draw attention to HealthCare.gov's security flaws are "sabotage, plain and simple." According to Milbank, Republicans believe that "if they can frighten young and healthy people from joining the health-care exchanges, the exchanges will become expensive and unmanageable."

CMS Reportedly Set To Allow Direct Enrollment Via Insurers. The Huffington Post (11/20, Young, 11.54M) reports that those "interested in buying health insurance under Obamacare could soon skip the HealthCare.gov website and apply for coverage and financial assistance directly with private insurance companies." According to the Huffington Post, CMS "is close to providing insurers with the technological capability to also take subsidy applications, as well as sell plans to customers."

Insurer's CEO: "Anemic" ACA Enrollment Volume Doesn't Justify Marketing At This Point. The Wall Street Journal (11/20, Murray, 5.91M) reports that WellPoint CEO Joseph Swedish, during the same Wall Street Journal event that the President spoke at on Tuesday, described HealthCare.gov enrollment as "anemic," and added, "I'll be very candid, we have pulled back from marketing, not knowing how to get people enrolled at the moment."

Woman Obama Touted As ACA Success Story Was Misled And Still Can't Afford Coverage. On Fox News' Special Report (11/19, 2.15M), Ed Henry reported that "the President's credibility is...on the line over a letter he read on October 21 from a single mom, Jessica Sanford, that he used to claim that the new law is working." President Obama was shown reading from Sanford's letter in a Rose garden ceremony, and then Henry added that Sanford "now says the tax credit was reduced so the coverage is too expensive."

CNN (11/20, Acosta, 14.53M) reports that Sanford received letters from Washington state telling her that she did not actually qualify for any Federal subsidy. Sanford told CNN: "I had a good cry. ... This is it. I'm not getting insurance." The Daily Caller (11/20, Hurtubise, 422K) also covered Sanford's plight.

Obama No Longer Using The Term "Obamacare," Although He Embraced It Last Year. Politico (11/20, Epstein, 467K) reports that while the President "once embraced the term Obamacare to sell the American people on health care reform," that is no longer the case. According to Politico, the President "didn't say 'Obamacare' once during his nearly hourlong news conference last week," but "referred to the 'Affordable Care Act' a dozen times," and "White House talking points distributed to Democrats...repeatedly refer to the Affordable Care Act in suggested sound bites, not Obamacare." Politico notes that while campaigning last year, the President said, "We passed Obamacare — yes, I like the term — we passed it because I do care."

PRESIDENT BACKS PIECEMEAL APPROACH TO IMMIGRATION REFORM. The Wall Street Journal (11/20, A1, Lee, Subscription Publication, 5.91M) reports on its front page this morning that the President said on Tuesday that he would be willing to accept the passage of immigration reform on a piece-by-piece basis. At a Wall Street Journal event, the President said, "If they want to chop that thing up into five pieces, as long as all five pieces get done, I don't care what it looks like. What we don't want to do is simply carve out one piece of it...but leave behind some of the tougher stuff that still needs to get done." The President also said that he expects reform to pass by the end of the year.

AFP (11/20) reports the President previously called on House Republicans to act on the single comprehensive bill passed by the Senate, "but the legislation's prospects have dimmed." However, Obama said that "any measures passed must include better enforcement of US borders, a path to citizenship for illegal immigrants who pay a fine, and should also tackle the limbo status of the children" brought to the US by parents who are in the country illegally.

Ryan Says House To Pursue Piecemeal Approach. The Wall Street Journal (11/20, Paletta, 5.91M) reports that House Budget Committee Chairman Paul Ryan said that House GOP leaders would likely move immigration reform on a piecemeal basis, probably starting early next year. Ryan, speaking at the same conference as the President, said that there wasn't time to push the Senate bill through the House this year.

Biden Announces Easing Of Immigration Rules For Panamanians. The Washington Times (11/20, Boyer, 417K) reports that Vice President Biden announced in a visit to Panama that the Administration is "easing" immigration rules for Panamanians traveling to the US. Biden "said Panama will be the newest member of the U.S. Global Entry program, which allows travelers to be prescreened in their country of origin and to avoid long

immigration lines in the U.S.”

WPost Calls On Boehner To Push Immigration Reform. In an editorial, the Washington Post (11/20, 4.28M) says that House Speaker Boehner needs to act on immigration reform immediately. The Post says that the House “can’t dictate that only border security and deportation are on the table,” and adds that Boehner shouldn’t try to “tell the Senate what it can and cannot bring to the table in negotiations with the House.”

Schakowsky To Join Activist Fasters For A Day. Politico (11/20, Kim, 467K) reports that several immigration activists have been fasting on the Mall for more than a week, and now Rep. Jen Schakowsky (D) says that she’ll join them “for one day to mark solidarity.” Schakowsky said, “I’m so inspired by the fasters and...how they’re willing to put their bodies on the lines, their health on the line to raise attention to an issue that is really tearing at the fabric of our country.”

Protesters Look To Block Deportations In Atlanta, Chicago. The Washington Times (11/20, Dinan, 417K) reports that “illegal immigrants blockaded” a Federal office in Atlanta that handles deportations on Tuesday morning, while in Chicago, a “group of 12 illegal immigrants” chained themselves to the wheels of a bus they believed was to be used to deport people. The Times says that the moves “mark the latest escalation” of a campaign by activists to press the President to “use his executive authority to stop almost all deportations.”

OBAMA ANNOUNCES GRANT COMPETITION FOR HIGH SCHOOL STUDENTS. Politico (11/20, Sevens, 467K) reports that the President announced a new competitive grant program on Tuesday, “designed to better prepare high school students for high-tech careers,” but it received a “chilly reception from some lawmakers and education groups.” Youth CareerConnect “will deliver 25 to 40 competitive grants of \$2 million to \$7 million to teams of secondary schools and higher education institutions that build programs” to prepare students for jobs. The President said, “We know what the challenges are, we know what the solutions are. What’s holding us back is not a lack of policy ideas.”

NYTimes Says Common Core Shows Promise. The New York Times (11/20, Subscription Publication, 9.61M) says in an editorial that the improved student test scores in DC and Tennessee, two early adopters of the Common Core standards, show the promise of the reform. The Times says that the progress “shows that improvement is possible if the states strengthen their resolve and apply solutions that have been shown to work.”

Kerrey, Leeds Criticize Gainful Employment Regulations. In an op-ed for the Wall Street Journal (11/20, Kerrey, Leeds, Subscription Publication, 5.91M), former Sen. Bob Kerrey (D) and Jeffrey T. Leeds, president of Leeds Equity Partners, write that Education Secretary Arne Duncan this month proposed Gainful Employment rules that allow the Federal government to cut off student aid to colleges whose graduates don’t find good jobs. The pair calls the regulations a bad idea, and, comparing them to Obamacare, say that the poor design and unintended consequences will ensure that the program is a failure.

Editorial Wrap-Up:

NEW YORK TIMES. “Vladimir Putin Clings To The Past.” In an editorial, the New York Times (11/20, Subscription Publication, 9.61M) says Russian President Vladimir Putin is “doing everything he can” to prevent the former Soviet Republics from “developing closer ties with Europe — even threatening to cut off the gas that one country needs to get through the winter.” Putin, says the Post, “seems to long for a return to the days when an iron curtain divided the Continent, darkening the horizons of the satellites and Soviet republics to the east — nations that now seek the enjoy more fully the fruits of independence.”

“Advertisements For The Common Core.” The New York Times (11/20, Subscription Publication, 9.61M) says in an editorial that the improved student test scores in DC and Tennessee, two early adopters of the Common Core standards, show the promise of the reform. The Times says that the progress “shows that improvement is possible if the states strengthen their resolve and apply solutions that have been shown to work.”

“The Expiring Ban On Plastic Guns.” The New York Times (11/20, Subscription Publication, 9.61M) editorializes that Congress should renew a law that bans guns made of parts undetectable by metal detectors and X-ray machines. The article notes that since the last renewal in 2003, plastic guns made with 3-D printing

technology and capable of lethal firepower have become reality. Democratic Congressmen are working on updated renewal measures, but the bill should receive bipartisan support.

WASHINGTON POST. "A New Middle East Threat." An editorial in the Washington Post (11/20, 4.28M) urges Saudi Arabia to be transparent about its outbreak of Middle East respiratory syndrome, or MERS. The Post notes that the behavior of the virus "is a matter of concern to the world," and there are "rumblings of worry among public health experts about the lack of good research coming from Saudi Arabia, with its traditions of isolation and opacity." Noting that the virus "could mutate and pose a threat far beyond the Middle East," the Post says that before the occurs, Saudi Arabia should "do everything it can to make sure the world's wisdom and experience are brought to bear on this spiky blob."

"The Flawed D.C. Voucher Program." The Washington Post (11/20, 4.28M) editorializes that the DC Children and Youth Investment Trust Corp. has been faulted for "poor administration of the D.C. school voucher program" by the Government Accountability Office, and the DC Council should conduct its own inquiry into the organization. The GAO noted that the organization "does not effectively oversee participating schools, has not implemented effective policies and procedures, and is unable to efficiently manage day-to-day program operations," including timely filing of financial reports. The organization's executive director, Ed Davies, claims that it "inherited" many problems from the voucher program's previous administrators.

"Immigration Procrastination." In an editorial, the Washington Post (11/20, 4.28M) says that House Speaker Boehner needs to act on immigration reform immediately. The Post says that the House "can't dictate that only border security and deportation are on the table," and adds that Boehner shouldn't try to "tell the Senate what it can and cannot bring to the table in negotiations with the House."

WALL STREET JOURNAL. "J.P. Morgan And Its 'Victims.'" In an editorial, the Wall Street Journal (11/20, Subscription Publication, 5.91M) contends that the Justice Department's settlement with JPMorgan Chase is illogical, overly diffuse, and unfair to the bank.

"Enabling Bashar." In an editorial, the Wall Street Journal (11/20, Subscription Publication, 5.91M) argues that the President's success at disarming Syria of its chemical weapons has been overstated because even as President Bashar Assad claims to be handing over Syria's entire chemical arsenal for destruction, US intelligence believes he is hiding weapons from inspectors, and even if he is handing over his entire arsenal, he can easily purchase more from North Korea. The Journal adds that if it is becoming less likely that Assad will be driven from power because as long as the goal of US policy is to rid Assad of his chemical weapons rather than to unseat him, Assad must remain in power to hand over the weapons. This, in turn, gives Assad an incentive to extend the process while his forces make gains against the rebels.

"Arizona's Solar Flare-Up." The Wall Street Journal (11/20, Subscription Publication, 5.91M) editorializes that opposition to Arizona utility administrators' attempts to reform its net metering program for solar power users sets a bad precedent for similar changes contemplated in other states. The article characterizes the net metering program as a form of corporate welfare for solar-leasing companies that unfairly burdens poor and middle-class users of the state's power grid. However, solar companies used former Obama campaign advisers and organizations to mount a public relations campaign to pressure the state utility commission to a weak compromise.

Location: 2175 Rayburn.

Other:KERRY, HAGEL – AUSTRALIA – WREATH LAYING — Secretary of State John Kerry and Secretary of Defense Chuck Hagel meet with Australian Foreign Minister Julie Bishop and Defence Minister David Johnston at the U.S. Department of State for annual consultations at the Australia-U.S. Ministerial (AUSMIN). Secretary Kerry, Secretary Chuck Hagel, Australian Foreign Minister Julie Bishop, and Australian Minister of Defense David Johnston participate in a full honor wreath-laying ceremony at the Tomb of the Unknown Soldier at 8:30 a.m. EST, Arlington National Cemetery, Va. Notes: Signing ceremony at Department of State with Secretary Kerry; Hagel; Bishop; Johnson at 2:30 p.m.

DUNCAN – LOW-SKILLED ADULTS — Secretary Duncan will deliver remarks at the Kick-Off Session of the National Engagement Process to Develop a Plan to Improve the Skills of Low-Skilled Adults, examining recently released results of the OECD Program for the International Assessment of Adult Competencies (PIAAC) as they apply to low-skilled adults in the U.S. The assessment, conducted in 2011-12, measured skills and competencies of adults aged 16-65 in 23 participating countries. Location: U.S. Department of Education auditorium, 400 Maryland Ave., S.W. 9:30 a.m.

AEI – SENATOR CORNYN — The future of US-India relations: A keynote by Senator John Cornyn. [Http://aei.org/events/2013/11/20/the-future-of-us-india-relations-a-keynote-by-senator-john-cornyn/](http://aei.org/events/2013/11/20/the-future-of-us-india-relations-a-keynote-by-senator-john-cornyn/) Location: SVC 203, Capitol Visitors Center. 8:30 a.m. – 10:30 a.m.

AEI — FOREIGN POLICY – SENATOR RUBIO — Restoring principle: A foreign policy worthy of the American dream. [Http://aei.org/events/2013/11/20/restoring-principle-a-foreign-policy-worthy-of-the-american-dream/](http://aei.org/events/2013/11/20/restoring-principle-a-foreign-policy-worthy-of-the-american-dream/) Location: AEI, Twelfth Floor, 1150 Seventeenth Street, NW. 10 a.m. – 10:45 a.m.

NAIC LEADERS – PRESIDENT, MEETING – PRESS CALL — Leaders of the National Association of Insurance

Commissioners (NAIC) will be available via conference call to discuss ACA implementation issues and other regulatory matters they addressed with President Obama following a meeting at the White House. Speakers: Senator Ben Nelson, NAIC Chief Executive Officer; Jim Donelon, NAIC President and Louisiana Insurance Commissioner and other state regulators.

Last Laughs:

LATE NIGHT POLITICAL HUMOR.

Jay Leno: "Former President George Bush on the show tonight. Very excited about that. As you know, he's nicknamed 43 because he was the 43rd President. And President Obama is nicknamed 44 because that's how many people have signed up for Obamacare."

Jay Leno: "In a TV interview, the mayor's brother Doug said that everyone thinks that Mayor Ford is a conservative. They said no, no, he's not. They say he's a social liberal who loves President Obama. Mayor Ford loves president Obama. What good luck that is, huh? The only politician supporting the President is the crack-smoking mayor of Toronto."

David Letterman: "There's also a gray shortage. Up it's up to \$4 a gallon. Governor Chris Christie wants to build a gray pipeline."

Conan: "President Obama is being criticized for not attending today's ceremony commemorating the Gettysburg Address. Yeah. In fairness, though, Lincoln did not attend Obama's 'Sorry About This Crappy Website' speech."

Jimmy Fallon: "I heard that Joe Biden has been noticeably absent from several White House events in the last few weeks. People haven't seen him in a while. Which can only mean one thing, somebody forgot they started a game of hide and seek with Joe Biden."

DOI in the News:

USGS FINDS LAND SINKING RAPIDLY IN CALIFORNIA'S CENTRAL VALLEY. The [San Jose \(CA\) Mercury News](#) (11/22, 731K) reports that "land in California's San Joaquin Valley is sinking more rapidly than usual because of increased pumping from underground sources, a phenomenon that is damaging vital water infrastructure," the USGS revealed Thursday. The USGS study found that "land sinking had been measured at

nearly one-foot per year in one area, and that it is reducing the flow capacity of the Delta-Mendota Canal and the California Aqueduct, two key sources of water." The BOR, "which operates the canals, will use the USGS data to mitigate damage and factor into current and future construction projects." Richard Woodley, the bureau's assistant regional director, said, "Nothing to date, to my knowledge, has affected our ability to deliver water to our customers. Our main point is to get ahead of that."

The Modesto (CA) Bee (11/21, 208K) reports that "parts of Merced near El Nido have dropped more than 21 inches in just two years." Moreover, "researchers warn the deepening sinkhole now is spreading across 1,200 square miles – from the cities of Merced on the north, to Los Banos on the west, Madera on the east and Mendota on the south." The article notes that "that" a much larger region than previous studies had ever documented."

Also providing coverage are the Sacramento (CA) Bee (11/21, 749K), the Fresno (CA) Bee (11/21, 327K), the Stockton (CA) Record (11/21, 123K), the Franklin (IN) Daily Journal (11/22, 51K), NBC News (11/22, 6.79M), KTVU-TV San Francisco (11/22, 128K), KTVU-TV San Francisco (11/22, 128K), KOVR-TV Sacramento, CA (11/21, 47K), KBFX-TV Bakersfield, CA (11/22, 12K), and KFMB-TV San Diego (11/22, 15K).

STUDY FINDS GULF WETLANDS LOSS RATE MORE THAN DOUBLED BETWEEN 2004 AND 2009. The New Orleans Times-Picayune (11/22, 700K) reports that "the loss of Gulf of Mexico saltwater wetlands more than doubled between 2004 and 2009 when compared to an earlier five-year period," according to a federal report released on Thursday. The report by the FWS and the National Oceanic and Atmospheric Administration found that "wetlands loss rose from about 45,000 acres between 1998 and 2004, to more than 95,000 acres from 2004 to 2009." The rising rate "contributed to the Gulf Coast accounting for 71 percent of wetlands lost across the contiguous United States from 2004 to 2009." Interior Secretary Sally Jewell noted that the "overall annual losses are equivalent to an area four times the size of Miami." Jewell said, "Wetlands are important to our nation's heritage, economy and wildlife – especially when it comes to coastal communities. When a study shows that an area four times the size of Miami is disappearing every year, it underscores the importance of strengthening our collective efforts to improve wetlands management, to reduce losses and to ensure coastal infrastructure and resources are protected."

KCSG-TV St. George, UT (11/22, 43) reports that FWS Director Dan Ashe said, "In addition to the important economic and safety benefits they provide to people, coastal wetlands are also vitally important to native fish and wildlife species. While they comprise less than 10 percent of the nation's land area, they support 75 percent of our migratory birds, nearly 80 percent of fish and shellfish, and almost half of our threatened and endangered species. We can't sustain native wildlife for future generations without protecting and restoring the coastal wetlands that support them."

INTERIOR NOT HIT AS HARD WITH FURLOUGHS AS OTHER AGENCIES DURING SHUTDOWN. In its "Federal Eye" blog, the Washington Post (11/21, 4.28M) reports that "the furloughs that took place during the recent 16-day government shutdown hit agencies unevenly." A new graphic from a Web site that describes itself as "a guide to master's degrees in accounting" shows which employees were affected most. Of note, the graphic showed that 19% of the Interior Department worked during the shutdown, which was not as good as "State, Defense, Veterans Affairs, Homeland Security, and Justice," but better than "NASA, Education, Housing and Urban Development, Education, and the Environmental Protection Agency, each of which sent at least 94 percent of their employees home during the shutdown."

SENATE COMMITTEE PASSES GRAZING IMPROVEMENT ACT. The Bismarck (ND) Farm and Ranch (11/22, 111K) reports that the Public Lands Council (PLC) and the National Cattlemen's Beef Association (NCBA) hailed the Senate Committee on Energy and Natural Resources for passage of S. 258, the Grazing Improvement Act of 2013. Scott George, NCBA president and Wyoming rancher, said, "The act is vital for ensuring the fate of our producer's permits — livelihoods are depending on the efficiency of the system — which undoubtedly needs restructuring. Not only will the bill codify the language of the decades old appropriations rider, it will also allow categorical exclusions from NEPA for permits continuing current practices and for crossing and trailing of livestock. Additionally, it will allow for NEPA on a broad scale, reducing paper pushing within the federal agencies."

FEDERAL AGENCIES HEADED TO COURT OVER HISTORIC LOWELL DAM. The Lowell (MA) Sun (11/22,

142K) reports that "two federal agencies that have been fighting with each other over Boott Hydropower's controversial project to install a new inflatable flashboard at Pawtucket Dam are now heading to federal court." The US Department of Justice has filed a lawsuit against the Federal Energy Regulatory Commission "asking the US Court of Appeals to review FERC's earlier decision to allow Enel Green Power North America to replace the existing wooden flashboard system on Pawtucket Dam with a rubber-made pneumatic one." The lawsuit comes from the Interior Department, according to Peter Aucella, assistant superintendent of Lowell National Historical Park.

CONSERVATION GROUPS CALL FOR PROTECTION OF NORTHERN SPOTTED OWLS. The Chattanooga (11/21, 17K) reports that in a letter to Interior Secretary Sally Jewell and Agriculture Secretary Tom Vilsack, "a coalition of forest and wildlife conservation groups on Thursday called on the Obama administration to implement measures in the final Northern Spotted Owl Recovery Plan to protect post-fire forest habitats and structures used by the threatened owls and their prey." The November 21 letter notes that "action is needed as a result of legislative proposals, such as H.R. 1526, that would expedite post-disturbance logging and because of projects currently being considered by federal agencies." Steve Holmer, senior policy advisor with American Bird Conservancy, said, "Plans to boost post-fire logging in Spotted Owl habitat ignore the best-available science and would cause harm to old-growth forests. Government scientists have concluded that in order to recover the rapidly declining Northern Spotted Owl population, protection is needed for forest structures created by fires such as large standing dead trees that are used by the owls to nest in."

CALIFORNIA LAWMAKERS RAISE CONCERNS ABOUT WATER SUPPLIES. The Ridgecrest (CA) Daily Independent (11/21, 23K) reports that on Wednesday, California Congressional members sent a letter to the Interior and Commerce Department secretaries expressing concern about water supplies in Southern California. The letter, signed by eight Republican Congressional members called on Interior Secretary Sally Jewell Commerce Secretary Penny Pritzker and "to take immediate action to mitigate the catastrophic effects on the people of California that environmental regulations in the Sacramento-San Joaquin Bay Delta are having in our communities by denying them the water they contract and pay for."

FISCAL WATCHDOGS CRITICIZE TRIP TO VIRGIN ISLANDS FOR CORAL REEF TASK FORCE EVENT. The Washington Times (11/22, Swarts, 417K) reports that "a group of federal officials skipped chilly Washington this month for a taxpayer-funded trip to the Virgin Islands in the name of protecting the world's coral reef." The organizer, the US Coral Reef Task Force, "isn't saying much about the total cost or reasons for the trip or why officials chose the St. Croix beachfront resort Buccaneer Hotel...as their destination." Federal officials "defend the trip by saying that on-scene experience about Caribbean coral reefs is important to the mission of conservation." However, "for fiscal watchdogs clamoring for reducing spending and the national debt, the trip stands as a powerful symbol of a government that has little sensitivity to appearances or the bottom line." An Interior Department representative said the task force meeting was "held in conjunction with a meeting of the Caribbean Regional Planning Body, and many people participated in both." According to the representative, "travel to the coral reefs directly is necessary, as they are 'places where on-the-ground conservation activities are ongoing and local management issues can be effectively highlighted and assessed for progress to goal.'"

SECRETARY JEWELL TOUTS INTERIOR'S WORK ON TRIBAL ISSUES. For the Char-Koosta News (11/22, 12K), Interior Secretary Sally Jewell writes that the 2013 White House Tribal Nations Conference was an opportunity to highlight "the work we are doing on a number of issues – including a top priority of restoring tribal homelands." She notes her announcement "that the Administration has set an ambitious goal of placing more than 500,000 acres of land into trust by the end of the President's term," and that already, the BIA has "processed more than 1,400 individual land into trust applications since 2009, accepting more than 230,000 acres in trust on behalf of tribes, so we are well on our way to meet this new ambitious goal." In conclusion, Jewell says she looks "forward to building on the progress we have made to promote prosperous and resilient tribal nations and to upholding President Obama's commitment to a strong government-to-government relationship with tribal nations."

SECRETARY JEWELL'S MITIGATION ORDER PRAISED. In an editorial, the Paris (TN) Post-Intelligencer (11/21, 25K) notes that Gina Hancock, the Tennessee Director of the Nature Conservancy, has praised a recent order by Interior Secretary Sally Jewell to enforce the principle of mitigation. Hancock said, "This may sound like bureaucratic government-speak, but it actually is an important step." Hancock added, "It is an important way to accommodate our growing energy, transportation and water needs while protecting the precious natural

resources that we all depend on.”

CROWD WANTS STORNETTA PUBLIC LANDS INCLUDED IN CALIFORNIA COASTAL NATIONAL MONUMENT. In a piece for the [Sonoma West \(CA\) Times & News](#) (11/22, 24K), Michael Haran recounts Interior Secretary Sally Jewell's visit to North California, where she met with support for including the Stornetta Public Lands into the California Coastal National Monument. Jewell told a “crowd of over 200 people that by her presence she was confirming President Obama's commitment to land preservation for future generations.” Jewell “asked for a show of hands for how many would prefer the Monument designation by a Presidential Proclamation or an Act of Congress.” According to Haran, “overwhelmingly, people wanted a Presidential Proclamation but then several shouted, ‘Anyway we can!’”

ADDITIONAL COVERAGE OF SECRETARY JEWELL'S VISIT TO CAPE ROMAIN NATIONAL WILDLIFE REFUGE. Additional coverage of Interior Secretary Sally Jewell's visit to the Cape Romain National Wildlife Refuge was provided by the [Rock Hill \(SC\) Herald](#) (11/21, 89K).

America's Great Outdoors:

National Park Service:

REPUBLICANS PUSH BILLS TO PROTECT PARKS DURING SHUTDOWNS. In its “E2 Wire” blog, [The Hill](#) (11/22, 194K) reports that a group of Republican senators is “pushing to protect national parks in the event of a future government shutdown.” Sen. Jeff Flake (R-AZ) introduced legislation on Wednesday that “would allow states to keep national parks open during another government shutdown by speeding up the agreement process between states and the Interior Department.” Also, Sens. Lamar Alexander (R-TN) and Orrin Hatch (R-UT) are “attempting to tack on an amendment to their chamber's Defense authorization bill that would reimburse states that paid for the operation of parks during the 16-day shutdown.”

The [Salt Lake \(UT\) Tribune](#) (11/22, 343K) reports that House Republicans “want the federal government to refund money that Utah and some other states paid to re-open national parks during the October government shutdown.” Also, they “want to create a process to allow states to temporarily step in if Congress causes another closure and, for the long term, they'd like the feds to hand over control of some public lands permanently to the states.” Thursday, the House Natural Resources subcommittee on public lands “debated these demands, both small and large, in response to the recent 16-day partial shutdown that left tourists shut out of national parks across the country.”

The [Washington Examiner](#) (11/22, Colman, 319K) reports that “the GOP members, all of whom voted against the bill to end the government shutdown last month, also voiced support for a bill that would allow states to operate the parks during a shutdown — effectively shielding those lawmakers from constituent criticism in the event of another shutdown.” However, “the measure faced criticism from the administration, which called it an end-around to passing budgets.” Bruce Sheaffer, comptroller of the NPS, said in his testimony, “Any change in law to try to address the impacts of a shutdown on these particular industries, or on any sectors of the economy, in advance of a future federal government shutdown, is not a responsible alternative to simply making the political commitment to provide appropriations for all the vital functions the federal government performs.”

The [Cronkite News](#) (11/22) reports that Rep. Peter DeFazio “agreed that the service could be wasting its time preparing for something that should not happen again.” DeFazio said, “For something that's happened twice since I've been in Congress for 27 years, and hopefully will never happen again, I would think this would be really a waste of taxpayers' money to enter into these proactive agreements with the states.”

Also reporting on the story are the [National Journal](#) (11/22, Subscription Publication, 427K) and the [Great Falls \(MT\) Tribune](#) (11/21, 90K).

PARK POLICE CHIEF ANNOUNCES RETIREMENT. The [AP](#) (11/22, Tucker) reports that Teresa Chambers, the chief of the United States Park Police, announced Thursday that “she plans to retire next month after more than three decades in law enforcement.” Chambers “plans to step aside in early December on her 35th anniversary as a sworn police officer.” No successor was immediately named.

The Washington Post (11/22, Hermann, 4.28M) reports that Chambers said "it was important for her to leave the federal agency on her own terms." In an interview, Chambers said, "There wasn't a better time to walk out."

Also providing coverage are the Washington Post (11/21, Press, 4.28M), the Wall Street Journal (11/22, Subscription Publication, 5.91M), the Charlotte (NC) Observer (11/21, 713K), and WJLA-TV Washington (11/22, 118K).

FLORIDA AGENCY AGREES HIGH WATER IN EVERGLADES NEEDS TO BE MANAGED. The Miami Herald (11/22, Cocking, 806K) reports that the Florida Fish and Wildlife Conservation Commission voted "unanimously Wednesday in Weston to push state and federal agencies to adopt a high-water emergency policy to protect plants and animals in the central Everglades." The commission supported "the plan developed by commissioner Ron Bergeron — its Everglades point man — calling for time and depth limits on water levels in the vast state conservation area that lies between I-75 and Tamiami Trail and a 'tool box' for sending excess water south to Everglades National Park." Bergeron said "wildlife can not survive completion of various Everglades restoration projects over the next 30 years unless water levels are regulated in the interim."

NEVADA DELEGATION PUSHING FOR TULE SPRINGS FOSSIL BEDS TO BECOME NATIONAL PARK. KLAS-TV Las Vegas (11/22, 36K) reports that "the entire Nevada delegation is supporting a bill to make Tule Springs a national monument." Gov. Brian Sandoval and Nellis Air Force base are also supporting the effort. Supporters of the Tule Springs Fossil Bed National Monument bill say the "park could generate millions of eco-tourism dollars and allow people to witness excavations."

ROCKY MOUNTAIN NATIONAL PARK PICKED AS ONE OF THE TOP PLACES TO VISIT. The Denver Post (11/22, Parker, 949K) reports that Rocky Mountain National Park has been included among 20 destinations on the 2014 Best of the World List as the top places to visit next year, according to a new list released Thursday by National Geographic Traveler Magazine. Keith Bellows, editor in chief of National Geographic Traveler magazine, said, "Our annual Best of the World list doesn't reflect hot spots drawn from celebrity sightings or travel statistics. It reflects the expertise and experience of National Geographic Travel's huge network of global travel experts."

SURVEY FINDS VISITORS SATISFIED WITH YOSEMITE. The Modesto (CA) Bee (11/21, 208K) reports that "a survey of visitors to Yosemite National Park showed a 98 percent satisfaction rate with park facilities, services and recreational opportunities." Two hundred twenty-five visitors completed the survey in August 2013 in conjunction with the University of Idaho, Park Studies Unit for the NPS. Don Neubacher, Yosemite superintendent, said, "A high visitor satisfaction rate is something we can all celebrate. Yosemite employees and partners strive to provide exceptional service to the four million people who enjoy the park each year."

NEW SUPERINTENDENT KENAI FJORDS NATIONAL PARK NAMED. The Seward (AK) City News (11/22) reports that Rebecca R. Lasell has been chosen as the new Superintendent of Kenai Fjords National Park. NPS Alaska Regional Director Sue Masica said, "Rebecca's demonstrated experience in complex landscape level planning, tribal consultation, renewable energy, and external and internal partnerships will be a great fit at Kenai Fjords." Lasell said, "Kenai Fjords is an amazing and valuable resource. I am honored and thrilled to join the dedicated professionals of the NPS. I look forward to working closely with the local tribes, community, and partners on tourism and stewardship opportunities."

PUBLIC INPUT SOUGHT FOR NEW SITES FOR PUBLIC ACCESS TO CHESAPEAKE BAY WATERSHED. The Dover (DE) Post (11/21, 79K) reports that the NPS and "a team of state and local government partners are requesting public input to identify potential new sites for public access to the Chesapeake Bay and its tributaries." They will "include sites appropriate for boat ramps, fishing access, places to swim and picnic, or bird watch." The NPS has "developed an interactive web-based mapping tool for the public to locate, identify, and suggest new sites."

Also reporting on the story is WGMD-FM Rehoboth Beach, DE (11/22, 2K).

NPS SEEKS COMMENT ON FERRY FARM PLAN. The Fredericksburg (VA) Free Lance-Star (11/21, 113K) reports that the George Washington Foundation is seeking to redevelop Ferry Farm. Because the land is a

National Historic Landmark, and because Congress provided funds for its purchase, the Interior Department "holds an easement on it to ensure proper preservation of this one-of-a-kind place." On Wednesday, the NPS "posted online its draft Environmental Assessment of the foundation's Site Treatment Plan for Ferry Farm," and it "invites the public to comment on the plan for 30 days that end at the close of business on Monday, Dec. 23," according to Park Service historian Noel G. Harrison.

NPS CRITICIZED FOR PROPOSED CHANGES IN OZARK NATIONAL SCENIC RIVERWAYS PLAN. In an op-ed for the [Farmington \(MO\) Daily Journal](#) (11/22, 7K), Congressman Jason Smith writes that the changes proposed by the NPS in its new management plan for the Ozark National Scenic Riverways "would have a devastating impact on the economies of many communities." He argues that "restricting access to the park and closing public access points are extreme measures that do not make sense." Smith notes that he raised these concerns to Interior Secretary Sally Jewell in July but despite his warning, "further restrictions were included in the new management plan."

WPOST CRITICIZES COUNCIL VOTE ON DISTRICT OF COLUMBIA HEIGHT RESTRICTIONS. The Washington Post (11/22, 4.28M) editorializes on the District of Columbia Council's vote to oppose changing the Federal law that limits building heights in the District. The Post's editors say the vote was a "stunning repudiation" of the Council's claimed principles of "more home rule for local officials," and making the city "more affordable for residents of limited or modest means." Though the vote was symbolic, the National Capital Planning Commission followed the Council's lead and did not make any meaningful change to the building height restrictions. The Post called it "astonishing that this reasonable accommodation to update rules crafted for a different time was rejected."

Bureau of Land Management:

BLM PLANS TO GATHER 700 WILD HORSES IN WYOMING. The [Columbus \(IN\) Republic](#) (11/22, 80K) reports that the BLM is "planning to begin gathering wild horses in southwest Wyoming this week." According to a BLM press release, "horses will be collected from the Adobe Town and Salt Wells Creek herd management areas located south of Interstate 80 to the Wyoming-Colorado border from Rock Springs to Wamsutter." The BLM "plans to gather about 700 wild horses and treat female horses with fertility control."

Also reporting on the story are the [Billings \(MT\) Gazette](#) (11/22, 206K), the [Casper \(WY\) Star-Tribune](#) (11/22, 90K), and [KGWN-TV](#) Cheyenne, WY (11/22, 519).

ACTIVIST PLANTS TREE SLAB IN BLM PARKING LOT. [KOBI-TV](#) Medford, OR (11/22) reports that George Sexton protested the harvesting of trees during the Cottonwood Timber sale by planting a tree slab estimated to be "260 years old" in the BLM's parking lot. According to Sexton, the problem is that "a BLM resource area manager signed documentation in Medford Federal District Court saying no trees 'with old growth character' would be cut there."

Fish and Wildlife Service:

FWS REPORT DETAILS LOSS IN FUNDS FROM SEQUESTRATION. The [Baxter \(AR\) Bulletin](#) (11/21, 28K) reports that the FWS has "put the states on notice that government funding probably won't be adequate to keep its National Fish Hatchery System entirely afloat." The FWS has released the 2013 National Fish Hatchery System Strategic Hatchery and Workforce Planning Report to "summarize the service's problems now with sequestration-related cuts." According to FWS Director Dan Ashe, sequestration "slammed federal hatcheries to the tune of \$2.1 million in fiscal year 2012 that ended Sept. 30. Up to \$6 million in funding is at risk during the next 10 months if sequestration cuts go unchecked."

In his column for the [Bismarck \(ND\) Tribune](#) (11/22, 22K), Brian Gehring writes that "looking at the funding priorities" the FWS has "outlined, it appears that actually raising fish for people to catch is at the bottom of the list and would be the first program cut." Gehring urges the FWS to work with North Dakota in looking for solutions. He notes that North Dakota has had "a long-standing cooperative working relationship with federal and state agencies when it comes to growing and stocking fish."

DECISION ON THE STATUS OF THE WHITE BLUFFS BLADDERPOD DELAYED. The Tri-City Herald (WA) (11/21, 100K) reports that the FWS has delayed a final ruling on the endangered status of the White Bluffs Bladderpod found in Benton and Franklin Counties. The agency was scheduled to make a decision Thursday, but now, the ruling has been pushed back to December 20th.

Also reporting on the story is KNDU-TV Yakima, WA (11/22, 3K).

ALCOA AGREES TO PROTECT YADKIN RIVER GOLDENROD. The Charlotte (NC) Observer (11/21, 713K) reports that Alcoa has signed an agreement with the FWS to "protect the world's only known population of the Yadkin River goldenrod."

ANOTHER ENDANGERED RED WOLF FOUND DEAD IN NORTH CAROLINA. The New Bern (NC) Sun Journal (11/22, 47K) reports that "a sixth red wolf in the past month of the fewer than 100 now in the wild was killed by apparent gunshot and recovered" by the FWS on Thursday. David Rabon, FWS Red Wolf Recovery Program coordinator since 2009, said "the death brought the total of red wolves to 14 that have died since Jan. 1." Rabon said, "The Fish and Wildlife Service offers a reward but the level of attention that this has brought has grouped a number of organizations together that don't always think alike."

US Geological Survey:

100 MILLION-YEAR-OLD SEAWATER DISCOVERED IN CHESAPEAKE BAY. WTKR-TV Norfolk, VA (11/21, 25K) reports that "scientists drilling in the Chesapeake Bay say they've found the oldest body of seawater ever found." According to the article, "the water is estimated to be 100 to 145 million years old and was found 1.1 miles deep inside a massive crater." Study leader Ward Sanford, a hydrologist with the USGS, said, "The water was in the sediment long before the impact occurred. The impact simply reshuffled the sediment in large blocks, which helped preserve it."

USGS RESEARCHERS LOOKING FOR LEAKS IN WHITE BEAR LAKE. The Minneapolis- St Paul (MN) Press Publications (11/22, 1K) reports that scientists with the USGS have begun "the next phase of a lake study" with "seismic reflection survey equipment, otherwise known as the 'towfish'" being deployed to White Bear Lake. USGS hydrologist Perry Jones and "a team of three took the seismic readings Nov. 13 as part of phase two of his 2012 groundwater and surface water interactions study."

Securing America's Energy Future:

Renewable Energy:

JOSHUA TREE NATIONAL PARK RAISES CONCERNS ABOUT PROPOSED SOLAR PLANT'S IMPACT. KGET-TV Los Angeles (11/22, 15K) reports that the NPS says a proposed solar power tower project just outside the boundaries of Joshua Tree National Park would have "unavoidable and unmitigatable significant adverse impacts" to the park. The summation by the service "came in the form of the agency's comments on the Draft Supplemental environmental Impact Statement (SEIS) on BrightSource Energy and Abengoa Solar's proposed Palen Solar Electric Generating System (PSEGS), which would place 160,000 billboard-sized mirrors surrounding two 750-foot solar power towers about ten miles from the park's eastern boundary." The NPS recommended scrapping "the power tower design and go back to the drawing board to create a solar power plant with less visual impact than the two power towers, which at 750 feet would tie for sixth place among the tallest structures in California."

Onshore Energy Development:

BLM REAUTHORIZES RUBY PIPELINE AFTER NEW REVIEW. The Houston Chronicle (11/22, Sonner, 2.26M) reports that the BLM intends to reissue a right of way for Kinder Morgan's Ruby Pipeline "now that government scientists have completed a second environmental review they say corrects deficiencies in the first one struck down by a US appeals court." The BLM "published a new record of decision in the Federal Register on Thursday and issued a revised final supplemental environmental impact statement." According to the article,

"environmentalists who filed a lawsuit in an unsuccessful effort to block construction of the pipeline built in 2010 said they were reviewing the new documents but still found them to be inadequate and will consider further legal action."

Also reporting on the story are the Columbus (IN) Republic (11/22, 80K) and the Casper (WY) Star-Tribune (11/22, 90K).

GOV. OTTER SAYS BLM RUSHED GATEWAY WEST APPROVAL. The Salem (OR) Capital Press (11/21, 113K) reports that Gov. Butch Otter and "southern Idaho farmers and ranchers in the path" of the proposed Gateway West transmission line believe the BLM has "rushed its decision on the project, using guidelines that overstate potential impacts to sage grouse." Heather Feeney, spokeswoman for the BLM's Idaho office, said the bureau is "required by law to render a prompt decision for the applicants." Furthermore, Feeney "stressed the project is identified as a national priority under the president's energy strategy." She said that "the decision can always be revisited once the sage grouse management plan is implemented."

BLM AUCTION NETS \$3.4 MILLION IN UTAH OIL AND GAS LEASES. The St. George (UT) News (11/21, 3K) reports that the BLM-Utah "held its quarterly oil and gas lease sale Tuesday and sold 29 parcels out of 35 parcels – a total of 44,000 acres – offered in Emery, Carbon and Uintah counties that produced \$3.4 million." BLM-Utah State Director Juan Palma said, "In the year leading up to today's sale, we conducted in-depth environmental analysis and offered opportunities for public participation as part of our continued national leasing reform implementation efforts. The combination of thorough environmental analysis and public participation helps us ensure that energy resources on Utah's public lands are responsibly developed in the right places and in the right ways."

Also reporting on the story is KCSG-TV St. George, UT (11/22, 43).

BLM APPROVES NATURAL GAS INFRASTRUCTURE PROJECT NEAR WAMSUTTER. The Casper (WY) Star-Tribune (11/22, 90K) reports that the BLM has "approved plans to build a new access road, two new pipelines and two natural gas compression stations south of Wamsutter." The decision clears the way for Samson Resources Co. and Mountain Gas Resources to begin construction on the Endurance/Barricade Gas Infrastructure Project.

HEARING UNDERWAY ON VIOLATIONS ISSUED TO FARRELL-COOPER MINING COMPANY. NPR (11/21, 465K) reports that "there's a hearing underway in Poteau this week, where attorneys for Farrell-Cooper Mining Company are appealing federal violations at three of its former mines." The Tulsa branch of the Office of Surface Mining "issued the violations to Farrell-Cooper, saying the mines are out of compliance with the Surface Mining Control and Reclamation Act." Chris Holmes, OSM spokesman said, "If you've got gently rolling hills the law says you should return the land to its closest form and function with those gently rolling hills. And we require the states to meet those minimum federal standards that are set up, regardless of where they are. Sometimes that can be a little tricky."

Offshore Energy Development:

BSEE ORDERS FIVE COMPANIES TO HALT OFFSHORE WORK. The FuelFix (11/21, 7K) reports that the BSEE has ordered five companies to "halt offshore oil and gas operations, after they failed to give regulators an audit of safety plans newly required since the 2010 Deepwater Horizon disaster." The firms "forced to shut down their offshore work — all relatively small operators — are Houston-based Breton Energy, EP Energy and XTO Energy, as well as Louisiana-based firms Virgin Offshore USA and Matagorda Island Gas Operations." According to the article, "at issue is a requirement that companies working offshore implement broad 'safety and environmental management systems' for holistically assessing and managing risks at every stage of their work." BSEE Director Brian Salerno said his agency would "vigorously enforce compliance with this fundamental requirement." Salerno said in a statement, "An effective, fully implemented SEMS program is essential to reducing risks across offshore operations. BSEE must be assured that companies are addressing the key elements of SEMS and that they are not needlessly putting their workers and the environment at risk."

Also reporting on the story are the "E2 Wire" blog of The Hill (11/22, 194K), the Maritime Executive (11/21, 21), the Oil and Gas Journal (11/22, 1K), and the Law 360 (11/22, 18K).

BLACK ELK ENERGY OFFSHORE OPERATIONS STILL PAYING FOR COSTS ASSOCIATED WITH 2012 EXPLOSION. The [Houston Business Journal](#) (11/21, Subscription Publication, 91K) reports that Black Elk Energy Offshore Operations LLC has “spent millions so far this year on costs associated with the 2012 explosion at its West Delta 32 Gulf of Mexico platform, and it’s still dealing with the repercussions of the incident.” According to regulatory filings, Black Elk “spent \$4.7 million in the third quarter — and a total of \$12.4 million in the first nine months of the year — on costs associated with the Nov. 16, 2012, explosion, which killed three subcontractor workers.”

REP. CAPPS CALLS FOR MORATORIUM ON CALIFORNIA OFFSHORE FRACKING. The [San Jose \(CA\) Mercury News](#) (11/22, 731K) reports that Rep. Lois Capps has “asked for a moratorium on offshore fracking after reports that the controversial oil production process has been used in coastal waters for decades.” In a letter sent Tuesday to Interior Secretary Sally Jewell and EPA Administrator Gina McCarthy, Capps said that fracking “in federal waters off the coast should be halted until there’s a study to determine its impact on the environment and public health.” Capps wrote that “there has been ‘inadequate oversight’ of offshore fracking, and all current and proposed fracking projects should be halted pending a comprehensive review.”

BP ASKS FIFTH CIRCUIT TO ORDER LIMIT ON OIL SPILL PAYMENTS. Bloomberg News (11/22, Fisk, Calkins, 1.91M) reports that BP Plc on Thursday asked the Fifth Circuit Court of Appeals “for an injunction to stop some payments under a \$9.2 billion settlement tied to the 2010 Gulf of Mexico oil spill,” arguing that US District Judge Carl Barbier, who is overseeing the case, “ignored the court’s mandate to review claims.” BP is challenging Judge Barbier’s decision “upholding the interpretation of the agreement” by claims administrator Patrick Juneau, contending that Juneau “approved millions of dollars in ‘fictitious’ payments to businesses for economic losses that weren’t related to the worst offshore spill in U.S. history.”

Tackling America’s Water Challenges:

GOOSE BAY MARINA DESIGN OPEN HOUSE LIGHTLY ATTENDED. The [Helena \(MT\) Independent Record](#) (11/22, 45K) reports that “only a handful of people showed up Wednesday night to peruse the newest design proposed” by the BOR for Goose Bay Marina. The article notes that “it was a stark contrast to earlier meetings, where representatives of the federal agency met with a room full of area residents who were angry over proposed upgrades to the marina and campground on the southeast side of Canyon Ferry Reservoir.” Scott Joyner, who was a member of the Goose Bay homeowners association, said “he didn’t plan on attending Wednesday’s open house because he felt as though the decision on how to proceed already had been made, and he didn’t want to waste his time anymore.”

CALIFORNIA URGED TO UPDATE WATER REGULATIONS. The [Pasadena \(CA\) Star-News](#) (11/21, 81K) editorializes that California is “a different state than...in the mid-1800s” so “water regulations need to reflect that reality.” According to the paper, “this inequity underpins the debate now raging over the governor’s Bay Delta Conservation Plan, a multi-billion project to restore wetlands in the delta while building a more dependable water conveyance system serving agriculture and Southern California users.” It concludes that “until and unless our elected officials in Sacramento start getting pressure to legislate some water parity on the state’s biggest water users, then the rest of us will continue to fight over the remaining 20 percent.”

Additional coverage of the Bay Delta Conservation Plan was provided by the [Chico \(CA\) News and Review](#) (11/22, 101K).

Empowering Native American Communities:

TWO FACTIONS IN BLACKFEET DISPUTE STRIKE DEAL TO MEET PAYROLL. The [Helena \(MT\) Independent Record](#) (11/22, 45K) reports that the two factions of a divided Blackfeet Tribal Business Council have reached “a deal to pay employees and vendors, the tribal chairman said, in the two sides’ first agreement more than a month into an impasse that has crippled tribal operations.” The article notes that “the deal is the first breakthrough in the schism that has pitted four council members on one side against” Chairman Willie Sharp Jr, Forrestina Calf Boss Ribs and three previously suspended council members on the other. Sharp “did not provide details on the payroll deal struck between the two sides, and did not say whether the factions were negotiating a permanent

reconciliation.”

Also reporting on the story is the Sacramento (CA) Bee (11/21, 749K).

GLENDALE CITY COUNCIL SENDING MIXED MESSAGES ON PROPOSED CASINO. The Arizona Republic (11/22, 1.19M) reports that three Glendale City Council members recently “sent a letter to federal officials that denounces the city’s opposition to a proposed casino near its sports and entertainment district.” The three councilmen criticized a letter that City Attorney Michael Bailey sent the Interior Department in September “to affirm the Glendale’s long-held opposition to the Tohono O’odham Nation’s casino plans.” The Nov. 15 letter signed by Councilmen Ian Hugh, Gary Sherwood and Sam Chavira slams Bailey’s memo as “nothing more than a regurgitation of arguments” that have largely been dismissed by the courts.

Top National News:

OBAMA PRAISES REID’S INVOCATION OF “NUCLEAR OPTION” TO ADVANCE NOMINEES IN SENATE. On Thursday, Senate Majority Leader Reid moved through a change in Senate rules dubbed the “nuclear option” that will permit presidential nominees to executive branch positions and Federal courts other than the Supreme Court to move to a final vote with a simple majority, rather than the 60 votes that had been required for cloture. Majority leaders of both parties had been threatening to make such a change for years, but it was the blocking of several of President Obama’s nominees to the US Court of Appeals for the District of Columbia Circuit that led to the action. The vote to accept the rules shift was 52-48, with all 45 Republicans and Democratic Sens. Carl Levin, Joe Manchin, and Mark Pryor opposed.

Coverage focuses on the historic nature of the change, as well as on the likelihood that it will increase tensions between the parties in the Senate and that it could mean President Obama and future presidents will feel free to select more ideological nominees. While print coverage is generally balanced about the pros and cons of the move from a legislative perspective, broadcast network coverage was sympathetic to the change, suggesting it will help break through gridlock.

Bloomberg News (11/22, Bender, Runningen, 1.91M) reports that President Obama said the change “will end an ‘unprecedented pattern of obstruction’” by “a small group of senators that has been harmful to the economy and has blocked his nominations to important government posts.” The President said the 60-vote rule “has been used in many cases ‘just to refight the results of an election.’” McClatchy (11/22, Kumar, 95K) reports the President said, “This isn’t obstruction on substance, on qualifications. It’s just to gum up the works. ... What’s at stake is the ability of any president to fulfill his or her constitutional duty.” Roll Call (11/22, Dennis, Subscription Publication, 87K) says the President said his judicial nominees “had been held up more than twice as long” as his predecessor’s, “even though many end up getting overwhelming votes in the end.”

Zachary Goldfarb writes in the Washington Post (11/22, 4.28M) that the vote “should make it easier for President Obama to accomplish key second-term priorities, including tougher measures on climate change and financial regulation” and “also sets the stage for Obama to appoint new top officials to the Federal Reserve and other key agencies – probably leading to more aggressive action to stimulate the economy and housing market.”

All three broadcast networks reported on the rule change near the top of their Thursday evening newscasts, though none of the three led with the story. The reports stressed how dramatic the change is, but also seemed sympathetic to the Democratic action. ABC World News (11/21, story 2, 1:45, Sawyer, 7.43M) reported, “We know Americans are tired of gridlock in Washington, but today Senate Democrats made a power move to break the hold of the filibuster.” ABC (Karl) added that the filibuster is “a tactic Republicans are using more than ever.”

The CBS Evening News (11/21, story 2, 2:35, Pelley, 5.58M) called it “a historic breach” in the Senate. Democrats “accused Republicans of abusing the filibuster rule to hold up these appointments and they point out that half of all filibusters against presidential nominations in US history have happened just in the Obama Administration.” CBS (Cordes) added, “Leaders from both parties have threatened to deploy this nuclear option for decades, but until now they have never followed through because it fundamentally alters the way the Senate works.”

NBC Nightly News (11/21, story 3, 1:55, Williams, 7.86M) reported, "In Washington, we've all heard that majority rules, but that hasn't always been the rule in the US Senate, for about a generation. In fact, 50 out of 100 votes doesn't win all votes." The rule change "will allow more Obama nominees for things like Federal judgeships to get through without a fight." NBC (Todd) added, "There was a time when Sen. Obama objected to Republican plans to change the rules to help President Bush get nominees through without a filibuster. Well now it's President Obama praising Senate Democrats for doing this."

The AP (11/22, Espo, Fram) more critically reports that Democrats, "sweeping aside a century of precedent...took a chunk out of the Senate's hallowed filibuster tradition" and "cleared the way for speedy confirmation of controversial appointments" made by Obama. While Reid called the vote "a blow against gridlock," Republicans "warned Democrats will eventually regret their actions" once they return to the minority and face nominees from a Republican president. The Hill (11/22, Cox, 194K) reports Senate Minority Leader McConnell said on the Senate floor, "You'll regret this, and you may regret this a lot sooner than you think."

The New York Times (11/22, Peters, Subscription Publication, 9.61M) says while both parties had threatened such a change "for the better part of a decade," they "had always stopped short of carrying out. This time, with little left of the bipartisan spirit that helped seal compromises on filibuster rule changes in the past, there was no last-minute deal to be struck."

The Washington Post (11/22, Kane, Branigin, 4.28M) also seems sympathetic to the change, writing that "the partisan battles that have paralyzed Washington in recent years took a historic turn" with a Democratic move "severely curtailing the political leverage of the Republican minority in the Senate." But the Post says the move assures "an escalation of partisan warfare." The Post also notes that "Reid's move is a reversal of his position in 2005, when he was minority leader."

The Wall Street Journal (11/22, Hook, Peterson, Subscription Publication, 5.91M) says the immediate effect of the rule change will be the clearing of three Obama nominees to the US Court of Appeals for the District of Columbia Circuit, which is generally seen as second only to the Supreme Court in influence, and where many Obama Administration priorities have been and will be fought out. The nomination of Rep. Mel Watt (D-NC) to lead the Federal Housing Finance Agency is also expected to advance shortly. The Huffington Post (11/22, Grim, 11.54M) says the court "has three vacancies and broad jurisdiction" over Federal regulations. The Washington Post (11/22, Leonnig, 4.28M) says over the past two decades, the court "has generally been considered favorable to business, skeptical of regulation and supportive of broad executive powers to wage war and ensure national security."

The Washington Times (11/22, Dinan, Klimas, 417K) says Republicans "feverishly objected" to the change, and "immediately moved to expand the change to include Supreme Court nominees, vowing that they would use Democrats' new rules to push through their own picks to the high court the next time a Republican wins the White House." The Washington Post (11/22, Blake, 4.28M) reports Sen. Charles Grassley said when Republicans return to the majority and a Republican to the White House, "Our side will likely nominate and confirm lower-court and Supreme Court nominees with 51 votes, regardless of whether Democrats actually buy into this fanciful notion that they demolish the filibuster on lower-court nominees and still preserve it for Supreme Court nominees."

The Daily Caller (11/22, Munro, 422K) headlines its report "Obama, Democrats Gut Minority Rights In The Senate," saying the President "lauded the Democratic senators' near unanimous decision Thursday to gut the Senate's 200-year-old policy of granting procedural rights to the minority party, and so help the president pack the courts with ideologically sympathetic judges."

The New York Times (11/22, Hulse, Subscription Publication, 9.61M) examines the ramifications of the change, saying it came "in a politically charged vote Thursday that had been years in the making." Politico (11/22, Everett, Kim, 467K) calls it "a historic rules change."

More Ideological Court Nominees Possible Due To Change. The Wall Street Journal (11/22, Bravin, Subscription Publication, 5.91M) says ideological polarization on Federal courts may grow wider with the rules change, both because current nominees will be able to get through, and because presidents with a solid Senate majority may feel emboldened to pick more radical nominees. Former Justice Department official Christopher

Schroeder, now a Duke University law professor, said, "Some people never even came to mind because of the background threat of the filibuster." A Bush Administration Justice Department official told the Journal much the same thing. Politico (11/22, Epstein, 467K) says the White House believes the rules shift "changes the game on future nominations, allowing it to expand the field of potential choices."

McConnell Says Democrats "Want To Pack The Court." McConnell writes in a USA Today (11/22, 5.82M) op-ed that though Senate Republicans "considered deploying the 'nuclear option'" when Democrats, then in the minority, "embarked on an unprecedented, years-long filibustering frenzy" against President Bush's nominees, the GOP "ultimately (and wisely, in my opinion) declined to do so." McConnell says Republicans "confirmed 215 of President Obama's judicial nominees and rejected only two before this battle began," and that Democrats "want to pack the court with ideological nominees."

Change Makes 2014 Senate Races Even More Significant. Politico (11/22, Isenstadt, 467K) says the rules change "makes Election 2014 that much more consequential" because the power of the majority party "has been significantly enhanced." Republicans need to gain six seats to retake the Senate majority.

Rules Change Seen Placating Democratic Left. The AP (11/22, Cassata) says the filibuster move helps Democrats "placate the party's core liberal activists dispirited by the troubled roll-out of the health care overhaul and government snooping ahead of midterm elections." Charles Chamberlain of Democracy for America said, "There's no question our members are extremely excited. They've been fighting for years."

Congressional Black Caucus Lobbied For Change. Roll Call (11/22, Dumain, Subscription Publication, 87K) reports the Congressional Black Caucus, though a House entity, gave the Senate "a push with a behind-the-scenes lobbying campaign" for the filibuster rules change. CBC Chair Rep. Marcia Fudge (D-OH) said in an interview, "We've been active in terms of calling our senators. We have probably spoken with just about every senator in the past few weeks and months about how this needed to change."

Paul Calls Reid "Big Bully," Senate "Dictator." Politico (11/22, Delreal, 467K) reports Sen. Rand Paul told CNN, "What we really need is an anti-bullying ordinance in the Senate. I mean, now we've got a big bully. Harry Reid says he's just gonna break the rules and make new rules. ... Basically he's become the dictator of the Senate. He's going to bend and break the rules to get his way."

Reid's Office Dismisses Heller's Warning Over Yucca Mountain Revival. Roll Call (11/22, Lesniewski, Subscription Publication, 87K) reports Reid's Nevada colleague Sen. Dean Heller said the rules change "could lead to opening a controversial nuclear waste dump" at Yucca Mountain, saying a future Senate may lower the 60-vote requirement on bills and amendments in addition to nominees, and then revive the Yucca Mountain plan. Reid's office dismissed the notion, with spokeswoman Kristen Orthman saying, "To show how clueless this assertion is, the efforts today to end gridlock in the Senate have nothing to do with legislation like Yucca, and only apply to judicial and executive branch nominations."

Klein Says Obama Now Has Greater Freedom To Fire Appointees. Ezra Klein writes in the Washington Post (11/22, 4.28M) "Wonkblog" that "one important effect" of the rules change is that HHS Secretary Sebelius, Attorney General Holder, "or really any political appointee" can "now be fired" by President Obama because the White House need not fear clearing a 60-vote threshold on a successor. Klein said that bar "became a standard excuse for why no one is losing their job over the HealthCare.gov debacle." More Commentary. In an editorial headlined "Democracy Returns To The Senate," the New York Times (11/22, Subscription Publication, 9.61M) writes, "For five years, Senate Republicans have refused to allow confirmation votes on dozens of perfectly qualified candidates nominated by President Obama for government positions," tried to "nullify entire federal agencies by denying them leaders," and "abused Senate rules past the point of tolerance or responsibility." The rules change "was necessary to turn the Senate back into a functioning legislative body."

The Washington Post (11/22, 4.28M), however, says in an editorial that "the Democratic majority was justified in its grievance but not in its rash action. ... We believe a filibuster should be rarely invoked. But now that it is not an option, the result is likely to be that the partisanship of Congress will seep increasingly into the judiciary, as presidents feel no obligation to search for balance or moderation in their nominations." The Post says that though Republicans "proved incapable of exercising their minority rights in a responsible way," Reid "proved not enough of a leader to resist the 'naked power grab.'"

The Wall Street Journal (11/22, Subscription Publication, 5.91M) argues in an editorial that Reid was pressured by Senate liberals to make the change, arguing that those Democrats who were part of the 60-senator majority at the start of President Obama's term got used to passing legislation without resistance and view the minority party as an irritant to be overcome. The Journal says, however, that Democrats should be wary of the fact that they have set the stage for a future repeal of the Affordable Care Act with just 51 votes.

USA Today (11/22, 5.82M) editorializes that the rules change "is sure to worsen partisanship in a body that is already dangerously dysfunctional," but that the GOP brought it "on itself" with "repeated abuse of the filibuster to block highly qualified nominees." USA Today calls the "court-packing" accusation "ludicrous" because there are three vacant seats on the District of Columbia Circuit bench.

Eugene Robinson writes in his Washington Post (11/22, 4.28M) column that it was "long past time" for the rules change, which "isn't about partisan politics" but rather about making the Senate "function the way the Framers of the Constitution intended."

Ruth Marcus argues, however, in her Washington Post (11/22, 4.28M) column that Democrats "made an understandable mistake in dramatically curtailing the use of the filibuster." While eliminating the filibuster for executive branch nominees "makes complete sense" because if a president chooses a bad nominee "the harm won't last long," lowering the bar for judges will mean more extremism on the bench. It also "marks a fundamental and unappreciated shift of power from the Senate to the executive branch."

UNINSURED ENCOUNTERING "SHOCKINGLY HIGH PRICES" FOR COVERAGE ON EXCHANGES. Under the headline "Sticker Shock Hits Health Exchange Shoppers," USA Today (11/22, O'Donnell, Overberg, 5.82M) reports that "health care exchange pricing...is leading to sticker shock for some middle-class consumers and others who aren't eligible for subsidies under the Affordable Care Act," and "the average prices for the most popular plans are twice as high in the most expensive states as those with the lowest average prices." According to USA Today, PPOs "carry monthly premiums that range from an average of \$819 a month in the most expensive state to \$437 in the least expensive." USA Today notes that approximately "4.4 million people in the individual insurance market are not eligible for the subsidies," and therefore must pay "shockingly high prices," according to "insurance brokers and 'navigators' helping people apply for insurance."

The Huffington Post (11/22, Young, 11.54M) reports that a Families USA analysis estimates that "among the roughly 15 million working-age Americans in the health insurance market for those who don't get health benefits from their employers or a government program like Medicare, 71 percent, or 10.8 million, have incomes low enough to qualify them for subsidized private insurance or Medicaid coverage," which "leaves 29 percent of the customers in this market, or more than 4 million people, who may see higher rates go up without the benefit of financial assistance."

ACA Advocate Downplays Impact Of Higher Premiums On Those Losing Health Insurance. McClatchy (11/22, Pugh, 95K) reports that Families USA is currently "pushing back against the wave of media reports about policy cancellations involving people with individual health insurance." Ron Pollack, executive director of Families USA, is quoted as saying, "This issue has been blown out of proportion. ... This is truly a tiny portion of the people that will be affected by the Affordable Care Act."

House Democrat's Chief Of Staff Complains About Premiums Spiking. Politico (11/22, Allen, Haberkorn, 467K) reports that some "veteran House Democratic aides are sick over the insurance prices they'll pay under Obamacare." Minh Ta, chief of staff to Rep. Gwen Moore (D-WI), in an email to "fellow Democratic chiefs of staff," wrote: "In a shock to the system, the older staff in my office (folks over 59) have now found out their personal health insurance costs (even with the government contribution) have gone up 3-4 times what they were paying before." Ta warned that "older congressional staffs may leave their jobs because of the change to their health insurance."

According to The Hill (11/22, Parnes, Viebeck, 194K), "under guidance from the chief administrative officer of the House, offices had discretion about whether to classify their workers as 'official staff' or 'unofficial staff,'" and those "designated as official must obtain healthcare on the exchanges, while those designated as unofficial are allowed to keep their federal employee plans."

DOW CLOSES ABOVE 16,000, JOBLESS CLAIMS DROP. Overall, the economic news on Thursday is being seen by the media as quite positive. In particular, the drop in jobless claims is being seen as a sign of labor market recovery, while the Dow's topping of 16,000 is also drawing positive media accolades.

Dow Tops 16,000 For First Time. The CBS Evening News (11/21, lead story, 2:20, Pelley, 5.58M) reported in its lead story that the stock market is "sailing in uncharted territory," with "interest rates are low, corporate earnings are high and there is no end in sight for the Federal Reserve stimulus program." On Thursday, that "added up to the Dow Industrial Average hitting another record, closing above 16,000, headed for its best year in a decade." CBS (Mason) says that the "momentum right now is still up" and will continue to be "until Janet Yellen signals a change in course at the Fed."

Similarly, ABC World News (11/21, story 4, 0:10, Sawyer, 7.43M) reported a "milestone on Wall Street" on Thursday, saying the increase was "fueled by encouraging new jobs numbers." NBC Nightly News (11/21, story 6, 0:15, Williams, 7.86M) reported, "News about American Jobs helped Wall Street set a new record today."

The AP (11/22, Rothwell, Condon) reports that the Dow Jones Industrial Average rose 109.17 points to 16,009.99, the first time the index has closed about 16,000. Since the beginning of the year, the Dow "is up 22 percent and has now topped three 1,000 point milestones in 10 months." Since the recent low in March 2009, the Dow has "more than tripled." Meanwhile, the S&P 500 rose 14.48 points to 1,795.85, while the Nasdaq Composite Index rose 47.88 to 3,969.15.

The New York Times (11/22, Press, Subscription Publication, 9.61M) reports the Dow "has been propelled higher this year by a combination of solid corporate earnings, a steadily strengthening economy and easy-money policies from the Federal Reserve."

The Wall Street Journal (11/22, Scaggs, Ng, Linebaugh, Subscription Publication, 5.91M) says that the advance has been broad across the markets, but is strongest among those businesses that are focused on consumers. The Journal says that such businesses have been engaged in sharp cost-cutting, giving them an edge over their rivals.

Jobless Claims Down 21,000 Last Week. USA Today (11/22, Carrig, 5.82M) reports that first-time claims for jobless benefits fell 21,000 last week to 323,000, a "sign the labor market continues to improve as businesses see little need to cut jobs." Claims are now at their lowest level since late September. The four-week average, which irons out week-to-week volatility, fell 6,750 to 338,500. Both the weekly and four-week average are "near pre-recession levels." Reuters (11/22, Mutikani) reports economists it surveyed had expected claims to come in at 335,000. However, economists warned that the Veterans Day holiday last week may have altered the figures.

Bloomberg News (11/21, Jamrisko, 1.91M) reports that economists it surveyed also expected claims to fall to 335,000. Bloomberg says that increasing sales "going into the holiday-shopping period will probably prompt employers to keep current workers on staff to meet demand," and a drop in frings "may also lead to bigger gains in hiring that will help boost consumer spending, which accounts for almost 70 percent of the economy."

Mortgage Rates Down This Week. The AP (11/22) reports that mortgage rates fell this week after rising the previous two, "keeping home-buying affordable." According to data released Thursday by Freddie Mac, the average rate on a 30-year loan fell to 4.22% from 4.35% the prior week, while the average rate on a 15-year fixed loan fell to 3.27% from 3.35%.

Consumer Confidence Continues To Drop. Bloomberg News (11/22, Schenkel, 1.91M) reports its Consumer Comfort Index fell to minus 34.6 this week from minus 33.9 the prior week. However, Bloomberg focuses on the rise in the economic expectations portion of the survey, which increased to minus 14 from a "two-year low of minus 31 in October." Bloomberg says that rising wealth from "higher stock and home prices, cheaper gasoline and more employment opportunities are providing households with the means to boost purchases."

Holiday Sales Critical For Struggling Sears. The CBS Evening News (11/21, story 8, 2:10, Pelley, 5.58M) reported that the forthcoming holiday sales season is rapidly approaching, and for Sears, "the stakes could not be higher." On Thursday, the company "reported it lost more than half a billion dollars just between August and

October." After reporting on problems at various Sears locations, CBS (Reynolds) adds that the company is "rushing to go online big time and ease in-store shopping with the newest technology, like mobile checkout scanners," but it is also "now seriously considering spinning off its Lands' End clothing line, as well as its automotive stores to save money."

Manufacturing Wages Failing To Keep Pace With Inflation. Using Boeing's unsuccessful attempt to convince a machinists union to accept cuts to pay increases as an example, Bloomberg News (11/22, Catts, Robison, Kolet, 1.91M) reports that even with "hiring and output robust enough to be dubbed a manufacturing renaissance by President Barack Obama, workers are falling behind." According to Bloomberg, factory wages haven't "kept pace with inflation," and in fact fallen 3% on that basis since May 2009, "while average pay for all wage earners slid only about 1 percent."

Editorial Wrap-Up:

NEW YORK TIMES. "Democracy Returns To The Senate." In an editorial, the New York Times (11/22, Subscription Publication, 9.61M) writes, "For five years, Senate Republicans have refused to allow confirmation votes on dozens of perfectly qualified candidates nominated by President Obama for government positions," tried to "nullify entire federal agencies by denying them leaders," and "abused Senate rules past the point of tolerance or responsibility." The rules change "was necessary to turn the Senate back into a functioning legislative body."

"Another Banking Scandal." The New York Times (11/22, Subscription Publication, 9.61M) editorializes that in a "widening inquiry," as many as 15 of the world's biggest banks "are under scrutiny by international officials for alleged manipulation of the \$5.3-trillion-a-day foreign exchange market." The Times calls the probes "a hopeful sign that the department may be bringing more depth and creativity to its investigations of major banks," and urges "aggressive use of legal tools to prosecute misconduct, including admissions of wrongdoing, clawbacks of ill-gotten pay, sanctions for management failure to supervise, nondeductible penalties and criminal prosecutions, where warranted."

"All That Glitters Online." In an editorial, the New York Times (11/22, Subscription Publication, 9.61M) says the Bitcoin "proponents" say such digital currencies "provide greater security, lower costs and more stability than traditional forms of money like dollars and euros," but in the "real world," the currency seems mainly to serve those "engaged in illegal activities or speculation."

WASHINGTON POST. "No Robin Hood." The Washington Post (11/22, 4.28M) editorializes that Venezuelan President Nicolás Maduro has resorted to "state-sponsored looting" to prop up his support, an approach that will do nothing to undo the "unraveling of Venezuela's economy and political system." The article foresees medium-term and long-term consequences, including "more radical action will be needed to prevent the mobs from turning on Mr. Maduro." The article also criticizes Venezuela's neighbors, particularly Brazil, for not using their influence to restrain Venezuela's "self-destruction."

"D.C. Council's Latest Head-Scratcher." The Washington Post (11/22, 4.28M) editorializes on the District of Columbia Council's vote to oppose changing the Federal law that limits building heights in the District. The Post's editors say the vote was a "stunning repudiation" of the Council's claimed principles of "more home rule for local officials," and making the city "more affordable for residents of limited or modest means." Though the vote was symbolic, the National Capital Planning Commission followed the Council's lead and did not make any meaningful change to the building height restrictions. The Post called it "astonishing that this reasonable accommodation to update rules crafted for a different time was rejected."

"The 'Nuclear' Fallout." The Washington Post (11/22, 4.28M) says in an editorial that "the Democratic majority was justified in its grievance but not in its rash action. ... We believe a filibuster should be rarely invoked. But now that it is not an option, the result is likely to be that the partisanship of Congress will seep increasingly into the judiciary, as presidents feel no obligation to search for balance or moderation in their nominations." The Post says that though Republicans "proved incapable of exercising their minority rights in a responsible way," Senate Majority Leader Reid "proved not enough of a leader to resist the 'naked power grab.'"

WALL STREET JOURNAL. "The 'Spy' Who Fooled the EPA." An editorial in the Wall Street Journal (11/22,

Subscription Publication, 5.91M) blasts the EPA for failing to regulate its employee, John C. Beale, who has admitted in a plea deal with the Justice Department that he defrauded taxpayers of \$900,000 in pay and expenses over a 23-year career with the agency. The Journal points out that Beale's claims that he was a CIA operative to explain prolonged absences did not raise any red flags and notes that the EPA's inspector general said the case was the result of "an absence of even basic internal controls at the EPA."

"Senate Rules For Radicals." The Wall Street Journal (11/22, Subscription Publication, 5.91M) argues in an editorial that Senate Majority Leader Reid was pressured by Senate liberals to change Senate rules, arguing that those Democrats who were part of the 60-senator majority at the start of President Obama's term got used to passing legislation without resistance and view the minority party as an irritant to be overcome. The Journal says, however, that Democrats should be wary of the fact that they have set the stage for a future repeal of the Affordable Care Act with just 51 votes.

"A Worthy Obama Initiative." The Wall Street Journal (11/22, Subscription Publication, 5.91M) largely praises the US-Afghan deal in an editorial while noting that obstacles remain. Ultimately, the Journal likes the deal because the US not having any presence in Afghanistan beyond 2014 is seen as an unacceptable option by the Journal. The US military, the Journal says, should stay in the country as long as need to protect the security and interests of the Afghan people.

Washington Schedule:

TODAY'S EVENTS IN WASHINGTON.

White House: PRESIDENT OBAMA – Receives the Presidential Daily Briefing, Oval Office, closed press; participates in a video conference with Peace Corps Volunteers in Tanzania, the Situation Room, closed press; hosts bilateral with King Mohammed VI of Morocco at the White House.

VICE PRESIDENT BIDEN – Attends the Presidential Daily Briefing, Oval Office, closed press; meets with Deputy Prime Minister Bulent Arinc of Turkey, White House, closed press.

FIRST LADY MICHELLE OBAMA – Hosts the President's Committee on the Arts and the Humanities (PCAH) National Arts and Humanities Youth Program Awards to honor the 2013 winners.

US Senate: 11:15 a.m. – The Senate will convene for a pro forma session.

10 a.m. BANKING, HOUSING, AND URBAN AFFAIRS – Hearings to examine housing finance reform, focusing on developing a plan for a smooth transition. Witnesses: James Millstein Chairman and CEO, Millstein & Co.; John Bovenzi, Partner, Oliver Wynman; Dr. Mark Zandi, Chief Economist and Cofounder, Moody's Economy.com; David Min, Assistant Professor of Law, University of California, Irvine School of Law. Location: 538 Dirksen.

US House: 10 a.m. – The House will meet in a pro forma session. No votes are expected

Other: NEWSEUM – KENNEDY 50TH – 50th anniversary of the assassination of President John F. Kennedy, the Newseum will host JFK Remembrance Day, featuring a number of special events and exclusive programs. The news museum, a top attraction in Washington, D.C., will host a daylong series of JFK-themed discussions with authors, journalists and filmmakers. The museum also will rebroadcast in real time three hours of CBS News live television coverage from Nov. 22, 1963, including the unforgettable moment when legendary anchorman Walter Cronkite reported to the nation that the president was dead. Location: Newseum, 555 Pennsylvania Ave. NW.

US CHAMBER – CARIBBEAN, CENTRAL AMERICA CONFERENCE – The US Chamber of Commerce will host the Caribbean-Central American Actions 37th annual conference on the Caribbean and Central America, which will bring together public- and private-sector representatives for three days of interactive meetings, roundtable discussions, and networking events focused on critical issues facing the region. Speakers: Thomas J. Donohue, President and CEO, US Chamber of Commerce; Luis Alberto Moreno, President, Inter-American Development Bank; Vasant Bharath, Minister of Trade, Industry and Investment, Government of Trinidad & Tobago; Jodi Bond, Vice President for the Americas, US Chamber of Commerce; Ines Bustillo, Director, Washington Office, United Nations Economic Commission for Latin America; Mark Lambrides, Chief, Energy & Climate Change Mitigation, Organization of American States. Register at: press@uschamber.com or call 202-463-5682. Location: U.S. Chamber of Commerce, 1615 H Street, NW. 7:30 a.m. – 1:45 p.m.

CSIS – AUSTRALIA AND THE U.S. – Australia and the United States in the 21st Century. Keynote by: Julie

Bishop, Minister for Foreign Affairs, Australia. Introduction by Dr. John J. Hamre, President, CEO and The Pritzker Chair, Center for Strategic and International Studies. Moderated by Ernest Z. Bower, Sumitro Chair for Southeast Asia Studies, Senior Adviser & Co-Director, Pacific Partners Initiative, Center for Strategic and International Studies. Location: Center for Strategic and International Studies, 2nd Floor Conference Facility, 1616 Rhode Island Avenue, NW. 10:45 a.m. – 11:30 a.m.

Last Laughs:

LATE NIGHT POLITICAL HUMOR.

Jay Leno: "Vice President Joe Biden went to pick up a couple sandwiches for lunch for him and the President and, when he got there, he didn't have enough money. He had to borrow ten bucks. He was ten bucks short. See, too bad it wasn't a Chinese restaurant. He could have just added it to the 17 trillion dollar tab we have running there."

David Letterman: "And a couple of days ago Florida Congressman Trey Radel was arrested for drug possession. Then he says, 'Look, I need the cocaine, I'm not going to lie, I need the cocaine to stay awake trying to sign up for ObamaCare.'"

Jon Stewart: "So deciding to allow majority rules to incrementally increase government efficiency and presidential appointments is so unthinkably extreme, it's the nuclear option?"

Stephen Colbert: "Folks, we have just witnessed the death of an American institution, the power of the minority to filibuster anything they didn't like is one of our founding principles. That's why it's not in the Constitution."

Stephen Colbert: "And we can't trust the Democrats with all this powers, folks. They can't do anything right. At Harry Reid's press conference announcing the end of the filibuster, they misspelled filibuster with two 'l's.'"

DOI in the News:

SECRETARY JEWELL HEADED TO OKLAHOMA TO SIGN TRIBAL AGREEMENT. The [Oklahoman](#) (11/25, 345K) reports that Interior Secretary Sally Jewell and Assistant Secretary for Indian Affairs Kevin Washburn will be in Oklahoma on Monday to sign an agreement with the Citizen Potawatomi Nation that will allow the tribe greater control in leasing their trust lands. The article notes that the tribe is one of the first to take advantage of the Helping Expedite and Advance Responsible Tribal Homeownership Act. The article also notes that Jewell will be making her first trip to Oklahoma as Interior Secretary, "though she spent some time in state when she worked for Mobil."

The [Shawnee \(OK\) News-Star](#) (11/22, 25K) reports that Rep. Tom Cole, Citizen Potawatomi Nation Vice-Chairman Linda Capps and other tribal community members will also be in attendance at the ceremony.

Also covering the story are the [Indiantz](#) (11/25), the [Pechanga](#) (11/25), [KOKH-TV](#) Oklahoma City (11/25, 2K), [KTUL-TV](#) Tulsa, OK (11/25, 28K), [KWTU-TV](#) Oklahoma City (11/25, 60K), and [KXII-TV](#) Sherman, TX (11/25, 13K).

WHITE HOUSE, REPUBLICANS BATTLE OVER CREDIT FOR SURGE IN OIL, NATURAL GAS PRODUCTION. The Hill (11/23, Geman, 194K) reports that "Republicans and the White House are battling over whether President Obama deserves credit for oil and natural gas production that has surged in the last few

years." According to the Hill, many Republicans believe that Obama his taking the credit for oil and natural gas production that "he did nothing to enable." Republicans point to data showing that this surge in production "has occurred largely on the strength of production from shale formations outside the regions that the Interior Department regulates." However, the Obama Administration continues to use recently released data – such as statistics from the Energy Information Administration that revealed that the US is produced more oil in October than it imports for the first time since 1995 – to support their claim that Obama's energy policies are working.

SECRETARY JEWELL WORKS WITH IDAHO GOV. OTTER ON SAGE GROUSE, GATEWAY WEST. The Twin Falls (ID) Times-News (11/25, 56K) reports that in the two weeks following a meeting in October between Interior Secretary Sally Jewell and Idaho Republican Gov. Butch Otter, the BLM "announced actions that demonstrated" collaboration between the federal and state entities. According to the article, "now, the state and the feds must decide how far they are willing to go to keep working together on two of the most sweeping and contentious land-management issues across Southern Idaho:" the sage grouse and the Gateway West project.

TWO VERMONT RIVERS CLOSER TO NATIONAL WILD RIVER STATUS. The Brattleboro (VT) Reformer (11/25, 22K) reports that two Vermont rivers are closer to being designated as part of the National Wild and Scenic Rivers system. Legislation that included the Upper Missisquoi and Trout rivers in northern Vermont was passed Thursday by the Senate Energy and Natural Resources Committee.

ADDITIONAL COVERAGE: USGS FINDS LAND SINKING RAPIDLY IN CALIFORNIA'S SAN JOAQUIN VALLEY. Additional coverage of the USGS study finding that land is "sinking more rapidly than usual because of increased pumping from underground sources" in California's San Joaquin Valley was provided by the Summit County (CO) Citizens Voice (11/25, 506), the Contra Costa (CA) Times (11/25, Dearen, Press, 302K), the San Jose (CA) Mercury News (11/25, 731K), the Stockton (CA) Record (11/21, 123K), the U-T San Diego (11/24, 647K), the Woodland (CA) Daily Democrat (11/25, 35K), the San Mateo (CA) Daily Journal (11/22, 46K), the AllGov (11/25, 1K), and KRNV-TV Reno, NV (11/25, 2K).

CONGRESS URGED TO SUPPORT LAND AND WATER CONSERVATION FUND. For "The Blog" of the Huffington Post (11/22, Dicks, Evans, 11.54M), Norm Dicks, former US representative for Washington's 6th Congressional District, and a board member of the Washington Wildlife and Recreation Coalition, and Dan Evans, former governor and US senator for Washington, and a founding co-chair of the coalition, write about the threat to the Land and Water Conservation Fund. According to the two, "despite the clear mandate for further investments to enhance, protect and increase access to our shared outdoor heritage, actions in Congress threaten to undermine this wildly successful program." They note that in her first major address Oct. 31, Interior Secretary Sally Jewell "called on Congress to fully fund it."

America's Great Outdoors:

National Park Service:

NPS PLANS TO LABEL FLORIDA'S ICONIC SILVER SPRINGS AS THREATENED LANDMARK. The Columbus (IN) Republic (11/25, 80K) reports that the NPS "plans to label Florida's iconic Silver Springs as threatened in an upcoming report because of its elevated level of contaminants and depleted water flow," according to officials. Mike Litterst, a spokesman for the Interior Department, said that "a federal monitor visited the springs earlier this year as part of the government's National Natural Landmarks program," and "Silver Springs' downgraded status will be reflected in the next program update."

Also covering the story are the Gainesville (FL) Sun (11/22, 91K), the Lakeland (FL) Ledger (11/24, 180K), WTEV-TV Jacksonville, FL (11/25, 22K), WFTV-TV Orlando, FL (11/25, 194K), WJXT-TV Jacksonville, FL (11/25, 112K), and WWSB-TV Sarasota, FL (11/25, 1K).

NPS HONORS JFK. The Boston Globe (11/25, Miller, 1.75M) reports that On Friday, the NPS "held a short memorial service and wreath-laying at the John Fitzgerald Kennedy National Historic Site." According to the article, "the program, which lasted about 20 minutes, included prayers from a priest and a rabbi, historical remarks from park rangers, a reading from Lyndon Johnson's 1963 proclamation for a national day of mourning for Kennedy and another from a letter from US Representative Joseph P. Kennedy III, who wrote about his great-

uncle's vision for the country."

Meanwhile, Roll Call (11/25, Subscription Publication, 87K) reports that all NPS sites in the District flew flags at half-staff "to honor the life and public service of John F. Kennedy" on Friday, according to Carol Johnson, spokeswoman for the National Mall and memorial parks in D.C.

SENATE PANEL APPROVES GETTYSBURG PARK EXPANSION. The Philly (11/25, 1.22M) reports that a bill to expand Gettysburg National Military Park has been approved by the Senate's Energy and Natural Resources Committee. The legislation now awaits consideration by the entire Senate.

FLORIDA FISH AND WILDLIFE CONSERVATION COMMISSION OFFICIALS WARY OF BISCAYNE NATIONAL PARK PLANS. The South Florida Sun Sentinel (11/23, 690K) reports that commissioners with the Florida Fish and Wildlife Conservation Commission were "wary" of the management plans for Biscayne National Park as they heard a presentation Thursday at the FWC's meeting in Weston. However, "after many questions about how restrictive" the Fishery Management Plan and the General Management Plan "would be and making sure the FWC has the final say on fishing regulations, the commissioners unanimously voted to concur with the park's FMP and work with the park on its GMP."

Bureau of Land Management:

BLM PROPOSES PROTECTION PLAN FOR SAGE GROUSE IN OREGON. The Columbus (IN) Republic (11/25, 80K) reports that the BLM has proposed a range of protections for the greater sage grouse in Oregon. The preferred alternative in the draft environmental impact statement issued Friday would "allow some development of roads, pipelines and electrical lines through areas occupied by sage grouse, and require that when grazing permits are renewed, the land be analyzed for how well suited it is to sage grouse." However, Eric Molvar, a wildlife biologist with the conservation group Wildearth Guardians, said the preferred alternative is "business as usual" and "does not protect the bird from the chief threats_ overgrazing and the spread of non-native cheat grass."

Also providing coverage are the Reno (NV) Gazette-Journal (11/23, 165K) and KFMB-TV San Diego (11/25, 15K).

BLM URGES RESPECT FOR CULTURAL RESOURCES ON PUBLIC LANDS. KGAB-AM Cheyenne, WY (11/25, 274) reports that the BLM is reminding the public that "archaeological artifacts" are "protected by federal law and must be preserved for all." According to BLM spokeswoman Cindy Wertz, "it is important that archaeological artifacts remain in place and undamaged."

Also providing coverage is KTAK-FM Riverton, WY (11/22).

FEDERAL AGENCIES URGED TO RESTORE FORESTS. In an op-ed for the Medford (OR) Mail Tribune (11/24, Rachor, 67K), John Rachor, a Jackson County commissioner, writes that the Jackson County Board of Commissioners has "taken a strong stand in support of efforts to restore federal forests that were destroyed by wildfires earlier this year." However, he notes that "private lands are intermingled with federal O&C lands in a checkerboard pattern," which "makes it difficult to promote a full recovery across the landscape while reducing the risk of a reburn." He urges federal agencies to take action because "doing nothing on federal forest lands, as some have suggested, will only perpetuate the cycle of catastrophic wildfire and poverty in our rural, forested communities."

Fish and Wildlife Service:

FWS RELEASES ANNUAL LIST OF CANDIDATES FOR ENDANGERED SPECIES ACT PROTECTION. The Chattanooga (11/22, 17K) reports that the FWS on Friday released the Candidate Notice of Review. The article notes that "three species have been removed from candidate status and three have a change in priority from the last review conducted in November 2012." FWS Director Dan Ashe said, "Protecting America's most at-risk wildlife one of our highest priorities. We are currently working with landowners and partners across the nation to implement voluntary conservation agreements on some five million acres of habitat for more than 130 candidate species, helping address some of the threats they face before they are ever listed under the ESA."

FWS CLARIFIES GUIDELINES FOR SEA OTTER USES. The Juneau (AK) Empire (11/22, 21K) reports, the FWS has clarified rules defining how sea otter hides can be used for clothing and handicrafts. Changes were made to give people a better definition of the requirement that pelts be "significantly altered" to be considered authentic Alaska Native handicrafts or clothing that can be sold to non-Natives. The new guidelines say a hide is significantly altered when it's not recognizable as a whole hide and has been made into handicrafts or clothing.

Also providing coverage are the Cordova (AK) Times (11/25, 2K) and KTOO-FM Juneau, AK (11/22).

FWS HOLDS OPEN HOUSE ON PROPOSED NATIONAL WILDLIFE REFUGE. The Jackson (MS) Clarion Ledger (11/25, By Brian Albert Broom Bbroom@, clarionledger.com, 213K) reports during an open-house meeting, where FWS representatives "explained the possibilities of a proposed National Wildlife Refuge in the Jackson area, little opposition was heard." Connie Dickard of the FWS said, "It was definitely more positive. Some folks have asked who would be against this."

FWS TO GIVE WATER QUALITY THE MOST WEIGHT IN DETERMINING GROTTO SCULPIN'S FUTURE. The AP (11/25) reports that "water quality, not the number of fish, will be the biggest factor determining what happens in the effort to save" the grotto sculpin. The FWS will review data in five years. At a public meeting, FWS biologist Shauna Marquardt said, "We're going to base recovery on water-quality parameters. ... Counting fish can be tricky."

FWS SETS ASIDE HABITAT FOR JEMEZ MOUNTAIN SALAMANDER. The Arizona Daily Star (11/25, 335K) reports that the FWS has designated more than 140 square miles in northern New Mexico as critical habitat for the Jemez Mountain salamander. The article notes that "most of the land designated as critical habitat is federal," and "there are about 2,800 acres that are private property." The FWS "says no changes in economic activity or land or water management are expected to result from the critical habitat designation."

DECISION ON OREGON SPOTTED FROG COULD AFFECT LAND USE. The Medford (OR) Mail Tribune (11/24, 67K) reports that under an FWS proposal to list the Oregon spotted frog as a threatened species under the Endangered Species Act, "48 acres of Bureau of Land Management land and 13 acres of private land near the Parsnip Lakes will be listed as critical habitat." Jim Thrailkill, FWS field supervisor in the Roseburg Field Office, said, "If there are activities that are going to be done on those lands that involve some federal funding or permits, then there's conversation that needs to be entered in with the Fish & Wildlife Service. There's a perception that it's a 'hands off' or a reserve, and that's not the case. There are still allowable activities."

CALIFORNIA CONSERVATIONISTS URGE PROTECTION FOR GRAY WOLVES. KFMB-TV San Diego (11/25, 15K) reports that California conservationists are urging the FWS to protect gray wolves from human hunters. According to the article, "hundreds of activists attended a FWS hearing Friday in Sacramento to discuss a proposal to take the gray wolf off the federal list of endangered species throughout the lower 48 states."

RED WOLVES' RETURN TO CAPE ROMAIN NATIONAL WILDLIFE REFUGE OUTSIDE CHARLESTON STILL UNCERTAIN. The Charleston (SC) Post and Courier (11/24, 284K) reports that "the question still hangs whether the red wolf will return to the wild" at Cape Romain National Wildlife Refuge, "where much of the recovery of the nearly extinct species began." On one hand, "prospects for a return have improved." FWS "biologists are looking at placing breeding pairs of wolves along remote East Coast islands as an alternative to the semi-captive program now used, and Bull's Island is one of the places under consideration." On the other hand, "the program still battles for budget and staff."

ADDITIONAL COVERAGE OF REPORT ON COASTAL WETLANDS LOSS. Additional coverage of the report on the increased rate of coastal wetlands loss was provided by NPR (11/22, Chappell, 465K), State (SC) (11/24, 280K), and the YubaNet (CA) (11/25, 1K).

ADDITIONAL COVERAGE OF REPORT ON FISCAL CHALLENGES FACING HATCHERIES. Additional coverage of the report issued by the FWS "outlining fiscal challenges for 70 federal fish hatcheries" was provided by the Daily Inter Lake (MT) (11/25, 57K).

FWS REPORT ON ECONOMIC IMPACT OF WILDLIFE REFUGES TOUTED. In an op-ed for the Bakersfield Californian (11/25, Love, 140K), Harry Love, president of the Kern Audubon Society, notes that a recent report by

the FWS, "Banking on Nature," found "refuges contributed an average \$4.87 in total economic output for every \$1 appropriated in fiscal year 2011." He concludes that "national wildlife refuges are the best bet we can make as a society."

Additional coverage of the report on the economic impact of wildlife refuges was provided by the [Milwaukee Journal Sentinel](#) (11/25, 798K).

Securing America's Energy Future:

Renewable Energy:

DUKE ENERGY PLEADS GUILTY TO KILLING GOLDEN EAGLES AT ITS WYOMING WIND FARMS. The AP (11/23, Cappiello) reported that Duke Energy has "pleaded guilty to killing 14 eagles and 149 other birds at two Wyoming wind farms" and has agreed to pay the US government a million dollars settlement with the US government. Duke Energy Renewables Inc. President Greg Wolf issued a statement apologizing for what happened to the golden eagles at their two wind farms and stated that the company's "goal is to provide the benefits of wind energy in the most environmentally responsible way possible." The AP added that the "case against Duke Energy Corp. and its renewable energy arm was the first prosecuted under the Migratory Bird Treaty Act," which provides protection for golden eagles.

The Hill (11/23, Hattem, 194K) reported in its "Regwatch" blog that the American Wind Energy Association issued a statement saying that this "agreement will help advance the knowledge of wind wildlife interactions to further reduce the industry's relatively small impacts."

The New York Times (11/23, Fitzsimmons, Subscription Publication, 9.61M) provided similar coverage on the topic. Also providing coverage are the Los Angeles Times (11/23, Karlamangla, 3.07M), the Washington Times (11/22, Cappiello, 417K), the Atlanta Journal-Constitution (11/25, 1.26M), the Boston Herald (11/25, 643K), the Denver Post (11/25, Press, 949K), the Christian Science Monitor (11/23, Cappiello, 540K), NPR (11/23, Peralta, 465K), ABC News (11/25, 3.68M), BBC News (11/22, 1.62M), and WJBK-TV Detroit (11/25, 83K).

Onshore Energy Development:

ENERGY EXPERT SEES WYOMING FRACKING RULE AS MODEL FOR US. The New York Times (11/23, Galbraith, Subscription Publication, 9.61M) reports that last week, Wyoming's state regulators approved what some described as "one of the nation's strongest requirements for testing water wells near drilling sites" in order to "address concerns that ground water can become contaminated from" fracking. According to the Times, the new rule, "which takes effect in March, will require oil and gas companies to test wells or springs within a half-mile of their drilling site, both before and after drilling." Jon Goldstein, a senior energy policy manager at the Environmental Defense Fund, said that Wyoming's water-rule was the "strongest" yet and serves as a "kind of a model for the country."

BLM TO ALLOW ANONYMOUS OIL, GAS LEASE NOMINATIONS. The [Grand Junction Daily Sentinel](#) (11/25, 73K) reports that the BLM will "allow entities to anonymously nominate parcels to be leased for oil and gas development." However, the decision is "drawing criticism from dozens of citizen, conservation and other organizations who see it as an effort to sidestep a Colorado court ruling requiring nominators' names to be made public before leasing occurs." In a letter Friday to the BLM, Citizens for a Healthy Community and 44 other organizations, wrote, "This confounding decision results in a blatant undermining of the improved transparency BLM purports to advance."

BLM LEASE AUCTION NETS \$11 MILLION. The [Carlsbad \(NM\) Current-Argus](#) (11/25, 18K) reports that Thursday's BLM oil and gas mineral rights leasing sale resulted in more than \$11 million in revenue.

NAVAJO NATION MOVES FORWARD WITH PLAN TO BUY NAVAJO MINE. The [Farmington \(NM\) Daily Times](#) (11/25, 46K) reports that the Navajo Nation is continuing to pursue its "plans to acquire the Navajo Mine after the Arizona Corporation Commission decided not to continue studying deregulation of that state's energy market." However, "still unclear is how the purchase will be funded."

ADVOCATES URGED TO SEE BOTH SIDES OF ARCTIC NATIONAL WILDLIFE REFUGE DEBATE. In his column for the [Fairbanks \(AK\) News-Miner](#) (11/25, Bishop, 44K), Sam Bishop writes that last week, the Arctic National Wildlife Refuge “debate rose to the surface again” as Sens. Maria Cantwell and Mark Kirk “introduced legislation to place the 1.5-million-acre coastal plain in official wilderness status, which would prevent oil and gas drilling.” Bishop urges advocates to see both sides of the debate. He writes that “as someone who respects people on both sides of this debate, I’ve often wished that the most passionate among them would not reach for images and slogans that seem to reflect ideological blinders more than reality (or at least my vision of reality, of course).”

CONGRESS URGED TO ENACT HR 2728. In an op-ed for the [San Antonio Express-News](#) (11/25, 746K), Bud Weinstein, associate director of the Maguire Energy Institute in the Cox School of Business at Southern Methodist University, criticizes the BLM’s “recently issued new environmental and safety rules pursuant to hydraulic fracturing for natural gas and oil on federal and Indian lands.” he notes that “for more than 40 years, states have had regulatory oversight of natural gas drilling, and hydraulic fracturing has been used in more than a million wells across the US” Weinstein argues that “the BLM rules would create a ‘one-size-fits-all’ federal regulatory regime on top of specifically crafted state programs.” Weinstein urges Congress to enact HR 2728, “a bill that would allow state regulations regarding hydraulic fracturing to supersede any forthcoming federal standards.”

Offshore Energy Development:

BOEM AWARDS GULF OF MEXICO CONTRACT TO CSA OCEAN SCIENCES. The [Offshore Magazine](#) (11/25, 143K) reports that the BOEM has awarded CSA Ocean Sciences “a contract for conducting measurements and modeling of the underwater pressure waves produced during explosive well decommissioning in the Gulf of Mexico.” According to the article, “through an underwater modeling approach, CSA will calculate shockwave, acoustic impulse, and energy flux for underwater detonations.”

Also covering the story is the [Penn Energy](#) (11/25, 128).

NORTH CAROLINA GOV. MCCRORY COULD RENEW PUSH FOR OFFSHORE DRILLING. The Wilmington (NC) Star News (11/24, 123K) reports that North Carolina Gov. Pat McCrory says “he will push a comprehensive energy package during the short session that begins in May.” According to the article, “though his office is mum on details, it could include policy related to drilling in federal waters off North Carolina.”

ADDITIONAL COVERAGE: BSEE CITES TWELVE OPERATORS FOR NEGLECTING SEMS. Additional coverage of the BSEE’s citation of twelve operators for their failure to demonstrate compliance with the Safety and Environmental Management Systems (SEMS) requirements was provided by the [Marine Link](#) (11/25, 1K), the [Offshore Magazine](#) (11/25, 143K), the [Penn Energy](#) (11/25, 128), and the [Rigzone](#) (11/25, 12K).

Tackling America’s Water Challenges:

ADDITIONAL COVERAGE OF BAY DELTA CONSERVATION PLAN. Additional coverage of the Bay Delta Conservation Plan was provided by the Marysville (CA) Appeal-Democrat (11/25, 70K), the [Bay Area \(CA\) Indymedia](#) (11/22, 2K), the [Bay Area \(CA\) Indymedia](#) (11/22, 2K), the [Inside Bay Area \(CA\)](#) (11/25, Altgelt, 47K), and the [Inside Bay Area \(CA\)](#) (11/25, 47K).

Empowering Native American Communities:

BLACKFEET LEADER EXPELS MEMBER. The [Great Falls \(MT\) Tribune](#) (11/23, 90K) reports that “two factions of a divided Blackfeet Tribal Business Council have split again.” Chairman Willie Sharp Jr. has expelled Councilman Leonard Guardipee and replaced him with Allen Shane Goss. Roger “Sassy” Running Crane said he expects that the BIA will “likely reject Goss’ appointment and that Guardipee’s expulsion will be reversed.”

Also reporting on the story is the [Bozeman \(MT\) Daily Chronicle](#) (11/25, 54K).

Top National News:

REPUBLICANS AND DEMOCRATS BLAST DEAL ON IRAN'S NUCLEAR PROGRAM. Sunday's coverage of the deal reached by the P5+1 and Iran this weekend emphasizes objections to the agreement's framework from both Republicans and Democrats in Congress – as well as from Israel. The three network newscasts, which devoted more than 16 minutes of airtime to the developments out of Geneva, portrayed the deal as potentially historic, but – as is the case with print and online reports – featured almost no praise for the deal from anyone outside of the Administration. On the other hand, all three newscasts noted Israel's criticisms and had reports on the widespread support for the agreement among Iranians. Apart from Secretary of State Kerry's own defenses of the deal, the Sunday morning news programs featured an almost unrelenting bipartisan cavalcade of objections to the agreement from members of Congress.

In an analysis that is representative of much the coverage, Elizabeth Palmer, on the CBS Evening News (11/24, story 3, 1:25, Glor, 5.58M), said the Administration "has managed to anger two of its staunchest allies in the region with this agreement," Israel and Saudi Arabia. But Palmer added that, "broadly speaking, around the world, countries are pleased" because they "think there is not much of a downside to freezing Iran's nuclear program," and that the deal "will make the world a more stable place."

Terry Moran, on ABC World News (11/24, story 2, 2:45, Muir, 7.43M), reported that "the doubters and the critics" of the deal "are legion, starting" with Israeli Prime Minister Netanyahu and including "most Republicans and many Democrats" in Congress. According to Moran, Iran has "agreed to freeze its nuclear program, destroy its dangerous near-weapons-grade fuel, and allow daily monitoring of key facilities by international inspectors." Moran continued, "In return, the US and allies agreed to ease some economic sanctions, about \$7 billion worth...and the whole deal is temporary, six months for negotiators to hammer out a final agreement, which will be much more difficult to get done."

Lester Holt, at the opening of NBC Nightly News (11/24, lead story, 3:35, Holt, 7.86M), said, "With a historic multinational agreement," the US and Iran "stepped away from the edge after a long and dangerous game of brinkmanship over Iran's nuclear ambitions." However, Holt added that "there are some pretty loud and influential voices from Washington to the Middle East that are calling this agreement a historic mistake." Andrea Mitchell went on to report that the "landmark agreement...is already being criticized by Israel and Saudi Arabia, along with some of the President's closest allies on Capitol Hill." Mitchell reported that Netanyahu "condemned the deal," and he was shown saying, "This agreement has made the world a much more dangerous place." According to Mitchell, "many in Congress agree with Israel." Sen. Chuck Schumer: "We're sending a signal to Iran that they can continue to go ahead and by talking and acting like they have goodwill, can get away with at least nuclear weapon production capability."

On the CBS Evening News (11/24, story 2, 2:45, Glor, 5.58M), Margaret Brennan also reported that "skeptics, including...Netanyahu, slammed the deal, calling it a 'historic mistake' that would allow Iran to get closer to making a bomb." According to Brennan, "there is also bipartisan criticism of the deal coming from Capitol Hill." Sen. Bob Corker: "In Iran right now...they are spiking the football in the end zone saying that look, 'we consolidated our gains, we have relieved sanctions, we are going to have the right to enrich.'" According to Brennan, on Sunday, Kerry "dismissed" such analyses, and "said Iran will have to back up its words with action." Kerry was shown saying, "I think everybody has a right to be skeptical, because there are indications that there are people in Iran who have wanted to pursue a weapons program, that there have been secret facilities buildings under those efforts towards that program, and so there is lots of reason that's why we don't take anything at face value."

According to the Washington Post (11/25, A1, Warrick, 4.28M), on Sunday, "euphoria over the signing of a historic nuclear agreement with Iran gave way to sober realism...as...congressional skeptics threatened to thwart it." The Post notes that Sen. Robert Menendez, chairman of the Senate Foreign Relations Committee, "said new sanctions legislation being considered by the Senate would include a six-month window to allow diplomats to try to negotiate permanent limits to Iran's nuclear program," but Menendez added that the Senate will not "abstain from preparations to impose new sanctions on Iran, should the talks fail."

On NBC Nightly News (11/24, story 3, 1:05, Holt, 7.86M), Chuck Todd said, "Essentially, Congress is giving the

President a very short leash." Todd added, "Remember, support for Israel is bipartisan on Capitol Hill...so if...Iran doesn't look like they're doing this deal, the political pressure on the President to back out will be tremendous."

The AP (11/25, Elliott) notes that in July, the House "passed its latest round of sanctions against Iran with backing from both parties, but the measure stalled in the Senate" after President Obama "convinced Senate leadership to hold off consideration of the measure while negotiators pursued an agreement." The AP goes on to report that on Sunday, "lawmakers already were talking about sanctions designed to caution Iran that failure to use the six-month window to reach a deal would only leave Iranians in worse economic straits." Sen. Marco Rubio said, "There is now an even more urgent need for Congress to increase sanctions until Iran completely abandons its enrichment and reprocessing capabilities."

The Wall Street Journal (11/25, Hughes, Subscription Publication, 5.91M) reports that on ABC's This Week, Sen. Saxby Chambliss said, "Instead of easing them, now is the time to tighten those sanctions."

House Minority Whip Rep. Steny Hoyer, on CBS' Face The Nation (11/24, Schieffer, 2.64M), said, "It is appropriate that we wait six months to implement those, which will say to the Iranians: 'We need a final deal, and if not a final deal, these tougher sanctions are going to go into place.'"

Bloomberg News (11/25, Tirone, Lakshmanan, Foroohar, 1.91M) reports that on Sunday, the President "urged members of Congress not to proceed with plans to impose fresh sanctions on Iran." However, Sen. Schumer said the "disproportionality of this agreement makes it more likely that Democrats and Republicans will join together and pass additional sanctions when we return in December."

Politico (11/25, Everett, 467K) features statements from Schumer and Menendez under the headline, "Dems Still Press For New Sanctions." Roll Call (11/25, Lesniewski, 87K) notes that Menendez and Schumer "are senior members of the Senate Banking Committee, which has lead jurisdiction over the sanctions issue."

McClatchy (11/25, Kumar, 95K) notes that the President did get support from Sen. Dianne Feinstein, chairwoman of the Senate Intelligence Committee, who said, "By any standard, this agreement is a giant step forward and should not be undermined by additional sanctions at this time."

The Los Angeles Times (11/25, Simon, 3.07M) reports that Sen. Carl Levin, who chairs the Armed Services Committee, and, according to the Times, like Feinstein, has a "long record...of supporting Israel," released a statement describing this weekend's deal as "a realistic, practical way to freeze Iran's nuclear program for six months while we seek a long-range diplomatic end to Iran's nuclear weapon ambition."

In a post titled, "Top Dems, Republicans Blast Obama's Nuke Deal With Iran," The Hill (11/25, Becker, 194K) reports that Senate Majority Leader Harry Reid "vowed last week to move ahead with sanctions legislation, but has yet to comment on the agreement finalized this weekend in Geneva."

Bloomberg News (11/25, Tirone, Lakshmanan, Foroohar, 1.91M) draws attention to criticism of the deal from members of Congress of both parties, including House Majority Leader Eric Cantor, who said the US "must rebuild our alliances in the region and stand firmly with our closest partners against Iranian aggression." The Wall Street Journal (11/25, Solomon, Norman, Subscription Publication, 5.91M) quotes Sen. Mark Kirk as saying, "This deal appears to provide the world's leading sponsor of terrorism with billions of dollars in exchange for cosmetic concessions."

Reuters (11/25, Bohan, Dunham) reports that in an appearance on Fox News Sunday, Sen. Bob Corker, the top Republican on the Foreign Relations Committee, predicted that there is going to be "a bipartisan effort to try to make sure that this is not a final agreement." Sen. Ben Cardin, also on Fox News Sunday (11/24, Wallace), vowed not to "stand by" and "just let this be the final deal."

The New York Times (11/25, Landler, 9.61M) reported that on CNN's State Of The Union, Rep. Mike Rogers (R-MI), the chairman of the House Intelligence Committee, argued that "the agreement gave a 'dangerous' nation an out from mounting sanctions that were just starting to show results." Rogers is quoted as saying, "The only thing that has changed is that you have now given them a permission slip to continue enrichment."

House Foreign Affairs Committee ranking Democrat Eliot Engel (D-NY) said on CNN's State Of The Union (11/24, Crowley), "It's disappointing to me that Iran is still going to be allowed to enrich while they're talking. I would have thought that that should be a prerequisite to any kind of talks."

Rep. Duncan Hunter (R-CA), in an op-ed for USA Today (11/25, Hunter, 5.82M) titled, "Iran Deal's Details Are Cause For Alarm," also makes the case that this weekend's deal "provides no real assurance that Iran will stop pursuing nuclear weapons" because "Iran's centrifuges will still spin by the thousands."

According to the Christian Science Monitor (11/25, Knickerbocker, 540K), polling shows that the US public is far more open to negotiations with Iran than is the Congress. The Monitor notes that a CNN/ORC poll taken in September "found that 'three-quarters of Americans say they favor direct diplomatic negotiations with Iran in an attempt to prevent that country from developing nuclear weapons,'" and that included 87% of Democrats and 68% of Republicans.

Obama's Call To Netanyahu Fails To Mollify Israeli Officials. Bloomberg News (11/25, Doming, Talev, 1.91M) reports that on Sunday, President Obama "moved to prevent the agreement from opening a rift with" the government of Israel, as well as "some Democrats in Congress," by calling Netanyahu. Principal Deputy White House Press Secretary Josh Earnest said that in a call to Netanyahu, Obama "underscored that the United States will remain firm in our commitment to Israel, which has good reason to be skeptical about Iran's intentions."

On NBC Nightly News (11/24, lead story, 3:35, Holt, 7.86M), Andrea Mitchell reported that the President "tried to reassure" Netanyahu "that he will be consulted on every aspect of any final deal with Iran," but, according to Mitchell, "Israel's worry is that the President is too eager for an agreement and not driving a hard enough bargain with Tehran."

The Wall Street Journal (11/25, Solomon, Norman, Subscription Publication, 5.91M) reports that while President Obama called the agreement "a new path toward a world that is more secure," Netanyahu's office released a statement reading: "This is a bad agreement. It gives Iran exactly what it wants: both substantial easing of sanctions and preservation of the most substantial parts of its nuclear program."

The New York Times (11/25, Kershner, Subscription Publication, 9.61M) reports that Netanyahu's foreign minister, Avidgor Lieberman, called the deal reached this weekend "the greatest diplomatic achievement for the Iranians." Yuval Steinitz, Israel's minister of strategic affairs, maintained that "like the failed agreement with North Korea, this agreement is likely to bring Iran closer to obtaining the bomb." Steinitz added, "Israel cannot take part in the international celebration, which is based on Iranian duplicity and self-deception." The Times reports that Naftali Bennett, Israel's economic minister, "even warned that the pact could result in a nuclear attack against the West," saying, "If five years from now a nuclear suitcase explodes in New York or Madrid, it will be because of the deal that was signed this morning."

In a front-page article under the headline, "Iran Nuclear Deal Could Complicate Other US Foreign Policy Efforts In The Middle East," the Washington Post (11/25, A1, DeYoung, 4.28M) reports that "the Iran agreement, seen by...Netanyahu as a threat to regional stability, may hamper his government's willingness to compromise with the Palestinians in talks backed by the United States." According to the Post, the increased "tension...comes as the administration, and Kerry personally, are trying to weather a rough patch in efforts to bring the Israelis and the Palestinians to agreement on a two-state solution."

The Los Angeles Times (11/25, Sobelman, 3.07M) covers the reaction from Israel in a piece titled, "Israel's Netanyahu: Iran Agreement A 'Historic Mistake.'" The Wall Street Journal (11/25, Levinson, Subscription Publication, 5.91M) reports that Israeli President Shimon Peres was less critical of the initial agreement than Netanyahu and his ministers, and contended that the final agreement may still provide Israel with many of the reassurances it seeks. The Journal also notes that on Sunday, the newspaper Haaretz suggested that "perhaps it's time to consider other diplomatic options besides perpetual petulance" because Israel's allies have been reduced to "only Saudi sheiks and U.S. lawmakers."

USA Today (11/25, Chabin, 5.82M) reports from Jerusalem that "few" Israelis "expect [their] military to stage a pre-emptive strike against Iran's nuclear facilities anytime soon," but they "know it is a possibility." USA Today

notes that a poll released this month found that "52.4% of Israeli Jews favored a solo strike on Iran's nuclear sites, and 68.8% thought an independent military strike against Iran would succeed." USA Today adds that a separate recent poll "found that only 31% of Israeli Jews trusted the U.S. to safeguard Israel's security."

The Weekly Standard's Bill Kristol said on ABC's This Week (11/24, Stephanopoulos, 2.73M), "That strikes me as a terrible deal," and so, "of course, the Iranian regime is very happy with this deal and our allies are very unhappy with it."

Gerald Seib, in his column for the Wall Street Journal (11/25, Seib, Subscription Publication, 5.91M), contends that US allies' concerns about the Iran deal reflect their larger worry about the US's commitment to the region, and the growing perception that the US is increasingly reluctant to engage in any new wars.

The Wall Street Journal (11/25, Subscription Publication, 5.91M), in an editorial titled, "Iran's Nuclear Triumph," denounces the deal as an unmitigated disaster for the US and Israel that will make Iran a nuclear power and give it access to cash it desperately needs.

Kerry: "Verification Is The Key." The New York Times (11/25, Landler, 9.61M) reported that in interviews that aired on CNN's State Of The Union, CBS' Face The Nation and ABC's This Week, Secretary Kerry "offered a robust defense of the interim nuclear agreement with Iran...rejecting comparisons to North Korea and insisting that the deal would make Israel and Persian Gulf allies of the United States more secure, not less so."

The Washington Post (11/25, A1, Warrick, 4.28M) reports that on Sunday, Kerry "argu[ed] that the United States and its allies believe that it ensures Iran will either abide by the agreement or face the reinstatement of measures that have crippled Iran's economy." Politico (11/25, Drusch, 467K) reports that on CBS' Face The Nation, Kerry "compared the negotiations to dealing with the Soviet Union," saying, "We've done arms control agreements in other parts of the world. ... It's not based on trust. It's based on verification."

Likewise, USA Today (11/25, Jackson, 5.82M) says that in all of the interviews Kerry sat for, his message was "that without verification, there can be no real deal." On CNN's State Of The Union, Kerry said, "Verification is the key. ... We're trying to set up a process by which we can verify, know what we're doing, restraining the program while we negotiate the comprehensive deal."

The Hill (11/25, Schroeder, 194K) noted that on ABC's This Week, Kerry said, "This negotiation is not the art of fantasy or the art of the deal. It's the art of the possible." Kerry added, "We have no illusions." The Washington Times (11/25, Eldridge, Howell, 417K) covers Kerry's Sunday interviews in an article titled, "Kerry Defends Iran Deal: 'It's Not A Question Of Trust.'"

The Huffington Post (11/25, Edwards-Lewy, 11.54M) reports that on ABC's This Week, Kerry said, "We guarantee that while we are negotiating for the dismantling...they will not grow their program and their capacity to threaten Israel," and so Israel "will actually gain a larger breathing space in terms of the breakout capacity of Iran." But USA Today (11/25, Jackson, 5.82M) notes that while Kerry insisted that the US and Israel "absolutely share the same goal here," and that "there is no daylight between us," Netanyahu "denounced the agreement, calling it 'a historic mistake.'"

David Andelman, editor in chief of World Policy Journal, in an op-ed for USA Today (11/25, Andelman, 5.82M), asks rhetorically, "How does...the IAEA or the Western powers in Geneva, determine to everyone's satisfaction that [Iran's] stockpiles of near-weapons-grade 20% uranium have been watered down, that no new fissile materials are being produced and that the Arak plutonium reactor has been returned to a standstill mode?" According to Andelman, "Trust, but verify, would seem to be the only viable option." However, Andelman adds that the Administration must not "let a desperate desire for a potentially historic foreign policy legacy trump the need to police every step of the process."

Kerry And Zarif Offer Different Perspectives On Iran's Right To Enrich Uranium. On NBC Nightly News (11/24, story 2, 2:25, Holt, 7.86M), Secretary Kerry was shown saying, "Let me be clear, this first step does not say that Iran has a right to enrichment. No matter what interpretive comments are made, it is not in this document." However, in an interview with NBC's Ann Curry, Iranian Foreign Minister Zarif said that while the agreement "doesn't say in so many words" that Iran has the right to enrich uranium, "it says very clearly that Iran

will have an enrichment program and it has a right to nuclear technology for peaceful purposes.”

The Washington Post (11/25, A1, Warrick, Gearan, 4.28M) reports that in Geneva, Zarif “repeatedly insisted that” his government “needed explicit language about enrichment in the text in order to sell the deal back home,” but the US “rejected any mention of an enrichment ‘right’ and pushed for vague language referring to Iran’s ability to seek peaceful nuclear power in a ‘mutually defined’ way.”

USA Today (11/25, Lackey, 5.82M) reports that on Sunday, the Twitter account, @HassanRouhani, which “has not been verified by Twitter but is believed to be the legitimate, English account of the Iranian leader,” included this update: “#IranTalks progressed in such a way that rights of Iranian nation to peaceful #nuclear energy & enrichment were acknowledged by world powers.”

Kerry Credited With Producing “A Diplomatic Coup.” Anne Gearan, in an analysis for the Washington Post (11/25, 4.28M), says “the deal Kerry was instrumental in cutting is a diplomatic coup, even if its effectiveness and durability remain in doubt,” because it “sets new boundaries for Iran’s disputed nuclear program that represent significant compromises and concessions for Iran.” Gearan goes on to say that the deal was also “the work of many lesser-known diplomats, including Wendy Sherman, the State Department’s undersecretary for political affairs and its representative to the negotiations over Iran’s nuclear program.”

John Bacon, in a piece for USA Today (11/25, Bacon, 5.82M) titled, “Kerry’s Place In History Could Hinge On Iran Outcome,” notes that already in his “short time” at State, Kerry has worked on “efforts to revive the Palestinian peace talks, a deal brokered with Russia aimed at removing chemical weapons from Syria, and a post-withdrawal security agreement with Afghanistan.”

Secret US-Iran Talks Preceded This Weekend’s Deal. Terry Moran, on ABC World News (11/24, story 2, 2:45, Muir, 7.43M), reported that in a development that was met with “diplomatic astonishment,” it was revealed that “there had been months of unprecedented secret talks between the US and Iran to lay the ground work for Geneva,” including “five meetings this year” in which “US and Iranian officials [met] face to face.” According to Moran, President Obama was “keeping some of the closest US allies, including Israel, in the dark, as the agreement took shape.”

The AP (11/25, Klapper, Lee, Pace) reports that President Obama “first shared the existence of the secret diplomacy with...Netanyahu in September, and only then offered a limited recounting of how long the discussions between Iran and the United States had been taking place.” According to the AP, Deputy Secretary of State William Burns and Jake Sullivan, an adviser to Vice President Biden, “led each US delegation,” although Wendy Sherman, the State Department’s undersecretary for political affairs, was also present at “the most recent face-to-face talks.” The AP says Burns and Sullivan “were accompanied...by National Security Council aide Puneet Talwar and four other officials.” The AP says the meetings, held in Muscat, Oman, were “guided by Sultan Qaboos, Oman’s diminutive but wily monarch, who has cultivated decades of good relations with the United States and his region’s two rivals: Sunni-controlled Saudi Arabia and Shia-dominated Iran.”

The Washington Times (11/25, Taylor, 417K) reports that National Security Adviser Susan Rice was “also...involved in the secret direct talks.” Mark Landler, in a front-page analysis for the New York Times (11/25, A1, Landler, Subscription Publication, 9.61M), says President Obama “has wanted to bring in Iran from the cold since he was a presidential candidate,” when he promised to “pursue ‘aggressive personal diplomacy’ with Iranian leaders, and ruling out the concept of leadership change, which was popular at the time.”

According to USA Today (11/25, Jackson, 5.82M), the previously secret rounds of negotiations “may...explain some of the tensions between the United States and France, which earlier this month balked at a proposed deal, and with Israel, which is furious about the agreement and has angrily denounced the diplomatic outreach to Tehran.” USA Today also reports that President Obama “personally authorized the talks,” and that Secretary Kerry “visited Oman in May on a trip ostensibly to push a military deal with the sultanate but secretly focused on maintaining that country’s key mediation role.”

The Washington Post (11/25, A1, Warrick, Gearan, 4.28M) reports that in Geneva, Secretary Kerry’s “personal influence appeared to help, and in ways that were not immediately obvious during the negotiations.” According to the Post, the Administration has “revealed that Kerry had been working quietly through Omani intermediaries to

reach out to Iranian moderates since 2011, two years before he was named...secretary of state."

According to the New York Times (11/25, Kershner, Subscription Publication, 9.61M), Silvan Shalom, Israel's Minister for Regional Development, "was asked on Israel Radio if Israeli officials had been informed about the secret American-Iranian talks." The Times reports that Shalom replied, "It is not important whether or not we were informed. What is important is if we knew of it, and we did know."

Saudis Concerned About Iran's Regional Influence, But Other Arab Governments Endorse Deal. USA Today (11/25, Dorell, 5.82M) reports that Abdullah al-Askar, "chairman of Saudi Arabia's appointed Shoura Council," said, "I am afraid Iran will give up something to get something else from the big powers in terms of regional politics — and I'm worrying about giving Iran more space or a freer hand in the region." Al-Askar added, "The government of Iran, month after month, has proven that it has an ugly agenda in the region, and in this regard no one in the region will sleep and assume things are going smoothly." USA Today adds that Marwan Bishara, senior political analyst at Al Jazeera, also says "the Saudis are most alarmed by the potential U.S.-Iran detente and the rise of an unrestrained Iran on the Middle East stage."

On the other hand, the Wall Street Journal (11/25, Knickmeyer, Subscription Publication, 5.91M), in an article titled, "Arab States Show Cautious Optimism On Nuclear Deal," reports that the governments of Turkey, Egypt and the United Arab Emirates all endorsed the deal reached this weekend.

Philip Ewing, in an analysis for Politico (11/25, Ewing, 467K), says, "Even the most optimistic Middle East analyst probably is not cockeyed enough to expect Iran's nuclear agreement to also mean it will withdraw the many tentacles it uses to work its will in places from Syria to Iraq to...Bahrain."

UN's Ban, Putin Welcome Diplomatic Progress. AFP (11/25, Sturdee, Revise) reports that UN Secretary General Ban Ki-moon welcomed the initial deal, which he said might "turn out to be the beginnings of a historic agreement," while Russian President Putin cautioned that while "a breakthrough step has been made," it is "only the first on a long and difficult path."

AFP (11/25) reports that on Sunday, Russian Foreign Minister Sergei Lavrov said, "We are convinced that Iran will cooperate with the agency in good faith." Lavrov added, "We didn't recognise these unilateral sanctions, so it is correct to start easing pressure on Iran by removing unilateral sanctions."

Most Iranians Were Reportedly Elated By News That A Deal Had Been Reached. Lester Holt, on NBC Nightly News (11/24, story 2, 2:25, Holt, 7.86M), reported that "on the streets of Tehran" there were "celebrations" as "people waved flags and flowers and cheered Iran's foreign minister, the chief negotiator as an ambassador of peace."

ABC World News (11/24, story 3, 2:05, Muir, 7.43M) showed footage from Tehran as David Muir described the scene of "hundreds cheering on their negotiators returning to the airport, giving them a hero's welcome." ABC's Muhammad Lila reported from Tehran that President Rouhani is "being hailed as a hero."

On the CBS Evening News (11/24, story 3, 1:25, Glor, 5.58M), Elizabeth Palmer reported that "when the Iranian nuclear negotiating team arrived back at the Tehran airport, it was greeted by a cheering crowd of mostly young people who are very happy with the deal, happy with thawing relations with relations where the west." However, Palmer added that "behind the scenes, we should be very aware that there are hard-liners that are bitterly opposed to this deal inside Iran and see it as a sellout to the West."

AFP (11/25, Sturdee, Revise) reports that Iran's "supreme leader," Ayatollah Khamenei, "hailed the deal," and, according to AFP, "for ordinary Iranians, news of the breakthrough was a moment of unbridled joy."

The Christian Science Monitor (11/25, Peterson, 540K) reports that on Sunday, President Rouhani appeared alongside "family members beside him of assassinated nuclear scientists," and said Iran's "enemy [failed] to promote Iranophobia," as the rest of the world "came to understand that respecting the Iranian nation would bear results."

Reuters (11/25, Hafezi, Pawlak) reports that in an open letter to Rouhani that was published by Iran's state news

agency, Khamenei wrote: "This can be the basis for further intelligent actions." In an interview televised in Iran Sunday, Iranian Foreign Minister Mohammad Javad Zarif said, "In the coming weeks – by the end of the Christian year – we will begin the programme for the first phase. At the same time, we are prepared to begin negotiations for a final resolution as of tomorrow. ... We need to start moving in the direction of restoring confidence, a direction which we have managed to move against in the past." AFP (11/25) reports that Zarif has become something of a national hero in the wake of the announcement that a deal has been reached.

According to the New York Times (11/25, Erdbrink, Subscription Publication, 9.61M), "factions from across the [Iran's] political spectrum, including hard-liners who have preached increased isolation, said they welcomed the first nuclear deal in more than a decade between Iran and world powers." The Times says that in Tehran on Sunday, "people could be seen smiling and discussing the news."

The Wall Street Journal (11/25, Michaels, Faucon, Subscription Publication, 5.91M) reports that the easing of sanctions on Iran could provide opportunities for multinationals that have not had access to the Iranian market for some time. However, according to the Journal, it is unlikely that US firms will be at the head of the line of firms hoping to take advantage of the shift because of the stigma attached to conducting business with Iranians.

The Foundation for Defense of Democracies' Mark Dubowitz and Orde Kittrie, in an op-ed for the Wall Street Journal (11/25, Subscription Publication, 5.91M) predict that Iran will likely reap far more than the \$7 billion estimated by the Administration from the easing of international sanctions over the next six months.

Analyses: Deal Provides Six Months To Prevent The US, Israel From Starting War With Iran. Under the headline, "Obama Has Leeway On Iran, Despite US Lawmakers' Concerns," Reuters (11/25, Zengerle, Bohan) reports that despite the skeptical assessment of this weekend's deal, President Obama is likely to have the six months he is asking for to work towards a final deal without active obstruction from Congress. Sen. Bill Nelson is quoted as saying, "It is a choice between a pause or imminent war. I choose a verifiable pause."

Bloomberg News (11/25, Ben-david, 1.91M) reported that Netanyahu emphasized that Israel "is 'not bound' by the Geneva agreement" and "has the right and obligation to defend itself, by itself, against any threat." However, Uzi Eilam, the former director-general of the Israeli Atomic Energy Commission, believes that "the use of force isn't seen as likely within the life of the deal." Eilam is quoted as saying, "This agreement will not allow Israel, or anyone, to utilize the military option over the six next months, or at least until the interim period is over and we know if a final deal is possible."

AFP (11/25) reports that Alireza Nader, a senior policy analyst with the RAND Corporation, is also under the impression that Israel "would not seek to undermine an accord which the international community has signed off on with a strike on Iran in the coming six months."

Josh Gerstein, in a piece for Politico (11/25, Gerstein, 467K), writes that while "supporters of a tougher line against Iran were disappointed...the pact did deliver an item long on their wish list: a deadline" of six months. According to Gerstein, "If no permanent deal is reached" in the next months, "the White House will come under increasing pressure to act militarily – or acquiesce to an Israeli strike." Gerstein notes that on CNN Sunday, Sen. Lindsey Graham said, "I think you will see the Congress impose additional sanctions that won't take place for six months with some conditions." According to Gerstein, on Saturday, the President was "ambiguous on how he would respond to sanctions legislation that might pass Congress in the coming weeks if new strictures are set to deploy automatically after six months or if Iran is found to have strayed from its promises in the interim pact."

Michael Gordon, in an analysis for the New York Times (11/25, A1, Gordon, Subscription Publication, 9.61M), notes that the "interim accord...allows Iran to preserve most of its nuclear infrastructure, including the capabilities it would need to develop a nuclear device." Gordon adds that "negotiating a comprehensive agreement" will "require much tougher choices by each side." Gordon also says that, at this point, "the question is not whether the Obama administration is prepared to allow Iran to continue enriching uranium but rather what constraints the United States and its negotiating partners will insist on in return."

WPost, NYTimes And USA Today Offer Cautious Optimism About The Prospects For Peace. The Washington Post (11/25, 4.28M), in an editorial, says the deal reached this weekend "is freighted with risk," but is, nevertheless, "worthy as an interim step — and preferable to the military action that might otherwise have

been deemed necessary." The Post goes on to contend that while the imposition of sanction "played a vital role in bringing Iran to the bargaining table," Congress "would be wise to refrain from imposing sanctions that take effect while negotiations proceed."

The New York Times (11/25, Subscription Publication, 9.61M) editorializes that President Obama and President Rouhani "deserve credit for resisting fierce domestic opposition and a 30-year history of animosity between the two countries to get to this point." Regarding the deal itself, the Times says, "no one can seriously argue that it doesn't make the world safer."

In an editorial, USA Today (11/25, 5.82M) maintains that "the potential benefits of this preliminary deal overwhelm the relatively small concessions that negotiations required."

Editorial Wrap-Up:

NEW YORK TIMES. "Getting To Yes With Iran." The New York Times (11/25, Subscription Publication, 9.61M) editorializes that President Obama and President Rouhani "deserve credit for resisting fierce domestic opposition and a 30-year history of animosity between the two countries to get to this point." Regarding the deal itself, the Times says, "no one can seriously argue that it doesn't make the world safer."

"How To Do Right By The Disabled." The New York Times (11/25, Subscription Publication, 9.61M) editorializes about the revival of a the United Nations Convention on the Rights of Persons with Disabilities, which the Senate failed to ratify last year. Sen. Robert Menendez (D-NJ) has held two hearings on the treaty and plans a committee vote as early as next month. The Times notes that 138 nations have ratified the treaty, and urges the Senate to approve it, dismissing right-wing arguments that it would hinder US sovereignty, and contending that disabled Americans "would find it easier to travel, study and live abroad if the United States could win improved conditions."

"Little Rock Moves On." The New York Times (11/25, Subscription Publication, 9.61M) editorializes that last week, Arkansas reached an agreement with three state school districts and two citizen groups on phasing out by 2018 nearly \$70 million a year in subsidies "that have helped those districts achieve workable desegregation through methods like crosstown busing and the creation of magnet schools." Noting that Little Rock, AR was "the site in 1957 of one of the most explosive desegregation struggles," the Times adds that the agreement "may bring an end to one chapter in the long fight for racial equality, one that began with the school board's unanimous decision to enroll nine black students in Central High School and took a notorious turn when Gov. Orval Faubus decided to play to segregationist politics and mobilized the National Guard to block the students," and "provides hope that the nation can labor beyond its racist past."

WASHINGTON POST. "A Deal With Iran." The Washington Post (11/25, 4.28M), in an editorial, says the deal reached this weekend on Iran's nuclear program "is freighted with risk," but is, nevertheless, "worthy as an interim step — and preferable to the military action that might otherwise have been deemed necessary." The Post goes on to contend that while the imposition of sanctions "played a vital role in bringing Iran to the bargaining table," Congress "would be wise to refrain from imposing sanctions that take effect while negotiations proceed."

"Cellphones On Planes." An editorial in the Washington Post (11/25, 4.28M) argues that the FCC should "permit airlines to experiment with allowing passengers to use cellphones in flight," and that "airlines should get on with experimenting." The Post dismisses concerns about "the prospect of having to listen for hours to a loudmouth with unlimited mobile minutes," arguing that the "FCC's move wouldn't guarantee such an outcome" and would "leave matters to airlines and their passengers, which is as it should be." the Post expresses "hope that carriers explore their options to bring air travel into the 21st century, with all its pluses and minuses."

"Too Quiet On China." The Washington Post (11/25, 4.28M) editorializes that the Administration's promotion of human rights and democracy in China has been insufficient. A recent speech by national security adviser Susan Rice that was billed as "major address last week on Obama administration policy toward Asia" contained only one reference to this issue, despite what appears to be an "intense political crackdown" affecting both Chinese dissidents and American journalists. Although Rice's spokesman advised that another speech focusing on human rights is forthcoming, Rice's speech gave the impression to Chinese dissidents that "they are on their

own.”

WALL STREET JOURNAL. “Iran’s Nuclear Triumph.” In an editorial, the Wall Street Journal (11/25, Subscription Publication, 5.91M) denounces the deal on Iran’s nuclear program as an unmitigated disaster for the US and Israel that will make Iran a nuclear power and give it access to cash it desperately needs.

“The Wisdom Of The Swiss.” The Wall Street Journal (11/25, Subscription Publication, 5.91M) editorializes that the Swiss were wise to reject a measure that would have denied many people the salary they deserve, and would have also resulted in increased bureaucracy and government coercion as well as the flight of the wealthy.

“Rationing Bone Marrow.” In an editorial, the Wall Street Journal (11/25, Subscription Publication, 5.91M) criticizes HHS for a proposed rule-making which seeks to override a decision by the Ninth Circuit Court of Appeals to allow bone-marrow donors to be compensated. Noting that the ban on compensation for marrow donors has resulted in a shortage for patients facing life threatening blood diseases, the Journal says the HHS effort is an example of the Administration’s desire to impose government control over medical decisions.

Washington Schedule:**TODAY'S EVENTS IN WASHINGTON.**

White House:

PRESIDENT OBAMA— Delivers remarks at Betty Ann Ong Chinese Recreation Center, San Francisco, as well as an event for the DNC; travels to Los Angeles, where he will take part in two DCCC/DSCC events.

VICE PRESIDENT BIDEN— No Scheduled Events.

US Senate: 10 a.m. CAPITOL CHRISTMAS TREE ARRIVAL — The tree arrives after traveling through more than 20 communities. (Time approx.) Crew set-up 9:15 am. First St. NW (Garfield Circle). The 88-foot Engelmann spruce is from the Colville National Forest in Northeastern Washington state. It will mark the second time that Washington state has provided the Capitol Christmas Tree and it will be the second-tallest tree the Capitol has honored. After it arrives at the US Capitol and is secured in the ground, the tree will be decorated with approximately 5,000 ornaments, handcrafted by Washingtonians to reflect this year's theme, "Sharing Washington's Good Nature."

US House: 10 a.m. CAPITOL CHRISTMAS TREE ARRIVAL — The tree arrives after traveling through more than 20 communities. (Time approx.) Crew set-up 9:15 am. First St. NW (Garfield Circle). 10 a.m. OVERSIGHT AND GOVERNMENT REFORM – FIELD HEARING — Full committee hearing on "Field Hearing: ObamaCare Implementation: High Costs, Few Choices for Rural America." Witnesses: Dr. Jeff Reinhardt, President of The Longstreet Clinic, a privately-owned clinic serving both rural and urban hospitals; Michael Boyette, Small business owner, facing higher premiums under Obamacare; Joshua Kinsey, Former Owner, Cleveland Pharmacy, forced to sell due to uncertainty surrounding the healthcare law; Emma Lucille Collins, Self-employed, concerned about higher premiums and security risks to personal information; Raymer Sale, Jr., President of E2E Benefits Services, Inc., expert in employee benefits and HR administration.

Other: CSIS – PUBLIC DIPLOMACY – MUSLIM COUNTRIES — Public Diplomacy in Muslim Countries with Walter Douglas, Minister-Counselor for Public Affairs, U.S. Embassy, New Delhi. Speaker: Walter Douglas, Minister Counselor for Public Affairs, U.S. Embassy, New Delhi. [Http://csis.org/event/public-diplomacy-muslim-countries](http://csis.org/event/public-diplomacy-muslim-countries). Location: 2nd Floor Conference Room A, Center for Strategic and International Studies, 1616 Rhode Island Ave. NW. 11 a.m. – 12:30 p.m.

NASA — NASA Television will broadcast the Monday, Nov. 25, launch and the Friday, Nov. 29, docking of an uncrewed Russian resupply spacecraft, loaded with almost three tons of food, fuel and supplies for the six Expedition 38 crew members aboard the International Space Station.

Last Laughs:

LATE NIGHT POLITICAL HUMOR.

Jay Leno: “Well, how embarrassing is this? Vice President Joe Biden was out picking up lunch for he and the President. When it came time to pay the tab at the sandwich shop, he didn’t have enough money. He had to borrow 10 bucks. That’s not the embarrassing part. He’s Vice President of the United States and they sent him out to get sandwiches. That’s the embarrassing part.”

Jay Leno: “Can you imagine? He’s [Rep. Radel] a Congressman, come on. He should have known it wasn’t a real drug dealer. Drug dealers don’t like to be seen with anyone as sleazy as a Congressmen.”

David Letterman: “A dog in Colorado successfully signed up for ObamaCare. A dog. This is the kind of thing that happens when your state legalizes marijuana.”

Jimmy Fallon: “One of the other big stories in politics this week is President Obama, he had to come out and apologize to America and admit that Obamacare is not working. It’s a complete mess. So I was kind of surprised, but a new CBS poll came out found that 7 percent of Americans actually think ObamaCare is fine the way it is. In a related poll, 100 percent of CBS researchers do not understand sarcasm.”

Jon -

Very nice and right on the mark. I think I will cut/paste the Facebook post and send it to Gov. Herbert - I will be seeing him next month over sage grouse.

Cheers,

Sally

I just wanted to pass this on. It was posted on our Facebook page.

We often do not see the impact of our day-to-day work... the fantastically maintained trails... the excellent customer service... the dedication to preserving the resources... Hopefully this will remind all of you how powerful a visit to Zion can be... On an individual, a budding family... on not only their memories, but also their health and happiness.

Jock just sent out a message about us working together to not only finish crafting our park vision, but also to create core values, and a set of goals that help guide us. Please get involved in one of the teams if you can- it does matter!

Thanks for all your hard work,
 Aly

Subject: Facebook Message

Hi Aly,

One of our Facebook followers posted an extremely touching and grateful message about the park, park staff, and our social media efforts on our Facebook page yesterday. I thought that you would like to see it.

I don't know that I have ever told you or shared this with you... but in 2007 my 7 month pregnant wife and 3, almost 4, year old daughter were returning from a stay with my parents in Vegas. We had booked a night in Washington just to have a family day. As we came into St. George we saw a billboard for Zion National Park. I remarked to my wife that I had not been to Zion since I was a kid. She agreed that she had not either so we made the decision to "go check it out."

With no planning or preparation we showed up and wondered what we could do. We ended up hiking to the Narrows entrance, to Weeping Rock and few other smaller walks. The last one we did was the Canyon Overlook Trail. Now remember... a 7 month pregnant wife, a 3 year old, limited water and shoes designed for walking the strip in Vegas NOT hiking... I was very out of shape and overweight and we had a bit of struggle getting the family to the end but at the moment I set foot at that fence looking down into Zion from that overlook my life was changed forever.

I don't know what flipped in me at that moment but all of the old family camp trips and Boy Scout backpacking trips came flooding back. I felt a bit choked up as I looked out and realized that I had missed out on that experience for nearly a decade at that point. I had completely forgotten the feeling. I changed in that moment.

We of course then took the LONG way home. My wife and I talked about rocks, lakes, geology, camping, hiking... we gained a new drive and desire. It consumed us and we have never looked back.

Since that moment we set the goal to double our previous year's millage and explore new amazing places. We have since been to Goblin Valley State Park, Bryce Canyon National Park, Capitol Reef National Park, Golden Spike National Historic Site, Timpanogos Cave National Monument, Yellowstone National Park, Grand Teton National Park and so many other amazing places along the way.

Our daughter, now 6 has 7 Junior Ranger badges and countless pins and buttons documenting the ever increasing list of miles she has put on. My son, now 2, points out birds, rivers, rocks, valleys and more and talks about them as he plays in our home. We have witnessed the Bison Rut and herds of Elk feeding. We have watched Old Faithful in the dark and at mid day. We were there for the rare and unpredictable eruption of Steamboat Geyser... and each memory is so precious to us.

In the midst of all of this tale is the deepest thank you I can offer. To give you an idea of the impact Zion has had on me... I have since lost 40 pounds. I am training for my first 5k in nearly two decades. We have purchased gear for hiking, snowshoeing, backpacking, camping, dutch oven cooking and we plan our lives around more of the

experiences I have shared above.

Thank you... thank you for preserving and sharing the beauty that has fundamentally changed who I am. Thank you for the sacrifices you make to teach, honor and display a piece of our Utah heritage. Thank you for your amazing posts on Facebook and other outlets that give me a glimpse each day as I sit in my office of what awaits me and what motivates and moves me. Your small and simple posts MAKE my day more than you can fathom.

We have not been back to Zion since that life-changing day... but we WILL be back. We are preparing ourselves to take on The Narrows, Subway and just embrace the beauty that Zion is. We talk about you and your park and your efforts all the time and long to be with you in those beautiful hills and valleys.

From the bottom of my heart and in gratitude for all that I am... Thank you. A million times over, thank you.

Jared Parmenter

Briefing Materials for Tuesday, November 26, 2013

Javaid, Zaina <zaina_javaid@ios.doi.gov>

Mon, Nov 25, 2013 at 7:00 PM

To: Sally Jewell (b)(6)@ios.doi.gov, Laura Davis <Laura_Davis@ios.doi.gov>, Nicole Buffa <nicole_buffa@ios.doi.gov>, Katherine Rupp <katherine_rupp@ios.doi.gov>, Erin Walls <erin_walls@ios.doi.gov>
Cc: Elizabeth Olson <elizabeth_olson@ios.doi.gov>

Sally,

Attached are the briefing materials for Tuesday, November 26, 2013. These have also been uploaded to Google Drive. Information for the internal briefing on Alaska have been hand-delivered to Erin.

Thank you,

Zaina

BRIEFING MEMORANDUM FOR THE SECRETARY

INTERNAL SAGE GROUSE BRIEFING

DATE: November 26, 2013
LOCATION: Secretary's Office
TIME: 3:30PM – 4:15PM
FROM: James Lyons, Counselor to the AS/LM, 202-208-4318
Michael Bean, Counselor to the AS/FWS, 202-208-7400

PURPOSE

This memo provides an update on the status of sage grouse conservation efforts, including a preliminary assessment of progress and a plan for finalizing BLM plans, in anticipation of your meeting with Governors at the Sage Grouse Task Force in Las Vegas on December 12.

BACKGROUND

The December meeting of the Sage Grouse Task Force will take place almost exactly two years after the Task Force was launched at the suggestion of Secretary Salazar at a meeting with Governor Mead and others in Cheyenne. It also takes place at roughly the mid-point in the effort to address systematically the threats to the sage grouse that led FWS to conclude in 2010 that the species warranted protection under the Endangered Species Act. A decision on whether to propose it for protection is now approximately 22 months away.

When we last met we agreed that you would use the December meeting with the Governors as an opportunity to highlight key shortcomings in the planning efforts and encourage cooperation and joint commitment to address those shortcomings. Below is the status of efforts on the assessment, a process for completing the planning effort and other key issues that may come up in Las Vegas.

DISCUSSION

Preliminary Assessment: The FWS believes it can provide a preliminary assessment that will allow you to complement the States and BLM for a few high level strengths in their plans (e.g. mitigation frameworks in Oregon and Nevada plans) as well as call out a few high level key shortcomings (e.g. failure to address private lands in Idaho).

To help inform this effort, the Task Force agreed at its September meeting that the states would prepare assessments of their own efforts to conserve the species. The Service provided a template for the states to use in making their self-assessments. The purpose of this exercise was both to document the status of state conservation efforts and to determine whether there were significant differences between how the states and the Service evaluated the states' efforts. These self-assessments were to have been submitted to the Service several weeks ago, but the first of them has only recently arrived. The Service now has six assessments in hand and expects

that it will not receive the completed templates from at least two states. The fact that not all states will be submitting assessments is a disappointment. The Service is currently in the process of evaluating the assessments that it has received. It will complete its evaluation prior to the Task Force meeting and your remarks at the meeting will address that evaluation.

Conservation Metrics: When the Service makes its decision in 2015 whether to propose to list the sage grouse, it will have an abundance of information that may vary widely in quality, scale, importance, etc. To make its task manageable, the Service would like to reach agreement with the states regarding the information that is most useful to report and how it may be most usefully reported. To that end, this past summer the Task Force created a “metrics team” to recommend how this matter should be resolved. The metrics team was to have reported its recommendations to the Task Force at its December meeting, but it now appears uncertain whether they will be ready prior to the December meeting. If no consensus has emerged by then, the Service will move forward on its own, relying on as much partial consensus as then exists within the metrics team. That may be necessary because the Service wants to test the metrics in its annual review of the status of the sage grouse, which begins with a call for data in early 2014. Your Task Force remarks may address this metrics issue as well.

BLM Planning: BLM has recently completed its final of 15 amended or revised Resource Management Plans (RMPs) amending 98 land use plans in draft for release for public comment. The 90 day comment period. BLM state and district office staff are now beginning the process of reviewing public and FWS comments on each toward the development of final plans for issuance in early to mid-summer. *[A summary of the status of the draft RMPs is attached.]*

BLM and FWS are currently working to establish a process and timetable for collaborating in the development of final plans *[attached]*. Three key elements are addressed:

- (1) Specific steps in the continuing FWS/BLM collaboration through September, 2014;
- (2) How and when BLM/USFS will evaluate the cumulative effects of their plans for conserving the GSG and work with the FWS to identify inadequacies in the plans; and
- (3) How state contributions to the conservation of the GSG will be considered in an overall cumulative effects analysis to aid in completing final, comprehensive and collaborative RMPs for submission to the FWS.

Fire: The mutually reinforcing phenomena of invasion by non-native annual grasses and shortened fire return intervals threaten the loss of sage brush habitat on a massive scale, particularly in the Great Basin. Because this is such a formidable threat, the Task Force has devoted considerable attention to it. At its September meeting, the Task Force heard the recommendations of a group assembled by WAFWA to evaluate the problem and make recommendations to address it. Those recommendation spanned a broad array of topics, from the need to identify in advance key habitat areas to that these areas are prioritized in pre-suppression and fire suppression activities; the need for a more reliable supply of native seeds to be used in post-fire restoration efforts; the creation of rural fire districts that safely utilize appropriate capabilities of those living on the landscape; and, of course, the need for more resources with which to address the threat. This is a topic well suited for cooperation with the states, and for discussion in your meeting with the Governors. *[A map of WAFWA zones, PACs and populations is attached].*

Mitigation: Several of the states have developed sage grouse conservation plans that include a significant role for compensatory mitigation (i.e., offsetting the impacts of authorized detrimental activities by carrying out beneficial activities, usually at a different site). FWS, in turn, has very recently provided to the Task Force a memo setting forth its recommendations for a general framework for compensatory mitigation for the sage grouse. In light of your own Secretarial Order directing the review and revision of departmental mitigation policies and practices generally, the time is ripe for a productive engagement with the states on the role that mitigation can and should play in conserving the sage grouse. This topic may also be appropriate to include in your Task Force remarks.

NEXT STEPS

Key Messages/Outcomes for the meeting with the governors:

- Ensure shared clarity on the process of preparing state and federal plans to date and the key milestones moving forward leading to a listing decision by Sept, 2015
- Identify high level elements of the plans that are strong and what areas need to improve
- Agree on the timeline and key actions/activities over next 9 months for state and federal partners to complete plans for submission to FWS
- Agree to have a last status check at the WGA meeting in June and commitment to address any remaining shortcomings

ATTACHMENTS

1. FWS/BLM/States overall timeline for completing management plans and listing process
2. Status of BLM RMPs to date
3. Map of WAFWA zones, PACs and populations to illustrate “roll-up” for landscape-level cumulative effects analysis

Attachment 1: FWS/BLM/States overall timeline for completing management plans and listing process

Greater Sage-grouse Draft Timeline (as of 11/22/13):

FWS = primary Fish and Wildlife Service activity

BLM = primary BLM activity

STATES = primary state activity

Now: Working with federal partners, state partners, energy industry and private entities to conserve sage-grouse

Ongoing – Verbal and written feedback given to federal and state entities per agreed-upon communication protocol from the Federal Family meeting.

Winter 2013 – Draft project plan for FWS listing determination process identifying staffing, roles and responsibilities, draft team structure, goals and objectives, identify resource needs, and begin to outline the schedule, deliverable documents, expert panel workshops, additional expertise, format for analyzing information, format and process for developing and finalizing decision recommendations.

Nov. 2013 – All BLM/FS draft RMPs available for public comment.

Dec. 2013 – Governor’s Task Force common conservation metrics development process complete. If the TF cannot resolve then FWS, together with BLM and FS, will select and finalize metrics. (See attached white paper on relationship of metrics and criteria).

Winter 2013-2014 - Complete design of Conservation Efforts Database.

Jan. 2014 – States have indicated that their plans should be completed.

Feb. 2014 - Conservation Efforts Database open for populating conservation action by federal, state, local and private entities; coordinate data call for annual candidate notice of review (CNOR) and initiate data call for the 2015 determination. Ask states to input data and test Conservation Efforts Database.

Feb. 2014 – All comment periods completed for BLM/FS draft RMP amendments and revisions. FWS will have delivered narrative comments and threat matrices (for each EIS) to BLM with explicit concerns raised at the individual plan level. FWS will also be providing verbal and then written comments on what needs to be included in a final proposed alternative to meet the COT objectives.

Feb. 2014 – Federal agencies meet to discuss planning effort and roll-up/roll-out. Preliminary assessment of outstanding issues could be delivered at this time.

Mar. 2014 –BLM/FS to provide draft cumulative effects analyses to FWS for fatal flaw review. This analysis should include cumulative effects at the population, WAFWA management zone, and range-wide scales. FWS will identify specific issues yet to be resolved at each scale based on information provided and any other information available to us. Note: it is critical the cumulative effects and related information from BLM/FS be available to FWS in order to conduct a timely and accurate assessment of the efficacy of the overall planning effort. Preliminary federal plans delivered to Governors by BLM/FS.

June 2014 – Final EISs are complete and released to the public

Spring/Summer 2014 – Work with BLM/FS to finalize RMP amendments and revisions.

June 2014 – Final candidate assessment update due to FWS HQ.

Summer/Fall 2014 – Host expert panels regarding topics with significant uncertainty or where expert panels would improve the analysis

- Using SDM and other structured processes, we anticipate convening several expert workshops to seek scientific input and analysis including a discussion of current and future affects to the species and habitat. This could be particularly useful in areas where there is uncertainty (e.g. climate change, invasive species/fire cycles and predictions, genetics).

Summer/Fall 2014 – Through facilitated discussions, evaluate potential for areas to be discrete and significant to the species including the Columbia basin population in Washington. Evaluate factors affecting those areas and their status later, during the range-wide analysis.

Sept. 2014 – BLM/FS final plans and Records of Decisions are due. Final state plans should also be completed.

Fall 2014 – Current BLM proposed plan-specific cumulative assessments and range-wide landscape assessment complete. These two pieces are essential for FWS evaluation range-wide. (See March 2014 reference.)

Fall 2014 – Complete analysis on Columbia Basin population (spec., is it a valid DPS of the species?).

Winter 2014 – Complete analysis of non-habitat based concerns (disease, predation, genetics, etc.).

NLT Dec. 2014 – Finalize data input to conservation efforts database (narrative, data in form of common metrics, spatial data)from BLM, FS, NRCS, State, industry and private entities.

After Jan. 1, 2015 –

FWS analyzes habitat concerns – using SDM and a team-based approach, analyze information regarding habitat-based threats (fragmentation and its sources). Using this analysis, develop range-wide analysis of the species viability including time horizon of threats, reliability of data, and evaluation of important areas of uncertainty. Finalize species status report and/or other summary of scientific information based on the analysis and information compiled.

Spring 2015 – FWS will develop and discuss decision recommendations based on relevant information

Spring 2015 – Once decision recommendations are settled, FWS will develop FR document and will compile and finalize administrative record documents related to each major decision point.

Sept. 30, 2015 – Proposed listing determination or not warranted finding due the Federal Register.

Attachment 2: Status of BLM RMPs to date

National GRSG Planning Strategy EIS Schedule			
GRSG Land Use Plan Amendments			
<p>Nevada and Northeastern California Sub-Regional Greater Sage-Grouse RMP Amendment/EIS</p>	<p><u>BLM California</u> : Alturas, Eagle Lake, and Surprise</p> <p><u>BLM Nevada</u>: Black Rock Desert-High Rock Canyon NCA, Carson City, Elko, Ely, Paradise-Denio, Shoshone-Eureka, Tonopah, and Wells</p> <p><u>Forest Service</u>: Humbolt and Toiyabe</p>	<p>The DEIS is currently within the 90-day public comment period, which ends on January 29, 2014.</p>	<p><u>Draft</u>: November 1, 2013</p> <p><u>Proposed</u>: August 2014</p> <p><u>ROD</u>: November 2014</p>

SECRETARY JEWELL SIGNS TRIBAL AGREEMENT WITH CITIZEN POTAWATOMI NATION. The [Columbus \(IN\) Republic](#) (11/26, 80K) reports that Interior Secretary Sally Jewell signed an agreement Monday with the Citizen Potawatomi Nation that gives them greater control of their trust land. Jewell was "joined on her first trip to Oklahoma as a Cabinet official to the Obama administration by Assistant Secretary for Indian Affairs Kevin Washburn and US Rep. Tom Cole." Jewell said, "The biggest thing to lift people up is housing and jobs."

The [Native American Times](#) (11/26, 337) reports that Jewell said, "The Citizen Potawatomi Nation now has the authority to decide how it wants to do business on its lands, making it easier for families to do things like buy and build houses or open businesses in the communities where they have lived for generations. Today's action encourages economic development on Indian lands, generating investment, new jobs and revenues. I applaud

Chairman Barrett and Vice-Chairman Linda Capps for their leadership on this initiative and look forward to working with other tribes across the nation to maintain tribal sovereignty and promote tribal self-determination and self-government."

The Oklahoman (11/26, 345K) reports that Citizen Potawatomi Nation Chairman John Barrett said, "This is a step in the right direction for tribal self-governance and will empower tribal governments to take greater control of their land. CPN has created a thriving economy of retail and tourism developments and we look forward to working with other businesses to spur business and commercial development in Oklahoma."

Also providing coverage are the Muskogee (OK) Phoenix (11/26, 29K), KSWO-TV Lawton, OK (11/26, 6K), Bloomberg BusinessWeek (11/25, 4.93M), Yahoo! (11/26, 17.91M), and Yahoo! Finance (11/26, 9.7M).

INTERIOR DEPUTY SECRETARY NOMINEE ADDRESSES ISSUES BEFORE SENATE PANEL. The E&E Daily (11/25) reports that Michael Connor, President Obama's nominee for the Interior Department's deputy secretary, pledged to work closely with governors to avoid an Endangered Species Act listing for the sage grouse. Connor also "defended the acquisition of new federal lands and said he would work closely with oil state lawmakers on 'common ground' for the sharing of offshore drilling revenues." He addressed those issues and more in a "lengthy response to members of the Senate Energy and Natural Resources Committee, which voted by voice in early October to advance his nomination to the floor."

In its "E2 Wire" blog, The Hill (11/26, 194K) reports that Connor told Sens. Mary Landrieu and Lisa Murkowski that "he's open to discussion about proposals that would share more offshore oil-and-gas royalties with coastal states." Connor said, "I know this is an issue that you care deeply about and, if confirmed, I commit to meeting with you in an effort to find any common ground that may exist and to work toward a path forward."

CAPE ROMAIN NATIONAL WILDLIFE REFUGE LOSING SEASHORE TO RISING EROSION. The State (SC) (11/24, 280K) reports that "chunks of seashore are vanishing" from the Cape Romain National Wildlife Refuge as "rising ocean levels and storms chew up the remote, unspoiled beaches some animals depend on for survival." According to the article, "during the past 25 years, erosion has claimed about 1,200 acres from four primary barrier islands in the nature preserve north of Charleston," including Bulls Island, which "drew national attention last week" as Interior Secretary Sally Jewell toured the island's eroding Boneyard Beach. However, "even more erosion is on the way as sea levels are expected to rise up to 5 feet in the Southeast by the end of this century."

The story also appeared in the Rock Hill (SC) Herald (11/25, 89K).

COLORADO GOV. HICKENLOOPER COMPLAINS ABOUT SAGE GROUSE BIAS. The Washington Times (11/26, Richardson, 417K) reports that "an example of the tension between Western Democrats and the Obama administration surfaced Monday when Colorado Gov. John Hickenlooper told a rural audience that Washington bureaucrats are pushing a 'slanted version' of the sage-grouse issue to political decision-makers." Hickenlooper said Interior Secretary Sally Jewell is "receiving one-sided advice from staff at the Fish and Wildlife Service over the issue of whether to place the Gunnison sage grouse on the endangered-species list." At a town-hall meeting at the Moffat County Fairgrounds in Craig, Colo, Hickenlooper said, "My job is to make sure that she gets — I shouldn't say a slanted version on the other side — let's just say a better version — how's that? — but a balanced version so she hears both sides of the story."

The Grand Junction Daily Sentinel (11/26, 73K) reports that Hickenlooper said "western governors want to take a science-based approach to management of the greater sage-grouse." Hickenlooper said "governors are working on a framework for solving sage-grouse management on their own."

Also reporting on the story is the Glenwood Springs (CO) Post Independent (11/26, 27K).

SURVEY FINDS EMPLOYEE MORALE AT INTERIOR SUFFERING. The E&E Daily (11/25) reports that employees at the Interior Department and the Energy Department are "on par with other federal workers when it comes to their overall job satisfaction," according to a recent government survey. According to the article, Employee morale suffers from "pay freezes, forced time off, congressional assaults on employee benefits and uncertainty about federal budgets." Moreover, "constant Republican criticism of the Obama administration's energy and environmental policies" means "these jobs aren't looking as attractive as they once did."

BIPARTISAN HOUSE COALITION URGES BUDGET LEADERS TO FUND PILT. The E&E Daily (11/25) reports that “nearly four dozen House lawmakers yesterday urged budget leaders to provide full funding to rural counties that contain large amounts of federal lands.” Lawmakers from both parties said that the payments in lieu of taxes program is “critical for counties to fund services including law enforcement, infrastructure and education.” A letter signed by 47 lawmakers to Budget Committee chairs and ranking members in the House and Senate stated, “The inability for counties to collect these local taxes on the extensive acreage of federal lands in their jurisdictions poses a significant burden, especially when counties often provide critical services on these very lands.”

LIVESTOCK INDUSTRY LAUDS GRAZING BILL’S PASSAGE BY SENATE COMMITTEE. The Salem (OR) Capital Press (11/25, 113K) reports that the livestock industry is more optimistic about legislation “seeking to address a backlog of environmental reviews on grazing allotments, now that the bill has passed a Senate committee.” Wally Butler, an Idaho rangeland consultant and international president of the Society for Range Management, “I’m certainly more hopeful — by a lot. The Senate has always been the difficult side.” The next step for the Grazing Improvement Act of 2013, S258, would be consideration by the full Senate.

TWO RETIRED GENERALS CALL FOR ACTION ON NATIONAL SECURITY, ECONOMIC ISSUES. The Examiner (11/26, 1.16M) reports that “two retired US generals are creating a citizens’ commission to closely watch actions by the Obama administration on national security and economic issues.” The project, known as “America’s Provisional Leadership Council” will look closely at what the council calls “major concerns”, as outlined by Army Gen. Paul E. Vallely and Air Force Brig. Gen. Charles Jones, in an eight-point paper titled “The Americans Project.” Notably, Vallely and Jones “call for the elimination of several federal agencies, such as the Department of Homeland Security, which they say have exceeded their authority.” According to the article, “DHS responsibilities would go to the Department of Defense and the Interior Department, and FEMA would be reformed as the National Emergency Agency, with a significant reduction in manpower, and then merged into the Interior Department to be deployed only during national emergencies.”

SECRETARY JEWELL NAMES COMMISSIONER JUSTMAN TO NORTHWEST RESOURCE ADVISORY COUNCIL. KREX-TV Grand Junction, CO (11/26, 1K) reports that Interior Secretary Sally Jewel recently appointed Mesa County Commissioner John Justman to the Northwest Resource Advisory Council (RAC).

INTERIOR AUDITS GUAM’S HOMELAND SECURITY GRANTS. The Pacific News Center (11/26) reports that an Interior Department audit of \$4.1 million dollars in “State Homeland Security” grants received by GovGuam “could not fully assess whether ... the funding enhanced” GovGuam’s “preparedness and security.” The auditors placed the “blame for that” on the failure of both FEMA and GovGuam to “provide sufficient guidance, written policies or procedures and oversight of the grant process.” Although the audit concluded that Guam had “spent the funds in accordance with applicable Federal laws and regulations” it recommends that GovGuam “revise its State Homeland Security Strategy to include measurable objectives with realistic target dates for completion.”

ADDITIONAL COVERAGE: USGS FINDS LAND SINKING RAPIDLY IN CALIFORNIA’S SAN JOAQUIN VALLEY. Additional coverage of the USGS study finding that land is “sinking more rapidly than usual because of increased pumping from underground sources” in California’s San Joaquin Valley was provided by the Stockton (CA) Record (11/21, 123K) and KPBS-TV San Diego (11/25, Quinton, 14K).

America’s Great Outdoors:

National Park Service:

LAWMAKERS DEBATE REIMBURSING STATES FOR SHUTDOWN COSTS. The E&E Daily (11/25) reports a House Natural Resources subpanel held a hearing on the impact of the shutdowns on national parks. Most of the lawmakers agreed that Congress should give the Interior Department “the authority to pay states back for the money spent operating parks around the country during the 16-day closure.” However, “controversy remains about whether states should be allowed automatic repayments in case of another shutdown.”

EISENHOWER MEMORIAL SEES NO PROGRESS. Roll Call (11/26, Subscription Publication, 87K) reports that

"it's been 14 years since Congress determined that a memorial to President Dwight D. Eisenhower was needed, but the question of how to do right by Ike continues to confound." At the time, the NPS "predicted seven years was a reasonable timeline for completion of the Dwight D. Eisenhower Memorial." However, "more than a decade later, no construction permits have been issued for the four-acre site."

SEN. COBURN CRITICIZES NATIONAL PARK SYSTEM. The High Country (CO) News (11/26, 74K) reports that in a 208-page report released Oct. 29, Sen. Tom Coburn "evaluates parks by how much taxpayers spent per visitor." In a recent interview with Fox News, Coburn concluded, "Of the 401 park units the NPS manages, a third aren't real treasures, and should never have been made parks in the first place." However, NPS Director Jon Jarvis disagrees. He recently told a group of journalists in Los Angeles that the national parks system is supposed to "represent the history and environment of America," and even the lesser-known park units "are still of value in telling the story of this country."

RADIATION BEING CLEANED UP AT GREAT KILLS PARK. The New York Times (11/26, Foderaro, Subscription Publication, 9.61M) reports that the NPS "quickly fenced" off an area in Great Kills Park in 2005 "when a police flyover of New York City detected a positive reading for radioactive material there." However, "in the years since, further investigations by the city's Department of Health and Mental Hygiene, the federal Environmental Protection Agency and the United States Army Corps of Engineers turned up more hot spots and a fuller, more disturbing picture." Kathleen Cuzzolino, an environmental protection specialist for the NPS, said, "As we're getting through this tough job, we're finding that the contamination is not only in these discrete pockets, but is dispersed in the soil and also at the surface. After another flyover this fall and years of excavations has shown that "more than half of the park has shown some degree of radioactivity, "park officials have fenced off 260 acres, including four ball fields, the model airplane field and a popular trail along Hylan Boulevard." Cuzzolino said "she could not predict when the closed-off portions of the park would reopen, but she cautioned that the cleanup could take years."

UTAH LAWMAKER DRAFTING VANDALISM LAW. The E&E Daily (11/25) reports that Utah State Sen. Dixon Pitcher is drafting legislation that would penalize vandals in state parks and other protected areas, "in response to two former Boy Scout leaders who filmed themselves toppling an ancient boulder in Goblin Valley State Park." Pitcher said he drafted the bill after "realizing Utah did not have a law to prosecute people who vandalize natural wonders in the state's parks and preserves." His bill would likely impose a \$15,000 fine and possible jail time for vandalism in parks.

CALIFORNIA DEMOCRATIC PARTY'S ENVIRONMENTAL CAUCUS REJECTS DRAKES BAY OYSTER CO. The Bay Area (CA) Indymedia (11/25, 2K) reports that "in a major win for supporters of Wilderness, the California Democratic Party's Environmental Caucus overwhelmingly passed a resolution supporting protection of the Drakes Estero Marine Wilderness area in Point Reyes National Seashore on Saturday." Amy Trainer, executive director of the Environmental Action Committee, said, "Thankfully the Environmental Caucus agreed that a deal is a deal, and that the Interior Department's decision to let the 40-year lease expire was good government in action. Like the millions of us that cherish our national parks and wilderness areas, they supported returning this ecologically rich estuary to all American to enjoy as long ago planned. This company continues to flout the California Coastal Act, refusing to comply with the second cease and desist order against it, and it is fundamentally incompatible with a national park wilderness area."

LAND AUCTION ALONG OCMULGEE RESULTS IN PROTECTED LAND. The Macon (GA) Telegraph (11/25, 187K) reports that "property between Bond Swamp and the Ocmulgee National Monument will be protected land after it has been sold." According to the article, "a land auction will result in permanent protection for 679 acres, the largest preservation deal in a pristine area of Bibb County's river corridor since the creation of Bond Swamp National Wildlife Refuge in 1989."

Bureau of Land Management:

REPORT: MILLIONS OF FEDERAL ACRES IN SIX WESTERN STATES INACCESSIBLE BY TO PUBLIC. The E&E Daily (11/25) reports that millions of federal acres are inaccessible to the public, "in large part because they are surrounded by private lands" and the BLM and Forest Service have not established public entry points, according to a new report released by Center for Western Priorities. The 15-page report, titled "Landlocked:

Measuring Public Land Access in the West," used geographic information systems mapping software to study the accessibility to public lands in six Western states. The group "found more than 4 million acres of so-called landlocked areas in Colorado, Idaho, Montana, New Mexico, Utah and Wyoming that, in many cases, cannot be legally accessed by the public."

BLM RELEASES MANAGEMENT PLAN FOR SAGE GROUSE IN OREGON. The Oregonian (11/26, 751K) reports that on Friday, BLM released a management plan which "would cap how much human disturbance is allowed on 4.5 million acres of the" greater sage grouse's core habitat in Oregon. The plan "would also require mitigation for activities there, potentially adding costs to projects proposed on the federal land." Erik Molvar, a wildlife biologist with WildEarth Guardians, said "he was encouraged by buffer protections for sage-grouse breeding areas near current and proposed geothermal plants," but "he criticized the plan's approach to grazing, which he said remains too permissive."

BLM CONSIDERS HOLLISTER MINE TO BE SHUT DOWN. The Elko (NV) Daily Free Press (11/26, 22K) reports that Waterton Global Mining Co., which purchase the Hollister Mine and the Esmeralda Mill in April, "laid off 182 employees today — 157 from Hollister and 25 from the mill." Although a Waterton representative said the mine is not shut down, but that the company is "pausing production," the BLM will "consider it a shutdown." Deb McFarlane, BLM assistant field manager for the Tuscarora office "We have specific steps on temporary shutdowns. They have to step into a closure procedure to make sure it doesn't go into degradation."

BLM TO CLOSE SEVERAL ROADS IN GRAND JUNCTION FIELD OFFICE STARTING DECEMBER 1. KREX-TV Grand Junction, CO (11/26, 1K) reports that the BLM will close several roads in the Grand Junction Field Office beginning Dec. 1. according to the article, "the specific road closures to motorized use lasting through April 30, protect critical big-game winter range, and other sensitive areas, as well as preventing road damage during poor driving conditions."

RED ROCK CANYON OFFICIALS MAY CLOSE ACCESS TO SCENIC DRIVE OVER THANKSGIVING WEEKEND. The Las Vegas Sun (11/25, 155K) reports that the scenic drive at Red Rock Canyon National Conservation Area "may be temporarily closed during periods of high visitation Thanksgiving weekend," according to the BLM.

NEW MEXICO RUIN DAMAGED DURING HALLOWEEN BONFIRE. The AP (11/26) reports that "a fire in a room at the 300-year-old Frances Canyon pueblito didn't burn hot enough to compromise the structure, but soot has stained stones and mortar." BLM officials "believe the fire was set Oct. 31 during a Halloween party in the structure."

Also reporting on the story is KRQE-TV Albuquerque, NM (11/26, 29K).

ADDITIONAL COVERAGE OF WILD HORSE ROUND-UP PLANNED ALONG WYOMING-COLORADO BORDER. The HLN (11/25) reports that the BLM announced another wild horse round-up along the Wyoming-Colorado border.

Fish and Wildlife Service:

FWS TO LOOK AT PROTECTING ARCTIC GRAYLING. The AP (11/26) reports that the Arctic grayling will receive attention from the FWS to see if it warrants threatened or endangered status in Montana. The review "stems from a legal settlement with wildlife advocates who sued to force" the UFWS to take action on hundreds of species.

Also covering the story are the Flathead (MT) Beacon (11/26, 15K), the Ravalli (MT) Republic (11/26, 19K), The Missoulian (11/26, 104K), and the Billings (MT) Gazette (11/26, 206K).

FEDERAL OFFICIALS ASSERT THAT GRAY WOLF IS NO LONGER ENDANGERED IN WEST. The Salem (OR) Capital Press (11/25, 113K) reports that federal officials claim "reintroduction programs for the gray wolf have been a success and the animal no longer needs Endangered Species Act protections." According to Mike Jiminez, a wolf biologist for the FWS, "thanks to wolf management programs, public education and research,

more than 5,000 gray wolves now live in the lower 48 states." Jiminez and other federal officials assert that "state and tribal wildlife agencies, conservation groups and universities have helped federal scientists restore the species so that it is a functioning member of the ecosystem."

BLACK-FOOTED FERRETS REINTRODUCED ON COLORADO RANCH. The La Junta (CO) Tribune-Democrat (11/24, 11K) reports that black-footed ferrets were "recently introduced on a ranch in Pueblo County, Colo." However, "the release of the endangered mammal was monumental for many different reasons — controlling an overpopulation of another animal and showing entities working together for the cause." The ferrets were reintroduced on the Walker Ranch in Pueblo County during an event was hosted by the FWS, Colorado Parks and Wildlife and Gary and Georgia Walker.

WOLVERINE THREATENED SPECIES LISTING NEARS END OF PUBLIC COMMENT PERIOD. The Oregonian (11/26, 751K) reports that a proposal by the FWS to list wolverines under the Endangered Species Act is nearing the end of its public comment period. The FWS will accept input until Dec. 2.

CONSERVATIONISTS FEAR RHINO POACHING COULD LEAD TO POPULATION DECLINE. The E&E Daily (11/25) reports that rhinoceroses are dying from poaching at such a rapid rate that conservationists worry the "deaths will soon outnumber the number of rhino births, which could lead to a rapid decline of the population." The rhino has seen "population gains in recent decades, but there's been an uptick in illegal hunting." The article notes that "other threats facing the rhino include deforestation, habitat fragmentation and displacement by humans."

OFFICIALS CALL WILD PIG BIGGEST ECOSYSTEM THREAT. The E&E Daily (11/25) reports that "the biggest invasive species threat in the Virginia woods — and perhaps the entire country — is the wild pig," according to officials. The animals have "experienced a recent population boom because hunters have imported wild pigs to hunt them all year long." Officials estimate that "wild pigs cause \$1.5 billion in damage across the United States annually."

US Geological Survey:

USGS TO MONITOR WATER CONSUMPTION BY POWER PLANTS. The E&E Daily (11/25) reports that the USGS is "reinstating its reporting on water consumption by coal, nuclear and other thermoelectric power plants." The USGS has released a report "outlining how it will calculate consumption numbers for power plants with once-through cooling technology and closed-cycle systems." The calculations will now be "incorporated into the survey's five-year reports on water use and will be part of a national water census aimed at providing accurate, real-time data on freshwater supplies for thousands of watersheds nationwide."

Also reporting on the story is the WaterWorld (11/26, 96).

QUESTIONS EMERGE AFTER USGS FLOOD GAUGES BREAK. KXAN-TV Austin, TX (11/26, 60K) reports that "questions are emerging over whether the Austin region has any better way to predict how severe the next major flood will be." According to the article, on Oct. 31, two USGS water height gauges stopped working.

Securing America's Energy Future:

Renewable Energy:

DUKE ENERGY PLEADS GUILTY TO KILLING GOLDEN EAGLES . The E&E Daily (11/25) reports that Duke Energy has pleaded guilty to killing more than 150 migratory birds and 14 eagles and at two Wyoming wind farms and has agreed to pay the US government a million dollars settlement with the US government. The case against Duke Energy Corp. and its renewable energy arm was the first prosecuted under the Migratory Bird Treaty Act.

Vitter: Obama Administration Playing Favorites In Energy Industry. The "Regwatch" blog of The Hill (11/26, Hattem, 194K) reports that the White House "is playing favorites when it comes to charging energy companies for illegally killing protected birds, according to Sen. David Vitter (R-La.)." According to Vitter, "the Justice Department's (DOJ) \$1 million settlement with Duke Energy, the first of its kind against a wind energy firm, is just

a token measure meant to distract from its pattern of penalizing fossil fuel companies for the same charges." In a statement yesterday Vitter said, "It looks like DOJ is making an example out of this particular case to shift the focus away from the Administration's bias of using the Migratory Bird Treaty Act to go after oil, gas and other businesses. ... The instances of wind energy's favoritism have been so egregious under this Administration, and DOJ's settlement and response still don't explain the Administration's obvious bias."

The [National Review](#) (11/26, 805K) reports that two Republican senators "raised questions about whether the Obama administration is playing politics over the law's enforcement." In May, Sens. David Vitter and Lamar Alexander "sent a letter to the Department of Justice asking for clarification about why it was not charging or prosecuting wind-energy companies for killing federally protected birds."

Examiner: Green Energy Firms Being Abandoned By White House. In a negatively toned piece the Washington Examiner (11/26, Bedard, 319K) reports that "green energy firms are facing abandonment and even fines from" the Obama Administration, which is "now viewed as cozying up to Big Oil." The article notes that "Duke Energy Renewables Inc. faced the first ever criminal enforcement of the Migratory Bird Treaty Act for bird collisions and came after the firm worked with the Justice Department to address the problem."

Additional Coverage. Also providing coverage are the [Washington Times](#) (11/26, Chasmar, 417K), the [Renewable Energy Magazine](#) (11/26), and the [Daily Caller](#) (11/26, Bastasch, 422K).

COURT REJECTS SUIT AGAINST OCOTILLO WIND. [KCET-TV](#) Los Angeles (11/26, 15K) reports that US Superior Court Judge Gonzalo P. Curiel has ruled that the FWS "paid enough attention to the welfare of Endangered Peninsular bighorn sheep when it assessed the environmental effects of the Ocotillo Express Wind project." In a November 20 decision, Curiel dismissed a lawsuit by three plaintiffs, Protect Our Communities Foundation; Backcountry Against Dumps; and Boulevard resident Donna Tisdale, who claimed that FWS's Biological Opinion on the Ocotillo Express project "didn't use the best available science on Peninsular bighorn sheep, and failed to recognize the importance of low-elevation habitat to the subspecies." The plaintiffs had sought to force FWS to "reexamine the threat to bighorn from Pattern Energy's 315-megawatt turbine array in southwestern Imperial County."

Onshore Energy Development:

BLM CLEARING BACKLOG OF PERMITS. The [Columbus \(IN\) Republic](#) (11/26, 80K) reports that "developers have bought the oil and gas rights to about three-fourths of the available federal land in western North Dakota, pushing prices to record levels despite industry complaints that the federal permitting process is still too onerous to immediately develop the land." According to the BLM, "federal oil and gas lease sales in the Dakotas and Montana totaled \$64.4 million in fiscal 2013, up from \$50.1 million the year before." The article notes that "North Dakota, which has led the three-state region in oil and gas leases for most of the past decade, accounted for the vast majority of sales — \$61.4 million — which was up from \$44.3 million in fiscal 2012." Paul Kelley, a BLM assistant field manager in Dickinson, said the bureau has "added 15 new positions boosting the agency's North Dakota workforce by about 30 percent," and "the agency also has utilized 'strike team' members from other states to help process permits."

Also providing coverage are the [Wichita \(KS\) Eagle](#) (11/26, Macpherson, 247K), the [Raleigh \(NC\) News & Observer](#) (11/25, 475K), and [KXNews](#) (11/26, 1K).

INTERIOR, OIL COMPANIES SUED OVER MONTANA PIPELINE CONSTRUCTION. The [Law 360](#) (11/26, 18K) reports that "a host of Montana landowners on Friday" sued the Interior Department "and other federal agencies, along with a number of oil pipeline companies, saying the companies began construction on a new pipeline without getting proper approval and the federal government has essentially looked the other way." The lawsuit, filed in Montana federal court, claims "the companies ran into regulatory trouble just before beginning construction on what was to be called the Thunderbird Pipeline, after having spent a year negotiating an easement agreement."

BLM SEEKS PUBLIC INPUT ON SWEETWATER COUNTY DRILLING PLAN. The [Columbus \(IN\) Republic](#) (11/26, 80K) reports that the BLM is seeking public input on a "proposal from an energy company to drill an

exploratory well south of Rock Springs." The Azalea Oil Company is "proposing to drill an oil and gas well on a single well pad in the North Dutch John Unit."

Also providing coverage is Yahoo! (11/26, 17.91M).

GROUPS PROTEST BLM POLICY ON LEASE NOMINATORS. The Montrose (CO) Press (11/26, 17K) reports that Citizens for A Healthy Community and 44 other organizations are protesting a BLM "instructional memo that in effect makes it optional for those nominating lease parcels to provide their name and contact information." The groups say "this new policy, which goes into effect next year, is contrary to a February court ruling that required the BLM to release the names."

ADDITIONAL COVERAGE OF BLM'S OIL AND GAS LEASE SALE IN NEW MEXICO. Additional coverage of the BLM's latest oil and natural gas lease sale in New Mexico was provided by the Albuquerque (NM) Journal (11/26, 288K), the Farmington (NM) Daily Times (11/26, 46K), and KFDA-TV Amarillo, TX (11/26, 1K).

Tackling America's Water Challenges:

ADDITIONAL COVERAGE OF BAY DELTA CONSERVATION PLAN. In an op-ed for the Stockton (CA) Record (11/16, Vogel, 123K), Ken Vogel, Chairman of the San Joaquin County Board of Supervisors, criticizes the Bay Delta Conservation Plan. He argues that "increased water exports out of the Delta have caused the drastic decline in the health of this estuary." Instead, Vogel suggests a number of alternatives that should be considered in place of the BDCP. For instance: "What if we reactivate historical floodplains to lessen flood peaks, enhance wildlife habitat, and replenish depleted groundwater basins? What if we build new reservoirs to increase flood control and water storage potentials? What if we recycled or desalted as much water as possible?" Vogel concludes that "the BDCP is the wrong solution for the Delta and the entire state."

In an editorial, the Riverside (CA) Press Enterprise (11/25, 465K) urges California legislators to "safeguard the state's primary water system and boost water storage capacity." The paper urges legislators to also "act to protect the state against droughts." It argues that "that effort should start by ensuring the reliability of water exports from Northern California."

Top National News:

OBAMA URGES REPUBLICANS TO ALLY WITH HIM ON IMMIGRATION REFORM. Much of the coverage of President Obama's speech in San Francisco on Monday – in which he made the case for comprehensive immigration reform, and identified Republican opposition in the House as the only remaining obstacle to its passage – emphasizes the President's interaction with a group of hecklers, led by a citizen of South Korea, who called on the President to unilaterally halt the deportation of all foreign nationals currently residing in the US illegally. For instance, the Wall Street Journal (11/26, Lazo, 5.91M) covers the President's appearance in an article titled, "Deportation Protest Steals Spotlight In Obama Speech." NBC Nightly News (11/25, story 5, 0:50, Williams, 7.86M), the only network newscast to mention the President's remarks, focused entirely on the heckling incident. Likewise, MSNBC's The Rachel Maddow Show (11/26, 548K) aired a minute-and-a-half of footage showing the President being repeatedly interrupted on Monday, but did not include a discussion of immigration reform.

The San Francisco Chronicle (11/26, Marinucci, Fagan, Lee, 2.88M) reports that the President "issued an impassioned call...for Congress to pass immigration reform." According to the Chronicle, the President, "as he often does when he's unable to push his proposals into policy...blamed lack of progress on immigration reform on Republican obstructionism," but also said that he is "encouraged by" Speaker Boehner's suggestion last week that "at least some changes in immigration law might make it to a House vote." The Chronicle reports that the President, speaking to "an invited crowd of about 400 people at the Betty Ann Ong Chinese Recreation Center," said, "It is long past time to reform an immigration system that right now doesn't serve America as well as it should. The only thing standing in our way is the unwillingness of certain Republican members of Congress to catch up with the rest of the country."

USA Today (11/26, Jackson, 5.82M) notes that on Monday, the President once again said he is "willing to split

a[n immigration reform] bill into pieces if that will get it passed.” The President said, “It’s Thanksgiving. We can carve that bird into multiple pieces – a drumstick here, breast meat there.” But USA Today also reports that the President “said a final package must include certain elements, including a proposed pathway to citizenship” for those “who are already in the country illegally,” which, according to USA Today, “many Republicans oppose...likening it to amnesty to lawbreakers.”

The New York Times (11/26, Wheaton, Subscription Publication, 9.61M), under the headline, “Obama Calls For Quick Action On Immigration, And So Does A Heckler,” reports that the President’s “acceptance of a piecemeal approach is part of an effort to keep immigration legislation alive after House Republican leaders made it clear they would not accept the broad framework of the bipartisan bill the Senate passed this year.”

The San Jose (CA) Mercury News (11/26, Richman, 731K) also says the President “urged Republicans in Congress to stop standing in the way of immigration reform, an issue he very dearly wants to return to the front burner of domestic policy and the headlines.” According to the Mercury News, the President used the trip to California to deflect attention from the problems associated with the implementation of the Affordable Care Act, and to “try to return immigration to the headlines,” while also “rais[ing] money for Democrats.”

The Huffington Post (11/26, Foley, 11.54M) reported that “while there are already proposals on border security, high-skilled worker visas and interior enforcement,” the House Republican leadership “has not put any bills on the table to give legal status to” non-US residents who are currently in this country illegally.

According to The Hill (11/26, Sink, 194K), on Monday, the President “accused the GOP of preventing a vote on the legislation out of political concerns.” The President maintained that some Republicans “think that ‘If Obama’s for it, I’ve got to be against it.’” The President added, “Just because something is smart, fair, good for the economy...doesn’t mean we’ll actually get it done, because this is Washington, after all.”

However, on Fox News’ The O’Reilly Factor (11/26, 2.53M), after briefly noting the President’s appearance in San Francisco, Bill O’Reilly, who has endorsed the Senate’s comprehensive immigration reform legislation, said, “The problem...is that nobody believes President Obama will secure the border.” According to O’Reilly, “They believe he will give the pathway to citizenship, but nobody believes he’s going to stop more people from coming in to follow the same pathway.”

Jim Kuhnhen, in an analysis for the AP (11/26, Kuhnhen), says the President is “making a thread-the-needle appeal for bipartisanship with Republicans even as he calls for replacing the House GOP majority and holding his Democratic edge in the Senate.” According to Kuhnhen, the President hopes to “gain back his political standing in the aftermath of his administration’s botched [ACA] launch...by defining himself as a pragmatic victim of tea party conservatives while casting his policies on the economy and immigration as popular remedies that could win bipartisan support.”

According to the Washington Post (11/26, Rucker, 4.28M), on Monday, the President “argue[d] that immigration reform would be an economic windfall for the Bay Area and other communities nationwide,” and noted that “35 percent of business owners in San Francisco are immigrants, many of them Asian Americans.” The President said, “You don’t have to be an economist to figure out that workers will be more productive if they’ve got their families here with them — they’re not worried about deportation, they’re not living halfway around the world. This isn’t just the right thing to do. It’s the smart thing to do.”

The San Francisco Examiner (11/25, 412K) notes that Sen. Dianne Feinstein was among those who greeted the President when Air Force One landed at San Francisco International Airport Monday morning.

Obama Tells Illegal Immigrant That He Lacks The Power To Stop Deportations. The San Jose (CA) Mercury News (11/26, Richman, 731K) reports that during his speech on Monday in San Francisco, the President was “dramatically interrupted by hecklers in a reserved seating section who urged him to halt deportations, of which his administration has conducted a record number.” According to the Mercury News, the President “stopped Secret Service agents who tried to remove the protesters,” and said, “I respect the passion of these young people.” The Mercury News reports that “most of the hecklers” are “affiliated with ASPIRE, Asian Students Promoting Immigrant Rights through Education.”

A more than minute-long clip of the incident was shown on CNN's AC 360 (11/26, 687K). CNN's Wolf Blitzer commented that it is "pretty unusual" for the President to be "heckled by the people who are supposedly vetted to stand behind" him. Brian Williams, on NBC Nightly News (11/25, story 5, 0:50, Williams, 7.86M), also noted that it is "unusual for a protester to get so close to the President," and that the White House "confirmed" that the hecklers "were invited guests...at the event." Williams reported that the President reminded the crowd that "he needs Congress to change the law to stop deportations."

According to the Los Angeles Times (11/26, Parsons, 3.07M), after one of the hecklers "yelled, 'You have the power to stop deportations!'" the President replied, "Actually, I don't." McClatchy (11/26, Bureau, 95K) reports that the President added, "The easy way out is to try to yell and pretend like I can do something by violating our laws. And what I'm proposing is the harder path, which is to use our democratic processes to achieve the same goal that you want to achieve — but it won't be as easy as just shouting. It requires us lobbying and getting it done."

KGO-TV San Francisco (11/26, 4K), San Francisco's ABC affiliate, identified the heckler who called on the President to halt deportations as Ju Hong, "an undocumented immigrant...from South Korea," who told KGO that he "did not go to the event intending to disrupt the president, but felt compelled to do so."

Under the headline, "President Obama Interrupted By Hecklers During San Francisco Immigration Speech," the New York Daily News (11/26, Friedman, 3.94M) quotes the President as saying, "For those of you who are committed to getting this done, I am gonna march with you and fight with you every step of the way to make sure that we are welcoming every hardworking, striving immigrant sees America the way we do." The President continued, "I'm ready to work with you, but it is gonna require work. It is not just about saying 'we're gonna violate the law.' That's not our tradition."

In an article for Politico (11/25, Epstein, 467K) titled, "Obama Dismisses Using Executive Orders To 'Nullify Congress,'" Jennifer Epstein reported that upon "hearing 'executive order' shouts," the President said, "I'm going to actually pause on this issue because a lot of people have been saying this lately on every problem, which is just, 'Sign an executive order and we can pretty much do anything and basically nullify Congress.'" According to Epstein, the President's reference to "nullify[ing] Congress" drew "applause" from the crowd. However, the President added, "Wait, wait, wait. Before everybody starts clapping — that's not how it works. We've got this Constitution, we've got this whole thing about separation of powers and branches."

According to the Huffington Post (11/26, Foley, 11.54M), at that point, "other people in the crowd began to yell... 'Stop deportations. Yes, we can.'" The Huffington Post notes that despite his insistence on Monday that he can not contravene Federal immigration laws, in 2012, he, in fact, "did so...for undocumented young people who entered the US as children."

The Washington Times (11/26, Dinan, 417K) reports that as a result of the President's executive order, "more than 450,000" illegal immigrants "have been granted papers exempting them from deportation." The Times adds that illegal immigrants, and some of the political activists whose interests are aligned with theirs, "argue that he could use those same powers to grant a temporary reprieve to most of the 11 million illegal immigrants in the US."

Bloomberg Group Lobbying "Ambitious" Republicans To Change Stance On Illegal Immigrants. Politico (11/26, Dove, 467K) reports that Mayor Bloomberg's Partnership for a New American Economy, which advocates giving US citizenship to citizens of other nations who are currently in this country illegally, is targeting its lobbying efforts on "several dozen House Republicans hoping to run statewide." According to Politico, those "ambitious" Republicans are being promised "support from" Bloomberg, a "soon-to-be-less-occupied billionaire," if they change their position on immigration. Rep. Aaron Schock (R-IL), who Politico says is "widely assumed to be looking forward to a run for governor or Senate," is described as a "perfect example of the kind of member advocates now have in their sights."

Bloomberg News (11/26, Bender, Bykowicz, 1.91M) notes that "earlier this month," the President "enlisted a group of business executives, including McDonald's Corp. CEO Donald Thompson and Blackstone Group LP CEO Stephen Schwarzman, to put pressure on congressional Republicans to pass an immigration law by year's end."

The Daily Caller (11/26, Munro, 422K) reported that on Monday, Sen. Jeff Sessions released a statement reading: "Congressional leaders must forcefully reject the notion, evidently accepted by the president, that a small cadre of CEOs can tailor the nation's entire immigration policy to suit their narrow interests."

DESPITE IMPROVEMENTS, HEALTHCARE.GOV MAY NOT BE FULLY FUNCTIONAL BY END OF MONTH.

As the end of the month approaches, when the Administration has pledged that HealthCare.gov would be fully functional, the Washington Post (11/26, Somashekhar, Goldstein, 4.28M) reports that "consumer advocates say it is becoming easier for people to sign up for coverage," but insurers still fear "that critical flaws continue to hinder participating health plans." The Post says some "progress" has been made toward the Nov. 30 "goal," but "the online system is still marred by defects that would create havoc for insurance companies if a significantly larger volume of applicants starts to sign up in coming weeks."

Moreover, The Hill (11/25, Viebeck, 194K) reports in its "Healthwatch" blog that Administration officials warned on Monday that some visitors to HealthCare.gov would still "experience outages, slow response times or messages to try again later during the month of December." According to The Hill, CMS is trying to "downplay expectations" for the Administration's self-imposed November 30 deadline. CMS spokeswoman Julie Bataille said, "The system will not work perfectly on Dec. 1, but it will work much better than it did in October."

Administration Warns Problems With Site Likely To Persist Next Month. The Hill (11/25, Viebeck, 194K) reports in its "Healthwatch" blog that Administration officials warned on Monday that some visitors to HealthCare.gov would still "experience outages, slow response times or messages to try again later during the month of December." CMS was looking to "downplay expectations" for the Administration's self-imposed deadline to repair the site by November 30. CMS spokeswoman Julie Bataille said, "The system will not work perfectly on Dec. 1, but it will work much better than it did in October."

ID Verification Problem Persists. The New York Times (11/26, Pear, Subscription Publication, 9.61M) reports that "just days" before the deadline to fix the site, officials said on Monday that they are "aware of another problem that has prevented thousands of people who were unable to verify their identity from shopping for health plans." The Times says that "many" users have had their applications "cast into limbo" after they have provided documents to verify their identity, with no one responding to their problems.

Privately-Run Websites Authorized To Sell Coverage Under ACA. USA Today (11/26, Mullaney, 5.82M) reports that the government has approved several privately-run websites including eHealthInsurance.com, GetInsured.com and GoHealth.com, "to sell coverage under the ACA, including granting permission to connect to HealthCare.gov itself – once it works right." The sites, which are run by for-profit companies, "can sell policies that comply with the ACA's individual mandate in the 36 states served by HealthCare.gov." While not all of the technology "is in place to let the sites process the ACA's tax subsidies for moderate-income insurance buyers," most people "who don't need subsidies can buy now."

HealthCare.gov Users Will Go To Queuing System If Traffic Exceeds 800,000. Reuters (11/26, Morgan) reports that the Administration on Monday announced a plan to help visitors to the Federal health insurance exchange website deal with online problems should traffic swell once the site begins working properly for most users this weekend. An Administration official said that while the site will still have delays and outages in the coming weeks, users will be placed in a "queuing system" if traffic exceeds 800,000 visitors. While they wait in the queuing system, users will be able to see educational material, or they can provide an email address where they can be notified when the system is back up.

INVESTIGATION FAILS TO DETERMINE MOTIVE IN SANDY HOOK SHOOTING. The release of the final report from state investigators into the Sandy Hook killings drew significant media attention in the latest news cycle, including spots near or at the top of all three nightly news broadcasts. The main takeaway is that despite its comprehensive nature, the report has failed to determine a motive for the attacks.

NBC Nightly News (11/25, story 3, 2:40, Williams, 7.86M) reported that the investigation determined Adam Lanza "acted alone when he fatally shot his mother, then carried out a massacre at the Sandy Hook Elementary School, killing 20 children and six adults." NBC (Ellis) says that the report "offers a minute-by-minute account of the crime and the best insight yet into the young man who caused the tragedy," but "the answer that's so

important to so many families in Newtown is why. But after nearly a year-long investigation there is still no answer."

In its lead story, the CBS Evening News (11/25, lead story, 3:20, Pelley, 5.58M) reported that "we know more tonight about what happened that day but not the one thing everyone wants to know – why he did it." The report said Lanza "had significant mental health issues but was under no extreme emotional disturbance that would explain his actions," while he also "had a fascination with mass shootings and firearms but he displayed no aggressive or threatening tendencies."

ABC World News (11/25, story 3, 2:10, Stephanopoulos, 7.43M) said the report contained "new clues about the mind of a mad man," but the investigation "does not establish a conclusive motive."

The New York Times (11/26, Berger, Santora, Subscription Publication, 9.61M) reports that after an 11-month investigation, the Connecticut State Police have not been able to determine a motive behind the shootings at Sandy Hook Elementary. The report had been "long anticipated," and was issued by the state's attorney in nearby Danbury. The report found the shooter Adam Lanza had "significant mental health issues," but it "remained unclear if they contributed to his violent actions."

The Washington Post (11/26, Branigin, 4.28M) reports that the report showed that investigators "were unable to determine conclusively a motive for the attack or why he targeted the school." The 48-page report said Lanza "acted alone and was solely criminally responsible for his actions of that day." It adds that the question of motive "may never be answered conclusively, despite the collection of extensive background information on the shooter through a multitude of interviews and other sources. The evidence clearly shows that the shooter planned his actions, including the taking of his own life, but there is no clear indication why he did so, or why he targeted Sandy Hook Elementary School."

The Washington Times (11/26, Sherfinski, 417K) says that on the subject of motive, the report says Lanza had a "familiarity with and access to firearms and ammunition and an obsession with mass murders, in particular the April 1999 shootings at Columbine High School in Colorado. Investigators, however, have not discovered any evidence that the shooter voiced or gave any indication to others that he intended to commit such a crime himself."

The Wall Street Journal (11/26, De Avila, Subscription Publication, 5.91M) says the report provides the most detailed look yet at the crime itself, but also focuses on the fact that evidence of a motive has not emerged.

USA Today (11/26, Stoller, 5.82M) says that the report's release "did little to ease the grief felt by the victims' families." USA Today adds that the release of the "summary report" comes after "a months-long debate among Connecticut officials, news outlets, open-government advocates and others over the public's right to know and the pain such a report could inflict on families who lost relatives in the shootings."

In an editorial, the New York Times (11/26, Subscription Publication, 9.61M) says the report "can only haunt the community and present the nation with difficult questions — far from adequately answered — about how to head off the next gun tragedy."

Editorial Wrap-Up:

NEW YORK TIMES. "China's Coercive Play." A New York Times (11/26, Subscription Publication, 9.61M) editorial said that China's declaration of a new air defense zone over the Diaoyu/Senkaku islands conflicts with its stated desire to resolve territorial disputes peacefully. Instead, the announcement increases the possibility of direct conflict with Japan.

"The State's Findings On Newtown." In an editorial, the New York Times (11/26, Subscription Publication, 9.61M) says the report on the Newtown shootings "can only haunt the community and present the nation with difficult questions — far from adequately answered — about how to head off the next gun tragedy."

"A Glimmer Of Sense On Guantanamo." The New York Times (11/26, Subscription Publication, 9.61M)

editorializes that the Senate, "in a little-noticed but positive move," voted last week to give President Obama "new leeway to move toward closing the prison in Guantánamo Bay, Cuba." The Times contends that Guantánamo "has stained America's commitment to human rights and continues to serve as a potent recruiting tool for America's enemies." The Times notes that the vote "left standing provisions in the fiscal 2014 National Defense Authorization Act that would ease current transfer rules by replacing the onerous certification process and ending the ban on transfers to the United States either for medical treatment or for detention and trial in federal courts instead of the failed military commission system," and concludes that "it is important to applaud the Senate's good sense."

"New Jersey Goes All In, Online." In an editorial, the New York Times (11/26, Subscription Publication, 9.61M) criticizes New Jersey Gov. Chris Christie for signing legislation last year (which goes into effect on Tuesday), legalizing online gambling. The Times says that Christie in the past seemed to care about the problems of gambling addicts, but "after weighing the interests of a vulnerable fraction of the population against those of a powerful industry, Mr. Christie folded."

WASHINGTON POST. "We're No. 1!" In an editorial, the Washington Post (11/26, 4.28M) criticizes Maryland schools for "artificially" inflating their schools "key" reading tests by excusing students with learning disabilities and poor English skills at a far higher rate than any other state. The Post says that while Gov. Martin O'Malley (D) and Lt. Gov. Anthony Brown (D), running to succeed his boss, are "fond of boasting" that the state's schools are ranked #1, but its "an empty political claim" as the state is "quite a distance from No. 1."

"Air Control." The Washington Post (11/26, 4.28M) editorializes that China's announcement of a new "air defense identification zone" over the Diaoyu/Senkaku islands is "womosome and reckless." The potential for miscalculation leading to open hostilities is very high, and the US would be obligated to intervene due to its commitment to Japan's defense. China's unilateral action belies its leaders' promises of the country's "peaceful rise." The article suggests that if China really needs an air identification zone beyond its territorial waters, then it could join Japan and other neighboring countries to create a joint zone.

"Sweet Nothing." In an editorial, the Washington Post (11/26, 4.28M) reports that the Agriculture Department lost \$280 million on its sugar program in FY2013, "with more losses expected next year." The Post says the US "should stand for free trade in sugar and against protectionism," and says that "setting a better example" by reducing subsidies "would help."

WALL STREET JOURNAL. "The FDA And Thee." In an editorial, the Wall Street Journal (11/26, Subscription Publication, 5.91M) criticizes the FDA for attempting to regulate 23andMe, a genetic testing company. The Journal says that the FDA is overstepping its bounds and urges the company to fight back. In addition, the Journal says the company should begin looking for overseas locations to move its operations to in an effort to show the Obama Administration the negative impact of its regulatory policies.

"Pacquiao Wins, Uncle Sam Loses." The Wall Street Journal (11/26, Subscription Publication, 5.91M) editorializes that Manny Pacquiao's recent fight in Macau highlights the effect that high US Federal marginal tax rates have on pushing business away from the domestic economy. Pacquiao specifically requested not to fight in the US because of the tax hit to his purse.

"The Battle For Ukraine." The Wall Street Journal (11/26, Subscription Publication, 5.91M) editorializes that Ukraine's suspension of an EU agreement in order to pursue a customs union with Russia is a bad decision for the Ukrainian people. The country's business community shows no interest in joining the Russian customs union, and a West-oriented Ukraine would lead to a more peaceful Europe free from Russian President Vladimir Putin's sphere of influence. German Chancellor Angela Merkel's offer of EU-Russian talks regarding Ukraine and similarly positioned countries are misguided, and the US has been a non-entity in this matter.

TODAY'S EVENTS IN WASHINGTON.

White House:

PRESIDENT OBAMA— Attends a DNC event, private residence, Los Angeles, CA, closed press; tours DreamWorks Animation, DreamWorks Studios, Glendale, CA, closed press; delivers remarks, DreamWorks Studios, Glendale, CA; departs Los Angeles en route to Washington, DC; arrives at Joint Base Andrews; arrives at the White House, South Lawn, open press.

VICE PRESIDENT BIDEN— Meets with senior advisors.

US Senate: No Scheduled Events.

US House: No Scheduled Events.

Other: GW – GENDER-BASED VIOLENCE AWARENESS — Panel Discussion: Breaking the Cycle Part II: Health Sector Responses to Violence

Against Women and Girls. Speakers: Catherine Russell, ambassador-at-large for global women's issues, U.S. Department of State; Mary Ellsberg, director, the George Washington University Global Womens Institute (GWI); Jon K. Andrus, PAHO; Francisco Becerra, PAHO; Alessandra Guedes, PAHO; Demick Sialondwe, Livingstone General Hospital; Kiersten Stewart, Futures Without Violence. Location: Pan American Health Organization (PAHO), 525 23rd St., NW. 9:30 a.m. – 12:30 p.m.

NASA – COMET TELECONFERENCE — NASA will host a media teleconference Tuesday, Nov. 26 and a Google+ Hangout Thursday, Nov. 28 to discuss Comet ISON's journey through our solar system and what the public worldwide may see in the coming days as the comet traverses the sun on Thanksgiving Day. Participants: Jim Green, director, Planetary Science Division, NASA Headquarters, Washington; Michael Garcia, program scientist, Astrophysics Division, Headquarters; Carey Lisse, senior research scientist, Johns Hopkins Applied Physics Laboratory, Laurel, Md.; Karl Battams, astrophysicist, Naval Research Laboratory, Washington. 1 p.m.

Last Laughs:

LATE NIGHT POLITICAL HUMOR. Jay Leno: "Well, apparently what got the Iranians to sign this deal was the promise from President Obama. He told the Iranians, 'If you like your uranium, you can keep your uranium.'"

Jay Leno: "Well, President Obama's approval rating is now down at the lowest point of his presidency. It's down to 37 percent. In fact, here's how bad it's gotten. You know the Thanksgiving turkey he's pardoning this week? The turkey said, 'No pictures. I don't want pictures.'"

Jay Leno: "And the US Senate has totally changed its rules to end filibusters of presidential nominees. Under the new rules, they'll now be able to get nothing done much faster."

Jimmy Fallon: "The thing a lot of people are talking about is how Obama was finally able to get this deal with Iran. Basically, what happened was Obama got tired of trying to fix healthcare and said, 'Give me an easier problem. Iranian nukes. I'm on it. Yeah, that's great. That's much better than what I've been dealing with the past couple weeks.'"

To: Sally Jewell (b)(6)@ios.doi.gov, Kip Tindell <kip@containerstore.com>

Cc: David Jayo <david_jayo@ios.doi.gov>

Hello! And nice to meet you, David! Let's connect on another email and we'll determine a time to talk more about this incredible program.

In the meantime, the dates for the Conscious Capitalism event are April 9-11, 2014 - in San Diego. If you think that there's even a *glimmer* of a chance that you could attend to talk about 21CSC, let me know and I'll get in touch with the Conference organizers and start that conversation. Thanks so much - could be so wonderful!

Audrey

Subject: Re: thank you

Dear Kip and Audrey -

It was a real pleasure to speak with you today. Congrats again on the IPO - it is wonderful to know that another public company will bring the principles of conscious capitalism to Wall Street!

I have copied David on this so he can connect directly with Audrey. As I mentioned, David joined me from REI to lead our efforts on 21CSC and engaging youth to play, learn, serve and work outside. It would be wonderful to

work with The Container Store, along with other enlightened businesses, to engage many more people in service on our public lands.

With regard to the CC event in San Diego, please let us know the dates and we can see if it works with our travel. I fully agree that this would be a wonderful audience for 21CSC.

Happy Thanksgiving and keep in touch!

Warmly,

Sally

On Nov 26, 2013, at 10:58 AM, Kip Tindell <kip@containerstore.com> wrote:

Sally,

Thanks so much for your time today – can't tell you how much I enjoyed our conversation! Truly there isn't a better person our President could have so thoughtfully selected to lead our Dept. of Interior. Thank you for all that you're doing for our beloved country's present and future. It was thrilling to hear what you're working on and towards and know that Audrey will be eager to connect with David soon. After the call, Audrey and I also discussed maybe you or David coming to the big Conscious Capitalism event in April in San Diego to talk a bit about the 21CSC (is that the official name?) just thinking that audience of companies would be ripe for the message. That particular event is open to a much broader group of companies with many representatives coming from each organization versus, say, the CEO Summit that takes place in Austin each year with about 200 CEOs (although that could be a great audience as well – that takes place each October). The Conscious Capitalism events are a far cry from where they were in their humble beginnings when we were there together outside of Austin. They now include key business leaders from virtually every single business sector.

Lastly, here's a link to our blog I mentioned we started after that get together in Austin many years ago – it's evolved into having a great presence in all of our catalogs and really, in everything we use to talk with our customers...the response has been delightful. And the fact that we have a blog about our culture and what we stand yet nothing yet on "getting organized" I think makes people REALLY understand how important...how core...this is to us and to them...as it obviously translates to their experience with The Container Store. <http://standfor.containerstore.com/>

Again, thank you for reaching out...let's stay in touch.

Kip

PS – and of course thank you for letting me bend your ear on the Gunnison Sage-Grouse ☺.

HOLIDAY PUBLISHING NOTICE. In observance of the Thanksgiving holiday, the Department of the Interior News Briefing will not be published on Thursday, November 28, or Friday, November 29. Publication will resume on Monday, December 2.

DOI in the News:

NPS WALKS BACK COMMENTS ABOUT FRACKING. The "E2 Wire" blog of The Hill (11/27, 194K) reports that the NPS is backtracking from "comments that showcased doubts about whether natural gas development can help battle climate change, acknowledging they 'did not receive appropriate review.'" In a letter to a House Republican, NPS Director Jonathan Jarvis "withdrew the unsigned comments that the service sent months ago to a separate federal agency crafting regulations on hydraulic fracturing." In the letter to Rep. Rob Bishop, Jarvis "said nobody in management reviewed the staff comments and that their handling was 'contrary' to NPS protocol." The Hill notes that "natural gas produces far less carbon emissions than coal when burned to create electricity," and supporters including Secretary of Energy Ernest Moniz "have pointed to gas development as a near-term way to curb heat-trapping emissions."

Also, the Washington Times (11/27, Dinan, 417K) reports that Jarvis "didn't acknowledge that the science his agency relied upon was bad," but Bishop said "withdrawing the document is a tacit admission that the Park Service was 'misleading' Americans." Bishop said, "It concerns me that the National Park Service attempted to pass off unsubstantiated information as 'science.' This thinly veiled attempt to vilify energy production and hydraulic fracturing on our public lands illustrates a shared agenda between the administration and anti-energy special interest groups." Jarvis said "he's taken steps to make sure all future submissions are properly vetted and approved."

SENATE COMMITTEE COULD VOTE ON KIA'AINA'S OIA NOMINATION IN DECEMBER. The Pacific News Center (11/27) reports that "some of the President's nominees pending before the Senate Energy Committee could get a vote December 12th," according to GOP Spokesman Robert Dillon. Dillon said "the latest group includes eight nominees, including Guam born Hawaiian Esther Kia'aina who for OIA Assistant Secretary."

SHIPROCK CHAPTER OPPOSES WAIVER OF LIABILITIES GRANTED FOR NAVAJO MINE. The Farmington (NM) Daily Times (11/27, 46K) reports that Shiprock Chapter is "submitting a resolution to federal officials that opposes the waiver of liabilities that the Navajo Nation Council granted BHP Billiton for Navajo Mine." The resolution, which chapter members approved Sunday, was attached to a letter chapter president Duane "Chili" Yazzie wrote Tuesday to Interior Secretary Sally Jewell and Assistant Secretary of Indian Affairs Kevin Washburn.

AMID BUDGET CUTS, PRISON CREWS STEP IN TO FIGHT WILDFIRES. The New York Times (11/26, Santos, Subscription Publication, 9.61M) reports "that with Federal cuts over the last 30 years," the "burden of fighting wildfires has been shifted to states and local jurisdictions, even as they struggle under the weight of a sluggish economy." Now, prison crews "have emerged as a solution as wildfires burn bigger, hotter and longer each year and take up a growing portion of the United States Forest Service budget." According to program managers, commonly, "inmates leave prison at the end of their sentences and join firefighting crews." The article notes that "one of them, Grant Lovato, 46, who worked two seasons with the Lewis crew while serving time in prison for credit card fraud and identity theft, is now a firefighter" for the FWS in Gulfport, Miss. In a telephone interview, he said, "The idea that I could be in prison and still get out into the woods and get to enjoy the nature was a transformative experience to me."

LAWMAKERS URGE BUDGET COMMITTEE TO LEAVE PILT INTACT. The Montrose (CO) Press (11/27, 17K) reports that "as Congress again turns to budgetary concerns, Western representatives are pleading with the Budget Committee to leave intact the federal program that compensates counties with public lands."

ADDITIONAL COVERAGE: CAPE ROMAIN NATIONAL WILDLIFE REFUGE LOSING SEASHORE TO RISING EROSION. The Grist (11/27, 25K) reports that "about 1,200 acres of land have disappeared" from Bulls Island and three nearby islands which are part of Cape Romain National Wildlife Refuge "since the 1990s — lost to rising seas and the eroding effects of powerful storms." According to the article, the erosion problems at the barrier islands, are "so severe" that Interior Department Secretary Sally Jewell "visited them last week."

ADDITIONAL COVERAGE OF WHITE HOUSE TRIBAL SUMMIT. The Sawyer County (WI) Record (11/27, 12K) reports that Lac Courte Oreilles Tribal Governing Board Chairman Michael "Mic" Isham Jr. "visited with cabinet secretaries and other high-ranking officials during the fifth annual White House Tribal Nations Summit Nov. 12-14 in Washington, D.C." In an interview, Isham said, "One of the biggest benefits of being out there is you get to meet with the top people in the administration. We want to make sure our issues make it to the top, to have those officials understand how their decisions affect us locally here on the ground. I felt that was the most important thing, although I liked listening to the President also." Meanwhile, Interior Secretary Sally Jewell, who also serves as chair of the recently-established White House Council on Native American Affairs, said, "I am proud to work for a president who has demonstrated a lasting and meaningful commitment to upholding a strong government-to-government relationship with tribal nations. This conference is an important part of the ongoing dialogues we need to have as we work together toward tribal self-determination and self-governance and promoting prosperous and resilient tribal nations."

ADDITIONAL COVERAGE OF TRIBAL AGREEMENT WITH CITIZEN POTAWATOMI NATION. Additional coverage of the agreement signed by Interior Secretary Sally Jewell with the Citizen Potawatomi Nation was provided by the Tulsa (OK) World (11/27, 271K) and the Shawnee (OK) News-Star (11/26, 25K).

ADDITIONAL COVERAGE: USGS FINDS LAND SINKING RAPIDLY IN CALIFORNIA'S SAN JOAQUIN VALLEY. Additional coverage of the USGS study finding that land is sinking in California's San Joaquin Valley was provided by the [Fresno \(CA\) Bee](#) (11/26, 327K).

America's Great Outdoors:

National Park Service:

DRAKES BAY OYSTER CONTINUES FIGHT TO STAY OPEN. The [East Bay Express](#) (11/27, 5K) reports that one year after it was ordered to close, the Drakes Bay Oyster Company continues "to harvest oysters and invasive clams in the area while fighting its legal case in court." Currently, the Ninth Circuit Court of Appeals in San Francisco is considering a request by the company to "overturn a decision made by a three-judge panel of the same appeals court earlier this year." Meanwhile, "its lease with the federal government expired last year, so the business is operating rent-free on public land."

GETTYSBURG NATIONAL MILITARY PARK SUPERINTENDENT PRESENTED WITH SERVICE AWARD. The [Harrisburg \(PA\) Patriot-News](#) (11/27, 339K) reports that Gettysburg National Military Park Superintendent Bob Kirby on Nov. 19 was honored with the Superior Service Award from the Interior Department. Kirby was recognized for "his leadership, vision and planning efforts for the 150th anniversary commemorations of the Battle of Gettysburg and Abraham Lincoln's Gettysburg Address." Kirby will "retire on Jan. 3 after 40 years of federal service."

FORT HANCOCK PROPERTIES DRAWING INTEREST FOR LEASES. The [Hub \(NJ\)](#) (11/28, 516) reports that "businesses, nonprofits and even residents have expressed an interest in potentially leasing historic properties" at Fort Hancock. According to NPS spokesman John Warren, "there has been a significant level of both local and national interest in the fort's 36 historic military buildings, which are currently being marketed for reuse and redevelopment." Warren said, "There has been interest from individuals who are seeking family residences, from notfor profits and professionals inquiring about office space and from commercial entities, as well. I'm very impressed with not only the quantity, but the quality of the ideas and questions we have received."

GREAT SMOKY OFFICIALS CRITICIZED FOR EUTHANIZING ELK. The [Bristol \(TN/VA\) Herald Courier](#) (11/27, 81K) reports that "officials at the Great Smoky Mountains National Park received around 100 letters and 200 Facebook posts about their decision to euthanize an elk that was seen harassing a photographer on a YouTube video, with most of the comments criticizing the decision to kill the animal earlier this month." According to the article, "the video of the elk head-butting James York was put online Oct. 20 and has been viewed more than 2 million times." However, park biologist Joe Yarkovich said, "The video is getting all the attention but what most people don't realize is the history we had with this."

WORK CONTINUES ON VANCOUVER BARRACKS BUILDINGS. The [Clark County \(WA\) Columbian](#) (11/26, 116K) reports that structural work on the exterior of the historic Vancouver Barracks buildings has been completed. Now, exterior work on buildings will continue before interiors can be remodeled.

FORT JUELSON NAMED TO NATIONAL REGISTER OF HISTORIC PLACES.. The [Forum of Fargo-Moorhead \(ND\)](#) (11/27, 15K) reports that Fort Juelson was recently added to the National Register of Historic Places.

Bureau of Land Management:

SEN. WYDEN PROPOSES BILL TO BOOST LOGGING ON O&C LANDS. The [Columbus \(IN\) Republic](#) (11/27, 80K) reports that Sen. Ron Wyden has introduced a bill "to boost logging on federal lands in Western Oregon to help struggling timber counties." The Oregon and California Land Grant Act of 2013 attempts to resolve decades of lawsuits over the BLM's O&C timberlands in Western Oregon by designating some areas for conservation and others for timber harvest. It would limit the environmental review process for logging in some designated harvest areas, while guaranteeing protection for stands of trees over 120 years old.

The [Oregonian](#) (11/27, 751K) reports that the legislation "picked up support from several timber industry and

environmental groups alike who praised it as a middle-ground solution that could actually pass Congress." However, the Sierra Club, Oregon Wild and Environment Oregon "all issued statements charging that Wyden's bill would once again allow widespread clear-cutting on federal forests in Oregon – a practice largely halted since spotted owl restrictions dramatically cut federal timber harvests since 1990."

Also providing coverage are the Clark County (WA) Columbian (11/26, 116K), the Yamhill Valley (OR) News-Register (11/27, 33K), the Oregon Public Broadcasting (11/27, 4K), KVAL-TV Eugene, OR (11/27, 31K), KPIC-TV Roseburg, OR (11/27, 653), and KDRV-TV Medford, OR (11/27, 671).

The Oregonian (11/27, 751K) editorializes that the bill "could put Oregon's long-struggling timber counties back on the road to viability." According to the paper, "the plan is a compromise that likely will leave all sides – environmentalists, the timber industry, elected officials in timber counties – a little bit uncomfortable." However, "that's part of why the bill deserves support."

SENATE PANEL ADVANCES GRAZING PERMIT BILL. The Casper (WY) Star-Tribune (11/27, 90K) reports that the Senate Energy and Natural Resources Committee has "advanced a bill introduced by Wyoming Sen. John Barrasso that would keep livestock grazing permits on federal land despite environmental legal challenges." Barrasso said his proposal allows the BLM and the Forest Service to "continue issuing grazing permits while required environmental analysis is pending."

COMMENTS OFFERED ON BLM'S GREATER SAGE-GROUSE PROPOSAL. The Glenwood Springs (CO) Post Independent (11/27, 27K) reports that "several entities in western Garfield County that rely on tax dollars from the oil and gas industry are weighing in" on the BLM's proposal to protect greater sage-grouse habitat in the region, "saying the potential economic impacts are being overlooked." In a Nov. 20 letter to Northwest Colorado BLM Director Jim Cagney, James Coombs, executive director of the Grand River Hospital District in Rifle, said, "This obviously is a major source of our income and any curtailing of oil and gas production in Garfield County will have devastating effects to our district and bring economic destruction to our community and our ability to provide affordable health care." The article notes that "other local entities providing comments on the sage-grouse proposal in advance of the Dec. 2 comment deadline include the city of Rifle, the town of Parachute, Colorado River Fire Rescue, the DeBeque Fire Protection District and Garfield County School District 16 in Parachute."

BLM TO IMPLEMENT SEASONAL CLOSURES IN WOOD RIVER VALLEY. The Twin Falls (ID) Times-News (11/27, 56K) reports that the BLM Shoshone Field Office has implemented seasonal motorized use closures in the Wood River Valley beginning December 1, 2013 and ending April 30, 2014 to protect wintering herds of big game. Shoshone Field Office Outdoor Recreation Planner John Kurtz said, "These closures serve an important role in protecting the big game that finds refuge on these slopes." The BLM also noted that non-motorized activities can have an impact on wildlife.

Also covering the story is KIVI-TV Boise, ID (11/27, 861).

BLM SETS TEMPORARY CLOSURE ON FORESTLAND EAST OF MYRTLE CREEK. The Roseburg (OR) News-Review (11/27, 53K) reports that the BLM "plans to close to the public 2,167 acres of forest east of Myrtle Creek to minimize conflicts between contractors and timber sale protestors while the area is being logged." According to a decision signed last week by BLM Field Manager Steven Lydick, "pending any appeals, the temporary closure will go in effect Dec. 24." Lydick said that "the blockage, which includes 15 miles of road, will not exceed two years and will be lifted as soon as the harvest activities that cause safety concerns are completed."

BLM TO CLOSE LITTLE SAHARA RECREATION AREA VISITORS CENTER FOR WINTER. The Deseret (UT) News (11/27, 274K) reports that the BLM Utah Little Sahara Recreation Area will close the area's visitors center for winter from Dec. 1 through Feb. 8. according to the article, "closing the visitor center over the winter months saves money by reducing operating costs during periods when visitation is low."

ELKO COUNTY PREPARING FOR POSSIBLE SHUTDOWN. The Elko (NV) Daily Free Press (11/27, 22K) reports that the Elko County Commission is preparing for to "keep services running to avoid turning tourists away, especially if the next potential shutdown extends through the busiest outdoor months."

Fish and Wildlife Service:

AGENCIES ASSESSING MISSISSIPPI RIVER FUEL LEAK. NBC Nightly News (11/26, story 7, 0:20, Williams, 7.86M) reported, "Environment officials are conducting a damage assessment after a towboat carrying 100,000 gallons of fuel sank in the Mississippi river after striking something in the water along the way. It's now leaking fuel into the water. A stretch of river in eastern Iowa is closed to barge traffic while they try to figure out how bad this leak is and how to contain it."

ABC News (11/27, 3.68M) reports that "officials were assessing the environmental damage Tuesday after a towboat carrying 100,000 gallons of diesel fuel and oil sank in the Mississippi River in eastern Iowa, closing the river to barge traffic." Members of the U.S. Coast Guard, the EPA, the FWS and "other organizations don't yet know what the towboat struck before it began sinking around 4:30 p.m. Monday."

ST. TAMMANY, LOUISIANA PRE-APPROVED FOR FHWA GRANT FOR TRAIL EXTENSION. The New Orleans Times-Picayune (11/27, Chatelain, 700K) reports St. Tammany Parish, Louisiana "has received provisional approval for a \$92,677 federal grant to help" fund the Tammany Trace exercise trail extension project. The article notes that the "grant is being issued through" the FHWA's Recreational Trails Program. Input on the project will be sought from the Louisiana field office of the US Interior Department's Wildlife and Fisheries Service, the US Army Corps of Engineers, and the state Historic Preservation Office.

FWS EXTENDS COMMENT PERIOD ON PROPOSAL TO LIST NORTHERN LONG-EARED BAT. The Chattanooga (11/26, 17K) reports that the FWS is extending the deadline for public comment on the proposal to list the northern long-eared bat as endangered under the Endangered Species Act. According to the article, "the extension notice is expected to publish in the Federal Register early next week and will extend the public comment period to Jan. 2, 2014."

ADDITIONAL COVERAGE OF REPORT ON COASTAL WETLANDS LOSS. Additional coverage of the report on the increased rate of coastal wetlands loss was provided by WLOX-TV Biloxi, MS (11/27, 22K).

RED KNOT SUFFERS FROM DECLINING HORSESHOE CRAB NUMBERS. In an op-ed for the New York Times (11/27, Cramer, Subscription Publication, 9.61M), Deborah Cramer, a visiting scholar at the M.I.T. Earth System Initiative, writes that "the number of horseshoe crabs has declined over the years," due to increasing demand. She notes that "the demand for these crabs has been a factor in the decline of the red knot, *Calidris canutus rufa*, whose numbers have dwindled to the point that" the FWS "recently proposed designating the bird as threatened, or likely to become in danger of extinction." According to Cramer, "that has meant trouble not only for red knots, whose numbers in the Delaware Bay have plummeted by 70 percent since the early 1980s, but for us."

Securing America's Energy Future:***Onshore Energy Development:***

CRITICS SAY OIL-AND-GAS ROYALTY RATE SHOULD BE UPDATED. The Colorado Independent (11/27, 158) reports that the royalty rate on onshore oil-and-gas production hasn't changed since the 1920s. Analysts claim that the "low rate has cost Colorado taxpayers an estimated \$300 million since Obama took office in 2008." According to the article, "hiking the onshore royalty rate seems like an easy decision to make, especially given that it can be done administratively by Interior Secretary Sally Jewell with zero involvement from gridlocked Congress." The BLM "acknowledged that they could raise onshore royalty rates but wouldn't say when or if that might happen." Bev Winston, a BLM spokesperson said, "The Mineral Leasing Act gives the Secretary of the Interior the authority to set the royalty rate and that is done through a formal rule. There has been discussion of changing the rate for oil (not gas), but I have nothing new on that at this time."

BLM PROPOSES TO OFFER 29,000 ACRES FOR LEASE SALE. The Grand Junction Daily Sentinel (11/27, 73K) reports that the BLM is "proposing offering some 29,000 acres for oil and gas leasing in northwest Colorado in June, but it deferred leasing on tens thousands of acres more nominated for the sale due to greater sage-grouse and other concerns." The BLM is "moving toward a decision on proposed measures to protect the bird in northwest Colorado as part of an effort to keep it from being listed for protection under the Endangered Species

Act." BLM spokesman David Boyd said that "decision will dictate what deferred parcels are or aren't offered for leasing."

Also covering the story is the [Glenwood Springs \(CO\) Post Independent](#) (11/27, 27K).

USGS ANALYSIS DISCUSSES THREATS FROM OIL AND GAS DEVELOPMENT IN THE APPALACHIAN BASIN. The [Switchboard](#) (11/27, 67K) reports that a new analysis from the USGS "discusses critical issues and evolving developments regarding water resources and oil and gas production in the Appalachian Basin." The USGS analysis "concludes that the impacts can be considerable—and there are still many unknowns about the impacts and to what extent they can be reduced."

THREE AFFILIATED TRIBES CONSIDERING EXPANDED ENERGY DEVELOPMENT. The [Forum of Fargo-Moorhead \(ND\)](#) (11/27, 15K) reports that the Three Affiliated Tribes is "considering expanding a planned oil refinery on the Fort Berthold Reservation in western North Dakota before it is even built, and also considering construction of a natural gas plant." At a tribal energy seminar being held in Bismarck this week, Chairman Tex Hall said that "he expects 3,000 wells to be producing 300,000 barrels of oil a day on the reservation within six years." Hall said, "e will need a bigger refinery ... doesn't make sense to ship it down the road. There will be less of a (carbon) footprint to refine it here. We already have a 20,000 barrel facility; it just has to be bigger."

CONGRESSIONAL SUPPORT OF ENERGY BILLS CRITICIZED. For "The Blog" of the [Huffington Post](#) (11/27, Morgan, 11.54M), Ann Morgan, Executive director of the National Wildlife Federation regional office in Boulder, CO, criticizes House Republicans for blasting the NPS for its decisions during the shutdown, and then a month later, pushing bills to prioritize energy development on public lands. According to Morgan, "rather than provide for responsible energy development on public lands, the legislation would make energy the preferred use, hamstringing public input and undermine assurances that the public health and welfare are being safeguarded." She argues that the legislation "would set the ground for turning large patches of the West into an energy colony at a time when US oil production is already at record levels, natural gas prices remain low because of a big supply and roughly two-thirds of the 38 million acres of federal oil and gas leases sit idle."

Offshore Energy Development:

BOEM AUTHORIZES DREDGING OF OFFSHORE SAND. The [Dredging Today](#) (11/26) reports that the BOEM has "announced an agreement with the National Aeronautics and Space Administration (NASA) and the US Army Corps of Engineers (USACE) authorizing the dredging of up to one million cubic yards of sand from the outer continental shelf to restore the shoreline at NASA's Wallops Island Flight Facility in Virginia." BOEM Director Tommy P. Beaudreau said, "BOEM's contribution of sand for this federal facility will help maintain the physical integrity of NASA's valuable launch infrastructure at Wallops Island and improve resiliency against future storms. This project is an example of the federal family working together on the ongoing response to Hurricane Sandy."

Tackling America's Water Challenges:

CALIFORNIA WATER OFFICIAL INVITED TO INTERVIEW FOR BOR COMMISSIONER POSITION. The [Los Angeles Wave](#) (11/27, 261K) reports that Gloria Gray, the vice chair of the Metropolitan Water District of California, received an "unexpected call from the Obama administration last month inviting her to interview" for the position to replace Mike Connors as the commissioner of the BOR. Gray was "one of three to five people called in for interview and she traveled to Washington last week." Gray said, "They asked me about my leadership style and experience in water. I told them if you're looking for someone who has a long history in water then that's not me. However, if you're looking for someone that has the leadership to get things done, knows how to work with coalitions and partnerships and bring forth new ideas, then I'm the person [for the job]."

CALIFORNIA URGED TO FOCUS ON OPERATING CONDITIONS FOR SACRAMENTO-SAN JOAQUIN RIVER DELTA. The [Vacaville \(CA\) Reporter](#) (11/27, 57K) editorializes that "the battle for the better part of the last two years" over the Sacramento-San Joaquin River Delta has "been about how big a new conveyance system – probably tunnels – should be, how much it should cost, and who should foot the bill." According to the paper, "the result has been a political fight of the worst kind, pitting Northern Californians against Southern Californians and agriculture interests against environmentalists." Instead, it argues that "the focus instead should be the operating

conditions for the Delta, particularly the amount of water that needs to flow through it annually to maintain the health of the estuary.”

Empowering Native American Communities:

MORE LAW ENFORCEMENT PERSONNEL HEADED TO SPIRIT LAKE NATION. The Grand Forks (ND) Herald (11/27, 87K) reports that the Office of Justice Services, part of the BIA, is “sending seven new law enforcement agents to the Spirit Lake Reservation.” The article notes that “two new police officers and two BIA tribal investigators are already on Spirit Lake,” and Tribal Chairman Leander “Russ” McDonald said “three more officers should arrive within a week.” According to the article, “the change came after federal officials met with tribal leaders and heard from tribal members last week about child welfare problems on Spirit Lake.” McDonald said the BIA will “conduct a study to see if any more help is needed.”

Also providing coverage is WDAZ-TV Grand Forks, ND (11/27, 1K).

Top National News:

SUPREME COURT TO CONSIDER RELIGIOUS CHALLENGE TO ACA. The Supreme Court’s announcement that it will hear a challenge to the Affordable Care Act was heavily covered in print and broadcast media, including nearly seven minutes of coverage on the network newscasts.

The CBS Evening News (11/26, story 4, 2:20, Pelley, 5.58M) reported that the court “has agreed to hear a case that centers on religious objections to Obamacare,” which “requires employers to pay for contraceptives, but some employers say that, that violates their deeply held beliefs.” CBS (Werner) added that Federal courts “have split on this issue so the Supreme Court will now consider whether corporations have the same religious rights as individuals.” The court is expected to hear arguments in the case in March.

NBC Nightly News (11/26, story 3, 2:20, Williams, 7.86M) reported that the Oklahoma family “that owns the Hobby Lobby with more than 550 arts and crafts stores nationwide employing 13,000 people says the company is founded on religious principles,” but the company “says providing insurance coverage for contraceptive measures like the morning-after pill is the equivalent of paying for abortion, violating its religious freedom.” NBC (Williams) added that the Obama Administration “says that nearly half of all pregnancies in the US are unintended, costing health care five billion dollars a year.”

ABC World News (11/26, story 4, 2:00, Stephanopoulos, 7.43M) reported that the “practical effect of Hobby Lobby and a second business, a kitchen cabinet company run by Mennonite, winning would mean it would be exempt of a fundamental principle of ObamaCare, birth control at no cost.”

The New York Times (11/26, Liptak, Subscription Publication, 9.61M) reports that the Administration “has exempted many religious groups from the law’s requirements for contraception coverage,” but “it said for-profit corporations could not rely on religious objections to opt out of compliance with the law. ‘Our policy is designed to ensure that health care decisions are made between a woman and her doctor,’ Jay Carney, the White House press secretary, said in a statement. ‘The president believes that no one, including the government or for-profit corporations, should be able to dictate those decisions to women.’”

The Wall Street Journal (11/26, Bravin, Subscription Publication, 5.91M) reports the court consolidated two cases brought by Hobby Lobby Stores Inc., and Conestoga Wood Specialties Corp., a manufacturer of kitchen cabinet doors in Pennsylvania. The 3rd Circuit Court of Appeals ruled against Conestoga’s challenge, while the 10th Circuit Court of Appeals ruled in favor of Hobby Lobby, setting up the Supreme Court confrontation.

Politico (11/27, Haberkorn, 467K) reports that the two cases “will be combined and given one hour of oral arguments before the justices.” The court did not announce whether it will hear cases brought by other companies, including Autocam Corp., and Liberty University.

The Washington Times (11/27, Howell, 417K) reports that nearly 40 companies nationwide “filed suit over the mandate, with particular objections to insuring morning-after pills that they equate with abortion.” Business

owners contend that fines "for flouting the mandate would cripple" their businesses.

USA Today (11/27, Wolf, 5.82M) reports that the case "is significant because it will answer a question with far-reaching consequences: Can corporations pray?"

McClatchy (11/26, Doyle, 95K) reports that the case will "pit religious beliefs against governmental power, with potentially far-reaching consequences for both. 'The question presented is one of exceptional importance,' Solicitor General Donald Verilli, Jr., advised the Supreme Court in a legal brief." McClatchy notes that 11 states have filed briefs in the case urging the court to hear the challenge, underscoring "the case's significance, and foreshadowing the kind of kibitzing to come."

The AP (11/27, Sherman) reports that the key issue in the cases is "whether profit-making corporations can assert religious beliefs under the 1993 Religious Freedom Restoration Act or the First Amendment provision guaranteeing Americans the right to believe and worship as they choose."

The Christian Science Monitor (11/26, Richey, 540K) reports that the Administration "views this issue not as a potential infringement of religious rights and religious liberty but as an attempt by certain business owners to impose their personal religious beliefs on their employees." The Administration's primary argument "is that it is up to each individual employee – not the company or its owners – to decide which contraceptive services to use."

The Huffington Post (11/26, Bassett, 11.54M) reports that Hobby Lobby attorneys contend that the law "forces it to pay for four methods of contraception to which the owners morally object: the Plan B morning-after pill, an emergency contraceptive called Ella, and two different kinds of intrauterine devices (IUDs) that may sometimes work by preventing a fertilized egg from implanting into the uterus."

The Daily Caller (11/26, Hurtubise, 422K) reports that while "for-profit corporations have not historically been given the same rights to free exercise of religion as individuals, they were granted another First Amendment right to free speech in the controversial 2010 Citizens United decision."

The Los Angeles Times (11/26, Savage, 3.07M) reports that the challenge "does not turn on the Constitution and its protection for the 'free exercise' of religion," but rather contends that the "contraceptive mandate" violates the Religious Freedom Restoration Act of 1993, which was "intended to overturn the high court's earlier refusal to give 'religious objectors' a constitutional exemption from ordinary laws."

Bloomberg News (11/26, Stohr, 1.91M) reports that the legal dispute "threatens to carve a hole in the 2010 health-care law, already beset by problems on multiple fronts as its major provisions take effect."

The Washington Post (11/26, Barnes, 4.28M) reports that Sen. Patty Murray (D-WA) "said the issue is one of equality. 'Allowing a woman's boss to call the shots about her access to birth control should be inconceivable to all Americans in this day and age,' she said in a statement, adding: 'That is a slippery slope that could lead to bosses dictating everything from an employee's ability to access HIV treatment to their ability to vaccinate their children.'" House Speaker John Boehner (R-OH), on the other hand, "called the requirement 'an attack on religious freedom, and I'm hopeful it will be reversed by the Court.'"

The New York Times (11/27, Belluck, Subscription Publication, 9.61M) reports that European health authorities "have made two significant changes to the label of an emergency contraception pill that is equivalent to Plan B One-Step," one of which "could be relevant" to the cases before the Supreme Court. The Times notes that the new label of Norvevo "says it 'cannot stop a fertilized egg from attaching to the womb,' contradicting a claim by some abortion opponents that has fueled their objections to the Affordable Care Act." The Times notes that Norvevo "is not sold in the United States, but Plan B One-Step and two generic versions are identical to it."

In a column for the Washington Post (11/27, Meyerson, 4.28M), Harold Meyerson argues that "to extend the exemptions that churches receive to secular, for-profit corporations that claim to be following religious doctrine, but may in fact be nipping it here and tucking it there, would open the door to a range of idiosyncratic management practices inflicted on employees." He adds that if corporations "are going to be given the freedoms that people enjoy, they should be subjected to people's obligations and restrictions too."

The New York Times (11/27, Subscription Publication, 9.61M) editorializes that while the court "has upheld the free speech rights of corporations, it has never recognized that a secular corporation is an entity capable of engaging in religion or that the religious beliefs of owners excuse noncompliance with the law," and argues that to do so now "would upset accepted principles of corporate law and set a risky precedent by elevating the religious views of company owners over the interests of society and the well-being of employees."

ADMINISTRATION LOOKS TO LIMIT POLITICAL ACTIVITIES OF NON-PROFIT GROUPS. The release by the Administration of new rules designed to rein in campaign spending by non-profit groups generated heavy print coverage. Most pieces interviewed concerned parties on one or both sides of the political divide. In general, Democratic-leaning groups and individuals approved of the move, while Republican-leaning groups opposed them, casting them as an attempt by the Administration to gain a political edge and silence dissent.

USA Today (11/27, Korte, 5.82M) reports that the Administration is "moving to clamp down on the growing political activity of 'social welfare' tax-exempt groups." The Treasury Department is expected to publish rules on Friday that "would restrict the ability of those groups," organized under 501(c)4 of the tax code, "to conduct a wide range of activities, from running ads to distributing mailers that target specific candidates to get-out-the-vote drives." However, it is unlikely the rules would go into effect before the 2014 elections. The move comes six months after "controversy erupted over the IRS scrutiny of conservative groups."

The Washington Post (11/27, Gold, 4.28M) reports that under the rules, groups such as Crossroads GPS and the League of Conservation Voters "could see their influence on campaigns dramatically curbed." The new rules would "explicitly define which kind of activities are political and fall outside of the social welfare category, forcing such groups to be more careful about how they spend their funds." Political activities, under the rules, would include "running ads that mention candidates close to Election Day, preparing voter guides or holding voter registration drives."

The New York Times (11/27, Confessore, Subscription Publication, 9.61M) says the move "follows years of legal and regulatory shifts, such as the Supreme Court's Citizens United ruling in 2010, that have steadily loosened the rules governing political spending, particularly by big corporations, labor unions and wealthy individuals." Mark Mazur, the assistant Treasury Secretary for Tax Policy, said, "This proposed guidance is a first critical step toward creating clear-cut definitions of political activity by tax-exempt social welfare organizations."

The Huffington Post (11/27, Blumenthal, 11.54M) reports that acting IRS Commissioner Danny Werfel said, "This is part of ongoing efforts within the IRS that are improving our work in the tax-exempt area. Once final, this proposed guidance will continue moving us forward and provide clarity for this important segment of exempt organizations."

The Wall Street Journal (11/27, Mckinnon, Mullins, Catan, Subscription Publication, 5.91M) says that the political activities of 501(c)4 groups are viewed by many as the best example of corruption of the current campaign finance system.

The Hill (11/27, Goad, Becker, 194K) reports in its "Regwatch" blog that the Administration "moved to rein in the 'dark money' groups that have spent millions of dollars in political campaigns without disclosing their donors."

The Washington Times (11/27, Dinan, 417K) reports that several months after the IRS "improperly" targeted "conservative political groups for scrutiny," the agency on Tuesday "proposed new guidelines it said will better define political activity and make it clearer when a nonprofit group has crossed the line."

Bloomberg News (11/27, Rubin, 1.91M) reports that politically active 501(c)4 groups spent "more than \$256 million" during the 2012 elections, according to the Center for Responsive Politics. Meanwhile, the proposal would "unnecessarily restrict First Amendment rights, said Jay Sekulow, chief counsel of the American Center for Law and Justice, which sued the IRS on behalf of Tea Party groups." He said, "Instead of holding those responsible for the unlawful targeting scheme accountable for their actions, the Obama administration is determined to further limit the free speech of Americans by attempting to change constitutional practices that are decades old. With this move, the Obama administration opens a new front in its war against political dissent."

Roll Call (11/27, Carney, Subscription Publication, 87K) reports the guidelines "released by the IRS today fail to

address the key question of whether social welfare groups should be permitted to spend any money at all on political activities, said Democracy 21 President Fred Wertheimer." His group has sued the IRS, along with the Campaign Legal Center. Roll Call reports that First Amendment "advocates had mixed reactions." GOP lawyer Dan Backer, in an email, called the guidance "an astonishing — and from this feckless, hyper-partisan administration, unsurprising — effort to curtail the free speech of Americans who come together to better their community." Meanwhile, the "pro-free speech" Center for Competitive Politics President David Keating agreed with some of the regulations, but "objected" to the section "that defines political activity to include communications made within 60 days of a general election and 30 days of a primary that 'clearly identify a candidate or political party.'"

Politico (11/27, Tau, 467K) calls the rules an "aggressive move designed to crack down on free-spending outside political groups." Josh Orton, the political director of Progressives United, endorsed the move, as did Lisa Gilbert of Public Citizen's Congress Watch program.

The Hill (11/27, Goad, Becker, 194K) reports in its "Regwatch" blog reports Sen. Orrin Hatch (R) "chided the administration for releasing the new guidance before a bipartisan Senate investigation into the targeting of Tea Party groups came to a close." However, Finance Committee Chairman Max Baucus (D) praised the move, saying, "We need to ensure clear standards and equal footing for the treatment of tax exempt social welfare organizations. Today's action by the IRS is an important step towards that goal."

Issa, Others Accuse Administration Of Seeking Political Advantage. The Washington Post (11/27, Gold, 4.28M) reports House Oversight and Government Reform Chair Darrell Issa (R) said that the regulation "released today continues this administration's unfortunate pattern of stifling constitutional free speech."

Reuters (11/27, Temple-West, Sullivan) reports Issa said, "The fact that the administration's new effort only affects social welfare organizations — and not powerful unions or business groups — underscores that this is a crass political effort by the administration to get what political advantage they can, when they can."

The AP (11/27, Taylor) reports House Ways And Means Chair Dave Camp "was skeptical of the administration's move." He said, "There continues to be an ongoing investigation, with many documents yet to be uncovered, into how the IRS systematically targeted and abused conservative-leaning groups. This smacks of the administration trying to shut down potential critics."

Politico Analysis: Rules Will Have Little Impact. In one of the few pieces to look at the impact of the guidance, Politico (11/27, Tau, French, 467K) reports that the rules "could make it harder for some nonprofit groups that play politics to get away with claiming a tax exemption," but "don't be fooled," as it isn't the end of "dark money." The rules "are unlikely to stem the tide of anonymous donations that have flooded into politics since the 2010 Citizens United Supreme Court decision." Donald Tobin, an Ohio State law professor, said, "One of the problems of this rule is it is only talking about (c)4s and you need to get a hold of all these entities. Clearly when you have an entity-based regulation, it encourages people to engage in activities from another entity."

HOUSING PERMITS TOP EXPECTATIONS. Reuters (11/27, Mutikani) reports that housing permits rose to a their highest level in more than five years in October, according to new data released on Tuesday by the Department of Commerce. Permits, a gauge of future housing starts, rose 6.2% in October to an annual rate of 1.03 million units. Economists had expected permits to come in at a 930,000-unit rate. Reuters also reports that the Standard & Poor's/Case-Shiller home price index showed that housing prices in the 20 metro areas rose 13.3% in September from September 2012, the biggest jump since February 2006.

Bloomberg News (11/27, Stilwell, 1.91M) says that the rise in permits is a "sign the U.S. residential real-estate market is gaining momentum heading into 2014." Economists surveyed by Bloomberg expected permits to come in at a 930,000 unit rate. Bloomberg adds that housing market improvements "may continue as a pickup in employment offsets higher borrowing costs, rekindling demand for new homes as existing inventories remain tight."

The Wall Street Journal (11/27, Portlock, Subscription Publication, 5.91M) reports that permits for multi-family units rose more than 15% in October, while single-family permits rose slightly.

Number Of Americans Underwater On Mortgages Plummet. The CBS Evening News (11/26, story 5, 2:00, Pelley, 5.58M) reported on "more positive" economic signs, noting the rise in home prices and building permits. CBS (Tracy) reports that those numbers mean that far fewer Americans are now underwater on their mortgages. Zillow's Stan Humphries said, "Since peak, we pulled about five million home owners out of negative equity and more than three million homeowners have been pulled out of negative equity just in the past year alone."

Consumer Confidence Fell This Month. USA Today (11/27, 5.82M) reports that the Conference Board announced on Tuesday that its consumer confidence index fell to 70.4 in November from 72.4 in October, its lowest level in seven months. The number was "depressed by increased concerns about hiring and pay in the coming months."

Stocks Ticked Higher On Tuesday, But Nasdaq Cleared 4000. Reuters (11/27, Reuters) reports that stocks were little changed on Tuesday as investors remained cautious after reaching recent market highs. The S&P 500 rose less than a point on Tuesday, while the Dow Jones Industrial Average was essentially flat. The Nasdaq Composite Index, the stronger performer on the day, rose 0.6%.

The Wall Street Journal (11/27, Kieman, Subscription Publication, 5.91M) reports that the Nasdaq, boosted by the housing market numbers, rose above 4,000 for the first time in 13 years. However, the index still remains about 20% below its all-time record. The Nasdaq closed at 4017.75, while the Dow closed at 16072.80 and the S&P finished at 1802.75.

Silicon Valley Starting To Grow Concerned About Bubble. The New York Times (11/27, Streitfeld, Subscription Publication, 9.61M) reports that in Silicon Valley, huge sums of money are being invested in and paid for tech companies that are extremely risky prospects, echoing the pre-dot.bomb days of 1999. The Times says that "it may not be 1999 yet, but that fateful year — a moment when no one thought there was any risk to the wildest idea — can be seen on the horizon, drifting closer." However, some investors believe that the situation is closer to 1996, when things were "just ramping up." The piece goes on to examine the recent deals and its impact on the venture capital market.

Editorial Wrap-Up:

NEW YORK TIMES. "Pressure And Passivity On Immigration." In an editorial, the New York Times (11/27, Subscription Publication, 9.61M) questions how hard the President is fighting for immigration reforms. On Monday, the Times says, the President said that he was "up for the hard, messy work of reform." However, "as he keeps making such promises to people whose family members he is deporting in record numbers while protesting that he is powerless to stop himself, it seems only fair to ask: How hard are you fighting, really?"

"Another Challenge To The Healthcare Law." The New York Times (11/27, Subscription Publication, 9.61M) editorializes that while the court "has upheld the free speech rights of corporations, it has never recognized that a secular corporation is an entity capable of engaging in religion or that the religious beliefs of owners excuse noncompliance with the law," and argues that to do so now "would upset accepted principles of corporate law and set a risky precedent by elevating the religious views of company owners over the interests of society and the well-being of employees."

"The War On Thanksgiving." The New York Times (11/27, Subscription Publication, 9.61M) editorializes that retailers' decisions to open on Thanksgiving day are not just counter to the spirit of the holiday but also "hard on workers, who are often given no choice but to work on the holiday." An Ohio state legislator has drafted legislation mandating either triple-time for work on Thanksgiving or giving workers the option of staying home, but it is unlikely to pass the state's Republican legislature.

"Sifting Through The Irish Troubles." The New York Times (11/27, Subscription Publication, 9.61M) editorializes that the legacy of the Troubles "remains deeply relevant for the people of Northern Ireland," making its attorney general's call for a statute of limitations for prosecuting murder committed during that time misguided. Issues such as restricting the British flag's flying at Belfast's city hall are still the subject of protests, and a recent BBC report examined a secret British army unit's claim of having "a standing license to kill civilians" while fighting Irish Republican Army units.

WASHINGTON POST. "American, Afghan Deal." In an editorial, the Washington Post (11/27, 4.28M) says the President and Afghan President Hamid Karzai "are playing a dangerous game of brinkmanship, one that could lead to a strategic reverse for the United States and a catastrophe for Afghanistan." while both sides are "betting that the other is bluffing," the "stakes are much too high for a pointless game of political chicken."

"Democracy In The Balance." The Washington Post (11/27, 4.28M) editorializes that former Honduran President Manuel Zelaya's supporters in Latin America, "Brazil especially," should help the Zelaya camp back down. The article notes that the US State Department has "appealed for calm" in Honduras following the contested election results.

"A Troubled Race In Virginia." In an editorial, the Washington Post (11/27, 4.28M) criticizes "Republican operative" Charles Judd, the Virginia Board of Elections chairman, for on Monday "suggesting, groundlessly," that the results of the state AG race "are somehow tainted" due to "a relative handful of voters in heavily Democratic Fairfax County" having been "given a week more than voters elsewhere to make the case that their provisional ballots should be counted." The Post argues that the move by Fairfax County officials was legitimate, and adds that Judd's "irresponsible remarks" potentially "could be seized upon by" the Obenshain campaign, "or state Republicans, to formally 'contest' the results in the General Assembly," which is controlled by the GOP.

WALL STREET JOURNAL. "The B-52s Reply To Beijing." An editorial in this morning's Wall Street Journal (11/27, Subscription Publication, 5.91M), praises the Administration for authorizing B-52 flights into the new East China Sea Air Defense Identification Zone and standing up for Japan.

"The Desolate Wilderness."

"And The Fair Land."

To: Audrey Robertson <AudreyR@containerstore.com>, Kip Tindell <kip@containerstore.com>

Cc: Sally Jewell (b)(6) @ios.doi.gov

Hello, Kip and Audrey,

Thanks so much for the invitation to the Conscious Capitalism event as well as your interest in the 21st Century Conservation Service Corps (21CSC). I'd love to set up time to talk a bit about the effort and explore ways that The Container Store could join the movement. Just give me a couple of options that work for you and I'll do everything possible to accommodate.

As you know, the Secretary has a strong commitment and inspirational vision for preparing the next generation of outdoor champions, advocates and leaders. She has set metrics for each component of the plan (play, learn, serve and work). Attached is a document that provides a high-level overview of the youth agenda including goals. The "work" category is getting the most attention from private sector as Sally has truly added depth and dimension to the term "public-private partnership".

By working collaboratively, we know that we can make significant strides and have a lasting impact. This is about creating a bold national movement to get more young people outdoors, connected to nature, caring for our public lands, employed and learning skills for future employment.

I will also flag the dates of the Conscious Capitalism event for the scheduling team. It would be an honor to attend and engage with the attendees. Thanks again for the invitation.

In the meantime, have a wonderful Thanksgiving and holiday season! I hope that your sales are through the roof and look forward to working with you.

Sincerely,
David

On Tue, Nov 26, 2013 at 10:51 PM, Audrey Robertson <AudreyR@containerstore.com> wrote:

Hello! And nice to meet you, David! Let's connect on another email and we'll determine a time to talk more about this incredible program.

In the meantime, the dates for the Conscious Capitalism event are April 9-11, 2014 - in San Diego. If you think that there's even a *glimmer* of a chance that you could attend to talk about 21CSC, let me know and I'll get in touch with the Conference organizers and start that conversation. Thanks so much - could be so wonderful!

Audrey

Subject: Re: thank you

Dear Kip and Audrey -

It was a real pleasure to speak with you today. Congrats again on the IPO - it is wonderful to know that another public company will bring the principles of conscious capitalism to Wall Street!

I have copied David on this so he can connect directly with Audrey. As I mentioned, David joined me from REI to lead our efforts on 21CSC and engaging youth to play, learn, serve and work outside. It would be wonderful to work with The Container Store, along with other enlightened businesses, to engage many more people in service on our public lands.

With regard to the CC event in San Diego, please let us know the dates and we can see if it works with our travel. I fully agree that this would be a wonderful audience for 21CSC.

Happy Thanksgiving and keep in touch!

Warmly,

Sally

On Nov 26, 2013, at 10:58 AM, Kip Tindell <kip@containerstore.com> wrote:

Sally,

Thanks so much for your time today – can't tell you how much I enjoyed our conversation! Truly there isn't a better person our President could have so thoughtfully selected to lead our Dept. of

Interior. Thank you for all that you're doing for our beloved country's present and future. It was thrilling to hear what you're working on and towards and know that Audrey will be eager to connect with David soon. After the call, Audrey and I also discussed maybe you or David coming to the big Conscious Capitalism event in April in San Diego to talk a bit about the 21CSC (is that the official name?) just thinking that audience of companies would be ripe for the message. That particular event is open to a much broader group of companies with many representatives coming from each organization versus, say, the CEO Summit that takes place in Austin each year with about 200 CEOs (although that could be a great audience as well – that takes place each October). The Conscious Capitalism events are a far cry from where they were in their humble beginnings when we were there together outside of Austin. They now include key business leaders from virtually every single business sector.

Lastly, here's a link to our blog I mentioned we started after that get together in Austin many years ago – it's evolved into having a great presence in all of our catalogs and really, in everything we use to talk with our customers...the response has been delightful. And the fact that we have a blog about our culture and what we stand yet nothing yet on "getting organized" I think makes people REALLY understand how important...how core...this is to us and to them... as it obviously translates to their experience with The Container Store. <http://standfor.containerstore.com/>

Again, thank you for reaching out...let's stay in touch.

Kip

PS – and of course thank you for letting me bend your ear on the Gunnison Sage-Grouse ☺.

+ Today's Events In Washington.

LAST LAUGHS:

+ Late Night Political Humor.

DOI in the News:

HOUSE DEMOCRATS URGE SECRETARY JEWELL TO HALT NEW OIL EXPLORATION IN ARCTIC. The "E2 Wire" blog of The Hill (12/4, 194K) reports that yesterday House Democrats put pressure on Interior Secretary

Sally Jewell to "halt new oil leasing and exploration in the Arctic." Reps. David Price, Rush Holt and Lois Capps "spearheaded a letter signed by 59 lawmakers that calls for Jewell to stop new exploration and revamp Interior's plans for drilling and permitting." The House Democrats wrote, "Over the past decade, the Department has provided industry ample opportunity to pursue oil and gas in the Arctic Ocean. ... But the industry proposals and government approvals have generated controversy, litigation, and opposition from local communities, Congress, scientists, the conservation community, and many other segments of the American people."

Comments Filed On Arctic Drilling Plan. The FuelFix (12/4, 7K) reports that in comments filed with the BOEM before a Tuesday evening deadline, "environmentalists insisted that it is too risky to allow any oil drilling in the 'pristine' Chukchi Sea — even if especially sensitive areas are taken off the table." On the other hand, "oil industry trade groups blasted the agency's plan to abandon a previous tactic of widely selling acreage in the Chukchi Sea in favor of a 'targeted leasing' approach that limits acreage to areas with fewer environmental risks and other concerns, as nominated by would-be bidders." The trade groups — including the International Association of Drilling Contractors and the International Association of Geophysical Contractors — also "objected to the notion that the industry should identify the potential attractiveness of Chukchi Sea acreage now, three years before the planned sale, without any direction from the agency on what might be available."

POLAR BEAR SCIENTIST RECEIVES \$100,000 IN SETTLEMENT WITH INTERIOR. NPR (12/4, Greenfieldboyce, 465K) reports that a researcher "whose observations of drowned polar bears raised alarms about climate change has received \$100,000 to settle a whistle-blower complaint against" the BOEM. Under the settlement, wildlife researcher Charles Monnett retired from his job at the BOEM on "Nov. 15, and the agency agreed to remove a letter of reprimand that officials had placed in his file." The settlement document "states that it does not constitute any admission of liability, and that the agency entered into it to avoid the costs of litigation."

INTERIOR TO HOLD MEETING OF INVASIVE SPECIES ADVISORY COMMITTEE. Politico (12/4, Hopkinson, 467K) reports that the Interior Department will hold a meeting of the Invasive Species Advisory Committee to "discuss consideration, modification and adoption of an ISAC position paper on utilizing harvest incentives to control invasive species."

WHITE HOUSE ENVIRONMENTAL QUALITY COUNCIL CHIEF TO RESIGN. The Hill (12/4, Barron-Lopez, 194K) reports in its "E2 Wire" blog that Nancy Sutley, "longtime adviser to President Obama on environmental and climate issues" has announced that she will resign as chair of the White House Council on Environmental Quality effective February 2014. President Obama said in a statement that Sutley had been instrumental in establishing "historic new fuel economy standards...our first comprehensive National Ocean Policy, and our Climate Action Plan." No replacement has yet been named.

America's Great Outdoors:

National Park Service:

HOUSE COMMITTEE TO MARK UP BILL REIMBURSING STATES FOR SHUTDOWN COSTS. The E&E Daily (12/3) reports that the House Natural Resources Committee will meet "to vote on a bipartisan bill to reimburse states for roughly \$2 million they paid to reopen national parks during the 16-day government shutdown in October." The committee will also vote on "seven other measures to reauthorize a popular wetlands conservation program and allow hand-propelled boats on streams in Yellowstone and Grand Teton national parks, among other provisions." However, "notably absent from the markup is a pair of more controversial bills to require the Interior Department to allow states to manage federal lands and reimburse them during future shutdowns and to allow states to take over management of federal lands."

NPS DESIGNATES THREE NATIONAL WATER TRAILS. The Newton (IA) Daily News (12/2, 17K) reports that the Red Rock Trail at Lake Red Rock, Knoxville, Iowa, the Island Loop Route Water Trail in Michigan, and the Missouri National Recreation River Water Trail that flows through South Dakota, Nebraska and Iowa, has been designated as a National Water Trail by the NPS. NPS Director Jonathan B. Jarvis said, "These national water trails provide exemplary close-to-home places for people to explore and enjoy. And I am particularly happy to have these trails added to the system. They are cooperatively supported and sustained through the efforts of community, state and federal partners."

REP. PELOSI URGES GOLDEN GATE NATIONAL RECREATION AREA TO ALLOW MORE TIME FOR

COMMENTS. USA Today (12/3, 5.82M) reports that House Minority Leader Nancy Pelosi has written a letter urging the Golden Gate National Recreation Area to "give people more time to weigh in on a dog management plan that would add leash requirements in some areas and allow off-leash romping in other parts of the federally protected land." In her letter, Pelosi wrote, "Our city is named for Saint Francis of Assisi, patron saint of animals and the environment. There is a long history of off-leash dog recreation in San Francisco, which began before the transfer of land from the city and county of San Francisco to the National Park Service. Responsible dog guardians must continue to enjoy recreational activities with their pets in our spectacular setting." Pelosi urged a "workable balance" between the natural, historic, scenic and recreational uses of the Golden Gate National Recreation Area. She "requested that the public comment period on the proposed rules, set to end Jan. 11., be extended through Feb. 17."

NPS FACES DECISION OVER WOLVES AT ISLE ROYALE NATIONAL PARK. The E&E Daily (12/3) reports that the NPS faces the decision about whether to introduce more wolves to Isle Royale National Park or to allow the pack of eight gray wolves to possibly die out. According to the article, "rising winter temperatures have nearly obliterated the infrequent occurrence of an ice bridge that forms between Michigan's Isle Royale National Park and the mainland, the only way wolves naturally arrive there," and "today, the shrinking wolf pack is so inbred that some fear they will no longer reproduce." However, "others say that climate change has not played a role in the wolves' decline, claiming that despite their isolation, the pack could recover and carry on."

SUPERINTENDENT CLEARS UP MISINFORMATION ON NPS DRAFT PLAN. The Salem (MO) News (12/4) reports that Superintendent Bill Black is trying to clear up misconceptions surrounding the NPS Draft Management plan released Nov. 8. Under the preferred plan of the NPS, no designated hiking or horse trails would be closed and citizens would be allowed to continue to use 60/40 horsepower jet motors on the waters. Rep. Jason Smith told Interior Secretary Sally Jewell during a July 17 hearing of the House Natural Resources Committee that he would not support a limiting plan. Smith said, "Any plan that closes horse trails or other trails, or changes the horsepower or even promotes wilderness areas, we cannot support in the 8th Congressional District."

NPS SEEKS PUBLIC INPUT ON NEW MANAGEMENT PLAN FOR APPALACHIAN NATIONAL SCENIC TRAIL. The Pocono (PA) Record (12/4, 46K) reports that the NPS is seeking public input on a new management plan for the Appalachian National Scenic Trail.

GRAND CANYON HOTEL TO STAY OPEN DURING RENOVATIONS. The Washington Post (12/3, Press, 4.28M) reports that El Tovar, "the most recognizable hotel at the Grand Canyon's South Rim," will be "undergoing renovations over the next two years." However, Xanterra Parks & Resorts, the concessionaire that runs El Tovar, won't "completely shut down the building as originally planned." The NPS asked Xanterra to reconsider, and Xanterra regional sales and marketing director Bruce Brossman said "the company instead will do the renovation in two phases through 2015, leaving most of the 78 guest rooms open."

FRESNO YOSEMITE INTERNATIONAL AIRPORT CELEBRATES NATIONAL PARKS. USA Today (12/3, Baskas, 5.82M) reports that this year's themed-tree exhibit at California's Fresno Yosemite International Airport "celebrates the national parks and the upcoming 150th anniversary of the Yosemite Grant Act and the California State Park System, as well as the 50th anniversary of the Wilderness Act." According to the article, "one tree features a working waterfall," and "another depicts a camping scene, complete with tents and a skunk."

ADDITIONAL COVERAGE: APPEALS COURT URGED TO REJECT DRAKES BAY OYSTER CASE. Additional coverage of the Drakes Bay Oyster CO. case was provided by the Marin (CA) Independent Journal (12/4, 88K).

ADDITIONAL COVERAGE OF NEW DIRECTOR FOR INTERMOUNTAIN REGION. Additional coverage that Sue Masica has been named the new regional director for the Intermountain Region was provide by the Flathead (MT) Beacon (12/4, 15K).

ADDITIONAL COVERAGE OF GRAND CANYON'S CLOUD INVERSION. Additional coverage of the Grand Canyon was provided by CNN (12/3, Mendoza, Cnn, 14.53M), the Los Angeles Times (12/3, Pearce, 3.07M), and the National Geographic (12/4, 40.49M).

ADDITIONAL COVERAGE: AI WEIWEI TO CREATE ART INSTALLATIONS FOR ALCATRAZ. Additional coverage of Ai Weiwei's plans to use Alcatraz to create art was provided by the [Los Angeles Times](#) (12/3, Ng, 3.07M).

SEN. MURKOWSKI DISMISSES INCREASING NPS BUDGET, SUGGESTS IDEAS FOR FUNDING PARKS. In an op-ed for [The Hill](#) (12/4, Murkowski, 194K), Sen. Lisa Murkowski writes that "those who believe the federal government should expand its land ownership rarely acknowledge a critical truth: It cannot properly manage the lands it is currently entrusted with." She notes that the NPS has "an \$11.5 billion maintenance backlog — well over four times its annual discretionary budget — which suggests that its principal priority should be its current portfolio." Murkowski dismisses the idea of increasing the budget for the NPS, and suggests alternative ideas like expanding "private donations from outside organizations and other friends of national parks," taking "a close look at current uses of funding, including the Land and Water Conservation Fund (LWCF)," and exploring "the structure of the recreational fee."

Bureau of Land Management:

SEN. UDALL TO SEEK MONUMENT DESIGNATION IN COLORADO. The [E&E Daily](#) (12/3) reports that Sen. Mark Udall (D-CO) has announced that he "plans to file a bill this month that would designate a new national monument in a picturesque central Colorado canyon straddling the Arkansas River." Udall is proceeding with the "Browns Canyon National Monument and Wilderness Act of 2013" after "releasing a draft bill in March that received a broad range of support to establish the 22,000-acre national monument in Chaffee County, Colo." The proposal would also "designate 10,500 acres within the boundaries of the national monument as new wilderness."

BLM EMAILS QUESTION SCIENCE ON SAGE-GROUSE. The [Glenwood Springs \(CO\) Post Independent](#) (12/4, 27K) reports that "a series of internal emails" between BLM officials and wildlife experts in "late 2011 suggest some reservations about a National Technical Team (NTT) report that was used as a basis for coming up with a plan to protect the greater sage-grouse." Specifically, "some comments by BLM officials during the early stages of a federal study to determine the bird's habitat in northwest Colorado and other western states seem to question the science behind the NTT's recommended protective measures," according to Fred Jarman, the lead staffer for Garfield County in its role as a cooperating agency with the BLM on the Northwest Colorado Greater Sage-Grouse draft Environmental Impact Statement. The article notes that "the messages, dating from late September 2011 through December of that year, were obtained on behalf of Garfield County by independent wildlife biology consultant Rob Ramey through an official Freedom of Information request."

CATTLEMEN'S GROUP CLAIMS SAGE GROUSE PLAN IMPACTS RANCHERS DISPROPORTIONATELY. The [Salem \(OR\) Capital Press](#) (12/3, 113K) reports that "some Oregon ranchers would be disproportionately harmed by grazing restrictions under a proposed plan to protect sage grouse," according to leaders of the Oregon Cattlemen's Association. Bob Skinner, chairman of the group's public lands committee and a Jordan Valley, Ore., rancher, said that "reducing livestock production in eastern Oregon has an impact beyond the individual ranchers, as it reverberates through to their suppliers and other local businesses."

BLM TO HOLD PUBLIC MEETINGS ON LIVESTOCK GRAZING. The [St. George \(UT\) News](#) (12/3, 3K) reports that the BLM will be hosting "three open house meetings to discuss proposed changes to the rules governing livestock grazing at the Grand Staircase – Escalante National Monument, as well as other lands managed by the Utah Kanab and Arizona Strip BLM field offices." The objective "of the meetings will be to provide the public with an opportunity to review the proposed changes, to ask questions, and to provide feedback to officials at the BLM and National Park Services."

BLM PARTNERS WITH PLATEAU VALLEY FIRE PROTECTION DISTRICT FOR WILDFIRE MITIGATION. [KREX-TV](#) Grand Junction, CO (12/4, 1K) reports that the BLM and the Plateau Valley Fire Protection District "began work last week" to "mitigate the risk of brush fires popping up and growing more severe." According to the article, "crews are clearing vegetation that can fuel wildfires from about 30 acres of the Mesa Creek drainage near Mesa." The "partnership is being funded through a \$14,000 grant from the BLM Community Assistance Program."

GROUP SEEKS MORE TRANSPARENCY ON SEN. WYDEN'S OREGON TIMBER PLAN. The [Watchdog](#) (12/4,

Sebens, 4K) reports that "a group representing western loggers and lumber manufacturers" is calling on Sen. Ron Wyden to "provide more details on legislation that would open half of Oregon's federal land to timber harvesting while conserving the other half." The American Forest Resource Council claims Wyden's plan "lacks the detail that has been proposed in other plans by Oregon's US House members and Gov. John Kitzhaber." The group "sent a letter to Wyden asking for more details."

Fish and Wildlife Service:

FWS CONSIDERING PROTECTIONS FOR BROWN BEARS IN NATIONAL KENAI WILDLIFE REFUGE. The E&E Daily (12/3) reports that the FWS wants to lower the number of brown bears killed in Alaska's Kenai National Wildlife Refuge, "angering residents and state officials who say that sport hunting should not be tightly regulated." The agency "temporarily banned bear hunting in Kenai in late October after the state relaxed hunting regulations and announced plans to remove more restrictions for the 2014 hunting season." Now, the FWS is "considering imposing a lower brown bear limit next year."

FWS PROPOSES ALLOWING WOLVES TO ROAM THROUGHOUT MORE OF ARIZONA AND NEW MEXICO. The Prescott (AZ) Daily Courier (12/4, 42K) reports that the FWS is "proposing to allow endangered Mexican gray wolves to roam throughout more of Arizona and New Mexico," so "they have enough room to thrive in the wilds." Sherry Barrett, Mexican gray wolf recovery coordinator for the FWS, said, "There's a benefit to restoring a complex assembly of species on the landscape. Wolves are a unique part of the landscape, and it's important we restore the full assembly of wildlife back to the ecosystem."

The Payson (AZ) Roundup (12/3, 21K) reports that the FWS will "hold a hearing on changing the rules for the reintroduction of Mexican gray wolves at a hearing at the Hon-Dah Conference Center in Pinetop this afternoon and evening."

RESEARCHERS DETECT EURASIAN RUFFE DNA IN SOUTHERN LAKE MICHIGAN. The Washington Post (12/3, Press, 4.28M) reports that "genetic material from an invasive fish called the Eurasian ruffe has been found in southern Lake Michigan for the first time, raising the possibility that it could migrate into the Mississippi River watershed and compete with native fish there, a scientist said Tuesday." Scientists "testing Great Lakes waters for signs of Asian carp and other invasive species detected DNA from the ruffe in two samples taken in July from Lake Michigan's Calumet Harbor at Chicago," according to Lindsay Chadderton of The Nature Conservancy, a member of the team. However, "no actual ruffe were seen," and "state and federal officials downplayed the likelihood that the DNA discovery signaled a significant presence of the exotic fish even as they urged anglers to be on the lookout for them."

Also covering the story are ABC News (12/4, 3.68M) and the Detroit Free Press (12/4, Flesher, 794K).

ADDITIONAL COVERAGE CLIMATE CHANGE DAMPENS WOLVERINE ENDANGERED SPECIES LISTING. Additional coverage that "an organization of wildlife officials for Western states is asking the federal government to delay a possible listing for wolverines as a threatened species" was provided by the Spokane (WA) Spokesman-Review (12/3, 214K).

ADDITIONAL COVERAGE: ENVIRONMENTALISTS THREATEN LAWSUIT OVER HAY'S SPRING AMPHIPOD HABITAT. Additional coverage of the impact of the Hay's Spring amphipod on plans for the Purple Line train was provided by FOX News (12/3, 6.72M).

US Geological Survey:

HOUSE SUBCOMMITTEE TO CONSIDER BILLS ON MAPPING, UPDATING DATABASE OF PUBLIC LANDS. The E&E Daily (12/3) reports that the Natural Resources Subcommittee on Energy and Mineral Resources is set to consider two bills Thursday that would "consolidate the map-making duties currently spread across the government and require the Interior Department to conduct a complete inventory of federal lands and infrastructure." H.R. 1604, the "Map It Once, Use It Many Times Act," by Rep. Doug Lamborn (R-CO) would create a National Geospatial Technology Administration (NGTA) within the USGS that would merge existing mapping programs at the Interior Department, Forest Service and National Oceanic and Atmospheric

Administration. Lamborn, who leads the Natural Resources Subcommittee on Energy and Mineral Resources, has said "centralizing government mapping functions would save taxpayer money."

USGS SCIENTIST PROFILED. The "Fed Page" blog of the [Washington Post](#) (11/26, 4.28M) profiles Dave Krabbenhoft, a research hydrologist and geochemist with the USGS. According to the article, "for more than two decades, Krabbenhoft has devoted his working life to studying the sources of mercury pollution throughout the United States and around the world." Krabbenhoft said, "I love doing research that will help policymakers make the best decisions to solve problems. For me, studying the mercury issue and making the findings available to achieve real outcomes is a match made in heaven." USGS Acting Director Suzette Kimball said, "Dave is one of those rare examples of a scientist who is not only a leader in his field, but a born communicator who is able to get across exactly why his research is vital to the public."

Securing America's Energy Future:

Renewable Energy:

HOUSE PASSES BILL BOOSTING DEVELOPMENT ON SMALL BOR WATERWAYS. The [E&E Daily](#) (12/3) reports that the House was scheduled to vote on a bill from Rep. Steve Daines (R-MT) "aimed at boosting nonfederal hydropower development on canals, ditches and conduits owned" by the BOR. The measure, H.R. 1963, is modeled on Rep. Steve Tipton's (R-CO) H.R. 678, which "passed the House in April by a vote of 416-7."

The [Great Falls \(MT\) Tribune](#) (12/3, 90K) reports that the bill was "passed unanimously" on Tuesday.

Also reporting on the story are [Politico](#) (12/4, Guillen, 467K) and [KXLH-TV](#) Helena, MT (12/4, 1K).

ADVOCATES SAY VIRGINIA COULD BECOME LEADER IN OFFSHORE WIND ENERGY. The [Newport News \(VA\) Daily Press](#) (12/4, Dietrich, 206K) reports that environmental and industry advocates say Virginia "could become a leader in offshore wind energy — if it only harnesses the political will and leadership to make it happen." Bob Matthias, chairman of the Virginia Offshore Wind Development Authority, said, "Virginia is ideally situated on the East Coast for wind development. We have a robust electrical grid, we're (on) the shore, with very shallow water extending offshore." The article notes that earlier this year, the BOEM "auctioned two offshore tracts in federal waters for commercial offshore wind development" off Rhode Island and Massachusetts, and off Virginia.

Virginia's Energy Industry Wary Of McAuliffe. The Wall Street Journal (12/4, Mundy, Subscription Publication, 5.91M) reports that the energy industry is concerned that Virginia governor-elect Terry McAuliffe will take Virginia, historically friendly to energy interests, in a policy direction more in line with environmental groups. Almost a third of McAuliffe's campaign financing came from environmental groups, and coal industry sources stated that, in their view, McAuliffe may become the most liberal governor outside of California with respect to environmental issues. McAuliffe's staff disputed this assertion.

PUBLIC INPUT SOUGHT ON SOLAR PROJECT PLANNED NEXT TO MOJAVE NATIONAL PRESERVE. The [Riverside \(CA\) Press Enterprise](#) (12/3, 465K) reports that BLM officials are taking public input on "a draft environmental study on plans for a commercial-scale photovoltaic solar development on public land next to the Soda Lake area of the Mojave National Preserve." The BLM will "likely will hear plenty of environmental concerns before the comment period closes on Feb. 26." The development has drawn opposition from the NPS and environmental groups because "its footprint would be within a mile of the national preserve." According to the article, "among their worries" are "loss of quality wildlife habitat, negative effects on bighorn sheep that range in the surrounding mountains, and potential harm to water sources needed by a nearly extinct fish."

Onshore Energy Development:

OBAMA ADMINISTRATION MEETS WITH ENVIRONMENTAL GROUPS ABOUT FRACKING. The "Regwatch" blog of The Hill (12/4, Hattem, 194K) reports that the Obama Administration is being told by environmental groups "how it should write guidance for some hydraulic fracturing, or fracking, operations." Last week, the groups "met with White House and Environmental Protection Agency (EPA) officials to discuss the new guidance for fracking

efforts that involve diesel." It was the first meeting that the White House has had "on the guidance in months, and could be a sign of new work on the effort." According to records, "officials from the Natural Resources Defense Council, Earthworks, Food and Water Watch, Clean Water Action and the Center for Effective Government attended the Nov. 26 meeting."

JUDGE ALLOWS COVERT WHISTLE-BLOWER TO ACCESS SEALED DOCS. The Courthouse News (12/3, 7K) reports that "an economist who helped force oil companies to turn over \$440 million in unpaid royalties can access the search warrant against him, a federal magistrate ruled." According to the article, "the case stems from advice Robert Berman," who had been working in the Interior Department's Office of Policy Analysis at the time, "gave to the nonprofit watchdog Project on Government Oversight (POGO) in June 1994 on how to use the Freedom of Information Act to reveal that oil companies were underpaying royalties to the federal government when they extracted oil from federal or American Indian lands." Before the Thanksgiving holiday, US Magistrate Judge John Facciola granted Berman's motion to unseal.

GROUPS CHALLENGE DRILLING IN UINTA BASIN. The Courthouse News (12/3, 7K) reports that the Southern Utah Wilderness Alliance and the Wilderness Society have sued the Interior Department of the Interior and the BLM, claiming that the federal government "illegally approved oil and gas drilling near Utah's scenic Uinta Mountains that will aggravate the nation's worst wintertime ozone pollution." The groups "challenge environmental impact statements authorizing Gasco Production Co. to drill six oil wells (in one lawsuit) and a gas well (in the second lawsuit) in the Uinta Basin, bordered to the north by the snowcapped Uintas." The plaintiffs "claim the environmental impact statements did not adequately address impacts on air and water quality, in violation of the National Environmental Policy Acts, and the Federal Land Policy and Management Act."

ADDITIONAL COVERAGE: GROUPS CHALLENGE BLM'S ANONYMOUS NOMINATIONS POLICY. Additional coverage of a challenge mounted by a coalition of 45 local and national organizations to the BLM's "new policy designed to sidestep a court order requiring transparency in the oil and gas leasing process" was provided by the Pagosa (CO) Daily Post (12/4).

Offshore Energy Development:

BOEM LEASING NEARLY HALF MILLION ACRES OF EASTERN GULF LAND FOR OIL, NATURAL GAS DRILLING. According to the New Orleans Times-Picayune (12/4, Larino, 700K), the Bureau of Ocean Energy Management stated yesterday its plan to "put more than 465,000 acres in the eastern Gulf of Mexico up for lease at the Mercedes-Benz Superdome in New Orleans on March 19." Taking note of the fact that this is "the first lease sale in that area in five years," the article continues that BOEM's director Tommy Beaudreau declared in a statement, "This proposed sale is another important step to promote responsible domestic energy production through the safe, environmentally sound exploration and development of the Nation's offshore energy resources." BOEM's calculations also predict a possible "710 million barrels of oil and 162 billion cubic feet of natural gas" contained in the area up for lease, and most of the land for lease is also "subject to a revenue-sharing agreement under the Gulf Of Mexico Energy Securities Act of 2006."

Also covering the story are the FuelFix (12/3, 7K), the Offshore Magazine (12/4, 143K), the Rigzone (12/4, 12K), the Oil and Gas Journal (12/4, 1K), the Upstream Online (12/4, 20K), and the Bayou Buzz (LA) (12/4, 4K).

REPORT SUGGESTS OFFSHORE DRILLING SAFETY IS SLOWLY IMPROVING. The SNL Financial (12/4, 22K) reports that the Interior Department has "made progress implementing offshore drilling safety reforms recommended in the wake of the Deepwater Horizon disaster," according to a recently released report from the department's Office of Inspector General. The October semiannual report to Congress, "made public Nov. 29, notes that the department still needs to complete 15 'corrective actions' recommended in the watchdog's nearly three-year-old review of the April 2010 accident on the BP plc-contracted drilling rig." According to the article, "while that figure may seem large to critics of the federal response to the disastrous well blowout, which led to the deaths of 11 workers and the world's largest accidental offshore oil spill, it is an improvement from the 25 reforms that remained unheeded in April, when the previous semiannual report was issued." The article notes that "it also means that the DOI has now addressed more than three-quarters of the 64 recommendations made in the Office of Inspector General's 2010 review."

FORMER BP ENGINEER'S TRIAL BEGINS. The AP (12/3, Kunzelman) reports that the trial of former BP drilling engineer, Kurt Mix, began on Tuesday. Mix is one of four BP employees charged in relation to the company's 2010 oil spill and the first to go to trial. The trial will focus on Mix's deletion of text messages and voicemails relating to the amount of oil was spilling per day. The other trials concern BP well site leaders Robert Kaluza and Donald Vidrine, who have pleaded not guilty to manslaughter charges stemming from the initial rig explosion. And former BP executive David Rainey "charged with concealing information from Congress about the amount of oil spewing from the well."

Jury Set For BP Engineer's Trial. The AP (12/3) reports that the jury has been picked for Kurt Mix's trial. Mix is the BP engineer accused of "deleting text messages and voicemails about the company's response to its massive 2010 oil spill in the Gulf of Mexico." Mix has pleaded not guilty to charges of obstruction of justice.

APPEALS COURT ORDERS BROADER REVIEW OF BP SPILL FUNDS. The E&E Daily (12/3) reports that a divided 5th US Circuit Court of Appeals in New Orleans has ruled in favor of BP PLC, "granting the company a reprieve on some of its Gulf of Mexico spill payments." According to the article, "in 2012, BP said it would make payments to those who suffered economic losses as a result of the 2010 Gulf oil spill," but the firm "now says the payout formula developed by settlement administrator Patrick Juneau was too generous."

TEXAS RULING WILL ALLOW FOREIGN SHAREHOLDERS TO SUE BP. BBC News (12/3, 1.62M) reports that a Texas district court ruling has opened a pathway for overseas shareholders to sue BP for damages caused by its 2010 Gulf of Mexico oil spill. Jeremy Lieberman, a partner at Pomerantz, said of the ruling, "an avenue has been created for shareholders in the UK and Europe to litigate against the company."

API, OTHERS FILE COURT BRIEF SUPPORTING BP IN FEDERAL CONTRACTS CASE. The New Orleans Times-Picayune (12/4, Sayre, 700K) reports that groups including the American Petroleum Institute, National Association of Manufacturers, and the US Chamber of Commerce have filed a joint brief in support of BP's legal challenge against the EPA's temporary suspension of "BP and 20 of its subsidiary companies from any new contracts with the federal government." The groups' joint brief stated in part, "Far from protecting the public interest, excluding a company's affiliates from all federal programs punishes entities that share no blame."

The Washington Post (12/4, Mufson, 4.28M) says that in addition to a brief filed by "several trade groups, including the US Chamber of Commerce, the American Petroleum Institute and the National Association of Manufacturers," the British government also filed a brief supporting BP in the case.

ADDITIONAL COVERAGE OF BSEE REPORT PLACING BLAME ON BLACK ELK, OTHERS FOR FATAL EXPLOSION. Additional coverage of the BSEE's Nov. 4 report on Black Elk Energy's platform explosion was provided by the Baton Rouge (LA) Advocate (12/4, 24K).

Tackling America's Water Challenges:

KLAMATH TASK FORCE SIGNS SHARE AGREEMENT. The E&E Daily (12/3) reports that "a group of Oregon ranchers yesterday signed a tentative agreement with the Klamath Tribes to share water in the state's Upper Klamath Basin." Under the agreement, "ranchers along three rivers in the area would significantly cut water use so farmers along the Klamath Restoration Project downstream could have secure water supplies." The ranchers also would "help with fish habitat restoration and tribal economic development projects in the area."

Also reporting on the story are Oregon Public Broadcasting (12/4), the Salem (OR) Capital Press (12/2, 113K), and KOBI-TV Medford, OR (12/4).

PROJECT WILL REPLACE LARGEST UNSCREENED INTAKE ON SACRAMENTO RIVER. KXJZ-FM Sacramento, CA (12/3, 1K) reports that "the cities of Woodland and Davis in collaboration with the agricultural community have joined forces to replace a century-old intake on the Sacramento River." The Woodland-Davis Clean Water Agency "secured more than \$33 million in state and federal funding to replace the intake." Pablo Arroyave with the BOR, said, "The environment is going to benefit, salmon are going to benefit and tens of thousands of people in the communities of Woodland and Davis are going to benefit from the clean reliable surface water that is being provided."

Empowering Native American Communities:

AQUINNAH TRIBAL LEADER VOWS TO FIGHT ANTI-CASINO LAWSUIT. The Cape Cod (MA) Times (12/3, 92K) reports that Tobias Vanderhoop, the new leader of the Wampanoag Tribe of Gay Head (Aquinnah), is "vowing to fight the Patrick Administration's lawsuit that questions the tribe's federal right to operate a casino." Vanderhoop, the tribe's chairman-elect, said "he believes Gov. Deval Patrick's administration is wrong about the tribe's federal rights to casino gambling." According to the article, "the tribe's position is that federal law, approved one year after Congress approved the tribe's land deal, supersedes the settlement act," and "a recent opinion by the National Indian Gaming Commission, after consultation" with the BIA, "supports that contention by the tribe, which set the stage for this legal showdown."

CONFEDERATED SALISH AND KOOTENAI TRIBES APPEALS PROPOSED CONSTITUTIONAL AMENDMENT. The Ronan Valley (MT) Journal (12/4, 22K) reports that the Confederated Salish and Kootenai Tribes have filed an appeal with the Interior Board of Appeals of the Interior Department. The appeal is in "response to a Sept. 20 decision by BIA Northwest Regional Director Stanley Speaks to hold a secretarial election."

Top National News:

OBAMA TOUTS ACA'S BENEFITS AND HEALTHCARE.GOV'S IMPROVEMENTS. President Obama's White House appearance on Tuesday marking the start of a renewed campaign touting the benefits of the Affordable Care Act generated a great deal of generally positive coverage as many outlets, including NBC Nightly News (12/3, story 5, 2:30, Williams, 7.86M) and the CBS Evening News (12/3, story 4, 2:25, Pelley, 5.58M), either showed the President making his case or quoted his comments at length. Nevertheless, as has been the case since the weekend, many reports continue to give more attention to HealthCare.gov's persistent problems than to the site's improvements.

Brian Williams, on NBC Nightly News (12/3, story 5, 2:30, Williams, 7.86M), reported that after "the disastrous rollout of" HealthCare.gov, President Obama is acting as "salesmen-in-chief for a new campaign to praise the law, and remind people of its benefits and why it exists in the first place." However, Williams added that, "in the meantime, millions of Americans buying insurance still have their work cut out for them." Chuck Todd went on to report that while the site is "working well enough that 'Consumer Reports' magazine, which warned readers away from the site in October, is now on board," insurers "are concerned that they are getting inaccurate or incomplete information from the government about the new enrollees." Robert Zirkelbach of America's Health Insurance Plans: "This is happening at a rate that is simply unacceptable." Todd added that in "some bad news for the White House, a new report from the Treasury Department's Inspector General's office...warns that the IRS does not have enough safeguards to prevent folks from scamming the government out of tax subsidies that they really are not eligible for."

On the CBS Evening News (12/3, story 4, 2:25, Pelley, 5.58M), Scott Pelley reported that on Tuesday, "the first day of his new campaign" to promote the Affordable Care Act, President Obama said HealthCare.gov "is now working for the vast majority of users" although "Republicans still want to rollback ObamaCare." President Obama was shown saying, "I will work with anybody to implement and improve this law effectively. You got good ideas? Bring them to me. Let's go. But we're not repealing it as long as I'm President." Pelley added that "many of the people visiting the site are having a much more positive experience than earlier users did," but a subsequent report from Manuel Bojorquez featured two people trying to buy coverage via HealthCare.gov, only one of whom was successful.

The Wall Street Journal (12/4, Favole, 5.91M) quotes the President as saying, "Our poor execution in the first couple months on the website clouded the fact that there are a whole bunch of people who stand to benefit. ... Now that the website is working for the vast majority of people, we need to make sure folks refocus on what's at stake here, which is the capacity for you or your families to be able to have the security of decent health insurance at a reasonable cause, with choice and competition."

USA Today (12/4, Madhani, 5.82M) reports that the Administration has "claimed victory in achieving its goal of

getting the glitch-riddled HealthCare.gov website working for the vast majority of Americans” despite the fact that “consumers are still experiencing some delays on the site” and “some of the enrollment data insurers received” from the site “contain errors — meaning some consumers might not be able to access the benefits Jan. 1 when they’re scheduled to go into effect.”

McClatchy (12/4, Lightman, Kumar, 95K) reports that on Tuesday, in front of “hundreds of handpicked supporters gathered at the White House complex,” the President “did not go as far as declaring the website fixed,” but did claim that his Administration has “met its goal of making the website usable for the vast majority of visitors by the end of November.” McClatchy adds that the President, “who has seen his approval rating plunge to the lowest levels of his presidency, will spend the next month on a renewed effort to tout the law’s benefits,” which will “stress” that the ACA “will slow growth in health care costs, provide preventative care and assist those with pre-existing conditions.”

The Washington Post (12/4, Goldfarb, Eilperin, 4.28M) reports that the President and other Democrats “expressed confidence that they were finally turning the corner,” while Republicans “immediately lampooned the effort...and conservative activists vowed to wage a counterassault publicizing the law’s downsides.” The Post adds that while the Administration “pointed to traffic...this week as evidence that the site” has improved, “it was clear that bugs remained in the system.” The Post notes that on Tuesday, the National Association of Health Underwriters “asked the Obama to fix the Web site’s ‘back end’ technical obstacles” that are “preventing brokers from enrolling hundreds of thousands of people in coverage.”

Bloomberg News (12/4, Wayne, 1.91M) reports that on Tuesday, CMS spokeswoman Julie Bataille said, “We believe that we have fixed the largest percentage of issues that were causing concerns” but “we do know that things are not perfect with the site.” The Hill (12/4, Sink, 194K) says that on Tuesday, the President, “shied away from directly addressing more recent critiques of the ObamaCare website, including reports that the portal was continuing to provide insurers with error-riddled enrollment information.”

The Washington Times (12/4, Wolfgang, 417K) says the President “stopped short of declaring ‘mission accomplished,’ but...made clear Tuesday that he’s done apologizing for the [ACA’s] failures...and instead will lead a full-blown public-relations effort to sell it to the American people.”

Byron York, in a piece for the Washington Examiner (12/4, York, 319K), reported that on Tuesday, “nineteen people stood behind” the President, but, according to York, with one exception, neither the President nor the White House would identify who they were or how they have been helped by the ACA. York says there is no evidence that any of the nineteen have successfully “purchased affordable coverage through healthcare.gov.”

The Hill (12/4, Sink, 194K) reports that on Wednesday, the President “will address a gathering of 18-35 year old activists...at the White House Youth Summit,” and that the White House “hopes the president can rally attendees to promote insurance enrollment.”

The AP (12/4, Kennedy), in an article titled, “Updated Healthcare.gov Gets Mixed Reviews,” reports that “counselors helping people use” HealthCare.gov “are giving mixed reviews to the updated site, with some zipping through the application process while others are facing the same old sputters and even crashes.” The AP reports that while CMS has said “response times had dropped to 1 second,” Compuware Corp. “said nine states still had response times of more than 8 seconds Tuesday morning.”

The Hill (12/4, Easley, 194K) also reports that on Tuesday, an HHS spokesperson announced that “1 million people visited the HealthCare.gov website on Monday.” According to The Hill, the Administration “had said that it hoped the site could accommodate 800,000 in one day by Nov. 30, so hitting the 1 million mark with no major issues is encouraging news.”

The Los Angeles Times (12/4, Parsons, 3.07M) notes that after the President “accused GOP critics of trying to kill his reform law without offering any solutions to the long-standing problems of the American healthcare system,” Senate Minority Leader Mitch McConnell responded by saying, “Obamacare is broken beyond repair,” and that what is needed is “full repeal followed by step-by-step, patient-centered reforms that drive down costs.” However, according to the Washington Post (12/4, Blake, 4.28M), on Tuesday, Speaker Boehner “declined to commit to allowing a vote on a GOP-drafted health-care plan next year.”

McClatchy (12/4, Lightman, 95K) reports that before the President spoke on Tuesday, House Majority Leader Eric Cantor said, "At this point, one has to ask, what else are they hiding? You know, while the White House wants to claim that healthcare.gov is now working, we know that 'Obamacare' is still plagued with problems." The Wall Street Journal (12/4, Nelson, O'Connor, Hughes, Subscription Publication, 5.91M) notes that three House committees will hold ACA-related hearings on Wednesday.

Kathleen Parker, in her column for the Washington Post (12/4, Parker, 4.28M), says that while the President "at times resembles Baghdad Bob, the Iraqi spokesman who said everything's fine here as US bombs exploded in the background, Republicans are the shock-and-awe gang with no plan for the day after."

NYTimes: Sebelius Among Officials Who Could Be Fired Over Botched ACA Rollout. Michael Shear, in an article for the New York Times (12/4, Shear, Subscription Publication, 9.61M) titled, "Considering Which Head Or Heads May Roll For A Troubled Website Rollout," reports that "White House officials...are under mounting pressure from Democrats and close allies to hold senior-level people accountable for the botched rollout of President Obama's signature domestic achievement and to determine who should be fired." According to the Times, the "possible targets include" HHS Secretary Sebelius and CMS Administrator Marilyn Tavenner, as well as "Mike Hash, the head of the health and human services health reform office; Michelle Snyder, the chief operating officer at Medicaid and Medicare; Henry Chao, the chief digital architect for the website; Jeanne Lambrew, the head of health care policy inside the White House; David Simas, a key adviser involved in the rollout; and Todd Park, the president's top adviser on technology issues." Former White House press secretary Robert Gibbs is quoted as saying, "It's important, in order to restore the American people's confidence in both health care reform and government again, that the president fire the people responsible for this failure."

Politico (12/4, Millman, 467K) reports that on Tuesday, "a brief appearance at a health policy forum sponsored by Georgetown University McCourt School of Public Policy and Arent Fox LLP," White House chief of staff Denis McDonough "joined the president and other senior administration officials in taking responsibility for problems with HealthCare.gov." McDonough is quoted as saying, "The website didn't work the way it should have Oct. 1. That's on us. That's on me."

Treasury IG: IRS May Be Unable To Adequately Police Fraud Involving ACA Subsidies. The AP (12/4, Ohlemacher) says a report from J. Russell George, the Treasury inspector general for tax administration, warns that "subsidies to help Americans buy insurance under the health care overhaul may be vulnerable to fraud...in the latest indication that troubles are far from over for President Barack Obama's signature legislation." George wrote: "The IRS' existing fraud detection system may not be capable of identifying (Affordable Care Act) refund fraud or schemes prior to the issuance of tax return refunds. ... The IRS reported that the long-term limitations of its existing fraud detection system include its inability to keep pace with increasing levels of fraud."

WH's Simas, HHS's Hash Brief House Democrats On ACA Progress. Politico (12/4, Millman, Epstein, 467K) reported that on Tuesday, White House deputy senior adviser David Simas and HHS Office of Health Reform director Mike Hash "briefed House Democrats on the website's progress," which Politico describes as "humming along with a low rate of errors – and drawing many potential enrollees as it racked up 1 million visits on Monday." Politico says House Democrats "acknowledged the remaining challenges, both with the technology and with getting the message out about health benefits."

Politico (12/4, Kim, 467K) reports that on Tuesday, House Democrats' "fading sense of alarm was on display...when [the] two top Obama administration officials briefed" lawmakers "who have not been shy about their anger toward the White House." Politico says the "tensions that have badly frayed the relationship between Capitol Hill and the White House recently seemed to decrease." Nevertheless, an anonymous "senior House Democratic aide" says "there's still a 'great deal of anxiety' in the caucus about enrollment issues, whether the website actually functions smoothly, and potential other problems with Obamacare."

The Huffington Post (12/3, Cherkis, Grim, 11.54M), in an article titled, "Here's Why Obamacare Is Going To Work," says HealthCare.gov is "now quasi-functional," and makes the case that "there are good reasons to believe that the [ACA] will catch on." According to the Huffington Post, "there are tens of millions of uninsured people who want health insurance, a law in place to help them obtain it, and advocates on the ground making sure they know how to do it."

Court Hears Challenge To Subsidies Obtained Via HealthCare.gov. The Wall Street Journal (12/4, Kendall, Subscription Publication, 5.91M) reports that on Tuesday, US District Judge Paul Friedman heard arguments contesting the legality of paying ACA subsidies to those who purchase health insurance via HealthCare.gov, as opposed to the 14 state exchanges. According to the Journal, the challenge is based on the fact that the ACA says the subsidies can be granted to those who buy insurance via an exchange "established by the state," but does not mention that the same applies to coverage purchased from a Federal exchange.

21 Of 30 States With GOP Governors Are Implementing Obama's Fix For Policy Cancellations. The Wall Street Journal (12/4, Scism, Radnofsky, Subscription Publication, 5.91M) reports that 21 of the 30 states with Republican governors have agreed to allow insurers to continue offering coverage deemed substandard according to ACA rules for one more year, as President Obama requested they do last month. On the other hand, according to the Journal, 10 states with Democratic governors declined to implement the President's fix.

Bill Clinton Says He Was Being "Supportive" Of Obama When He Suggested ACA Fix. The Washington Post (12/4, Blake, 4.28M) reported that in an interview with CNN Espanol, former President Clinton insisted he was "merely trying to help President Obama when he suggested Obama should live up to his word and allow people to keep their current health insurance plans." Clinton is quoted as saying, "I was trying to be supportive of him. I don't think you can find anybody in America who's worked harder for his reelection or supported this bill or went out of his way to explain the bill to the American people more than I did."

The Washington Times (12/4, Boyer, 417K) reports that Clinton also predicted that "the political damage for Democrats from the flawed law will be 'minimal.'" The Times reports that Clinton told Fusion's Jorge Ramos, "I believe that if the computer problems are all fixed, and it's up and running by — and healthy in the next several weeks, I think that the damage will be minimal."

HOUSE CALENDAR SHIFT SPARKS SPECULATION THAT A BUDGET DEAL IS NEAR. Roll Call (12/4, Dumain, Subscription Publication, 87K) reports in its "218" blog that a decision by House Republican leaders to change the 2013 congressional calendar and call members back into session next Monday "is sparking all kinds of speculation about what it might mean for fiscal 2014 budget prospects." The speculation surrounds whether the budget conference committee is "nearing a deal to replace the sequester and provide higher spending levels for appropriations bills" ahead of the Dec. 13 deadline. Roll Call notes that a GOP leadership aide said that the chamber "was likely set to be in session on Dec. 9, so that the Rules Committee could pave the way for a House vote on a deal secured by House Budget Chairman Paul D. Ryan, R-Wis., and Senate Budget Chairwoman Patty Murray, D-Wash." Said the aide, "No CR is currently being written...given the fact that the budget conference appears to be close to a deal."

Bloomberg News (12/4, Przybyla, 1.91M) reports that Rep. Tom Cole said that negotiators "are 'down to the last few items,'" adding, "It's not the grand bargain but it's a workable deal. ... In this environment, that's something to be proud of." According to Cole, the agreement "would probably cap spending at about \$1 trillion, instead of \$967 billion, through mandatory spending cuts known as sequestration and endorsed by House Republicans. Democrats set a \$1.058 trillion cap in their plan."

Roll Call (12/4, Dumain, Subscription Publication, 87K) reports that House Appropriations Committee Chairman Harold Rogers "said Tuesday that he is 'somewhat optimistic'" that the budget conference committee "will deliver on a broad spending agreement by their Dec. 13 deadline." While House Republican leaders are reportedly considering "a short-term continuing resolution to fund the government through Jan. 15, when the current CR expires," Rogers "doesn't think that will be necessary." Said Rogers, "I don't think there's a need for a CR now. ... I believe we can do an omnibus bill that is done by [Jan.] 15." Rogers "said he was not preparing a contingency CR in the event leadership gave him the signal."

House Democrats Lining Up In Opposition To A CR. Meanwhile, The Hill (12/4, Lillis, Wasson, 194K) reports in its "On The Money" blog that House Democrats "are lining up against a stopgap spending bill that further entrenches the blunt sequester cuts." As early as next week, Republican leaders could bring a vote "on a short-term continuing resolution (CR) likely to adopt the \$967 billion sequester-level spending cap urged by many Republicans." However, there has been "near universal" pushback from Democrats this week, "with liberals and centrists alike vowing to join party leaders in opposition to any such measure." The Hill notes that the opposition

increases "the chances of a government shutdown taking place in mid-January" if budget negotiators fail to reach a deal "on a broader framework to fund the government and scale back the sequester."

Politico (12/4, Gibson, 467K) reports that House Minority Whip Steny Hoyer said Tuesday that he would "oppose a continuing resolution to keep government funded beyond Jan. 15 if it doesn't address the sequestration cuts." Said Hoyer, "I believe that hurts our national security, it hurts our economy and it undermines our responsibility of running government at a level that is productive for our people." Hoyer noted that if Republicans offer a CR, "it would be a sign that the negotiating process has broken down entirely."

STOCKS FALL AMID CONCERNS OVER CONSUMER SPENDING. The AP (12/4, Sweet) reports that following eight weeks of gains, the market "pullback long anticipated by investors may have arrived." The markets fell on Tuesday, "dragged lower by the Detroit automakers and consumer-focused companies such as GameStop and Amazon.com." The Dow Jones Industrial Average fell 94.15 points to 15,914.62, while the S&P 500 dropped 5.75 points to 1,796.15. The Nasdaq Composite Index, meanwhile, fell 8.06 points to 4,037.20.

The Wall Street Journal (12/4, Kiernan, Subscription Publication, 5.91M) blames the drop on investors looking to cash in the big gains notched in the markets over the course of the year. However, the Journal says there is also a lurking concern about the potential end of the Fed's stimulus efforts.

Sales Soared On Cyber Monday. The AP (12/4, Anderson) reports very positively on Cyber Monday sales, saying that despite concerns about efforts to lure shoppers to stores earlier in the holiday season, "shoppers delivered." They "bought online at the heaviest rate ever Monday, according to research firm comScore Inc., which tracks online sales" The group says online purchasing was up 18% over 2012 to \$1.74 billion.

Auto Sales Strong In November. The New York Times (12/4, Trop, Subscription Publication, 9.61M) reports that while Thanksgiving weekend sales "may have been a disappointment for the nation's retailers," they were a "boon" for carmakers, boosting sales to their highest level since May 2007. Sales rose 8.9% in November to 1.25 million vehicles. For all of 2013, the industry "is expected to sell 15.6 million new vehicles."

The Wall Street Journal (12/4, Rogers, Kell, Subscription Publication, 5.91M) reports that Chrysler sales were up 16% over November 2012, while GM's rose 14% and Ford's were up 7%. However, industry analysts caution that the sharp rise in sales may be coming to an end, as dealer inventories have been rising significantly.

Tesla Says Germany Sees No Defects In Fire Investigations. USA Today (12/3, Woodyard, 5.82M) reports that while a US investigation continues, Tesla Motors said on Monday that "it has been given a clean bill of health from German auto-safety authorities regarding three reports of fires in the battery packs of its electric cars after impacts."

ABC News Pushes Made In America Christmas. ABC World News (12/3, story 5, 3:40, Sawyer, 7.43M) ran a lengthy piece on its effort to produce a "made in America Christmas," focusing on interviews with shoppers and goods available. In one of the few pieces of factual report, ABC (Muir) said, "The average American will spend more than \$700 dollars on holiday gifts this year, \$738 dollars to be exact. Back in the '60s, nine out of ten holiday gifts were made in America. Now, easily, more than half of what we buy is foreign made."

Editorial Wrap-Up:

NEW YORK TIMES. "Keeping Shareholders In the Dark." The New York Times (12/4, Subscription Publication, 9.61M) editorializes that SEC chairwoman Mary Jo White erred by removing a plan to consider a rule to require public companies to disclose political spending from its regulatory agenda. Opponents of the rule insist that the SEC should not be involved in campaign finance or free speech issues, but the Times argues that "good corporate governance requires that companies are transparent about their use of corporate resources" and that shareholders have "demanded disclosure."

"Lessons Unlearned On Rail Safety." The New York Times (12/4, Subscription Publication, 9.61M) editorializes that that the "ultimate blame" for the Metro North train derailment "seems to be a deficit of money and political will, and years of wasted time." The NTSB has been "pleading" for positive train control systems since 1969, but

Congress only passed a law requiring the systems for railroads that carry passengers and dangerous chemicals by 2015. The railroad lobby has been pressing Congress for an extension to at least 2020, and the a report by the Government Accountability Office expects many railroads to "blow the deadline" due to a lack of Federal financing and limited revenue for "big capital investments."

"Sustaining Resilience At Sea." The New York Times (12/4, Subscription Publication, 9.61M) editorializes that marine reserves may be of even greater importance in the fight against climate change than scientists previously thought. According to a recent study published in Nature climate Change, marine reserves enhance the "resilience of marine communities," helping to ward off climate change effects such as invasion by species from warmer waters and will provide a valuable example of how healthy ecosystems function, which will be of increasing importance as climate change disorders them.

WASHINGTON POST. "Gray Owes Voters More." The Washington Post (12/4, 4.28M) editorializes that DC Mayor Vincent C. Gray still has many questions to answer about the "illegal shadow campaign" involved in his 2010 election. The Post says that "voters need answers" before they can decide whether or not to reelect Gray, arguing that his assertion that he has "done the best job I could to address the 2010 campaign" is an "astonishing claim," given that he has refused to answer questions, declined to meet with Federal prosecutors, and allowed his Administration to withhold key documents from the prosecution.

"Invisible, Lethal And Legal." In an editorial, the Washington Post (12/4, 4.28M) argues that the threat of 3D printed guns makes it necessary to expand the law as proposed by the Democrats. However, while that "would seem to be a no-brainer," the NRA and its "mostly Republican allies in Congress are balking, insisting that the existing law need not be modified and minimizing the threat."

"Tensions In Thailand." The Washington Post (12/4, 4.28M) sees Thailand as falling into the category of "repeating the same crises and learning nothing from them," as other nations have done over time. In analyzing recent clashes, the Post says that the "opposition would be wise to use that as a face-saving way to end the crisis" even though the Shinawatra regime is not without fault. Ultimately, the only way to halt the "endless turmoil is for both sides to commit themselves to democracy and the rule of law," says the Post.

WALL STREET JOURNAL. "The Human Wealth Of Nations." The Wall Street Journal (12/4, Subscription Publication, 5.91M) editorializes on the PISA scores, asking if US schools really are at the middling level indicated by the scores. It also notes that the US spent more than twice the per capita level of the Slovak Republic on education while reaching the same result. The Journal argues that the scores indicate the US education system is failing to produce students ready to compete in the world. The paper says that the US needs to do a better job at educating its students or it faces economic decline.

"Holiday In Hell." An editorial in the Wall Street Journal (12/4, Subscription Publication, 5.91M) says that while North Korea's motives for holding Americans like Newman and American-Korean tour company operator Kenneth Bae are unclear, the lesson for Americans should be to avoid the country. The Journal says that this lesson should be heeded by celebrities like Dennis Rodman, Google executive chairman Eric Schmidt and the New York Philharmonic in particular because while they believe cultural engagement will foster change in the regime, in reality their visits serve to mask the regime's brutality.

"Detroit's Bankruptcy Breakthrough." In an editorial, the Wall Street Journal (12/4, Subscription Publication, 5.91M) hails a court ruling allowing Detroit to move forward with bankruptcy proceedings, particularly Federal Judge Steven Rhodes' argument that the state constitution does not bar the proceedings from impacting pensions.

Washington Schedule:

TODAY'S EVENTS IN WASHINGTON.

White House:

PRESIDENT OBAMA-- Receives the Presidential Daily Briefing, Oval Office, closed press; delivers remarks on the economy, THEARC; delivers remarks at the White House Summit, South Court Auditorium; meets with

Location: The Mayflower Renaissance Hotel , 1127 Connecticut Avenue NW. 4 p.m.

Last Laughs:

LATE NIGHT POLITICAL HUMOR.

David Letterman: "Over the weekend, I got on the computer and I tried to sign up for Obamacare. You hear a lot of people having trouble. Had no trouble whatsoever. Signed right up for Obamacare and ordered six months,

Mexican Viagra.”

Jimmy Kimmel: “And President Obama spoke today in defense of the Affordable Health Care Act. He said it’s a disaster and he’s sorry he tried. Interesting fact, did you know, the speeches he’s made about Affordable Health Care is greater than the number of people who have signed up for it?”

Jimmy Kimmel: (In reference to the ACA website) “The President said despite the initial problems, it’s working better now and going to continue to improve. A million people visited on Monday. Mostly to see if they were covered from injuries suffered at Wal-Mart on black Friday.”

**Draft Talking Points for Secretary Jewell
Western Governors Association
Las Vegas, NV
December 12, 2013**

Requested length: 15 minutes

Major Issues:

- **Managing Western Landscapes Together**
- **First Secretarial Order on Mitigation**
- **Greater Sage Grouse**

Acknowledgements:

[TO BE INSERTED]

MANAGING WESTERN LANDSCAPES TOGETHER:

- Since we last gathered in June, I've been coast to coast, visiting public lands entrusted to Interior.
- We manage **one out of every five acres** in the United States, the vast majority in the West. I know the **decisions we make have a broad impact** on the people of your states. It is vital that we **make these decisions in a cooperative manner as part of a partnership** with states and local communities.
- The federal government and states share an important responsibility as stewards of western landscapes and the resources they contain – resources that are critical to our **energy security**, our **economic vitality**, and **maintaining our rich heritage and treasured quality of life**.
- In particular, we must deal with the **inherent tension that often exists between development and conservation**. This is not an either-or-equation. Rather, we must encourage development in the **right ways and in the right places so that it is consistent with conservation**.

- Today we have an unprecedented opportunity – using science and technology – to create a **truly landscape level decision-making process** that will promote our conservation goals and achieve our development objectives.
- We are already **seeing this landscape-level approach work** as we develop both our conventional and renewable energy resources while protecting critical ecosystems and wildlife. Examples include:
 - **Western Solar Energy Plan** – guide renewable energy development in the six southwestern states
 - **Desert Renewable Energy Conservation Plan** - blend science and satellite data to identify areas of high-energy potential and high-priority conservation lands in the Mojave Desert
 - **National Petroleum Reserve** - comprehensive look at the NPR-A to protect more than 13 million acres – like key caribou habitat around Teshekpuk Lake – while making available for development more than 72 percent of the estimated economically recoverable oil
 - **Master Leasing Plans** – for oil and gas development across the western states to make sure it’s done in places with minimal conflicts
- We especially need this type of **smart, balanced approach** to development as we explore new frontiers in the Arctic, implement onshore leasing reforms, and experience an energy boom in the Bakken Region
- Under my leadership at Interior, **we will always take the long view.**

FIRST SECRETARIAL ORDER – MITIGATION:

- In October at the National Press Club, I laid out a vision to strengthen our economy and ensure that we pass along our nation’s rich conservation legacy to the next generation.
- During the speech I issued my **first Secretarial Order** to develop a department-wide strategy to strengthen our mitigation practices.

- The Order aims to offset the impacts of major development projects using tools such as **landscape-level planning** and **mitigation banking**.
- Such **landscape-level planning** may include development of **regional mitigation plans** that address a wide range of issues, from conserving ecosystems to promoting recreation to boosting the economy.
- The Order will work to:
 - **promote permit efficiencies** and **financial predictability** for developers
 - enhance ability of Federal and state agencies to invest in larger-scale conservation efforts
 - **provide increased certainty** for both development and conservation
- My team will provide me a **preliminary report** and recommendations for mitigation **by the end of January**, so you will be hearing from them for your advice and input soon, if you haven't already.
- In many ways, this is about **doing what many of the governors in this room have known and done for decades**: recognize the unique and important values associated with western landscapes and use the best science and judgment to conserve them wisely.
- You – more than anyone – know that these issues do not stop at political boundaries. We must all work together – **across party lines, across state lines, at all levels of government**, including local and tribal communities
- You've done that already with: **Western Renewable Energy Zones initiative**, the establishment of the **Western Governors' Wildlife Council in 2008**, the **Western Governors' Wildlife Corridors initiative**, the **WGA 10-year energy vision**.
- And you're doing it again with the **new Crucial Habitat Assessment Tool (CHAT)** that you are releasing today. You all get it.
 - The CHAT is a perfect example of **strong bipartisan cooperation** across the western states to develop a **cross-boundary informational system** for developers in the **pre-planning stage**.

- It also shows the Governors' commitment to **reduce time, conflicts, and surprises for industry**, while also **conserving our treasured natural resources**.
- The value of taking such an approach can be seen in the strategy we are employing to conserve the **Lesser Prairie Chicken**:
 - Developed through collaboration by six of the western states and endorsed by the U.S. Fish and Wildlife Service
Strategy offers a **new paradigm for state-led efforts** to manage landscapes for wildlife conservation across state lines.
- In a time of **constrained resources**, we can and must operate together in a **smarter, faster, cheaper and more efficient manner**.

That way, we spend less time on the analysis of individual projects and more time trying to identify the right places to develop in advance of committing critical resources – including private capital – to important projects.

GREATER SAGE GROUSE:

- I want to wrap up my brief remarks today by focusing on what we all acknowledge is probably the **greatest wildlife management challenge** facing those in the room today – conserving the **Greater Sage Grouse**.
- I remain **firmly committed to working with the states to develop an action plan**. I am pleased to say that we are well into an unprecedented effort among the affected state and federal agencies to do just that.
- The **interagency task force** that was launched by Secretary Salazar and is chaired by Governors Hickenlooper and Mead and BLM Principle Deputy Director Neil Kornze, has continued to work over the past year to develop and implement a process that we believe can achieve our goals of:
 - conserving the Greater Sage Grouse; and
 - maintaining the flexibility needed to continue to meet the broader socio-economic goals of the region
- They have met nearly **a dozen** times, and I am proud of their work.

- Later today, I look forward to meeting with the governors to discuss the incredible progress we've made thus far, the challenges that lie ahead, and how we can map out a process to complete a **scientifically-based, collaboratively-developed, legally-defensible strategy** for conserving the species. It will be a process that involves all parties, as everyone needs to be part of the solution.
- We have essentially **nine months** to complete that work and to deliver our plans to the Fish and Wildlife Service next September for their analysis and review in making their listing decision by the end of 2015.
- By the time the Western Governors convene again in June, six months from now, BLM must be close to a final management regime for its 98 resource management plans. The states too must complete and begin to implement their own plans for state and private lands on a similar timeline.
- There is no doubt that **we have a lot of work to do** over the next nine months, **but we have laid a strong foundation.**
- This process began as a partnership between the federal land management agencies, the FWS, and the states, and I am optimistic that is how we will end this process – as strong partners.
- In fact, the underlying science that guides the development of the sage grouse action plan was also a product of collaboration between state and federal sage grouse experts and the work of the Western Association of Fish and Wildlife Agencies.
- So, as it began, we are committed to continuing this partnership, working across the 11 state region of the remaining GSG habitat to ensure a viable sage grouse population across the West.
- Thank you, governors, for your collective commitment to this effort.

###

EVENT MEMORANDUM FOR THE SECRETARY

WESTERN GOVERNORS ASSOCIATION WINTER MEETING – VERSION 2

DATE: December 12, 2013
LOCATION: Mandarin Oriental Hotel, Oriental Ballroom, Las Vegas, NV
TIME: 10:10AM – 11:45AM PST
FROM: Sarah Greenberger, Sr. Advisor (202)208-6726; Terri Johnson, Acting Director, OIEA (202)208-7513

Note: Edits are highlighted below in yellow.

I. PURPOSE

You will attend the WGA Winter Meeting on December 12 in Las Vegas, NV. You will be one of two Keynote Speakers kicking off the Combating Western Wildfires Plenary Session and YOU will also participate in the Governors' Luncheon sage grouse discussion (a separate Luncheon Briefing Memo is prepared for you). You will also participate in the Closing Press Conference / Public Launch of Crucial Habitat Assessment Tool. Approximately 220 people are attending this year's winter conference.

II. PARTICIPANTS

- Governors Attending the Conference:
 - John Hickenlooper (CO) – WGA Chair
 - Butch Otter (ID)
 - Steve Bullock (MT)
 - Brian Sandoval (NV)
 - Matt Mead (WY)
 - Gary Herbert (UT)
 - Jan Brewer (AZ)
 - Eruviel Avila, Governor of the State of Mexico
- DOI
 - Anne Castle, Assistant Secretary, Office of Water and Science
 - Lori Carmanian, Deputy Assistant Secretary, Office of Water and Science
 - Neil Kornze, Principal Deputy Director, Bureau of Land Management
 - Dan Ashe, US Fish and Wildlife Service Director
 - Michael Bean, Senior Advisor, Fish and Wildlife and Parks
 - Mike Connor, Commissioner, Bureau of Reclamation
 - Sarah Greenberg, Senior Advisor, Office of the Secretary
 - Jim Douglas, Director, Office of Wildlife Fire, DOI
- USG Attendees:
 - Robert Bonnie, Under Secretary of Agriculture, USDA
 - Jennifer Yezak, Director, Intergovernmental Affairs, USDA
- Other Attendees Representing DOI Interests

- Energy (solar, wind, natural gas, copper, petroleum, coal, and transmission interests typically attend.)
- Conservation - (Theodore Roosevelt conservation Partnership, National Wildlife Federation, National Association of Conservation Districts, The Nature Conservancy, The Wilderness Society, Environmental Defense Fund, and the Western States Water Council)

III. AGENDA

10:00AM Governor Eruviel Avila Villegas (Mexico) will deliver keynote remarks
 10:10AM You will deliver keynote remarks
 10:25AM Depart
 11:45AM WGA Closing Press Conference/Public Launch of Crucial Habitat Assessment Tool

IV. TALKING POINTS

Talking Points are attached as a separate document.

V. BACKGROUND

Western Governors' Association

The Western Governors' Association was established in 1984 and is an independent, nonprofit organization representing the Governors of 19 states and three US-Flag Pacific islands. Through their Association, the Governors identify and address key policy and governance issues that include natural resources, the environment, human services, economic development, intergovernmental relations and international relations. The current chairman of is Colorado Governor John Hickenlooper, who was elected in June 2013.

Current initiatives of the Association are energy generation; regional transmission expansion; weather and climate risk; water: supply, transfers, and drought; forest health; outdoor recreation and tourism; and wildlife corridors and crucial habitat.

Crucial Habitat Assessment Tool

The Western Governors' Crucial Habitat Assessment Tool (CHAT) is a cooperative effort of 16 Western states to provide the public and industry a high-level overview of "crucial habitat" across the West. This tool and several individual state CHATs have been developed pursuant to an MOU among WGA, DOI, and others. "Crucial habitats" are places that contain and connect the natural resources important to aquatic and terrestrial wildlife, including species of concern, as well as hunting and fishing species. The CHAT helps users in the pre-planning of energy corridors and transmission routes, or in comparing fish and wildlife habitat, by establishing a common starting point across the West for the intersection of development and wildlife. The tool is designed to enable industry to reduce time, costs, conflicts, and surprises while helping government agencies ensure wildlife values are better incorporated into land use decision-making.

- The CHAT is non-regulatory and represents landscape-level analysis. For project-level review, additional information, data, and state consultation is necessary.
- Private landowner boundaries are not discernible on CHATs, which do not impose designations or identify species at the individual landowner scale. While some private land may appear marked as containing crucial habitat, that delineation has no regulatory or legal ramification.
- The CHAT is built from State wildlife agency data. States collaborated to ensure information in the regional viewer is comparable across the region. Arizona, California, Montana, Nevada, Washington, and Wyoming have developed state-specific CHATs. The Southern Great Plains CHAT depicts Lesser Prairie Chicken habitat across five states.
- The online tool is an example of WGA's ongoing work with Federal agencies, including FWS, BLM, and the Forest Service to enable use of state fish and wildlife data and analyses to inform land use, planning, and related natural resource decisions.
- CHAT development began in 2010, supported by a grant from the Dept. of Energy

VI. ATTACHMENTS

- Profiles of Attending Governors (*below*)
- Information Memo regarding WGA Issues of Interest
- Information Memo regarding Sequester Impacts on Payments to WGA States
- Talking Points (*attached separately*)

PROFILES OF ATTENDING GOVERNORS WGA

Governor John Hickenlooper (D-CO): WGA CHAIR - Governor Hickenlooper describes himself as a “recovering geologist now on loan to public service.” Elected in 2010, his priorities include making Colorado the model for energy policy by promoting an “all-the-above” energy policy that develops Colorado’s traditional and renewable resources in a balanced way, and with the highest ethical and public safety standards and making Colorado the healthiest state. Governor Hickenlooper serves in leadership positions with the National Governors Association and the Western Governors’ Association. He also serves as the Vice Chair of the Democratic Governors Association.

Governor Jan Brewer (R-AZ) – Ms. Brewer became governor in January 2009 following the resignation of Governor Janet Napolitano and reelected in 2010. She previously served as Secretary of State of Arizona from 2003 to 2009 and also served in the Arizona House of Representatives and State Senate from 1987 to 1996 including a four year period as Majority Whip. Arizona ranks as the nation’s second-largest solar market. In 2012 Arizona installed more utility-scale solar last year than any other state. Arizona now has edged out New Jersey for the number two slot, and trails only California in solar production.

Governor Butch Otter (R-ID) - Governor Otter has been Governor of Idaho since January 2007. He previously served three terms in Congress representing Idaho’s 1st District from 2001 through 2006. Otter was the longest serving Lieutenant Governor of Idaho, holding office from 1987–2001. He is the first Idahoan since statehood to win elections as both a United States Representative and as governor.

Governor Steve Bullock (D - MT) - Steve Bullock, Montana's former attorney general, was elected governor in 2012. Since becoming Governor, Bullock has approved a request from Yellowstone National Park to move bison from a holding facility in the park, to an Animal and Plant Health Inspection Service facility for research and quarantine. He also supported the creation of the “Native Language Preservation Program,” a partnership between the State of Montana and tribal governments to preserve the languages of Montana’s Indian tribes and enhance the educational opportunities students have on Montana’s reservations, while protecting American Indians’ cultural heritage.

Governor Matt Mead (R-WY) - Governor Mead took office January 2011. He serves on the Council of Governors, a group of 10 governors chosen by the President to advise top federal officials on matters related to the National Guard and civil support missions. He also serves on the U.S. Homeland Security Advisory Council. In the National Governors Association, he is a member of the Natural Resources Committee. He is co-chair of the State and Federal Sage Grouse Task Force, which brings together federal officials and representatives of 11 western states for a regional conservation effort.

Governor Brian Sandoval (R-NV) - Brian Sandoval took office January 2011. He is a member of the Western Governors Association, National Governors Association, Republican Governors Association and the Hispanic Leadership Network. Governor Sandoval also serves as Vice-Chair of the NGA Health and Homeland Security Committee. He was recently appointed Chair-elect of the Education Commission of the States. Prior to becoming Governor, he served as a federal judge, and as the Nevada Attorney General. Sandoval was also the first Hispanic candidate elected to statewide office in Nevada.

Governor Gary Herbert (R-UT): WGA CHAIR - Gary Herbert became Utah's Governor in 2009. Before assuming the governor's office, he served as Utah's sixteenth Lieutenant Governor. Governor Herbert's priorities are education, energy, jobs and self-determination. The Governor currently serves as the Chair of the WGA and is a leading voice on energy issues in the West. He has made it a priority for the WGA to advocate for increased energy development on public lands.

Governor Eruviel Avila Villagas – State of Mexico - Governor Villegas is a member of the Institutional Revolutionary Party. He was Mayor of Ecatepec de Morelos twice, from 2003 to 2006 and from 2009 to 2012 and deputy of the State of Mexico's Congress from 1997 to 2000 in the LIII Legislature and from 2006 to 2009. He has been a teacher at UNITEC. He is author of the book *"The Creation of the Constitutional Court in the State of Mexico"* published in 2003, a joint publication of the Legislative Investigations Institute.

Robert Bonnie –Under Secretary of Agriculture for Natural Resources and Environment - Robert Bonnie was confirmed as Under Secretary in August, 2013. He previously served as a senior policy adviser for Secretary Vilsack. Bonnie worked for the Environmental Defense Fund from 1995 to 2008, holding a number of positions including vice-president of land conservation and wildlife and managing director of the Center for Conservation Incentives. He served on the board of visitors at the Duke University Nicholas School of the Environment and Earth Sciences, and was a member of the board of directors for the Piedmont Environmental Council and Scenic America.

EVENT MEMORANDUM FOR THE SECRETARY

SAGE GROUSE TASK FORCE MEETING

DATE: December 12, 2013
LOCATION: Mandarin Oriental Hotel, Las Vegas, Room TBD
TIME: 12:30PM – 1:30PM PST
FROM: James Lyons, Counselor, ASLM (202)208-6734; Michael Bean, Counselor, ASFWP, 202-208-7400; Sarah Greenberger, Senior Advisor, 202-219-2140; Neil Kornze, Principal Deputy Director, BLM; Dan Ashe, Director, FWS; Ted Boling, SOL; Bret Birdsong, SOL

I. PURPOSE

You will make remarks over lunch to begin the meeting of the Sage Grouse Task Force, immediately following the close of the Western Governors Association's winter meeting. The Governors of several of the eleven states covering the range of the Greater sage-grouse are expected to attend. The primary purpose of your remarks is to provide a status assessment on the collective efforts of the states, the BLM, FWS, and others to conserve the greater sage grouse. In particular, you will underscore the need for continued close collaboration, in light of the fast-approaching September 2015 deadline for the FWS to decide whether to propose to list the sage grouse for protection under the ESA. You will also emphasize that the extent of state-federal collaboration that has been ongoing for the past two years is unprecedented under the ESA.

The Sage Grouse Task Force resulted from a 2011 initiative of former Secretary Salazar. The Task Force is co-chaired by Governors Mead (WY) and Hickenlooper (CO), and the Director of BLM. Each of the eleven sage grouse states has a Governor-appointed representative to the Task Force. In addition, representatives of two DOI agencies (BLM and FWS) and two USDA agencies (USFS and NRCS) serve on the Task Force. The Task Force meets approximately every other month. This will be the first meeting of the Task Force at which any Governors will attend. It will also be the first occasion that you have met with the Task Force.

II. PARTICIPANTS

Confirmed:

- Governor Hickenlooper (CO)
- Governor Mead (WY)
- Governor Sandoval (NV)
- Neil Kornze, Principal Deputy Director, BLM
- Dan Ashe, Director, FWS

Expected:

- Governor Otter (ID)
- Governor Bullock (MT)
- Governor Herbert (UT)
- USDA Under Secretary Robert Bonnie

Each principal is allowed one staff person in the meeting.

III. AGENDA (*tentative*)

- Governor Hickenlooper (CO) will open the conversation and introduce you
- You give remarks
- Neil Kornze gives remarks
- Dan Ashe gives remarks
- Open to the Governors

IV. KEY FACTS

- In 2010, FWS determined that listing of the greater sage grouse under the ESA was warranted but precluded by higher listing priorities.
- The primary bases for the decision that listing was warranted were the loss and degradation of habitat and the lack of adequate regulatory measures to address threats to the species
- Threats to the grouse are many and vary in significance across the species' range. They include the loss and degradation of habitat from fire, invasive plants, and energy development, among others.
- FWS has a deadline of September 2015 to decide whether to propose to list the greater sage grouse or any distinct population segment of the species
- To put stronger regulatory measures in place, BLM and the Forest Service (USFS) are revising all of their land use plans within the extant range of the sage-grouse to consider alternative conservation measures for sage grouse
- NRCS is investing heavily in a Sage Grouse Initiative that provides substantial funds to acquire conservation easements and to support the implementation of beneficial land management practices primarily on private lands by ranchers and other landowners.
- There has been unprecedented state-federal collaboration through the Task Force and:
 - When BLM sought scientific advice on sage grouse conservation needs, it assembled a National Technical Team that included state and federal scientists
 - When FWS was asked to provide as much clarity as it could regarding criteria for listing the species, it assembled a Conservation Objectives Team made up of state and federal representatives. That team's resulting "COT Report" is a first of its kind, carefully balancing states' request to clarify the conservation goal, but to leave room on how to meet that goal
 - When BLM and USFS developed 15 draft Environmental Impact Statements to evaluate amending or revising 98 land use plans, they included consideration of a state-produced alternative for every state that offered one.
 - The FWS is currently developing a database to ensure that all conservation activities for this species are accurately captured for consideration in 2015. The states have provided valuable input to this effort.
- The Task Force consists of a representative of the Governor of each of the 11 sage grouse states, plus FWS, BLM, Forest Service, and NRCS
- Although FWS has proposed to list the Gunnison sage grouse (a separate species) as endangered and the "bi-state" population of greater sage grouse as threatened, these are independent proposals that do not foreshadow any particular outcome for the greater sage grouse.

V. HOT TOPICS

Hot topics to include expected questions from the Governors and suggested responses will be forthcoming.

VI. TALKING POINTS

Talking Points are attached as a separate document.

VII. ATTACHMENTS

- Draft Talking Points (*attached separately*)
- Summary of State Plan Assessment (*below*)

State Plan Summary

California. A 2004 state plan has been supplemented by three local plans. Plans are advisory, not regulatory. Relatively little habitat and few sage grouse remain in the state. Fire is a key threat.

Colorado. No self-assessment has been completed yet. Significant easement acquisition effort has been undertaken. State wildlife agency recommendations to the oil and gas commission are advisory, and there is no data to show whether those recommendations have been followed.

Idaho. A strong adaptive management component is the key feature in a plan that focuses entirely on BLM lands. Idaho has been a leader in promoting the development of rural fire protection associations.

Montana. A detailed strategy to implement Montana's 2005 plan is expected by January. FWS is concerned about inadequate lek buffer distances in non-core areas, uncertain regulatory authorities, and lack of a prohibition against prescribed burning of sage brush.

Nevada. Plan puts a heavy emphasis on a compensatory mitigation program that is not yet developed. Nevada's self-assessment acknowledged that most plan components are insufficient to meet COT objectives.

North Dakota. State expects to complete a revision of its 2005 plan by the end of December. FWS is concerned that the plan relies too heavily on voluntary measures.

Oregon. Although several months away from completion, Oregon's "All Lands, All Threats" plan is ambitious in scope. Oregon has not submitted a self-assessment, but the draft plan has many strong features, including a lower disturbance cap (4%) than that of other states.

South Dakota. A revision of the state's 2008 plan has not yet been completed. FWS has not been able to evaluate the state's effort against the COT objectives.

Utah. Utah has not provided a self-assessment. The plan sets ambitious population and habitat goals. However, FWS is concerned that it relies entirely on voluntary measures and excludes protection for two key populations.

Washington. The state has not provided a self-assessment. State expects to complete a review of its efforts in 2014.

Wyoming. Although Wyoming did not submit a self-assessment, its "core area strategy" has been in place for several years and appears to be working well. The Wyoming core area strategy served as a model for most other states.

TALKING POINTS

Welcome

- Two years ago yesterday, Ken Salazar met with Governor Mead and representatives of other states to begin work together to conserve this species
- Out of that meeting came this Task Force and an historic opportunity to conserve this species and its habitat so that listing the species under the ESA is not necessary.
- Thank in particular Governors Mead and Hickenlooper for their leadership of this effort

Unprecedented Collaboration

- To date, there has been unprecedented state and federal cooperation
- The BLM's "National Technical Team" Report and the FWS "Conservation Objectives Team" Report were produced through the collaboration of state and federal experts.
- The BLM and USFS land use plan amendments include consideration of a state-produced alternative for every state that offered one.
- We have provided states with the knowledge and tools at our disposal
- We have accomplished a great deal to date: a collective understanding of the conservation objectives, 98 draft land use plan amendments and revisions that are out or will shortly be out in the public domain, several state plans for conservation completed or underway

Critical Juncture

- But we have reached a critical juncture in this joint endeavor.
- Continued close cooperation will be even more important as we move forward
- BLM and the Forest Service intend to complete their plan revisions and amendments by this time next year to give FWS time to take them into account for their 2015 proposed listing determination
- To meet this timeline, BLM and the Forest Service must publish their final environmental analyses and proposed plans by next summer
- To be clear, six months from now, the BLM and USFS must be close to completing their final environmental analyses for the revisions and amendments of their plans.
- The states, too, must complete and begin to implement their own plans and programs for state and private lands on a similar timeline
- The clock is ticking

Top Line Assessment

- In September I asked my colleagues at Interior to ensure this meeting could be a frank and candid assessment of where we are today.

- In anticipation, most states prepared assessments of their own plans and programs
- I also asked my colleagues for preliminary thoughts on the draft BLM plans, though the review is ongoing
- Those assessments acknowledge that work remains to adequately address threats to the sage grouse identified in the COT report produced by state and federal officials
- I want to share a few of the high-level issues that emerged

Voluntary Actions

- Many of the state plans rely heavily – some almost exclusively – on voluntary actions
- Voluntary conservation measures are one possible approach, but you need to understand how FWS will evaluate them
- Two considerations will guide the FWS: first, the likelihood that voluntary measures will be implemented, and second, the likelihood that the measures will be effective
- Many of your staff are hearing from the FWS asking that you step beyond voluntary approaches and use your regulatory authorities to address threats
- Wyoming, for instance, has done so with a series of executive orders that provide the kind of regulatory certainty that the FWS can count and credit in their listing decision.
- For those of you relying on new voluntary programs: get them started as soon as possible so you can establish strong evidence of implementation and effectiveness by 2015
- But you should also think about doing more – think about using your state powers to ensure that necessary conservation measures are implemented.
- Understand that if there is not a regulatory guarantee that certain actions will take place and if there's not a proven track record of voluntary actions being implemented and being successful, FWS will not be able to credit those measures when making their listing decision

Private and State Lands

- Here's something else that I hope you'll consider.
- BLM and other federal lands comprise a majority of the remaining sage grouse habitat (58%), but effective conservation cannot be accomplished solely on federal lands.
- We are greatly appreciative of the ideas you've brought forward for how federal lands should be managed to conserve sage grouse, and we will continue to work with you to refine the plans for public lands in each state.
- But we need state conservation plans that apply to non-federal lands as well.
- If conservation measures for sage grouse are not shared across the landscape of public and private lands, then here's what will likely happen.
- The BLM and Forest Service will have to carry the conservation load on their own and the conservation measures they select will have to be more restrictive than if actions were being shared across entire landscape.
- The math here is fairly simple. And it's critical that we all take steps to get this right.

Science-Based Land Management Regimes

- The BLM, the Forest Service and the states will be making hard decisions on issues like the amount of disturbance the sage grouse can tolerate and the necessary buffer zone for activity occurring around leks
- The FWS, the BLM, the Forest Service and each of your people will have to spend the next few months looking at the best available science and determining how to craft final plans that will have the highest likelihood of conserving the sage grouse
- To be effective – and legally defensible – plans must address the threats to the bird's survival in the remainder of its range based on the best available science

Rural Fire Protection Districts

- As an example, fire is one of the greatest threats to sage grouse in the Great Basin
- At FWS request, the Western Association of Fish and Wildlife Agencies convened a team of experts to look at the issue.
- That team identified expediting creation of Rural Fire Protection Districts -- local landowners trained to fight fire -- as one of the most important conservation actions we can take
- The State of Idaho worked with BLM and FWS to do exactly that
- Neil will talk more about this program in a few minutes.

Next Steps

- Over the next three months, the FWS will continue work with the States, BLM and the Forest Service to address comments and make needed improvements as appropriate to the land use plan amendments and revisions.
- In March, we intend to work with you to review all the plans – those that apply to public lands and those that apply to private and state lands – to assess how **together** they address the threats to the species across the range using the FWS Conservation Objectives Team Report as a guide
- The results of that assessment will give all of us an opportunity to make further adjustments, as appropriate, before the BLM and Forest Service select final management alternatives
- In that way, we can work across the landscape TOGETHER, to develop plans that give us the best chance of conserving the species
- I'd like to reconvene to discuss the resulting plans at the June WGA meeting
- After that conversation, we can proceed to finalize the plans next fall so that the FWS will be able to consider the plans in its listing process

In summary

- The Federal/state interagency cooperation to date has been unprecedented
- We are committed to continuing our partnership, working across the 11 state range of the grouse with the states and their experts, to develop a strategy to ensure viable sage grouse populations across the West.
- We're on track to meet our deadlines for finalizing the plans over the next 9 months
- Our efforts will only be meaningful if each of us develops strong, defensible science-based plans
- I appreciate all your efforts to date and
- I look forward to continuing our collaboration and hope for open communication over these next few critical months

Re: Additional Briefing Materials for Western Governors' Association Winter Meeting and Sage Grouse Task Force Meeting - 12/12

DOI in the News:

SECRETARY JEWELL THINKING ABOUT PRESIDENT OBAMA'S ENVIRONMENTAL LEGACY. USA Today (12/5, Jackson, 5.82M) reports that Interior Secretary Sally Jewell said "she's not thinking about her legacy," but she does "think about a legacy for President Obama" in a profile in Outside magazine. According to the article, the legacy could "include rules for fracking on federal lands, oil and gas leases on fragile lands, and addressing climate change." In a recent speech to Interior Department employees Jewell laid out her priorities: "The more traditional goals included ramping up renewable-energy production, repairing the Native American education system, and addressing looming water catastrophes like the massively overburdened Colorado River."

Also providing coverage are the Jackson (TN) Sun (12/6, 67K) and the Port Huron (MI) Times Herald (12/6, 75K).

SECRETARY JEWELL DISCUSSES COASTAL RESILIENCY IN NEW ORLEANS. The New Orleans Times-Picayune (12/6, 700K) reports that Interior Secretary Sally Jewell "took a foggy helicopter ride on Thursday" to observe the erosion that has "rocked" North Breton Island during the past century. Throughout the ride, Jewell "pointed to the Mississippi River, how it has been reined in by civilization through the years, affecting the natural deposit of sediment downriver." Later in Lacombe, said, "Development has its cost and it also drives economic activity. There are economic impacts of lack of development and there are economic impacts of development, as you saw during the oil spill." On Friday, at Jean Lafitte National Park, Jewell is "scheduled to announce the third and largest phase of 2010 BP Deepwater Horizon early restoration projects for the Gulf Coast."

The Columbus (IN) Republic (12/6, 80K) reports that money for the restoration projects is "coming from \$1 billion provided by BP PLC in 2011 as a down payment on coastal restoration." Jewell will also discuss "continuing interagency work to restore natural resources along the Gulf and about the region's importance to President Barack Obama's climate plan."

Also providing coverage are the Denver Post (12/6, 949K), WXVT-TV Greenwood, MS (12/6, 98), and KALB-TV Alexandria, LA (12/6, 1K).

PRESIDENT OBAMA DIRECTS FEDERAL GOVERNMENT TO BOOST USE OF RENEWABLE SOURCES.. The E&E Daily (12/5) reports that President Obama has "more than doubled the government's renewable energy goal," following through on a vow "he made five months ago to combat climate change through executive actions." According to an administration official, "agencies will have to find the money within their own budgets but will have the flexibility to use whatever is most cost-effective for them." The Interior Department is already "planning how to meet the new renewable energy goals." It has combined several methods. More than 4 percent of its renewable energy is generated on site, while 1.5 percent is purchased through a utility company and 2.4 percent comes through renewable energy credits.

Also providing coverage is Politico (12/6, Guillen, 467K).

GREEN GROUPS URGE INTERIOR, EPA, TO REGULATE METHANE. The National Journal (12/6, Subscription Publication, 427K) reports that the Environmental Protection Agency is being called on by "a coalition of national and regional environmental organizations and public-health advocates" to "draft regulations to limit methane emissions and asking the Interior Department to tighten existing regulations to control releases of the greenhouse gas." In a letter yesterday sent to Interior Secretary Sally Jewell and EPA Administrator Gina McCarthy "the groups say that curbing emissions of the greenhouse gas aligns with president Obama's second-term climate-change agenda." The article notes that "signatories of the letter include Conrad Schneider, advocacy director of the Clean Air Task Force" and "Elizabeth Thompson, vice president for U.S. Climate and Political Affairs for the Environmental Defense Fund."

Also providing coverage is the Washington Post (12/4, Bernstein, 4.28M).

GROUPS CONCERNED ABOUT FUTURE OF PARKS AFTER SHUTDOWN. In its "E2 Wire" blog, The Hill (12/6, 194K) reports that there is growing concern among groups "over the future of national parks following the closure of the sites during October's government shutdown." The conservation group Environment America is "launching a Facebook campaign" on Thursday urging Interior Secretary Sally Jewell and President Obama to "take swift action on protecting the nation's public lands." Meanwhile, "a new coalition of mayors from US cities will announce their bipartisan effort to support federal funding for improving access to national parks next week."

Also covering the impact of the shutdown on national parks and memorials are the Biloxi (MS) Sun Herald (12/5, 154K) and the International Business Times (12/6, 237K).

ANALYSIS FINDS PUBLIC LANDS EMIT MORE CARBON THAN THEY ABSORB. The E&E Daily (12/5) reports that "public lands emit nearly five times more greenhouse gases than they absorb," according to a new analysis from the Center for American Progress. This is because "there's far more carbon dioxide released from burning coal, oil and natural gas taken from public lands than is absorbed by national forests, grasslands and coastal ecosystems." The group said, "Rather than fulfilling their natural role of absorbing carbon and balancing the carbon cycle, public lands have become one of the largest sources of US carbon emissions as a result of fossil

fuel extraction.”

Also providing coverage are the [Huffington Post](#) (12/5, Elliott, 11.54M) and the [Think Progress](#) (12/5, 117K).

OFFICIALS TRY TO KILL GUAM SNAKES WITH POISONED DEAD MICE. The [E&E Daily](#) (12/5) reports that biologists are trying to wipe out an invasive snake in Guam with “dead mice filled with poison.” On Monday, “crews distributed mice filled with 80 milligrams of acetaminophen through an aerial bait drop.” The objective is for brown tree snakes, “which were introduced to the island six decades ago, to eat the mice and then die.”

SECRETARY JEWELL URGED TO SUPPORT PROTECTING STORNETTA PUBLIC LANDS. In an op-ed for the [Santa Rosa \(CA\) Press Democrat](#) (12/4, De Graw, 156K), Debra De Graw, chief executive officer of the Mendocino Coast Chamber of Commerce, notes that Interior Secretary Sally Jewell recently made a visit to Northern California to hear from the public “on their vision for protecting the Stornetta Public Lands.” At a public forum, De Graw told Jewell that “local businesses strongly support presidential action to protect the Stornetta Public Lands by including them in the California Coastal National Monument.” She urges Jewell to “take the message she heard in Point Arena back to President Barack Obama” and to urge “the president to act now to protect the Stornetta Public Lands.”

COLUMNIST QUESTIONS ENVIRONMENTALISTS' INFLUENCE ON INTERIOR DEPARTMENT. In his column for the [Washington Examiner](#) (12/6, Arnold, 319K), Ron Arnold criticizes the NPS for its comments on the BLM's proposed fracking rule. Arnold questions whether Interior Secretary Sally Jewell can “tear the arrogant, insubordinate, power-drunk park lords out of their autonomous concertina-wired fiefdom with its warped allegiances sworn to Big Green, and then convince whatever good people there may be into serving the federal government as they should, pledging allegiance to the United States of America.” Arnold contends that that’s “Jewell’s real job — get Big Green’s power agents out of her Interior Department.”

America's Great Outdoors:

National Park Service:

CONTINUING COVERAGE OF STRANDED PILOT WHALES. The [New York Times](#) (12/5, Preston, 9.61M) reports that efforts to lead more than 40 pilot whales caught in the Everglades continued Thursday.

The [Los Angeles Times](#) (12/6, Karlamangla, 3.07M) reports that on Thursday, “though one more whale was found dead, no living whales remained in the spot where they were clustered Wednesday.” Blair Mase of the NOAA said biologists would be “lucky if we’re able to even save a couple” of the remaining pod of approximately 41.

The [Boston Herald](#) (12/6, 643K) reports that “pods of 35 pilot whales slowly swam Thursday into deeper water off Florida’s southwest coast, raising optimism that the strandings of whales” on Everglades National Park “beaches may soon end on a positive note.” NOAA fisheries official Blair Mase said that the “three whale pods were nine miles north of their original location and continuing to move offshore.” Mase said, “They are in deeper water, and they are getting closer to their normal home range. Even though we are hopeful, this situation could go either way. There is a chance they could come back inshore again.” Mase said the “total of dead whales has reached 11, with five still unaccounted for.”

Also providing coverage are the [Washington Post](#) (12/6, 4.28M), the [New York Times](#) (12/6, Madigan, Subscription Publication, 9.61M), the [Los Angeles Times](#) (12/5, Karlamangla, 3.07M), the [Chicago Tribune](#) (12/5, Karlamangla, 2.32M), the [Boston Globe](#) (12/6, Laboy, Armario, 1.75M), the [Christian Science Monitor](#) (12/5, Armario, Laboy, 540K), [USA Today](#) (12/5, Atteberry, 5.82M), [NPR](#) (12/6, Neuman, 465K), [Yahoo!](#) (12/6, Laboy, Armario, 17.91M), [WLIO-TV](#) Lima, OH (12/6, 1K), [WMGM-TV](#) Wildwood (NJ) NBC 40 (12/6, 2K), [WMGM-TV](#) Wildwood (NJ) NBC 40 (12/6, 2K), [WJLA-TV](#) Washington (12/6, 118K), [WMGM-TV](#) Wildwood (NJ) NBC 40 (12/6, 2K), [KUSI-TV](#) San Diego (12/6, 859), [WJBK-TV](#) Detroit (12/6, 83K), and [WOOD-TV](#) Grand Rapids, MI (12/6, 129K).

JUDGE UPHOLDS YUKON RIVER ARRESTS. [WRAL-TV](#) Raleigh, NC (12/6, 117K) US District Court Judge Ralph Beistline on Monday ruled the NPS acted properly in arresting 70-year-old Jim Wilde in September 2010

after he refused the orders of two rangers to stop his riverboat in the middle of the Yukon River. In his decision, Beistline wrote, "Like it or not, under the law as it currently exists, the federal government may regulate activity on that portion of the Yukon River that runs through the Yukon-Charley Rivers National Preserve, despite the fact that the land under the waterway is owned by the state of Alaska."

Also covering the story is the [Alaska Dispatch](#) (12/5, 7K).

ROCKY MOUNTAIN NATIONAL PARK SEES A DROP IN POST-FLOOD VISITORS. The [Estes Park \(CO\) Trail-Gazette](#) (12/6, 13K) reports that Rocky Mountain National Park saw a large drop in people visiting the park following the devastating mid-September flood. According to information released by the park, the number of visitors to the national park dropped a "staggering 52 percent in September and a whopping 70 percent in October over the same time period last year." The article notes that "there were 427,376 less visitors this year in September and October than in 2012."

NPS SEEKS COMMENTS ON APPALACHIAN TRAIL. The [Kingston \(NY\) Daily Freeman](#) (12/5, 73K) reports that the NPS is launching the process of "preparing a foundation document for planning and managing the Appalachian National Scenic Trail." The agency is seeking public input from Dec. 9 through Jan 9.

CEREMONY TO REMEMBER PEARL HARBOR ATTACK. The [Washington Post](#) (12/5, Press, 4.28M) reports that a public ceremony will be held "remembering those who died" in the attack on Pearl Harbor 72 years ago.

Also providing coverage is [WJLA-TV](#) Washington (12/6, 118K).

FOREST SERVICE STUDYING PLAN TO REMOVE THOUSANDS OF TREES DAMAGED IN RIM FIRE. The [E&E Daily](#) (12/5) reports that the Forest Service is "studying a plan to remove thousands of trees across nearly 30,000 acres" in the Stanislaus National Forest that were destroyed or damaged in September by the Rim fire. The agency will conduct an environmental impact statement to "study the five-year plan to not only remove dead and dying trees in the national forest but also revegetate scorched landscapes, remove burned trees along roughly 390 miles of public roads and build 6 miles of temporary roads needed to haul the dead timber away."

Bureau of Land Management:

COLORADO GOV. HICKENLOOPER SELECTS LEADER FOR SAGE GROUSE PLAN. A story by the AP in the [Denver Post](#) (12/6, 949K) reports that Gov. John Hickenlooper has appointed John Swartout, a former head of the Great Outdoors Colorado land conservation organization, to "lead a state effort to preserve the greater sage-grouse and fend off an endangered listing for the bird." Swartout said he "agreed to coordinate state efforts to deal with sage-grouse because he hoped to find a way to preserve the birds and allow for the development of Western Slope economies."

Also providing coverage are [KUSA-TV](#) Denver (12/6, 171K) and [KMGH-TV](#) Denver (12/6, 30K).

MONTANA STUDIES WAYS TO MANAGE FEDERAL LANDS. The [Billings \(MT\) Gazette](#) (12/6, 206K) reports that "the idea for greater state management of federal lands has caught on in other Western states, including Idaho and California, prompting comparisons to the so-called 'Sagebrush Rebellion' of the late 1970s and early 1980s." However, in an interview, Montana state Sen. Jennifer Fielder said "comparing today's circumstances to the Sagebrush Rebellion marginalizes what is taking place in the West – namely large forest fires, logging projects slowed or halted by court challenges and federal land management plans that have reduced motorized access to some lands." Meanwhile, the BLM and US Forest Service have "had liaisons attending" the Environmental Quality Council's "work group's meetings, mainly to provide information when questions arise."

STUDY FINDS INCREASING DEVELOPMENT ALONG FOREST BOUNDARIES. The [Spokane \(WA\) Spokesman-Review](#) (12/5, 214K) reports that "private development along the edges of most public forests in Oregon and Washington more than doubled since the 1970s," according to a new study conducted by the US Forest Service Pacific Northwest (PNW) Research Station. The study, which "used aerial photography to inventory structures at the fringes of public forests, is the first to look at development trends in the two states before and after the enactment of land use laws." The article notes that "in Oregon, the greatest amount of

development occurred along the edges” of BLM forests.

RESEARCHERS STUDYING DECLINE OF WYOMING ANTELOPE. The Casper (WY) Star-Tribune (12/6, 90K) reports that “state and federal wildlife researchers are undertaking a study of antelope populations in south-central Wyoming.” Researchers with the BLM, the University of Wyoming, and the Wyoming Game and Fish Department are “cooperating on the study of antelope in the Bitter Creek, Baggs and Red Desert herds.”

BLM TO HOST TWO SAN PEDRO PLAN MEETINGS. The Willcox (AZ) Range News (12/6, 11K) reports that the BLM will host two public meetings in December to “continue public engagement in the development of a new Resource Management Plan to the San Pedro Riparian National Conservation Area (RNCA).”

ADDITIONAL COVERAGE OF ARSON INVESTIGATION AT GUNNISON BLM OFFICE. Additional coverage of the investigation into possible vandalism and arson at a BLM office in Gunnison was provided by the Denver Post (12/6, 949K), the Columbus (IN) Republic (12/6, 80K), the Franklin (IN) Daily Journal (12/6, 51K), and KMGH-TV Denver (12/6, 30K).

ADDITIONAL COVERAGE OF SEN. WYDEN'S FOREST BILL. Additional coverage of Sen. Ron Wyden's forest bill was provided by the Eugene (OR) Weekly (12/5).

Fish and Wildlife Service:

FWS CONSIDERING PROTECTION FOR 11 TARANTULA SPECIES. The Los Angeles Times (12/5, Cart, 3.07M) reports that the FWS is “considering extending Endangered Species Act protection to 11 tarantula species native to India and Sri Lanka.” The creatures, sometimes known as parachute spiders, “are threatened by the international pet trade, where vividly hued spiders can fetch a few hundred dollars apiece. they are imperiled by shrinking habitats and fragmented ranges.”

FWS COMPLETES EXAMINATION OF RAPTOR KILLED BY TRUCK. The East County (CA) Magazine (12/6) reports that the FWS has “completed its examination of a raptor euthanized after it was struck by a semi- truck in Boulevard on November 27.” The agency has confirmed the species of bird as a red-tailed hawk, and not as a Golden Eagle.

ADDITIONAL COVERAGE OF PROPOSAL TO EXPAND RANGE OF MEXICAN WOLVES. Additional coverage of the proposal to expand the range of Mexican gray wolves was provided by the Santa Fe New Mexican (12/6, 58K) and the Atlanta Journal-Constitution (12/6, 1.26M).

Securing America's Energy Future:

Renewable Energy:

OBAMA ADMINISTRATION FINALIZING RULE ON WIND FARMS THAT KILL EAGLES. The “E2 Wire” blog of The Hill (12/6, 194K) reports that the Obama Administration has almost done finalizing “a rule that would give energy companies lengthy permits for wind farms that end up killing bald and golden eagles.” Every year “hundreds of thousands of birds are killed...after flying into large wind turbine blades,” and it has become “an ongoing saga for the administration this year.” On Thursday, “the White House finalized its review...of a rule that would give the farms a 30-year pass for the killings, known as ‘takings.’” The specifics of the Department of Interior rule aren't known yet “and it is possible it could be tweaked, though significant changes would be unusual at this stage in the process.”

Also providing coverage are the National Journal (12/6, Subscription Publication, 427K), FOX News (12/5, 6.72M) and the Washington Free Beacon (12/6, 37K).

ADDITIONAL COVERAGE: POWER COMPANY OF WYOMING SEEKS EAGLE-KILL PERMIT. Additional coverage of the eagle-kill permit sought by Power Company of Wyoming was provided by the Billings (MT) Gazette (12/6, 206K).

Onshore Energy Development:

USGS SCIENTISTS DEVELOP NEW METHOD TO PREDICT GROUNDWATER CONTAMINATION. The Switchboard (12/6, 67K) reports that USGS researchers have developed a new way to "predict where groundwater is likely to be contaminated by salty oil and gas wastewater." USGS scientists are working with the FWS to "monitor areas near important wetlands that are at high risk for groundwater contamination."

DALLAS MORNING NEWS ASKS REGULATORS TO INVESTIGATE TEXAS EARTHQUAKES. The Dallas Morning News (12/6, 1.13M) editorializes on earthquakes in the Eagle Mountain Lake area. The area, containing a "high concentration of natural-gas drilling operations," has experienced an uptick in earthquakes, with 23 recorded in the past month. The editors say "state and federal governments owe it to residents to determine whether this is a purely natural phenomenon or if man-made factors are to blame." The editorial notes that fracking is unlikely to directly cause the quakes, but that the injection wells used to dispose of fracking waste water may be the cause.

Offshore Energy Development:

BOEM REQUESTS MORE DETAILS FROM SHELL ON ARCTIC PLANS, POLLUTION PERMITS. The E&E Daily (12/5) reports that in a Nov. 29 letter to Royal Dutch Shell PLC, the BOEM asked the firm to "provide more data on its 2014 Chukchi Sea drilling proposal and to prove that Shell has fixed the problems that doomed the firm's troubled 2012 Arctic drilling program." The bureau also "sought a meeting on Shell's air pollution permit data." But "in requesting six pages of new data," the BOEM "conceded that Shell may have already answered some of its questions in a separate 63-page integrated operations plan (IPO) the company submitted Nov. 26."

Nations Rushing To Expand Oil Drilling In The Arctic. The US News & World Report (12/6, Zalan, 620K) reports that "human activity in the Arctic is growing fast, as rising global temperatures have led the frozen polar region to warm faster than expected and become increasingly ice free for longer periods of time." The article notes that "in the last few years, six of the eight Arctic littoral countries – the United States, Russia, Norway, Canada, Denmark and Iceland – have granted energy companies offshore oil and gas exploration licenses." However, "for environmental groups, the harsh environment and potential for accidents are reasons to avoid industrialization of the Arctic altogether."

Expanding Oil Drilling In Arctic Opposed. For "The Blog" of the Huffington Post (12/6, Van Noppen, 11.54M), Trip Van Noppen, President of Earthjustice, writes that "the failures of Shell Oil's drilling efforts last year demonstrate that industry is not ready to handle Arctic offshore conditions." He argues that "drilling for oil in the Arctic Ocean is the very definition of a risky addiction," and "it also takes take us in the wrong direction when it comes to addressing the challenges of climate change."

Additional Coverage Of Comments Received On Lease Sale For Chukchi Sea. Additional coverage of the comments received by the BOEM on the proposed lease sale for the Chukchi Sea was provided by the Alaska Public Radio Network (12/5, 2K).

OIL INDUSTRY RENEWS PUSH FOR ATLANTIC OFFSHORE DRILLING . SNL Financial (12/6, 22K) reports that according to a report released for the American Petroleum Institute this week by Quest Offshore Resources, "drilling for oil and gas in the Atlantic Outer Continental Shelf could contribute as much as \$24 billion per year to the US economy." The report said that by 2035, offshore gas and oil development could yield "an additional 1.3 million barrels of oil equivalent per day of oil and natural gas, generate 280,000 jobs, generate \$51 billion in cumulative government revenue, and inject approximately \$24 billion per year into the economy." API upstream and industry operations director Erik Millito said Atlantic oil and gas reserves are "a potential gold mine." He continued, "Developing oil and natural gas in the Atlantic could put hundreds of thousands of Americans to work, make us more energy-secure and bring in needed revenue for the government. But none of these benefits will appear unless the federal government follows pro-development energy policies."

Upstream Online (12/6, 20K) reports on the Quest study as well, noting that the American Petroleum Institute "envisages production of up to 1.35 million barrels of oil equivalent per day by 2035." This assumes that leasing would begin in the area in 2018.

The Oil and Gas Journal (12/6, 1K) reports response to the Quest study as well. American Petroleum Institute upstream and industry operations director Erik Milito said, "economic benefits of opening the US Atlantic OCS to oil and gas activity would be felt nationally." However, he cautioned, "none of these economic benefits will occur unless the federal government adopts a different strategy. The only question is whether it will open the door to more jobs, more economic growth, and more domestic energy production from the Atlantic OCS."

The Raleigh (NC) News & Observer (12/5, 475K) reports that according to data released by the American Petroleum Institute on Thursday, "North Carolina could gain 55,000 jobs, and nearly \$4 billion in revenue," if Atlantic Ocean offshore drilling occurred. The API noted the majority of these jobs would come from service industry workers that would support energy industry workers coming to the area. API also projected the state would "qualify for \$885 million in annual rents and royalties, or nearly \$4 billion from 2017 to 2035."

Also providing coverage is the Rigzone (12/6, 12K).

BP LEADS EFFORTS TO EXPAND DEEP WATER DRILLING. The AP (12/5) reports that BP is exploring technology to let it retrieve oil from areas "so deep under the sea floor, and under such high pressure and temperature, that conventional equipment would melt or be crushed." Last year CEO Bob Dudley told colleagues that BP "thought very carefully before re-committing the company to the deep water following the 2010 accident." Since the 2010 spill BP's "production is down 21 percent...and its share price is 22 percent lower." BP needs to produce more oil, and exploring the Tiber, a BP oil field 35,000 feet below the sea floor is part of that, and why BP is developing these new technologies. The Tiber rests in the Lower Tertiary a formation now being explored by "by Exxon, Chevron, Shell and others."

The New Orleans Times-Picayune (12/6, 700K) reports that "new equipment, including blowout preventers far stronger than the one that failed on the Deepwater Horizon, must be developed," and "then BP must convince regulators it can tap this oil safely." According to the article, "another disaster could threaten BP's existence, but success could restore the company's fortunes – and perhaps its reputation."

RESEARCHERS TO STUDY ENVIRONMENTAL MONITORING OF GULF. The Baton Rouge (LA) Advocate (12/6, 24K) reports that researchers from the Center for Natural Resource Economics and Policy in the LSU AgCenter Department of Agricultural Economics and Agribusiness have won a "three-year award of more than \$750,000 to study the value of the environmental monitoring system in the Gulf of Mexico." The award was made through the LSU Coastal Marine Institute, a partnership between LSU and the BOEM, with funding shared equally.

ADDITIONAL COVERAGE: NORTH CAROLINA GOV. MCCRORY SEEKS TO OPEN OFFSHORE DRILLING. Additional coverage of North Carolina Gov. Pat McCrory's push for offshore energy exploration was provided by the [Greenville \(NC\) Daily Reflector](#) (12/6, 59K) and the [Sanford \(NC\) Herald](#) (12/6, 22K).

ADDITIONAL COVERAGE OF SETTLEMENT WITH BOEM SCIENTIST. Additional coverage of the settlement with Charles Monnett was provided by the [Juneau \(AK\) Empire](#) (12/5, 21K), the [Fairbanks \(AK\) News-Miner](#) (12/6, 44K), the [Summit County \(CO\) Citizens Voice](#) (12/5, 506), the [Alaska Dispatch](#) (12/4, 7K), [WRIC-TV](#) Richmond, VA (12/6, 13K), [KTIV-TV](#) Sioux City, IA (12/6, 2K), and [WNEW-FM](#) Washington (12/5).

Tackling America's Water Challenges:

AGREEMENT SIGNED TO SHARE WATER IN UPPER KLAMATH. . The [E&E Daily](#) (12/5) reports that state and federal officials has "agreed to a water-sharing deal in the Upper Klamath Basin." Oregon Gov. John Kitzhaber and BOR Commissioner Michael Connor signed the agreement. Under the agreement, "ranchers along the Wood, Williamson and Sprague rivers would cut their water use to help provide irrigation for farmers downstream," and "in turn, the Klamath Tribes would not cut off irrigation to ranchers."

Additional coverage was provided by the [Bend \(OR\) Bulletin](#) (12/6, 94K), the [Dalles \(OR\) Chronicle](#) (12/5, 40K), and the [Red Bluff \(CA\) Daily News](#) (12/6, 20K).

STATE AUDITOR WARNS SALTON SEA COULD BECOME FINANCIAL SINKHOLE. The U-T San Diego (12/5, 647K) reports that "the Legislature's efforts to 'save' the Salton Sea...have gone virtually nowhere in the past decade, unless one counts the millions of dollars that have been spent on personnel and consultants," according to a recent report by State Auditor Elaine Howle. The report noted, "Although the Resources Agency identified various alternatives in 2007, none of them has been fully funded which may be due to the high costs of the alternatives presented — ranging from \$2.3 billion to \$8.9 billion to construct."

ADDITIONAL COVERAGE OF BAY DELTA CONSERVATION PLAN. Additional coverage of the Bay Delta Conservation Plan was provided by the Fresno (CA) Bee (12/5, 327K).

Empowering Native American Communities:

TRIBAL LEADERS SAY CLIMATE CHANGE IS PRIORITY. On behalf of Idaho Tribe, Nez Perce Councilman and Affiliated Tribes of Northwest Indians Natural Resource Committee Chairman, Brooklyn Baptist and Alaska Tribe, Akiak Native Community Councilman Mike Williams writes in the Indian Country Today Media Network (12/5, 21K), that at the 2013 White House Tribal Leaders Conference, tribal leaders "raised climate change as a top priority of Native Nations." Williams presses the Obama Administration for "something even bolder, something that enables tribes a fair opportunity to tackle climate disruption, something to meet this grave threat on its terms, something that will also keep with the trust responsibility." He says that "an intertribal interagency task force on climate resilience and preparedness must be established to address the United States' treaty and trust responsibilities to place-based nations."

INDIAN LAW AND ORDER COMMISSION REPORT CRITICIZES ALASKA. The Alaska Public Radio Network (12/5, 2K) reports that on Wednesday at the BIA Providers' Conference, three members of the Indian Law and Order Commission discussed "the findings of their report to Congress and the President, a report that singles out Alaska for criticism."

CATAWBA TRIBE PUSHES FOR LAND PURCHASE, CASINO. The Charlotte (NC) Observer (12/5, 713K) reports that the Catawba Indian tribe "says a 1993 settlement allows the federal government to designate land in North Carolina as a reservation, the first step toward building a new casino in Cleveland County that has spurred fierce opposition from Republican and Democratic leaders." The assertion is made in the tribe's application to the BIA to "put the noncontiguous lands in federal trust as part of its right to a 3,600-acre reservation."

ADDITIONAL COVERAGE OF HEARING ON MASHPEE WAMPANOAG TRIBE'S PROPOSED CASINO. Additional coverage of the hearing held by the BIA on a proposed casino by the Mashpee Wampanoag tribe was provided by the Taunton (MA) Gazette (12/6, 36K) and the Fall River (MA) Herald News (12/6, 116K).

Top National News:

OBAMA PRAISES MANDELA AS WORLD MOURNS HIS PASSING AT AGE 95. The death of former South African president Nelson Mandela at the age of 95 is the subject of extensive print and broadcast coverage. Mandela's death was the lead story on all three network news broadcasts, which dedicated nearly an hour of total coverage to the story on extended-length programs. Much of the coverage focuses on President Obama's reaction to Mandela's death and the influence the South African leader has had on the President dating back to his college years.

NBC Nightly News (12/5, story 2, 0:30, Williams, 7.86M) reported that Obama reacted to Mandela's death during "an emotional appearance late today...in the White House Briefing Room." ABC World News (12/5, story 2, 1:35, Marquardt, 7.43M) reported that the President "spoke about the profound effect Mandela had on his own life." Obama: "We've lost one of the most influential, courageous and profoundly good human beings that any of us will share time with on this earth. He no longer belongs to us. He belongs to the ages." ABC showed a picture of the President as a college student protesting apartheid on campus and noted that the President said "that was the moment that Mandela 'gave him a sense of what is possible in this world, sending a jolt of electricity through his homeland but also this nation, America, founded on equality for all.'"

The CBS Evening News (12/5, story 2, 1:10, Pelley, 5.58M) also reported on the President's reaction to

Mandela's death, showing a clip of the President saying, "Through his dignity and unbending will to sacrifice his own freedom for the freedom of others, Madiba transformed South Africa and moved all of us." CBS noted that the President "used the word 'Madiba,'" which is "an honorary title which translates as 'father.'" CBS added that according to the White House, the President "plans to attend the state funeral in South Africa," which is "likely to be in about 10 days."

In another story, ABC World News (12/5, story 3, 3:40, Pitts, 7.43M) examined Mandela's influence in the US, noting that his rise "inspired a young politician from Illinois." Then-Sen. Obama "visited his cell on Robben Island when his destiny was still a dream."

Bloomberg News (12/6, Talev, Goldman, 1.91M) reports that the President called Mandela's "life and legacy a touchstone for him and an example "that all humanity should aspire to." The President joined a chorus of gold leaders "in paying tribute to Mandela," noting that "he was 'one of the countless millions who drew inspiration from Mandela's life. So long as I live, I will do what I can to learn from him.'" Reflecting on "Mandela's achievement in standing up to the apartheid government of South Africa, going to jail and emerging to continue a quest for reconciliation and equality," the President said, "His commitment to transfer power and reconcile with those who jailed him set an example that all humanity should aspire to, whether in the lives of nations or our own personal lives. ... He achieved more than can be expected of any man."

Politico (12/6, Dovey, 467K) reports that the President "addressed part of his remarks" to the people of South Africa, "praising them for being an example to the world of 'renewal and reconciliation and resilience.'"

Reuters (12/6, Mason, Holland) reports that the President said of Mandela, "Today he's gone home, and we've lost one of the most influential, courageous and profoundly good human beings that any of us will share time with on this earth."

USA Today (12/6, Jackson, 5.82M) reports that the President "said he has studied Mandela's writings throughout his career in government," noting, "Like so many around the globe, I cannot fully imagine my own life without the example that Nelson Mandela set. ... And so long as I live I will do what I can to learn from him."

The Los Angeles Times (12/6, Hennessey, Parsons, 3.07M) reports that the President said that "his first experience with political activism – 'the first thing I ever did that involved an issue or policy or politics' – was a college protest against apartheid." Said the President, "I would study his words and his writings. The day he was released from prison it gave me a sense of what human beings can do when they're guided by their hopes and not by their fears."

The AP (12/6, Pace) reports that while they met in person only once, the President's "political rise has drawn inevitable comparisons" to Mandela, with whom he "shares the distinction of being his nation's first black president."

Analyses Note Mandela's Influence On Obama. A New York Times (12/6, Shear, Subscription Publication, 9.61M) analysis reports that the President conveyed the "strong impression" that without Mandela "there might never have been a President Obama." The President's "political and personal bonds to Mr. Mandela," notes the Times, "transcended their single face-to-face meeting." While they met only once, "the trajectories of the two leaders, who broke political and social barriers in their own countries, were destined to be connected, even if mostly from afar."

A Washington Post (12/6, Wilson, 4.28M) analysis also notes Mandela's influence on the President, reporting that as a sophomore at Occidental College, he helped "lead the student push for the Southern California college to divest from companies doing business in apartheid South Africa." Thirty-three years later, as President, he "memorialized Mandela from behind a podium far from those heady student-led strategy sessions at Occidental." The President "located the very start of his long walk to the Oval Office...in the inspiration set by Mandela."

An analysis in Politico (12/6, Epstein, 467K) notes that while the President looked to Mandela "for inspiration for more than three decades," most of that inspiration "happened from afar." When they met in Washington in 2005, "Mandela's career was near its end, and Obama's ascent just beginning," but "the moment made an impression on the former South African president, who kept a photo signed by the future U.S. president on his desk even

before Obama made it to the White House." However, Obama's election to the presidency "coincided with the decline in Mandela's health, and the two men were never able to build the kind of relationship they both might have hoped for."

Lawmakers React To Mandela's Death. Medill News Service (12/6, Ophory) reports on reactions from members of Congress to Mandela's death, noting that lawmakers including Senate Minority Leader McConnell, House Speaker Boehner, House Minority Leader Pelosi, and Sen. Patrick Leahy commented in statements and interviews about Mandela's leadership and personal presence, and offered their recollections of the former South African President. Politico (12/6, Gibson, 467K) publishes a similar story on the "outpouring of mourning and reflection on Capitol Hill."

President Clinton: Mandela Chose "Politics Of Inclusion." In a lengthy follow-up story, the CBS Evening News (12/5, story 9, 3:35, Pelley, 5.58M) spoke to former President Clinton about his relationship with Mandela. Asked about "Mandela's achievement," Clinton said, "He built a genuine multiracial democracy in South Africa. When he could have had a one party state and shut everybody else out. When he could have had the politics of resentment, he chose the politics of inclusion. It is the only thing that works it is the only thing that is working in American communities today."

Mandela Eulogized As An Influential Symbol Of Racial Reconciliation. There are extensive broadcast and print eulogies of Mandela this morning nearly all of which describe his rise from imprisoned anti-apartheid activist to the South African presidency, and examine his influence on his own country and the world.

In its lead story, ABC World News (12/5, lead story, 6:00, Sawyer, 7.43M) described Mandela as "the man who taught the modern world you can transform anger into hope" has died. ABC (Roberts) noted that "for the people of South Africa, Mandela's release" from a South African prison "ushered in a new era of hope and the end of apartheid." A separate ABC World News (12/5, story 5, 1:10, Stephanopoulos, 7.43M) story examined Mandela's influence on the entire world, noting that he "changed the world through power of example." In another story, ABC World News (12/5, story 4, 2:55, Muir, 7.43M) spoke with Christo Brand, Mandela's jailer on Robben Island, who "became his most unlikely friend."

NBC Nightly News (12/5, lead story, 0:55, Williams, 7.86M) reported in its lead story that South African President Jacob Zuma "went on live television and broke the sad news to his country." Zuma: "Fellow South Africans, our beloved Nelson Mandela, the founding president of our democratic nation, has departed." In a separate story, NBC Nightly News (12/5, story 3, 2:20, Williams, 7.86M) noted that Zuma "broke the news to the nation and broke the hearts of millions of South Africans," because while the news "was entirely predictable," given Mandela's age and failing health, "it was still incredibly painful." The CBS Evening News (12/5, lead story, 2:45, Patta, 5.58M) reported that there "is going to be a call for unprecedented mourning in South Africa."

AFP (12/6) reports that in his "somber statement," Zuma said, "Our people have lost a father. Although we knew that this day would come, nothing can diminish our sense of a profound and enduring loss." Zuma noted that Mandela's "tireless struggle for freedom earned him the respect of the world." Reuters (12/5) publishes the full text of Zuma's statement.

The Washington Post (12/6, Raghavan, Duke, 4.28M) reports that Mandela's "heroic life and towering moral stature made him one of history's most influential statesmen."

The New York Times (12/6, Keller, Subscription Publication, 9.61M) calls Mandela "an international emblem of dignity and forbearance."

The Wall Street Journal (12/6, A1, Wonacott, Subscription Publication, 5.91M) notes that he became a symbol of racial reconciliation around the world.

The AP (12/6, Torchia, Eliason) calls Mandela "a master of forgiveness," noting that after spending "nearly one-third of his life as a prisoner of apartheid," he "sought to win over its defeated guardians in a relatively peaceful transition of power that inspired the world."

USA Today (12/6, Welch, 5.82M) calls Mandela "a global symbol for the cause of human rights," whose struggle

against apartheid "earned him the Nobel Prize." USA today adds that his "charisma, stoic optimism and conciliation toward adversaries and oppressors established him as one of the world's most recognizable statesmen of the 20th century and a hero of South African democracy."

The Hill (12/6, Swanson, Shabad, 194K) reports that while Mandela is "deeply revered in the U.S. and internationally for bringing about a largely peaceful transformation of South Africa," for "much of his life he was a deeply controversial figure in the U.S. for his backing of violence to end apartheid."

The Los Angeles Times (12/6, Dixon, Drogin, Kraft, 3.07M) reports that Mandela was an "inspiration to millions of blacks seeking to end" apartheid long before his release from prison in 1990.

The Christian Science Monitor (12/6, Flood, 540K) reports that Africa "has lost its most important elder statesman, and someone whose moral stature and leadership were a powerful mover of history for more than five decades."

Mandela's Death Said To Leave South Africa Without Its "Moral Center." A separate story in the New York Times (12/6, Polgreen, Subscription Publication, 9.61M) reports that Mandela's death leaves South Africa "without its moral center at a time of growing dissatisfaction with the country's leaders." It comes "during a period of deep unease and painful self-examination for South Africa." Over the last 18 months, South Africa has faced "its most serious unrest since the end of apartheid, provoked by a wave of wildcat strikes by angry miners, a deadly response on the part of the police, a messy leadership struggle within the A.N.C. and the deepening fissures between South Africa's rulers and its impoverished masses."

The Wall Street Journal (12/6, McGroarty, Subscription Publication, 5.91M) reports that the ANC is divided over how to move South Africa forward. While some in the ANC favor Mandela's vision for nonracial society, others want to create a society that benefits those who were deprived.

USA Today (12/6, Wood, 5.82M) reports that according to John Kane-Berman, the head of the South African Institute of Race Relations, "there are enormous divisions within the ANC," and "the party could eventually split." Meanwhile, Mamphela Ramphele, who "launched a new political party, Agang, a Sotho word for 'Build.'" says "the ANC is corrupt and incompetent." he argues that the ANC "has failed miserably on education as only 30% of blacks obtain the qualifications for university admission." USA Today adds that the "most tangible alternative to the ANC" may be "the moderate Democratic Alliance headed by former investigative reporter Helen Zille," who "predicts the alliance will displace the ANC as the ruling party by 2019."

More Commentary. There is near-universal praise for Mandela on this morning's opinion pages. While there is some discussion of the problems facing South Africa since he left office, editorials, columns, and op-eds alike describe Mandela as one of the great leaders of the 20th Century. An editorial in the Washington Post (12/6, 4.28M) likens Mandela to Mohandas Gandhi and Martin Luther King Jr., who it describes as "leaders who had no real armies to speak of and who wielded little power in office but who helped create a new ethic through the power of their ideas and the example of their lives."

A Wall Street Journal (12/5, Subscription Publication, 5.91M) editorial notes Mandela's leftist politics but describes him as a wise leader who Africa and the world were lucky to have.

In an editorial, the New York Times (12/6, Subscription Publication, 9.61M) describes Mandela as "one of the most extraordinary liberation leaders Africa, or any other continent, ever produced." Noting that South Africa now faces "many challenging problems," the Times says solving them "will be up to a new generation of South African leaders," all of whom "owe a historic debt to Nelson Mandela."

A USA Today (12/5, 5.82M) editorial argues that Mandela should be listed alongside Franklin Roosevelt, Winston Churchill, Albert Einstein, Thomas Edison, Mohandas Gandhi, and Martin Luther King Jr., as a nominee "for greatest man of the 20th century." However, whether his "legacy can endure remains an open question." Since he left South Africa's presidency, the office "has been held by a succession of lackluster men, and so the deep problems left behind by apartheid have festered." USA Today notes that South Africa needs "another Mandela," but "such leaders are the rarest of things."

In an op-ed for the Huffington Post (12/3, Bush, 11.54M), former President George H.W. Bush praises Mandela as "one of the great moral leaders" during a "hopeful and transformative era of global change."

In an op-ed for the Washington Post (12/6, 4.28M), Paul Taylor, who served as The Post's bureau chief in South Africa from 1992 to 1995, writes that while Mandela's "saintly virtues" were "admirable," they "don't begin to explain his political genius." Taylor notes that Mandela was also "cunning, iron-willed, bull-headed, contemptuous – and more embittered than he let on," and adds that he "needed all of his traits...to engineer a political miracle: persuading a sitting government to negotiate its own abdication by yielding power to the very people it had ruthlessly oppressed."

In an op-ed for USA Today (12/5, Branson, 5.82M), author and journalist Louise Branson, who grew up in Idi Amin's Uganda, writes that the South African politicians "who have followed Mandela have not been in his mold – even as they have paid lip service to him." Branson notes that the ANC "is riven with rivalries and scandals" and South Africa "is a volatile, high-crime country." She argues that South Africans should "channel their grief" by working "to preserve the unique ways in which Mandela's life has shaped their country and its young narrative."

In an op-ed for the Wall Street Journal (12/6, Subscription Publication, 5.91M), Juan Williams, a political analyst for Fox News and a columnist for The Hill, recalls his interview with Mandela, noting that Mandela referred to some of his white prison guards as friends. Williams describes Mandela's ability to rise above racial divisions as his greatest gift to the world.

In an op-ed for the New York Times (12/6, Subscription Publication, 9.61M), Ghanaian President John Dramani Mahama praises Mandela's insistence on forgiveness after his release from prison, noting that his example "showed Africa that if we were to move beyond the divisiveness caused by colonization, and the pain of our self-inflicted wounds, compassion and forgiveness must play a role in governance."

In an op-ed for the New York Times (12/6, Subscription Publication, 9.61M), Zakes Mda, a professor of creative writing at Ohio University, recalls when Mandela and his father, who helped found the African National Congress Youth League, would debate African nationalism. Mda notes that Mandela "leaves a proud legacy of freedom and human rights, of tolerance and reconciliation," but laments the fact that "some of his compatriots are trampling on it."

NEGOTIATORS CLOSE TO "MODEST" BUDGET DEAL. The New York Times (12/6, Weisman, Subscription Publication, 9.61M) reports that House and Senate negotiators on Thursday "closed in" on a "modest" budget deal that could "break the cycle of fiscal crises and brinkmanship" that has "hampered the economic recovery" and tanked Congress' approval ratings. However, negotiators "encountered last-minute resistance from House Democratic leaders who said any deal should be accompanied by an extension of expiring unemployment benefits." However, it was not clear "how serious a threat the demand posed to a deal" that has been "largely worked out" by Senate Budget Chair Patty Murray and House Budget Chairman Paul Ryan.

On its front page, the Wall Street Journal (12/6, Hook, Subscription Publication, 5.91M) reports that the proposed two-year deal would see spending of about \$1 trillion over each of the next two years, splitting the difference between the House and the Senate. However, the precise details are not yet finalized. Those familiar with the talks say that the deal would not contain any serious changes, but would use targeted changes to offset some sequestration cuts.

Politico (12/6, Sherman, Bresnahan, 467K) reports that Ryan and Murray "are only a few billion dollars in budgetary savings away from a deal that would set spending levels and blunt the impact of across-the-board spending cuts for the next two years," but "hurdles remain." The two will "work through the weekend" to try and sort out the situation in time for action before the House adjourns on December 13. The plan would include no new taxes, but some increase in fees, such as those on airline tickets.

Bloomberg News (12/5, Przybyla, Cook, 1.91M) reports that the deal "is drawing protests from Democrats and also from groups including federal employees, who could contribute more to their pensions under the proposal, and airlines, which could face higher fees." Meanwhile, some Republicans are concerned that the deal "will replace spending cuts set in law with promises of future savings that might not be realized."

The AP (12/6, Taylor) also describes the potential deal as “modest” and warns that the “going is getting rougher.” In particular, the AP cites a pledge Thursday by House Minority Leader Pelosi to “withhold support from any compromise to ease across-the-board cuts until Republicans also agree to renew expiring unemployment benefits for America’s long-term jobless.”

However, The Hill (12/6, Lillis, 194K) reports that Pelosi on Thursday was “softening” her comments on jobless benefits. She said at her weekly press conference that the benefits should be part of the deal, but if they were not “it could also be considered as separate legislation.” Asked if she could back a budget without it, Pelosi said, “Within itself, yes. Except – but I do still want to see an unemployment bill.”

In another negative story, the Washington Post (12/6, Raum, 4.28M) reports that historically, bipartisan budget panels don’t have great records. Since the end of World War II, the Post reports, “more than a dozen high-profile bipartisan panels have convened to tackle the nation’s thorniest fiscal problems” but “seldom have their recommendations spurred congressional action.” While current negotiators “believe they may be able to reach some kind of deal,” history is “not on their side.”

Three Conservatives Push For Clean CR. Politico (12/6, Sherman, 467K) reports that three “well-respected” House Republicans, Reps. Jim Jordan, Mick Mulvaney, and Steve Scalise, are pushing the leadership “to pass a government funding bill at the low sequester level most in the GOP are trying to avoid.” They argue that Democrats “would prefer a government shutdown to voting for low spending mandated by law and that the minority would want a government shutdown to distract from Obamacare’s woes.”

THIRD-QUARTER GDP REVISED UPWARD TO 3.6% RATE. Bloomberg News (12/6, Stilwell, 1.91M) reports that the Commerce Department on Thursday issued its second look at third-quarter GDP growth, sharply revising it upward from an originally reported 2.8% rate to a 3.6% rate. That’s the “strongest since the first quarter of 2012,” and well above economists’ expectations of a 3.1% rate. The increase was driven by “the biggest increase in inventories since early 1998,” though consumer spending fell. Commerce will release its final look at Q3 GDP on December 20.

The New York Times (12/6, Schwartz, Subscription Publication, 9.61M) says the Q3 growth “marked the best quarter for growth since the first quarter of 2012, when output jumped by 3.7 percent,” and also “marked the first time since then that growth had exceeded 3 percent.” The Times says the improvement came primary from inventory growth “as well as a slightly improved trade picture.” However, the Times warns that inventory changes are “notoriously volatile,” and gains can “pull growth forward into the third quarter, causing fourth-quarter gains to slacken.”

USA Today (12/6, Mullaney, 5.82M) reports that the “revision to estimates of final demand – the value of goods and services people actually use now – fell slightly, to a 1.9% annual rate from 2.0% in the first estimate.” Inventories “added 1.68 percentage points to growth, the Commerce Department said, twice as much as first estimated.” USA Today says that economists “were divided in their reaction to the news.”

The Wall Street Journal (12/6, Morath, Subscription Publication, 5.91M) also warns that inventories are likely to rise at a slower pace or drop in the fourth quarter, potentially slowing economic growth. The Journal adds that forecasters from Macroeconomic Advisers expect Q4 growth to come in at a 1.4% rate.

Jobless Claims Down To Lowest Level In Months. Bloomberg News (12/6, Smialek, 1.91M) reports that new jobless claims fell 23,000 last week to 298,000 for the week ending November 30, according to new data released by the Department of Labor on Thursday. That’s the “lowest level in more than two months as the data becomes more difficult to adjust for seasonal variations during the year-end holiday period.” Economists surveyed by Bloomberg expected claims to come in at 320,000. The four-week moving average, which irons out week-to-week volatility, fell 322,250 to 333,000.

The AP (12/6, Boak) reports that claims are nearing a “six year-low” which shows “companies are laying off fewer workers.” Claims “have now fallen in seven of the past eight weeks, a hopeful sign for job growth at the end of the year.” Reuters (12/6) reports that a Labor analyst said that there were no special factors impacting the report, though estimates around the holidays are challenging.

Mortgage Rates Jumped This Week. Bloomberg News (12/6, Gopal, 1.91M) reports that mortgage rates rose to their highest level since September this week, according to new data from Freddie Mac, "as investors speculated that the Federal Reserve will slow bond purchases aimed at keeping borrowing costs down." The average rate on a 30-year fixed mortgage rose from 4.29% to 4.46%, while the rate on a 15-year note rose to 3.47% from 3.3%. Rates "have climbed from a near-record lows in May as the Fed weighs how soon it should scale back its stimulus."

Consumer Confidence Up Last Week. Bloomberg News (12/5, Woellert, 1.91M) reports that its Consumer Comfort Index rose to minus 31.3 for the four-week period ending December 1, from minus 33.7 the prior week. That's the highest level since October 6, "almost erasing declines caused by the 16-day partial federal government shutdown in October." Bloomberg says that an "improving job market and widespread discounting by retailers may be making lower-income households more upbeat at the start of the holiday-shopping season."

Stocks Continue To Decline. The Wall Street Journal (12/6, Dieterich, Subscription Publication, 5.91M) reports that stocks on Thursday fell for the fifth consecutive session because of concern that the positive economic news may nudge the Fed to begin tapering its stimulus earlier than expected. The Dow Jones Industrial Average fell 68.26 points to 15,821.51, while the S&P 500 fell 7.78 points to 1,785.03. the Nasdaq Composite Index, meanwhile, fell 4.84 points to 4,033.16.

Editorial Wrap-Up:

NEW YORK TIMES. "Nelson Mandela." In an editorial, the New York Times (12/6, Subscription Publication, 9.61M) describes Mandela as "one of the most extraordinary liberation leaders Africa, or any other continent, ever produced." Noting that South Africa now faces "many challenging problems," the Times says solving them "will be up to a new generation of South African leaders," all of whom "owe a historic debt to Nelson Mandela."

"Money To Fight Global Diseases." The New York Times (12/6, Subscription Publication, 9.61M) editorializes, "Donor nations have pledged \$12 billion over the next three years to a global fund that finances programs to curb three devastating infectious diseases in mostly poor or low-income countries." That "falls short of the \$15 billion goal set by the fund's leaders, but is nevertheless a vote of confidence in the programs at a time when many nations face fiscal constraints." However, "it was disappointing that other donors failed to pledge enough money to take full advantage of an offer by the United States, the largest single donor to the fund," to "contribute \$1 for every \$2 contributed by other donors."

"The De Blasio Team Takes Shape." The New York Times (12/6, Subscription Publication, 9.61M) says in an editorial that in NYPD commissioner nominee William Bratton and deputy mayor-designate Anthony Shorris, New York Mayor-elect Bill de Blasio, "who has promised a new vision for New York, has appointed two familiar, seasoned veterans to help him manage the nation's largest city government."

"Heroines At The Box Office."

WASHINGTON POST. "Remembering Mandela." An editorial in the Washington Post (12/6, 4.28M) likens Nelson Mandela to Mohandas Gandhi and Martin Luther King Jr., who it describes as "leaders who had no real armies to speak of and who wielded little power in office but who helped create a new ethic through the power of their ideas and the example of their lives."

"Christie's Broken Dream." In an editorial, the Washington Post (12/6, 4.28M) criticizes New Jersey Gov. Chris Christie for backing away from his support for "tuition equality" for illegal immigrants. His backing of the idea, the Post says, "was born Oct. 12 and lasted through his Nov. 5 reelection victory, when he managed to win just more than half the Hispanic vote." However, it "died abruptly on Nov. 25," as Christie moved beyond his reelection bid and toward "his preparations for the 2016 Republican primaries. On to Iowa!"

"Did The Police Do Their Job?" The Washington Post (12/6, 4.28M) editorializes that the ongoing investigation into the October 3 shooting of Miriam Carey by police should be conducted in a manner "most transparent to the public." The Post say whether there were non-lethal means of addressing Carey's actions, and whether better training could have helped police deal with her mental problems, are among the questions that must be publicly

shared.

WALL STREET JOURNAL. "Nelson Mandela." A Wall Street Journal (12/5, Subscription Publication, 5.91M) editorial notes Nelson Mandela's leftist politics but describes him as a wise leader that Africa and the world were lucky to have.

"Apple's Star Chamber." The Wall Street Journal (12/6, Subscription Publication, 5.91M) editorializes that the Justice Department's prosecution of antitrust charges against Apple has become particularly unfair. The appointment of a special prosecutor who is essentially re-investigating Apple, rather than monitoring its compliance with the court's judgment as it appeals the case, is a violation of the Constitution. Particularly objectionable is the special prosecutor's personal ties with the Federal district court judge overseeing the case and his lack of expertise in antitrust law. The article calls for the appeals court reviewing the judgment to remove the district court judge from the case.

"Britain's Laffer Curve." The Wall Street Journal (12/6, Subscription Publication, 5.91M) editorializes that Britain's reduction in its corporate tax rates has been offset by the additional revenue from extra investment and productivity gained from the tax rate reduction. The UK Treasury estimated that extra growth would enable the government to recoup 45 to 60 percent of the lost tax revenue. The article recommended that the Obama Administration pursue this rather than focusing on income redistribution.

"East Asian Blurred Lines."

PRESIDENT OBAMA – Receives the Presidential Daily Briefing, Oval Office, closed press; attends the National Christmas Tree Lighting on the Ellipse.

VICE PRESIDENT BIDEN – No public schedule.

US Senate: No public schedule.

US House: 10 a.m. OVERSIGHT AND GOVERNMENT REFORM – FIELD HEARING – Full committee hearing on “ObamaCare Implementation, The Broken Promise: If You Like Your Current Plan You Can Keep It.” Location: City Council Chambers, City of Apache Junction, AZ

Other: LANTOS PRIZE – HILLARY CLINTON – The Lantos Foundation for Human Rights and Justice awards the 2013 Lantos Human Rights Prize to former Secretary of State Hillary Rodham Clinton. Press who wish to cover the ceremony should contact Kate Ray at kate@rabinowitz.com or 202-265-3000.

WILSON CENTER – BIDEN IN ASIA – “Biden in Asia: Clearing the Air?” Introduction: Jane Harman, Director, President and CEO, The Wilson Center. Participants: Ambassador Jounyung Sun, Professor at the University of North Korean Studies, Seoul, and is also currently the Vice President and CEO of the United Nations Association for the Republic of Korea. Ambassador Sun served as Vice Minister of Foreign Affairs and Trade, Deputy Foreign Minister for Trade, and South Korea’s Ambassador to the United Nations, Switzerland, and Czechoslovakia; Dr. Yoshihide Soeya, Director of the Institute of East Asian Studies and Professor on the Faculty of Law at Keio University and Wilson Center Scholar, Professor Zheng Wang, School of Diplomacy and International Relations, Seton Hall University and former Wilson Center Scholar. Moderator: Robert Daly, Director, Kissinger Institute on China and the United States, The Wilson Center. Toll-Free Conference Line: 888 947 9018 (Domestic), Conference Line: 1-517 308 9006 (International), Passcode: 13304.

VETERANS CONFERENCE – Acting Deputy Secretary of Education Jim Shelton delivers remarks at National Conference of State Legislatures Fall Forum.

U.S.-RUSSIA BUSINESS COUNCIL BRIEFING – Briefing with RF Minister of Energy Alexander Novak hosted by Akin Gump Strauss Hauer & Feld LLP. Minister Novak will be in Washington, DC, for a meeting of the Bilateral

Presidential Commission's Energy Working Group and will update USRBC members on those meetings as well as the Russian government's outlook for the energy sector and its energy efficiency program in particular. Location: Robert S. Strauss Building, Tenth Floor 1333 New Hampshire Avenue, N.W. 2 p.m.

Last Laughs:

LATE NIGHT POLITICAL HUMOR.

Jimmy Kimmel: "The Washington Post has new details about the NSA and how they're monitoring us. The NSA collects almost five billion records a day that can pinpoint a cell phone anywhere in the world, track its movements and map the personal relationships of the person using it. This is interesting. I'll tell you what this means. You know the crazy people that wear the tinfoil hats because they think the government is tracking them? Turns out they were right."

Jimmy Kimmel: "Maybe I'm oversimplifying it but how is it possible that they can track every cell phone in the world but can't build a healthcare website. Maybe they should put the NSA in charge of Obamacare."

Conan O'Brien: "Funny story out of the White House. You probably heard about this. At a White House holiday party, the Obamas' dog, Sonny, reportedly knocked over a small child. Went up and knocked over a small child so although President Obama's approval rating is down to 40 percent, he's now number one on YouTube. The child is fine."

Conan O'Brien: "Earlier today, Vice President Joe Biden arrived in South Korea to talk to the people there. Yeah, first time ever people from South Korea have tried to sneak into North Korea."

U.S. Department of the Interior News Briefing for Monday, December 9, 2013

Bulletin Intelligence <Interior@bulletinintelligence.com>
To: Interior@bulletinintelligence.com

Mon, Dec 9, 2013 at 7:01 AM

U.S. DEPARTMENT OF THE INTERIOR NEWS BRIEFING

Mobile version and searchable archives available at interior.bulletinintelligence.com.

DATE: MONDAY, DECEMBER 9, 2013 7:00 AM EST

TODAY'S TABLE OF CONTENTS

DOI IN THE NEWS:

- + Secretary Jewell Announces Restoration Projects From BP Fund.
- + Obama Administration Provides Legal Protection To Wind-Power Industry Against Eagle Deaths.
- + Rep. Bishop Urges Secretary Jewell To Disregard Withdrawn Fracking Comments.
- + Senate Energy and Natural Resources Committee To Consider Interior Nominees.
- + Kwiáht Partners With Federal Conservation Service Initiative.
- + Additional Coverage: Green Groups Urge Agencies On Methane Emissions.
- + Sen. Bennet Calls For Commitment To Public Lands.

AMERICA'S GREAT OUTDOORS:

National Park Service:

- + Obama Lights National Christmas Tree.
- + Ceremony Marks Anniversary Of Pearl Harbor.
- + Continuing Coverage: Officials Cease Whale Rescue Efforts.
- + Man Accused Of Illegal River Dumping.
- + Hunter Who Sparked Rim Fire To Be Charged.
- + Cattle Ranchers Oppose Oglala Sioux Tribe's Plan For Bison Reserve.
- + NPS Extends Comment Period On Yellowstone Park Utility Plan.
- + Three Public Meetings To Be Held For Biscayne National Park's General Management Plan.
- + National Register Of Historic Places Protects Architectural Landmarks.
- + Tivadar And Dorothy Balogh House Added To National Register of Historic Places.
- + Additional Coverage Of Closure Of WW II Memorial.
- + Virginia Lawmaker Wants State To Reclaim Shenandoah.

Bureau of Land Management:

- + Access Limits at Horse Roundups Debated in 9th Circuit.
- + BLM Hosting Meetings On Monument Grazing, Sage Grouse.
- + Agencies Taking Comments On Sage Grouse.
- + BLM's Law Enforcement Rangers Handle Variety Of Issues.
- + Additional Coverage: Sen. Udall Supports Browns Canyon National Monument And Wilderness Act.
- + Additional Coverage Of Sen. Wyden's Forest Bill.
- + Proposal To Convert BLM Land Supported.

Fish and Wildlife Service:

- + Study Details Loss Of Ecologically-sensitive Wetlands.
- + Endangered Species Act Faces Threats.
- + Biologists Work To Conserve Pallid Sturgeon.

- + FWS Seeks Comments On Island Cattle Problem.
- + FWS Seeks Public Comment On Dunes Management.
- + World's Oldest Wild Bird Lays Another Egg.
- + Additional Coverage Of Proposal To Stop Protecting Gray Wolf.
- + FWS Criticized For Mismanagement.
- + Compassion Urged For Hawaii's Egrets And Owls.
- + Protection Urged For Wolves Of The Alexander Archipelago.

US Geological Survey:

- + Scientists Working To Solve Mystery Of Bird Botulism Outbreaks.
- + USGS Sending Instruments To Record Texas Quakes.

SECURING AMERICA'S ENERGY FUTURE:**Renewable Energy:**

- + Silverstein: Wind Tax Credit Increases Debate On Which Industries Should Get Energy Subsidies.
- + BOEM Decision Clears Virginia Agency For Offshore Study.
- + FWS Approves Wildlife Plan For West Virginia Wind Farm.

Onshore Energy Development:

- + Bill Would Charge \$5,000 To People Protesting Drilling On Public Lands.
- + BLM Working With BIA On Management Plan In McAlester Area.
- + Carter County Landowners File Lawsuit Against Pipeline Companies, Federal Agencies.
- + Natural Gas Boom Allowing Implementation Of Aggressive Policies.

Offshore Energy Development:

- + Energy Companies Critique Proposed Offshore Regulations.
- + Judge Suspends BP Oil Spill Settlement Payments To Businesses.
- + Federal Government Urged To Step Aside For Arctic Development.
- + Judge Denies Class Certification For BP Investors.
- + Additional Coverage Of Settlement With BOEM Scientist.
- + Additional Coverage Of BP Efforts To Expand Deep Water Drilling.
- + Additional Coverage Of Researchers To Study Environmental Monitoring Of Gulf.

TACKLING AMERICA'S WATER CHALLENGES:

- + Delta Water Tunnel Project Needs \$1.2 Billion More For Planning.
- + Imperial Valley Agencies Develop Plan To Save Salton Sea.
- + BOR To Lower Lake Havasu's Water Level For Parker Dam Work.
- + Additional Coverage: BOR Study Enlarging San Luis Reservoir.

EMPOWERING NATIVE AMERICAN COMMUNITIES:

- + Additional Coverage Of Indian Law And Order Commission's Criticism of Alaska.
- + Additional Coverage Of Hearing On Mashpee Wampanoag Tribe's Proposed Casino.

TOP NATIONAL NEWS:

- + Proposed Budget Deal Would Raise Spending From Sequester-Imposed Levels.
- + Reid Pushes For Votes On Obama Nominees In Final Weeks Of Senate Session.
- + Fed Officials In No Hurry To Scale Back Bond-Buying Program.

EDITORIAL WRAP-UP:

- + New York Times.
- + Washington Post.
- + Wall Street Journal.

BIG PICTURE:

- + Headlines From Today's Front Pages.

WASHINGTON SCHEDULE:

+ Today's Events In Washington.

LAST LAUGHS:

+ Late Night Political Humor.

DOI in the News:

SECRETARY JEWELL ANNOUNCES RESTORATION PROJECTS FROM BP FUND. The [AP](#) (12/6, McConnaughey, Press, 17.91M) reports that Interior Secretary Sally Jewell announced the latest round of projects aimed at restoring the coast after 2010's Gulf oil spill last Friday at Jean Lafitte National Park. Jewell said that "from coastal resiliency is important to President Barack Obama's climate action plan." Jewell said, "The Gulf of Mexico watershed is a large and diverse landscape that is critical to our nation's culture, economy and environment. Today's announcement is an important step as we work to not only restore the natural resources that were impacted by the Deepwater Horizon oil spill, but to also build back the resiliency of the region." The funds for the "44 projects is coming from a \$1 billion fund BP created in 2011."

The [Houma \(LA\) Courier](#) (12/6, 48K) reports that "about \$340 million worth of work, much of it to restore barrier islands off the Terrebonne and Lafourche coasts, is included in the latest round of projects aimed at restoring the coast after 2010's Gulf oil spill." According to the article, "if all 44 projects win final approval, about \$300 million would remain in the fund set up as a down payment to help the Gulf." Sen. Mary Landrieu, said, "With this \$340 million, we will make important progress in restoring our coast and bringing justice to the Gulf after the Deepwater Horizon disaster. By investing in barrier island restoration and fish hatcheries, we are helping to protect our communities, while restoring and preserving our fisheries that are so important to our local economies."

The [Baton Rouge \(LA\) Advocate](#) (12/8, 24K) reports that "a 60-day comment period is now open on proposals to spend coastal restoration money from BP on four barrier island restoration projects and two fishery research stations in Louisiana." The article notes that "praise for the announcement poured in from elected officials as well as representatives from a number of nonprofit organizations focused on coastal Louisiana, including the National Wildlife Federation, Environmental Defense Fund, National Audubon Society, Lake Pontchartrain Basin Foundation, Coalition to Restore Coastal Louisiana and US Sen. Mary Landrieu, D-La."

Additional coverage was provided by the [Alabama Live](#) (12/8, 75K) and the [Biloxi \(MS\) Sun Herald](#) (12/6, 154K).

Environmental Assessment Released. The [New Orleans Times-Picayune](#) (12/8, 700K) reports that Jewell also announced the findings of "a comprehensive environmental assessment" on "the extensive damage caused by the BP Deepwater Horizon oil spill and the ensuing cleanup efforts to natural resources along the shoreline and in deepwater habitats of the Gulf of Mexico." According to the article, "the report cites studies showing continued problems with growing oysters in both Louisiana waters, where freshwater diversions designed to keep oil out of wetlands killed oyster beds, and elsewhere along the Gulf Coast, which may be linked to toxic chemicals associated with the BP oil," and "it also recounts concerns about the deaths of hundreds of bottlenosed dolphins, thousands of sea turtles and migratory waterfowl – plus potential reproductive problems for these species." The report also illustrates "concerns about tiny organisms living in deep water in the Gulf, and the possible effects of their loss on commercial fisheries, while also raising questions about the future of deepwater coral reefs and bottom-loving organisms close to the site of the BP Macondo well 50 miles off Louisiana's coast."

Also providing coverage are the [Bayou Buzz \(LA\)](#) (12/8, 4K) and [Al Jazeera America](#) (12/8, 79K).

Additional Coverage. Additional coverage was provided by the [New Orleans Times-Picayune](#) (12/8, 700K), [WWL-TV New Orleans](#) (12/8, 107K). AP coverage was picked up by the [Huffington Post](#) (12/6, McConnaughey, 11.54M), the [Denver Post](#) (12/8, McConnaughey, Press, 949K), the [Anchorage \(AK\) Daily News](#) (12/6, 198K), the [Bradenton \(FL\) Herald](#) (12/6, 143K), the [York \(SC\) Enquirer-Herald](#) (12/6, 18K), the [Washington County \(FL\) News](#) (12/8, 11K), and [WFLX-TV West Palm Beach, FL](#) (12/8, 2K).

OBAMA ADMINISTRATION PROVIDES LEGAL PROTECTION TO WIND-POWER INDUSTRY AGAINST EAGLE DEATHS. The AP (12/7, Cappiello, 4.28M) reported that, while facing pressure from the wind-power

industry, the Obama Administration said Friday that "it will allow companies to kill or injure eagles without the fear of prosecution for up to three decades." According to the new rule, companies that own wind farms and other projects will get legal protection in exchange for obtaining permits and making efforts to avoid killing protected birds. The AP noted that this is another example that highlights "Obama's willingness to accept environmental trade-offs — pollution, loss of conservation land and the deaths of eagles — in hopes that green energy will help fight climate change."

Bloomberg News (12/7, Doom, 1.91M) reported that the "permits are subject to review every five years, the maximum length previously allowed by a 2009 decision." Bloomberg News added that the "fee to apply for a permit is \$36,000, with each five-year review costing \$2,600."

The Los Angeles Times (12/7, Li, 3.07M) reported that Interior Secretary Sally Jewell said in a statement that "the permitting change will 'help the renewable energy industry and others develop projects that can operate in a longer term, while ensuring bald and golden eagles continue to thrive.'" The Interior Department added that "all permits will be closely monitored to ensure that allowable take numbers are not exceeded...and that conservation measures are in place and effective over the life of the permit."

The Hill (12/7, Hattem, 194K) reported in its "Regwatch" blog that the American Wind Energy Association said in a statement that "by undertaking these efforts it is expected that the permit program will provide for the long-term conservation of eagle populations by not only addressing the permitted activity but also the impacts of others already occurring in the landscape today." However, David Yarnold, president of the National Audubon Society, disagreed and said in a statement that the Administration "wrote the wind industry a blank check." Yarnold also "indicated that a court challenge court be in the works." The Wall Street Journal (12/7, Berzon, Subscription Publication, 5.91M) provided similar coverage on the topic.

Additional Coverage. Additional coverage was provided by the Washington Post (12/6, Bernstein, 4.28M), the Wall Street Journal (12/6, Subscription Publication, 5.91M), the Los Angeles Times (12/7, Ganga, 3.07M), the Washington Times (12/6, Dinan, 417K), CBS News (12/8, 3.87M), the National Journal (12/8, Subscription Publication, 427K), Reuters (12/6, Krasny), the Casper (WY) Star-Tribune (12/8, 90K), the Allentown (PA) Morning Call (12/6, 247K), the Keene (NH) Sentinel (12/8, 24K), the Lexington (KY) Herald-Leader (12/6, 320K), the Bellingham (WA) Herald (12/8, 113K), The Chattanooga (12/8, 17K), the Daily Caller (12/6, Bastasch, 422K), the SNL Financial (12/8, 22K), the Power Line (12/8, 37K), the Las Vegas Guardian Express (12/8, 64K), and KCET-TV Los Angeles (12/8, 15K).

AP coverage was picked up by USA Today (12/6, Cappiello, 5.82M), the Christian Science Monitor (12/6, Cappiello, 540K), Time (12/6, 13.4M), the Boston Globe (12/6, Cappiello, 1.75M), the Atlanta Journal-Constitution (12/8, 1.26M), the Philly (12/8, 1.22M), the Greenfield (IN) Daily Reporter (12/8, 31K), the Atlanta Journal-Constitution (12/8, 1.26M), the Tennessean (12/7, 417K), and WJBK-TV Detroit (12/8, 83K).

REP. BISHOP URGES SECRETARY JEWELL TO DISREGARD WITHDRAWN FRACKING COMMENTS. The Hill (12/7, Barron-Lopez, 194K) reported that Rep. Rob Bishop (R-UT) is urging Interior Secretary Jewell "not to consider withdrawn comments about US natural-gas development as it completes final regulations on hydraulic fracturing." The Hill reported that Bishop's request stems from a letter he received last month from National Park Service Director Jonathan Jarvis "asking for the withdrawal of comments the department made expressing doubts about whether natural-gas development can help fight climate change."

Also providing coverage are the National Journal (12/8, Subscription Publication, 427K), the Environment & Energy Publishing (12/8, 705), and the Ogden (UT) Standard-Examiner (12/3, 147K).

SENATE ENERGY AND NATURAL RESOURCES COMMITTEE TO CONSIDER INTERIOR NOMINEES. Politico (12/8, Guillen, 467K) reports that the Senate Energy and Natural Resources Committee has "announced plans to consider seven nominees for posts at the Energy and Interior departments next Thursday." The three Interior nominees are Esther Kia'aina to be an assistant secretary for insular areas, Rhea Suh to be assistant secretary of fish and wildlife and Tommy Beaudreau as assistant secretary for policy, management and budget.

KWIAHT PARTNERS WITH FEDERAL CONSERVATION SERVICE INITIATIVE. The San Juan (WA) Islander (12/8, 418) reports that the Department of the Interior and Department of Agriculture have announced that "Kwiaht

is one of 91 organizations nationwide approved so far to help implement the Obama Administration's 21st Century Conservation Service Corps (21CSC)." Kwiáht director Russel Barsh welcomed the announcement as "a breakthrough in our efforts to bring island youth and Tribal youth together to protect and enhance the new National Monument and other federal lands, shorelines, and small islands in the San Juan archipelago."

ADDITIONAL COVERAGE: GREEN GROUPS URGE AGENCIES ON METHANE EMISSIONS. Additional coverage of the pressure exerted by green groups on the Interior Department and the EPA to regulate methane emissions from oil and gas industry operations was provided by the "E2 Wire" blog of [The Hill](#) (12/6, Barron-Lopez, 194K), the [Fort Worth \(TX\) Business Press](#) (12/8, 889), and the [Pagosa \(CO\) Daily Post](#) (12/8).

SEN. BENNET CALLS FOR COMMITMENT TO PUBLIC LANDS. In an op-ed for the [Fort Collins \(CO\) Coloradoan](#) (12/7, Bennet, 85K), Sen. Michael Bennet writes that "maintaining access to quality places to play outside is critical to Colorado's economy, fundamental to recruiting employers, and at the heart of healthy and productive communities." He notes that in a recent speech, Interior Secretary Sally Jewell "stressed that these lands are powerful economic engines," and "in 2011 alone, the US Fish and Wildlife Service estimates that Americans spent a total of \$144.7 billion on wildlife-related activities, including hunting and fishing."

America's Great Outdoors:

National Park Service:

OBAMA LIGHTS NATIONAL CHRISTMAS TREE. The AP (12/7) reports the Obama family appeared at the National Christmas Tree lighting Friday evening, "giving an otherwise dreary day in the nation's capital a festive and seasonal spirit." President Obama "acknowledged the cold and rainy weather and proposed an abbreviated countdown before flipping on the lights. 'We're going to start at 5; since it's little wet we shouldn't start at 10,' he said."

CNN (12/7, 14.53M) says on its website that the President "wished onlookers a Merry Christmas and holiday season on behalf of the first family." He said, "In this season of hope, let us come together as one people, one family to ensure that we are doing everything we can to keep America the land of endless opportunity and boundless optimism for which we are so thankful."

The Hill (12/7, Trujillo, 194K) says "a total of 3,000 seated tickets and 14,000 standing tickets were given away for the event in a lottery in October. Many of the guests wore ponchos to protect against the rain and wind."

ABC World News (12/8, 111) ran a feature on the lighting of the National Christmas Tree Friday night by President Obama, with "his growing daughters by his side." The segment looked back on the history of the tree-lighting tradition.

CEREMONY MARKS ANNIVERSARY OF PEARL HARBOR. NBC Nightly News (12/7, story 6, 0:20, Holt, 7.86M) reported, "In Hawaii thousands gathered on the anniversary of the Japanese attack on Pearl Harbor. It happened 72 years ago today, the event that launched the United States into World War II. Among those attending today's ceremonies were 50 survivors of the attack that killed more than 2,400 Americans on that early morning in Hawaii."

ABC World News (12/7, story 10, 0:25, Muir, 7.43M) reported, "Now to our 'Instant Index' tonight. What's trending this Saturday. And we take note here of the anniversary of the attack on Pearl Harbor. Seventy-two years ago the Japanese air assault on that port in Hawaii, taking the lives of 2,400 American servicemen. Today visitors watched an aerial show of vintage World War II planes, among them some 50 survivors from that fateful day."

The Washington Post (12/8, Press, 4.28M) reports that the Navy and NPS "co-hosted the ceremony, which was open to the public."

KXL-FM Portland, OR (12/8, 8K) reports that Rhea Suh, Interior Department assistant secretary, told the crowd, "Let us remember that this is where it all began. Let us remember that the arc of history was bent at this place

71 years ago today and a generation of young men and women reached deep and rose up to lead our nation to victory. Let us remember and be forever grateful for all of their sacrifices."

Additional coverage was provided by the Los Angeles Times (12/7, Press, 3.07M), the Los Angeles Times (12/8, 3.07M), and the Tennessean (12/7, 417K). AP coverage was picked up by the Washington Post (12/8, Press, 4.28M), the Boston Globe (12/8, Mcavoy, 1.75M), the Boston Herald (12/8, 643K), the Chicago Sun-Times (12/8, Mcavoy, 1.15M), the Denver Post (12/8, Mcavoy, 949K), the Detroit Free Press (12/8, Mcavoy, 794K), the Richmond (VA) Times-Dispatch (12/8, 333K), WJBK-TV Detroit (12/8, 83K), WJLA-TV Washington (12/8, 118K), WRC-TV Washington (12/8, 291K), and WJBK-TV Detroit (12/8, 83K).

CONTINUING COVERAGE: OFFICIALS CEASE WHALE RESCUE EFFORTS. The Washington Post (12/8, Press, 4.28M) reports that "wildlife officials say that after losing sight of a pod of whales that was stranded in the Everglades, they are ceasing rescue efforts." The NPS said "aerial and boat survey teams could not locate the whales Saturday, a potentially encouraging sign that they have moved farther offshore." According to the article, "while authorities are hopeful the whales are headed back to the deeper, colder waters that form their natural habitat, they cannot say for sure."

Additional coverage was provided by CNN (12/8, 14.53M), USA Today (12/7, Mongilio, Atteberry, 5.82M), Time (12/6, 13.4M), the Los Angeles Times (12/6, Karamangla, 3.07M), the Los Angeles Times (12/5, Karamangla, 3.07M), the Chicago Tribune (12/6, Clark, 2.32M), the Boston Herald (12/8, 643K), WRC-TV Washington (12/8, 291K), and WUSA-TV Washington (12/8, 95K).

AP coverage was picked up by the Columbus (IN) Republic (12/8, 80K), Yahoo! (12/6, Armario, 17.91M), the Miami Herald (12/8, Press, 806K), the Denver Post (12/8, Press, 949K), and the Tampa Bay (FL) Times (12/8, 78K).

MAN ACCUSED OF ILLEGAL RIVER DUMPING. The Washington Post (12/6, 4.28M) reports that a government contractor is accused of dumping waste into the Potomac River from Hains Point when his company was contracted with the NPS to clean the National Mall's storm water sewer system. According to the US Attorney for the District of Columbia, Patrick Brightwell, 47, was arrested and indicted on eight counts including "conspiracy, false claims, obstructing an investigation and a Clean Water Act violation."

Also reporting on the story are the DCist (12/8, 21K), the Gothamist (12/8, 145K), the Breitbart (12/6, 255K), WUSA-TV Washington (12/8, 95K), and WJLA-TV Washington (12/8, 118K).

HUNTER WHO SPARKED RIM FIRE TO BE CHARGED. The Los Angeles Times (12/7, Serna, 3.07M) reports that "a Tuolumne County official said this week that federal prosecutors have 'privately declared' their intention to charge a hunter who earlier this year sparked the Rim fire." Tuolumne County District Atty. Michael Knowles said, "Federal prosecutors have privately declared an intention to prosecute."

CATTLE RANCHERS OPPOSE OGLALA SIOUX TRIBE'S PLAN FOR BISON RESERVE. The Seattle Post-Intelligencer (12/8, 768K) reports that "some cattle ranchers on the Pine Ridge Indian Reservation in southwestern South Dakota are fighting plans for a large bison reserve being pursued by the Oglala Sioux Tribe." The tribe and NPS are "working on making the South Unit of Badlands National Park into the nation's first tribal national park." The article notes that "the plan includes the return of bison to the park and the end of cattle grazing on leased land and some private land, which could be condemned." According to the article, "ranchers who rely on the federal Bureau of Indian Affairs and Oglala Sioux Tribe grazing permits were recently notified that their leases will expire in October 2015."

NPS EXTENDS COMMENT PERIOD ON YELLOWSTONE PARK UTILITY PLAN. The Missoulian (12/8, 104K) reports that the NPS has extended the comment period on a plan to improve the electrical power distribution system in Yellowstone National Park. The comment period was extended for an additional 15 days until Dec. 21.

Also reporting on the story is the Ravalli (MT) Republic (12/8, 19K).

THREE PUBLIC MEETINGS TO BE HELD FOR BISCAYNE NATIONAL PARK'S GENERAL MANAGEMENT PLAN. The Miami Herald (12/8, Sue Cocking Scocking@, miamiherald.com, 806K) reports that "three public

hearings will be held this week on the revised draft alternatives for Biscayne National Park's general management plan."

Also providing coverage are the [Los Angeles Times](#) (12/3, Fleshler, 3.07M) and the [Key West \(FL\) Keynoter](#) (12/7, 34K).

NATIONAL REGISTER OF HISTORIC PLACES PROTECTS ARCHITECTURAL LANDMARKS. The [Boston Globe](#) (12/8, Graham, 1.75M) reports on "struggle to predict — and preserve — the architectural landmarks of tomorrow." According to the article, "for most buildings, the best shot at success may simply be to survive their first half century." The article notes that the National Register of Historic Places "generally allows only properties more than 50 years old, although it makes exceptions for structures of 'exceptional importance.'"

TIVADAR AND DOROTHY BALOGH HOUSE ADDED TO NATIONAL REGISTER OF HISTORIC PLACES. The [Livonia \(MI\) Observer & Eccentric](#) (12/8, 62K) reports that the Tivadar and Dorothy Balogh House has been added to the National Register of Historic Places.

ADDITIONAL COVERAGE OF CLOSURE OF WW II MEMORIAL. Additional coverage of the closure of Washington's World War II memorial was provided by the [Miami Herald](#) (12/6, Bureau, 806K), the [Kansas City \(MO\) Star](#) (12/6, Lightman, 95K), and the [Pittsburgh Tribune-Review](#) (12/8, 636K).

VIRGINIA LAWMAKER WANTS STATE TO RECLAIM SHENANDOAH. In an op-ed for the [Roanoke \(VA\) Times](#) (12/8, 259K), Bob Marshall, a Republican member of the Virginia House of Delegates, argues that "our national parks should not be used as political weapons to be turned against citizens by a president eager to win a budget fight with Congress." For this reason, Marshall has introduced House Bill 16, which "would create a commission to evaluate the possibility of bringing the Shenandoah National Park back under Virginia's control."

Bureau of Land Management:

ACCESS LIMITS AT HORSE ROUNDUPS DEBATED IN 9TH CIRCUIT. The [Courthouse News](#) (12/6, 7K) reports that "a reporter urged the 9th Circuit to revive her claims that her First Amendment rights were trampled during a 2010 federal roundup of wild horses on public land." The article notes that "it was the second time Laura Leigh, a photojournalist and wild horse advocate, appeared before the federal appeals court in support of her suit concerning the Bureau of Land Management's September 2010 roundup of some 500 wild horses at the Silver King Herd Management Area in Lincoln County, Nev."

BLM HOSTING MEETINGS ON MONUMENT GRAZING, SAGE GROUSE. The [Salt Lake \(UT\) Tribune](#) (12/8, 343K) reports that the BLM will host "a string of scoping meetings in coming days on its latest attempt to develop a grazing plan for southern Utah's Grand Staircase-Escalante National Monument." Also, "on the issue of greater sage grouse conservation, the BLM is staging another series of information meetings, all set from 5:30 to 7:30 p.m., this week in northern Utah, starting Tuesday at the Salt Lake City Main Library."

AGENCIES TAKING COMMENTS ON SAGE GROUSE. The [Twin Falls \(ID\) Times-News](#) (12/8, 56K) reports that in November, the BLM and US Forest Service picked Gov. C.L. "Butch" Otter's "collaborative proposal as one of the two preferred alternatives in a draft analysis to better protect sage grouse." The agencies also chose "their own proposal, which was drawn up in 2011," and "they plan to pick the best suggestions out of both plans and combine them into the final proposal." The article notes that "public meetings will begin at the start of January, including one in Twin Falls on Jan. 14."

BLM'S LAW ENFORCEMENT RANGERS HANDLE VARIETY OF ISSUES. The [Imperial \(CA\) Valley Press](#) (12/8, 46K) reports on the variety of issues handled by the BLM's El Centro field office. In any year, the bureau's law enforcement rangers may "handle hundreds of thousands of dunes visitors, drug or human smugglers coming from Mexico, or even people trying to harm the natural resources of our public lands."

ADDITIONAL COVERAGE: SEN. UDALL SUPPORTS BROWNS CANYON NATIONAL MONUMENT AND WILDERNESS ACT. Additional coverage of Sen. Udall's support of the Browns Canyon National Monument and Wilderness Act was provided by the [Pueblo \(CO\) Chieftain](#) (12/8, 94K) and the [High Country \(CO\) News](#) (12/8,

74K).

ADDITIONAL COVERAGE OF SEN. WYDEN'S FOREST BILL. Additional coverage of Sen. Ron Wyden's forest bill was provided by the [Salem \(OR\) Statesman Journal](#) (12/8, 104K).

PROPOSAL TO CONVERT BLM LAND SUPPORTED. The [Albuquerque \(NM\) Journal](#) (12/8, 288K) editorializes that "a proposed new source of money for education in New Mexico not only has merit on its own but would help protect the state's Land Grant Permanent Fund as a source of future funding." The paper supports New Mexico Land Commissioner Ray Powell's suggestion that "the state ask the federal government to give it some" of the BLM's "estimated 1 million acres of land in New Mexico that don't fit within the agency's mission, or reach some other mutually beneficial arrangement."

Fish and Wildlife Service:

STUDY DETAILS LOSS OF ECOLOGICALLY-SENSITIVE WETLANDS. The [Washington Post](#) (12/9, Fears, 4.28M) reports that "over a four-year span, the United States lost more than 360,000 acres of freshwater and saltwater wetlands to fierce storms, sea-level rise and booming development along the coasts," according to a newly released federal study funded by the FWS, the National Oceanic and Atmospheric Administration and the EPA. The article notes that "the disappearance of so much grass and forest marsh on the edge of waterways is a disturbing sign that government projects to restore wetlands are failing to keep pace, environmentalists said, as storms intensify, the sea level creeps up and development paves the way for rising coastal populations." Although "the starkest decline was in the Gulf, which was roiled by several massive hurricanes, including Katrina, Rita and Ike," the study found that "human development was a major factor, especially in places such as coastal North Carolina on the Atlantic Coast, where a development boom is sending storm-water runoff cascading into wetlands that cannot handle it."

ENDANGERED SPECIES ACT FACES THREATS. The [Hampton Roads \(VA\) Virginian Pilot](#) (12/8, 422K) reports that the Endangered Species Act, which "turns 40 years old this month," faces "threats to its survival from a partisan Congress, even while being hailed for bringing back from the brink of extinction many familiar animals." In the fall issue of Fish and Wildlife News, FWS Director Daniel M. Ashe, , wrote of the Endangered Species Act: "We have seen it succeed and we have seen it fail. It has worked miracles, like restoring the California condor to western skies. But we have also seen the dusky seaside sparrow vanish from the landscape, the coastal marshes of Florida forever silent of their song. The James Hole pupfish and Delta smelt may be soon to follow. ... If we want Canada lynx, if we want bull trout, if we want grizzlies or sage-grouse, then we have to make deliberate choices to make a place for them in the world."

BIOLOGISTS WORK TO CONSERVE PALLID STURGEON. The [San Francisco Chronicle](#) (12/8, Veit, 2.88M) reports on the decline of the pallid sturgeon, which is "attributed to man-made modifications of its habitat through river channeling and damming" by the FWS. Fish biologists are working to "ensure the endangered pallid sturgeon is here to stay."

FWS SEEKS COMMENTS ON ISLAND CATTLE PROBLEM. The [Alaska Dispatch](#) (12/6, 7K) reports that the FWS is "soliciting proposals for coping with approximately 800 unattended cattle free to roam on Chirikof Island and about 200 more on Wosnesenski Island." The article notes that "the scoping process kicked off" by the agency will "include open houses in Homer and Kodiak." The FWS has "set a Jan. 31 deadline for cattle-solution suggestions that will get further review as the environmental studies proceed."

FWS SEEKS PUBLIC COMMENT ON DUNES MANAGEMENT. The [Santa Maria \(CA\) Times](#) (12/8, 40K) reports that the FWS will "host public information meetings in Grover Beach and Guadalupe to gather ideas and suggestions from the public concerning future management of Guadalupe-Nipomo Dunes National Wildlife Refuge."

WORLD'S OLDEST WILD BIRD LAYS ANOTHER EGG. The [Washington Post](#) (12/6, 4.28M) reports that Wisdom, "a 63-year-old albatross," has produced "yet another egg to the amazement of scientists." The bird was "captured on video laying an egg at the Midway Atoll National Wildlife Refuge on Nov. 29, exactly a year and a day after laying the last one."

ADDITIONAL COVERAGE OF PROPOSAL TO STOP PROTECTING GRAY WOLF. Additional coverage of the proposal to remove the gray wolf from the federal endangered species list was provided by the USA Today (12/8, Chebium, 5.82M).

FWS CRITICIZED FOR MISMANAGEMENT. In an op-ed critical of the FWS for the Las Vegas Review-Journal (12/8, 437K), David McDaniel, a retired biologist with the FWS and past chief of its National Fish Hatchery Program, writes that the program to save the Devil's Hole pupfish has cost many millions of dollars, while population of the endangered animal has dropped from a high of 544 fish to a recent low of 35. Meanwhile, he notes that FWS hatcheries are being threatened with closure because of budget problems.

COMPASSION URGED FOR HAWAII'S EGRETS AND OWLS. For "The Blog" of the Huffington Post (12/6, Singer, 11.54M), Sydney Ross Singer, Director, Institute for the Study of Culturogenic Disease, writes that "the unintended consequences of" releasing cattle egrets and barn owls as biocontrol agents to manage agricultural pests have "come back to roost, with the growing populations of barn owls and cattle egrets allegedly becoming a threat to endangered native birds." Now, the federal government is "proposing rule changes to make it permanent open season on cattle egrets and barn owls in Hawaii." Singer urges showing "compassion, concern, and empathy for helpless birds whose sole crime is that their introduction was successful."

PROTECTION URGED FOR WOLVES OF THE ALEXANDER ARCHIPELAGO. In an op-ed for the Anchorage (AK) Daily News (12/6, Noblin, 198K), Rebecca Noblin, a staff attorney and Alaska Director for the Center for Biological Diversity, writes that "as we approach the 40th anniversary of the Endangered Species Act next month, the ongoing threat of logging and road-building to the ever-more fragile status of Alexander Archipelago wolves is a stark reminder of the irreplaceable role the Act has played in protecting our nation's most imperiled plants and animals and the ecosystems we share with them." She argues that "it's clear the Archipelago Alexander wolf now needs the help only the Endangered Species Act can provide."

US Geological Survey:

SCIENTISTS WORKING TO SOLVE MYSTERY OF BIRD BOTULISM OUTBREAKS. The Washington Post (12/8, Press, 4.28M) reports that scientists, "using time-tested methods and new technologies," are "coming closer to solving the mystery" of the dead waterfowl at Great Lakes beaches. According to the article, Florida Atlantic University "recently reported progress in a first-of-its-kind effort to determine the paths of birds that washed onto beaches after dying in open water." Meanwhile, several USGS labs are "studying waterfowl distribution and sampling sediments collected from Great Lakes bottomlands, hoping to pinpoint where the toxin is produced."

Additional coverage was provided by the Wall Street Journal (12/9, Subscription Publication, 5.91M).

USGS SENDING INSTRUMENTS TO RECORD TEXAS QUAKES. The Environment & Energy Publishing (12/8, 705) reports that the USGS is "sending four seismic recorders to Texas to record activity in an area where local leaders worry that drilling processes are causing earthquakes." According to Bill Leith, senior science adviser for earthquake and geologic hazards at USGS, "the portable recorders are to be deployed around the town of Azle by scientists from Southern Methodist University."

Securing America's Energy Future:

Renewable Energy:

SILVERSTEIN: WIND TAX CREDIT INCREASES DEBATE ON WHICH INDUSTRIES SHOULD GET ENERGY SUBSIDIES. Ken Silverstein wrote in his Forbes (12/7, 6.03M) column that that the production tax credit given to the wind industry, which may possibly expire and not get renewed before the end of the year, "is now fanning the flames on all government largess and specifically which industries are the most worthy of getting the added incentives." Silverstein wrote that the wind industry believes that it is worth the subsidies, adding that it has created thousands of jobs. Meanwhile, "American Energy Alliance, which represents fossil fuel interests, counters that thinking by saying that oil, natural gas and coal power far more of the economy than green energy."

Silverstein concluded his column by writing that “while the United States government must watch what it spends, it has to continually invest in promising technologies — ideas that could increase energy independence in a cleaner fashion.”

BOEM DECISION CLEARS VIRGINIA AGENCY FOR OFFSHORE STUDY. The Richmond (VA) Times-Dispatch (12/7, 333K) reports that the BOEM has said there is no competitive interest in an area off the coast of Virginia where the state’s Department of Mines, Minerals and Energy has proposed building and operating a 12-MW wind farm under a research lease with the federal government. The lack of competitive interest allows the BOEM to find a “determination of no competitive interest.”

Also providing coverage are the SNL Financial (12/8, Copley, 22K), the Law 360 (12/8, 18K), and WCAV-TV Charlottesville, VA (12/8, 1K). AP coverage was picked up by Yahoo! (12/6, 17.91M).

FWS APPROVES WILDLIFE PLAN FOR WEST VIRGINIA WIND FARM. The AP (12/8) reports that the FWS has “approved a permit allowing the killing of endangered bats by turbines at a West Virginia wind farm.” The agency “says the ‘incidental take’ permit includes a habitat conservation plan to minimize the wind farm’s effect on endangered wildlife.”

Also providing coverage is the Charleston (WV) Gazette (12/8, 154K).

Onshore Energy Development:

BILL WOULD CHARGE \$5,000 TO PEOPLE PROTESTING DRILLING ON PUBLIC LANDS. The Denver Post (12/7, Sherry, 949K) reports that a proposal by Rep. Doug Lamborn would charge \$5,000 for those seeking to protest oil and gas leases on public lands. The “Federal Lands Jobs and Energy Security Act of 2013” was included in batch of land bills that passed the US House of Representatives before Thanksgiving. Kathleen Sgamma, vice president of the Western Energy Alliance, said, “Obviously, it’s going nowhere in the Senate. But as this concept gets refined in the future, there could be ways of adding provisions to waive it in some cases.”

BLM WORKING WITH BIA ON MANAGEMENT PLAN IN MCALESTER AREA. The McAlester (OK) News-Capital (12/8, 28K) reports that the BLM is working with the BIA to develop a new Resource Management Plan and Environmental Impact Statement that “could open local land for the development of natural resources such as grasslands, wind energy, salt, gas, oil and — specifically in the McAlester area — coal.” The article notes that “17 public meetings” are “planned throughout Oklahoma, Kansas and Texas to gather public input for the RMP and EIS.”

CARTER COUNTY LANDOWNERS FILE LAWSUIT AGAINST PIPELINE COMPANIES, FEDERAL AGENCIES. The Billings (MT) Gazette (12/8, 206K) reports that “a group of Carter County landowners has filed a federal lawsuit against several pipeline companies and federal agencies demanding a halt to construction of a pipeline until an environmental review is complete.” In a suit filed in US District Court on Nov. 22 that names the defendants as the Interior Department, the BLM and its Miles City field office, the FWS, the Butte Pipe Line Co., the Belle Fourche Pipeline Co. and Bridger Pipeline LLC, “about a dozen landowners and other groups are asking the court to halt construction of a new 16-inch Bakken oil pipeline and declare that the pipeline cannot be build under a 1955 easement for an already-existing line running through their properties.”

NATURAL GAS BOOM ALLOWING IMPLEMENTATION OF AGGRESSIVE POLICIES. The National Journal (12/9, Harder, Subscription Publication, 427K) reports that President Obama would not have been able to move forward on aggressive policies such as tougher environmental rules and Iranian oil sanctions, which he would have not been able to effectively implement without America’s vast oil and natural gas reserves. The International Energy Agency estimates that the US will surpass Saudi Arabia as the world’s biggest oil-producer in 2015, and surpass Russia as the world’s biggest natural-gas producer by the end of this year. EPA Administrator Gina McCarthy called natural gas a “game-changer with our ability to really move forward with pollution reductions,” and the EPA is pursuing rules favoring natural gas over coal.

Offshore Energy Development:

ENERGY COMPANIES CRITIQUE PROPOSED OFFSHORE REGULATIONS. The FuelFix (12/6, Dlouhy, 7K) reports that several oil companies have expressed dissatisfaction with the Bureau of Safety and Environmental Enforcement's proposed rules for "governing oil and gas production systems used offshore." The rule would "require a more rigorous cradle-to-grave...assessments of critical safety and pollution prevention equipment." Oil companies and trade groups are unhappy with the comment period for the rules, only 45 days instead of the 120 they were seeking. Critics also said the rules could, "cause inconsistencies with existing regulations, could muddle oversight of some equipment used offshore and is unduly prescriptive." It is unclear if the rules will apply to projects under construction right now and whether existing facilities will be grandfathered in. Anadarko, Shell and the Offshore Operators Committee also noted that new firefighting regulations could interfere with existing ones already under the oversight of the Coast Guard.

JUDGE SUSPENDS BP OIL SPILL SETTLEMENT PAYMENTS TO BUSINESSES. The AP (12/7) reported that Judge Carl Barbier "has temporarily suspended BP oil spill settlement payments to businesses while he reconsiders the company's arguments against compensating those that cannot trace losses directly to the nation's worst offshore oil spill." Judge Barbier issued an order Thursday which noted that the claims office will still accept and process business claims "but won't make final decisions or payments until the matter is settled."

FEDERAL GOVERNMENT URGED TO STEP ASIDE FOR ARCTIC DEVELOPMENT. For the FuelFix (12/6, Holt, 7K), David Holt, President of Consumer Energy Alliance, acknowledges that "the United States has no doubt seen a dramatic increase in domestic production of oil, natural gas and renewable energy," but he argues that "the majority of this progress has taken place despite action from the federal government, not because of it." Holt claims that US energy companies could "seize the opportunity for American ambition and willingness to once again triumph over challenges, with ingenuity, technology and good old Yankee grit" if they are allowed to explore the Arctic for development.

JUDGE DENIES CLASS CERTIFICATION FOR BP INVESTORS. Bloomberg News (12/6, Fisk, Calkins, 1.91M) reported that U.S. District Judge Keith P. Ellison rejected a class certification for investors seeking to sue BP over loss in the value of BP stock due to the Deepwater Horizon oil spill in 2010. "Ellison ruled that the investors failed to show that their damages could be calculated on a class-wide basis in a way that was consistent with their legal theory on BP's culpability." He noted a recent Supreme Court case involving Comcast that "appreciably changed the landscape for class certification," and gave the plaintiffs 30 days to revise their motion. Ellison also ruled that three pension funds "can pursue deceit claims for losses on their ordinary shares under English law."

Reuters (12/7, Raymond) also reported on the class certification denial.

ADDITIONAL COVERAGE OF SETTLEMENT WITH BOEM SCIENTIST. Additional coverage of the settlement with Charles Monnett was provided by the [Las Vegas Guardian Express](#) (12/8, 64K) and the [Huffington Post](#) (12/6, Kate Sheppard Posted: 12/06/2013 6:, Est, 11.54M).

ADDITIONAL COVERAGE OF BP EFFORTS TO EXPAND DEEP WATER DRILLING. Additional coverage of the effort to expand deep water drilling was provided by the [Christian Science Monitor](#) (12/9, 540K), the [Pittsburgh Tribune-Review](#) (12/8, 636K), the [Longview \(TX\) News-Journal](#) (12/8, 69K), and the [Durango \(CO\) Herald](#) (12/8, 28K).

ADDITIONAL COVERAGE OF RESEARCHERS TO STUDY ENVIRONMENTAL MONITORING OF GULF. Additional coverage that researchers from the Center for Natural Resource Economics and Policy in the LSU AgCenter Department of Agricultural Economics and Agribusiness have won a "three-year award of more than \$750,000 to study the value of the environmental monitoring system in the Gulf of Mexico" was provided by the [Seattle Post-Intelligencer](#) (12/8, 768K), the [Alexandria \(LA\) Town Talk](#) (12/8, 98K), [KATC-TV Lafayette, LA](#) (12/8, 16K), and [KNOE-TV Monroe, LA](#) (12/8, 6K).

8. Tackling America's Water Challenges – Key

9. Empowering Native American Communities – K

Tackling America's Water Challenges:

DELTA WATER TUNNEL PROJECT NEEDS \$1.2 BILLION MORE FOR PLANNING. The [Sacramento \(CA\) Bee](#) (12/7, 749K) reports that the Delta water-diversion tunnels proposed by Gov. Jerry Brown "need \$1.2 billion more spent on planning and design before construction starts or is even assured." According to the article, "the additional planning costs, which come on top of \$240 million already spent, first came to light at a board meeting of the Westlands Water District late last month." California "expects to release the draft environmental impact study – seven years in the making – for the project on Monday."

Also providing coverage is the [Merced \(CA\) Sun-Star](#) (12/7, 86K), the [Sacramento \(CA\) Bee](#) (12/8, 749K), the [Chico \(CA\) Enterprise-Record](#) (12/8, 90K) and the [Central Valley \(CA\) Business Times](#) (12/8, 206).

IMPERIAL VALLEY AGENCIES DEVELOP PLAN TO SAVE SALTON SEA. The [Los Angeles Times](#) (12/8, Perry, 3.07M) reports that "with an ominous deadline approaching, two feuding Imperial Valley agencies have put aside their differences and developed a plan they hope can save the ailing Salton Sea." The Imperial Irrigation District and the Imperial County Board of Supervisors have "agreed to push for additional geothermal energy exploration on the eastern edge of the sea." The goal is to "raise money for restoration projects from the profits from energy sales."

BOR TO LOWER LAKE HAVASU'S WATER LEVEL FOR PARKER DAM WORK. The [Sacramento \(CA\) Bee](#) (12/7, 749K) reports that the BOR plans to lower Lake Havasu's water level by "three feet for about eight weeks in order to work on the Parker Dam's filtering system." The lowering of the Colorado River lake will begin Sunday and is expected to be completed by Dec. 16.

AP coverage was picked up by the [U-T San Diego](#) (12/7, 647K) and [KPHO-TV Phoenix](#) (12/8, 74K).

ADDITIONAL COVERAGE: BOR STUDY ENLARGING SAN LUIS RESERVOIR. Additional coverage of the completion of a study on expanding the San Luis Reservoir was provided by the [Merced \(CA\) Sun-Star](#) (12/8, 86K).

Empowering Native American Communities:

ADDITIONAL COVERAGE OF INDIAN LAW AND ORDER COMMISSION'S CRITICISM OF ALASKA.

Additional coverage of the Indian Law and Order Commission's criticism of Alaska was provided by the [Juneau \(AK\) Empire](#) (12/8, 21K).

ADDITIONAL COVERAGE OF HEARING ON MASHPEE WAMPANOAG TRIBE'S PROPOSED CASINO.

Additional coverage of the hearing held by the BIA on a proposed casino by the Mashpee Wampanoag tribe was provided by the [Cape Cod \(MA\) Times](#) (12/6, 92K), the [Cape Cod \(MA\) Times](#) (12/7, 92K), the [Taunton \(MA\) Gazette](#) (12/8, 36K), the [East Bridgewater \(MA\) Enterprise](#) (12/8), and the [Raynham \(MA\) Call](#) (12/8).

Top National News:

PROPOSED BUDGET DEAL WOULD RAISE SPENDING FROM SEQUESTER-IMPOSED LEVELS. Reports this morning indicate that House and Senate budget conferees may be near completion of an agreement that would eliminate the potential for another shutdown standoff next year by generally avoiding the most controversial proposals for reducing the nation's debt. Reports indicate the deal would provide Federal agencies some relief from the across-the-board budget cuts agreed to as part of the Budget Control Act of 2011.

The Washington Post (12/9, Montgomery, 4.28M) reports that "House and Senate negotiators were putting the finishing touches Sunday on what would be the first successful budget accord since 2011." According to the Post, "The deal...would not significantly reduce the debt," nor "close corporate tax loopholes or reform" Medicare and Social Security. The Post also notes that the potential deal "would not even fully replace sharp spending cuts known as the sequester," which the Post says had been "the negotiators' primary target." However, according to the Post, the "emerging agreement aims to partially repeal the sequester and raise agency spending to roughly \$1.015 trillion in fiscal 2014 and 2015."

The Wall Street Journal (12/9, Peterson, Crittenden, Subscription Publication, 5.91M) provides a similar outline of the deal that Sen. Patty Murray, who chairs the Senate Budget Committee, and Rep. Paul Ryan (R-WI), chairman of the House Budget Committee, are working on, and reports that the two worked throughout the weekend on the details.

According to Politico (12/9, Samuelsohn, 467K), both Murray and Ryan "have ample reason to act — and act now." Politico says the main incentive is "averting the pain from a second year of sequestration, which could make the first 12 months of spending reductions seem mild in comparison." According to Politico, those looming "dramatic cutbacks...could help Murray and Ryan collect votes to get a deal through Congress." However, Politico adds that "selling every Republican on the need to end the sequester is no simple task" because "conservatives see the cuts as a prized feather in their cap...that shouldn't be undone unless Democrats agree to make commensurate changes to mandatory spending programs."

According to another article from Politico (12/9, Everett, Gibson, 467K), along with conservative Republicans, some Democrats "are getting increasingly antsy about the emerging agreement" that they are "learning...details" about "largely through the media." Politico says that "for Republicans," the "unease is caused by news that domestic spending may surpass existing caps," while Democrats "are growing angry over the increased likelihood that federal workers' benefits are going to be cut and the possible exclusion of unemployment insurance." Politico adds that "as angst over the content of the deal grows, the possibility increases that House Democrats or Senate Republicans could mount an attack to stop...[the] deal."

The Washington Times (12/9, Sherfinski, 417K) reports that on ABC's This Week (12/8, Stephanopoulos, 2.73M), Sen. Richard Durbin said, "What I hear from Patty Murray — I spoke to her the other night — negotiations are making progress, moving in the right direction," but "they haven't closed the deal."

Sen. Rob Portman, also on ABC's This Week (12/8, Stephanopoulos, 2.73M), said, "I think there is an obvious solution here...we can shift some of the savings from the part of the budget that Congress appropriates every year to the part of the budget, the two-thirds of the budget that is called mandatory spending, keep the budget caps in place, not raise taxes, which is important during this weak economy, and actually avoid a government shutdown."

McClatchy (12/9, Lightman, 95K) reports that a new McClatchy-Marist poll has found that majorities support the most important aspects of the proposed deal, including "eas[ing] the automatic spending cuts known as the sequester...more defense and domestic spending, no major cuts in popular programs and no big tax increases." According to McClatchy, "By 52-41, voters support replacing some [sequester] cuts with increases to taxes and fees over going ahead with the cuts as scheduled," including independents, who "favor replacing them by 52-40." However, McClatchy reports that "a solid majority of voters overall, 63 percent, saw no impact of the spending on themselves or their families," and "5 percent saw a positive impact."

The Wall Street Journal (12/9, Peterson, 5.91M) reports that on Sunday, both Democrats and Republicans said that the budget deal would proceed with or without agreement on the fate of unemployment benefits set to expire at the end of the month. Durbin, on ABC's This Week (12/8, Stephanopoulos, 2.73M), said, "I don't think we've reached that point where we've said this is it; take it or leave it."

Reuters (12/9, Bohan, Viswanatha) reports that contrary to Durbin's assessment, House Minority Leader Nancy Pelosi said last week that her caucus would oppose any budget deal that did not include an extension of the jobless benefits, or the promise that the benefits would subsequently be extended. Reuters also notes that on Fox News Sunday (12/8, Wallace), Sen. Rand Paul made the case for allowing the benefits to lapse, saying, "When you allow people to be on unemployment insurance for 99 weeks, you're causing them to become part of this perpetual unemployed group in our economy. ... While it seems good, it actually does a disservice to the people you're trying to help."

According to the Huffington Post (12/9, Terkel, 11.54M), "About 1.3 million long-term jobless Americans will lose federal benefits if Congress fails to reauthorize the Emergency Unemployment Compensation program." The Huffington Post adds that "without congressional action, the most time that people could get" unemployment benefits "would be six months." The Huffington Post notes that Paul "has consistently opposed long-term unemployment benefits," and that in 2010, he said, "You get out of a recession by encouraging employment, not

encouraging unemployment.”

The Hill (12/9, Needham, 194K) reports that “while Democrats aren’t insisting that the reauthorization be included in [the] budget agreement...supporters of the extension, including congressional aides,” are nevertheless optimistic. The Hill notes that the extension has bipartisan support, including Rep. Chris Gibson (R-NY), who is “circulating a letter rallying Republican support.” And, according to The Hill, Speaker Boehner has said he is “willing to look at any plan produced by the White House to renew the federal program.”

Paul Krugman, in his column for the New York Times (12/9, Subscription Publication, 9.61M), says many Republicans “like to cite academic research – some of it from Democratic-leaning economists – that seemingly confirms the idea that unemployment insurance causes unemployment.” However, according to Krugman, “The view of most labor economists now is that unemployment benefits have only a modest negative effect...and in today’s economy have no negative effect at all on overall employment.” Krugman goes on to claim that, “on the contrary, unemployment benefits help create jobs.”

Hagel Tells Troops In Afghanistan That Sequester Cuts May Be Eased. The AP (12/9, Baldor) reports from Camp Leathemeck in Afghanistan that on Sunday, Defense Secretary Hagel “offered troops a rare glimmer of hope on the department’s financial woes, saying a possible budget agreement back home could ease the automatic spending cuts that have hit the military hard.” According to the AP, Hagel “told Marines...that an emerging deal would restore some money to the Pentagon this budget year” after they “quizzed [him] about the budget and the potential effect on the military.” The AP says Hagel “sounded a more optimistic tone than he has used for months.” The AP reports that the sequester cuts “would slice \$52 billion from the department’s budget in the fiscal year that began Oct. 1,” but members of Congress “are negotiating a deal that could restore between \$10 billion to \$25 billion each year, for the next two years, to defense spending.”

However, Politico (12/9, Rogers, 467K) reports that the House and Senate budget negotiators are discussing reducing “military pensions” in order to “avoid deeper cuts from defense.” According to Politico, “there is a greater recognition...in Congress and among the Joint Chiefs” that the Pentagon “must come to terms with personnel-related costs, which are eating up more and more of what money remains.” Rep. Buck McKeon (R-CA), chairman of the House Armed Services Committee, is quoted as saying, “Forty-four cents of every dollar we spend goes to military personnel.” Politico notes that President Obama’s 2014 budget “propos[ed] to increase what federal employees contribute to their pensions...from .8 percent of pay to 2 percent.”

Rubin And Altman Urge Congress Not To Cut Food Stamp Spending. Former Treasury Secretary Robert Rubin, former deputy Treasury secretary Roger Altman and Melissa Kearney, director of the Hamilton Project, in an op-ed for the Washington Post (12/9, Rubin, Altman, Kearney, 4.28M), urge Congress to resist pressure to cut spending on food stamps “amid the worst poverty levels in two decades, a weak overall economy and rapidly falling budget deficits.” Rubin, Altman and Kearney note that the \$82.5 billion spent on the Supplemental Nutrition Assistance Program in 2013 is just “a small fraction of a \$3.5 trillion budget and \$16 trillion economy.”

REID PUSHES FOR VOTES ON OBAMA NOMINEES IN FINAL WEEKS OF SENATE SESSION. The AP (12/9, Fram) reports that the two-week year-end Senate session which begins Monday will be “the first test of how Republicans respond” to Democratic rule changes, which limited “the traditional blocking ability of the Senate’s minority party.” The AP notes that Republicans can still “slow, though not derail, Obama’s appointments.” In addition to a vote Monday to confirm Patricia Millett to the U.S. Court of Appeals for the District of Columbia Circuit, Majority Leader Reid intends “to push five more major nominees through the Senate.” They are: Janet Yellen to lead the Federal Reserve, Jeh Johnson to head the Department of Homeland Security and Rep. Mel Watt to lead the Federal Housing Finance Agency. In addition, there are “two more Obama picks for the remaining vacancies on the D.C. court – attorney Comelia ‘Nina’ Pillard and U.S. District Judge Robert Wilkins.”

The Washington Post (12/9, Phelps, 4.28M) reports that liberals are hoping the President and the Democratic Senate “will take the opportunity to fill numerous judicial vacancies nationwide without having to worry about Republican filibusters.” The Post notes that the initial impact on the DC court, “if any, may be modest.” Observers say that the addition of Millett, Pillard, and Wilkins “will over time counter the rising influence of two arch-conservatives appointed by President George W. Bush.”

FED OFFICIALS IN NO HURRY TO SCALE BACK BOND-BUYING PROGRAM. The New York Times (12/9,

Appelbaum, Subscription Publication, 9.61M) reports that while Fed Chairman Ben Bernanke predicted in June that the central bank would begin to taper its bond-buying program by the end of this year, and such a move is still possible next week when the Fed policy committee meets for the final time this year, public statements from Fed officials indicate that they "are in no hurry" to begin scaling back the effort. According to the Times, Fed officials "see little harm in postponing the decision, particularly compared with the risks of pulling back too soon." Some officials "argue that the slow pace of inflation is itself a reason for the Fed to maintain its stimulus campaign."

Feldstein Calls Fed Policy "Very Risky." In an op-ed for the New York Times (12/9, Subscription Publication, 9.61M), Martin S. Feldstein, a professor of economics at Harvard who was chairman of the Council of Economic Advisers under President Reagan, argues that the Fed strategy of trying to "stimulate the economy by driving down long-term interest rates by amassing long-term bonds and pledging to keep short-term rates near zero" is "very risky." Feldstein argues that while the effect "has been too small to raise economic growth to a healthy rate," the policy has "caused individuals and institutions to take excessive risks that could destabilize the economy just as it did before the 2007-9 recession." Feldstein calls on the President and Congress to "enact, a five-year fiscal package that would move the growth of gross domestic product to above 3 percent a year and focus on direct government spending on infrastructure."

Greenspan Praises Yellen, Says She Will Do Well As Fed Chairman. Alan Greenspan said on CNN's Fareed Zakaria GPS (12/8, Zakaria, 456K), "Janet Yellen is a very good, an excellent economist, very intelligent. She knows exactly what is going on. I've worked with her for years. I learned a lot from her, actually. She knows what's going on. She will do as well as anyone I think can handle it."

Editorial Wrap-Up:

NEW YORK TIMES. "Mr. De Blasio's Fiscal Challenge." The New York Times (12/9, Subscription Publication, 9.61M) editorializes that New York City mayor-elect Bill de Blasio faces "real and immense" short- and long-term budget challenges. Michael Bloomberg's balanced budget eliminates an expected \$2 billion deficit by not accounting for retroactive pay demanded by municipal unions. Federal spending cuts affecting city programs are also a concern, and de Blasio's universal pre-kindergarten and after-school programs plan will require tax increases that the state government is unlikely to favor. De Blasio may have to consider spending and revenue reforms that are not "politically easy."

"When Bishops Direct Medical Care." The New York Times (12/9, Subscription Publication, 9.61M) editorializes about what it calls the threat "posed by mergers between secular hospitals and Catholic hospitals operating under religious directives from the nation's Roman Catholic bishops" that "inevitably collide with the hospital's duty to provide care to pregnant women in medical distress." The Times notes that this "tension lies at the heart" of a Federal suit filed last week by the American Civil Liberties Union (ACLU) on behalf of a Michigan woman who claims she received substandard care at a Catholic hospital due to directives from the bishop of the local diocese. The Times concludes that the bishops "are free to worship as they choose and advocate for their beliefs," but those beliefs "should not shield the bishops from legal accountability when church-affiliated hospitals following their rules cause patients harm."

"France's New Approach To Curbing Prostitution." The New York Times (12/9, Subscription Publication, 9.61M) editorializes that a French measure to impose fines on those who pay for sex while providing job-training programs for prostitutes brings the country in line with a consensus that prostitutes are "exploited and abused victims" and presumably victims of trafficking rather than criminals. France's legislature was compelled to act because of the finding that nine out of 10 prostitutes are reportedly of foreign origin.

WASHINGTON POST. "The GOP's Shrinking Tent." The Washington Post (12/9, 4.28M) in an editorial says that "Virginia Republicans...have become an increasingly exclusive club." The Post says that using "scantily attended party conventions," to choose party nominees result in candidates that do not appeal to the broader electorate, citing the losses of James S. Gilmore III to Mark R. Warner, and Ken Cuccinelli to Terry McCauliffe. The Post says that the party appears to be doing the same thing to prevent Del. Joe T. May from running in the special election to fill the seat of Sen. Mark Herring (D) should he be named the winner in the contest for attorney general after a recount. The party is planning to choose a nominee at a meeting rather than through a primary

election.

"Blowing Smoke." The Washington Post (12/9, 4.28M) editorializes that Congress should update the Clean Air Act to reduce ambiguity in its wording and enable the prescription of "neater solutions to the country's serious pollution problems." The article noted that a case regarding the Environmental Protection Agency's ability to set air-quality guidelines for states will be heard before the Supreme Court on Tuesday because EPA policy, although sensible, may run afoul of the law. The article did not express high confidence in Congress' willingness to amend the Act because "it has been years since lawmakers managed to pass any major environmental legislation."

"The China Vise." The Washington Post (12/9, 4.28M) editorializes that China's blocking of news websites and visa renewal delays for US correspondents is an attempt of the ruling elite to maintain their hold on power by limiting politically sensitive or embarrassing information. The US freely grants visas to Chinese journalists, but the article suggests "[injecting] a little more symmetry into its visa policy" if China continues to "exclude and threaten American journalists."

WALL STREET JOURNAL. "Barney Frank v. Dodd-Frank." An editorial in the Wall Street Journal (12/9, Subscription Publication, 5.91M) notes that Rep. Barney Frank, one of the principal authors of the Dodd-Frank law, is now questioning the regulatory expansion brought on by the law. At a recent event hosted by the Clearing House trade group, Frank argued that regulators should focus on banks instead of mutual-fund companies, saying that designating large asset managers like BlackRock or Fidelity as "systemically important" was not the law's intent. The Journal also opposes Treasury's regulation of asset managers, arguing that while a market decline will not impact an asset manager or the larger financial system, taxpayers are ultimately responsible for covering loans made with depositors' money.

"ObamaCare In Translation." The Wall Street Journal (12/9, Subscription Publication, 5.91M), in an editorial, publishes a section of the transcript of Dr. Ezekiel Emanuel's appearance on "Fox News Sunday" during which he and host Chris Wallace debated the President's intended meaning when he claimed that "if you like your doctor, you can keep your doctor."

"The Stakes In Ukraine." In editorial, the Wall Street Journal (12/9, Subscription Publication, 5.91M) criticizes what it sees as a lack of American interest in the situation in Ukraine and calls on the Obama Administration to warn Russian President Vladimir Putin that there will be consequences if he incites violence or promotes a government crackdown in the country.

Red Rock

Iacobucci, Francis <francis_iacobucci@ios.doi.gov>

Mon, Dec 9, 2013 at 6:20 PM

To: Sally Jewell (b)(6)@ios.doi.gov>

Sally,

The folks at Red Rock are excited to host once again. They're planning to take you on the scenic drive followed by a 1.5-2 hour hike (easy-medium difficulty).

We'll depart Vegas immediately following your Sage Grouse lunch, and I'll be sure to build in some time for a wardrobe change.

Thanks,
Booch

DOI in the News:

INTERIOR FINALIZES FIRST CO-OP AGREEMENT FOR INDIAN LAND BUYBACK PROGRAM. The Washington Post (12/10, Press, 4.28M) reports that the Interior Department has "finalized the first cooperative agreement in a \$1.9 billion Native American land buyback program," federal officials announced Monday. The agreement reached with the Oglala Sioux Tribe of the Pine Ridge Indian Reservation in South Dakota "outlines the strategy and resources to be provided to tribal leaders for outreach and education." Officials with the Interior Department said "they intend to make the first offers by the end of the year." Interior Secretary Sally Jewell said the Obama Administration "wants to reduce fractionation and implement the buyback program in a fair and equitable manner." In a statement, Jewell said, "Cooperative agreements give us an opportunity to work together,

nation-to-nation, to ensure that the Program's implementation is tailored to the specific priorities of each tribe. This agreement reflects a spirit of mutual respect and teamwork as we work together to address this opportunity."

AP coverage was picked up by the Seymour (IN) Times Tribune (12/10, 31K), the Greenfield (IN) Daily Reporter (12/10, 31K), the Columbus (IN) Republic (12/10, 80K), the Minneapolis Star Tribune (12/10, Lammers, 1.14M), the Sacramento (CA) Bee (12/9, 749K), the Quincy (IL) Herald-Whig (12/10, 82K), the St. Joseph (MI) Herald Palladium (12/10, 43K), the Vancouver (CAN) Sun (12/10, 559K), KOTA-TV Rapid City, SD (12/10, 890), KELO-TV Sioux Falls, SD (12/10, 25K), and KXNews (12/10, 1K).

SENATE ENERGY AND NATURAL RESOURCES COMMITTEE TO CONSIDER INTERIOR NOMINEES. In its "E2 Wire" blog, The Hill (12/10, 194K) reports that the Senate Energy and Natural Resources Committee will consider nominations for Rhea Suh to be assistant secretary of fish and wildlife for the Interior Department, and Tommy Beaudreau to be assistant secretary for policy, management and budget for Interior. It will also vote on the nomination of Esther Kia'aina to be an assistant secretary for insular at Interior.

Meanwhile, Politico Magazine (12/10, Thrush, 464K) reports on the nominations that have been held up by the legislative branch. It notes that Michael Connor was nominated to be deputy secretary at the Interior Department on July 30, 2013, but Sen. David Vitter has placed a hold on the nomination.

WHITE HOUSE ADVISER URGES CABINET SECRETARIES TO WORK TO REDUCE CARBON EMISSIONS. In its "Blog Briefing Room" blog, The Hill (12/10, 194K) reports that President Obama is bringing former Clinton chief of staff John Podesta back to the White House for a year-long stint as a top adviser, an administration official confirmed Monday. The article notes that on Friday, Podesta tweeted a Center for American Progress report encouraging Interior Secretary Sally Jewell and Agriculture Secretary Tom Vilsack to "establish goals reducing carbon emissions from public lands over time."

ADDITIONAL COVERAGE OF STUDY ON LIMITED ACCESS TO PUBLIC LANDS. additional coverage of the report by the Center for Western Priorities on the limited access to public lands was provided by the High Country (CO) News (12/10, 74K).

PRESIDENT OBAMA URGED TO PROTECT PUBLIC LANDS. For "The Blog" of the Huffington Post (12/10, Brune, 11.54M), Michael Brune, Executive Director, The Sierra Club, argues that "if we want any real progress on protecting public lands, then our best hope is the executive branch" Moreover, he believes "there's reason to be optimistic that the Obama administration might deliver." Brune notes that Interior Secretary criticized Congress' failure to act in her speech at a National Press Club event. In urging President Obama to act, Brune suggests that "many first-rate candidates for national monument status are still waiting – from the seashore of Northern California to the Organ Mountains-Desert Peaks of New Mexico."

FORT WORTH MAYOR URGES SUPPORT FOR LAND AND WATER CONSERVATION FUND . In an op-ed for the Fort Worth (TX) Star-Telegram (12/9, Price, 596K), Betsy Price, the mayor of Fort Worth, warns that the Land and Water Conservation Fund is at risk of expiring. She argues that "the fund can and must be reauthorized." Price asserts that "access to parks for biking, hiking, fishing and other recreational activities makes for happier, healthier citizens." She concludes that "by strengthening the LWCF, we can help ensure that Fort Worth and other bustling cities in our great nation will be able to provide access to public parks for generations to come."

INTERIOR'S PLAN TO KILL MICE ON FARALLON ISLANDS CRITICIZED. In an op-ed for the Santa Rosa (CA) Press Democrat (12/8, Charter, 156K), Richard Charter, a senior fellow with the Ocean Foundation, criticizes a plan by the Interior Department to introduce rodenticide in the Farallon Islands in order "to prevent mice that were accidentally introduced on the Farallones back in the 1800s from attracting migrating burrowing owls, which, once there, sometimes also become opportunistic predators of the recovering population of a seabird called the ash storm petrel." According to Charter, "this convoluted...scheme contains more than a few notable flaws of logic and a lot of potential for extremely dangerous unintended consequences." He concludes that "society faces no compelling reason to rush forward with scattering poison throughout our entire national marine sanctuary ecosystem in the unconfirmed hope of perhaps getting rid of a few misplaced burrowing owls."

America's Great Outdoors:

National Park Service:

NPS FACES CHALLENGES OF AGING WORKFORCE, EMPLOYEE SATISFACTION. The Federal News Radio (12/10, 11K) reports that at the National NPS, "management faces two challenges related to its people: The workforce is aging, and the latest governmentwide employee viewpoint survey showed the agency has some work to do in keeping employees engaged." Kathy Hanson, chief of learning and development at NPS, on Monday "said training and development are especially impacted by the current budget pinch." Hanson said, "We're fortunate, though, that our leadership believes that it's more important than ever to focus on developing employees in such a difficult time. Leading change is a hard thing to do in the best of circumstances. But, it's especially difficult when employees are faced with such dire shortfalls in their budget and their staffing. Our leadership has said, 'This is so important that we're not going to undermine your efforts. We're going to put as many resources as we can there.'"

ACTING SUPERINTENDENT NAMED FOR GREAT SMOKY MOUNTAINS NATIONAL PARK. USA Today (12/9, Ostendorff, 5.82M) reports that Pedro Ramos, currently a superintendent at Big Cypress National Preserve in Florida will take over next month as acting superintendent of Great Smoky Mountains National Park when Superintendent Dale Ditmanson retires. The NPS said that "the posting is for 90 days." According to Don Barger of the watchdog group National Parks Conservation Association, "the decision to tap an acting superintendent shows the park service is serious about finding a strong full-time leader for the Smokies." Barger said, "I think for the park service to put someone in for an interim period like that is an indication of how important the park is. You want to make sure that you have got someone in there really running things."

The Sevierville (TN) Mountain Press (12/10, 28K) reports that Stan Austin, Regional Director for the Southeast Region, said, "We are very pleased that Pedro has agreed to step in as the acting superintendent at the Smokies. He has great experience as a superintendent and is very knowledgeable in protecting resources and taking care of visitors. We know he will do a superb job as we conduct a search for a permanent superintendent." Ramos said, "I am excited about this opportunity to serve in the Great Smoky Mountains National Park, the most visited National Park in the country. I look forward to working with the park's employees, volunteers and partners to continue serving the public."

Also providing coverage are the Knoxville (TN) News Sentinel (12/9, 366K), the Asheville (NC) Citizen-Times (12/9, 162K), WATE-TV Knoxville, TN (12/10, 36K), and WVLT-TV Knoxville, TN (12/10, 8K).

NPS NORTHEAST REGION DIRECTOR REIDENBACH TO RETIRE NEXT MONTH. The Philadelphia Business Journal (12/9, Subscription Publication, 39K) reports that Dennis Reidenbach will retire as director of the NPS' Northeast Region next month. NPS Director Jonathan B. Jarvis called Reidenbach "focused, dedicated — an example of the best of the best of National Park Service Professionals." Until his successor is named, Mike Caldwell, who serves as deputy director of the Northeast Region, will serve as interim director.

FLIGHT 93 CRASH SITE VALUED AT \$1.5 MILLION. The Washington Post (12/9, Press, 4.28M) reports that "the site where United Airlines Flight 93 crashed on Sept. 11, 2001, is worth more than the government paid for it but far less than the former owner claimed, according to a commission report released Monday." According to the article, "a three-person eminent domain commission in Pittsburgh said the 275-acre site in Shanksville" is "worth about \$1.5 million." The Interior Department "condemned the property under eminent domain in 2009 and paid Michael Svonavec \$611,000 for it."

Also covering the story are the Pittsburgh Post-Gazette (12/9, 725K), the State (SC) (12/9, 280K), the Somerset County (PA) Daily American (12/10, 40K), ABC News (12/10, 3.68M), and Time (12/9, 13.4M).

NPS AND VDOT CLOSE TO DEAL ON BI-COUNTY PARKWAY. WAMU-FM Washington (12/10, 36K) reports that the NPS and Virginia and are "close to signing an agreement that would open the way for the construction" of the Bi-County Parkway. Ed Clark, superintendent of Manassas battlefield, said, "This is obviously the farthest it's ever gotten, but VDOT still has a tremendous amount of work to do to get this accomplished."

Resident Op-Ed Sees Bi-County Parkway As Stuck In The Past. Connie Moser writes in a guest editorial for

the Prince William – Stafford (VA) Potomac Local (12/8, Moser) that projects like the Bi-County Parkway may be a wasteful venture if communities are moving in the directions of less driving and more consolidated urban living. The op-ed portrays the Bi-County Parkway debate in Prince William County as being very divisive, but fundamentally Moser feels that constructing the highway would “build a road that changes nothing but just gives us more of the same.”

BUDGET ISSUES COULD IMPACT LOWELL NATIONAL PARK. The Lowell (MA) Sun (12/10, 142K) reports that “federal budget issues remain that could impact future funding” to the NPS and Lowell National Historical Park workers. However, park Superintendent Celeste Bernardo and “her team are taking things in stride, focusing on what they can do to improve programs and their key events, the Lowell Folk Festival and the Lowell Summer Music Series.” Bernardo said that “it reflects the park’s renewed focus on its major programs despite a shrinking budget and staff size – and potentially another federal shutdown.”

TRIAL BEGINS IN MONTANA NEWLYWED KILLING CASE. The Washington Post (12/9, Press, 4.28M) reports that the murder trial of Jordan Graham, who is accused of intentionally pushing her newly wed husband Cody Johnson at Glacier National Park, began Monday. Graham has “pleaded not guilty to first-degree murder, second-degree murder and making a false statement to authorities.”

ADDITIONAL COVERAGE: VIRGINIA LAWMAKER WANTS STATE TO TAKEOVER CONTROL OF SHENANDOAH. Additional coverage of the push by Virginia delegate Bob Marshall for the state to takeover control of Shenandoah National Park was provided by the Northern Virginia Daily (12/10, 48K).

PUBLIC SUPPORT OF KILLING DEER GROWING. In her column for the Washington Post (12/10, Dvorak, 4.28M), Petula Dvorak writes about the efforts to control the deer population. She notes that when the NPS “started deer kills at Rock Creek Park this spring, protesters were outraged not only by the kill itself but also by the cruel methods.” However, now, “public support of deer kills is growing.”

Bureau of Land Management:

RESCUE TEAMS SEARCHING FOR NEVADANS. The Washington Post (12/9, Press, 4.28M) reports that “rescue teams were working against the clock and the bitter cold Monday to find a couple and four children who went to play in the snow in the remote mountains of northwest Nevada but didn’t return after a night of sub-zero temperatures.” Mark Turney, a spokesman for the BLM, said, “Let’s hope they are found quick. It’s got to be brutal out there.”

Coverage was also provided by the Helena (MT) Independent Record (12/10, 45K).

BLM TO HOST SAGE-GROUSE WORKSHOP. The Elko (NV) Daily Free Press (12/10, 22K) reports that the BLM will hold an open house workshop on Wednesday for public comments on its proposed sage-grouse plan. Joe Tague, BLM Nevada chief for renewable resources and planning, said, “We encourage people with questions on the Draft EIS to come to the workshops and get more information. We would also like to remind people that while they are reviewing the document and preparing their comments, they should be focused on the entire region as opposed to zeroing in on specific local areas.”

BLM PETITIONED TO HAND OVER ASH SPRINGS. The Las Vegas Review-Journal (12/10, 437K) reports that five months after Ash Springs was closed by federal officials, local residents are pushing for more local control of the popular swimming hole. A petition calling for the BLM to hand over the site to Lincoln County has been signed by almost 300 people so far.

BLM PLANS PRESCRIBED FIRE IN UPPER MISSOURI RIVER BREAKS NATIONAL MONUMENT. The Great Falls (MT) Tribune (12/9, 90K) reports that the BLM’s Central Montana Fire Zone is “accepting public comments on plans to reintroduce fire in the Upper Missouri River Breaks National Monument to improve habitat diversity and reduce the threat of wildfires, the agency announced Monday.” Under the proposal, “prescribed fire would be used to reduce hazardous wildfire fuel loadings and improve range land and wildlife habitat.”

BLM’S DECISION NOT TO BAN SHOOTING AT SONORAN DESERT NATIONAL MONUMENT EXAMINED.

The High Country (CO) News (12/10, 74K) examines the BLM's decision not to ban shooting at Sonoran Desert National Monument.

Fish and Wildlife Service:

REPORT HIGHLIGHTS ECONOMIC VALUE OF LAGUNA ATASCOSA NATIONAL WILDLIFE REFUGE. KGBT-TV Harlingen, TX (12/10, 12K) reports that a recent report by FWS "highlights the value of Laguna Atascosa National Wildlife Refuge to the economy of the Rio Grande Valley." Boyd Blihovde, manager Laguna Atascosa National Wildlife Refuge, said, "The US Fish and Wildlife service just published data that shows that every dollar spent at Laguna Atascosa National Wildlife refuge brings in \$37 to the local economy."

ADVOCATES ARGUE CHIMPANZEES SHOULD BE RECOGNIZED AS LEGAL PERSONS. In an article about "a new legal strategy to have chimpanzees recognized as legal persons," the New York Times (12/10, Gorman, Subscription Publication, 9.61M) notes that the FWS has "proposed changes that would classify all chimps, even those in laboratories, as endangered, a move that would raise obstacles to experiments on privately owned chimps."

FWS HELPING ROCKY MOUNT REMOVE HAZARDOUS DAM. The Washington Post (12/9, Press, 4.28M) reports that Rocky Mount is "removing a hazardous low-head dam on the Pigg River." The FWS is "providing funding for the Pigg River project as part of an effort to save the endangered Roanoke logperch." Dave Byrd with the federal agency says "the project will cost an estimated \$110,000."

Coverage was also provided by the Columbus (IN) Republic (12/10, 80K).

FWS EXTENDS DEADLINE ON PROPOSAL TO PROTECT NORTHERN LONG-EARED BAT. The Cleveland (TN) Daily Banner (12/10, 33K) reports that the FWS is "extending the deadline for public comment on the proposal to list the Northern long-eared bat as endangered under the Endangered Species Act." According to the article, "the extension notice is expected to publish in the Federal Register and will extend the public comment period to Jan. 2, 2014."

YOUNG FLORIDA PANTHER FOUND SHOT DEAD AT BIG CYPRESS PRESERVE. The Tampa Bay (FL) Times (12/10, 78K) reports that an endangered Florida panther has been found shot dead at the Big Cypress National Preserve. Investigators from the NPS, the FWS and the Florida Fish and Wildlife Conservation Commission are "going over the scene for clues and appealing to the public for help in solving the crime, which carries a potential penalty of up to a year in prison and a \$100,000 fine."

OREGON CONSIDERING ELLIOTT STATE FOREST SALE. The Oregonian (12/10, 751K) reports that the State Land Board will decide Tuesday whether to sell 2,728 acres in the Elliott State Forest. However, "state and volunteer biologists discovered threatened marbled murrelets nesting there during surveys this summer," and "timber once worth an estimated \$22.1 million dropped to \$3.6 million, according to state appraisals." According to the article, "while worth less on paper, a state contractor's appraisal theorized that the reduced value may allow small timber companies to buy the land cheap and log it anyway, skirting the law to reap the original, higher value." The article notes that "the contractor's appraisal says" the FWS "ignores violations of illegal logging in murrelet habitat."

KLAMATH COUNTY OFFICIALS OPPOSE OREGON SPOTTED FROG HABITAT. The Oregon Public Broadcasting (12/10, 4K) reports that Klamath County commissioners are "voicing their opposition to designating more than 56,000 acres in Oregon as critical habitat for the Oregon spotted frog." On Tuesday, all three commissioners voted for sending a letter to the FWS opposing the habitat

REPORT DOCUMENTS WETLANDS LOSS. In an editorial, the Lake Charles (LA) American Press (12/10, 114K) notes that the "loss of coastal saltwater wetlands more than doubled between 2004 and 2009, according to a report by the US Fish and Wildlife Service and the National Oceanic and Atmospheric Administration." FWS Director Dan Ashe said, "In addition to the important economic and safety benefits they provide to people, coastal wetlands are also vitally important to native fish and wildlife species. While they comprise less than 10 percent of the nation's land area, they support 75 percent of our migratory birds, nearly 80 percent of fish and shellfish, and

almost half of our threatened and endangered species. We can't sustain native wildlife for future generations without protecting and restoring the coastal wetlands that support them."

Securing America's Energy Future:

Renewable Energy:

WILDLIFE GROUPS, VITTER OPPOSE NEW EAGLE RULE FOR WIND FARMS. Politico (12/10, Guillen, 467K) reports that both wildlife groups and the "Senate GOP's top environmental lawmaker" Sen. David Vitter are irate over a new Interior Department rule that allows the issuing of "30-year permits for wind farms to accidentally kill or injure bald and golden eagles." Vitter calls the rule "baldly un-American" but the Obama Administration and the wind industry defend the change as necessary because the previous five-year maximum is impractical. Critics have called the rule "unpatriotic" and point out that 30 years gives the projects a long time to accrue a high death rate.

BLM SEEKS PUBLIC INPUT ON SOLAR PROJECTS. The Palm Springs (CA) Desert Sun (12/8, 110K) reports that the BLM has "scheduled a two-day public workshop starting Wednesday in Palm Springs to discuss the strategy it is developing for monitoring the environmental impacts of large-scale solar projects on public land east of the Coachella Valley." According to the official announcement for the meeting, "the Riverside East solar zone, 148,000 acres of public land between Joshua Tree National Park and the city of Blythe, will be the pilot location for the strategy."

Onshore Energy Development:

OIL TAX AGREEMENT BRINGS IN \$40 MILLION FOR NORTH DAKOTA, INDIAN RESERVATION. The AP (12/10, MacPherson) reports according to North Dakota Tax Department records, an agreement between the state and the affiliated Mandan, Hidatsa and Arikara tribes "that standardized the rules and spurred oil drilling" on the Fort Berthold Reservation "is bringing in more than \$40 million monthly for the state and tribal members, up from zero five years ago." Since the agreement was signed in 2008, the number horizontal wells on the reservation "jumped from one to more than 1,000." The state "has collected \$445.4 million, with the tribe getting \$315.3 million" to date.

CONOCOPHILLIPS BUDGETS \$1.7B FOR ALASKA IN 2014. The AP (12/9) reports that ConocoPhillips plans to send \$1.7 billion for 2014 capital costs in Alaska. The company said that the larger budget reflects increased spending on the CD-5 development within the National Petroleum Reserve-Alaska and increased activity spurred by the oil tax cut passed this year.

QUESTIONS RAISED ON BLM'S PROPOSED POLICY TO KEEP LEASING INFORMATION CONFIDENTIAL. In his column for the Washington Examiner (12/10, Higgins, 319K), Sean Higgins writes that the BLM's proposal to preserve secrecy on leasing information has "won it few friends on either side." According to Higgins, "environmentalists are exasperated that the administration would allow this," and "industry claims the new rule is unworkable and wants to revert to the old one." In conclusion, Higgins raises some question: "In whose interest is it to allow confidentiality if it allows companies to hold down the value of the leases? Why shouldn't taxpayers want them to be sold to the highest bidder? Isn't that the free market in action?"

Offshore Energy Development:

GOVERNMENT, ACADEMICS, INDUSTRY URGED TO COLLABORATE ON OFFSHORE SAFETY. In an op-ed for the Houston Chronicle (12/10, Khator, Ramm, 2.26M), Renu Khator, chancellor of the University of Houston System and president of the University of Houston, and David Ramm, the managing partner of Dymar Development, and chairman and CEO of BrightSource Energy Inc., write that "more than three years after the 2010 oil spill in the Gulf of Mexico, the worst of the damage is no longer visible to the naked eye, but the long-term consequences remain unclear." They assert that "determining what more needs to be done, and when, will require our best minds, including those from government, academia and industry." According to the authors, "a partnership among the three will help to ensure new technologies and processes deliver combined safety and

operational oversight, rather than continuing today's too-often adversarial relationships."

NYTIMES COMPARES AND CONTRASTS DEEPWATER HORIZON AND VALDEZ SPILLS. The New York Times (12/10, Fountain, Subscription Publication, 9.61M) reports that even though there are notes the similarities and differences in the 1989 Exxon Valdez oil spill and the 2010 Deepwater Horizon spill. While the object in any spill is to "separate the oil from the water," the gulf disaster struggled due to lack of evolution in cleanup technologies and the fact that oil spread out over a wide area before reaching the surface. The Times notes that technology failed BP's engineers, and that even though the major companies that drill in the gulf have formed an independent company to develop equipment and procedures to deal with potential future spills, "the next disaster may be completely different."

Tackling America's Water Challenges:

BAY DELTA CONSERVATION PLAN ENVIRONMENTAL REPORT RELEASED. The Wall Street Journal (12/10, Carlton, Subscription Publication, 5.91M) reports that on Monday, state and federal officials unveiled a draft final environmental analysis of the Bay Delta Conservation Plan. State officials say a 120-day public comment period begins Friday on the project's draft environmental-impact statement and report, as well as the delta conservation plan.

The Sacramento (CA) Bee (12/10, 749K) reports that "the impact report was filed with the US Environmental Protection Agency on Friday and should be made available on the plan's website some time today." According to the article, "there will be opportunity for the public to comment on the report starting Friday and extending until April 14."

The Chico (CA) Enterprise-Record (12/10, 90K) reports that "dozens of conservation groups including the Sierra Club" held "steadfast in their opposition, saying the project would ship more water from the delta south and create more environmental problems." However, "other environmental groups supported the effort, saying major changes are needed to help restore the badly damaged delta ecosystem." According to the article, "the groups, including the Natural Resources Defense Council and Nature Conservancy, stopped short of giving formal approval of the draft plan, saying they are reviewing the some 34,000 pages to see if previous concerns they raised were addressed."

The Salem (OR) Capital Press (12/9, 113K) reports that "opponents of Gov. Jerry Brown's proposal to build tunnels to send water past the Sacramento-San Joaquin River Delta didn't wait for the project's key environmental documents to emerge before criticizing them." According to the article, "water experts, an environmental activist and an attorney for the Californians for a Fair Water Policy said Dec. 6 the tunnels will end up costing Central Valley farmers more than they benefit and that the project isn't environmentally sound."

The Central Valley (CA) Business Times (12/10, 206) reports that the plan "promotes pork barrel fantasies of Gov. Jerry Brown, the state Department of Water Resources and corporate agriculture, critics say."

Additional coverage was provided by the San Francisco (CA) Chronicle (12/10, Gutierrez, 2.88M), the Fresno (CA) Bee (12/9, 327K), the Fresno (CA) Bee (12/9, Walters, 327K), the Merced (CA) Sun-Star (12/9, 86K), the Riverside (CA) Press Enterprise (12/9, 465K), the Santa Clarita Valley (CA) News (12/9, 431), the Oroville (CA) Mercury-Register (12/10, 1K), the Ventura County (CA) Star (12/9, 196K), Reuters (12/10, Bernstein), KOVR-TV Sacramento, CA (12/9, 47K), KXTV-TV Sacramento, CA (12/10, 25K), KXTV-TV Sacramento, CA (12/10, 25K), KQED-FM San Francisco (12/9, 13K), and KXJZ-FM Sacramento, CA (12/9, 1K).

Empowering Native American Communities:

FEDERAL COMMITTEE HOLDS FIRST HEARING ON TRIBAL YOUTH EXPOSURE TO VIOLENCE. The Bismarck (ND) Tribune (12/10, 22K) reports that the US Attorney General's Advisory Committee on American Indian and Alaska Native Children Exposed to Violence held its first hearing on Monday in Bismarck. The committee "heard testimony on the effects of domestic violence, sexual abuse and witnessing violence on tribal youth, as well as testimony about services working to help heal victims and prevent future violence." According to the article, "much of the testimony before the committee on Monday focused on the need for culturally relevant

and tribally driven programs dealing with trauma to children.”

The Atlanta Journal-Constitution (12/10, 1.26M) reports that US Associate Attorney General Tony West said that the meeting is “an early and important step in protecting Native American and Alaska Native children.” The Devils Lake (ND) Journal (12/9, 11K) notes that “the task force is the latest effort by the Justice Department to address violence on reservations, particularly against women and children.” The Forum of Fargo-Moorhead (ND) (12/10, Nowatzki, 15K) adds that “the advisory panel also will hold public hearings in Arizona, Florida and Alaska and make policy recommendations for Holder by the end of October.”

Also providing coverage is the Grand Forks (ND) Herald (12/10, 87K).

EPA HOLDS RIVERTON PART OF WIND RIVER INDIAN RESERVATION. The Columbus (IN) Republic (12/10, 80K) reports that the EPA has ruled that the City of Riverton has been part of the Wind River Indian Reservation for the past 108 years. The agency “determined that congressional action nearly a century ago didn’t change the legal status of nearly 1.5 million acres around Riverton as Indian Country.” The EPA on Friday “sent notice to the Eastern Shoshone and Northern Arapaho Tribes that the federal agency has approved their application to have the Wind River Indian Reservation treated as a separate state for purposes of implementing the federal Clean Air Act.”

Also providing coverage are the Casper (WY) Star-Tribune (12/10, 90K) and the San Francisco Chronicle (12/10, Neary, 2.88M).

BIA DETERMINES LEGAL BLACKFEET TRIBAL COUNCIL MEMBERSHIP. KRTV-TV Great Falls, MT (12/10, 7K) reports that last week, the BIA “stepped in to determine the legal council list” of the Blackfeet Tribal Business Council’s membership. According to the BIA the council members are: Willie Sharp, Jr., Forrestina Calf Boss Ribs, Roger Running Crane, Earl Old Person, Shannon Augare, Cheryl Little Dog, Paul McEvers, William Old Chief, and Leonard Guardipee.

MAZANITA BAND OF KUMEYAAY INDIANS WANTS TO EXPEDITE DECISION ON CALEXICO CASINO. KXO-AM El Centro, CA (12/10) reports that the Mazanita Band of Kumeyaay Indians has been “pushing for permission to construct an off reservation Casino for the past several years”. The BIA has “had the application for some time.” Supporters are “encouraged” with the BIA’s “recent approval of two off-reservation casinos in Northern California,” and “are asking local officials to request the Bureau expedite their decision on the Calexico Casino.”

Top National News:

TREASURY SELLS LAST GM SHARES, BRINGING TOTAL LOSS TO \$10.5 BILLION. The sale of the final GM shares owned by the Treasury received somewhat contradictory coverage. While just about every report noted that the Federal government lost money on the bailout, often in the headline, most outlets also described the cash infusion’s impact in positive terms. In addition, some coverage focused on the widespread belief that failing to support GM, along with Chrysler, would have had a significant downside for the economy.

In its lead story, CBS Evening News (12/9, lead story, 2:10, Pelley, 5.58M) reported that the government “is out of the car business.” Now, GM is “not only making cars, but profits.” CBS (Mason) noted the losses on the auto bailout, but also quotes Steve Rattner saying that to not bail out GM and Chrysler would have cost “a million jobs.”

In a short segment, NBC Nightly News (12/9, story 7, 0:25, Williams, 7.86M) reported that GM “received almost \$50 billion, an influx in cash to stay afloat,” and that, “in total, American taxpayers lost about \$10 billion on the bailout.”

In typical print coverage, the AP (12/10, Krisher) reports that the Treasury Department will “end up losing \$10.5 billion,” but adds that the government “says the alternative would have been far worse.”

In a story focused on President Obama’s comments about the divestiture, McClatchy (12/10, 95K) reports that the President “hailed the news” and “touted the move as proof the auto bailout worked.” In what McClatchy

characterized as a "bit of a victory lap," the President said, "In 2011, we marked the end of an important chapter as Chrysler repaid every dime and more of what it owed the American taxpayers from the investment we made under my administration's watch. Today, we're closing the book by selling the remaining shares of the federal government's investment in General Motors. GM has now repaid every taxpayer dollar my Administration committed to its rescue, plus billions invested by the previous administration."

In one of the most positive reports, the New York Times (12/10, Lowrey, Subscription Publication, 9.61M) says that with the sale, the government has "exited one of the most controversial investments made during the midst of the financial crisis," and notes that it was a "decision that as many as three in four Americans opposed at the time." The Times says many analysts believe the sale "might be good for [GM], too." Treasury, the Times adds, has "recovered \$433 billion from the Troubled Asset Relief Program after initially investing about \$422 billion."

USA Today (12/10, Healey, 5.82M) reports that investors have been "speculating that after the government's exit, GM would begin a dividend payment on the shares," though the company has not confirmed that. Meanwhile, GM CEO Dan Akerson "played down the final sale of shares," saying, "The U.S. Treasury's ownership exit closes just one chapter in GM's ongoing turnaround story. We will always be grateful for the second chance extended to us, and we are doing our best to make the most of it."

The Washington Times (12/10, 417K) reports Mark Reuss, GM's North America president, "told reporters in Warren, Mich., that a government exit would boost sales, especially among pickup truck buyers." According to the Times, GM has "said repeatedly that some potential customers have stayed away from its brands because they object to the government intervening in a private company's finances."

Bloomberg News (12/9, Higgins, 1.91M) reports that the US "lost about \$11 billion" on GM, which "was the largest piece of an industry bailout that became a centerpiece" of the President's first term. The piece quotes heavily from the Center for Automotive Research, which backed the bailout on economic grounds.

The Los Angeles Times (12/10, Puzzanghera, 3.07M) calls the bailout "controversial," but quotes Treasury Secretary Lew saying, "This marks one of the final chapters in the administration's efforts to protect the broader economy by providing support to the automobile industry." The Times adds that although the auto bailouts "ended with a loss for taxpayers, Treasury officials said the goal never was to turn a profit." The Times notes that, according to Lew, the bailouts "prevented further damage to the economy and the potential loss of 1 million jobs."

The Wall Street Journal (12/10, Bennett, Morath, Subscription Publication, 5.91M) reports that the sale came as the shares of GM hit \$40.90, a new high, and then gained 30 cents after the announcement.

The Hill (12/10, Sink, 194K) reports in its "On The Money" blog that the President "proudly" said that the "American auto industry is back." The Hill says the President didn't focus on the government's losses, but instead stressed that GM "has now repaid every taxpayer dollar my Administration committed to its rescue, plus billions invested by the previous Administration." The Hill says that the bailout "proved consistently unpopular throughout the recession," and that "surveys showed that a majority of Americans did not support the assistance until 2012."

The Washington Examiner (12/10, Mali, 319K) reports on the President's comments, and adds that the rescue was the "centerpiece" of Obama's campaign, with "the president touting the bailout in midwestern states and arguing that his GOP opponent, Mitt Romney, would have allowed the industry to go out of business."

LAWMAKERS REPORTEDLY NEAR BUDGET DEAL. The Washington Post (12/10, O'Keefe, Montgomery, 4.28M) reports that lawmakers are nearing agreement on a budget bill. Lawmakers are hoping to reach an agreement by Friday. Negotiators "were preparing to brief colleagues by midweek on their proposal to fund the government past Jan. 15, aides said." While work "appeared to be complete on the basic package," Senate Budget Committee Chairman Patty Murray and House Budget Committee Chairman Paul Ryan "were conferring with congressional leaders on other year-end issues, including the expiration of benefits for the long-term unemployed and payment rates for doctors who see Medicare patients."

Politico (12/10, Sherman, Bresnahan, 467K) reports that Murray and Ryan "have taken advantage of a political climate that's unusually fertile for a deal," and with the press "focused on Obamacare's woes, Ryan, Murray and

their staffs have had the space to try to hash out an agreement." Politico notes that "the mere fact that these talks haven't fallen apart after two months speaks to the unique climate of these discussions."

Pending Budget Deal Faces Opposition From Both Sides. Bloomberg News (12/10, Przybyla, 1.91M) reports that while negotiators are nearing agreement on a budget bill that would "trim automatic spending cuts," coming to an agreement "is only the first step," and the "real challenge" will be gathering "enough votes to pass in Congress." The compromise "faces peril in both parties." Republicans "criticize the proposal because it relies on higher spending in the short term while pushing off into future years cuts they fought hard to secure." Meanwhile, top Democrats "say they'll oppose a deal that disproportionately targets federal workers."

Roll Call (12/9, Rojas, Subscription Publication, 87K) reports that an aide close to the talks said that "the need to get 60 votes to limit debate in the Senate won't be much of a concern, but threading the needle in the House could prove quite a task."

Heritage Action Says It Will Oppose Budget That Exchanges Sequester For "Inadequate" Cuts Later. The Hill (12/10, Wasson, 194K) reports in its "On The Money" blog that Heritage Action warned Monday that "it will oppose any budget deal that reverses sequestration cuts in exchange for 'inadequate' spending cuts later." The group said in a statement, "Heritage Action cannot support a budget deal that would increase spending in the near-term for promises of woefully inadequate long-term reductions. While imperfect, the sequester has proven to be an effective tool in forcing Congress to reduce discretionary spending, and a gimmicky, spend-now-cut-later deal will take our nation in the wrong direction."

Conservatives Worry Deal Will Blow Through Spending Caps. The Daily Caller (12/10, Pappas, 422K) reports that conservatives are growing concerned as reports are emerging that the pending deal "would blow through spending caps and set next year's discretionary spending at more than \$1 trillion instead of the \$967 billion mandated under law." Some conservatives see the deal "as an example of lawmakers' insatiable desire for the government to keep spending more money, instead of working to cut government."

Deal Will Likely Make Federal Workers Pay More. The Washington Post (12/10, Davidson, 4.28M) reports in its "The Federal Diary" column that Federal employees and their advocates on Capitol Hill hope the budget deal won't force Federal workers to "sacrifice more toward government savings," but "hope is not the same as expectation." The Post notes that Ryan and Murray are considering an option "that would require federal workers to come up with less than \$17 billion," but for Federal workers, "any amount is too much." The Post adds that in one form or another, the agreement is likely to make Federal employees "give back money to their employer."

Increase In Airline Passenger Tax Likely. The Wall Street Journal (12/10, Nicas, Subscription Publication, 5.91M) reports that the deal is likely to double the tax on US airline passengers. Currently, passengers pay a \$2.50 "September 11th security fee" for each flight. House Republicans and the Obama Administration have called for charging \$5 per one-way trip. The Journal notes that because the talks are ongoing, the size of the increase and the amount it would raise are unclear.

Deal Unlikely To Include Extension Of Unemployment Benefits. The AP (12/10, Espo) reports that hopes faded Monday "for a quick extension of expiring unemployment benefits as Republican officials said they would not agree to include a renewal in any year-end budget deal." Democrats "said they would continue to press to make additional benefits for jobless workers part of the bill, but it was unclear how strongly the White House would support them."

WSJournal Opposes Expansion Of Unemployment Benefits. An editorial in the Wall Street Journal (12/10, Subscription Publication, 5.91M) criticizes the President for seeking another extension of unemployment benefits, arguing that the expansion of unemployment insurance is responsible for increasing joblessness.

US HOUSEHOLD WEALTH REACHES RECORD HIGH. The AP (12/10, Rugaber) reports that a "surging" stock market and a "steady recovery" in home prices drove Americans' household wealth to a new record during the third quarter of 2013. The Federal Reserve said on Monday that household wealth rose 2.6% during the quarter to \$77.3 trillion, up from a recent low of \$57.2 trillion in 2008. An increase in personal wealth has "been a pillar of the slow but steady U.S. economic recovery and could continue to boost the economy next year," by boosting consumer spending.

Reuters (12/10, Mutikani) runs a similar report, though adds that economists warned against drawing too many conclusions from it. They say that the increase has primarily benefited those who own stocks and homes.

The Wall Street Journal (12/10, Shah, Subscription Publication, 5.91M) reports that while the Fed's numbers are not inflation-adjusted, even using the Fed's preferred inflation gauge, household assets are at a record high. However, the numbers aren't adjusted for population growth, and figuring that in and using the CPI to calculate inflation, household wealth is about 1% below its peak.

Stocks Ticked Up On Monday. The AP (12/10) reports that the Dow Jones Industrial Average rose five points to 16,025 while the S&P 500 rose 3 points to 1,808. The Nasdaq Composite Index rose 6 points to 4,068. The market is "back at a record high" after a sharp rise by Sysco and hope from traders that "a budget deal could be reached in Washington." The Wall Street Journal (12/10, Strumpf, Subscription Publication, 5.91M) reports that the S&P closed at a new record, as did the Nasdaq, but the Dow remains below its November 27 peak.

Companies Increasingly Willing To Engage Activist Investors. On its front page, the Wall Street Journal (12/10, A1, Benoit, Subscription Publication, 5.91M) reports that corporations are increasingly willing to engage activist investors, finding it cheaper to negotiate than outright fight their demands. The settlements allow firms to reach peace on their own terms, avoiding ugly public proxy battles and often winning concessions from the activist investors in return. Even long-time corporate agitators like Carl Icahn are finding more doors open, and executives are increasingly acting on the investors' recommendations even before they secure board seats.

Editorial Wrap-Up:

NEW YORK TIMES. "A Breakthrough Agreement At Risk." The New York Times (12/10, Subscription Publication, 9.61M) editorializes that the "more serious threat" of undermining the nuclear negotiations with Iran lies with the United States. According to the Times, the threat of sanctions is "not only unproductive but unnecessary" because Congress can impose tougher sanctions at any time if the negotiations fail, whereas the interim agreement stipulated that "no further sanctions should be imposed while it was in force."

"A Season For Sales Taxes." In an editorial, the New York Times (12/10, Subscription Publication, 9.61M) reports that on Cyber Monday, the Supreme Court "quietly cleared the way for states to begin collecting some \$13 billion in sales taxes that go uncollected each year on Internet purchases." The Times approves of the collection of taxes on online sales, particularly since they "tend to spare low-income consumers somewhat because they shop less online than those with higher incomes." The Times said that "ideally," Congress would "pass a law to ensure uniform and comprehensive taxation of Internet sales," but for the time being, states "will have to act on their own."

"Fairer Policing In Suffolk County." The New York Times (12/10, Subscription Publication, 9.61M) editorializes that five years after the murder of Ecuadorean immigrant Marcelo Lucero, a tentative agreement has been reached by the Justice Department and the police department in Suffolk County, New York "to settle an investigation of discriminatory policing in immigrant communities there." The Times explains that the agreement "calls for new policies on training, accountability and outreach to Latinos," and urges the County Legislature to "approve the agreement, to get Suffolk moving beyond the dismal place it was five years ago."

"Bob Dylan's Discordant Notes." The New York Times (12/10, Subscription Publication, 9.61M) editorializes that charges against Bob Dylan for "violating a law that restricts free speech" are overblown. The charges were based on Dylan's contention in a magazine interview that "Serbs can sense Croatian blood" in reference to the enduring power of communal hatred. Croatian groups in France filed a complaint under the country's hate-speech law. The article noted that Dylan "could have phrased his thoughts better" but that the case does not have merit.

WASHINGTON POST. "Weathering Ukraine's Storm." The Washington Post (12/10, 4.28M) editorializes that a "negotiated settlement" is in the interest of both Ukrainian President Viktor Yanukovich and the opposition. The opposition has no legal means for compelling Yanukovich's exit, and Yanukovich "still needs the West." It is unlikely that Russia would be able to give Ukraine the financing that it needs to regain economic stability, which it could obtain with an agreement with the International Monetary Fund.

“A Challenge To The Castros.” The Washington Post (12/10, 4.28M) editorializes that Antonio Rodiles, a democracy activist in Cuba, has been a “driving force” behind a human rights conference to take place in his home in Havana. Rodiles has been imprisoned and threatened by state security forces for his activism, for which he returned to the country in 2007. The article speculated that the Castro regime believes that their state security apparatus “will be sufficient to intimidate or overpower a handful of people at a homespun human rights conference,” but that “from such living rooms grows immense change.”

“Mr. Graham Faces The Voters.” The Washington Post (12/10, 4.28M) editorializes that allegations DC Councilman Jim Graham “tried to get a businessman to withdraw” from the Metro development project “in exchange for support of the businessman’s separate bid for the lucrative lottery business” while on the Metro board should be considered by voters. The Post rejects Graham’s efforts to portray ethical questions as “old business,” because “voters knew little about that conduct when they reelected him in 2010.” The editorial states that while the “proven ethical lapse is not the totality of his record,” it is also not irrelevant.

WALL STREET JOURNAL. “How To Keep Workers Unemployed.” An editorial in the Wall Street Journal (12/10, Subscription Publication, 5.91M) criticizes the President for seeking another extension of unemployment benefits, arguing that the expansion of unemployment insurance is responsible for increasing joblessness.

“The Putin Media.” The Wall Street Journal (12/10, Subscription Publication, 5.91M) editorializes that Russian President Vladimir Putin’s decision to dissolve RIA Novosti, one of the official news agencies of Russia, points to hypocrisy on the part of Edward Snowden and Glenn Greenwald for denouncing US and UK spying while choosing to live in a country so hostile to freedom of the press.

“EPA’s Thin Legal Air.” The Wall Street Journal (12/10, Subscription Publication, 5.91M), in an editorial, makes the case that downwind states, whose pollution blows into neighboring jurisdictions, ought to have had the opportunity to address the pollution they are emitting before the EPA imposed limits on emissions. The Journal says the EPA also erred by imposing the same rules on all the downwind states no matter how much responsibility they bore for the pollutants that eventually traveled over the northeast.

“Thailand’s Revolution.” The Wall Street Journal (12/10, Subscription Publication, 5.91M) editorializes that Prime Minister Shinawatra’s call for elections was a responsible course of action, and the opposition as deluded in their belief that they represent the majority of Thais. The opposition can only hope to prevail through the intervention of the military or the king, neither of which have signaled support for the opposition.

Washington Schedule:

TODAY'S EVENTS IN WASHINGTON.

White House:

PRESIDENT OBAMA— Arrives in Johannesburg, South Africa; attends and delivers remarks at the National Memorial Service for Former South African President Nelson Mandela, First National Bank Stadium, open press; departs Johannesburg, South Africa.

VICE PRESIDENT BIDEN— Delivers remarks at the American Jewish Joint Distribution Committee (JDC) Centennial Celebration, Ronald Reagan Building and International Trade Center; hosts a meeting at the White House to discuss the Administration's efforts to increase access to mental health services; attends the Congressional Holiday Ball, White House, closed press.

FIRST LADY MICHELLE OBAMA— Attends the memorial service for Former South African President Nelson Mandela, First National Bank Stadium, Johannesburg, South Africa, open press.

US Senate: 10 a.m. FINANCE — Hearings to examine the nomination of John Andrew Koskinen, of the District of Columbia, to be Commissioner of Internal Revenue, Department of the Treasury. Witness: John Andrew Koskinen, of the District of Columbia, to be Commissioner of Internal Revenue for the term expiring November 12, 2017, vice Douglas H. Shulman, term expired. Location: 215 Dirksen.

10 a.m. HEALTH, EDUCATION, LABOR, AND PENSIONS — Hearings to examine the nomination of David Weil, of Massachusetts, to be Administrator of the Wage and Hour Division, Department of Labor. Location: 430 Dirksen.

11 a.m. APPROPRIATIONS — Subcommittee on State, Foreign Operations, and Related Programs hearings to examine assistance for Jordan and Lebanon. Witnesses: The Honorable Anne Richard, Assistant Secretary of State for Population, Refugees and Migration. The Honorable Alia Bouran, Ambassador, Hashemite Kingdom of Jordan. The Honorable Antoine Chedid, Ambassador, Lebanese Republic. Andrew Harper, Country Representative for Jordan, United Nations High Commissioner for Refugees. Ewen Macleod, Senior Policy Advisor, Syrian Refugee Response, United Nations High Commissioner for Refugees. Location: 138 Dirksen.

2:30 p.m. BANKING, HOUSING, AND URBAN AFFAIRS — Hearings to examine housing finance reform, focusing on the fundamentals of transferring credit risk in a future housing finance system. Witnesses: Wanda DeLeo, Deputy Director for Office of Strategic Initiatives, Federal Housing Finance Agency; Kevin Palmer, Vice President, Freddie Mac; Laurel Davis, Vice President, Fannie Mae; Ted Durant, Vice President of Analytic Services, Mortgage Guaranty Insurance Corporation. Location: 538 Dirksen.

2:30 p.m. COMMERCE, SCIENCE, AND TRANSPORTATION — Hearings to examine crafting a successful incentive auction, focusing on the stakeholders' perspective. Witnesses: Gary M. Epstein Chair, Incentive Auction Task Force and Special Advisor to the Chairman, Federal Communications Commission; Joan Marsh, Vice President, Federal Regulatory Affairs, AT&T Services, Inc.; Hal Singer, Senior Fellow, Progressive Policy Institute; Steven Barry, President and CEO, Competitive Carriers Association; Preston Padden, Executive Director, Expanding Opportunities for Broadcasters Coalition; Rick Kaplan, Executive Vice President, National Association of Broadcasters; Harold Feld, Senior Vice President, Public Knowledge. Location: 253 Russell.

2:30 p.m. FOREIGN RELATIONS — Hearings to examine the transition in Afghanistan. Witnesses: Ambassador James Dobbins, Special Representative for Afghanistan and Pakistan, U.S. Department of State; Donald L. Sampler, Jr., Acting Assistant to the Administrator, Office of Afghanistan and Pakistan Affairs, U.S. Agency for International Development (USAID). Location: 419 Dirksen.

2:30 p.m. HOMELAND SECURITY AND GOVERNMENTAL AFFAIRS — Subcommittee on Efficiency and Effectiveness of Federal Programs and the Federal Workforce hearings to examine administrative overtime at the Department of Homeland Security. Witnesses: Carolyn Lerner, Special Counsel, U.S. Office of Special Counsel; Ron Vitiello, Deputy Chief, Customs and Border Protection; Catherine Emerson, Chief Human Capital Officer, U.S. Department of Homeland Security; Brandon Judd, President, National Border Patrol Council. Location: 342 Dirksen.

2:30 p.m. INTELLIGENCE — Closed hearings to examine certain intelligence matters. Location: 219 Hart.

2:30 p.m. JUDICIARY — Hearings to examine certain nominations. Location: 226 Dirksen.

US House: 10 a.m. MINIMUM WAGE, PAY EQUITY — Congressional leaders will hold a press conference to call for the House to take action on behalf of low-wage workers this holiday season by increasing the minimum wage and securing pay equity for women. Democratic Leader Nancy Pelosi (D-CA); Rep. George Miller (D-CA), Senior Democrat, Education and the Workforce Committee; Rep. Rosa DeLauro (D-CT); Rep. Donna F. Edwards (D-MD). Location: HVC-215.

12 p.m. — The House will meet for morning hour and at 2:00 p.m. for legislative business. (This is a change from the previously announced schedule.)

9 a.m. FOREIGN AFFAIRS — Joint Subcommittee Hearing Subcommittee on Africa, Global Health, Global Human Rights, and International Organizations, and the Subcommittee on the Middle East and North Africa: Human Rights Abuses in Egypt. Witnesses: Panel I: Zuhdi Jasser, M.D., Vice Chair, U.S. Commission on International Religious Freedom. Panel II: His Grace Bishop Angaelos, General Bishop, Coptic Orthodox Church in the United Kingdom; Samuel Tadros, Research Fellow, Center for Religious Freedom, Hudson Institute; Morad Abou-Sabe, Ph.D., Professor Emeritus, Rutgers University, (Former President of Misr University for Science & Technology); Tad Stahnke, Director of Policy and Programs, Human Rights First. Location: 2172 Rayburn.

12:30 p.m. ENERGY AND COMMERCE — Subcommittee on Commerce, Manufacturing, and Trade Hearing on "The State of Online Gaming." The subcommittee will examine the current regulatory landscape for online gambling after the Justice Departments reinterpretation of the Wire Act. The subcommittee will also review H.R.

2666, the Internet Poker Freedom Act. Witnesses: John Pappas Executive Director Poker Players Alliance; Andrew Abboud Vice President of Government Relations and Community Development Las Vegas Sands Corporation; Geoff Freeman President and Chief Executive Officer American Gaming Association; Les Bernal National Director Stop Predatory Gambling; Kurt Eggert Professor of Law Dale E. Fowler School of Law Chapman University; Rachel Volberg, Ph.D. Associate Professor School of Public Health and Health Sciences University of Massachusetts Amherst. Location: 2123 Rayburn.

1 p.m. FOREIGN AFFAIRS — Hearing: "The Iran Nuclear Deal: Does It Further U.S. National Security?" with Secretary of State John Kerry. Location: 2172 Rayburn.

2 p.m. COMMERCE, SCIENCE, AND TRANSPORTATION — Continued Markup of: H.R. 2413, the "Weather Forecasting Improvement Act of 2013; H.R. 2431, the "National Integrated Drought Information System Reauthorization Act of 2013; H.R. 2981, the "Technology and Research Accelerating National Security and Future Economic Resiliency Act of 2013 and H.R. 3625, "To provide for termination liability costs for certain National Aeronautics and Space Administration projects, and for other purposes Location: 2318 Rayburn.

2 p.m. ENERGY AND COMMERCE — Subcommittee on Health Markup of H.R. 3527, the "Poison Center Network Act;" H.R. 1098, the "Traumatic Brain Injury Reauthorization Act;" and H.R. 1281, the "Newborn Screening Saves Lives Reauthorization Act." Location: 2322 Rayburn.

2 p.m. SCIENCE, SPACE AND TECHNOLOGY — Full Committee Markup will resume on H.R. 2413, the "Weather Forecasting Improvement Act of 2013, H.R. 2431, the "National Integrated Drought Information System Reauthorization Act of 2013, H.R. 2981, the "Technology and Research Accelerating National Security and Future Economic Resiliency Act of 2013 and H.R. 3625, "To provide for termination liability costs for certain National Aeronautics and Space Administration projects, and for other purposes. Location: 2318 Rayburn.

4:30 p.m. ENERGY AND COMMERCE — Full Committee Markup (Opening Statements only). Location: 2123 Rayburn.

Other: Dec. 10 – 11. NTSB – ASIANA CRASH – TWO DAY HEARING — Crash of Asiana Flight 214, San Francisco, CA, 7/6/2013 – The National Transportation Safety Board is convening a 2-day investigative hearing to discuss the ongoing investigation into the crash of Asiana Airlines Flight 214 and to gather additional factual information. The hearing, which will be held December 10-11, 2013, at the NTSB's Board Room and Conference Center in Washington, DC, will focus on pilot awareness in highly automated aircraft, emergency response, and cabin safety. Location: National Transportation Safety Board Conference Center, 429 L'Enfant Plaza.

DEFENSE FORUM WASHINGTON 2013 — 8 a.m. – 12:30 p.m. "Shaping the Maritime Strategy and Navigating the Budget Gap Reality." Policymakers and military leaders will discuss how budget cuts will affect the defense strategy of the U.S. sea services. Featured speakers: Ray Mabus, Secretary of the Navy; Sen. Kelly Ayotte (R-NH); Rep. J. Randy Forbes (R-VA); Sen. Tim Kaine (D-VA). Location: The Newseum, 555 Pennsylvania Ave. NW.

DEPARTMENT OF LABOR HALL OF FAME – PETERSON — 9:15 a.m. U.S. Secretary of Labor Thomas E. Perez will induct Esther Peterson into the Labor Hall of Honor at U.S. Department of Labor headquarters. Followed by a Panel discussion: "50 Years Later: A 21st Century Workforce."

AEI – OPENING MARKETS – SENATOR FLAKE — 10 a.m. Opening markets, unlocking opportunity: Senator Jeff Flake on trade promotion in Congress. Senator Jeff Flake (R-AZ), a member of the Senate Foreign Relations Committee, as he addresses the role Congress should play in expanding trade opportunities and increasing market access for US businesses. A panel will then discuss the current status of the TPP, trade promotion authority, and the Obama administrations trade agenda. Participants include Sourabh Gupta (Samuels International), Tami Overby (US Chamber of Commerce), and Derek M. Scissors (AEI). AEI's Arthur C. Brooks will begin the event with opening remarks, and AEI's Claude Barfield will moderate the discussion. [http:](http://)

INTERNATIONAL HUMAN RIGHTS DAY — 10 a.m. Press conference by stakeholders to observe International Human Rights Day by calling upon Congress to "slash runaway, dangerous military spending and meet critical domestic needs instead". Participating groups: Backbone Campaign; Coalition Against Nukes; Code Pink; Fellowship of Reconciliation, Freepress.org; Hunger Action Network of NYS; Global Network Against Weapons &

Nuclear Power in Space; Green Shadow Cabinet; Green Party of NY; Hip Hop Congress; Liberty Tree Foundation for the Democratic Revolution; No FEAR Coalition; Organic Consumers Association; Poor Peoples Economic Human Rights Campaign; PopularResistance.org; Roots Action; and US Labor Against War. Speakers include: Jill Stein, Green Shadow Cabinet; Cheri Honkala, Poor People's Economic Human Rights Campaign; David Swanson, Roots Action; Mark Dunlea, Hunger Action Network of New York State; Dr. David Schwartzman, Professor Emeritus Howard University and community activist. Location: Congressman John Conyer's office, 2426 Rayburn House.

TPP – SINGAPORE — 11 a.m. Telephone press conference: Members of Congress, Union and environmental presidents on outcomes of the Singapore Trans-Pacific Partnership Ministerial. U.S. Rep. Rosa DeLauro (D-Conn.); Leo Gerard, president, United Steelworkers; James Hoffa, president, International Brotherhood of Teamsters; Larry Cohen, president, Communication Workers of America; Mike Brune, executive director, Sierra Club (to be confirmed); Moderated by Lori Wallach, director, Public Citizen's Global Trade Watch.

SEQUESTER CUTS – DAMAGE – MEDICAL RESEARCHERS — 2 p.m. – 2:45 p.m. Media teleconference to release university researcher profiles and discuss how vast NIH budget cuts are plaguing U.S. research labs. Speakers: Representative Jackie Speier, (D-CA); Representative Scott Peters, (D-CA); Valerie Weaver, PhD, Professor, Departments of Surgery, Anatomy and Bioengineering and Therapeutic Sciences, University of California, San Francisco; Donald Small, MD, PhD, Director, Pediatric Oncology Division of, Sidney Kimmel Comprehensive Cancer Center; Laurie McCaskill, Chair, Board of Directors, Pancreatic Cancer Action Network, pancreatic cancer survivor; Carrie Wolinetz, PhD, President, United for Medical Research. DIAL IN: 888-417-8533, Conference Passcode: 7359517

ATLANTIC COUNCIL – TRANSATLANTIC FINANCIAL REFORM — 3 p.m. – 5 p.m. The Atlantic Council, TheCityUK, and Thomson Reuters will launch the second report in a series entitled The Danger of Divergence, followed by a high-level panel discussion on the future of international financial regulation. Speakers include: Christopher Murphy, US Senator and Report Co-Chair. Report overview by Mr. Christopher Brummer, C. Boyden Gray Fellow, Atlantic Council. 485 Russell.

REDUCING VIOLENCE AGAINST WOMEN – MENG — 3 p.m. – 5 p.m. The Global Womens Institute and We Belong Together will release a policy brief on immigration and violence against women with a keynote panel Violence Against Women as a Cross Border Issue. Speakers include: Mary Ellsberg, director, GW Global Womens Institute; Pramila Jayapal, co-chair, We Belong Together; U.S. Rep. Grace Meng, D-N.Y.; Terry O'Neill, president, National Organization for Women (NOW); Maya Raghu, policy and program attorney, Futures Without Violence; Jeanne Smoot, director of public policy, Tahirih Justice Center. Location: The George Washington University, Duques Hall, Room 151, 2201 G St., NW.

NATIONAL DEMOCRATIC INSTITUTE – DORSEY, POWERS — 7 p.m. National Democratic Institute's Democracy Dinner. Participants include: Jack Dorsey, chairman and co-founder of Twitter; Samantha Power, U.S. permanent representative to the United Nations; Madeleine K. Albright, former U.S. secretary of state and NDI chairman; Tom Daschle, former Senate Democratic leader and NDI vice chair; The Honorable Toomas Hendrik Ilves, president of Estonia. Location: The Ritz-Carlton Hotel, 1150 22nd St., NW

Last Laughs:

LATE NIGHT POLITICAL HUMOR.

Jay Leno: "You know that 85-year-old American who is being detained in North Korea? Returned home safely this past Saturday. Got home safely. His family said he is resting. He is in good spirits, and he's already planning his next trip to Pakistan. So he's very excited."

David Letterman: "Snowstorm all over the eastern two-thirds of the United States. It's really sad, because of the snowstorm, nobody can get to the unemployment office."

David Letterman: "You know what they did yesterday, they lit up— turned on the White House Christmas tree down there in Washington, DC. The entire week before they turn on the Christmas tree, Joe Biden, the Vice

President, is in the basement of the White House untangling the lights.”

Jimmy Fallon: “Let’s see what’s going on in Washington here. Vice President Joe Biden was happy to be back in the US on Saturday after spending six days in Japan, China, and South Korea. Of course, no one had the heart to tell him it was only a PF Chang’s.”

Jimmy Fallon: “Speaking of Biden, in a new interview, President Obama said that Joe Biden has what it takes to be a great President. And he added ‘Of the “Yo Gabba Gabba” fan club.’”

Jon Stewart: “Let us begin tonight with the National Security Administration which is the subject of the new ongoing series That Thing They Said They Are Not Doing, They Are Totally Doing.’ ... On the bright side, under this plan, if you like your NSA spy you get to keep your NSA spy so that is something.”

Briefing Materials for NM/NV Trip - December 10 - 13, 2013

Olson, Elizabeth <elizabeth_olson@ios.doi.gov>

Tue, Dec 10, 2013 at 3:07 PM

To: **Sally Jewell (b)(6)** <[REDACTED]@ios.doi.gov>, Laura Davis <laura_davis@ios.doi.gov>, Nicole Buffa <nicole_buffa@ios.doi.gov>, Katherine Rupp <katherine_rupp@ios.doi.gov>, Erin Walls <erin_walls@ios.doi.gov>
Cc: Zaina Javald <zaina_javald@ios.doi.gov>

Secretary Jewell,

Attached are your briefing materials for your NM/NV Trip. These are also located on Google Drive in the NM and NV Trip folder, and a binder with hard copies has been delivered to Erin.

Thank you,

-

Elizabeth

TALKING POINTS – SAGE GROUSE TASK FORCE MEETING – VERSION 3

Welcome

- Two years ago yesterday Ken Salazar met with Governor Mead and representatives of other states to begin work together to conserve this species
- Out of that meeting came this Task Force and an historic opportunity to conserve this species and its habitat so that listing the species under the ESA is not necessary.
- Thank in particular Governors Mead and Hickenlooper for their leadership of this effort

Unprecedented Collaboration

- To date, there has been unprecedented state and federal cooperation
- The BLM's "National Technical Team" Report and the FWS "Conservation Objectives Team" Report were produced through the collaboration of state and federal experts.
- The BLM and USFS land use plan amendments include consideration of a state-produced alternative for every state that offered one.
- We have provided states with the knowledge and tools at our disposal
- We have accomplished a great deal to date: a collective understanding of the conservation objectives, 98 draft land use plan amendments and revisions that are out or will shortly be out in the public domain, several state plans for conservation completed or underway

Critical Juncture

- But we have reached a critical juncture in this joint endeavor.
- Continued close cooperation will be even more important as we move forward
- BLM and the Forest Service intend to complete their plan revisions and amendments by this time next year to give FWS time to take them into account for their 2015 proposed listing determination
- To meet this timeline, BLM and the Forest Service must publish their final environmental analyses and proposed plans by next summer
- To be clear, six months from now, the BLM and USFS must be close to completing their final environmental analyses for the revisions and amendments of their plans.
- The states, too, must complete and begin to implement their own plans and programs for state and private lands on a similar timeline
- The clock is ticking

Top Line Assessment

- In September I asked my colleagues at Interior to ensure this meeting could be a frank and candid assessment of where we are today.

- In anticipation, most states prepared assessments of their own plans and programs
- I also asked my colleagues for preliminary thoughts on the draft BLM plans, though the review is ongoing
- Those assessments acknowledge that work remains to adequately address threats to the sage grouse identified in the COT report produced by state and federal officials
- I want to share a few of the high-level issues that emerged

Voluntary Actions

- Many of the state plans rely heavily – some almost exclusively – on voluntary actions
- Voluntary conservation measures are one possible approach, but you need to understand how FWS will evaluate them
- Two considerations will guide the FWS: first, the likelihood that voluntary measures will be implemented, and second, the likelihood that the measures will be effective
- Many of your staff are hearing from the FWS asking that you step beyond voluntary approaches and use your regulatory authorities to address threats
- Wyoming, for instance, has done so with a series of executive orders that provide the kind of regulatory certainty that the FWS can count and credit in their listing decision.
- For those of you relying on new voluntary programs: get them started as soon as possible so you can establish strong evidence of implementation and effectiveness by 2015
- But you should also think about doing more – think about using your state powers to ensure that necessary conservation measures are implemented.
- Understand that if there is not a regulatory guarantee that certain actions will take place and if there's not a proven track record of voluntary actions being implemented and being successful, FWS will not be able to credit those measures when making their listing decision

Private and State Lands

- Here's something else that I hope you'll consider.
- BLM and other federal lands comprise a majority of the remaining sage grouse habitat (58%), but effective conservation cannot be accomplished solely on federal lands.
- We are greatly appreciative of the ideas you've brought forward for how federal lands should be managed to conserve sage grouse, and we will continue to work with you to refine the plans for public lands in each state.
- But we need state conservation plans that apply to non-federal lands as well.
- If conservation measures for sage grouse are not shared across the landscape of public and private lands, then here's what will likely happen.
- The BLM and Forest Service will have to carry the conservation load on their own and the conservation measures they select will have to be more restrictive than if actions were being shared across entire landscape.
- The math here is fairly simple. And it's critical that we all take steps to get this right.

Science-Based Land Management Regimes

- The BLM, the Forest Service and the states will be making hard decisions on issues like the amount of disturbance the sage grouse can tolerate and the necessary buffer zone for activity occurring around leks
- The FWS, the BLM, the Forest Service and each of your people will have to spend the next few months looking at the best available science and determining how to craft final plans that will have the highest likelihood of conserving the sage grouse
- To be effective – and legally defensible – plans must address the threats to the bird’s survival in the remainder of its range based on the best available science

Rural Fire Protection Districts

- As an example, fire is one of the greatest threats to sage grouse in the Great Basin
- At FWS request, the Western Association of Fish and Wildlife Agencies convened a team of experts to look at the issue.
- That team identified expediting creation of Rural Fire Protection Districts -- local landowners trained to fight fire -- as one of the most important conservation actions we can take
- The State of Idaho worked with BLM and FWS to do exactly that
- Neil will talk more about this program in a few minutes.

Next Steps

- Over the next three months, the FWS will continue work with the States, BLM and the Forest Service to address comments and make needed improvements as appropriate to the land use plan amendments and revisions.
- In the spring, we intend to review all the BLM/FS plans to assess whether there are major gaps and weaknesses in how **together** they address the threats to the species across the range using the FWS Conservation Objectives Team Report as a guide.
- We URGE the states to provide their final conservation actions to the FWS as early as possible in February so that they can also be included in this evaluation of the conservation actions across the range of the sage grouse
- The results of that assessment will give all of us an opportunity to make further adjustments, as appropriate, before the BLM and Forest Service select final management alternatives
- In that way, we can work across the landscape TOGETHER, to develop plans that give us the best chance of conserving the species
- I’d like to reconvene to discuss the resulting plans at the June WGA meeting
- After that conversation, we can proceed to finalize the plans next fall so that the FWS will be able to consider the plans in its listing process

In summary

- The federal/state interagency cooperation to date has been unprecedented
- We are committed to continuing our partnership, working across the 11 state range of the grouse with the states and their experts, to develop a strategy to ensure viable sage grouse populations across the West.
- We're on track to meet our deadlines for finalizing the plans over the next 9 months
- Our efforts will only be meaningful if each of us develops strong, defensible science-based plans
- I appreciate all your efforts to date and
- I look forward to continuing our collaboration and hope for open communication over these next few critical months

EVENT MEMORANDUM FOR THE SECRETARY

WESTERN GOVERNORS ASSOCIATION WINTER MEETING – VERSION 3

DATE: December 12, 2013
LOCATION: Mandarin Oriental Hotel, Oriental Ballroom, Las Vegas, NV
TIME: 10:10AM – 11:45AM PST
FROM: Sarah Greenberger, Sr. Advisor (202)208-6726; Terri Johnson, Acting Director, OIEA (202)208-7513

Note: Edits are highlighted below in yellow.

I. PURPOSE

You will attend the WGA Winter Meeting on December 12 in Las Vegas, NV. You will be one of two Keynote Speakers kicking off the Combating Western Wildfires Plenary Session and YOU will also participate in the Governors' Luncheon sage grouse discussion (a separate Luncheon Briefing Memo is prepared for you). You will also participate in the Closing Press Conference / Public Launch of Crucial Habitat Assessment Tool. Approximately 220 people are attending this year's winter conference.

II. PARTICIPANTS

- Governors Attending the Conference:
 - John Hickenlooper (CO) – WGA Chair
 - Butch Otter (ID)
 - Steve Bullock (MT)
 - Brian Sandoval (NV)
 - Matt Mead (WY)
 - Gary Herbert (UT)
 - Jan Brewer (AZ)
 - Eruviel Avila, Governor of the State of Mexico
- DOI
 - Anne Castle, Assistant Secretary, Office of Water and Science
 - Lori Carmanian, Deputy Assistant Secretary, Office of Water and Science
 - Neil Kornze, Principal Deputy Director, Bureau of Land Management
 - Dan Ashe, US Fish and Wildlife Service Director
 - Michael Bean, Senior Advisor, Fish and Wildlife and Parks
 - Mike Connor, Commissioner, Bureau of Reclamation
 - Sarah Greenberg, Senior Advisor, Office of the Secretary
 - Jim Douglas, Director, Office of Wildlife Fire, DOI
- USG Attendees:
 - Robert Bonnie, Under Secretary of Agriculture, USDA
 - Jennifer Yezak, Director, Intergovernmental Affairs, USDA
- Other Attendees Representing DOI Interests

- Energy (solar, wind, natural gas, copper, petroleum, coal, and transmission interests typically attend.)
- Conservation - (Theodore Roosevelt conservation Partnership, National Wildlife Federation, National Association of Conservation Districts, The Nature Conservancy, The Wilderness Society, Environmental Defense Fund, and the Western States Water Council)

III. AGENDA

10:00AM Governor Eruviel Avila Villegas (Mexico) will deliver keynote remarks
 10:10AM You will be introduced by MT Governor Bullock; You will deliver keynote remarks; Governor Bullock will ask 2-3 prepared questions from the stage
 10:25AM Depart
 11:45AM WGA Closing Press Conference/Public Launch of Crucial Habitat Assessment Tool

IV. TALKING POINTS

Talking Points are attached as a separate document.

V. BACKGROUND

Western Governors' Association

The Western Governors' Association was established in 1984 and is an independent, nonprofit organization representing the Governors of 19 states and three US-Flag Pacific islands. Through their Association, the Governors identify and address key policy and governance issues that include natural resources, the environment, human services, economic development, intergovernmental relations and international relations. The current chairman of is Colorado Governor John Hickenlooper, who was elected in June 2013.

Current initiatives of the Association are energy generation; regional transmission expansion; weather and climate risk; water: supply, transfers, and drought; forest health; outdoor recreation and tourism; and wildlife corridors and crucial habitat.

Crucial Habitat Assessment Tool

The Western Governors' Crucial Habitat Assessment Tool (CHAT) is a cooperative effort of 16 Western states to provide the public and industry a high-level overview of "crucial habitat" across the West. This tool and several individual state CHATs have been developed pursuant to an MOU among WGA, DOI, and others. "Crucial habitats" are places that contain and connect the natural resources important to aquatic and terrestrial wildlife, including species of concern, as well as hunting and fishing species. The CHAT helps users in the pre-planning of energy corridors and transmission routes, or in comparing fish and wildlife habitat, by establishing a common starting point across the West for the intersection of development and wildlife. The tool is designed to enable industry to reduce time, costs, conflicts, and surprises while helping

government agencies ensure wildlife values are better incorporated into land use decision-making.

- The CHAT is non-regulatory and represents landscape-level analysis. For project-level review, additional information, data, and state consultation is necessary.
- Private landowner boundaries are not discernible on CHATs, which do not impose designations or identify species at the individual landowner scale. While some private land may appear marked as containing crucial habitat, that delineation has no regulatory or legal ramification.
- The CHAT is built from State wildlife agency data. States collaborated to ensure information in the regional viewer is comparable across the region. Arizona, California, Montana, Nevada, Washington, and Wyoming have developed state-specific CHATs. The Southern Great Plains CHAT depicts Lesser Prairie Chicken habitat across five states.
- The online tool is an example of WGA's ongoing work with Federal agencies, including FWS, BLM, and the Forest Service to enable use of state fish and wildlife data and analyses to inform land use, planning, and related natural resource decisions.
- CHAT development began in 2010, supported by a grant from the Dept. of Energy

VI. ATTACHMENTS

- Profiles of Attending Governors (*below*)
- Information Memo regarding WGA Issues of Interest
- Information Memo regarding Sequester Impacts on Payments to WGA States
- Talking Points (*attached separately*)

PROFILES OF ATTENDING GOVERNORS WGA

Governor John Hickenlooper (D-CO): WGA CHAIR - Governor Hickenlooper describes himself as a “recovering geologist now on loan to public service.” Elected in 2010, his priorities include making Colorado the model for energy policy by promoting an “all-the-above” energy policy that develops Colorado’s traditional and renewable resources in a balanced way, and with the highest ethical and public safety standards and making Colorado the healthiest state. Governor Hickenlooper serves in leadership positions with the National Governors Association and the Western Governors’ Association. He also serves as the Vice Chair of the Democratic Governors Association.

Governor Jan Brewer (R-AZ) – Ms. Brewer became governor in January 2009 following the resignation of Governor Janet Napolitano and reelected in 2010. She previously served as Secretary of State of Arizona from 2003 to 2009 and also served in the Arizona House of Representatives and State Senate from 1987 to 1996 including a four year period as Majority Whip. Arizona ranks as the nation’s second-largest solar market. In 2012 Arizona installed more utility-scale solar last year than any other state. Arizona now has edged out New Jersey for the number two slot, and trails only California in solar production.

Governor Butch Otter (R-ID) - Governor Otter has been Governor of Idaho since January 2007. He previously served three terms in Congress representing Idaho's 1st District from 2001 through 2006. Otter was the longest serving Lieutenant Governor of Idaho, holding office from 1987–2001. He is the first Idahoan since statehood to win elections as both a United States Representative and as governor.

Governor Steve Bullock (D - MT) - Steve Bullock, Montana's former attorney general, was elected governor in 2012. Since becoming Governor, Bullock has approved a request from Yellowstone National Park to move bison from a holding facility in the park, to an Animal and Plant Health Inspection Service facility for research and quarantine. He also supported the creation of the “Native Language Preservation Program,” a partnership between the State of Montana and tribal governments to preserve the languages of Montana’s Indian tribes and enhance the educational opportunities students have on Montana’s reservations, while protecting American Indians’ cultural heritage.

Governor Matt Mead (R-WY) - Governor Mead took office January 2011. He serves on the Council of Governors, a group of 10 governors chosen by the President to advise top federal officials on matters related to the National Guard and civil support missions. He also serves on the U.S. Homeland Security Advisory Council. In the National Governors Association, he is a member of the Natural Resources Committee. He is co-chair of the State and Federal Sage Grouse Task Force, which brings together federal officials and representatives of 11 western states for a regional conservation effort.

Governor Brian Sandoval (R-NV) - Brian Sandoval took office January 2011. He is a member of the Western Governors Association, National Governors Association, Republican Governors Association and the Hispanic Leadership Network. Governor Sandoval also serves as Vice-Chair of the NGA Health and Homeland Security Committee. He was recently appointed Chair-elect of the Education Commission of the States. Prior to becoming Governor, he served as a federal judge, and as the Nevada Attorney General. Sandoval was also the first Hispanic candidate elected to statewide office in Nevada.

Governor Gary Herbert (R-UT): WGA CHAIR - Gary Herbert became Utah's Governor in 2009. Before assuming the governor's office, he served as Utah's sixteenth Lieutenant Governor. Governor Herbert's priorities are education, energy, jobs and self-determination. The Governor currently serves as the Chair of the WGA and is a leading voice on energy issues in the West. He has made it a priority for the WGA to advocate for increased energy development on public lands.

Governor Eruviel Avila Villagas – State of Mexico - Governor Villegas is a member of the Institutional Revolutionary Party. He was Mayor of Ecatepec de Morelos twice, from 2003 to 2006 and from 2009 to 2012 and deputy of the State of Mexico's Congress from 1997 to 2000 in the LIII Legislature and from 2006 to 2009. He has been a teacher at UNITEC. He is author of the book *"The Creation of the Constitutional Court in the State of Mexico"* published in 2003, a joint publication of the Legislative Investigations Institute.

Robert Bonnie –Under Secretary of Agriculture for Natural Resources and Environment - Robert Bonnie was confirmed as Under Secretary in August, 2013. He previously served as a senior policy adviser for Secretary Vilsack. Bonnie worked for the Environmental Defense Fund from 1995 to 2008, holding a number of positions including vice-president of land conservation and wildlife and managing director of the Center for Conservation Incentives. He served on the board of visitors at the Duke University Nicholas School of the Environment and Earth Sciences, and was a member of the board of directors for the Piedmont Environmental Council and Scenic America.

INFORMATION MEMORANDUM FOR THE SECRETARY

DATE: December 4, 2013
FROM: Sarah Greenberger, OS, (202)208-6726; Terri Johnson, OIEA; Michael Bean, AS-FWP office; Gary Frazer, FWS; Pam Haze, AS-PMB; Amy Holley, PMB; Neil Kornze, BLM; Liz Klein, OS; Janet Lin, BLM; Maureen Foster, NPS
SUBJECT: Western Governors Association (WGA) Issues of Interest – VERSION 3

Note: Edits are highlighted below in yellow.

Note: Sage Grouse materials are included in a separate memo for the Task Force meeting.

WOLVERINE

In January, FWS proposed protections for the wolverine throughout the continental U.S. It opened a comment period that's set to end on December 10. Wildlife officials for Western states are asking for a 6-month extension of the listing deadline. FWS's position is that the available scientific evidence indicates that significant reduction of wolverine habitat is likely within 30 years.

Q: Is FWS considering a 6-month extension on the deadline for a final listing rule?

A: Yes. The Service is evaluating new comments received where we specifically requested comments on the issue of whether the climate models represent the best available science from which we can reasonably predict future effects. They will be making a decision shortly on whether a 6-month extension is warranted.

Q: Is the Service going to consider convening a panel of experts to look at the climate science and wolverine biology pursuant to the states concerns, as was requested by WY Governor Mead?

A: FWS is strongly leaning towards convening an expert panel to look at the climate science and wolverine biology unless information provided during the comment period makes this unnecessary.

Q: If wolverines are currently more numerous than they have been in the past 100 years, why were they proposed for listing?

A: Although wolverine populations have rebounded significantly since 1930, projections of future habitat under moderate climate change scenarios indicate that it is likely to be reduced by about 31% by 2045 and 63% by 2085. This projected loss would significantly affect the wolverines' ability to maintain populations in its current range and was the primary reason for our proposal.

Q: What is the status of any reintroduction or range expansion efforts?

A: Currently, the only reintroduction effort that is being considered is by the State of Colorado. It is very early and will require legislative approval along with a significant planning effort. The State has informed FWS that they are not interested in any reintroduction effort unless the wolverine is listed under the ESA, with a 10(j) rule to provide regulatory certainty and flexibility.

COLORADO RIVER

The Colorado River Basin has a problem: the ongoing drought that began in 2000 is one of the worst in a more than thousand years. While demand for water continues to grow, drought and climate change are causing supplies to dwindle. We are facing substantially decreased water levels in both Lakes Mead and Powell.

Current Hydrology:

Over the past 14 years, system storage in the Basin declined from nearly full to about 50 percent of capacity. If Lakes Powell and Mead had not been full at the start of this drought in 2000, the Basin would already be experiencing unprecedented crises. In water year 2013, inflow into Lake Powell was 47% of average, making it the **4th driest on record since 1964** (when Glen Canyon Dam was closed) and the two consecutive years (2012 and 2013) are one of the worst two-year periods in history. Despite these dry conditions, BOR was able to make the required delivery commitments, including environmental releases, in the Upper Basin in water year 2013 and anticipates meeting those commitments in 2014. BOR also met all delivery obligations to U.S. water users in the Lower Basin and to Mexico in 2013, and will do the same in 2014.

Issues and Challenges:

Throughout history, there has never been a shortage condition determined in the Lower Basin (Nevada, Arizona and California). Pursuant to agreement among the Basin States and DOI, a shortage is deemed to occur when Lake Mead reaches elevation 1075 feet. The elevation is currently around 1106 feet, but is forecast to reach 1084 feet **by next October**. Over the next 5 years, there is a potential for a shortage declaration, with probabilities ranging from less than 1% in 2015, to over 50% in 2018. At this point in the season, there is significant uncertainty regarding this coming winter's snowpack.

In the longer term, results from BOR's Colorado River Basin Study (undertaken in partnership with the Basin States) show that without proactive steps, we could be facing a 3.2 million acres-foot imbalance in future supply and demand by 2060. We need to take aggressive steps now toward solving this imbalance and protecting the vibrant economy of the Southwest.

DOI plays a key role across the Colorado River Basin and is committed to continuing to partner with Basin stakeholders to find new and better solutions. BOR has an established history of partnership with the Basin States which is founded on negotiation and compromise to resolve water issues within the Law of the River.

In June, you met with Basin States water representatives at the WGA meeting in Park City, and they committed to work together to identify solutions. Since that time, the Basin States have been working to identify actions to avoid reaching critical elevations in Lakes Powell and Mead should drought conditions continue. BOR has been providing technical expertise and support. The workgroup has identified broad categories of actions targeted at generating volumes of water to protect critical elevations in Lakes Powell and Mead including conservation, temporary demand reduction, and increased system efficiency. Many of these actions have significant political and legal sensitivities that must be worked through before public discussion, and hoped for adoption and implementation.

Although the Basin States remain committed to continuing discussions, there does not yet appear to be a consensus on which actions should be pursued at this time. The Basin States agree that the DOI is a key partner in each and every action under consideration, and privately some would concede that a push from the Department might help move things forward.

Minute 319

Implementation of the historic November 2012 agreement between the U.S. and Mexico on the Colorado River (known as "Minute 319") is well underway. Currently, effort is focused on planning for a potential environmental pulse flow in the spring of 2014 to benefit the riparian ecosystem in the River Delta. This is a joint effort involving the governments, scientists, and NGOs from both countries to design, execute, and monitor the ecological response to an unprecedented one-time pulse flow (simulated flood). All water for the pulse flow will be generated in Mexico through conservation; DOI will provide funding to generate 50 percent of that water.

While we are working to finalize necessary approvals for a pulse flow in 2014 (the Minute anticipates but does not require the flow take place next year), there are still issues to be resolved with Mexico and within the U.S. We are pressing to resolve these issues by **January 31, 2014** (the target date in Min. 319), as we strongly believe that a pulse flow in 2014 is the best option. Negotiating an extension of Minute 319 by December 2016 is a high priority, and a successful pulse flow will help pave the path to reaching an agreement.

BLM ARIZONA

Renewable Energy

Q: What renewable energy and transmission projects are moving through the DOI pipeline?

A:

- (1) The **Hyder Valley Solar Energy Project** has a draft EIS scheduled for late-2014. The project would generate up to 325 MW using concentrated solar thermal technology and include storage capability.
- (2) The **Maricopa Solar Park Project** has begun the scoping process—this photovoltaic project would generate 300 MW.
- (3) The **Sun Valley to Morgan Transmission Project** final EIS was issued in July 2013, and the ROD is pending resolution of 2 protests. The line is proposed to run for 38 miles, with about 8 of those miles on BLM land.
- (4) Two major lines – **SunZia and Southline** – are proposed to originate in New Mexico and cross into Arizona. BLM New Mexico is the lead for both projects. The record of decision for SunZia is pending protest resolution. The draft EIS for Southline is anticipated in late 2013 or early 2014.

BLM COLORADO

Q: What is the status of Thompson Divide and White River National Forest Oil and Gas leasing?

A: The Thompson Divide is 221,500 acres of primarily National Forest land west of Carbondale, Colo (Northwest District). Two companies – SG Interests and Ursa Resources – have submitted separate development proposals in this area. In April, the BLM approved the companies' request to suspend the leases, which were set to expire May 31. In granting the request, the BLM has identified the need to remedy a defect when the leases were issued – the lack of a BLM NEPA analysis – and has decided to undertake additional NEPA analysis to determine whether the leases should be reaffirmed or subject to additional mitigation measures for site-specific development proposals or voided. The Notice of Intent is anticipated to publish in December or early 2014, initiating a public scoping process anticipated to be very controversial.

BLM IDAHO

Q: What is the Gateway West Project and what is the status of the project?

A: The Gateway West project would construct nearly 990 miles of high-voltage transmission lines across southern Wyoming and southern Idaho to add 1,500 to 3,000 MW of capacity. In response to the Final EIS, Idaho Governor Otter noted concerns about land use plan amendments and sage grouse management, all of which were rejected by the both the BLM Idaho State Director and, on appeal, the Director of the BLM.

BLM MONTANA

Q: What is the BLM doing to improve the Section 368 energy transmission corridors plan?

A: Upgrading our nation's electrical grid is an important component of the President's Climate Action Plan and a major priority of the Administration. The President has identified seven high-priority transmission lines for expedited permitting, and DOI is leading on 5 of those. Already, DOI has approved the Susquehanna-Roseland transmission line in PA and NJ, and last month the BLM signed a ROD for the Eastern portion of the Gateway West transmission line that will allow the project to move forward while the BLM takes additional time to resolve siting concerns in Southwestern Idaho. The BLM continues to work on 3 additional Presidential priority lines, as well as a dozen or so other major projects across the West.

The Administration has also taken a more systematic look at how we permit these long, multi-jurisdictional projects with an understanding of the landscape. Under the leadership of CEQ, we are moving forward on developing an Integrated Interagency Pre-application process that will make this sort of coordination and cooperation the regular way of doing business.

The Administration is also working to improve the West Wide Energy Corridors designated by the BLM and Forest Service in 2009 as required by Section 368 of the Energy Policy Act of 2005. This upfront landscape-level planning is smart for land managers, communities, and developers alike, but it must be done in a collaborative way that considers the interests of states, communities, and stakeholders. A Federal interagency team is working to assess the utility of existing designated energy corridors and complete regional assessments that will examine the need for additions, deletions, and revisions to the existing energy corridors. In 2014, the BLM will look to a few key locations to focus on doing this cooperatively and collaboratively, with additional regional assessments following based on appropriations. I look forward to working closely with the western Governors to ensure that we can develop meaningful plans that avoid conflict in the first place.

Q: How will designation of Energy Corridors result in faster and more efficient siting and permitting for developers?

A: The issues with long, linear energy projects that take the most time and resources to resolve are those that are identified late in the permitting process. By initiating effective coordination at the pre-application stage with States, local communities, partner agencies, Tribes, and other stakeholders, the BLM can identify conflicts ahead of time, work with developers to adjust routes to avoid those conflicts, and develop stipulations that minimize and compensate for unavoidable conflicts. Future additions, deletions or revisions to corridors will involve amendments to BLM and Forest Service

land use and management plans. These planning efforts will include robust stakeholder involvement which will further reduce potential conflicts with siting future projects.

Q: How will agencies and districts coordinate corridor identification, location, and permitting?

A: The BLM is working with the Department of Energy and the Forest Service to coordinate on the early stages of conducting a corridor study and planning for regional corridor assessments, the first of which we expect to begin next year subject to appropriated funds. These targeted assessments will focus on priority regions and will be conducted in close coordination among the general public; governmental agencies; Native American Tribes; energy developers; non-governmental organizations; and others in the process of shaping energy corridor locations and use in the coming years.

Q: How will state energy plans be factored in to corridor planning decisions?

A: The Department of Energy is the lead agency working on the corridor study that will look at current and future energy supply and demand to inform the location of corridors. This analysis will consider state-level energy policy as a driver for future transmission needs.

Q: How will state siting and permitting processes be integrated into decision-making to contain costs and encourage state-federal coordination?

A: Whenever possible, the BLM will coordinate its reviews with state siting and permitting processes to ensure consistency. I understand that BLM staff are in communication with WGA staff on the most appropriate way to do this.

BLM UTAH

November 2013 Oil and Gas Lease Sale

Q: What is the economic impact of the sale and development of O&G leases on UT public lands?

A:

- In FY 2012, the State of Utah received more than \$164 million from royalties, rentals and bonus bid payments for federal minerals and energy development, including oil and gas.
- The BLM-Utah State Office currently administers almost 4 million acres of public mineral estate that is leased for oil and gas development.
- The extraction of oil and gas resources and their introduction into the market generated more than **\$5.5 billion in direct economic benefits and more than \$8.3 billion in total economic impacts in FY2012.**

Q: How did the BLM Utah determine that 44,021 acres of public lands in Utah were appropriate for oil and gas leasing and responsible development for the Nov 19 oil and gas lease sale?

A: Nearly 1.1 million acres in the Green River District were nominated by industry for oil and gas leasing. However, after evaluating these lands for occupied Greater sage-grouse habitat and areas included in proposed Master Leasing Plans and to ensure statutory availability for leasing, the preliminary lands list sent for further analysis contained 664,756 acres. In keeping with leasing reform standards and considering field office workloads, the Green River District Office subsequently deferred 521,339 acres of the lands contained in the preliminary list. After completing the environmental analysis, BLM Utah posted a Notice of Competitive Lease Sale in August that

contained the proposed final parcel list for the November 2013 oil and gas lease sale, included 82 parcels covering 143,981 acres in the Price and Vernal Field Offices.

Posting the notice initiated a 30-day public protest period that closed in September. The BLM Utah received 431 timely filed protests, including those from the Southern Utah Wilderness Alliance, Sierra Club, Natural Resources Defense Council and Rocky Mountain Wild. Protests stated concerns with air quality, climate change, sensitive species, lands with wilderness characteristics, visual resources, and the Nine Mile Canyon Area of Critical Environmental Concern.

After further consideration, BLM Utah deferred an additional 99,960 acres from the sale for a range of reasons, including but not limited to: (1) concerns with cultural resources; (2) potential impacts to the Old Spanish Trail; (3) potential impacts to the Graham's and White River penstemon; and (4) non-Wilderness Study Area lands that have been inventoried and determined to contain wilderness characteristics but are not managed for their wilderness values. The BLM sold 29 of the offered parcels, receiving \$3,340,266 in bonus bids. The sale also brought in \$54,724 in rental fees and \$4,495 in administrative fees, grossing \$3,399,486 in total receipts.

Q: Why did the BLM-Utah Nov. 19 oil and gas lease sale receive so much public/media attention?

A: The sale received heavy media attention due to: 1) activist groups and citizen concerns that 51 proposed parcels intersected with citizen-proposed wilderness included in proposed Red Rocks Wilderness legislation or were located in the vicinity of Utah's San Rafael Swell; and 2) industry and county government concerns that the BLM had deferred too many parcels from the 1.1 million acres initially nominated by industry.

BLM WYOMING

BLM fracking rule

Q: Has the State of Wyoming taken a position on the BLM's fracking rule?

A: Governor Mead may ask that Wyoming's fracking rule be deemed in compliance with the proposed Federal rule because he feels Wyoming's fracking rule already meets or exceeds the standards in the proposed Federal rule.

Q: Will the BLM determine that Wyoming's fracking rule is in compliance with the proposed Federal rule?

A: It's too soon to say since the rule is not final, but we appreciate Wyoming's willingness to work with the BLM in the formation and execution of the BLM's rule regarding hydraulic fracturing. While Wyoming's regulations meet or exceed the standards in the proposed Federal rule on certain provisions, there are some differences to reconcile before we can reach any conclusions.

Oil and gas issues

Q: How have budget issues affected the oil and gas program in WY?

A: The BLM Wyoming is consolidating staffing levels by eliminating or not filling vacant positions, and has reduced funding support for the inspection and enforcement program since Energy Policy Act funding for energy pilot offices is due to expire in 2015. Budget funding impacts have also caused the elimination of four assistance agreements with State agencies designed

as cooperative efforts to accelerate oil/gas drilling permit processing. As a result, oil/gas drilling permit processing will take longer in Wyoming. BLM is reviewing possible alternatives to replace the shortfall in oil/gas funding with the future elimination of receipts (i.e. extend 9141 funding by legislation, increase oil/gas program revenues, or reduce expenses/cost savings). Because of other budget issues, such as a reduction in MLR funding due to the sequester, BLM Wyoming is following the national priorities: 1) inspection and enforcement, 2) processing applications for permits to drill (APDs), and 3) oil and gas leasing. Total funding reductions in the BLM Wyoming oil and gas program since 2010 total about \$5.2 million for an overall reduction of 15%.

Wild horses

Q: Why is the BLM Wyoming conducting a wild horse gather?

A: The BLM must remove wild horses that have strayed onto Rock Springs Grazing Association (RSGA) private lands under an April 3, 2013, consent decree approved by a U.S. District Court Judge. The consent decree resolves *Rock Springs Grazing Assoc. v. Salazar*, requiring removal of wild horses from private lands. The BLM must gather and remove horses in Salt Wells Creek/Adobe Town (AT/SW) in 2013, Great Divide Basin in 2014 and White Mountain in 2015. The AT/SW gather commenced on November 22, 2013.

BLM FIRE AND AVIATION TOPICS

DOI's primary goal each fire season is to ensure safety for firefighters and the public. Unfortunately, 34 firefighters lost their lives in the line of duty in 2013, the most since 1994. The number of fires this year stands at about 44,000, which is about 65% of the ten-year average. Much the same is true of acres burned (about 4.1 million), roughly 58% of the decadal average. It's worth noting that the reason for the lower figures is the very slow fire seasons in the Southeast and Southwest. In other areas, fire season was within the bounds of a normal season. As of late November 2013, DOI has spent about \$394 million on fire suppression in 2013.

Q: Did the budget sequester harm firefighting efforts in 2013?

A: We were fortunate in one respect: that the national fire season was lighter than expected in some areas. However, in August, we did reach the highest of what we call "preparedness levels" for the first time in 5 years, so there was a time when fire activity was intense. The Forest Service estimates that it employed about 500 fewer firefighters this year because of budget cuts directly related to the sequester. The four DOI agencies with fire programs estimate the number to be about 230. When the western fire season peaked the third week of August, would it have been good to have another 730 or so firefighters available? Yes. We give great credit to firefighters and fire managers at all levels for the work they did with the resources they had. But a better, more suitable funding means for wildfire management needs to be adopted. Across-the-board mandatory budget cuts are not the best way to protect life, property, and natural and cultural resources from wildfire.

Q: The DOI budget for reducing fuels dropped substantially in 2013 and is scheduled for even greater cuts in the President's 2014 budget. You've been quoted as saying the nation cannot afford to allow fuels to build up again and thereby increase the danger from wildfires. How do you reconcile those two apparently contrasting points-of-view?

A: Our nation is in a difficult budget situation and tough choices need to be made, and fire management is not exempt from those discussions. But when it comes to fire management, an

ounce of prevention is worth a pound of cure. And we have the data now to demonstrate that fuels reduction work is effective at slowing the growth of wildfires. We need to figure out ways to efficiently manage fuel loads and thereby reduce the risk from wildfire to communities and natural resources. We are working with our partners and within the Administration to come up with a better approach to address the problem.

Q: What are the three most important things that need to be done to reduce wildfire risk?

A.

- Shared responsibilities. State, local communities, private landowners, as well as Federal agencies, must all work together to ensure that they have the appropriate standards and compliance programs in place to prevent, respond, and recover from wildfire. This is far from a federal problem. Some of our worst fires this year occurred on private lands under state or local protection. The interagency, intergovernmental Cohesive Strategy is key for everyone to work together to increase the fire resilience of our landscapes, create fire adapted communities, and respond effectively to unwanted fire.
- Landscape level approaches. In order to make our forests and rangelands more fire resilient, we must have a broader and more holistic strategy. Fires will occur; our ability to respond to and recover from them depends upon multiple management tactics and collaboration across jurisdictional boundaries. In addition to reducing abnormal fuel loads and concentrations and protecting key infrastructure, success depends on cooperative, landscape scale efforts that involve all landowners and managers.
- Consistent and adequate appropriations. In order to maintain a commitment to preparedness and planning to enable initial attack success, as well as to effectively continue our work in hazardous fuels management and restoration activities, we must have a more concerted and consistent approach to our budgeting process.

Q: What are the biggest obstacles to doing those things?

A:

- Culture - we need to accept that fire is a fact of life in many parts of the country, that everyone has a responsibility for prevention and mitigating risks of fire, but we can't make it go away. A partnership of funding, of planning, and taking appropriate steps to reduce fuel loading, implement sound planning and building codes, and personal actions is required.
- Our preparedness programs, in particular, our fuels management program, do not concentrate resources where they are most needed. Many of our forests and rangelands have concentrations of fuel that contribute to severe fire behavior and large fires. The combination of decades of overly aggressive fire suppression, changing environmental conditions, and increased settlement in and around wildlands require resources, management action, and authorities (such as permanent authorization of stewardship contracting) to implement fuels treatments on a sufficient scale to make a difference.
- Continued budget challenges - we recognize we are in a period of constrained budgets, but short term "CR's" and across the board reduction without regard for priorities make it extremely difficult for fire managers to plan and make investments in staffing, equipment, and technology. We need long-term, stable funding to build and maintain a high quality fire management capability.

SECRETARIAL ORDER 3330

Q: What additional mitigation requirements do you foresee as a consequence of Secretarial Order 3330, and how do you plan to reconcile those new requirements with the President's instructions to streamline federal permitting of certain infrastructure projects?

Q: Will a 'test' of reasonableness be developed to ensure that proposed mitigation strategies can be reasonably applied without excessive cost to developers of energy infrastructure?

A: I didn't issue SO 3330 with the agenda to adopt specific new mitigation measures. Rather, we want to harmonize the many existing mitigation policies and practices of the Department's various agencies to minimize redundancy and maximize efficiency in our review and permitting process. And we want to take a holistic landscape-level approach to mitigation that meshes with the policies and actions of other agencies, whether they be federal, state, local or tribal. We expect and intend that this approach will both reduce confusion and delays experienced by those who seek permits or other approvals from DOI agencies, and lead to more coherent and effective management of our landscapes.

The first jobs for the Task Force are to gather up and review all the existing mitigation policies, guidance, and requirements currently being applied by Interior's agencies and to consult with our sister agencies to ensure that our actions will be well coordinated with those of other agencies. At this point, the Task Force has not identified any specific actions that it will recommend.

RECLAMATION ISSUES

Quagga Mussel Infestation and Control on the Lower Colorado River

Three major BOR facilities on the lower Colorado River – Hoover, Davis, and Parker dams – are currently impacted with heavy infestations. This mussel colonization has increased operations and maintenance activities and associated costs. Action plans to address the presence of these mussels are in place for all three facilities and the annual budget for mussel control ranges between \$700 thousand to \$1.2 million. Current mussel control efforts are focused on testing and development of a variety facility protection technologies and strategies that are environmentally safe. To date, restrictions or interruptions of water and power deliveries have not been required at these facilities due to mussel infestation.

NOTE: *You may be asked by Gov. Otter of Idaho about Reclamation's quagga mussel control efforts at Lake Mead. The concern is infected boats trailered from Lake Mead to Idaho waters.*

A: Quagga mussels have not been found in Idaho waters to date, and the Idaho State Department of Agriculture has established a watercraft inspection station program to inspect boats from impacted states. The technology to control invasive mussels in large open water bodies such as Lake Mead has not been developed; therefore, Reclamation's focus is on facility protection.

EVENT MEMORANDUM FOR THE SECRETARY

SAGE GROUSE TASK FORCE MEETING – VERSION 3

DATE: December 12, 2013
LOCATION: Mandarin Oriental Hotel, Las Vegas, Room TBD
TIME: 12:30PM – 1:30PM PST
FROM: James Lyons, Counselor, ASLM (202)208-6734; Michael Bean, Counselor, ASFWP, 202-208-7400; Sarah Greenberger, Senior Advisor, 202-219-2140; Neil Kornze, Principal Deputy Director, BLM; Dan Ashe, Director, FWS; Ted Boling, SOL; Bret Birdsong, SOL

Note: Edits are highlighted below in yellow.

I. PURPOSE

You will make remarks over lunch to begin the meeting of the Sage Grouse Task Force, immediately following the close of the Western Governors Association's winter meeting. The Governors of several of the eleven states covering the range of the Greater sage-grouse are expected to attend. The primary purpose of your remarks is to provide a status assessment on the collective efforts of the states, the BLM, FWS, and others to conserve the greater sage grouse. In particular, you will underscore the need for continued close collaboration, in light of the fast-approaching September 2015 deadline for the FWS to decide whether to propose to list the sage grouse for protection under the ESA. You will also emphasize that the extent of state-federal collaboration that has been ongoing for the past two years is unprecedented under the ESA.

The Sage Grouse Task Force resulted from a 2011 initiative of former Secretary Salazar. The Task Force is co-chaired by Governors Mead (WY) and Hickenlooper (CO), and the Director of BLM. Each of the eleven sage grouse states has a Governor-appointed representative to the Task Force. In addition, representatives of two DOI agencies (BLM and FWS) and two USDA agencies (USFS and NRCS) serve on the Task Force. The Task Force meets approximately every other month. This will be the first meeting of the Task Force at which any Governors will attend. It will also be the first occasion that you have met with the Task Force.

II. PARTICIPANTS

Confirmed:

- Governor Hickenlooper (CO)
- Governor Mead (WY)
- Governor Sandoval (NV)
- Neil Kornze, Principal Deputy Director, BLM
- Dan Ashe, Director, FWS

Expected:

- Governor Otter (ID)
- Governor Bullock (MT)
- Governor Herbert (UT)
- USDA Under Secretary Robert Bonnie

Each principal is allowed one staff person in the meeting.

III. AGENDA (*tentative*)

- Governor Hickenlooper (CO) will open the conversation and introduce you
- You give remarks
- Neil Kornze gives remarks
- Dan Ashe gives remarks
- Open to the Governors

IV. KEY FACTS

- In 2010, FWS determined that listing of the greater sage grouse under the ESA was warranted but precluded by higher listing priorities.
- The primary bases for the decision that listing was warranted were the loss and degradation of habitat and the lack of adequate regulatory measures to address threats to the species
- Threats to the grouse are many and vary in significance across the specie's range. They include the loss and degradation of habitat from fire, invasive plants, and energy development, among others.
- FWS has a deadline of September 2015 to decide whether to propose to list the greater sage grouse or any distinct population segment of the species
- To put stronger regulatory measures in place, BLM and the Forest Service (USFS) are revising all of their land use plans within the extant range of the sage-grouse to consider alternative conservation measures for sage grouse
- NRCS is investing heavily in a Sage Grouse Initiative that provides substantial funds to acquire conservation easements and to support the implementation of beneficial land management practices primarily on private lands by ranchers and other landowners.
- There has been unprecedented state-federal collaboration through the Task Force and:
 - When BLM sought scientific advice on sage grouse conservation needs, it assembled a National Technical Team that included state and federal scientists
 - When FWS was asked to provide as much clarity as it could regarding criteria for listing the species, it assembled a Conservation Objectives Team made up of state and federal representatives. That team's resulting "COT Report" is a first of its kind, carefully balancing states' request to clarify the conservation goal, but to leave room on how to meet that goal
 - When BLM and USFS developed 15 draft Environmental Impact Statements to evaluate amending or revising 98 land use plans, they included consideration of a state-produced alternative for every state that offered one.
 - The FWS is currently developing a database to ensure that all conservation activities for this species are accurately captured for consideration in 2015. The states have provided valuable input to this effort.
- The Task Force consists of a representative of the Governor of each of the 11 sage grouse states, plus FWS, BLM, Forest Service, and NRCS
- Although FWS has proposed to list the Gunnison sage grouse (a separate species) as endangered and the "bi-state" population of greater sage grouse as threatened, these are independent proposals that do not foreshadow any particular outcome for the greater sage grouse.

V. HOT TOPICS/Q&A

Q: What do you have to say about legislative efforts?

A: I think we are best off to focus our energy and resources on something that we can control - using this collaborative process between states and the feds to put in place strong, science-based, legally defensible measures to conserve the Greater Sage Grouse. Passing legislation these days is an uncertain proposition at best.

That said, I and my team, are happy to review any legislative efforts which bolster our efforts to conserve the species, but I am very concerned any effort to delay the deadline could be counterproductive. Kicking the can down the road could leave us in a place where the habitat and the bird are in worse shape than they are today.

Q: How is the DOI responding to the Western Energy Alliance letter?

A: These reports were the result of a collaborative effort between scientists and managers from state and federal agencies. The reports were based on the best available scientific information, including status of greater sage-grouse, the nature of threats facing the species, and the conservation objectives needed to ensure its long-term survival, *and considered the many state and federal conservation measures already in place. They were fully peer-reviewed by subject matter experts and met the Department's scientific standards.*

[Background: The Western Energy Alliance (WEA) expressed concerns about DOI documents on greater sage-grouse in a November 19, 2013 letter to the Secretary. Their primary concerns are with two documents: A Report on National Greater Sage-grouse Conservation Measures prepared by the Sage-grouse National Technical Team (NTT Report); and the Greater Sage-Grouse Conservation Objectives: Final Report (COT Report). *The WEA letter has been entered into the Department's scientific integrity process and an inquiry is underway. Because of this, it would be inappropriate to comment further.*]

Q: What assurance do I have that my state won't have to carry an unequal share of the burden for conserving the SG?

A: About 60% of the sage grouse habitat is on federal lands. The remainder is on state and private lands. In order to conserve the Greater Sage Grouse, we need to develop an action plan that adequately addresses the threat to the bird across the landscape of federal, state, and private lands. We intend to use the next 6 months to work with each of you and the other governors in the 11 sage grouse states to develop a balanced conservation strategy. So, the burden shouldn't fall on any one state, provided we all work together to make a sincere effort to conserve the bird and address specific threats to its survival.

Q: Are you saying my plan (pick a state) is a bad plan?

A: There is no such thing as a bad plan. To date, the level of collaboration and cooperation is unprecedented. But, in the end, we need to be sure that the FWS is confident that the conservation measures proposed by the BLM, Forest Service, and each of the states will be

implemented and will be effective. Where the FWS determines there are inadequacies in specific plans or where there is some question that the conservation measures proposed can be implemented, we'll need to fix those inadequacies. If we work together, across the landscape, to do our best to put together a strong and effective conservation plan, we will be successful.

Possible Questions from Governor Sandoval

Q: Despite years of work by Nevada, Natural Resources Conservation Service, and Bureau of Land Management, the Fish and Wildlife Service felt the bi-state population of the greater sage grouse merits ESA protection. What is different about the greater sage grouse determination to be made in 2015? Will the Fish and Wildlife Service find protection is needed despite all the work that has been done by the States and others?

A: In terms of the decisions on whether ESA protection is merited, there are two major differences between the bi-state population of the greater sage grouse and the greater sage grouse species. One is scale. The bi-state population only occurs in a relatively small area of Nevada and California. The occupied range and the numbers of bi-state sage grouse are quite small compared to the range and numbers of the greater sage grouse across 11 states. That means the effects of habitat loss caused by fire and invasive species more quickly impact the bi-state sage grouse. The greater sage grouse species, because of its larger range and greater numbers is more resilient and there are more opportunities to mitigate the threats. Secondly, the Fish and Wildlife Service had to make an ESA finding for the bi-state in 2013, two years before a finding is due for the greater sage grouse. That means we have more time to find solutions for the greater sage grouse. But we cannot be complacent. There is much work to be done in the next two years and it will require hard work and sustained effort by all partners to reduce the threats to the greater sage grouse.

Q: Why are you proposing to list the bi-state population of sage grouse when the numbers have been stable or increasing over the past decade?

A: Sage grouse populations naturally fluctuate from year to year. We could disagree on the trend in bi-state sage grouse numbers, but the real problem is that the number of areas populated by bi-state sage grouse have decreased, the rate of habitat loss because of juniper encroachment has increased, and the danger from wildfire, fueled by invasive species has increased.

Q: Given the work that has been done on the bi-state population of the sage grouse by so many, especially the State of Nevada, what will you accomplish by listing this bird other than alienating all the groups that have been working to conserve it?

A: We greatly appreciate all the hard work that has been done by so many, and I point out that the Fish and Wildlife Service has yet to make a final decision on the listing. However, the ESA requires that the listing determination be made on 5 threat factors at the time of the decision, not at a future date. The 5 factors are: loss of habitat, overuse for human purposes, disease or predation, inadequate existing regulations, and other natural or human caused threats. The Fish and Wildlife Service has to determine whether cumulatively the threats put the bird at risk of becoming endangered now or in the foreseeable future. Despite the good work and good intentions of all the parties that have contributed to conservation efforts thus far, last September

the Fish and Wildlife Service determined that the threats to the bi-state population were still too great and that listing is warranted.

However, the Service also proposed a special rule that would exempt from ESA regulation any impacts to sage-grouse in the bi-state population incidental to implementing these ongoing conservation efforts. We acknowledge the good work of those partners and want to avoid any disincentive for those partners continuing their conservation efforts.

Q: If states like Nevada must ensure adequate funding to address significant, large-scale threats beyond state control such as invasive species and fire in order to preclude the need to list sage grouse, then how can we succeed in our conservation planning efforts?

A: Finding the resource to address such difficult, landscape level, inter-jurisdictional needs is a challenge we all face, and we'll all have to work together to tackle these issues. The Service will have to be confident that conservation plans will be funded and implemented if they are to give them weight in their listing determination. If we work together and creatively, I don't think these challenges are insurmountable.

Possible Questions from Governor Hickenlooper

Q: I have expressed to the Fish and Wildlife Service my strong opinion that the Gunnison sage-grouse does not warrant listing under the ESA. Can you assure me that they will pay close attention to my concerns?

A: I know that the Service has heard your concerns and those of others about the proposed listing. In response, they have extended the deadline for making a final listing determination to provide for additional time to resolve issues of scientific uncertainty that have been raised. The decision on whether to list rests with the Director of FWS, and he is obligated to make it solely on the basis of the best available science, but I know that he will consider the information provided by the State of Colorado in that regard.

VI. TALKING POINTS

Talking Points are attached as a separate document.

VII. ATTACHMENTS

- Draft Talking Points (*attached separately*)
- Summary of State Plan Assessment (*below*)

State Plan Summary (revised December 9, 2013)

California. A 2004 state plan has been supplemented by three local plans. Plans are advisory, not regulatory. Relatively little habitat and few sage grouse remain in the state. Fire is a key threat.

Colorado. Its self-assessment has only recently been received. Significant easement acquisition effort has been undertaken. State wildlife agency recommendations to the oil and gas commission are advisory, and an evaluation of whether those recommendations have been followed is ongoing.

Idaho. A strong adaptive management component is the key feature in a plan that focuses entirely on BLM lands. Idaho has been a leader in promoting the development of rural fire protection associations.

Montana. A detailed strategy to implement Montana's 2005 plan is expected by January. FWS is concerned about inadequate lek buffer distances in non-core areas, uncertain regulatory authorities, and lack of a prohibition against prescribed burning of sage brush.

Nevada. Plan puts a heavy emphasis on a compensatory mitigation program that is not yet developed. Nevada's self-assessment acknowledged that most plan components are insufficient to meet COT objectives.

North Dakota. State expects to complete a revision of its 2005 plan by the end of December. FWS is concerned that the plan relies too heavily on voluntary measures.

Oregon. Although several months away from completion, Oregon's "All Lands, All Threats" plan is ambitious in scope. The draft plan has many strong features, including a lower disturbance cap (4%) than that of other states. Oregon has only recently submitted a self-assessment

South Dakota. A revision of the state's 2008 plan has not yet been completed. FWS has not been able to evaluate the state's effort against the COT objectives.

Utah. Utah has not provided a self-assessment. The plan sets ambitious population and habitat goals. However, FWS is concerned that it relies entirely on voluntary measures and excludes protection for two key populations.

Washington. The state has not provided a self-assessment. State expects to complete a review of its efforts in 2014.

Wyoming. Although Wyoming did not submit a self-assessment, its "core area strategy" has been in place for several years and appears to be working well. The Wyoming core area strategy served as a model for most other states.

Background on Sage Grouse Science and COT report

Lyons, James <james_lyons@ios.doi.gov>

Tue, Dec 10, 2013 at 3:50 PM

To: [REDACTED]@ios.doi.gov" [REDACTED]@ios.doi.gov", Elizabeth Olson <elizabeth_olson@ios.doi.gov>, Laura Daniel Davis <Laura_Davis@ios.doi.gov>, Sarah Greenberger <sarah_greenberger@ios.doi.gov>, Michael Bean <michael_bean@ios.doi.gov>

Sally --

Not to overwhelm you, but I have put together several short summaries of information from key science reports/assessments that we have mentioned in our various briefings with you.

Each is a short summary of key findings/observations/recommendations from the reports.

The specific reports I reference are:

1. **National Technical Team report**, developed in Dec 2011 by the BLM to aid in developing its national planning strategy. The team included BLM, USGS, FWS, and state wildlife agency members;
2. **Conservation Objectives Team report** delivered in March, 2013 and developed by state fish and wildlife agency and FWS experts; and
3. a **USGS report** (2013) that provides baseline information on policies, programs, and activities affecting the GSG.

I also referenced a more recent article by Copeland, et al that assessed GSG conservation efforts in Wyoming, with a particular focus on the importance of private land conservation.

Finally, I also attached a power point presentation developed by the BLM planning staff that can provide a quick overview of the process to date and some of the challenges that lie ahead.

Glad to go into detail on any of these if you like. You seemed interested in the underlying science, and this is a mix of the key summary points/observations/ recommendations from the reports that are guiding our national strategy. Good airplane reading.

See you in Vegas.

Jim

State of the Science on Sage Grouse

A number of important reports have been issued over the past decade that help inform understanding of the status of the Sage Grouse, factors affecting the species, key threats to the species continued viability, and options for changes in current land and resource management and policy that could help maintain the species and avoid listing:

- 2006 – The Western Association of Fish and Wildlife Agencies (WAFWA) issued a report, “Greater Sage-Grouse Comprehensive Strategy”, highlighting challenges to the continued viability of the Greater Sage-Grouse and identifying 7 distinct management zones to characterize resource conditions for purposes of guiding future management decisions with regard to the Sage-Grouse.
- 2011 – BLM chartered a National Technical Team (NTT) to “develop new or revised regulatory mechanisms, through resource management plans, to conserve and restore the greater sage-grouse and its habitat on BLM administered lands on a range-wide basis over the long term.” The NTT included resource specialists and scientists from the BLM, State fish and wildlife agencies, USFWS, Natural Resources Conservation Service, and the USGS and produced a report (December, 2011) which “provides the latest science and best biological judgment to assist in making management decisions.” The report identifies and focuses on threats to the sage-grouse in each of the identified management zones.
- 2013 – In February, the Director of the USFWS asked the affected states to join the Service in convening a Conservation Objectives Team (COT) to “develop rangewide conservation objectives for the sage-grouse to define the degree to which threats need to be reduced or ameliorated to conserve sage-grouse so that it is no longer in danger of extinction or likely to become in danger of extinction in the foreseeable future”. (In fact, the COT effort was backed by the Sage-Grouse Task Force chaired by Gov’s Mead and Hickenlooper and the Director of the BLM. Each state member of the task force was chosen by his or her state or agency.) A key outcome of this effort was the identification of Priority Areas of Conservation (PACs) described as key habitats that are essential for sage-grouse conservation (Letter from USFWS Director Dan Ashe, March 22, 2013).
- 2013 -- More recently, the USGS, in cooperation with the Bureau of Land Management, issued a comprehensive assessment of the science and status of the sage-grouse and factors affecting the species and the sage brush ecosystem on which it depends. *Summary of Science, Activities, Programs, and Policies That Influence the Rangewide Conservation of Greater Sage-Grouse (Centrocercus urophasianus)*. This report (which was issued by Sec. Jewell and USGS Acting Director Kimball) is extremely detailed and *complete*. It highlights the fact that “[T]he cumulative and synergistic impact of multiple disturbances, continued spread and dominance of invasive species, and increased impacts of land use continue to have the most significant influence on the trajectory of sagebrush ecosystems and sage-grouse populations. Future patterns of land use, combined with *effective* restoration and management may improve, or

degrade, the remaining sage-grouse ranges, but natural dynamics and unforeseen stochasticity promise to add complexity to future plans and landscapes.”

The significance of these reports and the rationale for highlighting key statements is to note the strong body of scientific information and analysis and professional judgment rendered by scientists and technical experts involved in the production of each. These reports were (with the exception of the USGS report – done in collaboration with the BLM) produced in collaboration with federal and state-designated experts and provide detailed information on the status of sage-grouse populations and the sagebrush ecosystems on which they depend as well as the threats to both on a regional-specific basis using managements zones and PACs as the framework for analysis.

This is a strong record of information and analysis which is critical to determining land and resource management and regulatory strategies essential to the conservation of the sage-grouse. It SHOULD provide the basis for evaluating the effectiveness of each RMP, LRMP (for FS), state agency, and private land conservation strategy employed in the name of protecting the species as well as their cumulative effects. In any event, it is likely to provide the body of evidence (produced by state and federal agencies themselves) that is used to challenge any management decisions that critics of these plans deem inadequate or in violation of existing legal requirements.

A quick summary of key findings from these reports would be:

1. The Greater Sage Grouse is dependent on large areas of contiguous sagebrush however sagebrush is considered "one of the most imperiled ecosystems in North America" (page 6 – COT report);
2. The loss and fragmentation of sagebrush habitats is a primary cause of the decline of sage-grouse populations (page 9 – COT report);
3. Fire is one of the primary factors linked to loss of sagebrush-steppe habitats and corresponding populations declines in greater-sage grouse (page 10 – COT report);
4. Habitat loss is occurring from the expansion of native conifers mainly due to changes in fire return intervals and overstocking of domestic livestock (page 10 – COT);
5. Sage-grouse populations can be significantly reduced, and in some cases locally extirpated, by non-renewable energy development activities, even when mitigative measures are implemented (page 10 – COT);
6. Impacts from renewable energy development are expected to have negative effects to sage-grouse populations and habitats (page 10 – COT);
7. Both non-renewable and renewable energy developments are increasing within the range of (sage-grouse and this growth is likely to continue (page 10 – COT);
8. Other factors associated with habitat loss and fragmentation include agricultural conversion, urban development, alterations of sagebrush to enhance grazing for livestock, and impacts from wild ungulates and free-roaming horses and burros (page 10 – COT)
9. The "lack of sufficient regulatory mechanisms" to conserve sage-grouse and their habitats was identified by the FWS as a primary reason for its warranted but precluded finding (page 11 – COT); and
10. Wyoming governor Freudenthal (D) and Mead (R) issued executive orders to enact regulatory mechanisms to provide for the protection of sage grouse –*raising the question "Can the federal agencies do it to?"*

These reports include recommended conservation actions intended to address specific threats to the species:

1. Retain sage-grouse habitats within PACs. "This must be a priority." (page 37 – COT report)
2. If PACs are lost to catastrophic events, implement appropriate restoration efforts ... such that there is "no net loss" of sage-grouse or their habitats;
3. Restore and rehabilitate degraded sage-grouse habitats in PACs (which will require sufficient funding and resources , a scientifically rigorous monitoring plan, and the ability to change management if the monitoring results so indicate;
4. Identify areas and habitats outside of PACs which may be necessary to maintain the viability of sage-grouse;
5. Reevaluate the status of PACs and adjacent sage-grouse habitat at least once every 5 years;
6. Actively pursue opportunities to increase occupancy and connectivity between PACs;
7. Minimize or eliminate anthropogenic activities in surrounding, unburned PACs and sage-grouse habitats outside of PACs to enhance opportunities for re-establishment;
8. Avoid energy development in PACs (page 43 – COT report);
9. Livestock and wild ungulate numbers must be managed at levels that allow native sagebrush communities to minimally achieve Proper Functioning Conditions or Rangeland Health Standards and ensure that allotments meet ecological potential and wildlife habitat requirements;
10. Protect sage-grouse from the negative effects of grazing by free-roaming wild horses and burros;
11. Avoid further loss of sagebrush habitat for agricultural activities and prioritize restoration;
12. Avoid new mining activities and/or any associated facilities within occupied habitats and avoid leasing in sage-grouse habitats until other suitable habitats can be restored to habitats used by sage-grouse;
13. There should be no new development of infrastructure (e.g.,roads, pipelines, powerlines and cellular towers) corridors within PACs;
14. Make priority sage-grouse habitat areas exclusion areas for new ROWs (page 13 – NTT report);
15. Propose lands within priority sage-grouse habitat areas for mineral withdrawal (page 14 – NTT report).

USGS's "Summary of Science, Activities, Programs and Policies that Influence the Rangewide Conservation of Greater Sage-Grouse" (aka the "baseline report").

USGS, in cooperation with BLM, recently released a comprehensive report summarizing decades of scientific research on sage grouse and the activities that affect sage grouse and their habitats. It presents detailed information on the extent to which various stressors (oil and gas development, wind, geothermal, roads, other infrastructure, etc.) directly or indirectly affect sage grouse in six of the seven Western Association of Fish and Wildlife Agencies sage grouse management zones (the seventh, in central Washington, was not addressed because BLM lands there are very minor). The information below is a small sample of the type of data the report provides.

Nearly 9% of "preliminary priority habitat" ("PPH," aka "core areas") has been leased for oil and gas production, but more than 80% of that has yet to be developed. Specifically, there are 1.1 million acres held by production and 4.9 million leased acres that are undeveloped out of a total of 68.2 million acres of PPH. See Table 13. Thus the effects of the great majority of the oil and gas leases already issued have yet to be experienced. Even once new development begins, effects will not be immediately apparent, since there is typically a time lag of 3-4 years after activity associated with energy development occurs before impacts on sage grouse are evident. See page 59.

The direct footprint of active and abandoned well sites within PPH is small: roughly 24,000 acres, or less than one-tenth of one percent of the total. However, the area potentially indirectly influenced by oil and gas development is dramatically larger: over 22 million acres, or nearly a third of the total. See Table 11. This is because grouse are highly sensitive to noise, traffic, and human activity associated with oil and gas development. Specifically, with greater proximity to oil and gas development or greater density of such development, lek attendance, probability of lek persistence, and female survival all decline, while chick mortality and the probability of nest failure increase. Female survival, chick survival, and nest success are the demographic factors that have the most influence on population growth. See pages 51 and 59.

The USGS report provides similar data on direct and indirect impact of other activities negatively affecting sage grouse. The results are often quite sobering. For example, the direct footprint of roads within PPH is 1.3 million acres, or roughly 2% of the total. However, the area indirectly affected exceeds 95% of the total, and in three management zones 100% of preliminary priority habitat is indirectly influenced by roads (i.e., within 7.5km of an interstate highway, or within 3km of a highway or primary or secondary route). See Table 6. In general, the higher the speed and traffic volume on a roadway, the lower the density of sage grouse nearby. Also, areas from which sage grouse have been extirpated have 25% higher density of roads than areas still occupied by sage grouse. See page 44.

The report provides similar information for all of the major threat categories identified in the Fish and Wildlife Service's COT report. The information is broken down according to WAFWA management zones, rather than the smaller "primary areas for conservation" (PACs) identified in the COT report. If available on the basis of PACs, however, this baseline information could prove useful in evaluating progress over time in ameliorating threats to the species.

NOTES FROM COPELAND, ET AL ARTICLE FOR WGA:

1. Wyoming – 37% of GSG resides; **69% of SG habitat overlays federal mineral estate – 52% has been authorized for exploration and development (p 1)**
2. “Missing from state and federal policy and ESA decision-making is a spatially-explicit evaluation of the adequacy of regulatory mechanisms and efficacy of conservation easements” (p 2)
3. Effectiveness of private land easement policy in paper assumed future development would be averted (p 9)
4. Analysis indicates a 14 – 29% statewide SG decline and 11 – 24% decline within core areas from cumulative land use change in the absence of conservation measures that prevent fragmentation (p 11)
5. Core area policy in targeted easements most effective conservation strategy and averted expected population decline by up to 46% (statewide) and 62% in core areas (p 11)
6. **“Core area policy is the single most important component.”**
“Unchecked by conservation expected development in the long term could threaten an additional 29% of the remaining population in WY.”
“Core area policy accompanied by \$250 million in targeted easement program could reduce anticipated losses to 9-15% -- roughly half statewide and nearly 2/3 in core areas.” (p 12)
7. **“Core area policy is the single most important component...” (p 12)**
8. **“Targeting easements to areas with a high threat of residential subdivision and dense SG populations is critical.”**
“Highly productive riparian habitats characteristic of private lands are critical...”
9. **“If the integrity of the core area policy is not maintained , the risk of an ESA listing increases...” (p 12)**
10. “Conservation actions for SG are suspected to have additional ancillary protections for many other species occupying the same range such as mule deer...” (p 13)

The National Greater Sage-grouse Planning Strategy Update

BLM - Forest Service
Sage-Grouse Planning Strategy

Executive Leadership Team Meeting
December 4, 2013

Presentation Objectives

- Where are we now (status update)
- Consistencies across the range and quick comparison of the preferred alternatives
- Next steps between draft and final

Where are we now (status update)

2 Regions

Planning Area Structure Recap

Great Basin
Rocky Mountain

15 Sub-regions/EISs

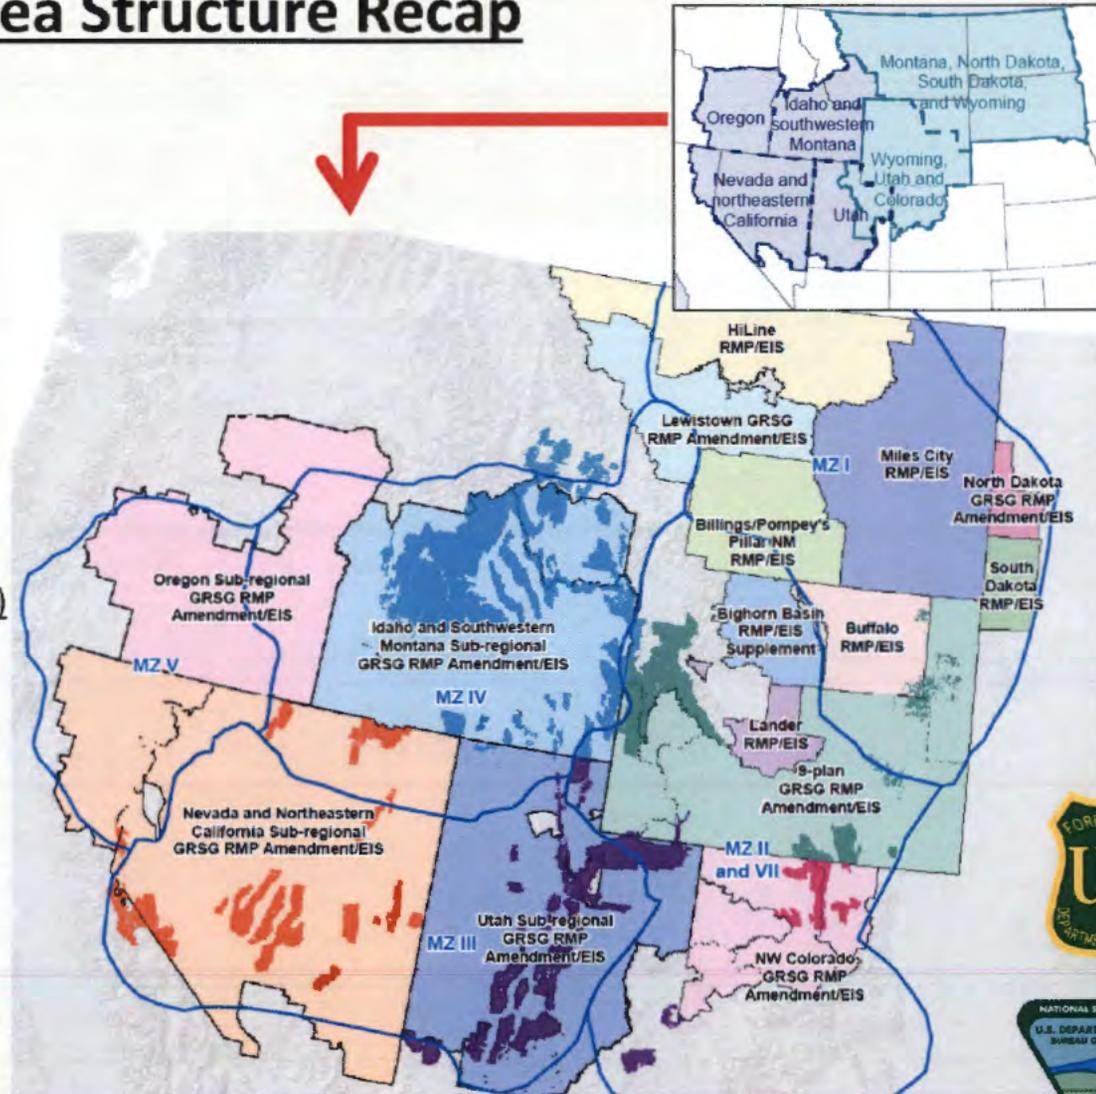

Great Basin (All Amendments)

Oregon, Nevada/NE California, Idaho/SW Montana, and Utah

Rocky Mountain (Revisions & Amendments)

NW Colorado, WY 9 Plan, Lander Revision (WY), Bighorn Basin Revision (WY), Buffalo Revision (WY), Billings/Pompey's Pillar NM Revision (MT), Lewistown Amendment (MT), HiLine Revision (MT), Miles City Revision (MT), South Dakota Revision, North Dakota Amendment

98 LUPs Being Amended
(includes BLM and FS)

Where are we now (status update)

- 14 of the 15 sub-regional draft EISs have been released to the public.
- The Wyoming 9-Plan DEIS is scheduled to be released on December 20, 2013. This is the last sub-regional draft to hit the streets.
- 6 of the 15 sub-regional planning efforts are within their 90-day public comment periods. *Public meetings for these six efforts are currently underway.*
- 8 of the 15 sub-regional draft EISs in Wyoming and Montana that opted to incorporate GRSG conservation measures through RMP revisions have all reached the end of their 90-day public comments periods. These sub-regional planning teams are now in the process of responding to public comments.
- The Lander land use plan will be the first planning effort associated with the this strategy to complete their planning effort. The record of decision (ROD) is pending approval.

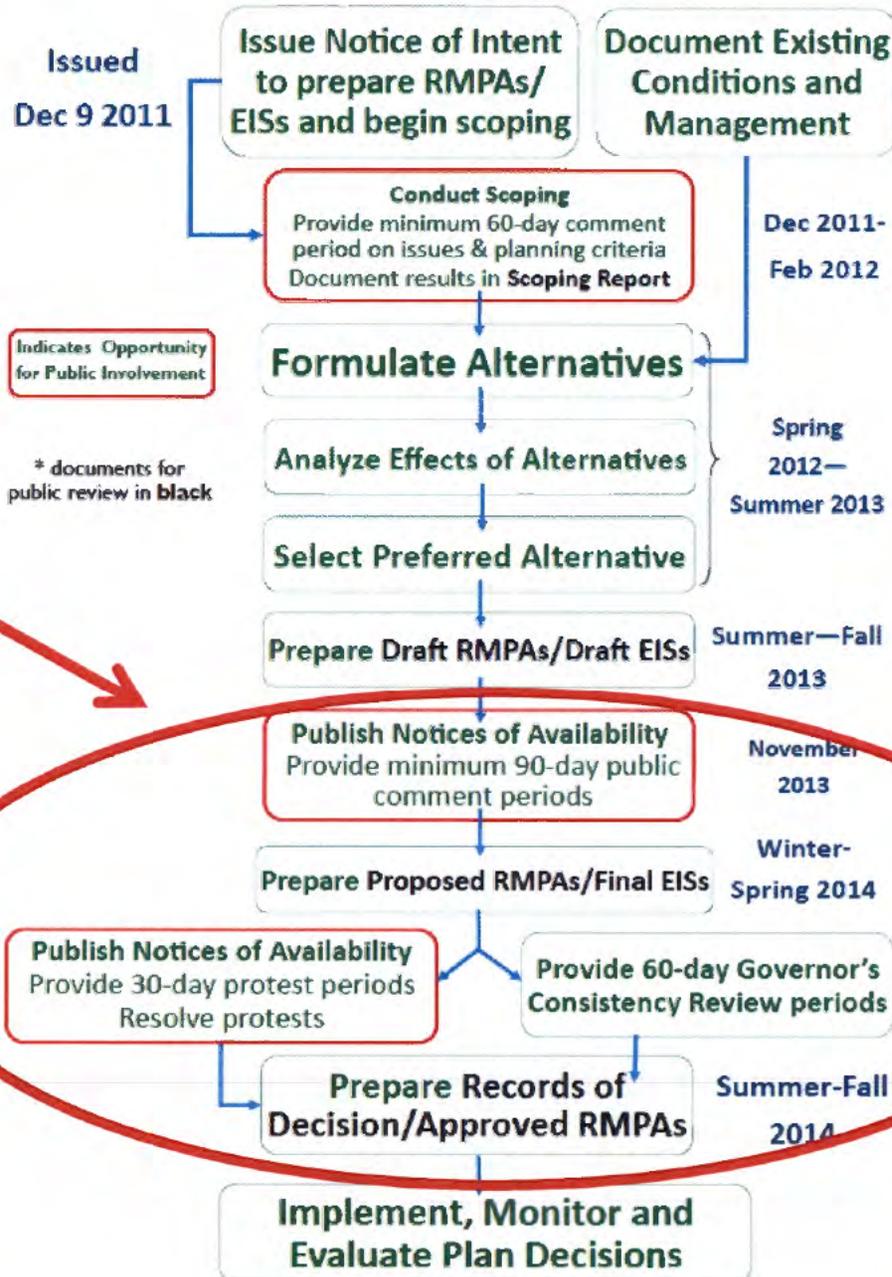

Planning Process

National Greater Sage-Grouse Planning Strategy—Western Region

We are here.

Overall, the project is on track. The goal is to complete the planning process by the end of 2014.

BLM - Forest Service
Sage-Grouse Planning Strategy

Consistencies Across the Range

- Certain action alternatives or applicable components of alternatives being analyzed include:
 - National Technical Team (NTT) Report
 - Citizen Based Proposals Derived from Scoping
 - State Proposals (if submitted for analysis)
- Draft Monitoring Framework
- Draft Mitigation Strategy
- Cooperating Agencies Including:
 - USFWS
 - US Forest Service
 - FAA
 - State Governments
- Clear inconsistencies across all of the sub-regional alternatives. However, BLM/FS still has an opportunity to mix and match in the proposed plans.

Next Steps Between Draft and Final

- Core teams are currently working on the following frameworks/strategies that will be inserted into all of the FEISs:
 - Final Mitigation Framework Language for chapters 2, 3, and 4
 - Final Monitoring Framework Appendix
 - A Final Adaptive Management Strategy
- Priority area fire and invasive assessment pilots are currently being developed in cooperation with NIFC.
- Sub-regional planning teams continue to respond to public comments and are working with their USFWS and Forest Service liaisons to develop their proposed plans.
- A 4th Federal Family Meeting will be held in late March 2014. The theme will be “The Proposed Plans/Final EISs Roll Out.”
- It is the goal to have all of the proposed plans released to the public by August 2014.

Questions?

Key summary points from COT report

- Objective of COT report, “reversing negative population trends and achieving a neutral or positive population trend.” (consistent with the objective of the 2006 WAFWA GSG Comprehensive Conservation Strategy) (p 1 – Mar 22, 2013 memo)
- PACs “highly important for long term viability of the species and should be a primary focus of our collective conservation efforts”. (p1 – Mar 22 memo)
- Truly collaborative federal-state effort/ **2/3 of team members from western state f&w agencies each selected by his or her state or agency**
- Direction to COT team, “define the degree to which threats need to be reduced or ameliorated to conserve sage grouse so that it is no longer in danger of extinction or likely to become in danger of extinction in the foreseeable future.” (p5 – COT)
- **“Restoration of disturbed areas is very difficult” (p9 – COT)**
- “Sage grouse populations can be significantly reduced, and in some cases locally extirpated, by non-renewable energy development activities, even when mitigative measures are implemented”. (p10 – COT)
- **“Lack of sufficient regulatory mechanisms to conserve SG and habitats was identified as a primary threat leading to our warranted but precluded finding.” (p11 – COT)**
- **“WY Executive Orders demonstrate the potential for successfully ameliorating the primary threats to SG and their habitat through the development and implementation of sufficient regulatory mechanisms.” (p 12 – COT)**
- SEE Threats by management zone and populations (p 16 – 29 – COT)
- **“... impacts to sage-grouse and their habitats should be avoided to the maximum extent possible to retain conservation options.” (p31- COT)**
- **“Stop population declines and habitat loss. There is an urgent need to stop the bleeding.... There are no populations within the range of sage-grouse that are immune to the threat of habitat loss and fragmentation.” (p31-31 – COT)**
- **“Regulatory mechanisms and incentive-based actions should address all threats to PACs to the maximum extent practicable.” (p34 – COT)**
- **“Voluntary conservation actions may not provide all actions necessary for conservation of the species range-wide.” (p35 – COT)**
- **“A robust range-wide monitoring program must be developed and implemented.” (p 35 – COT)**
- **“Maintenance of the integrity of PACs ... is the essential foundation for sage-grouse conservation. Threats in PACs must be minimized as part of the effort to meet the objectives of the 2006 WAFWA Conservation Strategy.” (p36 – COT)**
- **“Conservation of habitats outside of PACs should include minimization of impacts to sage-grouse and healthy native plant communities. If minimization is not possible due to valid existing rights, mitigation for impacted habitats should occur.” (p36 – COT)**
- **“[I]t is imperative that no PACs are lost as a result of further infrastructure development or other anthropogenic impacts.” (p37 – COT)**
- Objectives for conserving PACs:

- **“Retain sage-grouse habitats within PACs. Thus must be a priority.”**
- **“If PACs are lost .. implement appropriate restoration efforts... such that there is no net loss of sage-grouse or their habitats.”**
- **“Restore and rehabilitate degraded sage-grouse habitats in PACs.”**
- **“Identify areas and habitats outside of PACs which may be necessary to maintain the viability of sage-grouse.”**
- **“Re-evaluate the status of PACs and adjacent sage-grouse habitat at least once every 5 years....”**
- **“Actively pursue opportunities to increase occupancy and connectivity between PACs.”**
- **“Maintain or improve existing habitat conditions in areas adjacent to burned habitat....”**
- **“Minimizing or eliminating anthropogenic activities in surrounding, unburned PACs and sage-grouse habitats outside of PACs must also be a priority to enhance opportunities for re-establishment of connectivity among populations, and subsequent re-colonization of restored areas. Management actions within those surrounding PACs must strive to maintain or improve existing habitat conditions.”**
(p37-38 – COT)
- **“Avoid energy development in PACs.”** (p43 – COT)
- Conservation measures associated with energy development (p43-44 – COT)
- “Design development to minimize tall structures (turbines, powerlines) or other features associated with the development. (p 44 – COT)
- Manage livestock to achieve Proper Functioning Conditions or Rangeland Health Standards (p45 – COT)
- **“Avoid further loss of sagebrush habitat for agricultural activities and prioritize restoration. In areas where taking agricultural lands out of production has benefited SG, the programs supporting these actions should be targeted and continued.”** (p48 – COT)
- **Avoid new mining activities and leasing in SG habitats until other suitable habitats can be restored to habitats used by sage-grouse.** (p49 – COT)
- **“Close important sage-grouse use areas to off-road vehicle use”** (p50 – COT)
- **“There should be no new development of infrastructure corridors within PACs. Designated, but not yet developed infrastructure corridors should be re-located outside of PACs.”** See other conservation measures for infrastructure . (p51-52 – COT)

Subject: Background on Sage Grouse Science and COT report

Sally –

Not to overwhelm you, but I have put together several short summaries of information from key science reports/assessments that we have mentioned in our various briefings with you.

Each is a short summary of key findings/observations/recommendations from the reports.

The specific reports I reference are:

1. **National Technical Team report**, developed in Dec 2011 by the BLM to aid in developing its national planning strategy. The team included BLM, USGS, FWS, and state wildlife agency members;

2. **Conservation Objectives Team report** delivered in March, 2013 and developed by state fish and wildlife agency and FWS experts; and

3. a **USGS report** (2013) that provides baseline information on policies, programs, and activities affecting the GSG.

I also referenced a more recent article by Copeland, et al that assessed GSG conservation efforts in Wyoming, with a particular focus on the importance of private land conservation.

Finally, I also attached a power point presentation developed by the BLM planning staff that can provide a quick overview of the process to date and some of the challenges that lie ahead.

Glad to go into detail on any of these if you like. You seemed interested in the underlying science, and this is a mix of the key summary points/observations/ recommendations from the reports that are guiding our national strategy. Good airplane reading.

See you in Vegas.

AMERICA'S GREAT OUTDOORS:

National Park Service:

- + Hanford B Reactor Won't Become National Park This Year.
- + NPS To Advise Mount Washington's Emerald View Park.
- + NPS Criticized Over Response To FOIA Request On Mount Vernon Barricades.

Bureau of Land Management:

- + Resource Advisory Council Picks Gov. Otter's Plan To Prevent Listing Of Sage Grouse.
- + Court Sides With Eastern Nevada Pipeline Opponents.
- + BLM To Conduct Prescribed Burns In Stevens County.
- + BLM Seeks Volunteers For Eagle Survey.
- + Additional Coverage Of Rescue Of Family Lost In Nevada Wilderness.

Fish and Wildlife Service:

- + Environmental Group Warns Sea-level Rise Threatens Hundreds Of Animal Species.
- + Interagency Grizzly Bear Committee Recommends Lifting Yellowstone Grizzly Protections.
- + Public Meetings And Comment Periods On Gunnison Sage Grouse End.
- + New Leader Selected To Oversee Arcata FWS Office.
- + Sweetwater Authority Closes Part Of Popular Trail.
- + Nashville Zoo Sends 5,000 Endangered Toads To Puerto Rico.
- + FWS Seeks Input On Invasive Cattle In Alaska Maritime National Wildlife Refuge..

SECURING AMERICA'S ENERGY FUTURE:

Renewable Energy:

- + BLM Developing Plan To Monitor Effects Of Valley Solar Projects.

- + FWS To Further Study Solar Power Towers.
- + Study Finds Tall Wind Turbines Kill More Birds Than Short Ones.
- + Additional Coverage Of New Eagle Rule.
- + WSJournal Calls For End To Wind Production Tax Credit.
- + Maine Urged To Support Offshore Wind Energy Industry.

Onshore Energy Development:

- + Fracking Lifts US Oil Output To 25-Year High.
- + Energy Producing States Have Most "Spare Cash."
- + BLM Reacts To Budget Deal.

Offshore Energy Development:

- + BOEM Announces Agreement To Restore Wallops Shoreline.
- + Additional Coverage Of US-Mexico Hydrocarbon Agreement.

TACKLING AMERICA'S WATER CHALLENGES:

- + BOR Report Assesses Climate Change's Impact On Upper Rio Grande Basin.
- + Obama Administration Files Brief On New Mexico-Texas Water Dispute.
- + BOR To Use Cargill's "Green Chemical" To Fill Electrical Transformers.
- + Additional Coverage Of Bay Delta Conservation Plan.
- + Additional Coverage Of Proposed Expansion Of San Luis Reservoir.

EMPOWERING NATIVE AMERICAN COMMUNITIES:

- + Wyoming Prepared To Fight Reservation Border Decision By EPA.

TOP NATIONAL NEWS:

- + HHS: ACA Enrollment At 365,000 Through November.
- + Budget Deal Seen As "Better Than Nothing" For Obama.
- + Senate Holds All-Night Session To Confirm Obama Nominees.

EDITORIAL WRAP-UP:

- + New York Times.
- + Washington Post.
- + Wall Street Journal.

BIG PICTURE:

- + Headlines From Today's Front Pages.

WASHINGTON SCHEDULE:

- + Today's Events In Washington.

LAST LAUGHS:

- + Late Night Political Humor.

DOI in the News:

SECRETARY JEWELL VISITS LAGUNA PUEBLO ELEMENTARY SCHOOL. The Albuquerque (NM) Journal (12/12, 288K) reports that Interior Secretary Sally Jewell on Wednesday heard about during issues facing Native American education during a visit to Laguna Pueblo Elementary School. Jewell was accompanied by a number of people with expertise in various education-related fields, who came together as part of the American Indian Education Study Group. Jewell said, "Indian education is not like a regular public school system because it covers the entire country. So how do we deliver what's right for students and do it in a way that provides academic rigor, but also supports the unique interests of each tribe?" Study group member Kevin Washburn, assistant secretary of Indian Affairs, said "the federal government is slowly changing its top-down delivery of Indian education." Washburn said, "The Bureau of Indian Education funds about 186 schools nationwide, and in the past those were all run by the Bureau of Indian Affairs and the Bureau of Indian Education. 'Nowadays, more

than 120 of those schools (including Laguna Elementary) are actually run by the tribes through contracts with the federal government. ... We have to put tribes in the driver's seat in all these schools, and in more of the subject area matters, because they have the best solutions."

SECRETARY JEWELL TO DELIVER KEYNOTE ADDRESS AT WESTERN GOVERNORS' ASSOCIATION MEETING.

A story by the AP in the Washington Post (12/11, Press, 4.28M) reports that the winter meeting of the Western Governors' Association began Wednesday in Las Vegas to tackle "land use, wildfires and environmental conservation." The governors announced "eight symbolic resolutions." The article notes that "one asserted that states should be the primary authority for water supply planning." Interior Secretary Sally Jewell is "expected to deliver the keynote address on Thursday highlighting the federal government's commitment to collaborating on conservation and water issues."

AP coverage was also picked up by ABC News (12/12, 3.68M), the Houston Chronicle (12/12, Dreier, 2.26M), the Seattle Post-Intelligencer (12/12, 768K), the Deseret (UT) News (12/12, 274K), the Ogden (UT) Standard-Examiner (12/11, 147K), the Macon (GA) Telegraph (12/11, 187K), the Las Vegas NV Blog (12/12), and KCNC-TV Denver (12/11, 26K).

Also providing coverage is ABC News (12/12, 3.68M).

SECRETARY JEWELL TO ADDRESS FUTURE OF COLORADO RIVER The Public News Service (12/12, 306) reports that Interior Secretary Sally Jewell will address the future of the Colorado River at the Colorado River Water Users Association 2013 Annual Conference at Caesars Palace in Las Vegas Friday. Jewell's presentation is titled "Action Is Imperative – We Need a Balanced Approach to Bridge the Gap between Supply and Demand on the Colorado River."

Also reporting on the story is the Public News Service (12/12, 306).

INTERIOR NOMINEES GO BEFORE SENATE. In its "E2 Wire" blog, The Hill (12/12, 194K) reports that some "of President Obama's latest nominees to the Interior and Energy departments will go before a Senate committee on Thursday." The Senate Energy and Natural Resources Committee will consider nominations for Rhea Suh to be assistant secretary of fish and wildlife for the Interior Department and Tommy Beaudreau to be assistant secretary for policy, management and budget for Interior. It will also vote on the nomination of Esther Kia'aina to be an assistant secretary for insular at Interior.

HORSE ADVOCACY GROUP ANGERED OVER CONDITIONS FOR CAPTURED WYOMING HORSES. The Horsetalk (NZL) (12/12, 1K) reports that Cloud Foundation, a wild horse advocacy group, is "angered by the treatment of 668 horses captured in a Wyoming roundup, saying they are being given inadequate shelter from bitter winter conditions." The group claims "the animals taken in the roundup are being held in facilities without adequate windbreaks or shelter." The foundation has called on Interior Secretary Sally Jewell to "address the situation."

BLM's Wild Horse Policy Criticized. In his column for the Hartford (CT) Courant (12/11, Thorson, 600K), Robert M. Thorson, a professor of geology at the University of Connecticut's College of Liberal Arts and Sciences, criticizes the BLM's wild horse policy as "ludicrous" because the BLM "boards out more 'wild' horses to Midwestern farmers than they allow to run free on the western range." As a result, Thorson claims, "taxpayers are renting private pastures for tens of thousands of unnamed horses until they die unnatural deaths."

FWS SAYS BLM'S PLANS FOR GREATER SAGE-GROUSE FALL SHORT . The Grand Junction Daily Sentinel (12/12, 73K) reports that the FWS says a BM proposal for protecting the greater sage-grouse in northwest Colorado falls short. The FWS offered its opinion based on letters from the public commenting on the BLM's draft document for management of greater sage-grouse territory in the region. According to the article, opponents including the oil and gas industry, "area governments, agriculture, recreation and other interests have been contending for months that the measures the BLM is contemplating are overly restrictive and would cause significant economic harm."

INTERIOR SUPPORTS NATIONAL PARK TO HONOR CÉSAR CHÁVEZ. For "The Blog" of the Huffington Post (12/12, Sierra, 11.54M), Javier Sierra, a media consultant and Sierra Club columnist, argues that "our moral debt"

to César Chávez is "enormous." He notes that a new initiative by the Interior Department is "trying to partially repay it" with a "proposal to Congress to establish a new National Historic Park to honor Chávez and the farm workers movement he led along with Dolores Huerta." Interior Secretary Sally Jewell said, "Recognizing these sites associated with his leadership of the United Farm Workers as part of a national historical park will ensure that his contributions to the Civil Rights movement will be preserved and shared as an inspiration for future generations."

America's Great Outdoors:

National Park Service:

HANFORD B REACTOR WON'T BECOME NATIONAL PARK THIS YEAR. The Tri-City Herald (WA) (12/11, 100K) reports that "Hanford's historic B Reactor will not become part of the National Park Service this year." On Tuesday, "supporters' hopes for that died...when a new version of the National Defense Authorization Act for fiscal 2014 was released and it failed to include an amendment creating a new Manhattan Project National Historical Park." Rep. Doc Hastings said yesterday "that he will push to get the amendment attached to the 2015 act."

Also reporting on the story is the Oak Ridge (TN) Today (12/11).

NPS TO ADVISE MOUNT WASHINGTON'S EMERALD VIEW PARK. The Pittsburgh Post-Gazette (12/12, 725K) reports that the NPS has selected Mount Washington's Emerald View Park as "one of 11 in the state to receive support from its Rivers, Trails, and Conservation Assistance program in the coming year." The NPS will "advise the organization on developing trails on steep slopes 'to the highest standards,'" according to Ilyssa Manspeizer, director of park development and conservation for the Mount Washington Community Development Corp.

NPS CRITICIZED OVER RESPONSE TO FOIA REQUEST ON MOUNT VERNON BARRICADES. For "The Corner" of the National Review (12/12, 805K), Jillian Kay Melchior writes that a review of the NPS' response to a request filed under the Freedom of Information Act, "looking for e-mails discussing the shutting, closure, or barricading of Mount Vernon," shows that agency's "wide-ranging, unnecessary closings were an embarrassment during the government shutdown." Upon seeing redactions in the record, Melchior concludes that the Interior Department is "embarrassed" by what its NPS employees said

Bureau of Land Management:

RESOURCE ADVISORY COUNCIL PICKS GOV. OTTER'S PLAN TO PREVENT LISTING OF SAGE GROUSE. The Twin Falls (ID) Times-News (12/12, 56K) reports that during its meeting Tuesday evening, the Resource Advisory Council "unanimously selected Gov. C.L. 'Butch' Otter's alternatives" on Idaho's sage grouse "with the provision that the RAC will discuss and possibly modify the plan." The group's "choice now will go before the full federal advisory committee during its January meeting."

COURT SIDES WITH EASTERN NEVADA PIPELINE OPPONENTS. The Las Vegas Review-Journal (12/12, 437K) reports that in a decision issued Tuesday, Senior District Judge Robert Estes has stripped the Southern Nevada Water Authority of permission to siphon billions of gallons of groundwater a year from across eastern Nevada. Estes ruled that the state's chief water regulator has more work to do before allowing the authority sink its wells in four lonesome valleys in Lincoln and White Pine counties. In particular, Estes ordered the state engineer to recalculate how much the authority can safely be allowed to pump from Spring, Cave, Dry Lake and Delamar valleys to avoid draining the basins and causing conflicts with other water rights holders there and elsewhere.

BLM TO CONDUCT PRESCRIBED BURNS IN STEVENS COUNTY. The Spokane (WA) Spokesman-Review (12/11, 214K) reports that the BLM is "planning to conduct prescribed fires in the Huckleberry Mountains area in Stevens County Dec. 12-Jan. 31, according to the Spokane District Office."

BLM SEEKS VOLUNTEERS FOR EAGLE SURVEY. The Billings (MT) Gazette (12/12, 206K) reports that the

BLM Buffalo Field Office is "seeking volunteers to assist with the 2014 midwinter bald eagle survey on Jan. 11."

ADDITIONAL COVERAGE OF RESCUE OF FAMILY LOST IN NEVADA WILDERNESS. Additional coverage of the family rescued from the Nevada wilderness was provided by the Los Angeles Times (12/12, Karlamangla, 3.07M).

Fish and Wildlife Service:

ENVIRONMENTAL GROUP WARNS SEA-LEVEL RISE THREATENS HUNDREDS OF ANIMAL SPECIES. USA Today (12/11, Rice, 5.82M) reports that "hundreds of species of animals in the US are threatened by sea-level rise due to climate change," according to a report released Tuesday by the Center for Biological Diversity. The report notes, "Our analysis finds that 17 percent — one in six — of the nation's threatened and endangered species are at risk from rising sea levels." According to the article, "left unchecked, the group says that rising seas threaten 233 federally protected species in 23 coastal states."

Also providing coverage is WUSA-TV Washington (12/12, 95K).

INTERAGENCY GRIZZLY BEAR COMMITTEE RECOMMENDS LIFTING YELLOWSTONE GRIZZLY PROTECTIONS. Reuters (12/12, Zuckerman) reports that federal and state wildlife managers of grizzly bears in the Yellowstone National Park area recommended on Wednesday that Endangered Species Act protections be lifted for the animals. On Wednesday, members of the Interagency Grizzly Bear Committee recommended a new de-listing after reviewing a report suggesting Yellowstone's bears can be sustained by berries and a multitude of other food sources. The article notes that FWS Director Dan Ashe told Reuters in a 2010 interview that the Obama Administration would seek to lift Endangered Species Act protections from both wolves and grizzlies in the Yellowstone area.

PUBLIC MEETINGS AND COMMENT PERIODS ON GUNNISON SAGE GROUSE END. The Cortez (CO) Journal (12/11, 646) reports that public meetings and comment periods have concluded on the issue of whether the FWS should list the Gunnison sage grouse under the Endangered Species Act. Susan Linner, FW field supervisor, said, "It is now up to Fish and Wildlife Director Daniel Ashe (and the Secretary of Interior) to weigh all the information and make the decision, which is expected at the end of March next year. It could be listed as endangered, threatened, or not warranted."

NEW LEADER SELECTED TO OVERSEE ARCATA FWS OFFICE. The Weaverville (CA) Trinity Journal (12/12, 12K) reports that Bruce Bingham has been chosen to lead the Arcata Fish and Wildlife Office.

SWEETWATER AUTHORITY CLOSURES PART OF POPULAR TRAIL. The U-T San Diego (12/11, 647K) reports that "a popular trail near the Sweetwater Valley reservoir has been temporarily closed by the Sweetwater Authority because of concerns about environmental issues." The Sweetwater Authority "sent out a notice Wednesday stating the riding and hiking trail south of the Sweetwater Reservoir will be closed beginning Thursday due to an environmentally sensitive area containing vernal pools and associated species that are protected under federal law." Jim Smyth, general manager for the Sweetwater Authority, said that the "decision to closed a portion of the trail would reduce the risk of enforcement" by the FWS regarding the Endangered Species Act.

NASHVILLE ZOO SENDS 5,000 ENDANGERED TOADS TO PUERTO RICO. The Bristol (TN/VA) Herald Courier (12/12, 81K) reports that the Nashville Zoo has "sent more than 5,000 tadpoles to Puerto Rico as part of an effort to help saved the endangered Puerto Rican crested toad." According to the article, the Nashville Zoo started "efforts to breed the Puerto Rican crested toad since first acquiring the species in 2008 but was not successful until last year." The article notes that "a recent shipment of 3,774 tadpoles has brought the total number to more than 5,000 produced" for the FWS to "release back into their native habitat in Puerto Rico."

FWS SEEKS INPUT ON INVASIVE CATTLE IN ALASKA MARITIME NATIONAL WILDLIFE REFUGE.. The Alaska Public Radio Network (12/11, 2K) reports that the FWS is seeking "input from the public on how best to deal with about 1,000 head of cattle on two islands in the Alaska Maritime National Wildlife Refuge." Steve Delehanty, the manager of the Alaska Maritime National Wildlife Refuge, has "announced the start of a 'scoping'

process to comply with the National Environmental Policy Act before the cattle are removed or eradicated.”

Securing America's Energy Future:

Renewable Energy:

BLM DEVELOPING PLAN TO MONITOR EFFECTS OF VALLEY SOLAR PROJECTS. The [Palm Springs \(CA\) Desert Sun](#) (12/11, 110K) reports that “with two large-scale solar projects on public land east of the Coachella Valley now pumping power onto the grid,” the BLM is “developing a plan to monitor the long-term effects of solar development in the desert.” The bureau is “holding a two-day public workshop that continues Thursday in Palm Springs on the Riverside East Long-Term Monitoring and Adaptive Management Plan as the first step toward crafting policies and procedures that could eventually be used at projects on federal land across six Western states.” Michael Sintetos, the BLM’s renewable energy program manager for California, said, “Before three years ago, we had not seen the scale of development on public land that we’ve seen with solar projects. We’ve seen a new type of impact we haven’t had to consider before. These things are thousands of acres.”

FWS TO FURTHER STUDY SOLAR POWER TOWERS. [KCET-TV](#) Los Angeles (12/12, 15K) reports that Jane Hendron, Public Affairs Division Chief at the Carlsbad office of FWS, said that the “funnel effect” mentioned in “the agency’s comments on the proposed Palen Solar Electric Generating Station isn’t really an ‘effect,’ and it involves an actual funnel – or at least something that works like one.” Hendron said that “a plan for broader, more consistent wildlife mortality monitoring and reporting at renewable energy projects is in the works,” and that FWS will be “releasing a description of that plan in the next couple of weeks.”

STUDY FINDS TALL WIND TURBINES KILL MORE BIRDS THAN SHORT ONES. The [Softpedia](#) (12/12, 137K) reports that a new paper authored by researchers working with the FWS, the Smithsonian Institution Migratory Bird Center, and the Oklahoma State University “documents how the wind power industry in the United States affects the country’s biodiversity, especially its bird population.” In their paper, the researchers “argue that, according to evidence at hand, monopole turbines now up and running across the US kill an average of 140,000 to 328,000 birds on a yearly basis.” Notably, “it appears that there is a correlation between how tall a monopole wind turbine is and how many birds it kills annually.”

ADDITIONAL COVERAGE OF NEW EAGLE RULE. Additional coverage of the new eagle rule was provided by the [Durango \(CO\) Herald](#) (12/11, 28K).

WSJOURNAL CALLS FOR END TO WIND PRODUCTION TAX CREDIT. The Wall Street Journal (12/12, Subscription Publication, 5.91M) says in an editorial that the wind production tax credit, intended to be temporary, has now been on the books for two decades, and that it should be ended. The Journal urges Republicans to argue against extending the credit by calling it an example of corporate welfare and cronyism intended to aid President Obama’s supporters in the green energy industry.

MAINE URGED TO SUPPORT OFFSHORE WIND ENERGY INDUSTRY. In an editorial, the [Bangor \(ME\) Daily News](#) (12/11, 166K) urges Maine to develop its offshore wind energy industry. Also, the paper argues that “the state and federal governments must stick to long-term, supportive energy policies” because “uncertainty makes it difficult to plan multi-million-dollar projects.” In addition, it urges leaders across New England to discuss “how they can best foster the industry together.” Finally, it notes that “another hurdle that cannot be understated is public acceptance.”

Onshore Energy Development:

FRACKING LIFTS US OIL OUTPUT TO 25-YEAR HIGH. Bloomberg News (12/11, Harvey, Loder, 1.91M) reports that the energy boom created by fracking has lifted US oil production to a 25-year high. On the week that ended December 6, the US produced 8.075 million barrels a day, which accounts for a gain of 0.8 percent, according to the Energy Information Administration. That total output is “the most since October 1988.” The gains are attributed to fracking techniques.

ENERGY PRODUCING STATES HAVE MOST “SPARE CASH.” The “GovBeat” blog of the Washington Post

(12/11, Chokshi, 4.28M) reports that "every single state ended the 2013 fiscal year with spare cash, but the ones with the biggest relative stockpiles also happened to be big energy producers." By the time the FY2013 ended, "Alaska, North Dakota and Wyoming had the largest year-end budget balances relative to their spending levels, according to a new state fiscal survey from the National Association of State Budget Officers." In each of the states, "energy-related industries account for a sizable chunk of economic output and Alaska's year-end balance of \$16.5 billion alone accounted for a fourth of the all-state total." NASBO Executive Director Scott Pattison said, "There's a definite connection."

BLM REACTS TO BUDGET DEAL. The Las Cruces (NM) Sun-News (12/12, 59K) reports that "a budget deal hammered out this week by Republican and Democratic negotiators likely will have profound effects on Southwest communities that are heavily reliant on federal spending, though precise impacts remain to be seen." The article notes that "in New Mexico, one agency most affected by the sequestration" has been the BLM. According to BLM spokesmen in Carlsbad and Farmington, "filling vacant positions has been a major challenge." As a result, although "the Farmington office is still processing drilling permits within two to three months, it is taking longer for customers to obtain right-of-way permits," BLM office manager Gary Torres said

Offshore Energy Development:

BOEM ANNOUNCES AGREEMENT TO RESTORE WALLOPS SHORELINE. The Delmarva (MD) Daily Times (12/11, 26K) reports that the BOEM has announced an agreement with the National Aeronautics and Space Administration and the US Army Corps of Engineers "authorizing the dredging of up to one million cubic yards of sand from the outer continental shelf to restore the shoreline at NASA's Wallops Island Flight Facility in Virginia." BOEM Director Tommy P. Beaudreau said, "BOEM's contribution of sand for this federal facility will help maintain the physical integrity of NASA's valuable launch infrastructure at Wallops Island and improve resiliency against future storms." He added, "This project is an example of the federal family working together on the ongoing response to Hurricane Sandy."

ADDITIONAL COVERAGE OF US-MEXICO HYDROCARBON AGREEMENT. Bloomberg News (12/11, 1.91M) reports that on Tuesday, a US budget compromise was announced. Language in the compromise would implement the 2012 US-Mexico agreement on "hydrocarbon reservoirs in parts of the gulf that cross the international maritime boundary." The article notes that American Petroleum Institute upstream operations director Erik Milito "said in October that the group was dropping its opposition to the Dodd-Frank reporting requirements as a way to expedite the US-Mexico agreement."

Also reporting on the story is the FuelFix (12/11, 7K) and the National Journal (12/12, Subscription Publication, 427K).

Tackling America's Water Challenges:

BOR REPORT ASSESSES CLIMATE CHANGE'S IMPACT ON UPPER RIO GRANDE BASIN. The AP (12/12) reports that "temperatures are likely to get hotter by a few degrees before the end of the 21st century and less water will be available in the Upper Rio Grande Basin thanks to a changing climate," according to a report released Wednesday by the BOR. The bureau "reviewed temperature and precipitation data from the last decade and compared models in an effort to start answering whether water planners should be ready for the possibility of a hotter, drier and more variable future."

The Albuquerque (NM) Journal (12/12, 288K) reports that at a meeting of Albuquerque water managers and community members, Assistant Secretary of the Interior Anne Castle said, "It is sobering."

The Science Codex (12/12, 1K) reports that Castle said, "This report uses the most current information and state of the art scientific methodology to project a range of future supply scenarios in the upper Rio Grande basin. It is a great first step and a call to action for water managers and users in the basin and the partner federal agencies to move forward and develop adaptation to the challenges this study brings to light."

Also reporting on the story are the Albuquerque (NM) Journal (12/12, 288K) and KRQE-TV Albuquerque, NM (12/12, 29K).

OBAMA ADMINISTRATION FILES BRIEF ON NEW MEXICO-TEXAS WATER DISPUTE. The El Paso (TX) Times (12/12, Press, 247K) reports that the Obama Administration is urging the US Supreme Court to “take a middle-ground approach on a water dispute between Texas and New Mexico over management of the Rio Grande.” According to the article, “a brief filed Tuesday by the US solicitor general’s office didn’t take sides in the interstate dispute but said the Supreme Court should leave the door open for a quick resolution.” The article notes that “the federal government has a stake in the case” because the BOR “operates Elephant Butte Reservoir, which is used for delivery of much of the water involved in the dispute.”

BOR TO USE CARGILL’S “GREEN CHEMICAL” TO FILL ELECTRICAL TRANSFORMERS. The Minneapolis Star Tribune (12/12, Spencer, 1.14M) reports that for the past few years, the Interior Department has “tested the effectiveness of electrical transformers that use vegetable oil instead of mineral oil to boost power production while lowering the threat of fires and toxic spills.” Now, the Interior Department “plans a ‘very large project’ using the green technology that Minnetonka-based Cargill Inc. helped perfect.” Bill Heckler, an engineer with the BOR, which operates hydroelectric dams, said, “Our transformers sit on decks overlooking the flow of beautiful Western waterways. We fear ruptures or fires that will drop large quantities of oil into rivers.”

ADDITIONAL COVERAGE OF BAY DELTA CONSERVATION PLAN. In an op-ed for the Santa Clarita Valley (CA) Signal (12/12, Masnada, 13K), Dan Masnada, the general manager of the Castaic Lake Water Agency, writes that “a single earthquake could wreak havoc in the Sacramento-San Joaquin River Delta and disrupt Southern California’s water supply for up to a year or more.” He says that Castaic Lake Water Agency is “very concerned,” as the USGS “estimates there is a 60 percent chance that such a quake could occur in the next 30 years.” Masnada claims that the Bay Delta Conservation Plan “proposal to modernize the state’s water-delivery system with two tunnels under the Delta would avoid this calamity.”

Additional coverage of the Bay Delta Conservation Plan was provided by the Palm Springs (CA) Desert Sun (12/11, 110K).

ADDITIONAL COVERAGE OF PROPOSED EXPANSION OF SAN LUIS RESERVOIR. Additional coverage of a proposal to increase the height of the San Luis Reservoir was provided by the San Jose (CA) Mercury News (12/12, 731K).

Empowering Native American Communities:

WYOMING PREPARED TO FIGHT RESERVATION BORDER DECISION BY EPA. The Riverton (WY) Ranger (12/12, 167) reports that Wyoming lawmakers say “they plan to take a ‘strong, proactive position’ against a recent decision by the Environmental Protection Agency impacting the boundaries of the Wind River Indian Reservation.” State Sen. Eli Bebout is “in meetings this week with the Joint Appropriation Committee, which he co-chairs.” Bebout said “the group is exploring legislative opportunities to reverse the EPA’s ruling.”

Additional coverage was provided by the Casper (WY) Star-Tribune (12/12, 90K) and the Riverton (WY) Ranger (12/12, 167).

Top National News:

HHS: ACA ENROLLMENT AT 365,000 THROUGH NOVEMBER. The announcement from HHS that in November, approximately 260,000 people signed up for health insurance via HealthCare.gov, or the 14 state marketplaces, was met with contrasting assessments from partisan analysts, and generated less overall coverage than might have been expected given the attention paid to previous enrollment data. For instance, the news was noted in very brief segments on NBC Nightly News (12/11, story 5, 0:25, Curry, 7.86M) and the CBS Evening News (12/11, story 4, 0:50, 5.58M), and was not covered at all on ABC World News.

Ann Curry, on NBC Nightly News (12/11, story 5, 0:25, Curry, 7.86M), reported in a 25 second-long segment that “sign-ups on both the Federal and state exchanges are improving, but not fast enough to meet enrollment goals.” Curry noted that the Administration says “nearly 365,000 people signed up for private coverage,” which is “far short of the goal of 1.2 million through the end of November.” Scott Pelley, in a similarly brief item for the CBS

Evening News (12/11, story 4, 0:50, 5.58M), said that in addition to the "364,000 people [who] chose policies, more than 800,000 found they were eligible for Medicaid or federal subsidies to help them buy health insurance."

While allies of the Administration contrasted the new numbers with the very low totals from October, critics of the Affordable Care Act pointed out that the enrollment figures continue to be far below where they need to be for the ACA operate effectively next year. Republicans also emphasized that millions of Americans have lost their health insurance coverage due to the President's reforms (their estimates range from 4 million to five million canceled policies).

In his opening monologue for MSNBC's Ed Show (12/12, 449K), Ed Schultz said, "The website problems have been fixed and the numbers are starting show just that." Schultz continued, "These are big numbers. This is proof that Obamacare is gaining steam, day by day," which is "is really bad news for the Republicans." On the other hand, in the lead story for Fox News' Special Report (12/12, 2.15M), correspondent Mike Emanuel reported that "the bottom line" is that "to make the goal of 7 million people [enrolled] by the end of March, the Administration needs to pick up the pace substantially in terms of getting people to register." Emanuel said "50,000 or so a day on average needs to be the number in order to make that goal by the end of March."

Under the headline "Health Care Sign-ups Pick Up But May Not Close Gap," the AP (12/12, Alonso-Zaldivar, Kellman) reports that "with time running short" the exchanges are not enrolling people "fast enough" to "guarantee that Americans who want and need coverage by Jan. 1 will be able to get it," which "means more trouble for the White House." According to the AP, "Next year could start with a new round of political recriminations." The AP adds that despite the apparently bleak outlook, HHS Secretary Sebelius "assured Congress on Wednesday that 'we are seeing very, very positive trends' now that HealthCare.gov is working reasonably well."

Politico (12/12, Cheney, 467K) reports that in November "about 260,000 people enrolled in Obamacare exchanges," which is "more than double the dismal October sign-up rate but still a low monthly number that reflects HealthCare.gov's protracted technical problems." Politico notes that House Majority Whip McCarthy pointed out that "more than 4 million Americans have lost their health plan" as a result of the ACA. House Speaker Boehner is quoted as saying, "I think when we get to Jan. 1st, it will be clear more Americans have lost their insurance than will sign up." Politico also reports that insurers "are warning that bugs in the system may create havoc in January when some people may discover that they aren't properly signed up in the plan they selected."

Nevertheless, the Los Angeles Times (12/12, Levey, 3.07M), in an article titled "Obamacare Sign-ups Continue To Increase," reports that November's "tally is fueling renewed optimism among supporters of the Affordable Care Act who believe that fixes to the federal site will rescue the law...from its disastrous debut." The Times notes that "enrollment continued to be strongest in California," which "recorded 107,000 sign-ups in [the] first two months" of its statewide exchange.

Under the headline "Obamacare Enrollments Surpass 1 Million," the Huffington Post (12/12, Young, 11.54M) offers a positive assessment of the enrollment numbers so far, noting that in addition to the "almost 365,000 people enrolled into private health insurance via the federal and state marketplaces" through the end of last month, "more than 803,000 were deemed eligible for Medicaid or the Children's Health Insurance Program." The Huffington Post also reports that "about 1.9 million more people had been determined eligible for coverage through the marketplaces, but hadn't yet chosen a health plan."

The New York Times (12/12, Pear, Subscription Publication, 9.61M) notes that "the new enrollment numbers do not reflect reports of a surge in sign-ups since the end of November, when the administration had promised improved performance." The Times adds that, "according to people familiar with the project," since December 1 "about 112,000 people selected plans through the federal marketplace...which would mean enrollments for this month have already outpaced those in November." The Times also reports that Michael Hash, director of HHS's health reform office, maintains that the Administration is "still 'on track' to meet its goal of enrolling seven million people in private health plans...by the end of March."

However, according to USA Today (12/12, A1, Kennedy, 5.82M), "Despite the gains in November...the government faces significant challenges getting people signed up by Dec. 23 to gain coverage by Jan. 1, and by the end of the enrollment period March 31." Alan Cohen, chief strategy officer of Liaison, "which provides health

exchanges to private employees," says, "The numbers coming out seem like so much more than before, but they still have to be so much more."

McClatchy (12/12, Pugh, 95K) reports that the Administration "originally expected 3.3 million state and federal marketplace enrollees by the end of 2013," and while that "now seem unlikely, the administration hasn't changed its original goal of logging 7 million people into marketplace coverage by the end of open enrollment on March 31, 2014."

David Nather, in a piece on Sebelius' House appearance for Politico (12/12, 467K), said the panel's Republicans "did manage to put Sebelius on the spot...about how many people would actually have coverage in January and the possibility of more canceled policies." However, according to Nather, "some...also drifted into overreach, and Democrats fought back with a renewed passion now that the website is improving."

The Wall Street Journal (12/12, Subscription Publication, 5.91M), in an editorial this morning, estimates that as of the beginning of the month, about four more million Americans lost their health insurance as a result of the ACA than gained it through the new exchanges. Karl Rove, in his column for the Wall Street Journal (12/12, Rove, Subscription Publication, 5.91M), makes the case that the ACA's unpopularity could cause Democrats to lose Senate races next year even in states that were carried by President Obama in 2012.

WPost Says "Obamacare's Biggest Losers" Include Many With Chronic Illnesses. Sarah Kliff, in a front-page article for the Washington Post (12/12, A1, 4.28M) titled "For Some Chronically Ill, Risk Of Coverage Gap Looms," reports that "Obamacare's biggest losers," include "people whose current plans have been canceled but who are having trouble getting through HealthCare.gov to purchase coverage by Dec. 23." According to Kliff, "The concern is particularly acute for patients with expensive medical conditions, who rely on their coverage for" treatment "that would otherwise break the bank." Kliff goes on to report that "those facing a potential coverage gap include an estimated 15 million people who purchase coverage for themselves on the individual market, many of whom received cancellation notices because their policies did not meet [ACA] requirements."

HHS IG To Review Problems That Preceded Roll-Out Of HealthCare.gov. The Washington Post (12/12, Somashekhar, 4.28M) reports that on Wednesday, in her testimony before the House Energy and Commerce Committee, Sebelius announced that she is "had directed the HHS inspector general to investigate what went wrong" with the roll-out of HealthCare.gov. Sebelius said, "Now that the website is working more smoothly, I've determined it's the right time to begin a process of better understanding the structural and managerial policies that led to the flawed launch so we can take action to avoid these problems in the future." According to the Post, Sebelius said she "asked HHS Inspector General Dan Levinson to review the development of the Web site with a particular focus on the Centers for Medicare and Medicaid Services, the agency...that oversaw the creation of the Web site, and the private firms that were contracted to work on the project." The Post notes that when "asked...if she would have delayed the Oct. 1 launch date for HealthCare.gov, Sebelius responded, 'On balance, I am not sure what the right answer is.'"

The Wall Street Journal (12/12, Schatz, Subscription Publication, 5.91M) reports that Sebelius said she also will appoint a chief risk officer at CMS who will look at "risk management practices associated with major agency initiatives."

Issa Accuses CMS Of Obstructing Congress. The Hill (12/12, Viebeck, 194K) reports that House Oversight Chairman Darrell Issa "is accusing federal health officials of criminally obstructing his investigation into the botched roll-out of HealthCare.gov." According to The Hill, Issa alleges that HHS is "illegally interfering with the ongoing probe after HHS purportedly told one private contractor not to comply with congressional requests for information." The Hill says Issa "dismissed the department's argument that Creative Computing Solutions Inc. (CCSI) agreed in its contract not to share certain details with third parties."

Administration Still Trying To Attract Younger People To The ACA's Marketplaces. The Wall Street Journal (12/12, Schatz, Subscription Publication, 5.91M), in an article titled "White House Works To Attract Younger Health-Plan Users," reports that the Administration is about to redouble its efforts to convince younger, healthier uninsured Americans to get coverage through one of the ACA marketplaces. The Journal notes that the Administration has not released demographic data about those who enrolled via HealthCare.gov, but, according to the Journal, numbers from several states suggest that less than a quarter of those selecting plans are under 35.

Only 44 Oregonians Signed Up For Private Insurance Through November 30. USA Today (12/12, Chebium, 5.82M) reports "just 44 [Oregon] residents signed up for private insurance through Cover Oregon from Oct. 1 to Nov. 30," which means Oregon "was dead last among all states," although "the tally doesn't include the nearly 100,000 Oregonians who've newly signed up for Medicaid."

BUDGET DEAL SEEN AS "BETTER THAN NOTHING" FOR OBAMA. Roll Call (12/12, Dennis, Subscription Publication, 87K) notes that while the budget deal announced yesterday by House Budget Chairman Paul Ryan and Senate Budget Chairwoman Patty Murray is not the deal the President "has been seeking for the past three years," for "a weakened president under water in the polls and facing the prospect of endless stalemate in Congress, it appears to be better than nothing." White House spokesman Josh Earnest "praised the deal as allowing a return to 'regular order' while limiting the damage to the economy if the sequester had been allowed to continue full force."

CBO: Budget Deal Will Reduce Deficit By \$85 Billion Over 10 Years. Politico (12/12, Everett, 467K) reports that the CBO estimates that the deal "will reduce the federal deficit by \$85 billion over 10 years." The plan "will decrease spending by \$78 billion and bring in \$7 billion in new revenues by 2023, CBO found."

The AP (12/12, Taylor) reports that the CBO said that over the next two years, the deal "would increase the deficit...by \$41.4 billion," raising it "by \$23.2 billion in 2014 and by \$18.2 billion the year after that."

House GOP Leaders Defend Budget Deal. The Washington Post (12/12, Montgomery, O'Keefe, Branigin, 4.28M) reports that amid objections from conservatives and liberals, House GOP leaders in Wednesday defended the bipartisan deal. House Majority Leader Cantor "congratulated Ryan on 'the hard work behind trying to get a deal in this divided government we're in,'" adding that the proposal "accomplishes deficit reduction and permanent federal pension reform, 'and it doesn't raise taxes.'" Cantor said the agreement "was consistent with Republican efforts to replace the mandatory budget cuts known as the sequester with 'permanent savings that make a lot more sense.'" The Post noted that House Republicans leaving a closed-door meeting about the deal on Wednesday "expressed mixed, but generally positive, reactions to the agreement."

The AP (12/12, Espo, Taylor) reports that the deal found support from House Republicans Wednesday "even though it would nudge federal deficits higher three years in a row." While there were complaints from both sides of the aisle, "other lawmakers, buffeted by criticism after last October's partial government shutdown, found plenty to like in the agreement and suggested it could lead to future cooperation. "

The Washington Post (12/12, Wilson, 4.28M) reports that the deal "represents a potentially defining moment" for Republicans, who are "divided between those who believe the party needs to prove it can govern, and those who believe in purity at all costs." The deal "puts House Republicans at a crossroads" at which they "can pass a compromise" or "reject the deal as insufficiently conservative and cement the party's growing reputation as unwilling to come to the table."

The Hill (12/12, Berman, Wasson, 194K) reports that the deal "won positive reviews from skeptical House Republicans on Wednesday morning." Although there was some criticism from conservatives, "lawmakers said there was little sign of the kind of revolt that has derailed Republican fiscal plans in the past."

McClatchy (12/12, Lightman, Douglas, 95K) reports that despite objections from conservatives and skepticism from Democrats, the deal "appears headed for passage, perhaps as soon as Thursday in the House of Representatives."

The Wall Street Journal (12/12, Hook, Peterson, Subscription Publication, 5.91M) reports that while few on the Hill are enthusiastic about the plan, lawmakers from both sides of the aisle say the hope of bringing an end to Congress's ongoing budget fights would be enough to move the bill through both chambers.

The Washington Post (12/12, O'Keefe, 4.28M) reports that the support for the bill "appears to rest on two things." First, "both parties will be making concessions in order to reach a deal, and two, that Congress is in no mood to have to rush back to Washington after the holidays to meet (yet) another fiscal deadline."

Boehner Blasts Conservative Groups Opposing Budget Deal. The CBS Evening News (12/11, story 3, 2:15, Pelley, 5.58M) reported that the conservative groups' opposition to the deal "drew a rare public rebuke from the Republican leadership." CBS (Cordes) added that "what made Republican leaders so angry was the fact that these powerful outside groups were once again urging Republicans to vote against a fragile compromise that had been worked out by a party standard bearer who, in this case, just happens to be a possible presidential candidate in 2016." Asked about the conservative groups' opposition, House Speaker Boehner said, "They're using our members and they're using the American people for their own goals. This is ridiculous. Listen, if you're for more deficit reduction you're for this agreement." CBS added that GOP leaders "feel that these influential groups have been pushing conservatives to sink deal after deal."

The Los Angeles Times (12/12, Memoli, 3.07M) calls Boehner's comments an "uncharacteristically forceful response" to the groups. The Times adds that Boehner "mocked the powerful conservative forces that he said were staking out opposition to the deal even before its full details were public."

The Hill (12/12, Berman, Wasson, 194K) notes that distrust between Boehner and the groups "has been a theme of his Speakership, but it boiled over" Wednesday as attacks on the deal by conservative groups, including Heritage Action and FreedomWorks prompted Boehner "to lash out at them." The Hill notes that with his comments, Boehner "joins senior Senate Republicans who have decried their influence and their motives in mounting primary challenges against incumbents."

Many Senate Republicans Oppose Deal. Politico (12/12, Raju, Sherman, 467K) reports that while House Republican leaders are "eager to lock down support from their party to back the bipartisan budget deal and avoid yet another round of fiscal crises," their message "appears to have gotten lost in the Capitol Rotunda." Senate GOP leaders and senior members "are balking at the budget deal, arguing that it hikes spending too high without demanding more immediate cuts in return." Politico notes that Senate Republicans "have the luxury of nearly uniform opposition because they are in the minority." Since they know the deal will have the 60-votes it needs to beat a filibuster, "'no' becomes the default position for many of them."

McConnell Said To Be "Leaning Against" Budget Deal. The Huffington Post (12/12, McAuliff, 11.54M) reports that Senate Minority Leader McConnell is "conspicuously absent" from the group of lawmakers praising the deal. Asked if he supports the agreement, McConnell "was noncommittal," saying, "I haven't really looked at it yet." However, there is an "unconfirmed report" that he "is leaning against it."

Cruz Finds Budget Deal "Deeply Concerning." The Hill (12/12, Jaffe, 194K) reports that Sen. Ted Cruz's office said Wednesday that the Senator, who was flying back from South Africa, finds the budget deal "deeply concerning." Spokeswoman Catherine Frazier said that Cruz "hasn't had time to fully review the proposal," but added that he "did take issue with much of it."

Sessions To Oppose Budget Deal. McClatchy (12/12, Lightman, 95K) reports that the top Republican on the Senate Budget Committee, Sen. Jeff Sessions said Wednesday that he "will oppose the bipartisan budget deal." Sessions said in a statement, "While I favor reorganizing elements of the Budget Control Act to smooth the impact, I do not favor increasing total discretionary spending above what was agreed to over the 10-year BCA period (exchanged for the already-exhausted \$2.1 trillion debt increase in 2011)."

Democrats Say Failure To Address Unemployment Benefits Could Sink Deal. NBC Nightly News (12/11, story 4, 2:10, Curry, 7.86M) reported that the deal "sidestepped dealing with the crisis facing 1.3 million Americans who've been out of work for a long time and that means their unemployment benefits will stop at the end of the month unless Congress take action."

The Wall Street Journal (12/12, Hughes, Subscription Publication, 5.91M) reports that Democratic leaders including House Minority Leader Pelosi are not pushing their members to support the budget deal. Pelosi said she did not know how much Democratic support the deal would get because unemployment aid was excluded.

The Hill (12/12, Needham, Lillis, Becker, 194K) reports that several leading Democrats say the deal "is on the verge of unraveling over the exclusion of federal unemployment benefits." These Democrats "are outraged by a GOP move to add the Medicare 'doc fix' to the package but not a continuation of unemployment benefits – a strategy they say could sink the entire package by scaring away Democratic votes." The Hill notes that while it is

unclear “whether Democrats would sink the first bipartisan budget deal in years over the unemployment insurance (UI) issue,” with Republicans “intent on leaving town on Friday – and with GOP leaders showing little appetite to extend the benefits before they expire on Dec. 28 – the Democrats’ only real leverage is to threaten to do so.”

Deal Seen As A Career-Defining Moment For Ryan. USA Today (12/12, Davis, 5.82M) reports that for Ryan, the announcement of the deal Tuesday night was “a defining moment in his legislative career.” His role “in crafting the first bipartisan budget deal to come out of divided government since the Reagan era has taken some conservatives by surprise.” But, with him “as the face of the budget compromise, the groups are finding a harder time getting traction within the ranks.”

The Wall Street Journal (12/12, O’Connor, Peterson, Subscription Publication, 5.91M) reports that Ryan has a great deal riding on the success of the plan. If it passes the House, he can number it among his accomplishments in a potential 2016 presidential run. But the plan also creates an opening for conservatives to question his bona fides as budget cutter.

The New York Times (12/12, Weisman, Subscription Publication, 9.61M) reports that with the deal, Ryan “is taking a risk he has previously shied away from, putting what party leaders see as a crucial need – ending the debilitating budget wars in Washington that have crippled the Republican brand – over his own self-interests with the conservative activists that dominate the early Republican presidential primaries.” Ryan is, for the first time, “taking withering fire from movement conservatives who see the deal as a betrayal by a former ally.” However, Ryan “may have enhanced his stature as the conservative in Washington who can actually get things done.”

Politico (12/12, Gibson, 467K) reports that while conservatives are “blasting” the deal, Ryan “doesn’t seem to be losing support from the far right members of his party.” Rep. Mick Mulvaney said, “Because Paul comes up with that kind of plan, it does not undermine his conservative credibility bona fides. ... I have a great deal of faith in Paul Ryan that will not be changed because of this issue.” Part of the reason Ryan remains in “good standing with the right wing of his party” is that “he has fought their fight for the past several years, proposing budgets full of red meat for conservatives.”

Deal Called The “Biggest Triumph” Of Murray’s Career. McClatchy (12/12, Lightman, 95K) reports that the agreement “was arguably the biggest triumph of Murray’s 20-year Senate career, where she was half the architect of a deal that’s eluded negotiators for years.” Murray, McClatchy notes, “stepped away from her role as partisan messenger and got leader-like” to craft this agreement. She said, “This agreement breaks through the recent dysfunction to prevent another government shutdown and roll back sequestration’s cuts to defense and domestic investments in a balanced way,” adding, “It’s a good step in the right direction...that can hopefully rebuild some trust and serve as a foundation for continued bipartisan work.”

Plan Does Not Repeat Sequester’s “Everybody Hurts” Approach. The Washington Post (12/12, Fahrenthold, 4.28M) reports that the sequester “was intended as an across-the-board budget cut, reducing spending on national defense and non-defense programs.” The cuts were triggered after “a better plan to reduce the federal deficit” could not be reached. With the plan announced Tuesday, Congress is considering a proposal to replace them “with something smaller. And, it is hoped, smarter.” While Congress would still be required “to lower spending to billions less than pre-sequester levels,” the “sequester’s everybody-hurts approach” would not be repeated. The plan “is to let House and Senate appropriators choose specific trims, saving the muscle and cutting the fat.”

Federal Employees To Pay More For Retirement Benefits Under Deal. The Washington Post (12/12, Hicks, 4.28M) reports that the deal would require future Federal government hires “to pay more than existing employees toward their retirement benefits.” The agreement “would save the government \$6 billion in pension costs over 10 years by forcing federal employees hired after Jan. 1 to pay an additional 1.3 percent of their salaries toward retirement.”

Agreement Provides Spending Certainty For Pentagon. The AP (12/12, Cassata) reports that the agreement would provide “some long-sought stability in spending” to the Pentagon. The deal would cap defense spending in the current 2014 fiscal year “at \$520.5 billion, up from the current level of \$498.1 billion.” Fiscal 2015 spending “would be capped at \$521.4 billion, up from \$512 billion.” The AP notes that while the numbers were not their ideal, “defense leaders and members of Congress’ military panels welcomed the certainty promised in the deal.”

Deal Increases Airline Security Fee. The AP (12/12, Freed) reports that the deal “would more than double the \$5 security fee on most round-trip tickets, to \$11.20 per ticket” starting on July 1. According to the airline trade group Airlines for America, on a trip with one stop, “taxes can boost the price of what would have been a \$238 ticket to \$300.”

More Commentary. In his column for the Washington Post (12/12, 4.28M), E.J. Dionne describes the deal as “very conservative” and notes that while it “leaves the jobless out in the cold, because it doesn’t extend unemployment benefits, and provides little room for new initiatives to combat rising inequality and declining upward mobility,” it is being subjected to “vitriolic attacks from the right wing.” Dionne argues that this is “at best, a necessary deal, given the alternatives available in a political system whose priorities have been twisted away from the needs of the struggling majority.”

In his column for the Washington Post (12/12, 4.28M), Dana Milbank writes that while there is much that is “wrong with the deal,” Ryan “achieved something monumental this week” by persuading “his fellow conservatives to compromise, even though they are under pressure to oppose the pact from powerful groups such as Club for Growth, Heritage Action and Americans for Prosperity.” Milbank calls this “first-time willingness among conservatives to buck the ideological purity police” a “small ray of hope that their bravery will repeat itself on other occasions.”

An editorial in the Washington Post (12/12, 4.28M) that while there is not “a lot not to like” in the deal, it has “one overriding virtue: It exists.” Its “importance is not fiscal but political: It amounts to a truce in the destructive budgetary wars that have plagued Washington since the advent of a Republican-majority House in 2011.”

In an editorial, the New York Times (12/12, Subscription Publication, 9.61M) notes that Democrats “achieved much of what they wanted in a budget deal reached on Tuesday that in other important respects was disappointing.” The Times argues that the details of the deal “show that Republican loathing of taxes and domestic spending continue to dominate the budget debate.”

SENATE HOLDS ALL-NIGHT SESSION TO CONFIRM OBAMA NOMINEES. The Washington Post (12/12, O’Keefe, 4.28M) reports that “in another sign that the U.S. Senate is racing the clock and adjusting to life under a new set of rules, senators are scheduled to hold a series of votes overnight and early Thursday morning.” The Senate was set to vote on Nina Pillard’s nomination to the US Court of Appeals for the District of Columbia around 1:30 a.m., with a vote on Equal Employment Opportunity Commission nominee expected around 5:30 a.m. Other nominations are set for later Thursday and Friday.

Bloomberg News (12/12, Hunter, Rubin, 1.91M) says Republicans, “stripped of their ability to stop confirmation of almost all” of President Obama’s nominees, are trying to delay them instead. The Hill (12/12, Bolton, 194K) says the GOP is planning “a more than 30-hour talkathon on the chamber floor.” Politico (12/12, Everett, 467K) writes, “Here’s what the Senate looks like in the aftermath of last month’s historic rules change: 1 a.m. votes, hours of partisan speeches and committee hearings being cut short.” Roll Call (12/12, Lesniewski, Subscription Publication, 87K) says “the Senate Historical Office defines all-night sessions of the Senate as those sessions running past 4 a.m.”

More Commentary. The Wall Street Journal (12/12, Subscription Publication, 5.91M) says in an editorial that Democrats are using the new rules to pack the District of Columbia Circuit Court and to push through ideological nominees to a variety of posts. The Journal says Democrats are eager to get President Obama’s court nominees seated before further cases regarding the Affordable Care Act are heard.

Editorial Wrap-Up:

NEW YORK TIMES. “*The Minimalist Budget Deal.*” In an editorial, the New York Times (12/12, Subscription Publication, 9.61M) notes that Democrats “achieved much of what they wanted in a budget deal reached on Tuesday that in other important respects was disappointing.” The Times arguments that the details of the deal “show that Republican loathing of taxes and domestic spending continue to dominate the budget debate.”

"The Toll From Three Deadly Diseases." A New York Times (12/12, A38, Subscription Publication, 9.61M) editorial writes yesterday the World Health Organization estimated global efforts against malaria had reduced mortality by 45% globally between 2000 and 2012. However, the paper points out that substantially less than 50% of sub-Saharan African residents have the necessary insecticide-treated nets to ward off the disease and millions have no access to tests and treatments. The region faces the same situation with tuberculosis, where the paper calls the number of resultant fatalities "an unacceptably high toll given that most deaths are preventable if cases are detected early and treated properly," and HIV.

"India's Reversal On Gay Rights." The New York Times (12/12, Subscription Publication, 9.61M) in an editorial calls a ruling by India's Supreme Court striking down a lower court decision to decriminalize homosexual conduct "disgraceful," and says the law was used "to threaten and blackmail gays, lesbians and transgender people." The Times says that the court's ruling that it is for parliament to make such decisions is "disingenuous" because it is "unlikely" to do so. The Times urges the government of Prime Minister Manmohan Singh to seek repeal of the law.

WASHINGTON POST. *"A Done Deal."* An editorial in the Washington Post (12/12, 4.28M) that while there is not "a lot not to like" in the budget deal, it has "one overriding virtue: It exists." Its "importance is not fiscal but political: It amounts to a truce in the destructive budgetary wars that have plagued Washington since the advent of a Republican-majority House in 2011."

"Cubans Deserving Of Respect." An editorial in the Washington Post (12/12, 4.28M) criticizes the President's handshake with Raul Castro, calling it a gesture "freighted with symbolism that cannot be ignored." The Post notes that while the President was shaking hands with Castro, "courageous people attempting to uphold Mr. Mandela's ideals were suffering beatings and arrests," calls on the President "to follow his handshake with a loud and unambiguous salute to the real champions of human rights – those fighting for it on the streets of Cuba."

"Boo To The Naysayers." An editorial in the Washington Post (12/12, 4.28M) attributes the improvement of District of Columbia schools to "reforms grounded in accountability, high standards, and school choice." Mayor Vincent Gray and Councilmember Jack Evans are praised for "standing up for sensible policies that have brought much-needed change to the city's public schools" at Monday's teachers union-sponsored forum on education that included "boos and catcalls" by teachers. The Post argues the vocal educators criticizing the reforms at the event are not reflective of the "many teachers who want to be rewarded for the quality of their work."

WALL STREET JOURNAL. *"Juking The ObamaCare Stats."* In an editorial, the Wall Street Journal (12/12, Subscription Publication, 5.91M) cautions readers not to buy into the optimistic reports HHS and the White House are putting forth about the Affordable Care Act. The paper points out how selective the monthly enrollment figures have been, most notably for glossing over the number of Americans whose plans have been canceled as a result of the law.

"Behind The Filibuster Flurry." The Wall Street Journal (12/12, Subscription Publication, 5.91M) says in an editorial that Democrats are using new Senate rules to pack the District of Columbia Circuit Court and to push through ideological nominees to a variety of posts. The Journal says Democrats are eager to get President Obama's court nominees seated before further cases regarding the Affordable Care Act are heard.

"Powering Down The Wind Subsidy." The Wall Street Journal (12/12, Subscription Publication, 5.91M) says in an editorial that the wind production tax credit, intended to be temporary, has now been on the books for two decades, and that it should be ended. The Journal urges Republicans to argue against extending the credit by calling it an example of corporate welfare and cronyism intended to aid President Obama's supporters among the green energy industry.

Thomas Young, Chair, Independent Review Team, examining NOAA/NASA weather satellite operations; Barry Lee Myers, CEO, Accuweather, Inc.; Richard Him, General Counsel, National Weather

Service Employees Organization; Dr. Lee E. Ohanian, Professor of Economics, UCLA, Senior Fellow, Hoover Institution, Stanford University. Location: G50 Dirksen.

1 p.m. FOREIGN AFFAIRS – Joint Subcommittee Hearing: “The Resurgence of al-Qaeda in Iraq.” Subcommittee on Terrorism, Nonproliferation, and Trade; Subcommittee on the Middle East and North Africa. Witnesses: Kenneth M. Pollack, Ph.D., Senior Fellow, Saban Center for Middle East Policy, The Brookings Institution; Jessica D. Lewis, Research Director, Institute for the Study of War; Michael Knights, Ph.D., Lafer Fellow, The Washington Institute for Near East Policy; Daniel L. Byman, Ph.D., Professor, Security Studies Program, Georgetown University. Location: 2172 Rayburn.

1:30 p.m. OVERSIGHT AND GOVERNMENT REFORM – Subcommittee on Energy Policy, Health Care and Entitlements hearing, “FDA Checkup: Drug Development and Manufacturing Challenges.” Location: 2154 Rayburn.

2 p.m. FINANCIAL SERVICES – Hearing entitled “Rethinking the Federal Reserve’s Many Mandates on Its 100-Year Anniversary.” Witnesses: Dr. Douglass Holtz-Eakin, President, American Action Forum; Alice Rivlin, Senior Fellow, Economic Studies, Brookings Institution; Dr. Marvin Goodfriend, friends of Allan Meltzer, Professor of Economics, Tepper School of Business, Carnegie-Mellon University; Alex J. Pollock, Resident Fellow, American Enterprise Institute. Location: 2128 Rayburn.

Other: Employee Benefits Security Administration (EBSA)—8:40 a.m. Update by Phyllis C. Borzi, Assistant Secretary of Labor, U.S. Department of Labor (DOL).

AEMC ENERGY SUMMIT – 8 a.m. – 4:30 p.m. Speakers: Ernest J. Moniz, U.S. Secretary of Energy; David Danielson, Assistant Secretary of Energy, Office of Energy Efficiency and Renewable Energy, U.S. Department of Energy; Steny Hoyer, (D-MD) Democratic Whip; Norman Augustine, Former Chairman and Chief Executive Officer, Lockheed Martin Corporation; Amy Ericson, U.S. Country President, Alstom; Michael Mansuetti, President, Robert Bosch LLC; Tom Wemer, President and Chief Executive Officer, SunPower Corporation; Deborah Wince-Smith, President and CEO, Council on Competitiveness. Location: Ronald Reagan Building & International Trade Center, 1300 Pennsylvania Avenue, NW.

PENTAGON – SINGAPORE – 10:15 a.m. Secretary of Defense Chuck Hagel hosts an honor cordon to welcome Singapore’s Minister of Defence Dr. Ng Eng Hen to the Pentagon. The cordon will be held on the steps of the Pentagon River Entrance.

CSIS – KOREA – 10:30 a.m. – 11:45 a.m. Korea’s Interest in the Trans-Pacific Partnership. Speakers: Ambassador Ahn Ho-Young, Ambassador of the Republic of Korea to the United States, Embassy of the Republic of Korea joined by Wendy Cutler, Deputy United States Trade Representative (acting), Office of the United States Trade Representative; Scott Miller, Senior Advisor and Scholl Chair in International Business, CSIS; Dr. Victor Cha, Senior Advisor and Korea Chair, CSIS. Location: Center for Strategic and International Studies, 2nd Floor Conference Center

HERITAGE – CWN LUNCHEON – SEN. LEE – 12 p.m. Conservative Women’s Network “From Boston to Philadelphia: America’s Opportunity Crisis and the Conservative Reform Agenda” with keynote by U.S. Senator Mike Lee. Location: Heritage Foundation, 214 Massachusetts Ave. NE.

GLOBAL LEADERSHIP HONORS – BIDEN, GRANGER, LOWEY, MCCAIN – 7 p.m. The U.S. Global Leadership Coalition will pay tribute to Vice President Joseph R. Biden, Jr. and Representatives Kay Granger and Nita M. Lowey for their long-standing commitment to America’s global leadership and their strong support of U.S. development and diplomacy programs. Co-chaired by Marillyn A. Hewson, CEO and President of Lockheed Martin Corporation, and H. Melvin Ming, President and CEO of Sesame Workshop. Senator McCain will present the tribute to Vice President Biden. Participants: Joseph R. Biden, Jr., Vice President of the United States; Kay Granger, Chair of the House Appropriations Subcommittee on State and Foreign Operations; Nita M. Lowey, Ranking Member of the House Appropriations Committee; John McCain, U.S. Senator; Marillyn A. Hewson, CEO and President of Lockheed Martin Corporation; H. Melvin Ming, President and CEO of Sesame Workshop. Location: The Grand Hyatt Washington Hotel, 1000 H Street, NW.

Last Laughs:

LATE NIGHT POLITICAL HUMOR.

David Letterman: "You see that picture where the President was using an iPhone to take a selfie and it was him and...it was the guy from Great Britain and the woman in charge of Norway or whatever, Denmark, yeah. And I thought it was interesting. He knows how to operate the camera to take a picture but they can't figure out how to operate the Obamacare website."

David Letterman: "Listen this, ladies and gentlemen. The Republicans and the Democrats have now agreed on a new budget without delay or bickering. ...It's an unusual deal, the new budget deal. They're going to increase military spending but they will outlaw any more musicals on NBC."

Stephen Colbert: "It seems like the bad news about Obamacare keeps pouring in. Seems like every time I turn on the TV I see me screaming about it and frankly, I can't blame me. I mean first the website was broken. Then it was fixed. And now a million people have signed up."

Stephen Colbert: "Well, folks, that was so inspired by Huckabee's...carol that I made my own anti-Obamacare song parodies. Order today for Steven Colbert's 'Now That's What I Call Christmas Healthcare Parodies: Volume 1.' Okay. Give it to a friend and they'll enjoy Christmas classics like, 'Hark the herald Kathleen Sebelius sing glory to Obamacare.' And, 'Obamacare is beginning to look a lot like Socialism. Every hospital to which you go.' Plus, 'Feliz Death Panel. Feliz Death Panel. Feliz Death Panel...Obamacare.' And no collection would be complete without, 'Away in a healthcare manager he said if you like your healthcare plan you could keep it. Obamacare made our little Lord Jesus cry.'" And for the kids out there, "Frosty the Biden." And the whole family will sing along with, 'O Obamacare.' Act now and you'll also get 'Jingle Obamacare Dogs.' A bunch of loveable, fiscally conservative pups barking your favorite Christmas anti-Obamacare songs."

Jon Stewart: [Referring to new budget deal] "We'll pick off where we left off last night with the United States Congress. If you tuned in you might have seen this: how this, the 113th Congress, is perhaps the worst Congress in the history of not just this nation. So we thought we would check in on what today's congressional [bleep] was doing. What do they do today? Pass a resolution demanding preapproval of all presidential handshakes? Refuse to vote on anything except whether to add cronuts to the congressional brunch. Sitting around saying that Saxby Chambliss is an acceptable name. It's not. It's not okay. It's just not okay. ... Deal? Deal? What type of witchcraft is this? Deal? The elders have spoken of such wonders but I thought like the yeti it belonged to legend. If this be true, it be incredible."

Jimmy Fallon: "It's been another tough week for President Obama. ...Did you see this? Yesterday at Nelson Mandela's memorial service, two things. One is he came under fire when he shook hands with Cuba's communist leader Raul Castro. People are like, why would you want to be seen with that guy. And then Castro was like, 'I didn't, but all of a sudden he was shaking my hand. I didn't know what to do. What was I going to do, say no? He just came up and I shook his hand.'"

Jimmy Fallon: "But Obama's also facing criticism after he posed for a selfie right in the middle of Mandela's memorial service. ...There he's taking the picture of himself with the prime ministers of England and Denmark. You know it's bad when even Biden was like, man that was dumb. That was real dumb."

Jimmy Fallon: "And did you see Michelle while this is happening? Look at this. She did not look happy. Looks like somebody's going to be sleeping by him-selfie for a while. That's what I think."

Jay Leno: "It looks like the United States is trying to forge a new relationship with Iran. But the Iranians are leery. They want to make sure Ben Affleck is not involved in any way. We got burned by that guy once before."

Jay Leno: "Have you seen the picture going around the President taking a selfie with the female Prime Minister of Denmark? Here's the picture. And Michelle doesn't look happy, does she. Look at the President. He's having the time of his life and she is just staring straight ahead. Well people are now saying it was taken out of context and she's not mad at all. But I don't know. Like, this morning at the White House, Michelle gave the President

burnt toast and she said, 'Oh, sorry for the burnt toast. Were you hoping for a little Danish?'"

Jay Leno: "And Congressman Allen Grayson from Florida has acknowledged that he lost \$18 million in the stock scheme. You've got to admit, doesn't that make you feel good to see a congressman losing his own money for a change?"

Jay Leno: [Referring to the weather in Los Angeles] "It was so cold, Chris Christie called his liposuction doctor and asked for the old fat back."

Conan O'Brien: "A federal judge has ruled that President Obama's Kenyan uncle may remain in the United States. Yeah. The judge also ruled that President Obama's Kenyan uncle is an amazing name for a band."

To: Sally Jewell (b) (6)@ios.doi.gov

Thu, Dec 12, 2013 at 9:44 AM

Good morning Sally,

I asked about whether the CHAT data was available through the Geospatial Platform, and got this response back from Jerry Johnston:

With regards to the CHAT tools, I had seen some mention of this work from WGA and others... and just took a look to see how far this has progressed after your note. The Southern Great Plains CHAT is probably the one that the Secretary is referring to as it directly pertains to Sage Grouse Habitat: <http://kars.ku.edu/maps/sgpchat/>

The good news here is that (thanks to Esri's work on creating an infrastructure where people can share data services easily), we can definitely register these data services as a part of the Platform – I will do that over the next few days and make sure the data layers and this application are accessible to our users.

So I think it would be fair to say, if you want, that the CHAT data will be accessible through the federal Geospatial Platform very shortly.

Anne

Secretary Jewell Meets with Western Governors to Provide Update on Sage Grouse Conservation Planning, Lauds Unprecedented Federal-State Cooperation *Emphasizes Much Work Still to Be Done Before Deadline on Listing Decision under Endangered Species Act*

LAS VEGAS, NV – At a meeting with western governors today, Secretary of the Interior Sally Jewell applauded the unprecedented federal-state cooperation on planning efforts to conserve the greater sage-grouse but emphasized that much work still needs to be done by both the federal government and the states in advance of the U.S. Fish and Wildlife Service's September 2015 deadline to determine if the species warrants protection under the Endangered Species Act.

"Thanks to our partnership with states throughout the range of the greater sage-grouse, we have made tremendous progress analyzing and planning landscape-level strategies that could lessen the threats to the bird and conserve its sagebrush habitat," said Jewell. "At the same time, we are not yet where we need to be and it is time for both the states and the federal government to redouble our efforts so that we can have effective conservation efforts in place before a listing determination must be made."

Jewell highlighted important steps that have been taken including publication before the end of the year of draft changes to 98 resource management plans by the Bureau of Land Management and the U.S. Forest Service that are expected to be finalized next year following a public comment period. She emphasized that conservation efforts on state and private lands need to be accelerated to mitigate the threats to the bird.

"The states, too, must complete and begin to implement their own plans for state and private lands on a similar timeline,"

she said. "The Fish and Wildlife Service needs substantial certainty that these plans will both be in place and effective as it considers the biological and legal issues related to a listing decision."

Among other issues, the Service is seeking continued state involvement in determining, based upon the best available science, whether sufficient measures are in place to ameliorate the effects of development and other disturbances of greater sage-grouse habitat as well as the threat posed by invasive species and more frequent fire cycles.

Two years ago, then-Secretary Ken Salazar and western governors formed the Sage Force Task Force to work together on a cooperative, landscape-level approach to conserving the species across the West. The Task Force includes a representative of the governor of each of the 11 greater sage-grouse states plus the U.S. Fish and Wildlife Service, the Bureau of Land Management, the U.S. Forest Service and the Natural Resources Conservation Service.

The Task Force has met frequently since being formed. At the request of the Task Force, the U.S. Fish and Wildlife Service assembled a Conservation Objectives Team made up of state and federal sage-grouse experts to assess the conservation needs of the species across its range. The BLM also assembled a National Technical Team that included state and federal scientists to advise its land management planning efforts.

Jewell emphasized the importance of this holistic and cooperative approach. "We will only be successful if we work together across the landscape to achieve our common conservation goals," she said.

Earlier in the day in a speech before the Western Governors Association, Jewell highlighted her first Secretarial Order to establish a Department-wide mitigation strategy to encourage balanced development through landscape-level planning on federal lands.

"Our goal is to have a strategy in place that provides consistency and efficiency as we review and permit new energy and other infrastructure development activities, at the same time ensuring that we are effectively conserving our nation's valuable natural and cultural resources," she said.

The greater sage-grouse is a large, rounded-winged, ground-dwelling bird, up to 30 inches long and two feet tall, weighing from two to seven pounds. The birds are found at elevations ranging from 4,000 to over 9,000 feet and are highly dependent on sagebrush for cover and food. They are well-known for their elaborate mating ritual and an iconic species of the remaining sage brush landscapes.

The greater sage-grouse is currently found in Washington, Oregon, Idaho, Montana, North Dakota, eastern California, Nevada, Utah, western Colorado, South Dakota and Wyoming and the Canadian provinces of Alberta and Saskatchewan.

Habitat fragmentation and destruction across much of the species' range has contributed to significant population declines over the past century. If current trends persist, many local populations may disappear in the next several decades, with the remaining fragmented population vulnerable to extinction. Taking actions to conserve the species will also restore the health of native sage steppe ecosystem that support local economies and communities in addition to big game species, upland birds and other wildlife.

The U.S. Fish and Wildlife Service previously determined that the listing of the species as a threatened or endangered species was warranted but precluded by other conservation priorities. In accordance with a settlement agreement, the agency has until September 2015 to determine if the species should be proposed for listing under the Endangered Species Act.

SECRETARY JEWELL DELIVERS KEYNOTE ADDRESS AT MEETING OF WESTERN GOVERNORS ASSOCIATION. The AP (12/13, Dreier) reports that Interior Secretary of the Interior Sally Jewell "delivered a keynote address" during the annual winter meeting of the Western Governors Association on Thursday,

"highlighting the federal government's commitment to collaborating on conservation and land management issues." Jewell "told an audience of officials that climate change is real, and seen most clearly in the West." She said, "You see it here in the west around fires, around floods."

More Resources Sought To Fight Wildfires. The Las Vegas Review-Journal (12/13, 437K) reports that a panel called for more funds to be spent on forest management to combat the rising costs of fighting wildfires. Neil Komze, acting director of the BLM, said he saw the benefits of fuel reduction firsthand when he visited the site of the Dean Peak fire.

AP coverage was picked up by the Columbus (IN) Republic (12/13, 80K), the Fresno (CA) Bee (12/12, 327K), the Modesto (CA) Bee (12/12, 208K), the El Paso (TX) Times (12/13, Dreier, Press, 247K), the Las Cruces (NM) Sun-News (12/13, 59K), the Salt Lake (UT) Tribune (12/13, 343K), the Seattle Post-Intelligencer (12/13, 768K), the San Francisco Chronicle (12/13, Dreier, 2.88M), the York (SC) Enquirer-Herald (12/12, 18K), the Colorado Springs (CO) Gazette (12/13, 160K), the Fort Mill (SC) Times (12/12, 54K), KPHO-TV Phoenix (12/13, 74K), KTVU-TV San Francisco (12/13, 128K), KCNC-TV Denver (12/12, 26K), KTVB-TV Boise, ID (12/13, 87K), KGW-TV Portland, OR (12/13, 130K), KSWO-TV Lawton, OK (12/13, 6K), and KTAR-FM Glendale, AZ (12/13, 17K).

Additional coverage was provided by KLAS-TV Las Vegas (12/13, 36K).

Western Governors Show Off New Wildlife Maps. The AP (12/12) reports that governors in 16 Western states "are unveiling a high-tech wildlife habitat mapping project they hope will encourage economic development across the West while protecting the region's environmental treasures from Puget Sound to the Rocky Mountains." The Western Governors' Association is hoping "to make it easier to chart paths across large landscapes where developers can expect the least regulatory resistance and threat of litigation as they draft plans to build highways, dig gold mines and erect power lines, pipelines or wind farms." The Department of Energy "provided a \$3 million grant and individual states contributed the time of mapping specialists the past three years to help gather, organize and input the information," according to WGA spokesman Joe Rassenfoss.

Also reporting on the story is the Las Vegas Review-Journal (12/13, 437K).

Secretary Jewell Provides Update On Sage Grouse Conservation Planning. KXLO-FM Lewiston, MT (12/13) reports that at the meeting with western governors, Interior Secretary Sally Jewell "applauded the unprecedented federal-state cooperation on planning efforts to conserve the greater sage-grouse but emphasized that much work still needs to be done by both the federal government and the states in advance of the US Fish and Wildlife Service's September 2015 deadline to determine if the species warrants protection under the Endangered Species Act." Jewell said, "Thanks to our partnership with states throughout the range of the greater sage-grouse, we have made tremendous progress analyzing and planning landscape-level strategies that could lessen the threats to the bird and conserve its sage-brush habitat. At the same time, we are not yet where we need to be and it is time for both the states and the federal government to redouble our efforts so that we can have effective conservation efforts in place before a listing determination must be made."

Wyoming Gov Mead Seeks Better Cooperation With States From Secretary Jewell. The Casper (WY) Star-Tribune (12/13, 90K) reports that Wyoming Gov. Matt Mead hopes Interior Secretary Sally Jewell will "further commit to cooperation with and deference to the states during her keynote address today at the Western Governors' Association Conference in Las Vegas." Mead would like to see the Jewell's department "reconsider the BLM's hydraulic fracturing rule, which is redundant since Wyoming's rule – the first one adopted by a state – applies to BLM land."

Secretary Jewell Meets Teddy Roosevelt. In its "GovBeat" blog, the Washington Post (12/12, Wilson, 4.28M) reports that Interior Secretary Sally Jewell, "in town to address a meeting of the Western Governors Association, met a president instead." According to the article, "as Jewell made her way to the stage, a Theodore Roosevelt impersonator scored a brief audience." The article notes that "environmental activists have sent a Roosevelt impersonator to several events Jewell has held, to advocate for conservation issues."

SECRETARY JEWELL TO ANNOUNCE MITIGATION REPORT WILL BE COMPLETED IN JANUARY. Politico (12/12, Guillen, 467K) reports that Interior Secretary Sally Jewell was expected to announce that "her department will finish their preliminary report on development and conservation issues by the end of January."

NEW DIRECTOR OF BUREAU OF INDIAN EDUCATION ANNOUNCED. The [Santa Fe New Mexican](#) (12/13, 58K) reports that Dr. Charles M. "Monty" Roessel has been named Director of the Bureau of Indian Education. Interior Secretary Sally Jewell made the announcement while touring a BIE tribally controlled grant school located on the Pueblo of Laguna in Laguna, New Mexico. Jewell said Roessel has proven to be an effective steward for Indian education programs.

The [Indian Country Today Media Network](#) (12/12, 21K) reports that Assistant Secretary – Indian Affairs Kevin Washburn, who accompanied Roessel and Secretary of the Interior Sally Jewell on the tour, said, "The BIE plays a major role in the education of thousands of American Indian students across Indian country. As acting director, Dr. Charles M. Roessel has proven to be an effective steward of our Indian education programs, bringing to the Bureau extensive experience in school leadership and administration, and an understanding of what's needed at the local school level. He is a strong and effective member of my senior management team."

AP coverage was picked up by the [Provo \(UT\) Daily Herald](#) (12/13, 102K), the [Ogden \(UT\) Standard-Examiner](#) (12/12, 147K), and [KJZZ-FM Phoenix](#) (12/13, 10K). Additional coverage was provided by the [Arizona Republic](#) (12/12, 1.19M).

SECRETARY JEWELL ADDRESSES INDIAN COUNTRY ISSUES. The [Native American Times](#) (12/13, 337) reports that Interior Secretary Sally Jewell "made her first official visit to the state Nov. 25 to sign an agreement with the Citizen Potawatomi Nation that gives the tribe complete leasing authority over its trust property." Before the ceremony, Jewell "toured the Citizen Potawatomi Nation's cultural heritage center with Rep. Tom Cole (R-Okla.), Assistant Secretary of Indian Affairs Kevin Washburn and Jacque Secondine Hensley, the state of Oklahoma's tribal liaison and a representative from the Native Times." While touring the facility, Jewell "weighed in on some of the issues in Indian Country, including tribes' efforts to assert self-determination and diversify economically."

NEW CONSERVATION PAC ANNOUNCED. The [Environment & Energy Publishing](#) (12/13, 705) reports that former Interior Secretary Ken Salazar and hedge fund billionaire Louis Bacon "plan to form a new political action committee to support candidates who back conserving lands and cultural resources." According to the article, "America's Conservation PAC will be led by Will Shafroth, who has worked closely with Salazar for decades, serving most recently as his counselor during the Obama administration's first term." Salazar and Bacon will serve as honorary co-chairmen.

Also providing coverage are [Politico](#) (12/13, Tau, 467K), the [National Journal](#) (12/13, Subscription Publication, 427K), the [Denver Post](#) (12/12, 949K), the [Denver Business Journal](#) (12/13, Subscription Publication, 71K), and [KUSA-TV Denver](#) (12/13, 171K).

MOST POPULAR PHOTOS OF NATIONAL PARKS ON TWITTER IN 2013 HIGHLIGHTED. The [Skift](#) (12/12) reports that Twitter is showcasing "2013's biggest events" as seen on the site. According to the article, "inside Twitter's year-end feature is a roundup of the most popular images shared" by the Interior Department.

HOUSE REPUBLICANS CRITICIZE INTERIOR AGENCIES OVER ENDANGERED SPECIES LAW. In its "Regwatch" blog, [The Hill](#) (12/13, 194K) reports House Republicans are "charging the Obama administration with using 'political science' to justify adding new plants and animals to the endangered species list." During a Thursday hearing of the House Natural Resources Committee, GOP lawmakers claimed that agencies like the BLM and FWS "are opaque and ignore state and local officials." Critics said "they don't have a problem with the law itself; just the way agencies are implementing it."

JUDGE TENTATIVELY RULES AGAINST CROSS ON FEDERAL LAND. The [New York Times](#) (12/13, Lovett, Subscription Publication, 9.61M) reports from Los Angeles that a Federal judge ruled on Thursday that a cross on Federal land in San Diego "violated the First Amendment ban on a government endorsement of religion and ordered it removed within 90 days," but the decades-old dispute over the cross "may not be over," as the judge "said he would stay the order if there was an appeal."

GROUP SUES OVER REDEVELOPMENT OF DEREEF PARK. The [Charleston \(SC\) City Paper](#) (12/12, 9K) reports that "a neighborhood group based in Cannonborough-Elliottborough filed a lawsuit Wednesday to

challenge the loss of tiny Dereef Park to a new residential development." According to the lawsuit, in the early 1980s, "the City of Charleston received money from the federal Land & Water Conservation Fund to develop the tiny park on Momis Street, accepting in the process a covenant that guaranteed the park would be preserved indefinitely as a recreational space." However, "in 2003, the city entered a deal to sell the property to developer Civitas LLC," and "the land eventually changed hands to the Smith Morris Company LLC, which today plans to build the second phase of the Momis Square residential development on the site of the park." The lawsuit's list of defendants does not include "the developer who chose to build on the site nor the city officials who allowed the land's sale to a private interest," but instead names the NPS; the S.C. Department of Parks, Recreation, and Tourism and its director, Duane Pamish; Interior Department Secretary Sally Jewell; and Phil Gaines, the state liaison officer for the federal Land and Water Conservation Fund.

BLM ANNOUNCES NEW APPOINTMENTS TO PUBLIC LANDS ADVISORY GROUP. The Twin Falls (ID) Times-News (12/13, 56K) reports that the BLM has announced new appointments to the Twin Falls District's citizen-based Resource Advisory Council. In a press release, Interior Secretary Sally Jewell said, "By working with federal, state, local and tribal governments, as well as leaders from the industry and conservation communities, the BLM's Resource Advisory Councils exemplify the collaborative approach taken by the department in handling public land issues."

ADDITIONAL COVERAGE OF INTERIOR'S IT INITIATIVE. Additional coverage of the Interior Department's information technology initiative was provided by the ExecutiveGov (12/13, 548).

FORMER COUNCILWOMEN SEEKS ESTABLISHMENT OF INTERPRETATIVE CENTER IN FRIDAY HARBOR. In an op-ed for the Journal of the San Juans (WA) (12/13, Pratt), Lovel Pratt, a former county councilwoman, urges Interior Secretary Sally Jewell, Sen. Patty Murray, Sen. Maria Cantwell, and Rep. Rick Larsen to "consider establishing a coordinated public lands information and interpretive center in Friday Harbor." Pratt says the facility could "showcase the San Juan Island National Historical Park, the San Juan Islands National Monument, US Fish and Wildlife Wilderness islands, and perhaps more of the state and county public lands that are located in the San Juan Islands."

America's Great Outdoors:

National Park Service:

NPS BACKS AWAY FROM MUIR WOODS PANORAMIC PARKING LOT PLAN. The Marin (CA) Independent Journal (12/13, 88K) reports that "after an uproar in the community," the NPS has "backed away from a plan to create a satellite parking lot along Panoramic Highway to shuttle visitors to Muir Woods." Howard Levitt, spokesman for the Golden Gate National Recreation Area, said, "We heard the public loud and clear. We are not pursuing (parking) up there. From the beginning it was just an idea, nothing more." According to the article, "satellite parking and shuttles are still being discussed, but are focused on established lots at the Highway 101/1 junction near Mill Valley."

THEODORE ROOSEVELT NATIONAL PARK COMPLETES ELK MAINTENANCE PLAN FOR 2013. The Bismarck (ND) Tribune (12/13, 22K) reports that "forty-six elk were killed in the Theodore Roosevelt National Park in the last month as part of the park's herd maintenance program." According to the article, "approximately 7,500 pounds of meat was packed out of the park, most of which was donated to Sportsmen Against Hunger through the North Dakota Community Action Partnership." Park Superintendent Valerie Naylor said "elk numbers in the park will be reassessed in late summer of 2014."

CONTROLLED BURNS TO BE CONDUCTED AT LAKE MEREDITH NATIONAL RECREATION AREA. The Borger (TX) News Herald (12/13, 12K) reports that the NPS and local fire departments are conducting a controlled burn at Lake Meredith Thursday and Friday.

Also reporting on the story is KFDA-TV Amarillo, TX (12/13, 1K).

ADDITIONAL COVERAGE OF NPS' RESPONSE TO FREEDOM OF INFORMATION ACT REQUESTS REGARDING MOUNT VERNON CLOSING. Additional coverage of the NPS' response to Freedom of Information

Act requests regarding the closing of Mount Vernon during the government shutdown was provided by the [Washington Times](#) (12/13, Ernst, 417K) and the [TheBlaze](#) (12/12, 1.07M).

ADDITIONAL COVERAGE OF MANHATTAN PROJECT NATIONAL HISTORICAL PARK. Additional coverage of the Manhattan Project National Historical Park was provided by the [Bellingham \(WA\) Herald](#) (12/11, 113K) and the [Walla Walla \(WA\) Union-Bulletin](#) (12/12, 38K).

Bureau of Land Management:

NEW LEGISLATION PROPOSED FOR ORGAN MOUNTAINS-DESERT PEAKS NATIONAL MONUMENT. The [Las Cruces \(NM\) Sun-News](#) (12/13, 59K) reports that Sens. Tom Udall and Martinez Heinrich have "reignited a decade-old effort to seek federal protections for a mountain range that borders one of the state's largest cities as well as other scenic areas in Dona Ana County." The lawmakers on Thursday "announced legislation that would designate about 780 square miles as the Organ Mountains-Desert Peaks National Monument." Udall and Heinrich say "establishing the area as a monument would help conservation efforts and boost economic development for the border region."

ENVIRONMENTAL GROUP AWARDED \$305,000 IN GRAZING CASE. The [Salem \(OR\) Capital Press](#) (12/12, 113K) reports that "an environmental group has convinced" the BLM to "fork over \$305,000 in attorney fees in a lawsuit over grazing in Oregon's Louse Canyon area." According to the article, "while the Oregon Natural Desert Association failed to block grazing in the 500,000-acre area, a federal judge found that BLM's management plan for Louse Canyon violated environmental law." The federal government has "agreed to pay an environmental group \$305,000 for attorney fees in a lawsuit over grazing in southeast Oregon."

Fish and Wildlife Service:

HOUSE PANEL EYES ENDANGERED SPECIES, FISHING BILLS. In its "Regwatch" blog, [The Hill](#) (12/13, 194K) reports that "House lawmakers will begin mulling new legislation to reform the Endangered Species Act and reauthorize the country's fishing management law in coming weeks." The chairman of the House Natural Resources Committee, Doc Hastings, "announced on Thursday that lawmakers next week would release a draft version of a bill to reauthorize the Magnuson-Stevens Act, which governs the country's marine fisheries, and advance 'common-sense' reforms to the Endangered Species Act early next year." Rep. Peter DeFazio, the top Democrat on the committee, said that the Endangered Species Act "could be updated to ensure that the conservation methods of individual species added to the list did not conflict with each other."

NO ASIAN CARP DNA FOUND IN RESAMPLING. The [Green Bay \(WI\) Press-Gazette](#) (12/12, 135K) reports that "water samples collected from Sturgeon Bay last month and analyzed for evidence of Asian carp DNA have come back negative, state officials announced." The FWS and the Department of Natural Resources had "collected 150 water samples from Sturgeon Bay on Nov. 12 and 13 as a follow up to a single positive detection of Asian carp DNA in samples collected from the bay earlier in the year." Todd Turner, the FWS' Assistant Regional Director for Midwest Fisheries, said, "Sampling was completed as part of a Great Lakes wide early detection program intended to monitor for many different invasive species, including Asian carp. We continue to work closely with our state partners to use eDNA as a tool to investigate invasive species across the Midwest Region."

Also providing coverage is the [Door County \(WI\) Advocate](#) (12/12, 31K).

FWS FINALIZES LISTING OF 2 FRESHWATER MUSSELS. The [Bristol \(TN/VA\) Herald Courier](#) (12/13, 81K) reports that the FWS is listing the fluted kidneyshell and the slabside pearl mussel as endangered under the Endangered Species Act. Also, the FWS is "designating about 1,380 miles of stream channel in Alabama, Kentucky, Mississippi, Tennessee and Virginia as critical habitat units for these mussels."

FWS REQUESTS BUDGET FOR MOSQUITO MONITORING AND ABATEMENT AT BANDON MARSH. The [Coos Bay \(OR\) World](#) (12/13, 34K) reports that the FWS has asked Nikki Zogg, administrator for Coos County Public Health, to come up with a budget by Dec. 12 for mosquito monitoring and abatement next year at the Bandon Marsh National Wildlife Refuge. Zogg "must budget for a seasonal worker to monitor the land three days per week during peak season, which runs between April and October." The FWS "hopes to have some plans

approved in January or February, but won't be able to begin creating about five miles of tidal channels until June or July," according to Zogg.

REPORT HIGHLIGHTS SUCCESSES OF ENDANGERED SPECIES ACT. The Prairie (MT) Star (12/13) reports that the Endangered Species Coalition is marking the anniversary the Endangered Species Act with a "new report highlighting a few of the great wildlife conservation accomplishments since the Act's passage in 1973." The report "highlights ten species that – thanks to the Endangered Species Act's protections – are either steadily improving or have been recovered and removed from the list of imperiled species." The success stories "include the nēnē goose, American peregrine falcon, El Segundo blue butterfly, Robbins' cinquefoil, bald eagle, southern sea otter, humpback whale, American alligator, brown pelican, and the green sea turtle."

ADDITIONAL COVERAGE: INTERAGENCY GRIZZLY BEAR COMMITTEE RECOMMENDS LIFTING YELLOWSTONE GRIZZLY PROTECTIONS. Additional coverage of the recommendation by the Interagency Grizzly Bear Committee that Endangered Species Act protections be lifted for the grizzly bears in the Yellowstone National Park was provided by the Washington Post (12/12, Press, 4.28M), ABC News (12/13, 3.68M), The Guardian (12/12, 1.59M), Reuters (12/13, Zuckerman, 17.91M), AFP (12/13, Sheridan, 17.91M), the Casper (WY) Star-Tribune (12/13, 90K), Salon (12/12, 613K), and Outside (12/13, 55K).

ADDITIONAL COVERAGE: ENVIRONMENTAL GROUP WARNS SEA-LEVEL RISE THREATENS HUNDREDS OF ANIMAL SPECIES. Additional coverage of the report by the Center for Biological Diversity warning that "sea-level rise threatens hundreds of species of animals across the United States" was provided by the Delmarva (MD) Daily Times (12/12, 26K).

AGENCIES CRITICIZED FOR TAKING NO ACTION ON DESECRATION OF AMITY PUEBLO. For the Indian Country Today Media Network (12/11, Sanders, 21K), Mark Sanders, an archaeologist, notes that "almost a year ago to the day, the Phoenix New Times reported on large-scale site disturbances at Amity Pueblo, a long-abandoned Native American settlement located in the eastern Arizona village of Eagar." He writes that "when tribal officials reported the desecration, both the state agency as well as the federal lead agency overseeing the project—US Fish and Wildlife Service—ignored demands for immediate corrective action." Still, "in the year since the news story came out, and despite the ripple effects of the article through the national media, nothing has been done."

Securing America's Energy Future:

Renewable Energy:

SENS. HEINRICH, UDALL RESPOND TO PROPOSAL TO EXPAND WHITE SANDS MISSILE RANGE. The Las Cruces (NM) Sun-News (12/13, 59K) reports that Sen.s Martin Heinrich and Tom Udall on Thursday "responded to the possible expansion of White Sands Missile Range." Heinrich said, "I am pleased that both the House and Senate came together to support this important provision for White Sands Missile Range. This expansion is critical to strengthening WSMR's vital national security mission and will further protect it from encroachment. However, I am disappointed that similar buffer zone provisions for Fort Bliss failed to advance in the House. Despite receiving broad support from the Department of Defense, Department of Interior, Bureau of Land Management, White Sands Missile Range, community leaders, and specifically from Fort Bliss, the House neglected to introduce and consider common sense legislation that will further protect Fort Bliss from encroachment and incompatible development. I will continue to advocate for the buffer zone provisions for Fort Bliss and encourage my House colleagues to support their passage in next year's defense bill." Udall said, "White Sands Missile Range is a critical and valuable asset for New Mexico and for our national security, and I'm glad that that these measures to strengthen WSMR were included in this year's defense bill. This commonsense bill sets aside an enduring buffer that clarifies the boundaries and protects this unique asset from incompatible development. Fort Bliss needs similar protection, and we'll continue to work to ensure that the remaining portions of our bill can be passed and enacted as soon as possible."

Also covering the story is the Alamogordo (NM) Daily News (12/13, 19K).

ENVIRONMENTAL GROUPS CLASH OVER WIND POWER IN MAINE. The Kennebec (ME) Journal (12/13,

58K) reports that "two environmental groups are going head to head over the impact on wildlife and the future benefits of wind energy development in Maine." According to the article, "Friends of Maine's Mountains challenged Maine Audubon on Thursday to retract a recent report that says wind energy is sometimes compatible with wildlife, and to acknowledge funding it receives from the wind power industry." However, "Maine Audubon defended its report, 'Wind Power and Wildlife in Maine,' and questioned whether the leaders of Friends of Maine's Mountains fully understand its parameters and recommendations."

Also providing coverage is the [Portland \(ME\) Press Herald](#) (12/13, 279K).

COURT FINDS WIND FARM POSES NO THREAT TO BIGHORN SHEEP. The [Courthouse News](#) (12/12, 7K) reports that "a California wind-energy project will not threaten an endangered species of sheep, a federal appeals court ruled." The Protect Our Communities Foundation, Donna Tisdale and Backcountry Against Dumps challenged the Interior Department's "decision to allow Ocotillo Express to build 112 wind-turbine generators on 10,151 acres of public land in the Sonoran Desert in Imperial County, Calif." However, "in an opinion written by District Judge Gonzalo P. Curiel, the Southern District of California ruled that the biological opinion correctly concluded that even if the sheep lost up to 5,000 acres of their habitat, they would still be able to connect and reproduce."

ADDITIONAL COVERAGE OF NEW EAGLE RULE. Additional coverage of the new eagle rule was provided by the [Oklahoman](#) (12/13, 345K).

Onshore Energy Development:

BLM RELEASES OIL AND GAS SALE RESULTS. The [Reno \(NV\) Gazette-Journal](#) (12/12, 165K) reports that BLM generated about \$1.9 million during its last quarterly oil and gas competitive lease sale in Reno on Tuesday, selling 54 parcels comprised of more than 93,000 acres.

NORTH FORK VALLEY GROUPS CONCERNED ABOUT DRILLING'S IMPACT ON TOURISM, AGRICULTURE. The [Aspen \(CO\) Daily News](#) (12/13, 36K) reports that "a coalition of agriculture and conservation groups based in the North Fork Valley have released a plan that would drastically reduce the amount of land available for gas leasing in the region often called the 'bread basket' of the Roaring Fork Valley." The "North Fork Alternative Plan" would "apply to about 63,000 acres of land and 137,000 acres of underground minerals around Paonia, Hotchkiss, Delta and several smaller communities in the valley 60 miles south of Carbondale," and "would put roughly 77 percent of those lands off limits to oil and gas development."

SCIENTISTS SAY DRILLING PROCEDURE MAY BE TO BLAME FOR OKLAHOMA EARTHQUAKES. The New York Times (12/13, Fountain, Subscription Publication, 9.61M) reports that while Oklahoma "has never been known as earthquake country, with a yearly average of about 50 tremors," over the past three years, "the state has had thousands of quakes" – more than 2,600 this year alone. Scientists say the oil and gas industry practice "of disposing of billions of gallons of wastewater that is produced along with oil and gas by injecting it under pressure into wells that reach permeable rock formations" may be causing the earthquakes.

Offshore Energy Development:

BOEM SEEKS MORE INFORMATION ON SHELL'S 2014 CHUKCHI EXPLORATION PLAN. The [Alaska Public Radio Network](#) (12/12, 2K) reports that the BOEM is "seeking more information from Shell about their 2014 Chukchi Exploration Plan." According to the article, "until Shell provides the agency with the answers for dozens of requested revisions, BOEM will not consider their application complete." The bureau is "seeking more details on Shell's ships, the Noble Discoverer and the Polar Pioneer," and it also has "questions about Shell's plans to deal with air quality issues, among other things."

FORMER BP ENGINEER IS NOT EXPECTED TO TESTIFY AT OBSTRUCTION TRIAL. The AP (12/13, Kunzelman) reports from New Orleans that former BP drilling engineer Kurt Mix "isn't expected to testify at his trial on charges he deleted text messages about the company's response to its massive 2010 oil spill in the Gulf of Mexico." An attorney for Mix told a Federal judge and prosecutor "that her client isn't one of three witnesses whom defense attorneys plan to call to testify once they begin presenting their case on Friday." Federal

prosecutors called their final witness on Wednesday, and the jury is expected to hear closing arguments on Monday.

NOIA PRESIDENT URGES US TO ALLOW ATLANTIC OFFSHORE OIL, GAS DRILLING. In an op-ed in the Richmond (VA) Times-Dispatch (12/13, 333K) National Ocean Industries Association president Randall Luthi argued that as the US sits on the cusp of "energy independence," the opportunity may pass us by "if we don't make the right decisions now." He cited a recent Quest Offshore study showing that offshore Atlantic coast drilling "makes economic and energy sense." The NOIA co-sponsored the study, he noted, which suggested allowing offshore Atlantic exploration could lead to 280,000 jobs by 2035, with companies adding "nearly \$200 billion in additional investments, contributing up to \$23 billion per year to the US economy." He noted that \$400 million in "engineering activity associated" with such exploration and production would occur in Virginia by 2035, according to the study, and urged the US to allow Atlantic offshore oil and gas activity.

Tackling America's Water Challenges:

BOR RELEASES SANTA ANA WATERSHED STUDY. The Science Daily (12/13, 53K) reports that BOR Commissioner Michael L. Connor "released the Santa Ana River Watershed Basin Study, which addresses water supply and demand projections for the next 50 years and identifies potential climate change impacts to Southern California's Santa Ana River Watershed." Connor said, "Basin studies are a key part of Secretary Sally Jewell's WaterSMART initiative and help us develop a clearer picture of the potential gap between water demand and available supplies. This study of the Santa Ana watershed gives water managers an array of science-based tools to make key future decisions and help us identify potential ways we can meet the diverse water needs of the region's population."

CALIFORNIA WATER DISTRICTS COLLABORATE ON US-MEXICO PILOT PROJECT ON COLORADO RIVER. The Imperial Valley (CA) News (12/13, 1K) reports that "California's largest agricultural and urban water districts that make use of supplies from the Colorado River agreed today to share the costs of water conservation projects in Mexico and share the saved supplies as part of a bi-national pilot project." Imperial Irrigation District General Manager Kevin Kelley joined Jeffrey Kightlinger, general manager of the Metropolitan Water District of Southern California, to sign the agreement at the Colorado River Water Users Association's annual conference. BOR Commissioner Michael L. Connor "heralded the cooperation between IID and Metropolitan in reaching the agreement." Connor wrote in a letter to both agencies, "Reclamation welcomes this significant progress by IID and MWD and looks forward to working with these key California partners and the other partners in the basin states in 2014 to recognize IID as a full participant in the implementation of Minute No. 319 and the corresponding domestic implementing agreements. This partnership is a positive signal to future Colorado River and bi-national collaborative efforts."

Also providing coverage is the Palm Springs (CA) Desert Sun (12/12, 110K).

SALMON EGGS PERISH IN SACRAMENTO RIVER DUE TO DECISION TO DECREASE WATER LEVELS. The Marin (CA) Independent Journal (12/13, 88K) reports that "for thousands of salmon that bore their way upstream to spawn in the Sacramento," their "efforts were for naught" because of "a federal water management decision to drastically reduce the outflow from Shasta Dam caused river levels to drop sharply in November, exposing numerous nests, or redds." According to Doug Killam, an environmental scientist with the state Department of Fish and Wildlife, "between 20 and 40 percent of the fall-run eggs were aborted." The BOR said that it was not possible "to meet the needs of both humans and the river — so the latter was partially sacrificed."

ADDITIONAL COVERAGE OF BAY DELTA CONSERVATION PLAN. Additional coverage of the Bay Delta Conservation Plan was provided by the San Francisco Examiner (12/13, 412K), the San Jose (CA) Mercury News (12/13, 731K), and the Long Beach (CA) Press-Telegram (12/12, 194K).

ADDITIONAL COVERAGE OF REPORT ON CLIMATE CHANGE'S IMPACT ON UPPER RIO GRANDE BASIN. Additional coverage of the report assessing climate change's impact on the Upper Rio Grande Basin was provided by the Summit County (CO) Citizens Voice (12/13, 506).

Empowering Native American Communities:

ALASKA BIA DIRECTOR NAMED. The Tundra Drums (12/12, 14K) reports that Weldon "Bruce" Loudemilk has been named as regional director of the BIA's Alaska Regional Office in Anchorage by BIA Director Michael S. Black. Assistant Secretary – Indian Affairs Kevin K. Washburn said, "We recognize the importance of identifying and hiring the best candidates to serve tribes, the Alaska Native people and Alaska Native Corporations. Given that BIA regional directors are responsible for ensuring Indian Affairs carries out its mission within their regions, it is my firm belief that we should always be working to attract the best and brightest to these positions."

MANAGEMENT OF LAND BUY-BACK PROGRAM CRITICIZED. The Great Falls (MT) Tribune (12/12, 90K) reports that "members of Montana's Fort Peck Reservation and the Montana-Wyoming Tribal Leaders Council told a Senate committee Wednesday that a federal land buy-back program is shortchanging tribes." Lawrence Roberts, deputy assistant secretary for Indian Affairs at the Interior Department, told the Senate Indian Affairs Committee at Wednesday's oversight hearing, "We are on track to send our first offers to purchase fractional interests by the end of 2013." However, Grant Stafne, councilman of the Assiniboine and Sioux Tribes of the Fort Peck Reservation in Poplar, said "the program was developed without tribal input and benefits the federal government first and Indian beneficiaries second."

Also, for the Indian Country Today Media Network (12/12, Daniels, 21K), Jay Daniels, a member of the Cherokee Nation of Oklahoma, criticizes the BIA for its handling of the Cobell settlement.

MASHPEE WAMPANOAG'S TAUNTON CASINO'S IMPACT REPORT SAID TO BE "FRAUDULENT". The New Bedford (MA) Standard-Times (12/12, 54K) reports that Middleboro Selectman Allin Frawley says "he believes the draft environmental impact statement on the Mashpee Wampanoag's Taunton casino proposal is 'fraudulent' and full of 'half truths' and 'lies of omission,' echoing comments he made at the Bureau of Indian Affairs hearing held at Taunton High School last week to solicit public feedback on the over 1,000 page document." Frawley said, "They said that in 2007 they entered into negotiations for the project in Middleboro and that's where they left it. They didn't mention the IGA (intergovernmental agreement) that they signed, how they left us in limbo, how our IGA has never been terminated. We contend they still owe us a million dollars for the last four years of mitigation payments that they have not made."

WISCONSIN GOV. WALKER SAYS DECISION ON KENOSHA CASINO STILL MONTHS AWAY. The Milwaukee Journal Sentinel (12/13, 798K) reports that "the involvement of the Hard Rock brand with the proposed Kenosha casino has increased interest in the project but a decision on it is still months away," Gov Scott Walker said Thursday. Walker said, "The federal (Bureau of Indian Affairs) took nine years to approve the current application. We're not going to take that long but we think it's worth taking a significant amount of time – many months into 2014 – to look at all the factors out there."

Top National News:

IN TRIUMPH FOR BOEHNER, RYAN, HOUSE EASILY PASSES BUDGET DEAL. On a 332-94 vote, the House on Thursday approved the bipartisan budget deal negotiated between House Budget Chairman Paul Ryan and Senate Budget Chairwoman Patty Murray. In general, the media coverage is treating it as a sign that the vote represents a move by House Speaker Boehner to take control of the House from the tea party elements of his caucus and end the gridlock that has paralyzed the Federal government in recent months. Overall, passage is repeatedly described as a victory for Boehner, Ryan, and bipartisanship in general.

ABC World News (12/12, story 4, 1:40, Sawyer, 7.43M) reported the budget deal passed the House, but "the vote wasn't only about the budget. It was about gridlock and leadership and some Republicans taking a stand against hard line tea party tactics." ABC (Zeleny) added that Boehner is "finally saying no to the tea party by saying yes to a budget deal that offers modest deficit reduction but keeps the government open. The tea party is furious." ABC (Zeleny) says that this is the fight "for the soul of the Republican Party."

The CBS Evening News (12/12, lead story, 2:20, Pelley, 5.58M) reported that there are "things are happening in Washington many thought they'd never see" – Democrats and Republicans "agree on a budget." Boehner is also "lashing out at conservative groups," as he "blames them, at least in part, for the gridlock on Capitol Hill." CBS (Cordes) says that what set Boehner off "was the avalanche of criticism from conservative groups over a rare

bipartisan budget deal. Boehner said that kind of inflexibility led directly to this fall's government shutdown."

In its lead story, NBC Nightly News (12/12, lead story, 3:25, Williams, 7.86M) reported that there was a "rare outburst of candor mixed with anger and frustration" in Washington on Thursday. Boehner's "problem has been the rise of the tea party faction, the newly arrived and highly motivated members who do not go along or get along with the wishes of the leadership." Boehner, at a news conference, "took the lid off his long-simmering frustrations aimed at conservative political groups."

The New York Times (12/13, Weisman, Peters, Subscription Publication, 9.61M) reports that House approved both the budget deal and a "Pentagon policy bill that would strengthen protections for victims of sexual assault." However, as the Chamber ended its business for the year, it "left unfinished a major piece of domestic policy – the farm bill – making it likely that Congress will not deal with it until January." Regarding the budget deal, leaders of both parties "sought to marginalize hard-line conservatives opposed to any compromise."

The Washington Post (12/13, Kane, Montgomery, 4.28M) reports that the budget passage may "possibly signaling a truce in the spending showdowns that have paralyzed Washington for the past three years." The Post says that 169 Republicans and 163 Democrats voted for the bill, while 62 Republicans and 32 Democrats opposed it. The Senate "is poised to pass the budget and defense bills next week." As for the farm bill, House and Senate leaders say that votes "will be held after Congress returns to Washington in early January."

Bloomberg News (12/12, Przybla, 1.91M) reports that the budget agreement is "on track" to clear Congress "largely because its most important accomplishment is pushing off automatic spending cuts that neither party likes." The deal "sidesteps lawmaker protests" by not cutting entitlement programs backed by Democrats and by maintaining corporate tax breaks Republicans "favor."

The Wall Street Journal (12/13, Hook, Subscription Publication, 5.91M) characterizes a vote as a step way from the partisanship that has gripped Washington and threatened the economy in recent years. The Journal says that the passage of the deal by the Senate and its signature by the President would initiate the tedious appropriations process that needs to be completed by January 15.

McClatchy (12/13, Lightman, Douglas, 95K) reports conservatives "fumed that the plan didn't take the kind of bold steps to reduce spending and deficits they have long sought," while Democrats "were not pleased that the package didn't tackle emergency unemployment benefits, which expire Dec. 28." However, "momentum for the agreement was too strong."

The Daily Caller (12/13, Levinson, 422K) reports that "both sides acknowledged that it was not all they wanted, but was perhaps the best they could get under the circumstances." The CBO "estimated that the plan would reduce deficits by approximately \$85 billion over the next decade."

Earlier in the day, Politico (12/12, Sherman, 467K) reports that the House "cleared a procedural hurdle" on the budget deal. The "rule for debate" cleared the House on Thursday afternoon on a 226-195 vote. Passage Thursday night by the House would send it to the Senate "sometime next week." The President is "expected to sign the bill."

The Hill (12/12, Kasperowicz, 194K) reports that all but one Republican, Rep. Walter Jones (R-NC), backed the rule, while every Democrat opposed it. However, "several members of both parties are expected to vote for the final agreement." In addition to the budget deal, the rule "sets up votes on a one-month farm bill extension, a three-month 'doc fix,' and a vote on House-Senate agreement on the National Defense Authorization Act (NDAA)." Each of these items was expected to pass by the end of the day on Friday, though the farm bill extension did not.

The Chicago Tribune (12/12, Skiba, 2.32M) reports that among the Illinois delegation, only "liberal" Rep. Jan Schakowsky (D-IL) opposed the legislation. She "said the budget deal didn't reflect the country's priorities nor did it extend emergency unemployment benefits."

Boehner Appears To Gain Edge Over Tea Party. CNN (12/12, Bash, Cohen, 14.53M) reports on its website that the "rift" between "establishment" Republicans and the "tea party wing" of the GOP over "policy and tactics"

was "on full display" in the budget debate. Boehner "escalated his criticism of outside conservative groups opposed to the budget deal," arguing against the plan before it was announced. Boehner told reporters that the deal was "not everything we wanted, but it advances conservative policy and moves us in the right direction."

The Los Angeles Times (12/13, Mascaro, 3.07M) calls the agreement a "victory" for Boehner, who "appears to have regained at least momentary control of his rebellious majority and turned back the super-sized influence of outside conservative groups." It is also a boost for Ryan, "a potential 2016 Republican presidential hopeful, who put his political capital on the line to craft the deal with his Democratic budgetary counterpart." However, whether or not the "spirit of détente" will continue in the new year is "uncertain."

The Washington Times (12/13, McLaughlin, Klimas, 417K) reports that the Administration "said passage of the bill was 'a positive step forward for the nation and our economy.'" The vote was a "victory" for Ryan. Speaking before the vote, Ryan said, "This bill saves more than if we did nothing. It is not near the breadth and the scope of the budget that we passed earlier. But that is how it works in divided government. That is the nature of compromise."

USA Today (12/12, Davis, 5.82M) reports Ryan "said Republicans need to face the realities of divided government and focus on governing – and winning elections – if they hope to advance more fiscally conservative proposals in the future." House Republicans "largely lined up behind Ryan, despite ongoing opposition from outside conservative groups and GOP senators."

The Huffington Post (12/12, McAuliff, 11.54M) reports that "most outside conservative activist groups came out loudly against the measure, slamming it as worse than nothing, and calling the savings phony because most come from cuts years from now that could be undone." However, Ryan said on the floor on Thursday, "We always lock horns, we always argue, we never agree. I think it's about time for once in a long time we find common ground and agree, and that is what this bill does."

The Christian Science Monitor (12/12, Kiefer, 540K) reports that the "overwhelming" vote in favor of the budget deal "offers the first major evidence of cracks in the tea party 'no compromise' stand, at least on high-stakes legislation." The CSM adds that "about half" of tea party House Republicans "swung over to vote with the majority of their colleagues."

The Washington Times (12/13, McLaughlin, 417K) reports that by passing the deal, "some political observers say, the GOP establishment is banking on the idea that giving up ground in the spending battle now will pay off over the long run by allowing Republicans to avoid getting punished for another government shutdown." According to this line of thinking, if there is no shutdown, Republicans "can focus on the 2014 congressional elections and bank on the growing opposition to Obamacare to strengthen their numbers."

Senate Democrats Unsure They Have Votes To Pass Budget Deal. The Hill (12/12, Bolton, 194K) reports that the Senate Democratic leadership is "not sure there are enough votes to pass a year-end budget deal next week." Senate Majority Whip Durbin "cautioned" on Thursday that Democrats are "not assured of winning over enough Republican votes to pass a budget deal to avoid a government shutdown." The top three Senate GOP leaders "have signaled they will vote against the deal," and Durbin says that he needs "at least five" Republicans to back the legislation.

Roll Call (12/13, Shiner, Lesniewski, Subscription Publication, 87K) reports that a number of Senate Republicans "began to announce opposition Thursday to a bipartisan budget agreement – even as their House counterparts passed it – actions unlikely to imperil the deal but that will make vote counters sweat in the closing days of 2013." Roll Call says that the majority of GOP senators facing primary challengers next year have "either declared their opposition to the framework or are expected to do so in the coming days." Among those declaring their opposition were Sens. Lindsey Graham, Bob Corker and Richard Shelby.

Looking at the budget deal's prospects in the Senate, the AP (12/12, Kellman) reports that things may be delayed in the Senate because the GOP is slowing activity there in response to the changes in filibuster rules forces through by the Democrats.

Rogers, Mikulski Begin Appropriations Talks. The Hill (12/12, Wasson, 194K) reports that the chairs of the House and Senate appropriations committees on Thursday began "the next round of spending talks with the aim

of avoiding a government shutdown in January." The Hill says that a "giant omnibus spending bill covering all discretionary spending, from the Pentagon to education to medical research, must be passed by Jan. 15 to avoid a shutdown." While the appropriations bill will be based on the budget deal, "scores of issues are outstanding."

More Commentary. In his column for the Washington Post (12/13, Robinson, 4.28M), Eugene Robinson writes that the "unusual display of reasonable behavior by House Republicans this week should be seen as a retreat – a change in tactics – but not a surrender" and Democrats "had better note the distinction." Robinson asks if this means that Republicans "are willing to stop the brinkmanship and work alongside Democrats at the task of governance? Perhaps, but only in pursuit of a larger goal: It now appears that Republicans want to win."

In his column for the New York Times (12/13, Subscription Publication, 9.61M), Paul Krugman says that the deal is a minor defeat for Republicans, but a major one for the unemployed, as extended benefits were not renewed. And if "you take a longer perspective – if you look at what has happened since Republicans took control of the House of Representatives in 2010 – what you see is a triumph of anti-government ideology that has had enormously destructive effects on American workers."

ADMINISTRATION MOVES TO MINIMIZE DISRUPTIONS DURING TRANSITION TO ACA. The AP (12/12, Alonso-Zaldivar) reports that as the Obama Administration tries to "minimize disruptions during the transition" in January when new coverage under the Affordable Care Act take effect, HHS Secretary Sebelius on Thursday "announced a batch of measures Thursday to minimize disruptions during the transition." They include "recommendations, such as asking insurers to allow customers to temporarily keep filling prescriptions covered by a previous plan," as well as requirements, including mandating that companies "accept anyone who pays his or her premium by 11:59 p.m. on Dec. 31."

Reuters (12/12, Morgan) reports that the Administration has extended the Dec. 15 enrollment deadline to Dec. 23 and said it would consider additional extensions if consumers are prevented from enrolling by "extraordinary circumstances." The Administration also established a special enrollment period for people who were unable to sign up for coverage due to problems with the HealthCare.gov website or other insurance marketplace technology.

Politico (12/12, Norman, 467K) reports that the Administration "also asked insurers to voluntarily make the transition to new plans easier for people, for instance by letting some see their current doctors during January, even if that physician doesn't take part in the new health plan network." During a conference call with reporters, Sebelius said the measures "will give consumers 'more peace of mind and even more confidence that it [insurance] will be there when they want and need it.'"

The Hill (12/12, Easley, 194K) reports that during a conference call with reporters, Sebelius said that "insurers have the latitude to accept premiums even beyond Dec. 31, and that the administration was 'strongly encouraging' them to retroactively cover consumers that submit late payments."

USA Today (12/12, Kennedy, 5.82M) reports that the changes Sebelius announced "are aimed at preventing gaps in coverage for those buying insurance through the federal and state exchanges." A gap in coverage "could cause huge problems if diabetics or those with heart disease are unable to get their medications; or if someone coming off Medicaid doesn't understand he's no longer covered and injures himself in January; or for someone undergoing cancer treatment whose coverage stops Jan. 1."

McClatchy (12/13, Pugh, 95K) reports that the Administration proposals and requirements "could add further confusion to an already complex potpourri of deadlines, mandates and recommendations surrounding" the ACA. This, as the Administration is trying "to overcome the disastrous roll-out of the HealthCare.gov website."

Noting that "it will be up to each company whether to go along" with the recommendations, the Washington Post (12/13, A1, Goldstein, 4.28M) reports that the Administration "has held out the possibility of more time but has not provided a guarantee." The insurance industry trade group America's Health Insurance Plans, "did not address the specifics of the administration's request." The group's president Karen Ignagni, said, "Health plans will do everything they can to protect consumers from potential coverage disruptions caused by the ongoing technical problems with HealthCare.gov. With only weeks to go before coverage begins, continued changes to the rules and guidance could exacerbate the challenges associated with helping consumers through the

enrollment process.”

The Wall Street Journal (12/13, A1, Radnofsky, Subscription Publication, 5.91M) reports that the Administration cannot force insurers to comply with their requests, but officials expressed hope they would do so. One insurer, Allan Einboden, CEO of Scott & White health Plan, said, “In terms of covering things when they haven’t paid premiums, that we would be concerned about doing.”

The New York Times (12/13, Pear, Subscription Publication, 9.61M) reports that Republicans “expressed surprise,” and sad that the Administration “was essentially telling companies like Humana and WellPoint to insure people before payment and change the very nature of their networks and coverage on a case-by-case basis.”

The Washington Times (12/13, Howell, 417K) reports that the Administration proposals “are a tacit admission that Americans who lost existing coverage because of the law’s coverage requirements – or never had coverage and want it – have struggled to enroll under Mr. Obama’s signature reforms and may go without health insurance for a time, even as they are mandated to hold some form of coverage.” The Times notes that Centers for Medicare and Medicaid Services spokeswoman Julie Bataille, when asked about the problem during a conference call, “answered indirectly,” saying, “We’re confident that millions of Americans will have access to affordable health coverage than they ever had before.”

Politico (12/13, Nather, Kenen, 467K) reports that Thursday’s moves are “just the latest in a long list of extensions, delays and punts that have plagued the health care law.” Politico notes that “piece by piece, the Obama administration keeps giving itself extensions on smaller parts of the law, because there’s always some piece that isn’t quite ready.” While it is “an attempt to put out fires – but it’s also a painful admission that, yes, there are fires.”

Pre-Existing Condition Insurance Plan Extended For One Month. The AP (12/12, Alonso-Zaldivar) reports that technology problems have also forced the Administration to extend for one month the Pre-Existing Condition Insurance Plan, which was supposed to expire Jan. 1. The Administration said that the extension “is meant to smooth the transition to new coverage, easing anxiety for tens of thousands of patients with serious illnesses such as heart disease and cancer.”

The Hill (12/12, Sink, 194K) reports that the extension drew praise from outside groups who said that “it ensured the sickest patients would not face a coverage gap as the administration continued to work out issues with the enrollment process.” The Hill adds, however, that the decision “also seemed like it could be a tacit admission that, despite the administration’s assurances, difficulties remain with the ObamaCare enrollment process.”

Politico (12/12, Millman, 467K) reports that the extension of the program “seems to be the Obama administration’s first tacit acknowledgment that it can’t guarantee that everybody who wants to obtain coverage starting Jan. 1 will be able to do so.”

McConnell: Delays Are Proof ACA Is “Failing.” The Hill (12/12, Cox, 194K) reports that Senate Minority Leader McConnell said the decision to extend the enrollment deadlines is proof that the ACA is “failing.” McConnell said, “Despite the administration’s promises that ObamaCare enrollment is on track, this announcement is a clear admission that ObamaCare is failing Americans with pre-existing conditions who are losing the plans they already had.”

SENATE HOLDS ANOTHER LATE-NIGHT SESSION AS NOMINATIONS SLOWLY ADVANCE. The New York Times (12/13, Peters, Subscription Publication, 9.61M) writes that the “final days of 2013 on Capitol Hill degenerated into something like an endurance contest to see who could be the most spiteful,” with a second late-night session called Thursday “by Democrats as a way of retaliating for Republicans’ delaying tactics on confirmations.” Sen. Lamar Alexander, “usually one of the more reserved members,” told the Times, “I think it resembles fourth graders playing in a sandbox, and I’ll give the majority leader, Harry Reid, 99% of the responsibility for it.” The Times says Democrats are “hoping to make the situation so unpleasant for their colleagues across the aisle that they eventually break.”

The Washington Post (12/13, O’Keefe, 4.28M) says senators “will be summoned again Friday and over the

weekend for a series of votes on lower-level nominees amid sustained Republican objections to the changes." The procession through a series of confirmation votes "is expected to continue until Saturday afternoon," when senators will take up DHS Secretary-designate Jeh Johnson's nomination. The Los Angeles Times (12/13, Memoli, 3.07M) says while the Senate is now getting things done, "they're getting done slowly. Democrats can advance nominees by a simple majority vote, but Republicans are using all the mechanisms they can to deliver retribution."

Editorial Wrap-Up:

NEW YORK TIMES. "Finally, The Volcker Rule." The New York Times (12/13, Subscription Publication, 9.61M) editorializes that the success of the newly unveiled Volcker Rule "depends on federal regulators doing what they failed to do in the run-up to the financial crisis and have done only haltingly since then: Enforce the spirit as well as the letter of the law against the wishes of powerful banks." The Times notes that the rule "is intended to curb recklessness by barring banks from trading for their own gain, disconnected from clients' needs and demands." The premise behind the rule, which the Times endorses as sound, "is that taxpayers, who back the banks, should not be on the hook for speculation undertaken for the purpose of generating big bonuses for traders and executives."

"Trade Talks Produce A Deal." Days after the WTO reached a trade deal expected to boost the global economy, an editorial in the New York Times (12/13, Subscription Publication, 9.61M) cautions that optimism for a broader trade agreement and less reliance on bilateral deals may be premature. Noting the merits of the deal, including allowing poorer countries such as Chad, Haiti, and Burma to boost their income by selling "more goods duty-free," the Times says the fact that a modest deal took as long as it did signals vast change is not on the horizon.

"Lift The Cuban Embargo." An editorial in the New York Times (12/13, Subscription Publication, 9.61M) calls the Cuban embargo "senseless." Noting that it has long called for the removal of an embargo, the Times says recent developments, including the detention of USAID contractor Alan Gross, make a case for not only his release but for President Obama to "press Congress to end the embargo and overhaul policy toward Cuba."

WASHINGTON POST. "An Olympic Violation." The Washington Post (12/13, 4.28M) blasts Russian President Vladimir Putin for his stance on gays ahead of the Olympics in Sochi next year. On Thursday, in a speech to the Russian parliament, Putin referred to the "destruction of traditional values from the top." Such comments came a day after he replaced the head of the state news agency, RIA Novosti with the new chief being Dmitry Kiselyov, "who is notorious for anti-gay diatribes." The Post proclaims that "Putin's actions place him blatantly at odds with Principle 6 of the Olympic Charter," as it urges the IOC to take a stand.

"Newtown's Legislative Legacy." The Washington Post (12/13, Board, 4.28M) editorializes that Congress "disgraced itself by refusing to toughen gun laws after" the Sandy Hook shootings, "yawning in the face of a national tragedy," but in the meantime, "the battle for reform in state capitals continued and intensified." A Times analysis of state legislation enacted since then found that "about two-thirds of the 109 new firearms laws around the country loosen restrictions." The Times notes that a new report from the Brady Campaign to Prevent Gun Violence found that "many states with the most anemic gun laws already have the highest rates of gun deaths." The Times concludes that the nation's gun laws "are an evolving patchwork," which "offers some hope for further reform, but it also undercuts the effectiveness of restrictions that are in place," as criminals "stymied by one state's restrictions can cross a border to procure what they need in a neighboring state."

"Helping Rebeca Orellana." An editorial in the Washington Post (12/13, Board, 4.28M) criticizes "Virginia's senseless and self-defeating laws," which deny state resident status and the tuition benefits that accompany it to students who came to the US as children of undocumented immigrants. The Post calls Virginia's policy "absurd" and argues that it is "in the state's interest to help them afford college and realize their potential." the Post adds that a bill "to provide tuition benefits to such students – billing them at the same rate other Virginians are billed," which will be "offered by both Republicans and Democrats when the General Assembly convenes" in January "deserves to become law."

WALL STREET JOURNAL. "Mood-Music Diplomacy On Iran." The Wall Street Journal (12/13, Subscription

Publication, 5.91M), in an editorial, provides details of lawmakers doubting Secretary of State Kerry's Tuesday appeal to refrain from further sanctioning Iran to allow for a nuclear deal to take shape. The Journal equates the Administration's stance with the policy that left former Palestinian President Yasser Arafat in power for a decade. Giving Iran any kind of a pass, the Journal says, will only fuel suspicions that the Obama Administration will accept any kind of an arrangement with Iran – no matter how risky.

"The Mexican Model." In an editorial, the Wall Street Journal (12/13, Subscription Publication, 5.91M) calls energy legislation that passed in Mexico on Thursday transformative because it allows for foreign investment in Pemex, the state-owned oil company. The Journal suggests the deal makes US policy makers look like underachievers considering one pipeline, the Keystone XL, has been stalled for years.

"New York State Of Tax." The Wall Street Journal (12/13, Subscription Publication, 5.91M) editorializes that New York Governor Andrew Cuomo's tax commission failed to address primary tax disadvantages in the state. The commission released its recommendations this week, and while the Journal concedes the report does suggest modest improvements, it is critical of the report for not going far enough in recommending tax relief.

TODAY'S EVENTS IN WASHINGTON.

White House:

PRESIDENT OBAMA – Meets with a group of newly-elected mayors from across the country, Roosevelt Room.

VICE PRESIDENT BIDEN – Meets with a group of newly-elected mayors from across the country, Roosevelt Room.

US Senate: 11 a.m. FINANCE – Open Executive Session to consider favorably reporting the nominations of Sarah Bloom Raskin, of Maryland, to be Deputy Secretary of the Treasury, vice Neal S. Wolin; John Andrew Koskinen, of the District of Columbia, to be Commissioner of Internal Revenue for the term expiring November 12, 2017, vice Douglas H. Shulman, term expired; and Rhonda Schnare Schmidlein, of Missouri, to be a Member of the United States International Trade Commission for a term expiring December 16, 2021, vice Shara L. Aranoff, term expired. Location: 215 Dirksen.

2 p.m. SMALL BUSINESS & ENTREPRENEURSHIP – FIELD HEARING – “Fueling America: Enabling and Empowering Small Business to Unleash Domestic Production.” Location: Lafayette Economic Development Authority, Lafayette, LA.

US House: 11 a.m. USGS – CRITICAL MINERALS – Congressional briefing titled, “Critical Minerals: Ensuring America’s Future.” Speakers: Joseph Gambogi, Commodity Specialist, Rare Earth Elements, USGS National Minerals Information Center; P. Patrick Leahy, Executive Director, American Geosciences Institute; Larry Meinert, Program Coordinator, USGS Mineral Resources Program; Jonathan G. Price, Nevada Bureau of Mines and Geology (Emeritus). Hosted by: Congressman Rush Holt (NJ 12th District). Location: 2325 Rayburn.

12:30 p.m. HOUSE REPUBLICANS – GOOGLE HANGOUT – House Republicans will host a Google Hangout with constituents about “Obamacare”. Participant: Rep. Gus Bilirakis (R-FL).

Other: PENTAGON – AIR FORCE – 9:45 a.m. Acting Secretary of the Air Force Eric Fanning and Air Force Chief of Staff Gen. Mark A. Welsh III will conduct a press briefing on the “State of the Air Force.” Location: Pentagon Briefing Room (2E973).

NEWTOWN – ‘ACT OF KINDNESS’ – 1:30 p.m. U.S. Rep. Mike Thompson (CA-05), chair of the House Gun Violence Prevention Task Force, and Reps. Elizabeth Esty (CT-05), Rep. Rosa DeLauro (CT-3) and Eleanor Holmes Norton (DC-At large) will participate in an “Act of Kindness” event in honor of the one year anniversary of the shooting at Sandy Hook Elementary in Newtown, Connecticut. Location: Martha’s Table, 2114 14th St. NW.

Last Laughs:

LATE NIGHT POLITICAL HUMOR.

Jay Leno: [In reference to the sign-language interpreter at Nelson Mandela’s memorial] “You know, for a minute I thought there might have been some kind of security problem. So, let me get this straight. The NSA is listening to our phone calls, but no one is checking up on the violent schizophrenic who is 18 inches from the President of the United States.”

Jay Leno: "Well, in defending the budget deal, Congressman Paul Ryan quoted the Rolling Stones. He said, 'You can't always get what you want.' That's for the budget deal. When it comes to Congress, here's a better Stones quote, 'We can't get no satisfaction.' Okay, how about that one?"

Jay Leno: "Well, here's something interesting. You may have seen this on the Internet. A team of physicists announced that they have evidence that the universe is just an illusion and the whole thing is just a big hologram. See, this is what happens when you legalize marijuana, okay?"

Jay Leno: "Right-wing Texas Congressman, a US Senate candidate, a guy named Steve Stockman, said more people have chlamydia than have signed up for Obamacare. Well, you know something? Whether it's chlamydia or Obamacare, chances are you got it from a politician."

Stephen Colbert: "But with this bipartisan budget we'll have no chance of another government shutdown for two whole years! You fools! We can't leave our national parks open that long! It will give the wolves time to unionize!"

LAST LAUGHS:

- + Late Night Political Humor.

DOI in the News:

SECRETARY JEWELL GIVES SPEECH ABOUT COLORADO RIVER. The Cache Valley (UT) Daily (12/15, 639) reports on Interior Secretary Sally Jewell was scheduled to deliver a presentation titled "Action Is Imperative – We Need a Balanced Approach to Bridge the Gap between Supply and Demand on the Colorado River," during the Colorado River Water Users Association 2013 Annual Conference.

KLAS-TV Las Vegas (12/15, 36K) reports that Jewell told the group "she is happy to see that politics is not getting in the way of state governments talking about sharing dwindling water resources." She says it's because "the talk about climate change reached a new level." Jewell said, "The debate about whether it is going on is over. The president's climate action plan, which he released in June, was very helpful to all of us. He put a stake in the ground and he said, 'this is how we're going to go forward.' He charged people like me with being part of the solution and prepare our landscapes. That is where we're going. We're moving on from the debate and into the solution."

Also reporting on the speech is the Las Vegas Review-Journal (12/16, 437K).

SECRETARY JEWELL SUPPORTS RECONSIDERATION OF FEDERAL RECOGNITION FOR JUANEÑO TRIBE. The Capistrano (CA) Dispatch (12/15, 33K) reports that the Juaneño Band of Mission Indians "received encouraging news this month regarding their continuing efforts to attain federal recognition." In a letter sent Tuesday, December 3, Interior Secretary Sally Jewell "supported the Juaneños' petition for reconsideration as a sovereign nation." According to the article, "following a petition for appeal sent by the Interior Board of Indian Appeals, on behalf of the Juaneños, Jewell found errors in the bureau's final assessment, primarily the bureau's own acknowledgement that they had overlooked some evidence."

SECRETARY JEWELL PUSHES FOR YOUTH TO GET INVOLVED WITH CONSERVATION. The Grand Junction Daily Sentinel (12/15, 73K) reports that Interior Secretary Sally Jewell "champions the role of young people in the future of conservation." In a recent speech, Jewell "described that role as crucial in maintaining our public-lands heritage and voiced her plans to enlist 1 million younger Americans in supporting public lands and recreation opportunities." Now, the Sportsmen for Responsible Energy Development, a coalition of Trout Unlimited, the Theodore Roosevelt Partnership Coalition and the National Wildlife Federation, is "sponsoring an essay contest for youths 15 to 19 years of age" on "what public lands mean to them."

INDIAN TRUST COMMISSION HOLDS FINAL MEETING. The Minot (ND) Daily News (12/15, 62K) reports that the Secretarial Commission on Indian Trust Administration and Reform "held its final meeting Dec. 10 by webinar, completing its prescribed two-year evaluation mandate by submitting its final report and recommendations" to Interior Secretary Sally Jewell. Jewell said she "looked forward to reviewing the commission's recommendations as they seek to identify opportunities for enhancing the trust administration system's accountability, transparency, responsiveness and efficiency."

ARIZONA LAWMAKERS WANT GRAY WOLF PROTECTIONS KEPT IN PLACE. The Phoenix Business Journal (12/13, Subscription Publication, 5K) reports that two Arizona lawmakers are asking the Interior Department to "keep in place endangered species protections for gray wolves." Reps. Raul Grijalva and Ed Pastor have written Interior Secretary Sally Jewell to "reconsider changes to wolf protections." According to the article, "Pastor, Grijalva and 84 Democratic lawmakers want the US government to continue protections for both species and have written Jewell."

PROPOSED BOULDER WHITE CLOUDS MONUMENT LEAVES CUSTER COUNTY UNEASY. The Idaho Statesman (12/15, 205K) reports that "a part of Custer County has been largely overlooked in the discussion about" a Boulder White Clouds Monument. The article notes that "the economic and recreational concerns of Custer County were at the center of a 10-year effort by Republican Rep. Mike Simpson to create a new Central Idaho wilderness area." However, "Simpson's bill is dead and Custer County's ranchers, outfitters and elected officials worry that a monument designation by Obama will change their lives without their involvement or input."

The Idaho Statesman (12/15, 205K) editorializes that the "region deserves to be protected with every ounce of

collaborative stewardship effort Idaho stakeholders can muster." However, the paper asserts that "it has to be an inclusive effort recognizing the spectrum of use from mountain bikers to motorized users, hunters, ranchers and the most ardent wilderness supporters." It argues that "this process demands transparency and won't benefit, in the long run, from back channel lobbying that creates winners and losers."

RESEARCHERS SUGGEST CUTTING DOWN SOME TREES MAY HELP COMBAT CLIMATE CHANGE. The Washington Post (12/15, Bernstein, 4.28M) reports that "two Dartmouth College researchers are suggesting that in some limited circumstances, the cooling value of an open, snowy field may be greater than the climate benefits that a stand of trees can provide – and that it is possible to calculate where that might be the case." The two researchers said that this knowledge would be useful, in the short term, in forestry management and in the long term, to "nations with vast expanses of snow fields" because they would then be able to seek credit "for that contribution to reducing global warming during international climate negotiations." However, the researchers add that global warming may negatively impact this theory since the "warming planet will have less snow and shorter winters" in the future.

ADDITIONAL COVERAGE: SECRETARY JEWELL VISITS LAGUNA ELEMENTARY SCHOOL. Additional coverage of that Interior Secretary Sally Jewell's visit to Laguna Elementary School was provided by the [Cibola \(NM\) Beacon](#) (12/15, 10K).

ADDITIONAL COVERAGE OF WESTERN GOVERNORS ASSOCIATION MEETING . Additional coverage of the Western Governors Association meeting was provided by the [Billings \(MT\) Gazette](#) (12/15, 206K), the [Houston Chronicle](#) (12/12, Dreier, 2.26M), the [Seattle Post-Intelligencer](#) (12/15, 768K), the [Wichita \(KS\) Eagle](#) (12/12, Dreier, 247K), [KOLN-TV](#) Lincoln, NE (12/15, 27K), [KUSA-TV](#) Denver (12/15, 171K), and [KULR-TV](#) Billings, MT (12/15, 2K).

ADDITIONAL COVERAGE: NEW CONSERVATION PAC ANNOUNCED. Additional coverage of the new political action committee formed by former Interior Secretary Ken Salazar and hedge fund billionaire Louis Bacon to support candidates who back conserving lands and cultural resources was provided by the "E2 Wire" blog of [The Hill](#) (12/15, 194K), [Forbes](#) (12/13, 6.03M), and [KRCC-FM](#) Colorado Springs, CO (12/15).

SUH IS CONFRONTED BY SEN. BARRASSO. In his column for the [Washington Examiner](#) (12/15, Arnold, 319K), Ron Arnold claims that if Rhea S. Suh, President Obama's nominee for assistant secretary for fish and wildlife and parks in the Interior Department, is confirmed, it "would be a disaster for resource production and the national economy." Arnold asserts that "Suh's track record shows nothing but opposition to tapping America's natural resources." Arnold lauds Sen. John Barrasso for confronting Suh during her confirmation hearing before the Senate Energy and Natural Resources Committee. He hopes that "leading Democratic committee members – including Mary Landrieu of Louisiana and West Virginia's Joe Manchin – will step up and question Suh's suitability for a job that is crucially important to America's economic growth prospects."

Also covering the nomination is the [National Journal](#) (12/16, Subscription Publication, 427K).

MAYORS URGE SUPPORT FOR LAND AND WATER CONSERVATION FUND. For the "Congress" blog of [The Hill](#) (12/15, 194K), Michael B. Hancock, the mayor of Denver, and Betsy Price, the mayor of Fort Worth, warn that the Land and Water Conservation Fund is at risk of expiring. They argue that "reauthorizing and strengthening the Land and Water Conservation Fund, which has sent \$4.1 billion to states since 1965, is a key step to ensure that our cities will be sustainable and economically viable in the future."

TAKEOVER OF FEDERAL LANDS URGED. In an editorial, the Las Vegas Review-Journal (12/16, 437K) supports the passage of Assembly Bill 227, which created the Nevada Land Management Task Force. The paper urges the task force to conclude that the state should assume responsibility for some public land managed by federal agencies.

SEMPLER: PODESTA'S WHITE HOUSE RETURN DELIGHTS ENVIRONMENTALISTS. In a column for the New York Times (12/15, Subscription Publication, 9.61M), Robert B. Sempler says that the appointment of John Podesta to President Obama's White House staff was met with delight from the environmental community and those in charge of Federal agencies responsible for the environment. The appointment is expected to further elevate the issue of climate change, with Podesta's main task being to give the EPA the support necessary to

create new rules controlling emissions from new and existing power plants. Semple says that Podesta's skill with political and policy-making skills could be of particular assistance to Interior Secretary Jewell.

Additional coverage was provided by the "E2 Wire" blog of The Hill (12/15, 194K).

America's Great Outdoors:

National Park Service:

LEGISLATION INTRODUCED TO ADD TENNESSEE BATTLEFIELDS TO NATIONAL PARK SYSTEM. The Tennessean (12/14, 417K) reports that Sen. Lamar Alexander has introduced legislation to include four Tennessee Civil War battlefields in the national park system. The legislation would "designate battlefields at Davis Bridge and Fallen Timbers in Tennessee and Russell House — which is in Tennessee and Mississippi — as part of Shiloh National Military Park." It would also include Parker's Crossroads of Tennessee in the system.

Also reporting on the story is the Louisville (KY) Courier-Journal (12/14, 449K).

SLEEPING BEAR LEGISLATION MOVING FORWARD. The Traverse City (MI) Record-Eagle (12/15, 68K) reports that "legislation to protect northern Michigan's biggest tourism driver, Sleeping Bear Dunes National Lakeshore, is moving forward in the US House of Representatives." Rep. Dan Benishek said Thursday the House Committee on Natural Resources will "take up the legislation in January."

CONGRESS TO CONSIDER YOSEMITE BILLS. The Chicago Tribune (12/14, Doyle, 2.32M) reports that Congress will "revisit unfinished business with Yosemite National Park next year." The article notes that "one pending bill would expand Yosemite's boundaries," and "another would rename a local mountain peak," and a "third would speed salvage logging in the park's vicinity." However, "the Yosemite-related bills, while relatively modest, face multiple obstacles."

NPS SEEKS INPUT ON HOW TO SPEND \$66 MILLION POWER LINE FUND. The Pocono (PA) Record (12/15, 46K) reports that public comment will be sought by the NPS on "how to spend about \$12 million" for protecting Delaware Water Gap National Recreation Area resources, "though specific dates have yet to be set for hearings." The article notes that "funding comes from a \$66 million mitigation fund for the impacts of a power line upgrade."

EVERGLADES NATIONAL PARK AREA TO CLOSE. The South Florida Sun Sentinel (12/14, 690K) reports that "the popular Chekika Day Use Area of Everglades National Park will be closed because of federal budget cuts that have caused deep staff reductions over the past few years." Park Superintendent Dan Kimball said "he wasn't happy about having to close the picnic, hiking and biking area in the northeast part of the park." Kimball said, "We know a lot of people will be disappointed, but we had to make some difficult decisions," he said. "The realities of the current budget situation do not allow us to operate as we have in the past."

FEDERAL DISASTER RELIEF FUNDS AVAILABLE FOR RECOVERY AFTER RIM FIRE. The Los Angeles Times (12/13, Mather, 3.07M) reports that President Obama "signed a disaster declaration Friday for the state of California, making federal funds available for recovery efforts related to the massive Rim fire near Yosemite National Park." The funds are "available to state and local governments and eligible private nonprofits for emergency work and to repair or replace facilities damaged by the blaze."

MOVEMENT SEEKS MEMORIAL FOR VETERANS WHO SERVED IN IRAQ, AFGHANISTAN. The Boston Globe (12/14, Bender, 1.75M) reports on "a diverse movement of veterans and families seeking to establish a national memorial to honor those who served in Iraq and Afghanistan." Their push is "fraught with complicated questions about the 'global war on terrorism,' its open-ended nature, and the unpopular conflicts it spawned." Also, "bureaucratic and practical obstacles also abound." For one, the National Mall, which is "home to a series of war memorials," is "considered a completed work of art," according to Carol B. Johnson, a spokeswoman for the NPS.

OGLALA SIOUX TRIBAL COUNCIL BACKS OFF ON TRIBAL NATIONAL PARK PLAN. The Rapid City (SD) Journal (12/15, 103K) reports that "the creation of the nation's first tribal national park was dealt a blow Thursday

when the Oglala Sioux Tribal Council backed away from a plan to eject cattle ranchers from their leased lands for a 100,000-acre buffalo pasture in the South Unit of Badlands National Park."

GROUP SEEKS TO HAVE PEOPLE ADOPT CANNONS AT FORTS WHERE CIVIL WAR BEGAN. The Columbus (IN) Republic (12/15, 80K) reports that "a nonprofit group is urging people to lend a hand to help conserve pieces of history — the guns at the South Carolina forts where the Civil War began." Jim Thompson of the Fort Sumter-Fort Moultrie Trust said Friday the group has started an Adopt-A-Cannon drive to help the NPS "conserve the guns at Sumter, which is in Charleston Harbor, and at Moultrie, on nearby Sullivans Island."

COURT SIDES WITH SKI TOUR COMPANY IN GRAND TETON LAWSUIT. The Fort Worth (TX) Star-Telegram (12/13, 596K) reports that a federal court has held the NPS acted "arbitrarily and capriciously" in "handling concession contract for ski touring at Grand Teton National Park." In his decision issued Thursday, Senior Judge Lynn J. Bush of the US Court of Federal Claims "sided with a company called Eco Tour Adventures." Bush declined, though, to order the NPS "to block the new contracts," and "instead, the judge directed the park service to pay Eco Tour's bid preparation costs."

DEADLINE NEARS FOR PROPOSALS FOR MILITARY HOMES ON SANDY HOOK. The New Jersey (12/15, 526K) reports on that the deadline for "proposals from interested parties for ideas of what to do with the historic buildings" on Sandy Hook nears. Once the proposals have been received, the NPS will "review them and decide what to do next."

PRESIDIO TRUST DIRECTOR FACES POLITICAL, ECOLOGICAL CHALLENGES. The San Francisco Chronicle (12/15, Fimrite, 2.88M) reports on the challenges faced by Terri Thomas, the director of conservation, stewardship and research for the Presidio Trust,. Thomas' "task is to restore the wildly altered Presidio's ecosystem to as close to its natural state as possible while preserving the outpost's military heritage," but "her efforts have provoked outbursts essentially from all sides of every issue, including dog walkers, eucalyptus fanciers, bird watchers and history buffs." Thomas said, "It has been a big balancing act. Restoration is still a very new field and urban restoration is even newer."

NEW SUPERINTENDENT NAMED FOR CHACO CULTURE NATIONAL HISTORICAL PARK. The Farmington (NM) Daily Times (12/15, 46K) reports that Larry Turk, the Aztec Ruins National Monument superintendent since 2011, has been named the new superintendent of Chaco Culture National Historical Park. National Parks Service Regional Director Colin Campbell said, "Larry's facilities and management experience and long ties to the cultural and natural resources of the Southwest make him very well suited for his new duties as Superintendent at Chaco Culture National Historical Park and Aztec Ruins National Monument."

SEN. MURKOWSKI DISMISSES INCREASING NPS BUDGET, SUGGESTS IDEAS FOR FUNDING PARKS. In an op-ed that appears in the Juneau (AK) Empire (12/15, Murkowski, 21K), Sen. Lisa Murkowski writes that "those who believe the federal government should expand its land ownership rarely acknowledge a critical truth: It cannot properly manage the lands it is currently entrusted with." She notes that the NPS has "an \$11.5 billion maintenance backlog — well over four times its annual discretionary budget — which suggests that its principal priority should be its current portfolio." Murkowski dismisses the idea of increasing the budget for the NPS, and suggests alternative ideas like expanding "private donations from outside organizations and other friends of national parks," taking "a close look at current uses of funding, including the Land and Water Conservation Fund (LWCF)," and exploring "the structure of the recreational fee."

Bureau of Land Management:

CONSERVATION GROUPS SEEK MONUMENT STATUS FOR FORMER SANTA CRUZ DAIRY. The San Jose (CA) Mercury News (12/16, 731K) reports that the Trust for Public Land and Sempervirens Fund are "among the conversation groups are hoping to have a former dairy farm north of Santa Cruz crowned as a national monument, a move that backers say would bring greater protections and more federal dollars to the property." The Coast Dairies, a 7,000-acre tract of land, has "remained closed to the public in the 15 years since the Trust for Public Lands acquired it to prevent development, but parts are expected to be opened for recreation after the Bureau of Land Management takes control of it." Supporters said that "while BLM aims to develop a plan for protecting the property's wildlife, plants and waterways, a national monument designation would offer additional protections and

possibly money for restoration and supervision.”

Also reporting on the story are the [San Jose \(CA\) Mercury News](#) (12/15, 731K) and the [Santa Cruz \(CA\) Sentinel](#) (12/15, 151K).

NEVADA SAGE GROUSE CRITICS CALL BLM CLOSED-MINDED. The [Columbus \(IN\) Republic](#) (12/16, 80K) reports that Elko County Commissioner Grant Gerber says he is “convinced the feds have already made up their mind to list the Greater sage grouse as a threatened or endangered species.” Also, former Republican Assemblyman John Carpenter said he “believes the government is determined to list the chicken-sized game bird as part of a bigger strategy to lock up federal lands.” However, a BLM official says “that’s not the case and insisted at a public meeting in Elko this week they want the community’s input on how best to save the troubled bird without a federal listing.” BLM Elko District Manager Jill Silvey “disagreed with Carpenter’s assertion that the BLM was in favor of a listing.”

Also providing coverage are the [San Jose \(CA\) Mercury News](#) (12/16, 731K), the [Seattle Post-Intelligencer](#) (12/16, 768K), and [KOLO-TV](#) Reno, NV (12/16, 22K).

LEGISLATION INTRODUCED TO ADD CREST OF MONTEZUMA TO CIBOLA NATIONAL FOREST. [KRWG-FM](#) Las Cruces, NM (12/16, 5K) reports that Sen. Martin Heinrich and Rep. Michelle Lujan Grisham have “introduced legislation in the Senate and the House to add the Crest of Montezuma to the north end of the Cibola National Forest and shift its management” from the BLM to the Forest Service. Heinrich said, “The Crest of Montezuma is the backdrop to historic Placitas village. But many local residents have shared their concerns with me about the future of this land. Most concerning to them are the ways in which access could be restricted for recreational uses and that a critical corridor for wildlife would be endangered. By shifting the management of the Crest of Montezuma to the Forest Service, New Mexicans can be sure that the land is not sold to private interests or developed for mineral resources. I look forward to working with Representative Lujan Grisham to improve recreational access to this spectacular area for families now and for future generations to enjoy.”

PRESERVATIONISTS WORK WITH BLM ON PRYOR MOUNTAIN WILD HORSES. The [Great Falls \(MT\) Tribune](#) (12/15, 90K) reports on a band of wild horses which have “stayed on the land” along the Montana-Wyoming border “with the help of a loyal following of preservationists who work” with BLM officials to “ensure the small horse herd remains healthy and genetically viable.” The Pryor Mountain Wild Mustang Center “assists the BLM in tracking the horses year-round.” The BLM “monitors the herd and assigns corresponding numbers to each horse.”

BLM TRANSFERS 1,116 ACRES OF LAND TO STUYAHOK LIMITED VILLAGE CORPORATION. The [Bristol Bay \(AK\) Times](#) (12/15, 4K) reports that on Dec. 6, the BLM “made a very large transfer to the Stuyahok Limited Village Corporation of 1,116.41 acres of land.” The transfer “completed the corporation’s entitlement of appropriated lands under the Alaska Native Claims Settlement Act.”

BOY SCOUTS ASSIST BLM WITH SAGE-GROUSE PROTECTION PROJECT. The [Elko \(NV\) Daily Free Press](#) (12/15, 22K) reports that “about a dozen scouts from Elko’s Boy Scout Troop 820 participated in an Eagle Scout project recently that provides protection to Greater Sage-Grouse from fence lines surrounding the Spanish Ranch, 55 miles north of Elko.” The project was organized by 16-year-old Zach Daniels with assistance from the BLM, Elko District’s Rangeland Specialist and part-time Scout leader Clay Stott and Tuscarora Field Office Wildlife Biologist Ken Wilkinson. Through Stott, Daniels “coordinated with Wilkinson and ranch owner Ellison Ranching Company to install 5,400 flight diverters over 5.6 miles of livestock control fencing.”

BLM SEEKING PUBLIC COMMENT ON LAND SALE. The [Rawlins \(WY\) Times](#) (12/15, 10K) reports that the BLM Rock Springs Field Office is seeking input on “a proposal to sell roughly 60 acres of public land approximately 30 miles east of Rock Springs.”

ADDITIONAL COVERAGE OF NEW LEGISLATION PROPOSED FOR ORGAN MOUNTAINS-DESERT PEAKS NATIONAL MONUMENT. Additional coverage that Sens. Tom Udall and Martinez Heinrich have announced legislation that would designate about 780 square miles as the Organ Mountains-Desert Peaks National Monument was provided by the [Albuquerque \(NM\) Business First](#) (12/15).

FEDERAL ATTEMPTS TO SEIZE PRIVATE WATER RIGHTS CRITICIZED. In an op-ed for the Pueblo (CO) Chieftain (12/15, Tipton, 94K), Rep. Scott Tipton criticizes "federal attempts to seize private water rights." He notes that "the same tactics have been used by both" the BLM and Forest Service in "attempts to take or interfere with private water rights associated with agricultural production in the heart of rural America where farmers and ranchers rely on their rights to secure loans and irrigate crops and livestock." Tipton claims that the Water Rights Protection Act would "protect communities, businesses, recreation opportunities, farmers and ranchers as well as other individuals who rely on privately held water rights for their livelihood from federal takings."

Fish and Wildlife Service:

ONE THOUSAND ACRES ADDED TO SKAGGS ISLAND WETLANDS AREA. The San Jose (CA) Mercury News (12/15, 731K) reports that last Friday, Sonoma Land Trust announced it had bought the Haire Ranch which will lead to restoration of up to 4,400 acres of wetlands at the northern end of Skaggs Island. Immediately following acquisition, the land trust "transferred the 1,100-acre Haire Ranch" to the FWS, which operates the nearby San Pablo Bay National Wildlife Refuge.

Also providing coverage are the Santa Rosa (CA) Press Democrat (12/13, 156K) and the Vacaville (CA) Reporter (12/16, 57K).

FWS SEEK COMMENT ON LESSER PRAIRIE CHICKEN PROPOSAL. The Amarillo (TX) Globe News (12/13, 184K) reports that the FWS has published a draft rule in the federal Register that is "based on a conservation plan created by a coalition of five states to protect and expand the habitat the lesser prairie chicken needs to increase its population." According to FWS spokeswoman Lesli Gray, "comments will be accepted until Jan. 10."

Additional coverage of the lesser prairie chicken was provided by the El Paso (TX) Times (12/15, Ponce, 247K), the Carlsbad (NM) Current-Argus (12/15, Ponce, 18K), and KFDA-TV Amarillo, TX (12/15, 1K).

PETITION TARGETS KILLINGS BY AGRICULTURE DEPARTMENT'S WILDLIFE SERVICES. The Washington Post (12/16, Fears, 4.28M) reports that a petition filed early this month by the Center for Biological Diversity "seeks to reduce the power" of the Department of Agriculture Wildlife Services and "shine a light on its practices, claiming its agents have 'gone rogue,' overstepping the mission to protect the public by killing indiscriminately." Supporters include "politicians who agree that the agency is too secret and too deadly." The article notes that "even some federal workers frown on it; staff members" at the FWS "quietly dismiss Wildlife Services agents as 'gopher chokers.'"

ADDITIONAL COVERAGE: INTERAGENCY GRIZZLY BEAR COMMITTEE RECOMMENDS LIFTING YELLOWSTONE GRIZZLY PROTECTIONS. Additional coverage of the recommendation by the Interagency Grizzly Bear Committee that Endangered Species Act protections be lifted for the grizzly bears in the Yellowstone National Park was provided by the Christian Science Monitor (12/13, Knickerbocker, 540K), the Austrian Tribune (12/15), and the Softpedia (12/15, 137K).

ADDITIONAL COVERAGE OF STUDY DETAILS LOSS OF ECOLOGICALLY-SENSITIVE WETLANDS. Additional coverage of the federal study funded by the FWS, the National Oceanic and Atmospheric Administration and the EPA on the loss of wetlands was provided by the Seattle Times (12/15, 1M).

ADDITIONAL COVERAGE OF "BANKING ON NATURE" STUDY. Additional coverage of the FWS study titled "Banking on Nature" was provided by the KXNews (12/15, 1K).

US Geological Survey:

USGS STUDY FINDS DECLINE OF DESERT TORTOISE IN JOSHUA TREE LINKED TO LONG DROUGHTS. The Los Angeles Times (12/13, Sahagun, 3.07M) reports that "in recent years, California's Agassiz's desert tortoise population has been decimated by shootings, residential and commercial development, vehicle traffic, respiratory disease and predation by ravens, dogs and coyotes." Now, "dwindling populations of the reptiles with scuffy carapaces and skin as tough as rhino hide are facing an even greater threat: longer droughts spurred by

climate change in their Sonoran Desert kingdom of arroyos and burrows," according to a new USGS study. The study found that "drought conditions are linked to declines in a population of desert tortoises in a square-mile study plot in Joshua Tree National Park."

OFFICIALS IN CALIFORNIA CONSIDER LIMITS ON FACILITY THAT DREDGES SAND. The Wall Street Journal (12/16, Carlton, Subscription Publication, 5.91M) reports that a mining operation by Cemex at California's Monterey Bay is now coming under increased state and local scrutiny. The article notes that the Monterey Bay debate comes as communities are struggling with ways to slow beach erosion at a time when rising sea levels are likely to result in the loss of more shoreline, according to Cheryl Hapke, a research geologist with the USGS.

Securing America's Energy Future:

Offshore Energy Development:

ENVIRONMENTALISTS NOT SATISFIED WITH CALIFORNIA FRACKING REGULATIONS. The New York Times (12/14, Galbraith, Subscription Publication, 9.61M) reports that environmentalists aren't satisfied with California's fracking regulations and, instead, would like to see a ban placed on the practice, at least until there's more research done. The Times reports that "on Thursday, more than 100 environmental groups sent a letter to California coastal regulators urging a stop to offshore fracking." The groups wrote that "with fracking, 'the risks of oil spills, vessel traffic, discharges of toxic waste, and air pollution are substantially increased.'" California's fracking regulations, which doesn't take effect until Jan 1st, requires "drillers to alert neighboring landowners at least 30 days before using hydraulic fracturing techniques...and to test their water wells upon request." The new rule also requires that "drillers must do other groundwater monitoring and also disclose many of the chemicals used."

BP TARGETS CHEF EMERIL LAGASSE OVER OIL SPILL SETTLEMENT PAYMENT. The New Orleans Times-Picayune (12/16, Sayre, 700K) reported that on Thursday, the New York Times published a full-page ad from BP that attacked chef Emeril Lagasse's restaurants for a 2010 Deepwater Horizon settlement claim. Emeril's Homebase management firm on Friday argued the restaurant's claim for more than \$8 million "was legitimate under the terms of the BP-approved settlement agreement."

Tackling America's Water Challenges:

PUMP FIRE RAISES CONCERNS OVER IRRIGATION WATER SUPPLY. The Salem (OR) Capital Press (12/12, 113K) reports that Columbia Basin irrigators are worried that "damage from a fire in a Grand Coulee Dam may limit the amount of water available in the spring." However, the BOR "doesn't foresee any impact." Lynne Broughe, public affairs officer at Grand Coulee Dam, said, "We are fully confident at this time that we will have enough units up by the beginning of March to supply irrigation water to the Columbia Basin."

ADDITIONAL COVERAGE OF BAY DELTA CONSERVATION PLAN. Additional coverage of the Bay Delta Conservation Plan was provided by the Sacramento (CA) Bee (12/15, 749K), the Fresno (CA) Bee (12/15, 327K), the Stockton (CA) Record (12/10, 123K), the Modesto (CA) Bee (12/14, 208K), the Modesto (CA) Bee (12/14, 208K), the Merced (CA) Sun-Star (12/13, 86K), and the Santa Barbara (CA) Independent (12/13, 119K).

ADDITIONAL COVERAGE OF PROPOSED EXPANSION OF SAN LUIS RESERVOIR. Additional coverage of a proposal to increase the height of the San Luis Reservoir was provided by the Charlotte (NC) Observer (12/12, 713K) and the Lodi (CA) News-Sentinel (12/15, 32K).

ADDITIONAL COVERAGE: SALMON EGGS PERISH IN SACRAMENTO RIVER DUE TO DECISION TO DECREASE WATER LEVELS. Additional coverage that salmon eggs died in the Sacramento River because of a decision to decrease water levels was provided by the Chico (CA) News and Review (12/15, 101K).

Empowering Native American Communities:

COURT REOPENS CALAVERAS COUNTY TRIBE CHALLENGE. The Sacramento (CA) Bee (12/15, 749K)

reports that the battle over "a small Calaveras County tribe has now taken a new turn, as a Washington, D.C.-based federal judge has ordered Interior Department officials to take another look at its past decisions." In her decision, US District Judge Barbara Jacobs Rothstein "sided with Yakima Dixie and his allies with the California Miwok Indian Tribe." Rothstein remanded the case to the Interior Department for reconsideration.

Also reporting on the story are the [Merced \(CA\) Sun-Star](#) (12/13, 86K) and the [San Luis Obispo \(CA\) Tribune](#) (12/13, 126K).

FEDERAL GOVERNMENT FACES LAWSUIT OVER TRIBAL ROAD PROJECT. The [Sacramento \(CA\) Bee](#) (12/15, 749K) reports that "a road dispute on the Fort Independence Paiute Indian reservation in the Inyo County alpine tundra around Highway 395 has triggered the rare test of sovereignty that's being watched closely by legal experts across the country." The Fort Independence Paiute Tribe has "filed a \$1.8 million suit in their tribal court against Pai of Kentucky Inc., a design and engineering firm." The suit claims that "PAIKI is guilty of faulty, unsafe design work on 3.7 miles of roads into and out of the tribe's travel center and planned casino resort." It "seeks to recover fees and lost revenue incurred" when the BIA "shut down the road project in October 2012 because of what it called 'massive safety problems.'"

FORMER INTERIOR SECRETARY LUJAN SUPPORTS CATAWBA'S NORTH CAROLINA CASINO. The [Indian Country Today Media Network](#) (12/13, 21K) reports that Manuel Lujan Jr., who was Interior Secretary from 1989 to 1993 when Congress passed the Catawba Indian Land Claims Settlement Act, has "come out in support of the South Carolina-based Catawba Indian Nation's proposal to build a casino just over the state line in North Carolina in a county that is within its federal service area and part of its aboriginal land." In a statement, Lujan said, "In settling the claim, the Catawbas sacrificed much and lived up to their part of the settlement. However, the Catawbas never received what they were promised. I was in the room. The Catawbas were told that this legislation gave them the right to a 3,600 acre reservation. However, their current reservation is only a little over 1,000 acres. The Tribe's efforts to take land into trust status at a fair price in South Carolina have been stymied by state and local action."

FORMER GOLFER NOTAH BEGAY SUPPORTS "LET'S MOVE IN INDIAN COUNTRY" PROGRAM. [CNN](#) (12/13, Gittings, 14.53M) reports on the support of Notah Begay III, a former golfer and friend of Tiger Woods, of the "Let's Move in Indian Country" program.

Also covering the story is [KETV-TV Omaha, NE](#) (12/15, 104K).

ADDITIONAL COVERAGE OF AGREEMENT WITH OGLALA SIOUX TRIBE. Additional coverage that the Oglala Sioux Tribe of the Pine Ridge Reservation became the first tribe to reach a land-buy back agreement under the Cobell settlement was provided by the [Indian Country Today Media Network](#) (12/13, 21K) and [KOTA-TV Rapid City, SD](#) (12/15, 890).

Top National News:

RYAN "FRUSTRATED" BY CONSERVATIVE OPPOSITION TO HIS BIPARTISAN BUDGET DEAL. Rep. Paul Ryan's appearances on two of the Sunday morning talk shows generated coverage and analysis stressing many of the same themes that were emphasized last week. Reports portray Ryan as eager to display his willingness to compromise and his distance from some outside conservative groups. In particular, Ryan said he shared the same "frustration" that drove Speaker Boehner to denounce some conservative activists last week after they announced their opposition to the deal reached by Ryan.

The AP (12/16) reports that on NBC's Meet The Press (12/15, Gregory), Ryan, the chairman of the House Budget Committee, said he is "frustrated with conservative groups that protested the bipartisan budget deal he helped engineer." Politico (12/16, Everett, 467K) reported that Ryan, who was appearing with Sen. Patty Murray, said Boehner "just kind of got his Irish up" when he "slammed groups like Heritage Action for rejecting Ryan and Murray's budget deal before it was even unveiled." Ryan said, "He was frustrated that these groups came out in opposition to our budget agreement before we reached a budget agreement. I was frustrated, too. ... I would prefer to keep those conversations within the family."

McClatchy's (12/14, Lightman, 95K) David Lightman says, "Congressional observers were heartened by" Boehner's "sudden willingness...to blast conservative interest groups" after having been "widely criticized earlier this year for being too acquiescent to their demands to defund or delay the Affordable Care Act...and to hold out for drastic spending cuts that had little chance of winning approval in the Democratic-run Senate."

Roll Call (12/16, Dumain, 87K) said Ryan "is choosing his words carefully when discussing the tenuous relationship between GOP lawmakers and conservative outside groups." USA Today (12/16, Schouten, 5.82M) notes that while Ryan expressed some frustration with activists who object to his budget deal, he also "defended conservative outside groups...as 'indispensable' to holding the federal government accountable to taxpayers," saying, "I think these are very important elements of our conservative family."

The Daily Caller (12/16, Bordelon, 422K) reports that on Sunday, Ryan said he would "love to talk to" Sen. Marco Rubio, "who claims the deal will add to spending now without reducing the debt in the future." Ryan is quoted as saying, "Marco's a good friend of mine. I disagree with him respectfully."

The Washington Times (12/16, Klimas, 417K) reports that on NBC's Meet The Press (12/15, Gregory), Ryan touted the agreement he reached with Murray as evidence that "there can be other breakthroughs and compromise if you take the time to know somebody, know what their passions are and know how to work together." Murray, also on NBC's Meet The Press (12/15, Gregory), said, "We can't take on the tough discussions unless we can learn to use the word 'compromise.' ... If we just sit in our corners and yell at each other and that's all we get rewarded for, we'll never get to those big discussions."

McClatchy (12/16, Lightman, 95K) reports that Ryan added, "I would love to throw a few more zeros at the end of these numbers, but the fact that we're doing this, preventing shutdowns, passing bipartisan legislation – it passed the House 332 to 94, majority of both parties— that's a good step in the right direction."

However, Reuters (12/16, Morgan) reports that Ryan also dismissed a "grand deficit reduction bargain" as unlikely while President Obama remains in office and the Democrats retain their majority in the Senate. Ryan said, "We need to win a couple of elections. ... We're going to have to win the Senate and we're going to have to win the White House to truly fix this country's fiscal problems."

The AP (12/16) reports that also on NBC's Meet The Press (12/15, Gregory), Wisconsin Gov. Scott Walker (R) "praised" Ryan "for...brokering a bipartisan budget bill that's been blasted by a number of conservatives," and, as did Ryan, made the case that "retaking control of the Senate in 2014 will be the key to getting budgets that more conservatives can embrace." Walker said, "If we really want a budget deal we can wrap our arms around, we're going to have to win in the 2014 elections, particularly in key Senate races."

Politico (12/16, Everett, 467K) reported that on ABC's This Week, Newt Gingrich contended that "the bipartisan budget agreement is "brilliant politics" that will allow Republicans to keep the heat on Obamacare and avoid the terrible optics of more government shutdowns." Gingrich is quoted as saying, "I think this is mediocre policy and brilliant politics. It doesn't get them what they want on policy terms, but it strips away the danger that people will notice anything but Obamacare. And the longer the country watches Obamacare, the more likely the Democrats are to lose the Senate."

Robert Samuelson, in his column for the Washington Post (12/16, Samuelson, 4.28M), says that while "Obamacare demonstrates the perils of transformational policies," the "Murray-Ryan accord is a triumph of incrementalism" that "beats the alternative, which might be another senseless government 'shutdown.'" However, Samuelson adds that "the price of peace is doing almost nothing about our long-term budget problems."

Charles Babington, in an analysis for the AP (12/16, Babington) titled, "Budget Deal May Signal Era Of Tiny Achievements," says that "in an era of low expectations," the House's approval of the deal reached by Ryan and Murray "marks a rare cease-fire that should avoid a repeat of this fall's government shutdown and flirtation with default." However, Babington adds that the agreement "comes nowhere near the more ambitious efforts to address long-term spending and debt." Babington notes that Rep. David Price (D-NC), "a former Duke University political science professor," says "praise for the budget deal shows 'just how low the aspirations have become around here.'"

Bill Kristol said on Fox News Sunday (12/15, Wallace), "It's a good short-term deal, it has limited objectives, it gets some money for defense, which is much needed." Former OMB director Peter Orszag, on CNN's State Of The Union (12/15, Crowley), remarked, "I think what's right with it is it gets the basic construct of what we should be doing correct, which is we should do a little bit less deficit reduction today and a little bit more out over time."

The Daily Caller (12/16, Pappas, 422K) noted that on Fox News Sunday (12/15, Wallace), the Washington Post's Bob Woodward said, "I think this deal worked, quite frankly – let's go right to the center of this – because Obama was not part of the negotiations. He is not a good negotiator."

The Christian Science Monitor's (12/16, Knickerbocker, 540K) Brad Knickerbocker says Boehner "may have found his political mojo...but mainstream Republicans like himself can feel the hot breath of challenge from their right as the 2014 mid-term elections approach." Indeed, the Washington Times (12/16,], 417K), in an editorial titled, "The GOP Retreats Into Fear" that was linked to from the Drudge Report Sunday night, criticizes the majority of House Republicans for backing the Ryan-Murray deal, which it describes as "a tax and spending increase in return for gossamer spending reductions to take place someday, maybe in a future decade." The Times says that in the wake of last week's vote, "a job-killing minimum-wage increase is probably inevitable."

Senate Democrats Need Eight Republicans For Ryan-Murray Deal To Pass. David Rogers, in a piece for Politico (12/16, Rogers, 467K), says the Senate's cloture vote on the budget deal that passed the House last week "rests squarely on the 14 Republicans on the Appropriations Committee," six of whom "are up for reelection in 2014 and may find some reason to back out." Rogers notes that still "leaves more than enough to help Democrats get to 60 votes." According to Rogers, Sen. Thad Cochran's "decision...to seek reelection means he could yet lay claim to the chairmanship of Appropriations at the expense of" Sen. Richard Shelby, the panel's ranking Republican, who has announced that he will oppose the deal. Rogers adds that on Sunday, "a Shelby spokesman said...it is baseless' to suggest the potential competition with Cochran has anything to do with Shelby's opposition."

According to the Washington Post (12/16, Wilson, 4.28M), "several key Republicans signaled that they would vote to end debate." Sen. John McCain, on CNN's State Of The Union (12/15, Crowley), said "I hope it will pass the Senate. ... We must not shut down the government again." On CBS' Face The Nation (12/15, Schieffer, 2.64M), Sen. Richard Durbin said, "The struggle is still on in the United States Senate; we will need about eight Republicans to come our way. ... We need bipartisan support to pass it." The Post also reports that "both sides say" the budget deal "is likely to be one of the final pieces of significant legislation to pass the 113th Congress as midterm elections loom."

David Lightman, in a piece for McClatchy (12/14, Lightman, 95K), says, "While passage is expected" in the Senate, "so are...attempts at lengthy debate and delay" from Republicans "upset that the plan doesn't address long-term deficit issues."

The Hill (12/16, Wasson, 194K) reports that some Republicans believe the Ryan-Murray deal "has hidden political benefits for" Democrats facing reelection next year "because it sets a top-line budget number for 2015," meaning "vulnerable Democrats...won't have to take tough votes as part of a budget vote-o-rama." According to The Hill, some Republicans "are unhappy, as they believe the tough votes would have made it easier to defeat those candidates next fall."

Holtz-Eakin: Budget Deal Is Not Enough To Stimulate Economy. Politico (12/16, Huff, 467K) reports in its "Politico Live" blog that CBO Director Doug Holtz-Eakin said on CNN's "State of the Union" that the budget deal passed by the House and awaiting passage in the Senate "isn't strong enough to encourage business and stimulate the economy," and the government "should look to permanent changes such as immigration and tax reforms."

Ryan: GOP Expects Spending Cuts In Return For Debt Ceiling Hike. Politico's (12/16, Everett, 467K) Burgess Everett notes that on Fox News Sunday (12/15, Wallace), Paul Ryan said that Republicans in both the House and Senate "will soon huddle at their party retreats to figure out what Republicans can extract from Democrats in return for raising the debt ceiling next year." Ryan is quoted as saying, "We don't want nothing out of this debt limit. We're going to decide what it is we're going to accomplish out of this debt limit fight."

Under the headline, "Paul Ryan Says GOP Wants Ransom For Another Debt Ceiling Hostage," the Huffington Post (12/15, Grim, 11.54M) reports that President Obama "has said that he will refuse to negotiate around the debt limit, and that it is Congress' obligation to pay the debts that Congress itself ran up." The Huffington Post adds that while "it is not yet clear when precisely the debt ceiling will be hit," Treasury Secretary Lew has said, "They should just extend the debt limit way in advance and not have any sense of crisis at all." However, Lew added, "They set Feb. 7 as the day when the debt limit expires. We do have extraordinary measures [that] last about a month after that. So yeah, they have some time."

Ryan: House Republicans Intend To Advance Tax Reform Legislation. The Hill (12/16, Becker, 194K) reports that "after a string of setbacks" proponents of tax reform "say ratification of the budget pact could give them new momentum next year" because the deal "includes no new revenues from ending tax breaks, giving them free reign to pursue full-scale rewrite of the tax code." The Hill quotes Sen. Max Baucus, the chairman of the Finance Committee, as saying, "Provisions that were not part of the budget are going to be part of tax reform. Oh yeah, it very much helps." The Hill notes that on NBC's Meet The Press, Paul Ryan said he is "'hopeful' about moving tax reform." Ryan added, "Watch the Ways and Means Committee in the first quarter of next year. We're going to be advancing tax reform legislation, because we think that's a key ingredient to getting people back to work, to increasing take-home pay and to growing this economy."

The Wall Street Journal (12/16, Trottman, 5.91M) covers the same comments from Ryan in an article titled, "Budget Negotiators See Tax Overhaul Up Next." The Journal notes that Sen. Patty Murray, appearing alongside Ryan, added, "I would agree with the chairman [Ryan] that we do need to do tax reform." However, Murray also said, "Where the divide comes is what you would do with any revenue that was generated from that."

DMR Poll Prompts Speculation About 2016 Ryan Presidential Campaign. Chris Cillizza, in a piece for the Washington Post (12/16, Cillizza, 4.28M) on Ryan's political ambitions, notes that a Des Moines Register released over the weekend found that Ryan "was the single most popular Republican tested...with almost three quarters of Iowa Republicans saying they felt very or mostly favorable to him." Cillizza adds that among those who say they identify with the tea party, Ryan "was again the best liked with a 66 percent favorable score." Nevertheless, according to Cillizza, "the general consensus is that he has little interest in a [2016 presidential] bid."

FED COULD BEGIN WINDING DOWN BOND-BUYING SOON. Reuters (12/16, Spicer) reports that while the odds that the Federal Reserve will not make any major policy changes when it meets this week, recent economic data could indicate that the central bank could soon begin winding down its bond-buying program. Reuters notes that if the Fed decides to act, it could be a reflection of improving confidence in the global economy as much as recovery in the US. However, making such a move runs the risk of prompting a market selloff that threatens growth worldwide.

USA Today (12/16, Davidson, 5.82M) reports that most of the economists it surveyed say the Fed is likely "to keep the economy on a full dose of stimulus after this week's meeting but begin dialing it down by next month." Only "a handful of the 34 economists surveyed Dec. 12-13 predict the Fed this week will agree to pare its \$85 billion in monthly bond purchases, but a slight majority say the tapering will begin by January."

Interest In Corporate Bonds Seen As Sign Of Investors' Growing Confidence In Economy. The Wall Street Journal (12/15, Cherney, Subscription Publication, 5.91M) reports that the fact that buyers of corporate debt are demanding the lowest interest-rate premium as compared to government bonds since 2007 is an indication that bond buyers' confidence in corporate America is on the rise. Moreover, according to Dealogic, sales of investment-grade bonds in the US are at their highest rate ever this year. The Journal notes that all of this highlights expectations that the economy will continue to improve.

Companies Setting Aside More Cash For Stock Buybacks. The Washington Post (12/16, Yang, 4.28M) reports that many US multinational companies are returning to the practice of setting aside funds to buyback stocks as a reward to shareholders. The trend, which "took a dip during the recession," has "roared back during the recovery." The Post notes that repurchasing stock reduces "the number of shares outstanding," and as a result, "the value of each one goes up, a way of instantly rewarding shareholders." In addition, repurchases lift "earnings per share, an important number closely watched by investors — and by corporate boards to determine executive pay." The Post notes that analysts say that "when companies spend money on buybacks rather than

investment, they're signaling low hopes for economic growth."

Dow To Open at 15,755 After Second Straight Week Of Losses. ABC World News (12/15, story 5, 0:25, Muir, 7.43M) reported that the Dow will open Monday "at 15,755, after losing just under 257 points for the week" in its "second-straight week of losses."

Experts Say That Despite Risks, Stocks Look Promising For 2014. USA Today (12/16, Shell, 5.82M) reports that the five investment strategists and portfolio managers who took part in its annual Investment Roundtable said that while the stock market, which is "on track for its biggest gain in 10 years, has put up championship-like numbers this year," the ability of Wall Street in 2014 "to deliver a 'two-peat,' or back-to-back years of 20% gains, is far from a slam dunk." Savita Subramanian, head of US equity and quantitative strategy at Bank of America Merrill Lynch, said, "The stock returns in 2014 will be positive, but less than what we've seen over the past couple of years." Russ Koesterich, global chief investment strategist at BlackRock, noted that a new risk "is if U.S. economic growth picks up too fast." Said Koesterich, "Markets will likely have to adjust to a more dramatic rise in rates and less accommodation from the Fed."

Summers Makes Case For Preempting Structural Stagnation. In an op-ed for the Washington Post (12/16, Summers, 4.28M), former Treasury Secretary Lawrence Summers notes the possibility of "secular stagnation," in which the "U.S. and other major global economies might not return to full employment and strong growth without the help of unconventional policy support." Summers argues that the "risk of financial instability provides yet another reason why preempting structural stagnation is profoundly important." The online version of the Post runs the piece under the headline, "Stagflation Is Not Our Fate — Unless We Let It Be," but Summers is describing how to avoid a low-growth, low-inflation state, rather than a low-growth, high-inflation equilibrium suggested in the headline.

LITTLE ACTIVITY EXPECTED IN SENATE'S FINAL SESSION WEEK OF 2013. The New York Times (12/16, Peters, Subscription Publication, 9.61M) reports that the Senate will spend "the vast amount of time" in this, its final session week of the year, "doing nothing in particular." After its first vote at 5:30 p.m. on Monday, the rest of the week, "during which the Senate will take up the pending bills and a group of presidential nominations, seems certain to be bogged down with the kind of hurry-up-and-wait limbo that has consumed most working weeks in the Senate this year." The Times notes that in 2013, the Senate is near "its recorded lows for days on the floor," having spent "casting votes so far this year, close to the recent low point for a nonelection year in 1991 when there were just 95 voting days." As a result, "many of the most pressing questions of domestic and foreign policy remain at loose ends."

In an op-ed for USA Today (12/16, Mann, 5.82M), Windsor Mann, editor of "The Quotable Hitchens: From Alcohol to Zionism," casts Congress's inaction this year as a positive, noting that of the laws it has passed this year, "most are frivolous." Mann argues that "less from the government is more for the citizen." While Congress "should be embarrassed for passing the Helium Stewardship Act," we are "fortunate that is the only gas it passed."

Editorial Wrap-Up:

NEW YORK TIMES. "Medicaid Outpaces Private Plans." In an editorial, the New York Times (12/16, Subscription Publication, 9.61M) writes that despite the "botched start," enrollment in health insurance plans under the Affordable Care Act "has accelerated greatly." The greatest gains are in Medicaid programs. The Times calls the number of people predicted to sign up "surprisingly robust given the start-up troubles." The paper acknowledges that glitches in the systems remain, but Administration officials hope the problems will be addressed "in time to accommodate an upsurge in applications as the enrollment period runs on to the end of March."

"The Blackhole Of Terrorist Watch Lists." In an editorial, the New York Times (12/16, Subscription Publication, 9.61M) cites the case of Dr. Rahinah Ibrahim, who is challenging losing her visa after being "mistakenly" put on the no-fly list, in calling for reform of "the vast and secret world of terrorism watch lists." Given the "shrouded and unaccountable system," the Times argues that the courts "can do only so much to limit both honest mistakes and unchecked abuse." Currently, getting off such a list takes "a long, obscure process" that involves "appealing to the authorities responsible for creating the list in the first place." The paper calls legislation

making "it easier for people to challenge their inclusion" as well as forcing "the government to either defend its decision or correct the error."

"Big Tobacco Bullies." An editorial in the New York Times (12/16, Subscription Publication, 9.61M) criticizes "Big Tobacco" for "using trade and investment agreements to challenge and intimidate" developing countries as they try to "regulate cigarettes by, for example, requiring warning labels." The Times argues that while trade agreements and investment treaties "are meant to make it easier to do business internationally," they "should not serve as means by which corporations undermine legitimate public health regulations." Noting that US officials negotiating a trade agreement with 11 Pacific Rim countries plan to include language "to protect those nations from legal challenges by tobacco companies," the Times says those protections "must be ironclad and should include provisions to penalize companies that bring frivolous and harassing lawsuits." The Times also calls on governments worldwide to "add similar provisions to existing trade and investment agreements to stop the tobacco industry's bullying of sovereign governments."

"Safe Speeds On Commuter Rail." An editorial in the New York Times (12/16, Subscription Publication, 9.61M) notes the continuing "search for ways to ensure greater safety on commuter trains" following the deaths of four people on Dec. 1 "as a Metro-North train sped into a treacherous turn in the Bronx at 82 miles per hour when the maximum speed should have been 30 miles per hour." The Times says Sens. Chuck Schumer and Richard Blumenthal have "recommended that the M.T.A. install video and audio monitoring systems on all passenger trains," which the NTSB recommended in 2008 after a California collision that killed 25 people. Noting that the MTA "has delayed this change, citing costs of \$900 million, wariness from unions about the effect on jobs and technical issues," the Times calls on New York Gov. Andrew Cuomo to "help finance improvements," and notes that bringing in "the big money will be the job of Mr. Schumer and Mr. Blumenthal and their colleagues in Washington."

WASHINGTON POST. "Mexico: Ready For Takeoff." The Washington Post (12/16, 4.28M), in an editorial, praises Mexico and its President, Pena Nieto, for moving forward with legislation to open Mexico's oil industry to foreign companies. The Post calls the legislation "a historic breakthrough that positions Mexico to restore its place as a major oil producer, attract billions in investment and modernize its economy." The Post adds that when compared to the US Congress' "minimalist bipartisan deal on the budget, Mexico demonstrated how a more functional democracy can tackle a nation's biggest and most sensitive problems." Nieto's lackluster opinion polls illustrate the "courage" needed to institute the change and "the payoff will mostly be in the longer term," the Post says.

"Cleanup On The Inside." The Washington Post (12/16, 4.28M) argues the Maryland legislature should initiate "ambitious changes" to "recent happenings at the Baltimore City Detention Center, where a joint federal-state investigation revealed a virtual takeover of the facility by violent inmate gang members and corrupt correctional officers." The Post states the commission, charged with proposing solutions, did not go far enough with its recommendations, which included replacing the "decrepit and dangerous" facility, hiring new officers, instituting new training, and increasing security procedures. FBI wiretaps indicated "corrupt guards felt protected by the elaborate procedural protections against administrative discipline," according to the Post. The Post recommends "rebuilding management's power to discipline unionized correctional officers," including "extending the period for which an officer may be suspended pending investigation."

WALL STREET JOURNAL. "Exporting American Oil." In an editorial, the Wall Street Journal (12/16, Subscription Publication, 5.91M) praises Energy Secretary Ernest Moniz's for demonstrating "common sense" by stating the "US may need to reconsider its 40-year ban on most oil exports." The Journal quotes Moniz as saying, "Those restrictions on exports were born, as was the Department of Energy and the Strategic Petroleum Reserve, on oil disruptions. There are lots of issues in the energy space that deserve some new analysis and examination in the context of what is now an energy world that is no longer like the 1970s." The Journal argues that oil exports "would help with the US trade balance" and "allow energy markets to operate more efficiently." The export ban is characterized as "an example of a self-defeating resource nationalism that hurts US investment and the living standards of American workers" and "an obstacle to America's energy renaissance."

"Leading From The Front In Ukraine." An editorial in the Wall Street Journal (12/16, Subscription Publication, 5.91M) praises the Obama Administration's professed support for protesters in Ukraine. The Journal notes that the while the reasons for the Administration's change of heart are uncertain, it may be due to a recognition that

Russian President Vladimir Putin's aims are bad for the US. In any case, the Journal adds, the change is welcome.

"California's Prison Break." The Wall Street Journal (12/16, Subscription Publication, 5.91M) argues in an editorial that the US Supreme Court unconstitutionally "usurped the powers of the executive and legislative branches" and endangered public safety in 2011 when it "reaffirmed a lower-court mandate that California cut its prison population" as a remedy for "providing an unconstitutional level of health care" to prisoners in the overcrowded system. Following the decision, California began sending nonviolent felons to county jails, which "coped with the influx by releasing inmates early and placing more felons on probation and house arrest. As a result about 18,000 offenders are free who would otherwise be behind bars." The Journal cites a Public Policy Institute of California study that found "robust evidence" that property crime increased, "estimating one or two more such crimes per year for each offender not incarcerated."

Washington Schedule:

TODAY'S EVENTS IN WASHINGTON.

White House:

PRESIDENT OBAMA — No Scheduled Events.

VICE PRESIDENT BIDEN — No Scheduled Events.

FIRST LADY MICHELLE OBAMA—Visits the Children's National Medical Center in Washington DC; visits children on a tour and thanks the Center's staff for their work, closed press; reads to children and takes their questions in the Center's atrium, open press.

US Senate: No Scheduled Events.

US House: 11 a.m. — The House will meet in a pro forma session.

1:30 p.m. OVERSIGHT AND GOVERNMENT REFORM – FIELD HEARING — "ObamaCare Implementation: Who are the Navigators?" Location: Eisemann Center, Richardson, Texas.

Other: JUVENILE JUSTICE — 12:30 p.m. Models for Change hosts their 8th annual National Working Conference on Juvenile Justice. Highlights include: Scott Budnick, Executive Producer of "The Hangover discusses juvenile justice at annual convening juvenile detention experts, practitioners after announcing last week his "retirement from film for juvenile/social justice. Pat Nolan of Prison Fellowship Ministries to address audience Monday, 3:45p; Robert Listenbee, Dept. of Justice Ofc of Juvenile Justice Delinquency Prevention to address audience Tuesday 10:10 am. Location: MacArthur Foundation Models for Change Annual Conference, 2401 M Street, NW Fairmont Hotel, Georgetown. Sen. Ron Wyden—9:15 a.m. Delivers a keynote speech. Location: Georgetown Conference Center.

COMMERCE SECRETARY – TWITTER CHAT — 2:15 p.m. – 2:45 p.m. Secretary of Commerce Penny Pritzker (@CommerceSec) will be hosting a Twitter chat. She will be taking questions about the Departments Open for Business agenda.

ATTORNEY GENERAL – INVESTITURE CEREMONY — 3:30 p.m. Attorney General Eric Holder will deliver remarks at the investiture ceremony for U.S. Judge for the U.S. Court of Appeals for the Armed Forces Kevin Ohlson. Deputy Attorney General James M. Cole will also attend. Location: U.S. Court of Appeals for the Armed Forces, 450 E Street, NW.

Last Laughs:

LATE NIGHT POLITICAL HUMOR.

Jay Leno: "Well, this week, as you know, President Obama attended Nelson Mandela's memorial service in South Africa. Hundreds of world leaders were there. President Obama said it felt strange to listen to these world leaders in person rather than eavesdropping on their phone calls."

Jay Leno: "A right wing Texas Congressman, a US Senate candidate, a guy named Steve Stockman, he said more people have chlamydia than have signed up for Obamacare. You know what Obamacare and chlamydia have in common? You can't get either one online. Actually, that's not a legitimate comparison. To be fair, there's no fine for not getting chlamydia."

Jimmy Fallon: "Everybody's in the holiday spirit, except President Obama and Joe Biden. Joe Biden said this week that he and President Obama do not exchange Christmas gifts. You know, because whenever Obama gets Biden a present, he just winds up playing with the box."

DOI in the News:

SENATE DEMOCRATS URGE SECRETARY JEWELL TO ABANDON ALASKA DRILLING PLANS. The E&E Daily (12/16) reports that Senate Democrats are urging Interior Secretary Sally Jewell to "forgo new oil and gas lease sales and drilling permits in the Arctic Ocean until the agency conducts a thorough review of environmental and safety risks." The legislators "aired their concerns in a Thursday letter to Jewell, whose Bureau of Ocean Energy Management is deciding whether to offer new lease sales in the Chukchi Sea in 2016 and the Beaufort Sea in 2017." The senators wrote, "The Department of Interior's proposals to allow drilling activity in the Arctic Ocean have generated significant controversy and litigation, with opposition from local communities, members of Congress, scientists, the conservation community and the American people. An update to current regulations, including oversight of the use of newly granted authority over Arctic air pollution, is needed to ensure that adequate oversight, spill plans and environmental safeguards are in place before any new leasing and exploration activities occur in this sensitive environment."

The National Journal (12/17, Subscription Publication, 427K) reports that the letter to Jewell from Sens. Jeff Merkley, Dick Durbin, Sheldon Whitehouse, Barbara Boxer, Edward Markey., and Bernie Sanders "points to Shell's mishap-laden 2012 effort to begin exploration off Alaska's coast." The letter stated, "The myriad problems faced last year by Shell Oil Company as it attempted to drill exploration wells in the Chukchi and Beaufort Seas

demonstrated the unpredictability, harsh conditions, and heightened potential for human error that characterize any industrial activity in the Arctic Ocean.”

Also reporting on the story is the “E2 Wire” blog of [The Hill](#) (12/17, 194K).

Sen. Begich Opposes Delays On Oil Leases. The [Alaska Native News](#) (12/17, 245) reports that Sen. Mark Begich “pushed back on his Democratic colleagues in the Senate, calling their appeal to delay Arctic development shortsighted, misinformed and misguided.”

In a statement, Begich said, “I’m disappointed – although not surprised – to see several Senate Democrats request that the government delay oil and gas leasing in the Arctic and order a review of existing operations. If they had done their homework, they would know the Department of the Interior has already conducted a thorough review of Arctic offshore oil and gas operations and regulations earlier this year, and the department is busy putting additional safeguards in place.”

Also reporting on the story are [KTUU-TV Anchorage, AK](#) (12/17, 4K) and [KTVF-TV Fairbanks, AK](#) (12/17, 338).

US Likely To Hit Crude Production Record By 2016. The Wall Street Journal (12/16, Bird, Subscription Publication, 5.91M) reports that the US is set to top its record for crude-oil production by 2016, which is generating a debate over whether the nation should allow the free export of crude oil. The US has limited the exports of crude since the oil crisis of 1973. In addition, an analyst argues in the piece that it could force down the price of oil sharply.

McClatchy (12/16, Cockerham, 95K) reports that the Energy Information Agency is “dramatically increasing its production forecast in response to the shale revolution.” In its Annual Energy Outlook, released Monday, the EIA “projects U.S. oil production will increase to 9.5 million barrels a day in 2016, near the all-time high set in the boom of 1970.” While the report sees limits on the total US crude production, “it sees no end to skyrocketing natural gas production.”

The New York Times (12/17, Krauss, Reed, Subscription Publication, 9.61M) says that the EIA report projects that US production “would contribute to a decline in the world oil benchmark price over the next few years from a 2012 average of \$112 a barrel to \$92 a barrel in 2017, which should translate into lower prices at the pump for consumers.” A separate report released Monday, this one from the International Energy Agency, projects that “global consumption of coal, a major source of the greenhouse gases blamed for rising global temperatures and other pollutants, is likely to continue to grow at ‘a relentless pace’ through 2018.”

USA Today (12/17, Koch, 5.82M) reports that EIA Administrator Adam Sieminski wrote, “Advanced technologies for crude oil and natural gas production are continuing to increase domestic supply and reshape the U.S. energy economy as well as expand the potential for U.S. natural gas exports.” The “energy bonanza” is mainly due to “the combined use of horizontal drilling and hydraulic fracturing or fracking,” though fracking “faces growing criticism as some scientists link leftover fracking fluids to groundwater contamination.”

SENATE COMMITTEES TO CONSIDER INTERIOR, ENERGY PICKS. The [E&E Daily](#) (12/16) reports that Senate committees “this week plan to hold hearings and votes on several Interior and Energy department nominees, teeing up their potential confirmation in the new year.” The Energy and Natural Resources Committee “tomorrow will hold a hearing on nominees to fill two of Interior’s top energy and land management posts.” Janice Schneider has been nominated as assistant secretary for land and minerals management, and Neil Komze has been nominated as director of the BLM. Also tomorrow, the Environment and Public Works Committee will hold a hearing on Rhea Suh, the President Obama’s nominee for Interior assistant secretary for fish and wildlife and parks.

Meanwhile, [Bloomberg News](#) (12/17, 1.91M) reports that Senate Majority Harry Reid said “filed to end debate” on nominations including Mike Connor to be the deputy Interior secretary.

Also covering the story are [Politico](#) (12/17, Guillen, 467K), [Roll Call](#) (12/17, Lesniewski, Subscription Publication, 87K), and the [National Journal](#) (12/17, Subscription Publication, 427K).

US TO LAUNCH OFFSHORE WIND LEASE AUCTION OFF MARYLAND. The [reNews](#) (12/17) reports that "the United States is expected to launch an offshore wind lease auction for an up to 1.2GW site off Maryland tomorrow, the country's third such sale for development along the mid-Atlantic coast." Interior Secretary Sally Jewell and BOEM Director Tommy Beaudreau will join Maryland Governor Martin O'Malley in Baltimore on 17 December to announce the next steps. The officials are "expected to unveil a proposed sale notice that includes lease provisions and auction details on the area about 10 miles east of Ocean City."

Also reporting on the story are the [Washington Post](#) (12/17, 4.28M), the [Columbus \(IN\) Republic](#) (12/17, 80K), and the [Offshore Wind](#) (12/17).

SECRETARY JEWELL PRAISES FEDERAL-STATE SAGE GROUSE TEAMWORK. The [Mineweb](#) (12/17, 114) reports that Interior Secretary Sally Jewell on Thursday "praised unprecedented federal-state cooperation on planning efforts to conserve the greater sage grouse." However she "emphasized that much work still needs to be done by the federal government and the states in advance of the US Fish and Wildlife Service's September 2015 deadline to determine if the grouse warrants protection under the Endangered Species Act." During a meeting with the Western Governors Association in Las Vegas, Jewell noted, "Thanks to our partnership with the states throughout the range of the greater sage grouse, we have made tremendous progress analyzing and planning landscape-level strategies that could lessen the threats to the bird and conserve its sagebrush habitat." "At the same time, we are not yet where we need to be and it is time for both the states and federal government to redouble our efforts so that we can have effective conservation efforts in place before a listing determination must be made."

INTERIOR MOVES FORWARD WITH IT REFORM DESPITE BUDGET CUTS. The [Federal Times](#) (12/16, 120K) reports that the Interior Department "aims to shed redundant IT programs and invest more in innovative and forward-looking IT programs." The department "kick-started a multibillion dollar IT modernization effort in 2011 that is expected to save the agency \$100 million a year from 2016 to 2020." Andrew Jackson, Interior's deputy assistant secretary for technology, information and business services, discussed "the challenges facing the agency and how Interior intends to invest in its IT future."

PILT PROGRAM NOT FUNDED THROUGH FEDERAL BUDGET PROPOSAL. The [Billings \(MT\) Gazette](#) (12/17, 206K) reports that the Department of the Interior's Payment in Lieu of Taxes Program is not funded through the bipartisan federal budget proposal. On Friday, Sen. John Barrasso's office issued a statement saying Barrasso would "urge Washington to focus on funding the PILT program." Sen. Mike Enzi's office also "called for the continuation of the program Friday."

WHITE HOUSE MONITORING ROSEMONT MINE PROGRESS. The [Arizona Daily Star](#) (12/17, 335K) reports that the White House is "informally involved in the contentious Rosemont Mine issue," Coronado Forest Supervisor Jim Upchurch said. At a news conference, Upchurch said that the White House's Council on Environmental Quality is, "in a sense, acting as a referee among various federal agencies that have taken different positions on the mine." Upchurch, referring to the EPA, the BLM and the NPS, said, "We are having substantive discussions with CEQ and other entities."

America's Great Outdoors:

National Park Service:

FORMER NPS EMPLOYEE GUILTY OF DUMPING SEWAGE AT MOUNT RAINIER. The [E&E Daily](#) (12/16) reports that a former NPS employee was "found guilty last week of violating the Clean Water Act after dumping about 180,000 gallons of minimally treated sewage into a river at Mount Rainier National Park." James Barber "initially accepted a plea bargain, in which he would have pled guilty to a misdemeanor and given up his certification to operate a wastewater facility." However, "he withdrew that plea before sentencing and opted for a trial in the US District Court for the Western District of Washington." His sentencing is scheduled for March 14.

NPS RECOMMENDS DELAY IN CRISSY FIELD PLANS. The [San Francisco Chronicle](#) (12/17, King, 2.88M)

reports that the NPS has issued a "strong recommendation" that "long-term plans for the former commissary building on Mason Street across from Crissy Field should be delayed several years," General Superintendent Frank Dean wrote in a letter last week to the Presidio Trust. Dean wrote, "The proper stewardship of the Presidio merits taking a long view. With the many improvements already approved and planned, such as the new tunnel top parklands ... there is wisdom in allowing these new uses to settle in before selecting a major new use and tenant for the Commissary site."

EMERALD VIEW PARK TO RECEIVE SUPPORT FROM RIVERS, TRAILS, AND CONSERVATION

ASSISTANCE PROGRAM. The South Pittsburgh Reporter (12/17) reports that Emerald View Park has been chosen to receive assistance from the NPS Rivers, Trails, and Conservation Assistance program "to assist with identifying best practices for steep hillside trails, fund-finding, developing a trail use survey strategy, community involvement and consensus for a signage plan." The article notes that Emerald View Park is "one of 11 projects accepted in Pennsylvania."

WATER SPRING IN NEW RIVER GORGE CLOSED. The Charleston (WV) Gazette (12/17, 154K) reports that "a spring in the New River Gorge National River that has been used as a home drinking water source for decades is being closed by the National Park Service, after tests showed its water contains high levels of arsenic, mercury and coliform bacteria." Although Ajax Spring had "previously been posted as a non-potable water source, NPS officials were concerned that local residents were continuing to the spring for household use." Park Superintendent Trish Kicklighter said, "Because we are aware the public uses the spring, we were required to test it during a recent mandatory audit. When the test results were reviewed by the National Park Service Public Health Inspector, he recommended closing the spring."

Also reporting on the story is the AP (12/17).

CONSERVATION GROUPS PARTNER TO PRESERVE HARPERS FERRY LAND. The Washington Post (12/17, 4.28M) reports that "two conservation groups are joining forces to preserve battlefield land at Harpers Ferry National Historical Park." The Civil War Trust and the National Parks Conservation Association said "the public-private partnership will protect nearly four acres at the site." The article notes that "the purchase was financed by federal funds, a major gift from an anonymous donor and a number of smaller private donations."

STUDY FINDS YELLOWSTONE MAGMA MUCH LARGER THAN THOUGHT. The Washington Post (12/16, Press, 4.28M) reports that "the hot molten rock beneath Yellowstone National Park is 2 ½ times larger than previously estimated, meaning the park's supervolcano has the potential to erupt with a force about 2,000 times the size of Mount St. Helens, according to a new study." By measuring seismic waves from earthquakes, researchers were "able to map the magma chamber underneath the Yellowstone caldera as 55 miles long, lead author Jamie Farrell of the University of Utah said Monday."

ADDITIONAL COVERAGE OF MANHATTAN PROJECT NATIONAL PARK. Additional coverage of the proposed Manhattan Project National Park was provided by Albuquerque (NM) Journal (12/17, 288K).

Bureau of Land Management:

SENATE PANEL TO VOTE ON SEN. WYDEN'S LOGGING BILL. The E&E Daily (12/16) reports that the Senate Energy and Natural Resources Committee will mark up Sen. Ron Wyden's S. 1301 on Thursday. Wyden's bill would "promote commercial forestry projects on tens of thousands of acres annually in eastern Oregon, while setting first-ever statutory protections for old-growth trees and streams." The Obama Administration "in July said it supports the bill but that it may not have the resources to treat as much land as the bill envisions."

LOGGING TRADE GROUP ISSUES NEW WILDERNESS POLICY. The E&E Daily (12/16) reports that "Congress should not designate new wilderness until it streamlines environmental reviews on Forest Service and Bureau of Land Management timberlands, a national logging coalition said." The Federal Forest Resource Coalition, a trade group representing 650 wood products companies in 28 states, said "it would support new wilderness bills as long as Congress overhauls management of the 28 percent of national forests it said are suitable for timber production." For instance, the group suggested that "Congress should expedite the National Environmental Policy Act, streamline administrative and judicial reviews, and designate timber harvests as the

land management objective on those acres of forests."

COMMISSION TO PREPARE TO GIVE SAGE GROUSE COMMENT. The Elko (NV) Daily Free Press (12/17, 22K) reports that "even though one commissioner expressed distrust in federal agencies' scoping process, the county is planning to participate." Commissioner Grant Gerber was "critical Wednesday at an informal open-house meeting hosted by the Bureau of Land Management and US Forest Service regarding a proposed sage-grouse conservation plan." Gerber said he believed the BLM had "already decided on a strategy and comments weren't likely to help shape the record of decision, which the agencies hope to finalize by September." However, "on Thursday, the county commission will review the document in order to submit an informed comment before the Jan. 29 deadline."

DEAL WILL HAVE MARINES, PUBLIC SHARING ACCESS. The Palm Springs (CA) Desert Sun (12/16, 110K) reports that support from Sen. Dianne Feinstein may "have helped seal a compromise between off-roaders and the U.S. Marine Corps, ensuring that more than half of Johnson Valley's 188,000 acres of prime off-roading trails and desert vistas will remain open to the public most of the year." Rep. Paul Cook "recently announced the deal that would limit an expansion of the Marine Corps Air Ground Combat Center at Twentynine Palms into the valley to 88,130 acres and create a federally designated off-roading area on the remaining 99,690 acres." The article notes that "the deal, part of the National Defense Authorization Act the House passed late Thursday, would also allow the Marines to use 56,439 acres of the off-roading area for combat training up to 60 days a year but limits the kind of live ammunition that can be fired during combat exercises."

Fish and Wildlife Service:

FWS HOLDS PUBLIC MEETING ON SHOOTING BARRED OWLS. The Oregon Public Broadcasting (12/17, 4K) reports that "more than 60 people came to the Douglas County Library to hear" the FWS' "rationale for testing whether shooting non-native barred owls will bolster populations of the smaller spotted owl." Umpqua Valley Audubon Society President Diana Wales said "she was more comfortable about removing barred owls after hearing" FWS biologist Robin Bown's presentation. Wales said, "I am supportive of the project because I think, like so many things in life, we find ourselves in an extremely difficult situation with limited options. I appreciated (Bown) helping everyone in the audience walk through our own values and how our values consciously and non-consciously affect how we feel about these things."

ADDITIONAL COVERAGE: INTERAGENCY GRIZZLY BEAR COMMITTEE RECOMMENDS LIFTING YELLOWSTONE GRIZZLY PROTECTIONS. Additional coverage of the recommendation by the Interagency Grizzly Bear Committee that Endangered Species Act protections be lifted for the grizzly bears in the Yellowstone National Park was provided by the Helena (MT) Independent Record (12/17, 45K) and the Summit County (CO) Citizens Voice (12/16, 506).

US Geological Survey:

USGS STUDY FINDS RARE DESERT TORTOISE THREATENED BY DROUGHT. The E&E Daily (12/16) reports that "worsening drought conditions are threatening to wipe out a rare tortoise species in California," according to a new report. A report by the USGS that was published in the online journal Biological Conservation found that "extreme drought brought on by climate change is harming the Agassiz's desert tortoise population in Joshua Tree National Park."

Securing America's Energy Future:

Renewable Energy:

WIND FARM RULE SEEKS TO BALANCE ENERGY PRODUCTION AND WILDLIFE. The New York Times (12/16, Frosch, Subscription Publication, 9.61M) reports on the new Obama Administration rule that allows "wind farms to lawfully kill bald and golden eagles under 30-year permits." Environmentalists are unhappy with the regulation calling it a "blank check" after having hoped for a rule that was regionally based and "that reflects how they live and where they travel." The 30-year rule replaces the 5-year permitting process put in place in 2009,

though the new rule "includes federal reviews every five years to assess whether sufficient measures are being taken to make sure eagles are being conserved." Daniel M. Ashe, director of the Fish and Wildlife Service, said that the service "would issue a permit only if a wind developer had minimized the risk to eagles through its choice of location and the design of the project, among other variables," including regional thresholds.

Meanwhile, the [Indian Country Today Media Network](#) (12/17, 21K) reports that the Osage "reacted strongly to Obama's rule change announcement and said the President should know better." Assistant Principal Chief Scott N. Bighorse said, "President Obama knows how important eagle feathers are to us: He was adopted into the Crow Nation and was adorned with a full war bonnet containing eagle feathers from head to toe."

WHITE SANDS LAND SWAP INCLUDED IN DEFENSE BILL. The [Las Cruces \(NM\) Sun-News](#) (12/17, 59K) reports that the 2014 fiscal year National Defense Authorization Act, which authorizes spending for the Defense Department, has been approved by the House and includes a provision that will expand the buffer zone surrounding the White Sands Test Facility. The legislation provides for transferring 5,100 acres of land near White Sands from the Bureau of Land Management to the Army. The transfer was in legislation pushed in the Senate by Sens. Tom Udall and Martin Heinrich.

Also providing coverage are the [El Paso \(TX\) Times](#) (12/17, By Steve Ramirez Sramirez@lcsun-news.com @, Twitter, 247K) and the [Albuquerque \(NM\) Business First](#) (12/17).

CAPE WIND CONSTRUCTION BEGINS, SHOULD MAKE TAX DEADLINE. Bloomberg News (12/16, Goossens, 1.91M) reports that construction has begun of some components related to Cape Wind, Massachusetts' long-planned offshore wind farm. The construction should meet "the requirements for the investment tax credit," according to Siemens Energy's Markus Tacke. The ITC, which requires construction to begin by Jan. 1 to qualify for it, could save up \$780 million for the Cape Wind project. However, activists like Audra Parker of the Alliance to Protect Nantucket Sound, believe the project still will not be completed "because of the legal and financial challenges."

Offshore Energy Development:

SUPREME COURT PASSES ON REVIEW OF INTERIOR'S DECISION TO IMPOSE DRILLING MORATORIUM.

The [E&E Daily](#) (12/16) reports that the Interior Department will "escape being held in contempt of court for suspending offshore drilling after the 2010 Deepwater Horizon oil spill as the Supreme Court today declined to review a lower court ruling siding with the agency." According to the article, "several drillers led by Hornbeck Offshore Services LLC asked the justices to review an appeals court ruling that Interior didn't violate terms of a lower court's injunction against enforcing its offshore drilling moratorium." The Supreme Court action leaves the 5th Circuit ruling in place.

Also reporting on the story is [Reuters](#) (12/17, Hurley, 17.91M). AP coverage was picked up by the [Huffington Post](#) (12/16, 11.54M), the [Atlanta Journal-Constitution](#) (12/17, 1.26M), the [Boston Herald](#) (12/17), and the [New York Daily News](#) (12/17, Press, 3.94M).

JURY BEGINS DELIBERATING IN FORMER BP ENGINEER'S OBSTRUCTION TRIAL.

The AP (12/17) reports from New Orleans that a Federal jury on Monday "started weighing whether" former BP engineer Kurt Mix "broke the law or harmlessly swiped his finger across a cellular phone when he deleted hundreds of text messages in the aftermath of the company's massive 2010 oil spill in the Gulf of Mexico." Jurors deliberated for more than an hour before asking to go home for the night, and were scheduled to resume deliberations this morning. Federal prosecutors argue that Mix, 52, of Katy, TX, "was trying to destroy evidence when he deleted two strings of text messages – one with a supervisor and another with a BP contractor," but a defense attorney told jurors "that the charges against Mix are 'unfair and baseless' and the product of investigators' 'rank incompetence.'"

Bloomberg News (12/16, Fisk, Lawton, 1.91M) reports that Federal prosecutor Leo Tsao argued that Mix "deleted from his mobile phone text messages and voice mails related to BP's effort to estimate the size of the spill. 'Kurt Mix knew exactly what was on that text message string when he deleted it on Oct. 4 and 5 and intended to obstruct this grand jury investigation,'" Tsao told the jury, adding, "The defendant acted with corrupt intent when he deleted text messages." Mix's attorney, Michael McGovern, told that jury, "The government's theory is pure

nonsense. He doesn't have a corrupt bone in his body."

Tackling America's Water Challenges:

BOR STUDY SAYS SANTA ANA RIVER WATERSHED FACES CLIMATE CHANGE CHALLENGES. The E&E Daily (12/16) reports that the Interior Department of the Interior has said that California's Santa Ana River Watershed "now faces major stress due to climate change and increased water demand." According to a study released last week by the BOR, the watershed is "likely to experience a decrease in surface water supply and a reduction in groundwater availability over the coming century." At the same time, the US Census Bureau "projects that the region's population will grow from 6 million to nearly 10 million within the next half-century." The study states, "In light of climate change, prolonged drought conditions, growth, and population projections, a strong concern exists to ensure there will be adequate water supplies to meet future demand."

Also providing coverage is the Circle of Blue WaterNews (12/17).

ADDITIONAL COVERAGE OF BAY DELTA CONSERVATION PLAN. The E&E Daily (12/16) reports California Gov. Jerry Brown is "trying again to solve one of the state's most intractable problems, 30 years after his first attempt." The new plan, "released in draft form Monday by his administration, proposes to build two 30-mile tunnels beneath the delta's peaty soil." According to the article, "longtime observers of the California water scene say they are optimistic the new plan will bear fruit, unlike Brown's previous attempt."

Also providing coverage is the Sacramento (CA) Bee (12/16, 749K).

RED WILLOW DAM RECONSTRUCTION IS "ESSENTIALLY COMPLETE". The McCook (NE) Daily Gazette (12/17, 18K) reports that BOR has announced that major repairs to the Red Willow Dam are "essentially complete." The project superintendent, Thor Shriver, said, "The work is essentially complete. Only some fencing and seeding work is left to do."

In an editorial, the McCook (NE) Daily Gazette (12/17, 18K) congratulates the BOR and its contractors for completing major repairs to the Red Willow Dam.

Empowering Native American Communities:

TRIBAL LEADERS WARY OF LOBBYISTS' ATTENDANCE AT TRIBAL NATIONS CONFERENCE. The Indian Country Today Media Network (12/17, 21K) reports that "nothing happened in Congress in 2012 or in 2013 on a Carcieri fix," and "tribal advocates fear nothing is likely to happen anytime soon, despite a supportive president and administration." Rosemary Morillo, chairwoman of the Soboba Band of Luiseño Indians, noted that "several attendees at the 2013 White House Tribal Nations Conference held in D.C. on November 13 were not elected tribal leaders," and "some...were lobbyists," which "alarms her." Morillo said, "Only elected officials of their tribal governments should be invited. Tribal leaders have an interest in their own lands and the people they govern."

SUPREME COURT DECLINES TO HEAR DISPUTE OVER GRAND CANYON SKYWALK. The E&E Daily (12/16) reports that the Supreme Court today "declined to take up a Nevada developer's case against an American Indian tribe over the Grand Canyon Skywalk." The 9th US Circuit Court of Appeals has "ruled in favor of the tribe, holding that the company must exhaust all tribal court remedies before filing in federal district court." The developer has "also pursued litigation in those avenues, and those cases are ongoing."

COURT LIFTS TEMPORARY BAN ON HORSE SLAUGHTER. The Indian Country Today Media Network (12/16, 21K) reports that "on Friday, a federal appeals court lifted a temporary ban on horse slaughter in the US, removing barriers for plants to open while a lawsuit by The Humane Society of the United States, Front Range Equine Rescue and others is underway." According to the 10th Circuit judge, the USDA "adhered to proper procedure in issuing permits to Valley Meat Co. in Roswell, New Mexico; Rains Natural Meats of Gallatin, Missouri; and Responsible Transportation in Sigourney, Iowa."

MAN GETS LIFE FOR KILLING TWO CHILDREN ON SPIRIT LAKE RESERVATION. The San Francisco Chronicle (12/17, 2.88M) reports that "a man convicted of stabbing to death two young children on the Spirit Lake

Indian Reservation in North Dakota was sentenced Monday to life in prison without parole." According to the article, "a federal jury in September found Valentino 'Tino' Bagola, 20, guilty of the May 2011 slayings of 9-year-old Destiny Shaw-Dubois and her 6-year-old brother, Travis DuBois Jr., of St. Michael." On Monday, US District Judge Ralph R. Erickson in Fargo sentenced Bagola "to life in prison on each of two counts of first-degree murder."

Top National News:

FEDERAL JUDGE: NSA SURVEILLANCE VIOLATES THE FOURTH AMENDMENT. Federal Judge Richard Leon's ruling on Monday that the NSA is violating the Fourth Amendment generated a great deal of analysis portraying President Obama and his Administration as the clear losers in the case.

For instance, on ABC World News (12/16, lead story, 1:55, Sawyer, 7.43M), Jonathan Karl reported that the President "has long said the program and another that tracks information on email is a critical tool in keeping the country safe." President Obama was shown saying, "We've saved lives. We know of at least 50 threats that have been averted because of this information." But Karl noted that Leon concluded that "there is an utter lack of evidence that a terrorist attack has ever been prevented" by the NSA's surveillance.

The New York Times (12/17, Subscription Publication, 9.61M), in an editorial titled, "A Powerful Rebuke Of Mass Surveillance," says Leon's ruling is "an enormous symbolic victory for opponents of the bulk-collection program, and a reminder of the importance of the adversarial process." Eugene Robinson, in his column for the Washington Post (12/17, Robinson, 4.28M), dismisses as "patronizing talk" the President's repeated offers to discuss the proper scope of the NSA's surveillance. Robinson says the President's "subtext...is clear: Get over it."

This morning's reports contain almost no criticism of the ruling from members of Congress, and a great deal of praise from both Democrats and Republicans. According to Politico (12/17, Everett, 467K), "lawmakers of a broad ideological spectrum came down in favor of Leon's decision on Monday, and there was nary a statement blasted out that defended the NSA."

All three network newscasts led with reports on the ruling, and the three combined devoted more than nine minute of airtime to the story, or about 15% of their broadcasts. Brian Williams, at the opening of NBC Nightly News (12/16, lead story, 3:30, Williams, 7.86M), noted that the Fourth Amendment has its roots in John Adams' "response to the British searching homes and businesses back in colonial times," and then reported that "a Federal judge has ruled the NSA is violating our Fourth Amendment rights when it collects data on phone calls into and from the United States." Correspondent Pete Williams went on to describe the ruling as "a serious legal blow to one of the most controversial practices of the NSA, a once secret program disclosed six months ago by" former NSA contractor Edward Snowden that "gathers logs of every phone number dialed by US phone customers, and dumps it into an enormous database."

On ABC World News (12/16, lead story, 1:55, Sawyer, 7.43M), Jonathan Karl said the ruling "may be the ultimate victory for" Snowden, since the "classified documents he leaked revealed just how much information the NSA collects on Americans and directly led to [Monday's] ruling."

Politico (12/17, Everett, 467K) reports that Sen. Ron Wyden said, "It is an astounding day when a federal judge says a government surveillance practice would leave James Madison 'aghast.'" Sen. Rand Paul said this ruling "reminds the federal government that it is not above the law," and Sen. Richard Blumenthal commented that "when exposed to the sunlight of constitutional scrutiny, this massive secret surveillance program could not stand." The Huffington Post (12/16, Reilly, 11.54M) reports that Sen. Mark Udall, in a statement released Monday, said, "The ruling underscores what I have argued for years: The bulk collection of Americans' phone records conflicts with Americans' privacy rights under the U.S. Constitution and has failed to make us safer."

Asked if the ruling would have been possible absent the leaked material from Snowden, the New York Times' Charlie Savage, appearing on MSNBC's The Rachel Maddow Show (12/16, 548K), replied, "Without the leak, we wouldn't have known this was happening. ... It took the leak by Edward Snowden to really drive this into the public consciousness and force the government, essentially, to acknowledge what was going on." Nevertheless, on NBC Nightly News (12/16, lead story, 3:30, Williams, 7.86M), Pete Williams reported that the White House

"rejected any idea that [Snowden] be given amnesty in return for ending the leaks."

On ABC World News (12/16, lead story, 1:55, Sawyer, 7.43M), Diane Sawyer said the program deemed unconstitutional has been described by the White House as a "key weapon in the fight against terror."

On the CBS Evening News (12/16, lead story, 3:40, Pelley, 5.58M), correspondent John Miller reported that while Leon "ruled that the NSA should get an individual court order to obtain the records in each case, rather than relying on a massive database," NSA director Gen. Keith Alexander warns "that would present problems for his agency in tracking terrorism suspects." Alexander: "If you don't have the data someplace, you can't search it." The Huffington Post (12/17, Mirkinson, 11.54M) reports that CBS's Miller has been criticized over his reporting on the NSA for Sunday's CBS's 60 Minutes. According to the Huffington Post, "critics dubbed" the segment "obsequious at best."

In the lead story for Fox News' Special Report (12/16, 2.15M), Catherine Herridge reported that "the suit, brought by Larry Klayman of conservative group Freedom Watch against the Obama Administration, challenged the constitutionality of the bulk collection of phone records and the NSA's authority to do so." The AP (12/17, Frommer) says the ruling has "potentially far-reaching consequences" and is "filled with blistering criticism of the Obama administration's arguments." The AP notes that the two plaintiffs are Klayman and Charles Strange, "who is the father of a cryptologist technician who was killed in Afghanistan when his helicopter was shot down in 2011." According to the AP, Strange's son "worked for the NSA and support personnel for Navy SEAL Team VI."

USA Today (12/17, Johnson, 5.82M) notes that Leon, "appointed to the bench by President George W. Bush, issued a preliminary injunction against the program but suspended the order to allow an appeal by the Justice Department." USA Today also reports that DOJ attorney James Gilligan "argued that Klayman lacked standing to bring the case because he could not prove the NSA examined his phone or Internet records." USA Today adds that Gilligan also contended that Leon "could not review the statutory authority granted by Congress under FISA," and that "only the secret courts and the Supreme Court have that power."

The Hill (12/17, Sasso, 194K) reported that Leon "noted that courts have rejected previous challenges to NSA spying because the plaintiffs...were unable to show whether they had actually been monitored." However, according to The Hill, Leon ruled that "because the NSA has now admitted collecting records on all U.S. phone calls, and the plaintiffs are phone subscribers, there can be little doubt that the NSA collected their records." The Washington Times (12/17, Dinan, 417K) reports that Klayman "accused the government of sending false text messages from his phone" as part of his claim to standing.

The New York Times (12/17, A1, Savage, Subscription Publication, 9.61M) says Leon "rejected the Obama administration's argument that a 1979 case, *Smith v. Maryland*, had established there are no Fourth Amendment protections for call metadata" because "the scope of the program and the evolving role of phones and technology, distinguished the bulk collection from the 34-year-old case." According to the Times, "Similar legal challenges to the N.S.A. program, including by the American Civil Liberties Union and the advocacy group Electronic Frontier Foundation, are at earlier stages."

Under the headline, "NSA Phone Spying 'Almost Certainly' Unconstitutional," Judge Says," the Wall Street Journal (12/17, Barrett, Subscription Publication, 5.91M) reports that Leon wrote: "The almost-Orwellian technology that enables the government to store and analyze the phone metadata of every telephone user in the United States is unlike anything that could have been conceived in 1979." Reuters (12/17, Ingram) notes that Leon added, "I cannot imagine a more 'indiscriminate' and 'arbitrary invasion' than this systematic and high-tech collection and retention of personal data on virtually every single citizen."

The New York Times (12/17, Stolberg, Subscription Publication, 9.61M) profiles Leon, describing him as a "conservative." The Times notes that Leon "teaches a course...with" John Podesta, "who will soon become a counselor to President Obama." The Times reports that on Monday, Podesta called Leon "an honorable guy and a straight shooter."

The Washington Post (12/17, Nakashima, Marimow, 4.28M) reports that Leon's "strongly worded decision stands in contrast to the secret deliberations of...the nation's surveillance court, which hears only the government's side of cases and since 2006 has held in a series of classified rulings that the program is lawful." The Post says

Congress is currently "debating whether to end the NSA's 'bulk' collection of phone data or endorse it in statute."

Michael Doyle, in a brief analysis for McClatchy (12/17, Doyle, 95K), says, "It's not a sweeping decision, as it covers only two individuals," and the Los Angeles Times (12/17, Savage, 3.07M) emphasizes that Leon's ruling "will have no immediate impact in stopping the massive data-collection effort." Politico's (12/17, Gerstein, 467K) Josh Gerstein says the preliminary injunction granted by Leon "does not require him to make a definitive ruling on the constitutional questions in the case, but does take account of which side he believes is more likely to prevail."

Bloomberg News (12/17, Harris, 1.91M) reported that on Monday, White House press secretary Jay Carney "said he hadn't seen the ruling and referred questions to the Justice Department." AFP (12/17, Decamme) reports that the NSA "refused to comment" on Monday's ruling. The Daily Caller (12/17, Macri, 422K) covered the ruling a post titled, "In Massive Blow To NSA, Judge Says Phone Spying Likely Unconstitutional."

The Washington Post (12/17, 4.28M), in an editorial, says that "if the government is to" retain "the authorities that officials insist are crucial, it will have to do more to demonstrate why they are essential and how Americans' privacy is being protected."

Obama Mulling NSA Reforms Recommended By Panel He Appointed. Josh Gerstein, in a piece for Politico (12/17, Gerstein, 467K), notes that Leon's ruling "was issued just three days after a review group established by Obama delivered its report proposing more than 40 changes to the federal government's surveillance programs." According to Gerstein, the President "was initially expected to dig through the reform proposals before Christmas," but the White House "now says that process won't be complete until sometime next month." Gerstein goes on to report that the President "has already signaled his plans to impose greater limits on the NSA, but the contours of those changes have only been partially decided."

On the CBS Evening News (12/16, lead story, 3:40, Pelley, 5.58M), CBS's Scott Pelley noted that the President has "put a commission together to look at whether the NSA's practices should be changed," and correspondent John Miller reported that the commission "is going to recommend largely the same thing" that Judge Leon called for in Monday's ruling, which is that the NSA should "stop keeping that massive database."

The Wall Street Journal (12/17, Subscription Publication, 5.91M), in an editorial this morning, criticizes the bipartisan coalition calling for an end to some of the NSA's surveillance practices. The Journal encourages the President to ignore the recommendations of the commission that he set up to review the NSA if it recommends jettisoning some of the programs that the Journal says are necessary to prevent terrorist attacks.

Snowden Praises Ruling; Greenwald Says Snowden Has Been Vindicated. On CNN's The Situation Room (12/16, 554K), Barbara Starr reported that Snowden released from Moscow a statement reading: "I acted on my belief that the NSA's mass surveillance program would not withstand a constitutional challenge and that the American public deserved a chance to see these issues determined by open courts. Today, a secret program authorized by the secret court was, when exposed to the light of day, found to violate Americans' rights. It is the first of many." The Huffington Post (12/17, Reilly, 11.54M) and USA Today (12/17, Winter, 5.82M) also quote from Snowden's statement.

On CNN's Anderson Cooper 360 (12/17, 14.53M), the Guardian's Glenn Greenwald, who worked with Snowden to publish the information he took from the NSA, was asked if Monday's ruling "vindicated" Snowden. Greenwald replied, "How can it not vindicate him?" Greenwald continued, "Here is an American citizen working inside of the government who discovers that the United States government is doing things, without the knowledge of the American people, that is so illegal...that a George Bush-appointed judge said, 'it's not even a close call.'" According to Greenwald, "It is not only the right, but the duty, of an American citizen in Edward Snowden's situation to come forward, at great risk to himself, and inform his fellow citizens about what it is their government is doing in the dark that is illegal."

Obama Meeting With Tech Executives Today. The AP (12/17) reported that on Tuesday, President Obama "will meet...with executives from leading technology companies, including Google, Twitter and Apple." According to the AP, while the White House "says the meeting will focus on efforts to repair" HealthCare.gov and "reforming government information technology," the participants will also discuss "leaks related to National Security

Agency's surveillance programs."

The Wall Street Journal (12/17, A1, Fitzgerald, Ante, Subscription Publication, 5.91M) has a front-page article on content providers, such as Facebook, Amazon and Google, that are building Internet infrastructure to rival that of telecoms.

Reuters (12/17, Holland, Mason) reports that while it is unclear what the President can learn during the meeting with tech CEOs, appearing with them may help convince Americans that he can fix the website's problems. Executives attending the meeting include Apple CEO Tim Cook, Twitter's Dick Costolo, Google's Eric Schmidt, Facebook's Sheryl Sandberg, Netflix's Reed Hastings, Comcast's Brian Roberts, AT&T's Randall Stephenson and LinkedIn's Erika Rottenberg.

Politico (12/17, Meyers, 467K) reports that Tuesday's meeting "marks the first public outreach to Silicon Valley leaders from Apple, Twitter, Facebook, Yahoo and Google." Politico notes that the executives "appear more likely to highlight another issue on the administration's agenda — federal surveillance efforts and the impact on their companies."

USA Today (12/17, Madhani, 5.82M) reports that according to the White House, the President "is expected to talk to the tech officials specifically about the economic impacts of unauthorized intelligence disclosures and how government can help the tech sector to 'grow the economy, create jobs and address issues around income inequality and social mobility.'"

US Officials Have Reportedly Said They Will Not Stop Spying On Germans. The New York Times (12/17, Sanger, Smale, Subscription Publication, 9.61M) reports that "nearly two months after President Obama assured" German Chancellor Angela Merkel that the US "would never again target her cellphone, a broader effort to build a new intelligence relationship with Germany is floundering." According to the Times, US officials "have refused to extend the 'no spying' guarantee beyond Ms. Merkel, telling German officials...that if the White House agreed to forgo surveillance on German territory, other partners would insist on the same treatment." An anonymous "senior German official" is quoted as saying, "[National Security Adviser] Susan Rice has been very clear to us. The U.S. is not going to set a precedent."

SUPPORT FOR BUDGET DEAL GROWING AHEAD OF TUESDAY'S SENATE VOTE. The New York Times (12/17, Weisman, Subscription Publication, 9.61M) reports that ahead of Tuesday's Senate vote on the compromise budget plan, support for the measure grew Monday "as Republicans concluded they could not allow a measure that passed the House with overwhelming bipartisan support to die in Congress's upper chamber." On Monday, Sens. Orrin Hatch, Johnny Isakson, and Saxby Chambliss announced their support for the measure, which appears "to give it more than the 60 votes it would need to overcome a filibuster threat and bring it to a final vote." Four other Republicans, Sens. John McCain, Jeff Flake, Susan Collins, and Ron Johnson, have said they would vote to end debate on the measure.

The AP (12/17, Espo) reports that the announcements from Hatch, Isakson and Chambliss, as well as Sen. John Hoeven's clam that "he was inclined to join them," more than "offset an announcement from Sen. Richard Burr, R-N.C., who reversed course and said he would vote to block the bill."

The Wall Street Journal (12/17, Hook, Peterson, Subscription Publication, 5.91M) reports that as a small but increasing number of Senate Republicans are saying they will support the bill, one of the last remaining questions is how Democrats who are facing reelection next year will vote on the measure. Sen. Mark Pryor, who is one of those Democrats, said through a spokesman on Monday that he will vote for the bill.

Potential 2016 GOP Presidential Contenders Criticize Budget Deal. McClatchy (12/17, Lightman, 95K) reports that Tuesday's vote will be watched "as an illustration of a growing divide in the party, a split that could reverberate in the 2014 and 2016 elections." McClatchy notes Sens. Marco Rubio, Ted Cruz, and Rand Paul, all of whom are seen as potential 2016 presidential contenders, "were quick to sharply criticize the deal."

Reuters (12/17, Ferraro) notes that Minority Leader McConnell and a number of members who are supported by the Tea Party are likely to fight the measure, but they do not appear to have the votes they would need to block it.

Gerson: Budget Deal Is Not The Start Of A Centrist Governing Coalition. In his column for the Washington Post (12/17, Gerson, 4.28M), Michael Gerson argues that while the budget deal was “a welcome exception to congressional gridlock,” it was not “an indication that gridlock has been broken in any lasting or fundamental way.” The deal, Gerson writes, “was not a precedent for grand compromises on immigration or tax reform.” It marks “a truce in the budget wars, not the emergence of a centrist governing coalition.” Gerson also notes that the President “was marginal to the deal, which had almost nothing to do with his policy priorities,” and he now “risks permanent damage to his standing as a leader.”

Editorial Wrap-Up:

NEW YORK TIMES. “A Powerful Rebuke Of Mass Surveillance.” The New York Times (12/17, Subscription Publication, 9.61M), in an editorial says a judge’s ruling that NSA is violating the Fourth Amendment is “an enormous symbolic victory for opponents of the bulk-collection program, and a reminder of the importance of the adversarial process.”

“The Next Chapter For Derivatives Regulation.” In an editorial, the New York Times (12/17, Subscription Publication, 9.61M) lauds the Commodity Futures Trading Commission for, since the passage of the Dodd-Frank financial reform law, putting in place “dozens of generally sound new federal rules — on transparency and oversight — against nearly impossible odds.” Now the driving forces behind the reform, chairman Gary Gensler and Commissioner Bart Chilton will soon leave the commission. The Times argues, “to make a difference, the new rules must be vigorously defended, monitored and enforced,” and that “a deep understanding of the markets coupled with an unshakable commitment to reform” is needed to allow the new regulatory regime to take hold. The Times criticizes President Obama’s reported nominees, saying they would mean the commission would not have “a proven reformist or a technical derivatives expert,” which the paper calls “unacceptable.”

“Discrimination In Sochi.” In an editorial, the New York Times (12/17, Subscription Publication, 9.61M) writes that with Russia becoming “an increasingly dangerous place for gays and lesbians,” Olympics officials are under pressure to give “assurances that athletes and others will not be harassed, or possibly even arrested, if they endorse civil rights for gays and lesbians.” So far there have been “only vague assurances” and “a stern reminder” on Olympic rules about protests and propaganda. The Times calls for “a way for athletes to show their opposition to discriminatory laws,” arguing that it would reinforce the part of the Olympic Charter that says: discrimination for “race, religion, politics, gender or otherwise is incompatible with belonging to the Olympic Movement.”

WASHINGTON POST. “The NSA Must Make Its Case.” The Washington Post (12/17, 4.28M), in an editorial, says that in the wake of a judge’s ruling that NSA is violating the Fourth Amendment, “if the government is to” retain “the authorities that officials insist are crucial, it will have to do more to demonstrate why they are essential and how Americans’ privacy is being protected.”

“Va.’s Next Attorney General.” In an editorial, the Washington Post (12/17, 4.28M) says that both state Sen. Mark Herring and state Sen. Mark Obenshain “should declare now, before results are announced by week’s end, that they will respect the outcome” of the recount in the race for Virginia attorney general and not appeal the results “to the General Assembly,” which would represent “an act of contempt for Virginia’s voters.”

“Chile’s Next Steps.” In an editorial, the Washington Post (12/17, 4.28M) writes that socialist Michelle Bachelet’s victory in Chile could “soften” Latin American governments’ trend towards being either “leftist, populist and authoritarian” or “modernizing, free market and democratic.” She “is a democrat and not a populist,” planning reforms such as free public higher education and rewriting the Pinochet-era constitution. Chile could show that inequality can be addressed “without resorting to reckless populism and authoritarianism.” However, the Post anticipates pressure from the former student movement, and Bachelet could “end up compromising the free-market model that has carried Chile to prosperity and drastically reduced its poverty rate.”

WALL STREET JOURNAL. “Disarming Surveillance.” The Wall Street Journal (12/17, Subscription Publication, 5.91M), in an editorial this morning, criticizes a bipartisan commission calling for an end to some of the NSA’s surveillance practices, and encourages the President to ignore the recommendations of the commission that he set up to review the NSA if it recommends jettisoning some of the programs that the Journal

says are necessary to prevent terrorist attacks.

“Shame Of The Academy.” In an editorial, the Wall Street Journal (12/17, Subscription Publication, 5.91M) writes that the American Studies Association vote to boycott Israel is a manifestation of the long existing political corruption of the American academy. The paper argues that, in the standard operation of the modern academic and media left, bullying secured the vote. The Journal questions why a group that presumably embraces free speech would want to boycott the most democratic country in the Middle East, which gives Arabs better treatment and more rights than most Arab states. The Journal concludes by suggesting that such professors teach students supposed US misdeeds.

“Washington’s Next Financial Mistake.” In an editorial, the Wall Street Journal (12/17, Subscription Publication, 5.91M) says that the next major financial mistake made by Washington is likely to be a move by the Financial Stability Oversight Council to treat all major financial institutions like banks.

EVENT MEMORANDUM FOR THE SECRETARY

MEETING WITH ASSISTANT SECRETARIES

DATE: December 18, 2013
LOCATION: Office of the Secretary
TIME: 9:00AM - 10:00AM
FROM: Mike Connor, Commissioner of Reclamation, BOR, (202) 513-0501
Laura Davis, Chief of Staff, OS, (202) 208-7351
Benjamin Milakofsky, Deputy Chief of Staff, OS, (202) 256-8304

I. PURPOSE

You are hosting a senior leadership meeting with your Assistant Secretaries on Wednesday, December 17. You last met with the Assistant Secretaries group on December 3 where you provided an overview of your recent travel and Rhea Suh led a discussion on budget priorities. You requested this meeting to discuss 2014 and 2016 goals following a Cabinet conversation with Denis McDonough. At the beginning of the meeting, you should commend Rhea and Tommy for finishing their hearings before Senate committees as they work through the confirmation process. (b)(6)

Last week, Laura Davis requested that each Assistant Secretary identify their top 2014 and 2016 goals for the Department. They were invited to provide ideas beyond their official areas of responsibility. That information has been organized into your priority areas and is included below for your review. We did not make significant edits or provide additions to the list.

II. PARTICIPANTS

- Anne Castle, WS
- Rhea Suh, PMB
- Kevin Washburn, ASIA
- Tommy Beaudreau, ASLM
- Rachel Jacobsen, FWP
- Eileen Sobeck, Insular
- Jack Haugrud, SOL
- Mike Connor, BOR
- Laura Davis, COS
- Ben Milakofsky, Deputy COS

III. AGENDA

You will start the meeting by welcoming the group and congratulating Rhea and Tommy as they move through the confirmation process. You will then lead a discussion around the 2014 and 2016 priority goals identified by your leadership team.

Priority Goals by the end of 2014

Celebrating & Enhance AGO

LWCF (Rhea): Launch an interagency LWCF Task Force with CEQ and DOI and execute strategy for reauthorization of LWCF with full, permanent funding in the next 6-12 months.

Strengthening Tribal Nations

BIE (Kevin): Complete BIE Study Group evaluation of BIE grant and direct service schools, issue recommendations to Secretaries Jewell and Duncan, Secretaries complete evaluation and adopt preferred recommendations and begin implementation.

White House Council on Native American Affairs (Kevin): Schedule at least three meetings of the Council with one additional meeting at Tribal Nations Conference, establish at least one additional subcommittee and identify deliverables with timelines for subcommittees.

Cobell (Kevin): Enter into cooperative agreements with tribes or send offers to allottees for at least 20 reservations.

Federal Acknowledgement Process (Kevin): Issue proposed and publish final rule governing the Federal Acknowledgement Process.

Powering our Future

Oil and Gas Oversight and Reforms (Tommy): (1) Finalize BLM's Hydraulic Fracturing Rule; (2) Finalize Onshore Order 9 address waste and methane emissions; (3) Publish BSEE's draft BOP rule; and (4) Publish BOEM-BSEE Alaska standards rule

DRECP (Tommy): Finalize the Desert Renewable Energy Conservation Plan

Offshore Wind (Tommy): Announce and hold three competitive offshore wind lease sales – Maryland, New Jersey and Massachusetts.

Engaging the Next Generation

Urban Agenda (Rachel): Develop a focused urban agenda based a new model of urban partnerships that will have ten pilot Urban Wildlife Refuge Partnerships by the end of 2014. The Urban Wildlife Refuge Initiative increases FWS relevance in urban communities by providing a variety of nature-based experiences and opportunities. The President's budget contains \$20m for

funding of the Urban Parks and Recreation Recovery Program (UPARR) to enhance or restore recreation facilities in urban areas. Working through UPARR and other technical assistance programs, DOI is well-positioned to be a national leader in promoting local parks and recreation access as key elements of urban revitalization and livability.

Assuring Healthy Watersheds and Sustainable, Secure Water Supplies

Klamath River (Anne): Complete negotiated water settlement with tribes and irrigators and support legislation to implement Klamath Basin Restoration Agreement and Klamath Hydroelectric Settlement Agreement.

Colorado River (Anne): Drought Contingency Plan in place; U.S and Mexico deliver Minute 319 pulse flow; Complete Phase 1 and enter Phase 2 of Basin Study Next Steps process; Long-Term Experimental and Management Plan Draft EIS complete and published.

President's Climate Action Plan (Anne): Implement Reclamation Climate Change Strategy; through WaterSMART, complete 6 Basin Studies, conserve 800,000 af water, execute \$25M in grants, and produce a public web-based data portal to deliver rainfall, evapotranspiration, hydroecological streamflow classification, and thermoelectric water withdrawals and consumptive use information for the entire Nation.

Building a Landscape-Level Understanding of Our Resources

Landsat (Anne): USGS, NASA, OMB and Congress establish a sustainable imaging strategy for the next 20 years of Landsat.

Sage Grouse (Rachel, Tommy and Anne): FWS will contribute to BLM land management plan revisions for Sage-Grouse; secure conservation commitments from states and other federal agencies that, in conjunction with the revised BLM plans, will provide an effective basis for long-term conservation of this species; create a conservation efforts database; and be substantially ready to complete a final listing of the bi-state with 4(d) rule, or a withdrawal of the proposed rule for sage grouse. Other offices will contribute through the evaluating impacts of energy development on sage grouse; expand efforts to understand the threat of altered fire regimes, spread of invasive plants, and climate change; and, analyze population and habitat connectivity in support of BLM and FWS.

National Strategy for Combating Wildlife Trafficking (Rachel): In cooperation with the Department of State and the Department of Justice, Interior will finalize and adopt the National Strategy required by the President's July 1, 2013 Executive Order Combating Wildlife Trafficking. To address wildlife trafficking, FWS will: improve U.S. enforcement of domestic laws protecting wildlife; strengthen international cooperation and engage governments of range, transit, and consumer countries around the globe; strengthen global enforcement of international agreements and build capacity to combat wildlife trafficking in range, transit, and consumer countries; and reduce the demand for illegal wildlife that ultimately drives the poaching crisis.

Hurricane Sandy (Tommy): Announce awards of \$100 million in Hurricane Sandy Coastal Resiliency Grants

EVENT MEMORANDUM FOR THE SECRETARY

INTERNAL SAGE GROUSE MEETING

DATE: December 18, 2013
LOCATION: Office of the Secretary
TIME: 3:30PM – 4:15PM
FROM: James Lyons, Counselor - LMM, 202-208-4318; Michael Bean, Counselor –
FWP; Sarah Greenberger, Senior Advisor, 202-219-2140

I. PURPOSE

This memo provides a report on the agreement on a spring assessment and timeline for collaboration among the Federal partners – and possibly the states – to develop final plans for GSG conservation to be submitted to the FWS in the fall of 2014. The memo also provides an update on the status of sage grouse conservation efforts following your meeting with Governors and the meeting of the Sage Grouse Task Force in Las Vegas on December 12 and 13.

II. DISCUSSION

Update on Assessment

BLM, FWS and USFS have agreed to conduct an early spring roll-up of “likely proposed plans” on multiple scales (PAC/WAFWA Zone/Population) to permit a written assessment of major gaps/weaknesses with time to address concerns before the plans are finalized. A major gap/weakness means a failure to reduce substantially a COT-identified major threat to a PAC or population. We will present details on the process, an agreed to timeline, and a sense of resource needs in the internal meeting on Thursday.

Read-out of Sage Grouse Task Force Meeting

Below is a read-out of the Sage Grouse Task Force Meeting for your information.

Outcomes: This WGA and task force meeting occurred at roughly the mid-point in the effort to address the threats to the sage grouse. Your participation as both a keynote speaker at the WGA meeting and in conversation with Governors Hickenlooper, Mead, Bullock, Otter, Herbert, and Sandoval were extremely helpful in a number of ways:

1. The Governors and their staffs were assured of your continued commitment to the work of the task force (as initiated by Sec. Salazar) and the goal of achieving a landscape-level conservation strategy.
2. Your emphasis on the need for the states to work together with the BLM, FS, NRCS and the FWS in developing a conservation strategy for the GSG may place additional pressure on states that have yet to do so.

3. It was made clear by FWS that the COT report would be used to guide future conservation actions and to evaluate the adequacy of conservation measures proposed by federal and state agencies to conserve the GSG.
4. The Governors and their staffs got the message that conservation plans dependent on voluntary measures – unless proven to work by prior experience – were not going to be sufficient.
5. The Governors and their staffs sent a strong signal that they view listing the GSG as an unacceptable option, making clear that if listing as “threatened” is a possible outcome, more work will need to be done to help increase the states’ comfort with that decision.
6. The Governors and their staffs committed to continue to the collaboration with the agencies in developing a conservation plan for the GSG.

State Self-Assessments: The conversation with the governors regarding the state self-assessments provided a candid assessment of progress to date and an opportunity to discuss next steps. It also provided the opportunity to discuss the FWS’ perspective on voluntary measures as a means of conserving the species. This conversation continued into the task force meeting with Federal and state agency staffs. It is clear at the staff level that a number of states will continue to advocate for “voluntary” measures as a part of their conservation strategy. FWS will need to make very clear what regulatory measures will be accepted in making the GSG listing determination – i.e., some certainty that they will be implemented and that the specific conservation measures are effective. Dan Ashe offered the WAFWA strategy for conserving the Lesser Prairie Chicken, which was “endorsed” by the FWS, as an example of acceptable voluntary measures.

Conservation Metrics: This past summer, the Task Force created a “metrics team” to recommend how to measure and report the impact of conservation efforts undertaken. The metrics team was to have reported its recommendations to the Task Force at its December meeting, but its recommendations were not yet ready. Instead, the FWS presented a proposed framework for metrics. However, Utah expressed strong concerns with the proposed framework and, instead, offered to present its own proposal. The states felt strongly that efforts to reconcile the divergent views continue over the next few weeks. Though all parties recognize that if no consensus is reached in early January, the Service will need to move forward with its own proposal. The FWS would like all conservation measures for the GSG across the landscape reported in a consistent fashion using common criteria, definitions, and units of measure (e.g., acres treated, miles of fence line flagged) to facilitate their evaluation of the cumulative conservation effort and its effectiveness.

Fire: The conversation with the Governors and their staffs spanned a broad array of topics, from the need to identify in advance key habitat areas so that these areas are prioritized in pre-suppression and fire suppression activities; the need for a more reliable supply of native seeds to be used in post-fire restoration efforts; the creation of rural fire districts that safely utilize appropriate capabilities of those living on the landscape; and the need for more resources. The task force had an extended conversation regarding the need for additional federal resources for firefighting, led by staff to Governor Hickenlooper (Doug Young), to help with rangeland and forest fires.

The task force endorsed the use of a framework developed by a WAFWA team commissioned by the FWS, for prioritizing fire-suppression and restoration of sagebrush steppe habitat after fire based on where those efforts are most likely to be meaningful.

However, USGS representatives at the task force meeting also made clear that a study that they are soon to publish raises questions about the efficacy of sage steppe restoration efforts following fire.

Mitigation: Several of the states have developed sage grouse conservation plans that include a significant role for compensatory mitigation (i.e., offsetting the impacts of authorized detrimental activities by carrying out beneficial activities, usually at a different site). The FWS has provided to the Task Force a memo setting forth its recommendations for a general framework for compensatory mitigation for the sage grouse which was welcomed.

III. NEXT STEPS

Our primary objective today is to reach final agreement on the path forward for completing BLM/FS plans and for engaging the states in the process of completing conservation action plans for the GSG.

At the briefing, we will present a timeline of key activities, milestones, and products associated with developing final resource management plans in 2014.

DOI in the News:**CONSIDERATION OF CONNOR'S NOMINATION WOULD BE HELD OVER UNTIL NEXT YEAR UNDER PROPOSED DEAL.**

The [Huffington Post](#) (12/18, Jennifer Bendery, 11.54M) reports that Senate Democrats are "hoping to cut a deal with Republicans to confirm four of President Barack Obama's nominees this week and punt the rest to next year – a plan that, if everything goes smoothly, would send senators home for the holidays as soon as Friday morning," according to a top Democratic aide. The "four nominees, in the order they would come up, are Alejandro Mayorkas for deputy secretary of Homeland Security, John Koskinen for IRS commissioner, Brian Davis for US District Court judge for the Middle District of Florida, and Janet Yellen for chairman of the Federal Reserve Board of Governors." As for the other seven nominees awaiting votes, including Michael Connor for deputy secretary of the interior, "Democrats are hoping Republicans will agree to hold them over until the Senate comes back in January, when the new session of Congress begins."

Senators Spar Over Suh. The [Environment & Energy Publishing](#) (12/19, 705) reports that Rhea Suh, the nominee for Interior assistant secretary for fish and wildlife and parks, "appeared before the Environment and Public Works Committee less than a week after testifying before the Energy and Natural Resources panel, where Republicans took shots at her past work for a conservation foundation." Suh "received a fresh round of GOP criticism yesterday over her past statement about the impacts of natural gas development in the West – though she also received bipartisan praise."

Sen. Heller Says Sage-grouse Conservation Depends On Wildfire Control. The Elko (NV) Daily Free Press (12/19, 22K) reports that Sen. Dean Heller said Wednesday “unless federal agencies can control wildfires, keeping sage grouse off the endangered species list would be difficult.” Heller said the BLM and US Forest Service “should place a greater emphasis on suppressing wildfires and then treating more burned acres afterward.” However, Heller was “encouraged by the newly nominated director of the BLM, Neil Komze, who grew up in Elko.” Heller said, “One of the pluses of having Komze there is at least he has an open mind and understands the concerns.”

Sen. Murkowski Tells Komze About Unmet Promises To State And Native Corporations. In an editorial, the Fairbanks (AK) News-Miner (12/19, 44K) that during a Senate committee hearing on the nomination of Neil Komze to become the new director BLM, Sen. Lisa Murkowski “took an opportunity to highlight the fact that the state of Alaska and many Alaska Native corporations still lack title to the federal lands they were promised decades ago.” The paper lauds Murkowski for reminding Komze of the need to act on the issue.

GOP Balks At Obama’s Human Rights Nominee. In its “Floor Action” blog, The Hill (12/19, 194K) reports that “despite Republican protests, a Senate panel plans to approve a human rights nominee appointed by President Obama.” The Senate Foreign Relations Committee on Wednesday is “scheduled to tackle the nomination of Keith Harper to become the US Representative to the United Nations Human Rights Council.” The article notes that “the nomination has been in limbo since his first hearing in late September, when Sen. John McCain (R-Ariz.) hammered Harper, a member of the Cherokee nation, for allegedly unethical behavior in his work representing Native Americans.” McCain said Harper has “refused to answer his questions regarding his negotiation of Cobell v. Salazar — a \$3.4 billion class-action lawsuit settlement over misspent Native American land royalties.”

INTERIOR SENDS OFFERS TO CONSOLIDATE TO OGLALA SIOUX. The Native News Online (12/19) reports that “in a major step toward fully implementing the historic Cobell settlement,” the Interior Department “announced today that it has sent initial purchase offers to consolidate ownership of highly fractionated trust lands.” The Oglala Sioux, owners of fractionated land interests at the Pine Ridge Reservation, are the “first to receive purchase offers under the Department’s Land Buy-Back Program for Tribal Nations.” The article notes that “purchase offers to individuals with interests at the Makah Indian Reservation, located in Washington state, will also be sent this week.” Interior Secretary Sally Jewell said, “The Buy-Back Program is one of the clearest opportunities we have to put power and decision-making back in the hands of tribal nations – to stimulate their economies, to determine how to manage their available resources, and to promote tribal sovereignty and self-determination. I want to acknowledge the incredible effort that went into this milestone, through our nation-to-nation relationship and across the Department. It is this spirit of collaboration that will continue to guide our efforts to reduce fractionation and implement the Buy-Back Program in as efficient, transparent and fair a manner as possible.”

Also providing coverage is the Interested Party (12/19).

PETITION SEEKS FEDERAL PROTECTION FOR THEODORE ROOSEVELT NATIONAL PARK. The Forum of Fargo-Moorhead (ND) (12/19, 15K) reports that a petition with more than 10,000 signatures asking for Theodore Roosevelt National Park to be protected from oil development is set to be delivered to Interior Secretary Sally Jewell. The online petition was sponsored by the Dakota Resource Council and includes signatures from people in every state, said council chairwoman Linda Weiss. DRC senior field organizer Scott Skokos said, “It just kind of went viral with a national audience. Our ultimate goal is to make it so that there’s a buffer zone between energy development and the park.”

The Bismarck (ND) Tribune (12/19, 22K) reports that park superintendent Valerie Naylor said the park is “under threat daily from a growing number of permits for oil and gas-related development.” She said she’s “concerned that people don’t understand the effect oil development outside park boundaries has on the north and south units of the park and the Elkhorn Ranch site.” Naylor said “development isn’t just oil wells, but includes all the incidental roads, power lines and cellphone towers that go along with it.”

Also reporting on the story are KMOT-TV Minot, ND (12/19) and KQCD-TV Dickinson, ND (12/19, 104).

BUDGET DEAL WILL COST STATES \$415 MILLION IN OIL AND GAS ROYALTIES. The AP (12/19, Daly)

reports that according to the CBO, the budget deal "will cost Wyoming, New Mexico and other states \$415 million in lost oil and gas royalties over the next decade." Legislation implementing the deal "makes permanent an effective 51-49 percent split that favors the federal government in dividing the 12.5 percent royalty collected from energy companies on oil and gas production on federal land." Rep. Cynthia Lummis (R-WY) said, "By perpetuating the policy of taxing mineral-producing states to pay for federal government bureaucracy, the deal unfairly burdens Wyoming to support increased spending in Washington. ... We need real cuts and real savings now, not more promises of cuts and savings years from now."

AP coverage was also picked up by [ABC News](#) (12/19, 3.68M), the [Minneapolis Star Tribune](#) (12/19, Daly, 1.14M), the [Boston Herald](#) (12/19, 643K), the [Billings \(MT\) Gazette](#) (12/19, 206K), the [U-T San Diego](#) (12/18, 647K), the [Glenwood Springs \(CO\) Post Independent](#) (12/19, 27K), the [Quincy \(IL\) Herald-Whig](#) (12/19, 82K), the [Ogden \(UT\) Standard-Examiner](#) (12/18, 147K), the [Cortez \(CO\) Journal](#) (12/18, 646), and the [Las Cruces \(NM\) Sun-News](#) (12/19, 59K).

GOP BILL WOULD CONSOLIDATE DEPARTMENTS OF LABOR, COMMERCE. In its "Floor Action" blog, [The Hill](#) (12/19, 194K) reports that Sen. Richard Burr (R-NC) "introduced a bill Tuesday that would combine the Department of Labor and the Department of Commerce into a single agency." S. 1836 would also transfer the National Oceanic and Atmospheric Administration from Commerce to the Department of the Interior.

ADDITIONAL COVERAGE: INTERIOR UNVEILS AUCTION FOR MARYLAND OFFSHORE WIND LEASES.

Additional coverage of the Interior Department announcement of a proposed notice of sale Tuesday for nearly 80,000 acres for commercial offshore wind development off the coast of Maryland was provided by the [Delmarva \(MD\) Daily Times](#) (12/18, 26K), the [Bloomberg BusinessWeek](#) (12/17, 4.93M), the [Huffington Post](#) (12/18, 11.54M), the [CleanTechnica](#) (12/18, 10K), the [Business Spectator \(AUS\)](#) (12/19, 446), the [Law 360](#) (12/19, 18K), and [WBFF-TV Baltimore](#) (12/19, 3K).

ADDITIONAL COVERAGE: GAO SAYS REVENUE LOST BY DELAY IN DRILLING ROYALTY RATE HIKE.

Additional coverage of the report by the GAO says that the Interior Department's decision to delay plans to raise the royalty rate for oil production on public lands resulted in lost revenue was provided by the [Houston Chronicle](#) (12/17, Dlouhy, 2.26M).

ADDITIONAL COVERAGE OF PILT PROGRAM. Additional coverage of the PILT program's uncertain funding was provided by the [St. George \(UT\) Spectrum](#) (12/18, 48K).

MORE ANALYSIS OF STATE TAKEOVER OF FEDERAL LANDS URGED. In an op-ed for the [Ravalli \(MT\) Republic](#) (12/19, 19K), Margaret Gorski questions the proposed state takeover of federal lands. She proposes that "instead of spending time on a constitutionally questionable proposal, perhaps the county commissioners should establish a collaborative organization to address these issues in positive ways that are inclusive of all viewpoints and vested interests."

America's Great Outdoors:

National Park Service:

DEBATE GROWS OVER WHETHER TO SAVE ISLE ROYALE NATIONAL PARK WOLVES. The [Washington Post](#) (12/19, 4.28M) reports that the gray wolf population has "dropped steadily in recent years" at Isle Royale National Park. According to the article, "eight wolves remained when the last count was taken last winter, the lowest since the 1950s, although a couple of pups are believed to have been born this year." Now, the wolves and

the moose on which the wolves feed are "subjects of the world's longest-running study of a predator-prey relationship in a closed ecosystem, which raises a thorny question for scientists: Should they intervene to preserve the wolves or let nature take its course?" The question is "forcing park managers to make an uncomfortable choice between their traditional hands-off policy toward wildlife and ensuring that Isle Royale continues to have wolves, a point of pride and longtime drawing card for visitors."

Also providing coverage are the [Columbus \(IN\) Republic](#) (12/19, 80K) and [Salon](#) (12/19, 613K).

APPEALS FILED IN WILDE, STURGEON COURT CASES. The Fairbanks (AK) News-Miner (12/19, 44K) reports that "two longtime Alaskans feuding with the federal government about how much clout the feds have on state-owned lands in national parks and preserves have filed appeals in an effort to overturn previous court decisions." According to the article, "appeals on behalf of Jim Wilde and John Sturgeon have been filed with the Ninth Circuit Court of Appeals in Anchorage." Alaska, which "intervened in Sturgeon's case, also is appealing the decision by a U.S. District Court judge that ruled the federal government has the authority to enforce federal regulations on state-owned land located in national parks and preserves."

LAKE POWELL RANGERS SHAVE HEADS TO SUPPORT GIRL IN CHEMO. The [Lake Powell \(AZ\) Chronicle](#) (12/19, 7K) reports that NPS rangers at Lake Powell "recently shaved their heads to show their support for a little girl who lost her hair from chemotherapy treatments." Ashley Fisher, 14, was "diagnosed with a rare form of brain cancer on Halloween." Ashley's sister, who is "also named Ashley, lives in Grenehaven with her significant other, NPS ranger Matt Werner." Werner told Ashley, "When you start losing your hair and go bald, I'm going to go bald too."

Bureau of Land Management:

ATTORNEY SAYS \$5.8 MILLION SETTLEMENT REACHED IN OFF-ROAD RACE CRASH. The [Washington Post](#) (12/18, Press, 4.28M) reports that an agreement has been reached to pay \$5.8 million to the families of eight people killed and 12 injured in a California desert off-road race crash in 2010, a lawyer said Wednesday. Attorney Katherine Harvey-Lee, who represents three injured spectators and the father of one person killed, said the deal was reached in mediation on Tuesday with federal government lawyers. Under the agreement, the BLM would pay \$4.825 million and race organizers and promoters Mojave Desert Racing Inc., and Mojave Desert Racing Productions Inc., would pay their \$1 million insurance policy limit, she said.

The [Los Angeles Times](#) (12/19, Rojas, 3.07M) reports that David Christy, a spokesman for the BLM in California, "called the settlement 'tentative,' meaning it must be approved by the Justice Department before any money can be paid — a process that could take a few months."

Also providing coverage are the [Los Angeles Times](#) (12/18, Rojas, 3.07M), the [San Francisco Chronicle](#) (12/19, Taxin, 2.88M), the [New York Daily News](#) (12/19, Press, 3.94M), the [San Bernardino \(CA\) Sun](#) (12/18, 132K), and [WJBK-TV Detroit](#) (12/19, 83K).

GOLDEN SUNLIGHT SEEKS TO EXPLORE ON BLM LAND. [KBZK-TV](#) Butte, MT (12/19, 785) reports that the BLM says the Golden Sunlight Mine "wants to explore for minerals on land north of the mine's existing pit." The bureau says the "exploration activities will take place on more than five acres of land administered by the agency and would require construction of roads and drill pads."

WILD HORSE ADVOCATE: WILD FREE-ROAMING HORSES AND BURROS ACT UNFULFILLED. For "The Blog" of the [Huffington Post](#) (12/19, Roy, 11.54M), Suzanne Roy, Campaign Director, American Wild Horse Preservation Campaign, write that "the promise" of the Wild Free-Roaming Horses and Burros Act "remains tragically unfulfilled." In 1971, President Nixon observed that "demands of the market for [horses'] processed products, competition for forage used by domestic livestock" and other commercial forces had pushed wild horses and burros to the brink of extinction. She claims that "vested interests remain aligned against the mustangs," and "they have turned the law intended to protect these iconic animals on its head, and are the driving force behind the massive roundup and removal of wild horses and burros from our Western public lands." according to Roy, "the result is a corrupt and devastating federal program that today stockpiles more wild horses in captivity than remain free on the range."

Fish and Wildlife Service:

FWS PROPOSES MOVING WHITE-TAILED DEER FROM PUGET ISLAND. The Wahkiakum County (WA) Eagle (12/19) reports that the FWS is "proposing to translocate up to 35 Columbian white-tailed deer from Puget Island to the Ridgefield National Wildlife Refuge and the Julia Butler Hansen Refuge for the Columbian White-tailed Deer in 2014 and an additional 10-20 deer to Ridgefield NWR in 2015." The agency has "proposed the translocations to promote the recovery of the Columbian white-tailed by stabilizing both the Julia Butler Hansen Refuge and Ridgefield NWR subpopulations."

The Wahkiakum County (WA) Eagle (12/19) reports that Wahkiakum County commissioners have "voiced opposition to a plan to move white-tail deer from Puget Island to US Fish and Wildlife Service Refuges." Commissioners Blair Brady, Dan Cothren and Mike Backman "unanimously voted to send a letter, drafted by Brady, to the Service opposing the proposed translocation."

HUNTERS, FISHERMEN TARGETED BY FWS FOR VIOLATIONS OF LACEY ACT. The Newsmax (12/18, 555K) reports that "law enforcement agencies are conducting thousands of investigations using a law that makes violating state wildlife statutes a federal crime, often ensnaring hunters and fishermen for seemingly minor infractions." According to the article, special agents and wildlife inspectors for the FWS "conduct about 2,500 investigative cases a year of violations of the Lacey Act, a 1900 law meant to combat illegal trafficking of wildlife."

FWS HONORS ALLIANCE FOR PROTECTING ENVIRONMENT. The Williston (ND) Herald (12/19, 18K) reports that the FWS is honoring Alliance Pipeline for its "efforts to reduce impacts to birds and other animal species while providing compensation for native prairie losses." In October, Alliance Pipeline completed "construction on its 80-mile, 12-inch natural gas pipeline in western North Dakota." Carol Aron, a biologist with the FWS, said that "Alliance really stepped up and tried to avoid the North Dakota native habitat."

EXPERTS TO REVIEW TAKING GRAY WOLF OFF THREATENED LIST. KIFI-TV Idaho Falls, ID (12/19, 23K) reports that "a group of experts is reviewing whether the federal proposal to lift more Endangered Species Act protections for the gray wolf is scientifically valid." A research center at the University of California, Santa Barbara, "assembled the experts at the request" of the UFWS to "determine whether the agency used the best available science to conclude that gray wolves no longer need protection." The scientific review is due by the end of January.

Securing America's Energy Future:

Onshore Energy Development:

REPORT SAYS OBAMA HOLDING BACK DEVELOPMENT ON FEDERAL LANDS. The Daily Caller (12/19, Bastasch, 422K) reports that the Obama Administration is "holding back the economy by keeping federal lands off limits to oil and gas production in the midst of an energy boom," according to a new study. The conservative American Action Forum (AAF). Claims that the Obama Administration has "held back energy production on federal lands through long permitting times and keeping more land off-limits to oil and gas drilling."

NOBLE EYES NEVADA FOR MORE OIL DRILLING. The Reno (NV) Gazette-Journal (12/19, 165K) reports that Noble Energy officials "discussed the company's plans this week during a public scoping meeting for the Huntington Valley project" hosted by the BLM's Elko District. According to the article, "Noble recently finished 3-D seismic surveying around Huntington Valley and is planning to drill a few wells once the BLM has signed off on an environmental assessment."

BLM OPENS PUBLIC COMMENT PERIOD ON MCKENZIE PIPELINE PROJECT. The Bismarck (ND) Tribune (12/19, 22K) reports that the BLM North Dakota Field Office has "opened a 30-day public comment period for the proposed Bear Den Phase 2 pipeline project in McKenzie County."

KEMP: OBAMA HAS AUTHORITY TO LIFT BAN ON US OIL EXPORTS. In his column for Reuters (12/19, Kemp), John Kemp writes that President Obama doesn't need the approval of Congress to end the ban on

exporting crude oil. Kemp notes that the Administration may be considering ending the policy, and he cites Energy Secretary Ernest Moniz, who said, "Restrictions on exports were born, as was the Department of Energy and the Strategic Petroleum Reserve, on oil disruptions. ... There are lots of issues in the energy space that deserve some new analysis and examination in the context of what is now an energy world that is no longer like the 1970s." Kemp says that whatever the Administration decides could have an impact on the profits of oil producers and refiners.

Offshore Energy Development:

FORMER BP ENGINEER CONVICTED OF OBSTRUCTING GULF SPILL PROBE. The AP (12/19, Kunzelman) reports that former BP engineer Kurt Mix was convicted on Wednesday of "trying to obstruct investigators by deleting text messages from his cellular phone" during the probe of the 2010 Gulf of Mexico oil spill. Mix, who worked on BP's efforts "to stop the nation's worst offshore oil spill, embraced stunned relatives and friends after jurors convicted him of an obstruction-of-justice charge punishable by up to 20 years in prison." He was acquitted on a second count of the same charge. Attorneys for Mix pledged to appeal his conviction, which the AP calls "a major milestone in an investigation that already has resulted in a guilty plea by BP itself."

McClatchy (12/19, Cockerham, 95K) reports that Acting Assistant Attorney General Mythili Raman said in a written statement, "Today a jury in New Orleans found that Kurt Mix purposefully obstructed the efforts of law enforcement during the investigation of the largest environmental disaster in U.S. history." Federal prosecutors had argued that "after Mix learned in October 2010 that his electronic files were to be collected by a vendor working for BP's lawyers he deleted from his iPhone a text string that contained more than 300 messages with his BP supervisor."

The Los Angeles Times (12/19, Muskal, 3.07M) reports that Mix "is one of four current or former BP employees charged with crimes related to the spill." BP "took corporate responsibility for its role in the catastrophe earlier this year, pleading guilty in January to manslaughter charges and agreeing to pay a record \$4 billion in penalties. 'This prosecution shows the commitment of the Justice Department to hold accountable those who attempt to interfere with the administration of justice,'" Raman said.

Tackling America's Water Challenges:

ADDITIONAL COVERAGE OF BAY DELTA CONSERVATION PLAN. Additional coverage of the Bay Delta Conservation Plan was provided by the [Central Valley \(CA\) Business Times](#) (12/19, 206) and the [Chico \(CA\) Enterprise-Record](#) (12/19, 90K).

YAKIMA COUNTY PRAISED FOR TAKING ACTION IN WATER RIGHTS ALLOCATIONS. The [Yakima \(WA\) Herald-Republic](#) (12/19, 86K) editorializes that Yakima County is "showing foresight in the contentious issue of water allocation, and the result will be a more systematic way to assure water for farmers, fish and future development." The article notes that "a key provision" of the Yakima County Water Resource System is the "creation of a water bank that will allow the rural property owners to acquire existing senior water rights before drilling for water."

KLAMATH BASIN DEAL LAUDED. In an op-ed for the [Eureka \(CA\) Times Standard](#) (12/19, 76K), Mark Hennelly, vice president for legislative affairs and public policy of the California Waterfowl Association, writes that the Klamath Basin deal "provides real hope for our hunting and fishing heritage throughout the watershed." According to Hennelly, "with the new Klamath agreements steelhead and salmon will regain more than 400 miles of habitat, plus improved water quality and flows."

Empowering Native American Communities:

CHAUDHURI APPOINTED TO NATIONAL INDIAN GAMING COMMISSION. The [JD Supra](#) (12/19, 4K) reports that "on September 4, 2013, Jonodev Osceola Chaudhuri, an enrolled member of the Muscogee Creek Nation, was appointed to a three-year term as Associate Commissioner, and on October 28, he was designated Acting Chairman of the National Indian Gaming Commission." Chaudhuri was appointed by Interior Secretary Sally Jewell.

Also providing coverage is the [National Law Review](#) (12/19).

NEW BIA ALASKA REGIONAL DIRECTOR NAMED. The [Indian Country Today Media Network](#) (12/18, 21K) reports that Weldon "Bruce" Loudermilk, who had been serving as the BIA Great Plains Regional director since June 20, 2010, has been named Director of the BIA's Alaska Region based in Anchorage. The announcement was made November 26 by Michael S. Black, director of the BIA, who said he has "full confidence" in Loudermilk, an enrolled member of the Assiniboine and Sioux Tribes of the Fort Peck Indian Reservation in Montana. Assistant Secretary – Indian Affairs Kevin K. Washburn said, "We recognize the importance of identifying and hiring the best candidates to serve tribes, the Alaska Native people and Alaska Native Corporations. Given that BIA regional directors are responsible for ensuring Indian Affairs carries out its mission within their regions, it is my firm belief that we should always be working to attract the best and brightest to these positions."

FEDERAL APPEALS COURT RULES LANSING CASINO PROJECT CAN PROCEED. The [Detroit Free Press](#) (12/19, Vanhulle, 794K) reports that "a three-judge panel of the US 6th Circuit Court of Appeals in Cincinnati has ruled today that a federal district judge in Grand Rapids erred by granting the state an injunction halting the proposed Kewadin Lansing casino because it 'lacked jurisdiction' and based its ruling on 'contingent future events that may never occur.'" Now, the Sault Ste. Marie Tribe of Chippewa Indians can "move forward" with its application to the Interior Department to "have land it bought from the City of Lansing held in trust for gaming."

Also providing coverage is the [Lansing \(MI\) State Journal](#) (12/18, 158K).

NAVAJO NATION COULD RECEIVE \$1 BILLION IN DAMAGES FOR URANIUM CLEANUP. The [Indian Country Today Media Network](#) (12/18, 21K) reports that the Navajo Nation could "net up to \$1 billion for the cleanup of abandoned uranium mines and processing plants in Cove, Arizona and Shiprock, New Mexico, after a bankruptcy judge ruled that Anadarko Petroleum Corp. and Kerr-McGee Corp. are liable for damages." US Bankruptcy Judge Allan L. Gropper held that "Anadarko and Kerr-McGee are liable to the plaintiffs for damages, setting a range for such damages between \$5.1 and \$14.1 billion."

ALASKA NATIVE FOSTER CHILDREN TO RECEIVE FEDERAL HELP. The [Anchorage \(AK\) Daily News](#) (12/18, 198K) reports that Alaska has "entered into an agreement with Tanana Chiefs Conference to provide federal foster care reimbursements for the first time to a tribal consortium in Alaska." Federal officials called the partnership a "historic moment" for tribal child welfare in the state.

SUPPORT FOR CATAWBA CASINO GROWS. The [Shelby \(NC\) Star](#) (12/19, 43K) editorializes that "the outcry of state politicians in Harrah's back pocket has died down as local support" for the proposed Catawba Indian Nation resort and casino "continues to grow." It notes that "there's no set timetable as to when the Department of the Interior will make its decision." The paper hopes "it won't be long before Cleveland County – and the Catawba nation – hit the jackpot."

Top National News:

PRESIDENT'S ADVISORY PANEL RECOMMENDS LIMITS ON NSA SURVEILLANCE. On Wednesday, President Obama met with his Review Group on Intelligence and Communications Technologies as the White House publicly released the panel's 308-page report, which it submitted to the President one week ago. The panel calls for a significant curtailing of National Security Agency surveillance activities, including the termination of the telephone and Internet metadata program. The release receives wide coverage, with reports on all three broadcast networks including the lead story on ABC, and front-page coverage in nearly all the nation's major newspapers. But while the recommendations are seen as significant, most reports note that the panel served in an advisory capacity, and that it will be up to the President to decide which of its 46 proposals, if any, to pursue.

ABC World News (12/18, lead story, 2:45, Sawyer, 7.43M) opened Wednesday evening by reporting that "giant questions about life, liberty and security in America are in the spotlight" after "a group of advisers hand-picked by the President has told him to stop monitoring phone records across this country and to rein in measures used by...the NSA. But the President has said those programs are important in the fight against terror." ABC (Ross) added, "It was another devastating blow for the NSA. Today's report said the NSA's collection of the phone

records of every American should be shut down because it presents a lurking danger of abuse and does not make the country any safer."

On the CBS Evening News (12/18, story 2, 2:20, Pelley, 5.58M), Major Garrett reported, "The panel said the National Security Agency should stop collecting and storing so much data on individual Americans. It suggested the government's willingness to use every new type of surveillance technology has put civil liberties at risk. The panel urged President Obama to place the right to privacy on equal footing with surveillance and counterterrorism investigations. The rise of modern technologies makes it all the more important that democratic nations respect people's fundamental right to privacy, the panel wrote."

On NBC Nightly News (12/18, story 4, 1:10, Williams, 7.86M), Chuck Todd reported the panel "would like to see that it no longer would have the government house the so-called meta phone and Internet data. Let the phone and Internet companies themselves do it. No more blanket court orders for phone and Internet data. Let the government show legal cause for every instance when it needs phone and internet data. Allow private phone companies to make public each time it is forced to turn over data to the company and perhaps take the NSA away from the control of the military and instead have a civilian put in charge."

The AP (12/19, Pace, Dozier) says the White House "authorized the release of the review group's report Wednesday, weeks ahead of schedule." President Obama "was also conducting an internal review of the government's surveillance programs and planned to announce his decisions in January." The Washington Post (12/19, Nakashima, Soltani, 4.28M) says the panel "made 46 recommendations in all, which included moving the NSA's information assurance directorate...outside the agency and under the Department of Defense's cyber policy office." The President "met Wednesday morning with the panel, whose suggestions are advisory only."

The New York Times (12/19, A1, Sanger, Subscription Publication, 9.61M) says "taken together, the recommendations would remove from the N.S.A.'s hands the authority to conduct many of its operations without review by the president, Congress or the courts. But by themselves, they would terminate few programs." USA Today (12/19, A1, Madhani, 5.82M) says the panel also called for amending the section of the Patriot Act that "gives the government broad authority to compel a third party to produce private information relevant to a terrorism investigation," the enacting of legislation "requiring the intelligence community to regularly report to Congress and the American people on business records and metadata collected," and splitting leadership of the NSA and the military's Cyber Command.

On the CBS Evening News (12/18, story 3, 1:15, Miller, 5.58M), correspondent John Miller said, "It's a bit of a shock to the system at the NSA, of course. They had seen the drafts of the report and it goes beyond the telephone program, it talks about certain restructuring of the agency, whether it should be led by a military person or civilian or whether that person could also be head of the cyber command."

The Washington Post (12/19, Rugar, 4.28M) says the five members of the panel are Richard Clarke, "chief counter-terrorism adviser on the National Security Council under presidents Bill Clinton and George W. Bush"; ex-CIA Deputy Director Michael Morell; University of Chicago law professor Geoffrey Stone, who "has written about government secrecy and criticized the makeup of the Foreign Intelligence Surveillance Court" this summer; Cass Sunstein, "an intellectual mentor to the president" and former White House regulatory official; and Georgia Tech professor Peter Swire, Office of Management and Budget chief privacy counselor under President Clinton.

The Wall Street Journal (12/19, A1, Gorman, Barrett, Lee, Subscription Publication, 5.91M), Los Angeles Times (12/19, A1, Dilanian, Parsons, 3.07M), McClatchy (12/19, Clark, Watkins, 95K), and Politico (12/18, Gerstein, 467K) also have reports.

More Commentary. The New York Times (12/19, Subscription Publication, 9.61M) editorializes that the "remarkably thorough and well-reasoned report calling on the government to end its bulk phone-data collection program and to increase both the transparency and accountability of surveillance programs going forward" should be heeded by the President. The Times says "the surveillance programs began before Mr. Obama's presidency, but he allowed them to continue and grow in unprecedented ways." He can "quickly adopt his panel's recommendation and end the ineffective and constitutionally dangerous dragnet surveillance."

Karl Rove writes in his Wall Street Journal (12/19, Subscription Publication, 5.91M) column that in the wake of

the Monday Federal court ruling indicating that the NSA surveillance program is likely unconstitutional, President Obama can and should defend the program and appeal the ruling. While it might hurt him with his base, Rove says it would be an act of true leadership by Obama in defense of the country.

Paul: Obama Has Allowed NSA To Violate The Fourth Amendment. Sen. Rand Paul said on CNN's Situation Room (12/18, 554K), "My reaction is that the judge the other day that said that it was unconstitutional is exactly right. I think even the President's own team now is coming up with recommendations that acknowledge that the President has allowed this to get away from himself. He's allowed the NSA program to be intrusive, go against the Bill of Rights, go against the Fourth Amendment, and even his own team is now recommending that he needs to rein this in. I don't think they go far enough in the sense that I think the Fourth Amendment should protect your personal information and that you do have a right to privacy, whether the papers are in your house or whether they are kept at your bank. I think you do have a right to privacy and we'll continue to fight this."

Paul Says Clapper Damaged US Credibility By Lying To Congress. Sen. Rand Paul said on CNN's Situation Room (12/18, 554K), "I don't think you can give away national security secrets, but at the same time I'm very offend that the [National Intelligence Director James Clapper] lied to Congress which is perjury and punishable by time in jail, and the President has glibly gone on his way, has not asked for his resignation, has not said that he will try him in court for lying to Congress. I find that really – that Clapper is lying to Congress is probably more injurious to our intelligence capabilities than anything Snowden did because Clapper has damaged the credibility of the entire intelligence apparatus and I'm not sure what to believe anymore when they come to Congress."

SENATE PASSES BUDGET COMPROMISE 64-36. While only one network news broadcast covered the Senate's passage on Wednesday of the bipartisan budget agreement, it gets a great deal of print coverage this morning. Generally, the coverage cites the vote as a rare moment of bipartisanship at the end of a relatively unproductive legislative year. However, several reports highlight the fact that the agreement does not eliminate the possibility of a government shutdown and does almost nothing to reduce the national debt or curb the growth of entitlement spending.

NBC Nightly News (12/18, story 5, 0:30, Williams, 7.86M) reported that by a vote of 64-36, the Senate on Wednesday night "passed a budget to fund the Federal government." Lawmakers hope the measure "will avert another shutdown for at least another two years."

The Los Angeles Times (12/19, Mascaro, 3.07M) reports that while the "\$85-billion package is modest in scope," it "represents a rare bipartisan achievement for a divided Congress that has spent the past two years engaged in high-stakes standoffs over government budgets." Under the deal, "spending for 2014 and 2015 will rise by \$63 billion, reversing some across-the-board cuts to defense accounts and social programs that only the most conservative lawmakers wanted to keep."

USA Today (12/19, Davis, 5.82M) reports that nine GOP senators "sided with all 55 members of the Democratic Conference" to pass the measure which was "one of the final legislative acts in what has otherwise been the most unproductive year on record for Congress."

The New York Times (12/19, Weisman, Subscription Publication, 9.61M) reports that the Senate vote, which was "far closer than the overwhelming 332-to-94 vote in the House last week," reflected "the particular politics of the Senate, where a Democrat, Sen. Patty Murray of Washington, was the budget's shepherd and where Republicans facing Tea Party challenges next year or positioning themselves for presidential runs in 2016 opted to oppose it."

Politico (12/19, Kim, 467K) reports that there was "little suspense but still a bit of drama," as Republicans "tried to make noise during the intervening hours of debate before the final budget vote on Wednesday, venting their frustrations about being blocked from offering amendments to the deal."

The Wall Street Journal (12/19, Hook, Subscription Publication, 5.91M) reports that the measure passed despite a late controversy over a provision to slow the growth of pension benefits for military retirees under the age of 62. The provision, which drew vocal opposition from veterans and their supporters.

The AP (12/19, Espo) reports that the vote added "a late dusting of bipartisanship to a year more likely to be

remembered for a partial government shutdown and near-perpetual gridlock." The AP notes that the signature of the President "was assured on the measure, which lawmakers in both parties and at opposite ends of the Capitol said they hoped would curb budget brinkmanship and prevent more shutdowns in the near future."

Roll Call (12/19, Shiner, Subscription Publication, 87K) also reports that the measure lays "the groundwork to avoid government shutdowns over that time period."

However, the Washington Post (12/19, O'Keefe, Montgomery, 4.28M) reports that the measure "does not erase the threat of a government shutdown." Rather, it "merely sets the parameters of federal spending levels; it leaves work on the details up to the House and Senate appropriations committees."

McClatchy (12/19, Lightman, 95K) reports that passage of the budget "virtually assures two years of fiscal stability, though it does virtually nothing to reduce the national debt or curb the growth of Medicare, Social Security or other entitlement programs." McClatchy also notes that it does not "guarantee the government will not shut down again early next year, though that prospect now appears highly unlikely."

The Hill (12/19, Cox, Wasson, 194K) reports that the agreement "falls far short of the 'grand bargain' negotiations held" by President Obama and House Speaker Boehner in 2011, "when significant entitlement cuts and tax hikes were on the table." In addition, it is "well short of the \$4 trillion deal that many deficit hawks say is necessary to tame the national debt." The Hill also notes that it "does little to change the trajectory of federal deficits, which have declined with an improving economy but are slated to expand in the long run as Medicare and Medicaid costs rise higher."

Bloomberg News (12/19, Hunter, Przybyla, 1.91M) reports that before the vote, Senate Budget Chairman Patty Murray, who negotiated the agreement with House Budget Chairman Paul Ryan, said of the agreement, "It is not going to solve every problem but it is a step in the right direction and a dramatic improvement over the status quo. ... The American people are sick and tired of the constant crises we see out of Washington." After the vote, Ryan said, "This vote shows both parties – in both chambers – can find common ground. ... This bill is only a small step. We need to do a lot more. But it's a small step in the right direction."

The Washington Post (12/19, Klein, 4.28M) reports that Murray "persuaded her fellow Democrats to vote for the deal." In a document Murray "has been circulating among Senate Democrats," she makes a case that "Democrats got a bit and gave up very little." She argues that Democrats "preserved their fundamental negotiating positions: no changes to entitlements absent tax increases, no changes to sequestration without revenues, no restoration of defense spending without unwinding an equal restoration of domestic spending."

Budget Deal Will Cost States \$415 Million In Oil And Gas Royalties. The AP (12/19, Daly) reports that according to the CBO, the budget deal "will cost Wyoming, New Mexico and other states \$415 million in lost oil and gas royalties over the next decade." Legislation implementing the deal "makes permanent an effective 51-49 percent split that favors the federal government in dividing the 12.5 percent royalty collected from energy companies on oil and gas production on federal land." Rep. Cynthia Lummis (R-WY) said, "By perpetuating the policy of taxing mineral-producing states to pay for federal government bureaucracy, the deal unfairly burdens Wyoming to support increased spending in Washington. ... We need real cuts and real savings now, not more promises of cuts and savings years from now."

Bernanke Signs Of Cooperation On Budget Deal Could Help Economy. The Wall Street Journal (12/19, Morath, Sparshott, 5.91M) reports that Fed Chairman Ben Bernanke welcomed the budget agreement, saying the indications of cooperation in Congress could help increase confidence in the economy. Bernanke said, "Relative to where we were in September and October, it certainly is nice there has been a bipartisan deal," adding, "Even if the outcomes are small, as this one was, it's a good thing that they are working cooperatively and making some progress."

Budget Deal Said To Provide Some Stability For Federal Employees. In his "Federal Diary" column for the Washington Post (12/19, Davidson, 4.28M), Joe Davidson writes that the budget agreement allows "a 1 percent pay raise for most federal workers and some stability for a workforce that repeatedly had been threatened with government shutdown." However, "it does not eliminate the possibility of agencies cutting their staffs through buyouts, early retirements and even layoffs."

CITING IMPROVED ECONOMIC OUTLOOK, FED ANNOUNCES \$10 BILLION MONTHLY STIMULUS TAPER.

The announcement from the Federal Reserve that it will cut back on its monthly bond purchases generated a great deal of coverage suggesting that the shift is an affirmation that the current US recovery is gaining momentum. For instance, at the opening of the CBS Evening News (12/18, lead story, 2:45, 5.58M), Scott Pelley reported that "after years of extraordinary measures to keep the economy from plunging into a depression, the Federal Reserve said it will now ease up on its stimulus program" because "the job market has improved." Likewise, the AP (12/19, Crutsinger) reports that the Fed "has sent its strongest signal of confidence in the U.S. economy since the Great Recession struck six years ago,"

The Washington Post (12/19, 4.28M), in an editorial, says the Fed has given a "sign of confidence that the economy is starting to stand on its own two feet." The Post goes on to give some credit for the improved outlook to the budget deal reached last week by Senate Budget Chairman Murray and House Budget Chairman Paul Ryan. However, the Post's emphasis on fiscal policy and the legislative process is not reflective of the bulk of analyses last night and this morning, most of which contain no references to Congress or the Administration.

On the CBS Evening News (12/18, lead story, 2:45, 5.58M), correspondent Anthony Mason reported that "unemployment has fallen from 8.1%, when the latest round of stimulus started in 2012 to 7%...a five-year low," and "2.9 million jobs were created during that time." According to Mason, the Fed "will still be stimulating the economy...but it's cutting back the amount from \$85 billion in bond purchases to \$75 billion next month." Fed chairman Ben Bernanke: "Today's policy actions reflect the committee's assessment that the economy is continuing to make progress, but that it also has much farther to travel before conditions can be judged normal."

Diane Sawyer, on ABC World News (12/18, story 2, 1:10, 7.43M), noted that that the Dow Jones Industrial Average "closed up nearly 300 points because of what...Bernanke revealed about the strength of the American economy." Rebecca Jarvis went on to report that the Fed "believe[s] the unemployment rate could drop next year as low as 6.3%."

CNBC's Sue Herrerra, offering a more negative assessment of the nation's unemployment numbers for NBC Nightly News (12/18, story 2, 2:00, Williams, 7.86M), said, "A lot of people on Wall Street think perhaps the Fed was premature, that the economy as Wall Street sees it, and as Washington sees its, may look pretty healthy, or healthier than before," but "if you're on Main Street, it's very iffy." According to Herrerra, "We have a record number of people unemployed," including "people who have been looking for work for so long that they are now discouraged" and have "stopped looking for work." CNBC (12/19, Park, 1.52M) reported that on Wednesday, Bernanke said "the recovery remains 'far from complete.'"

According to the AP (12/19, Crutsinger), Bernanke successfully "managed a delicate balance" as he "announced a...long-feared pullback in the Fed's stimulus," and, at the same time, "convinc[ed] investors that the Fed would continue to bolster the economy indefinitely." The AP notes that the Fed "strengthened its commitment to record-low short-term rates" by pledging to "hold its key short-term rate near zero 'well past' the time when unemployment falls below 6.5 percent."

The Wall Street Journal (12/19, Mcgrane, Hilsenrath, Subscription Publication, 5.91M) covers the Fed shift in a front-page article under the headline "Fed Dials Back Bond Buying, Keeps a Wary Eye on Growth," reports that Bernanke made clear that the Fed retains the flexibility to suspend the tapering if events warrant it. The Journal also notes that Bernanke said his successor, Fed Vice Chair Janet Yellen, "fully supports what we did today." Bernanke is quoted as saying, "In light of the cumulative progress toward maximum employment and the improvement in the outlook for labor market conditions, the Committee decided to modestly reduce the pace of its asset purchases."

Another article from the Wall Street Journal (12/19, Mcgrane, Subscription Publication, 5.91M) emphasizes that it will now be up to Yellen, for the most part, to judge whether or not the economy can sustain additional tapering or an interest rate hike. According to the Journal, Sen. Joe Manchin, who voted against Yellen's nomination as a member of the Senate Banking Committee, called her on Wednesday to tell her he would back her when the full Senate votes as a result of her support for the decision to begin to taper.

The Washington Post (12/19, Mui, 4.28M) calls the \$10 billion monthly bond-buying reduction "a small but

symbolic first step toward unwinding" the Fed's "unprecedented support of the economy," and notes that Bernanke himself referred to the shift as a "modest reduction." The Post reports that the Fed "has been buying \$40 billion worth of mortgage-backed securities and \$45 billion in Treasury bonds" monthly, and now "will reduce purchases of each by \$5 billion." McClatchy (12/19, Hall, 95K) reports that Mark Zandi, Moody's Analytics' chief economist, said, "It's a dovish taper. ... The Fed is on track to end (stimulus) by the fall of 2014 and begin raising interest rates by the fall of 2015."

According to the AP (12/19, Rugaber), the Fed "has had more success with the unemployment rate, which has fallen more than a percentage point to 7 percent since the Fed launched its bond-buying program last year," than with the inflation rate, which has "declined since then and remains far below the Fed's 2 percent target."

The New York Times (12/19, A1, Appelbaum, Subscription Publication, 9.61M), in a front-page article, says the policies announced by Bernanke are the "result of a compromise that has been months in the making between a group of officials convinced that the economy needs more help, and a range of internal critics who regarded the bond-buying campaign as ineffective or dangerous." The Times says there is "now...a clear – though tentative – schedule for the course of Fed policy over the next two years, including an end to asset purchases by late next year and a signal from Mr. Bernanke that the first increase in short-term interest rates is not likely to come until near the end of 2015." The Time notes that the "compromise" is backed by Esther George, president of the Kansas City Fed, "who has dissented at each previous meeting this year over concerns that the Fed was doing too much," but "drew a dissent from" Boston Fed President Eric Rosengren, "who called it premature."

Bloomberg News (12/19, Zumbrun, 1.91M) quotes Rosengren as saying the tapering is "premature until incoming data more clearly indicate that economic growth is likely to be sustained above its potential rate." Bloomberg also reports that Chris Rupkey, chief financial economist at Bank of Tokyo-Mitsubishi UFJ Ltd. in New York, said, "The Fed exit has begun, and the economy will guide how quickly they continue to cut back their stimulus." Rupkey added, "They changed the direction...and once they started this step, history tells you, they won't reverse it."

According to Politico (12/19, Lee, 467K), "analysts" say the Fed's shift "is the result of several positive economic indicators since September, when many Fed watchers were surprised by the announcement to hold off on tapering." Politico adds that "the budget agreement that emerged...this month has also helped to create a more stable political environment in Washington since September, when markets were rattled by the possibility of a government shutdown as well as a potential debt default." Carl Riccadonna, a senior economist with Deutsche Bank, is quoted as saying, "They didn't want to be tapering asset purchases and then have the economy slump due to the government shutdown."

Dana Milbank of the Washington Post (12/19, Milbank, 4.28M) blames fiscally conservative Republicans for slowing the pace of growth in the US since the GOP took control of the House.

US Stock Indices Spike On News From The Fed. On the CBS Evening News (12/18, lead story, 2:45, 5.58M), Scott Pelley said, "Wall Street's been anticipating this decision" from the Fed "for months and when it came...stock prices soared." The Los Angeles Times (12/19, Tangel, 3.07M) reports that US stocks "rallied nearly 2% after the Federal Reserve announced it would begin scaling back its stimulus program early next year." For the day, the DJIA "added 292.71, gaining 1.8% to 16,167.97"; the S&P 500 "rose 29.65 points, or 1.7%, to 1,810.65" and the Nasdaq "rose 46.38 points, or 1.2%, to 4,070.06." The AP (12/19, Sweet) reports that while "some investors had worried about a decline in stocks once the market got less rocket fuel," the Bernanke's reassurances eased those fears, leading to Wednesday's rally.

The Wall Street Journal (12/19, A1, Browning, Subscription Publication, 5.91M) covers Wednesday's rally in a front-page article under the headline "Relieved Investors Cheer Fed Move: Soaring Stock Market Is Sign of Investor Hopes for Recovering Economy." USA Today (12/19, Waggoner, 5.82M) reports that "the bond market reacted calmly to the Fed's announcement" as the "10-year T-note yield, which closed at 2.84% Tuesday, crept up to 2.90% just after the 2 p.m. Fed announcement," and "then...fell to 2.82% before closing at 2.89%."

The Wall Street Journal (12/19, Subscription Publication, 5.91M), in an editorial, says it remains to be seen how the market will react to more substantial tapering in the future.

Fed Delaying Bank Leverage Limits Until Basel Deal Finished: Sources. Bloomberg News (12/19, Hamilton, 1.91M) reports that sources say the Fed has decided to “delay imposing limits on leverage at eight of the biggest U.S. financial institutions until a global agreement is completed.” Officials intend to “wait for a finished rule from the Basel Committee on Banking Supervision before completing their own requirement for how much capital U.S. banks must hold as a percentage of all assets on their books,” they said. Bloomberg News explains that the international agreement is “shaping up as weaker in some respects than the U.S. plan.” The sources added that the FDIC and OCC had “favored finishing a U.S. rule by year’s end,” and the Fed’s “wait-and-see position is aligned with groups representing the banking industry, who have argued for a delay on grounds that the regulations should be consistent.”

Editorial Wrap-Up:

NEW YORK TIMES. “Turn Off The Data Vacuum.” The New York Times (12/19, Subscription Publication, 9.61M) editorializes that the “remarkably thorough and well-reasoned report calling on the government to end its bulk phone-data collection program and to increase both the transparency and accountability of surveillance programs going forward” should be heeded by the President. The Times says “the surveillance programs began before Mr. Obama’s presidency, but he allowed them to continue and grow in unprecedented ways.” He can “quickly adopt his panel’s recommendation and end the ineffective and constitutionally dangerous dragnet surveillance.”

“An Epidemic Of Attention Deficit Disorder.” The New York Times (12/19, Subscription Publication, 9.61M) writes in an editorial that “the hard-sell campaign by drug companies to drive up diagnoses of attention deficit hyperactivity disorder, or A.D.H.D., and sales of drugs to treat it is disturbing. The campaign focused initially on children but is now turning toward adults, who provide a potentially larger market.” The Times says “a small percentage of children” actually have ADHD, but “many medical professionals benefit from overprescribing.” The Times calls on both the FDA and the Federal Trade Commission to take “more aggressive action.”

“Tunisia’s Reawakening.” An editorial in the New York Times (12/19, Subscription Publication, 9.61M) says that with a deal between Tunisia’s ruling Islamists and opposition parties to install a caretaker administration until elections can be held reports, Tunisia, which three years ago was responsible for setting off the Arab Spring, “could now show the way to get the transitions to democracy back on track.” The Post notes that “three years after it inspired the citizens of other Arab nations to seek a better deal from their leaders, Tunisians can show that political compromise is possible.”

WASHINGTON POST. “The Fed’s Case For ‘Tapering.’” The Washington Post (12/19, 4.28M), in an editorial, says the Fed has given a “sign of confidence that the economy is starting to stand on its own two feet.” The Post goes on to give some credit for the improved outlook to the budget deal reached last week by Senate Budget Chairman Patty Murray and House Budget Chairman Paul Ryan. However, the Post’s emphasis on fiscal policy and the legislative process is not reflective of most of the other analyses last night and this morning, most of which contain no references to Congress or the Administration.

“Buying Time In Ukraine.” An editorial in the Washington Post (12/19, 4.28M) argues that the Russian aid package to Ukraine helps Vladimir Putin and Viktor Yanukovich move “toward realizing their short-term political ambitions,” it does so “at the long-term expense of Russia and Ukraine.” The Post argues that “the attempt to create an alternative empire of autocracy and corruption in the center of 21st-century Europe will collapse of its own weight,” and the EU and the US “can speed that process by sticking to the principles to which they tried to hold Mr. Yanukovich in exchange for the association agreement with the European Union.” The Post calls Putin’s “bid for Ukraine...a zero-sum game borrowed from another century,” and argues that the West “should have a strategy that looks past thuggish Russian and Ukrainian rulers and invests in Ukraine’s future.”

“Park It.” In an editorial, the Washington Post (12/19, 4.28M) calls on the D.C. City Council to approve proposed new campaign laws that will restrict bundled campaign contributions.

WALL STREET JOURNAL. “National Lampoon’s ObamaCare Vacation.” The Wall Street Journal (12/19, Subscription Publication, 5.91M) says in an editorial that April Todd-Malmlov, the head of Minnesota’s health insurance exchange, took a two-week vacation to Costa Rica amid the problems with Minnesota’s site. The

Journal wonders if HHS Secretary Sebelius should follow the four state exchange heads into retirement.

"Bernanke Pulls The Trigger." The Wall Street Journal (12/19, Subscription Publication, 5.91M), in an editorial, says it remains to be seen how the market will react to more substantial Fed tapering in the future.

"China's Space Ambitions." The Wall Street Journal (12/19, Subscription Publication, 5.91M), in an editorial, congratulates China for landing its peaceful Jade Rabbit rover on the moon, especially because it contrasts with the country's military space program. With the US potentially vulnerable to asymmetric warfare in space, the editors note the US will still have to watch China's military activities even if this mission is only scientific in nature.

Washington Schedule:

TODAY'S EVENTS IN WASHINGTON.

White House:

PRESIDENT OBAMA — Receives the Daily Presidential Briefing, Oval Office, closed press.

VICE PRESIDENT BIDEN — Participates in meeting with senior advisors via teleconference, Wilmington, Delaware.

MICHELLE OBAMA — Visits Joint Base Anacostia-Bolling where she will deliver toys and gifts donated by Executive Office of the President staff to the Marine Corps Toys for Tots Campaign; visits with Toys for Tots volunteers and other military personnel, open press.

US Senate: 11:15 a.m. DURBIN, REED, WARREN – STUDENT LOANS — Press conference call outlining legislation outlook for 2014 to bring fairness to students with Senator Dick Durbin (D-IL); Senator Jack Reed (D-RI); Senator Elizabeth Warren (D-MA).

9:30 a.m. ENERGY AND NATURAL RESOURCES — Business meeting is to consider the following bills: S.37, a bill to sustain the economic development and recreational use of National Forest System land and other public land in the State of Montana, to add certain land to the National Wilderness Preservation System, to release certain wilderness study areas, to designate new areas for recreation, and for other purposes; S.404, a bill to preserve the Green Mountain Lookout in the Glacier Peak Wilderness of the Mount Baker-Snoqualmie National Forest; S.974, a bill to provide for certain land conveyances in the State of Nevada, and for other purposes; S.1237, a bill to improve the administration of programs in the insular areas, and for other purposes; S.1300, a bill to amend the Healthy Forests Restoration Act of 2003 to provide for the conduct of stewardship end result contracting projects; S.1301, a bill to provide for the restoration of forest landscapes, protection of old growth forests, and management of national forests in the eastside forests of the State of Oregon; S.1341, a bill to modify the Forest Service Recreation Residence Program as the program applies to units of the National Forest System derived from the public domain by implementing a simple, equitable, and predictable procedure for determining cabin user fees, and for other purposes; S.1491, a bill to amend the Energy Independence and Security Act of 2007 to improve United States-Israel energy cooperation, and for other purposes; H.R. 1158, an act to direct the Secretary of the Interior to continue stocking fish in certain lakes in the North Cascades National Park, Ross Lake National Recreation Area, and Lake Chelan National Recreation Area; H.R. 2337, an act to provide for the conveyance of the Forest Service Lake Hill Administrative Site in Summit. Location: 366 Dirksen.

10 a.m. JUDICIARY — Executive Business Meeting. Judicial nominations, including Peter Joseph Kadzik, to be an Assistant Attorney General. Also, S.619, Justice Safety Valve Act of 2013; S.1410, Smarter Sentencing Act of 2013; S.1675, Recidivism Reduction and Public Safety Act of 2013; S.975, Court-Appointed Guardian Accountability and Senior Protection Act. Location: 226 Dirksen.

2:30 p.m. INTELLIGENCE — Closed hearings to examine certain intelligence matters. Location: 219 Hart.
 US House: No Scheduled Events.

Other: Dec. 16 – 20. U.S. – EU TRADE TALKS — The Office of the United States Trade Representative hosts EU and US negotiators for the third round of talks on a planned Transatlantic Trade and Investment Partnership (TTIP) in Washington D.C. between 16 and 20 December 2013. UPDATE: The US Trade Commission has indicated that the Thursday meeting is in China. Press briefing on Friday will be in Washington, DC.

WILSON CENTER – AMBASSADOR SHANNON — 10 a.m. A Conversation with Ambassador Thomas A. Shannon. Opening remarks: Jane Harman, Director, President and CEO, Wilson Center. Introduction:

Ambassador Anthony S. Harrington, President and CEO, Albright Stonebridge Group and Chairman of Brazil Institute Advisory Board. Keynote: Ambassador Thomas A. Shannon, Senior Advisor to the Secretary of State. Moderator: Paulo Sotero, Director, Brazil Institute, Wilson Center. Media RSVP to michael.darden@wilsoncenter.org. Media bringing heavy electronics MUST indicate this in their response so they may be cleared through our building security and allowed entrance. Location: Woodrow Wilson Center at the Ronald Reagan Building, 1300 Pennsylvania Ave., NW.

ATLANTIC COUNCIL – SEN. MCCAIN – UKRAINE — 11:30 a.m. Sen. John McCain (R-AZ) will deliver remarks on “Ukraine’s Inflection Point: U.S. Strategy Toward Europe’s East” at the Atlantic Council. (This past weekend, Sen. McCain spoke to the mass protest at Independence Square in Kiev and met with Ukrainian government officials, opposition leaders and members of civil society.) Location: 1030 15th Street NW, 12th Floor.

SECRETARY LEW – PHILIPPINES — 4 p.m. Treasury Secretary Jacob J. Lew meets with Secretary of the Philippine Department of Finance Cesar Purisima to discuss policies to boost regional and global growth, and reconstruction plans in the aftermath of Typhoon Yolanda. Secretary Lew and Finance Secretary Purisima will deliver statements to members of the media at the conclusion of the meeting. Location: U.S. Department of the Treasury, Diplomatic Reception Room, 1500 Pennsylvania Avenue, NW.

Last Laughs:

LATE NIGHT POLITICAL HUMOR.

Jay Leno: “And President Obama has named a top former Microsoft executive to run and fix the Obamacare website. Hey, how about fixing Windows first? Can you start there?”

Jay Leno: “University of Colorado officials have ordered a Boulder professor to stop teaching a course in deviant behavior. I didn’t even know you could get a degree in deviant behavior. I mean, where are you going to find a job? Besides Congress.”

- + Today's Events In Washington.

LAST LAUGHS:

- + Late Night Political Humor.

DOI in the News:

SEN. REID WARNS REPUBLICANS AGAINST BLOCKING NOMINATIONS. Roll Call (12/20, Lesniewski, Subscription Publication, 87K) reports that Senate Majority Leader Reid has lined up 10 nominees for votes this week before the chamber adjourns for Christmas. In addition, Reid said that about 30 nominees for State posts are slated for confirmation this week. Regarding the GOP's ability to delay nominees, Reid said, "If there is a particular issue with someone, I can understand that, but to hold everybody up is ... we can't allow that to happen anymore." Roll Call says that "seemed to be a bit of a warning against any senator objecting to the entirety of the more routine nominations package that usually clears without any fanfare by unanimous consent at the end of a session."

Meanwhile, *The Hill* (12/20, 194K) reports that Senate Republicans “will let their rank-and-file members leave town for the Christmas break, leaving Democrats to vote around the clock to confirm the latest batch of President Obama’s nominees.” Republicans “decided at a meeting Thursday afternoon that they will not yield back any time on the Defense authorization bill or expedite consideration of any of Obama’s nominees.”

Roll Call (12/20, Shiner, Lesniewski, Subscription Publication, 87K) similarly reports that while the Senate will vote on pending nominations through the weekend, “just don’t expect most Republicans to be there for it.” *Roll Call* says that “many” Republicans, angered by the filibuster rules changes, are “planning to hit the exits for Christmas after Thursday night’s 11:15 defense bill vote.”

Kornze’s Experience Questioned. The *Mineweb* (12/20, 114) reports that Neil Kornze is “finding his nomination” as the next BLM director is “anything but a fait accompli as far as the Senate Energy and Natural Resources is concerned.” Interior Secretary Sally Jewell has “praised Kornze for helping ‘implement forward-looking reforms at the BLM to promote energy development in areas of minimal conflict, drive landscape-level planning efforts, and dramatically expand the agency’s use of technology to speed up the process for energy permitting.’” However, Sen. John Barrasso “suggested Kornze lacks the experience required for the position of BLM director.”

Suh’s Background Questioned. The *Washington Free Beacon* (12/20, 37K) reports that Rhea Suh, a nominee to lead Interior’s fish and wildlife and parks division, “helped create a financing apparatus that has steered hundreds of millions of dollars to some of the nation’s most prominent environmentalist groups.” Before joining the Obama Administration, Suh “worked at a number of left-wing foundations whose support for radical environmentalist groups has some senators concerned that she would work to stymie fossil fuel production if confirmed.” At a confirmation hearing on Monday, Sen. John Barrasso asked Suh, “Given your lifetime of funding activist groups opposing natural gas production, how can the members of this committee suddenly expect you to change your views if you’re confirmed?”

DEMOCRATS PRESS INTERIOR TO HIKE ROYALTY RATES. The *National Journal* (12/20, Subscription Publication, 427K) reports that Democrats are pushing the Interior Department to “force energy companies to send more money to the government when they produce coal, oil, and natural gas on federal lands.” The Bicameral Task Force on Climate Change said “in a report that Interior’s current policies ‘effectively subsidize fossil-fuel development on public land’ with royalty rates that are too low and coal lease terms that are too generous.” The report issued Thursday stated, “These policies are counterproductive to the goals of the President’s Climate Action Plan because they subsidize a high-carbon energy source at the very time the US needs to reduce its carbon pollution and because they fail to provide taxpayers with a proper return on these publicly owned mineral resources.”

Additional coverage of royalty rates was provided by *Government Executive* (12/20, 28K) and the *Akron (OH) Beacon Journal* (12/20, 325K).

Bicameral Task Force on Climate Change Calls For Coal Leasing Reform. The *Grist* (12/20, 25K) reports that the Bicameral Task Force on Climate Change also “released several recommendations for the Department of Interior to support President Obama’s Climate Action Plan, including a call to reform the federal coal leasing program.”

SECRETARY JEWELL ANNOUNCES FUNDING FOR ALASKA CLIMATE CENTER RESEARCH. The *Alaska Dispatch* (12/19, 7K) reports that Interior Secretary Sally Jewell announced on Thursday funding for several studies at the Alaska Climate Science Center. The center will “share more than \$130,000 with two other Interior offices to help pay for studies into moth infestations of Southcentral Alaska berry crops and potential climate vulnerabilities of eulachon.”

LAWSUIT FILED OVER DESERT TORTOISE LAND DISPUTE. The *St. George (UT) News* (12/19, 3K) reports that in a “complaint filed Sept. 20 in the US District Court for Utah, Washington County is being sued by a private land developer who, in 1995, volunteered to commit 2,440 acres of his own land into the Red Cliff’s Desert Tortoise Reserve.” The land developer, James Doyle, “claims that for 18 years the county has failed to meet its obligation to facilitate a deal with the federal government to either purchase Doyle’s land outright, or to exchange it for land of similar value.” In addition to Washington County, Doyle is suing the BLM, the FWS, and Interior

Secretary Sally Jewell. Doyle "claims that both federal and local governments have not followed through on their promises and, as a result, Doyle has been ruined, financially."

PODESTA TO HELP WHITE HOUSE FOCUS ON CLIMATE CHANGE. The "Wonkblog" of the Washington Post (12/20, Plumer, 4.28M) reports that John Podesta, the newest adviser to President Obama, "will reportedly push the White House to focus more heavily on climate change in the coming year," according to a report by Politico which said, "With chances of major legislation on climate change all but dead given congressional opposition, Podesta will push for aggressive executive action, in addition to backstopping new Environmental Protection Agency chief Gina McCarthy on controversial new emissions guidelines for power plants." The piece goes on to lay out what Podesta may have hand in including increased efficiency standards and more pollution rules.

The Bloomberg BNA (12/20, 7K) reports that "even as President Barack Obama promises to implement aggressive regulatory measures to rein in climate change domestically, this year his administration used the same regulatory authority to quietly position the US to become a global leader in fossil fuel exports." According to the article, "in a series of decisions made by regulators under" oversight of the White House Council on Environmental Quality, "proposals for projects to export—for the first time in US history—huge amounts of coal to Asia and liquefied natural gas globally are being evaluated without a comprehensive analysis of the impact of exporting on climate change."

For USA Today (12/19, Yonk, Hansen, 5.82M), Ryan M. Yonk, an assistant professor of political science at Southern Utah University, and Megan E. Hansen, a policy analyst at Strata Policy, write that "earlier this month, President Obama issued a memo to the heads of executive departments and agencies, laying out his administration's new goals for renewable energy." The White House "directive calls for agencies to double their use of renewable electricity, which includes sources like 'hydrokinetic renewable energy' derived from lakes, rivers, and man-made channels." However, Yonk and Hansen argue that "to accomplish this noble goal, onerous government regulations may end up being the administration's own worst enemy."

ADDITIONAL COVERAGE: LAWMAKER PROPOSES NOAA MOVE TO INTERIOR. Additional coverage of the bill introduced by Sen. Richard Burr that would move NOAA from the Department of Commerce to the Department of Interior was provided by the "Capital Weather Gang" blog of the [Washington Post](#) (12/20, Samenow, 4.28M).

ADDITIONAL COVERAGE OF SEN. COBURN'S "WASTEBOOK." In a piece appearing on [Yahoo!](#) (12/20, Pappas, Writer, 17.91M), Stephanie Pappas writes that "the leading causes of death for wildlife biologists on the job" are small-plane crashes. According to Pappas, "that's one reason" the USGS is "turning toward a technology more associated with military reconnaissance than conservation for its field studies." She notes that the "program got a splash of bad publicity on Tuesday (Dec. 17) when Sen. Tom Coburn (R-Okla.) included the USGS drones as an example of government waste in his 2013 'Wastebook,' dismissing the research as 'counting sheep' instead of focusing on more-crucial flood gauges." However, Matthew Larsen, the associate director of Climate & Land Use Change at the USGS, said that the drones "conduct crucial research," and "actually represent a cheaper way to do that research than ever before."

For [FOX News](#) (12/19, 6.72M), Cathy Maxwell, a military veteran and author, suggests that "perhaps instead of a 'Wastebook,' we need to have a national dialogue on Senator Coburn's more meaningful question – 'what services and missions should our federal government support?'" For example, Maxwell asks, "When we are so deeply in debt, should the Department of the Interior fund grants to track animal behavior in our environment?"

FIRST LADY URGED TO SUPPORT USING LAND AND WATER CONSERVATION FUND FOR CREATING PARKS. In an op-ed for the [San Gabriel Valley \(CA\) Tribune](#) (12/20, Faustinos, 128K), Belinda Faustinos, an advocate for the San Gabriel Mountains Forever campaign, writes that "it is critical we do what we can to ensure our children have access to outdoor recreation – for the good of their health and the necessary inspiration to help preserve our natural and cultural heritage for their own kids someday." She notes that Interior Secretary Sally Jewell, has said, "Engaging with America's youth through the great outdoors helps lay the foundation for the next generation of our nation's stewards, scientists, business leaders, teachers, and others who will understand the key role that national parks and public lands and waters play in conservation and preservation of our nation's treasures." She applauds several national health and youth organizations for sending "a letter to First Lady Michelle Obama earlier this year, inviting her to champion a key tool for creating urban parks and protecting our

Great Outdoors: the Land and Water Conservation Fund.”

The piece also appears in the [Pasadena \(CA\) Star-News](#) (12/19, Faustinos, 81K).

NEW ALLIANCE OF LATINO RELIGIOUS LEADERS SUPPORTS CONSERVATION. For “The Blog” of the [Huffington Post](#) (12/20, Arce, 11.54M), Maite Arce, Executive Director, Hispanic Access Foundation, writes that “a new alliance of Latino faith leaders” agrees with Interior Secretary Sally Jewell’s pronouncement that “it’s important to think about what conservation legacy we will leave for the next 50 years, for the next 100 years.” The faith leaders “point to the Bible as evidence of this responsibility.” According to Arce, “the new alliance will educate and engage local congregations, the media and policy-makers.”

America’s Great Outdoors:

National Park Service:

NPS CONTINUES TO DECLINE IN RANKING FOR BEST PLACE TO WORK IN GOVERNMENT. The [Sierra \(CA\) Sun Times](#) (12/20) reports that “the 2013 Best Places to Work data present a disturbing picture of federal employees throughout the government who are increasingly dissatisfied with their jobs and workplaces.” According to the article, “government-wide, the federal employee job satisfaction and commitment level dropped for the third year in a row, tumbling 3 points to a score of 57.8 on a scale of 100.” Notably, the index score of the NPS dropped from 61.3 in 2013 to 55.1 in 2012.

NPS WORKING ON TRIBAL NATIONAL PARK DRAFT LEGISLATION. The [Sioux City \(IA\) Journal](#) (12/20, 15K) reports that NPS officials are “working on the creation of a tribal national park in South Dakota say they hope by early next year to complete draft legislation to eventually bring to Congress for approval.” The NPS and the Oglala Sioux Tribe have been “working on making the South Unit of Badlands National Park into the first tribally managed national park in the country.” NPS officials “met with tribal officials in Rapid City on Wednesday to further discussions.”

The [Rapid City \(SD\) Journal](#) (12/20, 103K) reports that the meeting “took a different track when several tribal members came loaded with questions about the plan to create the park within the boundaries of the South Unit of Badlands National Park and reintroduce buffalo.”

Also providing coverage is the [Sioux Falls \(SD\) Argus Leader](#) (12/19, 116K).

ENVIRONMENTAL GROUPS URGE FEDERAL COURT TO DENY DRAKES BAY OYSTER COMPANY’S CASE. The [Santa Rosa \(CA\) Press Democrat](#) (12/19, 156K) reports that in the latest federal court brief filed in the Drakes Bay Oyster Company case, four environmental groups said that the farm “has no place in an area designated by Congress as potential wilderness.” According to the article, “citing the company’s use of 95 wooden racks that cover seven acres of Drakes Estero, motorboat use and the planting of ‘millions of non-native oysters and clams,’ the 22-page brief urged the 9th Circuit US Court of Appeals in San Francisco to deny a rehearing of the long-running case.” The brief filed by the Environmental Action Committee of West Marin, Save Our Seashore and two national organizations stated, “It is beyond question that these structures and commercial activities are incompatible with wilderness status.”

FIRE ISLAND NATIONAL SEASHORE RECEIVES \$1 MILLION TO STUDY BREACH. [Newsday](#) (12/20, 1.52M) reports that Fire Island National Seashore has “received a federal grant for about \$1 million to study options for the breach that formed in a wilderness area when superstorm Sandy struck last year.” Seashore Superintendent Chris Soller said the environmental impact statement will “evaluate several options for the breach, including monitoring and closing it immediately if it appears to pose a danger.” The grant was awarded by the Department of Interior using Sandy aid money.

FEWER STAFF MEANS FEWER OFFERINGS AT OLYMPIC NATIONAL PARK. The [Kitsap \(WA\) Sun](#) (12/19, 91K) reports that “fewer park employees mean Olympic National Park will have fewer winter offerings this year.” For instance, “Hurricane Ridge — a popular destination during the weeks around Christmas and New Year’s — will stick to a scaled-back Friday through Sunday schedule.” Park spokeswoman Barb Maynes said, “We would

have liked to be open all next week, but we're trying to conserve funds to be open as much as possible during the summer."

FROMM BROTHERS FARM ADDED TO NATIONAL REGISTER OF HISTORIC PLACES. The Wausau (WI) Daily Herald (12/19, 71K) reports that the Fromm Brothers Fur and Ginseng Farm has been added to the National Register of Historic Places.

NPS CRITICIZED OVER HANDLING OF PUBLIC RECORDS RELATED TO MOUNT VERNON CLOSING. In an op-ed for the Seattle Times (12/20, Trejbal, 1M), Christian Trejbal, the open government chairman for the Association of Opinion Journalists, writes that in recent years, "sunlight is on the defensive against government agencies and lawmakers who fear disclosure and seek to allow greater secrecy." Trejbal notes that "when a writer for National Review Online asked the National Park Service for public records related to closing George Washington's Mount Vernon home during the recent federal government shutdown, she hit a wall." He argues that "if officials are embarrassed to let the public know how they reach decisions, they should reconsider whether they are making the right ones."

Bureau of Land Management:

SEN. TESTER'S FOREST BILL PASSES COMMITTEE. The Missoulian (12/20, 104K) reports that a bill by Sen. Jon Tester to "expand wilderness and mandate more logging on federal lands in Montana passed its first test Thursday in a Senate committee despite opposition by Republicans who called the measure unbalanced." The Senate Committee on Energy and Natural Resources "voted to move the bill out of committee and to the full Senate."

SANDY RIDGE MOUNTAIN BIKE TRAIL IS A BIG HIT. The Coos Bay (OR) World (12/20, 34K) reports that the Sandy Ridge mountain biking system is gaining popularity. For many local bikers, Sandy Ridge is "the go-to mountain bike trail, and is drawing bikers from across the country and internationally." According to Adam Milnor, who oversees the trail for the BLM, Sandy Ridge is the "largest trail built specifically for mountain bikes on federal land in the United States."

ENVIRONMENTAL GROUPS AWARDED \$75,000 IN FOREST THINNING CASE. The Salem (OR) Capital Press (12/19, 113K) reports that "a federal judge awarded \$75,000 to environmental groups that litigated against a forest thinning project" on BLM property in western Oregon. Cascadia Wildlands, Oregon Wild and the Benton Forest Coalition opposed the North Fork Outlook project. They "sought to block the project in court because they claimed BLM hadn't analyzed possible harms to the red tree vole, a candidate for Endangered Species Act protection."

MAN AGREES TO PAY \$55,000 FOR TAKING PARTS FROM HISTORIC CRASH SITE IN ALASKA. The Alaska Dispatch (12/19, 7K) reports that "federal prosecutors in Alaska have reached a settlement agreement with a Georgia-based aircraft restoration company that removed pieces of wreckage from a historic crash site south of the Interior city of Fairbanks." Restoration specialist Edward Thomas Reilly Jr. of Douglas, Ga., paid the BLM "\$55,000 to end a five-year investigation surrounding the removal of parts from a military crash site."

NEW MEXICO HORSE SLAUGHTER PLANT TO OPEN NEXT YEAR WITH 20 HORSES FROM NEVADA. The Reno (NV) Gazette-Journal (12/19, 165K) reports that "a New Mexico horse slaughter plant plans to open Jan. 1 after a federal appeals court rolled back a court order that had kept the Roswell facility from beginning operations." According to Valley Meat Co. owner Rick De Los Santos, "the plant will start off slow, but already has multiple meat contracts lined up."

Fish and Wildlife Service:

FWS LISTS BLADDERPOD AS PROTECTED SPECIES. The Tri-City Herald (WA) (12/19, 100K) reports that the White Bluffs bladderpod has been named a protected species by the FWS. Critical habitat for the White Bluffs bladderpod will be designated, "but only on federal land." Rep. Doc Hastings said he was "encouraged" that the FWS "had backed off its plan to designate 419 acres of private land in Franklin County critical habitat, but still had serious concerns about how the decision was reached."

Also reporting on the story is [KNDU-TV Yakima, WA](#) (12/20, 3K).

FWS SAYS RARE ORCHID FOUND AT ROSEMONT SITE NOT ENDANGERED. The [Arizona Daily Star](#) (12/20, 335K) reports that "a rare orchid that lives in the Santa Rita Mountains at the proposed Rosemont Mine site won't be legally protected" by the FWS. The agency "decided this week that largely because 22 colonies or populations of the pinkish-hued orchid exist in southeast Arizona and southwest New Mexico, the plant is not in danger of extinction despite its low numbers."

FWS EXTENDS COMMENT PERIOD ON SAGE GROUSE LISTING. The [AP](#) (12/20) reports that the FWS is "extending for 45 days the comment period on a proposal to list a distinct population of sage grouse as a threatened species." Public comments will now be accepted through Feb. 10.

REPTILE GROUPS SEEKS TO OVERTURN PYTHON BAN. The [Orlando \(FL\) Sentinel](#) (12/19, 780K) reports that "a reptile industry trade group has gone to court to overturn a federal ban on the import of four species of large snake, including the Burmese pythons that have infested the Everglades." The United States Association of Reptile Keepers, which "represents dealers, importers, breeders and hobbyists, filed suit in federal court Thursday to overturn a 2012 ban on the import and interstate trade in Burmese pythons, northern and southern African pythons and yellow anacondas." The group said the "federal ban rested on shaky scientific evidence, including a highly exaggerated projection of the snakes' potential geographic range in the United States, and inadequate economic analysis that understated the potential harm to the reptile industry."

Also reporting on the story is the [South Florida Sun Sentinel](#) (12/19, 690K).

ANIMAL SMUGGLING RING LEADER PLEADS GUILTY TO ILLEGAL WILDLIFE TRAFFICKING. [Yahoo!](#) (12/20, Levine, 17.91M) reports that the ringleader of a global ring that trafficked in endangered black rhinoceros horns admitted his role in the crimes today in federal court in Newark. Zhifei Li, a 29-year-old Chinese national who was indicted by federal grand juries in both Newark and Miami for international smuggling of rhinoceros horns, pleaded guilty to 11 of the charges.

Also providing coverage are [ABC News](#) (12/20, 3.68M), [CBS News](#) (12/20, 3.87M), [Reuters](#) (12/19, Dilts), the [Philly](#) (12/20, 1.22M), the [Cliffview \(NJ\) Pilot](#) (12/20, 2K), and the [North Jersey \(NJ\) Media Group](#) (12/20, 80K).

FWS BIOLOGIST A FINALIST FOR SECURING AMERICANS VALUE AND EFFICIENCY AWARD.. The [Bend \(OR\) Bulletin](#) (12/20, 94K) reports that Dirk Renner, a fish and wildlife biologist for the FWS, is "one of four finalists for the president's Securing Americans Value and Efficiency Award." Last year, Renner completed "an online application for the award, laying out how he thought the government could save time and money by allowing certifications to be recognized by more than one agency." According to the article, "a former US Forest Service worker, Renner learned his Forest Service all-terrain vehicle training was not transferable to the Fish and Wildlife Service when he moved to his new job in 2009."

SCARBOROUGH SELECTS COMMITTEE TO CREATE DOG RULES. The [Portland \(ME\) Press Herald](#) (12/20, 279K) reports that "a committee of Scarborough residents has a month to come up with a recommendation for regulating dogs on town property and protecting piping plovers." The Scarborough Town Council has "voted 6-1 to establish the committee and appoint its seven members, who have until Jan. 21 to report back to the council. Katherine St. Clair was the only councilor opposed." It was "formed in response to the results of a Dec. 3 referendum, in which residents voted to overturn a ban on unleashed dogs on town property."

NRDC PROGRAM DIRECTOR SAYS WOLVES MUST NOT LOSE THEIR ENDANGERED STATUS. In an op-ed for the [LiveScience](#) (12/20, Wetzler, 670K), Andrew Wetzler, director of the Land & Wildlife Program at the NRDC, questions the push by the FWS to "strip wolves of the few federal protections they now enjoy." He notes that "close to 1,000,000 comments have been filed with the administration opposing the delisting proposal." Wetzler argues that "the scientific evidence justifying the delisting of wolves, particularly in the Northeast is shaky at best," and "there are numerous legal problems with the delisting."

NRDC SEEKS DATA ON GRIZZLY BEAR RECOVERY. On the [Switchboard](#) (12/20, 67K), the NRDC announces that it, "along with some of our partner groups," has sent a letter to FWS Director Dan Ashe, "asking for access to the data that is informing the decision to strip Yellowstone grizzly bears of their Endangered Species Act protections." According to the group, "in the interest of science, transparency, and sound decision-making, these data should be made publicly available immediately."

Securing America's Energy Future:

Renewable Energy:

NEW EAGLE RULE CRITICIZED. In her column for the [Odessa \(TX\) American](#) (12/20, Noon, 50K), Marita Noon criticizes the new rule issued by the Interior Department granting 30-year permits allowing wind farms to "accidentally kill federally protected eagles." She also claims that "billions of taxpayer dollars that have gone down the drain in 'the quest for the holy grail of cheap renewable power.'"

Onshore Energy Development:

LEAK DISCOVERED ON NONPRODUCING WESTERN COLORADO GAS WELL ON BLM LAND. The [Oil and Gas Journal](#) (12/20, 1K) reports that "a leak has been found on a nonproducing natural gas well in western Colorado on land" overseen by the BLM. The BLM's Grand Junction field office said the "well's owner, Maralex Resources Inc., began working on containment Dec. 14 by diverting the leaking fluids to a storage pit already on the well pad." BLM said "it has ordered the Ignacio, Colo., independent producer to contain the spill and repair the well."

ADDITIONAL COVERAGE: BUDGET AGREEMENT CUTS ROYALTIES TO STATES. Additional coverage of the federal budget deals was provided by the [Riverton \(WY\) Ranger](#) (12/20, 167), the [Casa Grande \(AZ\) Dispatch](#) (12/20, 24K), and the [Casper \(WY\) Star-Tribune](#) (12/20, 90K).

OKLAHOMA EXPERIENCES INCREASE IN SEISMIC ACTIVITY. The AP (12/20) reports that Oklahoma's increased seismic activity is resulting in more preparation by state agencies and residents. According to The Post, "after decades of limited seismic activity in this region, earthquakes have become more common in the last several years." A study by the US Geological Survey said, "The increased hazard has important implications for residents and businesses in the area." An insurance agent, Matt Pryor, described the increased demand for coverage and said, "It used to be, 'Do I need earthquake coverage?' Now it's changed to, 'How much insurance do I need?'" The Post says scientists are unsure why "seismic activity has spiked," but highlights that it could be the result of wastewater injections that "weaken nearby fault lines." The Post states fracking can also cause earthquakes, "but they are typically smaller than magnitude-2."

Offshore Energy Development:

LEGISLATION CREATES OPPORTUNITIES FOR OIL, GAS DRILLING IN GULF. According to the FuelFix (12/19, 7K), last week's Congressional budget agreement included a measure that "opens the door to oil and gas drilling in international Gulf waters." The FuelFix says the legislation comes "just in time for Mexico's energy reforms" and a "deadline for the US to sign off on the work." The law "will implement a long-stalled international treaty" with Mexico that states the "moratorium on oil and gas drilling" will expire on Jan. 17 and "sets a framework for oil and gas development along the US-Mexico maritime boundary in the Gulf." The treaty "encourages commercial unionization agreements where resources straddling the boundary are divided up, effectively encouraging US companies to partner with Mexico's Pemex to produce oil and gas." National Security Council Spokeswoman Caitlin Hayden called the pact an "important priority," and said the agreement creates an "environmentally safe and responsible framework to explore, develop and share revenue from hydrocarbon resources that lie in the waters beyond each country's exclusive economic zones."

In the "E2 Wire" blog The Hill (12/20, 194K) reports that on Thursday, the White House touted congressional approval of a US-Mexico agreement to allow "offshore drilling cooperation along a maritime boundary in the Gulf of Mexico." The US-Mexico Transboundary Hydrocarbons Agreement was approved Wednesday night by the

Senate as part of the larger budget deal. The American Petroleum Institute also hailed the agreement. API upstream and industry operations director Erik Milito said, "US companies will now have the certainty they need to invest confidently along our maritime border with Mexico." Milito also said "the energy production made possible would help create jobs and raise more revenue for the government."

Also reporting on the story is the [Upstream Online](#) (12/19, 20K).

GULF POWER PARTICIPATES IN TURTLE-FRIENDLY LIGHTING PROJECT FOR CASINO BEACH. The [Gulf Breeze \(FL\) News](#) (12/19, 10K) reports that Pensacola Beach is getting new lights for the parking lot of the public Casino Beach. The new LED lights "are all turtle friendly," and are begin paid through funds from the BP Deepwater Horizon spill settlement, according to Santa Rosa Island Authority's Paolo Ghio. Ghio said, "The Dept. of Interior is driving this project, and the county, and Gulf Power, and the DOI are all involved. But the monies are all coming from the BP funds. I have been dogging this project, trying to move it ahead, for two years now, and it is finally all happening. We should have the new lighting project begin in March, and they plan to be done by next May."

Tackling America's Water Challenges:

ADDITIONAL COVERAGE OF BAY DELTA CONSERVATION PLAN. Additional coverage of the Bay Delta Conservation Plan was provided by the [Chico \(CA\) News and Review](#) (12/20, 101K), the [Switchboard](#) (12/20, 67K), and the [Examiner](#) (12/20, 1.16M).

PROFESSOR SAYS GENETICS COULD BE IMPORTANT TO CLIMATE CHANGE SOLUTIONS. For the [LiveScience](#) (12/20, Whitham, 670K), Thomas Whitham, a regents' professor in the Department of Biological Sciences and the executive director of the Meriam-Powell Center for Environmental Research at Northern Arizona University, writes that "one important part of the puzzle" on how to tackle climate change "involves unlocking the natural genetic diversity of plants to identify those species and populations best able to cope with changing conditions." Whitham notes that "genetics-based environmental research is already helping to restore damaged and degraded landscapes." For instance, "a 50-year, \$626 million effort on the lower Colorado River" shows "major genetics-based differences in the success of different populations" that the BOR and "other agencies are using to restore riparian habitat."

Empowering Native American Communities:

TRIBE MEMBERS INQUIRE ABOUT LAND BUY BACK PROGRAM. The [Char-Koosta News](#) (12/20, 12K) reports that last week, the Interior Department "announced that the Pine Ridge Reservation entered a Cooperative Agreement to purchase fractionated interests on the reservation." Upon hearing the news, "many Salish and Kootenai Tribal members have called the Tribal Lands Department to inquire about local land buy back efforts."

INDIAN COUNTRY FUNDING UNCERTAIN UNDER BUDGET DEAL. The [Indian Country Today Media Network](#) (12/19, 21K) reports that the federal budget deal "still holds uncertainties for tribal funding." According to the article, "it is a macro-level deal that makes recommendations on topline discretionary spending levels for fiscal years 2014 and 2015, so the details of how Indian program funding will be affected have yet to be ironed out and released by congressional appropriators." Meanwhile, Indian country officials are "widely reminding appropriators of the budget cuts tribes have faced as a result of sequestration, and tribes are encouraging a restoration of and increase in federal support."

GOV. MEAD: WYOMING WON'T HONOR EPA RULING ON RESERVATION. The [San Francisco Chronicle](#) (12/20, Neary, 2.88M) reports that Wyoming Gov. Matt Mead has written to EPA Administrator Gina McCarthy "saying Wyoming won't honor her agency's recent determination that over 1 million acres around Riverton remains legally Indian Country." Mead said Thursday that the Wyoming Attorney General's Office is "preparing to file an appeal in federal court." He said "the ruling raises issues of criminal jurisdiction, taxation and administration and said Wyoming will ignore the decision until the courts rule on it."

Also providing coverage is the [Casper \(WY\) Star-Tribune](#) (12/20, 90K).

COUNTIES WANT CAYUGA TRIBE'S LEADERSHIP DISPUTE SETTLED. The Finger Lakes (NY) Times (12/20, 43K) reports that the Seneca County Board of Supervisors and the Cayuga County Legislature want the BIA to "resolve a dispute over tribal leadership before deciding" on the Cayuga Indian Nation's application to put 129 acres of land it owns into federal trust.

ADDITIONAL COVERAGE OF TRIBAL NATIONS CONFERENCE. Additional coverage of the Tribal Nations Conference was provided by the Char-Koosta News (12/20, 12K).

Top National News:

INDIVIDUAL MANDATE DELAYED FOR THOSE WHO HAVE RECENTLY LOST COVERAGE. On Thursday night, HHS Secretary Sebelius announced that the Affordable Care Act's individual mandate is being waived for those who lost their health insurance because their plans did not meet the law's standards. As a result of the announcement's timing, there is less coverage than might have been expected. For instance, none of the three network newscasts covered the change in policy Thursday evening, nor did any of the three have a segment on any aspect of healthcare policy.

Reports this morning cast the shift as an effort to head off some of the political damage Democrats expect as a result of the ACA's unpopularity. National Journal (12/20, Ritger, Subscription Publication, 427K) says the Administration's "allowance comes after months of political fallout from the president's promise that 'if you like your plan, you can keep your plan,' which proved untrue." The Hill (12/20, Viebeck, 194K) also reports that "the change appears to be another attempt to rectify the controversy surrounding the president's repeated promise that individuals could keep their current health insurance."

Ezra Klein of the Washington Post (12/20, 4.28M) says the decision announced Thursday night "puts the administration on some very difficult-to-defend ground" because "it's hard to argue that" the individual mandate is "right for the currently uninsured but wrong for people whose plans were canceled." Klein predicts that Republicans "will immediately begin calling for the uninsured to get this same exemption," and adds that "if congressional Democrats use this ruling as an excuse to delay or otherwise de-fang the individual mandate for anyone who doesn't want to pay for insurance under Obamacare, then it'll be a very big problem for the law."

The New York Times (12/20, A1, Pear, Subscription Publication, 9.61M), in a front-page article titled "Another Rule In Health Law Is Scaled Back," reports that "millions of people facing the cancellation of health insurance policies will be allowed to buy catastrophic coverage and will be exempt from penalties if they go without insurance next year." The Times notes Sebelius "disclosed the sudden policy shift in a letter to" six Senate Democrats. The Times call the decision "another effort by President Obama to...minimize political damage to himself and Democrats in Congress who adopted the law in 2010 over solid Republican opposition."

The Washington Post (12/20, Goldstein, 4.28M) says the Administration has "significantly relaxed the [Affordable Care Act] rules...for millions of consumers whose individual insurance policies have been canceled" in a "surprise announcement, four days before the Dec. 23 deadline for people to choose coverage that begins on Jan. 1." The Post says the announcement "triggered an immediate backlash from the health insurance industry." Robert Zirkelbach, a spokesman for American's Health Insurance Plans, is quoted as saying, "This type of last-minute change will cause tremendous instability in the marketplace and lead to further confusion and disruption for consumers." However, the Post reports that an anonymous "administration official...predicted that relatively few people would take advantage of the opportunity to avoid the law's insurance requirement, reasoning that they have had insurance in the past so would want it in the future."

The Wall Street Journal (12/20, A6, Radnofsky, Subscription Publication, 5.91M) covers the shift from HHS in an article titled "White House Will Allow Some To Buy Catastrophic Health Plans: Health-Care Law Tweak Addresses People Whose Policies Were Canceled Under New Rules."

According to Politico (12/20, Haberkom, Brown, 467K), "The catastrophic plan, which was always a part of the [ACA], is an option for people under 30 and for those who qualify for specific exemptions." Politico adds that "under the new policy, people would have to provide proof of a canceled policy to qualify for the exemption." Politico reports that on Thursday, Sen. Marco Rubio said, "This is a slap in the face to the thousands of

Americans who have already purchased expensive insurance through the ObamaCare exchanges.”

Charles Krauthammer, in his column for the Washington Post (12/20, 4.28M), says the “keep-your-plan-if-you-like-your-plan ruse” amounted to “a fraud from the very beginning.” According to Krauthammer, the ACA was actually “designed to throw people off their private plans and into government-run exchanges where they would be made to overpay...as a way to subsidize others.”

Administration Claims Fewer Than 500,000 Are Without Coverage As A Result Of The ACA. The AP (12/20, Pace) reports that the Administration estimates that “less than a half million people whose health insurance was canceled” due to ACA rules “have not yet found other coverage,” and “that figure could shrink in the coming days.”

USA Today (12/20, Kennedy, 5.82M) reports that the estimate comes from four anonymous “senior administration officials.” USA Today says the “sub-500,000 figure counters Republican claims that more Americans will lose coverage starting Jan. 1 than will be newly insured.” USA Today notes that a Heritage Foundation report released this week “said ‘millions of Americans have lost and will lose their coverage’ due to the law and cited 4.7 million cancellation letters.”

Bloomberg News (12/20, Talev, Wayne, 1.91M) notes that in California, “more than 1 million policy holders received letters from their current insurers saying their coverage will be canceled after Dec. 31 because their plans don’t comply, and hundreds of thousands were canceled in other states.”

According to the Los Angeles Times (12/20, Hennessey, 3.07M), the officials “said they had arrived at the estimate over weeks of contacting insurers and combing through the administration’s own enrollment data.” However, the Times notes that the AP “put the number of cancellation notices sent at 3.5 million.”

WSJournal: Many Uninsured Are Hesitant To Seek Coverage Via ACA Exchanges. The Wall Street Journal (12/20, A1, Martin, Weaver, Subscription Publication, 5.91M), in a front-page article titled “Last-Minute Health-Site Enrollment Proves A Hard Sell,” reports on the obstacles facing the Administration as it tries to encourage the uninsured to purchase insurance via the exchanges established by the Affordable Care Act. In particular, the Journal says that many who tried unsuccessfully to enroll online in the first weeks after the ACA’s rollout are hesitant to try again. According to the Journal, insurers say many people are also concerned about the exchange’s vulnerability to hackers.

Reid: Obama Has Failed To Credit Senate Democrats For ACA Fixes. The Hill (12/20, Bolton, 194K) reports that on Wednesday, Senate Majority Leader Reid said members of his caucus “are unhappy the White House didn’t give them any credit for key fixes to ObamaCare.” Reid says he “recently reproached President Obama in private on the issue, arguing Obama should have given his colleagues more praise.” Reid is quoted as saying, “I did communicate to him that there have been things done by the White House that improved the healthcare bill and those fixes were suggested originally by my senators and they got no credit for it. I thought that was improper.”

SENATE EXPECTS VOTE IN EARLY JANUARY ON EXTENDING EMERGENCY JOBLESS BENEFITS.

McClatchy (12/20, Lightman, 95K) reports that Senate Majority Leader Reid “vowed” that his chamber will vote on January 6 or 7 on a plan to extend emergency jobless benefits, which are due to expire December 28. The plan would extend benefits for three months. Reid also blamed Republicans for “resisting” a vote on the issue this month.

Politico (12/20, Kim, 467K) reports Reid also “laid out Senate Democrats’ election-year agenda focused on income inequality.” On jobless benefits, Reid “said he’ll file cloture on the bill before the chamber adjourns and that he is aiming for a vote no later than Jan. 7.” The piece notes that the Administration has endorsed the Democrats’ plan.

The Hill (12/20, Sink, 194K) reports that Jason Furman, chairman of the Council of Economic Advisers, said the White House was “surprised” at the pace of job creation during 2013. Furman “said that over the past six months, the administration had seen the unemployment rate drop by an average of a tenth of a percent,” when the White House had expected claims to drop only 0.6% for the full year. Still, Furman “said it was still important for

Congress to extend emergency federal unemployment insurance.”

ECONOMIC NEWS SEEN AS GENERALLY POOR ON THURSDAY. Media coverage of Thursday's economic news was generally negative, with jobless claims rising, mortgage rates increasing, and existing home sales down. However, stocks were static as investors weighed the impact of the Fed's taper decision.

In an overview of the economic news, Reuters (12/20, Mutikani) reports on the weak housing and jobless claims data, but says that overall, the news continues to show the economy strengthening.

Jobless Claims Up Due To Holiday Volatility. The AP (12/20) reports that first-time claims for jobless benefits rose 10,000 last week to 379,000, the highest level since March, according to new data released on Thursday by the Department of Labor. However, the rise “may reflect volatility around the Thanksgiving holidays.” The four-week moving average, which irons out week-to-week volatility, rose 13,250 to 343,250. Economists “dismissed that spike, saying it likely reflected a Thanksgiving holiday that fell later in the month.”

Bloomberg News (12/20, Jamnisko, 1.91M) similar says that the increase reflected “fluctuation in the filings that typically occurs around the year-end holidays.”

Mortgage Rates Up On Fed Action. Bloomberg News (12/20, Gopal, 1.91M) reports that data released on Thursday by Freddie Mac shows that the average rate on a 30-year fixed mortgage rose to 4.47% this week from 4.42% the prior week. The rate on a 15-year fixed loan rose to 3.51% from 3.43%. The rise came as the Fed “said it will scale back bond purchases that have supported the real estate market.”

Existing Home Sales Down Last Month. Reuters (12/20) reports that existing home sales fell 4.3% in November to an annual rate of 4.9 million units, the lowest level since December 2012 and the third consecutive monthly drop. Economists surveyed by Reuters expected sales to come in at a 5.03 million unit rate.

Impact Of Fed's Move Remains Uncertain. The AP (12/20, Wiseman) reports on the impact of the Fed's decision to begin tapering its bond-buying program, saying that consumers “will likely pay more for home loans,” while those saving money “may earn a few more dollars on CDs and Treasuries.” While banks “could profit,” investors “may get squeezed.” Overall, the “impact of the Fed's action is hard to predict,” and will be blunted by the fact that it is “a very slight reduction” and the Fed is still keeping interest rates at a “record low” for the foreseeable future.

Looking at the impact globally, the Washington Post (12/20, Wan, Bimbaum, 4.28M) reports that markets rose in Europe and Asia, a sign that the Fed's move is being seen “as a sign of confidence in the U.S. economy.” The Post says the move “was greeted with particular warmth in Germany, where economists and policymakers have challenged the Fed's stimulus for years.”

Treasury Yields Up On Fed Action. The Wall Street Journal (12/20, Cui, Subscription Publication, 5.91M) reports that the Treasury market saw a significant sell-off on Thursday, following the Fed's announcement, pushing yields on the key 10-year note to the highest level in the last three months. Prices on those notes fell 11/32 on Thursday to a yield of 2.923%. When prices fall, yields rise.

Gold Falls, Signaling Potential End To Decade-Plus Bull Run. On its front page, the Wall Street Journal (12/20, Day, Subscription Publication, 5.91M) reports that gold prices on Thursday fell to a three-year low, and is on pace to notch its first annual decline in 13 years. Overall, gold is down 29% so far this year. The Fed's decision to taper its bond-buying is likely to force down the price of gold further.

Stocks Little Changed On Thursday. The AP (12/20, Rothwell) reports that stock indexes “ended up pretty much where they started on Thursday, a day after a powerful surge” on Wednesday. The S&P 500 fell 1.05 points to 1,809.60, while the Dow Jones Industrial Average rose 11.11 to 16,179.08. The Nasdaq Composite Index fell 11.93 points to 4,058.13.

Editorial Wrap-Up:

NEW YORK TIMES. "Release The Torture Reports." In an editorial, the New York Times (12/20, Subscription Publication, 9.61M) calls for the declassification of officials reports "about the extent and nature of the rendition, detention and torture" that followed the 9/11 attacks. The Times argues that it is "appalling" that the reports are "still being kept from the American public and even members of Congress charged with overseeing intelligence activities." The Times says the President "has a duty to ensure prompt public release of the documents."

"Russian Amnesties." An editorial in the New York Times (12/20, Board, Subscription Publication, 9.61M) argues that while the amnesties announced by Russian President Vladimir Putin are "certainly good news," a clemency decree "is not the same as acknowledging that these prisoners were improperly incarcerated to begin with." Putin "gave no indication that they may have been wrongfully tried and imprisoned, nor that more people will not be treated similarly in the future." The Times concludes that without "a strengthening of the rule of law, these amnesties are mostly an imperial gesture, not a sign that justice has been served."

"India's Misplaced Outrage." An editorial in the New York Times (12/20, Subscription Publication, 9.61M) calls India's reaction to the arrest of one of its diplomats in the US "overwrought" and "unworthy of a democratic government." The Times argues that the charges against Devyani Khobragade, the deputy consul general in New York, "should concern anyone who values worker rights," but instead of "concerning themselves with that injustice, many in India seem incensed that Ms. Khobragade was arrested at all."

"Lessons From The Sandusky Case." The New York Times (12/20, Board, Subscription Publication, 9.61M) editorializes that as the Jerry Sandusky child-molestation scandal unfolded last year, "it became clear that Pennsylvania's child abuse laws were among the weakest in the nation." The Times notes that a "raft of reform bills that the State Legislature has begun enacting with Gov. Tom Corbett's support" would better protect children, especially a pending bill that "would mandate the prompt reporting of suspected abuse to government officials." The Times concludes that mandatory reporting "is essential to any meaningful response to the scandal, and it deserves legislative approval."

WASHINGTON POST. "Overreaction From The Right." In an editorial, the Washington Post (12/20, Board, 4.28M) criticizes the Republicans "budget hawks" "outrage" against the defense bill's "minuscule trim to military retirement pay." The Post says that "military retiree benefits need much greater reforms," particularly healthcare benefits.

"Iran's Posturing." An editorial in the Washington Post (12/20, Board, 4.28M) notes skepticism from the President and Secretary of State Kerry about Iran's readiness to come to an agreement on its nuclear program, and adds that recent events "have made clear that those bearish judgments were justified." Noting that Iranian officials walked out of talks on implementing the preliminary agreement in attempt "to bluff the West into hollowing out the remaining sanctions by stopping their enforcement," the Post says Iran "is sending an early message that it does not intend to bargain in good faith."

"Don't Rush The Fixes." The Washington Post (12/20, 4.28M) editorializes that "amid all the uncertainty" over the scheduling of the first election for District of Columbia attorney general, "the only thing clear is the complete hash the council has made of the future of this critical office. Just as it didn't consider the consequences of switching from an appointed attorney general to an elected one, it didn't think about the ramifications of delaying the election."

WALL STREET JOURNAL. "John Beale's EPA." In an editorial, the Wall Street Journal (12/20, Subscription Publication, 5.91M) writes that John Beale, who cheated the government out of \$900,000 while working at the EPA, was a top official in the agency's Office of Air and Radiation. The Journal says that Beale was closely linked to now-EPA Director Gina McCarthy. The Journal says that Beale's work at the EPA now needs to be closely scrutinized.

"Putin Tries A Makeover." An editorial in the Wall Street Journal (12/20, Subscription Publication, 5.91M) argues that Russian President Vladimir Putin's announcement that he will pardon Mikhail Khodorkovsky was clearly an effort to improve Russia's reputation ahead of the Olympics. The Journal notes that while Khodorkovsky's release would be welcome, it would not be as much about freedom in Russia as it would be about Putin trying to improve his image.

"A California Paint Job." The Wall Street Journal (12/20, Subscription Publication, 5.91M) editorializes in opposition to a California court's ruling that paint manufacturers must pay billions to remove lead paint from thousands of private residences in the state. The Journal argues that the manufacturers sold a product that was legal at the time with no knowledge of its health risks.

Washington Schedule:**TODAY'S EVENTS IN WASHINGTON.**

White House:

PRESIDENT OBAMA — No Scheduled Events.

VICE PRESIDENT BIDEN — No Scheduled Events.

US Senate: No Scheduled Events.

US House: No Scheduled Events.

Other: Dec. 19 – 20. FDA – NEW MEDICAL TECHNOLOGIES — 8:30 a.m. The FDA/American Gastroenterological Association will be holding a public workshop to bring together key stakeholders in the development and delivery of new medical technologies. The workshop also aims to enhance collaboration and awareness, which ultimately supports continued innovation in device development. RSVP: Journalists and broadcast media must register for this event and arrive 15 minutes prior. Location: Grand Hyatt Hotel, 1000 H St. NW.

PENTAGON – SECRETARY MABUS — 9:45 a.m. Secretary of the Navy Ray Mabus briefs the media on Navy husbanding policies and contracting initiatives in the Pentagon Briefing Room (2E973). Following his remarks, Rear Adm. Jonathan Yuen (Naval Supply Systems Command) and Elliott Branch (Deputy Assistant Secretary of the Navy (Acquisition and Procurement)) will be available to discuss contracting issues and reforms.

NASA ADMINISTRATOR – HIGH SCHOOL — 2 p.m. – 3 p.m. NASA Administrator Charles Bolden will visit a suburban Washington school where high school students built a small satellite, TJ3Sat, that was launched into space in November. Location: Thomas Jefferson High School for Science and Technology, Alexandria, VA.

Last Laughs:**LATE NIGHT POLITICAL HUMOR.**

Jay Leno: "Oh, here's some good news. The Federal budget compromise has been passed, so instead of shutting down and getting nothing done, the government will stay open and get nothing done. So how about that – that's terrific."

Conan O'Brien: "Some political analysts are now saying the Tea Party and the Republicans are going through a political divorce. Yeah. All I can say, is I do not want to be around for the makeup sex."

Re: Sage grouse follow-up

Lyons, James <james_lyons@ios.doi.gov>
To: Sally Jewell (b) (6)@ios.doi.gov>

Mon, Dec 23, 2013 at 11:43 AM

Thanks for the note Sally.

(b) (6)

I feel like we're beginning to hit our stride. And, with John in the White House, our issues will finally get the attention – and priority – they deserve.

Looking forward to an exciting and productive New Year!

Thanks, again.

Jim

On Fri, Dec 20, 2013 at 7:23 PM, Sally Jewell (b) (6)@ios.doi.gov> wrote:
Jim -

I very much appreciate your creativity, experience and leadership on some of our thomier issues. I also am happy that you and Michael are working together to help move our teams forward.

We must look at the world differently to make progress - keep pushing (and come up with some better jokes :>)

Enjoy the holidays and don't hesitate to reach out if needed.

Cheers,

Sally

LAST LAUGHS:

- + Late Night Political Humor.

DOI in the News:

FEDERAL BUDGET DEAL PERMANENTLY CUTS STATE OIL ROYALTIES. The AP (12/22, Daly) reports that the Federal budget deal makes permanent a 51-49 split in royalties between the Federal government and state governments, with the Federal government receiving the 51 percent. Until 2008 there was a 50-50 split, then the Interior Department began collecting a two percent administrative fee on the royalties, setting up the current 51-49 apportioning. The Congressional Budget Office estimates that the difference will cost states with drilling on Federal land "\$415 million in lost oil and gas royalties over the next decade." The article also notes that the Government Accountability Office has urged the Interior Department to increase royalty fees for oil produced on Federal land. Janice Schneider, nominated to be assistant interior secretary for land and minerals management, has said she would pursue the issue.

NEW NATIONAL WATER TRAILS DESIGNATED. The Examiner (12/22, 1.16M) reports that Interior Secretary Sally Jewell has signed three rivers in Michigan, Iowa, South Dakota, Nebraska and Iowa into the National Trail System. The three newest additions to the national system are the Island Loop Water Trail in Michigan, the Red Rock Water Trail in Knoxville, Iowa, and the Missouri National Recreation River Water Trail that through South Dakota, Nebraska and Iowa. NPS Director Jonathan B. Jarvis stated, "These National Water Trails provide exemplary close-to-home places for people to explore and enjoy." In addition, "I am particularly happy to have these trails added to the system. They are cooperatively supported and sustained through efforts of community, state and federal partners."

INTERIOR INSULAR NOMINEE ESTHER KIA'AINA SPEAKS AT UOG FALL GRADUATION. The Pacific News Center (12/22) reports that Interior Department Insular Affairs Nominee Esther Kia'aina "spoke about the values that have shaped her life during her Commencement Address at UOG Sunday, afternoon." During her Commencement address. Kia'aina "also identified what she called some of the critical issues for Guam like 'return of federal excess lands, Guam war reparations or increased opportunities in higher education.'"

RUSSIAN OFFICIALS VISIT NATIONAL PARKS, REFUGES FOR TRAINING. The Savannah (GA) Morning News (12/20, 183K) reports that a group of six Russian natural resources officials toured Savannah National Wildlife Refuge on Thursday. The officials "were in the US for a three weeks of training about law enforcement in national parks and refuges sponsored by the US Department of State." According to the article, "after visiting the Federal Law Enforcement Training Center in Brunswick along with the Rocky Mountain National Park in Colorado and Saguaro National Park in Arizona, the Savannah refuge was among their last stops."

AUDIT SHOWS OVERSEAS SUPPLIERS OF CLOTHING HAVE HARSH WORKING CONDITIONS. The New York Times (12/23, Urbina, Subscription Publication, 9.61M) reports that "even though the Obama administration has called on Western buyers to use their purchasing power to push for improved industry working conditions after several workplace disasters over the last 14 months, the American government has done little to adjust its own shopping habits." According to the article, "Labor Department officials say that federal agencies have a 'zero tolerance' policy on using overseas plants that break local laws, but American government suppliers in countries including Bangladesh, the Dominican Republic, Haiti, Mexico, Pakistan and Vietnam show a pattern of legal violations and harsh working conditions, according to audits and interviews at factories." The article notes that "soon after a fire killed at least 112 people at the Tazreen Fashions factory in Bangladesh in November 2012, several members of Congress asked various agencies for factory addresses." But "of the seven agencies her office contacted, Representative Carolyn Maloney, Democrat of New York, said only the Department of the Interior turned over its list."

UTAH LAWMAKER ARGUES FOR STATES TO TAKE OVER CONTROL OF PUBLIC LANDS. In an op-ed for the Salem (OR) Statesman Journal (12/20, Ivory, 104K), Ken Ivory, president of the American Lands Council and a member of the Utah House of Representatives, argue that "there is no good reason for the federal government to retain control over these lands and resources in states like Oregon." Ivory claims that "if we fail to stand up and take action to secure state and local control of our lands and abundant resources, it will not be because it is illegal, unconstitutional, or impossible," but "it will only be because we--and the local, state, and national leaders we 'hire'--lack the knowledge and the courage to do what has been successfully done before."

However, in an op-ed for the Ravalli (MT) Republic (12/22, Hamilton, 19K), Jeri Drake Hamilton claims that "if

Montana became the owner of all of our federal lands then catastrophic changes could and would occur." Hamilton questions the ability of states to manage public lands, and argues that "trained individuals can best manage our land."

VETERAN SUPPORTS PROTECTING PUBLIC LANDS. In an op-ed for the [San Bernardino \(CA\) Sun](#) (12/20, Starr, 132K), Mark Starr, program director for Vet Voice Foundation, writes about the importance of protecting public lands. According to Starr, "for many veterans, spending time in the great outdoors is a way of dealing with the wounds of war after they return home." He writes that "for many, the peaceful surroundings of the California desert and our national parks and forests are a place of quiet and calm, a place to spend time with family and friends, a place to hunt, fish and hike away from the hubbub of everyday life, and a place of healing."

SIERRA CLUB DIRECTOR LAUDS SUCCESSSES IN 2013. In a review of the major events of 2013 for "The Blog" of the [Huffington Post](#) (12/22, Brune, 11.54M), Michael Brune, Executive Director, The Sierra Club, writes that in March, President Obama "designated five new national monuments, including Rio Grande del Norte in New Mexico and the San Juan Islands in Washington State." Then, "less than a month later, the Senate confirmed his nominee for Secretary of the Interior, Sally Jewell – a dedicated outdoor enthusiast who understands the economic, recreational and conservation benefits of protecting public lands." Brune hopes that "2014 sees even more ambitious monument designations and protections for public lands."

America's Great Outdoors:

National Park Service:

EACH STATE RECEIVING \$228,000 FOR HISTORIC PRESERVATION. The [Albuquerque \(NM\) Business First](#) (12/22) reports that NPS Director Jonathan B. Jarvis has "announced that more than \$13 million is being released to states for historic preservation projects." Under a formula devised by the NPS, "each state will receive \$228,458." Jarvis said in a statement, "Historic preservation funding sustains and revitalizes communities while preserving the social, cultural and ethnic heritage that enriches America. These grants – derived not from taxpayer dollars but from revenue from federal oil leases on the Outer Continental Shelf – leverage state dollars to increase the preservation work states or the federal government could not accomplish alone."

NPS MOVING FORWARD WITH CHESAPEAKE & OHIO CANAL PROJECTS. The [Washington Post](#) (12/22, 4.28M) reports that "it appears some of the old ways of life on the Chesapeake & Ohio Canal gradually will be coming back to Williamsport" now that the NPS has "announced plans to move forward with at least three projects on the canal that will re-create features of the former commercial waterway and enhance visitor experiences." The work will include "raising the railroad lift bridge near Cushwa Basin," according to Kevin Brandt, superintendent of Chesapeake & Ohio Canal National Historical Park. Brandt said that "raising the lift bridge will allow boats to pass beneath the steel structure and lengthen ongoing boat rides on the canal in Williamsport by about one-third of a mile."

Coverage was also picked up by [Yahoo! News Canada](#) (12/22, 76K), the [Cape Breton \(AUS\) Post](#) (12/22), and [WJZ-TV Baltimore](#) (12/22, 36K).

DINOSAUR FOSSIL EXHIBIT PROPOSED FOR BIG BEND NATIONAL PARK. The [El Paso \(TX\) Times](#) (12/22, González, 247K) reports that the NPS is planning a new dinosaur fossil exhibit for Big Bend National Park in West Texas. The exhibit built inside the park would house fossil replicas from dinosaurs that existed in the area more than 90 million years ago. Don Cumick, park geologist, said that the exhibit would be built in an already developed area of the park.

Also covering the story is the [Columbus \(IN\) Republic](#) (12/22, 80K).

620,000 TREES BEING PLANTED TO HONOR CIVIL WAR DEAD. [USA Today](#) (12/21, Toppo, 5.82M) reports that "along the historic highway that stretches from Thomas Jefferson's home, near Charlottesville, Va., to the national cemetery at Gettysburg, Pa., a small group has spent the past two years literally laying the groundwork to plant a tree for every one" of the "estimated 620,000 soldiers" that "died fighting from 1861 to 1865." According to the article, "when completed, the \$65 million project will be the largest man-made pathway of trees on the

globe, stretching 180 miles north to south over three states." The group has "already planted 248 trees at Bliss Orchard at Gettysburg, part of a larger effort by the National Park Service to restore the battlefield site to what it looked like in 1863."

PRESENTATION MADE ON FIRE ISLAND NATIONAL SEASHORE BREACH. Newsday (12/22, 1.52M) reports that "250 South Shore residents gathered in Bellport on Saturday" to hear "from government officials, researchers and environmentalists about a superstorm Sandy-caused breach in a Fire Island National Seashore wilderness area." National Seashore superintendent Christopher Soller said, "There are a lot of environmental values that we are seeing, but we have to balance that against the risks of if this breach stays open, if it gets worse, what will happen." The article notes that the National Seashore "recently received a federal grant of about \$1 million to study alternative solutions for the breach near Old Inlet, south of Bellport."

NPS RANGER RETIRING AFTER 37 YEARS. The Outer Banks (NC) Voice (12/21) reports that "after nearly 37 years" with the NPS, Ranger Warren Wrenn will retire on Dec. 27. Superintendent Barclay Trimble, said, "Warren has had a remarkable career and much of it spent here on the Outer Banks. His institutional knowledge about all topics related to the parks will be missed. The Outer Banks Group has truly benefited from his experience and hard work the past thirty seven years. On behalf of his many Park Service colleagues throughout the area and in the National Park System, we wish Warren well in his retirement."

NPS CLOSES OHIO & ERIE CANAL TOWPATH DUE TO FLOODING. WJW-TV Cleveland (12/21, 103K) reports that "because of excessive flooding," the National Park Service has closed the Ohio & Erie Canal Towpath Trail in the Cuyahoga Valley National Park until further notice.

NPS SEEKS PUBLIC INPUT FROM PUBLIC REGARDING THE APPALACHIAN TRAIL. The Knoxville (TN) Daily Sun (12/22) reports that the NPS is beginning "the process of preparing a Foundation Document for planning and management of the Appalachian National Scenic Trail." The NPS has invited the public "to play a role in charting the trail's future by sharing your thoughts on what is most important about the Appalachian National Scenic Trail and to help identify its most pressing threats and its greatest opportunities."

GLACIER NATIONAL PARK SEEKS COMMENTS ON REMOVING LAKE TROUT. The Missoulian (12/22, 104K) reports that Glacier National Park is seeking public comments on "proposals to continue lake trout suppression on Quartz Lake and start lake trout removal on Logging Lake."

VICKSBURG NATIONAL MILITARY PARK ANNOUNCES FOUNDATION DOCUMENT PROJECT. KTVE-TV EI Dorado, AR (12/22, 1K) reports that the NPS is preparing a "foundation document" to guide planning and management of Vicksburg National Military Park.

SAN LUIS OBISPO OCTAGON BARN ADDED TO NATIONAL REGISTER. The Times Press Recorder (12/20) reports that the Octagon Barn in San Luis Obispo has been added to the National Register of Historic Places.

BARRINGTON FARMHOUSE ADDED TO NATIONAL REGISTER OF HISTORIC PLACES. The Providence (RI) Journal (12/22, 389K) reports that the Allen-West House in Barrington's Nockum Hill has been added to the National Register of Historic Places "for its colonial past, architectural significance and contributions to agriculture."

EXPANSION OF YOSEMITE NATIONAL PARK SUPPORTED. In an op-ed for the U-T San Diego (12/20, 647K), Robert Hanna, the founder of Range of Light, and Nathan Weaver, the preservation advocate for Environment California, write in support of "by adding 1,600 acres of important habitat for park wildlife" to Yosemite National Park. They note that "the current landowners, the Pacific Forest Trust and a coalition of private stakeholders, have already announced their intentions to transfer the land to Yosemite," and "money to pay a fair price for the transfer is already available through the Land and Water Conservation Fund, but only Congress can give the National Park Service permission to move forward."

PAPER URGES FOR CLEAN UP OF GREAT KILLS PARK. The Staten Island (NY) Advance (12/22, 166K) editorializes that "eight years after the discovery of radium contamination in popular Great Kills Park, not only has there apparently been precious little done in the way of cleaning up the mess, but the public isn't even sure what the contamination actually is." The paper notes that the NPS "won't have a final report on the matter ready until

next spring." The editorial asserts: "We have a seriously contaminated park that needs cleaning up, and a federal agency that seems to have no sense of urgency about getting the job done."

Bureau of Land Management:

CRITICS PUSH BACK AGAINST PROTECTION FOR GREATER SAGE GROUSE. FOX News (12/21, 6.72M) reports that "ranchers, miners, energy developers and public officials are voicing concerns over the federal government's push to protect" the greater sage grouse, "fearing possible restrictions on public lands that could have deep economic consequences in the rural West." Grant Gerber, a commissioner in Elko County, Nevada, "says he's convinced the feds have already made up their mind to list the sage grouse as a threatened or endangered species." However, a BLM official "says that's not the case and insisted at a public meeting in Elko last week they want the community's input on how best to save the troubled bird without a federal listing."

SAGE GROUSE PLAN RAISES CONCERNS. The Ontario (OR) Argus Observer (12/22, 19K) reports that "while many people are still trying to get their arms around a three-volume sage-grouse management document, both cattle producers and environmentalists are concerned about what it proposes and what it doesn't." The BLM is "taking public comment on its plans for maintaining and increasing habitat for the sage grouse on federally managed land, which includes large tracts of land in the Western Treasure Valley." John O'Keeffe, president-elect of the Oregon Cattlemen's Association, notes that "one of the concerns ranchers have is that the preferred alternative listed in the document proposes to halt grazing on 118,000 acres of land throughout the region, which poses economic concerns." Also, "according to a statement from the Oregon Natural Desert Association, while the BLM proposed limiting certain types of disturbance to sage grouse habitat, the agency has also chosen not to include other needed protections, such as designating large protected areas in its preferred alternative."

MUSTANG MONUMENT TO OPEN TO TOURISTS IN JUNE. FOX News (12/20, 6.72M) reports that in June, the Mustang Monument will "open to tourists looking for an unconventional vacation experience." Meanwhile, the BLM says "it's evaluating any environmental impact."

BLM APPROVES PAN MINE PROJECT. The Elko (NV) Daily Free Press (12/22, 22K) reports that Midway Gold US, Inc. "received its record of decision for the company's Pan Mine Project Friday" from the BLM Ely District.

DESIGNATION OF BROWNS CANYON AS A NATIONAL MONUMENT SUPPORTED. In an editorial the Denver Post (12/22, 949K) argues for the designation of Browns Canyon as a national monument. The paper says the importance of the designation is illustrated by two pending mining claims in the area. It urges the BLM to challenge the claims in court.

LAND TRUST OF SANTA CRUZ COUNTY LOOKING AT NATIONAL MONUMENT ON NORTH COAST. In an op-ed for the Santa Cruz (CA) Sentinel (12/22, Corwin, Stephens, 151K), Terry Corwin, executive director of the Land Trust of Santa Cruz County, and Robert Stephens, president of the trust's board of trustees, write that the Land Trust of Santa Cruz County is looking "at the idea of a National Monument on the North Coast through the lens of our Conservation Blueprint." They note that the transfer of Coast Dairies to the BLM is "imminent," which will "provide additional financial support for public access and stewardship of a property already in federal hands." According to the authors, "those of us who have been privileged to tour these lands are working to open them up to everyone – and designation as a National Monument seems to us one of the few ways of doing so."

Fish and Wildlife Service:

FWS PREPARING EVENTS FOR ENDANGERED SPECIES ACT'S 40TH ANNIVERSARY. The Missoulian (12/22, 104K) reports that "in the next few months, people in 10 states will be gathering for bus tours and field trips arranged" by the FWS to "see bald eagles in celebration of the act's anniversary." The article notes the successes of the act, including the bald eagle, "the American alligator, two kinds of peregrine falcon, the brown pelican and 31 other species." However, "seven species, including the Santa Barbara song sparrow, blue pike and dusky seaside sparrow, have gone extinct since they were given ESA listings," and it notes that "making the ESA triggers lots of impacts, including critical habitat designations, required interagency consultations before projects can happen on public land, and prohibitions of the deliberate or accidental taking of the listed species."

For "The Blog" of the [Huffington Post](#) (12/20, Clark, 11.54M), Jamie Rappaport Clark, President & CEO, Defenders of Wildlife, argue that "the ESA is the ultimate representation of America's commitment to responsible stewardship." Clark argues that "the right choice is to uphold the conservation values and sense of responsibility to future generations that shaped the ESA 40 years ago."

Also providing coverage of the act is [NBC News](#) (12/22, 6.79M).

KILLING OF BARRED OWLS BEGINS TO HELP SPOTTED OWL. [The Oregonian](#) (12/22, 751K) reports that "an experiment to see if killing invasive barred owls will help the threatened northern spotted owl reverse its decline toward extinction is underway in the forests of Northern California." The FWS said Friday that "specially trained biologists have shot 26 barred owls in a study area on the Hoopa Valley Indian Reservation northeast of Arcata, Calif." According to FWS biologist Robin Bown, "they plan to remove as many as 118 barred owls from the area, keeping the 55 known barred owl nesting sites open over the next five years to see if spotted owls increase." The FWS is "spending \$3.5 million over six years to remove 3,600 barred owls from sites in Oregon, Washington and California."

Also providing coverage is the [MSN Canada](#) (12/22).

VANISHING SPECIES SEMIPOSTAL STAMPS HELPS CONSERVATION OF IMPERILED SPECIES. The [Sierra \(CA\) Sun Times](#) (12/22) reports that the Save Vanishing Species semipostal stamp "continues to provide vital support for the US Fish and Wildlife Service's efforts to fight global wildlife trafficking and poaching." According to the article, "millions of Americans have purchased these stamps online and at their local post offices in the past two years, generating more than \$2.5 million that has been used in Africa, Asia and Latin America to benefit elephants, rhinoceros, tigers and other rapidly declining wildlife species." FWS Director Dan Ashe said, "We are at a crucial point in the fight against poaching and wildlife trafficking. If we can't stop the killing now, elephants, rhinos, tigers and many other imperiled species may vanish entirely from their native habitat. The Save Vanishing Species semipostal stamp gives every American a way to provide direct support for vital on-the-ground conservation efforts that are making a difference to the survival of these irreplaceable species."

REPORT TOUTS DUNGENESS WILDLIFE REFUGE AS A BOON TO REGIONAL ECONOMY. The [Kitsap \(WA\) Sun](#) (12/22, 91K) reports that Dungeness National Wildlife Refuge "generates \$7 for every \$1 it was appropriated in 2011," according to a new report by the FWS. The report, titled Banking on Nature, "highlighted Dungeness as a prime example of how the national refuge system bolsters regional economies."

SMITH ISLAND ERODING. The [Washington Post](#) (12/22, 4.28M) reports on the erosion of the Smith Island. According to the article, "about 3,200 acres have vanished, representing nearly one-third of the land, scientists estimate," and "today, only about 900 of the islands' remaining 8,000 acres are hospitable to development." However, the article notes "\$9 million campaign" was announced by the FWS in October "to stabilize the western shoreline of the Martin National Wildlife Refuge." The refuge "consists of an uninhabited swatch of land" that "lies on the north end of the Smith Island archipelago."

CONSERVATION GROUP PURCHASES PRESERVE ON BOLIVAR PENINSULA. The [Houston Chronicle](#) (12/20, Rice, 2.26M) reports that "a conservation group on Friday completed purchase of 1,350 acres on the Bolivar Peninsula, preserving one of the last remaining large tracts of undeveloped land on the peninsula." According to Jim Suydam, spokesman for the Texas General Land Office, "the purchase by the Conservation Fund for Texas secures vital habitat for migrating birds and will permanently protect estuarine emergent wetlands, associated tidal flats, subtidal ponds and Gulf coast beachfront." The group "plans to transfer the entire 1,350 acres, formerly part of the Cade Ranch planned development, to the US Fish and Wildlife Service to become part of the Anahuac National Wildlife Refuge."

FARMER FINED FOR POISONING EAGLES. The [Daily News \(WA\)](#) (12/22, 72K) reports that "a Winlock woman has been fined \$1,500 for violating the Bald and Golden Eagle Protection Act after inadvertently poisoning seven bald eagles that fed on two euthanized horse carcasses left on her property in March." Debra Dwelly, who "runs a horse rescue farm, said she had intended to bury the two horses but a backhoe had broken down." Gary Young, special agent in charge for the FWS Pacific Region, said that, "considering the circumstances, the case had a positive ending since all seven birds were all able to be released back into the wild."

Also reporting on the story is the [Clark County \(WA\) Columbian](#) (12/21, 116K).

FWS OFFERING ADDITIONAL COMMENT PERIOD ON PROPOSED PROTECTION FOR BUTTERFLIES. The [Sioux Falls \(SD\) Tri-State Neighbor](#) (12/22, 79K) reports that "the 60-day comment period on a proposal to protect two prairie butterflies, the Dakota skipper and the Poweshiek skipperling, under the Endangered Species Act will end on December 23, 2013," but the FWS "announced the public will have more opportunities to provide input." The agency "plans to open an additional public comment period in 2014, once a draft economic analysis on the potential impacts of critical habitat is available" Also, the FWS will "continue to accept comments via mail or hand delivery on the proposal for critical habitat and the proposal for listing between December 23, 2013, and when the comment period is reopened."

Also providing coverage is the [Bismarck \(ND\) Farm and Ranch](#) (12/22, 111K).

NEOSHO NATIONAL FISH HATCHERY RECOGNIZED WITH AWARD. The [Neosho \(MO\) Daily News](#) (12/20, 11K) reports that the Neosho National Fish Hatchery has been awarded one of only five 2013 Department of the Interior Team Achievement Awards. The award recognized Neosho's efforts in the Climate Change Goals of the Department. In addition to this national award, Janice Eaton, "who manages the reception desk at the hatchery was honored by the Friends of the Neosho National Fish Hatchery."

FWS URGED NOT TO DOWNGRADE STATUS OF MANATEES. In an editorial the [Tampa Bay \(FL\) Times](#) (12/22, 78K) urges the state "to figure out what's killing Florida manatees at an alarming rate." According to the paper, "with days remaining before the end of 2013, the number of manatee deaths in a single year has topped 800, reaching that mark for the first time since records in Florida started being kept in the 1970s." Also, the paper urges the FWS to "not grant a petition being considered that would downgrade the status of manatees from an endangered to a threatened species."

Record Number Of Manatees Counted On Homosassa River This Week. The [Tampa Bay \(FL\) Times](#) (12/22, 78K) reports that "a record number of manatees were spotted at the Blue Waters on the Homosassa River during an aerial survey in Citrus County this week." The FWS "counted 186 manatees gathered at the Blue Waters area — just outside Ellie Schiller Homosassa Springs Wildlife State Park — beating the previous record of 156 seen in 2009." The article notes that "a total of 600 manatees were spotted in Citrus waters, with the majority, 397, in Kings Bay on the Crystal River."

US Geological Survey:

DIRECTOR SELECTED FOR HAWAII CLIMATE CHANGE CENTER. The [San Francisco Chronicle](#) (12/22, 2.88M) reports that "the first permanent director of the US Department of the Interior's Pacific Islands Climate Science Center has been selected." The USGS "announced last week that David Helweg will be the director of the center, whose headquarters are at the University of Hawaii's Manoa campus." Helweg was "previously deputy director of the USGS Pacific Island Ecosystems Research Center."

Also providing coverage is the [Honolulu Star-Advertiser](#) (12/22, 439K).

USGS RESEARCHERS STUDY CARIBBEAN TSUNAMI RISK. The [Summit County \(CO\) Citizens Voice](#) (12/21, 506) reports that "the risk of a large earthquake and subsequent tsunami may be greater than previously thought," USGS researchers "say after studying the plate boundary in the Lesser Antilles region, where 20 of the 26 Caribbean islands are located." Researchers "estimate that enough unreleased strain may have accumulated offshore of Guadeloupe to potentially create a magnitude 8.0-8.4 earthquake." USGS scientist Gavin Hayes, lead author of the paper, said, "Perception that a mega quake can occur in the Caribbean is low because none have been observed over the past century, and the rate at which the tectonic plates converge is fairly slow. Nevertheless, we show that enough unreleased strain may have accumulated on the subduction zone since the 19th century to generate a mega quake in the future."

USGS STUDY FINDS BROWN TROUT CROWDING OUT NATIVE BROOK TROUT. The [Environment News Network](#) (12/22, 629) reports that "native brook trout, *Salvelinus fontinalis*, populations could be at risk as a result of the introduction of Brown trout, *Salmo trutta*," according to a new USGS study. Scientists "found that, in New

York State, direct interactions between the two species, such as competition for food, have minor effects on diminishing brook trout populations compared to human-caused habitat disturbances." However, "repeated, disproportionate stocking of brown trout in brook trout habitats could drastically decrease brook trout numbers." James McKenna, USGS scientist and lead author of the study, said, "There is great potential for brown trout stocking to reduce native brook trout populations. But brown trout aren't necessarily causing the current brook trout declines, and managers may be able to develop sustainable scenarios to support both fisheries."

ADDITIONAL COVERAGE OF RESEARCH ON HAWAIIAN PETRELS. Additional coverage of the study on Hawaiian Petrels was provided by the [Kaua'i \(HI\) Garden Island News](#) (12/22, 33K).

Securing America's Energy Future:

Renewable Energy:

SENATE APPROVES BILL THAT AUTHORIZES PLANNED FUNDING FOR NEW MEXICO LABS. The Albuquerque (NM) Journal (12/22, 288K) reported that, in an 84-15 vote on Friday, the Senate approved a bill that "maintains planned funding levels in fiscal 2014 for America's national laboratories, including Sandia and Los Alamos in New Mexico, as well as the Waste Isolation Pilot Plant near Carlsbad." The bill also "provides for a federal land transfer to help protect White Sands Missile Range."

Onshore Energy Development:

NEW MEXICO'S OIL, NATURAL GAS PRODUCTION MAKES STATE THIRD LARGEST US NET ENERGY SUPPLIER. The Albuquerque (NM) Journal (12/21, 288K) reported that Federal energy experts say that "New Mexico's petroleum and natural gas production make the state the third largest net energy supplier to the nation." The state's oil Conservation Division said recently that the state's "oil production jumped by another 15 percent in the first six months of 2013, putting New Mexico on track for its sixth consecutive year of growth." The Albuquerque Journal added that this "boom has fueled by high prices for crude, which remained near \$100 per barrel during most of this year."

Offshore Energy Development:

PLAINTIFFS ARGUE THAT BP DIDN'T DO ENOUGH TO CAP MACONDO WELL DURING OIL SPILL. The New Orleans Times-Picayune (12/21, Schleifstein, 700K) reported that "attorneys representing private plaintiffs as well as the states of Louisiana and Mississippi argued Friday" that "BP's lies about how much oil and gas was flowing from the failed well in the days immediately after the blowout...delayed efforts to cap" its Macondo well. However, BP says "that it did everything in its power to halt the flow of oil after the blowout, and was acting during that time under the authority of the federal government." The Times-Picayune reported that the arguments are part of a trial to determine BP's culpability for the Deepwater Horizon spill. The Times-Picayune reported that, according to the Clean Water Act, if BP and its drilling partners' actions are found only to be negligent then they "could be fined a maximum \$1,100 per barrel." However, if their found to have acted with gross negligence or willful misconduct, they will be fined "as much as \$4,300 per barrel." Bloomberg News (12/20, Fisk, 2.32M) provided similar coverage.

Tackling America's Water Challenges:

BOR TO EXTEND REPAYMENT CONTRACT FOR TRINIDAD LAKE. The [Pueblo \(CO\) Chieftain](#) (12/22, 94K) reports that the BOR will "extend the repayment contract for Trinidad Lake to 75 years because prolonged drought has reduced the anticipated use of storage in the reservoir."

BOR SEEKS BERRYESSA TEAM NOMINATIONS. The [Vacaville \(CA\) Reporter](#) (12/22, 57K) reports that the BOR is "requesting nominations for new members of the Lake Berryessa Community Forum Coordinating Team to replace the following five stakeholder group representatives whose terms expire in February 2014: Local Ranchers, Land-based Recreation, Water-based Recreation, Conservation Groups, and Gateway Communities." The bureau will "also accept nominations for the Fish and Wildlife Management stakeholder group representative,

a position that has not yet been filled.”

ADDITIONAL COVERAGE OF BAY DELTA CONSERVATION PLAN. Additional coverage of the Bay Delta Conservation Plan was provided by the [Stockton \(CA\) Record](#) (12/21, Ruhstaller, 123K) and the [Santa Clarita Valley \(CA\) Signal](#) (12/22, 13K).

Empowering Native American Communities:

ASSISTANT SECRETARY WASHBURN TOUTS LAND BUY-BACK PROGRAM. In a blog posted to the White House website, and picked up by the [Indian Country Today Media Network](#) (12/21, 21K), Kevin K. Washburn is the Assistant Secretary for Indian Affairs at the Interior Department, writes that by establishing the Land Buy-Back Program for Tribal Nations, the Interior Department has “made a commitment to work together – with tribes and individual Indian land owners alike – to address the negative impacts of land fractionation in Indian country.” He notes that “over the next 10 years, the Buy-Back Program will make purchase offers to willing sellers in an effort to make land more usable and prevent further fractionation,” and “by doing this, Interior will help expand tribal economic development opportunities across Indian country, and, in turn, restore tribal control over tribal lands and resources in order to build towards true tribal self-determination and ultimately strengthened tribal sovereignty.” Washburn also notes that “in a historic step this week, Interior announced that the very first purchase offers have been sent” to the Oglala Sioux leadership, and “individuals with interests at the Makah Indian Reservation will receive offers as well.”

The post was also picked up by the [Native American Times](#) (12/22, 337).

Also covering the program are the [Char-Koosta News](#) (12/22, 12K), the [Native News Online](#) (12/22), the Beltway Indian, and the [Gering Citizen](#) (12/22).

FEDERAL CONTRACTORS CONCERNED AS TRIBES WAIT FOR CLAIMS. The [Washington Post](#) (12/23, A1, Kindy, 4.28M) reports that after contracts to compensate tribes for running hospitals were “broken with hundreds of other Native American tribes and the debts they were owed snowballed to an estimated \$2 billion, federal contractors joined their court battle, alarmed that the practice might eventually ensnare them as well.” Now, according to agency records, “more than a year after the US Supreme Court ruled for a second time in favor of the tribes and ordered the government to pay up, the two federal agencies that are on the hook — the Indian Health Service and the Bureau of Indian Affairs — have settled fewer than 1 percent of the claims.” Meanwhile, the Obama Administration is “asking Congress to approve a proposal that would permanently limit how much Native Americans could be paid in the future for certain costs associated with government contracts.” Kevin Washburn, assistant secretary for Indian affairs with the Interior Department, “during a congressional hearing last month about the unpaid claims,” said, “There is not enough money to go around to do all of the things the United States should do in Indian Country.” However, “the tribes, not surprisingly, call that excuse unacceptable.”

Also covering the story is the [Washington Post](#) (12/15, 4.28M).

WISCONSIN GOV. WALKER MAY POSTPONE CASINO DECISION UNTIL AFTER 2014 ELECTION. The [Milwaukee Journal Sentinel](#) (12/22, 798K) reports that Gov. Scott Walker “may postpone a decision on whether to approve the \$800million Indian casino proposed for Kenosha until after he stands for re-election in November, according to the governor’s top aide.” Administration Secretary Mike Huebsch said that “the state is hiring outside attorneys and a financial adviser to examine the issue, and they may need the extra time to analyze the off-reservation casino proposed by the Menominee tribe.”

Top National News:

OBAMA WARNS OF POSSIBLE US MILITARY ACTION IN SOUTH SUDAN. The two networks that aired Sunday night – CBS was preempted – reported the latest developments on the ground in South Sudan one week after an attempted coup plunged the nation into turmoil. Neither network, however, reported that President Obama told Congress in a letter Sunday that he may order military action in the country to protect Americans there. And while the crisis in South Sudan is generating front-page headlines in several of the nation’s major dailies – including the Wall Street Journal and the Washington Post – the President’s warning is not the focus of the

reports.

NBC Nightly News (12/22, story 3, 0:30, Holt, 7.86M) reported briefly that according to the State Department, "an unspecified number of Americans were safely evacuated today from the African nation of South Sudan." The Americans and other foreigners "were air lifted on US and United Nations helicopters." ABC World News (12/22, story 5, 0:25, Jarvis, 7.43M) also reported briefly on the evacuations, noting that on Saturday, "three US military aircraft were attacked by ground fire," and "four US troops were wounded."

The AP (12/23) reports briefly that the President informed lawmakers that "about 46 US troops were deployed Saturday to help evacuate Americans," in addition to "another 45 troops deployed to reinforce the US Embassy in Juba." The AP notes that he is spending the holiday in Hawaii, but "was briefed by advisers on events in South Sudan."

AFP (12/23) notes the move comes after "unidentified gunmen shot at three CV-22 Osprey," wounding four US servicemembers and "forcing the military aircraft to abort a mission to evacuate Americans" in the city of Bor. Reuters (12/23) quotes a statement released Sunday by the White House as warning, "Any effort to seize power through the use of military force will result in the end of longstanding support from the United States and the international community."

On its website, the Los Angeles Times (12/23, Reston, 3.07M) reports that White House officials "said the notification should not be interpreted as an escalation of US military operations in the region." The Times calls the move an indication the President "appeared to be leaving his options open."

The New York Times (12/23, Parker, 9.61M) reports on its "The Caucus" blog that Obama's letter is "consistent with the War Powers Resolution of 1937," and "does not necessarily mean that the administration plans further increases in its military operations in the region."

In a statement Sunday, USA Today (12/23, Bacon, Michaels, 5.82M) reports the State Department said roughly 380 Americans and 300 others were safely evacuated on Sunday from Bor. Spokesperson Jen Psaki said in a statement that the US is also "doing everything possible to ensure the safety and security of United States citizens in South Sudan," but would not discuss "specific plans," citing security.

The New York Times (12/23, Gordon, Kushkush, Subscription Publication, 9.61M) says Sunday's evacuation in Bor "suggests that rebel commanders in that area of Jonglei State maintain sufficient control of their troops to facilitate the safe departure of the American citizens at the compound. But it also raised the question of why the United States needed to attempt the previous mission using Osprey aircraft," and "whether the diplomatic groundwork with rebel commanders and South Sudanese officials for the aborted Saturday operation had been adequately prepared."

The Wall Street Journal (12/23, A1, Vogt, Subscription Publication, 5.91M), meanwhile, reports on its front page that rebels allied with former Vice President Riek Machar solidified control of territory they seized over the past week as tens of thousands of refugees have already fled the country. Secretary of State Kerry spoke Saturday with President Salva Kiir and "made clear that continued violence endangers the vision set forth at the time of South Sudan's independence," the State Department said. US special envoy Donald Booth is also traveling to Juba, where he hopes to help an East African delegation broker a deal between Kiir and Machar.

The Washington Post (12/23, A1, Raghavan, 4.28M), in a front-page story, examines the relationship between Kiir and Machar, whom it says are "at the center of what could be the unraveling of this fragile African country into full-blown civil war." While Kiir accused Machar last week of plotting a failed coup, "analysts and diplomats say they are not convinced that Machar was attempting a coup. Instead, they say, last week's fighting was probably triggered by long-simmering ethnic and political tensions within the government and the military."

The AP (12/23, Muhumuza) reports Machar's forces have gained control of Bentiu, the capital of "a key oil-producing state." And Bor, where US forces came under attack over the weekend, "is said to be the scene of some of the fiercest clashes" between government troops and rebels.

Bloomberg News (12/23, Salant, Ngor, Ombok, 1.91M) reports as violence continues, South Sudan "evacuated

some oil employees and plans a partial shutdown of facilities," Petroleum Minister Stephen Dhieu Dau said in a phone interview.

In response to the ongoing violence, Reuters (12/23, Odera, Makon) reports the UN said Sunday that it was trying to deploy additional peacekeeping forces from other missions in the region. "We are now actively trying to transfer our assets from other peacekeeping missions like" the Democratic Republic of Congo, "and some other areas," Secretary-General Ban Ki-moon said.

AFP (12/23) reports the UN's "humanitarian chief" in South Sudan, Toby Lanzer, warned Sunday the country has "unravalled" since last week's failed coup attempt. "It would have been difficult one week ago to imagine that things would have unravalled to this extent," Lanzer said. Also reporting on the violence are Voice of America (12/23, 34K) and the BBC News (12/23, 1.62M), among other news outlets.

In an editorial, the Christian Science Monitor (12/22, 540K) urges "the US, Europe, and others with well-formed democracies" to play a role in resolving the current crisis in South Sudan, as well as in the Central African Republic, arguing that "they know the sacrifice that was needed for their own unity," and "must decide how much to sacrifice to help other peoples find their unity."

ADMINISTRATION ALLOWS MORE OIL PRODUCTION TO HELP CLEAN UP COAL INDUSTRY. The AP (12/23, Capiello) reports that the government allowing coal-fired power plants to sell carbon dioxide to oil companies, which pump it into the ground to force more crude to the surface, demonstrates the "ingenuity of the oil industry, which is using government green-energy money to subsidize oil production," as well as "the environmental trade-offs Obama is willing to make, but rarely talks about, in his fight against global warming." The AP says the government's move "hits a political sweet spot" because it "silences critics who say the administration is killing coal and discouraging oil production," and "appeases environmentalists who want Obama to get tougher on coal, the largest source of carbon dioxide." Meanwhile, it allows the President "to make headway on a second-term push to tackle climate change."

OBAMA FACES TOUGH FIGHT TO GAIN FAST TRACK AUTHORITY. The Washington Times (12/23, Hill, 417K) reports that while the President is pushing to negotiate trade deals with Asia and Europe, he "faces an uphill battle next year in Congress" to get the "fast track" authority his predecessors had to finalize the agreements. Analysts say that without the authority, his "hopes to enact trade deals before he leaves office may be doomed." According to the analysts, Democratic opposition to freer trade and Republican reticence to grant him the authority "endanger legislation in what could be a cliffhanger vote early next year." The President "will have to rely heavily on Republicans and a smattering of centrist Democrats to win fast-track authority," but that coalition "has been frayed by distrust of Mr. Obama among tea party and other conservative groups — one among many signs that the traditional Republican enthusiasm for free trade is waning among the party's more populist elements."

Editorial Wrap-Up:

NEW YORK TIMES. "A Small Step Toward More Mercy." The New York Times (12/23, Subscription Publication, 9.61M) editorializes that President Obama's decision last week to commute "the outrageously long drug sentences of eight men and women showed a measure of compassion and common sense," but it "also served to highlight the injustice being done to thousands of prisoners under federal sentencing laws." The Times notes that despite the "now fairly widespread agreement that federal drug laws are far too harsh and inflexible, and that their burden falls most heavily upon the poor and racial minorities," President Obama was "able to identify only a handful of people worthy of clemency." The Times partly blames the pardon office, "which has been ineffective in doing its job in processing clemency requests." The Times concludes that the president "did not create the broken criminal justice system, but he can do much more to lessen its impact on those who have been most unfairly punished by it."

"Dark Days In Egypt." In an editorial titled "Dark Days In Egypt," the New York Times (12/23, Subscription Publication, 9.61M) criticizes last week's raid of a human rights organization in Egypt and charges filed against former president Mohamed Morsi for participating in what it calls "a fantastical terrorist plot." But instead of condemning the moves, the Senate Foreign Relations Committee "approved legislation that would make it easier to resume aid" — a move the Times says Egypt's interim leaders "are almost certain to interpret that as an

endorsement of their authoritarian methods.”

“Congress’s Temerity On Gun Safety.” The New York Times (12/23, Subscription Publication, 9.61M) editorializes that despite “lawmakers’ copious sympathy for the 26 victims of the Newtown, Conn., school massacre, all members of Congress were able to manage in the way of gun safety as they left town was renewal of the ban on the manufacture of plastic firearms,” a “type of arcane weapon that figured not at all in the Sandy Hook Elementary School rampage in 2012, nor in the mass shootings featuring adapted weapons of war that have occurred on average every two weeks somewhere in America.” The Times notes that in extending the ban on plastic firearms, “both the House and the Senate voted by voice so members could duck individual accountability,” a process the Times calls “a sad reminder of this Congress’s determined avoidance of meaningful laws controlling the lethal (metal) weapons regularly scourging the land.”

WASHINGTON POST. “Coming On Strong’ In D.C.” In an editorial the Washington Post (12/23, 4.28M) praises the progress made by students in DC public schools, noting that according to new data, the DC Public School (DCPS) is “the system with the greatest improvement of any urban district in the nation,” having shown “statistically significant growth in both reading and math, and at both grade levels tested.” The Post adds that in the wake of these improvements, DC must not “stray from the course of school reform started in 2007 with mayoral control.”

“Year Of Immigration Reform.” An editorial in the Washington Post (12/23, 4.28M) argues that the current immigration system, under which illegal immigrants are deported, “is unworkable and counterproductive; it neither fixes a broken system nor meets the economy’s demand for labor.” Noting “hostility from the GOP’s rank-and-file to a pathway to citizenship,” the Post cites a proposal for “deportation relief without citizenship,” saying that while it is “not an ideal solution,” something “has to move the ball on immigration in Congress, where it has been stalled for more than seven years.”

“Scholars With Blinders.” In an editorial, the Washington Post (12/23, 4.28M) condemns a vote by members of the American Studies Association to boycott Israeli academic institutions to protest Israeli “state policies that violate human rights” of Palestinians, “including academic freedom for scholars and students.” The Post acknowledges that while the boycott is “largely symbolic,” it’s also “terribly misguided.” It argues that a more appropriate response would have been to engage with both sides through “scholarly conferences and exchanges.”

WALL STREET JOURNAL. “Obama’s Iran Sanctions Veto.” In an editorial, the Wall Street Journal (12/23, Subscription Publication, 5.91M) criticizes President Obama for threatening to veto any new sanctions against Iran, which it argues will do nothing to undermine current talks with Iran if Tehran is serious about giving up its nuclear weapons.

“The Podesta Hire.” An editorial in the Wall Street Journal (12/23, Subscription Publication, 5.91M) argues that John Podesta’s new role in the White House will be to push the President’s liberal agenda through regulation without regard to congressional action or desire. The Journal says that Podesta’s hiring is a sign that the President intends to rule even more by executive action and conflict with Republicans.

“The Baucus To Beijing Gambit.” In an editorial, the Wall Street Journal (12/23, Subscription Publication, 5.91M) cites the political calculations behind the President’s decision to nominate retiring Sen. Max Baucus to be US Ambassador to China. Noting that Mitt Romney carried Montana by nearly 14 percentage points, the Journal points out that by getting Baucus to leave his seat early, it increases Democrats’ chances to hold on to it. Democratic Gov. Steve Bullock is expected to appoint Lt. Gov. John Walsh, who is already running for the Baucus seat. The early appointment, notes the Journal, may enable Walsh to avoid a primary fight and establish greater statewide name recognition.

By [Lenny Bernstein](#), Updated: Wednesday, December 25, 9:23 PM [E-mail the writer](#)

Sally Jewell would rather scale the Washington Monument than sit in one more meeting about cutting her budget. This is not just hyperbole. The secretary of the interior has done both and clearly prefers the former. Jewell clipped into a safety harness in June and ascended what she calls the monument's "exoskeleton," an elaborate, 55-story structure erected for its repair that most people would call "scaffolding." With philanthropist [David Rubenstein, who is paying for half the work on the monument](#), and several others, Jewell easily climbed the scaffold's stairs and a ladder to the top, where she reached the monument's aluminum cap and took in a magnificent view of a place she barely knew.

In a city where "climber" normally has less-than-positive connotations, Jewell, 57, is an accomplished and remarkably fit mountaineer who has scaled the other Washington's [Mount Rainier](#) seven times, as well as Antarctica's tallest peak, [Mount Vinson](#), and Mont Blanc, the highest mountain in Western Europe.

Was James Bond an impotent binge drinker with a tremor?

Associated Press DEC 23
 "Shaken, not stirred" may have covered an alcoholic tremor, while drinking may have hurt his sex life.

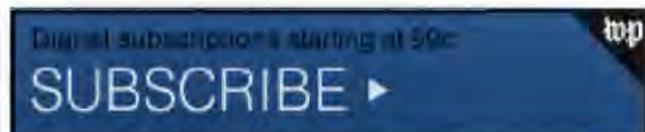

That is just the beginning of what makes the 51st secretary of the interior one of the more unlikely government officials in town. She is only the second woman to hold the post (which she assumed in April), and, unlike Ken Salazar, Dirk Kempthorne, Gale Norton, Bruce Babbitt and most others in the decades before her, she is not a Western politician. In fact, she has never held elective office and says she is not interested in running for one. She is an engineer-turned-banker-turned-CEO of Recreational Equipment (REI), the outdoor gear cooperative that had [nearly \\$2 billion in sales](#) last year.

She is a pragmatist learning to manage a raft of contentious issues. To those Beltway insiders with hard-line opinions on hydraulic fracturing for oil and gas, Jewell can say — and does — that she has fracked wells herself.

But until recently, she had never taken on a petulant senator, shut down a \$12 billion organization with more than 70,000 employees for 16 days, negotiated the emergency reopening of several national parks, lopped millions of dollars from her budget to comply with sequestration, worked with Indian tribes or confronted restive environmental groups, to name just a few of her new duties.

"It can be a breath of fresh air to not be stuck in the Washington ways," said [Gene Karpinski, president of the League of Conservation Voters](#) and a veteran of endless battles over environmental protection. "That is not a negative in any way. The key is understanding the tools you have at your disposal to make progress."

Jewell gave up a salary of \$1.98 million (she is anticipating, however, an REI bonus of \$1 million to \$1.2

million) to come to Washington, according to her financial disclosure form. "I have always had an interest in making a difference," she said in an interview, "having an impact in a positive way."

So instead of handing out dividends to grateful REI members, she has taken command of an agency where the only guarantee is that every decision will irritate, if not infuriate, some powerful constituency, from green groups

to coal miners. Take the [gray wolf off the endangered species list](#)? Some conservationists are appalled. Put the sage-grouse on? Not if ranchers have their way. Open more federal land to fracking? Over the dead bodies of many environmental groups.

"It's a tough job and I don't care who you put in there," said [Cecil D. Andrus](#), who held the post during the Carter administration. "It's a tough time to be in Washington, a tough time to be in the Cabinet," said Salazar, Jewell's predecessor. "It's just tough to be a manager in Washington, and that's what a Cabinet officer is."

Yet even some of Jewell's antagonists call her outsider perspective refreshing. In May, at a closed meeting with conservation groups, she got into an argument over fracking with [Michael Brune](#), the outspoken executive director of the Sierra Club, according to several people with knowledge of the incident.

A more seasoned Washington hand might have responded to Brune's criticism with something vaguely conciliatory. But the chief executive of a major company usually doesn't put up with such lip. Whatever combination of those personas Jewell is now, she has never been known to mince words.

Some people appreciate that. Among them is Brune himself.

"I like her a lot," Brune said. "She's energetic, she's direct, very candid, honest. She is different from most people in the administration or up on the Hill just for those qualities. She's there to get a job done. She's not there to build a career, necessarily."

In a narrow conference room in Awendaw, S.C., last month, Jewell addressed an overflow crowd of local officials, government parks employees, environmentalists and others concerned about the [Cape Romain National Wildlife Refuge](#). Dressed in her usual outfit of high-end outdoor gear and walking shoes, water bottle always at hand, Jewell was self-deprecating, amusing and blunt as she spoke off-the-cuff and answered questions from her sympathetic audience.

But the visit was layered with serious messages — and an implicit political one directed at a man who wasn't there.

As one of President Obama's lieutenants in the battle against climate change — Environmental Protection Agency Administrator Gina McCarthy is the main face of the Cabinet effort — Jewell expressed her alarm at the one-foot rise in sea level the area has experienced over the past century. Later that day, she toured [Bulls Island](#), which has suffered substantial erosion.

Plenty of places across the country are eroding, but Jewell chose South Carolina, which has a majority-Republican congressional delegation that is less than supportive of Obama's proposal for mandatory full funding of Interior's [Land and Water Conservation Fund](#), one of the agency's main tools for upgrading places such as the refuge.

"We do live in a democracy. It responds to voter input," Jewell told her listeners. "Make sure your voices are heard by your elected officials."

One of those officials is Sen. Lindsey O. Graham (R-S.C.), who has placed a hold on the confirmation of Michael Connor as Interior's deputy secretary until he gets information he is seeking on the 2012 attack on the U.S. Embassy in Benghazi, Libya. Although the senatorial strong-arm tactic never came up in South Carolina, Jewell's message was clear: There are critical environmental issues in Graham's home state. Why not allow her the staff she wants to address them?

Jewell moved on to the budget. She noted that five people do the work at the 66,287-acre refuge, down from 13 a decade ago. She called the budget sequestration "ridiculous." Jewell spent 35 years in business, she reminded her audience, and "you would never manage a budget by cutting across the board."

At REI, Jewell is credited with restoring profitability after some questionable decisions before her tenure. Before that, she rose through the ranks at several banks, eventually overseeing Washington Mutual's entire loan portfolio after initially being hired to provide advice on lending to the oil industry. In the first part of her career, she worked in the oil industry as an engineer. She is married to Warren Jewell, an engineer whom she met while both attended the University of Washington. The couple have two grown children.

She was offered a spot as an assistant secretary at Interior early in Obama's first term but turned it down, saying the time was not right for her to leave REI, according to people with knowledge of the discussions.

Jewell's environmental credentials, personal and professional, are widely acknowledged by the myriad groups that fight fiercely for government protection of open spaces and wildlife.

She moved to Washington state from Britain with her family at the age of 3 and has been camping, kayaking and climbing ever since. In an [October speech in which she outlined her vision for the department](#), she promised that Obama would use the Antiquities Act to preserve more wilderness in the face of a Congress that, for the first time in half a century, has failed to set aside a single acre since 2010. In recent months, Interior oversaw the first two auctions of offshore wind farms, a process begun under Salazar.

[Tom Kiernan, the chief executive of the American Wind Energy Association](#) who survived a potentially deadly ice fall while climbing Mount Rainier with Jewell, calls her "an outstanding leader for Interior and an outstanding outdoorswoman."

But she can't please everyone.

"I didn't see leadership from Secretary Salazar on endangered species, and I'm hopeful I'll see it from Sally Jewell. I haven't seen it yet," said [Jamie Rappaport Clark, president of Defenders of Wildlife](#) and a former Interior official.

Jewell made environmentalists happy this week when, like Salazar before her, she [refused to allow construction](#) of a one-lane gravel road through a portion of Alaska's Izembek National Wildlife Refuge to the tiny, remote town of King Cove, which has spent years seeking the road for medical evacuation access to an all-weather airport. The town and the state of Alaska had proposed a land swap to get the road built. But Jewell said four years of analysis showed that the acreage that would have been added to the refuge would not compensate for the road's impact.

During the October government shutdown, Jewell worked out an unusual agreement that allowed states to pay to reopen national parks such as Utah's [Bryce Canyon](#) and New York's Statue of Liberty, to keep revenue flowing and visitors happy. But the visual that captured more attention — and ultimately overshadowed the deal Jewell had worked out with the states — was a group of elderly Mississippi veterans, some in wheelchairs, storming the shuttered World War II monument when the Park Service refused to let them in.

The development of energy resources on public lands is even more treacherous terrain. Interior oversees 20 percent of the land in the United States, some of which contains oil, gas and coal that energy companies and

Indian tribes want to extract. Jewell has outlined a regional approach that will allow the federal government to set aside some areas as too "special" for drilling or mining, while offering others for development.

She is not torn by the department's dual missions of conservation and promotion of energy development. "I don't feel like it's in conflict," she said. "Development is important for economic opportunity and health and well-being. But development should be balanced and recognized for its impact."

[But revised fracking rules](#) issued in May on the use and disposal of fluids and chemicals to release trapped oil from rock made no one happy. "It was a bad rule initially and, from our point of view, it's gotten worse," said Sharon Buccino, director of the land and wildlife program for the Natural Resources Defense Council, which now wants a moratorium on new fracking. The oil industry wants regulations left in the hands of states. Interior's Bureau of Land Management "has yet to answer the question why BLM is moving forward with these requirements in the first place," said Erik Milito of the American Petroleum Institute.

Babbitt, breaking the silence that past holders of the Interior post traditionally afford the current occupant, said in a National Press Club speech the day before Jewell was nominated that "Americans expect their public lands to supply more energy for today. But they also expect more parks, wilderness and open space for tomorrow. And that balance between development and land conservation is not being maintained." Babbitt said the administration has leased more than 6 million acres to the oil and gas industry while permanently protecting only 2.6 million.

Then there are Indian tribes, which the administration is trying to strengthen. "I was elected to provide basic services and jobs to my citizens and I will steadfastly and responsibly pursue Crow coal development to achieve my vision for the Crow people," Crow Nation Chairman Darrin N. Old Coyote testified to Congress.

Although she outlined her vision for the next three years in her October speech, Jewell said she is still listening and learning. She had traveled more than 65,000 miles as of Dec. 2, according to Interior figures, a total that has raised an eyebrow or two.

Andrus, the former Interior secretary under Carter, warned that one way the bureaucracy wears out a secretary is to keep that person on the road. Whether the boss is a top-flight corporate executive or a longtime politician, an organization's workers know they will be there when he or she moves on, and their keenest interest is often protecting themselves.

Andrus said he drew up a list of nine priorities when he started the job and kept it in the top right-hand drawer of his desk. From time to time he'd pull it out and review it to make sure he wasn't being distracted from his mission.

"You have to drive the train," he said. "Somebody has to be the boss."

Jewell, who appears to be setting her own travel agenda, said there are secondary motives for her journeys: Employees are more likely to speak truth to power when they're out with her instead of sitting in her huge office. She followed the same practice at REI.

"One of the hardest things to do," she told the group in in South Carolina, "is to get people to tell you what's on their minds. . . . I try to get out on the land, try to spend time with the people who are doing the work."

Wherever possible, Jewell also tries to spend time with children. In a visitor's center in Awendaw, she poked through oyster shells and other muck with a classroom full of children who had returned from a dig. She asked questions and pointed out interesting finds. She became a soft-spoken biology teacher for a few minutes, the kind of person who thinks of scaffolding as an exoskeleton.

DEPARTMENT OF THE INTERIOR Mail - Washington Post: Sally Jewell at a different kind of summit: Head of the Department of the Interior

Jewell served on trail crews when she was younger; now one of her top goals is to create a million-member conservation corps that would get younger people back into the nation's parks, enjoying them and helping to maintain them. White middle-aged people and their elders are over-represented among parkgoers, as succeeding generations have taken up positions in front of computer and video-game screens.

"We are in the forever business," she said later. "We are in the business of protecting these resources forever."

[E-mail the writer](#)

Sally Jewell would rather scale the Washington Monument than sit in one more meeting about cutting her budget. This is not just hyperbole. The secretary of the interior has done both and clearly prefers the former. Jewell clipped into a safety harness in June and ascended what she calls the monument's "exoskeleton," an elaborate, 55-story structure erected for its repair that most people would call "scaffolding." With philanthropist [David Rubenstein, who is paying for half the work on the monument](#), and several others, Jewell easily climbed the scaffold's stairs and a ladder to the top, where she reached the monument's aluminum cap and took in a magnificent view of a place she barely knew.

In a city where "climber" normally has less-than-positive connotations, Jewell, 57, is an accomplished and remarkably fit mountaineer who has scaled the other Washington's [Mount Rainier](#) seven times, as well as Antarctica's tallest peak, [Mount Vinson](#), and Mont Blanc, the highest mountain in Western Europe.

Associated Press DEC 23
"Shaken, not stirred" may have covered an alcoholic tremor, while drinking may have hurt his sex life.

That is just the beginning of what makes the 51st secretary of the interior one of the more unlikely government officials in town. She is only the second woman to hold the post (which she assumed in April), and, unlike Ken Salazar, Dirk Kempthorne, Gale Norton, Bruce Babbitt and most others in the decades before her, she is not a Western politician. In fact, she has never held elective office and says she is not interested in running for one. She is an engineer-turned-banker-turned-CEO of Recreational Equipment (REI), the outdoor gear cooperative that had [nearly \\$2 billion in sales last year](#).

She is a pragmatist learning to manage a raft of contentious issues. To those Beltway insiders with hard-line opinions on hydraulic fracturing for oil and gas, Jewell can say — and does — that she has fracked wells herself.

But until recently, she had never taken on a petulant senator, shut down a \$12 billion organization with more than 70,000 employees for 16 days, negotiated the emergency reopening of several national parks, lopped millions of dollars from her budget to comply with sequestration, worked with Indian tribes or confronted restive environmental groups, to name just a few of her new duties.

"It can be a breath of fresh air to not be stuck in the Washington ways," said [Gene Karpinski, president of the League of Conservation Voters](#) and a veteran of endless battles over environmental protection. "That is not a negative in any way. The key is understanding the tools you have at your

disposal to make progress."

Jewell gave up a salary of \$1.98 million (she is anticipating, however, an REI bonus of \$1 million to \$1.2 million) to come to Washington, according to her financial disclosure form. "I have always had an interest in making a difference," she said in an interview, "having an impact in a positive

way."

So instead of handing out dividends to grateful REI members, she has taken command of an agency where the only guarantee is that every decision will irritate, if not infuriate, some powerful constituency, from green groups to coal miners. Take the [gray wolf off the endangered species list](#)? Some conservationists are appalled. Put the sage-grouse on? Not if ranchers have their way. Open more federal land to fracking? Over the dead bodies of many environmental groups.

"It's a tough job and I don't care who you put in there," said [Cecil D. Andrus](#), who held the post during the Carter administration. "It's a tough time to be in Washington, a tough time to be in the Cabinet," said Salazar, Jewell's predecessor. "It's just tough to be a manager in Washington, and that's what a Cabinet officer is."

- + Holiday Spending Up 3.5%.

DOI in the News:

SECRETARY JEWELL PROFILED. The [Washington Post](#) (12/26, Bernstein, 4.28M) profiles Interior Secretary Sally Jewell, "an engineer-turned-banker-turned-CEO of Recreational Equipment (REI), the outdoor gear cooperative that had nearly \$2 billion in sales last year." According to the Post, Jewell is "pragmatist learning to manage a raft of contentious issues" who has "fracked wells herself." The Post says she has "taken command of an agency where the only guarantee is that every decision will irritate, if not infuriate, some powerful constituency, from green groups to coal miners."

The [Washington Post](#) (12/26, 4.28M) also runs a photo gallery of Jewell.

Also covering the story are the [Seattle Times](#) (12/27, 1M) and the [Pechanga](#) (12/27).

ENDANGERED SPECIES ACT APPROACHES 40TH ANNIVERSARY. As the Endangered Species Act approaches its 40th anniversary, the [International Business Times](#) (12/26, 237K) reflects on the law's successes and failures. In a statement, Interior Secretary Sally Jewell said, "This landmark law has helped to stop the slide

towards extinction of hundreds of species. Along the way, we have strengthened partnerships among states, tribes, local communities, private landowners and other stakeholders to find conservation solutions that work for both listed species and economic development." According to the article, "on the balance, the ESA's signature feature, the endangered species list, seems overwhelmingly positive." However, "criticisms abound." For instance, "getting on the endangered species list is no easy feat, with layer upon layer of bureaucracy and reviews and studies and comments and proposals."

In an op-ed for the Olympian (WA) (12/24, 119K), former Congressman Norm Dicks writes that the Endangered Species Act has "helped save salmon in the Northwest." He notes that "on the 40th anniversary of the Endangered Species Act, many of our salmon populations have returned in record-breaking numbers." Dicks claims that "the ESA is working for the Northwest's salmon populations," and "that's just one of many great wildlife success stories of the Endangered Species Act."

Also providing coverage are the Huffington Post (12/27, Greenwald, 11.54M), the Brattleboro (VT) Reformer (12/26, 22K), the Austin (TX) American Statesman (12/26, 456K), and the Minnesota Farm Guide (12/26, 83K).

SENATORS URGE APPROPRIATORS TO KEEP PILT PROGRAM. In its "Floor Action" blog, The Hill (12/26, 194K) reports that Sens. Mike Enzi and Tom Udall have "urged leaders of the Senate Appropriations Committee to keep a \$425 million program, Payment in Lieu of Taxes (PILT)." In a letter Monday to committee Chairwoman Barbara Mikulski and ranking member Richard Shelby, Enzi and Udall "argued the program helps localities offset losses from non-taxable federal lands." The article notes that "fifteen other senators joined Enzi and Udall — most from states with large amounts of federal land and forests."

Also reporting on the story is the Albuquerque (NM) Business First (12/26).

OFFICIALS LOOK TO TRAINING OVERHAUL FOR WILDFIRE AGENCIES. The Ravalli (MT) Republic (12/26, 19K) reports that "while the Forest Service has formalized its requirements for leadership education and advancement, that hasn't happened among its wildland firefighting partners," including the BLM, NPS, BIA, and FWS. Jim Cook, "a retired fire superintendent with 37 years of wildland firefighting experience, would like to see curriculum institutionalized by all wildfire agencies to require more than the two mandatory classes: L180, a four-hour class on Human Factors and Wildland Service, and L280, a two-day course on Followership to Leadership." According to the article, "while such an education overhaul would require infusions of time and money, it also could ameliorate problems that inevitably occur when mixed crews from varied agencies suddenly are thrown together on large fires, where good leadership is imperative."

CONCERN GROWS OVER RUM COVER-OVER RATE. The Virgin Islands Daily News (12/26, 49K) reports that "some V.I. officials say they believe that Congress will keep the rum cover-over rate high by renewing the extender — but the question, they say, is when." However, "others have expressed concern about whether the extender will be passed at all." The article notes that "the territory typically requests and receives an advance payment from the US Department of Interior on anticipated V.I. rum cover-over revenues for the upcoming fiscal year," and "Interior said it would process a second payment if Congress renews the higher rate."

COMMENT PERIOD ON SAGE GROUSE PROPOSALS EXTENDED. The Reno (NV) Gazette-Journal (12/25, 165K) reports that the FWS, the BLM and the Forest Service extended last week the public comment period on the Bi-State Distinct Population Segment of greater sage grouse. The FWS extended its public comment period for 45 days, from Dec. 27, while the BLM/USFS extension is to Jan. 29.

DESIGNATION OF ACRES IN SAN JUAN ISLANDS NOTED AS ONE OF THE TOP STORIES OF 2013. The Journal of the San Juans (WA) (12/26) chooses the designation of more than 1,000 acres on dozens of the San Juan islands as National Conservation Lands as one of the top ten stories of 2013.

SECRETARY JEWELL CRITICIZED OVER KING COVE ROAD DECISION. In an editorial, the Alaska Journal of Commerce (12/26, 14K) criticizes "the Dec. 23 announcement from Interior Secretary Sally Jewell to uphold the denial of a road between King Cove and Cold Bay." According to the paper, the decision "couldn't be less surprising," considering Jewell's track record, such as her rejection of "a request by the State of Alaska to conduct new seismic exploration of ANWR." The paper predicts that "Jewell will never, ever make a decision regarding Alaska that goes against the wishes of the Democrats' extremist environmental base."

Also providing coverage of the decision are the [Alaska Dispatch](#) (12/23, 7K), the [Alaska Journal of Commerce](#) (12/26, 14K), the [Anchorage \(AK\) Daily News](#) (12/24, 198K), the [Fairbanks \(AK\) News-Miner](#) (12/26, 44K), the [Kenai \(AK\) Peninsula Clarion](#) (12/23, 17K), the [Ketchikan \(AK\) SitNews](#) (12/26), the [Alaska Native News](#) (12/26, 245), the [Olympian \(WA\)](#) (12/23, 119K), [NBC News](#) (12/26, 6.79M), [CBS](#) (12/23, 3.87M), [CNS News](#) (12/26, 95K), the [Engineering News Record](#) (12/24, 2K), the [Pechanga](#) (12/26), [KTUU-TV Anchorage, AK](#) (12/26, 4K), and [KTBY-TV Anchorage, AK](#) (12/26, 122).

ACTION URGED TO ADDRESS COLORADO RIVER CHALLENGES. In an op-ed for the [Arizona Republic](#) (12/18, 1.19M), Steve Goetting, vice president of the Diamond S Ditch Corporation, and Margaret Bowman, deputy director of the environment program at the Walton Family Foundation, note that Interior Secretary Sally Jewell "gave a speech Dec. 13 to the major water users in the Colorado River Basin, calling on them to take immediate action to address the region's water supply challenges." According to the two, "the challenges in the Colorado River basin are large, but the good news is that cost effective solutions are available and already being tested in different parts of the basin." They argue that "Implementing these solutions now will be good not only for the region's iconic Colorado River, but also for the region's economy."

NATIONAL MONUMENT DESIGNATION FOR BOULDER-WHITE CLOUDS REGION SUPPORTED. In an op-ed for the [Idaho Mountain Express](#) (12/27, 36K), John Freemuth, a professor of public policy, argues in favor of the possible designation of the Boulder-White Clouds region of Central Idaho. He notes that "the president has the authority to designate the management agency; in this case it will certainly be the Forest Service and the Bureau of Land Management," so "concerns about National Park Service management are unwarranted." Freemuth goes on to dismiss other concerns says that "the bigger concern these days, from former governor and Interior Secretary Dirk Kempthorne to former Craters of the Moon Superintendent and now National Park Service Director Jon Jarvis, is that young people are not very interested in the outdoors."

America's Great Outdoors:

National Park Service:

MAYORS PLAN TO LOBBY FOR LAND AND WATER CONSERVATION FUND. The [Fort Worth \(TX\) Star-Telegram](#) (12/25, 596K) reports that Mayor Betsy Price will "co-chair a national campaign to seek more national funding of parks as Fort Worth faces an unfunded five-year parks need of about \$58 million." The Land and Water Conservation Fund is "scheduled to end in September 2015, unless Congress reinstates it." According to the article, "the mayors are not just seeking an extension of the fund, but also want to ensure that all the money committed to the Land and Water Conservation Fund to goes to land and water projects."

NPS HELPING TO IMPROVE EMERALD VIEW PARK. [WESA-FM Pittsburgh](#) (12/27, 2K) reports that Emerald View Park is "one of 11 Pennsylvania parks selected for improvements through the NPS Rivers, Trails and Conservation Assistance program." Ilyssa Manspeizer, the director of park development and conservation at the Mt. Washington Community Development Corporation, said NPS is "helping to develop a trail use survey strategy."

EVERGLADES NATIONAL PARK PROPOSED MANAGEMENT PLAN CALLS FOR END TO PRIVATE AIRBOATING. The [Miami Herald](#) (12/27, Cocking, 806K) reports that the Everglades National Park's "proposed general management plan for the next 15 to 20 years calls for an end to all private airboating in the East Everglades once the 'grandfathers' who operate there now have died." According to the article, "as for longtime commercial airboat tour operators along the Trail — Coopertown, Everglades Safari Park, and Gator Park — the park proposes to buy their properties, turn them into concessionaires and confine their operations to a 'front country zone' of about 10,000 to 11,000 acres just south of the Trail." If the "park's preferred plan is adopted sometime next year, then the rest of the East Everglades — more than 80,000 acres — would be designated as wilderness with no mechanical propulsion — even bicycles — allowed."

GREAT SMOKY MOUNTAINS NATIONAL PARK POSES MAINTENANCE CHALLENGES. The [Maryville \(TN\) Daily Times](#) (12/26, 64K) reports on the challenges faced by the maintenance workers at Great Smoky Mountains National Park. The park has "to balance its short-term and long-term needs as it competes for funding

for capital projects within all 68 parks of the National Park Service's Southeast Region," and it "has to find a balance between what needs it can directly address and when to partner with local governments that already provide similar services."

INDIANA DUNES NATIONAL LAKESHORE ABANDONS PLAN TO BUILD AT PORTER BEACH. The [Times of Northwest Indiana](#) (12/26, 283K) reports that the Indiana Dunes National Lakeshore has "abandoned plans to build a parking lot and picnic shelter at Porter Beach after receiving public comments that were not in support of the plan," according to Bruce Rowe, public information officer for the IDNL. According to the article, despite receiving a Finding of No Significant Impact from the NPS for the Wabash Avenue/Porter Access Site for Indiana Dunes National Lakeshore, "a formality of the plan process, officials decided to scrap their plans and instead go with an alternative plan to improve a sidewalk, restore the dune north of the town parking lot, and repair a leaking foot wash at the area commonly known as Porter Beach." Rowe said, "We had one public comment session where folks could give their input and we opened it up to a public comment period on the website and after that period, based on the feedback we received, it was decided that we would not put the additional parking lot in, we would not put the picnic pavilion in, and instead we would make the improvements."

DISPUTE OVER BACKCOUNTRY ACCESS IN GRAND CANYON HEATS UP. The [Arizona Daily Sun](#) (12/26, 33K) reports that the superintendent of Grand Canyon National Park has "drawn the ire of avid backcountry users after a letter he sent to the chairman of the Havasupai Tribe popped up online." In the, David Uberuaga "offered to seasonally allow just one permit a week into a piece of land that covers some 90,000 acres of remote wilderness off the South Rim." Backcountry users say "they are upset not only because they believe their access is being limited, but because the process was carried out in private."

NPS AWARDS GRANT TO BOSQUE RIVER TRAIL CORRIDOR. The [Stephenville \(TX\) Empire-Tribune](#) (12/26) reports that the Keep Stephenville Beautiful project for the Bosque River Trail Corridor "recently received word they will be granted assistance from the United States Department of the Interior's National Parks Service for another year."

GREAT SMOKY MOUNTAINS NATIONAL PARK SUPERINTENDENT RETIRING. The [Chattanooga \(TN\) Times Free Press](#) (12/26, 226K) reports that Great Smoky Mountains National Park Superintendent Dale Ditmanson will "retire on Jan. 3, after spending 36 years with the National Park Service." Ditmanson "has been superintendent of the Smokies since 2004."

REHABILITATION PROJECT CONSIDERED FOR BROAD BRANCH ROAD. The [Washington Post](#) (12/26, Binkovitz, 4.28M) reports that "the signs of age and heavy use are evident" on Broad Branch Road, which runs along Rock Creek Park. Now, the District Department of Transportation is "considering an extensive rehabilitation that could include adding a sidewalk and a bike lane." One area of concern is the Soapstone Branch culvert because "10 inches of the stone structure reside on National Park property."

ANONYMOUS DONOR GIVES \$650,000 FOR HISTORIC NEBRASKA BRIDGE. The [Washington Post](#) (12/24, 4.28M) reports that "three years after a flood wiped out part of a bridge spanning the Elkhorn River in Neligh, residents of the small northeastern Nebraska city received a festive surprise: an anonymous, \$650,000 donation to rebuild the historic structure." According to the article, "the city received a check from the donor's Chicago-based attorney last week saying they can use it to rebuild the steel-truss Old Mill Bridge on the condition that residents never try to discover who contributed the money."

HOME FRONT NATIONAL HISTORICAL PARK SEEKING NEW DOCENTS. The [Contra Costa \(CA\) Times](#) (12/26, Treadway, 302K) reports that the Rosie the Riveter World War II/Home Front National Historical Park is "ready to train a new group of volunteer docents to help assist visitors to the Visitor Education Center next to the Ford Point building at 1414 Harbour Way South."

ADDITIONAL COVERAGE: DEATH VALLEY NATIONAL PARK SUSPENDS PERMITS. Additional coverage of Death Valley National Park's moratorium on foot and cycling races was provided by the [Los Angeles Times](#) (12/23, Forgione, 3.07M) and the [Washington Post](#) (12/24, 4.28M).

CONSERVATIONIST ARGUES AGAINST DRAKES BAY OYSTERY CO. In an op-ed for the [Marin \(CA\) Independent Journal](#) (12/27, 88K), Neal Desai, director of Pacific Region Field Operations for the National Parks

Conservation Association, writes that "in the year since then-Interior Secretary Ken Salazar allowed Drakes Bay Oyster Co.'s permit to expire on its own terms, tremendous amounts of paper have been used to stall versus celebrate the American public's first marine wilderness area on the west coast." He argues that "without a large commercial footprint in the estero, enhanced opportunities for recreation and wildlife viewing would be enjoyed by all who visit the seashore."

Bureau of Land Management:

BLM SEEKING VOLUNTEERS FOR POWDER RIVER BASIN EAGLE SURVEY. The Columbus (IN) Republic (12/26, 80K) reports that the BLM is "seeking volunteers to help count bald eagles in the Powder River Basin." The annual midwinter bald eagle survey will take place Jan. 11.

Also providing coverage are the Billings (MT) Gazette (12/26, 206K) and the Casper (WY) Star-Tribune (12/26, 90K).

LAND EXCHANGE PROCESS IN GRAND UINTAH COUNTIES NEARLY COMPLETE. The Moab (UT) Times-Independent (12/26) reports that "it has taken much longer than expected, but state and federal officials say they're close to finalizing a land swap that will allow them to trade scenic recreational areas in Grand County for energy-rich lands near Vernal." The BLM's "state office is hoping to release its final decision on the Utah Recreational Land Exchange in January 2014, according to external affairs chief Megan Crandall." The bureau "plans to publish its previously approved appraisal reports in the Federal Register at the same time, kicking off a 45-day public protest period."

CONSERVATIONIST FRUSTRATED BY LACK OF IMPROVEMENTS AT SLOAN CANYON NATIONAL CONSERVATION AREA. The Las Vegas Review-Journal (12/26, 437K) reports that Terri Robertson, who was instrumental in the creation of the Sloan Canyon National Conservation Area, has grown frustrated by the lack of improvements there. BLM plans called for a paved entry road and a visitor center, but now, Robertson would settle for a trailer and some portable toilets. Robbie McAboy, the BLM's assistant field manager for Red Rock and Sloan canyons, called for patience because they only have one chance to get this right.

Fish and Wildlife Service:

ANIMAL RIGHTS GROUP FILES LAWSUIT OVER SHOOTING OF SNOWY OWLS AT JFK AIRPORT. The New York Daily News (12/26, Moore, 3.94M) reports that the deadly shooting of three snowy owls at JFK International Airport in New York earlier this month has sparked a lawsuit by an animal rights group, which claims that two government agencies failed to try non-lethal methods to remove the birds from the area. Advocacy organization Friends of Animals has filed suit against the Animal and Plant Health Inspection Service and the FWS. Terri Edwards, a spokeswoman for the FWS, said "her agency permits major airports to control threatening animal populations under the Migratory Bird Treaty Act."

Also reporting on the story are the Worcester (MA) Telegram & Gazette (12/25, 188K), the Examiner (12/26, 1.16M), and Yahoo! Finance (12/26, 9.7M).

AUCTION TO BE HELD FOR PERMIT TO HUNT ENDANGERED BLACK RHINO. The Washington Post (12/24, Tinsley, 4.28M) reports that "on Jan. 11," the Dallas Safari Club will hold an auction for "a rare permit to hunt and kill an endangered black rhino." As the club "moves forward with the auction to raise as much as \$1 million to help preserve the near-extinct double-horned rhinoceros, worldwide attention — and outrage over the plan to allow the killing of one animal to save the waning species — is focused on the effort." Conservationists agree with the organization that the auction "could make a better future for the critically endangered animals," but "say there must be a better way to save a species than to allow one of the herd to be hunted and killed."

Also providing coverage is the Chicago Tribune (12/24, Tinsley, 2.32M).

ADDED LAND WILL HELP OHIO RIVER ISLAND NATIONAL WILDLIFE REFUGE. The Marietta (OH) Times (12/26, 27K) reports that "two recently acquired pieces of land" by the FWS will "mean a more seamless tract of mainland property at the Ohio River Island National Wildlife Refuge's headquarters in Williamstown and also

guarantees future access to the refuge's nearby riverside facilities." According to Tylar Greene, public affairs specialist for the northeast region of the FWS, "though the purchases together total just slightly less than an acre, they will mean a less disjointed piece of property and more public access to facilities on the refuge."

MAGNUSON-STEVENS ACT GETTING PUBLIC COMMENT AS IT GETS UPDATED. The Homer (AK) News (12/24, 9K) reports that "re-authorization of the Magnuson-Stevens Act, or MSA, governing federal fisheries, is slowly making its way through the system, with House Committee on Natural Resources Chair Doc Hastings, R-Wash., releasing a draft copy for public perusal and comment." Hastings said, "The purpose of this draft proposal is to gather public input and to see how to best improve and modernize this important law governing fisheries. This proposal would give regional fishery managers increased flexibility to deal with the complexity of fishery issues and provide economic stability and certainty to fishermen and fishery dependent communities. It also would improve data collection and increase transparency so that management decisions are based on sound science and all who are impacted by this law can have an active role in the process."

FWS EXTENDS DEADLINE FOR JAGUAR CRITICAL HABITAT DETERMINATION. The Willcox (AZ) Range News (12/26, 11K) reports that the FWS "requested and recently received an extension of the deadline to reach a final determination on critical habitat for the jaguar." The article notes that "the previous settlement agreement date for publishing a final decision was Dec. 16; the new publication date is Feb. 14, 2014." The agency "requested the extension due to the unavailability of required personnel (and related contractors) during the recent lapse of appropriations (furlough), as well as the rescheduling of court-ordered deadlines and other commitments for unrelated matters involving the same personnel since the restoration of appropriations."

FWS REOPENS YELLOW-BILLED CUCKOO COMMENT PERIOD. The Casper (WY) Star-Tribune (12/26, 90K) reports that the FWS will "take more comments on the plan to list the western population of the yellowed-billed cuckoo as a threatened species under the Endangered Species Act." The service "announced it is reopening the public comment for 60 days on the proposal to list the neotropical migrant bird in the western United States, Canada and Mexico."

SHILOH LAUNCH COMPLEX TO UNDERGO FEDERAL REVIEW. The Orlando (FL) Sentinel (12/27, Powers, 780K) reports that "Space Florida's plan to build a state-run launch complex on the environmentally sensitive fringes of Kennedy Space Center is ready for its federal and public vetting over possible environmental impacts." According to the article, "at stake are Florida's plans for a new launch complex marketed to private rocket companies weighed against environmentalists' hopes that the Merritt Island National Wildlife Refuge will be forever protected."

SURVEY FINDS INCREASED NUMBERS OF ENDANGERED MOUNT GRAHAM RED SQUIRREL POPULATION. The Willcox (AZ) Range News (12/26, 11K) reports that "as part of a conservation program for the endangered Mount Graham red squirrel, the Arizona Game and Fish Department, US Forest Service and US Fish and Wildlife Service conducted an annual squirrel survey and estimated approximately 272 animals in the Pinaleno Mountains in southeastern Arizona." The article notes that "this year's survey shows an increase of 59 squirrels over the 2012 estimate of 213 squirrels."

Securing America's Energy Future:

Renewable Energy:

WIND ENERGY PROJECTS THAT START BY THE END OF THE YEAR QUALIFY FOR FEDERAL SUBSIDY. The New York Times (12/26, Cardwell, Wald, Subscription Publication, 9.61M) reports that "the wind industry is...rushing to make sure projects qualify for an important subsidy before it is set to vanish at the stroke of midnight on Tuesday." According to the Times, "In previous years, the projects had to be in commercial operation by" the end of the year, but for "this year, they need only have begun."

DWP PROCEEDING WITH PLANS FOR OWENS VALLEY SOLAR PLANT DESPITE NPS CONCERNS. The Los Angeles Times (12/26, Sahagun, 3.07M) reports that Los Angeles is proceeding with plans to construct a \$680 million 200 MW solar plant a few miles from the Manzanar National Historic Site, which commemorates a Japanese American internment camp used during World War II. The Los Angeles Department of Water and

Power's Southern Owens Valley Solar Project would build 1 million panels on 1,200 acres. Opponents of the project have included Japanese American organizations. Meanwhile, National Park Service officials are worried that views of the solar plant would "destroy an important element in understanding what intemees here experienced." However, the National Renewable Energy Lab has found that "the southeastern portion of the Owens Valley provides among the highest solar resource values in the nation."

Onshore Energy Development:

BLM REVIEW COULD CANCEL UP TO 65 OIL, GAS LEASES. The Grand Junction Daily Sentinel (12/26, 73K) reports that the BLM "expects early next year to kick off a new environmental review that could lead to potential modifications or cancellations of up to 65 existing oil and gas leases covering 80,772 acres in the White River National Forest." The article notes that "the review, to rectify an oversight dating back decades, could even affect 10 leases with producing wells, and some in the oil and gas industry are questioning the BLM's ability to take such an action." BLM spokesman David Boyd said "he's not aware of other cases of producing leases being canceled."

WYOMING MULLING HOW TO DEAL WITH ABANDONED WELLS AS NATURAL GAS BOOM ENDS. The New York Times (12/24, Frosch, Subscription Publication, 9.61M) reports that Wyoming officials are "trying to address the problem" of the hundreds of abandoned drilling wells "amid concerns from landowners that the wells could contaminate groundwater and are a blight on the land." The article notes that "there are also 400 idle wells scattered across land owned by the Bureau of Land Management, which has its own criteria for determining when a well on its land is considered abandoned or idle." State officials said "they would need to work with the bureau to help deal with those wells, too."

COURT UPHOLDS POWDER RIVER BASIN COAL-MINING LEASE. Bloomberg News (12/24, Feeley, 1.91M) reports that "the US Court of Appeals in Washington rejected a bid by environmental groups to block plans" by the BLM to "lease federal tracts in the Wyoming Powder River Basin for coal mining." In rebuffing challenges to the lease, the appeals court held that "federal regulators properly considered whether more mining by Antelope Coal LLC, a unit of Cloud Peak Energy Inc. (CLD), would affect local pollution levels in the basin or increase the chances of global warming."

Offshore Energy Development:

DECISION ON ATLANTIC OFFSHORE DRILLING EXPECTED IN NEXT FEW MONTHS. The Charlotte (NC) Observer (12/26, Dalesio, 713K) reports, "the Obama administration is weighing a decision expected to be announced in the next three months on whether to ... allow seismic testing of the sea bottom. The tests could firm up estimates of how much hydrocarbon deposits may be" available. David McGowan of the North Carolina Petroleum Council called Atlantic fossil fuels "one piece of the larger US oil and gas pie."

REVIEW OF YEAR NOTES HERCULES OFFSHORE PLATFORM REPORTED MASSIVE BLOWOUT IN 2013. In a review of the year, the New Orleans Times-Picayune (12/26, 700K) reports that "signs of the national boom in natural gas and oil production were easy to spot across south Louisiana in 2013." However, "the year also renewed concerns about the safety of offshore drilling when Houston-based Hercules Offshore reported a massive blowout at one of its natural gas wells in July."

EX-OFFICIAL REJECTS BP AD'S "DISTORTED" CLAIMS. The Detroit Free Press (12/25, 794K) reports, "Two former top officials at the settlement program for compensating victims of BP's 2010 gulf oil spill say their recent resignations had nothing to do with the company's allegations that they frequented a New Orleans strip club that received a settlement award. Kirk Fisher, the settlement program's former chief operating officer, said in an email to The Associated Press late Monday that he and former program CEO David Odom left last week to pursue "other opportunities." In an advertisement that ran Monday in three major newspapers, BP claimed Fisher and Odom resigned following reports that they entertained subordinates at a strip club that was awarded more than \$550,000 for its settlement claim."

US COURT REJECTS BP BID TO REQUIRE PROOF OF GULF OIL SPILL LOSSES. The Chicago Tribune (12/26, Stempel, 2.32M) reports, "BP Plc has failed to persuade a US federal judge to require businesses

seeking to recover money over the 2010 Gulf of Mexico oil spill to provide proof that their economic losses were caused by the disaster. US District Judge Carl Barbier in New Orleans said the British oil company would have to live with its earlier interpretation of a settlement agreement over the spill, in which certain businesses could be presumed to have suffered harm if their losses reflected certain patterns. Barbier said BP could not now take a new position on causation of damages, and reverse an interpretation that it had once termed "more than fair," even if this resulted in the substantially higher payouts that the oil company feared."

LEGACY LAWSUITS CONSIDERED DETERRENT FOR GULF DRILLING. The New Orleans Times-Picayune (12/27, Larino, 700K) reports, "The number of rigs drilling for oil and gas on land in south Louisiana is nearing a historic low, a decline industry groups are blaming on a surge in environmental lawsuits they say is driving investors away from the state. According to ... Baker Hughes Inc., a total of 11 rigs were actively drilling for oil and gas in south Louisiana as of last Friday. The number excludes rigs drilling for oil and gas in the northern part of the state as well as inland waters."

Tackling America's Water Challenges:

BOR WORKER DIES IN FALL AT PINTO DAM. The Spokane (WA) Spokesman-Review (12/26, 214K) reports that "a 62-year-old Bureau of Reclamations employee died Wednesday of head injuries sustained during a fall at Pinto Dam near Ephrata." Holger "Hal" Jensen "fell about 35 feet to the concrete at the facility, which forms Billy Clapp Lake in eastern Grant County." According to the BOR, Jensen, "a civil engineer, was examining construction at the dam that would enable the storage of more water when he fell."

Also reporting on the story are the Columbia Basin (WA) Herald (12/26, 26K) and KREM-TV Spokane, WA (12/26, 61K).

BOR LOOKING TO UPGRADE GOOSE BAY MARINA. The Helena (MT) Independent Record (12/26, 45K) reports that "an era ended at the Goose Bay Marina this year when 31 trailer owners moved their rigs, and the Reller family ended its long run as concessionaires." The BOR, "which operates Canyon Ferry Dam and owns a large chunk of real estate around the reservoir, wants to redevelop and upgrade the marina." BOR officials say that "allowing the trailers to remain on-site year-round constituted "exclusive use" of the property, in violation of their regulations."

Also, the Helena (MT) Independent Record (12/26, 45K) picks the Goose Bay Marina as one of the best stories of 2013.

ADDITIONAL COVERAGE OF BAY DELTA CONSERVATION PLAN. Additional coverage of the Bay Delta Conservation Plan was provided by the Bay Area (CA) Indymedia (12/26, 2K), the San Luis Obispo (CA) Tribune (12/26, 126K), and the Los Angeles Times (12/26, 3.07M).

Empowering Native American Communities:

FUNDING TO STABILIZE HISTORIC KEKU CANNERY APPROVED. The Fairbanks (AK) News-Miner (12/26, 44K) reports that funding to stabilize the historic Keku Cannery has been approved Gary Williams, executive director for the Organized Village of Kake, said "the tribe has been authorized to use its Bureau of Indian Affairs transportation funding to stabilize the building, which is located on BIA trust land."

Also covering the story is the Anchorage (AK) Daily News (12/25, 198K).

SANTA BARBARA COUNTY SUBMITS AMENDED COMMENTS ON CHUMASH FEE-TO-TRUST APPLICATION. The Santa Maria (CA) Sun (12/26, 55K) reports that Santa Barbara County has "added more paperwork to the stack of comments piling up" at the BIA "over the Santa Ynez Band of Indians fee-to-trust application." According to the article, "the additional letters were submitted at the tail end of a public comment period for the tribe's revised fee-to-trust application on its nearly 1,400-acre Camp 4 property in the Santa Ynez Valley."

Meanwhile, the Santa Barbara (CA) Independent (12/26, 119K) reports that Supervisor Steve Lavagnino has sent

a letter to Congressman Doug LaMalfa, "addressing his concerns with LaMalfa's federal legislation to bring the Chumash tribe's Camp 4 into trust while reminding the congressman that the supervisors' decision to oppose the tribe's wishes was not a unanimous one."

BIA ACCEPTING ENVIRONMENTAL COMMENTS ON POTENTIAL CASINO UNTIL JANUARY 6. The Galt (CA) Herald (12/26, 34K) reports that the BIA will "accept written environmental-based comments until Jan. 6 on a potential casino that could be built just north of Twin Cities Road." The bureau "will also hold a meeting on Dec. 19 at the Chabolla Community Center for people to provide verbal comments on the environmental aspects of the application submitted by Wilton Rancheria officials."

NO WORD ON CAYUGAS'S LAND TRUST APPLICATION. The Auburn (NY) Citizen (12/26, 34K) editorializes that the Cayuga Indian Nation has opened Lakeside Entertainment for gambling "despite the tribe having a pending land-into-trust application before the federal Interior Department." While "the village of Union Springs is sending the Cayugas a notice of violation for its recent reopening and is prepared to take legal action," according to the editorial, "nobody seems to know what the Interior Department's Bureau of Indian Affairs might be doing with the Cayugas' most recent land trust application."

Top National News:

OBAMA SIGNS BUDGET DEAL, DEFENSE AUTHORIZATION. On Thursday, President Obama signed two important pieces of legislation into law, the National Defense Authorization Act and the Bipartisan Budget Act, but the signings did not generate a great deal of coverage. Print coverage this morning emphasizes the President's statement released Thursday that praised the Defense bill's easing of the rules governing the repatriation of detainees, but also called for the eventual closure of the US detention facility at Guantanamo Bay, Cuba.

The AP (12/27, Lederman) notes that the President "put his signature on both hard-fought bills while vacationing in Hawaii, where he has been regrouping with his family since Saturday." The AP says the signings were "one of Obama's last official acts in a year beset by a partial government shutdown, a near-default by the Treasury, a calamitous health care rollout and near-perpetual congressional gridlock."

Jim Axelrod, on the CBS Evening News (12/26, story 5, 1:20, Axelrod, 5.58M), the only network newscast to cover the President's bill signing on Thursday, reported that he "took time out from his vacation in Hawaii today to sign several bills into law," including the "defense authorization bill which, among other things, includes a crackdown on sexual assault in the military," and the "bipartisan budget deal that eases spending cuts." Correspondent Chip Reid went on to report that the "budget bill...funds the federal government through the year 2015 and that is significant because it all but eliminates the possibility of another government shutdown any time soon."

Politico (12/27, Epstein, 467K) reported that the Bipartisan Budget Act "restores a total of \$63 billion in discretionary funding to the Defense Department and some domestic agencies in 2014 and 2015, but also includes \$85 billion in deficit reduction." Reuters (12/27, Krasny) reports that Obama has described the budget deal as "a good first step away from the shortsighted, crisis-driven decision-making that has only served to act as a drag on our economy."

However, Noah Rayman, in a post for TIME (12/27, Rayman, 21.77M), says that despite the deal, "neither party appears willing to give ground on the borrowing limit expected to be reached by early March." The Hill (12/27, Cox, Weaver, 194K) also reported that "while the budget bill sets funding levels, it's up to congressional appropriators to decide how the money is spent," and "with government funding set to run out on Jan. 15, the appropriators are racing to complete a giant omnibus."

The New York Times (12/27, Hulse, Subscription Publication, 9.61M) reports that "while most members of Congress have scattered for the holidays, the panels' bipartisan leadership and senior staff members have been assembling a \$1 trillion measure that splits an extra \$45 billion between military and domestic needs under the terms of the budget deal reached this month." According to the Times, "both Republicans and Democrats are determined to get legislation through Congress by the Jan. 15 deadline, even though many rank-and-file members

are likely to be wary of an omnibus measure" and they have only a little "more than a week to win passage." The Times adds that the negotiators "are holding details of the talks close, unwilling to let too much become public for fear of giving opponents time to build a case against the spending measure or incite lobbying campaigns by those who believe they are being overlooked."

The AP (12/27) reports that the defense authorization bill "provides \$552.1 billion for the regular military budget, plus \$80.7 billion for the Afghanistan war and other overseas operations." AFP (12/27) notes that the defense authorization includes "a one-percent raise for military personnel."

Obama Reiterates That It Is His Goal To Close Gitmo Completely. Regarding the defense authorization bill, Chip Reid, on the CBS Evening News (12/26, story 5, 1:20, Axelrod, 5.58M), noted that the President "said he's pleased that the bill eases its transfer of Guantanamo Bay prisoners to other countries, but he's disappointed that it does not allow the transfer of prisoners to the United States for trial." According to Reid, the President "even suggested that if he determines that that bill violates the constitution, he will ignore those provisions."

Likewise, the Los Angeles Times (12/27, Reston, 3.07M) reports that the President "praised Congress...for loosening regulations that will make it easier to transfer detainees...but noted that lawmakers' actions fell short of the flexibility he would need to achieve his goal of closing the prison." In a statement released after he signed the bill, the President said, "The continued operation of the facility weakens our national security by draining resources, damaging our relationships with key allies and partners, and emboldening violent extremists." Reuters (12/27, Krasny, Felsenthal) notes that the President also wrote: "The executive branch must have the authority to determine when and where to prosecute Guantanamo detainees."

The Washington Times (12/27, Dinan, 417K) notes that while the President "ran for the White House in 2008 as an opponent of then-President George W. Bush's practice of issuing signing statements," he has nevertheless "issued about two dozen of them himself." According to the Times, "This year's statement actually contains fewer objections than previous defense policy bill statements."

The Washington Post (12/27, Rucker, 4.28M) calls the bill the President signed on Thursday "a rare step toward achieving his goal of closing the controversial detention facility." The Post adds that "the new policy gives the Obama administration greater flexibility in accelerating the repatriation process." However, according to the Post, "Even with some transfer restrictions lifted, the process of sending detainees to foreign countries remains slow and often occurs on a one-by-one basis as the United States negotiates with the new host countries."

Defense Law Includes Overhaul Of How Sexual Assault Cases Are Handled. USA Today (12/27, Usatoday, 5.82M) reports that following "reports of increased sexual assaults among U.S. troops, the new defense bill changes the rules for military courts." According to USA Today, "commanders will no longer be able to overturn convictions for sexual assault, as they have in the past," and "the law also requires a civilian review when commanders decline to prosecute accused assailants."

However, according to The Hill (12/27, Cox, Weaver, 194K), the new law "does not...include a controversial proposal from Sen. Kirsten Gillibrand (D-N.Y.) to take sexual assault cases from the chain of command."

House Bills Would Restore Military Pension Benefits Cut By Budget Deal. The Hill (12/27, Cox, 194K) reports that "several bills have been introduced in the House...that would restore cuts made to military retirees' benefits" that were included in the Bipartisan Budget Agreement. The Hill notes that Sen. Patty Murray, the Senate Budget Committee Chairwoman, who, along with House Budget Committee chairman Rep. Paul Ryan, "drafted the deal...said lawmakers would work to at least fix a 'technical glitch' that also cut the benefits for veterans with disabilities."

At the same time, the AP (12/27, 4.28M) reports that Defense Secretary Hagel "says it's time to tame burgeoning military personnel costs, but he's facing a test of wills with the nation's powerful veterans groups, which don't want their benefits cut." According to the Post, "personnel costs now make up nearly half of the Pentagon's funding, and officials fear continued growth will force disproportionate cuts in other areas, such as training and equipment."

NEW CNN POLL SHOWS GOP RALLY ON GENERIC BALLOT, LOW APPROVAL FOR CONGRESS.

Coverage of the new CNN poll focuses on a pair of themes: first, the GOP has gained the edge in the 2014 elections, mainly due to the ACA rollout, and second, that few Americans think much of the job Congress is doing.

Politico (12/27, Delreal, 467K) reports a new CNN/ORC International poll shows the GOP leading the Democrats 49%-44% on the generic ballot, a sharp reversal of a 50%-42% Democratic lead two months ago. The poll "follows a tumultuous few months for Democrats, who have been hurt by the rocky rollout" of the ACA health insurance exchanges, while back in October, the GOP was "reeling" from the fallout from the government shutdown. The poll surveyed 1,035 adults from December 16-19.

The Huffington Post (12/27, Edwards-Lew, 11.54M) reports that the GOP "may begin 2014 with an advantage in the midterm elections." The poll also showed that "just about 30 percent of voters said they were enthusiastic about the congressional election in 2014, with Democrats less likely than Republicans to show enthusiasm." In addition, those surveyed were "more likely to say they'd vote for a candidate who opposes the president than for one who supports him."

The Hill (12/27, Joseph, 194K), in its "Ballot Box" blog, calls the swing "huge" and says the numbers are "the latest bad polling news for Democrats, indicating the GOP has a chance to pick up House seats and win control of the Senate." Overall, the survey "finds a lack of enthusiasm from both parties' bases — but especially from Democrats."

In a far more negative view of the state of the GOP, Eugene Robinson writes in his column for the Washington Post (12/27, Robinson, 4.28M) that the GOP, "which should have the wind at its back, enters 2014 in disarray bordering on open warfare." Still, the CNN/ORC poll suggests that the GOP is "back in the game." Voters "appear willing to listen to what the party has to say" if "only the GOP had a message." And despite the CNN numbers, other poll "show the GOP still has a ton of work to do."

The Huffington Post (12/27, Lavender, 11.54M) separately reports that the poll also shows that Americans believe this has been a "do-nothing" Congress. According to the survey, 73% said the current Congress "has done nothing to address the country's problems so far."

McClatchy (12/27, Lightman, 95K) reports that respondents saw Congress not only as "unproductive," but a majority also "see it as the worst they've ever known." According to the poll, "two-thirds" believe this Congress is "the worst of their lifetime," while 28% disagreed. CNN Polling Director Keating Holland said that the contempt for Congress "exists among all demographic and political subgroups. Men, women, rich, poor, young, old — all think this year's Congress has been the worst they can remember."

The Washington Times (12/27, Klimas, 417K) also reports on the numbers and adds that the "frustration" with Congress' "lack of productivity also isn't more politically damaging to one side — those surveyed blame both parties for the gridlock in Washington."

AP-Times Square Poll: Public Split On 2013 As A Whole. The AP (12/27, Agiesta) reports on the results of an AP-Times Square poll conducted online by KnowledgePanel, which shows that "large number of Americans see 2013 as anything but a banner year and aren't reluctant to wave goodbye on New Year's Eve." That's a reflection of "anxiety stretching from the corridors of power in Washington to corporate boardrooms, statehouses, and city and town halls." Overall, "32 percent say 2013 was a better year for them than 2012, while 20 percent say it was worse and 46 percent" say the two years were about the same. Meanwhile, 25% of respondents believed that 2013 was better than 2012 "for the country," while 25% said it was worse. Democrats "are more apt to say the U.S. turned out better in 2013 than 2012 (37 percent) than are Republicans (17 percent)."

In her column for the Wall Street Journal (12/27, Noonan, Subscription Publication, 5.91M), Peggy Noonan writes that 2013 was not particularly satisfying for her politically, as the GOP committed a serious error by forcing a shutdown, but that was offset by the poor rollout of the ACA. Still, Noonan says that Democrats may be able to argue that the failures of ACA show the need for a more serious national effort to reform healthcare.

HOLIDAY SPENDING UP 3.5% Bloomberg News (12/27, Rupp, Timberlake, 1.91M) reports that retail sales "rose 3.5 percent during the holiday season this year, helped by deep discounts at malls and purchases of

children's apparel and jewelry, MasterCard Advisors SpendingPulse said." Sales of "holiday-related categories, such as clothing, electronics and luxury goods, rose 2.3 percent from Nov. 1 through Dec. 24 compared with a year earlier, the Purchase, New York-based research firm said today."

In its lead story, the CBS Evening News (12/26, lead story, 2:20, Axelrod, 5.58M) characterized the Mastercard Spending Plus numbers, along with those compiled by the National Retail Federation, as "disappointing." CBS (Brown) added, "Deep discounts and extended hours couldn't get Americans to spend as much as stores expected" so now retailers are "cutting prices even more." Still, the piece portrayed the coming days as likely to be key in ultimately determining what kind of holiday sales year this is going to be.

Jobless Claims Down Sharply Last Week. The Wall Street Journal (12/27, Portlock, Subscription Publication, 5.91M) reports that first-time jobless claims fell 42,000 to 338,000 for the week ending December 21, according to new data from the Department of Labor. That's the first drop in three weeks, and the Journal says that it is in line with a slowly improving labor market. While a Labor spokesman said that there were no special factors impacting the data, claims around the holidays can bounce around. Meanwhile, the four-week moving average, which irons out week-to-week volatility, rose 4,250 to 348,000.

Reuters (12/27, Lange) reports on the jobless claims numbers and says that economists its surveyed expected claims to come in at 345,000.

Consumer Confidence Hits Four-Month High. Bloomberg News (12/27, Jamrisko, Chandra, 1.91M) reports that its Consumer Comfort Index rose to minus 27.4 in the month ended December 22, "the fifth straight gain, from minus 29.4." The rise came "as an improving job market and holiday discounts put Americans in the mood to shop." The component measuring whether it is a good time to make a purchase "advanced to the second-highest level since 2007, signaling a pickup in the spending that accounts for almost 70 percent of the economy."

Home Prices Continue To Rally. The CBS Evening News (12/26, story 8, 1:20, Axelrod, 5.58M) reported that there was "new evidence" that the housing market "has made it back from the depths of the recession," as the Federal government reported this week that "home prices rose half a percentage point in October." CBS (Blackstone) then focuses on the hot market in San Francisco, where home prices are up 50% since 2009.

Stocks Continue To Make Gains. The Wall Street Journal (12/27, Dieterich, Subscription Publication, 5.91M) reports that the stock markets continued to rise, with the Dow Jones Industrial Average rising for a sixth straight session and hitting another all-time high. The Dow was up 122.33 points to 16479.88, while the S&P 500 rose 8.70 points to 1842.02. The Nasdaq Composite Index, meanwhile, rose 11.76 points to 4167.18.

The Washington Post (12/27, Mui, 4.28M) says that Christmas "may be over but Wall Street is still brimming with holiday cheer." Markets "markets generally move higher during the holiday season, then pare the gains in the new year," but this time, analysts say the momentum is "particularly notable in the face" of the Fed's taper.

USA Today (12/27, Shell, Cummings, 5.82M) reports that the "so-called 'Santa Claus rally' powers on" with Thursday's gains. Meanwhile, the 10-year Treasury bond "touched 3% on Thursday for the first time since September, a level it has not closed above since the summer of 2011, according to Yahoo Finance," a change which comes as "investors continue to price in less bond purchases from the Federal Reserve and an improving U.S. economy."

The Wall Street Journal (12/27, Zeng, Subscription Publication, 5.91M) reports that the rise in Treasury bonds may signal a new baseline for increased interest rates, which could impact the economy and financial markets worldwide. The 10-year note is a key rate, used as a marker for the cost of borrowed money for consumers and businesses.

DOI in the News:

DECISION ON IZEMBEK ROAD DIVIDES COMMENTATORS. In an op-ed for the Anchorage (AK) Daily News (12/28, Williams, 198K), Jamie Williams, president of The Wilderness Society, writes that Interior Secretary Sally Jewell's decision to uphold a FWS "decision to forbid the construction of a road through federally designated wilderness in Alaska's Izembek National Wildlife Refuge" is "a significant victory for conservation and America's public lands." Williams notes that "Jewell visited Alaska in September so she could meet with stakeholders on both sides of the issue and get a first-hand look at the region's transportation issues," and "armed with volumes of federal data and her own boots-on-the-ground knowledge," Jewell has "come to the conclusion that such a road should not be built, and Izembek's wilderness must remain intact." Williams concludes that "it is a sound, science-based decision that reflects the Obama administration's commitment to preserving America's public land, and upholds the sanctity of wilderness that has been set aside by Congress."

Also, for The Ecologist (12/30), Courtney Sexton, Communications Associate with Defenders of Wildlife and Isabel Ricker, the Landscape Conservation Coordinator, argues that "the road would have set a devastating precedent for the future wellbeing of all of our country's wildlife refuges and designated wilderness." They claim that "Izembek is such a special place that the American public long ago deemed it critical to permanently protect." According to the two, "building a road through Izembek would not only have impacted the refuge and the many species that depend on it, but would have set a devastating precedent for the future wellbeing of all of our country's wildlife refuges and designated wilderness."

However, the Anchorage (AK) Daily News (12/28, 198K) editorializes that Jewell made "a bad decision." According to the paper, "the better decision would have been to approve the land swap, adding tens of thousands of acres to the Izembek National Wildlife Refuge, in exchange for a narrow corridor across the refuge for the King Cove-Cold Bay link." The paper asserts that "that link remains the safest and surest route to get patients from King Cove to advanced care in Anchorage and beyond for emergencies and routine medical care."

Also, in an op-ed for the Anchorage (AK) Daily News (12/28, Jenkins, 198K), Paul Jenkins, editor of the AnchorageDailyPlanet.com, argues that the decision "was the federal government at its worst." He notes that "the proposed track through the refuge would have had barriers on each side and have been used only for emergencies." Jenkins claims that "Jewell blithely ignored good sense and the federal trust responsibility to Alaska Natives."

SECRETARY JEWELL PICKED AS ONE OF 2013'S NOTABLE PEOPLE IN THE OUTDOORS. The Bellingham (WA) Herald (12/29, 113K) picks Interior Secretary Sally Jewell as one of "2013's Notable People In The Outdoors." In an interview with Outside magazine in November, Jewell said, "This is the one job I would have left REI for. I'm not sure there's another one out there." According to the article Jewell has "had a full plate since taking over, but Jewell seems to be keeping her head above the fray."

The story was also picked up by the Tacoma (WA) News Tribune (12/29, 305K).

"AUSTERITY WARS" SHOW DIFFICULTY OF CUTTING GOVERNMENT SPENDING. The Washington Post (12/28, Farenthold, 4.28M) reports that the "American austerity wars" of 2013 have demonstrated "the power of old Washington habits" that make cutting government spending difficult. Politicians have been plagued by the questions of "where to cut," "who to hurt," and "what to kill," further enforcing the view that Congress' difficulty making decisions means that they are only able to make cuts "across the board." Although the budget deal signed in August 2011 was projected to save about \$2.1 trillion by 2021, some were disappointed by the results, having expected austerity to "force Washington to face decisions about how the country really ought to spend its money" and create a government that was "cheaper, smaller and smarter" rather than a government that was "just cheaper."

Additional coverage of the budget was provided by the Denver Post (12/29, Wallbank, Przybyla, News, 949K), the Orlando (FL) Sentinel (12/28, 780K), the Woodland (CA) Daily Democrat (12/30, 35K).

Additional Coverage Of PILT Program. Additional coverage of the uncertainty of the funding for the PILT program was provided by the Johnson City (TN) Press (12/30, 76K).

FEDERAL CLIMATE CHANGE DEBATE LIKELY TO INTENSIFY IN 2014. The Hill (12/29, 194K) reports that in 2014, the climate change debate may “heat up” as President Obama’s climate plan begins to “come to fruition.” The EPA is likely to announce “historic final standards” next June that will curb power plant emissions. However, lawmakers and industry groups will “give their two cents” first. Meanwhile, the GOP is anticipated to keep up its “crusade against the Administration’s climate regulations” next year.

Satellite Launched To Monitor Climate Change. The “E2 Wire” blog of The Hill (12/28, Barron-Lopez, 194K) reported that the US and Japan have “announced the launch of a satellite that will be able to monitor in unprecedented detail climate changes across the globe.” The Japanese Aerospace Exploration Agency and NASA “will launch the new satellite on Feb. 27 from Japan’s Tanegashima Space Center, the agencies said on Thursday.” The satellite “will provide advanced information on rainfall and snowfall several times a day to enhance the countries’ understanding of the water and energy cycles that affect the globe’s climate.”

COURT REINSTATES OVERFISHING CHARGES AGAINST KOOKESH. The Juneau (AK) Empire (12/29, 21K) reports that the Alaska Court of Appeals has “reinstated overfishing charges against former state senator Albert Kookesh and two other men.” The Alaska Federation of Natives has “intervened in the case,” now known as State of Alaska v. Sally Jewell, “and is currently drafting a response that is due by Jan. 21.”

VETERANS OFFER SUGGESTIONS FOR WILDFIRE POLICY. The Ravalli (MT) Republic (12/30, 19K) reports that wildfire veterans “point to some simple, straightforward solutions to the dangers they confront each wildfire season.” They recommend waging “timely, forceful attacks on fires when they first materialize,” and scheduling “safer, more effective work shifts rather than sending crews into the fray in the afternoon, when they’re exhausted, the fire is burning hottest and winds pick up and shift flames in various directions.” They also advise letting “fires that don’t threaten lives or properties burn themselves out rather than attacking every fire in the middle of nowhere...as the ecology of many areas depends on occasional wildfires to burn out excess fuels.” Perhaps most important, they suggest standing “down when danger looms.”

The Eugene (OR) Register-Guard (12/30, 172K) editorializes that “any budgeting system that fights fires with money needed to prevent those same fires — and the very real threat they pose to firefighters and property — needs to be changed.” The paper supports legislation introduced by Sen. Ron Wyden and Sen. Mike Crapo which would “treat wildfires like natural disasters such as hurricanes and tornados that aren’t paid for through federal agencies’ regular budgets.”

FEDERAL AGENCIES MAKE 2013 THE YEAR OF CLOUD. For the Washington Post (12/30, Rossino, 4.28M), Alex Rossino, a principal research analyst, claims that 2013 “will long be remembered by government contractors as the year that federal cloud adoption began in earnest.” According to Rossino, “between October 2012 and September 2013, federal agencies awarded over \$17 billion in cloud computing-related contracts.” Notably, “after a couple of years evaluating and piloting cloud technology, federal customers dove in headfirst, awarding large contracts, such as the Interior Department’s \$10 billion Foundation Cloud Hosting Services program and the CIA’s hotly contested \$600 million cloud infrastructure award.”

America’s Great Outdoors:

National Park Service:

HOG FARM NEAR BUFFALO RIVER DIVIDES COMMUNITY . The New York Times (12/27, Eligon, Subscription Publication, 9.61M) reports that a pig farm operated by C&H Hog Farms near the Buffalo River “has divided the community, drawn scrutiny from environmentalists, politicians, and state and federal officials, and left many wondering how one of the largest hog operations in the so-called Natural State ended up in the heart of a major tourist area.” According to the article, “for environmentalists, the development of the Mount Judea (pronounced Judy) hog farm provides a stark example of what they see as lax oversight of such farms by state and federal regulators.” However, “C&H Hog Farms has many supporters, who say that these farms have long dotted the watershed without causing major environmental damage,” and “they argue that the owners of C&H followed all the required steps to obtain a permit and will do all they can to make sure that the farm does not hurt the ecosystem.”

NPS REWRITING BACKCOUNTRY-MANAGEMENT PLAN FOR GRAND CANYON. USA Today (12/27, Loomis, 5.82M) reports that "the surge of people going to less-visited parts" of the Grand Canyon and "using the trails and Colorado River in new ways" has the NPS "rewriting its backcountry-management plan." Due to be released "next spring, the revised plan could create a day-hiking registry to keep trails from being overrun by large groups," according to park Superintendent Dave Ueberuaga. The plan "could restrict how far backpackers can travel the Colorado on inflatable backpacking rafts and set guidelines for limiting slot-canyon access if too many canyoneers ply the same routes."

NPS CONSIDERING RULE CHANGES FOR OZARK NATIONAL SCENIC RIVERWAYS NATIONAL PARK. For the Sedalia (MO) Democrat (12/30, 39K) reports that "2014 is going to be a landmark year" for the Ozark National Scenic Riverways National Park. According to the article, "for the first time since 1984, changes in the rules regarding the ways the public is allowed to use the park are inevitable."

CHEETAHS KILL WHITE-TAILED DEER AT NATIONAL ZOO. The Washington Post (12/27, Press, 4.28M) reports that a deer on Friday jumped into an enclosure at the Smithsonian National Zoo that houses two young cheetahs. Zoo officials say the white-tailed deer was killed by the cheetahs. The article notes that "deer are plentiful in Rock Creek Park, which borders the zoo." The NPS has "used sharpshooters to control the deer population."

Also providing coverage are WJLA-TV Washington (12/30, 118K) and WRC-TV Washington (12/30, 291K).

RETIRING NPS NORTHEAST REGIONAL DIRECTOR REFLECTS ON ACCOMPLISHMENTS. On the eve of Dennis Reidenbach's retirement, Philly (12/30, 1.22M) looks back on the career and accomplishments of the Northeast Regional Director for the NPS. Reidenbach "explained how his generation of park service bosses has had to turn to rich industrialists and foundation trustees like the Annenbergs, Lenfests, and Pews, who have been willing to back particular visions of how historic sites ought to look with tens of millions of tax-protected dollars." According to Reidenbach, "Pew influence helped teach the park service how to develop 'entrepreneurial, self-sustaining' business plans."

ADDITIONAL COVERAGE OF MANHATTAN PROJECT NATIONAL PARK. Additional coverage of the proposal to create a new national park commemorating the Manhattan Project was provided by the U-T San Diego (12/29).

GREAT SMOKY MOUNTAINS NATIONAL PARK SUPERINTENDENT DALE DITMANSON RETIRING. The Chattanooga (TN) Times Free Press (12/30, 226K) reports that Great Smoky Mountains National Park, Dale Ditmanson will retire on January 3. the article reflects on Ditmanson achievements. It notes that "while serving as superintendent of the Smokies over the past 10 years, Ditmanson received the 2009 Southeast Region's Superintendent of the Year Award and the 2013 Associations of Public Lands' Agency Partner of the Year Award, which he shared with recently retired Deputy Superintendent, Kevin FitzGerald." Ditmanson also received the Department of the Interior's Honor Award for Meritorious Service.

ADDITIONAL COVERAGE OF ISLE ROYALE NATIONAL PARK WOLVES. Additional coverage of the Isle Royale National Park wolves was provided by the Louisville (KY) Courier-Journal (12/29, Flesher, 449K).

Bureau of Land Management:

BLM, FOREST SERVICE FAVOR MIDDLE PATH FOR WYOMING SAGE GROUSE HABITAT. The Columbus (IN) Republic (12/30, 80K) reports that the BLM and Forest Service on Friday "released a draft plan for maintaining and increasing sage grouse habitat on BLM and Forest Service land around Wyoming." The two agencies "favor a middle path among the options they're considering for protecting habitat for the greater sage grouse in Wyoming." However, "two environmental groups and the Petroleum Association of Wyoming expressed reservations about the draft plan."

Also, providing coverage of how ranchers are dealing with sage grouse policy is the Twin Falls (ID) Times-News (12/30, 56K).

NEW MEXICO LAND COMMISSIONER WANTS TO BUY FEDERAL LAND. The [Las Cruces \(NM\) Sun-News](#) (12/30, 59K) reports, that New Mexico's land commissioner "wants to buy some federal land on behalf of the state in hopes that the property could generate revenue for state trust lands that help fund public schools and other institutions." The BLM is "looking to sell thousands of acres that no longer meet the agency's mission or are landlocked." State Land Commissioner Ray Powell "hopes to acquire some of the land, especially parcels along the interstates around Las Cruces and in the oil- and gas-rich Permian Basin of southeastern New Mexico."

Also providing coverage are the [San Francisco Chronicle](#) (12/30, 2.88M) and the [Artesia \(NM\) News](#) (12/29, 10K).

COURT DISMISSES APPEAL BY HORSE ADVOCATES. The [Albuquerque \(NM\) Journal](#) (12/30, 288K) reports that the Wild Horse Observers Association has "lost its appeal against a 2012 ruling by a US District Court judge that dismissed its case against the Secretary of the Interior, the Bureau of Land Management and Algodones resident Al Baca." The 10th Circuit Court of Appeals in Denver this month issued an order affirming the District Court's decision.

COURT ENDS BAN ON HORSE SLAUGHTER. The [Glenwood Springs \(CO\) Post Independent](#) (12/30, 27K) reports that "on Dec. 13, the 10th U.S. Circuit Court of appeals lifted an emergency injunction that had blocked two slaughterhouses, Valley Meat Co. in Roswell, N.M., and Rains Natural Meat in Gallatin, Mo., from killing horses for money." According to the article, "the lifting of the injunction, which was brought by a coalition of animal welfare groups, opens the door to legal horse slaughter within weeks."

SENATORS INTRODUCE ORGAN MOUNTAINS-DESERT PEAKS CONSERVATION ACT. In an op-ed for the [Las Cruces \(NM\) Sun-News](#) (12/30, Udall, Heinrich, 59K), Sens. Tom Udall and Martin Heinrich write that they have introduced the Organ Mountains-Desert Peaks Conservation Act, which "would designate the Organ Mountains-Desert Peaks National Monument, putting a star on recreation maps around the world, highlighting the area's unique culture and history, and drawing tourists and outdoor enthusiasts." Udall and Heinrich "want to ensure that these natural and cultural treasures are preserved for future generations and that communities in Doña Ana County can continue to grow and prosper."

Fish and Wildlife Service:

ENDANGERED SPECIES ACT TURNS FORTY YEARS OLD. The fortieth anniversary of the Endangered Species Act generated contrasting commentary on the successes and impacts of the law.

In its "E2 Wire" blog, [The Hill](#) (12/30, 194K) reports that Rep. John Dingell (D-MI) "warned that the Endangered Species Act (ESA) faced threats to its survival as the law turned 40 on Saturday." In an op-ed for the [Detroit Free Press](#) (12/28, Dingell, 794K), Dingell wrote, "I am saddened to report that this cornerstone environmental law is in greater peril now than it has been in its 40-year history." The article notes that "Republicans in Congress have taken measures to weaken the law, which bans the killing of endangered species and regulates the use of their habitats in an effort to protect those lands."

In an op-ed for the [Richmond \(VA\) Times-Dispatch](#) (12/30, Talbot, 333K), Lee Talbot, one of the original authors of the 1973 Endangered Species Act, and a professor of environmental sciences and policy at George Mason, warns that "the ESA is in grave danger." He writes that "there is a segment of our elected officials that is willing to kill off any sort of regulation, no matter how beneficial it is to the public." According to Talbot, "this anti-regulatory, anti-conservation movement on Capitol Hill is unprecedented," and he argues that "it is too willing to sell our health, wildlife and natural treasures off for short-term corporate gains for the few, resulting in long-term losses for our country and our people."

In an op-ed for the [Houston Chronicle](#) (12/27, Fenwick, 2.26M), George Fenwick, president of the Washington, D.C.-based American Bird Conservancy, touts the success of the act. According to Fenwick, "when this law is allowed to work as it was designed to, it has been remarkably effective." Fenwick bemoans the "high-profile critics" who "blame the law (falsely) for larger economic problems."

However, in an op-ed for the [Wall Street Journal](#) (12/27, Schiff, Macdonald, Subscription Publication, 5.91M), Damien Schiff, a principal attorney with Pacific Legal Foundation, and Julie Macdonald, a former deputy assistant

secretary for Fish and Wildlife and Parks at the Interior Department, note that the law has brought about the recovery of only a fraction—less than 2%—of the approximately 2,100 species listed as endangered or threatened since 1973. Meanwhile, the law has endangered the economic health of many communities—while creating a cottage industry of litigation that does more to enrich environmental activist groups than benefit the environment. They blame the bureaucrats of the Endangered Species Act for administering the law poorly and flouting provisions designed to promote good science and good sense.

In an op-ed for the [Sacramento \(CA\) Bee](#) (12/29, Moyle, 749K), Peter Moyle, a fisheries biologist at the University of California, Davis, and associate director of the Center for Watershed Sciences at UC Davis, writes: "I wish I could say that once the Endangered Species Act kicked in, everything got better for California fishes. But it hasn't." In fact, Moyle says he has "been recording a statewide decline of most native fishes, largely as the result of dams, diversions, water export pumps in the Delta and other manipulations of our water system." Meanwhile, he notes that "climate change is warming the rivers and accelerating the declines of already depleted fish populations."

Also providing coverage are the [Huffington Post](#) (12/28, 11.54M), the [Idaho Statesman](#) (12/30, 205K), the [Durango \(CO\) Herald](#) (12/27, 28K), the [Jacksonville \(NC\) Daily News](#) (12/30, 1K), the [Everett \(WA\) Herald](#) (12/27, 152K), the [Lakeland \(FL\) Ledger](#) (12/27, 180K), the [Las Vegas Guardian Express](#) (12/30, 64K), the [Sierra \(CA\) Sun Times](#) (12/30), and the [Science Recorder](#) (12/30).

Grizzlies An Issue As Endangered Species Act Turns Forty. [USA Today](#) (12/27, Weise, 5.82M) reports that the anniversary of the law "comes as wildlife officials in the northern Rockies are considering lifting protections for hundreds of grizzly bears in and around Yellowstone National Park, a move environmental groups decry as short-sighted." The bears have "made a slow comeback," prompting the FWS to "advance plans on whether to take more than 700 bears across the Yellowstone region of Montana, Idaho and Wyoming off the threatened-species list."

Also covering the story is the [Asbury Park \(NJ\) Press](#) (12/28, 324K).

Gray Wolf Still An Issue. [NPR](#) (12/27, Shogren, 465K) reports that the FWS is "proposing to take the gray wolf off the endangered species list." The wolf has "rebounded since it was reintroduced to the northern Rockies in the 1990s and is continuing to spread into the Pacific Northwest," but "biologists warn that if these wolves loses federal protection, they will not be able to return to some places, such as Colorado, where the ecosystem sorely needs them." The article notes that "the law that protects endangered species turns 40 tomorrow and perhaps the most controversial thing the government has done under the law is to reintroduce the gray wolf."

The [Summit County \(CO\) Citizens Voice](#) (12/29, 506) reports that the US District Court in Washington, D.C. on Dec. 17 heard arguments by Earthjustice attorney Tom Preso "to restore Endangered Species Act protections to gray wolves in Wyoming until state officials develop a stronger wolf conservation plan." Preso said, "The extreme hostility toward wolves demonstrated by some who participated in this fall's Wyoming wolf hunt shows why adequate legal protections are especially important for wolves in Wyoming. We are asking the court to hold the government accountable for failing to give wolves the protection that the law requires." Earthjustice is "representing Defenders of Wildlife, Natural Resources Defense Council, the Sierra Club and the Center for Biological Diversity in challenging the Fish and Wildlife Service's September 2012 decision to strip Endangered Species Act protections from gray wolves in Wyoming."

In an op-ed for the [New York Times](#) (12/29, Downes, Subscription Publication, 9.61M), Lawrence Downes writes that "in Idaho, two recent developments have alarmed those who want to protect wolves and see them not as vermin, but as predators necessary for a healthy ecosystem." Downes says that "first was the hiring, by the Idaho Department of Fish and Game, of a hunter to travel into federal wilderness to eliminate two wolf packs." The second "example of wolf-animus will be on display this weekend outside Salmon, Idaho, at a Coyote and Wolf Derby sponsored by a group called Idaho for Wildlife." Downes notes that "it's a sad coincidence that this weekend is also the 40th anniversary of the Endangered Species Act, which was signed into law on Dec. 28, 1973."

Tagged Wolverine Gone Missing. The [Denver Post](#) (12/30, Finley, 949K) reports that the wolverine M56 who traveled to Colorado has gone missing as federal and state authorities delay decisions on whether to protect

wolverines from intentional killing. No radio signal has been detected since October 2012.

Biologist Keeping The Polar Bears' Plight Public. NPR (12/28, Shogren, 465K) reports on the work of biologist Steve Amstrup to keep the plight of the polar bears in the public's perception.

DAM-LIKE DEVICES TO HELP FIGHT FIRES AT GREAT DISMAL SWAMP NATIONAL WILDLIFE REFUGE.

The Washington Post (12/29, Press, 4.28M) reports that "on Dec. 18, federal and North Carolina officials unveiled two structures they hope will keep more water in the swamp" at Great Dismal Swamp National Wildlife Refuge "and make nearly 10,000 of its 113,000 acres less susceptible to fire while enhancing wetlands." According to the article, "the large dam-like devices, called weirs, regulate flow at the end of two large ditches that channel water into the Dismal Swamp Canal and ultimately the Albemarle Sound." Their main task is "to back up water into the swamp for several miles, which gives it time to seep into the ground, raising the water table."

Also providing coverage are the Richmond (VA) Times-Dispatch (12/30, 333K) and the Seattle Post-Intelligencer (12/30, 768K).

EVERGLADES REFUGE STALLED AT TEN ACRES BUT COULD GROW SOON. The Los Angeles Times (12/27, Spear, Sentinel, 3.07M) reports that the Everglades Headwaters National Wildlife Refuge was "billed with much fanfare as a federal rescue of an imperiled environmental treasure in Florida," but two years later, "the refuge today amounts to 10 acres donated by the Nature Conservancy." The article notes that "nothing so far has been purchased by the US government, but \$4.5 million should be available for land buys in the near future." Though the FWS "has not dedicated any specific amount of money or funding source, the agency has given the project enough priority to raid other programs."

FWS TO HOLD MEETINGS ON PROPOSALS TO PROTECT SEVERAL SIERRA AMPHIBIANS. The Fresno (CA) Bee (12/27, 327K) reports that the FWS will "hold two meetings in January for proposals to list and designate habitat for two species of frogs and a species of toads." The FWS will "propose to list the Sierra Nevada yellow-legged frog and the northern population segment of the mountain yellow-legged frog as endangered species in April." The agency will "also propose to list the Yosemite toad as a threatened species."

Also reporting on the story is the Sierra (CA) Sun Times (12/30).

HABITAT RESTORATION PROJECTS SELECTED IN NEW MEXICO. The Silver City (NM) Sun-News (12/30, 24K) reports that the FWS and the state Office of Natural Resources Trustee have "selected seven restoration projects in southwestern New Mexico to restore wildlife and wildlife habitat natural resources." The two agencies are "restoring the areas as a result of a natural resource damage assessment and settlement with the Freeport-McMoRan company for its Chino, Cobre and Tyrone mine facilities."

GROUP STARTS ITS OWN COUNT OF WHOOPING CRANES. The Victoria (TX) Advocate (12/28, 77K) reports that researchers with the International Crane Foundation say the FWS' survey of the Aransas-Wood Buffalo whooping crane is "missing valuable information and have started their own count of the endangered birds." According to Liz Smith, a conservation biologist with the foundation, the new FWS "surveys are concentrated in one month, but the birds' diet and behavior changes during their six-month stay at the Texas refuge."

FWS REOPENS CUCKOO COMMENT PERIOD. The Pueblo (CO) Chieftain (12/30, 94K) reports that the FWS is "reopening the public comment period for 60 days for the proposal to list the Western distinct population segment of the yellow-billed cuckoo as a threatened species under the Endangered Species Act." Comments will be accepted through Feb. 24.

ADDITIONAL COVERAGE: SHILOH LAUNCH COMPLEX TO UNDERGO FEDERAL REVIEW. Additional coverage of Space Florida's plan to build a state-run launch complex on the environmentally sensitive fringes of Kennedy Space Center was provided by the Washington Post (12/28, Powers, 780K).

ADDITIONAL COVERAGE OF BLACK RHINO AUCTION. Additional coverage of the auction by the Dallas Safari Club for a permit to hunt a rhinoceros in Namibia was provided by NPR (12/30, Staff, 465K).

PAPER URGES CLOSING THE CHICAGO CANAL. In an editorial, the Milwaukee Journal Sentinel (12/30, 798K)

notes that a new report by the US Army Corps of Engineers and the FWS revealed that fish can swim through "the electric barrier on the Chicago Sanitary and Ship Canal that is supposed to stop Asian carp from infesting Lake Michigan." The paper agrees with Josh Mogerman, a spokesman for the Natural Resources Defense Council, who said: "The electric barrier already had a spotty track record, but this report seems to burst any remaining implication it can be considered a solution to the carp invasion. It reinforces the broadly held belief that a permanent, physical barrier separating the watersheds is the only way to stop the dozens of dangerous critters queued up on both sides."

Securing America's Energy Future:

Renewable Energy:

NUCLEAR, WIND ENERGY STRUGGLE AMID CHEAP NATURAL GAS. The New York Times (12/28, Wald, Subscription Publication, 9.61M) reports that although carbon emissions from electricity will have to be lowered to aid against climate change, two of the most promising low-carbon energy sources, wind and nuclear, "are trying to kill each other off." The Times says both energy sources face pressure from natural gas, which offers "some carbon reductions compared with coal" and is currently cheap. While experts say higher electricity prices would mean "renewable sources of energy would flourish and even some reactors would be built," currently Federal subsidies for wind energy as well as cheap natural gas are forcing down electricity prices. University of Texas Austin's Michael Webber said, "Gas is raining on everyone's parade; gas is ruining it for everybody in most electricity markets."

MAINE OFFSHORE WIND PROJECT FACES OPPOSITION FROM ISLAND RESIDENTS. The AP (12/28, Durkin) reported that a Maine offshore wind project has been met with opposition by some of the residents of Monhegan, a tiny island off the coast of Maine, who fear that the project will upset their quiet life and hurt tourism. Maine Aqua Ventus hopes to receive initial approval to put the turbines 2.5 miles off the island's shore next month, and claims that its project will provide cheaper electricity to the island and bring "millions of dollars in investments to the state," in addition to creating hundreds of new jobs to bolster Monhegan Island's fragile economy. The company will soon post pictures of what the turbines would look like from different points on the island and will broadcast test sounds from the proposed site so that residents can hear what it will sound like on shore.

JONES ACT PRESENTS DILEMMA TO OFFSHORE WIND DEVELOPERS IN MASSACHUSETTS. The New Bedford (MA) Standard-Times (12/29, 54K) reports that the Jones Act is presenting a dilemma to the American offshore wind industry. The law, "initially passed to protect maritime merchants, requires vessels transporting cargo or equipment between two US points to be American flagged and manufactured," but "because the offshore wind industry has not yet taken off in the states, the only vessels in the world capable of helping it along are manufactured in Europe," which means "manufacturers don't want to construct vessels for an industry that does not yet exist." However, Massachusetts officials say "they are banking on the unique engineering of South Terminal to circumvent the riddle and spur an industry that will be based in the Commonwealth."

Onshore Energy Development:

OIL AND GAS PROJECT IN UINTAH BASIN UP FOR PUBLIC REVIEW. The Columbus (IN) Republic (12/30, 80K) reports that the BLM is seeking public input "on its draft study of a company's proposal to significantly boost its oil and gas production in the Uintah Basin." According to the article, "Newfield Exploration Co., Utah's largest crude oil producer, would be able to add 5,750 new oil and gas wells over a 16-year period at an existing field under the plan." The BLM says "its plan is the most restrictive for new oil and gas development across sensitive landscapes while still meeting project needs."

Also providing coverage are the Deseret (UT) News (12/30, 274K) and KSL-TV Salt Lake City (12/30, 242K).

OBAMA SIGNS BUREAU OF LAND MANAGEMENT STREAMLINING ACT. The Williston (ND) Herald (12/30, 18K) reports that Rep. Kevin Cramer's Bureau of Land Management Streamlining Act has been signed by President Obama. Cramer said, "North Dakota will join other states in a streamlining pilot project to alleviate the increased workload of federal permit review. I am pleased the president accepted these modest improvements

and am hopeful we can build on this achievement to find more common ground in the future." The legislation "allows BLM offices in Montana and other less stressed states to review and approve permits."

Also providing coverage is [KRMG-AM](#) Tulsa, OK (12/30, 16K).

FEDERAL APPEALS COURT UPHOLDS BLM'S LEASE-BY-APPLICATION PROCESS. The [SNL Financial](#) (12/30, 22K) reports that "a federal appeals court rejected a challenge brought by environmental groups" to the BLM's "coal lease-by-application system, saying the agency acted 'reasonably' when it awarded the West Antelope II tracts to Cloud Peak Energy Inc." The US Court of Appeals for the District of Columbia Circuit held on Dec. 24 that the BLM "satisfied its obligations under the National Environmental Policy Act, or NEPA, affirming a July 2012 decision by the US District Court for the District of Columbia."

BLM APPROVES PAN MINE PROJECT. The [Ely Daily Times](#) (12/27, 776) reports that the BLM Ely District, Egan Field Office has "issued the Record of Decision for Midway Gold US, Inc.'s Pan Mine Project to be located in the Pancake Mountain Range in White Pine County." According to the article, "the decision allows the mining operator to construct and operate a new heap leach gold mine that would consist of two primary open pits, three satellite pits, one heap leach pad, three rock disposal areas and a transmission line."

Offshore Energy Development:

BP MISCONDUCT INVESTIGATION TARGETS QUESTION INVESTIGATOR'S IMPARTIALITY. The AP (12/28, Kunzelman) reported that the targets of an investigation into alleged misconduct inside the settlement program for compensating the victim's of BP's 2010 Gulf oil spill are questioning the independence of former FBI director Louis Freeh and attempting to rebut his findings. Lionel "Tiger" Sutton III, whose resignation from the staff of Patrick Juneau sparked the investigation, urged US District Judge Carl Barbier to throw out a "scathing report" Freeh issued in September that concluded that Sutton and other top members of Juneau's staff engaged in "improper, unethical and possibly criminal" conduct. Sutton's wife's attorney argued that Freeh is BP's "man on the job" and that allowing Freeh to run the claims office is giving BP "exactly what it wants." Freeh's investigation is ongoing, with his next report expected shortly after January 1.

RESEARCHERS TO STUDY COST BENEFITS OF GULF WATER MONITORING. The [Baton Rouge \(LA\) Advocate](#) (12/30, 24K) reports on the three-year, \$750,000 project led by the LSU Agricultural Center and the BOEM to study the cost benefits of Gulf water monitoring. The article notes that "the first phase will involve interviewing key members of the Gulf of Mexico Coastal Ocean Observing System to determine who uses the information and what value they put on the information."

NEW STUDY SAYS ENDANGERED WHALES AT RISK FROM SEISMIC AIRGUN BLASTING. The [Summit County \(CO\) Citizens Voice](#) (12/27, 506) reports that "endangered North Atlantic right whales may be more at risk from oil exploration than previously thought," according to new research from Cornell University. The study "suggests the rare marine mammals are present throughout the year at varying distances off the coast of Virginia, putting them at risk from the acoustic impacts generated by seismic airguns — used to probe the ocean floor for oil and gas deposits."

MAYOR OF KURE BEACH SUPPORTS SEISMIC TESTING. [WECT-TV](#) Wilmington, NC (12/30, 23K) reports that Mayor Dean Lamberth of Kure Beach has "signed a letter from America's Energy Forum that asked for his support in seismic testing and natural gas exploration." The article notes that "the Kure Beach Town Council voted at their December meeting for the mayor to sign the letter that would be sent" to the BOEM. Lamberth said "he signed the letter in support because the federal government is decreasing funds for beach re-nourishment."

Tackling America's Water Challenges:

REPUBLICANS, DEMOCRATS RALLYING BEHIND WATER PROJECTS BILL. The AP (12/28, Jackson) reports that "Republicans and Democrats who found little common ground in 2013 are rallying around a" Senate bill that authorizes "up to \$12.5 billion over the next decade for flood diversion in North Dakota, widening a Texas-Louisiana waterway, deepening Georgia's rapidly growing Port of Savannah and other projects." In comparison, "the House version would cost about \$8.2 billion." Due to the "modest" differences between the two bills,

negotiators are "confident they can merge the two and pass the package for President Barack Obama's signature early in 2014."

DRY YEAR SPURS NEW CONSERVATION ORDERS FOR 2014. The [Sacramento \(CA\) Bee](#) (12/29, 749K) reports that December has "been so dry that mandatory water conservation orders are beginning to sweep across the Sacramento region." The city of Folsom on Monday imposed a mandatory 20-percent water conservation order, while Sacramento County has also asked residents in unincorporated areas to reduce water use by 20 percent. The cities of Roseville and Sacramento are also likely to consider similar measures in early January, according to the Sacramento Bee. According to the article, "because about 500,000 people in Folsom, Fair Oaks, Roseville and other communities depend on that stored water," the BOR "on Jan. 1 plans to reduce water releases from the dam into the American River."

Also providing coverage are the [San Luis Obispo \(CA\) Tribune](#) (12/29, 126K), the [Palm Springs \(CA\) Desert Sun](#) (12/29, 110K), and [KGO-TV San Francisco](#) (12/30, 4K).

GRAND COULEE PUMPING PLANT TO RE-OPEN MARCH 1. The [Salem \(OR\) Capital Press](#) (12/26, 113K) reports that the BOR says "there will be an adequate water supply for spring irrigation when a Grand Coulee Dam pumping station reopens in March." The bureau expects "all six pump units in the plant will be available to fill Banks Lake prior to the 2014 irrigation season, calling for a 'normal' irrigation water supply in the Columbia Basin." However, irrigators are still "skeptical," according to Mike La Plant, director of the Quincy Columbia Basin Irrigation District.

CONSERVATION GROUPS CALL FOR MORE PROTECTIONS FOR FISH. The [Marysville \(CA\) Appeal-Democrat](#) (12/30, 70K) reports that "while some groups are excited about the what the Yuba County Water Agency's FERC relicensing applications contains, other groups are lamenting what is missing — namely, provisions that address removing barriers to native spawning habitat for endangered fish." Many conservation groups have "called for the YCWA to look into developing fish passage through, or removing entirely, Englebright dam, which is a direct barrier to more than 120 miles of salmon habitat, according to comments submitted by the Foothills Water Network, which represents a group of water resource stakeholders in the Yuba, Bear and American River watersheds."

ADDITIONAL COVERAGE OF BAY DELTA CONSERVATION PLAN. Additional coverage of the Bay Delta Conservation Plan was provided by the [Fresno \(CA\) Bee](#) (12/27, 327K), the [Fresno \(CA\) Bee](#) (12/29, 327K), the [San Jose \(CA\) Mercury News](#) (12/28, Rockwell, 731K), the [Santa Clarita Valley \(CA\) Signal](#) (12/30, 13K), the [Marysville \(CA\) Appeal-Democrat](#) (12/30, 70K), the [Palm Springs \(CA\) Desert Sun](#) (12/28, 110K), the [Vacaville \(CA\) Reporter](#) (12/30, 57K), and the [My Mother Lode \(CA\)](#) (12/30, 1K).

ADDITIONAL COVERAGE OF PROPOSAL TO RAISE SAN LUIS RESERVOIR DAM. Additional coverage of the proposal to raise the San Luis Reservoir dam was provided by the [Stockton \(CA\) Record](#) (12/29, 123K).

Empowering Native American Communities:

OBAMA ADMINISTRATION'S STANCE ON TRIBAL CASINOS TOUCHES OFF CALIFORNIA FIGHTS. The [Los Angeles Times](#) (12/30, York, 3.07M) reports that Obama Administration "policies stimulating an expansion of tribal gambling have touched off new battles over proposed tribal casinos in California and elsewhere." During the administration of President Barack Obama, the Interior Department has "recognized dozens of new tribes and approved requests from a handful of others to acquire land that could house a casino, contingent on deals between the tribes and their home states," but "the department rejected nearly all such applications under President George W. Bush." The decisions are "causing a ripple effect in California, home to 109 federally recognized tribes, 62 of which already operate casinos." The article notes that "lawmakers have begun to question the historic ties the tribes have to the land where they want to build these casinos, and say major gambling operators from Las Vegas and elsewhere are funding the tribes' efforts to win federal approval in exchange for future management contracts."

INDIAN FAMILY PRESSES AUCTION HOUSE TO RETURN SHIRT. The [New York Times](#) (12/27, Macmillan, Subscription Publication, 9.61M) reports on the fight over a shirt that is believed to have belonged to Little

Thunder, a Lakota leader and a contemporary of Crazy Horse. According to the article, "the Skinner auction house in Boston had listed it as a 'Sioux Beaded and Quilled Hide Shirt' and estimated it would fetch between \$150,000 and \$300,000 at its Nov. 9 sale," but "minutes before the bidding began, Skinner withdrew the item from the auction in response to pressure from lawyers and tribal officials representing the Little Thunder family." According to a lawyer for the Little Thunder family, Robert P. Gough, "if the family cannot negotiate the return of the shirt," they would ask for help from the Interior Department, "which has jurisdiction over cultural property issues for Native Americans."

KICKAPOO LEADERSHIP VOWS TO CONTINUE FIGHT FOR RESERVOIR. The Topeka (KS) Capital-Journal (12/27, 194K) reports that leaders of the Kickapoo tribal reservation in Kansas want the federal government to help out with a longstanding effort to build a reservoir. A federal court ruled this month that the tribe couldn't compel a water district to use its powers of eminent domain to obtain the private property so the reservoir can move forward. Tribal chairman Steve Cadue Cadue has sent a letter to Gov. Sam Brownback urging him to petition the Interior Department of the Interior and BIA to intervene.

Also covering the story are the Emporia (KS) Gazette (12/30, 17K) and KAKE-TV Wichita, KS (12/30, 66K).

COURT HOLDS IN FAVOR OF CHALLENGED NOOKSACK TRIBAL MEMBERS. The Olympian (WA) (12/27, 119K) reports that "the 306 people fighting to stay on the Nooksack Indian Tribe's membership rolls won a rare legal victory recently when Tribal Court Chief Judge Raquel Montoya-Lewis ruled that tribal leaders had violated their rights by denying them \$250-per-person Christmas checks that were mailed to everyone else in the 2,000-member tribe." However, while Montoya-Lewis held "that it was illegal to deny the 306 the same treatment as other tribe members before their legal status is determined, she also decided that she had no legal authority to order Chairman Bob Kelly and his supporters on the tribal council to issue checks to anyone."

COURT RULES IN FAVOR OF FAMILY FIGHTING OUSTER FROM TRIBE. The U-T San Diego (12/27, 647K) reports that "a family fighting the San Pasqual Band of Mission's efforts to eject them from the tribe got a victory in court this week." The Valley Center tribe is "trying to remove about 60 members of the Alto family from its rolls saying they don't qualify for membership." In 2011, the Altos sued the Interior Department of Interior for "going along with the tribe's plans to expel them." The US Ninth District Court of Appeals held on Thursday that "the family's case against the federal agency could go forward without the tribe's involvement."

CHEROKEE NATION FILES BRIEF IN UNITED KEETOOWAH BAND'S CASINO CASE. The Cherokee (OK) Phoenix (12/30, 442) reports that Cherokee Nation Attorney General Todd Hembree filed a brief in the US Northern District Court of Oklahoma on Dec. 11 challenging a July 30, 2012, decision by the Interior Department that granted trust status for the United Keetoowah Band's casino property.

Top National News:

CMS: 975,000 ENROLLED VIA HEALTHCARE.GOV IN DECEMBER. The Administration's announcement on Sunday that 975,000 people enrolled for health insurance via HealthCare.gov in December received relatively positive coverage, including an above-of-the-fold, front-page article in the Washington Post (12/30, A1, Eilperin, Kliff, 4.28M) titled, "A Surge In Health Coverage Sign-Ups." However, much of the coverage Sunday and this morning also emphasizes that the current enrollment totals, while an improvement, are still far below the Administration's stated goals. In addition, many articles point to the likelihood of additional difficulties with the implementation of the law as those who purchased plans from one of the exchanges – or are under the impression that they purchased a plan – try out their coverage by visiting healthcare providers in the new year.

On NBC Nightly News (12/29, story 6, 3:00, Holt, 7.86M), Lester Holt reported that the Administration has "released new numbers showing a December surge in sign ups through the government's rehabilitated healthcare website" and that "total enrollment now tops 1.1 million." However, Holt added that "for a lot of Americans, including those working for small businesses, there is still uncertainty and often sticker shock over their health choices." The bulk of the NBC segment featured employees at a Michigan car company who are losing their health insurance as a result of the Affordable Care Act. According to NBC's Lisa Myers, the employees "count themselves as losers under the new law," and "many feel they're paying too much to help others get insurance." The segment concluded with one of the employees saying, "The days of low deductibles and all that stuff are

gone, so it's not going to get any better; it's just going to get worse."

Under the headline, "Federal Health Market Surpasses 1 Million Sign-ups," USA Today (12/30, A1, Korte, Locker, 5.82M) reports that HealthCare.gov "enrollment...surged in December, with almost half of the 975,000 signing up in the days before a Dec. 24 deadline." According to USA Today, "the new numbers...bring to 1.1 million the number of Americans who have enrolled through the exchange since it opened Oct. 1." In a blog post published on Sunday, CMS Administrator Marilyn Tavenner wrote: "As we continue our open enrollment campaign, we experienced a welcome surge in enrollment as millions of Americans seek access to affordable health care coverage."

According to the Los Angeles Times (12/30, Levey, Terhune, 3.07M), "An exact count nationwide is not yet available...but the total appears to be about 2 million," which "remains short of the administration's original goal of 3 million by this point, but marks a significant recovery from the system's disastrous debut in October."

The Washington Post (12/30, A1, Eilperin, Kliff, 4.28M) reports that Charles Gaba, "a Web designer tracking health-law enrollment numbers," estimates that approximately "850,000 people have enrolled through the state-run exchanges." According to the Post, "Some health-policy experts say the December surge does increase the possibility that" the ACA "could meet federal projections for 7 million enrollments by 2014." Larry Levitt, senior vice president at the Kaiser Family Foundation, is quoted as saying, "It is starting to track with what people, particularly the Congressional Budget Office, projected originally." The Post says March 31 is the ACA's "next critical deadline for enrollment" because after that date, "individuals face a tax penalty if they remain uninsured."

The Wall Street Journal (12/30, Barnes, Subscription Publication, 5.91M) covers the new numbers in an article titled, "1.1 Million Signed Up Via HealthCare.gov. Figure Falls Short of Earlier Expectations for New Marketplace."

McClatchy (12/30, Pugh, 95K) reports that Tavenner attributed the "surge" in enrollments, "in part," to the "improving HealthCare.gov," which "supported 83,000 concurrent users on December 23rd alone." However, USA Today (12/30, A1, Korte, Locker, 5.82M) notes that, at the same time, "potentially millions of Americans have had their existing insurance plans canceled because the plans failed to meet the [Affordable Care Act's] minimum standards."

The AP (12/30, Lederman) also reports that despite the "new signs of life," HealthCare.gov and the fourteen state exchanges established by the ACA "are still likely to fall short of the government's own targets for 2013." The AP adds that while CMS's Tavenner "said fixes to the website...contributed to December's figures," some "thousands of people wound up waiting on hold for telephone help on Christmas Eve for a multitude of reasons, including technical difficulties." Also, according to the AP, "insurers have complained that another set of technical problems, largely hidden from consumers, has resulted in the government passing along inaccurate data on enrollees," which could mean that those "who signed up and paid their premiums" already could "arrive at the pharmacy or the emergency room and find there's no record of their coverage."

Politico (12/30, Allen, 467K) reported that CMS "did not release figures showing the mix of the enrollment pool — whether enough young and healthy folks are signing up to balance out older and sicker consumers — which is considered by many experts to be the most important metric in assessing the success of the insurance exchanges." Politico also noted that "the enrollment tabulation represents the number of people who have completed the...plan-selection process but does not make a distinction between those who have paid for insurance plans and those who have not."

The Hill (12/30, Balluck, 194K) reported that on Fox News Sunday, former DNC chair Howard Dean said, "The data does show that less healthy people are signing up. Younger people are signing up less frequently than hoped." The Daily Caller (12/30, Bordelon, 422K) noted that Dean was responding to Dr. Scott Gottlieb, "a Connecticut-based internist who is also a scholar at the conservative American Enterprise Institute," who had said earlier on Fox News Sunday, "If you look at the demographic data — the underlying trends and who's enrolling — there's evidence that it's a less-healthy population than what the plan certainly hoped for, and probably older."

Neera Tanden of the Center for American Progress said on CNN's State Of The Union (12/29, Crowley), "If Obamacare continues to be a problem — the corporate mandate goes into effect and it is as much a catalyst for

anger amongst people as the individual mandate has been – then it's going to be a continued problem for [President Obama].”

White House Planning Campaign Highlighting ACA Success Stories. Early Sunday morning, Politico (12/30, Brown, Allen, 467K) reported that later this week, “the White House, Democratic lawmakers and advocacy organizations will launch a campaign...to highlight real-life experiences under the Affordable Care Act.” Politico says the campaign will have to compete for coverage “if Wednesday’s start of coverage for millions of Americans doesn’t go as planned” and “the airwaves [are] dominated by stories of complications and dropped insurance.” Nevertheless, according to Politico, the President’s allies “still see this moment as their best chance yet to show voters why the embattled law is worth protecting by featuring accounts of people visiting the doctor for the first time in years...or buying medication that they could never afford before.”

Reuters (12/30, Gershberg, Clarke) has a similar report on the dueling narratives expected to play out this week. Reuters notes that Aetna CEO Mark Bertolini has said, “The big moment of trust is 12:01 a.m. on January 1st, when a mother is standing in a pharmacy with a baby in her arms trying to get a script filled.” Likewise, Rep. Fred Upton (R-MI) asks, “When folks visit their doctor or take a child to get necessary treatment (this) week, will the services actually be available?”

Rep. Joaquin Castro (D-TX), on NBC’s Meet The Press (12/29, Gregory), maintained that the Affordable Care Act “is something that’s good for the country” and “really is a new day for the American people” because “they can’t be denied now because of preexisting conditions.” Donna Brazile said on CNN’s State Of The Union (12/29, Crowley), “For millions of Americans without health insurance, they are finding for the first time that they can truly have affordable healthcare. It has stabilized premiums. It has given a lifeline to millions.”

On the other hand, former Sen. Scott Brown said on Fox News Sunday (12/29, Wallace), “I think the Obamacare disaster is actually contributing to a lot of what we’re seeing in the economy. Businesses are holding back from hiring.”

Obama’s Use Of Executive Actions To Modify ACA Draws Criticism. The Washington Times (12/30, Howell, 417K) reports President Obama has repeatedly used his executive powers “to chip away at deadlines and penalties tied to the [ACA’s] individual mandate, arguing that he has the power to use his ‘discretion’ to enforce parts and delay others,” despite the fact that his 2012 campaign maintained that Mitt Romney would not have been able to substantially modify the ACA if he were to be elected. According to the Times, “Many of those who questioned whether Mr. Romney would have the authority are now defending Mr. Obama.” Lanhee Chen, a policy adviser for the Romney campaign, says, “It’s hypocritical of the left.” On the other hand, Timothy Jost, a health policy analyst at Washington and Lee University School of Law, makes the case that “there’s just a huge difference between using executive discretion to implement a law properly and using executive discretion to repeal a law.”

Brit Hume said on Fox News Sunday (12/29, Wallace), “Obamacare will continue to unravel,” and, “in fact, when you look at it, step back and look at it, an awful lot of it has either been undone, repealed or simply is now being canceled by executive fiat from the President.”

WSJournal: New Fee On Employer-Provided Plans Takes Effect This Week. The Wall Street Journal (12/30, Subscription Publication, 5.91M), in an editorial, notes that as of January 1, a new non-tax deductible fee on some health insurance policies will be imposed as part of the implementation of the Affordable Care Act. According to the Journal, the fee, which could add more than 2% to the cost of healthcare for employees of small businesses, does not apply to those who get their coverage from a union or a government entity. The Journal also notes that a bill to repeal the fee has 229 co-sponsors in the House, including some Democrats.

Cruz Attributes Shutdown To Democrats Unwillingness To “Compromise” On The ACA. Sen. Ted Cruz, on ABC’s This Week (12/29, Stephanopoulos, 2.73M), said October’s partial Federal government shutdown happened because “conservatives...stood strong and said, ‘let’s stop the train wreck that is Obamacare,’” while President Obama insisted that he was “not going to negotiate” or “compromise on anything.” According to Cruz, “Repeatedly Republicans were compromising, trying to find a middle ground, and repeatedly Democrats said, ‘no compromise, shut it down.’”

AS RECOVERY GAINS STEAM, EMPLOYMENT COULD EXCEED PRE-RECESSION PEAK IN 2014. The Wall Street Journal (12/30, Cronin, Subscription Publication, 5.91M) reports that indicators including recent strength in GDP, industrial production and construction indicate suggest that by mid-2014, total jobs could surpass their pre-recession peak. Economists in the Journal's most recent survey were optimistic, predicting on average the in 2014, the US will add 198,000 a month. That rate would put the nation on pace to reach pre-recession job levels before July.

The Wall Street Journal (12/30, A1, Timiraos, Subscription Publication, 5.91M) reports that home prices have climbed back to all-time highs in 10 of the 50 largest US cities, according to a Journal analysis of price data from Zillow. The Journal notes, however, that these cities are generally exceptions and prices in many parts of the nation remain below peak. According to the Journal in 1,500 cities, values remain at least 25% below previous highs.

In his column for the Washington Post (12/30, Samuelson, 4.28M), Robert Samuelson that with many "economic 'fundamentals' improving simultaneously," including a strengthening job market, declining household debt, a continuing housing recovery, and corporations "awash in cash," the "case for a healthier recovery now seems the most plausible since the recession's nadir in mid-2009." Samuelson notes, however, that a stronger recovery "presumes that consumers and companies respond to good news as in the past" which they may not do.

Reuters (12/30, Bruce) reports that the world economy should break a three year run of declining growth in 2014, but the upswing will likely be incremental. While investors and analysts are confident going into 2014, structural problems and imbalances remain and many economists believe the world economy will continue to see modest growth. Reuters notes that much of the optimism in financial markets is a result of an improving outlook for the US, which appears to be on pace for faster growth in 2014.

Focus On "Inexpensive" Stocks Seen As A Sign Rally Could Continue Into 2014. The Wall Street Journal (12/30, Scaggs, Subscription Publication, 5.91M) reports that with investors focusing on "inexpensive" stocks this year's stock rally could continue into 2014. Some money managers see the better-than-average gains posted by these stocks as a sign of the market's health. Their strong performance this year is an indication that investors are willing to take more risks but continue to be cautious about their portfolios.

DEMOCRATS TO PUSH MINIMUM WAGE INCREASE IN 2014. The New York Times (12/30, Martin, Shear, Subscription Publication, 9.61M) reports that Democratic leaders see increasing the minimum wage as an issue that "can lift their fortunes both locally and nationally in 2014." Officials from the White House, labor unions and liberal advocacy groups are coordinating the effort to capitalize on "growing populism among voters in both parties." Strategy meetings and conference calls in recent weeks "have focused on two levels: an effort to raise the federal minimum wage, which will be pushed by President Obama and congressional leaders, and a campaign to place state-level minimum wage proposals on the ballot in states with hotly contested congressional races."

The AP (12/30, Lew) reports that with GOP governors seeking reelection in 2014 aiming "to capitalize on distaste for Washington gridlock and President Barack Obama's dropping public approval amid the bumpy rollout of" the Affordable Care Act, Democratic gubernatorial hopefuls "may need to respond with a popular cause," and a hike in the minimum wage "could be the answer." Democratic candidates, "particularly those" running "in states that Obama won last year, are" already touting the issue. With surveys indicating an increase in the minimum wage is "publicly popular," talking up the issue "revives the message of economic inequality that Obama wielded" with success in 2012, "and it comes wrapped in a broader jobs and economic message that touches on the top priority of many voting Americans."

Minimum Wage To Increase In 13 States This Week. USA Today (12/30, Davidson, 5.82M) reports that while Congress did not raise the minimum wage in 2013, "a growing number of states are taking action." This week, the minimum wage will increase in 13 states, "and as many as 11 states and Washington, D.C., are expected to consider increases in 2014, according to the National Employment Law Project." USA Today notes that as of Jan. 1, "state minimum wages will be higher than the federal requirement of \$7.25 an hour in 21 states, up from 18 two years ago."

Advocates Say Minimum Wage Laws Short Change Tipped Workers. USA Today (12/30, Tumulty, 5.82M)

reports that advocates for low-wage workers say minimum wage laws “short change” workers who make part of their income from tips. The Federal minimum wage for these workers “hasn’t increased since 1991,” and they “also have been overlooked at the state level.”

Editorial Wrap-Up:

NEW YORK TIMES. “The Slow Demise Of Capital Punishment.” An editorial in the New York Times (12/30, Subscription Publication, 9.61M) notes that a growing number of states “are coming to recognize that the death penalty is arbitrary, racially biased and prone to catastrophic error.” The Times argues that the death penalty as it is currently applied in the US “violates the constitutional guarantees of due process and equal protection, and no longer can overcome the Eighth Amendment’s ban on cruel and unusual punishments.”

“A Tool Consumers Need.” The New York Times (12/30, Subscription Publication, 9.61M) writes in an editorial on the Consumer Financial Protection Bureau’s recent report on “pre-dispute” or “forced” arbitration clauses in which consumers must “agree in advance to use arbitration for any dispute that arises from a company’s products or services.” The Times argues for a ban on such clauses, saying that they cause “a systematic denial of justice,” because they leave “consumers with virtually no meaningful way to challenge corporate wrongdoing.” The Times urges the CFPB to follow its own evidence in working towards a ban.

“Uncle Sam’s Sweat Shops.” An editorial in the New York Times (12/30, Subscription Publication, 9.61M) criticizes the US government for pushing retailers to “demand better working conditions at factories in the developing world that make their merchandise,” but not following its own advice with the overseas factories from which it buys more than \$1.5 billion of clothes. The Times notes that factories in Bangladesh, Haiti, Cambodia and other countries that make uniforms for Federal workers “often violate basic labor standards.” The Times calls on Federal agencies to disclose “the names of all factories they use,” and on Congress to “order an investigation of the labor violations in those facilities.” Moreover, the Times says that agencies “should jointly develop a code of conduct for overseas factories as well as an inspection regimen.”

“Mr. de Blasio Picks His Speaker.” In an editorial, the New York Times (12/30, Subscription Publication, 9.61M) says New York City’s Mayor-elect Bill de Blasio “appears to have engineered a deal” that will guarantee that Melissa Mark-Viverito will be City Council speaker. The Times calls de Blasio’s “meddling” in Council affairs “unsurprising but unseemly, especially from someone who used to accuse Speaker Christine Quinn of being too close to Mayor Michael Bloomberg,” and notes that “we’re about to get a speaker with an enormous debt to the mayor, leading a legislative body that is supposed to be an independent counterweight to the executive.”

WASHINGTON POST. “Which Way Burma?” In an editorial, the Washington Post (12/30, 4.28M) questions whether Burma’s ruler have chosen the path of “true democracy or window-dressing,” noting that elections scheduled for 2015 “will be meaningless unless the nation’s constitution is changed in 2014.” The Post argues that the constitution “was written to exclude Aung San Suu Kyi from the presidency,” and “barring the nation’s most popular politician would in itself make any vote illegitimate.” In addition, it “preserves the military’s untouchable status,” which is “not compatible with democracy.” Questioning whether Burma’s leaders believe “they can stop halfway, retain their power and have their pseudo-democracy be accepted as the real thing,” or if they “are prepared to allow the Burmese to freely choose their leaders,” the Post calls on the Obama Administration to “make clear that the first option won’t fly.”

“Maryland’s Tilted Playing Field.” In an editorial that focuses on the 2014 Maryland governor’s race and the state’s campaign-finance rules, the Washington Post (12/30, 4.28M) criticizes a recent decision by the Maryland Board of Elections, which ruled that Lt. Gov. Anthony Brown’s (D) running mate, Howard County Executive Ken Ulman (D), could continue to raise cash during the state’s legislative session, though holders of statewide office and legislators are prohibited from doing so. While the board ruled that “Ulman may not coordinate his fundraising campaign with Mr. Brown during the 90-day legislative session,” the Post asks, “what is to stop the two” candidates “from doing so?” The Post adds that because state Attorney General Douglas Gansler (D) and his running mate, Del. Jolene Ivey (D), are prohibited from fundraising during the legislative session, the ruling “blatantly handicapped” their campaigns.

WALL STREET JOURNAL. “A Large New Tax On Small Business.” The Wall Street Journal (12/30,

Subscription Publication, 5.91M), in an editorial, notes that as of January 1, a new non-tax deductible fee on some health insurance policies will be imposed as part of the implementation of the Affordable Care Act. According to the Journal, the fee, which could add more than 2% to the cost of healthcare for employees of small businesses, does not apply to those who get their coverage from a union or a government entity. The Journal also notes that a bill to repeal the fee has 229 cosponsors in the House, including some Democrats.

"Verdict For National Defense." The Wall Street Journal (12/30, Subscription Publication, 5.91M), in an editorial, praises US District Court Judge William Pauley's ruling upholding NSA metadata collection as a timely rejoinder to another Federal judge's ruling earlier this month that found the NSA program violated the Fourth Amendment. The Journal also notes that Pauley was appointed by President Clinton.

"A Letter To Rouhani." An editorial in the Wall Street Journal (12/30, Subscription Publication, 5.91M) notes that former Lebanese finance minister Mohamad Chatah last week wrote an open letter to Iranian President Hasan Rouhani calling on him to end Iranian interference in Lebanon, but he was assassinated before he could send it. The Journal calls Chatah's letter a test of whether Rouhani is truly a peace maker as he claims, noting that if Iran wants a better relationship with neighboring countries it must limit the Revolutionary Guard, which arms and controls Hezbollah and the Syrian army. The Journal argues that until those forces are controlled, Chatah's assassination is a clear indication of Iran's true intentions.

HOLIDAY PUBLISHING NOTICE. In observance of the holiday, the Department of the Interior News Briefing will not be published on January 1. Publication will resume on January 2.

DOI in the News:

INTERIOR PROVIDES FUNDING FOR CLIMATE STUDIES. The [Springfield \(MA\) Republican](#) (12/31, 286K) reports that the Northeast Climate Science Center at the University of Massachusetts is "awarding more than \$800,000 to universities and other partners for research that will aid park and refuge managers and to help species and ecosystems adapt to regional climate change." The funds are being provided by the Interior Department. Interior Secretary Sally Jewell said, "Even as we take new steps to cut carbon pollution, we must also prepare for the impacts of a changing climate that are already being felt across the country. These new studies and others that are ongoing will help provide valuable, unbiased science that land managers and others need to identify tools and strategies to foster resilience in resources across landscapes in the face of climate change."

Also, the [WRAL Tech Wire](#) (12/31) reports that "seven climate science projects have been awarded federal funding for studies to be conducted with the Southeast Climate Science Center at N.C. State University." Gerard McMahon, director of Interior's Southeast Climate Science Center said in a statement, "The intersection of science and policymaking is always challenging, especially when dealing with complex scientific issues such as climate change, and resource allocation decisions that balance public priorities now and in the future," "Our intention with the projects funded by the Southeast Climate Science Center this year is to ensure that these scientific products developed by our researchers contribute information necessary for making effective decisions."

SURVEY FINDS AMERICANS BROADENING USE OF SOCIAL MEDIA SITES. The [NextGov](#) (12/31, 2K) reports that "online Americans are broadening the number of social media sites they use with 42 percent using two or more sites, according to a Pew Research Center survey released on Monday." According to the article, "the

findings could have implications for federal agencies, which are trying to broaden the ways they use social media to recruit new job applicants, communicate with the public about government programs and benefits and raise awareness of their work." The article notes that "federal agencies have moved more slowly into social media sites other than Facebook, YouTube and Twitter, partly because of their specialized audiences." It also mentions that the Interior Department has "a popular Instagram account populated with pictures of national parks and monuments."

INTERIOR'S EXPENDITURE ON OUTHOUSE PICKED AS EXAMPLE OF GOVERNMENT WASTE IN 2013. The Heritage Foundation (12/30, 34K) presents a "list of the top 10 examples of wasteful government spending this year, serving as a reminder that there is no shortage of excessive spending in Washington." At ten, the list picks \$98,670 for an outhouse in Alaska. According to the foundation, the Interior Department "spent nearly \$100,000 to install an outhouse on an Alaskan trail, which includes a single toilet with no internal plumbing."

America's Great Outdoors:

National Park Service:

PETRIFIED FOREST NATIONAL PARK ADDS NEW ACRES TO PARK. The Arizona Daily Sun (12/31, 33K) reports that the NPS "officially took ownership of 4,200 acres of new land for Petrified Forest last week." The land was acquired "from a ranching family earlier this year by the Conservation Fund and the National Parks Conservation Association on behalf of the park." NPS Director Jonathan B. Jarvis said, "This is an important milestone in the National Park Service's joint effort with our partners to protect the rich natural and cultural landscape in and around Petrified Forest National Park."

The National Journal (12/31, Subscription Publication, 427K) reports that "paleontologists were excited when they came across the skeleton" of a dinosaur "this summer in northeastern Arizona," and "nearby, researchers also found the well-preserved, 2-foot-long skull of a phytosaur, a relative of the doswellia and a distant ancestor of the modern crocodile." Moreover, "researchers say that beneath both finds, they've found the petrified and fossilized remains of a prehistoric pond ecosystem, full of prehistoric fish, amphibians, plants and reptiles." In light of these finds, on Monday, the NPS "announced that it had bought the formerly private land for preservation and further excavation." The land was purchased for about \$1.3 million with funds from the Land and Water Conservation Fund.

Also reporting on the story is KOLD-TV Tucson, AZ (12/31, 19K).

SAN JUAN ISLAND NATIONAL HISTORICAL PARK COMPLETES WESTCOTT BAY ACQUISITION. The Journal of the San Juans (WA) (12/31) reports that "the acquisition of the former Webb property in Westcott Bay by the San Juan Island National Historical Park was completed Dec. 20 when The Conservation Fund transferred the remaining 34 acres to the park," according to Parks Superintendent Lee Taylor. The NPS "acquired the first portion of the 70-acre property in March from The Conservation Fund with support from the Land and Water Conservation Fund." According to the article, "the newly protected land, primarily woodlands located along a half-mile of pristine Westcott Bay shoreline, will enable the NPS to enhance educational and recreational offerings at English Camp."

STUDY FINDS RIM FIRE LOSSES BETWEEN \$250 MILLION AND \$1.8 BILLION. The Los Angeles Times (12/30, Stevens, 3.07M) reports that "a recent study commissioned by the San Francisco Public Utilities Commission estimates that damage from the Rim fire to the natural environment and to property values could total about \$250 million to \$1.8 billion." According to the article, "the preliminary assessment released last month places dollar amounts on losses in 'environmental benefits,' carbon storage and the asset value of property near where the fire burned." Researchers from Earth Economics "found losses in environmental benefits of \$100 million to \$736 million, in carbon storage of \$102 million to \$797 million, and in private property values of \$49.7 million to \$265 million."

NPS PROPOSING CHANGES TO OZARK NATIONAL SCENIC RIVERWAYS. The Farmington (MO) Daily Journal (12/31, 7K) reports that the NPS is proposing "a management plan for the first time in more than two decades" for the Ozark National Scenic Riverways. Rep. Jason Smith is "opposed to all of the alternatives,

stressing the economic and cultural importance of the Ozark National Scenic Riverways to families and small businesses and opposing more control over public lands by the NPS." However, Stuart Keating, Environment Missouri advocate, said, "It's really heartening to see the effect that tens of thousands of Missourians raising their voice to protect the Current and Jacks Fork rivers have had on this plan. The plan offers three alternatives, and all of them represent improvements over the current management of the park, closing illegal access points, limiting horsepower on ecologically sensitive areas of the river and ensuring sustainable and sensible recreational horse use."

MESA VERDE WHISTLEBLOWER COMPLAINT UPHELD. The Durango (CO) Herald (12/30, 28K) reports that "a couple who were not rehired as seasonal rangers at Mesa Verde National Park after the husband filed a complaint against a park superintendent under the Whistleblower Protection Act have been vindicated." The couple, Bruce and Sara Schundler, "received \$220 (the cost of rescheduling two air fares), jobs next summer at a park of their choosing and public recognition of the settlement of the case." Ann O'Hanlon at the Office of Special Counsel said Monday "she didn't know if the National Park Service, which operates Mesa Verde National Park, disciplined park Cliff Spencer, the superintendent when the Schunders weren't rehired."

SHENANDOAH NATIONAL PARK TO OPEN VISITORS CENTER ON WEEKENDS. The Staunton (VA) News Leader (12/30, 9K) reports that "the Harry F. Byrd Sr. Visitor Center at Big Meadows in Shenandoah National Park will be open on winter weekends, with weather permitting, a release said, from 9 a.m. to 4 p.m. starting Jan. 11." Deborah Smith, interpretive operations supervisor for the park, noted that "this is the first year the center will be open during the winter." She said, "Typically, it closes shortly after Thanksgiving and then re-opens in the spring. We're excited that we'll be open and are looking forward to being able to provide more options for winter weekend visitors."

Bureau of Land Management:

NEW MEXICO LAND COMMISSIONER WANTS TO BUY FEDERAL LAND. In its "Govbeat" blog, the Washington Post (12/30, Chokshi, 4.28M) reports that New Mexico's State Land Office has its eyes on a few thousand acres up for sale by BLM. The article notes that "there may be limits to how much land the state can buy, but a state lawmaker has even pre-filed a bill for next year's legislative session — Senate Bill 1 — that would set aside \$250,000 to study whether such a purchase would be worthwhile." State Land Commissioner Ray Powell said, "We're interested in high-value property that could be used for commercial purposes and would earn money for our beneficiaries."

BLM PLANS FIELD WORK NEXT SUMMER AT ABANDONED RED DEVIL MINE. The Columbus (IN) Republic (12/31, 80K) reports that the BLM is planning work at the Red Devil Mine in Alaska next summer "to stop large tailings piles from eroding into a nearby creek." The project is "intended to keep metals from getting into Red Devil Creek, and then the Kuskokwim River." The BLM is also "looking for a long-term solution."

Also providing coverage are the Seattle Post-Intelligencer (12/31, 768K) and KTUU-TV Anchorage, AK (12/31, 4K).

Fish and Wildlife Service:

ELKO COUNTY COMMISSIONERS WARY OF SENATORS' SAGE GROUSE DRAFT. The Elko (NV) Daily Free Press (12/31, 22K) reports that "a bipartisan plan in the US Senate intended to conserve sage-grouse habitat and keep the bird from a 2015 endangered species listing hasn't received a strong endorsement from Elko County's elected officials." County leaders have claimed if "sage-grouse are listed as endangered or threatened, economies in northeastern Nevada would be crippled." Commissioners argue that "because the county stands to take such an economic hit...decisions regarding sage-grouse conservation should be made on a local level."

The Reno (NV) Gazette-Journal (12/30, 165K) reports that Ted Koch, Nevada director for the FWS, "likes much of what he's seen in the state plan and other alternatives now under the microscope" However, "like others, he is worried time is running out with key decisions still to be made." Koch said, "It's getting close to crunch time, and we're eager to see how we will connect the dots." He added that "restoration goals for the Great Basin's sagebrush ecosystem deserve to be implemented at the same scale as massive restoration efforts that have

occurred in places like the Everglades, the Great Lakes and Chesapeake Bay."

VALLE DE ORO NATIONAL WILDLIFE REFUGE ADDS 57 ACRES. The [Albuquerque \(NM\) Journal](#) (12/31, 288K) reports that the Valle de Oro National Wildlife Refuge grew by 57 acres Monday. The acquisition, "funded with a \$1.1 million state appropriation, brings the refuge to 488 acres and the project's sponsors hope to buy the rest of the 570-acre site by the end of 2014," according to refuge manager Jennifer Owen-White.

GROUP CLAIMS "SCIENTIFIC MISCONDUCT" IN EAGLE DISPUTE. The [Payson \(AZ\) Roundup](#) (12/30, 21K) reports that the Centers for Biological Diversity has "filed a legal action insisting" that the FWS "committed scientific misconduct in using an outdated, early draft of a computer modeling study showing little danger that the population of desert nesting bald eagles might die off." According to the article, "the latest court order came in response to a request from the Centers for Biological Diversity to hold off on its latest challenge" of the service's "insistence the desert-nesting bald eagle doesn't need continued protection, now that the eagles have recovered nationally." According to the article, "the latest allegation of scientific misconduct involves a 2009 study by USFWS researcher Brian Millsap, who developed a computer projection that gave the odds the desert-nesting eagles might die out under different circumstances."

TWO BALD EAGLES KILLED IN MONTGOMERY COUNTY. The [AP](#) (12/31) reports that Maryland Natural Resources Police are investigating the killing of two bald eagles in Montgomery County over the past week. The first was shot with a rifle on Christmas Day. On Saturday, a wounded mature eagle was found near a home in Darnestown. The bird died, and an x-ray showed it had been hit by bird shot.

Also reporting on the story are the [Baltimore Sun](#) (12/30, Campbell, Sun, 812K) and [WTOP-FM Washington](#) (12/31, 172K).

Securing America's Energy Future:

Renewable Energy:

WIND TAX CREDIT FACES UNCERTAIN FUTURE. The Christian Science Monitor (12/31, Silverstein, 540K) in its "Energy Voices" section carries a piece from Ken Silverstein that notes the struggle the Federal wind tax credit continues to face. The article says that the "relative stop-and-go nature of the terrestrial winds typifies the political treatment the industry has received." The article notes that proponents believe the credit has "led to the development of 60,000 megawatts of wind generation" causing "production costs to fall by 80 percent over the last 20 years." However, the article points out that opponents of the tax credit believe, "The growth in wind is driven not by market demand but by...state renewable portfolio standards and a tax credit." Current support for renewing the tax credit comes from a bicameral assortment of Democrats as well as Republican governors from wind-reliant states such as Iowa and Kansas. The article notes that a compromise may be in order on the Federal level as "Reducing the subsidy could then pave the way for a longer and more certain extension."

Onshore Energy Development:

OSM TO EXAMINE FIVE ASPECTS OF WEST VIRGINIA MINING OVERSIGHT. The [Washington Post](#) (12/30, Press, 4.28M) reports that the Office of Surface Mining announced on Monday it will examine five aspects of West Virginia's regulation of surface mining. The decision follows a petition filed earlier this year by nearly 20 advocacy groups which said the state Department of Environmental Protection isn't doing its job and is ignoring federal law. The OSM said it will look at five of the groups' complaints including flooding impacts, alleged violations of the Clean Water Act, water pollution from selenium and the handling of soil. OSM Director Joe Pizarchik said, "The analysis we shared with the petitioners today represents the next step in a process prescribed by the regulations that implement SMCRA. OSM will conduct its evaluations in a fair, transparent manner."

Also providing coverage are the [Charleston \(WV\) Gazette](#) (12/31, 154K), the [West Virginia MetroNews](#) (12/30, 5K), and [WWBT-TV Richmond, VA](#) (12/31, 48K).

IG REPORT: INTERIOR DEPARTMENT SOUGHT TO CHANGE COAL REGULATION JOB LOSS NUMBERS.

The Washington Times (12/31, Swarts, 417K) reports that an investigation by the Interior Department inspector general's office has found that the Obama Administration "tried to edit a report that said new coal regulations could lead to serious job loss." The finding supports earlier reports that the department "pressured a private contractor to change information in order to make the data more acceptable." According to the IG's report, "After the contractors determined that there would be high costs to the industry and significant job losses, newer [Office of Surface Mining Reclamation and Enforcement] employees involved in the project asked the contractors to change a variable in the calculations." The Times notes that investigators "stopped short in saying the agency was directly pressuring the contractor or was attempting to fudge the numbers." OMB "said that both ways to calculate job loss were acceptable — the way the contractor originally did it and the second way OSM officials requested."

BLM CONSIDERING LEASING LAND IN RIO ARRIBA COUNTY FOR OIL, GAS DEVELOPMENT SITE. The Albuquerque (NM) Journal (12/31, 288K) reports that "the BLM's Taos field office is considering leasing up to 13,300 acres of land in Rio Arriba County for oil and gas development, and not everyone is happy about it." According to the article, "Amigos Bravos, a Taos-based advocacy group, recently sent out an email urging people to contact the BLM's Taos field office to express their concerns about the proposed lease sale before the public scoping period deadline, which is Saturday." Donna Hummel, public information officer for BLM's New Mexico office, said, "Not only does BLM have an obligation to the public and public lands, but it also has an obligation to the industry. Our obligation is across the spectrum, and we take that responsibility seriously."

Offshore Energy Development:

LSU TO STUDY GULF MONITORING SYSTEMS. The AP (12/30) reports that Louisiana State University and the Federal Bureau of Ocean Energy Management are conducting a three-year, \$750,000 study to understand who uses the Gulf of Mexico Coast Ocean Observing System monitoring data and the "economic value of water-monitoring work by businesses that take the free initial data." The study should show if an expansion of the Gulf's monitoring systems is a good investment for the Federal government.

Tackling America's Water Challenges:

SAN JOAQUIN RIVER RESTORATION HIT BY DELAYS, INCREASED COSTS. KVPR-FM Fresno, CA (12/31, 284) reports that "it's been almost eight years since" the BOR "began its program to restore the San Joaquin River," and "this January is the deadline for the program to restore enough water to the San Joaquin to eventually allow runs of Chinook salmon" However, "the restoration program has been plagued by delays and increased costs." The article notes that "the program's original estimate was between \$250 to \$800 million," but now, Alicia Forsythe, Program Manager for the restoration program, "says it's closer to a billion." Forsythe "says the schedule for the projects will be revised again, based on priority and what she calls more realistic funding."

ADDITIONAL COVERAGE OF BAY DELTA CONSERVATION PLAN. Additional coverage of the Bay Delta Conservation Plan was provided by the Modesto (CA) Bee (12/29, 208K), the Western Farm Press (12/31, 2K), and KQED-FM San Francisco (12/26, 13K).

Empowering Native American Communities:

FATE OF CASINO PROPOSAL BY MENOMINEE TRIBE STILL UNDECIDED. The Appleton (WI) Post-Crescent (12/30, 139K) reports that "four months have passed" since the Interior Department "approved a proposal by the Menominee tribe to build a casino in Kenosha." However, "it could be many more months before Gov. Scott Walker decides whether to authorize the \$800 million project at the site of the former Dairyland Greyhound Park." Walker said "recently he was directing his top aide to begin 'extensive discussions' with tribal governments interested in the proposal," but according to the Milwaukee Journal Sentinel, "the decision may be postponed until after Walker runs for re-election in November."

Also covering the story is the Oshkosh (WI) Northwestern (12/30, 48K).

WAMPANOAG TRIBAL LEADERS WANT DISPUTE SETTLED IN FEDERAL COURTS . Yahoo! (12/31, 17.91M) reports that the leaders of the Wampanoag Tribe of Aquinnah on Monday said "it wanted a dispute over

its gambling rights settled in the federal courts, not the state courts." Gov. Deval Patrick's administration "filed a lawsuit with the state Supreme Judicial Court this month seeking to block the tribe from moving ahead with its plans to convert a small community center into a gambling facility." The Aquinnah on Monday "announced it had filed paperwork asking that the legal case be moved from state to federal court."

Also covering the story is [WFXT-TV Boston](#) (12/30, 60K).

Top National News:

ACA ENROLLMENT NUMBERS STILL FAR FROM ADMINISTRATION'S OWN GOAL. As was the case with the previous day's news cycle, reports from Monday evening and this morning on the December Affordable Care Act enrollment numbers describe the totals as a clear improvement over the previous two months' numbers, but note that they still far short of the Administration's goals.

For instance, Maurice DuBois, on the CBS Evening News (12/30, story 6, 2:30, Dubois, 5.58M), the only network newscast with a segment on any aspect of healthcare reform, reported that "the latest numbers...show enrollments for healthcare under Obamacare are picking up, but they are still well below what the administration had predicted." Jan Crawford went on to report that "975,000 people...signed up on Healthcare.gov in December, a surge of new enrollments that pushed the number to one point one million," and "another 831,000 signed up using the state-run health care exchanges for an overall total of nearly two million since October." Jennifer Palmieri, White House communications director, was shown saying: "December was great in terms of people wanting to be covered and also in terms of our web site being able to handle the traffic and being able to actually enroll people." However, Crawford added that Palmieri acknowledges that "there's a lot of work to be done if the Administration is going to hit its goal of seven million by the end of March."

The Hill (12/30, Easley, 194K) notes that the Administration "hasn't released a breakdown of who is enrolling, but preliminary data coming out of the state-run exchanges indicates a large number of high-risk consumers."

Peter Grier, in a piece for the Christian Science Monitor (12/30, Grier, 540K) titled, "Obamacare Enrollment Surge: Mission Accomplished Or Misleading Blip?" says that, in addition, "it's not clear how many of the new enrollees previously had individual health-care policies canceled because they didn't meet ACA standards." According to Grier, "it's possible the United States is entering the first year of Obamacare with a net loss of 2 million insured."

175,146 Purchased Plans Via New York's ACA Exchange By December 24. The New York Times (12/31, Hartocollis, Subscription Publication, 9.61M) reports that "after a rush of 11th-hour interest, 230,624 people had enrolled in either private or public insurance through New York State's health insurance exchange by the Dec. 24 deadline." According to the Times, "of those enrollments, 175,146 are in private commercial insurance plans, and 66,376 are in Medicaid." The Times also reports that "about 75 percent of those enrolling in individual plans on the New York exchange qualify for a subsidy."

Technical Problems Continue To Complicate Insurers Efforts To Verify ACA Enrollments. Politico (12/31, Cheney, 467K) reports that insurers who "are scrambling to finalize hundreds of thousands of last-minute Obamacare applications," but are "dealing with the fallout from persistent HealthCare.gov flaws that are invisible to most of their new customers." According to Politico, "Insurers have long complained of receiving duplicate or erroneous applications...and in many cases, receiving no application at all." Politico adds that the Administration "also rankled insurers with a series of last-minute changes, delays, modifications and exemptions...that pushed back enrollment deadlines right up to Christmas Eve for most people — with some extra time to help undisclosed numbers of people who tried to sign up on time but got snagged one way or another."

Under the headline, "Health Insurers Race To Complete Enrollments," the Wall Street Journal (12/31, Martin, Weaver, Subscription Publication, 5.91M) reports that according to some insurers and firms that provides billing services for insurers, approximately 50% to 65% of those who have selected plans offered on the ACA exchanges have yet to pay their first month's premium.

Rattner: ACA Is "Redistribution On A Grand Scale." Steven Rattner, who served as President Obama's "car

czar," in an online opinion piece for the New York Times (12/31, Rattner, Subscription Publication, 9.61M), says that over the past year, "little mention was made of the most fundamental aspect of the [ACA]: the way in which it raises nearly \$2 trillion over the next decade – mostly from wealthy individuals and health care providers – and uses the money to fund the largest expansion in insurance coverage since Medicare was created." Rattner acknowledges that "this is redistribution on a grand scale," but says "we should all be very proud of it."

More ACA Commentary. The Washington Post's (12/31, Cohen, 4.28M) Richard Cohen says, "Maybe time will prove Obamacare a success," but "until that distant day, it will remain emblematic of governmental overreach and (supposedly arrogant) liberalism run amok."

Michael Gerson, in his column for the Washington Post (12/31, Gerson, 4.28M), predicts that in 2014, "the travails of implementing Obamacare will continue, with unexpectedly high premium and deductible costs, restricted doctor networks and small-business plan cancellations that affect millions."

Sen. Tom Coburn, in an op-ed for the Wall Street Journal (12/31, Coburn, Subscription Publication, 5.91M), claims the President Obama was dishonest with the public as he pitched the Affordable Care Act, and says that he has ignored the rule of law since its implementation by unilaterally suspending or delaying aspects of it without Congressional approval.

SALES OF EXISTING HOMES INCREASE LESS THAN FORECAST. Bloomberg News (12/30, Woellert, 1.91M) reports that sales of existing homes in November increased less than predicated, "indicating higher borrowing costs are holding back the recovery in residential real estate." The National Association of Realtors said Monday that its Pending Home Sales Index "increased 0.2 percent." A Bloomberg survey of economists predicted an increase of 1 percent. Reuters (12/30, Bull) reports that its survey of economists also expected sales to increase 1 percent.

Wells Fargo Reaches \$591 Million Settlement With Fannie Mae. The Wall Street Journal (12/30, Chaudhuri, Subscription Publication, 5.91M) reports that Wells Fargo & Co. has reached a \$591 million settlement with Fannie Mae to resolve claims that it sold defective mortgages to the government-controlled mortgage company. Wells Fargo said the settlement resolves all potential buyback demands concerning loans sold to Fannie Mae which originated before 2009. When adjusted for credit from previous repurchases, Wells Fargo will pay \$541 million.

DOW RISES TO 51ST RECORD CLOSE OF 2013. The Wall Street Journal (12/30, Strumpf, Subscription Publication, 5.91M) reports that the Dow Jones Industrial Average rose to its 51st record close for the year, finishing the day up 26 points to 16,504. The S&P 500 was nearly unchanged at 1,841. The Nasdaq lost two points to end the day at 4,154.

Editorial Wrap-Up:

NEW YORK TIMES. "Mr. De Blasio's New Appointments." An editorial in the New York Times (12/31, Subscription Publication, 9.61M), says New York City Mayor-elect Bill de Blasio's choice to be schools chancellor, Carmen Fariña "should help dispel the ill will that has persisted between the Bloomberg administration and many local communities over the last decade or so."

"The Facts About Benghazi." The New York Times (12/31, Subscription Publication, 9.61M), in an editorial, contends that "in a rational world," Times reporter David Kirkpatrick's investigation "would settle the dispute over Benghazi."

"Cull Of The Wild."

WASHINGTON POST. "Terror And The Sochi Games." An editorial in the Washington Post (12/31, 4.28M) calls this week's terrorist attacks in Russia a "challenge for Mr. Putin." The Post calls the terrorists' "attempt to undermine the Olympics with violence" an "atrociousity that all civilized states must resist," and urges nations preparing to send delegations to the Games not to hesitate.

"An End To Death Row?" The Washington Post (12/31, 4.28M), in an editorial, notes that the Death Penalty Information Center's "annual report on capital punishment...confirms that death sentences and executions remain at or near historically low levels since the Supreme Court's reinstatement of the death penalty in 1976." According to the Post, the Death Penalty Information Center "attribute[s] the death penalty's decline to waning public support," but "the decline in capital punishment also reflects the decline in commissions of the crime for which it is most often imposed: murder."

"A Food Stamp Loophole." An editorial in the Washington Post (12/31, 4.28M) praises a legislative proposal to save \$8 billion over the next decade by stopping the misuse of the SNAP program. The plan would "would establish a minimum LIHEAP payment — \$20 a year — to qualify for enhanced benefits." The Post notes that while it is "galling that the savings would effectively fund subsidies for farmers elsewhere in the bill rather than for other low-income programs," for now, "this reform to SNAP is the best hope for staving off more damaging cuts."

WALL STREET JOURNAL. "Global Disorder Scorecard." An editorial in the Wall Street Journal (12/31, Subscription Publication, 5.91M) notes that the US is backing away from its role as guardian of global order and lists the world's leading trouble spots going into 2014. They are Ukraine, Thailand, China, South Sudan, North Korea, Syria, Egypt, and Iran, which the Journal cites as the greatest threat to world peace due to its nuclear program.

"The Inequality Contradiction." The Wall Street Journal (12/31, Subscription Publication, 5.91M), in an editorial, says New York City Mayor-elect Bill de Blasio's selection of Carmen Fariña to be his schools chancellor is evidence that his Administration does not intend to continued fully implementing the education reforms championed by Mayor Bloomberg. The Journal notes that Fariña says she retired as deputy chancellor because she objected to some of Bloomberg's policies.

"The Volgograd Bombings." In an editorial, the Wall Street Journal (12/31, Subscription Publication, 5.91M) describes this week's terrorist attacks in Russia as a reminder of Russia's continued vulnerability to terrorism. Noting the high potential for additional attacks leading up to the Olympics, the Journal notes that in the short-term Putin will have to increase security as the terrorists are hunted. However, the Journal argues that in the long-term, to ensure security, Russia requires a democratic evolution to give the government political legitimacy as well as greater administrative efficiency and transparency.

TRIBE SUES AFTER INTERIOR BLOCKS OKLAHOMA INTERNET GAMING WEBSITE. The Oklahoman (12/31, Palmer, 345K) reports that the Cheyenne and Arapaho Tribes has filed a federal lawsuit to re-establish its online gambling website. The tribe "wants to operate pokertribes.com with international players, which the state agreed to under its gaming compact." However, the Interior Department "put a stop to it last month." In its lawsuit filed Thursday in federal court in Oklahoma City, the tribe asks a judge to prevent the Interior Department "from interfering."

Also covering the story are the [Columbus \(IN\) Republic](#) (1/1, 80K), the [Enid \(OK\) News & Eagle](#) (1/1, 41K), the [Lawton \(OK\) Constitution](#) (1/1, 60K), the [Muskogee \(OK\) Phoenix](#) (1/1, 29K), and the [Navajo Times \(AZ\)](#) (1/1, 66K).

SUCCESSSES OF ENDANGERED SPECIES ACT TOUTED. For the "Taking Note" blog of the [New York Times](#) (12/31, Semple, 9.61M), Robert B. Semple Jr. writes that "on Saturday the environmental community rightly celebrated the 40th anniversary of the passage of one of the most ambitious of the Nixon era's landmark environmental statutes: the Endangered Species Act." Semple notes that "right-wing critics of the law like to point out that less than 2 per cent of the 1500 or so animal and plant species listed as endangered or threatened under the law have actually recovered to the point that they can be removed from list." However, he claims that "a much better measure is that only about 30 species have gone to their doom, 37 species have been or will soon be removed from the list, and well over half are deemed stable or on the road to recovery." He notes that "some very tough and inevitably controversial decisions lie ahead for Sally Jewell, the Interior Secretary," and "the

biggest of these will be whether to protect the Greater Sage Grouse, a pretty little creature whose habitat not only ranges over nearly a dozen western states but is also believed to contain considerable reserves of oil and natural gas."

SEN. BARRASSO OPPOSES NOMINATION OF KORNZE TO BE BLM DIRECTOR. For the Torrington (WY) Telegram (1/1, Barrasso, 8K), Sen. John Barrasso writes that "on Dec. 17, the Senate Energy and Natural Resources Committee held a confirmation hearing for Neil Kornze to be the next director of the Bureau of Land Management (BLM)." Barrasso notes that during the hearing, he "highlighted my concerns with his nomination due to his overwhelming lack of experience." Barrasso asserts that until "Kornze can prove he is qualified to lead this important agency, I will withhold my support for his nomination."

WTIMES LISTS FIVE TOP EXAMPLES OF WASTEFUL SPENDING FROM 2013. The Washington Times (1/1, Swarts, 417K) lists the winners of its "Golden Hammer" award. The five winners are "top examples" of "misguided and pointless spending of taxpayer dollars." They are a \$98,000 outhouse for a trail-head in Denali National Park in Alaska, the Energy Department and its contractors, Medicare and Medicaid, Afghanistan, and the government shutdown.

America's Great Outdoors:

National Park Service:

NPS FUNDING RESEARCH TO FORECAST CLIMATE CHANGE'S IMPACT ON NATIONAL PARKS. National Public Radio (1/2, Shogren, 465K) reports that "archeologists are looking to climate scientists to predict where the erosion will be the fastest so they can pinpoint their research on the places that will disappear the soonest." According to the article, "until now the predictions have largely been too coarse to provide much guidance." However, the NPS is "trying to change this." The agency is "funding research that supposed to forecast the threats that more than 100 coastal national parks face from sea level rise and storm surges due to climate change."

NPS WORKERS OFFER NEW-YEAR RESOLUTIONS. The Seattle Times (12/31, 1M) reports that NPS workers have released a video in which they reflect on the past and make plans for next year

Also reporting on the story is the YubaNet (CA) (1/2, 1K).

CAMP NELSON TO CELEBRATE STATUS AS A NATIONAL HISTORIC LANDMARK. The Lexington (KY) Herald-Leader (12/31, 320K) reports that Camp Nelson, "a Union recruiting center for black troops during the Civil War, on Saturday will celebrate its designation as a National Historic Landmark." According to Stephen McBride, director of interpretation and archaeology for Camp Nelson Civil War Heritage Park, "the designation is a necessary step toward Camp Nelson becoming a national park, which has been a goal of Jessamine County officials." The article notes that Rep. Andy Barr will "speak at the ceremony at 2 p.m. Saturday at Camp Nelson," and "Bill Justice, superintendent of the Abraham Lincoln Birthplace National Historic Site in LaRue County, will represent the National Park Service."

GRAND CANYON CUTS FEES FOR QUIETER AIRCRAFT. The Atlanta Journal-Constitution (1/1, 1.26M) reports that "the fees for air tour operators that use technology to quiet the sound of aircraft at Grand Canyon National Park have been reduced." According to the article, "the new \$20 fee per flight took effect Jan. 1 for any of eight operators authorized to take visitors sightseeing over the massive gorge." The NPS and the Federal Aviation Administration were "required to come up with incentives for quiet air technology aircraft at the Grand Canyon as part of a massive transportation bill passed in 2012."

Also covering the story is the Seattle Post-Intelligencer (1/2, 768K).

VINTAGE YELLOWSTONE, GLACIER NATIONAL PARK TOURING BUSES PARTICIPATE IN ROSE PARADE. The Casper (WY) Star-Tribune (1/1, 90K) reports that "two vintage touring buses from Yellowstone and Glacier national parks will help kick off the 125th Tournament of Roses Parade in Pasadena, Calif." according to the article, "the touring buses are being provided to the parade by the Jammer Trust, a nonprofit organization

dedicated to operating and preserving vintage touring buses in the Western national parks."

BEER CELLARS BUILT IN 1866 IN VIRGINIA NOMINATED AS HISTORIC SITE. The Washington Post (1/1, Press, 4.28M) reports that "along the bank of the James River in Richmond and next to luxury condominiums, a movement is brewing to place beer cellars built in 1866 on the National Register of Historic Places." According to the article, "a state Department of Historic Resources board recently voted to add the brick and granite remnants of the James River Steam Brewery to the Virginia Landmarks Register and nominate it to the federal list aimed at protecting America's historic and archaeological resources."

Bureau of Land Management:

BLM STILL WORKING ON PLANS AFTER OREGON FIRE. The Columbus (IN) Republic (1/2, 80K) reports that "salvage logging on land burned by last summer's Douglas Complex wildfire in southwestern Oregon is in full swing in privately owned forests, but not in federal ones." The article notes that the BLM is "still deep in the planning process and has no firm timber targets for the public land." According to the article, "the difference highlights the contrast between industrial logging under the Oregon Forest Practices Act and logging on public land that must conform to federal environmental laws."

Also providing coverage are the Danbury (CT) News Times (1/2, 140K) and KTVL-TV Medford, OR (1/2, 845).

GROUP RESCUES WILD HORSES. The U-T San Diego (12/31, 647K) reports that "a Southern California animal rights group says it has rescued nearly two dozen wild horses captured in New Mexico and the animals are now being sheltered at a Bonsall ranch." The article notes that "the Navajo tribe has been embroiled in controversy over its efforts to control and thin the herds of thousands of wild horses that tribal leaders say are overgrazing and damaging tribal lands already ravaged by drought." The BLM "provided technical assistance to the tribe" for horse roundups. Donna Hummel, a spokeswoman for the BLM, said "the animals caught by the agency on federal land are relocated, put up for adoption or sold." Hummel also "said the agency does not condone slaughtering horses but acknowledged that some of the horses sold in the past have ended up in slaughter houses."

NEW MEXICO LAND OFFICE COULD ACQUIRE BLM LAND. The Carlsbad (NM) Current-Argus (1/2, 18K) reports that "some parcels of land in Southeastern New Mexico may eventually change ownership thanks to an initiative by the New Mexico State Land Office and a state legislator from the north." Sen. Michael Sanchez has "introduced a proposal, Senate Bill 1, to the New Mexico Legislature that allocates \$250,000 to the state land office in fiscal years 2014 and 2015 in order to assess the feasibility of purchasing lands currently held by the Bureau of Land Management."

SOUTHEAST ALASKA HELI-SKIING COMPANY ADMITS TO USING FEDERAL LAND ILLEGALLY. The Anchorage (AK) Daily News (12/31, 198K) reports that "a Haines helicopter ski operation repeatedly broke the law when it flew clients on dozens of guided trips into closed federal land in 2012 and 2013, according to charges filed in federal court Monday." According to the article, "owners of the company, Southeast Alaska Backcountry Adventures, signed a plea agreement also filed in court Monday admitting to the unauthorized land use charge, a misdemeanor." A federal prosecutor said that "the illegal landings and skiing only came to light after a skier died this spring." BLM officials learned ski guide Christian Arcadio Cabanilla "died in an area they had closed for an environmental study."

Fish and Wildlife Service:

FWS AWARDS GRANT TO PROTECT ELEPAIO IN HAWAII. The New York Times (1/1, Keenan, Subscription Publication, 9.61M) reports on Paul Zweng's "mission to restore native species to the forest" in Hawaii. The article notes that "the state's department of land and natural resources likes his project so much that it is awarding him \$616,000 over the next 10 years." Also, the FWS has "given him a \$10,000 grant for another project: protecting the elepaio, an endangered mountain bird found only in Hawaii that is being eaten into extinction by tree-climbing black rats."

VISITOR CENTER OPENS AT DESERT NATIONAL WILDLIFE REFUGE. The Las Vegas Review-Journal (1/2, 437K) reports that a new 10,000-square-foot visitor center is welcoming visitors at Desert National Wildlife Refuge

Although the visitor center's grand opening won't be until Feb. 22, it's already open on Fridays, Saturdays and Sundays.

FWS ISSUES ANNUAL PAYMENT TO HOUSTON COUNTY. The [Houston County \(WI\) News](#) (1/1, 189) reports that "the Dec. 23 Houston County Board of Commissioners meeting began with a presentation" from the FWS. Under the provisions of the Refuge Revenue Sharing Act, Houston County received a payment of \$24,195. Jim Nissen, the La Crosse District Manager of the FWS, said "this annual payment was compensation for the loss of tax revenue on lands that are part of the national wildlife refuge system." However, Nissen "warned commissioners that the appraisal of Houston County's land in the refuge has gone down, which will lower the 2014 payment." Nissen "added that the Upper Mississippi River Wildlife and Fish Refuge generated \$226 million in economic effects, thanks to recreational visitors and supported 1,394 jobs." He ended "by adding that a new visitor center/office is located in Brice Prairie, Wis., and a special program will take place with a family day on Jan. 15."

Securing America's Energy Future:

Renewable Energy:

BIA APPROVES TULE WIND FARM LEASE. The [East County \(CA\) Magazine](#) (1/2) reports that "on December 26, local residents learned" that the BIA has "signed a Record of Decision approving a lease for Phase II of Iberdrola's controversial Tule Wind Project (also known as the Reduced Ridgeline Project) in San Diego County." Donna Tisdale, POC's Secretary, said, "The BIA's decision is reckless and shows outrageous disregard for the high fire risk we all face in San Diego County." Also, "Phase II of the Tule Wind project poses special risk to eagles." Kelly Fuller, a consultant to POC, said, "The US Fish and Wildlife Service told the BIA that Tule Wind will be an eagle killer, but the BIA didn't listen. San Diego County's Golden Eagle population has been declining for decades and the BIA's decision will make it even less likely that future generations of San Diegans will get to see Golden Eagles."

Onshore Energy Development:

GROUP URGES OBJECTIONS TO BLM LEASE IN NEW MEXICO'S RIO ARRIBA COUNTY. The Albuquerque (NM) Journal (12/31, 288K) reports, "The Bureau of Land Management's Taos field office is considering leasing up to 13,300 acres of land in Rio Arriba County for oil and gas development." In response, Amigos Bravos is "urging people to contact the BLM's Taos field office" to object. The group is arguing for "sustainable energy resources," rather than "extractive industry proposals." BLM spokesperson Donna Hummel said that the agency "has a duty to extend leasing opportunities to companies interested in energy development." In considering objections to projects, Hummel explained that the agency will "consider only relevant issues" related to "air and water quality, livestock grazing, soils, vegetation, wildlife habitat and residences."

NAVAJO NATION COMPLETES PURCHASE OF BHP BILLITON MINE. The [Indian Country Today Media Network](#) (12/31, 21K) reports that the Navajo Nation has "put the final touches on its purchase of the Navajo Mine from BHP Billiton Limited and is now the official owner, the tribe announced on December 31." The Navajo Transitional Energy Company LLC finalized the "purchase on December 30 and has agreed to supply coal to the Four Corners Power Plant through 2013, the Nation said."

ADDITIONAL COVERAGE: OSM TO EXAMINE FIVE ASPECTS OF WEST VIRGINIA MINING OVERSIGHT.

Additional coverage that the OSM will examine five aspects of West Virginia's regulation of surface mining was provided by the [West Virginia MetroNews](#) (12/31, 5K), the [Weirton \(WV\) Daily Times](#) (1/2, 12K), the [Huntington \(WV\) Herald-Dispatch](#) (1/2, 64K), the [Charleston \(WV\) State Journal](#) (1/2, 1K), and [WOWK-TV](#) Charleston, WV (1/2, 9K).

Offshore Energy Development:

SHELL'S PLANS TO EXPLORE ARCTIC UNCERTAIN IN NEW YEAR. The [Alaska Journal of Commerce](#) (1/2, 14K) reports that "major uncertainties" facing Alaska's oil and gas industry in 2014. For instance, one question is

whether Shell will “decide — and will it be allowed — to proceed with a Chukchi Sea exploration program now proposed for summer 2014.” The article notes that “lawsuits, changes in government rules and operational mishaps, mainly the loss of the Kulluk drillship in a 2012 New Year’s Eve Gulf of Alaska storm, have dogged Shell’s efforts.”

KUOW-FM Seattle (1/1, 15K) reports that “setbacks and delays have not dampened Shell’s enthusiasm for drilling in the Arctic.” The firm is “still seeking federal approval to drill in the Arctic, and a critical ship in Shell’s Arctic fleet is still sitting idle on the Bellingham, Wash., waterfront.” However, “Shell faces more federal hurdles than before its year of mishaps.”

BP ASKS FEDERAL COURT FOR INJUNCTION ON PAYMENTS NOT DIRECTLY LINKED TO SPILL.

Bloomberg News (12/31, Fisk, Calkins, 1.91M) reports that BP has asked a Federal appeals court for an immediate injunction blocking economic loss payments related to the 2010 Gulf of Mexico spill unless they can be directly linked to the disaster, saying that US District Judge Carl Barbier ignored the court’s earlier decision requiring him to review causation when determining which claims should be paid. BP argues that Barbier’s ruling will “impose further vast and unjustified costs on BP,” while lawyers for the victims have repeatedly said that “BP is trying to rewrite a deal that is proving more costly than envisioned.”

PAPER TOUTS SOUTH CAROLINA CONGRESSMAN’S EFFORTS ON OFFSHORE ATLANTIC DRILLING.

The Greenville (SC) News (12/31, 204K) in an editorial praises Rep. Jeff Duncan (R-SC) for “bringing back to Congress a comprehensive energy bill” that would allow for expanded oil and natural gas drilling in the Atlantic. Though the paper says the bill is likely “too broad and controversial to pass” in “a bitterly divided Congress,” it praises Duncan “for bringing forward genuine ideas” to boost US energy security. The paper notes that part of Duncan’s legislation “would seek new studies to determine how much oil and gas is in the Atlantic, updating three-decades old estimates that the American Petroleum Institute says underestimates the amount of gas and oil that could be accessed in those areas.”

Tackling America’s Water Challenges:

BOR REGIONAL DIRECTOR TO SPEAK AT IDAHO WATER USERS ASSOCIATION’S 77TH ANNUAL CONVENTION. The Prairie (MT) Star (1/2) reports that Lorri Lee, Regional Director of BOR, is also currently scheduled to speak at the Idaho Water Users Association’s 77th annual convention and general meeting of Idaho’s largest water use group, which will be held on January 21-23 at the Riverside Hotel in Boise.

BOR RELEASES PROGRESS REPORT ON PROPOSED SITES RESERVOIR. The Central Valley (CA) Business Times (1/2, 206) reports that the BOR, “in partnership with the California Department of Water Resources, has now released a progress report on the ‘North-of-the-Delta Offstream Storage Investigation,’ also known as the proposed Sites Reservoir.”

ADDITIONAL COVERAGE OF BAY DELTA CONSERVATION PLAN. Additional coverage of the Bay Delta Conservation Plan was provided by the Stockton (CA) Record (1/1, 123K), the Chico (CA) Enterprise-Record (1/2, 90K), the Sacramento (CA) Bee (1/1, 749K), and the Los Angeles Daily News (12/31, 382K).

Empowering Native American Communities:

NORTHWEST REGIONAL DIRECTOR FOR BIA LAUDS SCHOOL PROJECTS. The Portland (OR) Tribune (1/2, 107K) reports that “as part of the \$26.6 million school bond passed by School District 509-J in 2012, work is underway on an \$8 million auditorium and sports facility, just east of Madras High School, and \$21.5 million K-8 school in Warm Springs.” according to the article, “Kirby Nagelhout, the contractor for the new Warm Springs school for kindergarten through eighth-grade students, broke ground for the project on June 14, with officials from as far away as Washington, D.C., in attendance.” At the groundbreaking, Stanley Speaks, the Northwest regional director for the BIA, said that “the school will be an example for other tribes to emulate.” Speaks said, “It’s one of those very special times that doesn’t come around very often. This landscape’s going to change; it’s going to be different and it’s going to be different for a reason. It can be a model for other schools across Indian Country.”

BIA’S DECISION ON MASHPEE WAMPANOAG COMPACT EXPECTED SOON. The Taunton (MA) Gazette

(1/2, 36K) reports that "Taunton city officials and the Mashpee Wampanoag Tribe are expecting an affirmative decision on a revised tribal-state gambling compact to be issued" by the BIA soon. However, a spokesman from the BIA said on Tuesday that the decision is still under review.

Also providing coverage is the Dedham (MA) Daily News Transcript (1/2, 9K).

GRAND TRAVERSE COUNTY CONTINUES TO APPEAL BAND LAND TRUST. The Traverse City (MI) Record-Eagle (1/2, 68K) reports that Grand Traverse County officials "continue to dispute a decision" by the BIA "to place two parcels totaling 170 acres in Acme Township into trust." According to the article, "the Acme Township land in question is owned by the Grand Traverse Band of Ottawa and Chippewa Indians and for now has not been developed, but county officials worry it could be more valuable in the future." David Benda, the Grand Traverse County administrator, said, "The more land that goes into trust and then is developed, they could put things that are worth millions of dollars on that land and would never be taxed. All we're doing is trying to protect taxpayers' interest."

Top National News:

MILLIONS SIGNED UP FOR HEALTHCARE COVERAGE AS ACA TAKES EFFECT. One network news report last evening and print coverage this morning report that things appeared to go smoothly as the ACA took effect Wednesday. However, several stories caution that new challenges await the law in the weeks ahead, and several note an order from Supreme Court Justice Sonia Sotomayor that temporarily exempts some church-affiliated organizations from the law's contraception mandate.

NBC Nightly News (1/1, story 4, 2:40, Holt, 7.86M) reported that the ACA went into effect Wednesday "and millions of Americans began to be covered by health insurance." NBC (Costello) added that while there are "many trouble spots," including people "who signed up who haven't yet received cards or aren't showing up in the right computer system" and confusion "over premiums and benefits," millions of Americans are "insured under the Obamacare system and the numbers of people signing up are expected to increase in the next year."

The Washington Post (1/2, A1, Somashekhar, Barnes, Boorstein, 4.28M) reports that hospitals "reported a relatively quiet day, without any surge of newly insured people filling emergency rooms with pressing medical needs." The White House also "reported no problems."

Reuters (1/2, Krauskopf, Steenhuysen) reports that doctors and hospitals across the nation were preparing for confusion and administrative problems as the ACA took effect. In particular, healthcare providers were concerned about difficulties in verifying coverage with insurers, a problem that could be compounded by the Federal government and states attempting to push back enrollment deadlines and to permit some patients to wait until January to pay for coverage that is retroactive to Jan. 1.

The New York Times (1/2, Pear, Goodnough, Subscription Publication, 9.61M) reports that while hospitals were preparing "for an influx of newly insured patients," on Wednesday, many "said the pace was slower than usual because of the New Year's holiday." The Times notes that some consumers using the new insurance "discovered that they could be responsible for substantial co-payments and other out-of-pocket costs." Meanwhile, the Times notes that in anticipation of "a continued battle over health care, the White House moved Wednesday to recruit volunteers for its campaign to defend and promote the law, which is likely to be a defining issue in many congressional races this year." Supporters and beneficiaries of the law are being invited "to provide their names, email addresses and personal experiences." According to Jessica Santillo, a White House spokeswoman, "the invitation was part of a systematic new effort by the administration to 'highlight stories of everyday Americans benefiting from the law.'"

ACA Still Faces Significant Hurdles. Politico (1/1, Nather, 464K) reports that while the ACA has "survived a series of near-death experiences," it now has "a whole new series of hurdles it has to clear." Politico notes some of the obstacles that lie ahead for the law. Among them: "changing the narrative" after "three solid months of 'botched rollout' stories," ensuring that the "beginning of private health and Medicaid coverage for millions of Americans" starts "smoothly, without a lot of horror stories," enrolling "enough people" or "at least the right mix of people," court challenges, including a Supreme Court case this spring which will decide whether the

"contraceptive coverage requirement should be struck down," dealing with Congress, particularly "the ongoing series of hearings Republicans will hold to keep any implementation problems front and center — and the constant danger of red-state Democrats calling for their own rewrites to the law," and the 2014 elections.

In a front-page story, the Wall Street Journal (1/2, A1, Weaver, Subscription Publication, 5.91M) notes some troubling signs concerning the question of whether the ACA extends health insurance to the millions of people who are without it. Among them, the fact that a large number of the people who have signed up for plans are older or have preexisting conditions, and too few younger, healthier people are signing up for plans to balance them out. The Journal also notes other challenges, including the fact that previously insured are finding deductibles to be higher under the new policies than their previous plan, and the refusal of 25 states to expand Medicaid.

Analysts Expect Healthcare Changes In Wake Of ACA Enactment. USA Today (1/2, Kennedy, 5.82M) reports that now that the ACA has taken effect, healthcare industry officials and analysts "anticipate a series of related changes to affect health care in 2014." Among them: insurers will bring "more private exchanges to the workplace, and people will begin to understand they have to control their own health costs," employers will "start making changes to prepare for the requirement that companies with more than 50 employees provide health insurance for their employees," the health industry providing "more transparency in the pricing of health services," new "rules and higher enrollments," an increase in the adoption of electronic records, which will "spur industry-wide change," and lead to "higher quality and efficiency," networks will shrink as insurers "continue to limit their networks of health care providers, often by using those providers with which it can negotiate better rates," and states will drive change as Medicaid has "the most impact on local price structures."

Sotomayor Delays ACA's Birth Control Mandate. The CBS Evening News (1/1, story 5, 2:25, Reid, 5.58M) reported that Supreme Court Justice Sonia Sotomayor on Tuesday issued an order temporarily exempting some church affiliated organizations "from a requirement in the health care through that they provide health insurance that includes birth control." The Little Sisters of the Poor, "an order of Roman Catholic nuns who provide nursing care for the elderly," petitioned the Court, arguing that "they could face millions of dollars in fines because they cannot comply with the law's requirement to provide access to contraceptives which are forbidden by their religion." The case "could affect hundreds of nonprofit Catholic organizations and ministries across the country."

The AP (1/2, Holland) reports that Sotomayor's order threw "a part of the president's signature law into temporary disarray." Sotomayor "gave government officials until 10 a.m. EST Friday to respond to her order." It is unlikely a decision on "whether to make the temporary injunction permanent or dissolve it" will be made before then.

The Wall Street Journal (1/2, Landers, Subscription Publication, 5.91M) reports that the White House said Wednesday that it remains "confident that our final rules strike the balance of providing women with free contraceptive coverage while preventing nonprofit religious employers with religious objections" from having to pay for the coverage or making arrangements for their employees to get it.

The New York Times (1/2, Liptak, Subscription Publication, 9.61M) reports that Sotomayor has "opened a second front in Supreme Court challenges to the provision." The first front opened when the Court "agreed to hear a pair of cases from for-profit companies challenging that provision." Sotomayor's move requires the Administration to respond "to a different kind of challenge, this one from groups affiliated with religious organizations."

The Washington Times (1/2, Somers, 417K) reports that Sen. Roy Blunt "applauded Justice Sotomayor's decision, calling the contraception mandate 'an egregious and blatant violation' of religious freedoms guaranteed under the First Amendment." Blunt said in a statement, "No American should be forced to surrender their religious freedom or abandon their deeply held religious beliefs." The Times calls Sotomayor's move "the latest setback in a string of implementation problems that the Obama administration has encountered since the rollout of its health care exchanges in October."

Professor Blames "Southern White Radicals" For ACA's Troubled Rollout. The Daily Caller (1/2, Owens, 422K) reports that in an essay posted at the website Politics in Color, Gloria J. Browne-Marshall, who teaches constitutional law courses at the City University of New York's John Jay College of Criminal Justice, blames "southern White radicals" for the disastrous, slow-motion train wreck failure that has been the rollout of the Affordable Care Act." In the essay, which is entitled "2013: A Year of Racial Challenges." Browne-Marshall writes,

"[S]outhern White radicals vowed to stop implementation of the Obama-care law leading one to wonder if Tea Party members would oppose affordable healthcare if it came from a nonBlack [sic] President."

WPost: "Overriding Task" Now Must Be To Increase ACA Enrollment. An editorial in the Washington Post (1/2, 4.28M) argues that while the ACA has begun "working for a good chunk of those it was designed to help," the "painful truth is that, if it hadn't been for the incompetent rollout of HealthCare.gov and resistance from Republican politicians, more people would have new coverage." The Post argues that the "overriding task" now "is to increase enrollment, particularly among target populations."

RCP AVERAGE HAS OBAMA JOB APPROVAL AT 42.6%. The RealClearPolitics average of recent polling on President Obama's job approval has it at 42.6%, and disapproval at 53.4%. Approval is down 0.1% since yesterday; disapproval is unchanged.

The latest Gallup daily tracking poll of 1,500 "adults" (12/27-12/29) shows the President with a 42% approval rating and 49% disapproval. Rasmussen's automated survey of 1,500 "likely voters" (12/28-12/30) finds Obama's approval at 48%, with 50% disapproving of his performance.

SPERLING CALLS ON CONGRESS TO RENEW JOBLESS BENEFITS THAT JUST EXPIRED. The AP (1/2) reports that outgoing NEC director Gene Sperling has "call[ed] on Congress to make its first legislation of the new year the restoration of unemployment insurance for Americans whose benefits have expired." According to the AP, Sperling "says restoring the benefits would not only help those individuals, but also lead to the creation of 200,000 jobs and economic growth."

Politico (1/2, Kopan, 464K) noted that Sperling said President Obama "strongly supports' a commitment from Senate Majority Leader Harry Reid to bring for a vote a bill from Sens. Dean Heller (R-Nev.) and Jack Reed (D-R.I.) that would extend benefits for three months the day the Senate reconvenes, Jan. 6."

According to the Washington Times (1/2, Sherfinski, 417K), "Democrats and Republicans have clashed over whether the benefits...need to be paid for in other parts of the budget" as House Republicans "say they'll consider a plan to extend the benefits if there's a proposal to pay for them." The Hill (1/1, Trujillo, 194K) reported that the extension sponsored by Heller and Reid "provides no offsets and comes with a \$6.4 billion price tag, according to the Congressional Budget Office."

BOTH PARTIES REPACKAGE MESSAGES FOR MIDTERM ELECTIONS. The AP (1/2, Barrow) reports that as they head into a midterm election year, Republicans and Democrats "are looking for fresh ways to pitch old arguments." Republicans "are looking to hammer the clumsy implementation of Obama's health care overhaul and bemoan an economy that, while improving, still grows too slowly." Meanwhile, Democrats say they will run "as the party of average Americans and paint Republicans as out-of-touch allies of the wealthy," and will advocate "populist positions like a minimum wage increase and an end to tax breaks for energy companies, and they're already reminding voters of Republicans' struggle to connect with women, non-whites and younger Americans."

Republicans Optimistic About House, Senate Races. The Wall Street Journal (1/2, King, O'Connor, Subscription Publication, 5.91M) reports that amid the President's declining popularity and the troubled rollout of the ACA, Republicans are optimistic that they can add to their House majority and retake the Senate in the 2014 elections. The Journal notes that while Democrats were faring well amid public anger with the GOP over the government shutdown, following the ACA rollout, a rolling average of national polls showed that voters went from preferring Democratic control of Congress to favoring Republicans.

Partisan Shift In House Seen As Unlikely In 2014 Election. The Los Angeles Times (1/2, Barabak, 3.07M) reports that although the current Congress is the most unpopular in history, its members "will face voters this year and, very likely, win reelection in overwhelming numbers." A Cincinnati focus group led by Democratic pollster Peter Hart found that while Democrats and Republicans "dislike their own representatives," they "hold members of the opposite party in even lower regard." That sentiment "works against the sort of throw-the-bums-out election that would produce wholesale, across-the-board upheaval in the House." The Times notes that there is a greater chance for a partisan shift in the Senate, "where candidates are forced to run statewide rather than hunkering in the partisan strongholds of the House."

Editorial Wrap-Up:

NEW YORK TIMES. “Edward Snowden, Whistle-Blower.” The New York Times (1/2, Subscription Publication, 9.61M) opines that NSA leaker Edward Snowden “deserves better than a life of permanent exile, fear and flight” considering “the enormous value of the information he has revealed, and the abuses he has exposed.” Arguing that Snowden “has done his country a great service,” the Times says it is time “for the United States to offer Mr. Snowden a plea bargain or some form of clemency that would allow him to return home, face at least substantially reduced punishment in light of his role as a whistle-blower, and have the hope of a life advocating for greater privacy and far stronger oversight of the runaway intelligence community.”

“The Campaign For A Bigger Paycheck.” In an editorial, the New York Times (1/2, Subscription Publication, 9.61M) calls Democratic plans to “take a more aggressive stand this year” on raising the minimum wage “smart politics” since more than three quarters of Americans “support a wage higher than the current \$7.25 an hour, and Republicans will be hard-pressed to explain why they oppose it.” The effort, adds the Times, is also “good economics” that would “benefit tens of millions of people.” The Times also notes that the Democratic campaign “could help demonstrate to voters how intransigent Republicans have been on the most fundamental and popular elements of a strong recovery.”

WASHINGTON POST. “Keep Calm And Get Insured.” An editorial in the Washington Post (1/2, 4.28M) argues that while the ACA has begun “working for a good chunk of those it was designed to help,” the “painful truth is that, if it hadn’t been for the incompetent rollout of HealthCare.gov and resistance from Republican politicians, more people would have new coverage.” The Post argues that the “overriding task” now “is to increase enrollment, particularly among target populations.”

“Byzantine Struggle.” The Washington Post (1/2, 4.28M), in an editorial, notes that Turkish prosecutors “have brought graft charges against the sons of three cabinet ministers, the head of a state bank, a big developer and other figures close to the government of Prime Minister Recep Tayyip Erdogan.” According to the Post, Erdogan “has responded by firing the prosecutor heading up the case and...by alleging that he is the target of a foreign plot,” while Turkey’s “pro-government media flatly blame Israel and the United States.” The Post says that for the US, “what matters is that Mr. Erdogan — once regarded as a model Islamist leader and treated as a close ally by President Obama — is responding to a political challenge with autocratic tactics and anti-Western diatribes.”

“103: A Grim Tally.” The Washington Post (1/2, 4.28M) editorializes that Washington, DC “ended 2013 with 103 homicides – a number, swelled by the grim toll of the 12 people wantonly gunned down at the Washington Navy Yard by a lone shooter, that is up from 2012’s landmark low of 88 homicides.” The Post points out that the nation’s capital is, like much of the nation, “seeing a continuation of long-term reductions in violent crime,” and notes that Washington “is on the right track with anti-crime efforts,” but adds that DC Police Chief Cathy Lanier recently “singled out two areas for concern: deaths connected to bars or clubs and domestic-related killings,” and contends that Lanier’s warning “should be a cue for improved interventions by public and private social agencies.”

WALL STREET JOURNAL. “A Bumper Crop Of Bureaucracy.” An editorial in the Wall Street Journal (1/2, Subscription Publication, 5.91M) argues that while OSHA has no jurisdiction over farming operations with 10 or fewer employees, agency officials have circumvented that restriction by re-categorizing small farms as commercial grain handlers. Noting that Sen. Mike Johanns has assembled a bipartisan coalition of 42 Senators to urge the Labor Secretary to order OSHA to end all actions based on this interpretation of the statute, the Journal calls on the rest of the Senate to join them.

“Carbon To The Rescue.” In an editorial, the Wall Street Journal (1/2, Subscription Publication, 5.91M) notes the humor in the fact that the climate scientists on board the Akademik Shokalskiy, which became trapped in ice while on an expedition to study the melting of Antarctic ice sheets, are able to stay alive due to the carbon-based economy. The Journal adds that renewable-energy credits will not power the helicopters and ships that will the next attempt to rescue them.

“The Rope To Hang Them.” An editorial in the Wall Street Journal (1/2, Subscription Publication, 5.91M) examines the corporate donors to John Podesta’s Center for American Progress, noting that the list suggests that Fortune 500 CEOs see a need to buy political protection from the left. The Journal adds that the list should

be kept in mind when liberals discuss corporations opposing government power.

Washington Schedule:

TODAY'S EVENTS IN WASHINGTON.

White House:

PRESIDENT OBAMA — No Scheduled Events.

VICE PRESIDENT BIDEN — Visits Naples, Florida.

US Senate: No Scheduled Events.

US House: No Scheduled Events.

Other: VIETNAM VETERAN – SILVER STAR — 10 a.m. Maryland Congressman Chris Van Hollen and Brigadier General Jeffrey Clark, Commander of the Walter Reed National Military Medical Center, will present George Carlton Bloodworth the Silver Star Medal, the Army's third highest honor. Participants: Congressman Chris Van Hollen; Brigadier General Jeffrey Clark, Commander of the Walter Reed National Military Medical Center; George Carlton Bloodworth. Location: Office of Congressman Chris Van Hollen, 51 Monroe Street, Suite 507, Rockville, MD 20850.

DATE: FRIDAY, JANUARY 3, 2014 7:00 AM EST

TODAY'S TABLE OF CONTENTS

DOI IN THE NEWS:

- + Interior's North Central Climate Science Center Awards \$1 Million For Research.
- + Government Employees Receive 1% Raise.
- + Senators Introduce Bill To Prevent Wildfire Borrowing.
- + Mountain States Legal Foundation Challenging Regulatory Overreach.
- + Sen. Landrieu To Take Over As Chairwoman Of Energy And Natural Resources Committee.
- + Sen. Begich Touts Work On Behalf Of Drilling, Mining Industries In Radio Ads.
- + Federal Government Urged To Expand Energy Development.

AMERICA'S GREAT OUTDOORS:

National Park Service:

- + Deer Cull To Begin At Rock Creek Park.
- + New Superintendent Selected For Gettysburg National Military Park.
- + Pinnacles National Park Spotlitged.
- + Additional Coverage: Grand Canyon Gives Incentive For Quieter Aircraft.

Bureau of Land Management:

- + Group Awards Area BLM Offices For Wilderness Inventories.
- + Amendment To Legislation Could Save Alaska Cabin.
- + BLM To Hold Hearings On Gemfield Mine.

Fish and Wildlife Service:

- + Counties Receive Money For Refuge Lands.
- + FWS To Evaluate Pesticides.
- + Idaho Hunting Contest Results In 23 Killed Coyotes, But No Wolves.
- + Measures Being Considered To Reduce Snow Geese.
- + Conservationist Argues Wolves Must Not Lose Their Endangered Status.

US Geological Survey:

- + Increase In Earthquakes In Oklahoma Could Be Linked To Fracking.

SECURING AMERICA'S ENERGY FUTURE:

Renewable Energy:

- + Pension Danmark Extends Financing Deadline For Cape Wind Project.
- + LATimes Supports Solar Project Near Manzanar National Historic Site.
- + New Eagle Rule Criticized.

- + BLM Criticized For Not Prioritizing Private Property In Gateway West Transmission Project Analysis.

Onshore Energy Development:

- + Regulators Launch New Probes After Train Blast In North Dakota.
- + OSM To Review West Virginia Mining Oversight.
- + House Committee To Examine OIG Report On Rule Developed For Coal Mining.
- + Coal Company Challenging Reclamation Fee.
- + BLM Delays Sale Of Oil-gas Leases In Nevada.
- + Inquirer: Commission Should Reject Pipeline Through Pinelands.

Offshore Energy Development:

- + Speculation Continues Over Whether Podesta Will Advise White House On Arctic Drilling.
- + Judge Grants BP Expedited Appeal On Bid To Stop Spill Payments.

TACKLING AMERICA'S WATER CHALLENGES:

- + BOR To Host Open Houses On Emergency Plans For Scoggins Dam.

EMPOWERING NATIVE AMERICAN COMMUNITIES:

- + Assistant Secretary Washburn Releases Statement Following Death Of Forrest Gerard.
- + Assistant Secretary Washburn Finalizes Changes To Land-into-trust Procedures.
- + BIA Still Reviewing Mashpee Wampanoag Compact For Taunton Casino.

TOP NATIONAL NEWS:

- + Media Analyses: Still Too Early To Tell How Well The ACA Is Functioning.
- + RCP Average Has Obama Job Approval At 42.6%.
- + Fate Of Contraception Mandate Now In The Hands Of The Supreme Court.
- + New Reports Add To Optimism About The Economy.

EDITORIAL WRAP-UP:

- + New York Times.

- + Wall Street Journal.

BIG PICTURE:

- + Headlines From Today's Front Pages.

WASHINGTON SCHEDULE:

- + Today's Events In Washington.

LAST LAUGHS:

- + Late Night Political Humor.

DOI in the News:

INTERIOR'S NORTH CENTRAL CLIMATE SCIENCE CENTER AWARDS \$1 MILLION FOR RESEARCH. The [Estes Park \(CO\) Trail-Gazette](#) (1/3, 13K) reports that the Interior Department's North Central Climate Science Center, hosted at Colorado State University's Warner College of Natural Resources, will "award more than \$1 million for research designed to guide managers of parks, refuges and other cultural and natural resources in planning how to help species and ecosystems adapt to climate change." According to the article, "three projects selected for funding will focus on how climate change will affect natural resources and suggest management actions to help offset that change."

Also reporting on the story is the [Mountain Mail](#) (1/3, 17K).

GOVERNMENT EMPLOYEES RECEIVE 1% RAISE. The [E&E Daily](#) (1/2) reports that that "a three-year salary freeze ended yesterday for most federal employees, providing a boost to a workforce that has undergone pension

scale-backs, budget cuts, forced unpaid leave and a 16-day government shutdown over the past year." President Obama "released an executive order Monday that made the 1 percent raise official, beginning Jan. 1." However, "the wheels were set in motion late last year, when Congress passed a spending bill in October that did not mention a raise and hence defaulted to Obama's plan to end an across-the-board pay freeze he ordered in 2010."

SENATORS INTRODUCE BILL TO PREVENT WILDFIRE BORROWING. The E&E Daily (1/2) reports that Sens. Ron Wyden and Mike Crapo have introduced a bill "seeking to bolster funding for the Forest Service and Interior Department to fight wildfires, while also freeing up more funds for wildfire prevention." The legislation would "treat the largest fires as natural disasters, funding them from an account separate from the agency's discretionary budget." Wyden, chairman of the Energy and Natural Resources Committee, said, "Congress needs to fund the biggest, most catastrophic wildfires like the natural disasters they are, and free up funding to break the destructive cycle that underfunds fire prevention and shorts fire management. This bill ends that cycle, puts money back into prevention and provides the resources agencies need to effectively protect rural communities and forests."

MOUNTAIN STATES LEGAL FOUNDATION CHALLENGING REGULATORY OVERREACH. The E&E Daily (1/2) reports that the Mountain States Legal Foundation, which was "launched in the late 1970s as a conservative counterweight to environmental groups' litigation efforts," has recently "been taking on the government, challenging what it views as regulatory overreach." This month, "the nonprofit foundation based in a Denver suburb will be at the Supreme Court representing a Wyoming property owner who says the Forest Service had no right to build a bicycle trail on an abandoned railway that bisects his property." William Perry Pendley, the foundation's president, said "the case shows the government flouting property rights and acting without accountability." Also, William Perry Pendley, a former Interior Department official and president of the Mountain States Legal Foundation, says there is "no adult supervision" in Washington, D.C.

SEN. LANDRIEU TO TAKE OVER AS CHAIRWOMAN OF ENERGY AND NATURAL RESOURCES COMMITTEE. The E&E Daily (1/2) reports that Sen. Max Baucus' "ascension to a plum ambassadorship is weeks if not months away, but the reality of an oil and gas stalwart controlling a Democratic Energy and Natural Resources Committee began to sink in yesterday for both sides in the capital's environmental culture wars." According to the article, "although Baucus' likely departure from the Finance Committee chairmanship he first claimed in 2001 hinges on multiple political variables, the current Energy chief in the upper chamber – Sen. Ron Wyden (D-Ore.) – is poised to replace the Montana Democrat and hand over the ENR panel's gavel to Sen. Mary Landrieu (D-La.) in the spring." The article notes that "that leaves a champion of the Keystone XL pipeline and drilling expansion, whose re-election battle next November further heightens the value of industry support, in charge of a committee with outsize importance to the US fuel mix."

Field of Republicans Looking To Oust Sen. Landrieu Grows. The E&E Daily (1/2) reports that Louisiana state Rep. Paul Hollis (R) "announced his Senate bid earlier this week, adding a third Republican to the field of challengers looking to knock out Sen. Mary Landrieu (D-La.) this fall." Landrieu, "who is seeking a fourth term, is among the GOP's top targets as the party seeks to flip the six seats it needs to gain majority control of the Senate." Hollis "joins a Republican field that already includes Rep. Bill Cassidy and Entergy Corp. executive Rob Maness." According to the article, "because Louisiana uses an open primary system – in which all candidates compete regardless of party – Landrieu will face all three of her Republican opponents in the November primary with a likely December runoff if no candidate claims a majority of the vote."

SEN. BEGICH TOUTS WORK ON BEHALF OF DRILLING, MINING INDUSTRIES IN RADIO ADS. The E&E Daily (1/2) reports that Sen. Mark Begich has "launched his latest pitch in his bid to win re-election, releasing a radio ad that touts his work to support the state's drilling and mining industries." Begich, "a top target for Republicans in this year's election cycle, is working hard to distance himself from national Democrats on most issues, as the GOP seeks to flip the six seats it needs to claim a Senate majority." In the ad, Begich "ticks off accomplishments like new drilling sites at the Greens Creek mine on Admiralty Island, as well as his work with Sen. Lisa Murkowski (R-Alaska) to construct routes through roadless areas to the Niblack and Bokan Mountain mines."

FEDERAL GOVERNMENT URGED TO EXPAND ENERGY DEVELOPMENT. In an op-ed for FOX News (1/2, 6.72M), Nathan Mehrens, president of Americans for Limited Government, writes that there "was one bright spot to emerge from Washington D.C.'s latest adventure in bad budgeting: A provision further enhancing our country's

expanding energy independence." The provision "gives formal Congressional approval to oil and gas drilling across 1.5 million acres of the western Gulf of Mexico." Mehrens argues that "cheaper, cleaner and more abundant energy – long a favorite talking point of the Washington enviro-liberals – is becoming a reality in America," but "we could further expand our advantage if lawmakers resist efforts by eco-radicals to stamp out production on federal lands."

America's Great Outdoors:

National Park Service:

DEER CULL TO BEGIN AT ROCK CREEK PARK. The E&E Daily (1/2) reports that "deer culling at Rock Creek Park in Washington, D.C., could begin as soon as today and run through March 31," according to Jenny Anzelmo-Sarles, an NPS spokeswoman. Anzelmo-Sarles said, "We're not releasing specific dates or times or locations to ensure the highest degree of safety." She said that "sharpshooters from the Department of Agriculture's Wildlife Services will conduct the project, whose goal is to kill 106 deer."

Also reporting on the story are Reuters (1/3), the Washingtonian Magazine (DC) (1/3, 338K), WTTG-TV Washington (1/3, 169K), WRC-TV Washington (1/3, 291K), and WUSA-TV Washington (1/3, 95K).

NEW SUPERINTENDENT SELECTED FOR GETTYSBURG NATIONAL MILITARY PARK. The Gettysburg (PA) Times (1/3, 26K) reports that Ed W. Clark has been selected as the new Superintendent of Gettysburg National Military Park and Eisenhower National Historic Site. Clark has served most recently as Superintendent of Manassas National Battlefield Park. Clark replaces Superintendent Bob Kirby, who retires on Jan. 3. Clark will begin his new position in early February. NPS Northeast Regional Director Dennis Reidenbach said, "Ed's deep understanding of park operations and tremendous partnership skills – as well as deep connections to the Civil War community – make him the ideal candidate to lead one of the most significant battlefields in the nation, if not the world. Ed's network and skill-set will serve the park staff, community and visitors well."

Also reporting on the story are the Hanover (PA) Evening Sun (1/3, 38K) and the York (PA) Daily Record (1/3, 204K).

PINNACLES NATIONAL PARK SPOTLIGHTED. In its "Travel" section, the Washington Post (1/3, Soslow, 4.28M) spotlights Pinnacles National Park.

ADDITIONAL COVERAGE: GRAND CANYON GIVES INCENTIVE FOR QUIETER AIRCRAFT. Additional coverage of the reduced fees for "air tour operators that use technology to quiet the sound of aircraft at Grand Canyon" was provided by the Washington Post (1/2, Press, 4.28M), the Columbus (IN) Republic (1/3, 80K), and Yahoo! News Canada (1/3, 76K).

Bureau of Land Management:

GROUP AWARDS AREA BLM OFFICES FOR WILDERNESS INVENTORIES. The Glenwood Springs (CO) Post Independent (1/3, 27K) reports that in 2013, two BLM field offices in northwestern Colorado received an award from a conservation group. According to the article, "once each year, the Wilderness Society, a national environmental organization dedicated to protecting wilderness, gives out Comparative Analysis of Particular Excellence – or CAPE – awards to deserving BLM field offices across the country." The article notes that "Kent Walter, field manager of BLM's White River Field Office (WRFO) in Meeker, and Wendy Reynolds, his counterpart at the Little Snake Field Office (LSFO) in Craig, shared a four-cape award for their inventories of lands with wilderness characteristics."

AMENDMENT TO LEGISLATION COULD SAVE ALASKA CABIN. The Anchorage (AK) Daily News (1/2, 198K) reports that "a man from the southwest Alaska village of Saint Marys is one step closer to saving his remote cabin, thanks to a recent action by a US Senate committee. The BLM said William Alstrom's cabin "had to go because it is illegally located on the Andreafsky Wilderness in the Yukon Delta National Wildlife Refuge." However, "Alstrom contacted Alaska Republican Sen. Lisa Murkowski about the matter, and the senator drafted an amendment to exempt the cabin," which was attached to the Green Mountain Lookout Act," and the Senate

Energy Committee “recently passed the legislation and it’s expected to go to the full Senate for consideration.”

BLM TO HOLD HEARINGS ON GEMFIELD MINE. The Pahrump (NV) Valley Times (1/3, 23K) reports that the BLM has “published a notice of intent in the Federal Register to begin the environmental impact statement for the proposed Gemfield mine in Esmeralda County.” The BLM “identified preliminary issues including the relocation of Highway 95, closure of the cyanide heap leach pad, impacts to cultural resources, impacts to vegetation and wildlife and socioeconomic concerns related to the anticipated influx of mine workers.”

Fish and Wildlife Service:

COUNTIES RECEIVE MONEY FOR REFUGE LANDS. The Rochester (MN) Post-Bulletin (1/3, 57K) reports that Wabasha County received \$4,383 and Winona County \$4,111 from the FWS “to compensate them for taxes they didn’t get from land in Upper Mississippi River National Wildlife and Fish Refuge.” In total, “counties, cities and townships in Minnesota, Wisconsin, Iowa and Illinois received \$113,950 in August.”

FWS TO EVALUATE PESTICIDES. The Stockton (CA) Record (1/2, 123K) reports that “six widely used pesticides will be evaluated” by the FWS “over the next two years to determine whether they are being properly regulated to avoid having them contribute to the extinction of the California red-legged frog.” The service “agreed to look at the effects of the pesticides to settle a lawsuit filed three years ago by the Center for Biological Diversity.” According to the article, “the review of the effects of the pesticides, formally called a ‘consultation’ by federal officials, will be one of the first under a recently reformed system for pesticide evaluation by federal agencies that takes effect in 2014.”

IDAHO HUNTING CONTEST RESULTS IN 23 KILLED COYOTES, BUT NO WOLVES. The E&E Daily (1/2) reports that that “hunters killed nearly two dozen coyotes – but no wolves – in a controversial Idaho hunting contest.” According to the article, “about 250 contestants participated in the contest, which took place on land in Salmon-Challis National Forest near Salmon, Idaho.” During the contest, 23 coyotes were killed.

MEASURES BEING CONSIDERED TO REDUCE SNOW GESE. The Springfield (MO) News-Leader (1/2, 27K) reports that “the number of snow and blue geese has tripled since the 1960s, to more than 6 million today,” and “they are destroying their fragile Arctic breeding grounds.” The FWS “started looking for ways to bring this mushrooming population to a level its habitat can sustain.” Jamie Clark of the FWS said, “Too many snow geese are descending each year on nesting areas that simply can’t support them all. Steps must be taken or these fragile ecosystems will continue to deteriorate to the point that they can no longer support geese or other species of wildlife that share this arctic habitat.”

CONSERVATIONIST ARGUES WOLVES MUST NOT LOSE THEIR ENDANGERED STATUS. In an op-ed appearing at Yahoo! (1/3, Wetzler/Natural Resources Defense Council (nrdc), 17.91M), Andrew Wetzler, director of the Land & Wildlife Program at the NRDC, criticized the proposal by the FWS to remove the gray wolf from the federal list of endangered species. Wetzler claims that “the scientific evidence justifying the delisting of wolves, particularly in the Northeast is shaky at best. It’s not the law.” Furthermore, “there are numerous legal problems with the delisting.”

US Geological Survey:

INCREASE IN EARTHQUAKES IN OKLAHOMA COULD BE LINKED TO FRACKING. National Public Radio (1/3, Wertz, 465K) reports that in October, the USGS “warned that Oklahoma’s risk of quakes has increased tenfold.” Bill Leith, senior science adviser for earthquake and geologic hazards at the USGS, said, “That doesn’t mean that there’s going to be a large earthquake tomorrow, or next month, or next year even. But those probabilities are up very substantially.” Leith “says there’s evidence linking Oklahoma’s earthquakes to the state’s large oil and gas industry.”

Securing America’s Energy Future:

Renewable Energy:

PENSION DANMARK EXTENDS FINANCING DEADLINE FOR CAPE WIND PROJECT. The Wall Street Journal (1/3, Bomsdorf, Subscription Publication, 5.91M) reports that Pension Danmark remains committed to its \$200 million investment in Cape Wind despite the offshore wind project failing to find additional investors before 2013 ended. Officials with Copenhagen Infrastructure Partners K/S, the public pension fund Pension Danmark is investing through, said the project is progressing well and expect that it will qualify for the investment tax credit. Details are sparse, but CIP has agreed to extend the deadline to an undisclosed date. Cape Wind spokesman Mark Rodgers said they are confident the \$2 billion project will attract investors and expect financing to be completed by mid-2014.

LATIMES SUPPORTS SOLAR PROJECT NEAR MANZANAR NATIONAL HISTORIC SITE. An editorial in the Los Angeles Times (1/3, 3.07M) writes in support of the Los Angeles Department of Water and Power's Owens Valley solar project. The Times notes the criticism of opponents, who believe that the project would "damage the sense of desolation" and the Manzanar National Historic Site, an internment camp during World War II. While the editorial expresses understanding for their concern, it says that "California is obligated to both its past and its future," and that the project, while visible from Manzanar, would be silent and not "visually intrusive." The Times concludes, "accepting that change, while protecting signposts of our history, is an ongoing challenge. This project meets it."

NEW EAGLE RULE CRITICIZED. The San Jose (CA) Mercury News (1/3, 731K) editorializes that the Obama Administration has "proposed new rules that would allow the operators of the wind farms to apply for 30-year permits allowing them leeway in the number of migratory birds they kill, so long as the operator has a plan in place to help mitigate the danger." The paper notes that "the question of raptor deaths will play a large role in the speed and cost of construction" of the Chokecherry/Sierra Madre wind power project. The editorial suggests that "if the administration is going to loosen its standards for deaths of migratory birds from wind turbines, it should be looking at other ways in which birds can and should be protected — permits could be tied to retrofitting older power poles that are known electrocution risks for raptors, and turbine operators could be required to be wary during known migration periods."

BLM CRITICIZED FOR NOT PRIORITIZING PRIVATE PROPERTY IN GATEWAY WEST TRANSMISSION PROJECT ANALYSIS. In an op-ed for the Salem (OR) Capital Press (1/2, Priestley, 113K), Frank Priestley, president of the Idaho Farm Bureau, notes that "in its selection process of a route for a massive power transmission line across southern Idaho," the BLM "listed eight criteria used in the decision making process," and "Route on public land where practical" came in seventh. Priestley writes that "it's astonishing that the right to own private property, one of the most basic freedoms outlined by our nation's forefathers, slips to seventh place on a list like this." Priestley blasts the BLM for "analyzing the six criteria deemed more important than private property rights," including threats to sage grouse.

Onshore Energy Development:

REGULATORS LAUNCH NEW PROBES AFTER TRAIN BLAST IN NORTH DAKOTA. The E&E Daily (1/2) reports that "a mile-long oil train derailed Monday in North Dakota, resulting in overturned tankers and explosions." While "no one was harmed in the BNSF Railway train derailment near Casselton, N.D.," federal investigators and railroad and energy company officials have begun "to look into whether the oil either was mislabeled or included additives that have resulted in the explosions."

Meanwhile, the E&E Daily (1/2) reports that "federal regulators in the midst of an inspection 'blitz' targeting rail shipments from the fertile Bakken Shale play today warned that the light crude propelling a domestic oil renaissance 'may be more flammable' than its heavier counterparts, adding momentum to a push for stronger regulation of the rapid growth in fuel trains." The safety alert issued by the Pipeline and Hazardous Materials Safety Administration "opens a window into a summertime investigation it jointly launched with the Federal Railroad Administration after a train carrying Bakken crude fatally derailed in Quebec." Since that probe started, PHMSA said, "the agencies have found it necessary to expand the scope of their testing" of Bakken crudes to include factors affecting "corrosivity, toxicity, flammability" and other chemical properties that affect how oil is classified for rail transportation.

Safety Concerns Intensify With More Oil Traveling Rail-Freight Lines. The Wall Street Journal (1/3, Gold, Subscription Publication, 5.91M) reports that the Pipeline and Hazardous Material Safety Administration (PHMSA) and the Federal Railroad Administration (FRA) yesterday issued a warning that crude oil from North Dakota's Bakken Shale may be more flammable than ordinary crude oil. The agencies, part of the Department of Transportation, are warning shippers to test the oil and remove gases if necessary to insure safe transportation.

The New York Times (1/3, Wald, Subscription Publication, 9.61M) reports that the DOT had already "warned that shippers were failing to follow basic precautions, like determining the temperature at which oil will turn into a gas and burn or explode, and selecting appropriate tank cars to transport the material." The story quotes NTSB chairman Deborah A. P. Hersman saying, "It's called 'hazardous material' for a reason."

The AP (1/2, MacPherson) reports that both Ron Ness, president of the North Dakota Petroleum Council, and Casselton Mayor Ed McConnell remarked that the warning contained no new information. Ness said that it was the oil's "lower flash point" that "makes it a desired commodity," and McConnell said, "The important thing and the intent here is to keep pressure on the federal and state government to make things safer." But Jeannie Shiffer of the PHMSA said, "The material must be properly classified at the beginning of the process. That determines everything."

Reuters (1/2, Rucker) quotes the PHMSA warning "the type of crude being transported from the Bakken region may be more flammable than traditional heavy crude oil." The warning also urged producers to "sufficiently degasify" the oil for safety. Reuters also estimated that it could cost \$3 billion to upgrade tank cars safely to hold oil with greater amounts of gas.

The Los Angeles Times (1/3, Vartabedian, 3.07M) reports on the warning and "mounting concerns over public safety," as well as NTSB's "first broad examination of the safety of moving petroleum by rail."

OSM TO REVIEW WEST VIRGINIA MINING OVERSIGHT. The E&E Daily (1/2) reports that OSM has said it would "conduct an in-depth review of West Virginia's oversight program following a petition from environmental and community groups." The article notes that "more than a dozen groups – including the Sierra Club, Earthjustice, Coal River Mountain Watch and the Center for Biological Diversity – outlined a series of grievances against the West Virginia Department of Environmental Protection in their 102-page petition last June." In a letter to the groups, OSM Appalachian Regional Director Thomas Shope wrote that "14 of the 19 allegations set forth in the petition will not be further evaluated." However, Shope said that "it will continue reviewing the remaining five allegations 'to determine whether there is reason to believe WVDEP is not effectively implementing, administering, maintaining, or enforcing the approved [West Virginia] program.'"

HOUSE COMMITTEE TO EXAMINE OIG REPORT ON RULE DEVELOPED FOR COAL MINING. The Hill (1/3, 194K) reports in its "E2 Wire" blog that the House Natural Resources Committee is beginning the year with "a hearing spotlighting President Obama's 'war on coal.'" The hearing will focus on "a recent report released by the Interior Department's Office of Inspector General (OIG), which probed the administration's process of rewriting a 2008 stream protection rule." The OIG found that the Office of Surface Mining Reclamation and Enforcement changed "a variable in determining the impacts associated with the new rule" to reduce reported costs even though it would produce a "less accurate number."

COAL COMPANY CHALLENGING RECLAMATION FEE. The E&E Daily (1/2) reports that "a small West Virginia coal company is attacking the constitutionality of a federal industry fee for abandoned mine reclamations, part of a long-running dispute between the coal mining industry and its regulators." Coal River Energy LLC claims the OSM is "running afoul of the Constitution's export clause when it charges the fee at the point of sale rather than at the point of extraction on coal destined for overseas markets."

BLM DELAYS SALE OF OIL-GAS LEASES IN NEVADA. The Elko (NV) Daily Free Press (1/3, 22K) reports that the BLM "in Nevada has changed the date for the oil and gas lease sale of parcels in the Elko and Southern Nevada Districts from April 15 to June 24." According to the article, "the new date will allow time for the NEPA analysis to be completed and will change the end of the protest period from Feb. 16 to April 20."

INQUIRER: COMMISSION SHOULD REJECT PIPELINE THROUGH PINELANDS. The Philadelphia Inquirer (1/3, 1.22M) in an editorial said, "When New Jersey and the federal government decided to protect the 1.1 million

acres known as the Pinelands, they were thinking about the future of the irreplaceable forest, its endangered species, and aquifers filled with drinking water below its sandy soil." The proposal by South Jersey Gas Co. would "violate the well-conceived Pinelands Comprehensive Management Plan by putting a 22-mile-long natural gas pipeline through the forest." The Inquirer concludes that "the commission can grant the pipeline request, or it can protect the Pines and its own integrity."

Offshore Energy Development:

SPECULATION CONTINUES OVER WHETHER PODESTA WILL ADVISE WHITE HOUSE ON ARCTIC

DRILLING. The National Journal (1/3, Geman, Subscription Publication, 427K) reports that now that the Obama Administration has specifically said John Podesta "won't get near the Keystone Pipeline review," environmentalists are hoping he will be able to "influence another high-stakes" oil debate – Arctic drilling. Podesta is opposed to drilling in Arctic waters off the coast of Alaska, and the Interior Department faces "some big decisions" over drilling in the region. The Interior Department and "a White House aide" wouldn't comment on whether Podesta's issues might include Arctic drilling.

Murkowski Says US Is Behind In Arctic. The Hill (1/3, Barron-Lopez, 194K) reports in its "E2 Wire" blog that Sen. Lisa Murkowski (R-AK) said that the US is "behind — behind in our thinking, behind in our vision," with respect to other nations with claims in the Arctic, even as the US is preparing to take on the chairmanship of the eight-nation Arctic Council beginning in 2015.

JUDGE GRANTS BP EXPEDITED APPEAL ON BID TO STOP SPILL PAYMENTS. Bloomberg News (1/3, Fisk, Calkins, 1.91M) reports that BP Plc "won fast-track consideration by an appeals court of its bid to block economic-loss payments tied to the 2010 Gulf of Mexico oil spill unless the claims can be directly linked to the disaster." BP said last week that US District Judge Carl Barbier in New Orleans "has ignored the appellate court's earlier decision requiring him to review causation in determining which claims should be paid," and "asked an appeals panel for immediate review while lawyers for spill victims sought a delay." Circuit Judge Edith Brown Clement in New Orleans on Thursday granted BP's request for expedited consideration, and "directed spill victims to respond to BP's motion by Jan. 8 and both sides to file letters that day on the causation issue."

BP Urges Appeal Court To Require Businesses To Prove Losses Sought In Claims. The E&E Daily (1/2) reports that "BP PLC asked the 5th US Circuit Court of Appeals to order a US district judge to block payments to Gulf Coast businesses under a settlement of private claims unless they can prove their financial losses were related to the 2010 Gulf of Mexico oil spill." The firm also "asked the appeals court to throw out an order by US District Judge Carl Barbier that allowed nonprofit organizations to count drops in contributions as losses attributable to the oil spill."

Tackling America's Water Challenges:

BOR TO HOST OPEN HOUSES ON EMERGENCY PLANS FOR SCOGGINS DAM. The Portland (OR) Tribune (1/3, 107K) reports that the BOR, which owns Scoggins Dam, will "host two open houses next week to talk about emergency preparation with downstream landowners." According to the article, "the meetings stem from a study completed in 2012 that identified earthquake-related risks for the 151-foot-tall structure."

Also reporting on the story is The Oregonian (1/3, 751K).

Empowering Native American Communities:

ASSISTANT SECRETARY WASHBURN RELEASES STATEMENT FOLLOWING DEATH OF FORREST

GERARD. The Indian Country Today Media Network (1/2, 21K) reports that "following the death of Forrest J. Gerard, Blackfeet Tribe and the first Assistant Secretary for Indian Affairs on December 28, Kevin K. Washburn, current secretary, released a statement on behalf of the entire Department of the Interior." Washburn said, "Forrest Gerard will loom large in the history books as a key figure in American Indian policy. As a congressional staffer, he helped advance the interests of both the United States and Indian country by shepherding through Congress the Indian Self-Determination Act of 1975, which formally marked the end of the Termination Era and the beginning of an important new chapter in federal-tribal relations." He added, "On a personal note, I will always

value the advice Mr. Gerard offered as I began my own service as Assistant Secretary for Indian Affairs. Our thoughts and prayers go out to the Gerard family and the Blackfeet Tribe community. He will be greatly missed."

ASSISTANT SECRETARY WASHBURN FINALIZES CHANGES TO LAND-INTO-TRUST PROCEDURES. The Cherokee (OK) Phoenix (1/3, 442) reports that "in advance of the fifth White House Tribal Nations Conference, Assistant Secretary-Indian Affairs Kevin K. Washburn announced Nov. 12 a final rule that demonstrates the Obama administration's continuing commitment to restoring tribal homelands and furthering economic development on Indian reservations." Washburn said, "This rule provides greater certainty to tribes in their ability to develop lands acquired in trust for purposes such as housing, schools and economic development. For such acquisitions, the rule will create a 'speak now or forever hold your peace moment' in the land-into-trust process. If parties do not appeal the decision within the administrative appeal period, tribes will have the certainty and peace of mind to begin development without fear that the decision will be later overturned."

BIA STILL REVIEWING MASHPEE WAMPANOAG COMPACT FOR TAUNTON CASINO. The Taunton (MA) Gazette (1/3, 36K) reports that "the new version of a compact for a proposed tribal casino in Taunton was still under review as of press time Thursday, according to a spokesperson from the Assistant Secretary of Indian Affairs' office." The article notes that "Thursday was the last day of the statutory review period of the compact."

Top National News:

MEDIA ANALYSES: STILL TOO EARLY TO TELL HOW WELL THE ACA IS FUNCTIONING. As predicted by many analysts before the new year, the early days of the full implementation of the Affordable Care Act have generated a great deal of coverage featuring the "dueling narratives" from supporters and critics of the law. Anecdotes about the newly insured are pitted against reports on those who are experiencing problems as a result of the ACA. Perhaps as a result of the paucity of hard data this early in the year, the volume of healthcare reform coverage is relatively light.

Diane Sawyer, on ABC World News (1/2, story 5, 1:50, Sawyer, 7.43M), said, "We are in the beginning of a new era in healthcare in America" because "Obamacare [is] now in effect." Jonathan Karl reported on a woman for whom "the dawn of Obamacare means better health coverage, money saved, and a chance to make her first doctor's appointment in nearly a year." However, Karl added that "it's not all smooth sailing," and "it's too soon to tell if Obamacare is working." Karl reported that the Administration "can't say how many who have picked up the plan have actually paid for it," and that "there are early signs not enough healthy and young people are signing up in order to keep costs low." Karl continued, "And many...may find their current doctors are no longer covered under the new plans."

The AP (1/3, Williams), under the headline, "Relief, Confusion As New Health Benefits Begin," reports that in the new year, "the burden for implementing the law now shifts to insurance companies and health care providers." According to the AP, "although...[HealthCare.gov] is apparently fixed for consumers, the start of the year was expected to bring plenty of confusion," and Medicaid "already was experiencing problems in some states." The AP notes that while "Administration officials said this week that 2.1 million consumers have enrolled through the federal and state-run health insurance exchanges," it is not yet known "how many of those who signed up for coverage on the exchanges will follow through and pay their premiums."

The Wall Street Journal (1/3, Mathews, Martin, Weaver, Subscription Publication, 5.91M), in an article titled, "Consumers Hit Snags As Health Law Kicks In: Americans Seeking Medical Care And Prescriptions Got Mixed Results With The Nation's Newly-minted Insurance Plans," reports that insurers are already dealing with claims from those who erroneously believed they purchased a plan via an exchange.

On the other hand, according to Politico (1/3, Millman, 464K), insurers "aren't yet reporting major issues with people unable to access coverage." Politico says "providers, insurers and patient advocates say it's too early to know whether" the newly insured "are rushing to get care or running into problems when they try to use their new insurance for the first time."

On Fox News' Special Report (1/3, 2.15M), Rep. Fred Upton (R-MI), the chairman of the House Energy and Commerce Committee, was shown saying, "Time will tell in the next couple of weeks...in terms of whether people

that show up are actually" covered.

GOP State AGs Claim Obama's ACA "Fix" Is Illegal. In an online report, FOX News (1/3, 6.72M) reported that in a letter to HHS Secretary Sebelius, 11 state attorneys general "slamm[ed] the Obama administration for making repeated changes to ObamaCare without consulting congressional lawmakers, which they say is illegal." According to Fox, the AGs "specifically criticize...the administration's decision to allow insurance companies to sell policies that would otherwise be out of compliance with the Affordable Care Act for another year," which they claim "flies in the face of both federal and state law because it 'compounds illegal executive action.'" On Fox News' Special Report (1/3, 2.15M), Mike Emanuel reported that the AGs are "accusing the Administration of breaking the law by making numerous changes to Obamacare, bypassing Congress."

The Charleston (WV) State Journal (1/3, 1K) reports that West Virginia Attorney General Patrick Morrisey said, "We support allowing citizens to keep their health insurance coverage, but any changes to the law must be done legally and through the proper channels. The administration may not decide single-handedly which parts of the law it will enforce and which parts it will ignore. The only way to fix this problem-ridden law is through congressional action." According to the West Virginia Record (WV) (1/3, Dickerson, 313), Morrisey "is leading a response to a proposed federal rule about the implementation of the Affordable Care Act."

Kim Strassel, in her column for the Wall Street Journal (1/3, Strassel, Subscription Publication, 5.91M), notes that several of the executive actions that the President used to modify the ACA benefited either allies of his or corporate interests with powerful lobbyists.

The Hill (1/3, Shabad, 194K) notes that all 11 AGs are Republicans. According to the Hill, "security on the state and federal health insurance exchanges is another major issue" the AGs "say they want the Obama administration to improve." In the letter to Sebelius, they claimed that HHS "continues to 'ignore the widespread public outcry over the security of consumers' private information' on exchanges."

Gallup: 59% Of Uninsured Americans Rated Exchange Experience As "Negative" in December. The Hill (1/3, Trujillo, 194K) reports that a Gallup poll released on Thursday found that 59% "of uninsured Americans reported having a negative experience with the new ObamaCare health exchanges in December," while 39% "reported a positive experience," which is "a rise of 6 percent from October and November." However, "only 7 percent reported a 'very positive' experience, while 29 percent had a 'very negative' experience."

The Washington Times (1/3, Sherfinski, 417K) noted that, according to Gallup, 26% "of uninsured Americans say they've visited an exchange, up from 20 percent for October and November," while 30% "say they're more likely to forgo insurance and pay the law's fine rather than sign up."

Cantor: House Will Vote On ACA Cybersecurity Legislation. Politico (1/3, Cunningham, 464K) reported that on Thursday, House Majority Leader Eric Cantor said he "plans to schedule a vote next week on a measure placing more security requirements on the new Obamacare insurance exchanges." According to Politico, Republicans "spent much of last year warning that Americans' personal information could be compromised on the insurance exchanges," while the Administration "has said no such breaches have occurred."

On Fox News' Special Report (1/3, 2.15M), Mike Emanuel reported that in a memo released Thursday, Cantor "raised security concerns related to" HealthCare.gov, and "cite[d] an Experian report, which says, 'The Healthcare industry, by far, will be the most susceptible to publicly disclosed and widely scrutinized data breaches in 2014.'" Cantor was shown saying, "The administration has tried to hide the security problems that exist with the website that one official called 'limitless' prior to the website's launch."

According to The Hill (1/3, Berman, 194K), Cantor "cited the recent data breach at Target in which hackers gained access to the financial information of millions of customers." The Hill also reported that "four House committees have held hearings documenting the risks of data breaches within HealthCare.gov, and Cantor accused the Obama administration of downplaying the threat because it didn't want to scare people away from signing up for insurance."

McDermott: ACA Will Prove To Be A Political Boon For Democrats. The Washington Times (1/3, Sherfinski, 417K) reported that on MSNBC Thursday, Rep. Jim McDermott (D-WA) said, "For the first time many people

have health care and that's going to be an issue that Democrats I think can run on and be very proud of, and the other side's going to have a hard time explaining why it isn't good for people to have health insurance and be protected against previous problems they've had and getting their children covered. That's going to be hard."

Eugene Robinson, in his column for the Washington Post (1/3, Robinson, 4.28M), contends that "any existential threat to the Affordable Care Act...ended with the popping of champagne corks as the new year arrived." According to Robinson, "Obamacare is now a fait accompli," and "nobody is going to take this coverage away."

Krauthammer: Congress Needs To Repeal ACA Provisions That Could Facilitate "Bailout" For Insurers.

Charles Krauthammer, in his column for the Washington Post (1/3, Krauthammer, 4.28M), says the "first order of business for the returning Congress" ought to be passage of a bill titled, "The No Bailout for Insurance Companies Act of 2014," which should be just "one line long: 'Sections 1341 and 1342 of the Affordable Care Act are hereby repealed.'" According to Krauthammer, those sections of the ACA create a "'reinsurance' fund collected from insurers and self-insuring employers" that can be used to pay for "the 'risk corridor' provision that mandates a major taxpayer payout covering up to 80 percent of insurance-company losses."

RCP AVERAGE HAS OBAMA JOB APPROVAL AT 42.6%. The RealClearPolitics average of recent polling on President Obama's job approval has it at 42.6%, and disapproval at 53.4%. Approval and disapproval are unchanged since yesterday.

The latest Gallup daily tracking poll of 1,500 "adults" (12/27-12/29) shows the President with a 42% approval rating and 49% disapproval. Rasmussen's automated survey of 1,500 "likely voters" (12/28-12/30) finds Obama's approval at 48%, with 50% disapproving of his performance.

FATE OF CONTRACEPTION MANDATE NOW IN THE HANDS OF THE SUPREME COURT. The Detroit News (1/3, Kozlowski, 619K) reports that the Michigan Catholic Conference "hopes a federal court injunction this week could lead to the church being exempt from the Affordable Care Act's mandated contraception coverage in health insurance policies." The News notes that "a three-judge panel of the 6th Circuit Court of Appeals this week granted a temporary injunction against the federal law that requires the Catholic Conference to provide birth control coverage...or risk steep fines."

According to the Los Angeles Times (1/3, A1, Savage, Levey, 3.07M), "After more than two years of negotiations, a compromise that satisfies everyone appears out of reach." The Times says the Administration and Catholic bishops "are so far apart they don't even agree on what rests at the heart of the debate."

NYTimes Criticizes Sotomayor's "Perplexing Decision." The New York Times (1/3, Subscription Publication, 9.61M), in an editorial, takes issue with Justice Sonia Sotomayor's "perplexing decision to issue a temporary injunction against requiring an order of Colorado nuns to fill out paperwork required by the health care reform law's contraception mandate." According to the Times, "A careful review of the matter should persuade" the court "that the alleged threat to religious liberty is nonexistent," and that "the suit by the nuns' group boils down to an unjustified attempt by an employer to impose its religious views on workers."

Report: States Passed 70 Provisions Restricting Abortion In 2013. The Washington Times (1/3, Wetzstein, 417K) reports that according to the Guttmacher Institute, in 2013, state lawmakers "passed 70 provisions restricting abortions." In its report on 2013 state policies, Guttmacher said that taken together, "the new restrictions mean that 56 percent of women live in 27 states that are 'hostile' to abortion." The Times notes that Guttmacher "counts provisions individually, so one abortion-related law can have more than one provision."

NEW REPORTS ADD TO OPTIMISM ABOUT THE ECONOMY. McClatchy (1/3, Hall, 95K) reports that economic data released yesterday "point to a solid close to 2013." The ISM Manufacturing Index "came in with a reading of 57 for December," in "a sign of solid gains in manufacturing." The Census Bureau, meanwhile, said construction spending "climbed by 1 percentage point in November, well ahead of a consensus of most forecasters of about 0.7 percentage points." Moreover, the Labor Department reported "first-time claims for unemployment benefits dropped a tad to 339,000 for the week ending Dec. 28, 2013," even if the four-week average "nudged up to 357,250."

Remarking on the same three economic reports, Reuters (1/3, Mutikani) quotes Joel Naroff, chief economist at

Naroff Economic Advisors in Holland, PA as saying, "The underlying trends are pointing to the economy accelerating as we move through the year. Conditions seem to be coming together for a very good year."

The Wall Street Journal (1/3, Cronin, Subscription Publication, 5.91M) runs a similar story under the headline "US Factories Begin To Hit Growth Stride," while Bloomberg News (1/3, Chandra, 1.91M) notes the ISM number means "manufacturing grew in December at the second-fastest pace in more than two years," and that "factory purchasing managers said orders were the strongest since April 2010."

Stocks Finish Lower. The AP (1/3, Rothwell) reports attributes the lower stock prices yesterday to a "sharp drop in the price of oil." The Dow Jones "lost 135 points, or 0.8 percent, to close at 16,441," the S&P "fell 16 points, or 0.9 percent, to 1,831," and the Nasdaq "lost 33 points, or 0.8 percent, at 4,143." The Wall Street Journal (1/3, Scaggs, Subscription Publication, 5.91M), among other news outlets, also reports the story.

Dollar Surges In Year's First Day Of Trading. The Wall Street Journal (1/3, Hong, Subscription Publication, 5.91M) reports that on the first day of trading of 2014, the US dollar surged amid expectations that the recovering economy will attract overseas investors and enable the Fed to begin drawing down its stimulus efforts. The Journal notes that the euro saw its largest one-day percentage decline against the dollar since November, dropping below \$1.37. Similarly, the Turkish lira fell to a record low against the dollar and the South African rand dropped to its weakest level against the dollar since November 2008. In addition, the Brazilian real declined to a four-month low.

Editorial Wrap-Up:

NEW YORK TIMES. "Mayor de Blasio Looks Forward." An editorial in the New York Times (1/3, Board, Subscription Publication, 9.61M) takes a more describes New York City Mayor Bill de Blasio's inaugural speech as "an encouraging moment," in which the Mayor "insisted that progressive talking would now give way to progressive governing, without dilution or dithering." The Times says that de Blasio "deserves credit for an ambitious, admirable agenda," and notes that everyone in New York City "should be looking forward to his efforts to give a voice to the voiceless, to ease the suffering of the poor, and to increase opportunities for all."

"No Burden On Religion." The New York Times (1/3, Subscription Publication, 9.61M), in an editorial, takes issue with Justice Sonia Sotomayor's "perplexing decision to issue a temporary injunction against requiring an order of Colorado nuns to fill out paperwork required by the health care reform law's contraception mandate." According to the Times, "A careful review of the matter should persuade" the court "that the alleged threat to religious liberty is nonexistent," and that "the suit by the nuns' group boils down to an unjustified attempt by an employer to impose its religious views on workers."

"Scouting's Incomplete Evolution." The New York Times (1/3, Subscription Publication, 9.61M) editorializes that 2014 "brings a positive change in the membership practices of the Boy Scouts of America," as in May, delegates to the organization's national convention "voted to allow openly gay boys to participate in the group's activities," an "overdue step toward inclusion" that took effect on New Year's Day, "a welcome – though incomplete – turn for an organization that until quite recently rejected any change in its discriminatory ways." The Times notes that the organization "will continue to prohibit gay and lesbian adults from serving as troop leaders," and urges former Defense Secretary Robert Gates, who will become president of the organization in May, to "agree that the ban on gay troop leaders is unacceptable and see that it is quickly ended."

"Saving New Jersey's Coast." The New York Times (1/3, Subscription Publication, 9.61M) editorializes that Hurricane Sandy "made a direct hit on New Jersey just over a year ago, killing 34 people and devastating much of the state's Atlantic coast," and now, "communities that want to build sand dunes to provide protection when (not if) another storm hits are being thwarted by landowners who have refused to allow the dunes to be built on their property." The Times notes that the state "and some local communities are threatening to seize parts of their property" by eminent domain "and build the dunes anyway." The Times argues that "public safety is a legitimate reason to exercise eminent domain," contending that it "is unfair for a few to jeopardize the lives and property of so many others." The Times also notes that New Jersey Governor Chris Christie in September "signed an executive order requiring the attorney general to 'immediately coordinate legal action' to acquire the necessary easements."

WASHINGTON POST. "Keeping Faith In Afghanistan." In an editorial, the Washington Post (1/3, 4.28M) writes the US "must not leave any ambiguity about the fate of the" Afghan "interpreters who aided US forces over the past 13 years." While "Congress has approved a special immigrant visa program" for them, and according to the State Department 5,000 are "already at various stages" of the application process, "not all may be approved." Moreover, "as bases close, more applications may come." Noting that Secretary of State Kerry "has insisted on getting this right," the Post urges Congress to "extend the Afghan program," including as new criteria for applying "potential future threats confronting" the "men and women who served shoulder to shoulder with US soldiers."

"New York's Great Equalizer?" An editorial in the Washington Post (1/3, 4.28M) argues that while New York City Mayor Bill de Blasio "ran on a pledge to end the Big Apple's glaring income inequality," it is concerned that he "might undermine efforts that would generate more equal opportunity in the long run." The Post cites former Mayor Michael Bloomberg's attempts to reform city schools and notes that while the effort "is still a work in progress," de Blasio "seems to side with those who want to scrap Mr. Bloomberg's efforts rather than build on them." The Post argues that "giving poor children access to good schools" is the most important way to reduce inequality and adds that "of all the political forces that propelled Mr. de Blasio into office, none is less truly progressive than the backlash against school reform."

"No Money? No Problem." In an editorial, the Washington Post (1/3, 4.28M) criticizes a decision by D.C. officials to send 30 employees of the city's parks and recreation department "to a conference in Texas at the height of the federal government shutdown." Noting that the trip cost taxpayers \$54,000, the Post says the decision "reflected the poorest of judgment." The Post adds that while some members of city council "are talking about legislation to formally limit the amount of money agencies can spend on travel," such a move "would be legislative overreach and a poor substitute for the simple use of common sense when expending public funds."

WALL STREET JOURNAL. "Colorado's Pot Experiment." An editorial in the Wall Street Journal (1/3, Subscription Publication, 5.91M) says that states should closely monitor changes in the rates of marijuana-related crime and delinquency, teenage use, drug dependence and addiction, and accidents on the roads or ski slopes in Colorado to determine whether the benefits to marijuana legalization outweigh the societal costs. The Journal argues that if the effects of legalization prove to be negative, Colorado and Washington State voters may regret their decision.

"It Isn't Climate Change." Noting the cold temperatures across the nation, the Wall Street Journal (1/3, Subscription Publication, 5.91M) bemoans in an editorial the fact that spells of heat or cold in the US seem to routinely lead to politicized debates about global warming.

"Victory In Okinawa." The Wall Street Journal (1/3, Subscription Publication, 5.91M) hails in an editorial the agreement allowing the US to move its base in Futenma to the coast of Okinawa. The Journal credits Prime Minister Shinzo Abe with helping bring about the deal, along with a growing fear of Chinese military aggression. That fear, says the Journal, could also lead to stronger military ties between the US and the Philippines, South Korea, Vietnam and other nations in the region.

Taking a New, Bolder Approach to Address Environmental Impacts of Infrastructure Projects

David Hayes <dhayes@law.stanford.edu>

Sat, Jan 4, 2014 at 4:22 PM

Bcc: [REDACTED]@ios.doi.gov

Friends:

I thought that you might be interested in my recent article: "Addressing the Environmental Impacts of Large Infrastructure Projects: Making 'Mitigation' Matter." The Environmental Law Reporter just published the article in its January edition; I've attached the PDF here.

The policy approach laid out in my article is one that I have been advocating both inside and now outside the Administration. It addresses two areas of that are of strong personal interest: (1) energy -- how to improve the way in which we decide where and how to site conventional and renewable energy projects, including new, large-scale oil and gas and renewable energy projects, pipelines, and transmission lines; and (2) conservation -- how to best protect important landscapes that are highly valued by communities for the many services that they provide.

Under the status quo, developers and regulators alike typically take a small-frame view of how to compensate for environmental injuries caused by conventional and renewable energy projects, and other infrastructure projects. They often respond to environmental injuries by generating small, fragmented mitigation projects that shortchange the environment and do not generate good value for the companies that are writing the checks.

The Interior Department has been experimenting with a new approach that is described in my article. The first step requires agencies to work with developers and stakeholders to avoid or limit environmental damage from new projects. Then, for those environmental harms that cannot be avoided, I advocate that developers' mitigation dollars be directed toward larger, threatened landscapes, where the funds can have a bigger impact, consistent with environmental needs and opportunities that local, state, tribal and federal representatives identify through the type of public planning processes that already are underway across the country.

This approach would represent a significantly different way of doing business that, if adopted and coordinated across all of the many agencies that have a role in permitting large infrastructure projects, could advance communities' interests in protecting important landscapes, while rationalizing and streamlining the permitting of infrastructure projects. As noted in the article, the White House is now evaluating whether and how to introduce some of these reforms under the auspices of the President's infrastructure permitting Executive Order.

Thanks for listening, and best wishes to all for a happy new year!

Addressing the Environmental Impacts of Large Infrastructure Projects: Making “Mitigation” Matter

by David J. Hayes

David J. Hayes is a Distinguished Visiting Lecturer at Law at Stanford Law School and a Senior Fellow at the Hewlett Foundation. He is the former Deputy Secretary of the U.S. Department of the Interior.

I. Overview

We are in the midst of an unprecedented governmentwide focus on infrastructure permitting and development in the United States. Our nation’s energy industry is undergoing a significant expansion across our landscapes. Large, utility-scale solar and wind projects are springing up around the country, thousands of new oil and gas wells are being drilled each year on public and private lands throughout the United States, and new pipelines and electric transmission lines traversing the country are under construction, or are on the drawing boards. Meanwhile, bridges, roads, transit systems, and other key infrastructure are being built, restored, or replaced in every corner of our nation.

By definition, major infrastructure projects impact our landscapes. While avoiding and minimizing the impacts of infrastructure projects must continue to be the first option of project developers and reviewers, some projects may not be able to avoid filling wetlands, disrupting wildlife corridors or other sensitive habitat, or negatively affecting areas in and around parks, wildlife refuges, recreation areas, and other special lands. Impacts may be felt for many years for some projects, and permanently for others.

When highway, port, or airport projects are funded by the federal government, or when large energy infrastructure projects are proposed to cross federal lands, fill wetlands, or otherwise trigger federal permitting or review requirements, federal agencies must analyze their potential environmental impacts. In their analysis, a “mitigation hierarchy” is applied to the proposed infrastructure, with project proponents expected to avoid or reduce potential impacts in the first instance and then, for unavoidable impacts, provide compensation by sponsoring “mitigation” projects that are deemed to be reasonably equivalent to the damaged environmental values.

A. Theory and Reality Diverge

The concept of a mitigation hierarchy, and the expectation that project proponents will make meaningful conservation investments that help make up for unavoidable environmental impacts, is sound, but its implementation has been uneven. All too frequently, the mitigation piece of the permitting puzzle has been an afterthought, with project proponents and permitting authorities alike giving limited, late, and inconsistent attention to mitigation requirements. While systems are in place to measure and address wetlands and some endangered species impacts, other types of environmental impacts are dealt with on an ad hoc basis, or not at all. The result is that mitigation often is piecemealed, with project proponents responding to a set of varied and unpredictable requests from agencies that may or may not generate meaningful environmental benefits.

Few are happy with this state of affairs. Even though infrastructure project applicants typically recognize their obligation to mitigate for unavoidable environmental impacts as part of their project planning, it is often difficult for them to determine exactly what mitigation will be required, and rarely is there an adequate dialogue with regulatory agencies about how best to effectuate such mitigation. Instead, project proponents face an unpredictable set of requirements and costs associated with compensatory mitigation that are only revealed late in the game, when financing is already settled and avoidance is no longer a cost-effective option.

On the other side of the coin, overburdened permitting authorities do not find the exercise satisfying either. Often lacking broader guidance from headquarters, regional staff typically take well-worn paths that focus on those types of impacts that are well-codified—wetlands and listed species

in particular—while giving shorter shrift to other types of impacts on land, water, and wildlife.

B. Interior's Mitigation Strategy: Developing a New Framework

The major push for new infrastructure now underway provides an opportune time to address these long-standing frustrations and missed opportunities. The U.S. Department of the Interior (DOI)—which plays a major role in permitting many large renewable and conventional energy generation projects, transmission projects, and water projects, among others—has been taking steps to regularize and improve the mitigation evaluation and implementation process for projects under its purview. In so doing, DOI is ushering in a new mitigation approach that holds the promise of converting mitigation from an afterthought to a central tenet of project planning and execution—to the great benefit of both the infrastructure that we are building and the overall environment.

There are two key elements to the new mitigation strategy that DOI has been putting into place. First, is a concerted commitment to enter into early discussions with project proponents regarding key design features of proposed projects, so that agencies can identify serious and potentially project-threatening environmental impacts on the front end. In this way, siting and other design features of major projects can be adjusted to account for serious agency concerns before applicants invest heavily in problematic project features. To inform these decisions, and to integrate early analysis in a programmatic way, DOI's landscape-scale planning efforts have been leveraged to facilitate smarter siting and avoidance of critical resources.

Second, for those environmental impacts that cannot be avoided, DOI is applying new tools that will facilitate meaningful, landscape-scale mitigation investments in sensitive areas while, at the same time, enable agencies to guide impactful development to the most appropriate areas. More specifically, because DOI's land management and wildlife agencies have been actively collecting data and developing integrated management strategies on a landscape scale, as chronicled below, the Department and its partners are well-positioned to identify restoration and conservation needs on a regional basis. Mitigation obligations for infrastructure projects in a given region can then be coordinated with real restoration or conservation needs in the same region. The results will be better for both companies and the environment: project proponents' mitigation dollars will go toward meaningful, landscape-scale environmental needs—rather than small-bore and/or ad hoc mitigation efforts—and ongoing public and private investments in more significant, regional restoration or conservation needs will get a boost from project-related mitigation dollars.

These new approaches, which have been under development at DOI over the last couple of years, were formally endorsed recently in Secretary Sally Jewell's first Secretarial Order, issued on October 31, 2013. In laying out the purpose of the Secretarial Order, Secretary Jewell noted the central elements of the strategy as follows:

- (1) the use of landscape-scale approach to identify and facilitate investment in key conservation priorities in a region;
- (2) early integration of mitigation considerations in project planning and design;
- (3) ensuring the durability of mitigation measures over time;
- (4) ensuring transparency and consistency in mitigation decisions; and
- (5) a focus on mitigation efforts that improve the resilience of our Nation's resources in the face of climate change.¹

C. Moving to Consolidated, Permit-Friendly Mitigation Across All Agencies

While DOI has been showing the way, large infrastructure projects typically bring a number of permitting agencies into play, each with its own authorities and approaches for mitigating unavoidable environmental impacts. As a general matter, the involvement of multiple agencies slows the permitting process for infrastructure projects, frustrating investors and the communities that stand to benefit from such infrastructure alike. At the same time, multiple agencies can require developers to implement different mitigation strategies under their statutory authorities for the same infrastructure project, complicating compliance and diverting limited mitigation funds to disconnected mitigation investments.

The president has taken on the task of improving the multiagency permitting process for infrastructure projects by issuing Executive Order No. 13604, which commits the Administration to increase coordination and substantially reduce the permitting time line for infrastructure projects, while improving environmental results.² One of the strategies that the White House is pursuing to achieve this goal calls on permitting agencies to “identify opportunities to integrate intra- and inter-agency mitigation processes to expedite project review and encourage large-scale—watershed, regional or landscape-level—mitigation planning, where appropriate and feasible.”³

1. See Secretarial Order No. 3330—Improving Mitigation Policies and Practices of the Department of the Interior.
2. Executive Order No. 13604—Improving Performance of Federal Permitting and Review of Infrastructure Projects, available at <http://www.gpo.gov/fdsys/pkg/DCPD-201200202/pdf/DCPD-201200202.pdf>.
3. *Implementing Executive Order 13604 on Improving Performance of Federal Permitting and Review of Infrastructure Projects: A Federal Plan for Modernizing the Federal Permitting and Review Process for Better Projects, Improved Environmental and Community Outcomes, and Quicker Decisions*, available at http://www.permits.performance.gov/sites/all/themes/permits2/files/federal_plan.pdf.

The White House infrastructure permitting initiative presents a unique opportunity to expand on DOI's early efforts to implement compensatory mitigation through a landscape-scale approach that invests mitigation dollars in regional needs that community, state, and federal planning processes have identified. The big payoff will come if state and federal authorities can adopt a common set of criteria to define regional landscapes where compensatory mitigation investments can help address a broad set of environmental values, including watershed health, species and habitat health, and landscape fragmentation. Permitting agencies could then simplify the permitting process by requiring developers to make one-time, direct payments to private conservation banks and other third parties who will have the responsibility to apply these investments on private and public lands in accord with already-approved regional plans.

There is no reason why this new approach cannot take hold and improve the permitting process, while yielding better environmental results. Many local, state, and federal authorities already have identified important, vulnerable landscapes close to proposed infrastructure projects. They know the lands in their region that have high habitat and watershed values that should be protected and/or restored with compensatory mitigation (and other) dollars. And many infrastructure developers would welcome the opportunity to speed their permitting time lines and simplify their permitting obligations by cashing out their mitigation obligations early and cleanly, particularly if their funds would generate obvious environmental benefits that are important to local communities.

There is no better time than now, with the focus provided by Secretary Jewell's recent Secretarial Order and, even more importantly, the Administrationwide attention provided by the president's infrastructure permitting Executive Order, to expedite and improve the process by which infrastructure permittees discharge the compensatory mitigation obligations that flow from a variety of agency authorities. Working together, and under the direction of the White House and its Office of Management and Budget, agencies can and should define a broader concept of conservation banking that compensates for wetlands, species, and other project impacts in a comprehensive way that makes a difference on a landscape scale. Everyone wins if this is done right.

II. First Step: Early Review of Proposed Projects to Avoid or Minimize Environmental Impacts

The first key step in reinvigorating the "mitigation hierarchy" is for permitting agencies and project proponents to give more serious attention at an early stage—*before* the project proponent has committed to specific project features—so that meaningful siting and design adjustments can be made to avoid or minimize environmental conflicts.

The best example of this approach is the early review process that DOI engaged in over the past five years in siting a large number of complex, large-footprint, renewable energy projects on public lands. For example, proceeding under a Memorandum of Understanding with California Gov. Arnold Schwarzenegger and then Gov. Jerry Brown, and with the full cooperation of developers, utilities, and conservation organizations, promising renewable energy projects in California have been subject to a collaborative review process that enables federal and state regulatory agencies to approach project proponents on a unified basis to identify serious environmental concerns early in the process. The joint federal/state "Renewable Energy Action Team" has provided the forum for early discussions regarding siting and other design features for wind and solar projects in California, triggering significant changes in some proposed projects and paving the way toward a smoother and less divisive permitting process.

After successfully test-driving this early review strategy in the context of the Administration's renewable energy project push, the president called on all agencies to pursue this approach in his 2012 Infrastructure Permitting Executive Order No. 13604. The Executive Order specifically notes that agencies should integrate their evaluation of potential environmental impacts "into project planning processes so that projects are designed appropriately to avoid, to the extent practicable, adverse impacts on public health, security, historic properties and other cultural resources, and the environment, and to minimize or mitigate impacts that may occur."

In many cases, the key to following this path on a more consistent and cross-agency basis is to have serious agency/applicant discussions prior to—and during—the process of preparing environmental impact statements (EISs) under the National Environmental Protection Act (NEPA).⁴ All agency hands need to be on deck early, along with flexible and cooperative project applicants, so that potential issues will be flagged and, hopefully, shaped by candid and productive agency/applicant discussions, before the full EIS process begins in earnest.

III. Off-Site Mitigation: Syncing Up Landscape-Scale Management Initiatives and Infrastructure Mitigation Obligations

Where environmental harms from infrastructure projects cannot be avoided, the next challenge is how to more effectively implement mitigation requirements. Today, mitigation dollars often are not spent in the most environmentally effective way because either (1) government land managers, companies, or nongovernmental organizations (NGOs) have not identified high-value restoration or conservation needs near the location of proposed projects; or (2) in those regions where there already is a focus on landscape-scale

4. 42 U.S.C. §§4321-4370h, ELR STAT. NEPA §§2-209.

restoration or conservation needs, government authorities are not “connecting the dots” and seeking to apply project-related mitigation obligations to those needs.

The potential benefits of providing companies with an opportunity to apply and leverage their mitigation obligations toward higher profile, regional restoration or conservation needs is enormous—for the companies, who want their mitigation to be spent in a meaningful way, and for land managers and communities, who are looking to leverage investments in important restoration or conservation projects.

The president’s infrastructure Executive Order is showing the way, and encouraging DOI and other agencies to combine landscape-scale planning exercises and project mitigation strategies.

DOI’s implementation plan under the Executive Order accepts the challenge and notes that DOI already is “foster[ing] inter-agency collaboration” on a number of fronts, “including the Solar Programmatic Environmental Impact Statement [the ‘Western Solar Plan’]; the Geothermal Environmental Impact Statement; the Desert Renewable Energy Conservation Plan; the Arizona Restoration and Design Energy Project; BLM’s [Bureau of Land Management’s] Rapid Ecological Assessments and the Sage-Grouse Habitat Conservation and Planning Strategy.”⁵ Indeed, as discussed below, BLM has gone one step further by issuing interim mitigation guidance that encourages that the nation’s largest land manager—BLM—apply a suite of offsite mitigation tools, including a new emphasis on regional mitigation strategies and planning, so that project-based mitigation dollars can be spent more effectively.

For a variety of reasons that I recently described in a speech at Stanford’s Lane Center for the American West, federal, state, and tribal authorities—working with communities, NGOs, and other interested parties—are engaged in an unprecedented number of landscape-scale management and planning exercises.⁶ Many of these are the same landscapes in which large, new infrastructure projects are being planned or built. The trick now is to connect the dots, and better match up the restoration and conservation needs these integrated landscape-scale management and planning exercises are identifying with project-based mitigation obligations related to the siting of major infrastructure projects in those regions.

Examples of landscape-scale initiatives that are assisting in the siting of new projects in lower conflict areas, and in identifying regional mitigation needs that might provide a good match for those projects’ mitigation obligations, include the following:

- **Western Solar Plan.** Through its Western Solar Plan, BLM has reviewed landscapes in six south-

western states and identified “solar energy zones” that have fewer environmental conflicts, access to transmission, and other features that make them particularly suitable for solar project development and attractive to project developers. Importantly, the Western Solar Plan calls on BLM and its partners to identify regional mitigation opportunities that can be paired with solar energy zones, so that applicants who are siting projects in solar energy zones can invest their mitigation dollars in meaningful, landscape-scale needs in the region. In this way, project-specific mitigation obligations can be directed into larger and more meaningful investments that mesh with broader environmental restoration and protection investments that federal and state governmental authorities, tribes, local communities, NGOs, and others may be prioritizing.

- **Desert Renewable Energy Conservation Plan.** BLM and the U.S. Fish & Wildlife Service (FWS) are working with the California Energy Commission, the California Department of Fish and Wildlife, and other state, local, and tribal partners in developing the Desert Renewable Energy Conservation Plan: an ambitious plan covering more than 20 million acres in the Mojave Desert in California that identifies “development focus areas” for project development, on the one hand, and conservation lands that should be protected from development, on the other hand. Mitigation is being baked into an integrated, landscape-scale management and planning exercise that is driven by the need to site large renewable energy projects in future years in southern California.
- **Rapid Eco-Regional Assessments.** DOI’s BLM has launched 14 Rapid Eco-Regional Assessments (REAs) since 2010 that examine ecological values, conditions, and trends within large eco-regions, such as the Sonoran Desert and the Colorado Plateau. REAs span administrative boundaries and include both public and private lands. They identify regionally important habitats for fish, wildlife, and species of concern and gauge the potential of these habitats to be affected by four overarching environmental change agents: climate change; wildfires; invasive species; and development (both energy development and urban growth). At the same time, REAs also help identify areas that do not provide essential habitat, that are not ecologically intact or readily restorable, and where development activities may be directed to minimize impacts to important ecosystem values.
- **The Western Governors Association’s Crucial Habitat Assessment Tool.** The Western Governors Association has been working for several years on a project that is developing Crucial Habitat Assessment Tool (CHAT) to identify wildlife corridors and other key habitats that need priority attention. The CHAT initiative develop landscape-level data that,

5. Department of the Interior Agency Plan Implementing Executive Order 13604 on Improving Performance of Federal Permitting and Review of Infrastructure Projects, available at <http://www.doi.gov/news/pressreleases/loader.cfm?csModule=security/getfile&pageid=359605>.

6. See http://west.stanford.edu/sites/default/files/DJHayes_Lane_Center_Speech-20130430.pdf; see also David J. Hayes, *Testimony: Thinking Big*, 30:6 ENVTL. F. 40 (Nov./Dec. 2013).

much like BLM's REAs, can help direct new projects to lower conflict areas, while also identifying regional restoration or conservation needs that are good candidates for mitigating project impacts.⁷

- **Sage Grouse Habitat Protection Plans.** DOI and other federal and state authorities are devoting significant attention to the habitat needs of greater sage grouse in 11 western states in a coordinated planning effort designed to obviate a potential listing of sage grouse under the Endangered Species Act (ESA)⁸ or to reduce the impact if listing is necessary. In concert with the federal land management planning, states are developing landscape-scale plans that identify sage grouse strongholds and related sage grouse habitat protection strategies. This extensive, science-driven planning exercise potentially could provide a road map for impactful mitigation-related investments for project developers who potentially may be impacting sage grouse habitat (e.g., transmission lines; oil and gas, and wind developments).

There are other landscape-scale management exercises that provide similar opportunities. By way of example, DOI, working in partnership with the U.S. Forest Service, has instituted a new approach for allocating a significant percentage of its Land and Water Conservation Funds (LWCF) to focus on the most deserving and in-need landscapes. When infrastructure is proposed to be sited in these regions, mitigation dollars can potentially be matched up with public LWCF monies to create a more significant environmental benefit.

Similarly, a massive interagency process is underway to address long-standing restoration needs in the Gulf of Mexico, following the Deepwater Horizon oil spill. With so much expertise being focused on sound restoration investments in the Gulf, there may be significant leveraging available for offsite project mitigation dollars from the region.

Finally, land, water, and wildlife managers at all governmental, tribal, and NGO levels are using DOI-supported Landscape Conservation Cooperatives and regional Climate Science Centers around the country to better understand conservation challenges in their regions and to identify adaptation and resilience investments that can address such pressures—investments that project mitigation dollars might be appropriately directed toward.

The challenge—and the opportunity—is to sync up mitigation obligations with these landscape-scale assessment and planning exercises so that restoration and conservation needs identified through landscape initiatives can be addressed, in part, with mitigation dollars from projects in the region.

DOI is establishing the policy framework to accomplish this mission. The agency plan issued by the Department

under the president's infrastructure Executive Order, for example, explicitly makes this point:

DOI remains focused on prioritizing investments which are likely to preserve and enhance mitigation benefits over time; facilitate adaptive management; address and mitigate for distinct or unique assemblages of species or communities or locations that provide valuable ecosystem services; and that contribute to the permanence of conservation protections. *To promote the implementation of these principles across projects, DOI will continue to use current landscape-level planning initiatives . . . to identify sensitive habitats and landscape-scale mitigation opportunities in these regions.* (Emphasis added.)

BLM's mitigation "instruction memorandum" expands even further on these points. It urges BLM managers to adopt a "regional mitigation approach" that "shifts the BLM's mitigation focus from a permit-by-permit perspective to a landscape-scale planning perspective." As BLM explains: "This landscape-scale planning perspective will enhance the BLM's consideration of mitigation at the project level and afford greater certainty to permit applicants, partners, stakeholders, and the public."⁹ And, even more recently, Secretary Jewell's October 31 Secretarial Order reinforces these efforts and calls on her senior team to develop recommendations for implementing improvements in the Department's mitigation practices and policies.

IV. Moving Beyond Interior to a Governmentwide Mitigation Framework

While DOI's leadership in promoting landscape-scale planning and regional mitigation concepts is commendable, it is not enough. Large infrastructure projects typically generate unavoidable environmental impacts that may trigger mitigation-related permitting obligations from a number of federal (or state) agencies. Examples include: agencies whose lands will be affected by the project (such as BLM, the U.S. Department of Agriculture's Forest Service, or the U.S. Department of Defense for oil and gas, renewable energy, or transmission projects); agencies that have responsibilities to address impacts to specific types of resources (such as the U.S. Army Corps of Engineers (the Corps) for wetlands or FWS for endangered species); and agencies that have overall environmental review and approval obligations because they are funding infrastructure projects (such as the U.S. Department of Transportation for highways, bridges, and ports) or because the law requires their approval for certain types of projects (such as the U.S. Department of State for cross-border projects or the Federal Energy Regulatory Commission for gas pipeline projects).

7. See www.westgovchat.org.

8. 16 U.S.C. §§1531-1544, ELR STAT. ESA §§2-18.

9. Bureau of Land Management IM 2013-142, Interim Policy, Draft Regional Mitigation Manual Section 1794, available at http://www.blm.gov/wo/st/en/info/regulations/Instruction_Memos_and_Bulletins/national_instruction/2013/IM_2013-142.html.

In each case, NEPA typically requires the permitting agencies to analyze the proposed project and various alternatives, including mitigation requirements that may be imposed as permit conditions for unavoidable environmental harms.¹⁰ Where multiple agencies must issue permits or other types of approvals for a large infrastructure project, it would be ideal from both a permittee perspective, and from the environmental benefits side of the equation, if a single, agreed-upon compensatory mitigation investment could be identified as satisfying all of the agencies' interests. If the single investment approach could also cover the type of one-off mitigation requirements now typically required by the Corps for wetlands impacts, or by FWS for endangered species impacts, all the better.¹¹

This type of mitigation streamlining can be accomplished if compensatory mitigation is tied into regional planning processes. Through jointly conducted landscape-scale evaluation and planning efforts, federal, state, and local authorities can identify important landscapes whose environmental values, including watershed health, habitat and species health, wildlife corridors, and other landscape "intactness" values, will be broadly enhanced through the application of compensatory mitigation dollars. Then, rather than concoct one-off mitigation projects that deal with environmental harms on a piecemeal basis, the agencies should work on a multiagency basis, applying common criteria and metrics, to match the type and level of harm associated with a given project to an investment in a regional landscape need. The criteria and metrics need to be straightforward and workable so that private conservation mitigation bankers and other third parties can help facilitate investments in the targeted, regionally significant landscapes. Performance will need to be monitored and adjustments made, where needed, to confirm that mitigation investments are, in fact, generating the expected compensatory environmental benefits.

This idea that agencies should work together to identify regionally significant landscapes and then set up a consoli-

dated permitting structure that facilitates compensatory mitigation investments in such landscapes makes common sense. We have all seen how large footprint oil and gas and renewable energy projects and other infrastructure projects, like highways and transmission or pipeline corridors, have fragmented local landscapes, disrupted wildlife migration corridors, and negatively impacted the proper functioning of local watersheds. Traditionally, these project impacts have either been ignored or addressed by requiring permittees to invest in postage stamp-sized, localized mitigation projects that generate limited environmental benefits. The White House's initiative holds the promise that permitting agencies can work with developers to apply mitigation dollars in a coordinated and efficient way, guided by regional planning, and dedicated to meaningful environmental results: conservation and restoration of regionally important landscapes and their watershed and wildlife habitat values.

V. Conclusion

The unprecedented attention that DOI has devoted to landscape-scale management and planning has improved the siting process for major energy and other infrastructure projects. DOI's new landscape-scale approaches also hold the promise of applying project-related mitigation obligations more sensibly, and efficiently, to important regional conservation needs. Now, with the attention of the White House on developing cross-agency mitigation approaches that tie into advanced regional planning, there is a unique opportunity to work across all permitting agencies and to address mitigation obligations in a holistic way. It is the classic definition of a "win-win": developers reap the benefit of expedited infrastructure permitting processes while, at the same time, their compensatory mitigation dollars are invested wisely and effectively in a consolidated manner, on regionally significant landscapes, in accordance with sound planning.

10. Section 1508.20 in the Council on Environmental Quality's NEPA regulations outlines the type of mitigation that agencies should be evaluating and potentially requiring as permit conditions. Mitigation measures considered should include:

- (a) Avoiding the impact altogether by not taking a certain action or parts of an action.
- (b) Minimizing impacts by limiting the degree or magnitude of the action and its implementation.
- (c) Rectifying the impact by repairing, rehabilitating, or restoring the affected environment.
- (d) Reducing or eliminating the impact over time by preservation and maintenance operations during the life of the action.
- (e) Compensating for the impact by replacing or providing substitute resources or environments.

11. So long as watershed and species health is being promoted by landscape-scale investments, this generalized approach should be able to satisfy the Clean Water Act (CWA, 33 U.S.C. §§1251-1387, ELR STAT. FWPCA §§101-607) and ESA's mitigation requirements in most cases, while also meeting more generalized mitigation obligations that arise through the NEPA process, or through underlying permitting statutes. Both the CWA and the ESA give significant discretion to permitting agencies to craft appropriate mitigation. In recent years, for example, the Corps has relied on this authority to adopt a watershed health-based mitigation approach that moves away from acre-by-acre comparisons of lost versus restored wetlands.

DOI in the News:

INTERIOR ENDS NATIONAL BLUEWAYS PROGRAM. The Washington Post (1/3, 4.28M) reports that the National Blueways System was “dissolved on Friday amid opposition from landowners and politicians who feared it would lead to increased regulations and possible land seizures.” In a statement, Interior Secretary Sally Jewell said that her department “decided to disband the program, which was formed by her predecessor, Ken Salazar, after a departmental review.” Department spokeswoman Jessica Kershaw said, “The National Blueways Committee will be deactivated, but the department will continue to encourage collaborative, community-based watershed partnerships that support sustainable and healthy water supplies.”

The Connecticut Post (1/5, 298K) reports that “the Connecticut River will be only other National Blueway waterway to retain that distinction,” according to Jewell.

Meanwhile, the Casper (WY) Star-Tribune (1/5, 90K) reports that “early in 2013, an Interior Department representative told a group of Montana conservation districts the Yellowstone River could be a candidate for a Blueways designation.” However, Rep. Cynthia Lummis and Sens. John Barrasso and Mike Enzi, all Republicans, sent a joint letter to then-Interior Secretary Ken Salazar “saying the process — the secretarial order bypassed Congress — did not include people on the ground in Wyoming.” On Friday, the Wyoming delegation “took to Twitter...to announce its approval of the program’s demise.”

AP coverage was also picked up by Yahoo! (1/3, Draper, 17.91M) , Yahoo! (1/3, Draper, 17.91M) , Yahoo! Finance (1/5, 9.7M) , Yahoo! News Canada (1/5, 76K) , Yahoo! Business and Finance New Zealand (1/5, 64) , ABC News (1/5, 3.68M), the Waterbury (CT) Republican-American (1/5, 145K), the Portland (ME) Press Herald (1/5, 279K), the Columbia (MO) Daily Tribune (1/5, 68K), the Portland (ME) Press Herald (1/5, 279K), the Concord (NH) Monitor (1/5, 49K), the Quincy (IL) Herald-Whig (1/5, 82K), the Boston Herald (1/5, 643K), the Fort Collins (CO) Coloradoan (1/3, 85K), the Baxter (AR) Bulletin (1/4, 28K), the Southeast Missourian (1/5, 66K), the Decatur (AL) Daily (1/5, 56K), the Rochester (MN) Post-Bulletin (1/5, 57K), the Hanover (PA) Evening Sun (1/5, 38K) , KXMC-TV Minot, ND (1/5, 1K) , WUSA-TV Washington (1/5, 95K) , KUAR-FM Little Rock, AR (1/5), and KYTV-TV Springfield, MO (1/5, 20K).

ADDITIONAL COVERAGE OF KING COVE ROAD DECISION. Additional coverage of the King Cove road decision was provided by the Alaska Public Radio Network (1/3, 2K), the Bristol Bay (AK) Times (1/5, 4K), the Dutch Harbor (AK) Fisherman (1/5, 2K), and the Bristol Bay (AK) Times (1/5, 4K).

SECRETARY JEWELL URGED TO BALANCE ENERGY DEVELOPMENT WITH CONSERVATION. In its “Congress Blog”, The Hill (1/5, Reiss, 194K), Keith Reiss, the principal at Sanitas Sales Group, an independent outdoor recreation sales company, writes that his “business depends on access to these and other outdoor recreational opportunities, and here’s why: All in all, outdoor recreation business drives \$646 billion in consumer spending, \$790 billion in local and state revenue—while supporting 12 million American jobs.” For this reason, Reiss is “so concerned about oil and gas development near our national parks.” He urges Interior Secretary Sally Jewell and the Obama Administration to “advance policies that bring energy development into balance with other sustainable revenue streams and essential uses of our public lands.”

CONGRESS CRITICIZED FOR FAILING TO DESIGNATE NEW WILDERNESS. For “The Blog” of the Huffington Post (1/3, Sheppard, 11.54M), Kate Sheppard notes that “this year marks the 50th anniversary of the Wilderness Act,” but “the only thing Congress has preserved in the last four years is its record dry spell, having designated no new areas of the country for protection under that law since 2009.” According to Sheppard, “the 112th Congress, in 2010 and 2011, was the first since the law’s passage to fail to designate any new wilderness,” and “now, halfway through the 113th Congress, it’s unclear whether any more will be designated this session, either.”

CONGRESS URGED TO MAINTAIN PILT FUNDS FOR COUNTIES. In an op-ed for the Las Cruces (NM) Sun-News (1/6, Brown, 59K), Julia T. Brown is the county manager for Doña Ana County, writes that “as the Congress and President Obama structure budgets going forward, there has been some talk of reducing or eliminating federal Payments in Lieu of Taxes (PILT) to local governments.” She notes that “Doña Ana County relies heavily on these funds to sustain programs and personnel across 3,804 square miles of public and private land.” Brown urges citizens to contact congressional representatives and encourage “them to work toward full, multi-year PILT funding that will continue our long tradition of partnership and progress.”

REPTILE INDUSTRY CRITICIZED FOR SEEKING TO OVERTURN PYTHON BAN. In an editorial, the Hartford

(CT) Courant (1/3, 600K) criticizes leaders of the reptile industry who "say the federal ban on four types of invasive snakes is hurting their business, and so are suing to overturn the ban." It notes that "once out in the Everglades, the reptiles threatened several endangered species, including the wood rat and the wood stork." The paper argues that "these reptiles are dangerous, and have no business either in the Everglades or in people's homes, particularly people who live in urban areas."

NYTIMES SAYS FEDERAL CONTRACTING MAY NEED REFORM. The New York Times (1/4, Subscription Publication, 9.61M) editorializes that the White House's "revelations about unlawful surveillance and the botched health care rollout" both represent a "reminder of the increasing extent to which government work has been contracted out to private-sector companies." The Times argues that it is hard to see how "Americans are getting their money's worth" with companies given a financial incentive to overpromise their abilities during the bidding process, resulting in "delays, overruns and unmet public needs." The Times also notes that, despite the existence of "several sensible proposals to reform federal contracting," Congress and the Administration have not acted on any of them.

America's Great Outdoors:

National Park Service:

INTERIOR MISSES DEADLINE PURCHASE OF STATE LAND IN GRAND TETON NATIONAL PARK. The Jackson Hole (WY) News & Guide (1/6, 1K) reports that the Interior Department has "missed its deadline to buy a \$45 million square-mile chunk of Wyoming-owned land within Grand Teton National Park." However, "federal and Wyoming officials said the missed deadline isn't as bad as it sounds, and work to incorporate the land into the park is continuing." Jackie Skaggs, the spokeswoman for the park, said on Sunday that "the years long discussion will continue." Skaggs said, "We're still in conversation and working toward a resolution. But when something might happen, we don't know when that date might be."

FOREST SERVICE PROPOSES EXTENSIVE SALVAGE LOGGING FOR RIM FIRE AREA. The Los Angeles Times (1/5, Boxall, 3.07M) reports that the US Forest Service is "proposing an extensive salvage operation to log dead trees on about 46 square miles of timberland charred in last year's massive Rim fire in the Sierra Nevada." However, the project is "already triggering a fight by some environmentalists who argue that the post-fire logging would destroy valuable habitat for rare birds and other species that thrive in blackened forests."

CAMP NELSON'S DESIGNATION AS NATIONAL HISTORIC LANDMARK CELEBRATED. The Lexington (KY) Herald-Leader (1/4, 320K) reports that Camp Nelson's designation as a National Historic Landmark was celebrated Saturday. The article notes that "in the coming months, Jessamine County officials hope to take the next steps to make the site a national park." According to Mary Kozak, special projects director for Jessamine County, "it would cost an estimated \$200,000 for the National Park Service to conduct a feasibility study on whether Camp Nelson should become a national park."

NPS SEEKS INPUT ON MANAGEMENT PLAN FOR JACKS FORK, CURRENT RIVER PARK. The Springfield (MO) News-Leader (1/4, 27K) reports that a new General Management Plan from the NPS for the Jacks Fork and Current rivers and surrounding national park lands "already has some local folks riled." According to the article, "they're upset over proposals to scale back motorboat use on some sections of the rivers, close down some unofficial horseback trails while adding new ones and reshape river access to help alleviate crowding on the water during heavy-use summer weekends." Park Superintendent Bill Black said, "We will be listening to what people have to say. We've got 450 comments already. If they're opposed to something in the plan, we're encouraging people to offer an alternative or suggest some reasoning behind their response. I think we will adjust the plan when it's practical and when we feel they have a good point. We're more open to that than they think we are."

Also reporting on the story is the Louisville (KY) Courier-Journal (1/4, 449K).

NPS SEEKS INPUT ON MANAGEMENT PLAN FOR OZARK NATIONAL SCENIC RIVERWAYS NATIONAL PARK. The Sedalia (MO) Democrat (1/5, 39K) reports that the NPS is seeking public comments on its management plan for the Ozark National Scenic Riverways National Park.

NATIONAL TRUST FOR HISTORIC PRESERVATION COMPLIES LIST OF 10 HISTORIC SITES SAVED, 10 LOST IN 2013. The Washington Post (1/3, 4.28M) reports that the National Trust for Historic Preservation “compiled a list of 10 historic preservation saves and losses from 2013.”

ADDITIONAL COVERAGE: DEER CULL TO BEGIN AT ROCK CREEK PARK. Additional coverage of the decision to begin a deer kill at Rock Creek Park was provided by the Washington Post (1/5, 4.28M) and the Columbus (IN) Republic (1/5, 80K).

NPS URGED TO INCLUDE YULE LOG FOR MALL CELEBRATIONS. In an op-ed for the Washington Post (1/3, Schmidt, 4.28M), Marsha Schmidt notes that “for the second year in a row, the National Park Service did not include the yule log as part of the holiday attractions on the Mall.” She says that the NPS “took away a display that probably thousands of people enjoyed and many of us looked forward to every year to accommodate those participating in a few hours of the tree lighting.” Schmidt argues that “it is time for the Park Service to bring it back.”

NPS SETTLES WHISTLEBLOWER COMPLAINT OVER CUTTING OF TREES. For the Washington Monthly (1/5, Murphy, 36K), Tim Murphy recounts the story behind the “settling last fall by the National Park Service (NPS) of a whistleblower complaint over a secret sweetheart deal” Dan Snyder “extracted nine years ago to give his Maryland home an unobstructed view of the Potomac River.” According to the article, “its discovery set off a decade-long campaign of bureaucratic retribution over two administrations that nearly sent an innocent man to prison.”

Bureau of Land Management:

TREE SITTERS PROTEST PLAN VIEWED AS NEW MODEL FOR BLM. The Portland (OR) Tribune (1/5, 107K) reports that in 2012, the BLM “sold the rights to log a small grove of Douglas firs to a private company called Roseburg Forest Products.” However, tree sitters from the group Cascadia Forest Defenders have showed up to protest “what they claim is a clear cut of native forest.” The article notes that “the scheduled logging is also part of a pilot project designed by Northwest forestry professors to mimic nature.” According to the article, “the professors’ plan has become politically popular and is a key component of bills proposing new management for Oregon’s O&C Lands.”

Also reporting on the story is the Clark County (WA) Columbian (1/4, 116K).

Sen. Ron Wyden’s O&C Plan Criticized. In an op-ed for The Oregonian (1/5, Martos, 751K), ecologist Pablo Martos writes that “instead of enhancing the landmark Northwest Forest Plan, Sen. Ron Wyden’s recently-released plan for management of the Oregon & California Railroad trust lands seems intended to replace it.” According to Martos, “relying on the work of Professors Norm Johnson and Jerry Franklin, who helped craft the Northwest Forest Plan in the 1990s, the broad objective of the Wyden legislation appears to be to create a plan in which the O&C lands can be sustainably logged without dramatically sacrificing ecological protections.” However, Martos notes that “logging has already taken a toll on our federal public lands which the Northwest Forest Plan is only beginning to heal.” He concludes that “after decades of old-growth liquidation, doubling the timber harvest on BLM lands fails to offer any kind of balance.”

BLM PARTNERS WITH AGENCIES TO CLEAN UP DUMP SITES IN NEW MEXICO DESERT. The Alamogordo (NM) Daily News (1/5, 19K) reports that “over the last year, three agencies – the South Central Solid Waste Authority, Doña Ana County, and the Bureau of Land Management – have worked together to clean up 216 illegal dump sites in 20 different communities in the county covering approximately 1500 square miles of the county’s total 3,807 square miles.” According to the article, “the agencies removed more than 200 tons of illegally dumped trash, working with 2,000 community volunteers as well as student workers employed by the three organizations.” Vanessa Duncan, safety and occupational health specialist with the BLM, said, “The Bureau of Land Management will continue to partner with Doña Ana County and South Central Solid Waste Authority, and continue funding cleanups. It is important to us to take a strong stand and be a strong voice against illegal dumping. And to be there for the community. Illegal dumping is, and will continue to be, an important issue for the BLM.”

BLM SEEKS PUBLIC INPUT ON MANAGEMENT PLAN FOR RESOURCES IN KANSAS, OKLAHOMA AND TEXAS. The High Plains (KS) Daily Leader (1/5) reports that the BLM Oklahoma Field Office is seeking public input to “identify issues and concerns that should be analyzed in the Oklahoma Field Office Resource Management Plan and Environmental Impact Statement.” The article notes that “the final Resource Management Plan, or RMP, will guide management decisions for public resources in the three-state area of Oklahoma, Kansas and Texas.”

Also reporting on the story is the Salina Journal (1/5, 88K).

BLM PREPARES FOR SAGE GROUSE HEARINGS. The Idaho Statesman (1/5, 205K) reports that “beginning Monday in Murphy,” the BLM is “holding a series of public meetings on its sage grouse planning effort.” Hearings are planned across southern Idaho, finishing up Jan. 15 in Boise.

Fish and Wildlife Service:

REPORT FINDS GREAT LAKES ONLY REGION TO GAIN WETLANDS. The Washington Post (1/5, 4.28M) reports that workers are constructing “levees, canals and pumps that will regulate water levels and upgrade fish passageways in a 946-acre section of Erie Marsh, making it a better home for wildlife and limiting the spread of invasive plants.” The project is an “example of decades-old efforts by government agencies and private groups to rebuild Great Lakes coastal wetlands such as swamps, bogs and marshes that have been depleted by development.” The article notes that “a federal report released in November suggests the work is beginning to pay off.” According to the report, “the eight-state Great Lakes region — extending from western New York to eastern Minnesota— was the only section of the US where coastal wetland acreage increased during a five-year period when scientists took extensive measurements with satellites and field photography.”

AP coverage was also picked up by the Detroit Free Press (1/6, Flesher, 794K) and the Huffington Post (1/5, 11.54M).

EXPERT DEBATE CLUES OF ASIAN CARP IN GREAT LAKES. The New York Times (1/5, Wines, Subscription Publication, 9.61M) reports that “after decades of increasingly dire warnings, countless studies and countermeasures, scientists are beginning to mull over hints of something that few of them wish to contemplate: The despised Asian carp may have finally arrived in the Great Lakes.” According to the article, “the latest hint consists of a single water sample, one of scores taken last May from Lake Michigan, that tested positive for remnants of DNA from one particularly destructive species, silver carp.” However, “experts debate the significance of that one hit, which was disclosed in late October, and a thorough resampling of the same waters in November turned up nothing, scientists were told late last month.”

WILDLIFE ADVOCACY GROUP CONTESTS REMOVAL OF GRAY WOLF FROM ENDANGERED SPECIES LIST. The Knoxville (TN) Daily Sun (1/5) reports that the FWS has proposed removing Endangered Species Act protection from “most wolves across America, indicating that protection is no longer warranted since gray wolf populations worldwide are stable.” However, the Center for Biological Diversity “claims the plan walks away from a 40-year commitment to gray wolves across the country.”

Additional coverage of the proposal is the Lewiston (ME) Sun Journal (1/5, 22K).

Conservationist Claims Wolves Threatened By Government Actions. The Washington Post (1/3, 4.28M) reports that “noted conservationist Jane Goodall says state and federal government actions are threatening wolf packs in Denali, Yellowstone and elsewhere.”

BUDGET CONSTRAINTS HIT KILAUEA POINT NATIONAL WILDLIFE REFUGE. The Kaua'i (HI) Garden Island News (1/5, 33K) reports that the FWS will cut the “days Kilauea Point National Wildlife Refuge is open to the public to five days a week.” According to a press release, “the reduction is necessary due to flat and declining budgets.”

FWS TEN YEAR FROG STUDY REVEALS LOW RATE OF ABNORMALITIES, SOME HOTSPOTS. The Sierra (CA) Sun Times (1/5) reports that a FWS study “published in the journal PLOS ONE finds that on average less

than 2 percent of frogs and toads sampled on 152 refuges had physical abnormalities involving the skeleton and eyes." The article notes that "the rate is lower than many experts feared based on earlier reports." FWS Director Dan Ashe said, "Frogs and toads are strong indicators of wetland and environmental quality. What affects them affects a broad range of other species. This research significantly advances our understanding of amphibian abnormalities while amassing one of the world's largest datasets on the issue."

WHITE BLUFFS BLADDERPOD LISTED AS THREATENED. The Salem (OR) Capital Press (1/3, 113K) reports that the FWS recently "announced plans to list the White Bluffs bladderpod as threatened under the Endangered Species Act." Franklin County Farm Bureau president James Alford said that "the decision to exclude private property from critical habitat for the plant eases some concerns, but some US Bureau of Reclamation ground for irrigation could still be affected."

RESEARCHERS SAY POPULATION OF MARBLED MURRELETS NO LONGER IN DECLINE. The Oregon Public Broadcasting (1/5, 4K) reports that "a couple of years ago, a research team from the US Forest Service and US Fish and Wildlife Service released a report showing marbled murrelet populations declined 30 percent between 2000 and 2010." However, "after three more years of monitoring and gathering data, those researchers no longer claim that same downward trend." Martin Raphael, a wildlife ecologist with the Forest Service and member of the monitoring team said that "when they run the numbers for 2000-2010, they do get the 30 percent decline," but "when they run the numbers for a longer period of time, 2000-2012, the statistical significance of that trend disappears."

METRO PARKS SEEKS TO DEVELOP CONSERVATION BANK FOR NORTHERN LONG-EARED BATS. The Akron (OH) Beacon Journal (1/5, 325K) reports that "Metro Parks, Serving Summit County, has asked the US Fish and Wildlife Service for permission to establish Ohio's first conservation bank to help the northern long-eared bat that has been decimated by a deadly fungus and is at risk of going extinct." According to Michael Johnson, chief of natural resources for the park district, "Summit County intends to use the funds in and around Liberty Park in northern Summit County where bats winter in five caves in the 1,908-acre park in Twinsburg, Twinsburg Township and Reminderville."

TEN WHOOPING CRANES RELEASED AT WHITE LAKE WETLANDS CONSERVATION AREA. KTVE-TV EI Dorado, AR (1/5, 1K) reports that "ten juvenile whooping cranes, delivered to White Lake Wetlands Conservation Area in Gueydan last month, were released into the wild on Thursday." The article notes that "the young cranes join 23 adults which are part of an experimental population being monitored by the Louisiana Department of Wildlife and Fisheries." The cranes arrived in southwest Louisiana on Dec. 11 from the USGS Patuxent Wildlife Research Center. LDWF is working cooperatively with the FWS, USGS, the Louisiana Cooperative Fish and Wildlife Research Unit and the Louisiana Wildlife and Fisheries Foundation to establish a non-migratory population in the state.

ADDITIONAL COVERAGE OF FORTIETH ANNIVERSARY OF ENDANGERED SPECIES ACT. Additional coverage of the fortieth anniversary of the Endangered Species Act was provided by the Daily Inter Lake (MT) (1/5, 57K) and the Fort Myers (FL) News-Press (1/3, 210K).

US Geological Survey:

USGS RESEARCHERS SAY CENTRAL VALLEY SINKING. The Environment & Energy Publishing (1/5, 705) reports that "a large swath of Central Valley is sinking as farms pump groundwater in the face of searing drought, sparking a scramble for solutions as forecasts show no end to dry conditions," according to research by the USGS. Scientists say "land near the San Joaquin River sank by nearly a foot per year from 2008 to 2010, one of the most dramatic rates ever measured in the San Joaquin Valley." The article notes that "the most recent subsidence has buckled concrete liners in the Delta-Mendota Canal, which distributes water from the Sacramento-San Joaquin Delta." The BOR, "which commissioned the study in preparation for up to \$800 million in restoration work on the San Joaquin River, isn't sure yet how the sinking will affect its plans."

Securing America's Energy Future:

Renewable Energy:

CHICAGO TRIBUNE: CONGRESS SHOULD NOT RENEW WIND PRODUCTION TAX CREDIT. The Chicago Tribune (1/4, 2.32M) editorialized that the “wind production tax credit has long outlived any public policy usefulness” and added that “lawmakers now being urged by industry lobbyists to renew the subsidy retroactively instead should let it blow away.” The Tribune wrote that residents across the US should urge their representatives in Congress to vote against renewing the subsidy because “a government \$17 trillion in debt — and still borrowing heavily — can’t afford to keep protecting this industry from cheaper competition.”

Onshore Energy Development:

GRANT AWARDED FOR RECLAMATION WORK IN COAL TOWNSHIP. The Gant (PA) Daily (1/3, 3K) reports that the Department of Environmental Protection has “announced contract awards for two abandoned mine reclamation projects in Clearfield and Northumberland counties, totaling \$1,113,300.” The article notes that “contracts were awarded on a competitive basis and are federally funded by Office of Surface Mining grants.”

Also reporting on the story is the Shamokin (PA) News Item (1/5, 27K).

MORE FEDERAL REGULATION, OVERSIGHT OF FRACKING NOT EXPECTED. Reuters (1/6, Volcovici) reports that the Federal government is not expected to investigate complaints of water contamination from oil and gas drilling or to increase regulation of drilling practices. The story notes a recent Office of the Inspector General report on EPA activities critical of the agency for failing to act in some cases, but says that the agency is unlikely to change its approach.

SEVERAL STATES FIND WATER POLLUTION FROM FRACKING. The AP (1/6, Begos) reports that in “at least four states” where fracking is common, “hundreds of complaints have been made about well-water contamination from oil or gas drilling,” and “pollution was confirmed in a number of them,” according to an AP review. The piece says the data, covering Pennsylvania, Ohio, West Virginia and Texas, “casts doubt on industry suggestions that such problems rarely happen.” The Washington Post (1/6, 4.28M) picks up on the AP report and runs a shortened version.

NEW STUDY SUGGESTS FRACKING IS HARMFUL TO BABIES. Bloomberg News (1/5, Whitehouse, 1.91M) reported that a study conducted by researchers “Janet Currie of Princeton University, Katherine Meckel of Columbia University, and John Deutch and Michael Greenstone of the Massachusetts Institute of Technology” found that fracking is harmful to babies who live nearby. The study, which was presented Saturday at the American Economic Association meeting in Philadelphia, examined “Pennsylvania birth records from 2004 to 2011 to assess the health of infants born within a 2.5-kilometer radius of natural-gas fracking sites” and researchers “found that proximity to fracking increased the likelihood of low birth weight by more than half, from about 5.6 percent to more than 9 percent.” Bloomberg News wrote that even though the study doesn’t explain why fracking is harmful to infant’s health, the study’s finding “should be reason for serious pause.”

ADDITIONAL COVERAGE OF INTERIOR WATCHDOG REPORT ON STREAM PROTECTION RULE. Additional coverage of the Interior Department watchdog’s report “that says the Office of Surface Mining Reclamation and Enforcement told a contractor to switch to another set of baseline criteria after media reports in January 2011 revealed the initial set yielded projections of 7,000 job losses and a broad decline in coal production” was provided by the Pittsburgh Tribune-Review (1/5, 636K).

Offshore Energy Development:

ARCTIC DRILLING REMAINS A QUESTION IN 2014. Politico (1/5, Guillen, 464K) provided a list of “the biggest energy questions of the coming year.” One of the top questions is whether Arctic drilling will take off this summer. The article notes that “Shell pulled out of its nascent Arctic operations for a while after several big missteps in 2012 — but the company is sticking its toe back in the water with a renewed smaller effort this summer.” The Interior Department says it will “turn a strict eye to Shell’s plans, but environmentalists fear an oil spill could spell disaster in the remote region.”

Additional coverage was provided by the Juneau (AK) Empire (1/3, 21K) and the Popular Mechanics (1/5,

10.85M).

OIL INDUSTRY SEES WIN IN TRANSBOUNDARY HYDROCARBONS AGREEMENT. The Washington Examiner (1/5, Colman, 319K) reports that “the oil and gas industry received a long-awaited gift from Congress when lawmakers approved a drilling pact between Mexico and the United States as part of the budget deal, signaling enhanced cooperation between the two nations just after Mexico opened energy exploration to foreign companies.” The article notes that “the Transboundary Hydrocarbons Agreement opens drilling access to a fairly small amount of oil and gas — the Interior Department’s Bureau of Ocean Energy Management estimates the 1.5 million acres of the Gulf of Mexico covered in the deal contains up to 172 million barrels of oil and 304 billion cubic feet of natural gas.”

LOUISIANA ATTORNEY GENERAL ACCUSES FEDERAL JUDGE OF IGNORING STATE’S BP CLAIMS. The AP (1/4, Kunzleman) reported that Louisiana Attorney General James Caldwell accused US District Judge Carl Barbier of “ignoring the state’s claims over BP’s 2010 Gulf oil spill and asked...the 5th US Circuit Court of Appeals to transfer its...claims from” Judge Barbier “to a different judge in the Eastern District of Louisiana.” In his court filing this week, Caldwell said that the state “shouldn’t have to wait any longer and deserves to proceed with a separate trial for the state’s economic loss claims.” The AP pointed out that “Caldwell and his team of private lawyers who are working on the case have had a testy relationship with Barbier since the outset of the high-stakes litigation.”

RIGHT WHALES COULD BE THREATENED BY SEISMIC AIRGUNS. For “The Blog” of the Huffington Post (1/3, Sharpless, Mara, 11.54M), Andrew Sharpless and Kate Mara write that “right whales could soon face another threat – oil and gas exploration along most of their migration route.” They note that “the government has proposed protection plans to try and mitigate the harm, but now new Oceana-funded research reveals that these measures won’t adequately protect these critically endangered whales.” The BOEM is “planning to allow the oil and gas industry to use seismic airguns to search for offshore deposits.” According to the authors, “the blasts, 100,000 times louder than standing near a jet engine, are extremely harmful to marine mammals like the right whale.”

Tackling America’s Water Challenges:

COLORADO RIVER SAPPED BY DROUGHT. The New York Times (1/6, Wines, Subscription Publication, 9.61M) reports that the Colorado River and its “slew of man-made reservoirs from the Rockies to southern Arizona are being sapped by 14 years of drought nearly unrivaled in 1,250 years.” In fact, “many experts believe the current drought is only the harbinger of a new, drier era in which the Colorado’s flow will be substantially and permanently diminished.” According to the article, “faced with the shortage, federal authorities this year will for the first time decrease the amount of water that flows into Lake Mead, the nation’s largest reservoir, from Lake Powell 180 miles upstream.” Officials say “there is a 50-50 chance that by 2015, Lake Mead’s water will be rationed to states downstream. That, too, has never happened before.”

CONGRESS TO DECIDE ON FUNDING FOR LEWIS & CLARK WATER PROJECT. The Des Moines (IA) Register (1/3, Doering, 516K) reports that “the bipartisan budget deal signed into law in Washington last month has failed to provide any clarity for operators overseeing the construction of the Lewis & Clark system and other water projects.” The Lewis & Clark project is “expected to receive \$3.2 million in funding proposed by the White House in its 2014 budget,” and “Congress is expected to approve the money.” However, “while the recent budget agreement established broad spending levels, appropriations committees in Congress charged with distributing funding are expected to decide in the next few weeks where that money goes and whether additional dollars should go to Lewis & Clark and five other projects overseen by the Bureau of Reclamation.”

OPEN HOUSES ON EMERGENCY PREPAREDNESS PLANS FOR SCOGGINS DAM TO BEGIN JANUARY 9. The Oregonian (1/5, 751K) reports that the BOR will “host a series of open houses in Hillsboro and Forest Grove on Thursday, Jan. 9 on how an earthquake off the Oregon coast could impact a number of western cities.” Representatives from the BOR, “Oregon Department of Geology and Mineral Industries, Tualatin Valley Irrigation District and Washington County Sheriff’s Office will give presentations on the dam’s background and emergency response plans in the event Scoggins Dam fails to withstand a high magnitude earthquake.”

ADDITIONAL COVERAGE OF BAY DELTA CONSERVATION PLAN. Additional coverage of the Bay Delta

Conservation Plan was provided by the [Sacramento \(CA\) Bee](#) (1/4, 749K), the [Central Valley \(CA\) Business Times](#) (1/5, 206) and the [Southern California Public Radio](#) (1/3, 57K).

Empowering Native American Communities:

BIA APPROVES COMPACT THAT COULD LEAD TO MASHPEE WAMPANOAG CASINO IN TAUNTON. The [Boston Herald](#) (1/5, 643K) reports that the BIA has approved a compact between Massachusetts and the Mashpee Wampanoag tribe setting out financial agreements for a tribal casino in Taunton and advancing plans for one of the coveted casinos in the state. The deadline for the BIA to either approve or reject the compact within 45 days passed at midnight Friday with no action by the federal agency. Under the Indian Gaming Regulatory Act, that makes the agreement between tribe leaders and Gov. Deval Patrick a binding deal. In a statement, Patrick said, "This is another important step toward growing jobs and opportunity in the Southeast region, and a good deal for both the Commonwealth and the Tribe."

The [Cape Cod \(MA\) Times](#) (1/4, 92K) reports that Mashpee Wampanoag tribal council Chairman Cedric Cromwell said Friday, "This is a huge, huge day. It's a historical day for the tribe, for the state of Massachusetts and for the city of Taunton. We're very excited."

The [New Bedford \(MA\) Standard-Times](#) (1/3, 54K) reports that Nedra Darling "did not say why the BIA has not issued a definitive ruling."

Also providing coverage are the [Boston](#) (1/3, 750K), the [Boston Herald](#) (1/5, 643K), the [Taunton \(MA\) Gazette](#) (1/5, 36K), the [Cape Cod \(MA\) Today](#) (1/4, 3K), the [Lakeville \(MA\) Call](#) (1/5), the [North Adams \(MA\) Transcript](#) (1/5, 14K), the [Fall River \(MA\) Herald News](#) (1/5, 116K), the [Wicked Local \(MA\)](#) (1/5, 84K), [WBUR-FM Boston](#) (1/3, 64K), [WLNE-TV Providence, RI](#) (1/5, 4K), and [WBZ-TV Boston](#) (1/3, 68K).

AP coverage was picked up by the [Columbus \(IN\) Republic](#) (1/5, 80K), the [Portland \(ME\) Press Herald](#) (1/5, 279K), the [New London \(CT\) Day](#) (1/4, 76K), and the [Navajo Times \(AZ\)](#) (1/5, 66K).

LITTLE SHELL TRIBE STILL WAITING FOR RECOGNITION. The [Great Falls \(MT\) Tribune](#) (1/3, 90K) reports that two bills before Congress would end the Little Shell Chippewa Tribe "long wait for federal recognition." Rep. Steve Daines, who has "sponsored a bill in the House that would bring federal recognition to the tribe and bypass the usual recognition process," said, "I think there's a realistic chance here to get this done,." Daines "met with tribal leaders Friday in Great Falls and provided an update on the bill." Meanwhile, Sen. Jon Tester, D-Mont., is sponsoring a companion bill in the Senate.

DISENROLLED TRIBAL MEMBERS SEEK FEDERAL RECOGNITION. The [Mt. Pleasant \(MI\) Morning Sun](#) (1/4, 40K) reports that "a group of Mt. Pleasant-based Native Americans, including 66 removed from the rolls of the Saginaw Chippewa Indian Tribe in November, are seeking federal recognition of the original three bands of American Indians that first settled in Isabella County in the mid-1800s." According to the article, "no one has disputed that most of those behind the effort are Native American descendants of the historical three tribes, but they claim to have been disenrolled from the Saginaw Chippewa Tribe for historical quirks linked to inappropriate rulings and poor record keeping by the federal government."

ASSISTANT SECRETARY WASHBURN REFLECTS ON PASSING OF FORREST GERARD. In an op-ed for the [Albuquerque \(NM\) Journal](#) (1/6, 288K), Assistant Secretary, Indian Affairs, Kevin K. Washburn reflects on the passing of former Assistant Secretary of Indian Affairs Forrest J. Gerard. Washburn discusses the "important federal Indian policies he championed and his contributions to Native Americans across the country deserve to be celebrated."

Top National News:

DEMOCRATS TRY TO SHIFT FOCUS FROM HEALTHCARE TO INCOME INEQUALITY. Many media analysts are describing Senate Democrats' focus on extending long-term unemployment benefits, along with President

Obama's renewed push for a minimum wage hike, as part of a concerted campaign to ameliorate the damage done to their party over the past several months by the problematic implementation of the Affordable Care Act.

On NBC Nightly News (1/5, story 6, 2:20, Quintanilla, 7.86M), Kristin Welker reported that the "biggest priority" for the President, who is "aim[ing] to reboot his presidency...after a rocky 2013," is to "to shift the narrative on healthcare," which "Republicans see...as their winning campaign issue." Welker added that the President is expected to "renew his call for an increase in the minimum wage in his State of the Union address," which is, according to Welker, "another piece of Democratic strategy designed to paint Republicans as the party of the rich ahead of the fall elections."

Chuck Todd, on NBC's Meet the Press (1/5, 3.08M), said that when he asked unnamed Administration officials what they intend to do in the month of January, they "ticked off a whole bunch of issues," but "sort of left out healthcare completely." According to Todd, "They would like to be talking about anything other than healthcare."

Likewise, Al Hunt, in his column for Bloomberg News (1/6, Hunt, 1.91M), says that "on health care, the best the White House can do is to neutralize the issue." According to Hunt, the White House "knows it needs to put the Republicans on the defensive elsewhere: by pushing an extension of unemployment benefits for the long-term jobless and raising the minimum wage."

Roll Call's Stuart Rothenberg, appearing on CNN's State of the Union (1/5), said, "The Senate is definitely in play," and it will be up to Democrats "to change the dynamic...so that the election is about the Republicans – 'Republican extremism,' Republicans being uncompromising – because, right now, it looks like the election will be much more about the President" and "healthcare reform."

Indeed, just a few minutes later, in an appearance on ABC's This Week (1/5, 2.73M), Sen. Chuck Schumer maintained that while "for the first five years of the Obama Administration, the two issues that dominated were healthcare and budget deficit," in 2014, "dealing with declining middle-class incomes and not enough job growth, will be the number one issue." As Rothenberg suggested Democrats would, Schumer went to claim that Republicans will expose themselves as "out of the mainstream" if they oppose the President's agenda.

Burgess Everett, in a piece for Politico (1/6, Everett, 464K) under the headline, "Dems Seize On Income Inequality For 2014," says the upcoming Senate vote on extending jobless benefits "marks the first concrete step by Democrats toward a populist economic platform ahead of the November elections." Everett says the Democrats are "daring Republicans to oppose legislation aimed at benefiting low-income Americans." According to Everett, "The inequality campaign will intensify later in the year with a push in the Senate to raise the federal minimum wage that will be synced with" the State of the Union address, "which is expected to dig heavily into the issue of economic disparity." USA Today (1/6, Jackson, 5.82M) says the President's address is expected to focus on "the rising gap between rich and poor in the United States, as well as the economy overall."

USA Today (1/6, Schouten, 5.82M) also reports that Democrats "have seized on income inequality as a major theme of the 2014 campaign," and "are pushing to increase the \$7.25-an-hour federal minimum wage" along with an extension of "long-term unemployment insurance for people out of work for 26 weeks or longer," which "lapsed Dec. 28 for 1.3 million people." USA Today notes that the President "plans an event Tuesday at the White House with some long-term unemployed Americans to ramp up pressure on Congress to act."

Democrats Blast Republicans For Allowing Jobless Benefits To Lapse. On NBC Nightly News (1/5, story 6, 2:20, Quintanilla, 7.86M), Kristin Welker reported that "the first item" on the President's agenda for 2014 is "extending unemployment benefits" that "expired in December for 1.3 million Americans who have been out of work for six months or longer." Welker noted the President has "blamed Republicans for leaving those benefits out of last month's budget deal," and that "many Republicans say they will only support it if the \$6.5 billion price tag is offset by spending cuts."

The New York Times (1/6, Huetteman, Subscription Publication, 9.61M) reports that on CNN's State Of The Union and NBC's Meet the Press, NEC director Gene Sperling "continued the Obama administration's push to restore the support system that provides up to 47 weeks of supplemental payments for unemployed Americans who are still looking for jobs," while on CBS' Face The Nation, Senate Majority Leader Harry Reid emphasized that "the current proposal to renew emergency unemployment benefits for three months needed the support of at

least four Republicans in addition to Senator Dean Heller of Nevada, who co-sponsored the bill.”

The Washington Post (1/6, Sullivan, 4.28M) says Reid “sought to paint” Heller “as a staunch conservative,” saying, “Remember, Dean Heller is not some maverick that is out spewing socialism. Here’s a guy who is really a conservative person, and he wants to extend unemployment benefits. I admire him for doing that.” According to Politico (1/6, Everett, 464K), Sen. Susan Collins “has indicated she supports the bill,” but no other Republican in the Senate, apart from Heller, has done so.

Nevertheless, The Hill (1/6, Bolton, 194K) reports that the Senate Democratic leadership “feel[s] cautiously optimistic they have the 60 votes they need to advance unemployment benefits legislation on Monday.” But The Hill does not identify any Republicans other than Heller and Collins who might back the extension.

Sperling, appearing on CNN’s State Of The Union (1/5, 862K), said that while “the economy is improving” and the “unemployment rate, in general, is falling,” the “worst legacy of the ‘Great Recession’ is that there is crisis of long-term unemployment.” According to Sperling, “People who have been unemployed for six months or longer are finding it most difficult, and we have to be a country that’s committed to leaving nobody behind in this recovery.” Sperling continued, “We, as a country, have never, never the last half century, have we ever cut off emergency unemployment benefits when long-term employment has been this high.”

On CBS’ Face The Nation (1/5, 2.64M), Reid claimed that the “vast majority of the American people believe that unemployment benefits should be extended,” and noted that it has been estimated that US GDP “would be increased by \$23 billion” if the extension were approved. Politico (1/6, Glueck, 464K) reports that Reid added, “There’s 55 of us, and there’s 45 of them. It would seem to me that five Republicans in the Senate should agree with the Republicans around the country. Republicans around America want us to do something to extend these benefits. Why? Because it’s good for the economy. It’s good for the country.”

In his column for the Washington Post (1/6, Dionne, 4.28M), E.J. Dionne says that in the past, extending unemployment benefits and raising the minimum wage wasn’t “so complicated,” because, despite partisan disagreements, “a solid block of Republicans once saw regular increases as a just way of spreading the benefits of economic growth.” But Dionne says that conservatives are “now determined to blow up the national consensus that has prevailed since the Progressive and New Deal eras.”

Paul: Unemployment Benefits Can Be A “Disincentive To Work.” Sen. Rand Paul, on ABC’s This Week (1/5, 2.73M), said, “With regard to unemployment insurance, I’ve always said I’m not opposed to unemployment insurance, [but] I’m opposed to having it without paying for it. I think it’s wrong to borrow money from China, or simply to print out money for it, but I’m not against having unemployment insurance.” However, Paul added, “I do think...the longer you have it, that it does provides some disincentive to work,” and, according to Paul, “there are many studies that indicate this.”

Sen. Chuck Schumer, also on ABC’s This Week (1/5, 2.73M), said, “Most of the people I meet who are on unemployment are people who have had jobs for 25 years and lost them, and they’ve been knocking on doors every week.” Schumer continued, “I think it’s...a bit insulting to American workers when Rand Paul says that unemployment insurance is a disservice. They want to work, they don’t want unemployment benefits.”

The Washington Times (1/6, Klimas, 417K) notes that Paul did say that he “would support an extension...if it is offset in other parts of the budget.” However, under the headline, “Obama Adviser Gene Sperling Pushes For Unemployment Benefits Extension Without Offsets,” the Washington Examiner (1/6, Lawler, 319K) reports that on NBC’s Meet the Press, Sperling pointed out that “14 of the last 17 times that emergency unemployment has been extended, there have been no strings attached,” and “all five times that President Bush extended unemployment benefits, there were no pay-fors.” Politico (1/6, Parti, 464K) also covered Sperling’s remarks.

Bloomberg News (1/6, Przybyla, 1.91M) reports that on ABC’s This Week, Schumer “forecast political blowback for Republicans who do not support the effort,” and quotes him as saying, “they’re going to show themselves so far out of the mainstream, it’s going to hurt them in the election.”

Nevertheless, the Wall Street Journal (1/6, Catan, Hook, 5.91M) reported that on CBS’s Face The Nation, Rep. Matt Salmon (R-AZ) argued that “these giveaway programs, these government programs, don’t create one job.”

On the other hand, the Washington Post (1/6, Sullivan, 4.28M) reports that also on CBS's Face The Nation, Rep. Peter King (R-NY) said that he is "open to supporting a temporary extension of long-term unemployment benefits." King said, "I would like to find a way to get a compromise to extend unemployment insurance, at least for a brief period of time, but at the same time, the Democrats should make compromises."

PIMCO CEO Mohamed El-Erian, in a piece for the Huffington Post (1/6, El-Erian, 11.54M), lays out what he says are "solid economic and social arguments in favor of restoring these important benefits." According to El-Erian, "the country can afford to pay these benefits," and "in no way does the monetary burden of these benefits threaten overall national wellbeing and financial soundness."

In an editorial, USA Today (1/6, 5.82M) says "the job market is still bad enough...that it is simply cruel to cut off help now." The New York Times (1/6, Subscription Publication, 9.61M), in an editorial, says of the proposed extension that "it's hard to imagine a more important action for those who have been out of work the longest," as well as "for the economy."

However, Aloysius Hogan, a senior fellow at the Competitive Enterprise Institute, in an op-ed for USA Today (1/6, Hogan, 5.82M), maintains "another extension of unemployment insurance would do more harm than good." Hogan says that prior to taking to becoming the chair of President Obama's Council of Economic Advisers, economist Alan Krueger had suggested that "paying people not to work actually increases the incentive not to work."

Cillizza: Obama Is Concerned By His Relatively Weak Standing Among Democrats. Chris Cillizza, in a piece for the Washington Post (1/6, Cillizza, 4.28M), says the "12-point drop in Obama's approval rating from January 2013 to December 2013" was not due "to Republicans...but rather to precipitous declines among independents (down 14 points) and, interestingly, Democrats (down 15 points)." According to Cillizza, that "dip among Democrats explains why Obama has of late focused on economic inequality (unemployment insurance, a minimum-wage increase, etc.)"

Walker: "Fix Obamacare" To Help The Unemployed. Appearing later, on CNN's State of the Union (1/5), Wisconsin Gov. Scott Walker contended that "the reason why the White House is so actively pushing" an extension of jobless benefits is that "they want to desperately talk about anything but Obamacare." Walker argued that "the best thing we could do to help people unemployed, or underemployed, is fix Obamacare," and "replace it with a patient-centered plan that puts people in charge, not government in charge – and got rid of the uncertainty so many businesses here in my state and across the country talk about." However, Politico (1/6, Parti, 464K) reported that Walker also said he "supports extending emergency unemployment benefits as long as reforms are made to the system."

Obama 2006 Minimum Wage Passage Called "More Nuanced" Than His Current Stance. Byron York, in a piece for the Washington Examiner (1/6, York, 319K), writes that even while the President pushes for a minimum wage, he "seems to acknowledge that there is evidence a higher minimum wage costs jobs," although he "doesn't find it 'solid.'" However, according to York, in *The Audacity of Hope*, published in 2006, the President "seemed much more open to the evidence that raising the minimum wage results in less hiring." York notes that the book contains this passage: "It may be true – as some economists argue – that any big jumps in the minimum wage discourage employers from hiring more workers." York adds, "that older, more nuanced view of the minimum wage will likely be absent from Obama's rhetoric in coming weeks" because "the new campaign will be all about politics."

ECONOMISTS ASSESS RECOVERY'S STRENGTH, PROSPECTS IN 2014. A Wall Street Journal (1/6, Reddy, Subscription Publication, 5.91M) piece examines the prospects for the economy in 2014, noting that many forecasters expect growth to soar in the coming year. The piece says that five major factors will determine the economy's prospects. First, businesses need to shed their cautious attitude. Secondly, DC lawmakers need to continue to cooperate on budget and debt issues. Third, the Fed needs to steer a clean course out of its bond-buying program. Fourth, the housing sector needs to adjust effectively to rising interest rates. Finally, the economies in the rest of the world need to avoid further crises.

Bloomberg News (1/6, Kennedy, Miller, 1.91M) reports that Harvard Professor Martin Feldstein argued at a Philadelphia economics event that the economy is going to accelerate in 2014. He said, "There is no reason for

pessimism about our near future if we adopt appropriate policies.” Bloomberg adds that former Treasury Secretary Lawrence Summers and Stanford’s John Taylor “agreed in interviews that stronger growth this year was possible even as they clashed over what more policy makers could do to speed expansion.”

The Wall Street Journal (1/6, Mcgrane, Hilsenrath, Subscription Publication, 5.91M) reports Summers argued that an expansionary fiscal policy would boost growth, though Taylor said that government actions, such as heavy regulation, were holding the economy back.

However, the New York Times (1/6, Rampell, Dewan, Subscription Publication, 9.61M) argues that despite the arguments of most of the economists that the economy was sluggish in recent years, a study presented at the event, from Carmen Reinhard and Kenneth Rogoff, argues that the economy is actually doing rather well in the wake of the financial crisis.

New York Fed’s Dudley Says Bond-Buying Program Remains Opaque. The Wall Street Journal (1/4, Derby, 5.91M) reports that Federal Reserve Bank of New York President William Dudley said on Saturday that several key methods that the Fed goes about implementing its bond-buying program remain unclear. Speaking at an event in Philadelphia, Dudley, a strong backer of the program, said, “we don’t understand fully how large-scale asset-purchase programs work to ease financial market conditions—is it the effect of the purchases on the portfolios of private investors, or alternatively is the major channel one of signaling?”

Summers Lays Out Growth Strategy. In an op-ed for the Washington Post (1/6, Summers, 4.28M), Lawrence Summers, a former Treasury Secretary under President Clinton and a key economic adviser to President Obama, lays out strategies to put the economy on a path of “sustainable growth.” Summers lays out several strategies, but endorses a “commitment to raising the level of demand at any given level of interest rates through policies that restore a situation where reasonable growth and reasonable interest rates can coincide.” Summers says that the government should boost the economy by investing more in infrastructure growth. He also endorses doing much more with the energy sector to “unleash private investments” in fossil fuels and renewables, while simultaneously ensure that the “widening trade deficit does not excessively divert demand from the U.S. economy.”

Economist Argues For Ending Corporate Income Tax. In an op-ed for the New York Times (1/6, Kotlikoff, Subscription Publication, 9.61M), Laurence Kotlikoff, a professor of economics at Boston University, argues that one way to boost the economy would be to eliminate the corporate income tax. He argues this isn’t a “giveaway to the rich,” as big companies can move operations and jobs overseas to avoid taxation. Kotlikoff argues that the US’ very high tax rate drives jobs overseas and that ending it would significantly boost prospects of workers. In addition, he argues that the benefits from such a move would outweigh the budget costs.

CONGRESSIONAL AGENDA DRIVEN BY ELECTION-YEAR CONCERNS. The AP (1/6, Cassata) reports that Congress returns on Monday, and its agenda is likely to be heavily influenced by “election-year politics.” Republicans are looking to focus on the ACA, as they see “a political boost in its problem-plagued rollout as the GOP looks to maintain its House majority and seize control of the Democratic-led Senate.” Democrats, for their part, “will press to raise the federal minimum wage from \$7.25 an hour and extend unemployment benefits.”

The Washington Post (1/6, Kane, 4.28M) reports that after a relatively unproductive 2013, lawmakers are “struggling to find optimism that 2014 will mark a pivot point for an institution whose historically low approval rating has been at or below 20 percent for three years.” The first “big hurdle” will be the January 15 deadline for current Federal budget authority, followed by a debt limit increase needed in the next few months.

Looking at the House GOP’s agenda, the New York Times (1/6, Weisman, Subscription Publication, 9.61M) says that House Majority Leader Eric Cantor is “quietly playing down expectations for any major legislative achievements in the final year of the 113th Congress.” The calendar is “bare bones,” with the House in session only 97 days before November’s elections. More broadly, the Times says that White House “priorities” such as raising the minimum wage, extending emergency unemployment benefits, and immigration reform are “likely to go nowhere.” Instead, Congress is expected to focus on the farm bill and budget issues.

For its part, the Wall Street Journal (1/6, Hook, Hughes, Subscription Publication, 5.91M) says that Congress will immediately begin to tackle the issues laid out in the AP story.

Editorial Wrap-Up:

NEW YORK TIMES. “Zero Tolerance, Reconsidered.” In an editorial, the New York Times (1/6, Subscription Publication, 9.61M) says that schools “across the country” are reconsidering zero tolerance discipline policies, which are “long overdue.” The Times says that studies “have shown that suspensions and expulsions do nothing to improve the school climate, while increasing the risk that children will experience long-term social and academic problems.” In addition, Federal data “indicates that minority students are disproportionately singled out for harsh disciplinary measures.”

“Another Step Forward On Okinawa.” In an editorial, the New York Times (1/6, Subscription Publication, 9.61M) hails the advancement of plans to move US troops on the Japanese island of Okinawa to a less-congested area, but takes the opportunity to criticize Prime Minister Shinzo Abe’s “aggressive nationalism.” The Times urges the Administration to press Abe more heavily to moderate himself on the issue.

“Republican Disdain For The Jobless.” The New York Times (1/6, Subscription Publication, 9.61M), in an editorial, says of the proposed extension of unemployment benefits that “it’s hard to imagine a more important action for those who have been out of work the longest,” as well as “for the economy.”

“Acing The Course At Chapel Hill.” In an editorial, the New York Times (1/6, Subscription Publication, 9.61M) criticizes the role of athletics in universities, highlighting the recent scandal at the University of North Carolina at Chapel Hill, where a “former professor was indicted on fraud charges last month after running dozens of bogus and no-show courses heavily enrolled with student athletes looking for easy academic credits.” The NCAA “should be alarmed at this scandal, but there is no sign yet of dedicated reform.”

WASHINGTON POST. “Just A Trim.” In an editorial, the Washington Post (1/6, 4.28M) says that members of Congress from both parties are “falling all over themselves” to undo a one “percentage-point reduction in military pension annual cost-of-living increases, which provides \$6 billion in savings over 10 years” implement in the December budget deal. The Post says the cut “is an exceedingly modest one on a pension plan that is already far more generous than private-sector equivalents.”

“Blast From The Past.” An editorial in the Washington Post (1/6, 4.28M) decries Chinese leaders’ efforts to control the media, noting that “President Xi Jinping, has been championing slogans and ideology from Mao’s day and the pursuit of a Marxist Utopia, a pursuit that led to great suffering for hundreds of millions of people.” The Post argue that because Chinese leaders “fear that openness and freedom pose an existential threat to their control,” they “lord over information to preserve their monopoly on power.” The Post adds that they “are right to be afraid; the digital revolution is only gathering force.”

WALL STREET JOURNAL. “The Costs Of U.S. Retreat.” In an editorial, the Wall Street Journal (1/6, Subscription Publication, 5.91M) argues that costs of the US’s strategic retreat from Iraq and Syria are now being seen as al Qaeda’s influence is growing in those countries and others, including Lebanon. The Journal adds that the costs of the US retreat are likely to be higher than if the US had remained engaged in Iraq and helped to make the Syria opposition more moderate.

“Boeing Workers Unite.” In an editorial, the Wall Street Journal (1/6, Subscription Publication, 5.91M) hails the approval of a new contract by Boeing machinists, arguing that it is a victory for the workers and for the economy, as well as for common sense.

“A Good Time For Housing Reform.” In an editorial, the Wall Street Journal (1/6, Subscription Publication, 5.91M) says that 2014 is a good year to cut back on Federal support for the housing market, which the paper says has previously caused a series of housing boom-and-bust cycles. The Journal cites the poor financial condition of the FHA as evidence for the need for reform. The Journal backs efforts to limit FHA subsidies of the housing industries.

Washington Schedule:**TODAY'S EVENTS IN WASHINGTON.**

White House:

PRESIDENT OBAMA — Schedule Unavailable**VICE PRESIDENT BIDEN — Schedule Unavailable**

US Senate: 12:15 p.m. **SEN. JOHNSON – OPM LAWSUIT** — Sen. Ron Johnson (WI) along with Paul Clement, partner at Bancroft PLLC and former U.S. Solicitor General, and Rick Esenberg, founder and current President and General Counsel of the Wisconsin Institute for Law & Liberty, will hold a press conference to discuss the filing of a lawsuit in the U.S. District Court for the Eastern District of Wisconsin, against the Office of Personnel Management (OPM) to “correct the special treatment being authorized for members of congress and their staffs.” Location: Mike Mansfield Room, S-207.

FLOOR SCHEDULE 2 p.m. — The Senate will reconvene and resume consideration of the motion to proceed to S. 1845, the Unemployment Insurance Extension. At 5:30 p.m. the Senate will conduct two roll call votes as follows: 1.) Confirmation of Janet Yellen; 2.) The motion to invoke cloture on the motion to proceed to S. 1845.
US House: No Scheduled Events

Other: AMERICAN ASTRONOMICAL SOCIETY 223RD MEETING — “AAS 223: A Stimulus Package for Astronomy in the Nation’s Capital.” All briefings will be streamed on AAS’s website, accessible to registered journalists. During the five-day meeting, NASA scientists and their colleagues will present briefings on noteworthy discoveries – made possible by NASA’s astrophysics spacecraft – including the detection of unusually bright young galaxies, new gravitational lens findings, and black hole events in dwarf galaxies. Location: Gaylord National Hotel & Conference Center, 201 Waterfront Street, National Harbor, Md.

NATIONAL HEALTH SPENDING IN 2012 — 9 a.m. – 10 a.m. Briefing with the Centers for Medicare & Medicaid Service’s National Health Expenditure Accounts Team on the “National Health spending in 2012: Slow growth continues”. Location: National Press Club (13th Floor), Zenger Room, 529 14th St. NW.

CSIS – AFGHANISTAN – NATO — 10 a.m. – 11 a.m. Ten Years in NATO; Twelve Years in Afghanistan – Minister Reinsalu as he discusses Estonia’s defense priorities and its military modernization plans ahead of the September 2014 NATO Summit. Location: Center for Strategic and International Studies (CSIS), 1616 Rhode Island Avenue, NW.

PENTAGON – ESTONIA — Secretary of Defense Chuck Hagel hosts an honor cordon to welcome Estonia’s Minister of Defense Urmas Reinsalu. Location: Steps of the Pentagon River Entrance

DOI in the News:**SECRETARY JEWELL ANNOUNCES LAUNCH OF "21ST CENTURY CONSERVATION SERVICE CORPS."**

For "The Blog" of the [Huffington Post](#) (1/9, Bridgeland, 11.54M), John Bridgeland, CEO, Civic Enterprises, writes that "on the National Mall, with a backdrop of Franklin Delano Roosevelt's Memorial," Interior Secretary Sally Jewell "invoked the legacy of FDR's Civilian Conservation Corps to launch what she called a 'CCC 2.0' – a 100,000 person strong '21st Century Conservation Service Corps' that will eventually give thousands of young people...and veterans whose transitions home from war are improved through civilian national service, the opportunity to serve their country and enhance their lives." In addition to "ensuring the federal government will do its part," Jewell is "challenging the private sector to emerge with \$20 million to support those nonprofits that deploy corps members."

Also reporting on the story are [NPR](#) (1/9, Shogren, 465K) and [KUHF-FM Houston](#) (1/9, 12K).

American Eagle Outfitters Pledges \$1 Million For Public Land Effort. In its "Post Politics" blog, the [Washington Post](#) (1/8, Bernstein, 4.28M) reports that "American Eagle Outfitters pledged \$1 million Wednesday to help train and hire young people and veterans to care for public lands." The contribution "is part of Interior Secretary Sally Jewell's effort to raise \$20 million from private groups by 2017 to build a '21st Century

Conservation Service Corps' that would work and volunteer to maintain public lands." Jewell has "made the effort one of her top priorities, noting in a speech on her vision for the department that young people are increasingly disconnected from the outdoors."

Also reporting on the story is the [Women's Wear Daily](#) (1/9, 69K).

SECRETARY JEWELL TO TOUR EVERGLADES HEADWATERS. The [Orlando \(FL\) Sentinel](#) (1/8, 780K) reports that Interior Secretary Sally Jewell is visiting Florida "this week to show the Obama administration's 'sustained commitment to restoring and protecting the Everglades.'" Jewell will "meet with landowners at the Durando Ranch in Okeechobee on Thursday and discuss the next steps for the Everglades Headwaters National Park Refuge and Conservation Area – a plan to restore imperiled habitat while preserving private ranch land." She will also tour the Kissimmee River Restoration Project in Florida. And on Friday evening, Jewell will deliver the keynote address to the Everglades Coalition Conference in Naples.

The [Fort Myers \(FL\) News-Press](#) (1/8, 210K) notes that "this will be Jewell's second official visit to the Everglades since being sworn in as secretary less than one year ago."

Also covering the story are the [South Florida Sun Sentinel](#) (1/8, 690K) and the [Naples \(FL\) Daily News](#) (1/8, 174K).

SECRETARY JEWELL TO KEYNOTE OUTDOOR INDUSTRY ASSOCIATION INDUSTRY BREAKFAST. The [SportsOneSource](#) (1/9, 71) reports that the Outdoor Industry Association Industry Breakfast being held in conjunction with the Outdoor Retailer Winter Market 2014, will feature Interior Secretary Sally Jewell as its keynote speaker. According to the article, "the breakfast will take place on Wednesday, Jan. 22, 2014 from 7:00 am to 9:00 am at the Salt Lake Marriott Downtown at City Creek, in Salt Lake City." Frank Hugelmeyer, President and CEO of Outdoor Industry Association, said, "We look forward to Secretary Jewell's keynote presentation as she outlines the Administration's ambitious initiative to engage and employ youth on public lands, improve access and increase participation in outdoor recreation as part of the Administration's conservation agenda."

The [Bicycle Retailer](#) (1/8) reports that Steve Rendle, president, VF Outdoor and the Action Sports Coalition, a co-sponsor of the event, said, "We're excited to host her at the OIA industry breakfast to hear and discuss ideas for greater public engagement with the outdoors and our partnership with policymakers."

Also reporting on the story is [Politico](#) (1/8, Tau, 464K).

NORTH CENTRAL CLIMATE SCIENCE CENTER RECEIVES \$1 MILLION FOR RESEARCH. The [Northern Colorado Business Report](#) (1/8) reports that the North Central Climate Science Center at CSU will "receive more than \$1 million for collaborative research to guide managers of parks, refuges and other cultural and natural resources in planning how to help species and ecosystems adapt to climate change." The Interior Department will "award the money for projects on how climate change will affect natural resources and management actions needed to help offset such change." Interior Secretary Sally Jewell said in a statement, "Even as we take new steps to cut carbon pollution, we must also prepare for the impacts of a changing climate that are already being felt across the country. These new studies, and others that are ongoing, will help provide valuable, unbiased science that land managers and others need to identify tools and strategies to foster resilience in resources across landscapes in the face of climate change."

PILT FUNDING REMAINS IN JEOPARDY. The [Hendersonville \(NC\) Times-News](#) (1/9, 37K) reports that "a federal program to compensate Western North Carolina counties with large swaths of non-taxable public lands is in jeopardy if Congress doesn't act soon to restore its funding." Transylvania County stands to lose about \$200,000 this year if the PILT program "isn't fully funded during ongoing budget negotiations between the U.S. House and Senate."

DEMISE OF NATIONAL BLUEWAYS SYSTEM LAMENTED. The [Brattleboro \(VT\) Reformer](#) (1/9, 22K) editorializes that "paranoia and misinformation" won "out over common sense and a genuine effort to do a good thing" with the demise of the National Blueways System. According to the paper, "there really was no downside to the program, until some conservative groups and politicians in the Midwest invented one." The editorial claims

that “they feared it would lead to increased regulations and land seizures, even though federal officials made it clear that the program was voluntary and did not include any new regulations.”

Additional coverage of the Interior Department’s decision to end further designation under the National Blueways System was provided by the [Farmington \(MO\) Daily Journal](#) (1/9, 7K).

RATIONALE OF KING COVE ROAD DECISION QUESTIONED. In an op-ed for the [Juneau \(AK\) Empire](#) (1/9, 21K), Rich Moniak admits that the “arguments from both sides” on the King Cove Road “may be more exaggeration than substance.” However, Moniak questions how “a narrow, single lane road on the sparsely populated tail of the Alaska Peninsula” would cause “irreparable damage to important fish, wildlife, habitat and wilderness values of the refuge.” Moniak claims that seems “to be an overly dire forecast for the impacts of a 40-foot-wide road corridor across a strip of land that’s three miles wide.”

STATES CHALLENGING FEDERAL CONTROL OF PUBLIC LANDS. For the [Reno \(NV\) News & Review](#) (1/9, 75K), Brendan Trainor writes that “Nevada is planning to join five other Western states challenging the federal government’s control of the public lands.” He acknowledges that “many studies conclude the federal government does a relatively poor job of range and timber management, especially with all the resources at its disposal,” but he notes that “there are numerous examples of mediocre state management as well.” For instance, “because Nevada manages so few public lands now, the state management infrastructure is largely nonexistent.”

America’s Great Outdoors:

National Park Service:

NATIONAL BOOK FESTIVAL TO LEAVE MALL FOR THE D.C. CONVENTION CENTER. The [Washington Post](#) (1/9, Charles, 4.28M) reports that “after 12 years on the Mall, the National Book Festival is moving to the Walter E. Washington Convention Center.” According to the article, the NPS was “concerned about pedestrian damage to the grass first broke in September, just as the 2013 festival was about to begin.” Stephen Lorenzetti, the Park Service’s deputy superintendent for planning at the National Mall and Memorial Parks, said, “We worked closely with the library to allow the festival to continue at a reasonable cost. We showed them how they might use the walkways and the roadways. But in the end, the library decided that it was more affordable to move to a different venue. We respect their decision.”

Also reporting on the story are the [Washington Post](#) (1/9, 4.28M), [CBS](#) (1/8, 3.87M), the [Washington City Paper](#) (1/8, 849K), the [DCist](#) (1/9, 21K), the [Gothamist](#) (1/9, 145K), [WJLA-TV](#) Washington (1/9, 118K), and [WRC-TV](#) Washington (1/9, 291K).

VIRGIN ISLANDS NATIONAL PARK INCREASES IN SIZE. The [New York Times](#) (1/8, Winchester, 9.61M) reports that “Virgin Islands National Park – which already encompasses 60 percent of the tiny Caribbean island of St. John — just got a little bigger.” The Trust for Public Land announced that “the beach at Maho Bay and its surrounding hillside recently was sold to the National Park Service in a \$2.5 million deal.” The article notes that “it’s the park’s largest addition since 1956, when the philanthropist Laurance Rockefeller, hoping to preserve the island paradise he fell in love with, donated more than 5,000 acres toward its creation.” Brion FitzGerald, the park superintendent, said, “It’s a story of perseverance and a vision. To be able to sit on the beach and look up there and not see a lot of development is what makes it worthy of a national park. It ensures that same view for every generation to come.”

NPS LOOKING AT LACK OF LGBT HISTORIC SITES. The [Bay Area Reporter \(CA\)](#) (1/9, 310) reports that “the lack of LGBT historic sites with federal recognition is garnering the attention of National Park Service officials.” Officials are “seeking nominations of sites to be added to the National Register of Historic Places and for consideration to be designated as a National Historic Landmark.” The article notes that “to date just three sites, all on the East Coast, have received any federal recognition specifically due to their ties to LGBT history,” and “the fourth site very likely will be the Henry Gerber House in Chicago.”

ADDITIONAL COVERAGE OF ADDITION TO PETRIFIED FOREST NATIONAL PARK. Additional coverage of the addition of 4,265 acres to Petrified Forest National Park was provided by the [Arizona Journal](#) (1/8).

Bureau of Land Management:

RANCHERS ATTEND BLM'S SAGE GROUSE MEETINGS. The Salem (OR) Capital Press (1/8, 113K) reports that "about 175 people attended a BLM open house Jan. 6 in Prineville, and an estimated 300 packed a meeting in Burns the following day" to hear about the BLM's sage grouse management plan, according to the Oregon Cattlemen's Association. Bob Skinner, public lands chairman for the cattlemen's association, said that "while the grazing prohibition impacts only 1 percent of the BLM's grazing land, it amounts to a 'punch in the face' for cattle ranchers who depend on those allotments."

REPORT DETAILING CHARIOT FIRE CAUSE STILL UNRELEASED. The U-T San Diego (1/8, 647K) reports that "six months after the Chariot fire roared up an East County canyon from the desert floor, burning across Sunrise Highway in Mount Laguna and destroying the historic Al Bahr Shrine Camp, the official cause of the blaze has yet to be released." Meanwhile, "attorneys for the Shriners have filed several claims against the US Bureau of Land Management, seeking millions of dollars in damages caused by the July 6 fire, which the Shriners allege was inadvertently started by a BLM field officer who drove his vehicle over dry brush."

BLM ISSUES DECISION RECORD FOR KIEWIT MINE PROJECT. KCSG-TV St. George, UT (1/9, 43) reports that the BLM Utah Salt Lake Field Office has "released a Finding of No Significant Impact (FONSI) and signed the Decision Record (DR) approving the Kiewit Mine Project in southwestern Tooele County, Utah."

BLM'S PROPOSAL TO CLOSE MYRTLE CREEK WATERSHED QUESTIONED. In an editorial, the Roseburg (OR) News-Review (1/9, 53K) questions the BLM's proposal "to close more than 2,000 acres in the Myrtle Creek watershed." The paper says that "it's hard to see what the BLM will gain no matter how the appeals board rules."

Fish and Wildlife Service:

DC POLICE INVESTIGATING THEFT OF IVORY TUSKS FROM JOHN A. WILSON BUILDING. The Washington Post (1/9, Hermann, Debonis, 4.28M) reports that DC police are investigating the disappearance of elephant tusks that "Ethiopian Emperor Haile Selassie I gave to the District during his 1954 visit" from the John A. Wilson Building. D.C. police estimated the stolen tusks to be worth at least \$10,000. Edward Grace, deputy chief of law enforcement for the US Fish and Wildlife Service, "said the tusks stolen from the District 'would be pretty easy to sell,' adding that 'it would be very hard for a police agency to stop that sale or investigate it.'" Grace said trading elephant tusks is unusual in the United States, a market that he said was more interested in ornate carvings.

FWS COMPLETES LAND SWAP FOR ATV TRAIL. The Berlin (NH) Daily Sun (1/9, 26K) reports that the FWS has "exchanged a 233-acre parcel of land in the Town of Errol for a conservation easement on the state's Big Island State Forest in Wentworth's Location." According to the article, "the Big Island State Forest conservation easement area will become part of Umbagog National Wildlife Refuge and a new state forest will be created in Errol." Paul Casey, refuge manager of Umbagog National Wildlife Refuge, said, "This is a win-win deal for wildlife and people. High quality wildlife habitat will be managed by the refuge while the public will permanently gain an important connection in the new North Country all-terrain vehicle, or ATV, trail."

FWS REOPENS COMMENTS PERIOD ON PROPOSAL TO PROTECT ZUNI BLUEHEAD SUCKER. In its "Ballot Box" blog, The Hill (1/9, 194K) reports that the FWS is "announcing a six-month extension to a proposed rule that would protect" the Zuni Bluehead Sucker. According to experts, "the population of the Zuni Bluehead Sucker has rapidly declined by 90 percent over the last two decades." The FWS said, "We are taking this action because there is substantial disagreement regarding the sufficiency or accuracy of the available data relevant to our determination regarding the proposed listing rule, making it necessary to solicit additional information by reopening the comment period for 30 days."

YELLOW-BILLED CUCKOO LISTING WOULD AFFECT SNAKE WATER MANAGERS. The Salem (OR) Capital Press (1/8, 113K) reports that "Upper Snake River water managers say they'll face new administrative obligations if federal protection is approved for" the yellow-billed cuckoo. According to FWS, "90 percent of the bird's riparian habitat in the West has been lost or degraded, and habitat threats include 'conversion to agriculture, dams, river

flow management, bank protection, overgrazing and competition from exotic plants.”

FWS SEEKS PROPOSALS FROM STATES FOR 2014 ENDANGERED SPECIES ACT GRANTS. The Sioux Falls (SD) Tri-State Neighbor (1/9, 79K) reports that the FWS is “seeking proposals from states and US territories for federal financial assistance for conservation activities that benefit endangered species.”

BIG GAME OUTFITTER CHARGED WITH WILDLIFE PLOT. The Washington Post (1/8) reports that “federal authorities have accused a Colorado man and a guide from Oregon of illegally capturing and maiming mountain lions and bobcats as part of a scheme to make hunting the cats easier for their clients.” The US Justice Department said Wednesday that “Christopher Loncarich, of Mack, Colo., and Nicholous Rodgers, of Medford, Ore., have been indicted on charges including transportation and sale of unlawfully taken wildlife.” The case was investigated by the FWS Office of Law Enforcement, “Colorado Parks and Wildlife, and Utah Division of Wildlife Resources, and is being prosecuted by the Environmental Crimes Section of the Justice Department’s Environment and Natural Resources Division.”

PROTECTION FOR SAGE GROUSE SUPPORTED. The Missoula (MT) Independent (1/9, Gulliford, 65K), Andrew Gulliford, professor of history and environmental studies at Fort Lewis College, asks, “A federal listing of the Gunnison sage grouse as an endangered species may change the way the rural West does business, but what’s wrong with that?” Gulliford asserts that “every one of us has an obligation” to stand up for the sage grouse.

US Geological Survey:

SCIENTISTS DEVELOP MEANS FOR IDENTIFYING AREAS AT RISK OF BRINE CONTAMINATION. The Los Angeles Times (1/8, Banerjee, 3.07M) reports that a study from the US Geological Survey of Sheridan County, Montana indicates that a system they developed “could help prevent some contamination of wetlands and groundwater from oil development in the booming Williston Basin in Montana and North Dakota.” The system helps identify areas at greatest risk for brine contamination.

Securing America’s Energy Future:

Onshore Energy Development:

HOUSE COMMITTEE TO HOLD HEARING ON ADMINISTRATIONS PROCESS OF 2008 STREAM PROTECTION RULE. In its “E2 Wire” blog, The Hill (1/9, 194K) reports that the House Natural Resources Committee will “hold a full committee hearing titled, ‘Obama Administration’s War on Coal: The Recent Report by the Office of the Inspector General.’” Members will “dive into a report, which probed the administrations process of a 2008 stream protection rule.”

Also reporting on the story is the National Journal (1/9, Subscription Publication, 427K).

Offshore Energy Development:

BP CLAIMS FRAUD, SEEKS TO STOP OIL-SPILL PAYMENTS. McClatchy (1/8, Cockerham, 95K) reports that the Deepwater Horizon settlement agreement “is in turmoil, with BP attempting to stop the payments and saying money shouldn’t have gone to an adult escort service, a global nuclear consultant and others that haven’t proved the monster 2010 oil spill in the Gulf of Mexico cost them business.” BP “is waging an aggressive campaign in the courts and the news media against the settlement it signed two years ago.” The firm “agreed to the settlement under pressure as claims mounted from the oil rig explosion that killed 11 workers, led to the biggest environmental disaster in U.S. history and did major economic damage to businesses in the region.” BP expected the settlement could cost about \$7.8 billion, but “it soon became clear that payouts would swell,” and now the company “is in court arguing that the claims administrator and the judge overseeing the settlement are misinterpreting the terms of the deal.”

Tackling America’s Water Challenges:

NEW YORK TIMES ARTICLE RAISES AWARENESS OF COLORADO RIVER ISSUES. For “The Blog” of the Huffington Post (1/9, Feldstein, 11.54M), Stephanie Feldstein, Population and Sustainability Director, Center for Biological Diversity, notes that “a couple days ago, The New York Times published an article on the Colorado River that started with the sobering statistic that the once-mighty river of the Southwest has suffered ‘14 years of drought nearly unrivaled in 1,250 years.’” Feldstein claims that “with rising temperatures and demand already exceeding supply, the river won’t be able to keep up.” She argues that “we need to drastically cut back on water and energy intensive systems, like raising livestock for food,” and “watershed management plans should go beyond simply meeting the needs of ever-growing human populations to actually enhance the watershed’s habitat and provide a healthier ecosystem for the people and wildlife relying on it.”

For the “Water Currents” blog of the National Geographic (1/8, 40.49M), Jennifer Pitt of Environmental Defense Fund writes that “those with the power to affect Colorado River water management – our elected leaders and the officials they appoint – have the power to preserve the natural wonders of the American West.” She claims that “persistent drought presents these leaders with a significant challenge, and how they respond will have an enduring impact, not only on the economic viability of our cities and rural counties, but also on the health of the Colorado River.” Pitt quotes Anne Castle, Assistant Secretary for Water and Science at the Department of Interior, who said that “we can’t simply sacrifice recreational and environmental flows when times get tough. We know that outdoor recreation is an important driver of the Southwestern economy, just like agriculture, so we’ve got to consider all of those things together. It’s essential to our economy. It’s essential to our way of life.”

ADDITIONAL COVERAGE OF BAY DELTA CONSERVATION PLAN. The Central Valley (CA) Business Times (1/9, 206) reports that “the time needed for citizens to comment on the 40,115 pages of the environmental impact report/environmental impact statement of the Bay Delta Conservation Plan needs to be extended by Gov. Jerry Brown, say opponents of the water tunnels that are the heart of the plan.” According to calculations by Chris Austin, a specialist in California water issues, “based on when the plan was released on Dec. 13, a person would have to read 334.2 pages per day, every day of the week, just to have finished it by the deadline to submit comments.” Restore the Delta Executive Director Barbara Barrigan-Pamilla said, “It is impossible to fully review the massive EIR/EIS documents in just 85 working days.”

Additional coverage of the Bay Delta Conservation Plan was provided by the Bay Area (CA) Indymedia (1/8, 2K) and KCET-TV Los Angeles (1/9, 15K).

BOR WARNS OF SAN JUAN-CHAMA WATER SHORTAGE IN 2014. The Albuquerque (NM) Journal (1/9, 288K) reports that the BOR has “warned water agencies, including the Albuquerque Bernalillo County Water Utility Authority, that there may be a first-ever shortage of San Juan-Chama Project water this year.” According to a letter from Bureau Albuquerque office chief Mike Hamman, “with low storage in Heron Reservoir and a below-average forecast, there is not currently enough water available to ensure a full allocation.”

Also reporting on the story is KRQE-TV Albuquerque, NM (1/9, 29K).

CALIFORNIA URGED TO CLOSE AMERICAN RIVER TO STEELHEAD FISHING. The Sacramento (CA) Bee (1/8, 749K) reports that California officials are “being urged to close fishing seasons on the American River in the Sacramento area to protect steelhead and salmon from fishing pressure as the river declines amid drought conditions.” On Wednesday, the Sierra Salmon Alliance urged the California Department of Fish and Wildlife to close the fishery on the river. Tyrone Gorre, co-founder of the group, said he is “concerned that as the river shrinks, steelhead migrating upstream to spawn will be unable to avoid the many anglers trying to hook them.”

MANCOS WATER CONSERVANCY WORKING TO EXPAND JACKSON GULCH RESERVOIR. The Durango (CO) Herald (1/7, 28K) reports that the Mancos Water Conservancy is “working on expanding Jackson Gulch Reservoir to hold an additional 80 acre-feet of water.” According to the article, “a preliminary study has been completed, and the conservancy is going to start discussions with the Bureau of Reclamation later in January.” The BOR “will have to complete its own study.”

ADDITIONAL COVERAGE OF PLAN TO REDUCE EMISSIONS AT NAVAJO GENERATING STATION.

Additional coverage of plan to cut emissions at the Navajo Generating was provided by the Power Engineering (1/9), the Electric Light & Power (1/9), and the Fierce Energy (1/9).

Empowering Native American Communities:

OPPONENTS CLAIM TRIBAL GAMBLING GETTING TOO BIG. The McClatchy (1/8, Hotakainen, 95K) reports that "casino opponents...fear President Barack Obama and his team are going too far to take care of the 566 federally recognized tribes and to promote their gambling interests." The article notes that "the issue is particularly big along the West Coast, causing divisions from Washington state to California." In an interview, Kevin Washburn, who heads the BIA, said that "democracy is working well in California, noting that voters approved tribal gaming in 1998." Washburn said that "casinos have helped tribes economically and that he knows of no studies indicating how many casinos are optimal."

BIA APPROVES MASHPEE'S TRIBAL-STATE GAMING COMPACT. The Indian Country Today Media Network (1/8, 21K) reports that the BIA has approved the Mashpee Wampanoag Tribe's gaming compact with the Commonwealth of Massachusetts, "setting another major landmark on the tribe's journey toward building Project First Light, a \$500 million destination resort casino in the southeastern part of the state." Mashpee Chairman Cedric Cromwell said, "It's a historic and epic moment. It represents a collaborative and cooperative agreement between the Mashpee Wampanoag Tribe and the Commonwealth of Massachusetts. No other state has designed a commercial gaming bill and added a tribal provision that respects and honors the rights of a federally recognized tribe while protecting the rights of the state." Massachusetts Gov. Deval Patrick "issued a statement lauding the BIA's approval of the compact." Patrick said, "I'm pleased that the Commonwealth's compact with the Mashpee Wampanoag tribe has been given final approval under federal law. This is another important step toward growing jobs and opportunity in the southeast region and a good deal for both the Commonwealth and the tribe."

INDIAN LAW AND ORDER COMMISSION COMPLETES REPORT ON HOW TO MAKE TRIBAL LANDS SAFER. For the Indian Country Today Media Network (1/8, 21K), Walter Lamar, a former FBI special agent and deputy director of BIA law enforcement, writes that the bipartisan Indian Law and Order Commission has completed its report, entitled "A Roadmap for Making Native America Safer." According to Lamar, "although this wide-ranging document was created specifically for Congress, its radical recommendations will also provide plenty of food for thought to Tribal and state leaders; attorneys, prosecutors and court personnel; Tribal and state law enforcement; and Federal employees in the Department of Justice, the DOI's Office of Justice Services, the Federal Bureau of Investigation, the US Attorneys' offices, and the Bureau of Indian Affairs."

Top National News:

WHITE HOUSE RESPONDS CAUTIOUSLY TO GATES MEMOIR. The continuing discussion of former Defense Secretary Robert Gates' memoir "Duty" and its criticisms of the Obama Administration was not covered on the broadcast network newscasts, but continues to be a major topic on cable and in print. The White House is defending Vice President Biden, in particular, after Gates said Biden has been wrong on foreign policy matters throughout his career, but Administration representatives stopped short of criticizing Gates himself.

On CNN's Situation Room (1/8, 554K), correspondent Barbara Starr reported that at the Pentagon, "all the talk is about" Gates' book, "and top generals are already bugging their aides to get them copies of it." According to Starr, "Even as Gates sent troops to war, he felt the White House didn't trust the military and he was emotionally conflicted about the President's handling of the Afghan war." Brianna Keilar went on to report that White House Press Secretary Jay Carney defended the President and Vice President Biden when asked about Gates' book, but "did not outright slam Secretary Gates." According to Keilar, "This is something that the White House has been wary of doing, afraid that it would backfire."

Likewise, the AP (1/9, Lederman) reports that White House officials, who were "initially caught off guard by the book's accusations...walked a fine line between publicly rebuking his former defense chief and allowing Gates' claims to go unchallenged." The AP says Carney "disputed several of Gates' points individually but said Obama appreciated Gates' service." Philip Ewing, in an analysis for Politico, says the White House "is taking the high road in responding to Gates's book."

However, USA Today (1/9, Jackson, 5.82M) reports that on CBS' This Morning Wednesday, former White House chief of staff Bill Daley "not only disputed Gates' criticism of President Obama and aides, he criticized the fact that Gates had it published while Obama is still in office." Daley is quoted as saying, "This rush to do books by

people who leave an administration while the administration is ongoing, I think, is unfortunate. ... I think it's just a disservice, to be very frank with you."

The Wall Street Journal (1/9, Nicholas, Lee, Subscription Publication, 5.91M) reports that on Wednesday, David Axelrod said, "I haven't spoken to one person who wasn't surprised, partly because Gates always spoke of what a good working relationship he had with the president, and partly because it is so inconsistent with the guy who seemed to be the soul of discretion."

CNN (1/9, 14.53M) quotes an anonymous "former White House official" as saying, "I thought the President was a close ally of Gates. It's disappointing, because if Gates had issues you would've expected him to raise them. When I spoke to Gates about the president he was always effusive."

Howard Kurtz, appearing on Fox News' O'Reilly Factor (1/8, 2.53M), said while Gates "is perfectly entitled to rip Barack Obama on policy, but it is an absolute betrayal to reveal private conversations with a president who trusted him to give confidential advice." Kurtz added, "How can a president rely on his inner circle in times of war and peace if they are gathering material for a best-seller?"

The Hill (1/9, Sink, 194K) quotes Jay Carney as saying, "When you pick a team of rivals, you do so because you expect competing points of view," but, according to the Washington Post (1/9, Wilson, 4.28M), Gates "has highlighted the risk Obama took by building a jostling, ambitious, big-intellect 'team of rivals' to advise him." The Post says "even before official publication, the reception of Gates' memoir 'is splitting along partisan lines,' which means the President "probably faces little lasting political damage from the account."

The Washington Times (1/9, Boyer, 417K) reports that in "disput[ing]...Gates' claim that the president lacked faith in his own administration's plan for improving the military situation in Afghanistan," Carney said, "The president has great faith in the troops that carried out the mission and in the mission itself."

Bret Baier, at the opening of Fox News' Special Report (1/8, 2.15M), said, "The White House executed a hurry-up damage-control defense" a day after excerpts from Gates' book leaked, "while critics embraced the insider-level condemnation of the President's foreign policy approach."

The Wall Street Journal (1/9, Subscription Publication, 5.91M), in an editorial, says that, for the most part, Gates has merely confirmed what was already conventional wisdom in Washington regarding the President's foreign policy.

USA Today (1/9, 5.82M), in an editorial, writes that while "much of the press about...Gates' revealing new book centers on his disagreements with President Obama," Gates' "differences with Obama pale in comparison with his utter scorn for Congress." USA Today notes that a "partial list of" Gates' adjectives for members of Congress includes, "uncivil, incompetent, parochial and hypocritical."

Biden's Influence Prominently On Display At The White House Wednesday. Michael Shear, in a piece for the New York Times (1/9, Subscription Publication, 9.61M), says that on Wednesday, "less than 24 hours after" it had been reported that Gates wrote that Vice President Biden has been "wrong on nearly every major foreign policy and national security issue over the past four decades," White House aides "went out of their way to praise Mr. Biden and extravagantly advertise his presence in the West Wing." According to Shear, Biden "was in the Oval Office for the president's morning briefing, in the Situation Room for a discussion about national security leaks, back in the Situation Room for a meeting with intelligence officials and, later, in the Oval Office yet again with Mr. Obama and the secretary of state." Shear adds that "for the first time since the Obama presidency began, the White House allowed photographers on Wednesday to take pictures of the vice president's weekly lunch with Mr. Obama."

Under the headline "White House Denies Gates' Charge That Biden Is Often Wrong," McClatchy (1/9, Clark, 95K) also reports that on Wednesday, "the White House sought...to portray Biden as a trusted presidential adviser." McClatchy reports that responding to Gates' characterization, Jay Carney said, "As a senator and as a vice president, Joe Biden has been one of the leading statesmen of his time and he has been an excellent counselor and adviser to the president for the past five years."

Gates Book Revives Questions About Obama's Commitment To Afghanistan. Howard LaFranchi, in a piece for the Christian Science Monitor (1/9, Lafranchi, 540K), notes that Gates says President Obama "was 'skeptical' of his own Afghanistan policy, 'if not outright convinced it would fail,'" and that for the President, "it's all about getting out." In a segment on the fallout from Gates' book for Fox News' Special Report (1/8, 2.15M), Ed Henry reported that Sen. Lindsay Graham, "who was just in Afghanistan, is skeptical that Mr. Obama is committed to working out a deal to keep at least a small US force" in Afghanistan "to lock in security gains." Graham was shown saying: "He is AWOL when it comes to leadership. And when it comes to Afghanistan, we have a chance to get that right," but the President "hasn't talked to the Afghan president since July."

Sen. Marco Rubio, appearing later on Fox News' Special Report (1/8, 2.15M), said, "Afghanistan was the premier operational area in the world for Jihadist planned attacks on us, our interests around the world, and the west in general. And, if, in fact, it becomes that again...the world becomes an even more dangerous place. So we have a significant interest in insuring the place does not devolve once again into a chaotic, ungoverned space where terrorist organizations can use it to undermine their neighbors and come after us."

UNEMPLOYMENT BENEFITS VOTE ON HOLD AS REID SEEKS COMPROMISE. A day after legislation to reinstate long-term unemployment benefits advanced past a cloture vote in the Senate, Senate Majority Leader Reid postponed action until Thursday.

The AP (1/9, Espo) reports Reid said he "wanted to allow time for unspecified compromise efforts" and suggested a full year renewal rather than "a three-month resurrection of the expired program." Republicans including Sen. Kelly Ayotte and Rob Portman are suggesting ways to offset the estimated \$6.4 billion cost of a three-month renewal. While "officials" said throughout much of the day that Reid "was likely to bar Republicans from seeking changes, a step that probably would derail the bill," this seemed to change by the end of the day. Bloomberg News (1/9, Hunter, 1.91M) says Reid indicated he is open to cost offsets in exchange for a full-year extension. Reid said, "There are a number of senators who are having productive conversations about reasonable offsets. We'll see where we are in the morning."

USA Today (1/9, Page, 5.82M) reports senior White House adviser Dan Pfeiffer also "had an offer" for Republicans on Wednesday, saying that if they pass a three-month extension now, President Obama "will negotiate ways to offset the costs of extending them for the full year." In an interview, Pfeiffer said, "We're happy to engage in conversations about how to do it; there are lots of ways to do it."

The Washington Post (1/9, Kane, 4.28M) reports Republicans on Wednesday "offered several proposals for offsetting budget cuts" that would match the costs. Democrats "continued to oppose the alternative budget cuts to justify such a short extension, but they opened the door to finding cuts if the extension was longer." While Republicans provided six of the votes needed to advance the bill Tuesday, the Wall Street Journal (1/9, Hook, Subscription Publication, 5.91M) says without an amendment to offset the cost, those votes might not be there to advance the bill to a final vote – which would also require 60 votes – this week.

Politico (1/9, Everett, 464K) says Democrats "see little reason to have a knockdown, drag-out battle over a three-month extension" when their real goal is a full-year extension, which would cost about \$25 billion. Reid said, "If it's going to be paid for, figure out a year's worth of pay-for. And that would be much better than this nickel-and-dime. If we try to do it for three months paid-for, I would almost bet that it won't get done."

The Hill (1/9, Trujillo, 194K) reports a Quinnipiac poll this week found 58% of respondents support an extension, with 37% opposed, but there were divisions by party. Among Democrats, 83% back an extension while 13% oppose it; among Republicans, 42% back an extension, with 54% opposed. Roll Call (1/9, Rojas, Subscription Publication, 87K) and the CNN (1/9, Barrett, 14.53M) website also have reports.

HOLDER, DUNCAN ANNOUNCE NEW SCHOOL DISCIPLINE GUIDELINES. The AP (1/9, Hefling) reports that Attorney General Holder and Education Secretary Duncan "pressed the nation's schools to abandon" what the Obama Administration "described as overly zealous discipline policies that send students to court instead of the principal's office." Holder "said problems often stem from well-intentioned 'zero-tolerance' policies that can inject the criminal justice system into school matters. 'A routine school disciplinary infraction should land a student in the principal's office, not in a police precinct,' Holder said." In a letter accompanying the new guidelines, the Administration also identified a racial component to the problem, saying, "In our investigations, we have found

cases where African-American students were disciplined more harshly and more frequently because of their race than similarly situated white students.”

The New York Times (1/9, Subscription Publication, 9.61M) reports that Holder and Duncan “recommended public school officials use law enforcement only as a last resort for disciplining students.” The guidelines “outlined approaches – including counseling for students, coaching for teachers and disciplinary officers, and sessions to teach social and emotional skills – that could reduce the time students spend out of school as punishment.”

The Washington Post (1/9, George, 4.28M) reports that Holder and Duncan appeared at Frederick Douglass High School to announce the guidelines, which were “described as the first national guidelines on school discipline.” Baltimore has been “lauded for a major reduction in student suspensions in recent years,” and Federal officials “also praised Maryland leaders for proposing reforms to state discipline policies, which are expected to come for a vote later this month.” Holder and Duncan “emphasized that safety and order are a priority in schools but said too many resort to suspension, expulsion or arrest for problems that could be handled in more constructive ways.”

The Los Angeles Times (1/9, Watanabe, 3.07M) reports that the guidelines note that black students without disabilities “were three times more likely than white peers to be expelled or suspended.” Holder and Duncan “said they would actively enforce federal laws against bias in school discipline practices, reporting that they had received 1,600 complaints since 2009 and had launched several reviews of school districts.”

The Baltimore Sun (1/9, Green, 812K) reports that Duncan “said the effort was prompted by years of research illustrating how discipline is ‘not applied as effectively as it could be across our nation’s schools,’” and he said “that around the nation, where nonviolent offenses make up roughly 95 percent of out-of-school suspensions, the over-reliance on suspensions is clear. ‘The need to rethink and redesign school discipline practices is, frankly, long overdue,’ Duncan said. ‘Too many schools resort too quickly to exclusionary discipline, even for minor misbehavior.’” Holder said that “while the guidelines aren’t enforceable, his office would continue to pursue any complaints about racial discrimination in discipline policies.”

The Christian Science Monitor (1/9, Paulson, 540K) reports that the guidelines “emphasize the need for a positive school climate and supports, clear and appropriate expectations and consequences, and equity in discipline policies.” The Monitor notes that many “tough zero-tolerance policies – and increased involvement of law enforcement in schools – began 15 years ago in the wake of the Columbine school shooting” and have “increasingly been under attack by education experts and sociologists who see them as ineffective and potentially damaging to students.” The Monitor adds that some school district in recent years “have started rolling back such policies and allowing for increased discretion by officials and more positive alternatives to suspensions or expulsions.”

The Chicago Sun-Times (1/9, Schlikerman, 1.15M) reports that in Chicago, “although black students in 2009 made up 45 percent of CPS’ enrollment, 76 percent of all CPS students who received out-of-school suspensions were black, according to Department of Education data,” and when “it came to expulsions, black students made up 80 percent of those who were expelled.”

The Hill (1/9, Goad, 194K) reports that the guidelines drew praise from the American Civil Liberties Union, “which offered research showing that black students make up 36 percent of those expelled, though they represent only 15 percent of students.”

Editorial Wrap-Up:

NEW YORK TIMES. “*Gov. Cuomo Begins His Campaign.*” The New York Times (1/9, Subscription Publication, 9.61M) in an editorial calls Gov. Andrew Cuomo’s State of the State address “a campaign speech for re-election,” noting particularly a proposal “to cut taxes by \$2 billion over the next three years.” The paper says the proposal is certainly “good politics,” but may also “mean less money for education, housing and other vital state services.” While the governor “wants to end New York’s reputation as a high-tax state,” the Times wonders “whether he can do that without making life worse for communities staggering through hard times.”

"The Bully Was A Dupe." The New York Times (1/9, Subscription Publication, 9.61M) says in an editorial that New Jersey Gov. Chris Christie "has explanations to make, apologies to give and an administrative house to clean now that his top aides and political cronies were shown to have been fully and gleefully aware of the chaos they caused." Christie "can start by getting rid of every one of his aides and cronies who knew about this scheme and show what actions he will take against the person with ultimate responsibility for his administration: himself."

"Abortion Restrictions In Texas And Beyond." In an editorial, the New York Times (1/9, Subscription Publication, 9.61M) laments the "tenuous state of women's basic right to make their own childbearing decisions," noting a "surge of anti-abortion measures – in the guise of health and safety protections or based on a scientifically dubious theory of fetal pain – approved in Republican-controlled states over the past three years." The restrictions will "make it more difficult for women in many regions to obtain an abortion," and the Times argues that "supporters of abortion rights will need to fight harder and more nimbly than ever on three fronts – in the courts, in legislatures and at the ballot box."

WASHINGTON POST. *"Rodman's Flagrant Foul Behavior."* The Washington Post (1/9, 4.28M) editorializes against "Former NBA star Dennis Rodman" for "serving as a propagandist for one of the world's cruelest and most brutal dictators, Kim Jong-un of North Korea." It also says that Rodman's behavior may help convince Kim that "he doesn't need to free" American Kenneth Bae "in order to win good will in the United States."

"Utah's Marriage Purgatory." An editorial in the Washington Post (1/9, Board, 4.28M) argues that Utah Gov. Gary Herbert's decision not to recognize the gay marriages until a Federal appeals court rules is "not the fair answer, and Utah's same-sex married couples should challenge it." Noting that a final court decision could be years away, the Post says it would be "reasonable to let the licenses persist normally as long as the question of their legality is open." The Post adds that the state should "render the unfolding legal fight unnecessary by ridding itself entirely of its discriminatory ban."

"Closing The Barn Door." The Washington Post (1/9, 4.28M) says in an editorial that "the cash and gifts showered on [Virginia Gov. Robert McDonnell] and his family by a favor-courting businessman have tainted his governorship, undercut his political prospects and embarrassed" Virginia. Proposed reforms to the state's ethics laws "are fine as far as they go – but they don't go far enough." The Post likes "a \$250 ceiling on so-called tangible gifts from lobbyists and favor-seekers" but dislikes a lack of proposals for campaign finance laws, which the Post says "contain loopholes of epic proportions."

WALL STREET JOURNAL. *"Gates On Obama."* The Wall Street Journal (1/9, Subscription Publication, 5.91M), in an editorial, says that, for the most part, former Defense Secretary Robert Gates has merely confirmed what was already conventional wisdom in Washington regarding the President's foreign policy.

"Christie's Credibility." The Wall Street Journal (1/9, Subscription Publication, 5.91M) says in an editorial that the scandal surrounding New Jersey Gov. Chris Christie's staff has national implications and tests Christie's credibility as he introduces himself to the national electorate. The Journal says President Obama has used his power to attack political opponents, and Republicans do not need a standard-bearer who seems open to doing the same.

"Supreme Spin Cycle." The Wall Street Journal (1/9, Subscription Publication, 5.91M) editorializes that the Supreme Court will soon decide whether it will hear the cases of *Whirlpool v. Glazer* and *Sears v. Butler*, both of which concern the certification of class-action lawsuits when many class members have suffered no harm. The court last year vacated lower-court decisions in both cases and remanded them in light of its ruling in *Comcast v. Behrend*, which abridged the standards for certifying class actions. In both cases, the lower courts simply reinstated their previous decisions. The Journal urges the court to stand up for judicial precedence and strike down the lower courts' rulings.

Washington Schedule:

TODAY'S EVENTS IN WASHINGTON.

White House:

PRESIDENT OBAMA – The President and the Vice President receive the Presidential Daily Briefing; the President and the Vice President meet with Members of Congress to discuss the Administration's ongoing review of signals intelligence programs, the Roosevelt Room, closed press; the President will deliver remarks announcing the first five "Promise Zones," located in San Antonio, Philadelphia, Los Angeles, Southeastern Kentucky, and the Choctaw Nation of Oklahoma; the President and the Vice President meet with Secretary of the Treasury Lew, Oval Office, closed press. Notes: Press Briefing by Press Secretary Jay Carney.

VICE PRESIDENT BIDEN – No public schedule.

US Senate: 10 a.m. – The Senate convenes and begins a period of morning business.

COMMITTEE MEETINGS

JUDICIARY – 9:30 a.m. An Executive Business Meeting on pending nominations and legislation. Location: 226 Dirksen.

FOREIGN RELATIONS – 10:15 a.m. Hearings to examine the situation in South Sudan. Panel I: Linda Thomas-Greenfield, Assistant Secretary of State for African Affairs, Department of State; Nancy Lindborg, Assistant Administrator, Bureau of Democracy, Conflict, and Humanitarian Assistance, United States Agency for International Development (USAID). Panel II: Princeton Lyman, Former Special Envoy for Sudan, United States Institute of Peace; John Prendergast, Co-founder, Enough Project; Kate Almquist Knopf, Adjunct Faculty, Africa Center for Strategic Studies, National Defense University. Location: 419 Dirksen.

INTELLIGENCE – 2:30 p.m. Closed hearings to examine certain intelligence matters. Location: 219 Hart.

US House: 10 a.m. – The House will meet for Morning Hour debate and 12:00 p.m. for legislative business. First votes expected: 1:30 – 2:30 p.m. Last votes expected: 4:30 – 5:30 p.m.

CONGRESSWOMAN NORTON – ABORTION FUNDING – 9 a.m. Press Conference with Congresswoman Eleanor Holmes Norton (D-DC) and Congressman Jerrold Nadler (D-NY) on H.R. 7, the No Taxpayer Funding for Abortion Act. also with District of Columbia Mayor Vincent C. Gray. Location: 234 Cannon. Contacts: Daniel van Hoogstraten, 202-225-8050

REP PELOSI BRIEFING – 10:45 a.m. Democratic Leader Nancy Pelosi holds her weekly press conference. Location: HVC Studio A (Enter through HVC-117), Capitol Visitor Center. Contacts: Drew Hammill, 202-226-7616

BOEHNER PRESS BRIEFING – 11:30 a.m. House Speaker John Boehner (R-OH) will hold an on-camera press briefing. Location: Capitol Visitor Center HVC Studio A, HVC 114.

COMMITTEE MEETINGS

OVERSIGHT AND GOVERNMENT REFORM – 9:30 a.m. Full Committee hearing: "Waste in Government: Whats Being Done?" Location: 2154 Rayburn.

ENERGY AND COMMERCE – 10 a.m. Subcommittee on Health hearing on "The Extenders Policies: What Are They and How Should They Continue Under a Permanent SGR Repeal Landscape?" Location: 2123 Rayburn.

FINANCIAL SERVICES – 10 a.m. Monetary Policy and Trade Subcommittee hearing on the effects of the Federal Reserve's current Quantitative Easing program on the international financial system. Location: 2128 of the Rayburn

JUDICIARY – 10 a.m. Subcommittee on the Constitution and Civil Justice hearing on: H.R. 7, the No Taxpayer Funding for Abortion Act. Location: 2141 Rayburn.

NATURAL RESOURCES – 10 a.m. Full committee Oversight Hearing on “Obama Administration’s War on Coal: The Recent Report” by the Office of the Inspector General. Witness: Robert A. Knox, Assistant Inspector General for Investigations, Office of Inspector General, US Department of the Interior. Location: 1324 Longworth.

SCIENCE, SPACE AND TECHNOLOGY – 10 a.m. Subcommittee on Research and Technology hearing on “Private Sector Programs that Engage Students in STEM.” Witnesses: Panel I: Dean Kamen, Founder, For Inspiration and Recognition of Science and Technology (FIRST), Founder and President, DEKA Research & Development Corporation; Hadi Partovi, Co-founder and CEO, Code.org; Dr. Kemi Jona, Director, Office of STEM Education Partnerships, Research Professor, Learning Sciences and Computer Sciences, Northwestern University; Dr. Phillip Cornwell, Vice President for Academic Affairs, Professor of Mechanical Engineering, Rose-Hulman Institute of Technology. Panel II: Ellana Crew, 12th Grade, South River High School, Edgewater, Maryland; Brian Morris, 12th Grade, Chantilly Academy, Chantilly, Virginia; Daniel Nette, 11th Grade, George Mason High School, Falls Church, Virginia; Vishnu Rachakonda, 12th Grade, Eleanor Roosevelt High School, Greenbelt, Maryland. Location: 2318 Rayburn

FOREIGN AFFAIRS – 2 p.m. Subcommittee on Africa, Global Health, Global Human Rights, and International Organizations Hearing: Will there be an African Economic Community? Witnesses: Amadou Sy, Ph.D., Senior Fellow, Africa Growth Initiative, The Brookings Institution; Stephen Lande, President, Manchester Trade; Peter Quartey, Ph.D., Senior Research Fellow, Institute of Statistical, Social and Economic Research, University of Ghana. Location: 2172 Rayburn.

Other: **AMERICAN ASTRONOMICAL SOCIETY 223RD MEETING** – Jan. 5 – 9. “AAS 223: A Stimulus Package for Astronomy in the Nation’s Capital.” All briefings will be streamed on AAS’s website, accessible to registered journalists. During the five-day meeting, NASA scientists and their colleagues will present briefings on noteworthy discoveries – made possible by NASA’s astrophysics spacecraft – including the detection of unusually bright young galaxies, new gravitational lens findings, and black hole events in dwarf galaxies. Location: Gaylord National Hotel & Conference Center, 201 Waterfront Street, National Harbor, MD.

IAA SPACE EXPLORATION CONFERENCE – “Planetary Robotic and Human Spaceflight Exploration.” Held by the International Academy of Astronautics. Location: Ronald Reagan Building and International Trade Center. 1300 Pennsylvania Ave., NW.

ABA – CONSUMER DELINQUENCY DATA – 12:01 a.m. The American Bankers Association will release the 3rd Quarter 2013 Consumer Credit Delinquency Bulletin containing delinquency data for several consumer loan categories. James Chessen, ABA chief economist, will be available for interviews. NOTE: Print and broadcast interviews may be booked in advance. Contacts: quarterly Delinquency Bulletin bbermste@aba.com Jeff Sigmund jsigmund@aba.com ((202) 663-5439)

ABA – REP. KING – 8 a.m. – 9 a.m. The ABA Standing Committee on Law & National Security hosts breakfast program with a keynote address from Congressman Peter King. Location: University Club, 1135 16th St. NW. Notes: RSVP by Jan. 6 to david.pulaski@americanbar.org.

TREASURY – DICK GREGG – 9 a.m. Panel Discuss with Fiscal Assistant Secretary Dick Gregg, at the Association of Government Accounts’ Federal Financial Systems Summit. Location: The Walter E. Washington Convention Center 801 Mt Vernon PI NW

CSIS – MATERNAL HEALTH PROGRAMS – 9 a.m. – 11:30 a.m. “Saving Mothers, Giving Life: A Year of Results and Lessons Learned.” CSIS will be joined by senior leaders from Saving Mothers, Giving Life for a discussion of the initiative’s vision, approach, delivery, impact and future challenges and opportunities. The event will feature Dr. Rajiv Shah, Administrator, USAID, and Dr. Thomas Frieden, Director, Centers for Disease Control and Prevention, among others. Location: Center for Strategic and International Studies, 1616 Rhode Island Ave. NW. Contacts: H. Andrew Schwartz (aschwartz@csis.org), 202-775-3242.

ENROLL AMERICA SURVEY OF THE UNINSURED – 10 a.m. Healthcare enrollment coalition Enroll America holds press call to announce the results of a national survey of what uninsured consumers are hearing and

thinking about the Health Insurance Marketplace midway through the first open enrollment period. The survey was conducted in late December by PerryUndem. Speakers: Anne Filipic, President of Enroll America; John Gilbert, National Field Director of Enroll America; Tresa Undem, Partner at PerryUndem. Contacts: Justin Nisly Press@EnrollAmerica.org (202-601-2494)

BROOKINGS – HUMANITARIAN CRISES – 10 a.m. – 11:30 a.m. The Brookings-LSE Project on International Displacement and Doctors Without Borders/Medecins Sans Frontieres (MSF) will host a discussion, "Humanitarian Crises in 2013: Assessing the Global Response," looking back at 2013 and assess how well the international community responded to crises in 2013 with a particular focus on Syria – a high-profile crisis – and the Central African Republic – a low-profile crisis – as well as the particular thematic issue of access to healthcare during crises. Panelists will include Sophie Delaunay, executive director of MSF in the United States; Antoine Gerard from the U.N. Office for the Coordination of Humanitarian Affairs; Iain Levine from Human Rights Watch; and Francois Stamm from the International Committee of the Red Cross. Senior Fellow Elizabeth Ferris, co-director of the Brookings-LSE Project on Internal Displacement, will provide introductory remarks and moderate the discussion. Location: Falk Auditorium, 1775 Massachusetts Ave. NW. Contacts: Brookings Communications (events@brookings.edu), 202-797-6105

NPC – NATIONAL GUARD – 12:30 p.m. Gen. Frank J. Grass, member of the Joint Chiefs of Staff and chief of the National Guard Bureau, will address issues facing the National Guard at a National Press Club luncheon. This is a ticketed event. Location: National Press Club, 529 14th Street NW. Contacts: reservations@press.org, 202-662-7501.

Last Laughs:

LATE NIGHT POLITICAL HUMOR.

David Letterman: "By God, you know, did you hear about this? Chris Christie was having a feud...with the mayor of Fort Lee, New Jersey. So, he closed down the George Washington Bridge. It was traffic snarled up for hundreds of miles. Day after day. I'm telling you, this guy, you can't say power hungry without hungry, you know what I mean."

Stephen Colbert: "Folks, huge news tonight. The President of the United States of New Jersey, Chris Christie, is in hot water. ... New emails link top aides in the Christie Administration to a shutdown on the George Washington Bridge back in September. It was traffic on a biblical scale, with New Jersey highways backed up for days, which is slightly longer than normal."

Stephen Colbert: "Now, it turns out, turns out, folks, that the lane closures were meant to make life hell as payback to the mayor of [Fort Lee] New Jersey for not endorsing Christie for re-election. No word yet on what the rest of New Jersey is payback for."

Jimmy Fallon: "President Obama's former Defense Secretary, Robert Gates, has written a new memoir where he says that Joe Biden has been wrong on almost every foreign policy issue in the last 40 years. Yeah. Says he's awful when it comes to foreign countries. Then Biden was like, 'Hey, is this about the time I got lost at Epcot?'"

Jimmy Fallon: "Some more news out of Washington. The White House is planning to air some ads for Obamacare during the Winter Olympics next month. It makes sense, if you think about it. Obamacare went downhill fast, left people cold, and then, somehow, it managed to skate by. That's good marketing right there."

Jimmy Fallon: "In fact, the Olympics are a lot like Obamacare, you know, because they both take around four years to get it together."

Jimmy Fallon: "I see that the First Lady, Michelle Obama, is still in Hawaii and get this, she's staying at Oprah's house. And Oprah's not there, but she did leave a list of housesitting instructions for the first lady. Take a look. First, she says, 'Sorry, the living room is a mess, but feel free to use any of the other 37 living rooms.' Next, she says, 'The keys to the helicopter are in the second helicopter.' Next, she says, 'If you feel like

watching a movie, just have Steven Spielberg write and direct one for you.' And finally, 'Don't talk to the human chess set in the backyard. That's just common.'"

Jimmy Fallon: "Here's some more political news. New Jersey Governor Chris Christie just signed a major pro-immigration bill yesterday. Christie said everyone deserves a chance, no matter if you're a Mexican, Asian, Indian, Italian or any other kind of restaurant or person."

Jay Leno: "And Congressman Jack Kingston of Georgia. He is coming under attack for suggesting that poor students who are part of the school lunch program – that they should be forced to do janitorial work around the school. So they can learn that there is no such thing as a free lunch. And believe me, if anybody knows about getting a free lunch, it's a United States Congressman. Okay, please."

Conan O'Brien: "Critics are accusing President Obama of having attention deficit disorder. He responded to the accusation by saying, 'That is ridiculous. Look, a bird. No, just waiting.'"

Conan O'Brien: "A member of Congress said that unemployment benefits basically pay people to not work. Yeah. He said the only people who should be paid for not working are members of Congress."

DOI in the News:

SECRETARY JEWELL VISITS EVERGLADES. The Highlands (FL) Today (1/10, 11K) reports that "as part of the Obama administration's commitment to restore and protect the Everglades," Interior Secretary Sally Jewell "marked the progress and met with regional stakeholders" at the Durando Ranch. Jewell "met with ranchers and private landowners to discuss next step: the January 2012 establishment of the Everglades Headwaters National Wildlife Refuge and Conservation Area."

The Orlando (FL) Sentinel (1/9, 780K) reports that Jewell, during her visit to Florida on Thursday, "didn't have news that her agency was ready yet to buy land as part of a planned 150,000-acre Everglades National Wildlife Refuge." However, Jewell promised "this will get done." According to the article, "no specifics were provided, but Jewell said purchases would begin later this month."

Additional coverage of Jewell's trip to Florida was provided by the [Los Angeles Times](#) (1/8, Gibson, 3.07M), [The Florida Current](#) (1/10), the [Fort Myers \(FL\) News-Press](#) (1/10, 210K), the [Fort Myers \(FL\) News-Press](#) (1/8, 210K), and [WGCU-FM Fort Myers, FL](#) (1/10).

SECRETARY JEWELL ANNOUNCES LAUNCH OF "21ST CENTURY CONSERVATION SERVICE CORPS."

The [E&E Daily](#) (1/8) reports that Interior Secretary Sally Jewell has announced the launch of "a public-private partnership aimed at getting young people and military veterans involved with conservation work." To kick off the program, "clothing retailer American Eagle Outfitters will donate \$1 million to the 21st Century Conservation Service Corps initiative, whose goal is to create 100,000 jobs for young people and veterans by 2017 and get 1 million people to volunteer on public lands every year." Jewell said she hopes the "initial investment will encourage other companies, organizations and philanthropists to commit to the initiative, whether through financial means or volunteering."

Additional coverage was provided by [NPR](#) (1/10, Shogren, 465K), the [Sierra \(CA\) Sun Times](#) (1/10), the [Earth Island Journal](#) (1/10, Mark, 213), and [WEVO-FM Concord, NH](#) (1/10, 2K).

SECRETARY JEWELL TO VISIT COLORADO TO OBSERVE SAGE GROUSE MITIGATION EFFORTS. The [Denver Post](#) (1/10, Hickenlooper, 949K) prints the prepared text of the speech that Gov. John Hickenlooper gave on the floor of the Colorado Capitol on Jan. 9, 2014. In his speech, Hickenlooper asserted that "we can protect the sage grouse while at the same time allowing ranches, farms and other economic activity to flourish." He noted that "at our invitation, Secretary of the Interior Sally Jewell has agreed to visit Colorado and observe mitigation efforts firsthand."

The speech also appeared at the [Atlanta Journal-Constitution](#) (1/10, 1.26M), the [Danbury \(CT\) News Times](#) (1/10, 140K), the [Colorado Independent](#) (1/10, 158), and [KDVR-TV Denver](#) (1/9, 40K).

OBAMA ORDERS BROAD REVIEW OF ENERGY INFRASTRUCTURE. The "E2 Wire" blog of The Hill (1/10, Barron-Lopez, 194K) reports that yesterday President Obama "ordered a sweeping review of energy strategy that will involve departments and agencies across the federal government." The President "announced the review as part of his climate agenda, and as promised in his Georgetown speech last year, the Quadrennial Energy Review will focus on the nation's infrastructure." In a statement on Thursday, the White House said "as crude oil domestic production reaches a near 20-year high, and the natural-gas industry continues to boom, the U.S. must address its aging infrastructure."

The AP (1/10) reports the review will be co-chaired by top White House officials "but the Energy, Interior, Agriculture and other departments will participate, along with the Treasury and the Pentagon. Business groups, local governments and academics will also participate."

The National Journal (1/10, Foran, Subscription Publication, 427K) reports that according to a blog post by White House written by Energy Secretary Ernest Moniz, John Holdren, White House Office of Science and Technology Policy director and Cecilia Munoz, White House Domestic Policy Council director: "Over four years, successive installments of the QER will provide a comprehensive set of recommendations on how best to transform America's energy production, delivery, and consumption systems to meet the challenges of the 21st century. The QER will identify important opportunities to modernize, expand, replace, or transform our energy infrastructure system so that it better accommodates changes in energy supply, integrates cutting-edge information and security technologies, and meets increasing demand for new consumer services."

Reuters (1/10, Mason, Volcovici) also provides coverage of this story.

MONTANA MULLS TAKING CONTROL OF FEDERAL LANDS. The [Billings \(MT\) Gazette](#) (1/10, 206K) reports that "spiced discussions took place in the Capitol Wednesday on whether Montana should attempt to wrest ownership of public lands from the federal government." Ken Ivory, "a Utah state representative and attorney, urged members of the Environmental Quality Council to continue down its path of investigating whether Montana should try to assume ownership and management of some or all of the federal lands in the Treasure State." However, Tom France, an attorney with the National Wildlife Federation, "urged the EQC to step back from legal or legislative actions that Ivory touted, saying that approach will pull the West apart."

Also providing coverage are the [Helena \(MT\) Independent Record](#) (1/10, 45K) and the [Montana Standard](#) (1/10, 41K).

LAND WATER CONSERVATION FUND MONEY WOULD AID PROJECTS IN COLORADO. The [Cortez \(CO\) Journal](#) (1/9, 646) reports that the bipartisan budget agreement passed by Congress Dec. 21 “proposes that Congress budget \$600 million towards the Land Water Conservation Fund.” According to the article, “pending successful appropriation bills, Colorado is listed for funding on five projects, four of which are in the southwest corner of the state.” The article notes that “over the last four decades, Coloradoans have invested approximately \$231 million from LWCF to expand public access to streams, conserve working ranches, and protect iconic landscapes in the Rockies.”

ALASKA SUPER PAC HITS SEN. BEGICH IN THREE RADIO ADS. [Roll Call](#) (1/10, Trygstad, Subscription Publication, 87K) reports that “an Alaska-based super PAC supporting one of Democratic Sen. Mark Begich’s Republican challengers is launching its first three ads of the campaign on Friday.” The article notes that “each of the three 60-second ads mentions Begich’s support of Obamacare,” and “one also notes the incumbent’s support of Obama’s appointees, including Interior Secretary Sally Jewell, and questions where he stands on an oil tax reform referendum in the state this year.”

INTERIOR’S TWITTER ACCOUNT LAUDED. For the [Travel Pulse](#) (1/10), Thea Klapwald commends the Interior Department for “putting resources towards social media and the intelligent use of Twitter.” Klapwald writes that “the photos from @Interior remind me how much I haven’t seen – and how much of it is in my own, relatively speaking, close backyard.” She notes that Tim Fullerton, director of digital strategy, sends “out photos twice a day,” and “once on weekends.”

SOLUTION PROPOSED FOR THE SALTON SEA. For the [Imperial \(CA\) Valley Press](#) (1/10, Stewart, 46K), Colt Stewart, a former senior consultant to the Assembly Sub-Committee on Energy for the California State Legislature, proposes a solution for the Salton Sea. Stewart suggests that “the Imperial Irrigation District, IID, and Coachella Valley Water District, CVWD, create a new Joint Powers Authority, JPA, backed by their combined assets (\$4 billion) to build, operate and maintain the canal/desalination/water treatment project transporting ocean water from Sea of Cortez to the Salton Sea.” Also, he proposes that the Interior Department and State of California Department of Water Resources “guarantee the purchase of 200,000 acre-feet of desalinated water per year from them at \$2,000/acre-feet, \$400 million/year for 20 years.”

DARK MONEY TRAIL TO JOHN PODESTA TRACED. For the [Washington Examiner](#) (1/10, Arnold, 319K), Ron Arnold traces the dark money that “feeds” John Podesta’s Center for American Progress and its Action Fund to determine what Podesta will do during his “one-year-only stint on the White House staff as a counselor to President Obama.” He notes that “three weeks after Obama announced Podesta’s appointment, Interior Secretary Sally Jewell announced the award of nearly \$7 million for 50 projects that will do research ‘to prepare our communities for the impacts of climate change.’” The same day, Arnold notes, “Podesta’s CAP released a detailed, 6-point policy brief for totally redirecting the Interior Department’s Bureau of Land Management – the nation’s largest land-management agency – to kill anything to do with fossil fuels and resource production based on ‘new public opinion data.’”

America’s Great Outdoors:

National Park Service:

ENVIRONMENTAL GROUP DEPLORES PARK FUNDING CUTS. The [Durango \(CO\) Herald](#) (1/9, 28K) reports that a new analysis by Environment America, titled “Death by a Thousand Cuts,” addresses the challenges facing national parks as a result of mounting funding cuts to the NPS. According to the report, “a 13 percent reduction in its operating budget over the past three years has seriously curtailed the ability of the National Park Service to maintain critical wildlife habitat, keep up recreational facilities and protect natural resources.”

The [Wicked Local \(MA\)](#) (1/10, 84K) reports that Sen. Edward Markey said, “National parks are known as one of America’s best ideas. But now America’s national parks are under attack by one of America’s worst ideas, the sequester. Members of Congress and past presidents of both political parties supported and nurtured our national

parks for more than a century. We are just two years away from celebrating the centennial of the National Park Service. We should be reaffirming our commitment to National Parks and the economic, environmental and cultural benefits they provide, not cutting their budgets.”

Also reporting on the story is the [Augusta \(VA\) Free Press](#) (1/10, 280).

Poll Finds Voters Against Cuts To National Park System. The [Outdoor USA Magazine](#) (1/10) reports that “four out of five voters don’t want to see funding for national park services cut, despite federal budget problems, according to a survey from the National Forest Foundation (NFF).” The article also notes that “the poll revealed that as the cost of fighting wildfires has climbed dramatically in recent years, a strong majority of Americans feel a close connection to the national forest system.”

TRIBES RECEIVE \$2.2 MILLION IN HISTORIC PRESERVATION GRANTS. The [Indian Country Today Media Network](#) (1/10, 21K) reports that “more than 100 tribal nations will share \$2.2 million in federal grants for historic preservation.” The NPS “announced Thursday that the annual Tribal Historic Preservation Office fund will distribute partial grant awards to 135 tribes.” In a statement, NPS Director Jonathan B. Jarvis said, “Tribal historic preservation offices are the fastest growing preservation partnerships within the national historic preservation program, showing the value that tribes place on preserving historic places and protecting tribal cultural traditions. These grants allow tribes to focus on what they are most concerned with protecting – Native language, oral history, plant and animal species important in traditions, sacred and historic places, and the establishment of tribal historic preservation offices.”

EFFORT TO ESTABLISH NATIONAL PARK IN MAINE FACES RESISTANCE. The [New York Times](#) (1/10, Seelye, Subscription Publication, 9.61M) reports on the effort spearheaded by Lucas St. Clair, and his mother Roxanne Quimby, to create a national park with land adjacent to Mount Katahdin. The Times says that the process of creating a national park is difficult, and notes that only 59 sites have received the designation. A major problem is local opposition from the region’s residents, as there is a “towering distrust here of the federal government.” Many worry that the Federal government would “seize control of local decision making, take over even more land, ban hunting and snowmobiling, and ruin the forest products industry by restricting air emissions from the mills and limiting the timber supply.”

INBREEDING FOUND IN SOUTHERN CALIFORNIA MOUNTAIN LIONS. The [Washington Post](#) (1/9, Press, 4.28M) reports that “three mountain lion kittens born last month in the Santa Monica Mountains were inbred, a wildlife expert said, marking a troubling sign for a population penned in by the urban sprawl of metropolitan Los Angeles.” According to the Santa Monica Mountains National Recreation Area, “preliminary DNA tests indicate that the male and two females born in the Malibu Springs area were sired by an adult male and his daughter.”

Also reporting on the story is [WOOD-TV](#) Grand Rapids, MI (1/10, 129K).

EIGHT TENNESSEE SITES ADDED TO NATIONAL REGISTER OF HISTORIC PLACES. The [Chattanooga](#) (1/10, 17K) reports that eight Tennessee sites have been added to the National Register of Historic Places. The sites include the Beaty General Merchandise Store, the Crockett Tavern Museum, the Greenback Depot, the M.A. Helm House, the Rocky Springs Presbyterian Church, the Sears, Roebuck and Company Catalog Distribution Center and Retail Store, the Wartburg Presbyterian Church, and the Westmoreland Water Wheel and Gatepost.

Bureau of Land Management:

BLM SEEKS TO BUY PRIVATE PARCELS IN AGUA FRIA MONUMENT. The [Prescott \(AZ\) Daily Courier](#) (1/10, 42K) reports that “with thousands of acres of private parcels inside the Agua Fria National Monument,” BLM officials are “excited about finalizing an effort to buy two 40-acre parcels that were on the market for possible development.” The bureau is currently “preparing to analyze potential impacts of the Cross Y Ranch purchase, and is seeking public comments by Friday.” BLM officials would “like to purchase more of the ranch in the future, except for 97 acres that contain buildings.”

BLM APPROVES GOLD MINING PROJECT IN TOOELE COUNTY. The [Deseret \(UT\) News](#) (1/10, 274K) reports

that the BLM has determined that a gold-mining project in Tooele County would have no significant environmental impact. The BLM Utah Salt Lake Field Office "signed the decision record approving the Kiewit Mine Project, about 43 acres of federal land surface disturbance associated with the mine 4 miles southeast of Gold Hill."

Also reporting on the story are the [Provo \(UT\) Daily Herald](#) (1/10, 102K) and the [Seattle Post-Intelligencer](#) (1/10, 768K).

BLM CITES DRY WEATHER FOR FIRE RESTRICTIONS. The [Sacramento \(CA\) Bee](#) (1/9, 749K) reports that "citing the unusually dry winter," the BLM "announced it will implement fire restrictions on public lands the agency manages in El Dorado, Amador, Sacramento, Calaveras, Tuolumne and Mariposa counties." The restrictions start "Friday and will remain in effect until further notice."

Also reporting on the story is the [Stockton \(CA\) Record](#) (1/9, 123K).

HAINES HELI-SKI OPERATOR SAYS LAND ENCROACHMENTS WERE "MINOR". The [Fairbanks \(AK\) News-Miner](#) (1/10, 44K) reports that "a Haines helicopter ski operation that has agreed to plead guilty to unauthorized use of BLM land says the encroachments were "minor, infrequent and unintentional." Southeast Alaska Backcountry Adventures said the "intent of the plea agreement is to ensure payment of fees that would have been paid to" the BLM "for recreational access by SEABA onto BLM property."

Also reporting on the story is the [Anchorage \(AK\) Daily News](#) (1/9, 198K).

NEW MEXICO PLANS TO RELOCATE NEARLY 200 PRONGHORN. [KOB-TV](#) Albuquerque, NM (1/10, 59K) reports that New Mexico wildlife officials "plan to capture and relocate almost 200 pronghorn from a northern New Mexico ranch." Game and Fish Department officials will "relocate most of the pronghorn to national forest land near Fort Stanton and to Bureau of Land Management land northwest of Roswell."

ADDITIONAL COVERAGE OF WILD HORSES ISSUE. Additional coverage of the wild horse issue was provided by the [Decoded Science](#) (1/10, 1K).

Fish and Wildlife Service:

ARKANSAS OFFICIAL WARNS "CRITICAL HABITAT" DESIGNATION COULD AFFECT LANDOWNERS. The Batesville Daily Guard (1/10) reports that "areas in Arkansas have recently been designated critical habitats for endangered species and opponents fear the designation will restrict property owners." Jeff Sikes, legislative director for the Association of Arkansas Counties (AAC), said "it's worse than the National Blueway designation — and one the state will not be able to get out of."

DUCK STAMP PROGRAM ACCEPTING ENTRIES. The [Sioux City \(IA\) Journal](#) (1/10, 15K) reports that the FWS at D.C. Booth Historic National Fish Hatchery is "inviting students to learn about wildlife conservation and express their creativity by entering the 2014 Junior Duck Stamp competition."

AUCTION FOR RIGHT TO KILL BLACK RHINO CRITICIZED. In an op-ed for the [Dallas Morning News](#) (1/10, Pacelle, 1.13M), Wayne Pacelle, president and CEO of the Humane Society of the United States, criticizes the Dallas Safari Club for "auctioning the right to kill a black rhino in Namibia." Pacelle argues that the US should not "be abetting the cash-for-trophies scheme, especially when US law is supposed to provide disincentives for killing rare species by blocking imports of animal parts from creatures listed as endangered." According to Pacelle, "the Endangered Species Act allows endangered species to be imported if the import 'enhances' the survival of the species," but the FWS has "a flawed policy where such permits are granted if a hunter simply offsets his otherwise illegal activity with a financial contribution."

REEXAMINATION OF ENDANGERED SPECIES ACT URGED. The [Dallas \(OR\) Chronicle](#) (1/9, 40K) editorializes that the Endangered Species Act deserves "a thorough re-examination of a law that is both still valuable and seriously outdated." For instance, the paper wonders "whether it is time to engage in a kind of ESA triage, to borrow a term from emergency medicine." This would mean that "instead of throwing a lot of money at a few charismatic species like tigers and pandas, scientists would make a rational effort to prioritize species that have

the best chance of surviving.”

US Geological Survey:

USGS COULD LEARN CAUSE OF TEXAS QUAKES WITHIN MONTHS. The [Environment & Energy Publishing](#) (1/10, 705) reports that the USGS “may know within two months whether the earthquakes around Azle, Texas, can be linked to natural gas drilling activity.” USGS and researchers from Southern Methodist University have “set up instruments to monitor earthquakes around Azle, about 20 miles northwest of Fort Worth.” Art McGarr, a researcher with USGS, said in an interview Tuesday, “We don’t know whether there’s a direct connection. With some analysis, we should be able to determine this within a month or two.”

Securing America’s Energy Future:

Renewable Energy:

PHILLIPS: WIND TAX CREDIT “SUCCEEDED.” Matthew Phillips writes in a piece for Bloomberg BusinessWeek (1/9, Philips, 4.93M) that the wind production tax credit “looks to be on its way out, in part because it succeeded in what it set out to do.” During the span of the last five years, “wind has accounted for 36 percent of all new electricity generation installed in the U.S., second only to new natural gas installations” and it “now supplies more than 4 percent of the country’s electricity.” Phillips notes that “the wind tax credit has expired before, including at the end of 2012, but Congress always renewed it.”

Onshore Energy Development:

INTERIOR IG SAYS THERE WAS NO EVIDENCE OF POLITICAL INVOLVEMENT IN BOTCHED COAL REGULATIONS. The “Regwatch” blog of The Hill (1/10, 194K) reports that according to Assistant Interior Department Inspector General Robert Knox in testimony before Congress, “a probe into allegations of Obama administration misconduct in the development of contentious coal mining regulations found failures that cost taxpayers millions of dollars but found no evidence of political interference.” Knox told the House Natural Resources Committee “the agency lost more than \$3.7 million in contract costs in support of a rule designed to protect streams located near coal mines.” The GOP “seized on the botched rule making after revelations that the agency directed the contractor to change the way it calculated the likely coal production and job losses that would result were the regulations to take effect.” Knox said, “There was no evidence that it was politically motivated.”

The [Washington Examiner](#) (1/10, Conger, 319K) reports that Committee chairman Doc Hastings said, “I also must again express my concern that Deputy Inspector General Mary Kendall is withholding information from Congress when the IG is charged with being an independent watchdog for Congress.” Hastings said, “I have been vocal about the mismanagement of the IG’s office under the leadership of Ms. Kendall. As I’ve said before, we need a permanent IG.”

The [Washington Examiner](#) (1/10, Colman, 319K) reports that “Republicans vowed Thursday to push further against findings by the Interior Department’s internal watchdog that the Obama administration’s changes to a study of the jobs impact of a potential rule on mining pollution were not politically motivated.” Hastings “vowed to use the full powers of the panel — including issuing subpoenas for more information — to further assess whether political influence played a role.” He said, “I don’t think this issue is going to go away.”

Also covering the hearing are the [Charleston \(WV\) Gazette](#) (1/9, 154K), [WVVA-TV Bluefield, WV](#) (1/9, 5K), and [WCYB-TV Bristol, VA](#) (1/10, 15K).

Senators Question OSM Statistics. [Politico](#) (1/10, Guillen, 464K) reports that Sens. Joe Manchin, Rob Portman, John Barrasso and Mike Lee has sent a letter to Janice Schneider, the nominee to be the next Assistant Secretary for Land and Management at the Department of the Interior, urging her to promptly address a report that poses serious questions about the integrity of Office of Surface and Mining (OSM). The article notes that on Dec. 20, the Inspector General released a report revealing information that employees of the OSM ordered

contractors to change the method by which they had estimated the 7,000 jobs loss expected to result from OSM's proposed stream rule. The lawmakers urged Schneider to read the report by , promptly address these allegations and help restore the public's confidence in the Department of Interior's rulemaking process.

Also reporting on the story is the [Elkins \(WV\) InterMountain](#) (1/10, 30K).

BLM SAYS BREAK IN PIPE CAUSES OIL WASTEWATER SPILL. The [Great Falls \(MT\) Tribune](#) (1/9, 90K) reports that "a break in a 2½-inch pipeline caused 300 barrels of oil production water to spill on the Blackfeet Reservation on Tuesday," according to the BLM in Great Falls. About "12,600 gallons of 'produced water' is thought to have spilled."

Offshore Energy Development:

BP PROPOSES TRADITIONAL DEVELOPMENT FOR LONG-DELAYED LIBERTY OIL FIELD. The [Alaska Dispatch](#) (1/9, 7K) reports that BP is now hoping to develop its Liberty prospect in the Beaufort Sea "the old-fashioned way – with an artificial island constructed in the shallow and icy sea, with drill pads on that artificial island and with a subsea pipeline carrying produced crude from the wells drilled on that pad to the North Slope main pipeline network onshore." The firm "has submitted an application to federal regulators for approval to work in the Beaufort Sea this spring to scope out potential sites for offshore drill pads and pipelines." According to the article, "the application, filed Dec. 19 with federal regulators at the Bureau of Ocean Energy Management, outlines BP's plans to drill soils in the water and on land, and to examine the seafloor, in operations to be conducted from March to May."

JUDGE ORDERS ATTORNEYS FOR CONVICTED BP ENGINEER TO STOP FURTHER CONTACT WITH JURORS. The AP (1/9) reports from New Orleans that US District Judge Stanwood Duval Jr. on Thursday ordered the attorneys for former BP engineer Kurt Mix "to refrain from any further contact with jurors who convicted" Mix "of trying to obstruct a federal probe of the company's 2010 oil spill in the Gulf of Mexico." Attorneys for Mix "have said they interviewed some jurors after the Dec. 18 verdict and found evidence of juror misconduct that warrants a new trial." Judge Duval "said he is concerned about the 'appropriateness' of lawyers interviewing jurors without his permission," noting that the 5th Circuit Court of Appeals "has 'expressed general hostility toward the practice of post-trial juror interviews.'" Judge Duval "instructed Mix's attorneys and Justice Department prosecutors to submit written arguments by Jan. 24 on whether the defense lawyers' contact with jurors should affect their motion for a new trial."

OIL SPILL FUND TRUSTEES EXTEND DEADLINE FOR PUBLIC COMMENT. The [Biloxi \(MS\) Sun Herald](#) (1/9, 154K) reports that "people who wish to comment on proposed Coast projects funded through BP oil spill settlement money now have an extra 15 days." The Natural Resource Damage Assessment trustees "extended the deadline from Feb. 4 to Feb. 19 after extra time was requested during public hearings in December."

JOLLEY SAYS HE DID NOT LOBBY FOR OFFSHORE OIL LEGISLATION. The Tampa Bay (FL) Times (1/10, Krueger, 78K) reports David Jolley, Pinellas congressional candidate, "said he supports the ban that prevents oil drilling off Florida's Gulf Coast, a perennially important issue in local politics." But Jolley's "facing questions over his own 2011 federal lobbying report, which indicates he lobbied for a House bill designed to expand oil drilling in the gulf and elsewhere." The Times notes, "under the 'specific lobbying issues' listed in his report, Jolly included House Resolution 909, 'A Roadmap for America's Energy Future.'" On Thursday, Jolley said that he "did not lobby for that legislation" but "he felt obligated to list it on his disclosure report because the subject came up during a meeting he attended while lobbying on other issues."

ENERGY ATTORNEYS CRITICIZE PROPOSED RULES FOR OFFSHORE VESSELS. In an op-ed in FuelFix (1/10, 7K) Houston-area energy attorneys James T. Brown and Michael J. Wray argue that there are "stark contrasts in the types of vessels" currently supporting offshore exploration and drilling, making the recent US Coast Guard proposal for a rule-making process "a complex and problematic undertaking." Meanwhile, there are the new BSEE SEMS rules, which incorporate American Petroleum Institute best practices, which the Coast Guard is now also using. The Guard "envision[s] each vessel having specific safe-operating procedures and training that incorporate the management principles from API." The attorneys ask if the API knows "boats," and whether its "policies translate effectively to vessels, especially such a variety of vessels?" They call it "a daunting prospect

to consider a uniform safety structure for all.”

Tackling America's Water Challenges:

RECORD-SETTING DROUGHT IN CALIFORNIA THREATENS SALMON SURVIVAL. The Environment & Energy Publishing (1/10, 705) reports that “California’s intensifying drought is forcing water managers to make tough choices that pit fish species against one another for survival.” The BOR has “cut back water releases from the Nimbus Dam on the American River in order to save water for steelhead salmon that are expected to lay eggs in the river later this month.” According to the article, “the cutbacks may help the steelhead, which are listed as threatened under the Endangered Species Act,” but “they’re likely to harm another fish: the fall-run chinook salmon, which are just finishing laying eggs in the river’s gravel streambed.”

WATER ISSUES TRACED BACK TO DAMMING OF THE COLORADO RIVER. In an op-ed for the Los Angeles Times (1/10, Vandevelder, 3.07M), author Paul Vandevelder writes that “as all eyes in the West look to the courts, the skies and the Colorado River for relief from 14 years of drought, it might be useful to remember the battles waged by two titans of the 20th century who played leading roles in the drama that led to the current mess.” Vandevelder points to the fight between Sen. Barry Goldwater and David Brower, a founder of the Sierra Club, over water policy, but also, notes that “trouble with the Colorado, and any other river, for that matter, is that nothing in nature is static.”

Empowering Native American Communities:

GOVERNMENT CAN'T LOCATE RECIPIENTS OF COBELL SETTLEMENT. The New York Times (1/10, Subscription Publication, 9.61M) reports that as the payments are being made from the Cobell settlement, “tens of thousands of Indians who are owed money cannot be located.” According to the article, “about half a million Indians are eligible for payments,” but “more than 30,000 tribal members have not yet been located.” David Smith, a lawyer with Kilpatrick Townsend & Stockton, a law firm that worked on the settlement and is involved in locating tribal members, said “the large number of missing beneficiaries illustrated how the Indian land trust program, administered by the Interior Department, was mishandled.”

INTERIOR, CHEROKEE NATION FORMALIZE HISTORIC FUNDING AGREEMENT. The Cherokee Nation (1/10) reports that the Cherokee Nation “formalized a historic five-year funding agreement” with the Interior Department on Wednesday. The Cherokee Nation “receives \$23 million per year through the DOI compact for tribal programs such as social services, law enforcement, Indian Child Welfare and real estate services.” Robert Impson, Eastern Oklahoma regional director for the BIA, who attended the compact formalization ceremony, said, “Only certain tribes are able to get long-term agreements. The Cherokee Nation has been involved in the self-governance program for several years. This agreement is our way of assisting the tribe in serving the community and its citizens.”

Also reporting on the story is the Collinsville (OK) News (1/10) and the Muskogee (OK) Phoenix (1/10, 29K).

Top National News:

OBAMA ANNOUNCES FIRST FIVE PROMISE ZONES, WITH KEY REPUBLICANS ON HAND. Coverage of President Obama’s announcement of the first five Promise Zones in his effort to focus on income inequality is mostly positive. Reports say the plan is indicative of the President’s goal of pursuing bipartisan policy measures that do not require congressional approval. Several reports highlight the presence of both Senate Minority Leader McConnell and his Kentucky colleague Sen. Rand Paul – a vocal Obama Administration critic – at the announcement. Several reports also say the concept has some Republican support because it relies on existing Federal funding and is intended to cut through bureaucratic red tape.

Two of the three broadcast networks reported on the event in favorable terms. The CBS Evening News (1/9, story 9, 2:15, Pelley, 5.58M) reported the President “made good on a pledge to focus his year on income inequality” in creating “what he calls ‘Promise Zones’, communities that will be given tax incentives and grants to fight poverty, create jobs and improve education.” CBS’ Ben Tracy focused on the Los Angeles neighborhood so designated, noting its poverty and saying its “designation as a Promise Zone gives preference for Federal aid already

approved by Congress. Los Angeles could get a total of \$500 million over 10 years to build affordable housing and public transit and to boost education and job training programs in the zone." NBC Nightly News (1/9, story 4, 0:25, Williams, 7.86M) ran a briefer report, linking it to "the 50th anniversary of LBJ's declared War on Poverty" and calling it "a new initiative in that battle."

The AP (1/10, Kuhnhenh) reports President Obama invoked "his own personal story" in announcing the initiative, comparing himself "to a young man invited to the White House event Thursday who graduated from high school under a 1997 Harlem program and become the first member of his family to attend college." The President made the announcement "at a bipartisan White House assembly, underscoring the type of administrative actions Obama wishes to employ that don't all require congressional action." Bloomberg News (1/10, Runnigen, 1.91M) says the wide-reaching program reaches across "multiple federal agencies" including Agriculture, Commerce, Education, HHS, and Justice, and will first assist Los Angeles, Philadelphia, San Antonio, southeastern Kentucky, and the Choctaw Nation of Oklahoma.

USA Today (1/10, Madhani, 5.82M) notes that both McConnell and Paul – both of Kentucky, which was one of the designees – attended the event. The newspaper says that "unlike his recent pushes to extend emergency unemployment insurance and raise the minimum wage," the President's establishment of the Promise Zones "was met with a measure of enthusiasm from Republican adversaries." Obama said, "This should be a challenge that unites us all. I don't care if the ideas are Democrats or Republican. I do care that they work."

The Christian Science Monitor (1/10, Kiefer, 540K) says McConnell and Paul "recently introduced a bill along similar lines" that would be "a larger, simpler version of the president's plan, covering more areas and relying heavily on tax breaks to grow jobs." The Louisville (KY) Courier-Journal (1/10, Carroll, 449K) reports McConnell remained critical of the President on the Senate floor Thursday, faulting Obama Administration energy policies for hurting Kentucky's coal industry. Even so, he said, "The Promise Zone designation is a step in the right direction nonetheless. We're encouraged that the President is finally focused on a concrete approach to jobs that members of both parties can support."

The New York Times (1/10, Shear, Subscription Publication, 9.61M) reports Education Secretary Duncan, speaking with reporters about the educational aspects of the plan, "said schools 'can't do this by themselves.' He added, 'Bringing in nonprofits, companies and all of us working together is the only way to break the intergenerational cycle of poverty.'" In fact, the White House highlighted the fact that "the Promise Zones initiative would not provide new money, rather it would be aimed at providing the local governments and agencies 'aid in cutting through red tape to get access to existing resources.'"

In one of the few skeptical reports, the Washington Times (1/10, Boyer, 417K) says that "promise to cut through red tape for the communities is off to an uncertain start. Mr. Obama announced the initiative at his State of the Union address one year ago; it has taken an entire year for the government to receive applications from cities" and make the first five selections.

Doug Schoen writes on the Forbes (1/10, 6.03M) website that the Promise Zone plan "aims to cut red tape and streamline federal funding from government agencies. In this way, specific zones can benefit from strategic, targeted government funding in the areas it needs it most."

The San Antonio Express-News (1/10, 746K) reports Rep. Pete Gallego (D-TX), whose district includes the San Antonio Promise Zone, "said in a statement that the designation will help cut 'red tape and bureaucracy' in applying for grants." The Los Cerritos (CA) Community News (1/10, Economy, 102K) reports Rep. Lucille Roybal-Allard (D-CA), who represents parts of the designated Los Angeles area, said, "This is a tremendous opportunity for greater Los Angeles and the selected communities across the nation."

More Commentary. While not commenting specifically on the President's Thursday announcement, columnists continue to consider the impact of the War on Poverty. Paul Krugman writes in his New York Times (1/10, Subscription Publication, 9.61M) column that 50 years after that war was declared, "progressives have stopped apologizing for their efforts on behalf of the poor, and have started trumpeting them instead. And conservatives find themselves on the defensive." Krugman says the War on Poverty has "achieved quite a lot," and "there is strong evidence that antipoverty programs have long-term benefits, both to their recipients and to the nation as a whole."

Michael Gerson writes in his Washington Post (1/10, 4.28M) column, however, that the “actual result – as in most complex endeavors – is mixed. Programs such as Medicare and Medicaid are woven tightly into the fabric of American life...and represent some of the most admirable, humane moral advances of the 20th century.” But “other efforts, such as the expansion of Aid to Families with Dependent Children, became political shorthand for unintended social and behavioral consequences.”

OBAMA MEETS WITH LAWMAKERS AS HE CONSIDERS CHANGES TO NSA INTELLIGENCE-GATHERING PROGRAMS. As he considers the recommendations of a presidential commission concerning NSA surveillance programs, the President on Thursday met with 16 lawmakers at the White House. The president also met this week with his top intelligence advisers, a review group appointed by Congress, privacy advocates and technology companies. The President could announce his final decisions on the programs as early as next week.

The Washington Post (1/10, Nakamura, 4.28M) reports that since Edward Snowden stole classified files from the NSA last summer, the Administration “has been under siege and looking for a way out.” With his upcoming speech to announce changes to intelligence-gathering programs, the President aims “to set in place guidelines that will convince critics he is serious about reform and that will withstand future disclosures.” While White House Press Secretary Jay Carney said that the President “is nearly done with the review,” he “would not disclose what Obama is likely to say.”

AFP (1/10) reports that according to senior US officials, the President “is considering whether to permit the programs to continue while requiring data to be held either by technology companies or a third party instead of the NSA.” The President is also said to be considering “reining in spying on telephone and email communications of foreign leaders, after Snowden’s revelations of such activity – including on the cellphone of German Chancellor Angela Merkel – provoked outrage abroad.”

The Wall Street Journal (1/10, A1, Gorman, Lee, Subscription Publication, 5.91M) reports in a front page story that officials say the President is likely to support a combination of executive actions and measures that would require the approval of Congress. The Journal notes that the President has indicated that he is leaning toward three recommendations from the review panel. They are, extending the protections of the Privacy Act of 1974 to non-US citizens, creating and advocating for privacy issues, to argue before the secret Foreign Intelligence Surveillance Court, and restructuring the phone-data program.

The New York Times (1/10, A12, Baker, Savage, Subscription Publication, 9.61M) reports that advisers say the President is “trying to navigate what advisers call a middle course that will satisfy protesting national security agencies while tamping down criticism by civil liberties advocates.” According to one adviser, the President is “seeking a middle ground that probably would draw complaints from both security and privacy advocates.” Said the adviser, “Whatever he does next week will be an attempt to reach that balance, and on both sides there will be some element of dissatisfaction”

USA Today (1/10, Jackson, 5.82M) reports that a “brief White House readout of the meeting” with lawmakers said that the President has “committed his administration to working with Congress to pursue reforms to our nation’s surveillance programs and the Foreign Intelligence Surveillance Court.” According to USA Today, possible changes include “new restrictions on surveillance of foreign leaders and on the handling of telephone and Internet data.”

Reuters (1/9, Rampton, Hosenball) reports that Sen. Saxby Chambliss, ranking Republican on the Senate Intelligence Committee, said that the President was “in a listening mode” during the meeting, noting, “He also made clear that some changes should be made to create trust in the program by making them more transparent to the American people.” House Judiciary Chairman Robert Goodlatte said that he urged the President to better explain to Americans how collecting their phone data protects national security.

The AP (1/10, Pace, Dozier) reports that following the meeting, lawmakers said that the President “is still grappling with key decisions on the future of the National Security Agency’s phone collection program and the makeup of the secret court that approved the surveillance.” Sen. Ron Wyden said after the meeting, “The president and his administration are wrestling with the issues. ... It’s fair to say that the next few weeks are going to be crunch time in terms of judgments being made in both the administration and the Congress.”

UNEMPLOYMENT BENEFITS EXTENSION STALLS IN SENATE. The AP (1/10, Espo) reports that legislation to reinstate long-term unemployment benefits “stalled in the Senate on Thursday, triggering recriminations from both sides of the political aisle.” Democrats “offered to pay for a 10-month extension of a scaled-back program of benefits – then refused to permit Republicans even to seek any changes” – and while Senate Majority Leader Reid faulted the GOP for refusing to act, several Republicans who helped advance the bill earlier in the week said they had not been approached about a compromise.

Bloomberg News (1/10, Hunter, 1.91M) says Democrats need at least five Republican votes to advance the measure, but Reid's version, which would extend the program through mid-November rather than just the next three months, seems unlikely to win significant GOP support without changes. Politico (1/10, Everett, 464K) says Republicans “are highly skeptical” of the plan to pay for the benefits “by extending the sequester's mandatory savings for one year, through 2024.”

USA Today (1/10, Davis, 5.82M) reports that “with no Senate votes scheduled until Monday evening, the expiration will not be resolved until next week at the earliest.”

Roll Call (1/10, Lesniewski, Subscription Publication, 87K) headlines its report “Jobless Bill Descends Into Procedural Black Hole,” saying that the debate “devolved back into an all-too-familiar feud over considering amendments.” The Huffington Post (1/10, Stein, 11.54M) gives its report the similar headline “The Senate's New Unemployment Deal Is Already Falling Apart.” Reuters (1/10, Cowan) also has a report.

Pelosi Says GOP “Moving The Goal Posts” On Benefits Extension. Meanwhile in the House, The Hill (1/10, Lillis, 194K) reports, Minority Leader Pelosi charged that Republicans are “‘moving the goal posts’ surrounding the debate” by seeking job creation components. House Speaker Boehner has said he is “open to extending” the benefits, “as long as the costs are offset and the proposal is accompanied by unnamed economic provisions.”

Paul, Cato Scholar Call For Debate On Impact Of Extended Unemployment Benefits. Sen. Rand Paul and Daniel Mitchell of the Cato Institute write in USA Today (1/10, 5.82M), “The unemployed need a strong job market, not endless handouts that create dependency. Critics have said it is ‘insulting’ and ‘ridiculous’ to warn that there may be some adverse consequences to extending unemployment insurance beyond the typical 26 weeks – even if the debate is about doing so for the 12th time in the last five years.” They argue that “a debate about whether extending long-term unemployment benefits has consequences for the unemployed, the employed, and America's economy” is necessary.

Editorial Wrap-Up:

NEW YORK TIMES. “After Chris Christie's Performance.” The New York Times (1/10, Subscription Publication, 9.61M), in an editorial, says that on Thursday, while New Jersey Gov. Chris Christie “sounded remorseful — and clearly sorry that this scandal might sink his ambitions for national office — he blamed his staff for making him a victim.” According to the Times, “At this point,” Christie “has zero credibility.”

“Fitful Progress In The Antismoking Wars.” An editorial in the New York Times (1/10, Subscription Publication, 9.61M) reviews the 50-year effort to curb tobacco use, noting that by some measures, it “has been an enormous success,” but “nearly 44 million American adults still smoke, more than 440,000 Americans die every year from smoking, and eight million Americans live with at least one serious chronic disease from smoking.” The Times adds that while “smoking rates among adults around the globe have fallen sharply since 1980, the number of smokers has increased significantly along with population growth,” and calls on the US government to “help counter the tobacco industry's efforts to spread its noxious products around the world.”

WASHINGTON POST. “Christie's Uncertain Future.” The Washington Post (1/10, 4.28M), in an editorial this morning, calls New Jersey Gov. Chris Christie “the leading centrist within a GOP that is listing dangerously right,” and says “all Americans have an interest in the survival of [the GOP's] moderate wing.”

“An Incomplete Apology.” In an editorial, the Washington Post (1/10, 4.28M) acknowledges that DC Mayor Vincent Gray has apologized for “the events that sullied his 2010 campaign,” but says that “words of regret must

be only a first step." They are not a "substitute for a full accounting of what he did and knew four years ago."

"Ending Discriminatory Discipline." In an editorial, the Washington Post (1/10, 4.28M) takes a positive view of a call from the Education and Justice Departments call for schools to consider race when disciplining students, saying that the behavior "might be exactly the same — mouthing off to a teacher, cursing another student, getting into a shoving match — but, for students of color, the outcome is far more likely than for their white peers to result in punishments that will see them suspended, expelled or even jailed."

WALL STREET JOURNAL. "Christie And The IRS." The Wall Street Journal (1/10, Subscription Publication, 5.91M), editorializes that it will be important for Gov. Chris Christie to show that he in no way condoned the sort of abuse of power that his top aides engaged in.

"Grand Theft Auto Disability."

Washington Schedule:

TODAY'S EVENTS IN WASHINGTON.

White House:

PRESIDENT OBAMA — The President and the Vice President receive the Presidential Daily Briefing. Notes: Press Briefing by Press Secretary Jay Carney.

VICE PRESIDENT BIDEN — The Vice President will ceremonially swear-in Jeh Johnson as Secretary of Homeland Security in the Roosevelt Room. There will be a pool spray for still photographers only at the top of this event.

US Senate: JOINT ECONOMIC COMMITTEE — 9:30 a.m. Hearings to examine the employment situation for December 2013. Location: G50 Dirksen.

US House: 9 a.m. — The House will meet for legislative business. First and last votes expected: 10:30 – 11:15 a.m.

COMMITTEE MEETINGS

NATURAL RESOURCES — 9:30 a.m. Subcommittee on Energy and Mineral Resources Oversight Hearing on: "The Science Behind Discovery: Seismic Exploration and the Future of the Atlantic OCS." Location: 1324 Longworth.

Other: STIMSON CENTER – WILDLIFE CRIME — 9 a.m. – 11:30 a.m. The Stimson Center and the British Embassy host a discussion on wildlife poaching and trafficking, with Retired Army Gen. Carter Ham, former commander, U.S. African Command; others. Location: The Stimson Center, 1111 19th St., NW – 12th Floor, Washington, DC. Contacts: Rich Robinson (communications@stimson.org), 202-478-3419

PENTAGON – NORWAY — 10 a.m. Secretary of Defense Chuck Hagel hosts an honor cordon to welcome Norway's Minister of Defense Ine Marie Eriksen Soreide to the Pentagon. The cordon will be held on the steps of

the Pentagon River Entrance. Notes: Journalists without a Pentagon building pass will be picked up at the Pentagon River Parking Pedestrian Bridge only. Plan to arrive no later than 30 minutes prior to the event; have proof of affiliation and two forms of photo identification. Please call 703-697-5131 for escort to the cordon.

PENTAGON – SEXUAL ASSAULT REPORT — 10 a.m. Defense Department experts will brief the press on the Annual Report on Sexual Harassment and Sexual Violence at the Military Service Academies. Maj. Gen. Jeffrey Snow, Col. Alan Metzler and Dr. Nate Galbreath from the DoD's Sexual Assault Prevention and Response Office and Dr. Elizabeth P. VanWinkle from the Defense Manpower Data Center will brief the press on the annual report, which covers the school year that began June 2012 and ended May 2013. Location: Pentagon Briefing Room (2E973). Notes: Journalists without a Pentagon building pass will be picked up at the River Entrance only. Plan to arrive no later than 45 minutes prior to the event; have proof of affiliation and two forms of photo identification. Please call 703-697-5131 for escort into the building.

CATO – RECESS APPOINTMENTS — 12 p.m. Policy Forum. "Resolved: President Obama's Recent Purported 'Recess' Appointments Were Unconstitutional." Featuring Nicholas Quinn Rosenkranz, Georgetown University Law Center, and Senior Fellow in Constitutional Studies, Cato Institute; vs. Victor Williams, Catholic University School of Law. Moderated by Roger Pilon, Director, Center for Constitutional Studies, Cato Institute. Location: 1000 Massachusetts Ave. NW. Contacts: CATO Institute (events@cato.org), 202-842-0200

FAIRFAX COUNTY – HUMAN TRAFFICKING — 12 p.m. Media brief on the new Just Ask Prevention Project, including unveiling a newly produced 10-minute film addressing human trafficking to be shown to all FCPS 6th-12th grade students as part of their health class curriculum. New interactive website, bus back posters, other educational materials will be shared at the briefing. Participants: Colonel Edwin C. Roessler, Jr. Chief of Fairfax County Police Department; Detective Bill Woolf, Jr. Fairfax County Police, Northern Virginia Human Trafficking Task Force; Elizabeth Payne, Fairfax County Public Schools, K-12 Coordinator, Family Life Education/Physical Education; Chris Davies, Supervisor, Fairfax County Office for Women & Domestic and Sexual Violence Services. QUESTIONS/RSVP: Lucy Caldwell, FCPD Public Information Office, 703-246-2253. Location: Massey Building, 4100 Chain Bridge Road, Fairfax, 22030, A-Level Conf. room.

WILSON CENTER – MATERNAL HEALTH, HIV — 12 p.m. – 4 p.m. Maternal Health and HIV: Global Priorities for Research and Action. Two Panels: Creating a Comprehensive Research and Evaluation Agenda for Maternal Health and HIV in Sub-Saharan Africa and Addressing HIV Stigma and Preventing Disrespect and Abuse: Global Insights to Improve Maternal Health and Promote Reproductive Rights. Location: Woodrow Wilson Center, 5th floor, Ronald Reagan Building, 1300 Pennsylvania Ave. NW.

NPC – AMTRAK CEO — 12:30 p.m. Amtrak President & CEO Joseph H. Boardman will share his thoughts on passenger rail issues and provide a preview of the year ahead for Amtrak at a National Press Club Luncheon. This is a ticketed event. Location: National Press Club, 529 14th Street NW. Contacts: reservations@press.org, 202-662-7501

PHYSICIAN ASSISTANTS – ACCESS TO MEDICAL CARE — 2 p.m. – 2:30 p.m. The American Academy of Physician Assistants will host a virtual briefing to highlight the ways Americas PAs are practicing medicine and "increasing access to care across all medical and surgical specialties". Via Conference Call 888-510-1765. Participant Passcode: 3350736. dial in 5 – 10 minutes prior to the start time. Contacts: Matt Forke 202-248-5484 (mforke@vancomm.com) Patrick Dunne pdunne@aapa.org (571-319-4394).

USIP – SOUTH SUDAN — 2 p.m. – 3:30 p.m. The U.S. Institute of Peace and the Wilson Center host a discussion on the root causes of the crisis, strategies for ending the violence, and ideas for building a more stable South Sudan; with Ambassador Princeton Lyman, former U.S. Special Envoy to Sudan and South Sudan; and others. Location: U.S. Institute of Peace 2301 Constitution Ave, NW. Contacts: Steven Ruder (sruder@usip.org)

WILSON CENTER – NATO- RUSSIAN RELATIONSHIP — 3:30 p.m. – 5 p.m. Roundtable on the NATO-Russian Relationship with Sharyl Cross, Global Fellow, Distinguished Professor and Director of the Kozmetsky Center, St. Edward's University. Location: Woodrow Wilson Center, 6th floor, Ronald Reagan Building, 1300 Pennsylvania Ave. NW.

Last Laughs:

LATE NIGHT POLITICAL HUMOR.

Jimmy Kimmel: "And New Jersey Governor Chris Christie has had a bad couple of days. He's embroiled in a major scandal involving lane closures near the George Washington Bridge. One of his top aides allegedly ordered the lane closure to retaliate against the mayor of Fort Lee, who refused to support Governor Christie's re-election. A lot of people got stuck in terrible traffic. Ambulances had a hard time getting through. Blocking off bridges, you know, intentionally. To put that in perspective, that's what Bane did in the last Batman movie. It's a big deal. ... The scandal could damage Christie's chances of getting the Republican nomination for president in 2016, but he'll probably bounce back. He seems like a pretty bouncy person."

David Letterman: "Chris Christie, the governor of New Jersey, apparently some goons in his office closed the George Washington Bridge as a prank. And they have the emails to prove it. Now, this is what I don't understand. You got a major political figure. You have the busiest bridge in the world. Don't put anything in writing. ... Do what I always do when I have something top secret to discuss. I go to the bowling alley and use the pay phone."

David Letterman: "Christie is saying he knew nothing about it. It was all his aides. He had no knowledge of the closing of the bridge. He is trying to distance himself from the scandal. And this is a big guy. You want to distance yourself from something when you're that big, you got to go to Mars."

David Letterman: "They have traffic delays, four and five hour traffic delays, emergency problems, couldn't get any emergency vehicles. They had health problems, because of the big closure of the George Washington Bridge. Now, this is okay. But I want to tell you something, ladies and gentlemen. If a political scandal doesn't involve hookers, or photos of somebody's junk, I'm not interested. I don't care."

David Letterman: "People are saying because he let his aides close down the George Washington Bridge, he could be unfit for office. And I said, 'Hell, the guy could be unfit for his pants, what about that?'"

David Letterman: "It's been a lousy week for Governor Christie. I mean, first the bridge scandal and now the nationwide Velveeta shortage."

David Letterman: "The United States is running out of Velveeta cheese. We are desperately low on Velveeta cheese, I'm telling you. I had to wait in line for three hours at the pump earlier today to get Velveeta cheese. And President Obama may have to open up the strategic cheese reserve."

Craig Ferguson: "Governor Christie's office is accused of shutting down a bridge to get back at a mayor who won't endorse him. It's all very petty, but shutting down the bridge caused four-hour delays. Or as it's known in Los Angeles, 'three blocks at rush hour.'"

Craig Ferguson: "Everyone's talking about Chris Christie today. He's a Republican, so MSNBC says, 'He's guilty.' Fox News says, 'Give him a chance.'"

Craig Ferguson: "The government is cracking down on companies that say they can help you lose weight. The Obama Administration accused four weight-loss companies of misleading Americans about their health benefits. And the companies said, 'Couldn't we say the same about you?'"

Stephen Colbert: (Referring to Christie scandal) "Bottom line, bottom line, no one can definitively prove the original order came from Chris Christie. But I would like to go on the record as saying God, I hope it did. Because a year ago when I saw him palling around with Barack Obama after Hurricane Sandy, I was worried he was one of those fake conservatives who secretly believes that the government can do things. But now I realize he's the kind of leader I can get behind. The kind who says it's my way or I shut down your highway."

Stephen Colbert: "Christie is a true conservative. He is committed to proving the core conservative value that government is the problem, even if he has to create those problems himself. I can already see his 2016 bumper sticker: 'Christie. Bringing America Together Or I Will [bleep] You Over.' Best of all, his team will make sure you

have plenty of time to read those bumper stickers.”

Stephen Colbert: (Referring to Robert Gates' memoir) "Secretary Gates writes" of "the President's Afghanistan strategy, 'I believe Obama was right in his decisions, but I myself, our commanders and our troops, had expected more commitment to the cause and more passion for it from him.' Yes, Obama made the right decisions, but he faked his war-gasm. Secretary Gates much preferred President Bush, who 'had no second thoughts about Iraq, including our decision to invade.' No second thoughts. I'm pretty sure he didn't have first thoughts."

Jon Stewart: "As you may have heard, New Jersey Republican, I believe his name is Christopher Christie, faced an outcry yesterday after it was revealed his staffers purposely tied up traffic for days at the Fort Lee, New Jersey side of the George Washington Bridge as payback against the town's Democratic mayor, because, apparently, being right there at the bridge isn't punishment enough."

Jimmy Fallon: "New Jersey Governor Chris Christie is dealing with a scandal after it was revealed that a top aide shut down access to the George Washington Bridge to get back at a Democratic mayor for not endorsing him. Christie was furious when they blocked the bridge, because he thought they said they were blocking the fridge. He was like, 'What?'"

Jimmy Fallon: "Oh, man. Actually, though, Chris Christie held a press conference today to address the bridge scandal, where he insisted that he is not a bully. And he will sit on anyone who says otherwise."

Jimmy Fallon: "Today, President Obama announced a new plan to create things called 'promise zones' in parts of the country where the economy still needs help. 'Promise zones'? Sounds less like an economic plan, more like something your parents would say during the sex talk."

Jimmy Fallon: "Speaking of the President, though, yesterday Obama gave photographers a rare chance to take pictures of his weekly lunch with Joe Biden. Then Biden told his friends, 'Told you I knew the President.'"

Jay Leno: "Well, this has turned into a huge scandal. Apparently somebody in Governor Christie's office, as you know, was involved in that traffic-lane closure at the George Washington Bridge that...caused a huge traffic jam. And the allegation is, it was done in retaliation against the mayor of Fort Lee for not supporting Christie's re-election campaign. But Christie is denying any personal involvement. He said he was too busy clogging his own arteries at the time."

Jay Leno: "Pundits are saying this could hurt his 2016 presidential campaign. The ironic thing is, now that Christie is denying everything, he sounds even more presidential, doesn't he?"

Jay Leno: "In fact, after his denial, Christie quickly left the news conference to deal with a more personal crisis, the Velveeta cheese shortage."

Jay Leno: "And in the new movie 'The Wolf of Wall Street,' they say the 'F' word was used a record 506 times, thus breaking the old record of 505 times set by President Obama when he heard about Robert Gates' new book."

DOI in the News:

SECRETARY JEWELL DISCUSSES EVERGLADES RESTORATION AT NAPLES EVENT. The Fort Myers (FL) News-Press (1/11, 210K) reports that at a short press conference during the 29th annual Everglades Coalition Conference at the Naples Beach Hotel & Golf Club, Interior Secretary Sally Jewell said that the Obama Administration strongly believes in Everglades restoration and the protection of the Caloosahatchee and St. Lucie estuaries. Jewell said, "There is a significant effort among the Army Corps of Engineers, the Department of the Interior and Department of Agriculture to reduce flows in the Caloosahatchee and St. Lucie. These estuaries are so important, and this administration is very much aware of what's happening down here."

The Naples (FL) Daily News (1/10, 174K) reports that Jewell pointed to "the budget stalemate in Washington for not coming to Florida with cash for Everglades restoration but said she hopes to have ground broken by the end of her term on advocates' top priority: a second phase of Tamiami Trail bridging over the River of Grass to restore water flows." Jewell also said "cries of protest over discharges from Lake Okeechobee fouling waters in downstream estuaries on Florida's coasts, including in the Caloosahatchee River, are not falling on deaf ears." Jewell cited a "great deal of support" at the Interior Department to "reduce those discharges by building reservoirs to store the water or create new flowways south into the Everglades."

Meanwhile, the Naples (FL) Daily News (1/10, 174K) reports that the Everglades Coalition is requesting "\$100 million for Everglades funding from the state Legislature this year, coalition leaders said Friday at their annual meeting in Naples." The funds, "which would pay to build parts of an \$11 billion state-federal restoration plan, would reinforce the state's commitment to the Everglades," according to coalition co-chair Jennifer Hecker.

Also reporting on the story are the Sunshine State (FL) News (1/12, 3K), the Lakeland (FL) Ledger (1/11, 180K), the Winter Haven (FL) News Chief (1/11, 28K), the TCPalm (1/10, 224K), the Columbus (IN) Republic (1/12, 80K), the Miami Herald (1/10, 806K), the Naples (FL) Daily News (1/10, 174K), the Franklin (IN) Daily Journal (1/12, 51K), the Water Environment Federation (1/13), WTVJ-TV Miami (1/12, 50K), and WGCU-FM Fort Myers, FL (1/12).

Everglades Restoration Project Achieves Quick Success. The Huffington Post (1/10, 11.54M) reports that "the need to address the damage done by the C-111 Canal has been one of the early priorities of the Everglades restoration, and a series of pumps, waterways and reservoirs completed one year ago to stop the leakage is already being hailed as a success." Caroline McLaughlin, program analyst for the National Parks Conservation Association, said, "After only one year, we're really encouraged. We're seeing the hydration of wetlands that will ultimately support the health and vitality of native wildlife."

SEN. MURKOWSKI STILL IRATE OVER IZEMBEK DECISION. Politico (1/12, Goode, 464K) reports that "relations have turned frosty" between Interior Secretary Sally Jewell and Sen. Lisa Murkowski over "Jewell's rejection of a road through Alaska's Izembek National Wildlife Refuge — a decision Murkowski calls 'callous and cold-hearted.'" Murkowski said, "This does not help my relationship with the secretary, let's put it that way. And I think she knows that." However, "Murkowski may have little recourse to punch back on the Christmas-week decision, despite her position as the top Republican on the Energy and Natural Resources Committee and the Appropriations subpanel that oversees Interior's budget."

Also reporting on the story is KTBY-TV Anchorage, AK (1/12, 122).

INTERIOR MISSES DEADLINE TO BUY STATE LAND WITHIN GRAND TETON. The Belleville (IL) News-Democrat (1/10, 167K) reports that the Interior Department has "missed a deadline to buy state land located within the boundaries of Grand Teton National Park, but state and federal officials say they're still optimistic about reaching a deal in which the land instead would be swapped for federal land and mineral rights." The article notes that "the blown deadline wasn't surprising," since "state and federal officials began talking about a land swap amid last year's federal belt-tightening." Furthermore, "there was also uncertainty over the second-phase purchase of 86 acres of state land for \$16 million right up until that deal closed on Dec. 28, 2012."

Also reporting on the story is the [Bradenton \(FL\) Herald](#) (1/10, 143K).

CONGRESS CLOSING IN ON A BUDGET DEAL. [Politico](#) (1/12, Rogers, 464K) reports that "House-Senate negotiators have substantially narrowed their differences over a \$1.1 trillion governmentwide spending bill and are closing in on a deal that the leadership hopes can be filed by Monday night and moved quickly through Congress this week." Notably, "to make room for firefighting funds in the Interior Department and Forest Service means no money is left to absorb the costs of the PILT program [payments in lieu of taxes], which helps small Western towns meet their local budgets when surrounded by federal lands."

GAO REVIEWS INTERIOR'S ALASKA OCS AIR PERMITTING UPDATES. [Politico](#) (1/12, Guillen, 464K) reports that the Government Accountability Office has "a short report out that outlines the ongoing transfer of Clean Air Act regulatory authority for air emissions on Alaska's outer continental shelf from EPA to Interior, a change made as part of a 2011 appropriations bill." Of note: "Interior is working on amending its oil and gas air quality rules, which haven't been significantly updated since 1988."

TOP ENVIRONMENTAL OFFICIALS TO TESTIFY NEXT WEEK ON OBAMA'S CLIMATE AGENDA. [The Hill](#) (1/11, Barron-Lopez, 194K) reported in its "E2 Wire" blog that the Obama Administration's Council on Environmental Quality Chairwoman Nancy Sutley, EPA Administrator McCarthy, and officials from the Fish and Wildlife Service and State Service Administration will testify next week at the Senate's Environment and Public Works Committee "hearing next week President Obama's climate plan." [The Hill](#) reported that the purpose of the hearing is for the committee to "review Federal efforts in line with Obama's agenda to address climate change."

Senate Aide Says Reid Is Setting Aside Time Weekly To Focus On Climate Change. [Bloomberg News](#) (1/11, Scott, 1.91M) reported that a senior Senate aide said Thursday that Senate Majority Leader Reid "is setting aside time at his party's weekly caucus lunch in the Capitol to focus solely on climate change...in hopes of one day reviving a bill to cut carbon dioxide emissions and better defend" President Obama's climate efforts "from Republican attacks." The aide told [Bloomberg Business of National Affairs](#) that "Reid reserves "a permanent spot" for the climate issue each week when Senate Democrats sit down for their hour-plus policy lunches."

SENATORS CREATE CLIMATE CHANGE TASK FORCE. [The San Francisco Chronicle](#) (1/10, Lochhead, 2.88M) reported that "more than a dozen senators, none of whom are Republicans," have created a task force aimed at removing the "'barricade of special interest lies' on climate change" in Washington. Led by Democratic Sens. Barbara Boxer of California and Sheldon Whitehouse of Rhode Island, the group will work with new presidential counselor John Podesta. At a briefing Thursday, Sen. Boxer called the task force a "wake-up call" and an effort to win support for climate change legislation both within Congress and in the private sector. According to Sen. Whitehouse, the group has potential allies among "big nameplate American companies like Apple and Nike" and possibly the military's Joint Chiefs of Staff. [The Chronicle](#) said the task force's agenda and membership would be formally announced on Tuesday.

STUDENT CONSERVATION ASSOCIATION PRESIDENT DALE PENNY RETIRING. [The National Journal](#) (1/13, Subscription Publication, 427K) reports that Student Conservation Association President Dale Penny has "announced that he would be retiring after 16 years as head of the SCA." Penny has "been a charismatic leader for an organization that has experienced dramatic growth in recent decades." The article notes that "the group has also emerged as an incubator for conservationists: According to a recent National Park Service estimate, 12 percent of the agency's personnel were at one time SCA volunteers." Also, "one notable alumna is Rhea Suh, a top-ranking official at the Interior Department."

SECRETARY JEWELL URGED TO SUPPORT CONSERVATION. In an op-ed for the [Bellingham \(WA\) Herald](#) (1/11, Buyagawan, 113K), Jaime Buyagawan Jr., the owner of Buyagawan LLC, an independent outdoor recreation sales company, wonders "how different Washington State would be without our national parks and forests," and expresses concern "about future development and the impact it could have on future generations." He notes that "in an Oct. 31 speech at the National Press Club in Washington, D.C.," Interior Secretary Sally Jewell "articulated a vision for conservation on America's public lands." Buyagawan urges Jewell to "make it her New Year's resolution to make each of these goals a reality."

America's Great Outdoors:

National Park Service:

POWER OUTAGE DISRUPTS NPS DATA CENTER. The [Sierra \(CA\) Sun Times](#) (1/12) reports that "just before 3 p.m. on the afternoon of January 1st, the National Park Service building in Denver where the NPS Data Center is located experienced a power outage." According to the article, "this was a non-NPS generated, unplanned, unpredicted power outage that caused a catastrophic technology event and outage in the data center."

GRAND CANYON BECAME NATIONAL MONUMENT 106 YEARS AGO. The [National Journal](#) (1/12, Subscription Publication, 427K) notes that 106 years ago, President Teddy Roosevelt, "instead of looking to Congress to grant the Grand Canyon national park status, Roosevelt declared the 800,000-acre area a national monument himself, beginning an entirely new presidential practice of recognizing the country's natural assets."

PINNACLES SEES MORE VISITORS ONE YEAR AFTER BECOMING NATIONAL PARK. The [Monterey County \(CA\) Herald](#) (1/13, 86K) reports that it has been one year since the Pinnacles "was upgraded from a national monument to a national park by President Barack Obama." According to the article, "although the upgrade may have seemed insignificant to critics, early estimates show an increase of about 90,000 visitors last year."

CONTROVERSY OVER DEER POPULATION CONTROL EFFORTS CONTINUES. [WJLA-TV](#) Washington (1/13, 118K) reports that "controversy continues to brew over population control efforts for white tailed deer in Rock Creek Park." The group Save the Rock Creek Park Deer is "gathering to protest the sharpshooting Sunday."

CAPITOL HILL FOX WINNING FANS. In its "Heard On The Hill" blog, [Roll Call](#) (1/12, Subscription Publication, 87K) reports that the Capitol Hill Fox has been spotted around the National Mall. People have been "entranced" by the "well-traveled and amazingly well-behaved creature."

NPS TO HOLD FORUM ON LANGLEY FORK PARK PLAN. The [Arlington \(VA\) Sun Gazette](#) (1/12, 119K) reports that the NPS will "hold a public meeting on Tuesday, Jan. 14 to present information on the potential land exchange and the environmental-assessment process for the Langley Fork Park Master Plan."

Bureau of Land Management:

BLM SUED OVER WILD HORSE MANAGEMENT. The [Elko \(NV\) Daily Free Press](#) (1/12, 22K) reports that the Nevada Association of Counties and the Nevada Farm Bureau Federation have filed a lawsuit against the federal government, "alleging mismanagement of wild horses has led to excessive damage on the land and to animals." The two groups "accuse the feds of failing to comply with the Wild Free-Roaming Horse and Burro Act of 1971, which requires the BLM to 'protect the natural ecological balance of all wildlife species which inhabit such lands, and to maintain a current inventory of wild free-roaming horses and burros on given areas of the public lands, and to remove excess animals,' the complaint states." The plaintiffs argue the BLM should "destroy" horses that are deemed unadoptable, but the BLM "maintains it will not sell wild horses or burros for slaughter."

Also reporting on the story are the [San Jose \(CA\) Mercury News](#) (1/13, 731K), the [Eureka \(CA\) Times Standard](#) (1/13, 76K), and the [Fort Mill \(SC\) Times](#) (1/12, 54K).

BLM WARNS AGAINST FEEDING BURROS. The [Las Vegas Review-Journal](#) (1/12, 437K) reports that federal officials warn that burros and wild horses near and around Red Rock Canyon have grown used to frequent contact with people who feed them on the side of the road, which could lead to crashes. Kristen Cannon, a spokeswoman for the BLM, said that as long as people continue to feed the burros, crashes will occur. Cannon said, "I know people probably think they're doing them a favor by offering a carrot or Cheeto, but people who feed the burros are actually hurting them more than helping them."

USE OF VEHICLES A POINT OF CONCERN FOR ORGAN MOUNTAINS-DESERT PEAKS PROPOSAL. The [Albuquerque \(NM\) Journal](#) (1/12, 288K) reports that "one of the key differences between land designated a national monument and land designated wilderness has to do with the use of vehicles – a sticking point for both the sheriff and cattle ranchers." According to the article, "in designating a monument, nothing changes in terms of

road use; existing roads remain open to both law enforcement and the public." The article notes that "the law permits construction of new roads if there is a need, and need is determined by the managing federal agency – in the case of the Organ Mountains-Desert Peaks proposal, the Bureau of Land Management."

BLM SEEKING COMMENTS ON PROPOSED RIGHT OF WAY IN RECAPTURE CANYON. In an op-ed for the Durango (CO) Herald (1/12, 28K), Andrew Gulliford, a professor of history and environmental studies at Fort Lewis College, writes that in Utah, the BLM is "seeking comments on what could be a precedent-setting mistake." He notes that "in 2005, Blanding residents illegally constructed a seven-mile-long, 4-foot-wide, all-terrain-vehicle trail in Recapture Canyon, damaging archaeological sites," and "now San Juan County is seeking a right of way for that same trail." The BLM is accepting public comment about a proposal by San Juan County, which is "seeking 14.25 miles of ATV trail and three trailheads or staging areas for ATVs."

Fish and Wildlife Service:

BLACK RHINO HUNTING PERMIT AUCTIONED. FOX News (1/12, 6.72M) reports that the Dallas Safari Club sold a rare license to hunt an endangered black rhino in Africa for \$350,000 at an auction held Saturday night. The auction stirred outrage among conservationists and led to death threats against members of the club. Critics have also said "any hunting of a rhino sends a bad message to the public."

USA Today (1/11, Mullaney, 5.82M) reports that the FWS "endorsed the auction, saying limited culling of males too old to breed can boost the overall population by reducing fighting among other males and by lowering juvenile mortality." However, "that rationale was mocked by 90-year-old game-show host and animal-rights activist Bob Barker in a letter released by PETA."

Also reporting on the story are the Reno (NV) Gazette-Journal (1/12, 165K), the Biloxi (MS) Sun Herald (1/11, 154K), the Detroit Free Press (1/12, Mullaney, 794K), the Pacific (GUM) Daily News (1/12, 61K), the Christian Science Monitor (1/12, Graczyk, 540K), WDIV-TV Detroit (1/12, 178K), and KGO-TV San Francisco (1/12, 4K).

NEVADA GOV. SANDOVAL SAYS GROUSE PROTECTION EFFORTS "CAST ASIDE." The Reno (NV) Gazette-Journal (1/12, 165K) reports that the FWS "'cast aside' years of work to protect sage grouse habitat along the Nevada-California border with a recent proposal to list a subspecies of the bird as threatened," according to Nevada Gov. Brian Sandoval. In a letter to Interior Secretary Sally Jewell, Sandoval wrote "that direction could offer worrying insight into the service's coming decision on whether the greater sage grouse — found across much of Northern Nevada — should also be listed under the Endangered Species Act." In response to Sandoval's letter, Ren Lohofener, regional director for FWS, wrote that "Nevada still has much work to do to convince the service it is taking sufficient measures to conserve some of the most valuable sage grouse habitat in the country."

ARKANSAS CONGRESSIONAL DELEGATION OPPOSES PROPOSED CRITICAL HABITAT AREA FOR RARE MUSSELS. The Columbus (IN) Republic (1/12, 80K) reports that "members of Arkansas' congressional delegation said Friday they want federal wildlife officials to reduce the size of a proposed 'critical habitat' area for two types of rare mussels." The FWS "in September proposed designating 769 miles of streams as critical for the Neosho mucket and the rabbitsfoot mussel." According to the article, "in a letter dated Thursday and released Friday," Arkansas' senators and four congressmen said "half of the rabbitsfoot critical habitat area falls in Arkansas and that 42 percent of the state could be affected by new regulations intended to protect the mussels." But "after the members of Congress released their letter," the FWS said "they were exaggerating the problem." The FWS said "the designation covers 8 percent of Arkansas' stream miles — not land area."

FWS RELEASES STUDY ON IMPACT OF HABITAT PROTECTION IN SIERRA NEVADA. The Stockton (CA) Record (1/11, 123K) reports that "designating 1.8 million acres of the Sierra Nevada as critical habitat for several amphibian species will have minimal economic impact," according to a study released by the FWS. The article notes that "the draft economic analysis of proposed critical habitat for the Yosemite toad and two species of yellow-legged frogs concludes that the costs of the designation over 17 years would likely range from \$630,000 to \$1.5 million, or a maximum of about \$88,000 per year."

DEADLINE EXTENDED FOR JAGUAR HABITAT DETERMINATION. The Eastern Arizona Courier (1/12, 18K)

reports that the FWS "requested and recently received an extension of the deadline to reach a final determination on critical habitat for the jaguar." According to the article, "the previous settlement agreement date for publishing a final decision was Dec. 16; the new publication date is Feb. 14, 2014."

SPACEPORT SHILOH PROJECT TARGETED BY ENVIRONMENTALISTS. The Orlando (FL) Sentinel (1/10, 780K) reports that the Spaceport Shiloh project in Merritt Island is under fire from environmentalists. Also, last week, the FWS released "a 38-page missive that spelled out several concerns the agency had with the proposed launch site." Now, "there are signs that the company the state was trying to lure — SpaceX of California — may go to Texas instead."

ARCTIC RESIDENTS WARY OF ENDANGERED SPECIES ACT. The Arctic (AK) Sounder (1/12, 6K) reports that "for those living in the Arctic," the Endangered Species Act is a point of concern. According to the article, "scientists and hunters alike, while they can appreciate what the Act stands for, have grown somewhat uneasy over the years with the ever-present possibility of more listings and thus, more red tape." Moreover, "recently, the boundaries of the Act have been getting a little muddy."

FWS SAYS DISEASE OUTBREAK IN REDWOOD SHORES POND POSES NO THREAT TO PEOPLE. The San Jose (CA) Mercury News (1/12, 731K) reports that "citing a serious threat to wildlife, a wastewater treatment agency is draining a Redwood Shores pond popular with bird watchers where an outbreak of avian cholera has killed about 185 ducks in one week." However, "the disease does not pose a threat to humans," an FWS official said "in an announcement sent out Friday by the South Bayside System Authority."

US Geological Survey:

WHITE HOUSE NOMINATES NEW USGS CHIEF. The Environment & Energy Publishing (1/12, 705) reports that President Obama has nominated Suzette Kimball to be the director of the USGS. Kimball has been acting director since February 2013, when Marcia McNutt stepped down.

The Sierra (CA) Sun Times (1/12) reports that Interior Secretary Sally Jewell today "praised" the nomination. Jewell said, "USGS brings critical, impartial information to bear on some of the most complex issues facing our nation today – from the impacts of climate change to natural hazards and their threats. With her scientific expertise and decades of public service, Suzette is an excellent choice to lead this agency. During her time at USGS, Suzette has proven herself to be a smart, thoughtful and collaborative leader, and a strong advocate for using science to inform our understanding of our world and provide tools to solve natural resource challenges."

HYDROLOGIST ARGUES USGS THE BEST AT MODELING VERDE RIVER FLOW. In an op-ed for the Camp Verde (AZ) Bugle (1/12, 3K), Win Hjalmarson, a retired USGS hydrologist, write that "a few months ago the USGS presented the regional groundwater model to the public at a large gathering in Camp Verde," and "they discussed how the model showed a decrease of about 7 cfs in the base flow of the upper Verde River as a result of withdrawal of water from the Big and Little Chino aquifers." However, the Bugle "reported that Doubting Thomases picked apart every aspect of the model and have even questioned the integrity of USGS employees and river preservation leaders" and "some doubted there has been a 7 cfs drop in base flow." In response, Hjalmarson argues that "the USGS is the best to perform such modeling of our precious water resource."

Securing America's Energy Future:

Renewable Energy:

ECONOMY, TAX CREDIT UNCERTAINTY CONTRIBUTE TO SLOW PACE OF SOLAR DEVELOPMENT. The Los Angeles Times (1/12, Cart, 3.07M) reports that "five years after the Obama Administration's renewable energy initiative" ignited "a building boom of large-scale solar power plants across the...Southwest, the pace of development has slowed to a crawl, with a number of companies going out of business and major projects canceled for lack of financing." The Times reports that 20 out "of the 365 Federal solar applications since 2009" remain on track to being built and "only three large-scale solar facilities have gone online, two in California and one in Nevada." Industry analysts blame the economy, which has made it difficult for companies to obtain the finances it needs to fund projects, and the uncertainty surrounding the future of tax credits.

GROUPS THREATEN LAWSUIT OVER WIND TURBINE NEAR LAKE ERIE. The Seattle Post-Intelligencer (1/12, 768K) reports that "a group of birding enthusiasts is threatening to sue the Ohio National Guard over plans to build a wind turbine along Lake Erie because they are concerned it will endanger migrating birds and eagles." The American Bird Conservancy and Black Swamp Bird Observatory said that "they are looking at taking legal action over plans to build the wind turbine at the guard's Camp Perry site near Port Clinton." The FWS has "suggested shutting off the turbine and dimming the lights around it during the height of the spring and fall migration periods."

Also reporting on the story is WRAL-TV Raleigh, NC (1/12, 117K).

NEW EAGLE POLICY CRITICIZED. For "The Blog" of the Huffington Post (1/10, Yarnold, 11.54M), David Yarnold, President, National Audubon Society, criticizes the decision by the Interior Department "to give wind companies permits to operate new turbine farms for decades, but without any real protection for eagles." He argues that "that's bad for eagles, and it's also bad politics for renewable energy." According to Yarnold, "critics of wind power are already using the lack of protection for eagles as a new way to attack an industry that deserves all the public support it can get."

Also, in an op-ed for the Lewes (DE) Cape Gazette (1/12, Hliva, 42K), Connie Hliva criticizes the federal government's new eagle policy. She argues that "death by wind turbine is not friendly" and "is also an insult to the American people who care enough to help preserve our wild life and environment." Hliva concludes that "unless action is taken to save these birds, the American Bald Eagle and other birds will disappear."

SALERNO: CONGRESS SHOULD EXTEND WIND ENERGY CREDIT FOR 2014. American Wind Energy Association Vice President of Industry Data and Analysis Elizabeth Salerno wrote in an op-ed piece for The Hill (1/11, 194K) that "the Federal Production Tax Credit (PTC) for wind power must be extended for 2014 and Congress has yet to act." Salerno wrote that the "wind power industry employs over 80,000 Americans" and, with the support of the tax credit, "attracts an average of \$18 billion annually in private investment, with a record \$25 billion in 2012." Salerno wrote that the inaction by Congress on the tax credit "has injected uncertainty into the market and" is "threatening the livelihoods of thousands of hardworking Americans."

Onshore Energy Development:

PANEL REJECTS PROPOSAL TO RUN A NATURAL GAS PIPELINE THROUGH NEW JERSEY PINELANDS. The AP (1/11, Parry) reported that the "New Jersey Pinelands Commission rejected the proposal by South Jersey Gas, which had partnered with the state Board of Public Utilities, to" run a 22-mile natural gas pipeline through New Jersey's Pinelands and connect it "to the BL England power plant in Cape May County." The AP reported that the "decision delighted environmentalists, who had turned out by the hundreds to oppose the plan over the past six months." However, according to the AP, business groups and union members were upset with the decision since they hope that the proposal would lead to more jobs in the area.

In addition to coverage on the New Jersey Pinelands Commission's rejection of the natural gas pipeline, the New York Times (1/12, Powell, Subscription Publication, 9.61M) reported that "four former governors, two Republican and two Democrat, wrote a letter opposing the project." Jeff Tittel, director of the New Jersey Sierra Club, called the decision "the biggest environmental win" they've had during the Christie Administration. Meanwhile, Dan Lockwood, a spokesman for South Jersey Gas, which was in charge of the proposal, said that they were "disappointed" by the decision and that the company would study its options.

Columnist Kevin Riordan writes in a piece for the Philadelphia Inquirer (1/13, Columnist, 1.22M) that in a surprising decision, the New Jersey Pinelands Commission rejected a proposed natural gas pipeline. Riordan notes that "supporters and opponents in the room were united – in surprise." Jim Kehoe, president of the New Jersey State Association of Pipe Trades, said that the project would have created 550 construction jobs. In a statement, would-be pipeline builder South Jersey Gas said it is "disappointed" that it needed "to review our options."

Also reporting on the story are the Asbury Park (NJ) Press (1/9, 324K), the Press of Atlantic City (NJ) (1/12,

179K), and the Cape May County (NJ) Herald (1/12, 6K).

TEXAS, KANSAS RESIDENTS WONDER IF FRACKING IS LINKED TO RECENT TREMORS. The CBS Evening News (1/11, story 6, 2:25, Axelrod, 5.58M) reported that residents in Azle, Texas are wondering if oil and natural gas drilling nearby is causing the dozens of tremors they have been experiencing recently. CBS' Manuel Bojorquez reported that the town "its on top of Barnett Shale, a geographic formation where natural gas and oil are being extracted" and the waste water from those "operations is discarded through pressurized injections into underground wells," six of which are located near Azle. Bojorquez reported that, "since November, the US Geological Survey recorded 32 earthquakes in the area ranging from magnitude 2.0 to 3.7." According to Bojorquez, Texas Oil and Gas Association Executive Vice President Deb Hastings doesn't "see a clear connection" between the earthquakes and the oil and natural gas drilling, "but supports a review."

Meanwhile, the Kansas City (MO) Star (1/11, Hendricks, 1.11M) reported that Kansas officials and scientists have launched an investigation into the earthquake that occurred on December 16 along the Kansas-Oklahoma border to see fracking had anything to do with the tremor. The Kansas City Star reported that there are four disposable wells near the earthquake's epicenter and "scientists have long known that injecting fluids deep into the earth can trigger earthquakes."

TENSION REVOLVES AROUND FOSSIL FUEL DEVELOPMENT IN UTAH. The Deseret (UT) News (1/13, 274K) reports that "while environmental groups and Utah's political conservatives batter each over fossil fuel development and have entrenched battle lines, there are examples of where compromise and alternative approaches are building solutions to the strife." Rob Bishop is "trying to broker a solution that strikes at compromise." He said, "One of the things I am trying to accomplish is that we quit fighting over all these lands. There are lands in Utah that are deserving of conservation status. There are also lands that should be developed for their energy."

The Deseret (UT) News (1/13, 274K) reports that "Utah Gov. Gary Herbert, his energy adviser Cody Stewart and a bevy of political conservatives believe control of those resources that sit on federal lands could help fund the state's struggling education system and an entire slate of other pressing needs." According to the article, "they need only look to North Dakota — thriving with the nation's No. 1 economy because of the Bakken oil boom — to argue that federal land management policies are stifling Utah's 'resource' potential." Kathleen Sgamma, vice president of governmental affairs and public relations, which represents independent oil and gas producers in the West, said, "We have 11 projects proposed in Utah that are in the environmental analysis stage with the Bureau of Land Management. If we give government the benefit of the doubt, it should take about three years to get through the environmental analysis stage. We have projects over that three-year mark." Sgamma said that "as a result, industry is directing its attention to state-owned or private lands or moving out of Utah altogether."

NUMBER OF ORPHANED WELLS IN WYOMING RISING. The Gillette (WY) News Record (1/12, 19K) reports that currently, "there are 6,924 plugged and abandoned coal-bed methane wells in Campbell County, according to the Wyoming Oil and Gas Conservation Commission," and "of those wells, 5,202 are on fee or state land," while "the rest are on federal land." The article notes that "there also are wells that are orphaned — wells that the operators walked away from, leaving them unreclaimed," and "the responsibility of plugging these wells falls on the Oil and Gas Commission if the wells are on state or private land, or to the Bureau of Land Management, if they are on federal land." It adds that "since production peaked in 2009 at 580 million thousand cubic feet, the number of orphaned holes has been rising," and "there are about 1,220 abandoned wells on state and fee (private) land in Wyoming, most of which are in the Powder River Basin, according to Gov. Matt Mead's office."

DORRANCE FAN COMPLEX TO BE DEMOLISHED. The Wilkes-Barre (PA) Citizens' Voice (1/12, 83K) reports that the Office of Surface Mining Reclamation and Enforcement and the state Department of Environmental Protection's Bureau of Abandoned Mine Reclamation are "teaming up to demolish and remove the Dorrance Colliery fan complex off Courtright Avenue in Wilkes-Barre, near the Susquehanna River." The article notes that "crucial parts of the complex will be saved: A 1883 Guibal fan, 1883 Pittston steam engine, 1908 Dickson-Guibal fan and matching Corliss steam engine will be preserved, as well as other historic artifacts at the site."

ADDITIONAL COVERAGE OF HOUSE PANEL HEARING ON "WAR ON COAL." Additional coverage of the House Natural Resources Committee hearing, where in Robert Knox, an assistant inspector general for investigations who's been looking into the Office of Surface Mining Reclamation and Enforcement at the

Department of the Interior, testified was provided by the "Heard On The Hill" blog of [Roll Call](#) (1/12, Subscription Publication, 87K) and the [Bismarck \(ND\) Tribune](#) (1/12, 22K).

Offshore Energy Development:

FEDERAL APPEALS COURT UPHOLDS APPROVAL OF BP OIL SPILL SETTLEMENT. The AP (1/11, Kunzelman, Johnson) reported that, in a 2-1 decision, the Fifth US Circuit Court Of Appeals "on Friday upheld" US District Judge Carl Barbier's "approval of the company's multibillion-dollar settlement with lawyers for businesses and residents who claim the massive 2010 oil spill in the Gulf of Mexico cost them money." The plaintiffs' attorneys Steve Herman and Jim Roy called Friday's ruling "an enormous victory for the Gulf, and an important step forward in ensuring that every eligible claimant is fully compensated according to the objective, transparent formulas spelled out in the settlement agreement that BP co-authored and agreed to." Meanwhile, BP spokesman Geoff Morrell said that "the company 'is assessing its legal options and the further implications of the Fifth Circuit's decision'" and "will continue to press its position on the proper interpretation of the settlement agreement's provisions requiring a causal nexus between a claimant's injury and the spill." The Wall Street Journal (1/11, Fowler, Subscription Publication, 5.91M) and Reuters (1/12) provides similar coverage on the topic.

BOEM EXPECTS TO RELEASE REPORT NEXT MONTH ON EFFECTS OF ATLANTIC SEISMIC TESTING.

The [FuelFix](#) (1/10, 7K) reports that at a House Natural Resources subcommittee on Friday, Walter Cruikshank, the deputy director of the BOEM, that the agency is "on track" to issue "a final assessment of the environmental effects of a new generation of seismic research in US Atlantic waters" by the end of February, almost "two years after publishing a first draft." Cruikshank called the environmental review "particularly complicated." He said, "There are a lot of species out there and a lot of ocean to cover. We're continuing to learn new things as we conduct this research. There was a wealth of information that came in and had to be evaluated."

The [Mcclatchy](#) (1/10, Cockerham, 95K) reports that "no environmental groups were invited to testify at Friday's House of Representatives hearing on air guns, chaired by Rep. Doug Lamborn, a Republican drilling supporter from Colorado." The article also notes that "politicians and the oil industry are pushing hard for the president to open up the Atlantic waters to oil drilling, with the industry's main trade group suggesting the most economic potential for revenue and jobs lies in North Carolina, followed by South Carolina and then Virginia." Meanwhile, "some 50 members of Congress, including a few Republicans, are also opposing the tests and have sent letters to President Barack Obama suggesting that the Department of Interior's own estimates indicate that up to 138,500 marine mammals could be injured." The Mcclatchy piece was also picked up by the [Redding \(CA\) Record-Searchlight](#) (1/12, 92K), the [Clark County \(WA\) Columbian](#) (1/10, 116K), the [Rock Hill \(SC\) Herald](#) (1/10, 89K), the [Olympian \(WA\)](#) (1/10, 119K), and the [St. Augustine \(FL\) Record](#) (1/12, 68K).

Also reporting on the story are the [Washington Examiner](#) (1/12, Colman, 319K), the [Greenville \(SC\) News](#) (1/11, 204K), the [Hilton Head \(SC\) Island Packet](#) (1/10, 90K), the [Politicker \(NJ\)](#) (1/12, 3K), and [WLTX-TV Columbia, SC](#) (1/12, 44K).

Democrats Raise Concerns Of Offshore Drilling's Impact On Marine Life. The [National Journal](#) (1/12, Subscription Publication, 427K) reports that House Natural Resources Committee ranking member Peter DeFazio, along with Democratic Reps. Frank Pallone and Rush Holt of New Jersey and Joe Garcia of Florida are "raising concerns over the impact of offshore drilling activity on marine ecosystems." The lawmakers "sent a letter to Interior Secretary Sally Jewell and Acting Administrator of the National Oceanic and Atmospheric Administration Kathryn Sullivan on Thursday asking for information on the potential for offshore drilling activities to disrupt marine habitats and wildlife." The letter also "raises the concern that Interior Department officials have not always taken into account how drilling could affect biodiversity in decisions to open up new areas to offshore exploration."

Concerns Raised Over Noise On Marine Life. The [Wilmington \(DE\) News Journal](#) (1/10, Murray, 295K) reports that "researchers, conservationists and environmental advocates are increasingly concerned about the impact... noise is having on marine life and the marine environment." According to the article, "it may keep marine life from using normal habitats, disrupt commercial fishing or make it hard for marine mammals or fish to find mates, food or avoid predators."

Kure Beach Mayor Supports Seismic Testing. The Wilmington (NC) Star News (1/11, 123K) reports that Kure Beach Mayor Dean Lambeth "last month signed a letter endorsing seismic testing for oil and gas off the North Carolina coast, becoming the first beach town official in the Cape Fear region to take a public stance on the matter." Lambeth said, "My job as mayor is to pursue every revenue stream open to the city. In the next 10 to 15 years, most of the houses in Kure Beach are going to be full-time residential. We've got to start making plans to make sure that the water, sewer and police infrastructure can support that."

CONGRESS PRODDED ON OFFSHORE-DRILLING SAFETY. The National Journal (1/12, Subscription Publication, 427K) reports that "three years after completing an investigation into the Deepwater Horizon oil spill, members of a presidential panel say Congress has failed to adopt necessary offshore-drilling safety reforms and environmental protections." In an interview, Frances Ulmer, the chair of the US Arctic Research Commission and a member of the National Commission on the BP Deepwater Horizon Oil Spill and Offshore Drilling, said, "Unfortunately Congress has really not acted to protect against future disasters."

ENVIRONMENTAL GROUPS CALL SHELL'S ARCTIC DRILLING PLAN INCOMPLETE. The Law 360 (1/12, 18K) reports that the Alaska Wilderness League, Greenpeace and other conservation groups told the BOEM "on Thursday that Shell Gulf of Mexico Inc.'s revised exploration plan for the Chukchi Sea was incomplete and flawed."

Tackling America's Water Challenges:

BOR CUTS RELEASES FROM FOLSOM DAM. The Sacramento (CA) Bee (1/12, 749K) reports that "in response to extreme dry conditions," the BOR "cut water releases from Folsom Dam into the river gradually last week from 1,100 cubic feet per second to 500 cfs Friday." According to the article, "the strict water-conservation measures have created the lowest flows anyone has seen in a generation, which stands in contrast to the median flow for January of 1,700 cfs for the past 15 years."

Also reporting on the story are the Merced (CA) Sun-Star (1/12, 86K) and KTXL-TV Sacramento, CA (1/10, 19K).

BOR HOLDS OPEN HOUSE ON SCOGGINS DAM. The Oregonian (1/12, 751K) reports that "more than 50 people, from Forest Grove residents to city officials, filled the Community Auditorium in Forest Grove Thursday night to hear how a possible failure at Scoggins Dam from an earthquake would impact homes in western Washington County." Steven Jarsky, deputy regional director for the Northwest region at the BOR, said, "It's all prediction. It's all based on probability. We don't know how big a quake would be ... All we could do is take the best science and come up with the best possibility of what would happen."

BOR SEEKS INPUT ON LAKE BERRYESSA RESORTS. The Napa Valley (CA) Register (1/13, 36K) reports that the BOR "is holding an open house Thursday evening at the Elks Lodge in Napa devoted to eliciting the public's ideas and thoughts on what the future of Lake Berryessa's "resorts should be." The bureau "will have seven stations set up to provide the public with information about recreational opportunities at the lake, its history and how Reclamation manages recreation." The BOR is "looking for comments on five of the seven resorts at the lake that remain without long-term concessionaires — Steele Canyon, Putah Canyon, Berryessa Point, Monticello Shores and Spanish Flat."

ADDITIONAL COVERAGE OF BAY DELTA CONSERVATION PLAN. Additional coverage of the Bay Delta Conservation Plan was provided by the Santa Clarita Valley (CA) Signal (1/12, 13K).

Empowering Native American Communities:

MAKAH SECOND TRIBE IN INTERIOR BUY-BACK PLAN. The Peninsula (WA) Daily News (1/12, 41K) reports that the Interior Department will "soon offer to buy land from individual property owners on the Makah reservation under a new federal program aimed at helping tribes consolidate ownership." The article notes that "the Makah reservation is the second in the nation to be part of Interior's Land Buy-Back Program for Tribal Nations." According to Dale Denney, Realty officer for the Makah, "the tribe has been allocated \$2.55 million to buy fractionated lots within the tribe's 30,000-acre reservation." The tribe "now has 14 allotments it has appraised to buy under the program." Genevieve Giaccardo, tribal relations adviser for Interior, said, "It's exciting to see the

numbers with the Makah and Pine Ridge and seeing how things are beginning to work out. We have a lot of work to do and a lot of logistics to work out. But these tribes have done a great job of finding ways to make this work."

BIA OFFICE OF SPECIAL TRUSTEE CRITICIZED FOR FAILING TO FIND RECIPIENTS OF COBELL

SETTLEMENT. The Indian Country Today Media Network (1/12, 21K) runs a political cartoon by Marty Two Bulls criticizing the BIA Office of the Special Trustee for failing to find the 30,000 claimants that are owed \$32 million under the Cobell settlement.

HUD WITHHOLDS \$3 MILLION FROM CHUKCHANSI TRIBE. The Modesto (CA) Bee (1/11, 208K) reports that the federal Housing and Urban Development Department will "continue to withhold money from the Chukchansi Indian Housing Authority after a federal judge ruled the agency did not have to release funds to one tribal faction." US District Judge David Campbell said "he was unable to determine the tribe's rightful leadership in order to release the money." Campbell said that "the leadership question...must be settled by the Department of the Interior's Board of Indian Appeals, which has not issued a decision."

HASKELL INDIAN NATIONS UNIVERSITY NAMES NEW PRESIDENT. The AP (1/12) reports that Haskell Indian Nations University in Lawrence has "named a longtime university employee to the school's top position." The federal Bureau of Indian Education "announced Friday that Venida Chenault, Haskell's vice president of academic affairs since 2004, will become the school's president effective Sunday."

ONEIDA SETTLEMENT SENT TO JUDGE. The Rome (NY) Sentinel (1/12, 35K) reports that "the wide-ranging settlement negotiated last year" between the state, tribe, and Oneida Indian Nation and Madison counties "has been sent to a federal judge for approval" after being approved by the Interior Department. The agreement has been submitted to US District Court Judge Lawrence E. Kahn for his approval, according to acting Oneida County Attorney Harris Samuels.

NORTH CAROLINA GOV MCCRORY'S AIDES SPENT MONTHS MULLING CATAWBA'S BID FOR CASINO.

The Columbus (IN) Republic (1/13, 80K) reports that "Gov. Pat McCrory's administration spent months discussing a South Carolina Indian tribe's proposal to build a gambling casino in North Carolina, an idea that the governor's office later downplayed as a "local initiative" after news of the plan surfaced." According to the article, "internal documents released under the state public records law show the talks about a proposed casino in Kings Mountain off Interstate 85 started in April, included two of the governor's top economic advisers and covered revenue sharing that could have meant millions of dollars for the state treasury."

JAMUL INDIAN VILLAGE BEGINS CASINO PROJECT BEGINS. The U-T San Diego (1/10, 647K) reports that Jamul Indian Village said "Friday it has begun construction of the casino it has long sought for its land on state Route 94, an announcement that drew quick promises of lawsuits from opponents." According to the article, "after seeing Friday's news release from the Jamul tribe about its plans, county Supervisor Dianne Jacob said the county would be filing a lawsuit." In September, "the committee and the Jamul Community Church filed suit against the National Indian Gaming Commission, the Bureau of Indian Affairs and others in federal court in Sacramento in an effort to stop Jamul Indian Village from building the 203,000-square-foot, three-story casino."

TRIBAL CHAIRMAN URGES PASSAGE OF "TRIBAL GENERAL WELFARE EXCLUSION ACT" IN 2014.

For the "Congress Blog" of The Hill (1/12, Shepherd, 194K), Robert Shepherd, the tribal chairman of Sisseton Wahpeton Oyate on the Lake Traverse Reservation, urges Congress to pass the Tribal General Welfare Exclusion Act. The legislation would "clarify that payments, programs or services provided by tribal governments for the general welfare of their people are excluded from federal income tax." He concludes that "passing the Tribal General Welfare Exclusion Act would be an excellent example of common agreement and bipartisanship that can help mark 2014 as a very positive and productive legislative session."

Top National News:

OBAMA VOWS TO VETO ADDITIONAL IRAN SANCTIONS BEFORE NUCLEAR DEAL PLAYS OUT. US coverage of the Sunday announcement that the P5+1 and Iran's preliminary agreement regarding Tehran's nuclear program will take effect starting on January 20 emphasizes the bipartisan support for legislation that would impose additional sanctions on Iran if it fails to honor its commitments. On ABC World News (1/12, story

5, 1:15, Karl, 7.43M), the only network newscast that aired Sunday evening, Jonathan Karl reported that "there is a big movement in Congress right now, including many top Democrats, to slap on new sanctions right now." According to Karl many members of Congress "think Iran is getting rewarded without fully stopping" its nuclear program.

President Obama's threat to veto new sanctions is noted in many headlines. For instance, Reuters (1/12, Mohammed, Rampton) titles its reporting on Sunday's developments, "Obama Hails Iran Deal, Argues Against New Sanctions." According to a front-page article in the New York Times (1/13, A1, Gordon, Schmitt, Subscription Publication, 9.61M), the "interim agreement is, in effect, an elaborate pause button that provides a basis for pursuing a more far-reaching accord."

Harris Faulkner, on Fox News' Fox Report (1/12, 1.66M), said, "You'll recall our key ally in the Middle East, Israel, has wamed this is the worst deal possible for the world, but now it is moving forward." Kyra Phillips, on CNN (1/12, 14.53M) Sunday evening, reported that the White House says Iran is getting only "modest relief" from the sanctions as part of the preliminary agreement.

Due to the timing of the announcement, neither the deal's timeline nor the debate over additional sanctions was a focus of discussion on the Sunday morning news shows. On ABC World News (1/12, story 5, 1:15, Karl, 7.43M), David Muir reported that in a "major development," President Obama has announced that "the US and other countries will begin to give Iran some relief from...economic sanctions," while Iran has "agree[d] to start curbing their nuclear activities." Muir noted that last year, President Obama made "the first direct contact" between a US president and an Iranian president since 1979. Jonathan Karl went on to report that the White House "is hailing this as the best chance to get a big agreement that will finally put to end fears that Iran is developing a nuclear weapon."

USA Today (1/12, Jackson, 5.82M) reports that in a written statement issued on Sunday, the President said "the clock starts ticking Jan. 20 on a six-month nuclear deal with Iran," and "vowed to veto any congressional legislation that slaps new sanctions on Iran, saying it would damage prospects for a long-term nuclear agreement." The President wrote: "I have no illusions about how hard it will be to achieve this objective, but for the sake of our national security and the peace and security of the world, now is the time to give diplomacy a chance to succeed." USA Today says that "under the six-month agreement...Iran would restrict its uranium enrichment program in exchange for the loosening of economic" that the President "credited...with forcing Iran's leaders to the negotiating table." The Wall Street Journal (1/12, A1, Solomon, Lee, Norman, Subscription Publication, 5.91M) quotes the President as saying, "I welcome this important step forward, and we will now focus on the critical work of pursuing a comprehensive resolution that addresses our concerns over Iran's nuclear program."

Under the headline, "Obama Issues Veto Threat For New Iran Sanctions During Nuclear Deal's Implementation," the Huffington Post (1/12, Reilly, 11.54M) reports that the President contended that "imposing additional sanctions now will only risk derailing our efforts to resolve this issue peacefully, and I will veto any legislation enacting new sanctions during the negotiation." The Huffington Post notes that legislation that would impose additional sanctions on Iran "should the country break the deal" has the support of "a majority" in the Senate, including Sens. Chuck Schumer and Sen. Robert Menendez, the chairman of the Senate Foreign Relations Committee. According to Reuters (1/12, Mohammed, Rampton), in an article titled, "Obama Hails Iran Deal, Argues Against New Sanctions," 43 Republican senators and 16 Senate Democrats have said they support new sanctions.

The Christian Science Monitor (1/13, Knickerbocker, 540K) reports that in a statement released Sunday, Secretary of State Kerry said, "I very much appreciate Congress' critical role in imposing the sanctions that brought Iran to the table, but I feel just as strongly that now is not the time to impose additional sanctions that could threaten the entire negotiating process. Now is not the time for politics." In a very brief report titled, "Kerry Lauds Deal To Freeze Iran's Nuclear Program," the AP (1/12, Jakes) says Kerry "told reporters in Paris that the U.S. will keep a close eye on Iran during this interim period," which he noted "will be the first time in nearly a decade that Iran isn't advancing its nuclear program."

In an online article titled, "White House Fights Iran Sanctions Bill As Nuclear Deal Start Date Announced," Fox News (1/13, 6.72M) says the very fact that the President felt he had to reiterate his veto threat on the same day that the deal's timeline was solidified is "a sign of how sanctions legislation...is gaining momentum." Fox notes

that on Friday, Menendez said, "The need for additional prospective sanctions is already clear. ... This is hardly a march to war." The Washington Examiner (1/13, Crabtree, 319K) reports that according to "Senate aides," a "veto-proof majority – senators numbering well into the 70s – have pledged to support the bill if it comes to...a vote." The Examiner notes that Senate Democrats, including DSCC chair Sen. Michael Bennet "are defying Obama's warnings about supporting a new Iran sanctions bill and have signed on over the last week." An anonymous "Senate aide" is quoted as saying, "A lot of Democrats we're talking to say we have no favors to give Obama right now."

However, the Huffington Post (1/12, Hersh, 11.54M) reports that "a senior Senate Democratic aide" says that the sanctions legislation nevertheless "has little chance of coming to a vote in the near future."

The Washington Post (1/13, A1, Gearan, 4.28M) reports that Sen. Mark Kirk "scoffed at" the White House's "rationale" for putting aside new sanctions for the next six months. In a statement released Sunday, Kirk wrote: "Beginning Jan. 20th, the administration will give the world's leading state sponsor of terrorism billions of dollars while allowing the mullahs to keep their illicit nuclear infrastructure in place." Kirk added, "I am worried the administration's policies will either lead to Iranian nuclear weapons or Israeli air strikes."

On Fox News' Fox Report (1/12, 1.66M), correspondent James Rosen reported that Rep. Ed Royce (R-CA), the chairman of the House Foreign Affairs Committee, released a statement noting that the government of Iran "has announced in recent weeks it would continue to advance technology needed to make fuel for nuclear weapons." Royce added, "This agreement takes us down that path where sanctions pressure is relieved, but Iran maintains its ability to produce a nuclear weapon."

The Hill (1/13, Herb, 194K) reports that House Majority Leader Eric Cantor, "who has pushed sanctions in the House, said that the implementation announced Sunday 'only furthers a deeply flawed agreement that legitimizes Iran's flagrant violations of multiple U.N. Security Council resolutions calling for the full suspension of its nuclear program.'"

On the other hand, Politico (1/13, Dove, 464K) reports that an anonymous "senior administration official" has "pointed out the Iranian foreign minister has said publicly that the Iranians would leave negotiations if new American sanctions were passed, and noted that the American intelligence assessment is that they would hold to this." This same official maintains that "new sanctions could actually empower Iran, giving them the power to appeal to the international community by saying the United States was acting improperly, potentially fracturing the broader sanctions." Politico adds that while the Administration has not "specif[ied] what, if anything, would happen at the end of the six-month period should no deal be reached," it has been reported that the President "would then support new, more severe sanctions," or even "military action."

The AP (1/12, Elliot, Dahlberg, Moulson, Jakes, Gambrell) reports that as of January 20, Iran will allow UN inspectors access to its nuclear facilities. According to the AP, Iran's "official IRNA news agency" is reporting that the government of Iran "will grant the United Nations' atomic agency access to its nuclear facilities and its centrifuge production lines to confirm it is complying with terms of the deal." The AP adds that as part of the agreement, Iran will "limit its uranium enrichment to 5 percent – the grade commonly used to power reactors" – and "stop producing 20 percent enriched uranium – which is only a technical step away from weapons-grade material." The AP reports that Iran has also agreed to "neutralize its 20 percent stockpile over the six months." The Washington Times (1/13, Wolfgang, 417K) notes that "as part of the agreement...Iran will not construct new centrifuges and also will allow more frequent and thorough inspections of its existing facilities."

The Los Angeles Times (1/13, Richter, 3.07M) reports that on Sunday, Kerry "hailed the implementation agreement as a 'critical, significant step' toward reaching a deal that will prevent Iran from obtaining a nuclear bomb making capability." According to the Times, Abbas Araqchi, Iran's "chief negotiator," said Sunday that the "negotiations for a longer term deal probably will start about two or three weeks after the implementation begins."

The Wall Street Journal (1/12, A1, Solomon, Lee, Norman, Subscription Publication, 5.91M) reports that on Sunday, the EU's High Representative for Foreign Affairs and Security Policy, Catherine Ashton, said, "Thanks to this agreement on the implementation, the foundations for a coherent, robust and smooth implementation of the Joint Plan of Action over the six months period have been laid,"

Reuters (1/12, Mohammed, Rampton) reports that US officials have confirmed that the total value of the benefits Iran will reap as a result of the easing of the sanctions is about \$7 billion, including \$4.2 billion in oil export revenue that is currently off limits to the Iranians. In an online article, Al Jazeera English (1/13, 79K) reports that an unidentified "US official" revealed that Iran "will get a first installment of \$550m of \$4.2bn being unblocked under the nuclear deal around February 1." The official is quoted as saying, "The installment schedule starts on February 1 and the payments are evenly distributed across the 180 days." According to CBS News (1/13, 3.87M), "U.S. officials told reporters Sunday the most immediate sanctions that will be suspended will be on Iran's imports of goods and services for autos, oil, gold and precious metals."

AFP (1/13, Julien) describes the preliminary deal as "major achievement" Iranian President Hassan Rouhani, "who won a first-round electoral victory over a pool of conservatives last year by vowing a more diplomatic approach with the West after eight years of stalled talks and escalating sanctions under his hardline predecessor, Mahmoud Ahmadinejad." Reuters (1/12, Hafezi, Pawlak) reports that in a reference the countries his government is negotiations with, Araqchi, appearing on Iranian television, said, "We don't trust them," so "each step has been designed in a way that allows us to stop carrying out our commitments if we see the other party is not fulfilling its commitments."

The Jerusalem Post (1/13, Wilner, 25K) reports that Israeli Prime Minister Benjamin Netanyahu's office "had no response to the announcement that the deal will come into effect next week, even though Jerusalem was harshly critical of the agreement when it was first signed in November."

Kerry: Nuclear Deal A Higher Priority Than Limiting Iran's Aid To Assad. The New York Times (1/13, A1, Gordon, Schmitt, Subscription Publication, 9.61M) says "the agreement face[s] opposition from Iranian hardliners and Israeli leaders," and "comes as Tehran has sought to expand its influence in the Middle East by providing weapons and sometimes members of its own paramilitary Quds Force to Syria." The Times reports that on Sunday, Secretary Kerry "said that he had raised the Syrian conflict with the Iranian foreign minister, Mohammad Javad Zarif," but "made clear that cementing a nuclear deal had been a much higher priority than trying to change Iran's position on Syria." Kerry is quoted as saying, "Yes, I have raised the subject, but we've been so focused and so intent on the nuclear file that we have not dug into it in any appreciably substantive way at this time."

Radio Free Europe (1/13, 6K) reports that on Monday, Kerry and Russian Foreign Minister Sergei Lavrov will "meet in Paris...in a bid to decide Iran's role in ending Syria's civil war." RFE also reports that Zarif "plans to visit Damascus 'in the next few days,'" according to Iranian state media.

Sharif Nashashibi, in a piece for Al Arabiya (1/13, Nashashibi, 22K) titled, "Iran Should Be At Geneva II," argues that "regardless of one's views on [Iran's] direct and substantial support for" Assad, the Iranians' "absence will make the chances of the conference's success even slimmer than they already are." Nashashibi goes on to say that as "one of the biggest players in the conflict," Iran's "participation may encourage it to play a constructive role in finding a resolution," while "exclusion will only encourage it to play spoiler and continue its support for Assad."

CFR's Takeyh: Nuclear Deal Unlikely To Be A Harbinger Of Closer US-Iran Ties. In an op-ed for the Washington Post (1/13, Takeyh, 4.28M), Ray Takeyh, a senior fellow at the Council on Foreign Relations, writes that "an unusual fear is gripping the Arab world," which is that "nuclear diplomacy may yet bring Iran and the United States into a close regional embrace." However, according to Takeyh, "Whatever confidence-building measures Iranian diplomats may be negotiating," Ayatollah Khamenei "insisted as recently as late November that Iran is 'challenging the influence of America in the region and is extending its own influence.'" Takeyh says the "the key actors defining Iran's regional policy are not its urbane diplomats...but the Revolutionary Guard Corps, particularly the famed Quds Force."

LAWMAKERS SPAR OVER EXTENDING UNEMPLOYMENT BENEFITS. Members of both parties touched on the debate over extending unemployment benefits during appearances on the Sunday morning shows. Republicans generally didn't rule out the possibility of extending benefits, but called for offsets to pay for it or for efforts generally to improve the economy. For example, Sen. John McCain said on CNN's State Of The Union (1/12, Crowley), "Sen. Reid will not allow us a single amendment on the unemployment insurance. We think we know ways to make it better. Not a single amendment is allowed. ... We've had four Republican amendments in

the last several months in the United States Senate.”

Sen. Marco Rubio said on CBS' Face The Nation (1/12, Schieffer, 2.64M), “There is a general consensus that these programs need to be extended, but they need to be paid for. And in addition to that, maybe not as part of this effort right away, but in the long term we need to figure out way to reform those programs so that we get more people back to work.”

Rep. Adam Kinzinger (R) said on ABC's This Week (1/12, Raddatz, 2.73M), “I think if we can pay for it and Harry Reid can provide something, I'll take a look at what it is. The reality, though, is this is, kind of, a straw man of the fact that we still live in a very terrible economy. The best unemployment insurance we can give people is a job, get them an opportunity to come back.”

Rep. Steve Southerland (R) said on Fox News Sunday (1/12, Roberts), “North Carolina's emergency unemployment ended and they created 35,000 jobs and the unemployment rate has gone from 8.9% to 7.4%. So let's learn from that how we could apply that on a more broader scale, because the Republicans believe we've got to get this economy moving.”

Democrats, on the other hand, focused on the need for extending benefits, and criticized Republicans for not agreeing immediately. Rep. Elijah Cummings (D) said on CBS' Face The Nation (1/12, Schieffer, 2.64M), “There are so many people who are depending on that. Keep in mind that extending those benefits will cover 1.3 million people, plus another two million for 2014. Yes, I'm hoping that they will.”

Rep. Chris Van Hollen (D) said on Fox News Sunday (1/12, Roberts), “We put forward a proposal in the House before we took the winter break to pay for it by cutting excessive ag subsidies. We were denied an opportunity to even vote on that measure. The reality is, you listen to people like Rand Paul. They take the insulting position that these people are sitting back taking unemployment compensation when they're required to look for work.”

Gov. Martin O'Malley said on CNN's State Of The Union (1/12, Crowley), “A lot of the ideologues that now steer the Republican Party always seem to find money for continued tax cuts for the wealthiest one percent of Americans. But when it comes to those moms and dads that are still looking for work after a huge structural recession, they start squawking about fiscal responsibility.”

Donna Brazile said on ABC's This Week (1/12, Raddatz, 2.73M), “It's really up to Sen. Reid being able to get those six or seven Republicans back on the same page, figuring out a way to help 1.3 million Americans. Because, if we don't help them, this is going to hurt the economy. It's going to create more unemployment. Employment insurance is something that we should guarantee to people who are still out there looking for work.”

War On Poverty Seen As Having Mixed Results. In his column for the Washington Post (1/13, Samuelson, 4.28M), Robert J. Samuelson writes that a “furious debate” over the impact of the War on Poverty has been ongoing. He says that we “won in the sense that programs for the poor have dramatically reduced hardship and kept millions from destitution.” Noting that the poverty rate is unchanged over the last 50 years, Samuelson says that the “official poverty rate is a lousy indicator of people's material well-being” because of what it excludes. However, we “lost” the war over LBJs real target, “which aimed to catapult the poor into the economic mainstream.” Overall, Samuelson says that the “War on Poverty's success at strengthening the social safety net — a boon in the Great Recession — should not obscure its failure as an engine of self-improvement.”

Rise Of Single-Parent Families Seen As Driving Income Inequality. In an op-ed for the Wall Street Journal (1/13, Fleischer, Subscription Publication, 5.91M), Ari Fleischer writes that if the President wishes to reduce income inequality, he should take his focus off of redistribution and instead fight the breakdown of the family. Fleischer argues that children born to single-parent families are far more likely to be poor, and it is a major reason why income inequality exists. He concludes that the best way to fight inequality is to convince people to stay in school, get married, then have children.

Krugman Hammers Republicans On Attitude Toward Poor. In his column for the New York Times (1/13, Subscription Publication, 9.61M), Paul Krugman writes that the GOP reputation for “reverse Robin-Hoodism” is difficult to shake because it is “justified.” He says that it is “not much of an exaggeration to say that right now Republicans are doing all they can to hurt the poor, and they would have inflicted vast additional harm if they had

won the 2012 election." Krugman asks if the GOP can "change their approach," but says, "The answer, I'm sorry to say, is almost surely no."

WEST VIRGINIA SPILL RAISES QUESTIONS ABOUT REGULATIONS. ABC World News (1/12, story 6, 1:45, Muir, 7.43M) looks at the chemical spill in West Virginia and asks, "how long were those chemicals there without being inspected?" ABC (Saulny) adds that officials are racing to "complete hundreds of tests of the drinking water around the Charleston area," and "what they're finding is encouraging" as "more samples coming back showing a low level of chemical in the water." Still, "an all-clear for the water supply could still be days away" and the region's "entire plumbing system" will "need to be flushed out." ABC (Saulny) adds that state officials said that inspections of the chemical plant responsible "weren't required because the company didn't produce the chemical, only stored it."

On its front page, the Wall Street Journal (1/13, A1, Berzon, Maher, Subscription Publication, 5.91M) reports that the storage site was basically unregulated by the state, which is prompting questions about whether localities have an understanding on the potential threats to their water supplies. While the damage appears small, the incident showed how a company could avoid scrutiny.

The New York Times (1/13, Davenport, Southall, Subscription Publication, 9.61M) reports that the spill "came in a state with a long and troubled history of regulating the coal and chemical companies that form the heart of its economy." Environmental advocates "hoped the leak would force state and national regulators to strengthen enforcement of environmental laws," though some fear it will be viewed as an "isolated event." Gov. Earl Ray Tomblin (D) said he was working with state officials "to come up with recommendations aimed at avoiding future leaks."

The Washington Post (1/12, A1, Achenbach, 4.28M) reports that a chemical used for cleaning coal "has leaked from an old tank along the Elk and invaded the water supply, a crisis that has affected nearly 300,000 people in nine counties and effectively closed the largest city in the state." Residents "can't drink the water, bathe in it or do laundry with it. It's good only for flushing." The leak was tracked to Freedom Industries, where it had "leaked from an inch-wide hole in the bottom of one tank, pooled in a containment area and then seeped through a porous cinder-block retaining wall, down the bank and into the river."

Leak Prompts Terror Concerns. USA Today (1/12, Hampson, 5.82M) reports that chemical spill has prompted a broader question: "If a simple accident involving a relatively benign chemical can cause such havoc, what about an attack on a reservoir with a far more potent toxin?" Locals said that terrorists could take advantage of such a problem.

Editorial Wrap-Up:

NEW YORK TIMES. "Treading Water On Syria." In an editorial, the New York Times (1/13, Subscription Publication, 9.61M) says that "there is no indication that the United States or any other power has the influence to bring [the civil war in Syria] to an end." The paper adds that "moderates have long been fractured and the United States has been slow to provide them with supplies and training." The Times says that US officials are "considering resuming the nonlethal assistance" that ended in December, and claims that this "could strengthen the moderates and encourage them to attend peace talks." In addition, it might also "reassure the Saudis," who want greater US involvement in Syria and "fear" the possibility of US cooperation with Iran. The Times acknowledge that while the "American aid could backfire" the "risk may be worth it."

"Missing Executive Actions." In an editorial, the New York Times (1/13, Subscription Publication, 9.61M) argues that in some areas, the President has been reticent to issue executive orders. The Times cites his "baffling refusal to issue an executive order banning discrimination by federal contractors based on sexual orientation or gender identity." In addition, the Times urges the President to issue executive orders concerning "a code of conduct for overseas factories that make uniforms and other clothing for the government," state compliance with submitting "notice of involuntary outpatient mental health treatment and of inpatient commitments to the national database of disqualified gun purchasers," and to end "a longstanding misinterpretation of the Helms amendment, which prohibits foreign aid money from being used to 'pay for the performance of abortion as a method of family planning or to motivate or coerce any person to practice

abortions.”

WASHINGTON POST. “Road To Democracy.” In an editorial, the Washington Post (1/13, 4.28M) reports hails the “District of Columbia Paperwork Reduction Act,” introduced in Congress by Del. Eleanor Holmes Norton (D), which “seeks to eliminate the congressional review period for all legislation passed by the D.C. Council and signed into law by the mayor.” The Post hopes that the GOP-controlled House will act on the legislation.

“Will Maryland Go To Pot?” The Washington Post (1/13, 4.28M) editorializes that Maryland Governor Martin O’Malley’s opposition to “following Colorado and Washington state down the path of legalizing marijuana sales” probably “seals the fate of the major pro-pot bills introduced in the state legislature this year,” but still, the Post notes, “momentum for legalization is building,” with public opinion “tilted clearly toward more lenient treatment of people who possess small amounts of pot and, more gradually, outright legalization.” But the Post urges caution, and contends that the “wise course for states considering legalization, including Maryland, is to regard Colorado and Washington as data-generating laboratories.”

“A Complex Web.” In an editorial, the Washington Post (1/13, 4.28M) warns that “dark money,” with untraceable origins, is now flowing into political campaigns. In particular, it cites the efforts by “conservative billionaires” Charles and David Koch to create a system for funneling cash into races. The Post says that the Koch brothers “and others with great fortunes are adults, and if they want to participate in campaigns, they should stand up for what they believe in and do it in the open.”

WALL STREET JOURNAL. “Ariel Sharon.” An editorial in the Wall Street Journal (1/13, Subscription Publication, 5.91M) praises Ariel Sharon, arguing that throughout his career, he was consistent in his goal of ensuring security for Israel.

“To Minnesota Station.” In an editorial, the Wall Street Journal (1/13, Subscription Publication, 5.91M) says that the lengthy debate over the new farm bill is finishing up, though without significant reform. The Journal blames the current delay on a plan from Minnesota Rep. Collin Peterson (D) to create a dairy program the paper says would artificially inflate product prices. The Journal hails House Speaker John Boehner for stepping in to block any conference report containing the plan.

Washington Schedule:**TODAY'S EVENTS IN WASHINGTON.**

White House:

PRESIDENT OBAMA — Welcomes the President of the Government of the Kingdom of Spain Mariano Rajoy Brey to the White House.

VICE PRESIDENT BIDEN — Attends the funeral of former Israeli Prime Minister Ariel Sharon.

US Senate: 2 p.m. — The Senate convenes and resumes consideration of S.1845, the Unemployment Extension Act.

US House: 12 p.m. — The House will meet for Morning Hour debate and at 2:00 p.m. for legislative business, with votes postponed until 6:30 p.m.

Jan. 13 – 14. ENERGY AND COMMERCE — Energy and Power Subcommittee Vote on H.R. 3826, the Electricity Security and Affordability Act.

4 p.m. Markup begins.

Other: Jan. 12 – 16. TRB ANNUAL MEETING — The Transportation Research Board (TRB) 93rd Annual Meeting will be held. The program will attract nearly 12,000 transportation professionals from around the world to Washington, D.C. The spotlight theme for the 2014 TRB Annual Meeting is "Celebrating Our Legacy, Anticipating Our Future." <http://www.trb.org/AnnualMeeting2014/annualmeeting2014.aspx> Location: The Washington Mamott Wardman Park, Omni Shoreham, and Washington Hilton hotels.

Jan. 13 – 17. AIAA CONFERENCE — The 10th American Institute of Aeronautics and Astronautics Multidisciplinary Design Optimization Specialist Conference. <http://www.aiaa.org/EventDetail.aspx?id=18410> Keynote by Congressman Chaka Fattah (PA-02). 8:05 a.m. Location: Gaylord National Hotel & Conference Center, 201 Waterfront Street, National Harbor, Md.

BROOKINGS – SEN. GILLIBRAND, REP. RYAN — The Center on Children and Families is hosting its first annual Social Mobility Summit, with scholars, policymakers and leading politicians focused on the policy challenges posed by stagnant rates of social mobility. The Social Mobility Summit will open with a public keynote address from Sen. Kirsten Gillibrand (D-NY) and close with a public keynote address from Congressman Paul Ryan (R-Wis.). Sen. Gillibrand and Rep. Ryan will each lay out “their personal vision for how we can promote social mobility in the U.S. today.”

SECRETARY DUNCAN – EDUCATION SUMMIT — 9:10 a.m. Education Secretary Duncan will attend the National Assessment Governing Board (NAGB) Education Summit for Parent Leaders. The Secretary will discuss “why it is urgent to improve U.S. students’ performance, especially compared to the performance of their international peers, and he will highlight the need for parents to engage with their school to ensure their children are prepared to succeed.” Location: Crystal Gateway Marriott, 1700 Jefferson David Highway, 1st Floor, (Grand Ballroom Salons A-C), Arlington, Va.

PENTAGON – ITALY — 12 p.m. Secretary of Defense Chuck Hagel Hosts an honor cordon to welcome Italy’s Minister of Defense Mario Mauro to the Pentagon. The cordon will be held on the steps of the Pentagon River Entrance.

AMERICANS UNITED – UNEMPLOYMENT BENEFITS — 1 p.m. Press call to appeal to congressional Republicans “to save jobs and families from falling into poverty by restoring UI benefits now.” Congressman Sandy Levin (MI-9), Ranking Member of the House Ways and Means Committee; Brad Woodhouse, President, Americans United for Change.

SECRETARY DUNCAN – TWITTER — 8:30 p.m. Education Secretary Duncan will participate in a StuVoice Twitter chat to engage with Twitter users about President Obama’s college affordability agenda and gather their feedback about his proposals. He will also take questions from users about related policy issues.

Last Laughs:

LATE NIGHT POLITICAL HUMOR.

Jay Leno: “You know, during his press conference yesterday about the traffic scandal, Christie said that he was misled by a member of his staff. Now, don’t confuse that with Anthony Weiner. He misled his staff with his member. That was totally different.”

Jay Leno: [Referencing the closing of the George Washington Bridge] “Christie also said, ‘I had no knowledge or involvement in this issue, in its planning or its execution.’ He went on to say, ‘he knew nothing about the Watergate break-in, and he did not have sex with that woman.’ So there you go.”

Jay Leno: “Well, the new report out today shows that for the first time, most of the members of Congress are millionaires. Isn’t that unbelievable? Don’t worry, despite the money they have they are still open to taking bribes. They’re not above that.”

David Letterman: [Referencing the closing of the George Washington Bridge] “And you know why this is such a big deal? Because Chris Christie wants to be President of the United States. And this will be good because we haven’t had a president of this country with goons since Richard Nixon, so we’re very, very excited about that.”

Jimmy Fallon: “Here what people are talking about. New Jersey Governor Chris Christie. He’s in a lot of trouble because his staff shut down part of the George Washington bridge to get back at a political rival. And yesterday, Christie gave a 107-minute press conference to address the scandal. Man, last time Chris Christie talked for 107 minutes, he was ordering at IHOP.”

Cc: Sally Jewell (b)(6)@ios.doi.gov

Hi Kip and Audrey,

I just wanted to follow up with you to confirm that you received my message and provide an update on Sally's youth agenda. We had a wonderful event last week at the FDR Memorial announcing our first public-private partner and \$1M dollar commitment from American Eagle Outfitters. Attached is a link from a segment that was aired on NPR: <http://www.npr.org/player/v2/mediaPlayer.html?action=1&t=1&islist=false&id=260979925&m=261064938>

Please don't hesitate to contact me if you'd like to learn more about the effort and how you can get involved. I'd also like to learn more about the Conscious Capitalism event and any requests that you have of Sally regarding attendance and participation.

Thanks so much!

Sincerely,
David

On Wed, Nov 27, 2013 at 9:46 AM, Jayo, David <david_jayo@ios.doi.gov> wrote:

Hello, Kip and Audrey,

Thanks so much for the invitation to the Conscious Capitalism event as well as your interest in the 21st Century Conservation Service Corps (21CSC). I'd love to set up time to talk a bit about the effort and explore ways that The Container Store could join the movement. Just give me a couple of options that work for you and I'll do everything possible to accommodate.

As you know, the Secretary has a strong commitment and inspirational vision for preparing the next generation of outdoor champions, advocates and leaders. She has set metrics for each component of the plan (play, learn, serve and work). Attached is a document that provides a high-level overview of the youth agenda including goals. The "work" category is getting the most attention from private sector as Sally has truly added depth and dimension to the term "public-private partnership".

By working collaboratively, we know that we can make significant strides and have a lasting impact. This is about creating a bold national movement to get more young people outdoors, connected to nature, caring for our public lands, employed and learning skills for future employment.

I will also flag the dates of the Conscious Capitalism event for the scheduling team. It would be an honor to attend and engage with the attendees. Thanks again for the invitation.

In the meantime, have a wonderful Thanksgiving and holiday season! I hope that your sales are through the roof and look forward to working with you.

Sincerely,

David

Hello! And nice to meet you, David! Let's connect on another email and we'll determine a time to talk more about this incredible program.

In the meantime, the dates for the Conscious Capitalism event are April 9-11, 2014 - in San Diego. If you think that there's even a *glimmer* of a chance that you could attend to talk about 21CSC, let me know and I'll get in touch with the Conference organizers and start that conversation. Thanks so much - could be so wonderful!

Audrey

Subject: Re: thank you

Dear Kip and Audrey -

It was a real pleasure to speak with you today. Congrats again on the IPO - it is wonderful to know that another public company will bring the principles of conscious capitalism to Wall Street!

I have copied David on this so he can connect directly with Audrey. As I mentioned, David joined me from REI to lead our efforts on 21CSC and engaging youth to play, learn, serve and work outside. It would be wonderful to work with The Container Store, along with other enlightened businesses, to engage many more people in service on our public lands.

With regard to the CC event in San Diego, please let us know the dates and we can see if it works with our travel. I fully agree that this would be a wonderful audience for 21CSC.

Happy Thanksgiving and keep in touch!

Warmly,

Sally

On Nov 26, 2013, at 10:58 AM, Kip Tindell <kip@containerstore.com> wrote:

Sally,

Thanks so much for your time today – can't tell you how much I enjoyed our conversation! Truly there isn't a better person our President could have so thoughtfully selected to lead our Dept. of Interior. Thank you for all that you're doing for our beloved country's present and future. It was thrilling to hear what you're working on and towards and know that Audrey will be eager to connect with David soon. After the call, Audrey and I also discussed maybe you or David coming to the big Conscious Capitalism event in April in San Diego to talk a bit about the 21CSC (is that the official name?) just thinking that audience of companies would be ripe for the message. That particular event is open to a much broader group of companies with many representatives coming from each organization versus, say, the CEO Summit that takes place in Austin each year with about 200 CEOs (although that could be a great audience as well – that takes place each October). The Conscious Capitalism events are a far cry from where they were in their humble beginnings when we were there together outside of Austin. They now include key business leaders from virtually every single business sector.

Lastly, here's a link to our blog I mentioned we started after that get together in Austin many years ago – it's evolved into having a great presence in all of our catalogs and really, in everything we use to talk with our customers...the response has been delightful. And the fact that we have a blog about our culture and what we stand yet nothing yet on "getting organized" I think makes people REALLY understand how important...how core...this is to us and to them...as it obviously translates to their experience with The Container Store. <http://standfor.containerstore.com/>

Again, thank you for reaching out...let's stay in touch.

Kip

PS – and of course thank you for letting me bend your ear on the Gunnison Sage-Grouse ☺.

- + Today's Events In Washington.

LAST LAUGHS:

- + Late Night Political Humor.

DOI in the News:

CONTINUING COVERAGE OF LANDMARK SPENDING AGREEMENT. The [Environment & Energy Publishing](#) (1/15, 705) reports that "a massive spending bill unveiled last night leaves President Obama's energy, environment and climate programs largely intact while slightly boosting clean and fossil energy spending and keeping US EPA's budget relatively steady." The article notes that "in the case of US EPA, Interior Department and related programs, which are funded under a separate title, the omnibus provides about \$30 billion – less than

\$1 billion below the Senate target and nearly \$6 billion more than a House bill would have provided." The Interior Department would "receive \$10.4 billion in the omnibus, an increase of \$492 million above the 2013 post-sequestration level." However, "the bill rejects a handful of Obama administration requests to raise inspections fees for onshore oil and gas drillers and triple the length of time for regulators to review offshore exploration plans, though it does extend Interior's authority to offer petroleum engineers and technicians a higher rate of pay to ensure faster permitting." The bill "also nixed Obama's proposal to collect \$6.5 million in new grazing fees on public lands, a plan that drew intense opposition from Republicans and their ranching constituents." However, "Democrats scored a partial victory by ensuring that \$306 million would be appropriated to the Land and Water Conservation Fund, a keystone priority for the Obama administration, conservation groups and sportsmen."

Bill Directs Government To Pay Indian Contracts. The Washington Post (1/15, Kindy, 4.28M) reports that "the spending bill being considered in Congress this week orders two federal agencies to fully fund Native American contracts that were the subject of two Supreme Court rulings over the past decade." The bill "rejects the Obama administration's proposal to cap the costs on each contract at levels that would have been millions of dollars below what tribes say they are owed, and millions below the agencies' own cost estimates." Congressional negotiators also "rejected the administration's efforts to eliminate the tribes' right to seek legal remedies when contract claims are not paid in full."

PILT Program Left Unfunded. The Washington Post (1/14, O'Keefe, 4.28M) notes that "the spending agreement did not pay for an Interior Department program that compensates local governments for land the government owns." According to the article, "aides in both parties said the matter is likely to be sorted out in the forthcoming Farm Bill."

Meanwhile, the Summit (CO) Daily News (1/15, 37K) reports that Sen. Mark Udall "introduced legislation Monday, Jan. 13, to support cities and towns throughout the state that count" on the PILT program. The legislation would "permanently authorize and fund the PILT program and ensure that rural leaders are not left in budget limbo every year due to the uncertainty of the congressional budget process."

Also covering the issue are the Washington Post (1/15, 4.28M), Politico (1/15, Rogers, 464K) and the Salt Lake (UT) Tribune (1/15, 343K).

Money Allocated To Fight Asian Carp. The Buffalo (NY) News (1/15, 494K) reports that the Interior Department "will get \$3.5 million to fund its efforts to combat the Asian carp, while the Army Corps of Engineers will get authorization to take emergency measures to stop the invasive fish from entering the lakes ecosystem."

Heritage Partnership Programs Funded. The Washington Times (1/15, Harper, 417K) reports that the bill allocates \$9.3 million for Heritage

Additional Coverage. Also covering the bill are the "Wonkblog" of the Washington Post (1/14, Plumer, 4.28M) and the Washington Examiner (1/15, Colman, 319K).

SECRETARY'S JEWELL'S OFFICE KEEPS CONTINUITY WITH FORMER SECRETARY SALAZAR. The E&E Daily (1/14) reports that "unlike many department heads who fill their offices with their confidants and former colleagues," Interior Secretary Sally Jewell's "staff is still packed with holdovers from former Secretary Ken Salazar." According to the article, "that's likely in part to help guide the Washington outsider and keep continuity as the agency seeks to continue its broad expansion of renewable energy, oil and gas development and conservation on public lands in the Obama administration's second term." The article takes "a look at some of the behind-the-scenes players helping to guide Interior's policies on everything from landscape-scale mitigation to hydraulic fracturing and oil and gas exploration in the Arctic." Individuals highlighted include Laura Daniel-Davis, chief of staff Elizabeth Klein, associate deputy secretary; Nikki Buffa, deputy chief of staff for policy; Ted Boling, deputy solicitor for parks and wildlife; Jack Haugrud, deputy solicitor for energy and mineral resources; Jim Lyons, counselor to the assistant secretary for land and minerals management; and Linda Lance, deputy director of policy and programs, BLM.

SENATE COMMITTEE SCHEDULES THURSDAY VOTES ON BLM, INTERIOR BUDGET, DOE PICKS. The E&E Daily (1/14) reports that the Senate Energy and Natural Resources Committee has scheduled to vote on Thursday "on nearly a dozen Interior and Energy department nominees, including, for the first time, picks to lead

the Bureau of Land Management and Interior's budget office." The 11 nominees on the committee's docket include Michael Connor for Interior deputy secretary, Neil Kornze, for BLM director, and Tommy Beaudreau for Interior assistant secretary for policy, management and budget. Beaudreau would replace Rhea Suh, who was nominated to become assistant secretary for fish and wildlife and parks. The article notes that "all of Thursday's nominees are expected to advance, most of them by voice vote, barring any unforeseen political rifts."

Also covering the story is [Politico](#) (1/15, Guillen, 464K).

Additional Coverage: Suzette Kimball Nominated To Lead USGS. Additional coverage of the nomination of Suzette Kimball to lead the USGS was provided by the [Virginia Gazette](#) (1/14, 50K).

REPORT REVEALS OMB CONFUSION OVER WHETHER TO APPLY SEQUESTRATION TO COUNTY PAYMENTS. The [E&E Daily](#) (1/14) reports the White House Office of Management and Budget "initially didn't believe the across-the-board sequester cuts should apply to roughly \$300 million in payments to timbered communities in 2013, but it later changed its mind and ordered the Forest Service to seek repayment of nearly \$18 million from states, according to a report released today by the House Natural Resources Committee." The report "chronicles correspondence the committee received from OMB and the Agriculture Department regarding its decision to retroactively sequester about 5 percent of Secure Rural Schools funds, which for more than a decade have compensated counties for the decline in federal timber sales." However, "committee Democrats complained that although they, too, disagreed with the Obama administration's decision to sequester SRS funds, there is no evidence of political wrongdoing, and the committee's time would be better spent discussing bipartisan ways to extend SRS and increase jobs in national forests."

FEDERAL TRAVEL SPENDING DOWN AFTER REFORMS, OFFICIALS SAY. [CBS News](#) (1/15, 3.87M) reports that top officials from the Office of Management and Budget and the General Services Administration told lawmakers Jan. 14 that they are making progress in cutting conference and travel spending after the 2012 scandal that revealed millions spent on lavish government meetings. OMB Deputy Director for Management Beth Cobert and GSA Administrator Dan Tangherlini pointed to online tracking tools, virtual and videoconferencing, webinars and other digital options as measures that have been instituted to save taxpayers billions of dollars. In her opening remarks, Cobert said "progress was made across the executive branch, touting travel spending reductions from last year: \$181 million in the Treasury Department, \$99 million in the Department of the Interior and \$35 million in the Environmental Protection Agency."

Also reporting on the story are the [Las Vegas Review-Journal](#) (1/15, Tetreault, 437K), [Government Executive](#) (1/15, 28K), and the [Federal Computer Week](#) (1/14, 263K).

SENATE DEMOCRATS LAUNCH CLIMATE ACTION TASK FORCE. [Roll Call](#) (1/15, Gardner, Subscription Publication, 87K) reports that Senate Democrats launched the new 18-member Senate Climate Action Task Force on Tuesday, an endeavor they hope will "shift the politics of climate change back in favor of legislating a price on greenhouse gas pollution." Those efforts have been stalled since the 2010 midterm elections, writes [Roll Call](#). Senate Environment and Public Works Chair Barbara Boxer (D-CA) acknowledged "that the makeup of Congress now is making it very difficult for us to pass climate change legislation," but she said the group would work to change minds. Boxer pointed out that Republican lawmakers from coastal states "ought to be leading the charge" in addressing the issue. The piece adds that 30 Democrats serve on the Safe Climate Caucus in the House, while the Bicameral Task Force on Climate Change is co-chaired by Sen. Sheldon Whitehouse (D-RI) and Rep. Henry A. Waxman (D-CA).

Boxer Rejects Notion Climate Change Task Force Will Hurt Vulnerable Democrats. The [San Francisco Chronicle](#) (1/15, Lochhead, 2.88M) reports Sen. Barbara Boxer yesterday "led 18 senators...on an election-year assault against climate change denial, accusing oil and coal interests of holding members of Congress captive on the issue." The potential "captives" aren't "just Republicans, but Democrats representing conservative-leaning states that are home to large fossil-fuel industries." When "asked about the risk of a climate-change task force whose agenda she unveiled Tuesday," Boxer, "called the political calculus 'ridiculous.'"

Senate Task Force: Sunday Programs Need To Cover Climate Change. [The Hill](#) (1/15, Barron-Lopez, 194K) reports in its "E2 Wire" blog that the new Senate Climate Action Task Force, formally announced at a press conference on Tuesday, will be encouraging Sunday news programs to devote more attention to global warming.

Sen. Bernie Sanders (I-VT) said he was working with Sen. Brian Schatz (D-HI) on a letter to the television networks, adding that in 2012, "the major networks on their important Sunday news shows...devoted all of eight minutes to discuss that issue. That has got to change."

Native Alaskan Group Describes Impact Of Climate Change. Roll Call (1/15, Rojas, Subscription Publication, 87K) reports that a group of Native Alaskans from the barrier-island village of Shishmaref spoke before the Bicameral Task Force on Climate Change on Tuesday. They told lawmakers that climate change has shortened their hunting season, which forces them to spend more on food, and it means that "the town's Army Corps of Engineers-designed sea wall is now only expected to protect the community for 15 years, rather than the originally expected 25 years." Task force Co-Chairman Henry A. Waxman (D-CA) said Republican climate change skeptics need to hear first-hand from people impacted by it. Roll Call adds that the group from Alaska will also be meeting with their congressional delegation, EPA Administrator Gina McCarthy, White House climate adviser Dan Utech, and other officials.

OBAMA OUTLINES 2014'S PEN-AND-PHONE STRATEGY. Politico (1/15, Epstein, 464K) reports that President Barack Obama "offered a brief preview Tuesday of his State of the Union address, telling his Cabinet that he won't wait for Congress to act on key agenda items in 2014." At his first Cabinet meeting of the year, Obama outlined the strategy: "he plans to use his pen to sign executive actions and his phone to convene outside groups in support of his agenda if Congress proves unable or unwilling to act on his priorities." Flanked by Interior Secretary Sally Jewell and Defense Secretary Chuck Hagel, Obama added, "One of the things that I will be emphasizing in this meeting is the fact that we are not just going to be waiting for legislation in order to make sure that we are providing Americans the kind of help that they need."

Also reporting on the story is the Wall Street Journal (1/15, Favole, 5.91M).

ADDITIONAL COVERAGE OF 21ST CENTURY CONSERVATION SERVICE CORPS. Additional coverage of the 21st Century Conservation Service Corps was provided by the Memphis (TN) Tri-State Defender (1/15, 38K).

IZEMBEK ROAD DECISION CRITICIZED. In an op-ed criticizing the Izembek road decision for the Anchorage (AK) Daily News (1/14, Dingman, 198K), Mike Dingman calls the decision "a slap in the face" and "short-sighted." He argues that "the road is necessary because air travel out of King Cove is a sketchy proposition at best and is often hindered by poor weather." Dingman notes that "the environmental lobby lauds this decision by Secretary Jewell because the Izembek Lagoon provides for a stopover spot for various birds that fly throughout the West Coast," however, he argues that "this is just another decision by the Obama administration that puts the desires of the environmental lobby in front of the needs of Alaskans."

America's Great Outdoors:

National Park Service:

APPEALS COURT DENIES DRAKES BAY OYSTER CO.'S BID TO STAY OPEN. The E&E Daily (1/14) reports that the 9th US Circuit Court of Appeals has upheld its September denial of the Drakes Bay Oyster Co.'s injunction request to stay open. In the decision, Circuit Judge M. Margaret McKeown and District Judge Algenon Marbley voted to deny the petition, while Circuit Judge Paul Watford dissented. According to the article, "the farm continues to operate, but its options are limited," and "an attorney representing the farm said the owners are considering the next step."

Additional coverage was provided by the San Francisco Chronicle (1/15, 2.88M), the Petaluma (CA) Argus Courier (1/14, 1K), the Marin (CA) Pacific Sun (1/15, 106K), the Santa Rosa (CA) Press Democrat (1/14, 156K), the San Jose (CA) Mercury News (1/15, 731K), the Contra Costa (CA) Times (1/15, Prado, Rogers, 302K), the Inside Bay Area (CA) (1/15, 47K), the SF Weekly (1/15, 249K), and the East Bay Express (1/14, 5K).

YELLOWSTONE TO CONTINUE CURRENT VACCINATION PROGRAM OF BISON. The Washington Post (1/14, 4.28M) reports that Yellowstone National Park will continue to vaccinate bison calves and yearlings captured at the northern boundary of the park, rather than beginning a program that would remotely vaccinate bison in the park. NPS officials said the proposal was dismissed due to substantial uncertainties of the vaccine

effectiveness and delivery, the cost of a 30 year program, potential impacts to wildlife behavior and the visitor experience, and evaluation of public comments. The article notes that "Tuesday's announcement means a program that has led to the periodic capture and slaughter of thousands of migrating bison will continue."

The Washington Times (1/15, Brown, 417K) reports that Yellowstone National Park Superintendent Dan Wenk said, "We don't think it makes any sense to spend millions of taxpayer dollars and invest thirty years of effort in hopes of a small reduction in the prevalence of brucellosis in bison with no significant benefit to bison conservation. The fact is that by working with our federal, state, and tribal partners we have completely kept wild bison from infecting area livestock with brucellosis."

Additional coverage was provided by the Denver Post (1/15, Brown, 949K), KPAX-TV Missoula, MT (1/15, 1K), and KXLF-TV Butte, MT (1/15, 2K).

INTERIOR MISSES DEADLINE TO BUY STATE LAND WITHIN GRAND TETON. The E&E Daily (1/14) reports that the Interior Department has "missed a deadline to buy state land that falls within Grand Teton National Park," but "officials believe they may be able to do a land swap instead." According to the article, "the missed deadline did not come as a surprise...because of uncertainty over the federal budget." Now, "state and federal officials have started discussions on a land swap instead."

HOUSE PASSES BILL EXPANDING GETTYSBURG PARK. The E&E Daily (1/14) reports that the House "unanimously passed a measure that would expand the boundaries of the national park commemorating the battle of Gettysburg, along with two other public lands bills." H.R. 1513 would "include the Gettysburg Train Station and certain land along Plum Run in Cumberland Township within Gettysburg National Military Park in Pennsylvania." The legislation passed 396-0.

YOSEMITE NATIONAL PARK TO HOST RANGE OF LIGHT FILM FESTIVAL. The Los Angeles Times (1/13, Forgiore, 3.07M) reports that Yosemite National Park is "planning to host what officials are calling the Range of Light Film Festival to mark a milestone in the park's history." The article notes that "the four-day festival next month is to feature more than 25 current and vintage short films, including a new Ken Burns documentary about the first document that protected Yosemite's wildlands."

PRELIMINARY NUMBERS FOR BLUE RIDGE PARKWAY VISITS SHOW DECLINE. The Asheville (NC) Citizen-Times (1/14, 162K) reports that "official 2013 visitation numbers for parks in the National Park Service will not be officially released until February, according to parkway Superintendent Mark Woods, but preliminary numbers tallied up for the Blue Ridge Parkway show there might be a large decline from the previous year." According to the article, "it would make sense, considering the rough year that the parkway, and most every one of the 400 national parks, has faced in 2013." The article notes that "unofficial numbers reported show that the parkway – until now the single most visited site in the National Park Service – had a large decrease in visitors last year, from 15.2 million in 2012 to 12.8 million last year," but "even given all the woes the parkway faced, that number seems askew."

STUDY IN SANTA MONICA MOUNTAINS SHOWS AIR POLLUTION MAY LEAD TO MORE WILDFIRES. The Ventura County (CA) Star (1/14, 196K) reports that "preliminary results from a study in the Santa Monica Mountains show air pollution may increase the risk of wildfires," the NPS reported. Researchers discovered that "higher levels of nitrogen led to a decline in native shrub seedlings and an increase in nonnative grasses. Other studies have demonstrated a link between nonnative grasses and larger and more frequent wildfires," according to NPS officials.

MOSES H. CONE MEMORIAL PARK ADDED TO NATIONAL REGISTER OF HISTORIC PLACES. The High Country (NC) Press (1/15) reports that the Moses H. Cone Memorial Park has been added to the National Register of Historic Places.

NEW GENERAL MANAGEMENT PLAN FOR JACKS FORK AND CURRENT RIVERS CREATES CONCERN. The Washington Times (1/15, 417K) reprints a recent editorial by the Springfield News-Leader. The News-Leader says that the Ozark National Scenic Riverways "has created a conflict of interests" for "people in the Ozarks" who "love their natural surroundings" and "hate government interference." Some "simply don't believe the federal government can be trusted" to "ensure the scenic natural environment stays that way and to make the rivers safer

and more inviting to visitors" with its new General Management Plan for the Jacks Fork and Current rivers. The paper notes that Missouri's Lt. Gov. Peter Kinder is proposing "to turn over the job of protecting the rivers to the state."

OP-ED: MANHATTAN PROJECT NATIONAL PARK MUST TELL OF ITS COSTS. In an op-ed for the Albuquerque (NM) Journal (1/15, 288K), Dianne R. Layden writes that the Interior Department "has recommended Los Alamos as the site of a national park, or national historical park, for the Manhattan Project," but she notes that the proposal "contains no plan to commemorate the massive civilian casualties and urban destruction." Layden argues that "a national park to honor the Manhattan Project should not be built unless the full story is told of its human and social costs."

Bureau of Land Management:

BLM APPROVES HEAP-LEACH MINE. The Salt Lake (UT) Tribune (1/15, 343K) reports that the BLM has "approved Utah's only cyanide heap-leach mine, but not without strong objections from Goshute officials who say the review process ignored tribal interests in wildlife, groundwater and cultural resources." According to the article, "a decision released Jan. 8 said potential impacts from the 104.5-acre surface mine and leach operation, located on a mix of federal, state and private land, 'are considered minor and all deemed acceptable with mitigation.'" However, "the Confederated Tribes of the Goshute Reservation contends the BLM environmental assessment is 'severely deficient.'"

COLORADO TO FILE COMMENT ON SAGE-GROUSE PRESERVATION. The Sky-Hi Daily News (CO) (1/15, 728) reports that Colorado Gov. John Hickenlooper is "expected to file official state comment on a controversial management plan for greater sage-grouse preservation" this week. According to the article, "although Gov. Hickenlooper initially was going to file state comments on a Bureau of Land Management habitat management study in early December, uproar from northwest counties prompted him to seek local input."

The Grand Junction Daily Sentinel (1/15, 73K) reports that Hickenlooper is urging the BLM to "work with Colorado to avoid having another federal agency list the greater sage-grouse as endangered." In a letter to the BLM, Hickenlooper noted that "Colorado has spent more than \$40 million to save the greater sage grouse and wildlife managers have set aside more than 74,000 acres of habitat for the bird primarily through conservation easements." He wrote that "communities in northwest Colorado, meanwhile, 'rely on access and productivity associated with public lands for their livelihood.'" Hickenlooper continued, "With that in mind, any plan that the BLM ultimately promotes must accurately assess the socio-economic values that link people to the land in that area."

COMMENT PERIOD DEADLINES APPROACHES ON GREATER SAGE-GROUSE AND BI-STATE SAGE-GROUSE PROJECTS. The Reno (NV) Gazette-Journal (1/13, 165K) reports that "comment periods for Greater Sage-grouse and Bi-state Sage-grouse projects" from the BLM, FWS, and US Forest Service will be "closing over the next several weeks." The article notes that "comments on the Bi-State Sage Grouse Draft Environmental Impact Statement that proposes amendments to the Toiyabe National Forest Land and Resource Management Plan and BLM Resource Management Plans on the Battle Mountain and Carson City districts were due Jan. 17." Also, "comments on the Nevada-Northeastern California Greater Sage-grouse Draft Land Use Plan Amendments and Environmental Impact Statement are due Jan. 29." Comments on the UFWS "proposal to protect the Bi-State Distinct Population Segment of greater sage-grouse-including the southern Lyon County area—as a threatened species under the Endangered Species Act and to designate approximately 1.86 million acres of critical habitat for the bird are due Feb. 10."

Fish and Wildlife Service:

WHITE HOUSE COULD RELEASE NATIONAL STRATEGY ON WILDLIFE TRAFFICKING SOON. The E&E Daily (1/14) reports that the White House "may release a national strategy on wildlife trafficking as early as the end of the month, with a possible provision to clamp down on the country's legal ivory trade." FWS Director Dan Ashe "gave the update at a briefing yesterday for congressional staffers." The article notes that "the strategy – which will set the stage for how the United States reacts to the illicit trade – is already a couple of weeks overdue, thanks to sequestration and last year's government shutdown."

ENVIRONMENTAL GROUP PLANS LAWSUIT IF ARMY CORPS DOES NOT CHANGE RIO GRANDE PLANS.

The [E&E Daily](#) (1/14) reports that "an environmental group plans to file a federal lawsuit against the Army Corps of Engineers if the agency does not change operations at dams and reservoirs in the Middle Rio Grande River in New Mexico to protect endangered silvery minnows and other imperiled species." WildEarth Guardians "formally sent a 60-day notice of intent to sue the Army Corps for its operations along the segment of the river in central New Mexico, as well as for apparently not working with the Fish and Wildlife Service on an updated plan to address impacts to the silvery minnow as well as the Southwestern willow flycatcher." The group's "notice says that the Army Corps violated the Endangered Species Act by walking away in late November from formal consultation with Fish and Wildlife over impacts to the listed species."

CONSERVATIONISTS ANGERED BY IDAHO WOLF KILL PLAN. The [E&E Daily](#) (1/14) reports that Idaho's plan aimed to kill two packs of wolves within the Frank Church-River of No Return Wilderness has "angered not only wolf advocates but other conservation groups that have shown support" for the Idaho Department of Fish and Game's "wolf-management decisions in the past." According to the article, "part of the controversy hinges on the hiring of" a "hunter, which isn't in line with traditional ways of reducing numbers, such as public hunts and trapping."

In an op-ed for the [Idaho Statesman](#) (1/15, 205K), Dori Brogolino, an environmental professional, and Peter Spatz, a scientist with the Interior Department, criticizes Idaho Fish and Game's recent hiring of a professional wolf killer in the Frank Church-River of No Return Wilderness. According to the authors, "the wolf derby not only infuriates the conservation community, but also many hunters interested in promoting ethical, fair and respectful hunting." They claim that "these recent events resulted in worldwide negative publicity for Idaho and have likely alienated potential visitors." Instead, they argue, "Idaho could capitalize on tourism dollars by promoting the lucrative wolf-watching industry."

CANINE SHOT IN MISSOURI CONFIRMED AS WOLF. The [Washington Times](#) (1/15, 417K) reports that "a canine shot and killed by a southeast Missouri man in November has been identified as a wolf, a rare find that scientists call a migratory shift of the endangered species from the more populous Great Lakes states where it still thrives." On Tuesday, the Missouri Department of Conservation said that tests by the FWS "confirmed the 80-pound female was a gray wolf, about 2 years old and similar to those from wolf populations in Michigan, Minnesota and Wisconsin."

TEXAS HUNTING, FISHING GUIDE SENTENCED FOR VIOLATION OF WILDLIFE LAWS. [KETK-TV](#) Tyler, TX (1/15, 2K) reports that a 49-year-old Kennard, Texas hunting and fishing guide has been sentenced for transporting an alligator that he knew had been shot in violation of state and federal wildlife laws. Steve Barclay pleaded guilty on Aug. 13, 2013, to the felony offense of transporting wildlife taken in violation of federal law and was sentenced to three years' probation and ordered to pay a \$5,000 fine today by US District Judge Ron Clark. Special Agent in Charge of the FWS Southwest Region Nicholas E. Chavez said, "Our State partner was essential to the success of this case, and that cooperation remains critical to disrupting wildlife taken in violation of Federal Law. With our combined efforts, we protect our threatened/endangered listed species, and other wildlife from being exploited in our Nation."

Also reporting on the story is [KTRE-TV](#) Lufkin, TX (1/15, 8K).

US Geological Survey:

LOS ANGELES MAYOR GARCETTI ANNOUNCES PARTNERSHIP WITH USGS ON EARTHQUAKE SAFETY STRATEGY. The [Los Angeles Times](#) (1/14, Lin, Xia, 3.07M) reports that Los Angeles Mayor Eric Garcetti on Tuesday "announced an aggressive new plan to tackle earthquake safety, including how to better protect vulnerable buildings." In "marking the 20th anniversary of the destructive Northridge earthquake," Garcetti said "Los Angeles would for the first time partner" with the USGS "to build a comprehensive strategy for dealing with how to better protect private buildings and other resources such as telecommunications and the water supply during a major temblor." USGS seismologist Lucy Jones, "who will spend a year meeting with stakeholders and experts and devising policy recommendations for the city of Los Angeles," said, "What's really at stake is the viability of this city."

The [Beverly Hills \(CA\) Courier](#) (1/15, 116K) reports that USGS Associate Director for Natural Hazards, David Applegate said, "The USGS is pleased to enter into this partnership with the City of Los Angeles. The project will bring our science to support the city's efforts to reduce the potentially devastating losses that Southern California faces in future earthquakes. We look forward to a productive collaboration that will help make the citizens of Los Angeles safer and protect the economy of the Nation."

Also reporting on the story is [KCAL-TV Los Angeles](#) (1/14, 79K).

NORTH TEXAS EARTHQUAKE SWARM MORE CENTRALIZED THAN PREVIOUSLY THOUGHT. [NPR](#) (1/14, 465K) reports that scientists with the USGS and Southern Methodist University are studying the swarm of earthquakes that have hit the North Texas community of Azle over the last few months. One challenge for the researchers is that "they've needed to more accurately pinpoint the epicenters of the Azle quakes" in order to determine if they are linked to drilling activity in the region. USGS Seismologist Williams Ellsworth confirmed, "To date, it looks like the earthquakes are all in one very localized zone."

USGS DEVELOPS NEW MODELS WHICH COULD HELP CLEAN UP PHOSPHORUS ON BOISE RIVER. The [Idaho Statesman](#) (1/15, 205K) reports that the USGS has "developed computer models of how phosphorus cycles through the Boise River that it hopes will help the effort to clean up the river." Using the USGS models, Idaho Department of Environmental Quality managers can "simulate the effects of reducing upstream phosphorus loads from point sources such as wastewater treatment plants and non-point sources such as agricultural areas." According to the article, "by setting a specific load allocation for sources such as a wastewater treatment plant, resource managers can model how that allocation would affect downstream phosphorus concentrations."

Securing America's Energy Future:

Renewable Energy:

FWS TO PROPOSE EAGLE-TAKING PERMIT FOR WIND PROJECT. The [Delmarva \(MD\) Daily Times](#) (1/14, 26K) reports that the FWS will "propose an eagle-taking permit during an Environmental Assessment on Wednesday." The article notes that "the proposal comes amid concerns that anticipated wind turbines in the area could cause eagle deaths and negative health effects." The Great Bay Wind Energy Center, "in partnership with Pioneer Green Energy, will construct the 25 wind turbines, estimated to be at least 500 feet tall with 150-foot blades, according to the company."

Onshore Energy Development:

BLM HOSTING OPEN HOUSE MEETINGS ON OIL, GAS LEASING. The [Salinas Californian](#) (1/14, 27K) reports that the BLM is conducting meetings as part of a scoping process in examining use of oil and gas resources on federal land, and whether to involve areas beyond the Hollister Field Office, according to an announcement from the agency.

Also reporting on the story is the [San Benito County \(CA\) Today](#) (1/15).

ADDITIONAL COVERAGE: OIL, GAS TRADE GROUP CHALLENGES BLM DEFERRAL OF UTAH LEASES. Additional coverage of the challenge lodged by the Western Energy Alliance against the BLM's "decision last fall to pull parcels in and around Utah's scenic San Rafael Swell from an oil and gas lease sale" was provided by the [Salt Lake \(UT\) Tribune](#) (1/15, 343K).

Offshore Energy Development:

BSEE OFFICIAL TO SPEAK AT DECOMWORLD'S 6TH SUMMIT. The [Offshore Energy Today](#) (1/15) reports that Susan Green, deputy regional supervisor for field operations in the Gulf of Mexico for the BSEE, will "deliver an update on BSEE's vision and priorities at DecomWorld's 6th Annual Decommissioning & Abandonment Summit in March." The article notes that "BSEE representatives will also be involved in other key panel

discussions, including those on reefing rigs and severance techniques.”

ADDITIONAL COVERAGE OF SEISMIC TESTING IN ATLANTIC. Additional coverage of the debate over seismic testing in the Atlantic was provided by [TIME](#) (1/14, 21.77M).

Tackling America's Water Challenges:

WATCHDOG SAYS GOV. BROWN'S WATER PLAN HELPS, BUT LONG-TERM FUNDING IS AN ISSUE. The [E&E Daily](#) (1/14) reports that California Gov. Jerry Brown's budget proposal to bolster state "water management will benefit the parched state, but many of his priorities lack long-term funding, a legislative watchdog said yesterday." The Legislative Analyst's Office "in a critique of Brown's draft \$154.9 billion budget praised the governor's goal of having state and local agencies coordinate oversight of water." The LAO said, "Traditionally, individual areas of water policy have been treated as largely unconnected, with responsibilities spread across numerous departments. Considering the diverse areas of water policy together in a consolidated manner would be a more effective approach, particularly since these areas are highly interconnected." However, "LAO cautioned that some key details were absent, and the Legislature might need to seek more information from the governor's office before deciding whether to accept the proposal."

Additional coverage of Brown's budget proposal was provided by the [Fresno \(CA\) Business Journal](#) (1/15, 160K).

SAN JOAQUIN VALLEY TO RECEIVE FUNDS FOR WATER CONSERVATION PROJECTS. The [Fresno \(CA\) Business Journal](#) (1/15, 160K) reports that "farmers and conservation groups in the San Joaquin Valley have until March 21 to apply for funding for projects to conserve water and preserve wildlife." In total, about "\$18 million has been made available under the USDA Natural Resources Conservation Services's three-year old Bay Delta Conservation Initiative to enhance water quality, efficiency and ecosystem restoration." According to the article, "with funding for the program provided" by the BOR and the federal Farm Bill's Environmental Quality Incentives Program, "growers in four Valley water districts were approved for \$2.15 million worth of projects to improve water delivery infrastructure and on-farm irrigation improvements."

ENVIRONMENTAL GROUPS PROTEST WESTLANDS' WATER ALLOCATION. The [Central Valley \(CA\) Business Times](#) (1/15, 206) reports that "a coalition of environmental groups has filed a protest against six interim contract renewals for delivery of 1,192,948 million-acre feet of water from the Central Valley Project to the Westlands Water District on the west side of the San Joaquin Valley." The protest says the BOR's "environmental assessment is inadequate and that a full Environmental Impact Statement is required by law." The groups claim that "the proposed interim contracts, which would run from March 1 through February of 2016 and their supporting environmental assessments and other environmental documents, violate a lengthy list of laws."

Empowering Native American Communities:

LETTER EXPLAINS BIA'S DEFAULT CASINO APPROVAL. The [Cape Cod \(MA\) Times](#) (1/14, 92K) reports that "the Mashpee Wampanoag Tribe's compact with Gov. Deval Patrick for a \$500 million casino in Taunton violates an aspect of federal Indian casino law, but that was not enough for the federal government to reject the deal," according to a Jan. 6 letter to the tribe from Kevin Washburn, the assistant secretary of Indian Affairs. In the letter, released by the BIA on Monday, Washburn expressed "concerns with the state's attempt to regulate a Class II casino, which is high-stakes bingo or so-called bingo slots." He wrote, "We caution the parties that, in implementing the compact, they should avoid applying its provisions in a manner that does not directly relate to the operation of Class III gaming activities, and thus avoid any potential violation of (the Indian Gaming Regulatory Act) regarding the limited scope of tribal-state gaming compacts."

JUDGE DELAYS DECISION IN MASHPEE WAMPANOAG TRIBAL LAWSUIT. The [Taunton \(MA\) Gazette](#) (1/14, 36K) reports that "all involved parties will need to wait to learn the fate of a federal lawsuit that requests the Bureau of Indian Affairs formally investigate allegations of voter fraud in the 2009 Mashpee Wampanoag tribal election." US District Judge Denise Casper "heard arguments Tuesday at the Moakley Courthouse on the US government's motion to dismiss the case." Casper "took the motion under advisement and will likely render a decision at a future date."

RESIDENTS OF MOBILE HOME PARK IN THERMAL EVICTED BY LANDLORD. The Palm Springs (CA) Desert Sun (1/13, 110K) reports that "residents of a mobile home park in Thermal said Monday that they are being ordered by their landlord to move their homes and that some trailers have already been relocated without their consent." According to the article, "more than a dozen residents of the Oasis Mobile Home Park protested what they called forced evictions at a public meeting in Coachella, appealing for help to prevent their landlord from shutting off power and requiring them to move within days." The article notes that "the community is largely made up of farm workers and is located on the reservation of the Torres Martinez Desert Cahuilla Indians." Raymond Torres, the tribe's vice chairman, said "he and other tribal leaders don't believe" the landowners "have the right to sell the land and have asked the Bureau of Indian Affairs to weigh in."

ADDITIONAL COVERAGE SEARCH FOR COBELL SETTLEMENT RECIPIENTS. Additional coverage of the difficulty in finding Cobell settlement recipients was provided by the Missoula (MT) Independent (1/14, 65K).

Top National News:

OBAMA PREVIEWS HIS 2014 AGENDA AT FIRST CABINET MEETING OF THE YEAR. President Obama's first cabinet meeting of the new year, in which he previewed his priorities for the coming months and called for bipartisan cooperation, did not receive as much coverage as might have been anticipated. None of the three network newscasts covered the developments from the White House. On the other hand, conservative outlets made much of the President's suggestion that he will use executive actions to move his agenda if Congress is unwilling to go along. On Tuesday, the Drudge Report featured the headline, "Obama Not Waiting On Legislation: I've Got A Pen And I Can Use It To Sign Executive Orders."

Likewise, at the opening of Fox News' On The Record (1/15, 1.65M), Greta Van Susteren said the President is "getting ready to bulldoze Washington." Van Susteren added that "in an email blast to supporters," White House senior adviser Dan Pfeiffer "promises the President won't be waiting for Congress to act and will use every, yes, every executive tool available to get what he wants." President Obama was shown saying, "I've got a pen, and I got a phone," meaning that he can sign executive orders and he can call on his base of supporters to help him put pressure on Congress. Van Susteren noted that during his radio show Tuesday, Rush Limbaugh (1/14, 149K) said, "He might have a pen and he might have a phone, but what he does not have is the constitutional power to run this country like a dictator." Also appearing on Fox News' On The Record (1/15, 1.65M), Karl Rove said, "I'm deeply troubled by the President's use of his executive authority and abuse of his executive authority." Rove added, "I think he is violating the law. He has exceeded his constitutional authority."

The AP (1/15) says the President is "demonstrating how he can advance his economic agenda administratively and through his ability to coax action from important interest groups." The AP notes that on Tuesday, at a meeting of his cabinet, the President said, "We're not just going to be waiting for legislation in order to make sure that we're providing Americans the kind of help they need. I've got a pen and I've got a phone."

Under the headline, "Obama Working To Mobilize Outside Coalition Of Groups To Promote White House Agenda," the Washington Post (1/14, Eilperin, 4.28M) reports that the White House is "increasingly working to mobilize an outside coalition of corporate, nonprofit and academic groups to promote" President Obama's agenda, and, according to the Post, "the strategy will be on full display Thursday as the White House hosts a summit with...college and university presidents, who will promise to enroll more low-income students and ensure that they graduate." The Post adds that "later this month," there will be "a session for corporations that pledge to hire long-term unemployed."

CBS News (1/15, Kaplan, 3.87M) reports that also on Tuesday, the President "encouraged Congress to extend unemployment insurance and pass some form of immigration reform." According to correspondent Mike Emanuel, on Fox News' Special Report (1/15, 2.15M), the President is "warning lawmakers if they don't get [this] done, he'll do it himself," although "Congress does not care for that type of executive action."

The Wall Street Journal (1/15, Favole, 5.91M) covers the President's comments under the headline, "Obama: I've Got A Pen And I've Got A Phone." The Journal reports that in regards to the long-term unemployed, the President said Tuesday, "We're finding it's very hard for them to just get in the door and make their case to an employer. We're going to try to work with CEOs to make a pledge that we're going to take a second look at

these Americans who are very eager to get back to work.”

The AP (1/15) reports that on Wednesday, the President will travel to North Carolina “to draw attention to the type of manufacturing innovation hub that he promoted in his 2013 State of the Union speech.”

According to Politico (1/15, Epstein, 464K), the President “said it’s his hope that 2014 will be remembered as the ‘year when we didn’t just turn the corner in the aggregate for the economy but everybody’s started feeling more optimistic about our futures.’” Politico also reported that the President “welcomed the bipartisan budget that congressional Democrats and Republicans released on Monday” and “called on both houses of Congress to pass it quickly,” saying, “I’m very pleased.”

Reuters (1/15, Mason) quotes the President as saying, “I am absolutely confident that in 2014, if we’re all working in the same direction and not worrying so much about political points but worrying much more about getting the job done, that we can see a lot of improvement this year.”

However, according to Politico (1/15, Sherman, Bresnahan, 464K), “when top Republican leaders gathered last weekend...for their annual planning retreat, the bulk of the conversation centered around Obamacare and presenting alternatives to what they consider Democrats’ failed economic policies.” According to Politico, Republicans “believe there is plenty of evidence that the midterm campaign will pivot on the president,” whose “approval ratings are sagging.” Politico adds that the Affordable Care Act “is widely unpopular and, for the first time in years, GOP polls show that voters blame Obama — not them — for the country’s economic woes.”

Obama Meets With National Governors Association Executive Committee. USA Today (1/14, Jackson, 5.82M) reports that on Tuesday, President Obama “discussed better federal-state cooperation” with the executive committee of the National Governors Association, which includes “three Republicans – Mary Fallin of Oklahoma, Gary Herbert of Utah, and Scott Walker of Wisconsin – and three Democrats: John Hickenlooper of Colorado, Mike Beebe of Arkansas, and Mark Dayton of Minnesota.”

UNEMPLOYMENT BENEFITS EXTENSION REMAINS MIRED IN SENATE. NBC Nightly News (1/14, story 4, 0:25, Williams, 7.86M) reported that on Tuesday, a “vote to extend long-term unemployment benefits went down in the Senate as the Chamber descended into partisan argument.” The legislation needed 60 votes to advance, but fell 55-45. NBC adds that negotiations “will go on, but that’s little comfort to more than a million people who were cut off from benefits right at the beginning of the year.”

The AP (1/14, Espo) reports that compromise discussions on a three-month extension of benefits “ran aground in the Senate on Tuesday, leaving the fate of the measure in extreme doubt while Republicans and Democrats vied for political advantage in the wreckage.” The Senate “blocked a pair of Democratic-drafted proposals from advancing, after first denying Republicans a chance to change the legislation – all on near party-line votes.” Senate Majority Leader Harry Reid “accused Republicans in advance of resorting to obstruction to block help to families in need.”

The Washington Post (12/30, Hicks, 4.28M) reports in its “Post Politics” blog that Democrats and Republicans “pointed fingers and accused each other of bad faith negotiations.” By late in the day on Tuesday, both “had each rejected the other’s latest proposal.” Senators “said that they planned to move on Wednesday to the debate over keeping the government agencies funded.” With Congress leaving town at the end of the week, January 27 has emerged as the earliest that new talks could occur.

The Wall Street Journal (1/15, Peterson, Subscription Publication, 5.91M) reports that Senate Democrats rejected a proposal from eight Republicans, while the GOP rejected an offer by Reid to allow a small number of GOP amendments.

Politico Analysis: GOP Succeeded In Transforming Debate Into Referendum On Reid’s Style. Politico (1/15, Everett, 464K) calls the failure to advance the legislation the Democrats’ “first big defeat of 2014,” and said that Reid is “betting that his party’s message will trump growing Republican complaints about his leadership.” Over the last week, the GOP has “transformed the debate” over benefits “into a referendum on Reid’s iron-fisted stewardship of the chamber, labeling the Nevada Democrat a ‘dictator’ and ‘obstructionist.’” However, Reid “dismisses the idea that Americans are interested in wonky procedural debates, believing instead they will

remember this as the week that Republicans blocked the restoration of aid to more than a million long-term unemployed Americans.”

Issue Said To Impact Supporters Of Both Parties. The AP (1/14, Riccardi) looks at the politics of unemployment and says that there are “no data showing the political affiliation of people who lost their emergency jobless benefits or tracking them by congressional district.” House Democratic staffers “crunched their own data from 20 states to demonstrate that jobless benefits have a bipartisan reach.”

OBAMA ACCUSED OF IGNORING IMMIGRATION LAWS. In an article titled, “Obama Is Using Executive Power To Affect Immigration Law,” McClatchy (1/13, Kumar, 95K) reports that President Obama, who “didn’t wait for Congress to rewrite the nation’s immigration laws to help millions who are in the United States illegally stay in the country,” is continuing to use executive actions to ease the enforcement of US immigration laws. According to McClatchy, “Critics have accused Obama of violating the Constitution,” including “immigration agents who accuse the government of preventing them from fulfilling their sworn oath to uphold the law.” Rep. Bob Goodlatte, the chairman of the House judiciary Committee, is quoted as saying, “The current administration is picking and choosing which laws to enforce. The president cannot refuse to enforce a law simply because he dislikes it.”

AT&T CEO Randall Stephenson, chairman of the Business Roundtable, in an op-ed for the Wall Street Journal (1/15, Stephenson, Subscription Publication, 5.91M), writes that along with tax reform and expanded free trade deals, immigration reform would accelerate US GDP growth.

Ayotte Wants To Block Illegal Immigrants From Receiving Some Tax Credits. Roll Call (1/15, Sanchez, Subscription Publication, 87K) reports that Sen. Kelly Ayotte has sponsored an “amendment to offset an extension of unemployment insurance by eliminating child tax credits filed by undocumented workers.” Ayotte is quoted as saying, “As someone who was one of the Republicans who supported the immigration reform, this is an appropriate fix of a tax refund that has been abused within our tax code.” According to Roll Call, “a 2011 Treasury Inspector General report” found that billions of dollars “in refundable tax credits going to people not qualified to receive them,” including illegal immigrants who claim the Additional Child Tax Credit. Roll Call also reports that “the issue has also been taken up by Hispanic media, which has covered the amendment intensely.”

Law Enforcement Agencies Borrowing Border-Patrol Drones For Domestic Surveillance. The Washington Post (1/15, Whitlock, Timberg, 4.28M) reports that new released records show that Federal, state and local law enforcement agencies “are increasingly borrowing border-patrol drones for domestic surveillance operations” in “a harbinger of what is expected to become the commonplace use of unmanned aircraft by police.” Customs and Border Protection, “which has the largest U.S. drone fleet of its kind outside the Defense Department, flew nearly 700 such surveillance missions on behalf of other agencies from 2010 to 2012, according to flight logs released recently in response to a Freedom of Information Act lawsuit filed by the Electronic Frontier Foundation, a civil-liberties group.”

Border Patrol Unveils Robot To Probe Border Tunnels. The AP (1/14, Skoloff, Billeaud) reports that with border security tightening, drug cartels “have turned to tunneling beneath the ground to avoid detection.” The AP says that “nearly 170 tunnels” have been found along the US border since 1990, mostly along the border with Mexico. Now, the US Border Patrol “is unveiling its latest technology in the underground war – a wireless, camera-equipped robot that can do the job in a fraction of the time.” The piece goes on to provide a primer on tunnel construction.

Editorial Wrap-Up:

NEW YORK TIMES. “*Finally, Congress Does Its Job.*” In an editorial, the New York Times (1/15, Subscription Publication, 9.61M) calls the omnibus spending bill “one of the few piece of good news to emerge from the current Congress.” The Times says that while the spending bill “still reflects many Republican priorities, most of the worst proposals are gone,” along with “the deepest cuts of the sequester, following the budget agreement reached last month.” Still, the “right-wing’s larger victory is in the overall spending amount, which is far less than it should be to revive the economy.”

“*The Christie Way.*” The New York Times (1/15, Board, Subscription Publication, 9.61M), in an editorial, says

that while New Jersey Gov. Chris Christie “denies knowing that this scheme was revenge against the Democratic mayor of Fort Lee,” it’s “hard to imagine that he did not somehow encourage this type of conduct.”

“India-America Relations On Edge.” An editorial in New York Times (1/15, Subscription Publication, 9.61M) says that while the tensions between the US and India over the arrest of an Indian diplomat charged with visa fraud and mistreating a domestic worker have eased, the case “and the issues it raised are not resolved, and the damage to India-America relations is unlikely to dissipate soon.” The Times notes that the case “has exposed differences between the two countries over such basic concepts as fairness and equality, while revealing a troubling level of Indian animosity toward the United States.”

WASHINGTON POST. “Give Diplomacy A Chance.” In an editorial, the Washington Post (1/15, Board, 4.28M) says “the White House’s strident opposition to” the Menendez-Kirk sanctions bill “continues a distasteful practice — also seen in the debate over Syria — of accusing all who disagree with its strategy of favoring war.” The Post calls that “an insult to serious legislators” who “reasonably seek to hedge against failed negotiations.” But the Post goes on to say that that members of Congress “already may have accomplished the maximum good by proposing the bill,” while “passing it — which probably would require overcoming a presidential veto — would be problematic.” According to the Post, “this diplomacy has been President Obama’s initiative, and he should be allowed to carry it through.”

“Unsafe To Drink.” The Washington Post (1/15, Board, 4.28M) editorializes that West Virginia state officials never knew the health risks associated with their recent chemical spill, because information on the chemicals’ risks to humans is scarce. The editorials adds that a lot of environmental protection “depends on state officials” and that state officials in West Virginia “weren’t notified and the water wasn’t shut off in time” following the chemical spill. The editorial also implies that Federal regulations are “spotty” and points out that “for many chemicals in regular use, federal law does not require safety data.” The editorial credits this shortcoming to a 1976 law, which “presumed chemicals in use at the time were safe.” The editorial calls for a “bipartisan chemical safety reform bill” to improve matters.

“Jennifer Wexton For Va. Senate.” In an editorial, the Washington Post (1/15, Board, 4.28M) endorses Jennifer Wexton, “a promising Democrat who has been a prosecutor and attorney in private practice,” in next Tuesday’s special election for the Virginia state Senate seat of Mark Heming (D), “the state’s newly elected attorney general.” The Post notes that should either of the other two candidates in the race win – Joe May, “a moderate former Republican” who’s “running as an independent,” and John Whitbeck, “a Republican best known for telling an anti-Semitic ‘joke’ at a party rally last fall,” would give “control of the Senate to the GOP, since both would back Republicans for leadership posts. A victory for Ms. Wexton would leave the upper chamber with a 20-20 partisan split, which amounts to Democratic control since the tie would be broken by Lt. Gov. Ralph Northam, a Democrat.”

WALL STREET JOURNAL. “Net Neutralized.” In an editorial, the Wall Street Journal (1/15, Subscription Publication, 5.91M) hails a Federal Appeals Court ruling, which threw out FCC rules net neutrality rules, saying that it is another loss for the Administration in court as it attempts to create expansive rules.
