warns that "currently, Mesa Verde, Chaco Canyon, Canyons of the Ancients, and Hovenweep are all under serious danger of poor BLM decisions."

Fish and Wildlife Service:

DIAMOND DARTER GETS PROTECTION. The Courthouse News (7/31) reports that the FWS "has finalized the listing of the diamond darter, one of the most imperiled fish in the southeastern US, as endangered under the Endangered Species Act, according to a new regulation." The agency's action "spurred by a landmark agreement with the Center for Biological Diversity to speed protection decisions for 757 species," according to the CBD's press release in response to the final rule.

Securing America's Energy Future:

Renewable Energy:

CONTINUING COVERAGE OF SUNZIA PROJECT. The Willcox (AZ) Range News (8/1, 3K) reports that the Cochise County Board of Supervisors "agreed to submit a letter of protest of the route selected" by the BLM "that permits SunZia Southwest Transmission, LLC., to install two parallel power lines that will run through the northwest corner of the county and the Lower San Pedro River Valley." The letter stated: "In addition, we expressed our concerns related to the Buffalo Soldier Electronic Range, protected by Arizona Senate Bill 1387. The test range relies on an extremely quiet electro-magnetic spectrum for missions of Fort Huachuca in testing electronic equipment vital to military missions and the protection of military personnel in theater."

In an editorial, the Willcox (AZ) Range News (8/1, 3K) wonders whether the Center for Biological Diversity and the Audubon Society "will join the Cochise County Board of Supervisors in protesting the SunZia power line route recommended" by the BLM. According to the paper, "the collective silence of these groups regarding the SunZia project raises questions of what motivates and determines whether these organizations get involved."

Also providing coverage is the Ruidoso (NM) News (8/1, Simonich, 13K).

Onshore Energy Development:

BLM HALTS PLAN TO OPEN BLUE ROCK STATE FOREST TO FRACKING. The Columbus (OH) Dispatch (7/31, 152K) reports that the BLM's "plan to open Blue Rock State Forest to fracking was put on hold yesterday after state officials said they didn't know about it." The move "to suspend that auction was made after Ohio

Department of Natural Resources officials told" the BLM "that they had not given their consent, said Bethany McCorkle, an agency spokeswoman."

The Dayton (OH) Daily News (8/1, 100K) reports that McCorkle "says the state agency will now gather information to make sure threats to the forest and wildlife are minimized by any drilling."

The Mansfield (OH) News Journal (7/31, 18K) reports that environmental advocates "applauded a decision to halt for now federal plans to auction off mineral rights for gas drilling underneath a state forest in Muskingum County." Eric Miller, director of Mohican Advocates Inc., said, "There was a rush of protests and calls and emails. I think it indicates they're listening to the public, and that's a good sign." He added, "But every state that has gas and oil beneath it is in danger. The current law has to be changed."

The Columbus (OH) Dispatch (8/1, 152K) reports that "a coalition of environmental groups" had sent a letter to the BLM "to protest the federal agency's plan to open Ohio's Blue Rock State Forest for fracking." Nathan Johnson, staff attorney of the Buckeye Forest Council, said, "Blue Rock State Forest is a natural treasure that belongs to all Ohioans. We are stunned the BLM would attempt to frack our forest without making sure citizens and state government had a chance to respond to the plan and make their concerns known."

Also providing coverage are the Akron (OH) Beacon Journal (8/1, 85K), the Coshocton (OH) Tribune (7/30, 3K), the Martins Ferry (OH) Times Leader (8/1, 12K), the Akron (OH) Beacon Journal (8/1, 85K), and the Mansfield (OH) News Journal (7/30, 18K).

FEDERAL AGENTS RAID COLORADO DRILLING OFFICE. The Oklahoman (8/1, 127K) reports that federal agents with the FBI, IRS and BLM "have served a search warrant at the offices of Crystal River Oil and Gas in Basalt." According to IRS special agent Karen Gurgel, "the action on Tuesday is part of a criminal investigation."

Also reporting on the story is the Aspen (CO) Daily News (8/1, 12K).

BLM OIL AND GAS LEASE SALE NETS NEARLY \$50 MILLION. The Billings (MT) Gazette (8/1, 39K) reports that a BLM "oil and gas lease auction in Billings netted nearly \$50 million from the sale of 87 federal leases totaling 19,015 acres, in North and South Dakota."

SHALE DRILLING IN SEISMICALLY-ACTIVE CHINESE PROVINCE ELICITS FEARS OF EARTHQUAKE RISKS. Bloomberg News (8/1, Haas) reports companies including China National Petroleum and Royal Dutch Shell have begun drilling for oil and natural gas in Sichuan province, the "most seismically active" area in China. University of Utah Energy & Geoscience Institute professor Shu Jiang warns, "The siting of the wells could cause some artificial earthquakes." Still, with potentially twice as much shale gas reserves as the US, China is intent on fulfilling its growing energy needs through fracking. And, other researchers have countered that "calculating seismic risk" is tricky; therefore, the risk of shale drilling in a seismically-active area may not be as great as some fear.

GOP BILL WOULD FORCE EPA TO ALTER ONGOING FRACKING STUDY. The "E2 Wire" blog of The Hill (8/1, Geman, 21K) reports that today the House Science Committee "will mark up legislation" that forces the EPA "to alter its ongoing study of the effects of oil-and-gas 'fracking' on drinking water resources." The bill, by chairman Lamar Smith, "would require the major, years-long study to include 'objective estimates of the probability, uncertainty and consequence of each identified impact, taking into account the risk management practices of states and industry.'"

Offshore Energy Development:

BSEE INVESTIGATION INTO RIG BLOWOUT PREVENTERS INTENSIFIES AFTER NATURAL GAS RIG BLOWOUT. Yahoo! (8/1, Amy) reports that the "blowout on a natural gas rig off the Louisiana coast" last week "could shift regulators' focus to shallow-water drilling and make an overhaul of safety equipment regulations more likely." According to the article, "interest is expected to focus on the apparent failure of the blowout preventer, a series of that's supposed to shut off flow from a well when drillers lose control." Meanwhile, BSEE Director James Watson "said he plans to meet with executives from shallow-water drilling companies to discuss safety and risk

reduction." In a statement, Watson said, "This vent and other recent incidents serve as a reminder that industry must rededicate its efforts to make safety its top priority, including in shallow water."

Also providing coverage are the Minneapolis Star Tribune (7/29, Plaisance, 335K), the Galveston County (TX) Daily News (8/1), the Baton Rouge (LA) Business Report (7/31), the Mississippi Business Journal (7/31), and the Rigzone.com (8/1).

BOEM IN PACT TO RESTORE COASTAL AREA IN VIRGINIA BEACH. Dredging Today (7/31) reports the Bureau of Ocean Energy Management signed in July a memorandum of agreement with the US Navy "for oceanfront and dune system stabilization and restoration at the Dam Neck Annex at Naval Air Station Oceana, Virginia Beach," VA. The agreement will allow for the "use of up to 700,000 cubic yards of Outer Continental Shelf (OCS) sand," the article notes.

HALLIBURTON TO PLEAD GUILTY TO DESTROYING GULF OIL SPILL EVIDENCE. The AP (8/1, Kunzelman) reports from New Orleans that US District Judge Jane Triche Milazzo "has scheduled a hearing on Sept. 19 for Halliburton Energy Services to plead guilty to destroying evidence after BP's 2010 oil spill in the Gulf of Mexico." Halliburton "was arraigned Wednesday in New Orleans on a misdemeanor charge," and although attorneys for the firm "entered a plea of not guilty during the arraignment, Halliburton has agreed to plead guilty to one count of destruction of evidence in a deal with the Justice Department." Halliburton "also has agreed to pay the statutory maximum fine of \$200,000, be on probation for three years and to cooperate with the government's criminal investigation." The deal is subject to Judge Milazzo's approval.

Tackling America's Water Challenges:

DAINES HYDROPOWER BILL CLEARS HOUSE NATURAL RESOURCES COMMITTEE. The AP (7/31) reports a House committee "is advancing a bill from U.S. Rep. Steve Daines that would allow hydropower projects in more local irrigation districts." The AP says the bill is one of the measures "advancing in Congress" to end "restrictions on hydropower development in Bureau of Reclamation irrigation systems built by the government after 1939."

The Great Falls (MT) Tribune (7/31, Puckett, 25K) also covers the news.

BUREAU OF RECLAMATION FINALIZES RECLAMATION MANUAL POLICIES. WaterWorld (8/1), an online magazine dealing with water and wastewater industry issues, says "four water-related Reclamation Manual Policies and Directives and Standards" were "recently finalized by the Bureau of Reclamation." The magazine says the revised policies will help Reclamation staff improve performance related to "development, negotiation, execution and administration of water-related contracts."

NAVAJO NATION IN PACT TO EXTEND NAVAJO GENERATING STATION LEASE. The Lake Powell (AZ) Chronicle (8/1, 2K) reports Navajo Nation President Ben Shelly "signed a \$1.3 billion lease extension July 30 for the Navajo Generating Station." The extension must be approved by the Interior Department.

Empowering Native American Communities:

CONNECTICUT TOWNS BACK SEN. BLUMENTHAL'S MOVE TO BLOCK REVISION TO TRIBE RECOGNITION. The Indian Country Today Media Network (7/31) reports Connecticut officials "have jumped on Sen. Richard Blumenthal's bandwagon of opposition to the Interior Department's proposed revisions to the federal recognition regulations." The article says that on June 21, Kevin Washburn, Interior's assistant secretary for Indian Affairs, released his draft changes to Interior's "process for federally acknowledging Indian tribes." The article says two weeks later, Blumenthal called a meeting to raise awareness about the planned revisions to stop the possible Federal acknowledgment of some of the tribes.

TOWN OF MIDDLEBORO SEEKS \$1 MILLION FROM TRIBE FOR CASINO TERMINATION. The New Bedford (MA) Standard-Times (7/31, Brennan, 21K) reports the town of Middleboro, whose deal to host a casino turned sour, seeks out years of payments totaling \$1 million from the Mashpee Wampanoag tribe. The Middleboro Board of Selectmen voted Monday "to send a letter to the tribe," with copies to the Bureau of Indian Affairs and

US Rep. William Keating (D-MA). The paper reports the town says the deal wasn't terminated properly, hence it is owed the money for the planning the town did for the casino.

POLICE CONTINUE WITH INVESTIGATION OF \$65,000 THEFT FROM EASTERN PEQUOTS. The New London (CT) Day (7/31, 28K) reports Connecticut state police continue to probe "the apparent theft" of \$65,000 from the Eastern Pequot Tribe, whose chairman, Brian Geer, "resigned abruptly last month." The paper says Geer had been voted in for "a three-year term as chairman in July 2012." Months earlier, the tribe had sued Department of the Interior officials, "seeking to overturn the Bureau of Indian Affairs' 2005 denial of recognition for the tribe."

PAPER BACKS NAPA COUNTY STANCE IN LEGAL FIGHT AGAINST TRIBE. In an editorial, the Napa Valley (CA) Register (8/1) backs the Napa County officials' efforts to stop "Federal recognition of the Mishewal Wappo Tribe of Alexander Valley." The paper says county officials believe "Federal recognition equals a casino," though the tribe discounts such a possibility. However, Supervisor Diane Dillon isn't convinced, and notes that "the tribe is seeking federal recognition through litigation because it cannot qualify for recognition through established procedures with the Bureau of Indian Affairs." The paper says it supports the current status because it has helped Napa County protect its land from housing developments and other "encroaching development of all sorts."

Top National News:

OBAMA DECRIES CRITICISM OF SUMMERS FROM THE LEFT. President Obama's exchanges with House and Senate Democrats Wednesday regarding the advisability of choosing former treasury secretary Larry Summers as the next Fed chair generated a significant amount of online and print coverage, but was not mentioned on any of the network newscasts Wednesday evening.

The Washington Post (7/31, O'Keefe, Nakamura, Kane, 489K) reports that in a Capitol Hill meeting Wednesday, the President "clashed with" House Democrats who urged him not to choose his former NEC director as the next Fed chair. The Post says that "in a tense exchange" with Rep. Ed Perlmutter (D-CO), the President "defended Summers' role in helping to restore the US economy and 'expressed frustration; with a growing negative campaign against him." According to the Post, Summers created enemies on the left due to "his central role in the deregulation wave of the 1990s." Twenty Senate Democrats have announced that they would prefer that the President choose Fed vice chair Janet Yellen to succeed Ben Bernanke, but on Wednesday, according to an anonymous senator, the President "described [Summers' and Yellen's] ideological differences on economic policy as 'paper thin.'"

Referring to the exchange over Summers, Jake Tapper, on CNN's The Lead (7/31), reported that "the President's visit did not go super smoothly," although, "of course the White House disputes that."

On Bloomberg TV's Bottom Line (7/31), Yang Yang reported that the White House "is saying not to read into this," but, "according to lawmakers, the President offered a strong and even adamant defense" of Summers. Yang added that the President also "threw a curveball and named former Fed vice chairman Donald Kohn...as a potential third candidate."

USA Today (8/1, Madhani, 1.71M) quotes White House Press Secretary Jay Carney as saying, "Larry Summers' service here was extremely helpful to the President." The AP (8/1, Lederman) notes that the White House insists that the President's "defense of Summers isn't an endorsement...and that Obama won't announce Bernanke's replacement until the fall."

But Larry Kudlow, on CNBC's Kudlow Report (7/31, 126K), said, "I have never heard a president get so active, involved in a Federal Reserve chairman...debate." Kudlow added, "You are setting up a situation – no matter how bright you might think Larry Summers might be, or whether he deserves the job – it begins to look like he would be Obama's guy at the Federal Reserve, and I don't think that's what you want. You want independence."

The Wall Street Journal (8/1, Hook, Peterson, Subscription Publication, 2.29M) reports that on Wednesday, Rep. Rick Nolan (D-MN) said of the President, "He was trying to convince the caucus that Larry Summers would be a good choice as far as he's concerned." Nolan added, "I think the country would be a lot further along in creating

jobs and in the recovery had the president listened more to the Democratic caucus than to Larry Summers and Wall Street.”

Bloomberg News (8/1, Hunter, Bender) reports that after the meeting, Rep. Brad Sherman (D-CA) said the President “took a minute to stand up for Larry Summers.” Rep. John Lewis (D-GA) described the President as “very defensive...of Summers...saying that Summers had played a very critical role early in the administration.” And Rep. John Larson (D-CT) said the President was “very adamant in his defense of the service Larry Summers has provided.” Rep. John Yarmuth (D-KY) is quoted as saying, “I think he has a lot of respect for Larry Summers. I think he respects the work that he did on the financial crisis, and he didn't want anybody standing up and casting aspersions on him.” Yarmuth paraphrased Perlmutter's question to the President as, “Larry Summers? Bad idea – I'm willing to discuss.”

According to Politico (8/1, Gibson, Everett, 25K), “after delivering his defense, Obama sought to ease the tension in the room” by adding, “The good news is I would defend all of you.”

The New York Times (8/1, Landler, Weisman, Subscription Publication, 1.68M) reports that in his “strong defense” of Summers, the President argued that Summers “had been maligned in the liberal news media,” but “did not address the criticism of Mr. Summers over his record on women's issues, which has dogged him throughout his career.”

The Hill notes that the New York Times “recently endorsed Yellen in an editorial that criticized Summers' handling of the president's stimulus bill,” while the Huffington Post (8/1, Lewis) “has published a series of blistering columns this month attacking Summers as a corporate shill for his close ties to Wall Street.” The Huffington Post (7/31, Bendery) draws attention to The Hill's report that, according to Rep. Brad Sherman (D-CA), the President told the House members Wednesday “not to believe everything you read in The Huffington Post.”

McClatchy (8/1, Clark, Lightman) says Summers is “considered by critics an irascible, controversial figure,” who “pushed deregulation policies that many Democrats say helped lead to the 2008 financial downturn.” McClatchy goes on to note that as president of Harvard, Summers “ignited controversy by suggesting in 2005 that women may not have the same innate abilities that are required to excel in science and math as men.” After Wednesday's meeting, Senate Majority Whip Durbin said, “If he's the nominee I'd have a lot of questions.” Reuters (8/1, Ferraro, Lawder) reports that Durbin added that Yellen has “expressed some progressive views of things I'd like to see at the Federal Reserve.”

According to the Huffington Post (8/1, Terkel), “Thirty-eight of the 62 Democratic women in the House have signed on to a letter circulated by” Rep. Maxine Waters (D-CA) that calls Yellen the “best choice” for Fed chair. Politico (8/1, Brown, 25K) reports that at a breakfast hosted by the Christian Science Monitor Wednesday, White House senior adviser Dan Pfeiffer said the President “puts a lot more stock in private advice than public advice.”

Ezra Klein, in a “Wonkblog” piece for the Washington Post (8/1, Klein, 489K) titled “The Case For Larry Summers,” wrote that while Yellen has been publicly endorsed by dozens of members of Congress, Summers' allies are “concentrated in and around the Obama administration, and they stay out of the media almost as a matter of course.” Klein contends that it is their “reticence” that “has led to a real imbalance” in the press in Yellen's favor. Klein goes on to list Summers' perceived strengths in detail. According to Klein, Summers has a reputation among his allies as “an informed, confident and engaged financial regulator – something they worry Yellen wouldn't be.” Klein adds that they are not saying Yellen's “heart wouldn't be in the right place, but that her focus would be elsewhere.”

Karen Finerman, CEO of Metropolitan Capital Advisors, in a piece for CNBC.com (8/1, Finerman), endorses Summers over Yellen. Finerman writes, “Where I think Summers' true edge lies is in his real ‘in the weeds’ experiences with multiple financial market crises both at home and abroad over the last three decades.”

Obama Floats Kohn As Another Potential Nominee. Citing an anonymous “Democratic aide,” Bloomberg News (8/1, Hunter, Bender) reports that the President “also named” former Fed Vice Chairman Donald Kohn “as potential nominee” on Wednesday. The Wall Street Journal (8/1, Hook, Peterson, Subscription Publication, 2.29M) notes that Kohn is a senior fellow at the Brookings Institution and was on the Bank of England's interim Financial Policy Committee following his 40-year career at the Fed.

Neil Irwin, in a piece for the Washington Post (8/1, Irwin, 489K), says Kohn was "Bernanke's No. 2 during the financial crisis" meaning that he was "at Bernanke's side for many of the biggest, hardest decisions the Fed had to make during that era." Irwin adds, "That could cut both ways in evaluating a nomination." The Wall Street Journal (8/1, McGrane, 2.29M) also provides a full profile of Kohn, including this quote from former Fed governor Laurence Meyer: "Don is the most important nonchairman member of the board in the history of the Fed."

Politico (8/1, Gibson, Everett, 25K) reports that according to Durbin, the President "said that he'd interviewed many people whose names have been mentioned and many whose names have not been mentioned."

McCain Accidentally Enters Obama's Meeting With Senate Democrats. The Hill (8/1, Kurtz, 21K) reports "there was confusion Wednesday" when Sen. John McCain "mistakenly strolled into President Obama's meeting with Senate Democrats at the Capitol. The room full of Democrats – who happened to be meeting in the same room where the Senate GOP usually holds their weekly policy luncheons – erupted in applause and laughter" as Obama's 2008 presidential rival entered. McCain later wrote on Twitter, "To be clear: I opened the wrong door, looked in and saw the President, said 'my mistake' and everybody laughed. Lighten up everybody."

GDP GREW 1.7% IN SECOND QUARTER, BEATING EXPECTATIONS. Bob Schieffer, on the CBS Evening News (7/31, story 3, 2:25, 5.58M), reported that the Commerce Department announced Wednesday that the US economy "slowed a bit...going from moderate growth to just modest," but Schieffer added that the Fed "will keep interest rates low to stimulate" growth. Schieffer said US GDP "grew just 1.7% in the second quarter of this year," which is "better than the 1.1% in the first quarter."

According to the New York Times (8/1, Schwartz, Subscription Publication, 1.68M), the 1.7% rate of growth is "well ahead of the pace economists expected," and "came despite higher taxes and as automatic spending cuts imposed this year by Congress took effect." The Times says that in surveys taken prior to Wednesday's announcement, economists "estimated that the economy would record growth of just under 1 percent in the second quarter." The Wall Street Journal (8/1, Sparshott, Portlock, Subscription Publication, 2.29M) also reports that the consensus forecast for second quarter growth had been 0.9%.

The New York Times (8/1, Appelbaum, Subscription Publication, 1.68M) reports that after its meeting Wednesday, the Federal Open Market Committee did not indicate "how much longer it would continue to add \$85 billion a month to its holdings of mortgage-backed securities and Treasury securities," but by leaving "its economic outlook basically unchanged," it was "suggesting" that it "still intended to reduce the volume of its purchases later this year." The Times notes that the FOMC's statement released Wednesday "acknowledged the weak pace of growth during the first half of the year, which it described as 'modest' rather than 'moderate'...suggesting an even more lackluster economic performance." However, the FOMC nevertheless anticipates that "economic growth will pick up from its recent pace" in the second half of the year. The Wall Street Journal (8/1, Hilsenrath, McGrane, Subscription Publication, 2.29M) covers the FOMC's statement in an article titled "Fed Leaves Bond Buys In Place, Moderates Description Of Economy."

The Washington Times (8/1, Hill, 76K) notes that after "sweeping revisions by the department that treat business and federal spending on research and development as an investment...rather than an expense that subtracts from the economy's momentum," the Commerce Department now estimates that the US economy grew last year "at 2.8 percent rather than 2.2 percent." The Wall Street Journal (8/1, Subscription Publication, 2.29M), in an editorial, welcomes the new measure of GDP, which it says more accurately reflects the role of intellectual property in creating economic growth.

ADP: 200,000 Jobs Added In July. USA Today (8/1, Davidson, 1.71M) reports that payroll processor ADP announced on Wednesday that, according to its estimates, "businesses added 200,000 jobs in July," while "economists expected ADP to report 180,000 additional jobs."

Stocks Almost Unchanged On Last Day Of Dow's Best Month Since January. The AP (7/31) reports that on Wednesday, the Dow Jones Industrial Average "edged lower," dropping 21, or 0.1% to 15499, but "still closed out July with its best monthly gain since January." The S&P 500 "dropped 0.23 of a point, or 0.01 percent, to 1,685.73" and the Nasdaq "rose 9.90 points, or 0.3 percent, to 3,626.37." The Wall Street Journal (7/31, Scaggs, Subscription Publication, 2.29M) covers Wednesday's market action under the headline "Dow Industrials Finish

In Red: Economic Data Fail to Buoy Shares.”

HOUSE PASSES STUDENT LOAN BILL. The CBS Evening News (7/31, story 7, 0:15, Schieffer, 5.58M) reported that the House on Wednesday “gave final congressional approval...to rolling back the interest rate on student loans.” Reuters (8/1, Nawaguna) reports that the bill would reduce student loan interest rates to 3.86% for undergraduates and tie the rates to the 10-year Treasury note plus 2.05% for undergraduates, and plus 3.6% for graduates.

Politico (8/1, Nelson, 25K) reports that the bill caps rates “at 8.25 percent for undergraduate loans, 9.5 percent for graduate loans and 10.5 percent for PLUS loans.” Politico notes that the measure had an easier time passing the House than the Senate where “liberal Democrats objected, saying the measure doesn’t do enough to protect students from rising costs in the long term.”

The Washington Post (8/1, Johnson, 489K) notes that while House Republicans “have deemed this a long-term solution,” many Democrats say the plan “will probably need tweaking in future years.”

The AP (8/1) reports that “despite objections from consumer advocates that the proposal could cost future students,” the White House “has endorsed the deal.”

Editorial Wrap-Up:

NEW YORK TIMES. “More Fog From The Spy Agencies.” The New York Times (8/1, A20, Subscription Publication, 1.68M) says in an editorial that the documents released Wednesday were “narrowly selected and heavily censored” and failed to show the “value of the surveillance.” The Times says they “clarified nothing of importance.”

“The Next Civil Rights Frontier.” The New York Times (8/1, Subscription Publication, 1.68M), in an editorial, casts the “next civil rights frontier” as transgender rights. Looking at the case of a California student who was at the center of a debate over transgender issues, the Times says “the student’s classmates accepted” the student’s gender status. But “the school district would not let the matter go.” After the parents filed complaints with the Department of Justice and Department of Education, the school district decided to “revise its antidiscrimination policies so as to prohibit gender-based discrimination.” The Times sees it as a possible sign for a “welcoming future for transgender students.”

“The Safety Of Imported Foods.” The New York Times (8/1, Subscription Publication, 1.68M) editorializes about new safety rules imposed by the FDA on imported foods. Noting the importance of “stronger regulation,” the Times claims that “the new rules would shift the primary burden for safety to the companies that import the food.” However, the Times says that the new regulations, along with others for domestic products “should be given final approval.”

“47 Rejections, Then The Booker Long List.”

WASHINGTON POST. “A Window On Intel Gathering.” The Washington Post (8/1, 489K) says in an editorial that “it should not have taken high-profile leaks to prod the government” to reveal information about surveillance. The Post says classification policy is generally an executive branch matter, and that President Obama can improve transparency without congressional action.

“Italy’s Racism Problem.” The Washington Post (8/1, 489K), in an editorial, looks at recent public ridicule of Cecile Kyenge, Italy’s first black cabinet minister. Beyond having a banana thrown at her at a public appearance, the vice president of Italy’s Senate, said she has “the features of an orangutan.” The Post sees the racial undertones as backlash resulting from the immigration population growing “from 1 million to 4.5 million people” in recent years. But, the Post says that with unprecedented unemployment, “Italy will need every immigrant it can attract.”

“Bob McDonnell’s Disgrace.” An editorial in the Washington Post (8/1, 489K) says that while Virginia Gov. Robert McDonnell “can dodge accountability,” for the scandal surrounding gifts he and his wife received from

businessman Jonnie R. Williams Sr., his "damage-control campaign speaks louder than his words." The Post argues that McDonnell's strategy on the matter is "to obfuscate and split legal hairs while dodging responsibility for his role, and that of his wife, in what has become his administration's disgrace."

THE WALL STREET JOURNAL. "Data Of Prosperity Past." The Wall Street Journal (8/1, Subscription Publication, 2.29M), in an editorial, welcomes the new measure of GDP, which it says more accurately reflects the role of intellectual property in creating economic growth.

"The IMF And Greek Losses." The Wall Street Journal (8/1, Subscription Publication, 2.29M), in an editorial, views the IMF warning as an attempt to pressure European governments will making sure its own funding is repaid by Athens. In examining data, the Journal says that Greece will begin paying back more than it borrows from the IMF beginning next year. Any additional funding should be shared by the IMF, argues the Journal.

Last Laughs:

LATE NIGHT POLITICAL HUMOR.

Jimmy Kimmel: "In politics, plus-size New Jersey Governor Chris Christie and Kentucky Senator Rand Paul are in a bit of battle right now. For those who don't know, Rand Paul is Rue Paul's straight-edge, conservative brother, something like that. Apparently Gov. Christie criticized Rand Paul for pork barrel spending so Rand fired back. He said this is the king of bacon talking about bacon. The king of bacon, is that supposed to be an insult? I would kneel before the king of bacon."

Jimmy Kimmel: "But it is notable because Governor Christie is a very large man and he called him the king of bacon. He had that surgery though. So far he's lost about 50 pounds. I hope he gets down to 160 pounds. I would love to see Gov. Christie holding an enormous pair of pants above his head like Jared from Subway. Wouldn't that be inspiring?"

Jimmy Kimmel: "But I tell you whatever is going on in New Jersey is peanuts compared to what is going on with Anthony Weiner in New York. Today's news was one of his former interns shared a great story with 'The New

York Daily News'. She claims at one point, this is not sexual, he called all 20 interns into his office. He told them tell me your names and I'll be able to go around the room and remember all of your names. And then he started to go around the room and couldn't remember any of their names. He knew their screen names. But he did not know their..."

David Letterman: "A lot of people are saying maybe Anthony Weiner should get out of the race. Maybe he should go run for mayor of Orange County."

David Letterman: "Eliot Spitzer says Anthony Weiner should drop out. A lot of top Democrats say he should... even Silvio Berlusconi said the guy is a creep. Silvio Berlusconi. That's right."

Stephen Colbert: "Folks, I always try to keep a level head. You know I for one always try to keep a level head but even I am enraged by this Bradley Manning trial. First of all, that he had a trial. Those prisoners in Gitmo must be dying to know how he wrangled that sweet deal. You may remember Bradley Manning as the WikiLeaks who released the infamous collateral murder video or perhaps for being the least athletic Manning brother."

Stephen Colbert: "Now, since his arrest three years ago Manning has been held in solitary confinement for 23 hours a day, forced to sleep naked without pillows and sheets on his bed. But I say he deserves it. For Pete's sake the guy revealed that the United States tortures, partly through his document leak, but mostly by how we tortured him."

Stephen Colbert: "Manning was found not guilty of the most serious charge: Aiding the enemy. And even more shocking, he was also found not guilty of shooting Trayvon Martin. Evidently, no one is guilty of that one."

Stephen Colbert: "Folks, yesterday President Obama gave a major speech about the economy at an Amazon distribution center. I think he chose Amazon because they're going to start equipping congressmen with a 'buy now' button."

Stephen Colbert: (Referring to a photo of President Obama's lunch with Hillary Clinton) "I don't need news from the cable crowd because I can analyze the entire 2016 campaign strategy through this lunch. First of all, Hillary's campaign, it is on to the on. And obviously they ate outdoors to woo the environmentalists. Had the jambalaya to court gulf coast Democrats. President's rolled-up sleeves say, 'I support the right to bare arms.' But the lack of beverages says that under Hillary, there will be no water boarding, tap or sparkling. And the grilled chicken? It was on sale at Safeway."

Jimmy Fallon: "Let's talk a little bit about Governor Chris Christie over in New Jersey. Love that guy. I love that guy. But now a Kentucky Senator Rand Paul is criticizing Christie for the pork barrel spending in his state. He even called Governor Christie the king of bacon. Christie would have been offended, but in fairness, that is what it says on his apron."

Jimmy Fallon: "So actually, here's what Rand Paul said. He said, 'In terms of pork barrel spending, Christie is the king of bacon,' low blow. While in response, Christie fired back. He said 'That kind of name calling is beneath the office you hold, sir. But just to clarify, would I be the king of real juicy pork bacon or that gross generic turkey bacon?' To which Paul replied, 'What? I don't know, man. Bacon, bacon. Look, your fiscal values are not in line with the Republican Party.' To which Christie said, 'Are you kidding, I'm as Republican as they come. But hey, back to that king of bacon thing. Do you think I wear a crown of bacon or sit on a throne of bacon? Or would I just be all like eating bacon all the time?' To which Paul said, 'Dude, it was just a metaphor. Let it go. My point is your state's spending is out of control.' To which Christie says, 'I'll tell you what's out of control, how much you got me thinking about bacon. You do whatever you want with the Republican Party. I'm about to start a bacon party in my tum-tum.'"

Jay Leno: "Well, not looking good for Anthony Weiner. He is now fourth place in the polls. Well, the current leader in the New York City mayoral race is Christine Quinn, which, of course, if she wins would make her the peter tweeter defeater."

Jay Leno: "More and more people calling for Anthony Weiner to step aside. But, in a new ad campaign, Weiner says, 'Quit isn't the way we roll in New York City.' Well, it's better than his old slogan: 'When in doubt, whip it out.'"

Jay Leno: "The state of Hawaii is now offering to buy homeless people a one-way ticket to anywhere they want to go just to get them to leave the island. Why can't we offer this same deal to the mayor of San Diego? This could be our way out of this problem."

WYOMING GOP DELEGATION WANTS STATE TO BE EXEMPT FROM BLM FRACKING

RULES. The "E2 Wire" blog of The Hill (8/20, Colman, 322K) reports that the Republican congressional delegation of Wyoming has asked the Interior Department "to exempt states that already regulate hydraulic fracturing, or fracking, from a proposed rule governing the practice on federal land." Sen. John Barrasso, Sen. Mike Enzi and Rep. Cynthia Lummis said in a letter to Interior Secretary Sally Jewell that they are "concerned the draft rules from the department's Bureau of Land Management would be duplicative" and the rules "could deter people from drilling for oil and gas on federal lands within their states, costing 'hundreds of millions of dollars in revenue.'" In the letter the lawmakers said, "Federal law and regulations often delay investment and job creation for years. Consequently, Federal law and regulations push investment out of public land states and into other states where there is greater regulatory certainty."

The AP (8/20, Gruver) reports that in May, when the draft rules were released, Jewell said "that federal rules for fracking on federal land are needed to reconcile a patchwork of state fracking rules." However, she offered praise for the rules in Wyoming "which, among other requirements, make companies provide to regulators lists of the chemicals that go into the specially formulated fluids they use to improve the fracking process." In an email statement, Interior spokeswoman Jessica Kershaw said that "the U.S. Bureau of Land Management is committed to working with states that have fracking standards to avoid unnecessary duplication or delays."

Also reporting on the story are the [Columbus \(IN\) Republic](#) (8/20, 76K), the [San Francisco Chronicle](#) (8/20, Gruver), the [San Luis Obispo \(CA\) Tribune](#) (8/19, 119K), the [Billings \(MT\) Gazette](#) (8/20, 188K), the [York \(SC\) Enquirer-Herald](#) (8/19, 18K), the [Anchorage \(AK\) Daily News](#) (8/19, 223K), the [Rock Hill \(SC\) Herald](#) (8/19, 102K), the [Upstream Online](#) (8/20, Johnson, 20K), and the [Law 360](#) (8/20, 3K).

CONSERVATIONISTS FRET ABOUT SECRETARY JEWELL'S "SLOW START." The Seattle Post-Intelligencer (8/20, Connelly, 800K) reports that conservation advocates are worrying that Interior Secretary Sally Jewell is "off to a slow start," and "so far, it seems – to steal the phrase of ex-Labor Secretary Robert Reich – that she is locked in the Cabinet." The article points out "a trio of worries about Jewell, and ways out." First, the article suggests Jewell to "get out of the rut of photo opportunities;" second, to "install your own people;" and third, to "connect with the President."

Secretary Jewell Urged To Protect Public Lands. In an op-ed for the Wyoming Tribune Eagle (8/18, Zimmerman, 44K), Kate Zimmerman writes that according to a recent report issued by the National Wildlife Federation, "outdoor enthusiasts...now spend more than \$646 billion annually." But the National Wildlife Federation reports that, "despite the economic and public values of these lands, federal lawmakers have introduced dozens of bills seeking to sell off or roll back protections for public lands." Zimmerman hopes that Interior Secretary Sally Jewell's "stewardship over the next several years will pay back dividends."

SEN. HEINRICH URGES FEDERAL ACTION ON SUNZIA POWER LINE. The El Paso (TX) Times (8/20, Simonich, 240K) reports that Sen. Martin Heinrich wrote in a letter to Interior Secretary Sally Jewell that "the SunZia proposal had been delayed long enough, and that the federal government's credibility was on the line in resolving property use involving military installations and alternative energy suppliers." Heinrich wrote, "Another delay on this project threatens the credibility of the Department of Defense Siting Clearinghouse process. SunZia was selected as an early 'fast track' project for the nine-agency Rapid Response Team for Transmission and was intended to act as an example of how DOD and the Department of the Interior could work together to resolve energy siting conflicts quickly and collaboratively."

Additional coverage was provided by the Alamogordo (NM) Daily News (8/20, Simonich, 21K), the Deming (NM) Headlight (8/20, Simonich, 10K), the Farmington (NM) Daily Times (8/20, Simonich, 46K), and KRWG-FM Las Cruces, NM (8/20, 5K).

ENVIRONMENTAL GROUPS PRESS SECRETARY JEWELL TO REJECT IZEMBEK ROAD. The E&E Daily (8/19) reports that environmental groups are increasing pressure on Interior Secretary Sally Jewell to "reject a proposed gravel road through an Alaskan wilderness, drawing swift rebuke from Alaska Sen. Lisa Murkowski (R), the road's most outspoken supporter." On Friday, the groups wrote in a letter to Jewell, "The proposed road would be harmful to the Izembek Refuge and Wilderness and the American public. It would fail to provide the emergency medical transportation desired by the people of King Cove, and it would be extremely costly for taxpayers in a time of great financial strain and many pressing national needs." However, "Robert Dillon, a spokesman for Murkowski, said that the letter was misleading and most environmentalists have never experienced the turbulent weather at King Cove that makes a road necessary."

IN PUBLIC COMMENTS TO STATE DEPARTMENT, INTERIOR ENUMERATES WAYS IN WHICH KEYSTONE XL COULD HARM WILDLIFE. The Los Angeles Times (8/20, Banerjee, 3.4M) continues coverage of last week's warning from the Interior Department that the Keystone XL pipeline could harm wildlife near the route. The agency's warnings are in direct contradiction to the March draft environmental assessment issued by the US State Department, which found the pipeline would have only an indirect, temporary effect on area wildlife. In a letter spanning 12 pages as part of public comments on the State Department's draft assessment, the Interior Department "repeatedly" suggests that State's assessment of the environmental effects of the pipeline project is "inaccurate." Among the ways the project could harm wildlife, Interior suggests it could cause "species displacement, increased predation rates and predator travel lanes, increased nest parasitism, vehicle collisions with wildlife ... invasive plant species, increased wildfire risk, lower wildlife density, increase in collisions with power lines and electrocutions on power poles ... and increase in poaching."

DRONES COULD CHANGE FIGHT AGAINST WILDFIRES. CNN (8/19, 11.58M) reports that "accessing new technology in rural areas where forest fires rage has been a challenge, but the use

of new unmanned drones could drastically change the nature of the fight." Sher Schranz, a project manager at National Oceanic and Atmospheric Administration who researches fire weather modeling, explained, "We can get more information for less cost, and it doesn't put anyone in harm's way." The article notes that "drones can help in two ways: They can safely gather more information about fire conditions than is currently available, and they can send that information to firefighters on the ground quickly."

CONTINUING COVERAGE OF COLORADO RIVER. The E&E Daily (8/19) reports that "as drought continues to grip the Southwest, officials in charge of managing the Colorado River's water announced Friday that they will be forced to take a historic action on account of low water levels." The article notes that "for the first time since Lake Powell was filled in the 1960s, water releases from that reservoir down to Lake Mead, the downstream reservoir that provides water to southern Nevada, Arizona, Southern California and northern Mexico, will be just 7.48 million acre-feet for the upcoming water year, which begins Oct. 1." According to the article, "those familiar with water management in the river basin called it a symbolic moment and a potential warning of what the future of the river could look like as the climate changes."

Additional coverage of the Colorado River drought measures was provided by the Reno (NV) Gazette-Journal (8/18, 165K), the St. George (UT) Spectrum (8/19, 48K), the Riverside (CA) Press Enterprise (8/19, 447K), the Marin (CA) Independent Journal (8/20, 111K), the Grand Junction Daily Sentinel (8/20, Harmon, 75K), the Hydroworld (8/20, 151), and the Aspen Business Journal (8/20).

FEDERAL GOVERNMENT'S LAWSUITS EXAMINED. The Washington Examiner (8/20, Rosiak, 294K) reports that "the federal government paid by far the most on record last year to parties who sued it, at \$2.9 billion, and will surpass that amount this year, a Washington Examiner analysis of court records found." Moreover, "due to oddities in federal accounting, the largest single settlement is not yet reflected in the data, thus positioning 2013 to be by a record year in dollar terms by a wide margin." The article notes that "a settlement between the Interior Department and Native Americans awarded \$3.4 billion after Native Americans argued that the government was mismanaging their money and withholding revenue."

SETTLEMENT REACHED IN PUBLIC ROADS SUIT. The St. George (UT) Spectrum (8/19, 48K) reports that Utah and Juab County have "reached the first settlement with the federal government and environmental groups granting the state and county ownership over three disputed roads in Juab County." According to the article, "US District Judge Tena Campbell has been given a consent decree today that would restore public access to three roads — and for the first time opens access to a road closed due to a Wilderness Study Area boundary." The agreement "requires the federal government to unlock the gate on Granite Canyon and remove fallen trees and any other obstacles blocking access to Camp Ethel at the end of the Granite Canyon Road" and it "also allows the state or county to repair the roads but preserves their primitive status."

Also reporting on the story is the Cache Valley (UT) Daily (8/20, 639).

INTERIOR FAVORS NATIONAL MONUMENT DESIGNATION FOR TULE SPRINGS PARK. The Las Vegas Review-Journal (8/20, DeHaven, 437K) reports that the Obama administration recently came out in favor of a national monument designation for Tule Springs park. According to a July 31 statement released by the Interior Department, a park built in the area would be "the most significant Pleistocene paleontological resource in the American Southwest."

INTERIOR, VIRGIN ISLANDS TO LAUNCH JOINT AUDIT NEXT YEAR OF PUBLIC FINANCE AUTHORITY. The Virgin Islands Daily News (8/20, Norris, 49K) reports that the Interior Department and the Virgin Islands Inspector General will launch a joint audit next year of the Public Finance Authority.

ADDITIONAL COVERAGE OF SECRETARY JEWELL'S REMARKS ON CLIMATE CHANGE. Additional coverage of Interior Secretary Sally Jewell's remarks on climate change was provided by FOX News (8/19, 6.72M).

ADDITIONAL COVERAGE OF INTERIOR'S CLOUD CONTRACTS. Additional coverage of Interior's cloud contracts was provided by the Washington Post (8/20, Ravindranath, 4.53M) and Government Computer News (8/20, Miller, 1K).

USA TODAY: US COULD REACH ENERGY SELF-SUFFICIENCY IN 20 YEARS. An editorial in USA Today (8/20, 5.82M) notes the changing energy landscape around the world and notes that "the vast increase in oil and gas production in the USA and Canada," means that the US, which has long been "dependent on supplies from potentially hostile nations, will attain self-sufficiency in 20 years, according to a study by BP." USA Today adds that the "developments in North American energy production even suggest ways to attack the complex threat of global warming," including investing in basic research "to find means to cope with warming that do not exist now," and taxing pollutants and letting "the market adjust and innovators innovate."

In an accompanying op-ed in USA Today (8/20, Beinecke, 5.82M), Frances Beinecke, president of the Natural Resources Defense Council, takes a different view of the North American energy boom, arguing that an increase in domestic oil and gas production "is no panacea for our nation's energy needs or economy." Such an increase, she argues, "will only intensify our fossil fuel addiction" and it will not "free us from the tyranny of the global oil market." Beinecke writes that for the US to be truly energy independent, we must reduce "our reliance on oil and gas by investing in America's abundant clean energy resources that can power our country and boost our economy without endangering our health and climate."

HAROLD HAMM DISCUSSES FRACKING, CLIMATE CHANGE, WIND POWER. The National Journal (8/20, Harder, Subscription Publication, 377K) publishes an interview with Continental Resources founder and CEO Harold Hamm, whom it calls "one of the most influential oil-industry executives and one of the richest people alive." In the interview, Hamm says that he opposes Federal regulations on fracking and says that states should be left to regulate the process, recommends population control measures to contain global warming, and says he doesn't support subsidizing wind power or forcing people to look at wind turbines.

America's Great Outdoors:

National Park Service:

CONTINUING COVERAGE OF BEAR ATTACKS. NBC Nightly News (8/19, story 7, 2:20, Holt, 7.86M) reported, "A 12-year-old Michigan girl is telling NBC News tonight she thought she was a goner when she went out for a jog and out of no where, was mauled by a black bear. She is just one of seven people in five states who have been attacked by bears in the past week. Why so many close encounters between humans and bears? Here's NBC's Tom Costello." NBC (Costello) added, "It was a heart-stopping discovery in Naples, Florida, a black bear who had tom into a screened-in porch, sleeping on the tile floor." Unidentified speaker: "I couldn't believe my eyes. Like I never seen a bear that big." Costello: "Fortunately, the bear woke up and left, but across the country, bears have attacked at least seven people over the past week. In northern Alaska, a National Guard helicopter had to rescue a hunter on Saturday who survived 36 hours after being mauled by a bear. In Wyoming, two hikers suffered minor injuries after being attacked by a grizzly and her cub. A camper in Colorado was slightly injured last week. In Idaho, two researchers were attacked by a grizzly, one bitten on the leg. And in Cadillac, Michigan, Thursday, a 12-year-old girl was attacked by a black bear while jogging. She thought she was going to die." Abby Wetherall, bear attack victim: "This is it. I'm not gonna see my family ever again. Not going to see my soccer team or any of my friends. I'm a goner." Costello: "She tried to run away, but the bear caught her. But then she says she played dead and the bear walked away. According to contrary thought, bear attacks aren't about protecting a cub. In a 2011 University of Calgary study, in 88% of the attacks, the bear was acting as a predator, viewing humans as food. Bears that have grown up near humans are far less likely to attack, researchers say. This bear recently showed up near the NBC News offices here in Washington. Increasingly, urban sprawl and remote recreation are bringing humans

and bears together." Brian Aucone, Denver Zoo: "It's the time of year that they are going to have cubs and also going to be out actively foraging and looking for food, all preparing for wintertime to come and hibernate." Costello: "In Colorado, this bear walked right into a bar, while another literally tried to walk off with a restaurant's dumpster. Close encounters a little too close for comfort. Tom Costello, NBC News, Washington." Holt: "The National Park Service has some recommendations what to do and whatnot to do if you encounter a bear. We have put that information on our website."

Additional coverage was provided by the International Business Times (8/20, 237K) and the Marin (CA) Independent Journal (8/20, 111K).

CLEANUP OF LINCOLN MEMORIAL COMPLETED. The E&E Daily (8/19) reports that crews "removed the last traces of green paint from the Lincoln Memorial last week, three weeks after an act of vandalism kick-started citywide outrage over the defacement of the iconic statue." The NPS "announced Friday that employees were able to remove the last flecks of paint from the marble likeness of Abraham Lincoln." According to the article, "the memorial is now completely open to visitors to Washington, D.C., who come in the millions each year to tour the 19-foot-tall statue of the 16th president."

MAINTENANCE BACKLOG PLAGUING NPS. The Examiner.com (8/20, 1.36M) reports that "budget cuts in recent years have left" the NPS "with an \$11.5 billion deferred maintenance backlog." Moreover, NPS Director Jonathan Jarvis told the Senate Committee on Energy & Natural Resources that "this amount grows annually at a far greater rate than the service is able to pay down." Jarvis "mentioned several ways to increase revenue without adding to the federal deficit, such as increasing the price of the annual park pass" and "he also suggested raising funds through donors and matching grant programs."

FRIENDS OF THE INDIAN KING TAVERN RECEIVES NPS GRANT. The South Jersey (NJ) Sun (8/19) reports that the Friends of the Indian King Tavern "recently acquired a grant from" the NPS' American Battlefield Protection Program to "create a map brochure of Revolutionary War battle sites in Camden and Gloucester counties." Garry Stone, state Park Service historian and historian for the Indian King Tavern, said "It's thought of as a two-year project. I need to get a running start September/October so I can make enough progress for second-year funding." NPS Director Jon Jarvis said, "We are proud to support projects like this that safeguard and preserve American battlefields. These places are symbols of individual sacrifice and national heritage that we must protect so that this and future generations can understand the struggles that define us as a nation."

AFTER HURRICANE SANDY, FAMILY FIGHTS TO SAVE RESTAURANT. The New York Times (8/20, A14, Applebome, Subscription Publication, 9.44M) reports on Ed Segall, the owner of "the Sea Gulls' Nest, a restaurant damaged by Hurricane Sandy and facing a maddeningly complex series of bureaucratic hurdles blocking it from reopening." The article notes that Sen. Robert Menendez and Rep. Frank Pallone Jr., "both of New Jersey, have asked the director of the National Park Service, Jonathan B. Jarvis, to meet with Mr. Segall." Segall "has prepared four thick binders of history and tributes to remind the government what he has done over the past decades, but is still waiting for a meeting." In the mean time, "food trucks operated by other people provide service at Sandy Hook, and the Segalls wait and worry."

ENVIRONMENTAL GROUPS SEEK INJUNCTION TO BLOCK SUSQUEHANNA-ROSELAND CONSTRUCTION. The New Jersey Herald (8/19, 37K) reports that as two power companies say "they will begin construction of a 500-kilovolt electric transmission line through a national park early next month, environmental groups on Monday asked a federal judge to stop any work until he can decide the case that could shut down the project altogether." In the lawsuit, the groups "argue that permits for the powerline construction were given" by the NPS "despite studies by the park service that show construction of the new lines, which follow the right-of-way of an existing 230-kV transmission line, would cause irreparable harm to the park." The lawsuit questions whether the NPS "acted correctly late last year when it gave the necessary permits to the two utilities for the 4.5 miles across the national park."

NPS SEEKS PUBLIC COMMENTS ON NEW MANAGEMENT PLAN FOR ZION NATIONAL PARK'S VIRGIN RIVER. The Deseret (UT) News (8/20, 251K) reports that the NPS "may change the way visitors enjoy Zion National Park, all in the interest of protecting the Virgin River and the areas around it." According to the article, "a new management plan for portions of the river and its tributaries, which were designated as 'wild and scenic' by Congress back in 2009, has been completed and now Park Service officials want the public to weigh in on the plan." Kezia Nielsen, an environmental resource protection specialist with the NPS, said, "There could be a lot of things that happen, but they are not imminent. The whole purpose of this plan is to protect and enhance the values for which made them eligible for designation as wild and scenic rivers."

BEN FRANKLIN MUSEUM TO REOPEN AFTER RENOVATION. The Philadelphia Business Journal (8/19, Subscription Publication, 39K) reports that Philadelphia's Ben Franklin Museum will "reopen Aug. 24 after a major renovation." The NPS "worked with various partners to pay for the changes, splitting the cost." NPS "funding for the improvements totaled \$11.3 million, while other partners contributed \$11.8 million."

WILDFIRE FORCES CLOSURE OF ROUTE INTO YOSEMITE NATIONAL PARK. The Columbus (IN) Republic (8/20, 76K) reports that "a wildfire has forced the shutdown of a highway that serves as a busy gateway to Yosemite National Park." According to the US Forest Service, "two days after it broke out in the Stanislaus National Forest, the blaze crossed State Route 120 on Monday, shutting it down in both directions."

YELLOWSTONE TO RELEASE FISH TOXIN. The Yellowstone Gate (8/20, Prevost) reports that "wildlife managers in Yellowstone National Park are planning this week to release a fish toxin in Grayling Creek as part of a long-term plan to restore native fish populations to the waterway in the Madison River drainage." The goal is to rid "the creek of non-native brown and rainbow trout, species which have contributed to a decline in native cutthroat trout in park lakes, rivers and streams, according to a statement released by the park's public affairs office." Officials hope "to restore native westslope cutthroat trout and Arctic grayling in Grayling Creek and other park waters."

REFERENCE TO GOD URGED FOR MLK MEMORIAL. In an op-ed for the Salem (OR) Statesman Journal (8/19, Murray, 140K), John A. Murray, headmaster of Fourth Presbyterian School in Potomac, Md., writes that "in preparation for the 50th anniversary of the Rev. Martin Luther King Jr.'s 'I Have a Dream' speech," the NPS "is spending hundreds of thousands of dollars to remove a controversial quote on the side of the King Memorial." But Murray asks, "If King were alive, would he be less concerned about being called a drum major than he'd be by the omission of any reference to God?" Murray concludes that "given the August anniversary of the March on Washington, rather than modifying the 'drum major' quote," he would recommend one from King's powerful 1963 speech: "I have a dream ...when all of God's children, black men and white men, Jews and Gentiles, Protestants and Catholics, will be able to join hands and sing in the words of the old Negro spiritual, 'Free at last! Free at last! Thank God Almighty, we are free at last!'"

Bureau of Land Management:

HELIUM RESERVE FACES SHUTDOWN. The Wall Street Journal (8/20, Peterson, Subscription Publication, 5.33M) reports that unless Congress acts to wind it down more slowly, the Federal Helium Reserve will shut down on October 8. Moreover, the BLM could begin winding down its operations as early as Sept. 15 to prepare for the closure, according to industry estimates.

BLM MULLS GEOCACHING IN CONSERVATION AREA. The Grand Junction Daily Sentinel (8/20, 75K) reports that the BLM "wants adventurers to leave no trace of their hunts for geocaches in the Dominguez-Escalante National Conservation Area, but an advisory group says there ought to be a little leeway." The agency is "working on the first-ever resource management plan for the area south and east of Grand Junction for the treasure-hunting activity." The BLM's "preferred alternative calls for geocaching to be limited to the virtual variety, or searches that result in participants taking

photos of themselves with recognizable locations they find using geocaching directions.”

TUSCARORA FIRE BURNING SAGE GROUSE HABITAT. The Elko (NV) Daily Free Press (8/20, 23K) reports that “a burning about 10 miles northwest of Tuscarora had charred about 16,000 acres as of Monday evening.” According to BLM public affairs specialist Lesli Ellis-Wouters, “the Red Cow Fire was about 10 percent contained.” Ellis-Wouters noted that “the fire is burning in an area of intact sage grouse habitat not impacted by previous fires.”

BLM REOPENS JQS ROAD NORTHWEST OF RIFLE AFTER ROCK SLIDE CLEARED. The Post Independent (Glenwood Springs, CO) (8/20, 27K) reports that the BLM has “reopened the JQS Road northwest of Rifle, which had been closed since Friday, Aug. 16, due to a rock slide.”

Also reporting on the story is the Grand Junction Daily Sentinel (8/20, 75K).

Fish and Wildlife Service:

REPORT SAYS TEXAS HAS MISMANAGED HABITAT PLAN FOR DUNES SAGEBRUSH LIZARD. The E&E Daily (8/19) reports that “Texas has failed to report impacts from oil and gas development on the dunes sagebrush lizard, a violation of the habitat conservation plan the state signed with the Interior Department to keep the reptile off the endangered species list, according to a new report from Defenders of Wildlife.” According to the article, the Texas comptroller in March told the FWS “that landowners and oil and gas developers in west Texas who were participating in its conservation plan had caused no new surface disturbances to the lizard’s shinnery oak dune habitat in 2012.” However, “imagery from government satellites and aircraft found multiple instances of surface disturbance on habitat enrolled by ConocoPhillips Co., which operates in the oil-rich Permian Basin, according to the Defenders investigation.”

FWS TO LIST TWO TEXAS SALAMANDERS. The E&E Daily (8/19) reports that the FWS “plans to add two Texas salamanders to the endangered species list, a move that could lead to more protections for central Texas waterways.” The agency said “it will give ‘endangered’ species status to the Austin blind salamander and ‘threatened’ status to the Jollyville Plateau salamander.”

ENVIRONMENTAL GROUP URGES HUNTERS TO SWITCH TO NONLEAD BULLETS. The E&E Daily (8/19) reports that an environmental group “concerned about lead poisoning of birds is using the US military’s recent announcement that it will switch to nonlead bullets as a clarion call for hunters to do the same.” Robert Johns, a spokesman for the American Bird Conservancy, said, “If it’s good enough for them, we think it’s good enough for the average hunter, whose life is not in peril.” The article notes that “lead poisoning from ingesting bullet fragments or pellets while consuming carcasses left behind by hunters is a leading cause of death for endangered California condors and other birds.”

HUNDREDS OF SALMON STRANDED IN FARM DITCHES IN CALIFORNIA. The E&E Daily (8/19) reports that “the strandings of hundreds of endangered salmon in Colusa Basin irrigation ditches have California and federal wildlife officials searching for answers.” Jeffrey McClain, assistant supervisor at the National Marine Fisheries Service office in Sacramento, California, said, “There has been some stranding in the past, but as far as I can tell, the numbers have been significantly lower than this. It’s significant, and that’s why this is a serious thing for us to figure out.”

NEW STUDY QUESTIONS GREATER YELLOWSTONE BEARS COUNT. The High Country (CO) News (8/20, 74K) reports that “a new study strongly suggests” that the FWS’ “calculations may be badly flawed – so much so, say the paper’s authors, that no one knows how many bears are really out there.” According to the article, “the population may even be dropping: Whitebark pine nuts, a key food source, are rapidly disappearing, and the impact on bears is in dispute.”

ECONOMIST CRITICIZES FWS ANALYSIS OF ROSEMONT MINE’S IMPACT ON JAGUAR. The

Tucson (AZ) Citizen (8/19, 60K) reports that "a review by a nationally recognized economist found, among other things, that the economic analysis commissioned" by the FWS "for its critical habitat proposal for the jaguar relied 'exclusively' on information provided by Rosemont that amounts to a 'distorted public relations exercise.'" The review by natural resource economist Dr. Thomas Power "concluded that the analysis provided to FWS by Cambridge, Massachusetts based Industrial Economics, Inc. (IEI) treats mining as if it only has benefits while ignoring its costs, and promotes a 'free lunch economics' approach that is 'contrived for public relations purposes.'"

ADDITIONAL COVERAGE OF STATE WILDLIFE GRANTS. Additional coverage of the \$5.1 million in grants awarded to 11 states was provided by the Hendersonville (NC) Times-News (8/19, 39K) and the Latin American Herald Tribune (8/20, 1K).

ADDITIONAL COVERAGE OF PLAN TO SAVE SPOTTED OWL. Additional coverage of the plan to save spotted owls was provided by the High Country (CO) News (8/20, 74K).

US Geological Survey:

AGENCIES COMPLAIN ABOUT SEQUESTER-IMPOSED TRAVEL LIMITS. The New York Times (8/19, A1, Shear, Nixon, Subscription Publication, 9.44M), in a front-page article, reports that as a result of the sequestration cuts, "most government travel budgets have been cut this year by 30 percent," and now "agency officials" complain that as a result, the Federal government "cannot conduct essential business and is embarrassing itself abroad." But Sen. Tom Coburn rejects that claim, saying, "Hopefully what you will have is more sound judgment at these agencies about what is critical travel and what isn't. ... Most of it has nothing to do with their jobs. It's a perk."

CALIFORNIA BUILDING'S DESTRUCTION REVEALS EARTHQUAKE RISK. The LiveScience (8/20, Oskin, 445K) reports that on August 17, a tiny artificial earthquake triggered by a building implosion at California State University, East Bay, "were recorded by more than 500 seismometers set out in backyards and businesses by volunteers the week before the building's collapse." The effort, coordinated by the USGS, "will provide the best picture to date of which areas could suffer the worst shaking in future earthquakes on the dangerous Hayward Fault," according to project leader Rufus Catchings, a research geophysicist with the USGS in Menlo Park, California. Catchings said, "This will give us a chance to really improve our shake map, which is something that comes out immediately after an earthquake to tell first responders which areas are most affected."

Securing America's Energy Future:

Renewable Energy:

MANZANAR COMMITTEE OPPOSING LADWP'S PROPOSED 200 MEGAWATT SOLAR PROJECT. Southern California Public Radio (8/19, Peterson, 33K) reports on supporters of Manzanar Historic Site, which is "home to a former Japanese-American internment camp," objecting to a plan proposed "by the Los Angeles Department of Water and Power to put solar panels nearby," arguing that the panels "would obstruct the view from the camp." LADWP is hoping to build the solar project near Manzanar on land owned by the City of Los Angeles, with the agency planning to "install enough solar panels to generate around 200 megawatts." The Manzanar Committee said in a letter that the panels would obstruct the view, "and that construction would harm an old solid waste dump site that may contain historic artifacts."

This story was also reported by KCET-TV Los Angeles (8/19, Clarke).

ADDITIONAL COVERAGE OF WEST CHOCOLATE MOUNTAINS RENEWABLE ENERGY EVALUATION AREA. Additional coverage of the West Chocolate Mountains Renewable Energy Evaluation Area was provided by the Palm Springs (CA) Desert Sun (8/19, Kaufmann, 162K).

Onshore Energy Development:

BLM DEFERS PROPOSED OIL, GAS LEASE SALES. The E&E Daily (8/19) reports that the BLM "has reversed course and will not offer eight parcels near southwest Colorado's Mesa Verde National Park in a November oil and natural gas lease sale," pleasing the NPS "and some local government leaders who feared the drilling could harm the park." However, BLM officials "said late Friday that the agency is still conducting an environmental analysis of the eight parcels just east of the national park and that is why they were not included in the formal lease sale notice for the Nov. 14 sale." According to Shannon Borders, a BLM spokeswoman, "depending on the results of the ongoing environmental analysis, the eight parcels covering about 10,700 acres could still be offered at four planned oil and gas lease sales in the state next year."

Also reporting on the story is the Climate Progress (8/19, Goad, 375).

COMPANY FINED FOR FALSE ROYALTY DATA. The E&E Daily (8/19) reports that the Interior Department' Office of Natural Resources Revenue has fined Quinex Energy Corp. "\$2.2 million for knowingly maintaining false and misleading royalty information." Paul Mussenden, Interior's deputy assistant secretary for natural resources revenue management, said in a statement, "Accurate reporting is indispensable to proper royalty collection and is one of the first lines of defense in ensuring that ONRR collects every dollar due to the American taxpayer. In addition to our data mining and audit and compliance enhancement efforts, our enforcement team's increased focus on accurate reporting will continue to play a pivotal role in carrying out ONRR's core revenue collection mission."

GROWTH OF UNCONVENTIONAL GAS SOURCES REQUIRE REEXAMINATION OF GOVERNMENTAL ROLES. The Oil and Gas Journal (8/19, Snow, 1K) reports on the Aug. 15-16 National Research Council conference at which participants largely agreed that the "rapid growth of unconventional natural gas development and production is forcing governments worldwide to examine not just how to regulate the business, but also to consider which levels of government can do the best job in specific instances." Accordingly, the article says that those processes are "raising new intergovernmental questions that could make federal, state, and local officials reconsider whether existing enforcement responsibilities are still effective for nonoil and gas industries" and notes that "supplemental oversight by local residents is increasingly essential." The article adds that some attendees suggested that public forums akin to those held by the BLM "as it developed its proposed hydraulic fracturing regulations" may be helpful in developing "consultation between federal and state governments."

BLM PLAN CRITICIZED FOR HALTING LOCAL DRILLING. In an op-ed for the Silver City (NM) Sun-News (8/20, Griggs, 24K), Ron Griggs, a Republican, who represents District 34 (Otero, Dona Ana and Eddy counties) in the New Mexico Senate, notes that the recently released BLM "draft environmental impact statement (DEIS) for the tri-county area that covers Dona Ana, Otero and Sierra counties defers action on fluid mineral leasing and development in the three counties." According to Griggs, "this effectively stops oil and gas drilling there for the foreseeable future." Griggs argues that the BLM "should allow continued development on the Bennett Ranch area of Otero Mesa and they should not use the Tri-County DEIS to delay potential additional development."

Offshore Energy Development:

SCIENTISTS DEBATE ESTIMATES OF OIL SPILLED INTO GULF. The E&E Daily (8/19) reports that "a dispute among experts over the extent of the Deepwater Horizon disaster is heating up as BP PLC prepares for the next stage of a civil trial to determine the final cost of the largest offshore oil spill in US history." According to the article, "recent filings in federal court in New Orleans include expert reports with a wide range of estimates on how much oil was spilled when BP's Macondo well exploded in 2010, killing 11 oil rig workers." For instance, the Justice Department "believes the well spewed 4.9 million barrels of oil into the Gulf," but "a report prepared for BP by

Andreas Momber, a lecturer at the Aachen University of Technology in Germany, suggests the number is much lower because the concrete well eroded at a slower rate than the government claims.”

BLACK ELK ENERGY STILL REELING FROM GULF PLATFORM FIRE. The *E&E Daily* (8/19) reports that Black Elk Energy “says its finances and production are still ailing following a fatal explosion last year at an offshore production platform in the Gulf of Mexico.” Black Elk Energy “reported that its oil and gas output has slowed due to permitting delays and maintenance work.” The BSEE is “still probing the company over its role in a Nov. 16, 2012, fire at the West Delta 32 production platform off Louisiana’s coast.”

NEW ANALYSIS QUESTIONS FEDERAL SAMPLING OF GULF OIL SPILL. The *New York Times* (8/19, Fountain, Subscription Publication, 9.44M) reports that an analysis of water, sediment, and seafood samples gathered during and after the 2010 Deepwater Horizon oil spill in the Gulf of Mexico “has found higher contamination levels in some cases than previous studies by federal agencies did, casting doubt on some of the earlier sampling methods.” Paul W. Sammarco of the Louisiana Universities Marine Consortium, who is the lead author of the new analysis, which was published last week in the journal *Marine Pollution Bulletin*, “said that the greater contamination called into question the timing of decisions by the National Oceanic and Atmospheric Administration to reopen gulf fisheries after the spill and that ‘it might be time to review the techniques that are used to determine’ such reopenings.”

DOI EXPECTED TO ANNOUNCE COASTAL SEISMIC DECISION AIRGUN TESTING THIS YEAR. The *Business Insider* (8/19, Angelova, 1.79M) reports that the DOI is expected to decide this year “whether to allow seismic airgun testing for oil and gas deposits along the coast from Delaware to Cape Canaveral, Florida.” The article says that despite the fact that drilling along the Atlantic Coast “cannot begin until at least 2017, the exploration plan has sparked a heated debate between conservationists,” who cite the potential harm to sea life, “and some members of Congress.”

FORMER OBAMA OFFICIAL FAULTS OIL INDUSTRY’S OPPOSITION TO DISCLOSURE. *FuelFix* (8/19, Dlouhy, 3K) reports that according to David Goldwin, the former State Department special envoy for international energy affairs under President Obama, the oil industry’s attempt to “undo a new Securities and Exchange Commission rule that forces publicly traded companies to disclose what they pay other countries to harvest oil and natural gas” is a “‘poison pill’ that puts the ‘otherwise uncontroversial’ international pact” with Mexico to drill in the Gulf “at risk.” The article quotes Goldwyn as writing in an article for the Brookings Institute, “In raw political terms, the trans-boundary agreement is important but not at the top of the oil and gas industry’s priority list for Congress, whereas the proponents of transparency are well-organized and gaining momentum. Even the White House announced it could not support the House bill.”

Tackling America’s Water Challenges:

AZTEC DISTRICT COURT APPROVES NAVAJO WATER RIGHTS AGREEMENT. The *Farmington (NM) Daily Times* (8/19, Yee, 46K) reports on the “historic water rights settlement approved late last week” by an Aztec District Court. The article says that the agreement “guarantees the Navajo Nation an additional 130,000 acre-feet of water on top of the 195,000 acre-feet previously allotted to the tribal government” and also assures Federal backing for the Navajo-Gallup Water Supply Project, which “will provide water to the eastern portion of the Navajo Nation, the southwestern portion of the Jicarilla Apache Nation and the city of Gallup.” Nevertheless, the *Daily Times* says the “decision is likely to be appealed” as its critics argue that “it will dry out the region and open doors for the tribal government to sell water to large cities downstream, such as Las Vegas, Phoenix and Los Angeles.”

ARKANSAS VALLEY CONDUIT CLOSE TO “BECOMING A REALITY.” The *Pueblo (CO) Chieftain* (8/19, Woodka, 103K) reports on the Arkansas Valley Conduit, which will provide water to “40 communities in Eastern Colorado...becoming a reality.” The article says that the BOR will

publish a decision on the project "after a 30-day comment period" to its environmental impact statement, which indicates that "work on the actual project can begin."

LAKE NIGHTHORSE DELAYS TEST PATIENCE OF RESIDENTS. The Durango (CO) Herald (8/18, 28K) reported on the Animas-La Plata Water Conservancy District meeting that took place last week concerning the recreation plan at Lake Nighthorse, or lack thereof. The Herald noted that the resentment from "anglers, watercraft owners and hikers all eager to explore the reservoir and nearby areas...was heard loud and clear" but also said that adding to those frustrations was the notable void left by BOR and OMRA officials "who attend board meetings without fail" and "who could have supplied some answers." Despite the backlash, the article said that according to Grand Junction BOR representative Ed Wamer, "there are many 'hot issues' to resolve" before the area can be opened to recreation. Wamer added, "The who, what and how, take time. We're trying to work with everybody."

ADDITIONAL COVERAGE OF BAY DELTA CONSERVATION PLAN. Additional coverage of the Bay Delta Conservation Plan was provided by the Stockton (CA) Record (8/15, 130K) and the Chico (CA) Enterprise-Record (8/20, Hacking, 91K).

Empowering Native American Communities:

ASSISTANT SECRETARY WASHBURN EXPLAINS INTERIOR'S LAND BUY-BACK PLAN. In a piece for the Indian Country Today Media Network (8/19, Washburn, 11K), Assistant Secretary for Indian Affairs Kevin K. Washburn explains how the Land Buy-Back Program will benefit tribes. Washburn notes that his "goal is to stay true to my guiding principle and use cooperative agreements to maximize tribal participation for those parts of the program where it will be most cost effective to do so." According to Washburn, "maximizing tribal engagement and offering the greatest flexibility for each tribal nation to determine how to best implement the Program in its community are critical."

MONTANA, TRIBAL OFFICIALS AGREE TO BISON TRANSFER. The E&E Daily (8/19) reports that Montana state and tribal officials "agreed to plans to transfer 35 bison from Fort Peck reservation to Fort Belknap in the wake of a state Supreme Court ruling allowing the project to move forward." According to the article, Fort Belknap tribal President Tracy King and Montana Fish, Wildlife and Parks Director Jeff Hagener "last week signed a memorandum of understanding, but officials have yet to set a date for the transfer."

APPELLATE ARGUMENTS SCHEDULED IN SPIRIT LAKE DISPUTE. The Grand Forks (ND) Herald (8/19, Haga, 88K) reports on the "latest stage of the turbulent and convoluted dispute" over "who should be recognized as the chairman of the Spirit Lake Sioux Tribe" and says that an appellate court will hold oral arguments on Aug. 30 at the UND School of Law in Grand Forks. Nevertheless, the Herald notes that in his Federal lawsuit, ex-Chairman Roger Yankton, Sr. maintains "that he remains the tribe's duly elected leader and the appeals court has no jurisdiction." The article adds that Yankton's Aug. 12 filing also claims "that a restraining order issued against him by a Spirit Lake tribal judge was obtained improperly, prevents him from acting as chairman and amounts to an 'illegal detention' that violates his civil rights."

SOUTHWEST TRIBES SEE BATTLE LOOMING AGAINST EXPLODING FERAL PIG POPULATIONS. The Indian Country Today Media Network (8/19, Allen, 11K) reports on the issues facing several southwest tribes as feral pig populations march across the country. The article says, "Tribes are at the forefront of the battle" against the creatures with Texas tribes actively engaged in "battling them" while tribes in New Mexico, Arizona, and California "are monitoring a pending problem." The piece notes, "Tribal lands are not yet overrun, but they are seeing the need to make a plan." Nevertheless, while Federal agencies "know of the situation and could mount a counterattack...no money exists to pay for such a war."

REPORTS SHOW REVENUE DOWN AT POTAWATOMI CASINO. The Milwaukee Journal

Sentinel (8/19, Spivak, 790K) reports that according to figures released on Monday, gambling revenues at the Potawatomi Bingo Casino slipped by almost 1.3% in 2012, "as the nation's first off-reservation casino continues to experience the industry trend of flat growth." The article says that the casino's gamblers forfeited almost \$363 million in 2012, which was down from the \$368 million they lost at the casino during 2011. The Journal Sentinel adds that consequently, "the payments the Potawatomi tribe makes to the city and county also fell." The article also notes that the tribe is "keeping a close watch on proposals to open new off-reservation casinos in Wisconsin," the applications for which are before the US Bureau of Indian Affairs.

KAKE SEEKS FUNDS TO STABILIZE HISTORIC KEKU CANNERY. The AP (8/19) reports that Kake, Alaska "is trying to save its historic Keku Cannery," which earlier this year the National Trust for Historic Preservation dubbed "one of the nation's most endangered historic places" and is now on the verge of collapse. The article says that according to the National Trust, "the cannery is worth saving because of the role it played in developing Alaska's canning industry during the first half of the 20th Century." Nevertheless, the village is seeking funds in order to do so, including requests to the Bureau of Indian Affairs. The AP adds that Kake officials hope to at least steady the building or at most turn it into "a tourist stop where residents can put up shops."

FREMONT COUNTY SUPERINTENDENTS BRIEF LEGISLATORS ON SCHOOL

PERFORMANCES. The Riverton (WY) Ranger (8/19, Silva, 167) reports that during a meeting at Central Wyoming College, Fremont County school district superintendents "updated the Wyoming Legislature's Joint Education Committee and the Select Committee on Tribal Relations on their schools' performances." The article adds that although the schools are seeing progress, "poverty, lack of transportation and cuts in the Impact Aid Program have made education far more difficult." The Ranger also provides updates on St. Stephen's schools, the funding for which is provided by the US Bureau of Indian Education.

NONPROFIT SPONSORS NATIVE YOUTH TRIP TO WASHINGTON. The Indian Country Today Media Network (8/19, Schilling, 11K) reports on the weeklong summer camp attended by 24 Native Youth, which was sponsored by the new nonprofit organization Pathkeepers for Indigenous Knowledge. The article says that the camp took place "on a horse farm where" the students "learned life lessons and traditional Native practices from elders" and the campers "also got a taste of Indian policy when they met with senators and other officials in Washington, D.C." Among the officials with whom the youth met were "Mary Pavel, staff director and chief counsel for the Senate Committee on Indian Affairs; Mike Smith, deputy director of the Bureau of Indian Affairs; Chairman Darrin Old Coyote of the Crow Nation, and other key staff and officials from the U.S. Department of the Interior."

Top National News:

AS OBAMA PONDERES FATE OF US AID, CYCLE OF VIOLENCE CONTINUES IN EGYPT. As violent turmoil continues in Egypt, where reports indicate ousted ruler Hosni Mubarak could soon be released from prison, the US media casts President Obama as undecided over the fate of US aid. The issue continues to generate debate among lawmakers and media commentators, with a new poll showing a majority of Americans favoring cutting assistance to Egypt and giving the President low marks for his handling of the situation. The story generated about 11 minutes of combined coverage on the network newscasts last night.

The networks, like much of the coverage, describe the US as increasingly powerless in its bid to manage the crisis. Driving that line of analysis is a statement from Defense Secretary Hagel, who according to AFP (8/20, De Luce) told reporters yesterday, "Our ability to influence the outcome in Egypt is limited." NBC Nightly News (8/19, story 2, 2:50, Holt, 7.86M), which referred to "an increasingly precarious situation for the United States," described Hagel's comment as an admission that "there is not much the US can do." Chief Foreign Correspondent, Richard Engel, reporting from Cairo, noted that "Egyptian officials" he interviewed "say they don't believe Washington has an accurate picture of what's going on."

Ed Henry, on Fox News' Special Report (8/19, 2.07M), reported that "some key Republicans disagree" with Hagel's assessment, and said "it is time for the President to play an important card, cutting off the \$1.3 billion in military aid the US provides Egypt each year." Fox then showed Sens. John McCain, Lindsey Graham and Rand Paul making that case on Sunday.

Reuters (8/20, Wroughton, Mohammed), meanwhile, reports that State Department spokeswoman Jen Psaki denied the US had already placed some economic aid on hold, as reported by the New York Times on Monday. Psaki said the US is "reviewing...programs on a case-by-case basis to identify whether we have authority to continue providing those funds or should seek to modify our activities to ensure that our actions are consistent with the law." Psaki indicated that also under consideration are potential cuts to US military aid. The Washington Post (8/20, A1, Sly, 4.53M) quotes Psaki as saying that the US "review is ongoing," though "we have not made a decision to put a blanket hold."

Reporting from Cairo, ABC World News (8/19, story 2, 2:00, Raddatz, 7.43M) said the situation is "fast becoming a simmering civil war," which could turn a "new generation" of Islamist militants "into fighters against not only the Egyptian military but the US as well." Reuters (8/20, MacDonald), for example, notes that the Kenyan branch of Somalia's Al Qaeda affiliate Al Shabaab said on its Twitter feed yesterday, "If ever there's a ripe moment 2 support Al-Qaeda, it's surely now. Raising the flag in Egypt in now a priority, Insha'Allah!"

The CBS Evening News (8/19, story 3, 3:05, D'Agata, 5.58M) showed "the bodies of 24 policemen killed by suspected Islamic militants in the Sinai" yesterday, and noted that 36 prisoners had previously "died in police custody under circumstances that are still unclear." Reporting on Monday's attack in the Sinai, the AP (8/20, Hendawi) says suspected Islamists "ambushed two minibuses carrying off-duty policemen" and forced them "to lie on the sand" before shooting them dead. Khalil al-Anani of the Middle East Institute in Washington tells the Wall Street Journal (8/19, El-ghobashy, Subscription Publication, 5.33M), "It is a new style of attack...and can't be separated from what's happening in Cairo. ... This could lead to a new kind of insurgency that would be difficult to control."

The Christian Science Monitor (8/19, Bryant, 564K) reports that the increase "in militant attacks in Sinai since the military deposed...Morsi...places additional strain on security forces already preoccupied with escalating political violence in Cairo and elsewhere."

Amid the continuing violence and uncertainty, Politico (8/20, Wright, 652K) describes Obama as "reluctant to exhaust his leverage" on the issue of aid, while Mark Thompson, writing for Time (8/19, Thompson, 13.36M), likens US assistance to "an IV" which is "designed to keep Egypt's generals under some – increasingly limited – sway of the US government." Thompson warns about "side effects," namely placing the US in the middle of Egypt's crisis which is likely to fray the ties between the two countries. In his Capital Journal column for the Wall Street Journal (8/19, Seib, Subscription Publication, 5.33M), Gerald Seib notes the same phenomenon, arguing that Obama's apparent search for a compromise flies in the face of Egyptian generals' determination to destroy the Muslim Brotherhood. Given this stark divergence, says Seib, losing US aid may not be too high a price to pay for the ruling military.

In fact, as Bloomberg News (8/19, Atlas, 1.41M) reports, Obama's push "for political reconciliation with Islamist protesters...is being challenged by financial and political support from Middle East countries" such as Saudi Arabia, Kuwait and the UAE "pursuing their own stakes in Egypt's future." On its front page, the New York Times (8/20, A1, Nordland, Subscription Publication, 9.44M) calls Saudi Arabia, for example, "the foremost supporter of Egypt's military rulers," and says it is delivering "a blank check to Cairo" and "promising to shower it with money as needed." The Saudis have "not only undermined Western efforts to press for compromise, but...also revealed diminished United States influence across the Arab world." The Saudi actions, says the Washington Post (8/20, A1, Sly, 4.53M) in a front-page story, are "exacerbating a fierce struggle for influence in the chaotic and increasingly leaderless Arab world and putting the Saudis at odds with the" US.

Foreign Minister Saud al-Faisal said yesterday, "Concerning those who announced stopping their assistance to Egypt or threatening to stop them, the Arab and Islamic nation is rich with its people and capabilities and will provide a helping hand to Egypt."

As the Administration ponders its next steps, Roll Call (8/20, Dennis, Subscription Publication, 78K) reports, spokesman Josh Earnest said on Monday that it "has set aside the legal question of whether the military's takeover...is a 'coup.'" Instead, said Earnest, the ongoing analysis of US policy options are designed "to determine what impact" each course "would have on our national security, whether it's in compliance with the law, and is it going to get us closer to seeing the kind of outcome in Egypt that we would like to see, which is the prompt return to a democratically elected civilian government." Along those lines, notes The Hill (8/19, Sink, 322K), Earnest also said "senior administration officials...have made clear" to their Egyptian counterparts that "it is incumbent upon the interim government in Egypt to transition back to a democratically elected government."

According to the AP (8/19, Klapper), a key factor for US policy-makers is "the specter of Benghazi." Under this scenario, cutting US aid "could prompt Egypt's ruling generals to scale back their protection of the US Embassy in Cairo and other diplomatic properties," which "would be a political disaster for Obama." Hagel also said on Monday, "We are concerned about our people. ... Protection of Americans in Egypt, not just only our diplomats but all Americans, is of the highest priority."

Lauren Fox, in a blog post for US News & World Report (8/20, Fox, 595K), describes Obama's policy so far as "a clever game of word avoidance," despite the fact that "experts...agree" that a US law, the Consolidated Appropriations Act, "dictates the overthrow of a duly elected head of government" and "is enough to suspend aid."

Poll: Majority In US Wants Aid Cut; Half Think Obama Not Tough Enough On Egypt. Politico (8/20, Arkin, 652K) reports that according to a Pew Research Center poll, 51% believe the US should cut aid to Egypt, while only 26% want to continue it. Meanwhile, "half of those surveyed thought...Obama has not been tough enough on Egypt," 6% though "he has been too tough" and 12% "thought his reaction was about right." Americans also favored the military over the Muslim Brotherhood by a 46%-11% margin.

Cutting Military Aid To Egypt Could Hurt US Jobs, Weapons Manufacturers. Noting the debate over possibly cutting US military aid, the CBS Evening News (8/19, story 3, 3:05, Schieffer, 5.58M) said last night the issue "is more complicated than it might seem, and you may be surprised by who could be hurt if that happens." CBS (Quijano) noted that the aid "goes to places such" as a General Dynamics factory in Archibald, Pennsylvania that "makes parts for the M1A1 Abrams tank," and employs 135 workers. In fact, "44 companies in Pennsylvania alone involved in the production of the M1A1," which is called "the centerpiece of US aid to Egypt."

Politico (8/20, Wright, 652K) reports that last week the USAF "awarded a contract to General Electric," worth just under \$14 million, "to upgrade the Egyptian air force's fighter jets." Politico casts the award as "a tacit acknowledgment by the Pentagon that...for now it plans to maintain a relationship" with Egypt.

Journalist Mona Eltahawy, interviewed by Jake Tapper for CNN's The Lead (8/19), said, "The \$1.3 billion [from the US] that goes to the Egyptian army goes toward buying US-made weapons. It goes right back into the arms manufacturing industry in the US." Eltahawy continued, "So if you're seeing reluctance" to cut that aid "on the US side, you have to remember why: because the money goes back towards buying US weapons. So I think the US Administration...must not arm those who use those weapons against civilians, especially unarmed civilians."

Disappointed EU Foreign Ministers To Discuss Aid On Wednesday. The New York Times (8/20, Erlanger, Subscription Publication, 9.44M) reports that EU foreign ministers will meet Wednesday in an "emergency session" to discuss a possible suspension of aid to Egypt. The Times calls the

military's crackdown on the Muslim Brotherhood "a devastating blow to European efforts to negotiate a political solution and fill a vacuum left by Washington," and notes that despite their best efforts and their "remarkable access to leaders of both" sides, foreign policy chief Catherine Ashton and her deputy Bernardino León have found little success in crafting a compromise. The Times quotes an unnamed "senior European official" as lamenting in an interview, "Unlike Washington, we were seen as having no historical baggage, no hidden agenda. ... That was the European advantage." León said yesterday, "There are no easy solutions, no easy way out. But the EU will keep striving for this."

Another story in the New York Times (8/20, A1, Kirkpatrick, Cowell, Nordland, Subscription Publication, 9.44M) notes that during an interview with the BBC, British foreign secretary William Hague said he "did not accept that outsiders were powerless to influence events." Added Hague, "We have to do our best to promote democratic institutions, to promote political dialogue and to keep faith with the majority of Egyptians who just want a free and stable and prosperous country. ... Foreign policy is often about striking the right balance."

Media Analyses: Mubarak's Release Could Exacerbate Crisis. Bloomberg News (8/20, El-Tablawy, El Wardany, 1.41M) reports that Cairo's criminal court yesterday ordered Mubarak's "release from prison," in a move that "threatens to inject new tensions in the standoff between the Muslim Brotherhood and the military-supported interim government." The CBS Evening News (8/19, story 3, 3:05, D'Agata, 5.58M) said the court's decision on Mubarak "came completely out of left field," though prosecutors "may bring other charges to keep him locked up for the foreseeable future."

The Wall Street Journal (8/19, El-Ghobashy, Coker, Subscription Publication, 5.33M) also notes that while the court found there was not sufficient evidence to hold the ousted ruler on the main corruption charges he was facing, other accusations remain outstanding. Among them, the Washington Post (8/20, A1, Sheridan, 4.53M) reports, are "charges in connection with the killing of hundreds of protesters in that Arab Spring revolt," though Mubarak "has been granted bond in that case, and a judge on Monday said he should be able to leave prison as he awaits another trial on corruption charges."

The Los Angeles Times (8/20, Fleishman, Abdulrahim, 3.4M) quotes Mubarak lawyer Farid Deeb as saying of his client, "He'll be out in a couple of days." The New York Times (8/20, A1, Kirkpatrick, Cowell, Nordland, Subscription Publication, 9.44M), however, notes on its front page that according to "Egyptian state media" Mubarak "would remain in custody for another two weeks...before the authorities make a decision on his release." The AP (8/20, Hendawi), Reuters (8/20, Lyon, Alsharif) and the Washington Times (8/20, Chumley, 452K), among other news outlets, also note the news about Mubarak's release, casting the development as a potential new trigger for tensions in Egypt.

McClatchy (8/20, Youssef, Ismail, 49K), meanwhile, reports on a change in public opinion regarding the military and Mubarak, and profiles several Egyptians who once backed Morsi and now have nothing but anger toward the Brotherhood. In fact, adds McClatchy, "Egyptians largely welcomed news of Mubarak's potential release."

Brotherhood's "Spiritual Leader" Arrested; Morsi Charged With Role In 2012 Deaths, Torture. The Washington Post (8/20, A1, Sheridan, 4.53M) reports on its front page that last night security forces arrested "the spiritual leader of the Muslim Brotherhood," Mohammed Badie, who "was shown on state television being whisked away to prison in a car, sitting next to a security officer in a bulletproof vest."

AFP (8/20) reports that an Egyptian court yesterday accused Morsi of "complicity in the deaths and torture of protesters outside his presidential palace in late 2012, judicial sources said." The new charges "mean his current detention will be extended by 15 days started next week."

As Attacks On Christians Continue, Coptic Patriarch Praises Security Forces. The Washington

Times (8/20, Chumley, 452K) reports on the growing number of attacks on Christians over the last few days, which include attacks and burnings of "dozens of churches and monasteries," the decapitation of "a Virgin Mary statue" and the killings of "several Christians."

Yesterday, AFP (8/20) reports, Catholic Coptic Patriarch Ibrahim Isaac Sidrak "said there were no real divisions between Christians and Muslims in Egypt," and "thanked the military and the police in Egypt 'for all their efforts in protecting the country.'" Said Sidrak, "This is not a political conflict between different factions but a struggle by all Egyptians against terrorism." AFP also notes the attacks on "dozens of Christian churches, schools and shops."

GM Reopens Egyptian Office, Factory. AFP (8/20) reports that General Motors said yesterday "it had reopened its office and factory in Egypt after shutting both down last week." AFP notes the company builds "light trucks, cars and minibuses in Egypt and employs more than 1,400 Egyptians."

Priceless Museum Artifacts Looted. The AP (8/20, Batrawy) reports on looting taking place in Egypt, leading to the loss of "a prized 3,500-year-old limestone statue, ancient beaded jewelry and more than 1,000 other artifacts in the biggest theft to hit an Egyptian museum in living memory."

Matthews, Davidson, Hayes: Crisis Puts Clinton, Obama's Foreign Policy In Negative Light. Appearing on MSNBC's Hardball (8/19, 689K), The New Yorker's Amy Davidson said Hillary Clinton's tenure as secretary of state "seems more and more now...about her and about her stature – and less and less about really crystallizing an Obama agenda, and so now his foreign policy feels really a little vacant, especially in the face of the crisis in Egypt." Chris Matthews added, "I think John Kerry is doing a hell of a job," doing "what she hadn't yet done. That's the fact." Matthews continued, "I get the feeling the President's become reactive. ... He gets a bad headline in the New York Times about the Egyptian military...and all of a sudden he has a press conference the next day, a reaction to editorial writing. That's dangerous when a president" is "simply reacting to events; that doesn't look strong."

The Weekly Standard's Steve Hayes, on Fox News' Special Report (8/19, 2.07M), said, "Any discussion about US policy in Egypt today has to start with failure of US policy in Egypt over the past couple years. The fact is, the President hasn't had a strategy. What we've been doing is basically ad hoc policymaking."

WPost, NYTimes Call For Ending Military Aid; Other Commentators Disagree. In an editorial, the Washington Post (8/20, 4.53M) says that Egypt's military-backed government "appears to have embarked on a frighteningly similar course" to Syrian leader Bashar al-Assad in response to protests – unleashing "unrelenting violence." The Post warns that it is "not only a moral challenge" to the US, it could lead to "civil war," "massive flows of refugees," and a new base for Al Qaeda. The Post says that the Administration should respond by suspending military aid.

In an editorial, the New York Times (8/20, Subscription Publication, 9.44M) says that a "surprising number of world leaders and foreign policy experts have effectively acquiesced in the continued brutality of Egypt's generals," their argument being that supporting the military is the "only way to restore stability." However, the Times says this is "certain to ensure more unrest, not less." The Times says that Obama's "muted chastising of the generals and his indecisive reaction to the slaughter does not inspire confidence." The Times says that the Administration should immediately suspend military aid.

In an op-ed for the New York Times (8/20, Subscription Publication, 9.44M), Steven Simon, the executive director of the International Institute for Strategic Studies-United States, says that "many Americans" are "outraged" that the Administration "has not exerted its supposed leverage, in the form of military aid, to pressure the Egyptian army to restore a democratic form of government." However, he says that the aid really doesn't give the US much leverage, and has "never succeeded in persuading Egypt's rulers to govern the way Washington wants."

In his column for USA Today (8/19, Wickham, 5.82M), Dewayne Wickham says that he is surprised that US politicians believe that the US can influence the Egyptian military at all by cutting off aid. He says "an end of U.S. aid won't force Egyptian soldiers back into their barracks, or return Morsi to that country's presidency."

In his column for the New York Times (8/20, Subscription Publication, 9.44M), Roger Cohen says that with the recent events, "Egyptian democracy was stillborn." For the US and Europe, he says it "amounts to a colossal strategic failure" and adds that "nothing — and certainly not the outcome in Afghanistan or Iraq — was more important than getting Egypt right." Cohen says that the Administration has "appeared hesitant and wavering, zigzagging from support for Morsi to acceptance of his ouster." Still, Cohen says that cutting off aid would not solve anything except to further reduce US influence.

In his column for the Wall Street Journal (8/20, Stephens, Subscription Publication, 5.33M), Bret Stephens says that if the US restricts military aid to Egypt, it will lose all influence with the military there and gain little. He argues that having the Egyptian military succeed as quickly as possible is the best of a group of bad outcomes for the US. He argues that if the Brotherhood wins, it would be a disaster for secular Egyptians and for US policy.

In an essay for the New York Times (8/20, Subscription Publication, 9.44M), Joe Sharkey writes that "global security and medical response companies" say that the increasing violence in Egypt have "reduced the number of foreign business travelers there to workers who are deemed necessary." They also say that they expect conditions to worsen, at least in the short term.

OBAMA PRODS TOP REGULATORS TO FINISH IMPLEMENTATION OF DODD-FRANK.

President Obama's Monday meeting with Fed Chair Bermanke, Treasury Secretary Lew and other top Administration officials regarding the pace of the Dodd-Frank Wall St. reform law's implementation did not generate any coverage on the network newscasts. Several outlets report that dissatisfaction within the Administration over the failure to put the Volcker Rule into place was among the topics covered Monday. On PBS's Nightly Business Report (8/20, 275), SEC chair Mary Jo White was shown being asked after the meeting, "What's the most important thing you still have to do on Dodd-Frank?" and replying, "Obviously, the Volcker Rule stands out."

At the opening of the lead story for NBR (8/20, 275), Tyler Mattheson said that upon returning from vacation, the President "got back to work," and "wasted no time tackling a topic of high interest to investors, not to mention financial services executives." John Harwood went on to report that "only about 40% of the regulations" called for in the law "have been enacted or completed by the regulators," and so Monday's meeting was "a pep rally to try to get them to finish that job."

Earlier in the day, on CNBC's Closing Bell (8/20, 151K), Harwood, who is a columnist for the New York Times and chief Washington correspondent for CNBC, which produces the Nightly Business Report for PBS, paraphrased White as saying that the "top priority is the Volcker Rule." Harwood went on to note that the President is "also going to be giving speeches in upstate New York later in the week to try to push his vision of a middle-out economic growth agenda."

The New York Times (8/20, B1, Shear, Eavis, Subscription Publication, 9.44M) reports that Administration officials "have expressed frustration that critical parts of Mr. Obama's overhaul of the financial system...remain unenforced," and, "in particular, top presidential aides have highlighted the failure in putting the Volcker Rule into effect." The Times says the Volcker Rule "prohibit[s] banks from risking institutional money in certain speculative investments." The Times notes that in a speech last month, Lew "complained...that the regulators were moving too slowly to confront the dangers of banks that are so large that governments cannot allow them to fail for fear of bringing down the economy." Lew is quoted as having said, "If we get to the end of this year, and cannot, with an honest straight face, say that we've ended 'too big to fail,' we're going to have to look at other options because the policy of Dodd-Frank and the policy of the administration is to end 'too big to fail.'"

The progress of Dodd-Frank was also the lead story on Fox News' Your World (8/20, 1.3M). Host Neil Cavuto said, "Whether it's ATM surcharges spiking, or monthly checking account fees soaring, you are paying – to date – 77 different Dodd-Frank regulations," which have "cost consumers and businesses more than \$15 billion – and that is with only 40% of the...law in place." Fox Business Charlie Gasparino added that despite the costs, "we still have 'too big to fail.'" According to Gasparino, "There's nothing in the bill that stops bailouts," and, "as a matter of fact, there are bailout mechanisms." Gasparino added, "They should really break up these banks," but the President "shows no willingness to do that."

The AP (8/20, Kuhnhehn), in an article titled, "Obama Urges Regulators To Enact Wall Street Rules," reports that three years after its passage, implementation of Dodd-Frank is "behind schedule with scores of regulations yet to be written, let alone enforced," so the President met "privately with the nation's top financial regulators" and "prodded them to act more swiftly." Before the meeting, deputy White House press secretary Josh Earnest said the President wanted to express "the sense of urgency that he feels" about the issue. The AP goes on to report that an independent analysis has concluded that "so far, regulators have missed 60 percent of the rule-making deadlines." The AP notes that Republicans see the implementation delays as evidence of the law's overall shortcomings. Rep. Jeb Hensarling, chairman of the House Financial Services Committee, says, "Much like Obamacare, Dodd-Frank is an incomprehensively complex piece of legislation that is harmful to our floundering economy and in dire need of repeal."

The Wall Street Journal (8/20, Ackerman, Subscription Publication, 5.33M), in an article titled, "Obama Presses Regulators To Finish Financial Rules," includes a version of the same comment from Hensarling, and quotes Bair as saying, "It has astonished me, the lack of leadership, the lack of sense of purpose and direction." The Journal attributes much of the Dodd-Frank rulemaking delay to pressure from banking lobbyists. The Financial Times (8/20, Subscription Publication, 1.42M) has a similar report.

However, The Hill (8/20, Schroeder, Sink, 322K) reports that on Monday, Earnest insisted that the White House "is not disappointed with the pace of progress," saying, "We're certainly pleased with the level of cooperation and coordination that's taken place among these independent regulators, and the president wants to encourage them to capitalize on the momentum they've already built up to put this regulatory regime in place."

Under the headline, "Obama Asks Regulators To Speed Up Wall Street Reforms," Reuters (8/19, Stephenson) reports that the White House released a statement after the meeting reading: "The president commended the regulators for their work but stressed the need to expeditiously finish implementing the critical remaining portions of Wall Street reform to ensure we are able to prevent the type of financial harm that led to the Great Recession from ever happening again."

MNI News (8/20, Gulino) reports that while the Treasury Department "is not formally taking credit for placing a meeting with every financial regulator right at the top of Obama's post-vacation schedule," Lew "has emphasized several times that he is making Dodd-Frank one of his top priorities."

Bloomberg News (8/20, Talev, Lerer, 1.41M) says the White House "provided no details on the discussion," but the statement released after the meeting disclosed that the President "also discussed the need for a simpler housing finance system 'that better serves middle-class families' and cooperation among agencies involved in financial market regulation." According to Bloomberg, in addition to the President, Bernanke and Lew, those present at the meeting included, "the Comptroller of the Currency, the director of the Consumer Financial Protection Bureau, the acting director of the Federal Housing Finance Agency, and the chairmen of the Commodity Futures Trading Commission, Federal Deposit Insurance Corp., National Credit Union Administration, and Securities and Exchange Commission."

NYTimes: JOBS Act Weakened IPO Regulations' Investor Protections. The New York Times (8/20, Subscription Publication, 9.44M), in an editorial notes that a year ago, the JOBS Act "sailed through Congress with the support of bipartisan majorities, President Obama and the banking

industry." However the Times notes that at the time, there were "warnings that it would harm investors by weakening the standards" for IPOs, and the Times says "some of the predicted ill effects...are now coming to pass." According to the Times, "as public offerings have ramped up again on Wall Street...banks have clamored for looser restrictions and got them in the JOBS law." In Particular, the Times objects to the law "allow[ing] analysts to attend an investment banking pitch for a public offering of an 'emerging growth company.'"

Fed Demands Tougher Stress Tests For Some Banks. The Wall Street Journal (8/20, Crittenden, Subscription Publication, 5.33M) reports that the Federal Reserve released a study on Monday that showed that while some of the banks with the most complex operations have made good progress in preparing for market shocks since the financial crisis, there is still work to be done. The Fed wants executives to focus on more specific problems they may face, and test their readiness against them. The report said, "Bank holding companies, when considering their capital needs, should focus on the specific risks they could face under potentially stressful conditions."

Bloomberg News (8/20, Torres, Marcinek, 1.41M) reports that the study found that the "18 largest banks still fall short in at least one of five areas critical to risk management and capital planning." The study shows that after four recent stress tests, "some of the largest banks still lack comprehensive systems and policies to model, test, report and plan for economic calamities."

The New York Times (8/20, Eavis, Subscription Publication, 9.44M), in a more negative take on the study, says that "most" large banks "appear to have been sailing through the annual 'health checkups' they have had to undergo since the financial crisis." The Fed said that, for example, "some banks were not taking into account the possibility of falling house prices when valuing certain mortgage-related assets for the tests."

Lipsky: Public Resolution To Questions About AIG Dissolution Needed. In an op-ed for the Wall Street Journal (8/20, Lipsky, Subscription Publication, 5.33M), Seth Lipsky, editor of the New York Sun, writes that US Court of Federal Claims Judge Thomas Wheeler is seeking to have Bernanke testify under oath about the Fed's bailout of AIG in 2008 as part of a suit by former top shareholder Starr International, which was wiped out in the bailout. However, the Federal government has been fighting the move, warning that it would distract Bernanke from his primary duties. Lipsky says that Bernanke may have bent or broken the rules in the process, and the public deserves to know.

Reuters Analysis: Yellen, Summers Closer On Regulation Than Many Believe. Reuters (8/20, Saphir) says that as President Obama looks to select a replacement for Fed Chief Ben Bernanke, he should look beyond where the candidates stand on monetary policy and focus on how they rate as regulators. However, Reuters says that the difference between the two leading candidates, Janet Yellen and Lawrence Summers, may not be as sharp as some assume. While Yellen has historically been in favor of tougher regulation, Summers has been less consistently tough. Still, Reuters says that Summers did push for a crackdown on abusive lending, a key contributor to the financial crisis.

Rand Paul Expected To Play Major Role In New Fed Chair Confirmation. Politico (8/20, Lee, Burns, 652K) reports that if "you thought the debates over drones and surveillance were tailor-made" for Sen. Rand Paul (R), "just wait" until Obama selects a new Fed chief. The forthcoming debate "is both a golden opportunity and a test for the libertarian-leaning senator, who has long criticized Bernanke's policies and the institution of the Fed." Paul will need to "continue to rally his grass-roots supporters" while not "turning off deep-pocketed GOP donors" in the financial services community.

STATE DEPT. OFFICIALS PUT ON LEAVE FOLLOWING BENGHAZI WILL NOT BE PUNISHED. The Daily Beast's (8/19, 928K) Josh Rogin reports that Secretary of State Kerry "has determined that the four State Department officials placed on administrative leave" by former Secretary of State Clinton in the wake of the Benghazi attack last September "do not deserve any formal disciplinary action and has asked them to come back to work at the State Department starting Tuesday."

Former Deputy Assistant Secretary of State Raymond Maxwell, described by Rogin as “the only official from the State Department’s Near Eastern Affairs bureau to lose his job over the Benghazi attack,” says he “received a memo from the State Department’s human resources department informing him his administrative leave status has been lifted and he should report for duty Tuesday morning.” Maxwell is quoted as saying, “No explanation, no briefing, just come back to work. So I will go in tomorrow.” An anonymous “senior State Department official” says the four will “not face any formal disciplinary action” although they “are not blameless and the fact that they will not be returned to the same positions is relevant.”

Boehner Faces Growing Pressure To Create Benghazi Investigative Panel. The Hill (8/20, Pecquet, 322K) reports in its “Global Affairs” blog that as the one-year anniversary of the Benghazi attack approaches, Speaker Boehner and other House Republicans are facing growing pressure “to create a special investigative panel.” A group of special forces veterans called Special Operations Speaks “has spent \$5,800 for three giant billboards scheduled to go up in Boehner’s district this week.” the billboards urge lawmakers to support a discharge petition to force “a vote on legislation from Rep. Frank Wolf (R-VA) that would create a special committee.” Another conservative group is planning “a day-long commemoration at the steps of the Capitol on Sept. 11.”

Claim That Missiles Bound For Syrian Rebels Were In Benghazi Noted. Instapundit’s Glenn Harlan Reynolds, in an op-ed for USA Today (8/19, Reynolds, 5.82M), says the Administration’s account of the terrorist attack in Benghazi “– successfully pushed off past the 2012 elections by scapegoating an obscure YouTube filmmaker – is looking worse and worse.” Reynolds notes that former US Attorney Joseph DiGenova, who is “representing a Benghazi whistleblower, even says that missiles were being funneled through Benghazi to the Syrian rebels and that 400 were stolen by Al Qaeda terrorists at the time of the attack.” Reynolds also notes that CNN “has reported that dozens of CIA agents were on the ground in Benghazi – and that they’re being pressured to keep quiet.”

Editorial Wrap-Up:

NEW YORK TIMES. “False Choices On Egypt.” In an editorial, the New York Times (8/20, Subscription Publication, 9.44M) says that a “surprising number of world leaders and foreign policy experts have effectively acquiesced in the continued brutality of Egypt’s generals,” their argument being that supporting the military is the “only way to restore stability.” However, the Times says this is “certain to ensure more unrest, not less.” The Times says that Obama’s “muted chastising of the generals and his indecisive reaction to the slaughter does not inspire confidence.” The Times says that the Administration should immediately suspend military aid.

“Back To The Future On Wall Street.” The New York Times (8/20, Subscription Publication, 9.44M), in an editorial notes that a year ago, the JOBS Act “sailed through Congress with the support of bipartisan majorities, President Obama and the banking industry.” However the Times notes that at the time, there were “warnings that it would harm investors by weakening the standards” for IPOs, and the Times says “some of the predicted ill effects...are now coming to pass.” According to the Times, “as public offerings have ramped up again on Wall Street...banks have clamored for looser restrictions and got them in the JOBS law.” In Particular, the Times objects to the law “allow[ing] analysts to attend an investment banking pitch for a public offering of an ‘emerging growth company.’”

“Trifling With The Arts And Humanities.” An editorial in the New York Times (8/20, Subscription Publication, 9.44M) criticizes the White House over the amount of time it is taking to nominate chairmen for the National Endowment for the Arts and the National Endowment for the Humanities, noting that while the “small-but-vital endowments” have acting leaders who are able, “interim bosses do not have the influence permanent leaders do.” The Times stresses that as Republicans in congress threaten “major budget cuts that neither agency can easily absorb,” a “strong voice at the top...would be particularly helpful.”

"Riding And Raging On The Rail Road."

WASHINGTON POST. "What Egypt Needs." In an editorial, the Washington Post (8/20, 4.53M) says that Egypt's military-backed government "appears to have embarked on a frighteningly similar course" to Syrian leader Bashar al-Assad in response to protests – unleashing "unrelenting violence." The Post warns that it is "not only a moral challenge" to the US, it could lead to "civil war," "massive flows of refugees," and a new base for Al Qaeda. The Post says that the Administration should respond by suspending military aid.

"America's Weight Loss." The Washington Post (8/20, 4.53M), in an editorial, notes that the CDC just reported "that the obesity rate dropped among younger, poor children in 19 states and territories between 2008 and 2011," and just "three states saw increases." The Post says the findings are important because "public-health advocates have worried for years that the United States was entering an age of obesity," but it "may be reaching a plateau" instead. According to the Post, "It makes sense that adjusting the WIC program might have changed some people's behavior," and "meant that taxpayers would no longer fund the consumption of junk." The Post says Congress "should think about how it might change the broader \$75 billion food-stamp program along similar lines."

"Cuccinelli's Fuzzy Math." In an editorial, the Washington Post (8/20, 4.53M) criticizes Virginia Attorney General and Republican gubernatorial candidate Ken Cuccinelli's economic plan, which would cut "business income taxes by a third and personal income taxes by 13 percent." Noting that Cuccinelli "insists that, under his plan, revenue would hold steady and the state's already lean budget would be held harmless," the Post calls his plan "gobbledygook," unless "what he is really planning is a frontal assault on state spending," which would mean "eviscerating education, public safety, infrastructure and social services, which together account for a large majority of that spending."

THE WALL STREET JOURNAL. "The Die Harder States." In an editorial, the Wall Street Journal (8/20, Subscription Publication, 5.33M) criticizes states that have maintained an estate tax, despite the end of a provision in Federal law that offered a credit to offset them. In particular, the Journal is critical of Minnesota for expanding its tax. The Journal says the tax is particularly foolish because wealthy residents of states with significant estate taxes can simply change residency to states without them, to the detriment of the states they are leaving, whom the Journal says will be losing successful individuals.

"Perverse Effects." An editorial in the Wall Street Journal (8/20, Subscription Publication, 5.33M) calls on Congress to end ethanol and biofuel subsidies, citing a report from the National Academies, which found that before it expired in 2012, the 45-cents-a-gallon ethanol tax credit was increasing carbon emissions by five million tons each year.

"Exposing Asbestos Fraud." The Wall Street Journal (8/20, Subscription Publication, 5.33M) editorializes about a bankruptcy case in North Carolina. Garlock Sealing Technologies, a gasket manufacturer, was forced into bankruptcy in 2010 by asbestos claims, and the Journal contends that plaintiffs' attorneys are asking a Federal judge to force Garlock to contribute \$1.3 billion into a bankruptcy trust for future asbestos claims. The Journal argues that evidence in the case has been sealed and kept from public view, and contends that such practices are violations of the public trust.

Washington Schedule:

TODAY'S EVENTS IN WASHINGTON.

White House:

PRESIDENT OBAMA —Receives the Presidential Daily Briefing, Oval Office, closed press; honors Super Bowl Champion Miami Dolphins and their undefeated 1972 season, East Room, open press.

VICE PRESIDENT BIDEN — No Public Events Scheduled.

US Senate: No Events Scheduled

US House: No Events Scheduled

Other: NORTHROP GRUMMAN – AIRCRAFT UNMANNED SYSTEMS — 8:30 a.m. Tom Vice, corporate vice president and president of Northrop Grumman Aerospace Systems, will discuss the promise of aircraft unmanned systems and describe Northrop Grumman's leadership in unmanned systems, a capability that is transforming military and commercial approaches to aerospace.

Location: National Press Club, 529 14th Street NW.

EMPLOYER HEALTH BENEFITS SURVEY — 11 a.m. The Kaiser Family Foundation and the Health Research & Educational Trust will hold a reporters-only conference call to release the 2013 Employer Health Benefits Survey. Participating in the briefing will be: Drew Altman, president and CEO of the Kaiser Family Foundation; study lead author Gary Claxton, a Kaiser vice president and director of the Health Care Marketplace Project; and Matthew Rae, a study co-author and Kaiser senior policy analyst.

EVANGELICAL IMMIGRATION AD CAMPAIGN — 11 a.m. Evangelical Immigration Table press call to launch immigration reform advertising campaign on Christian and talk radio.

CATO – SOCIAL SECURITY – DISABILITY BRIEFING — 12 p.m. Cato Institute hosts briefing on the rising costs of social security disability. Speakers: Tad DeHaven, Budget Analyst, Cato Institute; and Jagadeesh Gokhale, Senior Fellow, Cato Institute; moderated by Chris Edwards, Director of Tax Policy Studies, Cato Institute. Location: B-338 Rayburn.

CRIMINAL JUSTICE ACT — 3 p.m. – 5 p.m. The Federal Bar Association Criminal Law Section and The Law Library of Congress are hosting an event marking the beginning of a year-long commemoration of the 50th anniversary of the passage of the Criminal Justice Act. This landmark legislation secured the Sixth Amendment right to counsel in Federal court. Location: Library of Congress, James Madison Memorial Building, Montpelier Room (6th Floor, Yellow Corridor), 101 Independence Avenue, SE.

Last Laughs:**LATE NIGHT POLITICAL HUMOR.**

David Letterman: "‘The Butler,’ number one movie in the country. It's a story about a guy who spent his life getting coffee for the President. It's based on Joe Biden."

David Letterman: "Speaking of presidents, George W. Bush had heart surgery. I hope he's doing well. Doctors say he's resting comfortably, which is what he did for eight years in the Washington."

RE: U.S. Department of the Interior News Briefing for Tuesday, August 20, 2013

Nicole Buffa <nicole_buffa@ios.doi.gov>
To: Sally Jewell (b)(6)@ios.doi.gov

Tue, Aug 20, 2013 at 11:28 AM

Hi there - Our comments were sent to the State Department on April 29th before you were sworn in. I've attached them here for background.

Because these were comments on a NEPA document, I am told they ran through our normal NEPA process, which means each program office contributed comments. This process typically doesn't include 6th floor review. Happy to explain more by phone if and when you'd like to talk.

Thanks,
Nikki

DOI in the News:**WYOMING GOP DELEGATION WANTS STATE TO BE EXEMPT FROM BLM FRACKING**

RULES. The "E2 Wire" blog of The Hill (8/20, Colman, 322K) reports that the Republican congressional delegation of Wyoming has asked the Interior Department "to exempt states that already regulate hydraulic fracturing, or fracking, from a proposed rule governing the practice on federal land." Sen. John Barrasso, Sen. Mike Enzi and Rep. Cynthia Lummis said in a letter to Interior Secretary Sally Jewell that they are "concerned the draft rules from the department's Bureau of Land Management would be duplicative" and the rules "could deter people from drilling for oil and gas on federal lands within their states, costing 'hundreds of millions of dollars in revenue.'" In the letter the lawmakers said, "Federal law and regulations often delay investment and job creation for years. Consequently, Federal law and regulations push investment out of public land states and into other states where there is greater regulatory certainty."

The AP (8/20, Gruver) reports that in May, when the draft rules were released, Jewell said "that federal rules for fracking on federal land are needed to reconcile a patchwork of state fracking rules." However, she offered praise for the rules in Wyoming "which, among other requirements, make companies provide to regulators lists of the chemicals that go into the specially formulated fluids they use to improve the fracking process." In an email statement, Interior spokeswoman Jessica Kershaw said that "the U.S. Bureau of Land Management is committed to working with states that have fracking standards to avoid unnecessary duplication or delays."

Also reporting on the story are the Columbus (IN) Republic (8/20, 76K), the San Francisco Chronicle (8/20, Gruver), the San Luis Obispo (CA) Tribune (8/19, 119K), the Billings (MT) Gazette (8/20, 188K), the York (SC) Enquirer-Herald (8/19, 18K), the Anchorage (AK) Daily News (8/19, 223K), the Rock Hill (SC) Herald (8/19, 102K), the Upstream Online (8/20, Johnson, 20K), and the Law 360 (8/20, 3K).

CONSERVATIONISTS FRET ABOUT SECRETARY JEWELL'S "SLOW START." The Seattle Post-Intelligencer (8/20, Connelly, 800K) reports that conservation advocates are worrying that Interior Secretary Sally Jewell is "off to a slow start," and "so far, it seems – to steal the phrase of ex-Labor Secretary Robert Reich – that she is locked in the Cabinet." The article points out "a trio of worries about Jewell, and ways out." First, the article suggests Jewell to "get out of the rut of photo opportunities;" second, to "install your own people;" and third, to "connect with the President."

Secretary Jewell Urged To Protect Public Lands. In an op-ed for the Wyoming Tribune Eagle (8/18, Zimmerman, 44K), Kate Zimmerman writes that according to a recent report issued by the National Wildlife Federation, "outdoor enthusiasts...now spend more than \$646 billion annually." But the National Wildlife Federation reports that, "despite the economic and public values of these lands, federal lawmakers have introduced dozens of bills seeking to sell off or roll back protections for public lands." Zimmerman hopes that Interior Secretary Sally Jewell's "stewardship over the next several years will pay back dividends."

SEN. HEINRICH URGES FEDERAL ACTION ON SUNZIA POWER LINE. The El Paso (TX) Times (8/20, Simonich, 240K) reports that Sen. Martin Heinrich wrote in a letter to Interior Secretary Sally Jewell that "the SunZia proposal had been delayed long enough, and that the federal government's credibility was on the line in resolving property use involving military installations and alternative energy suppliers." Heinrich wrote, "Another delay on this project threatens the credibility of the Department of Defense Siting Clearinghouse process. SunZia was selected as an early 'fast track' project for the nine-agency Rapid Response Team for Transmission and was intended to act as an example of how DOD and the Department of the Interior could work together to resolve energy siting conflicts quickly and collaboratively."

Additional coverage was provided by the Alamogordo (NM) Daily News (8/20, Simonich, 21K), the Deming (NM) Headlight (8/20, Simonich, 10K), the Farmington (NM) Daily Times (8/20, Simonich, 46K), and KRWG-FM Las Cruces, NM (8/20, 5K).

ENVIRONMENTAL GROUPS PRESS SECRETARY JEWELL TO REJECT IZEMBEK ROAD. The E&E Daily (8/19) reports that environmental groups are increasing pressure on Interior Secretary

Sally Jewell to "reject a proposed gravel road through an Alaskan wilderness, drawing swift rebuke from Alaska Sen. Lisa Murkowski (R), the road's most outspoken supporter." On Friday, the groups wrote in a letter to Jewell, "The proposed road would be harmful to the Izembek Refuge and Wilderness and the American public. It would fail to provide the emergency medical transportation desired by the people of King Cove, and it would be extremely costly for taxpayers in a time of great financial strain and many pressing national needs." However, "Robert Dillon, a spokesman for Murkowski, said that the letter was misleading and most environmentalists have never experienced the turbulent weather at King Cove that makes a road necessary."

IN PUBLIC COMMENTS TO STATE DEPARTMENT, INTERIOR ENUMERATES WAYS IN WHICH KEYSTONE XL COULD HARM WILDLIFE. The Los Angeles Times (8/20, Banerjee, 3.4M) continues coverage of last week's warning from the Interior Department that the Keystone XL pipeline could harm wildlife near the route. The agency's warnings are in direct contradiction to the March draft environmental assessment issued by the US State Department, which found the pipeline would have only an indirect, temporary effect on area wildlife. In a letter spanning 12 pages as part of public comments on the State Department's draft assessment, the Interior Department "repeatedly" suggests that State's assessment of the environmental effects of the pipeline project is "inaccurate." Among the ways the project could harm wildlife, Interior suggests it could cause "species displacement, increased predation rates and predator travel lanes, increased nest parasitism, vehicle collisions with wildlife ... invasive plant species, increased wildfire risk, lower wildlife density, increase in collisions with power lines and electrocutions on power poles ... and increase in poaching."

DRONES COULD CHANGE FIGHT AGAINST WILDFIRES. CNN (8/19, 11.58M) reports that "accessing new technology in rural areas where forest fires rage has been a challenge, but the use of new unmanned drones could drastically change the nature of the fight." Sher Schranz, a project manager at National Oceanic and Atmospheric Administration who researches fire weather modeling, explained, "We can get more information for less cost, and it doesn't put anyone in harm's way." The article notes that "drones can help in two ways: They can safely gather more information about fire conditions than is currently available, and they can send that information to firefighters on the ground quickly."

CONTINUING COVERAGE OF COLORADO RIVER. The E&E Daily (8/19) reports that "as drought continues to grip the Southwest, officials in charge of managing the Colorado River's water announced Friday that they will be forced to take a historic action on account of low water levels." The article notes that "for the first time since Lake Powell was filled in the 1960s, water releases from that reservoir down to Lake Mead, the downstream reservoir that provides water to southern Nevada, Arizona, Southern California and northern Mexico, will be just 7.48 million acre-feet for the upcoming water year, which begins Oct. 1." According to the article, "those familiar with water management in the river basin called it a symbolic moment and a potential warning of what the future of the river could look like as the climate changes."

Additional coverage of the Colorado River drought measures was provided by the Reno (NV) Gazette-Journal (8/18, 165K), the St. George (UT) Spectrum (8/19, 48K), the Riverside (CA) Press Enterprise (8/19, 447K), the Marin (CA) Independent Journal (8/20, 111K), the Grand Junction Daily Sentinel (8/20, Harmon, 75K), the Hydroworld (8/20, 151), and the Aspen Business Journal (8/20).

FEDERAL GOVERNMENT'S LAWSUITS EXAMINED. The Washington Examiner (8/20, Rosiak, 294K) reports that "the federal government paid by far the most on record last year to parties who sued it, at \$2.9 billion, and will surpass that amount this year, a Washington Examiner analysis of court records found." Moreover, "due to oddities in federal accounting, the largest single settlement is not yet reflected in the data, thus positioning 2013 to be by a record year in dollar terms by a wide margin." The article notes that "a settlement between the Interior Department and Native Americans awarded \$3.4 billion after Native Americans argued that the government was mismanaging their money and withholding revenue."

SETTLEMENT REACHED IN PUBLIC ROADS SUIT. The St. George (UT) Spectrum (8/19, 48K)

reports that Utah and Juab County have "reached the first settlement with the federal government and environmental groups granting the state and county ownership over three disputed roads in Juab County." According to the article, "US District Judge Tena Campbell has been given a consent decree today that would restore public access to three roads — and for the first time opens access to a road closed due to a Wilderness Study Area boundary." The agreement "requires the federal government to unlock the gate on Granite Canyon and remove fallen trees and any other obstacles blocking access to Camp Ethel at the end of the Granite Canyon Road" and it "also allows the state or county to repair the roads but preserves their primitive status."

Also reporting on the story is the Cache Valley (UT) Daily (8/20, 639).

INTERIOR FAVORS NATIONAL MONUMENT DESIGNATION FOR TULE SPRINGS PARK. The Las Vegas Review-Journal (8/20, DeHaven, 437K) reports that the Obama administration recently came out in favor of a national monument designation for Tule Springs park. According to a July 31 statement released by the Interior Department, a park built in the area would be "the most significant Pleistocene paleontological resource in the American Southwest."

INTERIOR, VIRGIN ISLANDS TO LAUNCH JOINT AUDIT NEXT YEAR OF PUBLIC FINANCE AUTHORITY. The Virgin Islands Daily News (8/20, Nomis, 49K) reports that the Interior Department and the Virgin Islands Inspector General will launch a joint audit next year of the Public Finance Authority.

ADDITIONAL COVERAGE OF SECRETARY JEWELL'S REMARKS ON CLIMATE CHANGE. Additional coverage of Interior Secretary Sally Jewell's remarks on climate change was provided by FOX News (8/19, 6.72M).

ADDITIONAL COVERAGE OF INTERIOR'S CLOUD CONTRACTS. Additional coverage of Interior's cloud contracts was provided by the Washington Post (8/20, Ravindranath, 4.53M) and Government Computer News (8/20, Miller, 1K).

USA TODAY: US COULD REACH ENERGY SELF-SUFFICIENCY IN 20 YEARS. An editorial in USA Today (8/20, 5.82M) notes the changing energy landscape around the world and notes that "the vast increase in oil and gas production in the USA and Canada," means that the US, which has long been "dependent on supplies from potentially hostile nations, will attain self-sufficiency in 20 years, according to a study by BP." USA Today adds that the "developments in North American energy production even suggest ways to attack the complex threat of global warming," including investing in basic research "to find means to cope with warming that do not exist now," and taxing pollutants and letting "the market adjust and innovators innovate."

In an accompanying op-ed in USA Today (8/20, Beinecke, 5.82M), Frances Beinecke, president of the Natural Resources Defense Council, takes a different view of the North American energy boom, arguing that an increase in domestic oil and gas production "is no panacea for our nation's energy needs or economy." Such an increase, she argues, "will only intensify our fossil fuel addiction" and it will not "free us from the tyranny of the global oil market." Beinecke writes that for the US to be truly energy independent, we must reduce "our reliance on oil and gas by investing in America's abundant clean energy resources that can power our country and boost our economy without endangering our health and climate."

HAROLD HAMM DISCUSSES FRACKING, CLIMATE CHANGE, WIND POWER. The National Journal (8/20, Harder, Subscription Publication, 377K) publishes an interview with Continental Resources founder and CEO Harold Hamm, whom it calls "one of the most influential oil-industry executives and one of the richest people alive." In the interview, Hamm says that he opposes Federal regulations on fracking and says that states should be left to regulate the process, recommends population control measures to contain global warming, and says he doesn't support subsidizing wind power or forcing people to look at wind turbines.

America's Great Outdoors:

National Park Service:

CONTINUING COVERAGE OF BEAR ATTACKS. NBC Nightly News (8/19, story 7, 2:20, Holt, 7.86M) reported, "A 12-year-old Michigan girl is telling NBC News tonight she thought she was a goner when she went out for a jog and out of no where, was mauled by a black bear. She is just one of seven people in five states who have been attacked by bears in the past week. Why so many close encounters between humans and bears? Here's NBC's Tom Costello." NBC (Costello) added, "It was a heart-stopping discovery in Naples, Florida, a black bear who had torn into a screened-in porch, sleeping on the tile floor." Unidentified speaker: "I couldn't believe my eyes. Like I never seen a bear that big." Costello: "Fortunately, the bear woke up and left, but across the country, bears have attacked at least seven people over the past week. In northern Alaska, a National Guard helicopter had to rescue a hunter on Saturday who survived 36 hours after being mauled by a bear. In Wyoming, two hikers suffered minor injuries after being attacked by a grizzly and her cub. A camper in Colorado was slightly injured last week. In Idaho, two researchers were attacked by a grizzly, one bitten on the leg. And in Cadillac, Michigan, Thursday, a 12-year-old girl was attacked by a black bear while jogging. She thought she was going to die." Abby Wetherall, bear attack victim: "This is it. I'm not gonna see my family ever again. Not going to see my soccer team or any of my friends. I'm a goner." Costello: "She tried to run away, but the bear caught her. But then she says she played dead and the bear walked away. According to contrary thought, bear attacks aren't about protecting a cub. In a 2011 University of Calgary study, in 88% of the attacks, the bear was acting as a predator, viewing humans as food. Bears that have grown up near humans are far less likely to attack, researchers say. This bear recently showed up near the NBC News offices here in Washington. Increasingly, urban sprawl and remote recreation are bringing humans and bears together." Brian Aucone, Denver Zoo: "It's the time of year that they are going to have cubs and also going to be out actively foraging and looking for food, all preparing for wintertime to come and hibernate." Costello: "In Colorado, this bear walked right into a bar, while another literally tried to walk off with a restaurant's dumpster. Close encounters a little too close for comfort. Tom Costello, NBC News, Washington." Holt: "The National Park Service has some recommendations what to do and whatnot to do if you encounter a bear. We have put that information on our website."

Additional coverage was provided by the International Business Times (8/20, 237K) and the Marin (CA) Independent Journal (8/20, 111K).

CLEANUP OF LINCOLN MEMORIAL COMPLETED. The E&E Daily (8/19) reports that crews "removed the last traces of green paint from the Lincoln Memorial last week, three weeks after an act of vandalism kick-started citywide outrage over the defacement of the iconic statue." The NPS "announced Friday that employees were able to remove the last flecks of paint from the marble likeness of Abraham Lincoln." According to the article, "the memorial is now completely open to visitors to Washington, D.C., who come in the millions each year to tour the 19-foot-tall statue of the 16th president."

MAINTENANCE BACKLOG PLAGUING NPS. The Examiner.com (8/20, 1.36M) reports that "budget cuts in recent years have left" the NPS "with an \$11.5 billion deferred maintenance backlog." Moreover, NPS Director Jonathan Jarvis told the Senate Committee on Energy & Natural Resources that "this amount grows annually at a far greater rate than the service is able to pay down." Jarvis "mentioned several ways to increase revenue without adding to the federal deficit, such as increasing the price of the annual park pass" and "he also suggested raising funds through donors and matching grant programs."

FRIENDS OF THE INDIAN KING TAVERN RECEIVES NPS GRANT. The South Jersey (NJ) Sun (8/19) reports that the Friends of the Indian King Tavern "recently acquired a grant from" the NPS' American Battlefield Protection Program to "create a map brochure of Revolutionary War battle sites in Camden and Gloucester counties." Garry Stone, state Park Service historian and historian for the Indian King Tavern, said "It's thought of as a two-year project. I need to get a running start

September/October so I can make enough progress for second-year funding." NPS Director Jon Jarvis said, "We are proud to support projects like this that safeguard and preserve American battlefields. These places are symbols of individual sacrifice and national heritage that we must protect so that this and future generations can understand the struggles that define us as a nation."

AFTER HURRICANE SANDY, FAMILY FIGHTS TO SAVE RESTAURANT. The New York Times (8/20, A14, Applebome, Subscription Publication, 9.44M) reports on Ed Segall, the owner of "the Sea Gulls' Nest, a restaurant damaged by Hurricane Sandy and facing a maddeningly complex series of bureaucratic hurdles blocking it from reopening." The article notes that Sen. Robert Menendez and Rep. Frank Pallone Jr., "both of New Jersey, have asked the director of the National Park Service, Jonathan B. Jarvis, to meet with Mr. Segall." Segall "has prepared four thick binders of history and tributes to remind the government what he has done over the past decades, but is still waiting for a meeting." In the mean time, "food trucks operated by other people provide service at Sandy Hook, and the Segalls wait and worry."

ENVIRONMENTAL GROUPS SEEK INJUNCTION TO BLOCK SUSQUEHANNA-ROSELAND CONSTRUCTION. The New Jersey Herald (8/19, 37K) reports that as two power companies say "they will begin construction of a 500-kilovolt electric transmission line through a national park early next month, environmental groups on Monday asked a federal judge to stop any work until he can decide the case that could shut down the project altogether." In the lawsuit, the groups "argue that permits for the powerline construction were given" by the NPS "despite studies by the park service that show construction of the new lines, which follow the right-of-way of an existing 230-kV transmission line, would cause irreparable harm to the park." The lawsuit questions whether the NPS "acted correctly late last year when it gave the necessary permits to the two utilities for the 4.5 miles across the national park."

NPS SEEKS PUBLIC COMMENTS ON NEW MANAGEMENT PLAN FOR ZION NATIONAL PARK'S VIRGIN RIVER. The Deseret (UT) News (8/20, 251K) reports that the NPS "may change the way visitors enjoy Zion National Park, all in the interest of protecting the Virgin River and the areas around it." According to the article, "a new management plan for portions of the river and its tributaries, which were designated as 'wild and scenic' by Congress back in 2009, has been completed and now Park Service officials want the public to weigh in on the plan." Kezia Nielsen, an environmental resource protection specialist with the NPS, said, "There could be a lot of things that happen, but they are not imminent. The whole purpose of this plan is to protect and enhance the values for which made them eligible for designation as wild and scenic rivers."

BEN FRANKLIN MUSEUM TO REOPEN AFTER RENOVATION. The Philadelphia Business Journal (8/19, Subscription Publication, 39K) reports that Philadelphia's Ben Franklin Museum will "reopen Aug. 24 after a major renovation." The NPS "worked with various partners to pay for the changes, splitting the cost." NPS "funding for the improvements totaled \$11.3 million, while other partners contributed \$11.8 million."

WILDFIRE FORCES CLOSURE OF ROUTE INTO YOSEMITE NATIONAL PARK. The Columbus (IN) Republic (8/20, 76K) reports that "a wildfire has forced the shutdown of a highway that serves as a busy gateway to Yosemite National Park." According to the US Forest Service, "two days after it broke out in the Stanislaus National Forest, the blaze crossed State Route 120 on Monday, shutting it down in both directions."

YELLOWSTONE TO RELEASE FISH TOXIN. The Yellowstone Gate (8/20, Prevost) reports that "wildlife managers in Yellowstone National Park are planning this week to release a fish toxin in Grayling Creek as part of a long-term plan to restore native fish populations to the waterway in the Madison River drainage." The goal is to rid "the creek of non-native brown and rainbow trout, species which have contributed to a decline in native cutthroat trout in park lakes, rivers and streams, according to a statement released by the park's public affairs office." Officials hope "to restore native westslope cutthroat trout and Arctic grayling in Grayling Creek and other park waters."

REFERENCE TO GOD URGED FOR MLK MEMORIAL. In an op-ed for the Salem (OR) Statesman Journal (8/19, Murray, 140K), John A. Murray, headmaster of Fourth Presbyterian School in Potomac, Md., writes that "in preparation for the 50th anniversary of the Rev. Martin Luther King Jr.'s 'I Have a Dream' speech," the NPS "is spending hundreds of thousands of dollars to remove a controversial quote on the side of the King Memorial." But Murray asks, "If King were alive, would he be less concerned about being called a drum major than he'd be by the omission of any reference to God?" Murray concludes that "given the August anniversary of the March on Washington, rather than modifying the 'drum major' quote," he would recommend one from King's powerful 1963 speech: "I have a dream ...when all of God's children, black men and white men, Jews and Gentiles, Protestants and Catholics, will be able to join hands and sing in the words of the old Negro spiritual, 'Free at last! Free at last! Thank God Almighty, we are free at last!'"

Bureau of Land Management:

HELIUM RESERVE FACES SHUTDOWN. The Wall Street Journal (8/20, Peterson, Subscription Publication, 5.33M) reports that unless Congress acts to wind it down more slowly, the Federal Helium Reserve will shut down on October 8. Moreover, the BLM could begin winding down its operations as early as Sept. 15 to prepare for the closure, according to industry estimates.

BLM MULLS GEOCACHING IN CONSERVATION AREA. The Grand Junction Daily Sentinel (8/20, 75K) reports that the BLM "wants adventurers to leave no trace of their hunts for geocaches in the Dominguez-Escalante National Conservation Area, but an advisory group says there ought to be a little leeway." The agency is "working on the first-ever resource management plan for the area south and east of Grand Junction for the treasure-hunting activity." The BLM's "preferred alternative calls for geocaching to be limited to the virtual variety, or searches that result in participants taking photos of themselves with recognizable locations they find using geocaching directions."

TUSCARORA FIRE BURNING SAGE GROUSE HABITAT. The Elko (NV) Daily Free Press (8/20, 23K) reports that "a burning about 10 miles northwest of Tuscarora had charred about 16,000 acres as of Monday evening." According to BLM public affairs specialist Lesli Ellis-Wouters, "the Red Cow Fire was about 10 percent contained." Ellis-Wouters noted that "the fire is burning in an area of intact sage grouse habitat not impacted by previous fires."

BLM REOPENS JQS ROAD NORTHWEST OF RIFLE AFTER ROCK SLIDE CLEARED. The Post Independent (Glenwood Springs, CO) (8/20, 27K) reports that the BLM has "reopened the JQS Road northwest of Rifle, which had been closed since Friday, Aug. 16, due to a rock slide."

Also reporting on the story is the Grand Junction Daily Sentinel (8/20, 75K).

Fish and Wildlife Service:

REPORT SAYS TEXAS HAS MISMANAGED HABITAT PLAN FOR DUNES SAGEBRUSH LIZARD. The E&E Daily (8/19) reports that "Texas has failed to report impacts from oil and gas development on the dunes sagebrush lizard, a violation of the habitat conservation plan the state signed with the Interior Department to keep the reptile off the endangered species list, according to a new report from Defenders of Wildlife." According to the article, the Texas comptroller in March told the FWS "that landowners and oil and gas developers in west Texas who were participating in its conservation plan had caused no new surface disturbances to the lizard's shinnery oak dune habitat in 2012." However, "imagery from government satellites and aircraft found multiple instances of surface disturbance on habitat enrolled by ConocoPhillips Co., which operates in the oil-rich Permian Basin, according to the Defenders investigation."

FWS TO LIST TWO TEXAS SALAMANDERS. The E&E Daily (8/19) reports that the FWS "plans to add two Texas salamanders to the endangered species list, a move that could lead to more protections for central Texas waterways." The agency said "it will give 'endangered' species status to the Austin blind salamander and 'threatened' status to the Jollyville Plateau salamander."

ENVIRONMENTAL GROUP URGES HUNTERS TO SWITCH TO NONLEAD BULLETS. The E&E Daily (8/19) reports that an environmental group "concerned about lead poisoning of birds is using the US military's recent announcement that it will switch to nonlead bullets as a clarion call for hunters to do the same." Robert Johns, a spokesman for the American Bird Conservancy, said, "If it's good enough for them, we think it's good enough for the average hunter, whose life is not in peril." The article notes that "lead poisoning from ingesting bullet fragments or pellets while consuming carcasses left behind by hunters is a leading cause of death for endangered California condors and other birds."

HUNDREDS OF SALMON STRANDED IN FARM DITCHES IN CALIFORNIA. The E&E Daily (8/19) reports that "the strandings of hundreds of endangered salmon in Colusa Basin irrigation ditches have California and federal wildlife officials searching for answers." Jeffrey McClain, assistant supervisor at the National Marine Fisheries Service office in Sacramento, California, said, "There has been some stranding in the past, but as far as I can tell, the numbers have been significantly lower than this. It's significant, and that's why this is a serious thing for us to figure out."

NEW STUDY QUESTIONS GREATER YELLOWSTONE BEARS COUNT. The High Country (CO) News (8/20, 74K) reports that "a new study strongly suggests" that the FWS' "calculations may be badly flawed – so much so, say the paper's authors, that no one knows how many bears are really out there." According to the article, "the population may even be dropping: Whitebark pine nuts, a key food source, are rapidly disappearing, and the impact on bears is in dispute."

ECONOMIST CRITICIZES FWS ANALYSIS OF ROSEMONT MINE'S IMPACT ON JAGUAR. The Tucson (AZ) Citizen (8/19, 60K) reports that "a review by a nationally recognized economist found, among other things, that the economic analysis commissioned" by the FWS "for its critical habitat proposal for the jaguar relied 'exclusively' on information provided by Rosemont that amounts to a 'distorted public relations exercise.'" The review by natural resource economist Dr. Thomas Power "concluded that the analysis provided to FWS by Cambridge, Massachusetts based Industrial Economics, Inc. (IEI) treats mining as if it only has benefits while ignoring its costs, and promotes a 'free lunch economics' approach that is 'contrived for public relations purposes.'"

ADDITIONAL COVERAGE OF STATE WILDLIFE GRANTS. Additional coverage of the \$5.1 million in grants awarded to 11 states was provided by the Hendersonville (NC) Times-News (8/19, 39K) and the Latin American Herald Tribune (8/20, 1K).

ADDITIONAL COVERAGE OF PLAN TO SAVE SPOTTED OWL. Additional coverage of the plan to save spotted owls was provided by the High Country (CO) News (8/20, 74K).

US Geological Survey:

AGENCIES COMPLAIN ABOUT SEQUESTER-IMPOSED TRAVEL LIMITS. The New York Times (8/19, A1, Shear, Nixon, Subscription Publication, 9.44M), in a front-page article, reports that as a result of the sequestration cuts, "most government travel budgets have been cut this year by 30 percent," and now "agency officials" complain that as a result, the Federal government "cannot conduct essential business and is embarrassing itself abroad." But Sen. Tom Coburn rejects that claim, saying, "Hopefully what you will have is more sound judgment at these agencies about what is critical travel and what isn't. ... Most of it has nothing to do with their jobs. It's a perk."

CALIFORNIA BUILDING'S DESTRUCTION REVEALS EARTHQUAKE RISK. The LiveScience (8/20, Oskin, 445K) reports that on August 17, a tiny artificial earthquake triggered by a building implosion at California State University, East Bay, "were recorded by more than 500 seismometers set out in backyards and businesses by volunteers the week before the building's collapse." The effort, coordinated by the USGS, "will provide the best picture to date of which areas could suffer the worst shaking in future earthquakes on the dangerous Hayward Fault," according to project leader Rufus Catchings, a research geophysicist with the USGS in Menlo Park, California. Catchings said, "This will give us a chance to really improve our shake map, which is something

that comes out immediately after an earthquake to tell first responders which areas are most affected."

Securing America's Energy Future:

Renewable Energy:

MANZANAR COMMITTEE OPPOSING LADWP'S PROPOSED 200 MEGAWATT SOLAR PROJECT. Southern California Public Radio (8/19, Peterson, 33K) reports on supporters of Manzanar Historic Site, which is "home to a former Japanese-American internment camp," objecting to a plan proposed "by the Los Angeles Department of Water and Power to put solar panels nearby," arguing that the panels "would obstruct the view from the camp." LADWP is hoping to build the solar project near Manzanar on land owned by the City of Los Angeles, with the agency planning to "install enough solar panels to generate around 200 megawatts." The Manzanar Committee said in a letter that the panels would obstruct the view, "and that construction would harm an old solid waste dump site that may contain historic artifacts."

This story was also reported by KCET-TV Los Angeles (8/19, Clarke).

ADDITIONAL COVERAGE OF WEST CHOCOLATE MOUNTAINS RENEWABLE ENERGY EVALUATION AREA. Additional coverage of the West Chocolate Mountains Renewable Energy Evaluation Area was provided by the Palm Springs (CA) Desert Sun (8/19, Kaufmann, 162K).

Onshore Energy Development:

BLM DEFERS PROPOSED OIL, GAS LEASE SALES. The E&E Daily (8/19) reports that the BLM "has reversed course and will not offer eight parcels near southwest Colorado's Mesa Verde National Park in a November oil and natural gas lease sale," pleasing the NPS "and some local government leaders who feared the drilling could harm the park." However, BLM officials "said late Friday that the agency is still conducting an environmental analysis of the eight parcels just east of the national park and that is why they were not included in the formal lease sale notice for the Nov. 14 sale." According to Shannon Borders, a BLM spokeswoman, "depending on the results of the ongoing environmental analysis, the eight parcels covering about 10,700 acres could still be offered at four planned oil and gas lease sales in the state next year."

Also reporting on the story is the Climate Progress (8/19, Goad, 375).

COMPANY FINED FOR FALSE ROYALTY DATA. The E&E Daily (8/19) reports that the Interior Department' Office of Natural Resources Revenue has fined Quinex Energy Corp. "\$2.2 million for knowingly maintaining false and misleading royalty information." Paul Mussenden, Interior's deputy assistant secretary for natural resources revenue management, said in a statement, "Accurate reporting is indispensable to proper royalty collection and is one of the first lines of defense in ensuring that ONRR collects every dollar due to the American taxpayer. In addition to our data mining and audit and compliance enhancement efforts, our enforcement team's increased focus on accurate reporting will continue to play a pivotal role in carrying out ONRR's core revenue collection mission."

GROWTH OF UNCONVENTIONAL GAS SOURCES REQUIRE REEXAMINATION OF GOVERNMENTAL ROLES. The Oil and Gas Journal (8/19, Snow, 1K) reports on the Aug. 15-16 National Research Council conference at which participants largely agreed that the "rapid growth of unconventional natural gas development and production is forcing governments worldwide to examine not just how to regulate the business, but also to consider which levels of government can do the best job in specific instances." Accordingly, the article says that those processes are "raising new intergovernmental questions that could make federal, state, and local officials reconsider whether existing enforcement responsibilities are still effective for nonoil and gas industries" and notes that "supplemental oversight by local residents is increasingly essential." The

article adds that some attendees suggested that public forums akin to those held by the BLM "as it developed its proposed hydraulic fracturing regulations" may be helpful in developing "consultation between federal and state governments."

BLM PLAN CRITICIZED FOR HALTING LOCAL DRILLING. In an op-ed for the Silver City (NM) Sun-News (8/20, Griggs, 24K), Ron Griggs, a Republican, who represents District 34 (Otero, Dona Ana and Eddy counties) in the New Mexico Senate, notes that the recently released BLM "draft environmental impact statement (DEIS) for the tri-county area that covers Dona Ana, Otero and Sierra counties defers action on fluid mineral leasing and development in the three counties." According to Griggs, "this effectively stops oil and gas drilling there for the foreseeable future." Griggs argues that the BLM "should allow continued development on the Bennett Ranch area of Otero Mesa and they should not use the Tri-County DEIS to delay potential additional development."

Offshore Energy Development:

SCIENTISTS DEBATE ESTIMATES OF OIL SPILLED INTO GULF. The E&E Daily (8/19) reports that "a dispute among experts over the extent of the Deepwater Horizon disaster is heating up as BP PLC prepares for the next stage of a civil trial to determine the final cost of the largest offshore oil spill in US history." According to the article, "recent filings in federal court in New Orleans include expert reports with a wide range of estimates on how much oil was spilled when BP's Macondo well exploded in 2010, killing 11 oil rig workers." For instance, the Justice Department "believes the well spewed 4.9 million barrels of oil into the Gulf," but "a report prepared for BP by Andreas Momber, a lecturer at the Aachen University of Technology in Germany, suggests the number is much lower because the concrete well eroded at a slower rate than the government claims."

BLACK ELK ENERGY STILL REELING FROM GULF PLATFORM FIRE. The E&E Daily (8/19) reports that Black Elk Energy "says its finances and production are still ailing following a fatal explosion last year at an offshore production platform in the Gulf of Mexico." Black Elk Energy "reported that its oil and gas output has slowed due to permitting delays and maintenance work." The BSEE is "still probing the company over its role in a Nov. 16, 2012, fire at the West Delta 32 production platform off Louisiana's coast."

NEW ANALYSIS QUESTIONS FEDERAL SAMPLING OF GULF OIL SPILL. The New York Times (8/19, Fountain, Subscription Publication, 9.44M) reports that an analysis of water, sediment, and seafood samples gathered during and after the 2010 Deepwater Horizon oil spill in the Gulf of Mexico "has found higher contamination levels in some cases than previous studies by federal agencies did, casting doubt on some of the earlier sampling methods." Paul W. Sammarco of the Louisiana Universities Marine Consortium, who is the lead author of the new analysis, which was published last week in the journal *Marine Pollution Bulletin*, "said that the greater contamination called into question the timing of decisions by the National Oceanic and Atmospheric Administration to reopen gulf fisheries after the spill and that 'it might be time to review the techniques that are used to determine' such reopenings."

DOI EXPECTED TO ANNOUNCE COASTAL SEISMIC DECISION AIRGUN TESTING THIS YEAR. The Business Insider (8/19, Angelova, 1.79M) reports that the DOI is expected to decide this year "whether to allow seismic airgun testing for oil and gas deposits along the coast from Delaware to Cape Canaveral, Florida." The article says that despite the fact that drilling along the Atlantic Coast "cannot begin until at least 2017, the exploration plan has sparked a heated debate between conservationists," who cite the potential harm to sea life, "and some members of Congress."

FORMER OBAMA OFFICIAL FAULTS OIL INDUSTRY'S OPPOSITION TO DISCLOSURE. FuelFix (8/19, Dlouhy, 3K) reports that according to David Goldwin, the former State Department special envoy for international energy affairs under President Obama, the oil industry's attempt to "undo a new Securities and Exchange Commission rule that forces publicly traded companies to disclose what they pay other countries to harvest oil and natural gas" is a "poison pill" that puts the

'otherwise uncontroversial' international pact" with Mexico to drill in the Gulf "at risk." The article quotes Goldwyn as writing in an article for the Brookings Institute, "In raw political terms, the trans-boundary agreement is important but not at the top of the oil and gas industry's priority list for Congress, whereas the proponents of transparency are well-organized and gaining momentum. Even the White House announced it could not support the House bill."

Tackling America's Water Challenges:

AZTEC DISTRICT COURT APPROVES NAVAJO WATER RIGHTS AGREEMENT. The Farmington (NM) Daily Times (8/19, Yee, 46K) reports on the "historic water rights settlement approved late last week" by an Aztec District Court. The article says that the agreement "guarantees the Navajo Nation an additional 130,000 acre-feet of water on top of the 195,000 acre-feet previously allotted to the tribal government" and also assures Federal backing for the Navajo-Gallup Water Supply Project, which "will provide water to the eastern portion of the Navajo Nation, the southwestern portion of the Jicarilla Apache Nation and the city of Gallup." Nevertheless, the Daily Times says the "decision is likely to be appealed" as its critics argue that "it will dry out the region and open doors for the tribal government to sell water to large cities downstream, such as Las Vegas, Phoenix and Los Angeles."

ARKANSAS VALLEY CONDUIT CLOSE TO "BECOMING A REALITY." The Pueblo (CO) Chieftain (8/19, Woodka, 103K) reports on the Arkansas Valley Conduit, which will provide water to "40 communities in Eastern Colorado...becoming a reality." The article says that the BOR will publish a decision on the project "after a 30-day comment period" to its environmental impact statement, which indicates that "work on the actual project can begin."

LAKE NIGHORSE DELAYS TEST PATIENCE OF RESIDENTS. The Durango (CO) Herald (8/18, 28K) reported on the Animas-La Plata Water Conservancy District meeting that took place last week concerning the recreation plan at Lake Nighthorse, or lack thereof. The Herald noted that the resentment from "anglers, watercraft owners and hikers all eager to explore the reservoir and nearby areas...was heard loud and clear" but also said that adding to those frustrations was the notable void left by BOR and OMRA officials "who attend board meetings without fail" and "who could have supplied some answers." Despite the backlash, the article said that according to Grand Junction BOR representative Ed Warner, "there are many 'hot issues' to resolve" before the area can be opened to recreation. Warner added, "The who, what and how, take time. We're trying to work with everybody."

ADDITIONAL COVERAGE OF BAY DELTA CONSERVATION PLAN. Additional coverage of the Bay Delta Conservation Plan was provided by the Stockton (CA) Record (8/15, 130K) and the Chico (CA) Enterprise-Record (8/20, Hacking, 91K).

Empowering Native American Communities:

ASSISTANT SECRETARY WASHBURN EXPLAINS INTERIOR'S LAND BUY-BACK PLAN. In a piece for the Indian Country Today Media Network (8/19, Washburn, 11K), Assistant Secretary for Indian Affairs Kevin K. Washburn explains how the Land Buy-Back Program will benefit tribes. Washburn notes that his "goal is to stay true to my guiding principle and use cooperative agreements to maximize tribal participation for those parts of the program where it will be most cost effective to do so." According to Washburn, "maximizing tribal engagement and offering the greatest flexibility for each tribal nation to determine how to best implement the Program in its community are critical."

MONTANA, TRIBAL OFFICIALS AGREE TO BISON TRANSFER. The E&E Daily (8/19) reports that Montana state and tribal officials "agreed to plans to transfer 35 bison from Fort Peck reservation to Fort Belknap in the wake of a state Supreme Court ruling allowing the project to move forward." According to the article, Fort Belknap tribal President Tracy King and Montana Fish, Wildlife and Parks Director Jeff Hagener "last week signed a memorandum of understanding, but

officials have yet to set a date for the transfer.”

APPELLATE ARGUMENTS SCHEDULED IN SPIRIT LAKE DISPUTE. The Grand Forks (ND) Herald (8/19, Haga, 88K) reports on the “latest stage of the turbulent and convoluted dispute” over “who should be recognized as the chairman of the Spirit Lake Sioux Tribe” and says that an appellate court will hold oral arguments on Aug. 30 at the UND School of Law in Grand Forks. Nevertheless, the Herald notes that in his Federal lawsuit, ex-Chairman Roger Yankton, Sr. maintains “that he remains the tribe’s duly elected leader and the appeals court has no jurisdiction.” The article adds that Yankton’s Aug. 12 filing also claims “that a restraining order issued against him by a Spirit Lake tribal judge was obtained improperly, prevents him from acting as chairman and amounts to an ‘illegal detention’ that violates his civil rights.”

SOUTHWEST TRIBES SEE BATTLE LOOMING AGAINST EXPLODING FERAL PIG POPULATIONS. The Indian Country Today Media Network (8/19, Allen, 11K) reports on the issues facing several southwest tribes as feral pig populations march across the country. The article says, “Tribes are at the forefront of the battle” against the creatures with Texas tribes actively engaged in “battling them” while tribes in New Mexico, Arizona, and California “are monitoring a pending problem.” The piece notes, “Tribal lands are not yet overrun, but they are seeing the need to make a plan.” Nevertheless, while Federal agencies “know of the situation and could mount a counterattack...no money exists to pay for such a war.”

REPORTS SHOW REVENUE DOWN AT POTAWATOMI CASINO. The Milwaukee Journal Sentinel (8/19, Spivak, 790K) reports that according to figures released on Monday, gambling revenues at the Potawatomi Bingo Casino slipped by almost 1.3% in 2012, “as the nation’s first off-reservation casino continues to experience the industry trend of flat growth.” The article says that the casino’s gamblers forfeited almost \$363 million in 2012, which was down from the \$368 million they lost at the casino during 2011. The Journal Sentinel adds that consequently, “the payments the Potawatomi tribe makes to the city and county also fell.” The article also notes that the tribe is “keeping a close watch on proposals to open new off-reservation casinos in Wisconsin,” the applications for which are before the US Bureau of Indian Affairs.

KAKE SEEKS FUNDS TO STABILIZE HISTORIC KEKU CANNERY. The AP (8/19) reports that Kake, Alaska “is trying to save its historic Keku Cannery,” which earlier this year the National Trust for Historic Preservation dubbed “one of the nation’s most endangered historic places” and is now on the verge of collapse. The article says that according to the National Trust, “the cannery is worth saving because of the role it played in developing Alaska’s canning industry during the first half of the 20th Century.” Nevertheless, the village is seeking funds in order to do so, including requests to the Bureau of Indian Affairs. The AP adds that Kake officials hope to at least steady the building or at most turn it into “a tourist stop where residents can put up shops.”

FREMONT COUNTY SUPERINTENDENTS BRIEF LEGISLATORS ON SCHOOL PERFORMANCES. The Riverton (WY) Ranger (8/19, Silva, 167) reports that during a meeting at Central Wyoming College, Fremont County school district superintendents “updated the Wyoming Legislature’s Joint Education Committee and the Select Committee on Tribal Relations on their schools’ performances.” The article adds that although the schools are seeing progress, “poverty, lack of transportation and cuts in the Impact Aid Program have made education far more difficult.” The Ranger also provides updates on St. Stephen’s schools, the funding for which is provided by the US Bureau of Indian Education.

NONPROFIT SPONSORS NATIVE YOUTH TRIP TO WASHINGTON. The Indian Country Today Media Network (8/19, Schilling, 11K) reports on the weeklong summer camp attended by 24 Native Youth, which was sponsored by the new nonprofit organization Pathkeepers for Indigenous Knowledge. The article says that the camp took place “on a horse farm where” the students “learned life lessons and traditional Native practices from elders” and the campers “also got a taste of Indian policy when they met with senators and other officials in Washington, D.C.” Among the officials with whom the youth met were “Mary Pavel, staff director and chief counsel for the Senate Committee on Indian Affairs; Mike Smith, deputy director of the Bureau of Indian Affairs; Chairman

Darrin Old Coyote of the Crow Nation, and other key staff and officials from the U.S. Department of the Interior."

Top National News:

AS OBAMA PONDERES FATE OF US AID, CYCLE OF VIOLENCE CONTINUES IN EGYPT. As violent turmoil continues in Egypt, where reports indicate ousted ruler Hosni Mubarak could soon be released from prison, the US media casts President Obama as undecided over the fate of US aid. The issue continues to generate debate among lawmakers and media commentators, with a new poll showing a majority of Americans favoring cutting assistance to Egypt and giving the President low marks for his handling of the situation. The story generated about 11 minutes of combined coverage on the network newscasts last night.

The networks, like much of the coverage, describe the US as increasingly powerless in its bid to manage the crisis. Driving that line of analysis is a statement from Defense Secretary Hagel, who according to AFP (8/20, De Luce) told reporters yesterday, "Our ability to influence the outcome in Egypt is limited." NBC Nightly News (8/19, story 2, 2:50, Holt, 7.86M), which referred to "an increasingly precarious situation for the United States," described Hagel's comment as an admission that "there is not much the US can do." Chief Foreign Correspondent, Richard Engel, reporting from Cairo, noted that "Egyptian officials" he interviewed "say they don't believe Washington has an accurate picture of what's going on."

Ed Henry, on Fox News' Special Report (8/19, 2.07M), reported that "some key Republicans disagree" with Hagel's assessment, and said "it is time for the President to play an important card, cutting off the \$1.3 billion in military aid the US provides Egypt each year." Fox then showed Sens. John McCain, Lindsey Graham and Rand Paul making that case on Sunday.

Reuters (8/20, Wroughton, Mohammed), meanwhile, reports that State Department spokeswoman Jen Psaki denied the US had already placed some economic aid on hold, as reported by the New York Times on Monday. Psaki said the US is "reviewing...programs on a case-by-case basis to identify whether we have authority to continue providing those funds or should seek to modify our activities to ensure that our actions are consistent with the law." Psaki indicated that also under consideration are potential cuts to US military aid. The Washington Post (8/20, A1, Sly, 4.53M) quotes Psaki as saying that the US "review is ongoing," though "we have not made a decision to put a blanket hold."

Reporting from Cairo, ABC World News (8/19, story 2, 2:00, Raddatz, 7.43M) said the situation is "fast becoming a simmering civil war," which could turn a "new generation" of Islamist militants "into fighters against not only the Egyptian military but the US as well." Reuters (8/20, MacDonald), for example, notes that the Kenyan branch of Somalia's Al Qaeda affiliate Al Shabaab said on its Twitter feed yesterday, "If ever there's a ripe moment 2 support Al-Qaeda, it's surely now. Raising the flag in Egypt in now a priority, Insha'Allah!"

The CBS Evening News (8/19, story 3, 3:05, D'Agata, 5.58M) showed "the bodies of 24 policemen killed by suspected Islamic militants in the Sinai" yesterday, and noted that 36 prisoners had previously "died in police custody under circumstances that are still unclear." Reporting on Monday's attack in the Sinai, the AP (8/20, Hendawi) says suspected Islamists "ambushed two minibuses carrying off-duty policemen" and forced them "to lie on the sand" before shooting them dead. Khalil al-Anani of the Middle East Institute in Washington tells the Wall Street Journal (8/19, El-ghobashy, Subscription Publication, 5.33M), "It is a new style of attack...and can't be separated from what's happening in Cairo. ... This could lead to a new kind of insurgency that would be difficult to control."

The Christian Science Monitor (8/19, Bryant, 564K) reports that the increase "in militant attacks in Sinai since the military deposed...Morsi...places additional strain on security forces already preoccupied with escalating political violence in Cairo and elsewhere."

Amid the continuing violence and uncertainty, Politico (8/20, Wright, 652K) describes Obama as “reluctant to exhaust his leverage” on the issue of aid, while Mark Thompson, writing for Time (8/19, Thompson, 13.36M), likens US assistance to “an IV” which is “designed to keep Egypt’s generals under some – increasingly limited – sway of the US government.” Thompson warns about “side effects,” namely placing the US in the middle of Egypt’s crisis which is likely to fray the ties between the two countries. In his Capital Journal column for the Wall Street Journal (8/19, Seib, Subscription Publication, 5.33M), Gerald Seib notes the same phenomenon, arguing that Obama’s apparent search for a compromise flies in the face of Egyptian generals’ determination to destroy the Muslim Brotherhood. Given this stark divergence, says Seib, losing US aid may not be too high a price to pay for the ruling military.

In fact, as Bloomberg News (8/19, Atlas, 1.41M) reports, Obama’s push “for political reconciliation with Islamist protesters...is being challenged by financial and political support from Middle East countries” such as Saudi Arabia, Kuwait and the UAE “pursuing their own stakes in Egypt’s future.” On its front page, the New York Times (8/20, A1, Nordland, Subscription Publication, 9.44M) calls Saudi Arabia, for example, “the foremost supporter of Egypt’s military rulers,” and says it is delivering “a blank check to Cairo” and “promising to shower it with money as needed.” The Saudis have “not only undermined Western efforts to press for compromise, but...also revealed diminished United States influence across the Arab world.” The Saudi actions, says the Washington Post (8/20, A1, Sly, 4.53M) in a front-page story, are “exacerbating a fierce struggle for influence in the chaotic and increasingly leaderless Arab world and putting the Saudis at odds with the” US. Foreign Minister Saud al-Faisal said yesterday, “Concerning those who announced stopping their assistance to Egypt or threatening to stop them, the Arab and Islamic nation is rich with its people and capabilities and will provide a helping hand to Egypt.”

As the Administration ponders its next steps, Roll Call (8/20, Dennis, Subscription Publication, 78K) reports, spokesman Josh Earnest said on Monday that it “has set aside the legal question of whether the military’s takeover...is a ‘coup.’” Instead, said Earnest, the ongoing analysis of US policy options are designed “to determine what impact” each course “would have on our national security, whether it’s in compliance with the law, and is it going to get us closer to seeing the kind of outcome in Egypt that we would like to see, which is the prompt return to a democratically elected civilian government.” Along those lines, notes The Hill (8/19, Sink, 322K), Earnest also said “senior administration officials...have made clear” to their Egyptian counterparts that “it is incumbent upon the interim government in Egypt to transition back to a democratically elected government.”

According to the AP (8/19, Klapper), a key factor for US policy-makers is “the specter of Benghazi.” Under this scenario, cutting US aid “could prompt Egypt’s ruling generals to scale back their protection of the US Embassy in Cairo and other diplomatic properties,” which “would be a political disaster for Obama.” Hagel also said on Monday, “We are concerned about our people. ... Protection of Americans in Egypt, not just only our diplomats but all Americans, is of the highest priority.”

Lauren Fox, in a blog post for US News & World Report (8/20, Fox, 595K), describes Obama’s policy so far as “a clever game of word avoidance,” despite the fact that “experts...agree” that a US law, the Consolidated Appropriations Act, “dictates the overthrow of a duly elected head of government” and “is enough to suspend aid.”

Poll: Majority in US Wants Aid Cut; Half Think Obama Not Tough Enough On Egypt. Politico (8/20, Arkin, 652K) reports that according to a Pew Research Center poll, 51% believe the US should cut aid to Egypt, while only 26% want to continue it. Meanwhile, “half of those surveyed thought...Obama has not been tough enough on Egypt,” 6% though “he has been too tough” and 12% “thought his reaction was about right.” Americans also favored the military over the Muslim Brotherhood by a 46%-11% margin.

Cutting Military Aid To Egypt Could Hurt US Jobs, Weapons Manufacturers. Noting the

debate over possibly cutting US military aid, the CBS Evening News (8/19, story 3, 3:05, Schieffer, 5.58M) said last night the issue "is more complicated than it might seem, and you may be surprised by who could be hurt if that happens." CBS (Quijano) noted that the aid "goes to places such" as a General Dynamics factory in Archibald, Pennsylvania that "makes parts for the M1A1 Abrams tank," and employs 135 workers. In fact, "44 companies in Pennsylvania alone involved in the production of the M1A1," which is called "the centerpiece of US aid to Egypt."

Politico (8/20, Wright, 652K) reports that last week the USAF "awarded a contract to General Electric," worth just under \$14 million, "to upgrade the Egyptian air force's fighter jets." Politico casts the award as "a tacit acknowledgment by the Pentagon that...for now it plans to maintain a relationship" with Egypt.

Journalist Mona Eltahawy, interviewed by Jake Tapper for CNN's The Lead (8/19), said, "The \$1.3 billion [from the US] that goes to the Egyptian army goes toward buying US-made weapons. It goes right back into the arms manufacturing industry in the US." Eltahawy continued, "So if you're seeing reluctance" to cut that aid "on the US side, you have to remember why: because the money goes back towards buying US weapons. So I think the US Administration...must not arm those who use those weapons against civilians, especially unarmed civilians."

Disappointed EU Foreign Ministers To Discuss Aid On Wednesday. The New York Times (8/20, Erlanger, Subscription Publication, 9.44M) reports that EU foreign ministers will meet Wednesday in an "emergency session" to discuss a possible suspension of aid to Egypt. The Times calls the military's crackdown on the Muslim Brotherhood "a devastating blow to European efforts to negotiate a political solution and fill a vacuum left by Washington," and notes that despite their best efforts and their "remarkable access to leaders of both" sides, foreign policy chief Catherine Ashton and her deputy Bernardino León have found little success in crafting a compromise. The Times quotes an unnamed "senior European official" as lamenting in an interview, "Unlike Washington, we were seen as having no historical baggage, no hidden agenda. ... That was the European advantage." León said yesterday, "There are no easy solutions, no easy way out. But the EU will keep striving for this."

Another story in the New York Times (8/20, A1, Kirkpatrick, Cowell, Nordland, Subscription Publication, 9.44M) notes that during an interview with the BBC, British foreign secretary William Hague said he "did not accept that outsiders were powerless to influence events." Added Hague, "We have to do our best to promote democratic institutions, to promote political dialogue and to keep faith with the majority of Egyptians who just want a free and stable and prosperous country. ... Foreign policy is often about striking the right balance."

Media Analyses: Mubarak's Release Could Exacerbate Crisis. Bloomberg News (8/20, El-Tablawy, El Wardany, 1.41M) reports that Cairo's criminal court yesterday ordered Mubarak's "release from prison," in a move that "threatens to inject new tensions in the standoff between the Muslim Brotherhood and the military-supported interim government." The CBS Evening News (8/19, story 3, 3:05, D'Agata, 5.58M) said the court's decision on Mubarak "came completely out of left field," though prosecutors "may bring other charges to keep him locked up for the foreseeable future."

The Wall Street Journal (8/19, El-Ghobashy, Coker, Subscription Publication, 5.33M) also notes that while the court found there was not sufficient evidence to hold the ousted ruler on the main corruption charges he was facing, other accusations remain outstanding. Among them, the Washington Post (8/20, A1, Sheridan, 4.53M) reports, are "charges in connection with the killing of hundreds of protesters in that Arab Spring revolt," though Mubarak "has been granted bond in that case, and a judge on Monday said he should be able to leave prison as he awaits another trial on corruption charges."

The Los Angeles Times (8/20, Fleishman, Abdulrahim, 3.4M) quotes Mubarak lawyer Farid Deeb as saying of his client, "He'll be out in a couple of days." The New York Times (8/20, A1, Kirkpatrick, Cowell, Nordland, Subscription Publication, 9.44M), however, notes on its front page

that according to "Egyptian state media" Mubarak "would remain in custody for another two weeks...before the authorities make a decision on his release." The AP (8/20, Hendawi), Reuters (8/20, Lyon, Alsharif) and the Washington Times (8/20, Chumley, 452K), among other news outlets, also note the news about Mubarak's release, casting the development as a potential new trigger for tensions in Egypt.

McClatchy (8/20, Youssef, Ismail, 49K), meanwhile, reports on a change in public opinion regarding the military and Mubarak, and profiles several Egyptians who once backed Morsi and now have nothing but anger toward the Brotherhood. In fact, adds McClatchy, "Egyptians largely welcomed news of Mubarak's potential release."

Brotherhood's "Spiritual Leader" Arrested; Morsi Charged With Role In 2012 Deaths, Torture. The Washington Post (8/20, A1, Sheridan, 4.53M) reports on its front page that last night security forces arrested "the spiritual leader of the Muslim Brotherhood," Mohammed Badie, who "was shown on state television being whisked away to prison in a car, sitting next to a security officer in a bulletproof vest."

AFP (8/20) reports that an Egyptian court yesterday accused Morsi of "complicity in the deaths and torture of protesters outside his presidential palace in late 2012, judicial sources said." The new charges "mean his current detention will be extended by 15 days started next week."

As Attacks On Christians Continue, Coptic Patriarch Praises Security Forces. The Washington Times (8/20, Chumley, 452K) reports on the growing number of attacks on Christians over the last few days, which include attacks and burnings of "dozens of churches and monasteries," the decapitation of "a Virgin Mary statue" and the killings of "several Christians."

Yesterday, AFP (8/20) reports, Catholic Coptic Patriarch Ibrahim Isaac Sidrak "said there were no real divisions between Christians and Muslims in Egypt," and "thanked the military and the police in Egypt 'for all their efforts in protecting the country.'" Said Sidrak, "This is not a political conflict between different factions but a struggle by all Egyptians against terrorism." AFP also notes the attacks on "dozens of Christian churches, schools and shops."

GM Reopens Egyptian Office, Factory. AFP (8/20) reports that General Motors said yesterday "it had reopened its office and factory in Egypt after shutting both down last week." AFP notes the company builds "light trucks, cars and minibuses in Egypt and employs more than 1,400 Egyptians."

Priceless Museum Artifacts Looted. The AP (8/20, Batrawy) reports on looting taking place in Egypt, leading to the loss of "a prized 3,500-year-old limestone statue, ancient beaded jewelry and more than 1,000 other artifacts in the biggest theft to hit an Egyptian museum in living memory."

Matthews, Davidson, Hayes: Crisis Puts Clinton, Obama's Foreign Policy In Negative Light. Appearing on MSNBC's Hardball (8/19, 689K), The New Yorker's Amy Davidson said Hillary Clinton's tenure as secretary of state "seems more and more now...about her and about her stature – and less and less about really crystallizing an Obama agenda, and so now his foreign policy feels really a little vacant, especially in the face of the crisis in Egypt." Chris Matthews added, "I think John Kerry is doing a hell of a job," doing "what she hadn't yet done. That's the fact." Matthews continued, "I get the feeling the President's become reactive. ... He gets a bad headline in the New York Times about the Egyptian military...and all of a sudden he has a press conference the next day, a reaction to editorial writing. That's dangerous when a president" is "simply reacting to events; that doesn't look strong."

The Weekly Standard's Steve Hayes, on Fox News' Special Report (8/19, 2.07M), said, "Any discussion about US policy in Egypt today has to start with failure of US policy in Egypt over the past couple years. The fact is, the President hasn't had a strategy. What we've been doing is basically ad hoc policymaking."

WPost, NYTimes Call For Ending Military Aid; Other Commentators Disagree. In an editorial, the Washington Post (8/20, 4.53M) says that Egypt's military-backed government "appears to have embarked on a frighteningly similar course" to Syrian leader Bashar al-Assad in response to protests – unleashing "unrelenting violence." The Post warns that it is "not only a moral challenge" to the US, it could lead to "civil war," "massive flows of refugees," and a new base for Al Qaeda. The Post says that the Administration should respond by suspending military aid.

In an editorial, the New York Times (8/20, Subscription Publication, 9.44M) says that a "surprising number of world leaders and foreign policy experts have effectively acquiesced in the continued brutality of Egypt's generals," their argument being that supporting the military is the "only way to restore stability." However, the Times says this is "certain to ensure more unrest, not less." The Times says that Obama's "muted chastising of the generals and his indecisive reaction to the slaughter does not inspire confidence." The Times says that the Administration should immediately suspend military aid.

In an op-ed for the New York Times (8/20, Subscription Publication, 9.44M), Steven Simon, the executive director of the International Institute for Strategic Studies-United States, says that "many Americans" are "outraged" that the Administration "has not exerted its supposed leverage, in the form of military aid, to pressure the Egyptian army to restore a democratic form of government." However, he says that the aid really doesn't give the US much leverage, and has "never succeeded in persuading Egypt's rulers to govern the way Washington wants."

In his column for USA Today (8/19, Wickham, 5.82M), Dewayne Wickham says that he is surprised that US politicians believe that the US can influence the Egyptian military at all by cutting off aid. He says "an end of U.S. aid won't force Egyptian soldiers back into their barracks, or return Morsi to that country's presidency."

In his column for the New York Times (8/20, Subscription Publication, 9.44M), Roger Cohen says that with the recent events, "Egyptian democracy was stillborn." For the US and Europe, he says it "amounts to a colossal strategic failure" and adds that "nothing — and certainly not the outcome in Afghanistan or Iraq — was more important than getting Egypt right." Cohen says that the Administration has "appeared hesitant and wavering, zigzagging from support for Morsi to acceptance of his ouster." Still, Cohen says that cutting off aid would not solve anything except to further reduce US influence.

In his column for the Wall Street Journal (8/20, Stephens, Subscription Publication, 5.33M), Bret Stephens says that if the US restricts military aid to Egypt, it will lose all influence with the military there and gain little. He argues that having the Egyptian military succeed as quickly as possible is the best of a group of bad outcomes for the US. He argues that if the Brotherhood wins, it would be a disaster for secular Egyptians and for US policy.

In an essay for the New York Times (8/20, Subscription Publication, 9.44M), Joe Sharkey writes that "global security and medical response companies" say that the increasing violence in Egypt have "reduced the number of foreign business travelers there to workers who are deemed necessary." They also say that they expect conditions to worsen, at least in the short term.

OBAMA PRODS TOP REGULATORS TO FINISH IMPLEMENTATION OF DODD-FRANK.

President Obama's Monday meeting with Fed Chair Bermanke, Treasury Secretary Lew and other top Administration officials regarding the pace of the Dodd-Frank Wall St. reform law's implementation did not generate any coverage on the network newscasts. Several outlets report that dissatisfaction within the Administration over the failure to put the Volcker Rule into place was among the topics covered Monday. On PBS's Nightly Business Report (8/20, 275), SEC chair Mary Jo White was shown being asked after the meeting, "What's the most important thing you still have to do on Dodd-Frank?" and replying, "Obviously, the Volcker Rule stands out."

At the opening of the lead story for NBR (8/20, 275), Tyler Mattheson said that upon returning from vacation, the President "got back to work," and "wasted no time tackling a topic of high interest to

investors, not to mention financial services executives." John Harwood went on to report that "only about 40% of the regulations" called for in the law "have been enacted or completed by the regulators," and so Monday's meeting was "a pep rally to try to get them to finish that job."

Earlier in the day, on CNBC's Closing Bell (8/20, 151K), Harwood, who is a columnist for the New York Times and chief Washington correspondent for CNBC, which produces the Nightly Business Report for PBS, paraphrased White as saying that the "top priority is the Volcker Rule." Harwood went on to note that the President is "also going to be giving speeches in upstate New York later in the week to try to push his vision of a middle-out economic growth agenda."

The New York Times (8/20, B1, Shear, Eavis, Subscription Publication, 9.44M) reports that Administration officials "have expressed frustration that critical parts of Mr. Obama's overhaul of the financial system...remain unenforced," and, "in particular, top presidential aides have highlighted the failure in putting the Volcker Rule into effect." The Times says the Volcker Rule "prohibit[s] banks from risking institutional money in certain speculative investments." The Times notes that in a speech last month, Lew "complained...that the regulators were moving too slowly to confront the dangers of banks that are so large that governments cannot allow them to fail for fear of bringing down the economy." Lew is quoted as having said, "If we get to the end of this year, and cannot, with an honest straight face, say that we've ended 'too big to fail,' we're going to have to look at other options because the policy of Dodd-Frank and the policy of the administration is to end 'too big to fail.'"

The progress of Dodd-Frank was also the lead story on Fox News' Your World (8/20, 1.3M). Host Neil Cavuto said, "Whether it's ATM surcharges spiking, or monthly checking account fees soaring, you are paying – to date – 77 different Dodd-Frank regulations," which have "cost consumers and businesses more than \$15 billion – and that is with only 40% of the...law in place." Fox Business Charlie Gasparino added that despite the costs, "we still have 'too big to fail.'" According to Gasparino, "There's nothing in the bill that stops bailouts," and, "as a matter of fact, there are bailout mechanisms." Gasparino added, "They should really break up these banks," but the President "shows no willingness to do that."

The AP (8/20, Kuhnhenh), in an article titled, "Obama Urges Regulators To Enact Wall Street Rules," reports that three years after its passage, implementation of Dodd-Frank is "behind schedule with scores of regulations yet to be written, let alone enforced," so the President met "privately with the nation's top financial regulators" and "prodded them to act more swiftly." Before the meeting, deputy White House press secretary Josh Earnest said the President wanted to express "the sense of urgency that he feels" about the issue. The AP goes on to report that an independent analysis has concluded that "so far, regulators have missed 60 percent of the rule-making deadlines." The AP notes that Republicans see the implementation delays as evidence of the law's overall shortcomings. Rep. Jeb Hensarling, chairman of the House Financial Services Committee, says, "Much like Obamacare, Dodd-Frank is an incomprehensively complex piece of legislation that is harmful to our floundering economy and in dire need of repeal."

The Wall Street Journal (8/20, Ackerman, Subscription Publication, 5.33M), in an article titled, "Obama Presses Regulators To Finish Financial Rules," includes a version of the same comment from Hensarling, and quotes Bair as saying, "It has astonished me, the lack of leadership, the lack of sense of purpose and direction." The Journal attributes much of the Dodd-Frank rulemaking delay to pressure from banking lobbyists. The Financial Times (8/20, Subscription Publication, 1.42M) has a similar report.

However, The Hill (8/20, Schroeder, Sink, 322K) reports that on Monday, Earnest insisted that the White House "is not disappointed with the pace of progress," saying, "We're certainly pleased with the level of cooperation and coordination that's taken place among these independent regulators, and the president wants to encourage them to capitalize on the momentum they've already built up to put this regulatory regime in place."

Under the headline, "Obama Asks Regulators To Speed Up Wall Street Reforms," Reuters (8/19,

Stephenson) reports that the White House released a statement after the meeting reading; "The president commended the regulators for their work but stressed the need to expeditiously finish implementing the critical remaining portions of Wall Street reform to ensure we are able to prevent the type of financial harm that led to the Great Recession from ever happening again."

MNI News (8/20, Gulino) reports that while the Treasury Department "is not formally taking credit for placing a meeting with every financial regulator right at the top of Obama's post-vacation schedule," Lew "has emphasized several times that he is making Dodd-Frank one of his top priorities."

Bloomberg News (8/20, Talev, Lerer, 1.41M) says the White House "provided no details on the discussion," but the statement released after the meeting disclosed that the President "also discussed the need for a simpler housing finance system 'that better serves middle-class families' and cooperation among agencies involved in financial market regulation." According to Bloomberg, in addition to the President, Bermanke and Lew, those present at the meeting included, "the Comptroller of the Currency, the director of the Consumer Financial Protection Bureau, the acting director of the Federal Housing Finance Agency, and the chairmen of the Commodity Futures Trading Commission, Federal Deposit Insurance Corp., National Credit Union Administration, and Securities and Exchange Commission."

NYTimes: JOBS Act Weakened IPO Regulations' Investor Protections. The New York Times (8/20, Subscription Publication, 9.44M), in an editorial notes that a year ago, the JOBS Act "sailed through Congress with the support of bipartisan majorities, President Obama and the banking industry." However the Times notes that at the time, there were "warnings that it would harm investors by weakening the standards" for IPOs, and the Times says "some of the predicted ill effects...are now coming to pass." According to the Times, "as public offerings have ramped up again on Wall Street...banks have clamored for looser restrictions and got them in the JOBS law." In Particular, the Times objects to the law "allow[ing] analysts to attend an investment banking pitch for a public offering of an 'emerging growth company.'"

Fed Demands Tougher Stress Tests For Some Banks. The Wall Street Journal (8/20, Crittenden, Subscription Publication, 5.33M) reports that the Federal Reserve released a study on Monday that showed that while some of the banks with the most complex operations have made good progress in preparing for market shocks since the financial crisis, there is still work to be done. The Fed wants executives to focus on more specific problems they may face, and test their readiness against them. The report said, "Bank holding companies, when considering their capital needs, should focus on the specific risks they could face under potentially stressful conditions."

Bloomberg News (8/20, Torres, Marcinek, 1.41M) reports that the study found that the "18 largest banks still fall short in at least one of five areas critical to risk management and capital planning." The study shows that after four recent stress tests, "some of the largest banks still lack comprehensive systems and policies to model, test, report and plan for economic calamities."

The New York Times (8/20, Eavis, Subscription Publication, 9.44M), in a more negative take on the study, says that "most" large banks "appear to have been sailing through the annual 'health checkups' they have had to undergo since the financial crisis." The Fed said that, for example, "some banks were not taking into account the possibility of falling house prices when valuing certain mortgage-related assets for the tests."

Lipsky: Public Resolution To Questions About AIG Dissolution Needed. In an op-ed for the Wall Street Journal (8/20, Lipsky, Subscription Publication, 5.33M), Seth Lipsky, editor of the New York Sun, writes that US Court of Federal Claims Judge Thomas Wheeler is seeking to have Bermanke testify under oath about the Fed's bailout of AIG in 2008 as part of a suit by former top shareholder Starr International, which was wiped out in the bailout. However, the Federal government has been fighting the move, warning that it would distract Bermanke from his primary duties. Lipsky says that Bermanke may have bent or broken the rules in the process, and the public deserves to know.

Reuters Analysis: Yellen, Summers Closer On Regulation Than Many Believe. Reuters (8/20, Saphir) says that as President Obama looks to select a replacement for Fed Chief Ben Bernanke, he should look beyond where the candidates stand on monetary policy and focus on how they rate as regulators. However, Reuters says that the difference between the two leading candidates, Janet Yellen and Lawrence Summers, may not be as sharp as some assume. While Yellen has historically been in favor of tougher regulation, Summers has been less consistently tough. Still, Reuters says that Summers did push for a crackdown on abusive lending, a key contributor to the financial crisis.

Rand Paul Expected To Play Major Role In New Fed Chair Confirmation. Politico (8/20, Lee, Burns, 652K) reports that if “you thought the debates over drones and surveillance were tailor-made” for Sen. Rand Paul (R), “just wait” until Obama selects a new Fed chief. The forthcoming debate “is both a golden opportunity and a test for the libertarian-leaning senator, who has long criticized Bernanke’s policies and the institution of the Fed.” Paul will need to “continue to rally his grassroots supporters” while not “turning off deep-pocketed GOP donors” in the financial services community.

STATE DEPT. OFFICIALS PUT ON LEAVE FOLLOWING BENGHAZI WILL NOT BE PUNISHED.

The Daily Beast’s (8/19, 928K) Josh Rogin reports that Secretary of State Kerry “has determined that the four State Department officials placed on administrative leave” by former Secretary of State Clinton in the wake of the Benghazi attack last September “do not deserve any formal disciplinary action and has asked them to come back to work at the State Department starting Tuesday.” Former Deputy Assistant Secretary of State Raymond Maxwell, described by Rogin as “the only official from the State Department’s Near Eastern Affairs bureau to lose his job over the Benghazi attack,” says he “received a memo from the State Department’s human resources department informing him his administrative leave status has been lifted and he should report for duty Tuesday morning.” Maxwell is quoted as saying, “No explanation, no briefing, just come back to work. So I will go in tomorrow.” An anonymous “senior State Department official” says the four will “not face any formal disciplinary action” although they “are not blameless and the fact that they will not be returned to the same positions is relevant.”

Boehner Faces Growing Pressure To Create Benghazi Investigative Panel. The Hill (8/20, Pecquet, 322K) reports in its “Global Affairs” blog that as the one-year anniversary of the Benghazi attack approaches, Speaker Boehner and other House Republicans are facing growing pressure “to create a special investigative panel.” A group of special forces veterans called Special Operations Speaks “has spent \$5,800 for three giant billboards scheduled to go up in Boehner’s district this week.” the billboards urge lawmakers to support a discharge petition to force “a vote on legislation from Rep. Frank Wolf (R-VA) that would create a special committee.” Another conservative group is planning “a day-long commemoration at the steps of the Capitol on Sept. 11.”

Claim That Missiles Bound For Syrian Rebels Were In Benghazi Noted. Instapundit’s Glenn Harlan Reynolds, in an op-ed for USA Today (8/19, Reynolds, 5.82M), says the Administration’s account of the terrorist attack in Benghazi “— successfully pushed off past the 2012 elections by scapegoating an obscure YouTube filmmaker — is looking worse and worse.” Reynolds notes that former US Attorney Joseph DiGenova, who is “representing a Benghazi whistleblower, even says that missiles were being funneled through Benghazi to the Syrian rebels and that 400 were stolen by Al Qaeda terrorists at the time of the attack.” Reynolds also notes that CNN “has reported that dozens of CIA agents were on the ground in Benghazi — and that they’re being pressured to keep quiet.”

Editorial Wrap-Up:

NEW YORK TIMES. “False Choices On Egypt.” In an editorial, the New York Times (8/20, Subscription Publication, 9.44M) says that a “surprising number of world leaders and foreign policy experts have effectively acquiesced in the continued brutality of Egypt’s generals,” their argument being that supporting the military is the “only way to restore stability.” However, the Times says

this is "certain to ensure more unrest, not less." The Times says that Obama's "muted chastising of the generals and his indecisive reaction to the slaughter does not inspire confidence." The Times says that the Administration should immediately suspend military aid.

"Back To The Future On Wall Street." The New York Times (8/20, Subscription Publication, 9.44M), in an editorial notes that a year ago, the JOBS Act "sailed through Congress with the support of bipartisan majorities, President Obama and the banking industry." However the Times notes that at the time, there were "warnings that it would harm investors by weakening the standards" for IPOs, and the Times says "some of the predicted ill effects...are now coming to pass." According to the Times, "as public offerings have ramped up again on Wall Street...banks have clamored for looser restrictions and got them in the JOBS law." In Particular, the Times objects to the law "allow[ing] analysts to attend an investment banking pitch for a public offering of an 'emerging growth company.'"

"Trifling With The Arts And Humanities." An editorial in the New York Times (8/20, Subscription Publication, 9.44M) criticizes the White House over the amount of time it is taking to nominate chairmen for the National Endowment for the Arts and the National Endowment for the Humanities, noting that while the "small-but-vital endowments" have acting leaders who are able, "interim bosses do not have the influence permanent leaders do." The Times stresses that as Republicans in congress threaten "major budget cuts that neither agency can easily absorb," a "strong voice at the top...would be particularly helpful."

"Riding And Raging On The Rail Road."

WASHINGTON POST. "What Egypt Needs." In an editorial, the Washington Post (8/20, 4.53M) says that Egypt's military-backed government "appears to have embarked on a frighteningly similar course" to Syrian leader Bashar al-Assad in response to protests – unleashing "unrelenting violence." The Post warns that it is "not only a moral challenge" to the US, it could lead to "civil war," "massive flows of refugees," and a new base for Al Qaeda. The Post says that the Administration should respond by suspending military aid.

"America's Weight Loss." The Washington Post (8/20, 4.53M), in an editorial, notes that the CDC just reported "that the obesity rate dropped among younger, poor children in 19 states and territories between 2008 and 2011," and just "three states saw increases." The Post says the findings are important because "public-health advocates have worried for years that the United States was entering an age of obesity," but it "may be reaching a plateau" instead. According to the Post, "It makes sense that adjusting the WIC program might have changed some people's behavior," and "meant that taxpayers would no longer fund the consumption of junk." The Post says Congress "should think about how it might change the broader \$75 billion food-stamp program along similar lines."

"Cuccinelli's Fuzzy Math." In an editorial, the Washington Post (8/20, 4.53M) criticizes Virginia Attorney General and Republican gubernatorial candidate Ken Cuccinelli's economic plan, which would cut "business income taxes by a third and personal income taxes by 13 percent." Noting that Cuccinelli "insists that, under his plan, revenue would hold steady and the state's already lean budget would be held harmless," the Post calls his plan "gobbledygook," unless "what he is really planning is a frontal assault on state spending," which would mean "eviscerating education, public safety, infrastructure and social services, which together account for a large majority of that spending."

THE WALL STREET JOURNAL. "The Die Harder States." In an editorial, the Wall Street Journal (8/20, Subscription Publication, 5.33M) criticizes states that have maintained an estate tax, despite the end of a provision in Federal law that offered a credit to offset them. In particular, the Journal is critical of Minnesota for expanding its tax. The Journal says the tax is particularly foolish because wealthy residents of states with significant estate taxes can simply change residency to states without them, to the detriment of the states they are leaving, whom the Journal says will be losing successful individuals.

“Perverse Effects.” An editorial in the Wall Street Journal (8/20, Subscription Publication, 5.33M) calls on Congress to end ethanol and biofuel subsidies, citing a report from the National Academies, which found that before it expired in 2012, the 45-cents-a-gallon ethanol tax credit was increasing carbon emissions by five million tons each year.

“Exposing Asbestos Fraud.” The Wall Street Journal (8/20, Subscription Publication, 5.33M) editorializes about a bankruptcy case in North Carolina. Garlock Sealing Technologies, a gasket manufacturer, was forced into bankruptcy in 2010 by asbestos claims, and the Journal contends that plaintiffs’ attorneys are asking a Federal judge to force Garlock to contribute \$1.3 billion into a bankruptcy trust for future asbestos claims. The Journal argues that evidence in the case has been sealed and kept from public view, and contends that such practices are violations of the public trust.

Washington Schedule:

TODAY'S EVENTS IN WASHINGTON.

White House:

PRESIDENT OBAMA —Receives the Presidential Daily Briefing, Oval Office, closed press; honors Super Bowl Champion Miami Dolphins and their undefeated 1972 season, East Room, open press.

VICE PRESIDENT BIDEN — No Public Events Scheduled.

US Senate: No Events Scheduled

US House: No Events Scheduled

Other: NORTHROP GRUMMAN – AIRCRAFT UNMANNED SYSTEMS — 8:30 a.m. Tom Vice, corporate vice president and president of Northrop Grumman Aerospace Systems, will discuss the promise of aircraft unmanned systems and describe Northrop Grumman's leadership in unmanned systems, a capability that is transforming military and commercial approaches to aerospace.

Location: National Press Club, 529 14th Street NW.

EMPLOYER HEALTH BENEFITS SURVEY — 11 a.m. The Kaiser Family Foundation and the Health Research & Educational Trust will hold a reporters-only conference call to release the 2013 Employer Health Benefits Survey. Participating in the briefing will be: Drew Altman, president and CEO of the Kaiser Family Foundation; study lead author Gary Claxton, a Kaiser vice president and director of the Health Care Marketplace Project; and Matthew Rae, a study co-author and Kaiser senior policy analyst.

EVANGELICAL IMMIGRATION AD CAMPAIGN — 11 a.m. Evangelical Immigration Table press call to launch immigration reform advertising campaign on Christian and talk radio.

CATO – SOCIAL SECURITY – DISABILITY BRIEFING — 12 p.m. Cato Institute hosts briefing on the rising costs of social security disability. Speakers: Tad DeHaven, Budget Analyst, Cato Institute; and Jagadeesh Gokhale, Senior Fellow, Cato Institute; moderated by Chris Edwards, Director of Tax Policy Studies, Cato Institute. Location: B-338 Rayburn.

CRIMINAL JUSTICE ACT — 3 p.m. – 5 p.m. The Federal Bar Association Criminal Law Section and The Law Library of Congress are hosting an event marking the beginning of a year-long commemoration of the 50th anniversary of the passage of the Criminal Justice Act. This landmark legislation secured the Sixth Amendment right to counsel in Federal court. Location: Library of Congress, James Madison Memorial Building, Montpelier Room (6th Floor, Yellow Corridor), 101

Independence Avenue, SE.

Last Laughs:

LATE NIGHT POLITICAL HUMOR.

David Letterman: "The Butler,' number one movie in the country. It's a story about a guy who spent his life getting coffee for the President. It's based on Joe Biden."

David Letterman: "Speaking of presidents, George W. Bush had heart surgery. I hope he's doing well. Doctors say he's resting comfortably, which is what he did for eight years in the Washington."

DOI in the News:

DOMINION POWER IS TOP BIDDER FOR VIRGINIA OFFSHORE WIND DEVELOPMENT LEASE News that Dominion Virginia Power had the winning bid in an Interior Department auction to lease an offshore area for wind power development received significant coverage in national and local outlets. The Washington Post (9/5, Bernstein, 4.53M) reports that the company's \$1.6 million bid won out over that of competitor Apex Virginia Offshore Wind, giving Dominion "the right to install wind turbines 27 miles off the" coast of Virginia Beach, where Interior officials say they will not be visible from land. According to Tommy Beaudreau, director of the Bureau of

Ocean Energy Management, Dominion can now lease the area for \$339,000 per year for 33 years. The Post quotes Mary C. Doswell, Dominion's senior vice president for alternative energy solutions, as saying, "Offshore wind has the potential to provide the largest scalable renewable resource for Virginia if it can be achieved at reasonable cost to customers."

A Washington Post (9/4, Szkotak) story notes that Dominion is already "involved with offshore wind research projects intended to lower the energy source's cost." It says the lease will become official after a Justice Department antitrust review, which could take one month. Dominion "will then have six months to submit a site assessment plan for the 112,800-acre area, which has the potential to generate 2,000 megawatts of electricity." A construction and operations plan must be submitted within five years, and "Dominion said it expects it will be a decade before the first turbine is installed in the area." The BOEM director Tommy Beaudreau called the auction outcome "a major milestone getting leases in the hands of operators we believe are in a position to do something with the leases and stand up wind generation facilities." The Sierra Club in Virginia also welcomed Dominion's win, calling on the company to continue moving from fossil fuels to renewable energy sources.

In its "E2 Wire" blog, [The Hill](#) (9/5, Colman, 322K) reports that the Obama Administration said "it's pleased with the start of its push to develop wind off the nation's coasts after an auction for a tract of ocean near Virginia netted \$1.6 million on Wednesday." In a statement, Interior Secretary Sally Jewell said, "This year's second offshore wind lease sale is another major milestone in the President's all-of-the-above energy strategy and demonstrates continued momentum behind a robust renewable energy portfolio that will help to keep our nation competitive and expand domestic energy production while cutting carbon pollution."

The [FuelFix](#) (9/4, 3K) reports that "although just two bidders participated in Wednesday's auction," BOEM Director Beaudreau said he was "very impressed" with the level of competition. As for "when it comes to the offshore Virginia wind lease auctioned Wednesday," Beaudreau stressed that the government "will be quite focused on ensuring diligent development in this area."

The Hampton Roads (VA) [Virginian Pilot](#) (9/5, Applegate, 441K) writes that "politicians and environmentalists" were touting "Hampton Roads as ripe to become a hub to support an offshore wind industry." The piece notes that Gov. Bob McDonnell released a statement saying that "Today is another great step forward in ensuring Virginia is the 'Energy Capital of the East Coast.'"

The Augusta (VA) [Free Press](#) (9/5, 280) also quotes McDonnell's statement: "I want to congratulate Dominion Virginia Power on winning the lease. ... Dominion is one of the largest energy producers in the country and a great corporate partner in Virginia. ... I want to thank Interior Secretary Sally Jewell and her team at BOEM for moving this project forward as part of a comprehensive approach toward meeting our nation's energy needs and creating more good jobs."

The Newport News (VA) [Daily Press](#) (9/5, 220K) quotes Sen. Mark Warner, who "called the lease acquisition an 'important milestone in the development of Virginia's renewable energy industry.'" He said it would help Virginia become a leader in the field while creating new jobs.

On the Huffington Post (9/4, Sheppard, 11.54M), Kate Sheppard wrote about the significance of Dominion's victory, noting that "renewable energy advocates are cheering" the fact that "a giant of coal-fired power won" the lease. Dominion spokesman Jim Norvelle told Sheppard that wind power is "just too big of a resource" to ignore. Referring to the company's current DOE-funded turbine project, Norvelle said of wind power, "Right now, it is expensive to do. ... That's why we're involved. We think it could be beneficial to customers if the price is right."

Other AP coverage appears in the Washington Post (9/4, Szkotak, 4.53M), NBC News (9/5, 6.68M), FOX News (9/4, 6.72M), WUSA-TV Washington (DC) Washington (9/5, 95K), WTOP-FM Washington (DC) Washington (9/5, 12K), WVEC-TV Hampton Roads (VA) Hampton Roads, VA (9/5, 53K), WAVY-TV Norfolk, VA (9/5, 49K), WVEC-TV Hampton Roads, VA (9/5, 53K), the Staunton (VA) News Leader (9/4, Szkotak, 9K), the Boston Globe (9/4, Szkotak, 1.53M), the Connecticut Post (9/5, Szkotak, 297K), the Greenwich (CT) Time (9/5, Szkotak, 27K), the U-T San Diego (9/4, Szkotak, 667K), the San Francisco Chronicle (9/5, Szkotak, 2.33M), the Seattle Post-Intelligencer (9/5, Szkotak, 800K), the Arizona Daily Star (9/5, Szkotak, 354K), the Las Vegas Sun (9/4, Szkotak, 179K), the Houston Chronicle (9/5, Szkotak, 1.97M) reports, the Minneapolis Star Tribune (9/5, Szkotak, 1.07M), the Miami Herald (9/5, Szkotak, 800K), the State (SC) (9/4, Szkotak, 306K), and the Bluefield

(WV) Daily Telegraph (9/5, 52K).

Also covering this story were Reuters (9/5), Bloomberg BusinessWeek (9/4, Drajem, 4.55M), Bloomberg News (9/5, Drajem, 1.41M), the Richmond (VA) Times-Dispatch (9/5, Bacque, 333K), WCAV-TV Charlottesville (VA) Charlottesville, VA (9/5, 210), The Hill (9/5, Colman, 322K), Law 360 (9/5, Sundar, 3K), Electric Light & Power (9/5), Electric Energy Online (9/5), Power Engineering (9/5), Penn Energy (9/5, 128), FuelFix (9/4, 3K), reNews (9/5), Recharge News (9/5, 633), Citybizlist (9/5, 3K), inhabitat.com (9/5, 62K), Daily Finance (9/4, 576K), Yahoo! Finance (9/5, 6.7M), and Yahoo! (9/5, Szkotak, 15.66M).

Broadcast coverage of the story included a WCAV-TV Charlottesville, VA (9/4, 11:07 p.m. EDT, 1K) report that "Dominion Virginia Power won rights to develop wind power on more than 100-thousand acres of coastline at an auction today. It will take several years to build the wind turbines, but they could generate enough power for 700,000 homes. Studies estimate the offshore wind industry would create around 10,000 jobs in Virginia."

WVBT-TV Virginia Beach, VA (9/4, 10:40 p.m. EDT, 28K) added on its broadcast that the lease cost Dominion \$1.6 million.

WDBJ-TV Roanoke, VA (9/4, 11:03 p.m. EDT, 41K), WAHUCA-TV Charlottesville, VA (9/4, 10:14 p.m. EDT), WBOC-TV Salisbury, MD (9/4, 7:01 p.m. EDT, 24K), WVIR-TV Charlottesville, VA (9/4, 6:11 p.m. EDT, 16K), WRIC-TV Richmond, VA (9/4, 6:09 p.m. EDT, 28K) and WAVY-TV Norfolk, VA (9/4, 7:48 a.m. EDT, 5K) also covered the story.

SECRETARY JEWELL: TIME TO ASSESS HAWAIIAN HOMELANDS TRUST. The AP (9/5, Mcavoy) reports that Interior Secretary Sally Jewell said Wednesday that "it's time to assess the Hawaiian homelands trust and to think about where it should be when the centennial of the Hawaiian Homes Commission Act arrives in eight years." While delivering the keynote address at the 12th Annual Native Hawaiian Convention, Jewell noted that "it's been 30 years since a federal task force addressed the topic in 1983." Jewell said, "We're mindful of a balance struck by Congress and a continuing need for Interior (Department) and the state to work collectively together." She also "repeatedly stressed how important it would be for the department to consult Native Hawaiians on issues like cultural resources, homelands and what people expect of the department."

Also reporting on the story are the Kaua'i (HI) Garden Island News (9/5, 33K) and the Hawaii News Now (9/5, 56K).

House Democrats Presses For Formal Tribal Recognition Of Native Hawaiians. The Washington Times (9/5, Richardson, 452K) reports that Hawaii Democrats are pressing for formal tribal recognition of Native Hawaiians, but "some Native Hawaiians are pushing back." According to the article, "advocates of Hawaiian independence have posted a petition on the White House's We the People website asking President Obama to reject Democratic pleas to grant them tribal status via executive order." The petition claims that the attempt to "transform our Hawaiian identity is an unconstitutional, race-based action; a clear breach and violation of our perfect right denying our due process under law."

CONTINUING COVERAGE OF SECRETARY JEWELL'S TRIP TO ALASKA. The Anchorage (AK) Daily News (9/4, 223K) reports that members of the Fish Basket Coalition "lobbied to keep Bristol Bay and the Bering Sea free from offshore oil and gas development" as Interior Secretary Sally Jewell departed from a press conference Tuesday morning.

Meanwhile, the Alaska Public Radio Network (9/4) reports that Jewell faces a "difficult decision" on the King Cove road.

DRAKES BAY OYSTER CO. TO CHALLENGE FEDERAL RULING. The Marin (CA) Independent Journal (9/5, Prado, 111K) reports that Kevin Lunny, the owner of Drakes Bay Oyster Company said Wednesday he will seek a rehearing of the federal appeals court ruling Tuesday that would force him to shut down. Lunny said that within 45 days his attorneys will file a petition for a hearing before the panel of the 9th Circuit US Court of Appeals in San Francisco. In a statement, Lunny said, "With the support of thousands of environmentalists, community members and elected leaders around the nation, we will continue to fight for what's right and remain committed to succeeding in our fight to remain open and serve our community."

Also providing coverage are [Reuters](#) (9/4, Hurley), the [Santa Rosa \(CA\) Press Democrat](#) (9/4, Kovner, 179K), the [Huffington Post](#) (9/4, O'Connor, 11.54M), the [SFist](#) (9/4, 32K), and the [SF Weekly](#) (9/5, 292K).

INTERIOR WARNS NEW UTAH HIGHWAY WOULD PERMANENTLY HARM WETLANDS. The [Salt Lake \(UT\) Tribune](#) (9/5, 396K) reports that the Interior Department says that the proposed West Davis Corridor freeway will "irreparably harm Great Salt Lake wetlands that are important to migratory birds," and is pressing "state officials to consider instead an alternative critics proposed to upgrade existing roads and mass transit instead." Federal officials wrote, "A new 4-lane freeway adjacent to the [Great Salt Lake] shore lands would have significant, irreparable impacts to the wildlife populations that rely on those habitats, would substantially degrade the value of that habitat, and would permanently alter the composition of the wildlife community in the area."

HOUSE NATURAL RESOURCES COMMITTEE MEMBERS HOLD FIELD HEARING IN WYOMING. The [Casper \(WY\) Star-Tribune](#) (9/5, 95K) reports that four members of the House Natural Resource Committee held a field hearing at the Wyoming Oil and Gas Conservation Commission building in Casper. Wyoming US Rep. Cynthia Lummis was joined by committee chairman Rep. Doc Hastings, Wash.; Rep. Doug Lamborn, Colo.; and Rep. Steve Daines, Mont. They accused the Obama Administration, the BLM, and the FWS of "allowing special interest groups to use litigation to dictate how federal agencies prioritize endangered species listings."

Meanwhile, the [Fairfield Sun Times](#) (9/3) interviewed Daines about energy development.

ADDITIONAL COVERAGE OF PACIFIC ISLANDS FORUM. Additional coverage of the Pacific Islands Forum was provided by [Yahoo! News New Zealand](#) (9/5, 1K), the [Global Post](#) (9/5, 93K), the [NZCity](#) (9/5, 1K), the [Islands Business](#) (9/5), and the [New Zealand Herald](#) (9/5, Davison, 601K).

ADDITIONAL COVERAGE OF FUNDING FOR TAMIAMI TRAIL. Additional coverage of the funding for Tamiami Trail was provided by the [Fort Myers \(FL\) Beach Bulletin](#) (9/5, 41K).

ADDITIONAL COVERAGE OF REPORT ON ENERGY BOOM'S IMPACT ON ECONOMY. Additional coverage of the IHS study on the energy boom's impact on the economy was provided by the [FuelFix](#) (9/4, 3K) and the [Reno \(NV\) Gazette-Journal](#) (9/5, 165K).

DIVERSE INTERESTS DISCUSS ISSUES ON COLORADO RAFT TRIP. In an op-ed for the [Summit \(CO\) Daily News](#) (9/5, Bennet, 36K), Sen. Michael F. Bennet writes that Dinosaur National Monument and the surrounding desert have "been the subject of a series of debates epitomizing the challenges that the state of Colorado faces." He notes that Anne Castle, assistant Interior Department secretary for water and science, was among those invited for a raft trip to consider "all these angels." Bennet concludes that "we proved something on our trip, something many of our leaders seem to have forgotten since the battle over Echo Park: When it comes to our natural resources, we're all in the same boat."

PROTECTION URGED FOR PUBLIC LANDS. The [Arizona Daily Sun](#) (9/5, 36K) editorializes that national parks are under pressure from "encroachment" and "development." The paper supports honoring "America's best idea" by keeping national parks "as natural as possible."

Meanwhile, in an op-ed for the [Denver Post](#) (9/4, Brass, 1.08M), Tim Brass, the Southern Rockies coordinator for the Backcountry Hunters & Anglers, urges protection for public lands from energy development, to keep hunting and outdoors activities intact.

COLUMNIST: NEVADA'S DISCLAIMER CLAUSE MEANS FEDERAL GOVERNMENT SHOULD "CLEAR OUT". In his column for the [Elko \(NV\) Daily Free Press](#) (9/5, Mitchell, 23K), Thomas Mitchell argues that the original intention of the Disclaimer Clause in Nevada's Constitution "seems pretty clear": "Obtain clear title. Sell the land. Divide the proceeds. Clear out."

EDITORIAL: ENERGY REVOLUTION TAKING PLACE DESPITE OBAMA'S POLICIES. In an editorial, the [Washington Examiner](#) (9/5, 294K) writes that the energy boom in the United States has not been a result of President Barack Obama's policies but rather "despite" them as "oil, natural gas and coal production are zooming upwards on private land, but plummeting on government lands." The Examiner believes that the "energy

revolution" is the "fruit of Americans working together voluntarily in the private sector. Think what they could do if Obama and the bureaucrats would get out of the way."

America's Great Outdoors:

National Park Service:

ASSAULT ON NPS EMPLOYEE HIGHLIGHTS CROSS-BORDER DANGER. The E&E Daily (9/4) reports that the assault on an NPS employee at Chiricahua National Monument last week is one of "several incidents" that highlight the "dangers faced by Interior Department employees who work along the front lines of the United States' border battle." The article notes that Border Patrol staffing levels are "increasing by leaps and bounds," which has had the effect of "diverting large amounts of illegal traffic to more remote federal land, including national parks and other Interior lands." Jon Andrew, the interagency borderlands coordinator for Interior, noted that cross-border incidents have fallen from a decade ago, but "he acknowledged that agency employees do continue to face threats from illegal drug and human trafficking coming from Mexico."

Also covering the assault are the Douglas (AZ) Dispatch (9/4, 5K) and the Willcox (AZ) Range News (9/5, 11K).

PUBLIC HEARING HELD ON KILLDEER MOUNTAINS POWER LINE. The Prairie Business (9/5, 55K) reports that a public hearing will be held on a proposal to construct a new transmission line that would go through the Killdeer Mountain Battlefield site. The line would run through the boundaries of a NPS study "led by North Dakota State University history professor Tom Isem, who characterizes the battlefield as the most significant historic site in the state."

The Bismarck (ND) Tribune (9/5, 34K) reports that Basin Electric Power Cooperative said Wednesday "it won't build a substation in the historic Killdeer Mountain battlefield area, but it's still planning to build a major transmission line through the heart of where the battle was fought." The plans were "detailed in a hearing that started in the morning and ended in the evening at Killdeer, just miles from the controversial location."

Also reporting on the story is the Dickinson (ND) Press (9/5, 360).

ILLEGAL POT FARM RULED OUT AS CAUSE OF RIM FIRE. The Los Angeles Times (9/4, Bloomekatz, Sema, 3.4M) reports that Jerry Snyder of the U.S. Forest Service said Wednesday that the massive Rim fire burning into Yosemite National Park was "probably not caused by an illegal marijuana farm, despite earlier comments made by a local fire chief." According to the article, "the rumor that marijuana growers may have been involved began when Twain Harte Fire and Rescue Chief Todd McNeal told a community meeting that the blaze was definitely human-caused." However, Snyder said that "at this point in their review, investigators have not found any evidence that marijuana was grown in the area where the fire probably started Aug. 17."

ARREST OF PROTESTER ON INDEPENDENCE MALL CAUSES STIR ONLINE. KYW-TV Philadelphia (9/4, 45K) reports that footage of NPS police "arresting a protester on Independence Mall last Friday," is "causing a stir online" and assisting "the young woman raise money for her defense fund." The video of protester, Emily Yates, an Army veteran who served two tours in Iraq, "has been viewed nearly 100,000 times and helped Yates raise more than \$12,000," but NPS spokesperson Jane Cowley "says it doesn't show the whole story." Cowley said, "She did kick, strike and spit on uniform park rangers."

BI-COUNTY PARKWAY OPPONENTS URGE GOV. MCDONNELL TO SLOW ROAD. The Washington Post (9/5, Borden, 4.53M) reports that in a letter, a contingent of 13 Northern Virginia elected officials urged Gov. Robert F. McDonnell to "slow plans for a controversial parkway that would connect Prince William and Loudoun counties." The officials are "all in agreement that the proposed Bi-County Parkway would worsen traffic and quality of life for the area's residents," according to Del. Timothy D. Hugo. Also, "residents worry about their home values and the integrity of Prince William's protected rural area, which sits adjacent to the Manassas National Battlefield Park."

FLIGHT 93 ADVISORY COMMISSION TO DISBAND. The Indiana (PA) Gazette (9/5, 42K) reports that the Flight 93 Advisory Commission is disbanding. The commission has "met four times a year since being sworn in nearly

10 years ago," and "its last meeting will be Sept. 10, the day before the 12th anniversary of the attacks." Jeff Reinbold the National Park Service superintendent at the memorial, said, "This is a sign of success."

ENVIRONMENTAL GROUP PROTESTS USE OF CHEMICALS IN SANTA MONICA MOUNTAINS. The Malibu (CA) Times (9/5, 35K) reports that "citing the growing threat of non-native plants to the local ecosystem," the NPS is formulating a "master plan to combat the trend in its Santa Monica Mountains that could include the use of herbicides." However, in Topanga, an environmental group is "arguing the use of herbicides would harm the environment worse than encroaching non-native plants."

PENNSYLVANIA LEGISLATURE RECOGNIZES DELAWARE WATER GAP NATIONAL RECREATION AREA SUPERINTENDENT. The Pocono (PA) Record (9/5, 47K) reports that Delaware Water Gap National Recreation Area Superintendent John Donahue was "presented with a citation of recognition Wednesday by state Rep. Rosemary Brown, R-189." The recognition, "from the state Legislature, acknowledges Donahue as an energetic leader in partnerships and conservation." The citation says, "He provides active influence and support to ensure the protection of scenic, natural and cultural resources under his care within the Poconos region. His efforts toward watershed preservation and river monitoring have led the way for the middle Delaware River to be noted for having pristine water quality and providing clean drinking water to more than 16 million consumers."

YELLOWSTONE'S BISON POPULATION INCREASED. The Laurel (MT) Outlook (9/5, 9K) reports that Yellowstone National Park has finished its annual summer bison population abundance monitoring. According to the article, the population is estimated to be 4,600 bison. The numbers "represent an increase of 8.75 percent over last year's count."

Bureau of Land Management:

REP. GRIJALVA TOURS WILD HORSE CORRALS IN NEVADA. The Los Angeles Times (9/4, Glionna, 3.4M) reports that Rep. Raul M. Grijalva toured the BLM's temporary holding facility in Palomino Valley with wild horse advocates on Wednesday. Brandon Bragato, a senior legislative assistant for the congressman, said, "The congressman has been tracking the wild horse and burro issue for pretty much the entire time he's been on committee, over the last 10 years. He's concerned with the way the BLM is managing these animals and the techniques they're using to restrict herd size on the range. He wants to take a look at the program."

The Fresno (CA) Bee (9/4, 324K) reports that Grijalva said Wednesday that "he wants to work with" the "well-meaning" BLM to "overcome decades of mismanagement of wild horses and fix outdated, 'broken' roundup policies he says prioritize livestock over mustangs." Grijalva said, "It's not a question of blame. It's a question of a policy and management strategy that has consistently failed in preserving and sustaining the wild horse legacy of this country." Grijalva said he "hopes to work with BLM to develop legislation that would lead to a 'sound management plan with the maximum amount of habitat that the wild horses use ... as opposed to a management plan that is constricted around holding pens.'"

The Arizona Daily Star (9/5, 354K) reports that BLM spokeswoman Erica Szlosek said the bureau welcomes the Grijalva's visit. Szlosek said, "The NAS (National Academy of Sciences) report did not call for an end to the gathers. It looked at different options on the range, population control, growth depression, those kinds of measures." She added, "We've been reading the report, and we are parsing out chapter by chapter different parts to different specialists at BLM to look at the range of possibilities."

Also reporting on the story are the Albuquerque (NM) Journal (9/5, 290K), the Springfield (OH) News Sun (9/5, 58K), the Contra Costa (CA) Times (9/5, Sonner, 309K), KTAR-FM Phoenix (9/5, 8K), KOLO-TV Reno, NV (9/5, 2K), and KTVN-TV Reno, NV (9/5, Bennett, 3K).

BUDGET CONSTRAINTS FORCE BLM TO SCALE BACK FIRE REHAB IN NEVADA. The Jamestown (ND) Sun (9/5, 1K) reports that budget constraints are "forcing" the BLM to "scale back wildfire rehabilitation plans" in Nevada, "including some habitat deemed important to sage grouse." The BLM "recently identified more than \$3.2 million worth of potential restoration work to be done in southern Douglas County where the Bison Fire burned nearly 38 square miles last year," but bureau officials say "they'll only be able to spend about \$1 million on the effort in the coming year due to increased demand and dwindling resources after last year's big fire season."

JUDGE SIGNS OFF ON DEEP CREEKS ROAD CONSENT DECREE. The [Salt Lake \(UT\) Tribune](#) (9/5, 396K) reports that Juab County has “assumed responsibility for strictly regulating ATV use in the Deep Creek Mountains under a consent decree settling its long-standing road dispute” with the BLM. The accord, signed last week by US District Judge Tena Campbell, “memorializes an agreement the county and state of Utah reached with the federal government and three environmental groups to resolve the question of who controls three primitive routes up canyons on the West Desert range’s east slope.”

HEARING SET FOR PROPOSED TRANSWEST POWER LINE. The [St. George \(UT\) Spectrum](#) (9/4, 48K) reports that the BLM is taking public comment on its draft environmental impact statement for the Transwest Express Transmission Project. The line was “originally proposed to pass through Washington County,” but the BLM’s proposed alternative is “to move the line out of Utah’s western border before getting to Washington County, avoiding potential impacts to natural or cultural resources such as roadless parts of the Dixie National Forest and the Mountain Meadows National Historic Landmark.” The BLM and Western Area Power Administration have “hosted a series of public meetings, with two more scheduled, one tonight in Cedar City and another Friday in St. George.”

BLM TO CLOSE BEAVER CREEK ROAD. The [Twin Falls \(ID\) Times-News](#) (9/5, 56K) reports that the BLM’s Shoshone Field Office will close the Little Beaver Creek Road. The article notes that “a portion of the road was recently covered by a land slide due to soil instability and the recent rain fall,” which “has caused the road to be impassable, posing a risk to public safety.”

PRESIDENT OF AMERICAN CHEMICAL SOCIETY WARNS OF HELIUM SHORTAGE. In an op-ed for the [San Jose \(CA\) Mercury News](#) (9/5, Wu, 835K), Marinda Li Wu writes, president of the American Chemical Society, writes that “due to a lack of political will among our nation’s elected officials and miscommunication with business leaders, the world’s helium supply is suddenly at risk.” Wu notes that in an August 12 letter from BLM to Praxair, the bureau “states that it will not be able to provide helium if Congress does not fund the Federal Helium Program beyond Oct 7.” Wu urges Congress to “present a bipartisan agreement that will allow the Federal Helium Program to continue operations for the time being.”

Fish and Wildlife Service:

HATCHERY FUNDING RESOLUTION STUCK IN HOUSE SUBCOMMITTEE. The [Baxter \(AR\) Bulletin](#) (9/4, 28K) reports that a Congressional resolution that could provide “continuing funding for 18 federal mitigation-of-species fish hatcheries is stuck” in a subcommittee of the US House of Representatives Committee on Natural Resources. The article notes that Rep. Rick Crawford and staff are shopping the legislation “aggressively for cosponsors among other House members.”

In an editorial, the [Rapid City \(SD\) Journal](#) (9/5, 93K) questions the “apparent decision” by the FWS to “target fish hatcheries if it loses funding in its 2014 budget.” The paper hopes the state’s congressional delegation “asks questions” of the FWS and “urges it to keep its fish hatcheries open, particularly the D.C. Booth Historic National Fish Hatchery.”

US Geological Survey:

EXPERTS SAY ALASKAN QUAKE COULD LEAD TO CALIFORNIA TSUNAMI. The [San Francisco Chronicle](#) (9/5, Perlman, 2.33M) reports that “a giant tsunami spawned by a huge Alaskan earthquake could hit the California coast,” according to a report from USGS experts and state and national specialists. The scenario proposes a “hypothetical but plausible” event involving a magnitude 9.1 quake. The USGS authors wrote, “Although this pales in comparison to the loss of lives and property in Japan, the US government must ask whether California, and the national economy, will someday face worse consequences from other distant-source tsunamis. Unfortunately the answer is ‘yes.’”

Securing America’s Energy Future:

Renewable Energy:

BLM SCHEDULES PUBLIC MEETING ON BLYTHE SOLAR PROJECT. The Asheville (NC) Citizen-Times (9/3, 162K) reports that the BLM has scheduled a public meeting on NextEra Energy's Blythe solar project on September 17.

Also reporting on the story is the Palo Verde Valley (CA) Times (9/5, 11K).

Onshore Energy Development:

BLM NARROWS PROPOSED CHACO DRILLING SITES TO FOUR. The Durango (CO) Herald (9/4, 28K) reports that the BLM has "released an environmental assessment that proposes to lease four of 38 parcels" near Chaco Culture National Historic Park that were "nominated by gas and oil companies" The article notes that "none of the parcels recommended by the BLM's preferred alternative to go forward is among the nominated parcels closest to the park."

OIL, GAS LEASING PLAN MAY IMPACT UTAH LAND DEAL. The High Country (CO) News (9/5, Keller, 74K) reports that the San Rafael Swell, the Book Cliffs, Desolation Canyon and the areas around Canyonlands National Park "lack federal protections," and "they've been land management battlegrounds for decades," but Congressman Rob Bishop "is working to broker a big federal land management deal, and find some closure on decades of acrimony over land use." The piece notes that "there are two new wrinkles in protecting wilderness values in the San Rafael Swell and the Book Cliffs," as "the Bureau of Land Management and Utah's school land trust are offering up nearly 236,000 acres of their respective lands for potential oil and gas leasing, making the push for Congressional action to protect red rock country even more urgent."

JUDGE SIDES WITH NORTH DAKOTA PSC IN SURFACE MINING LAWSUIT. The Bismarck (ND) Tribune (9/5, 34K) reports that on Tuesday, US District Judge Daniel Hoiland "sided with the North Dakota Public Service Commission" after the Dakota Resource Council and the Sierra Club "claimed the commission had provided written guidance to mine operators, which they alleged was a violation of the federal surface mining program." Hoiland ruled "that the Dakota Resource Council's claims were vague and without merit." Furthermore, "the Secretary of the Interior had intervened in the lawsuit on the PSC side."

Offshore Energy Development:

WATSON REFLECTS ON TIME AT BSEE. Environment & Energy Publishing (9/5, 705) reports that James Watson, the former head of the Bureau of Safety and Environmental Enforcement, will now serve "as president of the Americas division of the American Bureau of Shipping." Watson recently "reflected on his time helming BSEE," saying that "though proud of what BSEE has accomplished during its short time of existence, he acknowledged that there was still much left to be done but said he feels the agency is on the right track."

Tackling America's Water Challenges:

ARIZONA, NEVADA MAY HAVE WATER DELIVERIES CUT IN 2016. The Laughlin (NV) Times (9/4, 23K) reports that the Bureau of Reclamation is "giving Arizona and Nevada a 50-50 chance of having water deliveries cut in 2016." The piece notes that "bureau officials and environmentalists have been raising alarms in recent months about demand outstripping supply on the river serving about 40 million people in seven states and cities including Los Angeles, Phoenix, Denver and Las Vegas."

The Moapa Valley (NV) Progress (9/4) reports that the Bureau of Reclamation proposal "is something that has never happened before."

The Business Journal (CA) (9/5) also reports this story.

ADDITIONAL COVERAGE OF BAY DELTA CONSERVATION PLAN. Additional coverage of the Bay Delta Conservation Plan was provided by the Central Valley (CA) Business Times (9/5, Beley, 206).

Empowering Native American Communities:

ENVIRONMENTAL BATTLEFIELDS IN INDIAN COUNTRY DETAILED. The Indian Country Today Media Network (8/27, 11K) reports on "some of the most environmentally embattled hot spots in Indian country." These include "Havasupai Tribe Challenges Grand Canyon Uranium Mine" and "Lummi Stand Firm Against SSA Marine's Proposed Cherry Point Coal Terminal."

GROUP SEEKS COMPENSATION FOR CLEANING UP ALASKA. KTUU-TV Anchorage, AK (9/4, 19K) reports that the Alaska Native Village CEO's Association "estimates there are 650 contaminated sites around Alaska, affected by everything from military sites to mines." Association founder Maver Carey said "top officials from her organization will meet" with the BIA in Washington, D.C. September 16 to discuss "getting compensation for cleaning up these areas." Carey said, "I think it's going to be a battle, I really do. This is a federal government issue, I don't think when we come back from DC in two weeks, there's going to be shining stars."

COURT RULES TRIBE PROPERLY DENIED FEDERAL FUNDING FOR POLICE FORCE. Courthouse News (9/4, 3K) reports that on Wednesday, the 9th Circuit ruled that "despite high crime rates on Indian reservations nationwide," the Los Coyotes Band of Cahuilla and Cupeno Indians "had been properly denied federal funding for a police force." The community "sued the secretary of the Interior and others after the Bureau of Indian Affairs (BIA) denied the tribe's request for \$746,110 to enhance its police force, which currently consists of one part-time officer."

ATTORNEYS OFFER CONFESSIONS AS EVIDENCE IN SPIRIT LAKE INDIAN RESERVATION KILLINGS. The AP (9/5) reports that on Wednesday, "attorneys in the case of a North Dakota man on trial for killing two children on the Spirit Lake Indian Reservation offered separate confessions as evidence," and also "disagreed over the significance of a palm print and DNA sample." The piece notes that the trial "comes as the tribe is trying to overhaul its child protection system," as the "U.S. Bureau of Indian Affairs stepped in last October to bolster and oversee the system."

Top National News:

OBAMA SAYS "THE WORLD," NOT HE, SET "RED LINE" REGARDING CHEMICAL WEAPONS. Nearly all the coverage of President Obama's appearances in Sweden Wednesday put the trip in the context of the debate over potential US involvement in Syria's civil war, with a focus on the President's argument that the "red line" he has vowed to enforce in regards to the use of chemical weapons is matter of longstanding international precedent, not his own creation. Many reports also highlight Russian President Putin's continued insistence that the US has failed to prove that the Assad regime carried out a chemicals weapons attack on August 21, and his claim that Secretary of State Kerry, who on Wednesday estimated that 15% to 25% of the Syrian rebels are Islamic extremists, is actually underestimating the proportion of the fighters with ties to Al Qaeda and other like-minded groups.

Coverage of Syria remained extremely heavy, with the three broadcast networks offering more than 20 minutes of combined coverage. CBS and NBC, which each opened with the story, had about nine and eight and one-half minutes respectively, while ABC had about four and one-half minutes of coverage. Print coverage is also heavy, with the New York Times and Washington Post each running two front-page stories, and the Los Angeles Times and Wall Street Journal among the other major newspapers also running front-page reports.

Diane Sawyer, on ABC World News (9/4, story 2, 2:10, 7.43M), said Obama and Putin are "taking opposite sides on Syria and in 24 hours they will be face to face." Jonathan Karl went on to report that in Sweden Wednesday, the President "said responding to Syria's chemical weapons attack is now more than just his leadership." President Obama was shown saying, "My credibility is not on the line. The international community's credibility is on the line and America and Congress's credibility is on the line. ... I didn't set a 'red line'; the world set a red line." Karl added that Putin "is once again standing in opposition," accusing Kerry "of lying about Syria," and "suggesting it was Syrian rebels, not the government, who used chemical weapons." On the CBS Evening News (9/4, story 2, 2:15, 5.58M), Major Garrett clarified that Putin accused Kerry of "appearing to minimize the role of Al Qaeda-backed fighters in the Syrian opposition."

Scott Pelley, on the CBS Evening News (9/4, story 2, 2:15, 5.58M), said the President "has made a point of staying out of the two-year-old Syrian civil war, but a year ago he warned the Syrian dictator that a 'red line' would be crossed if the dictator used chemical weapons." The President was then shown saying on Wednesday: "I didn't set a 'red line.'"

Jonathan Allen, in a piece for Politico (9/5, Allen, 652K) titled "Obama Reframes 'Red Line' Rhetoric," says the President's claim "shocked critics of his Syria policy, prompting an immediate response – online and off – that demonstrated just how much his credibility is on the line." Allen notes that on Twitter, "the hashtag #whosaidobamasredline began trending soon after Obama spoke." Allen notes that at a House Foreign Affairs Committee hearing, Rep. Brad Sherman (D-CA) said, "The President drew a red line...when the President drew that red line." And Sen. Saxby Chambliss is quoted as saying, "He needs to go back and read his quote."

Brian Williams, on NBC Nightly News (9/4, story 2, 2:05, 7.86M), said there is "pressure on the President to take his case directly to the American people, even as he takes the case to the world stage." Chuck Todd also reported that "the pressure on the President to speak publicly in some sort of official form prime-time address, Oval Office-style address to the nation" in order to "give political cover to a bunch of House Democrats, a lot of [whom] got elected on being anti-war, anti-Iraq."

USA Today (9/5, Davis, 5.82M) notes that on Wednesday at a House hearing, Kerry was "asked...whether Obama intends to address the nation before Congress votes next week," and Kerry answered, "I have no doubt the president will."

The New York Times (9/5, Baker, Subscription Publication, 9.44M) reports from Stockholm that on Wednesday, the President "laid blame for the Aug. 21 attack directly on Mr. Assad," although "American intelligence has not disclosed any evidence that Mr. Assad personally ordered the use of sarin." According to the Times, the President's "language on Wednesday appeared to go a little further in singling out Mr. Assad" when he said, "We believe very strongly with high confidence that in fact chemical weapons were used and that Mr. Assad was the source." Nevertheless, Putin "scoffed at the notion that the Syrian government was responsible for the chemical attack, calling it 'utter nonsense,' and suggest[ed] that it was a provocation by rebels eager to draw the United States into their civil war." The Times adds that Putin also "pointedly recalled the false Iraq intelligence" used by the Bush Administration to secure support for their invasion of Iraq, asking rhetorically, "Did we forget about that?"

The Washington Post (9/5, A1, Rucker, Englund, 4.53M) reports on its front page that at a joint news conference in Stockholm with Swedish Prime Minister Fredrik Reinfeldt, the President argued that "the moral thing to do is not to stand by and do nothing," but, according to the Post, "the challenge of marshaling global support...was made clear by Reinfeldt, who agreed with Obama that the use of chemical weapons was unacceptable but added that Sweden...could not come out in support of a unilateral response." The Post goes on to report that the President "indirectly drew a parallel to the Holocaust, and later paid tribute to the late Swedish humanitarian Raoul Wallenberg at a nearby Stockholm synagogue and Holocaust memorial."

The Wall Street Journal (9/5, Favole, Nelson, Subscription Publication, 5.33M) reports that also on Wednesday, the President reiterated his contention that he was not required to seek Congressional authorization for strikes against Assad, but added, "We will be stronger as a country in our response if the president and Congress does it together." the President is quoted as saying, "As commander in chief I always preserve the right and the responsibility to act on behalf of America's national security. I don't believe that I was required to take this to Congress. But I did not take this to Congress because I think it's an empty exercise."

The Washington Times (9/5, Wolfgang, 452K) reports that during the press conference in Stockholm on Wednesday, the President "was asked the bigger-picture question of how he's reconciling his calls for military strikes with the fact that he was awarded a Nobel Peace Prize in 2009 – an award he told reporters he felt 'unworthy' of when compared to past recipients." In response, the President, "speaking deliberately...described how the Syrian conflict is just the latest example of 'the challenge all of us face when we believe in peace but we confront a world that is full of violence.'"

More Commentary On Syria. In a highly critical editorial headlined "Blurred Red Lines," the Wall Street Journal (9/5, Subscription Publication, 5.33M) says the President remark that he "didn't set a red line" shows that the

President has yet to realize or accept that the US is the only nation capable of enforcing order in the world, and that it is his credibility and that of the US, and not that of the international community, that will suffer from inaction.

Robert Samuelson writes in his Washington Post (9/5, 4.53M) column that "perhaps the most misleading phrase in the debate over Syria is 'war weary.'" He asks, weary "of exactly what? The truth is that for most Americans, the constant combat has imposed no burdens, required no sacrifices and involved no disruptions. ... Whatever we do in Syria must spring from a sober calculation of national interest so that it commands broad public support," and not determined by "an exaggerated and artificial sense of 'war weariness.'"

In a Washington Post (9/5, Miller, 4.53M) column headlined "Six Qualms About Syria," Matt Miller wonders why the US was not concerned about "the first 100,000" killed in Syria, the possible "August 1914 analogy" of "unintended consequences" leading to a wider Middle East war, whether the threat of action is due solely to President Obama's "'red line' remark," why the US has few international partners as it did in Libya, what the crisis says about the President's "basic leadership skills," and how Obama is responding to "the unique burden of the presidency" that forces American leaders to make such choices on behalf of the world.

Karl Rove, in his column for the Wall Street Journal (9/5, Subscription Publication, 5.33M), accuses the President of antagonizing Congress even as he lobbies on behalf of the Syria resolution. Rove says the President ought to be making the case that if the US does not force Assad out of power, it will be a win for Iran and Russia, among others.

The Weekly Standard's Stephen Hayes, in an op-ed for the Wall Street Journal (9/5, Subscription Publication, 5.33M) titled "The Hawk's Case Against Obama On Syria," notes that the President did not seek Congressional authorization before ordering US military assets to be used against the Gadhafi regime in Libya in 2011, and suggest that he is only doing so now so that Congress will share in the responsibility for the decision, unpopular with the public, to involve the US in Syria civil war. Hayes goes on to argue that the resolution before Congress is too narrow, and urges Republicans to vote against anything short of a mandate for regime change in Syria.

SENATE COMMITTEE APPROVES SYRIA RESOLUTION ON 10-7 VOTE. USA Today (9/5, Korte, 5.82M) reports that on a 10-7 vote Wednesday, the Senate Foreign Relations Committee "voted to authorize President Obama to use limited force against Syria...after adopting amendments from Sen. John McCain designed to urge Obama to 'change the military equation on the battlefield.'" Voting in favor were Democrats Barbara Boxer, Ben Cardin, Chris Coons, Richard Durbin, Tim Kaine, Robert Menendez, and Jeanne Shaheen, and Republicans Bob Corker, Jeff Flake, and John McCain. Voting against were Democrats Chris Murphy and Tom Udall, and Republicans John Barrasso, Ron Johnson, Rand Paul, James Risch, and Marco Rubio. Democratic Sen. Edward Markey voted present.

Jonathan Karl, on ABC World News (9/4, story 2, 2:10, 7.43M), reported that the bipartisan opposition on display Wednesday "suggest[ed] a tough battle ahead." The AP (9/5, Espo, Cassata) reports that "political fault lines were clear on a military action that polls show a war-weary public opposes," and notes "among Republicans, opposition came from lawmakers with the closest ties to tea party activists, including" Paul and Rubio, "both presidential aspirants." The AP reports that Paul "has threatened a filibuster." The Los Angeles Times (9/5, Richter, 3.4M) notes that "liberal" Sens. Murphy and Udall opposed the resolution.

McClatchy (9/5, Rosen, Douglas, 49K) also says the vote "indicated deep divisions within Congress," and quotes Paul as saying, "I see a horrible tragedy, but I don't see that our involvement will lessen the tragedy. I think it may well make the tragedy worse. I think more civilian deaths could occur. I think an attack on Israel could occur. I think an attack on Turkey could occur. I think you could get more Russian involvement and more Iranian involvement. I don't see anything good coming of our involvement."

The Washington Post (9/5, Gearan, O'Keefe, Branigin, 4.53M) reports that in a hearing Wednesday, Menendez, the chairman of the committee, insisted that the resolution was "'tightly tailored' to give the president the necessary authority but 'does not authorize' the use of US ground troops in Syria." The Post also reports that Menendez's panel "rejected, by a 14-4 vote, an amendment from" Paul "that would have imposed further restrictions by invoking provisions of the 1973 War Powers Resolution," and "approved a McCain amendment aimed at strengthening the moderate rebel groups fighting Assad."

The New York Times (9/5, Weisman, Subscription Publication, 9.44M) notes that the amendment backed by McCain, which was also sponsored by Coons, "reiterated that 'it is the policy of the United States to change the momentum on the battlefield in Syria,' urging 'a comprehensive US strategy' to not only degrade the government's weapons of mass destruction but also to improve the fighting abilities of 'elements of the Syrian opposition.'"

The Washington Times (9/5, Dinan, 452K) notes that an amendment from Udall "to specifically limit attacks to naval or air power outside Syria was defeated overwhelmingly," after McCain warned, "We start down this road, we are going to be running the campaign from here, and as smart as we are, I don't think we are that smart."

According to the Huffington Post (9/5, McAuliff, 11.54M), prior to the vote, the senators on the panel "attended a classified briefing" from Kerry and Defense Secretary Hagel "that ended up running nearly four hours."

Murphy, in an appearance on MSNBC's Rachel Maddow Show (9/5, 267K), said his vote Wednesday was a "close call," but that he is concerned that "military action could perhaps actually make the situation worse." Murphy went on to say that he also objected to the resolution because it "committed the Congress to supporting arming of the rebels."

According to Politico (9/5, Kim, Everett, Raju, 652K), DNI Clapper also briefed the senators Wednesday. Politico quotes Barrasso as saying, "They have not made a case that this is a national security issue. I understand and believe the administration being convinced that Assad used chemical weapons. I want to see a real strategy ... I am still not confident that the administration has fully thought it all out."

The Chicago Tribune (9/5, Skiba, 2.43M) reports that on Wednesday, Durbin he has spoken with friends in Illinois, "many of whom worked on" the Obama's campaigns, and, according to Durbin, "They don't agree with the president, not at this moment, and his policy in Syria, and he understands that." Durbin added, "But a true leader has to step up and do what he thinks is right."

The Wall Street Journal (9/5, Boles, Hughes, Subscription Publication, 5.33M), The Hill (9/5, Muñoz, Swanson, 322K), and Reuters (9/5, Zengerle, Oweis) also have reports on the Senate panel's vote. NBC Nightly News (9/4, story 8, 0:30, Williams, 7.86M) devoted a short segment to McCain admitting that he was playing online poker during Monday's committee hearing on Syria.

Durbin: Full Senate May Consider Resolution "As Early As Monday." Roll Call (9/5, Lesniewski, Subscription Publication, 78K) reports that "in an effort to move the resolution...to the floor as quickly as possible, the Senate may technically return on Saturday." Durbin is quoted as saying, "As I understand it, [Senate Majority Leader] Reid wants to try to move this so it can be considered as early as Monday of next week," but Durbin added, "I don't know if there's going to be objection to the motion to proceed. We just have to wait and see."

Politico (9/5, Palmer, 652K) reports that on Wednesday, Paul told reporters, "I can't imagine we won't require 60 votes on this," but added that he was certain that would involve "an actual standing filibuster."

Politico (9/5, Bresnahan, Raju, Everett, 652K) also reported that, "so far, it's unclear whether [Reid] can get" 60 votes because "Republicans will likely only be able to muster roughly 10 to 12 votes to cut off debate, meaning Reid can lose only a handful of his 54 Democrats." Politico says Reid "is expected to argue to his rank-and-file members that they need to support him – and Obama – in overcoming the 60-vote threshold to cut off debate, and are then free to oppose the resolution on final passage, which would only require 50 votes."

Tea Party Republicans, Progressive Democrats Unite In Opposition. At the opening the CBS Evening News (9/4, lead story, 4:05, 5.58M), Scott Pelley, referring to the Senate Foreign Relations Committee vote, announced, "President Obama has won the first battle in his campaign to get Congress to authorize military action against Syria." However, correspondent Nancy Cordes went on to report that "even as the plan gained momentum the Senate, the depth of opposition in the House was revealed at a House Foreign Affairs hearing." Several House members, from both parties, were then shown challenging Secretary of State Kerry's arguments for US intervention at Wednesday's hearing, including Rep. Tom Marino, who said, "This will not stop the

butchering and the killing that takes place over there. So what is the purpose? ... Where is the imminent danger to the United States?" Kerry was then shown responding, "Congressman, you're absolutely correct that it will not stop the butchery. I wish it would."

On NBC Nightly News (9/4, story 3, 2:40, Williams, 7.86M), Andrea Mitchell also reported that the President is "still facing a fierce debate in the House as tea party Republicans and liberal Democrats joined forces against the White House." Rep. Jeff Duncan (R-SC) was shown saying, "Not a one member in my district in South Carolina, or the emails of people that have contacted my office, say go to Syria and fight this regime. To a letter, they say no." Mitchell added that some in Congress "have doubts, saying they were lied to about Iraq." Rep. Juan Vargas (D-CA): "I want to make sure that you promise us that you're telling the truth."

In a front-page analysis for the New York Times (9/5, A1, Peters, Subscription Publication, 9.44M) under the headline "Obama Faces Barrier In His Own Party On Syria," Jeremy Peters says that in the House, the President's "core supporters, especially African-Americans and members of the Democratic Party's liberal wing who voted repeatedly against the wars in Iraq and Afghanistan, are expressing the deepest reservations." Peters says the liberals in the House "are being confronted with a difficult choice: go against the wishes of a president who is popular and well respected in their caucus, or defy voters back home who are overwhelmingly opposed" to US military involvement in Syria. Rep. Elijah Cummings (D-MD), "who...has not decided how he stands," says "the pressure from his constituents to oppose the president's plan is unmistakable." Cummings is quoted as saying, "If you've got 95 percent of them saying one thing, it becomes far more difficult to go against them."

The Wall Street Journal (9/5, King, Peterson, Subscription Publication, 5.33M) reports a substantial portion of the House's Democrats have indicated that they are either leaning towards opposing the Syria resolution, or are definitely opposed, and estimates that the President can lose no more than 40 House Democrats if the resolution is to have any chance of passage. Rep. Emanuel Cleaver (D-MO) is quoted as saying, "If I had to vote today, I would cast a 'no' vote." Rep. Rick Nolan (D-MN) says, "I am more convinced than ever that this will be a tragic mistake," and vowed to "work and vote" against the resolution. The Journal also reports that at Wednesday's House hearing, Rep. Gregory Meeks said, "If we act in a unilateral way, I have huge concerns."

Politico (9/5, Brown, Sherman, 652K) reports that House Republicans "were already grumbling about the prospect of several perilous votes this fall," and "adding a vote on military intervention in Syria could create even more friction...as lawmakers are being put in a position of potentially voting against their party leaders." According to Politico, "the vast majority of the conference appears to oppose the resolution, at least at this point."

Al Kamen, in his "In The Loop" column for the Washington Post (9/5, 4.53M), notes that "of the 144 current House members who voted on" the 2002 Iraq war resolution, "78 voted for it (including only 20 Democrats) and 65 Democrats and one Republican voted against it."

Sanders Says Constituents Oppose Strikes. Sen. Bernie Sanders, on MSNBC's Ed Show (9/5, 449K), said he has "very, very deep concerns about" the Senate resolution, and said that his constituents who have contacted his office are opposed to US strikes "almost unanimously."

Cotton's Support For Strikes Gives Pryor Cover To Back Obama On Syria. USA Today (9/5, Moore, Camia, 5.82M) reports that Sen. Mark Pryor, "considered vulnerable by Republicans, could support a president unpopular in his state by voting for authorization – he has some cover because his opponent," Rep. Tom Cotton (R-AR), "endorsed military action in a Washington Post op-ed Wednesday."

MoveOn.org And VoteVets.org Announce Opposition To Syria Strike. Alexander Bums, in a piece for Politico (9/5, Bums, 652K), says the President "has a problem on the left," and notes that on Wednesday, VoteVets.org, a "combat veterans-oriented organization," and MoveOn.org, "the grass-roots group that helped lead opposition to invading Iraq in the first place," both "announced their opposition to striking Syria." MoveOn.org's executive director, Anna Galland, "said that a vote of the organization's membership that wrapped up Wednesday morning found nearly three quarters 'opposing the use of force.'" For his part, VoteVets.org founder Jon Soltz wrote: "I fully understand that President Obama has painted himself into a political corner, but VoteVets.org cannot support this rush to conflict."

WTimes Analysis: Senate Resolution "Riddled With Loopholes." The Washington Times (9/5, Dinan, Sherfinski, 452K), in an article titled "Senate-Crafted Syria Resolution Riddled With Loopholes For Obama," reports that "analysts and lawmakers said the language still has plenty of holes the White House could use to expand military action well beyond what Congress appears to intend." Louis Fisher, identified as a "scholar in residence at the Constitution Project and former long-time expert for the Congressional Research Service on separation of powers issues," says, "What could possibly be the meaning of 'limited and tailored?' I doubt if I've ever seen the word 'tailored' in a bill. Even if the 'intent' of Congress is a limited war, war has its own momentum. ... I've never seen such a broad abdication before in the war powers area."

Wilson Suggests Syria Action Intended To "Divert Attention" From "Scandals." The Huffington Post (9/5, Terkel, 11.54M) reports Rep. Joe Wilson (R-SC) "is very suspicious" about President Obama's motives for seeking military action against Syria, "not because Wilson doesn't believe the administration's chemical weapons claims but because he has a hunch that the call for air strikes is designed to distract" the public. Wilson asked Kerry at a House Foreign Affairs Committee hearing, "Why was there no call for military response in April? Was it delayed to divert attention today from the Benghazi, IRS, NSA scandals; the failure of Obamacare enforcement; the tragedy of the White House-drafted sequestration or the upcoming debt limit vote?"

Roll Call Lists 20 "Bellwether" House Members On Syria Vote. Roll Call (9/5, Fuller, 78K) lists 20 members of the House who "serve as important bellwethers – and potentially critical components – to the math of 218" votes to pass the Syria resolution. They are Republican Reps. Tom Cole (R-OK), Cory Gardner (R-CO), Bill Huizenga (R-MI), Jim Jordan (R-OH), Kevin McCarthy (R-CA), Cathy McMoris Rodgers (R-WA), Tom Price (R-GA), Scott Rigell (R-VA), Paul Ryan (R-WI), and Ann Wagner (R-MO), and Democratic Reps. Xavier Becerra (D-CA), James Clyburn (D-SC), Joseph Crowley (D-NY), Rosa DeLauro (D-CT), Marcia Fudge (D-OH), Jim Himes (D-CT), John Larson (D-CT), Zoe Lofgren (D-CA), Jared Polis (D-CO), and Jan Schakowsky (D-IL).

Sutherland Leaning Against Resolution. The CBS Evening News (9/4, story 4, 2:10, Pelley, 5.58M) reported, "Most members of Congress are still on vacation and they're getting an earful of opinion in their last week at home before returning to Washington." CBS profiled a town hall meeting held by Rep. Steve Sutherland (R-FL), who "says he's leaning against voting to authorize the use of force." Sutherland: "Overwhelmingly we are hearing pushback from our citizens against a military action in Syria."

More Commentary. The New York Times (9/5, Subscription Publication, 9.44M) editorializes that the "divided" committee vote "showed there is no strong consensus yet on this critical question." Even though the committee's resolution "was more restrictive than the language the White House suggested, it was rejected by five Republicans and two Democrats." The Times says the Obama Administration "is walking a difficult line, trying to persuade Congress and Americans that limited military strikes will be enough to be punitive and effective yet will not pull the United States into another Middle East conflict."

Daniel Henninger writes in his Wall Street Journal (9/5, Subscription Publication, 5.33M) column that President Obama is trying to push Republicans into opposing the Syria resolution because he does not want the responsibility for action but wants to blame his political rivals for blocking it. Henninger says Obama never wanted the presidential role of commander-in-chief, preferring to focus on domestic policy, but now must fulfill it – and that House Republicans must call him on it.

DESPITE CRITICS, OBAMA LEANING TOWARD SUMMERS FOR FED. In a Washington Post (9/5, A1, Goldfarb, 4.53M) front-page analysis headlined "Why Obama Might Tap Summers For Fed Despite Harsh Criticism From Left," Zachary Goldfarb writes that while "Democratic lawmakers and top economists are mystified" and women's groups "apoplectic" over the prospect of Lawrence Summers becoming head of the Federal Reserve, President Obama "developed great faith" in Summers during the pivotal first months of his presidency, "according to many people who saw their relationship up close." While critics view Summers as "combative," these people says the President sees Summers are willing "to consider every option in the face of a crisis."

The New York Times (9/5, Calmes, Subscription Publication, 9.44M) writes that soon after his re-election, the President showed a "preference" for Summers, but "well aware of Mr. Summer's love-him-or-hate-him reputation and the trouble he could face winning Senate confirmation," postponed a decision, dispatching his congressional liaison to lobby Capitol Hill. The Times says that while the President "still has not finally settled" on Summers, he

remains the President's favorite, according to "associates."

Editorial Wrap-Up:

NEW YORK TIMES. "The Stakes In Congress." The New York Times (9/5, Subscription Publication, 9.44M) editorializes that the "divided" vote in the Senate Foreign Relations Committee to authorize the use of force in Syria "showed there is no strong consensus yet on this critical question." Even though the committee's resolution "was more restrictive than the language the White House suggested, it was rejected by five Republicans and two Democrats." The Times says the Obama Administration "is walking a difficult line, trying to persuade Congress and Americans that limited military strikes will be enough to be punitive and effective yet will not pull the United States into another Middle East conflict."

"Uninsured In Texas And Florida." The New York Times (9/5, Subscription Publication, 9.44M) says in an editorial that in the wake of a Census Bureau report showing that "alarming percentages of people in Texas and Florida" lack health insurance, "leaders of both states should hang their heads in shame because they have been among the most resistant in the nation to providing coverage for the uninsured under the Affordable Care Act." Florida also refuses to expand Medicaid, meaning, the Times says, that "the uninsured may have a very hard time getting the coverage they need and deserve."

"Last Call In The Race For Mayor." The New York Times (9/5, Subscription Publication, 9.44M) says in an editorial that the final debate of the New York Democratic mayoral primary campaign was basically useless, focusing on "trivia" and how well the candidates "bicker." The Times instead urges voters to turn to YouTube "to hear the candidates speak thoughtfully and at length on signature issues outside the debates."

WASHINGTON POST. "Mr. Putin's Blinders." In an editorial, the Washington Post (9/5, 4.53M) says that while Russian President Vladimir Putin has been a "stalwart backer" of Syria's Bashar al-Assad, "that does not give him license to ignore the facts and gloss over inconvenient truths." Putin, the Post argues, "cannot simply look the other way."

"Power To The Masses." In an editorial, the Washington Post (9/5, 4.53M) says that with its announcement for "a new plan to deal with the stricken Fukushima Daiichi nuclear power plant," the Japanese "government, finally, has decided to step in more forcefully." Nevertheless, the Post says that nuclear power shouldn't be abandoned as a viable energy source because "sound regulation" can help cure "design flaws" as well as mismanagement and "Plants built in the future, meanwhile, will be much safer, utilizing 'passive' safety mechanisms that activate without human intervention."

"Cuccinelli's Record." The Washington Post (9/5, 4.53M) runs an editorial criticizing Virginia Republican gubernatorial nominee Ken Cuccinelli over his role in "the so-called 'personhood amendment'" to Virginia's constitution in 2007, "which granted full rights to 'preborn human being[s] from the moment of fertilization.'" The measure "failed even in the Republican-dominated House of Delegates" and had very few supporters. The Post says that Cuccinelli last week "denied that he ever backed legislation" that would have let government "interfere with contraception," but that personhood measures "would easily include banning the most popular forms of contraception."

WALL STREET JOURNAL. "Blurred Red Lines." The Wall Street Journal (9/5, Subscription Publication, 5.33M) says President Obama's remark that he "didn't set a red line" on Syria shows that the President has yet to realize or accept that the US is the only nation capable of enforcing order in the world, and that it is his credibility and that of the US, and not that of the international community, that will suffer from inaction.

"The Beltway Choom Gang." In an editorial, the Wall Street Journal (9/5, Subscription Publication, 5.33M) criticizes President Obama's and the Justice Department's liberal interpretations of the Federal Controlled Substances Act of 1970, in which Congress determined that marijuana is a drug that should be banned, and the Supreme Court's ruling in *Gonzales v. Raich*, which said that Federal law preempts state law. The paper says that their perceptions, which they applied in deciding not to impose Federal laws on Colorado and Washington as those states attempt to govern marijuana use, is about politics and not the law, which Congress has clearly established. The Journal adds that in this instance, Obama is the first president since Nixon to act in such

blatant disregard of the law.

“Innovator Liability, Take Two.” The Wall Street Journal (9/5, Subscription Publication, 5.33M) criticizes the Alabama Supreme Court’s January decision to allow plaintiffs to file lawsuits against manufacturers for products from which generic derivatives were created. The paper says that since that decision was rendered, other courts around the country have refused to follow suit. The paper also notes that the FDA could preempt the Alabama court.

Washington Schedule:

TODAY'S EVENTS IN WASHINGTON.

White House:

PRESIDENT OBAMA – CEST – meets with the King and Queen of Sweden, the Royal Palace, Stockholm, Sweden, limited pool spray after the meeting; CEST – departs Stockholm, Sweden, Stockholm-Arlanda International Airport, open press; MSK – arrives Saint Petersburg, Russia, Pulkovo International Airport, open press; MSK – Holds a bilateral meeting with Prime Minister Abe of Japan, Bilateral Meetings Pavilion, travel pool spray at the top; MSK – Participates in an Official G-20 Arrival and Leaders Welcome, Konstantinovsky Palace, pre-set pool spray; MSK – participates in G-20 Working Session One, Konstantinovsky Palace, closed press; MSK – participates in a G-20 working dinner, Konstantinovsky Palace, pre-set pool coverage of the arrival only.

VICE PRESIDENT BIDEN – The Vice President will meet with senior advisors; the Vice President will host a reception for leaders of labor organizations at the Naval Observatory.

US Senate: Aug. 5 – Sept. 8. – Congress on break until Sept. 9.

COMMITTEE MEETINGS

SELECT COMMITTEE ON INTELLIGENCE – 10 a.m. Closed Hearing: Intelligence Matters. Location: 219 Hart. US House: Aug. 5 – Sept. 8. – Congress on break until Sept. 9.

Other: ANNUAL CAF CONFERENCE – Sept. 4 – 5. Seventeenth Annual CAF Conference with the Development Bank of Latin America; the Organization of American States (OAS); and the Inter-American Dialogue. Speakers to include: Opening address by Secretary of State Kerry; remarks by former Chilean president Ricardo Lagos; others. <http://www.thedialogue.org/page.cfm?pageID=425&eventID=359&invitee=2a6db5cb-1ae2-43a8-b1ed-a3eac82d8009>. Location: Willard Inter-Continental Hotel, 1401 Pennsylvania Ave. NW.

NATIONAL ACADEMY OF SCIENCES – DONOVAN, FUGATE – 8:30 a.m. – 2:30 p.m. The 2012 National Research Council report Disaster Resilience: A National Imperative revealed a strong community of stakeholders eager to build resilience to risk and catastrophic disasters in the United States. Speakers include: Shaun Donovan, secretary, US Department of Housing and Urban Development; Caitlin Durkovich, assistant secretary for infrastructure protection, US Department of Homeland Security; W. Craig Fugate, administrator, Federal Emergency Management Administration; Todd Jones, CEO, Willis Group North America; Eduardo Martinez, chair, World Economic Forums Global Agenda Council on Catastrophic Risks. Location: Auditorium, National Academy of Sciences, 2101 Constitution Ave., N.W. On the Net: webcast at www.nationalacademies.org

AEI – ADMIRAL GREENERT – NEW START TIME – 8:30 a.m. Squaring the circle: Admiral Jonathan W. Greenert on American military strategy in a time of declining resources. Location: AEI, Twelfth Floor, 1150 Seventeenth Street, NW.

FEMA – AMERICAS PREPAREATHON – FUGATE – 10 a.m. The National Academy of Sciences, FEMA is unveiling a new campaign titled Americas PrepareAthon – to increase the number of people who understand the disasters most relevant to their community and to encourage them to participate in drills, exercises, and trainings and then practice, practice, practice so they know what to do when the real thing happens. Speakers: Paulette Aniskoff, Deputy Assistant to the President and Director of the Office of Public Engagement, White House; Craig Fugate, FEMA Administrator; Tim Manning, FEMA Deputy Administrator, Protection and National Preparedness; Other senior leadership from FEMA as well as representatives from the national partners. Live Web Streaming: Location: National Academy of Sciences, 2101 Constitution Ave, NW. Contacts: 202-210-6636. Karen Gruebnaue karen.gruebnaue@icfi.com (301-204-1522, 202-210-6636)

RENEWABLE FUEL – 11 a.m. – 11:30 a.m. Experts will hold teleconference to discuss important progress that the renewable fuel industry has made this summer and look ahead to the issues that will both help and hurt the industry this fall. Speakers: Tom Buis, CEO, Growth Energy; Paul Bertels, Vice President of Production and Utilization, National Com Growers Association; Bob Dinneen, President and CEO, Renewable Fuels Association. DIAL IN: Phone number, 888-329-8893; Conference ID, 3177126; Conference Name, Fuels America Fall Look

Ahead. Contacts: RSVP Alissa Ohl (aohl@gpgdc.com). On the Net: www.fuelsamerica.org

CARNEGIE – DHAKA – FM MONI – 12 p.m. – 1 p.m. Dhaka at a Crossroads: Foreign Minister Dipu Moni on Bangladesh's Uncertain Future. Location: Carnegie Endowment for International Peace, 1779 Massachusetts Ave. NW.

BROOKINGS – STRIKING SYRIA – 3 p.m. – 4:30 p.m. Striking Syria: Obama, Congress and Military Action. Participants: Roger Hertog Senior Fellow, The Brookings Institution; Fiona Hill, Senior Fellow and Director, Center on the United States and Europe, The Brookings Institution; Suzanne Maloney, Senior Fellow, The Brookings Institution; Bruce Riedel, Senior Fellow and Director, Brookings Intelligence Project; The Brookings Institution; Jeremy Shapiro, Visiting Fellow, Foreign Policy, The Brookings Institution. Location: The Brookings Institution, Falk Auditorium, 1775 Massachusetts Ave, NW. Contacts: 202.797.6105

NEW AMERICA FOUNDATION – OPEN INTERNET – COURTS – 3 p.m. – 4:30 p.m. The Open Internet goes to Court – in collaboration with Free Press. Participants: Susan Crawford, Professor, Benjamin N. Cardozo School of Law, Former Special Assistant for Science, Technology, and Innovation Policy to President Barack Obama; Angie Kronenberg, Chief Advocate and General Counsel, COMPTEL, Former Wireline Legal Advisor for Acting FCC Chairwoman Mignon Clyburn; Marti Doneghy, Senior Legislative Representative, AARP; Matt Wood, Policy Director, Free Press; Sarah Morris, Senior Policy Counsel, Open Technology Institute, New America Foundation. Location: New America Foundation, 1899 L St. NW Suite 400.

YPFP – CROATIA – EU – 6:30 p.m. Conversation With His Excellency Joko Paro, Ambassador Of The Republic Of Croatia To The United States. Location: Embassy of the Republic of Croatia, 2343 Massachusetts Ave. NW.

Last Laughs:

LATE NIGHT POLITICAL HUMOR.

Jimmy Kimmel: "Sen. John McCain got caught in an embarrassing moment yesterday. A photographer from the Washington Post caught him playing poker on his phone during the first public hearing on the potential US military action in Syria. Caught playing poker on his phone. Sounds like something Anthony Weiner would have been caught doing."

Jimmy Kimmel: "While some believe it's inappropriate to be playing a video game while the committee is deciding whether or not to kill people and potentially start a war, I say the man is John McCain. The man is 114 years old. We should be impressed he's even wearing pants, never mind he's using a cellphone."

David Letterman: "Well, it looks like we're getting ready to teach Syria a lesson and President Obama is now saying that he never used the term 'red line.' Remember when he was talking about if we find out that they used chemical weapons in Syria that that would be crossing a red line and if they cross that red line, by God, we had to go in there and get them? ... Well, now the President is saying he never used the term 'red line.' He's saying that the world used the term 'red line.' So it's taken him five years, but finally the guy has learned how to bull(bleep)."

David Letterman: "John McCain...They're having a big Senate discussion on whether or not we're going to teach Syria a lesson and...well, during the talk, the discussion, he's playing online poker on his computer. Online poker on his computer during a Senate session on whether we're going to Syria or not. I was stunned! You're telling me John McCain knows how to use a computer?"

Stephen Colbert: "I've been warning you for years that Barack Obama is a weak leader and he has proven me right once again...The man could not lead us on healthcare reform. He could not lead us on the budget talks. And now he can not lead us into war, specifically with Syria, where dictator and high school freshman trying to grow a mustache Bashar al-Assad has used chemical weapons against his own people. Now, as the world's policeman, America has a moral imperative to blow some (bleep) up. But thanks to Obama's limp leadership, that idea is going over like a turd falafel. Only 29% of Americans want us to attack Syria. Now, on the plus side, that means 29% of Americans know there is a place called Syria."

Stephen Colbert: "I miss George W. Bush...That man knew how to sell a war. Obama has hard evidence of weapons of mass destruction and he can't even get England to go along with it. Meanwhile, President Bush gotten a international coalition with nothing more than Colin Powell's reputation and half a test tube of Crystal Light."

Stephen Colbert: "So President Obama, you could learn a thing or two about salesmanship from this good man."

Stop asking our permission and start telling us our peril, like this: 'My fellow Americans, Bashar al-Assad has used poison gas on his own people. If we do not respond sources say next he will hit Epcot, thereby taking out Paris, London, and China, and it flows over to Disney, that's all of our robotic presidents. Furthermore, we have satellite photos of him punching your mother and sodomizing a baseball. And he has purchased uranium from Hitler's ghost. It is our moral obligation to stop this madman and if Britain won't help us, I say (bleep) 'em. From now on English muffins will be called liberty toast because America, this land is my land and your land and America does not back down on the face of tyranny.'"

Jimmy Fallon: "Sen. John McCain is in the news after he was spotted playing poker on his iPhone during a hearing on Syria yesterday...Actually, it turns out it's not so bad when you hear that another group of Senators were playing poker with actual cards."

Jimmy Fallon: "McCain was playing poker during a hearing. The worst part is that he didn't even know he was playing poker. He was just trying to text his wife."

Jay Leno: "All week President Obama has been saying he'll seek congressional approval for the strike, but he insists he doesn't really need it. And when asked by the media if he was sending mixed messages, the President said yes and no. Well, despite what the critics say, President Obama says the lack of response to Syria so far does not threaten his credibility. And you know something, he's right. The economy, Benghazi, the spying scandal, that threatens his credibility. But this other stuff, no."

Jay Leno: "Everybody is criticizing McCain for playing poker on his iPhone. But you know something, compared to what these other politicians are doing on their iPhones, that's not so bad, okay?"

Jay Leno: "Anthony Weiner. This guy just doesn't give up. He got in a big confrontation with a voter in New York City today. Yeah, Weiner said to this guy, 'You have no right to judge me.' Really? I don't think Anthony Weiner understands how voting works."

Conan O'Brien: "Sen. John McCain is under fire for being caught playing poker on his smart phone during a Senate hearing on Syria. Yeah. Even worse, it was strip poker. That was the worst part. We saw much more of him than we want to see."

Briefing Materials for Wednesday, September 18

Olson, Elizabeth <elizabeth_olson@ios.doi.gov>

Tue, Sep 17, 2013 at 5:41 PM

To: Sally Jewell (b)(6) <[REDACTED]@ios.doi.gov>, Laura Davis <laura_davis@ios.doi.gov>, Nicole Buffa <nicole_buffa@ios.doi.gov>, Katherine Rupp <katherine_rupp@ios.doi.gov>, Erin Walls <erin_walls@ios.doi.gov>
Cc: Israporn Pananon <israporn_pananon@ios.doi.gov>

Secretary Jewell,

Attached are briefing materials for Wednesday, September 18. These have also been uploaded to Google Drive. In addition, a memo for Thursday's Internal Discussion on Engaging the Next Generation (attached) has been added to your September 19 folder.

Thank you,

Elizabeth

TELEPHONE CALL SHEET

CALL WITH GOVERNOR C.L. "BUTCH" OTTER (IDAHO)

FROM: Neil Kornze, Principle Deputy Director, BLM (202)208-3801
TO: Idaho Governor C.L. "Butch" Otter
DATE: September 18, 2013
TIME: 4:30 PM – 4:40 PM, Governor Otter to dial (202)208-6087

PURPOSE

To discuss Governor Otter's request for information on: 1) the communication about sage-grouse among the State of Idaho, the Bureau of Land Management (BLM) and the U.S. Fish and Wildlife Service (FWS); and 2) the potential of an October meeting with the Governor during which sage-grouse would be the principal discussion topic.

TALKING POINTS

Communication among Idaho, FWS, and BLM

- The BLM continues to work in close coordination with State governments on the planning effort to address Greater Sage Grouse.
- This includes full participation from State wildlife management departments as well as the Western Association of Fish and Wildlife Agencies (WAFWA) executive oversight committee.
- The State of Idaho has been a cooperating agency since December 2012.
- As a cooperating agency, Idaho has provided input into the planning process, including submitting an alternative based on the State's plan. BLM staff served as advisors to Governor Otter's Sage-grouse Task Force, and the BLM has maintained a high degree of coordination with the Governor's staff on his alternative.
- FWS has reviewed the planning documents and provided feedback as a cooperating agency.
- FWS Deputy Regional Director and the Director of the Idaho Department of Fish and Game actively participate in the BLM monthly National Policy Team (NPT) meetings.
- The draft and proposed plan amendments/revisions are undergoing thorough review at the BLM, FWS, and the Department. It is still early in the process, but we think you will like the direction we are headed.
- We look forward to continuing our close working relationship with your office, FWS, as well as other State entities and stakeholders as this important effort moves through the process.

Discuss the potential of a meeting with the Governor in October at which sage-grouse would be the principal topic of conversation.

- As part of this continuing effort to communicate, we would be pleased to set up a meeting with you and your staff in October.
- Potential discussion topics could include:
 - Update on the planning process (timeline);
 - Process for Cooperating Agencies to provide meaningful feedback on the draft environmental impact statements;
 - Opportunities as we move forward in this coordinated effort; and
 - Lessons learned.

BACKGROUND

Governor Otter has written several letters, and a common theme is his concern about the disparate treatment between the FWS and BLM regarding his plan. A March 22, 2013, letter from the BLM Idaho State Director and the Idaho FWS State Supervisor explained that “each have a separate and distinct role to play in the review of the State’s plan.”

In a letter to Governor Otter dated April 10, 2013, FWS-Idaho concurred with portions of the Governor’s alternative. In addition, they stated that, “Although we realize [the Governor’s alternative] will require further effort to bring it to full development, currently, it most closely meets the goals and objectives of the [Conservation Objectives Team (COT) report].” The COT report establishes conservation objectives for the primary habitat threats identified in the March 2010 FWS finding that listing of the Greater Sage-Grouse was warranted but precluded.

The FWS-Idaho commented on the June version of the Administrative Draft EIS. The BLM has since made changes to address their concerns in the sub-regional alternative (Alternative D), but the FWS has not taken a position on the current version of that alternative.

Unlike Wyoming, the ID Governor’s Alternative applies only to BLM and FS administered lands, and does not have direction specific to private lands or state lands. The following are comparisons of the alternatives:

	Sub-Regional Alt D	Governor’s Alt E
Addresses all threats?	Yes	Addresses in detail wildfire, invasive species, infrastructure, grazing and some elements of OHV and mining
Management areas?	Priority, Medial and General Habitat—Priority is the most protective	Core, Important and General Habitat—Core is the most protective
Acres in most protective areas?	Priority = 6.8 M	Core = 4.9 M
Adaptive management	20% change (loss) of habitat or decrease in population	20% change (loss) of habitat or decrease in population (males on leks within one

	Sub-Regional Alt D	Governor's Alt E
	(males on leks within one of the 8 populations in Idaho) changes management direction from Medial to Priority	of the 4 conservation areas in Idaho) changes management direction from Important to Core
Grazing	Proposed management direction is consistent/ implementable with our current regulations	Management direction is not consistent with BLM's regulations for rangeland health

EVENT MEMORANDUM FOR THE SECRETARY

INTERNAL DISCUSSION ON SAGE GROUSE

DATE: September 13, 2013
LOCATION: Office of the Secretary
TIME: 2:30PM – 3:20PM
FROM: Dan Ashe, FWS (202)208-5788, Neil Kornze, BLM (202) 208-6668, Michael Bean, ASFWP (202) 208-7400, Jim Lyons, ASLM (202) 208-4318, Sarah Greenberger, OS (202) 219-2140, Stephenne Harding, OCL (202)208-6174

FWS is two years away from the September 2015 deadline to make a proposed listing determination for the greater sage-grouse. Several significant steps in the Department's efforts related to that determination are occurring this month. The purpose of this briefing is to update YOU on:

1. FWS September 2013 proposal to list the Bi-State population of greater sage-grouse (a distinct population segment in Nevada and California that is genetically differentiated from other populations of the greater sage-grouse)
2. Status of the BLM's planning effort. Draft management plans will be completed by October 2013. Final plans by fall 2014. First Record of Decision (Lander ROD) focused on sage grouse management will be released September 2013.
3. Near-term timeline for the review of BLM RMPs and related management and regulatory actions
4. Recommendation that you attend a meeting of the Sage Grouse Task Force in December

BACKGROUND

ESA Listing Determinations

When FWS reviews the status of any species, it evaluates the best scientific and commercial information available to determine whether a species warrants protection under the Endangered Species Act (ESA). Based on this review, the FWS determines whether a species is either endangered (currently in danger of extinction throughout all or a significant portion of its range) or threatened (likely to become an endangered species within the foreseeable future throughout all or a significant portion of its range).

To make a determination, the FWS analyzes the five statutory factors that may affect the well being of a species. Those factors are:

- (A) the present or threatened destruction, modification, or curtailment of its habitat or range;
- (B) overutilization for commercial, recreational, scientific, or educational purposes;
- (C) disease or predation;
- (D) the inadequacy of existing regulatory mechanisms; or
- (E) other natural or manmade factors affecting its continued existence.

Listing Determination for the Greater Sage-Grouse

In March 2010, the FWS concluded that the greater sage-grouse warranted protection under the ESA, although proceeding with a proposed listing rule was precluded by work on species facing a

higher degree of threats. At this stage, the FWS has not determined which category of protection, endangered or threatened, to assign greater sage-grouse. This determination will occur if, in 2015, the species continues to warrant listing.

In 2010, the FWS analyzed the five statutory factors. Greater sage-grouse require vast undisturbed landscapes, and the FWS determined that continuing habitat loss and fragmentation resulting from wildfire, energy development, urbanization, agricultural conversion, and infrastructure development were the primary threats to the species. The FWS also determined that the existing regulatory mechanisms were inadequate to address these threats (*additional detail on the greater sage-grouse and its ecology are attached, below*).

In 2011, the FWS negotiated global settlement agreements with WildEarth Guardians and the Center for Biological Diversity that served to restore control over work priorities to the FWS and to greatly reduce litigation. In these two agreements, the FWS agreed to complete proposed listing rules or publish not warranted findings for the following sage-grouse species and populations by certain dates:

- Gunnison sage-grouse by September 30, 2012 (extended until December, 2012)
- Bi-state DPS of greater sage-grouse by September 30, 2013
- Greater sage-grouse by September 30, 2015

The ESA statute allows for one year between a proposed and final listing determination with a 6-month extension in certain circumstances.

Assessments of threats to the Greater Sage-Grouse

In making its proposed listing determination in 2015, the FWS will review and evaluate the threats to the species, how those threats are affecting the species now, what mechanisms are available to address the threats, and how likely those actions are to be successful in the future to conserve the species and its habitat. To provide as much advance clarity as possible regarding the criteria that will guide the 2015 decision, the FWS established a Conservation Objectives Team whose report (the "COT report," completed in Feb 2013) identifies "primary areas for conservation," the key threats operating in those areas, and the degree to which those threats should be ameliorated to conserve the grouse. This report is focused on the ends rather than the means to get there.

In advance of the COT report, in August 2011, the BLM chartered a National Technical Team (NTT) of scientists and technical experts from BLM, state fish and wildlife agencies, USFWS, NRCS and USGS. Their report (the "NTT report") contains "regulatory mechanisms, through Resource Management Plans (RMPs), to conserve and restore the greater sage-grouse and its habitat on BLM-administered lands on a range-wide basis over the long term. Unlike the COT report, this report provides the means for conservation.

In 2013, USGS (in cooperation with the BLM) completed a *Summary of Science, Activities, Programs, and Policies That Influence the Rangeland Conservation of Greater Sage-Grouse* which summarizes the current status of the sagebrush biome and sage-grouse populations and the factors affecting them. This report provides important baseline information with regard to the character and distribution of threats to sage-grouse against which the FWS can measure the success or failure of conservation and restoration strategies (*additional detail on these reports are attached*).

Congressional Interests

House and Senate Member interest in the BLM's sage grouse conservation efforts have largely focused on concerns that BLM has not sufficiently engaged state conservation plans as part of the National Planning Strategy. Additionally, Members in several states have sought to ensure sufficient fire rehabilitation and hazardous fuels funding to help break the cycle of fire and invasive species growth that threatens large areas of sage brush habitat.

2013 Congressional Sage-Grouse Events of Significance:

- On March 7, House Natural Resources Committee Chairman Doc Hastings (R-WA) sent a letter to then-Secretary Salazar requesting a substantial amount of information and documents related to the Department's expenditures on sage grouse conservation, and the number of activities potentially delayed by the sage grouse planning process.
- On July 31, the BLM and FWS met with Sens. Reid (D-NV) and Heller (R-NV), as well as Reps. Amodei (R-NV) and Titus (D-NV), to discuss the BLM's efforts to conserve sage grouse habitat in Nevada.
- On September 4, the House Natural Resources Committee held field hearings on greater sage-grouse and ESA issues entitled, "State and Local Efforts to Protect Species, Jobs, Property, and Multiple Use Amidst a New War on the West."
- Senators Heller and Reid included a supportive Sage Grouse amendment in the Budget Resolution this spring, encouraging funding and continued development of plans.
- The House Interior Appropriations Bill for 2014 contains a delay in the listing of the Greater Sage Grouse until 2016. (*"Therefore, in light of the questions surrounding the scientific evidence and in light of the partnership efforts currently underway, the Committee has included a section in Title I General Provisions to delay any potential Endangered Species Act listing decision on greater sage-grouse until fiscal year 2016."*)

NEXT STEPS

1. FWS Bi-State Sage Grouse Proposed Listing Determination and Critical Habitat

Proposal to list the Bi-State DPS

As required by the settlement, the FWS will make a listing determination on the Bi-State DPS this month. The Bi-State DPS of greater sage-grouse occurs along the central California-Nevada border, and numbers fluctuate between 1,800 and 7,400 individuals. The Bi-State DPS is represented by 4 to 8 demographically independent populations, each of which is relatively small and below theoretical minimum criteria for long-term persistence. The DPS occupies less than half its historical range.

The FWS has found that the Bi-State DPS is likely to become endangered throughout all of its range in the foreseeable future (i.e., a threatened species) based on the following:

- (1) Multiple threats are significantly impacting all of the Bi-State DPS populations (i.e., infrastructure; grazing and rangeland management; nonnative and native, invasive plants; wildfire and altered fire regime; and small population size).
- (2) Additive and synergistic effects due to the threats listed above as well as other multiple threats (i.e., urbanization and habitat conversion, mining, renewable energy development,

climate (including drought), recreation, disease, and predation) are likely to continue and increase in the future, resulting in increasingly fragmented habitat.

- (3) Current or future impacts identified above will likely persist and interact in the near-term, most significantly affecting the smaller and more isolated populations.

Thus, the potential exists for one or more of these peripheral populations to be lost or impacted to such a degree that recovery would be difficult.

The proposed listing determination will include a proposed 4(d) special rule to exempt from the Act's take prohibitions activities conducted pursuant to a comprehensive conservation program that was developed by or in coordination with a State agency.

Proposed Critical Habitat

When a species is proposed for listing under the ESA, FWS must consider whether there are areas of habitat believed to be essential to the species' conservation. Those areas may be proposed for designation as "critical habitat." While a listing determination is based solely on science, section 4(b)(2) of the ESA requires FWS to consider the economic impacts, and any other relevant impacts, of specifying any particular area as critical habitat. The Services may exclude any area from critical habitat if they determine that the benefits of excluding an area as critical habitat outweigh the benefits of specifying such area as part of the critical habitat, unless the exclusion of an area will result in the extinction of the species concerned.

The Service is proposing approximately 755,960 hectares (1,868,017 acres) in four units as critical habitat for the Bi-State DPS.

- FWS anticipates two section 4(b)(2) exclusions: (1) Los Angeles Department of Water and Power, based on development of an MOU and Conservation Strategy, ongoing development of a draft Habitat Conservation Plan, and active partnership; and (2) the Marine Corps Mountain Warfare Training Center based on National Security (*Note: the Marine Corps' land is not within the proposed critical habitat although they conduct military readiness on Forest Service lands within the proposed critical habitat via a 40-year special use permit*).
- The Hawthorne Army Depot occurs within the footprint of Unit 2 of the proposed critical habitat. However, the installation has an integrated natural resources management plan approved by FWS that provides a conservation benefit to the Bi-State DPS and its habitat. Therefore, the Hawthorne Army Depot is exempted under section 4(a)(3) of the Act.

Position of Interested Parties

Locally-led conservation efforts in the Bi-State area are growing and are helping address threats that are impacting the Bi-State DPS. A multi-agency, long-term conservation plan has been developed (Bi-State Action Plan) that, if fully implemented, could significantly reduce threats. However, there is currently no assurance of funding.

Partners: Ultimately, all State and Federal partners prefer to avoid listing and an associated critical habitat designation due to concerns over impacts to economic development and extra administrative effort, respectively. FWS expects more concern from Nevada based on (1) the potential impact on industry (ranching, mining, and renewable energy), with the ranching community likely the most vocal since there are few mining or renewable energy interests in the area; and (2) how the proposed listing and designation of critical habitat may be interpreted with respect to the upcoming 2015 range-wide greater sage-grouse decision.

Other interested parties include industry, tribes and the environmental community. Concerns are expected only from industry as described above.

2. BLM Planning Effort

BLM manages approximately 50% of the sagebrush habitats used by sage-grouse. On December 11, 2011, the BLM and Forest Service initiated a National Greater Sage-Grouse Planning Strategy, which is a coordinated stakeholder team approach to incorporate regionally appropriate, science-based conservation measures into BLM land-use planning efforts throughout the range of the greater sage-grouse. In addition, the Forest Service is working with the BLM to amend Forest and National Grassland management plans. There are a total of 98 land use/management plans that are being amended/revised through 15 separate sub-regional environmental impact statements (“EISs”). The Lander RMP and Record of Decision (ROD) to be released this month will be the first RMP to be completed in this strategy (*see attachments for EIS timeline, comparison with the Lander RMP*).

The remaining greater sage-grouse EISs will be reviewed by the BLM and Forest Service field, state, regional and Washington offices for consistency and completeness. The FWS, State fish and game departments, and other cooperating agencies will also have opportunities to review and provide comments on the draft and final EISs. The BLM and Forest Service will complete their planning revisions by the fall of 2014. The BLM and Forest Service, in cooperation with FWS, will develop a separate document that summarizes the conservation measures and cumulative range-wide impacts to help inform the FWS’s listing decision in 2015.

3. Timeline for the review of BLM RMPs and related management and regulatory actions

The FWS is working with the States and Federal partners to create a common set of conservation “metrics” to compile and organize the many conservation measures being implemented at the state and Federal level. These metrics are intended to create a common base for the review of conservation actions as well as provide a framework for reporting those actions. These metrics will be presented at the September Governor’s Sage Grouse Task Force meeting. The Task Force, created in 2011 at the initiative for former Secretary Salazar and WY Governor Mead, meets regularly to ensure coordination among the state and Federal interests.

Key activities for the remainder of 2013:

- September 23-24: Governor’s Task Force Meeting: FWS and partners will present suggested metrics. Federal Family meeting (to troubleshoot and finalize plans for moving successfully from draft to final BLM/USFS RMP/LMPs).
- October: BLM completes Draft RMPs.
- October-November: FWS works with BLM and state partners to develop a status assessment of conservation planning.
- November: Federal Executive meeting (to take stock of overall progress on sage-grouse conservation and identify key areas or roadblocks that need attention at the executive level).
- December: Governor’s Task Force Meeting – YOU and Governors attend to review the status of conservation efforts and commit to closing any regulatory gaps that remain before plans must be complete in September 2014.

RECOMMENDATION

We recommend that YOU attend a meeting of the Governor's Sage Grouse Task Force in December, convening the governors (who normally do not attend) to review the status of conservation efforts and secure a commitment by the states and Federal bureaus/agencies to close the remaining gaps before plans must be completed in fall of 2014.

ATTACHMENTS

The attachments below are for background only, and can be skimmed if you would like more information.

- 1 – Basic Ecology and Threats
- 2 - Key Reports/Institutional Coordinators/Coordination Efforts
- 3 - BLM's National Greater Sage-Grouse (GRSG) Planning Timeline and Planning Area Map
- 4 – Common Elements in Each of the 15 EISs – Comparison with the Lander ROD
- 5 – Maps: (a) Greater Sage-Grouse Historic and Current Range and Priority Areas for Conservation (PAC); (b) Greater Sage-Grouse PACs, Preliminary General Habitat, and Preliminary Priority Habitat; (c) Greater Sage-Grouse Habitat and 10-year Wildfire Boundaries (Great Basin only)

ATTACHMENT 1: Greater Sage-grouse Basic Ecology and Threats
USFWS
September 9, 2013

The greater sage-grouse is a large, ground-dwelling bird, up to 30 inches long and two feet tall. Males have a large white ruff around and bright yellow air sacks which they inflate during a mating display. They are found in sagebrush habitats ranging from 4,000 - 9,000 feet and are highly dependent on sagebrush for cover and food.

Characteristics: The species is a sagebrush obligate; healthy sagebrush with an understory of perennial grasses and forbs is required as food and cover. They are long-lived with a slow reproductive rate. Sage-grouse populations occupy vast landscapes as a result of large home ranges and substantial dispersal or migratory movements of individuals.

Current range: Washington, Oregon, Idaho, Montana, North Dakota, eastern California, Nevada, Utah, western Colorado, South Dakota and Wyoming and the Canadian provinces of Alberta and Saskatchewan. They occupy about 56 % of estimated historical range.

Population trend: Estimated decline of 80% from pre-settlement levels and 30% from 1985

Primary threats: Habitat loss, habitat fragmentation, inadequacy of regulatory mechanisms

Habitat loss and fragmentation: invasive species/fire, energy development, conversion to ag (among others, such as urbanization, recreation, conifer encroachment, etc.)

Invasive species/fire: The historic fire frequency in these habitats was estimated at 200-350 years, now it is 70-150 years. Primary reason for increased frequency is the prevalence of invasive annual grasses: cheatgrass. Most sagebrush species are not fire resistant and the habitat not resilient to this disturbance; recovery is uncertain. In the Great Basin, 27% of sagebrush habitat burned between 1980 and 2010.

Energy development: Nearly 9% of "preliminary priority habitat" has been leased for oil and gas production, but more than 80% of that has yet to be developed. Thus, the effects of the great majority of leases already issued have yet to be experienced. The direct footprint of active and abandoned well sites within PPH is small (roughly $<1/10^{\text{th}}$ of one percent); however, the area potentially indirectly influenced by oil and gas development is much larger: over 22 million acres or nearly 33% of the total. Sage-grouse are sensitive to noise, traffic, and human activity associated with oil and gas development. Specifically, with greater proximity to oil and gas or greater density of such development, lek attendance, probability of lek persistence, and female survival all decline, while chick mortality and the probability of nest failure increase. Female survival, chick survival and nest success are the demographic parameters with the most influence on population growth.

ATTACHMENT 2: Key Reports/Institutional Coordinators/Coordination Efforts

Key Reports

The Bureau of Land Management's (BLM) 2011 National Technical Team Report (NTT) was the product of collaboration among State and Federal agency representatives. The NTT Report sought to provide "the latest science and best biological judgment to assist in making management decisions," and was to be used as "a starting point" in BLM's planning processes. Specifically, BLM has committed to consider, in the course of its planning effort, in at least one alternative, all of the relevant conservation measures in the NTT Report.

The FWS convened a Conservation Objectives Team of state and FWS scientific experts to provide clear guidance regarding the criteria that would be used in making a listing determination in advance of that decision. This 2013 report is referred to as the Conservation Objectives Team (COT) Report. The COT Report is the work product of a scientific team that included FWS and State participants. The COT Report identifies "Priority Areas for Conservation" (PACs) that generally correspond to State-identified areas of most importance for sage-grouse conservation. The COT Report then identifies the major threats affecting the species in each PAC and, in general terms, describes the degree to which those threats need to be addressed to accomplish the goal of conserving the species. As the States very much wanted, the COT Report identifies the goals, but gives the States and other the flexibility to design strategies to address the threats to the species.

The COT Report describes generally what needs to be accomplished, and the NTT Report more specifically describes the on-the-ground measures that may be appropriate to meet sage-grouse conservation objectives, particularly in priority habitats. As a result, it has generated controversy from those who believe its conservation measures may be overly restrictive of particular land uses. In response to this controversy, the BLM and Forest Service have reiterated that the planning process will make appropriate adjustments to address regional and local ecological variability with robust justifications for measures that may vary from the NTT recommendations.

USGS, in cooperation with BLM, recently released a comprehensive report ("*Summary of Science, Activities, Programs and Policies that Influence the Rangewide Conservation of Greater Sage-Grouse*" - aka the "baseline report") summarizing decades of scientific research on sage grouse and the activities that affect sage grouse and their habitats. The information below is a small sample of the type of data the report provides.

Nearly 9% of "preliminary priority habitat" ("PPH," aka "core areas") has been leased for oil and gas production, but more than 80% of that has yet to be developed. Specifically, there are 1.1 million acres held by production and 4.9 million leased acres that are undeveloped out of a total of 68.2 million acres of PPH. Thus the effects of the great majority of the oil and gas leases already issued have yet to be experienced.

The direct footprint of roads within PPH is 1.3 million acres, or roughly 2% of the total. However, the area indirectly affected exceeds 95% of the total, and in three management zones 100% of preliminary priority habitat is indirectly influenced by roads (i.e., with 7.5km of an interstate highway, or within 3km of a highway or primary or secondary route).

Key Coordination Efforts

The Western Association of Wildlife Agencies (WAFWA) published a Greater Sage-Grouse Comprehensive Conservation Strategy in 2006 and established an Executive Oversight Committee to oversee its implementation. The Oversight Committee is comprised of State and Federal conservation agency representatives. It meets regularly and has been an effective forum for communication about and coordination of species conservation efforts. Its State members are drawn from state fish and wildlife agencies, which generally lack any regulatory authority over land uses that negatively affect sage-grouse.

In December 2011, Secretary Salazar co-hosted a meeting in Cheyenne, WY, that resulted in the establishment of a Sage-Grouse Task Force, co-chaired by Governors Mead (Wyoming) and Hickenlooper (Colorado) and the Director of BLM. Each of the eleven states within the sage-grouse range has a Governor appointed member on the Task Force. In addition, BLM, FWS, National Resources Conservation Service (NRCS), and U.S. Forest Service (USFS) are represented on the Task Force. By having Governor-appointed representatives on the Task Force, the intention was to secure the participation of those who could influence agencies beyond the state fish and game agency (although in some cases the Governor appointed the Director of the State fish and game agency to the Task Force). The Task Force generally meets every 2-3 months and is singularly focused on addressing actions and policies that can influence the FWS listing determination in 2015.

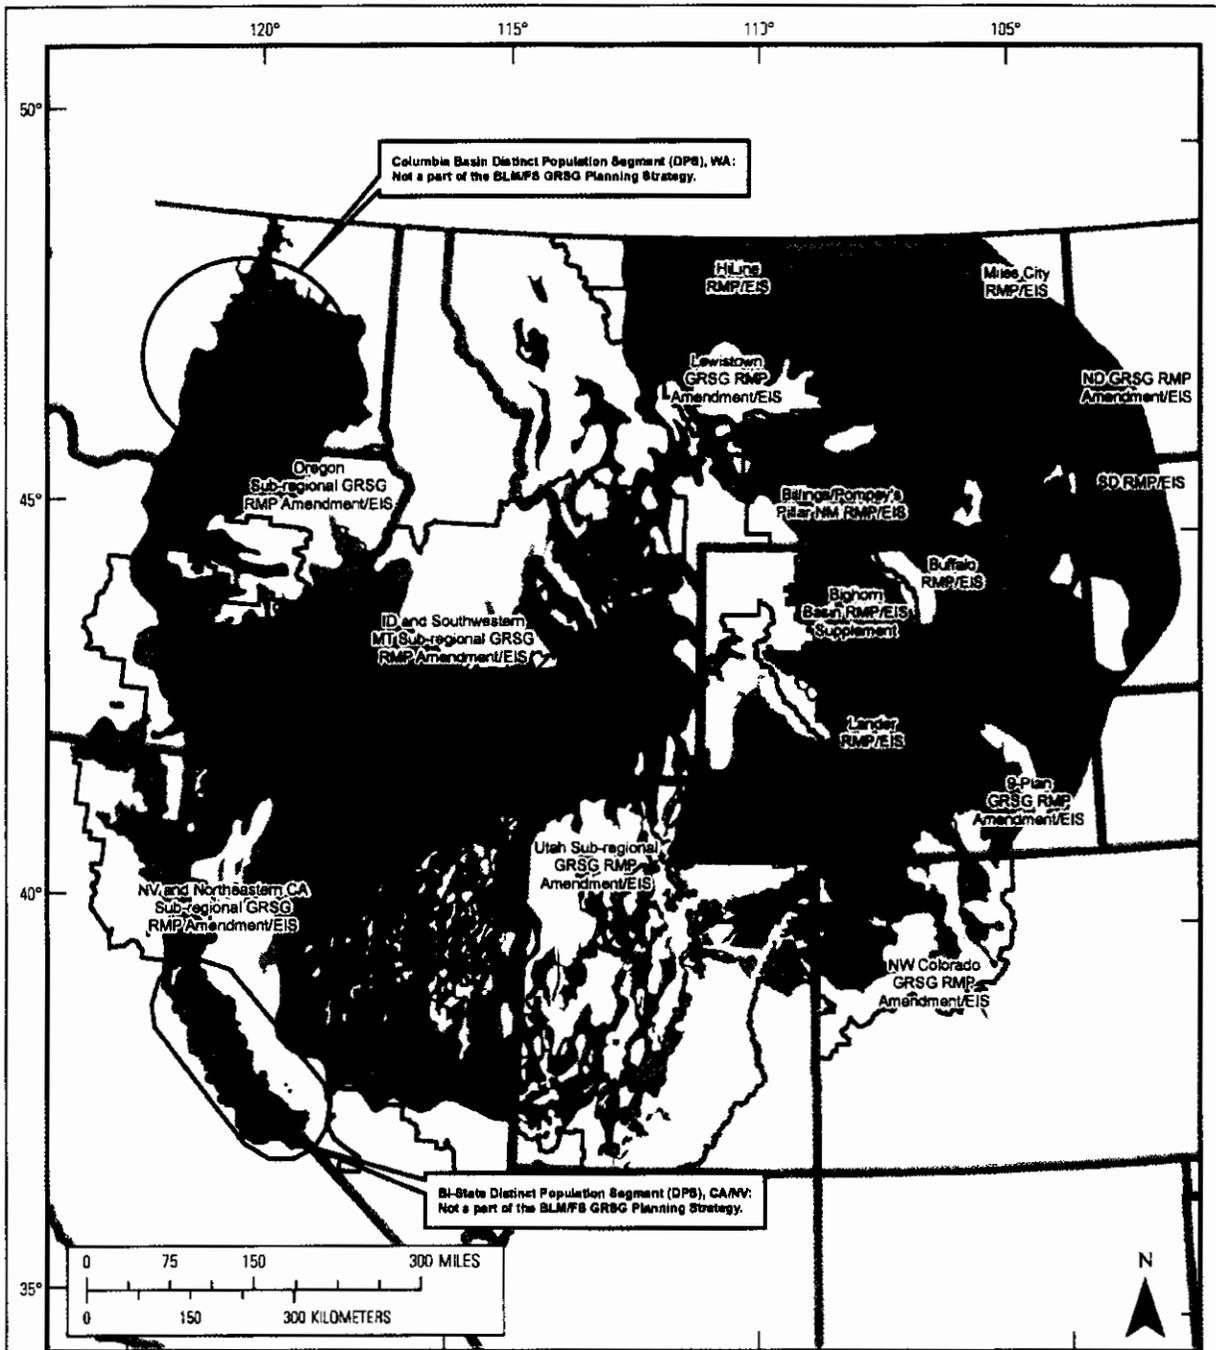

The FWS, BLM and USFS coordinate regularly and at multiple levels on local to regional to national teams regarding the BLM/USFS planning processes. The agencies met as a “federal family” to kick off the planning process, met again earlier this year, and will again meet at the end of September to trouble-shoot and come to agreement on how to most effectively move the planning process to successful completion.

Within the FWS, greater sage-grouse are found in three administrative regions (Regions 1, 6, and 8); Region 6 has lead coordination responsibility. The FWS employs a “field management team” structure composed of Ecological Services office supervisors in each of the eleven states and appropriate regional leadership. The field management team elevates issues, challenges, solutions through the FWS leadership. This team meets monthly by teleconference and has hosted two in-person management meetings this year to share, coordinate approaches, and provide consistent guidance and recommendations across the agency. FWS recently hosted a meeting of the field management team and NRCS’ Sage-grouse Initiative leadership to boost coordination and information exchange with NRCS.

ATTACHMENT 4

COMMON ELEMENTS IN EACH OF THE 15 EISs – COMPARISON WITH THE LANDER RECORD OF DECISION

Common Elements within Each EIS	Lander RMP/EIS Approach
Refine data and maps with State collaboration	Uses data collected in collaboration with WY and consistent with the PACs from FWS' Conservation Objectives Team ("COT") Report
Use <i>Baseline Environmental Report</i> ("BER") on a range-wide scale	Incorporated preliminary BER information
Analyze the conservation measures in the <i>National Technical Team</i> ("NTT") Report	BLM reviewed the Lander RMP and EIS to ensure incorporation and analysis of the NTT Report's recommendations
Analyze State plan in at least one alternative	BLM-WY has worked with WY in the development of the Lander RMP and EIS
Analyze conservation measures from the Dec. 2011 – Mar. 2012 public scoping period	BLM concurred that public input had been sufficiently considered
Commit to an adaptive management that will provide regulatory certainty to the FWS	ROD commits to adaptive management, and BLM-WY will coordinate with WY to implement
Use effectiveness monitoring framework	Effectiveness monitoring framework included and will be updated through adaptive management
Develop a mitigation plan that will comply with BLM's new draft regional mitigation manual	The ROD will be issued prior to issuance of the finalized manual
Integrate FWS' COT report within the EIS	A Supplemental Information Report has been prepared and included with the ROD to address the COT report

**GRSG Priority Areas for Conservation (PACs)¹, Current Range², and Historic Range³

West-Wide Greater Sage-grouse, Gunnison Sage-grouse, and Fire Perimeters 2000-2013 - August 27, 2013 -

Legend

- Greater Sage-grouse:
 - Preliminary Priority Habitat (PPH)
 - Preliminary General Habitat (PGH)
- Gunnison Sage-grouse:
 - Proposed Occupied Habitat (POH)
 - Proposed Unoccupied Habitat (PUH)
- Fire Perimeters 2000-2013:
 - State Boundary
 - BLM District Office Boundary
 - BLM Field Office Boundary

DESCRIPTION:

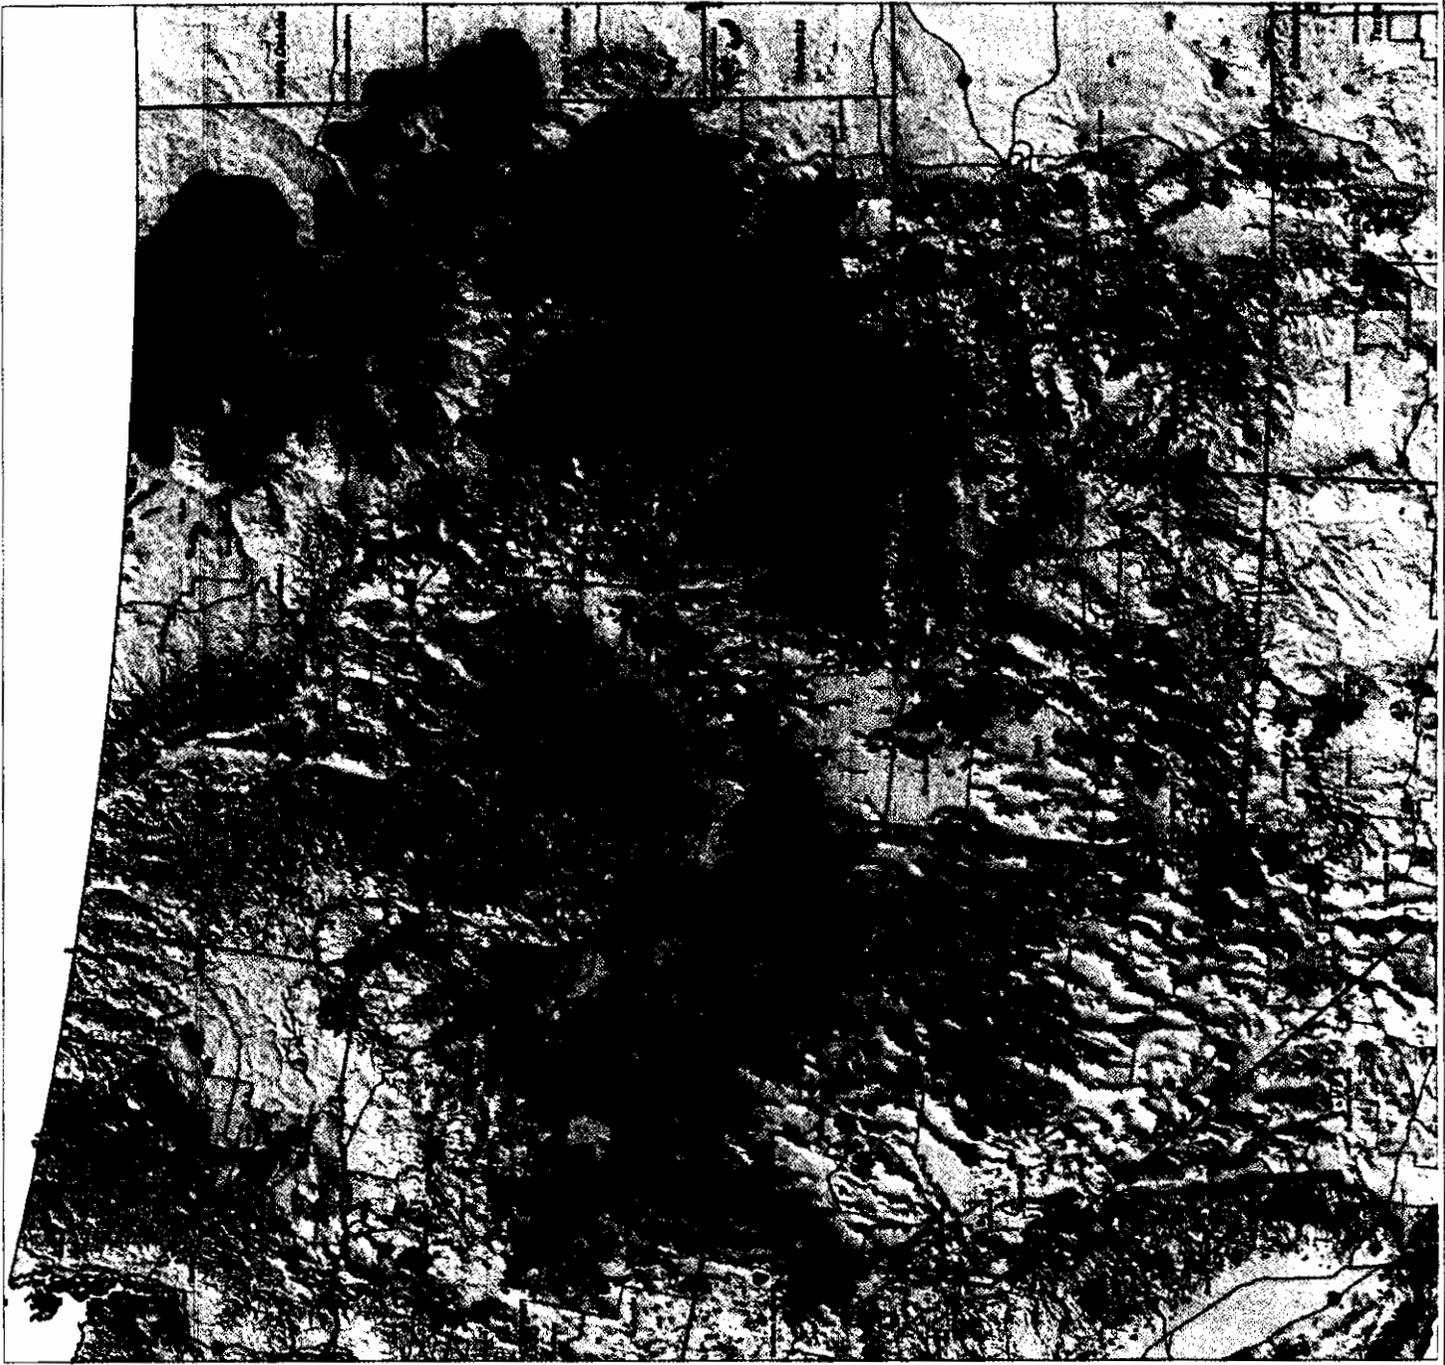

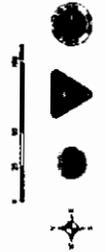

Greater Sage-grouse:
Preliminary General Habitat (PGH):
 Areas of relatively intact sagebrush communities which provide current or future habitat requirements for Greater Sage-grouse. PGHs are based on the best available information and are subject to change as more information becomes available. PGHs should be placed on areas where the greatest potential for recovery is expected.

Preliminary Priority Habitat (PPH):
 Areas where the quality of the habitat is high and where the greatest potential for recovery is expected. PPHs are based on the best available information and are subject to change as more information becomes available. PPHs should be placed on areas where the greatest potential for recovery is expected.

Gunnison Sage-grouse:
Proposed Occupied Habitat (POH):
 Areas of suitable habitat known to be used by Gunnison Sage-grouse within 10 years of completion of the Range-wide Conservation Plan (RCP). As such, POHs are based on the best available information and are subject to change as more information becomes available. POHs should be placed on areas where the greatest potential for recovery is expected.

Proposed Unoccupied Habitat (PUH):
 Areas of suitable habitat known to be used by Gunnison Sage-grouse within 10 years of completion of the RCP. As such, PUHs are based on the best available information and are subject to change as more information becomes available. PUHs should be placed on areas where the greatest potential for recovery is expected.

- + Today's Events In Washington.

LAST LAUGHS:

- + Late Night Political Humor.

DOI in the News:

MICHAEL CONNOR RECEIVES "GLOWING REVIEWS" DURING SENATE HEARING. The [Albuquerque \(NM\) Journal](#) (9/18, 288K) reports that Michael Connor, who is nominated by President Barack Obama to be second-in-command at the Interior Department, "received glowing reviews and friendly questions at his Senate energy committee confirmation hearing on Tuesday." Connor's nomination is "expected to clear the committee easily," and he was praised by former Sen. Jeff Bingaman, Sen. Tom Udall, and Sen. Martin Heinrich. The article notes that "in questioning Connor, senators largely stuck to parochial issues and none indicated any displeasure over his tenure as director of the Bureau of Reclamation."

The [E&E Daily](#) (9/17) reports that both committee Chairman Ron Wyden and ranking member Lisa Murkowski pledged to support the confirmation of Connor. Wyden said, "Mike has demonstrated his integrity, his knowledge, his commitment to public service and his ability to bring people together and to solve problems." However, Sen. Jeff Flake said that "he would be reluctant to support Connor's nomination if the Interior Department does not commit to allowing a public hearing in Arizona to discuss a rule to expand recovery efforts for Mexican wolves, a proposal he argued would significantly affect Arizona landowners."

The [Las Cruces \(NM\) Sun-News](#) (9/18, 59K) reports that Udall lauded "Connor's integrity and work for" the BOR, saying "he's the ideal person to carry out the duties."

Also covering the story is [Politico](#) (9/18, Restuccia, 467K).

Connor: Expect Middle Rio Grande Water Leasing Pilot Program By 2014. The [Albuquerque \(NM\) Journal](#) (9/18, 288K) reports that Connor said that a pilot "water leasing" program in the Middle Rio Grande Conservancy District can be expected by 2014. During questioning, Connor called water leasing "absolutely one of the most critical tools."

FOREST COALITION URGES CONGRESS TO ADDRESS FUNDING SHORTFALL. The [E&E Daily](#) (9/17) reports that a coalition of conservation, logging, state forestry and recreation groups have "urged the House to restore \$600 million that the Forest Service siphoned from other agency programs to fight wildfires and to find a more sustainable way to fund future firefighting efforts." The coalition also "urged lawmakers to authorize a longer extension of stewardship contracting, a popular tool the Forest Service uses to combine logging operations with forest restoration work, which helps gird forests against future wildfires."

CIVIL RIGHTS COMMISSIONERS OPPOSE TRIBAL STATUS FOR NATIVE HAWAIIANS. The [Washington Times](#) (9/18, Richardson, 417K) reports that members of the US Commission on Civil Rights are "urging" the President to "reject Democratic requests to grant tribal status to Native Hawaiians by executive order, saying it would be 'unwise and unconstitutional.'" Four of the eight commissioners signed a September 16 letter to the President saying, "Neither Congress nor the president has power to create an Indian tribe or any other entity with the attributes of sovereignty. Nor do they have the power to reconstitute a tribe or other sovereign entity that has ceased to exist as a polity in the past. Tribes are 'recognized,' not created or reconstituted."

INTERIOR SAYS NO NEED FOR LABOR OMBUDSMAN'S OFFICE. The [Saipan Tribune](#) (9/18, 641) reports that acting US assistant interior secretary for insular areas Eileen Sobeck told Senate Energy and Natural Resources Committee chair Ron Wyden (D-OR) that "since the passage of a law placing CNMI immigration under federal control, 'it has been assumed' that the need for the US Labor Ombudsman's Office 'would not be permanent.'" Sobeck told Wyden that "since the passage of the CNRA, it has been assumed that need for the Office would not be permanent." According to the article, "Sobeck's letter seals the fate of the ombudsman's office, which is set to close at the end of fiscal year 2013 on Sept. 30."

LAWSUIT CLAIMS SLAUGHTER IN HORSE ROUNDUP PROGRAM. The [Courthouse News](#) (9/17, 7K) reports that in their lawsuit against Interior Secretary Sally Jewell, FWS director Daniel Ashe and Sheldon National Wildlife Service director John Kashbohm, Bonnie Kohleriter and Laura Leigh claimed that "a 'feral' horse program meant to help and conserve wild horses in Nevada is instead leading the beasts to slaughter." According to the complaint, "though Sheldon has used the round-up program since 2009 to put Nevada's wild horses in good homes through an adoption process, one bad adoption agent made it through the process." The two women are

seeking "an injunction under the Administrative Procedures Act and their constitutional right to observe the roundup."

SEN. MURKOWSKI CRITICIZES OBAMA ADMINISTRATION ON NATIVE HEALTH FUNDING NEEDS. The [Alaska Native News](#) (9/18, 245) reports that Sen. Lisa Murkowski on Monday "criticized the Obama Administration's proposal to short-fund the operation costs of tribally run hospitals, despite last year's historic Supreme Court ruling requiring full funding of contract support costs." In a statement, Murkowski said, "I am deeply troubled by the Indian Health Service's continued resistance to the Supreme Court's ruling last Summer that the federal government must pay the full amount of contract support costs to our tribes' tireless and, oftentimes, thankless care for their people. This is not merely justice denied, but justice ignored." The article notes that earlier this year, Sen. Murkowski questioned Interior Secretary Sally Jewell "about only consulting tribes 'after the fact' on contract support costs."

AS COLORADO FLOODWATERS DROP, 581 REMAIN UNACCOUNTED FOR. The CBS Evening News (9/17, story 5, 2:35, Pelley, 5.58M) broadcast that although floodwaters in Colorado began to recede, the military continued its rescue operations and saved 800 "more stranded Coloradans." Nevertheless, 581 people "are still unaccounted for" and "by one estimate, 19,000 homes were damaged or destroyed." In addition, "More than 400 miles of road has washed away." The piece added that "state officials say it could take a month to get a full picture of the damage."

Colorado Flooding Shuts Down Oil And Gas Well Production. According to Reuters (9/18, Houlihan) reporting on the flood damage in Colorado, hundreds of oil and gas wells are not operating in light of the floods. For instance, Encana Corp counted almost 300 wells it was forced to shut down, but company spokesperson Doug Hock commented, "We still have not found any spills of any reportable quantity, but cannot rule out future discoveries until we get to everything."

The Denver Post (9/18, Jaffe, 949K) also reports, writing that nearly 1,900 wells have been shut off, while hundreds of industry employees are going through well sites to inspect and repair.

ADDITIONAL COVERAGE OF PROTECTION OF SOUTHERN WHITE RHINO. Additional coverage of the action to protect the southern white rhinoceros under the Endangered Species Act was provided by [KHOU-TV Houston](#) (9/18, 125K) and the [Africa Science News Service](#) (9/18).

MILITARY VETERANS FIGHTING FIRES. For the [Stars And Stripes](#) (9/18, Madalena, 9K), Michael A. Madalena, a crew leader with the Student Conservation Association's Veterans Fire Corps, writes that military veterans have been combating "the nearly 32,000 wildfires" that the Interior Department "says have burned more than 3.4 million acres nationwide this year." He notes that "it's a challenge for many veterans to find a job and build a career after returning home from military service." According to Madalena, the Veterans Fire Corps "addresses all of that: taking advantage of military training — and especially a warrior's readiness to adapt to and overcome rapidly changing conditions — in order to confront a continuing growing danger of national significance."

FORMER SIERRA CLUB CHAIR ARGUES US ENERGY EXPORTS HURTING "STRATEGIC ADVANTAGES" OF PRODUCTION BOOM. In a 1,500-word essay in Bloomberg News (9/17, 1.91M), former Sierra Club chair Carl Pope discusses the widely-circulated idea that the US is becoming the new Saudi Arabia after its surge in oil and natural gas production. Pope concedes that although it's correct to say that America currently "has access to abundant supplies" of cheap natural gas that could transform "the US economy," political leaders are giving "away a vast chunk" of the resources, along with any "strategic advantages" they may bring. He notes that the first signs of this happened when WTI prices sunk below Brent prices after "oil traders reversed two small pipelines" to carry crude to export docks to send to Latin America and Europe, rather than to Gulf Coast refineries and Cushing, OK. He argues that US exports of LNG and oil are "part of the biggest story" of the energy boom: that the US is "squandering" the advantages that "cheap fuel and competitive manufacturing" bring and instead favoring "an energy-export policy that has no larger economic, political, environmental or moral rationale."

America's Great Outdoors:

National Park Service:

GETTYSBURG HOPE TO OBTAIN ORIGINAL COPY OF LINCOLN'S ADDRESS FOR 150TH ANNIVERSARY.

The [Washington Post](#) (9/17, Press, 4.28M) reports that officials in Gettysburg are seeking to "borrow one of the nation's most historic documents — an original copy of Lincoln's Gettysburg Address." According to the article, "the foundation that runs Gettysburg National Military Park's museum and visitor center wants to borrow a copy held by the Library of Congress and put it on public display as part of its celebration of the 150th anniversary of Lincoln's famed speech." However, "the library does not lend either of its two copies of the speech because of their fragility and priceless nature."

RANGER SHOTS MAN AT LAKE ROOSEVELT NATIONAL RECREATION AREA. The [E&E Daily](#) (9/17) reports that last weekend, a noise violation at one of Lake Roosevelt National Recreation Area's campgrounds "ended with a park ranger shooting a 43-year-old man, possibly in front of his family." Both the NPS and the Washington State Patrol investigating the confrontation.

Also reporting on the story are the [Spokane \(WA\) Spokesman-Review](#) (9/17, 214K) and the [Oregon Public Broadcasting](#) (9/18, 4K).

YOSEMITE REOPENS TIOGA ROAD AS RIM FIRE EBBS, BUT SOME CAMPS CLOSED. The [Los Angeles Times](#) (9/16, Forgione, 3.07M) reports that Yosemite National Park officials "reopened the east-west California 120 last weekend, though the Rim fire continues to burn and has kept the Tuolumne Grove of sequoias and some campgrounds closed."

NPS SEEKS WATER MANAGEMENT DESIGNATION FOR WEST HAWAII AQUIFER. The [West Hawaii Today](#) (9/18, 26K) reports that last week, Kaloko-Honokohau National Historical Park Superintendent Tammy Duchesne "took a step toward getting permanent protections for the Keauhou aquifer by requesting the state's Commission on Water Resource Management to give the area a water management designation. "In announcing the petition, park officials said, "Since the park's establishment, substantial groundwater development has occurred within the Keauhou aquifer. Despite six years of efforts by the Water Commission, the park and other stakeholders to address the potential impacts of proposed development at the Kona Water Roundtable and other venues, no plan has been produced to protect water-dependent cultural and natural resources from the cumulative effects of groundwater withdrawals. Given the sensitivity and importance of these resources and importance of water to all stakeholders, including the community living in this area, proactive management of groundwater withdrawals is urgently needed."

EFFORT SEEKS TO SAVE HISTORIC TAMIAMI TRAIL WAY STATION. [USA Today](#) (9/17, Williams, 5.82M) reports that "even though it's on the National Register of Historic Places, funding hasn't been easy to find" for the Tamiami Trail Way Station. Bob Degross, chief of interpretation and public affairs for Big Cypress National Preserve, said, "We want to stabilize and restore it, but it's in great disrepair and about the only remaining original (portion) that can be reused is the roof."

ADDITIONAL COVERAGE OF NEW NPS ONLINE SITE FOR EDUCATORS. Additional coverage of the new NPS online site for educators was provided by the [Saipan Tribune](#) (9/18, 641).

PAPER: EFFORT TO BUY NATURAL BRIDGE A "LONG SHOT". The [Staunton \(VA\) News Leader](#) (9/17, 9K) editorializes that the Natural Bridge will go to auction in November and "that a private group — The Friends of the Natural Bridge — is trying to raise money to buy the property and have it donated to either the National Park Service or the state park system." While "a long shot," the paper hopes "it works." According to the editorial, "for the region's economic, educational and historical good, it is vital that Natural Bridge remain well preserved and open to all."

HUNTING ACCESS PRAISED FOR ENERGIZING PLAN FOR NATIONAL PARK. The [Waterville \(ME\) Morning Sentinel](#) (9/18, 59K) editorializes that "in spite of the opposition — largely from sportsmen, snowmobilers and the forest products industry — Elliottsville Plantation Inc., the group formed by Roxanne Quimby to manage her vast land holdings and push for a park, has continued to make its case." The paper notes that "Elliottsville Plantation last week opened the land near Baxter to hunting," which "shows the group sees the value of a balanced approach to recreation." It concludes that "rather than as a cause for concern, the proposed conservation of 150,000 acres should be seen as an opportunity to help the region, and protect some of Maine's most treasured

land."

SIERRA CLUB REPRESENTATIVE DOWNPLAYS OUTDOOR RISKS. In an op-ed for the [Long Beach \(CA\) Press-Telegram](#) (9/17, Bare, 194K), Stacy Bare, director of the Sierra Club's Mission Outdoors program, says that "there's no trend of tragedy," despite stories about mishaps in outdoors recently. Bare asserts: "You are more likely to be killed in this country while driving to the gym for a workout than you are while hiking in a park." As such, Bare concludes that "the real challenge is not to make the outdoors safer but to increase dramatically the number of prepared, passionate people who are getting outside, bringing out new people to explore the majesty of our country, and in the process leading healthier, happier, and even less stressful lives."

Bureau of Land Management:

MEDIA GROUPS CLAIM BLM LIMITING ACCESS TO WILD HORSE ROUNDUPS. The [Laramie \(WY\) Boomerang](#) (9/17, 17K) reports that the Reporters Committee on Freedom of the Press claims the BLM is "using safety concerns as an excuse to limit media access to wild horse roundups across the West in violation of the First Amendment." According to the article, "the National Press Photographers Association and more than a dozen newspaper companies joined the committee in a friend-of-the-court brief filed in the 9th Circuit US Court of Appeals late Monday to back an advocacy group waging a series of legal battles over mustang roundups in Nevada." The media groups said that Horseback Magazine photographer Laura Leigh and others "have a right to see what happens" during the roundups, and urged the court to be "highly skeptical of assertions by the BLM that restrictions placed on media access were done for administrative convenience and/or to satisfy safety concerns."

Also reporting on the story are the [Seattle Post-Intelligencer](#) (9/18, 768K), the [Ogden \(UT\) Standard-Examiner](#) (9/17, 147K), and the [Reno \(NV\) Gazette-Journal](#) (9/17, 165K).

CONGRESSIONAL BUDGET OFFICE CONFIRMS HOUSE FORESTRY BILL WOULD INCREASE LOGGING. The [Salem \(OR\) Statesman Journal](#) (9/17, Chebium, 104K) reports that the Congressional Budget Office said Tuesday that "a House forestry bill that contains O&C language pushed by three Oregon lawmakers would 'substantially increase' logging on federal lands." The CBO also said "tax savings would be negligible over the next five years if the bill sponsored by House Natural Resources Committee Chairman Doc Hastings, R-Wash., becomes law this year," largely because "revenue from ramped-up timber sales would be offset by the loss of 1.4 million acres from the Bureau of Land Management's portfolio."

BLM TO AUCTION TO SELL 28 PARCELS IN NEVADA. The [Las Vegas Review-Journal](#) (9/18, Robison, 437K) reports that the BLM has slated an auction on January 16 auction to sell 28 parcels totaling 440 acres in Nevada. The article notes that January's scheduled sale is the second-largest offering since November 2005, when the bureau auctioned off more than 2,900 acres across the Las Vegas Valley.

NEW MEXICO LAND COMMISSIONER PROPOSES CREATING ADDITIONAL STATE TRUST LANDS. The [Ruidoso \(NM\) News](#) (9/18, Brooks, 39K) reports that New Mexico State Land Commissioner Ray Powell is "proposing a sustainable solution to generate more money for education while creating jobs and without putting the Land Grant Permanent Fund at risk." Powell's proposal "could be accomplished by having the state acquire a small percentage of federal lands that are designated as 'disposal lands,' or lands that no longer fit the mission" of the BLM. Powell said, "Often these federal 'disposal lands' are located around growing urban areas. Some are located in prime areas for building a solar array or a wind farm. Such lands are a perfect fit for the New Mexico State Land Office, whose mission is to earn money from commercial development, renewable energy, grazing, rights of ways, and oil, gas and mineral extraction. Acquiring these lands would create jobs for New Mexicans and earn as much as \$60 million a year for education."

Fish and Wildlife Service:

REP. CRAWFORD REASSURED TROUT HATCHERIES TO REMAIN OPEN. The [Arkansas News](#) (9/18, 1K) reports that the Obama Administration will "keep federal fish hatcheries operating for now and won't close them without a lengthy public review," Rep. Rick Crawford said on Tuesday. Crawford said the FWS had "reassured him there are no 'imminent' plans to close the fish hatcheries, including those in Arkansas at Greers Ferry and Norfolk." Crawford said that "he plans to work toward a permanent solution to insure that the hatcheries remain

open and jobs supported by these facilities are secure.”

Also covering the story are the [Pine Bluff \(AR\) Commercial](#) (9/18, 36K) and the [Black Hills \(SD\) Pioneer](#) (9/18, 11K).

FWS PLACES TWO SITES IN URBAN PARTNERSHIP PROGRAM. The [Sammamish \(WA\) Review](#) (9/17, Cetron) reports that the FWS has placed Lake Sammamish, and Masonville Cove in Baltimore, in its Urban Partnership Program. The Federal government will spend “\$30,000 to fund early planning of the project around Lake Sammamish, which might help people to better understand and enjoy the lake and its wildlife.”

FWS CRITICIZED OVER BANDON MARSH. In an op-ed for the [Coos Bay \(OR\) World](#) (9/18, Taylor, 34K), Rob Taylor, a founder of the group Coos County Today, writes that in November 2011, the FWS “sent a letter to owners whose properties lay within an area proposed for expansion of the Bandon Marsh outlining a proposal to acquire their land,” and since then, the service has “tried to bully the people of Coos County while displaying only indifference to the needs of farmers, their livelihoods, and our local rural economy.” He notes that what the FWS “failed to mention in their report is that their work on this project would also spawn millions of mosquitos — destroying residents’ quality of life, harming livelihoods and endangering the health of humans, animals, and wildlife.” Taylor claims that “the only real remedy to this problem is a class-action lawsuit” against the FWS that “uses the force of the courts to get the agency to replace the dikes and drain the marsh.”

US Geological Survey:

NASA, USGS LAUNCH STUDY OF NEXT-GENERATION GLOBAL LAND IMAGING SYSTEM. The [Hispanic Business](#) (9/18, 110K) reports that NASA and the USGS will “kick off a quest for an innovative and affordable space-based system to extend the Landsat data record for decades to come with a public forum and call for ideas Wednesday, Sept. 18.” The Sustainable Land Imaging Architecture Study Industry and Partner Day will be held “from 1-4:30 p.m. EDT in the NASA Headquarters Webb Auditorium, 300 E St. SW, Washington.” Matt Larsen, USGS Associate Director for Climate and Land Use Change, said, “Landsat data are used by a broad range of specialists to assess some of the world’s most critical issues – the food, water, forests, and other natural resources needed for a growing world population. We are happy to participate in the NASA study to help develop and refine the long-term future of this program, while at the same time recognizing that it is vital that we maintain our Landsat observational capabilities over the short-term to ensure that no data gap occurs.”

Securing America’s Energy Future:

Renewable Energy:

JUDGE RULES IN FAVOR OF WIND PROJECT. The Salem (OR) Capital Press (9/17, 113K) reports that a Federal judge ruled against environmentalists who sought to block a BLM-approved transmission line to a wind energy project in Oregon, although the delays from litigation have caused a new batch of problems. Lower natural gas prices have made competition tougher for renewable energy, said Chris Crowley of Columbia Energy Partners, which proposed the wind project. In addition, a power purchase agreement with a utility expired, as did a tax incentive. The BLM approved the project in 2011 but environmental groups sued to have the approval overturned, and US District Judge Michael Morsman has dismissed those arguments. Columbia Energy Partners is now considering its options for the transmission project, given the market shifts.

NECROPSY UNDERWAY FOR PEREGRINE FALCON FOUND WOUNDED AT CALIFORNIA SOLAR PLANT. A remarkably long report on the website of KCET-TV Los Angeles (9/17, Clarke, 15K) writes that a peregrine falcon “was found mortally injured at the Ivanpah Solar Electric Generating System in the Mojave Desert two weeks ago.” The US Fish and Wildlife Service received the bird, but could not prevent its death, the cause of which will be determined by a USFWS forensics lab. According to the article, one possible cause of death that the forensics will examine is “the issue of the concentrated solar energy Ivanpah’s mirrored heliostats focus on the facility’s three 459-foot power towers, also known as ‘solar flux.’” While the falcon may also have died mistaking the reflective solar panels for sky, the article stresses that “solar flux figures large as an unresolved threat in the California Energy Commission’s Final Staff Assessment on Palen, and may well figure into public comment at hearings on the project being held this week by the Bureau of Land Management.”

STUDY: PALEN ENVIRONMENTAL IMPACT UNCERTAIN. Fierce Energy (9/17, Lundin) reports that the California Energy Commission released its final staff assessment (FSA) on licensing for the proposed Palen Solar Electric Generating System Project, which found that the project would have "significant environmental impacts even with the implementation recommended mitigation measures." Additionally, the 500 MW solar thermal project would not follow all laws, ordinances, regulations, and standards (LORS) in the visual resources area, and the Commission said it was questionable whether measures regarding birds would lessen potential impact to "less than significant levels" in the biological resources area. The FSA will act as the testimony of Commission staff at hearings to review the project.

FIRST SOLAR PLANS FACILITY IN NEVADA'S AMARGOSA VALLEY. In his column for the Las Vegas Review-Journal (9/18, 437K), John L. Smith writes that First Solar Inc. met with residents of Amargosa Valley in Nevada to announce its intention to build a 65-megawatt solar project. Smith says that if the project gets off the ground, it could represent real progress toward making Nevada a more environmentally friendly state. Some residents are concerned about the project, especially after the Solar Millennium project failed after myriad promises and Department of Interior approval. Smith writes that First Solar's track record does not indicate a similar failure ahead, but rather one more step toward greener policy in Nevada.

Onshore Energy Development:

WYOMING GAME AND FISH, PETROLEUM COMPANY COOPERATE ON GROUSE. The San Francisco Chronicle (9/18, Gruver, 2.88M) reports that as "Wyoming's oil boom continues to encroach on areas populated by sage grouse," the Wyoming Game and Fish Department has "been working with a petroleum company to develop a plan to guide oil drilling in a vast area of state-designated sage grouse habitat in east-central Wyoming." According to the article, Laurie Heath of Chesapeake Energy and Bob Budd, executive director of the Wyoming Wildlife and Natural Resource Trust, "plan to present the latest developments with the proposal on Wednesday when the Sage Grouse Implementation Team, a panel of landowners and government, industry and conservation officials, is scheduled to meet in Cheyenne." The article notes that "the plan seeks to concentrate future drilling in already disturbed portions of the Douglas Core Area while trying not to disturb new portions of the nearly 140-square-mile zone a few miles east of Douglas."

Also reporting on the story is the Casper (WY) Star-Tribune (9/18, 90K).

DECLINING DOMESTIC COAL MARKET FORCES MINE, TRIBE TO LOOK AT EXPORTS. Environment & Energy Publishing (9/18, Quiñones, 705) reports in depth on coal production in Montana as the shifting energy market causes producers to look at other alternatives for shipping coal. At Cloud Peak Energy's Spring Creek Mine in the Powder River Basin, the company looks to expand its overseas exports. The company is also looking to open up another mine on the Crow Indian Reservation and developing about 1.4 billion tons of coal. The Bureau of Indian Affairs approved a lease and exploration agreement between Cloud Peak and the Crow, and the project could prove to be a huge benefit for the tribe, especially if exports go ahead as planned.

CALIFORNIA FRACKING STUDY SETTLES LAWSUIT. The San Francisco Chronicle (9/17, Egelko, 2.88M) reports that the Obama administration reached a "tentative settlement" in a lawsuit over oil and gas drilling by agreeing to conduct a statewide study of fracking and its potential environmental impacts. The settlement was announced in a Federal court filing Monday. No details were provided, by Brendan Cummings of the Center for Biological Diversity mentioned the Bureau of Land Management's earlier promise to perform a new fracking review after two oil leases were blocked in April. "This will be the first statewide assessment of fracking in California," said Cummings, adding that the review would likely take over a year. The case involved two leases approved by the BLM in Fresno and Monterey counties, which were blocked after US Magistrate Paul Grewal said the agency had not conducted the necessary analysis of fracking risks.

ADDITIONAL COVERAGE OF OPPOSITION TO FEDERAL PLAN FOR OIL AND GAS LEASING AT SAN RAFAEL SWELL. Additional coverage of the opposition to the federal plan for oil and gas leasing at San Rafael Swell was provided by the Columbus (IN) Republic (9/18, 80K), the Provo (UT) Daily Herald (9/18, 102K), the Oklahoman (9/18, 345K), FuelFix (9/17, 7K), and the Deseret (UT) News (9/18, 274K).

OP-ED: NOTHING SACRED TO GAS AND OIL DEVELOPMENT. The Pacific Northwest (WA) Inlander (9/17, 126K) carries an op-ed by Dave Stalling, who voices his opposition to gas and oil development around northwest Montana's Chief Mountain. Stalling argues that the area's pristine natural beauty, thriving animal populations, and the mountain's sacred status to the Blackfeet and other First Nation people should be reason enough not to develop gas and oil. Stalling laments the Bureau of Indian Affairs' leasing of an area near the mountain for gas and oil development, asking, "what protection does a sacred place have these days?"

OPINION: FRACKING EMISSIONS STUDY PROVOKES "KNEEJERK REACTION" BY OPPONENTS. An opinion column for the Chicago Tribune (9/17, Lynch, 2.32M) discusses the reactions to an emissions study observing shale wells that found "the wells do not appear to be emitting significant amounts of methane, which is an important finding." The column points to "the bias in some analysts," such as the complete rejection by Physicians, Scientists and Engineers for Healthy Energy of what it called a "fatally flawed" study, as an example of commentary with a motive. The writer finishes by comparing the "scientists, and some media and industry observers" who "seem to have no trouble admitting the limitations even of a study whose results they find agreeable" with "the kneejerk reactions from some fracking opponents...highly informative of their prejudice."

Offshore Energy Development:

STUDY FINDS INCREASED CANCER RISK FOR DEEPWATER HORIZON SPILL CLEANUP WORKERS. The E&E Daily (9/17) reports that workers "hired to clean up the Gulf of Mexico region during the 2010 Deepwater Horizon oil spill have an increased chance of developing leukemia, liver cancer and other illnesses, according to a report published today." The study, published in the Journal of American Medicine and conducted by the University Cancer and Diagnostic Centers in Houston, focuses on the potential consequences for the workers.

CONTROVERSY CONTINUES OVER SHELL'S ARCTIC EXPLORATION. PBS (9/17, Jacobsen, 804K) reports in depth on Royal Dutch Shell Oil's operations in the Arctic, the first such exploration in the region in 20 years, which has also "been fraught with accidents and controversy." Even after the Bureau of Safety and Environmental Enforcement granted drilling permits for Shell in 2012, a series of accidents raised concern among environmentalists. The Department of the Interior began reviewing Shell's operation after a ship ran aground, and former Interior Secretary Ken Salazar said the company would be forbidden from Arctic drilling without additional safety measures. Several environmental groups sued the BSEE for allowing Shell to drill, and said an EPA fine for Clean Air Act violations was not harsh enough. Despite criticism, Shell president Marvin Odum in January said the 2012 drilling was "done safely; it was done from an environmental perspective, the way we wanted it done."

ENVIRONMENTALISTS CLAIM SEISMIC TESTING COULD LEAD TO MARINE MAMMAL DEATHS. The Asbury Park (NJ) Press (9/16, 324K) reports that seismic air gun testing in Atlantic ocean waters "to survey for oil and gas could injure or kill as many as 138,500 marine mammals," according to an environmental impact statement drafted by the Interior Department. On Monday, Nancy Sopko, an advocate for the environmental group Oceana, which hosted a public panel discussion at Monmouth University, said "Seismic testing is the first step toward drilling in the Atlantic." The article notes that "Oceana, which as a policy opposes expanded offshore drilling, is trying to get President Barack Obama's administration to withhold permits that would allow seismic testing."

Tackling America's Water Challenges:

BOR PLEDGES TO IMPROVE PROTECTIONS AT DELTA WATER PUMPS IN CALIFORNIA. The E&E Daily (9/17) reports that the BOR has "awarded a \$4.3 million contract to install new fish protection devices at its water diversion pumps in the Sacramento-San Joaquin Delta." Contractor Valentine Corp. will start "installing new self-cleaning louvers in January, helping curb losses to endangered species including salmon and delta smelt."

RAINFALL INCREASES CABALLO, ELEPHANT BUTTE WATER LEVELS. The Las Cruces (NM) Sun-News (9/17, Soular, 59K) reports that a recent rain storm helped elevate the water levels at Caballo Reservoir and Elephant Butte Lake, mitigating some of the drought and benefiting farmers who rely on the lakes. According to the Bureau of Reclamation, Elephant Butte held about 93,000 acre-feet last week, and 29,400 acre-feet had been added by Tuesday bringing the total to 122,700. The Bureau says the lake held 114,000 acre-feet at the same time last year. Caballo Lake received 25,200 acre-feet. While the rainfall was welcome, Bert Cortex of the Bureau

of Reclamation said Elephant Butte is about 6% full after the storm, and Caballo is 17% full.

KLAMATH RIVER ALGAE A HEALTH HAZARD. The Eureka (CA) Times Standard (9/17, 76K) carries a press release from the California Regional Water Quality Control Board, warning recreational users of the Klamath River to avoid direct contact with blue-green algae blooms due to the health risks of cyanobacteria. Those using the river where the algae is blooming are urged against consuming the water in any way, and keeping pets and young children away from water containing algae.

CALIFORNIA GOV. BROWN URGED TO SIGN THE SALTON SEA BILL. In an editorial, the Palm Springs (CA) Desert Sun (9/17, 110K) urges California Gov. Jerry Brown to sign Assembly Bill 71, which would restore power to the Salton Sea Authority. The paper argues that "California's largest lake has been shrinking and the situation will get worse in a few years when water rights are transferred from the Imperial Valley to San Diego County," and "exposing more of the lake bed will send fine dust into the air, exacerbating the already high rates of asthma for the sea's neighbors."

COLUMN REFLECTS ON TETON DAM FAILURE. In a column for the Idaho State Journal (9/17, 54K), Chris Carlson discusses a fishing trip near the former site of the Teton Dam, and reflects on the dam's collapse in 1976. In addition to the damage caused by the flood, Carlson also discusses the thriving fishery that now exists in the area. Carlson writes that he and his friends "discussed the hubris that must have existed within the Bureau of Reclamation that allowed them to believe" the dam could be built the way it was. Carlson concludes by echoing the sentiment of a friend who said some were considering rebuilding the dam, and asked, "Why destroy a thriving fishery for a questionable project that would primarily provide more water to grow more crops that would only further depress prices?"

COLUMN: COLORADO FLOODING HAS SILVER LINING. In a column for the Post Independent (Glenwood Springs, CO) (9/17, 27K), Hannah Holm of Colorado Mesa University's Water Center writes that while flooding has ravaged Colorado, the "silver lining" of the situation is that it has ended a drought affecting much of the northeastern part of the state. In addition to counties removed from drought classification, Holm writes that the flood has increased water supply and decreased demand. Less water will be diverted across the Continental Divide, and Holm notes that the Bureau of Reclamation stopped diversions from the Western Slope through the Colorado-Big Thompson Project. Additionally, water-saturated soil could help snowmelt run off into reservoirs rather than being absorbed.

Empowering Native American Communities:

HOUSE MOVES TO BLOCK EXPANSION OF INDIAN CASINOS. Bloomberg News (9/17, Bykowicz, 1.91M) reports that the House on Tuesday passed legislation that would bar the construction of Indian casinos on land distant from a tribe's reservation. The Bush Administration had issued an order blocking such construction, but it was not supported by the Obama Administration. Bloomberg says that "fights" over expanding Indian gaming are "breaking out across the country as the Obama administration rolls back Bush-era restrictions on Native Americans, easing their way into the growing \$27 billion market." The Administration's effort, which is opposed by many state and local governments, seeks to aid Native Americans, who face high unemployment rates.

FEDS ASKED TO STOP PENOKEES MINING. The Superior (WI) Telegram (9/17, 1K) reports that northern Wisconsin tribal leaders have asked the Federal government to stop mining operations in the Penokees, saying the ceded territory must be protected. An Aug. 28 letter to President Obama asks that legal action be prepared by the Department of the Interior to protect the area, citing treaties allowing the tribes to hunt, gather and fish, activities that mining and its resultant pollution would preclude. Although State Senator Tom Tiffany said the Federal government cannot intervene, Bad River Tribal Chairman argues that it is required to, as the state land is in ceded territory. "In real time right now, we know what we need and we need intervention because of all of the efforts to obscure and cloud over GTac's activities in the hydrology and the science of this site," said Wiggins. "We expect from a trust responsibility perspective, we expect the federal government to be there for us and to honor those treaties."

POLL ASKS IF MUSKEGON INDIAN CASINO SHOULD GO FORWARD. MLive (9/17, Alexander, 334K) features a poll for readers, asking if the city of Muskegon should forgo plans for a downtown Indian casino and

move forward with other waterfront development plans. MLive reports that development of a waterfront casino by private developers and the Great River Band of Ottawa Indians has been slow, and city leaders are becoming frustrated, as bonds to cover investment in the site need to be repaid.

Top National News:

OBAMA: PUBLIC NEEDS TO PRESSURE CONGRESS ON GUN CONTROL. Monday morning's Navy Yard shootings continued to dominate the news cycle Tuesday, with many cable news programs devoted exclusively to the aftermath of the tragedy. More so than on Monday, when reports focused on the details of the attack, coverage last night and this morning puts the attack in the context of broader debates over gun control and Federal contractors' security clearances in the wake of the Edward Snowden leaks. While President Obama and some Congressional Democrats made the case that Monday's shootings were another reason to work to limit gun crimes legislatively, nearly all the analyses conclude, as did Senate Majority Leader Harry Reid Tuesday, that there is insufficient support in Congress for virtually any new gun control proposals.

The AP (9/17, Stein) reports that in an interview with Telemundo on Tuesday, President Obama said that "if voters want significant gun legislation to get passed in the wake of the nation's latest mass shooting...they should focus their attention on Congress" because he "had brought the gun debate about as far as he personally could after the shooting last December in Newtown, Conn." The President is quoted as saying, "Ultimately this is something that Congress is gonna have to act on. I have now in the wake of Newtown initiated a whole range of executive actions. We've put in place every executive action that I proposed right after Newtown happened. So I've taken steps that are within my control. The next phase now is for Congress to go ahead and move."

The Washington Post (9/18, O'Keefe, 4.28M) quotes the President as saying, "The overwhelming majority of the American people understand that there's some common-sense gun safety laws that we can put in place that could prevent some of this tragedy from happening."

The Washington Times (9/18, Boyer, 417K) reports that on Tuesday, White House Press Secretary Jay Carney also "blamed Republican lawmakers for blocking President Obama's gun-control efforts." Carney said, "The problem here is not Democrats. The problem here is senators, overwhelmingly from one party, who refuse to do something very simple, which is expand the background check system that everyone believes functions well but needs to function better." According to the Times, Carney also said it was a "cop-out for opponents of gun control to point out that Navy Yard shooter...passed a background check in Virginia." Carney is quoted as saying, "The background check system is an important aspect and an important tool available to law enforcement, and we need to expand it in a way so that there aren't giant loopholes."

The Hill (9/18, Shabad, Lillis, 255K) reports that Congressional Democrats also "call[ed] for Congress to take up gun control legislation," including Sen. Dianne Feinstein who said, "This is one more event to add to the litany of massacres that occur when a deranged person or grievance killer is able to obtain multiple weapon ...and kill many people in a short amount of time."

Politico (9/18, Lee, Gibson, 467K) reports that on Tuesday, House Minority Whip Steny Hoyer, who noted that "three of the 13 people killed were his constituents," said, "I'm sure that it will renew the discussions about access to weapons that can be used to kill a lot of people quickly." However, Politico adds that Hoyer also "pointed to the recent recall of two Colorado legislators who supported gun restrictions as reason to be skeptical that legislation will advance in Congress."

The Washington Post (9/18, O'Keefe, 4.28M) notes that "even before Monday's...shootings, gun control activists were scheduled to be on Capitol Hill this week for public rallies and private meetings with lawmakers as they mark nine months since the rampage at Sandy Hook Elementary School in Connecticut." Politico (9/18, Arkin, 467K) reports that New York City Mayor Michael Bloomberg's Mayors Against Illegal Guns "will hold a rally Thursday on the grounds of the US Capitol to support background check legislation."

Dana Milbank, in his column for the Washington Post (9/18, 4.28M), notes that on Monday morning, the President's first remarks about the Navy Yard shootings did not include "any overt call for gun restrictions," which was, according to Milbank, "a tacit acknowledgment that there is no hope of reviving even the modest gun

measure that failed in the Senate in April.”

Maureen Dowd, in her column for the New York Times (9/18, Subscription Publication, 9.61M), says that on Monday morning, the President “could have posted his original remarks on the White House Web site and replaced them with a cri de coeur on gun control, or comfort for the shaken city.” But Dowd notes that instead, “jarringly, the president went ahead with his political attack, briefly addressing the slaughter before moving on to jab Republicans over the corporate tax rate and resistance to Obamacare.” According to Dowd, as had been the case “with the address to the nation on Syria last week, the president went ahead with a speech overtaken by events.”

Senators Consider Banning The Mentally Ill From Owning Guns. AFP (9/18) notes that Senate Majority Leader Harry Reid “said he wanted to revive the debate sooner rather than later.” However, Reid added, “We’ve got to have the votes first. We don’t have the votes. I hope we get them but we don’t have them now.” Nevertheless, Sen. Richard Blumenthal “hope[s] to reintroduce legislation including a measure that would expand background checks and ensure the mentally ill would not have access to firearms,” and Sen. John McCain, “one of a handful of Republicans who voted for the background bill this year, said mental health could emerge as a focal point of legislation.”

According to Politico (9/18, Everett, 467K), the dynamics of the debate boil down to: “the gun lobby remains powerful” and Senate Democrats need to “protect vulnerable incumbents in gun-friendly states like Arkansas, Alaska, North Carolina and Louisiana from another tough vote.” Sen. Mark Pryor, who is up for reelection next year, is quoted as saying, “Is there a background check issue? I’ll look at the facts and I’ll weigh those.”

USA Today (9/18, Davis, 5.82M) reports that on Tuesday, Sen. Joe Manchin, who sponsored background check legislation that died in the Senate earlier this year, said of his failed proposal, “It’s not gun control, this is gun sense.” According to the Washington Post (9/18, O’Keefe, 4.28M), Manchin says he is “willing to work with colleagues on legislation that might prohibit people diagnosed with mental illness from purchasing firearms,” Sen. Lindsey Graham says is “where talk of new federal gun policy should begin.” Graham is quoted as saying, “I would like to see the current background check law redesigned to capture mental health events in a better way.”

As the Senate considers legislation that could bar the mentally ill from owning firearms, many outlets on Tuesday highlighted Aaron Alexis’ history of mental health problems. On ABC World News (9/17, lead story, 2:50, Sawyer, 7.43M), Diane Sawyer reported that Alexis “was hearing voices, had even reached out for help, a warning sign that may have been missed.” Correspondent Pierre Thomas added that law enforcement sources describe Alexis as a “ticking time bomb...descending toward madness.”

Likewise, in the lead story for NBC Nightly News (9/17, lead story, 3:15, Williams, 7.86M), Brian Williams reported that Alexis “told police he was hearing voices and that somebody was using microwave technology to infiltrate his body.” But correspondent Pete Williams noted that “officials say it would have been illegal for the VA to report he was seeking psychiatric treatment.”

On the CBS Evening News (9/17, story 2, 3:05, Pelley, 5.58M) it was reported that Alexis used a shotgun that he “legally bought” on Saturday from a Virginia gun store although his “family has told investigators that he suffered from mental illness for a decade,” and he “sought and received treatment through the Department of Veterans Affairs.” The New York Times (9/18, A1, Goldstein, Nir, Williams, Subscription Publication, 9.61M) and USA Today (9/18, Johnson, 5.82M) detail Alexis’ history of mental illness and gun-related incidents.

Shooting Puts Spotlight On Security Clearance Process. Politico (9/17, Kopan, 467K) reported that White House press secretary Jay Carney announced on Tuesday that President Obama has “ordered a review of standards for contractors across federal agencies in the wake of the Navy Yard shootings” that will be “conducted by the Office of Management and Budget.” Politico notes that the review “is in addition to an ongoing review of intelligence community contractors Obama ordered” in the wake of the Edward Snowden leaks.

The Washington Post (9/18, Whitlock, Vargas, Markon, 4.28M) reports that during his “highly checkered four-year career as a Navy reservist,” Alexis “was cited at least eight times for misconduct for offenses as minor as a traffic ticket and showing up late for work but also as serious as insubordination and disorderly conduct.”

On ABC World News (9/17, lead story, 2:50, Sawyer, 7.43M), Pierre Thomas reported that despite a life filled with "gun play, run-ins with the law and trouble with his military commanders," Alexis "went to work for a government computer contractor at the Washington Navy Yard, using a secret security clearance he had received after joining the Navy." According to Thomas, President Obama has "order[ed] a study of security standards for contractors across all Federal agencies."

On NBC Nightly News (9/17, lead story, 3:15, Williams, 7.86M), Pete Williams reported that Monday's incident "follows two government reports that found shortcomings in background checks for contractors," and, on Tuesday, the Secretary of the Navy "ordered another investigation on how clearances are granted and reviewed." According to Williams, the Navy said Alexis "was granted a low-level secret clearance in 2008, good for ten years," but "it is not clear if the government didn't know or didn't care that four years earlier he was arrested in Seattle for shooting the tires of a car that was parked near his house."

The Washington Post (9/18, A1, Leonnig, O'Keefe, 4.28M) reports that Thomas Hoshko, chief executive officer of The Experts, Alexis' employer, "said he would not have hired [Alexis] if he had known about some of his brushes with the law and said the military should have shared more information with the company about Alexis' history." According to the Post, Hoshko "rel[ies] on the military to approve the security clearances of their employees, and fears that budget crunches have led to faster and less thorough checks." The Post adds that Sen. Tom Carper, who chairs the Homeland Security and Governmental Affairs Committee, says he "plans to investigate...how Alexis could have been employed by a federal contractor despite his arrest records and treatment for mental illness." The Wall Street Journal (9/18, Barrett, Nissenbaum, Subscription Publication, 5.91M) also interviewed Hoshko about his company's hiring process.

The Washington Post (9/18, 4.28M), in an editorial, says Hoshko's "claim...that he wouldn't have hired Mr. Alexis if he had known about his past indicts a process already called into question when...Snowden used his top-security classification to steal sensitive government information."

Hagel Orders Review Of Military Installations' Security. USA Today (9/17, Dorell, 5.82M) reports that Navy Yard workers now says they "don't feel safe at their jobs after learning that...Alexis was cleared to work at the military facility despite a discharge from the Navy following aggressive and violent behavior." According to the Wall Street Journal (9/18, Barnes, Subscription Publication, 5.91M), an IG report previously scheduled to be released Tuesday, criticized the Navy's background check procedures. Rep. Buck McKeon (R-CA), who chairs the House Armed Services Committee, said, "The report details critical flaws in the practice of contracting access control for military installations to non-governmental personnel." The Washington Post (9/18, Whitlock, Hermann, Fahrenthold, 4.28M) reports that Defense Secretary Hagel "intends to order a security review at all US military bases worldwide."

Joe Davidson, in his column for the Washington Post (9/18, Davidson, 4.28M), reports that Anthony Meely, "a Navy Yard police officer and...chairman of the Fraternal Order of Police Naval District Washington Labor Committee," notes that at the time of the shooting, "we only had five officers at work." According to Meely, "About twice as many are needed...to meet the minimum of our requirements."

Professor: Mass Shootings Are Not On The Rise In the US. James Alan Fox, a criminology professor at Northwestern, in an op-ed for USA Today (9/18, 5.82M), says that "it is important to dispel the widely held notion that mass shootings are on the rise." According to Fox, in the last 30 years, "there has been an average of nearly 20 mass shootings a year in the US, each involving at least four victims killed, but with no upward or downward trajectory."

On the other hand, Kathleen Parker, in her column for the Washington Post (9/18, 4.28M), says that according to Mother Jones, "half of the 12 deadliest mass shootings" since 1982 "have occurred since 2005."

Shooter Legally Purchased Shotgun From Virginia Gun Range On Saturday. McClatchy (9/18, Hall, 95K) reports that on Tuesday, the FBI confirmed that Alexis "was armed only with a shotgun purchased legally two days before." According to the New York Times (9/18, Schmidt, Subscription Publication, 9.61M), Alexis "test fired an AR-15 assault rifle at a Virginia gun store last week but was stopped from buying one because state law there prohibits the sale of such weapons to out-of-state buyers." However, the Washington Times (9/18, Miller, 417K) is reporting that Alexis "did not attempt to purchase a rifle or handgun from the store."

USA Today (9/18, 5.82M), in an editorial, argues that Alexis' "symptoms of mental illness" ought to have "stopped him from legally buying a shotgun."

Friend Describes Shooter As "More Of A Liberal." The Daily Caller (9/17, Howley, 422K) reported that on CNN's The Lead Tuesday, "Alexis' friend" Michael Ritrovato said, "Aaron wasn't conservative like I am. He was more of a liberal type; he wasn't happy with the former administration. He was more happy with this administration."

Singletary Says ACA May Help Prevent Another Navy Yard Tragedy. Noting Monday's tragic events at the Washington Navy Yard, in her Washington Post (9/18, 4.28M) column, Michelle Singletary discusses mental health and substance-use disorder coverage under the Affordable Care Act, which she says "will provide one of the largest expansions" of those services "in a generation." Singletary adds that she hopes "that by expanding access to mental health coverage, we can get people the help they need, and in the most severe situations prevent tragedies that result in the loss of life."

HOUSE GOP MAY PASS CONTINUING RESOLUTION DEFUNDING ACA. In a front-page article, the Washington Post (9/18, A1, Montgomery, Kane, 4.28M) reports House Republican leaders "intensified" the threat of a government shutdown by moving towards funding the government but not the Affordable Care Act, "setting up a stalemate with the Democratic Senate." Speaker Boehner and his leadership team are "being pushed into a more confrontational strategy," despite "many Republicans" expressing "frustration with the right wing's fixation on" the ACA.

The AP (9/18, Taylor) reports a GOP aide says "House GOP leaders are looking to reverse course" and pass a temporary government funding bill that would block implementation of the ACA, a move that "has been a crusade of tea party conservatives" who have been "frustrated" at an inability to enact their agenda with GOP control of only one chamber of Congress. However, GOP leaders are skeptical of the conservative desire "to take a must-pass bill hostage" to force concessions on the ACA, as Democrats "would never go along" and the GOP is "likely to get the blame" for any government shutdown.

Roll Call (9/18, Fuller, Subscription Publication, 87K) reports that while sources say the GOP leaders discussed passing a continuing resolution funding the government but defunding the ACA during their Elected Leaders Conference, Michael Steel, a spokesman for Speaker Boehner, said the "leaders had not yet decided to move ahead with that plan."

Bloomberg News (9/17, Tiron, 1.91M) reports that House Republicans are "at loggerheads over" attempting "to thwart" the Affordable Care Act without shutting down the Federal government. House Republican leaders are seeking to "mollify" those who oppose healthcare reform through possible other resumes, such as a stopgap measure funding all the government but that "defunds and delays the" ACA or voting on stopgap measure when increasing the debt limit is being decided. However, the "Senate is certain to alter" any House bill to save the ACA and will then probably send the measure back to the House, "forcing a final vote that would attract enough Republican and Democratic votes to pass."

Increasing GOP Resistance To Vitter's Plan To End Federal Aid To Congress, Staff On Healthcare. Politico (9/18, Raju, Haberkorn, 467K) reports that in "another sign" of how GOP efforts to stop the ACA have "suddenly devolved into an internal Republican battle, prompting widespread concerns among party elders," an increasing number of Republicans oppose Sen. David Vitter's (R) efforts to prevent Federal contributions towards health coverage that lawmakers and their staff will buy in ACA exchanges. Such a move would be the equivalent of a \$5,000 pay cut for staffers, which "could lead to a mass exodus of staffers from Capitol Hill."

Roll Call (9/18, Lesniewski, Subscription Publication, 87K) reports in a blog that "few on either side of the aisle seem happy" with Vitter's plan. Meanwhile "disgusted Democrats...believe Vitter is grandstanding," but Senate Majority Leader Harry Reid indicated there will be a vote on the plan. A Democratic aide says any vote "would be accompanied by a side-by-side alternative."

Senate Has No Backup Plan On Government Spending Bill. Politico (9/18, Everett, 467K) reports that a lack of contingency plans in the Senate for a government spending bill puts pressure on House Speaker John Boehner

to pass one in the House. Both Senate Majority Leader Harry Reid and Minority Leader Mitch McConnell are "in agreement on" this "critical issue."

NYTimes: "Extremist Groups" Driving GOP Agenda. In an editorial, the New York Times (9/18, Subscription Publication, 9.61M) criticizes "Club for Growth and other extremist groups" that are spending millions to pressure legislators to demand a government shutdown or a default if the healthcare reform law isn't defunded. The groups are "financed with secret and unlimited money, feed on chaos and" would like "to claim credit for pushing Washington into another crisis," according to the Times, which says they're more interested in an ideological victory than preventing "severe economic effects" of their demands. These moves also help the organizations get donations. The Times concludes that "unlimited money and rigid ideology is proving toxic for the most basic functioning of government."

OBAMA WON'T SUSPEND DEPORTATIONS, CALLS FOR IMMIGRATION REFORM. The Huffington Post (9/18, Foley, 11.54M) reports that President Obama on Tuesday said that he has no plans to "expand a deferred action program" that would "prevent some deportations," despite the "urging of immigration activists." Interviewed on Noticias Telemundo, the President said, "If we start broadening that, then essentially, I would be ignoring the law in a way that I think would be very difficult to defend legally. So that's not an option."

The Washington Post (9/17, Nakamura, 4.28M) similarly reports that the President "ruled out using his executive authority to freeze deportations for most of the 11 million immigrants in the country illegally, saying such a move would violate federal law." The decision is "likely to disappoint advocates who are beginning to lose hope that sweeping immigration legislation" will pass this year.

The Hill (9/18, Sink, 255K) adds that the President "said that advocates of immigration reform shouldn't expect him to use prosecutorial discretion to address the issue if Congress is unable to agree to reform legislation." In 2012, the Administration announced it would "stop deporting some illegal immigrants who entered the United States as children if they did not break any laws and enrolled in either college or the military," and "some immigration advocates" have urged the President to do the same for all illegal immigrants if reform dies in the House.

Also in the interview, Politico (9/18, Epstein, 467K) reports, the President said that immigration reform "shouldn't be" dead for this year, and urged the House to bring the Senate bill to the floor. He said, "We've got a bill that passed with bipartisan support, strong bipartisan support in the Senate. You've got a president who says that this is a number-one priority and he can't wait to sign a comprehensive immigration reform bill. You've got the majority of the American public who are committed to immigration reform and support a pathway to citizenship for those who don't have it." The "only thing" holding it back is "John Boehner calling it into the floor."

Outside Groups Look To Jump-start Immigration Reform. Politico (9/18, Palmer, Kim, 467K) reports that House Minority Leader Pelosi is "huddling" with Facebook's Mark Zuckerberg, "top labor leaders" and former AOL head Steve Case in "separate meetings this week as supporters of immigration reform try to revive the issue, which fast seems to be dying on Capitol Hill." Their goal is to get legislation moving in the House "before the Thanksgiving recess." However, they "concede that it's a heavy lift," and that Republican lawmakers "didn't come out of the August recess ready to act."

Visa System Seen As Vulnerable To Fraud. USA Today (9/18, Maresca, 5.82M) reports that despite a "struggling economy," the US is "still seen as a promised land for many in Vietnam" and elsewhere, and it has "given rise to bribery schemes that are hard to detect because US officials who decide on visas are rarely questioned about their decisions, experts familiar with the process say." For example, a former US diplomatic officer in Vietnam was indicted this summer in a "scheme that netted millions of dollars by approving visa requests from foreigners looking to work or go to school in the United States." The problems "illustrate the weaknesses in a system that insiders warn remains vulnerable to manipulation because it allows individuals to decide visa requests with little oversight from above."

Editorial Wrap-Up:

NEW YORK TIMES. "The Money Behind The Shutdown Crisis." In an editorial, the New York Times (9/18,

Subscription Publication, 9.61M) criticizes "Club for Growth and other extremist groups" that are spending millions to pressure legislators to demand a government shutdown or a default if the healthcare reform law isn't defunded. The groups are "financed with secret and unlimited money, feed on chaos and" would like "to claim credit for pushing Washington into another crisis," according to the Times, which says they're more interested in an ideological victory than preventing "severe economic effects" of their demands. These moves also help the organizations get donations. The Times concludes that "unlimited money and rigid ideology is proving toxic for the most basic functioning of government."

"Steps Toward A Less Secret Court." The New York Times (9/18, Subscription Publication, 9.61M) editorializes that the release "of judicial opinions would not normally be notable in a constitutional democracy premised on open courts, but the Foreign Intelligence Surveillance Court has been anything but normal." The Times contends that the Federal government "is justified in classifying certain information regarding national security operations, but, in most cases, there is no good rationale for the classification of judicial interpretations of law."

"The Antibiotic Resistance Crisis." In an editorial, the New York Times (9/18, Subscription Publication, 9.61M) says that on Monday, the Centers for Disease Control and Prevention "issued the first solid numbers on the extent of the" problems stemming from the overuse of antibiotics in both healthcare and agriculture. The Times adds that the "Overuse of antibiotics on farms...also contributes to development of resistant strains of germs." Moreover, the Times says that according to CDC director Thomas Frieden, absent "prompt action...to reduce overuse, track and prevent the spread of resistance, and develop new drugs," our "medicine cabinet may be empty for patients with life-threatening infections in the coming months and years."

"Big Coal Takes One an Obama Nominee." In an editorial, the New York Times (9/18, Subscription Publication, 9.61M) writes that the coal industry and its allies, "angry" over the Administration's energy policies, "have decided to take it out on" Binz, despite FERC not having regulatory authority over coal. They hope "their misleading campaign" will influence Democrats like Manchin or Sen. Mary Landrieu, but the Times calls for the senators to "ignore the attacks from vested special interests, many of whom deny the existence of climate change, and confirm Mr. Binz."

WASHINGTON POST. "An Urgent Need For Rational Laws." The Washington Post (9/18, 4.28M), in an editorial, says Hoshko's "claim...that he wouldn't have hired Mr. Alexis if he had known about his past indicts a process already called into question when...Snowden used his top-security classification to steal sensitive government information."

"Tobacco Shouldn't Be Protected." In an editorial, the Washington Post (9/18, 4.28M) says that the latest US proposal to the Trans-Pacific Partnership (TPP) "would leave tobacco companies free to mount legal challenges to various nations' policies." The Post adds that the uniqueness of tobacco "can be enshrined in an enforceable" Trans-Pacific Partnership (TPP) "if all 'stakeholders' worked toward an effective compromise instead of attacking" US attempts "as insufficiently protective of U.S. interests, as business interests continue to do."

"Energy Dept. Sparks Gas Exports At Cove Point." In an editorial, the Washington Post (9/18, 4.28M) supports the Energy Department's decision to approve the Cove Point, Maryland natural gas export facility. The Post says that despite environmentalists' concerns that the plant will encourage the use of fracking to extract natural gas supplies, such conservation groups "would be more productive if they took all the energy they're spending in their crusade against natural gas and put it into pushing for reasonable fracking regulations and a smart greenhouse-gas policy."

WALL STREET JOURNAL. "Obama Goes To War." In an editorial, the Wall Street Journal (9/18, Subscription Publication, 5.91M) says that unlike previous presidents, Barack Obama is looking to smooth things over abroad so that he can focus on his efforts on attacking Republicans at home. The Journal says that the President's speech on Monday was simply a demand for capitulation from the GOP in its opposition to his domestic agenda. The Journal says that the evidence suggests that the President is actually seeking a showdown that results in the shutdown of the Federal government or threatens the default on the debt, which would then allow him to hit Republicans for political gain.

"Chemical Weapons And Turtle Bay." In an editorial, the Wall Street Journal (9/18, Subscription Publication,

5.91M) writes that the UN report on the use of weapons were in Syria shows how the organization protects rouge nations. The report found that Russian-made rockets with chemical weapons were fired from Syrian army positions, but refused to name who was responsible. Meanwhile, Russia has blocked any proposal to sanction Syria and the US-Russia deal for Syria to hand over its chemical weapons doesn't hold it accountable for the attack.

"A Green Car Names Desire." In an editorial, the Wall Street Journal (9/18, Subscription Publication, 5.91M) criticizes California's emissions regulations, saying that they essentially require that consumers purchase electric cars, for which the legislature had to create subsidies in order to entice people to buy them. The Journal says that the result of those subsidies are now in turn hampering the state budget. Consequently, the Journal says that it expects a new fee or tax to be levied against the middle class in order to compensate for the budget shortfall.

Location: U.S. Chamber of Commerce, 1615 H Street, NW.

Last Laughs:

LATE NIGHT POLITICAL HUMOR.

Jay Leno: "And 'Forbes' magazine has come out with its annual list of the 400 richest people in America. And 399 of them were bankers that got us into the recession five years ago. What are the odds of that? What are the odds of that? You know, this week, this week marks the fifth anniversary of the class of the collapse of Lehman Brothers, which of course sparked the recession. Think about how bad things were back then. We had unemployment...over 7%. The debt was out of control. There were wars breaking out all over the globe. Thank God that's all behind us now, huh? Whoo. Thank God we don't have to worry about that anymore."

Jay Leno: "And President Obama's new top economic adviser is a former management consultant who worked for Mitt Romney's Bain Capital. You can tell he was a Romney guy. His first order of business now? Moving the US Treasury to the Cayman Islands."

Jay Leno: "And 'USA Today' had a big front page feature on the new healthcare law, said that the opposition to Obamacare was at an all-time high. It has gotten so bad the President is now calling it 'Bidencare.'"

Jay Leno: "Vice President Joe Biden was in Iowa over the weekend, raising speculation that he plans to run for President in 2016. Yes. Biden said that he and the President have had a 'laser-like' focus on the middle class. That's what happened to the middle class. They didn't disappear. They got zapped by a laser."

Jay Leno: "Critics say Obamacare will require doctors to ask you about your sex life. Why is that necessary, huh? Why don't you do what everybody else does, just check your Facebook posts?"

Conan O'Brien: "Joe Biden's niece was arrested. The hardest part about arresting a Biden is convincing them they have the right to remain silent."

Jimmy Fallon: "Don't know why they're doing this, but I read this week NASA is sending chocolates to astronauts on the International Space Station. I guess it makes sense, it's not like those guys have to watch their weight. It's like, 'Nope, still zero pounds.'"

Stephen Colbert: "Folks, I wish I were as happy as you are, but I'm afraid we're living in the People's Republic of Obamastan. Folks, it is not safe to be rich in this country anymore. Frankly, I would give all my fortune to the needy but I don't want to turn some poor person into a target. I'm afraid all that money is my cross to bear. It's a cross made of solid gold. Very nice, actually. Well, during a speech yesterday, President Obama hit the rich with another drone strike in that he was boring."

DQI in the News:

REP. SIMPSON ADDS \$636 MILLION IN FIREFIGHTING MONEY TO CONTINUING RESOLUTION. The [Idaho Statesman](#) (9/20, 205K) reports that Rep. Mike Simpson has added \$636 million in wildfire suppression funding for the Interior Department and the Forest Service in the short-term continuing resolution. Simpson said, "One of the biggest problems with fire borrowing is that it perpetuates the cycle of catastrophic wildfires in forests that are not being adequately managed. Siphoning money away from resource management accounts during a bad fire year means that those forests will be more susceptible to devastating fires in the future—and when almost every year is a bad fire year, land managers' hands are tied."

KIVI-TV Boise, ID (9/20, 861) reports that "the funding would provide \$600 million to the Forest Service" and \$36 million to the Interior Department to "restore wildfire suppression reserves that have been depleted during the active 2013 fire season." Simpson said, "Siphoning money away from resource management accounts during a bad fire year means that those forests will be more susceptible to devastating fires in the future—and when almost every year is a bad fire year, land managers' hands are tied. Restoring this funding will help ensure that fire fighters can continue to put out fires without jeopardizing the important work of hazardous fuels removal, resource restoration, and timber harvests that we need to do in order to return our forests to health."

Cost Of Fire Prevention Work Sought From Federal Government. KRNV-TV Reno, NV (9/20, 2K) reports that firefighters and small businesses in Nevada and California are seeking \$2.56 million from the federal government for fire prevention work. According to the article, "the work they performed stems from a grant from the now-defunct Nevada Fire Safe Council, which administered fire prevention grants throughout Nevada." Meanwhile, lawmakers such as Sen. Harry Reid have "decried the role of climate change in the wildfires ravaging the West," and Sen. Dean Heller has "called for more fire prevention funding."

REP. BISHOP BLASTS INTERIOR DEPARTMENT ON WEST DAVIS FREEWAY. The Salt Lake (UT) Tribune (9/20, 343K) reports that Rep. Rob Bishop said that the Interior Department is "distasteful, callous and wrong" for trying to protect Great Salt Lake wetlands by opposing a West Davis Corridor freeway route. Bishop wrote Interior Secretary Sally Jewell "saying her department should come to Utah to 'explain to the homeowners, face to face, why their homes are less important than a few acres of wetlands.'" However, critics claim that "while Bishop purports that residents want a route that begins at Glovers Lane in Farmington, he ignores opposition by neighbors there and by Farmington City officials — who live outside his district. Residents living just inside his district north of a Shepard Lane alternative for the freeway would be hurt if the route changed to there."

Meanwhile, the Ogden (UT) Standard-Examiner (9/19, Shaw, 147K) reports that the Utah Department of Transportation has purchased "acres of land worth millions of dollars in the path of the West Davis Corridor." However, officials still maintain that a final decision has not been made on the project. UDOT Executive Director Carlos Braceras said, "We're obviously in the middle of an EIS on this project. And the federal agencies that will be making the decision on this road — first, if there is a need and then the location — haven't selected a preferred alternative. We can't use these purchases to influence the outcome of this decision. If the decision is made that these properties aren't needed, we can sell these properties. This will not drive a decision on the environmental process."

INTERIOR DEPARTMENT REDUCES ADVANCE PAYMENT ON RUM COVER-OVER. The Virgin Islands Daily News (9/20, Blackburn, 49K) reports that the Virgin Islands government will "receive significantly less funding in rum cover-over revenues than officials had anticipated," after the Interior Department "provided a smaller advance on the rum tax rebate than the territory had requested." The Interior Department "reduced the advance payment on rum cover-over revenues to the territory for Fiscal Year 2014 by almost \$71 million."

SECRETARY JEWELL URGED TO APPROVE KING COVE ROAD. In an editorial, the Alaska Journal of Commerce (9/20, 14K) urges Interior Secretary Sally Jewell to approve the proposed land swap that would allow the King Cove road to be built. The paper argues the "pros" outweigh the "cons" because "the danger to the refuge is a non-quantifiable best guess by experienced personnel, not a scientific certainty upon which to base some legally mandatory conclusion." Furthermore, "a stack of additional arguments" favors the road.

WTIMES CALLS FOR OPENING ALL FEDERAL LAND TO OIL, GAS DRILLING. In an editorial, the Washington Times (9/20, Times, 417K) writes that developing oil and gas on Federal lands would end "high unemployment and stagnant growth." The paper adds that such a move would "permanently" end the nation's dependence on OPEC countries for oil. The Time concludes that President Obama's energy policies made oil and gas "more expensive" and "taken a toll on families struggling to survive."

America's Great Outdoors:

National Park Service:

PRINCE WILLIAM BOARD SAYS BYPASS SHOULD BE BUILT BEFORE BI-COUNTY PARKWAY. The Washington Post (9/20, Borden, 4.28M) reports that on Tuesday, the Prince William Board of County Supervisors affirmed that "a long-planned bypass around the Manassas National Battlefield should be" built before the proposed Bi-County Parkway is constructed and two major roads through the Manassas battlefield are closed. The County Board voted to pass another resolution on Tuesday, "clarifying its position on the closure of the roads through" battlefield. Later, the article notes that it is unclear what impact the county's action could have on the proposed parkway, which it notes is "designed to improve traffic flow, spur economic development and provide better access to Dulles International Airport," according to state officials.

Also providing coverage of the bypass is [WAMU-FM](#) Washington (9/20, 5K).

LIST OF GROUPS SUPPORTING LAKE MICHIGAN WATER TRAIL GROWS. The [MLive](#) (9/20, 334K) reports that Grand Valley State University and the West Michigan Environmental Action Council has joined "the list of West Michigan groups lining up to support the development of a Lake Michigan Water Trail in the region." The two have secured a \$95,000 Michigan Coastal Zone Management Program grant through the Office of the Great Lakes and the Department of Environmental Quality. According to the article, "the overall goal is for the Lake Michigan Water Trail to receive a federal 'water trail' designation" from the NPS.

BLUE RIDGE PARKWAY ATTRACTION MABRY MILL TO RECEIVE REPAIRS. The [Roanoke \(VA\) Times](#) (9/20, 259K) reports that "more than \$51,000 in work is set to be done at Mabry Mill in Meadows of Dan beginning soon after the site closes to visitors in October," according to Parkway Foundation Chief Executive Officer Carolyn Ward. The article notes that "the most visible part of the project will be the repair of the picturesque water wheel, which has been featured in countless photos, postcards and paintings of the parkway."

MOUNTAIN GOAT STUDY BEINGS AT GLACIER NATIONAL PARK. [KXLF-TV](#) Butte, MT (9/20, 2K) reports that Glacier National Park officials, along with University of Montana researchers, are starting "a three-year study on the effect that people, trails and traffic have on mountain goats in the park." According to the article, "six animals had been successfully collared" by the NPS, University of Montana researchers, and Montana Fish, Wildlife & Parks personnel as of earlier this week.

SENATOR'S AIDE MEETS WITH SHADDOX CEMETERY BOARD ON DISPUTE WITH NPS. The [Newton County \(AR\) Times](#) (9/20, 7K) reports that Hillrey Adams, field representative for Sen. John Boozman, "visited the Shaddox Cemetery here Thursday morning where cemetery board members showed him a fence that has been the subject of an ongoing dispute between the board" and the NPS.

SMOKIES, BIG SOUTH FORK SEEK APPLICANTS FOR CONCESSIONS CONTRACTS. The [Knoxville \(TN\) News Sentinel](#) (9/20, Simmons, 366K) reports that Great Smoky Mountains National Park and the Big South Fork National River and Recreation Area are "seeking to award new concession contracts for park operations that serve the public."

PHOTOGRAPHER CAPTURES GRAND CANYON LIGHTNING STORM. The [New York Daily News](#) (9/20, Nina Golgowski /, News, 3.94M) reports that "a stunning photograph" shows "several massive bolts of lightning electrifying the Grand Canyon." Sedona photographer Rolf Maeder said that "he used a long exposure to capture the series of lightning strikes while perched from Moran Point."

ADDITIONAL COVERAGE: NATCHEZ TO RECEIVE SURPLUS TRACE PROPERTY. Additional coverage of President Barack Obama's signing of "a bill to transfer surplus land along the Natchez Trace Parkway to the city of Natchez" was provided by the [AP](#) (9/20).

Bureau of Land Management:

SENATE APPROVES EXTENSION OF FEDERAL HELIUM PROGRAM. The AP (9/20, Daly) reports that by a 97-2 margin, the Senate voted to approve a measure to continue the Federal Helium Program, thereby "averting an impending shutdown of the federal helium reserve, a key supplier of the lighter-than-air gas used in a products ranging from party balloons to MRI machines." The article notes that the program, "which provides about 42 percent of the nation's helium from a storage site near Amarillo, Texas, is set to shut down Oct. 7" as "a result of

a 1996 law requiring the reserve to pay off a \$1.3 billion debt by selling its helium.”

The Washington Post (9/20, Fahrenthold, 4.28M) notes that had the program been phased out, there may have been a shortage of helium “since there are not sufficient private sources of helium to take the federal program’s place.” Moreover, “The program, with about five employees, pays for itself with proceeds from sales.”

The Wall Street Journal (9/20, Peterson, Subscription Publication, 5.91M) adds that the bill will proceed to the House, which had already approved a marginally different version of the measure in April. The Journal notes that both the Senate and House versions of the bill seek to end the Federal program over a longer period of time than the current October deadline. The article also says that the program provides over one-third of the global supply of crude helium.

Roll Call (9/20, Lesniewski, 87K) reports that if approved by the House, the measure will stretch out the winding down of the program “over the next decade.”

Also providing coverage are [Reuters](#) (9/20, Krasny) and [Reuters](#) (9/20, Chestney).

BLM WORKS TO OPENING MUSTANG MONUMENT FOR TOURISM. [WHIO-TV Dayton, OH](#) (9/20, 98K) reports on the Mustang Monument, a Nevada mustang eco-sanctuary, where “a herd of about 700 free-roaming horses” is “to be an engine for the nonprofit organization Saving America’s Mustangs.” Organization founder Madeleine Pickens and the BLM have “slowly worked toward opening Mustang Monument for tourism, which is slated for June of next year.”

NAVAJO NATION ASKS FOR HELP WITH FERAL HORSES. The [Navajo Times \(AZ\)](#) (9/19, Bitsoi, 66K) reports that President Ben Shelly is advocating “for more humane treatment of the estimated 75,000 feral horses that are running freely on the 27,000-square-mile reservation.” Last week, Shelly informed the BLM’s National Wild Horse and Burro Advisory of “the growing feral horse problem on the Navajo Nation.” Shelly said, “The potential damage and cost of addressing this problem, coupled with the suffering these animals experience has brought the Navajo Nation to ask you to find a solution to feral horses.”

GRAND COUNTY LAUNCHES SAGE-GROUSE HABITAT STUDY. The [Sky-Hi Daily News \(CO\)](#) (9/20, 728) reports that to avoid listing the greater sage-grouse as an endangered species, the BLM has “partnered with the US Forest Service, Colorado Parks and Wildlife and other agencies on environmental impact statements recommending ways to protect the birds.” However, Grand County commissioners have “taken issues with the study’s delineation of habitat in the area.” As a result, the county has “determined it needs an independent study in order to make appropriate comment, a study that cost \$40,000.”

Fish and Wildlife Service:

FWS DIRECTOR ASHE SAYS FOCUS SHOULD BE ON CLIMATE CHANGE FOR KEYSTONE XL PIPELINE. The [Lexington \(NE\) Clipper-Herald](#) (9/20, 15K) reports that House Republicans on Wednesday announced plans to tie the Keystone XL pipeline “to the formal approval of an increase in the debt ceiling.” Notably, “environmental groups have expressed concerns about the pipeline’s impact on wildlife.” When asked about these concerns, FWS Director Dan Ashe said that “the real question behind the pipeline lies with its impact on climate change.”

Also reporting on the story is the [Omaha World-Herald](#) (9/19, Morton, 437K).

MONTANA TRIES TO ATTRACT MORE WOLF HUNTERS WHILE FWS CONSIDERS DELISTING. The [High Country \(CO\) News](#) (9/20, Mast, 74K) reports that “five years after the federal government dropped Montana’s wolves from the Endangered Species List and the state took over management, officials are still trying to trim the state’s growing wolf population.” Montana’s efforts “come amidst a contentious national conversation about whether gray wolves everywhere should come off the Endangered Species List.” The FWS “says that the proposal to delist is scientifically sound, and that the Endangered Species Act (ESA) does not require full restoration across a species’ previous range,” but “opponents argue that, while wolf populations have indeed improved since the mid-20th century, their range and numbers are still not big enough to maintain healthy genetic diversity.” In a blog post in June, FWS Director Dan Ashe wrote, “Of course, the gray wolf is not everywhere it

once was, nor can it be; think Denver, or Minneapolis, or Salt Lake City, or even the now grain- and livestock-dominated American Plains." But "Ashe sees current wolf populations as a mark of success and reason enough to delist in all states: "We can work conservation miracles, because we have. The gray wolf is proof."

MAN CHARGED WITH ILLEGAL SALE OF RHINOCEROS HORNS. The E&E Daily (9/19) reports that an Irish man has been charged with illegally acquiring and selling rhinoceros horns in New York City. Michael Slattery Jr. faces "counts of falsifying documents in the sale of several horns for \$50,000." The article notes that the arrest is part of the FWS and DOJ's "Operation Crash" to crack down on illegal horn smuggling.

SCARBOROUGH POSTPONES DECISION ON DOGS AT BEACHES. The Forecaster (Falmouth, ME) (9/19, 60K) reports that amid what Chairman Ron Ahlquist called "active negotiations" with the FWS "over a fine against the town for the death of a protected bird, the Town Council on Wednesday night delayed a decision on whether to tighten restrictions on unleashed dogs at town beaches." However, the decision to delay "didn't stop more than 20 people from expressing opinions about the proposal to prohibit beach-going dogs from running without leashes and only under 'voice control.'" The article notes that "the speakers were nearly unanimous in their opposition to the change in the town's Animal Control Ordinance."

BLACK-FOOTED FERRETS TO BE RELEASED NEXT MONTH. The Great Falls (MT) Tribune (9/19, 90K) reports that "up to 30 endangered black-footed ferrets will be released" at Montana's Fort Belknap Reservation next month, "just as the state's last surviving population of ferrets at the UL Bend National Wildlife Refuge has dwindled to a handful of animals." According to the article, the number of prairie dogs, "the ferret's main food, is increasing at Fort Belknap, and wildlife officials hope the slender predator with a distinctive black mask finally will gain a foothold after two previous failed reintroduction attempts." Also, "more tools also are available now to fight sylvatic plague, a disease that did in both animals before."

ADDITIONAL COVERAGE: FEDERAL DECISION KEEPS FISH HATCHERIES OPEN. Additional coverage of the decision by the Interior Department to keep fish hatcheries open was provided by the Chattanooga (TN) Times Free Press (9/19, 226K), the Cookeville (TN) Herald-Citizen (9/20, 31K), the Rapid City (SD) Journal (9/20, 103K), the Examiner.com (9/20, 1.16M), the Cookeville (TN) Herald-Citizen (9/20, 31K), and the Baxter (AR) Bulletin (9/19, 28K).

Securing America's Energy Future:

Renewable Energy:

FWS INVESTIGATING FALCON DEATH NEAR CALIFORNIA SOLAR PLANT. The E&E Daily (9/19) reports that the FWS is investigating the death of a peregrine falcon discovered at the Ivanpah Solar Electric Generating System in San Bernardino County. A necropsy will be performed at FWS' "forensics laboratory in Ashland, Ore., in an effort to determine the cause of death." The FWS has "become increasingly concerned about bird deaths at utility-scale solar plants," and it "is currently conducting a broader analysis of solar installations in the West in an effort to determine if they are contributing to bird mortalities and injuries."

BLM TO INVESTIGATE WATER BIRD DEATHS AT SOLAR PLANTS. KCET-TV Los Angeles (9/20, 15K) reports that the BLM is "forming a task force to investigate a spate of unexpected deaths of water birds at remote desert solar facilities." Frank McMenimen of the BLM's Palm Springs office "made the informal announcement at a Wednesday meeting in Palm Desert organized by the BLM to solicit public comment on the proposed Palen Solar Electric Generating System." McMenimen said, "It was an issue that caught a lot of people by surprise. The birds dying grabbed a lot of public attention very quickly, and we obviously have to look into it."

DEEPWATER SIGNS US OFFSHORE LEASE. The Recharge News (9/20, 633) reports that Deepwater Wind signed a lease on Thursday at the Interior Department for "two parcels in an area in federal waters facing Rhode Island and Massachusetts." Deepwater "in July submitted a winning \$3.83m bid in the country's first commercial offshore wind energy competitive lease auction." Deepwater "plans a utility-scale wind farm of up to 1,000MW in the area with a regional transmission system linking Long Island, New York, to southeastern New England."

WHITE SANDS MISSILE RANGE COMMANDER: SUNZIA IMPAIRS MISSION. The Albuquerque (NM) Journal

(9/20, Robertson, 288K) reports that Brig. Gen. Gwen Bingham, the commanding general of White Sands Missile Range, said that "there is no question that the proposed siting of a renewable energy transmission line across the northern extension of the huge military testing site would impair national defense missions." Bingham said that the Department of Defense is "trying to find a 'win-win solution' on the controversial SunZia transmission line proposal," but she also said, "It's going to have a negative impact on our mission." Bingham explained, "There's no way to do my missions with some of the weapons systems we're currently testing, now and into the future, because they would strike the line."

WIND DEVELOPER SEEKS BAT TAKE PERMIT. The reNews (9/20) reports that the FWS is "nearing a decision on Invenergy's application for the Beech Ridge wind project in West Virginia." The service has "issued a final environmental impact statement associated with an 'incidental take permit' application." Invenergy is "requesting a 25-year permit for two endangered bat species."

COMPANY TO OFFER WINDFLOAT UPDATE AT TOWN HALL. The Coos Bay (OR) World (9/20, 34K) reports Principle Power will host a Town Hall meeting in North Ben "to update the community on the proposed WindFloat Pacific Demonstration Project." Having received a \$4 million financial award from the US Department of Energy, the company "has begun project outreach, engineering design and initial project permitting for installation of five semi-submersible floating foundations outfitted with 6MW direct-drive offshore wind turbines."

WIND POWER GAINING TRACTION IN US. The Fortune (9/19, Dumaine, 2.51M) reports, "The pro-wind view finally appears to be gaining traction with a small but growing number of utilities, investors, [and] politicians" in the US. This is partly due to state requirements for renewable energy. As a result, "this summer, for the first time, the U.S. Interior Department auctioned off leases for offshore wind in Virginia, Massachusetts, and Rhode Island." However, there are technological "obstacles to offshore wind" as well. The article contrast the complete lack of offshore wind projects in the US to Europe's 58 finished in the last two decades.

Onshore Energy Development:

BLM TURNS DOWN SALE OF COAL IN WYOMING. The E&E Daily (9/19) reports that the BLM has rejected the sale of coal in Wyoming after an auction drew the lowest top bid, a \$35 million bid from Kiewit Corp, in 15 years. The rejection comes "as environmentalists and taxpayer groups question whether BLM is doing enough to make sure the government gets enough money from coal mining on federal land."

Also reporting on the story are the Casper (WY) Star-Tribune (9/20, 90K) and the Gillette (WY) News Record (9/20, 19K).

In an op-ed for the Great Falls (MT) Tribune (9/19, Squillace, 90K), Mark Squillace, director of the Natural Resources Law Center at the University of Colorado Law School in Boulder, and Tom Sanzillo, director of finance for the Institute for Energy Economics and Financial Analysis, claim that the federal lease program run by BLM is "shortchanging the public budgets" in Montana and Wyoming. They note that a number of studies have shown that the BLM "dramatically undervalues this coal and sells it at prices well below fair market value." They conclude that "an overhaul of the federal coal-leasing program is imperative."

ALASKA CONSIDERS LEGAL ACTION OVER ANWR SEISMIC STUDIES. The E&E Daily (9/19) reports that "Alaska's battle for permission to explore for oil in the Arctic National Wildlife Refuge is likely to move to the courts in the coming weeks if the Obama administration stands firm on its decision to bar seismic studies in the refuge." Alaska Department of Natural Resources Commissioner Dan Sullivan said yesterday that the FWS has "until tomorrow to respond to the state's plea for permission to conduct state-of-the-art 3-D seismic exploration in ANWR's 1.5-million-acre coastal plain." Sullivan said that "if federal regulators turn down the state's most recent request to explore in the refuge, Alaska is likely to take legal action."

TWO SENATORS DEMAND ANSWERS FOR EPA MINING INVESTIGATION. The Alaska Journal of Commerce (9/20, 14K) reports that the "tactics federal agencies used to investigate potential regulatory violations at Alaska gold mines have drawn the ire of senators from outside the state." Sens. John Barrasso and David Vitter sent a letter to EPA Administrator Gina McCarthy "Sept. 11 questioning the agency's decision to send armed personnel to placer mine sites in the Fortymile River area near Chicken." The senators wrote, "According to several news

outlets, EPA agents needlessly intimidated miners last month near Chicken while investigating supposed Clean Water Act violations, going so far as to wear full body armor and carry guns in confronting the surprised miners."

BLM FRACKING STUDY POSTPONES ENVIRONMENTAL LAWSUIT. The E&E Daily (9/19) reports that "an environmental lawsuit over hydraulic fracturing in two California counties has been tentatively settled," after the BLM pledged to conduct a review of the contentious process. According to plaintiffs' attorney Brendan Cummings of the Center for Biological Diversity, the "BLM's proposed study would mark a first for the state."

COLORADO FLOODING IMPACTS OIL AND GAS WELLS, CAUSES OIL SPILLS. The AP (9/20, Slevin) reports the flooding in Colorado "shut down hundreds of natural gas and oil wells." Damage to infrastructure "will affect the region's energy production for months to come," and analysts say that images of flooded wellheads "will increase public pressure" for restrictions on fracking. Meanwhile, Anadarko Petroleum Corp. reported a 323 barrels spill along the St. Vrain River and a 125 barrels spill into the South Platte River. Additionally, "a 4-inch Anadarko natural gas pipeline began leaking...after the ground washed away around it."

The Wall Street Journal (9/20, Sider, Subscription Publication, 5.91M) reports Colorado officials said the floods caused at least 10 oil spills, but only the St. Vrain River and South Platte River spills involved measurable volumes of oil. A statement by that Colorado Oil and Gas Conservation Commission noted the flood also released raw sewage and other hazardous industrial or agricultural chemicals.

The Los Angeles Times (9/19, Pearce, 3.07M) reports that how the flooding affected fracking wells is "one of the biggest questions for local environmentalists."

The Denver Post (9/20, Jaffe, Finley, 949K) also covers this story.

Offshore Energy Development:

JUDGE ACCEPTS HALLIBURTON'S PLEA AGREEMENT FOR DELETING DATA AFTER BP OIL SPILL. The E&E Daily (9/19) reports that Halliburton Co. will plead guilty to a misdemeanor criminal charge related to a deadly rig explosion and massive oil spill in the Gulf of Mexico in 2010. Halliburton is "admitting to the destruction of evidence after the disaster and the punishment it negotiated with the Justice Department, which includes a \$200,000 fine and three years' probation." According to the article, "if the guilty plea is approved, it would end the federal criminal probe of Halliburton, meaning the company would not face prosecution for conduct leading up to the explosion and spill."

The New Orleans Times-Picayune (9/20, 700K) reports that US District Judge Jane Triche Milazzo on Thursday "accepted a plea agreement requiring Halliburton Energy Services Inc. to pay a \$200,000 fine and serve three years probation in exchange for pleading guilty to computer fraud after deleting data related to the 2010 BP Gulf of Mexico oil spill." At the same time, "a former Halliburton employee was charged with destruction of evidence for ordering the discarding of the files." The Times-Picayune adds that the "data-scrubbing incident occurred in May or June of 2010, shortly after the April explosion of the Deepwater Horizon oil rig killed 11 people and set off the record-breaking spill." Judge Milazzo "described Halliburton employees repeating the simulations and deleting the results a second time."

The AP (9/19, Press) reports that Anthony Badalamenti, "who had been the cementing technology director for Halliburton Energy Services Inc., was charged in federal court with instructing two other employees to delete data during a post-spill review of the cement job on BP's blown-out well." Badalamenti, 61, of Katy, TX, "is charged in a bill of information, which typically signals that a defendant is cooperating with prosecutors." Judge Milazzo "said she believed the plea agreement was reasonable and agreed with prosecutors and the company that it 'adequately reflects the seriousness of the offense.'" Attorney General Holder "said in a statement that Halliburton's guilty plea and the charge against Badalamenti 'mark the latest steps forward in the Justice Department's efforts to achieve justice on behalf of all those affected by the Deepwater Horizon explosion, oil spill, and environmental disaster.'"

The Hill (9/20, Shabad, 255K) reports in its "Blog Briefing Room" blog that Judge Milazzo "noted Halliburton's 'self-reporting of the misconduct, substantial and valuable cooperation in the government's investigation, and

substantial efforts to recover the deleted data.”

Bloomberg News (9/19, Johnson, Fisk, 1.91M) reports that the Justice Department “has agreed not to pursue any further criminal prosecution of the Houston-based company or its subsidiaries for any conduct related to the well blowout and subsequent spill, Beverly Stafford, a company spokeswoman, said Thursday in a statement.”

The Wall Street Journal (9/20, Fowler, Subscription Publication, 5.91M) and the Katy (TX) Sun (9/20, 81K) also report on this story.

Tackling America's Water Challenges:

ENVIRONMENTAL GROUPS CLAIM BOR VIOLATED ENDANGERED SPECIES ACT. The Law 360 (9/20, Winegarner, 18K) reports that a coalition of environmental groups appeared before an en banc panel of the Ninth Circuit on Thursday to “revive its allegations that the federal government violated the Endangered Species Act when it negotiated dozens of long-term water supply contracts in California that allegedly harm delta smelt.” The environmental groups, led by the National Resources Defense Council, argued that the BOR “violated one of the act’s requirements by not consulting with contractors to adjust water flows in ways that would protect the smelt.”

CALIFORNIA'S LIMITED WATER HAS BECOME SOURCE OF CONFLICT. The North Coast Journal (9/20, Scott-Goforth) reports in an over 4,000-word article that water brokers are promising “far more water than nature can deliver” and a “torrent” of lawsuits are emerging as water becomes increasingly scarce. A new proposal has been made to divert Sacramento River Delta water to southern California, leaving the people it would normally serve dissatisfied. The Bureau of Reclamation has also fallen short of its obligations to deliver water to Central Valley irrigators for the past 20 years; the water it fails to deliver is called “paper water.” California Water Impact Network’s Tom Stokely accuses the water suppliers of “sweeping it under the rug for years.” The article mentions several more anecdotes, and closes by stating, “the only certain thing is the continuing struggle over California’s water.”

LOWER ARK FIGHTING SDS TO REINSTATE STORMWATER ENTERPRISE. The Pueblo (CO) Chieftain (9/20, 94K) reports Lower Arkansas Valley Water Conservancy District (Lower Ark) plans to file a Federal lawsuit to force the Bureau of Reclamation to reopen its record of decision on the Southern Delivery System (SDS). The Bureau had approved a 40-year SDS contract to store water at Pueblo Dam, but then the Colorado Springs stormwater enterprise shut down in 2009 when the contract was still active. Lower Ark insists the stormwater issue must be resolved before SDS is allowed to deliver water, but Reclamation refused Lower Ark’s request to reopen the case.

Another Pueblo (CO) Chieftain (9/20, 94K) article reports Lower Ark claims higher stormwater flows have increased Fountain Creek’s sedimentation and bacteria since closing the stormwater enterprise. SDS Spokesperson Mark Pifner claimed this was the result of three years of higher peak flows and that pollution safeguards are built into the Bureau’s contract. Although City Council abolished the stormwater enterprise, Pifner did say stormwater fees would be collected again in 2015 if voters choose this in 2014, but Lower Ark members remain dissatisfied.

Empowering Native American Communities:

COURT REVERSES RULING ON AMERICAN INDIAN STATUS CASE. The AP (9/20) reports a panel of the 9th U.S. Circuit Court of Appeals did not change a ruling reducing an Arizona man’s sentence for assault and firearms charges, but “made an important revision” on his status as an American Indian. The court reversed the holding that the jury determines “whether a tribe is recognized by the federal government,” now holding “it’s a matter of law for the judge to decide.”

BILL BANNING GAMING ON TOHONO O’ODHAM NATION LAND PASSES HOUSE. The Peoria (AZ) Times (9/20, 11K) reports Rep. Trent Franks is again introducing a bill that would prohibit Class II and III gaming on tribal lands. The previous bill would alter the settlement reached in 1986 between Congress and the Tohono O’odham Nation to ban the gaming on replacement lands. The new bill would ban it “on land within the Phoenix, Ariz. metropolitan area that is acquired after April 9, 2013, by the Secretary of the Interior in trust for the benefit of an

Indian tribe." The bill passed the House, but opponents say it would have Congress intervene for the first time in a state and tribal gaming compact, "putting all other tribal compacts at risk of future Congressional intervention." The Gila River Indian Community and Salt River Pima-Maricopa Indian Community favor the act, while the Tohono O'odham Nation said in a release that "two wealthy tribes are trying again to change the law so they can protect their massive market share."

TRIAL IN KILLING OF SPIRIT LACK RESERVATION CHILDREN GOES TO JURY. The Jamestown (ND) Sun (9/20, 850) reports Valentino "Tino" Bagola's Federal trial for killing two children on the Spirit Lake Indian Reservation went to the jury on Thursday. During closing arguments defense attorney Christopher Lancaster said "that FBI agents manipulated an uneducated Bagola into confessing" and pointed to a confession by Travis DuBois Sr., which he recanted. Assistant US Attorney Chris Myers said DuBois' confession only included "suggestions from investigators" with "nothing to back them up," while "Bagola gave details only a killer would know." Myers also pointed to DNA evidence.

WISCONSIN TRIBES RESISTING IRON MINE. James Rowen writes in the Milwaukee Journal Sentinel (9/20, Rowen, 798K) reports "Purple Wisconsin" blog. "I thought I'd expand the distribution of a significant legal step of resistance to" a proposed iron ore mine in Wisconsin by local tribes. He quotes the a Duluth-Superior article on the issue.

GERSON CRITICIZES STATES' INCREASING RELIANCE ON CASINO REVENUES. Michael Gerson writes in a Washington Post (9/20, 4.28M) column that at least 23 states "have turned to gambling as a source of revenue...to squeeze some public benefit out of a common vice." Noting that "40 percent to 60 percent of slot-machine revenues come from problem gamblers," Gerson asks, "Would the government exploit any other disability in this manner?" Gerson says both libertarians and liberals should be disturbed by the trend – the former because it grants "monopolies and awarding regulatory advantages to favored firms," and the latter because "revenues are drawn disproportionately from low-income workers and retirees."

Top National News:

WHITE HOUSE VOWS VETO AS HOUSE SET TO VOTE ON CR WITH ACA DEFUNDING. While the broadcast networks did not cover the showdown over the continuing resolution to keep the Federal government open past the end of this month, the story continues to be widely covered in print and wire media. House Speaker Boehner said the House will vote on a CR today that would defund the Affordable Care Act. However, reports generally see the move as a show, as the legislation is unlikely to survive in that form in the Senate, and the White House immediately issued a veto threat.

The AP (9/20, Taylor) reports Boehner said that his chamber will "pass" a bill Friday to keep the government open while "undercutting Obama's health care law." Boehner said, "The fight over here has been won. The fight over there (in the Senate) is just beginning. I expect my Senate colleagues to do everything they can to defund this law, just like the House is going to do." On the debt limit, Boehner said, "Let me be very clear. Republicans have no interest in defaulting on our debt – none."

However, USA Today (9/20, Camia, 5.82M), along with other news outlets, reports that the White House on Thursday vowed that the President will veto any effort to defund the ACA. A statement from the OMB said that the President would not sign the House bill, which would fund the government through December 15, because "it advances a narrow ideological agenda that threatens our economy and the interests of the middle class." The piece also reports that White House spokesman Jay Carney said it is "unconscionable" for the GOP to risk a shutdown.

The Washington Post (9/20, Kane, O'Keefe, 4.28M) reports that Boehner "told reporters that the stopgap government funding bill that they will advance Friday would yield to conservative demands of including a rider to block funding for the law commonly known as Obamacare." The Post adds that the President, speaking at a meeting with the Business Roundtable, "warned" that "another fight over government spending and the debt limit could harm businesses and consumers."

The Daily Caller (9/20, Pappas, 422K), summing up the sub-text of most coverage, says that because the

Democrats control the Senate and the White House, “the legislation is not expected to go much farther.”

The Hill (9/20, Berman, 255K) reports that Boehner “would not say” if he would be willing to bring up a bill that “lacked majority Republican support if the Senate returned the House measure with funding” for the ACA restored. Boehner also “strongly hinted” that Congress would “have to remain in session next weekend to avert a shutdown.” The House GOP has already canceled next week’s scheduled recess.

The Wall Street Journal (9/20, Peterson, Hook, 5.91M) predicts that the debate over the legislation will be nasty, as Senate Majority Leader Reid has vowed to strip out the language defunding the ACA. Reid said, “Any bill that defunds Obamacare is dead. It is a waste of time.”

However, Politico (9/20, Kim, 467K) reports that Reid “declined to answer whether he has enough Republican support to clear the 60-vote threshold to end a filibuster on the CR.” But the Democratic Leadership “indicated that they won’t back away from their position against defunding Obamacare even when the clock ticks closer to a potential government shutdown.”

Meanwhile, the Washington Times (9/20, Howell, 417K) reports that House Minority Leader Pelosi said Thursday that the House vote set for Friday would “devastate health care reforms and investments in jobs, education and research.” The Times adds that assuming the House’s effort to defund “Obamacare fails” in the Senate, the House GOP “plans to seek a one-year delay to the Affordable Care Act as part of any subsequent deal to extend the government’s borrowing authority.” Pelosi said that “shutting down the government is one bad thing,” but it can be re-opened, but “Not lifting the debt limit is unleashing a torrent, a river of no return.”

CR’s Potential Path Through Senate Laid Out. The Hill (9/20, Bolton, 255K) reports Senate Democratic aides see on path forward on the CR: Reid would first schedule a vote to end debate on the House resolution, which would require 60 votes but presumably draw GOP support because it would include the amendment to defund the ACA. Reid would then “fill the amendment tree,” and include an “amendment to strike” the defunding language and anything else Democrats find objectionable. That would be followed by a second cloture vote, on legislation that would still include defunding. Finally, any pending amendments could then be passed on a simple majority vote, allow the defunding language to be removed with only Democratic support.

Cruz Willing To Risk Shutdown To Defund ACA, But Not Lee. The AP (9/20, Espo) reports that Sen. Ted Cruz, who has acknowledged that the Senate will likely defeat any effort to defund the ACA, on Thursday “vowed” at a news conference to do “everything and anything possible to defund Obamacare.” He said that might include a filibuster of “legislation to prevent a partial government shutdown.” However, Sen. Mike Lee, Cruz’s partner in “Defund Obamacare” commercials, said that law “is not worth causing a shutdown over.”

Bloomberg News (9/20, Tiron, Hunter, 1.91M) reports that Senate Democrats are “considering a procedural tactic that would put Cruz and his allies in an awkward spot.” The Democrats “could have a simple majority vote that would strip the health-care defunding language once they end debate on the House measure,” which would require Cruz to either vote against the House bill with the defunding language or “instead join with Democrats to overcome the procedural hurdle.”

Corker Down On Defunding Strategy. Roll Call (9/20, Lesniewski, Subscription Publication, 87K) reports Sen. Bob Corker is “openly” saying what “other Republicans seem to be thinking behind the scenes:” the strategy to defund that ACA is “raising expectations among conservatives to unrealistic levels.” Corker said, “It seems to me that the House sends over a piece of legislation, we are easily going to support it. We are also going to probably support ending debate,” adding that under Senate rules, Democrats “would have a chance to amend the bill post-cloture to eliminate the language defunding Obamacare.”

ACA Defunding Fight Disrupting GOP. McClatchy (9/20, Lightman, 95K) says that with the House vote, Republicans will “proclaim solidarity” in efforts to defund the ACA, but adds, “Don’t be fooled: The party is bitterly divided about how and when to get rid of Obamacare.” The battle “over tactics could well determine who controls the Republican Party – and just as important, its image – for years to come.”

The New York Times (9/20, Parker, Weisman, Subscription Publication, 9.61M) profiles those conservatives pressing Boehner to adopt more conservative positions, including defunding the ACA, describing them as a

“rotating cast of characters – often backbench newcomers whom few have heard of outside their districts, and who were elected on a Tea Party wave.”

As Debate Proceeds, Lawmakers Scale Back Ambitions. The Washington Post (9/20, Montgomery, 4.28M) reports that when House Majority Leader Eric Cantor “rolled out a list of Republican demands this week for raising the federal debt limit,” there was a “surprising omission” in the lack of “any real plan” to tackle the debt. Democrats similarly “have largely stopped talking about imposing new taxes on the rich and are focused on reversing” sequestration.

DNC Chair Says Congress “Hurling” Toward Shutdown. USA Today (9/20, Page, 5.82M) reports that DNC Chairwoman Debbie Wasserman Schultz says Congress is “hurtling” toward a “fiscal crisis in the next few weeks.” In an interview with USA Today’s Capital Download, she said that the House Republicans have “been engaged in an internecine battle and an internal civil war, and the Tea Party has won. It’s evident that we’re headed toward government shutdown or a default, one or the other. It’s kind of like deciding which car you’re going to take.”

Boehner Lashes Out At President Over Negotiating. The AP (9/20) reports Boehner is “criticizing” President Obama for “negotiating with Russian President Vladimir Putin” but not with Congress. White House spokesman Jay Carney said “joked” that Boehner “seemed to be suffering from ‘Putin envy.’”

The Washington Times (9/20, Klimas, 417K) reports Boehner “tweeted out a video” with the comments. In the tweet, Boehner said, “POTUS is happy to negotiate w/Vladimir Putin ... but won’t work w/Congress on needed deficit reduction.” The video starts with clips of Obama, Carney and others “saying that the administration will not negotiate on the debt limit.” It then flips to clips of the President and Secretary of State Kerry “expressing a desire to engage in ‘substantive, meaningful negotiations’ with Mr. Putin on chemical weapons use in Syria.”

Politico (9/20, Epstein, 467K) expands on Carney’s response, reported he said that Boehner’s charge that the President won’t negotiate is “irrefutably false,” and adding, “The president has spent an enormous amount of time with John Boehner over the years” and will begin a new “round of outreach” to the GOP in coming days to “avert a government shutdown.”

Politico (9/20, Sherman, Allen, 467K) separately reports that Obama is “working to set up a meeting on budget issues with top Democratic and Republican leaders in Congress at the White House next week, according to several sources.” While no date has yet been set, the “tail end of the week – perhaps Thursday – seems most likely.”

Meanwhile, The Hill (9/20, Berman, 255K) reports that Boehner said he has “no intention of returning to the one-on-one grand bargain talks he pursued with Obama in 2011.” Boehner told reporters, “I’m not doing that. The House is going to pass a bill. We expect the Senate to pass a bill. I would guess the president would engage with the majority leader over there if he so desires.”

Roll Call (9/20, Dennis, 87K) also reports on the “Putin envy” exchange.

More Commentary. In an editorial, USA Today (9/20, 5.82M) condemns the GOP for linking defunding the ACA with budget and debt issues, saying their “obsession with overturning ObamaCare is getting sillier and more dangerous at the same time.” The editorial says that the GOP “hard-liners’ contempt for the federal bureaucracy blinds them to the consequences of a government shutdown.”

In an counterargument, Rep. Marlin Stutzman (R-IN) writes in an op-ed for USA Today (9/20, 5.82M) that the ACA harms all Americans, highlighting its impact on his constituents. Stutzman argues that the law harms small businesses, medical device manufacturers, and those purchasing health insurance.

In his column for the New York Times (9/20, Subscription Publication, 9.61M) entitled “The Crazy Party,” Paul Krugman says that in recent months, the GOP “seems to have transitioned from being the stupid party to being the crazy party.” He adds that it “grows increasingly hard to see how, in the face of Republican hysteria over health reform, we can avoid a government shutdown – and maybe the even more frightening prospect of a debt default.”

In his column for the Washington Post (9/20, 4.28M), Eugene Robinson says that House Republicans “are like a bunch of 3-year-olds playing with matches.” He says that the President needs to stand up to them by defending Obamacare, and fending off their efforts to tie its fate to raising the debt ceiling or funding the government.

In her column for the Washington Post (9/20, 4.28M), Ruth Marcus argues that Americans should “be afraid. Be very, very afraid.” That is her “chilling, and surprising, takeaway from numerous conversations with administration officials and members of Congress over the past several days about the looming need to fund the government and raise the debt ceiling.” She argues that a government shutdown is “stupid but survivable,” but failing to raise the debt ceiling “evokes words such as ‘catastrophic’ and ‘unthinkable,’ which is why it has never happened.”

ECONOMISTS WARN JOBLESS RECOVERIES NEW TREND. The Washington Post (9/20, Tankersley, 4.28M) reports the US economy “just hasn’t looked like its old self lately, especially when it comes to regaining the jobs” lost during a recession. Now, the US looks more like 1980s Europe, “slow to rebound and hire after a downturn, leaving workers to flail for years in a weak job market.” The Post says that a “major new study” from economists at the University of Texas at Austin and the University of California at Berkeley “suggests that vintage Europe is the new American normal for recessions and recoveries,” though “even after an exhaustive series of tests, the economists still can’t explain what has gone wrong.”

Meanwhile, the AP (9/20, Yen) reports that even as the economy “shows signs of improvement” and “poverty levels off,” new Census data “suggests the gains are halting and uneven.” Not all segments of the population are “seeing an economic turnaround,” particularly groups like single mothers.

Jobless Claims Near Six-Year Low, But Data Problems Persist. Meanwhile, the Wall Street Journal (9/20, Morath, Sparshott, Subscription Publication, 5.91M) reports that first time claims for jobless benefits rose 15,000 last week to 309,000, near a six-year low. However, claims may still be low due to computer issues in California and Nevada. The four-week moving average, which irons out week-to-week volatility, came in at 314,750, the lowest since October 2007. The Journal says some economists are skeptical that the drops in the data in recent weeks is accurate.

Wells Fargo To Eliminate Another 1,800 Jobs. The AP (9/20) reports Wells Fargo will lay off “an additional 1,800 employees from its mortgage department, after cutting about 2,300 jobs from the same unit in August,” citing a lower-than-expected number of mortgage refinancings.

Domestic Textile Production Rebounding, But With “Far Fewer Workers.” The New York Times (9/20, Clifford, Subscription Publication, 9.61M) runs a 2,600-word feature on the return of some textile manufacturing to US facilities after years of outsourcing, with one business owner saying domestic production “has several advantages,” including lower transportation costs, faster turnaround time and, “most striking, labor costs – the reason all these companies fled in the first place – aren’t that much higher than overseas because the factories that survived the outsourcing wave have largely turned to automation and are employing far fewer workers.” So while manufacturing might be coming back to the US, jobs in the sector are not necessarily following.

FBI DIRECTOR GIVES DETAILS ON NAVY YARD SHOOTING. NBC Nightly News (9/19, lead story, 3:05, Williams, 7.86M) reported, “A lot of the details of what we thought we knew about the gun massacre at the Washington, D.C., Navy Yard have changed.” NBC (P. Williams) added FBI Director Comey gave a briefing to journalists in which he said that shooter Aaron Alexis showed “no signs of targeting anyone in particular.” He began shooting a little after 8:00 a.m., but police say the first call for help was at 8:21. The FBI also says there isn’t evidence Alexis went into the building’s atrium from the upper floors. Meanwhile, “a Navy police union says its force was understaffed preventing quicker action.”

Bob Orr reported on the CBS Evening News (9/19, story 2, 2:10, Pelley, 5.58M) that “Comey said there was ‘no discernible pattern’ to Alexis’ movements.” After Alexis used all his shotgun ammunition, he started using the Beretta semiautomatic pistol he took from a security guard he killed. Meanwhile, “analysts are still struggling to understand why it happened.”

The New York Times (9/20, Schmidt, Subscription Publication, 9.61M) reports Comey said, “We are continuing to work through video evidence and understand the shooter’s life and motivation better, and that requires

painstaking work to make sure we do that well and carefully.”

USA Today (9/20, Michaels, 5.82M) reports a government official with knowledge of the investigation said that the FBI's computer forensics team is “examining a computer at the Residence Inn where Alexis stayed” and that they “found undisclosed ‘digital evidence.’” Meanwhile, Anthony Meely, chairman of the Fraternal Order of Police Naval District Labor Committee, said that only seven Navy police officers were working at the Navy Yard on Monday, instead of the minimum 11 that are supposed to. With six required to man the gates, “only one could immediately respond to the attack at Building 197, Meely said.” He added, “People died because of management rights, the right to make a decision to save money.”

The Los Angeles Times (9/20, Serrano, 3.07M) reports a Navy official responded to the union's concerns “with a statement: ‘This is absolutely something we are looking at.’”

Navy Yard Reopens. The AP (9/20, Witte) reports that the Washington Navy Yard re-opened Thursday “for normal operations,” except for building 197, where the shooting took place, and the gym, which the FBI is using as a staging area for its investigation. The article includes comments from some of the workers returning to the installation.

The Washington Post (9/20, Londoño, Gold, Leonnig, 4.28M) also covers the installation's reopening.

Military Acknowledges Security Clearance Procedures Need Improvement. The Washington Post (9/20, Londoño, Gold, Leonnig, 4.28M) reports that the Pentagon's ordering a review of security-clearance procedures in the wake of the Navy Yard shooting “effectively acknowledged that years of escalating warning signs about Alexis went unheeded.” Similarly, “top intelligence and military officials concede” that not having regular reviews when millions of people receive security clearances for up to 10 years “is a serious safety risk.” The Office of the Director of National Intelligence Office of the National Counterintelligence Executive spokesman Gene Barlow “acknowledged that the agency sees room for improvement.” During the last year, ODNI “has been studying how to more regularly screen people who have passed background checks.”

The Christian Science Monitor (9/20, Mulrine, 540K) reports the issue of security clearance and mental health is “fraught with complications,” with veterans from Iraq and Afghanistan seeking “to assimilate back into society – and, in many cases, get Pentagon jobs.” Additional restrictions on security clearances for those with mental health-related issues “could affect the opportunities available to those struggling with combat-related stress.” Meanwhile, some say that asking if a person has been treated for a mental health issue isn't the right question, as seeking treatment may indicate the person seeks to better themselves and is healthier than one who doesn't.

Same Company Performed Background Checks On Snowden, Alexis. The New York Times (9/20, Goldstein, Schmidt, Subscription Publication, 9.61M) reports USIS, previously known as US Investigations Services, performed background checks on both leaker Edward J. Snowden and Washington Navy Yard shooter Aaron Alexis. The company has been under investigation by the Office of Personnel Management since late 2011.

The Wall Street Journal (9/20, Nissenbaum, Barrett, Subscription Publication, 5.91M) reports USIS currently conducts about 45% of government background investigations and had over \$415 million in government contracts this fiscal year.

Reuters (9/20, Ingram, Simpson) reports Sen. Claire McCaskill, head of the Senate Subcommittee on Financial and Contracting Oversight, said in a statement, “What's emerging is a pattern of failure on the part of this company, and a failure of this entire system, that risks nothing less than our national security and the lives of Americans.”

Alexis Exhibited “Bizarre” Behavior “Numerous” Times Before Shooting. The New York Times (9/20, Goode, Nir, Fernandez, Subscription Publication, 9.61M) reports that on “numerous occasions” prior to the shootings “Alexis' increasingly bizarre behavior was noted by others,” such as hotel employees, Virginia airport guards, and the Newport police. Similar to other mass killers, Alexis “left a trail of telltale signs that were minimized, misinterpreted or ignored.” While the Experts Inc., which employed Alexis, said they thought he felt his hotel was too noisy when he complained about voices, the Residence Inn's log includes an entry that the company said in a call that Alexis “is unstable and the company is bringing him home.” The call, six weeks prior

to the shooting, suggests the company "had deep concerns about his state of mind and raises questions about why he was allowed to continue working at Navy bases," according to the Times.

ABC World News (9/19, story 2, 1:55, Sawyer, 7.43M) reported that in "a recent bizarre encounter" with Alexis. ABC (Thomas) added that Glynda Boyd and her family had "an unsettling encounter of paranoia" at the Norfolk, Virginia airport when a man she believes was Aaron Alexis confronted them, believing one of the group was laughing at him.

Capitol Police Reviewing Allegations Team Was Pulled Back At Start Of Shooting. At the end of its segment on the Navy Yard shooting, NBC Nightly News (9/19, lead story, 3:05, Williams, 7.86M) reported that members of US Capitol Police Tactical Team say a supervisor ordered them back as "they were preparing to enter the Navy Yard to help."

The Washington Times (9/20, Waterman, 417K) reports the US Capitol Police say they are investigating the allegations Capitol Hill Police Chief Kim C. Dine said in a statement that he "asked the Capitol Police Board to lead an independent fact review," and Senate Sergeant-at-Arms Terrence Gainer, said "that officials were pulling radio logs from Monday's incident and interviewing the officers involved."

Roll Call (9/20, Hess, Subscription Publication, 87K) reports the fact review will be due October 21. Politico (9/20, Everett, 467K) reports Del. Eleanor Holmes Norton (D-DC) will meet with the Capitol Police Union will "over allegations that a tactical team was ordered to stand down when it moved to respond to the shooting."

Federal First Responders Had Problems With Radios. The Hill (9/20, Bogardus, 255K) reports that Federal firefighters and police officers had trouble with their radios during the Navy Yard shooting, according to union representatives for first responders, who said they "resorted to using their cell phones and radios from D.C.'s emergency responders." One police officer's radio's battery died and another was unable to call for help because his radio didn't have a signal. Additionally, a union official said that "firefighters were also having problems with their radio signals." Anthony Meely, chairman of the Fraternal Order of Police Naval District Washington (NDW) Labor Committee said such problems were "'a known issue' on the base."

Little Pushback From Gun Groups Following Starbucks' No Longer Welcoming Guns. USA Today (9/20, Horovitz, 5.82M) reports that while "the blogosphere has been on fire" after Starbucks asked customers to not bring guns into its stores, "several key groups" representing gun owners haven't called for action against the company. "For the most part" these groups "had little negative to say." However, David Primo, associate professor of political science at University of Rochester, warned that the organized special interests' reaction wasn't important, but "grass-roots actions."

More Commentary. Charles Krauthammer writes in a column in the Washington Post (9/20, 4.28M) that liberals blame weapons for gun violence and that we should instead focus on the shooters. Krauthammer says that when the police learned Alexis was hearing voices, he should have been taken to a hospital, given an anti-psychotic, and then either put into the care of family and friends or involuntarily committed. Krauthammer acknowledges this as "outright paternalism" but adds that allowing those "as lost and profoundly suffering" as Alexis to be uncared for is "cruel and reckless ." He calls for the nation to stop allowing "the mentally ill to die with their rights on," and sometimes take innocents with them.

An op-ed in the Washington Post (9/20, 4.28M) is a version of a piece by Cynthia McCabe that appeared in her Brunch Bird blog. McCabe writes that "America hardly noticed" the Navy Yard shooting, contrasting it with the reaction to the Newtown, Connecticut shooting. McCabe criticizes the nation's "apathy" and attributes it to those in Washington being "considered faceless, pointless bureaucrats" who "are held up as symbols of everything wrong with politics, government and media." Thus, the killings in DC were "not people dying in Real America." She concludes that the "dehumanization" of DC and "uninterest" in the deaths "cannot be forgiven."

Editorial Wrap-Up:

NEW YORK TIMES. "Another Insult To The Poor." The New York Times (9/20, Subscription Publication, 9.61M) says the House vote on food stamps "can be seen only as an act of supreme indifference." The Times

notes that data shows that poverty remains severe and that Middle Class struggling. The Times ties the cuts to sequestration, concluding, "against that backdrop, there is no justification for savaging the safety net and decimating the budget."

"Blocking Healthcare Reform In Florida." The New York Times (9/20, Subscription Publication, 9.61M) says in an editorial that "Florida's destructive efforts to sabotage healthcare reform has drawn a much-needed response from the Obama administration." The state "has been shameless in attempting to destroy" the Affordable Care Act, but HHS Secretary Sebelius "has awarded almost \$8 million in grants to Florida organizations to hire and train outreach workers and another \$8 million to community health centers for the same purpose. ... With the state government so adamantly obstructive, the success of healthcare reform in Florida will depend heavily on such private efforts."

"Funny Money In New Jersey." In an editorial, the New York Times (9/20, Subscription Publication, 9.61M) condemns how "some New Jersey players...have found a backdoor way to support Gov. Chris Christie's campaign" by donating to the Republican Governors Association, which has donated \$1.7 million to Christie. The Times calls for an investigation concluding that cleaning up the state's pay to play culture "deserve[s] more than a shrug from the politicians and the state officials charged with overseeing their campaigns."

"Where Water Is Gold." The New York Times (9/20, Subscription Publication, 9.61M), in an editorial, notes that "a potentially huge new water source" has been discovered underneath Kenya. The Times calls it "some rare good news" to "offset the usual grim predictions about the planet's dwindling natural resources," but adds "now comes the challenge of managing it fairly and transparently." According to the Times, in Kenya, "an estimated 17 million lack access to safe drinking water and 28 million are without adequate sanitation."

WASHINGTON POST. "Repression In Bahrain." The Washington Post (9/20, 4.28M), decries the arrest of Bahraini "opposition leader" Khalil al-Marzooq, who the Post says has been "seeking to bridge the growing polarization between the Persian Gulf nation's Sunni ruling family and its restless, majority-Shiite population," and "had firmly renounced violence." The Post goes on to say that, "incredibly, the State Department's response to Mr. Marzooq's arrest was to express disappointment with the opposition for withdrawing from the national dialogue." According to the Post, the State Department's "myopic attitude will only encourage more repression...and endanger the very U.S. assets that the administration sees itself as protecting."

"Confronting The Superbugs." In an editorial, the Washington Post (9/20, 4.28M) highlights CDC Director Tom Frieden's warnings about superbugs, writing that "laudable efforts are being made everywhere to improve hospital procedures" and that the FDA and CDC are taking other steps, but "the question raised by Dr. Frieden's alarm is whether the responses measure up to a problem described as potentially catastrophic. ... Let's hope we won't look back on the latest CDC report as just another warning that was forgotten."

"Terry McAuliffe's Budget Flaw." The Washington Post (9/20, 4.28M) says in an editorial that while Virginia Democratic gubernatorial nominee Terry McAuliffe "is right" about expanding Medicare in the state, his argument that expansion will boost state revenue "poses several problems." The Republican-led General Assembly "may continue to oppose Medicaid expansion," and even if it does not, "much of the projected windfall would come in the first few years, when the federal contribution would be highest. After that, Virginia would have to pony up some cash of its own."

WALL STREET JOURNAL. "The Government Won." The Wall Street Journal (9/20, Journal, Subscription Publication, 5.91M) says in an editorial that five years after the beginning of the financial crisis, the Federal government is significantly more powerful than it was in 2008, particularly in the finance sector. The Journal says Dodd-Frank and other legislative actions have added more risk to the financial system.

"Tom DeLay's Vindication." The Wall Street Journal (9/20, Subscription Publication, 5.91M) editorializes that while a Thursday appeals court ruling vindicates ex-House Majority Leader Tom DeLay, he should never have been prosecuted in the first place.

"Born-Again Fracker." In an editorial, the Wall Street Journal (9/20, Subscription Publication, 5.91M) writes that FERC nominee Ron Binz's history of hostility to all fossil fuels is the cause of his trouble, having bent the law and manipulated companies to favor clean energy. The Journal says Binz's statements at his confirmation

hearing denying such hostility and avowing regulatory restraint don't match his previous actions and statements. The Journal predicts that, if confirmed, Binz will continue FERC's abuse of its power to make the grid favor clean energy instead of fossil fuels and calls on Landrieu to vote against him.

PRESIDENT OBAMA – Departs the White House en route Joint Base Andrews, South Lawn, open press; departs Joint Base Andrews, out-of-town travel pool coverage; arrives Kansas City, Missouri, Kansas City International Airport, open press; tours the Ford Stamping Plant, the Ford Kansas City Stamping Plant Liberty, Missouri, travel pool coverage; delivers remarks at the Ford Stamping Plant, the Ford Kansas City Stamping Plant Liberty, Missouri, open to pre-credentialed media; departs Kansas City, Missouri en route Washington, DC, Kansas City International Airport, open press; arrives Joint Base Andrews, out-of-town travel pool coverage; arrives the White House, South Lawn, open press. Notes: Principal Deputy Press Secretary Josh Earnest will gaggle aboard Air Force One.

VICE PRESIDENT BIDEN – The Vice President will attend the US-Mexico High Level Economic Dialogue as part of his travel to Mexico City, Mexico, on September 19-20th. Highlights: The Vice President will be in Mexico City, Mexico. The Vice President will deliver remarks highlighting the launch of the US-Mexico High Level Economic Dialogue at the Ministry of Foreign Affairs. The Vice President's remarks are open press and audio will be available on www.WhiteHouse.gov/live. Vice President will attend the inaugural meeting of the US-Mexico High Level Economic Dialogue. The Vice President will be joined by Secretary of Commerce Penny Pritzker, United States Trade Representative Michael Froman, Assistant Secretary of State Jose Fernandez, Assistant Secretary of State Roberta Jacobson, Undersecretary of the Treasury Lael Brainard, Acting Secretary of Homeland Security Rand Beers and Secretary of Transportation Anthony Foxx. There will be a photo spray at the top of this meeting. Later, the Vice President will travel to the President's residence. The Vice President will meet with President Enrique Peña Nieto. There will be a pool spray at the top of this meeting. Following their meeting, the Vice President and President Peña Nieto will deliver statements to the press. These statements will be open to pre-credentialed media. Afterwards, the Vice President will depart Mexico City, Mexico, en route Wilmington, Delaware.

MICHELLE OBAMA – First Lady Michelle Obama will host a luncheon in honor of the winners of the 2013 National Design Awards, which are organized by the Smithsonian's Cooper-Hewitt, National Design Museum. Winners are high school students from NY and Washington, DC.

US Senate: No Scheduled Events.

US House: 9 a.m. – The House will meet at 9:00 a.m. for legislative business. Last votes expected no later than 3:00 p.m. House expected to vote on defunding Obamacare. H.Res. 352 – A resolution providing for the consideration of the Joint Resolution (H.J.Res 59.) making continuing appropriations for fiscal year 2014, and for other purposes (Special Rule, One Hour of Debate) (Sponsored by Rep. Tom Cole / Rules Committee) H.R. 3102 – Nutrition Reform and Work Opportunity Act of 2013 (Closed Rule, One Hour of Debate) (Sponsored by Rep. Frank Lucas / Agriculture Committee) Begin Consideration of H.R. 1526 – Restoring Healthy Forests for Healthy Communities Act, Rules Committee Print (Structured Rule) (Sponsored by Rep. Doc Hastings / Natural

Resources Committee)

GOP RALLY – 11 a.m. House Republican Leaders and their colleagues will hold a rally following the House vote to “protect Americans from the Presidents unworkable health care law” and keep the government open. House Speaker John Boehner (R-OH); House Majority Leader Eric Cantor (R-VA); House Majority Whip Kevin McCarthy (R-CA); House Republican Conference Chair Cathy McMorris Rodgers (R-WA); Members of the House Republican Conference. Speaker.gov/Live/. Location: Rayburn room. Contacts: Dylan Colligan dylan.colligan@mail.house.gov (202-225-5107). Notes: Note: All cameras must be set up between 9:00 – 10:00 AM ET. Start time of event is approx.

COMMITTEE MEETINGS

POSTPONED

NATURAL RESOURCES – 9 a.m. Subcommittee on Energy and Mineral Resources hearing on “Energy Independence: Domestic Opportunities to Reverse Californias Growing Dependence on Foreign Oil”. Location: 1334 Longworth.

ARMED SERVICES – 9 a.m. – 11 a.m. Subcommittee on Readiness hearing on Resetting the Force for the Future: Risks of Sequestration. Witnesses: Lieutenant General William M. Faulkner, USMC , Deputy Commandant Installations and Logistics, US Marine Corps; Lieutenant General Raymond V. Mason, USA, Deputy Chief of Staff for Logistics, US Army. Location: 2212 Rayburn.

SCIENCE, SPACE AND TECHNOLOGY – 9:30 a.m. Subcommittee on Space hearing on “NASA Infrastructure: Enabling Discovery and Ensuring Capability.” Witnesses: Paul K. Martin, Inspector General, National Aeronautics and Space Administration; Richard Keegan, Associate Deputy Administrator, National Aeronautics and Space Administration. Location: 2318 Rayburn.

NEW

EDUCATION & THE WORKFORCE – 10 a.m. Early Childhood, Elementary, and Secondary Education Subc. Hmg. on career and technical education and training programs. Location: 2175 Rayburn.

NATURAL RESOURCES – 10 a.m. Subcommittee on Fisheries, Wildlife, Oceans and Insular Affairs oversight hearing on the Department of the Interiors proposal to use a Categorical Exclusion under the National Environmental Policy Act (NEPA) for adding species to the Lacey Acts list of injurious wildlife. Location: 1324 Longworth. Notes: NEW START TIME.

Other: **NATIONAL CHILD PASSENGER SAFETY WEEK – Sept. 15 – 21.** Mid-Atlantic Foundation for Safety and Education. Contacts: Lon Anderson: 202/481-6820 (O) 703/980-8868 (C), John B. Townsend II: 202/481-6820 (O) 202/253-2171 (C), Jeanette Tejada de Gomez: 202/481-6820 (O) 202/699-1206 (C).

CBCF LEGISLATIVE CONFERENCE – Sept. 17 – 21. Congressional Black Caucus Foundation's 43rd Annual Legislative Conference (CBCF ALC). Guests include: Former President Bill Clinton, Shaquille O'Neal, Susan Taylor, Iyana Vanzant, MC Lyte, Marc Morial, Robert Townsend, Brandy, Alfred Woodard, Rick Fox, Marvin Sapp, Mo Ivory, J. Anthony Brown, Sherni Shepherd, Dr. Bernice King, Tamron Hall, Wendell Pierce, Isaiah Thomas, Antoine Fuqua, Marian Wright Edelman, Philadelphia Mayor Michael Nutter, and Baltimore Mayor Stephanie Rawlings-Blake; others. Highlights: 3 p.m. National Association of Real Estate Brokers (NAREB), nations oldest professional Minority trade association under the direction of NAREB president, Donnell Spivey, assembled a six-member, expert panel to present perspectives on the current and future prospects of homeownership among African Americans. 3 p.m. Attorney General Eric Holder will deliver keynote remarks on voting rights at a public policy forum, hosted by Rep. Melvin Watt, as part of the Congressional Black Caucus Annual Legislative Conference. Press inquiries regarding logistics should be directed to the Office of Public Affairs at 202-514-2007. Location: Walter Washington Convention Center, 801 Mt. Vernon Place, NW. Contacts: (877) 585-6018, Priscilla Clarke pclarkepr@gmail.com (240-476-9643)

NLN SUMMIT 2013 – NLN Education Summit – Sept. 18 – 21. Raising the Roof/Advancing the Nation's Health.

Highlights: COEs will be formally recognized at the NLN's Annual Education Summit during the NLN Banquet. Deans and other top administrators, faculty, and healthcare executives. The ceremony follows the President's Reception. Location: Marriott Wardman Park Hotel, 2660 Woodley Park Rd. Washington. Contacts: Karen R. Klestzick kklestzick@nln.org (212-812-0376), Tish Hess thess@nln.org (212-812-0374).

DISTRACTED DRIVING – TEENS – Sept. 19 – 20. The 4th Annual NOYS (National Organizations for Youth Safety) Teen Distracted Driving Prevention Summit. Highlights: Event at the Washington Court Hotel. Teens will hear from transportation safety officials including National Transportation Safety Board Chairman Deborah A.P. Hersman, National Highway Traffic Safety Administrator David Strickland, victims of distracted driving crashes and experts in the field of engineering, education and enforcement. Students will also meet with exhibitors and brainstorm solutions to bring back to their communities. Contacts: Cathy Gillen ((443) 463-4449).

LPAC CONFERENCE – Sept. 19 – 22. Third Liberty Political Action Conference (LPAC). Media credentials: megan.stiles@campaignforliberty.com no later than September 18, 2013. Highlights: Dr. Ron Paul, Congressman Thomas Massie, Congressman Steve Stockman, Mark Mix (President of the National Right to Work Committee), and Morton Blackwell (President of the Leadership Institute). Location: Westfields Marriot, 14750 Conference Center Drive, Chantilly, VA 20151.

SAIS – GLOBAL CONFERENCE ON WOMEN – SEC CHAIR WHITE – 8:30 a.m. – 3:30 p.m. The Johns Hopkins University Paul H. Nitze School of Advanced International Studies (SAIS) will hold its fourth "Global Conference on Women in the Boardroom." Kara M. Stein, commissioner, SEC will deliver the opening keynote at approximately 9:10 a.m. Media contact: contact Felisa Neuringer Klubes in the SAIS Communications Office at 202.663.5626 or fklubes@jhu.edu. Location: Kenney Auditorium of the schools Nitze Building, located at 1740 Massachusetts Ave., N.W. Notes: due to a scheduling conflict, Kara M. Stein, a commissioner of the US Securities and Exchange Commission, will give the conferences keynote address in the place of SEC Chair Mary Jo White.

WASHPOST LIVE – CHILDHOOD OBESITY – 9 a.m. – 2 p.m. Washington Post Live Hosts Summit Addressing Childhood Obesity Speakers include Dr. Janet Collins from Centers for Disease Control and Prevention; Olympian Michelle Kwan; and Quincy Jones III of the Feel Rich Movement. Location: The Washington Post, 1150 15th Street NW.

INTER-AMERICAN DIALOGUE – US – BRAZIL RELATIONS – 8:30 a.m. – 10 a.m. The Inter-American Dialogue hosts discussion of US-Brazilian relations after the cancelation of President Dilma Rousseff's state visit to Washington next month. This will be the only state visit that President Obama will be hosting this year, and one of just six since he took office. Speaker: former Brazilian Ambassador to the United States, Rubens Barbosa. Commentary will be provided by the Eurasia Groups Senior Analyst for Latin America, Joco Augusto de Castro Neves. Location: Inter-American Dialogue, 1211 Connecticut Ave. NW, Suite 510.

EPA – CLEAN AIR ANNOUNCEMENT – 9 a.m. EPA Administrator Gina McCarthy will discuss EPA's priorities in addressing climate change at a National Press Club Speakers' event. Location: 13th floor, 529 14th Street, NW. Contacts: Julia P. Valentine valentine.julia@epa.gov (202-564-0496, 202-564-4355).

FUTURE OF NEXTGEN – 9 a.m. – 12 p.m. NextGen Institutes 2013 Annual Public Meeting: "NextGen – Successes and Challenges: Building a Path to the Future." Attendance is free but seating is limited. Speakers: AIA President and CEO Marion C. Blakey, Deputy Secretary of Transportation John D. Porcari; FAA Administrator Michael P. Huerta; Rep. Frank LoBiondo, (R-N.J.) Chairman, House Aviation Subcommittee; Rep. Rick Larsen, (D-Wash.) Ranking Minority Member of the House Aviation Subcommittee; Lt. Gov. Mead Treadwell, (R-Alaska) Chairman of the Aerospace States Association (ASA); Mayor Michael B. Hancock, (D-Denver, Colo.). Location: Atrium, Department of Transportation Headquarters, 1200 New Jersey Avenue, SE. Contacts: Dan Stohr dan.stohr@aia-aerospace.org (703-358-1078, 703-517-8173)

OECD – AG MARKETS – GLOBAL OUTLOOK – 9:30 a.m. – 11:30 a.m. Global Outlook on Agricultural Markets Hosted by USDA Economic Research Service (ERS). Chair: Mary Bohman, Administrator, Economic Research Service, US Department of Agriculture. Speakers: Wayne Jones, Head of Agro-food Trade and Markets, OECD Directorate for Trade and Agriculture; Stephen MacDonald, Agricultural Economist, Economic Research Service, US Department of Agriculture; Tim Sulser, Economist, Food and Agriculture Organization; Neil Conklin,

President, Farm Foundation. Location: USDA/ERS Conference & Training Center, Patriots Plaza III, 355 E Street SW. Notes: Plan to arrive at 9 a.m. for security.

EDUCATION IN LATIN AMERICA – 10 a.m. Panelists: Emily Gustafsson-Wright, Guest Scholar, Center for Universal Education in Global Economy and Development Brookings Institution; Adriana Vilela, Education Specialist, Organization of American States; Ana Eugenia Garduno, Head of the Mexico Center, Organisation for Economic Co-operation and Development. Moderator: Peter Meyer, Analyst in Latin American Affairs, Congressional Research Service. Location: Congressional Meeting Room South, Congressional Visitors Center.

CIVIL RIGHTS ADVANCEMENT PROJECT – MEN AND BOYS – 10 a.m. – 12 p.m. Panel discussion on improving outcomes for African American men and boys. Speakers: Tracy Martin, Jahvaris Fulton, Congresswoman Frederica Wilson, Rev. Al Sharpton, National Action Network, Actor Malik Yoba, Isiah Thomas, Hall of Fame NBA player and Chairman and CEO of ISIAH International, Robert Townsend, Hollywood Icon and Producer, Judith Browne Dianis, Co-Director, Advancement Project, Bishop Victor T. Curry, Pastor of the New Birth Baptist Church, Joshua Dubois, Former Executive Office of the President, Office of Faith Based & Neighborhood Partnerships under President Obama, David Johns, Executive Director of the White House Initiative on Educational Excellence for African-Americans, Dr. Dana L. Suskind, Professor of Surgery and Pediatrics Director, Pediatric Cochlear Implantation Program, Paul Wilson, Administrative Director, Office of Labor Relations Miami-Dade County Public Schools, Phillip Agnew, Executive Director, Dream Defenders and Robert Parker, 5000 Role Models of Excellence Project. Location: Walter E. Washington Convention Center, Room 202B.

BPC – GENOMIC MEDICINE – 10 a.m. – 12:30 p.m. Bipartisan Policy Center to Hold Interactive Policy Discussion on Advancing Personalized and Genomic Medicine: Exploring Information Needs and the Role of IT. Speakers: Edward Abrahams, PhD, President, Personalized Medicine Coalition; Alice Borrelli, Director of Global Healthcare Policy, Intel; Omri Gottesman, MD, Assistant Professor of General Internal Medicine, The Bronfman Institute for Personalized Medicine, Icahn School of Medicine at Mount Sinai ; Alice Leiter, Policy Counsel, Health Privacy Project, Center for Democracy and Technology ; Leonard Lichtenfeld, MD, Deputy Chief Medical Officer, American Cancer Society ; Andrew Litt, MD, Chief Medical Officer, Dell Healthcare & Life Sciences ; Janet Marchibroda, Moderator; Director, BPC Health Innovation Initiative ; Josh F. Peterson, MD, MPH, Director of Health Information Technology Evaluation, Assistant Professor of Bioinformatics and Medicine, Vanderbilt University Medical Center ; Richard Schilsky, MD, Chief Medical Officer, American Society of Clinical Oncology ; Madeleine Smith, Director of Government Policy, GE Healthcare ; Jeffrey M. Trent, PhD, President and Scientific Director, TGen. Contact: Joann Donnellan (703) 966-1990 , jdonnellan@bipartisanpolicy.org Media RSVP: press@bipartisanpolicy.org. Location: Bipartisan Policy Center, 1225 Eye Street NW, Suite 1000, 10th floor.

CATO – TRANS PACIFIC PARTNERSHIP – 11:30 a.m. The Trans Pacific Partnership: Race to the Finish, or Long Slog Ahead? Speakers: Jason Keams, Chief Trade Counsel, House Ways and Means Committee (Democratic); Simon Lester, Trade Policy Analyst, Cato Institute; and Meredith Kolsky Lewis, Associate Professor, SUNY Buffalo Law School; moderated by Daniel Ikenson, Director, Herbert A. Stiefel Center for Trade Policy Studies, Cato Institute. Location: Cato Institute, 1000 Massachusetts Ave. NW.

US GREEN BUILDING COUNCILS SERIES – 11:30 a.m. Sacramento Mayor Kevin Johnson to Lay Out a Vision for Building Resiliency in America at the US Green Building Councils Series. Location: National Press Club, Bloomberg Room, 529 14th Street NW.

POW/MIA RECOGNITION – HAGEL, DEMSPEY – 11 p.m. Secretary of Defense Chuck Hagel and Chairman of the Joint Chiefs of Staff Gen. Martin E. Dempsey deliver remarks the POW/MIA Recognition Day Ceremony on the River Parade Field, Pentagon. Journalists without a Pentagon building pass will be picked up at the Pentagon River Pedestrian Bridge only. Plan to arrive no later than 45 minutes prior to the event; have proof of affiliation and two forms of photo identification. Please call 703-697-5131 for escort to the cordon.

WILSON CENTER – SOMALIA – SHEIKH MOHAMUD – 1:30 p.m. – 3 p.m. Somalia: A Conversation with President Hassan Sheikh Mohamud. CONTACT: Maria-Stella Gatzoulis on the day of the event: tel. (202) 691-4188. Location: Woodrow Wilson Center, 6th floor, Ronald Reagan Building, 1300 Pennsylvania Ave. NW.

PRESS CALL TO SAY “NO THANKS TO BOEHNER” – 2:30 p.m. US Rep. Chris Van Hollen (D-MD), ranking member of the House Budget Committee, US Rep. Rob Andrews (D-NJ), and health reform advocates will hold an

emergency press call to say no thanks to Speaker Boehner's threat of a Congressional showdown. DIAL-IN INFO: (805) 747-4187, 677876. Contacts: Jeremy Funk 202-470-5878, Lauren Weiner 202-470-5870.

DOD HONOR CORDON – SOMALIA – 4:45 p.m. Secretary of Defense Chuck Hagel hosts an honor cordon to welcome Somalia's President Hassan Sheikh Mahamud to the Pentagon. The cordon will be held on the steps of the Pentagon River Entrance. Journalists without a Pentagon building pass will be picked up at the Pentagon River Parking Pedestrian Bridge only. Plan to arrive no later than 30 minutes prior to the event; have proof of affiliation and two forms of photo identification. Please call 703-697-5131 for escort to the cordon.

JUSTICE RUTH BADER GINSBURG – 6:30 p.m. Justice Ruth Bader Ginsburg will be interviewed by Michel Martin, host of NPR's Tell Me More, at a dinner celebrating the 30th anniversary of the Womens Law and Public Policy Fellowship Program, the 20th anniversary of the Leadership and Advocacy for Women in Africa program, and Justice Ginsburg's 20th year on the US Supreme Court and 80th birthday. MEDIA RSVP: mediarelations@law.georgetown.edu. Location: Washington Court Hotel, 525 New Jersey Avenue, NW.

NASSP GALA – DUNCAN – 7 p.m. Secretary Duncan will give remarks at the National Association of Secondary School Principals (NASSP) National Principal of the Year Awards Gala, where he congratulate winners and highlight the important role of school leaders. The gala will recognize outstanding middle and high school principals who succeeded in providing high-quality learning opportunities for students as well as made exemplary contributions to the profession. Location: Hyatt Regency Crystal City, 2799 Jefferson Davis Highway, Arlington, Va. Contacts: Press Office press@ed.gov ((202) 401-1576)

Last Laughs:

LATE NIGHT POLITICAL HUMOR.

Jimmy Kimmel: "A Brazilian hacker group launched a cyberattack against the NSA website in retaliation of the reports that the NSA spied on the Brazilian president. Unfortunately though, instead of hacking the NSA, they accidentally hacked NASA. And...that's why Brazilian hackers never win 'Wheel of Fortune.'"

Jimmy Kimmel: "Last week Russian President Vladimir Putin wrote an opinion piece that was published in the New York Times. It was a letter directed at the American people and in response, Sen. John McCain just wrote his own op-ed that was published on a Russian news website. The piece was titled 'Russians Deserve Better Than Putin' and he really called Putin out. He exposed him for the thug that he is. He did. You have to give him credit for it. In fact, he dissed the Russian president so hard there's speculation he may have collaborated with Kendrick Lamar."

Jimmy Kimmel: "Unfortunately there was some confusion when it came to publishing the letter. McCain intended it to be published in 'Pravda,' which is one of Russia's oldest and respected newspapers. But instead it was published on the website Pravda.ru, which has no affiliation with the newspaper at all and it appears that the letter went through some kind of government filter before it was posted, which, I guess, isn't surprising for a country that still doesn't have freedom of the press. But what was surprising was the tone of the translation. It almost seemed friendly, which was not how it was intended. This is how it was translated, 'Vladimir Putin is very sexy man and very strong like bear or bull. If I were lady, I would sex him. I am not lady. Therefore, I envious his muscles and strong eyes, but not in gay way. Putin is hero! Signature, Poopy Pants McCain.'"

Jimmy Kimmel: "The Fourth US Circuit Court of Appeals just made an interesting decision about Facebook. They said that liking something on Facebook is considered free speech and is therefore protected under the First Amendment. The case went to court because a former deputy sheriff in Virginia claimed he was fired for liking the Facebook page of the candidate running against his boss for sheriff. Which, the real takeaway is do not Facebook friend your boss under any circumstances."

Craig Ferguson: "It is also a great day for Russia. Or is it? Vladimir Putin says he's going to run for a fourth term as president in 2018. He has already decided. He has come up with a great campaign slogan: 'Vote for me or be executed.'"

Stephen Colbert: "Michelle Obama is a lovely lady, friend of the show. But ever since she started her 'Let's Move' campaign to combat childhood obesity, she's been cramming her pro-health agenda down our throats. Throats that should be packed with chili cheese fries."

Stephen Colbert: "I'm also not a huge fan of Barack. From day one I have vowed to stop Obamacare or die trying. And knowing my luck I'd almost die and then get nursed back to life by Obamacare."

Jay Leno: "If the Republicans and Democrats can't get together, there's a strong possibility of a Federal

government shutdown. You know what the legal definition of that is? A government shutdown is when Congress continues not to work, but they do it from home. See, they don't work. First of all, why do we call it a government shutdown? We are \$17 trillion in debt. Why don't we call it a going out of business sale?"

Jay Leno: "Pundits say President Obama is starting to lose support from his own party. Give you an idea how bad it's gotten, today Jimmy Carter compared him to Jimmy Carter."

Jay Leno: "Syrian President Assad told Fox News that if he were ever to talk to President Obama, he would tell Obama to listen to your own people. Is he the one to give advice about listening to your own people, huh? His people are shooting at him. Really! Why don't you listen to them?"

Jay Leno: "According to a Fox News poll, most Americans don't understand Obamacare. You know why? Cause it's not in Spanish. That's why they don't understand it."

Jay Leno: "Critics are saying that Obamacare will require doctors to ask you about your sex life. See, that is outrageous. Because your sex life is between you and the NSA, okay? And nobody else has any right to listen in or see those pictures."

Conan O'Brien: "In a recent interview that just came out, a former mistress of Bill Clinton said that Hillary Clinton is bisexual. Yeah, today Bill Clinton said, 'It's true. When I want sex, Hillary says bye.'"

FROM CHAIRMAN WYDEN

Question 1. In March, then Secretary Salazar responded to a letter from Sen. Murkowski and me inquiring about the status of the operations of the Federal Helium Reserve. The response stated that, under current law, the Helium Production Fund will terminate when the Department makes its final payment to the U.S. Treasury within 7 days after October 1, 2013. According to the letter, “when the Helium Production Fund terminates, the Department will lose the source of funds established to operate the Reserve and storage, transport and withdrawal facilities and equipment at the Cliffside Field. Absent action by Congress this would hinder or prevent management of the Reserve, including sales and revenue.” Can you confirm that October 7, 2013 is a hard deadline for the continued operation of the Reserve, and that the matter requires the urgent action of Congress to prevent a supply disruption that will have severe consequences on major sectors of the economy, including advanced manufacturing?

Response: October 7, 2013 is a hard deadline. The Bureau of Land Management has already generated enough revenue during this fiscal year through currently authorized helium sales to pay off the debt at the beginning of FY 2014. In accordance with the Helium Privatization Act, the Department must make the final payment to the U.S. Treasury within 7 days after October 1, 2013, and, at that point the Helium Production Fund will terminate and the Department will lose the source of funds established to operate the Reserve.

2. What is DOI doing to assist states, like Oregon, who are trying to develop Sage Grouse plans and implement conservation measures to prevent the USFWS from having to list the Greater Sage Grouse on the ESA list?

Response: The U.S. Fish and Wildlife Service is committed to working with each state within the range of the species, including the State of Oregon, to develop a comprehensive conservation plan to address threats to greater sage-grouse and to provide timely feedback to states about their plans, both during plan development and upon completion of the plans. The Service has reiterated this commitment to the Governors’ Sage-grouse Task Force and has also committed to providing the states with a more explicit framework and/or criteria to use to report their sage-grouse conservation efforts leading up to the 2015 decision. We are hopeful this approach will help the conservation community, including the states, accurately quantify and qualify the efficacy of its collective work to conserve sage-grouse and allow the Service to conduct a comprehensive and robust analysis of the species’ status.

3. With the number of wild horses in holding facilities now surpassing 50,000, what concrete steps has the BLM taken to *reduce* the holding population? Has the agency analyzed Herd Areas from which wild horses have been eliminated to identify potential

06.06.13 Full Committee Hearing the programs and activities of the Department of the Interior**habitat areas that would be appropriate for reintroduction of horses from holding facilities?**

Response: The BLM's Wild Horse and Burro program is dedicated to reducing the population of wild horses and burros currently in holding facilities. When rangeland health concerns require the BLM to gather and remove wild horses and burros from public lands, the BLM actively works to place as many as possible into private care through adoptions and sales to good homes. Ford Motor Company and Take Pride in America have joined together through the Save the Mustangs Fund in support of the BLM's effort to place sale-eligible animals into good homes. In addition to humane sales and adoptions, the BLM recently delivered 300 non-reproducing wild horses to the first wild horse eco-sanctuary in Wyoming, and is currently conducting an environmental review for a proposed eco-sanctuary in Nevada.

Under the Wild Free-Roaming Horses and Burros Act of 1971, the BLM manages wild horse and burro herds within areas where they were found roaming in 1971. Section 1339 of the Act states that nothing in the Act "shall be construed to authorize the Secretary to relocate wild free-roaming horses or burros to areas of the public lands where they do not presently exist." In many herd areas where the BLM does not manage public lands for wild horse and burro use, herd reintroduction at this time is not possible because the lands were transferred out of BLM ownership; they were removed from wild horse and burro use through court decisions; they featured checkerboard land ownerships where water sources were not controlled by the BLM; they held substantial conflicts with other resource values; or they did not provide critical habitat components necessary to support a herd (such as winter range). BLM periodically reviews wild horse and burro use of public lands through its land use planning process.

4. The Bureau of Land Management recently re-proposed its rule on hydraulic fracturing that would apply to oil and gas operations on federal land. I want to encourage you to personally ensure that the BLM issues a strong final rule – one that provides for advance public disclosure of fracking chemicals; well integrity requirements; and sound water management, including baseline and follow-up monitoring.

- **Advance Disclosure of Fracking Fluids** – Why shouldn't the public get advance notice of what fracking chemicals are used in their vicinity? I understand that the mix of chemicals can change after the drilling begins but why not have advance notice supplemented by updates if the mix of chemicals change?
- **FracFocus** – BLM proposes to rely on FracFocus, a private not-for-profit entity, as a means of public disclosure. However, I understand that there is no verification of the information that is posted by industry on that site. Also, the site doesn't conform to federal requirements regarding data and record retention. And it's not clear that regulators can enforce if false information is provided on a private

06.06.13 Full Committee Hearing the programs and activities of the Department of the Interior

website. Will the final rule require that any internet site relied on by BLM for public disclosure address these problems?

- **Backstop Standard -- At the Committee's Natural Gas hearing earlier this year, Frances Beinecke of NRDC raised an interesting point about having some sort of a national backstop standard to reassure the public that our water resources are protected, given the boom in hydraulic fracturing that is likely to continue for the foreseeable future. What do you think about that?**

Response: The revised proposal, on which the Department sought public comments until August 23, 2013, supports the Administration's commitment to an all-of-the-above approach to energy development by expanding domestic oil and gas production on public lands in a safe and responsible way in order to reduce our reliance on foreign oil imports. BLM's current regulations governing hydraulic fracturing operations on public and Indian lands have been on the books since 1983 and were not written to address modern hydraulic fracturing activities.

As indicated in the revised proposal, a number of comments were received requesting that BLM require up-front disclosure of the chemicals proposed for use in fracking fluid. In response, BLM noted that an analysis of the impacts from fracking is done as part of the National Environmental Policy Act analysis conducted prior to the issuance of permits and that, for this purpose, the exact composition of the fluid proposed for use is not required because chemicals used in the process are generally considered potentially hazardous for the purpose of impact analysis and mitigation. Also, operators will be aware that the rule requires disclosure of chemicals after operations are complete and operators will also be required to certify that the fluid used complied with all applicable permitting and notice requirements and all applicable federal, state, and local laws, rules, and regulations. Finally, operators would also be required to certify that wellbore integrity was maintained prior to and throughout fracking operations. Through these requirements, BLM believes that the post-fracturing disclosures and certifications would provide adequate assurances that fracking operations protect public health and safety and protect federal and Indian resources, and will ensure that the public is informed about the specifics of the actual fracking operations which are ultimately performed. Moreover, it is the practice in the industry for operators to change fracking contractors and for the fracking contractors to change the chemicals used for a variety of reasons. Thus, a prior disclosure rule would either provide the public with information of low reliability, or the operators would have to delay operations every time a chemical was changed from its previously filed plan. Neither of those options would promote the goals of the rulemaking.

Similarly, comments were received on the FRACFOCUS issue referenced in the question and were addressed in the revised proposal. BLM recognized and understood that FracFocus is in the process of improving the database with enhanced search capabilities to allow for easier reporting

06.06.13 Full Committee Hearing the programs and activities of the Department of the Interior

of information. Moreover, information submitted to the BLM through FracFocus will still be required to comply with this federal rule, including its requirements that the operator must certify the information submitted is correct.

Finally, the Department agrees that it is important that the public has full confidence that the right safety and environmental protections are in place. The revised proposed rule will modernize BLM's management of hydraulic fracturing operations and help to establish baseline environmental safeguards for these operations across all public and Indian lands.

5. The Department of Interior has had an Acting Inspector General since February 23, 2009 – a period of more than four years – when the President appointed Earl Devaney to chair the Recovery Accountability and Transparency Board. It is important that the Department of Interior have a permanent watchdog who can lead the 300 employees in its mission to “provide independent oversight and promote excellence, integrity and accountability within the programs, operations, and management of the Department of Interior.” Will you work with the White House and the Committee to bring a qualified nominee to the Senate for confirmation?

Response: This is an important position and we will work with the White House to ensure continued excellence and integrity.

6 - 8. Less than a decade ago, energy experts said that coal, like natural gas, was a commodity the U.S. would be importing rather than exporting. But last year the U.S. exported 125 million tons of coal, the most in 30 years. Arch Coal estimates the nation's coal export capacity will double over the next five years, with proposed coal terminals in Oregon, Washington, as well as the Gulf and East coasts. With protection of federal and state revenue in mind, Ranking Member Murkowski and I wrote a letter in January that prompted the Office of Natural Resources Revenue to begin an audit of coal mined on federal land then sold to international buyers.

What progress has the Office of Natural Resources Revenue and its state audit partners made since the audits began earlier this year?

Response: In December 2012, ONRR formed a special task force that includes our state auditor partners to review U.S. federal coal mines located in the Powder River Basin through a risk-based audit and compliance action plan. ONRR is also working closely with the Office of Inspector General's (OIG) office as needed to provide a further check on overseas coal sales.

06.06.13 Full Committee Hearing the programs and activities of the Department of the Interior

To date, the task force has reviewed all sales summaries and sales contracts submitted by federal coal lessees to ONRR for all PRB mines/leases. The goal was to identify whether additional documentation is needed to determine if reported transactions are U.S. coal export sales from federal leases involving non-affiliated or affiliated marketers or brokers and non-affiliated foreign companies. ONRR has also identified the universe of ONRR and State partners' completed or current audits of PRB coal mines/leases through a review of audit work plans covering sales in CYs 2009 through 2011. In addition, ONRR and its auditing partners in Wyoming and Montana are auditing all 15 producing federal Powder River Basin coal mines in their Fiscal Year 2013 and 2014 audit work plans.

The agency is using a risk-based strategy to narrow the number of leases and mines that are being audited. How many leases or mines have been identified as being in need of an audit, and what percentage of leases or mines being reviewed does this group represent?

Response: ONRR and its state audit partners are auditing all 15 producing federal PRB mines for calendar years 2009 through 2011, to verify whether export sales are occurring from a mine and whether coal lessees are properly valuing coal production under federal statutes, lease terms, and regulations.

06.06.13 Full Committee Hearing the programs and activities of the Department of the Interior

FROM SENATOR LANDRIEU

Question 1. Do you support the implementation of some form of revenue sharing to coastal energy producing states, specifically the acceleration of GOMESA?

- o Do you believe that allowing coastal states to share in the revenues that they produce will allow those states to implement important coastal protection measures, protecting invaluable infrastructure, wilderness and population centers?**

Response: The Administration has been clear that all American taxpayers, who own the nation's natural resources and public assets, should get a fair return from the sale of the public resources. It is through continued rigorous dialogue with stakeholders that the Department, as steward of our public lands and waters, must strike the right balance of the interests of local communities and the public owners of the resource as the President's all-of-the-above energy strategy is advanced.

2. Do you see room for improvement in the current permitting system for on and offshore oil and gas development?

- o Specifically, do you see a way to bring the time required to process onshore permits on Federal lands more in line with the time required to process permits for practically identical private lands?**
- o Currently, one issue I hear come up frequently regarding offshore permitting is the issue of permits being "deemed received"- essentially, permits are being returned to their submitters multiple for spelling and other minor errors before they may be reviewed for technical criteria, slowing the process of permit submission and review. Do you support a commonsense reworking of this system to allow permits which are 100% technically accurate, but may have differing abbreviations or very minor typos to be considered without the process of return and resubmission?**

Response: The leasing reforms put in place by the Department in 2010 established an open and environmentally sound process for developing oil and gas resources on public lands in a manner that maintains a robust leasing system and provides certainty in acquiring federal oil and gas leases. We will continue to maximize efficiencies and to work with industry and the public to ensure that these resources are developed safely and responsibly, while also delivering a fair return to the American taxpayer, businesses and communities. As noted at the hearing, BLM is also taking steps to implement an online permitting system that is designed to reduce the time it takes to process drilling permits, and the bureau recently hosted an interagency meeting that included executives from multiple agencies to establish strategies for decreasing permitting times while improving environmental outcomes.

Offshore, BOEM has achieved substantial efficiencies in its review process for offshore oil and gas exploration and development plans, while requiring compliance with the heightened safety and environmental protection standards. Exploration and development plans for deepwater drilling in the Gulf of Mexico submitted between October 2010 and October 2011 averaged 190

06.06.13 Full Committee Hearing the programs and activities of the Department of the Interior

days from submission to approval. In contrast, since October 2011 these plans have averaged 125 days for approval. Similarly, the Bureau of Safety and Environmental Enforcement (BSEE) achieved an average review time of 52 days for deepwater permits in 2012, down from 83 days in 2011, all while requiring compliance with the heightened safety standards. The FY 2014 budget includes a package of legislative reforms to bolster and back-stop administrative actions being taken to reform the management of Interior's onshore and offshore oil and gas programs, with a key focus on improving the return to taxpayers from the sale of these federal resources.

3. Though immunocontraception tools have been used on wild horses for research purposes, the BLM has vaccinated only a relatively small handful of horses over the years. The NAS indicates that this is the most promising technology that is available to humanely reduce population growth without resorting to removals.

- o Why has the BLM been seemingly so resistant to embracing and using the technology and how will you ensure that the agency begins to fully utilize this methodology to control wild horse population growth while limited or eliminating capture and removal of animals.**

Response: The BLM's Wild Horse and Burro program utilizes a variety of strategies to ensure herd populations are maintained within the land's capacity to support them. Since 1978, BLM efforts to safely and sustainably control herd population growth have included support for the development of an effective contraceptive agent. Several approaches developed in that time, were tried but abandoned as ineffective or impractical. The BLM currently utilizes the immunocontraceptive vaccine Porcine Zona Pellucida (PZP) in the formulations known as ZonaStat-H and PZP22; however, appreciable decreases in on-the-range herd growth rates as a result of these treatments have not yet been apparent – in part because too few mares were treated but also because the duration of effectiveness is too short lived. The President's Fiscal Year 2014 budget provides \$2 million in funding for the implementation of recommendations made in the National Academy of Sciences (NAS) independent review of BLM wild horse and burro management practices. The BLM is currently considering the report's findings, and will evaluate contraception and population growth suppression recommendations for potential implementation on the range.

FROM SENATOR CANTWELL

Question 1. Yakima River Basin Integrated Water Resource Management Plan: We've learned that climate change is causing more extreme storm events and changing seasonal temperatures and precipitation patterns in the Pacific Northwest. Some parts of the Cascades have already experienced a more than 30% decline in spring snow water melt-off over the past five decades, and the April 1st snowpack at mid and low elevation basins is projected to decline by 44% by the 2020s.

In the Yakima Basin, agricultural output is highly sensitive to water availability, and to potential impacts of climate change that increase the probability of water shortages. Expected annual crop losses due to water shortage increases are estimated to be \$79 million by midcentury, roughly six times the historic average losses. While we need to begin reducing carbon emissions as much as we can and as soon as possible, natural resources will continue to be hurt due to the carbon pollution already in the atmosphere. In anticipation of coming water challenges, we've been working on long term management plans in Washington state. Particularly, the Yakima River Basin Integrated Water Resource Management Plan is the product of extraordinary work and compromise with many potential long term benefits for both farmers and the environment.

The tens of millions of dollars that Washington State has already contributed and is planning to contribute into the Integrated Plan demonstrate the commitment of a diverse group of stakeholders to ensuring adequate water supplies in Yakima valley and adequate flows for fish as the region faces increasingly erratic snow fall patterns. While we appreciate the Administration's inclusion of \$8 million in its FY14 budget for enhancement projects in the Yakima River Basin, there will have to be a significant federal commitment over the long term to make this happen and realize all of these benefits. Former Secretary Salazar came to the Yakima Valley and expressed support for these efforts. Will you continue support for the Integrated Plan at the federal level, and will you give due consideration for funding projects on the Yakima River as part of the FY15 budget process that is already underway?

Response: The Administration's FY 2014 budget request included \$8 million for the Yakima River Basin Water Enhancement Project, and due consideration will be given to funding programs and projects on the Yakima River as part of the FY 2015 budget process. In the meantime, the Department continues to partner with the Washington State Department of Ecology on the Yakima River Basin Integrated Water Resource Management Plan (Integrated Plan), along with the Yakama Nation, irrigation districts, environmental groups, and local and county governments.

Ongoing Departmental activities in the Yakima Basin include the completion of the Yakima River Basin Study under the Bureau of Reclamation's WaterSMART Basin Study Program, jointly funded with the Washington State Department of Ecology; coordination with basin stakeholders to implement early action items from the Integrated Plan; funding early action items

06.06.13 Full Committee Hearing the programs and activities of the Department of the Interior

such as the Manastash Creek Project to increase instream flows and the Cle Elum Fish Passage; and the release of the Final programmatic environmental impact statement in March 2012. Reclamation and the Washington State Department of Ecology developed the proposed Integrated Plan, which has the strong support from basin stakeholders.

2. Wolf Management Funding: Montana and Idaho received over \$500,000 in FY11 and FY12, and Wyoming has received over \$300 over that time for wolf management activities. Over that same period, Washington, which was the only one of these states that currently had Endangered-Species-Act-listed wolves present, is expected to receive only \$50,000 in FY13 for wolf activities. Washington received only \$100,000 in FY12.

Do you feel that this disparity in funding levels is fair and equitable, given the greater burden on Washington State for managing the recovery of wolves under the Endangered Species Act? Will you work with the Washington State Department of Fish and Wildlife to ensure that adequate resources are available to implement the wolf recovery plan in Washington state?

Response: The U.S. Fish and Wildlife Service has been working closely with the State of Washington on their recovery plan for gray wolves and will continue to do so. Generally, once a species is delisted, the amount of funding available to assist in their management is reduced. When a species is delisted, a minimum of five years of post-delisting monitoring is required under the Endangered Species Act. Wyoming, Montana, and Idaho have and will continue to receive funds to support post delisting monitoring efforts until the five year period ends. Last year FWS also provided recovery funds to Oregon and Washington to assist in building capacity for wolf management and is also providing recovery funds this year.

06.06.13 Full Committee Hearing the programs and activities of the Department of the Interior**FROM SENATOR STABENOW**

Question 1. The State of Michigan is home to 36,000 miles of rivers of streams, many of which flow through major cities like Detroit, Flint, Grand Rapids and Kalamazoo. As you can imagine, these rivers face many challenges in an urban setting, including contamination, fish passage and spawning problems, and pollution run off. I am pleased that the Urban Waters Federal Partnership, which includes the Department of the Interior, will be working with the City of Grand Rapids on rehabilitating the stretch of the Grand River that runs through the city. This work is important in tackling problems that this river has faced for decades and serves as a good example of how people at the local, state, and federal levels can work together to support urban waterways nationwide. Could you please describe the plans of the Department of Interior's to work with our nation's cities on providing cleaner, safer rivers for our urban areas?

Response: The Urban Waters Federal Partnership is an innovative union of thirteen federal agencies that is improving coordination and collaborating with local community-led revitalization efforts. This program is a key component of the America's Great Outdoors initiative. By uniting landowners, businesses, nonprofit organizations, tribes, and local, state and federal agencies, we can lead the efforts to stop pollution of the waterways and make them safe for recreational use. In 2013, Grand Rapids was selected as one of 20 AGO national urban projects, as well as one of eleven new Urban Waters Federal Partnership locations. America's cities serve as centers for innovation and engines for economic growth. By coordinating efforts of federal agencies, and collaborating with community revitalization efforts, we can improve our nation's water systems and promote their economic, environmental, and social benefits.

2. As you know, the National Park Services is facing \$153.4 million in cuts due to sequestration. The timing of these cuts are especially concerning as we approach tourism season in the State of Michigan. My state is home to five national parks that attract millions of visitors each year, generating over \$159 million for the economy.

The parks play an integral role in enhancing communities, business, and Michigan's way of life. For example, Isle Royale in Michigan's Upper Peninsula contributes an estimated \$2 million to nearby communities. However, due to the cuts forced by sequestration, the park is shutting down facilities, reducing law enforcement, and will not be hiring staff to ensure visitors have access to safe drinking water. This will undoubtedly affect not only how the park functions, but the economic benefit the park provides for local communities.

What effect are you expecting the sequestration cuts to have in terms of economic impact and attendance at our nation's parks?

Response: In planning for the sequestration cuts, the National Park Service (NPS) took care to minimize the potential negative effects of sequestration on visitors. However, with a reduction of this magnitude, implemented in a compressed timeframe of seven months, the impacts are not entirely avoidable. The NPS has delayed road openings and reduced hours of operation for

06.06.13 Full Committee Hearing the programs and activities of the Department of the Interior

programs and services. In addition, the NPS has hired about 1,000 fewer seasonal employees for the summer of 2013 than were hired last year and will leave approximately 900 permanent vacancies unfilled for the remainder of FY 2013. These actions are resulting in some diminished services for visitors. In addition, as parks adjust operating seasons and facility staffing schedules, we expect to see negative impacts to park entrance fee revenue, concession revenue, and the economies of gateway communities. However, we do not know the impact sequestration is having on park attendance, since attendance levels are based on a variety of factors.

3. As you know, the Department of Interior is a member of the Great Lakes Interagency Task Force and shares responsibility for providing funds through the Great Lakes Restoration Initiative.

I am glad the President's FY2014 Budget proposes to at least keep funding for the Great Lakes Restoration Initiative at levels similar to FY2013. It is imperative that the federal government continue to focus on projects that will improve and protect this region.

Since the start of the Initiative, the Great Lakes are experiencing a resurgence in Lake Sturgeon and other native fish populations, as well as reduced contamination by toxins. And as our hunters and anglers can attest, natural habitat has been restored in many areas.

The GLRI has also helped introduce new methods to combat the destructive sea lamprey eel, and is a key source of funding to address the growing threat of Asian carp to the Great Lakes region.

Can you please describe how the Department of Interior plans to work with other federal agencies to combat the spread of Asian carp and other invasive species?

Response: Protecting the Great Lakes ecosystems and fisheries from invasion by the Asian carp is a significant challenge. Confronting this issue is a major priority of the Great Lakes Restoration Initiative (GLRI), an unprecedented regional collaborative effort under the Obama administration to restore ecosystem health in the Great Lakes. The FWS and the USGS, partners in the implementation of the GLRI, serve on the Asian Carp Regional Coordinating Committee, a multi-agency body that coordinates an intensive, comprehensive strategy with federal, state and local partners to stop the spread of Asian carp in the Great Lakes. The FWS is also providing technical assistance and support to the Great Lakes states to monitor for the presence of Asian carp. The USGS is researching use of seismic technology to contain Asian carp; determining the potential use of pheromones or food cues to herd Asian carp; and developing and improving existing molecular tools to detect Asian carp in areas of low abundance. USGS researchers are also working closely with private industry to develop chemical formulations for new control methods that can target specific aquatic invasive species.

06.06.13 Full Committee Hearing the programs and activities of the Department of the Interior**FROM SENATOR MURKOWSKI**

Question 1. The Land and Water Conservation Fund budget request is for a funding level of \$600 million, which represents a nearly \$300 million increase above the current level for DOI agencies and the Forest Service. Shouldn't these funds be used to pay down our maintenance backlog? With such an enormous maintenance backlog, why would DOI focus such a large amount of money on acquiring more federal land.

Response: The commitment for the Land and Water Conservation Fund, proposed by President Kennedy and enacted in 1964, is to use a portion of the proceeds from the development of our public lands and waters for investments in conservation and recreation for the benefit of all Americans. Enactment of a mandatory LWCF program would ensure continued funding for this program designed to balance investments in conservation and recreation with the development of oil and gas resources. This funding will provide stability needed for agencies and States to make strategic, long-term investments in our natural infrastructure and outdoor economy to support jobs, preserve natural and cultural resources, bolster outdoor recreation opportunities, and protect wildlife. The Department also takes seriously its responsibility to maintain facilities and infrastructure, and the budget request proposes \$4.7 billion in fiscal year 2014 for core land management operations, a \$141 million increase from 2012. Within this is \$585 million for maintenance of our parks, refuges, and public lands, a \$5 million increase from 2012. The Department is committed to working with the Committee to explore available opportunities for a long-term solution to these funding issues.

2. More generally, how do you reconcile additional federal land acquisition at this time of staggering national debt and maintenance backlogs?

Response: The land acquisition component of our budget request is a long-term investment as part of a balanced approach intended to protect our natural and cultural treasures. LWCF funds are used to acquire parcels to create and maintain a nationwide legacy of high quality recreation areas and facilities and to stimulate non-federal investments in the protection and maintenance of recreation resources across the United States. Strategic land acquisition allows DOI to join with partners to conserve significant landscapes before they require more expensive efforts to sustain them, resolve conflict, and reduce landscape fragmentation making it more efficient to protect wildlife habitat, respond to wildfires, and other natural disasters and to improve access to recreational opportunities. Permanent authorization and mandatory funding also provide certainty for planning and accomplishing our priority conservation efforts, coordinated in concert with our state and tribal partners.

3. Recently, the National Park Service has closed a number of preserves in Alaska to certain methods of bear and wolf hunting or shortened the hunting seasons as defined by

06.06.13 Full Committee Hearing the programs and activities of the Department of the Interior

the Alaska Board of Game. When instituting the closures, the NPS has cited “Park Values” in those closures. Please provide a definition of “Park Values.” Please be specific.

Response: In the last several years, the State of Alaska has adopted measures to reduce predators in order to increase game (generally moose and caribou) for human consumption. State regulations that seek to manipulate natural wildlife populations for human consumption are inconsistent with NPS statutes, regulations, and policies. Section 101 of the Alaska National Interest Lands Conservation Act (P.L. 96-487) cites “values” among the purposes for establishing conservation areas. Section 1313 of the Act authorizes NPS to designate zones where and periods when to close or restrict hunting in preserves for reasons of public safety, administration, floral and faunal protection, or public use and enjoyment. Additional definition of park resources and values are found at Section 1.4.6 of the 2006 NPS Management Policies.

4. Do you believe that the State of Alaska has the right to manage wildlife within the borders of the State? When is it proper for the federal government to reverse State Board of Game decisions?

Response: In general, the State of Alaska manages wildlife within the State. In some cases, however, the federal government must act to ensure that State measures do not compromise wildlife conservation and management actions mandated by federal law. By law and policy, non-conflicting State general hunting and trapping regulations are adopted on lands within the U.S. Fish and Wildlife Service (FWS) National Wildlife Refuge System (NWRS) and on National Park Service (NPS) Preserves. However, there have been instances when State regulations created direct conflicts with federal statutes and policies underlying the management of NWRS and NPS lands. In those instances, it is appropriate for the federal government to act to supersede state regulations. For NWRS lands in Alaska, a number of statutes provide authority and directives, including the following three key statutes: the Alaska National Interest Lands Conservation Act, the NWRS Administration Act (as amended), and the Wilderness Act. In addition, FWS policies 601 FW 3 (Biological Integrity, Diversity, and Environmental Health) and 610 FW 2 (Wilderness Stewardship Policy) provide guidance as to actions that are allowable on NWRS lands.

Practices that are counter to NWRS requirements are also inconsistent with NPS statutes, regulations, and policies on wildlife management and hunting. Additionally, Title VIII of the Alaska National Lands Conservation Act provides for a subsistence priority on federal public lands in Alaska. Accordingly, it is also appropriate for the Federal Subsistence Board to override the State of Alaska's decisions if those decisions were contrary to Title VIII of ANILCA. Finally, we note that before regulations are issued, the proposals are subject to public notice and comment including from the State of Alaska, tribes, localities and interested stakeholders.

5. Last month, BLM released new draft regulations on hydraulic fracturing. While the new proposal did make some improvements over the previous draft, states are best positioned to regulate hydraulic fracturing that occurs within their borders. BLM appears to recognize the important role states play by including provisions that would allow for a

06.06.13 Full Committee Hearing the programs and activities of the Department of the Interior

“variance” from these rules when state regulations “meet or exceed” federal law. However, it is unclear how this variance process would work.

Could a blanket variance from the regulations be provided if a state’s rules “meet or exceed” federal law? If not, why not, and which regulations could a state not obtain a variance from?

Response: The revised proposed rule would allow for two kinds of variances. One would be proposed by an operator that has a technology that will be as effective in protecting the resources as a requirement in the rule. The other would be developed with a state or a tribe and would apply to all lands within that state or tribal lands, or in specific fields or basins.

An approved variance would allow the use of an alternative standard, technology, or process that meets or exceeds the hydraulic fracturing rule’s protections of the public’s resources and lands. However, variances are not necessary in many of the situations where a state’s regulation meets or exceeds standards in the hydraulic fracturing rule. If an operator, through compliance with state rules, is automatically meeting the requirements of the hydraulic fracturing rule, no variance is necessary.

In those cases where compliance with state rules would not automatically put the operator in compliance with the hydraulic fracturing rule, the revised proposed rule would allow the BLM to approve a variance that would apply to all lands within a field, a basin, a state or within Indian lands and that would be based on the BLM’s determination that it will meet or exceed the objectives of the regulation. The variance process would allow the BLM to work with States or tribes to appropriately adapt the regulatory requirements to the unique geology of an area or defer to a standard, technology, or process required or allowed by State or tribal government, as long as application of the standard, technology, or process meets or exceeds the objectives of the hydraulic fracturing rule. BLM would issue the variance in cooperation with the state or tribe. The variance would apply only to the requirements of the hydraulic fracturing regulations.

6. Once it’s been determined that the state’s regulations “meet or exceed” federal law, what federal obligations would remain for the regulated entity?

Response: The hydraulic fracturing rule contemplates that variances would be granted as to specific requirements under it. If BLM in cooperation with a state has issued a variance from certain provisions of the hydraulic fracturing regulation, then compliance with the state rules specified in the variance will be deemed compliance with the specific provisions of the fracking rule. All requirements of the Mineral Leasing Act, or the Mineral Leasing Act for Acquired Lands, other federal statutes and other all regulations would continue to apply to all lessees and operators.

06.06.13 Full Committee Hearing the programs and activities of the Department of the Interior

7. BOEM is in the process of developing Arctic-specific regulations for the exploration and development of Alaska’s OCS oil and gas resources. Exploration has been delayed in part because of the regulatory uncertainty surrounding oil and gas projects in the Arctic OCS.

What is the timeline for the development of these regulations? Is it your intent to have these regulations in place in time for a 2014 drilling season?

Response: The Department plans to have proposed Alaska OCS regulations published in the *Federal Register* by the end of 2013. As part of the process, the Department held Listening Sessions to obtain public comments in Anchorage and Barrow, Alaska, on June 6 and 7, respectively. We anticipate developing a performance-based approach that will fully inform BOEM and BSEE how lessees plan to achieve safe operations under the operating conditions likely to be experienced while drilling and while transporting equipment into and out of the Alaska operating theater.

8. How will you intend the new regulations to impact Exploration Plans and Oil Spill Response Plans for 2014?

Response: There have been no proposals received for 2014. Since it is unlikely the regulations will be in place for 2014, if a proposal were to be submitted for 2014, appropriate Arctic-specific standards would be put in place as conditions of approval for Exploration Plans and Oil Spill Response Plans.

One of the goals of the rulemaking is to codify and further develop Arctic-specific standards that were applied during the 2012 drilling season. As a result, these standards would be in place for all companies that may propose drilling offshore Alaska, rather than impose the standards on an operation-by-operation basis.

9. What will the stakeholder engagement process look like?

Response: BOEM and BSEE are already actively engaged in obtaining stakeholder input on the development of the proposed Alaska OCS regulations. The stakeholder engagement process began with public outreach efforts in the form of Listening Sessions, held in Anchorage and Barrow, on June 6 and 7. Public comments will also be accepted through Regulations.gov. In addition, BOEM and BSEE held more detailed meetings with industry, non-governmental organizations, State of Alaska, local government, and Native Alaskans and Tribes in Anchorage on June 17 through 19. The purpose of these follow-up meetings was to obtain a more comprehensive understanding of concerns and criteria for consideration in the proposed rules.

Stakeholder comments will be used to develop the scope of the Alaska OCS regulations and identify appropriate issues applicable for BOEM and BSEE oversight to ensure safe and responsible oil and gas exploration, development, and production on the Alaskan OCS. BOEM

06.06.13 Full Committee Hearing the programs and activities of the Department of the Interior

and BSEE will develop draft regulations that addresses issues and goals identified during the comment period.

The proposed Alaska OCS regulations will be published in the *Federal Register*, and stakeholder input will again be solicited.

10. BOEM has worked with NMFS on the EIS for the impacts of oil and gas activities in the Beaufort and Chukchi Seas. There are major problems with this document, including development alternatives that are not realistic and the lack of participation from relevant agencies.

The Fish and Wildlife Service expressly declined to participate in the EIS, yet the EIS still analyzes impacts to polar bears and walruses – species for which the Service has trust responsibility. Why was this approach taken? Will these species be removed from the next draft? If not, please explain why not.

Response: The U.S. Fish and Wildlife Service declined to be a cooperating agency on the Arctic EIS in 2010 because it had recently completed Environmental Assessments (EA) on the effects of oil and gas activities in the Chukchi and Beaufort Seas on polar bears and Pacific walruses in conjunction with issuing Marine Mammal Protection Act Incidental Take Regulations (ITRs). The potential effects of oil and gas activities on polar bears and Pacific walruses had been adequately addressed in the ITRs and effectively considered in the EAs. Instead, the Service offered to provide copies of these EAs and an informal review and comment on the Draft EIS. The Service is currently reviewing the Draft EIS and, as appropriate, will provide feedback to National Marine Fisheries Service (NMFS).

Since both the polar bear and Pacific walrus occur in the area of the Arctic EIS, the Service expects that NMFS would retain discussion of each in the Final EIS. The National Environmental Policy Act requires that all resources in an action area are analyzed in an EIS regardless of which agency has jurisdiction. Because polar bears and walruses are important resources in the Arctic region, NMFS must analyze any potential impacts to them.

11. The new draft also appears to cap each company to one drilling rig at a time per Sea. This is inconsistent with Exploration Plans previously submitted and approved by BOEM. Is it BOEM's intent to limit exploration in this way? If it is, what is BOEM's rationale for the change of course? If it isn't, will BOEM clarify this point in the next draft?

Response: NMFS is the action agency on the Draft Supplemental EIS (SEIS). The purpose of the Draft SEIS is to analyze the potential environmental impacts of seismic and exploration activities for the purpose of informing NMFS' decisions regarding authorizations for the incidental take of marine mammals under the Marine Mammal Protection Act.

06.06.13 Full Committee Hearing the programs and activities of the Department of the Interior

The seismic and exploration activities analyzed in the Draft SEIS are not limited to one drilling unit at a time per sea per company. The alternatives analyzed in the Draft SEIS consider up to four drilling units operating in each sea at one time.

It is important to note that a NEPA document is not a decision document; rather, it is an analysis of potential environmental impacts associated with particular activities. BOEM will use the information in the Draft SEIS, as appropriate, to inform its own decisions for specific projects.

12. The new draft appears to have no timeline – for example, the last draft covered a 5-year period, this draft does not. Is there precedent for an environmental document with no timeline? What was the rationale for an open-ended document?

Response: The Draft Supplemental document provides an analysis of the potential environmental impacts of a reasonable range of OCS activities that changes and adds to the analysis begun in the 2011 Draft EIS.

13. How do you plan to ensure that this document is not used to limit exploration in the Arctic?

Response: As previously noted, the Draft SEIS is not a decision document but is an analysis of potential environmental impacts associated with particular activities. BOEM will use the information in the Draft SEIS, as appropriate, to inform its own decisions for specific projects, and all decisions made will be consistent with statutory authority.

14. The Fish and Wildlife Service’s draft conservation plan and EIS for ANWR did not include a development alternative for oil and gas in the coastal plain. The Service’s rationale for this omission appears to be that development requires an Act of Congress. However, the draft plan included several alternatives for additional wilderness and wild and scenic rivers, which also require an Act of Congress.

Will the final conservation plan and EIS for ANWR include an oil and gas development alternative? If not, why not? And if the reason that the oil and gas development alternative was omitted is that, as a policy matter, the President does not favor oil and gas development for ANWR, on what legal basis has the oil and gas development alternative been omitted?

Response: The final conservation plan and EIS have not yet been finalized and, as such, it would not be appropriate to speculate as to the content of any final documents. However, any additional exploration would require Congressional authorization because it is currently prohibited under the terms of the Alaska National Interest Lands Conservation Act.

06.06.13 Full Committee Hearing the programs and activities of the Department of the Interior

15. When do you expect the final plan to be released?

Response: While there is no date set for release of the plan, the FWS has completed its public engagement process and the plan and companion EIS are currently under review.

16. Last month, the State of Alaska presented an oil and gas resource evaluation and resource proposal for ANWR and offered to provide \$50 million to help complete seismic work. Does the Department intend to move forward with the State's proposal? If not, why not?

Response: As noted in response to Q. 14, any additional exploration in the coastal plain would require Congressional authorization because it is currently prohibited by the terms of the Alaska National Interest Lands Conservation Act.

17. The U.S. Geological Survey has steadily reduced the amount of geological surveying that it conducts. These activities accounted for less than 9% of the USGS budget in FY 2012. The rest was spent on facilities, climate change research, and other activities. Yet the USGS has managed to use hyperspectral imaging to map 96% of Afghanistan with DOD funding. But only 5% of the U.S. has been mapped using these same technologies.

When the Afghan data was released, a DOD official stated that "The mineral resources in Afghanistan have the potential to completely transform the nation's economy." I agree that surveying is important, and that it facilitates investment, but American mineral resources provide an equally significant opportunity to transform our own economy.

For this reason, I sent a letter to the President – with a dozen of my Senate colleagues – explaining that we believe the next nominee for Director of the USGS should be an economic geologist. The position of USGS Director remains vacant, and it is clear to me that someone with a background in economic geology would be best suited to restore an emphasis on the activities contemplated by the agency's Organic Act. Do you agree?

Please share your perspective on mission creep at the USGS over the years, and any thoughts you might have on how to restore the agency's focus on conducting geological surveys.

Response: In 2014, the USGS will celebrate 135 years of providing the Nation with reliable scientific information. The Administration is evaluating potential nominees who will ensure strong leadership is brought to the USGS.

The Department, mainly through the USGS, serves the Nation by providing reliable scientific information to describe and understand the Earth; minimize loss of life and property from natural disasters; manage water, biological, energy, and mineral resources; and enhance and protect our quality of life. Research on and assessments of the location, quantity, and quality of the Nation's

06.06.13 Full Committee Hearing the programs and activities of the Department of the Interior

and world's mineral and energy resources, including economic and environmental effects of resource extraction and use, are supported through a range of USGS programs and provide valuable contributions to the President's "all-of-the-above" strategy for energy development. The USGS continually works to enhance its ability to bring its core strengths to bear on the challenges the Nation faces today and into the future.

Conducting geological surveys remains an important component of the USGS mission. Application of remote sensing technologies, such as the hyperspectral survey of Afghanistan funded by DOD, here at home in the United States is helping to delineate areas that may contain concealed mineral resources. A survey released at the beginning of this year of the U.S. mid-continent conducted by USGS minerals scientists imaged deep subsurface structures similar to those associated with mineral resources now being mined in Canada. The USGS's role in understanding the Nation's mineral endowment is essential to supporting national security and a robust economy. However, assessments of mineral and energy resource potential, using tools such as geological surveying or remote sensing, are but one component of the USGS's activities to produce decision-ready information. The 2014 budget requested support for several programs that will continue to enhance our understanding of domestic energy and mineral resources including \$28.3 million for the National Cooperative Geological Mapping Program, which advances the understanding of earth-surface processes, groundwater availability and quality, and energy and mineral resources; \$46.4 million for the Minerals Resources Program to support data collection and research on a wide variety of nonfuel mineral resources; and \$31 million for the Energy Resources Program, which addresses the challenge of increasing demand for energy sources by conducting basic and applied research on geologic energy resources and on the environmental and human health impacts of their production and use.

18. What is the process and current status of nominee selection for USGS Director?

Response: Science plays an important role at the Department and this is an important position. The Administration intends to ensure that USGS remains a world leader in basic research.

19. Alaska is the largest state in the United States. It has roughly 229 million acres of land in federal ownership, more than any other state in the country. The federal lands in Alaska alone exceed 36 percent of the total land area of the state of Texas, the second largest state in the nation. As a result, PILT payments make up the largest percent of federal land payments in Alaska. PILT payments have not gone out yet but are expected to go out sometime this summer. How will sequestration affect PILT payments?

Response: The 2013 authorized level for PILT payments is \$421.7 million, which was reduced by \$21.5 million due to sequestration. After administrative expenses, a total of \$399.8 million is allocated for payments to counties.

06.06.13 Full Committee Hearing the programs and activities of the Department of the Interior**20. When does the Department plan to make its PILT payments to states?**

Response: On June 13, 2013, The Department announced it will be making payments to counties totaling \$399.8 million; and payments were made that day to over 1,900 local governments. A breakdown of payments by state and county can be found at the following website:

<http://www.doi.gov/pilt/county-payments.cfm>

21. You recently described the condition of our western forests as a tinderbox and called for more focus on reducing the hazardous fuel loads on public lands. Yet, the FY2014 budget proposal for the Department, if enacted, would result in steep budget cuts to your hazardous fuels programs – a 50 percent cut. What is the rationale behind these budget cuts?

Response: We expect the 2013 fire season to be an active one. The budget request provides funding to cover anticipated preparedness and suppression needs, and we developed a sequestration implementation plan that preserves our fire response capabilities in the short term. We have concerns that long-term effects of the sequestration are unavoidable. One of the difficult choices that this budget makes is a reduction to the hazardous fuels budget.

22. What do you understand the relationship to be between the Department's hazardous fuel reduction programs and its wildfire management program?

Response: The Department's Wildland Fire Management Program is a Department-wide program that funds fire preparedness, suppression, and rehabilitation activities carried out by the Department's land management bureaus (and the Bureau of Indian Affairs). Generally, hazardous fuels reduction activities are part of that program and are carried out to remove or modify wildland fuels to reduce the risk of intense wildfire behavior, lessen post-fire damage, limit the spread and proliferation of invasive species and diseases, and restore and maintain healthy, diverse ecosystems. Along with improving fire risk reduction and suppression, restoring fire-adapted ecosystems, and promoting community assistance, hazardous fuels reduction is one of the goals identified in the National Cohesive Wildland Fire Management Strategy. Consistent with the Strategy, the Wildland Fire Management Program is continuing to focus fuels reduction on the highest priority projects in the highest priority areas resulting in the mitigation of risks to communities and their values.

23. In Northwest Alaska, with the increase in ships transiting the Northwest Passage, there is a growing need for America to develop a northern Arctic port that can be used to base environmental cleanup equipment to aid with shipping accidents or oil and gas development or other activities in the Arctic. Soon, the U.S. Coast Guard will be turning back to your Bureau of Land Management a several thousand acre tract at Port Clarence, the site of now-abandoned Loran Station. Alaska's Bering Straits Native Corporation, the corporation representing Alaska Natives in the area, selected that site back in 1976 as one

06.06.13 Full Committee Hearing the programs and activities of the Department of the Interior

of its prime land selections under terms of 1971's Alaska Native Claims Settlement Act. The Corporation is perfectly willing to reserve for the Coast Guard areas at Port Clarence for it to use for docks and air facilities for future operations. Options should be opened to speed development of one or more facilities to handle Arctic development needs.

Will you commit to work with Alaska to accelerate the Port Clarence land conveyance to Bering Straits once the Coast Guard's needs have been fully met in any agreement?

Response: The Department supports the goals of completing ANCSA entitlements as soon as possible so that Alaska Native corporations can take advantage of the economic benefits of completed entitlements. BLM is committed to exploring opportunities for completing the Port Clarence land conveyance in a manner that ensures the Coast Guard's needs are met in a timely fashion.

24. You recently stated that it is the Obama administration's position to build a "strong renewable energy portfolio on our public lands and water." This is evident in the Administration's approval of 45 solar, wind, and geothermal power projects on over 250,000 acres of federal land since 2009. Missing from this equation however, are sustainable hydroelectric power projects. Hydropower remains a viable, proven source of clean renewable energy and must be a part of our public lands energy portfolio.

Given ecological advancements in hydroelectric generation, the demand advantages of pump storage, and the promise of marine hydrokinetics, is this administration willing to take another look at hydropower projects on public lands and water?

Response: Hydropower remains a clean and efficient way to produce energy and is a renewable resource. The Department signed a Memorandum of Understanding with the Department of Energy and U.S. Army Corps of Engineers on March 24, 2010 to increase communication between federal agencies and strengthen the long-term relationship among them to prioritize the generation and development of sustainable hydropower.

And in 2011 Reclamation released the results of an internal study, the Hydropower Resource Assessment at Existing Reclamation Facilities, that estimated the Department could generate up to one million megawatt hours of electricity annually and create jobs by addressing hydropower capacity at 70 of its existing facilities. Last year Reclamation completed the second phase of its investigation of hydropower development. While the first phase focused primarily on Reclamation dams, the second focused on constructed Reclamation waterways such as canals and conduits, and estimated the Department could generate over 365,000 megawatt hours of electricity annually by addressing hydropower capacity on 373 of its existing canals. In total, the two studies revealed that an additional 1.5 million megawatt-hours of renewable energy could be generated through hydropower at existing Reclamation sites.

06.06.13 Full Committee Hearing the programs and activities of the Department of the Interior

The budget allocates \$1.1 million to increase clean renewable energy generation by exploring how renewable technologies including solar, small hydropower, and hydrokinetics can be integrated into Reclamation projects; by continuing the effort to optimize Reclamation hydropower projects to produce more energy with the same amount of water; by investigating hydro pump-storage projects that can help integrate large amounts of variable renewable resources such as wind and solar into the electric grid; and by working with Tribes to assist them in developing renewable energy sources.

25. How can the Department of the Interior assist in moving hydropower projects forward in their resource agency role in the Federal Energy Regulatory Commission licensing process? Please provide a list or a link to the list of hydropower projects currently under review in the Department.

Response: One of the goals of the MOU referenced in the previous response was to gather federal agencies involved in the permitting process, including the Department of the Interior and DOE's Federal Energy Regulatory Commission, to clarify the current processes for projects and development occurring at federal sites and facilities, and identify the most time-intensive and resource-intensive components of each process. DOE, Reclamation and the U.S. Army Corps of Engineers also held a collaborative workshop in June of 2010 to identify ways in which processes could be shortened by reducing unnecessary delay, streamlined, or simplified for appropriate projects. Reclamation and its regional offices, power and water customers, investors, and developers have conducted several meetings to identify ways to improve the lease of power privilege (LOPP) process.

Reclamation developed a directive and standard in 2012 to provide standardized guidance for Reclamation offices and developers in permitting under the LOPP process. Since the signing of the MOU, there has been non-federal hydropower development interest and activity at 43 Reclamation sites through FERC and LOPP. The MOU agencies are continuing to move forward under the framework of the MOU by developing a new list of action items to be initiated between 2013 and 2015.

Attachment 1 to this document is a spreadsheet indicating projects under review in the Department. The first tab lists FERC projects under Reclamation review as of 7/2013, and includes all FERC projects on Reclamation facilities that are currently in development. The second tab lists all FERC projects under Departmental review, as indicated by DOI bureaus, as of 9/2012. This second list is currently being updated.

26. In 2010, the State of Alaska adopted a goal of meeting 50% of its energy needs with renewable energy by 2025. To help achieve this goal, in 2011 the Alaska State Legislature enacted legislation directing the Alaska Energy Authority (AEA) to undertake the licensing and development of the Susitna-Watana Hydro Project.

To facilitate development of the Project, the State has requested BLM to open certain withdrawn federal lands in the Project area for the limited purpose of allowing title to

06.06.13 Full Committee Hearing the programs and activities of the Department of the Interior

those lands to be conveyed to the State. These lands previously were selected by the State of Alaska under the Alaska Statehood Act many years ago.

It is my understanding that BLM previously has followed a process that did not require amendments to the relevant Resource Management Plan to facilitate Alaska Statehood Act conveyances at other proposed and existing hydroelectric projects in Alaska. It also is my understanding that BLM has raised questions about its ability to follow this approach with respect to the Susitna land conveyances. Finally, I understand that BLM has a fair amount of discretion under the law regarding the procedural steps it will take to open the lands for conveyance to the State.

What is the likelihood that the administrative action of opening the Susitna lands for the limited purpose of allowing conveyance to the State may evolve into a time-consuming exercise that is likely to create greater risk of challenge and potentially delay development of the Project?

Response: The BLM's Alaska State Office is actively working with the State of Alaska and the Federal Energy Regulatory Commission to explore the possibility of opening the withdrawal and conveying state-selected lands related to the Susitna-Watana hydropower project. Several procedural and legal questions have been raised related to the request. The BLM is working to resolve these issues as quickly as possible.

27. Can you assure me that BLM will exercise its discretion in a manner that allows the Susitna lands to be conveyed in a timeframe that meets the State's schedule and that minimizes the risk of challenges and delay?

Response: As mentioned in the previous response, several procedural and legal questions have been raised related to the request to open the withdrawal. The BLM is working to resolve these issues as quickly as possible, and I have asked the BLM to keep you informed of the status of that effort.

28. Please describe the level of collaboration between the agencies of the Interior Department and the Department of State. How is this collaboration coordinated?

Response: The Department conducts international activities to accomplish its mission and support complementary U.S. foreign policy priorities. These cooperative activities include facilitating access to energy and mineral resources in an environmentally responsible manner; conservation and management of wildlife and other natural resources; protection of cultural resources; cooperation on indigenous affairs; and scientific research and monitoring of natural hazards such as volcanoes and earthquakes. The Department collaborates on these activities at all appropriate levels with the Department of State. Some interactions take place at the technical or field level. For example, DOI makes technical experts available for meetings with visiting foreign officials upon request of DOS, and coordinates with the relevant DOS and U.S. Embassy personnel when technical personnel carry out activities in foreign countries.

06.06.13 Full Committee Hearing the programs and activities of the Department of the Interior

As needed, DOI and DOS leadership coordinate to provide appropriate management and guidance. For instance, the Secretary of the Interior accompanied the Secretary of State to the 2011 meeting of the Arctic Council in Greenland, to highlight U.S. government priorities involving Arctic natural resource management.

29. The Bureau of Safety and Environmental Enforcement, U.S. Geological Survey, Bureau of Land Management, and other Interior Department agencies have international programs. Is there a Department-level strategy to coordinate these various efforts?

Response: While there are clear linkages between some of the bureaus' international activities, such international activities are shaped by bureau program goals and through the budget process, in coordination with complementary foreign policy goals set by DOS. The Secretary has delegated the authority to coordinate DOI international activities to the Assistant Secretary for Policy, Management and Budget in order to maximize effectiveness and efficiency. By facilitating meetings and exchanges of information as needed, AS-PMB personnel help bureaus identify activities where they can work most effectively with each other, as well as with DOS and other federal agencies. Through this flexible approach, DOI and its bureaus work to ensure strategic coordination across their international activities.

30. Are any Interior Department personnel currently deployed in Afghanistan or Iraq?

Response: With the understanding that the term "deployment" means long-term stationing, the Department does not currently have personnel deployed in Afghanistan or Iraq. However, Departmental personnel do travel to those countries on occasion, pursuant to coordination with relevant agencies such as DOS and DOD.

31. Please provide an overview of the recent trends in Reclamation's maintenance backlogs, including trends over the past ten years.

Response: Reclamation's anticipated expenditures for major rehabilitation and replacement (MR&R) needs, which are focused on its aging infrastructure, have been relatively steady, totaling approximately \$3 billion for a five-year time horizon. Reclamation began compiling its MR&R needs in 2008, which initially totaled \$3.2 billion. The most recent annual update, at the end of fiscal year FY 2012, totaled \$2.5 billion (five year outlook). Some of this decrease can be attributed to the completion of work activities in recent years, but most of the decrease is reflective of continued data verification and validation which has occurred over these years.

These MR&R estimates have been compiled for all facilities based on current conditions, at the major facility level, and irrespective of the source of financing. It should be noted that of the FY 2012 estimated total (five year outlook), approximately 50 percent was related to activities funded through annual appropriations.

As defined in the amended Statement of Federal Financial Accounting Standard No. 6, "deferred maintenance and repairs" are maintenance and repairs that were not performed when they should

06.06.13 Full Committee Hearing the programs and activities of the Department of the Interior

have been or were scheduled to be and which are put off or delayed for a future period. Deferred Maintenance (DM) amounts have been reported by Reclamation since FY 1998 for reserved works assets only; no mission critical maintenance is deferred.

DM is reported on the amount of maintenance that was scheduled, but not completed, and Reclamation does not “project” DM into the future. The trend over the last ten years has been for increasing DM.

32. What are the plans or expectations for each of these backlogs going forward (e.g., steady state, significant increases, decreases)?

Response: Reclamation has been constructing water, power and associated facilities for over 111 years, and many of these facilities now have an average age of over 50 years. Although Reclamation has lengthened the service lives of many of these facilities through its preventive maintenance activities, a number of these facilities are showing increased operations and maintenance needs.

33. What is the average amount of time it takes Reclamation to address a deferred maintenance project, from the time it is documented to the time the project is complete? (If exact statistics are not available, please provide an approximation.)

Response: Reclamation tracks and reports an accumulated deferred maintenance amount for its reserved works facilities, which, at the end of FY 2011, was slightly more than \$128 million. A certain amount of DM is typical for the “utility-type” missions that Reclamation is responsible for, and there is no expectation that this amount will be significantly reduced or eliminated in the foreseeable future under the current budget climate.

DM continues to be completed within reasonable timeframes, and Reclamation is adequately managing its accumulation of DM. The data on accumulation of DM on Mission Critical Assets demonstrates that, over time, DM identified in one year is addressed and generally becomes a smaller percentage of the overall outstanding DM in subsequent years.

34. In recent years, deferred maintenance needs doubled in one region (Mid Pacific, FY2007-FY2008) and tripled in another (Great Plains, FY2010-FY2011). Please provide a more detailed explanation for these major increases. Are similar increases expected for other regions in future years?

Response: The doubling of deferred maintenance from FY 2007 to FY 2008 was almost entirely due to the Mid Pacific Region bringing outstanding DM work up to current prices. Between FY 2010 and FY 2011, the reported DM for the Great Plains Region tripled due to management decisions to reschedule and do more research to determine the best methods to complete the

06.06.13 Full Committee Hearing the programs and activities of the Department of the Interior

work. Similar increases are not expected, but are possible in the future as each region continues to evaluate the way maintenance is managed and addressed.

35. What is the status of Reclamation’s loan guarantee program authorized under P.L 109-451? What actions has OMB requested as needing to be complete, as referenced in the FY2011 AMP, for this program to be implemented?

Response: P.L. 109-451 authorized loan guarantees for certain rural water supply projects; operation and maintenance of facilities authorized by or under contract pursuant to Reclamation law, and improvements to some existing Bureau of Reclamation water projects. Reclamation requested public comment on a proposed rule to implement the loan guarantees program published in the Federal Register on October 6, 2008. The proposed rule established criteria to determine eligibility of entities to use loan guarantees to fund Rural Water projects, as well as extraordinary maintenance and rehabilitation for existing federal facilities. Reclamation received comments from 14 entities mainly dealing with: 1) the appropriate portion of loans to be guaranteed; and 2) using loan origination fees to offset appropriations needed to fund the program. The rule has not been finalized. Authority for the program will end in December 2016.

36. Why have no requests been made for the long-term extended repayment of extraordinary operations and maintenance costs (XOM) under Title IX of P.L. 111-11? Have any users approached the Administration or requested to use this funding? What actions could Congress take to facilitate usage of this program?

Response: Reclamation has received five requests for funding and repayment under Title IX. All five requests have been approved; however, only three of the requesting entities chose to move forward with the funding. Two of the entities opted to use their own funds for the necessary XOM costs after the request for Title IX funding and repayment had been approved. Reclamation is aware of an additional request that is in preparation at this time for XOM funding and repayment under Title IX.

06.06.13 Full Committee Hearing the programs and activities of the Department of the Interior

FROM SENATOR BARRASSO

Question 1. A. What is the current estimate for Reclamation’s indicated maintenance backlog? B. What are the plans/expectations for each of these backlogs going forward (e.g., steady state, significant increases, decreases)?

Response: Reclamation’s anticipated expenditures for major rehabilitation and replacement (MR&R) needs have been relatively steady, totaling approximately \$3 billion for a five-year time horizon. Reclamation began compiling its MR&R needs in 2008, which initially totaled \$3.2 billion. The most recent annual update, at the end of fiscal year FY 2012, totaled \$2.5 billion (five year outlook). Some of this decrease can be attributed to the completion of work activities in recent years, but most of the decrease is reflective of continued data verification and validation which has occurred over these years.

These MR&R estimates have been compiled for all facilities based on current conditions, at the major facility level, and irrespective of the source of financing. It should be noted that of the FY 2012 estimated total (five year outlook), approximately 50 percent was related to activities funded through annual appropriations.

As defined in the amended Statement of Federal Financial Accounting Standard No. 6, “deferred maintenance and repairs” are maintenance and repairs that were not performed when they should have been or were scheduled to be and which are put off or delayed for a future period. Deferred Maintenance (DM) amounts have been reported by Reclamation since FY 1998 for reserved works assets only; no mission critical maintenance is deferred. DM is reported on the amount of maintenance that was scheduled, but not completed, and Reclamation does not “project” DM into the future. The trend over the last ten years has been for increasing DM.

Reclamation has been constructing water, power and associated facilities for over 111 years, and many of these facilities now have an average age of over 50 years. Although Reclamation has lengthened the service lives of many of these facilities through its preventive maintenance activities, a number of these facilities are showing increased operations and maintenance needs due to age.

2. In the FY 2011 Asset Management Plan (AMP), Reclamation notes a total of \$1.3 billion for “Other RAX” items (i.e., not deferred maintenance or dam safety). Is it accurate to say that Reclamation’s indicated maintenance needs for non-Dam Safety projects are \$1.3 billion?

Response: Other Replacements, Additions, and Extraordinary Maintenance (RAX) items are those items that have been identified and scheduled to be completed within the next five years

06.06.13 Full Committee Hearing the programs and activities of the Department of the Interior

but do not fall under any of the other three criteria. It would be accurate to say that “Other RAX” items are non-Dam Safety projects.

“Indicated/identified maintenance” is maintenance that is recognized as needing to be accomplished and may or may not be scheduled by the office responsible. Most indicated/identified maintenance on mission critical reserved works is identified either in Reclamation’s annual budget process, or through advanced funding agreements from Reclamation’s (mostly power) customers. Other indicated maintenance is identified through Reclamation’s Facility Reviews and Review of O&M Program Examination of Associated Facilities.

3. Does the Bureau of Reclamation maintain a listing, including dollar amounts, of Reclamation’s deferred and indicated maintenance needs at the project level? How much of this information is publicly available?

Response: Reclamation currently tracks deferred and indicated maintenance needs at the project level and is annually reported as part of Reclamation’s Major Rehabilitation and Replacement (MR&R) needs. Reclamation’s 2012 MR&R needs are approximately \$2.5 billion.

Reclamation also reports the deferred maintenance (DM) five year plan as required by the Department of the Interior’s Budget Guidance Attachment G. The five year plan only lists those projects reported in the MR&R that have been scheduled to be completed within the five year timeframe. Depending on the reporting period, some projects may fall before or after the reporting time period and therefore would not be included in the five year plan.

4. In recent years, deferred maintenance needs doubled in one region (Mid Pacific, FY2007-FY2008) and tripled in another (Great Plains, FY2010-FY2011). Please provide a more detailed explanation for these major increases. Are similar increases expected for other regions in future years?

Response: The doubling of deferred maintenance from FY 2007 to FY 2008 was almost entirely due to the Mid Pacific Region bringing outstanding DM work up to current prices. Between FY 2010 and FY 2011, the reported DM for the Great Plains Region tripled due to management decisions to reschedule and do more research to determine the best methods to complete the work. Similar increases are not expected, but are possible in the future as each region continues to evaluate the way maintenance is managed and addressed.

5. How is “indicated maintenance” tracked?

Response: “Indicated/identified maintenance” is maintenance that is recognized as needing to be accomplished and may or may not be scheduled by the office responsible. Most

06.06.13 Full Committee Hearing the programs and activities of the Department of the Interior

indicated/identified maintenance on mission critical reserved works is identified either in Reclamation's annual budget process, or through advanced funding agreements from Reclamation's (mostly power) customers. Other indicated maintenance is identified through Reclamation's Facility Reviews and Review of O&M Program Examination of Associated Facilities.

6. A. Is Reclamation's Facility Reliability Rating (FRR) information publicly available? B. Where would the public find this information?

Response: The percentage of water infrastructure in good condition, as measured by the FRR, is available to the public. The details of the FRR criteria and scoring specific to each facility are available only within Reclamation.

The percentage of water infrastructure in good condition, as measured by the FRR, can be found at: http://www.doi.gov/bpp/upload/DOI_FY2011-FY2016_StrategicPlan.pdf

7. What is the process for tracking and reviewing maintenance needs on transferred works, and how does it differ from the process for reserved works?

Response: Essentially, the operating entities for transferred works facilities are responsible for the day-to-day tracking and reviewing (and funding) of related maintenance needs. As part of Reclamation's oversight responsibilities of these facilities, Reclamation is aware of general performance of routine maintenance activities and most extraordinary maintenance needs through the MR&R estimates.

These MR&R estimates are compiled for all facilities based on current conditions, at the major facility level (e.g., dam, canal system, power plant, major pumping plant, pipeline, etc.), and irrespective of the source of financing (e.g., appropriated monies, power financing, funding agreements, revolving funds, non-appropriated funds used by operating entities of transferred works, etc.).

8. A. What portion of transferred works do not track performance data for the Federal Real Property Profile (FRPP)? B. Are there any estimates as to the cost of compliance with these metrics?

Response: Reclamation's Federal Real Property Profile (FRPP) reporting is at the major asset level for transferred and reserved works. The metrics for these assets are computed and reported as part of the FRPP. The estimate of cost of compliance is currently not available.

9. A. Has the Administration considered how it could improve its approach to tracking and addressing maintenance needs at transferred works? B. What options are available to you to address maintenance needs at transferred works?

06.06.13 Full Committee Hearing the programs and activities of the Department of the Interior

Response: It is important to note that much of the O&M funding responsibilities of Reclamation's assets lies with our project beneficiaries and those operating entities that O&M Reclamation's transferred works facilities. For some operating entities and project beneficiaries, rehabilitation and replacement needs may exceed available resources. In particular, many smaller irrigation or water conservancy districts are unable to fund these needs in the year incurred absent long-term financing assistance. To address this issue, the Administration is currently developing a strategy for appropriate implementation of a program of loan guarantees, as authorized in P.L. 109-451, to assist water users in financing costly rehabilitation and replacement of project facilities. We are also exploring opportunities for utilization of the authority provided under P.L. 111-11 to allow extended repayment with interest of extraordinary (non-routine) maintenance costs on project facilities. Water users are currently required by Reclamation law to pay these costs, often substantial, in advance.

10. Page 28 of the AMP notes that indicated maintenance is identified in Reclamation's annual budget process, through examination of facilities, or arrangements with customers. To what extent does Reclamation track indicated maintenance for transferred works?

Response: Most indicated/identified maintenance on mission critical reserved works is identified either in Reclamation's annual budget process, or through advanced funding agreements from Reclamation's (mostly power) customers. For transferred works, where maintenance needs are identified as part of formal O&M recommendations, which result from facility reviews, such recommendations are tracked until completion through Reclamation's electronic database tracking system (i.e., Dam Safety Information System.)

It is important to note that much of the O&M funding responsibilities of Reclamation's assets reside with our project beneficiaries and those operating entities that O&M our transferred works facilities.

06.06.13 Full Committee Hearing the programs and activities of the Department of the Interior

The following questions were submitted on April 8th during your confirmation process. With respect to each of these questions, you responded that it would be “premature and inappropriate” to answer until you were confirmed.

11. What specific steps, if any, will you take to expedite the Department’s preparation and completion of environmental impact statements for large scale coal, oil and gas, and uranium projects on Federal public lands?

Response: The Department’s view has been that in most cases existing environmental review provisions do not unduly delay project development and, at the same time, provide for important public input into the process and ensure environmental health and safety in the management of the public lands. However, Departmental staff understand the value of expedient environmental review and its importance for efficient decision making by both businesses and government. The leasing reforms that were implemented in 2010 established an orderly, transparent, and environmentally sound process for developing resources on public lands in a manner that has maintained robust leasing and permitting. These reforms focused on increasing predictability and certainty for stakeholders, including industry, and restoring needed balance with comprehensive upfront analysis added to the development process. We will continue to work toward increasing efficiency and decreasing the time necessary for completion of these reviews.

12. A. Do you believe States and local governments which would be impacted by settlement agreements between the Department and environmental groups should have a say in such agreements? B. Will you agree not to enter into any settlement agreement unless the States and local governments which would be impacted by the agreement are party to the agreement?

Response: Unfortunately, litigation is a common occurrence when implementing the numerous statutes under our jurisdiction. We agree that the Department’s resources are best spent on implementing these statutes than on litigation. However, often settlement is the most prudent course. Much of our litigation involves missed mandatory statutory deadlines. In each of these cases, before any settlement is entered, its merits are carefully reviewed, in conjunction with our colleagues at the Department of Justice, to ensure it is in the interest of the United States. In such settlements, we do not commit to any substantive outcomes, but rather only to making otherwise statutorily required determinations by a date certain. All of these agreements are approved by a court. Before any determination called for in a settlement agreement has regulatory effect, it is subject to public notice and comment, including from States and local governments if they so desire.

06.06.13 Full Committee Hearing the programs and activities of the Department of the Interior

13. Will you commit to supporting the principles of S. 258, the Grazing Improvement Act to streamline the renewal process for grazing permits and extend the term of a grazing permit from 10 to 20 years?

Response: As stated in the Department's statement at the April 2013 hearing on this legislation, the Department shares the interest in identifying opportunities for increasing efficiencies in public land grazing administration and for finding ways to make permit renewal less complex, costly, and time-consuming. The Department also supports the concept of having the flexibility to issue, in certain circumstances, longer term permits. The Department supports a solution that achieves these goals without limiting the BLM's ability to provide for appropriate environmental review and public involvement, critical components of the BLM's multiple-use management of the public lands.

14. What do you plan to do, or what specific actions will you take to ensure the Department complies with the National Environmental Act in a more timely fashion? What specific ways is the Administration proposing to "modernize NEPA" as you put it?

Response: As noted in the response to question 11, the Department's view has been that in most cases existing environmental review provisions do not unduly delay project development and, at the same time, provide for important public input into the process and ensure environmental health and safety in the management of the lands that belong to them. However, we understand the value of expedient environmental review and its importance for efficient decision-making by both businesses and government. The leasing reforms that were implemented in 2010 established an orderly, transparent, and environmentally sound process for developing resources on public lands in a manner that has maintained robust leasing and permitting. These reforms focused on increasing predictability and certainty for stakeholders, including industry, and restoring needed balance with comprehensive upfront analysis added to the development process. We will continue to work toward increasing efficiency and decreasing the time necessary for completion of these reviews. The Administration, through the Council on Environmental Quality, has made public a number of proposals to strengthen and modernize NEPA. Detailed discussions of those proposals and related information can be found at: <http://www.whitehouse.gov/administration/eop/ceq/initiatives/nepa>.

FROM SENATOR JAMES E. RISCH

Question 1. If legislation is not enacted extending BLM's authority, will BLM have to stop private sales of helium from the reserve when the BLM makes its final payment to the U.S. Treasury sometime around October?

Response: The Bureau of Land Management has already generated enough revenue during this fiscal year through currently authorized helium sales to pay off the debt at the beginning of FY 2014. In accordance with the Helium Privatization Act, the Department must make the final payment to the U.S. Treasury within 7 days after October 1, 2013, and, at that point the Helium Production Fund will terminate and the Department will lose the source of funds established to operate the Reserve.

2. Since the reserve represents about half of U.S. helium supply the concern is that if the reserve closes, a helium shortage would follow. Does the BLM have emergency authority to sell helium to prevent an economic disruption or would Congress have to act first?

If Congress does not act, will BLM still have the authority to operate the reserve for federal use? If so, how will BLM fund the operations?

Response: The BLM helium program's operational expenses are funded by the Helium Production Fund, as authorized in the Helium Privatization Act of 1996 (HPA). Once the Department makes the final payment to the U.S. Treasury, by operation of law, the Helium Production Fund will terminate and the Department will lose the source of funds established to operate the Reserve. The BLM does not have an alternate source of funding for the helium program.

FROM SENATOR TIM SCOTT

Offshore Atlantic

Question 1. The investment to collect seismic data is only worth something to energy producers if there is the future prospect of being able to lease in the areas where new data shows there are resources. When President Obama came into office nearly all off America’s offshore was available to lease. Unfortunately, the President’s restrictive 5-year lease plan eliminated the Mid and South Atlantic offshore areas from the 2012-2017 plan and only left 15% of America’s offshore available to lease.

- **Given that we still need to collect seismic data in these areas to update our current resource estimates, do you think that government, through the reorganization of the MMS and the implementation of new regulations—and the industry, through the development of new and the creation of the Center for Offshore Safety—have made sufficient progress to consider future leasing in the Mid and South Atlantic offshore areas?**

Response: By applying modern seismic interpretation techniques to existing data and incorporating more recent information from geologically analogous offshore regions worldwide, BOEM has made significant progress in updating their resource estimates as reflected in their 2011 National Resource Assessment. BOEM is proceeding with a region-specific strategy in the area that focuses on the need to update information in order to inform future decisions about whether and, if so, where leasing would be appropriate.

- **If so, when will you direct that the development of a new 5-year Plan begin?**

Response: In order to comply with all statutory requirements and have a new program in place July 1, 2017, we envision we will begin the process in late 2014 or early 2015.

- **If not, what else do you see that needs to be done (outside of collecting new seismic data)?**

Response: Collection of new seismic data is not a pre-requisite to developing the next Five Year Program. BOEM has begun informal efforts to put in place the data, procedures, and agreements necessary to begin the preparation of the next Five Year Program. One example is BOEM’s work with the Department of Defense on complex issues relating to identifying and mitigating multiple or conflicting use issues.

National Ocean Policy

2. On August 21, 2012 John Holdren and Nancy Sutley sent a “Memorandum for the heads of departments and agencies” with the subject “National Ocean Policy Implementation Guidance for the FY2014 Budget” to your agency and others instructing DOI to present to

06.06.13 Full Committee Hearing the programs and activities of the Department of the Interior

OMB, along with their FY14 budget proposals, “an explanation of their continuing efforts and plans to comprehensively support the goals and objectives of the National Ocean Policy through existing ocean, coastal, and Great Lakes programs.”

- **Did you make such a presentation to OMB and include the National Ocean Policy budget explanation?**

Response: The Department did make a presentation.

- **If so, please provide a copy of DOI’s National Ocean Policy budget explanation as requested in the memo.**

Response: The budget explanation and related material are internal, deliberative Executive Branch communications. However, an explanation of most of the programs addressed in this memo, and some program accomplishments, are contained within the Federal Ocean and Coastal Activities Report for FY 2010-11, which was transmitted to Congress on July 19, 2013.

- **How many people within DOI worked to draft this explanation? If not, why did you not make such a presentation to OMB?**

Response: One person from each of the participating bureaus (BLM, BOEM, BSEE, FWS, NPS, OIA and USGS) selected applicable information from data already assembled for the budget development process, accomplishment reports and similar existing sources. One person at the Department assembled the information into the memorandum.

3. The same memo references the importance of “Regional Efforts” in implementing the National Ocean Policy.

- **What efforts if any have been made by DOI to coordinate, work with or partner with local entities in South Carolina and the Southeast as a whole, including but not limited to State and Tribal entities and authorities and local and national non-governmental organizations?**
- **If none, are there currently plans for any such efforts in the future?**

Response: The Department’s work related to South Carolina under the National Ocean Policy is largely conducted through the Governors' South Atlantic Alliance (the Alliance) comprised of North Carolina, South Carolina, Georgia, and Florida. These States have joined together to work on various ocean- and coastal-related issues, with an emphasis on Clean Coastal and Ocean Waters, Working Waterfronts, Disaster Resilient Communities, and Healthy Ecosystems. The Department has been a supporting partner to the Alliance since its inception four years ago, and provides support at all levels of the Alliance with personnel from the USGS, FWS, and NPS stationed in those States. These bureaus also cooperate directly with the State of South Carolina, tribes and stakeholders on many programs, including those related to ocean and coastal areas, but as this is part of their normal operations, the Department does not track those efforts.

06.06.13 Full Committee Hearing the programs and activities of the Department of the Interior

4. How many people at the Department of the Interior are working on implementation of National Ocean Policy? How much of their time is dedicated to working on the National Ocean Policy? Have any additional hires at DOI been made to specifically work on or coordinate with others who are working on the National Ocean Policy?

Response: A large number of individual employees work on actions related to implementation of the National Ocean Policy as part of their regular work. The actions to implement the Plan on which the Department is engaged, as set out in the May 2013 Implementation Plan, are all directly related to the statutory responsibilities and on-going work of the Department and its participating bureaus. Many of these actions are work long underway which is now being better coordinated with other agencies, resulting in more productive use of resources. Because of this, we do not know nor could we readily determine how many employees are involved. The Department has not hired anyone to work specifically on or to coordinate with others who are working on the National Ocean Policy, although the Department’s Ocean, Coastal and Great Lakes Activities office has played a significant supporting role in this matter.

5. In your view, what are the immediate and long term goals for DOI in the implementation of the National Ocean Policy?

Response: The Department supports the long-term goals of the National Ocean Policy as set out in Executive Order 13547. These are to ensure the protection, maintenance, and restoration of the health of ocean, coastal and Great Lakes ecosystems and resources, enhance the sustainability of ocean and coastal economies, preserve our maritime heritage, support sustainable uses and access, provide for adaptive management to enhance our understanding of and capacity to respond to climate change and ocean acidification, and coordinate with our national security and foreign policy interests. The intermediate goals of the Policy are set out in the Implementation Plan, and are focused on several priority areas – the Ocean Economy, Safety and Security, Coastal and Ocean Resilience, Local Choices, and Science and Information needed to support those priorities.

6. How has the implementation of the National Ocean Policy impacted or influenced the current programmatic EIS being conducted in the Atlantic for the assessment of the oil and natural gas resources in the OCS?

Response: The development of the Programmatic EIS incorporates the guidance of the National Ocean Policy Implementation Plan. It takes an ecosystem based approach to assessment of environmental resources, is fully transparent, provides for stakeholder input through NEPA public review opportunities, and makes use of the best available science and data to inform the analysis. It also increases efficiencies in decision-making as the Programmatic EIS was developed to meet the NEPA environmental analysis needs for both BOEM and the National Marine Fisheries Service, thereby avoiding duplication of efforts and generating cost savings.

06.06.13 Full Committee Hearing the programs and activities of the Department of the Interior

7. How do you see implementation of the National Ocean Policy impacting the potential for portions of the South Atlantic planning area to be included in the next 5-year offshore leasing plan?

Response: The marine planning information in the National Ocean Policy Implementation Plan lays the groundwork for all stakeholders to be involved in identifying multiple ocean uses and resources in the South Atlantic planning area. BOEM anticipates the affected States and South Atlantic Regional Planning Body, when established by the region, to play important roles in providing local perspective in future planning for this area.

06.06.13 Full Committee Hearing the programs and activities of the Department of the Interior

FROM SENATOR PORTMAN

Question 1. I have been told that on October 7, 2013, barring Congressional action to authorize the continuation of the Helium Production Fund, BLM will not be able to operate or maintain the Federal Helium Reserve. Is this your understanding?

Response: The Bureau of Land Management has already generated enough revenue during this fiscal year through currently authorized helium sales to pay off the debt at the beginning of FY 2014. In accordance with the Helium Privatization Act, the Department must make the final payment to the U.S. Treasury within 7 days after October 1, 2013, and, at that point the Helium Production Fund will terminate and the Department will lose the source of funds established to operate the Reserve.

2. Are there administrative actions which could be taken that would allow BLM to continue to deliver crude helium to refiners for processing and delivery for end market users?

Response: The helium program's operational expenses are funded by the Helium Production Fund, as authorized in the Helium Privatization Act of 1996 (HPA). Once the Department makes the final payment to the U.S. Treasury, by operation of law, the Helium Production Fund will terminate and the Department will lose the source of funds established to operate the Reserve. The Department does not have an alternate source of funding.

3. Do you agree that the upcoming centennial is an excellent opportunity to engage all of those who utilize and benefit from our national parks in helping prepare for their future?

Response: The centennial of the National Park Service in 2016 is an exciting opportunity to engage all American's, including park visitors, the public in general, and local civic and business communities.

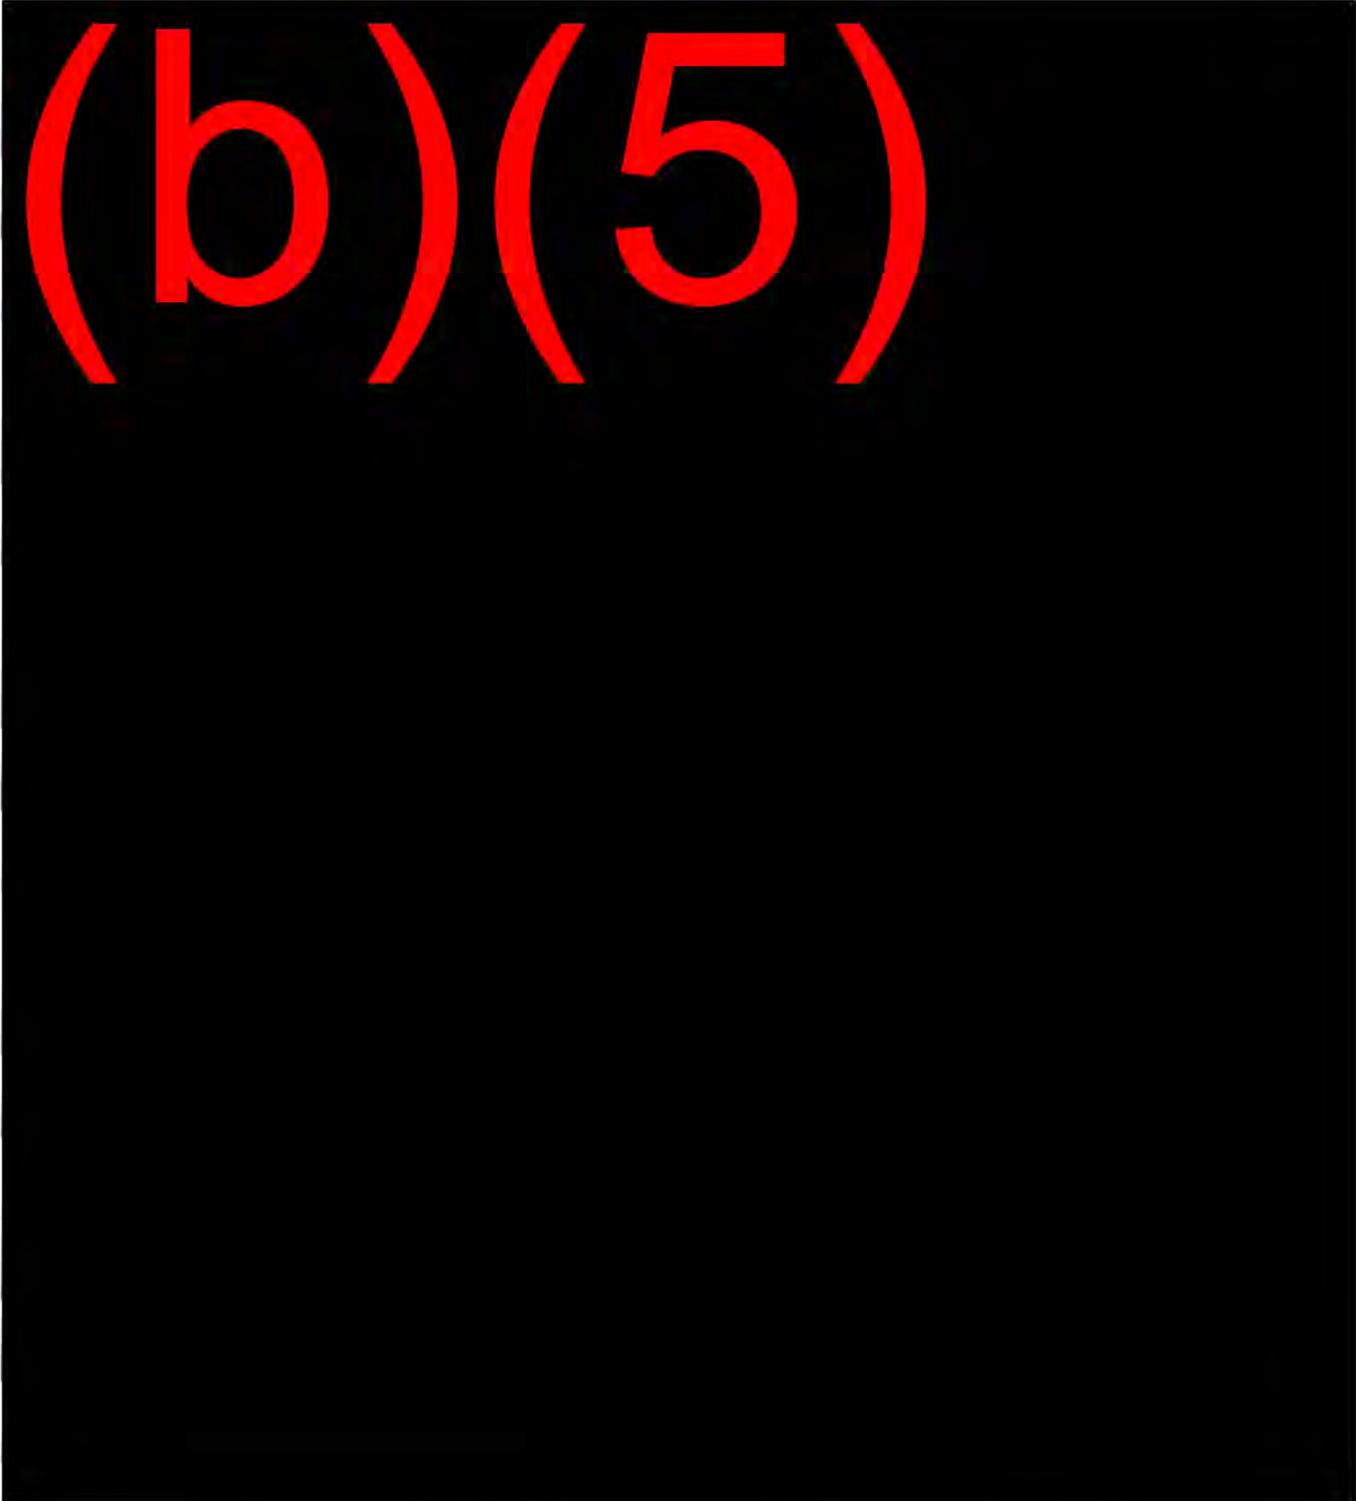

4. How does the Department intend to engage the private sector in the upcoming NPS centennial?

Response: The NPS is engaging a broad array of stakeholders in its planning for the centennial, and recently established a Centennial Advisory Committee of the National Park System Advisory Board, including representative stakeholders for gateway communities, local and national business operators, education and youth program partners, park friends groups, and advocate organizations for conservation, preservation and recreation. The task of this committee is to offer guidance and recommendations to the National Park System Advisory Board, and by extension, the Secretary of the Interior and the Director of the NPS, on centennial strategies, products and programs that celebrate the national park idea and its growing value to society.

06.06.13 Full Committee Hearing the programs and activities of the Department of the Interior

In addition, the National Park Foundation, the national philanthropic partner of the National Park Service is also engaging the private sector in planning and a range of opportunities for support and engagement for the centennial.

Notes on 21st Century Conservation

Dan Ashe <d_m_ashe@fws.gov>

Sat, Oct 19, 2013 at 10:06 AM

To: Sally Jewell (b)(6) <sjewell@ios.doi.gov>

Sally, I know folks are preparing a speech for you to make this coming week. I've contributed some thinking for that, and will continue supporting that effort. I'm pasting below some notes that I have been keeping, and refining, over the past year, about "21st Century Conservation." (b)(5)

(b)(5)

Dan.

Sat, Oct 19, 2013 at 4:54 PM

Thanks Dan. I will review them this weekend. Kate is working with me on my speeches so I have copied her as well.

Enjoy the weekend - refuges open, people happy!

Sally

LAST LAUGHS:

- + Late Night Political Humor.

DOI in the News:

CONSERVATION GROUPS WANT ANTI-POACHING EFFORTS TO GO FURTHER. The Washington Post (10/28, Fears, 4.28M) reports that "a US push to save the African elephant and rhinoceros from being wiped out by a wave of poaching comes down to this: an executive order by President Obama, an advisory panel, a task force and \$10 million added to the pot of federal money earmarked to train wildlife police and fight poverty." According to the article, "the effort is being helped by former secretary of state Hillary Rodham Clinton, who

recently unveiled a three-year, \$80 million joint effort with nonprofit groups and African nations to end elephant poaching, including setting up new wildlife parks." FWS officials have "called on other nations to destroy stockpiles of ivory that some want to sell legally to raise cash." The agency had "hoped to set an example by crushing its entire stockpile of seized ivory in Colorado for the first time, but the move was postponed by the government shutdown."

FWS To Take "Immediate Action" To Protect Southern White Rhino. AmmoLand (10/25, 5K) reports that "in response to an ongoing poaching crisis that is decimating wild rhinoceros populations worldwide," the FWS will "take immediate action to protect the southern white rhinoceros under the Endangered Species Act." According to the article, "by extending ESA protection to the white rhino—the last remaining unprotected species of rhinoceros—the Service closes a loophole that has been exploited by unscrupulous poachers and traffickers seeking to cash in on global demand for rhino horn." The action, which was announced by Interior Secretary Sally Jewell at the White House Forum to Combat Wildlife Trafficking, "will protect the southern white rhinoceros as a threatened species under the ESA's 'similarity of appearance' provisions and will aid international law enforcement efforts to fight poaching and crack down on trafficking in rhino horn." FWS Director Dan Ashe said, "As both a transit point and consumer destination for illegal rhino horn products, the United States plays a vital role in curbing poaching and wildlife trafficking. Along with extending protection to the southern white rhino, we're evaluating additional regulatory and policy options in an effort to strengthen our ability to investigate and prosecute poachers and traffickers. We have a long history in working to curb the illegal wildlife trade, and are committed to working with international law enforcement agencies to address current and emerging challenges."

Texas Hunting Club To Auction Permit To Kill Black Rhino. The AFP (10/25, Sheridan, 17.91M) reported that "a Texas hunting club said Friday it aims to raise up to a million dollars for endangered black rhinoceroses by auctioning off a permit to kill one in Namibia." Ben Carter, executive director of the Dallas Safari Club, which "is hosting the auction early next year," said that the Namibian government "selected" his hunting club to "auction a black rhino hunting permit for one of its national parks." According to the group, "limited hunting is a conservation strategy that is supported by US wildlife officials, the International Union for the Conservation of Nature and the Convention on International Trade in Endangered Species – all of which list rhinos as endangered."

Also reporting on the story is FOX News (10/27, 6.72M).

CONTINUING COVERAGE OF SHUTDOWN'S IMPACT. In the "Federal Eye" blog of the [Washington Post](#) (10/25, 4.28M), readers were offered "an opportunity to share their experiences with unexpected effects, inspired by a diabetes foundation that said it canceled a fundraising ride in Death Valley, Calif., because the national park there was closed." According to the article, "some readers told us they thought certain shutdown measures were unnecessary." For instance, Albert Sutlick, who lives in Washington state, said "he was bothered by the shuttering of parks and monuments, which he described as an attempt by the Obama administration to draw attention to shutdown effects."

Federal Employees Furloughed In Shutdown Must Return Jobless Benefits. [Reuters](#) (10/25) reports that Federal workers furloughed during the partial shutdown of the government will have to return any jobless benefits they received given that Congress has approved retroactive pay, the Labor Department said on Friday.

Shutdown Impacts Land Rehabilitation. [NWCN-TV](#) Seattle (10/28, 6K) reports that "the federal government shutdown is over, but it's still impacting Idaho by causing a major backup in the rehabilitation of land burned by this year's wildfires." According to the article, "the emergency stabilization process to re-seed the burned out areas was set to begin weeks ago, but federal employees were furloughed during that time," and "now, they're rushing to restore thousands of acres before colder weather moves in." BLM spokesperson MJ Byrne said that "during the key time to re-seed, everyone was furloughed."

NPS Criticized For Conduct During Shutdown. For "The Corner" blog of the [National Review](#) (10/28, 290K), Andrew Stiles writes that the NPS has "a history of going out of its way to inconvenience the public during budget disputes — a reputation that was on full display during the recent government shutdown." Stiles also says "that commitment to inconvenience extends to other, more mundane, facets of the NPS operation." He notes that "the agency has repeatedly frustrated the House Oversight Committee's efforts to get information and hear testimony from NPS director Jon Jarvis."

Additional Coverage. Additional coverage of the shutdown's impact was provided by the [Hazelton \(PA\) Standard Speaker](#) (10/28, 1K).

FEDERAL AGENCIES PREPARE FOR HARDER HITS FROM SEQUESTER. The [New York Times](#) (10/27, Weisman, Subscription Publication, 9.61M) reports that "while the most dire predictions" of the impact of the sequester "may not have materialized in 2013, the tricks that many agencies employed – deferring maintenance, using unspent money from earlier years, cutting staff by attrition – are likely to be exhausted by 2014," when \$24 billion in additional cuts will be required. With leaders of both parties saying it is unlikely budget negotiators will seek much beyond a small agreement in the next few months, it seems unlikely the sequester will be significantly reduced.

BUDGET CUTS, FURLOUGHS HAVE MANY YOUNG FEDERAL EMPLOYERS CONSIDERING PRIVATE SECTOR. The [Washington Post](#) (10/27, Wax-Thibodeaux, 4.28M) reports that many young Federal workers, "disillusioned by furloughs and worried about budget cuts and pay freezes," are looking for work in the private sector. The Post says while a Federal job "remains attractive to many, the continuing turbulence of federal work has made the government a less competitive employer." The Post says "no one has compiled statistics" on how many are leaving, but "public employees say the chorus of dissatisfaction among young people is reaching record decibels."

NEW LEGISLATION PROMOTING PUBLIC LANDS ACCESS FOR HUNTING DRAWS PRAISE FROM SPORTSMEN. [AmmoLand](#) (10/26, 5K) reported that a Senate bill "that would increase hunting and angling access on public lands and bolster the nation's outdoor recreation economy was welcomed by a broad coalition of influential sportsmen's groups and outdoor interests." The Hunt Unrestricted on National Treasures Act, or "HUNT Act," introduced by Sen. Martin Heinrich, "directs federal agencies to inventory all public lands greater than 640 acres where hunting and fishing are legal but inaccessible with the goal of expanding access for members of the public." The bill "finances land acquisitions from willing sellers through a small percentage of Land and Water Conservation Fund monies."

CALVERT PRESERVATION SPECIALIST NOMINATED FOR AWARD. The [Baynet \(MD\)](#) (10/28, 5K) reports that Kirsti Uunila, Calvert County Government's historic preservation specialist, is "in the running" for the 2013 Secretary of the Interior's Historic Preservation Award. Uunila's nomination praised her for assuring citizens "are informed and engaged in historic preservation." It also added that Uunila has been able to "engage newcomers" in Calvert's long history.

ADDITIONAL COVERAGE OF POST-SANDY RESILIENCY GRANTS. Additional coverage of the grants announced by the Interior Department for post-Sandy resiliency projects was provided by the [Washington Post](#) (10/26, 4.28M), the [Washington Post](#) (10/24, Montgomery, 4.28M), [NPR](#) (10/28, Martin, 465K), the [National Geographic](#) (10/28, 21.55M), the [New Bedford \(MA\) Standard-Times](#) (10/28, 54K), the [Providence \(RI\) Journal](#) (10/26, 389K), the [New Haven \(CT\) Register](#) (10/26, 217K), the [Philadelphia Inquirer](#) (10/28, 1.22M), the [Baltimore Sun](#) (10/25, Wheeler, 812K), the [Chestertown \(MD\) Spy](#) (10/25), the [Delmarva \(MD\) Daily Times](#) (10/25, 26K), the [Cape Cod \(MA\) Times](#) (10/25, 92K), the [French Tribune](#) (10/28, 2K), and the [Southern Maryland News Net](#) (10/28).

ADDITIONAL COVERAGE OF SEMINOLES' PUSH TO PRESERVE EGMONT KEY. Additional coverage of the effort by the Seminole Tribe to preserve Egmont Key was provided by the [Bergen \(NJ\) Record](#) (10/28, 383K) and the [Florida Today](#) (10/27, 222K).

SNAKES THREATEN HAWAII. For "The Blog" of the [Huffington Post](#) (10/25, Fahs, 11.54M), writer Barbara Fahs warns about the brown tree snake, which has "has nearly wiped out Guam's bird populations," and could invade Hawaii. She notes that the Office of Insular Affairs has "authorized grant funding of \$250,000 to Guam for the Division of Fish and Wildlife's Brown Tree Snake Program, under the Department of Lands and Natural Resources."

America's Great Outdoors:

National Park Service:

EVENTS TO COMMEMORATE 150TH ANNIVERSARY OF GETTYSBURG ADDRESS. In its "House Divided" blog, the Washington Post (10/25, Wheeler, 4.28M) reports on events commemorating the 150th anniversary of the delivery of the Gettysburg Address. President Obama has been invited to attend the free "Dedication Day" ceremony, but the White House has "not announced his schedule for that day." On Nov. 16, NPS ranger Troy Harman will speak on "Breaking Down the Gettysburg Address Line by Line," followed by Chris Gwinn on Nov. 17, speaking on "Millennium of Glory: Edward Everett and the Making of his Gettysburg Address."

MASSIVE LANDSLIDE COVERS STRETCH OF ROAD IN DENALI NATIONAL PARK. The Washington Post (10/25, 4.28M) reports that "a massive landslide" in Denali National Park "rained tons of rock and soil on parts of a road that attracts scores of tourists each summer, park officials said Friday." Workers "began clearing the 200-foot stretch of Denali Park Road on Friday." According to park officials, "it was not immediately clear if road damage or instability of the terrain would affect visitors next summer."

AP coverage was also picked up by USA Today (10/25, 5.82M).

RIM FIRE 100% CONTAINED. The Los Angeles Times (10/26, Cesar, 3.07M) reports that the Rim fire "in and around Yosemite National Park that began in August and burned 250,000 acres was declared 100% contained Friday by fire officials." The article notes that "the cost of battling the Rim fire reached over \$127.3 million."

GROUP SEEKS TO REDUCE AMMONIA AT ROCKY MOUNTAIN NATIONAL PARK. The Denver Post (10/28, Brown, 949K) reports that the local agriculture industry is working with scientists and other experts to reduce ammonia at Rocky Mountain National Park. Biologist Jim Cheatham said a 2006 Rocky Mountain National Park Initiative report found that nitrogen levels in the park are about 15 times more than natural amounts. Such levels, according to Cheatham, have changed the vegetation composition, aquatic communities and overall natural processes of the alpine tundra the park was created to protect under its designations as a National Park, an International Biosphere Reserve and a Class I Airshed.

PRIVATE EFFORT TO CREATE NEW KIND OF NATIONAL PARK TROUBLES SOME MONTANA RANCHERS. The New York Times (10/26, Healy, Subscription Publication, 9.61M) reports that "a group of conservationists and millionaire donors" are "trying to build a new kind of national park, buying up old ranches to create a grassland reserve where 10,000 bison roam and fences are few." According to the article, "supporters see it as the last, best way to create wide-open public spaces in an era of budget cuts, government shutdowns and bitter battles between land developers and conservationists." However, "the trouble is many ranching families here in northern Montana say it is not a project for them," and "as the reserve buys out families and expands its holdings — it now has about 274,000 acres of private ranches and leased public lands — some here are digging in their heels and vowing not to let their ranches become part of the project."

BURN PRESCRIBED AT GETTYSBURG NATIONAL MILITARY PARK. The Hanover (PA) Evening Sun (10/28, 38K) reports that NPS "fire specialists plan to burn 13 acres of the Gettysburg National Military Park this week to test new ways of maintaining the condition of the Civil War-era battlefield." The prescribed fire is scheduled to begin "at noon Wednesday on Snyder farm, in the southern portion of the battlefield, and is funded by the National Park Service Wildland Fire Management Program." The fire will "test whether fire can help accomplish several park objectives including the ability to reduce the encroachment of woody species in the open fields."

NPS HIGHLIGHTS RESTORATION OF HISTORIC SIOUX CITY BUILDING. The Sioux City (IA) Journal (10/28, 15K) reports on the \$4 million project to restore State Steel Supply's factory and warehouse. The article notes that "the Sioux City project is one of 11 adaptive reuse projects and one of 35 sites overall currently featured on NPS's website."

PITTSBURGH POST-GAZETTE BUILDING DISTRICT ADDED TO NATIONAL REGISTER OF HISTORIC PLACES. The Pittsburgh Post-Gazette (10/25, 725K) reports that the Pittsburgh Renaissance Historic District has been listed on the National Register of Historic Places.

ADDITIONAL COVERAGE: NPS RECOMMENDS SITES FOR CESAR CHAVEZ HISTORIC PARK. Additional coverage of the recommendation of sites to honor Cesar Chavez was provided by the Washington Post (10/25, 4.28M), the Washington Post (10/28, Fonseca, 4.28M), the Minneapolis Star Tribune (10/25, Fonseca, 1.14M),

the [Denver Post](#) (10/28, 949K), and [Yahoo! News Canada](#) (10/28, 76K).

COURT URGED TO REJECT DRAKES BAY OYSTER CO.'S CLAIMS. In an op-ed for the [Santa Rosa \(CA\) Press Democrat](#) (10/27, 156K), Lynn Hamilton, a former mayor of Sebastopol, writes that "in its quest to privatize the West Coast's only marine wilderness area — Drakes Estero at Point Reyes National Seashore — the Drakes Bay Oyster Co. has submitted various unsupported claims to the federal courts." Hamilton urges the 9th Circuit Court to "swiftly reject the company's baseless appeal and give back our land and marine wilderness."

Bureau of Land Management:

STEARNS DAM DEMOLISHED. The [Dalles \(OR\) Chronicle](#) (10/26, 40K) reports that "a contractor began dismantling the Stearns Dam on the Crooked River south of Prineville last week after more than a decade of negotiations and planning." According to the article, "the project is the latest in efforts to bring back Central Oregon salmon and steelhead." Michelle McSwain, assistant field manager with the Bureau of Land Management in Prineville, said, "There are more challenges."

Fish and Wildlife Service:

FWS PROPOSES LISTING SAGE GROUSE SUB-POPULATION AS THREATENED. The [Washington Post](#) (10/25, 4.28M) reports that the FWS on Friday "proposed to list as threatened populations of greater sage grouse in Nevada and California in an effort to save the struggling species, a decision that promises to pose new challenges for ranching and energy development in the West." The agency "found that invasive species and energy development in the desert have had a devastating effect on the large, ground-dwelling bird's populations," according to Ted Koch, Nevada state supervisor for the service. The FWS "found multiple threats facing this specific sub-population of the sage grouse."

The [Los Angeles Times](#) (10/25, Cart, 3.07M) reports that "federal biologists estimate that about six groups of birds are occupying about half of their historical range." According to the FWS, "four of the six populations are at risk for loss in the foreseeable future."

Additional AP coverage was provided by the [Denver Post](#) (10/28, 949K).

WOLF PROTECTION PLAN GENERATES CONTROVERSY. The [Los Angeles Times](#) (10/27, Cart, 3.07M) reports that the proposal by the FWS "to extend Endangered Species Act protections for an estimated 75 Mexican wolves in the wild in New Mexico and Arizona" has "ignited a furor" in the Southwest. According to the article, "to many conservatives in the West, such protections are examples of government overreach — idealistic efforts by officials who don't know what it's like to live with wolves." FWS Director Dan Ashe said, "With the political debate we see raging, we can't just listen to the loudest voice in the room. There are many loud voices in the room. No animal engenders more polarizing emotion among Americans than does the wolf."

FWS Extends Comment Periods For Gray And Mexican Wolf Proposals. The [Sierra \(CA\) Sun Times](#) (10/28) reports that "as a result of delays caused by the lapse in federal appropriations," the FWS has "announced rescheduled dates for the remainder of a series of public hearings on two proposed rules—one to list the Mexican wolf as an endangered subspecies and delist the gray wolf elsewhere, and the other to improve recovery efforts for the Mexican wolf in the Southwest." According to the article, "comment period deadlines also are extended until December 17 to allow these hearings to take place within the public comment periods on the proposed rules."

Meanwhile, the [Sacramento \(CA\) Bee](#) (10/25, 749K) reports that "Sacramento will host one of four hearings in the West on the federal government's proposal to withdraw Endangered Species Act protection for the gray wolf."

Additional coverage of the gray wolf was provided by the [Green Right Now](#) (10/25, 305).

FWS HALTS HUNTING OF GRIZZLIES IN KENAI NATIONAL WILDLIFE REFUGE. The [Columbus \(IN\) Republic](#) (10/28, 80K) reports that "sport hunting of grizzly bears will end Saturday in the Kenai National Wildlife Refuge because too many bears have been killed this year," the FWS announced Friday. The service said that "the

emergency closure will take effect at 12:01 a.m. Saturday on the nearly 3,125-square mile refuge that takes up much of the northern and central areas of the peninsula south of Anchorage.”

DENR CHIEF ASKS FEDERAL OFFICIALS TO RECONSIDER TURTLE DESIGNATION. The Carteret County (NC) News-Times (10/28, 28K) reports that the secretary for the state Department of Environment and Natural Resources has written the Interior, Department and the National Oceanic and Atmospheric Administration, “asking they reconsider sea turtle critical habitat designation in North Carolina.” In his letter to Interior Secretary Sally Jewell, NOAA Acting Administrator Dr. Kathryn Sullivan, FWS Director Daniel Ashe, NOAA Acting Director Sam Rauch III and Gov. Pat McCrory sent on Oct. 18, DENR Secretary John Skvarla III discusses “concerns he has with recent proposals by both NOAA and the US Fish and Wildlife Service to designate critical habitat for loggerhead sea turtles on the Atlantic coast.”

ADDITIONAL COVERAGE OF PROPOSAL TO LIST NORTHERN LONG-EARED BAT AS ENDANGERED. Additional coverage of the proposal by the FWS to list the northern long-eared bat as endangered was provided by the Casper (WY) Star-Tribune (10/28, 90K).

COOPERATION ON TIGER BEETLE PRAISED. In an editorial, the St. George (UT) Spectrum (10/27, 48K) praises the cooperation by the FWS, the BLM, the Utah Department of Natural Resources and Kane County, that resulted in the FWS withdrawing its proposal to list the Coal Pink Sand Dunes tiger beetle as threatened. The paper notes that “the decision allows the beetle to live in a protected habitat while keeping the rest of the park available for ATV use.”

US Geological Survey:

USGS WARNS OF MORE DRILLING-RELATED QUAKES IN OKLAHOMA. NPR (10/24, 465K) reports that “central Oklahoma is still experiencing a ‘significant rise’ in magnitude 3.0 or greater earthquakes, and federal and state seismologists are collaborating to study possible links to disposal wells used by the oil and gas industry,” according to the USGS. The article notes that “from 1975-2008, central Oklahoma averaged between one to three 3.0-magnitude quakes a year,” and “that annual average grew to about 40 per year from 2009 to mid-2013, federal seismologist Bill Leith wrote on the USGS website.” As a result, the USGS has “raised central Oklahoma’s earthquake ‘hazard’ risk to account for more frequent and more damaging earthquakes, a move that is forcing municipalities to reconsider building codes.”

The Environment & Energy Publishing (10/28, 705) reports that Leith said, “They’re more at risk than they were four years ago. These don’t look like normal earthquake sequences.”

Also reporting on the story are the Houston Chronicle (10/26, Juozapavicius, 2.26M), the Huffington Post (10/24, Grenoble, 11.54M), and Salon (10/28, 613K).

Securing America’s Energy Future:

Renewable Energy:

FIRST LAND AUCTION FOR SOLAR DESCRIBED AS A COMPLETE “BUST.” The Washington Times (10/26, Chumley, 417K) describes the first Federal auction, which was ran by the Bureau of Land Management, to sell opportunities to build solar power projects on public land as a “waste of time” and a complete “bust” since “nobody showed to bid.” The Times reports that even though no one showed up to the auction, which was held on Thursday in Lakewood, Colorado, “the BLM still has high hopes for solar development and says the lack of bids doesn’t mean the project plans are dead.”

Additional coverage was provided by FOX News (10/26, 6.72M), the Durango (CO) Herald (10/24, 28K), the Cortez (CO) Journal (10/25, 646), the Denver Business Journal (10/28, Subscription Publication, 71K), the SNL Financial (10/28, 22K), the Earth Techling (10/28, 3K), and KREX-TV Grand Junction, CO (10/28, 1K).

Onshore Energy Development:

HOUSE DEMOCRATS URGE WHITE HOUSE TO SPEED UP FRACKING GUIDANCE REVIEW. The Hill (10/26, Hattem, 194K) reported that “top Democrats on the Energy and Commerce Committee and its Oversight subcommittee” wrote a letter to the White House Office of Management and Budget urging them to finalize the review of EPA’s guidance for fracking “operations...that use diesel to develop oil and natural-gas resources.” The Hill reported that the House Democrats said in its letter that “the guidance is long overdue” and added that without rules from the EPA, “energy developers have been unrestrained.”

RECORDS SHOW PIPELINE SPILLS IN NORTH DAKOTA WENT UNREPORTED. The AP (10/26, Macpherson) reported that nearly 300 oil pipeline spills in North Dakota “occurred since January 2012 without public notification.” The AP reported that soon after it published its report Friday, the state’s Health Department “announced it is testing a website to publish information on all spills reported to the department.” Dave Glatt, the department’s chief of the environmental health section, said that the website “would likely go live in two to three weeks.”

FRACKING SEEN AS KEY TO AMERICA’S OIL INDEPENDENCE. In a Washington Times (10/26, 417K) op-ed, Bob Taylor, founder of the Magellan Travel Club, wrote there are rumors “in Saudi Arabia that the Kingdom is upset with the United States because of the Obama Administration’s policies in Syria and Egypt,” which sparks concern from some since America currently remains dependent on Saudi oil. However, with the amount of oil that is being produced by techniques such as fracking, Taylor wonders if Americans should be concerned at all with their relationship with Saudi Arabia. Taylor concluded by suggesting that the US should keep fracking since “it just may be the key to our freedom from the stranglehold of Saudi Arabia.”

FEDERAL CONTROL OF ENERGY DEVELOPMENT CRITICIZED. In an op-ed for the Las Vegas Review-Journal (10/28, 437K), Geoffrey Lawrence, deputy policy director at the Nevada Policy Research Institute, laments the slow development of Nevada oil exploration. Despite the great potential, Lawrence says that Federal control impedes large-scale energy development in Nevada.

Also, in an op-ed for the Denver Post (10/28, Considine, 949K), Timothy Considine, director of the Center for Energy Economics and Public Policy at the University of Wyoming, criticizes the Federal government for delaying development in the Rocky Mountain region. As a solution, Considine suggests returning control of Federal lands to states.

Offshore Energy Development:

BOEM PROPOSES CENTRAL GULF OF MEXICO OIL AND GAS LEASE SALE. Platts (10/28, 2K) reports that the BOEM on Friday announced it will conduct Lease Sale 231—to auction off oil and gas tracts in the central Gulf of Mexico planning area—on Mar. 19, 2014, in New Orleans. The bureau proposed “offering 7,508 blocks over 39.4 million acres for oil and gas exploration.” BOEM Director Tommy Beaudreau said, “The Central Gulf of Mexico is one of the most prospective and productive basins in the world, and this proposed sale continues the Administration’s all-of-the-above strategy to increase safe and responsible domestic energy production.”

The Oil and Gas Journal (10/28, 1K) notes that “this is the fourth lease sale to be held in the 2012–17 Outer Continental Shelf leasing program.”

Also reporting on the story are the Law 360 (10/28, 18K), the Penn Energy (10/28, 128), the Rigzone (10/28, 12K), and the Marine Link (10/28, 1K).

OIL, GAS INDUSTRY PUSHES TO OPEN AREAS TO OFFSHORE DRILLING. The SNL Financial (10/25, Hiar, 22K) reports Randall Luthi, president of the National Ocean Industries Association trade organization, said at the Natural Gas Roundtable “that Arctic exploration is inevitable and that now is the time to push for more drilling on the U.S. Outer Continental Shelf.” He added that “technical and regulatory uncertainty” has slowed US companies operating in the region. Meanwhile, as part of an effort “to sway regulators, Luthi’s organization is working with API on a forthcoming report that seeks to quantify the economic benefits of opening the Mid-Atlantic region to drilling.” SNL added that oil and gas industry groups “are making such a big push” for the Department of the Interior to consider this offshore drilling “is because they are worried that if regulators do not look at it now,

they will not revisit the issue later.”

The FuelFix (10/26, 7K) reports that “with the Interior Department poised to soon begin the long process of drafting the next five-year sale schedule spanning 2017 to 2022, oil industry representatives are imploring the administration to keep the door open to Atlantic auctions.” According to the article, “in assembling the current sale schedule, Interior Department officials insisted that private companies should first conduct geophysical research to get a sense of the area’s potential oil and gas resources before the government makes any leasing decisions or schedules sales.” However, “industry representatives worry that sticking to that same approach for the 2017-2022 schedule would likely foreclose Atlantic auctions for that time period too.”

REUTERS ANALYSIS: GULF OF MEXICO REMAINS ATTRACTIVE TO OIL COMPANIES. Reuters (10/28, Hays, Wade) reports that the Gulf of Mexico is on the verge of producing over 700,000 barrels per day of new crude, reversing declining production. Despite post-Deepwater Horizon spill safety and environmental rules and its technical challenges, the area remains attractive to companies even as other offshore oil patches struggle. This is due to larger profit margins, reasonable costs, predictability in the legal and regulatory systems, and no local employment requirements.

Tackling America’s Water Challenges:

CALIFORNIA RESERVOIRS WATCHING FOR SIGNS OF WINTER. The Fresno (CA) Bee (10/27, 327K) reports that major reservoirs in California “need gully-washing storms this winter.” The article notes that “all eyes will be on Northern California, where the state’s highest rain and snow totals occur.” According to the article, “farmers and cityfolk who closely watch Shasta and other northern reservoirs might have suffered whiplash last winter.” BOR spokesman Pete Lucero said that “the reservoirs stored a lot of water last year after a stormy November and December,” but “suddenly the spigot turned off.”

BOR CONSIDERS OPTIONS TO DEAL WITH HYATT DAM SEEPAGE. The Medford (OR) Mail Tribune (10/27, 67K) reports that the BOR is “mulling whether to address growing seepage through a portion of Hyatt Dam with structural fixes or by keeping Hyatt Lake’s water levels more than one-third lower to ensure dam safety.” The bureau is “in the early stages of flushing out the ramifications of either option to deal with the seeping water, which is deemed to have the potential for structural damage.” According to the BOR, “options include putting filters inside the earthen and rock-filled structure so water would pass through the often-leaky dam without threatening its structural integrity.”

RESEARCHERS SAY EXPERIMENT USING FLOODED RICE FIELDS AS YOUNG SALMON HABITAT IS SUCCESSFUL. KOVR-TV Sacramento, CA (10/25, 47K) reports that “flooded rice fields appear capable of serving as substitutes for now-depleted wetlands and helping California’s Chinook salmon population recover, researchers have concluded.” In a report submitted to the BOR, the researchers said “salmon raised in replicated rice fields near Sacramento as part of their experiments were the fattest and fastest-growing salmon ever documented in freshwater in the state.”

COMPANY SEEKS TO ELECTRIFY GIBSON DAM. The Great Falls (MT) Tribune (10/27, 90K) reports on the effort by Gibson Dam Hydroelectric Co. LLC to “electrify the dam on the popular Sun River Canyon in the Lewis and Clark National Forest 20 miles northwest of Augusta.” However, “a relatively recent development — creation of the Rocky Mountain Front Conservation Area — could be a difficult hurdle for the \$34 million project.”

Empowering Native American Communities:

BIA OFFERS TO MEDIATE IN DISPUTE THAT SPLIT BLACKFEET TRIBAL LEADERSHIP. The Columbus (IN) Republic (10/28, 80K) reports that the BIA is “offering to mediate in a dispute that has split the governing body of the Blackfeet Indian tribe into two factions, but the tribal chairman said Friday he hopes to resolve their problems internally.” Chairman Willie Sharp Jr. said “he appreciated the BIA’s offer of assistance, but he wants to see if the factions can resolve their differences face to face.”

Also reporting on the story are the Helena (MT) Independent Record (10/28, 45K) and the Montana Kaimin (10/28, 11K).

MENOMINEE TRIBE CALLS FOR OUTSIDE REVIEW AS WALKER DELAYS DECISION. The Milwaukee Journal Sentinel (10/28, 798K) reports that the Menominee tribe and Hard Rock International are “challenging” the Potawatomi tribe “to have an outside expert determine what impact a new casino in Kenosha would have on the Potawatomi’s Milwaukee gambling hall, Hard Rock chairman James Allen said Friday.” Allen made the challenge “after Gov. Scott Walker said he was taking more time to consider the Menominee proposal to open a massive casino in Kenosha.” Also reporting on the story is the Milwaukee Business Journal (10/25, Subscription Publication, 12K).

In an op-ed for the Minneapolis Star Tribune (10/28, Vig, Leecy, 1.14M), Charlie Vig, chairman of the Shakopee Mdewakanton Sioux Community, and Kevin Leecy, chairman of the Bois Forte Band of Chippewa, write about their concerns regarding the Interior Department’s approval of “an application by the Menominee Tribe of Indians of Wisconsin to open a casino in Kenosha.” They argue that “no matter how well-intended the Department of Interior’s decision, it pits tribe against tribe.” They vow that “in Minnesota, the MIGA tribes will continue to oppose any significant expansion of gambling, whether it is proposed by the state or by another tribe” because they “believe Indian gaming is and should remain a reservation-based economic development tool that helps fund the vital tasks of tribal governments, create jobs for Minnesotans and improve the lives of Indian people.”

STAFF TURNOVER IMPEDES PROTECTION OF CHILDREN AT SPIRIT LAKE. The Forum of Fargo-Moorhead (ND) (10/28, 15K) reports that “turnover of staff to investigate suspected child abuse and neglect cases has hampered efforts” by the BIA to “improve child protection services on the Spirit Lake reservation.” According to Russ McDonald, who took over as chairman of the Spirit Lake Tribe on Sept. 10, “tribal leaders and members credit BIA staff members with working hard to improve child protection, but visible progress has not yet been achieved.” Nedra Darling, a BIA spokeswoman, “acknowledged the bureau has had to rely on temporary social work staff at Spirit Lake.” Darling said, “It’s been difficult. It’s an ongoing challenge for every agency in the region. We are continuing to work very hard to find social workers. We have good people there. The staff we are using are top of the field.”

FEDERAL RECOGNITION URGED FOR MONACAN TRIBE. In her column for the Staunton (VA) News Leader (10/26, 9K), Lisa Louie argues for the Federal recognition of “the Monacan people as an Indian tribe.”

Top National News:

AMID CONTINUING GOP CRITICISM, SEBELIUS TO APPEAR BEFORE HOUSE COMMITTEE THIS WEEK. HHS Secretary Sebelius is set to testify before a House panel this week about the problems plaguing the Federal health insurance exchange website. Two of the three network news broadcasts covered the problems with the websites Sunday evening and mentioned Sebelius’ testimony as part of their coverage. In addition, the website problems and Sebelius’ perceived responsibility for them dominated the Sunday talk shows, with media accounts focusing on GOP efforts to place blame on the Secretary – and on Rep. Darryl Issa’s call for her resignation.

NBC Nightly News (10/27, lead story, 3:10, Holt, 7.86M) reported in its lead story that “embattled” Sebelius “will testify before a congressional committee on Wednesday,” as many Republicans are “still calling for her to resign.” In a follow-up story on NBC Nightly News (10/27, story 2, 0:50, Holt, 7.86M), CNBC Chief Washington Correspondent John Harwood said that Sebelius is “going to have to defend the law because she’s going to have to explain to people how the law will function if they can get past the technical challenges.” NBC noted that Sebelius has “support from the Administration, from the President” and she “can survive this.” Nonetheless, “this is a moment for her and the entire White House team to step up and demonstrate that they can manage a crisis, show some competence and governance.” The CBS Evening News (10/27, lead story, 1:55, Glor, 5.58M) briefly mentioned Sebelius’ planned testimony as part of its lead story.

The Christian Science Monitor (10/28, Knickerbocker, 540K) reports that Sebelius will appear before “a Republican-led House committee highly skeptical of (if not hostile to) Obamacare.” Sebelius will appear before the panel as Republican lawmakers, and some Democrats, are demanding “to know why the roll-out of the health care insurance exchanges has been so rocky.” The Monitor notes that Sebelius “is unlikely to be a pushover for House Republicans, some three dozen of whom have demanded that she resign over the Obamacare troubles.”

The AP (10/28, Thomas) reports that Republicans "intend to press" Sebelius about the problems with the website "and concerns about the privacy of information that applicants submit under the new system." Sebelius is set to testify before the House Energy and Commerce Committee on Wednesday, one day after "Medicare chief Marilyn Tavenner is to testify during a House hearing." The AP notes that both officials will "be grilled on how such crippling technical problems could have gone undetected prior to the website's Oct. 1 launch." Republican Rep. Marsha Blackburn, "an opponent of the law," said on Fox News Sunday, "The incompetence in building this website is staggering."

The Wall Street Journal (10/27, Patterson, 5.91M) reports that Blackburn said the problems with the website highlight the need for a delay of the law.

The Hill (10/28, Viebeck, 194K) reports in its "Healthwatch" blog that on the Sunday talk shows, Republicans "repeatedly singled out the secretary and called for her resignation over the disastrous rollout of HealthCare.gov," and notes that Sebelius is "sure to feel the heat" when she "makes her first appearance before Congress on the rollout."

The Los Angeles Times (10/28, Tanfani, 3.07M) reports that congressional Republicans on Sunday vowed to "press investigations into what went wrong" with the website and said that Sebelius should resign. The Times notes that for Republicans, who have been "battered by public disapproval of their government-shutdown strategy, the bungled design of the program's website is providing an opportunity to resume the offensive against the Obama administration" and the ACA.

Republicans appearing on the Sunday talk shows were highly critical of Sebelius, blaming her for the website problems and calling for her resignation. USA Today (10/28, Moore, 5.82M) reports that House Oversight and Government Reform Chairman Darrell Issa said that Sebelius "must fix the problems with the HealthCare.gov website or lose her job." Speaking on CBS' Face the Nation, Issa said, "If she cannot reorganize to get the kind of a team in consistently to meet (President Obama's) agenda, then she shouldn't be there. ... When she says she didn't know, why didn't she know that the president's signature legislation was in fact in trouble?"

Issa said on CBS' Face The Nation (10/27, Stephanopoulos, 2.52M), "The President has been poorly served in the implementation of his own signature legislation. So if somebody doesn't leave, and there isn't a real restructuring, not just a 60-day somebody comes in and tries to fix it, then he's missing the point of Management 101, that these people should serve him well and they haven't."

Rep. John Fleming (R-LA) said on CNN's State Of The Union (10/27, Crowley, 862K), "Americans demand accountability. Secretary Sebelius is obviously not taking accountability for this. She says the people that want her to resign she doesn't work for. I can tell you, I'm a taxpayer. She works for me. She's a public servant. I'm a public servant. I work for the American people. ... We never had input to this law to begin with. We tried to tell her all along – she was a big cheerleader for this – 'please, work with us.' Instead, she said, 'No, we don't want to hear from Republicans on this.'"

Meanwhile, Democrats defended Sebelius, arguing that she will get the job done and that the focus should not be on her but on fixing the website. Manchin said on ABC's This Week (10/27, Stephanopoulos, 2.73M), "I think [HHS Secretary Sebelius] was a successful governor working with both sides of the aisle. She's very capable of bringing people together. ... I think she should stay and I think she will get the job done. And I think she can do that. We need to move forward."

Rep. Xavier Becerra (D-CA) said on Fox News Sunday (10/27, Wallace), "The most important thing right now is making sure we fix the website, not fixate on the website. And certainly, I hope that no one is talking about shutting down something new now with the healthcare website, because what we want to do is see all those young people and older folks access good healthcare."

Republican Sen. John Barrasso said on ABC's This Week (10/27, Stephanopoulos, 2.73M), "I want to make sure that patients can get high-quality care. The website was supposed to be the easy part of this. So I see that this is just the tip of the iceberg of problems, with bigger problems to come. But the Democrats are at a point of high anxiety. Americans have been very skeptical about this healthcare law. But now there is a lot of anger about the wasted taxpayer dollars on this website about all of the waivers the President has given to unions, to members of

Congress, no one at the White House is going to have to sign up on the exchanges and now Americans are saying, 'Wait a minute, why do I have to pay a fine if I don't sign up?'"

House Intelligence Chairman Mike Rogers said on CNN's State Of The Union (10/27, Crowley, 862K), "This worries me a lot, the fact that they have different segments of people controlling pieces of information and they say, 'Well, we don't store information,' but they have to store your application at some point. And that's a lot of your very personal information. And it was very clear to me in the hearing that they do not have an overarching solid cybersecurity plan to prevent the loss of private information."

Louisiana Gov. Bobby Jindal said on Fox News Sunday (10/27, Wallace), "I think this is just the tip of the iceberg. They will fix the Internet problems. Bring in Al Gore, who says he invented the Internet, to fix the website. But we don't need the government running our health care. ... I think the pressure will only grow as we see more and more problems with the roll-out. More and more plans dropping, and millions of Americans are learning they cannot continue in their insurance. I think more and more frustration will build for Democrats and Republicans."

Ohio Gov. John Kasich said on NBC's Meet The Press (10/27, Gregory), "The roll-out is the least of the problem here. The roll-out looks like a disaster, but in my state most Ohioans are going to pay higher costs. In fact, this is not going to control healthcare costs. ... The problem with Obamacare is it doesn't get to the nub of the problem, which is higher healthcare costs that have been out of control. When you roll it out, if it rolled out perfectly, it's not going to achieve what America wants."

Meanwhile, Kentucky's Democratic Gov. Steve Beshear said on NBC's Meet The Press (10/27, Gregory), "At 12:01 a.m. when our exchange opened up to enrollment, Kentucky started swarming all over our exchange, all over our toll free lines, and in about four weeks, we've had over 300,000 Kentuckians trying to sign up for Obamacare. ... This is working in Kentucky. We had and have some of the worst health statistics in the country. And it's been that way for generations. The only way we're going to get ourselves out of the ditch is some transformational tool. That's what the Affordable Care Act is going to do for us."

Howard Dean said on ABC's This Week (10/27, Stephanopoulos, 2.73M), "The problem is the scale. It would have been better to have four exchanges than one. They didn't know 34 states were going to refuse to participate in the exchanges. We can fault the Obama Administration, certainly there are faults to be had here. I should add that Republicans bear some responsibility for this. They defunded part of Obamacare."

Jennifer Granholm said on NBC's Meet The Press (10/27, Gregory), "The President is so mad about this that he himself will go down and supervise the writing of code if this is not fixed by the end of November. This is going to be fixed. The real question is, once this is fixed, what do the Republicans then do, because the Republicans have every incentive to conflate the web site with Obamacare, because they have to justify why they shut down the government for weeks."

No One Was Responsible For Overseeing Implementation Of HealthCare.gov. The Wall Street Journal (10/28, Weaver, Radnofsky, Subscription Publication, 5.91M) reports that while different groups of people in different cities were involved in the creation of HealthCare.gov, it is becoming clear that no one was responsible for overseeing the implementation of the website. The Journal cites accounts from current and former officials who say agency cultures, political decisions that conflicted with operational deadlines, an abbreviated timeline, and the fact that agencies working on various components of the project were in different cities all led to the technical problems plaguing the site.

Shaheen, Manchin Call For Delays Of ACA Provisions. The CBS Evening News (10/27, lead story, 1:55, Glor, 5.58M) reported in its lead story that there are now calls from both sides of the aisle "for delay in a key date when millions were supposed to be signed up for health insurance." CBS (Pegues) added that there "appears to be growing consensus" in Washington that "parts of the Affordable Care Act" should be delayed. CBS notes that Democratic Sen. Jeanne Shaheen, who supports the law, "is leading an effort to let the March 31st deadline for enrollment to slide." Shaheen and nine other Democrats have written to HHS saying that "extending the enrollment period would give consumers valuable time to choose a plan best for them."

Shaheen said on CBS' Face The Nation (10/27, Schieffer, 2.52M), "We're hearing from lots of constituents in

New Hampshire that they want to enroll in health insurance, but they can't because of the problems with the website. The roll-out has been a disaster. And so what I'm proposing is that we extend the period in which people can enroll, so we can make sure we can get as many people who want health insurance able to enroll and be able to be covered."

The Washington Post (10/28, Somashekhar, 4.28M) reports that in an appearance on ABC's This Week on Sunday, Sen. Joe Manchin made a case for legislation "delaying the so-called 'individual mandate' for a year."

The Washington Times (10/28, Wolfgang, 417K) reports that Manchin says a one-year delay "would offer time for the Obama administration to work out the bugs with the glitch-plagued HealthCare.gov website," but believes the law "can be a success if Republicans and Democrats, insurance companies and health care professionals all work together." Manchin said on ABC's This Week, "We can make this happen, but we've all got to be on the same team right now, and that's Team America to make this happen."

Manchin said on ABC's This Week (10/27, Stephanopoulos, 2.73M), "I have been working in a bipartisan manner in trying to put a coalition together that basically says the penalty, the fine of \$95, will not be into effect until 2015, at that time the fine will be \$325. It will still induce people to get involved but also gives us a time to transition in, to work out things, we identified a lot of problems, a lot of glitches."

Rep. Marsha Blackburn (R-TN) said on Fox News Sunday (10/27, Wallace), "Absolutely we should have a delay. I hope H.R. 2809, which is a one-year delay of all things ObamaCare, and there should be a suspension of the law to allow people to review this process and I'm pleased that so many Democrats are joining me now saying yes indeed. There should be a suspension because there are too many problems not only with the enrollment but with the mandates, taxes, fees, and penalties."

Site Problems Could Drive Away Young People. The New York Times (10/28, Lowrey, Subscription Publication, 9.61M) reports that there are concerns among "economists and policy wonks" that the problems facing the Federal health insurance exchange website "could become much more than an inconvenience" by dissuading young people, who "are supposed to help pay for the medical costs of older or sicker enrollees," from enrolling. If that occurs, "so-called risk pools in Ohio and other states might become too risky, forcing insurers to raise premiums."

SNL Mocks Health Insurance Exchange Site. The Wall Street Journal (10/28, 5.91M) reports in its "Washington Wire" column that Saturday Night Live mocked the problems facing the rollout of the Federal health insurance exchange website. During the sketch, cast member Kate McKinnon, as HHS Secretary Sebelius, offered a number of suggestions for Americans who have been unable to use the site, which has been, as she said, "crashing and freezing and shutting down and stalling and not working and breaking and sucking." Among the suggestions were a "low-res" version of the site, which showed a screen with the words "U Want Doctr?" and buttons labeled "yes" or "no," and an Icelandic-language site. In addition, the mock-Secretary suggested other sites which might be helpful, including "kayak.com, where you can purchase airline tickets to Canada and buy cheaper prescription drugs." A report on the sketch by the Huffington Post (10/28, McGlynn, 11.54M) includes the video clip.

More Commentary. Brit Hume said on Fox News Sunday (10/27, Wallace), "I think we can assume that the website will sooner or later get fixed and that hundreds of thousands of people will sign up using it. But the test, really, and the Administration clearly noticed this, is whether enough young healthy people sign up to furnish the premiums. ... We're seeing two things that suggested that may not be so. One is, that a lot of the signing up that's going on is for Medicaid. Medicaid, of course, doesn't bring in any money. It spends money. ... The second is that all kinds of people are getting thrown off their insurance policies."

Bill Kristol said on ABC's This Week (10/27, Stephanopoulos, 2.73M), "Let's hope they fix it for the sake of the country. They can fix the website but not ObamaCare. The big story this week and last week, people in the individual insurance market, about 15 million, getting notices from their insurance companies they won't be able to renew their policies next year. ... Over 10 million people are losing policies."

Peggy Noonan said on CBS' Face The Nation (10/27, Schieffer, 2.52M), "It has been, I believe, a political disaster for the White House. It has made people in America nervous, anxious, and confused. It seems to me this whole

thing should be delayed. But deep inside myself, I really think, look, they can probably get this tech end to work in a certain amount of time, but the internals of the law, the content of the law is already causing problems.”

Other commentators on the Sunday shows were also critical of the law. For example, ABC's Richard Besser said on ABC's This Week (10/27, Stephanopoulos, 2.73M), “The website is not ready for prime time. The first is accessing that website and creating your accounts. Some people are getting incorrect quotes. And that information being passed to insurance companies isn't always correct. ... For this to be successful, they have to ensure that young, healthy people sign on. ... If you don't have them on board the financial structure doesn't work very well. But I think the long-term impact of Obamacare is going to be very good because there are so many other things that are included, coverage of people who have existing medical conditions, free preventive care. These are things that people, once they get them, they won't want them to go away.”

S.E. Cupp said on ABC's This Week (10/27, Stephanopoulos, 2.73M), “Millennials have never bought health insurance in the past. Buy something that they don't think they need; in some cases, can't afford. ... Culturally, it also reads...an inability to speak their language. You might call an 800 number and sit on the phone. Millennials aren't used to that. They don't meet in-person with insurance brokers or travel agents or anyone. They need a website that works...and they're not going to be patient as the President and the Administration tweaks all of that.”

Similarly, in his column for the New York Times (10/28, Subscription Publication, 9.61M) today, Paul Krugman questions why the ACA has to be “so complicated in the first place.” calling the law “an immense kludge — a clumsy, ugly structure that more or less deals with a problem, but in an inefficient way.” Krugman decries the “better-than-nothing-but-pretty-bad solutions” thinking that he says led to the website and blames “an ideology that is fundamentally hostile to the notion of the government helping people, and tries to make whatever help is given as limited and indirect as possible.” Krugman argues that a society which is “committed to the notion that government is always bad will have bad government.”

Donna Brazile said on ABC's This Week (10/27, Stephanopoulos, 2.73M), “I think that they are going to fix it. It's going to work better over the next 30 days. And you look at the people who have already enrolled. They are not just enrolling online, there are in-person rollouts. There are people who are calling that 1-800 number. ... It works. And there are people who are being recruited to help sign up people. ... And all of these, what I call negative folks who are saying bad things, they're going to eat their words.”

RCP AVERAGE HAS OBAMA JOB APPROVAL AT 45%. The RealClearPolitics average of recent polling on President Obama's job approval has the President's approval at 45%, and disapproval at 50.8%. Approval is up 0.1% since yesterday; disapproval is unchanged.

The latest Gallup daily tracking poll of 1,500 “adults” (10/24-10/26) shows the President with a 44% approval rating and 50% disapproval. Rasmussen's automated survey of 1,500 “likely voters” (10/24-10/26) finds Obama's approval at 50%, with 49% disapproving of his performance.

OBAMA, CABINET OFFICIALS TO PRESS FOR FOREIGN INVESTMENT IN US AT SUMMIT. Under the headline, “Barack Obama Mounts Big Push To Bolster FDI in US,” the Financial Times (10/28, Politi, Subscription Publication, 1.43M) reports, “President Barack Obama and his senior cabinet officials are mounting a big push to bolster foreign investment in the US — amid evidence that America is falling behind other countries.”

The President will appear at a two-day summit next Thursday and Friday designed for that purpose. The Hill (10/26, Sink, 194K) noted that Treasury Secretary Lew, Secretary of State Kerry, and National Economic Council Director Gene Sperling, among others, will also attend. The Hill quoted a White House official as saying, “On the heels of the manufactured crises in Washington, it's time for folks to come together and focus on doing everything we can to spur growth and create new high-quality jobs.” The official added, “The Summit will provide an opportunity to do just that.”

Visa Program For Foreign Investors Comes Under Criticism. The Washington Times (10/28, Anderson, Waterman, 417K) reports that a DHS “whistleblower” says that “one of its agencies is skimping on background checks of US companies seeking to participate in a program that gives green cards to high-dollar foreign investors — potentially compromising national security.” The EB-5 visa program “came under scrutiny this

summer after reports that the head of Homeland Security's US Citizenship and Immigration Services agency personally intervened to expedite applications from a company affiliated Virginia gubernatorial candidate Terry McAuliffe (D).

ECONOMISTS SAY SHUTDOWN IMPACTED ECONOMIC GROWTH. USA Today (10/28, Davidson, Hansen, 5.82M) reports that the impact of the shutdown is likely to be felt by the economy for "some time." According to a survey of 41 "top economists," more than half are "less optimistic about growth prospects than they were three months ago." Of those surveyed, 63% said that the "recurring standoffs" are harming the economy "some" or "a lot," while the rest say they have cause "a little" damage. The economists "now expect the economy to grow at a tepid 2.1% annual rate in the fourth quarter and 2.6% in the first quarter, down from their median estimates three months ago."

Dionne Says Administration, Congress Should End Sequestration. In his column for the Washington Post (10/28, 4.28M), E.J. Dionne Jr. writes that that Washington is wrong to focus on the deficit, and should instead focus on "sluggish growth and persistent unemployment." Dionne argues that the budget cuts have "slowed the very growth we need to make our way toward fiscal balance." Facing "tea party" Republicans, the Administration "has backed off aggressive efforts to use government to pump much-needed energy into an economy," but should now make sure to avoid any "grand bargain" to cut spending with the GOP. In addition, Congress must now end the sequestration cuts that Dionne argues are slowing the economy.

Halloween Spending On The Rise, Boosting Economy. ABC World News (10/27, story 6, 1:40, Muir, 7.43M) reported that the US economy is getting a "welcome boost" because Halloween spending is "on the rise this year." ABC (Sandell) added that nationally, there are "roughly 1,200 professional haunts, ticket sales roughly a billion dollars. Halloween spending is second only to Christmas." Accessories, candy and decorations will "scare" \$7 billion "out of American Wallets this year, up from \$3.3 billion in 2005."

Editorial Wrap-Up:

NEW YORK TIMES. "Not One More." In an editorial, the New York Times (10/28, Subscription Publication, 9.61M) is pleased the President urged Congress to help him get immigration reform enacted, because it "acknowledges his own role in this continuing disaster." The Times says that President can do much to fix the system himself, including stopping "needless" deportations, highlight the impact of the system on individuals and families, and "get beyond politics." The Times concludes that Obama "has sometimes been resentful when immigrant advocates remind him of his failures. Now, at least, he has invited their pressure."

"Why Prisons Are Shrinking." The New York Times (10/28, Subscription Publication, 9.61M) editorializes that the mandatory sentencing movement that swept the US starting in the 1970 "drove the state prison population up from less than 200,000 to about 1.4 million today and made corrections the second-fastest-growing state expense after Medicaid," but "bipartisan sentencing reforms in a growing number of states are starting to reverse that trend – causing the prison population to decline by about 3.8 percent since 2009." The Times notes that state reforms often reflect "a relatively new and more sophisticated way of using data about the offender – including criminal history, drug abuse and instances of antisocial behavior – to assess the likelihood of that individual's committing a new crime." The Times notes that by reviewing arrest, sentencing and probation information, states "can revise policies that might be driving people back into prison unnecessarily."

"For Extending New York's Judicial Terms." The New York Times (10/28, Subscription Publication, 9.61M) editorializes that the judicial retirement ages "embedded in New York State's Constitution" are "a relic of a time when average life expectancy was much shorter than it is today." The Times calls "sensible" a proposal on the state's November 5 ballot that would "modestly extend the age limits for certain state judges and help ease court system backlogs by allowing seasoned judges to stay on past age 70."

WASHINGTON POST. "Marijuana In D.C. ? Fine." The Washington Post (10/28, 4.28M) editorializes about the argument for decriminalization of marijuana in Washington, DC. The Post notes that much of the debate "has focused on an American Civil Liberties Union report that suggests that the District and many other jurisdictions enforce their anti-marijuana laws unfairly, disproportionately arresting African American suspects." The Post argues that the debate "does not need to be resolved to conclude that maintaining criminal penalties for small-

time users of any race doesn't make sense." Noting the changing national opinion on marijuana use, and Attorney General Eric Holder's announcement earlier this year aiming Federal resources "at high-level offenders," the Post concludes that of "all the official reactions to changing mores on marijuana, decriminalization is the best."

"Politics In the Academy?" A Washington Post (10/28, 4.28M) editorial says that the recent firing of Xia Yeliang, a Peking University economics professor and advocate for democratic reform in China, shows that Chinese universities continue to be subject to interference from the country's ruling Communist Party. Chinese universities' assurances of academic freedom should not be trusted by US institutions eager to establish partnerships in China. H. Kim Bottomly, Wellesley College president, said to Inside Higher Ed that "We think it's a real mistake to enter into arrangements with authoritarian societies without any conditions whatsoever, without any kind of sense of basic rules of engagement."

"Secret Stash." The Washington Post (10/28, 4.28M) editorializes that the California Fair Political Practices Commission "has just parted the curtains on a network of hidden donations in the state's Nov. 2012 campaign," offering "a rare glimpse of the dark money coursing through U.S. politics." The Post notes several examples of suspicious activity, and argues that the report reveals "the way the nonprofits were used to hand off contributions to each other while masking the true source of the donations." The Post concludes that "the network of transfers – millions of dollars being handed off in the shadows – should spark renewed efforts to expose dark money to sunlight."

WALL STREET JOURNAL. "Little Orphan Fannie." In an editorial, the Wall Street Journal (10/28, Subscription Publication, 5.91M) says that while the settlements between the Federal government and major banks portray Fannie Mae and Freddie Mac as victims of unscrupulous private lenders. The Journal says that this is wrong, as the two GSEs were as much at fault as the banks, if not more so, for the mortgage crisis in 2008.

"Birds, Bees And Spies." In an editorial, the Wall Street Journal (10/28, Subscription Publication, 5.91M) says that the European leaders should be thankful that the Snowden leaks give them something to focus on other than their economies. The Journal questions the veracity of European complaints, and defends the monitoring as generally justified historically. The Journal expresses concern that the President will now unwisely restrict intelligence activities to please overseas leaders.

Unless otherwise noted, all convention events are open to the media with the exception of MBA committee meetings, correspondent meetings and board meetings.

CSIS – PONI 2013 FALL CONFERENCE — Oct. 28 – 29. 8 a.m. – 5 p.m. The third conference of the 2013 PONI Series will be held on December 17-18 at the Center for Strategic and International Studies. Location: Center for Strategic and International Studies (CSIS), 1616 Rhode Island Ave. NW.

KURDISH ROLE – WASHINGTON CONFERENCE — 8 a.m. Washington Conference to Explore Kurdish Role in Changing Middle East. Hosted by the US Representative Office of the Peace and Democracy Party (BDP), the conference will analyze how regional transformations are impacting the Kurdish issue, and how Kurds can contribute to a just and democratic solution to ongoing regional instability. Location: National Press Club, Holeman Lounge, 529 14th Street NW. Contacts: Mehmet Yuksel info@bdpusa.org (202-445-6012)

INTER-AMERICAN DIALOGUE – ECUADOR — 8:30 a.m. – 9:30 a.m. Discussion on recent government efforts to regulate civil society organizations in Ecuador. Participants: Carlos Pirez Guartambel, who heads the movement of indigenous groups Ecuatorunari, along with Enrique Herrera, the director of the Observatory of Rights and Justice. Josi Miguel Vivanco, Americas director at Human Rights Watch, will provide an overview of the decrees implications for the rights to free speech and freedom of assembly. <http://www.thedialogue.org/page.cfm?pageID=425&eventID=371&invitee=a1160a46-ee22-404e-8c18-c8354fba3322>. Location: 1211 Connecticut Ave NW, Suite 510. Notes: This event will be in Spanish.

DUNCAN – PRESCHOOL STEM — 10 a.m. Secretary of Education Arne Duncan visits Brightwood Elementary School in Washington to learn how teachers are using the arts to teach preschool students about Science, Technology, Engineering and Math (STEM). The initiative is a partnership between the school and the Wolf Trap Institute for Early Learning through the Arts, a program of the Wolf Trap Foundation for the Performing Arts. Following a preschool classroom visit, Duncan will hold a roundtable with STEM and art teachers, local business and education leaders, and elected officials about the importance of early learning, particularly in STEM education, and highlight how the arts can be used to engage students in a fun, innovative and meaningful way. Location: Brightwood Elementary School, 1300 Nicholson St. NW. Contacts: press@ed.gov, 202-401-1576

CSIS – COUNTER-TERRORISM – HUMANITARIAN ACTION — 10 a.m. – 11:30 a.m. Impact of Donor Counter-Terrorism Measures on Principled Humanitarian Action. Introduction: Sam Worthington President & CEO,

InterAction. Panel Discussion: Valerie Amos, Under-Secretary-General for Humanitarian Affairs and Emergency Relief Coordinator, United Nations; Jan Egeland, Secretary General, Norwegian Refugee Council; Ambassador Daniel Fried, Coordinator of Sanctions Policy, US State Department; Ambassador William Garvelink, Senior Adviser, CSIS Project on US Leadership in Development and Former US Ambassador to the Democratic Republic of the Congo. Moderator: Daniel Runde, Director of the Project on Prosperity and Development and William A. Schreyer Chair in Global Analysis, CSIS. Location: C115 Conference Center. CSIS 1616 Rhode Island Ave. NW.

HAGEL – NEW ZEALAND DEFENSE MINISTER — 11:45 a.m. Secretary of Defense Chuck Hagel hosts an honor cordon to welcome New Zealand Minister of Defense Jonathan Coleman to the Pentagon. Location: Steps of the Pentagon River Entrance. Contacts: Press Desk, 702-697-5131 Notes: Journalists without a Pentagon building pass will be picked up at the Pentagon River Parking Pedestrian Bridge only. Plan to arrive no later than 30 minutes prior to the event; have proof of affiliation and two forms of photo identification. Please call 703-697-5131 for escort to the cordon.

CAP – SOFT-ON-CRIME ADS — 12 p.m. – 1:30 p.m. The Center for American Progress (CAP) hosts discussion on the Impact of 'Soft-on-Crime' Attack Ads and Campaign Spending on the Criminal Justice System. Welcome: Lori Lodes, Senior Vice President of Campaigns and Strategies, Center for American Progress Action Fund; Senior Vice President, Center for American Progress. Panelists: Louis Butler, former Wisconsin Supreme Court Justice; partner at Gonzalez, Saggio, & Harlan LLP; Oliver Diaz, former Mississippi Supreme Court Justice and attorney; Stephen Bright, President and Senior Counsel, Southern Center for Human Rights. Moderator: Billy Corriher, Associate Director of Research, Legal Progress. Contact Madeline Meth at mmeth@americanprogress.org or 202.741.6277. Location: Center for American Progress, 1333 H St. NW, 10th Floor.

NASA MARS MISSION BRIEFING — 2 p.m. NASA will host a news briefing to discuss the upcoming launch of the agency's next mission to Mars and the first devoted to understanding the upper atmosphere of the Red Planet. Participants: John Grunsfeld, associate administrator for the Science Mission Directorate, NASA Headquarters, Washington; Jim Green, director, Planetary Science Division, Headquarters; Lisa May, MAVEN program executive, Headquarters; Kelly Fast, MAVEN program scientist, Headquarters; Bruce Jakosky, MAVEN principal investigator, University of Colorado Boulder Laboratory for Atmospheric and Space Physics; David Mitchell, MAVEN project manager, NASA's Goddard Space Flight Center, Greenbelt, Md. Location: NASA Headquarters, 300 E St. SW. Contacts: Dwayne Brown dwayne.c.brown@nasa.gov (202-358-1726). Nancy Neal-Jones nancy.n.jones@nasa.gov (301-286-0039). Notes: Journalists unable to attend in person may ask questions from participating NASA locations, join by phone, or send questions via Twitter using the hashtag askNASA. To participate by phone, reporters must contact Steve Cole at stephen.e.cole@nasa.gov with their media affiliation by 1 p.m. Monday.

GW – TEHRAN LEADERSHIP — 4 p.m. – 6 p.m. New Leadership in Tehran: Time for Rapprochement? Ambassador John Limbert, former US Deputy Assistant Secretary of State for Iran; Dr. Shireen Hunter, Visiting Fellow, Center for Christian Muslim Understanding and Director, Carnegie Endowment Project on reformist Islam. RSVP: <http://bit.ly/GThrgi> For more information: Location: SMPA, Room B07, 805 21st St. NW.

CNAS – BUILDING BETTER GENERALS — 5:30 p.m. – 7:30 p.m. The Center for a New American Security for a discussion marking the release of a major new CNAS report, Building Better Generals. Speakers include: Brigadier General Paula Thomhill, USAF (Ret.), Director, Strategy and Doctrine Program (PAF), RAND; Lieutenant General David W. Bamo, USA (Ret.), CNAS Senior Advisor and Senior Fellow; Dr. Nora Bensahel, CNAS Deputy Director of Studies. Location: The Willard InterContinental Hotel's Crystal Room, 1401 Pennsylvania Avenue, N.W. Contacts: RSVP to (202) 457-9427

SAIS – HEALTH GAINS – AFGHANISTAN — 6:30 p.m. "Maintaining and Securing the Health Gains in Afghanistan Post-Transition and Election" Suraya Dalil, minister of public health of Afghanistan, will discuss this topic. Eileen O'Connor, senior director of communications and public diplomacy at the US Department of State. Location: Room 500, Bemstein-Offit Building, 1717 Massachusetts Ave. NW.

ALBRIGHT – US CHINA RELATIONS – LIVE EVENT — 7 p.m. Former Secretary of State Madeleine Albright will join audiences in 66 cities and towns by live broadcast for China Town Hall, a nationwide meeting and Q&A on

the US-China relationship conducted by the National Committee on US-China Relations. Contacts: Joseph Weed (212) 645-9677 ext 11 (jweed@ncuscr.org)

JACK KEMP FOUNDATION – JEB BUSH — 7:30 p.m. The 2013 Jack Kemp Foundation Leadership Award will recognize Governor Jeb Bush for his leadership in “advancing the American Idea”. Speakers: Speaker John Boehner (OH); Governor Jeb Bush (FL); Senator Dan Coats (IN); Lawrence Kudlow, CNBC; Senator Mike Lee (UT); House Budget Committee Chairman Paul Ryan (MN); Senator Tim Scott (SC). Location: The Mayflower Renaissance Hotel&8232;, 1127 Connecticut Ave. NW. Contacts: RSVP to Dan Ronayn (202) 288-1048.

Last Laughs:

LATE NIGHT POLITICAL HUMOR.

Jimmy Fallon: “This is just crazy. Another scandal with the National Security Agency, the NSA. They are at it again. More stuff keeps coming out. You know they have been accused of spying on Americans. Well, it just came out that they actually spied on 35 world leaders. Yeah. It was 34 prime ministers and Oprah.”

Jimmy Fallon: “Some more news out of Washington. All good news, of course. This time it is about the IRS. A new report found that 700 IRS employees owed a combined \$5.4 million in back taxes. When IRS workers got the news, they were like, ‘Oh, man, I hope I don’t find out about this.’”

Jimmy Fallon: “My man John McCain was in the news this week. He said that he’s seriously thinking about running for a sixth term in 2016. In addition to that, the other thing he’s seriously thinking about, stewed prunes.”

Jay Leno: “Here is some amazing technology. NASA has successfully tested a broadband communications system that’s built into the lunar atmosphere explorer probe. And it’s sending data to and from the moon at the rate of 622 megabytes per second. To the moon and back in a second. In a related story, the Obamacare website is still down. Yeah, we can’t get that going. But we’re getting to the moon and back.”

Jay Leno: “You know, I tried to log on to the Obamacare website today. I don’t think I’m doing it right. I lost \$300 playing Texas Hold ‘em. That’s not right.”

Jay Leno: “And Washington, D.C. police are now investigating a burglary at the home of Secretary of State John Kerry. Somebody broke into his house. I understand Kerry is giving a statement to police right now. He should be finished with his statement by Tuesday.”

SECRETARY JEWELL ANNOUNCES FEDERAL FUNDING TO RESTORE DYKE MARSH WILDLIFE

PRESERVE. The Mount Vernon Voice (10/30) reports that on Tuesday, Interior Secretary Sally Jewell, Sen. Tim Kaine, and Rep. Jim Moran were at Dyke Marsh Wildlife Preserve to announce "nearly \$25 million in federal funding to restore it from the ravages of man and nature over the past several decades." Jewell noted "that places like this don't create themselves." She also said that "containment cells will be constructed in the marsh which will stop erosion and be used to restore it to its 1940 size."

The [Mount Vernon \(VA\) Patch](#) (10/30, 238) reports that Jewell said, "We're investing \$25 million to restore more than 100 acres of marsh. This park will be able to connect youth and veterans with nature and that's great." Also, Sen. Tim Kaine said, "We all care passionately about the beauty of this community. Today is a good step forward. We have a lot of work to do and you have to involve the local community like Friends of Dyke Marsh." Rep. Jim Moran said, "The money [for this project] has been set aside, and this project is expensive. There was no sense in making plans before without the funds. It will take time to make plans, but we want to do this right."

Also providing coverage were [Politico](#) (10/30, Wong, 467K), the [Washington Examiner](#) (10/30, 319K), the [Mount Vernon \(VA\) Patch](#) (10/30, 238), the [Greater Alexandria \(VA\) Patch](#) (10/30), [WUSA-TV Washington](#) (10/30, 95K), [WUSA-TV Washington](#) (10/30, 95K), and [WAMU-FM Washington](#) (10/30, 36K).

Additional Coverage Of Hurricane Sandy. The [National Geographic](#) (10/30, 21.55M) reports that Hurricane Sandy "appears to have wrought positive changes in the landscape." According to the article, "amid the devastation caused by Sandy are a few places where the storm has improved wildlife habitat."

Additional coverage of Hurricane Sandy was provided by [Philly](#) (10/30, 1.22M), the [Norwalk \(CT\) Patch](#) (10/30, 1K), the [Huffington Post](#) (10/30, Clark, 11.54M), [Reuters](#) (10/29, Russ, Skinner), and [WJLA-TV Washington](#) (10/30, 118K).

PRESIDENT OBAMA TO NOMINATE INTERIOR OFFICIAL. In its "E2 Wire" blog, [The Hill](#) (10/30, Barron-lopez, Geman, 194K) reports that President Obama will nominate Rhea S. Suh to be the Interior Department's assistant secretary for fish and wildlife and parks. Interior Secretary Sally Jewell said in a statement, "Rhea's extensive experience and depth of knowledge of natural resource management make her an outstanding choice for this key position on our departmental leadership team." Jewell added, "She has guided the Department and our bureaus through increasingly austere budgets, helping find creative ways to continue to carry out our critical and diverse missions."

SPORTSMEN'S COALITION SEEKS MONUMENT STATUS OF BOULDER-WHITE CLOUDS. The [Boise \(ID\) Weekly](#) (10/29, 108K) reports that a sportsmen's coalition is calling for the creation a national monument in the Boulder-White Cloud Mountains in central Idaho. John Caywood, member of the Ada County Fish and Game League, said, "We've been waiting nearly a decade for Congress to preserve our hunting and fishing opportunities in the Boulder-White Clouds. But after years of broken stalemate politics in Washington, D.C., it's clear that our 'do nothing' Congress can't get the job done." The Sportsmen for Boulder-White Clouds has "posted a petition on its website, urging sportsmen to call on US Secretary of Interior Sally Jewel and US Secretary of Agriculture Tom Vilsack to create such a monument via the Antiquities Act."

Also reporting on the story is [KTVB-TV Boise, ID](#) (10/30, 87K).

BLUEWAY QUESTIONS REMAIN UNADDRESSED. The [Branson Tri-Lakes \(MO\) News](#) (10/30, 23K) reports that the National Blueway Program has "been put on hold in response to widespread opposition in Missouri," but the Interior Department has "yet to address legislators' questions about the program." The article notes that House Natural Resources Committee Chairman Doc Hastings has "made several requests for information on the program" to Interior Secretary Sally Jewell. Also, "Congressman Jason Smith (R), who is a member of the House Natural Resources Subcommittee on Water and Power, and Congressman Billy Long (R) held two oversight committee hearings in order to get answers from Interior personnel," but "no representatives from the Department of the Interior attended either meeting."

NEW RIVER GORGE NATIONAL RIVER GAUGE IN DANGER OF FUNDING CUTS. The [Charleston \(WV\) Daily Mail](#) (10/30, Gibb, 75K) reports that due to the federal budget sequestration, the NPS "was forced to slice and dice various services they provide, including full funding of the river gauge along the New River." Patricia Kicklighter, New River Gorge National River superintendent, said the NPS has "historically funded the river gauge along the New River but because of budget cuts, the service could not continue to fund the gauge 100 percent." The USGS can "authorize to pay up to 50 percent of the river gauges' operational costs as long as there are additional federal, state and local funding partners."

CITATIONS ISSUED DURING SHUTDOWN. The [Las Vegas Review-Journal](#) (10/30, 437K) reports that the BLM

issued five tickets during the government shutdown to people who entered the Red Rock Canyon National Conservation Area. Also, Lake Mead spokeswoman Christie Vanover said NPS rangers handed out 12 citations to hikers, cyclists, motorists and fishermen who violated the closure order at the 1.5 million acre recreation area east of Las Vegas.

ADDITIONAL COVERAGE: INTERIOR CIO SAYS AGENCIES NEED MORE AUTHORIZED CLOUD VENDORS.

Additional coverage of Interior Department's CIO, Bernie Mazer's comments that agencies need more authorized cloud vendors was provided by the Federal Times (10/28, 120K) and the Washington Business Journal (10/30, Subscription Publication, 119K).

OP-ED: SHUTDOWN SHOWS UTAH'S LAND GRAB IS MISGUIDED. In an op-ed for the Salt Lake (UT) Tribune (10/30, Metcalf, 343K), Peter Metcalf, CEO, president & co-founder of Black Diamond Inc., writes that "if we learn any lesson from this debacle of a government shutdown, I hope it's that national parks and other public lands are of greater daily benefit to Utahns than the rhetoric of the state Legislature's sagebrush rebels and our own members of Congress would ever acknowledge." He notes that "when the shutdown hit national parks, several Utah counties went so far as to declare a state of emergency, despite the fact that many of these county officials never miss an opportunity to criticize the parks when they're open." For this reason, Metcalf argues that "the state of Utah's ludicrous land grab must stop."

America's Great Outdoors:

National Park Service:

SEN. COBURN CALLS FOR HALT IN NEW DESIGNATIONS UNTIL MAINTENANCE BACKLOG IS ADDRESSED. The E&E Daily (10/29) reports that "Congress should place a moratorium on new national parks" until the NPS can "take care of the 401 parks it already manages," according to a new report by Sen. Tom Coburn that "calls the National Park System a 'microcosm' of fiscal waste in the federal budget." The report "blasts Congress and the Obama administration for designating frivolous park units, funneling hundreds of millions of dollars into 'non-park support bureaucracy,' and buying thousands of acres of new lands instead of addressing the Park Service's estimated \$11.5 billion maintenance backlog." Coburn argued that "the rush to designate new parks has stretched the agency's limited budget too thin and allowed its 'crown jewels' to fall into disrepair and neglect."

FOX News (10/29, 6.72M) reports that Coburn "doesn't blame" the NPS; "he blames Congress." Coburn said, "Congress continues to add things – 'parks' – that aren't significant in terms of national interest in a declining budget. What we have is our most treasured resources, the big parks, with maintenance backlogs in excess of \$2 billion."

According to the Cronkite News (10/30), the report said "Congress underfunded the park service's maintenance budget by \$256 million this year, even as it allocated \$57 million to acquire more land and spends \$255 million to \$529 million a year to acquire land through the Land and Water Conservation Fund." Coburn said "Congress should stop acquiring land and reallocate that money to parks like the Grand Canyon, which had a \$405 million maintenance backlog in 2012."

The Washington Times (10/30, Dinan, 417K) reports that Jeffrey Olson, "a parks spokesman, said they will review the report and that it's an important topic as they near the 100th anniversary of the National Park Service in 1916."

Also reporting on the story are the Washington Examiner (10/30, Ferrechio, 319K), the Detroit Free Press (10/30, Spangler, 794K), the Daily Caller (10/30, May, 422K), and KOTV-TV Tulsa, OK (10/30, 69K).

STUDY FINDS ROADWORK WON'T HARM ARCHES NATIONAL PARK. The Deseret (UT) News (10/30, 274K) reports that "a study has found that proposed roadwork will not significantly affect" Arches National Park. The NPS has "announced the Finding of No Significant Impact for the park-wide road maintenance and modification project in Arches National Park was signed by the acting Intermountain regional director on Oct. 18."

DENALI NATIONAL PARK EMPLOYEES PUZZLED BY DISCOVERY OF PET KILLING. The Anchorage (AK) Daily News (10/29, 198K) reports that "employees at Denali Park and Preserve on a geology outing last week made a grisly discovery as they drove the park road to check a massive landslide below Sable Pass." According to the article, "at a roadside pullout, the group found a large rodent, charred and apparently partially eaten, a crushed mouse, and the severed head of a baby python along with the remains of a campfire and several empty boxes from Petco, a chain pet store with a Fairbanks location." Park authorities are "still trying to figure out what happened – and why."

TAMPA MAYOR SAYS NATIONAL HISTORIC DESIGNATION SHOULDN'T SAVE BRO BOWL. The Tampa Bay (FL) Times (10/30, 78K) reports that Mayor Bob Buckhorn is disagreeing with the addition of Tampa's Bro Bowl skateboard park to the National Register of Historic Places. Buckhorn said, "It's not historical, and it's marginally significant." Moreover, "from the city's perspective, it's in the way" of plans to demolish "the Bro Bowl as part of a \$6 million makeover of Perry Harvey Sr. Park."

HISTORIC BENTON CHURCH ADDED TO NATIONAL REGISTER. The Corvallis (OR) Gazette-Times (10/30, 31K) reports that "the 130-year-old North Palestine Baptist Church is now on the National Register of Historic Places."

Bureau of Land Management:

NEVADA RANCHER TESTIFIES BEFORE HOUSE PUBLIC LANDS SUBCOMMITTEE. The Las Vegas Review-Journal (10/30, 437K) reports that Wayne Hage Jr., whose family has battled federal agencies for more than two decades over water and property rights for its Nevada ranch, appeared before the House public lands subcommittee to testify on Tuesday. Hage said, "The abuses were so great, I can tell you stories that would make the hair stand on the back of your neck. I'm probably going to get retribution for just even being here and talking to you about this."

GROUP URGES REMAND OF MONTANA MONUMENT RULING. The Fairfield Sun Times (10/29) reports that the Mountain States Legal Foundation "last week urged a Montana federal district court to remand a portion of its ruling for review" by the BLM. According to the article, "the filing follows after a ruling by a three-judge panel of the US Court of Appeals for the Ninth Circuit in favor of environmental groups that challenged federal management plans for a Montana national monument."

DEEP CREEK WILD AND SCENIC DESIGNATION APPROACHES NEXT STEP. The Glenwood Springs (CO) Post Independent (10/30, 27K) reports that "a process that began nearly 19 years ago to have Deep Creek in far eastern Garfield County designated as a Wild and Scenic waterway is nearing the end of a formal suitability analysis as part of the BLM's new Resource Management Plan." David Boyd, spokesman for the BLM's Northwest Colorado District, said, "We are conducting our suitability analysis for Wild and Scenic Rivers through our RMP. We anticipate the proposed plan/alternative will be released late this fall or early next year." Also, the White River National Forest is working with the BLM to "analyze eligible segments of Deep Creek as it passes through forest lands."

LOGGING ACTIVITY BEGINS SOUTH OF PARSHALL. The Sky-Hi Daily News (CO) (10/30, 728) reports that "hunters and other public land users could encounter logging activity and increased heavy truck traffic in the coming weeks" on BLM-administered lands "about 10 miles south of Parshall." According to the article, "loggers will be clearing beetle-killed lodgepole pine from BLM lands near Morgan Creek and Mule Creek off of Grand County Road 3, and Cow Creek near Grand County Road 34. All are in Big Game Management Unit 28."

PUBLIC INVITED TO BLM LAND HEALTH WORKSHOPS. The Deseret (UT) News (10/30, 274K) reports that BLM range specialists will "present a series of workshops/field trips of how science is used to monitor land health on BLM lands and Grand Staircase-Escalante National Monument and how the collected data helps ranchers and land managers make livestock management decisions." According to the article, "the workshops will explain long-term trend studies, study site selection and setup, how photo points are used, how data is collected and recorded, and plant identification." Richard Madril, assistant monument manager for resources, said, "You don't have to be a scientist, or a rancher, or a land manager to learn something from these workshops. Our range specialists are very excited about the work they do and are really looking forward to sharing what they've learned"

with the public.”

BLM EXTENDS COMMENT PERIOD ON KING RANGE BUSINESS PLAN. The [Redwood \(CA\) Times](#) (10/30, 57K) reports that the BLM “has extended the deadline to Oct. 31, 2013, for public comments on a business plan setting use limits and fees for recreation in the King Range National Conservation Area on northern California’s Lost Coast.” Lynda Roush, manager of the BLM’s Arcata Field Office, said, “We are extending the comment period to accommodate those who could not access the business plan while the BLM’s websites were offline during the government shutdown.”

Fish and Wildlife Service:

SPORTSMEN WELCOME PROPOSAL TO EXPAND HUNTING, ANGLING ON NATIONAL WILDLIFE REFUGES. The [AmmoLand](#) (10/30, 5K) reports that the Theodore Roosevelt Conservation Partnership is welcoming a proposal by the FWS to expand hunting and angling throughout the National Wildlife Refuge System. Under the proposal, which FWS Director Dan Ashe says represents “one of the largest expansions of hunting and fishing opportunities on wildlife refuges in recent years,” new hunting programs will be “initiated on six refuges, and existing hunting and angling programs will be expanded on another 20 refuges.” TRCP President and CEO Whit Fosburgh “commended the proposal, citing the economic powerhouse that is hunting, fishing and outdoor recreation in the United States.”

FWS SAYS WATERFOWL PRODUCTION AREAS WILL REMAIN OPEN. The [Lincoln \(NE\) Journal Star](#) (10/30, 220K) reports that the FWS has said Waterfowl Production Areas will remain open. The agency said that “due to the ongoing lapse in Congressional appropriations, the decision was made to close all facilities and lands to public use.” However, “it was determined that allowing public access to Waterfowl Production Areas (WPAs) will not incur further government expenditure or obligation,” and “therefore, effective immediately, all WPAs will reopen to public use.”

HAWAIIAN PLANTS AND ANIMALS GAIN ENDANGERED SPECIES ACT PROTECTION. The [E&E Daily](#) (10/29) reports that the FWS granted Endangered Species Act protections to 15 types of plants and animals native to Hawaii. The anchialine pool shrimp, the picture-wing fly, and 13 kinds of plants will be “considered endangered once the Fish and Wildlife Service’s rule, published today in the Federal Register, goes into effect next month.” The article notes that “the decisions on the fauna and flora come as part of a legal settlement with the Center for Biological Diversity to fast-track decisions on protections for hundreds of plants and animals in return for the group limiting future petitions and lawsuits.”

Also reporting on the story is [KHON-TV Honolulu](#) (10/30, 30K).

FWS TO HOLD PUBLIC MEETING ON GROTTO SCULPIN. The [Perry County \(MO\) Republic Monitor](#) (10/30, 14K) reports that “the public meeting that was supposed to be held this Tuesday via the US Fish and Wildlife Service is now slated for Nov. 20 in Perryville.” According to the article, “last week, Perryville City Administrator Brent Buerck told the Perryville Board of Aldermen that, because of the government shutdown, Fish and Wildlife had notified him that they would not hold a meeting, originally scheduled for this week.” FWS Biologist Shuana Marquardt said “she and other relevant agencies will be present at the public meeting to field questions from attendees about the recent listing of the grotto sculpin as endangered and the exclusion of critical habitat on Perry County land.”

ADDITIONAL COVERAGE OF GRAY WOLVES. Additional coverage of the proposal by the FWS to extend protections for Mexican gray wolves in New Mexico and Arizona was provided by [FOX News](#) (10/29, 6.72M).

ADDITIONAL COVERAGE OF BLACK RHINO HUNT AUCTION. Additional coverage of the planned auction of a permit to kill one rare black rhino in Namibia by the Dallas Safari Club was provided by the [Houston Chronicle](#) (10/28, Christian, 2.26M).

US Geological Survey:

SCIENTISTS FIND ASIAN CARP BREED IN GREAT LAKES. The [E&E Daily](#) (10/29) reports that invasive Asian

carp have successfully reproduced in the Great Lakes, according to an analysis by the USGS and Bowling Green State University. Researchers found that "four grass carp captured last year in Ohio's Sandusky River, which feeds into Lake Erie, had spent their entire lives there." The article notes that "the development worries officials, who are working to prevent the invasive species from entering the watershed."

Also reporting on the story is the [Christian Science Monitor](#) (10/29, Flesher, 540K).

Securing America's Energy Future:

Renewable Energy:

OPPONENTS OF OAKFIELD WIND FARM FILE LAWSUIT IN FEDERAL COURT. The [Bangor \(ME\) Daily News](#) (10/29, 166K) reports that opponents of a wind farm under construction in Oakfield have filed a lawsuit in US District Court to halt "the proposed installation of 50 mountaintop turbines and 59 miles of transmission lines." Protect Our Lakes and the Forest Ecology Network, "both nonprofit groups, and people who own camps in the area sued" the Interior Department and the US Army Corps of Engineers on Tuesday. The lawsuit argues that "the wind project, which was approved by Maine's Department of Environmental Protection, would endanger bald eagles and Atlantic salmon."

Also reporting on the story is the [Waterville \(ME\) Morning Sentinel](#) (10/30, 59K).

Onshore Energy Development:

ENVIRONMENTAL GROUPS ASK INTERIOR TO SLOW DOWN DRILLING IN SAGE GROUSE HABITAT. The [E&E Daily](#) (10/29) reports that "a coalition of environmental groups is asking the Interior Department to slow down planned oil and natural gas drilling activity inside prime greater sage grouse habitat in eastern Wyoming." WildEarth Guardians recently sent a formal petition to Interior Secretary Sally Jewell asking the department "to exercise its authority over subsurface mineral rights in the area and forbid new well pads and associated infrastructure such as roads inside a state-designated core sage grouse area until it has finalized resource plan amendments designed to protect grouse in the region." According to the article, "the 15-page petition – which was also sent to Neil Kornze, the Bureau of Land Management's principal deputy director – asks Interior to also incorporate new conditions of approval for wells in the area such as seasonal restrictions to prevent drilling activity during breeding and nesting season, March 15 through June 30."

Also reporting on the story is the [Casper \(WY\) Star-Tribune](#) (10/30, 90K). AP coverage was picked up by [Yahoo!](#) (10/30, Gruver, Press, 17.91M), the [Huffington Post](#) (10/29, 11.54M), the [Bloomberg BusinessWeek](#) (10/29, 4.93M), the [FuelFix](#) (10/29, 7K), the [Seymour \(IN\) Times Tribune](#) (10/30, 31K), the [Akron \(OH\) Beacon Journal](#) (10/30, 325K), the [Riverton \(WY\) Ranger](#) (10/30, 167), and the [Albany \(NY\) Times Union](#) (10/30, 674K).

TWO OKLAHOMA AGENCIES OBJECT TO PROPOSED ENERGY PRODUCTION RULES. The [Oklahoman](#) (10/30, 345K) reports that "two state agencies on Tuesday challenged proposed federal rules for jurisdiction and oil and gas production in Osage County." In the 11-page letter to the BIA, Oklahoma Attorney General Scott Pruitt "objected to language regarding water rights and said state regulators should have jurisdiction." Also, J.D. Strong, executive director for the Oklahoma Water Resources Board, "expressed a similar sentiment in his comments to the BIA this week."

Also reporting on the story is [KOTV-TV Tulsa, OK](#) (10/30, 69K).

ENVIRONMENTAL GROUP FIGHTING EXTENSION OF RALEIGH CO. MINING PERMIT. The [West Virginia Record \(WV\)](#) (10/30, 313) reports that a state environmental group is seeking an injunction against the Interior Department "over a rule that would prevent certain three-year-old mining permits from expiring." Coal River Mountain Watch filed a complaint against the Interior Department and the Office of Surface Mining Reclamation and Enforcement on Oct. 21 in US District Court for the Southern District of West Virginia. CRMW argues that "the rule violates the Administrative Procedure Act and the Surface Mining Control and Reclamation Act."

WSJOURNAL: FRACKING BEHIND CO2 EMISSIONS DROP. In an editorial, the Wall Street Journal (10/30,

Subscription Publication, 5.91M) notes that energy-related CO2 emissions fell 3.8% in 2012 to their lowest level since 1994. While a warm first quarter reduced the heating fuel use and Americans drove less, an EIA report said that the boom in natural-gas production seriously reduced the carbon intensity of electricity generation. The Journal says that the President should thank fracking for doing more to combat CO2 emissions than the Administrations regulations.

Offshore Energy Development:

REPORT RECOMMENDS MORE MONEY, BROADER MANDATE FOR UPCOMING SAFETY INSTITUTE. The E&E Daily (10/29) reports that "a forthcoming independent offshore safety research center needs to have its mandate broadened and funding significantly increased to augment the government's capabilities, a team of scientists and engineers recommends in a new report." The BSEE will soon announce which group or institution will host the Ocean Energy Safety Institute (OESI). However, "with initial proposed funding of just \$5 million over five years, the institute will find it difficult to retain highly skilled people to lead it, warn the authors of a report by the National Academy of Engineering and National Research Council."

Additional coverage was provided by the Rigzone (10/30, 12K).

BOEM SAYS SEISMIC DELAY WON'T PRECLUDE ATLANTIC OFFSHORE LEASE SALE. Platts (10/30, 2K) reports that "US officials expect to have sufficient information to decide whether to include an offshore Atlantic lease sale in the 2017-2022 five-year plan, even if fresh seismic data is not available," BOEM Director Tommy Beaudreau said Tuesday. According to Beaudreau, "a lease sale off Virginia or elsewhere in the Mid or South Atlantic could be included in the later years of the next leasing plan on the assumption that seismic companies would be able to complete new surveys by then." Beaudreau said in an interview, "We have a strategy for evaluating whether and, if so, under what configuration to have sales, but not all of that has to come together before you start scoping the next five year plan, which we're going to start in 2014."

DIVERS FIND BODY OF MISSING PLATFORM WORKER. The AP (10/30) reports that "divers have found the body of a missing oil platform worker at the bottom of the Gulf of Mexico, near the platform that sits in 100 feet of water about 55 miles offshore." The body, "recovered Tuesday, is believed to be that of 38-year-old Peter Voces, a Filipino welder who works for Houma-based Offshore Specialty Fabricators LLC." According to Petty Officer Carlos Vega, "Voces reportedly was knocked overboard when an empty 'tank barrel' fell on him Sunday evening on a rig south of Freshwater Bayou." Inspectors from the BSEE have "been on the scene since Monday and are investigating what caused the accident."

Also covering the story are WWL-TV New Orleans (10/30, 107K), KATC-TV Lafayette, LA (10/30, 16K), and the Houma (LA) Courier (10/29, 48K).

WOMAN PLEADS GUILTY TO FILING FALSE CLAIM FOR OIL SPILL RECOVERY MONEY. The E&E Daily (10/29) reports that a Mississippi woman has "pleaded guilty to filing a false claim for \$17,000 in oil spill recovery money." According to the article, Kim Marie Isabell "filed a claim in 2010 saying she had lost money from her job after the Deepwater Horizon explosion," and "an oil spill trust fund sent her a \$12,000 check in the mail and wired \$5,000 to her bank account." Isabell could "receive a sentence of up to 20 years in prison and a \$250,000 fine."

NEW SYSTEM FOR TRACKING INCIDENT DATA COULD MAKE OFFSHORE DRILLING SAFER. For Forbes (10/29, 6.03M), Loren Steffy writes that former Coast Guard Vice Admiral Brian Salerno recently took over as head of the BSEE, and "in his inaugural speech last week, Salerno indicated he favored strengthening requirements for collecting and analyzing data about offshore incidents." Specifically, BSEE is "leading the effort to track 'near-miss' incidents that could indicate bigger problems with an operator or a part of the drilling process" Steffy says that "the publicly available data on offshore incidents is at best scant and incomplete, and the new system for tracking incident data, begun under Salerno's predecessor, is long overdue."

Tackling America's Water Challenges:

BOR TO MAKE PRESENTATION AT IDAHO WATER SEMINAR. The Salem (OR) Capital Press (10/29, 113K) reports that "drought conditions during the 2013 growing season have spurred interest in the Idaho Water Users

Association's 30th Annual Fall Water Law and Resource Issues Seminar." The article notes that "the seminar will include a presentation" by a BOR official on "how recent changes to the agency's operating manual could impact water transfers and pricing."

BOR, KLAMATH PROJECT REFLECT ON WATER YEAR. The Oregon Public Broadcasting (10/30, 4K) reports that "thanks to the new biological opinion tying needs in Upper Klamath Lake for listed shortnose and Lost River suckers and the needs of threatened coho salmon in the Klamath River, Klamath Project irrigators had a baseline to work with and a security they haven't had for more than a decade." In the spring, the BOR "released its operations plan, based on the new joint biological opinion," and "it estimated project irrigators would have 290,000 acre feet of water available." The bureau "won't know if the winter is looking good until January or February."

Empowering Native American Communities:

INTERIOR RELEASES LAND VALUATION PLAN FOR BUY-BACK PROGRAM. The Native American Times (10/29, 337) reports that the Interior Department has released its revised Land Buy-Back Program Valuation Plan. The article notes that "the Appraisal Foundation (TAF), the nation's foremost authority on appraisal standards and qualifications, performed a comprehensive review of the draft Plan, which was revised to incorporate all of TAF's recommendations." Kevin Washburn, Assistant Secretary for Indian Affairs, said, "There is no greater authority for establishing standards for appraisals and qualifications for appraisers than The Appraisal Foundation. TAF's independent analysis confirms that the steps we are taking to determine fair market value for offers to landowners are cost-effective and conform to the best practices for valuation. We are grateful for their comprehensive review and have incorporated their recommendations into the Valuation Plan we will use in the months and years ahead as we work through a transparent process to provide fair market value to tribal landowners."

SEN. SCHUMER URGES BIA TO PROVIDE UPDATE ON CAYUGA NATION'S LAND-INTO-TRUST APPLICATION. The Auburn (NY) Citizen (10/30, 34K) reports that Sen. Chuck Schumer urged the BIA Tuesday to "meet with officials from Cayuga and Seneca counties to update them on the status of the Cayuga Indian Nation's land-into-trust application." Schumer said he contacted Assistant Secretary for Indian Affairs Kevin Washburn to request the meeting. According to Schumer, "local officials haven't been afforded the opportunity to share their views on the Cayugas' latest effort to place nearly 130 acres of land into trust."

ATTORNEY ARGUES GOVERNMENT DIDN'T PROVE SPIRIT LAKE MURDER CASE. The Forum of Fargo-Moorhead (ND) (10/30, 15K) reports that "the lawyer for a man convicted in the brutal killings of two children on the Spirit Lake Indian Reservation in North Dakota said his client should either be acquitted or granted a new trial." Defense attorney Christopher Lancaster on Monday "filed separate motions for Valentino 'Tino' Bagola, 22, who is awaiting sentencing on two counts of felony murder." Lancaster, a public defender, said that "the government did not prove its case and that Bagola's confession was coerced by FBI agents with several 'gotcha' moments."

TRIBES MAKE CASE FOR PUBLIC LANDS DURING HEARING. The Idaho Statesman (10/29, 205K) reports that "leaders of Native American tribes made a historical and cultural case Monday that they should be first in line if any of Idaho's 32 million acres of federal public lands are transferred to state control." According to the article, "tribal leaders were one of several interest groups that testified before the Legislature's Federal Lands Interim Committee meeting, which is studying the pros and cons of a resolution approved by lawmakers earlier this year demanding that the federal government cede most of the public land in Idaho to state control." The article notes that "leaders of three Idaho tribes voiced opposition to the proposal and said keeping those lands under federal ownership prevents any state effort to sell acreage for revenue or to companies seeking to extract resources."

ADDITIONAL COVERAGE OF PROPOSED KENOSHA CASINO PROJECT. Additional coverage of the proposed Kenosha casino project was provided by the Kenosha (WI) News (10/30, 64K) and the Green Bay (WI) Press-Gazette (10/29, 135K).

GILA RIVER INDIAN COMMUNITY WORKING TO CHANGE BIA'S LEASING REGULATIONS. In an op-ed for the Arizona Capitol Times (10/29, 599), Gregory Mendoza, the governor of the Gila River Indian Community, writes that the community continues to "work hard to change" the BIA's "leasing regulations that have stood in

the way of self-determination for Indian nations for decades." He argues that "the feds' 'one size fits all' set of rules and bureaucracy too often hamstring Indian tribes by failing to acknowledge our unique geographies and government structures."

Top National News:

AS MANY LOSE CURRENT HEALTH PLANS, OBAMA ACCUSED OF BREAKING PROMISE. The President's promise that consumers who like their current health insurance plan will be able to keep it is getting extensive media coverage amid reports that many Americans are receiving notices that their individual health insurance policies will be canceled because they do not comply with the ACA. All three network news broadcasts reported on the cancellations, and the issue is the subject of extensive print coverage this morning. Almost universally, reports cast the White House as on the defensive from criticism that the President has broken a major promise that he made repeatedly during the push to pass the healthcare law.

ABC World News (10/29, story 2, 2:00, Stephanopoulos, 7.43M) reported that the President is being "accused of breaking a key healthcare promise" as millions of Americans are "learning they will lose their current insurance coverage." ABC (Avila) added that for 14 million Americans, the President's promise that those who like their plan can keep it "may not be true." The President's opponents say his claim was a "big lie," but the White House says that the "underinsured will be better off with Obamacare."

NBC Nightly News (10/29, lead story, 3:15, Williams, 7.86M) reported in its lead story that "the assurances made by the President" are "drawing scrutiny." NBC (Myers) added that "so far almost two million of the 14 million Americans who buy individual coverage have gotten letters that their policy is canceled or has to change because of the law." Nonetheless, "the White House insists the President did not mislead Americans when he promised everyone could keep their insurance."

The CBS Evening News (10/29, story 2, 1:30, Garrett, 5.58M) reported that according to the White House, "consumers angered at having to switch their individual insurance policies after the President promised them they could keep them can find better alternatives and possibly cost-saving subsidies on the Federal healthcare website." In a separate story, the CBS Evening News (10/29, story 3, 0:30, Pelley, 5.58M) reported that "more than two million Americans are getting notices that they can no longer keep their policies, including 279,000 in California, Michigan, 140,000. Florida, 300,000. And in New Jersey, 800,000."

The Wall Street Journal (10/30, Martin, Weaver, Subscription Publication, 5.91M) reports that millions of individual policy holders are discovering that they must change coverage by the end of the year in order to comply with the ACA, and for many, the price will be higher – sometimes double their current premium.

The New York Times (10/29, Abelson, Subscription Publication, 9.61M) reports that coverage required under the ACA "is much more generous than many of the plans that had been sold to individuals, and insurers are now pricing these policies to account for many of the older and sicker people they once could turn away but must now cover." As a result, some consumers "may find a new policy less expensive than their previous one."

The Washington Times (10/30, Boyer, 417K) reports that the White House said Tuesday that President Obama "didn't mislead the public when he promised everyone could keep his or her plan under Obamacare." White House press secretary Jay Carney said that Obama "was making the promise only for people who held a policy when the law was enacted in 2010." Carney added that "those people are being 'grandfathered' under the law."

Under the headline, "White House Playing Defense On Obamacare," Politico (10/30, Brown, 467K) reports that the President's "soundbites are coming back to bite him," adding that Carney said that "only the 5 percent of Americans who buy insurance on the individual market are receiving letters from insurers warning of policy changes and premium hikes." However, "that 5 percent of the population — 15 million — is still a huge number of people potentially experiencing changes that Obama promised they wouldn't face."

The Hill (10/30, Easley, Sink, 194K) reports in its "Healthwatch" blog that the White House "struggled to defend President Obama's 2009 claim that people could keep their old health insurance under ObamaCare as thousands of people received notifications that their insurance companies were dropping their plans." Republicans are

accusing the President and his Administration "of misleading the public, and the controversy has become another difficult flashpoint on healthcare for the White House."

The Daily Caller (10/30, Munro, 422K) reports that the White House "strategy to explain why millions of Americans are losing their health insurance plans" is to "blame the insurance companies." Carney "rewrote President Barack Obama's much-repeated 'you can keep it' promise Tuesday afternoon, and began blaming health insurance companies for canceling millions of individuals' insurance plans." Carney said, "if you had a plan... and you liked it, and you've kept it, you can keep it forever as long as your insurer offers it."

USA Today (10/30, Madhani, 5.82M) reports that Republicans and the White House disagree about whether the President's "repeated vows over the past four years that insured Americans would be able to keep their current coverage if they wanted to under his health care overhaul were misleading." USA Today notes that since 2009, the President has "regularly suggested during his public pitches of the Affordable Care Act that those who have insurance shouldn't be worried about losing it," but on Tuesday Administration officials said that "it should be no surprise that a slice of the 5% of U.S. consumers who are on the individual insurance market would be forced to switch plans as a result of insurance providers dealing with meeting the minimum benefit requirement established under the law."

The Washington Post (10/29, A1, Sun, Somashekhar, 4.28M) reports in a front-page story that the controversy over the President's promises "is threatening to overshadow the messy launch of its Web site." Republicans "are insisting that the president misled the public about the effects of the law." The Post notes that if accusations that the President broke his promises "stick, they could ultimately be more damaging than the glitchy Web site."

Similarly, Reuters (10/30, Rampton) reports that the accusations that the President made a misleading promise could pose a greater threat than the website problems.

The Wall Street Journal (10/30, A1, Radnofsky, Martin, Subscription Publication, 5.91M) reports in a front page story that as thousands of Americans receive cancellation notices Republicans are criticizing the President for repeatedly promising that people who like their coverage can keep it and Democrats are saying that the President did not prepare them to respond to the latest accusations.

The Los Angeles Times (10/30, Hennessey, Parsons, 3.07M) reports that the President's promises "have come back to haunt the president and his allies less than a month into the launch of the online insurance marketplaces at the heart of his healthcare legislation." The Times adds that "for the first time since the Oct. 1 launch, criticism of the administration moved well beyond the website's technical troubles" as hundreds of thousands of people "have received notices that their policies will be canceled or amended — and their premiums on new policies could rise."

The New York Times (10/30, Weisman, Pear, Subscription Publication, 9.61M) reports that Republicans have "broadened their criticism" of the ACA from the website problems as the "rising concern about canceled health coverage has provided Republicans a more tangible line of attack on the law and its most appealing promise." The Times calls the cancellation notices "a political gift to Republicans, who were increasingly concerned that their narrowly focused criticism of the problem-plagued HealthCare.gov could lead to a dead end, once the website's issues are addressed."

Politico (10/30, Nather, 467K) lists among its "top takeaways" from a House Ways and Means Committee hearing at which Centers for Medicare and Medicaid Services Administrator Marilyn Tavenner testified, the fact that "canceled policies are the new broken website."

The AP (10/30, Alonso-Zaldivar, Ohlemacher) reports that while the Administration has been warned about the cancellations, "they could become another public relations debacle for President Barack Obama's signature legislation." In this case, the problem "goes to the credibility of one of the president's earliest promises about the health care overhaul: You can keep your plan if you like it."

The Daily Caller (10/30, Weinstein, 422K) reports that New York Magazine, which is "no bastion of conservatism," has posted a video (10/30, 6.83M) on its website highlighting the President's "lies." In the video, the President "is seen stating over and over again, with no caveats, that after his health-care law passes, those

who like their health-care plan will be able to keep it."

The Huffington Post (10/30, 11.54M) reports that White House officials are pushing back against an NBC News report which "said up to 75 percent of Americans who currently buy private health insurance will lose their plans under Obamacare." The segment, which aired Monday "said that the White House knew this as far back as 2010, even though President Obama had said that people can choose to keep their current plans." The Post cites Tweets by several White House officials criticizing the report and notes that NBC News correspondent Lisa Myers defended the report Tuesday on MSNBC's Morning Joe, "explaining that insurance plans that do not meet Obamacare standards by 2014 or that have been changed since 2010 will get canceled." Myers said, "When you add those two parts together, you get to more than 40 to 67 percent of folks in the private market who cannot keep their policies even if they want to and the administration knew that."

This morning's opinion pages are divided about the importance of the cancellation of individual insurance policies. On one side of the argument, an editorial in the Wall Street Journal (10/30, Subscription Publication, 5.91M) argues that the mass cancellation of individual insurance policies was the President's goal since 2008 because the choice of plans provided by the individual market is a threat to the ACA.

Similarly, in his column for the Wall Street Journal (10/30, Jenkins, Jr., Subscription Publication, 5.91M) Holman Jenkins writes that the ACA was intended to ensure that millions of Americans would lose the plans they like so that they would be forced to pay for coverage they do not want or need. Jenkins adds that the President wants consumers to pay for coverage they do not need so that he can use the money on someone else.

On the other side, an editorial in the Washington Post (10/30, 4.28M) defends the President arguing that while his claim "that Americans who liked their insurance plans would be able to keep them under health-care reform" is "not completely true," it is also not "evidence that the law is a failure." The Post notes that while some consumers "might pay more than they did before, they and many others will also get more." The Post adds that this is not "an outrage." Rather, it is "the predictable result of a defensible policy choice embedded in the reform."

In a column for the Los Angeles Times (10/30, Hiltzik, 3.07M) Michael Hiltzik portrays the ACA in a positive light, arguing that the cancellation of "nonconforming policies" is not news.

Hoyer: Democrats Knew Some People Would Lose Coverage. The Hill (10/30, Lillis, 194K) reports in its "Healthwatch" blog that House Minority Whip Steny Hoyer said Tuesday that Democrats "knew all along that some patients would lose their health insurance plans under the new law." Hoyer said that "Democrats were aware that such a shift was coming," and "defended the change by arguing that those patients would ultimately benefit by getting better insurance, many of them at a lower price than they currently pay." Asked if the President and Democrats "misled the public on the topic, Hoyer conceded the party's message could have been better articulated."

Christie Says White House Did Not Tell The Truth. Politico (10/30, Kopan, 467K) reports that New Jersey Gov. Chris Christie on Tuesday called on the White House "to explain why it didn't tell the truth on Obamacare when the president promised people could keep their health care plans." Christie said on "CBS This Morning," "The real problem is that people weren't told the truth. You can remember they were told that they would be able to keep their policies if they like them, and now you hear hundreds of thousands of people across the country being told they couldn't. ... So the White House needs to square that with what was told to the American people and told to Congress beforehand."

TAVENNER APOLOGIZES FOR HEALTHCARE.GOV PROBLEMS, BLAMES CONTRACTORS. Centers for Medicare and Medicaid Services Administrator Marilyn Tavenner testified before the House Ways and Means Committee on Tuesday, marking the first time an Administration official has answered lawmakers' questions about problems with Healthcare.gov. Tavenner's testimony was covered by all three network news broadcasts and was part of the lead story on two of the broadcasts. TV and print coverage almost universally focuses on Tavenner's apology for the problems with the site, but most of the reports also note that she blamed the problems on the contractors who built the site and on heavy traffic when it went live. Many stories also mention that despite repeated questions from members of the committee, Tavenner refused to say how many people have been able to enroll for coverage.

The CBS Evening News (10/29, lead story, 2:40, Pelley, 5.58M) reported in its lead story that Tavenner "apologized for all of the problems with the site" and "placed the blame on tardy contractors," but her apology "did not satisfy members of the House committee who were frustrated when Tavenner would not answer some of the key questions." CBS (Cordes) added that members of the committee repeatedly asked "how many Americans have managed to navigate this system and actually sign up for insurance," but Tavenner "wouldn't answer."

NBC Nightly News (10/29, lead story, 3:15, Williams, 7.86M) reported in its lead story that Tavenner apologized but "insisted to a somewhat incredulous audience that the system is working." ABC World News (10/29, story 2, 2:00, Stephanopoulos, 7.43M) mentioned Tavenner's testimony as part of a story on problems with the healthcare law.

In a separate story, the CBS Evening News (10/29, story 2, 1:30, Garrett, 5.58M) asked David Seamus, the top healthcare adviser to President Obama, "how it was decided to launch the healthcare website when the Administration knew it had failed some key early tests?" Seamus: "There wasn't— it's clear now there wasn't enough testing. And the bottom line is the President of the United States last week went out in front of the American people and said here's what we're going to do to fix it. The good news, is when it's up and running we'll have until March 31 to make sure that people are covered."

USA Today (10/30, Kennedy, 5.82M) reports that Tavenner said, "The experience on HealthCare.gov has been frustrating for many Americans. ... Some have had trouble creating accounts and logging in to the site, while others have received confusing error messages, or had to wait for slow page loads or forms that failed to respond in a timely fashion. The initial consumer experience of HealthCare.gov has not lived up to the expectations of the American people and is not acceptable."

Reuters (10/30, Morgan, Heavey) reports that Tavenner apologized but attributed problems with the site to contractors and heavy traffic.

Politico (10/30, Millman, Haberkorn, 467K) also reports that Tavenner apologized but notes that she "singled out CGI Federal as the only HealthCare.gov contractor that failed to meet expectations, saying it had 'some issues with timely delivery.'" Politico adds that Tavenner was "was spared some of the harshest criticism for the website mess," adding that Republicans "have reserved that for Health and Human Services Secretary Kathleen Sebelius, who will testify at a separate House panel Wednesday amid growing GOP calls for her resignation."

The Christian Science Monitor (10/30, Trumbull, 540K) reports that Tavenner apologized but "insisted that the website for enrolling in Obamacare is 'a system that's working.'" Republican Rep. Kevin Brady asked, "Why should the American people believe you now," noting that the Administration "has had four years to get ready to launch the exchanges, and didn't get it right." The Monitor notes that some Democrats echoed those concerns. Democratic Rep. Allyson Schwartz "called a working website for Obamacare a legal obligation, since the site is the central venue for people to enroll under rules set in the law."

The Los Angeles Times (10/30, Memoli, 3.07M) reports that while Tavenner apologized for the problems with the site, she "highlighted successes of the law," noting that 78 million Americans "have saved \$3.4 billion as insurance companies lowered rates to meet a requirement of the law...and millions more already have coverage because of it."

The Washington Post (10/29, Kliff, Branigin, 4.28M) also reports that Tavenner apologized and notes that in written testimony submitted to the committee in advance, Tavenner "pushed back against allegations that her agency mismanaged the project, suggesting that the difficulties with HealthCare.gov originated with some of the private contractors enlisted to work on the project." The Post adds that while Tavenner said that "700,000 applications for health insurance have been submitted so far, more than half of them in the federal marketplace," under questioning "she declined to say how many people have actually been able to enroll."

McClatchy (10/30, Pugh, 95K) reports that while Tavenner apologized for the website problems, she "said the setback 'took us by surprise.'" Tavenner said that the "inability of the Healthcare.gov website to establish individual user accounts and handle the initial volume of users shortly after open enrollment began on Oct. 1 'was not anticipated' and 'did not show up in testing.'" McClatchy also notes Tavenner's repeated refusal "to provide information about how many people have been able to sign up for coverage on the website, telling committee

members those numbers would be released in mid-November.”

The Daily Caller (10/30, Pappas, 422K) reports that Tavenner “repeatedly refused to say how many people have actually enrolled in the new Obamacare exchanges.”

The New York Times (10/30, Pear, Subscription Publication, 9.61M) also reports that Tavenner apologized for the problems people are having with the site but “repeatedly refused to say how many of those people had actually enrolled in health insurance plans since the federal and state marketplaces, or exchanges, opened on Oct. 1.” Noting that “at least 146,000 Michigan residents had recently received notices that their current insurance policies would be canceled because the coverage did not meet requirements of the new health care law,” Ways and Means Committee Chairman Dave Camp said that “based on what little information the administration has disclosed, it turns out that more people have received cancellation notices for their health care plans this month than have enrolled in the exchanges.”

The Wall Street Journal (10/30, Schatz, Subscription Publication, 5.91M) reports that lawmakers used Tuesday's hearing to air their differences about the ACA, noting that Republicans pointed out that people are being told their insurance policies are being canceled because they do not comply with the ACA despite promises from the President that they could keep their coverage if they liked it, while Democrats argued that Republicans do not want to work with them to fix problems with the law.

Glitches Could Drive Away Healthy Consumers, Restrict Access To Lower-Cost Coverage. The CBS Evening News (10/29, story 4, 2:05, Atkisson, 5.58M) reported in another story that analysts are concerned that “with the website problems, more of the enrollees will be the sickest and most motivated.” If that occurs, insurers would “have no choice but to raise premiums and that could cause more health customers to flee,” and “the Obamacare business model would collapse.”

Reuters (10/30, Krauskopf, Morgan) reports that thousands of people could be denied easy-access to lower-cost health insurance if the problems with Healthcare.gov are not resolved by November. Reuters notes that many consumers who purchase their own policies are set to lose their current coverage because it does not comply with the ACA. If the problems with the site are not fixed, these people could lose access to low-cost coverage, which could undermine the Administration's goal of making coverage widely available in 2014.

Sebelius Will Testify HHS Is “Working Hard” To Fix Problems. USA Today (10/30, Locker, Kennedy, 5.82M) reports that in testimony prepared for her Wednesday appearance before the House Energy and Commerce Committee, HHS Secretary Sebelius says that she “realizes the problems with the HealthCare.gov website and is working hard to fix them.” According to Sebelius' testimony, her Department “has updated the system with new code and help from experts inside and outside the government.”

The Hill (10/30, Easley, 194K) reports in its “Healthwatch” blog that Sebelius is “kicking back at the contractors who blamed her agency for the botched ObamaCare website rollout,” blaming “a ‘subset’ of contractors who ‘have not met expectations’ for the website's problems” in her opening statement. According to the testimony, Sebelius will say, “CMS has a track record of successfully overseeing the many contractors our programs depend on to function. ... Unfortunately, a subset of those contracts for HealthCare.gov have not met expectations.”

Roll Call (10/30, Fuller, Dennis, Subscription Publication, 87K) lists questions Sebelius can expect to be asked during her testimony. Among them: “Will you resign?”, “Will you admit that when the president said ‘if you have a health care plan you like, you can keep it,’ that was a lie?”, and “What is the administration going to do to keep its promise to Americans?”

First Lady's Friend Whose Company Designed Site Held Key White House Meetings. The Daily Caller (10/30, Howley, 422K) reports the First Lady's college friend, Toni Townes-Whitley, “whose company received the no-bid contract to build the failed Obamacare website met at the White House with the current acting commissioner of the IRS and with a special assistant to President Obama.” In addition to her Christmas visit to the White House in 2010, Townes-Whitley “also had four White House meetings in 2013, sitting down with top administration officials and a presidential assistant, according to White House visitor logs.”

Unions Not Rallying To President In Battle Over Web Site. Politico (10/30, Epstein, 467K) reports that the

President's "loyal allies" in the labor movement are not moving to aid the Administration in the "public battle over the problematic Obamacare website." Politico said that the unions are "put off by new reinsurance fees on group health care plans that affect union members." Unions are "largely" skipping the effort to enroll people or argue the White House's "public case that the mangled rollout of HealthCare.gov doesn't mean the entire Affordable Care Act is flawed."

BUSINESS LEADERS PUSH HOUSE GOP TO ACT ON IMMIGRATION. The New York Times (10/30, Parker, Subscription Publication, 9.61M) reports that on Tuesday, a "group of more than 600 leaders from roughly 40 states descended on the Capitol for meetings with nearly 150 Republican lawmakers." They are pressing House Republicans who they believe might be convinced to back a "broad immigration overhaul." US Chamber of Commerce's Randel K. Johnson said, "Our fly-in today is about moving votes on the Hill in support of reasonable immigration reform. I'm confident we're going to move the ball forward."

Politico (10/30, Kim, 467K) reports the group intends to "make the conservative case for immigration reform to lawmakers by bringing business experts, religious leaders and law enforcement officials to the Hill." While the group targeted some Democrats, the "overwhelming majority" of those visited are House Republicans. Among the groups represented are the American Conservative Union, whose head, Al Cardenas, said, "Failure to come up now with a solution to immigration reform is a sign of weakness, not of strength."

Reuters (10/30, Debenedetti, Sullivan) reports that the effort has attracted a wide variety of groups, including farmers and high-tech firms that say they can't find sufficient workers.

In his column for Politico (10/29, Simon, 467K), Roger Simon says that in "normal times," "sheer political expediency" would "motivate Republicans to back immigration reform as a way to attract Hispanic voters." Simon says that while the majority of Hispanic voters now vote Democratic, passing immigration reform would give the GOP the chance to compete for their votes. In addition, Simon says that the Senate legislation does not make illegal immigrants citizens immediately. Finally, the GOP "has a real opportunity to reach out to Hispanic voters and persuade them to vote Republican," as studies have shown that they are "susceptible" to voting Republican as they move up the social and economic ladder.

Pelosi Says Votes Are There To Pass Immigration Reform. The Washington Times (10/30, Klimas, 417K) reports that House Minority Leader Nancy Pelosi said on Tuesday that "there is a bipartisan majority in the House of Representatives ready to pass a comprehensive immigration overhaul bill," though she may "never get the chance to prove it" if Speaker Boehner doesn't bring it up for a vote.

Illinois To Begin Issuing Licenses To Illegal Immigrants. The Chicago Tribune (10/29, Garcia, 2.32M) reports that Illinois will begin issuing driving licenses to illegal immigrants in December, with "officials estimating that as many as 500,000 people could eventually apply for the special permits." The launch comes about a year after Gov. Pat Quinn (D) "signed a law creating the specialized license, officially known as the temporary visitor driver's license," which can't be used "as a form of identification for purposes such as boarding a plane, voting or buying a gun."

Editorial Wrap-Up:

NEW YORK TIMES. "Allies In Revolt." The New York Times (10/30, Subscription Publication, 9.61M), in an editorial, lays out its perception of the dynamics facing the US in the Middle East. In looking at relations with Israel, Saudi Arabia, and Turkey, the Times says that Obama "he has been absolutely right in refusing to be goaded into a war in Syria or bullied into squandering a rare, if remote, chance to negotiate an Iranian nuclear deal." The Times does, however, wish Obama "had put more emphasis on Egypt and Iraq." In all, the Times thinks that Obama's Middle East "priorities make sense."

"Putting More Controls On Painkillers." In an editorial, the New York Times (10/30, Subscription Publication, 9.61M) hails the FDA's "important step" last week to "curb an epidemic of overdose deaths from misuse of prescription painkillers that contain hydrocodone" and another painkiller. The FDA is planning to change those drugs from Schedule III to the more restricted Schedule II. However, the Times faults the FDA for exempting drugs that contain only hydrocodone.

"A Mixed Decision On The Texas Abortion Law." The New York Times (10/30, Board, Subscription Publication, 9.61M) editorializes that the high court "should affirm the Oklahoma court's decision that prohibiting women and their doctors from using the latest forms of medication abortion is unacceptable."

"Japan's Illiberal Secrecy Law." In an editorial, the New York Times (10/30, Subscription Publication, 9.61M) says that the Japanese government is about to enact a secrecy law that "will give all government ministries the right to classify information related to defense, diplomacy, counterintelligence and counterterrorism as a state secret." The Times argues that the law "will undermine the people's right to know" because "there is no guideline as to what constitutes a secret," which means "the government could well designate any inconvenient information secret."

WASHINGTON POST. "Those Lost Health Plans." An editorial in the Washington Post (10/30, 4.28M) defends the President arguing that while his claim "that Americans who liked their insurance plans would be able to keep them under health-care reform" is "not completely true," it is also not "evidence that the law is a failure." The Post notes that while some consumers "might pay more than they did before, they and many others will also get more." The Post adds that this is not "an outrage." Rather, it is "the predictable result of a defensible policy choice embedded in the reform."

"NSA Spying Unbounded." In an editorial, the Washington Post (10/30, 4.28M) says that it is "painfully clear that the damage from the revelation" of the tap of German Chancellor Angela Merkel "is considerable." The Post says that there shouldn't be a "witch hunt" at the NSA, the "dismantlement of vital collection operations in European countries or a surrender to the demands of European politicians," but "it should lead to the establishment of greater political control and accountability for sensitive foreign operations, starting with the president."

"Tough Choices In Fairfax."

WALL STREET JOURNAL. "The ObamaCare Awakening." An editorial in the Wall Street Journal (10/30, Subscription Publication, 5.91M) argues that the mass cancellation of individual insurance policies was the President's goal since 2008 because the choice of plans provided by the individual market is a threat to the ACA.

"Natural Decarbonation." In an editorial, the Wall Street Journal (10/30, Subscription Publication, 5.91M) notes that energy-related CO2 emissions fell 3.8% in 2012 to their lowest level since 1994. While a warm first quarter reduced the heating fuel use and Americans drove less, an EIA report said that the boom in natural-gas production seriously reduced the carbon intensity of electricity generation. The Journal says that the President should thank fracking for doing more to combat CO2 emissions than the Administrations regulations.

"Redistributing Charity." In an editorial, the Wall Street Journal (10/30, Subscription Publication, 5.91M) criticizes New York Attorney General Eric Schneiderman for reaching an agreement with four charities to have them direct \$10 million toward Hurricane Sandy recovery efforts. The Journal says that it is likely that the move by the charities was not voluntary, and argues that Schneiderman is forcing them to give to his politically-preferred causes for publicity purchases.

DOI in the News:

SENATE CONFIRMATION OF PRESIDENT OBAMA'S SELECTION FOR INTERIOR DEPUTY SECRETARY IS HELD UP. The E&E Daily (10/30) reports that "Senate confirmation of President Obama's pick for Interior deputy secretary is on hold after Sen. Lindsey Graham (R-S.C.) yesterday vowed to block every nominee until survivors of the Benghazi terrorist attack and FBI transcripts are made available to Congress." The article notes that "Graham's blanket hold came weeks after the Senate Energy and Natural Resources Committee by voice vote advanced the nomination of Michael Connor for the Interior post." According to the article, "barring unanimous

consent, the Senate would have to confirm Connor by regular procedures that could take days.”

President Obama Makes Picks For Interior Posts. The [E&E Daily](#) (10/30) reports that President Obama is expected to nominate BOEM Director Tommy Beaudreau to become the Interior Department’s assistant secretary for policy, management and budget. Beaudreau would replace Rhea Suh, the current assistant secretary, who has been “nominated to become assistant secretary for fish and wildlife and parks.” according to the article, “while many expected Beaudreau to eventually be nominated to the land and minerals post, that position is expected to go to Janice Schneider, an environmental attorney and former Interior official during the Clinton administration.”

The [E&E Daily](#) (10/30) reports that Suh would “inherit tough policy decisions involving FWS’ implementation of the Endangered Species Act and balancing the promotion of renewable energy with the preservation of birds and other protected species.” Suh would also oversee an NPS “struggling to rein in an \$11.5 billion deferred maintenance backlog while balancing the protection and promotion of America’s treasured lands.” in a statement, Interior Secretary Sally Jewell said, “Rhea’s extensive experience and depth of knowledge of natural resource management make her an outstanding choice for this key position on our departmental leadership team. She has guided the department and our bureaus through increasingly austere budgets, helping find creative ways to continue to carry out our critical and diverse missions.”

The [FuelFix](#) (10/30, 7K) reports that Beaudreau has “earned praise from both the oil industry and environmental activists during his tenure heading the ocean energy bureau — a role that put him at the forefront of decisions on Arctic drilling and what coastal waters should be leased for energy development.” For instance, “one oil company lobbyist described him as an ‘honest broker’ who listens to industry’s concerns, even though decisions may ultimately swing another way.” Also, “others noted that Beaudreau would bring his offshore energy experience to the policy management and budget office, which has a decisive role assembling the Interior Department’s spending plan.”

Also reporting on the story are the [Washington Post](#) (10/31, 4.28M), the “In The Loop” blog of the [Washington Post](#) (10/30, 4.28M), the “E2 Wire” blog of [The Hill](#) (10/31, 194K), the “E2 Wire” blog of [The Hill](#) (10/31, 194K), and [Politico](#) (10/31, Guillen, 467K).

INTERIOR AIMS TO FIGHT FLOODS AND FIRE BY RESTORING A SWAMP. The [E&E Daily](#) (10/30) reports that “hoping to rein in both carbon-releasing peat fires and post-hurricane floods,” the Interior Department is “betting \$3.13 million on 15 small dams in a Virginia wildlife refuge.” According to officials, “these structures will help restore a natural water balance to the Great Dismal Swamp Wildlife Refuge in Virginia and North Carolina, undermined since the 1700s when farmers and loggers started to build ditches and drain the area.” By “better controlling the water running through the 150-mile ditch network that now crisscrosses the refuge,” the FWS “hopes to both mitigate regional weather disasters and adapt to the future impacts of climate change.” The article notes that the “effort is one of 45 Interior projects that received a total of \$162 million last week for post-Superstorm Sandy research and restoration efforts.”

SECRETARY JEWELL TO ATTEND GETTYSBURG CEREMONY. In its “House Divided” blog, the [Washington Post](#) (10/31, Wheeler, 4.28M) reports that President Obama will not be attending the Dedication Day Ceremony on Nov. 19 at the Gettysburg cemetery. Gettysburg National Military Park spokeswoman Katie Lawhon said that Interior Secretary Sally Jewell will represent the administration.

The [York \(PA\) Dispatch](#) (10/31, 50K) reports that Jewell will “share the keynote speaker role with Pulitzer Prize-winning historian James McPherson.”

Also reporting on the story are the [York \(PA\) Daily Record](#) (10/31, 204K) and [WHTM-TV](#) Harrisburg, PA (10/31, 74K).

SECRETARY JEWELL TO SPEAK ABOUT SHUTDOWN OF NATIONAL PARKS. [C-SPAN](#) (10/31, 12K) reports that Interior Secretary Sally Jewell will “speak about the impact of the government shutdown on the national parks when she appears at today’s National Press Club luncheon.” Jewell will also “focus on the economic value of the parks and other resource-rich public lands.”

SECRETARY JEWELL ANNOUNCES FEDERAL FUNDING TO RESTORE DYKE MARSH WILDLIFE PRESERVE.

WAMU-FM Washington (10/30, 36K) reports that Interior Secretary Sally Jewel announced a rescue package to restore the Dyke Marsh Wildlife Preserve to 1937 boundaries. In announcing the \$25 million appropriation, Jewell, said, "Places like this don't create themselves. They are created by the wisdom and foresight of elected officials that set them aside."

AMERICAN SAMOA COMPLAINS ABOUT FISHERY DEALS WITH ALLIES. The Radio New Zealand (10/31, 1K) reports that Lolo Matalasi Moliga, the Governor of American Samoa, says "the fishery treaties between United States and its allies is hurting the territory." He said he is "bringing the issue to the attention" of Interior Department officer Eileen Sobeck.

CONSERVATIONIST INSPIRED BY WOMEN ON FRONTLINES FIGHTING FOR WILDERNESS. In an essay which is "part of a series in which dozens of women will reveal what women they most admire" for Politico (10/31, Beinecke, 467K), Frances Beinecke, president of the Natural Resources Defense Council, recognizes Interior Secretary Sally Jewell as an example of "many women have come to the fore" on environmental initiatives. As a result, "women entering the environmental community today have many role models to emulate." Beinecke is "proud to say the Natural Resources Defense Council has played a role in this shift: We have hired talented young women since we opened our doors, and many now lead our programs and campaigns."

OFFICIALS URGED TO PROTECT MORE PUBLIC LANDS. In an op-ed for Politico (10/31, Podesta, 467K), John Podesta, chair of the Center for American Progress, notes that due to the federal government shutdown, "communities near parks lost an estimated total of \$76 million in economic activity." He argues that "of the many lessons our leaders ought to learn from the shutdown, this one is central: America's parks are a national treasure and a crucial economic engine for many parts of the country." Podesta urges elected leaders to "take swift action to open new parks, wildlife refuges, monuments, and recreation and wilderness areas for the enjoyment of the public, instead of slashing budgets, laying off rangers and closing parks."

America's Great Outdoors:

National Park Service:

THEODORE ROOSEVELT NATIONAL PARK SUPERINTENDENT NAYLOR HONORED. The E&E Daily (10/30) reports Theodore Roosevelt National Park Superintendent Valerie Naylor was "honored this week" by the National Parks Conservation Association for "her work to protect the park from encroaching oil shale development and for a controversial elk management plan that has proved a success." NPCA this week awarded Naylor the Stephen T. Mather Award, named after the NPS' first superintendent and bestowed annually on an agency employee who has "shown steadfast leadership and persistent dedication to our national parks." Craig Obey, NPCA's senior vice president for government affairs, who presented the award to Naylor at a ceremony, said, "With great devotion, Valerie has demonstrated unwavering dedication to protecting our national treasures for future generations, in the most difficult of circumstances."

For the "Congress Blog" of The Hill (10/31, 194K), Roger Di Silvestro, a historian and author, writes that "a burgeoning oil industry threatens the integrity of the 218-acre Elkhorn site, which now lies within Theodore Roosevelt National Park, one of North Dakota's biggest tourist attractions." He notes that "similar troubles loom over other parks and wildlife refuges abutting lands controlled by federal agencies that emphasize development or multiple uses ranging from hiking to mining and logging." However, Di Silvestro argues that "developing our resources doesn't require the destruction of wild and historic areas." He proposes that "we can strike a more pragmatic balance between development and other treasured uses of public lands."

NPS CONDUCTS GETTYSBURG BATTLEFIELD BURN. The Hanover (PA) Evening Sun (10/31, 38K) reports that NPS fire specialists "burned several acres of the Gettysburg National Military Park Wednesday to test new ways of maintaining the condition of the Civil War-era battlefield, according to a park news release." According to a release from Katie Lawhon, park management assistant, "the prescribed fire started after noon on Snyder farm, in the southern portion of the battlefield, and was funded by the National Park Service Wildland Fire Management Program."

Also reporting on the story is the [York \(PA\) Daily Record](#) (10/31, 204K).

ADDITIONAL COVERAGE OF SEN. COBURN'S REPORT. Additional coverage of Sen. Tom Coburn's report on the maintenance backlog at national parks was provided by [CBS News](#) (10/31, 3.87M), [FOX News](#) (10/30, 6.72M), the [Detroit Free Press](#) (10/31, Spangler, 794K), and the [Arizona Capitol Times](#) (10/30, 599).

REPUBLICANS CRITICIZED FOR SHUTDOWN. For the [OpEdNews](#) (10/31, 2K), Jim Hightower criticizes Republicans for the shutdown, as well as "the spectacle of a House committee hauling in the director of national parks to berate him mercilessly for five hours, demanding to know why the parks were closed." Hightower commends NPS Director Jon Jarvis for being patient in his testimony.

COURT APPLAUDED FOR REJECTING DRAKES BAY OYSTER COMPANY'S PRIVATIZATION EFFORTS. For "The Blog" of the [Huffington Post](#) (10/31, Grieco, 11.54M), Helen Grieco, Organizer, California Common Cause, writes that the decision last month by the 9th Circuit Court of Appeals upholding the Interior Department's decision to protect Drakes Estero in Point Reyes National Seashore "supports the Interior Department's efforts to protect the sensitive marine habitat from the Drakes Bay Oyster Company's ongoing operations that damage the natural environment, pollute National Seashore beaches with plastic debris, and negatively impact wildlife such as birds and harbor seals." She also notes that "the court also put to rest the company's attacks on peer-reviewed scientific research that concluded Drakes Bay's ongoing operations were harming the environment."

Bureau of Land Management:

HOUSE PANEL HEARS FROM RANCHERS. The [E&E Daily](#) (10/30) reports that "federal agencies have trampled on the rights of property owners who lack the legal and financial muscle to fight back, a witness panel told House lawmakers yesterday." According to the article, "whether the witnesses' stories reflect systemic government abuse or isolated policy disputes was a matter of partisan debate at the Natural Resources Subcommittee on Public Lands and Environmental Regulation." The article notes that much of the debate "revolved around BLM's implementation of the Federal Land Policy and Management Act, which requires a tricky balance between the protection and development of natural resources on behalf of all Americans."

BLM PROPOSING PLAN TO PROTECT SAGE GROUSE IN THE WEST. The [Salt Lake \(UT\) Tribune](#) (10/31, 343K) reports that the BLM on Friday will "release a proposed plan to protect greater sage grouse on 4 million acres of federal land and subsurface mineral areas in Utah." According to the article, "among the many conservation measures envisioned, the plan would prohibit drilling within 4 miles of leks, the places where the chicken-sized bird stages its late-winter mating rituals." The bureau "wants to amend land-use plans for several BLM resource areas that harbor habitat for the West's signature native bird, as well as for six national forests."

REPORT CRITICIZES POOR CONTRACTING PRACTICES AT BLM. The [Fierce Government](#) (10/31, 224) reports that "a government employee who stepped into a contractor's role is among the targets of a report criticizing contracting practices" at the BLM. The Interior Department office of inspector general said "in a recently released report, dated Sept. 30, that a BLM project officer placed a request to modify a contract, 'in effect, representing the contractor.'" The audit stemmed from the OIG's "prior discovery that BLM had made payments for costs that exceeded the amount agreed to in a contract and also for costs that the contractor incurred outside the period of performance."

CARLSBAD SCHOOL DISTRICT EYES BLM LAND FOR NEW CAMPUSES. The [Carlsbad \(NM\) Current-Argus](#) (10/31, 18K) reports that Carlsbad Municipal School officials are eyeing 80 acres of BLM "land as a possible location for its newest schools." The district is "proposing to build a new elementary school just north of Callaway Drive." Tessa Cisneros, real estate specialist for the BLM, said "the application must be approved by the agency's headquarters in Washington D.C."

BLM PLANS BURN PROJECTS IN LASSEN, MODOC COUNTIES. The [Lassen County \(CA\) Times](#) (10/31, 577) reports that fire crews from the BLM will "conduct several prescribed burning projects in Lassen and Modoc counties during fall and early winter." According to the article, "Alturas Field Office crews plan to begin a juniper thinning and burning project in the Hayden Hill area, about 50 miles north of Susanville, today, Wednesday, Oct. 30." The article notes that "the burns, designed to improve habitat for sage grouse, will be conducted within a

500-acre project area.”

Fish and Wildlife Service:

FWS ANNOUNCES URBAN WILDLIFE REFUGE INITIATIVE. The [Southeast Green](#) (10/31) reports that the FWS has announced a multi-faceted Urban Wildlife Refuge Initiative to “make its programs reflect the diverse perspectives, values and cultures of America.” FWS Director Dan Ashe said that the initiative will “provide economic benefits to hundreds of communities as new generations of city dwellers learn wildlife-dependent recreation, such as birding, fishing, hunting, hiking, canoeing and so much more. Too many Americans have grown up without a real connection to wildlife. This initiative gives us the chance to change that.”

The [New Haven \(CT\) Register](#) (10/30, 217K) reports that “the urban oases project in the New Haven Harbor Watershed was recognized Wednesday” as one of FWS’s “eight pilot partnerships across the nation aimed at connecting cities with nature.” Ashe said, “While a lot of our work is oriented towards big, open spaces, if people don’t care about wildlife, we won’t have the support that we need. So these urban partnerships are critical for us if, in the future, we’re going to have citizens that care about wild places that might be far, the places that are near in are what’s going to bring it home to them.”

DETROIT RIVER INTERNATIONAL WILDLIFE REFUGE TO CELEBRATE GROUNDBREAKING. The [Southgate \(MI\) News Herald](#) (10/30, 101K) reports that “a groundbreaking ceremony and open house for the Visitor Center at the Detroit River International Wildlife Refuge have been rescheduled for Nov. 8.” The article notes that “the government shutdown caused the cancellation of a groundbreaking ceremony earlier this month.” According to the article, “a number of dignitaries are expected at the groundbreaking ceremony that follows,” including FWS Director Dan Ashe and Rep. John Dingell.

XCEL SEEKS RIGHT-OF-WAY EXPANSION THROUGH REFUGE.. The [Madison \(WI\) Capital Times](#) (10/31, 143K) reports that Xcel Energy is “seeking to increase its right of way through the Upper Mississippi River refuge by about 9 percent to accommodate a high-voltage transmission line.” The expansion, “which will take about 1.6 acres of floodplain forest near Alma, Wis., is necessary to accommodate a couple of requests” the FWS “made to protect birds in the refuge,” according to Mary Stefanski, Winona district refuge manager. According to an FWS determination, the expansion will “create additional forest fragmentation, which is undesirable but preferable to higher towers or vertically configured wires.”

FWS AND FRESHWATER LAND TRUST REMOVING DAM. [WVTM-TV](#) Birmingham, AL (10/31, 2K) reports that the FWS and the Freshwater Land Trust are “preparing to remove a dam on Turkey Creek in order to improve the habitat for a native fish.” The two agencies are “working on a project to remove a dam, reconstruct a bank and replant native vegetation on the creek in order to allow the vermilion darter its entire natural range.”

BLACK-FOOTED FERRETS RELEASED UNDER ENDANGERED SPECIES DEALS. The [Denver Post](#) (10/31, Finley, 949K) reports that thirty black-footed ferrets were released Wednesday, potentially launching a new approach to rescuing endangered species — and introducing a natural predator of prairie dogs. The article notes that Colorado law prohibits any state role introducing endangered species without legislative approval, but the state law was relaxed this year to let ferrets be released on private land under new “safe-harbor” deals with the FWS.

FWS SEEKS INFORMATION ON KILLING OF ENDANGERED DEER. The [Clark County \(WA\) Columbian](#) (10/30, 116K) reports that the FWS is “seeking information about the shooting of an endangered deer near Kalama.” According to the article, “a Columbian white-tailed deer was found dead of a gunshot wound on Oct. 3.” The FWS noted that “this is the first shooting of an endangered species in the area.”

FWS PROPOSES PROTECTION FOR SAGE GROUSE. The [Inyo \(CA\) Register](#) (10/31, 18K) reports that the FWS has “proposed to list the bi-state sage grouse as a threatened species.” However, “some Eastern Sierra residents are questioning the science used to justify the listing, saying declining numbers are due to natural events as much as human sources.”

WILDLIFE CENTER OF VIRGINIA TO RELEASE PEREGRINE FALCON AT RAPPAHANNOCK RIVER VALLEY

REFUGE. The Washington Post (10/30, Press, 4.28M) reports that the Wildlife Center of Virginia will release a peregrine falcon at Rappahannock River Valley National Wildlife Refuge on Wednesday.

OKLAHOMA HUNTER PLEADS GUILTY TO ILLEGALLY KILLING WILDLIFE OUT OF STATE. KOTV-TV Tulsa, OK (10/31, 69K) reports that Oklahoma hunter Kyle McCormack has "pleaded guilty to illegally killing wildlife in another state and bringing it back to Oklahoma." The article notes that "several agencies worked together on this case including the Oklahoma Department of Wildlife" and the FWS

Also reporting on the story is KWTV-TV. Oklahoma City (10/31, 60K)

ADDITIONAL COVERAGE OF ADDITION OF HAWAII CREATURES AND PLANTS TO ENDANGERED SPECIES LIST. Additional coverage of the addition of 15 Hawaii creatures and plants to the endangered species was provided by the Washington Post (10/30, Press, 4.28M) and ABC News (10/31, 671K).

ADDITIONAL COVERAGE OF FWS APPROVAL OF CONSERVATION PLAN FOR LESSER PRAIRIE CHICKEN. Additional coverage of the approval by the FWS of a conservation plan for the lesser prairie chicken was provided by the Texas Tribune (10/24, 11K).

ADDITIONAL COVERAGE OF BLACK RHINO HUNT AUCTION. Additional coverage of the planned auction of a permit to kill one rare black rhino in Namibia by the Dallas Safari Club was provided by FOX News (10/31, 6.72M) and the Denver Post (10/31, Graczyk, 949K).

Securing America's Energy Future:

Renewable Energy:

INTERIOR COMMENDED FOR STEPS TO PROMOTE SOLAR, WIND ON PUBLIC LANDS. For "The Blog" of the Huffington Post (10/31, Morgan, 11.54M), Ann Morgan, Executive director, National Wildlife Federation regional office in Boulder, CO, writes that "America's Western public lands are home to some of the best hunting, fishing and wildlife habitat in the world," but "these same lands, however, also provide some of the best wind and solar resources our county has to offer." Morgan says that "the steps the Department of the Interior has taken to preserve valuable fish and wildlife habitat as it plans for this increased renewable energy development should be commended." Morgan concludes that "through smart planning, we can avoid the mistakes of the past energy production, including poorly planned oil and gas development, and safeguard our prized public lands while guaranteeing our hunting, fishing and outdoor heritage for generations to come."

Onshore Energy Development:

BLM SCRAPS NEW MEXICO MINE LEASE. The E&E Daily (10/30) reports that the BLM is "scrapping its decision to lease more than 600 acres of land to Peabody Energy Corp. for coal mining in New Mexico." The article notes that WildEarth Guardians, "an environmental group active in fighting coal leases around the country, appealed BLM's decision to the Interior Board of Land Appeals (IBLA) in August." However, "in a surprise move, instead of standing by its decision, based on an environmental assessment (EA) and finding of no significant impact (FONSI), BLM this month agreed with the need for more study," and "yesterday IBLA judges agreed with sending the case back to BLM."

TRIBES ATTEND MEETING ON OIL ROYALITIES. The Prairie Business (10/31, 55K) reports that Fort Berthold American Indian mineral owners "gave input Tuesday to federal government officials on a new proposal for how their oil royalties are calculated." According to the article, "much of the meeting, at New Town Civic Center, was spent explaining the pricing system, while mineral owners also steered the discussion toward other issues they have with their leases." ONRR representatives touted the proposal as "a win for American Indian mineral owners."

Offshore Energy Development:

COMPANY FINED FOR OFFSHORE RIG VIOLATIONS. The Tulsa (OK) World (10/31, 271K) reports that

contract driller Helmerich & Payne Inc. announced Wednesday "it will pay \$6.4 million in fines and other costs as part of a plea bargain with federal prosecutors over testing irregularities at a Gulf of Mexico offshore platform rig more than three years ago." Company subsidiary Helmerich & Payne International Drilling Co. "agreed to plead guilty to one misdemeanor count of knowingly making and delivering false writings in the federal eastern district of Louisiana." The company will "pay a criminal penalty of \$5.4 million, as well as a \$1 million organizational community service payment to the National Academy of Sciences." Both Helmerich & Payne and the BOEMRE "conducted probes about the alleged violations."

EXPERT SAYS BP BEHAVED APPROPRIATELY IN EFFORT TO STOP MACONDO WELL. The New Orleans Times-Picayune (10/31, Waller, 700K) reports that Iain Adams, managing director of the Norwell drilling company, testified regarding "efforts at pinching off the billowing Macondo well in the Gulf of Mexico in 2010," saying that BP "behaved appropriately."

Tackling America's Water Challenges:

MANASTASH CREEK PIPELINE AND OTHER WATER PROJECTS PRAISED. The Ellensburg (WA) Daily Record (10/31, 16K) reports that Washington Gov. Jay Inslee "signed his name on a 30-inch diameter water pipeline Tuesday, a ceremonial gesture celebrating the first on-the-ground project of a long-term plan to stabilize water supplies in the Yakima River basin, improve fish habitat and conserve upper basin ecosystems."

Meanwhile, the Salem (OR) Capital Press (10/30, 113K) reports that Tom Iseman, Interior Department deputy assistant secretary for water and science, was "accompanied by officials of other federal agencies who toured reservoirs involved in the plan and discussed future funding." Iseman said, "We recognize this doesn't come easy and appreciate the balanced approach, broad stakeholder support and community investment." He added that "the plan is a model and aligns with the Interior secretary's priorities of protecting wildlife and water."

RED RIVER WATER SUPPLY PROJECT MOVES AHEAD WITHOUT FEDERAL SUPPORT. The Forum of Fargo-Moorhead (ND) (10/31, 15K) reports that "with hope for federal support all but dried up, supporters of the Red River Valley Water Supply Project met with Gov. Jack Dalrymple here Wednesday to talk about ways to advance the project through state and local efforts." The article notes that "the preferred alternative would use the McClusky Canal and a 123-mile buried pipeline to carry the water to Lake Ashtabula." The option, "estimated to cost \$660 million, received a positive environmental review in 2007," but the BOR has "failed to issue a decision of record, which would clear the way for Congress to authorize and fund the project."

COULEE DAM STILL NEGOTIATING FOR BOR CONTRACT. The Star of Grand Coulee (WA) (10/30, 169) reports that "officials in the town of Coulee Dam are hopeful that they will be able" to reach a deal with the BOR on a law enforcement contract. Mayor Quincy Snow, Police Chief Pat Collins and Councilmember Bob Poch met last Wednesday with the BOR's regional director, Lori Lee, "to make another attempt to land a contract." According to Collins, "another meeting is scheduled for later this week and that 'negotiations continue.'"

HOUSE PASSES PRINEVILLE WATER BILL. The Oregon Public Broadcasting (10/31, 4K) reports that "for the second time in more than a year, the House has passed a bill that would make more water available for the city of Prineville." Oregon Rep. Greg Walden's bill had to be "reintroduced after a version in the Senate died in committee." But "this time around, supporters are optimistic the bill won't suffer the same fate," because "the place where the bill died, the Senate Energy and Natural Resources Committee has a new chairman — Oregon Sen. Ron Wyden."

BOR LOWERING BLACK CANYON DIVERSION DAM. The Emmett (ID) Messenger-Index (10/31, 22K) reports that the BOR is "lowering Black Canyon Reservoir about 13 feet to perform routine maintenance at the facility located on the Payette River about 5 miles northeast of Emmett." The bureau began "drawing down the reservoir Thursday, Oct. 24, and will continue lowering it about six inches a day until Nov. 19, when it will be at an elevation safe enough for work crews to clean the trash racks of debris."

Empowering Native American Communities:

SENATE COMMITTEE ON INDIAN AFFAIRS HEARS THREE FEDERAL RECOGNITION BILLS. The Indian

Country Today Media Network (10/30, 21K) reports that Sen. Maria Cantwell, chairwoman of the Senate Committee on Indian Affairs, will “chair a business meeting followed by a legislative hearing on three bills for federal recognition for tribes in Virginia, North Carolina, and Montana.” The Thomasina E. Jordan Indian Tribes of Virginia Federal Recognition Act (S. 1074), introduced by Senators Tim Kaine (D-VA) and Mark Warner (D-VA), “would extend federal recognition to six Virginia Tribes: the Chickahominy Indian Tribe, the Chickahominy Indian Tribe – Eastern Division, the Upper Mattaponi Tribe, the Rappahannock Tribe, the Monacan Indian Nation and the Nansemond Indian Tribe.” In North Carolina, Sens. Richard Burr (R-NC) and Kay Hagan (D-NC) have introduced The Lumbee Recognition Act (S. 1132) that “would extend federal recognition to the Lumbee Tribe of North Carolina and authorize the taking of land into trust for the tribe by the Secretary of the Interior.” Finally, the Little Shell Tribe of Chippewa Indians of Montana are seeking federal recognition through a bill introduced by Senators Jon Tester (D-MT) and Max Baucus (D-MT).

The Great Falls (MT) Tribune (10/30, 90K) reports that speaking at a hearing before the Senate Indian Affairs Committee, Kevin Washburn, assistant secretary for Indian Affairs, said that the Obama Administration “supports legislation from Montana’s senators that would grant federal recognition to Montana’s Little Shell Tribe of Chippewa Indians.” Washburn argued that “Congress does have the right to do so, and should’ approve legislation to federally recognize the Little Shell tribe.”

Also reporting on the story is the Fayetteville (NC) Observer (10/31, 141K).

SENATORS OPPOSE CASINO PROPOSAL. The Medford (OR) Mail Tribune (10/30, 67K) reports that Sens. Ron Wyden and Jeff Merkley have “opposed the Coquille Indian Tribe’s proposal to build a casino in Medford.” In an Oct. 21 letter written to Kevin Washburn, assistant secretary of Indian Affairs, the two Democratic senators from Oregon said “they agree with the opposition already voiced by Gov. John Kitzhaber, the Jackson County commissioners and the city of Medford.” Wyden and Merkley “say the type of video gambling that would be offered at the proposed Medford facility is comparable to the gambling offered at other casinos throughout the state that have existed under a so-called one-tribe, one-casino agreement.”

NORTH CAROLINA SENATE LEADERS ARGUE AGAINST CATAWBA CASINO. The Raleigh (NC) News & Observer (10/30, 475K) reports that the legal battle over the Catawba Indian Nation’s plans to build a casino resort in North Carolina is “escalating.” North Carolina Senate leaders sent a letter earlier this month to the BIA that “argues the South Carolina-based tribe’s application to put lands in Cleveland County in a federal trust — the first step toward opening a casino — is unlawful.” President Pro Tem Phil Berger, Rules Chairman Tom Apodaca, Sen. Jim Davis, all Republicans, and Democratic leader Martin Nesbitt are “asking the federal government to deny the application, saying it would ‘set a new and dangerous precedent.’”

BIA APPROVES TRUST STATUS FOR LAND OWNED BY LUMMI NATION. The Bellingham (WA) Herald (10/30, 113K) reports that “in a move that has potential implications for the future growth of both Bellingham and Ferndale,” the BIA has “approved trust land status for 80 acres of property at Slater Road and Interstate 5 that is owned by Lummi Nation.” According to the article, “in the past, the site has been widely viewed as a likely location for retail development,” but “in a Tuesday, Oct. 29, interview, Lummi Indian Business Council Chairman Tim Ballew said the tribe has no immediate plans for it.”

MASSACHUSETTS LAWMAKERS APPROVE REVISED GAMING COMPACT. The Cape Cod (MA) Times (10/30, 92K) reports that “the revised gaming compact reached between Gov. Deval Patrick and the Mashpee Wampanoag Tribe cleared a legislative hurdle Wednesday, as the House approved the agreement that could steer millions of dollars from the proposed Taunton casino’s profits into state coffers.” According to the article, “Cape and Islands legislators unanimously joined in the 116-38 vote to ratify the compact, which would take effect only if the tribe wins federal approval to take land in a Bristol County office park into trust and construct Project First Light, a proposed \$500 million resort casino off Route 140.”

Top National News:

OBAMA DEFENDS ACA AT BOSTON RALLY. The Administration defended the Affordable Care Act on two fronts Wednesday, with the President in Boston for a rally in support of the law before a friendly audience, and HHS Secretary Sebelius facing questions about problems with the roll-out of HealthCare.gov before the House

Energy and Commerce Committee. There is more coverage of the Sebelius event, mostly critical, while coverage of the President's appearance at Faneuil Hall is more measured, but still somewhat negative overall. While reports do note the President's highlighting of the parts of the law that are working, most choose to focus on Obama's explanation of why some Americans are seeing their previous health insurance policies canceled despite his frequent assurances that those who like their plans would be able to keep them.

Another common theme is the President's adoption of a bipartisan tone, with his references to then-Gov. Mitt Romney's 2006 signing of a Massachusetts health plan on which the ACA was largely modeled, as well as on early ACA successes in states like Arkansas and Kentucky, which went heavily Republican in the 2012 presidential election.

The CBS Evening News (10/30, story 2, 0:40, Pelley, 5.58M) reported, "The President has said often that people that like their insurance would be able to keep it. But now that millions are seeing their plans canceled because those plans don't meet the standards of Obamacare, the President said this today by way of explanation." The President was shown saying: "If you had one of these substandard plans before the Affordable Care Act became law and you really like that plan, you are able to keep it. But ever since the law was passed if insurers decided to downgrade or cancel the substandard plan what we said under the law is, you got to replace them with quality comprehensive coverage."

The Boston Globe (10/31, A1, Viser, 1.75M) says the President "gave a vociferous defense of his health care law on Wednesday in Boston, returning to the intellectual birthplace of the legislation." Obama said, "Yes, this is hard. The healthcare system's a big system, and it's complicated. If it was hard doing it just in one state, it's hard doing it in 50 states. ... We have to keep moving forward – just like you did in Massachusetts." The Globe says the President "spoke in the same room" where then-Gov. Mitt Romney "signed the state's groundbreaking law" in 2006. Obama said, "Mitt Romney and I ran a long and spirited campaign against one another. But I always believed that when he was governor here in Massachusetts he did the right thing on healthcare."

The Boston Herald (10/31, Stout, 643K) says the President "said he's 'not happy' with the problems that have plagued the roll-out of the Affordable Care Act's online marketplace, adding 'there's no excuse for it.'" But the President highlighted Kentucky and Arkansas, pointing out that he lost both states in 2012, "as examples of early success stories before turning his focus toward Republicans critical of the law's roll-out." Obama said, "If they put enough energy into making this law work as they do in attacking the law, Americans would be better off."

The New York Times (10/31, A1, Shear, Subscription Publication, 9.61M) says the President "for the first time admitted that some people who have had what he called 'substandard' insurance plans may have to choose another one." But USA Today (10/31, Jackson, 5.82M) reports Obama "said people who have had their insurance canceled had 'cut-rate' policies that did not provide adequate coverage when people got sick," and that the law "requires certain types of coverage and ends discrimination that has led to higher costs and cancellations for women and people with pre-existing medical conditions."

The Wall Street Journal (10/31, A1, Nelson, Nicholas, Subscription Publication, 5.91M) reports Obama said Republicans and other critics of the law are being disingenuous by highlighting the policy cancellations without noting the reasons why. The Washington Post (10/31, Rucker, Branigin, 4.28M) reports the President said "if people receive notification from their insurer that their plan is being canceled, 'just shop around in the new marketplace.'" The Hill (10/31, Sink, 194K) says the President "downgraded his longstanding promise that people can keep their healthcare policies if they like them and said instead that 'the vast majority' could."

Politico (10/31, Epstein, 467K) says "while struggling to explain why he hadn't misled in saying that Americans who liked their plans could keep them, Obama played defense on a second front, voicing continued frustration with HealthCare.gov." He said, "The website is too slow, too many people have gotten stuck and I'm not happy about it. ... And I take full responsibility for making sure it gets fixed ASAP." The Daily Caller (10/31, Munro, 422K) says the President "declined to take responsibility" for the "crippled" website, but "announced that he would take responsibility for fixing it."

Karen Tumulty writes in the Washington Post (10/31, 4.28M) that the President's assertion that "if you like the health insurance you have, you can keep it" is "a catchy sound bite that has turned around to bite the hand that

fed it to the country,” and Obama’s “credibility has taken a hit” over it. Tumulty says “the damage comes not just from the fact that it does not happen to be true,” but also because it “attempted to gloss over the fact that choices and trade-offs” were part of healthcare reform. Politico (10/31, Allen, Brown, 467K) reports under the headline “Obamacare’s Split-Screen Day” that as the President defended the law, Sebelius faced a hostile congressional committee, and “the scenes in Washington and Boston on Wednesday could hardly have been more different: Sebelius weighted down by the hitches in the system as she testified before the House Energy and Commerce Committee, and Obama buoyed by a crowd packed with his supporters as he touted the benefits of the law.”

Reuters (10/31, Morgan) and AFP (10/31) also have reports.

Romney Responds To Obama’s Characterization Of Massachusetts Law. The Los Angeles Times (10/31, Parsons, 3.07M) says “in citing the Massachusetts health law, Obama is asking both for bipartisan cooperation and for patience with the troubled” launch of the healthcare marketplaces, but “Republicans are not inclined to give that leeway.” The AP (10/31, Pickler) says Romney “took issue with Obama’s characterization” of the Massachusetts law, saying in a statement, “Had President Obama actually learned the lessons of Massachusetts health care, millions of Americans would not lose the insurance they were promised they could keep, millions more would not see their premiums skyrocket and the installation of the program would not have been a frustrating embarrassment.”

The Washington Times (10/31, Wolfgang, 417K) says that “while there’s little doubt Obamacare is based in large part on the Massachusetts reform” Romney introduced, last year Romney “did offer dire warnings that now are coming true.” Romney said in a presidential debate last fall, “We didn’t also do something that I think a number of people across this country recognize, which is put people in a position where they’re going to lose the insurance they had and they wanted.”

Politico (10/31, Epstein, 467K) writes that the President “just can’t leave Mitt Romney alone.” He “has name-dropped his former rival at least a half-dozen times this year on economic and health care issues.” But there is “no more talk of Romney’s ‘47 percent’ quip, his multiple Cadillacs or car elevators. The 2013 Romney – according to Obama – is the archetype of a reasonable Republican.”

Anti-Pipeline Protesters Interrupt President Speech. Politico (10/31, Epstein, 467K) reports President Obama was interrupted by protesters opposed to the Keystone XL pipeline during his speech, but “took it all in stride.” The President said, “That is the wrong rally. We had the climate change rally back in the summer. This is the healthcare rally.”

“Body-Language Expert” Says Obama “Tentative” And “Embarrassed.” The Daily Caller (10/31, Howley, 422K) reports that “professional body-language expert” Lillian Glass said the “glitch-ridden Obamacare website roll-out has plunged” the President “into a personal anxiety never before seen during his presidency.” Glass said, “Basically, we’re seeing an Obama that we’ve never seen before. Body language-wise, he looks tentative. He looks down. We see an embarrassed Obama.”

Biden Apologizes For HealthCare.gov Issues. The Hill (10/31, Sink, 194K) reports Vice President Biden “apologized Wednesday for the botched roll-out of HealthCare.gov, calling the technical issues plaguing the website ‘inexcusable.’” During an interview with HLN, Biden “said President Obama personally ‘tried to get online’ to check out the website glitches, but said he personally had not because ‘it was clear that I wasn’t getting online.’”

ACA Roll-Out Woes, Other Issues Driving Down Obama’s Approval Rating. NBC Nightly News (10/30, story 3, 3:35, Williams, 7.86M) reported, “The problems with this roll-out of the President’s healthcare plan, as you might expect, are having a real political impact for this White House.” NBC (Todd) added, “President Obama, who has been battling various problems for months from Syria to the budget, NSA, and healthcare, it all adds up to the public losing confidence in his leadership.” While at the start of his second term in January, the President’s approval rating stood at 52% in the NBC/Wall Street Journal poll, in the latest survey, Obama “hit an all time low, 42% – getting close to George W. Bush territory.”

The Wall Street Journal (10/31, King, Prang, Subscription Publication, 5.91M) says the roll-out of the healthcare

law and the recent, and ongoing, budget battles are weighing hard on the President's numbers. Politico (10/31, Delreal, 467K) also reports on the poll, saying that the 51% disapproval rating is a new high for Obama.

More Commentary. The Wall Street Journal (10/31, Subscription Publication, 5.91M) criticizes President Obama's past assertion that Americans who like their current health plans will be able to keep those plans, writing that the Administration has been taking pains in the past few weeks to add caveats about what defines insurance and that only insurance plans that are acceptable under the Affordable Care Act would qualify for continuance.

The Christian Science Monitor (10/31, 540K) editorializes, "Critics are taking President Obama to task for allegedly not knowing beforehand about two startling revelations: US spying on top allies and a lack of preparation for the Oct. 1 roll-out of 'Obamacare.' To many, it is difficult to believe that a buck-stops-here chief executive didn't know of either one. ... If we take Obama at his word that he didn't know, then Americans might ask if any modern president will ever enter the Oval Office in the 21st century with enough leadership qualities to conduct the giant orchestra that is the federal bureaucracy."

In his column for the New York Times (10/31, Subscription Publication, 9.61M), Charles Blow writes that while the roll-out of the site "was a mess," and the President's promise "that people could keep their insurance if they liked it has turned out not to be true for many people," neither of these problems mean the Affordable Care Act "is destined to fail."

Gail Collins writes in her New York Times (10/31, Subscription Publication, 9.61M) column about the perils of a second-term presidency, writing that "lately, it really has seemed as if the Obama White House is incapable of producing good news beyond the fact that the debt ceiling wasn't smashed."

In his column for the Washington Post (10/31, 4.28M), Robert Samuelson argues that while the effects of the Affordable Care Act's deterrents to job creation are "probably less than the ACA's most rabid opponents assert" they are "more than the law's uncritical apologists assume."

In his Washington Post (10/31, 4.28M) column, Matt Miller imagines a 1936 "Crossfire"-style debate between libertarian economist Friedrich Hayek and socialist author Upton Sinclair as "Americans begin signing up for FDR's new 'Social Security' program," with Sinclair arguing that "two dozen countries already have systems of social insurance on the books," and "that morality, not to mention the survival instincts of the ruling class, requires a decent society to offer something...to protect against destitution in old age," while Hayek saying such "taxing and spending will put us on the road to serfdom."

In his Wall Street Journal (10/31, Subscription Publication, 5.91M) column, Karl Rove argues that it strains credulity to believe that neither President Obama nor Sebelius was aware that some Americans would not be able to keep their current insurance plans, and that the President repeatedly said something he must have known to not be true.

Daniel Henninger writes in his Wall Street Journal (10/31, Subscription Publication, 5.91M) column that the problems with the launch of the ACA are another failure of the progressive vision of government of the Obama presidency, writing that throughout Obama's presidency, economic growth has been slow, job creation has lagged, and more Americans have moved onto food stamps, which Henninger links together as indicators of a general failure of the President's governing philosophy.

In the Los Angeles Times (10/31, 3.07M), Cathleen Decker writes that "as he tried to reframe the national discussion" over healthcare, the President "uttered an outright fib: 'This debate has never been about right or left,' he said. ... Oh, yes, it has. And is. ... But in trying to re-argue the case for a program passed several years ago – and not sold well in the interim – Obama faces an intractable question: Is anyone listening?"

In a piece for Politico (10/31, Lowry, 467K) National Review editor Rich Lowry that while the call for "a cease-fire over Obamacare" is a "common liberal theme," it is "a little late to get or expect any Republican buy-in" because that "would have required serious compromise back in 2009, when Democrats, at the high tide of their power in the Obama era, saw no reason to make any." Lowry argues that the President "got his law" and if "more people will be uninsured in 2014 than if it had never passed," it is "on him, no matter how much he and his supporters

want to evade responsibility for their own achievement.”

Jonathan Cohn writes on the New Republic (10/31, 195K) website, “Republicans are outraged that some Americans must give up their current insurance plans because they don’t satisfy Obamacare’s new regulations for benefits and pricing. ... Obama should have said ‘most’ people, not ‘all’ people. Readers can decide for themselves whether, by the standards of politics, that’s a felony or misdemeanor.”

SEBELIUS TAKES RESPONSIBILITY FOR WEBSITE PROBLEMS DURING HEATED HOUSE HEARING. HHS Secretary Sebelius’ appearance before the House Energy and Commerce Committee Wednesday led two of the three broadcast network newscasts – ABC opened with a report on severe weather – and is covered by every major national newspaper. While the coverage is critical, portraying Sebelius as on the defensive against hostile Republican questioning, the GOP also takes some hits for pressing Sebelius even after she took full responsibility for the problems with HealthCare.gov. But it is Sebelius who is called “hapless” and frustrated under a barrage of questions.

The CBS Evening News (10/30, lead story, 3:30, Pelley, 5.58M) reported, “This was the day that Republicans were waiting for,” as they got the chance to “grill” Sebelius about the “disastrous” website roll-out. Sebelius “acknowledged that the website has been, quote, ‘a debacle’...and that she is responsible.” Sebelius: “Let me say directly to these Americans: You deserve better. I apologize. I am accountable to you for fixing these problems.” Cordes: “That mea culpa didn’t satisfy Republicans” who wanted to know why no one “has been fired.” Rep. Marsha Blackburn (R-TN): “Who was in charge as it was being built? ...At that time who is the individual...” Sebelius: “[CMS Chief Operating Officer] Michelle Synder...” Blackburn: “Michelle Synder is the one responsible for this debacle?” Sebelius: “Well, excuse me, Congresswoman. Michelle Synder is not responsible for the debacle. Hold me accountable for the debacle. I’m responsible.”

NBC Nightly News (10/30, lead story, 3:05, Williams, 7.86M) reported Sebelius “said in effect the buck stops with her, but that may not be enough for everybody.” NBC (O’Donnell) added, “This was a day of aggressive questioning. ... As the cabinet secretary in charge of the problem-prone” website, Sebelius “drew a crush of media attention, and even a long line for spectators. ... Hammered by questions, Sebelius repeatedly took the blame for a roll-out she even labeled a debacle.”

ABC World News (10/30, story 2, 2:25, Stephanopoulos, 7.43M) reported that Sebelius “fielded tough questions from Congress, apologized for the launch she called a debacle, and at times lost her patience.” ABC (Avila) called it “official finger-pointing day on Capitol Hill, producing a ‘whatever’ moment from the woman in charge of Obamacare.” Rep. Gregg Harper (R-MS): “So you’re saying that the President is not responsible for HHS?” Sebelius: “Sir, I didn’t say that.” Harper: “It is the President’s ultimate responsibility, correct?” Sebelius: “Whatever. Yes, he is the President. He’s responsible.”

USA Today (10/31, Kennedy, Camia, 5.82M) reports that “as Republican calls for her resignation grow louder, Sebelius was subjected to sharp, partisan grilling from lawmakers who asked her about technology, website security, the law’s mandate that people obtain insurance,” and other issues. The hearing “grew testy at times and the look on Sebelius’ face was often one of frustration.”

The New York Times (10/31, Pear, Subscription Publication, 9.61M) says over “three and a half grueling hours of testimony,” Sebelius “gamely defended the problem-plagued roll-out,” but the fact that HealthCare.gov was down even during her testimony “undercut Ms. Sebelius’s statements that the federal online insurance marketplace was improving every day and would be fully functional and able to accommodate millions of users” within one month. The Times says in her testimony, Sebelius “came across as a hapless official, aloof from many operational decisions” about HealthCare.gov. The Christian Science Monitor (10/31, Feldmann, 540K) says “even as she insisted that the site’s problems are fixable, the optics could not have been worse: The site was down, yet again, due to technical difficulties (though not HHS’s fault).”

The Washington Post (10/31, Branigin, Somashekhar, 4.28M) says “new problems emerged” with Affordable Care Act implementation even as Sebelius “assured lawmakers that ‘miserably frustrating’ problems” with the website will soon be fixed. Sebelius said, “I am as frustrated and angry as anyone with the flawed launch of HealthCare.gov.”

The Wall Street Journal (10/31, Schatz, Radnofsky, Subscription Publication, 5.91M) reports that when asked how many people have signed up for insurance via the ACA healthcare exchanges so far, Sebelius said she did not have the data, but given the launch problems, "it will be a very small number."

Politico (10/31, Nather, 467K) writes that "even an experienced politician" like Sebelius "can only do so much damage control when the damage is this bad." She "shielded" the President "from blame for the failures" and took responsibility, but she "still pointed fingers" by saying CMS Administrator Marilyn Tavenner "made the critical decision to turn off a website feature that would have let people browse health insurance plans before creating an account," which has been blamed for creating "serious bottlenecks" on the website. Sebelius "also tossed the hot potato back to the website contractors."

The Huffington Post (10/31, Bendery, 11.54M) reports Blackburn also "pressed Sebelius to explain why some people are being terminated from their individual health insurance plans" when the President "promised during the Obamacare roll-out" that people would be able to keep their plans if they so chose. Sebelius "tried to explain that insurance companies have the right to cancel individual insurance policies as they please." The Hill (10/31, Easley, 194K) reports Sebelius said, "If a person had a policy in place in March 2010, liked that plan, and the insurance company made no changes to disadvantage the consumer, those policies are in place, you keep your plan if you like it, and that goes on."

The Daily Caller (10/31, Levinson, 422K) reports Sebelius "showed her frustration under questioning...when she was caught on an open microphone, muttering, 'don't do this to me'" after Rep. Billy Long (R-MO) "peppered her with questions."

Sebelius Says She Is Not Eligible To Use Healthcare Exchange. The Washington Times (10/31, Howell, 417K) reports Sebelius "rejected calls from Republicans" to enroll in a marketplace plan, "saying she is happy with the coverage she gets as a federal employee." Sebelius said that since she has employer-sponsored coverage, she is not "eligible to enter the exchange." In a "fact check" piece, the AP (10/31, Woodward) writes that the reason why Sebelius does not get coverage from an exchange "is straightforward enough: She can't."

Krauthammer Says Sebelius Delivered "Pathetic, Horrible, Mortifying Performance." The Daily Caller (10/31, Poor, 422K) reports conservative commentator Charles Krauthammer "slammed" Sebelius' testimony as "pathetic" in a radio interview. He said, "It was a pathetic, horrible, mortifying performance. She wasn't holding a lot of cards. ... She said what she to and it certainly didn't help them in any way."

Obama Said To Have Little Incentive To Want Sebelius To Step Down. Susan Page writes in USA Today (10/31, Page, 5.82M) that "whether she is responsible or not, there is little chance" President Obama "would demand or even desire Sebelius' exit from the hot seat," since "having an aide who has become a lightning rod during a controversy in fact can be a useful division of duties." New York University political scientist Paul Light said, "We have no tradition in this country of holding Cabinet members accountable for lower-level or even high-level failures. If Napolitano could not be fired over the Christmas Day bombing plot and Chu couldn't be fired over Solyndra and Holder has survived over several meltdowns at Justice, including Fast and Furious, why would Sebelius be fired for what appears to be a blended failure between the contractors and her department?"

More Commentary. Dana Milbank writes in his Washington Post (10/31, 4.28M) column that for Sebelius to accept responsibility "was a sneaky and dastardly thing for her to do: sneaky, because it wasn't in the advance testimony she gave the committee, and dastardly, because in today's Washington, any acceptance of responsibility is so rare that the Republicans – who were counting on her evading and deflecting – were caught off-guard."

FOOD STAMPS PROGRAM TO BE CUT THIS FRIDAY. Reuters (10/31, Abbott, Baertlein) reports that a \$5 billion reduction in the Supplemental Nutrition Assistance Program will take effect on November 1, noting that it will be the first ever broad cut in the program. The cut will affect about 48 million recipients. The cut is the result of a temporary increase adopted as part of 2009's stimulus package expiring. The reduction is expected to have only a small effect on the national economy.

Editorial Wrap-Up:

NEW YORK TIMES. "Endless War, Endless Suffering." The New York Times (10/31, Subscription Publication, 9.61M) in an editorial reviews the suffering of "innocent civilians" in Syria's civil war, noting yesterday's announcement of the country's first polio outbreak in 14 years. The Times also says that the response to a UN call for aid is "disgraceful" particularly criticizing China and Russia for their small contributions. While the Times says that ending the war would be the best thing, "the next best" would be to provide "generously" for the needs of civilians suffering from the war

"Scott Stringer For New York City Comptroller." The New York Times (10/31, Board, Subscription Publication, 9.61M) in an editorial on the race for New York City comptroller endorses the Democratic candidate Scott Stringer as better qualified, though it says the Republican John Burnett has "a strong private-sector résumé" and his "emergence is good news for New York's Republican Party."

"Alabama Surrenders." In an editorial, the New York Times (10/31, Board, Subscription Publication, 9.61M) hails Alabama's agreement to discard major parts of its "unjust immigration law," which is "the most extreme attempt by any state to harass and expel immigrants." The Times calls this "a huge setback" for the strategy of forcing "immigrants to 'self-deport' by making their lives unbearable." The Times goes on to criticize House Republicans for continuing on this "dead-end road" with this "self-destructive strategy."

WASHINGTON POST. "Diminished Expectations." The Washington Post (10/31, 4.28M), in an editorial about congressional budget negotiations, asks "what role, if any, higher revenues should play in the deal-making." The Post says that while over the longer term tax increases and entitlement reforms will be necessary, for the present "revenue is not indispensable." It praises the President's position "that revenue is not a deal-breaker" as "sensible" given that the Republicans have a "very real political advantage" in being "more willing to accept" the automatic spending cuts that would otherwise kick in.

"Unfairly Trimming A Court." The Washington Post (10/31, Board, 4.28M) editorializes in favor of President Obama's nomination of Patricia Millett to the US Court of Appeals for the District of Columbia Circuit, calling Millett "well-qualified" with "gold-plated bipartisan credentials," but regrets that she "may well end up a victim of a GOP campaign against allowing any more of Mr. Obama's nominees onto the D.C. Circuit." The Post notes that Republicans "pushed to fill" all of the court's 11 seats "when George W. Bush was president," but "now argue that it doesn't need more than its current eight judges," and that Obama "is trying to 'pack' the court." The Post argues that Republicans "shouldn't insist on altering the size of a court only when it's a Democratic president's turn to pick judges or filibuster highly qualified nominees on that pretext"

"Mr. Cuccinelli's Clone." In an editorial, the Washington Post (10/31, Board, 4.28M) pans the candidacy of state Sen. Mark Obenshain (R), the GOP nominee in the 2013 Virginia attorney general race, saying that he "voted against...the landmark transportation bill that will pump billions of dollars into upgrading Virginia's rapidly failing transportation network." Noting that GOP gubernatorial nominee Ken Cuccinelli also opposed the transportation measure, the Post adds that Obenshain's voting record is "virtually indistinguishable, and in some ways worse, than Mr. Cuccinelli's own." Cuccinelli is a former state senator. The Post notes that it has endorsed state Sen. Mark Heming (D) in the AG race.

WALL STREET JOURNAL. "You Can Keep Your Health Plan*." The Wall Street Journal (10/31, Subscription Publication, 5.91M) criticizes President Obama's past assertion that Americans who like their current health plans will be able to keep those plans, writing that the Administration has been taking pains in the past few weeks to add caveats about what defines insurance and that only insurance plans that are acceptable under the Affordable Care Act would qualify for continuance.

"Fannie Mae Revivalist." The Wall Street Journal (10/31, Journal, Subscription Publication, 5.91M) says in an editorial that GOP senators are right to oppose Rep. Mel Watt's confirmation to head the FHFA, pointing out that the Obama Administration has been attempting to replace DeMarco for years, and hope to succeed this time with Watt, who would owe his allegiance to the Administration. The piece says Watt does not possess even the minimum requirements for the post, and goes on to laud DeMarco's accomplishments, including the GSEs' recent profitability, and his efforts to increase risk-sharing by Fannie and Freddie.

"The Children Of Brown." An editorial in the Wall Street Journal (10/31, Subscription Publication, 5.91M)

criticizes students at Brown University for their treatment of New York City Police Commissioner Ray Kelly, who was shouted off the stage during an appearance at the school Tuesday. The Journal praises Kelly's record as police commissioner, noting that much of the drop in the city's crime rate under Kelly is due to the NYPD stop-and-frisk policies the Brown students were protesting.

Washington Schedule:

TODAY'S EVENTS IN WASHINGTON.

White House:

PRESIDENT OBAMA – Receives the Presidential Daily Briefing, Oval Office, closed press; delivers remarks at the SelectUSA Investment Summit Marriott Wardman Park Hotel, open to pre-credentialed media; meets with Senator-elect Cory Booker, Oval Office, closed press; With the First Lady, welcome local children and military families to trick-or-treat at the White House, pooled press. Notes: Press Briefing by Press Secretary Jay Carney.

VICE PRESIDENT BIDEN – In the morning, the Vice President will attend the Presidential Daily Briefing in the Oval Office. The Vice President will swear in Cory Booker as Senator of New Jersey at the US Capitol. The Vice President will meet with Prime Minister Nouri al-Maliki of Iraq at the White House. This meeting is closed press. US Senate: 2 p.m. – The Senate is expected to convene.

ENTITLEMENT PROGRAMS – NATIONAL DEBT – RALLY – 10:30 a.m. The Rally to Restore (Fiscal) Sanity rally – National Center for Policy Analysis Senior Fellow Larry Kotlikoff will keynote a bipartisan Capitol Hill rally in support of the INFORM Act. Location: Upper Senate Park, 200 New Jersey Ave NW. Contacts: Catherine Daniell 972-308-6479, 817-991-1041

KAINE, THUNE – THE CAN STOPS HERE – 11 a.m. The non-partisan, millennial-led campaign The Can Kicks Back (TCKB) will conclude its five-week, cross-country “Generational Equity” Tour. Senators Tim Kaine (D-Va.) and John Thune (R-S.D.), sponsors of the INFORM Act, will speak in support of the bipartisan piece of legislation supported by TCKB that would allow lawmakers to “better understand” the impact of the Federal budget and pending legislation on future generations. Several of the many economists who have endorsed the INFORM Act, including Boston University’s Laurence J. Kotlikoff, will also address the audience of millennials at “The Can Stops Here” event. Location: Upper Senate Park on Capitol Hill. Contacts: Bill Beaman press@thecankicksback.org (301-767-7807)

DEMOCRATIC SENATORS – SHUTDOWN COSTS – 2:15 p.m. Press conference to issue a new report on the impact of the recent 16-day Federal shutdown on jobs and the economy. Study to show that the “Tea Party” shutdown cost more than \$20 billion, or 0.5% of GDP growth. The report also demonstrates that uncertainty caused by the continued insistence on budgeting by crisis has thus far cost the economy 900,000 jobs, and cut growth by 12%. Speakers: Senator Mark Warner; Senator Ben Cardin; Senator Robert Casey; Senator Amy Klobuchar. Contacts: Kevin Hall (Warner) 202-224-2023; Sue Walitsky (Cardin) 202-224-4524; April Mellody (Casey) 202-228-6367; Brigit Helgen (Klobuchar) 202-228-6317. Location: Senate Radio/TV Gallery, US Capitol S-325.

COMMITTEE MEETINGS

BANKING, HOUSING AND URBAN AFFAIRS – 10 a.m. Executive business meeting followed by hearing on “Housing Finance Reform: Essential Elements of a Government Guarantee for Mortgage-Backed Securities.” Witnesses: Joseph Tracy, Executive Vice President and Senior Advisor to the President, Federal Reserve Bank of New York; Phillip L. Swagel, Professor of International Economic Policy, University of Maryland School of Public Policy; David H. Stevens, President and CEO, Mortgage Bankers Association. Location: 538 Dirksen.

FOREIGN RELATIONS – 10 a.m. Business meeting to consider S.Res.268, condemning the September 2013 terrorist attack at the Westgate Mall in Nairobi, Kenya, and reaffirming United States support for the people and Government of Kenya, and the nominations of Gregory B. Starr, of Virginia, to be Assistant Secretary for Diplomatic Security, Mark Bradley Childress, of Virginia, to be Ambassador to the United Republic of Tanzania, Thomas Frederick Daughton, of Arizona, to be Ambassador to the Republic of Namibia, Matthew T. Harrington, of

Virginia, to be Ambassador to the Kingdom of Lesotho, Eunice S. Reddick, of the District of Columbia, to be Ambassador to the Republic of Niger, John Hoover, of Massachusetts, to be Ambassador to the Republic of Sierra Leone, Michael Stephen Hoza, of Washington, to be Ambassador to the Republic of Cameroon, Tomasz P. Malinowski, of the District of Columbia, to be Assistant Secretary for Democracy, Human Rights, and Labor, Crystal Nix-Hines, of California, for the rank of Ambassador during her tenure of service as the United States Permanent Representative to the United Nations Educational, Scientific, and Cultural Organization, Pamela K. Hamamoto, of Hawaii, to be Representative to the Office of the United Nations and Other International Organizations in Geneva, with the rank of Ambassador, Philip S. Goldberg, of the District of Columbia, to be Ambassador to the Republic of the Philippines, Robert O. Blake, Jr., of Maryland, to be Ambassador to the Republic of Indonesia, Karen Clark Stanton, of Michigan, to be Ambassador to the Democratic Republic of Timor-Leste, Timothy M. Broas, of Maryland, to be Ambassador to the Kingdom of the Netherlands, Donald Lu, of California, to be Ambassador to the Republic of Albania, Robert A. Sherman, of Massachusetts, to be Ambassador to the Portuguese Republic, Anne W. Patterson, of Virginia, to be Assistant Secretary for Near Eastern Affairs, Adam M. Scheinman, of Virginia, to be Special Representative of the President for Nuclear Nonproliferation, with the rank of Ambassador, Rose Eilene Gottemoeller, of Virginia, to be Under Secretary for Arms Control and International Security, Frank A. Rose, of Massachusetts, to be Assistant Secretary for Verification and Compliance, Dwight L. Bush, Sr., of the District of Columbia, to be Ambassador to the Kingdom of Morocco, James Walter Brewster, Jr., of Illinois, to be Ambassador to the Dominican Republic, Brian A. Nichols, of Rhode Island, to be Ambassador to the Republic of Peru, and Carlos Roberto Moreno, of California, to be Ambassador to Belize, all of the Department of State. Location: 419 Dirksen.

HEALTH, EDUCATION, LABOR, AND PENSIONS – 10 a.m. Hearings to examine attaining a quality degree, focusing on innovations to improve student success. Panel I: Richard Kazis , Senior Vice President, Jobs for the Future, Boston, MA; Dr. William E. Kirwan , Chancellor & Chief Executive Officer, University System of Maryland, Adelphi, MD; Dr. R. Scott Ralls , President, North Carolina Community College System, Raleigh,, NC; Timothy L. Hall , President, Austin Peay State University, Clarksville, TN; Dr. Paul J. LeBlanc , President, Southern New Hampshire University, Manchester, NH. Location: 430 Dirksen.

HOMELAND SECURITY AND GOVERNMENTAL AFFAIRS – 10 a.m. The Navy Yard Tragedy: Examining Government Clearances and Background Checks. Witnesses: Joseph G. Jordan, Administrator, Office of Federal Procurement Policy, Office of Management and Budget; Elaine D. Kaplan, Acting Director, US Office of Personnel Management; Brian A. Prioletti, Assistant Director, Special Security Directorate, National Counterintelligence Executive, Office of the Director of National Intelligence; Stephen Lewis, Deputy Director for Personnel, Industrial and Physical Security Policy, Directorate of Security Policy & Oversight, Office of Under Secretary of Defense for Intelligence, US Department of Defense; Brenda Farrell, Director, Defense Capabilities and Management, US Government Accountability Office. Location: 342 Dirksen.

JUDICIARY – 10 a.m. Executive Business Meeting. I. Nominations Robert Leon Wilkins, to be United States Circuit Judge for the District of Columbia Circuit Brian J. Davis, to be United States District Judge for the Middle District of Florida Timothy L. Brooks, to be United States District Judge for the Western District of Arkansas James Donato, to be United States District Judge for the Northern District of California Beth Labson Freeman, to be United States District Judge for the Northern District of California Pedro A. Delgado Hernandez, to be United States District Judge for the District of Puerto Rico Carolyn B. McHugh, to be United States Circuit Judge for the Tenth Circuit Pamela L. Reeves, to be United States District Judge for the Eastern District of Tennessee Vince Girdhari Chhabria, to be United States District Judge for the Northern District of California James Maxwell Moody, Jr., to be United States District Judge for the Eastern District of Arkansas II. Bills S.42, Criminal Antitrust Anti-Retaliation Act of 2013 (Leahy, Grassley). S.822, Justice for All Reauthorization Act (Leahy, Cornyn, Coons, Klobuchar, Franken, Feinstein, Hatch) Location: 226 Dirksen.

FOREIGN RELATIONS – 10:15 a.m. Hearing on Syria. Witnesses: Panel One: Robert S. Ford, Ambassador to Syria, US Department of State; Thomas M. Countryman, Assistant Secretary of State for International Security and Nonproliferation, US Department of State; Nancy E. Lindborg, Assistant Administrator for the Bureau for Democracy, Conflict and Humanitarian Assistance, US Agency for International Development (USAID). Panel Two: Ambassador Frederic C. Hof, Senior fellow, Rafik Hariri Center for the Middle East, Atlantic Council; Leslie H. Gelb, President Emeritus and Board Senior Fellow, Council on Foreign Relations. Location: 419 Dirksen.

FOREIGN RELATIONS – 2:15 p.m. Nominations hearing for Daniel W. Yohannes of Colorado, to be

Representative of the United States of America to the Organization for Economic Cooperation and Development.
Location: 419 Dirksen.

INTELLIGENCE – 2:15 p.m. Closed Hearing: Intelligence Matters. Location: 419 Hart.

US House: No Scheduled Events.

Other: IRAQI PRIME MINISTER – Iraqi Prime Minister H.E. Mr. Noori al-Maliki will be in Washington. Highlights: 8:30 a.m. Secretary of Defense Chuck Hagel meets with Iraq’s Prime Minister Nouri al-Maliki at the Willard Hotel, Washington, D.C. This event is closed to the press. 10 a.m. Iraqi Prime Minister H.E. Mr. Noori al-Maliki delivers remarks at the USIP. 1:30 p.m. The Vice President will meet with Prime Minister Nouri al-Maliki of Iraq at the White House. Closed press.

SAIS – NORTH KOREA – Oct. 30 – 31. Two day “United Nations Commission of Inquiry on Human Rights in the Democratic Peoples Republic of Korea Public” Hearings. DAY ONE: 1:45 – 6p.m. The UN-mandated Commission of Inquiry (COI) will hold two days of public hearings to investigate the human rights situation in the Democratic Peoples Republic of Korea. COI commissioners Michael Kirby, Marzuki Darusman (UN special rapporteur) and Sonja Biserko will conduct the hearings. Day 1 will feature testimony from North Korean escapees. DAY TWO: 8:30-4:30 p.m – Day 2 will feature testimony from experts including Joseph S. Bermudez Jr., a retired imagery analyst; Victor Cha, Korea Chair at the Center for Strategic and International Studies; Roberta Cohen, a senior fellow at the Brookings Institution and a SAIS graduate; Jared Genser, managing director of Perseus Strategies, LLC; David Hawk, a visiting scholar at the Columbia University Institute for the Study of Human Rights; Andrew Natsios, director of the Scowcroft Institute of International Affairs; and Marcus Noland, a senior fellow and director of studies at the Peterson Institute for International Economics. Location: Kenney Auditorium, Nitze Building, 1740 Massachusetts Ave., NW. Contacts: Felisa Klubes (fklubes@jhu.edu), 202-663-5626

Location: C115 Conference Center, CSIS, 1616 Rhode Island Ave. NW. Contacts: RSVP to: aschwartz@csis.org

WILDLIFE CONSERVATION BENEFITS – 9:30 a.m. Former New Mexico Governor Bill Richardson, founder of the Richardson Center for Global Engagement, and Senior Director of TRAFFIC/World Wildlife Fund (WWF) Crawford Allan will launch a new partnership to advance new strategies to combat illegal wildlife trafficking in key parts of Africa. Forum runs 9:30-11:30 a.m. Press conference at 11:30 a.m. Location: National Press Club, 529 14th St. NW, 13th Floor. Notes: Media RSVP: Sean Walsh, sean@navigatorcommunications.com or 917-687-8291 or Becky Fleischauer, becky@navigatorcommunications.com or 302-588-0671.

ACA ENROLLMENT TELECONFERENCE – 11 a.m. State exchange officials and navigators will discuss the health coverage enrollment they have helped to facilitate, the progress they have made in addressing any enrollment problems, and their expert views on the future of the enrollment process. Participants: Demian Fontanella, General Counsel, Office of the Healthcare, Advocate, Connecticut; Jodi Ray, Project Director, Florida Covering Kids & Families; Elisabeth Benjamin, MSPH, JD, Vice President, Health Initiatives, Community Service Society of NY; Rebecca Whitaker, MSPH, Director of Health Policy, Governmental Affairs, North Carolina Community Health Center Association; Ron Pollack, Executive Director, Families USA. Dial in toll-free: 800-344-6491. Confirmation code: 9865861. Contacts: Dave Lemmon, Bob Meissner Bryan Fisher ((202) 628-3030), info@familiesusa.org.

ABA – BROWNBAG – NEVO – 12:15 p.m. Deputy Assistant Attorney General for the Antitrust Division Aviv Nevo will deliver remarks at the Economics Committee of the American Bar Associations Antitrust Sections brownbag talk. Location: Mayer Brown LLP, Town Hall, First Floor, 1999 K St., N.W. Notes: Press inquiries regarding logistics should be directed to Diane Odom at diane.odom@americanbar.org.

NPC LUNCHEON – SECRETARY JEWELL – 12:30 p.m. NPC Luncheon with Sally Jewell, Secretary, US Department of the Interior to discuss conservation priorities, including Interiors role in the Presidents Climate Action Plan, and strengthening the nations economy through healthy lands, water and wildlife. Location: National Press Club, Ballroom, 529 14th Street NW.

Last Laughs:

LATE NIGHT POLITICAL HUMOR.

Jimmy Kimmel: "And on top of all the World Series related chaos in Boston, President Obama went to Boston today to do to Boston traffic what his healthcare website did to traffic on the web."

David Letterman: "Anybody tried to sign up for the Obamacare? You guys have any luck signing up? It's impossible. You're supposed to go to a computer and type in all of your information and then...the website shuts down. You can't get Obamacare. After all of this crap you can't get it now. And everybody's furious. ...Here's why

the Republicans are mad. They are upset about Obamacare because something they tried to stop now won't get started."

David Letterman: "Top ten things Vladimir Putin has learned by spying on the United States:"

10. "Americans like their meat filled with cheese and their cheese filled with meat."
9. "Hillary Clinton's ATM pin code is 2016."
8. "Gossip Girl's Blake Lively is a national treasure."
7. "Ninety-seven percent of Americans lie to their dentists about flossing."
6. "Next in line for the Supreme Court? Judge Judy."
5. "There's nothing going on in Delaware"
4. "Obamacare website built using same technology as Sputnik."
3. "Broadway Theater is more alive than ever."
2. "Biden hasn't turned on his work computer in months."
1. "Sofia Vergara – Va-Va-Va-Voom!"

Stephen Colbert: "You know, I like giving you good news but I'm afraid it's sad to say this Congress right now is the least popular of all time. Just thinking about what's going on, on Capitol Hill makes people nauseous. Nausea, by the way, more popular than Congress."

Stephen Colbert: "And Republicans in Congress are the most-least popular. One reason is that they disappointed their base by voting to raise the debt ceiling on the flimsy excuse of avoiding a galactic economic meltdown. Well, yesterday senate Republicans did their best to fix that mistake when 27 GOP Senators voted to disapprove of their previous votes to raise the debt ceiling. I believe the motion was titled 'SR-346, fiscal I call backsies.'"

Stephen Colbert: "And, folks, it was not easy for them to get this vote. Mitch McConnell had to negotiate with Harry Reid so that the recent debt ceiling bill included a provision that there would be a second vote expressing approval or disapproval of the first vote. In short, GOP Senators voted for raising the debt ceiling on the stipulation they could vote against having voted for it. Proving that Republicans may not be bipartisan but they may be bipolar."

Jon Stewart: "Ladies and gentlemen, there are many consequences to its growing cascade of revelations about our nation's spying activities. Most recently the bugging of German Chancellor Angela Merkel's cell phone and lederhosen drawers and the fact that the United States pretended to be her online boyfriend for two years."

Jimmy Fallon: "People are already talking about the next presidential race, which is still a few years away. In fact, the new poll found that 48 percent of New Jersey wants Chris Christie to run for president in 2016. Which isn't surprising since Christie actually makes up 48 percent of New Jersey."

Jay Leno: "You know, it's really trick or treat time at the White House. President Obama tricked us into thinking we'd be able to afford treatment. You see, it was 'trick or treatment.'"

Jay Leno: "Well, now the Federal Trade Commission reports that con-artists are using confusion over Obamacare to sign people up...for what they call fake health insurance. The scammers lure victims with false promises. Stuff like, 'If you like your health care plan, you can keep your health care plan.' See, they'll tell you that. The scammers will tell you that, but you have to be careful."

Jay Leno: "Well, now, a lot of people are accusing the President of being less than truthful. In fact, a couple weeks ago, President Obama called me and told me personally, 'If I like my current job, I can keep my current job.' And I believed him."

Jay Leno: "Well, according to the L.A. Times, regarding the promises made about Obamacare, some officials privately said...they privately wish they'd had left more wiggle room. Wiggle room. See, only in politics is the truth considered wiggle room."

Jay Leno: "I don't know if you saw the hearings today, three different members of congress compared Obamacare to the Wizard of Oz. Actually, Congress is like the Wizard of Oz. The Republicans have no heart. The Democrats have no courage. And the people who are on the Obamacare website have no brains."

Jay Leno: "And this Obamacare website, boy, has been nothing but problems, hasn't it? Oh, my God. You don't know how difficult it is to log on. Today, Edward Snowden said even he couldn't get in. He said, 'That's it, I'm through.'"

Jay Leno: "It is slower than a Thanksgiving dinner at your in-laws house. That's how slow it is."

Jay Leno: "It is slower than Chris Christie driving up hill in a Prius. That's how slow it is."

Jay Leno: "It is slower than a George Clooney marriage proposal. That's how slow it is."

Jay Leno: "And, of course, the other big scandal. This NSA spying thing. This is another huge scandal. In fact, today, the White House announced President Obama is changing his slogan from 'Change you can believe in' to 'I know nothing!'"

Jay Leno: "The President said he didn't know we were spying on our allies, didn't know about the problems with

the healthcare website. Have you heard the latest? Now the President claims he doesn't know how 'Breaking Bad' ended."

DOI in the News:

SECRETARY JEWELL TO TOUT CONSERVATION DURING MINNESOTA VISIT. The [Minneapolis Star Tribune](#)

(11/5, Mitchell, 1.14M) reports that Interior Secretary Sally Jewell will "visit Minnesota on Tuesday to promote her conservation initiatives." She will "release a new national report on the economic contributions of the nation's 561 national wildlife refuges while visiting the Minnesota Valley National Wildlife Refuge in Bloomington." Jewell will also tour the Prairie Wetlands Learning Center in Fergus Falls.

CONTINUING COVERAGE OF SECRETARY JEWELL'S NATIONAL PRESS CLUB SPEECH. For the Denver Post (11/5, Caldwell, 949K), editorial writer Alicia Caldwell writes that in her speech at the National Press Club last Thursday, Interior Secretary Sally Jewell laid out her conservation strategy and warned Congress that if it doesn't protect wild lands, President Obama will use his authority to do so. Caldwell argues that the warning was justified, since public lands bills have languished in Congress for years.

Secretary Jewell Urged To Listen To Scientists On Wild Horses. For the Atlantic (11/5, Cohen, 7.51M), Andrew Cohen writes that last Thursday, speaking at the National Press Club, Interior Secretary Sally Jewell "addressed in detail a question about the nation's beleaguered wild horses." Cohen criticizes Jewell's response and claims that her statement was "unsupported by key facts revealed in June in a report by the National Academy of Sciences that was sharply critical of Bureau of Land Management's practices and policies toward the horses." Cohen writes that Jewell's stance "suggests that the Interior Department, under Secretary Jewell, is more concerned with papering over faulty BLM practices than it is with fixing those practices to bring them into line with accepted scientific methods."

Also criticizing Jewell for her position on wild horses is the Desert Independent (11/5).

Additional Coverage. Additional coverage of Jewell's speech was provided by the Salt Lake (UT) Tribune (11/5, 343K), the Fly Rod & Reel (11/5, 146K) and KSJR-FM Collegetown, MN (11/4, 34K).

ENVIRONMENTAL GROUPS CRITICIZE BLM'S LATEST PROPOSALS TO SAVE SAGE GROUSE. The E&E Daily (11/4) reports that a coalition of conservation groups found "mostly fault" with the BLM's "proposed plans to protect millions of acres of greater sage grouse habitat in five Western states, concluding that overall, they fail to protect the imperiled bird from energy development and other activity that could drive the grouse to extinction." However, the groups, led by WildEarth Guardians, gave BLM "high marks for its proposed grouse management plan in Nevada and eastern California, finding that it adequately addresses impacts from oil and natural gas drilling and livestock grazing."

In an editorial, the Las Vegas Review-Journal (11/5, 437K) says that the environmentalists' cause is less about saving the sage grouse or increasing its population, and more about gaining the land use restrictions that bar development of open spaces. The paper claims that for these activists, the sage grouse is a but pawn in the campaign to block the projects that lead to increased use of natural resources, improved standards of living and increased energy consumption.

CLIMATE CHANGE TASK FORCE CREATED. The E&E Daily (11/4) reports on the creation of the State, Local and Tribal Leaders Task Force on Climate Preparedness and Resilience. The team, "made up of eight governors, 16 local officials and two tribal leaders, has a year to recommend ways that the federal government can hasten investments in resilience to communities that are vulnerable to climate change." The group is also tasked with helping the government identify "useful climate preparedness tools" for towns and states.

Creation Of Council On Climate Preparedness Angers Republicans. The National Journal (11/5, Foran, Subscription Publication, 427K) reports that Republicans are enraged by President Obama's executive order setting up the inter-agency Council on Climate Preparedness and Resilience and subsequent appointments that make the 24-member task force primarily Democrat. Several Republican Representatives spoke out on the issue, criticizing Obama's use of executive orders to avoid involvement with Congress. Several Democrat representatives have spoken out to defend the order, saying that the Republican-controlled Congress would not have passed legislation to address climate change and that Obama's executive order was necessary to "help better prepare communities to withstand the impact of climate changes."

SENATE PANEL TO TACKLE WILDFIRE PREVENTION. The E&E Daily (11/4) reports that a Senate panel will "explore pre-emptive measures to reduce the spiraling cost of wildfires across the West." The Agriculture Subcommittee on Conservation, Forestry and Natural Resources will "discuss how reduced budgets and forest

management affect the risk of catastrophic wildfires." Members will "hear from the Forest Service's top wildfire deputy, a logging industry official, a conservationist, county leader and the CEO of a Colorado ski area that operates on agency lands."

DRAKES BAY OYSTER FARM DRAWS SUPPORT IN COURT BATTLE. The Santa Rosa (CA) Press Democrat (11/4, 156K) reports on eight "friend of the court" briefs filed in "the last three weeks in support of oyster company owner Kevin Lunny's request for a rehearing by the 9th Circuit US Court of Appeals in San Francisco." According to the article, "the briefs, totalling 150 pages, are intended to convince the appeals court to reconsider its 2-1 decision in September rejecting Lunny's bid to continue harvesting oysters from the 2,500-acre estero in Marin County's Point Reyes Peninsula."

Also reporting on the story is the Petaluma (CA) Argus Courier (11/4, 1K).

INTERIOR AGREES TO FUND MUDDY CREEK BRIDGE PROJECT. The Cape Cod (MA) Day (11/5) reports that the Interior Department has "agreed to fund the Muddy Creek Restoration Bridge project, to the tune of \$3.3 million, and now the design and permitting processes can move full-speed ahead." The article notes that the Muddy Creek bridge is "one of 45 Atlantic Coastal Restoration and Resiliency Projects selected to receive federal money from a competitive pool of projects along the Eastern Seaboard."

NEVADA COUNTY TO HEAR ON PRESENTATION ON FEDERAL CONTROL OF PUBLIC LANDS. The Elko (NV) Daily Free Press (11/5, 22K) reports that "the county will hear a presentation Wednesday by Pam Borda, Northeastern Nevada Regional Development Authority executive director, that will address how a transfer of public land from federal to state control could affect economic development." The article notes that Borda presented "in September to the Nevada Land Management Task Force — the state board meets monthly to study a possible land transfer." Borda "told the task force that federal control of public land costs businesses millions of dollars in regulatory expenses."

FEDERAL WORKERS FILE SUIT AGAINST GOVERNMENT OVER SHUTDOWN. The Huffington Post (11/4, Jamieson, 11.54M) reports that "hundreds" of Federal employees who worked through the shutdown "have now filed paperwork to join a lawsuit against the government over having their paychecks withheld last month, according to the lawyers handling their case." The suit argues that the Federal government broke the Fair Labor Standards Act by delaying pay for those working during the shutdown. The employees argue that they delayed paychecks played havoc with their personal finances.

ADDITIONAL COVERAGE: WYOMING LAWMAKERS PURSUE STUDY ON TAKING OVER FEDERAL LAND. Additional coverage of the study pursued by Wyoming lawmakers on taking control of federal land was provided by the Casper (WY) Journal (11/5, 80K).

PRESIDENT OBAMA URGED TO ATTEND GETTYSBURG EVENT. In an editorial, the Pottstown (PA) Mercury (11/5, 76K) urges President Obama to attend the 150th anniversary of the Gettysburg Address instead of sending Interior Secretary Sally Jewell in his place.

SHULTZ, SMITH: US HAS POTENTIAL TO ACHIEVE ENERGY INDEPENDENCE. In an op-ed for the Wall Street Journal (11/5, Shultz, Smith, Subscription Publication, 5.91M), George P. Shultz and Frederick W. Smith write that protecting domestic energy security is vital to defending the national interest, and the energy revolution of the last decade has given the US the means of doing so. They argue that the combination of rising US production and a drop in consumption due to new technologies, such as alternatively fueled vehicles, could see the US as essentially energy independent. However, the pair cautions that continuing this trend will require a national effort, and they suggest that the US establish oil displacement as a metric to measure success.

America's Great Outdoors:

National Park Service:

NPS HIRES CENTER FOR AMERICAN PROGRESS' PUBLIC LANDS DIRECTOR. The E&E Daily (11/4) reports that the director of the Center for American Progress' public lands program is now the deputy director for

congressional and external relations at the NPS. Christy Goldfuss, "a former Democratic public lands aide in the House who has led CAP's public lands efforts for more than two years, will serve as the Park Service's liaison to Congress and will lead the Office of Legislative and Congressional Affairs and the Office of International Affairs." In a statement, NPS Director Jon Jarvis said, "Christy's solid experience in the public and private sectors, understanding of public lands and preservation issues, and energy and commitment to bring people together to reach common goals make her a natural addition to my executive leadership team. As we ready the National Park Service for its second century of stewardship, we rely on close working relationships with many partners."

Also reporting on the story are the [Sacramento \(CA\) Bee](#) (11/5, 749K) and the [San Luis Obispo \(CA\) Tribune](#) (11/4, 126K).

FORMER DISCOVERY CHANNEL EXECUTIVE HIRED AS PRESIDENT OF NATIONAL PARKS CONSERVATION ASSOCIATION.

The [E&E Daily](#) (11/4) reports that the National Parks Conservation Association has announced it has hired former Discovery Channel executive Clark Bunting as its new president. Bunting will replace former NPCA President Tom Kiernan, who left the group in April to lead the American Wind Energy Association. He will begin Nov. 11.

OFFICIALS MOVE AHEAD WITH PLANS TO RESTORE YOSEMITE SEQUOIA GROVE. The [E&E Daily](#) (11/4) reports that the NPS "last week released an environmental impact statement for a \$24 million, three-year project to restore the largest grove of giant sequoias in Yosemite National Park." Officials are seeking "to restore wetlands, remove parking lots, reduce noise and add a shuttle service for visitors to get to the trees in the south end of the park." The plan is "to break ground by the park's 150th anniversary next year."

Also reporting on the story is the [Los Angeles Times](#) (11/4, Boxall, 3.07M) and the [Chicago Tribune](#) (11/4, Boxall, 2.32M).

NPS ASKED TO PURCHASE WRIGHT BROTHERS BUILDINGS. The [Dayton \(OH\) Daily News](#) (11/5, 88K) reports that Rep. Mike Turner is asking the NPS to purchase the historic Wright Company Factory in Dayton. The request is "part of an effort to keep the building from being demolished."

Also reporting on the story is [WDTN-TV](#) Dayton, OH (11/5, 27K).

WASHINGTON MONUMENT SCAFFOLDING REMOVED. The [Washington Post](#) (11/4, 4.28M) reports that "gone Monday was the once-brilliant illumination of the screen around the Washington Monument." The NPS said "Sunday was the last night of the decorative lights on the monument."

IN RIM FIRE'S AFTERMATH, A NEW WORRY EMERGES OVER WATER. The [Los Angeles Times](#) (11/4, Barboza, 3.07M) reports that "as autumn turns to winter and rain falls over the charred landscape left behind by the Rim fire, forest rangers and emergency planners have a new worry: water." According to the article, "over 90% of the blaze burned in the Tuolumne River watershed, where more than 2,600 miles of streams cut through steep, now-burned slopes of the Sierra Nevada." The article notes that "trails and roads are at risk of washing away, cutting off access to world-class white-water rapids," and "burned trees and debris will almost certainly be flushed downstream, fouling irrigation water supplies."

CHERRY BLOSSOM FESTIVAL 2014 TO BE HELD MARCH 20 THROUGH APRIL 13. [WJLA-TV](#) Washington (11/5, 118K) reports that the annual Cherry Blossom Festival will take place from March 20 through April 13 of 2014, organizers announced Monday.

NPS ARCHAEOLOGISTS PARTICIPATE IN ANCIENT SPEAR TIP STUDY. The [Houston Chronicle](#) (11/5, Christian, 2.26M) reports that "two Texas universities studying ancient spear tips found in northwest Alaska have raised intriguing questions about how people spread throughout the Americas." A research team led by Texas A&M University Professor Ted Goebel has been analyzing "fluted" stone spear points "discovered in 2005 at Bering Land Bridge Preserve on the Seward Peninsula." Archaeologists with the NPS, "who are also participating in the study, found a fluted spear tip fragment in an area called Serpentine Hot Springs, according to an A&M news release."

CHICAGO AND NORTH WESTERN RAILWAY DEPOT ADDED TO NATIONAL REGISTER OF HISTORIC

PLACES. The Milwaukee Journal Sentinel (11/5, 798K) reports that the Chicago and North Western Railway Depot has joined the National Register of Historic Places.

EDITORIAL: NPS DECISION ON HELICOPTERS AND HOVERCRAFTS DESERVES APPEAL. The Anchorage (AK) Daily News (11/4, 198K) reprints an editorial by the Fairbanks Daily News-Miner arguing that the decision by the NPS on helicopters and hovercrafts deserves appeal. According to the paper, "the decision greatly limits the utility of a central provision that authors of the Alaska National Interest Lands Conservation Act added to protect the ability of the state and private landowners to use their lands within the vast federal parks, refuges and other units created when Congress passed the law in 1980."

Bureau of Land Management:

JUDGE OVERTURNS BLM MANAGEMENT PLAN FOR RANGELANDS OF CENTRAL UTAH. The Columbus (IN) Republic (11/5, 80K) reports that "a judge on Monday overturned a Bush-era management plan that opened more than 4,200 miles of dirt paths to motorized vehicles on public rangelands across a wide region of Utah." US District Judge Dale Kimball held that the BLM "failed to consider how vehicles were accelerating soil erosion and threatening archaeological sites." The decision "sent the Richfield district plan back" to the BLM, and "the paths will stay open until a final decision is made later."

The Deseret (UT) News (11/5, 274K) reports that "a coalition of conservation groups is hailing" the decision. Stephen Bloch, legal director for the Southern Utah Wilderness Alliance, said, "This landmark decision is a resounding rejection of the BLM's mismanagement of Utah's stunning public lands." He added, "The Richfield (Resource Management Plan) wrongly prioritized ORV use over all other uses of the public lands and neglected streams and special places worthy of protection. The court didn't mince words in its ruling that this violated federal environmental and historic laws."

BLM IDENTIFIES SUSPECT IN POMPEYS PILLAR VANDALISM. The Billings (MT) Gazette (11/5, 206K) reports that the BLM has identified Cole Randall as "the man suspected of carving his name and date at Pompeys Pillar National Monument last month." According to a press release from the BLM, Randall "owned up to having committed the act of vandalism." In an email sent to a Billings Gazette reporter, a person who identified himself as Randall said "I humbly apologize to the people of Montana and to every American who was affected by my foolishness."

Also reporting on the story is the Minneapolis Star Tribune (11/5, Brown, 1.14M).

COURT'S RULING OPENS DOOR FOR DOMESTIC HORSE SLAUGHTER. The E&E Daily (11/4) reports that "US horse slaughterhouses can start operating following a ruling from a federal judge last week." District Judge Christina Armijo in Albuquerque, N.M., has "dismissed a lawsuit from animal advocacy groups, including the Humane Society of the United States, that argued the Department of Agriculture did not conduct appropriate environmental studies before issuing permits to two horse slaughter plants." The Humane Society, joined by the state of New Mexico, has filed an appeal with the 10th US Circuit Court of Appeals in Denver.

SENATE TO TAKE UP MARINE BASE EXPANSION CONTROVERSY. The Riverside (CA) Press Enterprise (11/4, 465K) reports that a long-running battle "over the military's planned expansion of the Twentynine Palms Marine base into the off-roading mecca of Johnson Valley could be settled as early as this month when the issue comes before the US Senate." The article notes that Reps. Paul Cook, R-Yucca Valley, and Buck McKeon, R-Santa Clarita, "stepped in this summer with a compromise proposal." Their legislation "would keep the Johnson Valley Off-Highway Vehicle Recreation Area under control" of the BLM and "require the Marines to obtain a permit for their training exercises two months of the year." According to the article, "the House passed the compromise in June as part of the National Defense Authorization Act," and "the Senate will consider its own bill in the next two months, then both Houses will negotiate a final version."

BLM'S ADVISORY COUNCIL FOR NORTHWEST COLORADO MEETING ON DECEMBER 5. The Hill (11/5, 194K) reports in its "Regwatch" blog that the BLM's advisory council for Northwest Colorado is meeting on Dec. 5 in the town of Silt.

Fish and Wildlife Service:

REPORT SHOWS LAGGING HISPANIC PARTICIPATION IN OUTDOOR RECREATION. The Huffington Post (11/4, 11.54M) reports that "while Hispanics make up more than 17% of the nation's population, a 2013 outdoor recreation report shows that only 7% of those who participate in outdoor recreation are Hispanic." Meanwhile, members of the FWS "acknowledge that while Hispanics are affected by the issues USFWS addresses just as much as their neighbors, neither the government nor outdoor industries have reached out to this rapidly growing US population segment." According to Noemi Pérez of the USFWS Office of Partner Liaison, "while initiatives to increase diversity in the USFWS's 10,000-member workforce within the Department of Interior is a continuing process, no bureau within the department had specifically addressed diversity in consumer and participant involvement, until six months ago."

TOTOABA FISH BLADDER HIGHLY PRIZED IN BLACK MARKET. The E&E Daily (11/4) reports that the bladder of the endangered totoaba fish is "highly prized in China, leading to the smuggling of the commodity from the United States." Currently, "a single dried bladder can fetch between \$5,000 and \$10,000 on the black market." The article notes that "just this year, seven people have been charged with smuggling about 700 pounds of fish bladders."

PRIME HOOK WILDLIFE REFUGE TO HOST PUBLIC MEETING NOVEMBER 13. The Dover (DE) Post (11/4, 79K) reports that the FWS will host a public meeting on "its proposed planning for a dune/marsh restoration project in Units II and III at Prime Hook National Wildlife Refuge on Nov. 13." The meeting will "focus on environmental survey results, project overviews, conceptual designs, and potential sites to secure material to build up the dunes and beaches at Prime Hook to complete the initial phase of marsh restoration, and plans to restore the marsh complex within Units II and III."

Also reporting on the story are WBOC-TV Salisbury, MD (11/5, 30K) and WBOC-TV Salisbury, MD (11/5, 30K).

ENVIRONMENTALISTS PLEASED BY DECISION TO REMOVE CALIFORNIA TOWHEE FROM PROTECTION. The Bradenton (FL) Herald (11/4, 143K) reports that on Monday, the FWS "published the formal proposal to remove the Inyo California towhee from the list of 'threatened' species." Environmentalists are "pleased" with the decision. The towhee's revival, they claim, shows the Endangered Species Act can still work. Tierra Curry, a biologist at the Center for Biological Diversity, said, "The recovery of the towhee and its spring habitats is cause for celebration and provides yet another example of the success of our most important law for saving wildlife."

Also reporting on the story is the Chicago Tribune (11/4, Doyle, 2.32M).

FWS DECISION CLOSES STATE-APPROVED SKILAK LOOP HUNT. The Alaska Native News (11/5, 245) reports that the Alaska Department of Fish and Game learned Friday that FWS will "implement additional hunting closures on the Kenai Peninsula." In a news release Friday, the FWS has "promulgated a closure of state-authorized wolf, lynx and coyote hunting within the Skilak Loop Management Area." The article notes that "the closure is scheduled to go into effect on November 10, 2013."

GRIZZLY DEATHS DECLINED BY HALF IN YELLOWSTONE AREA. The Casper (WY) Star-Tribune (11/5, 90K) reports that "the number of grizzly bear deaths declined by more than 50 percent this year in the greater Yellowstone ecosystem, according to the Interagency Grizzly Bear Study Team." According to the article, "the numbers are particularly notable because trees produced fewer than normal whitebark pine cones, an important grizzly bear food." The article notes that "grizzly bears' reaction to declines in whitebark pine cones will help determine if the bear is removed from the endangered species list."

MANATEES LOITERING IN SOUTH CAROLINA. The Charleston (SC) Post and Courier (11/4, 284K) reports that biologists are alarmed by manatee sightings in South Carolina. Jennifer Koches of the FWS said, "Providing manatees with food and water is not only a violation of federal law, but it also creates significant problems for the manatees, as they will easily acclimate to hand-outs of food and fresh water."

FWS EXTENDS WOLVERINE COMMENT PERIOD. The Bonnors Ferry (ID) Herald (11/5, 10K) reports that the FWS is "reopening the comment period for the proposed listing of the North American wolverine to broaden the

discussion to the entire public and to ensure that all available information is adequately considered in the process." The reopened comment period will close on December 2, 2013.

PROTECTION URGED FOR WOLVES. For "The Blog" of the [Huffington Post](#) (11/5, Chu, 11.54M), Dan Chu, Director, Sierra Club "Our Wild America" campaign, writes that last June, the FWS "proposed no longer protecting gray wolves as an endangered species in the vast majority of the country, threatening any chance of wolves returning to much of their former range." Chu argues that "putting the fate of wolves back into the hands of the western state politicians will not keep them on the road to recovery, but send them down a path to destruction." He concludes that "we must allow the recovery of wolves to continue under the Endangered Species Act; the job is far from done."

US Geological Survey:

USGS CONCLUDES QUARRY BLAST SPARKS TREMORS IN CHICAGO SUBURBS. [NPR](#) (11/5, Peralta, 465K) reports that residents in Chicago's western suburbs assumed that the shaking they felt was an earthquake and the USGS reported it as a 3.7 magnitude quake. But "interestingly, after the USGS looked at their data, they came to the conclusion that the tremor was actually caused by a quarry blast."

Securing America's Energy Future:

Renewable Energy:

WIND POWER TAX CREDIT EXPECTED TO EXPIRE. [Politico](#) (11/5, Restuccia, 467K) reports, "It's looking increasingly likely that the production tax credit, a key wind industry lifeline," will expire soon after the end of the year, which "could hurt the wind industry." Uncertainty over the PTC this year caused new wind projects construction to "grind to a virtual halt." A Senate aide said tax writers "aren't even talking about a year-end extenders package," which is traditionally how credits like the PTC are continued. It then would have to be revived "as part of broader tax reform, which isn't expected to move until next year, if at all." Meanwhile, various companies are "lobbying hard to kill the tax credit." For instance, Exelon, says "that wind power threatens its nuclear power operations."

SENATE DEMOCRATS PUSHING RENEWABLES. [The Daily Caller](#) (11/5, Bastasch, 422K) reports Senate Democrats "have begun a renewable energy blitz," introducing a pair of bills "mandating an increase in renewable use through 2025." Sens. Tom Udall and Mark Udall introduced a bill last week that would call for 25% of the nation's energy to come from renewable sources by 2025. A similar bill was introduced by Sen. Ed Markey.

Onshore Energy Development:

STUDY LINKS CO2 INJECTIONS INTO WELLS WITH EARTHQUAKES. [Reuters](#) (11/5, Gebrekidan) reports a paper published in the Proceedings of the National Academy of Sciences linked injecting carbon dioxide into oil and gas wells to minor earthquakes in Texas. This would be the first study to link earthquakes of magnitude 3 and above with carbon dioxide injections in the Cogdell oil field.

Offshore Energy Development:

BSEE ISSUES REPORT ON NOVEMBER 2012 GULF OF MEXICO OFFSHORE RIG EXPLOSION. [The Wall Street Journal](#) (11/5, Gilbert, Subscription Publication, 5.91M) reports that on Monday, the Interior Department's Bureau of Safety and Environmental Enforcement issued a report on the November 2012 explosion at an offshore platform in the Gulf of Mexico being operated by Talos Energy for Black Elk. BSEE director Brian Salerno said, "Collectively, the industry must do more to protect workers."

The [E&E Daily](#) (11/4) reports that Black Elk Energy Offshore Operations LLC and its contractors "ignored hazards and failed to encourage workers to raise safety concerns before a fatal explosion and fire aboard a Gulf of Mexico production platform last fall, according to a scathing new report by federal investigators." Black Elk also "conducted welding work without taking required safety precautions, failed to isolate hydrocarbons inside an

oil tank and promoted ineffective communication among contractors," according to the 54-page report by the BSEE and the Coast Guard. The BSEE said "it plans to issue incidents of noncompliance to Black Elk and its contractors, which could include civil penalties of up to \$40,000 per incident per day." BSEE Director Brian Salermo said, "These failures reflect a disregard for the safety of workers on the platform and are the antithesis of the type of safety culture that should guide decisionmaking in all offshore oil and gas operations. BSEE safety regulations were not followed, and accordingly BSEE will proceed with appropriate enforcement actions."

Also reporting on the story are the "E2 Wire" blog of [The Hill](#) (11/5, 194K), the [New Orleans Times-Picayune](#) (11/5, 700K), the [FuelFix](#) (11/4, 7K), the [San Antonio Express-News](#) (11/5, 746K), the [MarketWatch](#) (11/4, 967K), the [Law 360](#) (11/5, 18K), [KHOU-TV](#) Houston (11/5, 125K), [KPLC-TV](#) Lake Charles, LA (11/5, 10K), [KALB-TV](#) Alexandria, LA (11/5, 1K), [WXVT-TV](#) Greenwood, MS (11/5, 98), and [WWL-TV](#) New Orleans (11/5, 107K).

INDUSTRY EXPRESSES WISH FOR EXPEDITED APPROVAL OF GULF OF MEXICO TRANSBOUNDARY TREATY. The Oil and Gas Journal (11/5, 1K) reminds readers that versions of bills approving the Gulf of Mexico transboundary treaty between the US and Mexico differ in the House and Senate, with the House including "a provision that waived a Dodd-Frank law" requirement for US companies to conduct foreign payment disclosure, and the Senate leaving such a provision out. This makes "a conference likely" and might harm "the treaty's timely ratification." The article then recalls that a US District Court for the District of Columbia ruling on July 2 barred implementation of that Dodd-Frank mandated provision by the SEC, "after the American Petroleum Institute and other business groups sued over what they considered an anticompetitive requirement." On October 28, "an API spokesman" said to the Journal, "Since the SEC's original rule has been thrown out and the SEC is working with all stakeholders on a new rule, we'd like to see the House and Senate work together to expedite approval of the transboundary agreement."

APPEALS COURT BEGINS REVIEW OF BP SETTLEMENT. The [E&E Daily](#) (11/4) reports that an appeals court was scheduled "to hear objections to the multibillion-dollar settlement meant to compensate victims of the 2010 Gulf spill." BP has contended that "the settlement it agreed to a year ago has been misinterpreted by the judge and the court-appointed claims administrator overseeing the payouts." The company "argues a decision that the claims administrator, Patrick Juneau, announced earlier this year has allowed businesses to manipulate comparisons of revenues and expenses from before and after the spill."

Tackling America's Water Challenges:

HIGH-FLOW RELEASES FROM GLEN CANYON DAM SCHEDULED FOR NEXT WEEK. The [Arizona Daily Sun](#) (11/5, 33K) reports that "next week, Glen Canyon Dam will start pumping an Olympic-sized swimming pool worth of water into the Colorado River every other minute." According to the article, "the experiment is an attempt to replicate the high-flow conditions that would naturally be seen in the Grand Canyon before the dam, where sediment rich water creates beaches and critical wildlife habitat."

ADDITIONAL COVERAGE OF BAY DELTA CONSERVATION PLAN. Additional Coverage of the Bay Delta Conservation Plan was provided by the [Huffington Post](#) (11/4, 11.54M), the [Bay Area \(CA\) Indymedia](#) (11/4, 2K), the [Central Valley \(CA\) Business Times](#) (11/5, 206), and [KXTV-TV](#) Sacramento, CA (11/5, 25K).

Empowering Native American Communities:

ALASKA TRIBES CALL ON OBAMA ADMINISTRATION TO SETTLE CONTRACT COST CLAIMS. The Juneau (AK) Empire (11/5, 21K) reports that "sixty tribes and tribally affiliated organizations from across the country have signed a letter to President Barack Obama asking his administration to settle outstanding Indian Health Service and Bureau of Indian Affairs contract costs claims." According to the article, "the letter — which includes signatures from leaders of the Tlingit-Haida Central Council, the SouthEast Alaska Regional Health Consortium, Southcentral Foundation and the Arctic Slope Native Association, among others — was sent to the president as representatives from tribes and tribal organizations from around the country prepare to attend a Nov. 13 White House Tribal Nations Conference."

NEW YORK TOWNS PIN HOPES ON REFERENDUM ON CASINOS. The [New York Times](#) (11/3, McKinley, Subscription Publication, 9.61M) reports that towns in New York are "betting on the success of Proposal 1, a

statewide referendum to be decided on Tuesday that would authorize up to seven full-scale casinos around the state." The article notes that "supporters, including Gov. Andrew M. Cuomo, have been selling it as an economic development measure, describing the potential for 'Las Vegas style' resorts with investments in the hundreds of millions of dollars, and the potential for 10,000 new jobs." However, "the reality may be far more restrained." According to the article, "some of the possible locations for the new gambling operations are distant from major population centers, and the experience of some remote American Indian casinos suggests that luring customers from big cities could be a challenge."

FEDERAL AUTHORITIES PROSECUTING MORE INDIAN COUNTRY CRIMES. The Tulsa (OK) World (11/5, 271K) reports that "federal authorities have been ramping up their efforts to prosecute crimes in what they call 'Indian Country,' and statistics show those efforts have not been in vain." The US Department of Justice reports "a 54 percent increase in Indian Country criminal prosecutions since fiscal year 2009." The article notes that "in June 2009, Attorney General Eric Holder announced a Justice Department initiative to enhance public safety in Indian Country, a wide-ranging effort that has included increased prosecution, training and outreach efforts."

Top National News:

WHITE HOUSE PUSHBACK FAILS TO SHIFT ACA ROLLOUT MEDIA NARRATIVE. On Monday evening, after several days of coverage spotlighting Americans who are losing their health insurance or are facing thousands of dollars in increased premiums and deductibles as a result of the Affordable Care Act – including a front-page article in Monday's Washington Post on Americans who "are angrily complaining about 'sticker shock,'" and a viral Wall Street Journal op-ed by a cancer patient who may lose access to the specialists she credits for saving her life – President Obama offered what media reports are casting as a slightly modified case for the law in remarks at an Organizing For Action event.

Despite the President's attempt to reframe the national conversation about the ACA, he and his Administration continue to be the subject of a great deal of negative media coverage. And while much of it is focused on the problems associated with the implementation of the Affordable Care Act, some of the critiques are broader in scope. For instance, under the headline, "For Obama, A Sudden Struggle With Personal Appeal," the AP (11/5, Pace, Agiesta) reports that "Americans increasingly view the president unfavorably," and notes that "an NBC News/Wall Street Journal Poll released last week that found positive views of Obama at the lowest point of his presidency."

On NBC Nightly News (11/4, story 2, 2:45, Williams, 7.86M), Peter Alexander reported that in regards to HealthCare.gov, "even [the President's] Democratic allies are even calling for a time-out." Former Democratic Congressman Harold Ford was shown saying, "This program will crumble if you don't find ways to deal with the challenge right now. ... Shutting the program down for 60, 90, 120 days – I would rather see that and the political fallout than a program that limps along over the next several months."

On ABC World News (11/4, story 6, 2:45, Sawyer, 7.43M), Diane Sawyer said there is "new trouble for the President and Obamacare; it's about what the President said and what he knew and when." ABC's Chief White House Correspondent Jonathan Karl, who engaged in a widely noted verbal sparring match with Jay Carney during Monday's White House press briefing, went on to report that "as the healthcare website melted down, The President repeatedly told people there were other options working just fine." President Obama was shown saying, "You can bypass the website and apply by phone or in person." However, according to Karl, "ten days before the President said those words his own healthcare team knew that all applications were having the same problems."

The Huffington Post says the "heated exchange" between Carney and Karl came after Karl asked about "internal documents that show Obamacare applications submitted by phone or paper go through the same pipeline and system as the website, and do not take less time, as officials have previously said."

At the opening of CNN's The Situation Room, Wolf Blitzer reported that there is "panic in the Obamacare war room," and that "we now have some proof of White House fears that Americans will be disappointed even after the website is fixed." Blitzer went on to report that "notes from inside the Administration...reveal deep fears about the healthcare program and the political backlash."

The perception that the "mainstream media" is growing increasingly skeptical of the Administration's narrative regarding the HealthCare.gov problems and the controversy over the Americans who are losing their current health insurance as a result of the ACA was a recurring theme during Fox News' primetime lineup Monday night. On Fox News' Special Report (11/5, 6.72M), which also showed a lengthy clip of ABC's Karl pepping Camey with questions Monday, Brit Hume drew attention to criticism of the Administration from Obama allies such as former White House Press Secretary Robert Gibbs on MSNBC's Morning Joe Monday. Neil Munro, in a piece for the Daily Caller (11/5, Munro, 422K), also notes negative coverage of the ACA's implementation "from some of the media outlets that championed" the law previously.

Reporting on the President's remarks at the OFA event, the Washington Post (11/5, Nakamura, 4.28M) says he "defended himself against Republican criticism that he misled the public...telling supporters that his administration could not in good faith allow people with inferior insurance plans to keep them." The President is quoted as saying, "The bottom line is we are making the insurance marketplace better for everybody."

Reid Epstein, in a piece for Politico (11/5, Epstein, 467K) titled "Obama Adds Explainer To 'You Can Keep It' Mantra," noted that on Monday, the President said, "Now if you had one of these plans before the Affordable Care Act came into law and you really liked that plan, what we said was you can keep it if it hasn't changed since the law passed." According to Epstein, the last "extra clause represents a slight change from the 'if you like your plan, you can keep it' mantra of the 2012 campaign."

Likewise, Jackie Calmes, in the New York Times (11/5, Calmes, Subscription Publication, 9.61M), says the President "has been widely criticized for having promised...that Americans could keep their current coverage," and so "on Monday he modified his language in the face of reports, long anticipated, that some companies had canceled individual policies because they did not meet minimum coverage standards set by the Affordable Care Act." Calmes notes that the President emphasized that as a result of the ACA's passage "nobody can be dropped all together," while also acknowledging that "some Americans with higher incomes will pay more up front, for better insurance with better benefits and better protections that could eventually help them a lot."

The AP (11/4) says that the President "express[ed] sympathy for Americans who are getting kicked off their health insurance plans," but also contended that "they were often getting 'a very bad deal'" before losing coverage, and that "virtually every insurer is offering newer, better plans."

According to USA Today (11/4, Madhani, 5.82M), the President was trying to "reframe the public conversation over the Affordable Care Act" as "millions of Americans...receiv[e] cancellation notices" sent by their insurers "despite Obama's frequently repeated pledge that no one would lose the coverage they already had."

The Washington Times (11/5, Wolfgang, 417K) quotes the President as saying, "If we had allowed these old plans to be downgraded or sold to new enrollees once the law had already passed then we would have broken an even more important promise: making sure that Americans gain access to health care that doesn't leave them one illness away from financial ruin."

Bloomberg News (11/5, Lerer, 1.91M) reported that later in the week, the President will be in Dallas "to meet with volunteers working on enrollment," while HUD Secretary Shaun Donovan and Secretary of Labor Tom Perez "are also being dispatched to the 10 cities with the highest rates of uninsured residents to promote the insurance plans." Bloomberg also reports that OFA "has started to promote the law with an initiative urging parents to use holiday visits to encourage their older offspring to sign up for coverage."

The Washington Post (11/5, Nakamura, 4.28M) notes that David Plouffe and Massachusetts Gov. Deval Patrick (D) "also addressed the crowd, sharply attacking Republican lawmakers who have opposed Obamacare." Politico (11/5, Epstein, 467K) notes that Plouffe predicted that ACA "enrollment will go smoothly 'as long as the website is completed and works error-free and delay-free by the end of the month.'"

The Daily Caller (11/5, Howley, 422K) reports that in response to an op-ed in Monday's Wall Street Journal by a California woman who suffered from stage-4 gallbladder cancer and is losing her health insurance because of ACA rules, White House senior adviser Dan Pfeiffer "tweeted out the message 'The Real Reason That The Cancer Patient Writing In Today's Wall Street Journal Lost Her Health Insurance,' along with a link to a ThinkProgress (11/5, Volsky, 117K) article that blames the woman's insurance company United Healthcare for

dropping her.”

Senate Democrats Want To Delay ACA-Mandated Coverage Cancellations. The AP (11/5, Espo) reports that “after millions of consumers received health care cancellation notices, lawmakers in both parties are pushing legislation to redeem” Obama’s “pledge that anyone liking their coverage will be allowed to keep it under the nation’s controversial new law.” Congressional Democrats “said top administration aides got a close-up view of the cancellation controversy last week, when Sen. Joe Donnelly said at a closed-door meeting...that his son had received notice his coverage was being terminated.” The AP goes on to report that Rep. Fred Upton has introduced legislation that “permits insurers to sell existing coverage plans that would otherwise be banned,” and that Sen. Mary Landrieu wants to “go one step further by requiring” insurance companies “to continue offering existing paying customers continued coverage under any plans in effect at the end of 2013.” Landrieu is quoted as saying, “A promise was made that if you like your health plan, you can keep it.”

The Hill (11/5, Easley, 194K) reports that on Monday, Sen. Marco Rubio said, “This week we learned that... people are, in fact, losing their health plans, and that President Obama’s administration has known this fact for over three years.” Rubio added, “In essence, ObamaCare’s passage was built on a foundation of lies and promises that simply can’t be delivered.”

Marc Thiessen, in his column for the Washington Post (11/5, Thiessen, 4.28M), notes reports that White House officials objected to the President’s “you can keep your plan” phrasing, but that it “stayed in the speech” anyways, which, according to Thiessen, is evidence of “a willful intent to deceive.”

ACA Enrollees Are Reportedly Older Than Anticipated. Under the front-page headline, “Young Avoid New Health Plans: Early Buyers of Coverage Are Older Than Expected, Raising Expense Concerns,” the Wall Street Journal (11/5, A1, Weaver, Martin, Subscription Publication, 5.91M) reports that according to insurance executives and state officials, the first cohort of Americans who have gotten healthcare coverage since the ACA marketplaces’ rollout on October 1 are, on average, older than anticipated, which could undermine some of the Administration’s financing projections. The Journal suggests that the well-documented problems affecting HealthCare.gov are contributing to the demographic trend because the younger, healthier uninsured are not as eager to get coverage as those who are older or have pre-existing conditions.

HealthCare.gov Security Concerns Draw Attention Amid Continuing Outages. Scott Pelley, on the CBS Evening News (11/4, story 3, 2:50, Pelley, 5.58M), reported that on Monday, HealthCare.gov “went down again for about hour and a half,” and “no one is sure why.” Pelley went on to say that “it turns out that even when the website works it may not be secure enough to protect privacy,” and Sharyl Attkisson reported that “the final required top-to-bottom security tests never got done.” Attkisson noted that the House Oversight Committee has “released an Obama Administration memo that shows four days before the launch...it granted itself a waiver to launch the website with a level of uncertainty deemed as a ‘high security risk.’” Georgetown law professor Lawrence Gostin, identified as a “big supporter of the Affordable Care Act,” was shown saying, “You could have somebody hack into the system, get your Social Security number, get your financial information.”

On NBC Nightly News (11/4, story 2, 2:45, Williams, 7.86M), Brian Williams reported that while the White House “says they have made a lot of progress over this past weekend fixing the Obamacare website...the sign-up page which has been plagued with problems from the start will go offline now every day from 1:00 to 5:00 in the morning...while that so-called tech surge team works to get it right.” Williams added that it is “also...becoming clear the problems with the website cannot be avoided by applying on the phone or in person as the President has been suggesting.” Peter Alexander went on to report that “internal Obama Administration memos showed that won’t solve the problem” because “the same portal is used to determine eligibility no matter how the application is submitted – paper or online.”

Reuters (11/5, Rampton, Holland) notes that in remarks at an Organizing for Action event Monday, President Obama said, “There are a whole range of things that we’re going to need to do once we get this fixed to talk about federal procurement when it comes to IT and how that’s organized.”

Politico (11/5, Kenen, 467K) reported that in testimony prepared for a Senate hearing on Tuesday, CMS Administrator Marilyn Tavenner says, “We are seeing improvements each week and by the end of November the experience on the site will be smooth for the vast majority of users.” Politico (11/5, Millman, 467K) also covered

CMS's response to media inquiries about the outages.

Cutler Warned Summers In 2010 That Administration Officials Were Incapable Of Implementing ACA. On Monday morning, CBS News (11/5, 3.87M) reported that in 2010, Harvard economics professor David Cutler, who "worked on the Obama 2008 campaign and was a valued outside health care consultant" for the White House, wrote to then-NEC director Larry Summers: "I do not believe the relevant members of the administration understand the president's vision or have the capability to carry it out." According to CBS, Cutler warned that "no one was in charge who had any experience in complex business start-ups," and "also worried basic regulations, technology and policy coordination would fail."

Yale Law School Peter Schuck, author of "Why Government Fails So Often, and How It Can Do Better," has an op-ed in this morning's Wall Street Journal (11/5, Schuck, Subscription Publication, 5.91M) titled, "The ObamaCare Website Failure Was Inevitable."

ADMINISTRATION LAWYERS CONCERNED ABOUT MEASURE RESTRICTING SURVEILLANCE PROGRAMS. The Wall Street Journal (11/4, Favole, Subscription Publication, 5.91M) reports that top Administration intelligence lawyers criticized a bipartisan measure to restrict US surveillance programs saying the measure goes too far. According to the lawyers, who testified at a hearing of the Privacy and Civil Liberties Oversight Board, the proposal is likely to prevent the collection of key telephone information and limit the ability of the government to investigate individuals.

Reuters (11/5, Selyukh) reports that the attorneys said the US government is open to changes to the phone and Internet surveillance programs provided that those changes do not undercut the effectiveness of the programs. After the hearing, Board Chairman David Medine said, "I think we've learned a lot about some potential reforms that the government was amenable to." The Washington Times (11/5, Waterman, 417K) also reports on the hearing.

Officials: Metadata Collection Must Continue As Administration Mulls Spying Changes. The New York Times (11/5, Sanger, Subscription Publication, 9.61M) reports that while the Obama Administration has said it is "considering reining in a variety of National Security Agency practices overseas," for now, the President and his top advisers "have concluded that there is no workable alternative to the bulk collection of huge quantities of 'metadata,' including records of all telephone calls made inside the United States." The Administration has suggested that it "may hold that information for only three years instead of five while it seeks new technologies that would permit it to search the records of telephone and Internet companies, rather than collect the data in bulk in government computers," but NSA Director Gen. Keith Alexander "has told industry officials that developing the new technology would take at least three years."

ADMINISTRATION TO RECONSIDER CARBON-COST ESTIMATES. Bloomberg News (11/5, Drajem, 1.91M) reports the Administration on Monday said it would "revise and open for public comment its estimate of the social cost of carbon," which is used by agencies to "calculate the benefits of regulations to address climate change." The move comes after "complaints from industry lobbyists" that the estimate, last revised in May, "exaggerated the potential costs of rising seas and droughts from climate change to justify regulations that would impose a high up-front cost for manufacturers and the energy sector."

Senate GOP Questioning Administration Input Into IPCC Report. The Daily Caller (11/5, Bastasch, 422K) reports that Senate Republicans "question" the Administration after reports that US officials "tried to suppress the 15-year global warming hiatus" in the Intergovernmental Panel on Climate Change report. The AP, the Caller says, reported back in September that the Administration joined with several European nations to lobby the IPCC to "omit or downplay data showing that global warming stopped in 1998." GOP senators have sent a letter to EPA Administrator Gina McCarthy, "questioning her knowledge of these international lobbying efforts."

Senate Democrats Pushing Renewables. The Daily Caller (11/5, Bastasch, 422K) reports Senate Democrats "have begun a renewable energy blitz," introducing a pair of bills "mandating an increase in renewable use through 2025." Sens. Tom Udall and Mark Udall introduced a bill last week that would call for 25% of the nation's energy to come from renewable sources by 2025. A similar bill was introduced by Sen. Ed Markey.

Four Colorado Towns To Vote Tuesday On Banning Fracking. The Wall Street Journal (11/4, Gold, Bryson,

Subscription Publication, 5.91M) reports that four towns in Colorado will hold votes on Tuesday to decide whether to ban fracking within their borders in "what many here say could be a precursor to a statewide referendum on fracking next year." While Vermont and New York have already moved to block fracking, Colorado "would be a bigger test of whether the oil and gas industry and its supporters can surmount growing opposition from some communities and national environmental groups."

More Commentary. In an op-ed for the Wall Street Journal (11/5, Shultz, Smith, Subscription Publication, 5.91M), George P. Shultz and Frederick W. Smith write that protecting domestic energy security is vital to defending the national interest, and the energy revolution of the last decade has given the US the means of doing so. They argue that the combination of rising US production and a drop in consumption due to new technologies, such as alternatively fueled vehicles, could see the US as essentially energy independent. However, the pair cautions that continuing this trend will require a national effort, and they suggest that the US establish oil displacement as a metric to measure success.

In his column for the Wall Street Journal (11/5, Subscription Publication, 5.91M), Bret Stephens says that leaks show a new IPCC report projects a consistent drop in crop yields in coming decades due to global warming, along with a rising demand for food. Combined, the report says, these events could put food supplies in jeopardy. Stephens says that similar predictions were made in the 1960s and 1970s, but the opposite turned out to be true – food output is up massively since then. Stephens says that despite the predictions, it is unlikely that the world will grow hungrier in the coming decades.

Editorial Wrap-Up:

NEW YORK TIMES. "Toward Ending Workplace Discrimination." In an editorial, the New York Times (11/5, Subscription Publication, 9.61M) calls ENDA an "overdue measure" and says that the Republicans who voted in favor of it "put to shame colleagues in their party who are still mired in intolerant thinking and too scared of Tea Party reactionaries to do the right thing."

"Mr. Kerry Fumbles In Egypt." An editorial in the New York Times (11/5, Subscription Publication, 9.61M) argues that Secretary of State Kerry's visit to Egypt "served only to add to the confusion over the Obama administration's policy toward this critically important Arab nation." The Times argues that it is important for the US and Egypt "to keep trying to work together," but both nations must "be clear about their differences, especially on what the word democracy means." Kerry, says the Times, "has muddied the waters."

"Arming The T.S.A. Is Not A Solution." An editorial in the New York Times (11/5, Subscription Publication, 9.61M) opposes calls to arm TSA screeners, arguing that the move "seems both overly reactive to the Los Angeles shooting and impractical." Noting that the TSA "doesn't train its agents to use firearms or recruit employees who would know how to handle themselves in a shootout," the Times says it would be "extremely costly for the agency to reimagine itself as an airport terminal police force."

"Election Day Choices."

WASHINGTON POST. "Red Blood On A Blue Shirt." In an editorial, the Washington Post (11/5, 4.28M) praises the efforts of TSA officers, arguing that last week's shootings should "encourage Americans to appreciate those who do the thankless work of running the airline security system Congress set up." The Post calls the officers "conspicuous symbols of a security system that, though necessary to make terrorist attacks and hijackings more difficult, some Americans detest," and says that "Americans should appreciate, not disrespect" them.

"Kerry's Diplomatic Games." In an editorial, the Washington Post (11/5, 4.28M) argues that Secretary of State Kerry's assertion that Egypt's military government is implementing the "road map" and moving toward democracy ignores "the fact that its last elected leader and thousands of his supporters are now political prisoners," overlooks "the reality that opposition media have been shut down," and "skips over the rigging of the constitution by the military and that leading secular liberal politicians...have been driven out of the country." The Post says it is clear that the Obama Administration "will accept and do business with the new autocracy that Gen. Sissi is constructing," and argues that they should "be honest about it," because "Kerry's embrace of the regime's empty

promises of democracy only makes him appear foolish — or, perhaps, as cynical as the generals."

"The Post's Va. Endorsements."

WALL STREET JOURNAL. "A Federalism Watershed." The Wall Street Journal (11/5, Subscription Publication, 5.91M) editorializes that the Supreme Court need to establish clear limits on treaty interpretation so that Federal officials are not able to use treaties with foreign nations to usurp state powers. Without limits, the Wall Street Journal fears that the treaty power will destroy Federalism.

"It's Only Money." The Wall Street Journal (11/5, Subscription Publication, 5.91M) editorializes that although SAC Capital will pay record penalties and has agreed to plead guilty to criminal insider-trading charges, it is unlikely that any individuals will plead guilty to any criminal wrongdoing. The Wall Street Journal criticizes that Justice Department's statement that no institution is too big to jail, saying that institutions don't go to jail—people do. While the SEC has brought a civil case against CEO Steven A. Cohen for failure to supervise, the end result is that Cohen is free to continue with his life after agreeing to the \$1.8 billion settlement, after which he will remain a multibillionaire.

"North Korean Horror Show." The Wall Street Journal (11/5, Subscription Publication, 5.91M) editorializes that a UN commission has finally begun to investigate human rights violations in North Korea, recounting testimony delivered in Washington by a young woman from North Korea who fled to China after most of her family died of starvation, was caught by Chinese authorities, and repatriated to North Korea where she was placed in a detention center. The young woman asked the commission not to send humanitarian aid to North Korea, as the aid goes to the rulers rather than the people who need it. The commission said that it would consider her testimony and will report its findings in March.

"China's Desperate 'Terrorists.'" The Wall Street Journal (11/5, Subscription Publication, 5.91M) editorializes that an Uighur family burned themselves to death near Beijing's Tiananmen to protest against Chinese rule, casting doubt on claims from Chinese authorities that the incident was a terrorist attack. Chinese authorities have blamed the Turkestan Islamic Movement for the incident and used it called for a renewed crackdown on Islamic extremism. The Wall Street Journal states that while Beijing's repressive policies have driven some Uighurs to acts of terrorism, there is little evidence of organization behind the attacks and that the Uighurs' anger is not based on radical ideologies, and that it stems from practical concerns, cultural injustices, and human rights abuses under Chinese rule.

Washington Schedule:

TODAY'S EVENTS IN WASHINGTON.

White House:

PRESIDENT OBAMA —Receives the Presidential Daily Briefing with the Vice President, Oval Office, closed press; meet with business leaders with the Vice President, The Roosevelt Room, pool spray at the top; meets with the Vice President for lunch, Private Dining Room, closed press; departs the White House en route Bethesda, Maryland, South Lawn, open press; arrives Bethesda, Maryland, in-town travel pool; visits the Walter Reed National Military Medical Center, Bethesda, Maryland, closed press; visits Fisher House, Bethesda, Maryland, closed press; departs Bethesda, Maryland en route the White House, in-town travel pool; arrives at the White House, South Lawn, open press

VICE PRESIDENT BIDEN —Attends the Presidential Daily Briefing, Oval Office, closed press; meets with top business leaders, Roosevelt Room, closed press; meets with the President for lunch, Private Dining Room, closed press; hosts a reception with Dr. Jill Biden commemorating Breast Cancer Awareness Month, Naval Observatory, remarks at the top of the event are pooled press.

FIRST LADY MICHELLE OBAMA – Delivers remarks at the White House Diwali, open press.

US Senate: Senate Floor 10:00 a.m. — The Senate will convene and resume consideration of the motion to proceed to S.815, the Employment Non-Discrimination Act.

10 a.m. BANKING, HOUSING, AND URBAN AFFAIRS — Hearings to examine housing finance reform, focusing on protecting small lender access to the secondary mortgage market. Witnesses: Richard Swanson, President and CEO, Federal Home Loan Bank of Des Moines on behalf of the Council of Federal Home Loan Banks; William A. Loving, Jr., President and CEO of Pendleton Community Bank, Franklin West Virginia and Chairman of Independent Community Bankers of America; Bill Hampel, Senior Vice President and Chief Economist, Research & Policy Analysis, Credit Union National Association; Bill Cosgrove, CMB, President and CEO, Union Home Mortgage Company and Chairman-Elect of Mortgage Bankers Association; John Harwell, Associate Vice President of Risk Management, Apple Federal Credit Union, Fairfax, VA on behalf of the National Association of Federal Credit Unions. Location: 538 Dirksen.

10 a.m. HEALTH, EDUCATION, LABOR, AND PENSIONS — Hearings to examine the online Federal health insurance marketplace, focusing on enrollment challenges and the path forward. Witness: Marilyn Tavenner, Administrator, Centers for Medicare & Medicaid Services (CMS), U.S. Department of Health and Human Services. Location: 430 Dirksen.

10 a.m. JUDICIARY — Changing the Rules: Will limiting the scope of civil discovery diminish accountability and leave Americans without access to justice? Witnesses: Arthur R. Miller, Professor, New York University School of Law; Andrew Pincus, Partner, Mayer Brown; Sherrilyn Ifill, President and Director-Counsel, NAACP Legal Defense and Educational Fund, Inc. Location: 226 Dirksen.

2:30 p.m. AGRICULTURE, NUTRITION, AND FORESTRY — Subcommittee on Conservation, Forestry and Natural Resources hearings to examine wildfires. Witnesses: Jim Hubbard, Deputy Chief, U.S. Forest Service, Washington, DC; Davey Pitcher, President and CEO, Wolf Creek Ski Area, Pagosa Springs, CO; Chris Topik, Director, Restoring Americas Forests Program, The Nature Conservancy, Washington, DC; Tom Troxel, Executive Director, Intermountain Forest Association, Rapid City, SD; Sallie Clark, Incoming Vice President, National Association of Counties, Commissioner, El Paso County, CO. Location: 328A Russell.

2:30 p.m. COMMERCE, SCIENCE, AND TRANSPORTATION — The U.S. Aviation Industry and Jobs: Keeping American Manufacturing Competitive. Witnesses: Susan Kurland, Assistant Secretary for Aviation and International Affairs, U.S. Department of Transportation; Raymond L. Conner, President and Chief Executive Officer, Boeing Commercial Airplanes; Nicholas E. Calio, President and Chief Executive Officer, Airlines for America; Pete Bunce, President and Chief Executive Officer, General Aviation Manufacturers Association; Ed Wytkind, President, Transportation Trades Department, AFL-CIO. Location: 253 Russell.

2:30 p.m. ENVIRONMENT AND PUBLIC WORKS — Subcommittee on Oversight hearings to examine methane emissions from oil and gas operations. Witnesses: Panel I: Sarah Dunham, Director of the Office of Atmospheric Programs, Office of Air and Radiation, United States Environmental Protection Agency. Panel II: Dr. David Allen, PhD, Gertz Regents Professor in Chemical Engineering and Director of the Center for Energy and Environmental Resources, The University of Texas at Austin; Mark K. Boling, President, V+ Development Solutions, and General Counsel, Southwestern Energy Company; Dr. Vignesh Gowrishankar, PhD, Staff Scientist, Sustainable Energy, Natural Resources Defense Council; Darren Smith, Environmental Manager, Devon Energy Corporation; Dr. A. Daniel Hill, PhD, P.E., Department Head, Petroleum Engineering, Texas A&M University. Location: 406 Dirksen.

2:30 p.m. FOREIGN RELATIONS — Hearing on the Convention on the Rights of Persons with Disabilities. Panel One: Senator Kelly Ayotte (R-NH); Senator Mark Kirk (R-IL). Panel Two: Thomas J. Ridge, Former Secretary of Homeland Security & current chairman of the National Organization on Disability; Representative Tammy Duckworth (IL-8) & Lieutenant Colonel, Illinois Army National Guard; Richard Thornburgh, Former Attorney General of the U.S. & current Counsel, K&L Gates, LLP; Dr. Susan Yoshihara, Senior Vice President for Research & Director of the International Organizations Research Group, The Catholic Family & Human Rights Institute; Timothy L. Meyer, Assistant Professor of Law at the University of Georgia School of Law. Location: 419 Dirksen.

2:30 p.m. INTELLIGENCE — Closed hearings to examine certain intelligence matters. Location: 219 Hart.

US House: The House will be in recess for a Constituent Work Period until 2 p.m., on Tuesday, November 12th.

Other: AICPA NATIONAL TAX CONFERENCE – WERFEL — 7 a.m. Top IRS officials – including the Acting IRS Commissioner, one of the IRS operating division heads, the head of the Office of Professional Responsibility, and the IRS Taxpayer Advocate – will offer insights about preparations for the 2014 tax filing season, including guidance on the net investment income tax, DOMA, and tangible property regulations at the American Institute of CPAs premier tax conference. Also, hear discussions about taxpayer identity theft, reporting under FATCA (Foreign Account Tax Compliance Act) when bank reporting and individual reporting requirements become effective in 2014 and the legislative outlook. **Highlights:** 8:15 a.m. Danny Werfel, Acting Commissioner, Internal Revenue Service. 9:45 a.m. – 10:45 a.m. Faris Fink, Commissioner, Small Business/Self-Employed Division, IRS. 10:55 a.m. – 11:55 a.m. Sunita Lough, Director, Pre-filing and Technical Guidance, Large Business & International Priorities, IRS. 1 p.m. – 2 p.m. David Alito, Deputy Commissioner, Wage and Investment Division, IRS. 2:30 p.m. – 3:30 p.m. Nina Olson, National Taxpayer Advocate, IRS. 3:40 p.m. – 4:40 p.m. Karen L. Hawkins, Director, Office of Professional Responsibility, IRS. **Location:** Gaylord National Resort and Convention Center, 201 Waterfront Street, National Harbor, Md.

2013 CIPAC PLENARY — National Protection and Programs Directorate (NPPD) Acting Under Secretary Suzanne Spaulding will deliver remarks (8:35a) on the Departments efforts and priorities related to critical infrastructure at the 2013 Critical Infrastructure Protection Advisory Council (CIPAC) Plenary. NPPD National Cybersecurity and Communications Integration Center Director Larry Zelvin will participate in a panel discussion entitled **Response & Recovery (2:00p)**. **Location:** Walter E. Washington Convention Center, 801 Mt. Vernon Pl., NW.

CSIS – GLOBAL SECURITY FORUM 2013 — 8 a.m. – 5 p.m. The 2013 Global Security Forum. **Highlights:** 8:15 a.m. Keynote by Charles T. Chuck Hagel United States Secretary of Defense. 9:30 a.m. – 10:45 a.m. Remarks by: Ambassador J. Stapleton Roy Distinguished Scholar, Wilson Center, and former U.S. Ambassador to China; Charles W. Freeman III, Vice President, Rock Creek Global Advisors LLC. 1:15 p.m. Assistant Secretary for Terrorist Financing and Financial Crimes Daniel Glaser Participation in Panel Discussion on **What Role Should Financial Power Play in National Security?** **Location:** CSIS headquarters located at 1616 Rhode Island Avenue, NW.

HEALTH CARE INNOVATION CONFERENCE – HAMBURG — 8 a.m. – 12:30 p.m. Bloomberg Governments first health care summit, **Mind the Gap: Connecting Health Care Policy with Next Century Innovation.** **Speakers** include: Margaret Peggy Hamburg, Commissioner, U.S. Food and Drug Administration (11:40 a); John Sculley, CEO, Sculley Brothers LLC; Keith Dunleavy, President, CEO and Chairman, Inovalon; Elli Kaplan, CEO, Neurotrack; Doug Ulman, CEO, LIVESTRONG; Steve Downs, CTO, RWJF; Matthew Douglass, Co-Founder/VP Platform at Practice Fusion. **Location:** Ronald Reagan Building and International Trade Center, The Pavilion, 1300 Pennsylvania Ave. NW.

WASHPOST – DIGITAL DIVIDE – SPERLING, CLYBURN — 8:30 a.m. – 11:30 a.m. Gene Sperling, Baltimore Mayor Stephanie Rawlings-Blake, FCC Commissioner Mignon Clyburn, Richard Culatta and Rep. Doris Matsui among speakers addressing why the gap and access matter and what can be done about it. **Speakers** include: Richard Culatta, director, Office of Educational Technology, U.S. Department of Education. **Location:** The Washington Post, 1150 15th Street NW.

Contacts: Jennifer Lee 202-334-5207 desk (301-503-7787 cell)

NTSB – TEXAS PARADE FLOAT ACCIDENT — 9:30 a.m. The National Transportation Safety Board will meet to determine the probable cause of the November 2012 fatal grade-crossing accident involving a parade float in Texas. **Background:** At about 4:35 p.m. CT, on November 15, 2012, a truck-tractor combination unit being used as a Hunt for Heroes parade float was struck by a Union Pacific freight at a grade crossing in Midland, Texas. As a result of the accident, four parade float passengers were killed, and five float passengers were seriously injured. Additionally, eight float passengers and a deputy sheriff received minor injuries. The two train crewmembers, the combination unit driver, and seven other float passengers were not injured. **Location:** NTSB Board Room and Conference Center, 429 L'Enfant Plaza, SW.

FRANCHISE INDUSTRY – HIRING VETERANS EVENT — 10 a.m. National event including the International Franchise Association (IFA), Small Business Administration, White House Joining Forces Initiative, Military

Officers Association of America, (MOAA) and the UPS Store will take place at U.S. Navy veteran Wade Franklins the UPS Store. Location: The UPS Store at 3033 Wilson Blvd. Suite E, Arlington, VA 2220.

DOD – HAGEL – BELGIUM — 11:30 a.m. Secretary of Defense Chuck Hagel hosts an honor cordon to welcome Belgium's Minister of Defense Pieter de Crem to the Pentagon. The cordon will be held on the steps of the Pentagon River Entrance. Journalists without a Pentagon building pass will be picked up at the Pentagon River Parking Pedestrian Bridge only. Plan to arrive no later than 30 minutes prior to the event; have proof of affiliation and two forms of photo identification. Please call 703-697-5131 for escort to the cordon.

CDC TELEBRIEFING – COLORECTAL CANCER — 12 p.m. Colorectal cancer screening (CRC) saves lives, but only if people get tested. A new Vital Signs report shows about 23 million adults have never been tested, as recommended. DIAL IN: Media: 888-795-0855. Non-Media: 800-369-1605. INTERNATIONAL: 1-630-395-0331. PASSCODE: CDC Media

PETERSON – CYCLICAL UNEMPLOYMENT — 12:30 p.m. The Peterson Institute will host a luncheon discussion on Keeping Cyclical Unemployment from Becoming Structural Inequality. While measured unemployment is slowly declining in the US and much of the advanced world, both long-term and youth unemployment remain a particular concern, with huge implications for already unprecedented levels of income and wealth inequality. Location: Bergsten Conference Center at the Institute at 1750 Massachusetts Avenue.

Last Laughs:

LATE NIGHT POLITICAL HUMOR.

Jay Leno: "You all turn your clocks back an hour over the weekend? You know, it is easier to remember spring ahead, fall back. It's like trying to log onto Obamacare. You spring ahead, make a little progress, then you fall back."

Jay Leno: "And NASA's next Mars mission is set to launch from Cape Canaveral on November 18th. It will be manned by a group of NASA scientists who obviously don't want to see their relatives on Thanksgiving."

Jay Leno: "Well, authorities in Columbus, Ohio, say they may have encountered their first case of the flesh eating drug krocodil. Have you heard about this drug? Krocodil? It's made by mixing codeine with oil and gasoline, and it rots your skin. It's a flesh eating drug. I guess this is for people who feel crystal meth's too hoity-toity."

Conan O'Brien: "The Obamacare website is still having problems. They just announced it will not be accessible at night due to maintenance. Also it will not be accessible during the day due to it sucking."

Jimmy Fallon: "President Obama gave his weekly address on Saturday and of course he talked about the economy. In fact, he said he'll do anything to increase job growth which got weird when he looked directly into the camera and he said, 'And I mean anything.'"

Jimmy Fallon: "Speaking of Obama, it turns out that Obamacare is surprisingly popular with prostitutes. Which is true. Because it's much cheaper than traditional insurance plans. I guess that explains its new name, 'Ho'bamacare. Just leave your co-pay on the dresser."

Jimmy Fallon: "Pretty important week for our pal, New Jersey Governor Chris Christie. We love Governor Christie. Well he's hoping to win re-election tomorrow and polls show he's winning by a 19-point margin. Christie was really excited to hear that, but only because he thought someone said margarine."

Stephen Colbert: "Folks, nation, the big news continues to be the slow motion train wreck that is the rollout of the President's signature legislation the Affordable Care Act ... Everyone is getting screwed by the website but the true victim of this healthcare disaster are America's most vulnerable, the men. When it comes to medical care men always get the short end of the long end of the scope. You see, folks, up until now health insurance in America has always struck a delicate balance. Women paid higher premiums than men and in return men paid

less. The system worked. But now folks, all that's changing. Obamacare will have men and women paying the same amount for healthcare but since women live longer, and have babies shouldn't they pay more? Under Obamacare men will pay the same amount as women and yet we still don't get to pass cantaloupe with toenails through our genitals."

DOI in the News:

SECRETARY JEWELL TOUTS REPORT SAYING REFUGES CREATED OVER \$2 BILLION IN ECONOMIC ACTIVITY IN 2011. The [E&E Daily](#) (11/5) reports that "wildlife refuges generated \$2.4 billion in 2011," according to a new report from the FWS. The article notes that "nearly 75 percent of that amount comes from recreational activities such as picnicking, birding and hiking," and "the rest is attributed to fishing and hunting." According to the report, "the country's 561 wildlife refuges also employ more than 35,000 people and produce \$343 million in local, state and federal taxes."

The [Washington Post](#) (11/5, 4.28M) reports that Interior Secretary Sally Jewell "released the report Tuesday during a visit to a wildlife refuge in Minnesota." Jewell visited the Minnesota Valley National Wildlife Refuge on Tuesday, "part of a weeklong push to highlight the role of public lands in boosting ecotourism and conservation." In a statement, Jewell said that the wildlife refuge system is not only "the world's greatest network of lands dedicated to wildlife conservation, but it is also a powerful economic engine for local communities across the country." Jewell noted that "refuge visitors come from around the world and support hundreds of local restaurants, hotels and other businesses."

The [Minneapolis Star Tribune](#) (11/6, Marcotty, 1.14M) reports that "Minnesota was the first stop on a national trip designed to highlight her priorities, announced in her first major speech last week in Washington D.C." Jewell "laid out a long-term conservation strategy designed to balance economic development of oil and gas and other resources with protection of natural resources, saying her agency will ensure that both are pursued during a

period of climate change, tight budgets and increasing demands on land and water." She also noted that "Congress has not protected 'a single acre of land' since 2010, promising that if Congress doesn't, President Obama will through the exercise of his executive powers."

KSJR-FM Collegeville, MN (11/5, 34K) reports that Jewell said "she was frustrated with Congress over the federal government shutdown and cuts being proposed to two conservation funds." Jewell said, "Both of those were goose-egged. Zero. And the Fish and Wildlife Service had its budget cut by 27 percent. It won't stick, I hope. It's absurd, but if you care about this it's important that you let your elected officials know that these are important tools for Minnesota to protect what is important to Minnesota."

AP coverage was picked up by the Boston Herald (11/6, 643K), the Greenfield (IN) Daily Reporter (11/6, 31K), the Huffington Post (11/5, 11.54M), Time (11/5, 13.4M), and WUSA-TV Washington (11/6, 95K).

FORMER INTERIOR SECRETARY WARNS AGAINST CREATING MORE NATIONAL PARKS. The E&E Daily (11/5) reports that former Interior Secretary Gale Norton has come out against the creation of more national parks. Although Norton said she hadn't read Sen. Tom Coburn's recent report on the NPS' \$11.5 billion maintenance backlog, in "which he argued that Congress should place a moratorium on new national parks until the agency can take care of the 401 parks it already manages," Norton "echoed Coburn's assertion that creating more parks has made less money available to preserve the country's 'true gems.'" In an interview after a forum on energy hosted by the Conservation Leadership Council, Norton said, "Definitely, we should think carefully before establishing any new parks. We've had a proliferation of parks without considering long-term funding, and that is a very important part of the overall budget solution." The article notes that "Norton's comments contrast with those of current Interior Secretary Sally Jewell, who announced last week that the Obama administration will unilaterally protect the nation's treasured lands if Congress fails to act."

FORMER SALAZAR AIDE TO LEAD CAP'S PUBLIC LANDS PROJECT. The E&E Daily (11/5) reports that "an aide to former Interior Secretary Ken Salazar will lead the left-leaning Center for American Progress' public lands work." Matt Lee-Ashley, who "became a senior fellow at CAP in June, will replace Christy Goldfuss at the Public Lands Project, an initiative that CAP launched in spring 2011 to preserve open spaces and promote the expansion of renewable energy."

INTERIOR GRANTS \$1.6 MILLION TO BOOST BAY HABITAT. The Cape May County (NJ) Herald (11/6, 6K) reports that "migratory birds and horseshoe crabs along with residents of Reeds Beach and Pierce's Point received great news at the Middle Township Committee meeting Nov. 4." Deputy Mayor Timothy Donohue announced the receipt of \$1.6 million from the Interior Department. Donohue "explained that the money will be used to build berms and restore flats before the arrival, next spring, of horseshoe crabs and the migrating birds that feed on them."

GOV. LOLO OUTLINES NEED FOR INTERIOR FUNDING TO AID EDUCATION, RENEWABLE ENERGY. The Samoa News (11/6, 682) reports that "funding is needed for the American Samoa Power Authority, which is aggressively advancing the implementation of recommendations from the local Renewable Energy Plan with specific focus on the solar option, said Governor Lolo to Eileen Sobeck, Acting Assistant Secretary Office of Insular Affairs last week." Lolo, "in his lengthy letter to OIA, explained the need for funding in numerous areas in order to advance the territory's quality of life."

Also reporting on the story is the Pacific Islands Report (11/11, 2K).

ALASKA APPEALS TO SUPREME COURT IN "KATIE JOHN" CASE. The Alaska Dispatch (11/5, 7K) reports that "on Monday, the state of Alaska filed a petition for writ of certiorari with the U.S. Supreme Court, making clear its intention to appeal a case that spans decades and disputes over who has the right to manage many of Alaska's waterways – the state, or the federal government and by extension, Alaska's Native peoples." A day later, the Alaska Federation of Natives "announced its intent to oppose that petition, saying the appeal would be an affront to Alaska Natives' subsistence rights, and an 'assault upon the people of Alaska who depend upon hunting, fishing and gathering to feed their families.'" The article notes that Alaska is petitioning Interior Secretary Sally Jewell for a "response in the case."

Also reporting on the story is the Anchorage (AK) Daily News (11/5, 198K).

ADDITIONAL COVERAGE OF PETITION SEEKING TO MAKE BOULDER-WHITE CLOUDS A MONUMENT.

Additional coverage of the petition seeking to create the Boulder-White Clouds National Monument was provided by the Idaho State Journal (11/6, 54K).

America's Great Outdoors:***National Park Service:***

NPS OFFICIALS CONSIDER IMPROVING WIRELESS ACCESS. The Wall Street Journal (11/6, Campoy, Subscription Publication, 5.91M) reports that NPS managers are embracing wireless technology, such as online park information access, wildlife sighting alerts, and weather and traffic advisories. However, parks must also contend with minimizing adverse impacts on the environment and park-goers' experiences, in particular the impact of discourteous behaviors. Businesses operating within park grounds advocate for increased wireless access.

FORMER NATIONAL MALL SUPERINTENDENT TO BE NEXT CHIEF OF STATUE OF LIBERTY MONUMENT.

The E&E Daily (11/5) reports that John Piltzecker, the former superintendent of Washington, D.C.'s National Mall and Memorial Parks, has been tapped as the next chief of the Statue of Liberty National Monument and Ellis Island. Piltzecker will take the reins from David Luchsinger, who is planning to retire in January. In a statement, Piltzecker said, "It's a pleasure to return to the New York City metropolitan area, where I began my National Park Service career. I am looking forward to this new opportunity. It is an honor to work with the dedicated staff and nonprofit and business partners who help to share these icons with the public."

GRAND TETON NATIONAL PARK SUPERINTENDENT RETIRING. The Jackson Hole (WY) News & Guide (11/6, 1K) reports that retiring Grand Teton National Park Superintendent Mary Gibson Scott said that "of all the places she's been a public servant in the last 33 years, 'this park is one of the most political animals I've ever seen.'" Scott cited "political pressure" because of the parks' many "incongruous uses, including a commercial airport, hunting and grazing that are allowed by law." Moreover, "the superintendent also answers to Rockefeller heirs who guard their family's 'investment' in the Grand Teton gift."

NEW SITES OFFER WEATHER INFORMATION TO BLUE RIDGE PARKWAY VISITORS. The Washington Post (11/5, 4.28M) reports that people seeking to visit the Blue Ridge Parkway "in the winter will be able to check weather forecasts made specifically for the road." The Blue Ridge Parkway Foundation "worked with the parkway and two other groups to set up BRPweather.com and BRPwebcams.org." They "hope visitors will use the sites so they avoid being stopped by gates and signs reading 'parkway closed for winter weather.'"

NPS AWARDS CONCESSION CONTRACT TO NEW OPERATOR AT MABRY MILL. The Roanoke (VA) Times (11/6, 259K) reports that the NPS announced Tuesday that Florida-based Cape Leisure Corp. has been awarded a 10-year concession contract to manage Mabry Mill on the Blue Ridge Parkway in Floyd County. According to the article, Cape Leisure will "take over operations at the mill on Jan. 1."

Bureau of Land Management:

COURT STRIKES DOWN BUSH-ERA BLM UTAH PLAN. The E&E Daily (11/5) reports that the BLM "failed to minimize impacts on sensitive soils, streams, wildlife and archaeological sites in south-central Utah when it authorized nearly 4,300 miles of off-highway vehicle (OHV) routes in 2008, according to a ruling yesterday by a federal district judge that could have far-reaching impacts in the Beehive State." Judge Dale Kimball in Salt Lake City "struck down" the BLM's Richfield resource management plan (RMP), "one of six plans covering nearly 12 million red-rock acres in southern and eastern Utah that were finalized in the waning months of the George W. Bush administration but later challenged in court by environmental groups." The holding is "a major blow to BLM, Utah, its counties, motorized recreation groups, and oil and gas companies that defended the plan in court."

The Salt Lake (UT) Tribune (11/6, 343K) reports that "champions of wilderness and historic preservation on Monday" hailed the decision. Southern Utah Wilderness Alliance's legal director Stephen Bloch, said, "It's a huge victory for Utah redrock wilderness. This is just the first of six cases, but this is a landmark decision that should

resonate with Interior that all the plans suffer from the same legal flaws.”

However, the Wall Street Journal (11/6, Carlton, Subscription Publication, 5.91M) reports that Garfield County Commissioner Leland Pollock said, “This is a vast amount of land with very little access. There is enough wilderness as it is.”

FILM “AMERICAN MUSTANG” TO HAVE WORLD PREMIERE ON NOVEMBER 7. The Denver Post (11/6, Davidson, 949K) reports that the film “American Mustang” will have its world premiere Nov. 7 at the Starz Denver Film Festival

ADDITIONAL COVERAGE: BLM IDENTIFIES SUSPECT IN POMPEYS PILLAR VANDALISM. Additional coverage of the BLM’s identification of the “man suspected of carving his name and the date at Pompeys Pillar National Monument last month” was provided by the Ravalli (MT) Republic (11/6, 19K), the Daily Mail (UK) (11/6, 2.92M), WJON-AM St. Cloud, MN (11/6, 641), WCCO-AM Minneapolis (11/5, 78K), KXLF-TV Butte, MT (11/6, 2K), and KRTV-TV Great Falls, MT (11/6, 7K).

ADDITIONAL COVERAGE OF BLM’S SAGE GROUSE DRAFT STATEMENT. Additional coverage of the BLM’s regional draft environmental impact statement for the sage grouse was provided by the Elko (NV) Daily Free Press (11/6, 22K).

Fish and Wildlife Service:

OBAMA ADMINISTRATION VOWS “FULL COURT PRESS” ON WILDLIFE TRAFFICKING. The E&E Daily (11/5) reports that the Obama Administration will tackle wildlife trafficking with a “full court press,” engaging federal agencies and countries as “part of an intensified focus on an illicit trade that has ballooned in recent years, administration officials said today.” Officials from the departments of State, Justice and the Interior “courted the foreign media in a briefing this afternoon that emphasized the administration’s commitment to the issue.” The article notes that “the first step” is “destroying 6 tons of ivory next week in a symbolic display.” By destroying “the stockpile – a culmination of 25 years of confiscating tusks and carvings – the” FWS will be “destroying something of immense beauty,” FWS Director Dan Ashe said, which “will send a strong message to the rest of the world on where the country’s priorities lie.”

The New York Times (11/6, Huetteman, Subscription Publication, 9.61M) reports that “blaming increased demand for a devastating rise in poaching, largely by organized crime syndicates, members of a task force created by President Obama told reporters in a briefing at the National Press Building that they wanted to send a message of zero tolerance and reduce the appeal of ivory, rhinoceros horns and other illicit animal products.” Robert G. Dreher, acting assistant attorney general for the environment and natural resources, said, “By destroying our domestic stocks of ivory, we send a very clear signal that these illegally traded products should not be perceived as items of value.”

In its “E2 Wire” blog, The Hill (11/6, 194K) reports that “agencies plan on reaching out to China and Thailand — both countries have strong cultural ties to ivory — in curbing demand for the product.” Kerri-Ann Jones, assistant secretary for Oceans and International Environmental and Scientific Affairs, said “a partnership across US agencies and with countries that are a part of the supply, demand and transit in the illegal trafficking chain will work together under the executive order issued by President Obama earlier this year.” Jones said, “How do you reduce demand. With a full court press to address and stop the problem.”

Also reporting on the story is Time (11/5, 13.4M).

RESEARCHERS FIND ASIAN CARP DNA IN WATER SAMPLE TAKEN FROM LAKE MICHIGAN. The Washington Post (11/5, 4.28M) reports that “a water sample from Lake Michigan’s Sturgeon Bay in Wisconsin has tested positive for DNA from invasive Asian carp, although it’s unknown whether the genetic material came from a live fish, scientists said Tuesday.” The article notes that “it’s the second positive DNA hit for the feared carp detected in Lake Michigan in recent years, as experts work to determine how far the voracious fish have

advanced toward the Great Lakes.” The Wisconsin DNR and the FWS will “take more samples from the area in hopes of determining whether the positive hit was a fluke or something worse.”

Also reporting on the story are the [Detroit Free Press](#) (11/6, Flesher, 794K), [ABC News](#) (11/6, 671K), and [WJBK-TV Detroit](#) (11/6, 83K).

CATTLE GRAZING KEEPS WOLVES IN CROSSHAIRS. For [Forbes](#) (11/5, 6.03M), James McWilliams writes that “whatever techniques are eventually used to keep wolves off the headlines and in the wilderness, critics of wolf hunting should not lose sight of the fact that, while hunters are an easy (and perhaps legitimate) target for their ire, a lead poisoned wolf in 2013 is ultimately the victim of a century of disastrous decisions regarding land use—specifically, the use of livestock on the landscape.” According to McWilliams, “eliminating grazing permits for western cattle ranchers would negatively impact no more than 10 percent of the beef industry in the United States.”

ADDITIONAL COVERAGE OF LESSER PRAIRIE-CHICKEN RANGE-WIDE CONSERVATION PLAN. Additional coverage of the Western Association of Fish and Wildlife Agencies’ Lesser Prairie-Chicken Range-Wide Conservation Plan was provided by the [Quay County \(NM\) Sun](#) (11/5).

US Geological Survey:

USGS, ODNR COLLABORATE ON GRASS CARP STUDY. The [Farm and Dairy](#) (11/6, 88K) reports that the USGS and the Ohio Department of Natural Resources “collaborated on a recent USGS study on the origins of grass carp caught in the Lake Erie basin.” The study “analyzed four grass carp provided by commercial fishermen to ODNR from Ohio’s Sandusky River and concluded through bone analysis that the fish were at least one year of age and likely produced through natural reproduction in the Lake Erie basin.”

Securing America’s Energy Future:

Renewable Energy:

CONSERVATIVE GROUP URGES CONGRESS TO LET WIND ENERGY TAX INCENTIVE LAPSE. The “E2 Wire” blog of The Hill (11/6, Barron-Lopez, 194K) reports that over “100 organizations under the Americans for Prosperity think tank called on Congress to let federal support for the wind energy industry expire.” On Monday, the conservative coalition “sent a letter to Congress...asking lawmakers to allow the wind Production Tax Credit, which gives wind power owners a tax credit per kilowatt-hour of electricity they produce, to expire.” The letter stated, “The wind industry has very little to show after 20 years of preferential tax treatment; it remains woefully dependent on this federal support.”

OBAMA ADMINISTRATION’S FOCUS ON RENEWABLE ENERGY CRITICIZED. In an editorial, the [Washington Times](#) (11/6, Times, 417K) criticizes the creation of the new Council on Climate Preparedness and Resilience. The paper also notes that the BLM “held a first-ever auction of permits to produce solar power on federal land last month, and the Denver Business Journal reports that no one showed up.”

Offshore Energy Development:

REPORT PLACES BLAME FOR DEADLY GULF ACCIDENT ON BLACK ELK ENERGY. The [E&E Daily](#) (11/5) reports that “in a harsh review of what led to a deadly accident on a Gulf of Mexico oil rig last year,” the BSEE and the Coast Guard “place the blame for what they describe as an avoidable incident squarely on the backs of Black Elk Energy and the companies it hired to do construction work on the platform.” In a 54-page report, the agencies “described a culture of complacency with safety at both Black Elk and the contractors and subcontractors assigned to work on the rig.” The report found that “though Black Elk had safety procedures in place, it failed to communicate them to the companies working on the rig,” and “contractors and subcontractors paid too little attention to safety or were otherwise unappreciative of the dangers inherent in the work they were to perform.”

Also reporting on the story are the [Baton Rouge \(LA\) Advocate](#) (11/6, 259K), the [Galveston County \(TX\) Daily News](#) (11/6, 4K), the [Houston Business Journal](#) (11/6, Subscription Publication, 91K), the [Philippine Daily Inquirer](#) (11/6, 793K), the [Oil and Gas Journal](#) (11/6, 1K), the [Rigzone](#) (11/6, 12K), the [Oil Price](#) (11/6, 2K), [KRIV-TV Houston](#) (11/6, 20K), and [WWL-TV New Orleans](#) (11/6, 107K).

ARCTIC STUDY TARGETS IMPACTS OF OIL INDUSTRY INSTALLATIONS AROUND PRUDHOE BAY. The [Oil and Gas Journal](#) (11/6, 1K) reports that “an examination of the effects of oil industry installations around Prudhoe Bay is one of two studies of Arctic sustainability selected for funding by a joint program of the National Science Foundation, US Bureau of Ocean Energy Management, and international partners.” According to a BOEM statement, one of the two new studies “will measure and assess long-term cumulative impacts of increases in the oil and gas industry infrastructure in the Prudhoe Bay area of Alaska, with the goal of reducing the impacts of future development in the region.” The other study will “examine the vulnerability and resilience of the walrus population off Alaska’s North Slope.”

Tackling America’s Water Challenges:

COLORADO RIVER SUFFERING THROUGH WORST DROUGHT IN MORE THAN A CENTURY. The [High Country News](#) (11/6, 74K) reports on the Colorado River, which has suffered “through its worst drought in more than a century,” but “may flow to the sea once more.”

High-flow Release Scheduled For Glen Canyon Dam. The [Arizona Daily Sun](#) (11/6, 33K) reports that “next week, Glen Canyon Dam will start pumping an Olympic-sized swimming pool worth of water into the Colorado River every other second.” According to the article, “the flooding, part of a long-planned high-flow release experiment, will last from Monday to Saturday.” The article notes that “the experiment is an attempt to replicate the high-flow conditions that would naturally be seen in the Grand Canyon before the dam, where sediment rich water creates beaches and critical wildlife habitat.”

Also reporting on the story are the [Arizona Daily Star](#) (11/6, 335K), the [Ogden \(UT\) Standard-Examiner](#) (11/5, 147K), and the [Cache Valley \(UT\) Daily](#) (11/6, 639).

BOR Regional Director Attends IID Meeting. [KXO-AM](#) El Centro, CA (11/6) reports that Terry Fulp, the BOR Regional Director, attended an IID Board meeting and “made a presentation on the Colorado River, the drought affecting the River, water shortage criteria, and future predictions on water levels of Lake Mead and Lake Powell, which he said were not as dire as first thought.” Fulp then “received an earful. Imperial Irrigation District Board President Matt Desert and Director James Hanks told the Regional Director the IID was concerned about water storage, the salinity of Colorado River Water, and the Bureau’s help and understanding on efforts to restore the Salton Sea.”

ADDITIONAL COVERAGE OF BAY DELTA CONSERVATION PLAN. Additional coverage of the Bay Delta Conservation Plan was provided by the [Sacramento \(CA\) Bee](#) (11/6, 749K), the [Sacramento \(CA\) Bee](#) (11/6, 749K), the [San Luis Obispo \(CA\) Tribune](#) (11/5, 126K), and the [Bay Area \(CA\) Indymedia](#) (11/5, 2K).

COLUMNIST SAYS TO LOOK TO ORIGINAL DOCUMENTS FOR ANSWERS. In his column for the [Ronan Valley \(MT\) Journal](#) (11/6, 22K), Gene Erb says to “look to the Department of Interior records: Circulars No.102, 178 and 108-194 that define the laws to be followed by homesteaders who were enticed to this area by the federal government for the purpose of creating a ranching and farming base for the nation.” He claims that The Interior Department has “taken or helped themselves to our Reclamation Funds (called net power revenues), since 1915 or before.” According to Erb, “now we can understand why the BPA is taking advantage of our neighbors, buying lands with the best water rights and holding it in trust for them.”

Empowering Native American Communities:

FAMILY SUES AFTER FATAL FALL IN RESERVATION JAIL. The [Columbus \(IN\) Republic](#) (11/6, 80K) reports that “the family of a man who died after a fall in a jail on an American Indian reservation in South Dakota is suing” the BIA for \$2.1 million for wrongful death. The lawsuit filed in US District Court in South Dakota “alleges that jailers at the federal detention facility on the Lower Brule Indian Reservation southeast of Pierre ignored Sheldon

cancellations for a year, said, "We didn't say, 'if you had insurance that you liked that met the minimum standards, you could keep it.' We just said, and the President said, over and over, 'if you have insurance and you like the insurance you have, you can keep it.'"

Ron Fournier, in a piece for [National Journal](#) (11/6, Fournier, Subscription Publication, 427K) titled, "Lying About Lies: Why Credibility Matters To Obama," wrote, "The president is now misleading the public about his deception." Fournier goes on to characterize the President's modified defense of the ACA on Monday night at an Organizing For Action event as part of "an orchestrated deceit," before alleging that the President "participated in a lie."

[New York Magazine](#) (11/6, 6.83M) put together a video titled, "If You Like your Plan...: Supercut" that shows the President telling audiences 23 times that "if you like your plan, you can keep your plan." [Fox News' Special Report](#) (11/6, 2.15M) showed the President on September 26, "just five days before the October 1 rollout," as White House correspondent Ed Henry noted, telling an audience in Largo, Maryland: "If you already have healthcare, you don't have to do anything."

Appearing on [CNBC](#) (11/6, 126K) Tuesday evening, National Journal's Fournier said, "It is the White House strategy – for whatever reason – to convince Americans what they've seen on videotape 20, 23, 29 times didn't exist." Fournier continued, "They're trying almost in an Orwellian way to reinvent history" because "they just don't think the American public is very smart; they think they can get away with this, and it's beneath...the presidency."

On [Fox News' Special Report](#) (11/6, 2.15M), Dr. Ben Carson, formerly a Johns Hopkins neurosurgeon and now a prominent critic of the President, said, "My concern is that if you have a government that can't be trusted, if you have to parse every word, if you have to filter it through legalese in order for the people to understand what's going on, then what have we devolved into? This is not what America is supposed to be." NPR's Mara Liasson added, "It's impossible for" the White House to "explain why the President said something dozens and dozens of times that they must have known wasn't true."

Kathleen Parker, in her column for the [Washington Post](#) (11/6, Parker, 4.28M), says she was taught as a child not to "call someone a liar, which was considered the worst character indictment one could issue," and that for her "it is still jarring to...impugn another, especially the president of the United States, as a liar." However, Parker adds, "it is not possible to pretend that the American people have been told the truth" by the President, "nor is it possible to pretend that" he "has been completely honest." Parker continues, "To sum up, the American people were duped" by an Administration that "knowingly misled" them.

Dana Milbank, in his column for the [Washington Post](#) (11/6, Milbank, 4.28M), draws attention to several reports that the President's "policy advisers were aware long ago that the president's promise that 'if you like your insurance plan, you will keep it' wouldn't hold up."

[USA Today's](#) (11/6, Page, 5.82M) Susan Page reports that on Tuesday, "Democrats saw looming problems...on the horizon" stemming from "the roiling furor over the flawed rollout" of the ACA, and, according to Page, "Obamacare seems to be emerging as the defining issue of 2014." Page adds that in contrast to the last two cycles, "the controversy...is gaining traction not as a result of Republican attacks but through administration fumbles." Page notes that in his latest [National Journal](#) (11/6, Cook, Subscription Publication, 427K) column, Charlie Cook argued that the Democrats' boost from last month's shutdown has been "effectively neutralized" by the ACA's problems. [Bloomberg News](#) (11/6, McCormick, 1.91M) was among many outlets noting a new [Gallup poll](#) (11/6, 17K) showing that the President's approval rating is now at 39%, "its lowest level since October 2011." Bloomberg attributes the President's weak poll numbers to "the rocky debut of his health-care program."

GOP pollster Kellyanne Conway, appearing on [CNBC's The Kudlow Report](#) (11/6, 126K), said, "The Democrats lost the House in 2010 largely because of the fear of Obamacare and...now you've got Obamacare in practice. You have real names and faces...and horror stories," including "the cancer victim in yesterday's [Wall Street Journal](#) (11/4, Sundby, Subscription Publication, 5.91M) writing [that] her insurance had been canceled."

The [AP](#) (11/6, Espo) reports that the Administration is "under growing pressure...to state a position" on Landrieu's bill "formalizing" the President's "oft-stated promise that people who like their existing coverage should be allowed to keep it under the new health care law." The AP also reports that Senate Majority Leader Harry Reid "showed no enthusiasm for permitting a vote on the measure introduced by Landrieu."

[Bloomberg News](#) (11/5, Hunter, 1.91M) reported that in a statement, Landrieu said, "A promise was made and

this legislation will ensure that this promise is kept." Bloomberg says that along with Landrieu's bill, Sen. Joe Manchin's proposal to delay fines for individuals who are not insured, "underscore Democrats' anxiety over the failures of the online exchanges." Bloomberg notes that Manchin "said his concern about delays in the enrollment process 'hasn't changed' since he started working several weeks ago...to craft the proposal." On Tuesday, Manchin said, "The product's poor, and you've got to have the thing fixed."

According to [USA Today's](#) (11/6, Page, 5.82M) Page, "Eleven Democratic senators have endorsed an appeal by Sen. Jeanne Shaheen...that the administration give consumers more time to sign up." Page notes that "seven of the 11 are in potentially competitive re-election races next year, and one of the others is Michael Bennet of Colorado, who just happens to chair the Democrats' Senate campaign committee."

[Roll Call](#) (11/6, Dennis, Subscription Publication, 87K) reports that on Tuesday, Senate Minority Leader Mitch McConnell said, "I think what'll be really interesting to see in the Senate is the number of Democrats in very red states who are up in '14 and what they start demanding of the majority leader and the administration, in terms of adjustments to this law." According to Roll Call, Sen. Mark Begich, "one such Democrat...said he's going to look at Landrieu's proposal as well as legislative fixes of his own." Begich is quoted as saying, "I've always said the whole law is not perfect."

[The Hill](#) (11/6, Sink, 194K) reported that at the White House briefing Tuesday, Press Secretary Jay Carney, who "was peppered with questions about whether the president regretted promising that Americans who liked their health insurance plans could keep them," maintained that the President's "repeated guarantee that 'if you like your healthcare plan, you can keep it' was in reference to the 'broader promise of the Affordable Care Act.'" According to The Hill, Carney "also sidestepped a question about whether Obama had misled the public when he said earlier this year that individuals who already had health insurance did not have to do anything during the law's implementation."

The [Washington Times](#) (11/6, Wolfgang, 417K) reports that on Tuesday, Carney also contended that Americans are more concerned about the partial Federal government shutdown last month than they are about the problems surrounding the ACA's implementation.

The National Review's Jonah Goldberg, in his column for [USA Today](#) (11/5, Goldberg, 5.82M), says the President's fellow Democrats "are in barely concealed panic over the fact that he didn't tell the truth when he was selling the [ACA]." According to Goldberg, even as the President was reassuring Americans that if they liked their health insurance, they could, he "understood that one of the central aims of the [ACA] was to squeeze out the individual insurance market (and the small business market), forcing those Americans on to the HealthCare.gov exchanges."

Senate Democrats Tell Tavenner Administration Has Created A "Crisis Of Confidence." [McClatchy](#) (11/5, Pugh, 95K) reports that in an appearance before the Senate HELP Committee, CMS Administrator Marilyn Tavenner "tried to assure anxious senators that Americans' personal information was secure on the troubled HealthCare.gov website, which erroneously provided a South Carolina man's personal information to another man in North Carolina last week." According to McClatchy, "last week...Justin Hadley of North Carolina opened his personal account on HealthCare.gov and saw a letter from the U.S. Department of Health and Human Services addressed to Tom Dougall, of Elgin, S.C.," which "included information about Dougall's eligibility for federal subsidies." McClatchy adds that Dougall alerted Sen. Tim Scott, who, on Tuesday, "chided Tavenner" and "called the HealthCare.gov debut 'one of the greatest website disasters in history.'"

The [Wall Street Journal](#) (11/5, Schatz, Subscription Publication, 5.91M) reports that Sen. Tom Harkin, the panel's chairman, told Tavenner, "Security is paramount. I think that's something we all agree on here. There has to be absolute assurance that this is secure." The [New York Times](#) (11/6, Pear, Subscription Publication, 9.61M) says Harkin "joined Republicans in voicing concern about the security of personal information." The Times notes that Sen. Barbara Mikulski "told Ms. Tavenner that the problems with the federal insurance website, HealthCare.gov, could deter people from enrolling and threaten the [ACA's] success." Mikulski is quoted as saying, "There's been a crisis of confidence created in the dysfunctional nature of the website, the canceling of policies and sticker shock from some people."

According to [Politico](#) (11/6, Haberkorn, Millman, 467K), at the hearing featuring Tavenner, "one Democrat after another voiced frustration and expressed anxiety about how to turn Obamacare around after the disastrous rollout and the avalanche of bad publicity around cancelled health plans." Politico reports that when Sen. Lamar Alexander asked Tavenner why the President had "promised Americans they can keep their health insurance, even if the administration knew some of those plans would be eliminated by 2014." According to Politico,

Tavenner said the Administration intends to "'actively engage' consumers who have received cancellation notices," but acknowledged that some people who are losing their insurance will now have to sign up for coverage that is "more expensive."

Tavenner Says ACA Enrollment Target Is 800,000 By The End Of The Month. The [Washington Post](#) (11/6, Somashekhar, Goldstein, 4.28M) reports that Tavenner told the Senators that CMS "plans to release next week information about who enrolled" and revealed that "the target for the end of November is 800,000 enrollments."

[Reuters](#) (11/6, Morgan) reported that on Tuesday, the House Ways and Means Committee subpoenaed Administration figures on the volume of ACA enrollment. In a letter to Tavenner, Camp wrote, "Actual enrollment could lag projections by over 1 million people. There is no evidence this system is capable of handling this type of volume."

The [Daily Caller](#) (11/6, May, 422K) reported that in reply to Camp's letter, Tavenner "denied his request but appeared to indicate that the agency did have access to enrollment data." Under the headline, "Mystery Shrouds Plans For Release Of ObamaCare Enrollment Data," [The Hill](#) (11/6, Viebeck, 194K) reported that while the Administration "said it will publish...enrollment data next week," it has "repeatedly refused to disclose which figures it plans to release." According to [The Hill](#), that has fed suspicions "that they will release a single sign-up number that fails to shed light on how the enrollment effort is really proceeding," which "would signal a continued effort by the administration to control the flow of details about the healthcare law in the face of an unfriendly news cycle."

Administration Officials Were Aware Of Widespread HealthCare.gov Problems On Oct 1. Robert Pear, in a piece for the [New York Times](#) (11/6, Pear, Subscription Publication, 9.61M) titled, "Notes Reveal Chaotic White House Talks on Health Care Site," reports that "more than 100 pages of 'war room notes' released by congressional investigators on Tuesday offer a window into the chaos that overwhelmed the Obama administration as the federal health insurance marketplace started up last month and officials realized that its problems could not be fixed quickly." Pear goes on to write that the documents, which were released by the House Oversight Committee, "indicate that by Oct. 8, one week after the exchange opened, administration officials had begun to realize that its problems were widespread and could not be easily fixed."

The [Washington Post](#) (11/6, Somashekhar, Goldstein, 4.28M) reports that the documents "mak[e] clear that some [HHS] staff members and technical contractors were aware of wider problems than the White House acknowledged at the time." According to the Post, "Meeting notes from the morning of Oct. 1...show that HHS employees and the contractors were discussing flaws that included the system that verifies insurance-seekers' identity, 'glitches with eligibility questions,' and a problem with letting people know whether they qualify for Medicaid."

[Politico](#) (11/6, Cunningham, 467K) noted that while the Administration initially "blamed the HealthCare.gov glitches on high website traffic," the documents released Tuesday "contain little to no mention of higher-than-expected volume."

Mark Gongloff, in a piece for the [Huffington Post](#) (11/6, Gongloff, 11.54M), argues that the President ought to have taken former NEC director Larry Summers' suggestion that he "take the job of launching the [ACA] away from...[his] political team and give it to a health-care 'czar,'" who "knew about insurance and business and technology." According to Gongloff, the President "resisted Summers, which helped lead to the clownpocalypse of Obamacare's launch, now in its second embarrassing month."

McDonough Tells Insurance CEOs To Inform Those Losing Their Coverage About Federal Subsidies. The [AP](#) (11/5, Lederman) reports that White House Chief of Staff Denis McDonough met with health insurance executives Tuesday and requested that they "explain to Americans the cancellation letters they're receiving in the mail." According to the AP, the White House said McDonough "urged insurance companies to 'ramp up communication and education efforts' to those who have lost their insurance."

Under the headline, "Obama Administration Pushes Back Over Canceled Health Plans," [Reuters](#) (11/6, Morgan, Rampton) reports that McDonough wants the insurers to tell those who are losing coverage that they may qualify for subsidies. Reuters reports that on Tuesday, White House Press Secretary Jay Carney said McDonough was "saying that we all need to do the best we can in getting information that consumers need."

According to [The Hill](#) (11/6, Sink, 194K), "some" cancellation letters "tell people they need to purchase more expensive, more comprehensive plans to replace them, sometimes without mentioning the new ObamaCare

plans that are now available to them.”

Democrats In California And Vermont Push For Cancellation Delays. The [Wall Street Journal](#) (11/6, Martin, Radnofsky, Subscription Publication, 5.91M) reports that on Tuesday California Insurance Commissioner Dave Jones (D) announced that Blue Shield of California will not cancel its plans that fail to meet ACA guidelines until March, an extension of three months for 115,000 Californians. Jones is quoted as saying, “For 115,000 people, they get additional time to decide what’s best for them and their families.” Likewise, Vermont Gov. Peter Shumlin (D) wants insurers in his state to delay cancellations until March 31, saying, “I won’t tolerate a situation where Vermonters go into the holiday season worried and confused by their health care options come Jan. 1.”

The [Los Angeles Times](#) (11/6, Terhune, 3.07M) reports that on Tuesday, Jones “reiterated his support for President Obama’s healthcare law...but he said these cancellation notices and the resulting avalanche of consumer complaints were an unnecessary blunder.” The Times reports that Jones said, “There are areas where implementation could be done better, and this is an example of that. Individuals could have been allowed to stay in their plan for another year. Don’t force people out arbitrarily Dec. 31.”

LAWMAKERS LOOK FOR REVENUE TO OFFSET SEQUESTER CUTS. The [Wall Street Journal](#) (11/6, Mckinnon, Subscription Publication, 5.91M) reports that budget negotiators from both parties are currently looking for a variety of non-tax revenue sources that would allow them to reduce sequestration cuts. Potential moves include boosting Medicare premiums for wealthier seniors, increase the amount Federal employees must contribute to their pensions, and selling surplus properties.

In an editorial, the [New York Times](#) (11/6, Subscription Publication, 9.61M) says that if budget negotiators are able to find a way to raise the sequester spending caps, “it would remove a significant drag on employment” and would “also end the reductions of government services that are hurting millions of people, especially those with low incomes.” The Times endorses raising revenue to do this, such as through closing tax loopholes.

OBAMA LOOKS TO KICK-START IMMIGRATION REFORM DEBATE. [Reuters](#) (11/6, Holland) reports that President Obama brought a group of business leaders to the White House on Tuesday in an attempt to build momentum for immigration reform. The President argued that reform would add \$1.4 trillion in growth to the US economy over the next 20 years while also reducing deficit spending by \$850 billion. Obama told reporters, “There’s no reason why we can’t get this done before the end of the year.”

The [Washington Times](#) (11/6, Wolfgang, 417K) reports the President said that the Senate reform bill has sufficient support in the House to pass. The President said, “Although right now there has been some resistance from House Republicans, what’s been encouraging is there have been a number of House Republicans who think this is the right thing to do, as well. It’s my estimation that we actually have the votes to get comprehensive immigration reform done right now.”

Meanwhile, [Politico](#) (11/6, Allen, Brown, 467K) reports that the President “has a busy schedule this week, jumping from health care to immigration to the economy at events across three different cities.” The “disparate” messages “add up to one unifying theme for a White House on the defensive: HealthCare.gov will not paralyze the president’s second term.” Politico says the White House doesn’t want the public to think that healthcare is “all they’re focused on — or even that it’s the overriding priority.”

Entrepreneur Argues Immigrants Don’t Weaken Economy. In an op-ed for the [Wall Street Journal](#) (11/6, Zadeh, Subscription Publication, 5.91M), Shayan Zadeh, the co-founder and CEO of Zoosk, an online dating website, writes that his example shows that immigrants aren’t a drain on the economy, but rather a boost to it. He says that he has created 150 jobs since coming to the US from Iran.

Editorial Wrap-Up:

NEW YORK TIMES. “New Chance For A Budget Compromise.” In an editorial, the [New York Times](#) (11/6, Subscription Publication, 9.61M) says that if budget negotiators are able to find a way to raise the sequester spending caps, “it would remove a significant drag on employment” and would “also end the reductions of government services that are hurting millions of people, especially those with low incomes.” The Times endorses raising revenue to do this, such as through closing tax loopholes.

“A Pacific Trade Deal.” The [New York Times](#) (11/5, Subscription Publication, 9.61M) editorializes negotiators at the Trans-Pacific Partnership are grappling with a variety of difficult issues as they attempt to complete a

trade agreement by the end of the year. The Trans-Pacific trade agreement would include 12 countries, lower tariffs and investment restrictions, improve labor rights, encourage environmental protection, and reduce government favoritism of state-owned businesses. The *New York Times* says that a good agreement would not only help individual countries, but would also set an example for the WTO global trade talks.

"Remember The Second Responders." In an editorial, the *New York Times* (11/6, A28, Subscription Publication, 9.61M) says that day laborers are key responders to large-scale disasters, such as Hurricane Sandy, but are "routinely abused in their everyday jobs, and the speed and intensity of post-disaster cleanups, plus exposure to mold, asbestos and other dangerous debris, makes things worse." The *Times* says that the de Blasio Administration "should work with federal, state and local agencies and nonprofit organizations to provide day laborers with disaster training, and to make day-labor-hiring sites into places where information and protective gear can be distributed."

"Approving, And Suspending, A Dangerous Drug." The *New York Times* (11/6, Subscription Publication, 9.61M) editorializes that the Food and Drug Administration's course of action was appropriate when it suspended sales of Iclusig, a "promising leukemia drug" that was found to have serious adverse side effects upon further testing. The drug appears to have minimal effects for some patients, and the FDA has established a process in which doctors can inform the agency of their patients' conditions in order to arrange and expedited shipment of the drug.

"High-Caliber Cosmic Nothingness."

WASHINGTON POST. ***"Mr. McAuliffe's Victory."*** In an editorial, the *Washington Post* (11/6, 4.28M) says that the election is a triumph for Terry McAuliffe, as "well as a watershed moment for Democrats." The *Post* says that for many Democrats, McAuliffe's "checkered past, lack of experience in elected office and impressionistic grasp of the mechanics of state government" has left him "regarded by his party's stalwarts much as he is regarded by many Virginians — a scandal-prone outsider with a lot to learn." However, the *Post* says he succeeded both because the GOP selected Cuccinelli and that McAuliffe crafted "the right message," putting jobs first.

"High Hopes On The Hudson." In an editorial, the *Washington Post* (11/6, 4.28M) says that Christie's win suggests a path for an end to partisan gridlock. Christie has also "made himself the new hero of mainstream Republican conservatives." Meanwhile, Bill de Blasio, the mayor-elect of New York City, "is the champion of those on the Democratic left who are disillusioned with President Obama and eager to implement their undiluted ideas on the Big Apple's big stage."

"Texas Holds 'Em Voteless." In an editorial, the *Washington Post* (11/6, 4.28M) says that the Texas voter ID law is a "transparent effort to tilt elections in the state to Republicans by suppressing the minority vote, which is becoming more important as Texas's demographics shift."

WALL STREET JOURNAL. ***"The Portents Of Election 2013."*** An editorial in the *Wall Street Journal* (11/6, Subscription Publication, 5.91M) argues that in the wake of its defeat in the Virginia governor's race, the Republican Party needs to do some self-examination. The *Journal* notes that Republican candidate Ken Cuccinelli's social conservatism hurt him among some voters. The *Journal* also argues that Republicans should avoid portraying New Jersey Gov. Chris Christie as a moderate and study his victory to determine how he was able the support to win so many non-GOP voters.

"Class-Action Dodge." The *Wall Street Journal* (11/6, Subscription Publication, 5.91M) editorializes that the Supreme Court should rule against Mississippi Attorney General Jim Hood, who filed a lawsuit on behalf of the state and residents who purchased liquid crystal display screens from companies that allegedly engaged in price fixing. His lawsuit names the same defendants as those named in private class action cases, but Hood is conducting the lawsuit through his own office. The editorial accuses Hood of evading Federal law, which requires private class actions to be removed to Federal court, but excludes class actions based entirely in one state. The defendants in the Hood case want removal to a Federal court, but Hood contends that such a move infringes on his authority to enforce state law.

"The Snowden Clemency Campaign." An editorial in the *Wall Street Journal* (11/6, Subscription Publication, 5.91M) dismisses Edward Snowden's claim that his leaks were useful because they prompted calls for reforms, and argues that when Martin Luther King and Mahatma Gandhi engaged in civil disobedience, they did not avoid the law and instead sought its punishment to prove their argument. Snowden, on the other hand, violated his pledge to protect NSA secrets and then fled the country. The *Journal* argues that if Snowden truly wanted "open,

respectful and informed debate" on the NSA as he has written, he could have gone to Congress or taken his concerns to the public without revealing the secrets. The Journal adds that if Snowden were truly committed to his ideals, he would leave Russia and return to face charges in the US.

"An Afghan Commitment." An editorial in the [Wall Street Journal](#) (11/6, Subscription Publication, 5.91M) calls on the President to settle a status of forces agreement with Afghanistan, arguing that a strong foreign force is necessary to keep the country from falling into Taliban or al Qaeda hands.

Patrick Murphy, for the Department of Labor's annual Salute to Veterans, – a roundtable discussion on the obstacles and opportunities veterans face as they search for employment after the military. Location: U.S. Department of Labor

Last Laughs:

LATE NIGHT POLITICAL HUMOR.

Jay Leno: "Well, to celebrate the 34th anniversary of the storming of the US embassy in Iran, Iranians chanted anti-Obama slogans and called him a dictator. Ooh. Hey, is that a big deal? Fox News does that every single day."

Jay Leno: "And that NSA whistle blower – traitor, Edward Snowden, he's living in asylum in Russia. He has released a manifesto directed at the United States. Claiming that telling the truth should not be considered a crime. And believe me there's no better place to celebrate free speech, truth and equal rights than in Russia."

Jay Leno: "The drug trade at the US-Mexico border has taken a big hit this morning. Check this out. Federal drug agents have shut down what they call a super tunnel. The sophisticated passage which stretches from Tijuana to San Diego has electricity, ventilation and even its own food court. There's a Starbucks. Unbelievable."

David Letterman: "Mayor Bloomberg has been Mayor of New York City for 12 years, 12 years. Remarkable, isn't it? Maybe. Maybe not. I never thought about it while he was mayor because when he was mayor you thought he would never go away, but now he's going away, and I believe – I think we'll all miss Mayor Bloomberg. But he says no, 12 years is plenty. That's three terms and he really now want to settle down and spend more time with his money so that's what he's going to do."

David Letterman: "Somebody has still got a stick up his nose about the presidential campaign– I'm talking about Mitt Romney. He was on David Gregory's 'Meet the Press' program. He said he didn't choose Chris Christie as a running mate because he's fat. How about that? Mitt Romney has a similar but opposite problem. He's a lightweight. That's the problem."

David Letterman: Top 10 things You Never Knew About the House of Representatives: [Presented by Rep. Nancy Pelosi]

10. Nineteen Representatives have gone on to become President; 10 have gone on to manage a Sizzlers
9. Members may vote 'Yea,' 'Nay,' or 'Whatever'
8. When we water the Capitol lawn we use the Hose of Representatives
7. Our cafeteria chef created the original 'House Salad'
6. Every month we're tested for steroids.
5. Steny Hoyer's middle name? Also Steny.
4. Thanks to corporate sponsorship, Majority Whip now known as Miracle Whip
3. Members tap silverware against water glasses to encourage the House leaders to kiss
2. We have the power to impeach talk show hosts
1. The Tea Party isn't nearly as much fun as it sounds.

Conan O'Brien: "Big news, big news, today, New Jersey re-elected governor Chris Christie. That's right. Or as Christie put it, 'I came back for seconds.'"

Conan O'Brien: "Hollywood producers are being asked to work the Affordable Care Act into television plots and movies. Yes. Which is why AMC has renamed it 'The Walking Dead, but Not Due To Pre-Existing Conditions.'"

Jimmy Fallon: "You know, Rand Paul, the freshman Senator from Kentucky? Well, he's in the news again. Now they're saying that he actually plagiarized an entire section of his 2012 book 'Government Bullies.' Yeah. When asked for a comment, Paul said, 'It was the best of times, it was the worst of times.'"

HOLIDAY PUBLISHING NOTICE. In observance of Veterans Day, the Department of the Interior News Briefing will not be published on November 11. Publication will resume on November 12.

DOI in the News:

SECRETARY JEWELL ANNOUNCES PUBLIC-PRIVATE PARTNERSHIP CAMPAIGN TO BOOST PARKS. The [San Francisco Chronicle](#) (11/8, Fimrite, 2.88M) reports that Interior Secretary Sally Jewell "outlined a major push Thursday to inspire children and teenagers to express their wild side by putting aside their cell phones and other

electronics and getting outdoors to experience nature." At San Francisco's Crissy Field, Jewell "announced a \$20 million public-private campaign to inspire ecological awareness through education, employment and volunteer opportunities in parks and on public lands." Jewell said, "There is a growing disconnect between young people and the great outdoors, and it's a gap that Interior has the power to help bridge." According to Jewell, the plan is "to raise enough money to create outdoor recreation and education opportunities for 10 million young people in 50 cities and to attract a million volunteers per year to help administer the programs."

SECRETARY JEWELL TO TOUR POINT ARENA-STORNETTA PUBLIC LANDS. The Mendocino (CA) Beacon (11/8) reports that Interior Secretary of the Interior Sally Jewell will be joined by Rep. Jared Huffman to tour the Point Arena-Stornetta Public Lands on California's North Coast on Friday, Nov. 8, and will hold a public meeting at 2 p.m. according to the article, "the meeting will include stakeholders and members of the public to discuss the community's vision for the continued protection of Point Arena Stornetta Public Lands, which is a significant recreational and wildlife habitat area that is administered by the Bureau of Land Management." In addition to Jewell and Huffman, attendees are expected to include Neil Komze, principal deputy director at the BLM, John Laird, State of California Secretary for Natural Resources, Leslie Dahlhoff, former Point Arena mayor, Assemblymember Wes Chesbro, and Nelson Pinola, tribal chair of Point Arena/Manchester Band of Pomo Indians.

Also reporting on the story is the Santa Rosa (CA) Press Democrat (11/6, 156K), the Fort Bragg (CA) Advocate-News (11/8, 16K), and Public News Service (11/8, 306).

SECRETARY JEWELL SAYS BUDGET CUTS HAVE THREATENED CONSERVATION EFFORTS. KSJR-FM Collegeville, MN (11/7, 34K) reports that "Minnesota state agencies are marking the fifth anniversary this week of the Clean Water, Land and Legacy Amendment." Department of Natural Resources Commissioner Tom Landwehr spoke about the Legacy Amendment during a visit to Minnesota this week by Interior Secretary Sally Jewell. According to the article, "both officials say state and federal budget cuts have threatened conservation efforts."

Also reporting on the story is KSJR-FM Collegeville, MN (11/7, 34K).

PRESIDENT OBAMA MAKES SELECTIONS FOR INTERIOR POSTS. In its "E2 Wire" blog, The Hill (11/8, 194K) reports that President Obama is nominating Neil Komze to formally head the BLM. Interior Secretary Sally Jewell "praised the White House move to make Komze the official head of the BLM, a task that will keep Komze front-and-center in political battles over conservation and drilling." In a statement, Jewell said, "Neil has helped implement forward-looking reforms at the BLM to promote energy development in areas of minimal conflict, drive landscape-level planning efforts, and dramatically expand the agency's use of technology to speed up the process for energy permitting." Also, Obama announced that "he would nominate Tommy Beaudreau as Interior's assistant secretary for policy, management and budget." In a statement, Jewell said, "[Beaudreau] has successfully led key administration and departmental energy reforms in the Gulf of Mexico, steadily advanced our Atlantic offshore wind program and developed and implemented critical regulatory initiatives for Arctic conservation and energy policy. His accomplishments and skills will well serve the department and the nation in his new position."

In its "E2 Wire" blog, The Hill (11/8, 194K) reports that President Obama announced late Wednesday plans to nominate environment lawyer Janice Schneider for assistant secretary for Land and Minerals Management in the Interior Department. Interior Secretary Sally Jewell "applauded the president on the nomination." In a statement, Jewell said, "Janice's expertise in natural resource, energy development and environmental law and policy will enable us to continue to safely and responsibly expand America's conventional and renewable energy exploration and development under President Obama's all-of-the-above energy strategy."

The Marine Link (11/8, 1K) reports that National Ocean Industries Association President Randall Luthi issued a statement on the nomination of Schneider. Luthi said, "It is the prerogative of the President and Secretary to nominate whomever they choose, but there are many unanswered questions about how Janice Schneider will regulate the offshore energy industry. We look forward to learning more about her during the Senate confirmation process." He added, "That being said, many of our members are disappointed that Tommy Beaudreau was not nominated. He came to the Department of the Interior during a difficult time, but over the last two years he earned the reputation for being willing to listen and learn about industry concerns. I wish him the very best as he returns

his full attention to the Bureau of Ocean Energy Management. His knowledge and experience will be a great asset to the new Assistant Secretary for Land and Minerals Management.”

Also reporting on the story are Politico (11/8, Guillen, 467K), the National Journal (11/8, Subscription Publication, 427K) and the Las Vegas Review-Journal (11/8, 437K).

OMB SAYS SHUTDOWN COST \$2 BILLION IN LOST PRODUCTIVITY. The Washington Post (11/8, Rein, 4.28M) reports that the “partial shutdown” of the Federal government is October “cost taxpayers about \$2 billion in lost productivity from 850,000 furloughed employees, the White House budget office said Thursday in a report quantifying the ripple effects” of the “impasse.” On top of that, OMB director Sylvia Mathews Burwell, said the shutdown launched a series of “negative ramifications on a number of other fronts,” including the disruption of a number of businesses.

Politico (11/8, Cirilli, 467K) reports the report said the shutdown “inflicted completely unnecessary damage on our economy and took a toll on families and businesses across the country.” The Administration “estimates that the shutdown will shrink fourth quarter economic growth by 0.25 percent, resulting in an estimated 120,000 fewer private-sector jobs for the first two weeks of October.”

In its “E2 Wire” blog, The Hill (11/8, 194K) reports that “the tally notes that the Interior Department was unable to process 200 onshore oil-and-gas drilling permit applications.”

Also reporting on the story are the Washington Post (11/7, Rein, 4.28M), the Christian Science Monitor (11/7, Trumbull, 540K), McClatchy (11/8, Clark, 95K), Reuters (11/8, Felsenthal), and the National Journal (11/8, Subscription Publication, 427K).

Workers To Get \$2 Billion In Back Pay After Government Shutdown. The Los Angeles Times (11/7, Puzanghera, 3.07M) reports that “federal workers furloughed during last month’s partial government shutdown will receive about \$2 billion in back pay, the White House said Thursday.”

SOUTHEAST YOUTH CORPS APPROVED AS MEMBERS OF THE 21ST CENTURY CONSERVATION SERVICE CORPS. The Chattanooga (11/8, 17K) reports that the Interior Department and the Agriculture Department on Thursday “announced that Chattanooga’s Southeast Youth Corps is one of 91 initial organizations nationwide that have been approved as member organizations to help implement the Obama Administration’s 21st Century Conservation Service Corps.”

PORT AUTHORITY OF GUAM HAILS MARINA RENOVATIONS. The Pacific (GUM) Daily News (11/8, 61K) reports that “Port Authority of Guam officials, representatives from Black Construction Corp. and relatives of Gregorio D. Perez celebrated the renovations to the Hagåtña marina yesterday at a ribbon-cutting ceremony at the boat basin.” According to the article, “renovations to the marina include removal and installation of galvanized pipe railing and a new epoxy-coated steel ladder, restoration of the demolished walkway, installation of new sheet piles in front of deteriorating existing sheet piles, and the modification and construction of a new storm-water deep-sump catch basin and drainage system.” The article notes that “the eight-month project, contracted by Black Construction, cost almost \$2 million and was paid for by the Department of the Interior Office of Insular Affairs.”

SEN. HEINRICH PROPOSALS MAKE IT INTO HUNTING, FISHING BILL PACKAGE. The Albuquerque (NM) Business First (11/8) reports that “two measures proposed by Sen. Martin Heinrich (D-NM) have been included in a legislative package known as the Sportsmen’s and Public Outdoor Recreation Traditions (SPORT) Act now working its way through Congressional committees.” According to the article, “the package includes bills introduced by both Democrats and Republicans expanding access to federal public lands for hunting and fishing.” In a statement, Heinrich said, “Hunting and fishing are a way of life for millions of Americans – especially in New Mexico. Passing the SPORT Act would be a momentous advancement in improving hunting and angling access on public lands and growing the outdoor recreation economy. As an avid hunter, I remain deeply committed to preserving our outdoor heritage for my children, and for future generations.”

America’s Great Outdoors:

National Park Service:

WASHINGTON MONUMENT BEING MEASURED BY TEAM OF SURVEYORS. The Washington Times (11/8, Somers, 417K) reports that a team of surveyors is measuring the Washington Monument "to determine for sure whether the memorial still stands straight at 555 feet." According to the article, "for the past week, staffers from the National Oceanic and Atmospheric Administration's Geodetic Survey have been working atop the iconic structure's topmost point, studying the more than century-old landmark to see if it has sunk farther into the ground or is listing to one side as a result of either the passage of time or the effects of the August 2011 earthquake that rattled the region." Dru Smith, chief geodesist for the survey, said "the survey was done at the request" of the NPS.

METRO OFFICIAL OPTIMISTIC THAT ARCH CONTRACT WILL BE RESOLVED SOON. The St. Louis Post-Dispatch (11/8, 866K) reports that "an unresolved contract that threatens to delay an overhaul of the Gateway Arch grounds is a matter of red tape, not conflict, according to the head of Metro." Metro President and CEO John Nations said he was told by NPS officials earlier this week that "they are very, very close" to resolving the issue of a contract related to the trams in the Arch. Michael Reynolds, the midwest regional director of the NPS, "said Thursday that an agreement could be reached within days to move past the hangup."

QUESTIONS RAISED ABOUT ACADIA NATIONAL PARK CONCESSIONS CONTRACT. WMEA-FM Portland, ME (11/8, 333) reports that "Maine's two US House members say they've gotten lots of calls from constituents and supporters of Acadia Corporation in and around Bar Harbor." Rep. Chellie Pingree said, "It just seems wrong to be giving up that contract to another company that's based halfway around the country." Both Pingree and Rep. Mike Michaud also "want the House Natural Resources Committee to review the overall procedures for awarding concessions contracts at National Parks." Sens. Angus King and Susan Collins have sent their own letter to the head of the NPS, "calling for a similar top-to-bottom review."

NPS REVIEW ESSENTIAL TO CROSTOWN PLANS. The Memphis (TN) Daily News (11/8, 7K) reports that the NPS "nixed plans for planting greenery on one side of the Crosstown parking garage" but "is OK with developers of the old Sears Crosstown property replacing windows in the mammoth building with new, similar-looking and configured ones." The article notes that the review by the NPS is "essential to receiving federal historic tax credits that are part of the financing for the project."

NEW PLAZA FOR HISTORIC JAPANESE LANTERN ON NATIONAL MALL MARKS ORIGINAL CHERRY BLOSSOMS. The Washington Post (11/8, 4.28M) reports that "a 360-year-old Japanese stone lantern that sits among Washington's cherry blossom trees now has a more prominent place on the National Mall." According to the article, "the nonprofit Trust for the National Mall and Japan's ambassador are unveiling a new granite plaza for the lantern Friday along the Tidal Basin."

SECTION OF BLUE RIDGE PARKWAY TO CLOSE ONCE AGAIN. Yahoo! News Canada (11/8, 76K) reports that "a section of Blue Ridge Parkway closed last summer because of a 300-foot-long crack is being shut down once again." The NPS "says the stretch of road from Milepost 376 to Milepost 355 near the entrance to Mt. Mitchell State Park will close on Nov. 12." The closure "allows work to resume on the stabilization of a slope at Milepost 374."

NORTH MAIN STREET HOMES ADDED TO NATIONAL REGISTER. The Oshkosh (WI) Northwestern (11/7, 48K) reports that the North Main Street Bungalow Historic District has been added to the National Register of Historic Places.

ADDITIONAL COVERAGE: NPS TO HOLD PUBLIC MEETINGS ON ISLE ROYALE'S WOLVES. Additional coverage of the plans by the NPS to hold public meeting on Isle Royale's wolves was provided by the Minneapolis Star Tribune (11/8, Press, 1.14M), the Duluth (MN) News Tribune (11/8, 152K), the Detroit News (11/8, Press, 619K), the Seattle Post-Intelligencer (11/8, 768K), and WWJ-TV Detroit (11/7, 34K).

ADDITIONAL COVERAGE: STUDY FINDS VA NEGLECTS HISTORIC PROPERTIES. Additional coverage of the study on the Veterans' Affairs' historic buildings was provided by the Los Angeles Times (11/7, Groves, Zarembo,

3.07M).

ADDITIONAL COVERAGE: INSECTS INVADE FLIGHT 93 MEMORIAL. Additional coverage of insect problem at the Flight 93 Memorial was provided by [WRC-TV Washington](#) (11/8, 291K).

Bureau of Land Management:

BLM PROPOSAL FOR SAGE GROUSE DRAWS CRITICISM. The [Deseret \(UT\) News](#) (11/8, 274K) reports that the Utah BLM's "proposal to help prevent the greater sage grouse from being added to Endangered Species list is the weakest plan environmentalists said they have seen so far and all but 'guarantees' the bird will land on the list." Kevin Mueller with the Utah Environmental Congress said, "Their plan will be Exhibit A for why sage grouse should be listed. The BLM's proposed action will lower protections that are already in place in the four national forests in Utah." However, Mueller said "the BLM Utah plan is a chance for that federal agency to assert it is doing enough to protect the bird." Mueller said, "This is a test to see if federal agencies can come up with their own standard to protect the species instead of relying on the Endangered Species Act to recover the sage grouse. To me, this plan says we are doomed for failure."

BLM, FOREST SERVICE TO BE REIMBURSED FOR 2012 IDAHO FIRE. The [Twin Falls \(ID\) Times-News](#) (11/8, 56K) reports that "the federal government said Thursday it is collecting \$168,500 to cover fire suppression costs after an Illinois man ignited a 440-acre blaze in central Idaho in 2012 while shooting at an exploding target." The US Attorney's Office "announced the agreement after Jeffrey Kerner was target shooting on July 18, 2012 on private land near Salmon in Lemhi County." The money will be paid into the coffers of the BLM and the US Forest Service, "to reimburse them for their costs of fighting what became known as the 'Tenmile Fire.'"

Also reporting on the story is the [Idaho State Journal](#) (11/8, 54K).

BLM TO SELL CHRISTMAS TREE-CUTTING PERMITS. The [Reno \(NV\) Gazette-Journal](#) (11/7, 165K) reports that the BLM will start "selling Christmas tree cutting permits for \$5 starting Tuesday for pinyon pine or juniper tree on designated BLM lands in the Pinenut Mountains between Carson City and Yerington, the Clan Alpine and Desatoya mountains east of Fallon, and the Excelsior Mountains southeast of Hawthorne."

Fish and Wildlife Service:

REPORT TOUTS ECONOMIC BENEFITS OF WILDLIFE REFUGES. The [Minneapolis Star Tribune](#) (11/8, Press, 1.14M) reports that the FWS says the Upper Mississippi River National Wildlife and Fish Refuge is "a boon to the regional economy." According to the agency, "the refuge generated over \$161 million in economic benefits for a 19-county area in Minnesota, Wisconsin, Iowa and Illinois in 2011." The service's report, *Banking on Nature*, also "says the Upper Mississippi refuge returned nearly \$46 for every \$1 appropriated." The report also "says the Agassiz National Wildlife Refuge in northwestern Minnesota generated over \$202,000 in economic benefits for Marshall and Pennington counties in 2011."

The [Beaver Dam \(WI\) Daily Citizen](#) (11/8, 28K) reports that the study said the "Horicon National Wildlife Refuge is an economic boon to Dodge and Fond du Lac counties." According to the study, the Horicon refuge "generated almost \$9 million in economic benefits for the two counties in 2011." Interior Secretary Sally Jewell said, "Our National Wildlife Refuge System is the world's greatest network of lands dedicated to wildlife conservation but is also an important contributor to our economy, attracting more than 46 million visitors from around the world who support local restaurants, hotels, and other businesses. Every dollar we invest in our Refuge System and other public lands generates huge dividends for our country."

Also reporting on the story are the [Mankato \(MN\) Free Press](#) (11/8, 69K), the [Forum of Fargo-Moorhead \(ND\)](#) (11/8, 15K), the [Portage \(WI\) Daily Register](#) (11/8, 11K), and [WEAU-TV Eau Claire, WI](#) (11/8, 32K).

POND LILY PREPARED FOR NEXT SUPERSTORM. The [Amity \(CT\) Observer](#) (11/8, 23K) reports the Rep. Rosa DeLauro "applauded progress on removal of the Pond Lily Dam, but no details of the project were announced." The Interior Department will "be awarding \$661,500 to remove the dam, which has caused repeated flooding in Woodbridge's Village District for decades, causing safety problems and property damage." DeLauro

was joined at a press conference by representatives from the FWW, the City of New Haven, the Town of Woodbridge, Save the Sound and the Connecticut Department of Energy and Environmental Protection. Wendi Weber, Northeast Regional director for the FWS, called the project an example of "the wonderful opportunities we have to work with our partners to support projects that are shovel ready and will restore native fish habitat, as well as protect the local communities from future flooding events."

Also reporting on the story is the [New Haven \(CT\) Independent](#) (11/8, 4K).

UTAH DEPARTMENT OF TRANSPORTATION POSTPONES FINAL ENVIRONMENTAL STATEMENT ON CORRIDOR. The [Davis \(UT\) Clipper](#) (11/8, 28K) reports that "after three-plus years of studying proposed routes for the West Davis Corridor, the Utah Department of Transportation is postponing release of the final Environmental Impact Statement until the summer of 2014." The move is "in response to an overwhelming number of comments on the route, including scathing comments from area environmentalists opposed to the road, and from federal agencies who weighed in on the road's proximity to the Farmington Bay Bird Refuge." In extending the Final EIS, UDOT said "it wanted more time to thoroughly study the comments it received, and look at other alternatives."

FORMER INTERIOR OFFICIAL TO USHER IN MERRITT ISLAND NATIONAL WILDLIFE REFUGE'S 50TH ANNIVERSARY. The [Florida Today](#) (11/7, 222K) reports that Nathaniel P. Reed, the former assistant secretary of the US Department of the Interior, will speak Saturday at the Merritt Island National Wildlife Refuge as part of the refuge's 50th anniversary celebration.

GRIZZLY BEARS MOVE CLOSER TO POSSIBLE DELISTING. The [Casper \(WY\) Star-Tribune](#) (11/8, 90K) reports that "grizzly bear survival in the greater Yellowstone ecosystem does not depend on the future of whitebark pine cones, according to recent research presented Thursday by the Interagency Grizzly Bear Study Team, a group of federal and state researchers." The conclusion "means grizzly bears could be one step closer to losing federal protections." Some conservationists "praised the amount of information collected, but also expressed continued concern about the future of the bear."

Also reporting on the story is the [Bay Area \(CA\) Indymedia](#) (11/7, 2K).

FWS SEEKS INPUT ON PROPOSED WOLVERINE RULE. The [Clark County \(WA\) Columbian](#) (11/7, 116K) reports that the FWS is "seeking public comment from Washington residents about whether the North American wolverine should be classified as threatened under the Endangered Species Act."

Also reporting on the story is the [Casper \(WY\) Star-Tribune](#) (11/8, 90K).

FWS SEEKS PUBLIC COMMENTS ON RED KNOT. The [News of Cumberland County \(NJ\)](#) (11/8, 29K) reports that the FWS has "opened a public comment period, scheduled to end on November 29, as part of an effort to determine if the red knot should be labeled a 'threatened' species."

MEETING SCHEDULED TO DISCUSS BUTTERFLY HABITAT. [WLUK-TV](#) Green Bay, WI (11/8, 37K) reports that the FWS has "scheduled a meeting in Berlin to discuss a plan to list two butterflies as endangered or threatened."

STEPS TO COMBAT ILLEGAL WILDLIFE TRAFFICKING APPLAUDED. For "The Blog" of the [Huffington Post](#) (11/8, Travers, 11.54M), Will Travers, CEO of Born Free, "applauds" the FWS for its plans to destroy "5.4 tons of seized elephant ivory" next week. However, he notes that "despite our best efforts, wildlife traffickers may still find the financial rewards of trafficking to be so attractive that they're willing to risk potential penalties." David Hayes, former Deputy Secretary of the Interior Department, admits, "We're not creating the kind of disincentive for wildlife trafficking that this problem deserves."

Securing America's Energy Future:

Renewable Energy:

BOEM TO HOLD FOR MARYLAND OFFSHORE WIND AUCTION. The [reNews](#) (11/8) reports that BOEM "in the coming weeks will launch an auction for the Maryland offshore wind energy area, the first of three sales planned in 2014," according to BOEM offshore renewable energy program manager Maureen Bomholdt. The article notes that "a number of wind developers have expressed an interest in building projects off Maryland." Bomholdt added that "the bureau aims to launch auctions for federal waters off New Jersey and Massachusetts in the first quarter of 2014."

Onshore Energy Development:

STUDY LINKS BAKKEN BOOM TO HAZE AT THEODORE ROOSEVELT PARK. The [Environment & Energy Publishing](#) (11/8, 705) reports that "as new oil wells crop up by the thousands in the mineral-rich Bakken play in northwest North Dakota, nearby Theodore Roosevelt National Park has experienced spikes in haze-causing pollution, according to a new study." According to the article, "while the boom has created wealth for the state of 700,000, which boasts the nation's lowest unemployment rate, the study by Colorado State University and the National Park Service suggests the development may come at the cost of clear park skies." Preliminary results showed "significant spikes in ammonium nitrate, a fine particle that causes haze, as well as fine particles ammonium sulfate and black carbon, also known as soot."

OSM FINDS NO MAJOR IMPACT FROM MINE SALE. The [Navajo Times \(AZ\)](#) (11/13, 66K) reports that the Interior Department's Office of Surface Mining Reclamation and Enforcement has "found no significant impact from the Navajo Transitional Energy Company's acquisition or transfer permit of Navajo Mine from BHP Billiton New Mexico Coal." Rick Williamson, manager for the Western Region-OSM Indian Program Branch, said, "Based upon OSM's review of the attached EA and the supporting documents, I have determined that the proposed action is not a major federal action that will have a significant effect on the quality of the human environment individually or cumulatively with other actions within the region." Williamson "added that no environmental effects meet the definition of significance in context or intensity, as outlined by the federal regulation CFR 1508.27."

Meanwhile, the [Navajo Times \(AZ\)](#) (11/13, 66K) reports that Diné C.A.R.E has "protested the tribe's acquisition of Navajo Mine for numerous reasons, including pressuring tribal leaders to wait for the findings of a comprehensive environmental impact statement of the entire mine site and Four Corners Power Plant."

BLM TO CONSIDER ALTERNATE NORTH FORK PLAN. The [Montrose \(CO\) Press](#) (11/8, 17K) reports that the BLM has "agreed to consider oil and gas lease opponents' suggestions for the agency's ongoing resource management plan revision." According to the article, "although proponents of the 'North Fork Alternative' plan acknowledge a long road ahead, the agency's decision is seen by them as a positive sign."

COMPANY PUTS GRAND CANYON URANIUM MINE WORK ON HOLD. The [Christian Science Monitor](#) (11/7, Fonseca, 540K) reports that "a uranium mining company that was sinking a shaft for a mine south of Grand Canyon National Park has put the work on hold, citing market conditions and the expense of litigation." Energy Fuels Resources Inc. said "the operation will be on standby until December 2014 or until a ruling is issued in a federal case challenging the US Forest Service's decision to allow development of the Canyon Mine near Tusayan."

ADDITIONAL COVERAGE: NPR-A LEASE SALE DRAWS \$2.9 MILLION IN WINNING BIDS. Additional coverage of the NPR-A lease sale was provided by the [Columbus \(IN\) Republic](#) (11/8, 80K) and the [Franklin \(IN\) Daily Journal](#) (11/8, 51K).

Offshore Energy Development:

BSEE DIRECTOR SALERNO SEES GROWING SAFETY CULTURE. [Reuters](#) (11/8, Seba, Hays) reports that BSEE Director Brian Salerno says the effort to avert another disaster like 2010's Macondo well blowout may never be finished, and that experts at a national laboratory are helping it model deepwater risks. At the Reuters Global Commodities Summit in Houston, Salerno said, "What we mean when we talk about safety culture is that it really takes root and is built into the actual business processes of the companies." He added that BSEE is working to introduce "an additional focus on how we manage risk, collectively."

Reagan-Era Interior Official Criticizes Demise Of Minerals Management Service. In his column for the Washington Examiner (11/8, Arnold, 319K), Ron Arnold asked William Perry Pendley, the Interior Department's deputy assistant secretary of energy and minerals during the Reagan years, about his thoughts on "the recent demise" of the Minerals Management Service, "which he helped create." Pendley said, "It came as no surprise. It's the same power play as Obama's war on coal – to make energy so expensive that no one can use it." Pendley explained, "The MMS made the federal outer continental shelf oil and gas program efficient, so OCS oil and gas was less expensive to produce – the opposite of Obama's goal – and that made it a target."

TEXAS UNIVERSITIES TO LAUNCH OFFSHORE SAFETY CENTER. FuelFix (11/7, 7K) reports that the University of Houston, Texas A&M, and the University of Texas are set to launch a new Ocean Energy Safety Institute using \$5 million in funds from the Federal government. The announcement came from the Interior Department on Thursday. The new institute won't have an industry regulatory role, FuelFix notes. However, it "dovetails with other efforts launched since the 2010 oil spill, including a Center for Offshore safety created by the American Petroleum Institute to foster best practices for the industry."

Also reporting on the story are the San Antonio Express-News (11/8, Dlouhy, 2.26M) and the Rigzone (11/8, 12K).

ANALYSIS CRITICAL OF PROPOSED COASTAL STATE OFFSHORE ROYALTY PAYMENTS. FuelFix (11/8, 7K) reports that a new analysis to be released on Friday by the Center for American Progress says a proposal in Congress "to give coastal states a greater share of government royalties tied to oil and gas drilling would cost taxpayers more than \$49 billion" over the next 30 years. The bill, proposed by Sens. Mary Landrieu (D-LA) and Lisa Murkowski (R-AK) received a hearing in July. The CAP argues that Congress shouldn't send more offshore drilling revenues to coastal states, but should instead use the money for permanent funds to the Federal Land and Water Conservation Fund as well as "create an energy security trust" to pay for clean energy research.

Tackling America's Water Challenges:

CALIFORNIA SPORTFISHING GROUP SAYS WATER OFFICIALS PURPOSELY DISREGARDED ISSUES.

The Stockton (CA) Record (11/7, 123K) reports that "the summer of 2013 was a bad one for fish in the San Joaquin River Delta, and California Sportfishing Protection Alliance Executive Director Bill Jennings says state water pollution cops exacerbated the situation by quietly promising they wouldn't enforce state water quality standards." In particular, Jennings "points to a May 29 letter from California Water Quality Control Board Delta Watermaster Craig Wilson to top officials for the State Water Project and the California operations of the US Bureau of Reclamation." In that letter, Wilson said "he would 'not object or take any action' if the two agencies took measures to hold water back in reservoirs and allow increased salinity in the water Delta farmers use for irrigation."

ADDITIONAL COVERAGE OF BAY DELTA CONSERVATION PLAN. Additional coverage of the Bay Delta Conservation Plan was provided by the Lompoc (CA) Record (11/8, 11K).

Empowering Native American Communities:

PRESIDENT OBAMA TO HOST NATIVE AMERICAN TRIBES IN WASHINGTON. KOTA-TV Rapid City, SD (11/8, 890) reports that President Barack Obama will host the White House Tribal Nations Conference at the Department of the Interior on Nov. 13. According to the Indian Health Service, "the conference will provide leaders from the 566 federally recognized tribes the chance to speak with the president and members of the White House Council on Native American Affairs."

Also reporting on the story is KELO-TV Sioux Falls, SD (11/8, 25K).

APPRAISAL FOUNDATION SAYS ALLOTTEES WILL GET FAIR MARKET VALUE UNDER COBELL. The Navajo Times (AZ) (11/13, 66K) reports that "owners of fractionated American Indian allotted land can rest assured that they will get fair market value should they choose to sell their claims back to the Department of the Interior under the Cobell Settlement," according to the Appraisal Foundation, which "last week released a review of the Interior Department's valuation plan for the buyback program." In a statement, Kevin Washburn, assistant

secretary for Indian Affairs, said that the review “confirms that the steps we are taking to determine fair market value for offers to landowners are cost-effective and conform to the best practices for valuation.” Washburn promised a “transparent process to provide fair market value to tribal landowners.”

MASSACHUSETTS SENATE APPROVES TRIBAL CASINO AGREEMENT. The Boston Herald (11/8, 643K) reports that the Massachusetts Senate “signed off Thursday on a revised casino compact between Gov. Deval Patrick and the Mashpee Wampanoag tribe.” The article notes that “the compact between Patrick and the Mashpee must be approved by the federal Bureau of Indian Affairs, which last year rejected an earlier agreement that guaranteed the state 21.5 percent of gambling revenues from a tribal casino. “ According to the article, “under the revised compact, the tribe would give the state 17 percent of its gambling revenues if its casino is the only gambling facility in the southeast region, and 21 percent if it winds up as the only casino built in the state.”

Also reporting on the story are the Taunton (MA) Gazette (11/8, 36K), the Springfield (MA) Republican (11/8, 286K), and the Cape Cod (MA) Times (11/7, 92K).

Top National News:

OBAMA APOLOGIZES TO THOSE LOSING HEALTH COVERAGE DUE TO ACA. At the opening of NBC Nightly News (11/7, lead story, 4:35, 7.86M), Brian Williams said, “We are all about to hear the President of the United States apologize...for the fact that his promise to the American people that if they like their current health insurance they can keep it has not held true for all.” Chuck Todd, who interviewed President Obama earlier on Thursday, went on to report that “the President’s apparent broken promise about folks keeping the plans they like has been weighing heavily on the entire White House, so it was a chastened commander in chief that I spoke with.” President Obama was shown saying, “We’re talking about five percent of the population who are in what’s called the individual market,” and “even though it only affects a small amount of the population, it means a lot to them, obviously, when they get this letter [informing them that their health insurance has been] canceled – and I am deeply concerned about it and I’ve assigned my team to see what can we do.”

The New York Times (11/8, Shear, Subscription Publication, 9.61M), in an article titled “Apologizing, Obama Yields to Criticism of Health Law,” reports that in that interview, the President “bowed...to mounting criticism that he had misled the American people about the health care law, apologizing to people who were forced off their health insurance plans by the Affordable Care Act despite ‘assurances from me.’” The Times says the President’s “decision to apologize...reflects the increasingly dire political position that the president is in.”

As does the Times, nearly every report on the President’s interview includes some variation of the words “apology” or “sorry” in the title. Under the headline “President Obama Apologizes To Americans Who Are Losing Their Health Insurance,” the Washington Post (11/8, A1, Eilperin, 4.28M) reports that Thursday’s interview represented an “unusual act of contrition for a president who has come under heavy criticism for misleading the public.” According to the Post, “presidents rarely say ‘I’m sorry’ in public, even when acknowledging missteps,” and, on Thursday, President Obama “only did so after Chuck Todd...pressed him on the point.”

Scott Pelley, on the CBS Evening News (11/7, story 6, 0:50, 5.58M), said the President “apologized for one of the biggest emerging problems with the [Affordable Care Act].” According to Pelley, “More than three million Americans have been told that they will lose their health insurance plans, even though the President has repeated for years that Americans who liked their plans could keep them.”

In a distillation of the President’s remarks on NBC that is representative of the coverage last night and this morning, Roll Call’s (11/8, Dennis, Subscription Publication, 87K) Steven Dennis writes that the President, “after weeks of trying to finesse the issue of millions of Americans losing their health insurance plans despite the oft-repeated promise that they could keep them if they liked them...has apologized.” Dennis also notes that the President’s “apology” follows a Wednesday White House meeting in which “Senate Democrats facing re-election in 2014 vented anger at the Obamacare roll-out.”

The National Journal’s (11/8, Fournier, Subscription Publication, 427K) Ron Fournier, who, in a widely noted column earlier this week, had accused the President of “lying” about the impact of the Affordable Care Act on the individual market, says “the NBC interview was full of excuses,” and urges the President to “to stop blaming

Republicans, insurance companies, and the media – to stop making excuses and shading the truth." On the other hand, Andrew Sullivan (11/8, 27K), who on Wednesday had counseled the President to "stop digging" and "be as candid as you possibly can" in acknowledging that he "over-sold" the ACA, says the President "did exactly the right thing" in his NBC interview.

Todd, in an online piece for NBC News (11/7, Todd, 6.79M), noted that it has been reported that the Administration "has known since the summer of 2010 that millions of Americans could lose their insurance under the law" despite the President's "repeated assurances" to the contrary. According to Todd, "Guidance from the Department of Health and Human Services dating back to July 2010 estimated that '40 to 67 percent' of the 14 million consumers in that marketplace could lose their policies."

Under the headline "Obama Says He's Sorry Americans Losing Insurance," the AP (11/8, Pace) reports that while the President "says he's sorry Americans are losing health insurance plans he repeatedly said they could keep," he "stopped short of apologizing for making those promises in the first place." The AP adds that "critics" of the President "have accused him of misleading the public about changes that were coming under the law, which remains unpopular with many Americans."

USA Today (11/8, A1, Madhani, 5.82M) says the President was responding to "a steady stream of criticism as millions of Americans on the individual insurance market received notices that their plans do not meet the minimum benefit requirements set under the ACA and will be canceled." USA Today says the President's apology "mark[s] a significant change in tone following more than a week of his aides resisting suggestions that the president misled Americans." USA Today notes that Senate Minority Leader McConnell "dismissed the apology, and called on Obama to embrace a bipartisan legislative effort in the Senate that would allow those getting cancellation notices to retain their coverage." McConnell is quoted as saying, "If the president is truly sorry for breaking his promises to the American people, he'll do more than just issue a half-hearted apology on TV."

Politico (11/8, Epstein, 467K) notes that on Monday, at an Organizing for Action event, the President "was far less conciliatory than he was on Thursday," saying, "if you had one of these plans before the Affordable Care Act came into law and you really liked that plan, what we said was you can keep it if it hasn't changed since the law passed." According to Politico, "what he'd said since fighting for ACA's passage was only the first part of that line."

Bloomberg News (11/8, Lerer, 1.91M) says the President's "public approval ratings have been driven down by" HealthCare.gov's "flawed" launch "and stories about canceled policies." Bloomberg goes on to report that the President had "previously accused his critics of being 'grossly misleading' about how the law works and said those people being thrown off plans that don't meet the law's standards will be getting better insurance coverage."

The Los Angeles Times (11/8, Parsons, Hennessey, 3.07M) reports that on Thursday, the President "suggested he was open to changes in parts of the law but did not offer specifics," and "also promised to find a solution for those who are losing plans they like and paying a higher premium not offset by government subsidies."

Ruth Marcus, in a column for the Washington Post (11/8, Marcus, 4.28M) that points to the potential benefits of the ACA nevertheless says the President had been "peddling a misleading claim" before "weaselly rewording...his pledge" earlier in the week, which she says "insults anyone who heard what he said repeatedly."

Hagan Backs Landrieu Bill That Would Delay Cancellations. McClatchy (11/8, Schoof, 95K) reports that on Thursday, Sen. Kay Hagan "joined a push by Senate Democrats to get the Obama administration to make sure that people who like their health insurance can keep it." McClatchy says Sen. Mary Landrieu "Keeping the Affordable Care Act Promise Act," which Hagan now says she supports, "would let people keep their current health plans as long as they made the payments, even if the policies don't meet coverage standards under the law." McClatchy notes that both Hagan faces a reelection campaign in state where the ACA is "isn't popular," but "pushed back against the idea that the health care plan would cause political trouble for her next year."

AP Analysis Identifies Potential Upside To Millions Of Canceled Policies. Ricardo Alonso-Zaldivar, in an analysis for the AP (11/8, Alonso-Zaldivar) titled "Canceled policies could be a plus for new market," says while it is true that "millions of people who currently buy their own health insurance coverage are losing it next year," it is

also the case that "experts say the resulting shift of those people into the new health insurance markets...would bring in customers already known to insurers, reducing the overall financial risks for each state's insurance pool." Alonso-Zaldivar says "that's painful for those who end up paying higher premiums," but "it could save money for the taxpayers who are subsidizing the new coverage."

According to The Hill (11/8, Sink, 194K), "Some insurance companies have...announced they would not continue to offer existing plans, saying that it is too administratively burdensome to manage plans that do not satisfy basic coverage requirements mandated by" the ACA, and, "instead, they've offered consumers more expensive plans."

Charles Krauthammer, in his column for the Washington Post (11/8, Krauthammer, 4.28M), says, "The more honest Obamacare advocates are...admitting that to make this omelet you have to break 8 million eggs – roughly the number of people with individual plans who are expected to lose them."

SENATE PASSES ENDA, BUT HOUSE PROSPECTS APPEAR BLEAK. The Senate voted Thursday to pass the Employment Non-Discrimination Act, which would prohibit workplace discrimination based on sexual orientation or gender identity. While gay rights advocates are hailing the bipartisan 64-32 Senate vote as a victory, the bill has dim prospects in the House, where House Speaker Boehner has indicated a vote may not even occur. The Senate vote gets heavy print coverage this morning. Almost universally, the reports cast the vote as a major step forward for the gay rights movement but note that House passage is unlikely. The CBS Evening News (11/7, story 4, 0:30, Pelley, 5.58M) reported that while supporters said the measure "would allow workers to love whom they chose without the threat of being fired," opponents argued that "it could force employers to violate their own religious beliefs."

The AP (11/8, Cassata) says the vote reflects "Americans' increasing acceptance of gays," and notes that while gay rights advocates praised the vote, "as a historic step," it "could prove short-lived," as Boehner, who opposes the measure, "has signaled that the Republican-led House is unlikely to even vote." Boehner claims the measure "is unnecessary and would touch off costly, lawsuits for businesses."

The Washington Post (11/8, O'Keefe, 4.28M) calls the vote "another milestone victory for the gay rights movement that has been gaining favor in the courts and electoral politics." However, like other reports this morning, the Post reports that the bill "faces a steep uphill climb in a GOP-controlled House still dominated by social conservatives." House GOP leaders "believe the measure is too broad and is unnecessary," and that "the people ENDA is intended to protect are already covered under existing federal, state and private workplace protection laws."

Politico (11/8, Everett, 467K) reports that the Senate vote was a "poignant moment for gay rights activists," who saw the measure fail by one vote in the chamber in 1996. Politico also notes that Democrats disagree with House Republicans' assessment of the bill, "and noted that Boehner's home state of Ohio is a state where such discrimination is not prohibited." Senate Majority Leader Reid said, "The time has come for Congress to pass a federal law that ensures all citizens, regardless of where they live, can go to work not afraid of who they are." Reid expressed concern that ENDA "will be put into the same vault where Boehner has shelved bipartisan immigration, farm and Internet sales tax bills."

Roll Call (11/8, Shiner, Subscription Publication, 87K) calls the vote "a tempered win for gay rights advocates who still need a reluctant, GOP-controlled House to take up and pass the bill." Roll Call adds that the bill's prospects in the House "appear dim."

The Los Angeles Times (11/8, Memoli, 3.07M) reports that gay rights advocates "hailed the bipartisan vote" and again called on Boehner to allow a vote in the House. The Times notes that House Minority Leader Pelosi "said this week that '95 percent' of Democrats stand ready to vote for the Senate-passed bill in the House, and that just 10% of Republicans would need to add their votes to ensure passage."

The Wall Street Journal (11/8, Peterson, Subscription Publication, 5.91M) reports that bill supporters expressed optimism that the House could vote on it, especially if it is added as an amendment to other legislation such as the defense authorization bill. The Journal also notes that Democrats say blocking the measure could hurt Republicans in the next election.

Obama Urges House Republicans To Follow Senate's Example. The New York Times (11/8, Peters, Subscription Publication, 9.61M) describes the Senate vote as a "bipartisan show of support that is rare for any social issue," but notes that "nothing is guaranteed in the House." The Times also reports that the President hailed the Senate vote, "and urged House Republican leaders to bring the bill to the floor for a vote," saying in a statement, "One party in one house of Congress should not stand in the way of millions of Americans who want to go to work each day and simply be judged by the job they do. ... Now is the time to end this kind of discrimination in the workplace, not enable it."

Politico (11/8, Epstein, 467K) reports that the President said the Senate's passage of the measure "is 'a tribute' to those who have fought for gay rights for decades." The President said it is now "up to the House of Representatives," adding that the measure "has the overwhelming support of the American people, including a majority of Republican voters, as well as many corporations, small businesses and faith communities. They recognize that our country will be more just and more prosperous when we harness the God-given talents of every individual."

Mormon Church Was a "Powerful Ally" In Senate's Passage Of ENDA. The New York Times (11/8, Peters, Subscription Publication, 9.61M) reports that the Mormon Church has been an "unconventional and powerful ally" at "nearly every critical juncture" as the Senate bill moved toward passage. The measure was "a priority" of Senate Majority Leader Reid, "who, as the Mormon Church's highest-ranking member in the government, put the nondiscrimination measure at the top of the Senate's agenda once the government reopened last month." Moreover, Sen. Orrin Hatch, who once opposed the bill, "changed his mind earlier this year after Gordon H. Smith, a fellow Mormon and former Republican senator, convinced him there was nothing in it that violated church doctrine." And, Sen. Dean Heller, "who has taught Sunday school at his Mormon church, provided the crucial 60th vote to break a filibuster." The Times notes that "all but two of the Senate's seven Mormons voted yes."

GDP SHOWS "SURPRISING" STRENGTH, BUT LONG-TERM TROUBLE SEEN. Media coverage of economic news on Thursday was sharply split – while the Twitter IPO went extremely well, the rest of the news from the markets was grim. In addition, while the Q3 GDP report was better than expected, underlying data is seen as a sign of economic weakness going forward.

The AP (11/8, Crutsinger) reports that the Commerce Department announced on Thursday that the GDP rose at a 2.8 percent annual rate in the third quarter, showing "surprising" growth. However, "much of the gain came from a buildup in company stockpiles," while consumer and business spending slowed, a "cautionary sign for the current quarter and early 2014."

The New York Times (11/8, Schwartz, Subscription Publication, 9.61M) reports that the economy was "bolstered by inventory investments and a narrowing trade deficit," but economists "warned the gains could be fleeting." The 2.8 percent rate was "well above" the 2.0 percent rate expected by economists. The Times says that on the debt side, consumer spending in the 3rd quarter rose "just" 1.5 percent, "well below the 2.3 percent pace of the first quarter and the slowest advance since the second quarter of 2011."

The Wall Street Journal (11/8, Shah, Knox, Subscription Publication, 5.91M) reports that the rate of growth was up from 2.5 percent in the 2nd quarter and was the quickest pace of expansion in a year. However, the Journal warns that a substantial portion of the growth came from a buildup in inventories held by businesses, and that is unlikely to continue if consumer demand does not rise. Excluding business inventories, the core GDP rose at a 2.0 percent rate, down from a 2.1 percent core rate in .

The Los Angeles Times (11/8, Lee, 3.07M) reports on the positive top-line of the report, but says that "details" were "less encouraging." The Times says that "many analysts" saw the overall report "as another indication that the economy is still struggling to break out of a four-year-long recovery that has been slow, bumpy and marred by unexpected shocks, the most recent of which was the federal government shutdown."

Twitter Soars On IPO, But Markets Overall Sink. The AP (11/8, Rothwell, Sweet) reports that in the stock market on Thursday, Twitter "popped" but the rest of the market "dropped." Twitter "wowed investors with a 73 percent surge on its first day of trading Thursday." However, the Dow Jones Industrial Average "retreated" from Wednesday's record high, falling 152.90 points to 15,593.98. The S&P 500 fell 23.34 points to 1,747.15. Meanwhile, the NASDAQ Composite Index fell 74.61 points to 3,857.33. The Q3 report is blamed for the drop, as,

given its strength, "traders worried that the Federal Reserve could cut back on its economic stimulus."

ABC World News (11/7, story 3, 3:10, Sawyer, 7.43M) reported that Twitter is "soaring on the first day of trading as a public company," far surpassing the market's expectations. ABC (Muir) looks at whether it will boost the economy generally, reporting that long-term investment could pay off for individual investors, as Amazon, Apple and Groupon have.

NBC Nightly News (11/7, story 4, 2:15, Williams, 7.86M) reported that Twitter share prices rose from \$26 to "almost \$45." CBS (Quintanilla) added, "Already Twitter has more than 230 million users around the world, 76 percent of them on mobile devices" and "a whopping 500 million tweets are sent each day." However, despite the service's popularity, "we may not know for years if it makes money. That's because it's plowing cash back into the business to get more users," a "high risk business."

The CBS Evening News (11/7, story 2, 2:10, Pelley, 5.58M) reported Twitter "charges advertisers to insert ads in users' fees" but "the company still hasn't made money. It lost almost \$65 million last quarter and doesn't forecast a profit until 2015."

The AP (11/8, Ortutay) reports shares of Twitter "instantly" jumped "more than 70 percent above their offering price in a dazzling debut that exceeded even Wall Street's lofty hopes." By the market close, the company "was valued at \$31 billion – nearly as much as Yahoo Inc., an Internet icon from another era, and just below Kraft Foods, the grocery conglomerate founded more than a century ago." Overall, the performance "seemed to affirm the bright prospects for Internet companies, especially those focused on mobile users."

In an editorial, the Wall Street Journal (11/8, Subscription Publication, 5.91M) says that the success of Twitter's IPO shows that the US continues to produce vibrant new companies and lead the world in providing services in the digital age. Looking at the company's prospects, the Journal expects that they are good in the long-term. The Journal also adds a shot at Healthcare.gov, saying that Twitter hadn't crashed despite all the media attention.

October Jobs Report Due Tomorrow. Politico (11/8, Cirilli, 467K) reports that on Friday, the Department of Labor will report jobs numbers for October. However, a Politico report says that the shutdown is likely to skew the numbers.

Krugman Says Efforts To Control Debt Crippling Economy. In his column for the New York Times (11/8, Krugman, Subscription Publication, 9.61M), Paul Krugman writes that while the recession officially ended in 2009, "nobody would argue that we've had anything like a full recovery." Krugman says that what "passes these days for sound policy is in fact a form of economic self-mutilation, which will cripple America for many years to come," according to "researchers from the Federal Reserve." Krugman blames efforts to reduce Federal spending.

Editorial Wrap-Up:

NEW YORK TIMES. "Judge Scheindlin's Case." The New York Times (11/8, Board, Subscription Publication, 9.61M) editorializes that "the United States Court of Appeals for the Second Circuit erred badly last week when it stayed the remedies ordered by Judge Shira Scheindlin of Federal District Court to correct the civil rights violations associated with New York City's stop-and-frisk policy," as well as "also unjustly damaged Judge Scheindlin's reputation when it removed her from the case." The Times argues that the "court ignored a rule that requires judges accused of improper conduct to receive notice and an opportunity to respond," and "worse, the panel put on hold the corrective measures on stop-and-frisk that the public wants and needs."

"Lessons From European Prisons." An editorial in the New York Times (11/8, Subscription Publication, 9.61M) argues that a new report from the non-profit group the Prison Law Office and the Vera Institute of Justice, based on research by a group of US corrections officials, judges, prosecutors and public defenders, who visited prisons in Germany and the Netherlands, "suggests that European sentencing and penal practices may provide useful guidance in the growing effort to reform an American prison system buckling under its own weight." The Times notes that while direct comparisons "are hard to make, and some European practices would not be workable with violent prisoners," the report "emphasizes that many of the principles are applicable especially to lower-level, nonviolent offenders." The Times argues that as states consider reforms, "they would be wise to pay close

attention to European counterparts.”

“Religion, Contraception, And Bosses’ Rights.” The New York Times (11/8, Subscription Publication, 9.61M) editorializes that the Affordable Care Act’s “mandate that employer health plans cover birth control has sparked dozens of lawsuits,” and so far, “a handful of federal appeals courts have ruled on the question, with a few correctly rejecting the specious religious liberty claims,” although the latest ruling “goes the wrong way.” The Times argues that “the Supreme Court is expected to decide by Thanksgiving whether it will take up the issue,” and “its duty is to resolve the conflicting opinions by firmly rejecting the dangerous view that private employers can use their religious belief to discriminate against women.”

“Labels For Controversial Ingredients.” The New York Times (11/8, Subscription Publication, 9.61M) editorializes that voluntary labeling of genetically modified food is a better course of action than mandatory labeling, as required by a Washington state measure that partial results say voters have rejected, or the food industry’s strategy of “fighting these initiatives hard.” The article claims that consumers want to understand the contents of the food they purchase, but “the vast majority may well shrug at the labels and buy the products anyway” since they have previously done so without harm.

WASHINGTON POST. “School Reform Is Working.” In an editorial, the Washington Post (11/7, 4.28M) write that “the unassailable message” of the District of Columbia’s improved scores is that the city’s school reform “is working.” The Post calls for the critics of those reforms to take note, adding that some “owe apologies for their slanderous suggestions that school officials were cheating.” The Post calls for “more open-mindedness” on such reforms, concluding that “these results show that the reformers are on the right track.”

“Affirmative Discrimination.” The Washington Post (11/8, 4.28M) editorializes that a recent decision of the Dominican Republic’s highest court to strip ethnic Haitian migrants of Dominican citizenship is an “unconscionable decision” borne of racism that will leave the Haitians stateless. The court ordered authorities to “comb through birth records, back to 1929, to weed out ethnic Haitians no longer entitled to citizenship.” The editorial called upon US officials to work with their Dominican counterparts to “press the issue” and not ignore the injustice.

“Cuccinelli Has Himself To Blame.” The Washington Post (11/8, Board, 4.28M), in an editorial on Virginia Gov.-elect Terry McAuliffe’s victory on Tuesday, says Republican Ken Cuccinelli’s “record had nothing to do with job-creation or the state’s economic well-being,” and was, instead, “mainly about bashing homosexuals, harassing illegal immigrants, crusading against abortion, denying climate change, flirting with birthers and opposing gun control.”

WALL STREET JOURNAL. “#Freedom.” In an editorial, the Wall Street Journal (11/8, Subscription Publication, 5.91M) says that the success of Twitter’s IPO shows that the US continues to produce vibrant new companies and lead the world in providing services in the digital age. Looking at the company’s prospects, the Journal expects that they are good in the long-term. The Journal also adds a shot at Healthcare.gov, saying that Twitter hadn’t crashed despite all the media attention.

“School Reform Delivers.” In an editorial, the Wall Street Journal (11/8, Subscription Publication, 5.91M) writes that Education Secretary Duncan’s positive words on the National Assessment of Educational Progress only apply to the states that have enacted teacher accountability and other reforms, adding that the slight improvements in the national averages aren’t worth crowing over. The Journal attributes the District of Columbia’s improvements to teacher evaluations and the end of tenure, and Tennessee’s to eliminating collective bargaining, as well as evaluations.

“Europe And The Zero Bound.” In an editorial, the Wall Street Journal (11/8, Subscription Publication, 5.91M) argues that the European Central Bank’s policy until now has been very accommodative and worries that the central bank’s dovish policy has eased pressure on European governments to reform. The Journal argues that those worried about deflation will next pressure the bank to pursue unconventional monetary policy, but says that ECB President Mario Draghi should continue to focus on the bank’s mandate of price stability.

Washington Schedule:**TODAY'S EVENTS IN WASHINGTON.**

White House:

PRESIDENT OBAMA – Departs the White House en route Joint Base Andrews, South Lawn, open press; departs Joint Base Andrews, Out-of-Town Travel Pool Coverage; arrives New Orleans, Louisiana, Louis Armstrong International Airport, open press; tours the Port of New Orleans, port of New Orleans, out-of-town travel pool Coverage; delivers remarks, port of New Orleans; open to pre-credentialed media; departs New Orleans, Louisiana, Louis Armstrong International Airport, open press; arrives Miami, Florida, Miami International Airport, open press; attends a DNC event, Private Residence, Coral Gables, Florida, closed press; delivers remarks at a DSCC event, Private Residence, Miami, Florida, print pool for remarks only; delivers remarks at a DSCC event, private residence, Miami, Florida, print pool for remarks only. Notes: Principal Deputy Press Secretary Josh Earnest will gaggle aboard Air Force One

VICE PRESIDENT BIDEN – In the morning, the Vice President will attend meetings at the White House. The Vice President will attend an event for the Democratic Congressional Campaign Committee in Baltimore, Maryland. The Vice President will deliver remarks at the Second Annual Louis L. Redding Benefit and Awards Gala in Wilmington, Delaware. This event at the Hotel du Pont is open press.

MICHELLE OBAMA – The First Lady will host a workshop at the White House for high school students from DC, New York and Boston about careers in film.

US Senate: No Scheduled Events.

US House: Nov. 1 – 12. – The House will be in recess for a Constituent Work Period until 2 pm on Tuesday, November 12th.

Other: **NATIONAL ARCHIVES – IRAQI JEWISH ARTIFACTS** – The National Archives will unveil a new exhibition, "Discovery and Recovery: Preserving Iraqi Jewish Heritage." The exhibit details the dramatic recovery of historic materials relating to the Jewish community in Iraq from a flooded basement in Saddam Hussein's intelligence headquarters, and the National Archives ongoing work in support of US Government efforts to preserve these materials. Video preview online (www.youtube.com/watch?v=bZmP0uwzEII) Location: Lawrence F. O'Brien Gallery of the National Archives Building. Contacts: Public affairs 202-357-5300. Notes: Background On May 6, 2003, just days after the Coalition forces took over Baghdad, 16 American soldiers from Mobile Exploitation Team Alpha, a group assigned to search for nuclear, biological, and chemical weapons, entered Saddam Hussein's flooded intelligence building. In the basement, under four feet of water, they found thousands of books and documents relating to the Jewish community of Iraq – materials that had come from synagogues and Jewish organizations in Baghdad.

VIETNAM WOMEN VETERANS – Nov. 8 – 11. Full agenda at: <http://www.vietnamwomensmemorial.org/upcoming.php?storytelling2011>. Highlights: 1 p.m. American Red Cross Memorial Service in the Memorial Garden of the ARC Headquarters.

US CHAMBER – GLOBAL INTELLECTUAL PROPERTY – 9 a.m. – 3 p.m. The US Chambers Global Intellectual Property Center hosts the "Global IP Summit: Enhancing our Today, Building our Tomorrow." Location: US Chamber Headquarters, 1615 H St. NW. Contacts: Trinh Nguyen (tnguyen@uschamber.com)

G2 AT GW – US CHINA ECONOMIC RELATIONS – 9 a.m. – 4:30 p.m. G2 at GW: 6th Annual Conference on US-China Economic Relations and China's Economic Development. Keynote: Steve Barnett, Division Chief – China, IMF. Session 1: China-US Trade: Jobs and Competition; Ann Hamison, Professor of Management, Pennsylvania; Mary Lovely, Professor of Economics, Syracuse; Peter Schott, Professor of Economics, Yale. Session 2: Multinational Firms in the US and China; Lee Branstetter, Associate Professor of Economics and Public Policy, Carnegie Mellon; Wenjie Chen, Assistant Professor of International Business, GW. Session 3: China's Growth and Financial Liberalization; Xiaodong Zhu, Professor of Economics, University of Toronto; Chang-Tai Hsieh, Professor of Economics, University of Chicago. Session 4: China's Economic and Political Development; James Kung, Senior Fellow, Hkust; Yan Wang, Visiting Professor, GW. <http://www.elliottschool.org/events/calendar.cfm?fuseaction=ViewMonthDetail&yr=2013&mon=112219>. Location: Lindner Family Commons, Room 602 1957 E Street NW. Notes: RSVP: <http://go.gwu.edu/2013chinaatgw>

NASA – ORBIT BRIEFING – 8:50 a.m. Nine International Space Station crew members discuss their mission with reporters from around the world during a joint crew news conference to be broadcast live on NASA Television. Contacts: Joshua Buck (jbuck@nasa.gov), 202-358-1100.

FUTURE OF NAVY OPERATIONS – GREENERT – SEQUESTRATION – 9 a.m. – 10 a.m. IISS-US Policy Makers Series, Admiral Jonathan Greenert, Chief of Naval Operations, US Navy. <http://www.iiss.org/en/events/events-s-calendar/future-of-us-navy-operations-922e>. Location: IISS-US, 2121 K Street NW, Suite 801. Contacts: RSVP to: events-washington@iiss.org (202 659 1490)

JAPANESE STONE LANTERN UNVEILING – 11 a.m. Japanese Stone Lantern Plaza Unveiling and Ribbon-Cutting Ceremony. Participants: H.E. Kenichiro Sasae, Ambassador of Japan; Superintendent Bob Vogel, National Mall and Memorial Parks; Caroline Cunningham, President, Trust for the National Mall; Tsunehiko Yanagihara, President, Japan Commerce Association of Washington, D.C. (JCAW). Location: Japanese Lantern at the Tidal Basin, Independence Avenue and 17th Street SW. Contacts: Farrah Kim farrahkim@rational360.com (202-568-8986, 310-408-8335)

GI BILL – ONE MILLIONTH USER – 11:30 a.m. Telephone news conference with Dr. Jill Biden and VA officials announcing the Post-9/11 GI Bill one millionth beneficiary and the success of the program since its inception in 2009. Speakers: Dr. Jill Biden, Second Lady of the United States; Allison Hickey, Undersecretary for Benefits, Dept. of Veterans Affairs; Steven Ferraro of Edison, N.J., one millionth user of Post-9/11 GI Bill. MEDIA DIAL IN: (800) 553-0351 and ask for the "GI Bill" call. On the Net: <http://www.gibill.va.gov>

WEAPONS OF MASS DESTRUCTION – 3 p.m. – 5:30 p.m. Senior US officials and nongovernmental experts will explore US domestic and international efforts at curbing the proliferation of weapons of mass destruction to non-state actors (Terrorists and other criminals). Speakers: Simon Limage, Deputy Assistant Secretary for Nonproliferation, US Department of State; Rick Cupitt, UNSCR 1540 Coordinator, US Department of State; Johan Bergenas, Deputy Director, Stimson's Managing Across Boundaries Initiative. Moderator: Brian Finlay, Managing Director, Stimson's Managing Across Boundaries Initiative. Location: The Stimson Center, 1111 19th St., NW -12th Floor. Contacts: Rich Robinson Communications@stimson.org (202-478-3419)

FEDERAL RESERVE – 3:30 p.m. The Federal Reserve holds panel discussions on "The Crisis as a Classic Financial Panic." Contacts: Ismaila Dieng (IMF), 202-623-9758. Notes: Media must register in advance with contact. Event will be webcast live at: <http://www.imf.org/external/np/res/seminars/2013/arc/>

INTERNATIONAL MONETARY FUND CONFERENCE – BERNANKE – 3:30 p.m. International Monetary Fund Conference: Fourteenth Jacques Polak Annual Research Conference with Federal Reserve Chairman Ben Bernanke on The Crisis as a Classic Financial Panic. Contact: Ismaila Dieng, International Monetary Fund, (202) 623-9758 or idieng@imf.org (Media must register in advance). <http://www.imf.org/external/np/res/seminars/2013/arc/>

JUDGE OKUN SWEAR-IN – 4 p.m. Superior Court Judge Investiture of Robert Okun. Speakers: DC Court of Appeals Senior Judge Frank E. Schwelb, oath of office; Assistant US Attorney Anthony Quinn and PDS Counsel Laura Hankins. Location: Moultrie Courthouse, Atrium, 500 Indiana Avenue, NW. Contacts: Leah Guowitz ((202) 879-1700). On the Net: www.dccourts.gov

ELLIOTT SCHOOL – AMBASSADOR KING – 5:30 p.m. – 7:30 p.m. "Prospects for US-Taiwan Relations" with Pu-Tsung King, Ambassador for the R.O.C. – an evening with the Ambassador of the Republic of China (Taiwan) to the United States, Pu-Tsung King. Elliott School Dean, Mike Brown will give introductory remarks. <http://www.elliottschooll.org/events/calendar.cfm?fuseaction=ViewMonthDetail&yr=2013&mon=112219>. Location: City View Room, 7th Floor, 1957 E Street NW. Notes: RSVP: <http://go.gwu.edu/ambassadorking>

Last Laughs:

LATE NIGHT POLITICAL HUMOR.

Jimmy Kimmel: "New Jersey Governor Chris Christie, I don't know if it is an honor. He appeared on the cover of the new 'Time' magazine. This is the headline – it says – 'The Elephant in the Room,' which could be a reference to the fact that he is a Republican and the elephant is their symbol. But let's be honest, it isn't".

David Letterman: “[Referring to New York City mayoral election] Yes, 22 percent of register voters of New York City citizens voted for the mayor. Twenty-two percent. I’ll tell you why. It’s more fun to vote if your mayor’s on crack. More fun to vote.”

David Letterman: “The new guy, De Blasio, he was so tired from celebrating or something he missed an important budget meeting. The new guy did. He slept through an important budget meeting, the new guy did. And I said have you tried crack? What’s the matter with you? But it reminds me of George W. Bush who slept through eight years it in the White House.”

Jon Stewart: “As you know, all week we have been following Toronto Mayor Rob Ford as he’s been filming the footage for what we assume will be his forthcoming VH1 ‘Behind the Music’ episode. He was riding high as Mayor of Toronto. But how high, no one had any idea.”

Jimmy Fallon: “Earlier this week, Joe Biden – what a nice guy – called Boston’s Mayor-elect Marty Walsh to congratulate him on winning. But it turns out he called the wrong Marty Walsh. He called a dude named Marty Walsh who lives in Boston. But in Biden’s defense, it’s pretty hard to find a guy in Boston who isn’t named Marty Walsh. It’s like, ‘Hey, you Marty Walsh? I’m Marty Walsh. Yeah, I work with your brother Marty Walsh.’”

Jay Leno: “You know, I was thinking about Thanksgiving today and I realized that’s who we should put in charge of the Obamacare website. The Butterball Hotline people. You ever call them? They always pick up. They’re friendly. They have all of the information you need. And they’re used to dealing with big turkeys. So this thing would be fantastic.”

Jay Leno: “The White House webpage still says – it still says this: ‘If you like your healthcare plan, you can keep it.’ well, we know that’s not true. But, the White House said today they’re trying to change it, they just can’t log on.”

Jay Leno: “You know, people are criticizing the latest issue of ‘Time’ magazine. ...They got Chris Christie. See the silhouette with the headline: ‘The Elephant in the Room.’ This is a real issue. No, that’s the real issue. You know, people think, oh, it’s kind of a jab. But, in their defense, I think they chose the least offensive title. Here’s the other ones they had. Take a look. ‘Chris Christie Having a Whale of a Time.’ I didn’t like that one. Then they have, ‘Between a Rock and a Lard Place.’ Yeah, that’s not good. And ‘Hail to the Chef.’ Yeah, I don’t think any of those...were appropriate.”

Jay Leno: “Exit polls showed that Virginia’s anti-oral sex candidate – remember the guy that was against oral sex? Ken Cuccinelli? ...Anyway, he won married women by nine percent. But he lost married men by 100 percent.”

Jay Leno: “Well, I guess you heard this. Apparently, there is a huge crack problem in Toronto. Luckily, it’s just confined to the Mayor’s office.”

Jay Leno: “As I’m sure you’ve heard by now, the mayor of Toronto, a man named Rob Ford, has admitted to smoking crack cocaine. But, you know, people should have seen it coming. There were signs. Like his last campaign slogan, ‘Just say yes.’”

Jay Leno: “And voters in Colorado approved a 25 percent tax on recreational marijuana. Twenty-five percent. Now opponents of this tax say it will make marijuana too expensive. I just hope it doesn’t cause people to start buying illegally grown marijuana.”

Outside Magazine: Sizing Up Sally Jewell

Kershaw, Jessica <jessica_kershaw@ios.doi.gov>

Mon, Nov 11, 2013 at 10:37 PM

To: Sally Jewell (b)(5)@ios.doi.gov

Cc: Kate Kelly <kate_kelly@ios.doi.gov>, Blake Androff <blake_androff@ios.doi.gov>, Laura Davis <laura_davis@ios.doi.gov>, Nikki Buffa <nicole_buffa@ios.doi.gov>, Benjamin Milakofsky <benjamin_milakofsky@ios.doi.gov>

Hi Sally -

I hope your travels back to the left coast were safe and you're gearing up for a busy week here in DC with the WH Tribal Nations Conference.

To kick off the week, we've got a rather well-balanced, extremely well research, long-form, profile to share with you (pasted below) from the months that Bruce Barcott from Outside Magazine has been following you, interviewing you and paying attention to what you've been doing.

The piece we've been working on and you've been speaking to Barcott about for all these months is finally out - in the Dec '13 issue of Outside Mag - and the online version is below for you.

It appears he published before your National Press Club speech so I imagine there is some kicking himself going on that he wasn't able to add the key pieces of your conservation agenda to this article - however - he does capture your desire for re-connecting youth and the outdoors, and a well-balanced, all-of-the-above energy approach.

We'll be interested in your thoughts on this one - it's been in the works since you arrived!

Jessica

Outside Magazine: Sizing Up Sally Jewell

The new Interior Secretary has an impressive résumé. Oil geologist, banker, president of REI. But today's Washington is a landscape without maps, and in this age of climate change and keystone, the major battles are taking place over at the EPA and State. Is greatness still possible at Interior?

By: BRUCE BARCOTT

Here was a cabinet secretary whose adventure résumé rivaled her executive CV. She's climbed Antarctica's Vinson Massif, and she summited Mount Rainier the first of seven times at age 16.

The interior secretary recognized the jacket and boots I wore to her office. Four months earlier she'd been selling them.

"They let you in here wearing that?" Sally Jewell said, giving the once-over to my North Face soft shell and Zamberlan hiking boots.

Jewell, the former REI chief executive who is now in charge of one-fifth of the U.S. landmass, 700 million acres of subsurface mineral estate, 1.7 billion acres of offshore territory, 401 national parks, 561 national wildlife refuges, 476 bureau of reclamation dams, 2,055 endangered or threatened species, and the maintenance of good relations with 566 American Indian tribes, smiled and led me into her working quarters.

"Holy shit," I couldn't help but blurt out.

The office of the Secretary of the Interior has long been one of the most formidable redoubts in the federal government. In scope the corner suite rivals the state of Montana

—if big sky Country were carpeted in royal blue.

“I know,” Jewell said. “I’m still getting used to the size of it.”

The same could be said of Jewell’s new job, which the sinewy, silver-haired, 57-year-old executive took over in early April. In the 164-year history of the Interior Department, no incoming secretary has faced such a steep learning curve. Last December, she had nothing more pressing on her mind than the holiday sales figures at recreational Equipment Incorporated, the outdoor-gear cooperative she’d run for the past eight years. Then came a phone call from President Barack Obama, who offered an upgrade she couldn’t refuse.

“This is the one job I would have left REI for,” she told me. “I’m not sure there’s another one out there.”

If the offer was a surprise to Jewell, it was equally unexpected to members of the capital’s chattering class, none of whom had Jewell on the list of likely successors to Ken Salazar, Obama’s first-term Interior boss. With zero political experience and an eclectic three-phase career (petroleum engineer, banker, outdoor retailer), Jewell gave everyone something to love—and to worry about. The American Petroleum Institute liked her oil-field experience. The Natural Resources Defense Council saw (it hoped) a nominee with “the heart of an environmentalist and the know-how of a business woman.”

For the outdoor industry, her appointment brought long-sought recognition of recreation’s place on public lands. Here was a cabinet secretary whose adventure résumé rivaled her executive CV. She’s climbed Antarctica’s Vinson Massif, and she summited Mount Rainier the first of seven times at age 16. “This is a paradigm change, not just for our industry but for America,” says Black Diamond CEO Peter Metcalf, who once shared a rope with Jewell on Liberty Bell, a classic climb in the North Cascades. “Secretary of the interior is traditionally a job given with a nod to industries like oil and gas or ranching. Today, much of the GNP on public lands comes from non-extractive industries like recreation, tourism, and ecological services.” Now, Metcalf says, “politics have finally caught up with reality.”

“You’ve got somebody who fundamentally gets the fact that there’s a huge economic stream” flowing from protected wildlands, says Adam Cramer, who heads the outdoor alliance, an industry group that lobbies for recreation and conservation. “Oil, gas, timber, and grazing aren’t the only ways to make money from the federal estate.”

President Obama agrees. "She knows the link between conservation and good jobs," he said in announcing Jewell's nomination. "She knows that there's no contradiction between being good stewards of the land and our economic progress—that, in fact, those two things need to go hand in hand."

In a nod to her passion for the outdoors, Obama said, "For Sally, the toughest part of this job will probably be sitting behind a desk."

Hardly. The toughest part may be keeping Interior relevant at a time when the biggest environmental battles are being fought on the turf of rival agencies. Jewell has plenty on her plate, to be sure. In the next three years, her department will set new rules for fracking on federal land, oversee the first offshore Atlantic wind installations, decide whether to list hundreds of proposed endangered species, double the number of renewable-energy projects on public land, regulate offshore Alaskan oil exploration, and defend the Arctic National Wildlife Refuge (ANWR) against the ever present threat of oil and gas exploration. But the signature green campaigns of Obama's second term are being waged by the Environmental Protection agency, where carbon regulation will be shaped, and, of all places, the state Department, which will help decide the fate of the Keystone XL pipeline.

Oh, and there's one other thing on her to-do list. Interior secretaries traditionally bear the burden of establishing a president's environmental legacy. Stewart Udall, the secretary under both Kennedy and Johnson, created the Canyon lands and North Cascades National Parks and the Appalachian National scenic trail, and he oversaw passage of the Wilderness Act. Walter Hickel, Richard Nixon's Interior head, saved the Everglades when developers wanted to turn it into the world's largest airport. Under Bill Clinton, Bruce Babbitt gave the department a transfusion of environmental values and created the National Landscape Conservation System, which helps safeguard 27 million acres of BLM land. Even Dirk Kempthorne, George W. Bush's second-term secretary, managed to create the world's largest marine protected area, the Northwestern Hawaiian Islands Marine National Monument.

So far, Obama's legacy is muddled at best. If he left office tomorrow, he'd be known for his ramp-up of renewable energy, for being not as bad as W., and for not much else. When I first spoke with Jewell, she was still emerging from senate confirmation mode: smile and speak only in vague platitudes. "I'm finding my way with a lot of help from the people here at Interior," she told me. "My primary focus has been on listening. Listening to what's been done before me, listening to the

mistakes that others have made. Listening to the president and his agenda, and considering the role that Interior can play.” It wasn’t a bad early strategy: ears open, mouth shut. But before long, Jewell would have to stop listening and start acting. Because she faces one of the biggest challenges in Washington: creating an environmental legacy for a president who seems indifferent about having one.

When Obama took office in early 2009, environmentalists’ hopes were over the moon. The ruinous record of his predecessor was best summed up by Robert F. Kennedy Jr., who predicted that “George W. Bush will go down as the worst environmental president in U.S. history.” Much of the damage had taken place in and through the Department of the Interior, which, under Gale Norton, had become a den of corruption.

Bush’s appointees made oil and gas leasing their top priority, demoting conservation-minded managers, harassing scientists, cutting secret deals, partying with drilling executives, and encouraging greasy lobbyists like “Casino Jack” Abramoff, who scammed Indian tribes on casino deals, to roam the halls of Interior headquarters at 18th and C. In 2006, Inspector general Earl Devaney, charged with making sure Interior officials followed the law, summed up the situation under Norton: “simply stated, short of a crime, anything goes at the highest levels of the Department of the Interior.”

In 2007, Steven Griles, Norton’s right-hand man, was sentenced to federal prison for obstructing the investigation into the Abramoff scandal. Abramoff himself pleaded guilty to conspiracy, mail fraud, and tax evasion. Norton was later investigated but never charged over unrelated conflict-of-interest questions raised about leases won by the oil giant Royal Dutch Shell, for whom she went to work upon leaving Interior.

To rehab the department, Obama chose Ken Salazar, a Colorado rancher and an old friend from the Senate. The day Salazar was sworn in, White House chief of staff Rahm Emanuel walked up to Tom Strickland, Salazar’s deputy secretary, poked him in the chest, and said, “Clean up that mess.”

Salazar took out the trash. He immediately withdrew 77 oil and gas leases in Utah’s red-rock country—more than 100,000 acres—auctioned off in the final days of the Bush administration (and made famous by eco-activist Tim DeChristopher, who was imprisoned for false bidding) and revised leasing rules to prevent another Utah debacle. He issued a 20-year ban on new uranium mining around the Grand Canyon. He also moved quickly to appoint conservation-minded directors of the

U.S. Fish and Wildlife Service, the Bureau of Land Management, and the National Park Service. Fish and Wildlife began moving dozens of stalled endangered-species listings through the evaluation process.

Job one for Salazar, though, was renewable energy. Solar and wind projects had been back-burnered by Bush's BLM officials; for eight years, not a single solar project had been approved. Declaring Interior "the real department of energy," Salazar replaced Bush's "drill, baby, drill" policy with a shine-and-spin initiative. He fast-tracked 35 solar, wind, and geothermal projects—capable of generating 10,500 megawatts, enough to power 1.6 million U.S. homes—and approved offshore wind turbines along the Atlantic coast. When conservationists raised alarms about flyways turning into bird blenders and solar projects destroying desert tortoise habitat, Salazar responded with a siting process, called smart from the start, that identified appropriate zones for future renewables development.

That didn't slow down oil and gas production. In Obama's first three years, his all-of-the-above energy strategy produced more oil than Bush did in his final three years. The BLM approved about 4,000 drilling permits per year—down from the record number issued under Bush, but twice the permitting rate of the 1990s. Oil and gas data are notoriously susceptible to political skewing, but to get a real sense, look to the number of leases challenged by grassroots groups like the Southern Utah Wilderness Alliance. SUWA went bonkers during the Bush years, protesting hundreds of leases in fragile habitat. In 2009, 47 percent of all leases sold were challenged in federal court by environmental groups. By 2012, that number had fallen to 18 percent.

Like Obama, Salazar was just moderate enough to infuriate conservative critics and disappoint environmental allies. When Fish and Wildlife listed the polar bear as endangered in 2008, Kempthorne infamously slipped in a rule prohibiting the government from using the Endangered Species Act to regulate greenhouse-gas emissions, the very cause of the bear's decline. Salazar froze Kempthorne's order—but ultimately allowed the controversial clause to stand. After breaking up the inept Minerals Management Service in the wake of BP's Deepwater horizon spill, he let Shell conduct oil exploration in Alaska's rough and risky Chukchi and Beaufort seas.

Overall, environmental advocates seemed to give Obama passing grades: a B minus or a solid C. "I had high hopes for this administration," says Jamierappaport Clark, executive director of Defenders of Wildlife and the head of Fish and Wildlife under

Bruce Babbitt during President Clinton's second term. "From an imperiled-wildlife and conservation stand-point, the first term has been disappointing. It's hard to look back and see anything bold, aggressive, or earth-shattering."

"Interior needs a visionary, not a mechanic," SUWA legislative director Richard Peterson-Cremer wrote when Salazar stepped down. "The Obama administration has a real opportunity to change its course on public lands. The question is not whether it has time enough and space—it does—but whether it has will enough and steel."

"I'VE BEEN TOLD that coming up to speed in this job is like drinking from a fire hose," Jewell told a gathering of Interior Department employees in Portland, Oregon, in June. "Actually, I've found that it's more like a water main."

The line drew chuckles from the friendly, if skeptical, DOI bureaucrats. They'd seen secretaries come and go. Many of the department's 70,000 employees were hired during the Babbitt years, and a few are old enough to remember the 22-month term of James Watt, the Reagan appointee who still holds the crown as the most environmentally destructive interior secretary in history. Billed as a meet-the-boss session, Jewell's day in Portland was a chance for her to shake hands and make friends in the field offices. Unlike Salazar, who arrived with dozens of allies in the senate and installed his own "Colorado mafia" of well-seasoned appointees, Jewell had to build a network from scratch, working rooms like the Portland federal-building auditorium. There, 150 staffers spread themselves in agency-specific clusters: Bureau of Indian Affairs officials over here, Fish and Wildlife biologists over there, BLM folks in the back. "Anybody from the Park service?" Jewell asked. "No? Well, I guess it is the Friday of Memorial Day weekend. They're kind of busy." a natural informality attends to her. Give Jewell a lectern and she'll avoid it. Offer the choice between a hike and a backroom one-on-one, she'll lace up her boots. She connects with personal stories, not policy. And so, in Portland, she spoke about her life.

Born in England, she moved to Seattle at age three when her father, Peter Roffey, took a fellowship in anesthesiology at the University of Washington Medical School. Eager to fit in, Roffey became REI member #17249 and bought his first tent from alpinist Jim Whittaker. Young Sally Roffey spent weekends hiking in the Cascades and sailing the family's eight-foot dinghy on Puget Sound. "We used to camp everywhere we went," she recalled.

At the University of Washington, she studied mechanical engineering and met her

future husband, Warren Jewell, a fellow engineering student. After graduation, the pair took jobs with Mobil Oil in the roughneck fields of southern Oklahoma. She enjoyed the work, but it was the oil business in the seventies, and the glass ceiling hung low. "I wanted to work on offshore oil rigs, but Mobil wouldn't allow any women on their rigs, except in Norway," she told Interior employees in Portland. "I figured that was a long way to go for work."

Then she heard that banks were hiring engineers to help evaluate oil and gas investments. She and Warren wanted to move back to the Pacific Northwest, so she talked her way into a job with Seattle-based Rainier bank. The oil boom was showing signs of shakiness, but two rival Seattle institutions, Rainier and Seattle First National bank (Seafirst), continued to lay heavy bets. Jewell steered Rainier away from a number of bad investments, and when oil went bust in the mid-1980s, Seafirst collapsed. Jewell became known as the woman who saved Rainier Bank.

There are certain kinds of people who hire on as interns and, within a few years, end up running the place. Jewell's rise was like that. By the late 1980s, she was overseeing Rainier's entire loan portfolio, and when she left in 1992 to join West one bank, a smaller regional operation, she was CEO of its Washington subsidiary within a year. Meanwhile, she was raising two children, Peter and Anne, both now grown and living in Seattle. Her style wasn't aggressive or brash; rather, say colleagues, she comes across as sensible and polite. "Sally is able to judge situations in a very sophisticated way," says Seattle attorney William Gates Sr., who is the father of the Microsoft founder and served with Jewell on the UW board of regents. "She's a person who very often has the right answer for the question under discussion."

REI recruited Jewell to its board in 1996, attracted by her combination of backcountry experience and banking savvy. By 2005, she was CEO. REI was a foundering ship at the time, burdened by too much debt and knocked on its heels by an ill-advised foray into Japan. Jewell closed the overseas outlet, paid down the debt (the co-op now has none), and embarked on a slow national expansion, opening a handful of well-chosen, self-financed stores every year, including a 39,000-square-foot Manhattan base camp in 2011. Last year the company's website and 127 stores reported revenue of \$1.9 billion, making it the biggest consumer cooperative in the nation.

Meanwhile, Jewell pushed a triple-bottom-line ethos that emphasized environmental ethics and employee relations as much as profit and loss. That's

Jewell's strong suit: getting the best out of people, but in a low-key way. "She was always asking questions, soliciting points of view," says Camelbak chief executive Sally McCoy, who worked with Jewell on the industry-supported wildlands group Conservation alliance.

One of Jewell's favorite books is *Orbiting the Giant Hairball*, Gordon MacKenzie's guide to fostering creativity within a corporate bureaucracy. It's an idea she's pushing at Interior. "Did you know the engineers at Hoover Dam are buying spare parts on eBay because nobody makes them anymore?" she asked her staffers. "If there's something you're doing as part of your job that makes no sense, tell me about it. Raise a holler. One of the things I told everyone at REI was: We've got to stop doing things that don't make sense and concentrate on the things that do." Let me help you do your job better: that's the message going out to the field from Madame secretary. "I'm a businessperson," Jewell told her troops. "I've got 30 years in business and two months in the federal government." A lot of people do outstanding work at Interior, she said. "I want you to know I've got your back." she let that hang for a moment, leaving unsaid the second half of the sentence: *and I'm hoping you'll have mine.*

To do what exactly wasn't yet clear.

ON MOST WEEKDAY mornings, Sally Jewell walks to work under the haunting eyes of her predecessors. Along the hall outside her office hang large oil paintings of Salazar, Norton, Watt, and the rest, and in the lobby there's a bust of Udall, widely acknowledged as the greatest interior secretary of the modern era.

In case Jewell doesn't feel the weight, every once in a while a former secretary will pop up with some unsolicited advice.

Hello, Bruce Babbitt! In a bit of exquisite timing, Babbitt, the most influential secretary since Udall, issued a challenge to Obama 24 hours before the president nominated Jewell. "So far, under President Obama, industry has been winning the race," he said during a speech at the National Press Club. "Over the past four years, the [oil and gas] industry has leased more than 6 million acres, compared with only 2.6 million acres permanently protected. In the Obama era, land conservation is again falling behind."

Babbitt called for a one-for-one scheme that would protect an acre of public land for every acre put up for lease.

It's an idea worth considering, but it also relies on a bygone metric.

Environmentalism has expanded beyond its traditional protect-the-land-and-water paradigm. These days, the movement has become as much about energy and carbon, and that expanded focus has sent policy beyond the neat boundaries of Interior. The state Department is doing the environmental analysis for the proposed Keystone XL pipeline (because the pipe, which would deliver Canadian tar-sands oil to gulf Coast refineries, crosses an international border), which effectively gives Obama the sole up-or-down vote. Interior has criticized state's characterization of the pipeline's wildlife impact as "inaccurate," and in June the president said he'll OK Keystone only "if this project does not significantly exacerbate the problem of carbon pollution."

"Significantly"—that's a word that allows a lot of room to operate.

Obama said this while announcing his climate-change initiative, a series of moves that bypass Congress and deal with global warming through executive orders. Interior plays a part—the president called for a redoubling of renewable-energy development on federal land—but most of the action will continue to happen at the EPA, which ran point on carbon under first-term administrator Lisa Jackson. The centerpiece of Obama's climate initiative is an EPA-led clampdown on carbon pollution from power plants, which accounts for more than a third of U.S. greenhouse-gas emissions. It remains to be seen whether Obama has the will to follow through; the president backed Jackson on a number of clean-air initiatives, but in 2011 he caved on tougher smog standards after big polluters screamed job loss—as they're already doing on the power-plant rule.

As if to underscore the centrality of the EPA—not Interior—to the president's environmental agenda, senate republicans let Jewell's nomination proceed while blocking Obama's second-term EPA nominee, Gina McCarthy, for 136 days before confirming her in early July. a tough-talking Bostonian who ran Jackson's clean-air team, McCarthy wasted little time in declaring that "we will act" to cut carbon pollution. She followed up on that pledge in September, when the EPA proposed new rules capping carbon emissions from new coal and natural-gas power plants. Similar caps for existing plants—where the real battle will come—are expected in 2014.

Jewell and McCarthy may end up playing good cop, bad cop for Obama on climate change—Jewell the gentle reconciler in a fleece jacket, McCarthy the brassy brawler straight out of *the Departed*. It's a good match, because the EPA will surely draw

more fire than Interior. Reducing emissions hits polluters in the wallet; expanding renewables offers the promise of profit. And Jewell's confirmation led no one to believe that she'd pull back on oil and gas development. "We will continue to pursue the president's all-of-the-above energy strategy," she said at her senate hearing, and she hammered the point for months thereafter.

Inevitably, Jewell's charm offensive has to give way to tough policy decisions if she wants to be something more than a caretaker. She's not going to be the second coming of Udall—nobody will. What saint stew wanted, he got, thanks to a compliant Congress, an open checkbook, and a president preoccupied with Vietnam. Since Jewell took office, she's confronted an insanely hostile Congress, a government shutdown that closed the parks, and a boss whose environmental commitment seems to come and go.

Is there still room for greatness at Interior? Bruce Babbitt thinks so. "Sally Jewell has the background, she has the national constituency, and she has the president's confidence," he told me over the phone from his office in Washington. Babbitt, now semi-retired, ticked off those qualities as if they were tools in a Jobox—here's your hammer, there's your tape and nails, get to work. "She has a fantastic opportunity to address a number of important issues."

SO WHAT WOULD a Jewell legacy look like? "I don't think about my own legacy," she told me back in June. "I do think about a legacy for President Obama." Exactly what that might be remained an open question. The answers began to come 111 days into her term, when the secretary pivoted from listening to leading. At a speech given at DOI headquarters and webcast to field offices nationwide, she laid out the top priorities. The more traditional goals included ramping up renewable-energy production, repairing the Native American education system, and addressing looming water catastrophes like the massively overburdened Colorado River. Jewell told staffers her agenda wasn't "radically different than what you've been doing. Maybe a little tweaking, a little change."

On climate, she showed that she can be bold. "I hope there are no climate-change deniers in the Department of the Interior," she said to her team. "If you don't believe in it, come out into the resources. Come out to Alaska, which is melting. Go in to the sierra," which is losing its snowpack. It was a strong, clear message that raised howls among fringe denialists but provided cover to the scientists and biologists in Interior's ranks.

We could use more of that straight-up fact facing, the courage to point at a cow pie

and call it bullshit. Specifically, Jewell has a rare opportunity when it comes to oil and gas regulations. Interior's proposed rules for fracking on federal land are a joke, modeled on a template put out several years ago by the American Legislative Exchange Council, the conservative bill mill backed in part by billionaire brothers Charles and David Koch. Jewell commands both the respect of the drilling guys—she knows how to frack a well herself—and the support of environmentalists; she's in a unique position to give the regulations real teeth.

Ditto the rules for siting oil and gas leases on fragile lands. An early test will come in Utah, where the BLM has proposed 82 leases for the San Rafael swell, a recreationally important and biologically rich region often mentioned for monument designation. The leases, scheduled for auction in November, pin Jewell between her oil experience and her conservationist leanings. When I asked her about the skepticism with which outdoor enthusiasts usually greet drilling, she struck a decidedly non-Babbittian tone. "I think it's important for people to step back and look at their own lifestyle and acknowledge that it's difficult if not impossible to not be a user of fossil fuels," Jewell told me. "Most outdoor recreationists drive to a destination. Some walk softer than others, but we all have an impact. It's important to understand that and not vilify the industries that we rely upon."

Other issues are also going to intersect oil and gas. She's unlikely to halt the full delisting of the gray wolf, but her leadership could either cause or avert a legal train wreck over the possible listing of the greater sage grouse, a bird whose habitat of existing and potential oil fields could make it the spotted owl of the Intermountain West.

Much of the action during Jewell's term will happen in Alaska: the ANWR stalemate will likely continue, and Obama shows no signs of slowing Shell's push into the Chukchi Sea. But Jewell has real power when it comes to Bristol Bay, breeding ground for the world's most productive salmon runs. It's an airport-or-Everglades issue. One of two global conglomerates planning a gold mine there pulled out of the project this fall. Jewell and Obama could build on that momentum by creating a wildlife refuge or national monument on federal land. It wouldn't stop the mine (which is on state land), but it would throw up roadblocks. "If you're going to allow offshore leasing in Alaska, there ought to be offsetting designations of protected areas," Babbitt says. "Using the Antiquities Act to protect Bristol Bay is a great opportunity."

Those are the traditional big gets for Jewell's term. But the question remains: What does *she* want her legacy to be?

THE KEY to Sally Jewell is that there's no grand ideology at work. She's neither neocon nor neolib. She doesn't align herself with the Aldo Leopold school of conservation or the Bill McKibben carbon-fighting corps. Policy is driven by the personal and the pragmatic. She's got to get on the ground and see what's going on, paddle Rhode Island's Blackstone River, as she did in May; handle an invasive boa in the Everglades (April); or circle Washington's Squaxin Island, as she does every New Year's Day in her kayak. She's worked on the Alaska pipeline; she knows the benefits oil companies can bring, and she knows the environmental harm they can wreak. Most of all, she knows what outdoor exposure did for her as a girl, so she wants to spread the gospel of adventure among the next generation.

That commitment was on display on an early June morning in D.C., when the secretary of the interior went fishing with some kids on the Anacostia River.

"How many of you have ever been fishing?" Jewell asked. A few hands went up. "How many have ever been out on the river?" Fewer hands. Their parents and grandparents didn't use the river because, back in the day, the Anacostia was a veritable sewer. Now that it's clean—er, cleaner—the kids don't use it because it's not connected to a screen.

Once the kids were herded onto a tour boat, Jewell encouraged the youngsters to bait hooks, cast carefully, reel in, and see what they'd caught. She did her best work one-on-one, talking with young girls about the outdoors, and life, and siblings, and school, and whatever. Away from the microphones, the old silver-haired white lady actually forged a connection with a couple of young African-American girls. They spoke in low voices, with long, natural silences. As they baited a hook, one girl asked, "Doesn't that hurt the worm?"

Jewell paused before answering. "Yes," she said. "Yes, I suppose it does."

It wasn't a politician's answer. The words seemed to startle Jewell even as they came out of her mouth. But they also earned the respect of the girl, who considered the information, then continued spearing the nightcrawler.

If there is anywhere that Jewell wants to have a lasting impact, it's here, with the next generation. "This is one heck of a platform," she told me in her office, "to help people understand about our planet, about our public lands, about the role they play

in caring for our resources.”

Indeed, when she laid out her goals for the department in July, the last two were these: “celebrating and enhancing America’s great outdoors” and luring the millennial generation into the wilds.

That first part refers to the America’s great outdoors Initiative, a fuzzy, feel-good effort created during Obama’s first term. The idea was to connect an increasingly urban, plugged-in citizenry with its public land and waterways—but nobody on Salazar’s team figured out how to give it purpose and clarity. As Jewell receives it, America’s great outdoors can become whatever she wants it to be.

She can use it to lure more Hispanics and African-Americans into the parks, to expand the constituency of the outdoors. And she can use it to get kids to unplug. *Last Child in the Woods*, journalist Richard Louv’s exploration of kids’ increasing disconnection from the natural world, is a touchstone book for Jewell, and she’s determined to use her bully pulpit to fight the syndrome Louv calls nature-deficit disorder.

This is where Jewell’s true passion lies, and she’s already made it a top priority. There are easy fixes she can make: she can direct park and refuge managers to reconceptualize their most accessible areas to attract underserved communities. She can empower young Park Service rangers and reach the millennials where they live, on social media. But she has an opportunity to go even bigger, to create a signature program under her watch. To do that, she could revamp Interior’s partnership with the Student Conservation Association, which provides high school and college students paid, hands-on internships in parks and wilderness areas. SCA is one of America’s greatest programs, but it’s largely unknown outside of outdoor culture. It could become a public-service option as famous as teach for America or a brand as strong as outward bound. Franklin Roosevelt had the Civilian Conservation Corps; a supersized SCA could be Obama’s next-gen public-works project. With a one-month stint in SCA, you’ll hook a kid on the outdoors for life.

Youth and climate change: those could be the overriding themes of a great Jewell administration—and the foundation of Obama’s environmental legacy.

“We need warriors for that battle on climate change,” Jewell told me when I caught up with her again in July, at a youth summit in Seattle. The secretary seemed clear and confident in her message. “If I don’t get these young people engaged, they’re not going to care about and support the outdoors. I only have three and a half

years. So I gotta get going.”

U.S. DEPARTMENT OF THE INTERIOR NEWS BRIEFING

Mobile version and searchable archives available at interior.bulletinintelligence.com.

DATE: TUESDAY, NOVEMBER 12, 2013 7:00 AM EST

TODAY'S TABLE OF CONTENTS

DOI IN THE NEWS:

- + Secretary Jewell Tours California's North Coast.
- + Secretary Jewell Pushes For Conservation, Youth Connection To Outdoors.
- + Secretary Jewell Sums Up Administration's Energy, Climate Change Policy.
- + President Obama Names Three To Key Interior Department Posts.
- + Interior Floods Grand Canyon.
- + Secretary Jewell Faces Tough Challenges.
- + Advocates Say Congress Fails To Fund Wildfire Prevention Programs.
- + Good Content Helps Interior Engage With Its Twitter Account.
- + Through Executive Orders, Obama Could Craft A Second-Term Legacy On Climate Change.
- + Utech To Succeed Zichal As Obama's Top Energy And Climate Change Adviser.
- + Federal Employee Job Satisfaction At Lowest Point Since 2010.
- + Additional Coverage Of Events Celebrating 150th Anniversary Of Lincoln's Gettysburg Address.
- + Support For Land And Water Conservation Fund Urged.
- + Secretary Jewell Urged To Reconsider Policies On Wild Horses.
- + National Monument Designation For Organ Mountains-Desert Peaks Criticized.

AMERICA'S GREAT OUTDOORS:

National Park Service:

- + Cesar Chavez National Historic Park Faces An Uphill Battle.
- + National Parks Open In Time For Snow Season.
- + NPS Looks For Tenants To Repair Historic Buildings At Sandy Hook Bay.
- + Denali National Park Officials Hope Travelers In Landslide Area Provide Information.
- + App Allows WWII Memorial Visitors To Explore History.
- + Washington Monument Scaffolding To Start To Come Down Tuesday.
- + Yosemite National Park Moves Ahead On Restoration Of Mariposa Grove.
- + Horticulturists Clone Sequoia Planted By John Muir.
- + Closure Of Memorials Generates Controversy.
- + NPS Fighting To Save Flight 93 Trees.
- + NPS Plans For National Parks In Sierra Nevada Expected To Be Divisive.

Bureau of Land Management:

- + Lewistown BLM Office Releases Draft Sage Grouse Plan.
- + BLM To Explode Old Ordnance Along San Pedro Riparian National Conservation Area.

Fish and Wildlife Service:

- + US To Crush Six Tons Of Ivory This Week.
- + Texas Is Center Of Illegal Trade In Black Rhino Horns.
- + Interior Defends GMO Crops On Federal Wildlife Refuges.
- + Texas Comptroller Calls On Congress To Fund Research On Economic Damage Of Protecting Endangered Species.
- + FWS Considers Protections For Butterflies.
- + Roundup Planned For Arsenal Bison Herd.
- + Reward Offered For Killer Of Rare Red Wolves.
- + Two Condor Deaths Are Major Blow To Species.
- + Flood Impact On Preble's Mouse Not Yet Known.
- + Additional Coverage Of Report On Wildlife Refuges Contribute To Economy.
- + Treatment Of War Horses Criticized.

SECURING AMERICA'S ENERGY FUTURE:***Renewable Energy:***

- + Environmentalists Concerned About Threat Of Solar Power Plants To Birds.
- + Remotely Controlled Turbines Help Protect Birds.
- + Study Finds 600,000 Bats Killed By Wind Turbines In 2012.

Onshore Energy Development:

- + Recycling Wastewater Takes Off In Hydraulic Fracturing Industry.

Offshore Energy Development:

- + Drilling Company Fined, Put On Probation Over Falsified Test Results.
- + Additional Coverage Of Shell's Arctic Plans.

TACKLING AMERICA'S WATER CHALLENGES:

- + 100 People Living Rent-Free On BOR Land.
- + Additional Coverage Of Bay Delta Conservation Plan.
- + Support For Navajo Generating Station Proposal Urged.

EMPOWERING NATIVE AMERICAN COMMUNITIES:

- + Interior Releases Valuation Plan For Land Buy-Back Program.
- + Buy Indian Act Implemented 100 Years After Passage.
- + South Dakota Tribal Leaders Seek Federal Foster Care Help.
- + Report Addresses Public Safety On Tribal Land.
- + Wisconsin Gov. Walker Still Undecided On Kenosha Casino.
- + BIA Faces Difficult Decision On Coquille Indian Tribe's Gaming Plan.
- + Supreme Court's Decision In Carcieri Case Analyzed.

TOP NATIONAL NEWS:

- + Obama Notes Impending End Of Afghan War In Veterans Day Speech.
- + Enrollments On Federal, State Exchanges Far Lower Than Expected.
- + WSJournal Analysis: Yellen Will Need To Manage Fed Internal Debate.

EDITORIAL WRAP-UP:

- + Washington Post.
- + Wall Street Journal.

BIG PICTURE:

- + Headlines From Today's Front Pages.

WASHINGTON SCHEDULE:

- + Today's Events In Washington.

LAST LAUGHS:

+ Late Night Political Humor.

DOI in the News:

SECRETARY JEWELL TOURS CALIFORNIA'S NORTH COAST. The San Jose (CA) Mercury News (11/12, 731K) reports that Interior Secretary Sally Jewell on Friday "toured a rugged area of California's North Coast in a fact-finding mission to help decide if the area should be made a national monument." She "joined state leaders and federal land managers to hike the Stometta Public Lands in Mendocino County, and later attended a public hearing where hundreds of residents showed up, mostly to voice support for adding the lands to the protected area." Jewell said, "Today I had a chance to hike this spectacular coastline and to see firsthand how important this area is for the community and for its economy – from tourism to outdoor recreation."

The Santa Rosa (CA) Press Democrat (11/8, 156K) reports that "at a two-hour meeting in a packed City Hall, she was feted by more than 300 schoolchildren and adults, unanimous in their enthusiasm to have the land she had just walked become part of the 1,100-mile marine monument." Jewell "reiterated the president's pledge to act when Congress does not to set aside and preserve unique, deserving lands for future generations, imparting a palpable sense of hope that had many in the audience talking in terms of 'when, not if,' the land was included in the national monument."

The Ukiah (CA) Daily Journal (11/12, 17K) reports that Rep. Jared Huffman said, "I am very pleased that Secretary Jewell accepted my invitation to the Point Arena-Stometta Public Lands and was able to see the tremendous support from the local community for adding these lands to the California Coastal National Monument. This is an unmatched opportunity to preserve a pristine stretch of coastline and boost the local tourism industry, already Mendocino County's largest employer. I hope Secretary Jewell and the Obama administration find this land as beautiful and worthy of preservation as we do."

Also reporting on the story are KCET-TV Los Angeles (11/12, 15K), KFMB-TV San Diego (11/12, 15K), KRNV-TV Reno, NV (11/12, 2K), and WRAL-TV Raleigh, NC (11/12, 117K).

Secretary Jewell Could Recommend President Obama To Bypass Congress On Monuments. The Los Angeles Times (11/12, Cart, 3.07M) reports that Interior Secretary Sally Jewell says "she will recommend that President Obama act alone if necessary to create new national monuments and sidestep a gridlocked Congress that has failed to address dozens of public lands bills." In an interview in San Francisco last week, Jewell said, "The president will not hesitate. I can tell you that there are places that are ripe for setting aside, with a tremendous groundswell of public support." Jewell said "the logjam on Capitol Hill has created a conservation backlog, and she warned that the Obama administration would not 'hold its breath forever' waiting for lawmakers to act."

SECRETARY JEWELL PUSHES FOR CONSERVATION, YOUTH CONNECTION TO OUTDOORS. The Riverside (CA) Press Enterprise (11/9, 465K) reports that Interior Secretary Sally Jewell "kicked off a national campaign last week to expand opportunities for youth on public lands." In a recent speech, Jewell "outlined conservation priorities for the Interior department, including an emphasis on fostering the next generation of environmental stewards, scientists and natural resource managers." Jewell said, "Through public-private partnerships and in conjunction with all levels of government, Interior will expand its efforts to pass on our nation's rich conservation legacy and to inspire millions of young people to play, learn, serve and work outdoors."

The San Francisco Appeal (11/12, 823) reports that Jewell visited San Francisco's Crissy Field to announce the launch of a youth conservation initiative. According to Jewell, "the project, which will be organized and funded through a public-private partnership, will provide jobs, training, educational and volunteer opportunities to tens of millions of school-age children and young adults." Jewell called the initiative "ambitious" in that it aims to "engage youth in a major way to our public lands."

Additional coverage of Jewell's initiatives was provided by the Public News Service (11/11, 306).

Secretary Jewell Praised For Leadership. In an op-ed for the [San Jose \(CA\) Mercury News](#) (11/12, Hayes, 731K), David J. Hayes, former Interior Deputy Secretary praises Jewell for issuing “a directive that embraced a ‘landscape-scale’ approach to mitigating the environmental impacts of major highway, water, energy and other infrastructure development projects.” Hayes argues that “this is a big idea that deserves notice, and the support of developers and the environmental community alike.”

In an op-ed for the [Orlando \(FL\) Sentinel](#) (11/8, Lakly, 780K), Shelly Lakly writes that Jewell “made an important first step toward more effective and efficient conservation of the natural resources we all share” during her speech at the National Press Club by announcing “a secretarial order adopting policies and procedures that apply landscape-scale mitigation to the Interior’s responsibilities to manage public resources and lands.” Lakly argues that “this order is important” because “when done right, especially across landscapes, mitigation is the most practical and effective way to balance conservation of resources with economic development.” For this reason, the Nature Conservancy in Florida “strongly supports landscape-scale mitigation and congratulates Jewell for her leadership in this area.”

For “The Blog” of the [Huffington Post](#) (11/12, Baca, 11.54M), Jim Baca, former Natural Resource Trustee, New Mexico, writes that hearing the Jewell “speak out in this way at the Press Club was inspiring – and not just for those of us in the West that see the tension between energy and conservation every day.” Baca hopes Jewell “continues visiting with Americans who want their public lands protected – and heeding their concerns.” He encourages President Obama to join her, as well, “to see our irreplaceable landscapes and meet Americans newly energized by the government shutdown to champion the value of their parks and public lands.”

SECRETARY JEWELL SUMS UP ADMINISTRATION’S ENERGY, CLIMATE CHANGE POLICY. The [San Francisco Chronicle](#) (11/8, Baker, 2.88M) reports that speaking at the Commonwealth Club in San Francisco last Thursday, Interior Secretary Sally Jewell succinctly summed up Obama’s approach to energy and climate when she said “We can’t switch from a fossil-fuel based economy to a renewable energy economy overnight...So yes, we’re going to still continue to develop those resources, but we’re also going to stand up renewable resources” and adding that “it’s important that we do both,” in response to a question asking if the Administration could be a climate leader while simultaneously promoting expansion in the oil and coal industries. Jewell also defended hydraulic fracking, but when asked about Keystone XL pipeline told them that they should “call John Kerry” because the pipeline is an international issue.

The [National Journal](#) (11/12, Subscription Publication, 427K) reports that Jewell “called on the oil and gas industry Thursday to better inform the quality of public debate over fracking and quell safety concerns over use of the technique to extract oil and natural gas from shale-rock formations.” Jewell said, “I think that there’s a lot of misinformation about fracking. I think that it’s part of the industry’s job to make sure that the public understands what it is, how it’s done, and why it’s safe. It’s our job as a regulator and public land manager to make sure that it is done safely and responsibly, that we use the best available science, and we are in fact doing that.”

PRESIDENT OBAMA NAMES THREE TO KEY INTERIOR DEPARTMENT POSTS. [Platts](#) (11/12, 2K) reports that the Obama Administration has named three new appointees at the Interior Department “to oversee onshore and offshore oil and gas development, leaving a key opening at the agency that develops the five-year offshore leasing plan.” Neil Komze was nominated as director of the BLM, Janice Schneider was appointed assistant secretary for land and minerals management, and Tommy Beaudreau was appointed as Interior’s assistant secretary for policy, management and budget.

Kornze To Be Pressed On Sage Grouse. [Roll Call](#) (11/11, Lesniewski, Subscription Publication, 87K) reports that “in a statement Friday, Republican Sen. Dean Heller of Nevada sounded optimistic about President Barack Obama’s choice of Neil Komze to be the BLM director, noting Komze’s ties to the Silver State.” Heller added, however, that “he planned to question Kornze at the Energy and Natural Resources Committee hearing about the sage grouse, a large bird best known for its unique mating ritual.”

Additional Coverage. Also reporting on the story are [Politico](#) (11/11, Guillen, 467K), the [Washington Post](#) (11/12, Kamen, 4.28M), the [National Journal](#) (11/12, Subscription Publication, 427K), the [Washington Examiner](#) (11/12, Press, 319K), the [Salt Lake \(UT\) Tribune](#) (11/12, 343K), the [High Country \(CO\) News](#) (11/12, 74K), the [Reno \(NV\) Gazette-Journal](#) (11/8, 165K), the [Elko \(NV\) Daily Free Press](#) (11/12, 22K), the [Franklin \(IN\) Daily Journal](#) (11/12, 51K), the [Denver Business Journal](#) (11/12, Subscription Publication, 71K), [KRNVTV Reno, NV](#)

(11/12, 2K), [KCVB-TV Las Vegas](#) (11/12, 12K), [KRVN-TV Reno, NV](#) (11/12, 2K), [KRXI-TV Reno, NV](#) (11/12, 656), [KCET-TV Los Angeles](#) (11/12, 15K), the [Rigzone](#) (11/12, 12K), and the [Oil and Gas Journal](#) (11/12, 1K).

INTERIOR FLOODS GRAND CANYON. The [Los Angeles Times](#) (11/11, Boxall, 3.07M) reports that the Interior Department is increasing releases from Glen Canyon Dam this week as part of an ongoing experimental program to replenish downstream sandbars and beaches in the Grand Canyon. According to the article, "September storms that drenched parts of the West washed bountiful amounts of sediment into two tributaries of the Colorado River below the dam, presenting a wealth of beach-building material that the flood-like high flows are intended to distribute."

The [Salt Lake \(UT\) Tribune](#) (11/12, 343K) notes that "Monday marked the first time the releases have been done in back-to-back years since the US Bureau of Reclamation began conducting high-flow releases in 1996." The goal is to "push these sediments downstream and re-deposit them as sandbars that benefit both aquatic life and recreational boaters," according to Anne Castle, assistant secretary of the Interior for water and science. Castle said, "The scientists estimate 1.5 metric tons are in the main stem and that's three times more than last year. We can do a release and spread that sediment up onto the bed and banks and use that to reduce erosion that has occurred to beaches, sandbars and backwaters."

The [Elko \(NV\) Daily Free Press](#) (11/12, 22K) reports that Castle said, "The idea is to see if we can react whenever conditions are right, whenever there's a lot of sediment load in the river. Whether we can reverse or at least stabilize the net loss in sediment that has been occurring in the river below Glen Canyon Dam."

Also reporting on the story are ABC World News, [Yahoo!](#) (11/12, Busbee, 17.91M), the [Deseret \(UT\) News](#) (11/12, 274K), the [Durango \(CO\) Herald](#) (11/10, 28K), the [Bellingham \(WA\) Herald](#) (11/11, 113K), the [St. George \(UT\) Spectrum](#) (11/10, 48K), [Yahoo! News UK](#) (11/12, 79K), the [Daily Mail \(UK\)](#) (11/12, 2.92M), and [KTVK-TV Phoenix](#) (11/12, 88K).

Sen. Udall Urges Action On Colorado River. In an op-ed for the [Glenwood Springs \(CO\) Post Independent](#) (11/12, Udall, 27K), Sen. Mark Udall writes that "the Colorado River is healthy now, but make no mistake: the Centennial State and the six states downriver are on an unsustainable course." He notes that "at a US Senate hearing I recently led, we examined a US Bureau of Reclamation study that found the demand for water along the Colorado River Basin could exceed the available supply by more than 3.2 million acre-feet — enough water to supply more than 3.2 million families across the basin — by 2060." Udall concludes that "the Colorado River may have shaped the West, but given the growing demands here and downstream, it is now our obligation to the river and to ourselves to make every drop count."

SECRETARY JEWELL FACES TOUGH CHALLENGES. In a profile of Interior Secretary Sally Jewell, [Outside Magazine](#) (11/12, 55K) reports on the challenges facing her in the years ahead. The article notes that "the toughest part may be keeping Interior relevant at a time when the biggest environmental battles are being fought on the turf of rival agencies." Additionally, "Interior secretaries traditionally bear the burden of establishing a president's environmental legacy," but "so far, Obama's legacy is muddled at best." Inevitably, the article concludes, "Jewell's charm offensive has to give way to tough policy decisions if she wants to be something more than a caretaker."

ADVOCATES SAY CONGRESS FAILS TO FUND WILDFIRE PREVENTION PROGRAMS. The [Reno \(NV\) Gazette-Journal](#) (11/12, 165K) reports that "Year after year, Congress promises to beef up wildfire-prevention programs but doesn't follow through with enough money, frustrated lawmakers and advocates say." According to the article, "many Democratic and Republican lawmakers, especially from the West, agree that Congress should spend more on preventive steps like thinning forests, clearing excess brush and performing controlled burns before the wildfire season heats up." However, "come budget time, fire-prevention programs run by the US Forest Service and the Interior Department invariably get underfunded, advocates say, though wildfires are getting bigger, more destructive and costlier to control."

GOOD CONTENT HELPS INTERIOR ENGAGE WITH ITS TWITTER ACCOUNT. In the NextGov (11/11, 2K) "CIO Briefing" blog, Jed Sundwall examined the number of tweets sent by various government agencies, finding that the Department of Interior is getting as much engagement as NASA, even though NASA has five million followers compared to Interior's 110,000. Sundwall thinks those that sign up for Interior's tweets want to hear from

the Interior, while many of NASA's followers include those who sign up for NASA based on recommendations and may not even use their accounts. Sundwall concludes that based on Interior's tweets, "good content" is more important for engaging the public than just trying to increase subscription numbers.

THROUGH EXECUTIVE ORDERS, OBAMA COULD CRAFT A SECOND-TERM LEGACY ON CLIMATE CHANGE. The Hill (11/8, Geman, 194K) reports in its "E2 Wire" blog that as the rest of President's agenda "runs aground in Congress," he "has a chance to craft a second-term legacy on climate change," as executive action on the issue "is moving full-speed ahead at the Environmental Protection Agency (EPA)." The Hill adds that the "most far-reaching piece of Obama's climate plan is carbon emission standards for the nation's fleet of existing power plants." In addition, the EPA is "writing standards for new plants." However, Princeton University professor Julian Zelizer said "the push on climate change through executive action could shape Obama's legacy — but only to a point." One problem is that "some of the new EPA regulations might not be settled by the time he leaves office." In addition, the next president could choose to alter them.

UTECH TO SUCCEED ZICHAL AS OBAMA'S TOP ENERGY AND CLIMATE CHANGE ADVISER. Reuters (11/9, Gardner, Rampton, Rucker) reports Dan Utech will become President Obama's top adviser on energy and climate change now that Heather Zichal is stepping down. The Washington Post (11/9, Hicks, 4.28M) says Utech "most recently served as Zichal's deputy after working as a senior adviser to former Energy Secretary Steven Chu and to Hillary Clinton when she was a senator." The Post says the President "supposedly urged Zichal to stay with his administration." The Los Angeles Times (11/9, Banerjee, 3.07M) and The Hill (11/9, Barron-Lopez, 194K) also have reports.

FEDERAL EMPLOYEE JOB SATISFACTION AT LOWEST POINT SINCE 2010. The Washington Post (11/9, Rein, 4.28M) reports the government's Employee Viewpoint Survey finds job satisfaction declining among Federal employees in the wake of "salary freezes, continuing budget cuts and furloughs." While "the vast majority of employees think that the work they do is valuable and look for ways to do their jobs better," job satisfaction is now at its lowest point since 2010.

ADDITIONAL COVERAGE OF EVENTS CELEBRATING 150TH ANNIVERSARY OF LINCOLN'S GETTYSBURG ADDRESS. Additional coverage that Interior Sally Jewell will serve as a keynote speaker at Gettysburg's Dedication Day ceremony Nov. 19 was provided by the Allentown (PA) Morning Call (11/9, 247K) and the Frederick (MD) News-Post (11/12, 97K).

SUPPORT FOR LAND AND WATER CONSERVATION FUND URGED. In an op-ed for the Seattle Times (11/12, Dicks, Evans, 1M), Norm Dicks, former US representative for Washington's 6th Congressional District, and Dan Evans, former governor and US senator for Washington, write that "the outcry over the impact of...closures" during the government shutdown "on our way of life, our communities, our economy and our natural resources served as a clear reminder of the importance of our public lands to all Americans." In addition, they note that "although the shutdown is over," threats to the Land and Water Conservation Fund remain. They "hope our former colleagues still in Congress do the right thing and lead the nation to reauthorizing and fully funding the Land and Water Conservation Fund to ensure that our natural legacy is passed down to the next generation."

In his column for the Denver Post (11/12, Willoughby, 949K), Scott Willoughby criticized Congress' failure to fund the Land and Water Conservation Fund, which in nearly 50 years of existence has only been fully funded once.

SECRETARY JEWELL URGED TO RECONSIDER POLICIES ON WILD HORSES. In an op-ed for the Denver Post (11/11, Matthews, 949K), Ashley Matthews, a graduate student urges the BLM to reconsider its wild horses policies. She claims that lobbies like the National Cattlemen's Beef Association have the support of the BLM advisory board. Matthews urges Interior Secretary Sally Jewell to run the BLM on behalf of American people and American laws instead of placating the interests of powerful lobbies.

NATIONAL MONUMENT DESIGNATION FOR ORGAN MOUNTAINS-DESERT PEAKS CRITICIZED. In an op-ed for the Las Cruces (NM) Sun-News (11/12, Simmons, 59K), Randy T. Simmons, director of the Institute for Political Economy and professor of political economy at Utah State University, and Ryan M. Yonk, assistant professor of political science at Southern Utah University and director of the Institute of Policy Analysis, write that monument designation for the Organ Mountains-Desert Peaks region of southern New Mexico can "bring distinct negative impacts." According to the two, "using a careful methodology and making comparisons between

counties through time, we find at best no effect on local economies and, more likely, negative effects of monument designations.”

America's Great Outdoors:

National Park Service:

CESAR CHAVEZ NATIONAL HISTORIC PARK FACES AN UPHILL BATTLE. The [Huffington Post](#) (11/8, 11.54M) reports that “getting congressional approval to make the Cesar Chavez national park a reality could be an uphill struggle.” The article notes that “unlike the Cesar Chavez national monument created last year through President Obama’s own executive power, establishing a national historical park requires congressional approval.” In addition, “California farmers’ long opposition toward the United Farm Workers could also pose hurdles.”

Meanwhile, [FOX News Latino](#) (11/7, 142K) reports that Midy Aponte, the executive director of the American Latino Heritage Fund of the National Park Foundation (ALHF), and others have “made it their mission to encourage Latinos – a group that spends much of their vacation time visiting their home countries and whose idea, for many, of embracing nature means spending a day at the beach – to learn to love the national park system in the US” According to the article, “recent national campaigns – including one that partners food service giant Aramark and outdoor retailer REI called American Latino Expeditions – have the aim of sharing the park experience with the Latino community.”

NATIONAL PARKS OPEN IN TIME FOR SNOW SEASON. The [New York Times](#) (11/8, Brennan, Subscription Publication, 9.61M) reports that “although the federal government shutdown, from Oct. 1 to 16, forced the National Park Service to close 401 parks and lose \$450,000 a day in revenue, it did little to slow preparations for winter activities like cross-country skiing and snowshoeing.” According to the article, “that the shutdown occurred during the shoulder season eased the pain for national parks like Yellowstone, which was already winding down its services from the peak summer season when its employees were furloughed.” The article notes that “Yellowstone, which lost \$191,000 in entrance fees and licenses during the closure, reopened in time to start grooming roads for activities like guided snowmobile and snow coach tours, which begin in December.”

NPS LOOKS FOR TENANTS TO REPAIR HISTORIC BUILDINGS AT SANDY HOOK BAY. The [New York Times](#) (11/8, Foderaro, Subscription Publication, 9.61M) reports that the NPS “put out an unusual for-rent sign last month: 35 historic buildings, including the genteel quarters of lieutenants and captains, at a wind-swept former Army base overlooking Sandy Hook Bay.” According to the article, “in the past, proposals for what to do with the buildings varied with the tides, but the park service is now actively looking for tenants to invest in them and save them.” Under the park service’s plan, “instead of paying a set rent, tenants would pay for repairs to the buildings and be given long-term use of them in exchange.”

DENALI NATIONAL PARK OFFICIALS HOPE TRAVELERS IN LANDSLIDE AREA PROVIDE INFORMATION. The [Washington Post](#) (11/8, 4.28M) reports that Denali National Park officials “want to hear from people who may have traveled in the area of a huge landslide that fell on a section of a road frequented by summer tourists.”

APP ALLOWS WWII MEMORIAL VISITORS TO EXPLORE HISTORY. [Roll Call](#) (11/12, Subscription Publication, 87K) reports that the “WWII Memorial” app enables visitors to the National Mall’s World War II Memorial to “explore the history behind the memorial.” According to the article, launched by the Trust for the National Mall, a nonprofit partner of the NPS, “it is the organization’s first try at monument-specific smartphone and tablet technology.” The article notes that “plans are under way to develop mobile apps to complement other monuments on the Mall.”

WASHINGTON MONUMENT SCAFFOLDING TO START TO COME DOWN TUESDAY. [WJLA-TV](#) Washington (11/12, 118K) reports that “the scaffolding that has encased the Washington Monument for months will start to come down this week.” On Tuesday, “workers will begin to disassemble the scaffolds that have been set up around the obelisk.” According to the article, “deconstructing the scaffolding will take about three months.” NPS officials “expect the Washington Monument to reopen this coming spring.”

YOSEMITE NATIONAL PARK MOVES AHEAD ON RESTORATION OF MARIPOSA GROVE. The [Columbus](#)

(IN) Republic (11/12, 80K) reports that Yosemite National Park officials are "moving forward on a \$24-million plan to remove parking lots, roads and buildings from Mariposa Grove, an ancient collection of humongous sequoias." The NPS could begin "work on removing asphalt and a gift shop from the grove in southern Yosemite as early as next summer." The article notes that "the restoration plan, expected to be finalized in December, is meant to help the old trees survive and thrive for future generations of park visitors."

HORTICULTURISTS CLONE SEQUOIA PLANTED BY JOHN MUIR. The Los Angeles Times (11/11, Sahagun, 3.07M) reports that "horticulturists recently announced that they had successfully cloned a genetic replica of an ailing 130-year-old giant sequoia planted by conservationist John Muir in the 1880s on his ranch in Martinez, Calif." According to the article, "as part of an effort to preserve at the site a living connection to Muir, Keith Park, a National Park Service horticulturist, trimmed two dozen cuttings from healthy young branches and shipped them to Archangel, which has successfully cloned trees planted by George Washington at Mount Vernon in Virginia."

CLOSURE OF MEMORIALS GENERATES CONTROVERSY. In his column for the Washington Times (11/11, 417K), Dennis Jamison criticizes the closure of memorials during the government shutdown. Jamison accuses the Obama Administration of seeking "to make a political statement about the budget crisis and the federal shutdown by spending more money to make sure barricades would be erected to block normally easy-access public monuments."

In an op-ed for the Roanoke (VA) Times (11/12, 259K), Bill Shiner, who coordinated the Park Ranger Program and National Park Service Seasonal Law Enforcement Training at Slippery Rock University in Pennsylvania, writes that the criticisms "were both misguided and reflect an ignorance of Park Service responsibilities regarding the visitors and resources under its care." According to Shiner, "for members of Congress to fault the NPS during this time for closing sites was disingenuous at best, and downright hypocritical at worst."

NPS FIGHTING TO SAVE FLIGHT 93 TREES. The Johnstown (PA) Tribune Democrat (11/12, 95K) editorializes that the NPS announced Thursday that it has "begun an aggressive treatment project in hopes of saving the hemlocks" at the Flight 93 National Memorial. Keith Newlin, the National Park Service's deputy superintendent for the western region that manages the memorial, said, "Right now, the trees are still fairly healthy. But we've got to knock these buggers back."

NPS PLANS FOR NATIONAL PARKS IN SIERRA NEVADA EXPECTED TO BE DIVISIVE. In his column for the Visalia (CA) Times-Delta (11/9, 42K), William Tweed writes that the environmental assessment by the NPS on national parks of the Sierra Nevada will likely be controversial. According to Tweed, "if your view of the national parks is that they are places set aside to protect nature, then this proposal makes good, even compelling sense" However, "if you go into the High Sierra to fish, long a popular activity, then removing fish to protect frogs will be hard to accept."

Bureau of Land Management:

LEWISTOWN BLM OFFICE RELEASES DRAFT SAGE GROUSE PLAN. The Billings (MT) Gazette (11/12, 206K) reports that "a draft plan for managing sage grouse in five central Montana counties to try to ensure the birds aren't listed as a threatened or endangered species has been completed." The BLM's Lewistown Field Office on Friday issued its Draft Resource Management Plan Amendment and Environmental Impact Statement for Petroleum, Fergus, Judith Basin, Chouteau and Meagher counties. Geoff Beyersdorf, the Lewistown Field Office manager, said, "This RMPA/EIS will provide future management direction to maintain or increase greater sage grouse abundance and distribution by conserving, enhancing or restoring sagebrush ecosystems on which the population depends."

BLM TO EXPLODE OLD ORDNANCE ALONG SAN PEDRO RIPARIAN NATIONAL CONSERVATION AREA. The Sierra Vista (AZ) Herald (11/9, 30K) reports that in coordination with the BLM Tucson Field Office, the US Army Corps of Engineers will "soon be removing unexploded ordnance (UXO) outside Fort Huachuca within the San Pedro Riparian National Conservation Area (SPRNCA)." The article notes that "the removal and mitigation will begin next week and is anticipated to proceed through April 2014." BLM Tucson Field Manager Vi Hillman said, "Public safety is our top priority. We are doing everything possible to ensure that the visiting public can enjoy and

remain safe when they visit the San Pedro Riparian National Conservation Area.”

Fish and Wildlife Service:

US TO CRUSH SIX TONS OF IVORY THIS WEEK. Yahoo! (11/12, Gannon, Editor, 17.91M) reports that US officials are preparing “to destroy their massive stockpile of illegal ivory this week, hoping to send a zero-tolerance message to elephant poachers.” On Thursday (Nov. 14), the FWS “will pulverize nearly 6 tons (5.4 tonnes) of illegal ivory items, from whole tusks to tiny trinkets, which have been seized over the past 25 years as a result of smuggling busts and criminal investigations.” The ivory crush will take place at the Rocky Mountain Arsenal National Wildlife Refuge.

Also reporting on the story are the Business Insider (11/12, 1.39M), the South China Morning Post (11/12, 7K), the Stuff (NZL) (11/12, 37K), and the Hindu (IND) (11/12, 65K).

TEXAS IS CENTER OF ILLEGAL TRADE IN BLACK RHINO HORNS. The Dallas Morning News (11/11, Swartsell, 1.13M) reports that “smugglers have been snatching up black rhinoceros horns from Texas auction houses and selling them on the black market.” The News reports that the “illicit trade is global,” and that authorities say “smugglers travel to Texas to buy the horns of the African-native rhinos and sell them to dealers in California and New York,” who then “ship them to Asia, where they command huge sums as an alleged cancer cure or party drug.” The News notes that last week, Michael Slattery pleaded guilty to smuggling rhino horns he bought in Texas. Authorities say Slattery “is part of the Rathkeale Rovers, a group of Irish nomads active in organized crime, including smuggling operations.”

Additional coverage was provided by the New York Times (11/8, Wilson, Subscription Publication, 9.61M).

INTERIOR DEFENDS GMO CROPS ON FEDERAL WILDLIFE REFUGES. Politico (11/12, Hopkinson, 467K) reports that the Interior Department is “rejecting claims made by the Center for Food Safety and others that it erred in allowing the use of certain pesticides and the production of GMO crops federal wildlife refuges –arguing that the plaintiffs lack standing.” In a Nov. 8 response to the lawsuit Center for Food Safety, et al. v. Jewell, et al., the Interior Department “denies the claims made by the groups, and argues ‘Plaintiffs do not have standing to bring this action. Venue is not proper in this Court. Plaintiffs are precluded from re-litigating this action based on issue preclusion and res judicata,’ though the agency provides no further background to its argument.”

TEXAS COMPTROLLER CALLS ON CONGRESS TO FUND RESEARCH ON ECONOMIC DAMAGE OF PROTECTING ENDANGERED SPECIES. The Washington Times (11/12, Mclaughlin, 417K) reports that Texas Comptroller Susan Combs says “it’s time to improve the science that determines which animals get listed under the federal Endangered Species Act, calling on Congress to create a \$50 million fund for independent research that also would factor in the economic damage to communities when a species is designated for protection.” Combs said that Texas has “set aside \$5 million to try to fight spurious listings, and said it’s time for the federal government to give the states some help.”

Overview Of Dunes Sagebrush Lizard Monitoring Program By Texas Comptroller Criticized. In an editorial, the Houston Chronicle (11/8, Copyright 2013:, Chronicle, 2.26M) supports “the deal that the industry proposed a few years ago, as it was persuading the US Fish and Wildlife Service that really, the lizard didn’t need those big-stick, able-to-disrupt-business protections that come with being an endangered species.” However, it notes that a lizard-monitoring program would not be overseen by Texas Parks and Wildlife, but by the Texas comptroller – the state’s bookkeeper and tax collector. The paper argues that Comptroller Susan Combs’ office “knows doodly squat about lizards.”

FWS CONSIDERS PROTECTIONS FOR BUTTERFLIES. The Detroit Free Press (11/12, Matheny, 794K) reports that the FWS is proposing to list the Poweshiek skipperling as “an endangered species and preserve critical habitat areas for it and another threatened butterfly found outside of Michigan, the Dakota skipper.” The agency “will host a public meeting Wednesday in Holly to present information and answer questions about the proposed butterfly protections.”

Also reporting on the story are the Lansing (MI) State Journal (11/11, 158K), the Livingston County (MI) Daily

Press & Argus (11/11, 49K), and the Chicago Tribune (11/11, Matheny, 2.32M).

ROUNDUP PLANNED FOR ARSENAL BISON HERD. The Denver Post (11/12, Finley, 949K) reports that the multiplication of bison threatens to degrade drought-prone prairie at the Rocky Mountain Arsenal National Wildlife Refuge. Federal biologists say they must cut the herd by 25 — and keep it at 60 until fenced habitat is expanded. A roundup is planned for Dec. 17, and the biologists are looking for options short of slaughter, such as trucking the animals to other bison preserves.

REWARD OFFERED FOR KILLER OF RARE RED WOLVES. The Washington Post (11/10, 4.28M) reports wildlife biologists in North Carolina “are offering a bounty of sorts for information leading to the capture of whoever who shot to death two rare red wolves.” The article notes that “the \$21,000 reward was raised by animal rights organizations after the dead wolves were found Oct. 28 and Oct. 30 on the flat plains of Washington County, on the central Carolina coast.” According to the article, “accelerometers pinging in the wolves’ tracking collars informed US Fish and Wildlife Service officials that the animals’ hearts had stopped beating and led them to the dead bodies.”

TWO CONDOR DEATHS ARE MAJOR BLOW TO SPECIES. The Los Angeles Times (11/10, Banks, 3.07M) reports that “the deaths of two California condors found last month in water tanks used by Kern County firefighters have state wildlife officials working on a way to keep the large, endangered birds out of the tanks.” California wildlife officials have “sent the condor carcasses to a forensics lab in Oregon for necropsies to determine how the birds died,” but “with so few in the wild, experts called the loss a blow to a still-fragile recovery program.”

FLOOD IMPACT ON PREBLE’S MOUSE NOT YET KNOWN. The Denver Post (11/12, Writer, 949K) reports it will be months before experts know the impact of September’s rains on the Preble’s meadow jumping mouse.

ADDITIONAL COVERAGE OF REPORT ON WILDLIFE REFUGES CONTRIBUTE TO ECONOMY. Additional coverage of the report by the FWS on the economic impact of wildlife refuges was provided by the Salt Lake (UT) Tribune (11/12, 343K), the Columbia (MO) Daily Tribune (11/12, 68K), the Southern Illinoisan (11/12, 12K), WRAL-TV Raleigh, NC (11/12, 117K), and WXOW-TV LaCrosse, WI (11/8, 2K).

TREATMENT OF WAR HORSES CRITICIZED. For “The Blog” of the Huffington Post (11/12, Roy, 11.54M), Suzanne Roy, Campaign Director, American Wild Horse Preservation Campaign, writes that “the federal government is complicit in a shameful violation of our responsibility toward” America’s War Horses. Roy argues that “the decedents of America’s War Horses should be honored and protected,” but instead, the FWS has “turned its back on these horses, disregarding and literally disposing of them.”

Securing America’s Energy Future:

Renewable Energy:

ENVIRONMENTALISTS CONCERNED ABOUT THREAT OF SOLAR POWER PLANTS TO BIRDS. USA Today (11/10, Kaufmann, 5.82M) reports that “trying to estimate how many birds could be injured or killed because of large-scale solar projects and what might be done to prevent deaths has become a pressing concern for solar developers and environmental agencies as these projects multiply.” In addition to radiation injuries, “scientists are concerned about bird deaths linked to confusion because of the shimmering expanses of solar panels in the desert.”

REMOTELY CONTROLLED TURBINES HELP PROTECT BIRDS. The Billings (MT) Gazette (11/12, 206K) reports that “an operations center in California can shut down wind turbines 1,200 miles away in Montana in fewer than 30 seconds when the flight patterns of golden eagles and other raptors indicate a potential collision in the making.” According to the article, “the quick response is possible because of tracking radar, ‘detect and deter’ cameras and human spotters called ‘bio-monitors’ deployed at Rim Rock Wind Facility in Montana’s Glacier and Toole counties.” Greg Copeland of San Francisco-based NaturEner USA, the owner, says “the combination of technology and trained avian biologists form a tiered alert system that’s proving to be effective, so far, at preventing the turbine blades from striking birds.”

STUDY FINDS 600,000 BATS KILLED BY WIND TURBINES IN 2012. [CBS News](#) (11/12, 3.87M) reports that "more than 600,000 bats fell victim to the turbines in 2012, according to a new study." Published in the journal *BioScience*, the University of Colorado study "analyzes records of dead bats found near the wind generators." Biologist Mark Hayes wrote, "Dead bats are being found underneath wind turbines across North America. This estimate of bat fatalities is probably conservative." The article notes that "the most deaths are occurring in the Appalachian Mountains, especially in Buffalo Mountain, Tenn., and Mountaineer, W. Va."

Onshore Energy Development:

RECYCLING WASTEWATER TAKES OFF IN HYDRAULIC FRACTURING INDUSTRY. The AP (11/11, Pushnick-Masti, 1.26M) reports that drought has caused the hydraulic fracturing industry to embrace recycling systems that allow them to use less freshwater and dispose of less wastewater. Tod Ennenga, vice president of business development for Pure Stream, a company that offers two different recycling technologies, said that interest in recycling technology has doubled in the past year. State regulators are racing to draft regulations for the new recycling systems, and in some cases make it easier for fracturing companies to recycle.

Offshore Energy Development:

DRILLING COMPANY FINED, PUT ON PROBATION OVER FALSIFIED TEST RESULTS. [WWL-TV](#) New Orleans (11/12, 107K) reports that "an Oklahoma contractor that owns oil rigs and drills in the Gulf of Mexico pleaded guilty Friday to covering up problems with one of its critical blowout preventers by falsifying the results of pressure tests on the device in 2009 and 2010." Helmerich & Payne International Drilling Company was "also ordered to institute and comply with an environmental compliance plan that includes increased well control monitoring and enhanced training." BSEE Director Brian Salemo said, "The safety of offshore workers and the environment is dependent on the integrity of the safety and control equipment. Companies need to be on notice that falsification of test results will not be tolerated."

ADDITIONAL COVERAGE OF SHELL'S ARCTIC PLANS. Additional coverage of Shell's Arctic drilling plans was provided by the [Christian Science Monitor](#) (11/8, Oilprice.com, 540K).

Tackling America's Water Challenges:

100 PEOPLE LIVING RENT-FREE ON BOR LAND. The [Las Vegas Review-Journal](#) (11/12, 437K) reports that almost 100 people are living rent-free on Snowbird Mesa, a this 90-acre tract of BOR land. Jason Kirby, a realty specialist who patrols the land and hands out the permits for the BOR said, "It is a unique place and exemplifies a cross-section of our society. The camping season has just begun and it's free. We provide regular patrols, and there is a law enforcement presence when necessary, but that is rare."

ADDITIONAL COVERAGE OF BAY DELTA CONSERVATION PLAN. Additional coverage of the Bay Delta Conservation Plan was provided by the [Sacramento \(CA\) Bee](#) (11/10, 749K), the [Central Valley \(CA\) Business Times](#) (11/12, 206), the [Victorville \(CA\) Daily Press](#) (11/12, 3K), and the [Rocklin & Roseville Today](#) (11/12).

SUPPORT FOR NAVAJO GENERATING STATION PROPOSAL URGED. In an op-ed for the [Arizona Daily Star](#) (11/12, Modeer, Pickard, 335K), David Modeer, general manager of the Central Arizona Project, and Pam Pickard, who has been a member of the CAP Board since 2006, write in support of an alternative NOx-reduction plan that exceeds the EPA's retrofit technology goal for the Navajo station. They note that "the major components of the technical work group's proposal call for the owners to shut down one of the three power units by 2020 or accomplish equivalent reductions in emissions through changes in operations." According to the two, "should the EPA accept the plan, the benefits to CAP and its customers and stakeholders are numerous."

Empowering Native American Communities:

INTERIOR RELEASES VALUATION PLAN FOR LAND BUY-BACK PROGRAM. The [Indian Country Today Media Network](#) (11/9, 21K) reports that on October 29, the Interior Department released its revised Land Buy-

Back Program Valuation Plan. The article notes that "the draft Plan received a review from The Appraisal Foundation," and "upon the review the Plan was revised to incorporate all of TAF's recommendations." Kevin Washburn, Assistant Secretary – Indian Affairs said, "There is no greater authority for establishing standards for appraisals and qualifications for appraisers than The Appraisal Foundation. TAF's independent analysis confirms that the steps we are taking to determine fair market value for offers to landowners are cost-effective and conform to the best practices for valuation. We are grateful for their comprehensive review and have incorporated their recommendations into the Valuation Plan we will use in the months and years ahead as we work through a transparent process to provide fair market value to tribal landowners."

BUY INDIAN ACT IMPLEMENTED 100 YEARS AFTER PASSAGE. The Washington Times (11/11, Swarts, 417K) reports that regulations for the Buy Indian Act, which was passed during the William Howard Taft administration are "just now getting around to being implemented, some 103 years later." The bill requires the BIA to "give preference in funding and contracts to American Indian-owned businesses, a similar practice employed by 'set-aside' policies many government agencies use to support businesses owned by targeted groups such as veterans, minorities or women." In June, Kevin Washburn, assistant secretary for Indian affairs, said, "The publication of this final rule to implement the Buy Indian Act is a major accomplishment for the administration and a win-win for both Indian Affairs and the American Indian and Alaska Native business community. We expect this will help increase economic activity in tribal communities and provide greater employment opportunities where these businesses are located."

SOUTH DAKOTA TRIBAL LEADERS SEEK FEDERAL FOSTER CARE HELP. The Connecticut Post (11/12, 298K) reports that "leaders of South Dakota's nine Sioux tribes will spend time in Washington, D.C., this week seeking federal help in a long-running dispute over state government's handling of foster care for Native American children." The tribal officials claim that "the state removes too many American Indian children from their homes and places them in foster care with non-Indian families." According to Randy Pozos, communications coordinator for the Lakota People's Law Project, "the tribal leaders and others will hold a press conference on Tuesday and a demonstration on Wednesday outside near the offices of the US Department of Interior, which is hosting a conference with tribal leaders from around the nation."

Also reporting on the story is the San Francisco Chronicle (11/12, Brokaw, 2.88M).

REPORT ADDRESSES PUBLIC SAFETY ON TRIBAL LAND. The Sacramento (CA) Bee (11/12, 749K) reports that "a national panel of judicial and law enforcement experts traveled the country taking comment on public safety issues on American Indian reservations, where federal statistics show the violent crime rates can be 20 times the national average." The report, "Strengthening Justice for Native America: A roadmap," will be released Tuesday, a day ahead of the White House Tribal Nations Conference. The article notes that "among the report's 40 recommendations is giving tribes more control over crime and justice on their reservations, including an expansion of authority to prosecute non-Indians."

Also reporting on the story is the Denver Post (11/12, Fonseca, 949K).

WISCONSIN GOV. WALKER STILL UNDECIDED ON KENOSHA CASINO. Yahoo! (11/12, 17.91M) reports that Wisconsin Gov. Scott Walker on Monday said "he was directing his top aide to begin 'extensive discussions' with tribal governments interested in the proposal to open a casino in Kenosha." Walker "gave no timeline for when he will announce his decision on whether to approve the \$800 million casino project proposed by the Menominee tribe and Hard Rock International."

Also reporting on the story are the Bloomberg BusinessWeek (11/11, 4.93M), the Appleton (WI) Post-Crescent (11/11, 139K), the Racine (WI) Journal Times (11/12, 85K), and the Milwaukee Business Journal (11/8, Subscription Publication, 12K).

BIA FACES DIFFICULT DECISION ON COQUILLE INDIAN TRIBE'S GAMING PLAN. The Oregonian (11/12, 751K) editorializes that the Coquille tribe's plan "reaches well beyond gambling." According to the paper, "the consequences of allowing the Coquille tribe to move ahead on its Medford plan poses several dilemmas, not least of them the future of tribal relations statewide, Oregon's deep addiction to lottery dollars and the willingness of all Oregonians to see gaming pop up in unlikely places." The BIA's "decision on whether to place the Medford site in trust will have far-reaching consequence that should be debated openly among tribes and state officials and in

Oregon's communities."

SUPREME COURT'S DECISION IN CARCIERI CASE ANALYZED. For the [Indian Country Today Media Network](#) (11/9, 21K) attorney Peter d'Errico analyzes the 2009 Supreme Court decision in Carcieri v. Salazar that "derailed the effort of the Secretary of the Interior to take land into trust for the Narragansett."

Top National News:

OBAMA NOTES IMPENDING END OF AFGHAN WAR IN VETERANS DAY SPEECH. Coverage of President Obama's Veterans Day speech at Arlington National Cemetery tends to focus on his remarks regarding the wind-down of the war in Afghanistan and his pledge to provide adequate Federal assistance to the nation's veterans

The New York Times (11/12, Shear, Subscription Publication, 9.61M) reports that the President "pledged...that Americans 'will never forget' the sacrifices made by the country's military veterans, and promised that his administration would continue pushing for money to support the men and women home from the wars in Iraq and Afghanistan." The Times notes that the President also "declared that the nation's most recent 'chapter of war is coming to an end."

On the CBS Evening News (11/11, story 10, 1:20, Pelley, 5.58M), President Obama was shown saying, "By this time next year the transition to Afghan-led security will be nearly complete. The longest war in American history will end." The New York Daily News (11/12, Larson, 3.94M) reports that the President "praised" the "9/11 generation for serving 'tour after tour after tour' abroad," and "bringing 'the core of al Qaeda ... on the path to defeat.'" The AP (11/12, Anderson) reports that while "the war is expected to formally conclude at the end of next year," the US "may keep a small footprint in the country."

According to McClatchy (11/12, 95K), the President "pledged to pay attention to the debts owed to veterans." The President is quoted as saying, "Even as we make difficult fiscal choices as a nation, we're going to keep making vital investments in our veterans." McClatchy reports that VA Secretary Shinseki "noted that the [VA's] budget...has increased by more than 50 percent, 2 million veterans have been added to the VA's health care system and there have been reductions in veteran homelessness."

USA Today (11/12, Jackson, 5.82M) reports that the President, "pledging help with jobs, education and health care," said, "When we talk about fulfilling our promises to our veterans, we don't just mean for a few years. We mean now, tomorrow and forever." According to USA Today, the President said the Administration "is working to reduce the oft-criticized backlog of claims at the Veterans Administration." On Monday, the President said, "We've slashed it by a third since March, and we're going to keep at it, so you can get the benefits that you have earned and that you need, when you need them."

However, according to the Washington Times (11/12, Boyer, 417K), the Administration "hasn't made as much progress as [Obama] promised." The Times says the "400,835 veterans' benefits claims remain in the pipeline, down about 211,000 since March," but the VA "has processed about 100,000 fewer claims than promised." The Times adds that Shinseki "has said the [VA] will eliminate the backlog sometime in 2015."

The Hill (11/12, Sink, 194K) notes that the President "said those veterans not covered by the Department of Veterans Affairs could 'secure quality, affordable health insurance' under ObamaCare, and touted the millionth student veteran pursuing an education under the Post-9/11 GI Bill."

According to Bloomberg News (11/12, Lerer, 1.91M), the President also praised employers who "have...worked with Michelle Obama and Jill Biden to help 290,000 veterans and military spouses get trained or hired, and are committed to hiring an additional 400,000."

Diane Sawyer, on ABC World News (11/11, story 3, 0:50, Sawyer, 7.43M), noted that "the nation's oldest veteran, 107-year-old Richard Overton" was among those at Arlington. President Obama, "He was there at Pearl Harbor when the battleships were still smoldering. He was there at Okinawa. He was there at Iwo Jima where he said, 'I only got out of there by the grace of God.'" Sawyer added, "Someone else who served got a salute today, 91-year-old Phyllis Gould, one of the original Rosie the Riveters." According to Sawyer, Gould "worked as a

welder during World War II and today Vice President Biden called her to invite her to the White House because she had said it's a big item on her bucket list."

According to Politico (11/12, Delreal, 467K), Biden's call to Gould "is featured on the latest installment of 'Being Biden,' an audio series put together by the Vice President's office." NBC Nightly News (11/11, story 10, 0:20, Williams, 7.86M) also briefly noted the tributes at Arlington Monday. Reuters (11/12, Wulfhorst) lists some of the many commemorations across the country Monday.

The Los Angeles Times (11/12, Muskal, 3.07M) notes that "according to the US Census Bureau, there are 21.2 million military veterans as of 2012," including "7.4 million Vietnam-era veterans...5.4 million who served during the Gulf wars," approximately "1.6 million served in World War II and 2.3 million served in Korea." 5.3 million "served only in peacetime."

Congress's Iraq And Afghan War Vets Overwhelmingly Oppose US Involvement In Syria. Anna Mulrine, in a piece for the Christian Science Monitor (11/12, Mulrine, 540K), notes that the current Congress includes "a total of 16 members have served in Iraq or Afghanistan," and that only two of them back US military involvement in Syria, while "the other 14...a mixture of Democrats and Republicans, either remain skeptical or oppose action altogether."

"Huge Crowds" Honor Four Surviving Doolittle Raiders. NBC Nightly News (11/11, story 11, 2:40, Williams, 7.86M) reported that "huge crowds turned out at the National Air Force Museum at Dayton, Ohio, this weekend to honor the few Doolittle Raiders still alive today." According to Brian Williams, there are just four surviving Raiders "who pulled off a secret mission to strike back at Japan after Pearl Harbor."

Veterans Day Event Used To Push For DC Statehood. The Washington Post (11/12, Ruane, Binkovitz, Martin, 4.28M) reports that "in the District, officials...marked Veterans Day with...a political statement." According to the Post, Mayor Vincent Gray (D) and Del. Eleanor Holmes Norton (D-DC) attended an event at the African American Civil War Memorial that "quickly became a rally for full federal representation." Louis Anderson, "a major in the Tuskegee Airmen," told those assembled, "Today, I urge everyone to join Congresswoman Norton, Mayor Vincent Gray and our city council members in the fight for full rights for the residents of the District of Columbia."

US Court Of Appeals For Veterans Claims Marking 25th Anniversary. McClatchy (11/12, Doyle, 95K) reports that the US Court of Appeals for Veterans Claims is "celebrating its 25th anniversary, which dates to passage of the Veteran's Judicial Review Act in 1988." According to McClatchy, "the specialized panel has heard more than 60,000 appeals of veterans claims decisions."

ENROLLMENTS ON FEDERAL, STATE EXCHANGES FAR LOWER THAN EXPECTED. In a front-page story, the Wall Street Journal (11/12, A1, Weaver, Radnofsky, Subscription Publication, 5.91M) reports that according to two people familiar with the numbers, early reports indicate that as of last week, fewer than 50,000 people were able to successfully enroll in private health insurance plans via the Federal health insurance exchange website. The total is well short of the 500,000 October enrollments the Administration anticipated in internal memos, and the Journal notes that insurers who are counting on higher enrollments are concerned.

The Washington Post (11/12, A3, Goldstein, Kliff, 4.28M) notes that the Federal enrollment numbers are "a tiny fraction of the total projected enrollment for the 36 states where the federal government is running the online health-care exchange, indicating the slow start to the president's initiative."

Politico (11/12, Cheney, 467K) reports that while health industry consultant Robert Laszewski, "said the Journal report is consistent with the industry data he has seen," the Administration "declined to confirm the Wall Street Journal figures." HHS spokeswoman Joanne Peters said, "We cannot confirm these numbers. ... [A]s we have said, the problems with the website will cause the numbers to be lower than initially anticipated."

Meanwhile, Bloomberg News (11/12, Wayne, 1.91M) reports that according to the consulting company Avalere Health, about "49,100 people have enrolled in Obamacare plans through 12 state-run insurance exchanges." A statement from Avalere says that enrollment as of Nov. 10 "represents 3 percent of the 1.4 million people projected to sign up in those states by the end of 2014." That number does not "include California, the most populous US state, Massachusetts or Oregon," and it does not "account for those enrolled through the federal

website serving 36 states.”

The Washington Times (11/12, Howell, 417K) reports that Avalere CEO Dan Mendelson said that problems with the Federal site and “issues in various state-run markets,” have created a “climate of scrutiny and negativity” that may have suppressed enrollment among the states in Avalere’s analysis.” Mendelson added, “I would expect to see these numbers to grow over time. This happens gradually.”

Study Finds Less Competition On ACA Exchanges. The Daily Caller (11/12, May, 422K) reports that a Heritage Foundation analysis has found that competition among healthcare companies “has decreased on the Obamacare exchanges” despite the President’s call for more such competition. The Heritage Foundation study found that “in most states the number of carriers on that state’s exchange are less than the number that sold on the individual market in the state.” The analysis of all 50 states “found that more than half of America’s 3,135 counties would experience an exchange with two or fewer insurance carriers and 78 percent would have a choice of three or less carriers.” According to the study, only “313 counties out of the 3,135 counties nationwide...have a choice of more than five carriers.”

WSJOURNAL ANALYSIS: YELLEN WILL NEED TO MANAGE FED INTERNAL DEBATE. The Wall Street Journal (11/12, Hilsenrath, Mcgrane, Subscription Publication, 5.91M) reports that one of Janet Yellen’s top challenges at the Fed will be managing the organization’s internal debates and the confused signals this often gives the public. While Yellen is expected to maintain Ben Bernanke’s tendency to favor open debate, some former officials believe she will try to get the Fed to speak in a more unified manner to the public.

Summers Argues Focus Should Be On Economic Growth, Not Deficit Reduction. Politico (11/12, Cirilli, 467K) reports that former Clinton Administration Treasury Secretary Larry Summers, who in September withdrew his name from consideration to be Federal Reserve chairman, “is returning to the public stage with a new message for Washington: Drop the obsession with seeking deficit deals, and focus on the economy.” Summers said in an interview, “Growth should be a priority. ... We are starving our potential.” Politico notes that Summers “isn’t simply arguing more should be done now to boost the economy — he’s also questioning whether the focus on cutting deals to tame government debt over the medium and long term is a worthwhile pursuit.” Summers argues that “growing the economy will bring down or keep the deficit and debt at sustainable levels over time by, for example, boosting tax revenues.”

QE Said To Do Little For Economy As A Whole. In an op-ed for the Wall Street Journal (11/12, Huszar, Subscription Publication, 5.91M), Andrew Huszar, who managed the Fed’s \$1.25 trillion mortgage bond buy-back program, apologizes for his involvement in the Fed’s quantitative easing program. He says that QE programs have not in fact done much to help the economy as a whole, instead acting as a boon to major banking firms.

Editorial Wrap-Up:

NEW YORK TIMES. “Iran Nuclear Talks: Unfinished But Alive.” In an editorial, the New York Times (11/12, Subscription Publication, 9.61M) says the “inconclusive” talks over Iran’s nuclear program were “disappointing,” but is encouraged that there has been progress at all. The Times encourages the Administration to ignore those opposed to a deal and press forward.

“Redefining The Minimum Wage.” In an editorial, the New York Times (11/12, Subscription Publication, 9.61M) says that the people of SeaTac, a small city south of Seattle, have voted on a referendum to raise the minimum wage to \$15 an hour, though the results are not yet clear. The Times says that while the \$15 an hour seems high, over the past 50 years, “American workers have achieved productivity gains that can easily support” such as level. The Times encourages the Federal government to push for a higher wage.

“An Overdue Ban On Trans Fats.” The New York Times (11/12, Subscription Publication, 9.61M) editorializes that the Food and Drug Administration’s move to ban trans fats from foods is a “long-awaited move” that “should save thousands of lives and potentially billions of dollars in medical and economic costs a year.” The FDA’s move would “eliminate a loophole” which enabled food manufacturers whose products contained less than half a gram of trans fats to market these foods as “containing zero grams of trans fats per serving.”

"The Next Step in Stop-And-Frisk." The New York Times (11/12, Subscription Publication, 9.61M) editorializes that a three-judge panel of the Second Circuit Court of Appeals "created a public-policy crisis earlier this month" when it "stayed the remedies ordered by Judge Shira Scheindlin of Federal District Court to correct civil rights violations associated with the New York Police Department's stop-and-frisk policy." The judges, by "wrongly removing Judge Scheindlin from the case," sent "a chilling message to district court judges who challenge the practices of the police and other government entities." The Times urges the full circuit to review the panel's ruling.

WASHINGTON POST. "The U.S. Needs A Better Iran Deal." In an editorial, the Washington Post (11/12, 4.28M) says that the latest "pause" in the talks over Iran's nuclear program is "fortunate." The Post says that the Administration "could profitably spend the time before the next round of talks ensuring that whatever terms it puts forward for limiting Iranian nuclear capacity have broad support in Washington and among U.S. allies." The Post says that any deal will "require distasteful concessions," but it is "preferable to military action."

"Emergency In The Philippines." In an editorial, the Washington Post (11/12, 4.28M) that as international organizations prepare "for what will be a vast, complex and challenging relief effort" in the Philippines, it is "essential they get priorities straight and the resources to do the job." The Post adds that the "scope of destruction is daunting," and notes that "there are worrisome signs that the international community faces an uphill struggle to mobilize for it." The Post argues that while "the efforts planned by some, such as China's pledge of \$100,000, seem grossly inadequate," on the other hand, "the U.N.'s humanitarian affairs office quickly released an initial \$25 million from the world body's emergency fund," suggesting "more realism about the scale of the tragedy."

"Protections Needed For Nonprofits." The Washington Post (11/12, 4.28M) editorializes that non-profit organizations must better protect themselves against fraud and other unauthorized use of funds, and better regulatory scrutiny is warranted. A Washington Post investigation found that "hundreds of millions of dollars were drained from institutions that are underwritten by public donations and government funds," as disclosed in IRS filings. Furthermore, "nonprofits routinely omitted important details from their filings, and about half the groups didn't disclose the total amounts lost." The investigation has prompted regulators in seven states and the District of Columbia, as well as Congress, to look into the matter further.

WALL STREET JOURNAL. "The Biggest Fiscal Losers." In an editorial, the Wall Street Journal (11/12, Subscription Publication, 5.91M) argues that the US is making a bit of short-term progress in bringing down the budget deficit. However, the Journal says that the longer-term budget outlook remains grim, mainly due to rising entitlement spending. The Journal says that the Administration wants to eliminate the sequestration cuts and budget caps, and replace them with tax increases. The Journal calls on Republicans to reject this.

"California's Green Reality Check." The Wall Street Journal (11/12, Subscription Publication, 5.91M) editorializes that California's emissions-reduction policies are implausible and will not help the state meet its emissions reduction target. Lawrence Berkeley National Laboratory reportedly advised the state's Air Resources Board that it will not be able to reduce emissions to 80 percent below 1990 levels by 2050. To do so, the state would have to reduce demand for energy in addition to its plethora of incentives and initiatives. Energy demand is a function of population growth and economic growth, which the state's emissions policies do not and cannot address.

"The Racial Runaround." The Wall Street Journal (11/12, Subscription Publication, 5.91M) editorializes that a Justice Department amicus brief for an appeals court rehearing of Fisher v. University of Texas contradicts Justice Anthony Kennedy's majority opinion in the Supreme Court's decision on the case, which remanded it to the appeals court. The Justice Department's brief instructs the University of Texas that it can define its own criteria for utilizing race in admissions decisions, thus avoiding the "strict scrutiny" standard in a 2003 Supreme Court decision that Justice Kennedy advised the university to use. The editorial contends that the Supreme Court has failed to establish its decisions on constitutional principles, and advocated the end of race-based admissions.

LIBRARY OF CONGRESS – STEM FIELDS — 2 p.m. – 4 p.m. Policy Briefing on Professional Science Masters

Degrees: Higher Educations Response to a National Workforce Need. Speakers: Reps. Richard Hanna (NY) and Rush Holt (NJ); Nancy Zimpher, Chancellor, State University of New York (SUNY) System; Juliette Bell, President, University of Maryland Eastern Shore; Sheldon Schuster, President, Keck Graduate Institute of Applied Life Sciences; Ross Grossman, Vice President for Human Resources, Regeneron Pharmaceuticals. Location: The Library of Congress, Jefferson Building, Members Room, First Street, S.E. Contacts: Laura Trivers triviatta@hotmail.com (301-512-4442). On the Net: www.psmmilestone.com

CSIS – PHILIPPINES — 2 p.m. – 5 p.m. Public Health in the Philippines: Progress and Challenges with keynote by: H.E. Enrique T. Ona, Secretary of the Department of Health, Republic of the Philippines. <http://csis.org/event/public-health-philippines-progress-and-challenges>. Location: Center for Strategic and International Studies (CSIS), 1616 Rhode Island Avenue, NW.

CSIS – RULE OF LAW – DEVELOPMENT COOPERATION — 3 p.m. – 4:30 p.m. The CSIS Project on Prosperity and Development hosts discussion on the Trends in the Practice of Development Cooperation: Strengthening Governance and the Rule of Law with Ambassador James Michel, Senior Adviser, CSIS and Former US Ambassador to Guatemala. <http://csis.org/event/trends-practice-development-cooperation-strengthening-governance-and-rule-law>. Location: Center for Strategic and International Studies (CSIS), 1616 Rhode Island Avenue, NW.

QUINNIPIAC POLL – OBAMA, CONGRESS, NATIONAL ISSUES — 4 p.m. Quinnipiac University Releases Results of National Poll on President Obama, Congress and National Issues. <http://press.org/events/quinnipiac-university-releases-results-national-poll-president-obama-congress-and-national-is>. Location: National Press Club, Zenger room, 529 14th Street NW. Contacts: Pat Smith psmith@rubenstein.com (212-843-8026)

HERITAGE – MCGINLEY LECTURE – GENERAL MCCAFFREY — 4 p.m. – 5 p.m. National Security in an Uncertain Age. <http://www.heritage.org/events/2013/11/mcginley-lecture>. Location: Heritage Foundation, 214 Massachusetts Ave. NE

SAIS – ROOFTOP SOLAR — 5 p.m. “Can Expanding Rooftop Solar Coexist With Traditional Electric Utilities?” with Bob Gibson, vice president for education and communication at the Solar Electric Power Association; Bill Murray, director of public policy at Dominion Virginia Power; Rick Morgan, former commissioner of the D.C. Public Service Commission; and Robert Margolis, senior analyst at the National Renewable Energy Laboratory. Location: Kenney Auditorium, Nitze Building, 1740 Massachusetts Ave., NW. Contacts: Felisa Klubes (fkubes@jhu.edu), 202-663-5626. RSVP saiseregional@jhu.edu

SAIS – TURNING RUSSIA AGAINST ASSAD — 5 p.m. Samuel Charap, senior fellow for Russia and Eurasia at the International Institute for Strategic Studies, and Jeremy Shapiro, visiting fellow in the Foreign Policy Program at the Brookings Institution and senior adviser to the US assistant secretary of State for Europe and Eurasia. Location: Room 806, Rome Building, 1619 Massachusetts Ave., NW. Contacts: Felisa Klubes (fkubes@jhu.edu), 202-663-5626

CACI FORUM – GEORGIA — 5 p.m. – 7 p.m. Georgia’s Domestic and Regional Economic Agenda: Realities and Prospects for Future. Participants: Giorgi Pertaia, Head of Georgian National Investment Agency; George Bachiashvili, CEO, Georgian Co-Investment Fund (GCFund); Mamuka Bakhtadze, CEO, Georgian Railway; Dr. S. Frederick Starr, Chair, Central Asia-Caucasus Institute, SAIS, Johns Hopkins University. Location: Rome Auditorium, 1st Fl., the Rome Building, SAIS, Johns Hopkins University, 1619 Massachusetts Avenue, N.W. Notes: To register for this Forum please email your name and affiliation to SAISCACIForums@jhu.edu latest by end of business, November 11.

ANTITRUST LAWS INTELLECTUAL PROPERTY – HESSE — 6 p.m. Deputy Assistant Attorney General for the Antitrust Division Renata B. Hesse will participate in a panel on intellectual property developments at the American Bar Association (ABA) Section of Antitrust Laws Intellectual Property Committee 2nd Annual Fall Networking Event. Press inquiries regarding logistics should be directed to Alisha Cybulski at 202-662-1097 or Alisha.Cybulski@americanbar.org. Location: Cromwell & Moring LLP, 1001 Pennsylvania Ave., N.W. Suite 1100.

GW – MARTHA KANTER — 7 p.m. – 8 p.m. A Conversation with Under Secretary of Education Martha Kanter,

US Under Secretary of Education. RSVP: <http://bit.ly/16O7ozQ> For more information: <http://www.elliotschool.org/events/calendar.cfm?fuseaction=ViewMonthDetail&yr=2013&mon=112219>. Location: Elliott School, Room 505, 1957 E Street NW.

Last Laughs:

LATE NIGHT POLITICAL HUMOR.

David Letterman: "Hey, hey, we got a new mayor in New York City, how about that? I like Mayor Bloomberg. He was mayor for 12 years and for the first five or six years we had no idea who the mayor was. And then in the middle of his second term we kind of got to like him and he had another – tacked on another third term and we finally really got to know Mayor Bloomberg. Now he's gone and the new guy whose name – I tell you what I know about the new guy. He's freakishly tall."

David Letterman: "Well, listen to what the new guy is going to do right off the bat. He is putting an end to stop and frisk. This was the deal where if cops didn't like you look they could frisk you. ...Great, that was my favorite part of the day."

David Letterman: "Here's what else we know about the new mayor. ...Listen to this. This is gossip behind-the-scenes stuff. His wife is a former lesbian. We know this guy crosses party lines."

Stephen Colbert: "Ladies and gentlemen, folks, if you watch the show – and I hope you do – do you know that we at 'The Report' are laser focused on the truth. And that means obsessive fact checking. We check every episode and if we find a fact, we replace it with the truth. Unfortunately, folks, not all news organizations out there are up to our standards. There is a scandal tearing apart CBS News, home of Edward R. Murrow, Walter Cronkite and Julie Chen. You see, two weeks ago, CBS News' '60 Minutes' took time off from doing in-depth buddy curls with Wolverine to blow the lid off Benghazi-gate. When the attacks in Libya occurred, '60 Minutes' was on the scene within minutes of 13 months later. Of course, Fox News has been working this story for a year, having definitively proven that tragedy something, something, something, Hillary Clinton."

Jimmy Fallon: "Joe Biden took an Amtrak train to Delaware and wound up sitting next to Whoopi Goldberg. He just ran into her on the train. He has a photo. Look at this. Yeah. Isn't that crazy? Biden said, 'What is it like making millions of Americans laugh every day?' And Whoopi said, 'I was going to ask you the same question.'"

Jay Leno: "President Obama said he is sorry that some Americans have lost their existing health coverage due to Obamacare. You know, I think he's getting a little desperate. Like, today he said if you like your complete lack of coverage, you can keep your complete lack of coverage."

Jay Leno: "Well, according to 'The Washington Post,' the White House is considering appointing a civilian to lead the NSA. And here's the great part. If you're interested in the job, no need to submit a resume. They got all your information already. They'll call you."

Conan O'Brien: "This is fascinating. A 107-year-old veteran met with President Obama this morning. Yeah, I know. It was good to see President Obama finally getting along so well with John McCain."

Conan O'Brien: "In political news, in a new interview today, Sarah Palin refused to endorse Chris Christie. Yeah. Afterwards, Christie told Palin, 'Thanks, I owe you one.'"

LAST LAUGHS:

+ Late Night Political Humor.

DOI in the News:

SECRETARY JEWELL TOURS CALIFORNIA'S NORTH COAST. The San Jose (CA) Mercury News (11/12, 731K) reports that Interior Secretary Sally Jewell on Friday "toured a rugged area of California's North Coast in a fact-finding mission to help decide if the area should be made a national monument." She "joined state leaders and federal land managers to hike the Stornetta Public Lands in Mendocino County, and later attended a public hearing where hundreds of residents showed up, mostly to voice support for adding the lands to the protected area." Jewell said, "Today I had a chance to hike this spectacular coastline and to see firsthand how important this area is for the community and for its economy – from tourism to outdoor recreation."

The Santa Rosa (CA) Press Democrat (11/8, 156K) reports that "at a two-hour meeting in a packed City Hall, she was feted by more than 300 schoolchildren and adults, unanimous in their enthusiasm to have the land she had just walked become part of the 1,100-mile marine monument." Jewell "reiterated the president's pledge to act when Congress does not to set aside and preserve unique, deserving lands for future generations, imparting a palpable sense of hope that had many in the audience talking in terms of 'when, not if,' the land was included in the national monument."

The Ukiah (CA) Daily Journal (11/12, 17K) reports that Rep. Jared Huffman said, "I am very pleased that Secretary Jewell accepted my invitation to the Point Arena-Stornetta Public Lands and was able to see the tremendous support from the local community for adding these lands to the California Coastal National Monument. This is an unmatched opportunity to preserve a pristine stretch of coastline and boost the local tourism industry, already Mendocino County's largest employer. I hope Secretary Jewell and the Obama administration find this land as beautiful and worthy of preservation as we do."

Also reporting on the story are KCET-TV Los Angeles (11/12, 15K), KFMB-TV San Diego (11/12, 15K), KRNV-TV Reno, NV (11/12, 2K), and WRAL-TV Raleigh, NC (11/12, 117K).

Secretary Jewell Could Recommend President Obama To Bypass Congress On Monuments. The Los Angeles Times (11/12, Cart, 3.07M) reports that Interior Secretary Sally Jewell says "she will recommend that President Obama act alone if necessary to create new national monuments and sidestep a gridlocked Congress that has failed to address dozens of public lands bills." In an interview in San Francisco last week, Jewell said, "The president will not hesitate. I can tell you that there are places that are ripe for setting aside, with a tremendous groundswell of public support." Jewell said "the logjam on Capitol Hill has created a conservation backlog, and she warned that the Obama administration would not 'hold its breath forever' waiting for lawmakers to act."

SECRETARY JEWELL PUSHES FOR CONSERVATION, YOUTH CONNECTION TO OUTDOORS. The Riverside (CA) Press Enterprise (11/9, 465K) reports that Interior Secretary Sally Jewell "kicked off a national campaign last week to expand opportunities for youth on public lands." In a recent speech, Jewell "outlined conservation priorities for the Interior department, including an emphasis on fostering the next generation of environmental stewards, scientists and natural resource managers." Jewell said, "Through public-private partnerships and in conjunction with all levels of government, Interior will expand its efforts to pass on our nation's rich conservation legacy and to inspire millions of young people to play, learn, serve and work outdoors."

The San Francisco Appeal (11/12, 823) reports that Jewell visited San Francisco's Crissy Field to announce the launch of a youth conservation initiative. According to Jewell, "the project, which will be organized and funded through a public-private partnership, will provide jobs, training, educational and volunteer opportunities to tens of millions of school-age children and young adults." Jewell called the initiative "ambitious" in that it aims to "engage youth in a major way to our public lands."

Additional coverage of Jewell's initiatives was provided by the Public News Service (11/11, 306).

Secretary Jewell Praised For Leadership. In an op-ed for the [San Jose \(CA\) Mercury News](#) (11/12, Hayes, 731K), David J. Hayes, former Interior Deputy Secretary praises Jewell for issuing “a directive that embraced a ‘landscape-scale’ approach to mitigating the environmental impacts of major highway, water, energy and other infrastructure development projects.” Hayes argues that “this is a big idea that deserves notice, and the support of developers and the environmental community alike.”

In an op-ed for the [Orlando \(FL\) Sentinel](#) (11/8, Lakly, 780K), Shelly Lakly writes that Jewell “made an important first step toward more effective and efficient conservation of the natural resources we all share” during her speech at the National Press Club by announcing “a secretarial order adopting policies and procedures that apply landscape-scale mitigation to the Interior’s responsibilities to manage public resources and lands.” Lakly argues that “this order is important” because “when done right, especially across landscapes, mitigation is the most practical and effective way to balance conservation of resources with economic development.” For this reason, the Nature Conservancy in Florida “strongly supports landscape-scale mitigation and congratulates Jewell for her leadership in this area.”

For “The Blog” of the [Huffington Post](#) (11/12, Baca, 11.54M), Jim Baca, former Natural Resource Trustee, New Mexico, writes that hearing the Jewell “speak out in this way at the Press Club was inspiring – and not just for those of us in the West that see the tension between energy and conservation every day.” Baca hopes Jewell “continues visiting with Americans who want their public lands protected – and heeding their concerns.” He encourages President Obama to join her, as well, “to see our irreplaceable landscapes and meet Americans newly energized by the government shutdown to champion the value of their parks and public lands.”

SECRETARY JEWELL SUMS UP ADMINISTRATION’S ENERGY, CLIMATE CHANGE POLICY. The [San Francisco Chronicle](#) (11/8, Baker, 2.88M) reports that speaking at the Commonwealth Club in San Francisco last Thursday, Interior Secretary Sally Jewell succinctly summed up Obama’s approach to energy and climate when she said “We can’t switch from a fossil-fuel based economy to a renewable energy economy overnight...So yes, we’re going to still continue to develop those resources, but we’re also going to stand up renewable resources” and adding that “it’s important that we do both,” in response to a question asking if the Administration could be a climate leader while simultaneously promoting expansion in the oil and coal industries. Jewell also defended hydraulic fracking, but when asked about Keystone XL pipeline told them that they should “call John Kerry” because the pipeline is an international issue.

The [National Journal](#) (11/12, Subscription Publication, 427K) reports that Jewell “called on the oil and gas industry Thursday to better inform the quality of public debate over fracking and quell safety concerns over use of the technique to extract oil and natural gas from shale-rock formations.” Jewell said, “I think that there’s a lot of misinformation about fracking. I think that it’s part of the industry’s job to make sure that the public understands what it is, how it’s done, and why it’s safe. It’s our job as a regulator and public land manager to make sure that it is done safely and responsibly, that we use the best available science, and we are in fact doing that.”

PRESIDENT OBAMA NAMES THREE TO KEY INTERIOR DEPARTMENT POSTS. [Platts](#) (11/12, 2K) reports that the Obama Administration has named three new appointees at the Interior Department “to oversee onshore and offshore oil and gas development, leaving a key opening at the agency that develops the five-year offshore leasing plan.” Neil Komze was nominated as director of the BLM, Janice Schneider was appointed assistant secretary for land and minerals management, and Tommy Beaudreau was appointed as Interior’s assistant secretary for policy, management and budget.

Kornze To Be Pressed On Sage Grouse. [Roll Call](#) (11/11, Lesniewski, Subscription Publication, 87K) reports that “in a statement Friday, Republican Sen. Dean Heller of Nevada sounded optimistic about President Barack Obama’s choice of Neil Komze to be the BLM director, noting Komze’s ties to the Silver State.” Heller added, however, that “he planned to question Kornze at the Energy and Natural Resources Committee hearing about the sage grouse, a large bird best known for its unique mating ritual.”

Additional Coverage. Also reporting on the story are [Politico](#) (11/11, Guillen, 467K), the [Washington Post](#) (11/12, Kamen, 4.28M), the [National Journal](#) (11/12, Subscription Publication, 427K), the [Washington Examiner](#) (11/12, Press, 319K), the [Salt Lake \(UT\) Tribune](#) (11/12, 343K), the [High Country \(CO\) News](#) (11/12, 74K), the [Reno \(NV\) Gazette-Journal](#) (11/8, 165K), the [Elko \(NV\) Daily Free Press](#) (11/12, 22K), the [Franklin \(IN\) Daily Journal](#) (11/12, 51K), the [Denver Business Journal](#) (11/12, Subscription Publication, 71K), [KRNV-TV](#) Reno, NV

(11/12, 2K), [KCVB-TV Las Vegas](#) (11/12, 12K), [KRNVT-TV Reno, NV](#) (11/12, 2K), [KRXL-TV Reno, NV](#) (11/12, 656), [KCET-TV Los Angeles](#) (11/12, 15K), the [Rigzone](#) (11/12, 12K), and the [Oil and Gas Journal](#) (11/12, 1K).

INTERIOR FLOODS GRAND CANYON. The [Los Angeles Times](#) (11/11, Boxall, 3.07M) reports that the Interior Department is increasing releases from Glen Canyon Dam this week as part of an ongoing experimental program to replenish downstream sandbars and beaches in the Grand Canyon. According to the article, "September storms that drenched parts of the West washed bountiful amounts of sediment into two tributaries of the Colorado River below the dam, presenting a wealth of beach-building material that the flood-like high flows are intended to distribute."

The [Salt Lake \(UT\) Tribune](#) (11/12, 343K) notes that "Monday marked the first time the releases have been done in back-to-back years since the US Bureau of Reclamation began conducting high-flow releases in 1996." The goal is to "push these sediments downstream and re-deposit them as sandbars that benefit both aquatic life and recreational boaters," according to Anne Castle, assistant secretary of the Interior for water and science. Castle said, "The scientists estimate 1.5 metric tons are in the main stem and that's three times more than last year. We can do a release and spread that sediment up onto the bed and banks and use that to reduce erosion that has occurred to beaches, sandbars and backwaters."

The [Elko \(NV\) Daily Free Press](#) (11/12, 22K) reports that Castle said, "The idea is to see if we can react whenever conditions are right, whenever there's a lot of sediment load in the river. Whether we can reverse or at least stabilize the net loss in sediment that has been occurring in the river below Glen Canyon Dam."

Also reporting on the story are ABC World News, [Yahoo!](#) (11/12, Busbee, 17.91M), the [Deseret \(UT\) News](#) (11/12, 274K), the [Durango \(CO\) Herald](#) (11/10, 28K), the [Bellingham \(WA\) Herald](#) (11/11, 113K), the [St. George \(UT\) Spectrum](#) (11/10, 48K), [Yahoo! News UK](#) (11/12, 79K), the [Daily Mail \(UK\)](#) (11/12, 2.92M), and [KTVK-TV Phoenix](#) (11/12, 88K).

Sen. Udall Urges Action On Colorado River. In an op-ed for the [Glenwood Springs \(CO\) Post Independent](#) (11/12, Udall, 27K), Sen. Mark Udall writes that "the Colorado River is healthy now, but make no mistake: the Centennial State and the six states downriver are on an unsustainable course." He notes that "at a US Senate hearing I recently led, we examined a US Bureau of Reclamation study that found the demand for water along the Colorado River Basin could exceed the available supply by more than 3.2 million acre-feet — enough water to supply more than 3.2 million families across the basin — by 2060." Udall concludes that "the Colorado River may have shaped the West, but given the growing demands here and downstream, it is now our obligation to the river and to ourselves to make every drop count."

SECRETARY JEWELL FACES TOUGH CHALLENGES. In a profile of Interior Secretary Sally Jewell, [Outside Magazine](#) (11/12, 55K) reports on the challenges facing her in the years ahead. The article notes that "the toughest part may be keeping Interior relevant at a time when the biggest environmental battles are being fought on the turf of rival agencies." Additionally, "Interior secretaries traditionally bear the burden of establishing a president's environmental legacy," but "so far, Obama's legacy is muddled at best." Inevitably, the article concludes, "Jewell's charm offensive has to give way to tough policy decisions if she wants to be something more than a caretaker."

ADVOCATES SAY CONGRESS FAILS TO FUND WILDFIRE PREVENTION PROGRAMS. The [Reno \(NV\) Gazette-Journal](#) (11/12, 165K) reports that "Year after year, Congress promises to beef up wildfire-prevention programs but doesn't follow through with enough money, frustrated lawmakers and advocates say." According to the article, "many Democratic and Republican lawmakers, especially from the West, agree that Congress should spend more on preventive steps like thinning forests, clearing excess brush and performing controlled burns before the wildfire season heats up." However, "come budget time, fire-prevention programs run by the US Forest Service and the Interior Department invariably get underfunded, advocates say, though wildfires are getting bigger, more destructive and costlier to control."

GOOD CONTENT HELPS INTERIOR ENGAGE WITH ITS TWITTER ACCOUNT. In the NextGov (11/11, 2K) "CIO Briefing" blog, Jed Sundwall examined the number of tweets sent by various government agencies, finding that the Department of Interior is getting as much engagement as NASA, even though NASA has five million followers compared to Interior's 110,000. Sundwall thinks those that sign up for Interior's tweets want to hear from

the Interior, while many of NASA's followers include those who sign up for NASA based on recommendations and may not even use their accounts. Sundwall concludes that based on Interior's tweets, "good content" is more important for engaging the public than just trying to increase subscription numbers.

THROUGH EXECUTIVE ORDERS, OBAMA COULD CRAFT A SECOND-TERM LEGACY ON CLIMATE CHANGE. The Hill (11/8, Geman, 194K) reports in its "E2 Wire" blog that as the rest of President's agenda "runs aground in Congress," he "has a chance to craft a second-term legacy on climate change," as executive action on the issue "is moving full-speed ahead at the Environmental Protection Agency (EPA)." The Hill adds that the "most far-reaching piece of Obama's climate plan is carbon emission standards for the nation's fleet of existing power plants." In addition, the EPA is "writing standards for new plants." However, Princeton University professor Julian Zelizer said "the push on climate change through executive action could shape Obama's legacy — but only to a point." One problem is that "some of the new EPA regulations might not be settled by the time he leaves office." In addition, the next president could choose to alter them.

UTECH TO SUCCEED ZICHAL AS OBAMA'S TOP ENERGY AND CLIMATE CHANGE ADVISER. Reuters (11/9, Gardner, Rampton, Rucker) reports Dan Utech will become President Obama's top adviser on energy and climate change now that Heather Zichal is stepping down. The Washington Post (11/9, Hicks, 4.28M) says Utech "most recently served as Zichal's deputy after working as a senior adviser to former Energy Secretary Steven Chu and to Hillary Clinton when she was a senator." The Post says the President "supposedly urged Zichal to stay with his administration." The Los Angeles Times (11/9, Banerjee, 3.07M) and The Hill (11/9, Barron-Lopez, 194K) also have reports.

FEDERAL EMPLOYEE JOB SATISFACTION AT LOWEST POINT SINCE 2010. The Washington Post (11/9, Rein, 4.28M) reports the government's Employee Viewpoint Survey finds job satisfaction declining among Federal employees in the wake of "salary freezes, continuing budget cuts and furloughs." While "the vast majority of employees think that the work they do is valuable and look for ways to do their jobs better," job satisfaction is now at its lowest point since 2010.

ADDITIONAL COVERAGE OF EVENTS CELEBRATING 150TH ANNIVERSARY OF LINCOLN'S GETTYSBURG ADDRESS. Additional coverage that Interior Sally Jewell will serve as a keynote speaker at Gettysburg's Dedication Day ceremony Nov. 19 was provided by the Allentown (PA) Morning Call (11/9, 247K) and the Frederick (MD) News-Post (11/12, 97K).

SUPPORT FOR LAND AND WATER CONSERVATION FUND URGED. In an op-ed for the Seattle Times (11/12, Dicks, Evans, 1M), Norm Dicks, former US representative for Washington's 6th Congressional District, and Dan Evans, former governor and US senator for Washington, write that "the outcry over the impact of...closures" during the government shutdown "on our way of life, our communities, our economy and our natural resources served as a clear reminder of the importance of our public lands to all Americans." In addition, they note that "although the shutdown is over," threats to the Land and Water Conservation Fund remain. They "hope our former colleagues still in Congress do the right thing and lead the nation to reauthorizing and fully funding the Land and Water Conservation Fund to ensure that our natural legacy is passed down to the next generation."

In his column for the Denver Post (11/12, Willoughby, 949K), Scott Willoughby criticized Congress' failure to fund the Land and Water Conservation Fund, which in nearly 50 years of existence has only been fully funded once.

SECRETARY JEWELL URGED TO RECONSIDER POLICIES ON WILD HORSES. In an op-ed for the Denver Post (11/11, Matthews, 949K), Ashley Matthews, a graduate student urges the BLM to reconsider its wild horses policies. She claims that lobbies like the National Cattleman's Beef Association have the support of the BLM advisory board. Matthews urges Interior Secretary Sally Jewell to run the BLM on behalf of American people and American laws instead of placating the interests of powerful lobbies.

NATIONAL MONUMENT DESIGNATION FOR ORGAN MOUNTAINS-DESERT PEAKS CRITICIZED. In an op-ed for the Las Cruces (NM) Sun-News (11/12, Simmons, 59K), Randy T. Simmons, director of the Institute for Political Economy and professor of political economy at Utah State University, and Ryan M. Yonk, assistant professor of political science at Southern Utah University and director of the Institute of Policy Analysis, write that monument designation for the Organ Mountains-Desert Peaks region of southern New Mexico can "bring distinct negative impacts." According to the two, "using a careful methodology and making comparisons between

counties through time, we find at best no effect on local economies and, more likely, negative effects of monument designations.”

National Park Service:

CESAR CHAVEZ NATIONAL HISTORIC PARK FACES AN UPHILL BATTLE. The [Huffington Post](#) (11/8, 11.54M) reports that “getting congressional approval to make the Cesar Chavez national park a reality could be an uphill struggle.” The article notes that “unlike the Cesar Chavez national monument created last year through President Obama’s own executive power, establishing a national historical park requires congressional approval.” In addition, “California farmers’ long opposition toward the United Farm Workers could also pose hurdles.”

Meanwhile, [FOX News Latino](#) (11/7, 142K) reports that Midy Aponte, the executive director of the American Latino Heritage Fund of the National Park Foundation (ALHF), and others have “made it their mission to encourage Latinos – a group that spends much of their vacation time visiting their home countries and whose idea, for many, of embracing nature means spending a day at the beach – to learn to love the national park system in the US” According to the article, “recent national campaigns – including one that partners food service giant Aramark and outdoor retailer REI called American Latino Expeditions – have the aim of sharing the park experience with the Latino community.”

NATIONAL PARKS OPEN IN TIME FOR SNOW SEASON. The [New York Times](#) (11/8, Brennan, Subscription Publication, 9.61M) reports that “although the federal government shutdown, from Oct. 1 to 16, forced the National Park Service to close 401 parks and lose \$450,000 a day in revenue, it did little to slow preparations for winter activities like cross-country skiing and snowshoeing.” According to the article, “that the shutdown occurred during the shoulder season eased the pain for national parks like Yellowstone, which was already winding down its services from the peak summer season when its employees were furloughed.” The article notes that “Yellowstone, which lost \$191,000 in entrance fees and licenses during the closure, reopened in time to start grooming roads for activities like guided snowmobile and snow coach tours, which begin in December.”

NPS LOOKS FOR TENANTS TO REPAIR HISTORIC BUILDINGS AT SANDY HOOK BAY. The [New York Times](#) (11/8, Foderaro, Subscription Publication, 9.61M) reports that the NPS “put out an unusual for-rent sign last month: 35 historic buildings, including the genteel quarters of lieutenants and captains, at a wind-swept former Army base overlooking Sandy Hook Bay.” According to the article, “in the past, proposals for what to do with the buildings varied with the tides, but the park service is now actively looking for tenants to invest in them and save them.” Under the park service’s plan, “instead of paying a set rent, tenants would pay for repairs to the buildings and be given long-term use of them in exchange.”

DENALI NATIONAL PARK OFFICIALS HOPE TRAVELERS IN LANDSLIDE AREA PROVIDE INFORMATION. The [Washington Post](#) (11/8, 4.28M) reports that Denali National Park officials “want to hear from people who may have traveled in the area of a huge landslide that fell on a section of a road frequented by summer tourists.”

APP ALLOWS WWII MEMORIAL VISITORS TO EXPLORE HISTORY. [Roll Call](#) (11/12, Subscription Publication, 87K) reports that the “WWII Memorial” app enables visitors to the National Mall’s World War II Memorial to “explore the history behind the memorial.” According to the article, launched by the Trust for the National Mall, a nonprofit partner of the NPS, “it is the organization’s first try at monument-specific smartphone and tablet technology.” The article notes that “plans are under way to develop mobile apps to complement other monuments on the Mall.”

WASHINGTON MONUMENT SCAFFOLDING TO START TO COME DOWN TUESDAY. [WJLA-TV](#) Washington (11/12, 118K) reports that “the scaffolding that has encased the Washington Monument for months will start to come down this week.” On Tuesday, “workers will begin to disassemble the scaffolds that have been set up around the obelisk.” According to the article, “deconstructing the scaffolding will take about three months.” NPS officials “expect the Washington Monument to reopen this coming spring.”

YOSEMITE NATIONAL PARK MOVES AHEAD ON RESTORATION OF MARIPOSA GROVE. The [Columbus](#)

(IN) Republic (11/12, 80K) reports that Yosemite National Park officials are "moving forward on a \$24-million plan to remove parking lots, roads and buildings from Mariposa Grove, an ancient collection of humongous sequoias." The NPS could begin "work on removing asphalt and a gift shop from the grove in southern Yosemite as early as next summer." The article notes that "the restoration plan, expected to be finalized in December, is meant to help the old trees survive and thrive for future generations of park visitors."

HORTICULTURISTS CLONE SEQUOIA PLANTED BY JOHN MUIR. The Los Angeles Times (11/11, Sahagun, 3.07M) reports that "horticulturists recently announced that they had successfully cloned a genetic replica of an ailing 130-year-old giant sequoia planted by conservationist John Muir in the 1880s on his ranch in Martinez, Calif." According to the article, "as part of an effort to preserve at the site a living connection to Muir, Keith Park, a National Park Service horticulturist, trimmed two dozen cuttings from healthy young branches and shipped them to Archangel, which has successfully cloned trees planted by George Washington at Mount Vernon in Virginia."

CLOSURE OF MEMORIALS GENERATES CONTROVERSY. In his column for the Washington Times (11/11, 417K), Dennis Jamison criticizes the closure of memorials during the government shutdown. Jamison accuses the Obama Administration of seeking "to make a political statement about the budget crisis and the federal shutdown by spending more money to make sure barricades would be erected to block normally easy-access public monuments."

In an op-ed for the Roanoke (VA) Times (11/12, 259K), Bill Shiner, who coordinated the Park Ranger Program and National Park Service Seasonal Law Enforcement Training at Slippery Rock University in Pennsylvania, writes that the criticisms "were both misguided and reflect an ignorance of Park Service responsibilities regarding the visitors and resources under its care." According to Shiner, "for members of Congress to fault the NPS during this time for closing sites was disingenuous at best, and downright hypocritical at worst."

NPS FIGHTING TO SAVE FLIGHT 93 TREES. The Johnstown (PA) Tribune Democrat (11/12, 95K) editorializes that the NPS announced Thursday that it has "begun an aggressive treatment project in hopes of saving the hemlocks" at the Flight 93 National Memorial. Keith Newlin, the National Park Service's deputy superintendent for the western region that manages the memorial, said, "Right now, the trees are still fairly healthy. But we've got to knock these buggers back."

NPS PLANS FOR NATIONAL PARKS IN SIERRA NEVADA EXPECTED TO BE DIVISIVE. In his column for the Visalia (CA) Times-Delta (11/9, 42K), William Tweed writes that the environmental assessment by the NPS on national parks of the Sierra Nevada will likely be controversial. According to Tweed, "if your view of the national parks is that they are places set aside to protect nature, then this proposal makes good, even compelling sense" However, "if you go into the High Sierra to fish, long a popular activity, then removing fish to protect frogs will be hard to accept."

Bureau of Land Management:

LEWISTOWN BLM OFFICE RELEASES DRAFT SAGE GROUSE PLAN. The Billings (MT) Gazette (11/12, 206K) reports that "a draft plan for managing sage grouse in five central Montana counties to try to ensure the birds aren't listed as a threatened or endangered species has been completed." The BLM's Lewistown Field Office on Friday issued its Draft Resource Management Plan Amendment and Environmental Impact Statement for Petroleum, Fergus, Judith Basin, Chouteau and Meagher counties. Geoff Beyersdorf, the Lewistown Field Office manager, said, "This RMPA/EIS will provide future management direction to maintain or increase greater sage grouse abundance and distribution by conserving, enhancing or restoring sagebrush ecosystems on which the population depends."

BLM TO EXPLODE OLD ORDNANCE ALONG SAN PEDRO RIPARIAN NATIONAL CONSERVATION AREA. The Sierra Vista (AZ) Herald (11/9, 30K) reports that in coordination with the BLM Tucson Field Office, the US Army Corps of Engineers will "soon be removing unexploded ordnance (UXO) outside Fort Huachuca within the San Pedro Riparian National Conservation Area (SPRNCA)." The article notes that "the removal and mitigation will begin next week and is anticipated to proceed through April 2014." BLM Tucson Field Manager Vi Hillman said, "Public safety is our top priority. We are doing everything possible to ensure that the visiting public can enjoy and

remain safe when they visit the San Pedro Riparian National Conservation Area.”

Fish and Wildlife Service:

US TO CRUSH SIX TONS OF IVORY THIS WEEK. Yahoo! (11/12, Gannon, Editor, 17.91M) reports that US officials are preparing “to destroy their massive stockpile of illegal ivory this week, hoping to send a zero-tolerance message to elephant poachers.” On Thursday (Nov. 14), the FWS “will pulverize nearly 6 tons (5.4 tonnes) of illegal ivory items, from whole tusks to tiny trinkets, which have been seized over the past 25 years as a result of smuggling busts and criminal investigations.” The ivory crush will take place at the Rocky Mountain Arsenal National Wildlife Refuge.

Also reporting on the story are the Business Insider (11/12, 1.39M), the South China Morning Post (11/12, 7K), the Stuff (NZL) (11/12, 37K), and the Hindu (IND) (11/12, 65K).

TEXAS IS CENTER OF ILLEGAL TRADE IN BLACK RHINO HORNS. The Dallas Morning News (11/11, Swartsell, 1.13M) reports that “smugglers have been snatching up black rhinoceros horns from Texas auction houses and selling them on the black market.” The News reports that the “illicit trade is global,” and that authorities say “smugglers travel to Texas to buy the horns of the African-native rhinos and sell them to dealers in California and New York,” who then “ship them to Asia, where they command huge sums as an alleged cancer cure or party drug.” The News notes that last week, Michael Slattery pleaded guilty to smuggling rhino horns he bought in Texas. Authorities say Slattery “is part of the Rathkeale Rovers, a group of Irish nomads active in organized crime, including smuggling operations.”

Additional coverage was provided by the New York Times (11/8, Wilson, Subscription Publication, 9.61M).

INTERIOR DEFENDS GMO CROPS ON FEDERAL WILDLIFE REFUGES. Politico (11/12, Hopkinson, 467K) reports that the Interior Department is “rejecting claims made by the Center for Food Safety and others that it erred in allowing the use of certain pesticides and the production of GMO crops federal wildlife refuges –arguing that the plaintiffs lack standing.” In a Nov. 8 response to the lawsuit Center for Food Safety, et al. v. Jewell, et al., the Interior Department “denies the claims made by the groups, and argues ‘Plaintiffs do not have standing to bring this action. Venue is not proper in this Court. Plaintiffs are precluded from re-litigating this action based on issue preclusion and res judicata,’ though the agency provides no further background to its argument.”

TEXAS COMPTROLLER CALLS ON CONGRESS TO FUND RESEARCH ON ECONOMIC DAMAGE OF PROTECTING ENDANGERED SPECIES. The Washington Times (11/12, McLaughlin, 417K) reports that Texas Comptroller Susan Combs says “it’s time to improve the science that determines which animals get listed under the federal Endangered Species Act, calling on Congress to create a \$50 million fund for independent research that also would factor in the economic damage to communities when a species is designated for protection.” Combs said that Texas has “set aside \$5 million to try to fight spurious listings, and said it’s time for the federal government to give the states some help.”

Overview Of Dunes Sagebrush Lizard Monitoring Program By Texas Comptroller Criticized. In an editorial, the Houston Chronicle (11/8, Copyright 2013:, Chronicle, 2.26M) supports “the deal that the industry proposed a few years ago, as it was persuading the US Fish and Wildlife Service that really, the lizard didn’t need those big-stick, able-to-disrupt-business protections that come with being an endangered species.” However, it notes that a lizard-monitoring program would not be overseen by Texas Parks and Wildlife, but by the Texas comptroller – the state’s bookkeeper and tax collector. The paper argues that Comptroller Susan Combs’ office “knows doodly squat about lizards.”

FWS CONSIDERS PROTECTIONS FOR BUTTERFLIES. The Detroit Free Press (11/12, Matheny, 794K) reports that the FWS is proposing to list the Poweshiek skipperling as “an endangered species and preserve critical habitat areas for it and another threatened butterfly found outside of Michigan, the Dakota skipper.” The agency “will host a public meeting Wednesday in Holly to present information and answer questions about the proposed butterfly protections.”

Also reporting on the story are the Lansing (MI) State Journal (11/11, 158K), the Livingston County (MI) Daily

[Press & Argus](#) (11/11, 49K), and the [Chicago Tribune](#) (11/11, Matheny, 2.32M).

ROUNDUP PLANNED FOR ARSENAL BISON HERD. The [Denver Post](#) (11/12, Finley, 949K) reports that the multiplication of bison threatens to degrade drought-prone prairie at the Rocky Mountain Arsenal National Wildlife Refuge. Federal biologists say they must cut the herd by 25 — and keep it at 60 until fenced habitat is expanded. A roundup is planned for Dec. 17, and the biologists are looking for options short of slaughter, such as trucking the animals to other bison preserves.

REWARD OFFERED FOR KILLER OF RARE RED WOLVES. The [Washington Post](#) (11/10, 4.28M) reports wildlife biologists in North Carolina “are offering a bounty of sorts for information leading to the capture of whoever who shot to death two rare red wolves.” The article notes that “the \$21,000 reward was raised by animal rights organizations after the dead wolves were found Oct. 28 and Oct. 30 on the flat plains of Washington County, on the central Carolina coast.” According to the article, “accelerometers pinging in the wolves’ tracking collars informed US Fish and Wildlife Service officials that the animals’ hearts had stopped beating and led them to the dead bodies.”

TWO CONDOR DEATHS ARE MAJOR BLOW TO SPECIES. The [Los Angeles Times](#) (11/10, Banks, 3.07M) reports that “the deaths of two California condors found last month in water tanks used by Kern County firefighters have state wildlife officials working on a way to keep the large, endangered birds out of the tanks.” California wildlife officials have “sent the condor carcasses to a forensics lab in Oregon for necropsies to determine how the birds died,” but “with so few in the wild, experts called the loss a blow to a still-fragile recovery program.”

FLOOD IMPACT ON PREBLE’S MOUSE NOT YET KNOWN. The [Denver Post](#) (11/12, Writer, 949K) reports it will be months before experts know the impact of September’s rains on the Preble’s meadow jumping mouse.

ADDITIONAL COVERAGE OF REPORT ON WILDLIFE REFUGES CONTRIBUTE TO ECONOMY. Additional coverage of the report by the FWS on the economic impact of wildlife refuges was provided by the [Salt Lake \(UT\) Tribune](#) (11/12, 343K), the [Columbia \(MO\) Daily Tribune](#) (11/12, 68K), the [Southern Illinoian](#) (11/12, 12K), [WRAL-TV](#) Raleigh, NC (11/12, 117K), and [WXOW-TV](#) LaCrosse, WI (11/8, 2K).

TREATMENT OF WAR HORSES CRITICIZED. For “The Blog” of the [Huffington Post](#) (11/12, Roy, 11.54M), Suzanne Roy, Campaign Director, American Wild Horse Preservation Campaign, writes that “the federal government is complicit in a shameful violation of our responsibility toward” America’s War Horses. Roy argues that “the decedents of America’s War Horses should be honored and protected,” but instead, the FWS has “turned its back on these horses, disregarding and literally disposing of them.”

Securing America’s Energy Future:

Renewable Energy:

ENVIRONMENTALISTS CONCERNED ABOUT THREAT OF SOLAR POWER PLANTS TO BIRDS. [USA Today](#) (11/10, Kaufmann, 5.82M) reports that “trying to estimate how many birds could be injured or killed because of large-scale solar projects and what might be done to prevent deaths has become a pressing concern for solar developers and environmental agencies as these projects multiply.” In addition to radiation injuries, “scientists are concerned about bird deaths linked to confusion because of the shimmering expanses of solar panels in the desert.”

REMOTELY CONTROLLED TURBINES HELP PROTECT BIRDS. The [Billings \(MT\) Gazette](#) (11/12, 206K) reports that “an operations center in California can shut down wind turbines 1,200 miles away in Montana in fewer than 30 seconds when the flight patterns of golden eagles and other raptors indicate a potential collision in the making.” According to the article, “the quick response is possible because of tracking radar, ‘detect and deter’ cameras and human spotters called ‘bio-monitors’ deployed at Rim Rock Wind Facility in Montana’s Glacier and Toole counties.” Greg Copeland of San Francisco-based NaturEner USA, the owner, says “the combination of technology and trained avian biologists form a tiered alert system that’s proving to be effective, so far, at preventing the turbine blades from striking birds.”

STUDY FINDS 600,000 BATS KILLED BY WIND TURBINES IN 2012. CBS News (11/12, 3.87M) reports that "more than 600,000 bats fell victim to the turbines in 2012, according to a new study." Published in the journal BioScience, the University of Colorado study "analyzes records of dead bats found near the wind generators." Biologist Mark Hayes wrote, "Dead bats are being found underneath wind turbines across North America. This estimate of bat fatalities is probably conservative." The article notes that "the most deaths are occurring in the Appalachian Mountains, especially in Buffalo Mountain, Tenn., and Mountaineer, W. Va."

Onshore Energy Development:

RECYCLING WASTEWATER TAKES OFF IN HYDRAULIC FRACTURING INDUSTRY. The AP (11/11, Pushnick-Masti, 1.26M) reports that drought has caused the hydraulic fracturing industry to embrace recycling systems that allow them to use less freshwater and dispose of less wastewater. Tod Ennenga, vice president of business development for Pure Stream, a company that offers two different recycling technologies, said that interest in recycling technology has doubled in the past year. State regulators are racing to draft regulations for the new recycling systems, and in some cases make it easier for fracturing companies to recycle.

Offshore Energy Development:

DRILLING COMPANY FINED, PUT ON PROBATION OVER FALSIFIED TEST RESULTS. WWL-TV New Orleans (11/12, 107K) reports that "an Oklahoma contractor that owns oil rigs and drills in the Gulf of Mexico pleaded guilty Friday to covering up problems with one of its critical blowout preventers by falsifying the results of pressure tests on the device in 2009 and 2010." Helmerich & Payne International Drilling Company was "also ordered to institute and comply with an environmental compliance plan that includes increased well control monitoring and enhanced training." BSEE Director Brian Salerno said, "The safety of offshore workers and the environment is dependent on the integrity of the safety and control equipment. Companies need to be on notice that falsification of test results will not be tolerated."

ADDITIONAL COVERAGE OF SHELL'S ARCTIC PLANS. Additional coverage of Shell's Arctic drilling plans was provided by the Christian Science Monitor (11/8, Oilprice.com, 540K).

Tackling America's Water Challenges:

100 PEOPLE LIVING RENT-FREE ON BOR LAND. The Las Vegas Review-Journal (11/12, 437K) reports that almost 100 people are living rent-free on Snowbird Mesa, a this 90-acre tract of BOR land. Jason Kirby, a realty specialist who patrols the land and hands out the permits for the BOR said, "It is a unique place and exemplifies a cross-section of our society. The camping season has just begun and it's free. We provide regular patrols, and there is a law enforcement presence when necessary, but that is rare."

ADDITIONAL COVERAGE OF BAY DELTA CONSERVATION PLAN. Additional coverage of the Bay Delta Conservation Plan was provided by the Sacramento (CA) Bee (11/10, 749K), the Central Valley (CA) Business Times (11/12, 206), the Victorville (CA) Daily Press (11/12, 3K), and the Rocklin & Roseville Today (11/12).

SUPPORT FOR NAVAJO GENERATING STATION PROPOSAL URGED. In an op-ed for the Arizona Daily Star (11/12, Modeer, Pickard, 335K), David Modeer, general manager of the Central Arizona Project, and Pam Pickard, who has been a member of the CAP Board since 2006, write in support of an alternative NOx-reduction plan that exceeds the EPA's retrofit technology goal for the Navajo station. They note that "the major components of the technical work group's proposal call for the owners to shut down one of the three power units by 2020 or accomplish equivalent reductions in emissions through changes in operations." According to the two, "should the EPA accept the plan, the benefits to CAP and its customers and stakeholders are numerous."

Empowering Native American Communities:

INTERIOR RELEASES VALUATION PLAN FOR LAND BUY-BACK PROGRAM. The Indian Country Today Media Network (11/9, 21K) reports that on October 29, the Interior Department released its revised Land Buy-

Back Program Valuation Plan. The article notes that “the draft Plan received a review from The Appraisal Foundation,” and “upon the review the Plan was revised to incorporate all of TAF’s recommendations.” Kevin Washburn, Assistant Secretary – Indian Affairs said, “There is no greater authority for establishing standards for appraisals and qualifications for appraisers than The Appraisal Foundation. TAF’s independent analysis confirms that the steps we are taking to determine fair market value for offers to landowners are cost-effective and conform to the best practices for valuation. We are grateful for their comprehensive review and have incorporated their recommendations into the Valuation Plan we will use in the months and years ahead as we work through a transparent process to provide fair market value to tribal landowners.”

BUY INDIAN ACT IMPLEMENTED 100 YEARS AFTER PASSAGE. The Washington Times (11/11, Swarts, 417K) reports that regulations for the Buy Indian Act, which was passed during the William Howard Taft administration are “just now getting around to being implemented, some 103 years later.” The bill requires the BIA to “give preference in funding and contracts to American Indian-owned businesses, a similar practice employed by ‘set-aside’ policies many government agencies use to support businesses owned by targeted groups such as veterans, minorities or women.” In June, Kevin Washburn, assistant secretary for Indian affairs, said, “The publication of this final rule to implement the Buy Indian Act is a major accomplishment for the administration and a win-win for both Indian Affairs and the American Indian and Alaska Native business community. We expect this will help increase economic activity in tribal communities and provide greater employment opportunities where these businesses are located.”

SOUTH DAKOTA TRIBAL LEADERS SEEK FEDERAL FOSTER CARE HELP. The Connecticut Post (11/12, 298K) reports that “leaders of South Dakota’s nine Sioux tribes will spend time in Washington, D.C., this week seeking federal help in a long-running dispute over state government’s handling of foster care for Native American children.” The tribal officials claim that “the state removes too many American Indian children from their homes and places them in foster care with non-Indian families.” According to Randy Pozos, communications coordinator for the Lakota People’s Law Project, “the tribal leaders and others will hold a press conference on Tuesday and a demonstration on Wednesday outside near the offices of the US Department of Interior, which is hosting a conference with tribal leaders from around the nation.”

Also reporting on the story is the San Francisco Chronicle (11/12, Brokaw, 2.88M).

REPORT ADDRESSES PUBLIC SAFETY ON TRIBAL LAND. The Sacramento (CA) Bee (11/12, 749K) reports that “a national panel of judicial and law enforcement experts traveled the country taking comment on public safety issues on American Indian reservations, where federal statistics show the violent crime rates can be 20 times the national average.” The report, “Strengthening Justice for Native America: A roadmap,” will be released Tuesday, a day ahead of the White House Tribal Nations Conference. The article notes that “among the report’s 40 recommendations is giving tribes more control over crime and justice on their reservations, including an expansion of authority to prosecute non-Indians.”

Also reporting on the story is the Denver Post (11/12, Fonseca, 949K).

WISCONSIN GOV. WALKER STILL UNDECIDED ON KENOSHA CASINO. Yahoo! (11/12, 17.91M) reports that Wisconsin Gov. Scott Walker on Monday said “he was directing his top aide to begin ‘extensive discussions’ with tribal governments interested in the proposal to open a casino in Kenosha.” Walker “gave no timeline for when he will announce his decision on whether to approve the \$800 million casino project proposed by the Menominee tribe and Hard Rock International.”

Also reporting on the story are the Bloomberg BusinessWeek (11/11, 4.93M), the Appleton (WI) Post-Crescent (11/11, 139K), the Racine (WI) Journal Times (11/12, 85K), and the Milwaukee Business Journal (11/8, Subscription Publication, 12K).

BIA FACES DIFFICULT DECISION ON COQUILLE INDIAN TRIBE’S GAMING PLAN. The Oregonian (11/12, 751K) editorializes that the Coquille tribe’s plan “reaches well beyond gambling.” According to the paper, “the consequences of allowing the Coquille tribe to move ahead on its Medford plan poses several dilemmas, not least of them the future of tribal relations statewide, Oregon’s deep addiction to lottery dollars and the willingness of all Oregonians to see gaming pop up in unlikely places.” The BIA’s “decision on whether to place the Medford site in trust will have far-reaching consequence that should be debated openly among tribes and state officials and in

Oregon's communities."

SUPREME COURT'S DECISION IN CARCIERI CASE ANALYZED. For the Indian Country Today Media Network (11/9, 21K) attorney Peter d'Errico analyzes the 2009 Supreme Court decision in Carcieri v. Salazar that "derailed the effort of the Secretary of the Interior to take land into trust for the Narragansett."

Top National News:

OBAMA NOTES IMPENDING END OF AFGHAN WAR IN VETERANS DAY SPEECH. Coverage of President Obama's Veterans Day speech at Arlington National Cemetery tends to focus on his remarks regarding the wind-down of the war in Afghanistan and his pledge to provide adequate Federal assistance to the nation's veterans

The New York Times (11/12, Shear, Subscription Publication, 9.61M) reports that the President "pledged...that Americans 'will never forget' the sacrifices made by the country's military veterans, and promised that his administration would continue pushing for money to support the men and women home from the wars in Iraq and Afghanistan." The Times notes that the President also "declared that the nation's most recent 'chapter of war is coming to an end."

On the CBS Evening News (11/11, story 10, 1:20, Pelley, 5.58M), President Obama was shown saying, "By this time next year the transition to Afghan-led security will be nearly complete. The longest war in American history will end." The New York Daily News (11/12, Larson, 3.94M) reports that the President "praised" the "9/11 generation for serving 'tour after tour after tour' abroad," and "bringing 'the core of al Qaeda ... on the path to defeat.'" The AP (11/12, Anderson) reports that while "the war is expected to formally conclude at the end of next year," the US "may keep a small footprint in the country."

According to McClatchy (11/12, 95K), the President "pledged to pay attention to the debts owed to veterans." The President is quoted as saying, "Even as we make difficult fiscal choices as a nation, we're going to keep making vital investments in our veterans." McClatchy reports that VA Secretary Shinseki "noted that the [VA's] budget...has increased by more than 50 percent, 2 million veterans have been added to the VA's health care system and there have been reductions in veteran homelessness."

USA Today (11/12, Jackson, 5.82M) reports that the President, "pledging help with jobs, education and health care," said, "When we talk about fulfilling our promises to our veterans, we don't just mean for a few years. We mean now, tomorrow and forever." According to USA Today, the President said the Administration "is working to reduce the oft-criticized backlog of claims at the Veterans Administration." On Monday, the President said, "We've slashed it by a third since March, and we're going to keep at it, so you can get the benefits that you have earned and that you need, when you need them."

However, according to the Washington Times (11/12, Boyer, 417K), the Administration "hasn't made as much progress as [Obama] promised." The Times says the "400,835 veterans' benefits claims remain in the pipeline, down about 211,000 since March," but the VA "has processed about 100,000 fewer claims than promised." The Times adds that Shinseki "has said the [VA] will eliminate the backlog sometime in 2015."

The Hill (11/12, Sink, 194K) notes that the President "said those veterans not covered by the Department of Veterans Affairs could 'secure quality, affordable health insurance' under ObamaCare, and touted the millionth student veteran pursuing an education under the Post-9/11 GI Bill."

According to Bloomberg News (11/12, Lerer, 1.91M), the President also praised employers who "have...worked with Michelle Obama and Jill Biden to help 290,000 veterans and military spouses get trained or hired, and are committed to hiring an additional 400,000."

Diane Sawyer, on ABC World News (11/11, story 3, 0:50, Sawyer, 7.43M), noted that "the nation's oldest veteran, 107-year-old Richard Overton" was among those at Arlington. President Obama, "He was there at Pearl Harbor when the battleships were still smoldering. He was there at Okinawa. He was there at Iwo Jima where he said, 'I only got out of there by the grace of God.'" Sawyer added, "Someone else who served got a salute today, 91-year-old Phyllis Gould, one of the original Rosie the Riveters." According to Sawyer, Gould "worked as a

welder during World War II and today Vice President Biden called her to invite her to the White House because she had said it's a big item on her bucket list."

According to Politico (11/12, Delreal, 467K), Biden's call to Gould "is featured on the latest installment of 'Being Biden,' an audio series put together by the Vice President's office." NBC Nightly News (11/11, story 10, 0:20, Williams, 7.86M) also briefly noted the tributes at Arlington Monday. Reuters (11/12, Wulfhorst) lists some of the many commemorations across the country Monday.

The Los Angeles Times (11/12, Muskal, 3.07M) notes that "according to the US Census Bureau, there are 21.2 million military veterans as of 2012," including "7.4 million Vietnam-era veterans...5.4 million who served during the Gulf wars," approximately "1.6 million served in World War II and 2.3 million served in Korea." 5.3 million "served only in peacetime."

Congress's Iraq And Afghan War Vets Overwhelmingly Oppose US Involvement In Syria. Anna Mulrine, in a piece for the Christian Science Monitor (11/12, Mulrine, 540K), notes that the current Congress includes "a total of 16 members have served in Iraq or Afghanistan," and that only two of them back US military involvement in Syria, while "the other 14...a mixture of Democrats and Republicans, either remain skeptical or oppose action altogether."

"Huge Crowds" Honor Four Surviving Doolittle Raiders. NBC Nightly News (11/11, story 11, 2:40, Williams, 7.86M) reported that "huge crowds turned out at the National Air Force Museum at Dayton, Ohio, this weekend to honor the few Doolittle Raiders still alive today." According to Brian Williams, there are just four surviving Raiders "who pulled off a secret mission to strike back at Japan after Pearl Harbor."

Veterans Day Event Used To Push For DC Statehood. The Washington Post (11/12, Ruane, Binkovitz, Martin, 4.28M) reports that "in the District, officials...marked Veterans Day with...a political statement." According to the Post, Mayor Vincent Gray (D) and Del. Eleanor Holmes Norton (D-DC) attended an event at the African American Civil War Memorial that "quickly became a rally for full federal representation." Louis Anderson, "a major in the Tuskegee Airmen," told those assembled, "Today, I urge everyone to join Congresswoman Norton, Mayor Vincent Gray and our city council members in the fight for full rights for the residents of the District of Columbia."

US Court Of Appeals For Veterans Claims Marking 25th Anniversary. McClatchy (11/12, Doyle, 95K) reports that the US Court of Appeals for Veterans Claims is "celebrating its 25th anniversary, which dates to passage of the Veteran's Judicial Review Act in 1988." According to McClatchy, "the specialized panel has heard more than 60,000 appeals of veterans claims decisions."

ENROLLMENTS ON FEDERAL, STATE EXCHANGES FAR LOWER THAN EXPECTED. In a front-page story, the Wall Street Journal (11/12, A1, Weaver, Radnofsky, Subscription Publication, 5.91M) reports that according to two people familiar with the numbers, early reports indicate that as of last week, fewer than 50,000 people were able to successfully enroll in private health insurance plans via the Federal health insurance exchange website. The total is well short of the 500,000 October enrollments the Administration anticipated in internal memos, and the Journal notes that insurers who are counting on higher enrollments are concerned.

The Washington Post (11/12, A3, Goldstein, Kliff, 4.28M) notes that the Federal enrollment numbers are "a tiny fraction of the total projected enrollment for the 36 states where the federal government is running the online health-care exchange, indicating the slow start to the president's initiative."

Politico (11/12, Cheney, 467K) reports that while health industry consultant Robert Laszewski, "said the Journal report is consistent with the industry data he has seen," the Administration "declined to confirm the Wall Street Journal figures." HHS spokeswoman Joanne Peters said, "We cannot confirm these numbers. ... [A]s we have said, the problems with the website will cause the numbers to be lower than initially anticipated."

Meanwhile, Bloomberg News (11/12, Wayne, 1.91M) reports that according to the consulting company Avalere Health, about "49,100 people have enrolled in Obamacare plans through 12 state-run insurance exchanges." A statement from Avalere says that enrollment as of Nov. 10 "represents 3 percent of the 1.4 million people projected to sign up in those states by the end of 2014." That number does not "include California, the most populous US state, Massachusetts or Oregon," and it does not "account for those enrolled through the federal

website serving 36 states.”

The Washington Times (11/12, Howell, 417K) reports that Avalere CEO Dan Mendelson said that problems with the Federal site and “issues in various state-run markets,” have created a “‘climate of scrutiny and negativity’ that may have suppressed enrollment among the states in Avalere’s analysis.” Mendelson added, “I would expect to see these numbers to grow over time. This happens gradually.”

Study Finds Less Competition On ACA Exchanges. The Daily Caller (11/12, May, 422K) reports that a Heritage Foundation analysis has found that competition among healthcare companies “has decreased on the Obamacare exchanges” despite the President’s call for more such competition. The Heritage Foundation study found that “in most states the number of carriers on that state’s exchange are less than the number that sold on the individual market in the state.” The analysis of all 50 states “found that more than half of America’s 3,135 counties would experience an exchange with two or fewer insurance carriers and 78 percent would have a choice of three or less carriers.” According to the study, only “313 counties out of the 3,135 counties nationwide...have a choice of more than five carriers.”

WSJOURNAL ANALYSIS: YELLEN WILL NEED TO MANAGE FED INTERNAL DEBATE. The Wall Street Journal (11/12, Hilsenrath, Mcgrane, Subscription Publication, 5.91M) reports that one of Janet Yellen’s top challenges at the Fed will be managing the organization’s internal debates and the confused signals this often gives the public. While Yellen is expected to maintain Ben Bernanke’s tendency to favor open debate, some former officials believe she will try to get the Fed to speak in a more unified manner to the public.

Summers Argues Focus Should Be On Economic Growth, Not Deficit Reduction. Politico (11/12, Cirilli, 467K) reports that former Clinton Administration Treasury Secretary Larry Summers, who in September withdrew his name from consideration to be Federal Reserve chairman, “is returning to the public stage with a new message for Washington: Drop the obsession with seeking deficit deals, and focus on the economy.” Summers said in an interview, “Growth should be a priority. ... We are starving our potential.” Politico notes that Summers “isn’t simply arguing more should be done now to boost the economy — he’s also questioning whether the focus on cutting deals to tame government debt over the medium and long term is a worthwhile pursuit.” Summers argues that “growing the economy will bring down or keep the deficit and debt at sustainable levels over time by, for example, boosting tax revenues.”

QE Said To Do Little For Economy As A Whole. In an op-ed for the Wall Street Journal (11/12, Huszar, Subscription Publication, 5.91M), Andrew Huszar, who managed the Fed’s \$1.25 trillion mortgage bond buy-back program, apologizes for his involvement in the Fed’s quantitative easing program. He says that QE programs have not in fact done much to help the economy as a whole, instead acting as a boon to major banking firms.

Editorial Wrap-Up:

NEW YORK TIMES. “Iran Nuclear Talks: Unfinished But Alive.” In an editorial, the New York Times (11/12, Subscription Publication, 9.61M) says the “inconclusive” talks over Iran’s nuclear program were “disappointing,” but is encouraged that there has been progress at all. The Times encourages the Administration to ignore those opposed to a deal and press forward.

“Redefining The Minimum Wage.” In an editorial, the New York Times (11/12, Subscription Publication, 9.61M) says that the people of SeaTac, a small city south of Seattle, have voted on a referendum to raise the minimum wage to \$15 an hour, though the results are not yet clear. The Times says that while the \$15 an hour seems high, over the past 50 years, “American workers have achieved productivity gains that can easily support” such as level. The Times encourages the Federal government to push for a higher wage.

“An Overdue Ban On Trans Fats.” The New York Times (11/12, Subscription Publication, 9.61M) editorializes that the Food and Drug Administration’s move to ban trans fats from foods is a “long-awaited move” that “should save thousands of lives and potentially billions of dollars in medical and economic costs a year.” The FDA’s move would “eliminate a loophole” which enabled food manufacturers whose products contained less than half a gram of trans fats to market these foods as “containing zero grams of trans fats per serving.”

"The Next Step In Stop-And-Frisk." The New York Times (11/12, Subscription Publication, 9.61M) editorializes that a three-judge panel of the Second Circuit Court of Appeals "created a public-policy crisis earlier this month" when it "stayed the remedies ordered by Judge Shira Scheindlin of Federal District Court to correct civil rights violations associated with the New York Police Department's stop-and-frisk policy." The judges, by "wrongly removing Judge Scheindlin from the case," sent "a chilling message to district court judges who challenge the practices of the police and other government entities." The Times urges the full circuit to review the panel's ruling.

WASHINGTON POST. "The U.S. Needs A Better Iran Deal." In an editorial, the Washington Post (11/12, 4.28M) says that the latest "pause" in the talks over Iran's nuclear program is "fortunate." The Post says that the Administration "could profitably spend the time before the next round of talks ensuring that whatever terms it puts forward for limiting Iranian nuclear capacity have broad support in Washington and among U.S. allies." The Post says that any deal will "require distasteful concessions," but it is "preferable to military action."

"Emergency In The Philippines." In an editorial, the Washington Post (11/12, 4.28M) that as international organizations prepare "for what will be a vast, complex and challenging relief effort" in the Philippines, it is "essential they get priorities straight and the resources to do the job." The Post adds that the "scope of destruction is daunting," and notes that "there are worrisome signs that the international community faces an uphill struggle to mobilize for it." The Post argues that while "the efforts planned by some, such as China's pledge of \$100,000, seem grossly inadequate," on the other hand, "the U.N.'s humanitarian affairs office quickly released an initial \$25 million from the world body's emergency fund," suggesting "more realism about the scale of the tragedy."

"Protections Needed For Nonprofits." The Washington Post (11/12, 4.28M) editorializes that non-profit organizations must better protect themselves against fraud and other unauthorized use of funds, and better regulatory scrutiny is warranted. A Washington Post investigation found that "hundreds of millions of dollars were drained from institutions that are underwritten by public donations and government funds," as disclosed in IRS filings. Furthermore, "nonprofits routinely omitted important details from their filings, and about half the groups didn't disclose the total amounts lost." The investigation has prompted regulators in seven states and the District of Columbia, as well as Congress, to look into the matter further.

WALL STREET JOURNAL. "The Biggest Fiscal Losers." In an editorial, the Wall Street Journal (11/12, Subscription Publication, 5.91M) argues that the US is making a bit of short-term progress in bringing down the budget deficit. However, the Journal says that the longer-term budget outlook remains grim, mainly due to rising entitlement spending. The Journal says that the Administration wants to eliminate the sequestration cuts and budget caps, and replace them with tax increases. The Journal calls on Republicans to reject this.

"California's Green Reality Check." The Wall Street Journal (11/12, Subscription Publication, 5.91M) editorializes that California's emissions-reduction policies are implausible and will not help the state meet its emissions reduction target. Lawrence Berkeley National Laboratory reportedly advised the state's Air Resources Board that it will not be able to reduce emissions to 80 percent below 1990 levels by 2050. To do so, the state would have to reduce demand for energy in addition to its plethora of incentives and initiatives. Energy demand is a function of population growth and economic growth, which the state's emissions policies do not and cannot address.

"The Racial Runaround." The Wall Street Journal (11/12, Subscription Publication, 5.91M) editorializes that a Justice Department amicus brief for an appeals court rehearing of Fisher v. University of Texas contradicts Justice Anthony Kennedy's majority opinion in the Supreme Court's decision on the case, which remanded it to the appeals court. The Justice Department's brief instructs the University of Texas that it can define its own criteria for utilizing race in admissions decisions, thus avoiding the "strict scrutiny" standard in a 2003 Supreme Court decision that Justice Kennedy advised the university to use. The editorial contends that the Supreme Court has failed to establish its decisions on constitutional principles, and advocated the end of race-based admissions.

Marie Tribe Chippewa Indians; Rosemary Brewer, Human Resource Director, Detroit Manufacturing System. Contact Christy Setzer at 202-506-6421 or Christy@newheightscommunications.com. Location: 441 Cannon.

HOYER PEN AND PAD — 1 p.m. House Democratic Whip Steny Hoyer will hold a pen and pad briefing. Location: H-144.

COMMITTEE MEETINGS

RULES — 5 p.m. Full Committee. On H.R. 982 – Furthering Asbestos Claim Transparency (FACT) Act of 2013, and H.R. 2665 – Lawsuit Abuse Reduction Act of 2013. Location: H-313 Capitol.

Other: Nov. 10 – 12. PUBLIC AND LAND-GRANT UNIVERSITIES — More Than 1,250 Public University Officials to Convene at the Association of Public and Land-Grant Universities 126th Annual Meeting. The Three Day Conference Will Address the Challenges & Opportunities Facing Public Universities Across the Country. Location: Marriott Wardman Park, 2660 Woodley Road. Notes: Media Credentials: www.aplu.org/2013mediacredentials.

DEFENSE DAILY OPEN ARCHITECTURE SUMMIT — DoDs Better Buying Power 2.0, Open Architecture Opportunities in C4ISR and War Gaming Open Architecture will be among issues explored at Defense Dailys 6th Annual Open Architecture Summit . Speakers include Katrina McFarland, Assistant Secretary of Defense (Acquisition); others. Full schedule: http://openarchitecturesummit.com/summit_schedule.html. Highlights: 8:30 a.m. – 9:15 a.m. Katrina G. McFarland, Assistant Secretary of Defense Katrina G. McFarland delivers opening remarks. 9:15 a.m. – 9:45 a.m. Morning keynote by Lieutenant General Charles Davis (confirmed) Military Deputy, Office of the Assistant Secretary of the Air Force for Acquisition. 11:30 a.m. Luncheon keynote: Stephen Welby (confirmed) Deputy Assistant Secretary of Defense for Systems Engineering Department of Defense Research and Engineering Enterprise. Location: Grand Hyatt Hotel, 1000 H St. NW

DIPLOMACY, SECURITY AND EDUCATION – US, NORWAY — Nov. 12 – 13. International Experts Convene in Washington DC on National Security, Terrorism as well as Technologys Impact on Education. Speakers from the Peace Research Institute of Oslo, the Norwegian Police College, the World Bank, the US Marine Corps University, Harvard, the US Naval War College, the American Association for the Advancement of Science, MIT, Columbia University and the National Consortium for the Study of Terrorism and Responses to Terrorism will be among the participants convening at Transatlantic Science Week. The conference focuses on international security, cybersecurity, safety and emergency preparedness, as well as the major changes in education due to technological advances. <http://www.cvent.com/events/transatlantic-science-week-2013/event-summary-4324cc2d821848949b0b0d99b800331f.aspx>. Location: 12th: Washington Hilton, 1919 Connecticut Avenue NW, Concourse Level. 13th: FHI 360 Conference Center, 1825 Connecticut Avenue NW, 8th floor. Contacts: Valerie Holford valerieholford@starpower.net (301-926-1298)

CSIS – HEALTH PARTNERSHIPS – MEKONG – HAMBURG — 8 a.m. – 2:45 p.m. day-long conference on US Health Partnerships in the Mekong, organized by the Global Health Policy Center at the Center for Strategic and International Studies (CSIS) and the CSIS Sumitro Chair for Southeast Asia Studies. Speakers include: FDA Commissioner Margaret Hamburg. <http://csis.org/event/us-health-partnerships-mekong>. Location: Center for Strategic and International Studies (CSIS), 1616 Rhode Island Avenue, NW.

CENUS BUREAU – 2010-2012 AMERICAN COMMUNITY SURVEY — The Census Bureau will provide embargo-period access to the 2010-2012 American Community Survey estimates that will be released to the public on Nov. 14. In addition, a new American Community Survey briefs will be available on the embargo site: Home Value and Homeownership Rates: Recession and Post-Recession Comparisons From 2007-2009 to 2010-2012, which uses the American Community Survey statistics to focus on homeownership rates and home values for smaller areas. Contacts: pio@census.gov (301-763-3030). Notes: Embargo subscribers will have access to the estimates on Tuesday, Nov. 12, up to 48 hours in advance of the public release. Only members of the media who

have applied for and received embargo access may join.

ATLANTIC COUNCIL – NATO'S DETERRENCE — 9 a.m. NATO's Deterrence and Collective Defense. Assistant Secretary of Defense for Global Strategic Affairs Madelyn Creedon participates 1 p.m. <http://www.atlanticcouncil.org/events/upcoming-events/detail/natos-deterrence-and-collective-defense>. Location: 1030 15th Street, NW, 12th Floor.

NASA – DEEP SPACE EXPLORATION — 9 a.m. NASA Television will air a roundtable discussion with aerospace industry leaders about the progress being made toward sending humans into deep space. Panelists representing NASA and its prime contractors will discuss the work being done on the agency's Orion spacecraft and Space Launch System rocket, which will carry humans farther into space than ever before. The participants are: William Gerstenmaier, associate administrator for human exploration and operations, NASA; Julie Van Kleek, vice president, advanced space and launch programs, Aerojet Rocketdyne; Charlie Precourt, vice president and general manager, ATK Space Launch Division; John Elbon, vice president and general manager, Boeing Space Exploration; Jim Crocker, vice president and general manager, civil space, Lockheed Martin Space Systems. Location: The live broadcast will take place at the Newseum, 555 Pennsylvania Ave. NW, in Washington. Contacts: Rachel Kraft rachel.h.kraft@nasa.gov (202-358-1100)

US CHAMBER – QUARTERLY ECONOMIC BRIEFING — 9 a.m. – 10:30 a.m. The US Chamber of Commerce, in collaboration with the US Chamber of Commerce Foundation, will host its quarterly economic briefing to provide insights on the future course of economic activity, the Fed, and fiscal policy. Dr. Martin Regalia, the Chambers chief economist and senior vice president, will deliver remarks on GDP data before leading a panel discussion with economists and industry experts. Participants: Martin Regalia, Ph.D., Chief Economist and Senior Vice President., US Chamber of Commerce; David Crowe, Ph.D., Chief Economist and Senior Vice President., National Association of Home Builders (NAHB); G. Mustafa Mohatarem, Ph.D., Chief Economist, General Motors; Daniel J. Meckstroth, Ph.D., Vice President and Chief Economist, Manufacturers Alliance for Productivity and Innovation (MAPI). Location: US Chamber of Commerce, 1615 H Street, NW. Contacts: press@uschamber.com 202-463-5682

LIBRARY OF CONGRESS — 9:30 a.m. Members of the scientific community will join Librarian of Congress James H. Billington, Seth MacFarlane, Ann Druyan and other guests Tuesday, November 12, for the official opening of the "Seth MacFarlane Collection of the Carl Sagan and Ann Druyan Archive" at the Library of Congress. <http://voyager.jpl.nasa.gov/spacecraft/goldenrec.html>. Location: Thomas Jefferson Building, 10 First St. SE. Contacts: Gayle Osterberg gosterberg@loc.gov (202-707-0020), Sheryl Cannady scannady@loc.gov (202-707-6456). Notes: Invitation only. Media must RSVP: scannady@loc.gov

NPC – HEALTH CARE – JAMA BRIEFING — 9:30 a.m. Critical Issues in US Health Care – A JAMA Media Briefing on Critical Issues in US Health Care. Contact: Jim Michalski, 312-543-8946, Jim. Michalski@jamanetwork.org For more information: <http://press.org/events/critical-issues-us-health-care-jama-media-briefing>. Location: National Press Club, Zenger room, 529 14th Street NW.

OPEN DOORS REPORT — 9:30 a.m. Assistant Secretary of State for Educational and Cultural Affairs Evan Ryan will brief reporters on the 2013 Open Doors report. The report includes this years data on foreign student enrollment on US campuses and US students studying abroad Assistant Secretary Ryan will be accompanied by Allan Goodman, President and CEO of the Institute of International Education. Media RSVP: <http://www.iie.org/Research-and-Publications/Open-Doors/Open-Doors-Press-Kit-Registration>. Location: National Press Club, Ballroom, 529 14th Street NW.

CSIS – DOMINICAN REPUBLIC — 10 a.m. – 11 a.m. The CSIS Americas Program hosts discussion of The Dominican Republic: Becoming a One-Party State? With Author: Carl Meacham, Director, CSIS Americas Program. Discussant: Roberto Alvarez, General Coordinator, Grupo Participacion Ciudadana, and Former Ambassador of the Dominican Republic to the Organization of American States. Location: 110/112 Conference Room, CSIS 1616 Rhode Island Avenue NW.

OSCE REPRESENTATIVE – TWEETCHAT — 10 a.m. – 11 a.m. Organization for Security and Cooperation in Europe – Dunja Mijatovic, OSCE Representative on Freedom of the Media Sign in to [tweetchat.com](https://twitter.com/tweetchat) and sign in using your Twitter handle, and enter RFOM15 to enter the RFOM15 discussion room.

ASBESTOS VICTIMS – MEDIA CALL — 11 a.m. Speakers: Susan Vento, Widow of Rep. Bruce Vento (D-MN) Asbestos Cancer Victims Rights Campaign (ACVRC); Linda Reinstein, Asbestos Disease Awareness Organization (ADAO); Michelle Schwartz, Alliance for Justice (AFJ); Jason Johns, Wisconsin Asbestos Victims Network (WAVN). CALL-IN : 1.800.434.1335 CODE: 394831. Contacts: Joy Howell, ACVRC (202-302-5932)

ENROLL AMERICA – MEDIA CALL UPDATE — 11 a.m. Enroll America, a non-profit health insurance enrollment coalition, will host a press conference call to give an update on the progress of fundraising efforts, and the growth and reach of the consumer-focused Get Covered America campaign. Contact: Justin Nisly Press@EnrollAmerica.org, 202-601-2494. Register at: <http://myaccount.maestroconference.com/conference/register/LID9NHGRNBWNQL9G>

PUBLIC CITIZEN – KEYSTONE — 11 a.m. Release of a new Public Citizen report which “documents construction problems and more than 125 excavations of possible anomalies and engineering code violations along the Texas portion of the pipeline”. Speakers: Tom “Smitty” Smith, director, Public Citizens Texas office; Mohammad Najafi, civil engineer; Evan Vokes, former TransCanada engineer; David Whitley, landowner. DIAL IN: 1-866-952-1906, passcode: PIPELINE. Contacts: Angela Bradbery (202) 588-7741. Tom “Smitty” Smith (512) 477-1155.

GOVERNMENT REGULATIONS — 12 p.m. – 1:30 p.m. Government Regulations: Practical Considerations for the US Forest Industry And Their Impact on Consumers and Businesses. Speakers: Former Sen. Blanche Lincoln (D-AR), Chair, National Federation of Independent Business’s Small Business for Sensible Regulations Coalition ; Stephen Pociask, PhD, President, American Consumer Institute; Wayne Winegarden, PhD, Contributing Editor, EconoSTATS at George Mason University; Robert Lichter, Professor of Communication and Director, Center for Media and Public Affairs and Statistical Assessment Center (STATS) at George Mason University; William Tucker (Moderator) – News Editor, RealClearEnergy. Location: 2456 Rayburn.

PRIVACY IN THE CLOUD – WEB EVENT — 1 p.m. – 2 p.m. Presenters: Jim Siegl, Technology Architect, Fairfax County Public Schools (VA); Kathleen M. Styles, Chief Privacy Officer, US Department of Education; David Rubin, Attorney, Council of School Attorneys; Aimee Guidera, Executive Director, Data Quality Campaign. <http://www.cosn.org/events/webinars/cosn-webinar-series-privacy-cloud-possible>.

EPA – CARBON POLLUTION – MEDIA CALL — 1:30 p.m. Curbin Carbon Pollution – the Natural Resources Defense Council (NRDC) and the NRDC Action Fund release results from new Arkansas, Louisiana, Illinois and New Hampshire surveys conducted in states of some key swing senators. DIAL IN: 1 (800) 860-2442. Ask for the “EPA Carbon Pollution Poll” telenews event. Contact: Jake Thompson, jthompson@nrdc.org, (202) 289-2387; or Melissa Harrison, (NRDC Action Fund), (614) 203-2616, mharrison@nrdc.org; or Alex Frank, afrank@hastingsgroup.com or (703) 276-3264. On the Net: <http://www.nrdc.org>

FEDERAL BUDGET DEBATE – PRESS CALL — 2 p.m. Americans for Tax Fairness (ATF) will hold a phone briefing for journalists about the results of a new public opinion poll on taxes and government spending that was conducted in late October after the government shutdown and as the next round of the federal budget fight begins. Participants: Geoffrey Garin, President, and Guy Molneaux, Partner at Hart Research Associates. Joining them on the call will be Chuck Loveless, Director of Federal Government Affairs of the American Federation of State, County, and Municipal Employees (AFSCME); Michael Linden, Managing Director for Economic Policy of the Center for American Progress; and Frank Clemente, Campaign Manager of Americans for Tax Fairness. DIAL IN: (785) 424-1828, conference ID: tax. Notes: Polling materials available on Tuesday, Nov. 12 at 1:45pm EST at: <http://www.americansfortaxfairness.org/polls/2013/11/08/atf-oct-2013-polling-materials/>

NOW, FEMINIST MAJORITY- WOMEN – FEDERAL BENCH — 2 p.m. The National Organization for Women and the Feminist Majority Foundation host a media call on what they say is the Senate Republicans continued blocking of qualified nominations of women to the Federal Bench. Participants: Terry O'Neill, president at National Organization for Women; Ellie Smeal, president at Feminist Majority Foundation. RSVP. Contacts: Megan Vibert mwbert@scottcircle.com (202-695-8229, 703-946-4868). On the Net: www.now.org. Notes: The call should only last about 15 to 20 minutes.

LIBRARY OF CONGRESS – STEM FIELDS — 2 p.m. – 4 p.m. Policy Briefing on Professional Science Masters

Degrees: Higher Educations Response to a National Workforce Need. Speakers: Reps. Richard Hanna (NY) and Rush Holt (NJ); Nancy Zimpher, Chancellor, State University of New York (SUNY) System; Juliette Bell, President, University of Maryland Eastern Shore; Sheldon Schuster, President, Keck Graduate Institute of Applied Life Sciences; Ross Grossman, Vice President for Human Resources, Regeneron Pharmaceuticals. Location: The Library of Congress, Jefferson Building, Members Room, First Street, S.E. Contacts: Laura Trivers triviatta@hotmail.com (301-512-4442). On the Net: www.psmmilestone.com

CSIS – PHILIPPINES — 2 p.m. – 5 p.m. Public Health in the Philippines: Progress and Challenges with keynote by: H.E. Enrique T. Ona, Secretary of the Department of Health, Republic of the Philippines. <http://csis.org/event/public-health-philippines-progress-and-challenges>. Location: Center for Strategic and International Studies (CSIS), 1616 Rhode Island Avenue, NW.

CSIS – RULE OF LAW – DEVELOPMENT COOPERATION — 3 p.m. – 4:30 p.m. The CSIS Project on Prosperity and Development hosts discussion on the Trends in the Practice of Development Cooperation: Strengthening Governance and the Rule of Law with Ambassador James Michel, Senior Adviser, CSIS and Former US Ambassador to Guatemala. <http://csis.org/event/trends-practice-development-cooperation-strengthening-governance-and-rule-law>. Location: Center for Strategic and International Studies (CSIS), 1616 Rhode Island Avenue, NW.

QUINNIPIAC POLL – OBAMA, COGNRESS, NATIONAL ISSUES — 4 p.m. Quinnipiac University Releases Results of National Poll on President Obama, Congress and National Issues. <http://press.org/events/quinnipiac-university-releases-results-national-poll-president-obama-congress-and-national-is>. Location: National Press Club, Zenger room, 529 14th Street NW. Contacts: Pat Smith psmith@rubenstein.com (212-843-8026)

HERITAGE – MCGINLEY LECTURE – GENERAL MCCAFFREY — 4 p.m. – 5 p.m. National Security in an Uncertain Age. <http://www.heritage.org/events/2013/11/mcginley-lecture>. Location: Heritage Foundation, 214 Massachusetts Ave. NE

SAIS – ROOFTOP SOLAR — 5 p.m. “Can Expanding Rooftop Solar Coexist With Traditional Electric Utilities?” with Bob Gibson, vice president for education and communication at the Solar Electric Power Association; Bill Murray, director of public policy at Dominion Virginia Power; Rick Morgan, former commissioner of the D.C. Public Service Commission; and Robert Margolis, senior analyst at the National Renewable Energy Laboratory. Location: Kenney Auditorium, Nitze Building, 1740 Massachusetts Ave., NW. nContacts: Felisa Klubes (fklubes@jhu.edu), 202-663-5626. RSVP saiseregional@jhu.edu

SAIS – TURNING RUSSIA AGAINST ASSAD — 5 p.m. Samuel Charap, senior fellow for Russia and Eurasia at the International Institute for Strategic Studies, and Jeremy Shapiro, visiting fellow in the Foreign Policy Program at the Brookings Institution and senior adviser to the US assistant secretary of State for Europe and Eurasia. Location: Room 806, Rome Building, 1619 Massachusetts Ave., NW. Contacts: Felisa Klubes (fklubes@jhu.edu), 202-663-5626

CACI FORUM – GEORGIA — 5 p.m. – 7 p.m. Georgia’s Domestic and Regional Economic Agenda: Realities and Prospects for Future. Participants: Giorgi Pertaia, Head of Georgian National Investment Agency; George Bachiashvili, CEO, Georgian Co-Investment Fund (GCFund); Mamuka Bakhtadze, CEO, Georgian Railway; Dr. S. Frederick Starr, Chair, Central Asia-Caucasus Institute, SAIS, Johns Hopkins University. Location: Rome Auditorium, 1st Fl., the Rome Building, SAIS, Johns Hopkins University, 1619 Massachusetts Avenue, N.W. Notes: To register for this Forum please email your name and affiliation to SAISCACIForums@jhu.edu latest by end of business, November 11.

ANTITRUST LAWS INTELLECTUAL PROPERTY – HESSE — 6 p.m. Deputy Assistant Attorney General for the Antitrust Division Renata B. Hesse will participate in a panel on intellectual property developments at the American Bar Association (ABA) Section of Antitrust Laws Intellectual Property Committee 2nd Annual Fall Networking Event. Press inquiries regarding logistics should be directed to Alisha Cybulski at 202-662-1097 or Alisha.Cybulski@americanbar.org. Location: Cromwell & Moring LLP, 1001 Pennsylvania Ave., N.W. Suite 1100.

GW – MARTHA KANTER — 7 p.m. – 8 p.m. A Conversation with Under Secretary of Education Martha Kanter,

US Under Secretary of Education. RSVP: <http://bit.ly/16O7ozQ> For more information:
<http://www.elliottschool.org/events/calendar.cfm?fuseaction=ViewMonthDetail&yr=2013&mon=112219>. Location:
Elliott School, Room 505, 1957 E Street NW.

Last Laughs:

LATE NIGHT POLITICAL HUMOR.

David Letterman: "Hey, hey, we got a new mayor in New York City, how about that? I like Mayor Bloomberg. He was mayor for 12 years and for the first five or six years we had no idea who the mayor was. And then in the middle of his second term we kind of got to like him and he had another – tacked on another third term and we finally really got to know Mayor Bloomberg. Now he's gone and the new guy whose name – I tell you what I know about the new guy. He's freakishly tall."

David Letterman: "Well, listen to what the new guy is going to do right off the bat. He is putting an end to stop and frisk. This was the deal where if cops didn't like you look they could frisk you. ...Great, that was my favorite part of the day."

David Letterman: "Here's what else we know about the new mayor. ...Listen to this. This is gossip behind-the-scenes stuff. His wife is a former lesbian. We know this guy crosses party lines."

Stephen Colbert: "Ladies and gentlemen, folks, if you watch the show – and I hope you do – do you know that we at 'The Report' are laser focused on the truth. And that means obsessive fact checking. We check every episode and if we find a fact, we replace it with the truth. Unfortunately, folks, not all news organizations out there are up to our standards. There is a scandal tearing apart CBS News, home of Edward R. Murrow, Walter Cronkite and Julie Chen. You see, two weeks ago, CBS News' '60 Minutes' took time off from doing in-depth buddy curls with Wolverine to blow the lid off Benghazi-gate. When the attacks in Libya occurred, '60 Minutes' was on the scene within minutes of 13 months later. Of course, Fox News has been working this story for a year, having definitively proven that tragedy something, something, something, Hillary Clinton."

Jimmy Fallon: "Joe Biden took an Amtrak train to Delaware and wound up sitting next to Whoopi Goldberg. He just ran into her on the train. He has a photo. Look at this. Yeah. Isn't that crazy? Biden said, 'What is it like making millions of Americans laugh every day?' And Whoopi said, 'I was going to ask you the same question.'"

Jay Leno: "President Obama said he is sorry that some Americans have lost their existing health coverage due to Obamacare. You know, I think he's getting a little desperate. Like, today he said if you like your complete lack of coverage, you can keep your complete lack of coverage."

Jay Leno: "Well, according to 'The Washington Post,' the White House is considering appointing a civilian to lead the NSA. And here's the great part. If you're interested in the job, no need to submit a resume. They got all your information already. They'll call you."

Conan O'Brien: "This is fascinating. A 107-year-old veteran met with President Obama this morning. Yeah, I know. It was good to see President Obama finally getting along so well with John McCain."

Conan O'Brien: "In political news, in a new interview today, Sarah Palin refused to endorse Chris Christie. Yeah. Afterwards, Christie told Palin, 'Thanks, I owe you one.'"

- + Headlines From Today's Front Pages.

WASHINGTON SCHEDULE:

- + Today's Events In Washington.

LAST LAUGHS:

- + Late Night Political Humor.

DOI in the News:

PRESIDENT OBAMA, SECRETARY JEWELL MEET WITH TRIBAL LEADERS AHEAD OF CONFERENCE. The [Indian Country Today Media Network](#) (11/12, 21K) reports that "before the 2013 White House Tribal Nations Conference scheduled for tomorrow, President Barack Obama sat down with a dozen tribal leaders to discuss job creation and economic development in tribal communities according to a White House Blog post." Tribal leaders met with Obama and members of his administration, including Interior Secretary Sally Jewell. Among the issues the tribal leaders in attendance raised were "job creation, including expanding opportunity for renewable energy on tribal lands, increasing access to capital and foreign direct investment opportunities in Indian country, the successes of tribal self-determination, improving educational outcomes, and jurisdictional challenges."

The [Shreveport \(LA\) Times](#) (11/12, 143K) notes that Jewell is "scheduled to kick off the 5th annual White House Tribal Nations Conference Wednesday at Interior Department headquarters."

Also reporting on the story are the Washington (DC) Post, (11/13, 4.28M) [ABC News](#) (11/13, 3.68M), the [Columbus \(IN\) Republic](#) (11/13, 80K), the Boston (MA) Herald, (11/13, 643K) the [Riverside \(CA\) Press Enterprise](#)

(11/12, 465K) and the [Reno \(NV\) Gazette-Journal](#) (11/12, 165K).

Commission's Report Addresses Gaps In Public Safety On Reservations. The [Washington Post](#) (11/12, 4.28M) reports that "a national panel of judicial and law enforcement experts traveled the country taking comment on public safety issues on American Indian reservations, where federal statistics show the violent crime rates can be 20 times the national average." The commission's 324-page report "seeks to close gaps in public safety in tribal communities." The report, "Strengthening Justice for Native America: A roadmap," was released Tuesday, a day ahead of the White House Tribal Nations Conference. The article notes that "among the report's 40 recommendations is giving tribes more control over crime and justice on their reservations, including an expansion of authority to prosecute non-Indians."

Also reporting on the story is the [Denver Post](#) (11/13, Press, 949K).

BLM APPROVES MOST OF GATEWAY WEST POWER LINE. [Platts](#) (11/13, 2K) reports that the BLM has issued a record of decision approving large parts of the Gateway West project in Wyoming and Idaho. However, the BLM "delayed making a decision on two out of 10 project segments so federal, state, and local permitting agencies would have more time to reach a consensus on siting routes in those areas." According to the BLM, "the process could take up to two years to finish."

The [Casper \(WY\) Star-Tribune](#) (11/13, 90K) reports that in a news release, Interior Secretary Sally Jewell said, "The line will strengthen the Western grid, bringing a diversified portfolio of renewable and conventional energy to meet the region's projected growth in electricity demand."

Meanwhile, the [Idaho Statesman](#) (11/12, 205K) reports that the Obama Administration "put off indefinitely two controversial routes for the Gateway West Transmission Line through Kuna and Owyhee County in a decision released Tuesday."

The [Boise State Public Radio](#) (11/13) reports that Heather Feeney with the Idaho BLM Office said, "Segment 8 runs to the north to the Snake River and Segment 9 is to the south of the Snake River Canyon. Parts of those two segments are located near the Morley Nelson Snake River Birds of Prey National Conservation Area."

Also reporting on the story are [reNews](#) (11/13), the [Law 360](#) (11/13, 18K), [KIFI-TV Idaho Falls \(ID\)](#) Idaho Falls, ID (11/13, 23K), and [KIVI-TV Boise, ID](#) (11/13, 861).

SECRETARY JEWELL MEETS WITH HECHO. The [Los Alamos \(NM\) Monitor](#) (11/13) reports that "a delegation from Hispanics Enjoying Camping, Hunting, and Outdoors (HECHO), led by Director Rod Torrez, met with Interior Secretary Sally Jewell, her staff and various officials prior to her address to the National Press Club on Thursday." Torrez, a former Bandelier National Monument spokesman, said, "One of the things that was most exciting to me—and also slightly disheartening—in a lot of ways it seemed like we were an animal they'd never seen before. This was the first time any group of Hispanics had come together on a national level dealing with conservation. And there was a lot of buzz about that. We're kind of breaking ground."

ADDITIONAL COVERAGE OF OUTSIDE MAGAZINE'S INTERVIEW WITH SECRETARY JEWELL. Additional coverage of the Outside magazine piece was provided by the [Washington Post](#) (11/13, Kamen, 4.28M), [Politico](#) (11/13, Guillen, 467K), and the [Huffington Post](#) (11/12, 11.54M).

ADDITIONAL COVERAGE OF RELEASES FROM GLEN CANYON DAM. Additional coverage of the releases from Glen Canyon Dam was provided by NBC Nightly News, the [Durango \(CO\) Herald](#) (11/10, 28K), the [Provo \(UT\) Daily Herald](#) (11/13, 102K), the [Ogden \(UT\) Standard-Examiner](#) (11/12, 147K), the [Wenatchee \(WA\) World](#) (11/12, 60K), [WRTV-TV Indianapolis \(IN\)](#) Indianapolis (11/13, 40K), [KVOA-TV Tucson, AZ](#) (11/13, 7K), [KNXV-TV Phoenix](#) (11/13, 155K), [KTVK-TV Phoenix](#) (11/13, 88K).

SECRETARY JEWELL CRITICIZED FOR CONSERVATION PROPOSAL. For the [HotAir](#) (11/12, 50K), Erika Johnsen writes that Secretary Jewell is "evidently threatening to recommend to President Obama that he make use of the Antiquities Act of 1906 to take control of still more land via executive order, but the American landscape could be much better off if faux-conservationists would take to heart that big government isn't the answer for everything, and that in fact, it's the answer for relatively few things."

Additional coverage was provided by [Politico](#) (11/13, Allen, 467K), [Politico](#) (11/13, Wong, 467K), the [Albuquerque \(NM\) Journal](#) (11/13, 288K), and [MSNBC](#) (11/12, 7.96M).

SECRETARY JEWELL URGED TO HELP STOP OFFSHORE DRILLING IN THE ARCTIC. The [Examiner](#) (11/13, 1.16M) urges Interior Secretary Sally Jewell to recognize "that the Chukchi Sea in America's Arctic is one of those special places that we just cannot afford to drill in." The article notes that "the League of Conservation Voters is asking for help to reach a goal of sending 70,000 messages by the November 18th deadline."

America's Great Outdoors:

National Park Service:

SUPPORTERS SAY MAKING PULLMAN NATIONAL PARK WOULD BOOST ECONOMY. The [Los Angeles Times](#) (11/13, Smith, Reporter, 3.07M) reports that the Pullman Palace Car Co.'s old factory would "become the centerpiece of a proposed national historical park on the Far South Side if Congress signs off, a step that community leaders say would spark investment and boost tourism." Sen. Dick Durbin "hopes to introduce a bill this month that would add Pullman to the park system, a spokeswoman for the Illinois Democrat said." The article notes that "supporters of the plan hope a law passes within a year but acknowledge that could be a challenge." An alternative would be for President Barack Obama to "bypass lawmakers and name Pullman a national monument."

However, in an op-ed for the [Crain's Chicago Business](#) (11/12, Stanek, 158K), Steve Stanek, a research fellow at the Heartland Institute in Chicago, argues that "if these historic landmark designations have failed to generate the economic growth people in the area desire, there's no good reason to expect economic growth from declaring the area a national park." He concludes that "millions for a 300-acre monument to a sitting president is hardly money well-spent."

NPS OWNERSHIP ON FORT MONROE MAY TAKE TWO MORE YEARS. The [Newport News \(VA\) Daily Press](#) (11/13, 206K) reports that the NPS will "likely not own a single square foot of land on Fort Monroe until 2016 at the earliest — four years after President Barack Obama declared 325 acres of the former Army base a national monument." The state "does not intend to transfer any land to the NPS until the Army addresses each contaminated site on the property." The NPS and state "still need to reach agreements determining which entity pays for utilities and property maintenance," according to John Hutcheson, Fort Monroe Authority deputy executive director.

CONTRACTORS SELECTED FOR PART OF ARCH GROUNDS RENOVATION. The [St. Louis Business Journal](#) (11/13, Subscription Publication, 62K) reports that Great Rivers Greenway has "approved contracts with seven different firms worth a total of more than \$23 for work related to the CityArchRiver project." The article notes that "all seven firms meet or exceed the goals for Disadvantaged Business Enterprise (DBE) participation on the project." The Central Riverfront project, the second component of the CityArchRiver 2015 initiative, will break ground Thursday.

Bureau of Land Management:

COMMENT PERIODS EXTENDED FOR SAGE GROUSE. The [Reno \(NV\) Gazette-Journal](#) (11/12, 165K) reports that the BLM Carson City District and the Humboldt-Toiyabe National Forest have extended the comment period for the Bi-State Sage-Grouse Draft Environmental Impact Statement (DEIS). The extension comes after the recent release of the FWS' proposal to protect the Bi-State Distinct Population Segment (DPS) of the Greater Sage-grouse as threatened under the Endangered Species Act (ESA).

COURT'S RULING ON RICHFIELD RESOURCE MANAGEMENT PLANS CRITICIZED. The [Richfield \(UT\) Reaper](#) (11/13, 102K) editorializes that "a ruling issued last week by US District Judge Dale Kimball has the potential for devastating effects on the region as well as the public's ability to access federally administered land." According to the paper, "Kimball's ruling throws the entire travel plan for the 2.1 million acres of land administered by the Bureau of Land Management's Richfield office into question." The paper urges the BLM to

appeal the ruling and for "county governments need to step in and make their voices heard."

In an op-ed for the Price (UT) Sun Advocate (11/13, Shaw, 19K), Richard Shaw writes that "where the BLM will go from here no one knows for sure, but you can bet that the other RMP's in the state will be taken to task too." He warns that "our industries, our recreation and our way of life will be slowly strangled out of us as the courts go about their merry way of disregarding plans that took years to put together through the cooperation of many agencies and private citizens." Shaw argues that "protection is important; but it must be mitigated with use as well."

Fish and Wildlife Service:

ENVIRONMENTAL GROUPS SEEK DECISION ON SOUTHEAST ALASKA WOLVES. The Sacramento (CA) Bee (11/12, 749K) reports that "two environmental groups say the federal government is taking too long to decide whether a subspecies of gray wolf found in southeast Alaska old-growth forests should be considered for endangered species protection." In a letter Tuesday, the Center for Biological Diversity and Greenpeace urged the FWS to "decide whether additional protections are needed for Alexander Archipelago wolves, which are found on Prince of Wales Island and are genetically distinct from other wolves in the Tongass National Forest." FWS spokeswoman Andrea Madeiros says the agency is preparing a response.

Also reporting on the story are the Merced (CA) Sun-Star (11/12, 86K), the Ventura County (CA) Star (11/12, 196K), the Fort Worth (TX) Star-Telegram (11/12, 596K), the Miami (FL) Herald (11/13, Joling, 806K), the Charlotte (NC) Observer (11/12, 713K), and the Alaska Public Radio Network (11/12, 2K).

RESEARCHERS TEST STURGEON BAY FOR EVIDENCE OF ASIAN CARP. The Milwaukee Journal Sentinel (11/13, 798K) reports that "government biologists took water samples from Sturgeon Bay on Tuesday to search for the DNA of Asian carp in the hope of gaining a better understanding of whether the destructive fish could be lurking in these reaches of Lake Michigan." While "the results from laboratory analysis won't be known until January," once the samples are analyzed, "it will give scientists and regulators a better — though far from complete — understanding of whether two species of invasive carp could be inhabiting Upper Lake Michigan."

Also reporting on the story are the Door County (WI) Daily News (11/13) and WBAY-TV Green Bay, WI (11/12, 38K).

WYOMING SUPREME COURT TO HEAR GRIZZLY DOCUMENTS CASE. The Casper (WY) Star-Tribune (11/13, 90K) reports that "the Wyoming Supreme Court will hear oral arguments Nov. 21 in a lawsuit that attempts to obtain Gov. Matt Mead's documents regarding delisting the grizzly bear as an endangered species." The article notes that "Robert H. Aland, an Illinois resident who has lived part-time in Wilson in Teton County since 1998, filed the lawsuit against Mead and Wyoming Game and Fish Department Director Scott Talbott." Aland "attempted to obtain copies of a letter issued May 24, 2012, from Mead to former Secretary of the Interior Ken Salazar."

KALI TO REMAIN AT THE BUFFALO ZOO THROUGH 2015. WGRZ-TV Buffalo, NY (11/13, 41K) reports that Sen. Charles Schumer said he has secured a commitment from the FWS to keep one of Buffalo's two resident polar bears, Kali, at the Buffalo Zoo through 2015, if the facility passes its 2014 inspection as expected. Schumer said, "For frequent zoo visitors, and for the staff at the Buffalo Zoo who have watched Kali grow up from a polar bear cub, to see him go before he had a chance to reach adulthood would have been unbearable. Now, as long as all goes as the Zoo expects with its 2014 APHIS review, Kali will stay in Buffalo until at least 2015, where he is safe, healthy, and has the potential to breed."

Also reporting on the story is the Wall Street Journal (11/13, Subscription Publication, 5.91M).

NORTH CAROLINA STATE UNIVERSITY STUDY TO FOCUS ON REDHORSE, PEE DEE RIVER. The Stanly (NC) News Press (11/13, 27K) reports that North Carolina State University researchers will "lead an effort to better understand the impact that changes in habitat and water quality are having on fish, mussels and crayfish in the Pee Dee River in North and South Carolina." The effort is being funded with a \$460,000 FWS grant, which will be matched with \$225,400 in state funds. The grant was made through the FWS' competitive State Wildlife

Grants Program.

REWARD OFFERED FOR INFORMATION ON BALD EAGLE SHOOTING. The Sioux Falls (SD) Tri-State Neighbor (11/13, 79K) reports that the FWS and the South Dakota Game, Fish, and Parks Department are "offering a reward for information leading to the arrest and conviction of the individual or individuals responsible for the shooting of an immature bald eagle six miles south and two miles east of Strandburg, South Dakota." The eagle was shot on or before October 31, 2013.

ADDITIONAL COVERAGE: US TO DESTROY SIX TONS OF IVORY. Additional coverage of the plan to crush six tons of ivory was provided by Yahoo! (11/12, Gannon, 17.91M) , the International Business Times (11/13, 237K) , the Independent (UK) (11/13, 487K), The Guardian (11/11, 1.59M), National Geographic (11/12, 21.55M), and AllAfrica (11/13, 18K).

PUBLIC URGED TO SPEAK OUT AT HEARING ON WOLVES. In an op-ed for the Denver Post (11/13, Bell, 949K), Gail Bell, a museum educator, writes that the upcoming decision by the FWS on the wolves will hold implications not only for the long term survival of the wolf, but also, the integrity of the Endangered Species Act. Bell urges the public to participate in a hearing to be held in Denver at the Paramount Theater on Tuesday, Nov. 19.

US Geological Survey:

BUDGET CUTS COULD POSTPONE IMPLEMENTATION OF CALIFORNIA EARTHQUAKE WARNING SYSTEM. The Los Angeles Daily News (11/12, 382K) reports that budgets cuts to the USGS could "postpone the implementation of a statewide earthquake early warning system." USGS geophysicist and early warning project chief Doug Given warned that "the budget impacts might disproportionately affect early warning," because "the early warning project and seismic networks are largely dependent on grants." In an effort to better secure funding to the USGS, Rep. Adam Schiff has "spearheaded a team of 14 other representatives across California to draft a letter to President Barack Obama urging that fiscal 2015 funding incorporate the highest amount of funding possible for the Earthquake Hazards Program and the Global Seismic Network."

USGS STUDY FINDS GROUND-WATER "LAG" MAY DELAY CHESAPEAKE BAY CLEANUP. The Baltimore Sun (11/12, 812K) reports that "the Chesapeake Bay's cleanup may be delayed 'several decades' by the slow pace at which farm pollution is being flushed from ground water on the Delmarva Peninsula, a new study says." The research by the USGS also "suggests pollution control efforts on Eastern Shore farms may need to be increased in order to achieve hoped-for water quality improvements." According to the article, "using a computer model to simulate ground-water flows, USGS scientists found that when nitrogen from fertilized farm fields on the Shore soaks into the ground, it takes 20 to 40 years on average for the nutrient-laden water to make its way underground into streams and rivers."

Securing America's Energy Future:

Renewable Energy:

SEN. FEINSTEIN TO INTRODUCE NEW DESERT PROTECTION ACT. In an op-ed for the Santa Clarita Valley (CA) News (11/12, Feinstein, 431), Sen. Dianne Feinstein argues that California can "protect pristine desert areas" while responsibly developing renewable energy projects. Feinstein believes "those two goals can exist side-by-side by focusing energy development on suitable sites such as military bases and disturbed private land while protecting unspoiled desert landscapes." Feinstein says she "will soon introduce a new California Desert Protection Act to address the many competing land use demands in the desert, including conservation, recreation and military training." She notes that "a central piece of the legislation will protect 266,000 acres of land donated or acquired with federal conservation funds by creating the Mojave Trails National Monument."

Onshore Energy Development:

HOUSE COMMITTEE SEEKS TO THWART MINING RULE. in its "E2 Wire" blog, The Hill (11/13, 194K) report

that the House Natural Resources Committee will "likely approve GOP legislation Thursday that would block the Interior Department from toughening regulation of so-called mountaintop removal coal mining projects in Appalachia." According to the article, "the committee is slated to mark up Rep. Bill Johnson's (R-Ohio) bill that prevents Interior from rewriting a controversial George W. Bush-era regulation that environmentalists say enables destruction of Appalachian streams." Johnson and other critics of the potential revision argue "it would cost jobs in coal country, and cite it alongside new power plant pollution rules in claiming the White House is attacking the coal industry."

US EXPECTED TO BECOME BIGGEST OIL PRODUCER BY 2015. McClatchy (11/13, 95K) reports that the International Energy Agency's long-term energy outlook, released on Tuesday, predicts that the US will "surpass Russia and Saudi Arabia to become the world's largest oil producer in 2015." McClatchy says that US "energy production is skyrocketing, led by Texas and North Dakota, as oil companies use the techniques of hydraulic fracturing and horizontal drilling to tap oil and natural gas trapped in shale rock." The IEA says that North America's "need for oil imports will all but disappear by 2035."

However, the New York Times (11/13, Wald, Subscription Publication, 9.61M) says that according to the IEA report, production of oil from shale formations "in the United States and worldwide will provide only a temporary respite from reliance on the Middle East." The report said, "By the mid-2020s, non-OPEC production starts to fall back and countries from the Middle East provide most of the increase in global supply." IEA executive director Maria van der Hoeven said, "There is a huge growth in light tight oil, that it will peak around 2020, and then it will plateau."

Reuters (11/13, Lawler, Bousso, MacKey) quotes IEA Chief Economist Fatih Birol saying, "We expect in 2015 the U.S. to be the largest oil producer in the world. ... We see two chapters in the oil markets. ... Up to 2020, we expect the light, tight oil to increase – I would call it a surge. And due to the increase coming from Brazil, the need for Middle East oil in the next few years will definitely be less." Birol continued, "But due to the limited resource base (of U.S. tight oil), it is going to plateau and decline. After 2020 there will be a major dominance of Middle East oil."

Bloomberg News (11/13, Smith, 1.91M) reports that according to the IEA, "U.S. oil production will rise to 11.6 million barrels a day in 2020, from 9.2 million in 2012, as it taps rock and shale layers in North Dakota and Texas with the use of horizontal drilling and hydraulic fracturing." During "the same time period, Saudi Arabian production will fall to 10.6 million from 11.7 million and Russia slips to 10.4 million from 10.7 million barrels."

The Christian Science Monitor (11/13, Unger, 540K) notes that the report says that "the technologies that have fueled that North American boom in shale rock formations won't be easily replicated in the rest of the world." The report stated, "The capacity of technologies to unlock new types of resources ... and to improve recovery rates in existing fields is pushing up estimates of the amount of oil that remains to be produced. ... But this does not mean that the world is on the cusp of a new era of oil abundance."

The "E2 Wire" blog of The Hill (11/13, Geman, 194K) reports that "most of the need for growing global energy supply in coming decades is centered in India, China and other Asian nations, while Middle East consumption also grows."

Offshore Energy Development:

MISSISSIPPI MAN PLEADS GUILTY IN OIL SPILL FRAUD CASE. The AP (11/13) reports that a man from Mississippi "has pleaded guilty to a fraud charge involving \$36,300 he received in oil-spill recovery money." According to an article in the Sun Herald, "Joseph Anthony 'Joey' Clements will be sentenced Jan. 30 in Federal court in Gulfport." Prosecutors contend "Clements received a check for \$36,300 by making false statements that he lost money from his shrimping and fishing business."

Tackling America's Water Challenges:

LAIRD REPORTS ON BAY DELTA CONSERVATION PLAN. The Business Journal (CA) (11/13, 154K) reports that "during a visit to Fresno on Tuesday, California Secretary for Natural Resources John Laird reported that

progress is being made on the Bay Delta Conservation Plan that will be released for public review on Dec. 13." Laird said that "although there are no specifics yet on downstream water capture and storage, it will be considered as part of the plan." He said that "once the plan and environmental impact report are released, the public would have 120 days to comment on the documents."

Also providing coverage of the Bay Delta Conservation Plan is [KVPR-FM](#) Fresno, CA (11/13, 284).

NGS HEARINGS BEGIN. The [Arizona Daily Sun](#) (11/13, 33K) reports that "the EPA has scheduled a series of five public hearings starting today over its proposed Best Available Retrofit Technology rule to reduce haze from coal-fired NGS." Hearings were scheduled to begin at the LeChee Chapter House and in Page at the Cultural Arts Building on the Page High campus.

Empowering Native American Communities:

ASSISTANT SECRETARY WASHBURN FINALIZES ADMINISTRATION'S PATCHAK PATCH. The [Indian Country Today Media Network](#) (11/12, 21K) reports that Assistant Secretary – Indian Affairs Kevin Washburn "announced November 12 a finalized rule that aims to resolve some problems created for tribes by a recent US Supreme Court decision, which said that a litigant can sue for up to six years after the US Department of the Interior takes lands into trust for tribes." According to the article, "the new rule partially addresses the issues by ending a 30-day waiting period Interior established in 1996 for the assistant secretary to take land into trust for tribes wanting to develop casinos on such land." Washburn said, "The reason for staying is just not so compelling anymore. Our argument is that people can still bring their action if they want to after we've taken the land into trust—at least that's what Patchak says."

COASTAL EROSION THREATENS ALASKA NATIVE VILLAGE. The [Washington Times](#) (11/13, D'oro, 417K) reports that "the flood-prone village of Newtok near Alaska's storm-battered coast is running out of time as coastal erosion creeps ever closer to the Yup'ik Eskimo community." According to the article, "as residents wait for a new village to be built on higher ground nine miles away, a dispute over who is in charge has led to a rare intervention" by the BIA, which "ruled that the sitting tribal council no longer represents the community of 350 as far as the agency is concerned." Council leaders are appealing the BIA's decision, "which gave the funding-administrative power to a new group that claims it is the rightfully elected council." But "until the matter is resolved, millions of dollars in government funds for the relocation effort have been halted, as nature's relentless erosion continues, oblivious to who is in charge."

MASSACHUSETTS LAWMAKERS APPROVE CASINO COMPACT WITH MASHPEE TRIBE. The [Cape Cod \(MA\) Times](#) (11/12, 92K) reports that “both the House and Senate today approved the tribal-state compact between the Mashpee Wampanoag and Gov. Deval Patrick, a spokesman for Senate President Therese Murray said.” The compact, “which would pay the state revenues from a proposed \$500 million Indian casino in Taunton, is now headed to Patrick for his signature.” Once Patrick signs the compact, it will be sent to the BIA, which will have 45 days to act on the compact.

Also reporting on the story is the [New Bedford \(MA\) Standard-Times](#) (11/13, 54K).

Top National News:

CLINTON: OBAMA SHOULD HONOR HIS PLEDGE TO THOSE WHO WANT TO KEEP THEIR INSURANCE.

Tuesday’s news cycle included a volley of negative coverage regarding the implementation of the Affordable Care Act, much of it featuring criticism of President Obama from his own allies, including former President Clinton, as well as polls showing the President is less popular and less trusted than at any other point since his inauguration. All three networks covered Clinton’s remarks in an interview with [ozy.com](#), in which he advised President Obama to allow those Americans who have had their health insurance canceled as a result of the ACA – despite liking and wanting to keep their policies – to retain that coverage.

Clinton’s wording appeared to suggest that were the President to do otherwise, he would not “honor the commitment” he made repeatedly to the public as he sought to build support for the ACA prior to its passage and implementation, which played into the narrative regarding the public’s increasingly skeptical assessment of the President’s veracity. Wolf Blitzer, at the opening of CNN’s The Situation Room (11/12), said Clinton is “urging” the President to “keep his promise to the American people.”

On ABC World News (11/12, story 5, 2:10, Sawyer, 7.43M), Jonathan Karl reported that Clinton “said what President Obama’s harshest Republican critics have been saying – that he may need to the change the healthcare law to help the millions of people who have seen their insurance canceled despite the President’s promise that would not happen.” Clinton was shown saying, “I personally believe – even if it takes a change in the law – that the President should honor the commitment the Federal government made to those people and let them keep what they got.” According to Karl, on Tuesday, the White House said the Administration is “looking at options to help those who have lost their coverage, but it’s unclear what they would do,” and, “in fact, the President’s team has not even presented any options to the President yet.”

Brian Williams, on NBC Nightly News (11/12, story 5, 2:30, Williams, 7.86M), reported that Clinton “likes and supports” the ACA, but “nonetheless...joined the chorus of people pushing the President to keep his promise.” NBC’s Peter Alexander reported that “while defending the healthcare law in a new interview,” Clinton “urged President Obama to make good on his promise, and let anyone who wants to keep their current insurance plan.” Alexander added that on Tuesday, White House press secretary Jay Carney “said that President Obama agrees with Clinton.”

On the CBS Evening News (11/12, story 4, 1:40, Pelley, 5.58M), Major Garrett reported from the White House that “two senior advisers told us there was no coordination with...Clinton on that comment and you can see why.” According to Garrett, “Clinton’s comments focused even more attention on the most glaring political problem facing Obamacare – those consumers...who had their policies canceled but can’t afford the new policies that comply with Obamacare.”

Chris Hayes, in the lead segment for MSNBC’s All In (11/12, 510K), said, “Republicans have settled on their latest anti-Obamacare message: ‘If you like your health plan, you should be able to keep it.’” Hayes added, “And today, they got a big boost from Bill Clinton.” Andrew Sullivan (11/13, 27K), in a post on Clinton’s remarks, wrote: “if you made a promise, and it turns out to be empty,” you can either “apologize for misleading people, which really does have a corrosive effect on your credibility as president; or you can fix the law so that your promise remains intact.”

The New Republic’s Jonathan Cohn pushed back against the Clinton-fueled narrative Tuesday in a piece titled,

"Bill Clinton Is Wrong. This Is How Obamacare Works." Cohn says Clinton is "likely to create some misimpressions...while giving the administration and its allies yet another political headache." Cohn says Clinton's suggestion to the President "makes it seem as if there is some simple way to let people keep their current plans," but, according to Cohn, "no such magic solution exists." Cohn says that in order for the ACA to function, some Americans "must pay more and, in some cases, put up with less."

Chris Matthews, on MSNBC's *Hardball* (11/12, 689K), briefly noted some of the defenses of the ACA offered by Clinton on Tuesday without mentioning his suggestion for the President regarding coverage cancellations. After showing an extended clip of Clinton speaking, Matthews said "the secretary of explaining stuff," as President Obama has called Clinton, was "doing a great job again." On MSNBC's *The Ed Show* (11/12, 449K), Ed Schultz did not mention the former president's comments at all, nor were they covered on MSNBC's *The Rachel Maddow Show*. Both Matthews and Schultz blamed the media for drawing attention to perceived drawbacks of the ACA. Schultz said, "The mainstream media, I believe, wants Obamacare to fail." Matthews accused "the big media" of repeating uncritically Republicans' criticisms of the President.

Under the headline, "Clinton To Obama: Let Americans Keep Canceled Health Plans," *USA Today* (11/13, Madhani, 5.82M) paraphrases Clinton as saying that the President "should honor his oft-repeated pledge and allow people to hang on to health care plans that are being canceled as a result of the Affordable Care Act." *USA Today* reports that on Tuesday, Jay Carney said "Clinton's comments were in line with Obama's statement last week that he has asked his administration officials 'to close some of the gaps in the law.'"

However, Justin Sink, in a post for *The Hill* (11/13, Sink, 194K), reported that some conservatives believe Clinton's remark was "a clear effort to distance he and his wife from the troubled ObamaCare rollout." Sink notes that Matt Drudge tweeted: "Clintons make their move. This was not HILLARYcare. This was OBAMAcare. And it was done wrong." Sink adds that the *New York Times*' Ross Douthat "joked that Clinton's solution for individuals losing their existing health plans under ObamaCare was to 'elect Hillary in 2016.'" *Politico* (11/13, Weinger, 467K) reports that on his radio show Tuesday, Rush Limbaugh said, "Did you see where Bill Clinton has said that Obama needs to keep his word about keeping our insurance plans if we like 'em? ... There are no coincidences with the Clintons." Limbaugh added, "If you're Obama, can you imagine being lectured to about honesty and integrity from a convicted perjurer?"

Juli Weiner, in a short piece for *Vanity Fair* (11/13, Weiner, 5.57M), calls Clinton's remark "somewhat off-message," but "fully gratuitous." Luke Johnson, in a piece for the *Huffington Post* (11/13, Johnson, 11.54M), noted that Clinton "preceded his comments by saying that the country is better off with the Affordable Care Act."

The *Wall Street Journal* (11/13, Schatz, Subscription Publication, 5.91M) covers the former president's remarks in an article titled, "Bill Clinton Says Health Law May Need To Be Changed." The *Journal* reports that on Tuesday, Carney said the President has told his aides to "make sure that nobody is put in a position where their plans have been canceled and they can't afford a better plan even though they'd like to have a better plan."

The AP (11/12, Kuhnhenh), in an article titled, "Bill Clinton Says Obama Should Follow Through On Pledge To Let Americans Keep Health Coverage," says Clinton is just the "latest in Obama's party to urge the president to live up to a promise he made repeatedly" after "millions of Americans...started receiving insurance cancellation letters." The AP notes that ten Democratic senators "are pushing for an unspecified extension of the sign-up period and in a private White House meeting last week several pressed Obama to do so." The AP notes that Sen. Mary Landrieu has also "proposed legislation that would require insurance companies to reinstate the canceled policies."

Bloomberg News (11/13, Talev, 1.91M) says Clinton "stepped into the debate...days before a vote in the Republican-controlled House on a measure that would let individuals keep their health-care plans into next year without penalty," and "Republicans seized on Clinton's remarks." Speaker Boehner said Clinton's remarks "signify a growing recognition that Americans were misled" by the President. The *Miami Herald* (11/13, Kias, 806K) notes Boehner's statement in an article titled, "GOP Seizes On Clinton's Criticisms Of Obamacare Rollout."

The *Washington Times* (11/13, Howell, 417K) reports that the Club for Growth "put out a statement asking if Sen. Mark Pryor, an Arkansas Democrat who faces a tough reelection battle next year, will support the Mr. Clinton's

call for Mr. Obama to consider potential changes to the law to help people keep their plans if they want.”

The Hill (11/13, Easley, 194K) quotes Clinton as saying, “For young people mostly, but not all young, who are in the individual market whose incomes are above 400 percent of the poverty level, they were the ones who heard the promise that if you like what you’ve got, you can keep it.” Neil Munro, in a piece for the Daily Caller (11/13, Munro, 422K), said that on Tuesday, Jay Carney “offered vague reassurances to the millions of voters who are losing their insurance, whom he dubbed ‘the five percent.’”

In a WonkBlog post titled, “Why Did Obama Promise People Could Keep Their Health Insurance? Blame Bill Clinton,” Ezra Klein of the Washington Post (11/13, Klein, 4.28M) makes the case that Clinton is “the reason Obama made the disastrous promise in the first place.” According to Klein, when he was President, Clinton made it clear that Americans would lose their current insurance if “HillaryCare” were to become law, which was unpopular because “even though most Americans believe the health-care system is a mess, they’re reasonably happy with the insurance they have.” Klein contends that with that in mind, “it’s a bit rich for Clinton to argue for a plan that leaves everyone’s insurance unchanged.”

The Los Angeles Times (11/13, Little, 3.07M) reports that “this isn’t the first time Clinton’s remarks have caused the Obama team headaches.” The Times says he has “previously critiqu[ed] Obama’s handling of the conflict in Syria,” among other things. Josh Gerstein, in a piece for Politico (11/13, Gerstein, 467K), writes that Clinton’s “endorsement of legislation to address the cancellation issue again put the former president in a place Obama had refused to go – a familiar spot for the Oval Office’s current occupant.” Gerstein adds, “On issues ranging from the debt ceiling fight to Syria,” Clinton “has parted company with the White House party line – often at crucial times that leave the current president in a tough spot and exacerbate tensions that date back to the 2008 campaign.”

Other coverage of Clinton’s comments includes an article in the New York Daily News (11/13, Friedman, 3.94M) titled, “Bill Clinton Chides Obama To Change Health Care Law So People Can Keep Coverage,” and another from the New York Post (11/13, Solis, 1.4M) under the headline, “Clinton To Prez: Fix ObamaCare.”

Analyses: Rescinding ACA Cancellations May Be Next To Impossible. Adding to the Administration’s problems, analyses from the New York Times (11/13, A1, Shear, Pear, Subscription Publication, 9.61M) and The New Republic’s Cohn, among others, indicate that there may be no way to “uncancel” coverage without seriously undermining the ACA and causing premiums for other Americans to spike next year. For instance, on NBC Nightly News (11/12, story 5, 2:30, Williams, 7.86M), Peter Alexander reported that on Tuesday, White House press secretary Jay Carney said the President’s “goal is to make sure those who got cancellation letters can afford a better plan.” However, Alexander noted that, according to Jonathan Gruber, identified as “an architect of both Romneycare...and Obamacare,” that will be “no easy task.” Gruber: “If you allow some people to jump out of the system and keep their old policies at a cheaper price, it puts the fundamental goals of the law at risk.”

In a front-page article titled, “Obama In Bind Trying To Keep Health Law Vow,” the New York Times (11/13, A1, Shear, Pear, Subscription Publication, 9.61M) reports that the Administration is “under intense bipartisan pressure to answer mounting consumer complaints,” and “follow through on last week’s acknowledgment about his incorrect promise on health care coverage.” But the Times says that on Tuesday, Administration officials “signaled the president’s strong opposition to calls from across the political spectrum...to support bipartisan legislation that would allow people to keep their current insurance plans.” According to the Times, “White House officials refused to discuss in detail what options” the President is mulling, but “made clear that” he is “skeptical of any solution that would allow insurance companies to continue selling what officials consider to be cheap and substandard policies.” The Times adds that it is “unclear how the administration could make new plans more affordable, or whether that solution would be interpreted by Americans as keeping the promise that the president made.”

USA Today (11/13, Madhani, 5.82M), in an analysis titled, “No Easy Fixes For Obamacare Cancellation Issue,” reports that “analysts say Obama faces a mountain of complications in his hunt for an administrative fix for the problem.” Timothy Jost, identified as “an expert on health care law at the Washington and Lee University law school,” is quoted as saying, “I just can’t see an administrative fix that doesn’t make things worse.” Robert Laszewski, president of Health Policy and Strategy Associates, says, “If it took the insurance industry months – three, four, five, six months in that range – to get the cancellation letters prepared and sent out, how are you

going to reverse it in six weeks?"

Poll: 52% Now Believe Obama "Not Honest And Trustworthy." Diane Sawyer, on ABC World News (11/12, story 5, 2:10, Sawyer, 7.43M), reported that "for the first time in his presidency a majority, 52%, say the President is not honest and trustworthy," while 44% continue to trust the President. According to Sawyer, some Americans believe they have been "misled about getting to keep their insurance through Obamacare."

Likewise, Scott Pelley, on the CBS Evening News (11/12, story 4, 1:40, Pelley, 5.58M), said, "The troubled rollout of President Obama's health insurance law is taking a toll on his job approval ratings." Pelley reported that "the respected Quinnipiac University Poll" has found that "only 39% of Americans say they approve of the job he's doing – the lowest ever in that poll –" while 54% "disapprove." Pelley added, "Perhaps reflecting his broken 'you can keep your insurance' promise, only 44% said the President is honest and trustworthy."

NBC Nightly News (11/12, story 5, 2:30, Williams, 7.86M) was the only network newscast that did not mention the President's weak new poll numbers.

The Wall Street Journal (11/13, 5.91M) reports that Tim Malloy, assistant director of the Quinnipiac University Polling Institute, wrote, "Any elected official with an 8-point trust deficit is in serious trouble." The Journal also reports that Quinnipiac found that the public now disapproves of the ACA by a 16-point margin, 55%-39%, while 46% of respondents believe they were "knowingly deceived" by the President regarding the impact of his healthcare reforms. Politico's (11/13, Haberkorn, 467K) Jennifer Haberkorn said the President has been "called out by opponents – and some supporters – for misleading the public." Politico (11/13, Delreal, 467K) noted that Quinnipiac also found that "only 19 percent of Americans believe the quality of their healthcare will improve because of the ACA, while 43 percent think their care will worsen," and 33% "believe the ACA will not affect their health care at all."

Feinstein Co-Sponsors Bill Requiring Insurers To Delay Cancellations. Politico (11/13, Kim, 467K) reports that on Tuesday, in a signal that "it's not just red-state Democrats who want to take aggressive steps to mend" the ACA, Sen. Dianne Feinstein announced that she will co-sponsor Sen. Mary Landrieu's bill "requir[ing] insurance companies to continue offering their existing health care plans." Feinstein released a statement reading: "This bill provides a simple fix to a complex problem." However, according to Politico, Senate Majority Leader Harry Reid "has no plans to bring Obamacare delay bills to the floor, and most Senate Democrats appear to be waiting until the end of the month...to demand major delays to the law's implementation." Politico notes that Landrieu's bill has "three other co-sponsors," Sens. Joe Manchin, Kay Hagan and Mark Pryor, "all Democrats hailing from more conservative territory."

Dana Milbank, in his column for the Washington Post (11/13, Milbank, 4.28M), notes that only "two months ago, polls showed...Hagan leading prospective opponents by double digits," but PPP "released a poll Tuesday showing that 69 percent of North Carolinians think the Obamacare rollout has been unsuccessful," and "probably because of that," Hagan "is now in a dead heat with would-be challengers." According to Milbank, Hagan's "problem begins with Obamacare, ends with Obamacare and has a whole lot of Obamacare in between."

Upton Bill May Put Vulnerable House Democrats In A Bind. Reuters (11/13, Ferraro) reports that when asked if agrees with Clinton, Rep. Steny Hoyer (D-MD), the House Minority Whip, said, "I agree that people that purchased their policies prior to the enactment of the bill, which was when the representation was made, ought to be able to keep their policies."

However, Politico (11/13, Gibson, 467K) reports that Hoyer's office subsequently announced that he opposes House Republican legislation introduced by Rep. Fred Upton (R-MI) that "would grandfather in all current policies and exempt them from the requirements under Obamacare." According to Politico, when asked in person on Tuesday if "would support Upton's bill, Hoyer insisted that it was too soon to make a judgment."

Roll Call (11/13, Dumain, 87K) reports that "the vast majority of Democrats will likely side with leadership" and oppose Upton's bill, but "a sizable contingent of vulnerable caucus members – mostly freshmen – are expected to side with Republicans." According to Roll Call, "many House Democratic aides said that it was crucial to allow 'front-liners' to do whatever it takes to keep their seats in the next Congress," and "one staffer for a senior House Democrat suggested" that Democrats "back some changes to" the ACA. Roll Call notes that 22 Democrats

backed a one-year delay of the individual mandate in a House vote this summer.

More Than One Million Californians Have Received Cancellation Notices. In an article titled "More Than 1M Californians Notified Health Insurance Will Be Canceled" that was featured atop the Drudge Report on Tuesday night, Sacramento's KQED-TV Sacramento, CA (11/12, 47K), a CBS affiliate, reported that on Tuesday, California Insurance Commissioner Dave Jones (D) revealed that "more than 1 million [health insurance] cancellation notices have been sent to Californians," and that Anthem Blue Cross of California "has agreed to a two-month extension of about 104,000 individual policies after failing to give the required 90-day cancellation notice."

Steve Lopez, in a column for the Los Angeles Times (11/13, Lopez, 3.07M), profiles a southern California woman who is losing an insurance plan she says she is "completely happy" with and must now pay 80% more in premiums for coverage that is "inferior." Lopez goes on to deride the President's "now-laughable promises of a smooth transition."

FIRST LADY LAUNCHES NEW EDUCATION INITIATIVE. The New York Times (11/13, Huetteman, Subscription Publication, 9.61M) reports that First Lady Michelle Obama "urged" high school students on Tuesday to pursue education after graduating, launching an "initiative that seeks to increase the number of low-income students graduating from college and signaling her plans to focus more on administration policy during the president's second term." Speaking at Bell Multicultural High School in Washington, the First Lady "told students they could write their own success stories if they focused on going to college."

The Washington Post (11/13, Layton, Thompson, 4.28M) reports the First Lady "kicked off her new campaign to prod and inspire high schoolers around the country to graduate and enroll in college, trade school or some type of higher education." She said, "We're going to talk about the power that you have to fulfill your potential and unlock opportunities that you can't even begin to imagine for yourselves right now." She was joined by Secretary of Education Arne Duncan, and her message "focused on personal responsibility and hard work, not the administration's education policies."

The AP (11/13) reports the First Lady said, "No matter what the president does, no matter what your teachers and principals do, or whatever is going on in your home or neighborhood, the person with the biggest impact on your education is you. It's going to take young people like all of you across the country stepping up and taking control of your education."

The Hill (11/13, Goodin, 194K) reports that the First Lady's speech was highly personal. She said, "I went to law school, became a lawyer. I've been a vice president for a hospital. I've been the head of a nonprofit organization. And I am here today because I want you to know that my story can be your story. The details might be a little different, but let me tell you, so many of the challenges and the triumphs will be just the same."

The Wall Street Journal (11/13, Nelson, Subscription Publication, 5.91M) reports the First Lady's initiative is in support of the President's goal of having the US lead the world in the share of people who graduate from college in 2020. However, a number of experts interviewed for the piece are very skeptical that it is possible to hit that goal.

Meanwhile, the New York Times (11/13, Porter, Subscription Publication, 9.61M) reports a poll conducted last month by the College Board and National Journal shows that 46% of respondents, including a majority of 18 to 29 year olds, "said a college degree was not needed to be successful," while a Pew poll from 2011 showed that "only" 40% of Americans "think college is a good investment." The piece says that on a "pure dollars-and-cents basis, the doubters are wrong," as those with a bachelor's degree "still earn almost twice as much as high school graduates." Looking at the debate over whether more education can close the income gap, the piece interviews several academics who cast doubt on that, instead blaming the decline of unions, deregulation, and increased foreign trade.

Pell Grant Program Said To Be Poorly Structured For Low-Income Students. In an op-ed for the New York Times (11/13, Baum, Conklin, Johnson, Subscription Publication, 9.61M), Sandy Baum, Kristin Conklin and Nate Johnson write that the way the Pell grant program is designed makes it harder for low-income students to "graduate on schedule." The issue, they say, is that the program "provides support for only 12 credit hours per

term, which the government defines as full time for financial aid purposes," but to complete a bachelor's degree in four years requires 15 or 16 credit hours. They say that about three-quarters of grant recipients today "enroll in community colleges, vocational schools, for-profit institutions or other nonselective institutions," where tuition is based on credits taken, and few can pay without assistance, so it "essentially makes it impossible for them to graduate on time."

Philadelphia Looking To Sell Closed Schools. The New York Times (11/13, Hurdle, Subscription Publication, 9.61M) reports that Philadelphia's "financially troubled school district" is looking for buyers for about two dozen school buildings closed this summer. The school district is hoping that the properties "could be adapted and reused by buyers, who could provide the district with desperately needed cash."

BIDEN CALLS ON FAITH LEADERS TO PUSH IMMIGRATION REFORM. Politico (11/13, Epstein, 467K) reports that Vice President Biden, speaking on a conference call of Catholic clergy and "other faith leaders," said "it will be incumbent upon immigration reformers to be louder and more engaged with Congress than reform opponents" or else it will die as gun control did. Biden said, "Work the districts so these members understand how all their constituents feel, not just the loudest ones. This kind of reminds me of the gun control kind of fights we had, and gun safety. You know, the people who don't want anything changed to have a more rational position, they're the ones who show up in large numbers. The ones who strongly support us, they don't show up. You guys have to show up."

Pro-Immigration Reform Coalition May Be Fragmenting. The Wall Street Journal (11/13, Meckler, Peterson, Subscription Publication, 5.91M) reports that with the chances of immigration reform passing the House apparently waning, backers are adopting new tactics. For example, the AFL-CIO and SEIU are up on the air with harsh ads targeting Republicans, while some farm groups are seeking a smaller bill tailored to meet their limited needs. The Journal says that the net result is that the coalition of groups backing comprehensive reform is fracturing a bit, with component groups looking out more for their own interests.

Activists Begin Hunger Strike. The Washington Times (11/13, Dinan, 417K) reports that protests and arrests for civil disobedience haven't been enough to push immigration reform over the top, so "activists announced Tuesday they are beginning a hunger fast to try to pressure Congress to pass a bill legalizing illegal immigrants." The activists, including Rev. Jim Wallis of Sojourners, have "set up a prayer tent on the National Mall where they will be conducting their vigil and fast."

Editorial Wrap-Up:

NEW YORK TIMES. "When The Police Enter A Home." The New York Times (11/13, Subscription Publication, 9.61M) editorializes about a case to be argued today before the Supreme Court, in which Los Angeles police arrested a robbery suspect at his home, then returned an hour later and asked the suspect's girlfriend if they could enter without a warrant. The Times argues that a "tenant's right to object to a warrantless search should not depend on whether he can permanently stand guard at his front door," and if police "have probable cause to make an arrest, they will almost surely have the basis for a warrant as well." The Times notes that the court has said in the past that the home "has long enjoyed 'special protection as the center of the private lives of our people.'" The Times urges the court to "reaffirm that principle and require police who wish to search a home to get a warrant, even if the only person standing in their way is in a holding cell."

"Agony In The Philippines." A New York Times (11/13, Subscription Publication, 9.61M) editorial praises the international relief effort but adds that "delivering relief supplies to victims has been severely hampered by impassable roads, a collapsed infrastructure and, reportedly, a shortage of aircraft capable of landing on a short runway." Noting that this typhoon "will not be the last," the Times calls on Philippine officials to "re-examine early warning systems and evacuation procedures," and adds that in the near term, "faster evacuation may be the only way to save more lives in this kind of calamity."

"A Living Wage In Bangladesh." The New York Times (11/13, Subscription Publication, 9.61M) editorializes that Bangladesh can afford to pay its clothing factory workers more, and that raising the minimum wage and indexing it to inflation would improve the lives of workers and reduce the threat of strikes and protests. Factory owners insist that they cannot afford the raise, yet Bangladesh exported \$19 billion in clothes last year, a more

than 50% increase from two years ago. A government-appointed board recommended that the minimum wage be increased to about \$68 per month, causing workers to take to the street demanding at least \$100 a month.

"Fairness For College Athletes." The New York Times (11/13, A30, Subscription Publication, 9.61M) editorializes that a Federal district judge's certification of a class-action lawsuit against the National Collegiate Athletic Association implies that "the amateur model in college sports is in serious trouble." Twenty-five current and former student athletes are challenging the NCAA's ability to sell player names and images while the student athletes themselves receive no compensation. However, one possible outcome is that female players in "less popular sports" would receive less compensation than higher-profile men's basketball and football, thereby violating Title IX. The NCAA plans to contest the lawsuit, but it could settle with the plaintiffs in a way that ensures Title IX compliance.

WASHINGTON POST. "Leaving Comrades Behind." An editorial in the Washington Post (11/13, 4.28M) says it is "incomprehensible that the State Department is dragging its feet" on providing US visas for the Afghan interpreters on whom "U.S. troops have relied heavily" during the last decade in Afghanistan. According to the Post, the process by which the visas are approved "flawed," because it "puts the burden of proof on the applicants and fails to take into consideration the threats they will face in the future, after the pullout." The Post calls on Secretary of State Kerry to "step in and order the situation fixed immediately for Afghan interpreters who can demonstrate faithful service to the United States."

"Decision Time In Kiev." The Washington Post (11/13, 4.28M) editorializes that the Ukraine is a "turning point," in that a free trade and political association agreement with the European Union is nearly complete, but one of the pre-conditions – the imprisonment of former prime minister Yulia Tymoshenko, a rival to current prime minister Viktor Yanukovich – threatens to derail the planned signing of the agreement at the end of this month. Other EU leaders and the US have lobbied for Tymoshenko's release. Russia, which seeks to keep the Ukraine in its sphere of influence, has threatened "a trade war or a cutoff of energy supplies" if the EU deal proceeds. Yanukovich, for whom the deal is a "key objective," is a "former client of Putin" who is wavering on Tymoshenko's release.

"Cleared For Takeoff." In an editorial the Washington Post (11/12, 4.28M) is generally supportive of the settlement of the Justice Department's challenge to the merger of American Airlines and US Airways, arguing that "passengers will have a few more names to choose from in some of the nation's largest airports," which "could well be a better result than taking the matter to trial would have yielded."

WALL STREET JOURNAL. "Small Business And Obamacare." An editorial in the Wall Street Journal (11/13, Subscription Publication, 5.91M) says that small businesses do not believe the President's claim that the ACA helps small business. The Journal cites a Public Opinion Strategies survey of business owners with between 40 and 500 employees which it says demonstrates the level of concern businesses feel about the law's costs. The Journal notes that some of those concerns might be alleviated by passing a proposal to change the ACA's definition of full-time job to 40 from 30 hours a week, and adds that a better solution would be to repeal the ACA in favor of a more business- and worker-friendly measure.

"Holder's Antitrust Bust." In an editorial, the Wall Street Journal (11/13, Subscription Publication, 5.91M) dismisses the Justice Department's challenge to the merger of American Airlines and US Airways as arbitrary, and argues that the department abandoned it rather than face defeat in court.

"Asbestos House Cleanup." The Wall Street Journal (11/13, Subscription Publication, 5.91M) editorializes that the House of Representatives' attempts to combat asbestos trust claim fraud are overdue, but welcome. The bill would require trusts to publicly disclose the names and payouts of claimants with bankruptcy courts, with the hope of ending multiple claims against separate trusts for the same underlying conditions.

Speaker: DEA Associate Deputy Administrator Alan Santos, Office of Diversion Control; DEA lab and chemical experts; and Special Agents. Location: DEA Headquarters- 700 Army Navy Drive, Arlington, VA 22202. (Corner of Army Navy Drive and Hayes St., across the street from Macys, near Pentagon City Metro)

NASA – BOLDEN – COMMERCIAL CARGO BRIEFING — 11:30 a.m. NASA Administrator Charles Bolden will discuss the success of the agency's Commercial Orbital Transportation Services (COTS) initiative during a televised news briefing. Charles Bolden, NASA Administrator; Alan Lindenmoyer, Manager of Commercial Crew and Cargo Program, NASA; Gwynne Shotwell, President, SpaceX; Frank Culbertson, Executive Vice President and General Manager, Orbital Sciences Advanced Programs Group; Frank Slazer, Vice President of Space Systems, Aerospace Industries Association; Phil McAlister, Director of Commercial Spaceflight Development, NASA. Contacts: David Weaver david.s.weaver@nasa.gov (202-358-1600/)

HAGEL – KAZAKHSTAN — 2:15 p.m. Secretary of Defense Chuck Hagel hosts an honor cordon to welcome Kazakhstan's Minister of Defense Adilbek Dzhaksybekov to the Pentagon.

Last Laughs:

LATE NIGHT POLITICAL HUMOR.

Jay Leno: "Yesterday, President Obama honored our oldest living veteran, a man named Richard Overton, 107 years old. And I thought this was nice. Today, President Obama told him he can finally come home from Afghanistan."

Jay Leno: "According to the International Energy Agency, by the year 2015, the United States will overtake Saudi Arabia as the world's biggest oil producer. Now you know what that means? Instead of getting screwed by foreign oil companies, we can get screwed by American oil companies."

Jay Leno: "A lot of good political gossip going around. It seems that during his re-election campaign this year, New Jersey Governor Chris Christie paid \$46,000 to get advice from a former strategist for Mitt Romney. In fact, the advice he got – 'If you ever want to be President of the United States, don't listen to us.'"

Jay Leno: "Well, according to a new poll, 26% of Americans would buy marijuana if it was legal in their state. The other 74% will continue to buy it illegally."

David Letterman: "Didn't it seem like we just had an election? The election between Mitt Romney and Barack Obama? And didn't it seem like that election lasted about six years? They're already now talking about 2016. They're talking about three years from now, 2016. Listen to this. Democrats, 66% of Democrats say they'd prefer Hillary Clinton; 34% of Democrats say they'd prefer Joe Biden in a pants suit."

Conan O'Brien: "Obamacare website still having problems. Many scam artists are trying to take advantage of the problems with the Obamacare website. Experts say you can tell it's a scam site if it quickly and efficiently signs you up for healthcare. Then you know."

Conan O'Brien: "Former President Bill Clinton is calling on President Obama to honor the same healthcare policy. Clinton added, 'Unless a younger, hotter insurance policy comes along.'"

Jimmy Fallon: "Very interesting fact about the President. It just came out that President Obama brings a portable security tent with him on overseas trips so he can read classified documents in his hotel room. He sets

up a tent in his hotel room. Obama says it's a good way to avoid being spied on while he keeps track of who he's spied on. ... That's right. Obama has indoor portable security tent while Biden keeps it simple and just builds himself a pillow fort."

Jon Stewart: "Exciting news in the world of foreign diplomacy. There are signals that the US could be close to an agreement with Iran over nuclear capability. Just in the nick of time. That is wonderful news because Iran is just a week away from developing a nuclear weapon. They have been for the past 20 years – says people who would like to bomb Iran."

DOI in the News:

INTERIOR ANNOUNCES \$8.7 MILLION IN FEDERAL FUNDING FOR PROJECTS IN NEVADA. The AP (11/19) reports that the Interior Department on Monday announced that it is committing \$8.7 million for various projects in Nevada. The funds come from "the sale of public lands in southern Nevada's Las Vegas Valley." The article notes that "the latest round of funds include \$1.6 million for hazardous fuels reduction and wildfire prevention; \$1.3 million for parks, trails and natural areas; and \$1.6 million for conservation initiatives."

Also covering the story are the [Reno \(NV\) Gazette-Journal](#) (11/18, 165K), the [Franklin \(IN\) Daily Journal](#) (11/19, 51K), [KRVN-TV](#) Reno, NV (11/19, 2K), [XETV-TV](#) San Diego (11/19, 836), and [KTVN-TV](#) Reno, NV (11/19, 1K).

SECRETARY JEWELL TO DELIVER KEYNOTE SPEECH FOR GETTYSBURG EVENT. The [Washington Post](#) (11/18, Press, 4.28M) reports that “thousands of people are heading to a small town in southern Pennsylvania Tuesday to commemorate” the 150th anniversary of President Abraham Lincoln’s Gettysburg Address. Interior Secretary Sally Jewell and James McPherson, a leading Civil War scholar, are the keynote speakers for the event and Pennsylvania Gov. Tom Corbett will also deliver remarks.

President Obama’s Decision To Skip Gettysburg Event Draws Criticism. [CNN](#) (11/18, Killough, 14.53M) reports that President Obama’s decision on to participate in activities celebrating the 150th anniversary of the Gettysburg Address has drawn criticism. According to the article, “in his place, the White House is sending little known” Jewell, “who started her Cabinet position just this year.”

Planting Of Trees Part Of Effort To Restore Gettysburg Battlefield. The [Washington Post](#) (11/19, Higgins, 4.28M) reports on an event to mark the planting of a baby apple tree at the Bliss Orchard. For Randy Krichten, an NPS landscape technician, “the reclamation of the Bliss Orchard caps an effort to replant 3,263 fruit trees in a total of 39 orchards on 112 acres of the park since 2005.” The “endeavor, in turn, is part of a broader, 14-year plan by the Park Service, Pennsylvania state agencies and nonprofit allies to peel back decades of accumulated natural and man-made clutter to evoke a terrain much closer to the one awaiting the 163,000 Union and Confederate combatants who faced off here in the first three days of July, 1863.”

Additional Coverage. Also covering the event are the [Washington Post](#) (11/19, Press, 4.28M), the [Denver Post](#) (11/19, Rourke, Press, 949K), the [National Journal](#) (11/19, Subscription Publication, 427K), [FOX News](#) (11/18, 6.72M), the [Pittsburgh Post-Gazette](#) (11/19, 725K), the [Reading \(PA\) Eagle](#) (11/19, 154K), the [Gettysburg \(PA\) Times](#) (11/19, 26K), the [Bluefield \(WV\) Daily Telegraph](#) (11/19, 55K), the [Denver Post](#) (11/19, Lester, 949K), the [Baltimore Sun](#) (11/19, Stoneback, Call, 812K), the [Hagerstown \(MD\) Herald-Mail Media](#) (11/19), the [Bellingham \(WA\) Herald](#) (11/18, 95K), the [Deseret \(UT\) News](#) (11/19, 274K), the [Examiner](#) (11/19, 1.16M), the [Associations Now](#) (11/19), [WDIV-TV](#) Detroit (11/19, 178K), and [WDSU-TV](#) New Orleans (11/19, 74K).

OBAMA ADMINISTRATION LAUNCHES INTERAGENCY EFFORT TO TACKLE FUTURE DROUGHTS. The [E&E Daily](#) (11/8) reports that in an effort to tackle future droughts that may come about with climate change, the Obama Administration on Friday announced “a new interagency effort to help communities more easily access federal resources” when facing dry spells. The National Drought Resilience Partnership, will be led by the Department of Agriculture and the National Oceanic and Atmospheric Administration, and “aims to provide better coordination among federal agencies involved in drought response while emphasizing on a more proactive approach to drought management.” Other participants include the Interior Department, EPA, the assistant secretary of the Army for civil works, the Department of Energy and the Federal Emergency Management Agency.

SENATE PANEL TO REVIEW PUBLIC LANDS BILLS. The [E&E Daily](#) (11/8) reports, A Senate Energy and Natural Resources panel on Wednesday afternoon will “take up nearly a dozen public lands bills, including measures to promote a copper mine, designate a large conservation area in Northern California and reduce the risk of wildfire on federal lands.” according to the article, “perhaps the most controversial bill the Subcommittee on Public Lands, Forests and Mining will tackle is S. 339, by Arizona’s Republican Sens. John McCain and Jeff Flake, to authorize a land swap in their home state.” The panel will also discuss S. 483, which would designate a 350,000-acre national conservation area in the Berryessa Snow Mountain region of Northern California. In addition, the committee will discuss S. 1479, which “seeks to expedite the removal of hazardous fuels from federal lands by accelerating grazing and timber projects.”

HOUSE PANEL TO PROBE WITHHELD SECURE RURAL SCHOOLS PAYMENTS. The [E&E Daily](#) (11/8) reports, The House Natural Resources Committee has invited Obama administration officials testify Wednesday on their decision to retroactively sequester millions of dollars in Secure Rural Schools payments, “but it was unclear as of late Friday whether either of the two invited administration witnesses plans to attend.” According to the article, “the committee last Wednesday sent formal invitations to Agriculture Secretary Tom Vilsack and Office of Management and Budget Director Sylvia Mathews Burwell asking them to testify on the administration’s decision to sequester SRS funds, in addition to a committee subpoena issued in early September seeking

documents associated with that decision." A committee spokesman did not say what would happen if the administration declines to send a witness.

STUDY SAYS CENTRAL IDAHO DESIGNATION WOULD SPUR "MODEST" ECONOMIC GROWTH. The E&E Daily (11/8) reports that "designating 570,000 acres of rugged central Idaho mountains as a national monument could create scores of new jobs and spur up to \$12.3 million in local economic activity," according to a new study commissioned by the Idaho Outdoor Business Council. The council "assessed the economic impacts of designating the Boulder-White Clouds National Monument, a proposal backed by IOBC along with the Idaho Conservation League, the Wilderness Society and the Outdoor Alliance." According to the report, such a designation would have a "modest but positive" economic impact on the surrounding counties of Blaine, Butte, Custer and Camas. The study said that "visitor spending would increase 10 to 33 percent, which in turn would create 47 to 155 jobs and increase the region's total economic output \$3.7 million to \$12.3 million annually."

However, in an op-ed for the Albuquerque (NM) Journal (11/19, 288K), Randy T Simmons, Director of the Institute for Political Economy and Professor of Political Economy at Utah State University, and Ryan M. Yonk, Assistant Professor of Political Science at Southern Utah University and Director of the Institute of Policy Analysis, write that monument designation "can bring distinct negative impacts." They note that "economic studies are providing justification for designating monuments," but claim that they "attempted to replicate these types of studies and failed." That is, Simmons and Yonk write, "using a careful methodology and making comparisons between counties through time, we find at best no effect on local economies and, more likely, negative effects of monument designations."

DARTMOUTH, TAUNTON PROJECTS RECEIVE HURRICANE SANDY RELIEF FUNDING. The New Bedford (MA) Standard-Times (11/18, 54K) reports that "Round Hill in Dartmouth is one of two SouthCoast areas receiving Hurricane Sandy relief funding" from the Interior Department. Round Hill will "receive more than \$2.2 million to help restore 11.6 acres of salt marsh that have been lost for nearly 100 years due to filling." Also, Mill River in Taunton will receive \$650,00 to remove "two aging mill dams to open up 30 miles of habitat for American eel and river herring."

SECRETARY JEWELL ANNOUNCES NEW APPOINTMENTS TO BLM'S NORTHWEST COLORADO RESOURCE ADVISORY COUNCIL. The Glenwood Springs (CO) Post Independent (11/19, 27K) reports that Interior Secretary Sally Jewell on Monday announced the 2013 appointments to the citizen-based Northwest Resource Advisory Council. Jewell named five new appointments to the Northwest RAC.

NEVADA COUNCIL DEBATES NEXT MOVE REGARDING SAGE GROUSE. The San Francisco Chronicle (11/19, Chereb, 2.88M) reports that "a Nevada council hoping to prevent the listing of sage grouse as a protected species debated its next moves Monday just weeks after federal agencies identified preferred alternatives to protect the bird found in 11 states across the West." Some members of the Sagebrush Ecosystem Council and others said the alternative preferred by the BLM and US Forest Service "in a draft environmental impact statement released Nov. 1 is not much different than what the state proposed last year." However, "there are differences, and members of the nine-member council grappled with whether the state effort should tack more in concert with the federal agencies or stand in contrast to provide more options as a final national course of action is composed."

Also reporting on the story are the Columbus (IN) Republic (11/19, 80K) and KOLO-TV Reno, NV (11/19, 22K).

BLM To Hold Public Meetings On Sage Grouse In Oregon Next Year. The Bend (OR) Bulletin (11/19, 94K) reports that the BLM "plans to hold public meetings on sage grouse early next year in Central and Eastern Oregon." Meanwhile, the BLM is "set late this week to release proposed land use plan amendments pertaining to the bird in Oregon."

ADDITIONAL COVERAGE OF GRAND CANYON FLOODING. Additional coverage of the "high-flow experimental release" from Glen Canyon Dam was provided by the National Geographic (11/18, 40.49M).

ADDITIONAL COVERAGE OF APPROVAL OF GATEWAY WEST TRANSMISSION LINE PROJECT. Additional coverage of the approval of the Gateway West Transmission Line project was provided by the International Business Times (11/19, 237K).

SECRETARY JEWELL PRAISED FOR BALANCING CONSERVATION WITH DEVELOPMENT. In her column for the *Tennessean* (11/19, Hancock, 417K), Gina Hancock praises Interior Secretary Sally Jewell's announcement of an order that will help balance economic development with the protection of natural resources. According to Hancock, "the secretarial order strikes a balance between needed development and protecting the resources and natural wonders that sustain us." Also, "the order calls for ensuring consistency and efficiency in the review and permitting of infrastructure development projects so that the process is fair and predictable."

WTIMES: OBAMA DESERVES NO CREDIT FOR ENERGY BOOM. In an editorial, the *Washington Times* (11/19, 417K) writes that the US "is on track to surpass Russia and Saudi Arabia to become the No. 1 oil and gas producer by 2015. By 2035, the nation will come close to self-sufficiency." President Obama, however, "deserves no thanks for this" as "he has only been interested in promoting the unaffordable technologies of yesteryear, such as windmills and solar panels."

America's Great Outdoors:

National Park Service:

HOUSE PANEL EYES BILLS TO REIMBURSE STATES FOR SHUTDOWN COSTS, GIVE MORE MANAGEMENT ROLE. The *E&E Daily* (11/8) reports that a House bill authorizing reimbursement for states that reopened national parks during the government shutdown will "take its first step toward the floor Thursday, when a Natural Resources subpanel holds a hearing on several bills aimed at giving states a larger role in public lands." The Subcommittee on Public Lands and Environmental Regulation will take up H.R. 3286, "which directs the Treasury secretary to reimburse states for operating a national park during last month's 16-day shutdown and any others that occur this fiscal year." Also, H.R. 3311, the "Providing Access and Retain Continuity Act," will be discussed, which "makes reimbursements to states automatic if they take over park operation during a shutdown."

Poll Finds More Blame Congress Than Obama For Park Closures During Shutdown. In its "It's All Politics" blog, *NPR* (11/19, Berkes, 465K) reports that "the political fallout, if any," of the government shutdown's impact on national parks "may harm congressional Republicans more than President Obama." A national poll released Monday found that "60 percent of the 1,000 registered voters surveyed blamed the closure of national parks on Congress' failure to agree on a budget." About "30 percent believed that the Obama administration closed parks to make the government shutdown as painful as possible," and "90 percent agreed that closing park areas was a problem."

NPS: Blue Ridge Parkway Traffic Didn't Slow Down During Shutdown. The *Roanoke (VA) Times* (11/19, 259K) reports that "traffic on the Blue Ridge Parkway increased slightly in October from the same time a year ago, despite the 16-day federal shutdown that closed many sights along the scenic drive." However, "the parkway's lodges and campgrounds lost much business during the closure." The NPS "estimates that about 1.66 million visitors traveled the parkway in October, a nearly 2 percent increase over the same month in 2012, when 1.63 million people visited."

NPS HIRES NEW INTERMOUNTAIN REGIONAL DIRECTOR. The *E&E Daily* (11/8) reports that the NPS has announced it has hired Sue Masica as the agency's Intermountain regional director. NPS Director Jon Jarvis said in a statement, "Sue has an incredible track record of tackling tough issues and finding innovative solutions. Results-oriented and goal-driven, Sue manages by inclusion, building a collaborative work ethic among employees and with partners." Masica said, "I'm looking forward to working with communities and National Park Service staff on issues that are very different from those in Alaska, like Colorado River water, and others that are similar, such as partnering on close-to-home recreational opportunities."

Also reporting on the story are the *Denver Post* (11/19, Pankratz, 949K), the *Denver Business Journal* (11/18, Subscription Publication, 71K), and *KCSG-TV* St. George, UT (11/19, 43).

PLANNING COMMISSION COULD ALLOW TALLER BUILDINGS IN DC. *Roll Call* (11/19, Subscription Publication, 87K) reports that "after hearing from city officials who worry that century-old caps established by

Congress under the 1910 Height of Buildings Act are constraining D.C.'s need for new housing and office space, the National Capital Planning Commission on Sunday recommended a process that would allow minor changes to the law." Under the NCPCC's latest proposal, "the city could write up detailed plans for areas where it wants to see buildings taller than the federal limit — generally 130 feet or 90 feet — to be included as an amendment to its next five-year Comprehensive Plan." According to the article, "if taller growth is approved, the specifics would be in the hands of the city's five-member zoning board, which consists of three mayoral appointees, a representative from the Architect of the Capitol and a representative of the director of the National Park Service."

NPS SHARPSHOOTERS TAKE AIM AT CATOCTIN MOUNTAIN PARK DEER IN HERD REDUCTION PLAN.

The Washington Post (11/19, Press, 4.28M) reports that NPS sharpshooters are targeting white-tailed deer in Catoctin Mountain Park. The hunt that is scheduled to start Monday "marks the fifth round of a herd-reduction program that park managers say has eliminated 812 deer since 2010." According to park managers 3,600 pounds of venison were donated to food banks last year.

PRESCRIBED BURN AT GRAND CANYON EXPECTED TO PRODUCE RESIDUAL SMOKE FOR SEVERAL DAYS.

The Washington Post (11/18, Press, 4.28M) reports that officials at Grand Canyon National Park say "a prescribed fire on the North Rim is expected to produce residual smoke for several days or weeks." The NPS and the US Forest Service are "teaming up for the burn, which starts Monday and will last through Wednesday as long as conditions remain favorable."

CAVERS DISCOVER LARGEST NEW CAVE IN CARLSBAD CAVERNS NATIONAL PARK IN 25 YEARS. The Carlsbad Current-Argus (11/19, Smith, Current-argus, 949K) reports that two cavers discovered a new cave room inside Carlsbad Caverns National Park on Halloween night. According to the article, "dubbed 'Halloween Hall,' the fresh find marks the biggest discovery for the Caverns in more than 25 years."

Also reporting on the story is the Minneapolis Star Tribune (11/19, Press, 1.14M).

CUMBERLAND ISLAND SUPERINTENDENT RETIRING. The Columbus (IN) Republic (11/19, 80K) reports that the NPS said Monday that Fred Boyles will leave his job as superintendent of Cumberland Island National Seashore at the end of November. Boyles has been with the NPS for 33 years.

Bureau of Land Management:

BOY SCOUTS HELP TO CLEAN UP VANDALIZED MOONSHINE ARCH. KSL-TV Salt Lake City (11/19, 242K) reports that when Brent Taylor, scoutmaster for Troop 544, found out Moonshine Arch had been vandalized, he "knew his Scouts could clean it up." Jason West, outdoor recreation planner for the BLM's field office in Vernal, said, "He came and talked to us ahead of time, met with our archaeologist and found out a way to do it right." After camping out Friday a few hundred feet from Moonshine Arch, Taylor and his Scouts "spent Saturday morning cleaning away the graffiti with the scrub brushes and soapy water recommended by the BLM."

Fish and Wildlife Service:

EFFORT TO SAVE SPEARFISH HATCHERY WILL CONTINUE. The San Francisco Chronicle (11/19, 2.88M) reports that "South Dakota officials have succeeded in keeping the D.C. Booth Historic National Fish Hatchery and Archives in Spearfish open this year but that the battle will continue." April Gregory, executive director of the nonprofit Booth Society, said "the group looks forward to working with regional Fish and Wildlife Service officials 'to come up with realistic, creative solutions to keeping the hatchery open under the continued operation of the service.'" She said, "As a friends group whose main purpose is to support the service, we would not want to see them leave such a wonderful, vibrant facility with such well-established partnerships and support."

Also reporting on the story is the Sioux Falls (SD) Argus Leader (11/19, 116K).

REPORT SAYS FORSYTHE REFUGE GENERATED \$6 MILLION FOR AREA ECONOMY. The Shore (NJ) News Today (11/19) reports that the Edwin B. Forsythe National Wildlife Refuge "generated nearly \$6 million for the counties of Atlantic, Burlington and Ocean in fiscal year 2011, according to a new economic analysis." The refuge "returned more than \$8.3 million in total economic effects, which is the total recreational expenditures plus

net economic value." The figures come from the FWS study, "Banking on Nature."

FWS SEEKING PUBLIC COMMENTS ON PLAN TO OPEN NEW AREA OF RED ROCK LAKES WILDLIFE REFUGE. The Montana Standard (11/19, 41K) reports that the FWS is seeking public input as "part of a plan to open additional parts of the remote Red Rock Lakes Wildlife Refuge to the public." According to refuge manager Bill West, the service "bought 1,490 acres east of the refuge last summer," but "before the area can be opened, West said, there has to be a public comment period and planning process."

Also reporting on the story is the Twin Falls (ID) Times-News (11/19, 56K).

FWS TO HOLD HEARINGS ON GRAY WOLVES. The Ruidoso (NM) News (11/19, 39K) reports that the FWS will begin public hearings this week on "whether Mexican gray wolves can be released directly into New Mexico's Gila National Forest." According to the article, "the proposed rule change would require capture of wolves that rove beyond the borders of Interstates 10 and 40." Also reporting on the story are the Albuquerque (NM) Journal (11/19, 288K) and the Alamogordo (NM) Daily News (11/19, 19K).

In addition, KCSG-TV St. George, UT (11/19, 43) reports that the FWS will "host a public hearing on two proposed rules—one to list the Mexican wolf as an endangered subspecies and delist the gray wolf elsewhere, and the other to improve recovery efforts for the Mexican wolf in the Southwest —tomorrow evening in Denver."

ENDANGERED CRAYFISH AFFECTS CONSTRUCTION PROJECT ON CONCORD ROAD. The Tennessean (11/18, 417K) reports that the Nashville crayfish, which was listed as endangered by the FWS in 1986, will "force changes to construction schedules for work on two bridges that go over Mill and Owl creeks as part of an effort to widen Concord Road." According to the article, "though the widening project won't be delayed due to the state's only federally endangered crayfish, construction crews will have to change the order in which they work on some tasks on those bridges to allow the crayfish time to hatch and rear their young as part of their annual reproductive cycle, which lasts from October until the end of May." Dennis Crumby, a biologist with the Tennessee Department of Transportation, said, "And really, it's no big deal because this is a two-year job. It hasn't caused a delay, just a reshuffling in the contractor's schedule. Instead of working on the culverts, which we typically do in the late summer and fall — the low water season — we'll just come back to those locations in June."

ADDITIONAL COVERAGE OF LAST WEEK'S DESTRUCTION OF SIX TONS OF IVORY. Additional coverage of last week's destruction of six tons of ivory was provided by the Associations Now (11/19).

US Geological Survey:

STUDY DETAILS GLOBAL FOREST LOSSES, GAINS. The Hispanic Business (11/18, 110K) reports that a new study published in *Science* used the Landsat 7 satellite to describe changes in the world's forests from the beginning of this century. Led by Matthew C. Hansen of the University of Maryland and assisted by USGS co-author Thomas R. Loveland, a team of scientists analyzed satellite data to map changes in forests from 2000 to 2012 around the world at local to global scales.

The Geo Community (11/18) reports that Anne Castle, Assistant Secretary of the Interior for Water and Science, said, "Tracking changes in the world's forests is critical because forests have direct impacts on local and national economies, on climate and local weather, and on wildlife and clean water. This fresh view of recent changes in the world's forests is thorough, objective, visually compelling, and vitally important."

USGS TO RELEASE STUDY ON GROUNDWATER ISSUES IN SAN JOAQUIN VALLEY. The Modesto (CA) Bee (11/18, 208K) reports that "concern about sinking groundwater levels" in the Northern San Joaquin Valley is "getting lots of attention this week." According to the article, Oakdale Irigation District staff members will "make a presentation today about the issue, and researchers from the U.S. Geological Survey will release a new report Thursday about problems caused by overdrafting." The USGS will "release a study on how extensive groundwater pumping from San Joaquin Valley aquifers is increasing the rate at which the ground is sinking."

Securing America's Energy Future:

Renewable Energy:

DOCUMENTS SUGGEST PALEN SOLAR POWER PROJECT IS "A DONE DEAL." KCET-TV Los Angeles (11/19, 15K) reports that "documents posted to a state agency's website Monday indicate that that agency may not be taking public comment on large desert solar plants as seriously as the law requires, treating one project in particular as a done deal even before the environmental assessment process is complete." According to the article, the documents are "a transcript of proceedings held by the California Energy Commission (CEC) on a proposed 500 megawatt solar power tower project on 3,800 acres of public land in Riverside County." The article notes that the "original version of the Palen plant never won approval by the Department of the Interior, which owns the land the project would be built on," and the BLM's "parallel environmental assessment process is ongoing; the public comment period on the Palen project's Draft Supplemental Environmental Impact Statement (SEIS) just ended on November 14, and the BLM is now collating those comments to include in a Final SEIS."

Onshore Energy Development:

HOUSE TO VOTE ON MEASURES TO SPEED FOSSIL FUEL PERMITS, BLOCK BLM FRACKING RULE. The E&E Daily (11/8) reports that the House this week plans to take up measures to speed the development of oil and gas on public lands and to restrict the Interior Department's ability to establish rules governing hydraulic fracturing. The House is scheduled to take up Rep. Doug Lamborn's H.R. 1965, which "would establish strict deadlines on the approval of onshore oil and gas leasing and drilling permits." On Wednesday, the chamber plans to consider H.R. 2728, by Rep. Bill Flores, "which would preclude BLM from enforcing any federal rules or guidance for hydraulic fracturing in states that have any regulations or guidance for that activity."

Politico (11/18, Guillen, 467K) reports that the Interior Department "opposes the bill, and testified earlier this year that it speeds up energy development 'at the expense of sound public land management, public participation, and environmental review.'"

Also reporting on the story is the "E2 Wire" blog of The Hill (11/18, 194K).

AFP Praises House Measure To Give States Primary Role In Regulating Hydraulic Fracturing. The Hill (11/19, Hattem, 194K) reports in its "Regwatch" blog that Americans for Prosperity "is praising an effort in the House to limit the Obama administration's power to regulate 'fracking' on public lands." AFP manager of federal affairs, Christine Harbin Hanson, praised the measure in a letter to sponsor TX17 Rep. Bill Flores (R). Hanson said, "This legislation would assert states' authority to regulate hydraulic fracturing and protect the natural gas revolution that is improving Americans' access to affordable energy."

Colorado's Front Range Still Debating Fracking. The National Journal (11/19, Subscription Publication, 427K) reports that "the answer to the question—Is fracking safe?—is an open one when asked throughout Colorado's Front Range." However, "among top state officials and leaders of President Obama's administration, the answer appears to be an unequivocal yes." The article notes that Interior Secretary Sally Jewell, EPA Administrator Gina McCarthy, and Energy Secretary Ernest Moniz have "all indicated in recent months that fracking can be and is being done safely."

BILL TO PROTECT THE ARCTIC NATIONAL WILDLIFE REFUGE'S COASTAL PLAIN SUPPORTED. The Everett (WA) Herald (11/19, 152K) editorializes that "the best opportunity to make history in more than three decades is a bipartisan bill to protect the Arctic National Wildlife Refuge's coastal plain, the last remaining portion of the refuge not designated as wilderness." The ANWR Wilderness bill, introduced Wednesday, is co-sponsored by Washington Democratic Sen. Maria Cantwell and Illinois Republican Mark Kirk. Cantwell said, "The Arctic National Wildlife Refuge is a national treasure that must be preserved for future generations to experience and enjoy. We need to advance forward-looking solutions for America's energy future, while preserving this treasured public land and the unique ecosystem that depends on it."

Offshore Energy Development:

NEW RULES FOR ARCTIC DRILLING, OFFSHORE EMERGENCY EQUIPMENT WON'T BE READY BEFORE 2014. FuelFix (11/18, Dlouhy, 7K) reports that the Federal government will not propose "new rules for Arctic oil

development and offshore emergency equipment before the end of the year." Bureau of Safety and Environmental Enforcement director Brian Salerno said the proposal will not be ready until 2014, adding that the 16-day government shutdown is partially responsible for the delay. Salerno noted that the bureau is "finalizing language in the proposals now," stating, "I know the industry is waiting for them. They want that clarity. We are working as fast as we can to get them out and we want them to be good well-written rules that are clear as to what is expected."

Tackling America's Water Challenges:

BOR EMPLOYEE INJURED IN FIRE AT GRAND COULEE DAM . The AP (11/19) reports that the BOR says an employee has been injured in a fire at Grand Coulee Dam in Eastern Washington. The unidentified worker was taken to Harborview Medical Center in Seattle. Also, "a second employee was being treated locally for smoke inhalation." The BOR "says the fire started Monday in the John W. Keys III Pump Generating Plant."

Also reporting on the story are the Columbus (IN) Republic (11/19, 80K), NBC News (11/19, 6.79M), KHQ-TV Spokane, WA (11/19, 30K), KREM-TV Spokane, WA (11/19, 61K), and KREM-TV Spokane, WA (11/19, 61K).

NEW BUILDING BEING CONSTRUCTED TO STORE MELONES INDIAN ARTIFACTS. The Sonora (CA) Union And Democrat (11/19, 27K) reports that "a \$1.5 million building is being constructed at New Melones Reservoir to store American Indian artifacts found during the dam's construction in the 1960s and 70s." The BOR "broke ground on the project in September and is eyeing a completion date in mid-January," according to BOR spokesman Pete Lucero. Lucero said, "It's a storage facility where we will house the artifacts on behalf of the tribes who may have a stake in those pieces. What we'll most likely end up doing is bringing out some of the more interesting artifacts for public view at the Visitor Center."

AGREEMENT OPENS 3,700 ACRES TO PUBLIC IN PHILLIPS COUNTY. The Billings (MT) Gazette (11/19, 206K) reports that "about 3,700 acres of federal land near Wagner in Phillips County will be opened to the public thanks to a memorandum of understanding between" the BOR and the Montana Fish, Wildlife & Parks. the article notes that "the new 20-year agreement covers federal lands associated with Reclamation's Milk River Project."

ADDITIONAL COVERAGE OF BAY DELTA CONSERVATION PLAN. Additional coverage of the Bay Delta Conservation Plan was provided by the Central Valley (CA) Business Times (11/19, 206) and the East Bay Express (11/18, 151K).

Empowering Native American Communities:

BIA DISCUSSES BLACKFEET CRISIS. In an exclusive interview with the Great Falls (MT) Tribune (11/18, 90K), Assistant Secretary-Indian Affairs spokeswoman Nedra Darling "responded to a series of written questions" regarding the Blackfeet Tribal Business Council, and the BIA's role in "facilitating a resolution to the crisis." Darling said that the BIA has "viewed the use of 'suspensions' as an internal procedure the Blackfeet Tribal Business Council (BTBC) created themselves subject to their own interpretation on how it is used and administered," and that "the BTBC is within its own authority to create their own internal mechanisms to administer itself." Darling added that the BIA believes "the solutions must come from the Council itself," but that the bureau continues "to offer mediation services to help resolve the impasse."

NEW NIGC ACTING CHAIR INTERVIEWED. The Indian Country Today Media Network (11/18, 21K) interviewed Jonodev Osceola Chaudhuri, who was appointed by Interior Secretary Sally Jewell on September 4, 2013, to serve a three-year term as Associate Commissioner of the National Indian Gaming Commission (NIGC) and designated as Acting Chairman on October 28. Chaudhuri said his "primary goal is to continue the positive steps taken by the commission toward consultation and relationship building with tribes and tribal regulators." He noted that the NIGC has "an initiative that's been in place that [former] Chairwoman Tracie Stevens developed that I feel very comfortable continuing. It's called ACE—assistance, compliance and enforcement."

BLACKFEET TRIBE SUES BIA OVER 2011 FLOOD DAMAGE. The Great Falls (MT) Tribune (11/18, 90K) reports that "the Blackfeet tribe's housing agency is suing the US government for more than \$1.2 million over damage to homes that were flooded in 2011, with the tribe claiming the government was responsible for a clogged

drainage system." Blackfeet Housing Authority attorney Terryl Matt claims in the lawsuit that the BIA is "responsible for the storm drains in the area because they are located along portions of BIA routes." An attorney for the BIA "responded Friday by saying the town of Browning is responsible for the drainage system, the homes were built in a low-lying area, and the tribe was negligent by piling up snow instead of removing it."

LAX ENFORCEMENT OF REGULATIONS OF NATIVE AMERICAN "ARTIFACTS" AUCTIONS CRITICIZED.

For the "Goat" blog of the [High Country \(CO\) News](#) (11/19, 74K), Leslie Macmillan writes that the 1990 federal Native American Graves Protection and Repatriation Act (NAGPRA) "requires the return of all Native American remains found on federal lands to tribes that request them," but "enforcement of NAGPRA is lax." The BIA is "largely responsible for enforcing the law, but the agency's role is 'ambiguous and remains unsettled,' according to a Government Accountability Office report; and while the agency started tracking compliance in 1997, 'it has not yet been completed due to staff turnover and lack of resources.'"

Top National News:

OBAMA TELLS OFA ACTIVISTS ACA ENROLLEES MAY HAVE TO BYPASS HEALTHCARE.GOV. There is a marked decrease in the continuing coverage of the Affordable Care Act's implementation last night and this morning. For instance, none of the three networks devoted any segments to healthcare reform. Most print coverage, meanwhile, continues to reflect negatively on the Administration. The Washington Post (11/19, A1, Eilperin, Somashekhar, 4.28M), for example, is reporting on its front page this morning that top Administration officials, including Secretary Sebelius, were warned by consultants last spring that HealthCare.gov's rollout was likely to be complicated by some of the same problems that subsequently manifested themselves in the past six weeks. The Post (11/19, A1, Balz, Craighill, 4.28M) also has another front-page article spotlighting a new Washington Post-ABC News poll that found the President's approval rating is at "the lowest point of his presidency," 42%. Other news outlets point to the improving pace of HealthCare.gov enrollments compared to last month, though the New York Times (11/19, LaFraniere, Weisman, Subscription Publication, 9.61M) notes that despite the improvement, the total is "still a fraction of the number the administration once hoped for."

President Obama's conference call with Organizing For Action did not generate much coverage, although his advice to his supporters to remind those that they know that there are alternate routes to ACA enrollment – apart from HealthCare.gov – is being cast as further confirmation of the severity of the website's problems. The Los Angeles Times (11/19, Hennessey, 3.07M) describes the President as "sounding fatigued," while The Hill (11/19, Sink, 194K) says he was "noticeably subdued" while speaking to his most ardent backers Monday.

USA Today (11/19, Madhani, 5.82M) reports that during Monday's conference call, the President "again acknowledged problems with the glitch-plagued HealthCare.gov...but framed the battle for his troubled health care law as one he'll fight with his supporters." The President told approximately 200,000 supporters: "We're still going to have to make sure that we don't use the web site alone to sign people up. What I want to do is make sure that everybody on the phone call understands that we've always understood that we're going to have to enroll people by mail, we're going to have to enroll people over the phone, we're going to have to enroll people in person."

The AP (11/18, Lederman) says that in the conference call, the President was "seeking to tamp down expectations that the error-riddled HealthCare.gov website will ever be a panacea for the uninsured – even once it's fixed." The AP adds that "the heightened focus on more traditional, time-intensive methods for enrolling served as yet another reminder that the high-tech, streamlined insurance market Obama described as he pitched the law to the nation has not materialized." Reid Epstein, in a piece for Politico (11/19, Epstein, 467K), wrote that the President "spoke through a scratchy connection for about 14 minutes."

The Los Angeles Times (11/19, Hennessey, 3.07M) covers the President's conference call in an article titled, "Obama, Admitting Problems, Asks Backers To Rally For Healthcare Law." According to the Times, OFA "is set to launch an effort to seek out and enroll millions of uninsured Americans on the federal and state-run marketplaces." The Times says OFA's "campaign...includes both door-to-door work and efforts to encourage people to talk about insurance with their relatives over the holidays."

The Hill (11/19, Sink, 194K) reports that the President "conceded that the botched rollout 'created and fed a lot of this misinformation' about" the ACA, and "encouraged supporters to talk face-to-face with neighbors, friends, and

family members about the law." The Hill says the President sounded "noticeably subdued — an issue amplified by a scratchy phone connection that made it, at times, difficult to hear the president."

AFP (11/19) also reports that "in an ironic echo of the website glitches that have stalled the launch of Obamacare," some OFA activists invited to take part in the conference call "tweeted that they were unable to access the web feed at least to start with."

Commentators, meanwhile, predict in this morning's newspapers that the President's ACA problems are likely to continue to hurt his fellow Democrats. Marc Thiessen, in his column for the Washington Post (11/19, Thiessen, 4.28M), predicts that at the start of the next year, the President will face "a humanitarian disaster" as "millions of Americans could find themselves without the health coverage Obama promised they could keep." According to Thiessen, "the horror stories we are hearing today of people getting cancellation letters will be replaced by horror stories of cancer patients having their treatment disrupted and sick children being cut off from their doctors."

Gerald Seib, in a column for the Wall Street Journal (11/19, Seib, Subscription Publication, 5.91M), makes the case that it would have been easier for the Administration to implement a single-payer health insurance system than the ACA's hybrid of socialized medicine and the existing health insurance market.

Dana Milbank, in his column for the Washington Post (11/19, 4.28M), asserts that the President knew very well that when he told voters over and over again that "If you like your health insurance plan, you can keep it," he was not telling the truth.

The Wall Street Journal's (11/19, Stephens, Subscription Publication, 5.91M) Bret Stephens suggests that Chief Justice Roberts' vote to uphold the ACA last June may have the unexpected benefit of boosting the very same Republicans who condemned him at the time.

In an editorial, the New York Times (11/19, Subscription Publication, 9.61M) says, "unquestionably, the White House handed" Republicans a "gift through two kinds of incompetence: the technical failure of the health-exchange website, and the political failure of the president in falsely promising that no one would lose an insurance policy they already had."

Sebelius, Tavenner Were Warned About Site's Problems Last Spring. The Washington Post (11/19, A1, Eilperin, Somashekhar, 4.28M) reports on its front page that in "late March," McKinsey & Co. consultants "brought in...to independently assess how the federal online health-care enrollment system was developing" warned that the HealthCare.gov rollout scheduled for October 1 "was fraught with risks." The Post reports that it received the consultants' analysis from the House Energy and Commerce Committee and that it "foreshadowed many of the problems that have dogged HealthCare.gov since its rollout, including the fact that the call-in centers would not work properly if the online system was malfunctioning and that insufficient testing would make it difficult to fix problems after the launch." According to the Post, Administration officials who personally received the warnings last spring include HHS Secretary Sebelius, CMS Administrator Marilyn Tavenner, White House chief technology officer Todd Park, White House health policy adviser Jeanne Lambrew and former White House Deputy Chief of Staff Mark Childress. The New York Times (11/19, Shear, Subscription Publication, 9.61M), among other news outlets, also reports the story under the headline "Officials Were Warned About Health Site Woes."

Biden Appends "God Willing" To Reassurance That HealthCare.gov Will Be Fixed. Politico (11/19, Epstein, 467K) reports that in remarks to ACA supporters in Houston on Monday, Vice President Biden said, "The truth is, we're going to fix it," before adding, "God willing." In a piece for the Daily Caller (11/19, Munro, 422K) titled, "Joe Biden Hides From Obamacare Crisis," Neil Munro suggests that Biden is trying to distance himself from the ACA's problems as he prepares to once again campaign for the presidency in 2016. Munro notes that at a fundraiser for Sen. Kay Hagan last Friday, Biden completely avoided any mention of Affordable Care Act.

WPost-ABC Poll Finds Obama At "Lowest Point Of His Presidency." Under the front-page headline, "Obama's Ratings Tumble After Health Care Flaws," the Washington Post (11/19, A1, Balz, Craighill, 4.28M) reports that in the wake of the ACA's "flawed rollout," a new Washington Post-ABC News poll has found that President Obama is at "the lowest point of his presidency," a 42% approval rating, "with dwindling faith in his competence and in many of the personal attributes that have buoyed him in the past." The Post notes that "a record high" 57% now

oppose the ACA, and 46% "say they are strongly against it." The Post adds that, "by almost 2 to 1, Americans oppose the individual mandate, with more than half saying they strongly oppose it," and "seven in 10 Americans say the administration should delay the individual mandate."

Reuters/Ipsos Poll: Opposition To Obamacare Climbs To 59%. According to a Reuters/Ipsos poll released Monday, 59% now says the oppose the Affordable Care Act, which is up from 56% in a poll taken at the end of September. At the same time, support for the ACA is down to 41%, whereas it was at 44% in the earlier poll.

Gallup: Just 42% Believe Health Insurance Is Government's Responsibility. Politico (11/19, Delreal, 467K) reports that a Gallup poll released Monday found that "the majority of Americans," 56%, "say that guaranteeing access to health care isn't the responsibility of the federal government," while 42% "say it is the government's responsibility." The Daily Caller (11/19, Howley, 422K) notes that just seven years ago, Gallup found that "a whopping 69 percent of Americans believed that the government has a responsibility to provide health coverage."

Administration Mulling Allowing Enrollment Through Insurers. The Wall Street Journal (11/19, Radnofsky, Nelson, Subscription Publication, 5.91M) reports that Administration officials have also suggested that those seeking health insurance who qualify for Federal subsidies may be able to get coverage directly from an insurer, rather than via HealthCare.gov as is now the case. The Journal reports that when asked about that possibility on Monday, White House press secretary Jay Carney said, "We have to make sure that there are other means available for the American people, even as we make improvements to the website. ... It's something that we've talked about and are working on."

Pace Of HealthCare.gov Enrollments Has "Nearly Doubled" Since Last Month, But Still Low. Amid unrelenting negative coverage of the ACA rollout, some news reports this morning provide good news for the Administration. The New York Times (11/19, LaFraniere, Weisman, Subscription Publication, 9.61M), in an article titled, "Health Website Enrollment Is Close to Doubling Pace," reports that "the pace of enrollment in health plans through" HealthCare.gov "has nearly doubled since the end of October as software engineers have resolved some 200 of the more than 600 initial defects that had rendered the site all but unusable." According to the Times, "As of mid-November, the number of enrollees, which the Obama administration defines as people who have selected a marketplace plan, was more than 50,000 — up from 27,000 in the entire month of October." The Times cites "people familiar with the repair effort" as the source of its figures. The Times also notes that despite the improvement, the total is "still a fraction of the number the administration once hoped for."

Reuters reports that Henry Chao, deputy chief information officer at the Centers for Medicare and Medicaid Services, is set to testify that the Administration has "reconfigured various system components," which "has increased performance across the site."

However, Politico (11/19, Epstein, 467K) reported that on Monday, Jay Carney acknowledged that "there are going to be Americans who are going to need to get assistance either in person or over the phone to enroll." According to Carney, "Roughly 2-in-10 won't get through the system." The Washington Times (11/19, Boyer, 417K) covers Carney's remarks in an article titled, "White House: For Obamacare Website, 20 Percent Failure Rate Best We Can Do."

"Enrollment Is Surging" In Several States With Their Own Exchanges, Including California. The Los Angeles Times (11/19, Levey, 3.07M) reports that "enrollment is surging in many states as tens of thousands of consumers sign up for insurance plans made available by" the ACA, and "a number of states that use their own systems, including California, are on track to hit enrollment targets for 2014 because of a sharp increase in November. According to the Times, California, which accounted for a third of all enrollments nationally in October" with 31,000, "nearly doubled that in the first two weeks of this month." The Times goes on to report that Connecticut and Kentucky "are outpacing their enrollment estimates," and in Minnesota, "enrollment in the second half of October ran at triple the rate of the first half."

DeFazio: ACA Enrollment Deadline Will Have To Be Extended. Rep. Peter DeFazio (D-OR), who was one of 39 House Democrats who backed a Republican bill last Friday that would allow Americans to retain health policies that are being canceled as a result of the ACA, defended his vote on MSNBC's The Ed Show (11/19, 449K). DeFazio said, "My state has not gotten one person, not one, through the exchange." DeFazio added, "I think we'll have to extend the deadline because we can't say to people, 'well, you can't apply, you can't get

accepted, but you got a deadline and we've canceled your insurance." According to DeFazio, Rep. Fred Upton's bill "essentially...does what the President did by executive order," although "it's a little expanded from that."

Gibbs: HHS And CMS Officials Must Lose Their Jobs Over ACA Rollout Problems. The Hill (11/19, Sink, 194K) reported that on Monday, Jay Carney also "denied reports of a staff shake-up in the aftermath of the botched ObamaCare rollout." According to Carney, the White House is not "focused on...examining what went wrong behind the scenes and who was responsible." The Hill noted that Carney spoke after his predecessor, Robert Gibbs, in an NBC interview, said, "I think the only way to restore ultimate confidence in going forward is to make sure that whoever was in charge of this isn't in charge of the long-term health care plan."

Politico (11/19, Kopan, 467K) quoted Gibbs as saying, "I do not see how the administration goes forward implementing health care reform into next year with the same team at HHS and CMS that brought us this rollout. You simply cannot repair your credibility with the American people by having the same people captaining the ship."

Gibbs' comments were featured in the lead segment of Fox News' Special Report (11/18, 2.15M), in which Ed Henry reported on "speculation" that "there may...be a staff shake-up." According to Henry, on Monday, Carney "would not deny a possible shake-up, but suggested any changes the President makes would be after the website is fixed."

DEMOCRATS PONDER "NUCLEAR OPTION" AS GOP BLOCKS THIRD JUDICIAL NOMINEE. Senate Republicans on Monday blocked the nomination of US District Judge Robert Wilkins to serve on US Court of Appeals for the District of Columbia Circuit, marking the third nominee to the court to be blocked in recent weeks. Print reports note Democrats are once again considering the "nuclear option."

The New York Times (11/18, Peters, Subscription Publication, 9.61M) notes that the Republican opposition is not "driven by ideology or divisive social issues." Rather, they are trying to prevent the President "from filling any slots on the court, fearing that he will alter its conservative tilt." Democrats say Republicans are "exercising a nakedly political double standard for confirming presidential nominees."

McClatchy (11/19, Doyle, Douglas, 95K) reports that the GOP effort has left "one of the nation's top appellate courts shorthanded." The Senate action "leaves the appellate court with eight active judges and three empty seats." McClatchy adds that the "persistent filibuster" also "poisons the well for other judicial nominees, potentially for years to come," and is "prompting Senate Democrats, once again, to consider the so-called 'nuclear option' that would change Senate rules and ignite GOP rage."

The AP (11/19, Jackson) reports that the 53-38 vote to end the GOP filibuster was short of the 60 votes needed to advance the nomination. The AP adds that blocking the nomination is likely to "intensify partisan tensions in the Senate, where Democrats have grown frustrated by GOP efforts to stop Obama's nominees and talked about rewriting Senate rules to make it harder for the chamber's minority to block nominations."

The Huffington Post (11/19, Bendery, 11.54M) reports that Democrats have been warning for weeks "that they're prepared to invoke the 'nuclear option' and strip Republicans of their ability to block Obama's nominees if they keep filibustering." In the wake of Monday's vote, Democrats "have to decide if they have it in them to change institutional rules that both parties are typically reluctant to mess with." The Post adds that by "the sounds of it during Wilkins' vote, some Democrats are ready to go nuclear right now."

Politico (11/19, Everett, 467K) reports that Democratic "frustration has built steadily over the GOP's use of the filibuster to stifle Obama from filling out the court," and notes that the Republican tactic "essentially guarantees the Senate will soon endure another draining fight over changing the chamber's rules." Republicans claim that "they aren't trying to force a nuclear option fight — instead emphasizing they are making the same argument that Democrats made in 2005 when the GOP was in the majority: There just isn't enough work for this court."

The Los Angeles Times (11/19, Memoli, 3.07M) reports that Senate Majority Leader Reid, speaking before the vote, "slammed Republicans for rejecting another 'exceedingly capable nominee' for what he characterized as 'blatantly political reasons.'" Reid said, "Republicans have blocked these nominees solely to deny President Obama his constitutional right to appoint judges," and called it "a violation of an earlier bipartisan agreement to

only block nominations in 'extraordinary circumstances.'"

Abortion Rights Advocates Have Steered Clear Of "Nuclear Option" Debate. Roll Call (11/19, Lesniewski, Subscription Publication, 87K) reports that abortion rights advocate have largely avoided "public involvement in the latest round of ratcheting up of 'nuclear option' talk in the Senate." These face a dilemma because supporting the nuclear option now "for victories on issues like birth control now," will "increase the risk that a Republican president will be able to put hostile nominees on the bench in the future." Roll Call notes that while Planned Parenthood would not comment for the story, "some Senate supporters of changing the chamber's practice on judicial nominations have told CQ Roll Call they suspect that pro-choice groups are working behind the scenes against the effort."

SENATE PANEL TO VOTE ON YELLEN NOMINATION THURSDAY. The Wall Street Journal (11/19, McGrane, 5.91M) reports that the Senate Banking Committee announced Monday that it will vote Thursday on Janet Yellen's nomination to be Federal Reserve Chair. The Journal notes that the panel is expected to approve the nomination, and members from both parties expect her to be confirmed by the full Senate. Among other news outlets, Bloomberg News (11/18, Hopkins, 1.91M) also reports on Thursday's committee vote.

Editorial Wrap-Up:

NEW YORK TIMES. "A New G.O.P. Excuse For Doing Nothing." In an editorial, the New York Times (11/19, Subscription Publication, 9.61M) says, "unquestionably, the White House handed" Republicans a "gift through two kinds of incompetence: the technical failure of the health-exchange website, and the political failure of the president in falsely promising that no one would lose an insurance policy they already had."

"Cholesterol Guidelines Under Attack." An editorial in the New York Times (11/19, Subscription Publication, 9.61M) says cholesterol guidelines issued last week by the American College of Cardiology and the American Heart Association appear to "overestimate greatly the risk of heart attack or stroke that currently healthy individuals might face over the next decade," and as a result, "tens of millions of people could be prescribed cholesterol-lowering statin drugs that they don't really need." The Times argues that healthier patients "should probably wait until the heart organizations reassess their risk calculator, the possible flaws in it, and how best to fix them."

"Death Meted Out By Politicians In Robes." The New York Times (11/19, Board, Subscription Publication, 9.61M) editorializes that the death penalty "should have no legitimate mooring at all in modern American society, and it certainly should not be imposed by a judge who is worried about keeping his job."

WASHINGTON POST. "The U.S.-Israel Divide." The Washington Post (11/19, 4.28M) editorializes that the dispute between the United States and Israel over Iran would be more manageable if, instead of arguing in public, US and Israeli officials were working together to reach a consensus on acceptable terms for a final settlement with Iran. The conflict stems from the Iran deal that the Obama Administration hopes to achieve this week in order to reduce the chance of needing to use military force against Iran in the near future. Israeli leaders fear the proposed deal will leave Iran with a nuclear breakout capacity and a revived economy.

"Talked Out Of A Job." The Washington Post (11/19, 4.28M) editorializes that D.C. Mayor Vincent Gray's firing of insurance commissioner William White for a statement made about the Affordable Care Act "seems harsh" and may undermine the independence of insurance commissioners in the future. The article noted that White's statement—that permitting insurance companies to extend policies incompatible with the Act for another year to prevent cancellations undermines the exchanges created by the Act—is correct, and that his dismissal may reduce candor among public officials.

"A Dose Of Pragmatism." The Washington Post (11/19, 4.28M) editorializes that Ronald Reagan's "pragmatism" in de-escalating bellicose rhetoric against the Soviet Union during the "war scare" of 1983 is needed in today's "poisonous and bitterly contested" political climate. Newly-published documents show that Reagan reacted to intelligence that Soviet leaders "were growing paranoid about a possible attack" by recognizing and changing his own "flawed assumptions."

WALL STREET JOURNAL. "Obama's Trade Jeopardy." The Wall Street Journal (11/19, Subscription Publication, 5.91M) editorializes that President Obama is facing attacks on his request for Trade Promotion Authority from both liberal Democrats eager to promote a pro-union agenda and Tea Party Republicans who misconstrue the Constitution. Obama has declined to discuss the benefits of free trade in his public speeches, and he needs to work with Republicans in the House of Representatives in order to build a bipartisan coalition amenable to free trade.

"Rigging Antidiscrimination Law." In an editorial, the Wall Street Journal (11/19, Subscription Publication, 5.91M) argues that after a controversial New York housing discrimination case was pulled from the Supreme Court docket amid settlement talks, the court should seek another case in which disparate-impact analysis is used to allege housing bias.

"In Deng Xiaoping's Footsteps." In an editorial, the Wall Street Journal (11/19, Subscription Publication, 5.91M) lauds the reform outline produced by China's 18th Central Committee's Third Plenum, especially changes to capital markets and allowing companies to list shares freely. If this indicates that the state recognizes that markets are better at allocating resources than governments, the Journal says this could be a milestone for the country. However, the paper condemns tightened political repression and continued favored treatment of state-owned enterprises. The Journal concludes that these reforms will test if China can expand economic freedom without opening to political reform.

Last Laughs:

LATE NIGHT POLITICAL HUMOR.

Jay Leno: "I love this story. A right-wing Congressman from Texas – there's a shock – by the name of Louis Gomer, I think that's his name. He announced that there is a hidden provision in Obamacare that could create an armed secret security force. And he claims the White House masterminded this. You know, from what we've seen of the Obamacare rollout, do these people look like they could mastermind anything?"

Jay Leno: "And the state of California shut down ten fake Obamacare websites that were signing up thousands of people. You know, instead of shutting these people down, put them in charge of the real website. They're signing up thousands of people! Hire them. Don't put them in jail!"

Jay Leno: "Well, President Obama and his top aides met with insurance company CEOs at the White House on Friday. So we've got politicians meeting with insurance salesmen. You know, you throw in a couple used car dealers, you have the trifecta of professional lying right there."

Jimmy Fallon: "Get this, the US Postal Service just announced that it only lost \$5 billion this year as opposed to \$16 billion in 2012. Only lost \$5 billion. Even Blockbuster is like, 'You guys suck at running a business.'"

Jon Stewart: "But first, it's been a rough couple of weeks for Barack Obama, months really. His foreign allies are angry with him because we are spying on them. His domestic allies are angry at him because of incompetent healthcare rollout. He taped over his wedding video recently. He was trying to record a very special 'Two Broke Girls.' Hello, Mr. President, they are all special."

DOI in the News:

SECRETARY JEWELL DELIVERS SPEECH AT CEREMONY COMMEMORATING 150th ANNIVERSARY OF GETTYSBURG ADDRESS. The Washington Post (11/20, Press, 4.28M) reports that "thousands of people gathered" on Tuesday to honor the 150th anniversary of the Gettysburg Address. Interior Secretary Sally Jewell said "the Gettysburg battle stands at the vortex of American history and the Gettysburg Address at the vortex of national consciousness."

The Washington Post (11/19, Vogel, 4.28M) reports that Jewell said that Lincoln's words "tell us what it means to be American. They call us to unfinished work, not just to win a war, but to build a more perfect nation."

The Harrisburg (PA) Patriot-News (11/20, 339K) reports that Interior Secretary Sally Jewell's speech at the ceremonies marking the 150th anniversary of Lincoln's Gettysburg Address "won praise from the shivering crowd gathered Tuesday morning, not least because she kept it short." According to the article, "before delivering the speech, President Obama's official proxy to the ceremony announced that 'Out of respect for Lincoln and respect for all of you huddled here' she would keep the speech to 272 words, the same length as Lincoln's." Jewell's

announcement "won approval from the crowd, but so did the speech itself."

The Hanover (PA) Evening Sun (11/20, 38K) reports that Jewell "sought to further sum up the struggle that Americans, both service members and citizens, have been fighting through history and continue to fight." Jewell said that "the steps on the journey...are marked by eloquence." She said, "The patriot who regretted he had but one life to give for his country. The president who affirmed our resolve on a day that will live in infamy, the courageous woman whose simple 'No' on an Alabama bus gave birth to choruses of 'We shall overcome,' and the passenger above another Pennsylvania field, who declared 'Let's roll,' giving voice to a nation battered by terrorism."

The Harrisburg (PA) Patriot-News (11/20, 339K) reports that Jewell "pleased the crowd with a speech that was both far reaching in scope and short in length." At the end of the speech, "one attendee exclaimed to the man next to her, 'That was good!'"

USA Today (11/19, Bacon, 5.82M) reports that Jewell, NPS Director Jon Jarvis, and Sen. Bob Casey were among those presenting memorial wreaths.

Also reporting on the story are CNN (11/19, Jones, Liptak, 14.53M), FOX News (11/19, 6.72M), the US News & World Report (11/20, Beard, 620K), the Chicago Tribune (11/19, Wereschagin, 95K), the Washington Times (11/20, Wolfgang, 417K), the York (PA) Dispatch (11/20, 50K), the Pittsburgh Tribune-Review (11/20, 636K), the Denver Post (11/20, Press, 949K), the Boston Herald (11/20, 643K), the Minneapolis Star Tribune (11/20, Scolforo, 1.14M), the State College (PA) Centre Daily Times (11/19, 98K), the Daily Mail (UK) (11/20, 2.92M), Yahoo! (11/20, Scolforo, 17.91M), Yahoo! News Canada (11/20, 76K), WRC-TV Washington (11/20, 291K), WJBK-TV Detroit (11/20, 83K), WXYZ-TV Detroit (11/20, 101K), WTSP-TV St. Petersburg, FL (11/20, 42K), WPMT-TV Harrisburg, PA (11/19, 12K), WJLA-TV Washington (11/20, 118K), KTHV-TV Little Rock, AR (11/20, 28K), and WJBK-TV Detroit (11/20, 83K).

INTERIOR ANNOUNCES \$14.2 BILLION IN ENERGY REVENUES. In its "E2 Wire" blog, The Hill (11/20, 194K) reports that the Interior Department collected disbursed \$14.2 billion in energy production on public lands and offshore waters in 2013. According to Interior Secretary Sally Jewell, the figure is "a 17 percent increased from fiscal year 2012." In a statement, Jewell said, "Domestic energy production infuses funding into communities across the United States that creates American jobs, fosters land and water conservation efforts, improves critical infrastructure, and supports education. The funding reflects significant energy production from public resources in the United States and serves as a critical revenue stream for federal and state governments and tribal communities."

The FuelFix (11/19, 7K) reports that "the surge in revenues partially reflects a surge of interest in drilling in both the Gulf of Mexico and onshore, as energy companies use hydraulic fracturing and horizontal drilling to access previously inaccessible oil and gas reserves." However, "the increase also is connected to the way the federal government recorded bonus bids from three auctions of Gulf of Mexico oil and gas leases over the past two years, including two that took place during fiscal 2013." The article notes that "the government's \$2.8 billion take in the bonus bids includes those from a third auction that took place in fiscal 2012 but effectively did not hit the books until later, in fiscal 2013."

The Alaska Public Radio Network (11/19, 2K) reports that the Interior Department announced Tuesday "it paid Alaska \$19 million over the previous year for oil and gas development on federal land in the state." The article notes that "the state with the biggest federal disbursement in the past year was Wyoming, at nearly \$1 billion," and "the smallest payment – a mere \$38 — went to North Carolina."

The Albuquerque (NM) Journal (11/20, 288K) reports that New Mexico "collected \$479 million in oil and gas royalties in the 2013 fiscal year, the state's largest take in five years."

Also covering the story are Politico (11/20, Guillen, 467K), the Rigzone (11/20, 12K), the Delta (AK) News Web (11/19), and the Law 360 (11/20, 18K).

INTERIOR CONSOLIDATES FINANCIAL MANAGEMENT SYSTEM. The E&E Daily (11/19) report that the Interior Department has completed deployment of a new financial management system across all its agencies.

The Financial and Business Management System “replaces 82 systems that were spread throughout a department infamous for its fragmented organization.” In a statement, Assistant Secretary for Policy, Management and Budget Rhea Suh said that the system “allows us to increase efficiency and make government work better and smarter.”

CENTER FOR PLAIN LANGUAGE SHAMES AGENCIES WITH POOR GRADES. The E&E Daily (11/19) reports on the grades issued by the Center for Plain Language in the center’s second “Plain Writing Report Card,” which “aims to shame agencies into better implementing the 2010 Plain Writing Act.” Of note, the Interior Department received a “D on plain language” and “a B for compliance with the act.”

SENATE PANEL TO MARK UP GRAZING, WILDERNESS BILLS. The E&E Daily (11/19) reports that the Senate Energy and Natural Resources Committee’s will vote Thursday “on a pair of partisan measures to accelerate grazing permits on federal lands and designate new wilderness along Montana’s Rocky Mountain Front.” The committee will also vote on “11 additional measures to expand Gettysburg National Military Park, promote a mine cleanup in Nevada and designate wild and scenic rivers in Vermont, among other provisions.”

REP. AMODEI ENCOURAGES PUBLIC PARTICIPATION ON SAGE GROUSE PROPOSAL. The Reno (NV) Gazette-Journal (11/18, 165K) reports that Rep. Mark Amodei “this week encouraged Nevadans to make their voices heard by the US Fish and Wildlife Service, Forest Service and the Bureau of Land Management during three important public comment periods related to the sage grouse.” Amodei said, “The proposed threatened species listing of the bi-state sage hen population and the Draft Environmental Impact Statement for the greater sage hen have significant consequences for multiple use and represent, really, our first test for how we solve the larger sage hen problem throughout Nevada and the West. In the case of the bi-state, should the listing move ahead, it would designate 1.86 million acres as critical habitat, including federal, state, tribal and private lands in Carson City, Douglas, Lyon, Mineral and Esmeralda counties in Nevada and Alpine, Mono and Inyo counties in California.”

America’s Great Outdoors:

National Park Service:

HOUSE LAWMAKERS PUSH BILLS RELATED TO SHUTDOWN. In its “E2 Wire” blog, The Hill (11/20, 194K) reports that House lawmakers are “reopening the fight over the Obama administration’s closing of national parks during the government shutdown.” According to the article, “Arizona’s congressional delegation is pressing the administration to pay their state for expenses from reopening national parks during the 16-day government shutdown.” Separately, Rep. Chris Stewart (R-UT) is “pushing a bill aimed at ensuring national parks remain open in the event that the government someday closes down again.”

NPS Release Numbers On Shutdown Losses. KPHO-TV Phoenix (11/20, 74K) reports that the Grand Canyon “lost \$19 million in tourism revenue thanks to this fall’s 16-day partial federal government shutdown.” The NPS “released numbers Tuesday that show Arizona’s No. 1 attraction lost nearly 187,000 visitors between Oct. 1 and Oct. 16.” The article notes that “all national parks combined lost about 12 million visitors, which totaled \$568 million in lost revenue.”

FORMER INTERMOUNTAIN REGIONAL DIRECTOR NOW WORKING AT AMERICAN BATTLE MONUMENTS COMMISSION. In its “In The Loop” blog, the Washington Post (11/19, Kamen, 4.28M) reports the NPS announced on Monday that “Alaska regional director Sue Masica has been named Intermountain regional director,” but “it didn’t say where the former intermountain director, John Wessels, was going.” According to the article, Wessels “got a spectacularly sweet gig as deputy secretary for overseas operations at the American Battle Monuments Commission, an independent agency that oversees 24 overseas military cemeteries and other memorials and monuments.”

NPS OFFERS PLAN TO KEEP BISCAYNE NATIONAL PARK OPEN TO BOATING AND FISHING. The Boating Industry (11/19) reports that last week, the NPS “announced a supplemental General Management Plan (GMP) for Biscayne National Park that marks an important step towards balancing the need for public access while addressing resource concerns.” According to the article, “the park’s new preferred plan addresses many of the

concerns from the recreational boating and fishing communities contained in the original 2011 GMP proposals.”

Also reporting on the story are the [Soundings](#) (11/20, 15K) and the [Trade Only](#) (11/20).

DIRECTOR OF GLACIER RESEARCH CENTER HONORED WITH NPS AWARD. The [Missoulian](#) (11/20, 104K) reports that Tara Carolin of Coram, director of the Glacier National Park Crown of the Continent Research Center, is the 2013 winner of the NPS Intermountain Region Director's Award for Professional Excellence in Natural Resource Research. According to a news release, “Carolin has created and nurtured science and research partnerships; communicated science results to natural resource managers, the academic community, teachers and the public; encouraged and assisted student research and intern mentorship; and been a leader in climate change research, among many other accomplishments.”

Also reporting on the story is the [Ravalli \(MT\) Republic](#) (11/20, 19K).

PLANNING COMMISSION REJECTS MAJOR DC BUILDING HEIGHT CHANGES. The [Washington Post](#) (11/20, Debonis, 4.28M) reports that “a planning body charged with examining changes to the federal law restricting building heights in the District declined to endorse major changes Tuesday, voting to reject a recommendation to potentially allow higher structures in outlying parts of the city.” The National Capital Planning Commission “voted 7 to 3 to remove language from a staff report that said the 1910 Height of Buildings Act should be amended to exempt areas of the city outside the historic core planned in the 18th century by Pierre L'Enfant.” Instead, the report will “say that the issue is worthy of further study and future consideration.”

Bureau of Land Management:

WYOMING GOV. MEAD ADDRESSES BLM LAND SWAP CONCERNS IN WHEATLAND. The [Columbus \(IN\) Republic](#) (11/20, 80K) reports, that Wyoming Gov. Matt Mead says “state military officials won't try to expand a central Wyoming training site if ranchers currently using the land object.” On Monday, Mead said that “it could be years or decades before any decisions are made about the disposition of land managed” by the BLM around Camp Guemsey outside Wheatland. The article notes that the BLM has “expressed interest in giving up thousands of acres around Camp Guemsey, and the Wyoming Military Department says it's interested in getting control of all the land within its boundaries and smoothing out some jagged boundaries.”

Also reporting on the story is the [Wyoming Tribune Eagle](#) (11/19, 44K).

BLM, FOREST SERVICE MAP PRICES TO RISE IN 2014. The [Oregonian](#) (11/20, 751K) reports that “the price of most printed maps in the Pacific Northwest Recreation Series, Wilderness, Ranger District and Special Area categories will increase Jan. 1, 2014,” the BLM and the US Forest Service announced in a news release last week. The article notes that “this is the first price increase for these maps in seven years.”

Fish and Wildlife Service:

FWS-LED STUDY FINDS “HOT SPOTS,” BUT LESS DEFORMED FROGS ON REFUGES THAN FEARED. The [E&E Daily](#) (11/19) reports that “a landmark 10-year study” led by FWS “identified several so-called hot spot clusters of frogs and toads with physical abnormalities but found that overall these observed deformities were far lower nationwide than some had feared.” The study, which was published in PLOS ONE, is “the largest of its kind, sampling more than 68,000 frogs found in hundreds of wetland sites at 152 national wildlife refuges.” According to the latest study, “about 2 percent of the frogs examined were classified as having skeletal or eye abnormalities,” which is “a much lower rate than what some scientists feared that they might find...indicating that severe malformations such as missing or extra limbs ‘were very rare on national wildlife refuges.’”

Also reporting on the story are [The Chattanooga](#) (11/19, 17K) and [Sensors & Systems](#) (11/20).

NINE SHARK SPECIES TO BE CONSIDERED FOR PROTECTION. The [E&E Daily](#) (11/19) report that the National Marine Fisheries Service has determined that the status of the nine shark species “warrants investigation, according to today's notice in the Federal Register.” The article notes that “the finding is in response to a petition from the environmental group WildEarth Guardians, which earlier this year called for

protections for 81 marine species." Bethany Cotton, WildEarth's program director, said "the group was pleased about the decisions on the nine species that will be considered for protection but was disappointed NMFS has decided not to further investigate protections for the other species."

HEARING ON GRAY WOLVES IGNITES FOES. The Denver Post (11/20, Finley, 949K) reports that more than 350 wolf advocates dominated a hearing held in Denver by the FWS on its proposal to end protection of gray wolves. Defenders of Wildlife regional director Jonathan Proctor said, "How can the job be done when only 8 percent of wolves' historic habitat is occupied? We want wolves in the southern Rockies, which is tremendous habitat that is suffering because of the lack of wolves."

FORMER ANIMAL PLANET EXPERT TO PLEAD GUILTY TO SELLING EXOTIC LIZARDS. The Los Angeles Times (11/19, Cowan, 3.07M) reports that "a former Animal Planet reptile expert is expected to plead guilty Tuesday to a federal charge that he illegally sold two endangered Iranian desert monitor lizards." Donald Schultz faces a sentence of two years of probation, 200 hours of community service and a \$6,000 fine, according to a plea agreement. Schultz also agreed to give up the lizards to the FWS, and to pay \$3,000 restitution for their cost and care.

US Geological Survey:

USGS RELEASES DEBRIS-FLOW STUDY. The Idaho Mountain Express (11/20, 36K) reports that a study conducted by the USGS in the Beaver Creek Fire burn area has "confirmed Blaine County's choices of sites to install an early-warning system for mudslides." According to the study, which was released Nov. 14, "debris flows are most frequent within two to three years after wildfires, when vegetative cover is absent or reduced and abundant materials are available for erosion and transport."

Securing America's Energy Future:

Renewable Energy:

HOUSE AXES GREEN ENERGY PERMITTING FUNDS FROM ENERGY BILL. The "Floor Action" blog of The Hill (11/20, 194K) reports that the House yesterday granted approval to an amendment "that would cut in half the money available to the government to consider and issue permits for solar and wind energy projects." The blog notes that "members agreed by voice vote to the amendment to the Federal Lands Jobs and Energy Security Act, H.R. 1965." The amendment "adjusted language in the bill that limits wind and solar permitting activities at the Department of the Interior and Bureau of Land Management to \$10 million."

ROUTE DECISION ON SUNZIA PROJECT DELAYED INTO 2014 OR BEYOND. The SNL Financial (11/20, 22K) reports that the SunZia Southwest Transmission Project has been delayed again, as the Interior Department and the Defense Department "turn to the Massachusetts Institute of Technology's Lincoln Laboratory to settle their differences over the impact of the route of the line, according to a Nov. 15 press release from Sen. Martin Heinrich, D-N.M." The Lincoln Laboratory will "study whether White Sands' test protocols can be modified to accommodate the line and will issue a report early in 2014, according to an Oct. 18 letter sent by the DOD to Heinrich." In an interview, Donna Hummel, a spokeswoman for the BLM New Mexico office, said, "Bringing in a third party, who should be neutral to both perspectives, should be welcome at this point."

The Albuquerque (NM) Journal (11/20, 288K) editorializes that "the sort-of good news" is that the BLM is "delaying a decision on an environmental impact statement that calls for routing a private consortium's high voltage transmission line across the White Sands Missile Range's Northern Extension." However, "the not-so-good news is that the study may just be one more effort by SunZia proponents to get more ammunition to push the project through at all costs." The paper argues that "this is clearly a time for national security – and New Mexico's economy – to take precedence."

Onshore Energy Development:

HOUSE ADVANCES DRILLING, FRACKING BILLS. The E&E Daily (11/19) reports that the House is expected

to pass GOP legislation seeking to speed the development of oil and gas on federal lands after considering a half-dozen Democratic amendments. The "Federal Lands Jobs and Energy Security Act," H.R. 1965, is "one of two energy bills the Rules Committee yesterday sent to the House floor, along with H.R. 2728, which would restrict BLM's ability to regulate hydraulic fracturing in states that already have rules addressing the practice." The House is scheduled to vote Tuesday on the BLM leasing bill and Wednesday on the fracking bill.

In its "Floor Action" blog, [The Hill](#) (11/20, 194K) reports that "Democrats broadly criticized the rule for preventing several Democratic amendments from being considered this week, and said downplayed the bills as 'messaging' legislation that won't move in the Senate."

FuelFix (11/20, Dlouhy, 7K) adds that Democrats "blasted" the measures "with Colorado's Jared Polis casting them as 'messaging bills that aren't going anywhere.'" Rep. Steny Hoyer added that "the House should be focused on more pressing matters, given the recent surge in domestic oil and gas production." Hoyer stated, "There are more oil rigs in America today than the rest of the world combined, yet we're talking about energy security. ... We have it!"

Also reporting on the story are the "E2 Wire" blog of [The Hill](#) (11/20, 194K), the [National Journal](#) (11/20, Subscription Publication, 427K), the [Washington Examiner](#) (11/20, Colman, 319K), and the [Washington Free Beacon](#) (11/20, Markay, 37K).

White House Threatens Veto. The [E&E Daily](#) (11/19) reports that the White House has threatened to "veto a pair of House Republican bills aiming to curb regulations of oil and gas development on federal lands." The Obama Administration said it "strongly opposes" H.R. 1965 and H.R. 2728, which "it argued would compromise the Bureau of Land Management's ability to promote safe and balanced drilling on federal lands." The article notes that "the veto threats were largely symbolic, considering that neither measure is expected to advance in the Senate."

Platts (11/20, Scheid, 2K) also reports that President Barack Obama would "likely veto a bill aimed speeding up natural gas pipeline approvals if it ever makes it to his desk, the White House said Tuesday." The bill "is expected to be voted on by the House of Representatives on Thursday." The legislation "would require the Federal Energy Regulatory Commission to approve or deny a gas pipeline permit within one year of receiving a complete application."

Also reporting on the story are the "E2 Wire" blog of [The Hill](#) (11/20, 194K), the [MarketWatch](#) (11/19, 967K), the [National Journal](#) (11/20, Subscription Publication, 427K), the [National Review](#) (11/20, 290K), and [Newsmax](#) (11/19, 555K).

Heritage: GOP Energy Bill Votes Key To Rankings. The "E2 Wire" blog of [The Hill](#) (11/20, Geman, 194K) reports that legislation in the House "to thwart federal oil-and-gas 'fracking' regulations is unlikely to advance beyond the lower chamber, but it could still be politically relevant for any Republican lawmakers who might be on the fence." On Tuesday, Heritage Action said "that lawmakers' votes on the bill this week will be a 'key vote' that's included in their rankings of members." The group said, "H.R. 2728 would maintain the states' ability to regulate fracking, which they have effectively done for decades, without burdensome, excessive, and costly federal regulation."

Commentary. For "The Blog" of the Huffington Post (11/20, Hauter, Steingraber, 11.54M), Wenonah Hauter and Sandra Steingraber write that earlier this month, Interior Secretary Sally Jewell "delivered a proclamation that only served to highlight just how much misguided faith the Obama administration has invested in the oil and gas industry and its quest to keep the American public hooked on fossil fuels." Speaking before youth conservation leaders in California, Jewell "cited what she called 'confusion' in the fracking debate, implored the oil and gas industry to clear up 'misinformation,' about the process, and asserted that industry should 'make sure the public understands...why it's safe.'" However, Hauter and Steingraber argue that "the only thing confusing about the fracking debate is why this administration continues to embrace the practice in the face of scientific evidence that fracking and associated activities contaminates water, air, communities and the climate."

Reps. Bill Flores (R-TX) and Henry Cuellar (D-TX), together argue in a post for the "Congress Blog" online for [The Hill](#) (11/20, 194K) in favor of HR 2728, dubbed the "Protecting States' Rights To Promote American Energy

Security Act." After noting the economic benefits from fracking that come both in the form of lower energy costs as well as jobs and spurred economic activity in fracking areas, the Reps. continue by observing that "for decades" states have been the main fracking regulators "on both government and privately owned land," a power they "have consistently opposed" yielding to the Federal government. They view the Interior Department's measures to regulate fracking, therefore, as "adding duplicative federal regulations on top of state regulations," especially as they believe that "states are not asking the federal government to step in."

In an op-ed for the Daily Caller (11/20, Hastings, 422K), Rep. Doc Hastings characterizes H.R. 2728 as "responsible, bipartisan legislation" which will protect "American jobs and energy production by stopping the federal government from imposing duplicative and onerous regulations on hydraulic fracturing." According to Hastings, H.R. 2728 "recognizes that each state knows what regulations work best for them and prevents the federal government from wasting time, money and resources duplicating their efforts." He concludes that H.R. 2728 will "ensure that federal red-tape does not stifle American energy production and job creation and rightly allow states to continue to effectively and safely regulate hydraulic fracturing for the good of our economy."

For "The Balance Sheet" blog of the Denver Post (11/19, 949K), Paul Bugarino writes that the fossil fuel industry have criticized the Interior Department's effort to overhaul the program to leasing and drilling on federal land for stifling leasing and production. On the other hand, environmental groups have argued that the industry has plenty of leases which it is failing to exploit. The 2011 statistics released by the BLM shows a mixed picture that doesn't quite fit either sides' contention. Kathleen Sgamma, vice president for government affairs at the Western Energy Alliance, said, "There was a increase in leases because both the industry and the BLM worked to reduce a backlog that had built up. Production is up, but because of the long lead time on federal leasing, today's production is the result actions taken five to 10 years ago."

BLM AUCTION NETS \$3.4 MILLION IN UTAH OIL AND GAS LEASES. The Salt Lake (UT) Tribune (11/20, 343K) reports that the BLM's Utah office netted in \$3.4 million at an oil and gas auction Tuesday where leases were offered on 35 parcels covering 44,000 acres in Carbon, Emery and Uintah counties. Utah will receive "nearly half the auction's revenue, including a \$1.50-per-acre annual rental charge, which will be shared with the counties where the leases are located."

UNIVERSITY OF OKLAHOMA RESEARCHER INVESTIGATING STATE'S RISE IN SEISMIC ACTIVITY.

Reuters (11/20, Gillam) reports on University of Oklahoma seismologist Austin Holland, who is studying earthquakes for the Oklahoma Geological Survey in an effort to increase the body of knowledge on whether or not a sharp increase in the number and magnitude of Oklahoman earthquakes is in any way tied to Oklahoma's oil and gas activity. As the Department of Interior has counted significant upticks in the number and size of earthquakes in states besides Oklahoma, the article notes the analysis of John Daly, an oil industry expert, who said to clients, "Potentially billions of dollars are involved, from profits to class action lawsuits...Given the stakes, Holland's research will be closely watched not only by Oklahoma's oil and gas industry but producers throughout the U.S. as well." Meanwhile, the article also notes how there are those in the industry, including Steve Everley of Energy in Depth, who are not disagreeing that the earthquakes may be connected with the land use.

Offshore Energy Development:

SENIOR HOUSE DEMOCRATS URGE REJECTION OF DISCLOSURE WAIVER IN US-MEXICO AGREEMENT .

The E&E Daily (11/19) reports that "the top Democrats on three key House committees today urged Senate Majority Leader Harry Reid (D-Nev.) to remain steadfast in preventing legislation implementing an agreement clarifying offshore drilling rights in the Gulf of Mexico from becoming a vehicle to shield oil companies from having to disclose their payments to foreign governments." According to the article, "at issue are ongoing negotiations between the House and Senate to reconcile bills that passed the two chambers to implement the US-Mexico Transboundary Hydrocarbon Agreement, which delineates each country's access rights in the Gulf." Reps. Peter DeFazio (D-OR), Maxine Waters (D-CA) and Eliot Engel (D-NY), who are "ranking members of the Natural Resources, Financial Services and Foreign Affairs committees, today wrote to Reid urging him to keep the Dodd-Frank waiver out of the law."

Also reporting on the story is the "E2 Wire" blog of The Hill (11/20, 194K).

BP LAUNCHES WEBSITE FOR DATA ON POST-SPILL INVESTIGATIONS. The E&E Daily (11/19) reports that "data gathered from the official environmental investigations of the impact of the 2010 Gulf of Mexico oil spill were made public yesterday in the first round of a series of releases." BP PLC announced the launch of gulfsciencedata.bp.com, which will "become the home for the results of several scientific studies taken on the spill and its effects on the environment and ecology of the Gulf." The data is being published without interpretation.

Meanwhile, the E&E Daily (11/19) reports, BP "released some of the environmental data it is using while working on the Gulf of Mexico cleanup." According to Laura Folse, BP's executive vice president for response and environmental restoration, "the hope is the information 'will enhance Gulf-related scientific research and improve the public's understanding of the condition of the Gulf of Mexico.'"

BP ADDS TWO MORE RIGS TO GULF OF MEXICO PROGRAM. The Oil and Gas Journal (11/20, 1K) reports that BP PLC has "added two more drilling rigs to its deepwater Gulf of Mexico fleet." BP said "it now accounts for a record nine rigs in the region." BP the company said "it expects to invest at least \$4 billion/year in the gulf over the next decade, focusing on its major deepwater operated production hubs Thunder Horse, Mad Dog, Na Kika, and Atlantis, along with nonoperated production hubs Mars, Ursa, and Great White (OGJ Online, May 2, 2012)."

SENS. KIRK, CANTWELL PRAISED FOR EFFORTS TO PROTECT THE ARCTIC REFUGE. For "The Blog" of the Huffington Post (11/20, Shogan, 11.54M), Cindy Shogan, Executive director, Alaska Wilderness League, praises Senators Maria Cantwell (D-WA) and Mark Kirk (R-IL) for co-introducing S. 1695 which would designate the Arctic National Wildlife Refuge's Coastal Plain as Wilderness. According to Shogan, Cantwell and Kirk "recognize that some places are just too special to drill for oil, and the Arctic National Wildlife Refuge tops that list." Shogan thanks "the Senators for their longstanding efforts to defend the Arctic Refuge, and applaud them as they assume another level of leadership to protect this place once and for all."

Tackling America's Water Challenges:

CONTRA COSTA RESIDENTS' CONCERN GROWS OVER BAY DELTA CONSERVATION PLAN. The Contra Costa (CA) Times (11/20, Burgarino, 302K) reports that "as the state prepares to unveil key environmental documents for Gov. Jerry Brown's proposal to build two large tunnels to move Sacramento River water south, dozens of concerned East Contra Costans were brought up to speed last week on how it could impact their Delta backyard." The article notes that Brown's "\$24.7 billion plan is widely opposed around the Delta communities, as opponents say the tunnels would reduce fresh water flows, endanger local fish and other habitat and put a sizable financial dent in local agriculture." According to the article, "most, if not all, of the 60 residents at Thursday's forum hosted by the Contra Costa Farm Bureau and Contra Costa Taxpayers Association, echoed those sentiments."

Additional coverage of the Bay Delta Conservation Plan was provided by the Redding (CA) Record Searchlight (11/20, 32K).

VISITORS TO HOOVER DAM DROP. CBS (11/19, 3.87M) reports that fewer people are officially visiting Hoover Dam. Officials say the number of people "taking paid tours of the historic site dropped from 823,000 in 2011 to 755,000 in 2012 and are trending down in 2013." Rose Davis, spokesperson for the BOR said she doesn't believe the opening of the Pat Tillman Memorial Bridge is a factor, but that "it's more likely the overall down economy of the past few years."

ADDITIONAL COVERAGE OF WORKER INJURED IN FIRE AT GRAND COULEE DAM. Additional coverage of the fire at Grand Coulee Dam was provided by the Wenatchee (WA) World (11/19, 60K), the Columbia Basin (WA) Herald (11/20, 26K), and the Star of Grand Coulee (WA) (11/13, 169).

CLIMATE CHANGE POSES CHALLENGES FOR WATER MANAGEMENT. For the High Country (CO) News (11/20, Thompson, 74K), Jonathan Thompson writes that the Glen Canyon Dam "can't completely fix the arid truth any more than water managers' prayers for more rain and snow next year." He notes that "we're now 14 years into the current drought, the driest 14 years of the past century." Thompson concludes that "the West's biggest plumbing system is in danger of running on empty, and there's little our monumental dams can do about

it.”

In her column for the Glenwood Springs (CO) Post Independent (11/20, Holm, 27K), Hannah Holm writes that questions related to changing natural and human conditions in were discussed at the third annual Upper Colorado River Basin Water Conference at Colorado Mesa University Nov. 6-7. Presentations from the conference are available on the web at www.coloradomesa.edu/watercenter/UpperColoradoRiverBasinWaterForum. she notes that “the weather influencing our environment, and the people who inhabit and rely on it, just aren’t behaving the way they did 50-100 years ago, or even 20-30 years ago.” And “while conditions are changing, the legal apparatus and much of the infrastructure we use to manage water are old.”

Empowering Native American Communities:

BIA WON’T PICK SIDES IN BLACKFEET DISPUTE. The AP (11/20) reports that the BIA “says it is not picking sides in a Blackfeet Tribal Business Council dispute that has lasted more than a month and left the tribe without a functioning government or the ability to pay its bills.” BIA spokeswoman Nedra Darling said, “We believe the solutions must come from the Council itself. We still give great weight to the (Council) in working through these impasse problems themselves. We have and continue to offer mediation services to help resolve the impasse.”

Also covering the story are the Columbus (IN) Republic (11/20, 80K) and KECI-TV Missoula, MT (11/20, 2K).

SPIRIT LAKE HOLDS CHILD WELFARE MEETING. The Grand Forks (ND) Herald (11/20, 87K) reports that Spirit Lake held a child welfare meeting. Tribal Chairman Russ McDonald said “coming together is the first step to keeping kids safe on the reservation.” Bruce Loudermilk, regional director for the BIA, said, “We’ve been working very well together. We have monthly coalition meetings. This meeting that we’re having right now is a clear cut example of everybody’s willingness to come together.”

Top National News:

ADMINISTRATION HEDGES ON NOV. 30 GOAL AS MORE ACA PROBLEMS COME TO LIGHT. On Tuesday, the White House acknowledged that President Obama was aware of a March report warning about problems likely to hamper HealthCare.gov as it went live. Also on Tuesday, Administration officials and outside cybersecurity experts testified that the site is far from complete and vulnerable to hackers. These developments shifted some of the media focus away from the ongoing controversy over Americans who are losing their health insurance as a result of the ACA, and back to the technical problems that initially drove the ACA rollout story starting in the middle of last month.

The new revelations about the ACA’s tech challenges were the subject of the lead story on the CBS Evening News (11/19, lead story, 2:30, Pelley, 5.58M), but the other two network newscasts did not include any mention of the various aspects of the healthcare reform story. ABC World News (11/19, story 5, 1:05, Muir, 7.43M) did have a report on what Diane Sawyer called a “brand new ABC News poll,” which was actually the Washington Post-ABC News poll that was released on Monday. Sawyer reported that the President’s approval rating is “at an all time low,” and Jonathan Karl said, “clearly the Obamacare troubles are the biggest factor.” Karl noted that “for the first time...the majority say they have an unfavorable view of Obama personally,” and when “asked if Obama was ‘honest and trustworthy,’ for the first time a majority say ‘no.’”

Many reports last night and this morning draw attention to the Administration’s claims – cast as seemingly contradictory – about the likely state of progress at the end of this month, when the President has said HealthCare.gov “will be functioning for the majority of people who are using it.” CMS’s Henry Chao, described by the New York Times (11/20, Pear, Subscription Publication, 9.61M) as “the chief digital architect for the federal health insurance marketplace,” declined to second that prediction at a House hearing on Tuesday, and the AP (11/20, Kennedy) reports that, also on Tuesday, HHS Secretary Sebelius “appear[ed] to soften [Obama’s] promise that the site will be working by then for the vast majority of users.”

Scott Pelley, at the opening of the CBS Evening News (11/19, lead story, 2:30, Pelley, 5.58M), reported that “it turns out someone did,” in fact, “wam the President” about HealthCare.gov’s “many problems.” Pelley said that on Tuesday, the White House “acknowledged...that Administration officials, including President Obama, were

briefed on a consultant's report six months before HealthCare.gov went online, a report that said problems were coming." Nancy Cordes went on to report that while the Administration says "they took this report's warnings into account and made changes," Republicans "argue that its very existence cast doubt on claims by the President on down that they were caught by surprise by the website's flaws."

Also on the CBS Evening News (11/19, story 2, 1:00, Pelley, 5.58M), Major Garrett reported that the President "was briefed in early April on the outside report predicting big problems for the website." According to Garrett, "this is clearly a story where the President was briefed on problems, but thought they were small enough [that] they could be addressed and...overlooked these design flaw predictions." Fox News' Special Report (11/19, 2.15M) also covered the revelations about the consultant's analysis in its lead story.

The Washington Post (11/20, Rucker, Somashekhar, 4.28M) reports that on Tuesday, White House press secretary Jay Carney responded to questions about the March McKinsey & Co report, saying, "Flags were raised throughout the development of the Web site, as would be the case for any IT project of this size and complexity. ... But nobody anticipated the size and scope of the problems we experienced once the site was launched, as we've discussed repeatedly."

According to Politico (11/20, Meyers, 467K), the McKinsey report "described a process that relied too heavily on outsider contractors, didn't provide enough time for complete testing and failed to hand authority to one decision maker. Chao's limited knowledge of the report feeds lawmaker frustrations with the site's fractured management and unclear controls." Linda Feldmann, in a piece for the Christian Science Monitor (11/20, 540K), reports that the White House and CMS "strongly defend the administration's response to the McKinsey report at the time," which they say "was not a technical review of the website's functionality."

Politico (11/20, Epstein, 467K) reported that in an appearance at the Wall Street Journal CEO Council on Tuesday, President Obama said that in regards to the ACA, "I am confident that the model that we built...is one that will succeed," but "we obviously are going to have remarket and rebrand, and that will be challenging in this political environment." The President also said his Administration "probably could have identified earlier the way the federal government does procurement and does IT just generally is not very efficient." The President also remarked that "there's probably no bigger gap between the public sector and the private sector than IT."

The Washington Post (11/20, Rucker, Somashekhar, 4.28M) reports that on Tuesday at the Wall Street Journal event, the President also "sought to redirect some of the political blame for the botched rollout of the federal health insurance exchange to Republicans, characterizing GOP lawmakers as rooting for the law's failure." The President said, "One of the problems we've had is one side of Capitol Hill is invested in failure."

The Miami Herald (11/20, Chang, 806K) reports that in Miami on Tuesday, HHS Secretary Sebelius "vowed to finish the job of repairing the federally-run healthcare.gov website but also tried to refocus the discussion on Medicaid expansion – pushing back on weeks of withering criticism." According to the Herald, Sebelius "acknowledged that the Obama administration's testing of the website in the months prior to the troubled launch 'was not sufficient.'"

The AP (11/20, Kennedy) reports that also on Tuesday, Sebelius, "appearing to soften a promise that the site will be working by then for the vast majority of users," said HealthCare.gov "will still be a work in progress beyond the end of the month." Sebelius is quoted as saying, "The 30th of November is not a magic go, no go date. It is a work of constant improvement. We have some very specific things we know we need to complete by the 30th and that punch list is getting knocked out every week."

Reuters (11/20, Liston) reports that Sebelius also had some positive comments on the progress that is being made. Sebelius said, "It is far faster than it was when we first opened. The error rate is down to less than one percent and the volume capacity is continuing to be added to."

The Wall Street Journal (11/20, Dooren, Subscription Publication, 5.91M) reports that when asked at a House hearing if he agrees with President Obama when he said on Tuesday that, "by the end of this month," HealthCare.gov "will be functioning for the majority of people who are using it," CMS's Chao said, "There's still a lot of moving parts. It wouldn't be prudent to give 100% guarantees about where we are going to be, but I think we are on the right track."

Politico (11/20, Everett, Kim, 467K) reports that Senate Majority Leader Harry Reid is under pressure from vulnerable members of his caucus to allow votes on legislation that would allow Americans to retain health insurance policies that have been canceled due to ACA rules if they so choose, but that Reid "isn't ready to act just yet." According to Politico, Reid is waiting to see the enrollment numbers for this month, and is also "assessing how Obama's proposed administrative fix to allow individuals to keep canceled insurance plans for one year plays in GOP-friendly states like Louisiana, Arkansas and North Carolina." Politico says Reid's "hope is that the fix may blunt a recent nose dive in public approval of Obamacare." However, Politico adds that "if it's clear vulnerable Democrats need cover from the health reform program's rough launch, the party will try to coalesce around one of the many bills...submitted by Democrats to alter various portions of the law," although the White House has urged them not to.

CMS's Chao Says 30-40% Of HealthCare.gov Has Yet To Be Built. Politico (11/20, Meyers, 467K) reports that at a House hearing, CMS's Chao "acknowledged Tuesday that up to 40 percent of IT systems supporting the exchange still need to be built." Chao is quoted as saying, "It's not that it's not working. It's still being developed and tested."

Under the headline, "Health Insurance Marketplace Is Still About 40 Percent Incomplete, Official Says," the New York Times (11/20, Pear, Subscription Publication, 9.61M) reports that Chao, described as "the chief digital architect for the federal health insurance marketplace," estimated "that 30 percent to 40 percent of the project was still being built." According to the Times, House members at the hearing "expressed surprise that so much work remained to be done seven weeks after the federal website opened to the public." The Times notes that Chao "said the government was still working on 'back office systems,' including those needed to pay insurance companies." Chao testified: "We still have to build the financial management aspects of the system, which includes our accounting system and payment system and reconciliation system."

Jim Geraghty, in a piece for The National Review (11/20, Geraghty, 290K), noted that when Rep. Cory Gardner (R-CO) "ask[ed] Chao what percentage of the system remains to be built," Chao answered, "I think it's, uh, just an approximation, we're probably sitting somewhere between 60 and 70 percent...because we still have to build the payment systems to make payments to issuers in January. ... There's the back-office systems, the accounting systems, the payment systems, they still need be built."

The Hill (11/20, Hattem, 194K) said "Chao's comments...are sure to disappoint Democrats who had hoped the enrollment system would be in tip-top shape by" the end of the month. However, the Hill also reports that CMS spokeswoman Julie Bataille maintains that the functions that have yet to be built are "not anything that is necessary in order for consumers to make a payment because that is something that they do outside of the marketplace, directly to issuers." According to Bataille, "Those back-end systems did not need to be up and running 'until about the middle of January."

Cybersecurity Experts Testify That HealthCare.gov Is Not Secure And Ought To Be Shut Down. In the lead segment for the CBS Evening News (11/19, lead story, 2:30, Pelley, 5.58M), Nancy Cordes reported that at a House hearing Tuesday, "a panel of security experts called" HealthCare.gov's "safety measures flimsy and ill constructed." Rep. Chris Collins (R-NY) was shown asking the witnesses, "Do any of you today think today the site is secure?" and all four "security experts" were shown responding, "no." In the lead story for Fox News' Special Report (11/20, 2.15M), Bret Baier described HealthCare.gov as a "goldmine for hackers."

The Christian Science Monitor (11/20, Clayton, 540K) reports that Rep. Fred Upton (R-MI) asked the witnesses: "How can the public trust a hastily thrown together system in which meeting a deadline was more important for the administration than conducting complete end-to-end testing of the site's security?"

Under the headline, "Some Cyber Security Experts Recommend Shutting Obamacare Site," Reuters (11/20, Finkle, Selyukh) reports that three of the four witnesses at the House of Representatives Science, Space and Technology Committee hearing responded "yes," when asked by Collins, "Would you recommend today that this site be shut down?" Reuters adds that the one witness who did not advocate shutting down HealthCare.gov nevertheless said afterwards that he would not use the site himself on account of all of its security flaws.

Dana Milbank, in his column for the Washington Post (11/20, Milbank, 4.28M), alleges that Republican efforts to
