The Honorable John Hickenlooper
Chairman, Western Governors' Association
1600 Broadway, Suite 1700
Denver, Colorado 80202

Dear Governor Hickenlooper:

Thank you for your letter of April 3, 2014, regarding the expiration of the Federal Permit Streamlining Pilot Project (Pilot Project) authorized by the Energy Policy Act of 2005 (EPAct), and your desire to seek its reauthorization. I appreciate your sharing your views on this matter. The Department of the Interior and the Bureau of Land Management (BLM) also consider the 10-year Pilot Project to be a success, and it has allowed the BLM and its Pilot Project partner bureaus and agencies to efficiently process oil and gas drilling permits and administer the Federal mineral estate.

The additional resources devoted to processing oil and gas use authorizations through the EPAct have enhanced the BLM's capabilities to coordinate across the relevant agencies, increasing the pace of permitting and streamlining associated environmental reviews. In addition, the Pilot Project has provided the BLM's oil and gas inspection and enforcement program with resources necessary to allow for more thorough oversight of authorized oil and gas operations.

Recently, legislative authority was granted to expand the Pilot Project in the Miles City (MT) Field Office to include all field offices within the jurisdiction of the BLM's Montana/Dakotas State Office. Similarly, the Pilot Project in the Buffalo (WY) Field Office was legislatively expanded to include the Casper Field Office. We would like to work with Congress to provide additional flexibility nationwide to utilize the pilot office authority to respond accordingly as industry's geographical interests and permitting demands shift over time.

We look forward to working with you to develop solutions that will allow us to extend the success of these pilot offices and to provide for environmentally responsible energy development on the public lands. If you would like to discuss this matter further, please do not hesitate to contact me. A similar letter has been sent to Governor Brian Sandoval.

Sincerely,

Handwritten signature of Sally Jewell in cursive script.
Sally Jewell

2014 APR -2 PM 4:10

642428
State of New Mexico OFFICE OF THE CLERK

Susana Martinez
Governor

March 24, 2014

The Honorable Secretary Sally Jewell
U.S. Department of Interior
1849 C Street, NW
Washington, DC 20240

Dear Secretary Jewell:

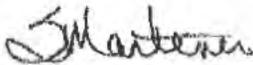

I am writing in support of the creation of a national monument covering lands in the Organ Mountains, Organ Needles, and Pena Blanca WSA, as set forth in H.R. 995, The Organ Mountains National Monument Establishment Act sponsored by Congressman Steve Pearce. New Mexico is blessed with thousands of miles of remarkable lands preserved not only for our citizens' enjoyment, but for countless visitors from around the world. This establishment of roughly 50,000 acres would protect and conserve these lands for future generations to enjoy the beauty of our rich terrain.

While H.R. 995 ensures that this effort is not overzealous in scope and breadth, I am concerned that a similar proposal brought forth by Senators Heinrich and Udall allocates too much land. This proposal appropriates roughly five times the acreage of HR995 and could threaten border security as well as water and grazing rights if it were adopted.

I stand with members of our delegation in wanting to ensure that our beautiful state is protected for future generations. However, the approach favored by Senators Heinrich and Udall is simply too broad. I strongly encourage your support of Congressman Pearce's approach, and look forward to working with members of our delegation to ensure its success.

Dear Governor Martinez:

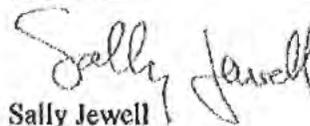

Thank you for your letters of March 24, 2014, to Bureau of Land Management (BLM) Director Neil Kornze and me regarding proposed legislation to designate a national monument consisting of public lands managed by the BLM in Doña Ana County, New Mexico.

Your input on these pending bills is very much appreciated. We constantly work to take into account the interests of a wide range of stakeholders to protect America's public lands and provide for economic development in a manner that is consistent with law and sound public policy.

This area is not only a treasure for the State of New Mexico, but one of national significance to be managed for, and cherished by, all the people of the United States. The Department of the Interior and the BLM welcome opportunities to engage in important discussions such as this regarding the protection of some of America's most compelling landscapes.

We look forward to continuing to work with you, the sponsors of these bills, and other stakeholders to appropriately manage this important area for generations to come.

Sincerely,

Sally Jewell

Re: National Historic Landmark Designation of Nevada State Prison

Dear Secretary Jewell:

Please accept this letter expressing my support for the nomination of Nevada State Prison as a National Historic Landmark. Nevada State Prison has played a prominent role in shaping the rich history of the State of Nevada, a history we are now celebrating as we enter our 150th year of statehood. The historical, cultural, architectural and geological significance of this unique site cannot be overstated, and its profound impact on Nevada's legacy should be preserved for the benefit of future generations of Americans.

One of the oldest prisons in the Western United States, Nevada State Prison operated from 1862 until its closure in 2012. It was originally housed in the Warm Springs Hotel in Carson City. In 1867, the facility was reconstructed out of sandstone which was quarried at the site. Since its reconstruction, the prison has played a role in defining some of the most quintessential cultural, political, and social events in Nevada's history.

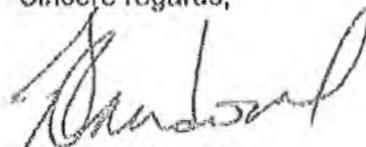

Nevada State Prison's first warden, Abraham Curry, who is considered the founding father of Carson City, donated the land upon which Nevada's State Capitol building stands today. The State Capitol was constructed using the sandstone quarried at Nevada State Prison. The Capitol's timeless architecture and sandstone exterior continue to embody the strength and unbreakable resolve that have defined Nevada throughout its rugged history. Nevada has evolved from its early days as an untamed frontier into a premiere international destination that today is at the forefront of some of America's most dynamic industries and emerging technologies. Like the Capitol's sandstone exterior that

has withstood the test of time, the State of Nevada, too, has weathered its own tempests and has emerged strong, unwavering, and ready for the opportunities that lie ahead. Thus, Nevada State Prison's early role in the construction of some of Nevada's most cherished landmarks is also an essential chapter in the ongoing story of the Silver State.

Nevada State Prison is also renowned for its geological treasures, linking modern-day Nevada to its rich early heritages. As far back as 1882, fossilized footprints were discovered at the site, and fossils from a variety of species are still being uncovered there to this day. These types of invaluable discoveries at the site of Nevada State Prison spur research and scientific interest that help to answer important questions about our past. They are also a reflection of Nevada's unrivaled contributions in the field of anthropology, which include North America's oldest known petroglyphs, recently discovered in northern Nevada, as well as the Tule Springs fossil bed outside of Las Vegas, which is home to thousands of fossils of Ice Age mammoths, bison and American lions.

As an iconic and historic institution, Nevada State Prison is so much more than a building. It truly is a landmark that embodies much of what Nevada has to offer its citizens, as well as the millions of visitors that travel to Nevada every year. The site is emblematic of ideas that continue to inform the history of this great State, as well as the ideas that will inspire its future. It has played a pivotal role in the development of Nevada from its earliest days as an unchartered territory, and has endured the ups and downs of its 150-year history. I therefore wish to convey my enthusiastic support for the designation of Nevada State Prison as a National Historic Landmark. I firmly believe that such a designation would greatly enhance Nevada's cultural and historical vitality, and I hope you will also carefully consider supporting the nomination of this inimitable treasure of Nevada's past.

Sincere regards,

APR - 9 2014

The Honorable Brian Sandoval
Governor of Nevada
101 North Carson Street
Carson City, NV 89701

Dear Governor Sandoval:

Thank you very much for your letter of support for the National Historic Landmark (NHL) designation of the Nevada State Prison in Carson City. From your letter, the history of the prison sounds impressive. The NHL staff will evaluate the prison's eligibility for designation if they receive a request for nomination. To date, they have not received any information about the prison, nor a request that the site be considered for NHL designation.

Rebecca Palmer, the Nevada State Historic Preservation Officer, informed the NHL staff that a National Register of Historic Places nomination is being prepared for the Nevada State Prison. Preparation of the nomination is funded, in part, by a Certified Local Government grant from the National Park Service to Carson City. We look forward to receiving the National Register nomination.

National Historic Landmark designation is quite different from National Register listing. The NHL program recognizes properties of exceptional national significance that exhibit a very high degree of integrity. National Register listing is available for historic properties that are significant from a local, state, or national perspective. Each program has distinct criteria for evaluating eligibility.

As the Nevada State Prison nomination is being prepared, the National Register and NHL staff will assist the preparers as needed. The staff will hold your letter of endorsement until a nomination has been received. Thank you very much for your interest in the National Historic Landmark program and for your support in recognizing Nevada's rich heritage.

Sincerely,

Stephanie Toothman, Ph.D.

Washington, DC 20240

Dear Deputy Secretary Connor:

I am pleased to congratulate you on your appointment as Deputy Secretary of the Department of the Interior. I did ask for quick approval of your nomination but am not sure I caused the 2-day response. I have enjoyed working with you in the past, and I look forward to working with you in the future on projects that are critical to North Dakota.

In particular, I look forward to continued discussions with you regarding the Red River Valley Water Supply project. A study on the project is currently underway; I will provide you with an update on the proposed route once the study is completed early this summer.

I also again want to request your support to obtain funding for a Plan of Study to identify potential improvements to the river operating plans implemented in both the United States and Canada with regard to the Souris River. It is very important that this Plan of Study is completed, as it will be of great importance in helping the United States and Canada to provide long-term flood protection for our citizens in the Souris River Valley.

Congratulations on your new position; I look forward to continuing to work with you on issues important to our state and our nation.

Sincerely,

Honorable Sally Jewell
Secretary
U.S. Department of the Interior
1849 C Street, N.W.
Washington, D.C. 20240

Dear Secretary Jewell:

Western Governors and the U.S. Department of the Interior (DOI) share a commitment to conserve the greater sage-grouse. As we have repeatedly stated, Western Governors support all reasonable management efforts necessary to support a not-warranted decision by the U.S. Fish and Wildlife Service concerning the greater sage-grouse. We thank you and your agency directors for your cooperation with our states in the development of sound conservation measures.

Western Governors are pleased to share our most recent *Inventory of State and Local Governments' Conservation Initiatives for Sage-Grouse: 2013 Update*. This third annual inventory illustrates the many ways that states and counties are taking proactive, voluntary steps to conserve the species – steps which are consistent with the Conservation Objectives Team report, and other conservation requirements, issued by the Service. These steps preclude the need to include the greater sage-grouse on the federal endangered species list.

An accurate evaluation of the effect of state measures upon overall population trends for greater sage-grouse requires DOI and its agencies to take into account the full spectrum of state activities, be they legislative, regulatory, administrative or voluntary, and adequately acknowledge the associated benefits.

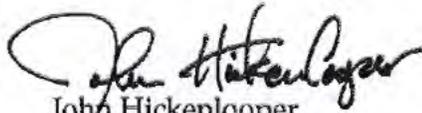

Western Governors pledge to continue working with DOI, U.S. Fish and Wildlife Service and the Bureau of Land Management to comprehensively document all greater sage-grouse conservation actions in order to ensure that greater sage-grouse conservation plans and policies are fully accounted for at the time of a final listing proposal.

Dear Governor Sandoval:

Thank you for your letter dated February 23, 2014, regarding conservation of the greater sage-grouse. I appreciate receiving a copy of the Western Governors' Association (WGA) *Inventory of State and Local Governments' Conservation Initiatives for Sage-Grouse: 2013 Update* and *WGA's Conserving Wildlife and Crucial Habitat in the West*.

The Department of the Interior's Bureau of Land Management and U.S. Fish and Wildlife Service, along with the U.S. Forest Service, are continuing to work collaboratively with affected states to conserve the greater sage-grouse and its habitat and potentially avoid the need to list the species under the Endangered Species Act. These collaborative efforts play an important role in conserving and improving sage brush habitats across the range of the greater sage-grouse. We appreciate WGA's commitment to greater sage-grouse conservation and the proactive steps being taken across local and state lands.

Thank you for your interest in the management of the greater sage-grouse on our Nation's public lands. We look forward to continuing to work with you on this issue. A similar letter is being sent to Governor John Hickenlooper.

February 18, 2014

The Honorable Sally Jewell
Secretary of the Interior
U.S. Department of the Interior
1849 C Street, N.W.
Washington, DC 20240

Dear Secretary Jewell,

I support the work of the Sweetwater River Conservancy (Conservancy) in Wyoming. The Conservancy finalized a Wetland Mitigation Bank with the U.S. Army Corps of Engineers to safeguard important wetland habitat in perpetuity and unlock other areas for development. Now the Conservancy is working to secure habitat for the sage-grouse using a Habitat Conservation Bank permitted by the U.S. Fish and Wildlife Service (Service).

2014 FEB 19 2:46 PM
RECEIVED

The Conservancy's Habitat Conservation Bank builds on principles in my sage-grouse core area conservation strategy. It will protect over 700,000 acres of sage-grouse habitat. This landscape-scale habitat bank will be larger than all other nationwide Service-approved habitat banks combined. While sage-grouse are the focus of the Conservancy's work, benefits extend to mule deer, water quality and quantity, livestock production and other natural resources. I look forward to final approval of the proposed Bank by the Service. I commend Mark Sattelberg, Ecological Services Field Supervisor for Wyoming, for his efforts to achieve these goals.

The Conservancy also maintains habitat for bald and golden eagles, other raptors and migratory birds. These avian species have been a focus of wind industry guidelines, the Bald and Golden Eagle Protection Act and Migratory Bird Treaty Act. Proactive habitat banking concepts for bald and golden eagles, migratory birds and other raptor management would benefit from matching proven science, federal land use and wildlife protection laws. I would appreciate your assistance in applying habitat banking to avian species.

Thank you for your upcoming meeting with the Conservancy. Working with the Sweetwater River Conservancy and similar groups encourages private efforts and results in long term benefits to sage-grouse, wildlife, water, open space, hunting and ranching. Wyoming continues to be a leading force in sage-grouse protection. The Conservancy's work is another important extension of that effort.

Sincerely,

Matthew H. Mead
Governor

*Secretary,
look forward to seeing
you soon.*

53360 →

THE SECRETARY OF THE INTERIOR
WASHINGTON

MAR 25 2014

The Honorable Matthew H. Mead
Governor of Wyoming
Cheyenne, Wyoming 82002

Dear Governor Mead:

Thank you for your letter of February 18, 2014, supporting the efforts of the Sweetwater River Conservancy (Conservancy) to conserve natural resources in Wyoming. The Department of the Interior also supports these important conservation efforts because of the great potential to protect essential natural resources. I appreciate your support and the backing of State agencies on these projects as well.

The Conservancy's habitat conservation bank is an ambitious undertaking. I am excited that the habitat conservation bank is designed on a landscape scale and builds on your sage-grouse core area conservation strategy, something that is required for the continued protection of greater sage-grouse. I commit the Bureau of Land Management and the U.S. Fish and Wildlife Service (FWS) to diligently work on the establishment of the habitat conservation bank.

Regarding your comments about using conservation banks for avian species, we have initiated discussions at the national level on this complicated issue. At this time, we are exploring whether it is possible to utilize a traditional conservation banking approach to address impacts to eagles, given our current regulations governing take of eagles. We will continue to assess the degree to which it is possible to do as you suggest and apply these habitat banking concepts to eagles. Although the regulations implementing the MBTA do not currently address conservation banking when activities affect birds covered by that Act, the FWS supports and encourages voluntary banking efforts for this purpose.

It was a pleasure to meet with former-Governor Freudenthal and the Conservancy recently, and I look forward to learning more about their innovative efforts. I also commend your leadership in sage-grouse protection and natural resource issues in Wyoming.

Sincerely,

Sally Jewell

OFFICE OF THE
EXECUTIVE SECRETARIAT

Honorable Sally Jewell
Secretary of Interior
U.S. Department of Interior
1849 C Street, N.W., Room 6151
Washington, D.C. 20240

Dear Secretary Jewell:

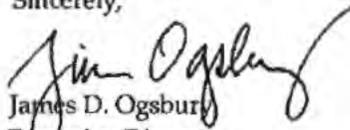

On behalf of the Western Governors' Association (WGA), I am writing to communicate Western Governors' concerns regarding invasive species. The problem of invasive species is one of the most complex environmental issues facing our nation, growing and creating economic and ecological damage across our western landscapes and Pacific Islands.

The National Invasive Species Council (NISC) was created to provide high-level interdepartmental coordination of federal invasive species actions, as well as to promote coordination with states and local entities to address cross-boundary invasive species concerns. Executive Order 13112, which established NISC in 1999, provides for biennial updates of the National Invasive Species Management Plan by NISC. The most recent Management Plan, released in August 2008, covered the period from 2008-2012.

Western Governors understand that a new Management Plan is currently being drafted under the auspices of NISC. WGA strongly urges NISC to engage and cooperate with states during the drafting process. Such coordination will ensure that federal priorities and actions align with the efforts of states, localities, nonprofit entities, and other stakeholders.

Western Governors welcome the opportunity to work with you on development and implementation of a new National Invasive Species Management Plan that can achieve measurable progress on invasive species. I look forward to learning from you how WGA can most constructively participate in the process of developing the management plan.

Sincerely,

James D. Ogsbury
Executive Director

The Honorable Kevin Washburn
Assistant Secretary of Indian Affairs
U.S. Department of Interior
MS-4141 --MIB
1849 C. Street, N.W.
Washington, D.C. 20240

Re: Yakama Nation Retrocession Petition

Dear Assistant Secretary Washburn:

Pursuant to 25 U.S.C. §1323 and Revised Code of Washington (RCW) 37.12, I have included the attached proclamation, signed by me on January 17, 2014. The proclamation addresses a retrocession petition submitted by the Confederate Tribes and Bands of the Yakama Nation in Washington State.

On March 19, 2012, former Washington State Governor Christine Gregoire signed Engrossed Substitute House Bill 2233. This important piece of legislation created a process by which the state of Washington may retrocede to the United States civil and criminal jurisdiction previously acquired by the State over a federally recognized Indian tribe under federal Public Law 280 in 1953. The bill gives the Governor of the state of Washington the authority to approve, in whole or in part, a retrocession petition submitted by a Washington State Indian tribe. Final approval rests with the U.S. Department of the Interior.

On July 17, 2012, the Yakama Nation filed a retrocession petition with the Office of the Governor requesting full civil and criminal jurisdiction on all of Yakama Nation Indian country in five specific areas of RCW 37.12.010. I believe that the enclosed Proclamation is a great first step towards strengthening the sovereignty and independence of the Yakama Nation.

In paragraph one of the proclamation, the State grants exclusive civil and criminal jurisdiction within the exterior boundaries of the Yakama Reservation in four subject areas of RCW 37.12.010: Compulsory School Attendance; Public Assistance; Domestic Relations; and Juvenile Delinquency.

In paragraph two, the proclamation also grants to the Yakama Nation civil and criminal jurisdiction within the exterior boundaries of the reservation in Operation of Motor Vehicles on Public Streets, Alleys, Roads, and Highways cases which do not involve non-Indian plaintiffs, non-Indian defendants, or non-Indian victims. I would note that the proclamation itself states that the State will retain jurisdiction in these cases over civil causes of action involving "non-Indian

The Honorable Kevin Washburn
January 27, 2014
Page Two

plaintiffs, non-Indian defendants, *and* non-Indian victims," as well as in criminal cases involving "non-Indian defendants *and* non-Indian victims." The intent set forth in paragraph two, however, is for the State to retain jurisdiction in this area where *any* party is non-Indian, and therefore may be more properly read in both instances as the State retaining jurisdiction in those cases involving "non-Indian plaintiffs, non-Indian defendants *and/or* non-Indian victims." I respectfully request that the Department make this clear in the notice accepting the retrocession Proclamation.

Finally, in paragraph three of the proclamation, the State is also retroceding criminal jurisdiction within the exterior boundaries of the reservation over all offenses not specifically addressed in paragraphs one and two, which do not involve non-Indian defendants or non-Indian victims. Again, I would note that in this paragraph the proclamation states that the State retains jurisdiction over criminal offenses involving "non-Indian defendants *and* non-Indian victims," but the intent is for the State to retain such jurisdiction in those cases involving non-Indian defendants *and/or* non-Indian victims."

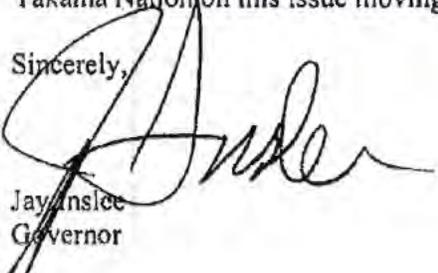

The proclamation does deny part of the petition by the Yakama Nation, and allow the State to retain existing civil and criminal jurisdiction in a limited number of areas. First and foremost, the State is retaining its existing jurisdiction outside of the exterior boundaries of the Yakama Reservation, including all trust and fee lands. Moreover, consistent with the description above, the State is retaining civil and criminal jurisdiction in Operation of Motor Vehicle cases that involve non-Indian plaintiffs, non-Indian defendants, and/or non-Indian victims.

It is important to note that nothing in the proclamation changes the existing jurisdiction the Yakama Nation has over Indian child custody proceedings under RCW 37.12.010(3) and Adoption proceedings and Dependent Children pursuant to RCW 37.12.010(6) and (7). The Yakama Nation reassumed jurisdiction over these subjects in 1980 under the Indian Child Welfare Act, and shall remain under the exclusive jurisdiction of the Yakama Nation.

Similarly, nothing in the proclamation shall affect the State's civil jurisdiction over the civil commitment of sexually violent predators pursuant to chapter 71.09 RCW and the State must retain such jurisdiction notwithstanding the completion of the retrocession process authorized under RCW 37.12.160.

Thank you for accepting this proclamation on behalf of the state of Washington and for working to bring the retrocession petition to fruition. I look forward to continue working with you and the Yakama Nation on this issue moving forward.

Sincerely,

Jay Inslee

Re: Request for a 60-day Extension for the Public Comment Period for the Utah Greater Sage Grouse Draft Land Use Plan Amendments/Draft Environmental Impact Statement

Dear Secretary Jewell:

I respectfully request the Bureau of Land Management grant a 60-day extension of the public comment period for the Utah Greater Sage Grouse Draft Plan Amendments/Draft Environmental Impact Statement (DEIS).

Utah is a public lands state, and decisions on land use made by our federal agency affect our state, residents, and economy significantly. The DEIS contains many proposed changes, with multiple options for each change, and affects the management of millions of acres in Utah. Many of these changes are complicated and technical, necessitating careful review.

Utah has already devoted time and resources to prepare an aggressive Sage Grouse Conservation Plan, which we have been implementing over the last year. Many of the same state and local agencies implementing the plan have been involved reviewing the hundreds of pages of information and numerous maps contained in the DEIS. Despite the great effort we have made, we have not had adequate time to complete the thorough review necessitated by these monumental changes, thus resulting in this request.

Thank you for your consideration of this request. If you have questions about this request, please contact Kathleen Clarke, director of the Governor's Public Lands Policy Coordination Office, at (801) 537-9083.

Sincerely,

A handwritten signature in black ink that reads "Gary R. Herbert".

FEB 18 2014

The Honorable Gary R. Herbert
Governor
State of Utah
Salt Lake City, Utah 84114

Dear Governor Herbert:

Thank you for your letter dated January 22, 2014, to Secretary of the Interior Sally Jewell requesting an extension of the comment period for the Bureau of Land Management's (BLM) Utah Greater Sage-Grouse Draft Land Use Plan Amendment(LUP)/Draft Environmental Impact Statement (DEIS). Secretary Jewell asked the BLM to respond to your letter.

Since the BLM announced the National Greater Sage-Grouse Planning Strategy in 2011, we have experienced unprecedented levels of state-Federal cooperation on planning efforts and landscape-level strategies to conserve the Greater Sage-Grouse and sagebrush habitat across the West. However, work remains in advance of the U.S. Fish and Wildlife Service's September 2015 court-ordered deadline to determine if the species warrants protection under the Endangered Species Act.

The BLM anticipates that the draft changes to the resource management plans covering the 68 Greater Sage-Grouse planning areas will be finalized in late 2014. Unfortunately, the existing court-ordered deadline does not allow for the flexibility to extend the comment period for the Utah Greater Sage-Grouse LUP/DEIS. In the coming months, the BLM will continue to address the volume and scope of comments we will be receiving on the LUP/DEIS, working closely with cooperating agencies, the state, other Federal agencies, Tribes and other stakeholders. The proposed plan and Final EIS needs to be released in time to allow for the Governor's consistency review, protest period, and protest resolution in order to issue a Record of Decision by Fall 2014.

Thank you for your interest in the BLM's planning efforts for the Greater-Sage Grouse and BLM public lands.

Sincerely,

Neil Kornze
Principal Deputy Director

Honorable Sally Jewell
Secretary
United States Department of Interior
1849 C Street, N.W.
Washington, D.C. 20240

Dear Secretary Jewell:

Thank you for briefing Western Governors last month on your recently finalized Secretarial Order 3330: *Improving Mitigation Policies and Practices of the Department of the Interior*. Though Secretarial Order 3330 went final last week, this letter communicates our initial views, and the attachment propounds questions regarding the Order.

The landscape-based approach envisioned in Secretarial Order 3330 – and increasingly embodied in new federal regulations from the Department of Interior (DOI) and other federal land management agencies – presents certain legal and regulatory complexities. Such a management philosophy must be implemented in a way that clearly recognizes the legal rights and responsibilities of states and private landowners adjacent to federal lands or within shared watersheds and air sheds.

Western Governors share the responsibility – with each other, with federal partners and with private landowners – of managing land within their state's borders. The Governors agree that mitigation for impacts to natural resources is an appropriate element of project development and land use plans.

Governors, however, also bear the responsibility to manage state property interests and preserve private property rights within state boundaries. DOI mitigation requirements and processes that may affect state and private land should be:

- Developed in cooperation with the Governors in whose states DOI lands are situated; and
- Be clearly defined and predictably implemented so proper and reasonable mitigation can be included in project planning.

Honorable Sally Jewell

January 21, 2014

Page 2

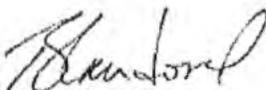

While individual governors are likely to provide their own comments, attached please find our initial joint comments and questions concerning Order 3330. Western Governors are committed to the protection of Western landscapes. We welcome the opportunity to continue to partner with DOI and other federal land management agencies to ensure effective and conscientious land management and project impact mitigation strategies in the West.

To that end, we respectfully request that DOI share with Western Governors feedback it received from BLM field offices in anticipation of the Jan. 17, 2014 deadline set forth in the Instruction Memorandum appurtenant to the Regional Mitigation Manual and provide Western Governors with an opportunity to comment on the recently finalized Mitigation Policy.

Sincerely,

John Hickenlooper
Governor, State of Colorado
WGA Chairman

Brian Sandoval
Governor, State of Nevada
WGA Vice Chairman

Western Governors' Association – Version 2
Initial Questions and Comments on Secretarial Order 3330
January 21, 2014

While the below list is not intended to represent the entirety of the Western states' input, Secretarial Order 3330 and the accompanying Draft Regional Mitigation Manual Section 1794 (hereafter "Mitigation Policy") leave a number of critical questions unresolved. Among them:

Science:

- The Mitigation Policy indicates it is being developed based on science-based methodologies. By whom are these methodologies being developed? Has state-generated data been taken into account? Will those methodologies be shared with states?
- What is the relationship and interaction between the National Environmental Policy Act (NEPA) and this Mitigation Policy? Will NEPA reviews occur at the landscape, resource management plan and/or specific project levels? How will NEPA be implicated where mitigation occurs off-site?
- The Mitigation Policy calls for DOI to incorporate climate change strategies into mitigation plans. What type or types of climate change modelling will DOI use to estimate the potential future effects of climate change in determining its acceptable form or level of mitigation?
- Under Secretarial Order 3330, the DOI's Energy and Climate Change Task Force is tasked with reviewing existing mitigation practices. Will state strategies inform this review?
- When DOI's Energy and Climate Change Task Force assesses the role of Landscape Conservation Cooperatives (LCCs), how will DOI ensure that the LCCs' role is limited to providing scientific and technical expertise, as distinct from discharging management responsibilities?

Landscape Planning – Cooperation:

- How will DOI coordinate and integrate this planning effort with other federal land management departments/agencies?
- As BLM elevates the role of landscape-scale planning in its mitigation-related decisions, will the agency engage state and private stakeholders early in the planning process?

- What role will states have in determining the location and breadth of specific off-site mitigation?
- Will BLM seek to participate in state-run mitigation programs and, if so, to what extent?
- How will BLM ensure consistency and transparency of mitigation decisions?
- How will this Mitigation Policy be implemented in the field, where BLM field managers exert substantial autonomy? Will staff be trained on how to implement the proposed mitigation strategies? Will local field managers be held accountable for enforcing approved mitigation plans?

Project-Level Application:

- The Mitigation Policy appears to authorize BLM to approve or deny project permit applications based on whether mitigation measures could take place on state-owned or privately-owned lands. Is that a feasible outcome of the Policy?
- In the event a state or private landowner refuses to consent to mitigation plans acceptable to BLM, will project plans still be conditionally approved?
- Large-scale projects and linear development projects such as energy transmission lines are likely to impact a wide array of lands and resources. For such projects, are there any institutional mechanisms to assist in project planning and does BLM plan to take into account state-generated data and research?
- How will this Mitigation Policy be informed by, and reconciled with, President Obama's various Presidential Memoranda and Executive Orders seeking to modernize and streamline federal infrastructure reviews, siting and permitting regulations, policies and procedures?
- In what ways will project proponents be required to incorporate into mitigation proposals requirements of federal land management and environmental statutes including, but not limited to, the Clean Water Act (CWA), the Endangered Species Act, and the Federal Land Management and Policy Act? Will project proponents be provided with specific federal requirements to be taken into account in mitigation proposals?
- Consistency and predictability are essential for project planning and development, particularly with respect to large-scale, long-term projects such as electric transmission lines. How will this effort improve regulatory certainty and minimize financial risks in order to encourage project proponents to pursue important energy infrastructure projects?

- Section 4(a) of the Order states that the DOI Energy and Climate Change Task Force will focus on offsetting the impact of "large development projects." How will the Task Force define what constitutes a "large development project" and identify the types of projects that are excluded? Will "large development projects" include non-energy-related infrastructure? If so, what kinds?

Water

- How will the Mitigation Policy apply to existing facilities and existing rights-of-way on BLM land that are needed to exercise state-issued water rights? How will it apply to efforts to repair, maintain or enlarge existing water facilities on BLM land? How will it apply to efforts to renew or amend an existing right-of-way?
- How will the Mitigation Policy ensure that it does not impair the reasonable exercise of state-issued water rights?
- With specific regard to the CWA, will a project proponent be required to identify a "point source" at the project pre-planning stage and if so, with what level of specificity?

THE SECRETARY OF THE INTERIOR
WASHINGTON

MAR 26 2014

The Honorable John Hickenlooper
Chairman, Western Governors' Association
1600 Broadway, Suite 1700
Denver, Colorado 80202

Dear Governor Hickenlooper:

Thank you for your letter of January 21, 2014, regarding my Secretarial Order (SO) 3330: *Improving Mitigation Policies and Practices of the Department of the Interior*. Effective engagement with state government is critical to the work of the Department of the Interior (Department), and I appreciate your personal interest, as well as that of the other Western Governors.

As you note in your letter, protection of Western landscapes is a goal we all share and one that demands strong partnerships and collaborative land management. Large landscape impacts such as wildland fire, invasive species, transmission lines, and highways do not stop at state borders, and Governors from across the West have partnered to address these common challenges. For example, our experience permitting solar development in the desert Southwest has shown that planning and close coordination among states and Federal agencies can produce faster and smarter permitting that result in more efficient energy development and better environmental outcomes. The Western Governors' Association (WGA) is also leading in this regard with development of its Critical Habitat Assessment Tool, a key aggregator of state wildlife data that Federal managers currently use.

This approach is not without challenges, and my team and I are committed to working closely with Governors, tribes, local officials, and other stakeholders to craft solutions that can achieve broad and durable results. As part of SO 3330, I commissioned a task force to examine the Department's existing mitigation practices and to develop a science-based strategy for landscape-scale planning. The task force is to identify new or revised policies or practices, including any regulatory changes that would be needed, and draft a strategy for how we should address them. I anticipate that report will be completed in the near future. I also have directed my staff to reach out to the staff at WGA to discuss the issues raised in your letter in depth, including your inquiry about the Bureau of Land Management's Regional Mitigation Manual. I understand that productive discussions have already taken place. Our outreach will continue as our work in this area progresses, both with WGA and with individual Governors and state agencies.

I value the strong working relationship the Department has with WGA, and I personally appreciate my partnership with you and your fellow Governors. Should your staff have additional questions, please do not hesitate to contact Leity Belin, Counselor to the Deputy Secretary (202-208-6291), Jim Lyons, Counselor to the Assistant Secretary for Land and Minerals Management (202-208-6734), or Neil Kornze, Principal Deputy Director of the Bureau of Land Management (202-208-3801). A similar letter is being sent to Governor Brian Sandoval.

Sincerely,

Handwritten signature of Sally Jewell in cursive script.

***Re: Request for extension of Public Comment Period for the Nevada and
Northeastern California Sub-region Greater Sage-grouse Draft Land Use
Plan Amendments/Draft Environmental Impact Statement***

Dear Secretary Jewell:

I respectfully request that the Bureau of Land Management grant a 60-day extension of the public comment period for the Nevada and Northeastern California Sub-region Greater Sage-grouse Draft Land Use Plan Amendments/Draft Environmental Impact Statement (DEIS).

Land management decisions made under the final version of this document will have significant impacts on our economy, custom and culture for decades. The highly-technical DEIS is more than 1,600 pages, including appendices. It is critical to our collective success that all parties – private citizens, local governments, non-governmental organizations, industry and states – have sufficient time to review and provide meaningful comments on this substantial document.

As you know, Nevada and many other states have been working fervently to address the critical issues presented by the potential listing of the Greater Sage-grouse under the Endangered Species Act. Nevada has undertaken substantial initiatives to protect the Greater Sage-grouse and the sagebrush ecosystem, including efforts that are outlined in the State's alternative submittal (Alternative E) as part of the BLM's planning process for the DEIS. We continue to develop and review comments in consultation with our Sagebrush Ecosystem Council, state agencies, the scientific community, and stakeholders across the state.

2014 FEB 18 PM 2:22

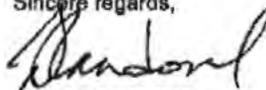

586049

RECEIVED

Should you have any questions or wish to discuss this further, please do not hesitate to contact me or my Chief of Staff, Mr. Gerald Gardner, at (775) 684-5670.

Thank you for your kind consideration of this request and for your continued attention to this critical issue.

Sincere regards,

BRIAN SANDOVAL
Governor

Subject: TPs for WGA remarks

Sally - last email from me today.

Attached are the draft remarks for WGA. These are a more fleshed out version of the remarks we discussed earlier this week, covering:

- 1) A nod to WGA for their practical and bipartisan work (CHATs, for example)
- 2) Noting that spirit of cooperation/leadership is needed now more than ever as we face complex challenges from climate change
- 3) Noting Admin's work to be a good partners on fire (POTUS briefing, budget proposal) and drought (new Reclamation announcements on funding).
- 4) Discussing the need for continued progress/optimism on greater sage grouse efforts and stating opposition to a 10 year delay
- 5) Gratitude for public employees who work on these tough issues

This is a lot to cover in 10 minutes, so I'd suggest reading these over with an eye to cut down.

(b)(5)

I'm flying out to CO Spgs tomorrow evening (5:15 ET), but should be available to discuss these remarks or other related questions tomorrow.

I'd also be available for breakfast on Monday morning, if you'd like to practice some Q&A on things like sage grouse, EPA's rule, oil and gas ballot measures, etc.

Thanks,

Kate

06-09-14 WGA remarks.docx
26K

**Remarks to Western Governors' Association
Colorado Springs, Colorado
June 9, 2014**

Length: 10 minutes

I. Acknowledgements [1 minute]

- **Governor John Hickenlooper**, Chair of WGA
- **Governor Brian Sandoval**, Vice Chair of WGA
- Other esteemed Governors
- Members of Interior's Team
 - **Mike Connor**, Deputy Secretary
 - **Janice Schneider**, Assistant Secretary for Land and Minerals Management
 - **Dan Ashe**, Director of the U.S. Fish and Wildlife Service
 - **Neil Kornze**, Director of the Bureau of Land Management
 - **Jim Lyons**, Deputy Assistant Secretary for Land and Minerals Management
 - **Sarah Greenberger**, Counselor, Office of the Secretary
 - **Michael Bean**, Counselor to the Assistant Secretary of Fish and Wildlife and Parks

II. WGA is rooted in partnership, bipartisan leadership [1 min]

- **Third time** at Western Governors' Association as Secretary
- Have been consistently **impressed with the bipartisan, practical efforts** this organization has taken on to get things done for your states. Recently:
 - **Western Energy Plan** (2013) that set out vision for next 10 years, balanced with renewable and conventional energy
 - **Crucial Habitat Assessment Tool** (CHATs), a cooperative effort of 16 Western states to provide the public and industry a high-level overview of "crucial habitat" across the West
 - Just this morning: Federal family renewed a partnership with the **Western States Tourism Policy Council** to leverage our resources to boost tourism and create jobs

III. Working Together to Solve Complex Issues [6 mins]

- That bipartisan and practical leadership is **needed now more than ever**
- The West is **facing a host of complex issues**:
 - Pressures on the land and water from a **changing climate**
 - Increasing demands from a **growing population**
 - **Stretched resources** at every level of government
- Recently-released **National Climate Assessment** confirms that climate change is already affecting every region of the country, and that in the West, rising temperatures are causing increased demand for water while drought and earlier snowmelt can cause water scarcity

- This means extended drought periods, longer fire seasons, and greater rates of fire spread. The **wildfire season is 60-80 days longer than just three decades ago** across the nation, and twice as many acres are burning now than three decades ago
- **Solutions are equally complex** – and can't be accomplished alone
- Interior – federal family – wants to continue to be your partner in helping impacted farmers, ranchers, small businesses, and communities. Examples:
- **Fire**
 - Priority for the Administration. Earlier, **President Obama** participated via video teleconference in wildfire preparedness briefing
 - **New budget framework** modeled on bipartisan proposals introduced in both houses of Congress :
 - Would budget for extreme fires like other natural disasters, treating them as the catastrophic disasters they are
 - New approach **provides certainty** in addressing growing fire suppression needs while better **safeguarding prevention and other non-suppression programs** from transfers
 - This year's fire season has already been so severe that Interior and the U.S. Forest Service estimate **exceeding our firefighting budgets** by as much as \$1 billion, with a median estimate of \$470 million
- **Drought**
 - **National Drought Resilience Partnership:** coordinating Federal efforts across the country, and working closely with State, local government, agriculture and other partners to improve community preparedness and resilience to drought.

- In **California**, that means weekly meetings with the White House and others on water operations and economic impacts
 - Leveraging Resources. Today, the **Bureau of Reclamation** announced:
 - **Nearly \$18 million in water and energy efficiency grants** available to 36 projects in the western United States to use water more efficiently, increase the use of renewable energy, and facilitate water markets
 - Funding for **three new comprehensive Basin Studies**, which are cost-shared with non-Federal partners, to address how climate change may affect water supply, demand, and operations in the future, and to identify adaptation strategies to address imbalances in water supply and demand
 - Upper Red River Basin in Oklahoma
 - Upper Deschutes Basin in Oregon
 - Missouri River Headwaters Basin in Montana
- **Greater Sage-Grouse**
 - Decline of sage grouse and deteriorating health of Western sagebrush landscapes has sparked an **unprecedented and proactive partnership**
 - Already seeing progress:
 - **Wyoming** has adopted strategy to preserve core wildlife areas while focusing important development elsewhere [and, as Mead will tell you, the State of Wyoming's economy is strong]
 - **BLM** – responsible for over half of total sage grouse habitat - has begun to amend their land management plans to better protect greater sage grouse
 - **NRCS** and its partners have invested millions to implement voluntary conservation projects on 3.8 million acres

- **FWS** has provided unprecedented guidance to all parties
- Some, however, have proposals that threaten to undermine this important work and ongoing partnerships. Several in Congress propose overruling a court order and delaying FWS's consideration of the bird's for 10 years
- **Kicking the can down the road simply isn't a solution**
- The science tells us that we have a **window of opportunity** to make a difference, so we should respond by rolling up our sleeves
- To ignore the fate of the sage-grouse is to ignore the fate of **mule deer, elk and pronghorn antelope – and 250 other species**, wild and domestic, that rely on the same sage brush habitat
- And it ignores the **hunters, ranchers and outdoor outfitters** that rely on a healthy landscape for their **western way of life** and economic activity
- **Know that there's tough work ahead, but if we all pull our oars in the same direction, I'm optimistic we can get there**

III. Conclusion: Nod to public servants [1 min]

- Often asked what's been biggest surprise – after 35 years in business
- It's the employees I've met at Interior – ie. your state residents
 - Incredibly hard-working public servants
 - Short on resources, raises – and implementing complex missions that balance multiple uses and sustained yield
 - Recent episode in Nevada an extreme example of animosity employees can face when doing their job
- State, federal public servants will be working on these tough issues long after we leave these jobs, so want to **express gratitude** to those in this room working on behalf of the American people

Subject: Gov Letter

Jim...

This is your official cc on a letter we are sending this afternoon to

Governors in the 11 western states harboring sage-grouse. A press release will go out tomorrow afternoon. This is the generic "Dear Governor _____" version to share with the copy list. In addition to the messaging within, we are working to hold meetings in some, but not all, of the key sage-grouse states to discuss sportsmen's concerns and engagement in helping to get plans to a place that will preclude the need to list. The letter is broad and not specific to any one state. The group wanted Governors in all 11 states that harbor sage-grouse to receive the letter, but I acknowledged our cognizance of each state's situation in my cover e-mail to each.

I would also greatly appreciate it if you'd share the letter with Secretary Jewell, as she is on the cc list, and I look forward to seeing you both tomorrow at the WGA meeting.

Cheers,

Ed

<Governor's letter 8 June 2014.pdf>

8 June 2014

The Honorable Governor _____
ADDRESS HERE

Dear Governor _____,

On the eve of the annual gathering of governors at the Western Governors Association (WGA), the sportsmen's conservation groups listed below are writing first to commend you, your staff and state wildlife agency for your leadership and commitment to the management and conservation of greater sage-grouse. We also want to urge you to consider the urgency and express our concern about the development and implementation of solid conservation plans for greater sage-grouse. These plans need to focus on both state and private lands within your state. The impending decision as to whether to list the grouse under the Endangered Species Act (ESA) by the US Fish and Wildlife Service (FWS) is less than 16 months away and it is imperative that sage-grouse conservation not be delayed if we hope to avert this listing. We believe that state-developed conservation plans--coordinated with strong federal habitat management strategies--are critical to precluding the need to list sage-grouse.

Our organizations have extensive experience in wildlife policy and management, including sage-grouse, and many of our members are leading authorities on the management of state and federal public lands and wildlife. We have been active in the sage-grouse issue and have advocated for activities that address the specific threats to the species as a solution-oriented approach. Our goals are to help **preclude the need to list** sage-grouse by improving habitat and sage-grouse populations, and to keep the bird's management in the hands of the states through coordinated and consistent application of policy and management.

In reviewing current drafts of the state plans, correspondence between the states and the US Fish and Wildlife Service, and our observations and discussions at professional meetings (e.g., Association of Fish and Wildlife Agencies, WGA, Western Association of Fish and Wildlife Agencies (WAFWA), local sage-grouse working groups), we have several concerns regarding the current direction of sage-grouse conservation and management within and among states and are prepared to offer some specific recommendations that could help the FWS determine that a listing is not warranted.

Our primary concerns and recommendations can be summarized as follows:

- We believe states should work more closely toward an 11 state strategy that collectively explains individual variability in conservation approaches, while providing adequate protection and conservation of sage-grouse. Such an approach should give the FWS the scientific and legal basis to defend a not-warranted finding.
- We understand inconsistencies between state plans in regard to managing populations of sage-grouse that cross state boundaries are being addressed and rectified within each state plan. States need to insure this process continues to completion. Coordination with federal land management agency plans is also imperative.
- State plans must have a high degree of certainty that efforts will be effective and sustained in addressing and reducing the specific threats to sage-grouse within each state. We believe a combination of necessary regulatory mechanisms and strong voluntary incentives, combined

with increased monitoring of compliance, should meet habitat and populations goals sufficient to assure the FWS that state management is adequate to prevent a listing.

- State plans should include clearly stated goals to sustain grouse sage-populations and its continued management as a game bird.
- The finalization of plans should be developed with diverse stakeholders input to ensure effective conservation measures that will maintain sustainable and harvestable populations.
- Plans should include a process for accountability, monitoring and adapting to change. In Wyoming, for example, a statutory body of diverse stakeholders was established to advise the state and holds the state accountable for implementing actions, enforcing regulations, and ensuring adequate completion of sage-grouse conservation plans and any proposed and permitted activities in priority habitat.

We applaud the efforts all states have put forward to date. We are especially supportive of the strong foundation for sage-grouse science, management and conservation the state wildlife agencies provide. However, without continued work to improve plans and affect better coordination between states and federal land agencies, we believe the FWS may not deem the effort sufficient to preclude the need to list under the ESA. We strongly encourage you to continue working closely with your state wildlife agency to strengthen your plan and reach out to stakeholders to develop and implement the best conservation plan achievable for sage-grouse to preclude the need to list.

Sportsmen have contributed substantially to sage-grouse conservation (more than \$130 million in the past decade) and have relinquished many hunting opportunities over the years as grouse populations have declined, even though hunter harvest is not a major factor in the bird's decline. We cannot afford further delays implementing conservation strategies that will address the threats to sage grouse populations and habitats and assure the Fish and Wildlife Service that individual states can and should retain management control of the species.

A greater sage-grouse ESA listing is not a foregone conclusion and avoiding it will require extensive collaboration and solid conservation plans from the states and federal government. Bolstering the health of sagebrush ecosystems and sage-grouse numbers will produce benefits from which industry, recreationists, sportsmen and local economies all will gain. All wildlife that use sage grouse ecosystems will be affected by an ESA listing including mule deer and other big game animals that are vital to state's economies and sporting opportunities.

We believe there is still time to work with stakeholders and better position state plans to preclude the need to list greater sage-grouse. Our organizations and many other sportsmen's groups are ready to help and we would like to meet with you to discuss our concerns and opportunities to help chart out a path forward.

Thank you for your attention and all your efforts for conservation. Numerous members of our organizations will be at the Western Governors Association meeting and can discuss this issue with you or your staff. We look forward to meeting with you and working to balance conservation for sage-grouse and maintaining a prosperous economy.

Please contact Ed Arnett, Theodore Roosevelt Conservation Partnership, (541-520-5252, earnett@trcp.org) or Terry Riley, North American Grouse Partnership (970-689-3542, triley@grousepartners.org) for further information and to schedule a meeting with sportsmen.

SUMMARY of Boise RAC Subcommittee Report on Options for Gateway West Segments 8 and 9

The subcommittee presented this report to the full RAC on June 5, 2014, in a public meeting.

The subcommittee was not able to reach full consensus on the routing options report.

The majority of subcommittee members concluded that routes designed to circumvent the Birds of Prey NCA had more impacts on communities, resources and values and private landowners than those that would cross the NCA.

The majority of subcommittee members (7 of 8) concluded that routes with the least impact on resources and people would follow existing transmission line infrastructure (rights-of-way, access roads, towers) within the NCA.

The majority concluded that replacing or closely following existing lines in the NCA would be consistent with BLM policy for managing National Conservation Lands that new ROWs authorized in National Conservation Lands units should “share, parallel, or adjoin existing ROWs” (BLM Manual 6220 Section E).

The majority concluded that the best route for segment 8 is “Summer Lake Option 1.”

- 60% in NCA (22.9 of 38.0 miles)
- Acceptable crossing of Snake River Canyon
- Preferred route of City of Kuna
- Uses existing corridor (PacifiCorp 500-kV line)
- Minimal private property impacts (crossings, proximity to residences, agricultural operations)
- Minimizes disruption of operations in National Guard training center

The majority concluded that the best route for segment 9 is “Baja Road-Murphy Flat South.”

- Double circuit with existing 138-kV lines for most (59%) of the distance in the NCA (53.8 of 68.5 miles, 79%)
- Acceptable crossing of the Snake River Canyon
- Preferred route of Owyhee County
- Avoids Oregon Trail ruts (National Historic Trail)
- Outside of preliminary priority Greater sage-grouse habitat
- Minimal private property impacts (including visual impacts)

The minority conclusion is that the majority’s recommendation is inconsistent with legal requirements for protecting the NCA and with BLM policy.

The minority requested that the RAC adopt and endorse the subcommittee routing report without the majority conclusion recommending or endorsing specific routes.

**SUMMARY of Boise RAC Action on Subcommittee Reports
on Options for Gateway West Segments 8 and 9**

The RAC received reports on route options for segments 8 and 9 and on the proposed Mitigation and Enhancement Portfolio offered by the proponent Companies.

There were Majority and Minority conclusions presented with the report on route options. The Conservation Lands Foundation representative on the subcommittee constituted the Minority.

After a period for questions, comments or discussion from RAC members only, a motion was made to accept all the workings of the subcommittee.

A voice vote among members in attendance affirmed the motion, but because a quorum was not present in the room, two other RAC members were contacted on a speakerphone conference line by previous arrangement. They each confirmed that they had reviewed the reports. Each then offered her support for the majority conclusion.

The RAC thereby accepted both subcommittee reports without further modification and transmitted them to the BLM.

Acting BLM Idaho State Director Tim Murphy proceeded to comment and outline the next steps:

The goal of the subcommittee effort was a collaborative and consensus-driven process to identify routing opportunities. While the subcommittee was unable to reach a consensus, the body of work including 26 route options and data associated with each option, provides important information that will be utilized through the NEPA process.

Once the Companies further develop the Mitigation and Enhancement Portfolio according to the information in that subcommittee report and submit the revised version to the BLM, the BLM will re-initiate the NEPA process for the project with public scoping.

Following scoping, the BLM will determine the appropriate level of NEPA analysis of the Portfolio and any route options in the RAC report that may need additional analysis.

That NEPA analysis will most likely be a supplemental EIS.

RAW notes from the Gateway West RAC Subcommittee presentation to the full RAC June 5, 2014.

RAC Introductions

Jim Fincher thanked the RAC coordinators and gave a synopsis of what he asked the RAC subcommittee to do after the decisions were made to defer the decision Segments 8 & 9. He thanked the subcommittee on their professionalism and the open and collaborative way that they worked together. We look forward to hearing the subcommittee presentation both in regards to the routing options and the mitigation and enhancement portfolio. We'll compare those to what was done in the EIS. This information will be released to the public during scoping.

Karen Steenhof gave a presentation to the RAC on the Route Options report. Karen thanked everyone for coming. We (the subcommittee) updated you (RAC) back in January on our progress, so I will keep the background information brief. Karen gave a background on the GWW project that was proposed and discussed the deferral of decisions on Segments 8 and 9. The preferred alternatives traversed unroaded lands in Owyhee county and in the communities of Melba, Murphy and Oreana. Controversial because of sage grouse, scenic views and private lands in Ada, Canyon and Owyhee counties. Decision was whether to put in new transmission lines in the NCA. At the time the NCA was established, there were many transmission lines already existing. Research conducted from 1981 to 1989 found that the transmission lines enhanced the opportunities for raptor perching. Collision with transmission lines does seem to be a big issue for raptors in this area. Raptors and ravens were attracted to the 500kV line.

The NCA was established, Karen defined what a NLCS unit is (National Conservation Lands). A BLM Manual came about in 2012 that asserts that BLM should avoid granting new ROWs in monuments and NCA. It then gives discretion to the BLM that if they have to route them through monuments and NCAs and the required mitigation.

The subcommittee team was presented and Karen thanked everyone for their help. The subcommittee held 11 meetings and one work session. Twenty presentations were given. The meetings has >120 attendees with 22 people who commented (public). There were 2 field trips held (by Governor's Office of Energy Resources). At the first RAC subcommittee meeting, the subcommittee agreed to focus on the areas of Segments 8 and 9 from nodes 8-01 and 9-01. New information was presented to the subcommittee – new guidelines for transmission line separation criteria and the potential to co-locate (or double circuit) with existing 138-kV lines. The subcommittee decided to try to route the line options to reduce impacts to private property and residences.

The subcommittee identified river crossings as potential bottlenecks. We evaluated 10 crossings of the Snake River (that is where the resources are the richest) and determined which ones were acceptable or not acceptable. All 4 acceptable crossings are at places where there are already transmission lines crossing the rivers. We evaluated 12 route options for Segment 8 and 14 for Segment 9. Some had already been evaluated in the EIS and some were new. The report provides details on the route options, with a matrix of resources and maps showing each route. After we looked at each option, we tried to determine if we should rank the routes, however once we looked at the conflicts, one route option for

each route seemed to rise to the top. For Segment 8, the majority (7 of 8) of subcommittee recommends the Summer Lake option. This route would parallel the PacifiCorp Summer Lake 500-kV transmission line across the NCA. The updated WECC separation criteria would allow the new transmission line to be 250 feet from the existing line. This route should minimize vegetation disturbance by reducing the amount of new access roads within the BOPNCA and elsewhere that would need to be constructed and maintained. The Companies plan to use existing roads near and beneath the existing 500-kV transmission line to minimize the overall disturbance footprint of the new line. Rather than constructing a completely new access road network for the route, they would use short spur roads from existing roads to provide access to new towers. This route would minimize impacts on communities and private property in the Kuna and Melba areas of Ada, Canyon, and Owyhee Counties and would avoid critical habitat for slickspot peppergrass. This route was modified to minimize impacts to the OCTC Alpha Sector and adjacent private property.

For Segment 9, the majority of the subcommittee recommends the Baja Road-Murphy Flat South. This option would double circuit the new 500-kV line with existing 138-kV lines for most of the distance through the NCA. The new line would incorporate and replace existing 138-kV lines near C. J. Strike Reservoir in Owyhee County and along Baja Road on public land in Ada and Elmore counties. The line would cross the Snake River near C.J. Strike Dam and above Swan Falls, near Sinker Butte, where an existing 138-kV transmission line crosses the Snake River. The new 500-kV line would traverse public land on Murphy Flat, avoiding historic Oregon Trail ruts. It would cross Highway 78 near the Rabbit Creek Trailhead, and continue north to the Hemingway Substation, outside of preliminary priority sage-grouse habitat and mainly out of view from most subdivisions in Owyhee County. The advantages of this route are that it would minimize impacts on communities and private property in Owyhee County. It would minimize the amount of new road that would need to be constructed and maintained within the NCA and in unroaded areas in Owyhee County. This route would minimize the construction of transmission towers and roads near Greater sage-grouse leks, and within Greater sage-grouse habitat.

The subcommittee is aware of and sensitive to concerns that siting new transmission lines within the BOPNCA might set precedents for other National Conservation Lands. We find that the NCA is unique among National Conservation Lands in that the habitat has been seriously degraded by a history of wildfires and a proliferation of invasive species. There was already a great deal of infrastructure within its boundaries at the time it was designated. Scientific research conducted within the NCA indicated that this infrastructure has been compatible with the resources for which the NCA was designated, and some raptor populations may benefit if new transmission towers are designed to provide nesting and perching sites. The subcommittee reviewed the requirements in the Manual and we recognize the need to mitigate or enhance the area if a transmission line is built. We'll address the MEP review shortly.

Danielle Murray gave a presentation on the minority conclusions on the Route Option report. I work for the Conservation Lands Foundation – our mission is to protect, restore and expand the NCLs. She showed some photos of other NCAs in surrounding states as well as the Bruneau and Owyhee wild and scenic sections. We work with “friends groups” around the nation, who work closely with the BLM around the nation who work to protect these special areas.

The consensus of the subcommittee...This has been a very open and collaborative process. I agree that the subcommittee was tasked with addressing new information that the BLM may not have had. The appendices in the report show the work that the subcommittee did – we did a great job working together. I do not endorse, recommend or agree with ranking the proposed routes for Segments 8 and 9. The expertise and purpose of the subcommittee was to help BLM identify pros and cons of routes and new routes. The expertise and legal mandates of BLM had to meet the legal requirements of the NCA. The analysis that the subcommittee did was a bit biased to get the route that they wanted to see. I find that the excuse that the NCA is unique in that the habitat has been degraded. However, I think that this would be the last place you would put the power line. The subcommittee stated that new transmission lines should have no adverse on raptors, that was Karen's research and we did not look at any other research. We reviewed the BLM manuals, however I don't think that was what the subcommittee was asked to do. We asked the BLM several times, we asked the BLM what they needed the subcommittee to do. The BLM did not ask us to give recommendations on route options. My recommendation is for the BLM to take a look at all of the work that was done for each route option and consider it during the NEPA process. I don't think that the BLM should take the subcommittee route recommendation.

1 – I think the subcommittee did a great job on looking all of the route options and this is a complicated issue.

2 – I don't think the subcommittee is experts at interpreting BLM laws. I think that the BLM should look at all of the information presented in the reports.

Question from the RAC – I am trying to understand the RAC subcommittee minority is. Danielle stated that she is the minority. Neil – when we first started into this process in December 2013. Betsy stated that she was glad there was a process, but she could not endorse a route through the NCA. We agreed with Betsy (and therefore Danielle) that they could present a minority conclusion.

Karen presented the evaluation of the MEP proposal (draft portfolio) presented by the companies. The submitted their draft portfolio during the comment period for the FEIS. The MEP is designed to go above and above the standard mitigation requirements. The MEP includes compensatory mitigation and enhancement requirements. Compensatory addresses residual impacts to try to get the area back to "baseline" conditions. The draft proposal has proposed that 43% of the funds go to habitat restoration and 57% goes toward law enforcement. Enhancement is based on construction footprint (larger than operational footprint) and proposes (get numbers from slide) habitat restoration, law enforcement, land purchase, visitor enhancement; management oversight, line removal. The oversight committee. Line removal would be removal of two lower voltage lines in the NCA. The amounts are scalable based on miles of line that are proposed on NCA, except the management oversight and line removal amounts which are static. The amounts in the MEP proposal are based on the draft portfolio proposed routes. The metric can be applied regardless of which segment is chosen. The report shows the estimated funding for each route option. The general consensus from the subcommittee was that the proposed funding was too low, however we did not feel like we had the expertise to determine how much funding would be appropriate. We recommend that the BLM through the NEPA process do an analysis to

determine what is appropriate. The subcommittee had concerns about the allocation of the funding. The MEP did not provide for enhancement of raptor populations and scientific resources and values (research and monitoring). We recommend that the companies revise the proposed allocations. And we recommend that the following categories in order of priority: (get list from slide). The subcommittee was pleased that the NEP proposed law enforcement we feel that an expanded and onsite presence will reduce.... The BLM already has a robust public awareness program, so we don't feel that the money should be focused on public education. We discussed land purchase or whether to invest monies to restore and enhance lands; however a management(get from report). The permitting process should disallow line construction during nesting season and we recommend that biologists and engineers work together to design towers that are raptor friendly (nesting platforms) and raven non-friendly. While the lines will be removed, we think that poles should be left in place. Enhancing raptor populations happen by enhancing prey base which benefit by enhancing habitat. The lands in the NCCA have been degraded by fire and invasives; they need to be restored. In this climate, it will be extremely difficult to reestablish habitat and we would prefer to see larger areas treated instead of smaller. We recommend an integrated and adaptive approach. Look at landscape scale strategy to preserve remnant sage-brush patches should be a priority. Fire breaks and fire suppression are recommended. These goals could be accomplished through a variety of approaches addressed in the report. Research and monitoring at all trophic levels should take place. Vegetation monitoring plan, monitor the effects of transmission lines, monitoring trends in raptors (raptor population monitoring), prey population monitoring (small mammals such as ground squirrels and jack rabbits), studies of lead in the environment (new access roads will increase recreation and more lead could be introduced), data repository to assemble data. Keys to success are a long-term approach, an oversight committee established as soon as possible, and to ensure that funds are available over the long term, we recommend long-term management.

RAC member question – what recreational uses will be allowed on the roads? Response: there is a travel management plan is currently being prepared. It will designate specific uses. So is it likely that motorized vehicles will be allowed. Motorized vehicles are currently allowed on designated roads. Another RAC member asked about the co-location of lines near Rabbit Creek? Response: there was a discussion that distribution and transmission lines will not be collocated, they are separate. There will not be co-location in the Rabbit Creek area. Another question from the RAC: You say in the report that a substation will be removed; where is it? Response: The Gage Station in the area east and southeast of Melba on the NCA will be removed.

The RAC chair, Gene Gray, stated that he would accept a motion to accept the workings of the subcommittee and forward to the Boise District Manager. It was motioned and seconded to accept all of the workings of the subcommittee. Sara Schmidt, RAC member, offered her support of the majority conclusion presented by the subcommittee. Kathryn Alder, RAC member, voted to support the routes recommended by the majority by the subcommittee. Alayne Bickle motioned to accept the workings and the motion was seconded by Gayle Poorman.

Jim Fincher presented each member of the subcommittee with an award for all of the work that they have done leading the subcommittee effort and all of the hours they have donated to get through the

process. I think this process has been and will be a good model for the future on how a RAC and subcommittee can work well with the BLM.

Tim – We appreciate all of the collaboration, time, travel, etc. that went into this effort. The companies provided very helpful inside on changes that that can occur and provided very helpful information. Although the subcommittee has not come to total consensus, what we have a is a very useful body of information to use going forward. With the conclusion of this work, the BLM will begin a public scoping process, look at what the RAC brought forward, look at what was done in the EIS. We now have a highly concentrated effort. BLM wants to work as rapidly as possible with the companies to work on the MEP package. We will start on public scoping. How long will this take? I don't think there is a good opportunity for an EA, but we won't make that determination until public scoping is done. Looking at the longest timeframe of a potential supplemental EIS, it could take 18 months.

Neil – I would encourage the BLM to use the RAC through this process; the subcommittee has expertise to help the BLM. Tim – the matrix will be very useful in this process; it would have taken us a lot of time to get to that point. Gene – please use folks on the RAC for their expertise. Tim – yes we are listening and at the end of the day Jim has a tough decision to make. We will listen and will have transparency through this process.

RAW notes from the Gateway West RAC Subcommittee presentation to the full RAC June 5, 2014.

RAC Introductions

Jim Fincher thanked the RAC coordinators and gave a synopsis of what he asked the RAC subcommittee to do after the decisions were made to defer the decision Segments 8 & 9. He thanked the subcommittee on their professionalism and the open and collaborative way that they worked together. We look forward to hearing the subcommittee presentation both in regards to the routing options and the mitigation and enhancement portfolio. We'll compare those to what was done in the EIS. This information will be released to the public during scoping.

Karen Steenhof gave a presentation to the RAC on the Route Options report. Karen thanked everyone for coming. We (the subcommittee) updated you (RAC) back in January on our progress, so I will keep the background information brief. Karen gave a background on the GWW project that was proposed and discussed the deferral of decisions on Segments 8 and 9. The preferred alternatives traversed unroaded lands in Owyhee county and in the communities of Melba, Murphy and Oreana. Controversial because of sage grouse, scenic views and private lands in Ada, Canyon and Owyhee counties. Decision was whether to put in new transmission lines in the NCA. At the time the NCA was established, there were many transmission lines already existing. Research conducted from 1981 to 1989 found that the transmission lines enhanced the opportunities for raptor perching. Collision with transmission lines does seem to be a big issue for raptors in this area. Raptors and ravens were attracted to the 500kV line.

The NCA was established, Karen defined what a NLCS unit is (National Conservation Lands). A BLM Manual came about in 2012 that asserts that BLM should avoid granting new ROWs in monuments and NCA. It then gives discretion to the BLM that if they have to route them through monuments and NCAs and the required mitigation.

The subcommittee team was presented and Karen thanked everyone for their help. The subcommittee held 11 meetings and one work session. Twenty presentations were given. The meetings has >120 attendees with 22 people who commented (public). There were 2 field trips held (by Governor's Office of Energy Resources). At the first RAC subcommittee meeting, the subcommittee agreed to focus on the areas of Segments 8 and 9 from nodes 8-01 and 9-01. New information was presented to the subcommittee – new guidelines for transmission line separation criteria and the potential to co-locate (or double circuit) with existing 138-kV lines. The subcommittee decided to try to route the line options to reduce impacts to private property and residences.

The subcommittee identified river crossings as potential bottlenecks. We evaluated 10 crossings of the Snake River (that is where the resources are the richest) and determined which ones were acceptable or not acceptable. All 4 acceptable crossings are at places where there are already transmission lines crossing the rivers. We evaluated 12 route options for Segment 8 and 14 for Segment 9. Some had already been evaluated in the EIS and some were new. The report provides details on the route options, with a matrix of resources and maps showing each route. After we looked at each option, we tried to determine if we should rank the routes, however once we looked at the conflicts, one route option for

each route seemed to rise to the top. For Segment 8, the majority (7 of 8) of subcommittee recommends the Summer Lake option. This route would parallel the PacifiCorp Summer Lake 500-kV transmission line across the NCA. The updated WECC separation criteria would allow the new transmission line to be 250 feet from the existing line. This route should minimize vegetation disturbance by reducing the amount of new access roads within the BOPNCA and elsewhere that would need to be constructed and maintained. The Companies plan to use existing roads near and beneath the existing 500-kV transmission line to minimize the overall disturbance footprint of the new line. Rather than constructing a completely new access road network for the route, they would use short spur roads from existing roads to provide access to new towers. This route would minimize impacts on communities and private property in the Kuna and Melba areas of Ada, Canyon, and Owyhee Counties and would avoid critical habitat for slickspot peppergrass. This route was modified to minimize impacts to the OCTC Alpha Sector and adjacent private property.

For Segment 9, the majority of the subcommittee recommends the Baja Road-Murphy Flat South. This option would double circuit the new 500-kV line with existing 138-kV lines for most of the distance through the NCA. The new line would incorporate and replace existing 138-kV lines near C. J. Strike Reservoir in Owyhee County and along Baja Road on public land in Ada and Elmore counties. The line would cross the Snake River near C.J. Strike Dam and above Swan Falls, near Sinker Butte, where an existing 138-kV transmission line crosses the Snake River. The new 500-kV line would traverse public land on Murphy Flat, avoiding historic Oregon Trail ruts. It would cross Highway 78 near the Rabbit Creek Trailhead, and continue north to the Hemingway Substation, outside of preliminary priority sage-grouse habitat and mainly out of view from most subdivisions in Owyhee County. The advantages of this route are that it would minimize impacts on communities and private property in Owyhee County. It would minimize the amount of new road that would need to be constructed and maintained within the NCA and in unroaded areas in Owyhee County. This route would minimize the construction of transmission towers and roads near Greater sage-grouse leks, and within Greater sage-grouse habitat.

The subcommittee is aware of and sensitive to concerns that siting new transmission lines within the BOPNCA might set precedents for other National Conservation Lands. We find that the NCA is unique among National Conservation Lands in that the habitat has been seriously degraded by a history of wildfires and a proliferation of invasive species. There was already a great deal of infrastructure within its boundaries at the time it was designated. Scientific research conducted within the NCA indicated that this infrastructure has been compatible with the resources for which the NCA was designated, and some raptor populations may benefit if new transmission towers are designed to provide nesting and perching sites. The subcommittee reviewed the requirements in the Manual and we recognize the need to mitigate or enhance the area if a transmission line is built. We'll address the MEP review shortly.

Danielle Murray gave a presentation on the minority conclusions on the Route Option report. I work for the Conservation Lands Foundation – our mission is to protect, restore and expand the NCLs. She showed some photos of other NCAs in surrounding states as well as the Bruneau and Owyhee wild and scenic sections. We work with “friends groups” around the nation, who work closely with the BLM around the nation who work to protect these special areas.

The consensus of the subcommittee...This has been a very open and collaborative process. I agree that the subcommittee was tasked with addressing new information that the BLM may not have had. The appendices in the report show the work that the subcommittee did – we did a great job working together. I do not endorse, recommend or agree with ranking the proposed routes for Segments 8 and 9. The expertise and purpose of the subcommittee was to help BLM identify pros and cons of routes and new routes. The expertise and legal mandates of BLM had to meet the legal requirements of the NCA. The analysis that the subcommittee did was a bit biased to get the route that they wanted to see. I find that the excuse that the NCA is unique in that the habitat has been degraded. However, I think that this would be the last place you would put the power line. The subcommittee stated that new transmission lines should have no adverse on raptors, that was Karen's research and we did not look at any other research. We reviewed the BLM manuals, however I don't think that was what the subcommittee was asked to do. We asked the BLM several times, we asked the BLM what they needed the subcommittee to do. The BLM did not ask us to give recommendations on route options. My recommendation is for the BLM to take a look at all of the work that was done for each route option and consider it during the NEPA process. I don't think that the BLM should take the subcommittee route recommendation.

1 – I think the subcommittee did a great job on looking all of the route options and this is a complicated issue.

2 – I don't think the subcommittee is experts at interpreting BLM laws. I think that the BLM should look at all of the information presented in the reports.

Question from the RAC – I am trying to understand the RAC subcommittee minority is. Danielle stated that she is the minority. Neil – when we first started into this process in December 2013. Betsy stated that she was glad there was a process, but she could not endorse a route through the NCA. We agreed with Betsy (and therefore Danielle) that they could present a minority conclusion.

Karen presented the evaluation of the MEP proposal (draft portfolio) presented by the companies. The submitted their draft portfolio during the comment period for the FEIS. The MEP is designed to go above and above the standard mitigation requirements. The MEP includes compensatory mitigation and enhancement requirements. Compensatory addresses residual impacts to try to get the area back to "baseline" conditions. The draft proposal has proposed that 43% of the funds go to habitat restoration and 57% goes toward law enforcement. Enhancement is based on construction footprint (larger than operational footprint) and proposes (get numbers from slide) habitat restoration, law enforcement, land purchase, visitor enhancement; management oversight, line removal. The oversight committee. Line removal would be removal of two lower voltage lines in the NCA. The amounts are scalable based on miles of line that are proposed on NCA, except the management oversight and line removal amounts which are static. The amounts in the MEP proposal are based on the draft portfolio proposed routes. The metric can be applied regardless of which segment is chosen. The report shows the estimated funding for each route option. The general consensus from the subcommittee was that the proposed funding was too low, however we did not feel like we had the expertise to determine how much funding would be appropriate. We recommend that the BLM through the NEPA process do an analysis to

determine what is appropriate. The subcommittee had concerns about the allocation of the funding. The MEP did not provide for enhancement of raptor populations and scientific resources and values (research and monitoring). We recommend that the companies revise the proposed allocations. And we recommend that the following categories in order of priority: (get list from slide). The subcommittee was pleased that the NEP proposed law enforcement we feel that an expanded and onsite presence will reduce.... The BLM already has a robust public awareness program, so we don't feel that the money should be focused on public education. We discussed land purchase or whether to invest monies to restore and enhance lands; however a management(get from report). The permitting process should disallow line construction during nesting season and we recommend that biologists and engineers work together to design towers that are raptor friendly (nesting platforms) and raven non-friendly. While the lines will be removed, we think that poles should be left in place. Enhancing raptor populations happen by enhancing prey base which benefit by enhancing habitat. The lands in the NCCA have been degraded by fire and invasives; they need to be restored. In this climate, it will be extremely difficult to reestablish habitat and we would prefer to see larger areas treated instead of smaller. We recommend an integrated and adaptive approach. Look at landscape scale strategy to preserve remnant sage-brush patches should be a priority. Fire breaks and fire suppression are recommended. These goals could be accomplished through a variety of approaches addressed in the report. Research and monitoring at all trophic levels should take place. Vegetation monitoring plan, monitor the effects of transmission lines, monitoring trends in raptors (raptor population monitoring), prey population monitoring (small mammals such as ground squirrels and jack rabbits), studies of lead in the environment (new access roads will increase recreation and more lead could be introduced), data repository to assemble data. Keys to success are a long-term approach, an oversight committee established as soon as possible, and to ensure that funds are available over the long term, we recommend long-term management.

RAC member question – what recreational uses will be allowed on the roads? Response: there is a travel management plan is currently being prepared. It will designate specific uses. So is it likely that motorized vehicles will be allowed. Motorized vehicles are currently allowed on designated roads. Another RAC member asked about the co-location of lines near Rabbit Creek? Response: there was a discussion that distribution and transmission lines will not be collocated, they are separate. There will not be co-location in the Rabbit Creek area. Another question from the RAC: You say in the report that a substation will be removed; where is it? Response: The Gage Station in the area east and southeast of Melba on the NCA will be removed.

The RAC chair, Gene Gray, stated that he would accept a motion to accept the workings of the subcommittee and forward to the Boise District Manager. It was motioned and seconded to accept all of the workings of the subcommittee. Sara Schmidt, RAC member, offered her support of the majority conclusion presented by the subcommittee. Kathryn Alder, RAC member, voted to support the routes recommended by the majority by the subcommittee. Alayne Blicke motioned to accept the workings and the motion was seconded by Gayle Poorman.

Jim Fincher presented each member of the subcommittee with an award for all of the work that they have done leading the subcommittee effort and all of the hours they have donated to get through the

process. I think this process has been and will be a good model for the future on how a RAC and subcommittee can work well with the BLM.

Tim – We appreciate all of the collaboration, time, travel, etc. that went into this effort. The companies provided very helpful inside on changes that that can occur and provided very helpful information. Although the subcommittee has not come to total consensus, what we have a is a very useful body of information to use going forward. With the conclusion of this work, the BLM will begin a public scoping process, look at what the RAC brought forward, look at what was done in the EIS. We now have a highly concentrated effort. BLM wants to work as rapidly as possible with the companies to work on the MEP package. We will start on public scoping. How long will this take? I don't think there is a good opportunity for an EA, but we won't make that determination until public scoping is done. Looking at the longest timeframe of a potential supplemental EIS, it could take 18 months.

Neil – I would encourage the BLM to use the RAC through this process; the subcommittee has expertise to help the BLM. Tim – the matrix will be very useful in this process; it would have taken us a lot of time to get to that point. Gene – please use folks on the RAC for their expertise. Tim – yes we are listening and at the end of the day Jim has a tough decision to make. We will listen and will have transparency through this process.

Briefing Materials for Tuesday, June 10, 2014

Javaid, Zaina <zaina_javaaid@ios.doi.gov>

Mon, Jun 9, 2014 at 6:57 PM

To: Sally Jewell (b)(6)@ios.doi.gov, Tommy Beaudreau <tommy_beaudreau@ios.doi.gov>, Nicole Buffa <nicole_buffa@ios.doi.gov>, Erin Walls <erin_walls@ios.doi.gov>, Katherine Rupp <katherine_rupp@ios.doi.gov>

Sally,

Attached are briefing materials for Tuesday, June 10, 2014. These have also been uploaded to Google Drive, and a binder is on your chair for when you come in tomorrow.

Additionally, materials for June 11th are uploaded in Google Drive.

Thank you,

Zaina

BRIEFING MEMORANDUM FOR THE SECRETARY

MEETING WITH AMERICAN PETROLEUM INSITUTE

INTERNAL PREP FOR MEETING WITH API

DATE: June 10, 2014
LOCATION: Office of the Secretary
TIME: 3:45PM – 4:15PM
FROM: Janice M. Schneider, AS/LM
Brandi Colander, Counselor to the AS/LM
Neil Kornze, Director, BLM
Brian Salerno, Director, BSEE
Walter Cruickshank, Acting Director, BOEM

MEETING WITH API

DATE: June 11, 2014
LOCATION: The Newseum, 555 Pennsylvania Avenue, NW
TIME: 1:45PM – 2:30PM
FROM: Janice M. Schneider, AS/LM
Brandi Colander, Counselor to the AS/LM
Neil Kornze, Director, BLM
Brian Salerno, Director, BSEE
Walter Cruickshank, Acting Director, BOEM

I. PURPOSE

You are scheduled to address the Executive Committee of the American Petroleum Institute (API). The Executive Committee consists of 12 of the oil and natural gas industry's top executives. Jack Gerard's invitation letter (Attachment 1) describes the meeting as an opportunity to exchange views on the economy, energy policy, and the role of the energy industry in creating jobs and ensuring energy security. Jack is the President and CEO of API.

II. PARTICIPANTS

Chairman:

- Mr. Stephen Chazen, President and Chief Executive Officer Occidental Petroleum Corporation

Members:

- Mr. Greg Garland, Chairman and Chief Executive Officer Phillips 66
- Mr. Gary Heminger, President and Chief Executive Officer Marathon Petroleum Corporation
- Mr. John B. Hess, Chairman and Chief Executive Officer Hess Corporation
- Mr. Ryan Lance, Chairman and Chief Executive Officer ConocoPhillips

- Mr. John Mingé, Chairman and President BP America, Inc.
- Mr. Jack Moore, Chairman, President and Chief Executive Officer Cameron Corporation
- Mr. J. Larry Nichols, Executive Chairman Devon Energy Corporation
- Mr. Marvin Odum, President and Director, Upstream Americas Shell Oil Company
- Mr. Rex Tillerson, Chairman and Chief Executive Officer Exxon Mobil Corporation
- Mr. Al Walker Chairman, President and Chief Executive Officer Anadarko Petroleum Corporation
- Mr. John Watson Chairman and Chief Executive Officer Chevron Corporation
- Ex-Officio: Mr. Jack Gerard President and Chief Executive Officer

API Staff

- Louis Finkel Executive Vice President American Petroleum Institute
- Khary Cauthen, Sen Director Fed Relations American Petroleum Institute
- Erik Milito, Group Director Upstream American Petroleum Institute
- Harry Ng, General Counsel American Petroleum Institute

III. AGENDA

You will be seated at the head of horseshoe-shaped table with the CEOs. Jack Gerard will introduce you. Your opening remarks will take approximately five minutes. The remainder of the meeting will consist of open discussion with members of the Executive Committee and questions and answers.

IV. KEY FACTS/HOT TOPICS

BLM

Hydraulic Fracturing

In May 2012, the BLM initiated formal rulemaking to revise its regulations on hydraulic fracturing on Federal and Indian lands with the publication of a proposed rule. The BLM published a revised proposed rule in May 2013. In addition to receiving comments during the formal comment period, the BLM conducted numerous consultations with tribes and outreach sessions with a range of stakeholders dating back to November 2010.

The BLM conducted the following outreach:

- Sent invitations to nearly 200 tribes;
- Travelled to meet with the tribes three times in January 2012 and four times in June 2013;
- Met with officials from New Town, ND and the National Congress of the American Indian Conference in July 2012;
- Met with tribes in Farmington, NM, and Dickinson, ND after the 2013 rule; and

- Met with tribes in Denver in March 2014 and, at the request of tribes, local BLM managers had follow-up meetings with individual tribes.

During the most recent formal comment period, which closed on August 23, 2013, the BLM received more than 1.35 million comments (in addition to the 177,000 comments received in 2012). The BLM anticipates issuing a final rule in fall 2014 after the Department completes its review of the package and sends it to the Office of Management and Budget.

The proposed rules have focused on addressing public disclosure, wellbore integrity, and flowback fluid management as the key issues underlying sound hydraulic fracturing development. The BLM's existing regulations, which are now 30 years old, do not adequately address these issues particularly in light of changing technology associated with horizontal well completions.

Industry has voiced concerns that the BLM does not have the capacity to regulate hydraulic fracturing and have increased costs from added tests such as the 2013 Revised Proposed Rule requirement for cement evaluation logs on surface casing even if an operator demonstrates sound cementing practices and pressure tests the surface casing and annulus-filled cement. Industry also expressed the following questions and concerns:

- The utility of requiring certain costly cement evaluation logs for well integrity as proposed in the rule, particularly at the surface, when other tests are available.
- The duplication of state regulations, resulting in inefficiency and possible delays.
- BLM staffing capacity to absorb the added workload.
- Compromising trade secrets associated with the disclosure of chemicals used in their respective hydraulic fracturing processes.
- The BLM has underestimated the costs of the rule.

The API provided 47 pages from two submissions describing concerns with the 2013 Supplemental Proposed Rule. The API raised numerous concerns, in addition to perceived added costs, delays while drilling, and permitting delays, including:

- There are no compelling reasons for the rule as there are no confirmed cases of contamination from hydraulic fracturing
- The FLPMA does not compel further regulation of Hydraulic Fracturing
- There is no regulatory void that needs to be filled by the BLM.
- The protection requirements for usable water are arbitrary, adding costs, and legally defective.
- Application of the rule to existing wells and leases may be a breach of contract, regulatory taking, and retroactive regulations.
- The rulemaking needs revisions to the requirements for cement evaluation logging and chemical disclosure.
- The API questions the criminal liability of an operator for a contractor.
- There should be flexibility in the use of lined pits.

- Remove the distinction in flowback and produced fluids.

After analysis of the comments, the BLM's approach to the final rule is to tighten the focus on wellbore integrity. The operators would post chemicals to FracFocus. The BLM strengthened the affidavit provisions to exempt public disclosure for trade secrets. The final rule will mandate the use of tanks for flowback fluid management unless operators meet specific criteria for use of lined pits. The BLM will work with the states to update the Memorandum of Understanding to streamline and take advantage of efficiencies where they meet or exceed the requirements in the final rule.

BLM's Oil and Gas Program

Oil and gas leasing is a market-driven activity. During calendar year 2013, the BLM held 30 lease sales. Nearly 1.1 million acres received bids, generating over \$202 million in revenue (shared with the states). During fiscal year (FY) 2013, industry produced more than 133 million barrels of oil and nearly 2.7 trillion cubic feet of natural gas on Federal onshore leases. (*Source: Office of Natural Resources Revenue*)

Industry interest in nominating Federal parcels for oil and gas development has increased since 2006. Between CY 2006 and CY 2013, industry expressions of interest increased from 7.5 million acres to 12.3 million acres. The BLM has deferred offering several areas because of planning activities related to Greater Sage-Grouse habitat conservation in Colorado, Montana, Nevada, Utah, and Wyoming.

The FY 2015 Budget proposes (i) a new fee schedule to fund inspection and enforcement, with collections offsetting a proposed reduction in appropriated funding; and (ii) a fee on new non-producing oil and gas leases to encourage diligent development on leased lands. The new fee to fund inspection and enforcement, if approved, would result in a \$10 million increase to the program and allow the BLM to focus additional resources on inspections and ensure completion of 100 percent of the high priority inspections. The \$6 per acre annual fee for non-producing leases is intended to promote timely production on new oil or gas leases and end once production occurs.

Oil and Gas Statistics

The Bureau of Land Management (BLM) continues to administer a robust and responsible oil and gas leasing program on public lands. Federal onshore oil production is the highest it has been in a decade and has risen for the fourth year in a row. Last year, the BLM offered 5.7 million acres for lease by industry -- the most in a decade -- and had 12.6 million acres actively producing oil and gas -- the most acres in six years.

- The BLM had approximately 23,500 producing oil and gas leases in FY2013, an increase of about 900 from FY2009.
- The BLM is approving Applications for Permit to Drill (APDs) more quickly. In FY2013, it took an average of 194 days to process an APD, down from 247 in 2009.

- At the end of FY 2013, the BLM had approved 5,816 APDs for public lands available for industry to drill, and approved another 895 APDs for Indian trust lands. Processing time for onshore drilling permits is the lowest it has been in eight years, and the BLM continues to invest in making the permitting process faster, less costly, and more transparent.

Master Leasing Plans and Other Leasing Reforms

Master Leasing Plans (MLP) involve pre-planning and intensive analysis of distinct geographical areas to avoid or minimize conflicts between oil and gas activity and recreation, water, air, cultural, and wildlife values. Areas with numerous competing resource values require additional planning and analysis prior to issuing new or additional oil and gas leases. The MLP process enables the BLM to take a focused, landscape-level look at the decisions in Resource Management Plans (RMP) pertaining to leasing and post-leasing development with an eye toward avoiding or minimizing conflicts and subsequent litigation.

The BLM is developing MLPs, as part of new RMPs and amendments to existing RMPs. A number of stakeholders, including many environmental groups, have expressed interest and requested that the BLM prepare additional MLPs. Industry believes that MLPs are an unnecessary step in the leasing process that results in delays.

The BLM's 2010 leasing reforms have increased consistency in lease stipulations provided for a more thorough lease parcel review process, including more time for pre-sale lease analysis. When the BLM initiated Leasing Reform in 2010, the current leasing system was near the breaking point. In 2009, the BLM received protests on nearly half of all lease parcels. In 2013, after the initiation of Leasing Reform, protests diminished to fewer than 20 percent. The BLM accomplished this by adding pre-lease NEPA analysis to build a more efficient process that better informs and involves the public while resolving protests more quickly. Included in this process was a more thorough on-the-ground analysis, which allows the BLM to identify which parcels the BLM should or should not lease and, if they do lease them, to determine what mitigation and other stipulations apply.

Venting and Flaring Rule for Onshore Federal and Indian Lands

The BLM's current policy on venting and flaring, covered by a Notice to Lessees known as NTL-4A, is over three decades old. The BLM is drafting a rule to update NTL-4A. While the BLM has made no final decisions, they are reviewing a wide range of areas in which fugitive emission reductions may be technically and economically possible.

Possible areas for effective emission reductions include: well completions (used to put a well into production); production tests; casing head and associated gas (from oil wells); liquids unloading; oil and condensate storage tanks and vessels; pneumatic devices; and leak detection and repair. The BLM is also considering the extent of its authority to charge royalties for vented, flared, or leaked gas. The BLM does not charge royalties for this gas under a variety of circumstances, including when gas is determined to be "unavoidably lost." In the last 30 years, however, industry has made significant progress in its technical ability to control leaks, venting and flaring. This significant progress may allow the BLM to adjust which circumstances where the gas is "avoidably lost" and thus royalty bearing. The BLM just completed four regional public outreach sessions in Denver (March 19), Albuquerque (May 7), Dickinson (May 9) and

Washington, D.C. (May 16). Each session had both a tribal and a public component. The BLM anticipates sending a proposed rule to OMB by the end of the calendar year.

API provided lengthy comments during the comment period, which closed on May 30. API stated that the BLM should adopt a sufficiently comprehensive view that recognizes and addresses permitting delays and other fundamental challenges currently preclude the installation of pipelines and infrastructure that could further reduce the need for venting and flaring. Further API stated the BLM has a statutory mandate to provide for the prevention of waste, conservation of oil and gas resources, and assurance of payment of the proper royalty share to the federal government, but not to regulate methane emissions or air quality.

Sage Grouse

The API said this in the Wall Street Journal (Opinion) March 11, 2014. "Interior's proposed "land use" amendments are draconian." They require a four-mile "buffer zone" whenever a sage-grouse mating ground is discovered on federal land. The American Petroleum Institute calls the proposed rules a "de facto ban on drilling." It fears that compliance could cost tens of millions of dollars in legal fees and cause years of drilling delays."

The BLM continues to offer lands for lease far in excess of industry demand. Last year, the BLM offered 5.7 million acres for lease by industry, the most in a decade. At the same time, industry submitted bids on fewer than one-in-five of these acres.

Bureau of Safety and Environmental Enforcement (BSEE)

Blowout Preventer (BOP)/Well Control Rule

BSEE is working on a proposed rule to address various recommendations involving well control and BOPs arising out of multiple investigations following the Macondo Well blowout and resulting oil spill (spill). The rule is of great interest to industry and they have requested the agency to expedite its release. Immediately following the spill, BSEE issued a series of Notices to Lessees and regulations that attempted to fill several obvious gaps in regulations involving well control. However, these changes did not address the key recommendations relating to the need to increase BOP reliability and performance and improve industry practices involving well control. The objective of this proposed rulemaking is to address these key recommendations, address significant gaps in existing requirements, and update BSEE regulations to reflect industry best practices.

This rule is the most important safety reform arising out of the spill and will address many of the key recommendations and findings made by the National Academy of Engineers, Deepwater Horizon Oil Spill Commission, and other groups. The rule is a high priority for the Department. BSEE has held meetings with stakeholder groups on this rule, including a BOP forum in 2012. The key concern for industry will be the effective date for each of the proposed requirements.

Shallow water operators were generally unable to reach consensus on standards for surface BOPs, so the BOP standard for shallow water BOPs is less robust than that of deepwater subsea BOPs. This is reflected in American Petroleum Institute Std. 53. The initial cost to industry of complying with the new requirements will be approximately \$164 million in the first year and

\$77 million each year thereafter. However, an annual savings of \$154 million due to reduced testing frequency for workover operations and a reduced likelihood of oil spills will offset this cost.

The proposed regulation has undergone extensive review within BSEE during the development stage, including a complete revision of the economic analysis to address internal modifications. The proposed rule is currently under review in the Solicitor's Office.

Arctic Rule

BSEE and BOEM are working on a proposed rule that would apply specifically to exploratory drilling in the Arctic. This rulemaking will address the unique operational challenges associated with Arctic operations. The Arctic Outer Continental Shelf (OCS) Standards will codify and further develop the Arctic-specific standards established for Shell's 2012 exploration program, and are intended to strengthen safety and environmental protection for Arctic OCS exploratory operations.

The rule will ensure that operators in the Arctic:

- (1) design and conduct exploration programs in a manner suitable for Arctic conditions;
- (2) develop an integrated operations plan that addresses all phases of the exploration program;
- (3) have access to, and can promptly deploy, source control and containment equipment;
- (4) have access to a separate relief rig to be able to timely drill a relief well in the event of a loss of well control;
- (5) are capable of predicting, tracking, reporting, and responding to ice conditions and adverse weather events;
- (6) effectively manage and oversee contractors; and
- (7) develop and are prepared to implement effective oil spill response plans tailored to the Arctic conditions.

We expect the rule to enter interagency review this summer.

California Offshore Fracking

Environmental advocacy groups, including the Center for Biological Diversity and the Environmental Defense Center of Santa Barbara, CA, have expressed concern over possible environmental impacts associated with the use of hydraulic fracturing and acidization in the offshore environment. Their concerns include discharge of flow-back water into the ocean or an accidental spill, fluid leakage from loss of well integrity, leakage through faults, induced seismicity from hydraulic fracturing or fluid re-injection, and drinking water contamination. Additionally, the California Coastal Commission, which has an approved Coastal Management Plan pursuant to the Coastal Zone Management Act, has recently expressed an interest in hydraulic fracturing and acid stimulation techniques occurring in waters off the California coast.

Operators in the Pacific OCS have used hydraulic fracturing only on rare occasions. There have been over 1400 oil and gas wells drilled on the Pacific OCS and to date only about a dozen of those wells have been hydraulically fractured. One operator on the Pacific OCS has been approved to hydraulically fracture three wells in the coming months. In contrast, almost every

well drilled on the Pacific OCS undergoes acidization, another form of stimulation. Well acidization is achieved by pumping acid into the well to dissolve limestone, dolomite, and calcite cement between the sediment grains of the reservoir rocks. After acidization, the used acid and sediments removed from the reservoir are washed out of the well in a process called backflush.

Permitting

The focus on "permitting" in recent years has mainly been on drilling permits. BSEE's district offices are responsible for approving the Applications for Permit to Drill (APDs) for drilling operations. BSEE has made consistent improvements in the predictability and consistency of its permitting processes. In 2013, BSEE oversaw a 48% increase in the number of deepwater floating rigs and approved 394 well permits. In contrast, the agency approved 341 well permits in 2009. BSEE has achieved these improvements while putting in place additional drilling safety standards. Permit applications must meet standards for well-design, casing, cementing, containment and be independently certified by a professional engineer. In order to implement these improvements, BSEE has increased the district permitting staff by over 25 percent since 2010.

Well permits are approved through eWell, which is a web-based, electronic permitting system. The agency has used eWell successfully in the Gulf of Mexico for about ten years. BSEE is planning to further improve its permitting process by developing an ePermit system, an electronic process that will eventually take the place of the current paper-based approach used for non-eWell permits. The ePermit system will encompass all BSEE permitting activities, including pipeline, platform, commingling, measurement, production safety systems, flaring, suspensions, etc.

U.S./Mexico Transboundary Agreement

The U.S. and the United Mexican States signed the "*Agreement between the United States of America and the United Mexican States Concerning Transboundary Hydrocarbon Reservoirs in the Gulf of Mexico*" on February 20, 2012. Congress ratified it in the Bipartisan Budget Act of 2013, which the President signed on December 26, 2013. The Agreement is expected to be put into force in mid-July 2014. The Agreement establishes a legal framework for the exploitation of transboundary hydrocarbon reservoirs that may exist along the maritime boundary between the U.S. and Mexico in the Gulf of Mexico through cooperative arrangements, primarily BSEE-approved unitization agreements involving U.S. lessees and the Mexican national oil company, Petróleos Mexicanos (Pemex).

The Agreement requires establishment of a "Joint Commission" to assist the Executive Agencies in administering the Agreement. On June 3rd, Secretary Jewell signed a Secretarial Order to implement the Agreement. During the week of June 9, a team of BSEE and BOEM employees will meet with our Mexican counterparts in Mexico to discuss processes and procedures for implementation of the Agreement

Bureau of Ocean Energy Management

Current Year Program

The current (2012 – 2017) BOEM Five-Year Program (Program) makes areas in the Gulf of Mexico and Alaska with more than 75% of the total undiscovered technically recoverable OCS oil and gas resources available for potential leasing. Under the current Five Year Program, BOEM has two lease sales proposed for the Arctic OCS: the Chukchi Sea in 2016 and Beaufort Sea in 2017.

The Program did not include the Atlantic or large portions of the Eastern Gulf of Mexico as promoted by API. A portion of the Central Gulf of Mexico Planning Area (CPA) and most of the Eastern Gulf of Mexico Planning Area (EPA) is under restriction until 2022 as part of the Gulf of Mexico Energy Security Act of 2006. The area restricted is that portion of the EPA within 125 miles of Florida, all areas in the Gulf of Mexico east of the Military Mission Line (86° 41' west longitude), and the area within the CPA that is within 100 miles of Florida.

Next Five Year Program

The Department is beginning the 2.5 to 3 year process of developing the next (2017 – 2022) Program. The week, BOEM will release a Request for Information (RFI), the first public step in the planning process. Outer Continental Shelf Lands Act requires the RFI to solicit public input on the areas that should or should not be included in the next Program. The RFI will include all 26 planning areas. The Secretary makes the decision regarding which areas to include or exclude from the Five Year Program following additional opportunities for public input. API is advocating that the next Program include the Atlantic and Pacific OCS, and more/all of the Eastern Gulf of Mexico.

Atlantic Programmatic EIS for Geological and Geophysical Activities

On February 27, 2014, BOEM released the final Programmatic EIS for Proposed Geological and Geophysical (G&G) Activities in the Mid- and South Atlantic Planning Areas (PEIS). The PEIS outlines the environmental impacts of G&G survey activities for three BOEM program areas (oil and gas, renewable energy, and marine minerals) and identifies mitigation and monitoring measures to avoid, reduce, or minimize impacts to the marine environment. Additionally, the PEIS establishes a framework for future site-specific evaluations of proposed G&G activities (such as seismic testing) under NEPA and several other environmental requirements. The agency expects to sign the Record of Decision in the near future.

Chukchi Lease Sale 193 Litigation

On January 22, 2014, the Court of Appeals for the Ninth Circuit ruled that the Department's NEPA review for Lease Sale 193 in the Chukchi Sea off the coast of Alaska was insufficient. The decision stems from a lawsuit filed by Earthjustice on behalf of a coalition of 15 Alaska Native and conservation groups. The Chukchi Sea lease sale, Sale 193, was originally held in 2008, and offered nearly 30 million acres for oil drilling—an area larger than the size of Pennsylvania. Prior to the lease sale, there were no active oil leases in the Chukchi Sea. The Department is supplementing its NEPA analysis for the lease sale and must reconsider its lease sale decision. BOEM will have the lead for the Supplemental Environmental Impact Statement. DOI issued directed suspensions to leaseholders in the Chukchi Sea effective January 22, 2014, and lasting until the court decision has been addressed. The SEIS will proceed expeditiously. Per the schedule filed with the federal district court for the District of Alaska, a draft SEIS is

expected in early October 2014, a final SEIS in February 2015, and a Record of Decision by March 2015.

Offshore Regulatory Issues in Frontier Areas:

Throughout 2013, DOI met with a number of oil and gas operators (both majors and independents) to discuss opportunities to modernize the offshore regulatory regime. The goal is to better align the regulations with the strategic and technical realities related to exploration and development in frontier areas, including emerging deepwater subsalt plays in the Gulf of Mexico. Many of the regulations governing OCS oil and gas operations were adopted when the majority of industry operations occurred in the shallow water GOM shelf. With the advent of highly-defined seismic programs and technical developments, including increased capacity for directional drilling, the offshore industry has moved further from the shelf into deeper waters and subsalt reservoirs that involve difficult drilling at extremely high pressures and temperatures. Some aspects of the current regulations do not recognize the difficulties or longer time frames associated with developing such areas. BOEM and BSEE are currently considering next steps.

V. TALKING POINTS

Talking Points from AS/LM are attached separately.

VI. ATTACHMENTS

- Executive Committee Biographies (*below*)
- Talking Points (*attached separately*)

Stephen Chazen**President and CEO - Occidental**

Mr. Stephen I. Chazen, also known as Steve, has been the Chief Executive Officer of Occidental Petroleum Corporation since May 5, 2011 and its President since December 2007. Mr. Chazen served as the Chief Operating Officer of Occidental Petroleum Corporation since August 2010. He served as the Chief Financial Officer of Occidental Petroleum Corporation since 1999. Mr. Chazen served as Senior Executive Vice President of Occidental Petroleum Corp. from August 9, 2004 to December 2007, Executive Vice President of Corporate Development from May 1994 to August 9, 2004 and also served as its Head of Corporate Development. From 1982 to 1994, Mr. Chazen served as an Investment Banker at Merrill Lynch. He served in a number of roles, including managing director and head of corporate finance, managing director of mergers and acquisitions, and managing director in the natural resources group at Merrill Lynch. Mr. Chazen has been a Director of Lyondell Chemical Company since August 22, 2002. He has been an Independent Director of Ecolab Inc., since May 2013. He has been Director of Occidental Petroleum Corporation since May 2010. He has been a Director of American Petroleum Institute Inc. since January 2011. He serves as a Director of Port Arthur Finance Corp. He serves as a Director of Sabine River Holding Corp., the General partner of Port Arthur Coker Company L.P. He served as a Director of WMI Holdings Corp. from March 2008 to March 1, 2009. He served as a Director of Premcor Inc. since April 1999. He served as a Director of the predecessor of Premcor Inc. from 1995 to April 1999. He serves on the Governance Committees of Equistar Chemicals, LP and OxyVinyls L.P. He holds a Ph.D. in geology from Michigan State University, a master's degree in finance from the University of Houston and a bachelor's degree in geology from Rutgers College.

Greg Garland**Chairman and CEO – Phillips 66**

Mr. Greg C. Garland has been the Chairman and Chief Executive Officer at Phillips 66 Partners GP LLC, the general Partner of Phillips 66 Partners LP since March 2013. Mr. Garland has been the Chairman of the Board and Chief Executive Officer of Phillips 66 since April 30, 2012. He serves as a Vice President at American Fuel & Petrochemical Manufacturers. He served as President of Phillips 66 from April 30, 2012 to May 30, 2014. He served as a Senior Vice President of Exploration & Production-Americas at ConocoPhillips from October 6, 2010 to April 2012. He served as Chief Executive Officer and President of Chevron Phillips Chemical Co. LLC from April 1, 2008 to February 8, 2011. He served the Chief Executive Officer and President of Americas Styrenics LLC. His extensive experience in the energy industry, including his more than 30-year career with Phillips Petroleum Company from 1980 to 2000, CPChem and ConocoPhillips. Mr. Garland served as Senior Vice President of Planning & Specialty Products at Chevron Phillips Chemical Company LLC from October 2001 to April 2008. From July 2000 to October 2001, he served as a Senior Vice President of Planning & Strategic Transactions of Chevron Phillips Chemical Company LLC. He served as a General Manager of Qatar/Middle East for Phillips, since 1997. He has been a Director of Phillips 66 since April 30, 2012 and Amgen Inc. since October 16, 2013. He serves as a Director of DCP Midstream LLC and

Phillips 66 Partners GP LLC. He serves as a Director of DCP Midstream LLC at DCP Midstream Partners LP. He is a Member of the Chemical Engineering Industrial Advisory Board for Texas A&M University and serves on the board of Junior Achievement of Southeast Texas. He serves as a Director of American Chemistry Council, Inc. Mr. Garland holds a Bachelor of Science in Chemical Engineering from Texas A&M University in 1980.

Gary Heminger

President and CEO - Marathon Petroleum

Mr. Gary R. Heminger has been the President and Chief Executive Officer of Marathon Petroleum Corporation since June 30, 2011. Mr. Heminger has been the Chairman and Chief Executive Officer at MPLX GP LLC, General Partner of MPLX LP since June 2012. He served as Executive Vice President of Downstream at Marathon Petroleum Company LP, a wholly owned subsidiary of Marathon Oil Corporation since July 2005. He served as an Executive Vice President of Downstream at Marathon Oil Corporation from July 2005 to June 30, 2011 and its Executive Vice President since January 2005. He served as the President of Marathon Petroleum Company LP since September 2001, Executive Vice President of Supply, Transportation and Marketing since January 2001, Senior Vice President of Business Development since 1999 and Vice President of Business Development since January 1998. Mr. Heminger served as Executive Vice President of Downstream at Marathon Oil Company. He joined Marathon Oil Company in 1975. He served as President of Marathon Ashland Petroleum LLC since September 2001. He also served as President of Refining, Marketing & Transportation Operations of Marathon Petroleum Company LP. He served for 37 years at Marathon serving in a variety of groups and functions. In addition to five years in various financial and administrative roles, he served for three years in London, England as an Audit Supervisor of the Brae Project. He served as the Vice President of Western Division of Emro Marketing (predecessor of Speedway SuperAmerica LLC) since 1991 and served in several marketing and commercial roles, for eight years. From 1995 to 1996, Mr. Heminger served as the President of Marathon Pipe Line Company and also served as Manager of Business Development & Joint Interest of Marathon Oil Company since November 1996. He has been a Director of Fifth Third Bank since December 20, 2006 and Marathon Petroleum Corporation since 2011. He serves as a Director of American Chemistry Council Inc. and of JobsOhio. He has been a Director at Fifth Third BanCorp since December 20, 2006. He served as Director of Northern Tier Energy LP until July 2012. He is the Chairman of the Board of Trustees at Tiffin University. He was Chairman of Louisiana Offshore Oil Port. He was a Member of the Oxford Institute for Energy Studies. He was Chairman of the American Petroleum Institute (API) Downstream Committee. He serves on the Executive Committee in the U.S.-Saudi Arabian Business Council. He holds an MBA from the University of Dayton in 1982. Mr. Heminger graduated from Executive Management Program from the University of Pennsylvania - The Wharton School. He has a Bachelors Degree in Accounting from Tiffin University in 1976.

John B. Hess

Chairman and CEO – Hess Corporation

Mr. John B. Hess has been the Chief Executive Officer at Hess Corporation (formerly Amerada Hess Corp) since 1983. Mr. Hess has been with Hess Corporation for 28 years and has strong background in the global oil and gas industry. Mr. Hess provides significant value to the oversight and development of Kohlberg Kravis Roberts business and served leadership roles at a

global energy business. He served as the Chairman of Hess Corporation from 1995 to May 16, 2013. He serves as Vice Chairman of Lincoln Center for the Performing Arts, Inc. and has been its Director since 2007. He serves as a Trustee of Center for Strategic and International Studies, Inc. He has been a Director of Hess Corporation since 1978. He has been a Director of the Trilateral Commission since 2009. He has been a Director at Deerfield Academy since 2004. Mr. Hess has been a Director of Kohlberg Kravis Roberts & Co. since July 28, 2011 and of KKR Management LLC since July 28, 2011. Mr. Hess has been a Director of National Advisory Board of J.P. Morgan Chase & Co. since 1991. He has been a Member of Board of Trustees at Wildlife Conservation Society/NY Zoo since 1991, United Cerebral Palsy Research and Educational Foundation. He has been a Member of The Business Council of The Council of Foreign Relations since 2003 and Dean's Advisors of Harvard Business School since 2001. He served as a Director of NYC2012, Inc. He served as a Director of The Dow Chemical Company since October 12, 2006 until May 9, 2013. Mr. Hess served as a Member of the Secretary of Energy Advisory Board from 1999 to 2002. He is a member of the National Petroleum Council at the U.S. Department of Energy. He earned a B.A. from Harvard College in 1975 and an M.B.A. from Harvard Business School in 1977.

Ryan Lances

Chairman and CEO - ConocoPhillips

Mr. Ryan M. Lance has been the Chairman of the Board and Chief Executive Officer at ConocoPhillips since May 2012. Mr. Lance has 28 years of oil and natural gas industry experience in senior management and technical positions with ConocoPhillips, predecessor Phillips Petroleum and various divisions of ARCO Alaska, Inc. He served as Senior Vice President of Exploration & Production - International of ConocoPhillips and ConocoPhillips (U.K.) Limited since May 2009. Mr. Lance served as President of Exploration & Production, Asia Africa, Middle East and Russia/Caspian of ConocoPhillips and also served as its Senior Vice President of Technology since 2007. He served as Senior Vice President of Technology and Major Projects at Conocophillips from April 1, 2006 to February 1, 2007 and President of Asia Pacific Exploration and Production from May 8, 2003 to June 2005. He served as President Exploration & Production, Europe Asia Africa and the Middle East of ConocoPhillips. He served as President of downstream strategy, integration and specialty functions at ConocoPhillips since 2005 and as Vice President of Lower 48 since 2002. He served as President of Strategy Integration and Specialty Businesses - Refining Marketing Supply & Transportation of ConocoPhillips from June 2005 to April 1, 2006. Mr. Lance began his career with ARCO Alaska in 1984. He held various management, engineering and operations positions internationally as well as in Alaska and the U.S. Lower 48 before transferring in 1989 to ARCO's Bakersfield, Calif. operations. In 1992, he transferred to Midland, Texas, where he supervised ARCO's coalbed methane operations in the San Juan Basin. He returned to Alaska in 1994 as Exploration Engineering Manager. In 1996, he transferred to Vastar Resources in Houston as Planning Manager and served in that position until 1998. He served as Vice President of the Western North Slope for ARCO Alaska, Inc. since 1998. Mr. Lance returned to Houston in 2001 as the General Manager of Lower 48 and Canadian operations for Phillips Petroleum. He spent 17 years with ARCO. He has been a Director of ConocoPhillips since May 9, 2012. He serves as a Director for Spindletop International as well as on the Montana Tech Foundation's board. He serves on the University of Houston's Energy Advisory Board. He serves on the Boards of both

the American Petroleum Institute and the Independent Petroleum Association of America. He is an Advisory board Member of Montana Tech and a Member of the Society of Petroleum Engineers. He is a Petroleum Engineer. Mr. Lance earned a Bachelor of Science in Petroleum Engineering from Montana Tech in Butte in 1984.

John Minge

Chairman and President - BP America

Mr. John Minge has been the Chairman, Chief Executive Officer and President of BP America, Inc. at Bp Alaska since February 15, 2013. Mr. Minge served as the President of BP Exploration (Alaska), Inc. He served as the Head of Business at Bp Alaska from January 1, 2009 to February 15, 2013 also served as its Regional President. He served as the President of BP Indonesia. He began his BP career 25 years ago as a drilling engineer in the Gulf of Mexico. He served as President of Exploration and Production for Vietnam and China. Mr. Minge has been a Director of Bp America Inc. since February 15, 2013.

Jack Moore

Chairman, President and CEO – Cameron Corporation

Mr. Jack B. Moore has been the Chief Executive Officer of Cameron International Corporation (Formerly Cooper Cameron Corporation) since April 1, 2008, and has been its Chairman of the Board since May 3, 2011. Mr. Moore has been the President of Cameron International Corporation since January 01, 2007. He served as Chief Operating Officer of Cameron International Corporation since January 1, 2007. He served as President of Drilling & Production Systems Group of Cameron International Corporation from July 2002 to December 2006. He served as Senior Vice President at Cameron International Corporation from October 1, 2005 to January 1, 2007 and its Vice President since May 15, 2003. He joined Cameron in July 1999 as Vice President and General Manager of Western Hemisphere. He served at Baker Hughes Incorporated for 23 years, where he served in a variety of marketing, manufacturing and human resources positions. He has been a Director at Cameron International Corporation since November 2007 and KBR, Inc., since January 1, 2011. He serves as Member of Executive Advisory Board at C.T. Bauer College of Business. Mr. Moore served as Director of Maverick Tube Corporation and also served as its Member of Advisory Board. He serves on the boards of directors of the American Petroleum Institute (API), the National Ocean Industries Association (NOIA). He serves as a Director of Petroleum Equipment Suppliers Association (PESA) as well as the Boards of several charitable and educational institutions. He serves in positions of leadership for the Greater Houston Partnership, Spindletop Charities and of Memorial Drive United Methodist Church. Mr. Moore holds a BBA degree in finance and marketing from the University of Houston and a graduate of the Advanced Management Program at Harvard Business School.

J. Larry Nichols

Executive Chairman – Devon Energy

Mr. J. Larry Nichols serves as President of Devon Energy Production Company LP. Mr. Nichols served as the President of Sonic Corp. He Co-Founded Devon Energy Corporation in 1971 and serves as its Chairman .from 2000 to June 2010, President from 1976 to 2003 and Chief Executive Officer since 1980. He served as law clerk to Mr. Chief Justice Earl Warren and Mr. Justice Tom Clark of the USA Supreme Court. He serves as the Executive Chairman of Devon

Energy Corporation. He served as the the Chairman of the Board of American Petroleum Institute Inc. from January 2008 to December 2010. He has been a Director of Devon Energy Corporation since 1971. He has been a Director at Baker Hughes Incorporated since 2001 and has been its Lead Director since April 30, 2013. Mr. Nichols has been a Director of Sonic Corp. since January 31, 2007. He also serves on the Board of Governors of the American Stock Exchange. He served as a Director of American Petroleum Institute Inc. He served as a Director of BOK Financial Corp. since 1997. He served as a Director of Smedvig ASA since 1996. He serves as a Director of the Domestic Petroleum Council, the National Association of Manufacturers, the Independent Petroleum Association of America, the Natural Gas Supply Association, the Independent Petroleum Association of New Mexico, the Oklahoma Independent Petroleum Association and the National Petroleum Council. Mr. Nichols serves as a Director of several trade associations that are relevant to the conduct of Devon's business. He served as Director of CMI Terex Corporation. Mr. Nichols holds a Bachelor of Arts/Bachelor of Science degree in Geology from Princeton University and a Law Degree from the University of Michigan.

Marvin Odum

President and Director, Upstream Americas, Shell Oil

Marvin E. Odum became Director of the Upstream Americas business in 2009. He continues as President of Shell Oil Company (SOC). Marvin earned a bachelor's degree in mechanical engineering from The University of Texas at Austin and a master's degree in business administration from the University of Houston. He began his Shell career as an engineer in 1982, and has since served in a number of management positions of increasing responsibility in both technical and commercial aspects of energy. Prior to his most recent appointment and in addition to his role as SOC President, he was Executive Vice President for the Americas for Shell Exploration & Production. He was named SOC President in 2008 and had served as Executive Vice President since 2005, with responsibility for Shell exploration and production businesses in the western hemisphere. Marvin is a member of the Council on Foreign Relations and holds positions of board leadership and participation in the Business Roundtable and the American Petroleum Institute. He is on the executive committee of the World Business Council for Sustainable Development. In addition, he is a member of the Dean's Council of the John F. Kennedy School of Government at Harvard University and the Advisory Board of the Cockrell School of Engineering at The University of Texas at Austin. He is also involved with several charities in the Houston area.

Rex Tillerson

Chairman and Chief Executive Officer – Exxon Mobil

Mr. Rex W. Tillerson has been Chief Executive Officer and President at Exxon Mobil Corporation since January 1, 2006 and March 1, 2004 respectively. Mr. Tillerson has been the Chairman and Chief Executive Officer of ExxonMobil Chemical Company since January 2006. He serves as Chairman and Chief Executive Officer of Exxonmobil Australia Pty. Ltd. He served as Senior Vice President of Exxon Mobil Corp. since August 2001. He served as Exxon Company, U.S.A.'s Production Engineer since 1975. Mr. Tillerson held several engineering, technical and supervisory assignments in the EUSA Production Department throughout Texas, and in 1987, was named Business Development Manager of the EUSA Natural Gas Department, where his responsibilities included developing long-range plans for commercialization of Alaska

and Canadian Beaufort Sea gas. Since 1989, he served as General Manager of EUSA's Central Production Division and was responsible for its oil and gas production operations throughout a large portion of Texas, Oklahoma, Arkansas and Kansas. Mr. Tillerson served as the Production Adviser of Exxon Corporation since 1992 and Coordinator of Affiliate Gas Sales of Exxon Co., International. Three years later, he was named President of Exxon Yemen Inc. and Esso Exploration and Production Khorat Inc. and in January 1998, he became Vice President of Exxon Ventures (CIS) Inc. and President of Exxon Neftegas Limited, where he was responsible for Exxon Mobil Corp.'s holdings in Russia and the Caspian Sea as well as the Sakhalin I Consortium operations offshore Sakhalin Island, Russia. Since December 1999, he served as Executive Vice President of ExxonMobil Development Company. Mr. Tillerson has been the Chairman of Exxon Mobil Corporation since January 1, 2006 and has been its Director since March 1, 2004. He served as the Chairman of American Petroleum Institute Inc. He serves as Vice Chairman of The Business Council. He has been a Director of ExxonMobil Chemical Company since March 2004. He serves as a Trustee of Center for Strategic and International Studies. Mr. Tillerson served as a Member of the Board of Directors of the American Petroleum Institute Inc., the U.S.-Russia Business Council, the United Negro College Fund, a Member of the Executive Board of the Boy Scouts of America, and a Member of the Engineering Foundation Advisory Council for the University of Texas at Austin and the Society of Petroleum Engineers. He is a member of the National Petroleum Council, the Business Roundtable and its Energy Task Force, an honorary trustee of the Business Council for International Understanding, and a member of the Emergency Committee for American Trade. Mr. Tillerson received a Bachelor of Science in Civil Engineering from the University of Texas at Austin.

Al Walker

Chairman, President and CEO – Anadarko Petroleum

Mr. R. A. Walker, also known as Al, has been the Chairman at Anadarko Petroleum Corporation since May 14, 2013 and as its Chief Executive Officer since May 15, 2012 and President since February 2010. Mr. Walker served as the Chief Operating Officer of Anadarko Petroleum Corp. from March 1, 2009 to May 15, 2012. He served as the Managing Director for the Global Energy Group of UBS Investment Bank from 2003 to 2005, where he was responsible for UBS's upstream energy practice. He joined Anadarko Petroleum Corp. on September 6, 2005 as Senior Vice President of Finance and Chief Financial Officer and served until March 2009. He worked at Seagull Energy Corp. and Enx Resources Corp. He served as the President and Chief Financial Officer of 3TEC Energy Corporation until its merger with Plains Exploration and Production Company in 2003. From 1987 to 2000, he worked for Prudential Financial in a variety of merchant banking positions as Senior Managing Director and Co-head of Prudential Capital Group. Mr. Walker has experience in both the banking and energy sectors. He served as the Chairman of Western Gas Holdings, LLC from August 2007 to October 2009. He has been a Director of CenterPoint Energy, Inc. since April 22, 2010 and Centerpoint Energy Resources Corp. since April 2010. He has been a Director of Maxus Energy Corporation since 1994. Mr. Walker serves as a Director of TIN Inc., Ocean Energy Inc., and the Houston Producers Forum. He has been a Director of Anadarko Petroleum Corporation since May 2012. He serves as Director of BOK Financial Corporation. He serves on the Board of Trustees for the United Way of Greater Houston and the Houston Museum of Natural Science. He served as a Director of Western Gas Equity Holdings, LLC from September 2012 to March 2013. He served as a Director of Temple-Inland Inc. since November 2008 February 2012. He served as a

Director of Western Gas Holdings, LLC from August 2008 to March 12, 2013. He served as Director of Global Natural Resources. He served as a Director of Texas Eastern Products Pipeline Company LLC since July 2002. He served as a Director of 3TEC Energy Corporation since 2000. Mr. Walker has a Bachelor of Science in 1979 and a Masters of Business Administration in 1984 from the University of Tulsa.

John Watson

Chairman and CEO – Chevron

Mr. John S. Watson has been the Chairman of the Board and Chief Executive Officer of Chevron Corporation since January 1, 2010. Mr. Watson serves as the Chairman of the Board and Chief Executive Officer at Chevron Global Energy Inc. He served as an Executive Vice President of Strategy & Development of Chevron Corp. from January 1, 2008 to April 1, 2009 and its Chief Financial Officer from 2000 to January 1, 2005. He served as President of Chevrontexaco Overseas Petroleum Inc. since January 1, 2005 and also served as President of Chevron Canada Limited, a subsidiary of Chevron Corp. since January 1996. Mr. Watson served as President of Chevron International Exploration and Production of Chevron Corp. from 2005 to 2007 and was responsible for managing Chevron's exploration and production activities outside North America. He served as Corporate Vice President, Strategic Planning at Chevron Corp. He joined Chevron Corp. in 1980 as a Financial Analyst, going on to hold various financial and analytical positions in Chevron and Chevron U.S.A. Inc. He held supervisory positions in the comptroller's financial and profit analysis groups. He served as Manager of investor relations of Chevron since 1990. Mr. Watson served as Vice President of Finance and Chief Financial Officer of ChevronTexaco Corporation from 2000 to January 1, 2005 and also served as ChevronTexaco merger integration executive. Since 1993, Mr. Watson served as Manager of credit card enterprises of Chevron U.S.A. (CUSA) Products Co. where he oversaw its credit card operations. Since 1995, he served as General Manager of strategic planning and quality of CUSA, where he was responsible for developing business plans and strategies, conducting business evaluations and reviewing investment proposals for it. He served as Vice President of Chevron Corp. at Chevron Energy Solutions L.P. since 2005 and also served as its Vice President of finance from 2000 to January 1, 2005. He served as the Chairman and Director of American Petroleum Institute Inc. from January 2011 to December 2012. Mr. Watson served as Vice Chairman of Chevron Corp. since April 1, 2009. He serves as Director of Padres L.P., Animal Rescue Foundation and Chevron Capital USA Inc. Mr. Watson served as a Director of Dynegy Inc. from 2001 to March 2004. He served as Director of Caltex Petroleum Corp. He earned a Bachelor's degree in Agricultural Economics from the University of California at Davis in 1978 and a Master's degree in Business Administration from the University of Chicago in 1980.

Jack Gerard

President and CEO – API

Mr. Jack N. Gerard has been Chief Executive Officer and President at American Petroleum Institute since November 1, 2008. Mr. Gerard served as President and Chief Executive Officer of American Chemistry Council, Inc., since February 2007 until September 2008. As President and Chief Executive Officer of ACC, Mr. Gerard was leading new efforts to redefine the chemistry industry and to strengthen its role in advocating public policy. Prior to joining ACC in July 2005, Mr. Gerard was President and Chief Executive Officer of the National Mining Association, where he streamlined operations, developed core competencies, merged two distinct cultures,

modernized the association's communications capabilities and built a national grassroots organization. In addition, he relocated the Association, expanded membership in an era of consolidation, significantly increased member political activity and changed the dues structure. He also co-chaired the BIPAC "Prosperity Fund," raising funds to mobilize the business vote. Earlier in his career, Mr. Gerard was a Founding Partner, Chairman and Chief Executive Officer of McClure, Gerard & Neuenschwander, Inc., a Washington, D.C.-based government relations consulting firm. He and founding partner, former U.S. Senator James McClure, focused on issues, including international sports, telecommunications, energy and mining. Prior to this, he spent close to a decade working in the US Senate and US House of Representatives. He is President of the National Capital Area Council - Boy Scouts of America and serves on the George Washington University Graduate School of Political Management's Council on American Politics. Mr. Gerard holds Bachelor of Arts in Political Science from George Washington University and Juris Doctor from George Washington University.

Erin -

Please forward this to Bland.

Bland -

The documents attached to this message have a word doc and a pdf. I can open the pdf with no troubles, but not the word doc. I have 1. downloaded the full message, and 2. tried to open it by uploading to "docs to go".

Neither will work (which are the things we did before that did work). I am sure I can get the doc on my laptop when I'm back in the office, but I thought I'd forward this so you can sleuth a bit more on the ongoing mystery of why some files will open and others not.

Thanks,

Sally

Conserving Greater Sage Grouse.final.pdf

1977K

CONSERVING GREATER SAGE-GROUSE: A SPORTSMEN'S PRIORITY

June 5, 2014

As many western states grapple with the need to protect Greater sage-grouse, Wyoming is showing that strong and proactive policies can protect the species while at the same time stabilizing the state's economy. Those policies are providing needed certainty to the oil and gas industry, while conserving much of the core habitat that is essential for the long-term survival of the species. And because many big game species, including mule deer, elk and pronghorn, also benefit from conserving sage-grouse habitat, Wyoming is enhancing hunting opportunities that will boost the state's robust outdoor recreation industry.

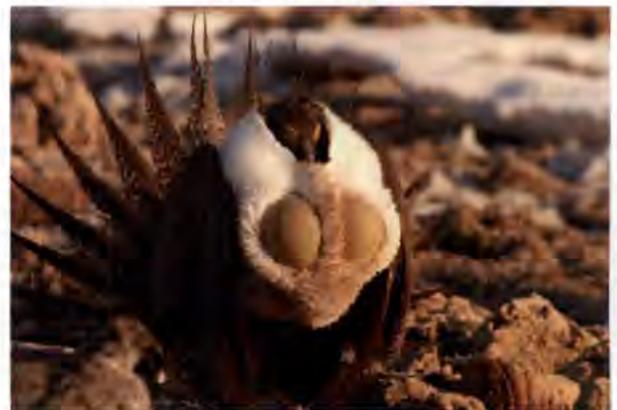

It is critical that other states follow Wyoming's example, and in cooperation with their federal partners and other key stakeholders, develop strong and proactive policies to conserve Greater sage-grouse. Although the clock is ticking—the U.S Fish & Wildlife Service (the Service) will determine whether sage-grouse should be listed under the Endangered Species Act (ESA) in 2015—there is still time for those states to act.

“Something is wrong. The birds are declining. We need to figure it out and stop the slide.”
- Andrew McKean, editor, Outdoor Life Magazine

Co-Existence Between the Greater Sage-Grouse and Oil and Gas Development Is Vital

Greater sage-grouse once ranged across seventeen states in the western United States, but due primarily to habitat loss and degradation,ⁱ their population has dropped by as much as 80 percent.ⁱⁱ In 2010, the Service determined that the species “warranted” a listing under the ESA, but doing so was “precluded” by higher priorities. That decision prompted a lawsuit, which the agency settled and committed to making a final listing decision by the end of September 2015.ⁱⁱⁱ

A variety of factors are responsible for the loss and degradation of sage-grouse habitat, including energy development, agriculture, wildfires and the spread of invasive species.^{iv} Oil and gas development is especially widespread, as within the sagebrush ecosystem lie the five geologic basins that contain most onshore oil and gas reserves in the Intermountain West.^v Those basins also contain some of the largest and most ecologically intact sagebrush habitats and highest densities of sage-grouse in North America.^{vi} Oil and gas development can impact sage-grouse in a variety of ways, but primarily through the fragmentation of their habitat.^{vii} The scale of this development is extensive; according to the BLM and U.S. Geological Service, oil and gas development has “influenced” nearly 78 percent of priority habitat for sage-grouse throughout Colorado, Utah and Wyoming.^{viii}

Numerous studies have concluded that the impacts of this widespread development on sage-grouse have been significant.^{ix} In Wyoming's Powder River Basin, for example, which has been drilled intensively for coal-bed methane, sage-grouse populations have declined by 79 percent.^x And in the bird's eastern range, which includes Wyoming, the number of producing wells has tripled over the past thirty years—from 11,231 in the 1980s to 33,280 in 2007.^{xi} Without new policies to guide oil and gas development (and other uses) throughout sage-grouse's entire range, the Service predicts that oil and gas development will reduce sage-grouse populations even further—by as much as 19 percent.^{xii}

The Wyoming Strategy: Proactively Managing for Sage-Grouse Conservation and Oil and Gas Development

Wyoming is home to 40 percent of the world's sage-grouse population.^{xiii} For that reason, and because of continued conflict with energy development and other economically important industries, then Wyoming Governor Dave Freudenthal launched an unprecedented effort in 2007 to develop stronger policies for sage-grouse—policies that would sustain and grow Wyoming's economy, while also giving sage-grouse adequate habitat in large, intact landscapes with minimal disturbances. The governor brought many of the key stakeholders to the table, including members of the oil and gas industry, conservation community and local government, as well as the Service and BLM.

In 2008, based on the collaborative efforts of the stakeholder group, Governor Freudenthal issued an executive order establishing the Wyoming "core area" policy.^{xiv} Although the policy comes with detailed prescriptions for oil and gas development and other uses, the goals are straightforward: maintain and enhance sage-grouse populations throughout the state by identifying and limiting activities in "core" habitat areas.^{xv} The policy requires sacrifices and commitments from all stakeholders, but has so far stood the test of time. It has provided greater certainty to the oil and gas industry (and others), while also limiting the amount of development in "core" habitat.

"Losing the sage grouse as a regal game bird would be a sad day indeed, much more unfortunate than the complete extinction of the passenger pigeon or dodo bird, because this is 2014. We should know better."

- Jay Hanson, editor Montana Sporting Journal

Penny Bellah, a senior regulatory analyst for Samson Oil and Gas, Wyoming native and member of the governor's stakeholder group, spoke to that certainty, "For my industry, having set rules that are not constantly changing allows us to plan." While the range of interested parties could have caused an impasse in the planning process, she says, "For being a very diverse team with many interests, I thought it went fairly smoothly."^{xvi} Rancher, county commissioner and member of the governor's stakeholder group, Douglas Thompson echoed those sentiments, "The plan works because it is a balanced strategy to allow some development, while conserving the most habitat and birds. One set of rules for everyone."^{xvii}

As for limiting development in “core” habitat, a recent study funded by the Natural Resources Conservation Service shows that the state’s policy is having a positive impact.^{xxiii} That study uses data from the BLM, which has largely adopted the governor’s “core area” approach for public lands in Wyoming, and concludes that since the policy went into effect, the amount of “core” habitat leased for oil and gas development has declined by 40 percent.^{xx} Additional data from the BLM supports these findings.^{xx} All this without sacrificing output, as Wyoming remains only second to Texas in total energy production.^{xxi}

With Wyoming’s success in mind, here are three elements found in the Wyoming plan that should be mirrored in other state plans to ensure durable conservation, while allowing flexibility to manage existing multiple uses:

- 1) Develop a state plans with multiple stakeholders input and buy-in on effective conservation measures that will maintain sustainable and harvestable populations;
- 2) Utilize the best available information to identify key habitat areas that must be targeted for protection, restoration or enhancement to meet current and future goals for grouse;
- 3) Institute a statutory body of diverse stakeholders that advises and holds the state accountable for implementing actions, enforcing regulations, and ensuring adequate completion of sage-grouse conservation plans and any proposed and permitted activities in priority habitat.

Conserving Grouse, Enhancing Hunting and Outdoor Recreation Opportunities

Greater sage-grouse are an “umbrella” species. That means a wide range of other species stand to benefit from efforts to conserve sage-grouse habitat. In Wyoming, there is extensive overlap between sage-grouse habitat and habitat for several important big game species, including elk, mule deer and pronghorn.^{xxii} For instance, 45 percent of pronghorn “crucial winter range” (a key seasonal habitat) overlaps with “core” habitat for sage-grouse, while 33 percent of mule deer “crucial winter range” overlaps with “core” habitat.^{xxiii}

Conserving and restoring big game habitat means something to the people of Wyoming, where 1 of every 4 citizens identify themselves as a “sportsperson” (a hunter or angler).^{xxiv} And big game hunting, in particular, is one of the most popular wildlife-based activities in the state. In 2011, hunters logged almost 1.5 million days pursuing big game in Wyoming.^{xxv}

Wildlife-based recreation is also big business in Wyoming, accounting for \$1.1 billion in spending in 2011.^{xxvi} Big game hunting was responsible for almost 20 percent of that total.^{xxvii} Moreover, hunting is part of a larger outdoor recreation economy that supports 50,000 jobs and generates \$1.1 billion in wages and salaries every year in Wyoming.^{xxviii} In Cody, Wyoming alone, wildlife-based recreation is responsible for 1 of every 10 jobs and contributes over \$30 million to the local economy annually.^{xxix} Thus, by taking strong, proactive steps to conserve Greater sage-grouse, Wyoming has not only helped secure a better future for this iconic species. It has also invested in the conservation of big game and wildlife-based recreation that generates hundreds of millions of dollars in revenue for the state each year.

Conclusion

Oil and gas development is one of the primary reasons why sage-grouse are now being considered for an ESA listing. Proactively managing that threat in priority habitats, which are largely on public lands, is essential to the long-term survival of the species. And what protects sage-grouse also benefits big game and the wildlife-based recreation and economies that rely on them.

Wyoming has shown that by proactively engaging with its federal partners and other key stakeholders and enacting strong measures to conserve key habitat, real progress can be made and certainty can be provided for all. The challenge, now, is for the remaining states to follow suit before the final listing decision in 2015. States like Colorado, Montana and Nevada now have the opportunity to act, and engage with the BLM on developing plans that balance needed levels of protection with energy development and other multiple uses of these public lands.

“Hunters across the West are heartbroken at the prospect of losing sage grouse as part of America’s hunting heritage. It’s not too late to conserve sage grouse and their native habitats. We only have one chance to get this right, and now is the time.”

-Land Tawney, executive director of Backcountry Hunters & Anglers

Subject: FW: Governors Must Unite to Conserve Greater Sage-Grouse, Say Sportsmen's Groups

Dan -- Just so that you guys know what we are up to ahead of the WGA meetings...

News for Immediate Release**June 9, 2014****Contact: Katie McKalip, 406-240-9262, kmckalip@trcp.org****Governors Must Unite to Conserve Greater Sage-Grouse,
Say Sportsmen's Groups**

*As ESA deadline approaches, sportsmen stress that state conservation plans
are critical to avoiding a listing for the species*

COLORADO SPRINGS, Colo. – As the Western Governors Association's annual summer meeting commences this morning, sportsmen are urging a collaborative approach to conservation of a species emblematic of the American West, the greater sage-grouse, whose declining population numbers could result in its listing under the federal Endangered Species Act.

The U.S. Fish and Wildlife Service must decide by September 2015 whether to list North America's largest game bird under the act. Sportsmen are invested in averting a listing. To that end, prominent voices in the hunting and angling community are advocating development of strong conservation plans that comprehensively address all threats to sage-grouse while balancing resource development and land use in key grouse habitat.

"For more than a decade, sportsmen, developers, ranchers and the scientific community have foreseen the day when sage-grouse would be considered for listing, and many of us have been actively engaged in avoiding it," said Steve Riley, president of the North American Grouse Partnership. "Now, however, a final decision is near. Federal and state management and conservation plans must focus on sustaining the health of the species, which can only be accomplished through extensive and collaborative management of the landscapes that support it. Failure to do so will result in states losing their leadership role in the management of these magnificent birds to the federal government."

Sagebrush ecosystems that support sage-grouse are also critically important to more than 350 species of wildlife, including game species such as mule deer, pronghorn and elk. "There is substantial overlap in habitats used by sage-grouse and mule deer," said Miles Moretti, president and CEO of the Mule Deer Foundation. "Thriving populations of sage-grouse are an indicator of healthy sagebrush ecosystems, and that's good for mule deer and other species that sportsmen care about."

Nearly half of the country's remaining sagebrush habitat lies on federal public lands administered by the Bureau of Land Management. Private state lands are vital to the bird's future, however, and a federal ESA listing decision also hinges on state conservation plans.

"Sound conservation plans from both federal and state governments are critical to avoiding a sage-grouse listing under the Endangered Species Act," said Ed Amett, director of the TRCP Center for Responsible Energy Development. "It's not a federal vs. state problem: We're all in this together. Governors, state legislators and local decision-makers must continue working closely with each other and with federal agencies, sportsmen and other stakeholders to sustain healthy populations of the bird."

Sportsmen have contributed substantially to sage-grouse conservation. Western states have made longstanding investments via sportsmen's dollars to maintain productive populations of sage-grouse and avoid a listing, contributing more than \$130 million to sage-grouse management over the past decade. "We've put our money where our mouth is to conserve sage-grouse while relinquishing hunting opportunities in the process," Amett stated.

Balancing conservation with energy development, ranching and other land uses is possible, the sportsmen said, citing Wyoming's executive order and "core area" policy on sage-grouse conservation as evidence that conservation for the bird can be pursued along with other land uses, all while maintaining a healthy economy.

"Time is running out," said Land Tawney, executive director of the Backcountry Hunters & Anglers, which last week released a report on sage grouse conservation. "Every state with sage-grouse populations must develop conservation plans that pass muster with the Fish and Wildlife Service in order to avoid a listing. A scattershot conservation approach will fail to solve this problem. For the sake of our public lands, our resources-based economy and our nation's storied outdoors traditions, collaboration in managing sage-grouse is vital."

BRIEFING MEMORANDUM FOR THE SECRETARY
MEETING WITH AMERICAN PETROLEUM INSITUTE
INTERNAL PREP FOR MEETING WITH API

DATE: June 10, 2014
LOCATION: Office of the Secretary
TIME: 3:45PM – 4:15PM
FROM: Janice M. Schneider, AS/LM
Brandi Colander, Counselor to the AS/LM
Neil Kornze, Director, BLM
Brian Salerno, Director, BSEE
Walter Cruickshank, Acting Director, BOEM

MEETING WITH API

DATE: June 11, 2014
LOCATION: The Newseum, 555 Pennsylvania Avenue, NW
TIME: 1:45PM – 2:30PM
FROM: Janice M. Schneider, AS/LM
Brandi Colander, Counselor to the AS/LM
Neil Kornze, Director, BLM
Brian Salerno, Director, BSEE
Walter Cruickshank, Acting Director, BOEM

I. PURPOSE

You are scheduled to address the Executive Committee of the American Petroleum Institute (API). The Executive Committee consists of 12 of the oil and natural gas industry's top executives. Jack Gerard's invitation letter (Attachment 1) describes the meeting as an opportunity to exchange views on the economy, energy policy, and the role of the energy industry in creating jobs and ensuring energy security. Jack is the President and CEO of API.

II. PARTICIPANTS

Chairman:

- Mr. Stephen Chazen, President and Chief Executive Officer Occidental Petroleum Corporation

Members:

- Mr. Greg Garland, Chairman and Chief Executive Officer Phillips 66
- Mr. Gary Heminger, President and Chief Executive Officer Marathon Petroleum Corporation
- Mr. John B. Hess, Chairman and Chief Executive Officer Hess Corporation
- Mr. Ryan Lance, Chairman and Chief Executive Officer ConocoPhillips

- Mr. John Mingé, Chairman and President BP America, Inc.
- Mr. Jack Moore, Chairman, President and Chief Executive Officer Cameron Corporation
- Mr. J. Larry Nichols, Executive Chairman Devon Energy Corporation
- Mr. Marvin Odum, President and Director, Upstream Americas Shell Oil Company
- Mr. Rex Tillerson, Chairman and Chief Executive Officer Exxon Mobil Corporation
- Mr. Al Walker Chairman, President and Chief Executive Officer Anadarko Petroleum Corporation
- Mr. John Watson Chairman and Chief Executive Officer Chevron Corporation
- Ex-Officio: Mr. Jack Gerard President and Chief Executive Officer

API Staff

- Louis Finkel Executive Vice President American Petroleum Institute
- Khary Cauthen, Sen Director Fed Relations American Petroleum Institute
- Erik Milito, Group Director Upstream American Petroleum Institute
- Harry Ng, General Counsel American Petroleum Institute

III. AGENDA

You will be seated at the head of horseshoe-shaped table with the CEOs. Jack Gerard will introduce you. Your opening remarks will take approximately five minutes. The remainder of the meeting will consist of open discussion with members of the Executive Committee and questions and answers.

IV. KEY FACTS/HOT TOPICS

BLM

Hydraulic Fracturing

In May 2012, the BLM initiated formal rulemaking to revise its regulations on hydraulic fracturing on Federal and Indian lands with the publication of a proposed rule. The BLM published a revised proposed rule in May 2013. In addition to receiving comments during the formal comment period, the BLM conducted numerous consultations with tribes and outreach sessions with a range of stakeholders dating back to November 2010.

The BLM conducted the following outreach:

- Sent invitations to nearly 200 tribes;
- Travelled to meet with the tribes three times in January 2012 and four times in June 2013;
- Met with officials from New Town, ND and the National Congress of the American Indian Conference in July 2012;
- Met with tribes in Farmington, NM, and Dickinson, ND after the 2013 rule; and

- Met with tribes in Denver in March 2014 and, at the request of tribes, local BLM managers had follow-up meetings with individual tribes.

During the most recent formal comment period, which closed on August 23, 2013, the BLM received more than 1.35 million comments (in addition to the 177,000 comments received in 2012). The BLM anticipates issuing a final rule in fall 2014 after the Department completes its review of the package and sends it to the Office of Management and Budget.

The proposed rules have focused on addressing public disclosure, wellbore integrity, and flowback fluid management as the key issues underlying sound hydraulic fracturing development. The BLM's existing regulations, which are now 30 years old, do not adequately address these issues particularly in light of changing technology associated with horizontal well completions.

Industry has voiced concerns that the BLM does not have the capacity to regulate hydraulic fracturing and have increased costs from added tests such as the 2013 Revised Proposed Rule requirement for cement evaluation logs on surface casing even if an operator demonstrates sound cementing practices and pressure tests the surface casing and annulus-filled cement. Industry also expressed the following questions and concerns:

- The utility of requiring certain costly cement evaluation logs for well integrity as proposed in the rule, particularly at the surface, when other tests are available.
- The duplication of state regulations, resulting in inefficiency and possible delays.
- BLM staffing capacity to absorb the added workload.
- Compromising trade secrets associated with the disclosure of chemicals used in their respective hydraulic fracturing processes.
- The BLM has underestimated the costs of the rule.

The API provided 47 pages from two submissions describing concerns with the 2013 Supplemental Proposed Rule. The API raised numerous concerns, in addition to perceived added costs, delays while drilling, and permitting delays, including:

- There are no compelling reasons for the rule as there are no confirmed cases of contamination from hydraulic fracturing
- The FLPMA does not compel further regulation of Hydraulic Fracturing
- There is no regulatory void that needs to be filled by the BLM.
- The protection requirements for usable water are arbitrary, adding costs, and legally defective.
- Application of the rule to existing wells and leases may be a breach of contract, regulatory taking, and retroactive regulations.
- The rulemaking needs revisions to the requirements for cement evaluation logging and chemical disclosure.
- The API questions the criminal liability of an operator for a contractor.
- There should be flexibility in the use of lined pits.

- Remove the distinction in flowback and produced fluids.

After analysis of the comments, the BLM's approach to the final rule is to tighten the focus on wellbore integrity. The operators would post chemicals to FracFocus. The BLM strengthened the affidavit provisions to exempt public disclosure for trade secrets. The final rule will mandate the use of tanks for flowback fluid management unless operators meet specific criteria for use of lined pits. The BLM will work with the states to update the Memorandum of Understanding to streamline and take advantage of efficiencies where they meet or exceed the requirements in the final rule.

BLM's Oil and Gas Program

Oil and gas leasing is a market-driven activity. During calendar year 2013, the BLM held 30 lease sales. Nearly 1.1 million acres received bids, generating over \$202 million in revenue (shared with the states). During fiscal year (FY) 2013, industry produced more than 133 million barrels of oil and nearly 2.7 trillion cubic feet of natural gas on Federal onshore leases. (*Source: Office of Natural Resources Revenue*)

Industry interest in nominating Federal parcels for oil and gas development has increased since 2006. Between CY 2006 and CY 2013, industry expressions of interest increased from 7.5 million acres to 12.3 million acres. The BLM has deferred offering several areas because of planning activities related to Greater Sage-Grouse habitat conservation in Colorado, Montana, Nevada, Utah, and Wyoming.

The FY 2015 Budget proposes (i) a new fee schedule to fund inspection and enforcement, with collections offsetting a proposed reduction in appropriated funding; and (ii) a fee on new non-producing oil and gas leases to encourage diligent development on leased lands. The new fee to fund inspection and enforcement, if approved, would result in a \$10 million increase to the program and allow the BLM to focus additional resources on inspections and ensure completion of 100 percent of the high priority inspections. The \$6 per acre annual fee for non-producing leases is intended to promote timely production on new oil or gas leases and end once production occurs.

Oil and Gas Statistics

The Bureau of Land Management (BLM) continues to administer a robust and responsible oil and gas leasing program on public lands. Federal onshore oil production is the highest it has been in a decade and has risen for the fourth year in a row. Last year, the BLM offered 5.7 million acres for lease by industry -- the most in a decade -- and had 12.6 million acres actively producing oil and gas -- the most acres in six years.

- The BLM had approximately 23,500 producing oil and gas leases in FY2013, an increase of about 900 from FY2009.
- The BLM is approving Applications for Permit to Drill (APDs) more quickly. In FY2013, it took an average of 194 days to process an APD, down from 247 in 2009.

- At the end of FY 2013, the BLM had approved 5,816 APDs for public lands available for industry to drill, and approved another 895 APDs for Indian trust lands. Processing time for onshore drilling permits is the lowest it has been in eight years, and the BLM continues to invest in making the permitting process faster, less costly, and more transparent.

Master Leasing Plans and Other Leasing Reforms

Master Leasing Plans (MLP) involve pre-planning and intensive analysis of distinct geographical areas to avoid or minimize conflicts between oil and gas activity and recreation, water, air, cultural, and wildlife values. Areas with numerous competing resource values require additional planning and analysis prior to issuing new or additional oil and gas leases. The MLP process enables the BLM to take a focused, landscape-level look at the decisions in Resource Management Plans (RMP) pertaining to leasing and post-leasing development with an eye toward avoiding or minimizing conflicts and subsequent litigation.

The BLM is developing MLPs, as part of new RMPs and amendments to existing RMPs. A number of stakeholders, including many environmental groups, have expressed interest and requested that the BLM prepare additional MLPs. Industry believes that MLPs are an unnecessary step in the leasing process that results in delays.

The BLM's 2010 leasing reforms have increased consistency in lease stipulations provided for a more thorough lease parcel review process, including more time for pre-sale lease analysis. When the BLM initiated Leasing Reform in 2010, the current leasing system was near the breaking point. In 2009, the BLM received protests on nearly half of all lease parcels. In 2013, after the initiation of Leasing Reform, protests diminished to fewer than 20 percent. The BLM accomplished this by adding pre-lease NEPA analysis to build a more efficient process that better informs and involves the public while resolving protests more quickly. Included in this process was a more thorough on-the-ground analysis, which allows the BLM to identify which parcels the BLM should or should not lease and, if they do lease them, to determine what mitigation and other stipulations apply.

Venting and Flaring Rule for Onshore Federal and Indian Lands

The BLM's current policy on venting and flaring, covered by a Notice to Lessees known as NTL-4A, is over three decades old. The BLM is drafting a rule to update NTL-4A. While the BLM has made no final decisions, they are reviewing a wide range of areas in which fugitive emission reductions may be technically and economically possible.

Possible areas for effective emission reductions include: well completions (used to put a well into production); production tests; casing head and associated gas (from oil wells); liquids unloading; oil and condensate storage tanks and vessels; pneumatic devices; and leak detection and repair. The BLM is also considering the extent of its authority to charge royalties for vented, flared, or leaked gas. The BLM does not charge royalties for this gas under a variety of circumstances, including when gas is determined to be "unavoidably lost." In the last 30 years, however, industry has made significant progress in its technical ability to control leaks, venting and flaring. This significant progress may allow the BLM to adjust which circumstances where the gas is "avoidably lost" and thus royalty bearing. The BLM just completed four regional public outreach sessions in Denver (March 19), Albuquerque (May 7), Dickinson (May 9) and

Washington, D.C. (May 16). Each session had both a tribal and a public component. The BLM anticipates sending a proposed rule to OMB by the end of the calendar year.

API provided lengthy comments during the comment period, which closed on May 30. API stated that the BLM should adopt a sufficiently comprehensive view that recognizes and addresses permitting delays and other fundamental challenges currently preclude the installation of pipelines and infrastructure that could further reduce the need for venting and flaring. Further API stated the BLM has a statutory mandate to provide for the prevention of waste, conservation of oil and gas resources, and assurance of payment of the proper royalty share to the federal government, but not to regulate methane emissions or air quality.

Sage Grouse

The API said this in the Wall Street Journal (Opinion) March 11, 2014. "Interior's proposed "land use" amendments are draconian." They require a four-mile "buffer zone" whenever a sage-grouse mating ground is discovered on federal land. The American Petroleum Institute calls the proposed rules a "de facto ban on drilling." It fears that compliance could cost tens of millions of dollars in legal fees and cause years of drilling delays."

The BLM continues to offer lands for lease far in excess of industry demand. Last year, the BLM offered 5.7 million acres for lease by industry, the most in a decade. At the same time, industry submitted bids on fewer than one-in-five of these acres.

Bureau of Safety and Environmental Enforcement (BSEE)

Blowout Preventer (BOP)/Well Control Rule

BSEE is working on a proposed rule to address various recommendations involving well control and BOPs arising out of multiple investigations following the Macondo Well blowout and resulting oil spill (spill). The rule is of great interest to industry and they have requested the agency to expedite its release. Immediately following the spill, BSEE issued a series of Notices to Lessees and regulations that attempted to fill several obvious gaps in regulations involving well control. However, these changes did not address the key recommendations relating to the need to increase BOP reliability and performance and improve industry practices involving well control. The objective of this proposed rulemaking is to address these key recommendations, address significant gaps in existing requirements, and update BSEE regulations to reflect industry best practices.

This rule is the most important safety reform arising out of the spill and will address many of the key recommendations and findings made by the National Academy of Engineers, Deepwater Horizon Oil Spill Commission, and other groups. The rule is a high priority for the Department. BSEE has held meetings with stakeholder groups on this rule, including a BOP forum in 2012. The key concern for industry will be the effective date for each of the proposed requirements.

Shallow water operators were generally unable to reach consensus on standards for surface BOPs, so the BOP standard for shallow water BOPs is less robust than that of deepwater subsea BOPs. This is reflected in American Petroleum Institute Std. 53. The initial cost to industry of complying with the new requirements will be approximately \$164 million in the first year and

\$77 million each year thereafter. However, an annual savings of \$154 million due to reduced testing frequency for workover operations and a reduced likelihood of oil spills will offset this cost.

The proposed regulation has undergone extensive review within BSEE during the development stage, including a complete revision of the economic analysis to address internal modifications. The proposed rule is currently under review in the Solicitor's Office.

Arctic Rule

BSEE and BOEM are working on a proposed rule that would apply specifically to exploratory drilling in the Arctic. This rulemaking will address the unique operational challenges associated with Arctic operations. The Arctic Outer Continental Shelf (OCS) Standards will codify and further develop the Arctic-specific standards established for Shell's 2012 exploration program, and are intended to strengthen safety and environmental protection for Arctic OCS exploratory operations.

The rule will ensure that operators in the Arctic:

- (1) design and conduct exploration programs in a manner suitable for Arctic conditions;
- (2) develop an integrated operations plan that addresses all phases of the exploration program;
- (3) have access to, and can promptly deploy, source control and containment equipment;
- (4) have access to a separate relief rig to be able to timely drill a relief well in the event of a loss of well control;
- (5) are capable of predicting, tracking, reporting, and responding to ice conditions and adverse weather events;
- (6) effectively manage and oversee contractors; and
- (7) develop and are prepared to implement effective oil spill response plans tailored to the Arctic conditions.

We expect the rule to enter interagency review this summer.

California Offshore Fracking

Environmental advocacy groups, including the Center for Biological Diversity and the Environmental Defense Center of Santa Barbara, CA, have expressed concern over possible environmental impacts associated with the use of hydraulic fracturing and acidization in the offshore environment. Their concerns include discharge of flow-back water into the ocean or an accidental spill, fluid leakage from loss of well integrity, leakage through faults, induced seismicity from hydraulic fracturing or fluid re-injection, and drinking water contamination. Additionally, the California Coastal Commission, which has an approved Coastal Management Plan pursuant to the Coastal Zone Management Act, has recently expressed an interest in hydraulic fracturing and acid stimulation techniques occurring in waters off the California coast.

Operators in the Pacific OCS have used hydraulic fracturing only on rare occasions. There have been over 1400 oil and gas wells drilled on the Pacific OCS and to date only about a dozen of those wells have been hydraulically fractured. One operator on the Pacific OCS has been approved to hydraulically fracture three wells in the coming months. In contrast, almost every

well drilled on the Pacific OCS undergoes acidization, another form of stimulation. Well acidization is achieved by pumping acid into the well to dissolve limestone, dolomite, and calcite cement between the sediment grains of the reservoir rocks. After acidization, the used acid and sediments removed from the reservoir are washed out of the well in a process called backflush.

Permitting

The focus on "permitting" in recent years has mainly been on drilling permits. BSEE's district offices are responsible for approving the Applications for Permit to Drill (APDs) for drilling operations. BSEE has made consistent improvements in the predictability and consistency of its permitting processes. In 2013, BSEE oversaw a 48% increase in the number of deepwater floating rigs and approved 394 well permits. In contrast, the agency approved 341 well permits in 2009. BSEE has achieved these improvements while putting in place additional drilling safety standards. Permit applications must meet standards for well-design, casing, cementing, containment and be independently certified by a professional engineer. In order to implement these improvements, BSEE has increased the district permitting staff by over 25 percent since 2010.

Well permits are approved through eWell, which is a web-based, electronic permitting system. The agency has used eWell successfully in the Gulf of Mexico for about ten years. BSEE is planning to further improve its permitting process by developing an ePermit system, an electronic process that will eventually take the place of the current paper-based approach used for non-eWell permits. The ePermit system will encompass all BSEE permitting activities, including pipeline, platform, commingling, measurement, production safety systems, flaring, suspensions, etc.

U.S./Mexico Transboundary Agreement

The U.S. and the United Mexican States signed the "*Agreement between the United States of America and the United Mexican States Concerning Transboundary Hydrocarbon Reservoirs in the Gulf of Mexico*" on February 20, 2012. Congress ratified it in the Bipartisan Budget Act of 2013, which the President signed on December 26, 2013. The Agreement is expected to be put into force in mid-July 2014. The Agreement establishes a legal framework for the exploitation of transboundary hydrocarbon reservoirs that may exist along the maritime boundary between the U.S. and Mexico in the Gulf of Mexico through cooperative arrangements, primarily BSEE-approved unitization agreements involving U.S. lessees and the Mexican national oil company, Petróleos Mexicanos (Pemex).

The Agreement requires establishment of a "Joint Commission" to assist the Executive Agencies in administering the Agreement. On June 3rd, Secretary Jewell signed a Secretarial Order to implement the Agreement. During the week of June 9, a team of BSEE and BOEM employees will meet with our Mexican counterparts in Mexico to discuss processes and procedures for implementation of the Agreement

Bureau of Ocean Energy Management

Current Year Program

The current (2012 – 2017) BOEM Five-Year Program (Program) makes areas in the Gulf of Mexico and Alaska with more than 75% of the total undiscovered technically recoverable OCS oil and gas resources available for potential leasing. Under the current Five Year Program, BOEM has two lease sales proposed for the Arctic OCS: the Chukchi Sea in 2016 and Beaufort Sea in 2017.

The Program did not include the Atlantic or large portions of the Eastern Gulf of Mexico as promoted by API. A portion of the Central Gulf of Mexico Planning Area (CPA) and most of the Eastern Gulf of Mexico Planning Area (EPA) is under restriction until 2022 as part of the Gulf of Mexico Energy Security Act of 2006. The area restricted is that portion of the EPA within 125 miles of Florida, all areas in the Gulf of Mexico east of the Military Mission Line (86° 41' west longitude), and the area within the CPA that is within 100 miles of Florida.

Next Five Year Program

The Department is beginning the 2.5 to 3 year process of developing the next (2017 – 2022) Program. The week, BOEM will release a Request for Information (RFI), the first public step in the planning process. Outer Continental Shelf Lands Act requires the RFI to solicit public input on the areas that should or should not be included in the next Program. The RFI will include all 26 planning areas. The Secretary makes the decision regarding which areas to include or exclude from the Five Year Program following additional opportunities for public input. API is advocating that the next Program include the Atlantic and Pacific OCS, and more/all of the Eastern Gulf of Mexico.

Atlantic Programmatic EIS for Geological and Geophysical Activities

On February 27, 2014, BOEM released the final Programmatic EIS for Proposed Geological and Geophysical (G&G) Activities in the Mid- and South Atlantic Planning Areas (PEIS). The PEIS outlines the environmental impacts of G&G survey activities for three BOEM program areas (oil and gas, renewable energy, and marine minerals) and identifies mitigation and monitoring measures to avoid, reduce, or minimize impacts to the marine environment. Additionally, the PEIS establishes a framework for future site-specific evaluations of proposed G&G activities (such as seismic testing) under NEPA and several other environmental requirements. The agency expects to sign the Record of Decision in the near future.

Chukchi Lease Sale 193 Litigation

On January 22, 2014, the Court of Appeals for the Ninth Circuit ruled that the Department's NEPA review for Lease Sale 193 in the Chukchi Sea off the coast of Alaska was insufficient. The decision stems from a lawsuit filed by Earthjustice on behalf of a coalition of 15 Alaska Native and conservation groups. The Chukchi Sea lease sale, Sale 193, was originally held in 2008, and offered nearly 30 million acres for oil drilling—an area larger than the size of Pennsylvania. Prior to the lease sale, there were no active oil leases in the Chukchi Sea. The Department is supplementing its NEPA analysis for the lease sale and must reconsider its lease sale decision. BOEM will have the lead for the Supplemental Environmental Impact Statement. DOI issued directed suspensions to leaseholders in the Chukchi Sea effective January 22, 2014, and lasting until the court decision has been addressed. The SEIS will proceed expeditiously. Per the schedule filed with the federal district court for the District of Alaska, a draft SEIS is

expected in early October 2014, a final SEIS in February 2015, and a Record of Decision by March 2015.

Offshore Regulatory Issues in Frontier Areas:

Throughout 2013, DOI met with a number of oil and gas operators (both majors and independents) to discuss opportunities to modernize the offshore regulatory regime. The goal is to better align the regulations with the strategic and technical realities related to exploration and development in frontier areas, including emerging deepwater subsalt plays in the Gulf of Mexico. Many of the regulations governing OCS oil and gas operations were adopted when the majority of industry operations occurred in the shallow water GOM shelf. With the advent of highly-defined seismic programs and technical developments, including increased capacity for directional drilling, the offshore industry has moved further from the shelf into deeper waters and subsalt reservoirs that involve difficult drilling at extremely high pressures and temperatures. Some aspects of the current regulations do not recognize the difficulties or longer time frames associated with developing such areas. BOEM and BSEE are currently considering next steps.

V. TALKING POINTS

Talking Points from AS/LM are attached separately.

VI. ATTACHMENTS

- Executive Committee Biographies (*below*)
- Talking Points (*attached separately*)

Stephen Chazen**President and CEO - Occidental**

Mr. Stephen I. Chazen, also known as Steve, has been the Chief Executive Officer of Occidental Petroleum Corporation since May 5, 2011 and its President since December 2007. Mr. Chazen served as the Chief Operating Officer of Occidental Petroleum Corporation since August 2010. He served as the Chief Financial Officer of Occidental Petroleum Corporation since 1999. Mr. Chazen served as Senior Executive Vice President of Occidental Petroleum Corp. from August 9, 2004 to December 2007, Executive Vice President of Corporate Development from May 1994 to August 9, 2004 and also served as its Head of Corporate Development. From 1982 to 1994, Mr. Chazen served as an Investment Banker at Merrill Lynch. He served in a number of roles, including managing director and head of corporate finance, managing director of mergers and acquisitions, and managing director in the natural resources group at Merrill Lynch. Mr. Chazen has been a Director of Lyondell Chemical Company since August 22, 2002. He has been an Independent Director of Ecolab Inc., since May 2013. He has been Director of Occidental Petroleum Corporation since May 2010. He has been a Director of American Petroleum Institute Inc. since January 2011. He serves as a Director of Port Arthur Finance Corp. He serves as a Director of Sabine River Holding Corp., the General partner of Port Arthur Coker Company L.P. He served as a Director of WMI Holdings Corp. from March 2008 to March 1, 2009. He served as a Director of Premcor Inc. since April 1999. He served as a Director of the predecessor of Premcor Inc. from 1995 to April 1999. He serves on the Governance Committees of Equistar Chemicals, LP and OxyVinyls L.P. He holds a Ph.D. in geology from Michigan State University, a master's degree in finance from the University of Houston and a bachelor's degree in geology from Rutgers College.

Greg Garland**Chairman and CEO – Phillips 66**

Mr. Greg C. Garland has been the Chairman and Chief Executive Officer at Phillips 66 Partners GP LLC, the general Partner of Phillips 66 Partners LP since March 2013. Mr. Garland has been the Chairman of the Board and Chief Executive Officer of Phillips 66 since April 30, 2012. He serves as a Vice President at American Fuel & Petrochemical Manufacturers. He served as President of Phillips 66 from April 30, 2012 to May 30, 2014. He served as a Senior Vice President of Exploration & Production-Americas at ConocoPhillips from October 6, 2010 to April 2012. He served as Chief Executive Officer and President of Chevron Phillips Chemical Co. LLC from April 1, 2008 to February 8, 2011. He served the Chief Executive Officer and President of Americas Styrenics LLC. His extensive experience in the energy industry, including his more than 30-year career with Phillips Petroleum Company from 1980 to 2000, CPChem and ConocoPhillips. Mr. Garland served as Senior Vice President of Planning & Specialty Products at Chevron Phillips Chemical Company LLC from October 2001 to April 2008. From July 2000 to October 2001, he served as a Senior Vice President of Planning & Strategic Transactions of Chevron Phillips Chemical Company LLC. He served as a General Manager of Qatar/Middle East for Phillips, since 1997. He has been a Director of Phillips 66 since April 30, 2012 and Amgen Inc. since October 16, 2013. He serves as a Director of DCP Midstream LLC and

Phillips 66 Partners GP LLC. He serves as a Director of DCP Midstream LLC at DCP Midstream Partners LP. He is a Member of the Chemical Engineering Industrial Advisory Board for Texas A&M University and serves on the board of Junior Achievement of Southeast Texas. He serves as a Director of American Chemistry Council, Inc. Mr. Garland holds a Bachelor of Science in Chemical Engineering from Texas A&M University in 1980.

Gary Heminger

President and CEO - Marathon Petroleum

Mr. Gary R. Heminger has been the President and Chief Executive Officer of Marathon Petroleum Corporation since June 30, 2011. Mr. Heminger has been the Chairman and Chief Executive Officer at MPLX GP LLC, General Partner of MPLX LP since June 2012. He served as Executive Vice President of Downstream at Marathon Petroleum Company LP, a wholly owned subsidiary of Marathon Oil Corporation since July 2005. He served as an Executive Vice President of Downstream at Marathon Oil Corporation from July 2005 to June 30, 2011 and its Executive Vice President since January 2005. He served as the President of Marathon Petroleum Company LP since September 2001, Executive Vice President of Supply, Transportation and Marketing since January 2001, Senior Vice President of Business Development since 1999 and Vice President of Business Development since January 1998. Mr. Heminger served as Executive Vice President of Downstream at Marathon Oil Company. He joined Marathon Oil Company in 1975. He served as President of Marathon Ashland Petroleum LLC since September 2001. He also served as President of Refining, Marketing & Transportation Operations of Marathon Petroleum Company LP. He served for 37 years at Marathon serving in a variety of groups and functions. In addition to five years in various financial and administrative roles, he served for three years in London, England as an Audit Supervisor of the Brae Project. He served as the Vice President of Western Division of Emro Marketing (predecessor of Speedway SuperAmerica LLC) since 1991 and served in several marketing and commercial roles, for eight years. From 1995 to 1996, Mr. Heminger served as the President of Marathon Pipe Line Company and also served as Manager of Business Development & Joint Interest of Marathon Oil Company since November 1996. He has been a Director of Fifth Third Bank since December 20, 2006 and Marathon Petroleum Corporation since 2011. He serves as a Director of American Chemistry Council Inc. and of JobsOhio. He has been a Director at Fifth Third BanCorp since December 20, 2006. He served as Director of Northern Tier Energy LP until July 2012. He is the Chairman of the Board of Trustees at Tiffin University. He was Chairman of Louisiana Offshore Oil Port. He was a Member of the Oxford Institute for Energy Studies. He was Chairman of the American Petroleum Institute (API) Downstream Committee. He serves on the Executive Committee in the U.S.-Saudi Arabian Business Council. He holds an MBA from the University of Dayton in 1982. Mr. Heminger graduated from Executive Management Program from the University of Pennsylvania - The Wharton School. He has a Bachelors Degree in Accounting from Tiffin University in 1976.

John B. Hess

Chairman and CEO – Hess Corporation

Mr. John B. Hess has been the Chief Executive Officer at Hess Corporation (formerly Amerada Hess Corp) since 1983. Mr. Hess has been with Hess Corporation for 28 years and has strong background in the global oil and gas industry. Mr. Hess provides significant value to the oversight and development of Kohlberg Kravis Roberts business and served leadership roles at a

global energy business. He served as the Chairman of Hess Corporation from 1995 to May 16, 2013. He serves as Vice Chairman of Lincoln Center for the Performing Arts, Inc. and has been its Director since 2007. He serves as a Trustee of Center for Strategic and International Studies, Inc. He has been a Director of Hess Corporation since 1978. He has been a Director of the Trilateral Commission since 2009. He has been a Director at Deerfield Academy since 2004. Mr. Hess has been a Director of Kohlberg Kravis Roberts & Co. since July 28, 2011 and of KKR Management LLC since July 28, 2011. Mr. Hess has been a Director of National Advisory Board of J.P. Morgan Chase & Co. since 1991. He has been a Member of Board of Trustees at Wildlife Conservation Society/NY Zoo since 1991, United Cerebral Palsy Research and Educational Foundation. Mr. Hess has been a Trustee of The Mount Sinai Hospital since 1988 and New York Public Library since 2008. He has been a Member of The Business Council of The Council of Foreign Relations since 2003 and Dean's Advisors of Harvard Business School since 2001. He served as a Director of NYC2012, Inc. He served as a Director of The Dow Chemical Company since October 12, 2006 until May 9, 2013. Mr. Hess served as a Member of the Secretary of Energy Advisory Board from 1999 to 2002. He is a member of the National Petroleum Council at the U.S. Department of Energy. He earned a B.A. from Harvard College in 1975 and an M.B.A. from Harvard Business School in 1977.

Ryan Lances

Chairman and CEO - ConocoPhillips

Mr. Ryan M. Lance has been the Chairman of the Board and Chief Executive Officer at ConocoPhillips since May 2012. Mr. Lance has 28 years of oil and natural gas industry experience in senior management and technical positions with ConocoPhillips, predecessor Phillips Petroleum and various divisions of ARCO Alaska, Inc. He served as Senior Vice President of Exploration & Production - International of ConocoPhillips and ConocoPhillips (U.K.) Limited since May 2009. Mr. Lance served as President of Exploration & Production, Asia Africa, Middle East and Russia/Caspian of ConocoPhillips and also served as its Senior Vice President of Technology since 2007. He served as Senior Vice President of Technology and Major Projects at Conocophillips from April 1, 2006 to February 1, 2007 and President of Asia Pacific Exploration and Production from May 8, 2003 to June 2005. He served as President Exploration & Production, Europe Asia Africa and the Middle East of ConocoPhillips. He served as President of downstream strategy, integration and specialty functions at ConocoPhillips since 2005 and as Vice President of Lower 48 since 2002. He served as President of Strategy Integration and Specialty Businesses - Refining Marketing Supply & Transportation of ConocoPhillips from June 2005 to April 1, 2006. Mr. Lance began his career with ARCO Alaska in 1984. He held various management, engineering and operations positions internationally as well as in Alaska and the U.S. Lower 48 before transferring in 1989 to ARCO's Bakersfield, Calif. operations. In 1992, he transferred to Midland, Texas, where he supervised ARCO's coalbed methane operations in the San Juan Basin. He returned to Alaska in 1994 as Exploration Engineering Manager. In 1996, he transferred to Vastar Resources in Houston as Planning Manager and served in that position until 1998. He served as Vice President of the Western North Slope for ARCO Alaska, Inc. since 1998. Mr. Lance returned to Houston in 2001 as the General Manager of Lower 48 and Canadian operations for Phillips Petroleum. He spent 17 years with ARCO. He has been a Director of ConocoPhillips since May 9, 2012. He serves as a Director for Spindletop International as well as on the Montana Tech Foundation's board. He serves on the University of Houston's Energy Advisory Board. He serves on the Boards of both

the American Petroleum Institute and the Independent Petroleum Association of America. He is an Advisory board Member of Montana Tech and a Member of the Society of Petroleum Engineers. He is a Petroleum Engineer. Mr. Lance earned a Bachelor of Science in Petroleum Engineering from Montana Tech in Butte in 1984.

John Minge

Chairman and President - BP America

Mr. John Minge has been the Chairman, Chief Executive Officer and President of BP America, Inc. at Bp Alaska since February 15, 2013. Mr. Minge served as the President of BP Exploration (Alaska), Inc. He served as the Head of Business at Bp Alaska from January 1, 2009 to February 15, 2013 also served as its Regional President. He served as the President of BP Indonesia. He began his BP career 25 years ago as a drilling engineer in the Gulf of Mexico. He served as President of Exploration and Production for Vietnam and China. Mr. Minge has been a Director of Bp America Inc. since February 15, 2013.

Jack Moore

Chairman, President and CEO – Cameron Corporation

Mr. Jack B. Moore has been the Chief Executive Officer of Cameron International Corporation (Formerly Cooper Cameron Corporation) since April 1, 2008, and has been its Chairman of the Board since May 3, 2011. Mr. Moore has been the President of Cameron International Corporation since January 01, 2007. He served as Chief Operating Officer of Cameron International Corporation since January 1, 2007. He served as President of Drilling & Production Systems Group of Cameron International Corporation from July 2002 to December 2006. He served as Senior Vice President at Cameron International Corporation from October 1, 2005 to January 1, 2007 and its Vice President since May 15, 2003. He joined Cameron in July 1999 as Vice President and General Manager of Western Hemisphere. He served at Baker Hughes Incorporated for 23 years, where he served in a variety of marketing, manufacturing and human resources positions. He has been a Director at Cameron International Corporation since November 2007 and KBR, Inc., since January 1, 2011. He serves as Member of Executive Advisory Board at C.T. Bauer College of Business. Mr. Moore served as Director of Maverick Tube Corporation and also served as its Member of Advisory Board. He serves on the boards of directors of the American Petroleum Institute (API), the National Ocean Industries Association (NOIA). He serves as a Director of Petroleum Equipment Suppliers Association (PESA) as well as the Boards of several charitable and educational institutions. He serves in positions of leadership for the Greater Houston Partnership, Spindletop Charities and of Memorial Drive United Methodist Church. Mr. Moore holds a BBA degree in finance and marketing from the University of Houston and a graduate of the Advanced Management Program at Harvard Business School.

J. Larry Nichols

Executive Chairman – Devon Energy

Mr. J. Larry Nichols serves as President of Devon Energy Production Company LP. Mr. Nichols served as the President of Sonic Corp. He Co-Founded Devon Energy Corporation in 1971 and serves as its Chairman .from 2000 to June 2010, President from 1976 to 2003 and Chief Executive Officer since 1980. He served as law clerk to Mr. Chief Justice Earl Warren and Mr. Justice Tom Clark of the USA Supreme Court. He serves as the Executive Chairman of Devon

Energy Corporation. He served as the the Chairman of the Board of American Petroleum Institute Inc. from January 2008 to December 2010. He has been a Director of Devon Energy Corporation since 1971. He has been a Director at Baker Hughes Incorporated since 2001 and has been its Lead Director since April 30, 2013. Mr. Nichols has been a Director of Sonic Corp. since January 31, 2007. He also serves on the Board of Governors of the American Stock Exchange. He served as a Director of American Petroleum Institute Inc. He served as a Director of BOK Financial Corp. since 1997. He served as a Director of Smedvig ASA since 1996. He serves as a Director of the Domestic Petroleum Council, the National Association of Manufacturers, the Independent Petroleum Association of America, the Natural Gas Supply Association, the Independent Petroleum Association of New Mexico, the Oklahoma Independent Petroleum Association and the National Petroleum Council. Mr. Nichols serves as a Director of several trade associations that are relevant to the conduct of Devon's business. He served as Director of CMI Terex Corporation. Mr. Nichols holds a Bachelor of Arts/Bachelor of Science degree in Geology from Princeton University and a Law Degree from the University of Michigan.

Marvin Odum

President and Director, Upstream Americas, Shell Oil

Marvin E. Odum became Director of the Upstream Americas business in 2009. He continues as President of Shell Oil Company (SOC). Marvin earned a bachelor's degree in mechanical engineering from The University of Texas at Austin and a master's degree in business administration from the University of Houston. He began his Shell career as an engineer in 1982, and has since served in a number of management positions of increasing responsibility in both technical and commercial aspects of energy. Prior to his most recent appointment and in addition to his role as SOC President, he was Executive Vice President for the Americas for Shell Exploration & Production. He was named SOC President in 2008 and had served as Executive Vice President since 2005, with responsibility for Shell exploration and production businesses in the western hemisphere. Marvin is a member of the Council on Foreign Relations and holds positions of board leadership and participation in the Business Roundtable and the American Petroleum Institute. He is on the executive committee of the World Business Council for Sustainable Development. In addition, he is a member of the Dean's Council of the John F. Kennedy School of Government at Harvard University and the Advisory Board of the Cockrell School of Engineering at The University of Texas at Austin. He is also involved with several charities in the Houston area.

Rex Tillerson

Chairman and Chief Executive Officer – Exxon Mobil

Mr. Rex W. Tillerson has been Chief Executive Officer and President at Exxon Mobil Corporation since January 1, 2006 and March 1, 2004 respectively. Mr. Tillerson has been the Chairman and Chief Executive Officer of ExxonMobil Chemical Company since January 2006. He serves as Chairman and Chief Executive Officer of Exxonmobil Australia Pty. Ltd. He served as Senior Vice President of Exxon Mobil Corp. since August 2001. He served as Exxon Company, U.S.A.'s Production Engineer since 1975. Mr. Tillerson held several engineering, technical and supervisory assignments in the EUSA Production Department throughout Texas, and in 1987, was named Business Development Manager of the EUSA Natural Gas Department, where his responsibilities included developing long-range plans for commercialization of Alaska

and Canadian Beaufort Sea gas. Since 1989, he served as General Manager of EUSA's Central Production Division and was responsible for its oil and gas production operations throughout a large portion of Texas, Oklahoma, Arkansas and Kansas. Mr. Tillerson served as the Production Adviser of Exxon Corporation since 1992 and Coordinator of Affiliate Gas Sales of Exxon Co., International. Three years later, he was named President of Exxon Yemen Inc. and Esso Exploration and Production Khorat Inc. and in January 1998, he became Vice President of Exxon Ventures (CIS) Inc. and President of Exxon Neftegas Limited, where he was responsible for Exxon Mobil Corp.'s holdings in Russia and the Caspian Sea as well as the Sakhalin I Consortium operations offshore Sakhalin Island, Russia. Since December 1999, he served as Executive Vice President of ExxonMobil Development Company. Mr. Tillerson has been the Chairman of Exxon Mobil Corporation since January 1, 2006 and has been its Director since March 1, 2004. He served as the Chairman of American Petroleum Institute Inc. He serves as Vice Chairman of The Business Council. He has been a Director of ExxonMobil Chemical Company since March 2004. He serves as a Trustee of Center for Strategic and International Studies. Mr. Tillerson served as a Member of the Board of Directors of the American Petroleum Institute Inc., the U.S.-Russia Business Council, the United Negro College Fund, a Member of the Executive Board of the Boy Scouts of America, and a Member of the Engineering Foundation Advisory Council for the University of Texas at Austin and the Society of Petroleum Engineers. He is a member of the National Petroleum Council, the Business Roundtable and its Energy Task Force, an honorary trustee of the Business Council for International Understanding, and a member of the Emergency Committee for American Trade. Mr. Tillerson received a Bachelor of Science in Civil Engineering from the University of Texas at Austin.

Al Walker

Chairman, President and CEO – Anadarko Petroleum

Mr. R. A. Walker, also known as Al, has been the Chairman at Anadarko Petroleum Corporation since May 14, 2013 and as its Chief Executive Officer since May 15, 2012 and President since February 2010. Mr. Walker served as the Chief Operating Officer of Anadarko Petroleum Corp. from March 1, 2009 to May 15, 2012. He served as the Managing Director for the Global Energy Group of UBS Investment Bank from 2003 to 2005, where he was responsible for UBS's upstream energy practice. He joined Anadarko Petroleum Corp. on September 6, 2005 as Senior Vice President of Finance and Chief Financial Officer and served until March 2009. He worked at Seagull Energy Corp. and Enx Resources Corp. He served as the President and Chief Financial Officer of 3TEC Energy Corporation until its merger with Plains Exploration and Production Company in 2003. From 1987 to 2000, he worked for Prudential Financial in a variety of merchant banking positions as Senior Managing Director and Co-head of Prudential Capital Group. Mr. Walker has experience in both the banking and energy sectors. He served as the Chairman of Western Gas Holdings, LLC from August 2007 to October 2009. He has been a Director of CenterPoint Energy, Inc. since April 22, 2010 and Centerpoint Energy Resources Corp. since April 2010. He has been a Director of Maxus Energy Corporation since 1994. Mr. Walker serves as a Director of TIN Inc., Ocean Energy Inc., and the Houston Producers Forum. He has been a Director of Anadarko Petroleum Corporation since May 2012. He serves as Director of BOK Financial Corporation. He serves on the Board of Trustees for the United Way of Greater Houston and the Houston Museum of Natural Science. He served as a Director of Western Gas Equity Holdings, LLC from September 2012 to March 2013. He served as a Director of Temple-Inland Inc. since November 2008 February 2012. He served as a

Director of Western Gas Holdings, LLC from August 2008 to March 12, 2013. He served as Director of Global Natural Resources. He served as a Director of Texas Eastern Products Pipeline Company LLC since July 2002. He served as a Director of 3TEC Energy Corporation since 2000. Mr. Walker has a Bachelor of Science in 1979 and a Masters of Business Administration in 1984 from the University of Tulsa.

John Watson

Chairman and CEO – Chevron

Mr. John S. Watson has been the Chairman of the Board and Chief Executive Officer of Chevron Corporation since January 1, 2010. Mr. Watson serves as the Chairman of the Board and Chief Executive Officer at Chevron Global Energy Inc. He served as an Executive Vice President of Strategy & Development of Chevron Corp. from January 1, 2008 to April 1, 2009 and its Chief Financial Officer from 2000 to January 1, 2005. He served as President of Chevrontexaco Overseas Petroleum Inc. since January 1, 2005 and also served as President of Chevron Canada Limited, a subsidiary of Chevron Corp. since January 1996. Mr. Watson served as President of Chevron International Exploration and Production of Chevron Corp. from 2005 to 2007 and was responsible for managing Chevron's exploration and production activities outside North America. He served as Corporate Vice President, Strategic Planning at Chevron Corp. He joined Chevron Corp. in 1980 as a Financial Analyst, going on to hold various financial and analytical positions in Chevron and Chevron U.S.A. Inc. He held supervisory positions in the comptroller's financial and profit analysis groups. He served as Manager of investor relations of Chevron since 1990. Mr. Watson served as Vice President of Finance and Chief Financial Officer of ChevronTexaco Corporation from 2000 to January 1, 2005 and also served as ChevronTexaco merger integration executive. Since 1993, Mr. Watson served as Manager of credit card enterprises of Chevron U.S.A. (CUSA) Products Co. where he oversaw its credit card operations. Since 1995, he served as General Manager of strategic planning and quality of CUSA, where he was responsible for developing business plans and strategies, conducting business evaluations and reviewing investment proposals for it. He served as Vice President of Chevron Corp. at Chevron Energy Solutions L.P. since 2005 and also served as its Vice President of finance from 2000 to January 1, 2005. He served as the Chairman and Director of American Petroleum Institute Inc. from January 2011 to December 2012. Mr. Watson served as Vice Chairman of Chevron Corp. since April 1, 2009. He serves as Director of Padres L.P., Animal Rescue Foundation and Chevron Capital USA Inc. Mr. Watson served as a Director of Dynegy Inc. from 2001 to March 2004. He served as Director of Caltex Petroleum Corp. He earned a Bachelor's degree in Agricultural Economics from the University of California at Davis in 1978 and a Master's degree in Business Administration from the University of Chicago in 1980.

Jack Gerard

President and CEO – API

Mr. Jack N. Gerard has been Chief Executive Officer and President at American Petroleum Institute since November 1, 2008. Mr. Gerard served as President and Chief Executive Officer of American Chemistry Council, Inc., since February 2007 until September 2008. As President and Chief Executive Officer of ACC, Mr. Gerard was leading new efforts to redefine the chemistry industry and to strengthen its role in advocating public policy. Prior to joining ACC in July 2005, Mr. Gerard was President and Chief Executive Officer of the National Mining Association, where he streamlined operations, developed core competencies, merged two distinct cultures,

modernized the association's communications capabilities and built a national grassroots organization. In addition, he relocated the Association, expanded membership in an era of consolidation, significantly increased member political activity and changed the dues structure. He also co-chaired the BIPAC "Prosperity Fund," raising funds to mobilize the business vote. Earlier in his career, Mr. Gerard was a Founding Partner, Chairman and Chief Executive Officer of McClure, Gerard & Neuenschwander, Inc., a Washington, D.C.-based government relations consulting firm. He and founding partner, former U.S. Senator James McClure, focused on issues, including international sports, telecommunications, energy and mining. Prior to this, he spent close to a decade working in the US Senate and US House of Representatives. He is President of the National Capital Area Council - Boy Scouts of America and serves on the George Washington University Graduate School of Political Management's Council on American Politics. Mr. Gerard holds Bachelor of Arts in Political Science from George Washington University and Juris Doctor from George Washington University.

EVENT MEMORANDUM FOR THE SECRETARY

REMARKS AT SENATOR JEANNE SHAHEEN'S 4TH ANNUAL BUSINESS DAY LUNCHEON

DATE: June 11, 2014
LOCATION: 902 Hart Senate Office Building
TIME: 2:40PM - 3:00PM
FROM: Sarah Neimeyer, OCL (202)208-5557; Jeremy Bratt, OCL (202) 208-7696

I. PURPOSE

Senator Jeanne Shaheen (D-NH) [pronounced 'Jean sha-HEEN'] has invited you to address approximately 150 New Hampshire business leaders at her 4th Annual New Hampshire Business Day Luncheon.

She will introduce you from a podium to a group of business and community leaders who will be seated at tables in front of you. You are invited to speak for 5-8 minutes and then answer questions from the audience for another 10 minutes or so.

II. PARTICIPANTS

This event is closed press. A list of 175 community and small business leaders from New Hampshire is attached. Other invited speakers include:

- Senator Ayotte (R-NH);
- Jason Furman, Chairman of the White House Council of Economic Advisers;
- Tom Wheeler, Chairman of the Federal Communications Commission;
- Secretary of State John Kerry;
- Michael Froman, U.S. Trade Representative;
- Secretary of Transportation Anthony Foxx;
- Secretary of Commerce Penny Pritzker; and
- Maria Contreras-Sweet, Administrator of the U.S. Small Business Administration.

III. AGENDA

Speaking Order:

- Senator Jeanne Shaheen, State of New Hampshire
- Jim Roche, President, Business and Industry Association of New Hampshire
- Senator Kelly Ayotte, State of New Hampshire
- Chairman Jason Furman, White House Council of Economic Advisers
- Chairman Tom Wheeler, Federal Communications Commission
- Secretary John Kerry, United States Department of State
- Ambassador Michael Froman, United States Trade Representative
- Secretary Anthony Foxx, United States Department of Transportation

- Secretary Penny Pritzker, United States Department of Commerce
- **You** will speak
- Administrator Maria Contreras-Sweet, United States Small Business Administration

IV. KEY FACTS

The National Park Service manages two locations in New Hampshire:

- The Appalachian National Scenic Trail, which runs 2,184 miles from Georgia to Maine, including 161 miles in New Hampshire.
- The Augustus Saint-Gaudens National Historic Site, which contains the home, studios and gardens of a great American sculptor, whose work can be seen in Washington, D.C.'s own Rock Creek Cemetery and the National Gallery of Art.

According to National Park Service data:

- More than 37,000 visitors enjoyed these parks and historic sites in 2013.
- Those visitors provided \$1.5 million in economic benefit to the state.
- Volunteers donated over 4,000 hours of community service to help beautify and improve the sites and the land.

The FWS operates the Silvio O. Conte National Fish and Wildlife Refuge, which stretches over 7.2 million acres of the Connecticut River in four states, including New Hampshire (also Connecticut, Massachusetts, and Vermont). The Refuge contains a great diversity of habitats, including: forest used as nesting habitat for birds; waterways used by shad, salmon and herring and a complex of marshes.

Finally, the LWCF is very important to New Hampshire. The state has received over \$37 million in LWCF grants since 1965, which funds projects like the Appalachian National Scenic Trail. Full funding for LWCF remains an important Administration priority; the President's FY15 budget requested full funding for the program to continue the program for the next fifty years, to invest in conservation and provide better recreational opportunities across the country.

V. BACKGROUND

Outdoor recreation and tourism are big industries in New Hampshire, responsible for nearly 50,000 direct jobs, over \$1 billion in wages, and nearly \$300 million in tax revenue (Outdoor Industry Association data).

Many of the small businesses that work in the recreation and tourism industries will be participating in the luncheon. They will be interested to hear your thoughts, both as a former private sector leader in the field and as Secretary, on engaging the next generation of young people to play, learn, serve and work in the great outdoors.

VI. TALKING POINTS (PROVIDED BY OCL)

Acknowledgements:

- Senator Jeanne Shaheen, New Hampshire's senior senator (*introduces you*)

- Commerce Secretary Penny Pritzker (*speaks immediately before you*)

Background on You & Interior:

- Oil and gas engineer → Banking → REI CEO → Interior Secretary
- Interior has vast portfolio that touches economies and communities across the US

Interior Facts:

- Manages more than **530 million acres** (about 20 percent of the land in U.S.); **700 million acres** of subsurface minerals; **1.7 billion acres** of the Outer Continental Shelf
- These lands and offshore areas produce **21 percent of nation's energy**
- **401** National Parks, **562** National Wildlife Refuges, **247 million acres** in the National System of Public Lands
- **70,000 employees** in approximately **2,400 locations** across the U.S., Puerto Rico, U.S. Territories, and Freely Associated States
- Largest supplier and manager of water in the **17 western states**
- Uphold trust responsibilities to the **566 federally recognized tribes**, including education services to nearly **41,000 students** through the Bureau of Indian Education
- Provides unbiased, multidisciplinary science to understand our earth, including through: **8,000 streamgages**, **2,700 earthquake sensors**, and **15 million satellite scenes** downloaded from Landsat with archives available at no cost to the public

Economic impact:

- This year will collect an estimated **\$14.9 billion** (grazing, energy, minerals, land sales, timber) shared with Federal, State and local governments
- Interior contributes an estimated **\$45 billion** in economic activity from more than **417 million visits** to our public lands

Three Challenges:

- I will spend some time talking about the top challenges facing us – and what we're doing about it

1. Constrained resources

- Governments at every level are grappling with constrained resources
- The President's proposed budget for fiscal year 2015 show how we can invest in the things we need to grow our economy and create jobs while continuing deficit

reduction

- Look forward to working with Congress and Senator Shaheen to implement the budget
- I will continue to look for opportunities to partner with businesses, to better align our work, to find efficiencies, and to ensure our practices are effective and match priorities
- I want to work with you on permanent authorization of the **Land and Water Conservation Fund**

2. Climate Change

- This is the defining issue of our time
 - It has major impacts on our land, water, wildlife, tribal communities and economy
 - I see its very real effects everywhere I travel: Alaska, Marshall Islands, California and Colorado River Basin: hotter, drier fire seasons
 - President's Climate Action Plan – we have a moral obligation to act now to cut carbon pollution, help communities prepare for impacts, and slow the effects of climate change
- Interior's role:
- Build a better understanding – for example, Climate Science Centers
 - Build resilience – for example, Hurricane Sandy funding to strengthen coastal resilience and natural barriers
 - Develop homegrown, clean energy
 - Goal: approve 20 MW of renewable energy on public lands by 2020
 - Approved over 50 projects on public lands. Incredible progress from 2009, with zero solar project permitted
 - Together, the 50 wind, solar and geothermal projects would generate 14,000 MW, enough to power 4.8 million homes, and support 20,000 construction and operations jobs

3. Engaging the Next Generation

- The next generation of Americans is more urban and diverse; more connected through technology, but less connected to the natural world
- We need to reflect these realities in our workforce and in our practices if we are to stay effective and relevant
 - Nearly one-third of DOI workforce retirement eligible in next 5 yrs

- We must seek ways to **protect our nation's outdoor heritage** and **create opportunities** to develop next generation of outdoor stewards
- I've launched an ambitious youth initiative to inspire millions to **Play, Learn, Serve, Work** outdoors.
 - To develop the next generation of lifelong conservation stewards and ensure our own skilled and diverse workforce pipeline, Interior will provide **100,000 work & training opportunities** to young people and veterans within our bureaus and through public-private partnerships
- I've launched a campaign to raise **\$20 million** from private partners that will help stand up the **21st Century Conversation Service Corps** to support youth work and training opportunities
- It's a **win-win-win**: develops lifelong connection to the outdoors, creates jobs, and helps our public lands

Conclusion – Your partnership is Key:

- I appreciate your partnership on these complex challenges
- Examples of where engagement is making a difference:
 - **Moab County** (UT) officials in developing Master Leasing Plans
 - **King County** (WA) officials engaged on climate change
 - **Garfield County** (CO) officials utilizing conservation funding to hire local youth to rebuild trails, clear brush and learn principles of conservation
 - Counties throughout the West working to conserve sage grouse habitat
- Issues **do not stop at political boundaries. We must all work together** – across party lines, across state lines, at all levels of government, including with tribal communities

VII. ATTACHMENTS

- Biography of Jeanne Shaheen (*below*)
- RSVP List of Attendees (*attached separately*)

Sen. Jeanne Shaheen (D–N.H.)

Senior Senator from New Hampshire

Residence: Madbury

Born: Jan. 28, 1947; St. Charles, Mo.

Religion: Protestant

Family: Husband, Bill Shaheen; three children

Education: Shippensburg State College, B.A. 1969 (English); U. of Mississippi, M.S.S. 1973 (political science)

Military Service: None

Career: University public affairs institute director; campaign aide; jewelry store owner; teacher

- **First Elected:**2008 (1st term); Defeated Sen. John E. Sununu, R
- **Latest Election:**2008 General (51.62%)
- **Political Highlights:**Democratic nominee for N.H. Senate, 1978; Madbury Zoning Board of Adjustment, 1983-96 (chairwoman, 1987-96); N.H. Senate, 1990-96; governor, 1997-2003; Democratic nominee for U.S. Senate, 2002
- **Committees:**
 - Appropriations (Commerce-Justice-Science; Energy-Water; Labor-HHS-Education; Legislative Branch - chairwoman; State-Foreign Operations)
 - Armed Services (Emerging Threats & Capabilities; Readiness & Management Support - chairwoman; Seapower)
 - Foreign Relations (African Affairs; European Affairs; International Operations & Organizations; Western Hemisphere & Global Narcotics Affairs)
 - Small Business & Entrepreneurship

+ Headlines From Today's Front Pages.

WASHINGTON SCHEDULE:

+ Today's Events In Washington.

LAST LAUGHS:

+ Late Night Political Humor.

DOI in the News:

NPS BEGINS PROCESS OF IDENTIFYING LGBT LANDMARKS. The [San Francisco Chronicle](#) (6/11, Lochhead, 3.33M) reports that on Tuesday, the NPS "began the process of identifying the significant historical sites" of gay, lesbian, bisexual and transgender Americans' "struggle for civil rights." The agency's "plan is to convene scholars and community leaders and come up with landmarks in the LGBT movement, much as the government already does for historically significant buildings for African Americans and other minority groups." Interior Secretary Sally Jewell and NPS officials "convened a meeting in the nation's capital Tuesday of 18 prominent LGBT historians and scholars, the first step in identifying significant places in the gay civil rights movement."

The [Federal News Radio](#) (6/11, 11K) reports that NPS Director Jonathan Jarvis "joined Emily Kopp on the Federal Drive to talk about the new initiative."

Also reporting on the story is [WRC-TV Washington](#) (6/11, 312K).

PRESIDENT OBAMA URGES GOVERNORS TO PUSH CONGRESS ON DISASTER FUNDING. The [E&E Daily](#)

(6/10) reports that President Obama "held a closed-door videoconference yesterday with Western governors gathered here at an annual conference, asking them to help push Congress to get behind his fiscal 2015 budget proposal to fund excess wildfire suppression costs with disaster relief dollars instead of raiding federal programs that help make forests resilient to blazes." The article notes that "a bipartisan group of governors attending the Western Governors' Association annual meeting" on Monday said "after the videoconference that they strongly support the president's budget proposal, as well as two bills that also would overhaul the way the country funds fire suppression." Colorado Gov. John Hickenlooper said Obama "urged the governors to contact their senators and House members and ask them to support his proposal to allow agencies to tap the Federal Emergency Management Agency's disaster relief funds when they exceed fire suppression budgeted amounts rather than use funds designed for forest restoration and research."

Dry Conditions Could Drive Up Wildfire Costs. The E&E Daily (6/10) reports that "as hundreds of firefighters battled to save central Oregon's largest city from a wildfire yesterday, the Obama administration persisted in its efforts to overhaul how the federal government pays for such costly disasters." The article also notes that a USDA report "highlighted a lengthy, state-by-state list of projects that didn't get funding because the money was used for wildfire suppression efforts instead." In May, the Interior Department and the Forest Service said that "dry conditions across the West could drive this year's wildfire costs up to \$1.8 billion, \$470 million more than is currently allocated."

SECRETARY JEWELL URGES GOVERNORS TO OPPOSE BILL TO DELAY SAGE GROUSE LISTING. The E&E Daily (6/10) reports that Secretary Sally Jewell warned governors at the Western Governors' Association's annual meeting against delaying the FWS' "court-ordered September 2015 deadline to decide whether to list the greater sage grouse as a threatened or endangered species." Jewell urged governors to oppose a bill by Rep. Cory Gardner and Sen. Mike Enzi "to push back the decision by at least a decade, saying such a move would further imperil the iconic bird." During her keynote speech, Jewell said, "Stay on the deadline that is court-mandated. Don't change the rules, and let's get this thing over the finish line in a way that is good for the bird, good for your economies and gets this uncertainty behind all of us."

MINNESOTA GOV. DAYTON HEADS TO D.C. SEEKING LEWIS AND CLARK WATER PROJECT MONEY. The Minneapolis Star Tribune (6/11, Helgeson, 1.48M) reports that Minnesota Gov. Mark Dayton is heading to Washington, D.C., Wednesday "to push for federal money for the Lewis & Clark fresh water pipeline in southwest Minnesota." Dayton will attend a meeting hosted by Sen. Amy Klobuchar with Interior Secretary Sally Jewell.

Also reporting on the story are the Grand Forks (ND) Herald (6/11, 87K) and the St. Paul (MN) Pioneer Press (6/11, 656K).

HOUSE COMMITTEE HEARS TESTIMONY ON LAKE BERRYESSA'S FUTURE. The Napa Valley (CA) Register (6/11, 36K) reports that the House Subcommittee on Water and Power heard testimony Tuesday on a bill that would take management of recreation of Lake Berryessa from the BOR and give it to the BLM. The Interior Department "has endorsed the legislation, but Assistant Deputy Secretary Tom Iseman testified that the changeover may not fix the concerns about Reclamation's management if BLM isn't given money and resources do it properly." He noted that "other issues about how to transfer ownership of Reclamation-owned facilities like day-use areas and launch ramps need to be better addressed."

WESTERNERS LOOK FOR WAYS TO CONTROL PUBLIC LAND. The Washington Times (6/11, Drake, 455K) reports that a Heritage Foundation session on Tuesday looked "at ways to reduce Washington's control of vast swaths of the American West." According to the article, "with so much of the West owned by the federal government, lawmakers and leaders alike said a discussion is overdue on how the lands can be better used." Rep. Rob Bishop said, "You don't have to have everything managed by Washington in order to have it done well. States and tribes are showing that they can do just as good a job, if not a better job."

NATIONAL PARKS URGED TO SUPPORT OUTDOOR RECREATIONAL ACTIVITIES. For Outside (6/11, 98K), Grayson Schaffer writes that Interior Secretary Sally Jewell's "vision of inclusivity," outlined in a speech before the National Press Club last October, "should be enthusiastically supported by anyone who cares about the future of our park system." However, he notes that "it falls well short of what we need," because, "while she has the right idea in reaching out to new communities, like her predecessors, she's ignoring the people who are most desperate to be allowed in: the paddlers, mountain bikers, and other adventure-sports athletes who are banned

from many of the nation's best natural playgrounds." Schaffer argues that "it's an outdated stance that overlooks the role these activities now play in our relationship with wild places, and it seriously undercuts public support for an expansive and growing park system."

USE OF ANTIQUITIES ACT CRITICIZED. In her column for the Farmington (NM) Daily Times (6/11, 46K), Marita Noon writes that the designation of the Organ Mountains-Desert Peaks region of New Mexico as a national monument is an example of "executive overreach." Noon claims that "history shows that in cases where the Antiquities Act has been used — whether for a national conservation area, a national park, or a national monument — mining claims were extinguished, homes have been torn down, communities have been obliterated, and working landscapes been destroyed."

OPINIONS DIFFER ON BOULDER-WHITE CLOUDS NATIONAL MONUMENT. In an op-ed for the Idaho Statesman (6/11, Gibson, 222K), Michael Gibson, the outreach coordinator for Sportsmen for Boulder-White Clouds, writes in support of a Boulder-White Clouds National Monument. He claims that the Boulder-White Clouds is "a sportsmen's paradise but it's not being managed as sportsmen's paradise."

On the other hand, in an op-ed for the Idaho Statesman (6/11, Hayes, 222K), Bob Hayes urges Idahoans to "ask President Barack Obama to reject the proposal by environmental activists to create the Boulder-White Clouds National Monument by presidential proclamation." He claims that "the ecology of the 280,000-acre Boulder-White Clouds region is not at risk and in all likelihood never will be." Hayes asserts that "it's impossible to know the full extent of damage that could be done but, for certain, most stakeholders would be deprived of the opportunity to participate in a land management decision of critical importance to them, the agreement most users have for sharing the resource would be undermined and overlaying a National Monument on an existing National Recreation Area would invite confusion, conflict and litigation."

America's Great Outdoors:

National Park Service:

NPS BANS DEMONSTRATIONS AT NATIONAL CEMETERIES. The Hill (6/11, Devaney, 237K) reports that the NPS will "continue banning picketers at national cemeteries for fallen soldiers, after a federal court ruled an earlier prohibition was too broad and could be interpreted in a way that violates the First Amendment, the agency said Tuesday." The agency announced "it is narrowing the definitions of 'demonstrations' and 'special events' that are prohibited at national cemeteries to comply with the court ruling." However, "it will not reverse the prohibition altogether at the 14 national cemeteries it manages."

WASHINGTON MONUMENT ELEVATOR SUFFERS ANOTHER MALFUNCTION. WRC-TV Washington (6/11, 312K) reports that the Washington Monument elevator had "a door malfunction Tuesday, another issue in a string of breakdowns since the monument's reopening in May." According to NPS spokesperson Carol Johnson, "the elevator's doors wouldn't close properly as visitors waited at the top of the monument." Workers were "able to fix the doors and get visitors back to the ground level using the elevator."

DRAKES BAY OYSTER CO. FILES NEW BRIEF IN PLEA TO SUPREME COURT. The Main (CA) Independent Journal (6/11, 88K) reports that the legal battle between the Drakes Bay Oyster Co. and the federal government "continued Tuesday with the oyster farm filing a brief as it tries to have its case heard by the US Supreme Court." The filing "refers to resolving what it terms as 'the mother of all circuit splits.'" According to the article, "the splits in this case are on jurisdiction to review agency actions for abuse of discretion, applicability of the National Environmental Policy Act and prejudicial error under the Administrative Procedure Act."

Also reporting on the story is KPIX-TV San Francisco (6/10, 51K).

NPS INVESTIGATING MISSING MOUNT RAINIER CLIMBERS. The AP (6/11, Tarinelli) provides continuing coverage of the search for the six climbers scaling Mount Rainier. Chuck Young, chief ranger at Mount Rainier National Park, said Monday that "the park service is pursuing an active investigation and will continue with a limited search." Young said "the park has not recovered any bodies or gear from the six missing climbers."

YOSEMITE NATIONAL PARK RESCUE CAUGHT ON VIDEO. The [AP](#) (6/11) reports that “park officials say a backpacker who narrowly avoided plunging to his death from a waterfall at Yosemite National Park was hoisted to safety by a helicopter rescue crew in an operation that was captured on video.” According to the article, “video footage of the May 28 rescue shows the helicopter hovering over a gorge at the base of Upper Yosemite Fall.” The video was released last week.

YELLOWSTONE NATIONAL PARK VISITOR KILLED BY FALLING TREE. [KRTV-TV](#) Great Falls, MT (6/11, 7K) reports that “a 36-year-old man from Taiwan died Monday in Yellowstone National Park when a tree that was blackened in the fires of 1988 fell in the wind.” The NPS is investigating the incident.

GRAND CANYON INSTITUTES CAMPFIRE BAN. The [Arizona Republic](#) (6/10, 1.45M) reports that Grand Canyon National Park visitors will “no longer be allowed to burn campfires across much of the park beginning Friday morning due to fire risks.” The NPS will “ban wood burning and charcoal fires, except along the Colorado River.”

Bureau of Land Management:

BLM COPS RESPONSIBLE FOR WIDE RANGE OF DUTIES. The [E&E Daily](#) (6/10) reports that the BLM’s “standoff with Nevada rancher Cliven Bundy and an armed militia was a dangerous, high-stakes confrontation, but BLM is no stranger to risky business in a still-wild West.” The bureau “handles booby-trapped marijuana farms, drug smugglers, archaeological thieves, vandals and arsonists.” Dan Fowler, division chief for BLM’s \$55 million law enforcement program, said, “I can’t think of another organization that has such an expansive land management responsibility. This is not your routine assault. It’s not your routine white-collar crime.”

BUNDY’S SON DENOUNCES VEGAS SHOOTERS. The [E&E Daily](#) (6/10) reports that “the married couple that authorities say killed three people during a Las Vegas shooting spree were kicked off the Nevada ranch where Cliven Bundy led a protest against grazing fees on public land, the rancher’s son said.” Ammon Bundy said Jerad and Amanda Miller were “asked to leave the property because they were ‘very radical’ and did not ‘align themselves’ with the protest’s fight with the Bureau of Land Management.” Ammon Bundy “denounced the couple’s violent rampage, saying that ‘the only thing worse than tyranny is anarchy, and we certainly recognize that.’”

Additional coverage of the shooters as provided by the [AP](#) (6/11), [FOX News](#) (6/10, 6.72M), the [New York Daily News](#) (6/11, 4.36M), the [Chicago Tribune](#) (6/11, Walberg, Muskal, 2.3M), the [BBC News](#) (6/11, 1.17M), and the [Raw Story](#) (6/10, 71K).

BLM, VOLUNTEER GROUP TARGET ILLEGAL DUMPING. The [E&E Daily](#) (6/10) reports that the BLM and the Rogers Canyon Coalition, a volunteer group, have “teamed up to reduce illegal dumping in Wyoming.” They have “proposed to clean up an area outside Laramie where residents go to discard unwanted appliances, drive four-wheelers and shoot guns at a makeshift target range.” The article notes that “rather than ban the public or forbid shooting, the plan includes creating a designated target range and building a kiosk with information on proper waste disposal.”

Also reporting on the story are the [AP](#) (6/11) and the [Prairie \(MT\) Star](#) (6/11).

GROUP ADVOCATES FOR BETTER WATER FOR HORSES. The [Prairie \(MT\) Star](#) (6/11) reports that Friends of a Legacy, an advocacy group, hopes to help Marathon Oil and the BLM “construct a series of pipelines for water on the land.” The group “applied recently for funding from the Wyoming Wildlife and Natural Resource Trust to drill at least two new wells, said Warren Murphy, the president of the group.” Murphy said, “We’re, in a sense, saving the federal government money here. And at the same time, they’re better at their job of looking out for their horses.”

CONSULTANT: GRAZING PERMITS DO NOT CONVEY A RIGHT. In an op-ed for the [Elko \(NV\) Daily Free Press](#) (6/11, 22K), Andy Kerr, a consultant for conservation organizations, argues that “federal grazing permits and leases do not convey ‘grazing rights’ on federal public lands.” He notes that “federal grazing permits and leases are revocable, amendable, non-assignable 10-year licenses to graze federal public lands that do not

convey property rights to grazing permittees and lessees.”

Fish and Wildlife Service:

PERMIAN BASIN PETROLEUM ASSOCIATION SUES OVER LESSER PRAIRIE CHICKEN LISTING. The Odessa (TX) American (6/11, 50K) reports that the Permian Basin Petroleum Association and four southeastern New Mexico counties have “filed suit against the federal government, alleging that US Fish and Wildlife Service and U.S Department of the Interior violated the law by deciding to list the Lesser-Prairie Chicken as ‘threatened’ under the Endangered Species Act.” Specifically, the plaintiffs claim that “the federal regulators March decision ‘violated their own policy’ by failing to fully evaluate conservations underway and dismissing data that showing the grouse’s population and occupied range were growing.” Ben Shepperd, president of the Permian Basin Petroleum Association, said, “We think they didn’t go far enough. We appreciate them including the Range Wide Plan in their deliberations but we feel like the overall scientific evidence combined with the unprecedented conservation efforts that were put together should have cleared a pathway to not list the bird.”

Also reporting on the story are the My West Texas (6/11, 2K), the Energy Daily (6/11, 835), and KMID-TV Midland, TX (6/11).

Oklahoma Oil Industry Groups Join Lawsuit Over Lesser Prairie Chicken Listing. The Oklahoman (6/11, 530K) reports that “Oklahoma’s two largest industry groups joined two of the nation’s largest oil and gas trade associations Friday in suing the U.S Department of Interior and U.S. Fish and Wildlife Service, arguing the agency did not consider the best available science in deciding to protect” the lesser prairie chicken. According to the article, “the lawsuit, filed in U.S. District Court in Tulsa, does not challenge the agency’s decision to endorse extensive voluntary conservation efforts that have been developed by the industry and states that already are working to protect the lesser prairie chicken, officials said.”

Quay County Joins Prairie Chicken Action. The Quay County (NM) Sun (6/10) reports that the Quay County Commission “voted Monday to join other potential plaintiffs from five states in a filing a notice of intent to file a lawsuit against the US Fish and Wildlife Service.” The lawsuit “seeks to force removal of the Lesser Prairie Chicken from the threatened species list.”

GROUPS FILE LAWSUIT FOR LISTING OF ALEXANDER ARCHIPELAGO WOLVES. The AP (6/11, Joling) reports that “three conservation groups have sued to force a federal agency to decide whether a rare Alaska wolf should be listed as endangered.” A decision by the FWS on Alexander Archipelago wolves is 18 months overdue, according to Rebecca Noblin, an attorney for the Center for Biological Diversity. The center, Greenpeace and The Boat Company, “a nonprofit educational organization that offers eco-cruises in southeast Alaska, sued Tuesday in federal court in Washington, D.C.”

GROUPS SEEK PROTECTION FOR WILD HORSES. The North Country (NY) Gazette (6/10, 59) reports that Friends of Animals and The Cloud Foundation have filed a petition with the FWS to list North American wild horses on public lands as threatened or endangered under the Endangered Species Act since the Wild Free-Roaming Horse and Burro Act, “which was passed in 1971, has failed to protect our wild horses.” Ginger Kathrens, executive director of The Cloud Foundation, said, “Misclassification of wild horses as a non-native species is politically, not scientifically driven. Wild horses are severely endangered but without recognition of current scientific evidence of their native status, they could become extinct.”

WILDLIFE CONCERNS DELAY ILLIANA EXPRESSWAY. The Times of Northwest Indiana (6/11, Benman, 283K) reports that “final federal approval for the Illiana Expressway has been delayed by concerns about endangered species and habitat that may be affected by construction of the 47-mile bistate expressway.” The FWS has “raised concerns about how the expressway would affect endangered or threatened species like the sheepsnose mussel and the long-eared bat, INDOT project manager James Earl told members of the Northwestern Indiana Regional Planning Commission on Tuesday.” Also, the FWS and other agencies have “expressed concerns with the expressway’s impact on the Midewin National Tallgrass Prairie in Illinois.”

DUKE SIGNS AGREEMENT WITH NORTH CAROLINA, VIRGINIA OFFICIALS FOR COAL ASH CLEANUP. The E&E Daily (6/10) reports that North Carolina and Virginia officials, along with the FWS, “signed an agreement

yesterday with Duke Energy Corp. requiring the company to clean up coal ash from the Dan River and to pay any 'reasonable' costs connected to the spill." The article notes that "the agreement places no cap on what Duke will ultimately be liable for, and it requires the utility to pay for long-term monitoring as well as cleanup costs."

FWS EXPECTS RECOVERY PLAN FOR LYNX TO BE COMPLETED IN 2018. The E&E Daily (6/10) reports that the FWS announced on Monday that "it expects to finish a recovery plan for the threatened Canada lynx in early 2018, almost two decades after the species first received federal protections." The service was "responding to court documents in a federal case brought by environmentalists over the delays." The agency has "cited budget issues, other species taking priority and lawsuits as among the reasons it has repeatedly missed its recovery plan deadlines."

FWS DECLARES NEW MEXICO MEADOW JUMPING MOUSE ENDANGERED SPECIES. The AP (6/11) reports that the FWS issued an order Monday listing the New Mexico meadow jumping mouse an endangered species. The Cronkite News (6/11) reports that the agency said "it would be 'prudent' to designate critical habitat to protect the mouse, but has not made a final decision on that."

Also reporting on the story is KRQE-TV Albuquerque, NM (6/10, 29K).

FWS EXTENDS COMMENT PERIOD FOR MONOMOY REFUGE PLAN. The Cape Cod (MA) Times (6/10, 101K) reports that the FWS announced that "it will be extending the comment period for its draft Monomoy National Wildlife Refuge Comprehensive Conservation Plan from July 9 to Oct. 10." The article notes that "Chatham town officials had requested an extension to Dec. 31." According to the article, "Chatham officials had expressed concerns about several portions of the new management plan, which will be used as a management blueprint for the refuge for the next 15 years, including the claim to 717 acres of barrier beach once considered town-owned land, and that they had jurisdiction over fishing in waters west of Monomoy that lie within refuge boundaries but have traditionally been regulated by the state Division of Marine Fisheries and the town's shellfishing department."

FWS TAKING APPLICATIONS FOR SUMMER CAMP AT SOUTHEAST LOUISIANA NATIONAL WILDLIFE REFUGE. The New Orleans Times-Picayune (6/11, 678K) reports that the FWS is "preparing for a summer camp for boys and girls ages 8 to 10 years old. The camp is July 14 to 18 from 9 a.m. to 2 p.m. each day." Supervisory Park Ranger David Stoughton said, "Campers will have the opportunity to participate in a wide variety of outdoor activities geared to promoting outdoor skills, and stewardship such as canoeing, fishing, boating, animal caretaking, hiking, birding, orienteering and coastal restoration projects."

Securing America's Energy Future:

Onshore Energy Development:

UTAH ACCUSES BLM OF ILLEGALLY BARRING ENERGY LEASES. The Salt Lake (UT) Tribune (6/11, 470K) reports that Utah, the Utah Association of Counties, and Uintah County have sued the BLM, alleging it has imposed "de facto wilderness management" on lands that don't fall under its jurisdiction for protection. Such policies have "unlawfully foreclosed oil and gas leasing and rights-of-way applications" on these lands, the parties allege. Drillers should have access to "about a third of the land covered in the 9 million-acre Red Rocks bill," according to Assistant Utah Attorney General Harry Souvall. The case was argued on Friday before US District Judge Dee Benson.

MONTANA LAWMAKERS PUSH TRIBAL RESOURCE BILLS. The E&E Daily (6/10) reports that "members of Montana's congressional delegation are pushing for the passage of measures to promote tribal coal development." Last week, Sens. John Walsh and Jon Tester "introduced a new version of a bill to swap coal reserves in Montana to rectify a century-old surveying error." The bill, S. 2442, would "give the Northern Cheyenne Tribe roughly 5,000 acres of subsurface coal rights within the reservation."

Offshore Energy Development:

REGULATORS, INDUSTRY DECRY GULF SPILL REPORT'S FOCUS ON EQUIPMENT. The E&E Daily (6/10) reports that in a report released last week on the 2010 Gulf of Mexico oil spill, the US Chemical Safety and

Hazard Investigation Board "warned industry and government regulators that the findings from their investigation indicate offshore oil and gas projects may be relying on safety equipment that isn't reliable at all." But "so far, both offshore drillers and their chief government regulator are balking at these conclusions." The BSEE "argued that CSB is too focused on just the BOP technology, which the agency contends is merely one piece in a whole set of technological and procedural tools used to avoid major accidents in offshore oil and gas operations."

Tackling America's Water Challenges:

POSSIBLE PREHISTORIC ELEPHANT SKULL FOUND AT ELEPHANT BUTTE LAKE STATE PARK. The AP (6/11) reports that "authorities say campers in New Mexico have discovered what appears to be a prehistoric elephant skull at Elephant Butte Lake State Park." According to the article, "paleontologists at the New Mexico Museum of Natural History and Science are working with State Park and US Bureau of Reclamation Staff to investigate and potentially excavate the fossil as soon as possible."

Also covering the story are the Las Cruces (NM) Sun-News (6/11, 59K), the Albuquerque (NM) Journal (6/11, 282K), and KTSM-TV El Paso, TX (6/11, 970).

Empowering Native American Communities:

CONNECTICUT ATTACKS PROPOSED FEDERAL RECOGNITION REVISIONS. The Indian Country Today Media Network (6/10, 45K) reports that "three Connecticut state recognized tribes, all of whom were denied federal recognition more than 10 years ago, have another chance to apply due to newly proposed federal recognition regulations, issued recently by the Bureau of Indian Affairs." Nedra Darling, spokeswoman for the BIA, said, "The proposed 'expedited positive' process is primarily to be used for petitions in which there is no serious challenge among the local community and state." Connecticut's congressional delegation has "announced they will dispute the new regulations."

INTERIOR MOVING FORWARD WITH CHANGES TO PROTECTIONS REGARDING NATIVE AMERICAN GRAVES. The Hill (6/11, Devaney, 237K) reports that the Interior Department is "moving forward with changes to which Indian tribes qualify for protections under the Native American Graves Protection and Repatriation Act."

BIA RECOGNIZES OUSTED MEMBERS OF TRIBAL COUNCIL IN CASINO DISPUTE. The Red Bluff (CA) Daily News (6/11, 20K) reports that the BIA "issued a letter late Monday recognizing four ousted Tribal Council members as legitimate members of the council governing the Paskenta Band of the Nomlaki Indians." According to the article, "Vice Chairman David Swearinger, Treasurer Leslie Lohse, Secretary Geraldine Freeman and member at large Allen Swearinger and members of four families were suspended from the tribe during an April 12 General Council meeting at Rolling Hills Casino, which is operated by the tribe." The letter "comes in the wake of an attempted shutdown early Monday morning of casino operations by a 'Tribal Police' force under the control of the ousted members."

Also covering the story are the AP (6/11) and the Marysville (CA) Appeal-Democrat (6/11, 70K).

CAPAY VALLEY COALITION TO APPEAL TRIBE'S FEE-TO-TRUST APPLICATION. The Woodland (CA) Daily Democrat (6/11, 35K) reports that the BIA has "signed off on the Yocha Dehe Wintun Nation's application to move 853 acres into trust — securing the tribe's ownership and control of the land and eliciting concerns among Capay Valley residents that they will not have a say in how it is used." Representatives from the Capay Valley Coalition, "a nonprofit organization committed to agricultural viability and safety, are appealing the trust, requesting the Board of Indian Appeals overturn the decision."

Top National News:

FOLLOWING ANOTHER SCHOOL SHOOTING, OBAMA SAYS HE IS OPEN TO COMPROMISES ON GUN CONTROL. All three network newscasts led with reports on Tuesday's school shooting in Oregon and President's Obama's response. Nearly all print and online reports on the President's call for a renewed focus on reducing gun violence include analysis suggesting that new Federal gun control regulations are extremely unlikely in the near future.

The AP (6/10, Thomas) reports that on Tuesday in Troutdale, Oregon, "a teen gunman armed with a rifle shot and killed a student Tuesday and injured a teacher before he likely killed himself at a high school." At the opening of NBC Nightly News (6/10, lead story, 4:20, Williams, 7.86M), Brian Williams said, "We begin with the latest word of the latest school shooting in this country," but "before we take you there, we're going to show you the frustration and anger evident in the President's comments late this afternoon when he was asked about the seemingly nonstop string of violent acts inside public facilities, where our children are supposed to be safe."

Following a lead story on the school shooting in Oregon, Scott Pelley, on the CBS Evening News (6/10, story 2, 2:30, Pelley, 5.08M), reported that President Obama "was asked about the shooting." The President was shown saying, "The country has to do some soul-searching about this. This is becoming the norm, and we take it for granted in ways that, as a parent, are terrifying to me, and I am prepared to work with anybody, including responsible sportsmen and gun owners, to craft some solutions. But right now, it's not even possible to get even the mildest restrictions through Congress, and...we should be ashamed of that."

ABC World News (6/10, story 2, 0:55, Muir) also followed up a report on the shooting in Oregon, with an item on the response from the President, who David Muir said was "reacting after learning about this new shooting" when he said, "My biggest frustration so far is the fact that this society has not been willing to take some basic steps to keep guns out of the hands of people who...can do just unbelievable damage."

The New York Times (6/11, Landler, Voo, Subscription Publication, 9.65M) reports that President spoke "in blunt and bitter terms about a bloody trail of shootings in the last month," but "expressed little hope for a change in sentiment, noting that even his push for background checks for would-be gun buyers fell short in the wake of the 2012 schoolhouse slaughter in Newtown." The President is quoted as saying, "The fact that 20 6-year-olds were gunned down in the most violent fashion possible and this town couldn't do anything about it was stunning to me."

The Huffington Post (6/10, Siddiqui, 11.54M) calls the President's remarks "some of his most forceful comments to date on gun violence in America, hours after the country faced its 74th school shooting in the 18 months since the elementary school massacre in Newtown." The Huffington Post notes that while the President "said he respects gun rights," he "lamented the fact that even a modest bill to expand background checks failed to pass in the Senate last year." Likewise, Politico (6/10, Epstein, 637K) reports that the President "said he supports the Second Amendment but still sees a need for tighter rules." According to Politico, the President's remarks "were his most extensive on guns in months."

The AP (6/11) reports that the President "says his biggest frustration so far as president is that American society hasn't been willing to take steps to strengthen gun control." The Oregonian (6/11, Zheng, 992K), covers the President's comments in article titled, "Obama Reacts To School Shootings, Including Oregon's: 'We Should Be Ashamed.'"

The Los Angeles Times (6/11, Lauter, 3.46M) reports that on Tuesday, the President "also brushed aside the argument made by some opponents of new gun regulations that mental illness, not guns, lies at the root of recent shootings," saying, "The United States does not have a monopoly on crazy people," but "'we're the only developed country' that suffers repeated mass shootings."

The Hill (6/10, Sink, 237K) noted that "earlier Tuesday," White House deputy press secretary Josh Earnest "defended Obama, who until speaking at length on the topic Tuesday had fell largely silent on the issue of gun violence," saying, "increasing gun controls was 'a priority of the president's.'" The Hill also reported that on Tuesday, the President said, "Most members of Congress, and I have to admit this is bipartisan, are terrified of the NRA."

However, Politico (6/10, Everett, 637K) reported that on Tuesday, Senate Majority Leader Harry Reid "hinted...that his chamber may vote on the bipartisan gun background checks bill again this year." According to Politico, when "asked whether that means the Senate would take back up the legislation from Sen. Joe Manchin (D-W.Va.) and Pat Toomey (R-Pa.) that failed last year," Reid answered, "I wouldn't be surprised if we have another vote on it."

The Washington Times (6/11, Wolfgang, 455K) notes that the President also "went on to praise" Australia, "a country that had outright banned and imposed a mandatory buyback on almost all long guns, including semi-automatic weapons and shotguns." The President is quoted as saying, "A couple of decades ago Australia had a mass shooting similar to Columbine or Newtown, and Australia just said, 'Well, that's it. We're not doing – we're not seeing that again,' and basically imposed very severe, tough gun laws, and they haven't had a mass shooting since." Neil Munro notes the President's comment on Australia's gun laws in a post for the Daily Caller (6/10, 408K) titled, "Obama Suggests US Needs Ban On Semiautomatic, Automatic Weapons."

The Wall Street Journal (6/11, Sparshott, Epstein, Subscription Publication, 5.51M) covers the President's remarks under the headline, "Obama Calls For 'Soul Searching' On Gun Violence." Reuters (6/11, Holland, Rampton) also has an article on the President's renewed call for a nation debate on gun violence.

In an op-ed for The Oregonian (6/11, 992K), Melinda Ott says, "Sadly, I expect this will follow the same pattern" as in the wake of past school shootings: "people are killed, followed by people fighting each other over guns." Kathleen Parker, in her column for the Washington Post (6/11, 4.22M), says "the sensible case isn't that we need to ban guns, as some reflexively would argue," but, instead, "that we require reasonable scrutiny of those who wish to own guns, especially to conceal-carry, and require serious training of those who possess them."

HOUSE APPROVES VA REFORM MEASURE, SENATE VOTE EXPECTED THIS WEEK. The AP (6/11, Daly, Fram) reports that in response to the national "uproar" over the VA healthcare scandal, Congress "is suddenly moving quickly to address military veterans' long waits for care at VA hospitals." On Tuesday, the House unanimously approved legislation "to make it easier for patients enduring lengthy delays for initial visits to get VA-paid treatment from local doctors instead." The AP notes that both the House measure and a similar measure in the Senate "would spend hundreds of millions of dollars to hire more doctors and nurses, but that may be easier said than done given a nationwide shortage of primary care physicians."

The Washington Post (6/11, Hicks, O'Keefe, 4.22M) reports that lawmakers are "moving uncharacteristically fast" to address the crisis.

The Los Angeles Times (6/11, Simon, 3.46M) notes the House's bipartisan support for the measure and reports that the VA healthcare scandal has united "members of opposing parties in support of swift action to reduce veterans' waits for care and hold VA officials accountable for misrepresenting waiting times."

Reuters (6/11, Lawder) reports that the scandal has embarrassed both the Administration and lawmakers ahead of the mid-term elections, noting that so many House members wanted to be counted as supporting the measure that a second vote was held for those who missed the first one.

Roll Call (6/10, Lesniewski, Subscription Publication, 76K) reported that Senate Minority Leader McConnell on Tuesday criticized a student loan measure set for a test vote on Wednesday, saying the chamber should be moving on the measure negotiated by Sens. Bernie Sanders and John McCain. McConnell said, "We have a bipartisan veterans bill negotiated the way we used to do business in the Senate, with members of both parties, ready to go. It was introduced yesterday. So, I hope we'll not get onto a bill going nowhere and immediately turn to the veterans bipartisan bill and see if we can address that in a bipartisan way very quickly. Maybe even finish it this week." Senate Majority Leader Reid "also thought the VA bill could move ahead quickly," saying, "I hope we can bring it to the floor in the next 24 hours, 48 hours at the most."

Davidson: VA Report Holds Lessons For Other Agencies. In his "Federal Diary" column for the Washington Post (6/11, 4.22M), Joe Davidson writes that the Department of Veterans Affairs report on long waits for veterans seeking healthcare "provides lessons that reach well beyond this one agency." A "major story line in the report looks at why employees provided bogus reports." The Post notes that "unrealistic demands on staffers, perverse incentives for bonuses and pay raises, and top managers whose push for better service backfired," and adds that too many agency employees were "pushed too far" and "lied."

CANTOR LOSES GOP PRIMARY TO CONSERVATIVE CHALLENGER BY 10 POINTS. Most media analyses this morning agree that the key policy implication of House Majority Leader Eric Cantor's 10-point primary loss is the likelihood that there will be no votes on immigration reform measures in the House for the rest of the year, while the political impact will be chiefly felt in the shakeup of the House Republican leadership caused by

Cantor's pending departure, as well as the potential exit of Speaker Boehner following the midterm election.

The New York Times (6/11, A1, Kenny, Subscription Publication, 9.65M) reports on its front page that "in one of the most stunning primary election upsets in congressional history," Cantor "was soundly defeated on Tuesday by a Tea Party-backed economics professor who had hammered him for being insufficiently conservative." Cantor's opponent, Dave Brat, finished with 55.5% of the vote to Cantor's 45.5%. 65,008 Republicans voted in the primary in Virginia's 7th District. According to Roll Call (6/10, Cahn, Subscription Publication, 76K), Cantor "raised \$5.44 million, while Brat raised \$207,000." Roll Call also says Brat is a "clear favorite to win...in November," and notes that Mitt Romney "carried the district by a 15-point margin in 2012."

Appearing on MSNBC's The Rachel Maddow Show (6/11, 548K), NBC's Chuck Todd said that along with Brat, Tuesday's "winner is the people who are fighting major immigration reform." Todd said Brat did not rely on the "professional Tea Party crowd," but instead "tapped into" a "true grassroots movement" opposed to immigration reform, which Todd said "is a much more organic movement inside the Republican base."

The New York Times (6/11, A1, Kenny, Subscription Publication, 9.65M) says Brat cast Cantor as "soft on immigration...contending that he supported what critics call amnesty for immigrants in the country illegally." The Times also notes that Brat had "significant help from conservative talk radio host" Laura Ingraham, but "had little help from national groups that have funded other Tea Party challengers." Ingraham, in an interview with Megyn Kelly on Fox News' The Kelly File (6/11, 1.33M), said, in reference to Cantor, "You can't go to the people claiming that you're going to be tough on immigration enforcement when last year you were touring the country with [Rep.] Luis Gutierrez (D-IL), who is one of the primary movers of immigration reform on Capitol Hill. ... People saw right through that." Ingraham added, "This race, in the end, goes down as one of the most significant repudiations of establishment immigration reform that certainly I've seen in my 20 years of doing politics."

According to a front-page article in the Washington Post (6/11, A1, Kane, 4.22M), "The prospect of a loss seemed to have gone un contemplated" by Cantor, who "spent Tuesday morning at a monthly meeting with large donors and lobbyists at a Capitol Hill Starbucks." Politico (6/10, Hohmann, 637K) notes that just "last Friday, Cantor's campaign distributed an internal poll from John McLaughlin that showed him ahead 34 points over Brat." According to Politico, McLaughlin & Associates "said the margin of error for the May 27-28 survey was only 4.9 percentage points."

The Washington Post (6/11, Balz, Rucker, 4.22M) reports that Scott Reed, identified as "a GOP strategist who oversees political activities for the Chamber of Commerce," says the USCOC "had seen warning signs for Cantor some weeks ago" and "offered help," but "were waved off." The Post also reports that Reed cited Sen. Lindsey Graham's win on Tuesday night and "the absence of tea party groups participating in the Virginia race" in making the case that there is "no tea party wave." Gerald Seib, in his column for the Wall Street Journal (6/11, Subscription Publication, 5.51M), says avoiding Republican incumbent losses at the hands of tea party challengers has been the USCOC's main goal this cycle, but Cantor's loss was unforeseen by them.

Politico (6/10, Kim, 637K) notes that in an interview with Sean Hannity of Fox News after he was declared the winner Tuesday night, Brat "cited immigration as an issue that helped put him over the top." Brat is quoted as saying the debate over immigration enforcement "captures the differences between myself and Eric Cantor in this race, but it also captures that fissure between Main Street and Wall Street." Brat added that Republicans like Cantor who support immigration reform "are doing it for the Chamber of Commerce," which "want[s] cheap labor" even though "that's going to lower wages for everybody else."

The AP (6/11, Suderman) says the win by Brat, "a political novice with little money, marks a huge victory for the tea party movement." According to the AP, Brat successfully "cast" Cantor "as a Washington insider who isn't conservative enough" as "Cantor supporters...met with stiff resistance in trying to wrest control of the state party away from tea party enthusiasts." The AP notes that the American Chemistry Council "spent more than \$300,000 on TV ads promoting Cantor," which was "the group's only independent expenditure so far this election year," while the American College of Radiology, the National Rifle Association and the National Association of Realtors "also spent money on ads to promote Cantor."

The Washington Post (6/11, Costa, Vozella, Fahrenthold, 4.22M) describes Brat's victory as a "stunning upset propelled by tea party activists." The Post says Brat "exposed discontent with Cantor...by attacking the

lawmaker on his votes to raise the debt ceiling and end the government shutdown, as well as his support for some immigration reforms." According to the Post, Cantor "championed a Republican version of the Dream Act, which would enable some undocumented immigrants who entered the country as children to qualify for in-state college tuition rates." Politico (6/10, Hohmann, 637K) notes that in response to Brat's attacks, Cantor "sent fliers that cited a story which called him 'the No. 1 guy standing between the American people and immigration reform.'"

The Los Angeles Times (6/11, Mascaro, Memoli, Barabak, 3.46M) reports that campaign analyst Stuart Rothenberg characterized Cantor's defeat as "stunning" and "unimaginable." Rothenberg is quoted as saying, "This is the grass roots flexing its muscle and reminding members of the Republican leadership – and reminding all Republicans – that this is a very conservative party at the grass-roots and they're angry."

According to the Washington Times (6/11, Sherfinski, 455K), Brat "managed to overcome a tremendous disadvantage in fundraising and name recognition by, among other things, characterizing Mr. Cantor's qualified support for granting legal status to some young illegal immigrants, known as dreamers, as a betrayal of conservative principles." The Times also reports that "Cantor's loss would appear to quash any lingering hope of the Republican-controlled House passing comprehensive immigration reform this year." The Times notes that Cantor recently said, "I have told the president that there are some" aspects of immigration reform that "we can work on together," including "things like the kids."

Under the headline, "Eric Cantor Loss Kills Immigration Reform," Politico (6/10, Kim, 637K) reports that "many top sources close to the issue privately acknowledged...that the already uphill battle for immigration reform was dealt the knockout blow." But Politico also reports that Tuesday's development is "likely to raise pressure from the left on Obama to use executive authority to act on deportations" because "Cantor's stunning loss means there's little Obama can expect from the Hill."

Nate Cohn, in an analysis for the New York Times (6/11, Subscription Publication, 9.65M), notes that "more aggressive [Republican] supporters of immigration legislation," including Speaker Boehner and Sen. Lindsey Graham, "easily won their primaries." But Cohn adds that "regardless of the exact reason for...Cantor's defeat, the news media's focus on immigration is likely to deter Republicans from supporting comprehensive immigration reform." The Wall Street Journal (6/11, Peterson, Hook, Subscription Publication, 5.51M) also reports that it is now very unlikely that there will be a House vote on the comprehensive immigration reform legislation passed by the Senate last year, or any other immigration measures.

However, Politico (6/11, Sherman, 637K) also reports that "minutes after" Cantor conceded defeat, "immigration protestors stormed the ballroom to push for reform." On Fox News' The Kelly File (6/11, 1.33M), Chris Stirewalt, Fox's digital politics editor, predicted that Cantor's loss will spur President Obama "to deliver more quickly on his threat for executive action on immigration." According to Stirewalt, the President "has been threatening all along that if the Republicans did not give what he wanted, which he knew they were never going to do, that he was going to carry through on executive action."

Cantor's Departure Complicates Anticipated Campaign For Speakership Post-Boehner. The Washington Post (6/11, A1, Kane, 4.22M) reports that on Tuesday night, "senior GOP aides were not even sure if Cantor would stay on in leadership as a lame duck for the remainder of his term, or if he would resign immediately and set off a leadership race that would be certain to draw contenders from several ideological wings of the party." According to the Post, House Majority Whip Rep. Kevin McCarthy (R-CA), "worked his relationships with fellow lawmakers so aggressively that some believed Cantor and McCarthy would be elevated to the No. 1 and 2 slots without too much trouble." The Post reports that L. Brent Bozell III, chairman of ForAmerica, "a group that had targeted Cantor throughout the primary," says he will "soon push Rep. Jeb Hensarling (R-Tex.) to challenge Boehner or run for majority leader, believing that the conservative Texan and chairman of the House Financial Services Committee could use Cantor's defeat to climb the ladder."

According to Politico (6/10, French, Bresnahan, 637K), McCarthy "is all but certain to run for the majority leader post, GOP sources said," and "will likely be challenged by a member of the conservative wing of the House GOP Conference, potentially including" Hensarling, Rep. Jim Jordan (R-OH) and Rep. Cathy McMoris Rodgers (R-WA). Politico adds that "a full-scale war will break out for Majority Whip, with Scalise, McMoris Rodgers and Reps. Pete Roskam (R-Ill.) and Pete Sessions (R-Texas) all possibilities for that post."

The New York Times (6/11, A1, Weisman, Steinhauer, Subscription Publication, 9.65M) reports that "conservatives who have helped fuel some of the most contentious showdowns over the last three years now see potential spoils," including Rep. Steve Scalise (R-LA), who the Times says "has been laying the groundwork for the last several weeks to slide into an open slot should Mr. Boehner have decided to retire and, it was assumed, Mr. Cantor take his spot." The Hill (6/10, Berman, 237K) reports that Reps. Raúl Labrador (R-ID) and Matt Salmon (R-AZ) both "told reporters Tuesday that they didn't believe Boehner would seek another term after the November midterm elections."

The Wall Street Journal (6/11, Peterson, Hook, Subscription Publication, 5.51M) also reports that Boehner is widely expected to step down as Speaker soon. The Journal says that with Cantor out of the House, the race to succeed Boehner will now likely feature multiple candidates. USA Today (6/11, Cantor, 5.82M) notes that Cantor is "the only Jewish Republican" in the House, and was "widely viewed as the likeliest contender to become the next House speaker." McClatchy (6/11, Lightman, Subscription Publication, 23K) says Cantor "was once viewed as the leader of the House of Representatives' more conservative faction, but had softened over the past few years."

Pete King: Cantor's Defeat Will "Marginalize Us Further As A National Party." In a front-page analysis titled, "Cantor's Loss A Bad Omen For Moderates," the New York Times (6/11, A1, Weisman, Steinhauer, Subscription Publication, 9.65M) reports that Rep. Peter King (R-NY) said, "The results tonight will move the party further to the right, which will marginalize us further as a national party."

Editorial Wrap-Up:

NEW YORK TIMES. "Student Borrowers And The Economy." The New York Times (6/11, Editorial for the New York (NY), Times, Subscription Publication, 9.65M), in an editorial, says the President "took an important step...when he signed an executive order providing relief to millions of struggling student loan borrowers and urged Congress to pass a student loan refinancing bill that is scheduled for a vote in the Senate on Wednesday." The Times says the legislation is almost certainly doomed in the House but adds that "by bringing the matter to a vote, Senate Democrats underscore the need to do something about dire indebtedness among recent graduates, and also give members of their party a potent issue on which to run in the midterm elections."

"Clauses That Hurt Workers." The New York Times (6/11, Subscription Publication, 9.65M) editorializes that more employers are requiring noncompete agreements, under which employees "agree not to work for a competitor for a year or two after they leave." Although such agreements are standard for executives and other top employees, the Times notes that "some employers are unfairly imposing that requirement on all kinds of workers, including lower-wage employees like camp counselors, interns and yoga instructors." The Times argues that the "indiscriminate use of such noncompete clauses hurts workers by limiting their ability to seek better jobs in their chosen professions." The Times adds that some employees "may not even realize they are agreeing to such conditions because the clauses are tucked deep inside employment documents." Lawmakers in some states, like California and North Dakota, "have realized the problems" and do not enforce such clauses, "while other states give courts discretion to determine if such clauses are 'reasonable.'"

"Who Ordered Politkovskaya's Murder?" The New York Times (6/11, Subscription Publication, 9.65M) editorializes the conviction of five men of the murder of Russian journalist Anna Politkovskaya "signal[s] some progress in Russia's glacial investigations of the murder, but the case is still not closed," because the country must still find and prosecute the person who ordered the killing. The Times says solving this case "is crucial to instilling any faith that Russia can follow the rule of law."

WASHINGTON POST. "Misrule Of Law In Russia." The Washington Post (6/11, 4.22M) editorializes that under President Vladimir Putin, Russia has "not achieved the simple standard of a rule-of-law state," which is to ensure that "no one...not even the president and his Kremlin pals, is above the law." The Post says that while "Russia has adopted new laws" as it emerged from the Soviet Union, "the missing element is enforcement."

"A Lesson On Acceptance." The Washington Post (6/11, 4.22M) editorializes about a counter-protest by students at Washington, DC's Wilson High School, where members of the anti-gay Westboro Baptist Church

picketed the school's second annual gay pride day. The event "garnered widespread national attention when the school's principal, 50-year-old Pete Cahall, made an emotional announcement that he is gay." The Post notes that Cahall's "forthright courage and the unhesitating acceptance of his announcement by the Wilson school community set the template for Monday, when students mounted a rally to counter the Westboro demonstration." The event "attracted hundreds of people – alumni, parents, elected officials, supporters from neighboring schools – in a wonderful demonstration of community."

WALL STREET JOURNAL. "The Fall Of Mosul." The Wall Street Journal (6/11, Subscription Publication, 5.51M), in an editorial, makes the case that President Obama deserves blame for the fall of Mosul because he made getting US troops out of Iraq a priority and did not adequately ensure that Iraq would not be vulnerable to the kind of insurgency that it is currently facing.

"A School Reform Landmark." The Wall Street Journal (6/11, Subscription Publication, 5.51M) editorializes that Los Angeles County Superior Court judge Rolf Treu was correct in ruling that California's tenure protection for public schoolteachers is unconstitutional and argues that the case provides disadvantaged students an opportunity to seek protection of their rights from the judicial system.

"Firepower For The Fed." In an editorial, the Wall Street Journal (6/11, Subscription Publication, 5.51M) hails the Senate's decision to limit debate on three Fed nominees, calling it necessary to give the Fed more policy-making strength. The Journal approves of all three nominees, saying that vice chair nominee Stanley Fischer is one of the President's better choices (though the paper does not agree with all of his positions).

CONTACT: Jamie Serlin at 202-224-5042 or Jamie_Serlin@coons.senate.gov Location: The Mayflower Renaissance, 1127 Connecticut Avenue, NW.

Last Laughs:

LATE NIGHT POLITICAL HUMOR.

Jimmy Fallon: “I saw that President Obama’s youngest daughter, Sasha, turned 13 years old today. Happy birthday, Sasha. Of course, that means that now he has two teenage daughters. But thanks to Congress, he’s used to people ignoring him.”

Seth Meyers: “President Obama surprised tourists by walking through a Starbucks near the White House. Even more surprising, he traded five Taliban members for a grande soy latte.”

Seth Meyers: “Sarah Palin is using an excerpt from Hillary Clinton’s new book to claim that Democrats started a war on women. That shocking story again. Sarah Palin read a book.”

David Letterman: “President Obama went for a walk and went to a Starbucks. So I’m thinking, if this guy can have coffee at Starbucks, the economy must be improving. Right, if you can afford that kind of thing there?”

DOI in the News:

PANEL HOLDS FIRST MEETING ON IDENTIFYING LGBT HISTORIC SITES. The [Washington Blade](#) (6/11, 89K) reports that on Tuesday, "about 20 scholars working" on an initiative to identify possible designation as LGBT historic sites met at the Interior Department "in D.C. to discuss the way forward with the initiative in anticipation of completing the work by 2016." After the meeting, "four high-profile speakers and five of the scholars described and fielded questions about the contours of the study in a public panel discussion moderated by National Park Service Director Jonathan Jarvis." In her remarks preceding the panel, Interior Secretary Sally Jewell discussed "the need to expand the list of historic LGBT sites beyond the East Coast." She said, "That's one thing lacking for the LGBT community: We have not yet identified any of the places where we can tell the stories that help us understand who everyone is as Americans within this community."

Also covering the initiative is [KCET-TV](#) Los Angeles (6/12, 15K).

RECORD SHOWS SECURITY FLAW THAT EXPOSED INTERIOR TO POSSIBLE CYBERATTACK. The [Washington Times](#) (6/12, Mcelhatton, 455K) reports that the Interior Department "left itself vulnerable to a cyberattack and unwittingly granted people off the street outside of its headquarters access to a guest wireless network — a security flaw flagged only when an unknown user was detected engaging in sexually explicit online

chats with a child," records The Washington Times obtained through the Freedom of Information Act show. According to the article, "officials also brushed aside security concerns raised by information technology employees, who tried to warn officials about the risks of a free open wireless network in and around the Cabinet agency's headquarters." The article notes that "one glaring problem at the Interior Department was that officials didn't know the wireless signal was leaking outside of intended areas, and they never checked to find out whether they could access the Internet from outside the building."

WESTERN GOVERNORS' ASSOCIATION PONDERES WATER ISSUES. The Pueblo Chieftain (6/12, 94K) reports that the Western Governors' Association on Tuesday considered whether Nevada's water history is "the future for other Western states." The article notes that "the other states represented at the convention are at different points on the same path, sharing the common themes of conservation, more storage and finding new ways to capture more water." According to Assistant Secretary of the Interior Mike Connor, "while storage in Lake Mead has increased by 1 million acre-feet in the past 10 years, the chance is increasing for new shortfalls in the next three years." He said, "it's not going to get us out of this drought situation any time soon."

WESTERN GOVERNORS SEE SLIM CHANCES OF ACQUIRING FEDERAL TRACTS. The E&E Daily (6/11) reports that Western governors "conceded" on Tuesday that "it's unlikely the United States will turn over federal lands to the states, a move some Westerners would oppose anyway according to one Democratic governor." The article notes that "governors from Colorado, Wyoming, Nevada and Utah spoke to the issue during the Western Governors' Association's annual meeting here at the Broadmoor resort." Colorado Gov. John Hickenlooper said, "I don't see the federal government unloading a lot of acres in the near term. There's such a strong sense across the country that many of these lands belong to all the American people."

SENATE REPUBLICANS URGE SEN. LANDRIEU TO FOCUS ON WILDFIRES, AGENCY BUDGETS. The E&E Daily (6/11) reports that Senate Energy and Natural Resources Committee Republicans urged Chairwoman Mary Landrieu "to bolster oversight of wildfires and public land management by scheduling budget hearings for the Interior Department and Forest Service." A letter "spearheaded by Sen. Dean Heller of Nevada warns that this year's wildfire season is projected to be severe and that the ENR Committee needs to review the agencies' funding structure for suppression and prevention."

Also covering the story is The Hill (6/12, Barron-Lopez, 237K).

AGRICULTURE SECRETARY VILSACK HAS NO PLANS TO VISIT POTENTIAL IDAHO SITE. The E&E Daily (6/11) reports that Agriculture Secretary Tom Vilsack has "no immediate plans to visit Idaho to discuss a potential national monument protecting the Boulder and White Cloud mountains, but advocates on both sides of the issue have traveled to Washington, D.C., to discuss the proposal, a top department official said this week." Undersecretary for Natural Resources and Environment Robert Bonnie said "there's 'a lot of interest' in designating a Boulder-White Clouds national monument in central Idaho but that the Obama administration is committed to engaging the public before signing off on anything."

HOUSE PANEL CONSIDERS FOUR BILLS ON WESTERN WATER PROJECTS. The E&E Daily (6/11) reports that "four bills dealing with local Western water issues appear poised for advancement after consideration by a House panel yesterday." The article notes that "the measures are all supported by the Obama administration and would carry little if any cost." Notably, Tom Iseman, deputy assistant secretary of the Interior Department for water and science, said the department supports H.R. 4166, which would transfer the management of Lake Berryessa from the BOR to the BLM, "if it includes a few tweaks related to authorities and site conditions."

MID-ATLANTIC COASTAL RESILIENCY INSTITUTE TO RESEARCH CLIMATE CHANGE. The Delmarva (MD) Daily Times (6/11, 26K) reports that nine institutions, including the FWS and the USGS, are "joining forces in a partnership dedicated to climate change research on the mid-Atlantic coast." The objective is "to help local and regional leaders make coastal communities more resilient in the face of climate change by providing science and research to inform public policy."

PARK RANGER HONORED WITH VALOR AWARD. The Mattoon (IL) Journal Gazette & Times Courier (6/12, 36K) reports that Park Ranger Peter Maggio has received a Valor Award from the Interior Department "for saving a man's life at Mount Rainier National Park in Washington state." On May 9, Maggio was honored during the Department of the Interior's 69th Honor Awards Convocation in Washington. Interior Secretary Sally Jewell

presented the awards.

SENATORS REVIVE BID TO MAKE BISON THE NATIONAL MAMMAL. The [E&E Daily](#) (6/11) reports that a bipartisan group of senators on Wednesday "introduced a measure that would make the bison the national mammal of the United States." Sen. Tim Johnson said, "The bison has played an important role in our nation's history, holds spiritual significance to Native American cultures, and remains one of our most iconic and enduring symbols. Bison production has also become an important agricultural endeavor in South Dakota and throughout the country as demand continues to grow. By adopting the North American bison as our national mammal, the National Bison Legacy Act recognizes their historical, cultural, ecological, and economic significance."

SIERRA CLUB REPRESENTATIVE SHARES TEN WAYS TO CELEBRATE GREAT OUTDOORS MONTH. For "The Blog" of the [Huffington Post](#) (6/12, Ostfeld, 11.54M), Jackie Ostfeld, Director, Nearby Nature at the Sierra Club, writes that June is Great Outdoors Month, which presents an opportunity to "kick Nature-Deficit Disorder to the curb." Ostfeld shares "ten ways to get outside and celebrate the outdoors this month."

America's Great Outdoors:

National Park Service:

DRAKES BAY OYSTER COMPANY DISPUTE DIVIDES CHEFS AND ENVIRONMENTALISTS. NPR (6/12, Gonzales, 519K) reports that the Drakes Bay Oyster Company's fight to stay open is "dividing the residents of western Marin County." Local and national environmental groups argue that "it's time for the oyster company to leave." However, "some local food advocates such as celebrated chef Alice Waters," have come to the company's defense. Waters "signed onto a brief filed in the court earlier this year because she supports cooking 'based on the finest and freshest seasonal ingredients that are produced sustainably and locally, such as shellfish from Drake's Bay Oyster Farm.'"

SMOKING BANNED AT CAPE COD NATIONAL SEASHORE. The [AP](#) (6/12) reports that "smoking has been banned at the some of the most popular beaches at the Cape Cod National Seashore." According to Superintendent George Price, "smoking will be prohibited at all six of the park's guarded beaches beginning June 19." Price said that secondhand cigarette smoke "ruins the experience" of non-smokers at the beach.

WAR VETERANS BATTLING PYTHONS IN FLORIDA EVERGLADES. [ABC News](#) (6/12, 3.58M) reports that war veterans are battling lethal Burmese pythons in the Florida Everglades. According to park spokesperson Linda Friar, "while Everglades National Park does not permit hunting, it has authorized some 30 agents—mostly private individuals—to find and capture pythons."

YELLOWSTONE NATIONAL PARK VISITS INCREASE. The [Billings \(MT\) Gazette](#) (6/12, 174K) reports that "visitation to Yellowstone National Park for the month of May and for the first five months of 2014 is up almost 6 percent compared to the previous year." The article notes that "there were 310,039 recreational visitors to Yellowstone in May and a total of 415,185 for the first five months of 2014."

YELLOWSTONE NATIONAL PARK VISITOR KILLED BY FALLING TREE. The [E&E Daily](#) (6/11) reports that "a falling tree killed a Taiwanese tourist Monday in a windy Yellowstone National Park." According to park officials, "the 36-year-old man was hiking and then left Fairy Falls Trail, an established trail north of Old Faithful." Yellowstone rangers who "responded to the scene reported windy conditions." The article notes that "the tree was one of those scorched and killed in the fires that burned through the park in 1988."

Bureau of Land Management:

BLM DIRECTOR KORNZE Visits Cañon City's Wild Horse Inmate Program. The [Canon City \(CO\) Daily Record](#) (6/12, 22K) reports that BLM Director Neil Kornze "visited the Wild Horse Inmate Program on Wednesday at the East Cañon Correctional Complex during a visit to Colorado." Kornze "got a first-hand look at the WHIP, along with BLM Deputy Director Steve Ellis, Colorado Department of Corrections Executive Director Rick Raemisch, Agribusiness Manager Jim Heaston and other DOC officials." Kornze said, "This is our flagship operation in terms of our partnership between the state and the Bureau of Land Management. There is a huge

value added here."

NEVADA GOV. SANDOVAL: BUNDY "SHOULD PAY". The E&E Daily (6/11) reports that the BLM isn't "going to let Nevada rancher Cliven Bundy off the hook for allowing his hundreds of cattle to trespass on federal lands," Nevada Gov. Brian Sandoval said on Tuesday. Sandoval said, "I don't think they're going to let this blow over. BLM has the ability to seek redress for that. How they do that is up to them." Sandoval added, "Undoubtedly he owes the money. He hasn't paid and he should pay."

BLM PLANS TO PRIORITIZE PROTECTING SAGE GROUSE HABITAT WHEN BATTLING BLAZES. The E&E Daily (6/11) reports that a senior Interior Department official told Western governors on Wednesday that the BLM "plans to instruct agency firefighters to make protecting greater sage grouse habitat a priority when battling wildfires on federal lands." Janice Schneider, an Interior assistant secretary for lands and minerals management, "told governors during a panel discussion at the Western Governors' Association annual meeting that working to prevent increasingly frequent wildfires from destroying key sage grouse habitat is a critical component to preventing the bird from being listed under the Endangered Species Act." Schneider said that the BLM "should issue the instruction memorandum (IM) to its field offices by the end of this month and that part of the effort will be for the agency to coordinate with the states within the bird's 11-state range to have firefighting resources available near core grouse habitat when a fire breaks out."

BLM CONSIDERING SHUTTING DOWN GIANT ROPE SWINGS AFTER LAND SWAP. The E&E Daily (6/11) reports that the BLM is "considering closing what some have called the world's largest rope swing, located on newly acquired federal land in Utah." Corona Arch, "a natural sandstone formation more than 100 feet tall, was part of a 60,000-acre swap with Utah completed May 8 that exchanged scenic state-owned sections for BLM land with energy production potential." According to the article, "a YouTube video in 2012 made Corona a rope-swinging destination, but then two young men in separate incidents hit the ground while trying to swing with too-long ropes." The incidents led BLM to "start an environmental assessment to study the impacts of restricting roped activities in the area."

Also reporting on the story is the AP (6/12, Knox).

BLM ORGANIZES KING FISHER POND FIELD TRIP TO FOSTER DISCUSSION OF RESOURCE MANAGEMENT PLAN. The Willcox (AZ) Range News (6/12, 12K) reports that on May 9, when the BLM "took a group of interested residents and agency representatives participating in the development of the bureau's new Resource Management Plan" to King Fisher Pond, "it appeared healthy and the few bird watchers who followed the group down were pleased to see many of the birds — woodpeckers, scarlet tanagers, numerous warblers and waders — flying about catching bugs and tiny fish." David McIntyre, the BLM coordinator for the RMP, noted that "the public meetings about the new plan have been very successful, well-attended and produced positive results."

Fish and Wildlife Service:

GOVERNORS URGE INTERIOR TO LET STATES LEAD ON SAGE GROUSE. The E&E Daily (6/11) reports that "a bipartisan group of Western governors warned that a formal endangered listing for the greater sage grouse could prompt state leaders and landowners across the bird's range to stop working with federal regulators on measures to recover the grouse and other species under threat of extinction." The governors "cautioned" during a Western Governors' Association round table discussion on Tuesday that "state and private landowners are waiting to see whether the Fish and Wildlife Service honors state and local efforts to conserve the grouse and its dwindling sagebrush steppe habitat." The FWS "must decide whether to propose listing the bird as threatened or endangered by September 2015."

States Urged To Follow Wyoming's Strategy In Balancing Energy And Sage-grouse. For the "Congress Blog" of The Hill (6/12, Tawney, 237K), Land Tawney, executive director of Backcountry Hunters and Anglers, writes that "states throughout the American West, which enjoy many similar wildlife and energy resources as Wyoming, must pursue the approach that Wyoming has developed to conserve the greater sage-grouse— and, in so doing, enhance large swaths of sage brush habitat elk, mule deer, pronghorn antelope and a host of other wildlife species depend on." According to Tawney, "utilizing proactive strategies and stakeholder involvement throughout, Wyoming has managed to remain second only to Texas in energy production, while simultaneously

reducing the amount of land leased for oil and gas drilling within core sage-grouse habitat." He notes that "Wyoming's plan calls for protections in scientifically identified 'core' habitat areas, providing flexibility for preexisting uses and certainty to the oil and gas industry about where development can take place."

WESTERN GOVERNORS SEEK DEFERENCE, FUNDING FROM FEDERAL GOVERNMENT TO AVERT LISTINGS.

The E&E Daily (6/11) reports that the Western Governors' Association on Wednesday "adopted a new resolution calling on the federal government to give maximum deference to state conservation efforts and to prioritize funding to avoid new Endangered Species Act listings." The article notes that "while the resolution made only a few references to the greater sage grouse, its target in large part was the Fish and Wildlife Service's court-ordered September 2015 deadline to decide whether to list the iconic bird that roams 11 Western states." While "it did not explicitly endorse delaying" the FWS' "listing deadline – as some wildlife advocates had feared – it did support legislation or legal or regulatory steps that would allow federal, state and local conservation efforts 'adequate time' to be rolled out and be proved effective."

HOUSE REPUBLICANS WANTS COMMENT PERIOD EXTENDED ON PROPOSED ESA CHANGES.

The E&E Daily (6/11) reports that "more than 40 House Republicans want the Obama administration to extend the public comment period for proposed regulations that would make significant updates to the Endangered Species Act." House Natural Resources Chairman Doc Hastings "led the effort, which seeks a six-month extension to a comment period set to end July 11." In a letter to FWS Director Dan Ashe and NOAA Administrator Kathryn Sullivan, "the lawmakers asserted that the rules 'could dramatically increase the amount of private and public lands designated for habitat' and thus block or delay agricultural and energy projects."

ARKANSAS DELEGATION CONCERNED OVER BAT DESIGNATION.

The AP (6/12) reports that Arkansas' four House members have written to Interior Secretary Sally Jewell and the FWS "about their concerns with a proposal to classify the Northern Long-Eared bat as an endangered species." The letter from Congressmen Rick Crawford, Tim Griffin, Steve Womack, and Tom Cotton says "they are troubled because listing the bat as endangered would eliminate forest harvesting in Arkansas from April through November." They also say "the listing could negatively affect farming, energy development, and manufacturing in Arkansas." The letter requests "a six-month extension of the comment period to further consider scientific data."

WYOMING OPPOSES EXTENDING PROTECTION TO WOLVERINE .

The Jackson Hole (WY) News & Guide (6/12, 1K) reports that Wyoming officials "have again told" the FWS that that "they oppose extending federal protection to the wolverine." In a comment letter submitted to the agency last month, Gov. Matt Mead "explained Wyoming's position on the matter." Mead also "extended the doubt he frequently casts on the phenomenon of climate change to its potential impacts on wolverines."

CONSERVATION GROUPS WANT INTERIOR TO ACT ON CANADIAN OIL SANDS BIRD DEATHS.

Politico (6/11, Guillén, 637K) reports that "Canada's oil sands operations have killed thousands of birds and are putting more at risk, according to a brief out today from the National Wildlife Federation and other groups." The groups claim the Interior Department has "a legal obligation to sound the alarm 'when a country is violating international obligations to safeguard wildlife.'" The report adds: "Interior Secretary Jewell should officially declare to the President that Canada is failing to protect wildlife under international treaties, and the President should take actions necessary to ensure protection occurs, including possible sanctions."

AGENCIES LOOKING AT DAMAGES FROM GALVESTON BAY OIL SPILL.

The AP (6/12) reports that "federal and state agencies have started looking at natural resource damage in an effort to come up with a dollar estimate from a March barge and cargo ship collision in the Houston Ship Channel that dumped thousands of gallons of oil into Galveston Bay." Chip Wood, a FWS biologist, said, "You've got all kinds of different wildlife that could be impacted. You've got marshes, you've got sand beach, you've got recreational issues, so it's quite an extensive evaluation." According to Wood, "the assessment could take years and will include developing of a plan to restore damaged areas, putting the plan in place and getting the party responsible for the damage to pay for it."

FWS CREWS TO SEARCH FOR LAMPREYS IN PORTAGE RIVER.

The Sandusky (OH) Register (6/12, 82K) reports that FWS crews will attempt to find lampreys in the Portage River "throughout Ottawa and Sandusky counties between June 18 and 25." FWS spokesman Mike Twohey said, "Sea lamprey invaded the Great Lakes during the 1920s and have been a permanent, destructive element of the fishery ever since."

FWS PLANS PUBLIC HEARINGS ON SELKIRK CARIBOU. The Newport (WA) Miner (6/12) reports that the FWS will “hold two open houses, followed by public hearings in Sandpoint and Bonners Ferry, Wednesday, June 25 and Thursday, June 26, to listen to public comment on the listing classification of the Selkirk caribou.”

GREAT SWAMP NATIONAL WILDLIFE REFUGE CELEBRATING ANNIVERSARY YEAR. In an op-ed for the Hillsborough (NJ) Beacon (6/11, 13K), Michele Byers is executive director of the New Jersey Conservation Foundation, writes that the Great Swamp National Wildlife Refuge is “celebrating a big anniversary year — and bidding farewell to longtime manager Bill Koch, who just retired after 34 years in the Great Swamp.” Steve Henry, acting refuge manager, said, “We’re calling this our 50-50-15 celebration. It’s the 50th anniversary of the dedication of the refuge, the 50th anniversary of the Wilderness Act and the 15th anniversary of our Friends group. We’ve got a lot in the hopper.”

US Geological Survey:

HOUSE PANEL DISCUSSES EARTHQUAKE EARLY ALERT SYSTEM. The E&E Daily (6/11) reports that Chairman Doug Lamborn and Democrats on the Subcommittee on Energy and Mineral Resources, “differed over who’s to blame, but agreed that Congress must find the money to pay for a system that could save lives up and down the West Coast as the threat of a large-scale quake looms large.” The article notes that “federal support has also fallen short, prompting Lamborn to direct his ire at USGS and the Obama administration.”

Securing America’s Energy Future:

Renewable Energy:

GREEN GOAL OF REDUCING FOSSIL FUEL USE SEEN AS UNREALISTIC. In an op-ed for the Wall Street Journal (6/12, Bryce, Subscription Publication, 5.51M), Robert Bryce, a senior fellow at the Manhattan Institute, writes that environmentalists, including Bill McKibben, argue for a radical reduction in fossil fuel use. However, Bryce argues that the world would have to install shocking amounts of wind turbines and solar panels every years to hit those goals.

Onshore Energy Development:

BLM SEEKS INPUT ON PROPOSED NATURAL GAS WELLS IN EASTERN UTAH. KCSG-TV St. George, UT (6/12, 43) reports that the BLM Utah Vernal Field Office is “seeking public comment on an Environmental Assessment (EA) analyzing Koch Exploration Company’s proposal to drill up to 135 wells on up to 37 existing well pads in an area approximately 40 miles southwest of Vernal, Utah.”

OHIO AMONG STATES EXAMINING LINK BETWEEN DRILLING, SEISMIC ACTIVITY. The AP (6/12, Smyth, 455K) reports that Ohio is among the states investigating a potential link between drilling and seismic activity. Ohio Oil & Gas Chief Rick Simmers said state regulators are looking for “up-to-date information so they can develop appropriate detection procedures” and regulations. Last month Ohio, Texas, and Oklahoma were among the 12 states that attended the first meeting of the State Induce Seismicity Work Group Members. He said a second meeting was planned this week.

Offshore Energy Development:

BSEE DIRECTOR SALERNO COMMENTS ON ARCTIC EXPLORATION AT CAPITOL HILL OCEANS WEEK EVENT. The Hill (6/12, Barron-lopez, Cama, 237K) reports that BSEE Director Brian Salerno “commented on the complexity of operating, and setting rules for companies exploring oil and gas in the Arctic Wednesday.” At the Capitol Hill Oceans Week event, Salerno said, “When you think about what it takes to operate there the challenges are extraordinary.” Salerno added that the bureau is “working with industry to make sure they know what the expectations are.”

GULF STATE BLOCKING APPROVAL OF \$627 MILLION IN BP OIL SPILL RESTORATION WORK. The New Orleans Times-Picayune (6/12, 678K) reports that “one of five Gulf Coast states that serve as trustees in

assessing natural resource damages in the aftermath of the BP Deepwater Horizon oil spill is blocking the release of \$627 million that BP has set aside for a third phase of early restoration projects, according to a senior Louisiana official." Kyle Graham, executive director of the state Coastal Protection and Restoration Authority, said, "We have hit a snag in finalizing the Phase III Early Restoration Plan. One of the state trustees has expressed an unwillingness to proceed. We are investigating solutions. Hope to have things resolved soon." Graham said "Louisiana is not the state blocking action on the plan."

BSEE RESPONDS TO EQUIPMENT FAILURE ON GULF OF MEXICO DRILLING RIG. The Maritime Executive (6/12, 21) reports that the BSEE is "responding to an equipment failure on board the Deepwater Nautilus semisubmersible drilling rig in the Gulf of Mexico, approximately 100 miles south of Fourchon, La." According to the article, "the offshore oil and gas operator, Shell Offshore Inc., reported that on June 9 during well operations, the rig's traveling block fell." BSEE "engineers and inspectors have been discussing the on-going response with Shell and will travel offshore to the rig to investigate as soon as weather allows."

Tackling America's Water Challenges:

BOR SUED OVER WATER TRANSFERS. The Central Valley (CA) Business Times (6/12, 206) reports that the BOR is "being sued by two environmental groups over what they say are the bureau's inadequate disclosure, avoidance of impacts, and mitigation of major water transfers from the Sacramento Valley through the Delta to the San Joaquin Valley." The lawsuit by AquAlliance and the California Sportfishing Protection Alliance, asks US District Court to declare that the BOR's Environmental Assessment and Finding of No Significant Impact was "arbitrary and capricious, ignored relevant new information and failed to meet minimum requirements of the National Environmental Policy Act." The groups say "Delta flow and water quality standards have been weakened six times in less than 90 days and state and federal agencies are grossly overestimating actual Delta outflows."

Also reporting on the story is the Oroville (CA) Mercury-Register (6/12, 1K).

LAKE POWELL RISING STEADILY. The AP (6/12) reports that Lake Powell in northern Arizona is "steadily rising, opening up access for bigger boats to popular tourist spots in spring." The BOR says "the water levels are expected to rise one foot per day through June, bringing the lake up to 40 feet higher than its lowest point this year."

Empowering Native American Communities:

COEUR D'ALENE TRIBE SEEKS LAND BUYBACKS. The Coeur d'Alene (ID) Press (6/12, 63K) reports that the Coeur d'Alene Tribe is "seeking tribal members who own land on the reservation and are willing to sell their ownership interests." The tribe was awarded \$4.1 million from the Interior Department to make such purchases. The article notes that "the appraisal process, being conducted by the Office of Appraisal Services within the DOI, is expected to be completed by Aug. 1," but "the Tribe has already begun reaching out to landowners."

Also covering the story is the Nation Sun News (6/12).

SAULT STE. MARIE TRIBE OF CHIPPEWA INDIANS SEEKS LAND FOR GAMBLING. The AP (6/12) reports that the Sault Ste. Marie Tribe of Chippewa Indians announced Wednesday that "it's seeking land in Lansing and near Detroit Metropolitan Airport to build gambling facilities." The tribe said it filed applications Tuesday with the Interior Department to take the land into trust.

Also reporting on the story are the Detroit News (6/12, Watson, 643K), the Detroit Free Press (6/12, Vanhulle, 1.02M) and the Lansing (MI) State Journal (6/11, 164K).

BIA, FBI INVESTIGATING SHOOTING ON UINTAH-OURAY INDIAN RESERVATION. The AP (6/12) reports that "a Utah man is dead and two teenage boys have been wounded in a shooting on the Uintah-Ouray Indian Reservation in northeastern Utah." The BIA and the FBI are investigating.

SEX OFFENDER ADDRESSES VERIFIED ON WIND RIVER RESERVATION. The Casper (WY) Star-Tribune (6/12, 90K) reports that "every sex offender on the Wind River Indian Reservation required to register under the

Sex Offender Registration and Notification Act was located and had their address verified by the US District Attorney's office last week." The initiative, "called Operation Jessica, was conducted by the Wind River Sex Offender Registration Office, the US Marshal's Service and the Bureau of Indian Affairs."

Top National News:

OBAMA PRAISES REVIVAL OF WORCESTER TECHNICAL HIGH SCHOOL IN COMMENCEMENT ADDRESS.

President Obama's commencement address at Worcester Technical High School in Massachusetts receives light but positive coverage, much of it focusing on the school's emergence as a leading institution after poor performance in the past. The President's speech was mostly apolitical, focusing on the achievements of both the school and its graduates, but Obama did respond to boos over the defeat of a Senate student loan bill by urging the audience to vote.

The AP (6/12, Kuhnhen) reports President Obama highlighted the "revitalized New England technical school...as a model for the United States in an increasingly competitive global workforce." The President "praised students and teachers alike for giving more than just 'lip service' to the idea of skills-based education." The school was one of five in the nation "to win an award for student growth in high poverty areas" two years ago, and was named a Blue Ribbon School by the Education Department last year.

The Washington Post (6/12, Zezima, 4.22M) reported in its "Post Politics" blog that the President urged graduates "to give back," but also "had another motive" for the visit. Referring to his daughter Malia's high school graduation two years from now, Obama said, "Part of the reason I am here is because I have to practice. ... I have to get use to not choking up and crying and embarrassing her."

The Worcester (MA) Telegram & Gazette (6/12, Foskett, 208K) reports that Obama said Education Secretary Duncan told him that Worcester Tech was "an open place. He said Mr. Duncan noted that neighborhood residents can get their cars detailed at the school at a fraction of the going rate, and said a teacher told him the school's hair salon was the city's best kept secret." The President responded to some boos in the audience regarding the Wednesday defeat of a student loan bill due to Republican opposition by saying, "Don't boo, just remember to vote."

Worcester (MA) Magazine (6/11, Bird) reported on its website that the President also singled out businessman Ted Coghlin, "whose efforts were largely responsible" for getting the school built. Obama said, "Before long, Worcester Tech was on its way to becoming one of the best schools in the city. Now, the waiting list is more than 400 names long. ... Our students deserve the best so we can help them become the best so we can help them become the best for their future and ours."

CNN (6/11, Kastenbaum, 12.15M) reported on its website that eight years ago, the school was one of the lowest performing in Massachusetts, but it is now among the top high schools in the state. The President told the students that at the school, "they acquired the skills needed 'to fix America.'" CBS News (6/11, Miller, 5.21M) also reported on the visit on its website.

FOLLOWING CANTOR LOSS, OBAMA REITERATES: "WE NEED TO GET IMMIGRATION REFORM DONE."

Politico (6/12, Epstein, 637K) reported that on Wednesday, at a Democratic Senatorial Campaign Committee fundraiser in Massachusetts, President Obama "did not refer to" House Majority Leader Cantor "by name," but "call[ed] Tuesday's vote in Virginia's 7th Congressional District 'an interesting election.'" Politico says the President acknowledged that "pundits and the analysts and some of the conventional wisdom talks about how the politics of immigration reform seem impossible now." However, the President added, "I fundamentally reject that. I will tell the speaker of the House that he needs to reject that."

The Hill (6/12, Pames, 237K) quoted the President as saying, "At a certain point issues are important enough to fight for. My argument about yesterday's election is not that there was too little politics – there was too little conviction about what was right. We need to get immigration reform done."

However, according to Bloomberg News (6/12, Allen, 2.76M), "Many lawmakers and political analysts said Cantor's loss will kill any chance that Republicans...will act on immigration legislation." Likewise, under the

headline "Cantor Loss Squashes Hope For Immigration Bill," USA Today (6/11, Gomez, 5.82M) says "judging from the reaction Wednesday to [Cantor's] loss, it's getting a lot easier to declare that Congress isn't going to pass an immigration bill." According to USA Today, "Even the most ardent immigration activists struggled to refute the idea that Cantor's loss makes it nearly impossible to squeeze an immigration bill through the Republican-led chamber."

Jonathan Martin, in a front-page analysis for the New York Times (6/12, A1, Martin, Subscription Publication, 9.65M) titled "After Upset, G.O.P. Fears Infighting Will Take a Toll," says, "Even as party officials debated how significant a factor immigration was in the GOP primary on Tuesday, 'the fear that addressing it could alienate the party base may prevent any action on immigration legislation in the next two years.'"

The Hill (6/12, Lillis, 237K) reported that "while some Democratic leaders put on a brave public face to argue the issue still has legs, other pro-reform lawmakers said the politics...now make progress all but impossible ahead of November's elections."

EJ Dionne, in his column for the Washington Post (6/12, Dionne, 4.22M), says, "because immigration was a central issue used against Cantor...the immediate betting is that House leaders will once and for all declare immigration reform dead for this session of Congress." George Will, in another column for the Washington Post (6/12, Will, 4.22M) says House Judiciary Chairman Robert Goodlatte "may have set a 2014 record for understatement when he said Cantor's defeat will not improve the chances of immigration reform this year." And, according to Will, Goodlatte said "the chances were...slim anyway."

Harold Meyerson, in his column for the Washington Post (6/12, Meyerson, 4.22M), predicts that Cantor's loss will "push the Republican Party to the right on the very issue that will cement the Democrats' hold on the White House: immigration." Meyerson says some House Republicans who "were flirting with the notion of treating the undocumented as human beings...are now certain to oppose bringing any immigration reform bill to a vote."

The Washington Post (6/12, Board, 4.22M), in an editorial, says, "We won't diminish the extent to which" the immigration reform debate "can motivate an important slice of the GOP base." According to the Post, "The reasons to fear working on a comprehensive immigration package are immediate and obvious," while "the reasons to embrace the task are long-term." But the Post adds that "those long-term reasons include the national viability of the Republican Party and the good of the country."

White House Reportedly Was Expecting Cantor's Cooperation On Immigration Reform This Year. The Washington Post (6/12, Nakamura, 4.22M) reports that the White House "had hoped to pressure Cantor to acquiesce to allowing an immigration bill to pass on the House floor by the end of summer." According to the Post, there were "signals that the GOP leadership would be willing to move forward after its caucus was safe from primary challenges on the right."

Politico (6/11, Dove, 637K) also reported that while the President "is finally rid" of Cantor, "the man who aggravated him most in Washington," the "price may be immigration reform...which, through Tuesday afternoon, he and his aides believed still had a remote chance to get done." Former White House senior adviser David Axelrod is quoted as saying, "To the degree that this gives the anti-everything crowd a lift, and dooms solutions to problems like immigration reform, it is a loss for the country."

Rand Paul Backs Business-Led Campaign For Immigration Reform. The Washington Times (6/12, Hallow, 455K) reports that on Wednesday, Sen. Rand Paul put "his political weight behind an establishment lobby effort to get Congress to reform the country's immigration system this year" when he "participated in a telephone conference call to conservative and business leaders in favor of immigration reform in an effort brokered by anti-tax activist Grover Norquist." According to the Times, the Partnership for a New American Economy "immediately blasted an email Wednesday evening to supporters crowing that Mr. Paul had formally joined its pro-reform effort," and "a top Paul aide confirmed the alliance of Mr. Paul and Mr. Norquist on immigration reform."

GOP Pollsters Working For Zuckerberg's FWD.us Urge Republicans Not To Abandon Immigration Reform. Roll Call (6/12, Subscription Publication, 76K) reported that on Wednesday, "nearly a dozen Republican pollsters gathered...for a long-scheduled event to deliver survey results funded by a lobbying effort for the House to pass a comprehensive immigration overhaul." According to Roll Call, "the pollsters, whose collective client lists

include a majority of Republicans in Congress, went through the two polls they conducted of Hispanic voters and of the electorate at-large for FWD.us, a pro-immigration overhaul, tech-community lobbying group founded by Facebook CEO Mark Zuckerberg." Roll Call says that "while Cantor's stunning loss was to a challenger" who emphasized his opposition to "amnesty," the pollsters made the case that the result ought not "be used to judge immigration's electoral power."

ANALYSTS: CANTOR UNDERESTIMATED THE APPEAL OF BRAT'S IMMIGRATION MESSAGE. On

Wednesday, all three network newscasts led with reports on House Majority Leader Cantor's GOP primary loss on Tuesday. On NBC Nightly News (6/11, lead story, 3:20, Williams, 7.86M), Kelly O'Donnell said, "As political parables go, if the 14-year Washington power player Eric Cantor was Goliath, with his \$5 million campaign war chest, then the David of this unlikely upset is a newcomer Dave Brat, an economics professor who raised...just under \$200,000." According to O'Donnell, "Richmond Times-Dispatch columnist Jeff Shapiro says conservative anger over Cantor's past effort to craft some immigration reform was one costly factor," while "others blamed low turnout."

On the CBS Evening News (6/11, lead story, 3:00, Pelley, 5.08M), Nancy Cordes reported that Brat "made immigration a marquee issue, arguing Cantor's support for granting citizenship to some undocumented children put him out of step with conservatives." On ABC World News (6/11, lead story, 2:30), David Muir described Brat as "an unknown who raised less money for his campaign than Cantor spent simply eating out." Jeff Zeleny went on to report that Brat "orchestrated a political coup from his tiny Virginia headquarters with only two staffers." Zeleny noted that Cantor had "50 times more" in his war chest than Brat, and "spent more than steakhouses than Brat raised overall."

In an analysis titled "Immigration Issue May Have Felled Cantor," the AP (6/11, Werner) says Cantor "lost, decisively, after a campaign in which Brat made immigration the central issue," and "accused Cantor of embracing 'amnesty' and open borders." The AP says Cantor "fought back, boasting in strongly worded mailers of shutting down plans to grant 'amnesty' to 'illegal aliens' – a changed tone for a lawmaker who'd spoken out in favor of citizenship for immigrants brought illegally to this country as youths."

Likewise, according to McClatchy (6/12, Douglas, Subscription Publication, 23K), "More than anything, Cantor was probably a casualty of immigration." McClatchy says Cantor "advocated a limited legalization path for those brought into the United States as children," which "allowed Brat to hammer him as a flip-flopper soft on illegal immigration, an approach that resonated in a redrawn Virginia congressional district that's grown more conservative."

The AP (6/12, Burnett) reports that on Wednesday, former secretary of state Hillary Clinton said Cantor "was defeated by a candidate who basically ran against immigrants." According to the AP, Clinton "said the basic argument of Brat's campaign was that if Americans are out of work, immigrants shouldn't be allowed into the U.S. to take those jobs."

On NBC Nightly News (6/11, story 2, 1:55, Todd, 7.86M), Chuck Todd said that "while Republican leaders struggle, rank-and-file conservatives declared the message was obvious: it's time for new blood across the board, not just Cantor." And, according to Todd, "This could mean trouble for pro-immigration reform Republicans for Jeb Bush and [Sen.] Marco Rubio." Todd added that for President Obama, "Cantor's departure could be bad news," because "while far from a political ally, Cantor was actually someone the White House could do business with" on "a whole host of issues," including immigration. On the CBS Evening News (6/11, story 2, 3:10, Pelley, 5.08M), John Dickerson said Cantor's "numerous attack ads...introduced voters to his relatively unknown opponent...without harming him," while Brat "said Cantor was soft on illegal immigrants."

According to the Washington Post (6/12, Farenthold, Helderman, Portnoy, 4.22M), "a look back at Cantor's defeat shows that it was a real rejection by a broad swath of his district's Republican voters." As did CBS' Dickerson, the Post says Cantor's "ad blitz that was supposed to destroy his opponent...actually left him looking like a legitimate alternative." The Post notes that Cantor paid for "TV ads attacking Brat, calling him a liberal college professor," but "the ads repeated Brat's name again and again, alerting many voters to the fact that he existed...and that he seemed to threaten Cantor."

Dan Balz, in an analysis for the Washington Post (6/12, Balz, 4.22M), says Cantor's loss "seemingly reflects

anger among conservatives about comprehensive immigration reform," which "is an issue that has caused much anguish among GOP leaders, many of whom believe it is in the party's best long-term interest to enact legislation as a first step toward competing for the support of Hispanic voters." USA Today (6/11, Moore, 5.82M) reports that Cantor "had been outspoken on the need for Republicans to focus on 'what lies beyond the fiscal debate,' including education and immigration overhauls, and had used his position as majority leader to move such legislation."

National Journal (6/11, Goldmacher, Subscription Publication, 561K) noted that "less than a week before voters dumped the House majority leader, an internal poll for Cantor's campaign, trumpeted to the Washington Post, showed Cantor cruising to a 34-point victory." According to National Journal, "veteran Republican survey-taker" John McLaughlin, "whose firm has been paid nearly \$75,000 by Cantor's campaign since 2013, offered several explanations: unexpectedly high turnout, last-minute Democratic meddling, and stinging late attacks on amnesty and immigration."

Charles Blow, in his column for the New York Times (6/12, Blow, Subscription Publication, 9.65M), says "we have to worry about the message Cantor's loss sends to the Republican caucus," which is that "if they suggest an openness to even the most minor movement of necessary legislation like immigration reform, they could be vulnerable."

However, the New York Times (6/11, Board, Subscription Publication, 9.65M), in an editorial, makes the case that "more than anyone else in the House...Cantor was responsible for the chamber's refusal to vote on the Senate's immigration bill." According to the Times, Cantor "personally refused to allow a vote on an amendment to give legal status to undocumented immigrants who serve in the military."

The Wall Street Journal (6/12, Subscription Publication, 5.51M), in another editorial on Cantor's loss, claims that a recent poll from Republican pollster Whit Ayres found that Republican primary voters actually support many of the elements of the comprehensive immigration reform legislation approved by the Senate last year.

Role Of Cantor And Brat's Respective Religious Faiths Analyzed. In an analysis titled "Opponent Resonated With Christian Conservatives in a Way Cantor Could Not," the New York Times (6/12, Stolberg, Subscription Publication, 9.65M) reports that "Cantor's stunning primary loss on Tuesday – to a little-known economics professor...who called his election 'a miracle from God' – has raised questions about whether anti-Semitism was at work." According to the Times, "The answer to that, political analysts and Jewish leaders in Richmond say, is no." But the Times adds that "analysts do say that Mr. Brat – who has a divinity degree from Princeton Theological Seminary and often invokes God in his speeches – appeals to Christian conservatives in a way that Mr. Cantor simply cannot" in a district that has been estimated to be "roughly one-quarter of 1 percent...Jewish."

Dana Milbank, in his column for the Washington Post (6/12, Milbank, 4.22M), says "the ouster of the only non-Christian Republican in Congress by a primary challenger running as an immigration hard-liner...risks cementing the [GOP's] demographic troubles." Milbank goes on to say that Cantor's "ancestry probably wasn't an asset Tuesday among some of the voters who had been added to his district because of Republican-led gerrymandering."

In an online post under the headline "David Brat's Writings: Hitler's Rise 'Could All Happen Again,'" Reid Epstein of the Wall Street Journal (6/11, 5.51M) noted that in a 2011 essay, Brat wrote: "Hitler came along, and he did not meet with unified resistance. I have the sinking feeling that it could all happen again, quite easily."

Brat Did Not Get Substantial Assistance From Tea Party Groups. The New York Times (6/12, Joachim, Subscription Publication, 9.65M) reports that Dave Brat "faced such long odds in his challenge to the No. 2 House Republican that he failed to win the backing of any of the major Tea Party groups that inspired his candidacy." The Daily Caller (6/12, Smith, 408K) reported that Jenny Beth Martin of the Tea Party Patriots noted that she did "meet with" Brat last month.

According to the AP (6/12, Suderman, Szkotak), Brat's father says his son "doesn't like being tagged a tea partyer," and instead "calls himself a Republican." But the AP says "national tea party groups" that "did not invest heavily in the race" nevertheless "claim[ed] Brat's victory as their own."

The New York Times (6/11, Peters, Subscription Publication, 9.65M) reports that "few people did more than" radio host and Fox News contributor Laura Ingraham "to propel Mr. Brat...from obscurity to national conservative hero." According to the Times, even before Tuesday, Brat "was a known quantity to the loyal audiences of radio personalities like Ms. Ingraham and Mark Levin," who "together...reach nearly 10 million people each week."

Politico (6/12, Byers, 637K) reported that "Cantor's willingness to work with" President Obama "on immigration reform was a move Ingraham staunchly opposed on her radio show and in appearances on Fox News and ABC's 'This Week.'" Politico also notes that on June 3, "Brat and Ingraham held a rally at Eric Cantor's country club that drew more than 600 supporters." Politico says that Ingraham herself "credited conservative pundits Ann Coulter and Mickey Kaus, as well as the conservative news sites Daily Caller and Breitbart News."

Cruz Calls Cantor's Loss Evidence That "Conservative Base Is Alive And Well." Under the headline "Ted Cruz Celebrates Eric Cantor Loss," Politico (6/12, Everett, 637K) reported that on Wednesday, Sen. Ted Cruz "celebrated Eric Cantor's primary loss...arguing it's a reminder that the 'conservative base is alive and well' in American politics." Cruz is quoted as saying, "Eric Cantor is a good man, but last night, voters in Virginia made D.C. listen loud and clear. This election should be a reminder to all in Congress – Republicans and Democrats alike – that the conservative base is alive and well, and the American people will hold us all accountable."

Politico (6/12, Raju, French, 637K) also reported that Sen. Jeff Sessions "said Cantor's loss is a 'wake-up call' to the GOP establishment."

Last Laughs:

LATE NIGHT POLITICAL HUMOR.

David Letterman: [Referring to House Majority Leader Eric Cantor's Tuesday primary loss] "He spent five million on his primary campaign...five million dollars. Ladies and gentlemen, what is wrong with this country when you can no longer buy an election?"

David Letterman: "Cantor spent \$168,000 on steakhouses. Governor of New Jersey, Chris Christie, said, 'That's it?'"

Stephen Colbert: [Referring to Cantor's defeat] "No one saw it coming. Least of all Eric Cantor, who helped create the tea party by stitching together dead ideas and then filling them with rage, giving it a jolt of power and letting it loose on the countryside terrified of fire and science. I mean, who could ever imagine it would come back to kill its creator? Who knows who it will devour next?"

Jimmy Fallon: "This is just getting weird now. I heard that for the second day in a row...President Obama made an unscheduled trip out of the White House. Again, he went...a couple of days ago for like a coffee at Starbucks. He went and just split, got a latte or something. And then this time he went, he got a burger at a nearby restaurant. Didn't tell anybody. Yeah. Seems like Obama wants to be out of the White House more than Hillary wants to be in it."

Jimmy Fallon: "Texas Senator Ted Cruz has given up his dual citizenship with Canada in light of speculation that he might run for president. Not to be confused with the reason most Canadians renounce their citizenship – Rob Ford."

Jimmy Fallon: "I read that the mayor of Miami has rejected the proposed stadium site for David Beckham's new soccer team. The mayor said if he wants a team that only scores a couple times a game he'll just watch the Heat."

Seth Meyers: "US House Majority Leader Eric Cantor, who's been in Congress for over a decade, will lose his seat after he was beaten out by a tea party challenger. The tea party would be happy, but then they wouldn't be the tea party."

Seth Meyers: "The campaign manager who helped unseat House Majority Leader Eric Cantor last night is a 23-

year-old man...who interviewed for a job at Panera Bread last month. Said Cantor, 'Is that position still available? Because I have found myself looking for employment.'"

Seth Meyers: "In an interview this week, Hillary Clinton said she may not run for president because she loves having time to hang out with her friends. Thankfully, most of her friends live in Iowa, New Hampshire, Ohio, Florida and the great state of Pennsylvania."

Seth Meyers: "Russian President Vladimir Putin says he has offered the Ukrainian government gas discounts in the spirit of partnership. Although, I don't think it helped that he offered the gas discount by saying, 'Pull my finger. Pull my finger or I will take your fingers.'"

Conan O'Brien: "After the recent prisoner exchange, Obama's approval rating with Americans has fallen to its lowest point so far. On the bright side, his approval rating with the Taliban is through the roof."

Conan O'Brien: "A tea party candidate...won Virginia's Republican primary, mostly on his anti-immigration stance. Yeah, his first plan is to change the state's slogan from 'Virginia is for lovers' to 'Virginia is for lovers who habla English.'"

Conan O'Brien: "Texas Senator Ted Cruz yesterday renounced his Canadian citizenship. He had dual citizenship. That's right, Canada. We took Ted Cruz back, so now you take back Justin Bieber."

DOI in the News:

OBAMA VISITS NORTH DAKOTA'S STANDING ROCK SIOUX RESERVATION. The AP (6/14, Pickler) reported in a story carried by over 300 news sites that President Obama "became only the third U.S. sitting president in eight decades to set foot in Indian Country" Friday as he visited the Standing Rock Sioux Reservation in North Dakota. The President "drew attention to inroads his administration has made with tribes even as he promoted the need to help reservations create jobs, strengthen justice, and improve health and education." Obama said, "Young people should be able to live, and work, and raise a family right here in the land of your fathers and mothers."

The Bismarck (ND) Tribune (6/13, Smith, 64K) says it "was the first by a sitting president to any reservation since 1999." Standing Rock Chairman Dave Archambault "praised Obama for his work to improve federal-tribal relations during his time in office. He said he was humbled by the visit, which he said is just one example of the sincere efforts being made by the Obama administration." Obama said, "Michelle and I are honored to be in this sacred and beautiful place. It's easy to see why it's called God's country."

The New York Times (6/14, Landler, Subscription Publication, 9.65M) says "on a windswept plain next to the Missouri River, dancers and drummers from the Sioux and other tribes, encircled by American flags, created a pulsing swirl of color and noise" as the President and First Lady "nodded their heads in time to the music." The President "told the raucous crowd of 1,800 people that he had delivered on his promise as a presidential candidate in 2008 to improve relations between the government and the nation's Indian tribes."

The Washington Post (6/14, Zezima, 4.22M) says, however, that "despite the strides that have been made, many Native Americans retain a deep skepticism and distrust of a federal government that historically has reneged repeatedly on agreements."

President, Jewell Announce Overhaul Of BIE. ABC News (6/16, Larotonda, 3.58M) in its "The Note" blog reported that the President came "with first lady Michelle Obama and Interior Secretary Sandy Jewell to announce an overhaul of" the Bureau of Indian Education, which has among "the highest dropout rate" in the US.

The Grand Forks (ND) Herald (6/13, Nowatzki, 87K) reported that the President "pledged to invest in American Indian youth" in order to "break old cycles" and "give our children a better future."

USA Today (6/13, Korte, 5.82M) reported that he "placed a particular emphasis on education," noting that "the Interior Department released a plan Friday to reform the Bureau of Indian Education."

KXJB-TV Fargo, ND (6/13, 3K) reported on its website that it was also Obama's first visit to North Dakota as president. Reuters (6/14, Mason), the Los Angeles Times (6/14, Parsons, 3.46M), McClatchy (6/14, Thomma, Clark, Subscription Publication, 23K), The Hill (6/13, Sink, 237K), the NBC News (6/13, Bratu, 7.5M) website, the CNN (6/13, Brittain, 12.15M) website, Indian Country Today Media Network (6/14, Brewer, 45K), The Hill (6/13, Sink, 237K) "Blog Briefing Room" blog, Grand Forks (ND) Herald (6/13, Hageman, 87K), and Education Week (6/13, Maxwell, 135K) also reported on the education initiative.

Jewell Praises Veterans At Native American Veterans Summit. KFYZ-TV Bismarck, ND (6/14, Harju, 1K) reported, "Secretary of the Interior Sally Jewell spoke with veterans at the Native American Veterans Summit at United Tribes Technical College this afternoon." Jewell said, "Of all of the groups within the United States, Native Americans serve in higher percentages than any other racial or ethnic group in this country." The story also appeared at KMOT-TV Minot, ND (6/14, Harju).

The Bismarck (ND) Tribune (6/14, Gehring, 64K) also mentioned Jewell's visit.

Tribal Leaders Blast Keystone Pipeline During Obama Visit To Indian Country. The Los Angeles Times (6/13, Parsons, 3.46M) reports that "President Obama was honored by Native American tribal singers and dancers on Friday afternoon," but during "his first presidential visit to Indian country he also heard from activists who want him to reject the Keystone pipeline project that could pass nearby." One tribal leader, called Keystone "a 'death warrant for our people,'" and "urged Obama to turn down the TransCanada Corp. plan to run the pipeline from Canada, through Dakota lands and down to the Gulf Coast." In a public statement before the visit, Bryan Brewer, president of the Oglala Sioux Tribe, said that the president "reject this pipeline and protect our sacred land and water."

Bloomberg News (6/14, Talev, Runnigen, 2.76M) notes that "in his public remarks, Obama made no mention of the Keystone XL pipeline."

Earlier Coverage Anticipated Visit. Earlier coverage anticipated the visit including the AP (6/12, Burbach) story covered in Friday's briefing that was carried by over 240 news sites, and stories found at MSNBC (6/13, Lee, 7.96M), the Indian Country Today Media Network (6/13, Brewer, 45K), McClatchy (6/13, Kumar, Subscription Publication, 23K), an editorial in the Bismarck (ND) Tribune (6/11, 64K), Al Jazeera America (6/13, 79K), Watchdog (6/13, Port, 4K), USA Today (6/13, Jackson, 5.82M), and Bemidji (MN) Pioneer (6/13, 35K).

JEWELL PROMISES OPEN PROCESS FOR COMMENT ON OIL AND GAS LEASING. The Hill (6/13, Barron-Lopez, 237K) reported that the Department of the Interior asked stakeholders and interest groups to provide public comments on where the Department should sell oil and gas leases for 2017-2022. Interior Secretary Jewell said that "the development of the next Five Year Program will be a thorough and open process that incorporates

stakeholder input and uses the best available science to develop a proposed offshore oil and gas program that creates jobs and safely and responsibly meets the energy needs of the nation." The Hill noted that the American Petroleum Institute responded to the announcement on Friday. API policy adviser Andy Radford said, "The department should thoroughly analyze the entire resource-rich areas of interest" and should "draft an expansive leasing plan that maintains current leasing areas and seeks to unlock new areas that are currently off-limits."

FuelFix (6/13, 7K) reports that on Friday the Interior Department opened up a public comment period for its 2017 to 2022 offshore oil and gas lease plan. American Petroleum Institute senior offshore policy adviser Andy Radford said the Interior Department needs to "thoroughly analyze the resource-rich areas of interest" across the U.S. coastline. He advised regulators to "draft an expansive leasing plan that maintains leasing areas and seeks to unlock new areas that are currently off limits."

The Oil and Gas Journal (6/16, Snow, 1K) reports that on Friday API senior policy adviser Andy Radford said, "At that point, permits can be issued. While we hope the process can move quickly, we think the first few times will be slow. I would hope that next year at this time, we'll have some companies out there collecting data." He noted that since the Deepwater Horizon spill in 2010 "the government and industry have both made great strides in safety and improved the regulation and standards. I think we should consider whether we've done enough to get back to the eastern gulf and open the Atlantic for leasing."

E&P Magazine (6/16) reports that the API said the US has a track record of successful oil and gas offshore drilling. API senior policy adviser Andy Radford said current "restrictions keep 87% of federal offshore waters locked away—along with the potential to develop the vast energy resources they contain." He said that while increased domestic "production has dramatically increased our resistance to energy shocks," the US' "long-term energy security can only be ensured with a lasting commitment to expanding oil and natural gas development both on and offshore. For the offshore, that commitment starts with the next five-year leasing plan."

Rigzone (6/13, Boman, 8K) reports that API senior policy adviser Andy Radford said of possible offshore drilling leases, "Opening new areas like the Atlantic and eastern Gulf of Mexico would send a signal to the markets and to the world that America's oil and natural gas renaissance is here to stay."

Reuters (6/16, Krasny) also quotes Jewell in describing the effort. Further coverage appears at Natural Gas Intelligence (6/13, Davis), Upstream Online (6/16, 20K), Houston Chronicle (6/16, Dlouhy, 2.23M), and Energy Daily (6/16, 835).

JEWELL REMINDS PUBLIC OF IMPORTANCE OF POLLINATORS. The Oregonian (6/15, Nelson, 992K) reports on problems facing pollinators, quoting Secretary Jewell saying, "Pollinators on our nation's public and private lands play a key role in keeping our ecosystems diverse, which in turn provides for healthy habitats and economies," adding, "We appreciate the important public-private partnerships that are working together to encourage the long-term health of pollinating creatures." The story also mentions National Pollinator Week, saying that it begins today "with cautious optimism because awareness of pollinator decline has started leading to genuine change." It also mentions the Fender's blue butterfly, pointing out that "The U.S. Fish and Wildlife Service is working with U.S. Bureau of Reclamation and Clean Water Services and discussing conservation and habitat improvement projects."

ACTING ASSISTANT SECRETARY TO SUPPORT UNESCO DESIGNATION FOR POVERTY POINT IN QATAR. The Monroe (LA) News Star (6/13, Hilburn, 107K) reported that a Louisiana delegation will be "supporting Poverty Point's nomination as a World Heritage Site" at the United Nations Educational, Scientific and Cultural Organization World Heritage convention in Doha, Qatar. In addition, a Federal delegation headed by Rachel Jacobson, acting U.S. Department of Interior assistant secretary, will support the designation.

PETITION ASKS JEWELL TO NAME SS BADER A NATIONAL HISTORIC LANDMARK. WPBN-TV Traverse City, MI (6/13, Cook, 14K) reports on a petition containing "over 2,000 signatures" seeking that the SS Bader be named a National Historic Landmark. The petition asks Interior Secretary Sally Jewell "to approve the designation."

INTERIOR, FOREST SERVICE FACE GROWING FIREFIGHTING BUDGETS. The Los Angeles Daily News (6/13, Scauzillo, 347K) reports on a Federal study finding that fire fighting costs are draining the budget of the

Forest Service, explaining that costs are expected to reach "\$1.8 billion this year" for the Forest Service and the US Department of the Interior.

FRY JOINS AFF. E&E (6/13, Streater) reported that "Tom Fry, who until last year served as a policy adviser for former Interior Secretary Ken Salazar" is now becoming the the American Forest Foundation's "forest conservation director."

America's Great Outdoors:

National Park Service:

USA TODAY CARRIES FEATURE ON NATIONAL PARKS. Dayton Duncan and Ken Burns, creators of the PBS documentary *The National Parks: America's Best Idea*, write at USA Today (6/15, 5.82M), that June 30, 1864, President Abraham Lincoln signed a law that "set aside the Yosemite Valley and the Mariposa Grove of giant sequoias for public use, resort and recreation ... for all time." They note that Yellowstone was named the "world's first national park in 1872," but point to this law as the "seed" of the idea of the National Parks. They chronicle some early problems in protecting the parks, and argue that "vigilance and commitment" have been and remain necessary to maintain the parks.

USA Today (6/15, Adams, 5.82M) in another article focuses on Yellowstone National Park. In a third article,

USA Today (6/15, Welch, 5.82M) focuses on Yosemite. In a fourth article, USA Today (6/13, Hopkins, 5.82M) reports on the Sandy Hook Lighthouse, pointing out that Gateway National Recreation Area is operated by the National Park Service.

YELLOWSTONE SEES MORE VISITORS THIS YEAR. ABC News (6/15, 3.58M) reports on its website that the National Park Service has reported that visits to Yellowstone National Park are up about 6 percent through May this year over last year.

MCCAIN PROPOSES CHANGE TO RULE ABOUT BISON REMOVAL IN GRAND CANYON. The AP (6/14, Fonseca) reports that Sen. John McCain (R-AZ) "is pushing an amendment in Congress that would allow anyone who kills bison at the Grand Canyon to keep the meat." The Park Service is reportedly "trying to find ways to control hundreds of bison roaming the northern reaches of the Grand Canyon." Under current rules, "the shooter cannot keep the meat." Under his proposal, the Park Service would "work with the Arizona Game and Fish Commission to determine who is authorized to aid in lethal removal."

PARK SERVICE WORKING ON PLAN TO ADDRESS EROSION AT INDIANA DUNES. The Chicago Tribune (6/16, Gregory, 2.3M) reports that the National Park Service is working on a "comprehensive strategy to resolve the problem" of erosion at Indiana Dunes National Lakeshore. The problem is said to be due to "three man-made structures: the Michigan City Harbor, completed in the early 1900s; Port of Indiana, built in the late 1960s; and Gary-U.S. Steel Harbor." In addition, there are "engineered peninsulas."

FATHER TOWS DISABLED SON THROUGH ARCHES NATIONAL PARK. KTXL-TV Sacramento, CA (6/15, 19K) carries a photo courtesy of the US Department of the Interior of James Geier towing his 18-year-old disabled son Jonah at the Arches National Park, where they "travelled over 3 miles, over slickrock trails, and up steep steps" to see the park. The picture also appeared at KSWB-TV San Diego (CA) San Diego (6/15, 25K), KCPQ-TV Seattle (6/15, 25K), and KSWB-TV San Diego (6/15, 25K) among other sites.

Bureau of Land Management:

WILDLIFE AND LIVESTOCK IN INCREASING COMPETITION ON WESTERN LANDS DUE TO DROUGHT. The Los Angeles Times (6/16, Cart, 3.46M) reports that drought and wildfire in the West are threatening the use of Federal land for both wildlife and livestock. In addition, any efforts to protect the greater sage grouse are likely to further reduce access to grazing land. BLM manager Kurt Wiedenmann is cited saying that "the drought and the sage grouse have federal and state agencies working together to find room for both grazing and the imperiled birds."

BLM RANGER INJURED IN NEVADA COUNTY, CALIFORNIA SHOOTOUT. The Sacramento (CA) Bee (6/14, Morales, 687K) reported, "A Bureau of Land Management ranger, a California Highway Patrol officer and a suspect were injured Saturday during a shootout" in Nevada County. The BLM ranger had called for assistance from the CHP, having "sustained a gunshot to the shoulder." He was "flown to Sutter Roseville Medical Center with injuries that were not life-threatening."

KOVR-TV Sacramento, CA (6/14, 47K) reported that "BLM spokeswoman Dana Wilson said she doesn't know the extent of the ranger's injuries, or what led the ranger to call local authorities for assistance."

FOX News (6/15, 6.72M) also reported.

BLM TO ADMINISTER BIRTH CONTROL TO WILD HORSES. The Salt Lake (UT) Tribune (6/16, 470K) reports that the Bureau of Land Management "is using porcine zona pellucida (PZP), a form of birth control for wild horses, to control the population of two herds in Tooele County." Administering the chemical "involves shooting the mares in the rump with a dart gun."

BLM EXPECTS ACTIVE FIRE SEASON. KTVB-TV Boise, ID (6/16, Lutz, 87K) sites personnel from the Boise District Bureau of Land Management saying that "the ingredients for a potentially active fire season are here."

BLM SAYS FIRE STARTED BY NATIONAL GUARD TRAINING. KSL-TV Salt Lake City (6/16, Spencer, 242K) reports that officials from the Bureau of Land Management attributed the Pony Fire to "a military training accident." The fire began "one-third of a mile south of a Tooele County road known as the Pony Express Road," near the training site for the Utah National Guard.

UTAH COUNTY COMMISSIONERS TO MEET WITH BLM OFFICIALS. The St. George (UT) News (6/15, Kessler, 3K) reports that the Iron County, Utah commission passed a resolution listing complaints with the Federal government's land management, specifically that "related to the management of prairie dogs, wild horses and burros, backcountry roads and area forests." Chairman David Miller said that commissioners from several Utah counties will meet with officials in Washington, DC to discuss grievances. Miller said that "he hopes that meeting with representatives and directors of various federal agencies involved in Iron County, such as the Forest Service and Bureau of Land Management, will lead to an understanding."

BLM REJECTS PROPOSAL FOR POTASH MINE IN UTAH DESERT. The AP (6/15) reports that the Bureau of Land Management, has "rejected a mineral exploration company's proposal to prospect for potash on a section of the western Utah desert crossed by the ill-fated Donner Party in 1846." The company, Mesa Exploration Corp., proposes to "create a potash mine on a dry lakebed near the Nevada line about 20 miles north of Wendover."

STUDY FINDS SPLITTING PLANT POPULATIONS MAY WEAKEN THEM AGAINST DISEASE. E&E (6/13, Learn) reported on a new study published in Science finding that "Splitting up plant populations could make them more likely to contract disease."

Fish and Wildlife Service:

US FISH AND WILDLIFE SEEKS TO REINTRODUCE SUCKERS TO UPPER KLAMATH LAKE. The AP (6/16) reports on the US Fish and Wildlife Service plans to reintroduce the Lost River and shortnose suckers to Upper Klamath Lake. To do that, "fish biologist Josh Rasmussen and two other USFWS employees collected thousands of inch-long sucker larvae from the Sprague and Williamson rivers," which were taken to "historical sucker spawning grounds." Rasmussen explained that once they are released it will be several years before they return. The story also cites Dave Hewitt a biologist for the US Geological Survey, saying that "researchers are studying toxins released by algae, as well as oxygen-deficient periods caused by algae die-offs, for clues to the juvenile sucker disappearances."

BURYING BEETLES BEING REINTRODUCED IN MISSOURI. The AP (6/16, Salter) reports on the effort to "improve the population of American burying beetles at Wah'Kon-Tah Prairie in southwest Missouri" that involves the St. Louis Zoo, the Nature Conservancy, the U.S. Fish and Wildlife Service, and the Missouri Department of

Conservation. So far the Zoo has released 168 beetles on the site and plans to release 180 on Tuesday. The beetles are said to be necessary to restore the area's habitat to its previous state.

US FISH AND WILDLIFE SAID TO NEED \$19 MILLION MORE ANNUALLY TO SAVE MORE SPECIES.

Timothy Male, director of Mission: Wildlife writes in The Hill (6/16, Male, 237K) "Congress Blog" blog on the success of the Endangered Species Act at reclaiming "the bald eagle, gray wolf, alligator and more than 20 other species," adding that US Fish and Wildlife Service has plans "to recognize 17 more recoveries or species meriting a lower 'threatened' status." He suggests a greater focus, along with about \$19 million more annually would improve the situation further, helping 100 threatened species to recover.

ASHE HAS NO SECOND THOUGHTS ON WOLVES. E&E (6/13, Taylor) reported that Fish and Wildlife Service Director Dan Ashe has indicated that "his agency will stay the course on its year-old proposal to remove Endangered Species Act protections for wolves in most of the United States." He said, "I don't have second thoughts."

BIRDS HELP TO DISPERSE PLANTS IN TROPICS. E&E (6/13, Dehnert) reports on a study published in PeerJ showing that "birds – via their feathers" are in fact "a means of dispersing plants across the tropics."

US Geological Survey:

USGS WORKS WITH NEW YORK ON STUDY OF MOHAWK RIVER. The Utica (NY) Observer Dispatch (6/14, Roth, 11K) reports that the US Geological Survey is working with the New York State Department of Environmental Conservation on a study of the Mohawk River to examine fish populations "between Lake Delta Dam near Rome and the river's end at the Hudson River near Cohoes."

Securing America's Energy Future:

Renewable Energy:

IGS RESEARCHERS DISCOVER REGIONAL GEOTHERMAL RESOURCE. The Idaho Falls (ID) Post Register (6/14, Sunderland) reported that the Idaho Geological Survey has "unearthed a previously unrecognized high-temperature geothermal resource near Soda Springs." The "discovery of the energy asset came through a recently completed national database, created with the help of Idaho researchers." A survey team from the University of Idaho "spent several years compiling some 7,000 records to contribute to the National Geothermal Data System on behalf of the Gem State." The article noted "the data system was commissioned by the U.S. Department of Energy to compile all forms of data related to geothermal energy." UI geologist John Welhan stated, "Each state's geological survey combed through it's records and the records of other agencies for anything relevant to the exploration, development, research or utilization of geothermal heat. ... It spanned the gamut from recreational uses to greenhouse warming to complex high-temperature heating systems."

TENASKA CLOSES ON FINANCING FOR UTILITY-SCALE SOLAR PLANT. Bloomberg News (6/13, Doom, 2.76M) reports that Tenaska Inc. has closed on \$450 million in financing to construct it's Imperial Solar Energy Center West project. The project will be the company's second utility-scale solar plant in California's Imperial Valley, construction on which is expected to begin this year, with completion scheduled for 2016.

RESEARCHERS MAPPING OCEAN FOR OFFSHORE WIND ENERGY DEVELOPMENT. The Raleigh (NC) News & Observer (6/15, Brumbaugh, 504K) reports on efforts by scientists to determine the best offshore sites for wind energy development, noting that a number from UNC Chapel Hill's Institute of Marine Sciences are looking into the matter with help from the National Ocean Service, National Marine Fisheries Service, UNC and the Bureau of Ocean Energy Management. The story also appears at the Charlotte (NC) Observer (6/15, Brumbaugh, 585K) .

RHODE ISLAND COASTAL WIND FARM STILL AWAITING APPROVAL. The Providence (RI) Business News (6/13, Miller, 42K) reports that "Deepwater Wind's five-turbine Block Island Wind Farm" is still seeking final approval, though according to "Michael Elliott, U.S. Army Corps of Engineers project manager for the wind farm," that could come in July. It is awaiting agreements from "the R.I. Historical Preservation & Heritage Commission,

the Narragansett Tribe, the Wampanoag Aquinnah Tribe on Martha's Vineyard and from the National Park Service, related to the Block Island Southeast Light," as well as the Bureau of Ocean Energy Management.

Onshore Energy Development:

AP REVIEW SHOWS BLM STRUGGLING TO INSPECT HIGHER-RISK WELLS. According to a state-by-state review conducted by the AP (6/14, Yen, Peipert, 5.82M), "four in 10 new oil and gas wells near national forests and fragile watersheds or otherwise identified as higher-pollution risks escape federal inspection" remained "unchecked" by the Bureau of Land Management. The review shows that "roughly half or more of wells on federal and Indian lands weren't checked in Colorado, Utah and Wyoming." The analysis indicates that Bureau of Land Management is "so overwhelmed by" the fracking boom "that it has been unable to keep up with inspections of some of the highest priority wells."

The AP (6/16, Price) reports that BLM deputy director Linda Lance said, "No one would have predicted the incredible boom of drilling on federal lands, and the number of wells we've been asked to process."

In Pittsburgh, the AP (6/15) reported that, "in Pennsylvania, the AP review found that only one of six wells on a high priority list was not inspected by the Bureau of Land Management."

In Fresno, the AP (6/15, Smith) reported that BLM "records say 31 of 99 high-priority wells drilled from fiscal year 2009 to 2012 in the state's oil-rich Central Valley were not inspected during that period." However, BLM spokeswoman Dana Wilson "disputes the number of uninspected wells, saying that bookkeeping errors have misrepresented the problem."

The Salt Lake (UT) Tribune (6/16, 470K) reports that according to the AP, "a majority of the oil and gas wells drilled on federal land in Utah during recent boom years have not been inspected."

The AP (6/14) reports, "more than 240 newly drilled oil and gas wells considered high pollution risks on Colorado public lands weren't inspected during a recent three-year period."

The AP (6/14) reports, "Almost half of all newly drilled oil and gas wells considered high pollution risks in Wyoming weren't inspected."

The AP (6/16, Macpherson) reports that the BLM said it is difficult to keep up with the oil and gas boom in North Dakota.

Futher coverage can be found at the Wilkes-Barre (PA) Times Leader (6/14, O'Connell, 116K), Akron (OH) Beacon Journal (6/15, Yen, Peipert, 381K), AP (6/14), AP (6/14), and AP (6/12, Bryan).

NATURAL GAS MAY BE NEXT FUEL TRANSPORTED ON NORTH AMERICAN RAILS. Reuters (6/16, McAllister) reports on the likelihood that natural gas producers are likely to follow crude producers in sending their product via rail throughout North America. Such transport is probably "years away" and likely to face opposition. However, natural gas-by-rail transport could present opportunities for railroads, drillers, and tank car makers. Additionally, sending the product via rail may reduce natural gas flaring, in which about \$1 billion of gas produced along with oil is currently burned annually because of a lack of pipelines or processing plants to handle it.

AP: NC BILL WOULD FORCE DUKE TO CLOSE COAL ASH DUMPS. The AP (6/16, Biesecker, 455K) reports that legislation "backed by key North Carolina lawmakers would require Duke Energy to close all of its coal ash dumps across the state within 15 years, with much of the toxic material going into lined landfills." The AP obtained "a copy of the proposed legislation distributed Sunday to members of the state Senate." The bill orders Duke "to stop pumping its ash into water-filled pits by the end of 2019." The company's over "100 million tons of existing ash would either have to be dug up and removed or sealed in place to stop contaminating groundwater."

FRACKING'S WATER USE LESS THAN GOLF, AGRICULTURE. The Reno (NV) Gazette-Journal (6/14, Robison, 166K) investigated the debate over how much water fracking is using in Nevada. The article found that

the claim that fracking uses "tens of millions of gallons of water" for each well is untrue. Rather, about 2 to 4 million gallons per well is used. However, it noted that claims that golf courses use more water than fracking are accurate. Additionally, Nevada's Department of Agriculture has reported that the state's 66,000 dairy cows use 429 million gallons of water annually, while "a 126-acre crop with a single irrigation pivot uses 163 million gallons." These are both more than the amount of water used in places where more fracking is occurring than Nevada, like California.

Report Warns Ohio Fracking Water Use Could Cause Droughts. The Coshocton (OH) Tribune (6/14, Rumer, 13K) reported that with the possible sale of some of Ohio's freshwater to the drilling industry for \$4.25 per 1,000 gallons, nonprofit group FracTracker Alliance is warning that using water for fracking could lead to drought. FracTracker head Dr. Ted Auch has expressed concerns "not only with the lack of data that surrounds that decision but also with the effect of allowing large drilling companies to purchase water cheaply." According to his own analysis of state gas wells, fracking can use about 4.7 million gallons of water per well. He projects that 4.7 billion gallons have been used on the state's 985 permitted wells so far. This is around 3% to 4% of "available water," or water left after human and environmental consumption. Auch warned that this water is what protects the state from drought conditions.

COMPANY TO BUILD GREEN REFINERY. E&E (6/13, Gass) reports on a project by Pacific Future Energy Corp. to build the "Greenest" oil refinery.

Offshore Energy Development:

CONVERTING UNUSED OIL RIGS INTO REEFS MAY BE GREENER THAN REMOVING THEM. The Economist (6/12, 830K) reports that leaving much of an offshore oil rig in place can be not only less expensive than removing it, but "may actually be greener." That's because of the amount of energy it takes to remove it, and rigs may serve as coral reefs. The story notes that over 490 have been created in this way over 30 years.

Tackling America's Water Challenges:

ARIZONA CITIES COULD FACE WATER SHORTAGES. The Arizona Daily Star (6/16, 389K) reports that "water shortages could hit Tucson and Phoenix as soon as five years from now." The reason is that "Lake Mead, now about 1,085 feet elevation," could fall "below 1,000 feet." And the "Interior Secretary could intervene in advance to hold down states' water diversions."

Top National News:

US AND IRAN SET FOR TALKS AS IRAQ'S SHIITES MOVE TO BLOCK ISIS ADVANCE. The ongoing crisis in Iraq dominated the news on Sunday, with much of the reporting focused on claims from the ISIS that it has executed 11700 Iraqi soldiers in Tikrit, a claim that all sources say has not yet been verified and is disputed by the Iraqi military. The growing influence of Shiite militias in Baghdad, and reports on the likelihood that the US will ask the Iranian government to assist the Iraqis as they combat the Sunni insurgency, contribute to the growing perception that the conflict in Iraq is an outgrowth of the Sunni-Shia war in Syria, where ISIS is battling the Iranian-backed Assad regime.

On ABC World News (6/15, lead story, 3:10, Muir), correspondent Martha Raddatz reported from Baghdad that "after a humiliating week of defeat, the Iraqi forces are striking back from the air," while "political and religious leaders [are] calling for new recruits who are lining up in huge numbers to join the fight." According to Raddatz, the "new recruits are mostly...Shia from Baghdad and the south, pushing back against the extremist Sunni Jihadist group." On the CBS Evening News (6/15, lead story, 2:35, Glor, 5.08M), correspondent Clarissa Ward reported that the Iraqi government's "real strategy" involves "mobilizing Shiite militias through a massive recruitment drive."

Under the headline "...US, Iran Near Talks on Cooperation to Counter Insurgents," the Wall Street Journal (6/16, A1, Solomon, Lee, Nabhan, Subscription Publication, 5.51M) reports that talks between the US and the Iranian government are expected to get under way this week, possibly in Vienna. According to the Journal, Secretary of State Kerry spoke with Iraqi Foreign Minister Hoshyar Zebari this weekend about US willingness to cooperate

with Iran as part of an effort to help the Iraqis repel the ISIS offensive. USA Today (6/16, Shamary, Bhatti, 5.82M) notes the Journal's reporting on the planning for US-Iran talks on the crisis in Iraq.

McClatchy (6/15, Banerjee, Subscription Publication, 23K) reports that "members of Congress and retired military officials" are urging the Administration to "be willing to directly engage...Iran" in order to "fight off the Sunni militants" threatening to take control of Iraq. McClatchy notes that on CNN's State Of The Union (6/15, Borger, Bash, 862K), Sen. Lindsey Graham "called for the US to talk directly with Iran to devise a plan to stop what he characterized as an ISIS march toward Baghdad," while retired Gen. Paul Eaton, who was "formerly in charge of training Iraqi security forces," described Iran as a "natural ally." According to McClatchy, on Saturday, Iran's president, Hassan Rouhani, said his government "would 'consider' working with the United States...to bolster the shaky Iraqi government, with which Iran has strong ties," but "added that the government of Iraqi Prime Minister Nouri Maliki had not yet asked Iran for help."

Under the headline, "Republicans Urge US Military Action In Iraq," USA Today (6/16, Moore, 5.82M) reports that Graham made the case that the US "needs to engage with Iran to negotiate a settlement in Iraq, whether we like it or not." Graham is quoted as saying, "The Iranians can provide some assets to make sure Baghdad doesn't fall. We need to coordinate with the Iranians."

Under the headline, "Graham Says U.S. Could Make Common Cause With Iran," the Wall Street Journal (6/16, Nissenbaum, Subscription Publication, 5.51M) notes that Graham said, "Why did we deal with Stalin? Because he was not as bad as Hitler." However, the Journal notes that on CBS' Face The Nation (6/15, Schieffer, 2.64M), Graham warned the Iranian government not to "use this crisis to take territory from the Iraqi people," and added, "We will not accept their intervention in Iraq for the purpose of creating a satellite state for Iran." The Washington Times (6/16, Chasmar, 455K) reports that Graham went on to say, "If the central government in Iraq collapses...Iran will own the southern part of Iraq," which is "where the Shiites live."

On the CBS Evening News (6/15, story 3, 2:20, Glor, 5.08M), former CIA deputy director Mike Morell was asked if Iran is "in a better position to influence" the outcome of the civil war in Iraq than the US. Morell replied, "I think they are. They've got relationships with Shi'a militia groups that date back ten years; they provide weapons and training to those groups. They're also willing to put their own soldiers on the ground with Iraqi fighters, and I think that can make a huge difference." But Morell added, "I think that is a huge downside for the US over the long-term – the Iranians helping the Iraqis – because it will give them influence inside of Iraq and that is not in our interest."

In an article titled, "Rise Of Shiite Militias Poses A Threat To Iraq," the AP (6/16, Hendawi, Abdul-zahra) reports that "Iranian-backed militias" are "spearheading what [Iraq's] Shiite majority sees as a fight for survival against Sunni militants who control of large swaths of territory north of Baghdad." According to the AP, "The emergence of the militias as a legitimate force enjoying the support of the Shiite-led government and the blessing of the religious establishment poses a threat to Iraq's unity." The AP says the Shiite militias' "enhanced role...will deepen Iran's influence in Iraq, giving the non-Arab and mostly Shiite country a role similar to the one it plays in Syria."

According to the Washington Post (6/16, A1, Sly, Hauslohner, 4.22M), "In Baghdad, armed militias openly drive through the streets in pickup trucks and SUVs, in scenes reminiscent of the dark days of the civil war a decade ago," and "in some areas, the militias manned checkpoints...underscoring the extent to which the discredited army and police are taking a back seat to the fighters." The AP (6/16, Jeltsen, 11.54M) notes that on Saturday, "hundreds of armed Shiite men paraded through the streets of Baghdad in response to a call by Grand Ayatollah Ali al-Sistani for Iraqis to defend their country."

Bloomberg News (6/16, Razzouk, Habboush, Sabah, 2.76M) reported that on Sunday, "Iraq's military pummeled the positions of Sunni Muslim insurgents" as Prime Minister Maliki's "Shiite Muslim-led government" tried to "reassert control over territory held by" ISIS, "whose advances put in doubt his rule over a unified Iraq." According to Bloomberg News, Tariq Al-Hashimi, describe as a "a Sunni leader accused by Maliki of being involved in terrorism," has "called for the [Maliki's] overthrow and said Iranian forces have entered Iraqi territory to defend the Shiite-led government." In an Al Arabiya interview, Hashimi said, "The mess in Iraq, all of this security chaos, I fully blame Iran for."

The Washington Times (6/16, Howell, 455K) reports that on Sunday, many Republicans contended that the

Administration “sat on the sidelines for too long as sectarian violence threatens to undo what US troops accomplished during the war in Iraq.” The Times notes that on Fox News Sunday, Rep. Mike Rogers (R-MI), the chairman of the House Intelligence Committee, “ruled out US troops on the ground” but added, “You can’t fire missiles and then turn around and come home.” According to Rogers, “you have to have the Arab League with you.”

The Wall Street Journal (6/16, Nissenbaum, Subscription Publication, 5.51M) quotes Rogers as saying, “We need to re-engage our Arab league partners. ... This is as dangerous as it gets.” Politico (6/15, Wright, 637K) reported that Rogers claimed that “thousands” of “westerners and Americans” are fighting with the Sunni terrorists, and warned that “these recruits could use their Western passports to return home and engage in terrorist activities.”

House Armed Services Committee Chairman Rep. Buck McKeon (R-CA), on Fox News’ Sunday Morning Futures (6/15, Bartiromo), quipped, “The President will be reviewing all of his options – he likes to look at all the options and then act on none of them, hoping that the crisis will go away.”

Sen. Joe Manchin said on NBC’s Meet the Press (6/15, Gregory, 3.08M), “I think our intelligence has failed us miserably for not being aware of the threat that we faced [in Iraq]. The first thing I would recommend to the President is: get your intelligence group back on track, making sure that we have the intel that we need.”

On CNN’s State Of The Union (6/15, Borger, Bash, 862K), two Iraq War veterans and Foreign Affairs Committee members – Rep. Tulsi Gabbard (D-HI), a military police captain in the Hawaii National Guard, and Rep. Adam Kinzinger (R-IL), a major in the Illinois Air National Guard – weighed in on the crisis in Iraq. Gabbard stated: “It’s painful to see watch the Iraqi troops literally shed their uniforms. This is one of my major concerns about those advocating for air strikes and getting our US military involved. ... You can’t train away the core issue here, which is that you have a Sunni versus Shia [religious civil war] going on.” Kinzinger added: “Is this going to be the answer, air strikes? I don’t think this is necessarily the panacea. But we are watching right now the worst case scenario happen.”

Mitt Romney said on NBC’s Meet the Press (6/15, Gregory, 3.08M), “What has happened in Iraq and what we’re seeing with ISIS is a good deal predictable by virtue of the President’s failure to act appropriately. ... Bad things happen as a result of inaction,” and the “consequences have obviously been very severe.”

NYTimes A1: Obama, Iran Pressuring Maliki To Make Overtures To Sunnis. In a front-page article titled, “Obama Pushes Iraqis To Mend Sectarian Rifts,” the New York Times (6/16, A1, Landler, Gordon, Subscription Publication, 9.65M) reports that according to an unidentified “senior administration official,” President Obama “has concluded that any American military action must be conditioned on a political plan to try to heal Iraq’s sectarian rifts,” and “the White House’s emphasis, when Mr. Obama returns to Washington on Monday...will be on prodding Iraq’s leaders to form a new national unity government.” The Times reports that the “senior administration official” says the Administration wants Prime Minister Maliki, “a Shiite, to work with the Kurds, to seek to persuade the disaffected Sunni minority that the next government will be an ‘ally not an adversary,’” and is insisting that “all three groups must be adequately represented.” According to the Time, the President’s “push for political reconciliation has put him in a potential alignment with” the government of Iran, whose officials “seemed to echo Mr. Obama’s admonition.”

ISIS Claims To Have Killed 1700 Captured Shiite Soldiers. Under the front-page headline, “Militants Claim Mass Execution Of Iraqi Forces,” the New York Times (6/16, A1, Nordland, Rubin, Subscription Publication, 9.65M) reports that on Sunday, ISIS “claimed...that they had massacred hundreds of captive Shiite members of Iraq’s security forces, posting grisly pictures of a mass execution in Tikrit as evidence and warning of more killing to come.” The Times says Iraqi officials are “acutely aware of the potential for retaliatory violence,” and “some...who had heard about the ISIS claims took pains to play them down,” while the Ministry of Defense “denied the executions had taken place at all.” According to the Times, “some human rights groups” also “cautioned that the militants’ claim to have killed 1,700 soldiers in Tikrit could not be immediately verified,” but the alleged atrocity nevertheless “may put more pressure on the Obama administration to aid Iraq militarily.”

The Wall Street Journal (6/16, Nabhan, Subscription Publication, 5.51M) reports that the State Department also said ISIS’s claims have not been verified. The Los Angeles Times (6/16, Bulos, 3.46M) reports that “the purported

execution photos are being widely shared on social media and Iraqi military officials acknowledged being aware that some of the soldiers had been killed," but "did not provide a specific number." The Times notes that in the same series of photos posted by ISIS, there can be seen "Humvees and heavy trucks, originally provided by the US to Iraq's military, commandeered by the fighters."

US Carrier Arrives In Persian Gulf As State Evacuates Baghdad Embassy Personnel. On the CBS Evening News (6/15, lead story, 2:35, Glor, 5.08M), Jeff Glor reported that on Sunday, "the aircraft carrier USS George H.W. Bush arrived in the Persian Gulf," as the State Department "announced they're evacuating nonessential personnel from the embassy in Baghdad" and "sending in Marines to protect those who remain."

According to Bloomberg News (6/16, Razzouk, Habboush, Sabah, 2.76M), the State Department is "keeping its embassy in Baghdad open" and bringing in "additional US government security personnel." The AP (6/16, Hefling) notes that the US Embassy in Baghdad "has about 5,000 personnel, making it the largest US diplomatic post in the world."

According to the New York Times (6/16, Arango, Gordon, Subscription Publication, 9.65M), "The exact number of people being evacuated...was not disclosed." The Times notes that State Department spokeswoman Jen Psaki released a statement reading: "Over all, a substantial majority of the US Embassy presence in Iraq will remain in place, and the embassy will be fully equipped to carry out its national security mission." The Times goes on to report that earlier in the year, "when insurgents captured Falluja and other parts of western Anbar Province, the American government rushed guns, ammunition and Hellfire missiles to aid the Iraqis," although, according to the Times, that "has done little to stop the militants."

On ABC World News (6/15, lead story, 3:10, Muir), correspondent Martha Raddatz reported that "three [US] warships, including a...carrier bristling with missiles and packed with fighter jets, were deployed to the Persian." According to Raddatz, while the President is mulling ordering air strikes targeting ISIS, "no one" in Baghdad "believes it will bring this conflict to an end anytime soon." Raddatz also reported that with ISIS "just 60 miles outside of Baghdad...a series of explosions rocked the city" on Sunday, "killing at least 15."

The Los Angeles Times (6/16, Raab, 3.46M) reports that Pentagon spokesman Rear Adm. John Kirby said, "A small number of [Defense Department] personnel are augmenting State Department security assets in Baghdad to help ensure the safety of our facilities. ... The US military has airlift assets at the ready should State Department request them, as per normal inter-agency support arrangements."

The Washington Post (6/16, DeYoung, 4.22M) reports notes that US "contractor personnel were evacuated beginning late last week from two major Iraqi bases, in Balad and Taji, north of Baghdad, and from an oil refinery and power plant in Baiji, also north of Baghdad." Reuters (6/16, Ryan, 17.91M) and the Wall Street Journal (6/16, Nissenbaum, Subscription Publication, 5.51M) also cover the increased security at the US embassy.

Crocker: Kerry Should Be In Baghdad "Right Now." USA Today (6/16, Moore, 5.82M) reports that on Sunday, Ryan Crocker, a former US ambassador to Iraq, said, "We need the Secretary of State there in Baghdad right now." According to the AP (6/16, Hefling), over the weekend, Secretary Kerry "made calls to foreign ministers in Jordan, the United Arab Emirates, Saudi Arabia and Qatar to discuss the threat and the need for Iraqi leaders to work together."

Crocker said on CNN's Fareed Zakaria GPS (6/15, Zakaria, 456K), "Ambassadors can't do it all. You need heavy fire support on the diplomatic front. If I were asked to return to Iraq, the first thing I would request is Secretary Kerry to get on a plane immediately. We have lacked that high level engagement with the Iraqis that was so crucial during my it early in office. ... We need the President on the phone to the Iraqi leadership."

Homeland Security Committee Chairman Rep. Michael McCaul (R-TX) said on ABC's This Week (6/15, Raddatz, 2.73M), "I talked to Ambassador Crocker yesterday, he said that this is the greatest national security threat since 9/11 - Al Qaeda owns more territory and more resources." McCaul added, "I tell you, it's the President's inability to negotiate in Iraq, which has put us in this situation today."

The Wall Street Journal (6/16, Knickmeyer, Subscription Publication, 5.51M) reports that the government of Kuwait is warning that ISIS could take its oil fields if they are not stopped soon. However, the Journal notes that

Nasser bin Hamad al Khalifa, Qatar's former ambassador to the US and the UN, is warning the US not to undertake "an intervention to support Maliki." Khalifa said if that were to happen "then the Arabs all over, and the Muslims all over...will take it as a war against them and against Islam." The Journal says Saudi official Fahed Nazer agrees that "U.S. involvement...has and will continue to be recruitment gold for al Qaeda."

Assad's Forces Have Been Fighting ISIS For Several Years In Syria. On the CBS Evening News (6/15, story 2, 1:40, Glor, 5.08M), Jeff Glor noted that ISIS "now occupies territories stretching from northern Syria to northern Iraq," including Mosul, Iraq's second largest city. Holly Williams went on to report from Erbil in the part of Iraq controlled by the Kurds that ISIS "spent several years fighting in the Syrian civil war, doing battle...against the Syrian regime," as well as "other Syrian opposition groups that don't like the hard-line form of Islam that ISIS is trying to impose."

In a piece for The New Yorker (6/16, 5.3M), Dexter Filkins notes that there have been reports that ISIS is sending US military equipment it has seized in Iraq to Syria in order to help its campaign to topple the Assad regime. According to Filkins, "The long open border between Iraq and Syria...has allowed extremists on each side to grow and to support one another," and they are "beginning to take their war beyond the two countries that they now freely traverse." Filkins adds that the government of Iran "has been decisive in supporting Assad, and its influence over Maliki, never small, has increased enormously since the departure of the last American forces in Iraq" at the end of 2011.

ISIS's Leader Was Released From US Custody In 2009. On ABC World News (6/15, story 2, 2:05, Muir), David Muir noted that ISIS's leader, Abu Bakr al-Baghdadi, "spent years in US custody." Terry Moran went on to report from northern Iraq that Baghdadi "was in US custody in Iraq for four years," and "when he was released in 2009, his parting words to US troops" were: "I'll see you in New York." Moran also noted reports that Baghdadi "may have been injured in an air strike."

Kurdish Soldiers Killed By Iraq's Military In Saadiyah. The Wall Street Journal (6/16, Nabhan, El-ghobashy, Subscription Publication, 5.51M) reports that two or more Kurdish Peshmerga soldiers were killed, apparently inadvertently, in Saadiyah by the Iraqi army as it launched a counteroffensive against ISIS. However, according to the Journal, the Kurdish authorities says they can not be sure that the attack was a mistake.

The Washington Post (6/16, Morris, 4.22M) reports that "Kurdish forces have played a behind-the-scenes role in rescuing embattled Iraqi soldiers from checkpoints and bases, staving off more losses for the troops," and the Post says the "disastrous end to one such operation Saturday is threatening to derail their military cooperation." According to the Post, "Furious Kurdish military officials" claim "Iraqi forces...fir[ed] mortars and Hellfire missiles at Kurdish fighters, killing six and injuring 43." The Post reports that according to an anonymous "senior Kurdish security official," more than two hours after the initial shelling killed two and wounded 21 Peshmerga soldiers, "the Kurdish position was attacked again, this time by two Iraqi helicopters firing U.S.-supplied Hellfire missiles, the official said, adding that he was '99 per cent sure' that the attack was intentional." The official said the second attack killed four Kurds.

ISIS Seizes Turkmen-Majority City, Tal Afar. Reuters (6/16, Al-sanjary, Rasheed) reports that on Sunday, ISIS seized the city of Tal Afar, which is majority Turkmen. Reuters notes that Tal Afar is near Kurdish-controlled areas. According to the Washington Post (6/16, A1, Sly, Hauslohner, 4.22M), while the Iraqi military claims to have "reasserted control over much of Salahuddin province," the "capture of Tal Afar...suggested that the ISIS onslaught was continuing."

At Least 19 Killed Following Four Baghdad Bombings. According to the AP (6/16, Jeltzen, 11.54M), "a car bomb in [Baghdad's] center killed 10 and wounded 21," and then "another explosion hit the area, killing two and wounding five," and another "in the sprawling Sadr City district, killing three and wounding seven," before "a fourth blast in the northern Sulaikh district killed four and wounded 12."

Nuland's Husband Criticizes Obama's Handling Of Iraq, Praises Clinton's Foreign Policy. The New York Times (6/16, Horowitz, Subscription Publication, 9.65M) reports that historian Robert Kagan, husband of Assistant Secretary of State Victoria Nuland and author of a recent New Republic cover essay titled, "Superpowers Don't Get to Retire," believes "American action to stop the [ISIS] militants is imperative," and "a continued military presence in Iraq and action in Syria would have averted the crisis." According to the Times,

Kagan says President Obama's "disengagement despite the resurgence of organized terrorist groups in the region has created the climate to again make the case for interventionism." The Times goes on to report that Kagan "pointed out that he had recently attended a dinner of foreign-policy experts at which" former secretary of state Hillary Clinton "was the guest of honor." Kagan is quoted as saying, "I feel comfortable with her on foreign policy. ... It's something that might have been called neocon, but clearly her supporters are not going to call it that."

Analysts: Obama's Foreign Policy Legacy In Jeopardy. According to Julie Pace, in an analysis for the AP (6/16), "there is a sudden burst of uncertainty surrounding the way Obama has moved to bring the two conflicts he inherited" – the wars in Iraq and Afghanistan – "to a close" as the "fast-moving Islamic insurgency...rais[es] the possibility of fresh American military action more than two years after the last US troops withdrew." Pace notes that while the President has "cited the end of the war" in Iraq as among his "top achievements in office," the "vacuum left by American forces has been filled by waves of resurgent violence and burgeoning Sunni extremism." Pace says the "chaos in Iraq also raises questions about whether" the "small military presence" the US plans for Afghanistan as of next year "can prevent a similar backslide there or whether extremists are simply lying in wait until the US withdrawal deadline passes."

According to Jim Michaels of USA Today (6/16, 5.82M), "the images...of black-clad militants rampaging through Mosul, Iraq's second-largest city, and edging toward Baghdad are already drawing comparisons to the iconic image of US impotence: helicopters pulling desperate Americans out of Saigon in advance of the North Vietnamese invasion."

Under the headline, "Pennsylvania Town Rues Sacrifice Of Its War Dead," USA Today (6/16, Zoroya, 5.82M) reports from Hollidaysburg, Pennsylvania on the anger among veterans and families of US soldiers killed in Iraq over the resurgence of Sunni terrorists in the areas of Iraq that US soldiers fought and died to free. According to USA Today, "For many in Hollidaysburg, Iraq and Afghanistan meld into a seamless land of violence...where no amount of American sacrifice can change anything." USA Today adds that "there's a clear sentiment" among residents "that although matters may be unraveling in Iraq, no more American lives should be lost."

Brad Knickerbocker of the Christian Science Monitor (6/16, 566K) notes that in 2002, prior to the US-led effort that toppled Saddam Hussein's dictatorship, President Obama, then a state senator from Illinois, said, "What I am opposed to is the cynical attempt by Richard Perle and Paul Wolfowitz and other armchair, weekend warriors...to shove their own ideological agendas down our throats, irrespective of the costs in lives lost and in hardships borne. ... That's what I'm opposed to. A dumb war. A rash war." But Knickerbocker says the President now "might have to reengage militarily in Iraq two years after" he removed all US combat troops from the country.

Obama's Responsibility For US Troops' Exit From Iraq In 2011 Debated. On CNN's State of the Union, Sen. Lindsey Graham said, "The Obama administration wanted to say 'I ended the war in Iraq, I'm going to end the war in Afghanistan. ... I blame President Obama mightily for a hands-off policy when it comes to Iraq.'" In an op-ed for the Wall Street Journal (6/16, Subscription Publication, 5.51M), Paul Bremer, who served as President Bush's envoy to Iraq after the US invasion in 2003, blames the instability in Iraq on President Obama's decision to withdraw all US combat forces at the end of 2011.

Colin H. Kahl, the Director of the Middle East Security Program at the Center for a New American Security, and former deputy assistant secretary of defense for the Middle East, in a piece for Politico Magazine (6/16, 633K) titled, "No, Obama Didn't Lose Iraq," says that in 2011, "at great political risk," President Obama "approved negotiations with the Iraqi government to allow a force of around 5,000 American troops to stay in Iraq." However, according to Kahl, "as commander in chief, he was unwilling to strand U.S. forces in a hostile, anti-American environment without the legal protections and immunities required to ensure soldiers didn't end up in Iraqi jails."

Fred Hiatt, in his column for the Washington Post (6/16, 4.22M), writes that while "some argue that" the President "had no choice" but to remove all US troops "because Iraq wouldn't give legal immunity to U.S. soldiers," he believes that "if Obama had really wanted an agreement, and been willing to offer more than a few thousand soldiers, he could have negotiated one." According to Hiatt, "What no one disputes is that Obama was content with the zero option and sanguine about Iraq's prospects."

Retired General: Obama Needs To Send Petraeus Back To Iraq. In an article titled, "Obama Ignored General's

Pleas To Keep U.S. Forces In Iraq," the Washington Times (6/15, Scarborough, 455K) reports that retired Army Gen. John M. Keane, "who advised commanders in Iraq and helped devise the 2007 troop surge," is urging President Obama to "send retired Army Gen. David H. Petraeus back to Iraq, this time to provide an assessment to" the President and "advise" Prime Minister Maliki.

OBAMA POKES FUN AT CLIMATE CHANGE SKEPTICS AT UC IRVINE. The Christian Science Monitor (6/16, Seppenfield, 566K) reports that on Saturday, the President "lobbed a new grenade over the partisan wall," when at during the UC Irvine commencement address he "likened climate-change deniers in Congress to people who thought the moon was made of cheese and called them a 'fairly serious threat to everybody's future.'" The CSM acknowledges the President's frustration with Congress, but says that with his Saturday comments, he is "poking fun at almost half of America." The CSM says that the "fact is that 43 percent of Americans don't agree, and another 9 percent aren't sure, according to a new Bloomberg poll."

The Huffington Post (6/14, Bobic, 11.54M) also reports on the President's Saturday comments, saying he "slammed pundits and members of Congress who refuse to confront climate change in drought-stricken California on Saturday, calling them a 'fairly serious threat to everybody's future.'" Obama said, "Today's Congress, though, is full of folks who stubbornly and automatically reject the scientific evidence about climate change. They'll tell you it's a hoax, or a fad." Taking issue with critics who say he isn't a scientist, the President said, "I'm not a scientist either, but we've got some good ones at NASA."

Analysis: Facts Often Blurred in Power Plant Debate. The AP (6/16, Lederman) reports that the President's "new pollution limits for power plants have set off an avalanche of information about what the rules will cost, how they will affect your health and how far they will go toward curbing climate change," but "almost none of it is based in reality." However, that isn't "stopping the White House, environmental groups and the energy industry from serving up speculation in heaping doses." The piece looks at a variety of issues, and tries to judge a variety of claims by various groups and politicians.

FACTORY CLOSURES SAID TO FORCE EXPANSION OF WAGE GAP. The AP (6/16) reports that the "downfall" of US manufacturing has "done more than displace workers and leave communities searching for ways to rebuild devastated economies;" it has also become a "key factor in the widening income gap between the rich and everyone else." The AP says that there is no lack of jobs, but "gains often come at either the highest end of the wage spectrum — or the lowest." Focusing on Pennsylvania, the AP says that the state lost 258,000 "middle-income factory jobs" between 2001 and 2011, but the state "added jobs at the lower end of the wage spectrum — in health care and social services — and at the highest end, in sectors like management and finance."

San Jose's Minimum Wage Increase Considered A Success. USA Today (6/16, Davidson, 5.82M) reports that interviews with "workers, businesses and industry officials" show that San Jose's increase of its minimum wage from \$8 to \$10 two years ago "has improved the lives of employees while imposing minimal costs on employers." USA Today says that the city's "experience could help inform a debate over a controversial proposal backed by President Obama to raise the federal minimum wage by a roughly similar amount — from \$7.25 to \$10.10 an hour — that remains stalled in Congress because of Republican opposition." Still, Berkeley economics professor Michael Reich said that San Jose "is one of the nation's most prosperous cities, possibly making it easier for businesses to raise prices without suffering a drop-off in sales."

Fed Facing Decisions On Interest Rates. The Wall Street Journal (6/16, Hilsenrath, Subscription Publication, 5.51M) reports that when Fed policy makers meet this week, they need to decide on a strategy for increasing interest rates. The weak recovery has made the normal procedure of raising rates this long after a recession a questionable move.

New Factors Raising Market Concerns. In a front-page story, the Wall Street Journal (6/16, A1, Friedman, Strumpf, Subscription Publication, 5.51M) reports that the combination of potential civil war in Iraq and the unexpected primary loss of Eric Cantor has rattled investors, resulting in a substantial market decline last week. Despite the recent market rises, those factors, combined with impending Fed action, is raising concerns that the markets may be heading for a period of unsteadiness.

Samuelson: Unique Nature Of Great Recession Making Recovery An "Enigma." In his column for the

Washington Post (6/16, 4.22M), Robert J. Samuelson says that the financial markets “are sending mixed — and conceivably contradictory — signals on the economic outlook.” Stocks are “routinely setting records,” while “interest rates on bonds have dropped,” and both “messages can’t logically be correct.” Samuelson says that “post-crisis economic commentary has consistently misjudged the outlook,” underestimating “the crisis’s psychological effects on consumers and business managers.” The economy remains “an enigma” because the “past is less a guide to the future because the financial crisis and Great Recession are, in living memory, unique events.”

Editorial Wrap-Up:

NEW YORK TIMES. “Fighting Terrorism With More Money.” In an editorial, the New York Times (6/16, Subscription Publication, 9.65M) says that the President’s proposed Counterterrorism Partnerships Fund “already seems too heavily dependent on military responses.” Noting that “it appears that the new program is intended to be run out of the Pentagon,” the Times argues that this “would be a mistake,” adding that it “must also address the social and political drivers of instability and involve civilians as well as military officials.” The Times says there must be an emphasis on “good governance” and there must be “investment in community projects, education and moderate groups that build civil society and discourage extremism.”

“A Cramped View Of Antitrust Laws.” The New York Times (6/16, Subscription Publication, 9.65M) editorializes that a recent legal opinion in a case pitting Motorola Mobility against one of its suppliers, AU Optronics of Taiwan, could “severely limit the enforcement” of US antitrust laws “against foreign cartels that supply critical components used in cellphones, computers and other products Americans buy.” A three-judge panel of the 7th Circuit Court of Appeals ruled that US antitrust laws “cannot be applied to foreign companies as long as they do not deliver components to the United States – even if those parts are later used in finished products sold in the American market.” The Times argues that US antitrust law “allows antitrust cases in situations where anticompetitive activities overseas have a ‘direct, substantial, and reasonably foreseeable effect’ on American commerce, a standard that was certainly met for the 42 percent of the displays that Motorola used in phones sold in the United States.”

“A Boy’s Execution, 70 Years Later.”

WASHINGTON POST. “Eyes On Nov. 4.” The Washington Post (6/16, 4.22M) editorializes about the expected election this year in Washington, DC for the city’s attorney general, “which until now has been an appointed position.” The Post argues that “how democratic the contest will be remains very much up in the air,” noting that a “proposal is being floated that would essentially allow party insiders to select candidates for the Nov. 4 ballot.” The Post urges the DC Council to “summarily reject this misbegotten idea,” and to allow DC’s independent elections board to “set the rules for a fair and orderly contest.”

“More Deadly Than We Knew.” An editorial in the Washington Post (6/16, 4.22M) argues that while Saudi Arabia said it was closely monitoring the outbreak of MERS in 2012 and 2013, “events this year have begun to pull back the curtain on a disease outbreak that was — and remains — dangerous and not fully explained or explored.” Noting that the Saudi Ministry of Health now says the number of Saudi cases “was undercounted by 113, or about 20 percent,” the Post says this was “an alarming systemic failure and speaks volumes about such a closed society.” The Post argues that secrecy “greatly multiplied the danger of the disease,” and the “first line of defense in the months ahead must be absolute transparency.”

“Student Loan Fixes That Make Sense.” In an editorial, the Washington Post (6/16, Board, 4.22M) says that the Senate was smart to back away from Sen. Elizabeth Warren’s (D) plan to allow some student loan holders to refinance at lower rates. Instead, the Post endorses the President’s plan for “fixing the government’s income-based repayment system.” He says that “carefully adjusting graduates’ monthly payments to their incomes would be a more progressive method.” Noting that the President is expanding the existing “pay-as-you-go program,” and encourages Congress to do more.

WALL STREET JOURNAL. “The Standing To Sue Obama.” The Wall Street Journal (6/16, Subscription Publication, 5.51M) editorializes that efforts to sue President Obama for executive over-reach have been stymied by legal arguments that lawmakers bringing such suits would lack standing because they have not suffered legal

injury. The Journal notes that some legal experts have created a legal theory that would allow courts to hear political suits between two branches of government. Noting that individual lawmakers may lack standing to sue, the Journal contends that Congress can sue the Administration as an institution, claiming constitutional injury.

"The Next Afghan President." An editorial in the Wall Street Journal (6/16, Subscription Publication, 5.51M) argues that while Americans see Afghanistan as hopeless, Saturday's election shows that Afghans want to move away from religious extremism and ethnic violence and are deserving of international support past 2016.

"Tehran's French Backers." In an editorial, the Wall Street Journal (6/16, Subscription Publication, 5.51M) criticizes journalists for defending French bank BNP Paribas, which is accused of violating US sanctions against Iran and Syria and argues that despite pressure being put on the US from French officials about the case, if French companies want to do business in the US, they must follow the law.

"Colombia's Peace Gamble." An editorial in the Wall Street Journal (6/16, Subscription Publication, 5.51M) notes Colombia's success over the last decade due to free-market reforms and a fight against domestic terrorists, and argues that by reelecting President Juan Manuel Santos, Colombians are gambling that his peace efforts will be successful.

INTERIOR GIVES \$102 MILLION IN STORM PREVENTION TO 11 STATES. The E&E Daily (6/16) reports that Interior Secretary Sally Jewell announced "\$102.7 million in grants this morning to help communities along the Atlantic Coast cope with storms like Superstorm Sandy." The grants will "help fund more than 50 projects focusing on activities like wetland and sand dune restoration." Jewell said, "We are taking the lessons learned from this natural disaster to help local communities strengthen natural barriers between themselves and major storms such as Sandy that can cause major flooding and other damage." She added, "Together with our partners we are stabilizing beaches, restoring wetlands and improving the hydrology of coastal areas, both protecting local residents from the next big storm while creating jobs and restoring habitat for wildlife."

The AP (6/17) reports that the Interior department said "the projects will restore an estimated 6,634 acres of wetlands and marshes; 225 acres of beach; 364 acres of tidal buffers, and 16 miles of streams." The efforts will also "open 287 miles of streams to fish passage, and restore 147 acres of flood plains." The Interior department said that "the projects will create 600 jobs in local communities, and that young people and veterans will be given

special consideration in hiring." Additional coverage was provided by the [AP](#) (6/17), the [AP](#) (6/17), the [AP](#) (6/17), the [AP](#) (6/17), and the [AP](#) (6/17).

The [Hampton Roads \(VA\) Virginian-Pilot](#) (6/17, 422K), the [Houston Chronicle](#) (6/17, Parry, 2.23M), the [Greenfield \(IN\) Daily Reporter](#) (6/17, 31K), the [Roanoke \(VA\) Times](#) (6/17, 264K), the [Asbury Park \(NJ\) Press](#) (6/16, 372K), the [Syracuse \(NY\) Post-Standard](#) (6/17, 859K), the [Nashua \(NH\) Telegraph](#) (6/17, 55K), the [San Antonio Express-News](#) (6/17, 718K), the [Missoulian \(MT\)](#) (6/17, 122K), [NBC News](#) (6/17, 7.5M), the [Mail Online \(UK\)](#) (6/17, 2.97M), the [Guardian \(UK\)](#) (6/16, 1.59M), [KMPH-TV Fresno, CA](#) (6/17, 3K), [KIRO-TV Seattle](#) (6/17, 62K), [WSB-TV Atlanta](#) (6/17, 167K), [KATV-TV Little Rock, AR](#) (6/17, 41K), [WLNE-TV Providence, RI](#) (6/17, 4K), [KWTX-TV Waco, TX](#) (6/17, 48K), [WZVN-TV Fort Myers, FL](#) (6/17, 1K), [WVIR-TV Charlottesville, VA](#) (6/17, 12K), [WXOW-TV LaCrosse, WI](#) (6/17, 2K), [KOTA-TV Rapid City, SD](#) (6/17, 890), [KHOU-TV Houston](#) (6/17, 125K), and [KTUL-TV Tulsa, OK](#) (6/17, 28K) also picked up AP coverage.

SECRETARY JEWELL TO ANNOUNCE MAJOR MILESTONE FOR OFFSHORE WIND ENERGY IN MASSACHUSETTS.

The [reNews](#) (6/17) reports that Interior Secretary Sally Jewell will announce a major milestone for offshore wind energy in Massachusetts tomorrow, according to the Interior Department. The BOEM has been "preparing an environmental assessment and proposed sale notice for a multi-gigawatt site on the outer continental shelf."

Officials To Discuss Offshore Wind Energy Sites. The [Cape Cod \(MA\) Times](#) (6/16, 101K) reports that "state and federal officials will hold two meetings next week to discuss the next steps for leasing tracts of ocean south of the Martha's Vineyard and Nantucket for offshore wind energy projects." The article notes that "the state Executive Office of Energy and Environmental Affairs and the Massachusetts Clean Energy Center will host officials from the US Bureau of Ocean Energy Management for the meetings June 23 in Vineyard Haven and June 24 in New Bedford."

STATES SIGN CHESAPEAKE BAY WATERSHED AGREEMENT. [Reuters](#) (6/17, 2K) reports that an agreement to restore the Chesapeake Bay was signed by federal, state, and local officials on Monday. The Chesapeake Bay Watershed Agreement was signed by the governors of Delaware, Maryland, New York, Pennsylvania, Virginia and West Virginia; District of Columbia Mayor Vincent Gray; Ronald Miller, chairman of the Chesapeake Bay Commission; and Gina McCarthy, the administrator of the EPA. Virginia Gov. Terry McAuliffe warned that the program could only succeed with more money from federal government. McAuliffe said he had met Interior Secretary Sally Jewell and requested \$50 million to help fund the regional pact.

KIA'AINA'S SENATE CONFIRMATION STILL STALLED. The [Pacific News Center](#) (6/17) reports that Esther Kia'aina "continues to wait for her Senate confirmation as the next OIA Assistant Secretary for Insular Affairs and it looks like she may now have to wait until after the July 4th Congressional recess." The article notes that the White House is "focused on judicial and high-level cabinet appointments, ahead of the November elections, when Senate control could shift to the GOP."

CALIFORNIA FIRE THREATENS 500 HOMES. The [E&E Daily](#) (6/16) reports that "a fire burning in and around the Sequoia National Forest has destroyed at least two structures and led authorities to call for the evacuation of around 500 homes in central California." The Shirley fire "started Friday and by yesterday had scorched through 3.1 square miles of trees and brush northeast of Bakersfield, Calif." The blaze was "only 10 percent contained" as of Sunday night.

ADDITIONAL COVERAGE OF PRESIDENT OBAMA'S VISIT TO STANDING ROCK SIOUX RESERVATION.

Additional coverage of the President Obama's Standing Rock Sioux Reservation in North Dakota was provided by the [Indian Country Today Media Network](#) (6/16, 45K), the [Devils Lake \(ND\) Journal](#) (6/16, 14K), the [Fort Wayne \(IN\) Journal-Gazette](#) (6/14, 172K), [WEVO-FM Concord, NH](#) (6/17, 2K), and [KERA-TV Dallas](#) (6/17, 1K).

INTERIOR CRITICIZED FOR ABETTING KENTUCKY'S LAND GRAB FOR MINES. The Lexington (KY) Herald-Leader (6/17, 395K) editorializes that "rather than even thinking about appealing a federal judge's ruling in Kentucky," Interior Secretary Sally Jewell and the Office of Surface Mining "should be apologizing" for "abetting this state's three-decades long violation of the US Surface Mining Control and Reclamation Act by permitting strip mining without the consent of all the owners of the land." The paper lauds US District Judge Amul R. Thapar for his "ruling in favor of a Pike County family whose property is being stripped without its consent by a subsidiary of Tampa-based TECO Energy, which controls only a minority interest in the land." The eitorial notes that "the Interior secretary is responsible for ensuring that a state's enforcement meets the minimum requirements of the federal surface mining law," but "the Interior Department's lawyers responded to the Pike County landowners' lawsuit by saying, in effect, whatever Kentucky says is OK by us." The paper urges Jewell to "use this case to educate herself about how her agency's Office of Surface Mining is enabling the leveling of one of the world's most diverse ecosystems and has fallen far short in its duty to protect Appalachia's people and environment from surface mining's harms."

America's Great Outdoors:

National Park Service:

NATIONAL MALL MAKEOVER MAY FORCE BIG EVENTS TO MOVE. WRC-TV Washington (6/17, 312K) reports that some big events on the National Mall may be forced to move, "as the grass is in the midst of a multimillion dollar makeover." The NPS is "rebuilding the National Mall's turf, and with new turf comes new restrictions on use to protect the grass." The article notes that "the Library of Congress' annual September book festival is moving to the convention center," and "next year, the Folklife Festival may move to nearby streets."

WUSA-TV Washington (6/16, 95K) reports that the NPS has reached a deal with the Folklife Festival. The NPS said "it would allow the Smithsonian to close Jefferson and Madison Drives to provide additional space for tents and other activities so they do not destroy the new grass."

NPS OFFERING KAYAKING TRIPS THIS SUMMER AT BIGHORN CANYON NATIONAL RECREATION AREA.

The Missoulian (MT) (6/17, 122K) reports that "starting last year and expanding this summer," the NPS, which manages the Bighorn Canyon National Recreation Area, is "offering sit-on-top kayaking courses for free." Christy Fleming, chief of interpretation for the recreation area, said, "The kayaks are a way for people who don't have money to take a boat trip to see the lake."

CEDAR CREEK AND BELLE GROVE NATIONAL HISTORICAL PARK ANNOUNCES SUMMER RANGER PROGRAMS.

The Augusta (VA) Free Press (6/17, 1K) reports that Cedar Creek and Belle Grove National Historical Park is "once again offering a full-slate of ranger-conducted programs throughout this summer." According to the article, "programs will be offered on a daily basis beginning Saturday, June 14 and continue through August 16."

FIVE ENTITIES IN THE RUNNING TO RECEIVE YELLOWSTONE BISON. The AP (6/17) reports that Montana wildlife officials on Monday "released a short list of five entities that could receive bison from Yellowstone National Park under an experimental program to establish new herds of the animals." Although "ten entities have expressed interested in receiving the animals," the list was "narrowed to five proposals based on guidance from a panel of state, federal and tribal officials that met last week, said Ron Aasheim, spokesman for Montana Fish, Wildlife and Parks." The proposals are by the Fort Peck Indian Reservation's Assiniboine and Sioux tribes, the Utah Division of Wildlife Resources, the Wildlife Conservation Society, the Cherokee Nation, and the American Prairie Reserve.

Bureau of Land Management:

CONTINUING COVERAGE OF BUNDY DISPUTE. In continuing coverage of the dispute with Nevada rancher Cliven Bundy, NPR (6/17, Siegler, 519K) reports "for now, the BLM isn't talking." A spokesman said "only that the agency is working to ensure that those who broke the law are held accountable." However, "some former federal land managers say the agency's silence isn't helping the situation." Meanwhile, Bundy "promises his militia

supporters will also return in force" if "the federal government comes back."

BLM PLANS TO USE BIRTH CONTROL ON WILD HORSES IN UTAH. The AP (6/17) reports that BLM officials in Utah "plan to inject 130 wild horses with contraceptives next winter as part of effort to control the population." Gus Warr of the BLM in Utah says "the estimated 4,300 wild horses in the state is more than double the appropriate number." However, "the group Protect Mustangs, which disputes the BLM's assertion that there are too many wild horses, denounced the plan to use contraceptives and instead advocated that the herds be left alone to self-stabilize their numbers."

BLM TARGETS SPREAD OF FIRE-PRONE TREES IN PINE NUTS. The Reno (NV) Gazette-Journal (6/16, 166K) reports that the BLM is "embarking on a multiyear efforts, likely costing in excess of \$10 million, to halt or at least slow the spread of pinyon-juniper across the Pine Nuts, returning the rugged landscape to something closer to nature's intent." According to the article, "with work slated to begin this year and continue for another 10 to 15, the BLM plans an ambitious forest restoration project across nearly 40 square miles of the Pine Nuts, which straddle the boundary of Douglas and Lyon counties." Brian Buttazoni, planning and environmental coordinator for the BLM's Carson City District, said, "There are some trends in play, with some declining conditions, and this will hopefully reverse some of those trends. This will hopefully turn that around."

MAN ACCUSED OF SHOOTING TWO OFFICERS IDENTIFIED. The Sacramento (CA) Bee (6/16, 687K) reports that "authorities have identified the man who allegedly shot two law enforcement officers in Nevada County on Saturday as 60-year-old Brent Douglas Cole." Cole is accused of shooting a California Highway Patrol officer and a BLM ranger in the area of the South Yuba River campground in rural Nevada County.

Fish and Wildlife Service:

US OFFICIALS CRACK DOWN ON WILDLIFE-PRODUCT TRAFFICKING. The AP (6/16) reports that "federal officials say the US government is cracking down on the illegal trafficking of wild animal products across borders — especially through New York's Kennedy Airport, where some of the imports may be linked to terrorists." At a news conference Monday, US Trade Representative Michael Froman said "such trade is a threat to global security because it's driven by criminal elements." He said "some terrorist groups have used profits from items such as rhinoceros horns and elephant tusks to finance their activities." Coverage by the AP was also picked up by FOX News (6/16, 6.72M), the Bristol (TN/VA) Herald Courier (6/17, 81K), and the Uniontown (PA) Herald-Standard (6/17, 52K).

Also reporting on the story is Reuters (6/17, O'Donnell).

New York Lawmakers Praised For Supporting Legislation To Ban Ivory Sales. In an op-ed for the Syracuse (NY) Post-Standard (6/17, 859K), John F. Calvelli, executive vice president for public affairs at the Wildlife Conservation Society and Director of the 96 Elephants campaign, praises New York state lawmakers for "helping to put a stop to the senseless slaughter of elephants by passing legislation to ban the sale of ivory." He notes that "in a near-unanimous vote (104-1) this week, the State Assembly passed A. 8824 to ban the sale of ivory." Also, "a companion bill (S. 7194), introduced by state Sen. Andrew Lanza (R-Staten Island), is expected to gain broad support in the Senate."

FEDERAL GOVERNMENT, RANCHERS TEAM TO HELP WILDLIFE ALONG BORDER. The E&E Daily (6/16) reports that "ranchers and the federal government have joined forces to preserve land on the Texas-Mexico border that's teeming with wildlife." The Interior Department "recently spent \$3 million on a private ranch near Raymondville, Texas, in order to protect the ocelot, an endangered wild cat whose historical range between Mexico and the Lone Star State has been obstructed by the construction of a new border fence in the area." Officials said that "the ranch — which is also home to other rare species including the sheep frog and northern cat-eyed snake — will be added to the 90,000-acre Lower Rio Grande Valley National Wildlife Refuge."

Also reporting on the story is the Houston Chronicle (6/17, 2.23M).

FOURTH NEW MEXICO COUNTY JOINS LAWSUIT OVER PRAIRIE CHICKEN. The AP (6/17) reports that Lea County in southeastern New Mexico joined three other counties in the state last week in a lawsuit fighting the

listing of the lesser prairie chicken as a threatened species.

Rep. Steve Pearce said in a statement that "he applauds the New Mexico counties filing the lawsuit." He said, "The Fish and Wildlife Service's decision to cater to environmental groups and disregard science will devastate New Mexico's way of life. New Mexicans will pay the price in lost jobs, industry, ranching and oil and gas production."

Also covering the story are the Albuquerque (NM) Journal (6/17, 282K), the Carlsbad (NM) Current-Argus (6/17, 18K), the Carlsbad (NM) Current-Argus (6/17, 18K), and the Newsmax (6/13, 486K).

UNIVERSITY OF NEW HAMPSHIRE RECEIVES FUNDS FOR WHITE-NOSE SYNDROME RESEARCH. The AP (6/17) reports that the University of New Hampshire is "getting some grant money to do research on white-nose syndrome, a fungal infection that has killed hibernating bats in eastern North America." Researchers are receiving nearly \$261,000 from the FWS, "which announced \$1.8 million in grants for eight projects Monday." The article notes that "projects include studies to better understand bat immune responses to white-nose syndrome, investigations into methods to control the disease, and ways to examine the molecular infrastructure of the fungus that causes the disease."

BURYING BEETLES BEING REINTRODUCED IN MISSOURI. The E&E Daily (6/16) reports on the reintroduction of American burying beetles in Missouri. Earlier this month, St. Louis Zoo officials "introduced 168 beetles to Wah'Kon-Tah Prairie in southwest Missouri," and "they plan to reintroduce 180 more tomorrow." The article notes that "it is the third year of reintroductions since the zoo, Nature Conservancy, Fish and Wildlife Service and Missouri Department of Conservation partnered in an effort to re-establish the insect in Missouri."

STUDY SHOWS WOLVES HAVE RIPPLE EFFECT ON ECOSYSTEMS. The E&E Daily (6/16) reports that a study released in the Journal of Animal Ecology on Monday "unearthed historical fur trade records to find that having more wolves in an area controls coyote numbers and bolsters the number of red foxes." The data could have "implications for disputes over coyote control as well as the reintroduction of wild gray wolves into different states." William Ripple, a professor of ecology at Oregon State University and one of the authors of the study, said, "It's another piece to the puzzle that should be considered that wolves work as a natural controlling measure over coyotes."

NEW YORK'S LAKE GEORGE BECOMES "MODEL" WITH MANDATORY INSPECTIONS OF EVERY BOAT. The E&E Daily (6/16) reports that New York's Lake George has "become the first lake in the East to require inspections of every boat and trailer for invasive species." The article notes that "the inspection stations, free for boaters, will decontaminate any boats found to be harboring species such as zebra mussels or Eurasian watermilfoil."

PHOSPHOROUS POLLUTION STILL A CONCERN IN CHESAPEAKE BAY. The E&E Daily (6/16) reports that "phosphorus pollution continues to plague the Chesapeake Bay three decades after restoration efforts formally began." In the past decade, "progress has flatlined in reducing levels of the pollutant, one of two tied to the algae blooms and dead zones that kill fish and shellfish by starving them for oxygen." The article notes that "pollution levels are actually increasing in 16 percent of the rivers and streams monitored by the US Geological Survey."

TWO DUCKLINGS HATCH NEAR MCPHERSON SQUARE METRO. The Washington Post (6/17, Zauzmer, 4.22M) reports that "after being plagued by a thief, apparently human, who repeatedly took eggs from her nest," a mallard nesting near the McPherson Square Metro station "saw two of her three remaining eggs hatch on Monday morning." City Wildlife reported the theft of the eggs to the FWS, saying that tampering with a migratory bird's nest is a federal crime. However, "on Monday morning, the nest monitors met the disappearance of two more eggs with pleasure, not consternation," because "this time, those eggs had turned into baby ducks."

RESEARCHERS STUDYING THREATS TO RARE WYOMING LOONS. The AP (6/17) reports that "researchers are trying to determine why the loon population in Wyoming is dwindling and what can be done to stop it." The FWS, the NPS, the Biodiversity Research Institute of Maine, Wyoming Game and Fish, and the National Forest Service are participating in the five-year, \$6.5 million study, funded by the Ricketts Conservation Fund.

DENVER'S APPROACH TO FERAL CATS CRITICIZED. In her column for the Denver Post (6/17, Caldwell,

940K), Alicia Caldwell criticizes an effort by Denver and several animal welfare groups to trap feral cats, neuter them and return them to their territory. She agrees with a group of scientists who authored a commentary published in 2010 in *Conservation Biology* arguing against the trap-and-neuter strategy.

US Geological Survey:

USGS REPORT: NEW HAMPSHIRE WELL WATER CONTAINS METALS. The AP (6/17) reports that a USGS report says "about a third of well water samples from southeast New Hampshire contained metals at concentrations that exceed federal standards." According to the article, "researchers sampled water from 232 private bedrock wells from 2012 to 2013, testing for levels of naturally occurring arsenic, uranium, manganese, iron and lead," and "three in 10 had higher levels than those established by the US Environmental Protection Agency."

Securing America's Energy Future:

Onshore Energy Development:

BLM DEVELOPING PLAN TO SAVE GUNNISON SAGE GROUSE IN COLORADO, UTAH. The E&E Daily (6/16) reports that the BLM is "developing a sweeping plan to protect the Gunnison sage grouse in Colorado and Utah that involves amending land management plans in both states to install buffer zones around sensitive habitat, impose seasonal restrictions on oil and gas drilling and livestock grazing, and close roads and trails in occupied grouse habitat." The plan "builds on internal guidance issued last summer by BLM's Colorado State Office instructing employees on how best to manage occupied habitat for the Gunnison sage grouse." However, the new plan "significantly expands on that guidance by proposing to amend up to 11 resource management plans (RMPs) covering 800,000 acres of Gunnison sage grouse habitat in both states."

The Denver Post (6/17, Finley, 940K) reports that energy industry officials criticized the proposal. Western Energy Alliance vice president Kathleen Sgamma said that federal land managers "are putting in place very restrictive measures that will impact jobs and economic development in communities without good data showing that what they're doing is going to be effective for the species."

DEAL REPORTEDLY STRUCK ON LEASES IN COLORADO'S ROAN PLATEAU. The E&E Daily (6/16) reports that "a decadelong battle over whether to drill for gas atop" the Roan Plateau in Colorado "could be nearing a resolution, with environmentalists, industry, Colorado's governor and the congressional delegation reportedly backing a proposed settlement." According to the article, "attorneys representing environmental groups and industry have reportedly reached a proposed settlement that would have the Interior Department buy back some of the Roan leases and alter its preparation of a revised RMP." The deal would also "accelerate the production of gas elsewhere, create jobs, maintain most of the 'best leases' and provide regulatory certainty for all involved."

BLM RECORDS SHOW INSPECTION LAPSE IN OIL, GAS WELLS IN CALIFORNIA. The Sacramento (CA) Bee (6/16, 687K) reports that "federal officials in charge of overseeing the drilling of new oil wells on public land in California let three years pass without inspecting some high-priority sites, according to public records." The BLM records say "31 of 99 high-priority wells drilled from fiscal year 2009 to 2012 in the state's oil-rich Central Valley were not inspected during that period, the most recently available records provided by the bureau." However, "a BLM official in Sacramento disputes the number of uninspected wells, saying that bookkeeping errors have misrepresented the problem." Spokeswoman Dana Wilson said, "The BLM takes its responsibilities seriously and is continuing to improve our internal recording processes and our ability to inspect all high priority drilling operations to ensure they are done safely and responsibly."

BLM SEEKS PUBLIC INPUT ON PROPOSED NATURAL GAS WELLS NEAR VERNAL. The Deseret (UT) News (6/17, 610K) reports that the BLM is accepting public input "on an environmental assessment of a proposed gas well project 40 miles southwest of Vernal." The bureau's Utah Vernal Field Office is "presenting the assessment of Koch Exploration Co.'s proposal to drill up to 135 wells on up to 37 existing well pads in an area of around 340 acres of land."

Offshore Energy Development:

BP WINS FIRST PENTAGON CONTRACT SINCE SANCTIONS LIFTED. The Wall Street Journal (6/17, Cameron, Subscription Publication, 5.51M) reports that late Friday BP was granted its first new Pentagon contract since March, when the US government removed sanctions imposed against it following the Deepwater Horizon spill. BP beat two other bidders to win a \$43 million natural gas deal, its first new Defense Department supply deal in about 18 months.

NOBLE ACQUIRES 50% STAKE IN BP GULF OF MEXICO LEASES. FuelFix (6/16, 7K) reports that on Monday Noble Energy announced it will acquire 50% of BP's interest in 17 Gulf of Mexico exploration leases. The announcement didn't include payment details. In a statement BP said, "As part of BP's commitment to the region, where it is the largest investor and leaseholder, we look forward to working together to explore potential opportunities within these assets in coming years."

FLUOR SUES BP OVER ALLEGATIONS IT BROKE DEEPWATER HORIZON CLEANUP CONTRACT. FuelFix (6/16, Eaton, 7K) reports that Fluor Corp. is suing BP over allegations that BP is in violation of an agreement to repay legal costs that Fluor incurred from "workers' compensation claims related to cleanup efforts" following the Deepwater Horizon spill. A Fluor subsidiary agreed to help BP clean Deepwater Horizon pollution in 2010 and trained "unemployed Florida and Alabama residents to restore the beaches, along with other services." However, Fluor says a condition of agreeing to help was that BP had to "agree to protect it against legal costs."

Tackling America's Water Challenges:

BOR TO HOLD LAKE BERRYESSA COMMUNITY FORUM. The Vacaville (CA) Reporter (6/17, 87K) reports that the BOR will "hold a meeting of the Lake Berryessa Community Forum on Wednesday, June 18."

Empowering Native American Communities:

BIA CHIEF WASHBURN ANNOUNCES INDIAN HIRING INITIATIVE. The Native News Online (6/17) reports, "On the heels of President Obama's historic visit yesterday to the Standing Rock Sioux Tribe of North and South Dakota, Assistant Secretary – Indian Affairs Kevin K. Washburn today announced the implementation of a new initiative to hire more American Indian and Alaska Native veterans" for Indian Affairs. Washburn said, "In building a 21st century workforce, we recognize the importance of attracting and retaining veterans in this organization."

Also reporting on the story is the Jamestown (ND) Sun (6/17, 3K).

BIA CONSIDERING NEW RULES TO STREAMLINE RIGHTS-OF-WAY REQUESTS. The Hill (6/17, Devaney, 237K) reports that the BIA is "considering new rules that would speed up the process by which companies can request rights-of-way to use Indian land, the agency said Monday." The BIA said "it is looking to modernize the process by establishing a timeline for the agency to review rights-of-way requests and clarifying that the agency can only disapprove of requests if there is a compelling reason to do so."

THREE MONTANA COUNTIES REACH SETTLEMENT IN AMERICAN INDIAN VOTER ACCESS CASE. The E&E Daily (6/16) reports that "the complexion of some of this year's elections may have changed dramatically, as three Montana counties reached a settlement Friday in a two-year-old lawsuit that will see satellite voting offices stationed in American Indian reservations in the state for the first time." According to the article, "with Friday's settlement between the members of the Northern Cheyenne, Crow and Fort Belknap tribes and election officials in Big Horn, Rosebud and Blaine counties in Montana, satellite late registration and absentee voting offices will be set up on the three reservations each Wednesday and Thursday starting 30 days before election day on Nov. 4 this year."

Top National News:

OBAMA MULLS SENDING SPECIAL OPS TEAM TO IRAQ TO COORDINATE US AIRSTRIKES. On Monday, the three network newscasts devoted more than 20 minutes – or about a third of their combined air time – to

reports on various aspects of the ongoing crisis in Iraq, and both NBC Nightly News and the CBS Evening News led with breaking news on developments in Iraq. Much of the reporting and commentary yesterday and this morning frames the choice President Obama faces regarding whether or not to use US military air power to help the Iraqi government arrest the forward momentum of ISIL, with some casting the situation as a repeat of debates over the initial US invasion of the country in 2003. At the opening of NBC Nightly News (6/16, lead story, 3:50, Williams, 7.86M), Brian Williams said, "It's not yet clear if the US will take any action in Iraq." According to Williams, the President "ruled out any troops, and the American people aren't at all sure we should take any action even though what's happening now is a direct outgrowth of the US invasion there over a decade ago."

On MSNBC's Hardball (6/17, 689K), Chris Matthews asked, "Are we going to kill Arabs again on international television?" Matthews went on to say that "the same people who were whooping up Iraq war fever in 2003 are back at it again, the usual suspects once again...are talking up US military engagement in Iraq. They were wrong then – dead wrong – and they are wrong again...so why does any one even listen to the neocon chorus?" But in his opening monologue on FOX News' The O'Reilly Factor (6/16, 2.53M), Bill O'Reilly said, "I fully expect President Obama to begin bombing the al Qaeda army very soon." O'Reilly added, "If he does not do that, it would be an enormous dereliction of duty."

In the lead story for the CBS Evening News (6/16, lead story, 1:45, Glor, 5.08M), Jeff Glor said, "The last US forces left Iraq in December 2011," but President Obama "may now send some back." Correspondent David Martin went on to report that "one of the options being presented to the President calls for sending teams of special forces back into Iraq," although they "would not go into the field to fight alongside Iraqi troops." Instead, according to Martin, they "would train and advise" the Iraqi military. On ABC World News (6/16, story 2, 3:00, Muir), David Muir also reported that the President is "considering sending special forces into Iraq to advise Iraqi troops."

According to the Los Angeles Times (6/17, Cloud, Parsons, 3.46M), the President is considering deploying a "special operations team" that "would be barred from engaging in ground combat," but could "coordinat[e] US airstrikes on insurgent positions." The Times adds that "sending US special operations forces, even a small detachment, could be seen as backtracking from Obama's pledge last week not to put US troops back on the ground" in Iraq.

Politico (6/16, Everett, 637K) reports that "aides don't expect Obama to seek congressional approval if he pursues the airstrikes that many in Congress are asking for."

AFP (6/17) reported that in a letter sent to Congress on Monday, President Obama announced that "about 275 US military personnel are being deployed to Iraq to help American personnel and protect the embassy in Baghdad." AFP notes that the President said the troops will be in Baghdad "for the purpose of protecting US citizens and property, if necessary," but are also "equipped for combat."

According to the AP (6/17, Alman), "About 160 troops are already in Iraq, including 50 Marines." The AP reports that an unnamed "US official" says that "under the authorization Obama outlined...the US will put an additional 100 soldiers in a nearby third country where they would be held in reserve until needed." The New York Times (6/17, Nordland, Subscription Publication, 9.65M) calls the deployment of US security personnel "an additional sign of diminished confidence in" the Maliki government.

Reuters (6/17, Zengerle, Cowan) reports that the White House wants to take some money that is supposed to pay for US military operations in Afghanistan and use it to pay for a US intervention in Iraq. Politico (6/16, Ewing, 637K) points out that the President "has an impressive amount of firepower at his disposal as he weighs his options," and notes that "at least four U.S. Navy warships are operating in the Persian Gulf...including a nuclear-powered aircraft carrier, a cruiser and a destroyer."

The Washington Post (6/17, A1, Sly, Hauslohner, Morris, 4.22M) reports that Ali al-Musawi, a "senior adviser" to Prime Minister Nouri al-Maliki, has "appealed to the Obama administration to commit air support and drone strikes," warning that "otherwise there is a danger terrorism will win." According to the Post, Musawi "cited Iraq's Strategic Framework Agreement with the United States, which spells out a range of areas of mutual interest and cooperation, as the basis on which Iraq is hoping for increased US military involvement."

The Washington Post (6/17, A1, Whitlock, 4.22M) reports that former "military commanders" warn that while the Pentagon could "probably prevent Sunni insurgents from marching into Baghdad...other missions would be far more complex and risk drawing the United States back into an Iraqi civil war." And, according to the Post, "The Pentagon's ability to deploy drones to conduct surveillance and carry out airstrikes...may be limited" if ISIL "stay[s] within the cities they have taken control of in recent weeks, raising the likelihood of civilian casualties."

Reuters (6/17, Al-sanjary, Heavey) reports that in an interview with Yahoo! News on Monday, Secretary of State Kerry said a US air assault on ISIL would not be "the whole answer," but "may well be one of the options that are important." Kerry added, "When you have people murdering, assassinating in these mass massacres, you have to stop that – and you do what you need to do if you need to try to stop it from the air or otherwise."

The Christian Science Monitor (6/17, Mulrine, 566K) reports that "after years of war," many Islamist militants "have learned not to mass in one place for fear of providing US forces with easy targets," but, according to the Monitor, ISIL fighters "do not seem to share this approach," which "could make B-1 bomber strikes a possibility."

Marines Arrive in Baghdad To Protect US Personnel, Facilitate Potential Evacuation. On ABC World News (6/16, story 2, 3:00, Muir), correspondent Martha Raddatz reported from Baghdad that a "platoon of specialty trained Marines expert in evacuation and counterterrorism" is "now in place here to protect America's embassy," which Raddatz described as a "\$700 million fortress." According to Raddatz, "a significant number of the 5,000" US personnel in Baghdad already "have been evacuated."

The Washington Times (6/17, Boyer, 455K) reports that some of the US personnel normally assigned to the embassy in Baghdad "are being relocated to US consulates in Basra and Erbil and to the Iraq Support Unit in Amman, Jordan."

UN Moves Staff From Baghdad To Jordan. The Los Angeles Times (6/17, Bulos, King, 3.46M) reports that the UN has "moved nearly 60 staffers from Baghdad to neighboring Jordan with the intention of relocating them to northern Iraq."

More Commentary On Obama And The Crisis In Iraq. In his column for the Washington Post (6/17, 4.22M), Marc Thiessen notes that in 2011, Vice President Biden predicted that the President's handling of the war in Iraq "could be one of the great achievements of this administration." Thiessen adds that "now...as Iraq descends into chaos, Democrats are trying to blame the fiasco on — you guessed it — George W. Bush." But according to Thiessen, "this is a mess of President Obama's making" because when he "took office he inherited a pacified Iraq, where the terrorists had been defeated both militarily and ideologically."

But Eugene Robinson of the Washington Post (6/17, 4.22M) asserts that the President's "instincts about Iraq and Syria have been sound from the beginning," and Biden "was right" when he "argued that rather than insist on a unitary Iraq, we should accept the division of the country — along ethnic and religious lines — into separate Shiite, Sunni and Kurdish states."

Walter Pincus, in his column for the Washington Post (6/17, 4.22M), says, "Baghdad's problems started decades before Obama reached the White House," and "even...long before Bush implemented his ill-conceived, costly invasion to bring US-based 'democracy' to a country that neither he nor his top advisers understood."

Michael McAuliff, in a piece for the Huffington Post (6/16, 11.54M), says that "with Iraq on the verge of unraveling after the departure of US forces, conservative pundits and some politicians who were wrong about Iraq then are" making the claim that the US invaded Iraq in 2003 in order to "liberate the Iraqis," and are blaming President Obama for failing to hold the gains won by US troops.

Also in the Huffington Post (6/16, 11.54M), Stephen Schlesinger of the Century Foundation says US "responsibility" for Iraq "ended in 2010 when the Iraqis essentially kicked US forces out of Iraq by refusing to sign a status of forces agreement with Washington." On the other hand, in a column for the Wall Street Journal (6/17, Subscription Publication, 5.51M) under the headline, "The Opportunities For Obama Amid Iraq's Crisis," Gerald Seib says the Administration ought to pressure Iraqi Prime Minister Maliki to finally sign a Status of Forces agreement.

George Will, in his column for the Washington Post (6/17, 4.22M), says ISIL's string of recent victories are "redundant evidence that the U.S. experience in Iraq was the worst episode of squandered valor in US history."

OBAMA TO SIGN ORDER BOOSTING LGBT JOB PROTECTIONS. Though the crisis in Iraq continues to dominate the news cycle overwhelmingly, President Obama's plans to sign an executive order extending job protections to LGBT workers generated a brief report on ABC World News and extensive print coverage this morning, most of which highlights the positive reaction from gay rights advocates – and indicates the move may seek to energize a key Democratic constituency ahead of the November contests. The AP (6/17, Pace) notes the order will ban "federal contractors from discriminating against employees on the basis of their sexual orientation or gender identity." According to the White House, "the order being drafted...would impact about 14 million workers whose employers or states currently do not ban workplace discrimination against gay, lesbian, bisexual and transgender individuals"

ABC World News (6/16, story 5, 0:10, Muir) briefly reported on "the White House announcing" a "move to protect millions of American workers," adding that the President "will sign an order barring Federal contractors from discriminating employees based on sexual gender or identity." McClatchy (6/17, Clark, Subscription Publication, 23K) says "the move, coming a day before the president headlines the 15th annual Democratic National Committee LGBT Leadership Council's fundraiser in New York, is likely to energize gay voters in advance of November's midterm elections." On its website, Roll Call (6/16, Dennis, Subscription Publication, 76K) similarly reported that "the decision...could help energize the party – and its donor base – ahead of the midterm elections," while the Christian Science Monitor (6/17, Feldmann, 566K) said the "move...may be aimed in part at energizing Democratic voters ahead of the November elections."

In a story headline "President Obama Seeks Political Boost From LGBT Executive Order," Politico (6/16, Dove, Epstein, 637K) says "this will be a week of the administration trumpeting its gay rights record." In addition to Tuesday night's fundraiser, "Thursday, the Justice Department is set to release a report detailing all the ways it has broadly interpreted the Supreme Court's United States v. Windsor decision which struck down the Defense of Marriage Act last year." Moreover, "the White House will host a meeting Thursday afternoon about the executive order and the report, which will identify Social Security and veterans affairs benefits as the two areas where the federal government has not been able to apply the Windsor decision, according to sources briefed on the plans."

The Washington Post (6/16, Goldfarb, Eilperin, 4.22M) reports that the order, which according to activists is "the last significant action Obama is likely to be able to take to advance gay rights without the cooperation of Congress," is expected to "have an impact on some of the biggest companies that do business with the government, including Exxon Mobil and Tysons Corner-based SAIC."

McClatchy (6/17, Clark, Subscription Publication, 23K) notes ACLU executive director Anthony Romero called the Administration's announcement "historic," and said Obama "has done more for the struggle for LGBT equality than all previous presidents combined." Human Rights Campaign spokesman Fred Sainz said Obama's "principled positions" are "clear and compelling proof that these are no longer moral decisions, but politically advantageous as well."

USA Today (6/17, Jackson, 5.82M) reports White House spokesman Josh Earnest said yesterday no signing date has yet been set, as "the specific details" of the executive order "have not been finalized." Bloomberg News (6/17, Doming, 2.76M) notes that "while the Democratic-controlled US Senate last year passed a measure that would make such discrimination illegal, the House, where Republicans hold the majority, hasn't taken up the legislation." Earnest said on Monday, "The door for legislative action remains open." Reuters (6/17, Mason) quotes Human Rights Campaign president Chad Griffin as saying, "The president will not only create fairer workplaces across the country, he will demonstrate to Congress that adopting federal employment protections for LGBT people is good policy and good for business." However, The Hill (6/16, Sink, 237K) reports, "action in the House though seems unlikely," as "top Republicans, including House Speaker John Boehner...have called the bill redundant and warned it would cost jobs by creating frivolous litigation."

The Los Angeles Times (6/17, Parsons, Memoli, 3.46M) reports, "Beyond the practical impact, the executive order, putting discrimination against gays and lesbians in the same category as racial or gender discrimination, marks another symbolic milestone for gay rights activists." Yesterday, "the Family Research Council...accused the White House of timing Monday's announcement to 'curry favor with activist organizations,' and noted that

Obama was scheduled to speak to" the New York fundraiser Tuesday.

The Wall Street Journal (6/17, Lee, Subscription Publication, 5.51M) reports that Democratic lawmakers generally backed the move, which they viewed as incremental, and called for legislative action. Sen. Tom Harkin said in response to the White House announcement, "The reality is that many LGBT workers still remain vulnerable to employment discrimination on the basis of sexual orientation or gender identity."

The Huffington Post (6/16, Bendery, 11.54M) notes "Valerie Jarrett, a senior adviser to the president, tweeted her support for the executive order shortly after the news broke." The Washington Times (6/17, Boyer, 455K), meanwhile, quotes DNC chair Debbie Wasserman Schultz as saying Obama's move "marks another significant step in our nation's progress on civil rights," and notes "LGBT activists responded with enthusiasm at the news."

In an editorial, the Washington Post (6/17, 4.22M) says Obama "would have preferred comprehensive nondiscrimination policy, which only Congress can approve," and although "he was wrong to wait so long" before moving to draft an executive order, "he was not wrong that legislation...is the right goal. ... It is Congress's turn to act."

Pelosi Urges San Francisco Archbishop To Skip "March For Traditional Marriage." The Washington Times (6/17, Chasmar, 455K) reports that in a letter, House Minority leader Nancy Pelosi urged San Francisco Archbishop Salvatore Cordileone "to cancel his appearance at a march for traditional marriage on the Supreme Court this Thursday." Cordileone "is one of the featured speakers." Wrote Pelosi, "If someone is gay and is searching for the Lord and has good will, then who am I to judge him?"

Perry On Homosexuality Therapy: "We'll Leave That To The Psychologists And The Doctors." Politico (6/16, Topaz, 637K) reports former Texas Gov. Rick Perry yesterday "addressed his previous comments on homosexuality, saying he will let medical professionals determine the efficacy of homosexuality therapy and electing not to condemn the practice." During an interview on CNBC, Perry said, "The fact is, we'll leave that to the psychologists and the doctors." Perry also said, "I don't necessarily condone that lifestyle. ... I don't condemn it, either. We're all children of God."

The Washington Times (6/17, McLaughlin, 455K) notes that in San Francisco last week, Perry said, "I may have the genetic coding that I'm inclined to be an alcoholic, but I have the desire not to do that, and I look at the homosexual issue the same way."

HOUSE PANELS EXAMINING WHETHER LOST LERNER EMAILS AMOUNT TO OBSTRUCTION. Media reports this morning indicate Republican lawmakers are reacting with skepticism to the IRS's claim that emails sent and received by Lois Lerner, which are central to an investigation into the agency's alleged targeting of conservative groups during the 2012 election cycle, were lost as a result of a computer crash in 2011. The story was not mentioned on the network newscasts, and print reports almost universally notes that the IRS' claim reignited the controversy just as it had started to die down. While the coverage does note the White House's assertion that the IRS's explanation is reasonable, much of the focus is on the anger of Republican lawmakers and other conservatives.

The New York Times (6/17, Joachim, Subscription Publication, 9.65M) reports that according to congressional aides, the House Ways and Means Committee and the House Oversight Committee are examining whether the IRS's claim that "it lost emails of interest to investigators amounted to obstruction and a violation of federal record-keeping rules." The agency told investigators last week that two years' worth of emails sent and received by Lois Lerner, who is at the center of an investigation "into accusations of politically motivated misconduct by the agency" had been "destroyed because of a computer crash in mid-2011." The claim "added to suspicions among Republican lawmakers that the I.R.S. was not cooperating fully with the investigations of its treatment of conservative political groups seeking tax-exempt status during the 2012 election cycle." The Washington Post (6/16, Bump, 4.22M) noted in its "The Fix" blog that the disappearance of the emails "quickly triggered skepticism, particularly from Congressional Republicans trying to figure out whether Lerner was acting on orders from Washington."

Politico (6/16, Bade, Weinger, 637K) reported that the email flap "opens up a whole new can of worms in the controversy – just as several congressional investigators were wrapping up their probes of the scandal."

Republicans on the Senate Finance Committee, "sources say, had pretty much wrapped up its bipartisan probe of the matter," are "saying they'll have dig in again to rework the case."

The Washington Times (6/17, Dinan, 455K) reports that Republicans "ridiculed" the IRS claim, and congressional investigators "began interviewing IRS technical staff to try to get to the bottom" of the loss of the emails.

The Daily Caller (6/16, Howley, 408K) reported that Oversight Committee Chairman Darrell Issa has subpoenaed IRS Commissioner Koskinen to testify about the lost emails. In a letter accompanying the subpoena, Issa wrote, "I will not tolerate your continued obstruction and game-playing in response to the Committee's investigation of the IRS targeting. ... For too long, the IRS has promised to produce requested — and, later, subpoenaed — documents, only to respond later with excuses and inaction. Despite your empty promises and broken commitments to cooperation, the IRS still insists on flouting Constitutional congressional oversight."

USA Today (6/17, Korte, Schouten, 5.82M) reports that IRS Commissioner Koskinen has agreed to testify before both the Oversight and Ways and Means panels about the emails. Meanwhile, Ways and Means Chairman Dave Camp said that House Republicans "were 'simply not going to accept the IRS claim that these documents are not recoverable,'" and "called on the Obama administration to order the release of any e-mails Lerner may have sent to the White House or other agencies." White House spokesman Josh Earnest said that speculation about the emails is "indicative of the kinds of conspiracies that are propagated around this story. ... And they're propagated in a way that has left people with a very mistaken impression about what exactly occurred."

White House: IRS Explanation "Entirely Reasonable." The Hill (6/16, Sink, 237K) reported that the White House said Monday that the IRS's explanation for losing the emails is "entirely reasonable." Earnest told reporters, "You've never heard of a computer crashing before?" Earnest said that the Administration "had turned over some 67,000 other emails sent or received by Lerner during her tenure at the agency, calling it a 'good-faith effort' by the IRS to assist in investigations," adding, "So if we are trying to hide Lois Lerner's e-mails from congressional oversight, there's a pretty large loophole. ... The far-fetched skepticism expressed by some Republican members of Congress I think is not at all surprising and not particularly believable."

Editorial Wrap-Up:

NEW YORK TIMES. "Innocents At The Border." In an editorial, the New York Times (6/17, Subscription Publication, 9.65M) says that the Administration is "scrambling to respond" to the flow of unaccompanied minors. The Times says the Administration "needs to mount a sustained surge of its own, of humanitarian care, shelter and legal assistance for children who have faced horrific traumas in fleeing violence in their home countries." Finally, the Times says that it is "infuriating to see the long-term reform that would ease the problem...being sent to its doom by the short-term political scheming of Congress's hard-core anti-immigrant, anti-Obama caucus."

"Legislating Ignorance About Guns." The New York Times (6/17, Subscription Publication, 9.65M), in an editorial, calls on Congress to allow "federally financed research on gun violence," and notes that President Obama has called for assigning \$10 million "to the Centers for Disease Control and Prevention" for such a study — to GOP opposition. The Times concludes that "the price of ignorance...is measured in tens of thousands of preventable deaths and avoidable injuries from guns, year in and year out."

"How Health Care Systems Stack Up." A New York Times (6/17, Subscription Publication, 9.65M) editorial on a Commonwealth Fund study of healthcare quality around the world says that the US's poor showing in the study reflects "the high cost of its medical care and the absence of universal health insurance, a situation being addressed by the Affordable Care Act." The Times argues that the ACA, "if left to accomplish its goals by Congressional Republicans, is the best way to alleviate the cost and quality issues for most Americans."

WASHINGTON POST. "Building An Inclusive Iraq." The Washington Post (6/17, 4.22M), in an editorial, contends that Iraqi Prime Minister Nouri al Maliki's "obdurate refusal to share power with Sunnis helped fuel the rebellion against him by ISIS and other Sunni extremists." The Post adds, "Perhaps Mr. Maliki would be content to see Iraq fragment into...an Iranian-backed Shiite rump state, ruled by him, plus an ISIS-run caliphate and a Kurdish republic."

"Stamping Out Workplace Bias." In an editorial, the Washington Post (6/17, 4.22M) says that the President "would have preferred comprehensive nondiscrimination policy, which only Congress can approve," and although "he was wrong to wait so long" before moving to draft an executive order, "he was not wrong that legislation...is the right goal. ... It is Congress's turn to act."

"A Healthier Start Time."

WALL STREET JOURNAL. "Obama's Corporate Exodus." In an editorial, the Wall Street Journal (6/17, Subscription Publication, 5.51M) argues that the trend for US companies to domicile overseas for tax purposes is driven by the nation's extremely high corporate tax rate and policy of taxing a company on its full worldwide earnings. The Journal says that if the US wants to grow its economy, it needs to have a competitive tax system.

"Supreme Speech Victory." In an editorial, the Wall Street Journal (6/17, Subscription Publication, 5.51M) casts a Supreme Court ruling allowing a challenge to an Ohio law banning lies in political campaigns to move forward as a rebuke to public officials seeking to silence criticism of their actions.

"Clinton On Keystone." In an editorial, the Wall Street Journal (6/17, Subscription Publication, 5.51M) criticizes Hillary Clinton over her telling the Toronto Globe and Mail in a June 11 interview that she "can't respond" to a question about whether she thinks the US should approve the Keystone project, because while at the State Department, she "had responsibility for it and it's been passed on and it wouldn't be appropriate." The Journal says that Clinton's response is simply a case of her wanting to avoid offering a public opinion on the project until after Obama makes a decision on Keystone, so that she can gauge public reaction before announcing her stance.

"Don't Cry For Thee, Argentina." In an editorial, the Wall Street Journal (6/17, Subscription Publication, 5.51M) hails the Supreme Court's ruling in cases brought by Argentina's bondholders who refused to accept reduced payments after the country's 2001 default as a victory for the rule of law.

Washington Schedule:**TODAY'S EVENTS IN WASHINGTON.**

White House:

PRESIDENT OBAMA — Travels to TechShop Pittsburgh in Pittsburgh, Pennsylvania to deliver remarks on the economy; travels to New York City to attend the DNC LGBT Gala and take part in another DNC Event.

VICE PRESIDENT BIDEN — No scheduled events.

US Senate: 11 a.m. SENATOR MURRAY – WORKING FATHERS, FAMILIES — In honor of Fathers Day, Senator Murray is hosting a Working Fathers and Families Meet and Greet (WFF) to continue highlighting the need for policies that better support modern working families. Immediately following that event, Senator Murray will deliver remarks on the Senate floor on the topic. Location: U.S. Capitol, S- 115.

11:30 a.m. SPOTLIGHT ON INNOVATION — Immediately following the 10 a.m. hearing, Chairwoman Stabenow will host a 'Grow It Here, Make It Here Spotlight on Innovation event at 11:30 a.m. in the Kennedy Caucus Room. Open to the public until 1:30 p.m. Contact: Ben Becker, 202-224-5466, ben_becker@ag.senate.gov Location: Kennedy Caucus Room, Russell Senate Office Building.

9:30 a.m. HOMELAND SECURITY AND GOVERNMENTAL AFFAIRS — Subcommittee on Investigations hearings to examine conflicts of interest, investor loss of confidence, and high speed trading in the United States stock markets. Witnesses: PANEL ONE: BRADLEY KATSUYAMA, President & CEO, IEX Group, Inc., New York, NY; ROBERT H. BATTALIO, Professor of Finance, Mendoza College of Business, University of Notre Dame, Notre Dame, IN. PANEL TWO: THOMAS W. FARLEY, President, NYSE Group, New York, NY; JOSEPH P. RATTERMAN, Chief Executive Officer, BATS Global Markets, Inc.; Lenexa, KS; JOSEPH P. BRENNAN, Principal and Head of Global Equity Index Group, The Vanguard Group, Inc., Malvern, PA; STEVEN QUIRK, Senior Vice President, Trader Group, TD Ameritrade, Omaha, NE. <http://www.hsgac.senate.gov/subcommittees/investigations/hearings/conflicts-of-interest-investor-loss-of-confidence-and-high-speed-trading-in-us-stock-markets> Location: 216 Hart.

10 a.m. AGRICULTURE, NUTRITION AND FORESTRY — Hearings to examine creating jobs through bio based manufacturing. Witnesses: 1. Scott Vitters, General Manager, PlantBottle Innovation Platform, The Coca-Cola Company, Atlanta, GA. 2. Ashford A. Galbreath, Director, Advanced Materials and Comfort Engineering, Research and Development, Lear Corporation, Southfield, MI. 3. Kurtis Miller, President, Business Unit, Cargill Industrial Specialties, Cargill, Inc., Hopkins, MN. 4. Adam Monroe, President, Americas, Novozymes North America Inc., Franklinton, NC; 5. Mr. J.D. Hankins, II, Vice President, Hankins, Inc., Ripley, MS. <http://www.agriculture.senate.gov/> Location: 328A Russell.

10 a.m. APPROPRIATIONS — Energy & Water Subcommittee Markup of the FY15 Energy and Water Development Appropriations Bill. <http://www.appropriations.senate.gov/event/energy-water-subcommittee-fy15-markup> Location: 192 Dirksen.

10 a.m. BANKING, HOUSING & URBAN AFFAIRS — Nominations hearing on Julian Castro to be Secretary of the U.S. Department of Housing and Urban Development, U.S. Department of Housing and Urban Development; Laura Wertheimer to be Inspector General of the Federal Housing Finance Agency Federal Housing Finance Agency . http://www.banking.senate.gov/public/index.cfm?FuseAction=Hearings.Hearing&Hearing_ID=0c6f18e8-8255-4d61-8bed-f9563fcb50e9 Location: 538 Dirksen.

10 a.m. COMMERCE, SCIENCE, AND TRANSPORTATION — Subcommittee on Consumer Protection, Product Safety, and Insurance hearings to examine protecting consumers from false and deceptive advertising of weight-loss products. Witnesses: Witness Panel 1: Mary Koelbel Engle, Associate Director, Division of Advertising Practices, Bureau of Consumer Protection, Federal Trade Commission; Dr. Mehmet C. Oz, Chairman and Professor of Surgery, Columbia University College of Physicians and Surgeons, Host, The Dr. Oz Show; Dr. C. Lee Peeler, President and Chief Executive Officer, Advertising Self-Regulatory Council, Executive Vice President, Council of Better Business Bureaus; Steven M. Mister, President and Chief Executive Officer, Council for Responsible Nutrition; Robert Hatton Haralson IV, Executive Director, TrustInAds.org; Dr. Daniel Fabricant, Executive Director and Chief Executive Officer, Natural Products Association. http://www.commerce.senate.gov/public/index.cfm?p=Hearings&ContentRecord_id=c1698871-3625-4f67-b0e5-a06d3bab6ca1&ContentType_id14f995b9-dfa5-407a-9d35-56cc7152a7ed&Group_idb06c39af-e033-4cba-9221-de668ca1978a Location: 253 Russell.

2:30 p.m. ARMED SERVICES — Subcommittee on SeaPower to receive a CLOSED briefing on the major threats facing Navy forces and the current and projected capabilities of the Navy to meet those threats. Witnesses: Vice Admiral Joseph P. Aucoin, USN, Deputy Chief of Naval Operations, Warfare Systems (N9) Office of the Chief of Naval Operations; Arthur H. Barber III, Deputy Director, Assessment Division (N81B) Office of the Chief of Naval Operations. <http://www.armed-services.senate.gov/hearings/14-06-17-briefing-on-the-major-threats-facing-navy-forces> Location: SVC-217.

3 p.m. FOREIGN RELATIONS — Hearings to examine the nominations of Jonathan Nicholas Stivers, of the District of Columbia, to be an Assistant Administrator of the United States Agency for International Development, and Joan A. Polaschik, of Virginia, to be Ambassador to the People's Democratic Republic of Algeria, Department of State. <http://www.foreign.senate.gov/hearings/nominations-ambassador-to-peoples-democratic-republic-of-algeria-and-asst-admin-usaid> Location: 419 Dirksen.

3:30 p.m. – 5 p.m. CECC HEARING — Congressional-Executive Commission on China hearing on “Pet Treats and Processed Chicken from China: Concerns for American Consumers and Pets.” Witnesses: Panel 1: Dr. Daniel L. Engeljohn, Assistant Administrator, Office of Field Operations, Food Safety and Inspection Service, U.S. Department of Agriculture; Tracey Forfa, J.D., Deputy Director, Center for Veterinary Medicine, U.S. Food and Drug Administration, U.S. Department of Health & Human Services. Panel 2: Shaun Kennedy, Director of the Food System Institute, LLC; Adjunct Associate Professor, Department of Veterinary Population Medicine, College of Veterinary Medicine, University of Minnesota; Patty Lovera, Assistant Director, Food & Water Watch; Christopher DUrso, Student and Consumer Advocate. <http://www.cecc.gov/events/hearings/pet-treats-and-processed-chicken-from-china-concerns-for-american-consumers-and-pets> Location: 562 Dirksen.

4 p.m. APPROPRIATIONS — Subcommittee on State, Foreign Operations, and Related Programs business meeting to markup proposed legislation making appropriations for fiscal year 2015 for the Department of State,

Foreign Operations, and Related Agencies. <http://www.appropriations.senate.gov/event/sfops-fy15-subcommittee-markup> Location: 138 Dirksen.

US House: 10:30 a.m. HOYER PEN AND PAD — House Democratic Whip Steny Hoyer will hold a pen and pad briefing. Location: H-144 in the U.S. Capitol.

12 p.m. – 5 p.m. SELECTUSA FORUM – MANUFACTURING — SelectUSA Summer Forum: “Reinvesting in America, Creating Jobs at Home” with Secretary of Commerce Penny Pritzker and Representative Frank Wolf. Contact the ITA Office of Public Affairs at 202-482-3809 or click here to RSVP. Location: U.S. Capitol Visitor Center, Congressional Auditorium, First St. SE.

12 p.m. — The House will meet for morning hour and 2:00 p.m. for legislative business. Votes will be postponed until 6:30 p.m. Legislation Considered Under Suspension of the Rules:

1) H.R. 1458 – To designate the facility of the United States Postal Service located at 1 Walter Hammond Place in Waldwick, New Jersey, as the “Staff Sergeant Joseph D’Augustine Post Office Building;”

2) H.R. 43 – Officer Tommy Decker Memorial Post Office;

3) H.R. 1391 – The Lance Corporal Joshua B. McDaniels and Veterans Memorial Post Office Building, as amended;

4) H.R. 3765 – To designate the facility of the United States Postal Service located at 198 Baker Street in Coming, New York, as the “Specialist Ryan P. Jayne Post Office Building”;

5) H.R. 1707 – To designate the facility of the United States Postal Service located at 302 East Green Street in Champaign, Illinois, as the “James R. Burgess Jr. Post Office Building;”

6) H.R. 3472 – To designate the facility of the United States Postal Service located at 13127 Broadway Street in Alden, New York, as the “Sergeant Brett E. Gornewicz Memorial Post Office”;

7) H.R. 1865 – To designate the facility of the United States Postal Service located at 35 Park Street in Danville, Vermont, as the “Thaddeus Stevens Post Office”;

8) H.R. 2112 – To designate the facility of the United States Postal Service located at 787 State Route 17M in Monroe, New York, as the “National Clandestine Service of the Central Intelligence Agency NCS Officer Gregg David Wenzel Memorial Post Office”;

9) H.R. 1671 – To designate the facility of the United States Postal Service located at 6937 Village Parkway in Dublin, California, as the “James ‘Jim’ Kohnen Post Office”;

10) H.R. 3786 – To direct the Administrator of General Services, on behalf of the Archivist of the United States, to convey certain Federal property located in the State of Alaska to the Municipality of Anchorage, Alaska;

11) H.R. 3998 – Albuquerque, New Mexico, Federal Land Conveyance Act of 2014;

12) H.R. 3375 – To designate the community-based outpatient clinic of the Department of Veterans Affairs to be constructed at 3141 Centennial Boulevard, Colorado Springs, Colorado, as the “PFC Floyd K. Lindstrom Department of Veterans Affairs Clinic”;

13) H.R. 1216 – To designate the Department of Veterans Affairs Vet Center in Prescott, Arizona, as the Dr. Cameron McKinley Department of Veterans Affairs Veterans Center;

14) H.R. 4199 – To name the Department of Veterans Affairs medical center in Waco, Texas, as the Doris Miller Department of Veterans Affairs Medical Center;

15) H.R. 3682 – To designate the community based outpatient clinic of the Department of Veterans Affairs located at 1961 Premier Drive in Mankato, Minnesota, as the Lyle C. Pearson Community Based Outpatient

Clinic;

16) H.R. 4360 – To designate the facility of the United States Forest Service for the Grandfather Ranger District located at 109 Lawing Drive in Nebo, North Carolina, as the “Jason Crisp Forest Service Building”;

17) S.Con. Res. 37 – Authorizing the use of the rotunda of the United States Capitol in Commemoration of the award of the Shimon Peres Congressional Gold Medal;

6 a.m. APPROPRIATIONS — Subcommittee on State, Foreign Operations, and Related Programs Markup – FY 2015 State and Foreign Operations Appropriations Bill. <http://appropriations.house.gov/calendar/eventsingle.aspx?EventID=384336> Location: H-140 Capitol.

5 p.m. RULES — Meets to consider the following measures: H.R. 4870&8209;-Department of Defense Appropriations Act, 2015; Senate amendments to H.R. 3230–Veterans’ Access to Care through Choice, Accountability, and Transparency Act of 2014. Location: H-313 The Capitol.

Other: June 17 – 18. HIMSS GOVERNMENT HEALTH IT CONFERENCE & EXHIBITION — Free for Government Employees and Veterans. Confirmed keynote speakers include Rep. Michael Burgess (R-TX); and Niall Brennan, Acting Director, Offices of Enterprise Management, Centers for Medicare and Medicaid Services. www.govhealthitconference.com Location: Ronald Reagan Building and International Trade Center, 1300 Pennsylvania Ave. NW, Atrium Ballroom.

CYBERSECURITY – JEH JOHNSON — 5:45 a.m. Secretary Johnson will participate in an on-stage discussion on cybersecurity. For general press inquiries, and to apply for a press credential, please contact Erin Carpenter-Maier at erin.carpenter@dowjones.com and include “press inquiry in the subject line.” Location: Park Hyatt, 1201 24th St., NW.

Last Laughs:

LATE NIGHT POLITICAL HUMOR.

Jimmy Fallon: “President Obama just had his annual physical, which shows that he’s suffering from some pain in his right foot. And when asked why he doesn’t get it treated, Obama said it’s not covered by Obamacare.”

David Letterman: “Over the weekend, President Obama got his annual presidential physical. His cholesterol is up and approval rating is down. Obama wants to lower his cholesterol, but Congress is blocking him. The doctor said he passed his physical, and it’s the first thing he’s passed in the second term.”

Seth Meyers: “Mitt Romney is back in the news. This weekend, Romney told reporters that he thinks Hillary Clinton’s political career has been a ‘monumental bust.’ Harsh words from private citizen Mitt Romney.”

DOI in the News:

INTERIOR ANNOUNCES AUCTION FOR WIND ENERGY LEASES OFF MASSACHUSETTS . The [E&E Daily](#) (6/17) reports that the Interior Department on Tuesday was expected to "announce plans to auction more than 1,100 square miles of waters off the Massachusetts coast for offshore wind projects, the largest lease sale of its kind in US history." Interior Secretary Sally Jewell was scheduled to make the announcement this afternoon in Boston alongside Gov. Deval Patrick and BOEM acting Director Walter Cruickshank. The agency is "releasing a final environmental assessment and a proposed sale notice for Atlantic Ocean waters that the Energy Department has estimated could support up to 10 offshore wind farms of 500 megawatts each."

The [Cape Cod \(MA\) Times](#) (6/17, 101K) reports that Jewell said, "This area we are about to announce will be the largest wind energy area on the Atlantic Coast. It will literally double the federal offshore acreage available for commercial scale wind energy projects and it's going to do that in an area where there is a great deal of load."

The story also appears at the [Nantucket \(MA\) Inquirer and Mirror](#) (6/18, 4K).

The AP (6/18) reports that “the area is about 12 miles offshore, south of Martha’s Vineyard, and will be auctioned as four leases.”

The AP (6/18, 3.58M) reports according to Jewell, “fourteen offshore wind energy companies have already expressed interest in the leases and that number could grow.” Jewell said that “federal regulators tried to outline areas that would generate energy without generating intense opposition.” She said, “We put in zones that we believe have both high potential and lower conflict. But it’s going to actually get down to a specific construction plan on a specific site and (an environmental) analysis to determine what people want to do economically and what that impact is going to be.”

The [Boston Herald](#) (6/18, 783K) reports that “a new plan to make more than 742,000 acres off the coast of Massachusetts available for commercial wind leasing has found an unlikely ally — Cape Wind’s most vocal foe.” Audra Parker, president of the Alliance to Save Nantucket Sound, “which has long opposed Cape Wind’s \$2.6 billion project to build 130 wind turbines in Nantucket Sound, said the Bureau of Ocean Energy Management’s plan to auction an area 14 miles south of Martha’s Vineyard — as well as two competitive leases already awarded off the coasts of Massachusetts, Rhode Island and Virginia — ‘demonstrate the availability of alternative sites to Cape Wind.’”

Coverage by the AP was also picked up by the [Washington Post](#) (6/18, 4.22M), the [Washington Post](#) (6/18, 4.22M), the [Washington Times](#) (6/18, Leblanc, 455K), the [Minneapolis Star Tribune](#) (6/18, Leblanc, 1.48M), the [York \(SC\) Enquirer-Herald](#) (6/17, 18K), the [Coos Bay \(OR\) World](#) (6/18, 34K), the [Seymour \(IN\) Times Tribune](#) (6/18, 31K), the [Lynn \(MA\) Daily Item](#) (6/18, 45K), the [Lexington \(KY\) Herald-Leader](#) (6/17, 395K), the [Franklin \(IN\) Daily Journal](#) (6/18, 51K), the [Greenfield \(IN\) Daily Reporter](#) (6/18, 31K), the [Sacramento \(CA\) Bee](#) (6/17, 687K), the [Nanaimo Daily News](#) (6/18), the [Hispanic Business](#) (6/18, 2K), [Yahoo!](#) (6/18, 17.91M), [Yahoo! Finance](#) (6/18, 9.7M), [WBZ-TV Boston](#) (6/17, 68K), [WFXT-TV Boston](#) (6/18, 60K), [WWLP-TV Springfield, MA](#) (6/17, 65K), [WJAR-TV Providence, RI](#) (6/18, 47K), [WBUR-FM Boston](#) (6/17, 64K), and [WGGB-TV Springfield, MA](#) (6/17, 3K).

Also reporting on the story are the [Boston Globe](#) (6/18, Reidy, 1.62M), the [New Bedford \(MA\) Standard-Times](#) (6/17, 54K), the [Metro Boston](#) (6/17, 32K), the [Metro New York](#) (6/17, 743K), the [Recharge News](#) (6/18, 633), the [reNews](#) (6/18), the [Law 360](#) (6/18, 18K), [NECN-TV Boston](#) (6/18, 33K), and [WFXT-TV Boston](#) (6/18, 60K).

OBAMA ANNOUNCES EXPANSION OF PACIFIC OCEAN PRESERVE. The [E&E Daily](#) (6/17) reports that President Obama “signaled his administration’s shift toward ocean conservation” on Tuesday “with a proposal that could create the nation’s largest-ever marine sanctuary and establish a comprehensive plan to combat illegal fishing.” The announcement “confirms what ocean advocates had long hoped: that Obama would use his second term to give oceans issues more visibility, as both Presidents Clinton and George W. Bush did before him.” Obama said, “If we ignore these problems, if we drain our ocean of its resources, we won’t just be squandering away one of humanity’s greatest treasures. We’ll be cutting off one of the world’s major sources of food and economic growth, including for the United States, and we cannot afford to let that happen.”

The Hill (6/18, Barron-Lopez, 237K) reports that the President said earlier this week that he is working on executive measures “to close off a large swath of the Pacific Ocean from fishing and energy exploration.” The plan would help preserve the habitats of about 24 marine species, but the White House will take public comment on before making the ultimate decision. At a conference for the State Department called Our Ocean, Obama said that “the United States is leading the fight to protect our oceans. Let’s make sure that years from now we can look our children in the eye and tell them that, yes, we did our part, we took action, and we led the way toward a safer, more stable world.”

The AP (6/18, Lederman) reports President Obama announced the creation of the “world’s largest ocean preserve” in the Pacific Ocean during a video message address at an oceans conference at State Department. Obama’s actions expand the Pacific Remote Islands Marine National Monument in a “major symbolic victory for environmentalists.” Obama said, “Let’s make sure that years from now we” can tell “our children” that “yes, we did our part, we took action, and we led the way toward a safer, more stable world.” The AP notes the final boundaries for the monument are not settled.

The Los Angeles Times (6/18, Banerjee, 3.46M) reports Obama also announced other measures "to protect parts of the world's oceans," including requiring "federal agencies to take multiple initiatives to address pollution, overfishing and acidification of ocean water." Obama said ignoring these problems could result in "squandering one of humanity's greatest treasures," adding, "We'll be cutting off one of the world's major sources of food and economic growth, including for the United States."

In a story focused on Obama's announcement, the New York Times (6/18, Davenport, Subscription Publication, 9.65M) reports Secretary of State Kerry "called for the creation of a global ocean strategy." Kerry said human-inflicted damage to the ocean runs the "risk of fundamentally breaking entire ecosystems."

Bloomberg News (6/18, Snyder, 2.76M) reports that "as with earlier efforts, the ocean plan drew praise from environmental groups and complaints from Republicans in Congress." Additionally, at the Our Ocean conference, Obama's counselor John Podesta noted that the ocean around Hawaii is particularly vulnerable to environmental degradation.

The Washington Post (6/17, Eilperin, 4.22M) reports in its "Post Politics" blog that Leonardo DiCaprio is joining Obama in making a commitment "to help protect the ocean and challenged the other nations to undertake bold initiatives of their own before it's too late."

Also reporting on the story are The Hill (6/18, Sink, 237K), the Sacramento (CA) Bee (6/17, 687K), NPR (6/18, Peralta, 519K), and the Examiner (6/18, 1.56M).

NYTimes: Obama Right To Protect Ocean's Marine Life. The New York Times (6/18, Subscription Publication, 9.65M) editorializes that the US "has the watery equivalent" of an "Amazon basin," and the marine life that live in this area of the Pacific Ocean "are the best reasons to welcome" Obama's decision to expand the protected area. The Times praises Obama's decision as consistent with previous efforts by presidents "of both parties" to "protect" the region.

SECRETARY JEWELL ANNOUNCES \$436.9 MILLION IN PILT PAYMENTS. The National Journal (6/18, Subscription Publication, 561K) reports that Interior Secretary Sally Jewell on Tuesday "announced that about 1,900 local governments around the country are receiving a total of \$436.9 million under the 2014 Payments in Lieu of Taxes (PILT) program." Jewell said, "Rural communities contribute significantly to our nation's economy, food and energy supply, and help define the character of our diverse and beautiful country. President Obama has made job creation and opportunity in rural areas a top priority for his Administration and has fought for continuing the PILT program, which is a lifeline for many local communities."

KTNA-FM Talkeetna, AK (6/17) reports that on Tuesday, the Interior Department "announced that a total of \$28.5 million will be coming to Alaskan municipalities in the form of payment in lieu of taxes, or PILT." The article notes that "this year's amount is the highest ever, and it will mean more money for many boroughs throughout the state."

Also reporting on the story are the AP (6/18), the Juneau (AK) Empire (6/18, 21K), and the Alaska Public Radio Network (6/17, 2K).

INTERIOR GIVES \$102 MILLION IN STORM PREVENTION TO 11 STATES. The E&E Daily (6/17) reports that on Monday, Interior Secretary Sally Jewell "announced \$102.7 million in grants for 54 projects intended to restore and protect green infrastructure." The article notes that "the funding is part of the \$50 billion Superstorm Sandy recovery package passed by Congress in 2013 and is in addition to \$162 million that Interior announced it would spend on similar agency-led projects last October." Jewell said, "Because of the storm, we know we have a lot to learn from Mother Nature. Natural infrastructure like coastal marshes, wetlands, shorelines, dunes and so on can often provide the best protection."

Also covering the story are the Cape Cod (MA) Times (6/17, 101K), the Baltimore Sun (6/18, Wheeler, 925K), and the Pottstown (PA) Mercury (6/17, 76K).

SEN. WALSH SAYS MONTANANS CONCERNED ABOUT MONUMENT DESIGNATIONS. The E&E Daily (6/17)

reports that Sen. John Walsh said "Montanans have serious misgivings about President Obama designating national monuments in the Treasure State, according to a letter he sent to Interior Secretary Sally Jewell." The letter says "Montanans are 'worried' about Obama's use of the Antiquities Act without the consultation and consent of local citizens." In his March 13 letter, Walsh said, "I have heard from many Montanans who have raised serious concerns regarding land protections that may be recommended by the Department of Interior. I strongly urge you not to consider the designation of any new monuments in Montana unless there is significant discussion, collaboration, and support of local citizens."

HOUSE PANEL TO MARK UP PUBLIC LAND, WATER BILLS. The E&E Daily (6/17) reports that the House Natural Resources Committee on Thursday will "mark up a bill to simplify fees for owning cabins on national forestlands along with several other public lands and water bills." However, the article notes that "noticeably absent is a sweeping bill by Rep. Greg Walden (R-Ore.) to overturn the Forest Service's travel management rule and another two bills by Rep. Jason Smith (R-Mo.) to address concerns surrounding federal management of the Ozark National Scenic Riverways." A committee spokesman did not say "whether the bills would be taken up at a later date."

STATES SIGN CHESAPEAKE BAY WATERSHED AGREEMENT. The E&E Daily (6/17) reports that "leaders of the six states and the District of Columbia that make up the Chesapeake Bay watershed signed a new cleanup agreement" on Monday. According to the article, "the Chesapeake Bay Executive Council – comprising the governors of Maryland, Delaware, New York, Pennsylvania, Virginia and West Virginia; the D.C. mayor; and representatives of US EPA and the Department of Agriculture – agreed on the voluntary plan at the council's annual meeting in Annapolis yesterday."

SURVEYS SHOW FEDERAL WORKERS FEAR REPRISALS IF THEY REPORT AGENCY WRONGDOING. The Washington Post (6/18, Yoder, 4.22M) reports that a recent government survey found that nearly 20 percent of Federal employees "fear reporting agency wrongdoing." In its annual government-wide survey, OPM asked "whether employees agree or disagree with the statement, 'I can disclose a suspected violation of any law, rule or regulation without fear of reprisal.'" In 2013, "19.5 percent of employees disagreed or strongly disagreed, up 0.4 percentage points from 2012; 61.2 percent of employees agreed or strongly agreed, down by 0.3 percentage points." The Post calls OPM's finding "less troubling than a 2010 survey from the Merit Systems Protection Board, which showed nearly 30 percent of workers feared reprisals."

NEW PLAN TO FUND EFFORT TO COMBAT WILDFIRES SEEN AS NECESSARY. In an op-ed for the New York Times (6/18, Subscription Publication, 9.65M), former AG Secretary Dan Glickman and former official overseeing the Forest Service Hamis Sherman write that "megafires" are "the new reality in the Western United States." They argue that funding to combat fires is insufficient, and the price tag of fighting the "megafires" is sapping funds that normally would be used to prevent conditions that cause them from arising. They endorse a proposal from Sens. Ron Wyden and Mike Crapo and Reps. Kurt Schrader and Mike Simpson "to make more money available to fight these fires." Their plan, "which has been endorsed by the Obama administration, would allow the Forest Service to draw money from federal disaster funds when firefighting costs reached 70 percent of the 10-year average."

MAYOR SEEKS NATIONAL HISTORIC LANDMARK DESIGNATION FOR SS BADGER. In an op-ed for the Manitowoc (WI) Herald Times Reporter (6/17, 34K), Mayor Justin Nickels supports a National Historic Landmark designation for the SS Badger. He argues that "this is a non-partisan issue good for Manitowoc and good for Ludington and each of our respective states."

America's Great Outdoors:

National Park Service:

LGBT HERITAGE INITIATIVE SEEKS TO HONOR CONTRIBUTIONS TO AMERICAN HISTORY. In an op-ed for the Denver Post (6/18, Jarvis, Cuff, 940K), Jonathan B. Jarvis, director of the NPS, and Courtney Cuff, CEO of the Gill Foundation, write that the NPS, with the support of the Gill Foundation, recently launched an LGBT Heritage Initiative to identify places and events of historic significance in the struggle for LGBT equality. They write that telling such stories unites Americans with a greater understanding of our common identity as Americans.

YOSEMITE NATIONAL PARK EXPANSION STALLS IN CONGRESS. The San Jose (CA) Mercury News (6/18, 696K) reports that "time is running out on a deal to secure the largest expansion of Yosemite National Park since 1939, and one man appears to be standing in the way: local congressman Tom McClintock." Declaring his distrust in the NPS, McClintock is "at odds with local Republican state legislators and the Mariposa County Board of Supervisors over efforts to add a scenic parcel of land on Yosemite's western boundary now owned by a Bay Area conservation group." McClintock said that he wants the NPS "to come up with a plan to use the land because he doesn't trust the agency after its attempt to ban bicycle rentals and limit other recreation in Yosemite Valley last year."

BISCAYNE NATIONAL PARK PROPOSES FISHING RESTRICTIONS TO SAVE WILDLIFE. The E&E Daily (6/17) reports that Florida's Biscayne National Park has "proposed phasing out commercial fishing, ending a popular two-day lobster season and imposing other restrictions to help fish populations recover." Park officials say that "they expect opposition to the changes but that they are needed to protect bonefish, snapper, sea turtles and many other species that are at risk." Park Superintendent Brian Carlstrom said, "We recognize that this is a significant change to existing conditions, and any time you're doing that, regardless of the topic, you're going to get resistance. It's just human."

MISSOURI BOARD SUPPORTS TAX CREDITS FOR GATEWAY ARCH. The AP (6/18, Lieb) reports that "a Missouri board endorsed Tuesday up to \$15 million of tax credits to help finance the redevelopment of the Gateway Arch in St. Louis but delayed decisions on other projects because of concerns about state revenues." According to the article, "the tax credits for the Arch would be used to leverage private contributions for the renovation and expansion of a museum located underneath the monument." The article notes that "the project is part of a \$380 million initiative to renovate the Arch and its surrounding area for the 50th anniversary of its completion."

NPS TO HOLD PUBLIC MEETING ON APPOMATTOX PARK STUDY. The AP (6/18) reports that the NPS will "hold a public meeting this week on an ongoing study of Appomattox Court House National Historical Park." The study will "look at whether the 1,700-acre park's boundary should be expanded, and what land could be included." The NPS also is "seeking public input on what are the biggest challenges threatening the protection of cultural and natural resources near the park."

Also reporting on the story are the Lynchburg (VA) News & Advance (6/18, 77K) and the Roanoke (VA) Times (6/18, 264K).

NEARLY 100 TURTLE HATCHLINGS RELEASED AT PADRE ISLAND NATIONAL SEASHORE. The AP (6/18) reports that "nearly 100 endangered Kemp's ridley sea turtle hatchlings have been released on a South Texas beach to make their way into the Gulf of Mexico." The article notes that "Monday's release at Padre Island National Seashore was the first of the season." Donna Shaver with the NPS, "who's chief of the division of sea turtle science and recovery, says the next turtle hatchlings release in Texas should be in late June or early July."

NPS BEGINS ZION TRAIL CLOSURES. The AP (6/18) reports that the NPS has "started part-time closures on popular Zion National Park trails as they work to improve the paths." The article notes that "the Hidden Canyon Trail and portions of the East Rim and Observation Point trails will be closed from Monday through Thursday starting this week and running through the end of the summer."

Bureau of Land Management:

BLM CONSIDERS ROUTING GATEWAY WEST LINE THROUGH RAPTOR SANCTUARY. The E&E Daily (6/17) reports that a panel appointed by the BLM is "recommending the agency route the final two segments of a nearly 1,000-mile-long transmission project through a national conservation area that's home to the largest concentration of nesting raptors in North America instead of through private and state lands as BLM originally proposed." The panel's recommendations could "break a stalemate over completing the final two segments of the massive Wyoming-to-Idaho Gateway West Transmission Line Project." According to the article, "an eight-member panel of experts and affected parties appointed in December by BLM's Boise District resource advisory council (RAC) recently issued a report concluding that routing the final two sections of the line through the NCA

makes sense as long as it follows existing power lines and would not jeopardize the primary mission of the NCA established by Congress in 1993, which is to protect and enhance raptor populations and habitat.”

ADDITIONAL COVERAGE OF SHOOTING OF TWO OFFICERS. Additional coverage of the shooting of a BLM ranger and a California highway patrolman was provided by the [Talking Points Memo](#) (6/18, 223K), the [Talking Points Memo](#) (6/18, 223K), and the [Raw Story](#) (6/17, 71K).

Fish and Wildlife Service:

US OFFICIALS CRACK DOWN ON WILDLIFE-PRODUCT TRAFFICKING. The [E&E Daily](#) (6/17) reports that “in front of a backdrop of illegal wildlife products seized at Kennedy International Airport, President Obama’s chief trade negotiator reinforced the US crackdown on poaching he said was essential to national security.” US Trade Representative Michael Froman said, “Poaching in Africa is funding terrorist groups.” According to the article, “officials believe ivory, rhino horns and other illegal wildlife products are funding organizations like the Lord’s Resistance Army in Uganda and South Sudan, the Sudanese Arab Janjaweed fighters and the jihadist group al-Shabab based in Somalia.”

Also covering the ivory trade is the [New York Times](#) (6/18, Randolph, 9.65M).

ENVIRONMENTAL GROUPS SUE OVER LESSER PRAIRIE CHICKEN LISTING. The [E&E Daily](#) (6/17) reports that three environmental groups on Tuesday “filed a lawsuit challenging the Interior Department’s decision last March to list the lesser prairie chicken as a ‘threatened’ rather than an ‘endangered’ species and to allow a limited number of the charismatic birds to continue to be killed.” The lawsuit, filed in the US District Court for the District of Columbia, challenges the FWS’ “decision to allow exemptions to ESA protections for the prairie chicken in its so-called 4(d) rule.” Plaintiffs “claim the rule will allow more than 1,300 of the estimated 17,616 remaining birds to be killed or disturbed each year.”

The [AP](#) (6/18, Hanna) reports that Kansas Gov. Sam Brownback “decried the litigation as an attempt to shut down agriculture and energy production in his state.” Coverage was also picked up by [ABC News](#) (6/18, 3.58M) and the [US News & World Report](#) (6/17, 645K).

Also reporting on the story is the [AP](#) (6/18).

ENVIRONMENTAL GROUP SUES OVER SPECIES PROTECTIONS. The [E&E Daily](#) (6/17) reports that The Center for Biological Diversity on Tuesday sued the FWS for “failing to decide whether nine species, including a rare flying squirrel, should receive federal protections.” The FWS “missed its own statutory deadline to issue 12-month findings on whether any of the species should be listed under the Endangered Species Act, the group contends in its lawsuit.” The group has “asked that the US District Court for the District of Columbia force the agency to issue decisions on the species.” The article notes that “the species listed in the suit are: the San Bernardino flying squirrel, the Ichetucknee siltsnail, the Kirtland’s snake, the Atlantic pigtoe, the slenderclaw crawfish, the Barrens darter, the holiday darter, and two distinct populations of the black-backed woodpecker.”

Also covering the story are the [AP](#) (6/18, Flesher), the [Los Angeles Times](#) (6/18, Sahagun, 3.46M), and the [Alabama Live](#) (6/18, 75K).

GROUP SEEK TO REMOVE FOX FROM ENDANGERED LIST. The [AP](#) (6/18) reports that “two subspecies of a fox that lives only on an island chain off the Southern California coast should be removed from the endangered species list because of a dramatic increase in population during at least the past decade, a scientific group dedicated to fox recovery said Tuesday.” Tim Coonan, a biologist and member of the Island Fox Conservation Working Group, said, “This is one of the quickest recoveries of species I’ve ever seen. It normally takes a species about 25 years to come off the list.” The group plans to ask the FWS “to reclassify the foxes on Santa Rosa and Catalina islands as threatened and take the subspecies off the endangered list entirely for San Miguel and Santa Cruz islands.”

Also reporting on the story is the [Ventura County \(CA\) Star](#) (6/17, 205K).

UTAH SEEKS TO DELAY DECISION ON SAGE GROUSE. The AP (6/18, Knox) reports that Utah "wants more time to prove no further federal intervention is needed to protect the state's dwindling sage grouse population, throwing \$2 million into the effort to retain control of the bird's habitat." The state has "hired a lobbying team that's knocking on doors of oil and gas companies and hunters in an effort to raise money to match Utah's share, state natural resources director Michael Styler said Tuesday." The extra funds will "help the state urge Congress to postpone the September 2015 deadline for a US Fish and Wildlife Service decision on possibly listing the bird as endangered, Styler said."

Also covering the story is the AP (6/18, Riccardi).

REPUBLICANS ASK FOR DELAY IN CHANGES TO ENDANGERED SPECIES ACT REGULATIONS. The Bend (OR) Bulletin (6/18, 94K) reports that "dozens of Republican members of the House of Representatives, including Greg Walden, R-Hood River, have asked the two federal agencies responsible for administering the Endangered Species Act to postpone proposed changes to how critical habitat is designated." Last month, the FWS and the National Oceanic and Atmospheric Administration "published new regulations in the Federal Register, including a new definition of adverse modification." Walden and 42 other representatives, including House Natural Resources Committee Chairman Doc Hastings, wrote to FWS Director Dan Ashe and NOAA Administrator Kathryn Sullivan last week, "asking them to extend the comment period by six months."

FWS ANNOUNCES NEW DONATION AND FUNDRAISING POLICY. The Examiner (6/18, 1.56M) reports that the FWS announced a new policy on donations in the Federal Register of Tuesday, June 17, 2014, "though it is applying the policy retroactively to May 1." The article notes that "the policy explains how to evaluate and accept donations and when it is appropriate for FWS managers and other employees to solicit and accept donations."

UNIONS, INDUSTRY JOIN TO FIGHT FISH CONSUMPTION RATE CHANGE. The E&E Daily (6/17) reports that "unions are throwing their weight behind Boeing Co. and other industry groups in a fight against Washington state's plan to increase the fish consumption rate, an obscure figure that affects water quality standards." The Machinists union, "representing more than 32,000 Boeing workers and others in the Puget Sound region, has joined with the Association of Western Pulp and Paper Workers and others to protest the increase because they say it would cost companies jobs and hurt economic development in the state." Industry groups "share those concerns."

US Geological Survey:

USGS EYES PARTNERSHIP WITH INDUSTRY FOR GEOMAPPING. The ExecutiveGov (6/18, 548) reports that the USGS is "looking to enlist commercial drone operators to help the agency with geomapping and other aerial surveying missions." Bruce Quirk, USGS' UAS liaison, said, "When the FAA finally opens up the national airspace system for commercial operations, the USGS will investigate service contracts with the commercial sector that would provide the data sets we need to meet our mission." He added, "We already have a contract vehicle in place called the Geospatial Product and Service Contracts that we could use to secure these services."

Securing America's Energy Future:

Onshore Energy Development:

BLM STRUGGLING TO INSPECT HIGHER-RISK WELLS. The E&E Daily (6/17) reports that the BLM hasn't "kept pace with the growth in hydraulic fracturing, leaving four in 10 new 'high-priority' oil and gas wells uninspected." The article notes that "those wells pose a greater potential water contamination threat, among other environmental and safety issues, or are located near national forests and watersheds." BLM Deputy Director Linda Lance said, "No one would have predicted the incredible boom of drilling on federal lands and the number of wells we've been asked to process." She also called the inspections rate "simply not acceptable."

JUDGE RULES ALL LANDOWNERS MUST AGREE TO STRIP MINING. The E&E Daily (6/17) reports that "a Kentucky federal court judge recently ruled that all surface owners must consent to strip mining under the Surface Mining Control and Reclamation Act." US District Judge Amul Thapar for the Eastern District of Kentucky ordered Premier Elkhorn Coal Co. on Friday to halt strip mining operations on property owned by M.L. Johnson

Family Properties LLC. Obama Administration attorneys, representing Interior, "argued that the landowners didn't give the agency the required 60 days to examine the issue and that the permit complied with the law." However, Thapar "disagreed with the administration on both counts."

NEW PLAN FOR ROAN PLATEAU PRAISED. In his column for the Denver Post (6/18, Willoughby, 940K), Scott Willoughby writes in praise of a possible resolution to the controversy over drilling in the Roan Plateau. According to Willoughby, Rep. Scott Tipton' backing for the latest proposal and bipartisan political support suggests potential for an overdue compromise.

Offshore Energy Development:

FEDERAL PROSECUTORS SEEK MORE TIME TO DECIDE ON RETRIAL FOR EX-BP ENGINEER. The AP (6/18) reports from New Orleans that Federal prosecutors "are asking a judge for additional time to decide whether they should appeal an order throwing out the conviction of a former BP engineer in connection with the 2010 Gulf oil spill investigation." US District Judge Stanwood Duval ruled last week that Kurt Mix "was entitled to a new trial on an obstruction-of-justice charge because of misconduct by a juror in his 2013 trial." Federal prosecutors said on Tuesday that "deciding whether to appeal Duval's order will take time and will require involvement of top Justice Department officials," and they "asked for an exclusion from federal speedy-trial requirements," which call for "a trial within 70 days of a new trial being ordered but also contains provisions for delays."

Tackling America's Water Challenges:

SENATE SUBCOMMITTEE ADVANCES ENERGY, WATER SPENDING PLAN. The E&E Daily (6/17) reports that a Senate subcommittee on Tuesday "advanced a \$34 billion proposal to fund the Department of Energy, Army Corps of Engineers and Bureau of Reclamation." The Appropriations Subcommittee on Energy and Water Development's "unanimous vote came during a brief markup this morning, during which no amendments were considered." The full committee "takes up the bill Thursday, at which point amendments will be allowed."

The Sacramento (CA) Bee (6/17, 687K) reports that "lawmakers working both above and below the surface on California drought relief are making explicit progress this week." The article notes "a \$34.2 billion energy and water funding bill approved Tuesday by a Senate panel, and related movement on the House side expected Wednesday." Sen. Dianne Feinstein said, "The purpose is to help mitigate the impact of severe drought."

CALIFORNIA CUTS SUPPLIES TO WATER USERS. The E&E Daily (6/17) reports that California is "tightening its spigots further as it enters the summer months of the third year of dry weather." According to the article, "landowners with some of the longest-standing water rights in the state are seeing their supplies curtailed for the first time ever, as the state exercises new authority granted it by lawmakers to make emergency decisions."

Fish Taken From California Hatcheries Amid Drought. ABC News (6/18, 3.58M) reports that "workers evacuated rainbow trout on Tuesday from a hatchery on the American River as part of rescue efforts prompted by concerns that California's drought will increase water temperatures and kill the fish." The state Department of Fish and Wildlife was "using tanker trucks to remove trout from the American River Hatchery and have been taking fingerling steelhead from an adjacent hatchery," according to spokesman Andrew Hughan. The article notes that "in total, about 2 million fish, including 430,000 fingerling steelhead, are being released months before they normally would."

Water Flows Increased In American River To Block Salty Incursion To Delta. The Sacramento (CA) Bee (6/17, 687K) reports that "water flows into the American River were increased Tuesday, despite the ongoing drought, because state and federal officials are fighting to keep salinity from San Francisco Bay from intruding into the Sacramento-San Joaquin Delta." The BOR "boosted water releases from Nimbus Dam into the American River from 2,000 to 2,500 cubic feet per second."

ARIZONA COULD CUT WATER DELIVERIES FROM COLORADO RIVER. The New York Times (6/18, Wines, Subscription Publication, 9.65M) reports that Arizona "could be forced to cut water deliveries to its two largest cities unless states that tap the dwindling Colorado River find ways to reduce water consumption and deal with a

crippling drought, officials of the state's canal network said Tuesday." The warning comes as the BOR "forecasts that Lake Mead, a Colorado River reservoir that is the network's sole water source, will fall next month to a level not seen since the lake was first filled in 1938." Officials of the Central Arizona Project "say the two cities, Phoenix and Tucson, could replace the lost water, at least in the short term, by tapping groundwater supplies, lakes and rivers."

LATEST FEDERAL PLAN FOR COLUMBIA SALMON CHALLENGED. The AP (6/18, Bamard) reports that "conservation groups and salmon advocates have challenged the Obama administration's latest plan for making Columbia Basin dams safe for salmon." According to the article, "the challenge was filed Tuesday in US District Court in Portland against the National Oceanic and Atmospheric Administration's Fisheries Service, which oversees salmon protection, and the US Army Corps of Engineers and US Bureau of Reclamation, which operate the dams." Joseph Bogaard of Save Our Wild Salmon said "the plan is 'virtually indistinguishable' from the one overturned by a federal court three years ago."

Also reporting on the story are the Los Angeles Times (6/18, Ganga, 3.46M), the Bend (OR) Bulletin (6/18, 94K), and the Idaho Statesman (6/17, 222K).

BOR NAMES NEW MANAGER FOR DAKOTAS. The AP (6/18) reports that the BOR has named David Rosenkrance as the new manager for the Dakotas Area Office. Rosenkrance succeeds Richard Long, who retires this month.

BAY DELTA CONSERVATION PLAN CRITICIZED FOR IGNORING NON-ENGLISH SPEAKERS. In an op-ed for the Sacramento (CA) Bee (6/18, 687K), Javier Padilla Reyes, community outreach coordinator for Restore the Delta, a nonprofit education and advocacy group, writes that "the reckless indifference of Gov. Jerry Brown's administration in failing to provide adequate access and participation for non-English speaking Californians shows that the state's rush to build the twin Delta tunnels at all costs effectively disregards nearly 600,000 Delta residents and 20 percent of California's population." He notes that "it's striking that the state has spent more than \$250 million promoting the tunnels, but not one dollar translating the EIR into languages spoken by those who would help pay the multibillion-dollar price tag." Reyes concludes that "considering there is no public vote on the \$67 billion project, the Brown administration is effectively violating the civil rights of the hundreds of thousands of Californians who speak limited English, and wish to participate in the 'public' comment process, by leaving them out of the loop entirely."

Empowering Native American Communities:

BILLS EXPAND RESERVATIONS FOR NEVADA TRIBES. The Las Vegas (NV) Review-Journal (6/18, 437K) reports that legislation introduced Tuesday in the Senate would grant more than 26,000 acres for the Moapa Band of Paiutes outside Las Vegas and also expand the reservations of seven Northern Nevada Indian tribes. Sen. Harry Reid said, "Land is lifeblood to Native Americans and this bill provides space for housing, economic development, traditional uses and cultural protection."

CAPAY VALLEY COALITION OPPOSES YOCHA DEHE EXTENDING TRIBAL LANDS. The Sacramento (CA) Business Journal (6/17, Subscription Publication, 41K) reports that the Capay Valley Coalition is appealing a recommendation to the BIA "to put 853 acres in the Capay Valley into trust for the Yocha Dehe Wintun Nation." The Capay Valley Coalition, "a group that has protested traffic and growth in the Capay Valley, is concerned that the tribe can do anything with this land once it is put into trust, said coalition member Tom Frederick." The coalition filed an appeal of BIA's approval of the tribe's request to the BIA in Washington. Frederick said "the tribe is not at fault, but the regulators who approved what the coalition considers to be an inadequate environmental assessment."

Top National News:

ALLEGED BENGHAZI RINGLEADER FACING TRIAL FOLLOWING CAPTURE BY US FORCES. After several days when the growing Sunni insurgency in Iraq was the dominant topic in the US media, the news that the US has captured the lead suspect in the September 11, 2012 terrorist attacks in Benghazi, Libya supplanted Iraq as the top story on Tuesday for many outlets. The three network newscasts devoted almost ten minutes of air time

to the story, just a little less than the ten and a half minutes they spent on Iraq coverage, and both NBC Nightly News (6/17, lead story, 3:05, Williams, 7.86M) and the CBS Evening News (6/17, lead story, 2:40, Glor, 5.08M) led with reports on Khattala's capture. On the other hand, the Drudge Report's top headlines continued to push the narrative that President Obama is on the verge of ordering the US military to fight on behalf of the Iraqi government, and the Huffington Post's home page was featuring coverage of pending executions in the US by Tuesday evening.

While the capture of Abu Khattala is being described as a "victory" for President Obama, many reports, including the lead segment on NBC Nightly News (6/17, lead story, 3:05, Williams, 7.86M), note that Khattala was – at least in the period immediately following the attacks – not difficult to locate, as evidenced by the various interviews he gave to western outlets, including CNN. According to this morning's New York Times (6/18, Kirkpatrick, Schmitt, Subscription Publication, 9.65M), "for more than a year...a plan to capture" Khattala "was on Mr. Obama's desk awaiting approval," but he "held back, in part for fear that an American raid...might further destabilize the already tenuous Libyan government."

In the lead story for NBC Nightly News (6/17, lead story, 3:05, Williams, 7.86M), Brian Williams said Khattala's capture "is being called a victory for the Obama Administration." Andrea Mitchell went on to report that on Tuesday, the President "took a victory lap," but then Mitchell asked rhetorically, "what took so long?" Mitchell noted that "only weeks after the attack, the New York Times and...CNN interviewed Abu Khattala in Benghazi." Rep. Darrell Issa (R-CA), chairman of the House Oversight Committee: "We knew where he was. He's been doing television interviews. We certainly could have taken him any time."

On ABC World News (6/17, story 2, 2:00, Muir), Brian Ross also reported that Khattala "was interviewed by reporters for CNN and others" as he was "flaunting his presence in Benghazi." Rep. Michael McCaul (R-TX), chairman of the House Homeland Security Committee, was shown asking, "If a CNN reporter can have and interview with him openly in a cafe, why couldn't we get to him sooner?"

On the CBS Evening News (6/17, story 2, 1:05, Glor, 5.08M), Jeff Glor noted that "a week after the attack in Benghazi, CBS News correspondent Elizabeth Palmer was the first reporter to track Khattala down...and interview him." Palmer went on to recount that she found Khattala by "simply ask[ing] a member of the Libyan security forces if he could set up a meeting."

Also on the CBS Evening News (6/17, lead story, 2:40, Glor, 5.08M), correspondent Bob Orr reported that following the attacks, Khattala "often appeared in public, unconcerned about any potential capture, but after word leaked last summer that he'd been charged by the US Justice Department, sources say Khattala became more cautious." Orr noted that while "other Islamic radicals have also been charged in the Benghazi case...22 months after the attacks that killed four Americans, only Khattala is in custody."

The Pittsburgh Tribune-Review (6/18, 614K) reports that "at the beginning of his brief speech Tuesday...in Pittsburgh," President Obama "announced the capture of" Khattala. Under the headline, "President Hails Capture Of Benghazi Suspect As Sending 'a Message To The World,'" the Pittsburgh Post-Gazette (6/17, 677K) reports that the President's announcement got "a round of applause from a crowd gathered for a question-and-answer session." The Wall Street Journal (6/18, Barrett, Coker, Subscription Publication, 5.51M) reports that in Pittsburgh on Tuesday, the President said: "When Americans are attacked, no matter how long it takes, we will find those responsible, and we will bring them to justice."

The Washington Post (6/18, Gearan, Sullivan, 4.22M) reports that White House press secretary Jay Carney "called the arrest a 'milestone' but declined to answer most questions, including why it took so long to capture a figure who had been seen living openly in Benghazi since the raid." According to The Daily Caller (6/17, Bloom, 408K), on Tuesday, State Department spokeswoman Jen Psaki "repeatedly refused to explain why the administration waited over two years to capture" Khattala, and "dodged questions about Khattala's meetings with reporters, saying only that an interview 'is entirely different from any operation to take these individuals into custody, and there are a range of factors taken into account.'"

McClatchy (6/17, Clark, Youssef, Subscription Publication, 23K) says Khattala "became the most well-known of the roughly 70 attackers who stormed the U.S. special mission and set it ablaze after he brazenly bragged about his involvement to news outlets." According to McClatchy, Khattala "told journalists he was at the site but didn't

lead the attack." McClatchy also reports that "a commander in Benghazi's largest revolutionary brigade, the Libyan Shield," complained "two months after the attack that people were frustrated that Khattala was still allowed to openly operate in Benghazi."

USA Today (6/18, Jackson, Johnson, Michaels, 5.82M) reports that an anonymous "US official" says Khattala "had become more careful in recent months...which may have been related to last fall's capture of alleged al-Qaeda member Anas al-Libi in Tripoli, Libya, in connection with African Embassy bombings in 1998."

According to the Washington Post (6/18, Deyoung, Goldman, Tate, 4.22M), "U.S. officials said the joint Special Operations and FBI operation had been planned for months and was approved...on Friday" by the President. The Post says Khattala "had returned home Sunday night after a day of militia skirmishes in Benghazi when U.S. military commandos swarmed his residence."

Bloomberg News (6/18, Wilber, Lerman, 2.76M) calls Khattala's capture "a major break in the investigation of" the 2012 Benghazi attacks, and a "victory" for both the President and former secretary of state Hillary Clinton, who said it is "a clear demonstration of the U.S. commitment to see justice done." However, Bloomberg News also notes that Rep. Darrell Issa (R-CA) called Khattala's apprehension "long overdue." Bloomberg News adds that "the interrogation of Khattallah may provide answers on whether, as the Obama administration initially said, the Libya attack grew out of a spontaneous protest" or "was a terrorist attack."

The AP (6/18, Reilly) notes that Khattala, identified as "a senior leader of the Benghazi branch of the terror group Ansar al-Sharia," is "in U.S. custody, marking the first U.S. apprehension of an alleged perpetrator in the assault that killed U.S. Ambassador Chris Stevens and three other Americans." According to the AP, the Administration "has come under intense criticism from Republicans for being unable to apprehend those responsible for the attack."

The New York Times (6/18, Kirkpatrick, Schmitt, Subscription Publication, 9.65M) says the "apprehension of...Khattala is a major breakthrough in the two-and-a-half-year-old investigation into the attack." According to the Times, while the President "vowed swift action to bring the perpetrators to justice," US "efforts...were stymied by the chaos of the event and the broader mayhem in Libya." The Hill (6/17, Sink, 237K) noted that Khattala is "among at least a dozen other suspects charged last year for their involvement in the Sept. 11, 2012 attack."

The Washington Times (6/18, Boyer, Ybarra, 455K) says Khattala's capture is "a much-needed boost for" the President following "the discovery of a previously undisclosed White House email suggesting that Mr. Obama's top aides wanted to downplay terrorism as the cause of the attack."

Under the headline, "Abu Khattala's Capture Is An I-told-you-so Moment For Obama. But It Could Be Short-Lived," Scott Wilson of the Washington Post (6/18, Wilson, 4.22M) notes that the President "has long described the political aftermath of the attacks in Benghazi...as a 'sideshow,'" but "now, for the first time in nearly two years," Benghazi is "at the center of the American political conversation on terms Obama very much favors." However, Wilson goes on to say that Khattala's capture "does little to explain how the administration devised a set of 'talking points'...that Republicans have come to view as a politically calculated obfuscation that helped shield Obama's reelection effort from criticism."

In a piece for the Christian Science Monitor (6/18, LaFranchi, 566K), Howard LaFranchi says this weekend's capture "will very likely dent criticism of President Obama's handling of the attack and its aftermath – but it won't end it." LaFranchi notes that a recent CNN poll found that "6 of 10 Americans said they were dissatisfied with the administration's response to the Benghazi attack."

Khattala Has Been Read His Miranda Rights, Will Not Be Sent To Gitmo. According to the Los Angeles Times (6/18, Cloud, Serrano, 3.46M), Khattala "was read his Miranda rights...shortly after his capture," but "U.S. authorities first invoked a public safety exemption that allows them to question him about other potential terrorism threats." On the CBS Evening News (6/17, lead story, 2:40, Glor, 5.08M), correspondent Bob Orr reported that "once the intelligence interrogation at sea is over, Khattala will be read his Miranda rights."

On NBC Nightly News (6/17, story 2, 1:00, Williams, 7.86M), correspondent Pete Williams also reported the FBI "will give him a Miranda warning." Williams added that "in spite of calls that the US take [Khattala] to

Guantanamo Bay for more questioning, US officials say that will not happen." Williams noted that the White House pointed out that "not a single person has been sent there since President Obama took office."

The Hill (6/17, Wong, 237K) reported that National Security Council spokeswoman Caitlin Hayden released a statement on Tuesday reading: "Some have suggested that he should go to GTMO. Let me rule that out from the start." The Wall Street Journal (6/18, Barrett, Coker, Subscription Publication, 5.51M) reports that Attorney General Holder said on Tuesday that DOJ is now working to "begin the process of putting Khattallah on trial and seeking his conviction before a jury."

The Washington Post (6/18, Deyoung, Goldman, Tate, 4.22M) says the "response to the capture quickly divided along partisan lines, with Republicans demanding" Khattala "be thoroughly interrogated at sea and then brought to the U.S. military prison at Guantanamo Bay...for a military trial," while Democrats "argued...that he belongs in criminal court."

The New York Times (6/18, A10, Steinhauer, Savage, Subscription Publication, 9.65M) also reports that Khattala's capture "revived the debate over whether Islamic militants should be handled under the military or civilian justice systems." Rep. Trey Gowdy (R-SC), who is chairing a House special committee probing the Administration's handling of the Benghazi attacks, said, "A non-U.S. citizen who committed a crime outside of the United States in what can only be defined as an act of terror tantamount more to a war than a criminal-code violation puts me in the camp of arguing for a noncivilian court trial." However, the Times notes that Greg Doherty, whose brother, Glen Doherty, was one of the four Americans killed in Benghazi, "supported the decision to try...Khattala in a civilian court," saying, "I think that's what we should do with criminals, which is try them."

Under the headline, "Benghazi Attacks Suspect Is Questioned About Other Possible Plots," the Los Angeles Times (6/18, Cloud, Serrano, 3.46M) reports that Khattala "face[s] questioning...about other possible plots against U.S. targets." The Times does not say what other plots or potential targets Khattala might have been asked about.

Roll Call (6/17, Starks, Subscription Publication, 76K) reported that on Tuesday, some Republicans, including "potential presidential candidates" Sens. Marco Rubio and Ted Cruz, "call[ed] for...Khattallah to be housed at Gitmo," but the White House "released a lengthy statement pushing back against that argument."

The Washington Times (6/18, Boyer, Ybarra, 455K) reports that Sen. John McCain "said it was 'totally inappropriate' to hold the suspect at a location other than Guantanamo Bay."

The Washington Post (6/18, Gearan, Sullivan, 4.22M) reports that Sen. Lindsey Graham tweeted: "Holding Khattala on a ship shows the haphazard approach which comes from not having rational detention & interrogation policies. ... Naval vessels were never meant to be detention and interrogation sites."

The Huffington Post (6/17, Siddiqui, 11.54M) noted that while Graham is "a firm believer in keeping Guantanamo open...McCain's comments seem at odds with his prior statements that the U.S. naval base in Cuba should be shut down." The Huffington Post notes that "following a visit last year," McCain "said it was of 'national interest' to close the camp and transfer detainees to other locations."

The Washington Post (6/18, Gearan, Sullivan, 4.22M) says Democrats "expressed exasperation" over the Republican criticism. Sen. Pat Leahy, chairman of the House Judiciary Committee, is quoted as saying, "Oh for God's sake. With all of these terrorists, we've had four or five convictions in military courts. We've had several hundred convictions in federal courts. Do the math."

USA Today (6/18, Dorell, 5.82M) reports that Sen. Dianne Feinstein, who chairs the Senate Intelligence Committee, said she "supports the administration's efforts 'to gather intelligence from Khatallah and prosecute him in federal court.'" Feinstein is quoted as saying, "Past cases...have shown that we can obtain intelligence, convict terrorists and lock them away for a very long time."

Clinton Says There Are Still Questions About Benghazi That Need To Be Answered. The Washington Post (6/18, Gearan, Rucker, 4.22M) reports that in an appearance on CNN (6/17, 12.15M) on Tuesday, former secretary of state Clinton said that in regards to the Benghazi attacks, "I'm still looking for answers, because it

was a confusing and difficult time.” Clinton added, “There are answers, not all of them, not enough, frankly.” According to the Post, the Administration “has said that after multiple investigations, there is little new to say about the attacks,” but Clinton’s comments “appeared to lend credence to a central claim by Republicans that there is more to learn about the Benghazi tragedy.”

On CNN’s The Situation Room (6/17, 554K), Gloria Borger was asked if Clinton’s acknowledgment that there are unanswered questions justifies the creation of the House’s special committee on Benghazi. Borger said, “My reporter ears perked up when I heard that. Because of course, there are questions about whether she will testify,” and “now that she has come out and said...that there are a lot of unanswered questions, I guarantee you that Republicans will say, ‘Well, Madam Secretary, come visit.’”

Also on CNN’s The Situation Room (6/17, 554K), correspondent Dana Bash said Clinton’s comments must have been “music to Trey Gowdy’s ears,” referring to the South Carolina Republican who is chairing the Benghazi panel. According to Bash, Clinton was “basically making the point for Republicans.” Bash added, “I’m guessing that in retrospect she wishes she would have phrased it differently.”

Peter Grier, in a piece for the Christian Science Monitor (6/18, Grier, 566K), says that “for Clinton the best scenario is that the detention and forthcoming trial of ...Khattala will provide some finality for the Benghazi episode, at least in the minds of voters.” However, Grier adds that “there’s another scenario that might prove more difficult for Clinton to handle: the snaring of a Benghazi ringleader opens the subject anew.”

The Huffington Post (6/17, Taibi, 11.54M) reported that on Fox News, Peter Hegseth, CEO of Concerned Veterans for America, said, “I think this thing needs to be tied in a bow for certain individuals to have a clean break from an incident that...will continue to be a scandal and an anchor around a certain individuals neck who may want to run for president.” Hegseth added, “What a great thing to announce in an interview tonight at Fox News that the perpetrators have been brought to justice – it’s all too neat and it’s too cute.”

Benghazi Victim’s Mother Continues To Criticize Clinton. On NBC Nightly News (6/17, lead story, 3:05, Williams, 7.86M), Andrea Mitchell reported that former secretary of state Clinton “can’t seem to shake the controversy” over her responsibility for the security lapses that left the Americans in Benghazi vulnerable. Pat Smith, the mother of Sean Smith, one of the Americans killed in the attacks, was shown saying Clinton is “the kind of person I do not want to be president, ever.” On ABC World News (6/17, story 2, 2:00, Muir), Smith was shown saying, “I’m glad they got one of ‘em. There was a whole bunch that set fire to that place.”

In an op-ed for the Wall Street Journal (6/18, Subscription Publication, 5.51M) titled, “Doesn’t Hillary Clinton Know The Law?” Victoria Toensing, who served as deputy assistant attorney general during the Reagan Administration, makes the case that under the Secure Embassy Construction and Counterterrorism Act of 1999, it was Clinton’s responsibility, as secretary of state, to make sure that all US consulates were properly defended.

NYTimes A1: Khattala Reportedly Claimed That An Online Video Drove Him To Attack Americans. David Kirkpatrick, who wrote a widely noted front-page article for the New York Times last December in which he concluded that there is “no evidence that Al Qaeda or other international terrorist groups had any role in the assault,” and that “contrary to claims by some members of Congress, it was fueled in large part by anger at an American-made video denigrating Islam,” has a front-page analysis of Khattala’s apprehension in today’s New York Times (6/18, A1, Subscription Publication, 9.65M). According to Kirkpatrick, Khattala “is a local Islamist militant, with no known connections to international terrorist groups,” who “told other Libyans in private conversations during the night of the attack that he was moved to attack the diplomatic mission to take revenge for an insult to Islam in an American-made online video.” Kirkpatrick also reports that “residents of Benghazi were apparently unaware of his capture until the United States disclosed it, perhaps because of the fighting in the city.”

Under the headline, “U.S. Raid Deepens Libyans’ Fears Of Instability, Highlights Central Government’s Weakness,” the Washington Post (6/18, Cunningham, 4.22M) reports that the US “Special Forces raid comes amid renewed fighting in Benghazi between the militant Ansar al-Sharia group, to which the United States says Abu Khattala is linked, and armed forces loyal to renegade Libyan general Khalifa Hifter.” The Post reports that on Sunday, “airstrikes carried out by pilots loyal to Hifter sparked clashes with armed militias, including Ansar al-Sharia,” and, “according to...some of [his] close neighbors,” Khattala “had been out fighting on Sunday before

U.S. forces captured him.”

In an editorial titled, “An Ideal Candidate For Guantanamo,” the Wall Street Journal (6/18, Subscription Publication, 5.51M), asserts that, contrary to the reporting of the Times’ Kirkpatrick, Khattala was not motivated by any anti-Muslim video when he led the terrorist attack on the US facilities in Benghazi.

OBAMA HAILS IMPROVED MANUFACTURING PICTURE IN VISIT TO PITTSBURGH. With the Iraq crisis and the capture of a Benghazi terrorist dominating TV newscasts and front-page headlines this morning, the President’s trip to Pittsburgh generated print coverage on the inside pages of today’s newspapers. Reports tended to cast the President and his policies in a favorable light, highlighting improvements in manufacturing and his 45-minute conversation with a group of men and women.

The Washington Post (6/18, Eilperin, 4.22M) notes Obama “touted the renaissance of American manufacturing” during his visit to TechShop in Pittsburgh, where he “talked about how the industry had evolved over time, noting that in the past ‘manufacturing meant big factories, you know, all kinds of smoke and fire and a lot of heavy capital.’” Obama also “engaged in a free-wheeling 45-minute discussion with men and women with business aspirations, discussing the need for better child-care options, how the US educational system could better prepare students and the fact that Obama’s daughter Malia gave him a personal letter for Father’s Day.”

Obama “acted as a pitchman for entrepreneurs,” says the New York Times (6/18, Shear, Subscription Publication, 9.65M), “fielding questions from small-business owners in an attempt to highlight creative ways to boost manufacturing.” During his Q&A, Obama fielded a question from a woman who said she was about to turn 60. Said the President, “Older workers who lose their jobs have to recognize that they are going to have to adapt and retool in order to get an opportunity. ... You may not be able to be in the same industry you were before. ... It’s not always fair, but it may be what’s required.” Also yesterday, “the White House announced a program that helps provide entrepreneurs access to more than \$5 billion in advanced manufacturing equipment,” and the Administration “said that five federal agencies will invest \$150 million to support the Materials Genome Initiative to study advanced materials.”

The Pittsburgh Post-Gazette (6/18, O’Toole, 677K) reports that Obama also “described new manufacturing investment commitments from 90 mayors cross the country, as well as a plan to provide private-sector innovators with access to expensive federal equipment such as wind tunnels at NASA and supercomputers at the Department of Energy’s Oak Ridge National Laboratory.” Jeff Zients, director of the National Economic Council, told reports that “the president’s plan aims to give innovators – dubbed ‘makers’ by the White House — access to equipment that no individual or small business could afford on its own.” Said Zients, “[We are] talking about using spare capacity when it’s available to give access to local makers and entrepreneurs.”

The Pittsburgh Tribune-Review (6/18, Wereschagin, Erdley, 614K) reports that according to Matthew Rousu, associate professor of economics at Susquehanna University, “the overall economic effect of these plans is likely to be marginal, however, because advanced research and development jobs go to skilled workers, most of whom have college degree.” Rousu said the plan “suffers from some of the same weaknesses as the 2009 stimulus act, which pumped billions into environmentally friendly technology research, supporting jobs for workers whose skills and training already were in demand, he said.” The Tribune-Review notes that the President arrived in Pittsburgh with Sen. Bob Casey, as well as “senior adviser Valerie Jarrett and deputy chief of staff Anita Decker Breckinridge.”

Reuters (6/18, Rampton) notes that Obama was also asked about his Administration’s efforts to reduce gender-pay disparities. Said Obama, “This is not a women’s issue, this is a family issue. Women now bring in close to half of all income, and there are a whole lot of families out there where the woman is the primary breadwinner. ... And if Michelle is not being paid fairly, then that’s not helping me. I want her to get what she rightfully deserves. I want her being paid the same as a man doing the same job, because that is helping our family.” Obama also said that “the US ‘should do everything we can to strengthen unions in this country’ after decades of waning influence,” The Hill (6/17, Sink, 237K) reports, though he “encouraged labor ‘to be flexible’ and ‘recognize that if you’re working for a company, that that company has to have a bottom line.’”

OBAMA ATTENDS HIS FIRST SUPER PAC FUNDRAISER. The New York Times (6/18, Shear, Davis, Subscription Publication, 9.65M) reports that President Obama “once criticized the flow of money to political

action committees, calling it a threat to democracy." However, "after conceding to political reality" and accepting super PAC support in 2012, Obama "completed his turnaround on Tuesday by attending a fund-raiser for the Senate Majority PAC, which raises money for Democrats in Senate races." The Times says that it was the first time the President had attended a super PAC fundraiser, and the move "reflected the urgency of raising money to defend the Democratic majority in the Senate this fall."

The AP (6/18, Kuhnhen) reports that the President was "courting high-dollar Democratic donors Tuesday," including headlining an event for a super PAC "like the ones he once decried." In addition, he appeared at a "gala fundraiser for gay contributors one day after agreeing to take executive steps on workplace discrimination long sought by the gay community." Obama ended the evening "with a dinner at the home of Vogue editor Anna Wintour." The AP says that the President's presence at the events "underscores his popularity as a draw for big donors" along with his continued "utility" of boosting the coffers of the Democratic Party.

Editorial Wrap-Up:

NEW YORK TIMES. "A Balancing Act On Iraq." In an editorial, the New York Times (6/18, Subscription Publication, 9.65M) praises Obama's "cautious" handling of the Iraq crisis, and urges that his eventual decision be "grounded in a larger political strategy that considers the full spectrum of sectarian dangers that are roiling the region."

"The Limits Of The Fed." In an editorial, the New York Times (6/18, Subscription Publication, 9.65M) says that despite the efforts of the Fed to stimulate the economy, it remains anything but robust. The Times says that all of the Fed's tools have not been enough to increase demand among consumers, and "only Congress can provide the extra dollars for that, but lawmakers have been unwilling or unable to take action, even just to provide basics like federal unemployment benefits or highway and bridge repair."

"Mr. Obama's Ocean Monument." The New York Times (6/18, Subscription Publication, 9.65M) editorializes that the US "has the watery equivalent" of an "Amazon basin," and the marine life that live in this area of the Pacific Ocean "are the best reasons to welcome" Obama's decision to expand the protected area. The Times praises Obama's decision as consistent with previous efforts by presidents "of both parties" to "protect" the region.

WASHINGTON POST. "Charting Ukraine's Middle Course." An editorial in the Washington Post (6/18, 4.22M) says that as "Russia's provocations continue" in Ukraine, the West "must prepare clear and certain consequences." The Post notes that Ukrainian President Petro Poroshenko is "preparing a peace plan meant to reincorporate Ukraine's east on terms that will be acceptable to its many ethnic Russians," and argues that if the effort "does not elicit a fair response, the United States and its European allies must be ready with a strategy and a timetable to respond decisively."

"Harming Democracy Promotion." In an editorial, the Washington Post (6/18, 4.22M) notes that given the President's pledge of "support for democracy-promotion programs" last month at West Point, it is "perplexing that the White House, in the appendix to next year's budget, has proposed to undo the so-called Brownback amendment," which "bars any administration from asking for foreign regimes' approval before sending democracy promotion aid." The Post argues that changing this policy will "send an unfortunate message: If democracy promotion programs have to be compromised to protect strategic alliances, so be it."

"A Rough Ride For Uber."

WALL STREET JOURNAL. "Our Friends The Mullahs" In an editorial, the Wall Street Journal (6/18, Subscription Publication, 5.51M) comes out against US-Iran cooperation in Iraq, concluding that the two nations' starkly different strategic goals and interests would spell disaster for the US position in the region.

"An Ideal Candidate For Guantanamo." In an editorial, the Wall Street Journal (6/18, Subscription Publication, 5.51M), asserts that, contrary to the reporting of the New York Times' David Kirkpatrick, Ahmed Abu Khatallah was not motivated by any anti-Muslim video when he led the terrorist attack on the US facilities in Benghazi.

"IRS Contempt Of Congress." In an editorial, the Wall Street Journal (6/18, Subscription Publication, 5.51M) says that the lost IRS emails are disturbing, but adds that the agency also suggested on Friday that it had been only selectively sending to the House the emails of Lerner it did possess. The Journal says that Koskinen should face tough questions when he testifies before the House.

Last Laughs:

LATE NIGHT POLITICAL HUMOR.

Jimmy Fallon: "In a new interview, Hillary Clinton said the Bible is the most influential book she has ever read. Now some people think she might be pandering to southern, Christian voters. Then she said, 'Come on, y'all, little 'ole me?'"

David Letterman: "Well, President Obama is sending a couple hundred troops into Iraq. We spent six years trying to figure a way to get out of Iraq. What are you gonna do? They say this time there is an exit strategy. Barack Obama has an exit strategy. 2016, he's gone."

David Letterman: [Commenting on World Cup soccer tournament] "Soccer is one of those things that the rest of the world cares more about than we do – you know, like healthcare, education, gun control – hey, we're not interested in any of that."

David Letterman: "But if you love soccer, you have to wait four years for a World Cup, and it's like making an appointment with a VA doctor."

Subject: Draft USDA release for bi-state sage-grouse announcement

Sally -

On Friday, USDA is announcing over \$25M to help conserve the bi-state sage-grouse, the distinct population located in NV and CA. (Good news!)

They are elevating the announcement to the Secretary's level and have offered to give you a quote in the release. We are scrubbing the release through BLM, USGS and FWS channels now, but I wanted to send you the draft version for your review/quote approval.

Thanks in advance,

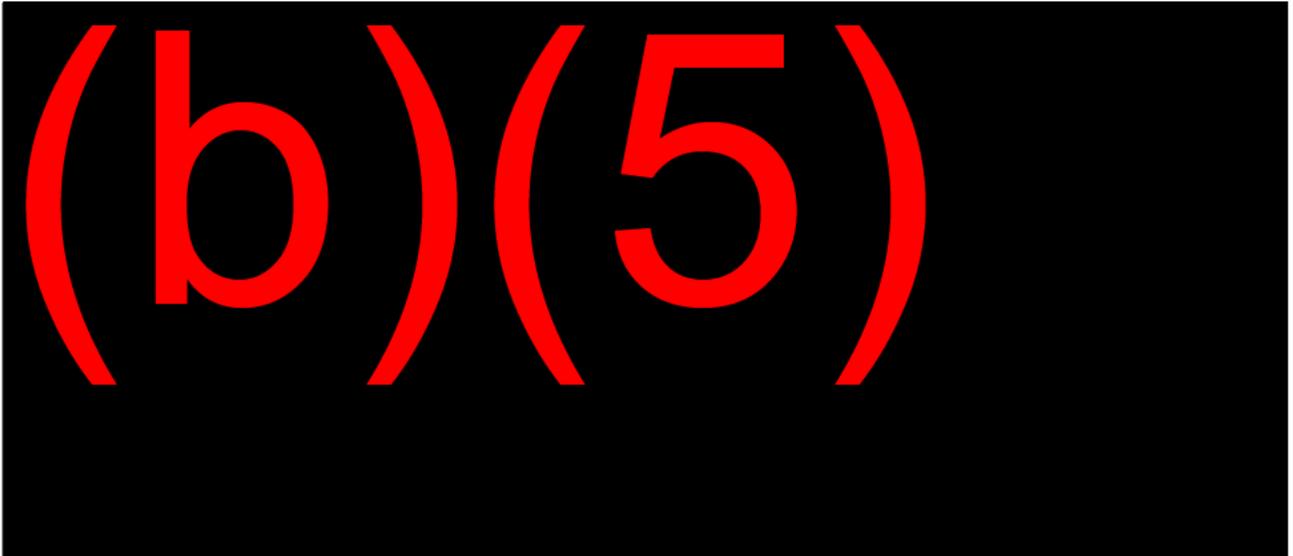

Kate

DOI in the News:

INTERIOR TO HOST PUBLIC MEETINGS ON NATIVE HAWAIIAN RECOGNITION. The AP (6/19, Bussewitz) reports that "the federal government announced Wednesday it will take a first step toward recognizing and working with a Native Hawaiian government at a time when a growing number of Hawaiians are questioning the legality of the US annexation of Hawaii." The Interior Department will "host a series of public meetings during the next 60 days with Native Hawaiians, other members of the public and Native American tribes in the continental US to discuss the complex issue, Rhea Suh, assistant secretary for policy, management and budget for the department, said during a conference call with reporters." Suh said, "This does not mean we are proposing an actual formal policy. We are simply announcing that we'll begin to have conversations with all relevant parties to help determine whether we should move forward with this process and if so, how we should do it."

The Honolulu Star-Advertiser (6/19, 402K) reports that Suh said "the administration is starting this process in response to requests from the Native Hawaiian community, Hawaii's congressional delegation and state leaders." According to the article, "among the other questions the administration seeks to answer is whether Interior should assist the Hawaiian community in reorganizing its government and whether conditions should be established to pave the way for federal recognition of a new governing entity formed by Hawaiians."

The Honolulu Civil Beat (6/19, 41) reports that “underscoring how significant the development is, Hawaii’s congressional delegation — Sens. Mazie Hirono and Brian Schatz, and Reps. Colleen Hanabusa and Tulsi Gabbard — issued a joint statement.” They said, “We applaud the Administration’s commitment to an open dialogue, starting with listening sessions in Hawaii to provide ample opportunity for Native Hawaiians and the general public to contribute their comments and concerns. This notice represents an historic opportunity to address years of injustice and marks a positive step forward in the push for Native Hawaiian self-determination.”

Coverage by the AP was also picked up by the Washington Post (6/19, 4.22M), the Quincy (IL) Herald-Whig (6/19, 85K), the Minneapolis Star Tribune (6/19, Bussewitz, 1.48M), the Seymour (IN) Times Tribune (6/19, 31K), the Lexington (KY) Herald-Leader (6/18, 395K), the Sacramento (CA) Bee (6/18, 687K), Yahoo! (6/19, Bussewitz, 17.91M), KGMB-TV Honolulu (6/19, 41K), and KOB-TV Albuquerque, NM (6/19, 59K).

Additional coverage was provided by the Big Island (HI) Now (6/18), the Maui (HI) Now (6/18), the Honolulu Star-Advertiser (6/19, 402K), the West Hawaii Today (6/19, 26K), and the Nation Sun News (6/19).

CONTINUING COVERAGE OF ANNOUNCEMENT ON PILT FUNDING. Coverage of Interior Secretary Sally Jewell’s announcement of \$437 million in PILT funds continued on Wednesday.

Alaska. The AP (6/19) reports that “federal officials say 29 local governments in rural Alaska are receiving a total of more than \$28.5 million through the 2014 Payments in Lieu Of Taxes program.”

Additional coverage was picked up by the Anchorage (AK) Daily News (6/18, 251K), the Fairbanks (AK) News-Miner (6/19, 44K), the Juneau (AK) Empire (6/18, 21K), the Greenfield (IN) Daily Reporter (6/19, 31K), KTVA-TV Anchorage, AK (6/19, 1K), KTUU-TV Anchorage, AK (6/19, 4K), KTNA-FM Talkeetna, AK (6/17), and KTOO-FM Juneau, AK (6/18).

California. KXTV-TV Sacramento, CA (6/18, 25K) reports that “California counties with vast tracts of federal land will receive a total of \$45.3 million from Uncle Sam this year.”

Additional coverage was picked up by the Eureka (CA) Times Standard (6/19, 76K) and the Willits (CA) News (6/19, 10K).

Colorado. The Boulder County Business Report (6/18, 21K) reports that “counties along the northern Front Range have received nearly \$2.18 million in payments in lieu of taxes from the federal Department of the Interior.” The article notes that “the money is part of more than \$34.5 million the PILT program released Tuesday to Colorado counties.”

Additional coverage was picked up by the Northern Colorado Business Report (6/18), the Glenwood Springs (CO) Post Independent (6/19, 27K), and the Pagosa (CO) Daily Post (6/19).

Montana. The Big Horn Radio Network (6/19) reports that “in total, for its 3.5 million acres of federal land, Park County will receive \$1.7 million dollars.” Also, “Big Horn County, with its 1.5 million acres, will receive just over one million in PILT payments.”

Additional coverage was picked up by the Great Falls (MT) Tribune (6/18, 90K).

Nevada. The AP (6/19) reports that “federal officials say that 17 rural Nevada communities are getting a total of about \$25.4 million this year under the government’s annual Payments in Lieu of Taxes program.”

Additional coverage was picked up by the Elko (NV) Daily Free Press (6/19, 22K), KRNV-TV Reno, NV (6/19, 2K), KTVN-TV Reno, NV (6/19, 1K), and KVVU-TV Las Vegas (6/19, 23K).

New Mexico. The AP (6/19) reports that “the federal government will be sending more than \$37 million to New Mexico to compensate counties for non-taxable federal lands within their borders.”

Additional coverage was picked up by the Albuquerque (NM) Journal (6/19, 282K), the Las Cruces (NM) Sun-

News (6/19, 59K), the Los Alamos (NM) Daily Post (6/19), the Alamogordo (NM) Daily News (6/19, 19K), the Deming (NM) Headlight (6/19, 10K), KOB-TV Albuquerque, NM (6/19, 59K), and KAMR-TV Amarillo, TX (6/19, 428).

Wyoming. The Wyoming Business Report (6/18, 24K) reports that "Wyoming received more than \$27.1 million on Tuesday through PILT – or payments in lieu of taxes funding from the federal government."

PRESIDENT OBAMA ANNOUNCES PLAN TO EXPAND PACIFIC REMOTE ISLANDS MARINE NATIONAL MONUMENT. The E&E Daily (6/8) reports that the State Department's "Our Ocean" conference, hosted by Secretary of State John Kerry, concluded on Tuesday with "well over \$1 billion in pledges to protect and preserve the world's oceans." The article notes that President Obama "led the charge early in the day when he announced plans to make a vast portion of the south-central Pacific Ocean off limits to energy exploration, fishing and other harmful activities, thereby creating one of the largest ocean preserves in the world." The federal government will "attempt to expand the Pacific Remote Islands Marine National Monument with the guidance of scientists, fishermen, conservation experts and elected officials."

SENATE PANEL APPROVES NOMINEES FOR BOR, USGS POSTS. The E&E Daily (6/8) reports that the Senate Energy and Natural Resources Committee on Wednesday "approved several Obama administration nominees for key energy and environment posts." The panel "easily advanced the president's nominees to lead the Bureau of Reclamation, the US Geological Survey and the Department of Energy's environmental management work." The panel unanimously approved Estevan López to be commissioner of the BOR. Also, the committee unanimously approved Suzette Kimball to lead USGS.

ADVISORY GROUP LISTS RECOMMENDATIONS ON STRATEGIES TO FIGHT WILDLIFE TRAFFICKING. The E&E Daily (6/8) reports that "the White House's plan to combat wildlife trafficking is closer to implementation, after an advisory panel recently released a list of recommendations on how best to crack down on the growing illicit trade." The Advisory Council on Wildlife Trafficking "approved the recommendations at its final meeting this month." The document now goes to the Task Force on Wildlife Trafficking, a panel of federal officials headed by Secretary of State John Kerry and Interior Secretary Sally Jewell.

ARIZONA PASSES LEGISLATION ON FIRE PREVENTION FUNDING. The E&E Daily (6/8) reports that "Arizona lawmakers made a plan to make a plan this year to reduce the risk of wildfire on state trust lands." However, "critics saw the move as yet another failure to address the threat to lives and property in Arizona's dusty wildlands." The legislation "passed by the GOP-controlled Legislature allocated \$1.4 million to thin bone-dry vegetation no earlier than 2016, the year the plan is due." The article notes that "the total was nowhere near the \$100 million that House Appropriations Chairman John Kavanagh (R) estimated a comprehensive project would require."

ADDITIONAL COVERAGE OF ANNOUNCEMENT ON AUCTION FOR WIND ENERGY LEASES OFF MASSACHUSETTS. Additional coverage of the announcement of the auction for wind energy leases off Massachusetts was provided by NPR (6/19, Chappell, 519K), the Martha's Vineyard Times (6/18, 47K), the New Bedford (MA) Standard-Times (6/18, 54K), the Cape Cod (MA) Today (6/18, 3K), the SNL Financial (6/19, 21K), and the Power Engineering (6/19).

America's Great Outdoors:

National Park Service:

BATTLE OVER YELLOWSTONE SNOWMOBILES HEATING UP AGAIN. The Hill (6/19, Devaney, 237K) reports that "the battle over whether snowmobiles should be allowed in Yellowstone National Park is heating up again." The US Forest Service this week announced "it is looking to draw up a map of what trails and roads in the nation's oldest national park are open to snowmobile traffic, reopening an issue that had drawn fierce lobbying from environmental groups."

RAZORBACK SUCKER FOUND SPAWNING IN GRAND CANYON. The AP (6/19) reports that the razorback sucker, "an endangered fish species believed missing from Grand Canyon National Park since the 1990s, has

been found spawning in the lower Colorado River." According to Interior Department officials, "researchers have discovered larval razorback suckers since mid-April in the river that runs through the canyon." The article notes that the "development indicates that suitable habitat is available to support larger populations of the species that's characterized by a long, high sharp-edged hump behind its head, experts said."

NPS URGES VISITORS NOT TO DIP AT WWII MEMORIAL POOL. WJLA-TV Washington (6/19, 118K) reports that "pictures of people splashing inside the pool" at the World War II Memorial have "prompted a furious reaction on social media." The NPS said that "they understand their desire to cool off, but try to explain that the memorial is a site that deserves respect."

ST. CLAIR ANSWERS CRITICS ON NATIONAL PARK PROPOSAL. The Bangor (ME) Daily News (6/18, 166K) reports that Lucas St. Clair "spoke informally for 1 ½ hours before a crowd that included a half-dozen people who opposed his efforts to create a North Woods national park and accompanying multi-use recreation adjacent on 150,000 acres adjacent to Baxter State Park." He said that "if he were to turn the 150,000-acre area proposed for a national park and recreation area over to the logging industry, it would produce 53 jobs, according to a study by a University of Maine economist." However, "the son of environmentalist and entrepreneur Roxanne Quimby wants to do more for Lincoln, the Katahdin region, and northern Maine, he told about 30 people at a Lincoln Lakes Region Chamber of Commerce meeting Wednesday night."

PAPER OPPOSES DESIGNATING COLORADO NATIONAL MONUMENT AS A NATIONAL PARK. In an editorial, the Grand Junction (CO) Daily Sentinel (6/19, 73K) argues against that designating Colorado National Monument as a national park. According to the paper, Park Superintendent Lisa Eckert has "done herself no favors in fighting perceptions of a tone-deaf federal agency that cares little about being a good neighbor."

Bureau of Land Management:

UTAH LEGISLATORS HOLD PUBLIC LANDS DISCUSSION. The AP (6/19, Price) reports that Utah legislators "held a panel discussion Wednesday with federal officials and representatives of sheriff's offices on how federal control of vast swaths of Utah affects law enforcement." The article notes that "the discussion came as Utah officials await the release of a study looking at what would happen if the state assumed control of millions of acres of land currently in federal hands." Legislators on Wednesday "didn't take any action besides hosting the discussion."

Also covering the story are the Deseret (UT) News (6/19, 610K) and KSTU-TV Salt Lake City (6/18, 42K).

Meanwhile, in an op-ed for the Albuquerque (NM) Journal (6/19, 282K), Carl Graham, Director, Coalition for Self Government in the West, writes that "self-determination and self-government are what's really at stake in the growing federal lands debate in New Mexico." He argues that "this isn't really about dollars and cents." Rather, "it's about basic fairness and preserving the viability and values of our rural production economy."

REP. TIPTON SAYS BLM MUST LISTEN TO STATE, LOCAL CONCERNS ON GUNNISON GROUSE PLAN. The E&E Daily (6/8) reports that Rep. Scott Tipton says the BLM "better be mindful of state and local concerns as it develops an ambitious new plan to protect the Gunnison sage grouse in Colorado and Utah." Tipton said in a statement, "As the BLM revises the RMPs, I strongly urge them to work closely with local stakeholders and states who know the habitats best, and use sound, transparent science to ensure the grouse is protected while maintaining the ability of local communities to responsibly utilize and access the land. To achieve this, collaboration with state and local stakeholders is an absolute necessity."

Fish and Wildlife Service:

INTERIOR URGES APPEALS COURT TO ALLOW RULING STAND ON PROTECTION FOR DELTA SMELT. The E&E Daily (6/8) reports that the Interior Department "urged a federal appeals court to reject a California request to reconsider a ruling upholding the agency's determination that the state's water infrastructure threatens an endangered fish at the heart of a regional water war." In a March ruling, a divided 9th US Circuit Court of Appeals upheld the FWS' 2008 biological opinion for delta smelt, "which concluded that pumping water from the San Francisco Bay-Delta into Southern California was threatening the small fish's critical habitat."

GROUP PETITIONS INTERIOR TO EXPAND GRIZZLY RECOVERY RANGE. The E&E Daily (6/8) reports that An environmental group is "petitioning the government to greatly expand its grizzly bear recovery efforts so the iconic predators can be returned to up to 110,000 square miles of historical range in Arizona, California, New Mexico and Utah." The Center for Biological Diversity submitted the petition on Wednesday to Interior Secretary Sally Jewell and FWS Director Dan Ashe. The group "claims the agency has a legal duty to respond to the petition and update its 1993 recovery plan for grizzlies 'to incorporate new recovery strategies throughout the grizzly bear's historic range.'"

Also covering the story are the AP (6/19, Bryan) and Reuters (6/19, Zuckerman). Coverage by the AP was also picked up by the Washington Post (6/19, 4.22M), the Denver Post (6/19, 940K), the Idaho Statesman (6/18, 222K), the Sacramento (CA) Bee (6/18, 687K), and ABC News (6/19, 3.58M).

DALLAS SAFARI CLUB WANTS FWS TO LIFT BAN ON AFRICAN IVORY IMPORTS. The Dallas Morning News (6/19, Wilonsky, 1.18M) reports that "the same local organization that auctioned off the right to hunt an endangered African rhino – in the name of preservation – is now asking the federal government to reverse its ban on importing 'sport-hunted African elephant trophies' taken from Tanzania and Zimbabwe." The Dallas Safari Club is "trying to convince" the FWS "from lifting its 2014-long ban on importing ivory from those two African nations." The Dallas Safari Club calls the government's actions "arbitrary and capricious."

EFFECTS OF FIRE ON MOOSE IN KENAI NATIONAL WILDLIFE REFUGE TO BE EXAMINED. The E&E Daily (6/8) reports that "research efforts are just beginning in the Kenai National Wildlife Refuge as the massive Funny River Horse Trail fire dies down." According to the article, "representatives from various federal agencies tentatively agreed last week to examine the effects of the fire on moose and other parts of an ecosystem that hadn't burned significantly in decades." The article notes that "the Alaska Department of Fish and Game, the Forest Service, the Fish and Wildlife Service, and the refuge could pool their resources and begin gathering data next year."

CRITICS QUESTION MONOMOY EXPANSION PLAN. The Cape Cod (MA) Times (6/18, 101K) reports that "the drive to oppose what some see as an unexpected annexation of town land and an expansion of jurisdiction over fishing contained in the new US Fish and Wildlife Service management plan for the Monomoy National Wildlife Refuge appears to be gaining momentum." The article notes that "mailers went out last week to nearly 6,000 Chatham residents asking that they submit comments on the plan, and nearly 1,700 signatures have been collected on a petition expressing opposition to the refuge taking ownership of 717 acres of barrier beach the town believes it owns and to the claim that the Wildlife Service can control the types of fishing gear used in waters within its boundaries." Also, "on Tuesday night, over 200 people attended a public hearing on the plan with many of the 40 speakers expressing their disapproval of the land taking and the assertion of control over fishing practices by the Fish and Wildlife Service." But "at the same time, many speakers were careful to say they supported the refuge mission and hoped that a mutually agreeable solution could be found."

MEN SENTENCED FOR LURING, JUMPING ON MANATEES. The AP (6/19) reports that "two men have been sentenced over an online video that shows one man jumping on two manatees." The US Attorney's Office in Orlando said that "22-year-old Taylor Blake Martin was ordered Wednesday to pay a \$3,000 fine, while 22-year-old Seth Andrew Stephenson must pay \$2,000." FWS officials "began investigating last year after the video was posted on Facebook."

Also reporting on the story are Reuters (6/19, Stein), the New York Daily News (6/19, 4.36M), the Naples (FL) Daily News (6/18, 167K), the Savannah (GA) Morning News (6/18, 226K), and WBRC-TV Birmingham, AL (6/19, 11K).

ADDITIONAL COVERAGE: GROUPS FILE LAWSUIT SEEKING ENDANGERED STATUS FOR LESSER PRAIRIE CHICKEN. Additional coverage of a lawsuit filed by three wildlife-advocacy groups requesting the lesser prairie chicken be listed as an endangered species was provided by the Lubbock (TX) Avalanche-Journal (6/18, 176K), the Pueblo (CO) Chieftain (6/19, 94K), the Artesia (NM) News (6/19, 10K), Fox News (6/18, 6.72M), and the Oil and Gas Journal (6/19, 1K).

HUMANE SOCIETY OF THE UNITED STATES PETITIONS FOR LEAD AMMO BAN ON PUBLIC LANDS. For

Outdoor Life Magazine (6/19, 1.12M), Tony Hansen writes that the Humane Society of the United States is "looking to effectively shut down hunting on public land by eliminating the use of lead-based ammunition." In its petition to the Interior Department, HSUS "asserts that the use of lead ammo is causing widespread declines in wildlife populations, that humans are at risk of lead poisoning when consuming game shot with lead bullets and that 'Lead-free alternatives are available, affordable and sensible.'" However, Hansen argues that "this isn't about public health safety," and "this isn't about environmental health either." Rather he claims that "this is about HSUS' desire to make it as difficult as possible for Americans to hunt."

Securing America's Energy Future:

Renewable Energy:

STUDY: WIND TURBINES GENERATE PROMPT ENERGY PAYBACK. The E&E Daily (6/8) reports that "the energy required to build a new commercial-scale wind turbine amounts to only a small amount of what the turbine will produce over a projected 20-year life span, according to a new life-cycle analysis of wind turbines performed by Oregon State University researchers." The environmental analysis, published in the International Journal of Sustainable Manufacturing, finds that "a 2-megawatt turbine built for a typical Pacific Northwest wind farm will pay back the energy used in its manufacture and installation within five to eight months of coming into service." Authors Karl Haapala and Preedanood Prempreeda explain in the paper, "All forms of energy generation require the conversion of natural resource inputs, which are attendant with environmental impacts and costs that must be quantified to make appropriate energy system development decisions."

GROUP TO FILE LAWSUIT OVER EXTENSION OF EAGLE DEATH PERMITS. The AP (6/19, Cappiello) reports that "a conservation group says it's suing the Obama administration over a new federal rule that allows wind-energy companies to seek approval to kill or injure eagles for 30 years." The lawsuit from the American Bird Conservancy was "expected to be filed Thursday in federal court in San Jose, California." The group claims that "the rule, which extended by 25 years the length of time companies may kill or injure eagles without fear of prosecution, is illegal because the U.S. Fish and Wildlife Service failed to evaluate the consequences and ensure it would not damage eagle populations."

O'CONNELL: FEDERAL GOVERNMENT SHOULDN'T INVEST IN CAPE WIND. Dan O'Connell, president and CEO of the Massachusetts Competitive Partnership, writes in a piece for the "Congress Blog" of The Hill (6/19, O'Connell, 237K) that "despite the abundance of reasonably priced renewable energy through hydro and competitively bid onshore wind projects, the high-priced Cape Wind project continues to dominate the headlines and the discussion about energy innovation and subjects taxpayers and ratepayers alike to unnecessary costs." He goes on to say that "as a matter of practical energy policy, renewable energy should be embraced as long as it is competitively bid, cost effective, and does not rely on federal taxpayer subsidies as a primary finance vehicle" and because of these reasons, "the federal government should not be investing taxpayer dollars in projects that do not meet this standard."

Onshore Energy Development:

BLM SEEKS PUBLIC INPUT ON NEXT SALE IN NATIONAL PETROLEUM RESERVE-ALASKA. The E&E Daily (6/8) reports that the BLM is seeking public input on plans to sell additional oil and gas leases in the National Petroleum Reserve-Alaska. Federal regulators will determine which "NPR-A tracts should be included in the government's November oil and gas lease sale." Comments on the lease sale are due by July 18. In announcing the next lease sale, BLM's Alaska State Director Bud Cribley said regulators are seeking to "develop oil and gas resources while protecting important surface resources and subsistence opportunities."

ONRR CONSIDERING CHANGES TO HOW IT VALUES OIL PRODUCED ON RESERVATIONS. The Hill (6/19, Devaney, 237K) reports that the Office of Natural Resources Revenue is "considering changes to how it values oil produced on Indian reservations."

Tackling America's Water Challenges:

HOUSE PANEL APPROVES SPENDING BILL FOR DOE, BOR, OTHER AGENCIES. The E&E Daily (6/8) reports that the House Appropriations Committee on Wednesday "cleared its \$34 billion spending plan for the Department of Energy, Army Corps of Engineers and other agencies, after a markup dominated by discussion of two water policy riders Republicans have been trying for years to attach to spending laws." The article notes that "the overall bill passed on a voice vote with relatively few modifications compared with when it was first offered earlier this month," and "no changes were made to spending levels outlined in the bill."

Also, the Sunnyside (WA) Daily Sun-News (6/18) reports that "the report accompanying the Energy and Water Appropriations bill for next year, which was released by the House Appropriations Committee Tuesday, includes language secured by Congressman Doc Hastings to support the Yakima River Basin Water Enhancement Project Integrated Plan." Hastings said, "While the weather cooperated this year and all water users are able to access the water they need, there is no question that additional water storage is needed in the Yakima River Basin so that our communities, farmers and fish get through the dry years that we have experienced before and will experience again."

SENATE COMMITTEE PASSES DAM, WATER LEGISLATION. The Oregonian (6/19, 992K) reports that "a bill that would remove the spending ceiling on dam safety improvements and could help finance costly fixes at Scoggins Dam, near Gaston, has passed the US Senate Committee on Energy and Natural Resources." Sens. Ron Wyden and Jeff Merkley "introduced the bill earlier this year to amend the Reclamation Safety of Dams Act of 1978 and remove spending caps for construction work on 476 dams and dikes managed by the US Bureau of Reclamation across the western United States." The committee, "which met Wednesday, June 18, also passed an amendment to the bill to authorize \$1.1 billion for safety construction projects to the dams and dikes managed by the bureau."

The Casper (WY) Star-Tribune (6/19, 90K) reports that the Senate Energy and Natural Resources Committee "advanced two bills sponsored by Sen. John Barrasso to address aging Bureau of Reclamation water facilities in the West." Senate Bill 1800 would "start a process to determine the scope and cost of repairs needed for Bureau of Reclamation infrastructure across the West." Senate Bill 2010 would "streamline the permitting process at 11 conduit hydropower development sites in the region."

BOR ACCEPTING COMMENTS ON FUTURE OF NAVAJO GENERATING STATION. The Arizona Daily Sun (6/19, 33K) reports that the BOR is "accepting public comment until July 7 for an environmental impact statement regarding proposals by the Navajo Generating Station and Kayenta Mine to reduce emissions by one-third for 25 years beginning in 2019, when the coal-fired plant's lease expires."

OPPONENTS OF BAY DELTA CONSERVATION PLAN GEAR UP TO OPPOSE WATER BONDS. The Sacramento (CA) Bee (6/18, 687K) reports that "California lawmakers haven't finished maneuvering to get a new water bond on the ballot in November, but opponents have already begun mobilizing." Opponents of Gov. Jerry Brown's "plan to build massive water conveyance tunnels under the Sacramento San Joaquin Delta are launching a political action committee to battle any water bond that could facilitate the Bay Delta Conservation Plan." According to the article, "their goal is to raise at least \$1 million for the effort." The story also appears at the San Luis Obispo (CA) Tribune (6/18, 126K).

Additional coverage was provided by the Bloomberg BusinessWeek (6/18, 4.91M) and the San Francisco Chronicle (6/19, 3.33M).

BOR GIVES UPDATE ON LAKE NIGHTHORSE. The Durango (CO) Herald (6/18, 28K) reports that "it will be 2015 at the earliest before there will be recreation at Lake Nighthorse, and there still are a lot of details to work out, a Bureau of Reclamation official told about 100 residents who attended an update about the lake Wednesday night." The BOR "gave vague reassurances Wednesday that progress is being made to open Lake Nighthorse for recreation but few details." Kathleen Ozga, resource manager with the bureau's Western Colorado area, "gave an update at a public meeting at the Durango Community Recreation Center."

LATEST FEDERAL PLAN FOR COLUMBIA SALMON CHALLENGED. The E&E Daily (6/8) reports that "conservation groups have challenged the latest plan to protect endangered salmon in the Columbia River Basin." Environmentalists and fishing advocates argue that "the federal government's fifth proposal to balance salmon restoration in the Northwest with the operation of hydroelectric dams does not do enough to protect the fish

species, according to a lawsuit filed yesterday in US District Court in Portland." Advocates said "the proposal ignores studies that show releasing more water from the dams would help build the Columbia River Basin's wild salmon population."

CALIFORNIA TRUCKS TROUT FROM HATCHERIES. The E&E Daily (6/8) reports that the California Department of Fish and Wildlife announced on Tuesday that "the state's most productive fish hatchery complex is being evacuated because of the record drought and heat wave." Workers "scooped thousands of trout onto trucks that will move them to cooler waters." According to William Cox, hatchery program manager for the state, "all the fish will be removed by the end of the week."

KLAMATH RIVER TRIBES SUPPORT KLAMATH BASIN RESTORATION AGREEMENT. For the Indian Country Today Media Network (6/18, 45K), Josh Saxon, a member of the Karuk Tribal Council, writes that "despite widespread support for the Agreements from Klamath River Tribes, local irrigation districts, the dam owner, and a host of fishing and conservation groups, opposition still exists." He notes that the Hoopa Tribe has "emerged as an opponent as detailed in ICT's June 1 coverage of the introduction of legislation to implement the Klamath Agreements by Senators Wyden, Merkley, Feinstein, and Boxer." Saxon urges "everyone with something at stake in the Klamath to consider the Klamath Agreements and what they achieve: the largest dam removal in history, the largest river restoration effort in history, and an opportunity for Klamath River Tribes to take the lead in restoring the watershed our ancestors have entrusted us with."

Empowering Native American Communities:

PATENT OFFICE CANCELS REDSKINS TRADEMARK REGISTRATION. A Patent and Trademark Office ruling canceling the Washington Redskins' trademark registration for being "disparaging to Native Americans" generated widespread press coverage, but most of that coverage saw no impact from the decision in the near future, if ever. Still, the consensus is that the ruling increased the pressure for the team to change its name.

NBC Nightly News (6/18, story 7, 2:20, Williams, 7.86M) reported that the "pressure just increased" on the Redskins to change the name, "starting with the fact that they may no longer have the exclusive use of their own name in the lucrative business of NFL merchandise." Still, NBC (Welker) added, "The question now, would losing trademark protection impact the team's bottom line? Merchandise sales are split among all NFL teams. So the Redskins may not see a significant drop in that revenue." Daniel Kaplan, Sports Business Daily, was shown saying, "The only way it really begins to affect the bottom line of the Redskins is if major sponsors stood up, or if potential stadium backers stood up and said we won't be involved with this."

The CBS Evening News (6/18, story 9, 1:40, Alfonsi, 5.08M) similarly said that "a government agency turned up the heat" on the team to change their name. CBS (Reid) adds that owner Daniel Snyder "has consistently said he will never change the name, but dozens of Native American tribes and civil rights groups have called for just that," as have "50 US senators, including Democratic Leader Harry Reid."

The Washington Post (6/19, Vargas, 4.22M) reports that an appeal board of the USPTO "has canceled the Washington Redskins trademark registration, calling the football team's name 'disparaging to Native Americans.'" The "landmark case" was "filed on behalf of five Native Americans." The Post notes that Federal trademark law doesn't allow "registration of trademarks that 'may disparage' individuals or groups or 'bring them into contempt or disrepute.'"

The Wall Street Journal (6/19, Gershman, Jones, Subscription Publication, 5.51M), however, says that the immediate impact of the ruling might not be significant, and notes that the ruling can be appealed. Still, the Journal says it might increase the pressure on team owner Daniel Snyder to change the team's name.

The New York Times (6/19, Belson, Wyatt, Subscription Publication, 9.65M) reports that the ruling "was hailed by some Native American groups and members of Congress who have pressured Goodell to force Snyder to abandon the name." However, the board "does not have the authority to ban the use of the term, and the registration of the trademark is likely to be held intact while the team appeals, so there will be little immediate impact on sales of team merchandise." A lawyer for the Redskins expressed confidence that the team would win on appeal.

The Washington Times (6/19, Noble, 455K) similarly says that the ruling “doesn’t have any immediate effect” as it “allows the team, which is named in the decision as Pro Football Inc., to seek a federal court review of the decision, and it stipulates the team does not have to act on the ruling until the appeals are exhausted – a process which could take years.”

USA Today (6/19, Brady, 5.82M) reports that the board “canceled the team’s federal trademark registrations in an earlier version of the case in 1999,” then the team “won on appeal in 2003.” The “difference” now is “that the ruling comes as the latest in a barrage of public pressure against the name.”

In a piece running contrary to the rest of the coverage, the Christian Science Monitor (6/19, Velasco, 566K) says that the ruling “doesn’t force the Washington football team to find a new nickname.” It “just makes it financially inconvenient not to do so, because anyone can make and sell his own Redskins jerseys and not get sued.” The piece also notes that Reid and House Minority Leader Pelosi both praised the ruling.

Politico (6/18, Topaz, McCalmont, 637K) called the ruling a “major blow” to the team, and notes that “even” President Obama has said the team should consider changing its name. However, Bob Raskopk, the trademark attorney for the team, “downplayed the ruling and vowed the team will win an ensuing appeal.”

WSJournal Criticizes Ruling As Government Overreach. In an editorial entitled “Patent Office Comanches,” the Wall Street Journal (6/19, Subscription Publication, 5.51M) says that the ruling is another sign of the various agencies of the Federal government following orders from Democratic leaders and expanding their reach.

Other Editorials Call On Snyder To Change Team Name. In an editorial, the Washington Post (6/19, 4.22M) welcomes the patent office move, and says that Snyder “would be smart to take this as an opportunity. He is kidding himself if he thinks concerns about the continued use of an offensive name can be waved away as easily as a reporter’s question.”

In an editorial, the New York Times (6/19, Subscription Publication, 9.65M) says that the ruling “has no immediate effect on the team, which says it will appeal the decision.” The Times says an appeal “would be a mistake” and that Snyder “should reconsider his obstinate refusal to change the name, which he has preposterously argued was a ‘badge of honor’ for American Indians.”

SEN. WALSH INTERVIEWED ON COBELL SETTLEMENT. The Indian Country Today Media Network (6/18, 45K) reports that Sen. John Walsh “introduced legislation in May that’s intended to both speed up the second payment” from the Cobell settlement and “strengthen the buy-back program, allowing more tribal control over it and placing the money in an interest-bearing account that would grow more money for Indian country.” In an interview, “Walsh expanded on his Cobell concerns.”

HEALY LAKE CHIEF CHARGED WITH THEFT OF TRIBE’S FUNDS WHILE ABANDONING VILLAGE. The Fairbanks (AK) News-Miner (6/19, 44K) reports that “in the midst of an ongoing leadership struggle in Healy Lake, the tiny Interior village’s disputed tribal chief has been charged in federal court with stealing tens of thousands of dollars from the village, a community of about a dozen people east of Delta Junction.” According to an indictment a grand jury handed up in May, “the Mendas Cha-Ag first chief and former tribal administrator, JoAnn Polston, faces counts of theft of government funds and embezzlement from a tribal organization.” Polston “allegedly stole some of the money from the Bureau of Indian Affairs, the indictment says.”

Also covering the story are the Alaska Dispatch (6/18, 7K) and the Anchorage (AK) Daily News (6/18, 251K).

Top National News:

OBAMA BRIEFS CONGRESSIONAL LEADERS ON OPTIONS HE IS MULLING REGARDING IRAQ. Although Secretary of State Kerry insisted on Wednesday that “nothing is off the table” as President Obama considers how to respond to the ISIL-led Sunni insurgency in Iraq, most reports suggests that the President is unlikely to authorize anything more lethal than targeted airstrikes. And JCS Chairman Gen. Martin Dempsey said even such a limited engagement may have to wait until Prime Minister Maliki follows through on his pledge to address some

of the grievances cited by Sunni politicians as motivating factors behind the insurgency.

On ABC World News (6/18, story 4, 2:05, Muir), Martha Raddatz reported that "all indications are that" the President "will not order large scale air strikes" because he does not "want...to bolster the Iraqi government, which has failed to unite its people." Defense Secretary Hagel was shown saying, "We have done everything we could to help them, but it's up to the Iraqis." The AP (6/19, Hendawi) reports that while the President "has not fully ruled out the possibility of launching airstrikes, such action is not imminent," and the Washington Post (6/19, A1, Whitlock, 4.22M) notes that Dempsey testified on Wednesday that a US "bombing campaign would be fraught with complications and that Iraq's political divisions needed to be addressed first."

However, on Fox News' O'Reilly Factor (6/18, 2.53M), Bill O'Reilly maintained that the argument from "the President and others" that "we must first deal with the Iraqi government...before we can strike the al Qaeda army" is "pure bull." According to O'Reilly, "We don't need to involve ourselves with Iraqi politics to defend ourselves against terrorists on the march."

On Wednesday, the three network newscasts devoted more than 13 minutes of air time to the unfolding events in Iraq, not counting two segments on rising gas prices that emphasized the impact of the crisis in Iraq on global oil supplies, which is about 30% more coverage than on Tuesday, when both NBC and CBS led with reports on the capture of the suspected ringleader of the Benghazi terrorist attacks.

At the opening of NBC Nightly News (6/18, lead story, 3:30, 7.86M), Brian Williams said, "It is getting worse tonight in Iraq, a place where so many Americans, of course, gave so much in a long war that is still...being fought over in this country." Richard Engel went on to report from Baghdad that Iraqis "remember all too well the vicious civil war that tore this country apart just a few years ago," and, according to Engel, "it was the American troop surge that kept it from spiraling completely out of control," but "this time the US is keeping its distance." Engel added that while the Obama Administration "seems reluctant to get more involved," the Iranian government "doesn't seem to share the same concerns," and is warning that it "would not hesitate to protect holy Shiite sites" in Iraq.

However, in the lead story for the CBS Evening News (6/18, lead story, 1:50, 5.08M), Sharyn Alfonsi reported that "a US military operation in Iraq is under way in the sky." Correspondent David Martin went on to report that "US Military aircraft" are "now flying round-the-clock surveillance missions in Iraq" as the Pentagon confirmed that the government of Iraq "has indeed asked for airstrikes against the insurgents who now control much of northern and western Iraq." Martin added that "to get better intelligence, the Pentagon is now planning on sending about 100 Army Green Berets into Iraq" even though President Obama "has promised not to send US troops back into combat in Iraq." Martin reported that the Green Berets will be "armed," and that "one military officer" acknowledged that "there will be risk."

Politico (6/18, Everett, 637K) reported that on Wednesday, President Obama "told Capitol Hill's Big Four leaders...that he doesn't intend to seek congressional authority for any action in Iraq." Senate Minority Leader McConnell said afterwards that the President "indicated he didn't feel he had any need for authority from us for steps that he might take." According to Politico, McConnell "declined to answer follow-ups on what options Obama is weighing." USA Today (6/19, Jackson, 5.82M) reported that an anonymous "administration official" on Wednesday "disputed McConnell's statement about congressional authority, saying Obama told lawmakers that he and his staff 'will continue to consult with Congress on next steps.'"

The AP (6/19, Pace, Cassata) reports that after the President's briefing, House Minority Leader Pelosi said she "concurred with the president" that he "does not need 'any further legislative authority to pursue the particular options for increased security assistance discussed today.'" Nevertheless, according to the AP, "The prospect of the president sidestepping Congress sets up a potential new clash between the White House and lawmakers" although "Administration officials have said airstrikes have become less a focus of recent deliberations."

Under the headline "Obama Not Asking Congress' Permission on Iraq," Roll Call (6/18, Dennis, Sanchez, Subscription Publication, 76K) reported that many Democrats in Congress are "wary of getting entangled in Iraq again," and neither Pelosi nor Senate Majority Leader Reid described "what actions [Obama] intended to take...in Iraq." Roll Call noted that also on Wednesday, White House Press Secretary Jay Carney "deflected a question about congressional authorization," but "repeatedly said...the president wants to avoid Iraq becoming a safe

haven for terrorists.”

According to The Hill (6/18, Sink, Bolton, 237K), Reid and Pelosi “left the meeting saying the 2002 law authorizing President George W. Bush’s military action in Iraq would also cover new orders by Obama,” while McConnell and House Speaker Boehner “said the president vowed to keep them informed but not ask for their votes.”

Reuters (6/19, Rampton) reports that the White House released a statement on Wednesday confirming that the President “provided an update on the administration’s efforts to respond to the threat from ISIL by urging Iraq’s leaders to...come together with a sense of national unity,” and “also reviewed our efforts to strengthen the capacity of Iraq’s security forces to confront the threat from ISIL, including options for increased security assistance.”

In an online piece for the New Yorker (6/18, 5.3M), Robin Wright made the case that “Iraq might not be rescuable without the U.S. dealing with Syria” because ISIL “has already erased part of the border between the two countries,” so if they are “defeated in Iraq, they could simply retreat to their Syrian bases and come back another day.”

Nicholas Kristof, in his column for the New York Times (6/19, Subscription Publication, 9.65M), says the “hawks are right” when they argue that Iraq “presents a serious problem.” However, according to Kristof, “American military intervention” is not “the best response at this time.” Kristof says that although “many Sunnis in Iraq dislike ISIS...they have learned to loathe and distrust Maliki even more.”

In their joint column for USA Today (6/19, 5.82M), Bob Beckel and Cal Thomas make the case that the US ought not get involved militarily in Iraq again. Thomas says President Obama is “right” when he warns that “there is no military solution, especially when...Maliki has refused to reconcile with the Sunnis.” Beckel says Maliki was “elected on the promise to include the minority Sunnis in his government,” but then “renege[d] on that promise,” and, “instead...decided to partner with Iran, a Shiite country, forcing the Sunnis to take up arms and rekindle the civil war.”

Kerry: “Nothing Is Off The Table.” NBC Nightly News (6/18, story 2, 0:45, Williams, 7.86M) aired a portion of an interview NBC’s Savannah Guthrie conducted with Kerry in which she says, “There are some senior officials quoted in various news accounts today saying that air strikes are off the table, that the US is no longer considering that – is that true?” Kerry was shown replying, “Nothing is off the table. All options are still available to the President. The President has not made a decision on those options. We are very intensely vetting each of the possibilities.”

Todd: Kerry Is Administration’s “Strongest Advocate” For Airstrikes Against ISIL. On NBC Nightly News (6/18, story 3, 2:30, Williams, 7.86M), Chuck Todd described Kerry as “the strongest advocate...for a larger air strike effort” within the Administration. According to Todd, “The most likely military option the President is considering is one he uses in Yemen, small targeted drone strikes.”

Dempsey, Hagel: For Now, US Strikes Unlikely To Have Much Of An Impact. The Washington Post (6/19, A1, Whitlock, 4.22M) reports that in testimony before a Senate panel on Wednesday, Dempsey confirmed that “Iraq’s Shiite-dominated government has requested that Washington provide ‘air power’ as it tries to take back territory seized in recent weeks by fighters from the Islamic State of Iraq and Syria (ISIS) and other insurgents.” The Post adds that while Dempsey explained that “pinpointing targets in an air campaign would be difficult, especially because Sunni insurgents have melted into the local population,” the “broader problem” is that the Iraqi government has “worsened Iraq’s sectarian divisions.”

According to Bloomberg News (6/19, Hunter, Talev, 2.76M), Dempsey “signaled that air strikes aren’t imminent” even as Iraqi Prime Minister Maliki “warned that the insurgency could spread into neighboring countries” if the US does not stop the ISIL advance. The Wall Street Journal (6/19, Sparshott, Nissenbaum, Subscription Publication, 5.51M) reports also on Wednesday, Hagel suggested that US military intervention would be fruitless absent a political breakthrough in Baghdad.

However, Reuters (6/19, Gordts) notes that despite his stated reluctance to lead the US in another military

engagement in Iraq, Dempsey also said, "It is in our national security interest to counter ISIL wherever we find them."

Spencer Ackerman of The Guardian (UK) (6/19, 1.59M) says that on Wednesday, neither Dempsey nor Hagel "even remotely endorsed returning to military action in Iraq, from the air or otherwise, a significant omission from two of Obama's most important defense officials." But Ackerman also writes that "the murky picture, exacerbated by the relative paucity of US intelligence sources on the ground in Iraq, comes despite Dempsey's description of the US moving what he described as 'a great deal of manned and unmanned ISR to gain clarity,' using a military term for intelligence, surveillance and reconnaissance."

Dana Milbank, in his column for the Washington Post (6/19, 4.22M), notes that on the Senate floor on Wednesday, Sen. John McCain acknowledged that "air power does not win conflicts," and that "we must do everything in our power to make sure that Maliki appoints a government of reconciliation and departs." However, McCain added that Maliki's ouster "can't be the prerequisite for U.S. military action because...time are not on our side."

Petraeus: US Must Not Be Seen As "The Air Force For Shia Militias." The Washington Times (6/19, Ernst, 455K) reported that in a speech in London, former CIA director David Petraeus echoed Dempsey when said that the US must not serve as "the air force for Shia militias." Petraeus is quoted as saying, "You cannot have 18 to 20 percent of the population feeling disenfranchised – feeling that it has no stake in the success of the country."

Bloomberg News (6/19, Atlas, Lerman, Runnigen, 2.76M) says it is not known "whether the Iraqi government is willing to try to avert the worst-case scenario of civil war by agreeing to devolve significant power to autonomous Sunni and Kurdish regions, along with guaranteeing them a fair share of the nation's oil revenue," although some analysts maintain that "nothing short of that will work."

LA Times Analysis: Obama's Deliberations Reflect His Thinking Prior To Backing US Military Involvement In Syria. Under the headline "Obama's Mideast Airstrike Refrain: 'And Then What?'" the Los Angeles Times (6/19, Hennessey, Parsons, 3.46M) reports that the President's thinking about potential US military aid to the Iraqi government parallels his deliberations last year before he spoke to the nation in favor of US military intervention in Syria's civil war. The Times says that in the case of Syria in 2013, the President "solicited scores of options" and then he would ask, "And then what?" which the Times says reflected his "deep skepticism about the ability of military intervention to fix entrenched problems." Nevertheless, according to the Times, an anonymous "senior official" says the President is "considering drone strikes" against ISIL, just as he eventually supported using American air power to dislodge the Assad regime that was fighting ISIL last year.

The New York Times (6/19, A10, Shear, Landler, Subscription Publication, 9.65M) reports that the President's meeting on Wednesday with Congressional leaders "recalled a similar session between the president and lawmakers at the White House in September at which the president sought the backing of House leaders for a threatened missile strike against Syria." However, the Times says that in this case, the White House "noted that the Iraqi government was pleading for military help, while strikes in Syria would have been waged against" Syria's government.

FIRST LADY SAYS PRESIDENT WILL CONTINUE PUSH FOR IMMIGRATION REFORM. McClatchy (6/19, Haven, Subscription Publication, 23K) reports the First Lady, speaking at a naturalization ceremony at the National Archives Wednesday, called for an immigration overhaul, saying that her husband will make reform a priority. She said, "He refuses to give up the fight, because at the end of the day this fight isn't about abstract principles; it's about real people." DHS Secretary Johnson delivered the oath to 50 new citizens, and told them, "Ever since you've been in this country, someone will look at you, listen to your accent and ask your name – and they'll ask you where you are from. From this day forward, you can say, 'I'm an American.'"

CBP Calls Influx Of Unaccompanied Children "Humanitarian Crisis." Two broadcast networks continued coverage on the influx of children into the US across the southern border, in what ABC World News (6/18, story 8, 1:50, Muir) called a "new surge headed north." ABC's Jim Avila said that while some arrive with their parents, "many [are] coming alone." The CBS Evening News (6/18, story 8, 1:30, Alfonsi, 5.08M) reported that "since last year, 47,000 children, mostly from Central America, have entered the United States illegally without their parents," and nearly 8,000 are now staying in emergency shelters.

The AP (6/19, Sherman, Galvan) says the "surge...has been building for three years" and "has overwhelmed the U.S. government." The Los Angeles Times (6/19, Hennessy-Fiske, 3.46M) reports that Federal officials said the number of children entering the US illegally is up more than 90% from 2013, and "the number of unaccompanied children caught this year is expected to reach 90,000." On Wednesday, Customs and Border Protection officials "called the situation a 'humanitarian crisis,' echoing President Obama's comments in recent days."

The Washington Times (6/19, Richardson, 455K) says "during the first media tour Wednesday of the U.S. Border Patrol processing facility, at least 100 children were doing what children normally do: playing basketball with border agents, watching World Cup soccer, resting on mats with Mylar blankets, talking in groups. But mainly waiting." An Arizona Republic (6/19, Kiefer, 1.45M) story carried by USA Today calls one Arizona shelter reportedly holding more than 1,000 individuals "a warehouse of humanity."

Texas To Begin "Surge Operations" Along Border. The Los Angeles Times (6/19, Hennessy-fiske, 3.46M) reports Gov. Rick Perry and other officials "have authorized the Texas Department of Public Safety to begin emergency 'surge operations' along the border with Mexico." Perry said, "Until the Federal government recognizes the danger it's putting our citizens in by its inaction to secure the border, Texas law enforcement must do everything they can to keep our citizens and communities safe."

Group Criticizes Clinton Over Immigration Remark. Politico (6/18, Glueck, 637K) reported that the "immigration advocacy group" United We Dream blasted criticized Hillary Clinton for saying on CNN this week "with regard to children who attempt to enter America without their parents: 'We have to send a clear message [that] just because your child gets across the border doesn't mean your child gets to stay.'" The group said, "If separating children from families is not who we are as Americans, then Hillary Clinton should join other Democratic leaders in calling on President Obama to take executive action to provide relief and reform for families still under the threat of deportation."

More Commentary. Harold Meyerson writes in his Washington Post (6/18, Meyerson, 4.22M) column that "the recent cascade" of children entering the US "has confounded our already stunted national debate on immigration. ... Both sides in this debate report that the organizations that smuggle people across Mexico and into Texas are telling Central Americans that the United States won't send back unescorted children. That's not true – at least, not invariably." But "sending them back poses a threat not just to them but, even more fundamentally, to our nation's raison d'etre."

Rupert Murdoch argues in a Wall Street Journal (6/19, Subscription Publication, 5.51M) op-ed that immigration reform is necessary, and that Congress should act in order to prevent President Obama from choosing to take action via executive order.

FED SAYS ECONOMY RALLYING AFTER POOR PERFORMANCE THIS WINTER. Media coverage of the Fed's post-meeting statements generally sees it as confirmation that the economy is rebounding nicely after contracting in the first quarter.

The New York Times (6/18, Appelbaum, Subscription Publication, 9.65M) reports that following its monthly two-day policy meeting, the Fed on Wednesday said that economic growth was resuming following the harsh winter, but "sharply cut its economic forecast for 2014 to reflect the unexpected contraction during the early months of the year." In what the Times calls a "show of confidence" in the economy, the Fed continued to taper its bond-buying program, reducing its monthly purchases by the expected \$10 billion to \$35 billion. Deep in the story, the Times reports that Fed officials projected that GDP would grow between 2.1 and 2.3 percent this year, down from the March forecast of 2.8 percent to 3.0 percent growth.

The Wall Street Journal (6/19, Hilsenrath, Subscription Publication, 5.51M) reports that Yellen also said that there are indicators that growth will accelerate in 2015 and 2016, and that the labor market will show signs of improvement.

Bloomberg News (6/18, Kearns, 2.76M) reports that Fed officials also "released a new set of quarterly forecasts, predicting that the benchmark interest rate will rise more rapidly once officials decide to increase it above zero sometime next year." They "predicted the rate will be 1.13 percent at the end of 2015 and 2.5 percent a year

later.”

Reuters (6/19, Schneider, Lange) reports that at an afternoon news conference, Fed Chair Janet Yellen cited a number of factors that led the central bank to believe that the economy was moving forward. She said, “Economic activity is rebounding in the current quarter and will continue to expand at a moderate pace. The economy is continuing to make progress towards our objectives” of low unemployment and a 2 percent annual rate of inflation.

USA Today (6/19, Davidson, 5.82M) reports that the Fed “sent a clear message Wednesday: The economy and inflation may be heating up, but the central bank isn’t close to cooling them off.” The Fed “said the economy is rebounding, and policymakers agreed to continue to taper bond purchases aimed at holding down long-term interest rates.” Despite the recent increase in inflation and the drop in unemployment, the Fed “isn’t expected to raise short-term interest rates sooner than mid-2015.”

In an editorial, the Wall Street Journal (6/19, Subscription Publication, 5.51M) reports notes that the Fed has cut its growth target (a subject that was not a significant focus in any of the reporting on the Fed meeting, including the Journal’s). The Journal notes that this is the fifth consecutive year in which the Fed has initially been too optimistic in its forecast of growth, and adds that the cause may be the central bank’s faith in its stimulus program to accelerate the economy. The Journal says that the Fed’s policy of bond-buying and near-zero interest rates are unlikely to be doing the economy any good, and may actually be doing harm.

Stocks Rally On Yellen Comments. The Wall Street Journal (6/19, Scaggs, Subscription Publication, 5.51M) reports that the stock markets rose solidly on Wednesday following Yellen’s comments. The S&P 500 rose 14.99 points to 1,956.98, a new high, while the Nasdaq was up 25.60 points to 4,362.84, its highest level in 14 years. The Dow Jones Industrial Average rose 98.13 points to 16,906.62.

Editorial Wrap-Up:

NEW YORK TIMES. “Roaring On The Seas.” The New York Times (6/19, Subscription Publication, 9.65M) editorializes that “the real problem” in the South China Sea is “the way China appears to believe that its expanding military and economic power entitle it to a maximalist stance in territorial disputes.” The Times notes China’s “aggressive actions” are not in “Beijing’s interest” or “in keeping with the image” Chinese President Xi Jinping “tried to project” in March when he characterized China as a “peaceful, amiable and civilized lion.”

“Slurs Don’t Deserve Trademark Protection.” In an editorial, the New York Times (6/19, Subscription Publication, 9.65M) says that the US Patent and Trademark Office ruling canceling the Washington Redskins’ trademark registration “has no immediate effect on the team, which says it will appeal the decision.” The Times says an appeal “would be a mistake” and that owner Daniel Snyder “should reconsider his obstinate refusal to change the name, which he has preposterously argued was a ‘badge of honor’ for American Indians.”

“Guns At The Airport.” An editorial in the New York Times (6/19, Subscription Publication, 9.65M) cites the rise in the number of guns seized by the TSA in airports as a “vivid indication of the normalization of casual gun-ownership.” The Times argues that states should “classify bringing a gun into security as a felony.” Until they do so, “forgetful people will almost certainly continue to have the right to own, carry, and misplace, firearms because basic responsibility hasn’t been made a prerequisite for gun ownership.”

“Espaillat For Congress.” An editorial in the New York Times (6/19, Subscription Publication, 9.65M) endorses state Sen. Adriano Espaillat in the Democratic primary for New York’s 13th congressional district, arguing that it is time for Rep. Charles Rangel “to yield to the next generation.” Espaillat, the Times says, “will be a better representative of this district stretching from Upper Manhattan into parts of the Bronx.”

WASHINGTON POST. “Lessons From Libya.” The Washington Post (6/19, 4.22M) editorializes that the Abu Khatalla capture “indicates” President Obama’s “promise to stay focused, no matter how long it would take, on the hunt” for the Benghazi plotters. The Post says Obama “is correct, Republican criticism notwithstanding, to send Mr. Khatalla to civilian court for trial.” Attorney General Holder has rightly said that “the courts have proved their capacity to deal fairly and decisively with terrorism suspects.”

"Rights And Wrongs." The Washington Post (6/19, 4.22M) editorializes that recent arrests in China illustrate that "authorities are cracking down on lawyers and other people who have demanded" the government "follow its own laws." According to the Post, while these "advocates" were previously "detained for short periods" of time, "it now appears there is a concerted campaign to silence them once and for all."

"Dan Snyder's Last Stand?" In an editorial, the Washington Post (6/19, 4.22M) welcomes the US Patent and Trademark Office ruling canceling the Washington Redskins' trademark registration and says that owner Daniel Snyder "would be smart to take this as an opportunity. He is kidding himself if he thinks concerns about the continued use of an offensive name can be waved away as easily as a reporter's question."

WALL STREET JOURNAL. "The Second VA Scandal." An editorial in the Wall Street Journal (6/19, A14, Subscription Publication, 5.51M) blasts the Senate version of the VA reform bill, arguing that it gives more money to the failing bureaucracy. In addition, the Journal criticizes both the House and Senate measures for failing to address the problem of excessive demand, which it says is the result of the VA's promise of essentially universal care with almost not out-of-pocket costs for the patient.

"Patent Office Comanches." In an editorial, the Wall Street Journal (6/19, Subscription Publication, 5.51M) says that the US Patent and Trademark Office ruling canceling the Washington Redskins' trademark registration is another sign of the various agencies of the Federal government following orders from Democratic leaders and expanding their reach.

"Downgrading Growth Again." In an editorial, the Wall Street Journal (6/19, Subscription Publication, 5.51M) notes that the Fed has cut its growth target (a subject that was not a significant focus in any of the reporting on the Fed meeting, including the Journal's). The Journal notes that this is the fifth consecutive year in which the Fed has initially been too optimistic in its forecast of growth, and adds that the cause may be the central bank's faith in its stimulus program to accelerate the economy. The Journal says that the Fed's policy of bond-buying and near-zero interest rates are unlikely to be doing the economy any good, and may actually be doing harm.

Last Laughs:

LATE NIGHT POLITICAL HUMOR.

David Letterman: "Let me ask you a question. Are you watching the World Cup? ... No you're not. The World Cup is an event that happens every four years, like a Mitt Romney presidential campaign."

David Letterman: "President Obama is sending troops back to Iraq. He said, 'Don't worry. We should not be there any longer than a Kardashian marriage.'"

David Letterman: "You know who's angry – I mean, really livid...very angry – at President Obama is former Vice President Dick Cheney. Have you heard what he is saying about Obama? He says, 'I give the guy a perfect [bleep] storm and he screws it up.' That's what he said."

David Letterman: "Actually, Cheney is saying that Obama was wrong about many things. Weapons of mass destruction, he said – no, wait a minute that was Cheney who said that. Said to be treated as heroes – no, Cheney said that also. Said that the war would last only a couple of weeks – no, that was Cheney too. Well, I'm sorry, it's all Dick."

David Letterman: "You know, they captured the guy who was running the attacks in Benghazi. And the Senator...Lindsey Graham from South Carolina says that you shouldn't torture the guy. We should just spend some quality time with him. He was being sarcastic. Don't bother torturing the guy, spend some quality time. When I spend quality time with my family it is torture. But I tell you, I think we can all agree, if you are going waterboard the guy, December is the perfect time, right? Who doesn't enjoy a nice waterboarding."

Stephen Colbert: [Referring to the Republican National Committee's decision to use a squirrel mascot to criticize Hillary Clinton] "That's right. A giant squirrel. Because sure, Clinton's gone toe-to-toe with some of the toughest men on the planet, but has she ever taken on man-sized rodent? I think nut. And the squirrel here has

been going after Hillary with tweet-zingers like, 'Hillary Clinton is squirrely if she thinks the Taliban aren't a threat to us' and 'Hillary Clinton is trying to hide her record on Benghazi the way I hide acorns.' Wow. Those are some stinging nut puns. I can't wait for more. ... Nation, this is the best use of mascot in politics since Stephen Douglas dressed up as banana and said Lincoln was unappealing."

Conan O'Brien: "Hillary Clinton was asked if she would ever smoke pot if it became legal. She said, 'I didn't do it when I was young and I'm not going to start now.' Bill Clinton said that's her standard answer for everything."

Conan O'Brien: "Tough times for President Obama right now. President Obama's approval rating in the US is at its lowest point ever, 41 percent. ... After hearing this, the President said, 'When did I become less popular in this country than soccer? How did that happen.'"

Subject: Draft USDA release for bi-state sage-grouse announcement

Sally -

On Friday, USDA is announcing over \$25M to help conserve the bi-state sage-grouse, the distinct population located in NV and CA. (Good news!)

They are elevating the announcement to the Secretary's level and have offered to give you a quote in the release. We are scrubbing the release through BLM, USGS and FWS channels now, but I wanted to send you the draft version for your review/quote approval.

Thanks in advance,

Kate

- + Late Night Political Humor.

DOI in the News:

INTERIOR TO HOST PUBLIC MEETINGS ON NATIVE HAWAIIAN RECOGNITION. The [Maui News](#) (6/19)

reports that the federal government announced Wednesday that it will take a first step toward possibly recognizing and working with a separate government of Native Hawaiians. Interior Secretary Sally Jewell said, "The department is responding to requests from not only the Native Hawaiian community but also state and local leaders and interested parties who recognize that we need to begin a conversation of diverse voices to help determine the best path forward for honoring the trust relationship that Congress has created specifically to benefit Native Hawaiians." The Interior Department plans to hold a series of public meetings over the next 60 days to solicit comments on how the advanced notice of proposed rule-making process should move forward.

However, the Honolulu Star-Advertiser (6/19) reports that "some are questioning whether the action is premature and whether the president has the authority to re-establish a government-to-government relationship without going through Congress, as backers of the so-called Akaka Bill unsuccessfully tried to do for more than a decade."

The Hawaii Tribune-Herald (6/19) reports that officials with the department of Interior and Justice "stressed their process is separate and independent of the nation-building process Native Hawaiians are currently conducting through the Native Hawaiian Roll Commission and the state Office of Hawaiian Affairs."

Also providing coverage are the AP (6/20, Bussewitz), the West Hawaii Today (6/20, Lauer, 26K), Kaua'i (HI) Garden Island News (6/20, LaVenture, 33K), the Hawaii Free Press (6/20), the Catholic Online (6/20, 57K), KGMB-TV Honolulu (6/19, 41K), and KITV-TV Honolulu (6/20, 13K).

HOUSE PANEL UNLIKELY TO ENDORSE OBAMA ADMINISTRATION'S WILDFIRE PROPOSAL. The E&E Daily (6/19) reports that President Obama's "proposal to fund some wildfires outside of the Forest Service and Interior Department discretionary budgets is unlikely to be endorsed in a House panel's forthcoming appropriations bill, according to one top Democrat and others who support the proposal." Observers said it "appears unlikely the Interior, Environment and Related Agencies Appropriations Subcommittee will include the proposal in its fiscal 2015 bill, despite all 11 panel members co-sponsoring a nearly identical House bill."

SECRETARY KERRY PLEDGES TO PUSH FORWARD ON CLIMATE POLICY. The E&E Daily (6/19) reports that Secretary of State John Kerry "closed out two days of discussions over the future of the world's oceans last night with a short but passionate affirmation of American commitment to Western Pacific islands – some of the world's nations that are most immediately threatened by climate change." According to the article, "on a sweltering evening at the New Zealand Embassy – as part of the embassy's celebration of Pacific Day – Kerry delivered another strong message that President Obama and his Cabinet will continue to push forward on climate policy, following up on their historic proposal to regulate carbon dioxide emissions from the nation's power plants." The article notes that "besides emphasizing the policy spine of climate change mitigation, Kerry called on Pacific islands and their leaders – the Pacific Day event attracted New Zealand Prime Minister John Key, as well as the president of Palau and high-level officials from the Marshall Islands and the Federated States of Micronesia – to 'underscore to people what is really at stake. It's called life itself.'"

BIPARTISAN HOUSE BILL WOULD PROMOTE INCREASED TRAIL MAINTENANCE. The E&E Daily (6/19) reports that "a newly introduced bipartisan House bill seeks to chip away at the Forest Service's growing backlog of trail maintenance through increased partnerships with nonprofits and recreational outfitters." The bill by Rep. Cynthia Lummis and Tim Walz would "require the Forest Service to develop a national strategy for doubling within five years the amount of trail work performed by volunteers and partners, while also studying the use of wildland firefighters to conduct trail work." The legislation would also "amend a 1972 law to ensure that volunteers for partner organizations are covered under the Forest Service's policy for liability and tort claims, which is aimed at increasing work on the ground."

HOUSE PANEL APPROVES NINE LAND BILLS. The E&E Daily (6/19) reports that The House Natural Resources Committee on Thursday "easily passed nine lands bills, including a measure aimed at simplifying fees for owning cabins in national forests." The article notes that "among the measures approved was the chairman's H.R. 4873, which would modify the fee formulas as they apply to people who own cabins on national forestlands." Committee Chairman Doc Hastings said, "Because future fee increases will be automatic and tied to inflation, it will eliminate the Forest Service's costly administrative burden of constant appraisals and appeals. I am told that many cabin owners are already falling behind in their payments, so passage of this bill is an urgent matter."

FUNDING RESTORED TO WORLD HERITAGE PROGRAM TO HELP POVERTY POINT. KTVE-TV El Dorado,

AR (6/20, 1K) reports that Sen. Mary L. Landrieu on Thursday announced "she has restored funding for US dues to the World Heritage Program." Landrieu "included the funding so that Poverty Point has the best chance to gain World Heritage status and to ensure that the 21 nations voting do so on the site's merits and not on the US failure to pay its dues to the program."

INTERIOR POSTS PHOTO OF DAD HELPING SON SEE DELICATE ARCH. The Today Show Online (6/20, 595K) reports that the Interior Department of Interior recently posted an "inspiring photo of James Geier, a retired police officer from Logan, Utah, completing the 3-mile hike to the landmark in Arches National Park with his 18-year-old son Jonah, who has cerebral palsy and is a quadriplegic." Geier, "who pulled Jonah in a special carrier modeled after a Native American travois, said his son loves the outdoors so the family has hiked with him since he was born, regularly visiting Arches, Zion and other parks." According to the article, "unveiled on the agency's Instagram page this past weekend on Father's Day, the image has received more than 10,000 'likes' and a flurry of comments calling it 'pure love' and 'the best story ever you posted.'"

ADDITIONAL COVERAGE: INTERIOR GIVES \$102 MILLION IN STORM PREVENTION TO 11 STATES.

Additional coverage of the \$102.7 million in grants to help communities along the Atlantic Coast with storm resiliency programs was provided by the Queens (NY) Chronicle (6/20, 184K), the Forum (NY) (6/19), and the East Setauket (NY) Times Beacon Record (6/19, 130).

ADDITIONAL COVERAGE OF PILT FUNDING. Additional coverage of PILT funding was provided by the Cronkite News (6/20), the Sky-Hi Daily News (CO) (6/20, 728), the Durango (CO) Herald (6/19, 28K), the Aspen (CO) Times (6/20, 46K), the El Paso (TX) Times (6/20, Stallings, 251K), the Elko (NV) Daily Free Press (6/20, 22K), the Carson City (NV) Now (6/20, 211), the Farmington (NM) Daily Times (6/20, 46K), and the Ruidoso (NM) News (6/20, 40K).

ADDITIONAL COVERAGE OF ANNOUNCEMENT ON AUCTION FOR WIND ENERGY LEASES OFF MASSACHUSETTS.

Additional coverage of the announcement of the auction for wind energy leases off Massachusetts was provided by the Maritime Executive (6/20, 21), the Vineyard (MA) Gazette (6/19, 30K), the Easton (MD) Star Democrat (6/20, 49K), and WFCR-FM Amherst, MA (6/18).

PRESIDENT OBAMA URGED TO MAKE BERRYESSA SNOW MOUNTAIN A NATIONAL MONUMENT. In an op-ed for the Sacramento (CA) Bee (6/20, 687K), Denise Rushing, a Lake County supervisor, Don Saylor, a Yolo County supervisor, and Linda Seifert, a Solano County supervisor urge President Barack Obama "to take steps to permanently protect the Berryessa Snow Mountain region by declaring the area a national monument." They note that "communities flourish and local economies grow when nearby public lands are permanently protected." They conclude that "permanently protecting Berryessa Snow Mountain is good for local communities, of course, but we believe it will also benefit anyone who is able to sample our piece of the outdoor wonder California is known for."

FEDERAL MANAGEMENT OF PUBLIC LANDS CRITICIZED. The piece by Carl Graham, Director of Sutherland Institute's Coalition for Self-Government in the West, criticizing the federal management of public lands appeared in the Washington Examiner (6/20, 335K).

America's Great Outdoors:

National Park Service:

STAR-SPANGLED BANNER NATIONAL HISTORIC TRAIL COUNCIL PLANS PUBLIC MEETING. The Examiner (6/20, 1.56M) reports that the NPS announced that the Star-Spangled Banner National Historic Trail Advisory Council has scheduled a meeting on July 9.

Also providing coverage of the trail is the Washington Post (6/19, 4.22M).

NPS SEEKS NEW HOME FOR SHAW MONUMENT. The Newport News (VA) Daily Press (6/19, 206K) reports that the NPS is looking "to rid itself of a nearly 120-year-old monument that has fallen into disrepair after being left in the woods for 80 years." Dan Smith, superintendent of the Colonial National Historical Park, which includes

the Yorktown Battlefield, is "reviewing several proposals from historical and preservation groups that want to take possession of the Shaw monument, a 21.5 foot obelisk erected in 1895 by John W. Shaw, a Civil War veteran and former superintendent of the Yorktown National Cemetery." Michael Byrd, an NPS spokesperson, said, "In recent years, the monument has become an attractive nuisance when members of the public parked their vehicles outside of the designated parking areas to access the site."

LAUNCH OF LGBT HERITAGE THEME STUDY LAUDED. For the Advocate (6/19, 654K), Eliza Byard, the executive director of the Gay, Lesbian, and Straight Education Network, writes in support of the "groundbreaking" LGBT Heritage Theme Study launched by the NPS. Byard writes that "we cannot allow LGBT history to be pushed back into the closet and withheld from students any longer." The NPS "will tell our stories on behalf of the nation," she concludes, "because these are things that every American needs to know."

The piece also appears at Gay (6/20, 113K).

COMPROMISE URGED FOR BISCAYNE NATIONAL PARK MANAGEMENT PLAN. The Miami Herald (6/20, 822K) editorializes that the "aggressive new management plan" for Biscayne National Park "would help the park survive and flourish." It notes that "fishing lobbying groups are opposed to such steps," so it argues that "there must be room for compromise and balance, with fishing curtailed but not necessarily eliminated."

Bureau of Land Management:

PULASKI AWARD HONOR BLM DISTRICT FIRE PROGRAMS. The Idaho Statesman (6/19, 222K) reports that "the awarding of the Pulaski Award to two Idaho rangeland protections associations and two BLM district fire programs show how far we've come since the stormy firefights between Idaho and federal firefighters in 2007." The Three Creek and Saylor Creek Rangeland Fire Protection Associations and the Twin Falls and Boise District BLM fire programs was recognized by the by the National Interagency Fire Center "essentially because of how well they are working together to respond to range fires." Presenting the award, BLM Director Neil Komze said, "These organizations are an excellent example of state and federal agencies working together to meet the challenges on the land. These RFPAs are extremely effective in helping the BLM respond to fires in remote areas and better protect lives, property and resources, including critical sage-grouse habitat."

BLM REPLANTS DEAD DESERT PLANTS NEAR LAS VEGAS. The AP (6/20, Brean) reports that last month, a crew hired by the BLM "spent a few days digging up and carting away hundreds of the dried-out husks" of dead and dying yucca plants outside of Las Vegas "to be replanted on public land scarred by infrastructure work or illegal off-road vehicle activity." According to BLM spokeswoman Kirsten Cannon, "planting dead yucca and cactus can help mask an illegal road or temporary construction easement so off-roaders won't keep using it." The article notes that "the dead plants also provide a windbreak – home for small animals and a sheltered area where seeds of new plants can collect and grow."

BLM HELPS WITH LEWISTOWN KIDS FISHING DAY. KXLO-FM Lewiston, MT (6/20) reports that "over 65 children cast lines during the annual Lewistown Kids Fishing Day at the Frog Ponds June 14, according to Monica Ketchum, a Wildlife Biologist at the BLM Lewistown Field Office." The article notes that "the BLM's participation in the event aligns with Department of the Interior Secretary Sally Jewell's Youth Initiative, which seeks to connect young Americans to the great outdoors."

BOARDS WITH NAILS FOUND ON MOUNTAIN BIKE TRAILS IN COLORADO. The AP (6/20) reports that "boards pierced with nails have been found on two western Colorado trails popular with mountain bikers." According to the article, "the boards were found on the Creekside and Skillsaw trails in the Prince Creek area." The BLM says "one of the boards was found on public land and one was on a section of trail that crosses private land." BLM spokesman David Boyd says "no other incidents have been reported."

UTAH COUNTY SHERIFF'S OFFICE UNAFFECTED BY BLM CONTRACT TERMINATIONS. The Provo (UT) Daily Herald (6/20, 116K) reports that "although the federal Bureau of Land Management has terminated long-standing contracts with county sheriff's offices to provide law enforcement on Utah's public land, the Utah County Sheriff's Office will not be affected much by the change." Sergeant Spencer Cannon, with the Utah County Sheriff's Office, said, "We don't have any contracts with the BLM, but we have worked with them on things in the

past. We enforce in these areas proactively on our own or by the BLM's request, but without a contract."

ADDITIONAL COVERAGE OF WILD HORSE INMATE PROGRAM. Additional coverage of BLM Director Neil Komze's recent visit to the Wild Horse Inmate Program was provided by the Pueblo (CO) Chieftain (6/20, 94K).

Fish and Wildlife Service:

FWS ANNOUNCES ASSESSMENT FOR CANADA LYNX HABITAT. KCSG-TV St. George, UT (6/20, 43) reports that the FWS is announcing the "availability of a Draft Economic Analysis (DEA) and a draft environmental assessment for the proposed revised designation of critical habitat for the Contiguous US Distinct Population Segment (DPS) of the Canada lynx (*Lynx canadensis*) under the Endangered Species Act (ESA)."

GROUP CHALLENGES NATIONAL FOREST TIMBER SALE. The AP (6/19) reports that "a conservation group is challenging a national forest timber sale because it may be too close to the den where Oregon's famous wandering wolf, OR-7, is raising pups." Oregon Wild filed the lawsuit Wednesday in US District Court in Medford against the US Forest Service over the Bybee timber sale on the Rogue River-Siskiyou National Forest. The suit "asks a judge to order a closer examination of the harm logging may do not only to potential wilderness and spotted owls, but to wolf habitat as well."

FLORIDA PANTHER POPULATION REBOUNDING. The AP (6/20) reports that "there may now be as many as 180 endangered Florida panthers roaming in the wild, and state wildlife officials are exploring programs designed to encourage private landowners to welcome the big cats on their property." Florida Fish and Wildlife Conservation Commission biologists "updated their population estimate for the panthers during the agency's meeting this week in Fort Myers." FWC Commissioner Liesa Priddy said, "Due to the expansive habitat needs of the Florida panther, the continued growth of their population presents a unique challenge to the FWC and US Fish and Wildlife Service. As panther range expands, impacts on private landowners will continue to increase."

Also reporting on the story is the Florida Today (6/19, 208K).

STUDY FINDS BLACKBIRD DECLINE IN CALIFORNIA. The AP (6/20, Smith) reports that "a blackbird species found mostly in the Central Valley of California has experienced a major decline in its population over the past several years due in part to farming practices, researchers say." A survey released Wednesday shows that "the tricolored blackbird now numbers about 145,000 in the state, down from millions less than a century ago." Robert Meese, "a University of California, Davis, researcher who led the study, said Californians must act to reverse the decline."

ZOO-HATCHED TURTLES RELEASED IN UPPER MISSISSIPPI WILDLIFE AND FISH REFUGE. The AP (6/20) reports that "twenty ornate box turtles have been released into the wild in northern Illinois as part of efforts to restore natural grasslands and prairies." The FWS and Chicago's Lincoln Park Zoo "released the turtles Wednesday in the Upper Mississippi Wildlife and Fish Refuge near Thomson and Savanna."

BRAZILIAN FILM CREW SEEKS PERMISSION TO SHOOT MAYFLIES. The AP (6/20) reports that a Brazilian film crew has asked the FWS for "permission to shoot the annual mayfly hatch on the Mississippi River."

EFFORT TO REDUCE PHOSPHORUS IN CHESAPEAKE BAY STALLS. The Baltimore Sun (6/16, Wheeler, 925K) reports that "despite early progress reducing Chesapeake Bay pollution, levels of a key pollutant, phosphorus, have not come down in many rivers in the past decade — and are actually rising in several, officials say." The article notes that "the lack of progress in reducing phosphorus is a particular problem on the Delmarva Peninsula, officials say, where there's evidence it is washing off the many farm fields fertilized with chicken manure." However, "phosphorus levels also are on the rise in some urban and suburban watersheds, which scientists say may stem from the erosion of stream banks caused by storm runoff from buildings and pavement."

ADDITIONAL COVERAGE OF RAZORBACK SUCKER. Additional coverage of the razorback suckers found spawning in the Grand Canyon was provided by the Cronkite News (6/20) and the Christian Science Monitor (6/19, 566K).

ADDITIONAL COVERAGE: GROUPS FILE LAWSUIT SEEKING ENDANGERED STATUS FOR LESSER

PRAIRIE CHICKEN. Additional coverage of a lawsuit filed by three wildlife-advocacy groups requesting the lesser prairie chicken be listed as an endangered species was provided by the [Los Angeles Times](#) (6/20, Srikrishnan, 3.46M).

WSJOURNAL CRITICIZES ILLINOIS SPENDING ON CHICKENS, BEARS UNDER QUINN. The Wall Street Journal (6/20, Subscription Publication, 5.51M) says in an editorial that the spending of \$181,730 in state tax dollars to fly 91 endangered greater prairie chickens from Kansas to Illinois is the latest example of overspending and bad leadership by Gov. Pat Quinn. The Journal says the state is also going to soon survey public opinion about black bears, even though the state has no black bear population.

Securing America's Energy Future:***Renewable Energy:***

BOEM TO CONSIDER ISSUING RESEARCH LEASE TO STUDY WAVE ENERGY OFF OREGON COAST. The [E&E Daily](#) (6/19) reports that the BOEM on Thursday announced that "it will consider issuing a research lease for a university to study wave energy off the Oregon coast after determining there is no competitive interest in the area." The Northwest National Marine Renewable Energy Center at Oregon State University is "seeking approval to build a test site about 5 miles off the Newport coast to study utility-scale wave energy devices." According to BOEM, "the project hopes to support up to 20 megawatts of renewable electricity production." BOEM acting Director Walter Cruickshank said, "Wave energy off the West Coast has incredible potential. Today we have reached an important step in the leasing process for the nation's first grid-connected facility in federal waters to test commercial-scale wave energy devices."

Additional coverage was provided by [reNews](#) (6/20).

GROUP FILES LAWSUIT OVER EXTENSION OF EAGLE DEATH PERMITS. The [E&E Daily](#) (6/19) reports that a leading bird conservation group on Thursday "filed a federal lawsuit against the Obama administration challenging a rule for wind and other energy projects that permits injuring, killing or disturbing bald eagles for up to 30 years." The American Bird Conservancy filed the lawsuit against the Interior Department and the FWS in the US District Court for the Northern District of California in San Francisco. The law suit challenges the new rule allowing the FWS "to grant programmatic incidental take permits to wind farms, transmission projects and other long-term energy operations for a much longer period than the previous five-year term."

Additional coverage was provided the [AP](#) (6/20) and [KCET-TV](#) Los Angeles (6/20, 15K).

BOEM SEEKS PUBLIC INPUT ON PROPOSED FLOATING WIND FARM OFF OREGON COAST. [KVAL-TV](#) Eugene, OR (6/20, 31K) reports that the BOEM was in Coos Bay this week seeking public comment on a proposed floating wind farm off the Oregon coast. The public has until July 28 to give their input on the project.

FEDERAL ENERGY REGULATORY COMMISSION APPROVES EAGLE MOUNTAIN, HYDROELECTRIC PLANT PLAN. The [Palm Springs \(CA\) Desert Sun](#) (6/20, 111K) reports that "a controversial plan to build a hydroelectric plant in the open pits of an old iron mine was granted a license on Thursday by federal regulators." The article notes that "the decision to permit the project at the abandoned Eagle Mountain mine prompted strong criticism from residents who say building two large reservoirs in the desert would severely deplete the water supply and harm the wildlife in adjacent Joshua Tree National Park." According to the article, "the decision by the Federal Energy Regulatory Commission was a significant step in years of efforts by Santa Monica-based Eagle Crest Energy Company to win government approvals and financial support for the project."

Onshore Energy Development:

SCIENTISTS CONSIDER WHETHER FRACKING IS CAUSE OF EARTHQUAKES IN OKLAHOMA. The Los Angeles Times (6/18, Branson-Potts, 3.46M) reports that Oklahoma has experienced a 5,000 percent increase in the number of earthquakes in 2013. Despite a potential for earthquakes in Oklahoma, scientists say "the more likely cause of the recent increase is underground injection wells," which are abundant, considering that about 80

percent of the state is within nine miles of an injection site. Although one oil industry scientist has suggested that changing underground water levels could be the cause, the state Legislature has still been moved to "approve rules that would increase monitoring" of seismic activity near the injection wells.

Texas Officials Request Data On Injection Sites To Investigate Link With Earthquakes. The Fort Worth (TX) Star-Telegram (6/18, Fuquay, 595K) reports that officials in Azle, Texas have compelled the Texas Railroad Commission to release information on injection sites following a series of small earthquakes near the town. According to the Commission, the data is "part of our continued effort to ensure the public is informed of our efforts to scientifically investigate seismic events in Texas." Links between nearby wastewater injections well and earthquakes have been made in Arkansas, Ohio, and Colorado, while Texas and Oklahoma regulators have not established such a link.

FRACKING HAS FUELED HUGE PROFITS FOR SAND MINES. Reuters (6/18, Driver) reports that demand for the sand used in hydraulic fracturing has led to huge returns for investments in sand mines, but that there are risks in investing in these companies. For example, a drop in crude prices could slow drilling, or demand could decrease as drillers begin to cut out the middleman and buy their own sand mines. However, providers of sand to the oil and gas industry, such as Fairmount Minerals Ltd., U.S. Silicia Holdings Inc. and Hi Crush Partners LP have recorded huge profits in the industry, and market trends predict high demand for sand is likely to continue.

INTERIOR PROPOSES NEW REGULATIONS FOR VALUATION OF OIL EXTRACTED FROM INDIAN LANDS. Politico (6/20, Guillén, 637K) reports that the Interior Department has "proposed new regulations for the valuation of oil extracted from Indian lands that 'will not only help protect and fairly value Indian energy assets but encourage exploration and development and ensure consistency with current federal oil and gas valuation rules,'" according to Interior Secretary Sally Jewell. The article notes that "the change is designed to address changes to the oil market since 1988, when the current valuation rule went into effect, and the new valuation method will bring Indian lessors another \$20 million each year, according to Interior."

NAVAJO MINE AND FOUR CORNERS POWER PLANT FACE SCRUTINY. The Durango (CO) Herald (6/18, 28K) reports that "faced with the possibility of losing \$40 million in annual revenue and several hundred jobs for its members, the Navajo Nation last year placed a high-stakes bet on coal, agreeing to take ownership of Navajo Mine." But now, "only a few months later, that bet is looking increasingly precarious as the Obama administration increases pressure to limit carbon-dioxide emissions and utilities find a ready alternative in cheap natural gas." The mine and the Four Corners Power Plant also "face scrutiny from an environmental impact statement conducted by the federal Office of Surface Mining, Reclamation and Enforcement."

BLM SEEKS PUBLIC INPUT ON OIL, GAS LEASE SALES IN UTAH. The Salt Lake (UT) Tribune (6/20, 470K) reports that the BLM is seeking public input "on two upcoming oil and gas lease sales affecting eastern Utah." The bureau has "released a draft environmental assessment on its proposal to lease 70 parcels covering about 74,000 acres overseen by its Price and Vernal field offices."

D.C. SUBURB OPPOSES SHALE DRILLING IN GEORGE WASHINGTON NATIONAL FOREST. The E&E Daily (6/19) reports that "the governing board of a major suburb of Washington, D.C., is calling on the Forest Service to block shale drilling upstream in the George Washington National Forest." The Arlington County Board on Wednesday "unanimously passed a resolution urging the agency to prohibit horizontal drilling in the forest."

CONGRESS URGED TO ALLOW FUNDING FOR INSPECTION OF OIL WELLS. The Salt Lake (UT) Tribune (6/20, 470K) editorializes that "oil wells are still dirty and need to be aggressively inspected by the relevant government agencies." It notes that "for all the moaning heard from Utah's ruling Republicans and others, all that stuff about how the nasty ol' feds are choking off the flow of needed oil from federal lands, the fact is that the BLM, particularly, is approving leases and permits faster than it can keep up with necessary inspections." The paper argues that "Congress must insist on serious improvement in this matter," and "it must pay for it."

SCIENTIST ARGUES AGAINST FRACKING ON NEVADA PUBLIC LANDS. In an op-ed in the Las Vegas Review-Journal (6/20, 437K) Center for Biological Diversity senior scientist Rob Mrowka criticizes proposals to allow fracking on public lands in Nevada. He describes the fracking process, saying it uses "a highly toxic mix of chemicals and sand and water," and noting that the industry is using "trade secret" arguments to keep from publicly disclosing fracking chemicals. He concludes that there are many opportunities for the state to create

jobs and grow its economy, including through renewable energy projects, but that fracking shouldn't be one of the ways that this is done.

Offshore Energy Development:

NPS DIVE TEAM SEARCHES GULF FOR LINGERING BP OIL. The [Pensacola \(FL\) News Journal](#) (6/19, 151K) reports that a specialized NPS dive team was "in the Gulf on Thursday morning searching for lingering BP oil." According to the article, "the team of underwater archeologists are checking out spots they identified with side-scan sonar that could have potentially trapped oil from the Deepwater Horizon oil spill disaster in April 2010."

Tackling America's Water Challenges:

CALIFORNIA URGED TO ACT ON WATER ISSUES. In an op-ed for the [Los Angeles Times](#) (6/20, Polakovic, 3.46M), Gary Polakovic, president of Make Over Earth Inc., writes that throughout California, "water purveyors have so successfully fulfilled their mission statements to provide abundant, reliable and inexpensive water for all that scarcity hardly seems real because water is nearly untethered from the economics of supply and demand." According to Polakovic, "California's history of water mirages, along with north-south water wars and the cynicism engendered by the kind of water politics portrayed in 'Chinatown,' help explain the skepticism that has greeted statewide water proposals in recent decades." As an example, he points to the Bay Delta Conservation Plan. He notes that "the Legislature has twice postponed water bond votes to pay for such infrastructure fixes, fearing the bonds would fail," and "it's uncertain whether lawmakers will try to place the latest version on the November ballot."

ADDITIONAL COVERAGE OF FUNDING FOR WATERSMART BASIN STUDY PROGRAM. Additional coverage of funding for the WaterSMART Basin Study Program was provided by the [Dalles \(OR\) Chronicle](#) (6/19, 40K).

Empowering Native American Communities:

LEGISLATION TO EXPAND NEVADA TRIBAL RESERVATIONS ADVANCES. The [Las Vegas Review-Journal](#) (6/20, 437K) reports that legislation that would expand the reservations of seven Indian tribes in Northern Nevada advanced in Congress on Thursday. The House Natural Resources Committee approved the legislation by voice vote with no discussion.

ADDITIONAL COVERAGE OF PROPOSAL TO REFORM FEDERAL RECOGNITION PROCESS. Additional coverage of the proposal to reform the federal recognition process was provided by the [Tundra \(AK\) Drums](#) (6/19, 11K).

NORTHEAST SUFFERING FROM CASINO GLUT. The [Wall Street Journal](#) (6/20, Calvert, Kamp, Subscription Publication, 5.51M) reports that the rapid expansion of the number of casinos in the mid-Atlantic and in New England is sapping the revenue each is able to generate, and simultaneously cutting into local governments' taxes from the operations.

Top National News:

OBAMA SENDS 300 SPECIAL FORCES SOLDIERS TO "TRAIN, ADVISE, AND SUPPORT" IRAQI MILITARY. President Obama's announcement that he is sending 300 US troops back to Iraq predictably dominated the news cycle, leading two out of three network newscasts, discussion on cable shows and this morning's front pages. Overall, the tenor of the coverage was markedly positive. For example, while conservative commentators and some GOP lawmakers lambasted Obama's plans, network TV reports included no Republican criticism of the President.

In fact, the only network mention of the opposition came on NBC Nightly News (6/19, lead story, 3:35, Williams, 7.86M), where Chuck Todd reported that "in Washington, the President may have bought himself some time politically" and "won over at least one critic." Sen. Marco Rubio was shown saying, "I think there's the beginning of an outline of what I hope will be a concrete plan that we can all rally around, because this issue deserves that

level of attention.”

Reports unanimously highlighted Obama's assurances that no US soldiers will be involved in combat. It was, says the Washington Post (6/20, DeYoung, Gearan, 4.22M), “a point he made repeatedly during remarks in the White House briefing room.” The lead stories on NBC Night News and the CBS Evening News included footage of the President saying, “I think we always have to guard against mission creep. So let me repeat what I've said in the past – American combat troops are not going to be fighting in Iraq again.”

ABC World News (6/19, story 2, 2:30, Raddatz) did not air that quote, but noted that “Obama made it clear that US combat forces will not fight a new war” in Iraq, and showed the President saying, “It's clear from the last decade the need for the United States to ask hard questions before we take action abroad.” On NBC Nightly News (6/19, lead story, 3:35, Williams, 7.86M), Todd cast Obama's announcement as “the beginnings of a long-term strategy to deal with this chaos in Iraq,” where “instead of forging ahead with a major military campaign, the President is turning to” Secretary of State Kerry “to lead a robust diplomatic effort to end the political stalemate in Iraq.” Bloomberg News (6/20, Talev, 2.76M) also notes this morning that Kerry “will leave this weekend to consult with allies in the Middle East and Europe.”

The CBS Evening News (6/19, lead story, 2:20, Alfonsi, 5.08M) led its broadcast reporting, “US military forces are going back to Iraq, two and a half years after...Obama pulled the last troops out.” CBS (Garrett) added that Obama “described the Special Forces mission as limited: gain intelligence on the Sunni insurgents and advise Iraqi security forces defending Baghdad.”

On ABC World News (6/19, story 3, 1:00, Muir), however, White House correspondent Jonathan Karl said cautioned that Obama's announcement amounts to “a significantly more dangerous mission than had been widely anticipated – three times as many Special Forces as had been reported.” Obama “faces a real dilemma here: On one hand, he wants no part of going back into Iraq...but at the same time this group now taking over parts of Iraq poses a real threat. As a former ambassador to Iraq who served under Obama said today this group is more formidable than Osama bin Laden's al Qaeda at the present time of the September 11 attacks.” Karl was referring to comments by former US Ambassador to Iraq Ryan Crocker, who said, “We would be foolish to think that ISIS will not plan attacks against the West now that it has the space and security to do so. ... This is a more formidable force than Osama bin Laden's group that brought us 9/11.”

The AP (6/20, Pace, Hendawi) describes Obama as “inching back into a fight he tried to leave behind,” because “when coupled with previously announced steps, the president's actions could put about 600 additional US troops in the midst of Iraq's deeply unstable security situation.” CBS was referring to the fact that, as The Hill (6/19, Sink, Wong, 237K) reported, “the advisers being dispatched are in addition to 275 service members the president has authorized to go to Iraq to secure the US Embassy in Baghdad.”

The Christian Science Monitor (6/20, LaFranchi, 566K) reports that while Obama “said the limited role of the military advisers would be to ‘train, advise, and support’ the Iraqi military...he also suggested that the US personnel would be gathering intelligence so that the US can be ‘prepared to take targeted and precise military action if and when we determine the situation on the ground requires it.’” The Los Angeles Times (6/20, Hennessey, Parsons, Bengali, 3.46M) notes that “US officials said the US will initially deploy several special operations teams of about a dozen members each. The teams will be embedded among Iraqi military officers at their headquarters, and at the brigade level, the officials said.”

McClatchy (6/20, Wise, Subscription Publication, 23K) notes that Defense Secretary Hagel “said he supports Obama's decision” to send 300 hundred US military personnel to Iraq, adding, “These special operators will assess the situation on the ground, help evaluate gaps in Iraqi security forces, and increase their capacity to counter the threat posed” by ISIL. TIME (6/19, Miller, 24.1M) reported on its website that “on a conference call with reporters following Obama's remarks, a senior Administration official said both manned and unmanned flights are already providing ‘round-the-clock coverage over Iraq.’” Moreover, “even as Obama said he was mindful of avoiding ‘mission creep’ in Iraq, one official said military has ‘more than 30,000 troops at sea and shore, including fixed and rotary wing aircraft’ in the region.” This official added, “We are not at the stage where we are prepared for airstrikes, obviously, the President hasn't asked us to do that.”

Barbara Starr noted on CNN's Situation Room (6/19, 554K) that while the US troops will not be on the front lines,

they "may well be in danger," adding that "helicopters and aircraft now based on ships in the Persian Gulf and ashore will be ready to move in quickly if US forces do come under attack, a senior defense official tells CNN." USA Today (6/20, Michaels, 5.82M) says "the challenge for the president is to commit enough forces to assist the Iraqis while ensuring the mission doesn't expand over time." For example, "the Vietnam War started with a limited mission of U.S. advisers sent to help the South Vietnamese armed forces."

The Christian Science Monitor (6/20, LaFranchi, 566K) reports that Obama's "modest action...reflects a president who is extremely reluctant to reengage America in the Iraq conflict he likes to claim he ended, but who is also mindful of the dire consequences that a Sunni extremist victory in Iraq could pose to the US." Politico (6/19, Dovre, Gerstein, 637K) similarly called "reengaging with Iraq...a politically uncomfortable move for a president who won election in large part due to his opposition to the Iraq War and who has touted the withdrawal of US combat forces from Iraq in 2011 as one of the key achievements of his presidency." NPR (6/19, Gonyea, 519K) noted on its website that "officially, the Iraq war may be over, but that wasn't the end of it for the President."

Ed Henry said on Fox News' Special Report (6/19, 2.15M) that the President decided "to not completely decide, showing critics on the right he's taking some military action while reassuring nervous allies on the left that this will not become mission creep." Along those lines, the Washington Post (6/20, DeYoung, Gearan, 4.22M) reports the Administration "is straddling difficult politics in Iraq and at home, seeking to answer Republican critics such as" House Speaker Boehner "who claim that Obama is 'taking a nap' while Iraq crumbles and to assure political supporters that he is not opening a new front in the Middle East." Politico (6/19, French, 637K) quoted Boehner as saying yesterday, "The White House has known for months about the situation in Iraq. And when you look, it's not just Iraq, it's Libya, it's Egypt, it's Syria. The spread of terrorism has increased exponentially under this president... You look at this presidency and you can't help but get the sense that the wheels are coming off."

McClatchy (6/20, Wise, Subscription Publication, 23K) reports that on Capitol Hill, reaction to the President's announcement broke along party lines: "Democrats commended Obama for taking action, while Republicans criticized his plan for not going far enough." Under the headline "Dems Starting To Unite Around President Obama On Iraq," Politico (6/20, Everett, Herb, 637K) said "Democrats from a broad ideological spectrum backed Obama's decision to send 300 military advisers to Iraq to prevent the march of the Islamic State of Iraq and the Levant into Baghdad." Sen. Bob Martinez said, "We have to think about our national security interests first and foremost and from my perspective ISIS is a national security threat. ... There isn't any air power in the world that can take care of the problem of sectarian divisions."

The Wall Street Journal (6/20, Sparshott, Subscription Publication, 5.51M) notes that House Foreign Affairs Chairman Ed Royce said yesterday, "The plan that the president announced today in response to the rapid terrorist expansion in Iraq underestimates the seriousness of the threat. ... The steps he announced are needed, but fall short of what is required to stop this al-Qaeda offshoot from gaining more power, which must include drone strikes."

USA Today (6/20, Jackson, Michaels, 5.82M) reports "two Republican critics of Obama's Iraq policies – Sens. John McCain of Arizona and Lindsey Graham of South Carolina – called the sending of advisers 'a positive step' but said more needs to be done." The senators said in a joint statement, "We must act now to help Iraqis arrest their country's descent into chaos."

The Washington Times (6/20, Boyer, Ybarra, 455K) reports Senate Minority Leader McConnell "said the crisis in Iraq is a direct result of Mr. Obama's eagerness to disengage militarily from trouble spots around the world." Said McConnell, "The threat from al Qaeda and other affiliated groups has now metastasized, ... The dogged adherence to withdrawing our conventional strength and sticking to campaign promises has created a more dangerous world, not a more stable one."

Reporting from Baghdad, correspondent Clarissa Ward said on the CBS Evening News (6/19, story 2, 1:20, Alfonsi, 5.08M) that "there will certainly be some disappointment" within the Iraqi government "that the President didn't commit to those airstrikes. Ideally, the Iraqis would like to see the US be a silent partner in the skies and really the emphasis is on 'silent' there," because "they don't want to be seen as being dependent on the US or being weak and they certainly don't want to see...US boots on the ground here." Contrasting with that assessment, Richard Engel reported from Baghdad on NBC Nightly News (6/19, story 2, 1:30, Williams, 7.86M) that "people here...certainly welcomed" Obama's announcement, because "make no mistake, this is a US

military intervention. They're not American boots on the ground, but these advisers are going to be working with the Iraqi military, guiding the military, picking targets, helping the military."

David Brooks, in his New York Times (6/20, Subscription Publication, 9.65M) column, sees lessons for Iraq's future in the 1994 Rwanda disaster, "If you can sideline" leaders carrying out the atrocities "or get the politics functioning, you can reduce the violence dramatically. These situations are gruesome, but they are not hopeless." While "Iraq is looking into an abyss...the good news is that if you get the political elites behaving decently, you can avoid the worst. Grimly, there's cause for hope."

Potential Airstrikes Could Also Target Sunni Insurgents In Syria. The CBS Evening News (6/19, lead story, 2:20, Alfonsi, 5.08M) said last night that "the prospect of US airstrikes remains real but will not be limited to Iraq," as "senior officials say if US interests are threatened, US military actions could target the same Sunni insurgents now operating in neighboring Syria." Roll Call (6/19, Dennis, Subscription Publication, 76K) also reported that "attacks could conceivably cross into Syria, where ISIL also operates." According to "a senior administration official," the Administration is "not restricted to a particular geographic space, noting that the US had taken action against militants in Yemen, Somalia and Libya in the past."

Politico (6/19, Ewing, 637K) also reported "administration officials did not rule out the possibility that the president could order airstrikes on Iraq or Syria," even if "the focus now is on getting better intelligence about Iraqi forces' capabilities and the threat ISIL poses to Baghdad and the Iraqi south."

The Washington Post (6/20, Wilson, 4.22M) reports that the "Administration has begun to consider the conflicts in Syria and Iraq as a single challenge, with an al-Qaeda-inspired insurgency threatening both countries' governments and the region's broader stability, according to senior administration officials." An unnamed "administration official" tells the Post, "Everybody here recognizes that you can't silo what is happening in Iraq from what is happening in Syria. ... There's no doubt the border is melting away. But while we look at the two in tandem, our responses in each place will be very different." Another "US official" says, "Our focus now is on how we cauterize what is happening in Iraq, how we encourage political responsibility by the Iraqi government, and what we can do to address the source of the threat, which is in Syria."

Obama Says He'll Consult Congress, But Confident He Doesn't Need Hill Authorization For Further Action. McClatchy (6/20, Wise, Subscription Publication, 23K) notes that "although he ruled out troops on the ground, Obama did not rule out airstrikes or other forms military action in Iraq." Said Obama, "If we do" launch strikes, "I will consult closely with Congress and leaders in Iraq and in the region." However, the Washington Post (6/20, DeYoung, Gearan, 4.22M) reports, the Administration "does not believe it needs formal congressional approval to respond to Iraqi requests for assistance," even as "it has sought with telephone calls and other outreach to assure lawmakers that they will be consulted."

Roll Call (6/19, Dennis, Subscription Publication, 76K) noted that Obama "did not cite what authority he is using to take military action, although authorizations to use military force passed in 2001 and 2002 never expired, and give the president broad leeway." Roll Call added that "lawmakers in both parties – from Sen. Rand Paul...to Rep. Barbara Lee...have said Congress should debate what to do." However, The Hill (6/19, Sink, Wong, 237K) said "Democratic leaders have given the White House cover to use the 2002 law authorizing former President George W. Bush to go to war with Iraq as the legal authority for new actions."

Politico (6/19, French, 637K) quoted House Minority Leader Pelosi as saying, "The President does not need any additional congressional authority to act upon measures for our national security." Pelosi added, however, that "she was not in support of putting 'boots on the ground.'"

Administration: Despite Lack Of State-Of-Forces Deal, US Troops Will Have Immunity. Ed Henry said on Fox News' Special Report (6/19, 2.15M) that the President did not "take a shouted question on the way out the door on whether we now have a status of forces agreement or immunity, which we clearly don't have. White House officials later told us well, look, they don't need it in this case because the advisers who are going there will fall under the protections of the US Embassy in Baghdad. Obviously, there is all kinds of potential loopholes there."

However, Jim Acosta reported on CNN's Situation Room (6/19, 554K) that a "senior Administration official" said

that the military advisers being sent to Iraq "will have legal protection, will have immunity as one official put it to me. They're going in at the request of the Iraqi government."

Reuters-IPSOS Poll: 55% Oppose Any Intervention In Iraq. Reuters (6/20, Storey) reports that according to a new online Reuters-IPSOS poll of 1,009 Americans, 55% of respondents (with little variation across party lines) oppose any kind of US military intervention in Iraq, and just 20% support it.

Peggy Noonan, in this morning's Wall Street Journal (6/20, Subscription Publication, 5.51M), blames both the Bush and Obama Administrations (which she casts as incompetent) for shaking Americans' faith in whether the US can successfully carry out military missions.

More Commentary On Obama's Announcement. In an editorial, the Wall Street Journal (6/20, Subscription Publication, 5.51M) criticizes Obama's plans as insufficient and ineffective, and expresses certainty that both Iran and ISIL have perceived them as such.

The Washington Post (6/20, 4.22M) editorializes, "Obama has to take care that his judiciousness isn't overtaken by events, which have repeatedly caught US officials by surprise, and he has to explain to the American people that there will be no safe outcome without U.S. engagement sustained over years, not months. ... Like Mr. Bush, Mr. Obama may be facing a second term very different from the one he had hoped for. History will credit him if he adjusts and responds to dangers he had hoped were in his rearview mirror."

David Ignatius, in the Washington Post (6/20, 4.22M), argues that "good policy for Iraq and Syria can't rely on military force alone. The United States' misadventures after the 2003 invasion of Iraq surely teach that lesson."

In his opening monologue on Fox News' O'Reilly Factor (6/19, 2.53M), Bill O'Reilly said that while the Pentagon "recommends bombing the al Qaeda army, which is slaughtering thousands of people and threatening to overwhelm Iraq, Mr. Obama says he will not bomb the terrorists who are moving back and forth across flat terrain to and from Syria. Instead he is sending 300 military advisers and asking for international help. ... So, once again, the President seeks consensus from other countries rather than charting a direct course that might damage the evil al Qaeda." O'Reilly added that the President "generally is very cautious about direct action to right wrongs. He would rather have meetings." That, O'Reilly argued, "emboldens our enemies. They don't believe Mr. Obama has the will to punish them."

Charles Krauthammer also criticizes Obama in a column titled "Abdication Has A Price," writing in the Washington Post (6/20, 4.22M), "Yes, it is true that there was no al-Qaeda in Iraq when George W. Bush took office. But it is equally true that there was essentially no al-Qaeda in Iraq remaining when... Obama took office."

Sen. Rand Paul, in the Wall Street Journal (6/20, Subscription Publication, 5.51M), casts the conflict as strictly a civil war, and urges Obama to stay completely out of it.

OBAMA TELLS PEÑA NIETO THAT UNACCOMPANIED CHILDREN WILL NOT BE ALLOWED TO STAY IN US. The Washington Times (6/20, Boyer, 455K) reports President Obama told Mexican President Enrique Peña Nieto Thursday that those entering the US illegally, including children, "won't qualify for legalized status or deferred deportation." The White House said that "in the phone conversation, Mr. Obama 'welcomed the opportunity to work in close cooperation with Mexico to develop concrete proposals to address the root causes of unlawful migration from Central America.'"

The Washington Post (6/20, 4.22M) says in an editorial that "the fact is that the vast majority of children who enter the United States now won't be eligible for remaining legally under any immigration reform proposal, so they ultimately face removal or life in the United States as undocumented aliens," and that President Obama should "directly address Central Americans" to get this message across.

Republicans Say Federal Government Must Do More. The CBS Evening News (6/19, story 7, 2:15, Alfonsi, 5.08M) reported on Gov. Rick Perry's authorization of "spending an extra \$1.3 million a week on border security." Texas officials "say the Federal government is not doing enough to help." The Los Angeles Times (6/20, Hennessy-Fiske, Simon, 3.46M) says Perry and other Republicans are challenging Obama's "characterization of the surge in young immigrants from Central America across the southern border as an unforeseen crisis,

accusing his administration of contributing to the influx" and calling for the deployment of the National Guard.

Central American Leaders Criticized Over Immigration Crisis. The Washington Times (6/20, Dinan, 455K) reports that the governments of El Salvador, Guatemala, and Honduras "are beginning to feel heat from Washington...for failing their own citizens – forcing many to flee to the U.S., banking on uncertain promises or rumors of legal status." Congressional Democrats have been faulting the nations for the crisis. Vice President Biden will meet with the leaders of the three nations in Guatemala Friday.

Immigration Crisis Said To Be Hurting Anti-Drug Efforts. The Washington Post (6/20, Partlow, Miroff, 4.22M) reports that "with the Border Patrol distracted" by the surge of immigrants, drug cartels "have had an easier time smuggling illegal drugs across the border, according to agents and state officials here." National Border Patrol Council representative Chris Cabrera said the crisis "is pulling agents away from their patrol stations elsewhere along the border, creating gaps in coverage that the traffickers can exploit."

Residents Of Virginia Town Angry Over Temporary Shelter Plan. The Washington Times (6/20, Miller, 455K) reports more than 1,000 residents of Lawrenceville, Virginia told HHS officials Thursday that they do not want the recently closed St. Paul's College to become "temporary emergency shelter for about 500 children." While the children were meant to have arrived Thursday, "HHS officials struggled to persuade a crowd of angry residents that bringing the children to Lawrenceville would create jobs, boost the economy and provide a desperately needed humanitarian service."

Adelson Says GOP Should Take Lead On Immigration Reform. Sheldon Adelson wrote in Politico Magazine (6/19, 633K) that "as a Republican, it's my view that efforts to complete immigration reform should be led by our party. ... Democrats don't have a monopoly on having hearts." Adelson writes that the US "does not have a process – real or imaginable – to deport 11 million people from within our borders" and that the GOP should "start by instituting a process in which all undocumented immigrants receive permits to legally work here."

HOUSE REPUBLICANS CHOOSE MCCARTHY, SCALISE FOR TOP LEADERSHIP POSTS. Both the CBS Evening News (6/19, story 6, 0:20, Alfonsi, 5.08M) and NBC Nightly News (6/19, story 6, 0:30, Williams, 7.86M) briefly reported that House Republicans elected House Majority Whip McCarthy to succeed Eric Cantor as majority leader, and Rep. Steve Scalise to succeed McCarthy. The AP (6/20, Espo) says McCarthy's election after less than eight years in the House "capped a meteoric rise through the ranks of power," while the choice of Louisiana's Scalise over Rep. Peter Roskam of Illinois was a "clear indication that the rank and file wanted a red-state Republican in the upper ranks of leadership." The Washington Post (6/20, O'Keefe, Costa, 4.22M) says McCarthy is "the fastest-rising majority leader in American history."

The New York Times (6/20, Parker, Peters, Subscription Publication, 9.65M) says McCarthy is "a loyal lieutenant" of House Speaker Boehner and "is likely to be more of a preserver of the status quo...than the conservative firebrand many from the party's right flank had hoped to promote," Rep. Raul Labrador, who was his sole rival. The results of the secret balloting were not released.

The Los Angeles Times (6/20, Memoli, 3.46M) says with McCarthy "having sewn up the race for majority leader early on, many House conservatives saw the whip's race as their best opportunity to gain a foothold in the leadership," and Roskam "was seen by many of the conservatives as too close to the party's business-oriented establishment." Conservative Rep. Marlin Stutzman also ran for whip.

The Washington Post (6/20, Costa, Kucinich, Fahrenthold, 4.22M) says Scalise won "by selling himself as a hard-edged conservative, and by employing the low-tech political stagecraft of a college student-council election" including "stickers" and "free food." Politico (6/19, Sherman, Bresnahan, Palmer, 637K) said Scalise also "knew how to build up chits," and "over the span of nine-day leadership election, the five-year congressional veteran cashed them in – in break-neck fashion. ... He worked over the House Republican Conference until his walk to the Thursday vote – he made roughly 100 calls on the final day."

In an analysis, the New York Times (6/20, Steinhauer, Subscription Publication, 9.65M) says McCarthy is likely to bring "a more pragmatic and inclusive leadership than Mr. Cantor preferred." While "no one has ever accused Mr. McCarthy of being steeped in the finest details of issues before Congress," he has a reputation as a conciliator and "is also known for his affability" and his friendliness with Democrats.

USA Today (6/20, Davis, 5.82M) calls McCarthy a “gregarious pol” who “has spent his brief time in Congress cultivating relationships with charm and a jovial approach.” McClatchy (6/20, Doyle, Subscription Publication, 23K) quotes Democratic Rep. Adam Schiff saying, “It’s certainly good news for the Golden State. On issues that are non-partisan, this could really benefit California.”

The Wall Street Journal (6/20, Peterson, Hughes, Subscription Publication, 5.51M) says the new leadership will take over on August 1, after Cantor officially leaves his post. Reuters (6/20, Cornwell, Stephenson), the Washington Times (6/20, Sherfinski, 455K), Politico (6/19, Bresnahan, Sherman, Palmer, 637K), The Hill (6/19, Berman, 237K), and Huffington Post (6/19, Siddiqui, 11.54M) also have reports.

Editorial Wrap-Up:

NEW YORK TIMES. “Playing With Fire In Afghanistan.” The New York Times (6/20, Subscription Publication, 9.65M) editorializes that with his refusal to accept the results of Afghanistan’s runoff presidential vote, candidate Abdullah Abdullah is “creating a political crisis” which “could be catastrophic for Afghanistan, which is still very fragile and under grave threat from the Taliban.” Without a clear winner, “there is likely to be a protracted political struggle along ethnic lines that could make it impossible to transfer power democratically.” This would “paralyze government decision-making and prevent the signing of a security agreement.”

“Good Progress On Affordable Healthcare.” An editorial in the New York Times (6/20, Subscription Publication, 9.65M) cites a report issued this week by DHS on the progress of the Affordable Care Act and notes that while “the system is still new, millions of Americans are already being helped, and every success makes it that much harder for its political enemies to repeal or disable it.”

“Keeping Track.” The New York Times (6/20, Subscription Publication, 9.65M) considers this week’s Supreme Court ruling in the case Alice Corporation v. CLS Bank International, and a measure by Sen. Tom Harkin to increase the salary threshold above which salaried workers are not guaranteed time-and-a-half pay after working more than 40 hours in a week.

“The Klinghoffer Tragedy.”

WASHINGTON POST. “Obama’s Midterm Challenge.” The Washington Post (6/20, 4.22M) editorializes that in Iraq, President Obama “has to take care that his judiciousness isn’t overtaken by events, which have repeatedly caught US officials by surprise, and he has to explain to the American people that there will be no safe outcome without U.S. engagement sustained over years, not months. ... Like Mr. Bush, Mr. Obama may be facing a second term very different from the one he had hoped for. History will credit him if he adjusts and responds to dangers he had hoped were in his rearview mirror.”

“Solving The Border Crisis.” The Washington Post (6/20, 4.22M) says in an editorial that “the fact is that the vast majority of children who enter the United States now won’t be eligible for remaining legally under any immigration reform proposal, so they ultimately face removal or life in the United States as undocumented aliens,” and that President Obama should “directly address Central Americans” to get this message across.

“Employing Ex-Offenders.” The Washington Post (6/20, 4.22M) editorializes that the District of Columbia Council “rightly wants to ban the unfair hiring practice that disqualifies people with a criminal record from even being considered.” The Post argues that employment for ex-offenders “is key to combating recidivism, and it makes sense to get all residents involved in improving the city’s economy,” but “business concerns about proposed legislation need to be taken into account, or the council risks driving away jobs and hurting the people it aims to help.” The Post concludes that “the issues raised by the private sector – which include the need to better educate companies on this issue – are legitimate.”

WALL STREET JOURNAL. “Obama’s Iraq Feint.” In an editorial, the Wall Street Journal (6/20, Subscription Publication, 5.51M) criticizes President Obama’s Iraq plans as insufficient and ineffective, and expresses certainty that both Iran and ISIL have perceived them as such.

"The IRS Memory Hole." The Wall Street Journal (6/20, Subscription Publication, 5.51M) says in an editorial that IRS Commissioner John Koskinen is not being candid in his assertions about the loss of Lois Lemer's emails, and that the loss either means the IRS is hopelessly inept and therefore incapable of completing its tasks, or is intentionally hiding something.

"Little Hens On The Prairie." The Wall Street Journal (6/20, Subscription Publication, 5.51M) says in an editorial that the spending of \$181,730 in state tax dollars to fly 91 endangered greater prairie chickens from Kansas to Illinois is the latest example of overspending and bad leadership by Gov. Pat Quinn. The Journal says the state is also going to soon survey public opinion about black bears, even though the state has no black bear population.

SCIENCE, SPACE, AND TECHNOLOGY – 10 a.m. Subcommittee on Space and Subcommittee on Oversight Joint hearing on NASA Security: Assessing the Agency's Efforts to Protect Sensitive Information. Witnesses: Richard Keegan, Associate Deputy Administrator, NASA; Belva Martin, Director, Acquisition and Sourcing Management, Government Accountability Office; Gail A. Robinson, Deputy Inspector General, NASA; Douglas Webster, Fellow, National Academy of Public Administration and Principal, Cambio, Consulting Group. Location: 2318 Rayburn.

Other: 2014 ACCOUNTABLE CARE ORGANIZATION SUMMIT – June 18 – 20. A Hybrid Conference and Internet Forum on Accountable Care Organizations (ACOs) and Related Delivery System and Payment Reform. Sponsored by Engelberg Center for Health Reform at the Brookings Institution and Dartmouth Institute for Health

Policy and Clinical Practice. RSVP: registration@hcconferences.com. Location: Hyatt Regency on Capitol Hill, 400 New Jersey Ave. NW. Contacts: 800-503-3597.

2014 ACS CONVENTION – June 19 – 21. The American Constitution Society for Law and Policy will hold its 2014 National Convention. Speakers include: Justice Sonia Sotomayor, San Antonio Mayor Julian Castro, and civil rights attorney and leader Theodore M. Shaw. Location: Capital Hilton, 1001 16th St, NW. Contacts: Media RSVP to press@acslaw.org.

CARNEGIE, EPI – TRANSATLANTIC FINANCIAL CRISIS – 9:30 a.m. – 4:25 p.m. EPI Director of Trade and Manufacturing Policy Research Robert E. Scott will join other economic experts and policymakers to explore lessons learned from the transatlantic financial crisis at The Crisis and What Remains to Be Done? Hosted by the AFL-CIO, the Friedrich Ebert Foundation, and the IMK of the Hans Buckler Foundation, the conference will examine what we have learned since the financial crash of 2008 and the ensuing Great Recession, and what remains to be done. Contact: Dan Crawford, Donti Donald or Liz Rose, news@epi.org 202-775-8810. Location: Carnegie Endowment for International Peace, 1779 Massachusetts Avenue, NW.

HAGEL, NEW ZEALAND HONOR CORDON – 8:30 a.m. Secretary of Defense Chuck Hagel hosts an enhanced honor cordon to welcome the Prime Minister of New Zealand John Key to the Pentagon at 8:30 a.m. EDT. The cordon will be held on the steps of the Pentagon River Entrance. Journalists without a Pentagon building pass will be picked up at the River Entrance only. Plan to arrive no later than 30 minutes prior to the event; have proof of affiliation and two forms of photo identification. Please call 703-697-5131 for escort to the cordon.

INTER-AMERICAN DIALOGUE – REP. MEEKS – 8:30 a.m. Discussion with Congressman Gregory Meeks (D-NY) on US-Latin America relations. Meeks is a member of the House Subcommittee on the Western Hemisphere and recently traveled to Cuba, Colombia, Venezuela, Guatemala, Mexico, and Haiti. Location: 1211 Connecticut Ave NW, Suite 510. Contacts: 202-822-9002

MODERN FAMILIES – 9:30 a.m. – 10:15 a.m. U.S. Trust will release their 2014 Insights on Wealth and Worth in a live media webcast. This annual study, the largest of its kind to explore trends, attitudes and behaviors of high net worth Americans, will be presented by: Keith Banks, President of U.S. Trust; Chris Heilmann, Chief Fiduciary Executive of U.S. Trust. Backup Telephone: (855) 266-2351, Backup International Toll Telephone: (706) 643-7662, Conference ID: 54175174 . Contacts: Jennifer Murray Jmurray@hubbellgroup.com (781-878-8882)

SWIMMING LESSON – MARY CRIPPEN – 10:30 a.m. U.S. Consumer Product Safety Commission (CPSC) Acting Chairman Robert Adler and former Olympic swimmer Maddy Crippen will take part in a Worlds Largest Swimming Lesson (WLSL) event. Speakers: Robert Adler, CPSC Acting Chairman; Maddy Crippen, Member of the U.S. Olympic Swim Team, 2000 Summer Olympics. Contact Christina Saull at (202) 518-6480 or Christina.Saull@widmeyer.com. Location: Prince Georges County Sports and Learning Complex in Landover, Maryland.

G.I. BILL 70TH – 11:30 a.m. The Department of Veterans Affairs (VA) will commemorate the 70th Anniversary of the GI Bill. with student Veterans, Veteran Service Organizations (VSO) and partners at an event to be held at the VA VetSuccess on Campus partner location, George Washington University. Speakers: Sloan Gibson, Acting Secretary, Dept. of Veterans Affairs; Allison Hickey, Undersecretary for Benefits, Dept. of Veterans Affairs; D. Wayne Robinson, President, Student Veterans of America (SVA); Steve Gonzalez, Asst. Dir., Veterans Employ. and Educ., American Legion; Jeremy Adkins, Rockhurst University (Student Veteran). MEDIA RSVP to VAPublicAffairs@va.gov. Location: George Washington University, Marvin Center Amphitheater (3rd Floor), 800 21st Street NW.

PRIMARY CARE SHORTAGE – 11:30 a.m. – 1 p.m. Lunch briefing on Improving GME: Seeking a Permanent Solution to the Primary Care Shortage. Speakers: Andrew Bazemore, MD, Robert Graham Center; Washington DC; Dan Burke, MD, University of Colorado; Ted Epperly, MD, Family Medicine Residency of Idaho; Sarah Hameida, MD, Medical Resident; Gina Martin, MD, Medical Resident; Bob Phillips, MD, American Board of Family Medicine; Barbara Ross-Lee, DO, New York Institute of Technology, College for Osteopathic Medicine. RSVP: RSVP to Frank Walsh at fwalsh@gymr.com or call (202) 745-5110. Location: U.S. Capitol Hill Visitors Center – Room SVC 209-08.

KERLIKOWSKE – 12 p.m. CBP Commissioner R. Gil Kerlikowske will participate on a panel at the Express

Association of America Annual Meeting. Location: Army and Navy Club, 17th and I St., NW.

HUDSON – CYPRUS – 12:30 p.m. – 1:45 p.m. The Solution to the Cyprus Problem: Famagusta, Energy, and Public Relations. Speakers: Seth Cropsey Moderator, Director, Center for American Seapower, Hudson Institute; Alexis Galanos, Mayor, Famagusta and Former Speaker of the Cyprus House of Representatives. Location: Hudson Institute, Washington, D.C. Headquarters 1015 15th Street, N.W., 6th Floor.

HOUSE LEADERSHIP ELECTIONS – CONSERVATIVES REAX – 1 p.m. Conservative leaders will speak during a press call Friday to discuss today's election of Congressman Kevin McCarthy (CA-23) as House Majority Leader and Congressman Steve Scalise (LA-01) as Majority Whip. Speakers: Linda Chavez, Chairman, Center for Equal Opportunity; Dr. Barrett Duke, Vice President for Public Policy and Research, Southern Baptist Ethics & Religious Liberty Commission; Doug Holtz-Eakin, President, American Action Forum; Rob Jesmer, Campaign Manager, FWD.us; Ali Noorani (moderator), Executive Director, National Immigration Forum; Grover Norquist, Founder & President, Americans for Tax Reform. DIAL IN: 1- 866-952-1907; Conference ID: IMMIGRATION.

WORLD BANK – HRH PRINCESS ALEXANDRA – RIVER BLINDNESS – 5 p.m. World Bank Group President Dr. Jim Yong Kim will open a Summit, "From River Blindness to All Neglected Tropical Diseases," in Washington DC on Friday, June 20. The Summit marks the 40th Anniversary of the fight against river blindness in Africa and discusses how this strategy can be adapted to address other preventable Neglected Tropical Diseases (NTDs) that largely affect poor people. Participants include: Her Royal Highness Princess Alexandra, President of Sightsavers; Diane McNamara, wife of the late Robert McNamara, former President of the World Bank who played a key role in initiating the river blindness program; Dr. Luis Sambo, WHO Regional Director for Africa; Ms. GERALYN S. Ritter, Senior VP, Global Public Policy and Corporate Responsibility, Merck & Co.; Mr. Merza H. Hasan, Kuwait Executive Director and Dean of the World Bank Board; Mr. Makhtar Diop, World Bank Vice President for Africa; and Dr. Tim Evans, World Bank Senior Director, Health. Contacts: Elena Gex +1 (202) 473-1708; egex@worldbank.org; Aby K. Toure +1 (202) 473-8302; akonate@worldbank.org. Location: The World Bank Headquarters, Main Complex atrium, 1818 H Street, NW. Notes: There will be a photo opportunity with President Kim, HRH Princess Alexandra, and other speakers beside the river blindness statue at the World Bank Headquarters at 5.00 P.M. Gates open at 5p. 4p pre-set for photogs. 5:05 – 6p summit panel.

Last Laughs:

LATE NIGHT POLITICAL HUMOR.

David Letterman: "You know where it's bad now? Iraq, oh my God. Did you see this coming? It was bad and now it's getting worse and...President Obama, normally a cool guy, but...today he was saying he might have to send in Dennis Rodman. And then later in the day he phoned Hillary Clinton and asked her if she could start early."

Stephen Colbert: [Referring to Dick Cheney's op-ed criticizing Obama's foreign policy] "In an op-ed in what many are calling the 'Wall Street Journal,' Cheney writes, 'Rarely has a US President been so wrong about so much at the expense of so many.' Yes, rarely, maybe only one other time."

Stephen Colbert: "Folks, when it comes to education, there is one crucial thing a child needs – name-brand food products. You got every subject right there in the vending machine. Three Musketeers – that's English class. Bugles – that's band. And Aquafina – pretty sure that's Latin. But the Michelle Obama health-Gestapo is now cracking down on the marketing of the less-nutritious foods in schools with new rules limiting how much fat, sugar, and sodium they contain. Ingredients which are usually limited only by our imagination."

Jimmy Fallon: "Little controversy from Colorado. Marijuana activists have filed a lawsuit against Colorado's governor to protest paying taxes on the weed they buy. And by filing a lawsuit, I mean, they wrote 'Not cool, bro' on a place-mat in IHOP."

Seth Meyers: "The Smithsonian unveiled a 3D-printed sculpture of President Obama that is detailed enough [that] you see his pores and wrinkles. The sculpture is so realistic that Joe Biden won't leave it alone."

Interior, USDA Announce Landmark Commitment to Improve Sage-Grouse Habitat Nevada-California Ranchers to Benefit *Nevada-California Ranchers to Benefit*

WASHINGTON - Agriculture Secretary Tom Vilsack today announced a ground-breaking commitment from the U.S. Department of Agriculture (USDA) to accelerate and focus conservation efforts that will benefit ranchers and also the distinct population of greater sage-grouse population that lives along the border of Nevada and California. The bi-state population of sage-grouse is being considered for protection under the Endangered Species Act.

"With proactive conservation investments, we're helping farmers and ranchers who are improving habitat through voluntary efforts to stabilize this population of sage-grouse," said Vilsack. "Through action such as this, along with the support of our partners, we can help secure this species' future and maintain our vibrant western economies."

USDA will provide up to \$25.5 million of conservation investments over the next five to ten years as part of its contribution to delivering the federal, state and local 2012 Bi-State Action Plan, a conservation strategy that will benefit the sage-grouse population in both states. The plan, sanctioned by the Department of the Interior's U.S. Fish and Wildlife Service (USFWS), aims to focus resources on cost effective and efficient solutions that could avert the need to list the bi-state population as "threatened" or "endangered" under the Endangered Species Act.

Today, the Bureau of Land Management (BLM) also announced a \$6.5 million commitment over the next ten years to implement a wide range of priority conservation activities on the public lands it manages to improve sage-grouse habitat. The BLM is coordinating with the U.S. Forest Service to amend resource management plans that will include standards and guidelines designed to conserve and enhance sage grouse habitat.

"We have made it a high priority to engage in voluntary partnership with ranchers, farmers and other landowners to conserve the wildlife and habitat that are so important to our heritage and way of life," said Secretary of the Interior Sally Jewell. "I applaud the NRCS, USFS and the BLM for their very significant commitments, which will help provide certainty that important conservation actions in key areas of the bird's habitat will continue to be implemented. Together, we can make our landscapes work for both agriculture and the bi-state sage-grouse."

The U.S. Forest Service and Natural Resources Conservation Service (NRCS), both USDA agencies, are leading the Sage-Grouse Initiative (SGI) and will have the means to fully carry out conservation practices and policy changes agreed upon by the Bi-State Local Area Working Group in its action plan.

The announcement comes at the conclusion of an extended public comment period on the USFWS proposal to federally list the bi-state population of greater sage-grouse as a threatened species. A final decision on the proposal is expected by April 28, 2015.

Since 2010, USDA has funded \$27.5 million of conservation efforts, primarily through working with farmers, ranchers and other land managers in on-the-ground projects that address critical threats identified in the action plan. Conservation easements on private lands are keeping working ranches intact that provide important wetlands for growing sage-grouse broods. Removal of conifers that have invaded sagebrush-steppe is restoring sage-grouse habitat on private and public lands.

The Bi-State Executive Oversight Committee estimates it will cost about \$38 million more to fully implement the remaining priority actions identified in the action plan for California and Nevada. The U.S. Forest Service and NRCS will provide over 80 percent of that estimated need under the new agreement with a focus on high impactful projects.

The Sage-Grouse Initiative teams up with partners in 11 western states to achieve wildlife conservation through sustainable ranching. From 2010 to 2013, the initiative enrolled more than 950 ranches and conserved 6,000 square miles through NRCS investments of \$247 million that generated \$107 million in partners' matching funds for a total of \$354 million of on-the-ground sage grouse conservation.

Grazing on federal land under threat because of drought

by Julie Cart

June 15, 2014

There's not much anyone can tell Barry Sorensen about Idaho's Big Desert that he doesn't know. Sorensen, 72, and his brother have been running cattle in this sere landscape all their lives, and they've weathered every calamity man and nature have thrown at them — until this drought came along.

Sitting recently in a rustic cabin where he spends many months looking after his cattle, Sorensen's voice was tinged with defeat.

"To be honest with you," he said, "I think our way of life is pretty much going to be over in 10 years."

Years-long drought has pummeled millions of acres of federal rangeland in the West into dust, leaving a devastating swath from the Rockies to the Pacific.

Add to that climate change, invasive plants and wildfire seasons that are longer and more severe,

and conditions have reached a breaking point in many Western regions. The land can no longer support both livestock and wildlife.

"All these issues — it's changing the landscape of the West, dramatically," said Ken Wixom, who grazes 4,000 ewes and lambs on BLM land in the Snake River Plain. For public lands ranchers like him who depend on federal acreage to sustain their animals, the mood ranges from brooding to surrender.

The situation was spelled out in stark terms in two recent letters from the federal Bureau of Land Management. They told the ranchers what they already knew: Unless something changes, the days of business as usual on the 154 million acres of federal grazing land are over.

This drought-stressed range in Idaho can no longer sustain livestock, the letter warned. Better plan to reduce herd numbers by at least 30% for the spring turnout.

"I knew it was coming," said Sorensen, squinting as the afternoon sun poured through a window.

Sorensen's grazing allotment is so compromised that he was forced to make multiple adjustments. He waited 2 1/2 weeks longer than usual before turning out his cows and calves on BLM pastures, and then released only half his herd. The rest he kept on his ranch, feeding them hay from his own fields.

Conditions could easily grow worse.

Livestock shares the range with wildlife, including the greater sage grouse, a species dependent on sagebrush and native grasslands to survive. The grouse population has plummeted by 93% in the last 50 years, and its habitat has shrunk to one-quarter of its former 240,000-square-mile range.

If the federal government grants endangered species protection to the grouse sometime next year, ranching on federal land will be cut back even more, federal officials say. In some regions, public lands ranching might end altogether.

The problem for livestock and wildlife alike is that the drought has been merciless on all plants in the West. Last week 60% of the 11 Western states were experiencing some degree of serious drought. Climate change has altered weather patterns so much that vegetation in some regions is transforming from abundant sagebrush, grass and forbs to a new landscape of weeds and cheat grass — fast-burning fuels that propel wildfire and destroy rangeland.

In southern New Mexico, the transformation has gone one step further — from sagebrush to weeds to sand-blown desert — and biologists say the pattern is likely to be repeated across the West.

If that happens, the economics of cattle ranching will unravel.

Public lands grazing is a remnant of Washington's interest in settling the West by providing a financial leg up to covered-wagon pioneers and private interests alike. Ranchers pay a fee, far below market rate, for each mother cow and calf they turn out to graze on BLM acreage.

If public land is not available, ranchers could find private property to graze their animals, paying as much as 16 times more than on federal ground. They could reduce their herds, losing valuable genetics and other breeding characteristics and getting perhaps \$1,000 for a cow that would cost \$1,600 to replace.

Ranchers could bring the cattle to their own land and feed them with hay or alfalfa they grow or buy. None of that is consistent with the business model of a public lands rancher.

"You buy hay at \$200 a ton, so you feed one ton for each 100 head of cows," said Sorensen. "If you've got 200 head of cows, you are feeding \$400 to \$500 dollars' worth of hay a day."

Critics of ranching on federal land have little sympathy. They say the operations are highly subsidized by taxpayers and are secondary to the goal of preserving wildlife and native ecosystems.

If you've got 200 head of cows, you are feeding \$400 to \$500 dollars' worth of hay a day.

Grazing receipts in fiscal year 2013 were \$12.2 million, while the program cost the government \$48.2 million to operate. Fees are based on range conditions that existed in 1966, and the monthly charge of \$1.35 for a cow and calf hasn't significantly changed in 50 years. Sporadic attempts to raise fees have been fiercely and immediately quashed.

Ranchers argue that they are excellent stewards of the land and that they make improvements that benefit deer, birds and other wildlife as well as improve water quality.

"Without ranchers functioning, the landscape ceases to function," said rancher Shane Rosenkrance, 52, who grazes on 110,000 acres of BLM and state land in eastern Idaho.

Equally persuasive arguments are made by biologists and conservation groups. They say historic overgrazing caused wholesale changes to the landscape and fostered the damaging growth of cheat grass — which has fanned wildfires in the West.

And, they say, when ranchers allow cattle to trample streams and riverbeds, especially in a drought, crucial riparian areas can be destroyed.

The sage grouse is particularly vulnerable to sagebrush loss. Cattle grazing reduces forbs and grasses the birds use for protection and cover, leaving them exposed to predators.

Alarmed Western state governors, fearful that an endangered species listing could also mean the end of energy, mining and other commercial activities on federal land, are scrambling to protect the birds and their breeding grounds.

Kurt Wiedenmann, a BLM manager in Boise, said the drought and the sage grouse have federal and state agencies working together to find room for both grazing and the imperiled birds. Ranchers have already been hit hard by grazing cutbacks, Wiedenmann said, noting that many of them are small-scale, not corporate operations.

Leo Drozdoff, director of Nevada's Department of Conservation and Natural Resources, said federal land managers need to take stronger action to preserve sage grouse populations before they reach endangered levels.

"I don't think there's any doubt that overgrazing and some older grazing practices have not been helpful," Drozdoff said. "But this has been happening over decades, and for a variety of reasons. That should be an indication that the status quo isn't good enough."

Ranchers have responded by opposing efforts to list the grouse as endangered. This spring, Wixom, the sheep rancher, met with officials in Washington, D.C., to discuss the sage grouse. His advice to fellow ranchers is to stop complaining and start fighting.

"If you are in a fistfight, the last thing you want to do is start crying," Wixom said, leaning against the cab of his pickup. "If we come out here and say, 'We're doomed,' they are just going to hit you harder."

"If land management agencies truly take science into account, the Forest Service and the BLM will have to greatly reduce grazing in ways we haven't seen before," said Travis Bruner, the organization's executive director. "A lot of ranchers will probably see it as a game changer

."Some environmental groups, such as Idaho-based Western Watersheds Project, can't envision any science-based plan to preserve sage grouse habitat that would allow sheep and cattle grazing.

Sorensen does. "I think it's inevitable" that the sage grouse will eventually push cattle off the range, he said.

When that happens, it will trigger a cascade of ruinous changes to an ecosystem that has adapted to livestock, he said.

9/29/2014

DEPARTMENT OF THE INTERIOR Mail - Re: For Awareness - Los Angeles Times: Grazing on federal land under threat because of drought

"All of this ground is going to go to hell. There won't be any cattle to eat the grass. That grass will burn. Then there will be no sage grouse left."

INTERIOR ANNOUNCES NEW ADDITIONS TO NATIONAL WATER TRAILS SYSTEM. The [Tacoma \(WA\) News Tribune](#) (6/24, 338K) reports that Interior Secretary Sally Jewell and NPS Director Jonathan B. Jarvis on Tuesday named the Kitsap Peninsula Water Trails and the Black Canyon Water Trail in Nevada and Arizona into the National Water Trails system. Jarvis said, "These trails provide an opportunity for families to get outside and explore some of our nation's most beautiful waterways, and by highlighting them as part of the National Water Trails System, more visitors will have the opportunity to visit and add value to their local economies. The National Water Trails System highlights the best of our nation's water trails that encourage recreation and stewardship."

Also reporting on the story are the [Las Vegas Review-Journal](#) (6/25, 437K) and [KTNV-TV Las Vegas](#) (6/25, 19K).

WHITE HOUSE TO TURN SPOTLIGHT ON CLIMATE CHANGE. Politico (6/24, Restuccia, 637K) reports that the White House is "joining with greens and billionaire environmentalist Tom Steyer this week to turn a spotlight on the economic damage that will come from climate change." The article notes that "the events mark the one-year anniversary of President Barack Obama's high-profile climate change speech, in which he laid out a detailed plan for tackling greenhouse gas emissions." Of note, on Wednesday morning, Interior Secretary Sally Jewell and Energy Secretary Ernest Moniz will "participate in a question-and-answer session with members of LCV and its state chapters about the administration's climate change efforts."

Also providing coverage are the International Business Times (6/25, 697K) and the Daily Caller (6/25, Bastasch, 408K).

CONTINUING COVERAGE: OBAMA ADMINISTRATION HOLDS HEARINGS IN HAWAII. KITV-TV Honolulu (6/25, 13K) reports that "a second day of public hearings over Native Hawaii self-governance, once again had the federal government raising questions, but this time West Oahu residents raised their voices." According to the article, "residents of the Waianae Coast lashed out at the representatives from the Department of Interior and Justice over the injustice they feel." The residents "not only had comments over the wrongs they want made right, some had questions about the federal government being a part of the native Hawaiian government."

Additional coverage was provided by the Hawaii Reporter (6/25, 8K), the Hawaii Free Press (6/25), WSHM-TV Springfield, MA (6/25, 724), and WFSB-TV New Haven, CT (6/25, 150K).

AUDIT: CHILDREN IN NEED EDGED OUT IN HEAD START PROGRAM IN VIRGIN ISLANDS. The Washington Times (6/25, Howell, 455K) reports that "some of the neediest children in the US Virgin Islands are not being put at the top of the list to qualify for the territory's Head Start program, a new report said." The Interior Department internal watchdog "audited the Department of Health and Human Services and conducted a random sample of 100 children on the island." The audit "found that approximately 1 out of every 10 children received more priority selection points than they should have, 'potentially placing them in the Head Start program ahead of needier children on the program's waiting list because DHS retains waiting list priority rankings only for the current enrollment.'"

SECRETARY JEWELL READING BOOK ON WATER ISSUES IN WEST THIS SUMMER. The Puget Sound (WA) Business Journal (6/25, Subscription Publication, 70K) reports on "what some of the most influential people from the Puget Sound region are reading" this summer. Interior Secretary Sally Jewell said she was reading "Cadillac Desert : The American West and Its Disappearing Water, Revised Edition," by Marc Reisner. She commented, "Interesting perspective."

SUPREME COURT RULING HAMSTRINGS BIDS TO CURB MINE EMISSIONS. The E&E Daily (6/25) reports that "many coal mines won't be required to obtain Clean Air Act permits following yesterday's Supreme Court ruling on US EPA permitting for greenhouse gases under its 2010 tailoring rule." The Supreme Court held that the EPA "cannot use greenhouse-gas-emission thresholds to require the PSD permits."

REP. TIPTON OPPOSES SKI AREA WATER RIGHTS PROPOSAL. The E&E Daily (6/25) reports that Colorado Rep. Scott Tipton said "he's soundly against a new Forest Service policy designed to safeguard water for ski areas located on national forestlands." The Forest Service says "the proposal is supposed to address water rights held by the 122 ski areas that operate on about 180,000 acres of national forestlands under special-use permits." However, Tipton said "the proposal does not go far enough to protect private water users on federal land."

FEDERAL GOVERNMENT URGED TO EXPAND OCEAN OBSERVATION CAPABILITIES. For the "Congress Blog" of The Hill (6/25, Milutinović, 237K), Svetlana Milutinović, a postdoctoral researcher in ocean science at the University of Pennsylvania, writes that "recently, the problems of the ocean were in the spotlight at Capitol Hill Ocean Week." She notes that in her address to the CHOW audience, Interior Secretary Sally Jewell said that "the problems are complex, but can be made less complex if we all join forces in tackling them." Milutinović proposes that "to work toward a balance between human activity and ocean protection, we must continue and broaden our observational capabilities." She argues that "the federal government will have to make sure that these observational needs are met, both by supporting the relevant activities of agencies such as NOAA and NASA, and by partnering with other nations on pioneering efforts."

America's Great Outdoors:

National Park Service:

AGREEMENT KEEPS FOLKLIFE FESTIVAL ON THE MALL FOR NEXT FIVE YEARS. The Washington Post (6/25, Parker, 4.22M) reports that the NPS and the Smithsonian "entered into an agreement Wednesday that will keep the Smithsonian Folklife Festival on the Mall for the next five years." The Folklife Festival had "been in danger of losing its place on the Mall beginning next year because of tighter restrictions on Mall use for festivals." But "the announcement, expected during the festival's opening ceremony Wednesday, allays those concerns." NPS spokeswoman Carol Johnson said, "Absolutely, without a doubt, we want it there. This is a partnership. We've been partners with them for more than 40 years, and we had always planned to allow the festival to remain on the Mall. It's an historically important celebration, and we've always recognized that. It was just a matter of working out the details to make sure their event was able to go forward and the cultural and natural resources of the Mall were also protected."

VIRGINIA POWER LINE PLAN UPSETS PRESERVATIONISTS. The E&E Daily (6/25) reports that "historic preservationists, citizens groups and others are speaking out against plans for 8 miles of power infrastructure they say would blight the horizon of Virginia's Jamestown Island." Dominion Virginia Power's plan "calls for 17 transmission towers – up to 295 feet tall – spanning 4 miles of the James River." However, "state regulators and the utility who say the project is necessary are butting heads with those who point to the area's rich Colonial-era history, from Jamestown to Colonial Williamsburg to Yorktown."

ZERO FIGHTER PART RETURNED TO HAWAII. The AP (6/25) reports that "a metal plate with the serial number of a Japanese Zero fighter that crashed during the 1941 bombing of Pearl Harbor has returned to Hawaii." Honolulu attorney Damon Senaha purchased "the plate for \$12,225 to donate to the National Park Service and the museum at the USS Arizona Memorial." Park officials "called the serial number significant and very rare." Scott Pawlowski, chief of cultural and natural resources for the park service, said, "I think that's the coolest piece of airplane wreckage I've seen that we have, and I would love to have it publicly displayed."

Coverage by the AP was also picked up by the Washington Post (6/25, 4.22M), the Sacramento (CA) Bee (6/24, 687K), ABC News (6/25, 3.58M), and Newsday (6/25, 1.5M).

LANDOWNER CLOSES OFF HIKING ACCESS TO MEDICINE HOLE. The AP (6/25) reports that "a landowner is closing off public hiking access to Medicine Hole in the Killdeer Mountains." Brian Benz has "put up barbed wire and 'no trespassing' signs around his property." Benz is "upset that the National Park Service commissioned a North Dakota State University historian to study the 1864 Killdeer Mountain Battle site without first consulting landowners."

GEORGE LUCAS PICKS CHICAGO FOR MUSEUM SITE. The Sacramento (CA) Bee (6/24, 687K) reports that George Lucas has "selected Chicago over Los Angeles and San Francisco as the future home of his collection of art and movie memorabilia, according to a spokeswoman for the museum." The article notes that "the decision to select Chicago reflects both a bungling of the billionaire's legacy project by the board of a national park in San Francisco as well as an aggressive lobbying effort by Mayor Rahm Emanuel."

HOT SPRINGS HOSPITAL NAMED AN ENDANGERED HISTORIC PLACE. The AP (6/25, Lammers) reports that the National Trust for Historic Preservation on Tuesday "named a century-old hospital for war veterans in Hot Springs as one of America's 11 most endangered historic places." The Battle Mountain Sanitarium is "one of only 2,500 national historic landmarks in the country," according to David J. Brown, the trust's executive vice president and chief preservation officer. Brown said, "If you look at the building today, it's beautiful. It's been well kept, well maintained. But it's the plan that the VA has put forward to abandon the facility that really is the threat."

BODY ON MOUNT RAINIER CONFIRMED TO BE FAMOUS WRITER. The E&E Daily (6/25) reports that officials confirmed on Monday that "a body found in an alpine region of Mount Rainier National Park was the well-known Seattle hiker and outdoors writer missing since last week." According to the Pierce County, Wash., medical examiner's office, "70-year-old Karen Sykes died of hypothermia, but officials were uncertain about other circumstances surrounding her death."

Also reporting on the story is the [Los Angeles Times](#) (6/25, Pearce, 3.46M).

REMAINS ON MOUNT WHITNEY ARE THOSE OF HIKER. The [AP](#) (6/25) reports that “remains found on California’s Mount Whitney are those of a missing hiker from New Jersey,” according to authorities. Inyo County coroner’s officials said Monday that “60-year-old John Likely died from ‘multiple traumatic injuries’ after he fell about 50 feet into a steep chute.” Likely’s body was discovered “Friday near Mirror Lake at an elevation of about 11,450 feet.”

MAN DIES AFTER OUTER BANKS SAND HOLE COLLAPSES. The [AP](#) (6/25) reports that “a 49-year-old Virginia man vacationing on the Outer Banks has died after he was buried in 6 feet of sand while digging a tunnel to connect two large holes,” according to authorities. NPS spokeswoman Cyndy Holda said “family members and others on the beach tried to dig out David Frasier of Fredericksburg, Virginia, but he was buried too deep.” Holda said “rescuers were able to free Frasier at the beach south of Salvo about 15 minutes later, but he was already dead.”

NPS’ BAN ON DRONES IN ALASKA PARKS CRITICIZED. For the [Alaska Dispatch](#) (6/24, 7K), Craig Medred criticizes the NPS for “saving Alaska’s nearly non-existent park visitors from the scourge of wholly non-existent drones.” Medred concedes that “a ban on drones in Yosemite makes sense,” but “an Alaska-wide ban on drones is a knee-jerk reaction to a problem that doesn’t exist.”

Bureau of Land Management:

BLM DIRECTOR KORNZE TO TOUT SAGE GROUSE EFFORT IN WYOMING. The [AP](#) (6/25, Gruver) reports that BLM Director Neil Kornze will meet with Wyoming Gov. Matt Mead will meet Thursday “about efforts to conserve habitat for the greater sage grouse ahead of a decision on whether to grant federal protection to the ground-dwelling birds.” The meeting comes “as the agency’s state director signs a new resource management plan for the Lander area, which includes protections for millions of acres of bird habitat in Fremont County.” The article notes that “the Lander-area management plan encompasses 3.5 million acres, 2.2 million of which the BLM has identified as core habitat for the greater sage grouse.”

Coverage by the AP was also picked up by the [Columbus \(IN\) Republic](#) (6/25, 81K), the [Casper \(WY\) Star-Tribune](#) (6/25, 90K), the [Sacramento \(CA\) Bee](#) (6/24, 687K), and the [State College \(PA\) Centre Daily Times](#) (6/24, 98K). Also reporting on the story is the [County 10](#) (6/24).

BLM APPROVES PLAN TO GATHER WILD HORSES IN UTAH. The [E&E Daily](#) (6/25) reports that the BLM has “announced a decision to remove around 140 wild horses from southwestern Utah despite outcry from mustang advocacy groups.” BLM’s Cedar City Field Office “signed the decision allowing for the July roundup in the Blawn Wash Herd Management area, part of the state’s Bible Spring Complex.” The article notes that “the number of wild horses in the area is estimated at 755, but BLM wants to bring that number down to 100.”

Additional coverage was provided by [Reuters](#) (6/25, Dobner).

BLM TRIES TO REPAIR DAMAGE FROM POT FARM. The [E&E Daily](#) (6/25) reports that BLM officials “broke up a 2,000-plant marijuana operation in Nevada last year, but the cleanup was still ongoing last week.” The article notes that “four volunteers spent 12 hours gathering more than 700 pounds of trash left behind by drug traffickers.” Blaine Potts, outdoor recreation planner in BLM’s office in Wells, Nevada, said, “We’re cleaning up the site to prevent future use for illegal activities, restore ecological habitat and return it to a more natural state so wildlife can use this great grove for its intended purpose.”

Fish and Wildlife Service:

MINING GROUP WANTS FWS TO RECONSIDER GREATER SAGE GROUSE STATUS. The [E&E Daily](#) (6/25) reports that “a national mining group says a recent academic study casts doubt on the science used by the Fish and Wildlife Service to determine that the greater sage grouse warrants federal protection, and the group is asking the service to re-evaluate whether the bird is truly in great peril.” The American Exploration & Mining

Association "sent a three-page letter late yesterday to FWS Director Dan Ashe requesting that he direct the service to revisit the 2010 decision to name the greater sage grouse as a candidate species for federal protection under the Endangered Species Act." The article notes that "at issue is the 11-page study being published in *The Open Ornithology Journal*, that used data in existing genetic research and other population studies and found that sage grouse do not appear to be suffering the genetic degradation or inbreeding that would be expected in a species struggling with dwindling habitat and population numbers."

COALITION URGES CONGRESS TO FUND WILDLIFE REFUGES. The *E&E Daily* (6/25) reports that "Congress must provide at least \$476 million for the nation's wildlife refuges in fiscal 2015 if it hopes to preserve visitor services, wildlife habitats, and access for hunters and anglers, according to a new report released today by a diverse coalition of sportsmen and conservation groups." The report by the Cooperative Alliance for Refuge Enhancement (CARE) says that "even though that funding level still represents a 'major cut' in real dollars compared with just a few years ago, it would match President Obama's budget request and mark a 'reasonable step' toward bolstering the National Wildlife Refuge System." The report said, "To reduce costs, refuges have had to cut numerous staff positions and sacrifice vital habitat management, visitor services and maintenance activities. As a result, the public is showing up at a number of refuges around the country to find that their hours have been scaled back, recreational programs and events have been canceled or delayed, visitor facilities are in disrepair, landscapes are succumbing to invasive species, and wetlands where waterfowl can usually be observed or hunted are dry."

WILDLIFE ADVOCATES WANT ORDER TO SPEED UP CANADA LYNX RECOVERY PLAN. The *AP* (6/25, Brown) reports that "wildlife advocates want a federal judge to order faster action on a recovery plan for imperiled Canada lynx, after wildlife officials said it could take until 2018 to finish the long-delayed work." A coalition of wildlife advocacy groups is asking US District Judge Donald Molloy to order the work completed by late 2016. FWS Assistant Regional Director Michael Thabault said Tuesday that "the government's recovery plan schedule was reasonable." Thabault "cited limited agency resources and the complexity of addressing a species with such a broad range."

Coverage by the AP was also picked up by the *Washington Post* (6/25, 4.22M), the *Denver Post* (6/25, 940K), the *Burlington (VT) Free Press* (6/24, 116K), the *Sacramento (CA) Bee* (6/24, 687K), the *US News & World Report* (6/24, 645K), and *ABC News* (6/25, 3.58M).

FWS DELAYS DECISION TO PLACE NORTHERN LONG-EARED BAT ON ENDANGERED LIST. The *Arkansas News* (6/25, 1K) reports that the FWS on Tuesday "delayed for six months making a final call on whether to place the northern long-eared bat on the endangered species list." The service had "proposed last October to put the bat on the list but now wants to gather more information about the species' population and white-nose syndrome." As part of its review, the agency "plans to reopen public comment for 60 days for additional input from states, tribes, federal agencies and others about the status of the northern long-eared bat and the impacts of white-nose syndrome on the species."

KTVE-TV El Dorado, AR (6/25, 1K) reports that Congressmen Rick Crawford (AR-1), Tim Griffin, Steve Womack, and Tom Cotton lauded the decision. In a statement, they said, "We're pleased the US Fish and Wildlife Service listened to our concerns and granted our request for a six month extension of the comment period. An endangered species classification of the northern-long eared bat could have a devastating impact on several of Arkansas's most important industries, and we must be sure to resolve all questions surrounding the designation. In the coming months, we will continue to work with the US Fish and Wildlife Service to monitor this matter."

FEDERAL AGENCIES RAISE SEVERAL ISSUES ABOUT PROPOSED RESERVOIR IN INDIANA. The *AP* (6/25) reports that "two federal agencies are raising questions about a proposed \$400 million central Indiana reservoir, including the plan's failure to address alternatives to damming the White River." The FWS and the EPA said "several issues must be addressed before the Mounds Lake Reservoir project can move forward." Scott Pruitt, a field supervisor with the FWS, wrote that "the reservoir could pose a threat to the habitat for the federally endangered Indiana bat and the northern long-eared bat and potential bald eagle nesting sites."

GROUPS SEEK TO PROTECT TONGASS CEDARS. The *Anchorage (AK) Daily News* (6/24, 251K) reports that "yellow cedars, slow-growing trees that are withering and dying in the temperate rainforest of Southeast Alaska and British Columbia, should get Endangered Species Act protections," according to "a petition submitted

Tuesday by an three environmental organizations and a tour company operating in Southeast." The petition, submitted to the FWS, "seeks to make the yellow cedar the first Alaska tree and the second Alaska plant to gain a listing under the Endangered Species Act." The petition argues that yellow cedars deserve "protections because of their vulnerability to climate change and logging."

US Geological Survey:

SCIENTISTS: CHESAPEAKE'S DEAD ZONE LIKELY TO GROW, GULF'S TO HOLD STEADY. The E&E Daily (6/25) reports that scientists on Tuesday "predicted that the Gulf of Mexico's 'dead zone' will stick to its average size this year, while the Chesapeake Bay will suffer from one slightly larger than usual." The National Oceanic and Atmospheric Administration "released the predictions, which came out of two projects funded through the agency."

Also covering the story are USA Today (6/24, 5.82M) and the New Orleans Times-Picayune (6/25, 678K).

Securing America's Energy Future:

Renewable Energy:

OFFICIALS HOLD MEETING IN MASSACHUSETTS ON OFFSHORE WIND LEASING. The Vineyard (MA) Gazette (6/24, 30K) reports that "as commercial offshore wind development moves closer to the Vineyard, leading state energy officials appeared on the Island early this week to provide a progress report." Last week Gov. Deval Patrick announced that "742,000 acres of ocean south of Martha's Vineyard will soon be available for commercial wind energy leases." On Monday night, "a small crowd gathered at the Katharine Cornell Theatre in Vineyard Haven to hear representatives from the Massachusetts Clean Energy Center (MassCEC), Bureau of Ocean Energy Management (BOEM), and Office of Coastal Zone Management (CZM) speak about the project."

Also providing coverage is the New Bedford (MA) Standard-Times (6/25, 54K).

PROPOSED HYDROELECTRIC PLANT NEAR JOSHUA TREE NATIONAL PARK OPPOSED. In an editorial, the Palm Springs (CA) Desert Sun (6/24, 111K) says it was "surprised and disappointed to see the Federal Energy Regulatory Commission grant a license last week to Eagle Crest Energy Co., which wants to build a \$1.5 billion pump storage hydroelectric plant at the old Eagle Mountain iron ore mine near Joshua Tree National Park." The paper notes that "concerns include the water needed to fill and maintain the reservoirs." The paper argues that "Eagle Mountain should become a part of the national park, and the town of Eagle Mountain, which once had 4,000 inhabitants, could become a ghost town to attract more tourists."

Onshore Energy Development:

FOSSIL FUEL PRODUCTION ON FEDERAL LANDS DECLINES UNDER OBAMA. The Daily Caller (6/25, Bastasch, 408K) reports that Republicans have used data from the Energy Information Administration showing fossil fuel energy production on federal lands has decreased for the third year in a row to criticize President's Obama's energy policies. According to Washington Rep. Doc Hastings, the report is evidence that the Obama Administration is "restricting American energy production wherever and whenever possible." The article, however, points out that the US continues to increase overall oil production on state and private lands, likely due to the geography of shale formations and policies that make drilling easier on state and private lands versus federal lands.

INTERSTATE NATURAL GAS ASSOCIATION OF AMERICA SUPPORTS STREAMLINED PROCESS FOR CROSSING NATIONAL PARKS. The SNL Financial (6/25, 21K) reports that the Interstate Natural Gas Association of America is "supporting a federal bill to speed up the permitting process for pipelines built across parks and other lands administered by the National Park Service." At a June 20 hearing of the House Natural Resources Subcommittee on Energy and Mineral Resources, association President and CEO Donald Santa said, "Given the need to expand our natural gas infrastructure to keep pace with demand growth, we need to ensure that permitting questions are handled in an efficient and effective manner." However, Nick Lund, landscape

conservation campaign manager for the National Parks Conservation Association, "objected to making it easier to put pipelines through national parks."

BLM APPROVES FRAM EXPLORATION'S WHITEWATER MASTER DEVELOPMENT PLAN. KJCT-TV Grand Junction, CO (6/25, 2K) reports that the Fram Exploration's Whitewater Master Development Plan has been approved by the BLM "after much opposition in regards to the route that would lead to proposed construction site." According to the article, "108 new wells and 12 well pads will be built on BLM lands in Mesa County." Chris Joyner of the BLM said, "We don't see a lot of oil activity here in the valley and so this is going to bring a very unique and very important economic boost to the area."

Offshore Energy Development:

PLAN UNVEILED TO REPLACE COMPONENTS OF POPULAR FISHING SPOT. The Thibodaux (LA) Daily Comet (6/23, 43K) reports that "a popular fishing hot spot known as The Pickets, which had been threatened by required demolition, will now be around for future anglers fishing off southern Terrebonne Parish." Last week, "a team made up of state officials, energy producers and conservationists unveiled a \$1.2 million plan to replace the habitat that was enhanced by underwater pilings and jackets at Ship Shoal 26." The plan is "to replace the underwater components of the platform with three artificial reefs made up of 15,000 tons of concrete rip-rap, or large broken pieces."

Also providing coverage is WWL-TV New Orleans (6/25, 107K).

LOUISIANA OYSTER MARKET STRUGGLES AFTER SEVERAL HURRICANES, DEEPWATER HORIZON SPILL. The AP (6/24, Plaisance) reports that oyster dealers in the New Orleans area have "resorted to importing" some of the shellfish this year as demand rises while harvests in the northern Gulf of Mexico continue to wane. P&J Oyster Company co-owner Al Sunseri said prior to the BP Deepwater Horizon spill in 2010 his company shucked about 25,000 oysters each day. However, some days they don't shuck any oysters now, and good days see yields of just "a few thousand" oysters. Sunseri "blames the depleted harvest on the BP oil spill, but some dealers said they were seeing the harvest suffer years before that" due to increased demand and "a string of hurricanes."

Tackling America's Water Challenges:

BOR TO INCREASE FLOWS ON SOUTH FORK BOISE RIVER. The Idaho Statesman (6/23, 222K) reports that the BOR will "increase flows from Anderson Ranch Dam on the South Fork of the Boise River June 25 from 600 cubic-feet-per-second to approximately 1,600 cfs." Brian Sauer, Water Operations Manager, said, "South Fork flows are expected to remain at these levels into August, which will also benefit river rafters and kayakers. These are typical summertime flows, starting a little later than some years due to last year's drought."

Empowering Native American Communities:

EDUCATION DEPARTMENT RELEASES NEW RULES FOR STATE SPECIAL EDUCATION PROGRAMS. The Education Department's announcement of changes to its monitoring of state special education programs generated significant coverage today in major national media outlets and in lower-tier outlets focused on individual states. The New York Times (6/25, Rich, Subscription Publication, 9.65M) reports that under the new system in how the department "evaluates how well public schools educate students with disabilities," over two thirds of US states and territories are out of compliance with IDEA. The Times notes that that six states and territories — California, Delaware, Texas, the District of Columbia, the Bureau of Indian Education and the Virgin Islands — were designated as needing intervention by the Education Department.

The Washington Post (6/25, Layton, 4.22M) reports that the Education Department is "tightening its oversight of the way states educate special-needs students." The AP (6/24, Hefling) reports that the Education Department "called the change a 'major shift' in the way it assesses special education programs," noting that the Education Department said that the estimated 6.5 special-needs students in the US "have lower graduation rates overall and don't do as well on average in reading and math as their peers."

Other media outlets covering this story include the Huffington Post (6/25, Resmovits, 11.54M), NPR (6/25, Sanchez, 519K) in its "NprEd" blog, Disability Scoop (6/24), Bloomberg News (6/25, Lorin, 2.76M), and the Wall Street Journal (6/25, Porter, Subscription Publication, 5.51M).

HOUSE COMMITTEE HOLDS HEARING ON CHILD ABUSE AT SPIRIT LAKE. . PBS (6/25, 1.22M) reports that "a congressional committee has begun investigating why child abuse and neglect persists on North Dakota's Spirit Lake reservation, almost two years after the federal government stepped in to address the problem." At a hearing on Tuesday, tribal leaders and officials from the BIA and the Department of Health and Human Services are "expected to be asked about ongoing allegations of abuse and neglect on the reservation, and the lack of visible progress in correcting the problems."

The AP (6/25, Jackson) reports that "the chairman of the Spirit Lake Indian Tribe said Tuesday that his reservation in northeastern North Dakota still has difficulty handling child protection issues and finding resources." Leander R. McDonald said the Spirit Lake Indian Reservation is "trying to change its culture and improve the way it handles justice and child care issues." However, he said "tribal officials have struggled to fill key social worker positions and have found limited help from the federal government."

Also covering the story are NPR (6/25, 519K) and the Bismarck (ND) Tribune (6/25, 64K).

ADDITIONAL COVERAGE OF Paskenta Band Of Nomlaki Indians' Dispute. Additional coverage of the Paskenta Band of Nomlaki Indians' intra-tribal dispute was provided by the Washington Post (6/25, Phillip, 4.22M).

Top National News:

KERRY STRESSES NEED FOR IRAQ TO FORM A UNITY GOVERNMENT. While the crisis in Iraq continues to receive significant media coverage, only one network led with the story Tuesday evening. After talks in Irbil Tuesday with Kurdish leaders, Secretary of State Kerry conducted a series of interviews, which were featured prominently on last night's broadcasts. On NBC Nightly News (6/24, lead story, 3:10, Williams, 7.86M), Richard Engel noted that Secretary Kerry was in Iraq on "an emergency mission to try to hold this country together," but it "is increasingly breaking into three distinct pieces."

The CBS Evening News (6/24, story 2, 2:25, Pelley, 5.08M) reported during his visit to Irbil, Kerry urged Kurdish leader Massoud Barzani "to join a new inclusive government, but Barzani told him there is a 'new reality' in Iraq, one he has said cannot include the current Prime Minister Nouri al-Maliki." Kerry was shown saying: "There's a great dissatisfaction here in Iraq with the current government and I ran into a universal sense of a commitment, a desire by Iraqis to make up for the mistakes that have been made in the past. Now what that means in terms of personalities or individuals who might fill one role or another, I can't tell you. That's up to Iraqis."

Barzani, the AP (6/25, Jakes, Hendawi) reports, "warned" Kerry that ISIL's rapid advance has "already created 'a new reality and a new Iraq,' signaling that the US faces major difficulties in its efforts to promote unity." The AP says his remarks about a "new reality and a new Iraq" referred "to the Kurds now controlling Kirkuk and other areas in northern Iraq that they have long sought to incorporate into their region."

Kerry, the Washington Post (6/25, Gearan, 4.22M) reports, "urged Kurdish leaders Tuesday to remain part of Iraq," but the Wall Street Journal (6/25, Solomon, Bradley, Subscription Publication, 5.51M) reports that US officials traveling with the Secretary acknowledged that the Kurds may not be willing to return control of Kirkuk to Baghdad, even if they don't seek formal independence.

The New York Times (6/25, Gordon, Chivers, Subscription Publication, 9.65M) reports Barzani "said...Kerry was confronting an enormous challenge in seeking a multisectarian national government." But the Times says the US "goal" during Kerry's trip "has been to insist that the Kurds put aside any thoughts of actual or de facto independence and play an active role in forming a new government" in Baghdad.

Bloomberg News (6/25, Gaouette, Ajrash, Fam, 2.76M) reports Kerry told CNN in an interview after their meeting that Barzani "made it clear that he wants to participate in the process, that he wants to help choose the next

government" of Iraq. But Kerry "didn't say whether Barzani disavowed Kurdish aspirations for independence."

In an interview with CNN's Situation Room (6/24, 554K), Kerry was asked if he has seen any evidence that Iraqi leaders are willing to make compromises. Kerry said, "Words are cheap. ... I'm not taking anything I hear to the bank and saying, 'Wow, it's going to be solved.' But I'm hearing things that indicate to me that if they follow through on the things they're saying, there is a capacity to have a new government that could be a unity government." Asked if the 12-day "delay" since the President said the US was considering options for a response has strengthened ISIL, Kerry said, "I think the real question...is not sort of what happened in these days. The question is, what can happen going forward to have a strategy that's really going to work."

Hamish MacDonald reported on ABC World News (6/24, story 3, 1:35, Sawyer) that Kerry told ABC that "America will no longer fight Iraq's war." Kerry was shown saying: "So you have to look to Iraq, to its government, to its military, to be able to make the decisive difference here."

In an interview with the CBS Evening News (6/24, story 2, 2:25, Pelley, 5.08M), Kerry was asked if the US is "willing to strike at safe havens in Syria and in Iraq." Kerry said, "The President is going to make the judgment based on what Iraqis themselves determine they're prepared to do, and based on the security threat that is defined over the course of these next days. It would be a complete and total act of irresponsibility for the President just to order a few strikes but there's no government, there's no backup, there's no military, there's nothing there that provides the capacity for success."

In an interview with NBC Nightly News (6/24, story 2, 1:10, Williams, 7.86M), Kerry was asked about statements from opposition leaders that "they don't want American intervention." Kerry said, "That's not intervention. What we're trying to do is help the – and I understand what they don't want, and President Obama and the American people don't want that either, but we are not here in combat role. We are not here to fight. The President has no intention, none whatsoever, of returning American combat troops to Iraq, to go back to where we were. That's not in the cards."

In an interview with Fox News' Special Report (6/24, 2.15M), Kerry was asked whether the US should have had a "better grasp" of the fighting capability of the Iraqi armed forces, Kerry said, "Until the fight is engaged, no. You don't know the answer to that." Asked if there was an intelligence failure, Kerry said, "If somebody could have found out that leaders were going to literally betray and cave-in and desert that would have been terrific." Asked what he and the President did to prevent Mosul from falling after the falls of Ramadi and Fallujah in January, Kerry said, "In the end, the Iraqis are responsible for their defense and nobody expected wholesale desertion and wholesale betrayal in a sense by some leaders who literally either signed up with the guys who came in or walked away from their posts and put on their civilian clothes. No. Nobody expected that."

Kerry In Brussels For Talks With NATO On Ukraine, Iraq. AFP (6/25, Biddle) reports Kerry "huddled with European allies" in Brussels ahead of NATO talks Wednesday. Shortly after arriving from Iraq, Kerry met late Tuesday with EU foreign policy chief Catherine Ashton, "as well as other European partners and 'discussed the grave security situation in Iraq.'" They also talked about "efforts to de-escalate tensions in Ukraine and efforts to support the political process in Libya," State Department spokeswoman Jen Psaki said. While in Brussels, Kerry will also have "his first bilateral meeting" with new Ukrainian Foreign Minister Pavlo Klimkin before traveling to Paris on Thursday for talks with Gulf allies on the situation in Iraq and Syria.

MEMBERS OF CONGRESS BLAME ADMINISTRATION FOR "HUGE SPIKE" IN ILLEGAL IMMIGRATION.

Despite DHS Secretary Johnson's appearance before the House Homeland Security Committee on Tuesday, just one network newscasts covered the ongoing crisis at the US border with Mexico as Federal officials deal with a surge of unaccompanied minors from Central America who are entering the US illegally. On NBC Nightly News (6/24, story 7, 2:00, Williams, 7.86M), Brian Williams drew attention to the "huge spike in unaccompanied children making their way into this country illegally." Stephanie Gosk went on to report that members of Congress "want...to know what is being done." Rep. Michael McCaul, chairman of the House Homeland Security Committee, was shown saying, "The tragic fact is, these children are making a dangerous journey, based on misinformation." Gosk noted that "under current immigration law, adults are detained and deported," but "unaccompanied minors" are "passed on to Health and Human Services," and they "they stay for months or even years" in the US illegally.

McClatchy (6/25, Gillespie, Subscription Publication, 23K) reports that at a House Homeland Security Committee hearing on Tuesday, Secretary Johnson "defended his department's handling" of the wave of illegal immigration in to the US "even as officials predict the surge will continue into next year." According to McClatchy, Johnson "outlined...a series of measures...from working to dismantle smuggling operations to launching a public relations campaign in Central America urging parents not to send their children north." Johnson is quoted as saying, "I believe we will stem this tide." However, McClatchy says Chairman McCaul "lambasted" President Obama's "immigration policies and blamed the administration for what both parties describe as a humanitarian crisis."

The Hill (6/25, Goad, 237K) reported that McCaul said on Tuesday that the President "needs to immediately send the National Guard to the southwest border to deal with this crisis," and "other members of the panel echoed the appeal, suggesting the border patrol is ill equipped to handle the wave without reinforcements." According to The Hill, House Republicans "argued that the administration's lenient immigration policies have served as a magnet for illegal immigrants." Rep. Candice Miller (R-MI) is quoted as saying, "I think this humanitarian crisis can be laid directly at the feet of President Obama."

According to the AP (6/25, Caldwell), Johnson said he "won't rule out using National Guard troops" to secure the US border with Mexico, "as several lawmakers have suggested," but the White House "indicated later in the day it wasn't interested in the proposal to deploy troops." The AP goes on to report that the Administration "has refused to say how many" illegal immigrants it is releasing into the US instead of immediately deporting. White House press secretary Josh Earnest is quoted as saying, "Without knowing what that number is and without having seen it, I think we can all stipulate that that number is too high."

The Washington Times (6/25, Wolfgang, 455K) reports that Earnest also said on Tuesday that "if we really wanted to solve this problem, one good way to do it is for those Republicans to get on board...and support common sense immigration reform."

The Arizona Republic (6/25, Ortega, Kelly, 1.45M) notes that in April 2013, Johnson's predecessor, Janet Napolitano, "told Congress that the border was more secure than it had ever been." According to the Republic, "Analysts now point to the news in early June of thousands of teens and children from Central America surging across the border," and make the case that "if we can't stop 12-year-olds, Napolitano was wrong." The Republic goes on to report that border agents point out that many illegal immigrants no longer attempt to evade capture, and instead "wait to be caught or even actively flag agents down to apprehend them" because they are under the impression that it is Administration policy not to deport them.

AFP (6/25) notes that on Tuesday, Rep. Paul Broun (R-GA) alleged that the Administration is "inviting immigrant aliens to come to this country."

White House's Munoz: "Vast Majority" Of Children Illegally In The US Will Be Deported. According to McClatchy (6/25, Johnson, Subscription Publication, 23K), "newspapers, radio and television stations and websites in Central America and Mexico have aired US warnings to parents that their children would be deported if they make their way past the Rio Grande into Texas." McClatchy also notes that on Monday, Cecilia Munoz, director of the White House Domestic Policy Council, "said in a conference call...that 'the vast majority of these cases probably will result in return to their countries' of origin, although children with a compelling argument to remain in the United States would be allowed to do so." McClatchy adds that DHS official Esther Olavarria also "said the children allowed to remain would be few in number."

Flake: Due To Border Crisis, Immigration Reform Is Even Less Likely This Year. USA Today (6/24, Page, 5.82M) reports that Sen. Jeff Flake, one of the authors of the comprehensive immigration bill approved by the Senate last year, "puts the odds of enacting significant immigration legislation this year at 'close to zero,' its prospects further undermined by the flood of unaccompanied minors from Central America streaming over the southern border." According to USA Today, Flake is "urg[ing] President Obama to go before cameras to address families in Honduras, Guatemala and elsewhere who believe their children might be able to gain legal status in the USA." Flake is quoted as saying, "It would be helpful, I believe, if the president himself were to stand and say, 'If you come here, you will not be afforded any legal status; you will likely be deported.'"

Mexican Drug Gangs Benefiting From Surge In Illegal Immigration. The Washington Times (6/25, Dinan,

455K) reports that according to Brandon Judd, president of the National Border Patrol Council, "smuggling cartels are using the surge of illegal immigrant children as a smoke screen to distract the Border Patrol, leaving gaps in security that the gangs then use to slip more drugs or known criminals into the country." The Times notes that Judd says "nearly 40 percent of Border Patrol manpower has been shifted to manage the children, leaving the cartels with a free hand to conduct their other criminal activities."

Miller: US Should Cut Aid To Mexico Until It Respects The US Border. AFP (6/25) reports that on Tuesday, members of Congress argued that the US "ought to cut foreign aid to nations that facilitate smuggling." Rep. Candice Miller (R-MI) is quoted as saying the Mexican government is "behaving so badly and so dishonorably that they are complicit in human smuggling." Miller added, "I would say, no more money from America until they step up to their own responsibilities, and stop their citizens illegally migrating to the US."

Reuters (6/25, Zengerle) quotes Miler as saying, "We need to whack them, our neighbors, to understand that they are just not going to keep taking our money and we are just going to be sitting here like this – we're not the ATM machine."

USA Today: Increased Deportations Would Cut Flow Of Children From Central America. USA Today (6/24, 5.82M), in an editorial, notes that "in the past nine months, enough unaccompanied children to fill Yankee Stadium have shown up at the US border," and, according to USA Today, "this influx...represents both a humanitarian crisis and a vexing public policy problem." USA Today says those minor illegal immigrants "who can demonstrate that they face real danger if returned home" should "be allowed to stay," but "those who can't would be deported." USA Today adds, "Once some of the children began reappearing in their home countries, families would rethink their willingness to spend great sums, and to put their children at such risk."

In an accompanying op-ed for USA Today (6/24, Seitz, 5.82M), Bishop Mark Seitz of El Paso counsels against deporting children in the US illegally, and says those "elected officials" who "blame lax enforcement policies or lenient laws for" the recent surge in illegal immigration have a "misunderstanding of the reality facing these children."

ARCHIVIST SAYS IRS "DID NOT FOLLOW THE LAW" WHEN EMAILS WERE LOST. David Ferriero, chief archivist at the National Archives, on Tuesday told the House Oversight Committee that the IRS did not follow the law when it failed to report the hard drive crash that result in the destruction of Lois Lerner's emails. One network news broadcast covered the hearing, which also included testimony from a White House attorney.

The CBS Evening News (6/24, story 5, 2:20, Cordes, 5.08M) reported that noted that the "fiery" hearing was House Republicans' "third...in five days" on the issue. CBS (Cordes) added that Ferriero "testified that the IRS and other agencies use outdated technology and poor backup systems." Ferriero: "The Federal records act today says print and save. This is 2014 and we're printing and saving? This is embarrassing."

The Washington Times (6/25, Howell, 455K) reports that the panel "relied on top government archivists Tuesday to state their case that the IRS violated the Federal Records Act by not reporting" that Lerner's emails were lost. Ferriero said, "They are required, any agency is required, to notify us when they realize they have a problem that could be destruction or disposal, unauthorized disposal." After "being pressed by GOP lawmakers," he added, "They did not follow the law."

Reuters (6/25, Drawbaugh) reports Ferriero criticized the IRS over the lost emails, saying the agency failed to inform the National Archives and Records Administration (NARA) when it was discovered that the emails were lost, as required by law.

The New York Times (6/24, Joachim, Subscription Publication, 9.65M) reports that Ferriero appeared before the committee voluntarily "to address whether the I.R.S. followed proper record-keeping procedures." He concluded that "the agency had not in the instance of the crashed hard drive." However, he "would not say that anyone at the I.R.S. committed a crime, only that the agency 'did not follow the law.'"

The AP (6/25, Sullivan) also notes that Ferriero "would not state that the IRS broke the law," saying "only say that the agency didn't 'follow' the law, referring to the Federal Records Act."

O'Connor Says She Had No Prior Knowledge Of Missing Emails. The committee also heard from Jennifer O'Connor, a White House attorney who worked at the IRS. The CBS Evening News (6/24, story 5, 2:20, Cordes, 5.08M) noted that the "fiery" hearing was House Republicans' "third...in five days" on the issue. CBS (Cordes) added that Republicans "trained their ire on...O'Connor."

The Wall Street Journal (6/25, Mckinnon, Subscription Publication, 5.51M) reports that while Republican suggested O'Connor was involved in a document collection process at the agency that did to finding the Lerner emails, she provided little information on their loss.

Politico (6/25, Bade, 637K) reported that O'Connor testified that "she had no prior knowledge that Lerner's emails were lost in a 2011 computer crash because she was not at the agency when the crash was discovered earlier this year." After Issa "called her a 'hostile witness,'" O'Connor said, "I did not know that her emails were missing and unrecoverable or that her computer crashed." Later, Issa corrected the record, "saying he meant to call her a 'noncooperative witness' because it required a subpoena to get her to appear before the committee."

The Washington Post (6/25, Hicks, 4.22M) reports that this week's hearings have "heightened Republican frustration" over the missing e-mails, as IRS Commissioner Koskinen on Monday "denied tipping off the White House about the lost records," and on Tuesday, O'Connor said that "she left the agency before it discovered the problem."

LA Times Analysis: No Evidence White House "Directed The IRS Effort." A Los Angeles Times (6/25, Tanfani, 3.46M) analysis answers several key questions about the investigation, reporting that the emails are important because Republicans "want to see who was communicating with Lerner before and during" the time the targeting scandal broke. The Times notes that the agency has been unable to recover the emails, and according to Koskinen, "backup tapes were recycled after six months," and Republicans are "claiming foul play" because the agency was "on notice...that lawmakers had suspicions about the agency's conduct" before a May 2013 inspector general's finding that it "was scrutinizing nonprofit applications using improper procedures." The Times notes that so far, there has been no evidence that "the White House directed the IRS effort."

Scarborough Blasts NYTimes Over Coverage Of IRS Investigation. The Daily Caller (6/25, Bordelon, 408K) reported that MSNBC host Joe Scarborough "angrily denounced The New York Times for burying" the IRS story, "calling it a 'scam' and explaining 'this is why conservatives don't trust print media.'"

LA Times Calls For Independent Investigator. In an editorial, the Los Angeles Times (6/25, 3.46M) calls for an independent investigator, noting that the two House investigations have "disintegrated into partisan sniping," and the IRS "further damaged its own credibility by belatedly disclosing the disappearance" of the Lerner emails. The Times argues that "the situation cries out for the appointment of someone with a track record of sorting through complex problems to figure out what happened and who's responsible."

In an editorial, the Wall Street Journal (6/25, Subscription Publication, 5.51M) opines that while they doubt there is an innocent explanation for the lost emails, its view is irrelevant, because, due to an litigation hold, the agency was legally obligated to retain the emails.

Editorial Wrap-Up:

NEW YORK TIMES. "Tying Federal Aid To College Ratings." In an editorial, the New York Times (6/25, Subscription Publication, 9.65M) argues that Congress should back President Obama's plans to "deploy a rating system" to evaluate colleges and universities, and then "use the ratings to help guide the allocation of federal student loans and grants." Noting a new report from The Education Trust argues that many students are poorly served by their schools, the Times says that Congress should act on the President's initiatives.

"Refusals To Pay High Drug Prices." An editorial in the New York Times (6/25, Subscription Publication, 9.65M) says that efforts by pharmacy benefits managers to rein in the prices drug makers charge for some prescriptions by demanding that they "lower their prices if they want certain drugs included in the formularies from which patients and doctors can choose a suitable treatment," holds "both promise and peril for patients." The Times notes that "some patients may fare best on a drug that has been excluded and respond less well to drugs

on the formulary,” and urges regulators to “watch out that insurers, in their zeal to curb drug costs, don’t block patients from medicines they need when an alternative is not adequate.”

“Tea Party Mischief On Exports.” In an editorial, the New York Times (6/25, Subscription Publication, 9.65M) criticizes “some Tea Party members” for pushing to shut down the Ex-Im Bank, which it calls “an obscure but important federal agency that helps American businesses sell their goods abroad.” The Times says that a “truly serious crackdown on corporate welfare would involve eliminating corporate tax breaks and wasteful subsidies,” but “this is not a direction many in the Tea Party want to go in; the bank is a far smaller and easier target than the tax code or the farm lobby.”

“The Tappan Zee Bridge Loan.”

WASHINGTON POST. “Hypocrisy On Egypt.” The Washington Post (6/25, 4.22M) editorializes that Secretary of State Kerry’s expressions of confidence that the Egyptian government is “moving in a democratic direction” is “against all obvious evidence.” The Post says if the US believes it is in the country’s best interest to “return to the old model of cozying up to Arab dictators,” then President Obama should not “insult everyone...by pretending that human rights are a priority.”

“Rand Paul’s Suffrage Plan.” The Washington Post (6/25, 4.22M) editorializes that one of the “ugliest stains on democracy in this country is the fact that an estimated 2.6 million Americans who have committed a felony are not allowed to vote – even after they have served their sentence,” which “disproportionately afflicts minority, especially black, communities.” The Post notes that that in a “promising sign,” Sen. Rand Paul (R-KY) “plans to introduce a bill that would restore voting rights in federal elections to nonviolent felons.” Paul “acknowledges that he and other Republicans may stand to gain by such legislation, which might soften their image among hostile minority voters,” but he “also grasps the glaring racial injustice of the status quo,” under which “voting rights are denied to 7.7 percent of black adults and just 1.8 percent of non-black adults.” The Post concludes that Paul’s bill “would begin to change that – if other Republicans are willing to follow.”

“Building Interest For Soccer.”

WALL STREET JOURNAL. “IRS Email Jeopardy.” In an editorial, the Wall Street Journal (6/25, Subscription Publication, 5.51M) opines that while they doubt there is an innocent explanation for the lost IRS emails, its view is irrelevant, because, due to an litigation hold, the agency was legally obligated to retain the emails.

“Egypt Represses The Press.” The Wall Street Journal (6/25, Subscription Publication, 5.51M) editorializes Egypt’s jailing of three Al Jazeera journalists is another example of the country’s unwillingness to improve its human-rights record and transition to democracy.

“The Awlaki Drone Memo.” The Wall Street Journal (6/25, Subscription Publication, 5.51M) editorializes the Justice Department’s memo explaining the legal basis for the drone attack that killed Anwar al-Awlaki illustrates that President Obama is being forced to confront realities that liberals are refusing to acknowledge.

Perez and U.S. Secretary of Commerce Penny Pritzker will hold a press teleconference to announce the grant awards for the new Job-Driven National Emergency Grant program that will help workers who have lost their jobs through no fault of their own. Dial-In Number: 888-810-9642 Passcode: PRESS CALL Contacts: Xochitl Hinojosa, hinojosa.xochitl@dol.gov, 202-693-4681. Jason Kuruvilla, kuruvilla.jason@dol.gov, 202-693-6587. Notes: RSVP requested.

SALUTE TO THE NON-COMMISSIONED OFFICER — 7 p.m. Sergeant Major of the Army Ray Chandler hosts Twilight Tattoo "Salute to the Non-Commissioned Officer: Backbone of the Army." Location: Summerall Field, Joint Base Myer-Henderson Hall, VA. Contacts: Shaunteh D. Kelly, shaunteh.d.kelly.civ@mail.mil, 202-685-4645. Notes: Media interested in covering this event must register by 3 p.m., Wednesday, June 25. To be placed on the credentialed list, send an email to usarmy.mcnair.mdw.mbx.mediadesk-omb@mail.mil with the following information: your full name, media organization, assignment, contact phone number, email address, and vehicle info (tags, year, make, and model).

CONCORD COALITION – SENS. COBURN, DURBIN — 8:15 p.m. The Concord Coalition's Annual Economic Patriot Award Dinner honoring Senators Dick Durbin and Tom Coburn for "their strong advocacy of fiscal responsibility." Location: The Phoenix Park Hotel; 520 N. Capitol Street, NW. Contacts: Steve Winn, swinn@concordcoalition.org, 703-254-7828

Last Laughs:

LATE NIGHT POLITICAL HUMOR.

David Letterman: "They had a big fundraising softball game up at Yankee Stadium. ... They had a fundraiser over the weekend and you know who was playing in the fundraiser? New Jersey Gov. Chris Christie. He's a pretty

good athlete. I'm not trying to be snarky about this, but he had a great day at the plate -- and I'm talking about lunch."

Conan O'Brien: "Political analysts are saying Hillary Clinton should stop telling people she's poor. They also said that Bill Clinton should stop telling people he's single."

Conan O'Brien: "Yesterday, speaking of political figures, Michelle Obama said she wants Americans to elect a woman president as soon as possible. Yeah, she said it should happen, quote, 'as soon as possible.' So even she's had enough of President Obama."

LAST LAUGHS:

- + Late Night Political Humor.

DOI in the News:

OBAMA ADMINISTRATION MARKS ONE YEAR SINCE GEORGETOWN CLIMATE SPEECH. [Politico](#) (6/25, Guillén, 637K) reports that on the one-year anniversary of President Barack Obama's speech in which he "laid

out his big climate agenda," Interior Secretary Sally Jewell and Energy Secretary Ernest Moniz was scheduled to speak with League of Conservation Voters members and "hold a Q&A at the Mayflower Renaissance Hotel." Also, Jewell and acting USGS chief Suzette Kimball was scheduled to "release a comprehensive assessment of biological carbon storage and sequestration by eastern US ecosystems."

The National Journal (6/26, Subscription Publication, 561K) reports that the report shows that "forests, wetlands and farms in the eastern United States naturally store 300 million tons of carbon a year (1,100 million tons of CO2 equivalent), which is nearly 15 percent of the greenhouse gas emissions EPA estimates the country emits each year or an amount that exceeds and offsets yearly US car emissions." The USGS also "released a new web tool, which allows users to see the land and water carbon storage and change in their ecosystems between 2005 and 2050 in the lower 48 states." Jewell said, "Today we are taking another step forward in our ongoing effort to bring sound science to bear as we seek to tackle a central challenge of the 21st century – a changing climate. This landmark study by the US Geological Survey provides yet another reason for being good stewards of our natural landscapes, as ecosystems play a critical role in removing harmful carbon dioxide from the atmosphere that contributes to climate change."

President Obama Highlights Climate Agenda Successes. The AP (6/26, Lederman) reports President Obama "is highlighting efforts by his administration toward reducing greenhouse gas emissions," a key agenda point of his second term, even though "some of the most ambitious steps" the President outlined last June "remain in limbo." Obama addressed the League of Conservation Voters on his efforts Wednesday. The AP says that with many of his priorities having "largely fallen victim to congressional gridlock, climate change marks a rare bright spot" where the President has been able to use executive action effectively.

Politico (6/25, Restuccia, 637K) reported the President "lit into GOP climate change skeptics" in the speech, taking aim "at Republicans for pleading ignorance on climate by saying they aren't scientists." Obama said, "I'm not a doctor either, but if a bunch of doctors tell me that tobacco can cause lung cancer, then I'll say, 'Okay.' It's not that hard." Bloomberg News (6/26, Lerer, 2.76M) and the Washington Times (6/25, Wolfgang, 455K) also provide coverage of Obama's address to the League of Conservation Voters.

Bloomberg BNA (6/24, Scott, 7K) and the "Post Politics" blog of the Washington Post (6/26, Zezima, 4.22M) also provide coverage of the anniversary of Obama's climate plan.

ASSISTANT SECRETARY WASHBURN DISCUSSES INTERIOR'S NEW HAWAIIAN RECOGNITION INITIATIVE. In an interview with the Indian Country Today Media Network (6/25, 45K), Assistant Secretary – Indian Affairs Kevin K. Washburn discussed the initiative "to consider reestablishing a government-to-government relationship between the United States and the Native Hawaiian community." Washburn stressed, "We're at the very initial stages of just trying to reach out and see how we can be helpful and ask them some specific questions." He added, "There's such a vibrant conversation going on in Hawaii and the purpose of the ANPRM is to get people thinking about the kinds of questions we have and to find a way to engage. There's all kinds of hard questions down the road that are different than the ones we've asked but we've got to start somewhere and this is where we're starting."

For "The Blog" of the Huffington Post (6/26, Aki, 11.54M), Jacob Bryan Aki, a student at the University of Hawai'i at Mānoa, writes that "the questions that the Department of Interior has asked are not only irrelevant, but in my opinion very insulting." He adds that "it should not be the responsibility of the United States Department of Interior to seek out what is best for us, but it is the responsibility of our own people to seek out what is best possible option for us." However, Aki argues that "before we engage in any kind of actions regarding sovereignty, federal recognition and/or self-determination, the people of Hawai'i need to be educated on these very issues."

Additional coverage of the proposal was provided by the Hawaii Free Press (6/26) and the Hawaii Reporter (6/26, 8K).

SECRETARY JEWELL REAPPOINTS PHEASANTS FOREVER'S NOMSEN TO WETLANDS POST. The AmmoLand (6/26, 4K) reports that Interior Secretary Sally Jewell has reappointed Pheasants Forever's Dave Nomsen to the North American Wetlands Conservation Council and the Neotropical Migratory Bird Conservation Advisory Group. The article notes that "Nomsen has served on the Council since 1999, having been appointed to the post on five different occasions by the Secretary of Interior under three different presidential administrations."

SEN. WALSH PROPOSES RESTRICTING SALES OF FEDERAL TRACTS. The [E&E Daily](#) (6/25) reports that Sen. John Walsh on Tuesday "introduced legislation to make it harder to sell federal lands, calling such proposals by House Republicans a 'terrible idea' for paying down the federal deficit." Walsh, "blasted" a budget proposal by House Budget Chairman Paul Ryan "to sell 'unnneeded' federal lands, arguing that it could jeopardize hunting or paddling access in Montana." Walsh said, "What this really means is handing over our most popular recreation areas to the highest out-of-state bidder, creating the next copper barons and trophy homes. This theory is as radical as it is wrong."

WHITE HOUSE CLAIMS MANY REPORTS HAVE "LONG OUTLIVED" NEED. In its "Blog Briefing Room" blog, [The Hill](#) (6/26, Sink, 237K) reports that "Congress is asking the Obama administration to produce too many reports about what it's up to, the White House argued Wednesday." Beth Cobert, an official at the Office of Management and Budget, said in a blog post Wednesday, said that "the administration has identified dozens of reporting requirements that 'have long outlived their need.'" For instance, the Interior Department has "been required to prepare an annual report on a program that allowed natural gas companies to provide the government energy directly instead of cash royalty payments." However, "the program was discontinued in 2009."

Also reporting on the story is the [Federal Times](#) (6/25, 132K).

ADDITIONAL COVERAGE: POVERTY POINT IN LOUISIANA DESIGNATED AS WORLD HERITAGE SITE. Additional coverage of Poverty Point was provided by the [Jackson \(MS\) Clarion Ledger](#) (6/25, 206K), the [Ruston \(LA\) Daily Leader](#) (6/26, 17K), and the [Richland \(LA\) Beacon-News](#) (6/26).

CONTINUING COVERAGE OF DEBATE OVER BOULDER-WHITE CLOUDS AREA. Continuing coverage of the "escalating debate over Idaho's Boulder-White Clouds area" was provided by the [Boise \(ID\) Weekly](#) (6/26, 108K).

America's Great Outdoors:

National Park Service:

NPS, IN PARTNERSHIP WITH MARAD, ANNOUNCES MARITIME HERITAGE GRANTS. [Marine Link](#) (6/26, Backwell, 1K) reports that the National Park Service, in partnership with the Maritime Administration, announces the availability of about "\$1.7 million in grant funding through its Maritime Heritage Program for projects," which educate about "and/or preserve sites and objects related to" the US' maritime history. The article says the grants are funded by "revenue from the scrapping of vessels from the Maritime Administration's National Defense Reserve Fleet." Acting Maritime Administrator Paul N. Jaenichen is quoted as saying, "With the restart of this program, we have the opportunity to raise American awareness and understanding of marine transportation's pivotal role in our nation's past, present and future."

SMITHSONIAN FESTIVAL WILL STAY AT NATIONAL MALL FOR NOW. The [New York Times](#) (6/26, Corasaniti, Subscription Publication, 9.65M) reports that "the annual Smithsonian Folklife Festival, on now from June 25-29 and July 2-6, will continue to call the National Mall its home for at least another five years, as the National Park Service and the Smithsonian Institution entered into a memorandum of agreement to keep the festival there through 2019." Carol Johnson, a spokeswoman for the NPS, said, "What this means is that it recognizes the cultural importance of both the festival and the mall. We've really come to an agreement to work together to make the festival happen." The article notes that "the festival's future on the mall had been in question after new regulations were adopted, to protect the pristine turf recently planted on the mall, that prohibit the extended installation of big tents, stages and art exhibits, staples of the Folklife experience," but "now the festival will, in fact, temporarily relocate to the section with the new grass, between Third and Seventh Streets, while its former location, between Seventh and 14th Streets, undergoes renovations."

Additional coverage was provided by the [AP](#) (6/26), [WRC-TV](#) Washington (6/26, 312K) and [WJLA-TV](#) Washington (6/26, 118K). Coverage by the AP was also picked up by the [Washington Post](#) (6/26, 4.22M).

FUEL TRUCK BAN LEADS TO LOCAL DISTRUST OF PROPOSAL TO ELEVATE COLORADO MONUMENT TO PARK. The [E&E Daily](#) (6/25) reports that the NPS' "decision this spring to ban fuel trucks and other

hazardous materials from traversing a western Colorado national monument has led some locals to question a legislative proposal to designate the lands a national park and drew the concern of Sen. Mark Udall." Although Colorado National Monument Superintendent Lisa Eckert on Monday "rescinded her travel ban, some residents said they're fearful it's a sign that similar restrictions would accompany a national park designation." Eckert said, "The Glade Park community's concerns are valid, and I hope to build on the collaboration and mutual support we identified last summer by working again with our friends and neighbors to address all of our concerns. In the spirit of transparency, we plan to more fully reach out to the community and the public as soon as possible."

TRIBAL MEMBERS PROTEST PINE RIDGE SIOUX INDIAN RESERVATION PROPOSAL. KOTA-TV Rapid City, SD (6/26, 890) reports that some tribal landowners fear the NPS is "going to take over their land." According to the article, "on horses, ATV's, and trucks, tribal members rode three miles on Wednesday to Wounded Knee, all to raise awareness." Eric Brunnemann, Badlands National Park Superintendent, said, "I hear the voices of people that believe their land is going to be taken and that is not the case. The land boundary will be identical to what it was in 1968 when Congress established the South Unit."

For the Canada Free Press (6/26, 1.14M), Patrick Henningsen criticizes the Interior Department for targeting the Pine Ridge Sioux Indian Reservation in South Dakota with a proposal to create a "Tribal National Park." According to Henningsen, "the Congressional bill has already been written, and if passed through Congress, both tribal members and non tribal members will be stripped of their deeded land – at a price set by the federal government." And "if owners do not accept Washington's offer (expected to be a meager one), the land can be acquired at no cost because the measure has waived all appraisal rights and stipulates that Washington can simply take Indian land by force under 'eminent domain'."

PARK POLICE CRACKING DOWN ON FOOD TRUCKS ON NATIONAL MALL. WTTG-TV Washington (6/26, 169K) reports that "D.C. food truck owners say they have been warned to leave" the National Mall "or face a \$300 fine or worse." Food truck operators have "proper D.C. permits, but Park Police say those permits don't hold up on the mall." Park Police explained that "the National Mall is off limits to food trucks unless they have a special permit from the National Park Service."

NPS BEGINS REPAIRS ON BURNSIDE BRIDGE AT ANTIETAM NATIONAL BATTLEFIELD. The AP (6/26) reports that the NPS says "it has begun repairing the Burnside Bridge at Antietam National Battlefield near Sharpsburg after pieces of the stone arch fell into Antietam Creek in January." The NPS said Wednesday that "the bridge will remain mostly open to pedestrians during work on the upstream wall this summer." The agency "says the reconstruction work should be finished this fall."

YOSEMITE TO CELEBRATE 150TH ANNIVERSARY. The Sacramento (CA) Bee (6/25, 687K) reports that Yosemite National Park will "hold several events on Monday to commemorate the 150th anniversary of the signing of the Yosemite Grant Act." The article notes that "the major events of the day are the 10 a.m. ceremony in the Mariposa Grove and the 3 p.m. Parks Heritage Program in front of the Yosemite Valley Visitor Center."

MEETING HELD ON NEW NATIONAL PARK PROPOSAL IN MAINE. WCSH-TV Portland, ME (6/25, 21K) reports that the Natural Resources Council of Maine is "trying to gain community support to establish a new National Park and National Recreation Area east of Baxter State Park." The NRCM "held a public meeting Wednesday night to inform people in Hampden and other communities about this proposal."

Bureau of Land Management:

REPORT: BLM'S GUNNISON PLAN, STATE AND LOCAL EFFORTS TOO LATE TO SAVE SAGE GROUSE. The E&E Daily (6/25) reports that "a new report by two conservation groups says federal, state and local governments have failed to install adequate protection measures for the imperiled Gunnison sage grouse and its dwindling habitat and that the bird should be listed as endangered." The 48-page report, released on Wednesday by WildEarth Guardians and Rocky Mountain Wild, "credits some local government measures in southwest Colorado's Gunnison Basin but offers only a tepid endorsement of the Bureau of Land Management's decision to amend up to 11 resource management plans (RMPs) covering 800,000 acres in Colorado and Utah to incorporate Gunnison grouse protection measures." The report concludes that BLM's efforts are "too late to keep the bird from being listed under the Endangered Species Act, even if the agency does succeed in installing meaningful

conservation strategies in the RMPs to protect the Gunnison grouse – found almost exclusively in southwest Colorado and southeast Utah.”

GOLD CLAIMS COMPLICATE COLORADO WILDERNESS PROTECTION EFFORT. USA Today (6/25, 5.82M) reports that “a proposal to permanently designate as wilderness tens of thousands of acres of canyons and mountains flanking the Arkansas River in central Colorado is being complicated by gold mining claims.” The BLM “since 1980 has managed the Browns Canyon area between Salida and Buena Vista as a wilderness study area,” and “as part of that ‘study,’ the BLM prevented anyone from mining in the area.” However, “in December 2011, the ban on mining expired and two groups quickly filed five mining claims along the river, which is heavily used for white-water rafting and fly fishing.” The BLM is “now trying to get a judge to throw out the claims so it can prevent mining in the area.”

GROUP PETITIONS TO TAKE GOLD BUTTE FROM BLM. KXNT-AM Las Vegas (6/25, 44K) reports that “an environmental group has started a petition drive to make Nevada’s pristine, 350,000 acre Gold Butte area a National Monument, putting it under National Parks Service control and removing it from the Bureau of Land Management.” Rob Mroka of the Center For Biological Diversity, said that the BLM “has let the Gold Butte area down for a number of years, and it perhaps culminated in the biggest way with its failed roundup of Cliven Bundy’s trespassed cattle.” Mroka “noted other criticisms of BLM: six years of ‘foot dragging’ in coming up with an overall plan for the area, the failure to restrict roadways in the area that threaten biological life, and rampant off-road vehicle use.”

NEW GRAND STAIRCASE-ESCALANTE NATIONAL MONUMENT MANAGER NAMED. The Southern Utah News (6/26) reports that Cindy Staszak has been chosen as the new monument manager for the BLM’s Grand Staircase-Escalante National Monument. Juan Palma, BLM Utah State Director, said, “We are very fortunate to have Cindy Staszak as the monument manager. She brings a wealth of experience and knowledge in managing both people and projects; has great people skills; and is very familiar with issues facing western states. Cindy has proven to be an excellent leader throughout her career, and I am very pleased she is joining our BLM Utah Leadership Team on a permanent basis.”

BLM WORKER’S HOBBY USED AT WORK. The Sewickley (PA) Herald (6/26, 8K) reports on Bob Wick, who works as a wilderness specialist with the BLM. According to the article, “although it was not the reason for his hiring, Wick’s photography skills were noticed at the bureau and are put to good use.” The article notes that “Wick’s photos help to document federally protected property,” and “he also photographs lands that are candidates for conservation through the Bureau.”

DINOSAUR HUNTER WORKS FOR BLM. The Los Angeles Times (6/26, Glionna, 3.46M) reports that Scott Richardson, who “six months each year, from March to September,” works as a paleontologist’s technician for the BLM.

Fish and Wildlife Service:

HOUSE HEARING FOCUSES ON FWS IVORY BAN PROPOSAL. The E&E Daily (6/25) reports that “everyone at a House Natural Resources subpanel hearing yesterday agreed that African elephants could be driven to extinction within a decade if something is not done about poaching driven by demand for ivory.” The article notes that “all present said it is necessary to undermine the illicit ivory trade, which has become a billion-dollar funding source for international crime syndicates, militias and terrorist groups in Africa and Asia, where ivory is seen as a status symbol.” However, domestic issues, “especially the Fish and Wildlife Service’s proposed commercial ivory ban, generated disagreement and prompted strong criticisms from Alaska Rep. Don Young (R) and other Republicans.” According to the article, “echoing the concerns of sportsmen, musicians and auction houses worried that the ban, which eliminates commercial imports and restricts exports to all but verified antiques containing ivory, would have a detrimental effect on the value of ivory owned by millions of Americans, Young and other members of his party castigated FWS and lambasted the ban as another federal regulatory overreach, arguing that the ban would unfairly put the burden of proof on American owners to prove their ivory was not the product of poaching.”

FWS DELAYS DECISION TO PLACE NORTHERN LONG-EARED BAT ON ENDANGERED LIST. The E&E

Daily (6/25) reports that the FWS on Tuesday "announced a six-month delay in finalizing its proposal to list the northern long-eared bat as an endangered species, a move that drew cheers from Republican congressmen but criticism from a wildlife biologist." The article notes that "a final listing decision for the bat – the first to be proposed for endangered protections due to a deadly fungus that has now spread to roughly half of all states – is now scheduled for April 2, 2015." The FWS "this week also opened a new 60-day comment period on the listing proposal."

The Sheboygan (WI) Press (6/25, 52K) reports that the Wisconsin Department of Natural Resources lauded the decision.

Also providing coverage are the Wausau (WI) Daily Herald (6/25, 71K) and the Wisconsin Outdoor Fun (6/25).

GROUPS SEEK TO PROTECT YELLOW CEDAR. The E&E Daily (6/25) reports that a petition submitted to the FWS "seeks an endangered species listing for the yellow cedar, a slow-growing conifer that has been declining in and around the Tongass National Forest in southeastern Alaska." The Center for Biological Diversity, Greenpeace, the Greater Southeast Alaska Conservation Community and the Boat Company, a local tour company, filed the petition on Tuesday.

Also reporting on the story is the AP (6/26, Joling). Coverage by the AP was picked up by the Washington Post (6/26), the Sacramento (CA) Bee (6/25, 687K), and ABC News (6/26, 3.58M).

ENVIRONMENTAL GROUPS, RESIDENTS PLAN LAWSUIT OVER PURPLE LINE. The Washington Post (6/26, Shaver, 4.22M) reports "three environmental groups and three Chevy Chase residents notified federal agencies Wednesday that they plan to sue over Maryland's proposed light-rail Purple Line unless the agencies better study the project's potential impacts on two rare shrimp-like creatures." A letter to the FWS and the Federal Transit Administration said the agencies had violated the Endangered Species Act "by not properly considering a light-rail line's impacts on the Hay's spring amphipod, which has been listed as endangered since 1982, and the Kenk's amphipod, which is a candidate for federal listing." The groups — The Center for Biological Diversity, Friends of the Capital Crescent Trail, and the Center For Sustainable Economy — requested a meeting with the FWS "to discuss a more detailed analysis of the potential impacts."

Also reporting on the story is the Bethesda (MD) Now (6/25).

JUDGE SETS 2018 DEADLINE FOR EFFORT TO SAVE LYNX. The AP (6/26, Brown) reports that "a federal judge on Wednesday set a 2018 deadline for the government to complete a long-delayed recovery plan for imperiled Canada lynx in the Lower 48 states." Molloy said the January 2018 deadline proposed by the FWS was "reasonable." He wrote, "It will not disrupt the Service's other recovery work, but will also set a date certain by which the Service will be required to take action."

FWS APPROVES PLAN FOR DESOTO AND BOYER CHUTE NATIONAL WILDLIFE REFUGES. The Mason City (IA) Globe Gazette (6/26, 51K) reports that the FWS has "approved the Comprehensive Conservation Plan for DeSoto and Boyer Chute National Wildlife Refuges."

HUMANE SOCIETY CALLS FOR BAN OF PYTHONS, ANACONDAS, AND BOA CONSTRICTORS. The Broward Palm Beach (FL) New Times (6/26, 126K) reports that Wayne Pacelle, president and CEO of the Humane Society of the United States, is calling for the ban of the reticulated python, DeSchaunsee's anaconda, green anaconda, Beni anaconda, and boa constrictor. In a post on his blog, Pacelle said, "It's time for the Obama administration to finish the job, stopping a reckless trade that results in snakes dispersed in our communities and ultimately leaving a major ecological wake." Pacelle called "out the Boa constrictor specifically, perhaps the most dangerous of all the snakes talked about."

HUNTERS ENCOURAGED TO FIGHT AMMO BAN EFFORT. The Examiner (6/26, 1.56M) reports that the National Shooting Sports Foundation is "encouraging hunters to contact the Department of Interior and ask that it reject a 50-page petition from the anti-hunting Humane Society of the United States (HSUS) and others seeking a ban on traditional ammunition on public lands."

MAN PLEADS GUILTY TO ROLE IN SMUGGLING RHINO HORNS TO CHINA. The Dallas Morning News (6/26,

Wigglesworth, 1.18M) reports that "a Frisco man who worked as an Asian art appraiser pleaded guilty Tuesday for his role in smuggling rhinoceros horns and other protected items worth nearly \$1 million from the United States to China." According to the article, "Ning Qiu, 43, pleaded guilty in federal court in Plano to a one count information charging him with conspiracy to smuggle and violate the Lacey Act."

NOAA STUDY DETAILS TRIO OF THREATS TO KILLER WHALE POPULATION. The E&E Daily (6/25) reports that "pollution, vessel noise and food scarcity are the main threats to the endangered Southern Resident killer whale, according to a new report from the National Oceanic and Atmospheric Administration." The article notes that "only 80 animals are left in the population, which was once a feeder for theme parks. In the 1960s and 1970s, almost 50 orcas were captured from the community that spends its summers in Puget Sound." NOAA's report outlines the major threats, "drawing from 10 years of research that included fecal samples, satellite location data and behavioral observations."

Securing America's Energy Future:

Renewable Energy:

PANEL DISCARDS FWS' RECOMMENDATIONS ON WILDLIFE KILLS AT IVANPAH SOLAR PLANT. KCET-TV Los Angeles (6/25, Clarke, 15K) reports that "a task force charged with addressing the burgeoning issue of bird and bat deaths at the Ivanpah Solar Electric Generating System (ISEGS) has dismissed many of the recommendations in a report on the topic issued by the US Fish and Wildlife Service's forensics lab, according to documents released by the California Energy Commission." The report by the FWS' National Fish and Wildlife Forensics Laboratory "suggested that actual levels of wildlife mortality and injuries at ISEGS are being obscured by inadequate surveys for injured and dead animals, and proposed several measures by which those surveys could be made more scientifically rigorous." However, "according to minutes of a May 20 meeting of the ISEGS Avian & Bat Technical Advisory Committee (TAC), an interagency body convened to assess the wildlife mortality issue at the plant, members dismissed a number of apparently common-sense steps to increase the validity of carcass surveys – and one likely method to sharply reduce injuries to birds during migration season."

WIND TURBINE IN GUAM REQUIRES REZONING. The Pacific (GUM) Daily News (6/26, 61K) reports that "after six years, a federally funded wind turbine tower is months away from being built." According to the article, "the plan is to build one 233-foot-tall windmill tower in Yona, which will require a zoning variance to allow for the structure's height." The Office of Insular Affairs approved a \$1.5 million grant to Guam Power Authority to install the wind turbine for the purpose of research.

Onshore Energy Development:

EPA TO CONSIDER IF POWER PLANT ADDS TO PARK HAZE. The AP (6/26, Kamowski) reports that the EPA has "agreed to consider whether pollution controls at Xcel Energy's Sherco power plant are adequate for cutting haze over two national parks and the Boundary Waters Canoe Area." The EPA and six environmental groups "filed a proposed consent decree Tuesday that obligates the EPA to take action on a 2009 National Park Service finding that haze from the coal-fired plant near Becker impairs the views at Voyageurs National Park in Minnesota and Isle Royale National Park in Michigan." Coverage by the AP was also picked up by the Minneapolis Star Tribune (6/26, Kamowski, 1.48M).

Also reporting on the story is the Minneapolis Star Tribune (6/26, Shaffer, 1.48M).

BLM TO FINALIZE FIRST MASTER LEASING PLAN. The E&E Daily (6/25) reports that the BLM on Thursday is "scheduled to finalize its first-ever master leasing plan for oil and gas development, a step years in the making that's likely to be heralded by conservation and sportsmen's groups that have long pressured the agency to take a more incisive look at mineral development on federal lands." The Beaver Rim MLP will be "codified in a final BLM resource management plan in central Wyoming scheduled to be signed in the morning by BLM Director Neil Komze alongside Gov. Matt Mead (R) at the governor's office in Cheyenne." The article notes that "Beaver Rim is slated to be the first of 16 MLPs the agency is crafting across millions of acres of public lands in Utah, Colorado, Wyoming and Montana and is a key part of the oil and gas leasing reforms the Obama administration rolled out in early 2010."

DRILLING STATES ADDRESS PUBLIC CONCERN ABOUT EARTHQUAKES. The AP (6/26, 4.22M) reports that governments in Texas, Kansas, and Oklahoma are responding to residents' concerns about the correlation between hydraulic fracturing and earthquakes by holding public discussion and considering new regulations. According to the article, states are "trying to reconcile the scientific data with the interests of their citizens and the oil and gas industry." Despite the growing frequency and intensity of earthquakes in these states, both seismologists and the oil and gas industry have "taken pains to point out that a clear correlation has not yet been established."

COLORADO INVESTIGATING WHETHER INJECTION WELL CONNECTED TO RECENT TREMORS. The E&E Daily (6/25) reports that Colorado is "investigating whether an injection well that pumps wastewater from oil and gas drilling operations deep underground is to blame for recent earthquakes that have shaken the town of Greeley in the last month." The Colorado Oil and Gas Conservation Commission announced on Tuesday that "it has asked the Denver-based operator of a deep-injection well to shut down operations for 20 days while it investigates whether injections from the 10,800-foot well are responsible for recent seismic activity in Weld County, in the northeast corner of the state." COGCC Director Matt Lepore said, "We have not made a causative determination that the well is responsible for the quakes. We want to continue the investigation into the seismic activity in this area, and to have the opportunity to do so while this particular well is not injecting."

OSM PROVIDES FUNDS FOR RESIDENTS FORCED TO LEAVE HOMES ATOP A MINE. The Zanesville (OH) Times Recorder (6/25, 44K) reports that "the families living atop the abandoned Jonathan Mine in White Cottage feel as though they've been forced from their homes following a Tuesday night visit from a task force assigned to ensure their safety." The article notes that "a 30-day hotel stay for the 18 residents affected by the sinkholes in the area has been approved by the US Office of Surface Mining and Reclamation," according to OSM spokesman Chris Holmes. The Interior Department "also granted ODNR authorization to spend Abandoned Mine Lands funds on the displaced residents."

The story also appears at the Marion (OH) Star (6/25, 19K) and the Coshocton (OH) Tribune (6/25, 13K).

Offshore Energy Development:

SENATORS URGE OBAMA ADMINISTRATION TO OPEN NEW AREAS TO OFFSHORE DRILLING. The Law 360 (6/26, 18K) reports that "a group of GOP senators is pressuring the Obama administration to expand offshore drilling, arguing Wednesday that the US Department of the Interior's next five-year leasing plan should move the country toward energy independence by including areas that are currently off limits."

The National Journal (6/26, Subscription Publication, 561K) reports that Sen. David Vitter, along with Sens. Roger Wicker, Jeff Sessions, and Tim Scott sent a letter to Interior Secretary Sally Jewell "regarding the Department's oil and gas leasing plan for 2017 through 2022 on the Outer Continental Shelf (OCS)." In the letter, they "request that Interior's 5-year leasing plan includes the expansion of offshore access to include areas off the Atlantic Coast, the Eastern Gulf of Mexico, areas off the coast of Southern California, and multiple areas off the Alaska shoreline that the Obama Administration had previously placed off-limits."

Also reporting on the story is WQUE-FM New Orleans (6/26, 1K).

HOUSE TO VOTE ON HASTINGS-SPONSORED BILL. The fourth "Overnight Energy" item for The Hill (6/26, Barron-Lopez, Cama, 237K) reports that the US House of Representatives will vote today on legislation that "seeks to expand oil and gas production offshore" and on Federal land. The legislation is sponsored by US Rep. Doc Hastings (R-WA), who "boasts that the bill would open up energy resources that are otherwise under 'tight lock and key' by the Obama Administration, such as the Arctic, Atlantic and Southern Pacific."

GE TO DESIGN AND BUILD BLOWOUT PREVENTERS. The E&E Daily (6/25) reports that GE Oil & Gas announced on Tuesday "that it has secured contracts to design and build blowout preventers that can perform under tougher conditions." The firm said "it expects the equipment to be in operation by 2018." The article notes that "the new blowout preventers, or BOPs, will be designed and built to withstand pressures of up to 20,000 pounds per square inch (psi)."

TRUSTEES APPROVE 44 BP RESTORATION PROJECTS. The New Orleans Times-Picayune (6/25, Schleifstein, 678K) reported that according to a Federal Register set to be published Thursday, the public trustees in the BP Deepwater Horizon oil spill Natural Resource Damage Assessment process "have given final approval to 44 restoration projects costing \$627 million over the objections of the state of Texas, which wanted more projects."

Tackling America's Water Challenges:

CALIFORNIA GOV. JERRY BROWN'S BOND PLAN SEEKS DELTA TUNNEL NEUTRALITY. The Los Angeles Times (6/26, Mason, 3.46M) reports that California Gov. Jerry Brown's proposal for "a pared-down \$6-billion water bond would include \$1.5 billion for water quality projects such as groundwater cleanup and \$1.5 billion for watershed protection, according to an outline provided to stakeholders." The outline also "states that the bond would be neutral regarding the Bay Delta Conservation Plan." Also reporting on the story is the Sacramento (CA) Bee (6/25, 687K).

For the Los Angeles Times (6/26, Skelton, 3.46M), George Skelton writes that "the overriding issue for Republicans in Monday's bond vote was not water storage, but whether the proposal would help or hurt the tunnel effort — whether it would fund the type of restoration projects that would lead to the digging permits." The bond, by Delta Sen. Lois Wolk "was advertised as 'tunnel neutral.'" However, "Republicans didn't trust the neutrality."

HYDROPOWER GENERATION IN CALIFORNIA DROPS DUE TO DROUGHT. The E&E Daily (6/25) reports that "hydropower generation in California has dropped by half as a result of the state's gripping drought, according to a new analysis." California, "which normally gets about 14 percent of its electricity from hydroelectric dams and turbines, saw its hydropower generation fall 48 percent in the first quarter of 2014 compared with the same period last year, according to an analysis from SNL Energy." The article notes that "statewide, California received just over half of the precipitation it normally gets by the end of April, and snowpack water content was at 20 percent of average, indicating scant resources for hydropower."

Empowering Native American Communities:

INTERIOR SENDS OUT \$50 MILLION IN BUY-BACK OFFERS ON ROSEBUD RESERVATION. The Nation Sun News (6/26) reports that the Interior Department has sent out \$50 million in offers to landowners on the Rosebud Sioux Reservation in South Dakota. The offers to 11,000 landowners were made under the Land Buy-Back Program for Tribal Nations. Assistant Secretary Kevin Washburn said, "The success of the Buy-Back Program is vitally important to the future of Indian Country. Consolidating and returning these lands to tribes in trust will have enormous potential to unlock tribal community resources. We are committed to exhausting all efforts to make sure that individuals are aware of this historic opportunity to strengthen tribal sovereignty by supporting the consolidation of Indian lands."

LUMBEE TRIBE CLOSELY WATCHING NORTH CAROLINA RACE. In its "Ballot Box" blog, The Hill (6/25, Capra, 237K) reports "this year's Senate race in North Carolina has given a Native American tribe enormous leverage on a bill it has been pushing for decades." The Lumbee Tribe is "seeking a vote in the Democratic-led Senate on legislation that would give them federal recognition." Although the Lumbees "lean hard left," Paul Brooks, Lumbee tribal chairman, said the tribe is watching both Sen. Kay Hagan and North Carolina House Speaker Thom Tillis "very closely, for we do not believe in words anymore, but in what a senator does or does not do."

ADDITIONAL COVERAGE OF HOUSE HEARING ON ABUSE AT SPIRIT LAKE. Additional coverage of the hearing by the House Natural Resources Subcommittee on Indian and Alaska Native Affairs on child welfare at Spirit Lake was provided by PBS (6/26, 1.22M), the Jamestown (ND) Sun (6/26, 3K), the Devils Lake (ND) Journal (6/25, 14K), the Kansas City (MO) infoZine (6/26, 175), and KMOT-TV Minot, ND (6/26).

CONTINUED SUPPORT FOR NATIVE AMERICANS URGED. For the "Congress Blog" of The Hill (6/26, Davis, 237K), Gary Davis, president and CEO of the National Center for American Indian Enterprise Development, writes that the National Center for American Indian Enterprise Development's Reservation Economic Summit in

Washington, DC is taking place this week. He notes that "in fact, the administration recently announced several new initiatives to improve the economic situation for Native Americans and Native American businesses through some of the very agencies who are represented at this week's conference." Notably, the Interior Department has "pledged to fully implement the Buy Indian Act to increase procurement purchases by Native-owned small businesses by 10 percent."

ANALYSIS OF PROPOSAL FOR FEDERAL TRUST OF ALASKA NATIVE LAND ENCOURAGED. In an op-ed for the Anchorage (AK) Daily News (6/25, 251K), Mary Bishop examines "what happens when the US Secretary of the Interior takes lands into trust for Indian tribes." She notes that "a recent national report recommends doing so to improve social conditions in our rural Alaska villages." Bishop analyzes "some aspects to be considered when supporting or opposing the proposal to take Alaska tribal lands into trust status." She also encourages "readers to comment soon on this federal proposal 'to take land into trust for Alaska Native tribes.'"

Top National News:

MALIKI URGES IRAQIS TO UNITE AGAINST ISIL, BUT REJECTS CALL FOR NEW GOVERNMENT. Coverage of the ongoing Sunni insurgency in Iraq has dropped off a great deal from where it was at the beginning of the week. For instance, while all three network newscasts covered Iraq, none of them led with their reports, and NBC Nightly News covered the day's developments in a 15-second item with no on-the-ground reporting. Much of Wednesday's coverage emphasized Prime Minister Nouri al-Maliki's apparent rejection of US overtures regarding the need for a new national unity government, as well as the burgeoning "de facto alliance" of the Obama Administration, the government of Iran and the Assad regime in Syria as they all seek to arrest ISIL's momentum in Iraq.

On NBC Nightly News (6/25, story 7, 0:15, 7.86M), Brian Williams reported that "ISIS militants are getting closer to Baghdad." On ABC World News (6/25, story 4, 1:20, Sawyer), correspondent Hamish MacDonald reported from Baghdad that "with the fight for Iraq moving closer to the capital...90 of America's newly deployed military advisers went to work trying to find a way to bolster Iraq's forces." MacDonald added that the campaign to stop ISIL is "bringing together perhaps of the world's most unlikely alliance," with Iran "on the same side as the US...and Syria unleashing its fire power from the air" against ISIL. But MacDonald said it is the US "that many here say must play a bigger role, and fast," although the Obama Administration is "reluctant to consider that option unless Iraq forms a new government where all factions...share power." According to MacDonald, Maliki has now "definitely ruled that out," which "means the violence...is not going to stop."

On the CBS Evening News (6/25, story 7, 1:40, Pelley, 5.08M), Clarissa Ward reported from Baghdad that "suddenly you have the US, which is also supporting the Iraqi government militarily, and even contemplating airstrikes of its own, working in a sort of de facto alliance with the dictatorship of Bashar al-Assad in Syria."

The AP (6/25) reports that on Wednesday, Maliki "rejected calls for an interim 'national salvation government' in his first public statement since" President Obama "challenged him last week to create a more inclusive leadership." The AP notes that "several politicians, including Ayad Allawi, a secular Shiite who has been named as a possible contender to replace" Maliki, "have called on him to step down," but Maliki "insisted the political process must be allowed to proceed following recent national elections in which his bloc won the largest share of parliament seats." According to the AP, on Wednesday, Maliki "called on 'political forces' to close ranks in the face of the growing threat...but took no concrete steps to meet U.S. demands for greater inclusion of minority Sunnis."

McClatchy (6/26, Wise, Subscription Publication, 23K) quotes Maliki as saying, "We desperately need to take a comprehensive national stand to defeat terrorism, which is seeking to destroy our gains of democracy and freedom." According to AFP (6/26, Collinson), the Obama Administration "shrugged off" Maliki's "warning" as US officials "said they believed that Maliki was still committed to...piecing together a government on July 1, following his assurances to that effect to" Secretary of State Kerry. AFP goes on to report that "there was some uncertainty in Washington as to what Maliki was referring when he said 'the call to form a national emergency government is a coup against the constitution and the political process.'" AFP notes that on Wednesday, Kerry "said that he was not sure 'exactly what it is that he rejected or spoke to.'"

Offering a very different take on Maliki's remarks, the Washington Post (6/26, Morris, Sly, 4.22M) reported that Maliki "appeared to bow to U.S. pressure...striking a conciliatory tone as he called for political unity," and "called on political parties to lay aside differences before the first session of Iraq's newly elected parliament, expected to take place next week." The Post says Kerry "described the comments as 'precisely what the United States was encouraging.'" The Post goes on to report that Maliki was "no doubt mindful of U.S. demands" as he called for national unity in a speech that was "in contrast to his public declarations earlier in the crisis, which have appealed to religious motivations."

According to the New York Times (6/26, Rubin, Nordland, Subscription Publication, 9.65M), Maliki "criticized his political rivals but did not reject entreaties by Western leaders, including a personal visit by...Kerry, to help defuse the crisis by forming a new government with more equitable power sharing among competing groups." Under the headline "Iraq's Premier Rejects Calls For A More Broad-Based Government," the Wall Street Journal (6/26, Kesling, Subscription Publication, 5.51M) quotes Kerry as saying, "In the prime minister's remarks today, he did follow through on the commitments he made in our discussions."

In an op-ed for USA Today (6/26, 5.82M), David Andelman, editor in chief of World Policy Journal, makes the case that Iraq is "at the beginning of the endgame of its existence that began more than a century ago," that the US can do "little...about it." Andelman warns that if the US intervenes militarily, as he says "we seem ever closer to doing," it "will only ensure we are defeated by the overwhelming forces of history."

Iran Is Flying Drones In Iraq, Supplying Maliki With Weapons, Intelligence. According to the New York Times (6/26, Gordon, Schmitt, Subscription Publication, 9.65M), US officials say the Iranian military is "directing surveillance drones over Iraq from an airfield in Baghdad...is secretly supplying Iraq with tons of military equipment," and "has also deployed an intelligence unit...to intercept communications." The Times goes on to report that Gen. Qassim Suleimani, the commander of the Iranian Quds Force, "has visited Iraq at least twice to help Iraqi military advisers plot strategy" as "Iranian transport planes have...been making two daily flights of military equipment and supplies to Baghdad - 70 tons per flight." The Times notes that the stepped-up Iranian military aid is happening as US military advisers help the Iraqi army battle ISIL, but, according to US officials, "the American and Iranian military moves are not coordinated."

Administration Continues To Mull Working With Iran To Save Maliki's Government. McClatchy (6/25, Douglas, Subscription Publication, 23K) reports that the Administration is still "considering calling Iran a potential partner in the battle against" ISIL, which means that "the combination of crisis and mutual interest might make possible what many foreign policy experts once thought unthinkable." McClatchy says the White House "apparently thinks so, too," which is why Deputy Secretary of State William Burns "discussed the Iraq situation last week with Iranian officials on the sidelines of a meeting in Vienna on Iran's nuclear program." But McClatchy adds that the "potential U.S.-Iran collaborative effort unnerves many...who worry that the Tehran government will try to extract more favorable terms in the nuclear talks in exchange for its help."

At the same time, the Wall Street Journal (6/26, Fassihi, Subscription Publication, 5.51M), in an article titled "Iran Debates Its Regional Role," reports that some in Iran question whether it has been worth it for the government in Tehran to have invested as much as it has propping up the Maliki government, as well as Syria's Assad regime.

Sadr Says Iraqi Army Should Not Accept Military Assistance From US. AFP (6/26, Rao) reports that Shiite cleric Moqtada al-Sadr, "whose movement long battled US forces...in Iraq," has "voiced opposition to American military advisers meeting with Iraqi commanders," and says he "only supported 'providing international support from non-occupying states for the army of Iraq.'"

Kerry Reportedly Believes Some Sunnis Might Abandon Recent Alliance With ISIL. The Wall Street Journal (6/26, Solomon, Barnes, Bradley, Subscription Publication, 5.51M), in an article titled "U.S. Launches Bid To Wrest Sunni Tribes From Militants," reports that Kerry thinks that some of the Sunni leaders who have aided ISIL due to their antipathy towards the Maliki government can be persuaded to break with the insurgents. According to the Journal, US officials are making Kerry's case to their counterparts in Arab countries, who are perceived to have influence with Iraq's Sunnis. The Journal notes that Kerry himself will meet foreign ministers from Saudi Arabia, Jordan and the UAE on Thursday in Paris.

In an interview published by the Huffington Post (6/25, Robins-Early, 11.54M), Mohamad Bazzi, Newsday's former Middle East bureau chief and a former fellow at the Council on Foreign Relations, said, "I think it's too early to tell whether the events of the past weeks will ultimately lead to a long-term partition of Iraq," and "an important factor will be the role of hundreds if not thousands of fighters associated with the Saddam regime that are allied with ISIS." According to Bazzi, the Baathists "seem critical to this whole operation, and possibly more critical even than ISIS because they're the link between ISIS and the local Sunnis."

The New York Times (6/26, A1, Rubin, Nordland, Subscription Publication, 9.65M) reports on Sunni residents of Baghdad, "who suddenly find themselves in a Shiite-dominated city threatened by extremist Sunnis...who want to kill all the Shiites." According to the Times, "Baghdad's Sunnis see sinister signs that the walls surrounding their neighborhoods, built by the Americans to protect them, could also entrap them, making them easy prey for the newly emboldened Shiite militias, some of them the same ones that executed Sunnis by the truckload" several years ago.

The Washington Post (6/26, Jaffe, 4.22M) profiles Najim Abed al Jabouri, who served as mayor of Tal Afar – which is now in the control of ISIL – until he fled Iraq for the US, where he now has a house in Woodbridge, Virginia and a son in the US Army. The Post says Najim, a Sunni, "blames the U.S. government for wrecking his country," but also "believes the United States is the only country that can fix Iraq by forcing feuding Sunni and Shiite leaders in Baghdad to form a unity government that would undermine support for the ISIS insurgency."

In an online piece for the New York Times (6/26, Rice, 9.65M) titled "In Iraq, Switching Allegiance Once Again," Blake Rice, a former US Marine who trained Iraqi forces, suggests that some of the Sunnis he trained might now be fighting alongside ISIL.

BOEHNER WILL PURSUE LAWSUIT AGAINST OBAMA OVER EXECUTIVE ACTIONS. ABC World News (6/25, story 3, 0:20, Sawyer) briefly reported that House Speaker Boehner said Wednesday that the House will "file a lawsuit against the Obama Administration because the President is using executive power to bypass Congress and change laws. Boehner insists the suit is not about impeachment." In a similarly brief report, NBC Nightly News (6/25, story 5, 0:30, Williams, 7.86M) said, "You don't see this every day." Boehner did not "specify which executive orders the lawsuit will focus on directly."

Reuters (6/26, Lawder, Ingram) reports Boehner said in a memo to House Republicans that the President's actions could give him a "king-like authority," and told reporters, "The Constitution makes it clear that the President's job is to faithfully execute the law. In my view, the President has not faithfully executed the law." Bloomberg News (6/26, Wallbank, 2.76M) reports White House Press Secretary Josh Earnest "dismissed Boehner's plan, saying it amounts to 'a taxpayer-funded lawsuit against the president of the United States for doing his job.'"

The New York Times (6/26, Parker, Subscription Publication, 9.65M) reports Boehner said he would take the action by introducing a bill in July that "would allow the House to file suit through the House general counsel and at the direction of the chamber's Bipartisan Legal Advisory Group." McClatchy (6/26, Douglas, Subscription Publication, 23K) says Boehner's action comes after years of congressional GOP complaints over the President's "use of executive orders and actions over the years that have delayed enactment of some provisions of the Affordable Care Act, raised the minimum wage for federal contractors, expanded gay rights, and halted the deportation of some illegal immigrants."

Politico (6/25, French, 637K) reported that if the lawsuit does proceed, "it could take longer to work through the court than the roughly two-and-a-half years Obama will remain in office." The Washington Times (6/26, Klimas, 455K), Roll Call (6/25, Bellantoni, Dennis, Subscription Publication, 76K), and the Huffington Post (6/25, Bobic, 11.54M) also had reports.

More Commentary. The Wall Street Journal (6/26, Subscription Publication, 5.51M) says in an editorial headlined "Boehner Stands Up" that while critics are saying Boehner is giving in to members of the Tea Party and other House conservatives, he would be unlikely to take such a step without being convinced of its merits and on the constitutional threat of Obama's unilateral actions.

However, Dana Milbank writes in his Washington Post (6/26, 4.22M) column that "even some conservative

scholars argue that lawmakers probably don't have a legal standing for such a suit," and "the real problem with the lawsuit approach is that it misunderstands the cause of the problem: congressional dysfunction. Lawmakers, hamstrung by disagreement, have created a power vacuum, and presidents have stepped in to fill it."

OBAMA HIGHLIGHTS CLIMATE AGENDA SUCCESSES. The AP (6/26, Lederman) reports President Obama "is highlighting efforts by his administration toward reducing greenhouse gas emissions," a key agenda point of his second term, even though "some of the most ambitious steps" the President outlined last June "remain in limbo." Obama addressed the League of Conservation Voters on his efforts Wednesday. The AP says that with many of his priorities having "largely fallen victim to congressional gridlock, climate change marks a rare bright spot" where the President has been able to use executive action effectively.

Politico (6/25, Restuccia, 637K) reported the President "lit into GOP climate change skeptics" in the speech, taking aim "at Republicans for pleading ignorance on climate by saying they aren't scientists." Obama said, "I'm not a doctor either, but if a bunch of doctors tell me that tobacco can cause lung cancer, then I'll say, 'Okay.' It's not that hard."

Editorial Wrap-Up:

NEW YORK TIMES. "*The Supreme Court Saves Cellphone Privacy.*" In an editorial, the New York Times (6/26, Subscription Publication, 9.65M) that with its "gratifyingly sweeping ruling" that police must get a warrant to search the cell phones of those that they have arrested, the Supreme Court "embraced a central reality of the digital age and protected such phones from being searched without a warrant during an arrest, except in rare circumstances."

"Thad Cochran's Debt To Mississippi." In an editorial, the New York Times (6/26, Subscription Publication, 9.65M) argues that since black voters crossed party lines to help Sen. Thad Cochran win his primary runoff, he must "return the favor by supporting a stronger Voting Rights Act and actively working to reduce his party's extreme antigovernment policies."

"David Cameron's Losing Battle." The New York Times (6/26, Subscription Publication, 9.65M) editorializes that British Prime Minister David Cameron's strong opposition to Jean-Claude Juncker as EU president is "a potential turning point for the entire European project." The Times notes while Cameron "has a good case," he should "make sure that his looming defeat does not turn into an irrevocable march" toward an exit from the EU.

WASHINGTON POST. "*The Race In Maryland.*" In an editorial, the Washington Post (6/26, Board, 4.22M) says that Maryland gubernatorial candidates Anthony Brown and Larry Hogan are "sane, sensible and experienced politicians aware that Maryland faces serious challenges in maintaining its relative prosperity." Still, the two must "add meat to the somewhat skeletal programs they are peddling."

"The Right Privacy Call." In an editorial, the Washington Post (6/26, Board, 4.22M) praises the Supreme Court's ruling that police must get a warrant to search the cell phones of those that they have arrested, and adds that the court "raised concerns" about allowing police "free access to information Americans store on remote servers in 'the cloud,'" which "suggests that the justices may have more to say about legal protections for cloud-based information, another place where analogies to old legal norms may prove inadequate."

"Snuffing Out Decriminalization." The Washington Post (6/25, 4.22M) editorializes that House Republicans, in approving "a measure that aims to stop the District [of Columbia] from decriminalizing marijuana," have "ignored the fact that an increasing number of states have taken a similar step and that two have gone so far as to legalize the drug." The Post says the District "was right to decriminalize" marijuana in a "compromise that discourages drug use but tries to mitigate the racial injustices and wrecked lives that have resulted from imprisoning marijuana users." Ironically, the Post argues, by "defunding decriminalization without removing it from the books," the House measure "could effectively legalize pot, since the District couldn't spend any funds on enforcement." The Post concludes by saying the Senate or the Obama Administration "should make clear that the local affairs of D.C. residents are best left to their locally elected officials."

WALL STREET JOURNAL. "*Boehner Stands Up.*" The Wall Street Journal (6/26, Subscription Publication,

5.51M) says in an editorial that while critics are saying that by filing a lawsuit against the Obama Administration, House Speaker Boehner is giving in to members of the Tea Party and other House conservatives, he would be unlikely to take such a step without being convinced of its merits and on the constitutional threat of Obama's unilateral actions.

"GDP's ObamaCare Downgrade." In an editorial, the Wall Street Journal (6/26, Subscription Publication, 5.51M) says that the Affordable Care Act played a significant role in nearly sending the nation back to recession. The Journal guesses that the chaos surrounding the rollout of the ACA's exchanges resulted in many Americans putting off their healthcare spending.

"Contract Is Upheld, World Survives." The Wall Street Journal (6/26, Subscription Publication, 5.51M) editorializes that the court ruling ordering Argentina to repay its debt is significant because New York's status as the world's financial capital relies heavily on the concept that the law is applied fairly across the board.

"Smart Phones And The Fourth Amendment." In an editorial, the Wall Street Journal (6/26, Subscription Publication, 5.51M) backs the Supreme Court's ruling that police must get a warrant to search the cell phones of those that they have arrested, saying it shows that the Constitution remains able to accommodate new technologies.

NORWEGIAN DEFENSE MINISTER – CHANGING ARCTIC – 7:30 a.m. – 10 a.m. 2014 Henry Bacon Breakfast Seminar: "Security Challenges in a Changing Arctic" featuring Norwegian Defense Minister Ine Eriksen Sxreide and US Senator Angus King. Location: Army and Navy Club, Farragut Square, 901 17th St. NW. Contacts: Urd Milbury (Norwegian Embassy), 202-469-3957

CHAMBER OF COMMERCE – DC WATERFRONT – 8 a.m. The DC Chamber of Commerce hosts the 2014 Economic Forum "DC Waterfront: The New Sports Destination." Tom Sherwood of NBC4 heads a panel that will delve into the economic impact DC's Waterfront has on the entire city and its residents. Location: Carnegie Library, 801 K St. NW.

CPSC – FIREWORKS DANGERS – 9:30 a.m. Before Independence Day celebrations begin nationwide, the US Consumer Product Safety Commission (CPSC) is urging consumers to use fireworks safely. CPSC will release new statistics about fireworks-related fatalities and injuries, and will demonstrate the consequences of improper fireworks use. Speakers: Acting Chairman Bob Adler, US Consumer Product Safety Commission; Representative from the Bureau of Alcohol, Tobacco, Firearms and Explosives. Location: On the Washington Monument lawn area in Washington, D.C. (corner of 15th Street and Constitution Avenue), across from the White House Ellipse. The nearest metro station is Smithsonian. Contacts: (301) 504-7908

STIMSON – US DRONE POLICY – 9:30 a.m. – 11 a.m. High-Level National Security Task Force To Release Recommendations On US Drone Policy. Location: The White/Murrow/Lisagor Room; National Press Club, 529 14th Street, NW.

EPA – ENVIRONMENT SUMMIT – 11:30 a.m. US Environmental Protection Agency Administrator Gina McCarthy will deliver remarks to 200 high school students participating in George Mason University's Washington Youth Summit on the Environment program. Location: Johnson Center Cinema, 4400 University Drive, George

Mason University, Fairfax, VA. Contacts: n/a, press@epa.gov

LIBRARY OF CONGRESS – 11:30 a.m. Carrie Anderson, associate chief of the NASA Goddard Planetary System Laboratory, will present “Titan: Exploring the Similarities Between Saturn’s Exotic Moon and the Primordial Earth.” Anderson will discuss what was learned about Titan from NASA’s flagship Cassini mission. Press contact: Donna Urschel (202) 707-1639, durschel@loc.gov. Location: Mary Pickford Theater, Library of Congress.

DEMOCRATIC LEADER PELOSI – LUNCHEON – 12 p.m. National Partnership for Women & Families 2014 Annual Luncheon, honoring House Democratic Leader Nancy Pelosi, who will deliver a featured address. Location: International Ballroom, Washington Hilton Hotel, 1919 Connecticut Avenue NW. Notes: Media must have valid press credential and are encouraged to RSVP in advance to Sadie Kliner at 202-986-2600 or skliner@nationalpartnership.org

US ARMY CORPS OF ENGINEERS ROUNDTABLE – 1 p.m. US Army Corps of Engineers Commanding General Lt. Gen. Thomas P. Bostick hosts a media roundtable, “The State of the Civil Works Infrastructure.” Location: 441 G Street NW.

CARBON DIOXIDE – ENHANCED OIL RECOVERY – 2 p.m. – 4 p.m. Experts from industry, labor, and environmental groups join the National Enhanced Oil Recovery Initiative (NEORI) to discuss how using captured carbon dioxide for enhanced oil recovery can benefit US energy production, the economy, and the environment. Speakers include: former House Majority Leader Richard Gephardt, D-Mo.; former Sen. Tim Hutchinson, R-Ark.; Thomas Altmeyer, Vice President, Government Affairs, Arch Coal; Hunter Johnston, Counsel, Leucadia Energy; Brad Markell, Executive Director, Industrial Union Council, AFL-CIO; John Steelman, Climate Program Manager, Natural Resources Defense Council; Brad Crabtree, Vice President, Fossil Energy, Great Plains Institute; and Patrick Falwell, Solutions Fellow, Center for Climate and Energy Solutions. Location: 385 Russell. Notes: To RSVP, please contact Laura Rehmann, rehmann@c2es.org, 703-516-0621.

ATLANTIC COUNCIL – AFGHANISTAN – 2:30 p.m. – 4 p.m. The Atlantic Council hosts a conversation on “Afghanistan: A Peaceful Transfer of Power in Jeopardy,” with Ronald E. Neumann, former US ambassador to Afghanistan, president of the American Academy of Diplomacy; and David S. Sedney, former deputy assistant secretary of defense for Afghanistan, Pakistan and Central Asia. Moderated by Shuja Nawaz, director, South Asia Center, Atlantic Council. Location: Atlantic Council, 1030 15th St. NW, 12th Floor. Contacts: press@AtlanticCouncil.org, 202-778-4993

CLIMATE CHANGE – LATINO COMMUNITY – 3:30 p.m. – 4:15 p.m. EPA Administrator Gina McCarthy and national Latino leaders hold an online discussion on the impact carbon pollution and climate are having on Latino communities throughout the US. They’ll discuss federal and local policies intended to minimize the worst of those climate change impacts. The Google+ Hangout discussion will be hosted by Voces Verdes (vocesverdes.org/voces-in-action). Contacts: Adrianna Quintero (aquintero@nrdc.org), 415-722-9444. Pam Rivera (privera@nrdc.org), 407-310-0630.

SECRETARY LEW – HMA SUMMIT – 4:45 p.m. US Treasury Secretary Jacob J. Lew will deliver closing remarks at the Making Home Affordable (MHA) Fifth Anniversary Summit. During his remarks, the Secretary will announce additional policies to assist struggling homeowners, provide more affordable housing options for renters, and expand access to credit for borrowers. Location: US Department of the Treasury Department, The Cash Room, 1500 Pennsylvania Avenue, NW.

ATLANTIC COUNCIL – MILIBAND – 6 a.m. – 7:30 p.m. The Rt. Hon. David Miliband: 2014 Christopher J. Makins Lecture. A discussion with the Right Honorable David Miliband, President and CEO, International Rescue Committee and former British Secretary of State for Foreign and Commonwealth Affairs Moderated by Mr. David Iqantius, Associate Editor and Columnist, Washington Post. RSVP to press@atlanticcouncil.org by June 20. Location: The British Ambassador’s Residence, 3100 Massachusetts Ave, NW.

TORTURE AWARENESS MONTH EVENT – 6 p.m. June is Torture Awareness Month, and the National Religious Campaign Against Torture is providing local congregations and faith organizations resources and activities to honor survivors of torture, “Exposing the Truth of US Torture: Restoring Human Dignity.” Witnesses:

Imam Mohamed Magid, Imam, ADAMS Center; Dr. Azizah al-Hibri, Founder & Chair, KARAMAH: Muslim Women Lawyers for Human Rights; member, The Constitution Projects Task Force on Detainee Treatment; Ambassador Thomas R. Pickering, former US Under Secretary of State for Political Affairs; member, The Constitution Projects Task Force on Detainee Treatment; Rev. Ron Stief, Executive Director, National Religious Campaign Against Torture. CONTACT: Samantha Friedman, West End Strategy Team Office: (202) 776-7700; cell: (202) 215-9260 or Samantha@westendstrategy.com. Location: 1420 16th Street, NW. Notes: There was a similar event held on the 6th in Virginia.

Last Laughs:

LATE NIGHT POLITICAL HUMOR.

Stephen Colbert: "Nation, President Barack Obama has been one big national disgrace. First, it was the embarrassing mom jeans. Then there was the embarrassing mom blouse and the embarrassing mom hairdo. Then there was the embarrassing realization that I was looking at a photo of my mom. Thanks a lot, Obama. Folks, his biggest blunder yet came at a recent visit to a Chipotle. [Shows photo of Obama reaching over sneeze guard at Chipotle] ... This proves that Obama cares nothing about border security."

Dear sage grouse team -

Yahoo to all of you! I know this has been a long time coming, but as the first plan, it was important to make sure we were very thoughtful. Thank you for your hard work and perseverance - it is one important step forward in our ambitious plan to save the sage grouse and other species dependent on this habitat. I also really appreciate the partnership developed with the state of Wyoming and the leadership of Governors Mead and Freudenthal in stepping forward with executive actions to support the species' recovery.

I hope you take a minute to celebrate this important milestone on our accelerating and important journey!

Cheers,

Sally

- + Late Night Political Humor.

DOI in the News:

SECRETARY JEWELL ANNOUNCES USGS REPORT ON CARBON STORAGE. The E&E Daily (6/26) reports Interior Secretary Sally Jewell on Wednesday announced a new USGS report that “reinforced its earlier findings that forests, not farms, are America’s biggest carbon sink.” Jewell called it a “landmark study” that “provides yet another reason for being good stewards of our lands and waters.” USGS Director Suzette Kimball said, “Biological sequestration may not be able to offset greenhouse gas emissions nearly as effectively when these ecosystems are impaired.”

The UPI (6/27) reports that the assessment finds that the East stores more carbon than all of the rest of the lower 48 states combined even though it has fewer than 40 percent of the land base. The article notes that “wetlands, which cover 9 percent of the eastern United States, accounted for about 13 percent of the carbon sequestration,” and “agricultural areas cover 31 percent of the eastern part of the country and stores 4 percent, the study finds.”

The Feedstuffs (6/27) reports along with the national assessment, the USGS also “released a new web tool that allows users to see the land and water carbon storage and change in their ecosystems between 2005 and 2050 in the lower 48 states.”

Also providing coverage are the Geo Community (6/26) and the Air Resources Board (CA) (6/26).

House Holds Hearing On Grazing And Carbon Sequestration. Meanwhile, the E&E Daily (6/26) reports that the House Natural Resources Subcommittee on Public Lands and Environmental Regulation explored how improved grazing practices on public lands might help sequester carbon. The article notes that the “hearing was marked by little partisanship and hewed mostly to the scientific merit of using cows to transform rangelands into better sponges of CO2.”

SECRETARY JEWELL ANNOUNCES DOWNLISTING OF WOOD STORK. The E&E Daily (6/26) reports that Interior Secretary Sally Jewell announced on Thursday the downlisting of the wood stork to threatened status, emphasizing the move as an example of the success of the Endangered Species Act. Jewell used the decision to highlight ESA as an “effective tool to protect and recover imperiled wildlife from the brink of extinction.” She said, “From the Cyprus swamps of Georgia, to the inland waterways of Florida, wetlands and their wildlife are emblematic of the American Southeast. Through important conservation partnerships, the US Fish and Wildlife Service is working to rebuild a healthy wetland ecosystem, which, in turn, is helping restore the wood stork’s habitat, double its population since its original listing and keep the bird moving in the right direction toward recovery.”

Also reporting on the story are the AP (6/27, Bynum), Reuters (6/27), the Miami Herald (6/27, Staletovich, 822K), the Naples (FL) Daily News (6/26, 167K), the Florida Times-Union (6/26, 449K), the Palm Beach (FL) Post (6/27, 280K), the State (SC) (6/26, 299K), the Marietta (GA) Daily Journal (6/27, 56K), The Chattanoogan (6/27, 12K), the South Florida Sun Sentinel (6/26, 779K), the Savannah (GA) Morning News (6/26, 226K),

WGCU-FM Fort Myers, FL (6/27), WJCL-TV Savannah, GA (6/26, 2K), and WJCL-TV Savannah, GA (6/26, 2K).

Coverage by the AP was also picked up by the Washington Post (6/27, 4.22M), Fox News (6/26, 6.72M), USA Today (6/26, 5.82M), ABC News (6/27, 3.58M), CBS News (6/27, 5.21M), the Newser (6/27, 260K), the Fort Myers (FL) News-Press (6/26, 210K), the Houston Chronicle (6/27, Bynum, 2.23M), the Sacramento (CA) Bee (6/26, 687K), the Boston Globe (6/26, 1.62M), the Longview (TX) News-Journal (6/27, 69K), the Erie (PA) Times-News (6/27, 149K), the Omaha (NE) World-Herald (6/27, 530K), and WFOR-TV Miami (6/26, 31K).

Additional coverage was provided by the Center for Biological Diversity (6/27), the ENews Park Forest (6/27, 2K), and the Got News Wire (6/27).

SECRETARY JEWELL MEETS HARRIS NECK LAND TRUST MEMBERS. The Florida Times-Union (6/26, 449K) reports that “members of the Harris Neck Land Trust met Thursday with Interior Secretary Sally Jewell, the head of the agency that owns land they assert is rightfully theirs.” Jewell “met more than half an hour with members of

the land trust and took away information on the Hamis Neck Land Trust and its claims," according to Wilson Moran, "a land trust member whose family was displaced during World War II." According to Moran, Jewell was "guarded in her responses and made no promises."

INTERIOR AWARDS \$4.5 MILLION IN GRANTS TO REMOVE AGING DAMS. The Taunton (MA) Gazette (6/26, Winokoor, 36K) reports that "Taunton is one of nine municipalities that will receive a portion of \$4.5 million in grant money from the US Department of the Interior to remove aging and potentially hazardous dams in the commonwealth." The article notes that "another \$240,000 for other projects has been allocated by the DOI for the state's Department of Fish and Game's Division of Marine Fisheries."

SENATE CONFIRMS ESTHER KIAAINA AS ASSISTANT SECRETARY. The Honolulu Star-Advertiser (6/27, 402K) reports that the Senate has voted unanimously to confirm Hawaii's Esther Kiaaina's nomination to serve as assistant secretary for Insular Areas at the Department of Interior.

Also providing coverage are the "Floor Action" blog of The Hill (6/27, Marcos, 237K), the Big Island (HI) Now (6/26), the Honolulu Civil Beat (6/27, 41), the Hawaii Reporter (6/27, 8K), the Hawaii Independent (6/27), the Pacific News Center (6/27), the Pacific News Center (6/27), the Pacific Business News (6/26, Subscription Publication, 53K), and the Pacific (GUM) Daily News (6/27, 61K).

SENATE CONFIRMS VINCE LOGAN TO RUN OFFICE OF THE SPECIAL TRUSTEE. The Nation Sun News (6/27) reports that the Senate voted on Thursday to confirm Vince Logan as the leader of the Office of the Special Trustee for American Indians. Interior Secretary Sally Jewell said, "As an investment professional, a mentor for Native American attorneys, and a member of the Osage Nation, Vince has been deeply rooted in Indian Country for many decades. His asset management expertise, legal experience and extensive network of professional relationships in Indian Country will well serve the Office of Special Trustee and the Department of the Interior as we work to build a stronger and more responsive trust asset management system for the nation's First Americans. I am pleased the Senate voted to confirm him to this leadership post at Interior."

SENATE PANEL ADVANCES REPORT-SLASHING BILL. The E&E Daily (6/26) reports that "a bill to kill a slew of outdated federal reports across the government sailed through a Senate committee yesterday." H.R. 4194, the "Government Reports Elimination Act," would "put a stop to studies that are seen as obsolete." According to the article, "that includes an annual Interior Department report on a royalty-in-kind program that was discontinued in 2009 and a Department of Homeland Security study on the illegal importation of dog and cat fur products that is done annually, even though only one violation has been found in the past five years."

Additional coverage of the of Management and Budget's identification of unnecessary agency reports was provided by the Government Executive (6/27, 28K) and the Fierce Government (6/27, 224).

SEN. MURKOWSKI PRESSES OBAMA ADMINISTRATION TO BOOST FOCUS ON ENERGY INDUSTRY'S WATER USE. The E&E Daily (6/26) reports that Alaska Sen. Lisa Murkowski pressed the Obama Administration on Wednesday "to boost its focus on addressing challenges with the energy industry's thirst for vulnerable water resources." During a hearing of the Water and Power Subcommittee, Energy and Interior department officials "touted the agencies' efforts at addressing 'energy-water nexus' issues, which has become a buzz term among policy circles." However, Nicole Carter, Congressional Research Service policy expert, said "federal actions to coordinate and address related issues 'have been limited' and the impact of others 'remains to be seen.'" The article notes that Murkowski is "pushing a bill to create a federal mechanism to respond to energy-water problems, including boosting cooperation."

SEN. REID URGED TO HOLD VOTE ON BIPARTISAN DISASTER FUNDING BILL. The E&E Daily (6/26) reports that "more than a dozen senators, most of them Democrats and from the West," on Thursday urged Senate Majority Leader Harry Reid and Minority Leader Mitch McConnell "to hold a vote on a bipartisan bill to reform how the nation budgets for wildfires." The letter "spearheaded" by Sens. Ron Wyden and Mike Crapo "urges action on their bill S. 1875, which seeks to prevent the Forest Service from running out of wildfire suppression funding and siphoning cash from other programs." The letter signed by all 14 of the bill's sponsors urges the leaders to consider the measure in "any upcoming appropriate legislative vehicle."

OFFICIALS SAY EGLIN AIR FORCE BASE COULD CONDUCT TRAINING MISSIONS IN FLORIDA STATE

FORESTS. The [E&E Daily](#) (6/26) reports that Air Force officials claim that Eglin Air Force Base has grown to be "overcrowded, and they have made an unprecedented request to conduct regular, frequent ground training in two nearby Florida state forests." According to the article, "dozens of special forces troops, the type of elite soldiers leading the fight against terrorism, along with heavy trucks, helicopters, airplanes, smoke grenades and thousands of paintballs, would enter the forests as often as 232 days a year." Moreover, "federal and state officials say this is just the beginning, with plans to stage war games in woodlands all across Florida and perhaps other states in coming years."

ADDITIONAL COVERAGE: OBAMA ADMINISTRATION HOLDS HEARINGS IN HAWAII. Additional coverage of the public hearings being held on Native Hawaii self-governance was provided by the [Hawaii Free Press](#) (6/27) and the [Hawaii Independent](#) (6/27).

ADDITIONAL COVERAGE OF PLANS TO EXPAND PACIFIC REMOTE ISLANDS MARINE NATIONAL MONUMENT. Additional coverage of the plans to expand the Pacific Remote Islands Marine National Monument was provided by the [Hawaii Independent](#) (6/27).

ADDITIONAL COVERAGE OF PHOTO OF FATHER AND SON AT ARCHES NATIONAL PARK. Additional coverage of the posting of James Geier and his son at Arches National Park by the Interior Department on Instagram was provided by the [Deseret \(UT\) News](#) (6/27, 610K).

LGBT INITIATIVE LAUDED. For the [Gay City News](#) (6/27, 35), Amin Ghaziani, an associate professor of sociology at the University of British Columbia, writes that "on behalf of the National Park Service, Interior Secretary Sally Jewell recently announced plans for an unprecedented study of LGBT history." He says that the decision by the NPS "to commemorate places of significance to LGBT history, many of which are located in gay neighborhoods, comes at an opportune time."

America's Great Outdoors:

National Park Service:

NPS SAYS DRONES COULD DISTURB WILDLIFE. The [AP](#) (6/27) reports that "a short video shot inside Denali National Park from a camera mounted on a drone shows the potential for how the unmanned devices could bother wildlife or people watching it, according to a park spokeswoman." Kris Fister said, "They were in the Savage River parking lot and they flew up and provided an overview of the area and then at one point the aircraft zoomed down, flew right over the nest enclosure that we have for the mew gulls that nest on the gravel bar and flew under the Savage River bridge. So that's an instance where certainly there was high potential for wildlife disturbance and potentially disturbance to visitors who are also utilizing that parking lot."

Also reporting on the story is the [Fairbanks \(AK\) News-Miner](#) (6/27, 44K).

BILL SEEKS TO MOVE OCMULGEE NATIONAL MONUMENT CLOSER TO NATIONAL PARK DESIGNATION. The [Macon \(GA\) Telegraph](#) (6/26, 184K) reports that "a new bipartisan bill could help the Ocmulgee National Monument move significantly closer to becoming a national park." The proposed legislation, called the Ocmulgee Mounds National Historical Park Boundary Revision Act of 2014, would "expand the park's acreage from about 700 acres to more than 2,000 acres and would change the name of the monument to the Ocmulgee Mounds National Historical Park." The article notes that "perhaps most importantly, the bill would authorize a study about further expansion of the park between Macon and Hawkinsville."

FORT RENO CONCERT SERIES CANCELED FOR SUMMER. In its "Going Out Guide" blog, the [Washington Post](#) (6/27, Richards, 4.22M) reports that "the District's annual concert series at Fort Reno Park will go dark for the first summer in decades." According to a statement from concert series organizer Amanda MacKaye, the NPS and the U.S. Park Police "asked Fort Reno organizers to pay for an officer to be posted on site at each concert." But "that cost would 'literally double the VERY small budget of the concert series...' MacKaye wrote."

The [Washington City Paper](#) (6/26, 862K) reports that the NPS said it and USPP are "reviewing the details of previous permits and previous law enforcement needs related to the concert series."

Also reporting on the story are the [Washington Post](#), WRC-TV Washington (6/27, 312K), and the [DCist](#) (6/27, 21K).

NPS' "TRASH-FREE PARKS" CAMPAIGN APPEARS TO BACKFIRING. [WTTG-TV](#) Washington (6/27, 169K) reports that a program by the NPS "aimed at removing garbage cans seems to be backfiring." According to the article, "when the National Park Service first started pulling garbage cans out of some of the most popular parks in northern Virginia, the hope was that people would take the hint and start taking their garbage back to their homes." But "it turns out though, for many, that message hasn't been delivered."

FLOODING, ROCKFALLS STRAND MORE THAN 100 PEOPLE IN DENALI NATIONAL PARK. The [AP](#) (6/27) reports that "officials have closed the only road that goes into Denali National Park and Preserve at the Eielson Visitor Center because of flooding and rock falls, marooning some guests and employees." According to park spokeswoman Kris Fister, "overnight rains turned small streams into raging torrents," and "then later Thursday, the road was closed at the Eielson Visitor Center because of falling rock at nearby Eielson Bluffs." Fister said "some guests and employees at private lodges in Kantishna, and more than 12 park employees, are marooned at the western end of the park road, but everyone's safe."

The AP (6/27) reports that "officials have organized an airlift for dozens of lodge guests and lodge employees at Denali National Park and Preserve after flooding hit one lodge and flooding and rockfalls prompted the closure of the only road into the park on Thursday."

Also reporting on the story is [KTUU-TV](#) Anchorage, AK (6/27, 4K).

WASHINGTON'S NATIONAL PARKS FACE BUDGET CHALLENGES. The [Sacramento \(CA\) Bee](#) (6/26, 687K) reports that the shutdown of the federal government last year "spotlighted the difficulties national parks face in times of uncertain funding, including a nationwide maintenance backlog of more than \$11 billion." The article notes that "each of Washington's three biggest national parks face challenges from what North Cascades National Park Superintendent Karen Taylor-Goodrich calls years of 'general budget erosion.'"

SMOKY MOUNTAINS PROVIDE SCENIC AND SCIENTIFIC APPEAL. The [Tennessean](#) (6/26, 414K) reports that Great Smoky Mountains National Park is "the nation's most visited," and is "one of the top three in the National Park Service system for research." The article notes that "the park has about 170 active research permits and is at the forefront of studying the effects of climate change on the environment." According to the article, "from government agencies such as NASA to universities and even schoolchildren and volunteers, all are on the ground in the Smokies helping conduct research."

NPS DOCUMENT LAYS OUT SCOPE OF FORT MONROE NATIONAL MONUMENT. The [Newport News \(VA\) Daily Press](#) (6/26, 206K) reports that on Thursday, the NPS "released a partial draft a 'Fort Monroe National Monument Foundation Document' — an outline of goals and plans for the 325-acre monument based on discussions it has held privately with scholars, local residents and planners." Susan Spain, an NPS landscape architect said that the document "talks about why we do things and what we're protecting." The NPS will "continue working with scholars and the public to discover more detail about the property and the stories that need be told there."

NPS SUPPORTS "ROCKAWAY!". The [New York Times](#) (6/27, Ryzik, Subscription Publication, 9.65M) reports that "put together in just a few months, Rockaway!...begins on Sunday and runs through Sept. 1, with a full schedule that includes installations and photography" by Patti Smith, "an immersive sound piece by Janet Cardiff and sculpture by the Argentine artist Adrián Villar Rojas in and around Fort Tilden, and a satellite exhibition of art at Rockaway Beach Surf Club." The article notes that "it represents an unusually nimble partnership between the transplants, Ms. Smith and Mr. Biesenbach, and the local occupants: the long-running Rockaway Artists Alliance, the National Park Service and the Jamaica Bay-Rockaway Parks Conservancy."

COUNTRY SINGER DOREEN TAYLOR PROMOTES NATIONAL PARKS. [Fox News](#) (6/26, 6.72M) reports that country star Doreen Taylor has written "a song and created a video to celebrate the National Park Service, 'Colors of the U.S.A.'" the article notes that "sales of 'Colors of the U.S.A.'" will benefit the National Park Conservation Association (NPCA)."

Bureau of Land Management:

BLM: NO MONEY, ROOM FOR MORE MUSTANG ROUNDUPS. The AP (6/27, Sonner) reports that "saying they don't have money or room to corral many more wild horses, federal land managers have sided with horse advocates in calling for the dismissal of a lawsuit demanding acceleration of roundups." The motion filed Tuesday in U.S. District Court in Reno targets the suit by the Nevada Association of Counties and Nevada Farm Bureau Federation. Lawyers for the BLM "emphasized the agency has broad discretion to manage federal land as it sees fit, and agreed with the ranchers' contention that current herds are overpopulated and threaten the ecological integrity of the range." However, "they said BLM is hamstrung by budget cuts, and a congressional ban on the sale of excess horses for slaughter has pushed their holding facilities to the brink of capacity."

Coverage by the AP was also picked up by the Sacramento (CA) Bee (6/26, 687K), the Salem (OR) Capital Press (6/26, 113K), and the Santa Fe New Mexican (6/27, 58K). Also reporting on the story is the Elko (NV) Daily Free Press (6/27, 22K).

Commentary. The East Oregonian (6/27, 24K) gives "a kick in the pants to the Bureau of Land Management, who said they do not have money or room to corral the wild horses running roughshod over the West."

The Salt Lake (UT) Tribune (6/27, 470K) editorializes that "the feds are being petitioned to list the horses as an endangered species, an argument that relies on a fossil record of Pleistocene mustangs." It notes that "the range managers at the Bureau of Land Management aren't buying that, but it will be the U.S. Fish and Wildlife Service that decides." The paper concludes that "only a meeting of the nation's hearts and heads about wild horses will drive a solution."

BILL INTRODUCED TO CLARIFY OWNERSHIP OF RED RIVER LAND. The Breitbart (6/26, 356K) reports that Rep. Thornberry has introduced the Red River Private Property Protection Act (H.R. 4979) "to clarify ownership of the land along the Red River boundary between Texas and Oklahoma." Thornberry has asked the House Resources Committee to hold "a hearing on the bill as soon as possible and he believes it could move forward as quickly as next month." BLM spokesman Paul McGuire said, "BLM is aware of the proposal, and we're eager to work with Congressional leaders and other stakeholders to address and resolve the important land use and ownership issues raised by our planning efforts along the Red River. We've been reaching out to landowners and elected officials at multiple meetings since concluding our formal scoping phase earlier this year, and all parties are motivated to work together."

BLM ALLOWS CONTRACTS WITH UTAH COUNTY SHERIFFS TO LAPSE. The Talking Points Memo (6/27, 223K) reports that "alongside all the BLM-related controversy in the West, the BLM has allowed its contracts with five Utah county sheriff offices to expire over the past year or so." The bureau "says that the move is wholly unrelated to any of broader disagreements over federal authority, which gained national attention since the Bundy Ranch standoff in Nevada." However, "the Utah county sheriffs believe otherwise." BLM spokeswoman Megan Crandal said that "the expired contracts were 'absolutely and unequivocally' unrelated to any other issues." The bureau has "concerns about the contracts' 'deliverables' – which are the specific services (and the accompanying documentation) that the county sheriffs are supposed to provide, she said."

Fish and Wildlife Service:

ENDANGERED RAZORBACK SUCKERS DISCOVERED SPAWNING IN GRAND CANYON NATIONAL PARK. The Ogden (UT) Standard-Examiner (6/26, 147K) reports that the Interior Department has announced that "researchers recently discovered Razorback suckers (*Xyrauchen texanus*), an endangered fish species, spawning in the lower Colorado River within Grand Canyon National Park." The article notes that "the detection of larval Razorback suckers, believed to have been missing from the Grand Canyon since the 1990s, provides evidence that these fish may be naturally reproducing in an area where the species has not been seen in over 20 years." Assistant Secretary for Water and Science Anne Castle said, "The discovery that the Razorback suckers are spawning in the national park far upstream from Lake Mead is good news for this endangered species. It is also a demonstration of the power of the partnership among Interior's Bureau of Reclamation, National Park Service, U.S. Fish and Wildlife Service and U.S. Geological Survey, who have worked for recovery of this species side-by-

side with Arizona state officials, Indian tribes, private landowners and researchers.”

ALASKA PURSUES LAWSUIT OVER REFUGE LAND CLOSURES. The AP (6/27, Bohrer) reports that “arguments are scheduled for July in Alaska’s ongoing legal fight over the closure of national wildlife refuges during the partial shutdown of the federal government last year.” The lawsuit claims “the closure of refuge land during the shutdown violated provisions of the Alaska National Interest Lands Conservation Act.”

Coverage by the AP was also picked up by the Seattle Post-Intelligencer (6/27, 857K) and the York (SC) Enquirer-Herald (6/26, 18K).

FWS SAYS SELKIRK MOUNTAIN CARIBOU ARE A DISTINCT POPULATION. The AP (6/27) reports at an open house in Sandpoint, Idaho, FWS officials argued that “the South Selkirk caribou herd deserves protection as a distinct population under the Endangered Species Act.” Bryon Holt, a fish and wildlife biologist supervisor, at the open house, said, “This is the last, remnant caribou herd in the Lower 48. It has unique behavioral traits that we’d hate to lose from the landscape.”

Coverage by the AP was also picked up by the Washington Times (6/27, 455K) and the Columbus (IN) Republic (6/27, 81K).

FWS SEEKS PUBLIC COMMENT ON SNAKE BAN PROPOSAL. The AP (6/27) reports that the FWS is “seeking more public comment on a proposal to add five types of giant snakes to an existing federal python ban.” Officials have “proposed adding boa constrictors, reticulated pythons and three species of anacondas to the ban that already prohibits anyone from importing Burmese pythons, yellow anacondas and northern and southern African pythons into the US or transporting them across state lines.”

JUDGE SETS 2018 DEADLINE FOR EFFORT TO SAVE LYNX. The E&E Daily (6/26) reports that a federal judge on Wednesday accepted a 2018 deadline proposed by the FWS “for the government to finish a recovery plan for the Canada lynx in the contiguous United States.” Although US District Judge Donald Molloy said the agency’s “stutter-step” approach “necessitated court intervention,” he said “he was reluctant to second-guess officials with tight budgets and competing priorities.”

For the Durango (CO) Herald (6/25, 28K), Dan Olson, executive director of the San Juan Citizens Alliance, claims that the FWS “is supposed to care about lynx, but doesn’t.”

ARGUMENTS HEARD ON MONTANA PLAN TO EXPAND LOGGING ON GRIZZLY, BULL TROUT HABITAT. The Missoulian (MT) (6/27, 122K) reports that “a state plan to expand logging on school trust lands would ruin crucial habitat for grizzly bears and bull trout near Whitefish, attorneys argued in federal court Thursday.” The Montana Department of Natural Resources and Conservation “wants to increase its revenue from about 550,000 acres of state land scattered across the western half of the state.” The state “seeks a 50-year ‘incidental take’ permit from the U.S. Fish and Wildlife Service that would forgive any loss of bears or fish because of logging or road-building in that area.”

MAN PLEADS GUILTY TO ROLE IN SMUGGLING RHINO HORNS TO CHINA. The E&E Daily (6/26) reports that “a Texas man pleaded guilty in federal court Tuesday to helping smuggle \$1 million worth of rhinoceros horns and other illicit wildlife products from the United States to China.” The FWS said “Ning Qiu was part of the trafficking ring led by Zhifei Li, who was sentenced to 70 months in prison.”

NEW REPORT CLAIMS BYCATCH WASTES UP TO \$1 BILLION. The E&E Daily (6/26) reports that “fishermen in the United States waste as much as \$1 billion each year by discarding fish they didn’t mean to catch, according to a new report from Oceana that calls for stronger controls on so-called bycatch.” The article notes that “the conservation group has long pressured the National Marine Fisheries Service to crack down on bycatch, the fish and marine animals that fisherman inadvertently catch and then discard.” However, the report “takes a new tact: equating wasted fish to wasted money.”

NOAA TO CONSIDER DELISTING NORTH PACIFIC HUMPBACK WHALES. The E&E Daily (6/26) reports that the National Oceanic and Atmospheric Administration has announced that “it will consider Alaska’s request to delist a North Pacific population of the humpback whale, as part of a review of the mammal’s global population.”

ACTIONS RESTRAINING HUNTERS FROM KILLING ELEPHANTS SUPPORTED. In an op-ed for [CNN](#) (6/27, Pacelle, 12.15M), Wayne Pacelle, president and CEO of the Humane Society of United States, write that “very wealthy hunters, mainly from the United States, are picking off elephants in their zeal to bag the biggest tusks and trophies and rise within the ranks of the global trophy hunting fraternity.” However, “there’s reason to believe that, as a result of meaningful actions taken by African governments as well as the US government to restrain trophy hunters, this intentional killing may subside.” He notes that “two African countries, Botswana and Zambia, have just outlawed trophy hunting,” and the FWS has “temporarily stopped issuing permits for hunters to bring home their elephant trophies from Tanzania and Zimbabwe, where hunting is legal and poorly regulated.”

Ivory Ban Criticized. Meanwhile, in an op-ed for the [North Jersey \(NJ\) Media Group](#) (6/27, 125K), Ann McFeatters doesn’t understand “the Obama administration’s thinking that almost all sales of anything with ivory in it should be banned.” She notes that “at a recent hearing of the House Subcommittee on Fisheries, Wildlife, Oceans and Insular affairs, experts on musical instruments, hunting, conservation and antiques said, in effect, the government is nuts.”

US Geological Survey:

NORTH CAROLINA CHANGES CLIMATE CHANGE FORECAST FOR OUTER BANKS. The [Washington Post](#) (6/25, A1, Montgomery, 4.22M) reports in a front-page story that in the wake of a 2011 report from North Carolina officials that said “the ocean would be 39 inches higher and her home on the Outer Banks would be swamped” by the end of the century, coastal residents and climate change skeptics joined forces “to attack the science of global warming and persuade North Carolina’s Republican-controlled legislature to deep-six the 39-inch projection.” The state is now “is working on a new forecast that will look only 30 years out and therefore show the seas rising by no more than eight inches.” The move “appalled” environmentalists, and North Carolina “has been lampooned as a hotbed of greedy developers trying to ‘outlaw’ the rising tide.”

SCIENTISTS URGE CONGRESS TO CONSIDER FUNDING EARLY-WARNING EARTHQUAKE SYSTEM. The [Homeland Security News Wire](#) (6/27) reports that “scientists are urging Congress to consider funding the full-scale deployment of an early-waming earthquake system on the western coast of the United States following successful testing of a prototype and positive results from similar international systems.” Doug Given, the head of the USGS’ Southern California Earthquake Monitoring Project with the California Institute of Technology, “warned that sooner would be much better than later.” He said, “We are sure there will be such a system after a big earthquake. We would like to do it before a big earthquake.”

Securing America’s Energy Future:

Renewable Energy:

FWS APPROVES FIRST EAGLE-KILL PERMIT FOR WIND FARM. The [E&E Daily](#) (6/26) reports that the Obama Administration on Thursday “announced approval of the first-ever permit for a wind farm to legally kill or harm protected eagles under a plan that officials say will have no overall harm on eagle populations.” The FWS said “it will issue Shiloh IV Wind Project LLC a five-year permit to ‘take’ up to five eagles at its 50-turbine wind farm north of San Francisco.” FWS Director Dan Ashe said the EDF Renewable Energy subsidiary is setting “a precedent for proactive and collaborative eagle conservation at wind farms in Northern California and beyond.”

Also reporting on the story are the [AP](#) (6/26, Smith, 81K), [The Hill](#) (6/27, Cama, 237K), [CNN](#) (6/27, Erdman, 12.15M), and the [Washington Times](#) (6/27, Ernst, 455K).

Coverage by the AP was also picked up by the [Wall Street Journal](#) (6/27, Subscription Publication, 5.51M), the [Washington Post](#) (6/27, 4.22M), the [Washington Times](#) (6/27, Smith, 455K), the [Atlanta Journal-Constitution](#) (6/27, 1.36M), the [Philly](#) (6/27, 1.64M), the [Poughkeepsie \(NY\) Journal](#) (6/26, 149K), the [Sacramento \(CA\) Bee](#) (6/26, 687K), the [Visalia \(CA\) Times-Delta](#) (6/26, 42K), the [US News & World Report](#) (6/26, 645K), [ABC News](#) (6/27, 3.58M), [CBS News](#) (6/27, 5.21M), [WGGB-TV](#) Springfield, MA (6/26, 3K), and [WJBK-TV](#) Detroit (6/27, 83K).

Wind Industry Claims It's Addressing Impact On Eagles. In an op-ed for the Loveland (CO) Reporter-Herald (6/27, 52K), John Anderson, the director of siting policy for the American Wind Energy Association, writes that "the wind energy industry does more to address its impacts on eagles than any of the other, far greater sources of eagle mortality known to wildlife experts." He claims that "wind has taken the most proactive and leading role of any utility-scale energy source to minimize wildlife impacts in general, and specifically for eagles, through constantly improving siting and avoidance and minimization techniques, and identifying options to offset the industry's comparatively minimal impacts."

BLM WEIGHS PROPOSAL TO BURY INTERSTATE LINE NEAR WHITE SANDS MISSILE RANGE. The E&E Daily (6/26) reports that the BLM will "conduct a formal environmental assessment (EA) of the much-debated proposal to bury up to 5 miles of a multistate power line project in an effort to avoid interfering with the Army's White Sands Missile Range." According to the BLM, "the EA will explore whether burying three sections of the 515-mile-long SunZia Southwest Transmission Project near the New Mexico missile range represents 'substantial changes in the proposed action that are relevant to environmental concerns' or presents 'significant new circumstances or information relevant to environmental concerns' associated with burying the lines." If so, the bureau would "conduct a more in-depth supplement to the final environmental impact statement (EIS) that it released for the New Mexico-to-Arizona SunZia project in June 2013."

Meanwhile, the Ruidoso (NM) News (6/27, 40K) reports that "Lincoln County ranchers with a stake in the future of a proposed renewable energy transmission line that would carry wind-generated power to Arizona and California are hoping a proposed resolution survives an environmental review and they may see wind farms in their future." A proposed resolution between the U.S. Department of Defense and the BLM and SunZia would "involve burying three separate segments of the line north of White Sands Missile Range in the 'call-up' area of controlled air space to satisfy military concerns that an above-ground line would hamper defense training."

The story also appears at the Las Cruces (NM) Sun-News (6/27, 59K).

IMPERIAL IRRIGATION DISTRICT TOUTS SALTON SEA PLAN. The Palm Springs (CA) Desert Sun (6/27, 111K) reports that "a plan to increase renewable energy production in and around the Salton Sea — and have utilities help finance the ailing lake's ultimate restoration — was touted on Capitol Hill this week." Bruce Wilcox, a Salton Sea expert at the Imperial Irrigation District, said "the agency's plan would generate about \$3 billion over 30 years." Meanwhile, IID General Manager Kevin Kelley said the IID "still awaits a response to a request to the Interior Department, made in February, to commit to allowing renewable energy projects on 80,000 acres it owns in the Salton Sea."

ADDITIONAL COVERAGE OF PUBLIC MEETINGS ON OFFSHORE WIND PLANNING. Additional coverage that the BOEM is holding meetings on offshore wind power in Massachusetts was provided by the New Bedford (MA) Standard-Times (6/25, 54K).

Onshore Energy Development:

BLM SAGE GROUSE PLAN FOR WYOMING RECEIVES MIXED REVIEWS. The E&E Daily (6/26) reports that a BLM plan "governing sage grouse protections and oil and gas leasing across some 2.8 million acres in central Wyoming" on Thursday "drew praise" from Gov. Matt Mead and the FWS, "but was panned by conservationists as a missed opportunity to prevent further demise of the bird's sagebrush habitat." The BLM "signed a record of decision for its Lander resource management plan (RMP) in Mead's office in Cheyenne, culminating about seven years of collaborative planning with the state, counties, federal partners, conservation groups, historical preservationists and industry, among others." Mead and BLM Director Neil Kornze "touted the plan as a potential template for state-federal cooperation as BLM updates RMPs covering sage grouse habitat in nearly a dozen other states."

Also reporting on the story are the AP (6/27, Neary), the County 10 (6/26), and KTWO-AM Casper, WY (6/27, 576).

Coverage by the AP was also picked up by the Greenfield (IN) Daily Reporter (6/27, 31K), the Columbus (IN) Republic (6/27, 81K), the Riverton (WY) Ranger (6/27, 167), and the Connecticut Post (6/27, 252K).

WESTERN ENERGY ALLIANCE SUPPORTS PROPOSED RULE ON VALUATION OF INDIAN ENERGY

ASSETS. The [Oil & Gas Financial Journal](#) (6/27, 425) reports that Western Energy Alliance has “joined the Office of Natural Resources Revenue (ONRR) and Interior Secretary Sally Jewel in applauding the release of proposed rules governing valuation of Indian oil assets.” Kathleen Sgamma, vice president of government and public affairs for Western Energy Alliance, said, “The proposed rule demonstrates that when industry, the federal government, and key stakeholders work together, sensible rules can be implemented. The negotiated rulemaking committee worked for more than a year to develop a consensus on valuing Indian oil appropriately so that tribes and allottees receive a fair share of royalties while not discouraging development on Indian lands.”

Offshore Energy Development:

HOUSE PASSES BILL AIMED AT EXPANDING ENERGY PRODUCTION ON FEDERAL LANDS. The “Floor Action” blog of The Hill (6/27, Marcos, 237K) reports that the House yesterday “passed a bill to expand energy production on federal lands.” The measure was passed 229-185 and “is part of the House GOP’s focus this week on boosting domestic energy production as a means of lowering gas prices.” The sponsor of the bill, Rep. Doc Hastings, “said the conflict in Iraq demonstrated the need to reduce American reliance on foreign oil.” Hastings said, “The current turmoil in Iraq has already caused the price of gasoline to increase, and it serves as an important reminder of why we need to increase production here at home. ... The best way to protect ourselves from price spikes caused by international conflicts is to increase the production of American energy resources.” The bill “would require the secretary of Interior to conduct oil and natural gas lease sales that were delayed by the Obama administration, including off the coasts of Virginia and South Carolina.”

The Hill (6/27, Barron-lopez, Cama, 237K), the National Journal (6/27, Subscription Publication, 561K), the Los Angeles Times (6/27, Simon, 3.46M), the FuelFix (6/26, 7K), the Upstream Online (6/27, 20K), and the New Orleans Times-Picayune (6/27, Alpert, 678K) also provides coverage of this story.

Tackling America’s Water Challenges:

NEW GRAND COULEE DAM POWER MANAGER NAMED. The [Star of Grand Coulee \(WA\)](#) (6/25, 169) reports that Lomi Lee, Regional Director for the BOR’s Pacific Northwest Region, announced that Coleman Smith is “returning to the Pacific Northwest Region to serve as the Grand Coulee Power Manager.” Smith takes over from Mark Jenson who now leads the Grand Coulee Power Office Project Management Team.

PORT OF MOSES LAKE TO PURCHASE LAND FROM BOR. The [Columbia Basin \(WA\) Herald](#) (6/27, 26K) reports that “the Port of Moses Lake is set to acquire more than 600 acres of land from the Bureau of Reclamation, as commissioners approved a \$324,000 purchase agreement with the agency this week.” The port has been working with the bureau “for the past year and a half to purchase the land, which will be used for their wastewater facilities expansion project.”

GOVERNMENT POLICIES CRITICIZED FOR EXACERBATING DROUGHT. In an op-ed for the [Wall Street Journal](#) (6/27, Subscription Publication, 5.51M), Edward P. Lazear, former chairman of the President’s Council of Economic Advisers (2006-09), is a professor at Stanford University’s Graduate School of Business and a Hoover Institution fellow, writes that government actions have exacerbated the drought in the West. Lazear blames price controls and restrictions on water transfer for making the situation worse.

Empowering Native American Communities:

INTERIOR SENDS OUT \$50 MILLION IN BUY-BACK OFFERS ON ROSEBUD RESERVATION. The [Nation Sun News](#) (6/26) reports that the Interior Department has sent out \$50 million in offers to landowners on the Rosebud Sioux Reservation in South Dakota. The offers to 11,000 landowners were made under the Land Buy-Back Program for Tribal Nations. Assistant Secretary Kevin Washburn said, “The success of the Buy-Back Program is vitally important to the future of Indian Country. Consolidating and returning these lands to tribes in trust will have enormous potential to unlock tribal community resources. We are committed to exhausting all efforts to make sure that individuals are aware of this historic opportunity to strengthen tribal sovereignty by supporting the consolidation of Indian lands.”

Also covering the story are the [Native News Online](#) (6/27) and the [South Dakota Public Broadcasting](#) (6/27, 4K).

ADDITIONAL COVERAGE OF HOUSE HEARING ON ABUSE AT SPIRIT LAKE. Additional coverage of the hearing by the House Natural Resources Subcommittee on Indian and Alaska Native Affairs on child welfare at Spirit Lake was provided by [NPR](#) (6/25, 519K).

Top National News:

IN 9-0 RULING, HIGH COURT STRIKES DOWN OBAMA RECESS APPOINTMENTS. Media accounts are casting yesterday's Supreme Court ruling on the President's 2012 recess appointments as a limited loss for the Administration. In a unanimous decision, the court struck down the President's 2012 recess appointments to the NLRB – made while the Senate was holding pro forma sessions every three days. While some print analyses, Republicans and conservative-leaning commentators drew a connection between the decision and the broader debate on Obama's use of executive power, that message was not echoed by the network newscasts – all three of which covered the story – or most major media coverage. After the ruling was announced, the White House and some Democrats moved to argue that it amounted to a partial win for the President – or at least not an outright loss. With some exceptions (including analysis pieces in the Washington Post, Politico, and Los Angeles Times), those arguments appeared to carry the day in much of the print media reporting, which tended to judge the ruling a mixed bag.

In a brief mention of the ruling, ABC World News (6/26, story 4, 0:25, Muir) reported Obama was “trying to bypass partisan gridlock” in making the appointments, though “the court, unanimously,” said “no, no president has that power.” The CBS Evening News (6/26, story 2, 1:45, Plante, 5.08M) similarly reported that “the court said political obstruction was not enough of a reason to circumvent Congress.” CBS closed its coverage stating, “You know, we're curious. It turns out other president made many more recess appointments. Bill Clinton made 139 during his two terms. George W. Bush, 171. So far, President Obama has made 32.” NBC Nightly News (6/26, story 2, 0:35, Williams, 7.86M), meanwhile, reported in another brief story that the ruling “means the Senate can block recess appointments whenever it wants.”

McClatchy (6/26, Doyle, Subscription Publication, 23K) refers to a “limited defeat for...Obama and his White House successor,” though “in essence, the Senate wins, because it gets to decide when it's in recess.” The White House “also wins because the court didn't go as far as it might have.” The AP (6/26, Hananel) says “the outcome was the least significant loss possible for the administration,” and – like CBS News – goes on to note that “Obama has made relatively few recess appointments.”

The New York Times (6/26, Liptak, Subscription Publication, 9.65M), on the other hand, considers the ruling “a significant blow to executive power.” The justices “ruled unanimously that... Obama had violated the Constitution in 2012” by making his appointments while Congress was in pro forma session. In his ruling, however, Justice Breyer said “recess appointments remain permissible so long as they are made during a break of 10 or more days” in Senate action. However, “many experts say that if either house of Congress is controlled by the party opposed to the president, lawmakers can effectively block such appointments by requiring pro forma sessions every three days.” The Washington Post (6/26, Barnes, 4.22M) notes “Senate Democrats started the pro forma sessions in 2007 to prevent President George W. Bush from making recess appointments.”

The Washington Times (6/26, Dinan, 455K) reports the ruling “was a loss for Mr. Obama,” but “a win for the executive branch more generally.” In effect, the decision “returns the situation to where it was before Mr. Obama took office, when presidents generally waited for breaks of 10 days or more before using their powers, but other than that had few limitations.”

In an analysis piece dealing with the broader issue of executive overreach, the New York Times (6/26, Shear, Subscription Publication, 9.65M) points out that “White House officials had worried that the court's more conservative members might emerge victorious with a far more restrictive view of presidential power. They did not.” White House Press Secretary John Earnest said, “We're of course deeply disappointed in today's decision. ... We are, however, pleased that the court recognized the president's executive authority as exercised by presidents going all the way back to George Washington.” Kathryn Ruemmler, “who served as Mr. Obama's

White House counsel until recently," told the Times, "The court affirmed the president's long-recognized constitutional authority to make recess appointments when the Senate is in recess for a period of at least 10 days."

USA Today (6/27, Wolf, 5.82M) reports, "When it was over...Obama had lost" and "Senate Republicans had won," even though "four conservative justices led by Antonin Scalia would have imposed much stricter limits, implicating thousands of appointments dating back to George Washington."

The Wall Street Journal (6/26, Bravin, Trotman, Subscription Publication, 5.51M) notes that addressing criticism of Obama's use of executive power, Earnest went on to say, "The president is in no way considering scaling back" his actions. The Washington Post (6/27, Goldfarb, 4.22M) also includes Earnest's comments in its story, as well as similar ones from Rep. George Miller. Moreover, the Post quotes George Washington University professor Jonathan Turley, "an Obama supporter," as saying, "The president is saying" with his appointments "that he's tired of gridlock."

More negative toward the White House is an analysis piece in the Washington Post (6/27, Goldfarb, 4.22M), which says the ruling "laid bare the legal and political risks that the president faces as he makes the aggressive use of executive power a core tenet of his second term." As the court "underscored Thursday, Obama's high-profile assertions of executive power...are often the start of the story, not the end." The Post quotes John Cooney, "a former assistant to the solicitor general and deputy general counsel" at OMB, as saying, "This White House chose to take on that battle and has now received some diminution in the power Obama can pass on to his successors. ... That's an object lesson for the White House who risked triggering the separation of powers question."

Also negative toward the Administration was the assessment by Politico (6/27, Gerstein, 637K), which said "Obama's big gamble on recess appointments was smacked down unanimously by" the court, in what amounted to "an embarrassing setback" for the Administration.

The Wall Street Journal (6/27, Trotman, Subscription Publication, 5.51M) says the Supreme Court ruling has created confusion over the validity of the 436 NLRB rulings made during their tenure. More than 100 of those rulings are being challenged in court. The Washington Post (6/27, Fletcher, 4.22M) reports that the NLRB "said it is examining the court's decision to see whether it requires the agency to re-ratify the decisions made during the 19 months the recess appointees took part in its deliberations."

On Fox News' Special Report (6/26, 2.15M), Ron Fournier called the decision "a pretty big defeat," for the Administration, but similarly noted that it "could have been bigger." The President is "lucky, and future presidents are lucky that the Supreme Court didn't go even further in undermining the President's legitimate ability at times to fill in the case of a recess appointment. One interesting part of the provision: They literally ruled that the recess appointment should be used only in just cases and should not be used as a get-around, to get around another branch of government which the President clearly was doing."

The Los Angeles Times (6/27, Savage, Phelps, 3.46M) says that "as a practical matter, the decision is likely to make it nearly impossible for presidents to continue using recess appointments as a way to overcome Senate objections to their nominees as long as the opposition party controls either the Senate or the House." The Los Angeles Times (6/27, 3.46M) appears to contradict that point in an editorial, "Recess appointments should be exceptional, but they shouldn't be impossible. It's good that a majority of the justices didn't allow their displeasure with Obama's overreaching to obscure that fact."

Reuters (6/26, Hurley) says the 2013 Senate changes to the filibuster rule diminish the ruling's impact, a point highlighted by Senate Majority Leader Reid yesterday, "Without that reform and with today's ruling, a small but vocal minority would have more power than ever to block qualified nominees from getting a simple up-or-down vote." Politico (6/26, Everett, 637K) reported the rule change "has already allowed Senate Democrats to squeeze through several nominees who might have been defeated under the old framework." Senate Majority Whip Durbin said, "I'm sorry we had to change the rules and it's created some pain in our Senate that's still there...but there had to be a way for this president to lead." Sen. Charles Schumer called the rule changes "omniscient" in light of the court ruling.

The Hill (6/26, Goad, 237K) noted Senate Minority Leader McConnell hailed the ruling, saying, "The President made an unprecedented power grab by placing political allies at a powerful federal agency while the Senate was meeting regularly and without even bothering to wait for its advice and consent. ... A unanimous Supreme Court has rejected this brazen power-grab." "Senate Republicans are cheering," The Hill (6/26, Devaney, 237K) reported in a separate story.

In an editorial titled "Senate 9, President 0," the Wall Street Journal (6/27, Subscription Publication, 5.51M) casts the ruling as an example of Obama's abuses of executive power. Noting that the ruling was unanimous, the Journal predicts further legal blows to the Obama presidency.

The New York Times (6/27, Subscription Publication, 9.65M), however, editorializes, "When one branch of government routinely abuses its constitutional power in order to prevent another from functioning, the Supreme Court is expected to take notice and stop the abuse. Unfortunately the court failed to do so on Thursday," when it "should have recognized that future presidents may need a legal backstop to make executive appointments just to keep the government running."

Nina Easton said on Fox News' Special Report (6/26, 2.15M) that right now, the ruling has little practical effect, but "the Republicans take control of the Senate, it will take away a powerful tool for the President to do these recess appointments." Easton added that the decision "has added political resonance, though. It has to do with the National Labor Relations Board, which is very much ground zero for the President's hope of expanding union organizing and the ability of unions to organize. ... The practical effect of this decision will also be that about 100 decisions affecting about 600 companies will have to be redecided."

Pete Williams said on MSNBC's Andrea Mitchell Reports (6/26, 487K) that the decision means that "when the President and the Senate are in opposite parties, you aren't going to be able to do recess appointments. ... As a practical matter, it's a vast reduction in the power. It doesn't eliminate it completely, but it's a vast reduction in the power."

Alex Wagner said on MSNBC's Now (6/26, 437K) that the decision "threatens both the President's ability to appoint and workers' rights to organize," adding that the ruling means "that essentially those faky 30-second pro forma exercises are enough to block any appointment by the President of the United States, which is a big deal."

The Daily Caller (6/26, Bordelon, 408K) poked fun at "liberal CNN anchor" Carol Costello's reporting of the ruling, saying she "really wanted legal analyst Jeffrey Toobin to say...Obama won Thursday's Supreme Court case." Toobin, however, "wouldn't bite, gently but firmly informing the disappointed anchor there's 'no doubt' the President lost." Costello retorted, "Well he lost in this particular case...but overall, right?"

Toobin later said on CNN's Situation Room (6/26, 554K) that the Court said that "what you, President Obama, call a recess, is not really a recess. So, those appointments made in this case specifically to the National Labor Relations Board, are invalid and all the actions taken by the NLRB during that time are invalid. So, it's a big deal."

In an op-ed for the New York Times (6/27, Katyal, Subscription Publication, 9.65M), former acting Solicitor General Neal Katyal writes that for years, "particularly after the 2000 election, talk about the Supreme Court has centered on its bitter 5-to-4 divisions," but Katyal points to "a remarkable achievement," that for the first time since 1940, the court "has agreed unanimously in more than 66 percent of its cases this term." Katyal argues that the court's unanimity "is important because it signals that the justices can rise above their differences and interpret the law without partisanship." Katyal adds that Chief Justice Roberts is focused on "making all nine justices play ball for the same team," and the nation, "and the rule of law, are better off for it."

Goodlatte Says He Has Discussed Boehner Suit Against Obama With Justices. The Christian Science Monitor (6/26, Kiefer, 566K) said the ruling "that...Obama violated the Constitution...is being particularly welcomed by House Republicans." House Speaker Boehner, "who earlier this week announced an effort to sue the president for executive overreach, said in a statement Thursday that the high court's decision offers encouragement to Americans who have watched with concern as the president has declined to faithfully execute our laws." House Judiciary Chairman Robert Goodlatte told a Monitor Breakfast that "the disagreements between the House and the executive branch are not political, but constitutional." Added Goodlatte, "I've had the opportunity to discuss this with some members of the Supreme Court and it's my hope that they will take a fresh

look at this."

The Washington Times (6/26, Wolfgang, 455K) reports Earnest told reporters yesterday that the lawsuit "is just another example of GOP obstructionism." Said Earnest, "It's one thing for Republicans to try to block legislative remedies. It's another thing to go to court to say that the president can't act."

Politico (6/26, French, 637K), meanwhile, reported the lawsuit "turned into a big payday for congressional Democrats," as the Democratic Congressional Campaign Committee "posted its best fundraising day of the year on Wednesday, bringing in \$584,000."

The Washington Times (6/26, Chumley, 455K) notes Rep. Michele Bachmann and Fox News' Neil Cavuto "exchanged some angry fire during a recently broadcast show over the feasibility and sense" the lawsuit, which Cavuto termed a "charade" and a "waste of time."

Kim Strassel writes in support of the lawsuit in a Wall Street Journal (6/27, Strassel, Subscription Publication, 5.51M) column titled "All The President's Enablers." Charles Krauthammer, in a Washington Post (6/27, 4.22M) column titled "Government By Fiat," also blasts what he casts as Obama's abuse of executive power, and notes House Minority Leader Pelosi's criticism of Boehner's lawsuit. Krauthammer adds, "She won't be saying that on the day Democrats lose the White House. ... At which point, the temptation to stick it to the Democrats will be overwhelming. At which point, Lord give us strength."

Commenting on yesterday's Supreme Court decision, meanwhile, Krauthammer said on Fox News' Special Report (6/26, 2.15M) that it was a "stinging rebuke to Obama overreach in general," that "will have implications for other cases." Krauthammer added that "this bodes well for the Boehner lawsuit."

OBAMA BEGINS "DAY IN THE LIFE" TOUR IN MINNESOTA. Coverage of President Obama's trip to Minnesota, where he spent part of the day with St. Anthony resident Rebekah Eler, highlights that the event was the kickoff to a series of events over the next few months at which Obama hopes to connect directly with Americans. While the coverage says the President was well-received, some reports say the trip had as much to do with this year's elections as with pressing Congress to act. The broadcast networks did not cover the trip.

The AP (6/27, Lederman) reports the President said "Washington needs to stop 'playing to the most fringe elements of politics' and help Americans who are fighting to make ends meet." The President said "the central challenge that drives him is how to ensure hard-working, responsible people can get ahead." He was accompanied by Eler, an "accountant and mother of two preschool-age boys wrote to the president this spring about her family's struggles after her husband's construction business went under during the downturn in the housing market." The AP says "the attempt to show presidential empathy with the plight of everyday Americans puts a fine point on two harsh realities for Obama: His influence is waning two years into his last term," and the economic recovery "has yet to filter down to many of the middle-class families."

The St. Paul (MN) Pioneer Press (6/27, 656K) reports Eler said Thursday that "she hopes the message about middle-class struggles isn't lost on Washington decision-makers. ... Eler said the experience was 'an incredible opportunity to share what's important to me and my friends and my family and what we go through every day.'"

The Minneapolis Star Tribune (6/27, Helgeson, Simons, 1.48M) reports the President devoted much of his time in Minneapolis "to touting the need for a higher minimum wage and equal pay and benefits for women. Those issues resonate strongly in Minnesota," which enacted its "largest minimum wage increase in state history this year" and expanded protections for women in the workplace. But Republicans were critical, saying Obama has failed to stimulate the economy. In addition, Rep. John Kline "said the real reason Obama came to Minnesota is to raise money for congressional Democrats" at a "high-dollar fundraiser" Thursday evening.

The St. Paul (MN) Pioneer Press (6/27, Salisbury, 656K) reports the President "fielded mostly friendly questions" from about 350 people at a town hall meeting who had been "selected by local government officials, businesses and organizations." He said "he isn't getting much through Congress 'because right now we've got a party on the other side whose only rationale or motivation seems to be opposing me.'"

The New York Times (6/27, Davis, Subscription Publication, 9.65M) called the event "the first episode in a series

the White House is marketing as 'Day in the Life' visits ahead of the midterm elections." At the town hall meeting, the President pointed to Erler "as an example of the difficulties families face, and as the kind of person who could be helped by his initiatives." But "for all the effort to reach ordinary Americans, Mr. Obama's day had the feel of a campaign tour, choreographed by the White House for vibrant pictures of the president engaging with regular people, his shirt sleeves rolled up."

The Washington Post (6/27, Nakamura, 4.22M) also calls the series of events "a carefully calibrated strategy to make the president more accessible to constituents at a time when his approval ratings have dipped and his relations with Congress have hit rock bottom." Politico (6/26, Epstein, 637K) reported under the headline "Obama Kicks Off Summer Road Show" that the President "headed out of Washington on Thursday to offer assurance to Americans that he hasn't lost touch with the issues that guide their daily lives."

The Hill (6/26, Sink, 237K) also had a report.

Obama Watches USA-Germany Game Aboard Air Force One. The CBS Evening News (6/26, story 3, 0:10, Pelley, 5.08M) said in a brief item that President Obama "took a break from work" to watch the USA-Germany World Cup match, watching the game "aboard Air Force One."

MAY CONSUMER SPENDING DISAPPOINTS, PROMPTS REASSESSMENT OF SECOND QUARTER GROWTH PREDICTIONS. Reuters (6/27, Mutikani) reports that consumer spending rose 0.2% in May, less than expected by economists. The disappointing increase comes after a flat reading in April. Because consumer spending comprises more than two-thirds of US economic activity, the new data released by the Commerce Department prompted a number of economists to reduce their estimate of second quarter GDP growth.

The Wall Street Journal (6/27, Mitchell, Subscription Publication, 5.51M) says that the modest growth in May's consumer spending came despite a solid rise in personal income growth. The Journal also says that the report raises questions about the strength of the economy. Indeed, the Journal says that Macroeconomic Advisers reduced their estimate of second quarter growth from a 3.5% annual rate to a 3.2% rate.

Bloomberg News (6/26, Woellert, 2.76M) adds that the data show that "adjusted for inflation, consumer spending declined for a second straight month."

Report Shows Inflation Accelerating. The Wall Street Journal (6/27, Morath, Subscription Publication, 5.51M) reports that the Commerce Department also reported on Thursday that its price index for personal consumption expenditures, or PCE, rose 1.8% in May over May 2013. That's up sharply from a 0.8% year-over-year gain notched in February.

New Jobless Claims Down 2,000 Last Week. The AP (6/26) reports that first-time claims for jobless benefits fell 2,000 last week to 312,000, according to new data released Thursday by the Department of Labor. The four-week moving average, which irons out week-to-week volatility, rose 2,250 to 314,250. The AP says that the numbers are "the latest evidence that a sharp economic slowdown earlier this year hasn't caused employers to cut jobs."

Bloomberg News (6/26, Woellert, 2.76M) says the numbers are "a sign of steady progress in the labor market." The CBS Evening News (6/26, story 9, 0:25, Pelley, 5.08M) reported on the numbers briefly, saying they are "evidence" that "companies aren't cutting so many jobs as before."

Consumer Comfort Unchanged Last Week. Bloomberg News (6/27, Glinski, 2.76M) reports that its Consumer Comfort Index last week "held near its 2014 high as views on the U.S. economy were the second-strongest since 2008." The index "stood at 37.1 in the period ended June 22, unchanged after three weeks of gains and just shy of the 37.9 reading in late April that marked the year's high point."

Mortgage Rates Inch Down. The Los Angeles Times (6/27, Reckard, 3.46M) reports that Freddie Mac announced on Thursday that mortgage rates were down slightly this week. The average rate on a 30-year loan fell to 4.14% from 4.17% the prior week. The AP stresses that while rates are higher than they were a year ago, they have been trending downward.

Economic Issues Could Hamper Democrats In November. Bloomberg News (6/26, Dorning, 2.76M) reports

that "sluggish improvement in living standards among Democrats' core voters threatens to hurt the party's candidates" in the November midterms. Bloomberg says that median household income "among all Americans is still lower than before the recession," and "key Democratic constituents – blacks, Hispanics, single women and young people – have been especially hard-hit, and analysts say that could make them less energized about going to the polls." Cook Political Report's Charlie Cook said that the economic situation is "dampening enthusiasm among some of the voter groups Democrats need most."

Stocks Down Slightly On Thursday. The Wall Street Journal (6/27, Scaggs, Subscription Publication, 5.51M) reports that stocks fell slightly amid concerns that the economy may not rebound as strongly as expected in the second quarter. The Dow Jones Industrial Average fell 21.38 points to 16,846.13, while the S&P 500 fell 2.31 points to 1,957.22. The Nasdaq dropped 0.71 points to 4,379.05.

National Discussion Of Poverty Ignoring Rural Areas. In the New York Times Magazine (6/26, Lowrey, 6.08M), Annie Lowrey writes that in its "persistent poverty," Eastern Kentucky "just might be the hardest place to live in the United States. Statistically speaking." Focusing on Clay County, Lowrey suggests that the disintegration of the coal industry there has destroyed the local economy. Portraying this as typical of many rural areas, Lowrey says that poverty in such regions has not been a major part of the national conversation on poverty.

Editorial Wrap-Up:

NEW YORK TIMES. "Abortion Rights Lose A Buffer." The New York Times (6/27, Subscription Publication, 9.65M) editorializes that the Supreme Court ruling striking down the 35-foot protest-free zone outside abortion clinics in Massachusetts "ignores what actually happens on the ground," as Massachusetts has, "like most states, endured a long and sometimes violent history of protest at reproductive-health clinics, including the 1994 murders of two Planned Parenthood workers by an abortion opponent."

"A Blow To Presidential Appointments." The New York Times (6/27, Subscription Publication, 9.65M) editorializes, "When one branch of government routinely abuses its constitutional power in order to prevent another from functioning, the Supreme Court is expected to take notice and stop the abuse. Unfortunately the court failed to do so on Thursday," when it "should have recognized that future presidents may need a legal backstop to make executive appointments just to keep the government running."

"The Disturbing Anthrax Incident." An editorial in the New York Times (6/27, Board, Subscription Publication, 9.65M) calls it "distressing" that the CDC "was so sloppy this month that it potentially exposed more than 80 people at its laboratories in Atlanta to deadly anthrax spores." The Times says that the incident "carries a stark warning that even the best laboratories can slip up, with potentially catastrophic consequences," and notes that other "supposedly secure laboratories are conducting research on even more frightening pathogens that, unlike anthrax, might spread easily and quickly through the air from human to human."

WASHINGTON POST. "Potemkin Drawdown." The Washington Post (6/27, 4.22M) editorializes Russian President Vladimir Putin's recent "gestures suggesting de-escalation" are all "relatively insignificant, easily reversible, or both." The Post adds that Russia's "behavior remains unacceptably provocative." According to the Post, if Russia "continues to support" the rebels in Ukraine, "the West must ramp up its support for the Ukrainian government," and the US "must take the lead and then pull allies in the right direction."

"A Common Core Reversal." In an editorial, the Washington Post (6/27, 4.22M) argues that Louisiana Gov. Bobby Jindal's "about face" on Common Core "says more about him than about any deficiency in the standards." The Post says that Common Core in the state fell "victim" to Jindal's "political ambition," as the paper argues that he was attempting to build conservative support by turning against them.

"Insult To The Public." The Washington Post (6/27, 4.22M) editorializes on the disciplinary hearing of a District of Columbia firefighter "accused of failing to help a dying man who collapsed outside a fire station," noting that "it's unclear whether information from the hearing will ever be made public." The Post declares that "it is difficult to feel confidence in a process conducted in the shadows, especially when the public is excluded from what is so clearly a matter of public safety."

WALL STREET JOURNAL. "Senate 9, President 0." In an editorial, the Wall Street Journal (6/27, Subscription Publication, 5.51M) casts the Supreme Court's ruling on the President's 2012 recess appointments as an example of Obama's abuses of executive power. Noting that the ruling was unanimous, the Journal predicts further legal blows to the Obama presidency.

"Democrats Against Harry Reid." In an editorial, the Wall Street Journal (6/27, Subscription Publication, 5.51M) comments on Democratic senators who are becoming frustrated with the lack of amendment votes, which it says are blocked by Senate Majority Leader Reid in an effort to keep the caucus from being forced to make difficult votes. The Journal notes that no Senate Democrat elected in 2012 has been allowed a floor vote on any of his or her amendments. According to the editorial, this is a key aspect of Reid's strategy of preventing any House legislation from reaching President Obama, which while helping the Administration, will now present a challenge to Democrats facing re-election.

"Free Speech 'Buffer' Rebuffed." In an editorial, the Wall Street Journal (6/27, Subscription Publication, 5.51M) agrees with the overall ruling from the Supreme Court striking down the 35-foot protest-free zone outside abortion clinics in Massachusetts, but criticizes Chief Justice Roberts for not going far enough. Ultimately, the Journal urges the Chief Justice to be firmer in his defense of the First Amendment.

Washington Schedule:

TODAY'S EVENTS IN WASHINGTON.

White House:

PRESIDENT OBAMA – The President and First Lady will attend the Marine Barracks Evening Parade in Washington, DC.

VICE PRESIDENT BIDEN – No public schedule.

US Senate: Not in session.

US House: Not in session.

Other: MORTGAGE BANKERS ASSOCIATION CONFERENCE – June 25 – 27. The MBA's 2014 Strategic Markets and Diversity Conference. Speakers include: Congresswoman Maxine Waters, Ranking Member, House Financial Services Committee; The Honorable Henry G. Cisneros, Founder and Chairman, City View. Location: Westin Washington City Center, 1400 M St. NW. Notes: All conference events are open to the media and press credentials must be obtained in advance. To apply for press credentials please contact: Rob Van Raaphorst, (202) 557-2799, rvanraaphorst@mba.org

NED – RELIGIOUS FREEDOM – 9 a.m. – 10:30 a.m. Presentation and discussion of the 2014 Annual Report of

the US Commission on International Religious Freedom. Featuring Robert P. George, Chairman USCIRF and William A. Galston, NED Board Member and Senior Fellow at the Brookings Institution. Location: 1025 F St. NW, Suite 800.

CSIS – QUADRENNIAL HOMELAND SECURITY REVIEW – 9 a.m. – 11 a.m. On-the-record conversation about the QHSR and the future of homeland security. This session will feature Alan Cohn, DHS's Assistant Secretary for Strategy, Planning, Analysis & Risk, followed by a panel exploring the review's key focus areas. Location: 1616 Rhode Island Avenue, NW.

PSA – MODERN PROSTHETICS FOR WOUNDED WARRIORS – 11 a.m. – 12:30 p.m. The Partnership for a Secure America's Congressional Partnership Program presents "Back in Action: Mobilizing the American Wounded Warrior with Modern Prosthetics," a discussion by a panel of experts on innovations in warrior care. Participants: Dr. Justin Sanchez, program manager, Revolutionizing Prosthetics Defense Advanced Research Projects Agency; Frederick Downs Jr., former national director of VA Prosthetic and Sensory Aids Service; Dr. Robert J. Jaeger, director, Deployment Health Research, VA Office of Research and Development; Dr. Brian W. Schulz, scientific program manager, Rehabilitation Engineering and Prosthetics, VA Office of Research and Development; John Shero, executive director, Extremity Trauma and Amputation Center of Excellence; Dr. Paul F. Pasquina, director, Physical Medicine & Rehabilitation Residency Training Program, Walter Reed National Military Medical Center; Troy Turner, lead, rehabilitation and human performance research, Execution and Management Agency, US Army Medical Research and Materiel Command. Location: 2212 Rayburn. Contacts: info@psaonline.org, 202-293-8580

CATO – DISMANTLING THE CORPORATE STATE – 12 p.m. "Unstoppable: The Emerging Left-Right Alliance to Dismantle the Corporate State." Featuring the author Ralph Nader, with comments by Daniel McCarthy, Editor, The American Conservative; Timothy P. Carney, Senior Political Columnist, The Washington Examiner. Moderated by Brink Lindsey, Vice President for Research, Cato Institute. Location: Cato Institute, 1000 Massachusetts Ave. NW. Contacts: events@cato.org, 202-842-0200

ALLIANCE FOR HEALTH REFORM – INSURANCE PREMIUMS – 12 p.m. – 1:30 p.m. "Rates of Change: Putting 2015 Insurance Premiums into Context." This briefing will focus on factors influencing insurance premiums, state and Federal regulatory roles in reviewing rates, and what to expect in 2015. A distinguished panel of experts will examine these and related issues. Location: G50 Dirksen. Contacts: Sarah Dash, sarahdash@allhealth.org, 202-789-2300

PETERSON INSTITUTE – CHINA AND ENERGY – 12:15 p.m. The Peterson Institute for International Economics will convene a panel of leading experts to discuss "China, the West, and the Challenge of Alternative Energy Innovation." Panelists will be Granger Morgan, University and Lord Chair Professor of Engineering and Director of the Scott Institute for Energy Innovation at Carnegie Mellon University; Gilbert Metcalf, Professor of Economics at Tufts University and former Deputy Assistant Secretary for Environment and Energy in the US Department of the Treasury; and Lee Branstetter, Professor of Economics and Public Policy at Carnegie Mellon University, a Nonresident Senior Fellow at the Peterson Institute, and former Senior Economist for International Trade and Investment at the Council of Economic Advisers. Location: 1750 Massachusetts Avenue, NW. Contacts: Yvonne Priestley, meetings@piie.com. Notes: RSVP requested to Brian Reil, media@piie.com or (202) 454-1334

NPC LUNCHEON – DINGELL – 12:30 p.m. NPC Luncheon with Congressman John Dingell. Location: National Press Club, Ballroom, 529 14th Street NW.

Last Laughs:

LATE NIGHT POLITICAL HUMOR.

David Letterman: [Referring to the controversy surrounding the Washington Redskins' name] "So, new name for the Washington Redskins. Well, they haven't had much luck in the last four or five seasons. They're kind of stumbling. They can't get out of their own way. What about Washington Congress?"

David Letterman: "You all know Dick Cheney. He was Vice President with George W. Bush. They were like

buddies. He was like his sidekick. It was Cheney who championed the idea that Iraq was hiding weapons of mass destruction. ... Guess what, Dick Cheney – even now, to this very minute – believes there are weapons of mass destruction in Iraq, even though we've looked. We've scoured it. We've been all over the place – up and down, everywhere. We've made phone calls. We've done everything we possibly can do. He still believes there are weapons of mass destruction, and I still believe I'm going to get 'The Tonight Show.'"

EVENT MEMORANDUM FOR THE SECRETARY
INTERVIEW WITH SUSAN PAGE
USA TODAY: CAPITAL DOWNLOAD VIDEO SEREIS

DATE: June 30, 2014
LOCATION: Office of the Secretary
TIME: 10:30AM – 11:00AM
FROM: Jessica Kershaw, Press Secretary, 202-669-0968

I. PURPOSE

The primary purpose of this interview is for you to highlight the value of our national parks and other public lands while families are considering summer vacation destinations. Additionally, this is an opportunity for you to discuss the youth initiative, Interior's role in the Climate Action Plan and how climate change is affecting our assets as well as some the recent challenges the Department faces in public lands management.

This interview also gives you the ability to continue building a relationship Susan Page, the DC Bureau Chief for USA Today, whom you met at the DC Bureau Chiefs dinner last month. Your interview will be part of the weekly "Capital Download" series, which includes a taped interview and a written piece. In addition, the video and story are distributed to the nationwide network of Gannett-owned newspapers and TV stations.

II. PARTICIPANTS

- Susan Page
- Jessica Kershaw

III. AGENDA

10:00AM	USA Today team arrives *Pre-sets lights/interview space in your office (you don't need to be present)
10:30AM	You arrive; begin recorded interview with Susan Page
10:50AM	Interview concludes
11:00AM	USA Today departs.

IV. KEY FACTS

Expected topics of discussion:

- Youth Initiative (in the context of getting kids outdoors on our public lands)
- Climate Action Plan and DOI's role
- Bundy Case and Public Lands Management
- Biggest Surprise on the Job

Be prepared for:

- ESA (sage grouse)
- Indian Education (restructuring)

V. TALKING POINTS

Expected Topics of Conversation:

Youth Initiative

- **PLAY:** Develop recreation partnerships in 50 cities – outdoor play for over 10 million young people
- **LEARN:** Provide education opportunities to at least 10 million students annually
- **SERVE:** Engage 1 million volunteers annually on public lands
- **WORK:** Provide 100,000 work and training opportunities to young people
- **NPS Centennial** provide no better time than to recommit to the benefits of accessible, welcoming public lands for all generations

Climate Action Plan

- **RENEWABLE ENERGY:** Permit 20K MGW by 2020; Now at more than 14,000 MGW
- **RESILIENCY:** Coastal areas, Public lands prone to fire, drought
- **SOUND SCIENCE:** Landscape level planning, mitigation, Ex: LIDAR Mapping

Bundy, Public Lands Management

- BLM will continue to work to resolve the matter through all options available under the law
- Committed to the public safety of all employees, public
- Interior's mission is always at odds – balancing conservation and protection w/development, ranching/grazing; committed to listening, informed decisions and a landscape approach
- **Suggested Formal Response from SOL:** We continue to monitor the situation closely in consultation with all federal, state and local agencies involved, and to consider the next appropriate steps. We are pursuing all options available to us under the law. I cannot comment on specifics at this time.

If time allows, potential topics of conversation:

ESA (its usefulness, necessity, how it's used)

- An effective tool to recover wildlife at risk of danger, extinction
- Thanks to the ESA, our children and grandchildren will have the opportunity to see the **Bald eagle, American alligator, and peregrine falcon**
- When the Endangered Species Act was passed in 1973, it done with huge **bipartisan** support and signed into law by President Richard Nixon
- Too often, the ESA is inaccurately characterized as a heavy-handed or unnecessary law

- Works best when agencies like FWS and BLM partner w/states, tribes, conservation groups for on the ground ideas and strategies for recovery
 - Ex: Sage Grouse (WY), Wood Stork
- Can be a great convener for communities to come together to **protect their land, their water, their wildlife and their way of life** Ex: wood stork

BIE Restructure (in terms of the recent announcement and visit to Indian Country)

- Future of Indian Country rests on ensuring American Indian children receive a world-class education that honors their cultures, languages and identities as Indian people
- Every child can learn, and every school can succeed
- We have a moral obligation to ensure that we are providing Indian children with the quality education that they deserve
- Redesign of the BIE:
 - Reflects President Obama's commitment to promoting tribal self-governance and self-determination
 - Will enable BIE to more effectively support tribal educators who best understand the unique needs of their communities
 - Critical step in supporting each Tribe's capacity to educate future generations of students who are prepared for college and a career and know and value their heritage.

VI. BACKGROUND

Background on Susan Page

Susan Page is the current Washington Bureau Chief for USA Today, and previously served as the President of the White House Correspondents Association in 2000.

She regularly contributes to CNN's *Late Edition* broadcast and to *The Diane Rehm Show* on NPR. Susan received her bachelor's degree from Northwestern University's Medill School of Journalism, and her master's degree from Columbia University.

Capital Download Features

[Pelosi: Dems are coalescing behind Hillary for 2016](#)

June 28, 2013

WASHINGTON — House Democratic Leader Nancy Pelosi said Thursday the Democratic Party was coalescing behind Hillary Rodham Clinton as its presidential nominee for 2016, and she urged the former secretary of State to get in the race.

In an interview on USA TODAY's "Capital Download," Pelosi stopped just short of formally endorsing Clinton.

"I'm not making endorsements right now, because I don't think that's appropriate," she demurred. "But I am gauging, I'm gauging. I'm encouraging people to think about it, so in case she asks us, we have something to say to her."

Does she think the party is coalescing behind Clinton?

"I think so; I think so," she said. "There's a great deal of excitement about the prospect that she would run."

The California congresswoman, herself a groundbreaker as the only woman to serve as speaker of the House, made it clear what her advice would be: Do it. "I don't know why she wouldn't run," Pelosi said. "She's prepared. She's well-known. She's highly respected. She knows she could do the job very, very well."

In 2008, Pelosi was House speaker and stayed officially neutral in the primary battle between Clinton and Barack Obama. She drew ire from Clinton's campaign with a comment that it would be "harmful" for unelected "superdelegates" to determine the nomination. At that key moment, support from superdelegates was seen as the only way Clinton might prevail.

Pelosi describes Clinton as historically well-qualified to be commander in chief, noting she has served as first lady, a New York senator and a member of the Senate's Armed Services Committee as well as head of the State Department.

"If Secretary Clinton were to run — and we think if she ran, she would win — I believe that she would be the best-prepared person to enter the White House in decades, in decades," Pelosi said, "with all due respect to her husband, present company and other presidents."

In early polling, Clinton leads the 2016 field, but there are other prominent Democrats who have expressed interest in running, among them Vice President Biden. In a Quinnipiac University Poll released last month, Clinton was supported by 65% of Democrats for the nomination, trailed by Biden at 13% and New York Gov. Andrew Cuomo at 4%.

Pelosi's comments did spur a few articles after the publication of the USA Today piece:

[Pelosi: Democrats lining up behind Hillary Clinton](#)

[Pelosi: Dems are coalescing behind Hillary for 2016](#)

[Nancy Pelosi thinks Democrats are 'coalescing' behind Hillary Clinton](#)

[Vilsack: Farm bill tests D.C.'s embattled politics](#)

November 25, 2013

WASHINGTON — Stalled negotiations over a farm bill threaten more than trouble for farmers and consumers, Agriculture Secretary Tom Vilsack says. They're also a broader test of whether Washington can work.

The huge bill, more than a year overdue, is caught in a dispute between the House and Senate over how much to cut the food stamp program, among other issues. Vilsack notes that failure to pass it before the end of the year could double milk prices for Americans, spark retaliatory tariffs from Brazil and leave livestock producers who have been hit by storms and drought without standard federal assistance.

In an interview with USA TODAY's Capital Download, Vilsack characterized the talks as a case study of an embattled government.

"This is a bill that should reignite what little DNA is left of bipartisanship in Washington, D.C.," he says. "This has been a bill that's always been relatively easy for Congress to get done, and if we don't get it done, I think it sends another negative message to the country about the workings of government."

On the other hand, passing the farm bill could be a tonic for what ails the capital, he argues, likening it to a stumbling football team that decides to get back to basics.

"We (should) get back to blocking and tackling — pass a bill, a major bill," he says. "When that happens, basically, relationships are formed, opportunities for success are created and I think it creates a momentum" that could boost prospects in Washington for a budget agreement and even immigration legislation.

He says "folks have been stuck" in House-Senate negotiations that missed a self-imposed deadline last week to agree on a framework so a bill could be passed before the end of the year.

Vilsack, 62, a former two-term governor of Iowa, was interviewed for the video newsmaker series in the USDA's historic Beaux-Arts-style headquarters just off the National Mall.

On politics, he predicts Hillary Rodham Clinton would fare better in the Hawkeye State in 2016 than she did in 2008, when Barack Obama defeated her in the opening presidential caucuses. "Let me just say that, from my perspective, Secretary Clinton didn't lose the Iowa caucus; the president won the Iowa caucus," says Vilsack, who supported Clinton. "His team did an enormous job of attracting new people to the system."

If Clinton decides to run again, "I'm reasonably confident that she'll receive a very good reception in Iowa," he says. He is less certain that New Jersey Gov. Chris Christie would be welcome in the state's Republican caucuses, won in 2012 by Rick Santorum.

If Christie runs, he'll need to take a page from Obama's book, Vilsack says. "He's going to have to look at ways in which he can expand the base of caucus goers, because it is a very conservative Republican Party right now."

Only a couple of smaller outlets picked up this story:

Growing Nebraska: [Vilsack: Farm Bill Could Break Gridlock in D.C.](#)

Wasau Daily Herald: [In farm bill, rural interests need urban support: Other View](#)

Sen. Warren's candid attitude fuels her rise

April 21, 2014

- The video starts with a brief bio, and the opener hints at the rising issue of a declining middle class
- Susan asks Senator Warren about her book, 'Fighting Chance'
- Warren reaffirms that she's not running for President, says she's more concerned with current issues, even with the 2014 midterms
- There was no response directly to this interview, but similar content appeared in other sources following the release of her book

Geithner: On landing a (financial) plane that's on fire

May 14, 2014

- Talked about his new book, 'Stress Test'
- He compared his time under different presidencies
- This piece didn't spur more stories directly, but there was media buzz surrounding his book, which he talked about during the interview

V. ATTACHMENTS

As a reminder, your answers to similar parks and youth engagement questions for the National Geographic interview are included below, as well as Jon Jarvis' input. We can reasonably expect a similar line of questions for the Capital Download feature.

What is the most pressing issue facing U.S. parks today, and how should we deal with it?

There are several pressing issues, but the one that keeps me the most concerned is a lack of resources to provide a consistent, compelling experience for visitors that will keep them engaged in their parks, while leaving the parks maintained, unimpaired for future generations.(e.g. deferred maintenance, contractors doing programming, limited staff). This is exacerbated by climate change, and a general lack of engagement by families that is needed to introduce new generations (although youth engagement can be addressed in the second question).

Jarvis input: I couch the lack of resources as a symptom of waning relevancy and a lack of appreciation for the multiple values derived from our national parks. If the public had a deeper understanding and relevancy to the parks I, as they did post WW2 and mission 66, then their representatives would be more willing to fund parks and public lands appropriately.

How we deal with it is to use the Centennial as a pivot to reconnect to all Americans, especially the millennials. Our theme studies, the campaign, our urban programs, and our youth corps are all tools to accomplish this goal for our second century. If we build relevancy, it will translate into support, defined as visitation, advocacy, volunteerism, and philanthropy.

What is the future of US Parks?

I would reference the importance of relevance to Americans, from protecting and sharing our most spectacular and unique natural areas, to telling the compelling story of our history and

culture. By engaging with future generations and the rich diversity of Americans, we have an opportunity to craft a future of National Parks that will receive the visitation, pride and support that we had in their first 100 years

Jarvis input: The future of our national parks are their value as anchor tenants in landscape level conservation, refuges for species affected by climate change, assets in our public health system and executed with more complex and robust partnerships. They will also be recognized as significant components of the informal education system of the nation, telling a more complete story, through place, of the American experience.

U.S. DEPARTMENT OF THE INTERIOR NEWS BRIEFING

Mobile version and searchable archives available at interior.bulletinintelligence.com.

DATE: MONDAY, SEPTEMBER 29, 2014 7:00 AM EDT

TODAY'S TABLE OF CONTENTS

DOI IN THE NEWS:

- + Settlement Signed With Navajo Nation.
- + Glen Canyon Dam Marks 50th Anniversary As Power Source.
- + Interior Approves \$269,000 For Commonwealth Of The Northern Mariana Islands.
- + Communities To Receive \$700,000 Post-Sandy Grant.
- + Survey Finds Most Voters In West Oppose Transfer Of Public Lands To States.
- + Administration May Require Federal Agencies To Disclose Domestic Drone Use.
- + Additional Coverage: Secretary Jewell Inspects Oregon Sage Grouse Habitat Restoration Project.
- + Additional Coverage: Suh To Leave For National Resources Defense Council.
- + Additional Coverage Of 50th Anniversary Of Wilderness Act.

AMERICA'S GREAT OUTDOORS:

National Park Service:

- + Visitors To National Parks Could See Higher Entrance Fees Next Year.
- + NPS To Replace Lighting At Mount Rushmore.
- + NPS Begins Second Phase Of Turf Restoration Work On National Mall.
- + Project To Install New Memorial Panels At Asan Bay Overlook Begins.
- + Smokies' Whiteoak Sink Area Closed To Protect Bats.
- + Valles Caldera Preserve To Ask Congress For More Funding.
- + Rocky Mountain Arsenal Refuge Receives \$17.4 Million For Conservation Projects .
- + Acadia National Park Receives \$800,000 Grant.
- + NPS Agrees To Close Trails In Big Cypress National Preserve.
- + Tribes To Pray For Grizzlies In Yellowstone.
- + NPS Criticized For Holding Up Hawaii Island Development Projects.

Bureau of Land Management:

- + Outdoors Groups Eye Bigger Role In BLM's New Planning Process For Public Land.
- + Group Begins Coast-to-coast Horseback Ride Against BLM.
- + Groups Replacing Fence In Wyoming To Aid Wildlife.
- + Idaho Wildfire Season Ending After Mild Summer.
- + Additional Coverage: Man Guilty Of Plotting Vandalism Of BLM Trail.

Fish and Wildlife Service:

- + FWS Announces \$900,000 In Wolf Demonstration Project Grants.
- + Judge Orders FWS To Respond To Wyoming's Wolf Petition.
- + Hunting Season For Sage Grouse In Nevada Begins.
- + Additional Coverage: Report Highlights Species On Brink Of Extinction.
- + Additional Coverage: FWS Reviewing Status Of Manatees.
- + Study By FWS On Lead Exposure In Bald Eagles Criticized.

Republican, Democrat or independent — can undo the good work that we've started, because we need to move forward in this next generation.”

The [Deseret \(UT\) News](#) (9/29, 538K) reports that Jewell said, “That’s what is so important about this. We both get to stop spending money on lawsuits and start spending money on the things that are important to the Navajo Nation.”

The [Farmington \(NM\) Daily Times](#) (9/29, 47K) reports that Navajo Nation President Ben Shelly “called the settlement a turning point in the relationship between the federal government and the tribe.” He said, “For decades, the Navajo Nation had a fighting relationship with the Department of the Interior. I hope it ends today.”

Coverage by the AP was also picked up by the [Washington Post](#) (9/26, 4.9M), the [Albuquerque \(NM\) Journal](#) (9/29, 234K), the [Sacramento \(CA\) Bee](#) (9/26, 646K), the [Charlotte \(NC\) Observer](#) (9/26, 572K), the [Houston Chronicle](#) (9/26, 2.47M), the [Kansas City \(MO\) Star](#) (9/29, 1.23M), and [KATC-TV Lafayette, LA](#) (9/29, 26K).

Also providing coverage are the [Yuma \(AZ\) News Now](#) (9/29), the [Charlotte \(NC\) Observer](#) (9/26, 572K), the [Kansas City \(MO\) infoZine](#) (9/29, 175), the [Navajo Times \(AZ\)](#) (9/14, 66K), the [Native American Times](#) (9/29, 337), the [Indian Country Today Media Network](#) (9/26, 78K), the [Indian Country Today Media Network](#) (9/26, 78K), [KSL-TV Salt Lake City](#) (9/29, 1.07M), [KOAT-TV Albuquerque, NM](#) (9/29, 56K), [KOAT-TV Albuquerque, NM](#) (9/29, 56K), [KJZZ-FM Phoenix](#) (9/29, 7K), and [WDIV-TV Detroit](#) (9/29, 172K).

GLEN CANYON DAM MARKS 50TH ANNIVERSARY AS POWER SOURCE. The [AP](#) (9/27, Tang) reports that Interior Secretary Sally Jewell and “other officials on Saturday marked the 50th anniversary of power generation by Glen Canyon Dam, a structure that helped usher in a new era in the Southwest.” Jewell said, “Now, it’s not without its controversy. But there’s no question that this engineering feat was incredibly valuable to the economic future of this country.” She also noted, “This power plant produces enough electricity during the year to not use 2 ½ million tons of coal or 11 million barrels of oil.” Anne Castle, Interior assistant secretary of water and science, “called the dam ‘the fulcrum’ that regulates flows between the Colorado River’s upper and lower basins.” Castle, “who is retiring, acknowledged a US Bureau of Reclamation study that confirmed there will be significant shortfall between water levels and demand in the coming decades.” She said “federal regulators are continuing to work on a long-term management plan that will include high-flow releases to redistribute sediment.”

Coverage by the AP was also picked up by the [Washington Post](#) (9/27, 4.9M), the [Sacramento \(CA\) Bee](#) (9/27, 646K), the [San Francisco Chronicle](#) (9/29, Tang, 2.24M), the [Charlotte \(NC\) Observer](#) (9/27, 572K), the [Deseret \(UT\) News](#) (9/29, 538K), the [Houston Chronicle](#) (9/27, Tang, 2.47M), the [Minneapolis Star Tribune](#) (9/27, Tang, 1.48M), [ABC News](#) (9/29, 5.02M), and [KSL-TV Salt Lake City](#) (9/29, 1.07M).

Also providing coverage are the [Salt Lake \(UT\) Tribune](#) (9/29, 479K), the [Denver Post](#) (9/29, 1.12M), [KNXV-TV Phoenix](#) (9/29, 225K), and [KGMB-TV Honolulu](#) (9/29, 85K).

INTERIOR APPROVES \$269,000 FOR COMMONWEALTH OF THE NORTHERN MARIANA ISLANDS.

The [Marianas Variety](#) (9/29) reports that Interior Assistant Secretary for Insular Areas Esther Kia’aina has “announced \$269,172 in grant assistance to the Commonwealth of the Northern Mariana Islands through the Office of Insular Affairs’ Capital Improvement Project program to completely renovate existing classroom and office buildings at Northern Marianas College and thereby provide a more conducive environment for learning.” Kia’aina said, “Infrastructure projects such as these are vital to supporting the students in Saipan’s only public institution of higher learning. Northern Marianas College is currently housed in what used to be the Dr. Torres Hospital built over 50 years ago during the US administration of the Trust Territory of the Pacific Islands. We are pleased to support education and youth in the CNMI through rehabilitation of their campus.”

COMMUNITIES TO RECEIVE \$700,000 POST-SANDY GRANT. The [New Haven \(CT\) Register](#) (9/26, 165K) reports that “ten Greater New Haven and Bridgeport-area coastal communities will receive a \$700,000 US Department of the Interior post-Hurricane Sandy planning grant to work with The Nature Conservancy to create a regional framework for coastal resilience in Southern Connecticut, officials said this week.” According to the article, “the South Central Regional Council of Governments, made up of the chief elected officials of 15 Greater New Haven municipalities bounded by Milford to the west, Madison to the east and Meriden to the north, voted unanimously Wednesday to authorize Executive Director Carl Amento to sign the necessary paperwork.”

SURVEY FINDS MOST VOTERS IN WEST OPPOSE TRANSFER OF PUBLIC LANDS TO STATES. In its “Govbeat” blog, the [Washington Post](#) (9/26, Chokshi, 4.9M) reports that “in six out of eight Western states,

that "fire information officers say crews have contained 98 percent of the Assayii Lake Fire and plans calls for the Bureau of Indian Affairs Navajo fire program to take over firefighting efforts Tuesday."

Additional Coverage. Additional coverage of wildfires was provided by the Los Angeles Times (6/30, Carcamo, Muskal, 3.46M) and the Christian Science Monitor (6/27, 566K).

Commentary. In an editorial, the Medford (OR) Mail Tribune (6/27, 67K) urges the Senate to "take up S. 1875, the Wildfire Disaster Funding Act, without delay."

SPOKESMAN FOR SEN. MURKOWSKI USES EAGLE-KILL PERMIT APPROVAL TO BASH KING COVE DECISION. Politico (6/27, Guillén, 637K) reports that news of the FWS' approval of an eagle-kill permit for the Shiloh IV project was used by a spokesman for Sen. Lisa Murkowski "to bash Interior over denying the King Cove emergency access road through a wildlife refuge." Rob Dillon emailed reporters, "Now wait a gosh darn minute, you mean to tell me that the Interior Department says it's OK for wind farms to kill eagles, but the good people of King Cove can't build an 11-mile life-saving road because it might disturb a few migrating black brant?"

ENDANGERED SPECIES COALITION RUNNING AMPLIFYD CAMPAIGN. Fox News (6/27, 6.72M) reports on Amplifyd, a company which provides a service for users to lobby lawmakers for a "nominal fee." The article notes that The Endangered Species Coalition is "currently running an Amplifyd campaign to lobby Interior Secretary Sally Jewell to maintain Endangered Species Act protections for gray wolves." According to the article, "individuals who are interested in the cause can pay \$4.95 to have Amplifyd make the call to Jewell – or Jewell's office – on their behalf."

OBAMA PRAISES FEDERAL EMPLOYEES. In its "Federal Eye" blog, the Washington Post (6/27, Davidson, 4.22M) reported President Obama commended Federal employees while at a Thursday town hall meeting and placed the blame on Republicans for recent pay freezes, sequestration, and furloughs. The President said most government workers "work really hard doing really important stuff." Obama added that "Republican rhetoric sometimes" makes it appear that "working for government" is "not a real job."

ADDITIONAL COVERAGE OF NATIVE HAWAIIAN FEDERAL RECOGNITION. Additional coverage of Native Hawaiian federal recognition was provided by the Honolulu Civil Beat (6/30, 41), the Kaua'i (HI) Garden Island News (6/30, 33K), the Indian Country Today Media Network (6/27, 45K), and the Indian Country Today Media Network (6/28, 45K).

CONGRESS URGED TO RENEW CONSERVATION FUND. In an op-ed for the Salt Lake (UT) Tribune (6/30, 470K), Ralph Becker, the mayor of Salt Lake City and a member of Mayors for Parks, a bipartisan coalition of mayors, writes that "for the mayors working locally to serve the American cities that make the United States the dynamic country that it is, here's a cause we can all agree on: the creation and preservation of parks and green spaces." He notes that "this month, mayors from across the country unanimously called for the renewal of a program that has allowed urban and metropolitan parks to flourish for 50 years." Becker argues that the Land and Water Conservation Fund (LWCF) is "a smart investment for cities and the taxpayers who live in them."

CONGRESS URGED TO SUPPORT ARIZONA SONORAN DESERT HERITAGE ACT. For the "Congress Blog" of The Hill (6/30, Uken, 237K), Jim Uken, who served as director of the US Air Force side of the Barry M. Goldwater Range, writes that "to prevent budget shortages and base closures from affecting military installations and training facilities in the United States, we need to be vigilant and creative in how we defend them from incompatible uses outside their boundaries." He notes that "Arizona proudly hosts several military installations that are vital to national security, and contribute thousands of jobs and approximately \$9 billion to our state's economy," and "Arizona's bases—along with other DoD bases in southern California and US Navy assets that train from coastal waters off California—share a reliance on the Barry M. Goldwater Range (BMGR)." Uken notes that the Arizona Sonoran Desert Heritage Act would "protect approximately 900,000 acres of Bureau of Land Management lands west and south of the White Tank Mountains, including 650 square miles of lands under training routes used by pilots from Luke, Davis-Monthan, WAATS and MCAS Yuma." According to Uken, "in an uncertain budget future, Congress should act collaboratively and resourcefully in its efforts to support the Department of Defense's goals by considering the Arizona Sonoran Desert Heritage Act and similar landscape-level legislation as useful, cost-effective tools for protecting mission viability of the BMGR and the bases it supports nationwide."

IMPROVEMENT OF FEDERAL LAND MANAGEMENT IN MONTANA URGED. In an op-ed for the Great Falls (MT) Tribune (6/28, 90K), Skip Kowalski, president of the Montana Wildlife Federation, Tony Jones, president of the Ravalli County Fish and Wildlife Association, J.W. Westman, a member of the Laurel Rod and Gun Club, and Casey Hackathorn, president of Hellgate Hunters and Anglers, write that “over the last few months, some Montana legislators have been ginning up attention to the idea that national forests and other public lands should be taken away from the federal government and transferred to state or local governments.” However, they claim that “these federal land takeover proposals gloss over the practical realities, like whether state or local agencies have the capacity to manage millions of acres of public land or the tax increases that would be necessary to finance all the activities they envision.” For this reason, they write that “members of our organizations support smart legislative proposals to improve forest management, like Sen. Jon Tester’s Forest Jobs and Recreation Act,” and they “also support active participation in land and resource planning by the US Forest Service, Bureau of Land Management, and other federal agencies.”

America’s Great Outdoors:

National Park Service:

NPS TO MEET WITH ORGANIZER ABOUT FUTURE OF FORT RENO CONCERTS. The Washington City Paper (6/27, 862K) reports that representatives of the NPS will meet with Fort Reno summer concert series organizer Amanda MacKaye on Monday. The meeting was “brokered by D.C. Shadow Sen. Paul Strauss, who was a Fort Reno organizer in the 1980s and early 1990s.”

Also reporting on the story are the DCist (6/30, 21K), the Washingtonian Magazine (DC) (6/30, 338K), and WTOP-FM Washington (6/30, 172K).

NPS REACHES AGREEMENT ON SMITHSONIAN FOLKLIFE FESTIVAL. The Washington Post (6/30, Gibson, 4.22M) reports that “the years-long, \$40 million renovation” of the National Mall’s “badly damaged turf led to new National Park Service regulations governing the use of the park’s vast grass panels.” According to the article, “pickup sports teams are adjusting to the revised protocol — red flags staked into the ground mean to take the game elsewhere, please — but large-scale public events such as the National Book Festival and the Smithsonian Folklife Festival, which annually draws about 1 million visitors, have found it far more challenging to adapt.” The article notes that “after months of uncertainty surrounding the future of the Folklife Festival’s presence on the Mall — anxiety fueled by the departure of the National Book Festival from the property, and the launch of a grass-roots advocacy group called Save the Smithsonian Folklife Festival — the Folklife Festival’s place on the Mall for the next five years was secured Wednesday with an agreement between the Smithsonian Institution and the National Park Service.” Carol Johnson, spokeswoman for the NPS, said that “it isn’t a fight so much as an overblown misunderstanding.” Johnson said, “The main thing that’s important to us is that the memorandum of agreement recognized the cultural importance of both the festival and the Mall.”

DRAKES BAY OYSTER CO. WAITING FOR HIGH COURT HEARING. The Wall Street Journal (6/30, Carlton, Subscription Publication, 5.51M) reports that the owners of the Drakes Bay Oyster Co., Kevin Lunny and his family, are now waiting to learn whether the US Supreme Court will hear their case. Amid the uncertainty, Lunny said he has reduced his staffing from 30 to 25, mostly through attrition. Lunny said, “The government is a powerful group to be up against. They have unlimited resources and they just line up the lawyers.”

ERIE CANALWAY NATIONAL HERITAGE CORRIDOR ACT INTRODUCED. The Niagara (NY) Frontier Publications (6/27) reports that “standing along the western terminus of the Erie Canal,” Sen. Kirsten Gillibrand and Congressman Brian Higgins “announced introduction of the Erie Canalway National Heritage Corridor Act (HR 4641), a bill to extend the canalway’s authorization for the next 15 years.” Gillibrand said, “The Erie Canal Corridor is one of America’s richest treasures, and holds enormous potential that we are still unlocking. From the waterfront in Buffalo where we stand today, through the Finger Lakes and up to Lake Champlain, the Erie Canal continues to fuel our economy and provide New Yorkers with miles of adventure and endless recreation. As New York’s first senator from upstate in nearly 40 years, I will always work to preserve the beauty and tradition of the Erie Canal, and the extension of this National Heritage Corridor is an important step to continue garnering the national recognition it deserves.”

MARIPOSA GROVE TO BE CENTER OF 150TH YOSEMITE CELEBRATION. The Fresno (CA) Bee (6/28, 352K) reports that "hundreds of people, television cameras, lawmakers, government leaders and the California State Parks Mounted Patrol on horseback are expected" at the Mariposa Grove Monday in celebration of the 150th anniversary of the Yosemite Grant Act. The article notes that "during the celebration, the park is kicking off a \$36 million renovation at the grove, which will mean ripping out asphalt and other parts of the human footprint." Yosemite spokesman Scott Gediman said, "This date is historic and significant. We want the public to share in it. There may be 500 or 600 people, so we will direct people to parking areas in other places and use shuttle buses to transport them to the grove."

Also providing coverage of the anniversary celebration are the Sacramento (CA) Bee (6/28, 687K), the Sacramento (CA) Bee (6/29, 687K), NPR (6/30, Khokha, 519K), the Christian Science Monitor (6/29, 566K), the Turlock (CA) Journal (6/30, 54K), and KFSN-TV Fresno, CA (6/30, 2K).

NPS DECIDES AGAINST DREDGED SAND ON NORTH CAROLINA'S SHACKLEFORD BANKS. The AP (6/30, Waggoner) reports that the NPS has "backed off its proposal to use dredged sand to fight erosion on North Carolina's Shackleford Banks – pleasing both environmentalists, who want to maintain the barrier island's pristine condition, and local beach town officials, who want the sand for their shores." According to the article, "in a letter earlier this month to the Army Corps of Engineers, the superintendent of the Cape Lookout National Seashore said he was withdrawing the proposal to put dredged sand on Shackleford Banks, the southernmost barrier island in the seashore." Seashore Superintendent Pat Kenney "initially thought the extra sand would limit erosion on the western tip of Shackleford," but he said "he changed his mind after talking with coastal scientists."

REPORT SAYS EVERGLADES RESTORATION EFFORTS MOVING TOO SLOWLY. The E&E Daily (6/27) reports that "Everglades restoration efforts are moving too slowly and should incorporate new knowledge about climate change, said the National Research Council in a lengthy report released today." The report, "the fifth in a series of congressionally mandated evaluations of the Comprehensive Everglades Restoration Plan, said actions have been too modest." The document said "while the 2011 Central Everglades Planning Project recommends boosting water flow into the region, delays and funding constraints mean construction may take decades."

Also reporting on the story is the Summit County (CO) Citizens Voice (6/28, 506).

YELLOWSTONE LOOKS TO LOCAL PRODUCERS TO PROVIDE FOOD. The AP (6/30, Todd) reports that Yellowstone National Park wants to work with producers "to put plenty of local food on menus across the park." Its goal is "to make 50 percent of its food purchases from within 500 miles of the park or from a certified organic provider by 2016." The article notes that "it's a target that pits profits against philosophy, as Xanterra, the park's largest concessionaire, strives to support local growers while keeping prices low in the nation's first national park."

NPS TO CONSIDER WHETHER HISTORIC WARSHIP DESERVES TO BE LISTED ON NATIONAL REGISTER OF HISTORIC PLACES. The New York Times (6/30, Mcgeehan, Subscription Publication, 9.65M) reports that "the rusty old troop carrier known as Circle Line X may be put back to work soon, just a few blocks from Times Square." Its owner, New York Cruise Lines, "wants to moor it at the edge of the city and turn it into a terminal and mini-museum for the customers of the Circle Line sightseeing business." The firm "cleared the first hurdle in the process two weeks ago when the New York State Historic Preservation Office decided to add the ship to the state's Register of Historic Places." Next, the NPS will "consider whether the boat deserves a spot on the National Register of Historic Places."

NPS ASSESSING FLOOD DAMAGE AT DENALI NATIONAL PARK. The Fairbanks (AK) News-Miner (6/30, 44K) reports that the NPS was "assessing damage to the only road leading into Denali National Park and Preserve on Friday after evacuating more than 100 guests and employees who were staying at a private lodge and became stranded by flooding that washed out sections of the road." The article notes that "a total of 103 guests and employees from the Denali Backcountry Lodge near Kantishna at the west end of the 92-mile Denali Park Road were successfully evacuated Thursday night."

CUYAHOGA VALLEY NATIONAL PARK REOPENS TRAIL NEAR BRECKSVILLE EAGLES' NEST. The Cleveland Plain Dealer (6/30, 1.06M) reports that the Cuyahoga Valley National Park has "lifted trail restrictions

because the offspring nesting eagles in the nearby Cleveland Metroparks Brecksville Reservation have fledged." According to the article, "open again to foot traffic are railroad tracks and a 30-foot right-of-way on either side, from the Route 82 Bridge at the Station Road visitor area north to the Cuyahoga Valley Scenic Railroad's railroad tracks at Fitzwater Yard."

BURGLARS STEAL FROM NPS. WHIO-TV Dayton, OH (6/30, 98K) reports that "burglars broke into two National Park Service sheds and stole several expensive pieces of lawn equipment." The article notes that "the locks were either pried or cut to the sheds near South Williams Street in Dayton, according to a police report."

NPS TO HOST "EXPLORING THE SKY". The Washington Post (6/28, Friedlander, 4.22M) reports that on July 19, the NPS and the National Capital Astronomers will host "Exploring the Sky."

MAN DIES WHILE HIKING OUT OF GRAND CANYON. The AP (6/30) reports that "officials say an Ohio man has died as he hiked out of the Grand Canyon after a commercial river trip." The NPS says that "attempts to resuscitate the 62-year-old man weren't successful Sunday morning."

Also reporting on the story are the Washington Post (6/30, Barbash, 4.22M) and the AP (6/30).

Bureau of Land Management:

BLM EMBRACING WYOMING'S SAGE GROUSE CONSERVATION STRATEGY. The AP (6/30, Neary) reports that BLM Director Neil Komze "came to Cheyenne on Thursday to mark the BLM's approval of a new resource management plan for some 3.5 million acres in central Wyoming." Komze says "his agency is embracing a sage grouse conservation strategy first developed by the state of Wyoming that could serve as a model around the West." The federal plan "mirrors Wyoming's 'core area' conservation strategy that limits development in areas identified as ideal sage grouse habitat."

Also covering the story are the "Govbeat" blog of the Washington Post (6/30, Wilson, 4.22M) and the Casper (WY) Star-Tribune (6/30, 90K).

BLM MOVES TO DISMISS LAWSUIT OVER ROUNDUPS. The E&E Daily (6/27) reports that the federal government is "moving to dismiss a lawsuit by ranchers demanding an accelerated roundup of wild horses." The BLM is "running out of room at holding facilities and Congress has banned it from culling the wild horse population, federal lawyers wrote in a filing this week in US District Court in Reno, Nev." Department of Justice attorneys wrote, "BLM has been largely unable to dispose of excess horses other than through qualifying adoptions and sales."

LAWMAKERS AIM TO TAKE RED RIVER LAND BACK FROM BLM. The Dallas Morning News (6/30, Kamisar, 1.18M) reports that "the latest salvo in the fight over land along the Red River heads to Congress, as three Texas lawmakers seek to reign in the federal government's claims." Sens. John Cornyn and Ted Cruz, along with Rep. Mac Thornberry "announced a bill Friday that orders the Bureau of Land Management to cede land along the river to any person who can prove ownership through state or county records."

Additional coverage of the issue was provided by the Lufkin (TX) Daily News (6/30, 1K).

UTAH OFFICIALS AIR COMPLAINTS ABOUT BLM. The Deseret (UT) News (6/30, 610K) reports that Garfield County Sheriff Danny Perkins "accompanied six county commissioners from Iron, Beaver and Garfield counties to Washington, D.C., for a series of meetings last week to air complaints — chief among them the fractured and abysmal experience rural Utah has with top law enforcement officials from the Bureau of Land Management." The article notes that "the meeting in Washington happened the same day members of the Utah natural resources legislative interim committee hosted a public roundtable discussion in Salt Lake City with Juan Palma, director of the Utah BLM, and Kevin Rice, special agent in charge with the US Forest Service in Salt Lake City, among others." BLM spokeswoman Megan Crandall said "the legislative hearing did nothing to improve relationships."

Fish and Wildlife Service:

OBAMA ADMINISTRATION OVERHAULS LISTING POLICY. The E&E Daily (6/27) reports that the Obama Administration on Friday “released a final policy to guide government scientists in determining whether wildlife species deserve protection under the Endangered Species Act, making a substantive change to a draft policy released 2½ years ago.” The FWS and National Marine Fisheries Service policy will “dictate when wildlife is granted federal protection and, if so, where.” According to the article, “the legally binding policy, which takes effect in about a month, offers guidance for interpreting when a critter is in danger of extinction ‘throughout all or a significant portion of its range,’ a key, albeit oft-debated, phrase in the 1973 law.”

The E&E Daily (6/27) reports that “wildlife and property rights advocates offered mixed reviews today of the Obama administration’s final policy for how to interpret a key phrase in the Endangered Species Act.” According to the article, “one environmentalist said the new policy could hurt the recovery of animals that were once ubiquitous across the American landscape, such as the grizzly or wolf.” However, “one ESA critic said the new policy offers less flexibility than the previous one under the George W. Bush administration that allowed species to be protected only where they are struggling, which spared landowners and businesses the burden of regulations in areas where a species is doing fine.” The article notes that “it will likely be years before the implications of the new Obama policy can be measured.”

PELICANS’ NESTING GROUNDS IN NORTH DAKOTA SHRINKING. The AP (6/30, Macpherson) reports that “rising lake levels are swallowing American white pelicans’ nesting grounds at a guano-rich island in central North Dakota known as North America’s largest refuge for the big-billed birds, federal wildlife officials say.” According to the article, “about 30,000 pelicans returned to 4,385-acre Chase Lake National Wildlife Refuge this year to find water had gobbled several acres of their main nesting island, creating increasingly cramped conditions for the giant birds, among the largest in North America.” However, “the decreased elbow room does not appear to have affected nesting activity so far, and the island continues to be filled with the grunts and squawks of thousands of white pelicans and their chicks, said Neil Shook, a U.S Fish and Wildlife Service biologist and refuge manager.”

Coverage by the AP was also picked up by the Washington Post (6/30, 4.22M), the Norfolk (NE) Daily News (6/30, 48K), the Oklahoman (6/30, 530K), the Sacramento (CA) Bee (6/28, 687K), and the US News & World Report (6/28, 645K).

GROUPS PETITION FOR PROTECTION OF WILD HORSES. The AP (6/30, Sonner) reports that “despite overall numbers in the tens of thousands, mustang advocates say the wild horse is on the verge of going extinct in North America for the second time in 13,000 years and deserves protection under the Endangered Species Act.” Two groups in a petition to the FWS are “focusing on genetics and research they say prove the horses are a native species.” They claim “growing threats from development, livestock grazing and government gathers are jeopardizing the genetic viability of individual herds in 10 states from California to Montana.”

Coverage by the AP was also picked up by the Washington Post (6/30, Sonner, 4.22M), the Sacramento (CA) Bee (6/28, 687K), and the Elko (NV) Daily Free Press (6/30, 22K).

FWS AGREES TO REVIEW RED WOLF PROGRAM IN NORTHEASTERN NORTH CAROLINA. The AP (6/30) reports that the FWS has “agreed to review the red wolf program, raising the possibility that the 27-year experiment to restore the rare predators in eastern North Carolina may come to an end.” The N.C. Wildlife Resources Commission asked the federal agency this month to “determine the appropriateness of continuing the experimental (wolf) program.”

Coverage by the AP was also picked up by the Washington Times (6/30) and the Raleigh (NC) News & Observer (6/28, 504K).

NEW MEXICO COUNTY JOINS PRAIRIE CHICKEN LAWSUIT. The AP (6/27) reports that “commissioners in a southeastern New Mexico county voted unanimously Thursday to join a lawsuit against listing the lesser prairie chicken as a threatened species.” Lea County Commission Chairman Gregg Fulfer said “the county entered the lawsuit because the commission believes the federal government’s results on the chicken’s threatened status is inconclusive.”

DEVELOPERS SEEK END TO FEDERAL PROTECTIONS FOR CALIFORNIA GNATCATCHER. The Los Angeles Times (6/30, Sahagun, 3.46M) reports that “developers citing new scientific evidence are pressing to end

federal protections for the California gnatcatcher, whose status as a threatened species has barred development in many areas of prime Southern California coastal real estate for two decades." They argue that "DNA analyses show that the coastal California gnatcatcher is no different from other gnatcatchers flourishing from the Palos Verdes Peninsula to the southern tip of Baja California." If the FWS "agrees, it could remove federal protections it extended to the bird in 1993 — opening the way to development on an estimated 197,000 acres of largely coastal land in Los Angeles, Orange, San Diego, Ventura, Riverside and San Bernardino counties."

KAUAI FERAL CATS SHOWN KILLING ENDANGERED SEABIRDS. The AP (6/30) reports that "feral cats on Kauai have been filmed killing endangered seabirds." According to the state Department of Land and Natural Resources, "footage shows cats pulling a Newell's Shearwater and a Hawaiian Petrel out of burrows and killing the birds."

BICKNELL'S THRUSH FOUND IN VERMONT. The AP (6/30, Rathke) reports that "just weeks ago, researchers identified a Bicknell's Thrush on Mount Mansfield that had been banded in the Dominican Republic while wintering there in 2010." The discovery is "giving scientists hope."

Securing America's Energy Future:

Renewable Energy:

FWS APPROVES FIRST EAGLE-KILL PERMIT FOR CALIFORNIA WIND FARM. The AP (6/28, Smith) reported that that US Fish and Wildlife Service on Thursday approved "a special permit allowing up to five golden eagles to be accidentally killed over five years" at the Shiloh IV Wind Project in California, making the wind farm "the first in the nation to avoid prosecution if eagles are injured or die when they run into the giant turning blades." FWS Director Daniel Ashe "said the permit encourages development of renewable energy while requiring the wind company to take steps to protect eagles from turbines and power lines." The AP noted that the permit, which is not required for wind farms, "will require the facility to take steps to prevent eagle injuries and deaths from electrocution by retrofitting 133 power poles."

Also reporting on the story were The Hill (6/27, Cama, 237K), the Washington Times (6/27, Ernst, 455K), the National Review (6/30, 879K), the SNL Financial (6/30, 21K), the reNews (6/30), and the North American Windpower (6/30, 43K).

BLM TO HOLD COMPETITIVE SOLAR ENERGY ZONE AUCTION . The E&E Daily (6/27) reports that the BLM is "set Monday to hold the second-ever competitive solar energy zone auction that, if successful, could drive future development of commercial-scale projects across the Southwest." However, "in doing so, top agency officials acknowledge they are taking a calculated risk based on industry interest and projected market conditions." The article notes that "BLM last fall held the first-ever auction inside two SEZs in southern Colorado that, despite initial industry interest, saw no developers submit bids – a result that clearly stunned agency officials," and "failure this time around could put in jeopardy the Obama administration's extensive program to guide industrial-scale solar to areas with relatively low natural resource impacts at a time when solar and wind power development has reached record levels."

JUDGE REJECTS ENVIRONMENTAL CHALLENGE TO DEVELOPMENT PLAN. The E&E Daily (6/27) reports that the Interior Department "scored a major legal victory this week when a federal court rejected a challenge by environmental groups that claimed the department's plan to accelerate commercial-scale solar power development across the Southwest is illegal because it failed to consider alternatives that would cause less harm to natural resources." The lawsuit filed in February 2013 alleged that BLM's "plan to fast-track solar development on more than a quarter-million acres of federal lands violated the National Environmental Policy Act (NEPA) because it failed to consider a full range of 'reasonable alternatives to utility-scale solar energy development on undeveloped public lands,' such as rooftop solar and so-called brownfields." However, US District Judge Jeffrey Miller "issued a 29-page summary judgment this week concluding that BLM's plan does comply with NEPA, in particular the programmatic environmental impact statement (PEIS) that identified 17 solar energy zones (SEZs) where solar resources are high and natural resource conflicts are projected to be relatively low."

BOEM MAKING PROGRESS ON GEORGIA OFFSHORE LEASE. The Recharge News (6/30, Kessler, 633)

reports that the BOEM is "making progress on Southern Company's request for a five-year 'interim policy lease' to further research wind resource in three blocks off Georgia's coast near Tybee Island, officials tell Recharge." Southern Company and subsidiary George Power "want to conduct research likely using buoy-mounted Light Detecting and Ranging (LiDAR) technology." According to the article, "the study will determine whether wind resource there could justify installation of wind turbines."

Onshore Energy Development:

NATURAL GAS INDUSTRY PRESSES WHITE HOUSE ON INTERIOR FRACKING RULES. In recent meetings, natural gas companies and trade groups have taken their "concerns about looming Interior Department 'fracking' regulations to the White House," The Hill (6/29, Geman, 237K) reported. The effort is "part of a wider industry push to ensure that regulation of the development method doesn't create what the companies consider burdensome requirements that stymie production." Records show that White House and Interior staff "met with a group of trade associations on Feb. 29: the American Petroleum Institute, America's Natural Gas Alliance, the American Exploration and Production Council, the Independent Petroleum Association of America, and the U.S. Oil and Gas Association."

In the Wall Street Journal (6/29, Lewis, Subscription Publication, 5.51M), columnist Al Lewis criticized the move towards fracking.

INDUSTRY, EXPERTS WEIGH IN ON POSSIBLE OKLAHOMA EARTHQUAKE, FRACKING LINK. NBC Nightly News (6/27, story 4, 2:25, Williams, 7.86M) reported that "a lot of people in the state of Oklahoma are demanding answers about a huge spike in the number of earthquakes there." So far this year, the state has seen about a hundred earthquakes and "people want to know if fracking is to blame." Although "the industry says there's no definitive link," some experts "see few other explanations."

The Los Angeles Times (6/28, Horsey, 3.46M) also reported on the growing controversy.

ENVIRONMENTAL GROUPS CRITICIZE FEDERAL STUDY ON FOUR CORNERS POWER PLANT AND NAVAJO MINE. The Durango (CO) Herald (6/27, 28K) reports that "environmental groups Friday criticized as inadequate a draft federal study of coal operations at Four Corners Power Plant and Navajo Mine near Farmington." The article notes that "the comment period ended Friday for the draft environmental impact statement conducted by the Office of Surface Mining, Reclamation and Enforcement." Nellis Kennedy-Howard, a Sierra Club representative, said, "OSM's failure to adequately assess the health and water impacts from the continued burning of coal at Four Corners Power Plant is unacceptable. Four Corners Power Plant is over 50 years old – it's time to begin thinking about clean and safe alternatives in renewable energy."

Also providing coverage is the Summit County (CO) Citizens Voice (6/29, 506).

TWO FORMER LAWMAKERS LOBBY FOR CARBON CAPTURE AND SEQUESTRATION BILLS. The E&E Daily (6/27) reports that former House Majority Leader Richard Gephardt and former Sen. Tim Hutchinson are "pushing legislation to promote carbon capture and sequestration technologies, plus their use in enhanced oil recovery." Gephardt and Hutchinson headlined a congressional briefing on CCS "as part of an effort to help the coal industry survive in a carbon-constrained world."

JUDGE BLOCKS MINE PROJECT IN COLORADO. The E&E Daily (6/27) reports that a US District Court judge "blocked the expansion today of an Arch Coal Inc. coal mine in Colorado, saying regulators did not offer an adequate reason for failing to analyze the social costs of carbon emissions linked to the project." According to the article, "at issue was Arch's request for federal coal lease modifications to expand its West Elk underground mine within a roadless area of the Gunnison National Forest." The BLM "signed off on the company's request in 2012 after receiving the consent of the Forest Service," but "three environmental groups – WildEarth Guardians, the Sierra Club and High Country Conservation Advocates – sued last year."

Also reporting on the story is the AP (6/30).

TRIBES ASK EPA FOR PRE-EMPTIVE VETO OF WISCONSIN MINE. The E&E Daily (6/27) reports that six

Chippewa tribal bands are asking the EPA to "initiate Clean Water Act veto proceedings against a controversial mining project in northern Wisconsin near Lake Superior." At issue is Gogebic Taconite LLC's desire to revive Wisconsin's iron mining industry. The article notes that "the request can be seen as part of an effort by tribes and environmental groups to push regulators into taking more proactive action against large potentially polluting projects, from mines to fossil fuel export facilities."

NORTH DAKOTA'S PUBLIC SERVICE COMMISSION APPROVES PERMITS FOR SANDPIPER PIPELINE.

The E&E Daily (6/27) reports that North Dakota's Public Service Commission has "approved permits for construction of Enbridge Inc.'s 616-mile Sandpiper pipeline that would run to terminals in Minnesota and Wisconsin." Public Service Commissioner Randy Christmann said, "[The pipeline] will carry more than twice as much North Dakota oil as the Keystone XL would and has capacity to be upgraded significantly. This is a major step forward in moving oil in the safest and most efficient way possible." However, "federal regulators and regulatory boards in Wisconsin and Minnesota have not yet approved the pipeline." The project's opponents claim "it will be detrimental to wooded areas, farmland, rivers and lakes."

Offshore Energy Development:

GRIJALVA CALLS FOR BP TO REINSTATE GULF SPILL CLAIMS PROGRAM. On Friday, Rep. Raul Grijalva pressed "BP to reinstate its internal claims program after the oil giant shut it down one week ago," The Hill (6/27, Barron-Lopez, 237K) reported. BP's claims program involved "those impacted by the 2010 Gulf of Mexico oil spill." In a statement, Grijalva claimed the move took "away the sole avenue for over 10,000 claimants who opted out of the company's settlement agreement." BP Vice President Geoff Morrell revealed on the company's "website that it ended the program because few claimants used it."

BP SEEKS RETURN OF OIL SPILL CLAIM 'OVERPAYMENTS'. The AP (6/27) reports that "BP wants a federal judge to order restitution — plus interest — of what it says are hundreds of millions of dollars in overpayments to some businesses that claimed losses due to the 2010 Gulf oil spill." In a Friday court filing, BP "points to a revised policy for calculating losses that was approved by the court in May." The firm says "the court should order recalculation of awards paid prior to that change."

APPROVAL OF BP RESTORATION MONEY IS IN FINAL STAGE. The Pensacola (FL) News Journal (6/28, 151K) reports that "securing millions of dollars BP has earmarked for 15 local, proposed projects — including a fish hatchery and research center for Pensacola's bayfront and a national seashore ferry service — has made it through a critical hurdle." On Thursday, "a final plan and draft programmatic environmental impact statement was released to the public by the Department of Interior, basically vetting projects after a 75-day public input period so they can move forward for funding." However, "there still are a few steps to go before checks will be in hands and shovels will break ground on the third round of restoration projects in the BP Deepwater Horizon oil spill Natural Resource Damage Assessment process, as required under the federal Oil Pollution Act of 1990."

Tackling America's Water Challenges:

BOR PROVIDING FUNDS TO GUADALUPE-BLANCO RIVER AUTHORITY FOR WATER STUDY. The Victoria (TX) Advocate (6/27, 77K) reports that the BOR is "providing up to \$450,000 to the Guadalupe-Blanco River Authority to help it explore how to expand the region's water supply." In total, the bureau will "provide \$1.29 million to nine projects across Texas, said the bureau's acting commissioner, Lowell Pimley, on Friday."

CALIFORNIA AGENCY OPPOSES DELTA TUNNELS. The Stockton (CA) Record (6/27, 123K) reports that "the lone state agency to oppose Gov. Jerry Brown's twin tunnels plan warns that the project could force marinas out of business and take a big bite out of Delta agriculture." According to the article, "the Delta Protection Commission approved its formal comments Thursday night on the \$25 billion Bay Delta Conservation Plan, with a letter that says the project 'overwhelmingly' focuses on enhancing California's water supply and 'almost entirely disregards' legal requirements that the Delta be protected as a unique place."

Also providing coverage is the Central Valley (CA) Business Times (6/30, 206).

LAWSUIT OVER RIO GRANDE SILVERY MINNOW LOOMS . The Albuquerque (NM) Journal (6/30, 282K)

reports that "a looming lawsuit over the endangered Rio Grande silvery minnow threatens to revive a 'fish vs. farmers' battle over water management in central New Mexico." The environmental group WildEarth Guardians has "informed federal officials that it plans to file suit as early as mid-July, alleging that the Army Corps of Engineers and the Bureau of Reclamation are not doing enough to keep water in the river for the endangered Rio Grande silvery minnow."

BOR SEEKS PUBLIC COMMENTS ON PROPOSED NATIVE FISH RESTORATION PROJECT IN CENTRAL ARIZONA. The Yuma (AZ) News Now (6/30) reports that the BOR is "seeking public comments on a draft Environmental Assessment (EA) for a proposed fish barrier in Spring Creek, Yavapai County, Arizona."

COLORADO RIVER FACES CHALLENGING FUTURE. For "The Opinion Pages" of the New York Times (6/30, Mulroy, Subscription Publication, 9.65M), Pat Mulroy, the senior fellow for Climate Adaptation and Environmental Policy at University of Nevada's Brookings Mountain West and the former general manager of the Southern Nevada Water Authority, writes that the Colorado River, "which supports nearly 40 million people and seven states that cumulatively represent the world's fifth-largest economy, is facing a slow-motion natural disaster." She notes that "a long-term prognosis developed by the federal Bureau of Reclamation points to an even more challenging future in which the projected gap between supply and demand could exceed a trillion gallons a year by 2060." However, "by moving away from the 'use it or lose it' mentality of the 20th century and recognizing that no one has the luxury of protracted litigation over who gets what, the citizens of this basin are navigating to a more sustainable future."

EDITORIAL: WATER STORAGE PROJECTS VITAL FOR YAKIMA BASIN. The Tri-City Herald (WA) (6/27, 115K) editorializes that "this week, a bipartisan vote of the US House Appropriations Committee approved a bill including language that encourages the Bureau of Reclamation to join its funding with the state for projects we can't do on our own." The paper argues that "water is vital for the Yakima Basin for everything from agriculture to fish." The BOR is "the arm of federal government charged with overseeing the delivery of water," but "in some ways, the hands of the bureau are tied by history and legislative red tape." According to the paper, "water needs and methods of storage and delivery continue to evolve, yet the bureau is not free to adopt new strategies at will."

Empowering Native American Communities:

BIA CHIEF WASHBURN TOUTS ACHIEVEMENTS ON NATIVE AMERICAN ISSUES. The Global Gaming Business (6/30) reports that "restoring ancestral lands is one of the litany of Native American achievements under the tribal-friendly Obama administration." The article notes that "Obama's White House has increased the BIA budget, settled Cobell trust litigation and a number of water rights cases, enacted the Tribal Law and Order Act, permanently authorized the Indian Health Care Improvement Act (IHCA) and reformed reservation business leasing policies." And "for the first time in 40-plus years," BIA chief Kevin Washburn is "promulgating new regulations to what Indian advocates regard as a 'broken' federal process for recognizing tribes as governments."

DESCENDANTS OF FREEDMEN SUE INTERIOR. The Courthouse News (6/27, 7K) reports that "the US government turned its back on the descendants of freed slaves of Native Americans, swindling them out of lucrative land royalties allotted to them as children, a class action claims in Federal Court." In a lawsuit, Leatrice Tanner-Brown and the Harvest Institute Freedman Federation seek "an accounting of revenue from leases on land promised to children of Freedmen, who were liberated by members of the so-called 'Five Civilized Indian Tribes.'"

DEMOCRATS BUILDING OUTREACH EFFORTS TO TRIBAL VILLAGES. The New York Times (6/29, Peters, Subscription Publication, 9.65M) reports Democrats view "tiny tribal villages" as "so vital to their tenuous majority" in the Senate, that "they are building a vast outreach operation." The Times notes "native populations are one of the most important but least understood" groups of constituents for the Democratic Party, but "they do not predictably break for one party or the other."

Top National News:

OBAMA WARNS THAT ISIL'S INTERNATIONAL REACH POSES A THREAT TO US. President Obama's remarks on ABC's This Week regarding the growing threat from ISIL did not generate a great deal of media coverage and were not noted on either of the network newscasts that aired on Sunday evening. Instead, in their

reports from Iraq, the networks emphasized the role that the US military is playing in the Iraqi military's so far unsuccessful attempts to check ISIL's momentum. On NBC Nightly News (6/29, story 2, 2:45, Holt, 7.86M), Lester Holt reported that on Sunday, the Iraqi army "continued their offensive...with some help from the US," and Richard Engel went on to report from Baghdad that "the US is now providing...more weapons."

On ABC World News (6/29, story 4, 1:20, Jarvis), Rebecca Jarvis said Iraq's military is "fighting back with the help of the United States." As the words "American Assist" and "US Supports Iraqi Offensive" were shown at the bottom of the screen, correspondent Hamish MacDonald went on to report that the Iraqi army is getting "US intelligence support" as it attempts to retake ISIL-held Tikrit. MacDonald also reported that "three full teams of US military advisers are" in Iraq, and "some [are] now pushing north of Baghdad."

The AP (6/30) reports that in the interview shown on ABC's This Week, President Obama said he is "concerned that battle-hardened militants who have spent time in Syria and Iraq could present a rising threat to US security because they would be able to enter the country without visas on European passports." The President is quoted as saying, "We've seen Europeans who are sympathetic to their cause traveling into Syria and now may travel into Iraq, getting battle-hardened. Then they come back." The AP notes that also on ABC's This Week, Rep. Peter King (R-NY), a former chairman of the House Homeland Security Committee, said, "The terrorists in Syria are extremely sophisticated, very advanced, and so thousands of people can go back to Europe and come here."

The Los Angeles Times (6/30, Mascaro, 3.46M) says the President "acknowledged...that militants fighting in Syria and Iraq pose a direct threat to the United States because many of them have Western passports that enable them to easily enter the country without a visa." The Times quotes the President as saying, "We have to improve our surveillance, reconnaissance, intelligence there. Special forces are going to have a role. And there are going to be times where we take strikes against organizations that could do us harm."

Under the headline, "Terrorists in Iraq, Syria 'Gaining Strength,' Obama Admits," the New York Daily News (6/30, Edelman, 4.36M) reports that the President "admitted...that terrorists are 'gaining strength' in recent months as the situations in Iraq and Syria have deteriorated and that the US has been 'under serious threat' for his 'entire' time in office."

Politico (6/29, Everett, 637K) reported that in his interview with ABC's George Stephanopoulos, the President "highlighted the growing fears that those trained in Middle East terrorist cells can go back to Europe or the United States to execute an attack." Voice of America (6/30, Bowman, 21K) reports that the President warned that ISIL "could pose a threat to the United States."

When asked to assess US intelligence on ISIL, House Intelligence Committee Chairman Mike Rogers (R-MI) said on CNN's State of the Union (6/29, Crowley), "It's not great." Rogers continued, "Within the last months, we have seen a rise in the arrests of individuals in Europe who have trained in Syria, who have come back to their host countries, and who have talked about conducting events. ... What's so dangerous about allowing them to pool up in Syria, allowing them to have safe haven, is that Al Qaeda-minded individuals now have an army. It is as dangerous a time for the United States as I've ever seen."

Likewise, on CBS' Face The Nation (6/29, Schieffer, 2.64M), House Homeland Security Committee Chairman Michael McCaul (R-TX) said ISIL is "the number one threat to the homeland, the number one national security threat."

According to AFP (6/30, 891K), it has been estimated that "nearly 800 French citizens have spent time fighting in Syria's civil war...and Belgium says 200 of its people have done the same," while the UK "puts its number at 400." AFP notes that "those holding French, Belgian and British passports – along with a host of other European countries – do not need visas to" enter the US, "meaning they can potentially avoid scrutiny." AFP also notes that "a French-Algerian who fought alongside radical Islamists in Syria...allegedly killed four people in a deadly shooting at the Jewish Museum in Brussels on May 24."

Manchin: Obama Needs Congressional Approval For Military Action In Iraq. According to the Los Angeles Times (6/30, Mascaro, 3.46M), "Whether Congress will need to...authorize the White House's military actions in Iraq remains open for debate." The Times notes that on CBS' Face The Nation, Sen. Joe Manchin said the President "has to come back to Congress." Manchin added, "I can assure you there's no appetite for us to get

boots on the ground and go back into that country in any way, shape or form.”

However, also on CBS' Face The Nation (6/29, Schieffer, 2.64M), Sen. John Barrasso said, “I think the President's decision to withdraw the United States from Iraq to keep a campaign promise, without leaving a stay-behind force, was a mistake” because “when the United States leaves a vacuum anywhere, that emboldens others.” Former US Ambassador to Iraq James Jeffrey, on CBS' Face The Nation (6/29, Schieffer, 2.64M), made the case that the civil war in Iraq “is a national security emergency for the United States,” and “we need to continue acting quickly.” Later on CBS' Face The Nation (6/29, Schieffer, 2.64M), Jeffrey recommended that the US “use military strikes against ISIS when they threaten the Shia areas or Baghdad.”

On CBS' Face The Nation (6/29, Schieffer, 2.64M), Washington Post columnist Michael Gerson commented on the “the paradox of foreign policy polling” in light of the fact that “in Iraq and Syria, the President's doing what Americans want, but...they don't like the result,” so “his poll numbers are going down.”

Author James Robbins, in an op-ed for USA Today (6/30, 5.82M), contends that “a few head-to-head battles with the Iraqi army, backed up by US intelligence and air power, might be enough to...break [ISIL's] hold on much of Iraq.” However, Robbins warns that the US needs to “make...the necessary military commitment to win,” because “sending...a tiny, unsupported advisory force may only mean buying into whatever defeat ISIS eventually deals Iraq's military.”

ISIL Demands All Muslims Submit To Baghdadi's Authority. The AP (6/30, Lucas) reports that on Sunday, ISIL “formally declared the establishment of a new Islamic state...and demanded allegiance from Muslims worldwide.” According to the AP, an ISIL “spokesman,” Abu Mohammed al-Adnani, “declared the group's chief, Abu Bakr al-Baghdadi, as the new leader, or caliph, and called on jihadi groups everywhere, not just those in areas under the organization's control, to swear loyalty to al-Baghdadi and support him.” The AP notes that Adnani “loosely defined the Islamic state's territory as running from northern Syria to the Iraqi province of Diyala.”

According to McClatchy (6/30, Prothero, Subscription Publication, 23K), “Nearly 12 million people now live under some level of ISIS control in Syria and Iraq.” McClatchy also points out that ISIL's “activities in Syria have been denounced by al Qaida's leader, Ayman al Zawahiri, and the official al Qaida affiliate in Syria, the Nusra Front.” McClatchy goes on to report that ISIL's announcement “poses numerous issues, not the least of which will be the reaction of” ISIL's Sunni allies in Iraq, who “will now have to either declare themselves followers of the caliphate” or “be declared enemies of the caliphate.”

The Washington Post (6/30, Sly, Morris, 4.22M) says it is “not clear...whether some of the other Sunni revolutionary movements now fighting the Iraqi government alongside the militants, many whom are fiercely nationalistic, will accept the Islamic State's explicit rejection of national boundaries, including those of Iraq.”

USA Today (6/30, Dorell, 5.82M) reports that according to Paul Lister of the Brookings Doha Center, ISIL “lays claim to billions of dollars in assets, scores of communities and operations that extend into Turkey and Lebanon.” USA Today goes on to report that Lister emphasizes ISIL “has developed an elaborate bureaucracy and an efficient model of governance, providing modern social services together with medieval justice.”

The Wall Street Journal (6/30, A1, Dagher, Subscription Publication, 5.51M) reports that ISIL is growing more secure in Syria following its string of victories in Iraq, which have provided the group with money, heavy weapons and recruits.

Reuters (6/30, Westall) quotes Adnani as saying, “The legality of all emirates, groups, states, and organizations, becomes null by the expansion of the khalifah's authority and arrival of its troops to their areas.” Adnani added, “Accordingly, The ‘Iraq and Sham’ (Levant) in the name of the Islamic State is henceforth removed from all official deliberations and communications, and the official name is the Islamic State from the date of this declaration.”

Vanden Heuvel Suggests Kristol Volunteer To Fight In Iraq. The Huffington Post (6/29, 11.54M) reported that on ABC's This Week, The Nation's Katrina Vanden Heuvel, addressing the Weekly Standard's Bill Kristol, said the US “should not go back to war, and if you feel so strongly, you should, with all due respect, enlist in the Iraqi army.”

According to the Daily Caller (6/29, Cohen, 408K), Vanden Heuvel made the case on Sunday that “the architects of this tragedy that have cost this country trillions of dollars and thousands of lives’ should be held accountable,” and “criticize[d] the conservative media’s ‘arm chair warriors.’”

OBAMA TO SEEK \$2 BILLION, NEW POWERS TO DEAL WITH FLOOD OF UNACCOMPANIED MINORS INTO US.

The President’s plan to request \$2 billion and new powers from Congress to address the mounting immigration crisis at the nation’s southern border led one of the two network broadcasts that aired Sunday evening. That coverage and print reports this morning cast the move as an escalation by the Administration of its efforts to address the situation.

ABC World News (6/29, story 2, 2:00, Jarvis) reported that in a “major announcement” on Monday, the President “is expected to ask Congress for more than \$2 billion and new powers to address the crisis at America’s southern border.” ABC (Avila) added that the Border Patrol is apprehending added about “350 children a day,” but once they are in the US, “American law says they cannot be sent back immediately.” DHS sources “admit less than 20 percent are ever sent back to their home country” due to “a law passed with bipartisan support and signed by President George W. Bush in 2008.” On Monday, the President will send a letter to Congress “asking to fast-track the return of unaccompanied minors from Central America and for \$2 billion to hire more immigration judges and build more facilities to hold the children crossing.”

NBC Nightly News (6/29, lead story, 2:55, Holt, 7.86M) reported in its lead story the President “is preparing an urgent request to Congress to help stem the human tide.” NBC (Welker) added that the request “is the latest move by the Obama Administration to deal with the crisis along the border. The President is under increasing pressure to tackle the issue but with relations already deeply strained between this President and Republicans on Capitol Hill, there are no guarantees.” NBC added that the question is whether Congress will “approve the President’s request. ... A spokesman for John Boehner says he won’t react until he sees the proposal.”

The Washington Times (6/30, Pompei, 455K) reports that according to the New York Times, the President “will also ask Congress to give Homeland Security Secretary Jeh Johnson authorization to expedite the screening and deportation of migrant youths not from Mexico.”

The AP (6/30, Sherman) reports that according to a White House official, details “of the emergency appropriation, including the exact amount and how it will be spent, will come after lawmakers return from their holiday recess on July 7.” The President will also ask that “stiffer penalties be applied to those who smuggle children across the border, the official said.”

The Wall Street Journal (6/30, Meckler, Subscription Publication, 5.51M) reports that the move represents a major escalation in the Administration response to the increase in migrants coming across the Southern border.

The Christian Science Monitor (6/30, Sappenfield, 566K) reported that the request “is an acknowledgment that coyotes and cartels trafficking undocumented immigrants across the US border are exploiting several US vulnerabilities simultaneously, creating a humanitarian crisis.”

Jim Darling, Mayor of McAllen, Texas, said on ABC’s This Week (6/29, Stephanopoulos, 2.73M), “Hopefully, the funding will work. We don’t think it’s a crisis. We’re doing our best effort to make sure it doesn’t turn into one.” Darling briefly noted that “unaccompanied children that don’t come to our bus station are handled by HHS.”

House Homeland Security Committee Chairman Michael McCaul said on CBS’ Face The Nation (6/29, Schieffer, 2.64M), “It is a crisis like nothing I’ve ever seen before. We have refugee camps now in my home state of Texas. It is a very serious concern. I don’t think the flow will stop until a message of deterrence is sent back to Central America. The drug traffickers are making \$5,000 a child, advertising that if you get into the United States you can stay. And to some extent that is accurate.” McCaul added, “I think we have to be humanitarian and let them know if they come they cannot stay otherwise we will never stop the flow.”

CNN “Crossfire” host Stephanie Cutter said on CNN’s State of the Union (6/29, Crowley), “I do think that this crisis puts tremendous pressure on House Speaker John Boehner to move something [on immigration reform]. He hasn’t wanted to do that before the elections. I think, the more kids we see coming across the border, he’s going to have to do that.”

Border Patrol Agents Processing Immigrants Remotely Via Video Camera. The AP (6/30, Spagat) reports that in response to "the dramatic increase of Central Americans crossing the border in Texas that has flood immigration facilities," Border Patrol agents have been conducting interviews via video camera from San Diego and other stations on the US-Mexico border. The remote processing "highlights a predicament that has bedeviled the Border Patrol as it struggles to keep up with constantly-shifting migration patterns: Many agents wind up stationed in places where crossing activity is slowest."

Immigrant Teens Describe Journey Across US Border Without Parents. The Miami Herald (6/30, Chardy, 822K) highlights the stories of teens who made the trip across the US-Mexico border without their parents, noting that interviews "with half a dozen unaccompanied minors who reached the United States show that escaping gang violence is a prime factor in the exodus."

Border Situation Comes Amid Trade Dispute With El Salvador. Politico (6/30, Rogers, 637K) reported that as the White House "scrambles" to deal with the situation on the border, "a \$277 million economic aid package for El Salvador is being delayed by the administration because of a trade dispute over a modest seed program to help small farmers grow staples like maize and beans." The dispute concerns "how the ministry of agriculture procures the seeds for distribution. Government contracts for seed purchases are estimated at about \$30 million a year, and the question is whether units of US corporations like Monsanto Co. are being cut out in the effort to buy more seed from smaller, Salvadoran producers." Critics argue that the ministry is violating "the principles of transparency and nondiscrimination under the Dominican Republic-Central America Free Trade Agreement, or CAFTA-DR, approved in 2005." Democrats are circulating a draft letter asking Secretary of State Kerry to intercede and free the funds.

Gallup Poll: 43% Of Americans Wants Immigration To Be Reduced. The Daily Caller (6/29, Munro, 408K) reported that according to a new Gallup poll, despite the President's claim on Good Morning America that "The Majority of the American people want to see immigration reform done," only "one-in-five Americans want to see additional immigration, while two-in-five Americans want less immigration." According to the poll, "23 percent of independents want immigration increased, while 43 percent want it to be reduced."

OBAMA CALLS BOEHNER LAWSUIT "A STUNT." President Obama, in a taped interview with George Stephanopoulos broadcast on ABC's This Week (6/29, 2.73M), said of House Speaker Boehner's threatened legal action against him, "The suit is a stunt. But what I told Speaker Boehner directly is, if you're really concerned about me taking too many executive actions, why don't you try getting something done through Congress?"

House Judiciary Chairman Bob Goodlatte rebutted the President on Fox News Sunday (6/29, Wallace). Asked if the lawsuit was a stunt, Goodlatte said, "Absolutely not. ... This is all about the United States Constitution. ... It's very important." Other Republicans also defended the lawsuit. Rep. Sean Duffy said on NBC's Meet The Press (6/29, Gregory, 3.08M), "The President is taking historic action that has never been done before, where he is waving and suspending laws and then implementing regulation that undermines the control of Congress." Also on NBC's Meet the Press (6/29, Gregory, 3.08M), Republican National Committee Chairman Reince Priebus said, "[Obama] doesn't respect the Constitution."

However, on Fox News Sunday (6/29, Wallace), Rep. Xavier Becerra said, "The President has the authority as the executive to implement the laws." And on NBC's Meet The Press (6/29, Gregory, 3.08M), former White House counsel Kathryn Ruemmler said, "To say it's frivolous, I think is an understatement. ... [Boehner hasn't] actually said what he intends to sue the President over. I think that's pretty telling. To come out with guns blazing and say, 'I'm going to sue you, but I haven't figured out why yet,' is a little bit odd, to say the least."

On Fox News Sunday (6/29, Wallace), when asked if the President has "gone beyond some of his predecessors in his exercise of executive power," Brit Hume said, "I think unmistakably so. Presidents do tend to stretch these things and go as far as they can, but when you get shut down 9-0 by the Supreme Court, it ought to be a pretty clear warning that you're out of bounds." But while Bill Kristol on ABC's This Week (6/29, Stephanopoulos, 2.73M) said executive overreach is a concern, he said, "I'm not crazy about the particular move that the Speaker is taking."

GOP Appeal To Courts Is A Reversal In Tactics. The Washington Times (6/30, Dinan, 455K) writes that Boehner's proposed lawsuit "marks a stunning break for Republicans, who for years have tried to keep the courts out of the big questions of the day. Just a decade after House Republicans tried to strip the courts of their ability to hear key cases on such matters as the Pledge of Allegiance, the GOP is now pleading with federal judges to get more involved – chiefly to rein in Mr. Obama."

Editorial Wrap-Up:

NEW YORK TIMES. "Gov. Christie's Money Trail." In an editorial, the New York Times (6/30, Subscription Publication, 9.65M) argues that while New Jersey Gov. Chris Christie "talks plenty tough," he "has yet to show sufficient interest in managing the public's money in ways that benefit the public." Questioning whether Christie can "make hard decisions that help ordinary people, even when it might hurt him politically," the Times says his record "on this score has been dismal," noting that he has repeatedly "used dubious strategies to avoid raising taxes (sparing him from inevitable criticism by party conservatives), even when increasing taxes would be the right thing to do."

"New Rules To Address Campus Rape." The New York Times (6/30, Subscription Publication, 9.65M) editorializes on the steps the Obama Administration has taken to address sexual assault in universities, especially draft regulations published by the Department of Education regarding standards of safety. Although some attorneys and libertarians disapprove of the guidelines, saying that college administrators are often ill-equipped to fairly handle such cases, the Times argues that college administrators "can't avoid involvement," and that the draft regulations "could bring more order to the process without unduly burdening administrators." The editorial acknowledges some of the possible risks inherent in the college discipline process, but concludes "The challenge for universities will be achieving the right balance," assuring equal treatment of both the accused and the accuser.

"Pushback On Home Care." In an editorial, the New York Times (6/30, Subscription Publication, 9.65M) discusses a new Federal regulation to ensure that home-care workers are fairly compensated as well as challenges to the rule in the form of a lawsuit by industry groups. The editorial argues that underpaying home-care workers has led to significant problems, and that the country "needs a uniformly high-quality, broadly accessible home care system. Fair pay for home care workers is an indispensable step in that direction."

"House Hypocrisy On Insider Trading." An editorial in the New York Times (6/30, Subscription Publication, 9.65M) criticizes the House for attempting to prevent the SEC from enforcing that STOCK Act in the case of a "staff member suspected of leaking to a lobbyist nonpublic information he heard last year about pending Medicare rate increases." The Times argues that the case is "clearly...worth pursuing if the law...is to be a credible tool against corruption on Capitol Hill and in numerous executive agencies also covered." The Times calls on a Federal judge in New York, who will hear the case this week, to "stand by the commission, which has a duty to subpoena records in this case."

WASHINGTON POST. "Ebola, Unchecked." The Washington Post (6/30, 4.22M) argues in an editorial that a report last week from Doctors Without Borders which said that "West Africa's current Ebola outbreak is 'out of control'" should "shock the governments of Guinea, Sierra Leone and Liberia into action." The Post says West Africa was "unprepared" for the outbreak and adds that with the "real risk that Ebola will spread," other West African nations should "heed the lesson of Guinea, Sierra Leone and Liberia."

"A Mudslide – And Some Tough Choices." An editorial in the Washington Post (6/30, 4.22M) notes that a mudslide in Prince George's County, Maryland that left six homes uninhabitable and 22 others isolated has left county officials "grappling with the results — a moral, legal, budgetary and political dilemma for County Executive Rushem L. Baker III (D)." According to county officials, the collapse of a slope, which is the private property of a homeowner "caused the road to buckle," which means the county could "sue the homeowners for the price of fixing the whole mess." However, Baker "doesn't want to look like an ogre," and "reinforcing the slope and rebuilding the road could cost well over \$20 million, a large sum to save a community of 28 homes." The Post notes that the county must "find a solution that provides some relief to the homeowners while protecting the county from a financial hit that could establish a risky precedent."

"Hand Off Hong Kong." In an editorial, the Washington Post (6/30, 4.22M) says that it seems China "plans to stick to the letter, but not the spirit" of its promise of "one country, two systems" in Hong Kong. In an unofficial poll asking Hong Kong residents to "choose among three electoral reforms for selection of Hong Kong's top leader," China "will impose a pro-Beijing committee to nominate candidates for general election, disqualifying anyone who doesn't 'love the country and love Hong Kong.'" The Post also cites "disturbing signs that China may be rethinking its hands-off policy," including a white paper which "asserted its 'comprehensive jurisdiction' over Hong Kong." The Post calls on the US to make clear that "being pro-China means advocating for Hong Kong's genuine democracy, including allowing a real choice in the nomination and election of chief executive candidates."

WALL STREET JOURNAL. "The Carbon Regulation Bubble." In an editorial, the Wall Street Journal (6/30, Subscription Publication, 5.51M) criticizes a climate change report from the Risky Business Project, saying that US emissions are down to 1994 levels due largely to the rise of the natural gas sector, and that the recommendations of climate change activists would impede the US economy to the point that any effort to mitigate the effects would be hard to fund.

"The West's Putin Test." The Wall Street Journal (6/30, Subscription Publication, 5.51M) editorializes that now that Ukrainian President Petro Poroshenko has signed an economic association treaty with the European Union, it falls to the West to stand up for democratic values by supporting him through tighter sanctions against Russia and military support to Kiev.

"Obama Hedges On Land Mines." The Wall Street Journal (6/30, Subscription Publication, 5.51M) says in an editorial that while the Obama Administration has yet to fully ban land mine use, it appears to be moving in that direction, which would be a mistake. While the Journal says land mines are often misused, they are essential to the defense of South Korea.

Washington Schedule:**TODAY'S EVENTS IN WASHINGTON.**

White House:

PRESIDENT OBAMA — Receives the Presidential Daily Briefing; holds a bilateral meeting with President Michelle Bachelet of Chile, Oval Office; makes a personnel announcement, The Department of Veterans Affairs; hosts a reception to observe LGBT Pride Month, East Room.

VICE PRESIDENT BIDEN — Receives the Presidential Daily Briefing; holds a bilateral meeting with President Michelle Bachelet of Chile, Oval Office.

US Senate: 12 p.m. — The Senate convenes for a pro forma session.

1 p.m. AGING – FIELD HEARING — "Sandwich Generation Squeeze: Confronting the Middle Class Struggle to Raise Kids, Care for Aging Parents, and Scrape Together Enough for Retirement in Today's Economy." Location: Allegheny County Courthouse Gold Room, Pittsburgh, PA.

US House: No Scheduled Events.

Other: BROOKINGS – PRESIDENT OF CHILE — 4 p.m. – 5 p.m. Foreign Policy's Latin America Initiative at Brookings will host President Michelle Bachelet of Chile for a discussion on strengthening democracy and stability, focused on Chile's present reform efforts. Brookings Acting Vice President and Director of Foreign Policy Ted Piccone will provide introductory remarks, and Director of the Latin America Initiative Harold Trinkunas will moderate the discussion. Location: Falk Auditorium, 1775 Massachusetts Ave. NW.

HERITAGE – UNITED NATIONS — 11 a.m. – 12:30 p.m. "Lessons on How the U.S. Can Reform the U.N." Featuring Christopher Bancroft Burnham, Under Secretary General of the United Nations for Management, June 2005 to November 2006; Kim R. Holmes, Assistant Secretary for International Organizations, U.S. Department of

State November 2002 to June 2005; Ambassador Joseph M. Torsella, U.S. Representative to the United Nations for Management and Reform April 2011 to January 2014. Location: Heritage Foundation, 214 Massachusetts Ave. NE.

ACS – SUPREME COURT — 1 p.m. The American Constitution Society for Law and Policy (ACS) will host a press conference call featuring constitutional law scholars and a former U.S. Solicitor General to examine the final opinions of the U.S. Supreme Court this term, expected to be *Sebelius v. Hobby Lobby* and *Harris v. Quinn*. With Walter Dellinger, partner, O'Melveny & Myers LLP; former acting U.S. Solicitor General; Caroline Mala Corbin, professor of law, University of Miami School of Law; Charlotte Garden, assistant professor of law, Seattle University School of Law.

PENTAGON BRIEFING — 1:15 p.m. U.S. European Command Commander, North Atlantic Treaty Organization Supreme Allied Commander Gen. Philip M. Breedlove briefs the media on "Update on European Command."

The Land and Water Conservation Fund: 2015 Budget Request

In 1965, Congress created the Land and Water Conservation Fund to embody its bipartisan commitment to safeguard natural areas, water resources and our cultural heritage, and to provide recreation opportunities to all Americans. LWCF is helping to create America's outdoor spaces—public and private, large and small, urban and rural—as envisioned by the American people.

The Land and Water Conservation Fund has provided funding to secure access for recreational opportunities—from hunting and fishing, to canoeing and bird watching throughout the country. Over its 50 year history, the Fund has protected conservation and recreation land in every state and supported tens of thousands of state and local projects. Americans care deeply about our outdoor heritage, want to enjoy and protect it, and are willing to take collective responsibility to protect it for their children and grandchildren.

The Land and Water Conservation Fund plays an important economic role for local communities. Recreation activities in national parks, wildlife refuges and other lands and waters managed by the Department of the Interior contributed approximately \$45 billion and 372,000 jobs to the U.S. economy in 2012.¹ Nationally, outdoor recreation activities contribute \$646 billion to the economy annually and support 6.1 million jobs.² Moreover, the Land and Water Conservation Fund is a sound investment: for every \$1.00 invested in Federal land acquisition through LWCF, there is a return of \$4.00 – a return on investment of four to one.³

Conserving landscapes and meeting the present-day needs of local communities requires collaboration among all stakeholders, including private landowners, conservation and recreation groups, and local, State, tribal, and Federal governments. The Administration's LWCF request supports broad collaboration around locally driven priorities and more efficient and coordinated ways of investing in, restoring, and managing the country's natural and cultural resources.

In 2015, the total proposed LWCF request is \$900 million, of which \$672 million supports Department of the Interior programs and \$228 million supports Forest Service programs. The budget requests \$350 million in discretionary funding and proposes \$550 million in permanent funding as part of a multi-year strategy leading to full permanent funding for LWCF in 2016.

Permanent Funding for LWCF

LWCF enjoys widespread popularity, and there are more willing sellers than available LWCF funding. Yet the program is constrained by uncertainty about annual current appropriations which prevents the

¹ Department of the Interior, *The Department of the Interior's Economic Contributions*, 2012

² Outdoor Industry Association, *The Outdoor Recreation Economy*, 2012

³ The Trust for Public Land, *Return on the Investment from the Land & Water Conservation Fund*, 2010

agencies—and local and State partners—from engaging in the multi-year planning that large-scale conservation and effective collaboration with local communities requires. Annual planning driven by the budget process can favor funding individual projects which may not be the most strategic in terms of advancing broader conservation objectives.

These challenges also impact the partners who work with agencies to protect critically important habitat and recreation areas that are hampered by the lack of certainty and irregularity of annually appropriated funding. The chronic uncertainty and underfunding of LWCF has made it increasingly challenging for Federal, State and local managers to use this tool to address the development threats facing the Nation’s most important open spaces, pristine habitats, and cultural sites—the lands and waters that support vibrant conservation economies, provide communities with recreation opportunities, and that preserve our history.

The Administration proposes to address these challenges by pursuing full and permanent funding for LWCF programs. Permanent funding will increase financial certainty needed to build and enhance local and community conservation partnerships and optimize valuable investments by leveraging other Federal and non-Federal funds. Permanent appropriations will support the efficiencies demonstrated by the LWCF programs and facilitate a more predictable, transparent and inclusive process. Permanent funding will also finally achieve the original intent of the LWCF Act: to dedicate a meaningful portion, \$900 million, of the royalties private companies pay to access the Nation’s offshore oil and gas reserves to preserving the Nation’s lands and waters for the benefit of all Americans, now and in the future.

2015 LWCF President’s Budget Request	(\$m)		
	Discretionary	Permanent	Total
LWCF State and Local Assistance Grants	48.1	52.0	100.1
Cooperative Endangered Species Conservation Grants	50.0	50.0	100.0
Forest Legacy Grants	53.0	47.0	100.0
Urban Parks & Recreation Grants	0.0	25.0	25.0
Grants to States Total	151.1	174.0	325.1
NPS Land Acquisition	55.9	115.1	171.0
BLM Land Acquisition	25.0	64.4	89.4
FWS Land Acquisition	55.0	113.8	168.8
FS Land Acquisition	51.0	76.7	127.7
DOI Office of Valuation Services	12.0	6.0	18.0
Federal Land Acquisition Total	198.9	376.0	574.9
<i>DOI subtotal</i>	<i>246.0</i>	<i>426.3</i>	<i>672.3</i>
<i>USDA subtotal</i>	<i>104.0</i>	<i>123.7</i>	<i>227.7</i>
Total LWCF Program Funding	350.0	550.0	900.0

LWCF Grants to States

LWCF funds grant programs run by the Forest Service, the National Park Service, and the Fish & Wildlife Service. A total of \$325 million would fund grants to States for conservation and recreation.

The **LWCF State Grants** program provides matching grants to States and local governments for the acquisition and development of public outdoor recreation areas and facilities. The program helps to

create and maintain a nationwide legacy of high quality recreation areas and facilities and to stimulate non-federal investments in the protection and maintenance of recreation resources across the country.

The **Cooperative Endangered Species Conservation Fund (CESCF)** grants provide funds to States to work with private landowners, conservation organizations, and other partners to protect and conserve the habitat of threatened and endangered species.

The **Urban Park Recreation and Recovery Program (UPARR)** provides matching grants to select physically and economically distressed urban communities to revitalize and improve recreation opportunities. UPARR provides grants directly to local governments to rehabilitate existing indoor and outdoor recreation facilities; demonstrate innovative ways to enhance park and recreation opportunities; and develop local Recovery Action Program Plans.

The **Forest Legacy Program (FLP)** supports State efforts to encourage the protection of privately owned forest lands. FLP is an entirely voluntary program administered through the Forest Service in cooperation with State partners. FLP also encourages partnerships with local governments and land trusts, recognizing the important contributions landowners, communities, and private organizations make to forest conservation efforts.

Federal Land Conservation, Recreation and Access

A total of \$575 million of the Administration's LWCF request will support conservation, access and recreational opportunities on federal land. The Department of the Interior and Department of Agriculture work in cooperation with local communities, rely on willing sellers, and maximize opportunities for easement acquisitions. LWCF funds will support simpler, more efficient land management; create access for hunters and anglers and other recreation opportunities; create long-term cost savings; address urgent threats to some of America's most special places; and support State and local conservation priorities.

Land acquisition funds are used to secure access for the American public to their Federal lands. Concurrent with the America's Great Outdoors Initiative, these funds will invest in acquisitions to better meet public recreation access needs by working with willing landowners to secure rights-of-way, easements or fee simple lands that provide public access or consolidate Federal ownership so that public has intact spaces to hike, hunt, and fish. The Forest Service will use up to \$4 million of FY 2015 LWCF funds (\$2 million in current, \$2 million in permanent funding) to acquire parcels that provide access to national forest lands where access is not currently available, chronically difficult to access or impeded. Likewise, the Interior bureaus request \$2 million in current and an additional \$13 million in permanent funding for projects to support public access for recreation, including hunter and angler access.

The Administration's highly strategic approach to using LWCF land acquisition funds includes the Collaborative LWCF initiative. This interagency program brings DOI and USDA together with local stakeholders to identify large natural areas where LWCF funds can achieve the most important shared conservation goals in the highest priority landscapes. Conserving large scale natural areas provides multiple resource and economic benefits to the public, including clean drinking water, recreational opportunities, protected habitat for at-risk and game species and jobs generated on and off these lands.

The Collaborative LWCF program seeks to fund the best opportunities to leverage other Federal resources, along with those of non-Federal partners, to support conservation goals driven by the best science and a shared community vision.

The Secretaries of the Interior and Agriculture followed a rigorous merit-based based evaluation process to select landscapes for investment. After evaluating and prioritizing multiple ecosystems, they selected eight landscapes for 2015 funding:

- California Southwest Desert (CA)
- National Trails System (nationwide)
- Florida-Georgia Longleaf Pine Initiative (FL, GA)
- South Carolina Longleaf Pine (SC)
- Upper Rio Grande (NM, CO)
- Grasslands/Prairie Potholes (ND, SD)
- High Divide (ID, MT)
- Greater Yellowstone (WY)

Benefits of Proposed FY2015 LWCF Investments: Highlights

Reduced Costs for Land Management

LWCF funds will be used to acquire parcels that make it easier and less costly to manage existing public lands. Instead of raising operating costs, the acquisition of inholdings can reduce maintenance and manpower costs by reducing boundary conflicts, simplifying resource management activities, and easing access to and through public lands for agency employees and the public.

*Conservation efforts have been underway to consolidate "checkerboard lands" a mixture of public and private ownership. For example, consolidation of parcels in California's **Santa Rosa and San Jacinto Mountains National Monument** improves the efficiency of BLM management activities, resulting in overall long-term savings.*

Access for Hunting and Fishing and Recreation

Participants in the America's Great Outdoors listening sessions made it clear that access to our nation's lands for all kinds of recreation – in particular hunting and fishing – is a national priority. This LWCF request will fund strategic acquisitions that improve access to public lands for sportsmen and women.

*LWCF will safeguard access to a heavily used trail along New York's **Upper Delaware Scenic and Recreational River** which received over 255,000 recreational visitors in 2012. The project will maintain a key river access and recreational hiking opportunities for the public.*

Economic Benefits for Communities

Investing in healthy ecosystems benefits the Federal government, local communities and taxpayers. Timely acquisition of important natural areas today can help avoid much higher costs to taxpayers in

future years by protecting water supplies, important species habitat, recreational and cultural sites, and other natural resources with economic value to the public.

*In 2012, wildfires burned more than 8 million acres in the U.S., resulting in \$1.9 billion in total economic losses.⁴ Expanding a manageable fire buffer along the northwestern edge of Georgia's **Okefenokee Swamp** by 3,900 acres will protect private lands, provide an economic benefit to the community, and streamline future fire-fighting activities.*

Protection from Urgent Threats

LWCF funds are used to acquire lands that are in imminent danger from industrial or residential development. Civil War and Revolutionary War battlefields, for example, are the hallowed ground of our nation's history; preserving these lands as parks for the American public prevents irreparable loss.

*NPS acquisition of nearly 47 acres of undeveloped forested land in the heart of an important civil war battle site at Virginia's **Fredericksburg and Spotsylvania County Battlefields Memorial National Military Park** will protect the property from imminent development: the tract has recently been acquired by a developer. Development or subdivision of this property would irrevocably scar one of the Park's most important battlefield landscapes. The Civil War Trust, an active partner with NPS in Civil War areas, is working with the developer to acquire the lands inside the federal boundary to ensure their preservation.*

Supporting Local Priorities

Federal acquisitions projects are planned collaboratively with local stakeholders, and often depend on the significant support of State or local government, or of locally-based nonprofit conservation partners. These partners sometimes act as intermediary landowners, holding land temporarily to protect it from development until the Federal government can secure the funds to assume ownership.

*As the result of a partnership among the Department of the Navy, the Mojave Desert Land Trust (MDLT) and the NPS, critical wildlife habitat in California's **Joshua Tree National Park** has been protected since 2010. The MDLT has been holding lands located within or adjacent to a designated wilderness area. Federal acquisition of these tracts from MDLT will ensure the preservation of this area located within a day's drive from Los Angeles and San Diego, as well as providing funds to sustain this strong local partnership.*

⁴ Headwaters Economics, *Wildfire and Homes*, http://headwaterseconomics.org/wphw/wp-content/uploads/wildfire_homes_solutions_presentation.pdf, 2014

Collaborative Landscape Conservation Highlights

California Southwest Desert— Funding for the *California Southwest Desert Landscape* will support community and conservation goals rooted in years of partnership between a wide variety of government agencies and NGOs, and informed by multiple conservation and recreation plans for the area. Diverse and increasing demands are being put on this landscape. The immediate and escalating nature of these demands creates an urgent need to deliberately conserve resources in the near term. Through a collaborative approach and continued Federal investment, conservation partners can work to ensure that development and growth in the region are balanced with conservation and community goals. This Collaborative LWCF request will directly support work being done to achieve habitat protection and recreational opportunities as a direct result of renewable energy development.

Prior Federal investments in this area have led to important resource protection successes, a reflection of the strong partnerships in the area that continue to leverage Federal dollars. The 2015 President's Budget proposes \$15 million in current and \$19 in permanent funding for California Southwest Desert landscape projects.

National Trails – LWCF investment in the *National Trails Collaborative Landscape* will benefit the country's world-class system of 30 National Scenic and Historic Trails totaling over 54,000 miles in length, traversing 49 States and every ecological biome in the Nation, and touching wilderness, rural landscapes, and historic and cultural corridors. These long-distance trails, stretching for hundreds or thousands of miles each, connect with 70 national wildlife refuges, 80 national parks, 90 national forests, and 100 major metropolitan areas. They protect crucial conservation areas and wildlife migration corridors and provide education, recreation, and fitness opportunities for all ages. The request will support acquisitions to improve safety, access, connectivity, and integrity for 16 trails in 18 States.

The collaborative nature of the national scenic and historic trails means that a financial investment by any of the partners has the potential to be greatly leveraged by contributions from other partners, including State agencies, local governments, and land trusts. Federal investment in these Trails stimulates citizen engagement in public resource stewardship and volunteerism, connects citizens with the Nation's natural and cultural heritage, and strengthens communities across the land. The 2015 President's Budget proposes \$22 million for National Trail landscapes in current and \$34 million in permanent funding.

Florida-Georgia Longleaf Initiative— LWCF investment in the *Florida-Georgia Longleaf Initiative* landscape is crucial to the ecological well being and recovery of the diminishing longleaf pine ecosystem in the South. Longleaf pines, which once covered up to 98 million acres of the Southeast, have been reduced to about 3 million acres, much of it in poor condition.

The 2015 budget proposes a total of \$15 million in current and \$23 million in permanent funding for the Florida-Georgia Longleaf Initiative. Lands targeted for acquisition represent the highest priority to protect and restore critical habitat for several listed species, and protect and restore the headwaters of the free-flowing Suwannee and St. Mary's Rivers – the largest intact watershed in the East and critical watersheds that recharge the Floridan Aquifer, which provides drinking water for much of north Florida. Projects will also enhance public access for recreation, protect private lands from wildfire, and support

the operations of Tyndall Air Force Base. The project supports local economies by protecting highly prized natural landscapes for public outdoor recreation and tourism. The working forest component further enhances economic vitality of local communities by providing forest products that support local infrastructure.

South Carolina Longleaf Partnership – LWCF investment in the *South Carolina Longleaf Partnership* landscape will support recovery efforts in the heart of the longleaf pine ecosystem range and support local efforts to preserve the Gullah Geechee cultural corridor. The 2015 budget proposes a total of \$2 million in current and \$15 million in permanent funding for the South Carolina Longleaf Partnership. The funding will support projects local communities identified as priorities through America's Great Outdoors—including the Santee Basin in South Carolina — in addition to longleaf pine forest restoration in a landscape level package on ecologically significant habitats within the longleaf pine ecosystem. It will also protect significant cultural lands including the Gullah Geechee Corridor, an area intrinsically linked to the cultural heritage of African Americans in the Southeast. Important cultural heritage sites in the Corridor are being lost at an alarming rate, and protecting identified tracts will ensure some of these cultural treasures remain intact.

Collaboration among Federal, State and local governments and private landowners to increase connectivity and share management capabilities is the key to the future of longleaf pine. Thousands of acres of privately protected lands are interwoven with public lands across this landscape. Locally, Charleston County initiated a Greenbelt Program, funded by a sales tax approved by local voters, to protect public lands and greenspace. The Greenbelt Program partners closely with Federal agencies on conservation projects, recognizing that Federal land ownership complements Greenbelt goals and provides much-needed access to recreational opportunities for local residents.

Upper Rio Grande Collaborative Landscape – Investment in the *Upper Rio Grande* landscape will support conservation in the headwaters of the Rio Grande River in Colorado and New Mexico, a land of soaring peaks and spectacular river gorges within a day's drive of five million people. The Upper Rio Grande collaborative landscape partnership builds on a multi-year effort among Federal agency personnel from all levels, local private landowners and conservation groups. Over the last 30 years, grassroots, community-based efforts on both sides of the state line have made incredible strides to permanently protect critical cultural, wildlife, ecological, and recreational lands under a variety of Federal and state authorities. At the same time, private, partnership-based efforts have made significant investments to protect the working landscapes across the Upper Rio Grande through conservation easements and increased public awareness of the importance of landscape-scale conservation.

The 2015 budget proposes a total of \$19 million in permanent funding for the Upper Rio Grande landscape. Proposed acquisitions will create an un-fragmented core of protected lands on more than 1.3 million acres, enabling more efficient land management and conservation of resources across the landscape. Conservation plans include 5,000 acres of wetlands restoration and historic wetlands protection. This restoration has the potential to support over 160 species of birds, including 19 waterfowl and 22 shorebird species and Colorado's largest population of breeding Western snowy plovers, and remarkable macroinvertebrate diversity, including an undescribed species of fairy shrimp. Plans for the landscape also include protection of unique cultural and historic sites. To date, approximately 650 archeological sites have been recorded within the 22,000 acres (8.9%) of the Rio

Grande del Norte National Monument that have been comprehensively inventoried, and local experts believe that thousands of additional archaeological and historical resources remain undocumented.

Grasslands and Prairie Potholes Collaborative Landscape – Investment in the *Grasslands and Prairie Potholes* landscape will support conservation of a severely threatened habitat that supports over 50% of the mid-continent breeding duck population. The Grasslands and Prairie Potholes region is a tapestry of tallgrass, mixed-grass, and short-grass prairie interspersed with glaciated prairie wetlands, streams, and river corridors. From farm-dominated regions in Minnesota and Iowa to the wide-open ranchlands of the west, this landscape, often called “America’s duck factory”, also provides critical habitat for multiple threatened and endangered (T&E) species, including black-footed ferret, pallid sturgeon, prairie-fringed orchid, and piping plover, and is home to grassland-dependent birds, including marbled godwits, burrowing owls, and greater sage grouse. It is also a landscape threatened by unprecedented conversion rates of native sod and prairie wetlands to row-crops.

Local conservation districts, chambers of commerce and coalitions of ranchers and conservationists have all supported conservation efforts in the region. Cooperating partners share a common vision for this landscape which focuses on balancing agriculture, livestock ranching, and energy development with wetland and grassland conservation projects. Restored and conserved habitats will improve wildlife connectivity between tribal lands, National Parks, National Wildlife Refuges, National Forests and National Grasslands; prevent habitat fragmentation/isolation; enhance water quality and flood abatement; and significantly increase recreational opportunities for the American public consistent with America's Great Outdoors goals.

The 2015 budget proposes a total of \$15 million in permanent funding for the Grasslands and Prairie Potholes landscape. LWCF funding will be directed toward priority land acquisitions in identified “focus areas” to benefit the full suite of wetland- and grassland-dependent wildlife. Population goals have been established for many species found within the region. In the case of water fowl, quantifiable population targets have been linked into habitats needed to reach desired population objectives. Both acres protected and acres restored will be tracked by cooperating partners.

High Divide Collaborative Landscape – Investment in the *High Divide* landscape will support a crucial wildlife lifeline along the spine of the continent in Idaho and Montana that links Yellowstone National Park, to Idaho’s Frank Church Wilderness. This landscape collaborative includes 11 units of four land management agencies; NRCS; two state wildlife agencies; seven conservation groups, community groups, and science organizations; and ranchland groups, land owners, and private foundations. The collaborative brings mature local partnerships together to achieve regional landscape conservation and community goals.

High Divide counties rely on outdoor recreation opportunities for local residents and more than 3.8 million annual visitors. Recreation tourism brings in \$320.1 million annually to local county economies, and includes popular activities such as wildlife viewing hunting, fishing, and river floats. The 2015 budget proposes a total of \$16 million in permanent funding for the High Divide landscape. LWCF investments will enhance public access to dispersed recreation lands and waterways, and will protect the Nez Perce, Continental Divide, and Lewis and Clark National Trails.

LWCF investments in the High Divide will protect corridor bottleneck lands to allow grizzly bear, lynx, wolverine, and big game animals to move freely through the High Divide; ensure that habitats for endangered sockeye salmon, threatened Chinook, steelhead, and bull trout, and candidate arctic grayling are ecologically functional; and protect core sage grouse habitats to support the broader NRCS Sage Grouse Initiative. The plan includes keeping strategic lands in private ownership, supporting the working ranchlands that are central to the region's economy and culture.

Greater Yellowstone Ecosystem – Investment in the *Greater Yellowstone Ecosystem* landscape will protect key lands within one of the last remaining large, nearly intact ecosystems in the northern temperate zones of the earth. The area's outstanding landscapes, famous western rivers and lakes, vast high deserts, and high mountain valleys draw millions of tourists annually and support the region's outdoor tourism economy. LWCF investment of \$45 million in permanent funding will provide protection for highly desirable parcels from the threat of development. Permanent protection will ensure public access and conservation of natural resources.

Fwd: DOI Emergency Management Daily Situation Report for July 3, 2014

Broun, Laurence <laurence_broun@ios.doi.gov>

Thu, Jul 3, 2014 at 8:24 AM

To: Secretary Jewell (b) (6) <[REDACTED]@ios.doi.gov>, Michael Connor <michael_connor@ios.doi.gov>

Cc: DOI_EMDCC <doi_emdcc@ios.doi.gov>, Nikolao Pula <nikolao_pula@ios.doi.gov>

Secretary,

As of 5 a.m. EDT, Hurricane Arthur was located 340 miles southwest of Cape Hatteras, NC. Maximum sustained winds are 75 miles per hour with higher gusts. The storm is moving toward the north at 9 miles per hour and will approach the Outer Banks tonight. NPS reports Cape Lookout National Seashore and all parks in the Outer Banks have been closed and FWS units in the storm's path have been directed to implement their disaster plans. The IOC will participate in a FEMA Video-Teleconference today.

National Wildland Fire Preparedness is at Preparedness Level 2, with 4,122 (+1,401) interagency firefighters deployed, including 800 (+280) DOI personnel. No Critical Fire Weather is forecast for today. In AZ and NM, the San Juan Fire, which spread from the Fort Apache Agency into the Apache-Sitgreaves National Forest, has burned 6,975 acres and is 70% contained; no additional fire growth is expected. In CA, the Butts Fire on state lands in Napa County has forced evacuation of 500 residents; two homes have been destroyed. A Type-1 team with 800 firefighters is assigned. In NV, four fires ranging in size from 800 to 2000 acres are burning on BLM lands; a total of 10 residences and an electric substation are threatened. These fires should be fully contained by Sunday.

As of 5 a.m. EDT, Tropical Depression 08W is located 240 miles south-southeast of Guam and is moving west-northwest at 16 mph. The depression has sustained winds of 35 mph with higher gusts. This system is expected to slowly strengthen over the next several days. The closest point of approach to Guam is expected to be about 148 miles tomorrow. No significant storm impact is expected.

U.S. Department of the Interior Office of Emergency Management Emergency Management Daily Situation Report

As of 8:00 a.m. EDT, Thursday, July 3, 2014

The Department of the Interior Operations Center monitors daily incident activity and selects items of interest to the Department's emergency management community from the National Interagency Fire Center, the Department of Homeland Security, and other sources for this report. Bureau/office Emergency Coordinators are responsible for providing incident reports on items that are of interest to senior leadership and the emergency management community to the DOI Operations Center (IOC). Items may be edited or excerpted for brevity. Some of the items contained in this report may be marked For Official Use Only (FOUO) and dissemination of these items should be limited for security purposes.

Alerts & Warnings

National Terrorism Advisory System (NTAS) – No Current Alerts

Continuity of Operations (COOP) COGCON Level is 4

National Wildland Fire Preparedness Level is 2

Kilauea Volcano: Alert Level is WATCH; Aviation Color Code is ORANGE

Shishaldin Volcano: Alert Level is WATCH; Aviation Color Code is ORANGE

The Interior Operations Center is at Level 4 (Normal Operations)

Hurricane Arthur – Atlantic Ocean

General Situation

Source: Federal Emergency Management Agency and National Hurricane Center – July 3, 2014

HURREVAC Image

As of 5:00 a.m. EDT this morning, the National Hurricane Center (NHC) reports that Hurricane Arthur is located approximately 340 miles southwest of Cape Hatteras, North Carolina (NC).

The storm is moving toward the north at 9 miles per hour and this motion is expected to continue through today. Maximum sustained winds are 75 miles per hour with higher gusts. Hurricane Arthur is expected to increase in forward speed and to turn to the northeast later today.

Federal and State Preparation Activities

The Federal Emergency Management Agency (FEMA) Region IV Regional Response Coordination Center (RRCC) is at Level II Enhanced Watch (Monitoring) and the FEMA National Response Coordination Center (NRCC) will activate to Level II (24/7 operations) at 8:00 a.m. today. A FEMA Incident Management Assistance Team (IMAT) is deploying to NC today and FEMA Liaison Officers (LNOs) are deployed to the NC and South Carolina (SC) State Emergency Operation Centers (EOCs). FEMA has requested that Fort Bragg be designated as an Incident Support Base (ISB). The SC Emergency Operations Center (EOC) is activated to Level IV (Monitoring) and the NC EOC is activated to Level III (Partial Activation).

U.S. Coast Guard (USCG) District 5 reports that USCG Base Elizabeth City, Sector Hampton Roads, Sector NC, the National Strike Force Coordination Center and the Special Mission Training Center have raised their Hurricane Condition status in preparation for the storm's arrival. USCG has implemented restrictions for the ports of Morehead City and Wilmington, NC.

DOI Bureau Reports

National Park Service (NPS)

Cape Lookout National Seashore (NS), NC –The Park began putting its hurricane plan into effect on Wednesday in anticipation of the storm's arrival. Cape Lookout NS was closed to the public yesterday afternoon at 5 p.m., including the visitor centers in Beaufort and on Harkers Island.

Outer Banks Group – The Outer Banks Group National Parks (Cape Hatteras NS, Wright Brothers National Memorial, Fort Raleigh National Historic Site) have all been closed, including the following:

- All NPS campgrounds – Ocracoke, Frisco, Cape Point and Oregon Inlet – have been closed and will remain closed until further notice. The Ocracoke campground reservation system has been temporarily suspended.
- Silver Lake Marina NPS dock.
- Ocracoke, Hatteras Island and Bodie Island Visitor Centers.
- Wright Brothers National Memorial and Fort Raleigh National Historic Site.
- Lifeguard beach operations at Ocracoke, Buxton, and Coquina.
- Cape Hatteras Lighthouse.
- Bodie Island Lighthouse.
- All park beaches have been closed to off-road vehicles until further notice.
- The Buxton and Ocracoke off-road vehicle permit offices.

Follow-up reports on the storm's impacts will appear after the holiday weekend.

National Wildland Fire Updates

Source: National Interagency Fire Center & National Fire and Aviation Management Website – July 03, 2014

There are currently 4,412 interagency firefighters, including 800 DOI personnel, deployed for wildland fire suppression operations nationwide. The National Wildland Fire Preparedness Level is at Level 2.

Arizona Fire Activity

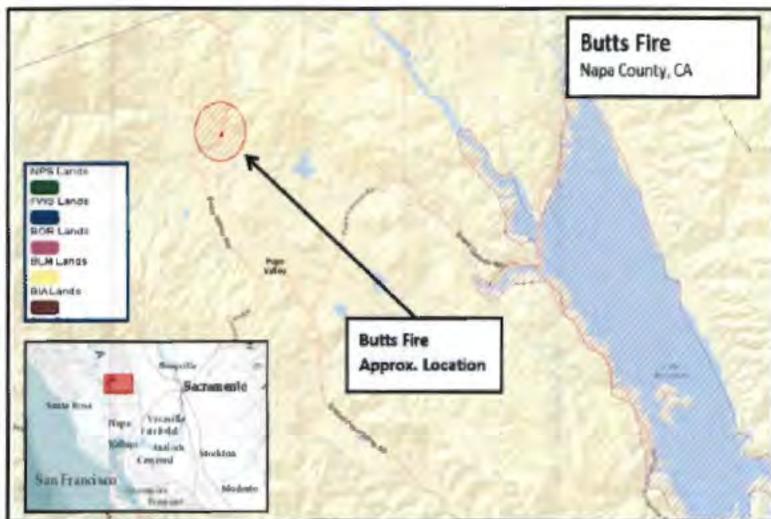

IGEMS Graphic

The **San Juan Fire** started on June 26 within the Fort Apache Reservation and spread into the Apache-Sitgreaves National Forest. The fire has burned 6,975 acres and is 70-percent contained. The response is being managed by a Type-2 Incident Management Team (IMT) with 624 interagency firefighters assigned, including 191 DOI personnel. All evacuation orders should be lifted today and demobilization of resources will begin today. No additional fire growth is anticipated. No containment date has been established for this fire.

California Fire Activity

The **Butts Fire** started on July 1st on state lands in Napa County in close proximity to Bureau of Land Management (BLM) property and Lake Berryessa (Bureau of Reclamation). The fire has burned 3,800 acres and is 30-percent contained. The response is being managed by a Type-1 IMT with 800 interagency firefighters assigned, including one DOI personnel. There are 180 residences threatened at this time and approximately 500 people have been evacuated from their homes. No injuries have been reported but two homes have been destroyed. No containment date has been established for this fire.

IGEMS Graphic

Nevada Fire Activity

The **Coleman Fire** started by lightning on July 1 on BLM lands in Washoe County, NV. The fire has burned 2,000 acres and is 50-percent contained. The response is being managed by a Type-3 IMT with 165 interagency firefighters assigned, including 65 DOI personnel. Currently there are 3 residences threatened due to active fire behavior that includes torching and short range spotting. One firefighter was evacuated due to heat related illness. Containment date is July 6.

IGEMS Graphic

The **Lages Fire** started on July 2 by unknown causes on BLM land in White Pine County, NV about 60 miles north of Ely. The fire has burned 2,000 acres and 15-percent contained. The fire is being managed by a Type-3 IMT with 79 interagency firefighters assigned, including 19 DOI personnel. Five structures are threatened including one residence. The Mount Wheeler electrical substation is threatened as well as critical Sage Grouse habitat. Full containment of this fire is projected for July 6.

IGEMS Graphic

The **Dots Fire** started on July 2 by lightning on BLM lands in Lincoln County, NV about 22 miles east of Caliente. The fire has burned 900 acres and is zero-percent contained. The fire is being managed by a Type-3 IMT with 63 interagency firefighters assigned, including 18 DOI personnel. Three residences are threatened and 10 citizens have been evacuated. There is a possibility that this incident may burn into the Middle Ridge Fire that is located approximately 2.5 miles to the east. The fire is currently moving to the east-northeast and threatening Beaver Dam State Park. Containment is projected for July 6.

IGEMS Graphic

The **Middle Ridge Fire** started on July 1 by unknown cause on BLM lands in Lincoln County, NV about 25 miles east of Caliente. The fire has burned 800 acres and is zero-percent contained. The fire is being managed by a Type-3 IMT with 81 interagency firefighters assigned, including 26 DOI personnel. Three residences are threatened and 10 citizens have been evacuated. Containment is projected for July 6.

Large Fire Map

Volcano Activity

Kilauea Volcano, HI

Source: U. S. Geological Survey (USGS), Hawaii Volcano Observatory (HVO) – July 2, 2014

Alert Level = **WATCH**

Color Code = **ORANGE**

The eruption of Kilauea Volcano continued at the summit and within the East Rift Zone. The summit tiltmeter network recorded an inflationary cycle and the level of the summit lava lake rose slightly. At the Middle East Rift Zone, lava flows continue to erupt from the northeast flank of Pu'u 'Ō'ō cone where a low shield is growing. The Kahauale'a II lava flow is described as "dead". Gas emissions remained elevated during this observation period.

Shishaldin Volcano, AK

Source: U. S. Geological Survey (USGS), Alaska Volcano Observatory (AVO) – July 2, 2014

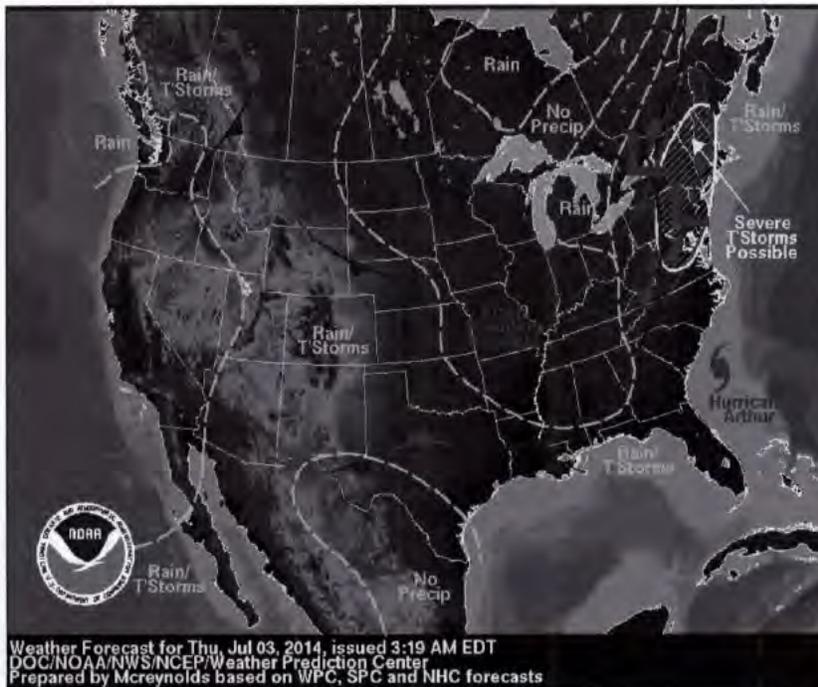

Alert Level = **WATCH**

Color Code = **ORANGE**

Low-level eruptive activity continues. Consistently elevated temperatures at the summit of Shishaldin Volcano were recorded in satellite images over the past 24 hours. No significant seismicity was noted. Web camera images showed no significant plume.

Significant National Weather

Source: National Weather Service – July 3, 2014

West

The Pacific Northwest will see scattered rain and thunderstorms on Thursday. Dry weather will prevail over much of California, Oregon and Nevada. Thunderstorms may develop across Colorado, New Mexico and southeast Arizona.

Midwest

The Northern and Central Plains will see scattered rain and thunderstorms while the Southern Plains will be dry.

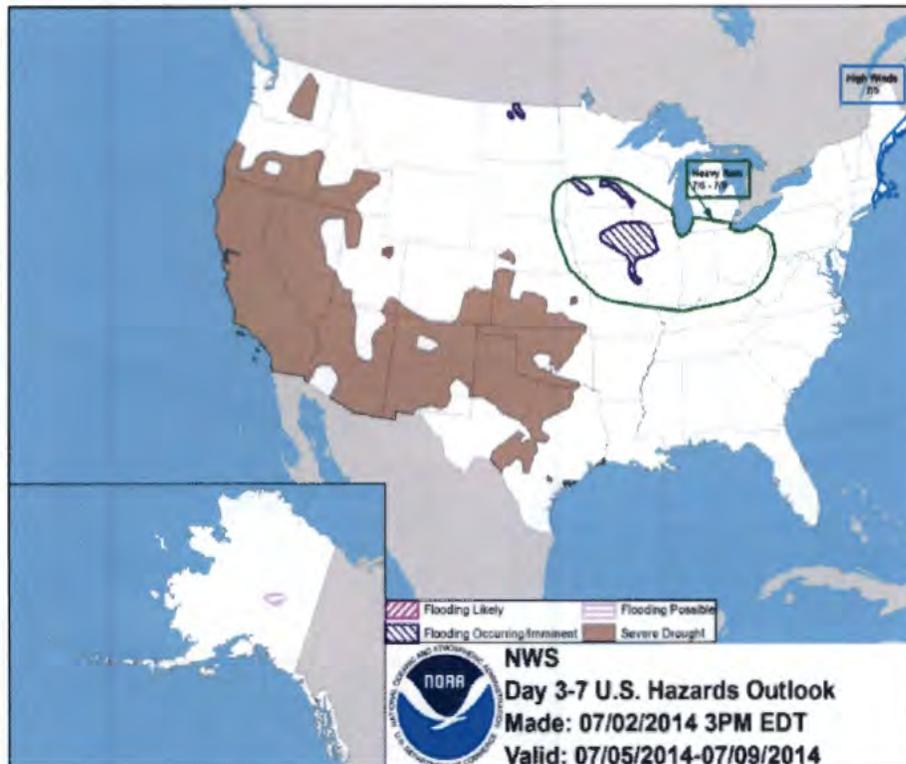

South

Atlantic coastal areas of Florida, Georgia and South Carolina will see rain and scattered thunderstorms from Hurricane Arthur. There will be scattered thunderstorms from northeast Texas across the Gulf Coast and northward into Virginia. Some of these thunderstorms could become severe in the late afternoon or early evening.

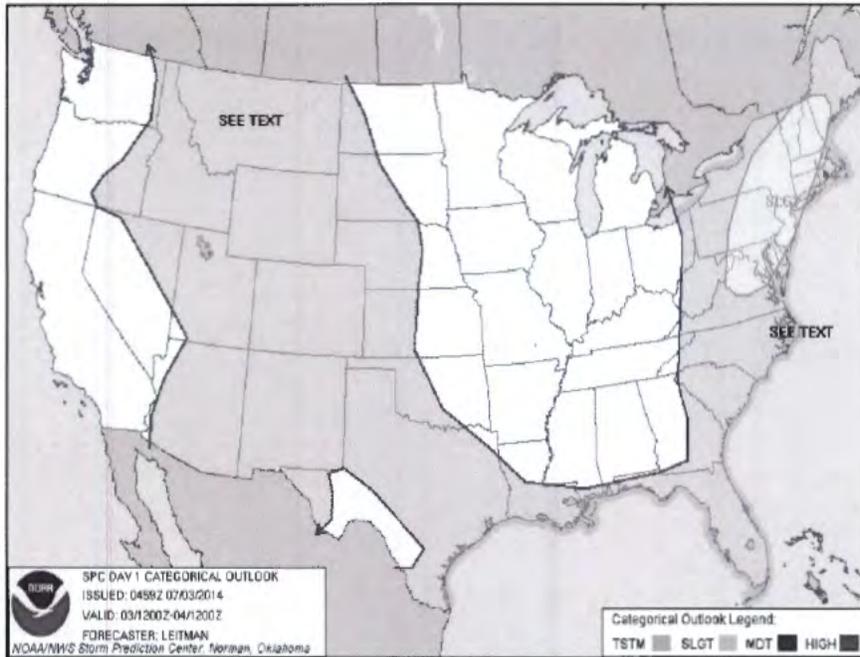

Northeast

Rain and thunderstorms are forecast for the Northeast today. Some of these thunderstorms could become severe during the afternoon and early evening. Heavy rain may bring localized flash flooding from Pennsylvania to Maine.

Weather Hazard Assessment

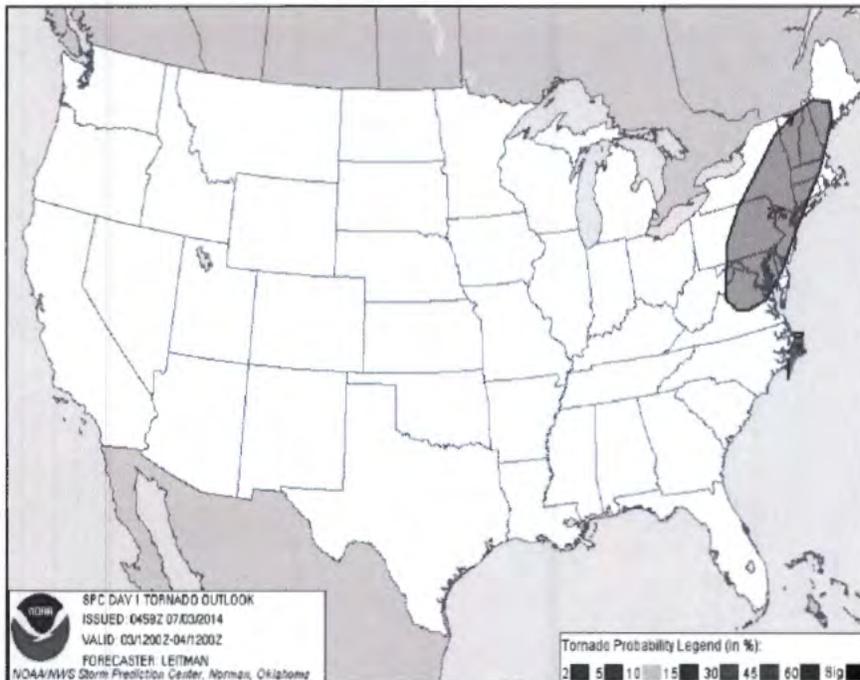

Severe Weather

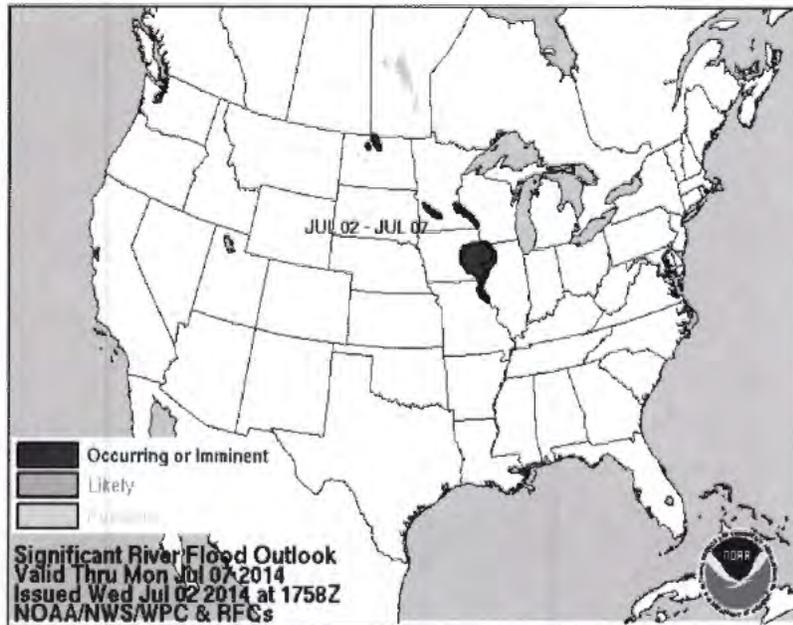

There is a slight risk of severe thunderstorms from the Mid-Atlantic into New England.

Tornado Weather

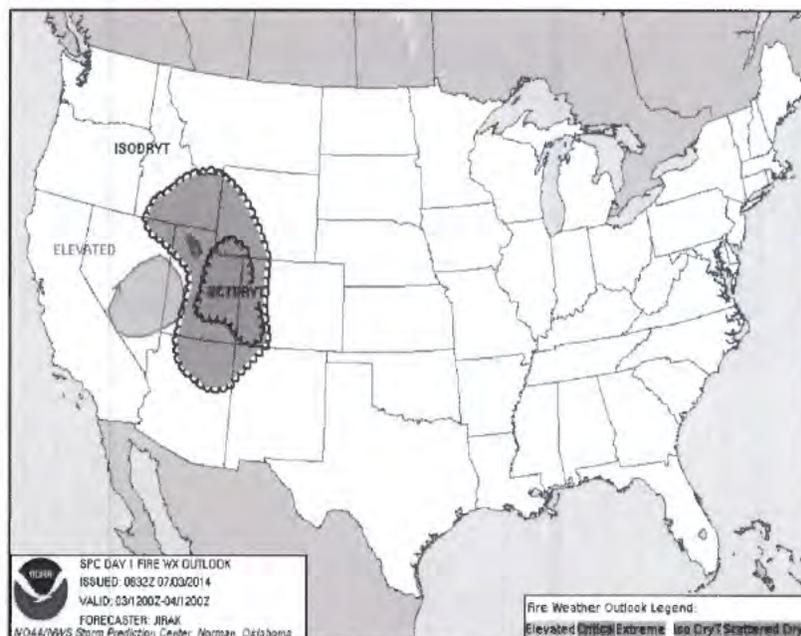

There is a 2-percent chance of tornado activity today from Virginia to Maine and a portion of the North Carolina Outer Banks.

Significant River Flooding

Significant flooding is occurring in portions of Minnesota, Iowa, Wisconsin, Illinois, North Dakota and Missouri.

Critical Fire Weather

There is no Critical Fire Weather is forecast today. There is an Elevated Threat of fire activity in parts of Nevada and Utah. There is also a risk of isolated Dry Thunderstorm activity for New Mexico, Arizona, Colorado, Utah, Wyoming, Nevada, and Idaho. Scattered Dry Thunderstorms are expected in portions of Colorado, Utah and Wyoming.

Tropical Weather Activity

Source: National Hurricane Center – July 3, 2014

Atlantic Ocean, Caribbean Sea and Gulf of Mexico

Hurricane Arthur is summarized at the beginning of this report.

Eastern Pacific Ocean

Tropical Storm Douglas

As of 5:00 a.m. EDT this morning, Tropical Storm Douglas was located about 455 miles west-southwest of Baja California and moving toward the northwest at 3 miles per hour. Maximum sustained winds are 40 mph and some weakening is likely during the next 48 hours. Tropical Storm Douglas will likely become a tropical depression later today.

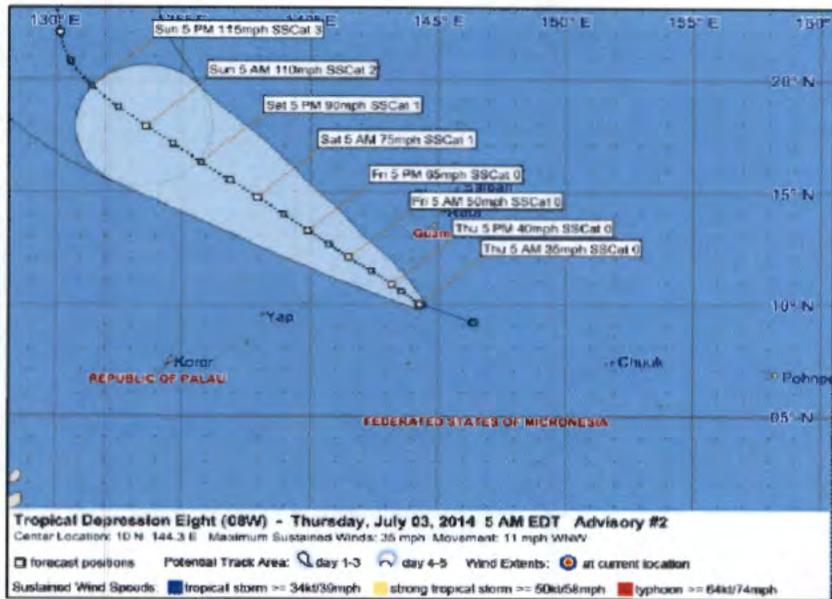

HURREVAC Image

Western Pacific

Tropical Depression 08W

As of 5:00 a.m. EDT, this morning, Tropical Depression 08W is located 240 miles south-southeast of Guam and is moving west-northwest at 16 mph. The depression has sustained winds of 35 mph with higher gusts. This system is expected to slowly strengthen over the next several days. The closest point of approach to Guam is expected to be about 148 miles tomorrow. No significant storm impact is expected at this time.

DOI in the News:

SECRETARY JEWELL LEADS PUBLIC CAMPAIGN TO SUPPORT CONSERVATION FUNDING. The E&E Daily (7/7) reports that the Obama Administration is "going on the offensive this week to promote the Land and Water Conservation Fund and the need for Congress to fully fund the program that helps preserve historic sites, expand hunting and fishing locations, and protect water resources." Interior Secretary Sally Jewell on Monday announced "a weeklong series of events designed to raise public awareness of the LWCF – the government's main vehicle for acquiring new lands, protecting private lands and funding urban recreation." Jewell said, "There's a pretty good chance that if you're enjoying a bike trail or a fishing pier or a park in your neighborhood, the Land and Water Conservation Fund has helped pay for it. If you have access to hunting areas, if you've ever visited a Civil War battlefield, if you've enjoyed the sight of wildlife in a protected area near your home, the Land and Water Conservation Fund may have helped make it possible."

The Hill (7/7, Cama, 237K) reports that "Jewell's travels this week will bring her to events in Fort Worth, Texas, Birmingham, Ala., and Richmond, Va." Also, "Deputy Interior Secretary Michael Connor, Fish and Wildlife Service

Director Dan Ashe and Bureau of Land Management Director Neil Kornze will travel to Oregon, Florida and Alaska.”

The AP (7/8) reports that Jewell is “scheduled to join Fort Worth Mayor Betsy Price and Ralph Duggins, vice chairman of the Texas Parks and Wildlife Commission, at a Tuesday morning news conference at Fort Worth’s Gateway Park.”

Coverage by the AP was picked up by the Washington Times (7/8, 455K), WRAL-TV Raleigh, NC (7/8, 117K), and KWES-TV Odessa, TX (7/8, 5K).

CONTINUING COVERAGE OF MEETINGS ON NATIVE HAWAIIAN GOVERNMENT. Covering the meetings to discuss a recognized native Hawaiian government, KGMB-TV Honolulu (7/8, 95K) discussed the issue with Trisha Watson, “a native Hawaiian expert and activist, community leader, Ph.D. and teacher.” Watson described the situation as “a very unfortunate sequence of events” and “feels as though the meetings came at a bad time, with very short notice.”

KGMB-TV Honolulu (7/8, 95K) also discussed the issue with President and CEO of the Council for Native Hawaiian Advancement Michelle Kauhane.

HOUSE REPUBLICANS TO EXPLORE BORDER CONCERNS LINKED TO NATIONAL MONUMENT DESIGNATION. The E&E Daily (7/7) reports that House lawmakers will “raise questions at a hearing Thursday about President Obama’s designation of a national monument in the Southwest and its potential effects on border security.” Republicans call New Mexico’s Organ Mountains-Desert Peaks National Monument “a prime example of executive overreach.” They claim that the designation will “impede the US Border Patrol’s work along the Mexican border.”

FEDERAL FIREFIGHTING SPENDING RISES. The E&E Daily (7/7) reports that the Forest Service “now allocates half its budget to fighting wildfires, which are burning at an alarming rate in Western regions and are at least in part fueled by climate change.” Meanwhile, “spending to combat fires continues to seep into other agencies and state governments, leaving taxpayers with multibillion-dollar burdens that continue to increase every year.” The article notes that the Forest Service and the Interior Department have “spent an average of \$1.54 billion per year to suppress fires in the past decade, and federal spending on fire suppression has not dipped under \$1 billion since 2005.”

Additional coverage of wildfires was provided by the AP (7/8), the AP (7/8), the AP (7/8, Kruesi), the AP (7/8), and ABC News (7/8, 3.58M).

DEAL REACHED BETWEEN ATV RIDERS, CONSERVATION GROUPS IN COLVILLE NATIONAL FOREST. The E&E Daily (7/7) reports that “forest officials have reached a compromise with conservationists and ATV riders who use a national forest in northeastern Washington.” Colville National Forest officials “finalized a plan last month to open more trails to ATV users while closing off some loops that have been damaged by off-road vehicles.” The article notes that “the project will cost \$750,000 over 15 years and is backed by conservation groups and ATV riders alike.”

America’s Great Outdoors:

National Park Service:

DRAKES BAY OYSTER CO. APPEARS READY TO WIND DOWN OPERATIONS. The Marin (CA) Independent Journal (7/8, 88K) reports that “after 19 months of legal fights the Drakes Bay Oyster Co. appears ready to give up its battle to remain open.” In federal court Monday in Oakland, a lawyer “representing the oyster operation said he was negotiating a settlement with the federal government.” The article notes that “the discussions likely revolve around how operations would cease, but exact details were not revealed in court.”

The San Francisco Chronicle (7/8, Fagan, 3.33M) reports that “however, while those talks go on, the Drakes Bay attorneys are still scraping for ways to adjust their lawsuit seeking to keep the farm open.” According to

Lawrence Bazel, attorney for the company, "if they can find new claims to make, they may be able to file new appeals – and possibly win a new reprieve for the operation."

Meanwhile, the [Santa Rosa \(CA\) Press Democrat](#) (7/7, 148K) reports that "a federal judge Monday gave lawyers for Drakes Bay Oyster Company and the Interior Department another month to negotiate the oyster farm's departure from Marin County's Point Reyes National Seashore."

The [Marin \(CA\) Independent Journal](#) (7/8, 88K) editorializes that that "the US Supreme Court's refusal to hear the Drakes Bay Oyster Co.'s attempt to overturn federal orders to close the longstanding Marin business puts the oyster farm a big step closer to being shut down." According to the paper, the ruling "may close the door on this chapter of the park's history, but it does not lessen the park's need to rebuild bridges and trust with the community."

Also reporting on the story is [KQED-FM](#) San Francisco (7/7, 15K).

COLORADO MONUMENT PARK DESIGNATION WON'T MOVE FORWARD. The [AP](#) (7/8) reports that Colorado National Monument in Mesa County is "not going to be designated a national park." Rep. Scott Tipton and Sen. Mark Udall said Monday that "more dialogue is needed before the Monument should become the state's fifth national park." Tipton said that "the likelihood for national park legislation passing the House and Senate without impacting the local community is 'minuscule.'"

VOLKSWAGEN GROUP OF AMERICA HELPS CLEAN NATIONAL MALL AFTER INDEPENDENCE DAY CELEBRATIONS. [Roll Call](#) (7/8, 76K) reports that Volkswagen Group of America Inc. "volunteered 250 hours of service to help clean up the National Mall in the wake of Independence Day celebrations." Michael Horn, president and CEO of Volkswagen Group of America, said, "There's 60 or 70 employees, and they do service. They clean up the leftovers from the Fourth of July. They paint the fences."

GRAND CANYON TO MARK 1956 CRASH SITE. The [AP](#) (7/8, Fonseca) recalls changes in air travel and its regulation – including the formation of what would become the FAA – in the aftermath of the June 30, 1956 crash of a United Airlines Douglas DC-7 and a TWA Lockheed Super Constellation over the Grand Canyon, killing all 128 people aboard in what at the time was "the deadliest aviation disaster" ever. The tragedy reinforced for the public that much of US air space "was uncontrolled at that time," former NTSB managing director Peter Goelz said. On Tuesday, the [AP](#) reports, Grand Canyon National Park will officially designate the crash site as a National Historic Landmark in a ceremony overlooking the gorge on the east end, where 58 years ago wreckage was scattered over 1.5 square miles.

VOYAGEURS NATIONAL PARK CLOSES BACKCOUNTRY. The [AP](#) (7/8) reports that Voyageurs National Park has "closed its backcountry for about two weeks for flood damage assessment and repairs." Park officials have "set a target date of July 21 for reopening the backcountry."

Bureau of Land Management:

BLM, LOCAL LAWMAN DISPUTE ACTIONS IN CLIVEN BUNDY CASE. The [Los Angeles Times](#) (7/8, Glionna, 3.46M) reports that "the tense face-off over a Nevada rancher's right to graze his cattle on federal land has spilled over into a public squabble after the Bureau of Land Management and Clark County Sheriff Doug Gillespie issued conflicting statements over their lack of cooperation in an armed federal raid in April at Bundy's high-desert ranch." In a statement released Monday to the [Los Angeles Times](#), the BLM "expressed its dismay that Gillespie had declined at the 11th hour to support federal agents as they moved in to round up hundreds of cattle officials say Bundy had grazed on federal land for decades without paying the required fees." The article notes that "last week, Gillespie said federal officials escalated an already tense standoff by ignoring his advice to delay the roundup." However, "both agencies agree on one thing: that Bundy and his family overstepped their legal rights by hosting the armed militia on that Saturday in April and should be held accountable."

Also covering the story are the [Raw Story](#) (7/6, 71K) and the [Mail Online \(UK\)](#) (7/8, 2.97M).

CONSERVATION GROUPS PRAISE SAGE GROUSE PLAN FOR NEVADA FORESTS. The [E&E Daily](#) (7/7)

reports that "conservation groups that have been highly critical of federal efforts to protect the imperiled greater sage grouse offered faint praise for a new Forest Service proposal to protect a subpopulation in and around the largest national forest in the continental United States." The article notes that "at issue is the draft environmental impact statement (EIS) released last week by the Humboldt-Toiyabe National Forest in Nevada that proposes amending the forest's land use plan to incorporate policies to protect the unique population of sage grouse, commonly referred to as the 'bi-state' or Mono Basin population." The BLM is also "exploring amending the resource management plans (RMPs) at two field offices as a result of the draft EIS."

Fish and Wildlife Service:

SENATE VOTES ON BIPARTISAN SPORTSMEN'S BILL. The E&E Daily (7/7) reports that "a package of bills to expand hunting, fishing and shooting opportunities on public lands will have a key test vote this evening in the Senate, offering another chance for a gridlocked upper chamber to pass popular legislation affecting the environment." According to the article, "while S. 2363, the 'Bipartisan Sportsmen's Act,' carries 45 co-sponsors and is backed by a bevy of sportsmen's and conservation groups spanning the political spectrum, many fear it could fall victim to the same partisan fights over amendments that have derailed bipartisan bills this year to boost energy efficiency and extend energy tax breaks." Moreover, "as the 2014 midterm election inches closer, proponents of the sportsmen's bill say the window of opportunity for Senate passage is quickly closing."

In its "Floor Action" blog, The Hill (7/7, Cox, 237K) reports that "the Senate voted to move forward on Monday with legislation aimed at preserving federal lands for hunting and fishing, despite objections from Democrats who wanted the measure to include gun control language."

Also covering the story is the New Orleans Times-Picayune (7/8, 678K).

SAGE GROUSE COULD AFFECT CONTROL OF SENATE. The Arizona Republic (7/7, 1.45M) reports that the greater sage grouse "could help determine whether Democrats or Republicans control the US Senate in the November elections." The federal government is considering listing the bird as an endangered species next year. According to the article, "doing so could limit development, energy exploration, hunting and ranching on the 165 million acres (67 million hectares) of the bird's habitat across 11 Western states." The article notes that "apart from the potential economic disruption, the specter of the bird's listing is reviving America's centuries-old debates about local vs. federal control and whether to develop or conserve the region's vast expanses of land," and "it has become a key issue in Senate races that are being closely watched because Republicans need to gain six seats in November to capture majority control of the Senate."

Efforts To Save Sage Grouse Criticized. For the "Congress" blog of The Hill (7/8, Graham, Seasholes, 237K), Carl Graham, director of the Sutherland Coalition for Self-Government in the West, and Brian Seasholes, director of the Endangered Species Project at the Reason Foundation, write that "the sage grouse, a large ground-dwelling bird that inhabits 165 million acres in nine Western states, appears headed for listing under the Act, much to the detriment of both the grouse and those with the greatest stake in preserving it." They claim that "over its 40-year history, the Endangered Species Act has often caused significant harm to the very species it is supposed to protect by unnecessarily creating adversaries of landowners harboring these species and preempting state conservation efforts." The authors argue that "for the sake of the sage grouse, and all imperiled species, this country needs a new approach to conserving endangered species that is based on rewarding — not punishing — landowners, and letting state experts take the lead." They conclude that "we need to head in a new, more promising direction so that landowners and resource users will willingly conserve, monitor and actively contribute to the successful conservation of endangered species."

HOUSE SUBPANEL EYES BIPARTISAN BILL TARGETING INVASIVE SPECIES ON PUBLIC LANDS. The E&E Daily (7/7) reports that a House Natural Resources subpanel this week will "take up bipartisan legislation aimed at reducing invasive species on federal lands." H.R. 3994, the "Federal Lands Invasive Species Control, Prevention and Management Act," would "direct the secretaries of the Interior and Agriculture departments to carry out programs that would reduce invasive species on public lands by 5 percent every year." Also, the bill would "require that the departments would use no less than 75 percent of their budgets dedicated to invasives for on-the-ground control and management."

ENVIRONMENTALISTS, INDUSTRY SPAR OVER PRAIRIE BIRDS. USA Today (7/7, 5.82M) reports that “a battle is brewing in the western USA over federal protections for four species of chickenlike birds with declining populations, setting up one of the most contentious fights over threatened species since environmentalists and business interests sparred over the northern spotted owl in the 1990s.” The clash “intensified last month after three environmental groups sued the US Fish and Wildlife Service to try to force the agency to more aggressively protect the lesser prairie chicken — a bird the service placed on the threatened species list earlier this year.” And “before the environmentalists’ lawsuit, state, local and federal lawmakers decried the threatened species designation as overreach by the federal government that will hamper the energy and agriculture industries.” The article notes that “Kansas and Oklahoma filed suit over the prairie chicken designation, and four New Mexico counties joined a suit by the Permian Basin Petroleum Association in Texas.”

FWS ORDERS REVERSAL OF RECOMMENDATION TO LIST WOLVERINES AS THREATENED. The E&E Daily (7/7) reports that the FWS has “reversed its stance on listing the wolverine as a threatened species, asking federal biologists to withdraw their conclusion that the estimated 300 animals left in the Lower 48 states deserve protections.” According to agency documents, the decision was “based on uncertainties ‘about the degree to which we can reliably predict impacts to wolverine populations from climate change.’”

The AP (7/8, Brown) reports that “a top federal wildlife official said there’s too much uncertainty about climate change to prove it threatens the snow-loving wolverine – overruling agency scientists who warned of impending habitat loss for the ‘mountain devil.’”

There’s no doubt the high-elevation range of wolverines is getting warmer, US Fish and Wildlife Service Regional Director Noreen Walsh said. But any assumption about how that will change snowfall patterns is “speculation,” she said.

Coverage by the AP was also picked up by the Washington Post (7/8, 4.22M), Yahoo! (7/8, Brown, 17.91M), the US News & World Report (7/7, 645K), TIME (7/8, 24.1M), ABC News (7/8, 3.58M), the Boston Herald (7/8, 783K), the Quincy (IL) Herald-Whig (7/8, 85K), the Casper (WY) Star-Tribune (7/8, 90K), the Sacramento (CA) Bee (7/7, 687K), the Spokane (WA) Spokesman-Review (7/7, 210K), The Oregonian (7/8, 992K), and the Minneapolis Star Tribune (7/8, Brown, 1.48M).

FWS PROPOSES PAYING RANCHERS TO HELP FLORIDA PANTHER. The E&E Daily (7/7) reports that “federal wildlife officials are looking at paying ranchers, typically the sworn enemies of the Florida panther, to save the endangered cat.” The FWS has “proposed paying landowners \$22 an acre to dissuade them from selling increasingly scarce panther habitat to developers.” Kevin Godsea, manager for the Florida Panther National Wildlife Refuge, said, “It’s really about buying us some time. We are never going to be able to purchase all the land that we are going to need to recover the species.”

Also reporting on the story is The Hill (7/8, Cama, 237K).

FWS FINALIZES PROTECTIONS FOR TWO GARTER SNAKES. The E&E Daily (7/7) reports that the FWS “this week will finalize protections for two garter snake species found in the southwestern United States.” A final rule scheduled to be published in the Federal Register will “list as threatened the northern Mexican garter snake (*Thamnophis eques megalops*) and the narrow-headed garter (*T. rufipunctatus*).”

Also reporting on the story are the AP (7/8) and the Tucson (AZ) Sentinel (7/8, 1K).

WILDLIFE ADVOCATE CALLS FOR EXPANSION OF SNAKE BAN. The Orlando (FL) Sentinel (7/7, 850K) reports that two years ago, the FWS “banned the import and sale of Burmese pythons and three other species of non-native snakes that have disrupted sensitive ecosystems, especially Florida’s Everglades.” Now the service is “considering banning five more snakes, including boa constrictors, for the same reason.” In an email interview, the CEO of The Humane Society of the United States, Wayne Pacelle, “argued it’s essential to expand the ban to protect the environment, the public — and the snakes themselves.”

ANTIQUES HOLDERS HIRE FORMER AIDE TO SEN. REID IN IVORY BAN FIGHT. The E&E Daily (7/7) reports that “antiques holders have hired a former senior aide to Senate Majority Leader Harry Reid (D-Nev.) for the lobbying battle over the Obama administration’s ivory ban.” Families Conserving Antiques, “an informal coalition of

the Gerstenfeld, Van Auken and Bruehl families, has brought on Martina Bradford of Bockorny Group Inc. to lobby on 'issues related to the administration's proposed update of regulations relative to the import and export of African elephant ivory antiques,' according to disclosure records released by the Senate last week."

US Geological Survey:

USGS STUDY: TIGHTER CONTROLS HAVE HELPED LOWER ACIDITY LEVELS IN RIVERS. The E&E Daily (7/7) reports that "new federal research concludes that acidity levels in some of the nation's largest rivers have steadily declined over the past six decades, and it credits tighter regulations of industrial and agricultural wastewater discharges and air pollution as a major factor." A study led by researchers with the USGS and "published in the journal *Science for the Total Environment* reviewed water quality data in 23 rivers between 1945 and 2010 from Connecticut to California and found that acidity levels in most have been decreasing for years." according to the USGS, "reduced acidity levels were most commonly found in rivers in the Northeast, such as the Delaware and Schuylkill rivers; the Midwest, such as the Illinois and Ohio rivers; and the Missouri River in the Great Plains."

CRITICS QUESTION ETHICS BEHIND USGS AUTHOR'S MOUNTAINTOP-REMOVAL STUDY. The E&E Daily (7/7) reports that "advocates associated with the coal industry are questioning the ethics surrounding a recent US Geological Survey study on the potential impacts of mountaintop-removal mining because of the lead author's wife." The study, "published in the peer-reviewed journal *Freshwater Science*, found a correlation between pollution related to coal mining and reduced fish populations." However, "for years coal industry advocates have questioned lead author Nathaniel Hitt's involvement in such research," because "the fish biologist is married to Mary Anne Hitt, director of the Sierra Club's Beyond Coal campaign."

Securing America's Energy Future:

Onshore Energy Development:

INTERIOR IG REPORT: BACKLOG IN DRILLING REQUESTS HURTS ENERGY INDUSTRY. The AP (7/8, 313K) reports that according to a report from the Interior Department Inspector General, backlogs in drilling permits at the Bureau of Land Management are "handicapping development across the US." Currently the BLM's Vernal, UT office is handling 50% of the annual Federal workload, the report found. The report found that applications for mining and drilling on public lands aren't a high priority at the agency. Furthermore, "supervisors don't track progress on the applications."

OKLAHOMA EXPERIENCES UNPRECEDENTED AMOUNT OF EARTHQUAKES. Bloomberg News (7/8, Shaub, 2.76M) reports that Oklahoma is now the most seismically active state in the continental US with twice as many earthquakes as California this year alone. Although research connecting earthquakes to fracking is not conclusive, most seismologists are convinced that wastewater injected back into the ground is the cause. Austin Holland, Oklahoma's seismology chief, has said "if my research takes me to the point where we determine the safest thing to do is to shut down injection – and consequently production – in large portions of the state, then that's what we have to do." Oil companies, on the other hand, argue that "science isn't far enough along and that correlation... does not amount to proof."

EDITORIAL ARGUES COAL NOT GOING AWAY. In a Bloomberg News (7/8, Roston, 2.76M) editorial, Eric Roston argues that the current economics and politics of coal in the US will keep it relevant as a generation source through 2040, despite the "war" against it, unless there is a price on carbon emissions. He uses EIA models to predict that cheaper renewables "wouldn't make too much of a dent" in coal generation, but that a \$25/ton carbon price would "basically shuts down U.S. coal production."

Offshore Energy Development:

BSEE HEAD: INDUSTRY COOPERATION ON OFFSHORE DRILLING SAFETY NECESSARY. On Platts (7/8, 2K), BSEE Director Brian Salemo was interviewed about how the Gulf of Mexico is "rebounding from 2010's disastrous blowout of the BP Deepwater Horizon drilling rig."

The Hill (7/7, Barron-lopez, 237K) reports that Salerno said cooperation between the oil industry, contractors, and regulators is "critical" to safe offshore drilling. In an interview with Platts Energy Week Salerno said, "In the offshore industry have operators, multiple contractors, and subcontractors. So the challenge really is to get all of them to work together seamlessly and safely."

Also reporting on the story are the FuelFix (7/7, 7K) and KROI-FM Houston (7/8, 725).

SEN. LANDRIEU HOLDS FIELD HEARING IN LOUISIANA. The E&E Daily (7/7) reports that Senate Energy and Natural Resources Chairwoman Mary Landrieu "continues her election-year push" on Monday "for more offshore energy production in her home state with a field hearing in Lafayette, La., on drilling on the outer continental shelf." According to the article, "along with industry witnesses, including a representative from Royal Dutch Shell PLC's US arm, the Louisiana Democrat will highlight the opportunities for more oil and gas production offshore and the jobs that could be created through increased production." Landrieu also "intends to examine permitting hurdles and the possibility of removing regulations viewed as costly and unnecessary."

Also covering the story are Roll Call (7/8, 76K), the Baton Rouge (LA) Advocate (7/8, Gunn, 22K), the Lafayette (LA) Daily Advertiser (7/7, 111K), KATC-TV Lafayette, LA (7/8, 16K), and KLFY-TV Lafayette, LA (7/8, 6K).

BSEE TESTING STATIONARY SKIMMER SYSTEMS' EFFECTIVENESS. The Environmental Protection (7/7, 293) reports that the BSEE "recently began testing the effectiveness of stationary skimmer systems that remove oil from the surface of the water." According to the article, "the tests are being done at Ohmsett, the bureau's National Oil Spill Response Research and Renewable Energy Test Facility."

BOEM TO HOLD TWO MEETINGS ON PROPOSED GULF OIL LEASE SALES. The Panama City (FL) News Herald (7/8, 98K) reports that the BOEM will "hold two public meetings in Panama City Tuesday to discuss two proposed oil and natural gas lease sales in the Gulf of Mexico off the coast of Florida, Alabama and Louisiana." The bureau is "in the process of preparing a supplemental Environmental Impact Statement (EIS) on the proposed new lease areas, which will provide an analysis of the environmental and socioeconomic impacts of oil and natural gas leasing, exploration, development and production in the Gulf."

OVERSEAS INVESTORS SUE BP FOR DEEPWATER HORIZON DAMAGES. The New Orleans Times-Picayune (7/7, Lanino, 678K) reports that according to The Guardian, a group of foreign investors is suing BP for the 2010 Deepwater Horizon spill. The suits follow recent US Federal court rulings enabling "overseas shareholders to bring cases against BP in the US."

BP CLAIMS ADMINISTRATOR RESPONDS TO COMPANY'S CRITICISM. The Baton Rouge (LA) Business Report (7/7, 625) reports that BP claims administrator Patrick Juneau is responding to criticism by BP over his handling of the claims process. In a recent interview, Juneau countered, "BP's CEO Bob Dudley said I was willfully misinterpreting the settlement; that's a lie and, yes, it is actionable. BP agreed to the settlement and its terms and it had the advice of some of the best attorneys in the world. The federal courts have upheld the settlement process as valid – repeatedly." In response, BP senior vice president Geoff Morrell said in an email, "BP has for some time expressed its concerns about what we believe to be the mismanagement of the claims facility and the misinterpretation of the settlement agreement."

Tackling America's Water Challenges:

CALIFORNIA'S NEW RIVER COULD BE POISED FOR COMEBACK. The E&E Daily (7/7) reports that "California's long-polluted New River – accidentally created more than a century ago when the Colorado River overran its levees – could be poised for a comeback." US and Mexican agencies are "spending at least another \$100 million to install a trash screen and build a disinfection facility as part of what's expected to be at least a decade long effort to bring the river's water quality to US environmental standards." The article notes that "with California in the midst of a crippling drought, if the New River is properly restored, it could play a role in helping the state cope with the water shortage, officials say."

CALIFORNIA OIL FIELD SELLING WATER TO DROUGHT STRICKEN COMMUNITIES. The New York Times

(7/8, Onishi, Subscription Publication, 9.65M) reports that in addition to the 70,000 barrels of oil it yields each day, California's Kern River oil field "produces 10 times more of something that, at least during California's continuing drought, has become more valuable to many locals and has experienced the kind of price spike more familiar to oil: water." Chevron, which owns the field, "sells millions of gallons every day to a local water district that distributes it to farmers growing almonds, pistachios, citrus fruits and other crops." The Times notes that while the oil industry has been criticized "for its use of water, especially in the process known as fracking," it is "focusing on efforts to conserve and recycle water — or, in this case, to increase the available supply for irrigation." Critics, however, "dismiss the water conservation measures as political ploys."

BOR CRITICIZED FOR CUTTING OFF WATER TO MARIJUANA GROWERS. In an op-ed for USA Today (7/8, 5.82M), Jonathan Turley, the Shapiro Professor of Public Interest Law at George Washington University, writes that although the Obama Administration has "pledged to respect state laws, it is quietly going in the opposite direction by cutting off water" to marijuana growers. BOR spokesman Dan DuBray insists that the agency "is obligated to adhere to federal law." However, Turley argues that "that position is inconsistent with the actions of the Obama administration in other areas."

Empowering Native American Communities:

BIA REJECTS APPLICATION FOR PARK CITY TRIBAL CASINO. The AP (7/8, Hegeman) reports that "the federal government has refused to accept a tract of suburban Wichita land into trust so an Indian tribe can build a casino there, the Kansas Attorney General's Office said Monday." According to the article, "a July 3 letter from the Interior Department shows the agency rejected the request from the Wyandotte Nation of Oklahoma to take the land into trust." The tribe said "it was disappointed in the decision," but Attorney General Derek Schmidt "lauded the decision, saying in a written statement that the Interior Department reached the correct legal conclusion in disallowing the application."

Also reporting on the story are the Joplin (MO) Globe (7/8, 64K), the Wichita (KS) Eagle (7/8, Mann, Lowry, 313K), the Topeka (KS) Capital-Journal (7/7, 177K), KWCH-TV Wichita, KS (7/8, 44K), and KSNW-TV Wichita, KS (7/7, 26K).

TRIBE RECEIVES RESERVATION STATUS ON PROPOSED CASINO LAND. The Glendale (AZ) Star (7/8, 20K) reports that BIA chief Kevin Washburn "issued his decision July 3 in favor of the Nation regarding its reservation trust status on property it owns at 95th and Northern avenues, 135 acres of unincorporated land completely surrounded by the City of Glendale." Ned Norris Jr., chairman of the Nation, said, "Today's ruling by the Department of the Interior allows the Nation to move another step closer to benefiting from the United States' promise to the Nation that we would be able to replace our destroyed reservation lands. The nation is eager to move forward to use our replacement land to create thousands of new jobs in the West Valley."

CONGRESSMEN SUPPORT CATAWBA IN CASINO PLANS. The Shelby (NC) Star (7/8, 43K) reports that "three longtime congressmen have urged the Interior Department to approve the Catawba Indian Nation's trust application for land in Kings Mountain, where it plans to build a casino, arguing that justice will be served by doing so." In recent letters to the Interior Department, Congressman Jim Moran, Congressman George Miller, and former Democratic Congressman and New Mexico Gov. Bill Richardson said "now is the time for the federal government to fulfill its trust responsibility and the promises made in the 1993 Catawba Indian Land Claims Settlement Act." However, "the Nation still faces fierce opposition from the Eastern Band of Cherokee Indians—a tribe that wants to lock out all gaming competition in the state."

Top National News:

WHITE HOUSE: "MOST" CHILDREN ENTERING US ILLEGALLY WILL BE DEPORTED. The ongoing crisis along the US border with Mexico continues to get a great deal of national media attention, including a front-page article in this morning's the New York Times (7/8, A1, Hulse, Subscription Publication, 9.65M). However, the coverage on the network newscasts has diminished to the point where only NBC Nightly News (7/7, story 7, 2:35, Williams, 7.86M) had a full segment on the immigration debate on Monday evening. On the other hand, the surge in illegal immigration from Central America was the lead story on every prime-time Fox News program on Monday, and was the dominant topic of discussion throughout the night. For instance, at the opening of Fox

News' On The Record (7/7, 1.65M), Greta Van Susteren said, "This is a Fox News alert: the crisis at our border is getting worse" with "another plane full of Central American immigrants, mostly children traveling alone, landing in San Diego."

In a brief item for the CBS Evening News (7/7, story 6, 0:25, Pelley, 5.08M), Scott Pelley reported that on Monday, "more illegal immigrants were flown from Texas to San Diego." According to Pelley, "52,000 unaccompanied children have been caught at the border since October," and the White House maintains that "the law requires the US to send most of the children home." On NBC Nightly News (7/7, story 7, 2:35, Williams, 7.86M), Brian Williams also reported that on Monday, "the White House said...most of the children coming across the border will be deported back their home countries."

The AP (7/8, Babington, 11.54M) also reports that on Monday, in a "pointed warning," White House press secretary Josh Earnest said "most unaccompanied children arriving at the U.S.-Mexico border are unlikely to qualify for humanitarian relief that would prevent them from being sent back from their home countries." But the AP notes that "the administration will allow the immigration review process to take place," and "it's unclear how quickly that process will unfold." According to the AP, Homeland Security Secretary Jeh Johnson "acknowledged Sunday that such proceedings might be long delayed." The Washington Post (7/8, Zezima, 4.22M) says Earnest's "pointed response comes a day after...Johnson danced around questions over whether the children would be allowed to stay in the United States."

The AP (7/8, Wemer, Kuhnenn) reports that according to unidentified "congressional aide," President Obama "is holding off for now on seeking new legal authority to send unaccompanied migrant kids back home faster," but will nevertheless "ask Congress on Tuesday for more than \$2 billion in emergency spending to deal with the children who've been arriving by the thousands from Central America." The New York Times (7/8, A1, Hulse, Subscription Publication, 9.65M) reports that Sen. Dianne Feinstein says the President already has "flexibility to accelerate the judicial process in times of crisis." Feinstein says the administration "should use that flexibility to speed up the system."

Politico (7/7, Kim, 637K) notes that the President had "signaled last week that" he would "request...expanded legal authority to respond to the influx of minors." However, according to Politico, "immigrant-rights groups were furious" after learning that the President wanted to curtail illegal immigration, so "when the White House sends its funding request on Tuesday, it won't include major policy changes, such as the broader legal authority that would effectively make it easier to send these migrant children home."

In the lead story for Fox News' Special Report (7/7, 2.15M), Sen. Lindsey Graham was shown claiming that the President "has sent out a message – whether he knows it or not – 'if you get to America you can stay.'" According to White House correspondent Ed Henry, "That message was reinforced on Sunday when Homeland Security Secretary Jeh Johnson dodged questions whether the children will be deported to Central America." Henry went on to report that "while the administration has seemed surprised by the crisis," there are "signs they knew it was coming." Henry noted that in January, the Department of Homeland Security "began shopping for contractors to move kids around the United States saying, 'there will be approximately 65,000 unaccompanied alien children in total.'"

Also on Fox News' Special Report (7/7, 2.15M), the Weekly Standard's Steve Hayes noted that Administration officials, including former Homeland Security Secretary Janet Napolitano, have repeatedly insisted that "the borders are secure." Hayes continued, "That was the key argument of the pro-reform crowd," but "now you have these same people saying in effect, 'we can't really do anything about this surge.'" Likewise, on Fox News' The O'Reilly Factor (7/8, 2.53M), Ed Henry said "the ultimate debacle...for the President is that for years now, he has been saying...'we can have comprehensive immigration reform because the border is secure,'" which has "blown up on him."

Obama's Decision To Bypass Border While In Texas For Fundraisers Draws Scrutiny. The Hill (7/7, Sink, 237K) notes that the President is "set to travel to Texas, the center of a growing firestorm over the nation's inability to prevent illegal immigrants from entering the country." According to The Hill, the President will appear at fundraisers in Dallas and Austin, but "has no plans to visit the border" despite having "come under criticism from members of both parties over the wave of immigrants." The Hill also notes that on MSNBC on Monday, Rep. Raúl Grijalva (D-AZ), the co-chairman of the Congressional Progressive Caucus, said "the borderlands deserve a

presidential visit.”

The Washington Post (7/8, Zezima, 4.22M) reports that on Monday, White House press secretary Josh Earnest “said the administration is ‘not worried about those optics’ of the president fundraising while what the administration has called an ‘urgent humanitarian situation’ is happening hundreds of miles away.”

The Washington Times (7/8, Chasmar, 455K) reported that on MSNBC’s The Daily Rundown on Monday, “panelists...seemed puzzled by the president’s refusal to visit the U.S.-Mexico border while he fundraises in Texas, with USA Today reporter Susan Page calling the decision Mr. Obama’s ‘Katrina moment.’” Page asked rhetorically, “And you’re going to a fundraiser and not going to the border where there’s this crisis?” The Daily Caller (7/7, Hoefer, 408K) notes that on the same program, Chuck Todd “suggested that Democrats are avoiding talking about immigration reform,” and the Washington Post’s Dan Balz “agreed” that the Administration’s “unpopular stance on immigration reform could motivate Republican voters.”

Asked, on Fox News’ The O’Reilly Factor (7/8, 2.53M), if he thinks it is “a mistake” for the President to travel to Texas for fundraisers but not take a first-hand look at the border crisis, Fox’s Ed Henry said, “I think it could blow up in the President’s face because it is not just Republicans like Rick Perry demanding that he go to the border, now you have a Democrat, [Rep.] Henry Cuellar...saying not only should the President go to the border, but that he has been slow to react.”

In his opening monologue for Fox News’ The O’Reilly Factor (7/7, 2.53M), Bill O’Reilly said it is “very strange” that the President is “traveling to Texas this week but is not going to the border.” O’Reilly went on to say that the President “has made a few statements about the border meltdown, but not many – perhaps because the stats are so grim.”

First Lady Will Speak To The League of United Latin American Citizens On Thursday. The AP (7/8, Superville) reports that First Lady Michelle Obama “is scheduled Thursday to address the League of United Latin American Citizens, or LULAC, during its meeting in New York City.”

NYTimes A1 Analysis: Bush-Signed Trafficking Law “At The Root” Of Border Crisis. In a front-page article titled, “Immigrant Surge Rooted In Law To Curb Child Trafficking,” the New York Times (7/8, A1, Hulse, Subscription Publication, 9.65M) reports that “one of the final pieces of legislation signed into law by President George W. Bush,” the William Wilberforce Trafficking Victims Protection Reauthorization Act, “is at the root of the potentially calamitous flow of unaccompanied minors to the nation’s southern border.” The Times says that while the law “gave substantial new protections to children entering the country alone who were not from Mexico or Canada by prohibiting them from being quickly sent back to their country of origin.” The Times goes on to report that the law “required” that children entering the US illegally “be given an opportunity to appear at an immigration hearing and consult with an advocate.”

Surge Of Illegal Immigration Partly Attributed To Widespread Central American Gang Violence. According to McClatchy (7/7, Johnson, Subscription Publication, 23K), analysts warn that in El Salvador, “as the gangs deepen connections with regional organized-crime groups involved in drug, weapons and human trafficking, they present a direct challenge to state control over the tiny Central American nation.” McClatchy says “the chaos...provides an incentive for Salvadorans to try to flee north for the safety of the United States.” McClatchy adds that those “trying to explain the huge increase in children and teens who’ve arrived in the United States say anecdotal evidence points at least in part to the hold that criminal gangs have in El Salvador, Honduras and Guatemala.”

On NBC Nightly News (7/7, story 7, 2:35, Williams, 7.86M), Stephanie Gosk reported from Honduras that when she asked “teenagers who live in San Paola Sula – what many call the ‘murder capital of the world’” – if they “want go to the US, every hand went up.” Neil Munro, in a piece for the Daily Caller (7/7, Munro, 408K), says “most of the border-crossing migrant youths are arriving from...Honduras, Guatemala and El Salvador,” which have “an estimated population 12 million children.”

Illegal Immigrants Have Not Been Sent To Murrieta Since Bus Convoy Was Repelled On July 1. According to the Los Angeles Times (7/8, Hansen, 3.46M), “Dozens of protesters gathered Monday in Murrieta to challenge the expected arrival of buses carrying detained immigrants to a Border Patrol station.” However, according to the

Times, the protesters “waited in vain as the buses they thought would head their way instead traveled to a Border Patrol facility in San Ysidro, in San Diego County.”

Neil Munro, in a piece for the Daily Caller (7/7, Munro, 408K), makes the case that the Administration is “trying to minimize the public’s opposition” to the Administration’s policy of ferrying of illegal immigrants to communities within the US. Munro notes that since protesters in Murrieta “blocked a July 1 federal transfer of roughly 140 border-crossing adults and their children into their community,” the Administration “hasn’t supplied another convoy of Central American migrants to ignite a TV-ready clash.”

Goodlatte: Central Americans In US Illegally Are Paying To Have Their Children Brought Here. Appearing on Fox News’ On The Record (7/7, 1.65M), House Judiciary Committee Chairman Rep. Bob Goodlatte (R-VA), who represented immigrants seeking citizenship as an attorney before coming to Congress, said that in a recent visit to the border region, border patrol agents “said that overwhelmingly what” the unaccompanied minors “say they want is to be reunified with their parents who are already illegally in the United States.” Goodlatte continued, “Many of them are just...turning themselves in very willfully, knowing that after they are held for a few hours they are going to be released into the interior of the United States – adults with work authorization, children oftentimes sent to their parents who are already illegally here.”

McCain, Graham: US Should Withhold Aid From Central American Countries. Roll Call (7/7, Lesniewski, Subscription Publication, 76K) reports that Sen. John McCain, on of the authors of the comprehensive immigration reform plan that was approved by the Senate last year, “is calling for at least threatening to cut aid to Central American countries that don’t take steps to stop the flow of unaccompanied migrant children to the United States.” In a radio interview, McCain said, “We should tell these countries in Central America that no more aid, no more assistance, no nothing until they stop this from happening.”

On Fox News’ Special Report (7/7, 2.15M), Sen. Lindsey Graham, another prominent Republican supporter of comprehensive immigration reform, was shown saying, “I would put on the table cutting off any foreign assistance to these countries until they embrace solving this problem.”

Pentagon Reportedly Planning To House More Illegal Immigrants On Military Bases. According to the Washington Times (7/8, Ybarra, 455K), the Pentagon “is considering extending its parameters for harboring illegal immigrant children on military bases,” and “is also in talks with the U.S. Department of Health and Human services to extend the number of days that the children can stay on government property.”

Arizona Must Give Drivers Licenses To Illegal Immigrants Covered By Obama’s Deferred Action. The AP (7/8, Billeaud, 11.54M) reports that the 9th U.S. Circuit Court of Appeals has “sided with advocates for young immigrants who argued that Arizona’s policy of denying them driver’s licenses even though they had work permits under an Obama administration policy violated their equal protection rights.” The AP notes that in June 2012, President Obama blocked any deportations of those living in the US illegally if they first arrived “before they turned 16” and had “been in the country for at least five continuous years,” and declared that they “were allowed to apply for a two-year renewable work permit.” According to the AP, Arizona Gov. Jan Brewer then “direct[ed] state agencies to deny driver’s licenses...to young immigrants who get work authorization under the program.”

The Washington Times (7/8, Dinan, 455K) reports that on Monday, Brewer said, “The ruling is especially disturbing given the current influx of illegal aliens, a crisis President Obama created and escalated.” The New York Times (7/8, Santos, Subscription Publication, 9.65M) notes that “in a separate opinion, one of the judges...also said that the plaintiffs had ‘persuasively argued’ that Arizona’s driver’s license policy creates ‘a new type of alien status,’ therefore usurping the federal government’s role in determining immigration policy.” The Times notes that Nebraska is “the only other state to deny driver’s licenses to immigrants in the deferred-deportation program.”

LA Mayor: LAPD Will No Longer Keep “Deportable Inmates” In Jail Without A Judge’s Order. The Los Angeles Times (7/8, Hansen, 3.46M) reports that on Monday, Los Angeles Mayor Eric Garcetti “announced that Los Angeles would become one of several major U.S. cities that will no longer keep deportable inmates in prison past their jail term without a judge’s orders – a seeming rebuke to federal immigration officials.” Another Los Angeles Times (7/8, Reyes, 3.46M) article notes that Garcetti made his announcement on Monday “alongside a cheering crowd of immigrant advocates.” An editorial in the Los Angeles Times (7/8, Board, 3.46M) praises

Garcetti's decision, saying it, "and similar dominoes-like responses by local governments, are proper, and affirm a basic civil liberty: the right to due process."

Wickham: Unaccompanied Minors Should Be Flown To Guantanamo Bay. In his column for USA Today (7/8, 5.82M), DeWayne Wickham suggests that unaccompanied minors trying to enter the US illegally should be flown to Guantanamo Bay, Cuba, which he notes was "used in the 1990s as a detention camp for Haitians escaping bloodshed." Wickham notes that the Guantanamo Bay Navy base "boasts movie theaters, American fast-food restaurants and excellent recreational facilities."

TIGHTER SECURITY MEASURES TAKE EFFECT AT OVERSEAS AIRPORTS. The increased security measures at overseas airports for US-bound passengers led two of the three network news broadcasts Monday evening. The reports were all similar, noting that while US officials are concerned that terrorist groups including AQAP are developing explosive devices that are capable of making it through airport security undetected, there is currently no specific threat. ABC World News (7/7, story 3, 2:35, Ross) reported that US officials "say they fear a threat to US-bound aircraft from Jihadists with Western passports now in Syria and Iraq, carrying bombs designed by a master al Qaeda bomb maker." According to US intelligence reports, "the bombs could be carried in electronics. So, that's why travelers on select flights into the US from overseas are being told they must turn on their electronic devices at security checkpoints before boarding flights. The enhanced security steps were put in place over the weekend across the Middle East and Europe, including today at London's Heathrow Airport."

The CBS Evening News (7/7, lead story, 2:35, Orr, 5.08M) reported in its lead story that as security on overseas flights bound for the US is tightened, "al Qaeda's most dangerous wing is out with a propaganda tape celebrating the attempted underwear bombing of 2009." While the attack was not successful, it "demonstrated al Qaeda's ability to reach the US with a hidden bomb. And officials fear terrorists will try again. ... To reduce the risk, US-bound passengers at 20 foreign airports are being required to turn on their electronics to demonstrate the devices are actually phones and laptops and not bombs." Orr added that there is no intelligence that "that terrorists are targeting any domestic flights, so for now, there are no security changes planned at airports inside the US."

In its lead story, NBC Nightly News (7/7, lead story, 3:20, Williams, 7.86M) reported that "air security is ramping up around the world and many are wondering is domestic travel where we will see the next round of changes?" Tom Costello added, "Travelers in Europe flying to America could be facing big delays with those beefed-up restrictions turning airports like Heathrow, one of the world's busiest, into centers of mass confusion." Costello added that that according to security sources, while there is "no specific immediate threat, this is a general ongoing concern they have. The challenge for foreign airports is to balance the security procedures with a busy beginning of the summer tourist season."

Pamela Brown reported on CNN's Situation Room (7/7, 554K) that the increased security comes "as new intelligence warns terrorist groups including al Qaeda in the Arabian Peninsula are intent on developing new bombs capable of fooling airport security measures. The TSA is now asking airports in the Middle East, Europe and Africa to watch passengers turn their devices on before boarding US direct flights. And if those devices don't power up, they won't be permitted on board the aircraft."

The New York Times (7/8, Nixon, Schmidt, Subscription Publication, 9.65M) reports that the TSA would not say how long the new security procedures "would remain in place, nor would it specify the countries or airports that would be affected."

OBAMA, DUNCAN LAUNCH TEACHER EQUITY INITIATIVE AMID TENSION WITH THE NEA. The AP (7/8, Hefling) reports that the National Education Association "adopted a business item July 4 at its annual convention in Denver that called for...[the] resignation" of Education Secretary Arne Duncan, which, according to the AP, "underscores the long-standing tension between the Obama administration and teachers' unions – historically a steadfast Democratic ally." The AP says that the "tipping point for some members was Duncan's statement last month in support of a California judge's ruling that struck down tenure and other job protections for...public school teachers." The AP reports that on Monday, Duncan declined to comment on the NEA's call for his resignation, saying, "I always try to stay out of local union politics. I think most teachers do too."

According to Politico (7/7, Simon, Emma, 637K), President Obama's "video address at the opening of" the NEA convention last week "got tepid applause — nothing like the cheers and screams that greeted union leaders when

they took the stage." Politico also notes that on Monday, Duncan pointed out that "the president of the other major teachers union, the American Federation of Teachers, was joining him Monday for the rollout of [a] teacher equity proposal."

The Washington Times (7/8, Wolfgang, 455K) reports that on Monday at the White House, President Obama "sat down for lunch with educators and rolled out a new initiative to support quality educators in low-income areas across the country." The Times says Duncan "told reporters the new plan calls on states to develop their own methods for ensuring the best teachers aren't clustered in affluent, suburban districts, where student achievement scores typically are higher." The Times adds that Duncan emphasized that "the initiative will be supported with \$4.2 million in federal money and requires no action from Congress."

The Wall Street Journal (7/8, Sparshott, Subscription Publication, 5.51M) reports that on Monday, Duncan said, "Of particular concern is the fact that typically the least experienced teachers...often end up in the poorest schools." The Hill (7/7, Shabad, 237K) reported that "as part of the initiative, the Department of Education will ask states to...create 'equity plans' to guarantee all students have effective educators."

Editorial Wrap-Up:

NEW YORK TIMES. "Four Horrific Killings." The New York Times (7/8, Subscription Publication, 9.65M) editorializes that the spiral of teenager deaths "should cause" the Jewish and Palestinian "communities to think again about the need for a permanent peace, but the loss of four young men may not be motivation enough."

"Germany And The Minimum Wage." In an editorial, the New York Times (7/8, Subscription Publication, 9.65M) praises Germany's expected passage this week of a measure "to set a nationwide minimum wage of 8.50 euros an hour, about \$11.60, effective in 2015," noting that "a solid wage floor ensures that economic growth is broadly shared even by those who fall outside the collectively bargained framework." The Times argues that the move "offers the United States important lessons, if only lawmakers in Washington would learn."

"The Long Wait To See A Doctor." The New York Times (7/8, Subscription Publication, 9.65M), in an editorial, notes a "new survey...conducted by Merritt Hawkins," which found while "Americans are already experiencing long waits to get doctor's appointments...the delays are bound to get worse when millions of previously uninsured Americans get health coverage under the Affordable Care Act." According to the Times, there are "ways to reduce wait times, like increasing primary care doctors, allowing nurses and physicians' assistants to provide more care and opening more primary care clinics."

"New York's Mapmaking Scandal." The New York Times (7/8, Subscription Publication, 9.65M), in an editorial, criticizes Gov. Andrew Cuomo for having "signed onto a set of legislative maps in 2012 that were carefully designed to keep legislators safely in their jobs." The Times goes on to say that since then Cuomo and the New York legislators "came up with a counterfeit reform, a constitutional amendment on November's ballot that would only make matters worse and make it harder to clean up the whole inbred process for years to come."

WASHINGTON POST. "Vetting vs. Abetting." An editorial in the Washington Post (7/8, 4.22M) says that the President's request that Congress appropriate \$5 billion for a Counterterrorism Partnerships Fund "raises some disturbing questions" including what to do about "foreign units that receive U.S. training and funding," and "commit human rights abuses." The Post argues that while a provision like the Leahy amendment which "prohibits aid to units and individuals thought to be involved in gross human rights violations," should be built into the new program, the Administration "is seeking to neuter the Leahy amendment by giving the defense secretary the authority to disregard it by asserting that 'it is in the national security interest to do so.'" The Post calls on Congress to reject the exemption, arguing that "allowing aid to flow to foreign military units that commit major human rights crimes cannot be in the U.S. interest in any circumstances."

"Shevardnadze's Legacy." In an editorial this morning, the Washington Post (7/8, 4.22M) criticizes Eduard Shevardnadze's "misrule as president of independent Georgia," calling it "lamentable," but says he "must be remembered, first and foremost, for those fleeting but inspiring years of glasnost and new thinking at the side of Mr. Gorbachev."

"A Challenge, Not A Catastrophe." An editorial in the Washington Post (7/8, 4.22M) says that despite the "overblown" conclusions reached by ACA critics, judging from "reports that the Obama administration found nearly 3 million discrepancies between what enrollees reported when they signed up for Affordable Care Act insurance and what federal records show about them," there is "more reason for encouragement from recent news about the act than there is to decry its problems." The Post argues that the "right response is to get better at catching and resolving errors faster, not to condemn the system," adding that the Administration "faces another Affordable Care Act management challenge, not a policy disaster."

WALL STREET JOURNAL. "West Chester USA." In an editorial, the Wall Street Journal (7/8, Subscription Publication, 5.51M) examines the efforts of Westchester County, NY Executive Rob Astorino, who is the Republican candidate for governor of New York, to comply with a 2009 housing settlement with the Federal government. The Journal decries accusations that Astorino has violated anti-discrimination laws, and notes that between 2000 and 2010, the number of minorities living in the county increased by 56 percent. The Journal argues that Federal officials are pressuring the county to toughen its zoning ordinances, and it lauds Astorino for standing up to this pressure.

"Where's Jim Comey?" The Wall Street Journal (7/8, Subscription Publication, 5.51M), in an editorial, says the revelations about the missing emails from Lois Lerner to the White House, as well as other IRS officials' emails, are leading some in Congress to question whether or not the FBI is actually investigating the improper targeting of Administration critics as FBI Director James Comey claims it is. According to the Journal, Comey never told Congress that the emails were unaccounted for even though that would have been immediately apparent to the FBI once it began to look into Lerner's correspondence.

"Germany's Fracking Follies." The Wall Street Journal (7/8, Subscription Publication, 5.51M) in an editorial criticizes Germany for proposing a fracking ban during a time when the crisis in Ukraine makes it apparent that Europe needs to diversify its gas supplies. The Journal argue that such a ban would leave Germany vulnerable to Russian President Vladimir Putin.

DOI in the News:

SECRETARY JEWELL ANNOUNCES \$43 MILLION FOR CONSERVATION, RECREATION PROJECTS. The E&E Daily (7/9) reports that "more than \$43 million from a federal fund will be distributed to conservation and recreation projects across the nation," Interior Secretary Sally Jewell announced on Tuesday. Jewell is "heading

up a weeklong campaign to support renewing the fund permanently." She said, "We need to reauthorize this fund and fund it at its intended level without having to worry about year-to-year appropriation."

Secretary Jewell In Birmingham Urges Renewal Of Fund. The [Alabama Live](#) (7/10, 75K) reports that Jewell was scheduled to visit Birmingham on Wednesday "to highlight the 50th anniversary of a fund supporting America's parks and recreational spaces and to urge its continuation." Jewell was scheduled to "visit Red Mountain Park along with making a presentation at East Lake Park to mark the anniversary of the Land and Water Conservation Fund and its significance in creating parks throughout the country."

The [Alabama Live](#) (7/10, 75K) reports that Jewell "lauded the city, its leaders and various outdoors-focused organizations for their efforts to maintain places like East Lake Park that are accessible to people who live in the densely populated city center." she said, "You have the vision and foresight here in Birmingham to recognize that green spaces like this keep our communities healthy and keep our kids creative. Birmingham is way ahead of the curve when it comes to parks and open spaces."

Also reporting on the story is [WVTM-TV](#) Birmingham, AL (7/10, 2K).

Additional Coverage. Additional coverage was provided by the [Washington Examiner](#) (7/9, 335K), the [Washington Times](#) (7/9, 455K), the [Washington Examiner](#) (7/9, 335K), the [Charleston \(WV\) Gazette](#) (7/9, 44K), the [Hampton Roads \(VA\) Virginian-Pilot](#) (7/10, 422K), the [Columbus \(IN\) Republic](#) (7/9, 81K), [Yahoo!](#) (7/9, 17.91M), the [Tennessean](#) (7/8, 414K), the [Jamestown \(ND\) Sun](#) (7/10, 3K), the [Dickinson \(ND\) Press](#) (7/10, 1K), the [North Coast \(OR\) Citizen](#) (7/10), the [Portland \(OR\) Business Journal](#) (7/10, Subscription Publication, 26K), the [Durango \(CO\) Herald](#) (7/9, 28K), the [Fierce Government](#) (7/10, 224), [WLF1-TV](#) Lafayette, IN (7/9, 12K), and [KXLO-FM](#) Lewiston, MT (7/10).

HOUSE PANEL APPROVES BILL TO FUND INTERIOR, EPA. The [E&E Daily](#) (7/9) reports that a House Appropriations subpanel has "approved along party lines a bill funding the Interior Department and US EPA for fiscal 2015, with Republicans touting new investments in wildfire fighting and rural school districts and Democrats decrying deep cuts in EPA's budget." The \$30.22 billion bill "represents a half-percent increase over enacted levels, but much of its increased funding will go to pay the escalating cost of firefighting and to Interior's payment-in-lieu-of-taxes (PILT) program for rural communities."

Also covering the story are "The Fix" blog of the [Washington Post](#) (7/9, Bump, 4.22M) and [The Hill](#) (7/9, Cama, 237K).

CONTINUING COVERAGE OF MEETINGS ON NATIVE HAWAIIAN GOVERNMENT. The [Honolulu Star-Advertiser](#) (7/10, 402K) reports that "dozens of Maui residents Tuesday night echoed the staunch opposition heard around the islands against possible federal recognition as US interior officials held their 15th and final meeting exploring the possibility of re-establishing a government-to-government relationship with Native Hawaiians."

Meanwhile, [KGMB-TV](#) Honolulu (7/10, 95K) says that "former Governor John Waihee joined Steve Uyehara on Sunrise this morning to share his thoughts" on the issue.

TRIBAL, LOCAL LEADERS APPEAL TO PRESIDENT OBAMA FOR IZEMBEK ROAD APPROVAL. The [E&E Daily](#) (7/9) reports that "as Interior Secretary Sally Jewell continues to hold fast on her decision not to build a road through an Alaska wildlife refuge, the locals pushing for approval have decided to appeal to her boss, President Obama." Tribal and local government leaders from King Cove, Alaska, on Tuesday "sent a letter to the president in hopes that he may force Interior to construct the road through the Izembek National Wildlife Refuge that they contend is crucial to their well-being." The letter – signed by the mayors of King Cove and Aleutians East Borough and officials from the Agdaagux Tribe, Belkofski Tribal Council and King Cove Corp. – reads, "We know there is a way for this road to happen with your help. You can quiet years of Aleut protest in a single moment and be assured that we will lift our voices in songs of praise and gratitude."

Also reporting on the story is [KTVA-TV](#) Anchorage, AK (7/10, 1K).

REP. DEFAZIO SLAMS FWS FOR HANDLING OF GRAY WOLVES. The [E&E Daily](#) (7/9) reports that Oregon

Rep. Peter DeFazio "ripped" the FWS' "handling of gray wolves, urging Interior Secretary Sally Jewell yesterday to establish buffer zones around Yellowstone National Park to protect wolves that wander beyond the park." DeFazio "wrote in a three-page letter to Jewell that Fish and Wildlife's proposal last year to remove Endangered Species Act protections for wolves in most of the United States was premature and that populations of gray wolves in Wyoming, particularly, are dropping dramatically." Jessica Kershaw, an Interior spokeswoman, said the department has received DeFazio's letter, "and we are reviewing it."

ADDITIONAL COVERAGE OF WASHINGTON MONUMENT REOPENING. Additional coverage of the reopening of the Washington Monument was provided by the [Hillsborough \(NJ\) Beacon](#) (7/9, 13K).

ANALYST: OBAMA'S CLIMATE PLANS "A FOOL'S ERRAND." In an op-ed in the "Congress" blog in The Hill (7/9, Powaleny, 237K) The Herald Group director Andrew Powaleny notes that recently The New York Times published a story that led with news that President Obama conceded that his climate change efforts could boost fuel and electricity costs. He says despite the "good" intentions President Obama may have, "his policies are misplaced and ineffective" and recent proposals have refrained from discussing whether "any of them would lead to any concrete means to impact climate change or lead to significant temperature reductions." He concludes the president's climate plans are "a fool's errand."

America's Great Outdoors:

National Park Service:

SENATE VOTES FOR STUDY ON PLAQUEMINES PARISH HISTORIC SITES. The [New Orleans Times-Picayune](#) (7/10, 678K) reports that "the Senate Wednesday passed legislation directing a study into the feasibility of designating historic forts and other sites in Plaquemines Parish along the Lower Mississippi River as part of the National Park Service." The measure "directs the Department of Interior to conduct a study to determine whether the Lower Mississippi River Area possesses nationally significant natural, cultural or recreational resources required to make it eligible to be part of the National Park System."

UNIVERSITY OF MEMPHIS RECEIVES NPS GRANT. The [Examiner](#) (7/10, 1.56M) reports that the NPS has "awarded \$195,200 in grants from the National Center for Preservation Technology & Training to assist with projects using science and technology for historic preservation." The article notes that "a total of five grants, ranging from \$38,500 to \$40,000, were awarded for projects that develop new technologies or adapt existing technologies to preserve our nation's cultural resources." NPS Director Jonathan B. Jarvis said, "These innovative projects are developing new technologies to preserve our nation's historic resources. We are pleased to provide assistance for these programs that are bringing the best skills and technology of the present to preserve the treasures of the past."

NPS MARKS 150TH ANNIVERSARY OF BATTLE OF MONOCACY. The [AP](#) (7/10, Dishneau) reports that the NPS marked the 150th anniversary of the Battle of Monocacy on Wednesday.

BEST NATIONAL PARK NOMINEES REVEALED. [USA Today](#) (7/10, 5.82M) has "launched a summer-centric Readers' Choice contest in which everyone has a vested interest: Best National Park."

Bureau of Land Management:

BLM ANNOUNCES APPOINTMENTS TO UTAH'S RESOURCE ADVISORY COUNCIL. [KCSG-TV](#) St. George, UT (7/10, 43) reports that the BLM "announced new appointments or reappointments of members to Utah's citizen-based Resource Advisory Council." BLM Director Neil Komze said, "Our Resource Advisory Councils exemplify the BLM's collaborative approach to public land management. I want to welcome our newly appointed RAC members and thank them for their commitment to public service."

SEN. REID BLOCKS VOTES ON BILL RENEWING PROGRAM LETTING BLM SELL LAND. The [AP](#) (7/9) reports that Senate Majority Leader Harry Reid "blocked a parade of campaign-season votes on gun rights Wednesday that could have been a political thorn for Democrats seeking to retain control of the chamber in this fall's elections." Reid "used Senate procedures to prevent votes on any amendments to a bipartisan measure

expanding hunters' access to public lands and renewing land conservation programs." Among its various provisions, the bill would "renew a program letting the Bureau of Land Management sell some land and let federal agencies use the funds to buy other properties."

Coverage by the AP was also picked up by the [Washington Post](#) (7/10, 4.22M), the [Washington Times](#) (7/10, Fram, 455K), and the [Sacramento \(CA\) Bee](#) (7/9, 687K).

SENATE APPROVES BILL TO CLEAN UP TOXIC NEVADA MINE. The [AP](#) (7/10) reports that the Senate has "approved legislation intended to launch the long-awaited cleanup of a toxic, abandoned manganese mine outside of Las Vegas." Sens. Harry Reid and Dean Heller say the bill sent to President Obama on Wednesday directs the BLM "to convey the federal portions of the Three Kids Mine site to the city of Henderson's redevelopment agency for fair market value, taking into account cleanup costs projected in excess of \$300 million." According to the lawmakers, "once the local agency receives title to the land, it will work with a developer to complete cleanup and build a residential community."

BLM BACKS MOVE TO TRANSFER LAND TO IDAHO COUNTY FOR GUN RANGE. The [Spokane \(WA\) Spokesman-Review](#) (7/9, 210K) reports that the BLM is "backing Idaho Congressman Raul Labrador's move to transfer 31 acres of its land in Idaho County to the county for a gun range." Suzanne Endsley, public affairs officer for the BLM's Coeur d'Alene and Spokane districts, said, "We're supportive of the effort. There is no designated range in that area, and people are using this location anyway. From an environmental standpoint, it would be nice if it was managed a little bit better. We just don't have the resources to go there on a weekly basis and pick up all the shells, and there is interest in the county to do a really bang-up management job."

Also reporting on the story is the [Spokane \(WA\) Spokesman-Review](#) (7/9, 210K).

EDITORIAL: BUNDY SHOULD BE HELD ACCOUNTABLE. In an editorial about the conflict between the federal government and Nevada rancher Cliven Bundy, the [St. George \(UT\) Spectrum](#) (7/9, 48K) argues that "the people who caused the disruption with officers acting to enforce the law should be punished, just as a person living in town would be punished for interfering with a police officer doing his or her job." It notes that Clark County Sheriff Doug Gillespie has said "publicly that Bundy crossed the line when he allowed his supporters onto his property to aim guns at police." The editorial concludes that "if Gillespie is right and the courts find Bundy crossed the line, it will have been his own fault. And he should face penalties that he won't be able to ignore, just as everyone else would."

Fish and Wildlife Service:

SPORTSMEN'S BILL ON VERGE OF FAILURE. The [E&E Daily](#) (7/9) reports that "a bipartisan bill to expand hunting on public lands is on the brink of failure," after Senate Majority Leader Harry Reid "used a procedural maneuver that could stiffen Republican opposition." According to the article, "faced with a flurry of controversial amendments – including ones that would force politically difficult votes on gun rights – Reid 'filled the amendment tree.'" The article notes that "the move enables him to block unwanted amendments, though it does not preclude Democratic and Republican leaders from hammering out an agreement on amendments in the coming days." However, "if such a deal is not made, Republicans may withdraw support, killing the bill."

Also covering the story is the "Floor Action" blog of [The Hill](#) (7/10, Cox, 237K).

HOUSE REPUBLICANS TRY TO EASE NEW REGULATIONS ON IVORY SALES. The [AP](#) (7/10, Taylor, 17.91M) reports that House Republicans "want to hold up new federal rules intended to crack down on ivory sales because it is becoming more difficult for owners of musical instruments, antiques and guns made with ivory to trade in such items." A House Appropriations subcommittee "acted Wednesday to block the rules as part of a measure funding the Fish and Wildlife Service." The article notes that "the legislation has a long way to go before it becomes law and the rules, announced in February, will stay in effect in the meantime."

Coverage by the AP was also picked up by the [Washington Post](#) (7/10, 4.22M), the [Sacramento \(CA\) Bee](#) (7/9, 687K), the [US News & World Report](#) (7/9, 645K), and [ABC News](#) (7/10, 3.58M)

BILL INTRODUCED TO PROHIBIT FWS FROM CLOSING FISH HATCHERIES WITHOUT CONGRESSIONAL PERMISSION. The AP (7/10) reports that Rep. Paul Gosar has “introduced a bill that would prohibit the US Fish and Wildlife Service from closing fish hatcheries or propagation programs without permission from Congress.” Gosar says the measure “would protect jobs and revenue attached to the recreational fishing industry.”

Also reporting on the story is the Prescott (AZ) E-News (7/10, 535).

OBAMA ADMINISTRATION RELEASES TWIN RULES FOR LOGGERHEAD SEA TURTLES. The E&E Daily (7/9) reports that the Obama Administration on Wednesday “released two final critical habitat rules for threatened loggerhead sea turtles in a move that creates one of the biggest habitat designations ever to protect any species.” The rule from the National Oceanic and Atmospheric Administration will “designate 38 areas within the northwest Atlantic Ocean population’s range.” Environmental groups have said “the total size of the offshore designation is more than 300,000 square miles, though agency officials could not confirm the number by press time.”

Also reporting on the story are the AP (7/10, McConnaughey), Reuters (7/10, Mcleod), The Hill (7/10, Devaney, 237K), Miami Herald (7/10, Disare, 822K), the Chicago Tribune (7/10, Haven, 2.3M), the Sacramento (CA) Bee (7/9, 687K), the Florida Today (7/9, 208K), the Carteret County (NC) News-Times (7/10, 28K).

Coverage by the AP was also picked up by the Atlanta Journal-Constitution (7/10, 1.36M), the Raleigh (NC) News & Observer (7/9, 504K), the New Orleans Times-Picayune (7/10, 678K), WHNS-TV Greenville, SC (7/10, 106K), and KALB-TV Alexandria, LA (7/10, 1K).

LESSER PRAIRIE CHICKEN COMPLICATES SPACEPORT LICENSE PROCESS. The Midland (TX) Reporter-Telegram (7/10, Gleason, 44K) reports that the “mating rituals of the lesser prairie chicken,” listed this year as a threatened species, is impacting the approval of a spaceport license to the Midland International Airport. Once the bird was included on the list, officials had to modify their application to explain how launches would not adversely impact the species. Midland Director of Airports Marv Esterly said that he does expect that in the end FAA officials will determine that there is “no significant impact.” He added that officials are taking their time to “get it right” because granting a spaceport license to an airport would set a precedence.

The AP (7/9) and the KWTX-TV Waco, TX (7/10, 48K) website also cover the story.,

FWS ASSESSING EASTERN HELLBENDER. ABC News (7/10, 3.58M) reports that the FWS is “conducting an assessment of the eastern hellbender — one of two subspecies — to determine if it should be added to the federal endangered species list.” According to the article, “scientists aren’t certain why the salamanders are disappearing.” However, “dams have tamed some of the fast currents they prefer while sediment runoff from development has filled up the rocky nooks and crannies young hellbenders use for shelter,” and “a fungus blamed for amphibian declines worldwide may also be a factor.”

INVASIVE SPECIES LEAD TO YELLOW PERCH COLLAPSE IN LAKE MICHIGAN. The Detroit Free Press (7/10, Smith, 1.02M) reports that “the collapse of the Lake Michigan yellow perch fishery is one of the unwelcome, cascading consequences of invasive species in the Great Lakes.” According to the article, “as zebra and quagga mussels have filtered food out of the ecosystem, the ‘fish of the people’ has dwindled.” And “in its wake, a vital commercial industry, a wholesome source of recreation, a healthy local food source and an urban connection to nature have all but disappeared.”

GROUPS FILE LAWSUIT OVER CALIFORNIA’S APPROVAL OF PESTICIDES. The E&E Daily (7/9) reports that environmental and food safety groups on Tuesday “filed a legal challenge to California on its approval of certain pesticides, arguing that they’re killing honeybees and threatening the nation’s food basket.” The Pesticide Action Network, the Center for Food Safety and Beyond Pesticides “in a case filed in the California Superior Court for the County of Alameda sought action against the California Department of Pesticide Regulation (DPR) for its handling of insecticides known as neonicotinoids.” The action “asked for several measures, including a temporary restraining order and preliminary injunction prohibiting DPR from registering any neonicotinoid pesticide or any other pesticide that is harmful to honeybees.” The groups also “want to block the state from approving any neonicotinoid pesticide until the state completes a full scientific review of how they affect honeybees.”

FORMER NBA STAR YAO MING OPPOSES ENDANGERED SPECIES TRAFFICKING. The E&E Daily (7/9) reports that “former NBA star Yao Ming is taking a stand against illegal wildlife trafficking.” Yao is “working with high-ranking US and Chinese officials to fight the illicit global trade in endangered species and their parts.” The article notes that Yao has also “worked to lower the consumption of shark fin soup and the use of elephant ivory.”

LAS VEGAS PAPER: REID SHOULD ENSURE SAGE GROUSE DOESN'T GET FEDERAL PROTECTION. The Las Vegas Review-Journal (7/9, 437K) in an editorial says debate over whether sage grouse should be listed as a threatened or endangered species next year has made Senate Majority Leader Harry Reid a potential one as well. This is because the issue has become contested in close Senate races in Montana and Colorado, which could decide whether Democrats keep their Senate majority and Reid keeps his title as their leader. The paper urges Reid to help keep the bird off protected lists for the sake of his political career.

US Geological Survey:

USGS SEEKS APPLICANTS FOR “DREAM JOBS.” In its “In The Loop” blog, the Washington Post (7/10, Itkowitz, 4.22M) reports that “every career opportunity at” the USGS “promises to be your dream job.” The agency “posted 13 jobs in the past 30 days and they are all a dream, or so claims the descriptions for each opening.”

USGS POSTS TOPOGRAPHIC MAPS ONLINE. For the “Wonkblog” of the Washington Post (7/10, Badger, 4.22M), Emily Badger writes that the USGS recently “released a fantastic Web site, built with the mapping company Esri, digitizing some 178,000 of the government’s topographic maps dating going back to the 1800s.” Badger notes that “these old paper products have all been georectified, so you can layer maps from different eras on top of each other, and toggle back and forth between, say, an 1890 survey of the area that would become the Northern Virginia suburbs and the road-veined map we’d recognize today.”

PENNSYLVANIA DEP CONSIDERS RULES ON TREMORS AND FRACKING. The Pittsburgh Post-Gazette (7/8, 677K) reports that the Pennsylvania Department of Environmental Protection is “considering creating rules for the first time for wells in ‘seismic hazard areas’ — places that may be susceptible to tremors triggered by well stimulation techniques like fracking.” The agency “floated the proposal in recent weeks in a paper outlining conceptual changes to the state’s oil and gas well regulations under the heading ‘TBD – Induced seismicity.’” DEP’s chief of oil and gas compliance and data management, Joseph Lee Jr., said “the language is a placeholder for now, but the department and its partners are beginning a massive data-mining project to fill in the blanks.”

Securing America’s Energy Future:

Renewable Energy:

PROPER BALANCE BETWEEN WIND POWER AND EAGLES URGED. The Palm Springs (CA) Desert Sun (7/10, 111K) editorializes that “wind and solar energy production...impact nature and we need to know more about these evolving technologies.” It notes that “environmental groups criticized a decision by Fish and Wildlife Service to allow permits as long as 30 years.” according to the paper, “that does seem too long, although the government can take action if the number of deaths exceed the permit.” The editorial “encourages the companies that own windmills in the San Geronio Pass — where eagles have long been a majestic presence — to seek the permits so we can determine the proper balance between expanding renewable energy and protecting our treasured species.”

Onshore Energy Development:

SEN. MURKOWSKI URGES COMMERCE DEPARTMENT TO CHANGE ITS CRUDE DEFINITION. The Hill (7/9, Barron-lopez, 237K) reports that on Wednesday Sen. Lisa Murkowski urged the Commerce Department to change its 30-year-old definition of crude oil so that US producers can export it. Currently the Commerce Department treats condensates and crude oil the same, and Murkowski believes this should change. In a report she said the department needs to “align its policy with other federal agencies, allowing condensate to be exported alongside natural gas liquids and petroleum products.” Six other Federal agencies currently distinguish

between condensates and crude. The Hill (7/10, Barron-lopez, Cama, 237K) also covers the story in its "Overnight Energy" briefing.

US, CHINA SIGN AGREEMENTS ON COAL, CCS TECHNOLOGY. The E&E Daily (7/9) reports that The United States and China announced the signing of agreements on Wednesday "aimed at boosting cooperation on clean energy development and the reduction of greenhouse gas emissions." The US-China Climate Change Working Group announcement "hails eight demonstration projects – four for carbon capture and another four related to smart grids." The article notes that "both countries also agreed, the State Department said, to adopt tougher efficiency and greenhouse gas emission standards for light- and heavy-duty vehicles, and launched an initiative on climate change and forests."

CONSERVATIONISTS CONCERNED OVER CHEVRON'S ESTIMATED WATER USE. The E&E Daily (7/9) reports that "a Colorado conservation group says Chevron Corp. has provided it with the first industry estimates in years detailing the amount of water that would be needed for commercial-scale development of vast oil shale deposits in the state." Critics claim "Chevron's estimates, provided to Boulder, Colo.-based Western Resource Advocates as part of a water-rights settlement deal, justifies the concerns of government regulators and environmentalists that have warned industrial oil shale development could drain the state's already endangered water supplies." Chevron "estimates that a single 100,000-barrel-per-day (bpd) oil shale processing plant would consume as much as 7.8 billion gallons of water a year, according to a summary report and a separate supplemental report the company submitted last week to WRA." The reports also "indicated that Chevron is exploring developing as many as five aboveground oil shale processing facilities that could produce as much as 500,000 barrels of oil per day – a volume that the company estimates would require 39 billion gallons of water per year."

OP-ED: USGS STUDY PROVIDES EVIDENCE AGAINST MOUNTAINTOP REMOVAL MINING . For "The Blog" of the Huffington Post (7/10, Wasson, 11.54M), Matt Wasson, Director of Programs, Appalachian Voices, writes that a study from researchers at the USGS "published this month provides strong new evidence that mountaintop removal coal mining in Appalachia is devastating downstream fish populations." However, he notes that "a more important contribution of the study may be that it draws the focus of water pollution impacts away from mayflies and other aquatic insects and onto a far more popular and charismatic organism that not only is important to rural people's way of life, but supports a multi-billion dollar sportfishing industry in Appalachia." Wasson says that "this study should serve as a wake-up call to federal regulators that have been steadily backsliding from the Obama administration's initial commitment to put science first in agency decision-making and to rein in the widespread damage from mountaintop removal mining."

COLUMNIST CRITICIZES ANTI-FRACKING LAWSUIT. In his column for the Elko (NV) Daily Free Press (7/10, 22K), Thomas Mitchell criticizes a group called the Reese River Basin Citizens Against Fracking for filing a federal lawsuit against the BLM "in an effort to stop a scheduled lease of 230,000 acres of federally controlled land in Lander, Nye and Esmeralda counties for oil and gas drilling, saying the leases will cause 'irreparable harm to the environment, cultural treasures and aesthetic interests.'" Mitchell says that "the facts" don't support the lawsuit..

Offshore Energy Development:

STUDY FINDS DEEPWATER HORIZON SPILL OIL IN SICK FISH. Reuters (7/9, Liston) reports that a team of researchers lead by University of South Florida professor Steven Murawski says oil matching that taken from the Gulf of Mexico following the 2010 Deepwater Horizon spill has been found in the bodies of sick fish. Murawski said, "We matched up the oil in the livers and flesh with Deepwater Horizon like a fingerprint." BP said in an email it's "not possible to accurately identify" the source of the oil.

Tackling America's Water Challenges:

BOR ACCUSED OF VIOLATING LAW ON REMAINS, RELICS. The AP (7/10, Bryan) reports that the US Office of Special Counsel has directed the Interior Department to investigate whether BOR officials have violated the Native American Graves Protection and Repatriation Act "while managing collections of remains and artifacts amassed during the construction and management of dams and waterways throughout California and parts of

Nevada and Oregon." According to the article, "a whistleblower complained that the bureau in Sacramento erased records within an Interior Department database and altered spreadsheets in an effort to hide mismanagement of collections under the agency's control, resulting in hundreds of remains and artifacts being lost, boxed up for storage or loaned to museums and universities without the ability to track them." The article notes that "a filing with the Office of Special Counsel shows Patrick Williams, who used to work as a museum specialist in archaeology in the bureau's Mid-Pacific office, raised concerns with his supervisors that the agency was not complying with the law's requirements once it stopped keeping detailed records of remains and relics."

Coverage by the AP was also picked up by the [Washington Post](#) (7/10, 4.22M), the [Sacramento \(CA\) Bee](#) (7/9, 687K), the [Miami Herald](#) (7/10, Bryan, 822K), the [Albuquerque \(NM\) Journal](#) (7/10, 282K), the [Sun City \(AZ\) Daily Sun](#) (7/10, 18K), [ABC News](#) (7/10, 3.58M), the [US News & World Report](#) (7/9, 645K), and [Yahoo!](#) (7/10, Bryan, 17.91M).

DROUGHT DROPS WATER LEVELS AT LAKE MEAD RESERVOIR TO HISTORIC LOWS. The [E&E Daily](#) (7/9) reports that on Tuesday, a spokeswoman for the BOR's Lower Colorado Region "confirmed that in the midst of a 14-year drought, Lake Mead this week will likely reach the lowest water level since it was first filled in 1937, 1,081.75 feet above sea level." The bureau "projected this would occur in a June forecast." The BOR "anticipates the reservoir's levels will get down to 1,080.82 feet by the end of the month and 1,080 feet by November."

Also reporting on the story are the [AP](#) (7/10), [Bloomberg News](#) (7/10, Nash, 2.76M), [Fox News](#) (7/9, 6.72M), and [KJZZ-FM Phoenix](#) (7/10, 10K). Coverage by the AP was also picked up by the [Huffington Post](#) (7/9, 11.54M) and the [Cache Valley \(UT\) Daily](#) (7/10, 639).

BOR DISCUSSING MITIGATION PLANS FOR BLACK CANYON RESERVOIR. The [Emmett \(ID\) Messenger-Index](#) (7/10, 22K) reports that the BOR "met with biologists from the Idaho Department of Fish and Game July 1, to continue discussion for mitigation plans for the Black Canyon Reservoir and the lower Payette River, according to BOR Public Affairs Specialist Kelly Bridges." The article notes that "the mitigation is a result of a problem that occurred in 2013 when the BOR drew water levels down in the Black Canyon Diversion Dam as part of the scheduled construction plan of a third hydroelectric generating unit."

NYTIMES: STRONGER WATER CONSERVATION MEASURES NEEDED IN CALIFORNIA. An editorial in the [New York Times](#) (7/10, Subscription Publication, 9.65M) note that California is in the third year of a drought but residents and businesses are doing little to curb their water usage. The Times calls for "much stronger conservation measures," and urges Gov. Jerry Brown's Administration to "think a lot bigger than emergency aid aimed at a single drought." the Times argues that the state should "focus on longer-term policies that encourage people to alter their lifestyles and businesses to change how they operate."

BAY DELTA CONSERVATION PLAN CRITICIZED. In an op-ed for the [Chico \(CA\) News and Review](#) (7/10, 101K), Carol Perkins, a water policy analyst for the Butte Environmental Council, criticizes the Bay Delta Conservation Plan as "ill-conceived." Under the plan Perkins claims, "Big Ag and Big Oil will get more water, you get the bill."

Empowering Native American Communities:

MORE TRIBAL NATIONS SIGN AGREEMENTS TO REDUCE LAND FRACTIONATION. The [Native American Times](#) (7/10, 337) reports that "in the latest step in the successful implementation of the Land Buy-Back Program for Tribal Nations (Buy-Back Program)," Deputy Secretary of the Interior Michael Connor has "announced that the Department has signed three additional agreements with tribal nations in Montana to facilitate the purchase of individual interests in fractionated trust lands and consolidate ownership for the tribes with jurisdiction." The article notes that "agreements with Crow Tribe, Fort Belknap Indian Community, and the Assiniboine and Sioux Tribes of the Fort Peck Indian Reservation detail what each tribal government will do to help implement the Buy Back Program and provide resources to facilitate outreach and education, and solicit interest from owners." Connor said, "President Obama has made clear his commitment to help strengthen Native American communities and I am proud that today we are continuing that momentum with the steady implementation of the Buy-Back Program. I want to thank the Crow Tribe, Fort Belknap Indian Community, and the Assiniboine and Sioux Tribes of the Fort Peck Indian Reservation for their partnership as we work together to ensure individuals

are aware of this historic opportunity to strengthen tribal sovereignty by supporting the consolidation of tribal lands for the benefit of each tribal nation.”

COURT ASKED TO DISMISS WYANDOTTE LAWSUIT. The Topeka (KS) Capital-Journal (7/9, 177K) reports that “the government has asked a federal judge to dismiss as moot the last remaining claim in a lawsuit filed by an Oklahoma tribe seeking to build a casino on suburban Wichita land.” The Interior Department “officially notified the court Tuesday that it rejected the Wyandotte Nation’s application to take the land into trust so the tribe can build a casino on it.”

The Topeka (KS) Capital-Journal (7/9, 177K) reports that US District Judge Julie Robinson on Wednesday gave the Wyandotte Nation until July 19 “to show cause why the court shouldn’t dismiss the last remaining claim in their lawsuit seeking to build a casino on suburban Wichita land.”

INDIAN GAMBLING OPPONENTS BLAST PROPOSED CHANGE TO FEDERAL TRIBE RECOGNITION. The Merced (CA) Sun-Star (7/9, 119K) reports that “opponents of Indian gambling and local California officials are pushing back against a proposed federal rule that would simplify the recognition of American Indian tribes.” According to the article, “at stake is a potential surge of new casinos in the state, which critics of the federal changes argue would damage local communities.” The gambling policy group Stand Up for California “released a report Wednesday warning that lowering the historical standard for the tribal recognition would have a ripple effect in California, where 109 recognized tribes operate 71 gambling facilities and another 68 groups are awaiting decisions on their applications for federal acknowledgment.” The report “estimated that the proposed rule change could lead to the rapid recognition of 34 more Indian tribes in California, resulting in another 22 casinos.”

MOAPA PAIUTE LEADER SAYS RESERVATION ADDITION WOULD ENABLE SOLAR EXPANSION. The Las Vegas Review-Journal (7/10, 437K) reports that the leader of the Moapa Band of Paiutes told Congress on Wednesday that adding land to the tribe’s Southern Nevada reservation would allow it to expand further into solar energy. The bill, sponsored by Sen. Harry Reid, has received support from the Obama Administration. Michael Black, director of the BIA, said it endorsed the legislation as long as it can be amended to ensure the transfer does not disturb an energy transmission corridor and the historical Old Spanish Trail that cross portions of the new tribal property.

OBAMA ADMINISTRATION’S “BLUEPRINT FOR REFORM” SEEKS BETTER EDUCATION FOR BIE STUDENTS. In an op-ed for the Albuquerque (NM) Journal (7/10, 282K), Charles M. “Monty” Roessel, a member of the Navajo Nation, writes that “after numerous listening sessions and tribal consultations,” the Obama Administration “released a ‘Blueprint for Reform,’ a comprehensive plan to redesign the BIE to achieve one overarching, mutual goal for the BIE and tribes: for tribes to deliver a world-class education to all students attending BIE schools.” Roessel says that “Native Americans can have confidence in the administration’s plan because it has as its cornerstone an effort to elevate the factor that contributes most to student success in school – teaching.”

Meanwhile, on Blog Talk Radio (7/8), Jolyn Rose, the Principal of Sequoyah High School, discussed the ways that Board Certification fit with their Native Schools efforts to improve outcomes for students.

Top National News:

DEMOCRATS URGE OBAMA TO WITNESS BORDER CRISIS FIRSTHAND. President Obama’s trip to Texas and his meeting with Texas Gov. Rick Perry on the border crisis ensure that the debate over illegal immigration remained the focus of the national media. As was the case on Tuesday evening, all three network newscasts had segments on various aspects of the controversy, and NBC Nightly News (7/9, lead story, 3:15, 7.86M) led with a report on the political backlash that President Obama incurred by choosing not to visit the US-Mexico border while he was in Texas. Many reports and analyses emphasize that the President is being criticized by Democrats, as well as Republicans, for not personally witnessing the situation on the ground in the Texas border region.

According to the AP (7/10, Werner), “the political pressures on the president appeared to grow from all sides, as...even some Democrats began to join GOP demands for him to visit the U.S.-Mexican border.” On MSNBC’s

Hardball (7/9, 689K), Chris Matthews said, "It's an odd situation for the President to be briefed by a political adversary" – Perry – "about what he should be doing at the border...instead of going for first-hand information himself – it seems to me a weird situation politically for the President."

At the opening of NBC Nightly News (7/9, lead story, 3:15, 7.86M), Brian Williams said the President "is in Texas, so close and yet so far from an...exploding humanitarian crisis, with people pouring over the southern US border by the tens of thousands." Chris Jansing went on to report that when he landed in Dallas, the President "walked into a political firestorm over his decision not to travel to the border" in between a series of fundraisers, and "even something as seemingly simple as a visit to a bar to shoot some pool and have a beer with Colorado's governor was fuel for his critics, including a fellow Democrat." Rep. Henry Cuellar was shown saying, "I hate to use the word 'bizarre,' but under the circumstances, when he is shown playing pool in Colorado, drinking a beer – and he can't even go 242 miles to the Texas border?"

In a front-page article, the Washington Post (7/10, A1, Zezima, Nakamura, 4.22M) reports that on Wednesday, the President "forcefully defended his decision not to visit the Texas border with Mexico to view a burgeoning humanitarian crisis, saying he's 'not interested in photo ops.'" However, according to the Post, the President is "under mounting pressure from members of both parties to view the border situation firsthand." The Post notes that Rep. Filemon Vela said on Wednesday, "If he's not going today, he should go sometime very soon."

Under the headline "Democrats Slam Obama For Avoiding Border In Texas," Roll Call (7/9, Dumain, Bowman, Subscription Publication, 76K) reported that on Wednesday, both Democrats and Republicans urged the President "to take charge of a more robust federal response," and, according to Roll Call, "the political conversation...centered on whether the president is somehow abdicating leadership on the crisis." Roll Call notes that Rep. Luis Gutiérrez said, "Going to a fundraiser in Texas is like going on vacation. I have family members who are ill and in the hospital. I think I should go down and visit them in Puerto Rico, not go on vacation there."

In an article for BuzzFeed (7/10, 10.34M) titled "Growing Chorus Of Democrats Want Obama To Make Border Trip," Kate Nocera reported that "the number of Democratic lawmakers calling for a visit is growing, although many did not want to criticize the president on the record." Nocera adds, "Privately, several Democrats" said it was "confusing," "baffling," and "a little offensive" that the President chose not to go. An anonymous "Texas Democrat" is quoted as saying, "I really don't know what he's thinking. He just should go."

Politico (7/10, Topaz, 637K) reported that in an appearance on CNN on Wednesday, Cuellar said, "If he had time, with all due respect, to have a beer and play pool like he did in Colorado last night, then I think after the fundraisers he should make time to go down there." On the other hand, Politico (7/10, Topaz, 637K) also reported that Sen. Jon Tester "defended the president's decision not to visit the border," saying, "I don't think it's necessary, quite frankly." But Dana Milbank, in his column for the Washington Post (7/10, 4.22M), says it is "inexplicable that Obama is avoiding a visit to the border" because, according to Milbank, "his absence makes it appear that he is hiding from the issue, giving his critics a free shot."

The AP (7/10, Pace) reports that the President is "resisting calls to visit the U.S.-Mexico border," and the "roundtable in Dallas is seen by the White House as a way to address the immigration issue while avoiding awkward optics at the border." The AP says the President's decision "is likely to provide more fodder for the Republicans and the handful of Democrats who say the president hasn't responded quickly and forcefully enough to the mounting crisis." According to the AP, "Even immigrant advocates, who say Obama's response has been too focused on enhancing enforcement and deportation, said he would benefit from" a trip to the border.

The Los Angeles Times (7/10, Hennessy-Fiske, Parsons, 3.46M) reports that in Texas, the President "faced sharp criticism for his immigration policies," and notes that when "pressed to explain why he isn't visiting Border Patrol stations or detention facilities during his two-day visit to Texas, he said that Homeland Security Secretary Jeh Johnson has visited the border five times recently 'at my direction.'"

USA Today (7/10, Jervis, 5.82M) reports that on Wednesday, Perry "focused on securing the border, once again urging the president to deploy National Guard troops to beef up security there." USA Today notes that after meeting with Perry, the President said, "There's nothing that the governor indicated he'd like to see that I have a philosophical objection to."

The Houston Chronicle (7/10, Ward, 2.23M) reports that the President and Perry "met on Marine One...as Obama was en route from Dallas-Fort Worth International Airport and Love Field, where both men attended a closed-door meeting on the humanitarian border crisis with Dallas officials" including Mayor Mike Rawlings and Rep. Eddie Bernice Johnson.

Politico (7/9, Glueck, 637K) reported that on Fox News on Wednesday night, Perry said that when he was with the President on Marine One, he said, "Mr. President, I really want you to come and see this because this is important for you to absorb as a father, but more importantly as president of the United States."

Republicans Dismiss Obama's Request For Funds To Care For And Process Illegal Immigrants. In a very brief item for ABC World News (7/9, story 6, 0:20), Diane Sawyer said that on Wednesday, the President was in Dallas, "500 miles from the border and face-to-face with some of his critics, including" Perry. Scott Pelley, on the CBS Evening News (7/9, story 4, 2:10, 5.08M), reported that "thousands of illegal immigrant children [are] surging into the US," and Major Garrett went on to report from Dallas that the President has "blamed part of the border problem on House Republican opposition to an immigration bill passed by the Senate," and is "asking Congress for immediate authority to speed the deportation process."

The New York Times (7/10, A18, Calmes, Shear, Subscription Publication, 9.65M) reports that on Wednesday, the President "directly challenged" Perry "to rally Republicans in support of a \$3.7 billion emergency measure" that he says "would address Republicans' calls for increased border security while also providing care for the thousands of unaccompanied children who have been detained in the Rio Grande Valley." However, the Times adds that the President also "suggested that election-year political maneuvering would block the package because Republicans would see the crisis as a way to damage him and his party."

The Wall Street Journal (7/10, Nelson, Subscription Publication, 5.51M) reports that on Wednesday evening, the President said, "The problem here is not major disagreement around the actions that could be helpful in dealing with the problem. The challenge is: Is Congress prepared to act to provide the resources to get this done?"

But Reuters (7/10, Mason, Lawder) reports that Rep. Mario Diaz-Balart, one of the most prominent Republican supporters of comprehensive immigration reform, said, "The House is not going to just rubber-stamp what the administration wants to do." Rep. Mick Mulvaney, another comprehensive immigration reform backer, said the President "has set it up to make it look as though the only reason he's not enforcing the border is because he doesn't have the money," although, according to Mulvaney, "that's not accurate."

Politico (7/9, Dove, Glueck, 637K) reported that in his remarks Wednesday evening, the President "offered...essentially, the Obama-Perry border crisis plan – at least according to Obama" – and said "it's up to Perry to convince Texas Republicans, whom he said should then bring along the rest of Congressional Republicans." However, in an op-ed for USA Today (7/10, 5.82M), Perry objects to the fact that "of the \$3.7 billion in President Obama's request, only \$68.4 million – or 1.8% – is directly dedicated to border security efforts."

The AP (7/10, Werner) reports that "immigration advocacy groups attacked the spending request from the left, saying it was overly focused on enforcement." However, The Hill (7/10, Lillis, 237K) reported that Rep. Xavier Becerra, the chairman of the House Democratic Caucus, "emerged from a closed-door meeting of the group on Wednesday to say there's 'a general consensus' that Congress should pass Obama's \$3.7 billion package immediately."

USA Today (7/10, 5.82M), in an editorial, says Republicans "have numerous rationales, none of them convincing, for spurning Obama's proposal." USA Today accuses Republicans of hoping "to let a problem fester for political reasons."

CBS News Cites Study That Found 40% Of Minors In US Illegally Are Eligible To Stay. On the CBS Evening News (7/9, story 5, 2:20, Pelley, 5.08M), Michelle Miller reported that "under a law signed by President George W. Bush, unaccompanied children cannot be deported without a hearing," and, "according to a non-partisan Policy Institute study, at least 40 percent of children who are here illegally may be eligible to stay," and "minors with legal assistance significantly improve the odds of winning their case."

However, the Washington Times (7/10, Dinan, 455K) reports that on Wednesday, "administration officials said

only about half of all juveniles show up for their deportation hearings...meaning the rest of them disappear into the shadows with the more than 11 million illegal immigrants already here." The Times notes that Acting Assistant HHS Secretary Mark Greenberg acknowledged that HHS "has a policy that bans social workers from asking the legal status of parents who come to claim their children," which "means many of the children are turned over to illegal immigrants, who themselves have an incentive not to bring their children back for deportation hearings."

Politico: Obama Under Pressure To "Grant Temporary Legal Status To The Almost 10 Million Undocumented Immigrants." In an article published Wednesday morning, Politico (7/10, Brown, Dove, 637K) reported that "Hispanic lawmakers and reform advocates" want the President to "grant temporary legal status to the almost 10 million undocumented immigrants who would have qualified under a bill passed last year by the Senate," and "have made the demand in meetings with Obama and aides, in memos to top Homeland Security officials and through the Spanish-language media."

Perry Warned Obama About The Border Crisis In 2012. On the CBS Evening News (7/9, story 4, 2:10, 5.08M), Major Garrett reported from Dallas that in 2012, Gov. Perry "warned the White House this crisis was coming." Garrett noted that "at that time, Perry noted 5,200 children from Honduras, El Salvador and Guatemala were in Texas," but "now the estimated number is ten times as large." The Washington Post (7/10, Nakamura, 4.22M) notes Perry's apparent prescience in an online article titled "Before Border Crisis Peaked, Texas Governor Warned Obama Administration."

NYTimes A1: US Policies Give Hondurans An Incentive To Escape Gang Violence. In a front-page article titled "Fleeing Gangs, Children Head To U.S. Border," the New York Times (7/10, A1, Robles, Subscription Publication, 9.65M) reports from San Pedro Sula, "Honduras's most dangerous city," that "a surge in gang violence" is "a major factor driving the recent wave of migration of Central American children to the United States." According to the Times, "Many children and parents say the rush of new migrants stems from a belief that United States immigration policy offers preferential treatment to minors." The Times adds that "studies of Border Patrol statistics show a strong correlation between cities like San Pedro Sula with high homicide rates and swarms of youngsters taking off for the United States."

The AP (7/10, Werner) reports that on Wednesday, "senior Obama administration officials testified" that "tens of thousands of children streaming from chaotic Central American nations to the U.S. border have overwhelmed the government's ability to respond."

The Palm Springs (CA) Desert Sun (7/10, 111K) reports that "about 140 undocumented immigrants are being transported to El Centro, Calif., and San Diego every three days...as a way to alleviate overwhelmed Border Patrol stations in the Rio Grande Valley." The Desert Sun notes that "none of the scheduled groups of 140 women and children have reached the Murrieta station," where, on July 1, "protesters...blocked about 140 undocumented women and children who were flown and bused from Texas and set to be processed."

On NBC Nightly News (7/9, story 2, 2:50, Williams, 7.86M), Miguel Almaguer reported from Mission, Texas that in 2013, "officials say they discovered 445 bodies along the southwest border," and "this year, they expect the number of children to dramatically spike."

Current Surge Of Illegal Immigration From Central America Linked To 2008 Law. The Wall Street Journal (7/10, Peterson, Subscription Publication, 5.51M) reports that some Republicans said they would consider the President's request for \$3.7 billion to deal with the border crisis more seriously if it were paired with changes to a 2008 law that bars the immediate deportation of unaccompanied minors from countries other than Canada or Mexico. Rep. Blake Farenthold is quoted as saying, "I don't think I'd vote for anything that didn't include that." The Journal notes that Rep. Joe Heck remarked, "If we're going to allow money to go to solve the current crisis, we've got to make some policy changes to make sure it doesn't recur."

Charles Lane, in his column for the Washington Post (7/10, Lane, 4.22M), says President Bush "signed the William Wilberforce Trafficking Victims Protection Reauthorization Act on Dec. 23, 2008, thinking he was fighting the global traffic in sex slaves," but now, according to Lane, "the Wilberforce Act has mutated into a source of chaos, the victims of which are children, and the greatest beneficiaries, human traffickers." Lane says the only way to stop the flow of illegal immigrants is "to permit prompt exclusion of unaccompanied Central American minors, as is already the case for Mexicans" because "only by showing people there is nothing to be gained by

paying traffickers...will the chaos cease.”

Charles Blow, in his column for the New York Times (7/10, Subscription Publication, 9.65M), writes, “If Congress wants to change or tweak the law about unaccompanied minors arriving in this country...it can, but it would be creating a ‘solution’ to a ‘problem’ that Congress itself created.”

NYTimes Criticizes Banks For Making It Harder For Immigrants To Send Money To Their Home Countries.

The New York Times (7/10, Subscription Publication, 9.65M), in an editorial, notes that in 2013, “migrants in rich countries sent an estimated \$404 billion to their families in developing countries,” but “the cost to transfer those billions is likely to rise soon” because “big banks are leaving the money-transfer business.” The Times goes on to say that while the banks claim “that regulation has become too onerous in the wake of recent settlements over money laundering,” a “more plausible explanation is that banks want out because they face dwindling profits.”

EXECUTIVE POWER LAWSUIT, IMPEACHMENT CALLS SPLIT CONSERVATIVES. Politico (7/9, French, 637K) reported that “the most conservative Republicans in the House” are “rallying behind” House Speaker Boehner’s “push to sue” President Obama although “some conservative commentators are deriding it as a waste of time,” including RedState’s Erick Erickson, who “wrote that the lawsuit is ‘nothing more than political theater and a further Republican waste of taxpayer dollars.’” On the other hand, Rep. Jason Chaffetz is quoted as saying, “It is the right move. I hear people with so much frustration with the president and his unwillingness to enforce the current law.”

The Hill (7/9, Schroeder, 237K) reported that several conservatives in the House oppose “calls for President Obama’s impeachment” and “argue an impeachment trial...could hurt Republicans in the midterm elections.” The Hill says the conservatives’ opposition is “providing cover and support” for Boehner, who has “sought to contain the chatter for impeachment,” and “on Wednesday said he disagreed with calls for Obama’s impeachment.”

The Washington Post (7/10, O’Keefe, 4.22M) reports that “Boehner’s comments came after” Sarah Palin “said Tuesday night on Fox News that the speaker’s planned lawsuit against Obama...is a weak maneuver,” and quipped, “You don’t bring a lawsuit to a gunfight.”

According to USA Today (7/10, Wolf, 5.82M), “Boehner’s plan to sue the president for going around Congress on issues such as health care, immigration and prisoner exchanges represents an unprecedented congressional reaction to arguably unprecedented presidential initiatives.” USA Today adds that the suit “may be a long shot,” and “could outlast Obama’s presidency.” The Wall Street Journal (7/10, Subscription Publication, 5.51M), in an editorial, says Palin, among others, is only helping the Administration by calling for the President’s impeachment.

GROUPS SEEKING FAITH-BASED EXEMPTION TAKE ADVANTAGE OF DELAY IN OBAMA LGBT ANTI-DISCRIMINATION ORDER.

McClatchy (7/10, Kumar, Subscription Publication, 23K) reports that more than three weeks after President Obama announced that he would “sign a long-sought executive order prohibiting companies that do government work from discriminating on the basis of sexual orientation or gender identity,” he has yet to do so, and religious groups “have seized on the unusual delay” to press the White House to exclude faith-based institutions from the order. The President “now finds himself caught between gay rights organizations and faith-based groups” as midterm elections near.

Christian College That Sought Exemption Says It Will Not Discriminate. The Washington Post (7/10, Phillip, 4.22M) reports that Gordon College, “a small Christian college in Massachusetts,” was the only school to join religious groups and charities in signing a letter asking Obama for the exemption. But the school says it does not intend to discriminate against LGBT people. College President D. Michael Lindsay said in an open letter to the school community. “We have never barred categories of individuals from our campus and have no intention to do so now.”

US Funded Ugandan Groups That Backed Anti-Gay Legislation. The Nation (7/9, Kopsa, 585K) wrote that one month after Ugandan President Yoweri Museveni signed a bill “making homosexuality a crime punishable by life in prison,” the Obama Administration announced an increase in military aid to Uganda, which led to criticism from human rights groups. On the day of the announcement, the State Department “quietly announced” that the US would redirect funds away from the Inter-Religious Council of Uganda, which, along with other State

Department grantees, had worked for passage of the anti-gay bill.

Utah To Appeal Same-Sex Marriage Ruling Directly To Supreme Court. The AP (7/10, McCombs) reports Utah has opted to bypass the 10th Circuit Court of Appeals and take its challenge of a Federal appeals court ruling that permits same-sex marriages in the state directly to the Supreme Court. Utah Attorney General Sean Reyes' office said the appeal "will be filed in the coming weeks, to get 'clarity and resolution' from the highest court."

Colorado Judge Strikes Down Gay Marriage Ban, But Puts Ruling On Hold. Reuters (7/10, Coffman) reports Adams County, Colorado District Court Judge Scott Crabtree struck down the state's voter-approved gay marriage ban Wednesday, but put the ruling on hold pending appeal. The Denver Post (7/10, Steffen, 940K) says the ruling came as another state judge considered a request by the Colorado attorney general to prohibit a county clerk from issuing marriage licenses to gay couples.

Editorial Wrap-Up:

NEW YORK TIMES. "Saving Water In California." An editorial in the New York Times (7/10, Subscription Publication, 9.65M) note that California is in the third year of a drought but residents and businesses are doing little to curb their water usage. The Times calls for "much stronger conservation measures," and urges Gov. Jerry Brown's Administration to "think a lot bigger than emergency aid aimed at a single drought." the Times argues that the state should "focus on longer-term policies that encourage people to alter their lifestyles and businesses to change how they operate."

"Afghanistan's Dilemma." An editorial in the New York Times (7/10, Subscription Publication, 9.65M) says that Afghan presidential candidate Abdullah Abdullah is "pushing the country toward a dangerous point by calling the election a coup and threatening to establish a parallel government." The Times adds that "strife between the country's leading political figures will only make Afghanistan more dangerous and less stable," and calls on Abdullah to "join his opponent, Ashraf Ghani, in ensuring an outcome that Afghans can believe in." Noting that the President on Monday called Abdullah and Ghani, "to endorse a thorough review of the fraud allegations and to urge calm and dialogue," the Times says Secretary of State Kerry "must reinforce that message" when he visits Kabul this week.

"Migrants And The Middlemen." The New York Times (7/10, Subscription Publication, 9.65M), in an editorial, notes that in 2013, "migrants in rich countries sent an estimated \$404 billion to their families in developing countries," but "the cost to transfer those billions is likely to rise soon" because "big banks are leaving the money-transfer business." The Times goes on to say that while the banks claim "that regulation has become too onerous in the wake of recent settlements over money laundering," a "more plausible explanation is that banks want out because they face dwindling profits."

WASHINGTON POST. "Dousing The Fire In Gaza." In an editorial, the Washington Post (7/10, 4.22M) says that while Administration officials argue that the current crisis "proves that it was right to pursue a comprehensive Israeli-Palestinian peace settlement," it believes "the failed US effort, with its tight timetable and disregard for the obvious unwillingness of leaders on both sides, merely raised expectations that could not be met, making a backlash inevitable."

"N.J.'s Smoking Experiment." An editorial in the Washington Post (7/10, 4.22M) praises the New Jersey state Senate for approving a measure to "raise in the legal smoking age from 19 to 21." The Post notes that whether the increase will result in the predicted 30 percent decline in adult smokers "remains to be seen," but there is "no harm in trying," and if it is successful, it could "spur on the District, which has a similar bill in committee, and other states that are contemplating the move."

"Preserving Civil Rights History." The Washington Post (7/10, Board, 4.22M) editorializes that an archive of information from the 1960s civil rights movement unveiled on Monday at George Mason University in Virginia will ensure that history will not overlook the "small acts of heroism" that fueled the movement. The Post notes that the archive "displays the small journeys that make up the American experience" that, in sum, "tell an inspirational tale of a time when the fortitude, blood and extraordinary sacrifice of thousands of ordinary people forced a nation

to change.”

WALL STREET JOURNAL. “The Impeachment Delusion.” The Wall Street Journal (7/10, Subscription Publication, 5.51M), in an editorial, says Sarah Palin, among others, is only helping the Administration by calling for the President’s impeachment.

“Texas Admissions Brawl.” An editorial in the Wall Street Journal (7/10, Subscription Publication, 5.51M) notes that Texas voters have rejected officials involved in efforts to impeach University of Texas Regent Wallace Hall, who looked into political favoritism in university admissions, noting that even if some lawmakers do not agree, voters believe college admissions should be based on merit.

“Xi Jinping And Mao’s Playbook.” In an editorial, the Wall Street Journal (7/10, Subscription Publication, 5.51M) argues that while some see the anticorruption campaign undertaken by Chinese leader Xi Jinping is an indication that China’s Communist Party has softened, in reality it is an effort to by Xi to neutralize potential rivals that resembles a Maoist rectification campaign.

“Ukraine Fights Back.” The Wall Street Journal (7/10, Subscription Publication, 5.51M) in an editorial says that it is good that Ukraine is succeeding in reclaiming territory from the pro-Russia militants. It also says that US and EU policy are not responsible, but it is instead Ukraine’s president Petro Poroshenko and the army that are to be credited. It also warns that Russian President Putin has not yet decided how to react.

Washington Schedule:**TODAY'S EVENTS IN WASHINGTON.**

White House:

PRESIDENT OBAMA – The President attends a DNC roundtable, Austin, Texas, closed press; delivers remarks, Austin, Texas, pooled for television cameras and open to still photographers and correspondents; departs Austin,, open to pre-credentialed media; arrives Joint Base Andrews, out-of-town travel pool coverage; arrives at the White House South Lawn, open press. Notes: Press Secretary Josh Earnest will gaggle on location in Austin, Texas.

VICE PRESIDENT BIDEN – The Vice President will meet with His Majesty King Abdullah II at the Naval Observatory. This meeting is closed press. The Vice President will attend meetings at the White House. The Vice President and Dr. Biden will deliver remarks to the Roosevelt Institute Distinguished Public Service Awards Ceremony in Washington. The Vice President and Dr. Biden's remarks at this event will be open press.

MICHELLE OBAMA – Mrs. Obama will attend a DNC event. In New York City, First Lady Michelle Obama will visit Global Kids, Inc. to learn about its global education and digital media programs. During her recent visit to the Department of Education's Summer Learning Day event, the First Lady met with students from the Global Kids, Inc. Program. Global Kids, Inc. is a nonprofit educational organization for global learning and youth development.

This event will be covered by a pre-determined press pool. In New York City, First Lady Michelle Obama will deliver remarks at the 85th Annual League of United Latin American Citizens (LULAC) National Convention and Exposition. In her remarks, Mrs. Obama will highlight the vital role education plays in cultivating successful individuals and communities. This event is open press.

US Senate: SMALL BUSINESS LOANS – CONGRESSIONAL BRIEFING – 11 a.m. AEO hosts Congressional Briefing on the rate of small business being turned down for loans. Speakers to include: Senator Maria Cantwell (invited). Location: 428A Russell. Notes: AEO formed the Micro Capital Task Force (MCTF), a broad multi-stakeholder cross-sector collaboration, to examine the 8,000 declines/per day market failure.

COMMITTEE MEETINGS

ARMED SERVICES – 9:30 a.m. Open meeting to consider the nominations of: General Joseph F. Dunford, Jr., USMC, for reappointment to the grade of general and to be Commandant of the Marine Corps; Admiral William E. Gortney, USN, for reappointment to the grade of admiral and to be Commander, United States Northern Command/ Commander, North American Aerospace Defense Command; General John F. Campbell, USA, for reappointment to the grade of general and to be Commander, International Security Assistance Force/ Commander, United States Forces, Afghanistan; and Lieutenant General Joseph L. Votel, USA, to be general and Commander, United States Special Operations Command. The nominees will be present. Location: G-50 Dirksen.

JUDICIARY – 9:30 a.m. Business meeting to consider S.517, to promote consumer choice and wireless competition by permitting consumers to unlock mobile wireless devices, S.J.Res.19, proposing an amendment to the Constitution of the United States relating to contributions and expenditures intended to affect elections, and the nominations of Pamela Harris, of Maryland, to be United States Circuit Judge for the Fourth Circuit, Pamela Pepper, to be United States District Judge for the Eastern District of Wisconsin, Brenda K. Sannes, to be United States District Judge for the Northern District of New York, and Patricia M. McCarthy, of Maryland, and Jeri Kaylene Somers, of Virginia, both to be a Judge of the United States Court of Federal Claims. Location: 226 Dirksen.

FOREIGN RELATIONS – 10 a.m. Hearings to examine the nominations of Leslie Ann Bassett, of California, to be Ambassador to the Republic of Paraguay, and Todd D. Robinson, of New Jersey, to be Ambassador the Republic of Guatemala, both of the Department of State. Location: 419 Dirksen.

APPROPRIATIONS – 2:30 p.m. Hearings to examine proposed emergency supplemental request for fiscal year 2015 for unaccompanied children and related matters. Witnesses: Jeh Johnson, Secretary, U.S. Department of Homeland Security; Sylvia Mathews Burwell, Secretary, U.S. Department of Health and Human Services; Thomas A. Shannon, Jr., Counselor of the Department, U.S. Department of State. Location: 106 Dirksen.

INTELLIGENCE – 2:30 p.m. Meets to receive a closed briefing on certain intelligence matters. Location: 219 Hart.

US House: 10 a.m. – The House will meet for morning hour and 12:00 p.m. for legislative business.

DELAURO, TONKO – FREE TRADE AGREEMENTS – 10:15 a.m. News Conference with Reps DeLauro and Tonko on using export numbers for future free trade agreements. Location: House Triangle.

PELOSI BRIEFING – 10:45 a.m. Democratic Leader Nancy Pelosi will hold her weekly press conference. Location: HVC Studio A (Enter through HVC-117), Capitol Visitor Center.

BOEHNER BRIEFING – 11:30 a.m. House Speaker John Boehner (R-OH) will hold an on-camera press briefing. Location: Capitol Visitor Center HVC Studio A, HVC 114.

UNESCO – FREEDOM OF EXPRESSION – 12 p.m. – 2 p.m. Release of UNESCO's World Trends in Freedom of Expression and Media Development report. The report examines recent evolutions in press freedom, considered across the dimensions of media freedom, independence, pluralism and safety of journalists, and the role of gender in all four areas. Location: 121 Cannon. Contacts: George Papagiannis (georgecpapagiannis@gmail.com) , 917-310-8785. Notes: Lunch provided/program begins at 12:30p

GENETICALLY ENGINEERED LABELING BILL PROTEST – 12:30 p.m. Ben & Jerry's co-founder Jerry Greenfield joins Rep. DeFazio and members of Congress and pro-labeling advocacy groups to protest a House proposal (Deny Americans the Right to Know Act, or the DARK Act.), that would deny Americans the right to know about the genetically engineered ingredients in their food. Location: House Triangle (east side of the front of U.S. Capitol building) Contacts: Sara Sciammacco (ssciammacco@ewg.org), 202-939-9122. Notes: RSVP to ssciammacco@ewg.org

CHIMP ATTACK VICTIM – 12:30 p.m. – 1 p.m. Charla Nash will be holding a press conference on Capitol Hill on Thursday with members of Congress. Back in 2009 Nash was mauled by a pet chimp and had to undergo a face transplant. She is now advocating for a bill to be passed that would ban the interstate trade of primates as pets. Speakers: Charla Nash Wayne Pacelle, President and CEO, The Humane Society of the United States; Kate Dylewsky, Program Associate, Born Free USA Rep. Michael Fitzpatrick, R-PA; Rep. Earl Blumenauer, D-OR; Sen. Richard Blumenthal, D-CT. **BACKGROUND:** On Feb. 16, 2009, Charla Nash was attacked by her boss 200 pound chimpanzee in Stamford, Connecticut. Travis, the chimp, ripped off Charlas lips, nose, eyelids, hands and most of the boney structure in her mid-face. Eventually, doctors were forced to remove Charlas eyes because of an infection passed on through the chimpanzee. In May 2011, Charla became one of the first people in the world to undergo a face transplant. Location: U.S. Capitol Visitor Center HVC 201 A&B. Notes: Credential media only. Must RSVP: Naseem Amini, 240-778-5545, namini@humanesociety.org

LWCF and Fire memo

Harding, Stephenne <stephenne_harding@ios.doi.gov>

Sun, Jul 20, 2014 at 5:49 PM

To: Sally Jewell (b)(6)@ios.doi.gov

Cc: Sarah Neimeyer <sarah_Neimeyer@ios.doi.gov>, Nicole Buffa <nicole_buffa@ios.doi.gov>, Elizabeth Ossowski <elizabeth_Ossowski@ios.doi.gov>

Sally—

Attached is an overview memo for your meetings on the hill this week and next regarding LWCF and Fire. We have time schedule tomorrow morning to discuss any questions you have.

Cheers,

Stephenne & Sarah

Fire and LWCF hill meeting memo 7.21.14.docx
26K

**EVENT MEMORANDUM FOR THE SECRETARY
CONGRESSIONAL OUTREACH MEETINGS ON LWCF AND FIRE FIX**

DATE: July 22nd and 23rd 2014
LOCATION: Congress: House and Senate
TIME: See AGENDA
FROM: Stephenne Harding, OCL; 208-6174
Sarah Neimeyer, OCL; 208-5557

I. PURPOSE

The purpose of these meeting is to highlight two of your legislative priorities—full funding of LWCF and the fire fix—and work on building congressional relationships to support them. This series of meetings is generally with members who support LWCF and the fire fix. July 23rd is the 50th anniversary of LWCF passing the House, so it provides a relevant hook to discuss the need to reauthorize LWCF. The Anniversary of both LWCF and the Wilderness Act being signed into law is September 3rd, 2014.

II. PARTICIPANTS

YOU

Sarah Neimeyer, Director, OCL
Stephenne Harding, Deputy Director, OCL

III. AGENDA

Tuesday, July 22

11:30 am Senator Mark Udall
12:00 pm Senator Orin Hatch
2:00 pm Minority Leader Nancy Pelosi
3:00 pm Senator Ron Wyden

Wednesday, July 23

12:00 pm Senator Mike Crapo
1:00 pm Congressman Mike Simpson
1:30 pm Congressman Peter DeFazio
2:30 pm Remarks at the Sportsmen's LWCF event
3:00 pm Congressman Stenny Hoyer

Tuesday July 29

3:15 pm Senator Rob Portman
4:30 pm Congressman Rob Bishop

IV. KEY FACTS/HOT TOPICS (IF APPLICABLE)

Beyond LWCF and the fire fix, certain members may raise parochial issues they have in their states. Below are some of the topics likely to be raised. As we hear about more we'll flag.

Senator Mark Udall

Vermillion Basin Monument Designation: In May, Bruce Babbitt said that the Vermillion Basin is a place the President should consider for monument designation in a High Country News op-ed. This raised the ire of many locals in Colorado who are pushing for Senator Udall to voice opposition to the idea. He may raise the issue, so he can say he has spoken to you about the need for local support and engagement before any decisions are made.

Sage Grouse: Senator Udall is also likely to raise his concerns about Greater and Gunnison Sage Grouse. Specifically he will want to assure there is not a 4(d) rule published on Gunnison before the election and discuss the current state of play for Greater Sage Grouse, which state of Colorado is concerned about FWS's suggested conservation measures to the states. You are likely to hear they want more flexibility and a more transparent relationship between the state and FWS and he may also ask you to come back to Colorado and hear more from locals who do not feel like the FWS is listening to them.

Oil Shale Rule: Senator Udall wants BLM's Oil Shale rule finalized, but due to the large number of rules that BLM is working on with a limited number of regulatory staff, it is not likely to happen until November. Senator Udall is supportive of BLM's narrowed oil shale leasing for R&D and would like to have that finalized.

Minority Leader Nancy Pelosi:

California Water: Minority Leader Pelosi's staff highlighted that they may want to discuss the current drought situation in California. She criticized the passage of the Sacramento-San Joaquin Valley Emergency Water Delivery Act (H.R. 3964) as a partisan piece of legislation that does not look at comprehensive solutions.

IV. TALKING POINTS/REMARKS

FIRE:

- We cannot wait another fire season to get a rational budgeting process for fire—we need to pass the fire fix this congress.
- You have been a champion for this and we need your continued leadership to pass this fix.
- There are a number of vehicles to add this to—or bring it to the floor as a standalone—and I'd like to work with you to get this over the finish line.
- Having come from a career in the private sector, one of the biggest surprises I found was that we are in the 'forever' business – and Americans expect us to manage our public lands for eternity – yet we do so with short-term budgets that provide very little certainty and predictability to help us carry out our missions.
- With wildland fire seasons becoming longer and more intense, we can't follow the status quo when it comes to budgets.

If more details are needed:

- We budget for fire costs using a ten-year average of fire suppression costs. Yet, in a peak season with catastrophic fires, we are forced to move funding from programs across the Interior and U.S. Forest Service budgets to meet the increased costs.

- In 2012, Interior's fire suppression costs were **23 percent higher** than the ten-year average calculation, requiring the Department to transfer funds from other important accounts – including fire preparedness, fuels management, and fire restoration funds.
- In 2013, Interior and Forest Service **redirected or borrowed more than \$650 million** to fund increased firefighting costs. Over the last ten years, the two agencies have spent one-third more than was budgeted for firefighting.
- Borrowing from fire and resource programs to fund emergency suppression just doesn't make sense.
- Modeled on the Federal Emergency Management Disaster Relief program, the proposal would change how fire suppression costs are budgeted to treat funding of extreme wildfire seasons in the same way other emergency disaster needs are met.
- The proposal would create a new wildfire cap adjustment – a ceiling, not a funding target – to fund the most severe one percent of fires. **It's worth emphasizing that the most severe one percent of fires cause 30 percent of the annual suppression costs.**

LWCF:

- Land and Water Conservation Fund not only improves our quality of life and supports our local economies, but it is also **the way we leave a legacy behind for our children and grandchildren**
- LWCF helps support a **\$646 billion recreation economy** and one analysis found that for **every dollar invested it returns four to the local economy**. That is a positive for all communities.
- **LWCF funds have been spent in every county** across the country since 1964. This is not a fund that helps a few states or localities, but rather it helps across the nation.
- I understand it is difficult for and LWCF full funding bill to come to the floor as a standalone.
- I am told there are a number of proposals floating to combine LWCF with other mandatory programs (such as SRS and PILT) and I am here to work with you to fully fund LWCF and so we can continue this important program.
- I believe we have a large enough coalition to help make this a reality and I'd like to work with you to achieve it.

Additional LWCF facts:

- Land and Water Conservation Fund Act passed in 1964 by a **visionary, bipartisan Congress**, and signed into law by President Lyndon Johnson
- For past 50 years, the Land and Water Conservation Fund has invested a small part of the revenue produced from oil and gas drilling offshore to provide recreational opportunities and conservation projects for all Americans to enjoy—at no cost to taxpayers.
- **Only once in its 50 year history** has it been fully funded at the authorized level of **\$900 million**
- It will expire in 2015 and **President Obama** has proposal to fully and permanently fund the Land and Water Conservation Fund

VI. (STATE OF PLAY) BACKGROUND

Fire: The fire fix was included in the Emergency Supplemental Appropriations Bill, currently before congress for consideration. On July 15h, the Senate Committee on Energy and Natural Resources held a hearing on wildfire budgeting. Days before, Senator McCain introduced an alternative proposal to the Crapo/Wyden proposal (or administration proposal). McCain's bill would require the Forest Service and the Interior Department to budget for 100 percent of what the agencies forecast will be needed to fight wildfires. It also would forbid the agencies from borrowing from non-fire accounts when suppression funding runs dry. The bill also focused heavily on forest management and removing environmental laws for timber treatment. This has created a new debate around the previously wildly supported concept of capping at 70% of the annual cost and allowing extremely large fires to be paid from the disaster cap. (b)(5)

(b)(5)

In addition, Raking Member DeFazio is working on getting a discharge petition filed with sufficient signatures to get the fire fix moved to the House floor for consideration. Currently Republicans are not signing the petition, preventing the discharge, but we are considering if there are Republicans you can ask for their signature on the petition (b)(5)

(b)(5)

LWCF: The current conventional wisdom is the only way to achieve full funding of LWCF is to pair it with a number of other necessary mandatory appropriations bills, including Secure Rural Schools and PILT. Currently Senator Wyden has a draft amendment he is waiting for the correct vehicle to attach it to. His amendment funds LWCF, PILT, SRS, creates a new funding stream for coastal resilience and a new funding stream for communities impacted by extractive resource development (to help fund infrastructure costs). All this is paid for by a change in the way we manage the Strategic Petroleum Reserve (NOT PUBLIC KNOWLEDGE). Likely this will not be considered on the floor until after the elections and most likely as an amendment to Transportation or Tax Extenders.

In the House, there is limited interest on both the Republican and Democratic sides to introduce something which would be a comprehensive package, as it is likely it would contain a number of additional provisions that would not be palatable to the conservation community, Senate or even House Democrats. Thus they are likely to wait for something to come from the Senate. Our goal is to bolster the support on both sides and find a way to play an active role in moving the idea from the sidelines into the foreground.

- **LWCF funds have been spent in every county** across the country since 1964. This is not a fund that helps a few states or localities, but rather it helps across the nation.
- I understand it is difficult for and LWCF full funding bill to come to the floor as a standalone.
- I am told there are a number of proposals floating to combine LWCF with other mandatory programs (such as SRS and PILT) and I am here to work with you to fully fund LWCF and so we can continue this important program.
- I believe we have a large enough coalition to help make this a reality and I'd like to work with you to achieve it.

Additional LWCF facts:

- Land and Water Conservation Fund Act passed in 1964 by a **visionary, bipartisan Congress**, and signed into law by President Lyndon Johnson
- For past 50 years, the Land and Water Conservation Fund has invested a small part of the revenue produced from oil and gas drilling offshore to provide recreational opportunities and conservation projects for all Americans to enjoy—at no cost to taxpayers.
- **Only once in its 50 year history** has it been fully funded at the authorized level of **\$900 million**
- It will expire in 2015 and **President Obama** has proposal to fully and permanently fund the Land and Water Conservation Fund

VI. (STATE OF PLAY) BACKGROUND

Fire: The fire fix was included in the Emergency Supplemental Appropriations Bill, currently before congress for consideration. On July 15th, the Senate Committee on Energy and Natural Resources held a hearing on wildfire budgeting. Days before, Senator McCain introduced an alternative proposal to the Crapo/Wyden proposal (or administration proposal). McCain's bill would require the Forest Service and the Interior Department to budget for 100 percent of what the agencies forecast will be needed to fight wildfires. It also would forbid the agencies from borrowing from non-fire accounts when suppression funding runs dry. The bill also focused heavily on forest management and removing environmental laws for timber treatment. This has created a new debate around the previously wildly supported concept of capping at 70% of the annual cost and allowing extremely large fires to be paid from the disaster cap. (b)(5)

(b)(5)

In addition, Raking Member DeFazio is working on getting a discharge petition filed with sufficient signatures to get the fire fix moved to the House floor for consideration. Currently Republicans are not signing the petition, preventing the discharge, but we are considering if there are Republicans you can ask for their signature on the petition. (b)(5)

(b)(5)

LWCF: The current conventional wisdom is the only way to achieve full funding of LWCF is to pair it with a number of other necessary mandatory appropriations bills, including Secure Rural Schools and PILT. Currently Senator Wyden has a draft amendment he is waiting for the correct vehicle to attach it to. His amendment funds LWCF, PILT, SRS, creates a new funding stream for coastal resilience and a new funding stream for communities impacted by extractive resource development (to help fund infrastructure costs). All this is paid for by a change in the way we manage the Strategic Petroleum Reserve (NOT PUBLIC KNOWLEDGE). Likely this will not be considered on the floor until after the elections and most likely as an amendment to Transportation or Tax Extenders.

In the House, there is limited interest on both the Republican and Democratic sides to introduce something which would be a comprehensive package, as it is likely it would contain a number of additional provisions that would not be palatable to the conservation community, Senate or even House Democrats. Thus they are likely to wait for something to come from the Senate. Our goal is to bolster the support on both sides and find a way to play an active role in moving the idea from the sidelines into the foreground.

Pelosi Statement on Passage of the Sacramento-San Joaquin Valley Emergency Water Delivery Act

Feb 5, 2014

Press Release

Contact: Drew Hammill, 202-226-7616

Washington, D.C. – Democratic Leader Nancy Pelosi released the following statement today after the House passed the Sacramento-San Joaquin Valley Emergency Water Delivery Act by a vote of 229 – 191:

“California is suffering from an historic drought that requires real, comprehensive solutions, not more political posturing. Yet today’s legislation represents another Republican attempt to create more obstacles to progress and offer fewer answers to our state’s most pressing challenges. It is the wrong step at the wrong time for California.

“This Republican bill reflects misguided priorities, undermines California’s water rights, and overrides the state’s ability to manage its own water supplies. The measure picks winners and losers in the current crisis, and fails to produce any new water to alleviate the effects of the drought. Instead, what we need is an ‘all of the above’ strategy to complement the ongoing work of state and local leaders: to encourage conservation, recycling, desalinization, off-stream storage, and additional support for the communities suffering most.

“Republican political games won’t solve California’s water crisis. Only by working together can we put forward policies that support state and local efforts, protect and expand our state’s water supply, preserve our environment and natural resources, and build a sustainable future for all Californians.”

###

What the president can do right now for conservation

by Bruce Babbitt

When a racist rancher in Nevada and his armed supporters can command headlines by claiming to own and control publicly owned lands, perhaps it's time to remind Westerners about the history of the nation's public-land heritage.

Recall that it is we, the American people, who own the public lands that make up so much of our Western states. These great open spaces are the birthright of all of us, not just the residents of Nevada or Arizona or other Western states. The question of ownership of the public lands was settled by the founding fathers, in favor of you and me, by the Maryland compromise reached in 1781, and carried forward in the property clause of Article IV in the United States Constitution.

On occasion, diehard malcontents such as Cliven Bundy emerge to promote so-called "Sagebrush Rebellions" to turn the public lands over to the states as a conduit for handing them out to resource raiders and private interests. Governors and state legislatures, most recently in Utah, are sometimes drawn into endorsing these movements, only to see them fade away in the face of public opinion.

Now, while this latest fracas is fresh in our minds, let me speak up for the employees of the Bureau of Land Management who have been demonized by Fox newsman Sean Hannity and threatened by rancher Cliven Bundy and his followers. BLM staffers are dedicated public servants who struggle with the unenviable task of juggling the conflicting demands of ranchers, miners, oil and gas companies, sportsmen and conservationists. They deserve our respect and our gratitude.

I believe that the whole sorry Bundy episode has given us an opportunity to renew our commitment to conservation. We can do that by calling on President Obama to take action to protect more of the special places on our public lands.

He can begin by using the Antiquities Act to establish more national monuments. Some may counsel caution in light of the recent House passage of a bill by Utah Republican Rep. Rob Bishop to gut the law. However, the best way to protect and preserve the Antiquities Act is to use it visibly and vigorously, thereby demonstrating once again the broad public support it has enjoyed for more than 100 years.

The president could start with California Democratic Sen. Dianne Feinstein's bill to protect a million acres in the Mojave Desert of California. Or he could take up Maine Democratic Rep. Mike Michaud's bill to protect the scores of small islands that host seabird colonies off the coast of Maine. The president can use his authority under the Antiquities Act to take these bills and their establishing language and designate the lands in questions as new national monuments.

President Obama could also review the list of our existing national parks and monuments, many of which are in need of expansion because these areas are threatened by encroaching strip mining, drilling or other incompatible development. He could start out in the majestic expanses

of southern Utah, where Canyonlands, Arches and Capitol Reef national parks all need additional lands to protect their archaeological sites and unique geological formations.

And at Yellowstone National Park, the migratory herds of bison, elk and other wildlife all need more space, which can be best obtained by designating the forest lands to the West as a national monument. There are many other areas where local residents are voicing support for new national monuments, including the Boulder-White Cloud Mountains in Idaho, the Vermillion Basin in Colorado and the Owyhee Canyons in Oregon.

The president also has the authority to add lands to our National Wildlife Refuge System. There is an urgent need to create a system of refuges to protect the endangered greater sage grouse that inhabits the sagebrush seas that stretch across public lands in seven Western states.

In addition, the Antiquities Act could be used to protect fisheries and endangered coral system in our marine waters. Bristol Bay off western Alaska is the most prolific of our fisheries, the passage through which millions of salmon migrate to spawn throughout the river systems of Alaska. The little-known deep-water corals adjoining the Pribilof Islands in the Bering Sea also deserve enhanced protection.

There is much to be done, and President Obama should not wait until the eleventh hour to act. He should start now by advancing proposals, explaining the urgency of conservation, generating the visibility of the issues at stake and asking all Americans to voice their opinions. He should invite Congress to take legislative action, making it clear that he will act if it doesn't.

A robust conservation program, following in the tradition begun by President Theodore Roosevelt, will be an enduring accomplishment for President Obama, a gift to future generations from his time in office.

Bruce Babbitt, former Interior Department secretary appointed by President Bill Clinton, is a contributor to Writers on the Range, a column service of High Country News. He lives in Washington, D.C., where he is working on conservation planning in the Amazon River Basin as a fellow of the Blue Moon Fund.

Sally-

I've added 4 memos for your four meetings tomorrow. These are long than a page, as they include examples of projects in each state for LWCF which are success stories (thanks to Sarah P.), a short fire summary and I&E facts.

I've also added the full chart of funding per state for all the LWCF programs since 1965. I've also added each state's numbers in your memos.

Let me know if you have any questions.

Cheers,

Stephenne

**EVENT MEMORANDUM FOR THE SECRETARY
MEETING WITH SENATOR RON WYDEN**

DATE: July 22, 2014
LOCATION: Dirksen 221
TIME: 3:00 am EST
FROM: Stephenne Harding, OCL

I. QUESTIONS

- What can I do to support your LWCF amendment?
- Hatch? What can I do to help there? House?
- LWCF as an amendment to Transportation?
- How can we work to get Republican support? (payfor?)
- Can we bring a fire fix to the floor in the Senate? (Is the Budget Point of Order too much of a problem to get 60 votes?)
- Must separate Fire fix and forestry issues.
- Initiating in the Senate for Fire and LWCF?

II. LWCF FUNDING FOR OREGON

Federal \$176 million

State \$59.1 million

Forest Legacy \$9.0 million

HCP \$7.5 million

OREGON TOTAL: \$251.6 million

III. PARAOCHIAL ISSUES

No flagged issues

IV. SUCCESS STORIES:

Nestucca Bay National Wildlife Refuge, Oregon (FWS) - Recreation

At Nestucca Bay National Wildlife Refuge, located on Oregon's coast just two hours from Portland, salt marsh, brackish marsh, wetlands along lakes and rivers, and wooded upland habitats offer sanctuary to a diverse array of fish and wildlife, including waterfowl, shorebirds, raptors, small mammals, amphibians, and anadromous fish. Each year, several million seabirds breed at the Refuge. The Refuge also provides wintering habitat for the coastal population of Dusky Canada geese and the entire population of Semidi Islands Aleutian Canada geese. Peregrine falcons and bald eagles hunt the nesting seabirds and waterfowl that migrate along the coast in summer. The refuge is also a valued close-to-home outdoor classroom and recreation area, welcoming students and visitors to enjoy the refuge's shoreline, hiking and walking trails, and outstanding wildlife viewing areas. Through a 20XX Land and Water Conservation Fund investment, the Fish and Wildlife Service was able to protect an important 102-acre tract of forested headland for the refuge. Located at the confluence of the Nestucca and Little Nestucca Rivers, the property contains upland forest, shoreline, and tideland habitats, and is particularly important to seabirds along the Pacific Northwest coast. The acquisition was a

combined effort of The Nature Conservancy, the Federal Highway Administration, the Oregon Department of Transportation, and the Oregon Congressional delegation.

Table Rocks ACEC (America's Great Outdoors), Oregon (BLM)- Youth & Education

On November 30, 2012 the Bureau of Land Management (BLM) completed a two-phase purchase of the 817-acre The Nature Conservancy (TNC) parcel within Table Rocks Area of Critical Environmental Concern (ACEC). The parcels were purchased with \$1,636,000 of Land and Water Conservation Fund (LWCF) appropriations from the BLM's Washington Office (WO) Emergency account. The WO Budget Office helped combine residual balances from nine unobligated LWCF accounts to meet this unanticipated funding need. The purchase was assisted by The Nature Conservancy of Oregon. Located five miles north of Medford, Oregon, Table Rocks ACEC was designated in 1984 to protect special plants and animal species, unique geologic and scenic values, and support environmental education opportunities. The Table Rocks Environmental Education Program began over 20 years ago with 100 participants and marked the beginning of a partnership between the BLM and TNC. Today, BLM and TNC host over 5,000 school children, educators, parents and other local groups on guided hikes to the summit each Spring. An additional 5,000 annual visitors hike to the summit to view uncommon wild flowers and migratory birds. This two-phase purchase consolidated 13 private lots with adjoining BLM-managed lands, guaranteeing public access from a developed BLM trailhead to Upper Table Rock's summit. Land acquisition in support of Table Rocks ACEC is a priority of the Secretary of the Interior. This project was featured in the Department of the Interior's 2012 America's Great Outdoors (AGO) initiative for BLM.

Hart Mountain NAR, Oregon (FWS)

The Service Pacific Region is in the process of acquiring 280 acres at Hart Mountain National Antelope Refuge. These acres, in four separate ownerships, will be purchased with \$58,800 of the FY 2013 Inholding appropriation. Acquisition of these tracts will conserve some of the best ecologically intact and ungrazed remnant high desert shrub-steppe habitat in the Great Basin, a high priority in the Hart Mountain Conservation Management Plan. These tracts contain core nesting habitat for the greater sage-grouse, and also provide habitat for shrub-steppe obligate migratory bird species in decline and of conservation concern. The habitat also supports other species, including Brewer's sparrow, sage sparrow, and sage thrasher, as well as mammal species, including the northern pygmy rabbit.

Acquisition of these acres removes the threat of private development that would fragment high value habitat on adjacent refuge lands, reducing their ecological value and their long term functional ability to support wildlife.

John Day River Headwaters, Malheur National Forest, Oregon, (USFS)

The John Day River is undammed along its entire length making it the longest free-flowing river system in the lower 48 states. 147 miles of the John Day River are designated as part of the Wild and Scenic River System and it is an Oregon State Scenic Waterway. It is a globally important stronghold of wild salmon and the Columbia Basin's most biologically diverse river system supporting the largest and most varied native fish populations in Oregon, with one of the few remaining exclusively wild runs of spring Chinook salmon and summer steelhead in the world. The area is home to grey wolves, Rocky Mountain elk, big horn sheep, Rocky Mountain goats,

mule deer, and black bear. It contains dedicated stands of old growth forest with habitat for pine marten, goshawk and pileated woodpeckers.

In 2013 the Forest Service worked with the Rocky Mountain Elk Foundation to protect the headwaters of the John Day River within the boundary of the Malheur National Forest. The Forest acquired 2,040 acres which helped consolidate 13,000 acres, securing 20 square miles (roughly the same size of a small American city) of unobstructed habitat for big game and other wildlife species open to hunters and anglers.

The John Day River is extremely popular for river rafting, guided fishing and other river based recreation activities and attracts thousands of people every year who enjoy the pristine environment and abundant wildlife.

V. Wyden/Simpson Wildfire Language:

- Amends the Budget Act to provide new budget authority for wildfire suppression, not to exceed \$2.689 billion in such authority for FYs 2014-FY2021;
- Defines “additional new budget authority” as the amount specified in an appropriations which exceeds 70% of the average costs for wildfire suppression operations over the previous 10 years;
- Requires 10 year average to be calculated annually and reported in the President’s Budget submission;
- Rolls wildfire suppression funding into the calculation for disaster relief funding;
- Includes requirements for prompt request by the Secretaries of the Interior or Agriculture for supplemental appropriations necessary for wildfire suppression operations.

VI. I&E FEES

- Since 2000, the BLM has permitted nearly 47,000 new wells to be drilled on public and tribal lands, and has another 6700 permits approved and ready for industry to drill. Today, the BLM oversees approximately 100,000 wells across the country – the most ever – and we must meet inspection and enforcement responsibilities on each one. Keeping up with this rising demand is an ongoing challenge.
- The current funding system limits the BLM’s ability to effectively meet this responsibility and ensure protection of both environmental and economic resources.
- Unlike in the offshore, the BLM inspection and enforcement program does not benefit from industry fees, which leaves the bureau unable to respond quickly to increases in inspection workloads.
- The BLM’s budget for oil and gas programs has fallen 15% over the past five years.
- In FY 2013 BLM inspectors made more than 33,200 inspections of lease sites
- The high-risk cases account for about 13 percent of the total wells but account for more 60 percent of the oil and gas produced on Federal and Indian mineral estates.

**EVENT MEMORANDUM FOR THE SECRETARY
MEETING WITH SENATOR MARK UDALL**

DATE: July 22, 2014
LOCATION: Hart 730
TIME: 11:30 am EST
FROM: Stephenne Harding, OCL

I. QUESTIONS

- What can I do to support an LWCF package?
- LWCF as an amendment to Transportation?
- What do you think needs to be in an LWCF Package?
- How can we work to get Republican support? (payfor?)
- Can we bring a fire fix to the floor in the Senate? (Is the Budget Point of Order too much of a problem to get 60 votes?)
- Must separate Fire fix and forestry issues.

II. LWCF FUNDING FOR COLORADO

Federal \$160 million

State \$60.1 million

Forest Legacy \$18.0 million

HCP \$1.4 million

COLORADO TOTAL: \$239.5 million

III. PARAOCHIAL ISSUES

Vermillion Basin Monument Designation: In May, Bruce Babbitt said that the Vermillion Basin is a place the President should consider for monument designation in a High Country News op-ed. This raised the ire of many locals in Colorado who are pushing for Senator Udall to voice opposition to the idea. He may raise the issue, so he can say he has spoken to you about the need for local support and engagement before any decisions are made.

Sage Grouse: Senator Udall is also likely to raise his concerns about Greater and Gunnison Sage Grouse. Specifically he will want to assure there is not a 4(d) rule published on Gunnison before the election and discuss the current state of play for Greater Sage Grouse, which state of Colorado is concerned about FWS's suggested conservation measures to the states. You are likely to hear they want more flexibility and a more transparent relationship between the state and FWS and he may also ask you to come back to Colorado and hear more from locals who do not feel like the FWS is listening to them.

Oil Shale Rule: Senator Udall wants BLM's Oil Shale rule finalized, but due to the large number of rules that BLM is working on with a limited number of regulatory staff, it is not likely to happen until November. Senator Udall is supportive of BLM's narrowed oil shale leasing for R&D and would like to have that finalized.

IV. SUCCESS STORIES: Colorado

Yampa River (America's Great Outdoors), Colorado (BLM) – Cross-Country Trails

/Recreation: In 2013, the Bureau of Land Management (BLM) utilized \$1.8 million from the Land and Water Conservation Fund to permanently protect the 920-acre Cross Mountain Ranch in northwest Colorado. With assistance from the Western Rivers Conservancy, the BLM was able to acquire the property which opens access to 88,000 acres of public land for outstanding fishing, hunting, wildlife watching and whitewater rafting opportunities. Located 50 miles west of Craig, Colorado, 10 miles from Dinosaur National Monument and sharing a 1.5-mile boundary with the Cross Mountain Wilderness Study Area, the property is bisected by over three miles of the Yampa River along its middle reach. The river provides habitat for smallmouth bass and four species of Colorado Basin warm-water fish. Abundant wildlife inhabits the area, including Rocky Mountain elk, mule deer, pronghorn, cougar, bear, raptors and numerous songbird species.

Alpine Triangle SRMA, Colorado (BLM) – Cross-Country Trails: On September 9, 2011 BLM completed fee purchase of the 225-acre Jackson property within the Alpine Triangle Special Recreation Management Area (SRMA). The parcel was purchased with \$248,000 of Land and Water Conservation Fund appropriations. The purchase was assisted by The Trust for Public Land. Located in the scenic northern San Juan Mountains in south-central Colorado the Alpine Triangle SRMA is one of Colorado's most visited multi-use, public land destinations, hosting approximately 300,000 recreational visits per year. The 65-mile Alpine Loop Back County Byway passes through the SRMA, providing access to some of North America's most magnificent scenery. The Byway begins in the historic mining town of Silverton and passes several mining "ghost" towns.

Great Sand Dunes National Park and Preserve, Colorado (NPS): Acquiring Lands for a New Park: Since its designation in 2000 as Great Sand Dunes National Park and Preserve, more than 115,000 acres have been added to the park through the collaboration of federal, state and private partners. In addition to the Great Sand Dunes system, the park includes alpine lakes, tundra, rugged peaks, ancient spruce forests, grasslands, shrublands and wetlands. *Over 300,000 visitors annually enjoy the highest dune in North America.*

Rocky Mountain National Park, Colorado (NPS): Rocky Mountain National Park will grow by 3.89 acres after the Rocky Mountain Nature Association reached a \$400,000 fundraising goal to buy the Johnson property on the west side of the park. More than 900 donors contributed to raise the funding, Park spokeswoman Kyle Patterson said in a press release. The 3.89-acre plot of land is in critical habitat and within the view-shed of the Continental Divide Trail, she said. The land was previously a private inholding within the boundaries of the park. The Rocky Mountain Nature Association will transfer the land to the National Park Service, which will remove several small structures, power lines and a one-mile access road, and return it to its natural state, Patterson said.

V. Wyden/Simpson Wildfire Language:

- Amends the Budget Act to provide new budget authority for wildfire suppression, not to exceed \$2.689 billion in such authority for FYs 2014-FY2021;
- Defines "additional new budget authority" as the amount specified in an appropriations which exceeds 70% of the average costs for wildfire suppression operations over the previous 10 years;
- Requires 10 year average to be calculated annually and reported in the President's Budget submission;

- Rolls wildfire suppression funding into the calculation for disaster relief funding;
- Includes requirements for prompt request by the Secretaries of the Interior or Agriculture for supplemental appropriations necessary for wildfire suppression operations.

VI. I&E FEES

- Since 2000, the BLM has permitted nearly 47,000 new wells to be drilled on public and tribal lands, and has another 6700 permits approved and ready for industry to drill. Today, the BLM oversees approximately 100,000 wells across the country – the most ever – and we must meet inspection and enforcement responsibilities on each one. Keeping up with this rising demand is an ongoing challenge.
- The current funding system limits the BLM’s ability to effectively meet this responsibility and ensure protection of both environmental and economic resources.
- Unlike in the offshore, the BLM inspection and enforcement program does not benefit from industry fees, which leaves the bureau unable to respond quickly to increases in inspection workloads.
- The BLM’s budget for oil and gas programs has fallen 15% over the past five years.
- In FY 2013 BLM inspectors made more than 33,200 inspections of lease sites
- The high-risk cases account for about 13 percent of the total wells but account for more 60 percent of the oil and gas produced on Federal and Indian mineral estates.

MEETING WITH CONGRESSMAN PETER DEFAZIO**

DATE: July 23, 2014
LOCATION: Rayburn 2134
TIME: 1:30 pm EST
FROM: Stephenne Harding, OCL

I. QUESTIONS

- What can I do to support your LWCF amendment?
- Hatch? What can I do to help there? House?
- LWCF as an amendment to Transportation?
- How can we work to get Republican support? (payfor?)
- Can we bring a fire fix to the floor in the Senate? (Is the Budget Point of Order too much of a problem to get 60 votes?)
- Must separate Fire fix and forestry issues.
- Initiating in the Senate for Fire and LWCF?

II. LWCF FUNDING FOR OREGON

Federal \$176 million
State \$59.1 million
Forest Legacy \$9.0 million
HCP \$7.5 million
OREGON TOTAL: \$251.6 million

III. PARAOCHIAL ISSUES

Red Hill/Nickel Mining Withdrawal: Staff for Senator Wyden and Representative DeFazio have asked the BLM to support and expedite a withdrawal of approximately 100,000 acres of federal minerals within the Rogue River-Siskiyou National Forest in Oregon. The Forest Service is the surface owner of approximately 95% of the lands so it is incumbent upon the Forest Service to make the request to DOI for a withdrawal. To date the Forest Service appears to have been reluctant to do so. The staffs have been informed that they should continue their discussions with the Forest Service.

Oregon and California Lands (O&C): Will likely discuss how important it is to get a solution on O&C in the state and that he is working with Senator Wyden on a bill. Likely will stress the need to increase harvest and decrease the time to get projects to sale and implemented. YOU should feel free to reiterated the BLM's RMP process and that the Draft RMP will come out in the fall. We're committed to that new planning effort since it has been nearly 20+ years since the last plan.

SUCCESS STORIES IN OREGON:

Nestucca Bay National Wildlife Refuge, Oregon (FWS) - Recreation

At Nestucca Bay National Wildlife Refuge, located on Oregon's coast just two hours from Portland, salt marsh, brackish marsh, wetlands along lakes and rivers, and wooded upland habitats offer sanctuary to a diverse array of fish and wildlife, including waterfowl, shorebirds,

raptors, small mammals, amphibians, and anadromous fish. Each year, several million seabirds breed at the Refuge. The Refuge also provides wintering habitat for the coastal population of Dusky Canada geese and the entire population of Semidi Islands Aleutian Canada geese.

Peregrine falcons and bald eagles hunt the nesting seabirds and waterfowl that migrate along the coast in summer. The refuge is also a valued close-to-home outdoor classroom and recreation area, welcoming students and visitors to enjoy the refuge's shoreline, hiking and walking trails, and outstanding wildlife viewing areas. Through a 20XX Land and Water Conservation Fund investment, the Fish and Wildlife Service was able to protect an important 102-acre tract of forested headland for the refuge. Located at the confluence of the Nestucca and Little Nestucca Rivers, the property contains upland forest, shoreline, and tideland habitats, and is particularly important to seabirds along the Pacific Northwest coast. The acquisition was a combined effort of The Nature Conservancy, the Federal Highway Administration, the Oregon Department of Transportation, and the Oregon Congressional delegation.

Table Rocks ACEC (America's Great Outdoors), Oregon (BLM)- Youth & Education

On November 30, 2012 the Bureau of Land Management (BLM) completed a two-phase purchase of the 817-acre The Nature Conservancy (TNC) parcel within Table Rocks Area of Critical Environmental Concern (ACEC). The parcels were purchased with \$1,636,000 of Land and Water Conservation Fund (LWCF) appropriations from the BLM's Washington Office (WO) Emergency account. The WO Budget Office helped combine residual balances from nine unobligated LWCF accounts to meet this unanticipated funding need. The purchase was assisted by The Nature Conservancy of Oregon. Located five miles north of Medford, Oregon, Table Rocks ACEC was designated in 1984 to protect special plants and animal species, unique geologic and scenic values, and support environmental education opportunities. The Table Rocks Environmental Education Program began over 20 years ago with 100 participants and marked the beginning of a partnership between the BLM and TNC. Today, BLM and TNC host over 5,000 school children, educators, parents and other local groups on guided hikes to the summit each Spring. An additional 5,000 annual visitors hike to the summit to view uncommon wild flowers and migratory birds. This two-phase purchase consolidated 13 private lots with adjoining BLM-managed lands, guaranteeing public access from a developed BLM trailhead to Upper Table Rock's summit. Land acquisition in support of Table Rocks ACEC is a priority of the Secretary of the Interior. This project was featured in the Department of the Interior's 2012 America's Great Outdoors (AGO) initiative for BLM.

Hart Mountain NAR, Oregon (FWS)

The Service Pacific Region is in the process of acquiring 280 acres at Hart Mountain National Antelope Refuge. These acres, in four separate ownerships, will be purchased with \$58,800 of the FY 2013 Inholding appropriation. Acquisition of these tracts will conserve some of the best ecologically intact and ungrazed remnant high desert shrub-steppe habitat in the Great Basin, a high priority in the Hart Mountain Conservation Management Plan. These tracts contain core nesting habitat for the greater sage-grouse, and also provide habitat for shrub-steppe obligate migratory bird species in decline and of conservation concern. The habitat also supports other species, including Brewer's sparrow, sage sparrow, and sage thrasher, as well as mammal species, including the northern pygmy rabbit.

Acquisition of these acres removes the threat of private development that would fragment high value habitat on adjacent refuge lands, reducing their ecological value and their long term functional ability to support wildlife.

John Day River Headwaters, Malheur National Forest, Oregon, (USFS)

The John Day River is undammed along its entire length making it the longest free-flowing river system in the lower 48 states. 147 miles of the John Day River are designated as part of the Wild and Scenic River System and it is an Oregon State Scenic Waterway. It is a globally important stronghold of wild salmon and the Columbia Basin's most biologically diverse river system supporting the largest and most varied native fish populations in Oregon, with one of the few remaining exclusively wild runs of spring Chinook salmon and summer steelhead in the world. The area is home to grey wolves, Rocky Mountain elk, big horn sheep, Rocky Mountain goats, mule deer, and black bear. It contains dedicated stands of old growth forest with habitat for pine marten, goshawk and pileated woodpeckers.

In 2013 the Forest Service worked with the Rocky Mountain Elk Foundation to protect the headwaters of the John Day River within the boundary of the Malheur National Forest. The Forest acquired 2,040 acres which helped consolidate 13,000 acres, securing 20 square miles (roughly the same size of a small American city) of unobstructed habitat for big game and other wildlife species open to hunters and anglers.

The John Day River is extremely popular for river rafting, guided fishing and other river based recreation activities and attracts thousands of people every year who enjoy the pristine environment and abundant wildlife.

IV.

V. Wyden/Simpson Wildfire Language:

- Amends the Budget Act to provide new budget authority for wildfire suppression, not to exceed \$2.689 billion in such authority for FYs 2014-FY2021;
- Defines "additional new budget authority" as the amount specified in an appropriations which exceeds 70% of the average costs for wildfire suppression operations over the previous 10 years;
- Requires 10 year average to be calculated annually and reported in the President's Budget submission;
- Rolls wildfire suppression funding into the calculation for disaster relief funding;
- Includes requirements for prompt request by the Secretaries of the Interior or Agriculture for supplemental appropriations necessary for wildfire suppression operations.

VI. I&E FEES

- Since 2000, the BLM has permitted nearly 47,000 new wells to be drilled on public and tribal lands, and has another 6700 permits approved and ready for industry to drill. Today, the BLM oversees approximately 100,000 wells across the country – the most ever – and we must meet inspection and enforcement responsibilities on each one. Keeping up with this rising demand is an ongoing challenge.

- The current funding system limits the BLM's ability to effectively meet this responsibility and ensure protection of both environmental and economic resources.
- Unlike in the offshore, the BLM inspection and enforcement program does not benefit from industry fees, which leaves the bureau unable to respond quickly to increases in inspection workloads.
- The BLM's budget for oil and gas programs has fallen 15% over the past five years.
- In FY 2013 BLM inspectors made more than 33,200 inspections of lease sites
- The high-risk cases account for about 13 percent of the total wells but account for more 60 percent of the oil and gas produced on Federal and Indian mineral estates.

Subject: Briefing materials for 2016 Meeting tomorrow

Dear Secretary: Here are materials for the meeting with you tomorrow morning on the 2016 budget. This is just hot off the press - present the options for your consideration.

Please note there are a few things that need a bit more work (but in the interest of time....):

(b) (5)

We will see you at 8:30 am bright and early. thanks

DOI in the News:

WILDFIRES BURN ACROSS NORTHWEST. The E&E Daily (7/22) reports that "fire crews are making an unheard-of scramble as a huge number of lightning-sparked wildfires continue to burn across drought-parched regions of Oregon and Washington." According to the Northwest Interagency Coordination Center, "there were 13 large, uncontained fires burning in Oregon" as of Monday, "consuming over 494,000 acres." And "in Washington, seven fires have burned close to 319,000 acres."

Obama Attributes Washington Wildfire To Climate Change. The AP (7/22, 4.06M) reports that according to President Barack Obama "a wildfire that has burned nearly 400 square miles in the north-central part of Washington state, along with blazes in other Western areas, can be attributed to climate change." At a fundraiser on Tuesday, Obama "offered federal help to deal with Washington's wildfire, the largest in the state's

history." Obama said that FEMA Director Craig Fugate "had authorized an emergency declaration to ensure electrical power." Obama stated, "A lot of it has to do with drought, a lot of it has to do with changing precipitation patterns and a lot of that has to do with climate change."

Senators Seek Vote On Extra Wildfire Funds. The Bend (OR) Bulletin (7/23, 94K) reports that "as wildfires continue to burn across Oregon, Sens. Jeff Merkley and Ron Wyden wrote to Senate leaders Tuesday, urging them to give a vote to the Obama administration's supplementary budget request, which includes \$615 million in emergency wildfire suppression funds." They were "joined by 10 other Democrats, mostly from Western states, in signing letters to Senate Majority Leader Harry Reid, D-Nev., and Minority Leader Mitch McConnell, R-Ky." The letter stated, "There are large active fires in many western states, and new fires starting daily. Both Oregon and Washington have declared states of emergency, acknowledging that the scope, breadth, and severity of the wildfires have overwhelmed local capabilities and pose a threat to life, safety, and property."

Congress Urged To Act. In an editorial, the Albany (OR) Democrat-Herald (7/23, 42K) notes that "Congress has yet to move on a proposal — sponsored by a bipartisan collection of lawmakers — that would move any fire suppression spending above 70 percent of the 10-year average to a disaster funding account that is separate from Forest Service and US Department of the Interior budgets." Also, "earlier this month, three Republican senators, including Arizona's John McCain, introduced a separate measure that would allow agencies to tap into emergency funds only if they completely exhaust a given year's budget." According to the paper, "in terms of their commitment to pay for the kind of work that would help to prevent future fires, both proposals would appear to be better than the system we have now." The paper urges Congress "to move swiftly, because our forests are burning now."

Additional Coverage. Additional coverage of wildfires was provided by Reuters (7/23, Cavaliere) and the AP (7/22).

SEN. UDALL: OBAMA ADMINISTRATION NOT CONSIDERING DESIGNATION FOR VERMILLION BASIN.

The Craig (CO) Daily Press (7/22, 12K) reports that Sen. Mark Udall "confirmed Tuesday that the Obama administration is not considering an Antiquities Act designation for the Vermillion Basin in Northwest Colorado, according to a press release." Interior Secretary Sally Jewell "confirmed this fact during a meeting with Udall." Udall said, "Secretary Jewell confirmed for me today that the Vermillion Basin is not in line for a national monument designation through the Antiquities Act. When exercised in close consultation with the local community, the Antiquities Act is an important tool that has been used throughout Colorado's history to preserve and protect many of the iconic public lands that strengthen our special way of life and support our outdoor-recreation economy. That said, I am glad Secretary Jewell has rebutted the rumors some lawmakers have used to create uncertainty for the residents of Northwest Colorado."

MONTANA GOV. BULLOCK PROMOTES DROUGHT MANAGEMENT EFFORT. The Ravalli (MT) Republic (7/23, 19K) reports that "under a demonstration project that is the first of its kind in the nation, federal, state and local agencies will partner to improve drought resiliency in one of Montana's major watersheds, Gov. Steve Bullock announced last week." The project seeks "to provide better data on water, snowpack and soil moisture to assist local watershed groups in developing and implementing drought plans." the article notes that "the partnership also provides \$400,000 in federal funding and matching state staff time to help farmers and irrigation districts measure and conserve water in the Upper Missouri River Basin upstream of Fort Peck Reservoir."

Coverage was also picked up by the Prairie (MT) Star (7/23).

REP. DEFAZIO SEEKS WOLF BUFFER AROUND YELLOWSTONE. The Spokane (WA) Spokesman-Review (7/22, 170K) reports that Rep. Peter DeFazio is asking the Interior Department "to work with states to curb gray wolf hunting around Yellowstone National Park in Wyoming and Montana." DeFazio said "in a recent letter to Interior Secretary Sally Jewell that hunters killing wolves just outside Yellowstone's boundary could hurt the overall health of the park's ecosystem." He asked for a "wolf safety zone" or buffer around the park.

SEN. WALSH SEEKS TO REFORM COUNTY PAYMENTS. The E&E Daily (7/22) reports that Sen. John Walsh is "hoping to reform how the federal government provides financial aid for rural and timber-dependent counties." Walsh "introduced a bill late last week that would consolidate payments in lieu of taxes (PILT), Secure Rural Schools (SRS) and Refuge Revenue Sharing (RRS) into one expanded PILT program that would provide full,

permanent funding." The legislation "seeks to provide fiscal certainty for counties – mostly in the West – which depend heavily on the federal payments to fund education, roads, trash pickup and other government services."

PILOTS USE NASA LASER TECHNOLOGY TO ANALYZE ARCTIC ICE AND SEA-LEVEL CONDITIONS. The E&E Daily (7/22) reports that "in the cockpit of an ER-2 jet with its impressive 103-foot wing span, two pilots in Alaska have been flying over the Arctic and back to help NASA scientists gather information about the relationship between melting ice and sea-level rise." The pilots use "NASA's laser and photo system to collect data on ice, water and Arctic forests." Automated equipment, the "Multiple Altimeter Beam Experimental Lidar," or MABEL, is "designed to glean data that will be used in enhancing future research on sea ice."

America's Great Outdoors:

National Park Service:

HINCHLIFFE STADIUM BILL PASSES HOUSE UNANIMOUSLY. The North Jersey (NJ) Media Group (7/23, 125K) reports that "an effort to include Hinchliffe Stadium within the boundaries of Paterson's Great Falls National Park gained momentum this week, with the House unanimously passing Rep. Bill Pascrell's legislation Tuesday and a Senate committee set to hold a hearing on Wednesday." Pascrell said, "This legislation would not place the burden of restoration or maintenance on the National Park Service. The stewardship of the National Park Service would simply provide certainty about Hinchliffe's future."

Also covering the story is the Paramus (NJ) Post (7/23).

OLYMPIC NATIONAL PARK BEGINS PROCESS TO DEVELOP MOUNTAIN GOAT MANAGEMENT PLAN. The E&E Daily (7/22) reports that Olympic National Park officials are "looking into management options for the Washington park's mountain goats, four years after one hiker was fatally gored by an aggressive goat." The NPS is "considering capturing the goats and relocating them to the nearby Cascade Mountains, increasing hazing activities, killing them or some combination of actions." Or, "the agency might also do nothing." Olympic Park spokeswoman Barbara Maynes said, "What we're starting today is a plan that would look at overall management of the population across the entire park."

HAWAIIAN FLAG DAY TO BE CELEBRATED ON NPS SITES. The Los Angeles Times (7/23, Jones, 3.42M) reports that "Hawaiians and visitors will come together on July 31 to celebrate Hawaiian Flag Day, the islands' original holiday." Hawaiian Flag Day will "be celebrated with simultaneous commemorations at five places operated by the National Park Service."

ADDITIONAL COVERAGE: REPORT SHOWS ECONOMIC IMPACT OF NATIONAL PARKS. Additional coverage of the reporting touting the economic impact of national parks was provided by the Salt Lake (UT) Tribune (7/23, 470K), the Deseret (UT) News (7/23, 538K), the Newport News (VA) Daily Press (7/22, 181K), the Richmond (VA) Times-Dispatch (7/23, 323K), the AP (7/23), the Charleston (SC) Post and Courier (7/22, 317K), WCSC-TV Charleston, SC (7/23, 22K), and KMVT-TV Twin Falls, ID (7/23, 1K).

NPS CRITICIZED FOR DRAKE BAY OYSTER COMPANY CLOSURE. For "The Blog" of the Huffington Post (7/23, Sheff, 11.54M), David Sheff writes that the issues at stake with the Drake Bay Oyster Company's fight to stay open "are larger than the survival of an oyster farm and the impact of its closure on its employees and customers, and the local economy." According to Sheff, "if this were simply a case of wilderness versus big business – an oil company threatening the fragile ecology – the decision would be a win for the environment." However, in this case, Sheff claims that "it's an example of myopic thinking by the Part Service and Interior Department."

Additional coverage of the issue was provided by the SF Weekly (7/23, 239K) and the Courthouse News (7/22, 7K).

PAPER SUPPORTS NPS DRONE POLICY. The Loveland (CO) Reporter-Herald (7/23, 52K) editorializes that "drone users may be disappointed to learn they won't be able to fly over and photograph some of the most scenic areas in America, but the Park Service has good reason to ban the unmanned aircraft." According to the paper,

"over the wilderness areas of Rocky Mountain National Park and other parks, drone use may not be appropriate," because "visitors to these areas are seeking an experience without the intrusions of modern life." It concludes that "new rules will be important for ensuring drones do no harm in our national parks."

Bureau of Land Management:

BLM, FOREST SERVICE RELEASE SAGE GROUSE REVISED DEIS. The Reno (NV) Gazette-Journal (7/22, 166K) reports that "the Humboldt-Toiyabe National Forest recently released the Revised Draft Environmental Impact Statement for the Greater Sage-grouse Bi-State Distinct Population Segment (Bi-state sage-grouse) Forest Plan Amendment." The Humboldt-Toiyabe National Forest proposes to amend the Toiyabe National Forest Land and Resource Management Plan and the BLM "proposes to amend the Carson City district and Tonopah Field Office Resource Management Plans to conserve, enhance and/or restore habitats to provide for the long-term viability of the bi-state sage-grouse." The BLM and the Forest Service "decided to prepare a revised DEIS in April after the USFWS announced the extension of the comment period for the proposed rule and has delayed the listing decision to April 2015."

WILDLIFE GROUP, CATTLE COMPANY JOIN FEDERAL WILD HORSE LAWSUIT. The Elko (NV) Daily Free Press (7/23, 22K) reports that "two more entities joined a federal lawsuit regarding wild horse policy, which demands the government round up and remove excess horses." According to the article, "in an amended complaint filed Monday, Nevada Bighorns Unlimited and Crawford Cattle were listed as plaintiffs, in addition to Nevada Association of Counties and the Nevada Farm Bureau Federation, who first filed suit in December." The plaintiffs claim the BLM is "not following the law by allowing wild horse populations to grow beyond the agency-identified carrying capacities."

BLM TO START WILD HORSE GATHER IN SOUTHERN UTAH. KCSG-TV St. George, UT (7/23, 43) reports that the BLM-Utah Cedar City Field Office will "begin a wild horse gather within the Bible Spring Complex on or about Monday, July 28, 2014." The bureau "plans to gather and remove an estimated 140 wild horses from the Blawn Wash Herd Management Area (HMA)—one of four HMAs that make up the Bible Spring Complex." The public is invited "to view the daily gather operations once they begin, provided the safety of the animals, staff and observers is not jeopardized and operations are not disrupted."

Fish and Wildlife Service:

FWS AWARDS \$5.6 MILLION THROUGH STATE WILDLIFE GRANTS PROGRAM. The Kingtree (SC) News (7/22) reports that "imperiled species will benefit from a total of \$5.6 million in grants for 16 projects in 12 states through the US Fish and Wildlife Service's competitive State Wildlife Grants program." The funds, "which focus on large-scale conservation projects yielding measurable results, will be matched by more than \$2.9 million in non-federal funds from states and their partners for projects that work to conserve and recover wildlife identified by states as Species of Greatest Conservation Need and their habitats."

SEN. CORNYN INTRODUCES BILL TO BOOST TRANSPARENCY OF ENDANGERED SPECIES LISTINGS. The Deer Park (TX) Broadcaster (7/23, 128) reports that Sen. John Cornyn has "introduced legislation to dramatically boost transparency of the Fish and Wildlife Service and the National Marine Fisheries Service's listing process for endangered species." The measure would "require the Secretaries of the Interior and Commerce departments to make the best scientific and commercial data publicly available on the Internet as it relates to future listings and de-listings under the Endangered Species Act."

REPUBLICANS PRESS AGRICULTURE SECRETARY VILSACK TO REPORT COSTS OF PRAIRIE CHICKEN PROTECTION MEASURES. The E&E Daily (7/22) reports that "a coalition of key House Republicans says Agriculture Secretary Tom Vilsack is violating federal law by failing to submit a detailed report on the costs and effectiveness of the department's conservation measures to restore the lesser prairie chicken." The coalition, led by Natural Resources Chairman Doc Hastings and Agriculture Chairman Frank Lucas, "sent a letter to Vilsack last week demanding that he submit the report – a requirement in the bipartisan farm bill that President Obama signed into law in February." The article notes that "the provision requires Vilsack within 90 days of the farm bill's being enacted to compile a report detailing the 'cost and effectiveness' of programs administered by the full Agriculture Department and its agencies regarding conservation of the lesser prairie chicken, according to the

two-page letter signed by Hastings, Lucas and 11 other House GOP members."

ENVIRONMENTALISTS DIVIDED OVER NEW "CREDITS" POLICY FOR CONSERVATION. The E&E Daily (7/22) reports that "environmental groups are split over a new Fish and Wildlife Service proposal to reward landowners and federal agencies that proactively conserve habitat for struggling wildlife." Also, "while a few notable environmentalists have praised the policy, all have warned that it is woefully short on details." They said "the new policy is conceptually sound but needs more specificity to ensure that benefits to species are accurately measured and verified."

NATIONAL MARINE FISHERIES SERVICE OFFERS RECOVERY PLAN FOR THREE FISH SPECIES IN CALIFORNIA. The E&E Daily (7/22) reports that the Obama Administration "released a recovery plan today for three imperiled fish species in California's Sacramento-San Joaquin River Delta." The National Marine Fisheries Service's recovery plan seeks to restore the "Sacramento River winter-run Chinook salmon, Central Valley spring-run Chinook salmon and Central Valley steelhead, which have been in decline over the past 150 years from a combination of fishing, gold mining, dam construction, water diversions and water pollution." The plan, "in the works since 2007, focuses on habitat restoration as well as maintenance of genetically and geographically diverse populations," and "it identifies 21 separate populations distributed across four regions of the delta to be re-established over the next 50-100 years."

Also reporting on the story is the Fresno (CA) Bee (7/22, 322K).

NATIONAL FISH AND WILDLIFE FOUNDATION ANNOUNCES \$3.4 MILLION FOR LONGLEAF PINE RESTORATION. The E&E Daily (7/22) reports that the National Fish and Wildlife Foundation on Tuesday "announced nearly \$3.4 million to support 15 longleaf pine restoration projects across eight states in the Southeast." The funds will be "made available through the Longleaf Stewardship Fund, a public-private partnership with the Forest Service, the Agriculture Department's Natural Resources Conservation Service, the Defense Department, and the Fish and Wildlife Service."

NEW WYOMING STUDY COULD PROVIDE EARLY WARNING AGAINST FUTURE ESA LISTINGS. The E&E Daily (7/22) reports that "a new study has identified 51 species in Wyoming that are highly vulnerable to encroaching development, climate change and other factors, a finding the study's authors hope will spark the adoption of conservation strategies designed to avoid future Endangered Species Act listings and the federal regulations that follow as a result." The article notes that "the 57-page species vulnerability study, conducted by researchers with the University of Wyoming, Nature Conservancy and Wyoming Game and Fish Department, is designed to act as a kind of early warning system as ecosystems change to alert state leaders where to invest conservation efforts before sensitive species reach the brink of extinction." The study stated, "Our assessment provides new information about which of three major stressors, climate change, development, and disease, are expected to have the greatest impacts on terrestrial species, habitats, and priority areas in the future. We hope these results inform the development of conservation strategies aimed at mitigating threats we have identified."

NEW UPPER MISSISSIPPI WILDLIFE REFUGE LEADER TO BEGIN DUTY IN AUGUST. The Minneapolis Star Tribune (7/23, Raghavendran, 1.32M) reports that in August, Sabrina Chandler is "returning to the rivers from the US Fish and Wildlife Service in Washington, D.C., to start her new position as complex manager for the Upper Mississippi River National Fish and Wildlife Refuge." Chandler said, "Taking this position helps me get back to that resource and that conservation on the ground that I've been hoping to implement on the national level."

WSJOURNAL OPINION: NEONIC PESTICIDE BAN WOULD HURT US ECONOMY. Henry I. Miller, a fellow at Stanford University's Hoover Institution and founding director of the FDA's Office of Biotechnology, criticizes in the Wall Street Journal (7/23, Miller, Subscription Publication, 5.89M) the White House-established Pollinator Health Task Force, and the Administration's order to the EPA to "assess the effect of pesticides, including neonicotinoids, on bee and other pollinator health and take action, as appropriate." Miller argues science does not support fears about the health of bee populations, and warns that a ban on neonic pesticides would have a very damaging effect on US agriculture, and by extension on US consumers and the overall economy.

Securing America's Energy Future:

Renewable Energy:

BOEM TO CONSIDER "COMMUNITY BENEFIT" FOR NEXT OFFSHORE WIND AUCTION. The New Bedford (MA) Standard-Times (7/23, 54K) reports that "the federal government is preparing for another auction of a wind energy area off the Massachusetts coast." However, this time, the BOEM will "take into account how a potential developer might work with local communities." The article notes that "the auction procedure tentatively set up by BOEM in a draft document allows the bureau to consider whether potential developers have entered into any 'community benefit agreements.'" According to bureau, "the agreements would be legal contracts between an offshore wind developer and community organization agreeing that the organization would support offshore wind development in return for the developer providing some community benefits."

Onshore Energy Development:

MURKOWSKI BLAMES OBAMA FOR FALLING ENERGY PRODUCTION ON FEDERAL LAND. The Hill (7/23, Cama, 237K) reports Alaska Sen. Lisa Murkowski (R) "blamed the Obama administration's policies for reductions in energy production on federal and Indian land and water." Louisiana Sen. Mary Landrieu (D) said that falling resource production on Federal land has "been going on for quite some time, way before President Obama came into office."

BLM SEEKS PUBLIC INPUT ON PROPOSED AMENDMENT TO RAWLINS RESOURCE MANAGEMENT PLAN. KOWB-AM Laramie, WY (7/23, 461) reports that the BLM is "seeking public comment while they consider closing areas in Carbon and Albany Counties to oil and gas leasing." According to the article, "an amendment has been proposed to the 2008 Rawlins Resource Management Plan (RMP) which would close about 12,425 acres in the two counties."

FERC ASKED TO RECONSIDER ENERGY PROJECT NEAR JOSHUA TREE NATIONAL PARK. KCET-TV Los Angeles (7/23, 15K) reports that "a desert protection group has formally asked the Federal Energy Regulatory Commission to reconsider its approval of a large pumped storage project near Joshua Tree National Park." In a formal legal request filed Monday, the Riverside County-based Desert Protection Society alleges that "FERC's approval of the controversial Eagle Crest pumped storage project violates several federal laws and should be reconsidered." The organization also claims "the project poses an undue threat to the Chuckwalla Valley's groundwater, as well as to wildlife including the Federally threatened desert tortoise."

CHANGES TO OIL AND GAS LAW RAISES UNCERTAINTY. The E&E Daily (7/22) reports that "changes to oil and gas law have been multidimensional in recent years." According to the article, "as the energy industry broadens its reach through hydraulic fracturing and horizontal drilling, legal minds are left sorting out lease disputes, property questions, regulatory changes and modern application of common law, among other issues." Legal experts say "evolving doctrines have left many facets of law open to interpretation."

STUDY: NATURAL GAS LESS POLLUTING THAN COAL. The E&E Daily (7/22) reports that "natural gas is only half as polluting for the climate as coal, even accounting for leaks of a potent greenhouse gas, suggests a new study published in the Proceedings of the National Academy of Sciences yesterday." The study, by scientists at the National Renewable Energy Laboratory, "compiles the findings of previous studies exploring the benefits of natural gas for the climate." The article notes that "the result, called a meta-analysis, found that the studies roughly agreed that shale gas, when burned, emits half as much carbon as coal over its life cycle from the wellhead to the power plant."

NORTH CAROLINA STILL WAITING FOR SHALE RUSH. The E&E Daily (7/22) reports that North Carolina has cleared "the way for shale gas rigs" with "two laws and more than 100 pages of regulations," but the rigs "may never arrive." North Carolina "began to embrace hydraulic fracturing after Republicans took over the Legislature in 2010 and pushed to end a six-decade ban on horizontal drilling, fracking's partner in the technological upheaval that shook loose eye-popping volumes of natural gas in the nearby Marcellus Shale." The USGS "increased its projection of recoverable resources in the Marcellus by a factor of 40 after fracking swept the nation, and many in the GOP hope that North Carolina's Triassic shale basins could prove similarly underestimated." However, "shale gas backers are uncertain about how many industry suitors will materialize and how quickly – not to mention the true size of the Tar Heel State's recoverable reserves."

Offshore Energy Development:

BSEE DIRECTOR SALERNO SEE PROGRESS ON OFFSHORE SAFETY. The [Upstream Online](#) (7/23, 20K) reports that “the US offshore sector has already gone through significant changes regarding safety issues since the Macondo disaster in April 2010, but the nation’s chief offshore regulator insists there will be no slowing down as his agency targets today’s challenges with a fresh approach to risk management, improved data and a renewed focus on technology.”

SEN. LANDRIEU ADVOCATES FOR HIGHER DRILLING ROYALTIES FOR GULF COAST STATES. The Hill (7/22, Cama, 237K) reports that Senate Energy and Natural Resources Committee Chair Mary Landrieu touted “legislation that would remove the cap that Gulf Coast states have on the revenue they can receive from offshore drilling royalties and fees,” raising this cap to 37.5 percent from its current monetary cap of \$500 million.

Meanwhile, in an editorial, the [Hampton Roads \(VA\) Virginian-Pilot](#) (7/23, 405K) asks whether “the potential for a spill off Sandbridge, for example, worth the danger to the tourism industry.” According to the paper, drilling “interest has to translate to the action necessary to make those numbers attractive to states such as Virginia.” It notes that “despite last week’s renewed push toward offshore drilling and its attendant riches, there remains precious little movement in Washington toward repairing a royalty scheme that makes no provision for Atlantic drilling.”

THIRTY-FIVE CALIFORNIA CONGRESSMAN STAND AGAINST OFFSHORE OIL DRILLING. The Ventura County (CA) Star (7/23, 212K) reports that 35 California representatives have written to the Interior Department asking that no new offshore oil and gas leases be offered in California beginning in 2017. The members wrote that “Californians have repeatedly spoken out against new offshore drilling,” by passing 24 city and county anti-drilling measures since 1969. The letter comes as the BOEM updates its five-year oil and gas lease program, and also in the wake of the Administration’s move to open the Atlantic coast to oil exploration.

RETRIAL OF FORMER BP ENGINEER POSTPONED. The AP (7/23) reports on the postponement of the August retrial of a former BP engineer Kurt Mix, who is accused of obstructing justice in the investigation of the 2010 Gulf of Mexico oil spill. The retrial is on hold as Federal prosecutors appeal US District Judge Stanwood Duval’s order throwing out Mix’s guilty verdict

OIL SPILL CLAIMANT SUES BP FOR DEFAMATION OVER “CAMPAIGN OF INTIMIDATION.” The New Orleans Times-Picayune (7/23, Larino, 527K) reports The Andry Law Firm LLC is suing PB, one of its lawyers and an Associated Press reporter for defamation, saying it was “wrongly and purposefully implicated...in an investigation into alleged fraud in the oil spill settlement through a “campaign of intimidation” in court and in the media.” The AP is accused of incorrectly reporting the firm’s “oil spill claim was put on hold amid findings of fraud.” Attorney Gilbert “Gibby” Andry says the company “repeatedly and purposely confused The Andry Law Firm in court and in ads published in the Wall Street Journal and the New York Times with Andry Lerner LLC,” which has his brother as a partner.

DECISION TO ALLOW SEISMIC TESTING CRITICIZED. The [Huffington Post](#) (7/23, Sakashita, 11.54M), Miyoko Sakashita, Oceans Director, Center for Biological Diversity, writes that the decision by the BOEM to open up offshore waters from Delaware to Florida to oil and gas exploration with seismic testing means that “thousands of marine animals will pay a very terrible price.” In addition to noise pollution, Sakashita claims that “we know drilling along the Atlantic Coast will mean a higher risk for oil spills, more polluted beaches and waters, more industrial equipment and fewer pristine places for wildlife and people.” Also, she claims that “opening these waters to drilling will deepen our climate crisis—the government just increased the estimate of how much oil and gas is under the Atlantic Ocean to 4.72 billion barrels of oil and 37.51 trillion cubic feet of gas.”

Additional coverage of the decision was provided by the “Wonkblog” of the [Washington Post](#) (7/22, Kollipara, 4.06M), the [Christian Science Monitor](#) (7/21, 566K), the [Newport News \(VA\) Daily Press](#) (7/22, 181K), and [Esquire Magazine](#) (7/23, 2.48M).

Tackling America’s Water Challenges:

SPIRAL FISH SLIDE PLANNED AT CLE ELUM DAM. The AP (7/23, Prengaman) reports that “slightly more than 10,000 adult sockeye salmon just arrived in Lake Cle Elum, their upstream migration diverted by a tanker truck ride courtesy of Yakama Nation Fisheries.” According to the article, “by introducing the fish to an area that has been blocked for a century by a dam, tribal biologists hope to rebuild a healthy population.” However, “the Cle Elum Dam doesn’t just hold back water, it holds back salmon.” Now, “after years of work,” BOR engineers are “finalizing a first-of-its-kind design for a system to let juvenile fish head downstream, regardless of reservoir level.”

Empowering Native American Communities:

UNITED HOUMA NATION RECEIVES SUPPORT FOR FEDERAL RECOGNITION. The AP (7/23) reports that the Terrebonne Parish Council has “passed a resolution in support of the United Houma Nation receiving federal recognition.” The council also “asked the administrations of the Biloxi-Chitimacha-Choctaw and the Pointe-au-Chien tribes to submit necessary documents to receive similar council measures of support.”

Also covering the story is the Tri-Parish (LA) Times (7/23, 21K).

CONFEDERATED TRIBES OF THE UMATILLA RESERVATION PREPARED TO BUY BACK LAND. For the High Country (CO) News (7/23, 74K), Chuck Sams, an enrolled member of the Confederated Tribes of the Umatilla Indian Reservation, writes that the Confederated Tribes of the Umatilla Reservation have “signed an agreement with the Interior Department to begin buying back these fractional pieces of property, so that the land can once again be owned in common by the people.” He notes that “there are many challenges that come with doing this, but the Confederated Tribes are well positioned to work with the landowners, many of whom are not tribal members, by offering a fair market payment.” According to Sams, “once the land is back in our hands, we believe there will be greater economic opportunity and better ways to protect and enhance the environment, while using the land in a communal way.”

PROFESSOR SUPPORTS FEDERAL RECOGNITION OF EASTERN PEQUOT TRIBAL NATION. In an op-ed for the Connecticut Post (7/23, 238K), Amy E. Den Ouden, an associate professor in the Women’s and Gender Studies Department at the University of Massachusetts, tells Assistant Secretary Kevin Washburn that “the state of Connecticut’s opposition to the Department of the Interior’s initial proposed changes to the federal regulations on tribal acknowledgment are particularly destructive with regard to the rights of the Eastern Pequot Tribal Nation of North Stonington, who were acknowledged by the Bureau of Indian Affairs in 2002 after rigorous review of their federal acknowledgment petition.” Ouden emphasizes that “the existence of the Eastern Pequot Tribal Nation is not an ‘Indian problem,’ nor was their federal acknowledgment by the Bureau of Indian Affairs in 2002 a ‘problem,’ nor is the possibility that the Eastern Pequot Tribal Nation may receive a fair hearing on the unjust overturning of their federal acknowledgment a ‘problem.’” She asserts that “this is not ‘biting’ at an ‘apple’; this is a tribal nation’s pursuit of justice and its commitment to do so through legal means.”

Top National News:

OBAMA TRAVELS TO WEST COAST AMID CRITICISM OF HIS FUNDRAISING. None of the network newscasts covered President Obama’s West Coast fundraising swing on Tuesday evening. Nearly every print and online report on the President’s appearances, meanwhile, references persistent questions about the propriety of such travel at a time when there are wars in the Mideast and Ukraine and an ongoing crisis on the US-Mexico border. For example, the New York Times (7/23, Shear, Subscription Publication, 9.79M) reports that “the fundraising trip comes as the White House is dismissing criticism about the president’s decision to maintain his travel schedule” at a time when there are multiple crises across the globe that demand the President’s attention. Under the headline, “Obama Visits Seattle To Raise Political Cash,” the Seattle Post-Intelligencer (7/23, Connelly, 857K) reports that the President is on the West Coast this week “primarily for the purpose of raising money for Democrats,” and notes that “the trip comes as Obama is dealing with a series of high-profile tests...from Eastern Europe to the Middle East to the southern US border.”

On Fox News’ Special Report (7/23, 2.15M), Bret Baier said the President is “dealing with an image problem on several fronts.” Fox’s chief White House correspondent Ed Henry was shown asking White House press secretary Josh Earnest: “What about the President’s time? What about the fact there’s five work days this week

and three them, he's fundraising?" Henry went on to report that "even as they insist it's not an optics problem, there are signs White House aides realize the criticism may be sinking in."

The AP (7/23) reports that "amid a swirl of foreign and border challenges," President Obama is "embarking on the one mission that has regularly proved a winner for him – raising money for his fellow Democrats." The AP says that on Tuesday, the President "landed...in Seattle at the start of a three-day West Coast trip, where he'll also visit San Francisco and Los Angeles and plans to attend at least five fundraising events." The AP adds that the White House maintains that the President is "more than able to carry out all his duties and attend to crises while on the road," but notes that he "did abandon one idea for the trip," an appearance on ABC's Jimmy Kimmel Live.

According to the New York Times (7/23, Shear, Subscription Publication, 9.79M), the President "will have one other event during the trip, a speech at a Los Angeles technical college on Thursday, before returning to the White House late that day." The Times reports that White House press secretary Josh Earnest acknowledged that "the cancellation" of the President's planned appearance on Jimmy Kimmel Live "was a result 'in part' of concerns about the president's appearing on a comedy show in the midst of the international crises."

The San Francisco Chronicle (7/23, Marinucci, 2.87M) covers the President's fundraising trip in an article titled, "Obama's Bay Area Fundraising Trip Draws Flak." Under the headline, "Obama Raises Funds While International Crises Loom," the Washington Times (7/23, Boyer, 465K) reports that the President embarked on "a three-day Democratic fundraising trip amid signs that his image-makers are worried about criticism that the president's excursion is an 'unsavory distraction.'"

The AP (7/23) reports that in Seattle on Tuesday, the President "conceded...that foreign crises are creating anxieties in an American public already worried that a recovering economy is not improving their lives." The Los Angeles Times (7/23, Hennessey, 3.42M) reports that the President "joked that he doesn't watch a lot of the troubling news on television."

According to Politico (7/23, Dove, 637K), while at his first Seattle fundraiser, the President "reflect[ed] on the crises in Ukraine, Gaza, Syria and Iraq," and "acknowledged that they're adding to an anxiety that's feeding cynicism that could hurt his party in the midterms." The President is quoted as saying, "Part of people's concern is just the sense that around the world, the old order isn't holding and we're not quite where we need to be in terms of a new order that's based on a different set of principles, that's based on a sense of common humanity, that's based on economies that work for all people."

The Seattle Post-Intelligencer (7/23, Connelly, 857K) reports that during a speech at the Seattle "home of Bruce Blume, a real estate developer, and his wife Anne," the President "addressed the Democrats' greatest fear in the midterms: That young voters, minorities and single women – constituencies that elected Obama – won't turn out."

The Seattle Times (7/22, 1.11M) reports that "about 250 people paid \$500 to \$20,000 to attend the event" at the Blumes' home, and notes that as the President "pulled up...in the wealthy neighborhood on Lake Washington," he "was met by about two dozen demonstrators protesting Israel's actions in Gaza and chanting 'free, free Palestine' and 'killing children is a crime.'" The Times goes on to report that after exiting that event, the President rode to the home of "former Costco CEO Jim Sinegal and his wife, Jan" for what "was billed as a \$25,000-per-person fundraising dinner for Senate Majority PAC, a super PAC trying to keep Democrats in power in the U.S. Senate."

Obama: Climate Change Responsible For Wildfires. The AP (7/22) reports that while in Seattle on Tuesday, the President asserted that "a wildfire that has burned nearly 400 square miles in the north-central part of Washington state, along with blazes in other Western areas, can be attributed to climate change." The President is quoted as saying, "A lot of it has to do with drought, a lot of it has to do with changing precipitation patterns and a lot of that has to do with climate change."

Obamas Rumored To Be In The Process Of Buying A California Home. The Los Angeles Times (7/22, Beale, 3.42M) noted rumors that the President and the First Lady are planning to buy a \$4.25 million home in Rancho Mirage, California "before the month is out." According to the Times, the Obamas are "believed to be in escrow on a contemporary home in a gated community where entertainers Frank Sinatra, Bob Hope and Bing Crosby once

maintained estates." However, the Times notes that the White House dismissed the claim from anonymous real estate agents. The Washington Times (7/23, Chumley, 465K) reports that on Tuesday, White House press secretary Josh Earnest "said...the report was 'not accurate.'"

FEDERAL APPEAL COURTS ISSUE CONFLICTING RULINGS ON LEGALITY OF OBAMACARE SUBSIDIES.

The court rulings on the legality of key ACA subsidies are featured on the front pages of major US newspapers this morning, including the New York Times, Washington Post and Wall Street Journal – all three of which also run editorials on the issue. However, the story generated only one 30-second item on the network newscasts, where the crises in Ukraine and Gaza continued to be the focus of the coverage. On cable, Fox News commentators used the rulings to train their fire on the ACA and on the President himself, while MSNBC and CNN had little to say about the controversy and largely focused their news and commentary shows on foreign policy. Overall, coverage of the rulings highlights the ongoing partisan split over the President's healthcare reform law, and suggests the issue will be settled – as it was in 2012 – by the Supreme Court.

The AP (7/23), however, cautions that may not necessarily be the case: The DC "was decided by a three-judge panel," and the Administration "will ask the full 11-member appeals court to hear the case." Of the 11 judges in the full court, seven were appointed by Democratic presidents, and if they come out "in favor of the administration, the prospect of Supreme Court involvement would be greatly diminished." At any rate, as Scotusblog founder Tom Goldstein said on PBS Newshour, whether the full DC court of the Supreme Court makes the final decision "we're probably a year to 18 months away from getting a final answer."

ABC World News (7/22, story 6, 0:30, Sawyer) referred to "a trampoline of a day for Obamacare in court," as the US Court of Appeals for the District of Columbia "ruled that only Americans in states with their own exchanges for insurance can get financial subsidies," while "hours later," the Richmond-based 4th Circuit Court of Appeals "issued the opposite ruling, saying Obamacare can proceed as planned." Ultimately, notes Bloomberg News (7/22, Zajac, Dornig, Allen, 2.76M), "if the first decision stands, it could damage Obama's legacy as a policy maker and render his party's candidates more vulnerable to Republican attacks in November's midterm election." Moreover, "the ruling also threatens to gut the law's basic premise – to provide affordable insurance for Americans who don't have it." The Hill (7/23, Viebeck, 237K) similarly reported that "a ruling against the administration would demolish ObamaCare's structure."

The issue in contention, says the Christian Science Monitor (7/23, Kiefer, 566K), is that the ACA, as drafted, "specifically covers subsidies for the state exchanges, but not a word is said about subsidies for the federal exchange." Upon "realizing this oversight," the IRS "issued a rule allowing subsidies for everyone covered by the act, regardless of whether they are in state exchanges or the federal exchange." The Washington Times (7/23, Howell, 465K) explains that the DC court "ruled the administration used" the IRS rule "to stretch the meaning of the" law, "which said financial aid to low- and middle-income people should only flow to exchanges 'established by the State.'" The Times adds that "if that means only state-run exchanges, it would cut off subsidies to two-thirds of the nation" by invalidating "the IRS rule that ensured subsidies flowed to every state." The US Court of Appeals for the Fourth Circuit "upheld the administration's interpretation of where subsidies may flow," reasoning that "Obamacare's language was ambiguous and that the IRS rule was 'a permissible exercise of the agency's discretion.'"

The Daily Caller (7/22, Hurtubise, 408K) says that "a whopping 36 states decided building an exchange wasn't worth it," and that would have made "their customers...ineligible for premium subsidies." It was then, according to the Caller, that the IRS "issued its own belated rule that subsidies would also apply to exchanges set up by the federal government." According to the New York Times (7/22, A1, Pear, Subscription Publication, 9.79M), Administration officials say that argument is "absurd," and that "the overriding purpose of the Affordable Care Act, they said, was to ensure access to health care for nearly all Americans, wherever they live." Bloomberg News (7/22, Hamis, Zajac, 2.76M) quotes Walter Dellinger, former solicitor general during the Clinton Administration, as saying, "The Congress that passed the Affordable Care Act could not have intended [an] utterly absurd result, much less unambiguously required it."

The Washington Post (7/22, A1, Somashekhar, Goldstein, 4.06M) reports "conservatives have spent years laying the groundwork for the challenge, which they viewed as their last, best chance at hollowing out the federal program." The Post notes that the DC Circuit panel "was made up of two Republican and one Democratic appointee," while the Fourth Circuit panel "was comprised of two Democratic appointees and one judge...who was

nominated by a Bill Clinton and then renominated by George W. Bush.”

Under the headline “Democrats Still Haven’t Learned Obamacare Lesson,” Politico (7/23, Nather, Haberkorn, 637K) reports, “Memo to Democrats: This is what happens when you pass a law where you can’t fix simple drafting errors.” Yesterday’s “conflicting rulings were another wake-up call for Democrats about the fragility of the health care law – and a reminder that whenever they think a lawsuit is no threat to the law, it’s probably a threat to the law.” Adds Politico, “It’s all because of what most Democrats insist is a drafting error in the law, but it’s kind of a big one.” The Federal health insurance marketplace “is now serving 36 states that couldn’t or wouldn’t set up their own exchanges.”

Pete Williams said on MSNBC’s Now With Alex Wagner (7/22, 437K), “The courts were both in agreement on one thing, that the law is not well-written, that it’s not crystal clear from looking at the language whether the Federal exchanges have the option to – the right, the authority to give this subsidy for the insurance that’s bought on the Federal exchanges. One court said, ‘You know, we look at the law, it ain’t there, you just can’t do it.’ The other court said, ‘Well, it’s ambiguous, what we do in situations like this is we defer to the agency in charge.’ ... That’s where the disagreement lies.”

The Los Angeles Times (7/23, A1, Savage, 3.42M) also notes “conservative legal groups have argued ever since that ‘exchange established by the state’ does not include the federal exchange,” and “that reading of the law would block insurance subsidies in two-thirds of the nation.” The Huffington Post (7/22, Grim, 11.54M) put it differently, reporting that “two Republican judges on the DC Circuit Court have ruled that the equivalent of a typo is enough to strip health care subsidies from up to 5 million people.”

The AP (7/23) notes White House spokesman Josh Earnest “immediately announced that millions of consumers will keep getting financial aid for their premiums – billions of dollars in all – as the administration appeals the one adverse decision.” McClatchy (7/22, Kumar, Subscription Publication, 23K) notes that Earnest said, “There’s a lot of high-minded case law that’s applied here. ... There’s also an element of common sense that should be applied as well, which is that you don’t need a fancy legal degree to understand that Congress intended for every eligible American to have access to tax credits that would lower their health care costs, regardless of whether it was state officials or federal officials who were running the marketplace.” Politico (7/23, Cunningham, 637K) notes that DOJ “said it would seek a review of the decision it lost.” The Wall Street Journal (7/22, Kendall, Armour, Subscription Publication, 5.89M) quotes DOJ spokeswoman Emily Pierce as saying, “We believe that this decision is incorrect, inconsistent with congressional intent, different from previous rulings, and at odds with the goal of the law. ... In the meantime, to be clear, people getting premium tax credits should know that nothing has changed, tax credits remain available.”

USA Today (7/23, Wolf, 5.76M) says “Federal subsidies have reduced monthly premiums by an average of 76% for those with incomes below 400% of the federal poverty line, or \$95,400 for a family of four.” Overall, “the average monthly premium dropped from \$346 to \$82.”

Reuters (7/23, Morgan, Viswanatha) quotes Speaker Boehner as saying of the DC ruling, “Today’s ruling is also further proof that President Obama’s healthcare law is completely unworkable. It cannot be fixed.” House Minority Leader Pelosi, meanwhile, hailed the Richmond decision, saying it “affirms the intent of the Affordable Care Act: to make quality, affordable health insurance available to every American in every state.” McClatchy (7/22, Kumar, Subscription Publication, 23K) notes, however, that “many Democratic lawmakers were largely silent on the court rulings Tuesday.”

Politico (7/23, Topaz, 637K), meanwhile, notes that Sen. Ted Cruz “praised” the DC court ruling, saying, “The D.C. Circuit’s decision today in *Halbig v. Burwell* is a repudiation of Obamacare and all the lawlessness that has come with it.”

Reid’s “Nuclear Option” May Save ACA. Roll Call (7/23, Sanchez, Subscription Publication, 76K) reports Senate Democrats “are hoping their use of the ‘nuclear option’ to end a Republican blockade of circuit court nominees last year will help overturn” the “2-1 appeals court ruling with the potential to gut Obamacare tax subsidies for millions.” Senate Majority Leader Harry Reid “blasted the court’s ruling that Congress only wanted to provide tax subsidies in states with their own exchanges an ‘absurd’ move by ‘two activist Republican judges.’” Asked “if his decision to employ the nuclear option to fill the circuit was vindicated, Reid said based on ‘simple

math, you bet.”

Politico (7/23, Gerstein, 637K) reports “Tuesday’s ruling on Obamacare is a dramatic example of why” the President and Reid “forced the issue” of the nuclear option. While “a White House spokesperson declined to comment for this story...one former official involved in the discussions about nominating the three new DC Circuit judges said the strategy is now looking prescient.” This unnamed “former official” said the move was “pretty brilliant.”

WSJournal Defends DC Court Ruling; WPost, NYTimes Among Critics. In an editorial, the Washington Post (7/22, 4.06M) blames both parties for the DC Court of Appeals ruling, “Democrats who pressed through a bill containing contradictory language,” and “Republicans who, in their drive for full repeal, have declined to fix the ambiguities and unintended consequences that turn up in any sizeable piece of legislation.” The Post concludes that “given the [law’s] contradictions, the administration’s interpretation deserves deference,” and “the full DC Circuit should reconsider and reverse its panel’s 2-to-1 ruling. Then the Supreme Court should let the administration’s interpretation stand.”

In an editorial titled “An Ominous Health Care Ruling,” the New York Times (7/23, Subscription Publication, 9.79M) criticizes the “two Republican-appointed judges on the panel” for “taking an incredibly narrow and blinkered view.” Adds the Times, “What is needed is common sense in interpreting the law, not ideological opposition to Obamacare.”

The Wall Street Journal (7/23, Subscription Publication, 5.89M), meanwhile, gleefully editorializes that the DC Court’s ruling on *Halbig v. Burwell* is correct, as the Administration argued that the judges should ignore what it casts as the law’s specific, unambiguous language.

Jonathan J. Adler, law professor and director of the Center for Business Law and Regulation at Case Western Reserve University, and Michael F. Cannon, director of health-policy studies at the Cato Institute, make a similar argument in the Wall Street Journal (7/23, Adler, Cannon, Subscription Publication, 5.89M), writing that Obama’s lawyers made the case that the Administration is actually doing the opposite of what the law states.

The Los Angeles Times (7/23, 3.42M) editorializes, “It’s absurd to argue that a Congress controlled by Democrats would have imposed a nationwide mandate to buy coverage while withholding subsidies from some states’ residents.”

Ron Fournier said on Fox News’ Special Report (7/22, 2.15M), “I think the Administration has a low bar to overcome before the Supreme Court. I wouldn’t be surprised to see this split pretty much along the lines as it did a couple of years ago. The big issue here is this is another example where Congress isn’t functioning well. It’s not clear what their intent was. The Administration isn’t work well with Congress, so the courts are playing more an active role in legislating one fifth of our economy.”

Kirsten Powers said on Fox News’ Special Report (7/22, 2.15M) that “both courts, though they ruled differently, agreed on one thing, which is that the language very ambiguous. It’s just that one court said we are going to defer to the IRS the other court said no.” Powers added that “if you have two courts saying this is very ambiguous language, then it points to a problem with the bill, that they were not clear enough in what the actual intent here was.”

Charles Krauthammer, disagreed, saying on Fox News’ Special Report (7/22, 2.15M) that the courts “did not agree that this is ambiguous. One court said it was ambiguous and thus we’ll defer to the IRS. The other court said it’s not ambiguous. ... The claim of the government is, ‘Well it was a drafting error and what we really intended was that it should be for everyone.’” Krauthammer argued that “a drafting error in a bill is still part of the bill and the only instrument in the constitutional system we have that can change an error, drafting or otherwise, is the Congress. It is not the purview, it is not in the power of the executive to fix what’s written in the legislation. That’s the issue at hand. Of course, the issue in the end, the effect will be on whether Obamacare lives or dies because if the DC court is upheld Obamacare is over.”

Kimberly Guilfoyle said on Fox News’ The O’Reilly Factor (7/22, 2.53M) that Fourth Circuit in Virginia “interpreted in favor of the IRS. I think they did so incorrectly and so now what’s going to happen is that the Obama

Administration is going to bring this case forward with respect to the first decision that ruled against them and asked to have that decision heard en banc."

USA Today (7/22, 5.76M) says in an editorial that "the 2-1 opinion – two Republican-appointed judges outvoted one judge appointed by a Democratic president...was hardly fatal," but "the fact that the three-judge panel ruled the way it did is disappointing. The other courts to rule on this challenge, including a federal appeals court in Richmond later on Tuesday, threw it out – appropriately, in our view." Sam Kazman, "general counsel of the Competitive Enterprise Institute, a free-market advocacy organization that coordinated and funded both the Halbig and King cases," writes in an accompanying op-ed for USA Today (7/22, Kazman, 5.76M) that the ruling was "a major victory for the rule of law. And correspondingly, the Fourth Circuit's contrary ruling hours later, in King v. Burwell, is a loss."

SENATE DEMOCRATS' BORDER FUNDING REQUEST IS \$1 BILLION LESS THAN OBAMA IS SEEKING. On Tuesday, Democratic aides in the Senate outlined a border bill that Senate Appropriations Committee chair Sen. Barbara Mikulski will officially introduce on Wednesday. According to most reports, Mikulski's bill, which requests about 27% less total funding than the White House has asked for in response to the crisis at the border, does not include any changes to a 2008 law widely blamed for incentivizing illegal immigration from Central America, and therefore has very little chance of passage.

The New York Times (7/23, Parker, Peters, Subscription Publication, 9.79M) reports that on Tuesday, "both Democrats and Republicans" said "it was increasingly unlikely they could reach an accord before Congress leaves town for a five-week recess at the end of the month." According to the Times, Republicans "rejected" the new proposal from Senate Democrats "out of hand, saying that it amounted to giving the president a blank check because it did not include any changes to immigration law to address the overall problem."

USA Today (7/22, Davis, 5.76M) reports that on Tuesday, Senate Democrats "unveiled a \$2.7 billion emergency spending bill to address the flow of undocumented children along the U.S. Southwest border, a billion dollars less than President Obama requested." USA Today notes that "notably absent is a policy change to an existing 2008 law that would make it easier to return the children to their home countries," although the White House wants that change and Republicans consider it a prerequisite for any border funding bill. The Huffington Post (7/22, Foley, 11.54M) notes that while the President "has signaled that he would be willing to change the law, he did not propose doing so in conjunction with his funding request earlier this month."

Politico (7/23, Kim, 637K) reports that on Tuesday, Senate Majority Leader Harry Reid "stressed the need again to provide...additional funding before lawmakers leave for the August recess," and reiterated his contention that the President already "has some discretion under the current 2008 trafficking law to deal with the border crisis." According to Politico, some Democrats in the Senate "believe the 'exceptional circumstances' provisions of the law grant Obama this discretion." Nevertheless, Politico says "GOP support for the Senate Democratic approach is expected to be slim."

The AP (7/23) reports that on Tuesday, Speaker Boehner said, "I don't believe the American people will support sending more money to the border unless both parties work together to address these policies and actually solve this problem."

The Washington Times (7/23, Miller, 465K) reports that on Wednesday, a House Republican task force created by Speaker Boehner will "propos[e] a deployment of National Guard troops and accelerated deportation hearings for unaccompanied children inundating the U.S." The Times adds that "in a move to further enhance border enforcement, the task force will propose lifting restrictions that prevent police and border agents from conducting operations on some federal land."

Senate Democrats' Border Bill Includes \$225 Million For Israeli Missile Defense. The Hill (7/23, Bolton, Schroeder, 237K) reports that according to an unnamed "Democratic source," Mikulski "will attach \$615 million in emergency funding to combat wildfires and \$225 million for Israel's Iron Dome rocket defense system." According to the AP (7/23), "the money for wildfires and for Israel appeared unlikely to sweeten the deal enough for Republicans to swallow it."

ABC News: Analysis "Confirms Super Surge" Of Children Entering The US Illegally This Year. On ABC

World News (7/22, story 7, 0:55, Sawyer), Diane Sawyer reported that "a new analysis confirms a super surge of young children" entering the US illegally so far this year, "a whopping 117 percent increase...of unaccompanied children 12 and younger."

Former Rep. Ernest Istook (R-OK), in a piece for the Washington Times (7/22, 465K), says that according to the Border Patrol, "unaccompanied minors" represent "only one-fourth of the current invasion from Central America across our Southwest border" as "crossings by family units have increased almost five times faster." Istook says "total other-than-Mexican (OTM) apprehensions were 202,951 in the Southwest Border Sector...from Oct. 1 through June 30," and "of those, 57,525 were 'unaccompanied alien children.'" According to Istook, the Border Patrol data "contradicts White House and media efforts to elicit public sympathy by focusing public attention on children."

Homeland Security's Johnson: Immigration Enforcement Agencies Are Running Out Of Money. The Hill (7/23, Schroeder, 237K) reports that on Tuesday, DHS Secretary Johnson "warned Congress that funding to battle illegal immigration could dry up in less than a month if lawmakers fail to approve an emergency spending bill." According to The Hill, Johnson said Immigration and Customs Enforcement will "run out of funds by the middle of August," and Customs and Border Protection will be "out of cash by mid-September."

The Washington Times (7/23, Boyer, 465K) reports that along with Johnson, HHS Secretary Burwell and other Administration officials "lobbied governors of states along the US-Mexico border in a conference call Tuesday to pressure Congress to approve \$3.7 billion in emergency funding to deal with the surge of illegal immigrants from Central America."

McConnell Wants Vote On Cruz Bill Limiting Obama's Power To Bypass Immigration Laws. Politico (7/23, Everett, 637K) reports that Senate Minority Leader Mitch McConnell "won't say whether he backs" Sen. Ted Cruz's proposed legislation limiting the President's "deferred action policies on immigration – but...believes Cruz should get a vote on his proposal." According to Politico, Cruz "is urging Republicans to...prohibit any further expansion of Obama's Deferred Action for Childhood Arrivals, a program that shields some young undocumented immigrants from deportation," and "argues that DACA attracts children...to the United States under the mistaken belief that upon entry they will receive...permission to stay in the country." Politico says McConnell "indicated that he agrees with Cruz that the administration's policies are attracting immigrants."

The Hill (7/23, Marcos, 237K) also reports that McConnell "did not endorse Cruz's measure, but indicated senators should still vote on it if they consider a package to provide funds for the border." Reuters (7/23, Cornwell) reports that Sen. John Cornyn who has authored his own bipartisan bill in response to the border crisis, said he agrees with Cruz that one of the main incentives driving the current cycle of illegal immigration is the widespread perception in Central American countries that "if you can make it to the United States, you'll be able to stay."

According to Roll Call (7/23, Subscription Publication, 76K), "at least 33 House Republicans want" the President to "end his executive action that grants stays of deportation for young people brought into the country illegally by their parents, hoping that sends a message to Central American countries that their children won't get a free pass."

New York City And Los Angeles Officials Welcome Illegal Immigrants In Federal Custody. The Wall Street Journal (7/23, Jordan, Subscription Publication, 5.89M) reports that in contrast to those locales that have discouraged the Federal government from resettling illegal immigrants in their communities, officials in some cities and states are welcoming the foreign nationals who entered the US illegally, including Los Angeles, New York City and the state of Massachusetts.

"Criminal Aliens" Have Committed 640,000 Crimes In Texas In Last Six Years. The Washington Times (7/23, Harper, 465K) reports that according to the state of Texas, "in the past six years, Texas county jails have incarcerated 203,000 'criminal aliens' who have committed 640,000 crimes, including over 3,000 homicides."

Perry Praised For Drawing Attention To Border Crisis And Offering Solutions. Alan Gomez of USA Today (7/22, 5.76M) writes, "Think what you will of" Texas Gov. Rick Perry's "decision to send 1,000 National Guard troops to the state's southern border," but "one thing is certain: Perry's decision shines a bright spotlight on the need to focus on how best to secure our nation's border, an important debate that has been so watered down by

partisanship and political gridlock that the country is only considering quick fixes that will do little to fix the broader problems.”

Marcus Mocks White House For Complaining About Sources In Article On Obama's Handling Of Border Crisis. Ruth Marcus, in her column for the Washington Post (7/22, Marcus, 4.06M), chides White House Press Secretary Josh Earnest for criticizing the Washington Post's use of anonymous sources in an article detailing how the Administration “failed to respond forcefully enough, early enough, to the flood of child migrants.” Marcus notes that “as Earnest later acknowledged...the article, and it was a powerful one, featured, by name, a former Border Patrol station chief, an immigration rights advocate and a member of Congress – along with official documents and figures.” According to Marcus, “Earnest's real beef with an article...wasn't about the unnamed messengers but about the unwelcome message.”

Powers: Journalists Should Be Allowed To Interview Central American Children In Federal Custody. Kirsten Powers, in her column for USA Today (7/22, Powers, 5.76M), says Americans “are demanding these tens of thousands of children be turned away at the border or flown back to some of the most violent countries in the world,” but “the voices of the children involved are rarely heard” because of “Federal rules” that are “intended to stop the children from becoming political pawns.” Powers says those rules have “backfired,” and argues that “as long as journalists are blocked from learning the children's true stories, the debate will be dominated by caricatures.”

Editorial Wrap-Up:

NEW YORK TIMES. “An Ominous Health Care Ruling.” In an editorial the New York Times (7/23, Subscription Publication, 9.79M) criticizes the “two Republican-appointed judges” on the US Court of Appeals for the District of Columbia for “taking an incredibly narrow and blinkered view.” Adds the Times, “What is needed is common sense in interpreting the law, not ideological opposition to Obamacare.”

“Painful Progress In Detroit.” An editorial in the New York Times (7/23, Subscription Publication, 9.79M) says that no one will be happy with Detroit's bankruptcy plan. Starting Aug. 14, Federal bankruptcy Judge Steven Rhodes will hold a trial “at which the City of Detroit will have to make the case for the blueprint, while objectors argue against it.” Regardless of the result, “there will be no victories.” The Times notes that there is “no doubt that municipal pensioners who voted yes on the blueprint are a more vulnerable constituency than the financial institutions that voted no,” adding that their “no votes on the blueprint — and their probable appeal if Judge Rhodes confirms the blueprint — will only further delay Detroit's restructuring and deepen its misery.” While the “outcome is uncertain...one thing is sure: The people of Detroit have suffered enough.”

WASHINGTON POST. “Obama's Passivity On Syria.” A Washington Post (7/22, 4.06M) editorial says the Obama Administration “appears to be doing little to address” the crisis in Syria. While Secretary of State Kerry “is camped out in Cairo in pursuit of a Gaza cease-fire,” there is “no senior envoy...trying to work out a political formula that would unite moderate Syrian and Iraqi forces against the Islamic State.” The President, meanwhile “has devoted a large part of his schedule in recent weeks to political fundraising,” and has “had nothing to say about Syria or Iraq during recent appearances to discuss Gaza and Ukraine.” The Post argues that the President's “decision to stand back from Syria and Iraq has done much to create the present threat to the United States,” and ongoing “passivity will only make it worse.”

“Contradictory ObamaCare Rulings.” In an editorial, the Washington Post (7/22, 4.06M) blames both parties for the US Court of Appeals for the District of Columbia ruling on the ACA subsidies, “Democrats who pressed through a bill containing contradictory language,” and “Republicans who, in their drive for full repeal, have declined to fix the ambiguities and unintended consequences that tum up in any sizeable piece of legislation.” The Post concludes that “given the [law's] contradictions, the administration's interpretation deserves deference,” and “the full DC Circuit should reconsider and reverse its panel's 2-to-1 ruling. Then the Supreme Court should let the administration's interpretation stand.”

“School Organization In D.C.” The Washington Post (7/22, Board, 4.06M) editorializes about the opposition of some DC school officials to the decision by Harmony Public Schools, “a Houston-based network known for its high-performing college preparatory schools, to open an elementary school with a STEM (science, technology,

engineering and math) focus across the street from Langley Elementary." The Post argues that "competition generally tends to make people feel threatened," but it is "also healthy, spurring extra effort and better performance," and defends Harmony as having "a proven record of success in STEM education."

WALL STREET JOURNAL. "Upholding ObamaCare – As Written." The Wall Street Journal (7/23, Subscription Publication, 5.89M) gleefully editorializes that the DC Court's ruling on *Halbig v. Burwell* is correct, as the Administration argued that the judges should ignore what it casts as the law's specific, unambiguous language.

"Give Us Your Donors, Or Else." The Wall Street Journal (7/23, Subscription Publication, 5.89M) editorializes about efforts by attorneys general in New York and California to force 501(c) groups to disclose the identities of donors in order to raise funds in those states. The Journal notes that these efforts are attempts to end-run Federal law that requires confidentiality of donor names unless the states petition the government for exceptions, and urges courts to rule for the groups in legal challenges to the states' efforts.

"Let Israel Decide." A Wall Street Journal (7/23, Subscription Publication, 5.89M) editorial argues that a cease-fire now would be a help to Hamas because now that Israel has launched a ground offensive, it will lose if it does not meet its goals of destroying the network of tunnels Hamas uses to enter Israel and destroying Hamas' stockpiles of rockets and storage sites. Israel, the Journal argues, is the best of judge of its progress toward meeting those goals.

Washington Schedule:

TODAY'S EVENTS IN WASHINGTON.

White House:

PRESIDENT OBAMA — The President attends a House Majority PAC event, San Francisco, California, closed press; delivers remarks and answers questions at a DCCC event, Los Altos Hills, California, print pool for remarks only; departs San Francisco, open to pre-credentialed media; arrives Los Angeles, open to pre-credentialed media; attends a DNC event, print Pool for remarks only. Notes: Deputy Press Secretary Eric Schultz will gaggle aboard Air Force One.

VICE PRESIDENT BIDEN — The Vice President will travel to Las Vegas, Nevada. Later, the Vice President will travel to Cincinnati, Ohio. Highlights: The Vice President will deliver remarks to the NAACP National Convention. His remarks at the Mandalay Bay Convention Center will be open press. The Vice President will deliver remarks at a rally for Congressional candidate Erin Bilbray. This event at the Henderson Convention Center is open press. US Senate: 9:30 a.m. — The Senate convenes and resumes consideration of the motion to proceed to S.2569, the Bring Jobs Home bill. Thereafter, Senators proceed to executive session to consider nominations.

DOLE – VETERANS – DISABILITY TREATY — 10:30 a.m. Senators John McCain (R-AZ), Tom Harkin (D-IA), Kelly Ayotte (R-NH), and Mark Kirk (R-IL) will join former Senate Majority Leader Bob Dole (R-KS) and representatives from major veterans service organizations at a news conference to support Senate ratification of the Convention on the Rights of Persons with Disabilities (CRPD). Location: 430 Dirksen. Contacts: Brian Rogers or Rachael Dean, 202-224-7130

LAND AND WATER CONSERVATION FUND ANNIVERSARY — 11 a.m. A bipartisan group of conservation leaders in the Senate and House will mark the release of a new report on the Land and Water Conservation Fund's 50th anniversary With Sen. Susan Collins (R-ME); Sen. Martin Heinrich (D-NM); Rep. Dave Reichert (R-WA-8); Rep. Peter DeFazio (D-OR-4); Former Deputy Secretary of the Interior Lynn Scarlett, current Managing Director for Public Policy at The Nature Conservancy; Jay Leutze, Southern Appalachian Highlands Conservancy. Location: 366 Dirksen. Contacts: Justin Bartolomeo, jbartolomeo@hdmk.org, 202-789-4365

SENATE AUTO CAUCUS — 12:30 p.m. Sens. Rob Portman (R-Ohio) and Carl Levin (D-Mich.), co-chairs of the Senate Auto Caucus, will host a Senate Auto Caucus briefing on educating and training future generations of

auto industry workers. This event is supported by the Association of Global Automakers and the Alliance of Automobile Manufacturers. Panelists: Ford – Curt Magleby, Vice President of Government Relations. Toyota – Robert Chiappetta, Associate Director of Government Affairs. Volkswagen – Gary Booth, Manager of Human Resource Development/Volkswagen Academy; Honda – Fred Payne, General Counsel, Secretary, and Manager of Corporate Affairs at Honda Manufacturing of Indiana. UAW – Josh Nassar, Legislative Director. Location: 385 Russell. Contacts: Caitlin Conant (Sen. Portman), 202-224-5190. Tara Andringa (Sen. Levin), 202-224-6221

LAND AND WATER CONSERVATION FUND – SPORTSMEN — 1:30 p.m. – 2:30 p.m. Discussion on Reauthorizing the Land and Water Conservation Fund and the importance for sportsmen. Speakers: Richard Burr, Senator for North Carolina; Jon Tester, Senator for Montana; Mark Udall, Senator for Colorado; Randy Newberg, host of the Sportsman Channels “Fresh Track with Randy Newberg.” CONTACT: Emily Black, eblack@skdknick.com, 202-464-6956. Location: Capitol Visitor Center (SVC 208).

COMMITTEE MEETINGS

HEALTH, EDUCATION, LABOR, AND PENSIONS — Executive Session. Agenda: 1) S. 315, Paul D. Wellstone Muscular Dystrophy Community Assistance, Research and Education (MD-CARE) Amendments of 2013; 2) S. 2154, Emergency Medical Services for Children Reauthorization Act of 2014; 3) S. 531, Promoting Physical Activity for Americans Act; 4) S. 2405, Trauma Systems and Regionalization of Emergency Care Reauthorization Act; 5) S. 2406, Improving Trauma Care Act of 2014; 6) S. 2539, Traumatic Brain Injury Reauthorization Act of 2014; 7) S.2511, A bill to amend the Employee Retirement Income Security Act of 1974; 8) Any nominations cleared for action. Location: 430 Dirksen. Notes: Time: TBD – in conjunction with votes. Place: Off the Floor.

AGRICULTURE, NUTRITION AND FORESTRY — 9:30 a.m. Hearing, “Meeting the Challenges of Feeding America’s School Children.” Witnesses: Betti Wiggins, Executive Director, Office of Food Services, Detroit Public Schools, Detroit, MI; Scott Clements, Director, Office of Healthy Schools and Child Nutrition, Mississippi Department of Education, Jackson, MS; Julia Bauscher, President-Elect; Director of School and Community Nutrition Services, School Nutrition Association; Jefferson County Public Schools, Louisville, KY; Katie Wilson, Executive Director, National Food Service Management Institute, University of Mississippi, University, MS; Phil Muir, President and CEO, Muir Copper Canyon Farms, Salt Lake City, UT. <http://www.ag.senate.gov/hearings/meeting-the-challenges-of-feeding-americas-school-children>. Location: 328A Russell.

ENVIRONMENT AND PUBLIC WORKS — Oversight hearing to examine the Environmental Protection Agency’s proposed carbon pollution standards for existing power plants. Witness: EPA Administrator Gina McCarthy. http://www.epw.senate.gov/public/index.cfm?FuseAction=Hearings.Hearing&Hearing_id=8655edd9-03ac-bb36-cab8-7913ec6c2b94. Location: 406 Dirksen.

FINANCE — 10 a.m. Saving for an Uncertain Future: How the ABLE Act can Help People with Disabilities and their Families. Witnesses: Cathy McMorris Rodgers, Member (WA-5), United States House of Representatives, Spokane, WA; Sara C. Wolff, Self-Advocate and Board Member, National Down Syndrome Society, Moscow, PA; Robert DAmelio, Volunteer Advocate, Autism Speaks, Charlotte, NC; Chase Alston Phillips, Financial Advisor, Alexandria, VA . <http://www.finance.senate.gov/hearings/hearing/?id=838dfbc2-5056-a032-52d6-5cff32022993>. Location: 215 Dirksen.

RULES AND ADMINISTRATION — 10 a.m. Hearings to examine S.2516, to amend the Federal Election Campaign Act of 1971 to provide for additional disclosure requirements for corporations, labor organizations, Super PACs and other entities, focusing on the need for expanded public disclosure of funds raised and spent to influence Federal elections. Location: 301 Russell.

APPROPRIATIONS — 2:30 p.m. Subcommittee on Department of Homeland Security hearings to examine insuring our future, focusing on building a flood insurance program we can live with, grow with, and prosper with. Witnesses: Panel I: Robert Menendez, United State Senator, New Jersey. Panel II: Craig Fugate, Administrator, Federal Emergency Management Agency. Panel III: Chad Berginnis, Executive Director, Association of State

Floodplain Managers; Patricia Templeton-Jones, Property Casualty Insurers Association of America; Executive Vice President and Chief Operating Officer, Wright National Flood Insurance Company; Donna Smith, Chairman, National Association of Realtors Flood Insurance Taskforce; Broker in Charge, Berkshire Hathaway Home Services, C. Dan Joyner Realtors. <http://www.appropriations.senate.gov/event/dhs-hearing-insuring-our-future>. Location: 138 Dirksen.

COMMERCE, SCIENCE, AND TRANSPORTATION — 2:30 p.m. Executive session. Agenda: 1. S. 1804, the Aviation Security Stakeholder Participation Act of 2013. 2. S. 1893, the Transportation Security Acquisition Reform Act. 3. S. 2030, National Sea Grant College Program Amendments Act of 2014. 4. S. 2094, Vessel Incidental Discharge Act. 5. S. 2250, Travel Promotion, Enhancement, and Modernization Act of 2014. Location: 253 Russell.

ENERGY AND NATURAL RESOURCES — 2:30 p.m. Subcommittee on National Parks Hearings to examine H.R.412, to amend the Wild and Scenic Rivers Act to designate segments of the mainstem of the Nashua River and its tributaries in the Commonwealth of Massachusetts for study for potential addition to the National Wild and Scenic Rivers System, S.1189, to adjust the boundaries of Paterson Great Falls National Historical Park to include Hinchliffe Stadium, S.1389 and H.R.1501, bills to direct the Secretary of the Interior to study the suitability and feasibility of designating the Prison Ship Martyrs' Monument in Fort Greene Park, in the New York City borough of Brooklyn, as a unit of the National Park System, S.1520 and H.R.2197, bills to amend the Wild and Scenic Rivers Act to designate segments of the York River and associated tributaries for study for potential inclusion in the National Wild and Scenic Rivers System, S.1641, to establish the Appalachian Forest National Heritage Area, S.1718, to modify the boundary of Petersburg National Battlefield in the Commonwealth of Virginia, S.1750, to authorize the Secretary of the Interior or the Secretary of Agriculture to enter into agreements with States and political subdivisions of States providing for the continued operation, in whole or in part, of public land, units of the National Park System, units of the National Wildlife Refuge System, and units of the National Forest System in the State during any period in which the Secretary of the Interior or the Secretary of Agriculture is unable to maintain normal level of operations at the units due to a lapse in appropriations, S.1785, to modify the boundary of the Shiloh National Military Park located in the States of Tennessee and Mississippi, to establish Parker's Crossroads Battlefield as an affiliated area of the National Park System, S.1794, to designate certain Federal land in Chaffee County, Colorado, as a national monument and as wilderness, S.1866, to provide for an extension of the legislative authority of the Adams Memorial Foundation to establish a commemorative work in honor of former President John Adams and his legacy, S.2031, to amend the Act to provide for the establishment of the Apostle Islands National Lakeshore in the State of Wisconsin, to adjust the boundary of that National Lakeshore to include the lighthouse known as Ashland Harbor Breakwater Light, S.2104, to require the Director of the National Park Service to refund to States all State funds that were used to reopen and temporarily operate a unit of the National Park System during the October 2013 shutdown, S.2111, to reauthorize the Yuma Crossing National Heritage Area, S.2221, to extend the authorization for the Automobile National Heritage Area in Michigan, S.2264, to designate memorials to the service of members of the United States Armed Forces in World War I, S.2293, to clarify the status of the North Country, Ice Age, and New England National Scenic Trails as units of the National Park System, S.2318, to reauthorize the Erie Canalway National Heritage Corridor Act, S.2346, to amend the National Trails System Act to include national discovery trails, and to designate the American Discovery Trail, S.2356, to adjust the boundary of the Mojave National Preserve, S.2392, to amend the Wild and Scenic Rivers Act to designate certain segments of East Rosebud Creek in Carbon County, Montana, as components of the Wild and Scenic Rivers System, S.2576, to establish the Maritime Washington National Heritage Area in the State of Washington, and S.2602, to establish the Mountains to Sound Greenway National Heritage Area in the State of Washington. <http://www.energy.senate.gov/public/index.cfm/hearings-and-business-meetings?ID=e67141a9-1523-4a19-b6f8-d2c12f30a4d1>. Location: 366 Dirksen.

HOMELAND SECURITY AND GOVERNMENTAL AFFAIRS — 2:30 p.m. Subcommittee on Financial and Contracting Oversight hearing on A More Efficient and Effective Government: The National Technical Information Service. Witness: Valerie Melvin, Director, Information Management and Human Capitol Issues, U.S Government Accountability Office. <http://www.hsgac.senate.gov/subcommittees/fco/hearings/a-more-efficient-and-effective-government-the-national-technical-information-service>. Location: 342 Dirksen.

COMMERCE, SCIENCE, AND TRANSPORTATION — 2:45 p.m. Full Committee hearing titled, "The Cruise Passenger Protection Act (S.1340): Improving Consumer Protections for Cruise Passengers." http://www.commerce.senate.gov/public/index.cfm?p=Hearings&ContentRecord_id=7efa55e4-de05-488f-8eb2-

72290a14da18&ContentType_id14f995b9-dfa5-407a-9d35-56cc7152a7ed&Group_idb06c39af-e033-4cba-9221-de668ca1978a. Location: 253 Russell. Notes: Immediately following the executive session.

INDIAN AFFAIRS — 3:30 p.m. An oversight hearing to examine Indian gaming, focusing on the next 25 years. <http://www.indian.senate.gov/hearing/oversight-hearing-indian-gaming-next-25-years>. Location: 628 Dirksen. US House: 10 a.m. — The House will meet for Morning Hour debate and at 12:00 p.m. for legislative business.

'ENLIST DUO' WEED KILLER — 10 a.m. At a congressional briefing, prominent doctors, scientists, and business leaders will urge lawmakers to pressure the Obama Administration to reject a proposal to sell a new toxic herbicide, known as "Enlist Duo" — a combination of 2,4-D and glyphosate. With Dr. Philip Landrigan, Dean for Global Health at Mount Sinai School of Medicine; Dr. Catherine Thomasson, Executive Director at Physicians for Social Responsibility; Doug Gurian-Sherman, Ph. D, Senior Scientist at Center for Food Safety; Gary Hirshberg, Co-founder of Stonyfield Farm and Chairman of Just Label It; John P. Wargo, Ph. D, Professor of Environmental Health and Politics at Yale University. Location: 1302 Longworth (new location). Contacts: Abigail Seiler, 202-547-9359. Sara Sciammacco, 202-939-9122. Notes: RSVP ssciammacco@ewg.org or aseiler@centerforfoodsafety.org if you plan to attend.

DEMOCRATIC CAUCUS — 10 a.m. Time approximate. House Democratic leaders hold press availability after Caucus meeting. Democratic Caucus Chairman Xavier Becerra (CA-34) and Democratic Caucus Vice Chair Joe Crowley (NY-14). Location: HVC-210 alcove stakeout location. Contacts: Daniel Herrera, 202-225-1400

MEDICAID EXPANSION CAUCUS — 10 a.m. Rep. Hank Johnson (GA-04) and Rep. G.K. Butterfield (NC-01), along with more than 25 House colleagues, will announce the formation of the State Medicaid Expansion Caucus. Members of the Caucus will highlight "the need for recalcitrant states to expand Medicaid through floor speeches, op-eds, social media posts, discussions with their colleagues and constituents." Location: Capitol Visitor Center, Congressional Meeting Room South, CVC 217.

REPUBLICAN LEADERSHIP STAKEOUT — 10 a.m. Stakeout with Speaker John Boehner (R-OH), Majority Leader-elect Kevin McCarthy (R-CA), Majority Whip-elect Steve Scalise (R-LA), Conference Chair Cathy McMorris Rodgers (R-WA), Conference Vice Chair Lynn Jenkins (R-KS) and Rep. Diane Black (R-TN). Location: Center steps, outside HC-5, US Capitol.

PROGRESSIVE CAUCUS – UNEMPLOYMENT INSURANCE — 12:30 p.m. Members of the Congressional Progressive Caucus, faith, labor, and non-profit leaders gather at the House Triangle as part of "Witness Wednesdays" to "stand in solidarity with millions of unemployed Americans." With Rep. Keith Ellison (D-MN); Rep. Jan Schakowsky (D-IL); Rep. Mark Pocan (D-WI); Cynthia Jarrold, Gamaliel; Pastor Michael Wilker of the Lutheran Church of the Reformation; Tiffany Aurora, American Sustainable Business Council; Betsy Wood, Institute for Policy Studies. Location: House Triangle. Contacts: Mike Casca (Rep. Ellison), 202-225-4755

Last Laughs:

LATE NIGHT POLITICAL HUMOR.

Stephen Colbert: “Another big issue from down there [US/Mexican border], thousands of Central American children pouring over the border and the President is doing absolutely nothing to stop it, and it’s no wonder. All that running and jumping onto trains and over fences, I’m sure it’s part of the First Lady’s ‘Let’s Move’ campaign.”

Stephen Colbert: “For months now, we’ve been sold a bill of goods and these kids are fleeing places back home like San Pedro Sula, Honduras, known as the murder capital around the world. ... Fortunately, Congress sent a seven-member delegation on a fact-finding mission to Honduras and Guatemala, and the truth could not be more what I wanted it to be. According to Congressman Steve Pearce, ‘Most immigrants from Central America who are crossing illegally into the United States are driven by economic reasons, not fear of physical danger in their homeland.’ That is a welcome relief. I mean, these kids aren’t worried about violence, only starvation.”

Stephen Colbert: “And folks, you know you can trust Pearce’s findings, because he cultivated an intimate understanding of the region during a visit to Guatemala and Honduras over the course of the weekend. It’s really all you need. I learned all about the desert by spending a weekend at Burning Man.”

Stephen Colbert: [Referring to his impending departure from ‘The Colbert Show’] “And I have but one regret – Barack Obama will outlast me in office, with two years of no Colbert to rein this man in. By the time he leaves in 2016, everyone in America will be pot-smoking, gay immigrants in a polygamous relationship with a biracial box turtle.”

Jimmy Fallon: “Guys, I saw that Hillary Clinton visited the headquarters of Twitter and Facebook yesterday. Yeah. Hillary would have also visited LinkedIn, but she already knows what job she wants.”

Jimmy Fallon: “Hillary visited the headquarters of Twitter and Facebook, while Bill visited the headquarters of Tinder and Snapchat.”

Seth Meyers: “Today, Secretary of State John Kerry traveled to Egypt and had to pass through a metal detector before he could meet with officials, which is ridiculous. Everyone knows he’s made of wood.”

Conan O’Brien: “John Boehner is in the news. John Boehner is blaming President Obama for the border crisis. Yeah, he’s blaming President Obama for the border crisis. Boehner is also blaming Obama for global warming, tensions in the Middle East, and the latest ‘Transformers’ movie.”

DOI in the News:

SECRETARY JEWELL MAKES ROUNDS ON THE HILL TO PUSH FULL FUNDING FOR LWCF. The E&E Daily (7/23) reports that "after traveling around the country to tout the successes of the Land and Water Conservation Fund, Interior Secretary Sally Jewell is now making her rounds on Capitol Hill to call for its reauthorization and full funding." Jewell noted that she met Wednesday "with a couple of members of Congress to discuss LWCF and that such meetings will continue through next week." She wouldn't "specify whom she met with but said it was important to sit down with the appropriators, authorizers and 'those who might not understand' the fund's history and its value for home districts."

Meanwhile, the E&E Daily (7/23) reports that a bipartisan group of lawmakers joined environmentalists Wednesday "to call on Congress to fully fund the Land and Water Conservation Fund, emphasizing its importance to the recreational industry as the fund hits its 50th anniversary." According to the article, "speaking to a packed Senate hearing room," four legislators, Sens. Susan Collins and Martin Heinrich and Reps. Dave

Reichert and Peter DeFazio, "pointed to parks and public lands in their states as proof that LWCF is successful."

Also, Politico (7/24, Guillén, 637K) reports that "the Land and Water Conservation Fund should be permanently reauthorized and have annual budgeting restored to \$900 million, according to a report out today from the LWCF Coalition, an alliance of conservation and recreation groups." The report says that "\$18 billion has been diverted over the program's lifetime for other purposes."

Additional coverage was provided by the Seattle Times (7/24, 1.11M) and the Bozeman (MT) Daily Chronicle (7/24, 54K).

SENATE BILL INCLUDES OBAMA'S \$615 MILLION EMERGENCY REQUEST TO FIGHT WILDFIRES. The E&E Daily (7/23) reports that the Senate's top appropriator on Wednesday will "introduce a bill to approve President Obama's \$615 million emergency supplemental funding request to battle wildfires." The measure will "also include the president's request to pay for future wildfires using disaster funds, which is a top priority for conservationists, loggers and sportsmen."

Obama Attributes Western Wildfires To Climate Change. The E&E Daily (7/23) reports that President Obama "attributed the West's severe fire season, including the largest wildfire in Washington state history, to climate change yesterday during a fundraiser in the Pacific Northwest." He said, "A lot of it has to do with drought, a lot of it has to do with changing precipitation patterns and a lot of that has to do with climate change."

UCS Report Warns About Costs Of Fighting Wildfires. USA Today (7/24, Rice, 5.76M) reports that on Wednesday, the Union of Concern Scientists warned in a report that "the costs of fighting wildfires are rising dramatically, and could keep climbing in the face of climate change that's contributing to longer fire seasons out West and the spread of housing developments near forests." Senior climate scientists with the group Rachel Cleetus stated, "The annual suppression cost has exceeded \$1 billion in each year since 2000." She added that "the actual damage costs — when including lost tourism revenue, the harm caused to public health and expenses related to watershed damage — can dwarf firefighting costs."

Additional Coverage. Additional coverage of wildfires was provided by the AP (7/24), Reuters (7/24, Cavaliere), the Los Angeles Times (7/24, Ganga, 3.42M), and the Christian Science Monitor (7/23, 566K). Coverage by the AP was also picked up by the Huffington Post (7/23, 11.54M), The Oregonian (7/24, 827K), the Bristol (TN/VA) Herald Courier (7/24, 81K), and the San Francisco Chronicle (7/24, 2.87M).

SEN. MURKOWSKI PRESSES SECRETARY JEWELL ON KING COVE ROAD. The Alaska Business Monthly (7/24) reports that Sen. Lisa Murkowski on Wednesday "sent a letter to Interior Secretary Sally Jewell criticizing her ongoing failure to protect the health and safety of the people of King Cove, Alaska." Her "latest letter comes exactly seven months after Jewell rejected a life-saving road to provide the isolated community with emergency medical access to the all-weather airport in neighboring Cold Bay." Murkowski wrote, "As you are likely aware, the months since your decision have held no small amount of disappointment, frustration, and anguish for those who live in King Cove. Throughout that time, both local leaders and Alaska's elected officials have repeatedly sought to convince you to reassess your position and to fulfill your promises to this remote community. Unfortunately, the record shows that you have not sought to resolve the very real risks residents face, and instead have done little to nothing to actually help them."

Also covering the story is KTVA-TV Anchorage, AK (7/24, 1K).

SEN. UDALL: OBAMA ADMINISTRATION NOT CONSIDERING DESIGNATION FOR VERMILLION BASIN. The E&E Daily (7/23) reports that Sen. Mark Udall "strongly dismissed claims by two GOP congressmen who recently suggested the Obama administration is considering designating a sensitive area on the state's northwest side as a new national monument despite local opposition." Udall said Interior Secretary Sally Jewell assured him Tuesday that President Obama will "not use his authority under the 1906 Antiquities Act to designate as a national monument the Vermillion Basin, a remote area of northwest Colorado prized by hunters and hikers for its wilderness character." Udall said, "Secretary Jewell confirmed for me today that the Vermillion Basin is not in line for a national monument designation through the Antiquities Act. When exercised in close consultation with the local community, the Antiquities Act is an important tool that has been used throughout Colorado's history to preserve and protect many of the iconic public lands that strengthen our special way of life

and support our outdoor-recreation economy.”

SUPPORT SOUGHT FOR EXTENSION OF INVESTORS' VISA, BAR ON POLITICAL ASYLUM. The Marianas Variety (7/24) reports that former Gov. Juan Nekai Babauta has “wrote Department of the Interior Assistant Secretary for Insular Areas Esther Kia’aina asking for her assistance in getting support from the Obama administration for the extension of E-2C CNMI-only investors’ visa and the bar on political asylum.” In an interview, Babauta, said “he sent his request to OIA because he foresees serious problems if the E-2C visa and the prohibition on political asylum are not extended and the CNMI is not exempted from the H visa cap.”

RESEARCHERS SAY CAROLINAS MAY FACE BILLIONS IN FLOOD DAMAGE BY 2050. The E&E Daily (7/23) reports that “recent reports warn that rising seas are putting the Carolinas at risk for potentially billions of dollars of property and infrastructure damage due to extreme flooding.” According to research by Climate Central, “within the next 40 years, property 4 feet above high tide will be in a danger zone in the two states.”

PASTORS URGE PROTECTION FOR BROWNS CANYON. In an op-ed for the Denver Post (7/24, Velasquez, Magaña, 923K), pastors Joseito Velasquez and Rigo Magaña, urges protection for Browns Canyon. They argue that we have a moral obligation to protect our public lands.

The piece also appears at the Burlington (CO) Record (7/24).

ADDITIONAL COVERAGE OF NATIVE HAWAIIAN RELATIONS. Additional coverage of Native Hawaiian relations was provided by the Honolulu Star-Advertiser (7/24, 379K).

America's Great Outdoors:

National Park Service:

NPS AWARDS PRESERVATION GRANTS FOR BATTLEFIELDS. The Washington Times (7/24, Harper, 465K) reports that the NPS has “awarded 21 preservation grants totaling \$1.3 million to preserve, protect, document and ‘interpret’ 75 of America’s significant but endangered battlefields dating from King Philip’s War, the Second Seminole War, the Indian Wars, the Revolutionary War, the War of 1812, and the Civil War.” NPSD director Jonathan B. Jarvis said, “Preserving these sites for future generations and providing a means for research and interpretation is a fitting way to honor our nation’s military heritage and the courage and service of our armed forces.”

MEMORIAL HONORING INJURED VETERANS BEING CONSTRUCTED IN DC. The AP (7/24) reports that a new memorial honoring injured veterans is “rising near the National Mall within view of the US Capitol.” The American Veterans Disabled For Life Memorial will “be the first memorial in Washington dedicated to veterans who come home with life-changing injuries.” The article notes that “it’s a project 16 years in the making and is set to be dedicated Oct. 5.”

Coverage by the AP was also picked up by the Washington Post (7/23, 4.06M), the Sacramento (CA) Bee (7/23, 582K), the Huffington Post (7/23, 11.54M), and WJLA-TV Washington (7/24, 125K).

ADDITIONAL COVERAGE: REPORT SHOWS ECONOMIC IMPACT OF NATIONAL PARKS. Additional coverage of the reporting touting the economic impact of national parks was provided by the Washington Post (7/23, 4.06M), the Washington Times (7/24, 465K), the Washington Examiner (7/24, 335K), the Staunton (VA) News Leader (7/23, 15K), WCAV-TV Charlottesville, VA (7/24, 1K), the Greenfield (IN) Daily Reporter (7/24, 31K), the Charleston (WV) State Journal (7/24, 1K), the Independent Press (NJ) (7/24, 6K), and the Lewiston (ME) Sun Journal (7/22, 22K).

Bureau of Land Management:

MEASURE WOULD ALLOW MUNICIPALS TO PURCHASE FEDERAL LANDS. The Elko (NV) Daily Free Press (7/24, 22K) reports that Sens. Harry Reid and Dean Heller are “in the process of completing a discussion draft of the Nevada Sagebrush Landscape Conservation and Economic Development Act.” The measure “proposes

creating about 1.5 million acres of sage-grouse habitat in the state." As a part of the legislation, "municipal jurisdictions may be able to purchase certain federal land parcels at no less than fair market value if the bill passes through Congress."

GROUPS OPPOSE WILD HORSE ROUNDUP. The North Country (NY) Gazette (7/23, 59) reports that the Cloud Foundation, "as well as numerous wild horse and animal advocacy groups, condemns the Bureau of Land Management's scheduled roundup which will eliminate all wild horses on 1.2 million acre checkerboard land... within the Great Divide Basin, Adobe Town and Salt Wells Creek Herd Management Areas (HMA)."

BLM TO OPEN WYOMING CAVE WITH FOSSILS. The AP (7/24) reports that "for the first time in more than 30 years, paleontologists are about to revisit one of North America's most remarkable troves of late Pleistocene fossils: The bones of tens of thousands of animals piled at least 30 feet deep at the bottom of a sinkhole-type cave." Now, the BLM is "preparing to reopen a metal grate over the opening" of Natural Trap Cave in Wyoming "to offer scientists what may be their best look yet at the variety of critters that roamed the foothills of the Bighorn Mountains during the planet's last glacial period around 25,000 years ago."

Fish and Wildlife Service:

FWS PROPOSES LIMITING SNAKE TRADE. The AP (7/24) reports that "federal wildlife officials recently proposed strict nationwide limits on importing and shipping boa constrictors and four other snake species in an effort to prevent them from being introduced into the wild." The FWS would "prohibit bringing the snakes into the country and shipping them between states except for scientific and educational purposes." The restrictions would "also apply to reticulated python, green anaconda, Beni anaconda and DeSchauensee's anaconda."

Coverage by the AP was also picked up by the Washington Post (7/23, 4.06M), Fox News (7/23, 6.72M), ABC News (7/24, 3.58M), the US News & World Report (7/23, 645K), and the Sacramento (CA) Bee (7/23, 582K).

REPORT: PRAIRIE POTHOLE REGION LOSING WETLANDS. The AP (7/24, Burbach) reports that "federal officials and conservationists say a recent report detailing wetland losses in the five-state Prairie Pothole Region over the past decade highlights the need for increased protection for the region that provides breeding and nesting habitat for the majority of the nation's migratory waterfowl." The FWS "released its Status and Trends of Prairie Wetlands report earlier this month that shows that the wetlands in the Prairie Pothole Region declined by an estimated 74,000 acres between 1997 and 2009 – an average net loss of 6,200 acres per year – and some conservationists say the trend hasn't slowed." Conservationists and wildlife officials "say more emphasis needs to be put on conservation easements and incentive-based programs that protect wetlands on farmland in the region while reimbursing farmers for lost income."

DOCUMENTS SHOW FWS HAS BEEN DISCUSSING D.C. BOOTH HATCHERY REMOVAL SINCE AT LEAST 2013. The Black Hills (SD) Pioneer (7/24, 11K) reports that "initial documents provided by the US Fish and Wildlife Service show that it indeed was discussing, at a minimum, the removal of the D.C. Booth Historic National Fish Hatchery's archives as early as June 2013." According to the article, "the documents, provided through a Freedom of Information Act (FOIA) request to the service's regional office in Denver, Colo., also show that despite a greater budget for the Fisheries program, the service still intends to reduce its footprint at D.C. Booth regardless of what happens with the federal budget."

FWS APPROVES ENDANGERED SPECIES LISTING FOR ZUNI BLUEHEAD SUCKER. The AP (7/24) reports that "environmentalists are welcoming the US Fish and Wildlife Service's decision to list a rare fish found near the Arizona-New Mexico border as an endangered species." The Center for Biological Diversity petitioned for federal protection for the Zuni bluehead sucker in 2004, and the center's Michael Robinson says "the listing being published in the Federal Registry will help protect the Little Colorado River's headwaters from water withdrawals."

FWS CLOSURES COQUILLE POINT STAIRS. The Coos Bay (OR) World (7/24, 34K) reports that the FWS has "closed the south staircase at Coquille Point due to public safety concerns, effective immediately." According to the article, "after inspection and consultation with engineers, the Service has concluded the stairs have suffered structural problems as a result of geologic shifting on the point."

COURT TOSSES PETA SUIT OVER FWS PERMITS. The Courthouse News (7/23, 7K) reports that “the government need not face claims that it illegally granted animal export and import permits without giving activists due notice to contest them, a federal judge ruled.” The FWS “issued fifteen permits to the Hawthorn Corporation to export tigers on May 9, 2013.” People for the Ethical Treatment of Animals “challenged the permits in August 2013, claiming Fish and Wildlife did not post notice ten days before issuing the permits as required under the Endangered Species Act, and habitually ‘grant[s] permits illegally,’ the ruling states.” US District Judge Royce C. Lamberth in Washington, D.C. sided with the FWS and dismissed PETA’s complaint.

FWS PLANS SEA LAMPREY SURVEY FOR MUSKEGON RIVER IN MUSKEGON COUNTY. The MLive (7/24, 474K) reports that an FWS “assessment crew will survey the Muskegon River in Muskegon County between July 30 and Aug. 6 to determine how many sea lampreys are in the river.”

US Geological Survey:

PARTNERSHIP ESTABLISHED TO MONITOR SPRINGS. The Suwannee (FL) Democrat (7/24, 16K) reports that “the Suwannee River Water Management District (District), the Florida Department of Environmental Protection (DEP), and US Geological Survey (USGS) have established a partnership to deploy special equipment to continuously monitor the health of springs within the District.” The article notes that the partnership will “use new technologies to provide real-time flow and water quality monitoring at Fanning Springs, Ichetucknee Blue Hole, Madison Blue Spring, Manatee Springs, and Troy Springs.”

Securing America’s Energy Future:

Onshore Energy Development:

STUDY: FEDERAL REGULATIONS ADEQUATELY PROTECT SAGE GROUSE FROM OIL, GAS DRILLING. The E&E Daily (7/23) reports that “a new industry-funded study asserts that current federal regulations governing oil and natural gas development in greater sage grouse habitat are more than adequate to protect the bird, eliminating the need to list the grouse under the Endangered Species Act.” However, “conservation groups rejected the study’s conclusions, arguing instead that regulations administered by the Bureau of Land Management and the Forest Service are insufficient and have allowed large declines in grouse populations and habitat where full-scale drilling is authorized.” The article notes that “at issue is a study released” Wednesday “by the Denver-based Western Energy Alliance, which represents more than 400 energy companies that collectively account for nearly a quarter of the nation’s natural gas and 21 percent of its oil production.”

OSM SLAPS KENTUCKY MINE WITH “CESSATION ORDER” AMID LANDOWNER FIGHT. The E&E Daily (7/23) reports that the OSM has “slapped a Kentucky mining company with a ‘cessation order’ for failing to obtain sufficient landowner consent.” OSM’s inspection, “filed with the court this week, said OSM has historically deferred to state law on issues dealing with landowner consent as long as it didn’t contradict SMCRA.” However, “it also found that state regulators should not have allowed mining ‘without notice to other surface owners as interested and potentially affected parties and without an opportunity to object to the permitting decision.’”

COURT HALTS DRILLING PERMITS NEXT TO CONDOR HABITAT AT PINNACLES NATIONAL PARK. The AP (7/24) reports that a “California court has delivered a setback to an oil company seeking to drill wells within a few miles of condor habitat at the state’s Pinnacles National Park.” A Monterey County Superior Court judge held “Monday that authorities in central California should have weighed the long-term environmental impact before they authorized an oil company to drill 15 oil wells next to the park.”

KEMPER COUNTY ENERGY FACILITY ON TRACK FOR COMPLETION. The E&E Daily (7/23) reports that “the Kemper County Energy Facility – which envisions grabbing 65 percent of the CO2 from a 582-megawatt gasification power plant here – is nearing completion, with hundreds of construction workers on-site.” According to the article, “in a tour last week, officials from Southern Co. and its subsidiary Mississippi Power, the developers of the \$5.5 billion plant, said they are on track for a May 31, 2015, operation date and plan to begin capturing CO2 at the gasification plant this fall.” The article notes that “the Kemper plant is at the center of US EPA’s plans to regulate carbon dioxide from new power plants and at the center of global emissions, considering that ‘low-rank’ coals like Mississippi lignite constitute half the world’s coal supply.”

Offshore Energy Development:

REVENUE-SHARING BILL DELAYED AMID BACKSTAGE DRAMA. The [E&E Daily \(7/23\)](#) reports that “there’s little doubt Sen. Mary Landrieu (D-La.) would like to see quick enactment of a bill to send more oil and gas drilling revenues directly to coastal states like her own, but it seems unlikely that such legislation will begin moving through the Senate anytime soon.” the article notes that “a combination of factors – Republican desires to not give Landrieu a pre-election win, a crowded slate of legislative priorities, broader Senate dysfunction and practical budgeting considerations – are complicating efforts to schedule one last legislative markup in the Energy and Natural Resources Committee that could see action on revenue sharing and liquefied natural gas exports, among other matters.” Several Republican aides said Wednesday that Landrieu had “started planning a markup for next week but will have to abandon the effort because of a variety of disagreements within the committee.” However, “Democratic aides downplayed those claims, saying no markup had been formally planned and dismissing talk of trouble as mostly rumors.”

Also, the [E&E Daily \(7/23\)](#) reports that Landrieu says “she is going to wait until the voters of Louisiana decide whether to send her back to Washington before attempting to push any more ambitious energy legislation through the Senate.” Landrieu said “it would be ‘presumptuous’ to lay out any detailed policy proposals until after the election, in which the three-term Democratic incumbent is facing a tough challenge from Republicans, including Rep. Bill Cassidy.” However, “she did reiterate her strong support for expanding energy development offshore Louisiana and on other federal lands and for building the Keystone XL pipeline.”

POLL SHOWS VOTER SUPPORT FOR MORE OFFSHORE LEASING. The [E&E Daily \(7/23\)](#) reports that “more than two-thirds of American voters support drilling US waters for oil and gas, and the same ratio say they would support candidates who back offshore drilling and more domestic oil and gas production, according to a new poll commissioned by the American Petroleum Institute.” API’s Upstream Group Director Erik Milito said, “American voters want more oil and natural gas produced here at home but do not see the federal government stepping up. The US today prohibits oil and natural gas development in 87 percent of its offshore territory. Policymakers can show real leadership by opening more offshore areas to exploration and drilling.”

Also covering the story are [The Hill \(7/24, Cama, 237K\)](#), the [FuelFix \(7/23, 7K\)](#), and the [Christian Science Monitor \(7/23, 566K\)](#).

THIRTY-FIVE CALIFORNIA CONGRESSMAN STAND AGAINST OFFSHORE OIL DRILLING. The [E&E Daily \(7/23\)](#) reports that “a group of House members and senators from California” on Tuesday “urged the Obama administration to block new offshore drilling off the state’s coast.” Rep. Lois Capps “led the effort by a group of 35 Democratic members who wrote to Interior Secretary Sally Jewell.” Sens. Dianne Feinstein and Barbara Boxer of California joined in the letter, which asked the BOEM “to prohibit new offshore oil and gas lease sales in the Northern California, Central California and Southern California Outer Continental Shelf Planning Areas.”

Also covering the story is the [Law 360 \(7/24, 18K\)](#).

OREGON, WASHINGTON LAWMAKERS OPPOSE OFFSHORE DRILLING. The [North Coast \(OR\) Citizen \(7/24\)](#) reports “fourteen members of Congress from Oregon and Washington are pressing the Obama Administration for continued protection of Oregon’s and Washington’s coasts from offshore drilling.” According to the article, “in a letter sent to the Administration Wednesday, July 23, the members urged the Bureau of Ocean Energy Management (BOEM) to exclude Oregon and Washington’s Outer Continental Shelf (OCS) Planning Area from any offshore oil and gas lease sales, as outlined under the proposed OCS Oil and Gas Leasing Program.”

CONTINUING COVERAGE OF DECISION TO ALLOW SEISMIC TESTING. In an editorial about the decision to allow seismic testing off the Atlantic coast, the [Richmond \(VA\) Times-Dispatch \(7/24, 323K\)](#) notes that environmentalists are worried about “the welfare of marine life that would be affected by the firing of sonic cannons” and that “offshore drilling for oil and gas could make global warming worse.” The paper accepts “the scientific consensus about man-made climate change, but in this case the concern seems misplaced.” According to the editorial, “progress on offshore drilling is moving so slowly it makes frozen molasses look volatile.” It concludes that “at the current rate, any actual extraction of offshore energy resources probably won’t

happen before the heat-death of the universe.”

Additional coverage of the decision to allow seismic testing off the Atlantic coast was provided by the [State Port Pilot \(NC\) \(7/24\)](#), the [Surf City \(NJ\) Sandpaper \(7/24\)](#), and the [Tampa Bay \(FL\) Times \(7/24, 75K\)](#).

Tackling America's Water Challenges:

BODY RECOVERED AT AMERICAN FALLS RESERVOIR. The [AP \(7/24\)](#) reports that “a body has been recovered from the shore of American Falls Reservoir in eastern Idaho.” The Power County Sheriff's Office in a statement on Wednesday says BOR workers found the body Monday.

Also reporting on the story are the [Idaho State Journal \(7/24, 54K\)](#), [KIFI-TV Idaho Falls, ID \(7/24, 23K\)](#), and [KTVB-TV Boise, ID \(7/23, 200K\)](#).

CALIFORNIA WATER PRICES SOAR FOR FARMERS AS DROUGHT GROWS. [Bloomberg News \(7/24, Vekshin, 2.76M\)](#) reports that “farmers in California's Central Valley, the world's most productive agricultural region, are paying as much as 10 times more for water than they did before the state's record drought cut supply.” According to farmers and local water officials, “the surge in water prices stems from the government decision to limit the water they provide.” Mat Maucieri, a spokesman for the BOR, said that the rising prices are “a function of supply and demand in a very dry year and the fact that there are a lot of competing uses for water in California.”

GROUNDWATER DROPS TO RECORD LOW IN SAN BERNARDINO BASIN. The [E&E Daily \(7/23\)](#) reports that “local officials say groundwater levels have hit their lowest point ever in California's San Bernardino Basin area.” According to Douglas Headrick, general manager for the San Bernardino Valley Municipal Water District, “the basin is about 500,000 acre-feet below full.”

EXPERTS CONCERNED BY TEXAS' DEPENDENCE ON GROUNDWATER. The [E&E Daily \(7/23\)](#) reports that many smaller communities in Texas “gets all of its water from an aquifer beneath it.” According to the article, “if their groundwater ever runs out, they would have few other feasible options.” The state's “dependence on groundwater concerns some hydrology experts.”

BAY DELTA CONSERVATION PLAN CRITICIZED. For the [San Jose \(CA\) Mercury News \(7/24, 691K\)](#), columnist Paul Rockwell writes that the Bay Delta Conservation Plan is “based on a single assumption: that California's water-ecosystem crisis is caused by a lack – a lack – of engineering projects in the Delta watershed.” Rockwell argues that the Delta does not need “more steel, more pumps, more cement (and more farmers dispossessed through eminent domain).” He adds that “the entire project goes contrary to the long-held consensus that fishery declines and mass habitat degradation are the direct result of excessive technological interventions in nature's ecosystems.”

Empowering Native American Communities:

GROWTH IN INDIAN GAMING TAPERING OFF. The [Las Vegas Review-Journal \(7/24, 386K\)](#) reports after a long period of robust growth, Indian tribal gaming revenues have leveled off in recent years and face an uncertain future, Congress was told on Wednesday. Indian gaming revenues have plateaued at around \$26 billion to \$28 billion annually, Kevin Washburn, Interior Department assistant secretary for Indian Affairs, told a Senate panel. Washburn said, “In fact, gaming revenues have been pretty flat since 2007. The days of tremendous growth are probably behind us for Indian gaming.”

NIGC REPORTS 0.5 PERCENT GROWTH IN 2013 TRIBAL GAMING REVENUES. The [Indian Country Today Media Network \(7/23, 45K\)](#) reports that “tribal casinos netted \$28 billion in revenues in 2013, the National Indian Gaming Commission reported on June 21.” Jonodev Chaudhuri, vice chairman of the NIGC, said, “In 2013, the Indian gaming industry saw the growth of its gross gaming revenues for the fourth consecutive year. This stable, positive trajectory underscores the ongoing significance of Indian gaming to larger tribal nation building and self-determination efforts.”

POJOAQUE PUEBLO PROPOSES ENDING GAMBLING PAYMENTS. The AP (7/24) reports that Pojoaque Pueblo has "proposed a gambling compact to the federal government that would allow the tribe to stop revenue sharing payments to the state." The Interior Department has "asked Gov. Susana Martinez and Attorney General Gary King to comment on Pojoaque's proposals for casino gambling on tribal lands north of Santa Fe."

Top National News:

OBAMA'S FUNDRAISING CONTINUES TO DRAW SCRUTINY. Just one of Wednesday evening's network newscasts, the CBS Evening News (7/23, story 5, 2:05, Pelley, 5.08M), covered the ongoing controversy over President Obama's decision to continue attending fundraisers at a time when there are wars going on in Ukraine and in Gaza, and a crisis at the US-Mexico border. CBS's Scott Pelley reported that "with battles raging overseas," the President "shuttled among fundraisers here at home, two of them today." Pelley then asked rhetorically, "Is now the best time to be on the road?" CBS News White House correspondent Major Garrett went on to note that "since taking office, President Obama has attended 398 fundraisers, nearly twice as many as his predecessor, George W. Bush, at the same point in his presidency." Garrett also reported that an unidentified "senior official" made the case that the President "resists canceling fundraisers or any part of his public schedule to avoid alarming the country during times of uncertainty."

Ed Henry reported on Fox News' Special Report (7/23, 2.15M) that as the President continues his fundraising swing on the West Coast, Republicans "stepped up their attacks, claiming he's not paying enough attention to a range of crises." According to Henry, "publicly," White House officials "say the President is always in contact with his national security team," and "privately say he'd look panicky by adjusting his schedule to every crisis." Henry said that is "a harder case to make...when even senior Democrats like Sen. Dianne Feinstein are now raising questions about his focus." Feinstein was shown saying, "I'm not going to tell the President what to do, but I think the world would very much respect his increased attention on this matter – and I think there ought to be increased attention."

In the first sentence of an article on the President's appearance at a Silicon Valley fundraiser, the San Jose (CA) Mercury News (7/24, Richman, 691K) reports that he has been "criticized for leaving Washington amid an array of international crises." The Mercury News goes on to report that "as the president passed the collection plate...he also had a full plate of international and domestic problems to contend with." Daniel Henninger, in his column for the Wall Street Journal (7/24, Subscription Publication, 5.89M), says the President's decision to keep up his fundraising schedule shows he is less concerned about global unrest than he ought to be.

The AP (7/23) reports that "with his travels coinciding with crises abroad in Ukraine and the Gaza Strip," the President "made a last-minute decision to scrap an appearance with late-night television host Jimmy Kimmel." But the AP adds that "there was still room for some glamour and glitz on the trip." Under the headline, "Obama's Fundraising Tour Rolls Into Hollywood," the Hollywood Reporter (7/24, Daunt, 615K) notes that "this is the president's 18th fundraising trip to Los Angeles since taking office and he's arriving with more than the usual critical baggage."

The Los Angeles Times (7/24, Mehta, Hennessey, 3.42M) reports that on Wednesday in Los Angeles, the President "delivered a tough-love talk to his biggest boosters...telling Democratic donors...that they need to step it up before November if he's going to get much done in his last two years in office." According to the Times, the President "is often candid about what he describes as Democrats' chronic problem...low turnout in midterm elections," and "his remarks Wednesday came with a sharper ribbing for a crowd he seemed to think could take it." The Times says the President told the donors that many Democrats "don't even know there's an election," but "Republicans get to the polls."

The San Jose (CA) Mercury News (7/24, Richman, 691K) reports that also on Wednesday, the President "told some of Silicon Valley's richest Democratic donors" that he "needs a Democratic House majority to further rev up the economy." The President is quoted as saying, "I'd love nothing more than a loyal and rational opposition, but that's not what we have right now."

The Daily Caller (7/23, Bloom, 408K) reported that at the DCCC event "hosted by real estate mogul George Marcus" on Wednesday, the President said "politics doesn't work in Washington...because we have one party

that has no agenda other than making government not work; whose primary function, primary purpose right now, if you distill their ideology, comes down to saying no to any efforts to help ordinary families get ahead." The President added, "Some of it is driven by pure political calculation because what they know is if government is not working, people get cynical; and if people get cynical they do not vote; and if people do not vote that advantages them."

The Washington Times (7/23, Chumley, 465K) noted that at a fundraiser on Tuesday in Seattle, the President said, "The problem is not the Republican Party, per se. The problem is this particular group right now – that have kind of gone off the rails."

Politico Analysis: Press Corps Deeply Unhappy Over Being Shut Out Of Obama Events. Under the headline, "Barack Obama Locks Out The Press – Again," Politico (7/23, Dove, Gerstein, 637K) reported that when the President met "donors from two top Democratic super PACs...the press wasn't invited." According to Politico, "access to the president continues to be limited in ways not seen in previous administrations," and while the "constantly repeated line that they're running the 'most transparent administration in history' tends to prompt snickers," at this point, "it's tipping toward outrage." Christi Parsons, the president of the White House Correspondents Association, is quoted as saying, "We think these fundraisers ought to be open to at least some scrutiny, because the president's participation in them is fundamentally public in nature."

Net Neutrality Activists Claim Obama Has Reneged On His Commitment. The San Francisco Chronicle (7/24, Garofoli, 2.87M) reports that on Wednesday, as the President "attended a \$32,400-a-couple fundraiser in Los Altos...roughly 100 net neutrality activists rallied nearby, urging him to do more to ensure the Internet remains a level playing field." The Chronicle notes that as a candidate, Obama "promised at a campaign stop at Google that he would 'take a backseat to no one' in preserving net neutrality," but, according to the Chronicle, "activists allege he has done the opposite."

The Hill (7/24, Hatter, 237K) reports that "the pushback" against the Administration's handling of the issue "has been especially strong in Silicon Valley, where many venture capitalists and startups have warned that FCC Chairman Tom Wheeler's plan could allow Internet service providers like Comcast or Netflix to charge websites like Hulu or Netflix to ensure that users have the fast Internet speeds," which "could shut out new innovative companies that can't afford to pay the tolls." According to the San Jose (CA) Business Journal (7/23, Thompson, Subscription Publication, 19K), Wednesday's net neutrality protest was "organized by MoveOn.org."

President Tells Donors They Are "Chronicling The Slow Deterioration Of Barack Obama." The Washington Post (7/23, Zezima, 4.06M) noted that at the fundraiser in Los Altos Hills on Wednesday, the President joked: "I've got so many friends, so many people who have supported me for so long. As I look back, I realize how many of you have pictures of me with no gray hair. You're chronicling the slow deterioration of Barack Obama."

ACA RULING ON HEALTHCARE SUBSIDIES COULD JEOPARDIZE COVERAGE FOR MANY. The New York Times (7/24, Goodnough, Subscription Publication, 9.79M) reports that the ruling this week in *Halbig v. Burwell*, "in which a panel of the United States Court of Appeals for the District of Columbia found that subsidies could be awarded only in states that set up their own insurance exchanges, raised the possibility that many of the 4.5 million people who were found eligible for subsidized insurance through the federal exchange would drop their new coverage." The Times notes that another Federal appeals court ruled differently on the matter the same day, and the conflicting court rulings "left much unresolved – both cases will be appealed further, and additional cases challenging the subsidies in federal exchange states are still making their way through trial courts in Indiana and Oklahoma."

House Republicans Attack ACA After Court Ruling. The New York Times (7/24, Pear, Subscription Publication, 9.79M) reports that congressional Republicans "resumed their campaign against the Affordable Care Act on Wednesday with new zeal, fired up by a ruling of a federal appeals court panel that said premium subsidies paid to millions of Americans in 36 states were illegal." Republicans "pointed to the ruling as evidence of problems in the law that could not easily be solved." At a Wednesday hearing before the House Ways and Means Committee, Seto J. Bagdoyan, acting director of the forensic audits and investigative team for the Government Accountability Office, testified "that undercover agents had obtained insurance coverage and subsidies using fake documents and fictitious identities. 'The federal marketplace approved coverage for 11 of our 12 fictitious applicants who initially applied online or by telephone,'" Bagdoyan said. House Republicans "seized

on the findings to attack Democrats who voted last year against legislation to require more extensive verification of income and other data used to compute subsidy payments."

WSJournal Urges Quick Supreme Court Appeal Of DC Circuit's ACA Ruling. The Wall Street Journal (7/24, Subscription Publication, 5.89M) editorializes in favor of an immediate appeal to the Supreme Court of the ruling by a three-judge panel of the DC Circuit Court of Appeals this week that overturned a key provision of the Affordable Care Act. The Journal argues that the Obama Administration is hoping that the full circuit will overturn the panel's ruling, and it urges attorneys for the losing parties to petition the Supreme Court for an expedited appeal.

Dionne: Ruling An Example Of Judicial Activism. In his column for the Washington Post (7/23, Dionne, 4.06M), E.J. Dionne writes that by "effectively gutting the Affordable Care Act on Tuesday, two members of a three-judge panel on the D.C. Circuit Court of Appeals showed how far right-leaning jurists have strayed" from impartiality. But, Dionne adds, the ruling "is unlikely to stand," as on the same day, "a three-judge panel from the 4th Circuit ruled unanimously the other way, upholding the law." Dionne notes that there is "a good chance that the 11-judge D.C. Circuit will take the decision away from its panel," as it is "virtually certain that a majority of the court's members disagrees with the panel's convoluted reading of the law and wants to avoid creating a needless conflict in jurisprudence with the 4th Circuit."

PRESIDENT SENDS TEAM TO TEXAS TO ASSESS USEFULNESS OF GUARD AT BORDER. Reuters (7/23, Mason) that the President has sent officials from the US Department of Defense and the Department of Homeland Security to Texas to determine whether the National Guard could be used to help maintain border security after having told Texas Gov. Rick Perry that he was open to the idea. The President is in California and will meet with the heads of Honduras, Guatemala and El Salvador later this week over the matter of unaccompanied minors immigrating to the US.

Republicans, Democrats Differ Over Approach To Resolving Border Crisis. USA Today (7/23, Davis, 5.76M) reports that Republicans and Democrats in the Congress are offering "competing proposals" to provide additional funding for border security, with Republicans backing a \$1.5 billion proposal developed by a task force led by Rep. Kay Granger (R-TX) and Appropriations Chairman Hal Rogers (R-KY), which is "less than half" the President's request and also includes some changes to the 2008 William Wilberforce Trafficking Victims Protection Reauthorization Act to speed the return of minors to their home countries, while Senate Democrats are proposing a \$2.7 billion plan, still "\$1 billion less than the president's request," but with "no new policies." The division between the parties "makes it increasingly likely" that no approach will be adopted before the August recess.

The New York Times (7/24, Schleifer, Subscription Publication, 9.79M) reports on the Republican proposal, saying that it is "setting up a standoff" with just "days to resolve" the differences with the Senate Democratic proposal.

The Washington Post (7/24, O'Keefe, Costa, 4.06M) reports that it is "unclear how rapidly the House could advance" the Republican proposal, or whether leaders of both chambers of Congress can reach an agreement before the August recess.

The AP (7/23) reports that Republicans are "having difficulty agreeing even among themselves," with Speaker John Boehner favoring extra funding "to address the border crisis," as well as changes to the 2008 law, while some conservatives appear to oppose such action. Among senators, Appropriations Committee Chairwoman Barbara Mikulski (D-MD) is proposing a \$2.7 billion plan to add "immigration judges, detention facilities and other resources," but opposes changes to the Wilberforce Act, while Sen. John McCain (R-AZ) has argued that the act must be repealed as part of any way forward.

Reuters (7/23, Cornwell) reports on the Senate Democrats' proposal, noting that it is \$1 billion less than the President requested. The debate between Republicans and Democrats appears to be focused on whether changes to the law regarding the protection of minors and deportations are necessary to address the current situation.

The Hill (7/24, Lillis, 237K) reports that Rep. Luis Gutierrez (D-IL) said yesterday that the President "is flat wrong"

in calling for changes to the Wilberforce Act as a means "to manage the wave of migrant children at the southern border." DHS Secretary Jeh Johnson said Tuesday that the Administration is "in active discussions with Congress" about changing the law. Gutierrez pointed out that the 2008 law simply continued protections enacted by Republicans in the "2002 bill to create the Department of Homeland Security."

The Hill (7/24, Schroeder, 237K) reports that some House conservatives have argued that the current situation is the result of the President's policies, and so it is "his responsibility to solve the problem, not Congress's." Gutierrez is cited as saying that Democrats are "united around resisting changes" to the law. Meanwhile, Speaker Boehner is asking the President "to publicly reiterate his support for the changes."

The AP (7/23) reports that Speaker Boehner, in a letter to the President, has asked him "to declare his support for changing" the law.

The Washington Times (7/24, Miller, 465K) reports that the Republican proposal in the House includes the use of the National Guard to gain "operational control" of the border, while adding "law enforcement operations in Central America and Mexico," as well as speeding "immigration hearings" for unaccompanied minors. Rep. Granger said that the proposal would help bring about the return of the children to central America, saying, "In our personal meetings with the Presidents of Honduras and Guatemala they both stated that they wanted their children back." The Administration is said to be in agreement with Congressional Democrats in opposing changes to the 2008 law.

McClatchy (7/23, Recio, Subscription Publication, 23K) reports that Granger said, "Our focus has been to ensure the safety of the children, and it has remained a top priority throughout this process."

The Huffington Post (7/23, Stein, 11.54M) reports that in response to the proposal, House Minority Whip Steny Hoyer (D-MD) has said that Republicans "should not expect many Democratic votes," adding, "I don't think the Senate will take the bill." Hoyer said that according to the President's "top immigration adviser, Cecilia Muñoz," the Administration wants to separate the questions of funding and changes to the law.

Roll Call (7/24, Lesniewski, Subscription Publication, 76K) reports on Sen. Jeff Sessions' (R-AL) response to the proposal, calling it "a colossal error to pass any kind of legislation that does not prohibit the president from granting legal status to five or six million people, as he's indicated he intends to do," adding, "I'm baffled that the House talking points didn't deal with that." He also issued a statement offering a more detailed response.

Migrants Fear Criminal Violence. The AP (7/23, Perez D.) reports on the experience of some from Honduras who fear criminal violence and yet are being returned by US authorities. In the case described in the article a woman who paid a smuggler to take her and her children to the US, she was returned without having had a hearing before an immigration judge.

Minutemen Founder Calls For Volunteers To Help Patrol Border. The Washington Times (7/24, Chumley, 465K) reports that Minutemen Project founder Jim Gilchrist announced a proposal called "Operation Normandy" to "recruit at least 3,500 volunteers who will go to the border to patrol." He "insisted that the campaign should remain peaceful." He said the volunteers would simply report what they see to the US border patrol.

Local Officials Concerned About Administration Efforts. The Washington Post (7/24, Roig-Franzia, Lowery, Chokshi, 4.06M) reports that the influx of unaccompanied minors and the government's reaction is "forcing an emotional, uncomfortable and politically treacherous conversation on policymakers at every level." The Administration, in its efforts to respond, has "frequently been met by resistance, suspicion or, in some cases, plain old puzzlement" even among Administration supporters. Local Democrats are cited objecting to proposals or expressing concern with secrecy in operations, saying that the public should be informed about what is being done. In response, "Homeland Security Secretary Jeh Johnson and other top officials held a conference call with governors on Tuesday."

FBI Reports Frauds Targeting Families Of Some Children In Custody. The New York Times (7/24, Robles, Subscription Publication, 9.79M) reports that the FBI has found that "swindlers" have gained access to "detailed information about migrant children being held at two American military bases" and have made use of it to "lure unsuspecting relatives into paying hefty sums to reunite their families." Such frauds have been "reported in 12

states" according to the FBI. So far, those frauds were all targeted at the families of children "housed at Lackland Air Force Base in San Antonio and at Fort Sill in Oklahoma."

Religious Leaders Call For Aiding Children. The New York Times (7/24, Paulson, Subscription Publication, 9.79M) reports that religious leaders generally have taken up the cause of "trying to mobilize support for the children, saying the nation can and should welcome them." And while they include Jewish leaders, as well as "Unitarian Universalists and Quakers to evangelical Protestants," yet "among the most agitated are Catholic bishops...and leaders of the Southern Baptist Convention." In addition to lobbying government, they are also "offering food, shelter and legal services."

Bush, Bolick Urge President And Congress To Work On Immigration Reform. Jeb Bush and Clint Bolick write in an op-ed in the Wall Street Journal (7/24, Subscription Publication, 5.89M) on the current border problems with unaccompanied minors, blaming the President and Congress for failing to agree on a sound US policy of secure borders and a compassionate response to those seeking to escape violence in their home countries. They argue for expanded visas for those fearing violence, but more vigorous efforts to return home all others. Above all they call for Congressional action to reform US immigration law.

Editorial Wrap-Up:

NEW YORK TIMES. "Gov. Cuomo's Broken Promises." In an editorial, the New York Times (7/24, Subscription Publication, 9.79M) says that New York Gov. Andrew Cuomo has failed to keep his campaign promise to "clean up Albany," and is now "looking as bad as the forces he likes to attack." The Times notes that an independent commission created by Cuomo "was not independent, and Mr. Cuomo's aides blocked it whenever it tried to investigate the governor's office or his biggest supporters." The Times adds that after the "abrupt shutdown of the commission in March," Preet Bharara, the United States attorney for the Southern District of New York, "was right to take charge" and demand "all the documents and unfinished work from the commission. Mr. Bharara was right to take charge."

"Iraq's Imperiled Minorities." An editorial in the New York Times (7/24, Subscription Publication, 9.79M) calls on world leaders to join UN Secretary General Ban Ki-moon, Pope Francis, and Chaldean Patriarch Sako in condemning ISIL's crackdown on the Christian residents of Mosul. The Times argues that ending "the persecution of Christians and other minorities is just one more reason Iraq's Parliament needs to choose a new prime minister able to unify the country and lead the military forces to defeat ISIS — as Mr. Maliki is not that person."

"Prosecutors Snooping On Legal Mail." The New York Times (7/24, Board, Subscription Publication, 9.79M) editorializes that the attorney-client privilege "is the oldest, broadest and most important of all privileges in the American legal system," but "for people sitting behind bars while awaiting trial or appealing a conviction, the attorney-client privilege stops abruptly at the email login screen." The Federal Bureau of Prisons in recent years "has made limited email access available to federal inmates, but the price of that access — as inmates are warned every time they log in — is allowing the government to monitor and read all messages sent and received." Federal prosecutors "in Brooklyn and around the country are taking advantage of this fact, freely accessing emails between inmates and their attorneys." The Times argues that if the Justice Department "refuses to change its policy," Federal judges should "disallow this unprincipled practice," which it sees as "a violation of prosecutors' duty to seek justice."

WASHINGTON POST. " Hamas's Depraved Strategy." The Washington Post (7/24, 4.06M) editorializes that Gaza's population is "fed up with Hamas's rule." The Post says the "next government of Gaza should be one that invests" social services, rather than "tunnels" for attacking Israel.

"Smarter Drug Sentencing." The Washington Post (7/23, 4.06M) editorializes that the "drug war's foremost legacy is a skyrocketing prison population; the number of drug offenders in federal prisons has increased 21 times since 1980." The US Sentencing Commission voted unanimously last week "to give nearly 50,000 inmates the chance to reduce their drug sentences," a move that, along with Attorney General Eric Holder's "push for prosecutors to avoid activating mandatory minimum sentences when charging low-level drug crimes and for an expansion of clemency," begins "to swing the pendulum back from the days of excessive punishment." However, the Post notes that congressional action is still necessary, and endorses two pending bills, the Smarter

Sentencing Act, which "would reform how prisoners are sentenced," and the Recidivism Reduction and Public Safety Act, which "reforms the way prisoners reintegrate into society."

"Chris McDaniel's Last Stand." In an editorial, the Washington Post (7/23, 4.06M) discusses Mississippi state Sen. Chris McDaniel's ongoing efforts to prove what he claims was widespread illegal voting in last month's GOP Senate primary runoff won by Sen. Thad Cochran, so that the challenger can contest the outcome of the election. Noting that the challenger's campaign is currently "embroiled in a court fight over unredacted access to original voting records," the Post adds, "If Mr. McDaniel would like to contest the results, he should end his campaign spree and present evidence of widespread fraud. If not, he must do what he should've done a month ago: concede."

WALL STREET JOURNAL. "Fast-Tracking ObamaCare To The Supreme Court." The Wall Street Journal (7/24, Subscription Publication, 5.89M) editorializes in favor of an immediate appeal to the Supreme Court of the ruling by a three-judge panel of the DC Circuit Court of Appeals this week that overturned a key provision of the Affordable Care Act. The Journal argues that the Obama Administration is hoping that the full circuit will overturn the panel's ruling, and it urges attorneys for the losing parties to petition the Supreme Court for an expedited appeal.

"Saving Taxpayers From Money Funds." An editorial in the Wall Street Journal (7/24, Subscription Publication, 5.89M) praises the SEC for voting to reduce the implied taxpayer safety net around money-market mutual funds. The Journal calls the move a step in the direction of a safer financial system and a victory for taxpayers.

"Putin's Measure Of Obama." The Wall Street Journal (7/24, Subscription Publication, 5.89M) editorializes that Russian President Vladimir Putin is capitalizing on President Obama's inaction over the Ukraine crisis. The Journal highlights Obama's decision to not make a clear statement about Russia's role in the shooting down of MH-17 as an example.

Washington Schedule:**TODAY'S EVENTS IN WASHINGTON.**

White House:

PRESIDENT OBAMA — The President will visit a community college in Los Angeles to deliver remarks on the importance of job-driven skills training, particularly for fast-growing sectors such as health care. Later, he will attend a DNC event.

VICE PRESIDENT BIDEN — The Vice President will deliver remarks at the National Urban League's Annual Conference in Cincinnati, Ohio. His remarks will be open press.

MICHELLE OBAMA — Mrs. Obama will attend a DNC event in Chicago. This event is pooled press.

US Senate: 9:30 a.m. — The Senate convenes and resumes consideration of the motion to proceed to S. 2569, the Bring Jobs Home bill.

COONS – MANUFACTURING — 9 a.m. Sen. Chris Coons, D-Del., a member of the Senate Appropriations Committee and leader of the Senates Manufacturing Jobs for America initiative, holds a pen-and-pad press briefing on prospects for additional legislation to help American manufacturers. Location: 127A Russell. Notes: RSVP to Jamie Serlin at Jamie_Serlin@coons.senate.gov.

MINIMUM WAGE — 12 p.m. Sen. Tom Harkin (D-IA), Rep. George Miller (D-CA), and Sen. Al Franken (D-MN) will hold a press conference to outline the "growing pay cut faced by low-wage workers" and to call for an increase in the minimum wage. With Brian Tucker, fast food worker and father from Virginia; Chris Sommers, Co-Owner of Euclid Hospitality Group (Pi Pizzeria Restaurants in Washington, D.C. and St. Louis, MO) and Member, Business For a Fair Minimum Wage; Chris Owens, Executive Director, National Employment Law Project (NELP). Location: S-115. Contacts: Franken Press Office, 202-224-2916. Harkin Press Office, 202-224-3254. Miller Press Office, 202-226-0853

CENTRAL AMERICAN OFFICIALS – PHOTO SPRAY — 2:30 p.m. Chairman of the Senate Foreign Relations Committee Robert Menendez and committee members will meet with the Presidents of Guatemala, Honduras and Foreign Minister of El Salvador. Media can take photos at the top of the meeting. Location: S-116. Contacts: Adam Sharon, adam_sharon@foreign.senate.gov.

COMMITTEE MEETINGS

ENERGY AND NATURAL RESOURCES — 10 a.m. Hearings to examine the nomination of Elizabeth Sherwood-Randall, of California, to be Deputy Secretary of Energy. <http://www.energy.senate.gov/public/index.cfm/hearings-and-business-meetings?ID=00a47c48-0ca0-4dd6-bcb9-2771cb22958d>. Location: 366 Dirksen.

FINANCE — 10 a.m. Social Security: A Fresh Look at Workers Disability Insurance. Witnesses: Stephen Goss, Chief Actuary, Social Security Administration, Baltimore, MD; Marianna LaCanfora, Acting Deputy Commissioner, Retirement and Disability Policy, Social Security Administration, Baltimore, MD; Rebecca Vallas, Associate Director, Poverty to Prosperity Program, Center for American Progress Action Fund, Washington, DC; Richard Burkhauser, Professor, Adjunct Scholar, Cornell University, American Enterprise Institute, Washington, DC. Location: 215 Dirksen.

Nimmich to be Deputy Administrator, Federal Emergency Management Agency, U.S. Department of Homeland Security. <http://www.hsgac.senate.gov/hearings/nomination-of-joseph-l-nimmich-to-be-deputy-administrator-federal-emergency-management-agency-us-department-of-homeland-security>. Location: 342 Dirksen.
Other: OAS MEETINGS — The Permanent Council of the Organization of American States (OAS) holds two meetings to receive the presidents of El Salvador, Guatemala and Honduras and to commemorate the anniversary of the birth of Simon Bolivar. Highlights: 10 a.m. Meeting to commemorate the anniversary of the birth of the Liberator Simon Bolivar. This meeting will be in Simon Bolivar Hall. 6:30 p.m. The Permanent Council receives in protocolary meeting the presidents of El Salvador, Salvador Sanchez Ceren; Guatemala, Otto Perez Molina; and Honduras, Juan Orlando Hernandez, in the Hall of the Americas. (Time changed from 5 p.m.) Location: Organization of American States, 17th Street & Constitution Avenue, NW Contacts: n/a (OASPress@oas.org) Notes: Journalists who wish to cover the meeting with the presidents of El Salvador, Guatemala and Honduras are asked to confirm their attendance in advance to oaspress@oas.org. The meetings will be broadcast live on the OAS Website.

RURAL OPPORTUNITY INVESTMENT CONFERENCE — July 23 – 24. The White House Rural Council hosts the inaugural Rural Opportunity Investment ROI conference. <http://www.youeventinfo.org/2Day/Agenda.html>. Location: Washington Hilton, Terrace Level, in the Columbia Ballroom, DuPont Circle, 1919 Connecticut Avenue.

TREASURES FROM THE LIBRARY OF CONGRESS — 9 a.m. – 3 p.m. 40 Junior Fellows Summer Interns, along with Library curators and specialists, will present a display of rare and unique items from the Library's collections. Remarks will be delivered at 10 a.m. by Deputy Associate Librarian for Library Services Blane Dessy. NOTE: This private event is open only to members of Congress and their staffs, the James Madison Council, Library staff and invited guests, and the press. Items include: A collection of Mayan "poison flasks dating between 600-900 C.E. that contain physical evidence of tobacco in the ancient culture; A rare 16th-century edition of "Mishneh Torah, a code of Jewish law considered to be the magnum opus of prominent rabbi Moses Maimonides; A rare 17th-century hand-illuminated Persian manuscript Examples of pulp fiction from the 1930s; A letter From Winston Churchills daughter-in-law, Pamela Digby Churchill, to American diplomat W. Averell Harriman (her future spouse), describing the events of June 6, 1944 (termed D-Day), the Allied invasion of Normandy during World War II; A check from Marilyn Monroe to actor, director and acting teacher Lee Strasberg for \$90, Aug. 10, 1955; An audition sheet showing Al Pacinos first audition for the Actors Studio, 1961; Examples of popular comic book editions featuring Batman and the Green Lantern. Location: Room LJ-119, Thomas Jefferson Building, 10 First Street, S.E. Contacts: 202.707.2905. Audrey Fischer afis@loc.gov ((202) 707-0022)

AEI – REP. RYAN — 9 a.m. – 10 a.m. Expanding opportunity in America: A conversation with House Budget Committee Chairman Paul Ryan. House Budget Committee Chairman Paul Ryan (R-WI) will unveil a new set of policy reforms aimed at reducing poverty and increasing upward mobility throughout America. This year marks the 50th anniversary of President Lyndon B. Johnsons declaration of the War on Poverty, which promised not only to relieve the symptoms of poverty but also to cure it once and for all. Introduction by the American Enterprise Institute President Arthur C. Brooks. Followed by a panel discussion. Moderator and panelist Robert Doar, American Enterprise Institute. Panelists: Stuart Butler, Heritage Foundation; Ron Haskins, Brookings Institution; Rep. Paul Ryan; Bob Woodson, Center for Neighborhood Enterprise, centered on the policy implications of Chairman Ryans plan. <http://www.aei.org/events/2014/07/24/expanding-opportunity-in-america-a-conversation-with-house-budget-committee-chairman-paul-ryan/> Location: EI, Twelfth Floor, 1150 Seventeenth Street, NW.

BROOKINGS – AMBASSADOR PASCUAL — 9:30 a.m. The Brookings Institution's Project on International Order and Strategy and Energy Security Initiative along with the Carnegie Endowment for International Peace will host a discussion with Ambassador Carlos Pascual, the State Department's special envoy and coordinator for international energy affairs. Ambassador Pascual will give his perspective on the future of international energy resources and policies. Location: 1779 Massachusetts Ave. NW. Notes: If you would like to register for this event, please contact Gail Chalef, Director of Communications for Foreign Policy at (202) 797-4396 or go to <http://camegieendowment.org/events/forms/?fa=registration&event=4513&lang=en>.

IMF BRIEFING — 9:30 a.m. Regular press briefing by William Murray, Deputy Spokesman, IMF Communications

Department. Location: Multimedia Center, IMF Headquarters 1, 720 19th St. NW. Contacts: Press Center (media@imf.org)

HERITAGE – ENERGY AND TRADE — 10 a.m. – 11:15 a.m. “Energy Exports and Free Trade: How the U.S. Can Take Advantage of a Tremendous Opportunity.” Featuring U.S. Rep. Cory Gardner (R-CO); Jamie Webster, Senior Director, Global Oil Markets, IHS; Ross Eisenberg, Vice President, Energy and Resources Policy, National Association of Manufacturers; Scott Lincicome, Adjunct Scholar, Cato Institute. Location: Heritage Foundation, 214 Massachusetts Ave. NE. Contacts: n/a, 202-675-1761

USDOT – HEATSTROKE PRESS EVENT — 10:30 a.m. U.S. Transportation Secretary Anthony Foxx and National Highway Traffic Safety Administrations Acting Administrator David Friedman will join federal officials from the Department of Health and Human Services, child advocates, and early learning providers as part of the “Wheres Baby? Look Before You Lock” public service campaign. The campaign highlights the dangers of children left in hot cars and how parents and the public can better protect our kids. Location: Rosemount Early Childhood Development Center, 2000 Rosemount Ave NW. Notes: All attendees must RSVP to public.affairs@dot.gov. Following the press conference, all participants and press will transition outside for a demonstration on how authorities and EMT professionals respond to a child being left inside a vehicle.

WILSON CENTER – CENTRAL AMERICAN MINORS — 11:30 a.m. – 12:30 p.m. “Migration of Central American Minors: Causes and Solutions.” Introduction: Cynthia J. Amson, Director, Latin American Program. Speakers: Hugo Martmnez, Foreign Minister, El Salvador; Luis Fernando Carrera Castro, Foreign Minister, Guatemala; Mireya Ag5/8ero de Corrales, Foreign Minister, Honduras. Moderator: Steve Inskeep, Host, Morning Edition, NPR. Location: 6th Floor Flom Auditorium, 1300 Pennsylvania Ave. NW. Notes: http://pages.wilsoncenter.org/ThreeMinisters_Event-SingleSpeaker_registration.html

CATO – LICENSED TO LIE – DOJ — 12 p.m. Discussion on Licensed to Lie: Exposing Corruption in the Department of Justice with author Sidney Powell, with comments by Alex Kozinski, Chief Judge, U.S. Court of Appeals for the Ninth Circuit; and Ronald Weich, Dean, University of Baltimore Law School. Moderated by Tim Lynch, Director, Project on Criminal Justice, Cato Institute. http://www.cato.org/events/licensed-lie-exposing-corruption-department-justice?utm_source=Cato+Institute+Emails&utm_campaign=7dc7bdb0b7-events&utm_medium=email&utm_term=0_395878584c-7dc7bdb0b7-141569086&mc_cid=7dc7bdb0b7&mc_eid=20513483bd. Location: Cato Institute, Hayek Auditorium, 1000 Massachusetts Ave. NW.

BROOKINGS, CARNEGIE – MILITARY INNOVATION – REP. FORBES — 12 p.m. – 1 p.m. The Congressional Role in U.S. Military Innovation : Preparing the Pentagon for the Warfighting Regimes of Tomorrow with Representative J. Randy Forbes (R-Va.). <http://www.brookings.edu/events/2014/07/24-congress-and-military-innovation>. Location: Root Room, 1779 Massachusetts Avenue, NW.

IAVA – VETERANS HEALTH CARE — 12:30 p.m. Iraq and Afghanistan Veterans of America (IAVA), the largest nonprofit, nonpartisan organization representing post-9/11 veterans and their families, will launch its 2014 Membership Survey, which details a range of critical issues – from suicide and mental health, to VA disability benefits, military sexual assault, post-9/11 GI Bill, employment, reintegration challenges and more. With Charlie Cook, Editor and Publisher of the Cook Political Report and a political analyst for National Journal magazine; Jackie Maffucci, PhD, IAVA Research Director; Terri Tanielian, Senior Social Research Analyst at the RAND Corporation; Phil Carter, Senior Fellow, Counsel and Director of the Military, Veterans, and Society Program at the Center for a New American Security. Location: National Press Club, 529 14th Street NW. Contacts: Gretchen Andersen, press@iava.org, 212-982-9699

CAPAL – WHIAAPI LEADERSHIP ROUNDTABLE — 12:30 p.m. – 1:30 p.m. The Conference on Asian Pacific American Leadership and the White House Initiative on Asian Americans and Pacific Islanders (WHIAAPI) host a roundtable discussion with Kana Enomoto, principal deputy administrator for the Substance Abuse and Mental Health Services Administration (SAMHSA). Location: National Education Association, 1201 16th St. NW. Contacts: CAPAL (info@capal.org), 877-892-5427

Last Laughs:

LATE NIGHT POLITICAL HUMOR.

Jimmy Kimmel: "I'm Jimmy, I'm the host of the show. Thank you for coming. I'm glad you are here. I'm glad I'm here, too. To be honest, I'm glad anyone is here tonight, because there's a big traffic jam right here in L.A. right now – bigger than usual because President Obama is in town. The President is in town to make everybody late for yoga lattes – is that what he's here for? He's here in L.A. to go to fundraisers, where he will spend the evening pretending to care about what celebrities think."

Jimmy Kimmel: "I feel like the President only comes to L.A. for money. He's like a college student who only comes home to do laundry and steal food from the refrigerator."

Jimmy Kimmel: "They shut down several major streets today for the President and they're going to do it again tomorrow. A good way to ensure that your approval rating remains in the low 40s is to see to it that it takes everybody three-and-a half hours to get home from work."

Jimmy Kimmel: "You know, if he's here for donations, he should just park his motorcade on the 405 and refuse to move until we all chip in to give five million dollars, right?"

David Letterman: "You know Hillary Clinton – they think she's going to run for president. ... Well, a college roommate of Hillary said that she really loves smoking that weed. That they could not keep enough weed around, and don't make the mistake of getting yourself between some weed and Hillary Clinton, because you just get trampled. Weed, weed, weed. So now...maybe she'll be President of the United States, and how about that White House vegetable garden now, ladies and gentlemen?"

Stephen Colbert: "Nation, as I hope you know, America continues to face a border crisis, with thousands of undocumented Central American children pouring over our southern border, and President Obama still rejects my plan to build a kid-apult. The kids will love it. It's got to be safer than those chain things."

Stephen Colbert: [Referring to the child immigration crisis] "And folks, it is only going to get worse, with over 52,000 children in Federal custody and as many 90,000 expected by the end of the year. That is a flood. It's like El Niño is raining actual niños."

Jimmy Fallon: "Yesterday, a judge said that Obamacare is an acceptable substitute for state-run health insurance. Yep. He actually said that, 'It's just like Domino's being a good substitute for Pizza Hut.' But then Americans said, 'Well, either way, it's taken you guys way longer than 30 minutes to deliver it, so give us our free healthcare.'"

Jimmy Fallon: "Some more political news. In a new interview with NPR, Republican Senator Marco Rubio said that Hillary Clinton is not a candidate for the 21st century. Then he continued his interview on the radio."

Seth Meyers: "Let's start with some political news. Senator Marco Rubio told reporters Hillary Clinton is out of touch with voters and said that she is a 20th century candidate. That's ridiculous. Hillary started campaigning way before the 20th century."

Seth Meyers: "Despite the recent unrest in the Middle East, President Obama's approval rating has stayed constant at 42 percent. Wow. He can't even get that to change."

Seth Meyers: "Vladimir Putin has signed a new law legalizing gambling in parts of Crimea. Although, if you live in Crimea, life's already kind of a gamble."

EVENT MEMORANDUM FOR THE SECRETARY

COURTESY VISITS WITH APPROPRIATIONS MEMBERS

DATE: July 28, 2014
LOCATION: Offices in the Longworth and Rayburn House Office Buildings
TIME: See AGENDA
FROM: Pam Haze and Denise Flanagan, PMB; 208-4775 and 208-5308
Rhea Suh, AS-PMB; 208-1927

I. PURPOSE

The purpose of these meeting is to continue to build relationships with members of the House Interior Appropriations Subcommittee. Discussions will focus on the outcome of House action on the 2015 budget, issues of interest to these members, and to highlight two of your legislative priorities—reform of the fire budget and full funding for LWCF.

These members are on the appropriations committee and are generally in support of the fire reform. The Democrats support the proposal and Simpson's legislation. The Republican members cannot say that they differ with the views of Paul Ryan.

July 23 is the 50th anniversary of LWCF passing the House and provides a relevant hook to discuss the need to reauthorize LWCF. The Anniversary of both LWCF and the Wilderness Act being signed into law is September 3rd, 2014. The LWCF authorization will expire in September 2015.

II. AGENDA

Monday, July 28

10:30-11:00 am, 2458 Rayburn, Congressman Cole, R-Oklahoma

11:15-11:45 am, 2269 Rayburn, Chairman Calvert, R-California

Friday, July 25

9:30-10:00 am, 1714 Longworth, Congressman McCollum

III. TALKING POINTS

FIRE:

- We cannot wait another fire season to get a rational budgeting process for fire.
- We need your continued leadership to support the reform. Although the necessary legislative provisions are not in the House Interior bill, we believe they will be in the Senate bill and should be included in a 2015 omnibus.
- There are other vehicles to add this to—or bring it to the floor as a standalone—we are talking with the authorizers and asking for their help.
- Having come from a career in the private sector, one of the biggest surprises I found was that we are in the 'forever' business – and Americans expect us to manage our public

lands for eternity – yet we do so with short-term budgets that provide very little certainty and predictability to help us carry out our missions.

- With wildland fire seasons becoming longer and more intense, we can't follow the status quo when it comes to budgets.

If more details are needed:

- We budget for fire costs using a ten-year average of fire suppression costs. Yet, in a peak season with catastrophic fires, we are forced to move funding from programs across the Interior and U.S. Forest Service budgets to meet the increased costs.
- In 2012, Interior's fire suppression costs were **23 percent higher** than the ten-year average calculation, requiring the Department to transfer funds from other important accounts – including fire preparedness, fuels management, and fire restoration funds.
- In 2013, Interior and Forest Service **redirected or borrowed more than \$650 million** to fund increased firefighting costs. Over the last ten years, the two agencies have spent one-third more than was budgeted for firefighting.
- Modeled on the Federal Emergency Management Disaster Relief program, the proposal would change how fire suppression costs are budgeted to treat funding of extreme wildfire seasons in the same way other emergency disaster needs are met.
- The proposal would create a new wildfire cap adjustment – a ceiling, not a funding target – to fund the most severe one percent of fires. **It's worth emphasizing that the most severe one percent of fires cause 30 percent of the annual suppression costs.**

LWCF:

- The Land and Water Conservation Fund improves the quality of life and supports the economy in communities in every State and county. It secures a uniquely American **legacy for our children and grandchildren.**
- LWCF helps support a **\$646 billion recreation economy** and one analysis found that for **every dollar invested it returns four to the local economy.**
- **LWCF funds have been spent in every county** across the country since 1964. This is not a fund that helps a few states or localities, but rather it promotes recreation, outdoor activities and conservation across the nation.
- I want to ask for your support for LWCF. We are working diligently with Congress to move this forward in combination with PILT.
- If you can help us, I'd like to work with you.

Additional LWCF facts:

- Land and Water Conservation Fund Act passed in 1964 by a **visionary, bipartisan Congress**, and signed into law by President Lyndon Johnson
- For the past 50 years, a small portion of the OCS revenues that are collected from oil and gas drilling have been deposited into the Land and Water Conservation Fund. To date a total of \$35 billion has been collected. To date a total of \$16 billion has been appropriated, leaving an unappropriated balance of nearly \$19 billion.
- **The Act authorizes a total of \$900 million annually** to provide recreational opportunities and conservation projects for all Americans to enjoy—at no cost to taxpayers.

- **Only once in its 50 year history** has it been fully funded at the authorized level of **\$900 million**
- It will expire in 2015 and **President Obama** has proposal to fully and permanently fund the Land and Water Conservation Fund

VI. BACKGROUND

Fire: The Supplemental request submitted by the White House on July 8 for Unaccompanied Children and includes additional suppression funding for the Forest Service and the necessary language for the fire budget reform.

Senator McCain (with support from Senator Flake) introduced an alternative proposal to the Crapo/Wyden proposal and the Simpson proposal, which are both aligned with the Administration's budget and supplemental request. This has created debate about the annual cost our proposal to fund extremely large fire costs from the disaster cap.

House Ranking Member DeFazio is working on getting a discharge petition filed with sufficient signatures to get the fire legislation moved to the House floor for consideration. Republicans are not signing the petition, preventing the discharge, but we are considering if there are Republicans you can ask for their signature on the petition. In your meetings, you should raise this with the House Republicans, and inquire why they are not joining this effort. If they are not going to support the fire reform in Supplemental what do they suggest we need to go to get it on the House Floor?

LWCF: Discussion with House members has been about linking full funding of LWCF with PILT and Secure Rural Schools. There is limited interest to introduce a proposal, as it is likely it would contain provisions that would not be acceptable to the conservation community, Senate or House Democrats. The House appears to be waiting for something to come from the Senate. Our goal is to bolster the support on both sides and find a way to play an active role in moving the idea from the sidelines into the foreground and create support for a proposal that would most likely be moving in the fall – potentially as an addition to a transportation bill or tax extenders.

IV. KEY FACTS/HOT TOPICS

In addition to raising the need for the BLM oil and gas inspection fee, members have key issues that they are likely to raise with you. Below are some of the topics we think will be discussed.

Oil and Gas Inspection Fees

The 2015 budget proposes a fee for oil and gas inspection for onshore operations on public lands paralleling the fee that is charged for inspection of offshore oil and gas operations.

- The offshore fee was instituted in 2012 and has been well supported by industry because it allows for certainty and ongoing support that promotes development within an effective framework of protection for health and safety and the environment.
- It makes sense to charge industry for this very technical, labor-intensive process.
- BLM oversees 100,000 wells and keeping up with the inspection and enforcement workload is challenging within the ever-tightening budget. The oil and gas budget has

declined 20% since 2007 when accounting for inflation. Since 2007, the inspection workload has risen by 41%.

- The fee, and the assurance it would provide for a dependable stream of income to maintain adequate capacity.
- In the absence of sufficient resources to fund these activities, BLM has to redirect from other activities, which could impact ongoing development.

NOTE: The House added funds and a new subactivity for oil and gas inspections and enforcement that funds the program at levels comparable to the proposed inspection fee.

Oil and Gas Management	2014	2015 Request	2015 House Mark	Change House v. 2015 PB	Change House v. 2014
Oil and Gas Management (appropriated)	80,877	53,183	52,657	(526)	(28,220)
Inspection Fees	0	48,000	0	(48,000)	-
Oil and Gas Inspection and Enforcement *	0	0	48,000	+48,000	+48,000

* House established a new subactivity dedicated to oil and gas inspections

Congresswoman Nita Lowey D-New York:

National Heritage Areas:

- Congresswoman Lowey is an advocate for the National Heritage Areas, specifically the Hudson River Valley National Heritage Area.
- The National Heritage Areas program has been in place for 29 years and has developed into a partnership program to preserve and protect natural and cultural resources as a practical and meaningful alternative to new park designations.
- The program is comprised of 49 congressionally designated areas.
- The 2015 budget includes \$9.2 million for the program, a reduction of \$9.1 million from the 2014 enacted level of \$18.3 million.
- The Interior bill was amended in Committee action to fund heritage areas at \$18.3 million. Congresswoman Lowey was key in restoring funding to the 2014 level at Committee markup.
- The Department values the National Heritage Areas program. The heritage areas promote recreation, outdoor activity, coalesce community preservation efforts, and are good partners to the National Park Service.
- The Department continues to support the extension of authority for expiring areas through language in the Interior bill.

Centennial:

- In 2016, the National Park Service begins its second century of management, with 84 million acres in 401 park units
- We expect a significant increase in visitation and we need to be prepared with visitor programs, functional facilities, and adequate support services.
- The 2015 budget makes a modest down payment on the needs in parks. An increase of \$30 million is requested for park operations and \$10 million is requested for the NPS Centennial Challenge that will leverage Federal funds with partner contributions.
- The House Committee bill includes the \$40 million request. We are very appreciative.
- Our budget also suggested that Congress pass legislation to fund \$400 million in mandatory funding for key investments in infrastructure.
- The NPS has a significant backlog in facilities and roads needs and this would improve our ability to address these needs, increase access to parks and park programs, and support the visitation levels we expect in the second century.
- The President's Opportunity, Growth and Security Initiative also identified \$100 million for investments in park assets.

Highlands Conservation Act:

- Ranking Member Lowey is supportive of the Highlands Conservation Act of 2004, which is designed to assist Connecticut, New Jersey, New York and Pennsylvania in conserving land and natural resources in the Highlands region through Federal assistance for land conservation projects.
- Highlands funding is provided to the State to acquire land or an interest in land to permanently protect resources of high conservation value.
- The 2015 budget request did not include funding for the Highlands Conservation program, but the House bill includes \$3.5 million for Highlands Conservation grants.

Chairman Ken Calvert R-California:

2015 Appropriations Bill:

- On July 15, the House Appropriations Committee approved the fiscal year 2015 Interior and Environment Appropriations bill on a vote of 29-19.
- The bill shifts significant resources to DOI from other agencies, and significantly reduces LWCF and climate change programs as compared to the request.
 - LWCF is reduced from the requested level of \$246 million to \$101 million, a cut of \$145 million.
- The bill includes \$11.1 billion, \$457.6 million above the 2015 budget request and \$562.7 million or 5.3% above the 2014 level for Department of the Interior programs. By comparison the EPA was reduced by 9%.
- The most significant departure from the 2015 request is the inclusion of \$442.0 million for Payments in Lieu of Taxes and \$63.2 million for similar payments through the National Wildlife Refuge Fund. These funds were not included in the President's 2015 Budget Request and instead a mandatory one-year extension proposal was included for the PILT program. The funding for the National Wildlife Refuge Fund was reduced in the Committee mark-up to \$38 million.
- The bill includes an increase of \$103 million for the Wildland Fire program, fully funding the ten year average and increasing amounts for hazardous fuels and burned area rehabilitation.

- The bill also increases funds for Indian programs, \$80 million above the budget request and \$114 million over 2014. The increases are provided for BIE Tribal Grant support, education, and school construction.

Drought:

- Chairman Calvert voted in support of the Sacramento-San Joaquin Valley Emergency Water Delivery Act, H.R. 3964, sponsored by Rep. Valadeo and passed by the House. This bill includes limitations of Secretarial authority regarding water availability for species protection or restoration in the Central Valley.
- Senator Feinstein issued a strong press statement in opposition to this legislation and alternative legislation.
- The Administration remains committed to an ‘all in’ approach to the Federal response to drought conditions in the West.
- Interior continues to work closely with the State to ensure a balanced and coordinated approach to provide for the water needs of people, agriculture, businesses, power and the environment.
- Since 1992, Reclamation has invested \$524 million in water reuse projects in California through the Title XVI program. In 2013, the 36 Title XVI projects located in California made available an estimated 350,000 acre-feet of recycled water, making an equivalent amount available for other uses and helping diversify the water supply.

Endangered Species Act

- Chairman Calvert would like to explore ways to improve the ESA.
- The Chairman regularly has concerns about the impact of the ESA on the economy. The most recent species being the upcoming listing decision for the sage grouse.
- The 2015 House bill includes a provision to delay the decision for an additional year.

Congresswoman Betty McCollum D-Minnesota:

Indian Programs:

- Congresswoman is an advocate for Indian programs and funding.
- The 2015 bill also increases funds for Indian programs, \$80 million above the budget request and \$114 million over 2014. The increases are provided for BIE Tribal Grant support, education, and school construction.

School Construction

- The 2015 budget includes \$2.3 million for the Beatrice Rafferty school in Maine. Within the constrained budget allowance this is the amount we were able to carve out. Funds will be used to conduct the first phase of construction and site development.
- The Subcommittee increased funding for Indian education, including adding \$57.5 million for school construction. This will allow us to complete construction of the three schools that are on our priority list.

Asian Carp:

- Congresswoman McCollum shares a concern for the spread of Asian Carp with her colleagues on the Subcommittee and supports the work of the FWS and the USGS to address the issue.

- Efforts to control and limit the spread of Asian carp into the Great Lakes and the Upper Mississippi are a significant concern to the Administration.
- The 2015 budget includes an increase of \$6.4 million in the budgets of FWS and USGS.
- The USGS is working to develop a chemical control targeting Asian carp, developing lures to help in removal, testing methods to restrict the passage of the fish, and developing early detection tools.
- Additional funds in 2015 will take this research from “proof of concept” to be ready for the field.
- FWS efforts are focused on surveillance and monitoring. This year, FWS opened its laboratory facility in Lacrosse, WI to analyze environmental DNA (eDNA) samples taken from the Great Lakes and its tributaries.

Invasives:

- Congresswoman McCollum shares a concern for the spread of invasive species, not only due to their harm to the ecosystem, but their ability to harm the economy through industries like timber, agriculture, and tourism.
- Congresswoman McCollum believes we need a coordinated plan that includes all levels of government, along with universities, private, nonprofit organizations.
- The 2015 budget request includes \$101 million across the Department’s bureaus for work related to invasive species.

Congressman Tom Cole R-Oklahoma:

Indian Programs:

- Tom Cole has helped to build support for Indian programs and funding for DOI Indian Affairs and the Indian Health Service is a bipartisan priority for the Interior Subcommittee.
- The 2015 bill also increases funds for Indian programs, \$80 million above the budget request and \$114 million over 2014. The increases are provided for BIE Tribal Grant support, education, and school construction.

School Construction

- The 2015 budget includes \$2.3 million for the Beatrice Rafferty school in Maine. Within the constrained budget allowance this is the amount we were able to carve out. Funds will be used to conduct the first phase of construction and site development.
- The Subcommittee increased funding for Indian education, including adding \$57.5 million for school construction. This will allow us to complete construction of the three schools that are on our priority list.

Chickasaw National Recreation Area

- Congressman Cole supports the opportunity for tribal-Federal partnership at the Chickasaw National Recreation Area, which is a unit of the National Park Service.
- The Park Service is working on an agreement to formalize the working relationship between the Tribe and NPS. A final draft of the general agreement is with the Chickasaw Nation Governor for signature and is expected to be signed soon.
- The draft agreement has three parts: (1) NPS occupancy of the Chickasaw Nation Visitor Center; (2) sharing of interpretive expertise between Chickasaw National Recreation Area and the Chickasaw Nation; (3) proposed construction of a bridge connecting the

Chickasaw Nation Visitor Center with Chickasaw National Recreation Area. Both parties are supportive of the terms of the draft agreement.

- The park is currently working on an environmental assessment of the proposed bridge project.

EVENT MEMORANDUM FOR THE SECRETARY

BROWN BAG LUNCH WITH BLM EMPLOYEES

DATE: July 28, 2014
LOCATION: Office of the Secretary
TIME: 12:15PM – 1:15PM
FROM: Janet Lin, COS, BLM (202)208-3801

I. PURPOSE

You will be hosting a brown bag lunch for selected BLM employees in your office. This is one of a series of brown bag lunches you are having with DOI staff. The attendees represent a number of BLM Offices.

II. PARTICIPANTS

John Ajak, *BLM Washington Office*
Petroleum Engineer

John began his career with the BLM at the Jackson, Mississippi Field Office. He is a key player in the redesign of the BLM's oil and gas automated database and the hydraulic fracking rule. A Pennsylvania State University alumnus, John recently completed a Master's Degree in Engineering Management at the George Washington University.

Joe Ashor, *BLM Washington Office*
Wilderness Specialist

Joe began his career in 1985 with the U.S. Forest Service in Western Montana where he served as a Wilderness Ranger and Wilderness Planning Specialist. He was among a team of individuals who pioneered the use of the Limits of Acceptable Change Wilderness Planning System on both U.S. Forest Service and BLM wildernesses. He joined the BLM in 1988 serving as an Outdoor Recreation Planner in Dillon, Montana, followed by Grand Junction, Colorado, and Salem, Oregon. As the manager of the Yaquina Head Outstanding Natural Area in Newport, Oregon, Joe managed a historic lighthouse, a large interpretive center, and had over-site over numerous Wild and Scenic Rivers. He has spent the last five years in Washington, D.C. working in the National Landscape Conservation System Directorate where he is currently serving as the BLM's Senior Wilderness Specialist.

Lissa Eng, *BLM Washington Office*
Public Affairs Specialist

Lissa is an AmeriCorps graduate. Her colleagues describe her as an energetic and delightful presence since she joined the BLM in February.

Joe Freeland, *BLM Washington Office*
Senior Advisor, Fire and Aviation Directorate

Joe began his career on the Lincoln National Forest in 1984 and worked primarily on engines, helitack, and prescribed fire projects. Later Joe served in a variety of positions in the BLM in Alaska, New Mexico, Washington DC, Nevada, and Idaho, as an Engine Supervisor, Helitack

Foreman, Hotshot, Fire Control Officer, Fuels Specialist, Fire Management Officer, Fire Program Advisor, and Associate District Manager. Joe is currently the BLM Senior Fire Program Advisor. Professionally, Joe is most proud of developing employees and programs that he works with as well as making a positive difference in long term vegetation management of public lands.

Corey Grant, BLM Washington Office

Chief, Business Resources

Corey is the Chief of Business Resources for the BLM. He has over 20 years of government service with the bureau, acting in several capacities including on Type I and II emergency response teams with the National Interagency Fire Center, and Deputy State Director at the BLM Eastern States. Corey is also a United States Marine Corps veteran who served during Operation Desert Shield and Desert Storm.

Jayne Lopez, BLM Washington Office

Realty Specialist

Jayne is a realty specialist with the BLM's National Renewable Energy Coordination Office. The program lead for the Solar and Wind Energy program, Jayne has field experience in both Alaska and California. Over the past three years, Jayne has provided leadership in the preparation of the BLM solar and wind energy regulations and the development of solar and wind energy policies. She is also the point-of-contact for GAO and OIG renewable energy audits.

Sabria Mathis, BLM Washington Office

Business Manager, Resources and Planning Directorate

Sabria has been employed with the BLM since 2001, beginning her career as a student intern in the Division of Management Services. She served for six years in the areas of Internal Management Control, OIG GAO Audit, and Organizational Management before moving to the BLM Budget Office where she was responsible for budget formulation, execution, and performance management for several land resource programs. Since 2011, Sabria has served as the Business Manager for the Resources and Planning Directorate, where she oversees the directorate's finances, information resource management, human resource, and administrative support functions. She is a recent graduate of the BLM's Emerging Leaders Program. Sabria Mathis is a native of Washington, DC, and received her B.A. in Business Administration from the University of Maryland Eastern Shore in 2004. She is an active member of her community and enjoys serving as a mentor and member in several youth and young adult volunteer and outreach organizations.

Markci Metcalf, BLM Washington Office

Deputy Ethics Counselor

Markci (pronounced, "Mark-I") is a Delaware native who has been writing poetry and prose since he was a teenager. He holds a Bachelor of Science degree in Criminal Justice from the University of Delaware and a law degree from The American University, Washington College of Law. He is a member of the Maryland Bar and serves as the resident expert at the BLM for Ethics. He enjoys traveling, reading, weightlifting, home improvement projects and running with his Jack Russell terrier. He resides in a Maryland suburb.

Michael Martin, *BLM Washington Office*

Division Chief, Human Resources Policy and Programs

As the Division Chief, Michael leads a staff of human resources professionals responsible for the planning, oversight, development and administration of the BLM policies and programs in the areas of classification and pay, recruitment and staffing, executive resources, compensation and benefits, and employee and labor relations. He has over twenty-years of experience in the Federal government, across a broad spectrum of human resources disciplines, equal employment opportunity, mediation, and personnel security, and holds bachelor's degrees from Cleveland State University and Regents College, Master's Degree in Public Administration from Central Michigan University, and a Master's of Divinity from Howard University School of Divinity. Mr. Martin is a veteran of the United States Army, where he served honorably, with distinction, awards and recognition.

Pam Mozina, *BLM Eastern States Office*

Records Administrator – FOIA/Privacy Act Officer

Pam has worked for the Federal Government for over 31 years; 26 of those years with the BLM Eastern States Office. She started as a staff assistant for the Associate State Director prior to accepting the lead assistant position in the Division of Business Practices. After a stint with the General Land Office, Pam moved into the position she holds today. Pam was born and raised in Alexandria, Virginia. She is married with two children.

JoAn Mundt, *BLM Washington Office*

Executive Assistant, Office of Law Enforcement & Security

JoAn has worked as the Executive Assistant for the Office of Law Enforcement & Security since 2008. She is a key asset to the BLM's program which fields a force of approximately 200 Law Enforcement Rangers and 70 Special Agents who enforce a wide range of laws and regulations in the prevention, detection, and investigation of crimes affecting public lands resources. JoAn is a resident of Alexandria, Virginia.

Eric Pagal, *BLM Washington Office*

Procurement Chief

Eric has been the BLM's Procurement Chief for four years and has trained and mentored many acquisition professionals in the BLM and across DOI. Previously, he was a Senior Procurement Policy Analyst at Homeland Security. Eric is a retired Veteran from the U.S. Navy Supply Corps after 24 years. He is an avid motorcyclist.

Karen Prentice, *BLM Washington Office*

National Healthy Landscapes Coordinator

Karen began her BLM career in the Ely District of Nevada, where she served through 2010 in several capacities, including Rangeland Management Specialist, District Noxious and Invasive Weed Specialist, Emergency Stabilization and Rehabilitation Coordinator, and Special Projects Manager. In January 2011, she transferred to Washington, DC, where, as the BLM's National Healthy Landscapes Coordinator, she provides leadership for several aspects of the BLM's landscape approach, including coordinating landscape resiliency activities with internal and external partners and stakeholders, developing national policy on landscape restoration, and supporting development of the BLM's Rapid Ecoregional Assessments. Karen Prentice was

raised in Washington State and received her BA in Environmental Studies from The Evergreen State College in 1990.

Kimberly Reed, BLM Eastern States Office

Land Law Examiner

Kimberly works in the Division of Natural Resources. She was hired as a Staff Assistant/Management Assistant in 2006 as a Term Appointment, working for the Division of Business Resources. Kimberly was selected for and completed the SCEP program in 2010 and attended the Pathways program in 2012. She holds a Master's in Public Administration and a Bachelor's in Paralegal Studies.

Diane Simpson, BLM Washington Office

Realty Specialist

Diane is the BLM's National Land Exchange lead. A Realty Specialist for over 25 years with both the Bureau of Land Management and the U.S. Forest Service, she also has extensive experienced in wild land fire, emergency response and disaster relief. She was an Interior lead for the Hurricane Sandy relief effort.

Anthony Small, BLM Washington Office

Public Affairs Specialist

Anthony joined the National Reserve earlier this year and recently returned from basic training where he graduated #2 in his class of 540.

Joe Stout, BLM Washington Office

Division Chief, Decision Support, Planning and NEPA

Joe plays a leading role in BLM's Planning 2.0 initiative and the Greater Sage Grouse National Conservation Strategy. Previously, Joe served as the Washington Office Planning and NEPA Branch Chief for two years, and as a BLM Washington Office Legislative Affairs Specialist from 2009 through 2010. He began his career at the BLM Colorado State Office as a Planning and Environmental Coordinator from 2001-2005. He then served as the BLM Kremmling Field Office Resource Management Plan Project Manager from 2005-2009.

Gordon Toevs, BLM Washington Office

Project Manager, Resources and Planning Directorate

Gordon is the national program lead for the BLM Assessment, Inventory, and Monitoring (AIM) program and is part of the BLM team advancing the landscape approach to public land management. Gordon has led the effort to select core indicators and methods to inform the condition and trend of terrestrial vegetation, in-stream aquatic resources, and sustainable ecosystems. Gordon joined the BLM through the Office of Personnel Management's Presidential Management Fellowship program. He graduated from the University of Idaho in Moscow, Idaho, with a PhD in Soil Science in August of 2006. Gordon grew up on a family farm in Southern Idaho. He and his wife Brenda now live in Lake Ridge, VA, and are the parents of three adult children.

Hang Tran, BLM Washington Office

Budget Analyst

Hang came to the BLM from the Department of Homeland Security where she helped to deliver budget and cost effective support services. She has a passion for mastering financial IT systems and building robust financial spreadsheets. Hang has also worked in the private sector for over ten years, and as senior budget and financial analyst she has trained the new hire and junior analysts to ensure financial oversight for multi-million dollar contracts. Hang holds a bachelor's degree in Decision Science Management Information Systems from George Mason University. She considers herself an avid food junkie and loves to spend vacations traveling.

Ryan Witt, *BLM Washington Office*

FOIA Officer

Ryan joined the BLM, Division of IRM Governance, in October 2013, coming from the Office of Personnel Management where he served as a FOIA program lead. For the BLM, he has been instrumental in addressing our FOIA backload and expediting response times. Before joining the Federal government, Ryan worked as a FOIA Specialist and declassification analyst for the private sector. A New York native, Ryan holds a B.A. in International Politics from the Pennsylvania State University.

Status of Appeals

Suh, Rhea <rhea_suh@ios.doi.gov>

Sat, Jul 26, 2014 at 4:05 PM

To: Sally Jewell <(b)(6)@ios.doi.gov>, Tommy Beaudreau <tommy_beaudreau@ios.doi.gov>, Michael Connor <michael_connor@ios.doi.gov>

Cc: Pam Haze <Pam_Haze@ios.doi.gov>

Dear Sally, Mike and Tommy:

We wanted to provide you a status update on the appeals process thus far. As you may remember, we gave each Assistant Secretary their bureau budget recommendations on Thursday and Friday. We had asked the Assistant Secretaries and bureaus to let us know their appeal items by cob yesterday.

The attached list of appeals summarizes the issues for each bureau and we provide a summary below.

The following bureaus did not appeal: (b)(5)

(b)(5)

The appeals we received fall into three categories:

(b)(5)

We expect additional information on Monday with respect to all of these appeals and we will be able to analyze them and provide you more then.

Please let us know if you have any questions for now.

Thanks,
Rhea

DOI in the News:

SUPPLEMENTAL SPENDING BILL ADVANCES. The E&E Daily (7/30) reports that the Senate on Wednesday "voted to advance a \$3.57 billion supplemental spending bill to address immigration, Israel and wildfires in the West even as the disaster funding faces skepticism from Republicans in both chambers." Sen. Lisa Murkowski "voted to advance the bill, but she said the administration's request for \$615 million to fight wildfires may be too high." Murkowski said, "We're trying to figure out the right number for disaster and really how we work to make

sure that we end this fire borrowing."

The E&E Daily (7/30) reports that the Obama Administration on Wednesday "threatened a veto of the supplemental spending bill moving through the House, citing its lack of money for wildfires and removal of public lands protections amid a litany of complaints about its central provisions focused on the border crisis." The article notes that "the \$659 million bill is aimed at addressing the flood of unaccompanied minors who have been crossing the US border lately, but it includes no ancillary requests from the administration for funding to address wildfires in the West or give additional aid to Israel, among other matters."

Drone Disrupts Firefighters In California. The E&E Daily (7/30) reports that "a private drone taking photos of a wildfire in Northern California disrupted aerial firefighting efforts by cluttering airspace Sunday, officials said."

The El Dorado County Sheriff's Office said "it was investigating the incident that involved a hobbyist looking to film the so-called Sand fire."

Additional Coverage Of Western Watershed Enhancement Partnership Funding. Additional coverage of the Western Watershed Enhancement Partnership funding was provided by the Fierce Energy (7/31).

Additional Coverage. Additional coverage of wildfires was provided by the AP (7/30), the AP (7/30), the Los Angeles Times (7/31, Rocha, 3.42M), NPR (7/30, Naylor, 519K), and the Christian Science Monitor (7/30, 566K).

DEMOCRATIC BID TO FORCE HOUSE VOTE ON DISASTER FUNDS APPEARS TO HAVE FAILED. The E&E Daily (7/30) reports that "a Democratic effort to force House leaders to hold a vote on a bipartisan wildfire disaster funding bill appears to have failed." The article notes that "the discharge petition that Democrats began circulating July 11 to require a vote on H.R. 3992 has garnered 196 Democratic signatures, but none from Republicans." In order "to succeed, the petition would need more than 20 of the bill's 57 Republican sponsors to sign in order to reach a majority of House members."

HOUSE PANEL PASSES WILDERNESS BILLS. The E&E Daily (7/30) reports that the House Natural Resources Committee on Wednesday "passed bills designating nearly 100,000 acres of new wilderness in Nevada and Washington state, along with more than a dozen other lands and wildlife measures." Members "by voice vote reported H.R. 5205 by Rep. Mark Amodei (R-Nev.) and H.R. 361 by Rep. Dave Reichert (R-Wash.) with qualified support from Democrats and conservationists."

Also reporting on the story is the Reno (NV) Gazette-Journal (7/30, 166K).

SENATORS PUSH PRESIDENT OBAMA TO CREATE NATIONAL MONUMENT IN UTAH. The Salt Lake (UT) Tribune (7/31, 470K) reports that "fourteen liberal senators sent a letter to President Barack Obama on Wednesday urging him to create a new national monument in southeastern Utah forever protecting redrock mesas, ancient cliff dwellings and a hunting site that's 12,000 years old." The article notes that "the letter is sure to irritate Utah's members of Congress, who have attempted to curtail the president's power to set aside such land and oppose a new Greater Canyonlands National Monument, which would block oil and gas drilling and other uses on 1.8 million acres." Sen. Orrin Hatch said "it wasn't surprising that Democratic senators want the monument, but said: 'It is discouraging that they want President Obama to abuse that authority on lands in a state they don't live in or represent in the Senate.'"

SENATORS URGE OFFICIALS TO BOOST HUNTING ACCESS. The E&E Daily (7/30) reports that Sen. Joe Manchin on Wednesday "offered a compromise to administration officials: Improve access for hunting on public lands and avoid binding legislation." Officials from the Interior and Agriculture departments "came to testify in front of the Senate Energy and Natural Resources Subcommittee on Public Lands, Forests and Mining, as part of a hearing on a slate of public lands bills." The lawmakers "spent most of their time discussing S. 1554 and S. 1049." According to the article, "the former would require agencies to develop public access plans for inaccessible federal lands, while the latter would make it easier for nonprofit search-and-rescue teams to look for lost visitors in national parks and forests."

LAWMAKERS PRESS OBAMA ADMINISTRATION ON BACKLOG OF UNUSED FEDERAL PROPERTY. The E&E Daily (7/30) reports that lawmakers pressed Obama administration officials on Tuesday "on their plans to

better manage acre upon acre of unused federal property." At a hearing by the House Oversight and Government Reform Subcommittee on Government Operations, "members of both parties said the Office of Management and Budget (OMB) and others in the executive branch have to do better when it comes to offloading land and buildings owned by the government that sit vacant or in disrepair."

REPORT: FEDERAL WORKERS FIND AGENCY LEADERS' COMMUNICATION LACKING. The E&E Daily (7/30) reports that the Partnership for Public Service has "found that much of the federal workforce is not satisfied with communications from its agency bosses." In a new report released by the group on Wednesday, "the partnership's government-wide 'leadership communication index' came in at 50.2 last year, meaning that about half of federal workers were satisfied with government leaders' communications to their staff." Notably, the Interior Department came in at 18th, "with a 46.7 score in 2013, a decline of more than a point from the prior year."

INTERIOR'S BUSINESS CENTER SEEKS TO ENSURE SHARED SYSTEMS MEET PERFORMANCE STANDARDS. Government Computer News (7/30, 848) reports that the Interior Department's Business Center, "which manages financial systems for 17 separate federal agencies, maintains an exhaustive set of tests to ensure those systems meet performance standards related to quality, accuracy and timeliness." The article notes that "a scorecard helps evaluate how each line of business is progressing."

America's Great Outdoors:

National Park Service:

YELLOWSTONE NATIONAL PARK SEEKS INPUT ON QUARANTINE PROGRAM FOR BISON. The AP (7/31) reports that Yellowstone National Park is "seeking public comment on a proposal to capture and quarantine wild bison so disease-free animals can be relocated to create new herds outside the park, Yellowstone officials said Wednesday." According to officials, "the quarantine facilities could be located inside the park, on tribal lands or elsewhere."

Coverage by the AP was also picked up by the Sacramento (CA) Bee (7/30, 582K), the Charlotte (NC) Observer (7/30, 544K), and the Greenfield (IN) Daily Reporter (7/31, 31K).

Also reporting on the story are Reuters (7/30) and KBZK-TV Butte, MT (7/31, 785).

EDUCATOR TO LEAD "CIVIL RIGHTS TEACHERS' INSTITUTE". The Hill (7/31, Staff, 237K) reports that the NPS "signed an \$85,650 contract with Massachusetts educator Gail Burton to lead a five-day 'Civil Rights Teachers' Institute' that takes place at the Little Rock Central High School National Historic Site." Burton will draft "historical lesson plans" and establish "a teachers community support system using Socratic Circle methodology ... and application of theater and storytelling strategies for 25 participants."

SMALL BOAT OWNERS FACE PENALTIES IN MUSSEL-INVASION VIOLATIONS. The E&E Daily (7/30) reports that "in the fight to stop the spread of invasive mussels throughout US waterways, small boat owners who violate invasion-prevention rules often pay hefty fines or face jail time, while the massive ocean tankers likely responsible for bringing them into the Great Lakes face few penalties." The article notes that "US and Canadian officials don't require freighters entering the Great Lakes through the St. Lawrence River to flush their ballast tanks with salt water from the middle of the ocean to kill potential invaders, instead requiring them to promise not to discharge the water once they pass the first navigation lock on the seaway." At the same time, "people towing boats from lake to lake and across state lines can face jail time or hefty fines for carrying quagga or zebra mussels to unaffected waters."

GETTYSBURG NATIONAL MILITARY PARK SUPERINTENDENT TO LEAVE FOR FOUR MONTHS. The Hanover (PA) Evening Sun (7/31, 66K) reports that Ed Clark, superintendent of Gettysburg National Military Park and Eisenhower National Historic Site, will "leave the park for four months as part of a leadership development program," according to the NPS. He is "a candidate for the Senior Executive Service, a leadership group for government employees." Park spokesperson Katie Lawhon said that "as part of the development program, he is required to work on an assignment outside of the National Park Service."

Bureau of Land Management:

BLM CONSIDERS CRACKING DOWN ON ROPE SWINGING AT UTAH ARCHES. The New York Times (7/31, Healy, Subscription Publication, 9.79M) reports that "after a handful of accidents and a rash of complaints, the federal government is weighing whether to crack down on the latest Internet-fueled thrill ride to crop up on public lands: extreme rope-swinging." The article notes that "some have complained that the activity is also wearing away fragile arches that have withstood wind and rain for eons, scoring them with bolt-holes and rope marks." So now, the BLM is "weighing whether to bar swingers, jumpers and other participants in aerial rope sports from Corona Arch and Gemini Bridges, another towering arch formation in the area."

BLM HOSTS HELIUM AUCTION. The Amarillo (TX) Globe News (7/30, 133K) reports the BLM on Wednesday "auctioned off nearly \$15 million in government-owned helium to two bidders, a first-of-its kind sale officials said will generate revenue for the Treasury in a series of yearly auctions." The article notes that "the auction at the Virgil Patterson Auditorium in Amarillo drew 13 bidders, but much of the bidding was dominated by representatives from Air Products and Chemicals Inc." Robert Jolley, field manager for the BLM's Amarillo Field Office, said "federal employees in Amarillo, New Mexico and Washington, D.C., spent nine months preparing for the auction." He said, "To run through the process and bring in more revenue for the American taxpayer than we thought we were going to bring in, is just a win-win all the way around. I thought the minimum would have been about \$9.2 million. That's the minimum if they bought every lot. We didn't know if they were going to buy every lot."

Also covering the story are KFDA-TV Amarillo, TX (7/31, 1K) and KAMR-TV Amarillo, TX (7/31, 428).

REP. THORNBERRY URGES LAWMAKERS TO SETTLE RED RIVER DISPUTES. The E&E Daily (7/30) reports that Rep. Mac Thornberry "urged a House subcommittee" on Tuesday "to act quickly to guarantee land rights along the Red River at the Texas-Oklahoma line before interest groups promoting gun rights and others hijack the issue whose roots stretch back to the time of Thomas Jefferson." Thornberry told the Public Lands and Environmental Regulation Subcommittee, "There are some groups using this controversy to gain attention for themselves. The last thing the landowners, the county, the states or the [Bureau of Land Management] need is for people to come in and make a big deal for this, to make it something political."

BUNDY SUPPORTERS SEEK DONATIONS, MANPOWER. KLAS-TV Las Vegas (7/31, 36K) reports that "the people still camped out at the Cliven Bundy ranch near Bunkerville are looking for some help from the public." They have "posted an online ad, asking for donations of food, money, and manpower to maintain their security perimeter at the ranch." The article notes that "things in Bunkerville have calmed down considerably since a showdown three months ago that made national news and transformed rancher Bundy into a national figure, but Sheriff Doug Gillespie says the situation is far from over."

Fish and Wildlife Service:

HOUSE PASSES BILL TO MODIFY ENDANGERED SPECIES ACT. The E&E Daily (7/30) reports that Republicans "pushed legislation through the House" on Tuesday "to reform the Endangered Species Act, sparking outrage from conservation groups and Democrats who say it is part of a broader effort to gut the 40-year-old law." H.R. 4315 "would require federal agencies to publicly release all data used to make listing decisions, report funds spent on ESA-related lawsuits and specify that the 'best' scientific data available include state data." The article notes that "the chamber also approved two Republican amendments: one to ensure classified information isn't released and another to require the disclosure of all federal funds used to bring a claim in an ESA-related lawsuit."

Also covering the story are the Deseret (UT) News (7/31, 538K) and the Oil and Gas Journal (7/31, 1K).

BILL WOULD REPEAL LESSER PRAIRIE CHICKEN LISTING UNTIL AT LEAST 2020. The E&E Daily (7/30) reports that Sen. James Inhofe has "introduced legislation that would temporarily repeal the Obama administration's 'threatened' listing for the lesser prairie chicken, a move that he said is necessary to give states within the bird's range more time to implement a regional conservation plan that supporters say has already shown results." Inhofe's bill, S. 2677, "would remove the lesser prairie chicken from the list of threatened species

under the Endangered Species Act until Jan. 31, 2020." Then, "the Interior secretary would be required to make a determination 'based on the totality of the scientific evidence' whether an ESA listing for the bird is warranted."

MEASURE WOULD HALT CLOSURE OF FISH HATCHERIES WITHOUT CONGRESSIONAL APPROVAL. The Payson (AZ) Roundup (7/30, 21K) reports that the House Natural Resources Committee has approved a bill by Rep. Paul Gosar "to put a halt to the closure of any more federally operated fish hatcheries without specific permission from Congress." H.R. 5026, the Fish Hatchery Protection Act, "came in response to a federal decision to stop producing trout in a fish hatchery on the Colorado River in favor of producing several endangered native fish the federal government hopes to restore in several streams." The measure would "bar any such change in the use of the hatcheries without an act of Congress."

SHOW ENCOURAGES MINORITY PARTICIPATION IN THE OUTDOORS. The Chicago Tribune (7/30, Frazee, 2.19M) reports on the stars of the national television show, "Urban American Outdoors," Wayne Hubbard and Candice Price. According to the article, "in a day when minority participation in the outdoors is still surprisingly low, Hubbard and Price are working tirelessly to show people of color that they have a place in the outdoors." One representative of the FWS called them "trailblazers." FWS Director Dan Ashe said, "One of our priorities is reaching out to minorities. That's a key to our future."

JUDGE DISMISSES LAWSUIT OVER FEDERAL REFUGE CLOSURES. The AP (7/31, Bohrer) reports that "a federal judge in Alaska has dismissed the state's lawsuit over the closure of national wildlife refuges during the partial federal government shutdown last year." US District Court Judge Sharon Gleason "called the case moot in siding" with the FWS and the Interior Department, "which asked for the case to be tossed."

Coverage by the AP was also picked up by the Washington Post (7/30, 4.06M), the Sacramento (CA) Bee (7/30, 582K), Yahoo! (7/31, Bohrer, 10.35M), and WHEC-TV Rochester, NY (7/31, 5K).

FWS INVESTIGATING OWL DEATHS IN OKLAHOMA. The AP (7/31, Eaton) reports that the FWS is "investigating the death of two owls found coated in oil in northwestern Oklahoma, an agency spokesman said Wednesday." Meanwhile, a report from the Oklahoma Corporation Commission "shows a list of problems with the well site where the birds were found earlier this month." Gavin Shire, spokesman for the FWS, said "he can't comment on the investigation until it's finished and it's unclear when it will be completed."

Coverage by the AP was also picked up by KRMG-AM Tulsa, OK (7/31, 16K) and KOTV-TV Tulsa, OK (7/31, 200K).

STUDY BLAMES LOST CALVES ON PANTHERS. The AP (7/31, Dearen) reports that "a University of Florida researcher hired by federal wildlife officials has found that panthers are killing calves in an area where the predatory felines are thriving." The article notes that "the research marks the first step toward the U.S. Fish and Wildlife Service considering a program that would pay ranchers for preserving acres of panther habitat, instead of undertaking the impossible task of verifying every kill." Caitlin Jacobs, "the university researcher who staked out a ranch for the better part of two years," said, "Ranchers will tell you that they suspected panthers were killing their calves, although no one knows how many they're losing. It's hard to find the calves – when panthers kill they drag the prey into the forest and cover it with brush to hide them from scavengers."

COLUMNIST: THREATS TO SAGE GROUSE MUST BE ANALYZED. In his column for the Elko (NV) Daily Free Press (7/31, Mitchell, 22K), Thomas Mitchell argues that "before listing either the bi-state or the greater sage grouse, someone needs to do some sound scientific studies and realistically look at what truly is a threat to these birds — including the lack of wildfire prevention efforts on federally controlled land."

US Geological Survey:

USGS SCIENTISTS MONITORING WATER LEVELS IN DENVER. KCNC-TV Denver (7/30, 26K) reports that scientists from the USGS "took advantage of the heavy rain to get water samples from Cherry Creek in Denver." The researchers are "testing the water quality" in order "to find out how the environment changes the quality of the water."

Also reporting on the story is [KDVR-TV Denver \(7/30, 40K\)](#).

USGS STUDY: MISSOURI RIVER HEADWATERS PRODUCE LESS WATER. The [Bozeman \(MT\) Daily Chronicle \(7/31, 54K\)](#) reports that the portion of the Missouri River that runs through is “dwindling because stream levels are dropping,” according to a new USGS report. USGS scientists at the South Dakota Water Science Center “analyzed more than 50 years of data from almost 230 stream gages along the Missouri River and its tributaries and found noticeable streamflow trends in certain regions.”

Securing America's Energy Future:

Renewable Energy:

BILL PROMOTING LEASES IS LAUDED. The [E&E Daily \(7/30\)](#) reports that “a bipartisan bill aimed at boosting wind and solar energy production on federal land was lauded” on Tuesday “by witnesses at a House Natural Resources subcommittee hearing, but differences remain on a proposal that would remove requirements for environmental reviews for geothermal projects.” According to the article, “there was praise for Rep. Paul Gosar’s (R-Ariz.) H.R. 596, the ‘Public Lands Renewable Energy Development Act,’ which would require the government to establish leasing areas for wind and solar energy on federal land.” The article notes that “the measure also received support from representatives of both conservation and industry groups alike.” However, “there was disagreement over H.R. 1363, from Rep. Raúl Labrador (R-Idaho), which would exempt some geothermal exploration projects from National Environmental Policy Act requirements.”

Onshore Energy Development:

BLM SUPPORTS BIPARTISAN BILLS TO STREAMLINE PERMITTING. The [E&E Daily \(7/30\)](#) reports that the BLM on Tuesday “rallied behind two bipartisan bills designed to expedite its permitting of oil and gas wells and renewable energy projects on federal lands amid continued Republican and industry criticism of regulatory delays.” BLM Director Neil Kornze said the bureau “generally supports S. 2440, the oil and gas bill by Sens. Tom Udall (D-N.M.) and John Barrasso (R-Wyo.), and S. 279, the renewable energy bill by Sens. Jon Tester (D-Mont.) and Dean Heller (R-Nev.)”

OSM GRANT PROVIDES PUBLIC WATER TO SEIBER FLATS. The [Oak Ridge \(TN\) Today \(7/30\)](#) reports that the Anderson County Water Authority has completed a “water line extension project, which serves half a dozen homes, using a \$320,000 Office of Surface Mining federal grant from the Tennessee Department of Environment and Conservation; no local money was used to fund this project”

OSMRE COUNTS AT LEAST 266 PENDING VIOLATIONS AGAINST JUSTICE COMPANY MINES. The [Louisville \(KY\) Courier-Journal \(7/30, 375K\)](#) reports that “coal companies owned by a major political supporter of Gov. Steve Beshear are under serious scrutiny for failing to comply with basic strip-mining reclamation regulations in Kentucky and four other states.” The OSMRE “counts at least 266 pending violations in the five states against companies owned by West Virginia billionaire Jim Justice, who has hobnobbed with Beshear at Justice’s glitzy Greenbrier Resort, and who — with his family — has contributed at least \$400,000 to Beshear political causes since early 2011.”

ADVOCATES CLAIM ENERGY DEPARTMENT EFFORTS TO CURB METHANE NOT ENOUGH. The [E&E Daily \(7/30\)](#) reports that climate activists on Tuesday “applauded the Energy Department’s announcement of first steps to reduce methane leakage from oil and natural gas systems, but they asked both DOE and US EPA to also promulgate mandatory regulations for the potent greenhouse gas.” The Energy Department on Tuesday “committed to consider new energy efficiency standards to reduce leakage from natural gas compressors, which push gas down in pipelines.”

TEXAS REGULATORS: ONSHORE OIL PRODUCTION GREW BY 27% LAST MONTH. The [E&E Daily \(7/30\)](#) reports that “Texas’ onshore unconventional crude oil production has risen by over a fourth from where it was a year ago, according to the state’s oil and gas regulator.” The Railroad Commission of Texas, “this week issued preliminary estimates for May 2014 oil production,” and the Railroad Commission “also announced figures for total drilling permits issued in June.” The article notes that “daily oil output for May is estimated to have been

roughly 2.14 million barrels per day," which "does not include offshore oil production, which is regulated by the General Land Office for state waters and the federal Bureau of Ocean Energy Management." The commission's May figures show Texas onshore oil production has risen by about 27 percent in one year.

ADDITIONAL COVERAGE OF GREENPEACE REPORT ON FEDERAL COAL LEASING. Additional coverage of the Greenpeace report on the Interior Department's federal coal leasing program was provided by the [National Journal](#) (7/31, Subscription Publication, 561K).

Offshore Energy Development:

BOEM EXTENDS COMMENT PERIOD FOR FIVE-YEAR LEASING PLAN. The [E&E Daily](#) (7/30) reports that the BOEM on Wednesday "announced a 15-day extension for public comments on its next five-year leasing plan for offshore oil and gas." The bureau said that "at the request of several states, the original deadline of tomorrow has been moved to Aug. 15."

Also reporting on the story are [The Hill](#) (7/30, Barron-Lopez, 237K), the [FuelFix](#) (7/30, 7K), the [Oil and Gas Journal](#) (7/31, 1K), and the [Offshore Engineer](#) (7/31).

OIL INDUSTRY'S INTEREST IN BEAUFORT SEA MAY BE WANING. [FuelFix](#) (7/30, 7K) reports on oil industry struggles in the Arctic region, noting that companies that in 2007 gained "more than 1.3 million acres of the Beaufort Sea" have in the interim given up almost 50% of the land, in part as industry interest in the region appears to "be waning." American Petroleum Institute senior analyst Richard Ranger discussed the current Federal process for opening up areas for drilling. He noted, "With a nomination process, companies wind up providing information that by some way or another, parties interested in opposing or stopping exploration activities can gain advantage from." He explained that "on a case-by-case basis, some companies have made the decision to relinquish leases in the Beaufort and move somewhere else. Companies aren't sitting around accumulating vast amounts of acreage on which they aren't doing anything. They are constantly evaluating and making carefully considered decisions on which acreage to keep and what to let go. At the end of the day, they're interested in production and molecules running through pipelines."

The story also appears at the [Houston Chronicle](#) (7/31, Dlouhy, 2.02M).

JUSTICE DEPARTMENT: BP CAN'T DISMISS LAWSUITS BY BLAMING DRILLING MORATORIUM. The [FuelFix](#) (7/30, 7K) reports that the Justice Department has "joined a fight to stop BP from dismissing lawsuits by deep-water drillers and oil-field services firms alleging the 2010 Gulf of Mexico oil spill left million-dollar holes in their balance sheets." According to the article, "federal prosecutors said in court filings late Tuesday that BP can't circumvent financial damage claims that may be worth hundreds of millions of dollars with a defense essentially blaming losses on the three-month, deep-water drilling moratorium the government imposed after the spill." US attorneys also want US District Judge Carl Barbier "to quash BP's subpoena on government documents that might be used as evidence to thwart the lawsuits." BP sent a subpoena to the Interior Department "last week requesting high-level memos about the decision to curb drilling and permitting activity in the Gulf, safety reports and many other documents."

GULF STATES CALL ON OBAMA ADMINISTRATION TO DISTRIBUTE RESTORE ACT FUNDS. The [E&E Daily](#) (7/30) reports that "four years after the massive Deepwater Horizon oil spill in the Gulf of Mexico and two years after Congress passed a law to send the lion's share of civil fines associated with the spill back to the region, lawmakers are fed up with the slow pace of progress." The article notes that "there are hundreds of millions of dollars from a settlement with Transocean that are waiting to be distributed through the RESTORE Act." Gulf Coast lawmakers argued on Tuesday that "those funds should go out the door as quickly as possible, both to meet pressing restoration needs and to give federal and state agencies some practice at approving and implementing projects before the slug of BP money comes through."

ENVIRONMENTAL GROUPS URGE FOR RE-EXAMINATION OF GULF OF MEXICO RIGS-TO-REEFS PROGRAM. The [New Orleans Times-Picayune](#) (7/30, 527K) reports that "as the federal government this summer considers revised rules on the decommissioning of Gulf of Mexico oil rigs, many environmental groups are pushing for a reexamination of the rigs-to-reefs program." On Wednesday, Clint Guidry, president of the Louisiana

Shrimp Association, "joined calls" for the BSEE "to require the removal of rigs instead of converting them into such reefs." Guidry "joined the authors of the recently released free e-book Bring Back the Gulf, which also advocates for requiring the removal of oil rigs." Also, last Wednesday, on July 23, "about 25 individuals, mainly representing environmental groups, signed a letter sent to Interior Secretary Sally Jewell urging 'strong and consistent implementation of the Department of Interior's Idle Iron policy requiring full decommissioning of spent oil and gas structures at the end of their useful economic life.'"

BOEM, RHODE ISLAND TO EVALUATE OFFSHORE SAND RESOURCES. The [Providence \(RI\) Business News](#) (7/31, 38K) reports that "as part of the long-term recovery effort following the landfall of Hurricane Sandy," the BOEM and the state of Rhode Island are "collaborating to evaluate sand resources for coastal resilience and restoration planning." According to the article, "under a two-year, \$200,000 agreement, the University of Rhode Island will map the geology of selected areas offshore."

Tackling America's Water Challenges:

BOR WILL RELEASE EXTRA WATER FOR SALMON ONLY IF DIE-OFF STARTS. The [AP](#) (7/31, Barnard) reports that the BOR said Wednesday "it will release extra water into Northern California's Klamath and Trinity rivers once salmon start dying from drought-related disease, but not before." BOR spokesman Louis Moore said that "the decision came under terms of a 2012 emergency water plan, and after consulting with tribes, irrigators and other agencies." Moore said, "When you look at the need and demand for water, it's for every requirement out there, whether it is drinking water, species, power, agriculture or flow in the rivers. The best use of that water was part of that discussion. How can we use this water and still meet all the needs that are there."

Coverage by the AP was also picked up by the [Sacramento \(CA\) Bee](#) (7/30, 582K), the [Lakeland \(FL\) Ledger](#) (7/30, 140K), [KGW-TV](#) Portland, OR (7/31, 111K), and [KFMB-TV](#) San Diego (7/31, 15K).

Also reporting on the story is the [Contra Costa \(CA\) Times](#) (7/31, 294K).

DELTA TUNNEL PLAN CRITICIZED. The [San Francisco Chronicle](#) (7/31, Jones, 2.87M) reports that California's "plan to build a pair of 35-mile tunnels under the delta would cause the extinction of winter-run chinook salmon, steep declines in dozens of other species and devastate water quality in San Francisco Bay, an environmental group said Wednesday." Gary Bobker, policy analyst for the Bay Institute, "which submitted its 250-page findings this week to the state Department of Water Resources as it updates its Bay Delta Conservation Plan," said, "This project would be a major step in the wrong direction. Diverting more water from the delta is exactly what we need to stop doing if we're going to have a sustainable ecosystem."

Empowering Native American Communities:

BIA REVIEWING MASHPEE WAMPANOAG TRIBE'S APPLICATION. The [Cape Cod \(MA\) Times](#) (7/30, 97K) reports that Kevin Washburn, assistant secretary for the BIA, was "on Cape Cod Tuesday but would only say that the Mashpee Wampanoag Tribe's application is 'in process.'" Washburn said "his staff is still reviewing the tribe's application to have 171 acres in Mashpee and another 155 acres in Taunton taken into federal trust as an initial reservation." He said, "The process takes a long time. I haven't seen all the evidence yet so I can't prejudge it."

PAPER OPPOSES COQUILLE INDIAN TRIBE'S CASINO BID. The [Roseburg \(OR\) News-Review](#) (7/31, 56K) editorializes the Coquille Indian Tribe "continues to push for" a planned casino "it announced nearly two years ago, despite the fact that Oregon's governor, both senators, a House representative and other politicians have spoken against it." The article notes that "a decision by Secretary of the Interior Sally Jewell is pending." The paper claims that "should the Coquilles get the approval they seek, it will upend the current system under which each of Oregon's nine tribes is allowed to operate one casino each."

CONGRESS URGED TO CLARIFY INTERIOR SECRETARY'S AUTHORITY TO TAKE LAND INTO TRUST. For the [Indian Country Today Media Network](#) (7/30, 45K), Paul Moorehead, a partner in the Powers Pyles Sutter & Verville, PC's Indian Tribal Governments Group representing Indian tribes and tribal organizations, writes that tribes "continue to grapple" with problems "made worse by decades of further land fractionation and a legal regime of Indian land management that has failed to adapt to changing circumstances on the ground in tribal

communities." According to Moorehead, "in the wake of the Supreme Court's *Carcieri v. Salazar* decision in 2009, congressional action is sorely needed to clarify the Secretary's authority to take land into trust for all Indian tribes."

Top National News:

OBAMA ASKS GOP TO "STOP JUST HATING ALL THE TIME." Coverage of President Obama's visit to Kansas City highlighted his apparent taunt to the GOP to "stop hating" – which was noted in almost every story – and generally cast the President's remarks as a campaign speech for the upcoming midterms. The St. Louis Post-Dispatch (7/30, Raasch, 938K), for example, describes Obama's remarks as "one his sharper partisan speeches," while the Los Angeles Times (7/30, Hennessey, 3.42M) reports that "having apparently given up on charm, golf and persuasion...Obama on Wednesday went for taunting sarcasm" in his "campaign-style speech." No network newscast ran a story last night on the President's trip, though the CBS Evening News (7/30, story 6, 1:35, Brown, 5.08M) prefaced a report on a House GOP push to sue the President with footage of Obama's "stop hating" comment.

The Kansas City (MO) Business Journal (7/30, Subscription Publication, 30K) says Obama addressed "a room full of his core supporters," and his "goal was to inspire" them "to vote in the midterm elections." Obama "ticked off a range of successes," the Kansas City (MO) Star (7/30, Meyers, 1.39M) reports, "including encouraging growth numbers released earlier in the day," and "claimed that he's had to sidestep Congress...to impose rules on gender pay equity, student loan payment caps and a variety of other measures." The President "closed his speech encouraging the crowd toward optimism, saying 'cynicism never put a man on the moon.'" The Hill (7/30, Pames, 237K) quotes Obama as saying, "We have fought back. ... We have dusted ourselves off. ... None of this is an accident. It's thanks to the decisions we made early on."

Reuters (7/30, Rampton) notes that Obama said, referring to Hill Republicans, "Stop being mad all the time. Stop – stop – stop just hatin' all the time." The St. Louis Post-Dispatch (7/30, Raasch, 938K) notes that Sen. Roy Blunt responded to Obama's exhortation to Republicans to "stop hating all the time" saying the President "sounded like he was in junior high." Blunt said the comment reminded him of "the kinds of things that happen in junior high, when you say that somebody else is a really bad person. ... That is no way to begin to work with that person." The Washington Times (7/30, Wolfgang, 465K), meanwhile, says "Republicans dismissed the president's speech as yet another attempt to draw attention away from the administration's own failures." Said Blunt, "Missourians and people nationwide want to hear real answers about the president's plans to work with Congress and help put more people back to work."

Obama, says the AP (7/30, Pickler), "cast the stalemate in Washington as a personal reaction to his presidency." USA Today (7/30, Jackson, 5.76M) quotes him as saying of Republicans, "They're mad because I'm doing my job," though he added "he still wants to work with" them. Said the President, "I know they're not that happy that I'm president, but it's OK. ... I've only got a couple of years left, so come on. ... Then you can be mad at the next president." Politico (7/30, Breitman, 637K) calls Obama's comments about the GOP "blistering."

The University of Kansas Daily Kansan (7/30, Kite, 37K) reports Obama opened his remarks "with a personal story about Victor Fugate, who wrote to Obama three years ago and introduced him" yesterday. Fugate "was unemployed after he and his wife had their first child," but Obama said he "refused to quit, earned his degree and found a full-time job. Now Fugate helps those with disabilities live independently."

The New York Times (7/30, Huetteman, Subscription Publication, 9.79M), which did not mention the "stop hating" quip, describes Obama as "informal and relaxed, interacting with a crowd that was quick to respond, cheering and booing – a bit of a foil to a number of signs outside the theater before his speech protesting his policies on immigration, the conflict in Gaza and other issues."

In an editorial titled "Obama Rightly Slams 'Hating' Congress In KC Speech," the Kansas City (MO) Star (7/30, 1.39M) writes, "Congress, take cover." Obama "wasn't talking kindly about you in Kansas City. And with good reason."

The Kansas City (MO) Star (7/30, Kraske, 1.39M) reports that the President, "the self-described ursine chief

executive, and his sizable motorcade stopped Wednesday at Parkville," a Kansas City suburb, "on the way out of town," and though his "his staff expected him to stay about 30 minutes," Obama "lingered nearly an hour," saying, "Trying to delay this as long as possible...because I'm having fun." The AP (7/30) recounts that Obama entered a coffee shop "and paid the tabs for a handful of patrons." He also ordered an iced-tea. Another AP (7/30, Pickler) accounts says the President "meandered along picturesque Main Street in nearby Parkville, popping in shops and greeting folks with an iced tea in hand," and quotes Obama as telling the coffee shop patrons, "It's not that often the president buys you a cup of coffee."

The visit generated a great deal of local television coverage, much of it highlighting Obama's argument that that so much more could be achieved in DC if Republicans in Congress would "help out a little bit" and "stop hating" and "being mad all the time." Many reports also noted his characterization of the lawsuit being filed against him by congressional Republicans as a "political stunt." Typical examples of the coverage aired on KNPN-TV St. Joseph, MO (7/30, 8:31 p.m. CDT), KMIZ-TV Columbia, MO (7/30, 6:14 p.m. CDT), KRCG-TV Jefferson City, MO (7/30, 6:06 p.m. CDT, 5K), WDAF-TV Kansas City, MO (7/30, 6:00 p.m. CDT, 115K), KMBC-TV Kansas City, MO (7/30, 6:00 p.m. CDT, 70K), and KCTV-TV Kansas City, MO (7/30, 6:00 p.m. CDT, 63K).

VULNERABLE DEMOCRATS WORRIED ABOUT POTENTIAL OBAMA ACTIONS ON IMMIGRATION. After several days of reports of White House plans for sweeping executive actions on immigration, which noted the support for such measures from immigration activists, a couple of stories this morning reflect nervousness among some Democrats about what Obama's moves may mean for their election chances this November.

Politico (7/30, Brown, Kim, 637K) refers to the "most vulnerable Democratic [Senate] incumbents, caught in the crosscurrents of immigration reform," calling on Obama "to show restraint in using his executive powers to slow deportations." Noting that Sens. Kay Hagan and Mark Pryor have publicly spoken out against Obama's apparent plans, while Mary Landrieu and Mark Begich have warned him not to go too far, Politico cites "administration officials" who say the President will consult at-risk Democrats, but "isn't planning to moderate his approach based on what plays best in Anchorage or Little Rock because Republicans will attack any executive action, ambitious or restrained, as an abuse of presidential power."

The Daily Caller (7/30, Munro, 408K) noted that also calling for caution is "hard-left MSNBC host Ed Schulz," who "is worried that Democrats will be hammered by voters if...Obama uses his executive authority to distribute work-permits to millions of illegal immigrants." Said Schulz, "Hold the phone – this would be a mistake if the president were to do this. ... Politically, there is no way Democrats can go home and campaign on across-the-board amnesty for millions of undocumented workers... It could be an electoral death knell for the Democrats."

In an analysis piece, USA Today (7/30, Gomez, 5.76M) says that "when the White House finally announces its plans to unilaterally change the way the country treats undocumented immigrants...the president's immigration legacy will finally be set." Right now, "his enforcement record is mixed. On the one hand, his administration has bragged about setting a new record each year for the number of people it deports" but "has also drastically reduced the number of people deported from the interior of the country."

White House Says Obama Would Veto House Version Of Border Bill. Roll Call (7/30, Dennis, Subscription Publication, 76K) reported the White House yesterday "threatened to veto the House's \$659 million border supplemental Wednesday, saying it could actually make the child migrant crisis worse." OMB said in a statement, "Instead of working toward a real, lasting solution, Republicans released patchwork legislation that will only put more arbitrary and unrealistic demands on an already broken system."

The Washington Times (7/30, Dinan, 465K) says the move "puts Mr. Obama at odds with even some Democrats who say changes are needed to a 2008 law granting Central American children a long judicial process before they can be deported." While "Obama himself had called for changes to the 2008 law earlier this month," he "has since backed away under intense political pressure from immigrant-rights groups." The Hill (7/30, Schroeder, 237K) noted the OMB statement came "just hours before the House and Senate were set to hold dueling votes on competing border packages, on the next to last day of legislative work before a five-week August recess."

Also yesterday, the AP (7/30, Werner) reports, the Senate "voted 63-33 to advance the \$3.5 billion emergency spending bill over an initial procedural hurdle." However, "with Republicans and a few Democrats opposed, there was little expectation that the legislation would ultimately prevail with only days left before Congress' annual

August recess." Politico (7/30, Kim, 637K) also says the bill "still faces significant barriers before it can win final passage in the Senate – let alone be reconciled with a drastically different bill that is emerging in the GOP-led House."

Reuters (7/30, Cowan) reports the Senate is not expected to take up the House bill if it's approved by the lower chamber, but Politico (7/30, Everett, 637K) says conservatives' "worst fears...are being confirmed: Senate Democrats really do seem to want to attach the Gang of Eight immigration reform to a legislation addressing the border crisis." According to Politico, Democrats would seek to do so during the amendment process for their bill.

Alex Nowrasteh, immigration policy analyst at the Cato Institute's Center for Global Liberty and Prosperity, argues in USA Today (7/31, Nowrasteh, 5.76M) that "our immigration restrictions and border enforcement have created the current mess. ... Before 1986, when circular migration was in effect, 60% of unauthorized immigrants on their first trip here would eventually settle back in their home countries rather than in the United States, and 80% of undocumented immigrants who came back on a second trip eventually returned home."

House GOP Bill Will Include Provision Barring Obama From Halting Deportations. Politico (7/31, Sherman, Kim, 637K) reports that according to "multiple GOP aides," House Republicans "will vote to rein in the Obama administration's power to halt deportation for undocumented immigrants," in "a surprise move that comes as...House Republicans were unable to lock up 218 GOP lawmakers to vote for the \$659 million emergency funding package." GOP leaders are planning plan "a Thursday vote on the Republican funding package. If it passes, the House would be required to vote on legislation targeting the Deferred Action for Childhood Arrivals programs, which has shielded from deportation hundreds of thousands of young undocumented immigrants who have grown up in the United States."

The New York Times (7/31, Parker, Subscription Publication, 9.79M) also reports on the House GOP plan, which it attributes to "the resistance...Boehner and his team are facing."

Politico (7/31, Everett, 637K) reports GOP senators "have been searching for a strategy to deal with the crisis at the border," and yesterday they "found one: the House Republican bill." While "conservative GOP Sens. Ted Cruz of Texas and Jeff Sessions of Alabama have critiqued the House bill for not prohibiting...Obama from expanding his Deferred Action for Childhood Arrivals policy, a broad spectrum of GOP senators are willing to support the House's legislation even without that change."

Money From Many Programs Expected To Go To Paying For Unaccompanied Children's Care. The Los Angeles Times (7/31, Mascaro, Bennett, 3.42M) reports that, with Congress not expected to approve additional funds to deal with the border crisis, the Administration is moving \$94 million from other government programs and accounts, some with little to with immigration, to pay for the "food, beds, clothing and medical care" needed by unaccompanied minors who illegally crossed the Southwestern border. The Homeland Security Department's Immigration and Customs Enforcement and the Office of Refugee Resettlement will run out of money in August. Funds to care for the children have already come from immigration enforcement, but they may also be moved from drones seeking drug smugglers, border monitoring sensors, the Federal Emergency Management Agency, the National Institutes of Health, and the Centers for Disease Control and Prevention. Meanwhile, without Congress paying for more immigration judges to process the cases, the children remain in the US, requiring money for their care.

Legislators To Visit Border. The Chicago Tribune (7/30, Manchir, 2.19M) reports the office of Rep. Luis Gutierrez announced he and 11 other members of Congress will visit a part of the US border "where tens of thousands of children have crossed into the country." Gutierrez spokesman Douglas Rivlin said the legislators want to see "what's going on and how children from Central America are being treated."

Chickenpox Outbreak At Illegal Immigrant Housing Center. The Washington Times (7/31, Dinan, 465K) reports Rep. Steve Pearce said the Federal Law Enforcement Training Center (FLETC) in Artesia, New Mexico, which is housing illegal immigrant families, is in "lockdown" as the government treats and vaccinates the occupants following a chicken pox outbreak. The Times adds, "medical issues have been a major concern" for those dealing with the increase in illegal immigration. With "thousands of people" caught illegally crossing the border as families, the FLETC was supposed to house them prior to "quick deportations," but currently no immigrants may be transferred in or out.

Emanuel Defends Accepting 1,000 Unaccompanied Immigrant Children. The Chicago Sun-Times (7/31, Spielman, 1.03M) reports Chicago Mayor Rahm Emanuel "defended his decision to" accept 1,000 unaccompanied immigrant children in the Federally-funded facilities in city. Emanuel cited his grandfather's immigrating to Chicago to flee pogroms in Moldova. While critics argue the issue is "a diversion" from the gang violence afflicting the city's children, Emanuel argues the city can deal with both issues.

King: Only Honduras More Dangerous Than Detroit. The Detroit News (7/31, Shepardson, 495K) reports Iowa Republican Rep. Steve King told reports "that Detroit isn't that much better" than the violence of Honduras unaccompanied children have fled. King noted that only Honduras in Central America has a higher overall murder rate than Detroit. In response Democratic Rep. Gary Peters "who represents part of Detroit in Congress, blasted King's remarks calling them 'outrageous.'" Honduras had 90.4 homicides per 100,000 people in 2012, while Detroit with 54.6 murders per 100,000 in the same period. In 2013, Detroit's rate fell to 48.3 per 100,000, "close to Belize's 44.7 murders per 100,000 people and El Salvador's 41.2 murders per 100,000 people."

Local Law Enforcement Increasingly Refusing ICE Detainers. The New York Times (7/31, Semple, Subscription Publication, 9.79M) reports that, following "a series of federal court rulings...that raised questions about the constitutionality of" Immigration and Customs Enforcement detainers, in which local law enforcement is asked to hold foreign-born detainees for additional time, there is "a growing wave of law enforcement agencies" refusing to honor the requests. The latest move is a recommendation by the New York State Sheriffs' Association to refuse detainers on the belief that New York courts would rule, as a Federal magistrate judge in Oregon did, that honoring detainers violates Fourth Amendment rights. Immigrants' advocates have sought to end local law enforcement compliance with detainers, arguing the matter isn't for local law enforcement and "undermines immigrants' trust in local authorities"; sheriffs' increasing resistance to the detainers "has posed the greatest challenge yet to the practice." While homeland security secretary Jeh C. Johnson has his legal team determining "the department's next steps," officials says the detainers will continue to be issued.

States Offering Undocumented Immigrant Driver's Licenses Face Challenges. The Wall Street Journal (7/31, Frosch, Subscription Publication, 5.89M) reports states offering driver's licenses to undocumented immigrants face a number of challenges. High demand when the licenses first become available can strain resources and mean long wait times for appointments – up to three months in Illinois. What identifying documents are allowed can be a matter of debate, and the license needs to be distinguishable from a regular one. Meanwhile, Colorado is only offering the service at select motor vehicle division offices, requiring hours of travel for some applicants.

AS HOUSE REPUBLICANS VOTE TO SUE OBAMA, IMPEACHMENT COMMENTARY CONTINUES. As Republicans and conservative commentators try to offer assurances that their intent is to sue the President but not to seek his impeachment, the mere possibility of the latter course continues to animate discussion from Democratic lawmakers and media commentators. The controversy continued as the House, split along party lines, voted the sue the President, alleging he has exceeded his constitutional authority.

On the CBS Evening News (7/30, story 6, 1:35, Brown, 5.08M), CBS political director John Dickerson placed the entire debate in the context of the November elections, saying, "In a midterm, a party's base voters are a larger slice of the electorate than in a presidential year. So the incentive is to talk about things that keep those voters engaged. And that means accentuating divisions. And if the President issues executive orders on immigration later this summer, as is expected, that is going to stir things up more. So if anyone...is concerned with the message this fighting sends globally, it will be hard to hear them over all the shouting."

The CBS Evening News (7/30, story 5, 2:10, Brown, 5.08M) reported that the House "vote to sue" yesterday, "like most votes in Congress these days, was divided along party lines. Almost every Republican voted yes." CBS included comments in support of the lawsuit by GOP Reps. Andy Harris, Virginia Foxx and Terri Sewell, and a comment against it by Democrat Hakeem Jeffries. CBS concluded that "courts have generally ruled that Congress already has the ability to check the President's power without bringing the third branch of government into it." Along similar lines, the Wall Street Journal (7/31, Crittenden, Nelson, Subscription Publication, 5.89M) quotes William and Mary law professor Tara Grove as saying, "We're in uncharted waters, and I think any judicial court would want to avoid weighing in. ... I'd be very surprised if the court grants standing."

The AP (7/30, Fram) reports Democrats "said the lawsuit was simply designed to encourage conservatives to

vote in this November's congressional elections," and "warned that it could be a precursor of a more drastic GOP effort." Rep. Louise Slaughter said yesterday, "The lawsuit is a drumbeat pushing members of the Republican Party to impeachment."

The Washington Times (7/31, Wolfgang, Dinan, 465K) notes the final tally was 225-201, "almost entirely along party lines." The AP (7/31) reports that House debate "over the proposed lawsuit underscored the harshly partisan tone that has dominated the current Congress almost from its start in January 2013." The lawsuit, says the Los Angeles Times (7/31, Memoli, 3.42M), "is the first such legal challenge by a chamber of Congress against a president and a historic foray in the fight over constitutional checks and balances."

Dana Milbank, in his Washington Post (7/30, 4.06M), writes that "for procedural reasons, Republicans opted to bring the lawsuit bill to the floor paired in debate with a measure to deregulate pesticides," which is fitting because "both would make the environment more toxic." Milbank adds that because impeachment is "a political loser," Republicans "used other words Wednesday, such as 'treason,' 'monarchy' and 'usurpation.'"

The New York Times (7/31, Peters, Subscription Publication, 9.79M) notes that during yesterday's House debate, Speaker Boehner "all but accused Mr. Obama of leaving the Constitution in tatters," asking, "Are you willing to let any president choose what laws to execute and what laws to change? Are you willing to let anyone tear apart what our founders have built?" After the vote, USA Today (7/30, Singer, 5.76M) reports, "lawmakers on both sides vented their outrage on Twitter." Gail Collins, in the New York Times (7/31, Collins, Subscription Publication, 9.79M), quips that "you could not help but suspect that if Speaker Boehner had it to do all over again, he'd never have brought this idea up."

The Washington Post (7/30, Kane, Goldfarb, 4.06M) reports House Minority Leader Nancy Pelosi, "glaring at Republicans during the heated debate, accused Boehner ...of caving into 'impeachment-hungry extremists.'" Said Pelosi, "Tell them impeachment is off the table. That's what I had to do" during the Bush presidency.

In an analysis piece, the New York Times (7/31, Nyhan, Subscription Publication, 9.79M) reports "Republican calls to impeach...Obama look like a wedge issue – in favor of Democrats." However, "the odd Tea Party/Obama alliance may be enough to keep this wedge issue alive as the Democrats' last, best hope to avoid what still looks like an unfavorable midterm election."

E.J. Dionne Jr. writes in the Washington Post (7/30, 4.06M) that the reason "impeachment is a big deal in Washington this week" is "not just because a call to defend President Obama motivates the Democrats' base, although it surely does. ... The deeper problem lies in the proliferation of loose impeachment talk linked with one overheated anti-Obama charge after another."

Politico (7/30, Topaz, 637K) noted that on "Morning Joe," Chuck Todd "railed against both the White House and congressional Republicans for engaging in 'disgusting' and 'embarrassing' rhetoric on impeachment and suing the president." Said Todd, "This is the most cynical – Boehner's up there with this ridiculous lawsuit, Josh Eamest sitting at the podium trying to tick off names of, 'Look at Republicans who want impeachment' – it's not serious, ... The lawsuit's not serious. The impeachment talk's not serious. This is playground stuff. This is embarrassing."

Politico (7/30, Breitman, 637K) also reported that on Fox News, Karl Rove said Obama "is playing with the American people by suggesting a constitutional crisis where none exists. ... Shame on him and shame on those people in the administration who participate with him," and "shame on conservatives and Republicans who helped him along." Rove makes the same points in an op-ed in today's Wall Street Journal (7/31, Rove, Subscription Publication, 5.89M).

In an editorial, the Wall Street Journal (7/31, Subscription Publication, 5.89M) dismisses talk of impeaching the President, but defends the House GOP lawsuit against him as an opportunity to demonstrate that Obama has repeatedly overstepped his constitutional authority.

David B. Rivkin Jr., a DOJ and White House official during the Reagan and Bush 41 presidencies, and Elizabeth Price Foley, a constitutional law professor at Florida International University College of Law, argue in favor of the House GOP suit in the Wall Street Journal (7/31, Rivkin, Foley, Subscription Publication, 5.89M), accusing the

President of violating the Constitution's separation of powers clauses.

Politico (7/30, French, 637K) reports that Rep. Paul Ryan yesterday defended the lawsuit, even as he stated that "Obama's executive orders do 'not rise to the high crimes and misdemeanor level' to warrant impeachment proceedings."

Author James Robbins, in USA Today (7/30, Robbins, 5.76M), derides "the spectacle of a president begging to be impeached, the Republican right cheering him on and the House GOP leadership trying vainly to change the subject."

Editorial Wrap-Up:

WASHINGTON POST. "Beware A Wounded Putin." The Washington Post (7/31, 4.06M) reports editorializes that recent Western sanctions against Russia and Ukrainian military victories against separatists present Russian President Vladimir Putin with a "dangerous moment" and the West "an opportunity." The Post says Putin "is more likely to escalate than back down," and Ukraine and the West "must be prepared for a more forceful and overt Russian military intervention," which will require "more support" for Ukraine's military and "economic support" for the government.

"Highway Fund Dysfunction." In an editorial, the Washington Post (7/30, Board, 4.06M) bemoans the "congressional dysfunction" that "has brought the country to the edge of the 'highway cliff,'" and concludes that "the Senate's plan is better – though the two chambers are arguing over fairly small differences."

"Expanding The Metro."

NEW YORK TIMES. "What Science Says About Marijuana." In an over 1,500-word signed editorial for the New York Times (7/30, Boffey, Subscription Publication, 9.79M), Philip M. Boffey writes there is a "vast gap between antiquated federal law enforcement policies and the clear consensus of science that marijuana" isn't as harmful as most illegal drugs and isn't as dangerous as alcohol and tobacco. Boffey argues marijuana causes fewer public health effects than alcohol, is less addictive than tobacco, and hurts users health less than both. Additionally, he calls it a "myth" that marijuana use leads to using other drugs. He acknowledges marijuana has negative effects but argues that in "a society that permits nicotine use and celebrates drinking" they're not severe enough to warrant criminal penalties. While any state legalizing marijuana would face challenges, they are "familiar" from tobacco and alcohol use "and they will become easier" to deal with as more governments "bring legal marijuana under tight regulation."

WALL STREET JOURNAL. "So Sue Him." In an editorial, the Wall Street Journal (7/31, Subscription Publication, 5.89M) dismisses talk of impeaching the President, but defends the House GOP lawsuit against him as an opportunity to demonstrate that Obama has repeatedly overstepped his constitutional authority.

"The 2.1% Expansion." In an editorial, the Wall Street Journal (7/31, Subscription Publication, 5.89M) cautions against reading too much into any single quarter GDP result, and notes that annual growth has not once exceeded 2.7% during the current recovery.

"Sunstroke At The FDA." An editorial in the Wall Street Journal (7/31, Subscription Publication, 5.89M) lauds the House's passage of the Sunscreen Innovation, which would enable Americans to purchase the superior sunblocks available to consumers in other parts of the world, noting that the FDA has refused to approve new sunscreen ingredients.

Washington Schedule:

TODAY'S EVENTS IN WASHINGTON.

White House:

PRESIDENT OBAMA — The President and Vice President receive the Presidential Daily Briefing, Oval Office, closed press; the President and Vice President meet with Members of Congress on foreign policy, Cabinet Room, photojournalist spray; the President and Vice President meet for lunch, Private Dining Room, closed press; the President delivers remarks and signs an Executive Order, South Court Auditorium, open press; the President delivers remarks, The Department of Housing and Urban Development, expanded pool; the President and First Lady host "A Celebration of Special Olympics and A Unified Generation"; the President deliver remarks, East Room, pooled press; the President and First Lady attend a concert commemorating the Special Olympics State, Dining Room, pool coverage at the top. Notes: Press Briefing by Press Secretary Josh Earnest.

VICE PRESIDENT BIDEN — Unavailable.

MICHELLE OBAMA — As part of the Joining Forces initiative, First Lady Michelle Obama will address the 2014 National Conference on Ending Homelessness. This event is open press.

US Senate: COONS – PEN AND PAD — 9 a.m. Senator Coons will host a pen and pad press conference with reporters to preview the US-Africa Leaders Summit and discuss goals for US-Africa trade policy. Open to press. Contact Jamie Serlin at 202-224-5042 or Jamie_Serlin@coons.senate.gov to RSVP. Location: 127-A Russell Senate Office Building.

COMMITTEE MEETINGS

BANKING, HOUSING, AND URBAN AFFAIRS — 10 a.m. Hearings to examine financial products for students, focusing on issues and challenges. Witnesses: Panel 1: David A. Bergeron, Vice President for Postsecondary Education Policy, Center for American Progress; Christine Lindstrom, Higher Education Program Director, US Public Interest Research Group; Kenneth Kocer, President, South Dakota Association of Student Financial Aid Administrators and Director of Financial Assistance, Mount Marty College, Yankton, SD; Richard Hunt, President and CEO, Consumer Bankers Association. http://www.banking.senate.gov/public/index.cfm?FuseAction=Hearings.Hearing&Hearing_ID=8058e98c-2c38-4e5c-999a-fdae0e929bc4. Location: 538 Dirksen.

FINANCE — 10 a.m. Hearing to consider the nomination of Carolyn Watts Colvin of Maryland, to be Commissioner of Social Security for the term expiring January 19, 2019, Social Security Administration. <http://www.finance.senate.gov/hearings/hearing/?id=f5819c3d-5056-a032-52e1-fa5d15601239>. Location: 215 Dirksen.

CANCELED

JUDICIARY — 10 a.m. Executive Business Meeting. <http://www.judiciary.senate.gov/meetings/executive-business-meeting-2014-07-31>. Location: 226 Dirksen.

UPDATED

COMMERCE, SCIENCE, AND TRANSPORTATION — 10:30 a.m. Subcommittee on Aviation Operations, Safety, and Security hearings to examine domestic challenges and global competition in aviation manufacturing. Witnesses: Senator Maria Cantwell (D-WA); Senator Mark Kirk (R-IL); Marc Allen, President, Boeing Capital Corp.; Gerald Dillingham, Director of Civil Aviation Issues, General Accounting Office; Keith Crane, Director of the Environment, Energy, and Economic Development Program, RAND Corporation. <http://www.commerce.senate.gov/public/> Location: 253 Russell.

BANKING, HOUSING, AND URBAN AFFAIRS — 2 p.m. Examining the GAO Report on Expectations of Government Support for Bank Holding Companies. Witnesses: Panel 1: Lawrence L. Evans, Director, Financial Markets and Community Investment, US Government Accountability Office; Dr. Deniz Anginer, Assistant Professor of Finance, Pamplin School of Business, Virginia Tech; Dr. Edward Kane, Professor of Finance, Boston College; Dr. Anat Admati, George G.C. Parker Professor of Finance and Economics, Graduate School of Business, Stanford University; Douglas Holtz-Eakin, President, American Action Forum. http://www.banking.senate.gov/public/index.cfm?FuseAction=Hearings.Hearing&Hearing_ID=caf60dbe-5e9f-

4af9-8ddb-daf054fb1743. Location: 538 Dirksen.

FOREIGN RELATIONS — 2 p.m. Business meeting to consider pending calendar business.

<http://www.foreign.senate.gov/hearings/business-meeting-07-31-14>. Location: S-116.

US House: 9 a.m. — The House will meet for legislative business. Last votes expected no later than 3:00 p.m.

HOUSE FOREIGN AFFAIRS – SYRIAN ARMY DEFECTOR — 9:30 a.m. Congressional briefing hosted by the House Foreign Affairs committee on Assads Killing Machine Exposed: Implications for US Policy. Briefers: “Caesar” (an alias), Syrian Army defector, (will appear in disguise); David M. Crane, Professor of Practice, College of Law, Syracuse University; Cherif Bassiouni, Emeritus Professor of Law, College of Law, DePaul University; Frederic C. Hof, Resident Senior Fellow, Rafik Hariri Center for the Middle East, Atlantic Council.

NOTE: For the safety of “Caesar”, the primary briefer, only still photography will be permitted during the opening statement portion of the briefing and will be restricted to designated areas near the rear of the briefing room. No video or audio recording will be permitted at any time during the briefing. The briefing will not be webcast. VERY GRAPHIC images will be displayed during the briefing. www.foreignaffairs.house.gov. Location: 2172 Rayburn.

PELOSI WEEKLY PRESS CONFERENCE — 10 a.m. News Conference with Democratic Leader Nancy Pelosi Holds Weekly Press Conference (access thru HVC117). Location: HVC Studio A.

BOEHNER BRIEFING — 11:30 a.m. News Conference – Speaker Boehner Holds On-Camera Press Briefing (access thru HVC117). Location: HVC Studio A.

COMMITTEE MEETINGS

PERMANENT SELECT COMMITTEE ON INTELLIGENCE — 8:30 a.m. Business meeting on Final HPSCI Investigative Report on the September 2012 Attacks in Benghazi, Libya. CLOSED. <http://intelligence.house.gov/hearing/ongoing-intelligence-activities-63> Location: HVC-304.

OVERSIGHT AND GOVERNMENT REFORM — 9 a.m. Subcommittee on Government Operations hearing on “Planes Trains and Automobiles: Operating While Stoned”. <http://oversight.house.gov/hearing/planes-trains-automobiles-operating-stoned/> Location: 2154 Rayburn.

ENERGY AND COMMERCE — 9:15 a.m. Subcommittee on Oversight and Investigations hearing on “PPACA Implementation: Updates from CMS and GAO.” Witnesses: Andy Slavitt, Principal Deputy Administrator, Centers for Medicare and Medicaid Services; William T. Woods, Director of Acquisition and Sourcing Management, Government Accountability Office. <http://energycommerce.house.gov/hearing/ppaca-implementation-updates-cms-and-gaosthash>. WauXFLPI.dpuf. Location: 2123 Rayburn.

SCIENCE, SPACE, AND TECHNOLOGY — 10 a.m. Subcommittee on Research and Technology and Subcommittee on Oversight joint hearing: “Technology Needed to Secure Americas Border”. Witnesses: Dr. K. Jack Riley, Vice President, RAND National Security Research Division; David C. Maurer, Director, Homeland Security and Justice, US Government Accountability Office; Dr. Joseph D. Eyeran, Director, Health Security Program, RTI International. <http://science.house.gov/hearing/subcommittee-research-and-technology-and-subcommittee-oversight-joint-hearing-technology-0>. Location: 2318 Rayburn

SMALL BUSINESS — 10 a.m. Subcommittee on Health and Technology will hold a hearing titled, Telemedicine: A Prescription for Small Medical Practices?&8203; Witnesses: Dr. Karen Rheuban, Senior Associate Dean for CME and External Affairs Director, University of Virginia Center for Telehealth, University of Virginia, Charlottesville, VA; Dr. Megan McHugh, Research Assistant Professor, Director, Program in Healthcare Policy and Implementation, Center for Healthcare Studies, Institute for Public Health and Medicine and Department of Emergency Medicine, Northwestern University, Feinberg School of Medicine, Chicago, IL; Maggie Basgall, Community Development Specialist, Nex-Tech, Lenora, KS – Testifying on behalf of the NTCA – The Rural Broadband Association; Dr. Brenda Dintiman, FAAD, Fair Oaks Skin Care Center, Fairfax, VA – Testifying on behalf of the American Academy of Dermatology. Location: 2360 Rayburn.

WAYS AND MEANS — 10:15 a.m. Markup of: H.R. 647, “ABLE Act of 2013”. www.WaysandMeans.House.Gov. Location: 1100 Longworth.

Other: 4-H – CHILDHOOD OBESITY — 11:30 a.m. The National 4-H Council is partnering with Biggest Loser finalist and former Florida State football player Joe Ostaszewski on Riding it Forward, a national bike ride raising awareness for on obesity and healthy living in 42 cities this summer and fall. To help combat this, National 4-H Council is partnering with Biggest Loser finalist and former Florida State football player Joe Ostaszewski on Riding it Forward, a national bike ride raising awareness for healthy living in 42 cities this summer and fall. Participants: Joe Ostaszewski – Biggest Loser season 14 finalist and former Florida State football player who has “dedicated his life to helping today’s youth fight childhood obesity”; Christina Alford – Executive Vice President of National 4-H Council who “works daily to empower youth to reach their full potential”; Allie Lansman – 4-H Healthy Living Youth Ambassador who, after watching Biggest Loser and learning about healthy living from 4-H, lost 50 lbs; Noah Gray a.k.a. Biingo – Biggest Loser Youth Ambassador from season 14 who has continued to combat childhood obesity after he left the Biggest Loser Ranch more than a year ago (only available day-of-the-event). Location: National 4-H Council, 7100 Connecticut Avenue, Chevy Chase, MD. Contacts: Kimberly M West kwest@4-h.org (301-951-3078). On the Net: <http://4-h.org>. www.ridingitforward.com. Notes: Locations for the tour: Chevy Chase, Md. (July 31); Nashville, Tenn. (August 12); Little Rock, Ark. (August 19); Oklahoma City, Okla. (August 26); Amarillo, Texas (September 4); Flagstaff, Ariz. (September 17); Los Angeles, Calif. (September 25); Calabasas, Calif. (September 26)

IEEE POWER & ENERGY SOCIETY GENERAL MEETING — July 27 – 31. The IEEE Power and Energy Society General Meeting 2014. <http://www.pes-gm.org/2014/> Highlights: 8 a.m. – 12 p.m. Cyber and Physical Security. Panelists: Annabelle Lee, EPRI, NESCOR; Andy Bochman, Bochman Advisors; Jason Christopher, Cyber Security Capabilities & Risk Management US Department of Energy; Gerry W. Cauley, North American Electric Reliability Council; Jim Brenton, ERCOT. Location: Gaylord National Resort & Convention Center in National Harbor, MD

WHISTLEBLOWER SUMMIT FOR CIVIL AND HUMAN RIGHTS — July 28 – 31. ACORN 8 and Drum Majors for Truth will co-host this year’s Whistleblowers Summit for Civil and Human Rights. Whistleblowers and their advocates will visit Capitol Hill to convene this four-day event, which features Plenary Session, Workshops and Panel Discussions, Press Conference at the National Press Club, Whistleblower Book Signing and Film Screening, National Whistleblower Appreciation Day Awards Luncheon and Reception, Pillar Awards Presentations, and Solidarity Dinner. www.WhistleblowerSummit.com. Highlights: Civil Rights Celebration Day with panel discussion on: OSC/EEOC Memorandum of Understanding; Office of Special Counsel; Pillar Award Presentation (noon); Equal Employment Opportunity Commission Stakeholder Panel; “Cooking the Books at the VA & USDA” (2p.m.); Class Actions: Justice Department, Social Security Administration and US Department of Agriculture; Whistleblower Solidarity Dinner (6 p.m.). Location: 340 Cannon House office Building. Contacts: Michael McCray (870) 543-0024. Notes: The 2014 Whistleblower Summit to commemorate National Whistleblower Appreciation Day luncheon will be held at the Mott House, 122 Maryland Ave., NE, Washington, D.C. 20002, on July 30 from 12:30-3pm. The luncheon is free of charge but you must RSVP by Tuesday, July 29.

HOMELESSNESS CONFERENCE — July 29 – 31. The 2014 National Conference on Ending Homelessness, held by the National Alliance to End Homelessness. <http://help.endhomelessness.org/events/30/events/30/agenda>. Highlights: Address by first lady Michelle Obama.

FDA – ANTIBACTERIAL PRODUCTS — July 30 – 31. The Development of New Antibacterial Products: Charting a Course for the Future. FDA Commissioner Margaret Hamburg, M.D., will deliver opening remarks. <http://www.fda.gov/EmergencyPreparedness/Counterterrorism/MedicalCountermeasures/AboutMCMi/ucm403009.htm>. Location: Bethesda North Marriott Hotel & Conference Center disclaimer icon, 5701 Marinelli Road, North Bethesda, MD 20852. Contacts: Stephanie Yao stephanie.yao@fda.hhs.gov (301-796-0394)

EESI EXPO & POLICY FORUM — 9:30 a.m. – 4:30 p.m. 7th Annual Congressional Renewable Energy and Energy Efficiency EXPO + Policy Forum. Headline speakers include: Rep. David G. Reichert, R-WA (Co-chair of the House Renewable Energy & Energy Efficiency Caucus); Rep. Chris Van Hollen, D-MD (Co-chair of the House Renewable Energy & Energy Efficiency Caucus); Rep. Jim Himes, D-CT; Rep. Paul Tonko, D-NY; Richard Kidd, Deputy Assistant Secretary of the Army (Energy & Sustainability); Edward Thomas Morehouse, Jr., Principal Deputy Assistant Secretary of Defense, Operational Energy Plans and Programs; Rear Admiral Kevin R. Slates, Director of Energy and Environmental Readiness Division, US Navy; Dr. David T. Danielson, Assistant Secretary for Energy Efficiency & Renewable Energy, US Department of Energy. Highlights: 9:30 a.m. – 4:05 p.m. Policy Forum. 334 Cannon. 10:15 a.m. Acting Deputy Assistant Secretary of the Navy for Energy Capt. James C.

Goudreau speaks at the 17th Annual Renewable Energy and Energy Efficiency Expo and Forum 334 Cannon. 10:30 a.m. – 12 p.m. Expo. 345 Cannon. Notes: Register at <http://sustainableenergy.org/2014-expo/2014-expo-registration/>

FDA – BLOOD PRODUCTS — 8 a.m. The Blood Products Advisory Committee will meet in open session to discuss Baxter Healthcare Corporations biologics license application for HyQvia, Immune Globulin Infusion 10 percent (human) combined with Recombinant Human Hyaluronidase for the treatment of patients with primary immune deficiency disorders. In the afternoon, the committee will meet in open session to discuss reentry of blood donors deferred on the basis of Chagas disease test results. Press Office Contact: Jennifer Rodriguez, 301-796-8232, jennifer.rodriguez@fda.hhs.gov. Location: FDA's White Oak campus, Silver Spring Maryland.

FDA – TISSUGLU SURGICAL ADHESIVE — 8 a.m. The General and Plastic Surgery Devices Panel will meet to discuss, make recommendations and vote on information regarding the premarket application for the TissuGlu Surgical Adhesive device sponsored by Cohera Medical, Inc. The proposed use for the TissuGlu Surgical Adhesive device is for the approximation of tissue layers where subcutaneous dead space exists between the tissue planes in large flap surgical procedures such as abdominoplasty. Press Office Contact: Jeff Ventura, 301-796-7567, jeff.ventura@fda.hhs.gov. Location: Gaithersburg Hilton, Gaithersburg, Maryland.

IMF – JAPAN STAFF REPORT – CONFERENCE CALL — 9:30 a.m. Conference Call on the Japan Staff Report for the IMF 2014 Article IV Consultation. Speakers: Jerry Schiff, Mission Chief for Japan and Deputy Director of Asia and Pacific Department; Stephan Danninger, Division Chief, Asia and Pacific Department. Dial from the US (800) 230-1951 or from outside the US: +1 (612) 332-0630. On the Net: <http://presscenter.imf.org>. Notes: Due to the time difference, journalists in Asia and the Pacific regions can submit questions prior to the call via email at kutsunomiya@imf.org. Documents: The 2014 Japan Staff Report and related materials will be made available under embargo at latest 12 hours ahead of the call, for publication not before Thursday, July 31 at 9:30 a.m. Washington time (13:30 GMT).

FAMILIES USA – MEDICAID EXPANSION – PA — 10 a.m. Teleconference and Release of Report by PA Health Access. Network and Families USA, "Medicaid Expansion in Pennsylvania: Health Insurance for Working Individuals and Families." Participants: Antoinette Kraus, Director, Pennsylvania Health Access Network; Dee Mahan, Medicaid Program Director, Families USA. DIAL IN: 888-504-7963. Confirmation code: 7517721. Contacts: Dave Lemmon, Bob Meissner Bryan Fisher ((202) 628-3030)

NAM – OZONE STANDARD REVISION — 10 a.m. The National Association of Manufacturers (NAM) to Release Major Study on Impact of EPA's Planned Ozone Standard Revision. Speakers: Jay Timmons, President and CEO, NAM; Ross Eisenberg, Vice President of Energy and Resources Policy, NAM; Dr. David Hamison, Jr., Senior, Vice President and Co-Chair, Environment Practice, NERA, Economic Consulting. RSVP to Jamie Hennigan at JHennigan@nam.org DIAL IN: (866) 952-1908, conference ID: NAM.

ATLANTIC COUNCIL – AFRICAN LEADERS SUMMIT PREVIEW — 11 a.m. The US-Africa Leaders Summit: A Preview. Remarks by: Linda Thomas-Greenfield, Assistant Secretary for African Affairs, US Department of State. Moderator: J. Peter Pham, Director, Africa Center, Atlantic Council. <http://www.atlanticcouncil.org/events/upcoming-events/detail/the-us-africa-leaders-summit-a-preview>. Location: 1030 15th Street, NW, 12th Floor (West Tower).

ATLANTIC COUNCIL – GAZA — 3:30 p.m. Gaza: Breaking the Vicious Cycle, A Conversation with Dr. Salam Fayyad. Speakers: Dr. Salam Fayyad, Distinguished Statesman, Atlantic Council. Welcome remarks by Gen. James L. Jones, Jr., USMC (Ret.), President, Jones Group International, Chairman, Brent Scowcroft Center on International Security, Atlantic Council. Moderator: Frederick Kempe, President and CEO, Atlantic Council. <http://www.atlanticcouncil.org/events/upcoming-events/detail/gaza-breaking-the-vicious-cycle-a-conversation-with-dr-salam-fayyad>. Location: 1030 15th Street, NW, 12th Floor (West Tower).

NASA – MARS 2020 ROVER INSTRUMENTS — 12 p.m. NASA will announce on Thursday, July 31, the instruments that will be carried aboard the agency's Mars 2020 mission, a roving laboratory based on the highly successful Curiosity rover. The announcement will air live at noon EDT on NASA Television and on the agency's website. Speakers: John Grunsfeld, astronaut and associate administrator for the NASA Science Mission Directorate, Headquarters, Washington; Bill Gerstenmaier, associate administrator for the NASA Human

Exploration and Operations Directorate, Headquarters; Michael Meyer, lead scientist, Mars Exploration Program, Headquarters; Ellen Stofan, NASA chief scientist, Headquarters. <http://www.nasa.gov/press/2014/july/nasa-to-announce-mars-2020-rover-instruments/.U9I3LvdVXE>. Location: NASA TV studio at NASA Headquarters, 300 E Street SW. Notes: Media who would like to attend in person. To arrange access, media must email dwayne.c.brown@nasa.gov by no later than 9 a.m. Thursday.

MALAWI – REP. CARNEY, RUNYAN – PHILLIES PITCHER HAMELS — 12:30 p.m. – 1:30 p.m. The Hamels Foundation, with Rep. John Carney, D-at large DE and Rep. Jon Runyan, R- 3rd NJ) hosts lunch briefing on the work of the Hamels Foundation and the Globalb Fund to fight Tuberculosis and malaria in Malawi. Speakers include: Cole hamels, CO-founder, Hamels Foundation, Starting Pitcher, Philadelphia Phillies. Location: 2200 Rayburn. Contacts: Rachel Henderson rhenderson@unfoundation.org (202.739.2782). On the Net: www.unfoundation.org

TRADE SECRET PROTECTION – WEB EVENT — 12:30 p.m. – 2 p.m. The National Association of Manufacturers (NAM), the National Alliance for Jobs and Innovation (NAJI) and the Center for Responsible Enterprise And Trade (CREATe.org) will host a webinar on what can be done by manufacturers to prevent and remedy trade secret theft. An announcement will also be made regarding a new grassroots effort to engage on trade secret protection. Panelists: Rob McKenna, President of NAJI and former Washington State Attorney General; Aric Newhouse, Senior Vice President of Policy and Government Relations, NAM; Ted Schroeder, Chief Counsel, Office of Sen. Chris Coons (D-DE); Thaddeus Bums, Senior Counsel, Intellectual Property and Trade, GE; Pamela Passman, President and CEO, Center for Responsible Enterprise and Trade. On the Net: <http://www.nam.org> Notes: Register with Kara Horton at (617) 995-5419 or khorton@naji.org. Registration deadline is 2:00 p.m., Wednesday, July 30. Dial-in information will be e-mailed to all registrants on Wednesday evening. The panelists will be available for interviews following the event.

AMERICAN ISLAMIC CONGRESS – ISIS — 12:30 p.m. – 2:30 p.m. "ISIS in Iraq: Political or Religious Conflict? Sunni Vs Shia." Invited speakers: Congressman Frank Wolf, Representative of Virginia-10th District; Ambassador Lukman Faily, Iraqi Ambassador to the United States; Dr. Muhamed Almaliky, Founder and Director of the Iraqi American Institute. Location: Gold Room, Rayburn. Contacts: media@aicongress.org, 202-457-5890. Notes: <https://www.eventbrite.com/e/isis-in-iraq-political-or-religious-conflict-sunni-vs-shia-tickets-12369151465>.

Last Laughs:

LATE NIGHT POLITICAL HUMOR.

Jimmy Kimmel: "Meanwhile, in Washington the House passed the bill today with 225 votes to go forward with a lawsuit against President Obama. So see, who says Congress can't get anything done?"

Jimmy Kimmel: "They're suing the President. Well, I think it is ridiculous unless they do the trial on Judge Judy. Then I am all for it."

Jimmy Fallon: "President Obama is facing repeated calls for his impeachment because of the immigration crisis at the border. But yesterday, House Speaker John Boehner said that in fact, Republicans actually have no plans to impeach the President. Which got weird when Obama was like, 'Damn, almost got out of this thing, yeah. That was a good way out, man. I'm looking forward to vacation.'"

Jimmy Fallon: "Boehner said Republicans have no plans to impeach President Obama. They were like, 'We're too busy figuring out how to impeach Hillary. You know, we gotta think ahead.'"

Jimmy Fallon: "Chris Christie attended a GOP fundraiser with Donald Trump at the Trump National Golf Course in New Jersey. Yeah. When asked what his handicap is, Christie said, 'Stairs.'"

Seth Meyers: "In a speech today, President Obama criticized Congress for trying to sue him, saying that they need to focus on the economy and should stop just 'hating' all the time. John Boehner responded, 'Maybe we would stop hating, if you'd stop frontin'.'"

BIG PICTURE:

- + Headlines From Today's Front Pages.

WASHINGTON SCHEDULE:

- + Today's Events In Washington.

LAST LAUGHS:

- + Late Night Political Humor.

DOI in the News:

SECRETARY JEWELL PRAISES PARTNERSHIPS IN PENNSYLVANIA MINE-TO-GARDEN PROJECT. The E&E Daily (8/1) reports that Interior Secretary Sally Jewell "praised the public-private partnerships that helped turned a polluted abandoned coal mine site here into the Pittsburgh area's first botanic garden." It was made possible by "a nearly \$100,000 grant from Interior's Office of Surface Mining," and "the state chipped in more than \$220,000 in 2009 from its Growing Greener grants, and the Foundation for Pennsylvania Watersheds gave

another \$15,000."

Also providing coverage are the Pittsburgh Post-Gazette (8/2, Mcfeeters, 590K), the Pittsburgh Business Times (8/1, Subscription Publication, 25K), and KDKA-TV Pittsburgh (8/1, 57K).

DEAL ANNOUNCED FOR COLORADO RIVER BASIN CONSERVATION. The E&E Daily (8/1) reports that "municipal water providers in four drought-stricken Western states announced a deal with the federal government" on Thursday "aimed at conserving water in the Colorado River Basin." The Central Arizona Project, Denver Water, the Metropolitan Water District of Southern California, the Southern Nevada Water Authority and the BOR will "contribute a total of \$11 million to the program, called the Colorado River System Conservation Program." Michael Connor, deputy secretary of the Interior Department, said, "This is a critically important first step, and I applaud the far sighted municipal water providers for beginning to address the imbalance in supply and demand on the Colorado River that could seriously affect the economy and the people who rely upon the river."

Also reporting on the story are the Las Vegas Review-Journal (8/4, 386K), the Mohave Valley (AZ) Daily News (8/4, 23K), and the Ogden (UT) Standard-Examiner (8/1, 86K).

INTERIOR PARTNERING WITH UNION GROUP TO RESTORE NATIONAL PARKS, WILDLIFE REFUGES. Additional coverage of Interior Department's partnership with the Union Sportsmen Alliance was provided by the Washington Times (8/4, 465K). The Interior Department will "grant \$3 million to 'Boots on the Ground' volunteer projects in several states including, Illinois, Ohio, Virginia, Minnesota, Maryland, Nevada, Texas and Wisconsin." Interior Secretary Sally Jewell said, "Not only will our nation's parks and public lands benefit from the expert labor, but many young people will have an opportunity to work alongside the volunteers, learning about the great outdoors and gaining important trade skills," Ms. Jewell said. "I applaud the Union Sportsmen's Alliance for their work to continue to strengthen the nation through volunteer efforts that will make a big difference in conservation projects across the country."

HOUSE REPUBLICANS CALL ON ADMINISTRATION TO OPEN UP NEW OFFSHORE DRILLING AREAS. The E&E Daily (8/1) reports that "coalitions of lawmakers in both chambers and from both parties this week urged Interior Secretary Sally Jewell to open new federal waters to oil and gas leasing in the department's next five-year leasing plan, citing bipartisan support in Congress and from coastal governors." On Friday, "a coalition of more than 160 House Republicans sent a letter to Jewell urging her to lease waters 'with the greatest resource potential as well as areas such as the mid- and south-Atlantic, or the Arctic,' as part of Interior's 2017-2022 plan." Also, on Thursday, "a letter by Senate Energy and Natural Resources Chairwoman Mary Landrieu (D-La.) and Democratic colleagues Mark Warner of Virginia, Joe Manchin of West Virginia and Mark Begich of Alaska urged Jewell to craft a plan that 'allows for the consideration of exploration for all areas with reasonable potential for future resource development.'"

Also reporting on the story is The Hill. (8/2, Barron-Lopez, 237K)

WESTERN GOVERNORS OPPOSE NEW PACIFIC LEASING. The E&E Daily (8/1) reports that three West Coast governors on Thursday "formally voiced their opposition to expanding oil and gas drilling off their shores, pre-empting the inclusion of new exploration in an updated version of the Interior Department's Outer Shelf Oil and Gas Leasing Program." In a letter to Interior Secretary Sally Jewell, Democratic Govs. Jay Inslee of Washington, Jerry Brown of California and John Kitzhaber of Oregon "condemned the environmental threat new leases pose for ocean-dependent industries that contribute billions of dollars to a region representing 'the fifth-largest economy in the world.'" They wrote, "While new technology reduces the risk of a catastrophic event such as the 1969 Santa Barbara oil spill, a sizeable spill anywhere along our shared coast would have a devastating impact on our population, recreation, natural resources, and our ocean and coastal dependent economies."

Meanwhile, the Washington Examiner (8/4, 335K) reports that "three West Coast Democratic governors came out against offshore drilling this week, but it's a Republican governor's moves on the Atlantic Ocean that have drawn some attention." New Jersey Gov. Chris Christie's Department of Environmental Protection "went to court earlier this month to block a federally funded oil and gas exploration project that uses seismic airgun testing off the Atlantic coast, saying it could harm the state's fishing and tourism industries." A district court judge rejected the motion, but the Christie administration is appealing the ruling.

Also reporting on the story are [Politico](#) (8/4, Guillén, 637K), the [FuelFix](#) (8/1, 7K), the [Everett \(WA\) Herald](#) (8/3, 131K).

In an editorial, the [Spokane \(WA\) Spokesman-Review](#) (8/2, 170K) supports the opposition to drilling by the West Coast governors. According to the paper, "except off California, where drilling would set off a tsunami of opposition, what little study that has been done of the potential farther up the coast should be discouraging compared with the known wealth exploitable in so many other areas."

SENATE DEMOCRATS CALL FOR EXPANDED LEASING. The [Oil and Gas Journal](#) (8/4, 1K) reports that Energy and Natural Resources Committee Chairwoman Mary L. Landrieu and three other Senate Democrats urged Interior Secretary Sally Jewell "to consider leasing more of the US Outer Continental Shelf for oil and gas exploration and development in the next 5-year program." In the letter, which was also signed by Sens. Mark Begich, Joe Manchin, and Mark W. Warner, Landrieu wrote, "We believe the [Department of the Interior] should move forward with a 5-year program that continues to lease currently open areas, but also allows for the consideration of exploration for all areas with reasonable potential for future resource development."

SUPPLEMENTAL FUNDING BILL THAT WOULD INCLUDE MONEY FOR WILDFIRES FAILS IN SENATE. The [E&E Daily](#) (8/1) reports that "Congress is wrapping up its final business before the August recess this afternoon without addressing the Obama administration's request for emergency funding to fight wildfires raging in the West." According to the article, "the more than \$600 million for wildfires had been wrapped up in broader supplemental funding legislation that failed" Thursday. The House "may try to approve the same funds before adjourning later" Friday, "but its plans are unclear."

The [E&E Daily](#) (8/1) notes "that means that whatever the House considers – which would not include the wildfire money – cannot be signed into law until at least September, but House Republicans said they were committed to acting on the border crisis before leaving town."

Meanwhile, on [Real Money with Ali Velshi](#) (8/4), Jim Douglas, Director, Office of Wildland Fire, discussed the increasing cost of wildfire management using some of the data brought up by the Union of Concerned Scientists report.

Senate Bill Would Expedite Reviews For Wildfire Projects. The [E&E Daily](#) (8/1) reports that "a new bill by Senate Republicans seeks to streamline federal reviews for forest projects that reduce wildfire threats to critical infrastructure, private lands or endangered species habitat." Sen. Dean Heller's S. 2768 would "expand the use of categorical exclusions for hazardous fuels projects under the Healthy Forests Restoration Act with an eye toward preserving habitat for at-risk species like sage grouse."

Additional Coverage. Additional coverage of wildfires was provided by [Fox News](#) (8/1, 6.72M), the [Christian Science Monitor](#) (8/3, 566K), the [Los Angeles Times](#) (8/2, Lin, 3.42M), the [Denver Post](#) (8/4, 923K), the [Denver Post](#) (8/4, 923K), and the [Sacramento \(CA\) Bee](#) (8/3, 582K).

SENATE PANEL UNVEILS INTERIOR-EPA SPENDING BILL. The [E&E Daily](#) (8/1) reports that Senate appropriators on Friday "released a draft \$30.7 billion fiscal 2015 spending bill to fund the Interior Department, US EPA and the Forest Service, a measure that would authorize a key Obama administration proposal for funding wildfires while rejecting the administration's proposed cuts to EPA water infrastructure grant programs." The article notes that "the Senate draft would also provide a roughly \$20 million boost over current funding for federal land acquisition under the Land and Water Conservation Fund, a win for conservationists." In total, the measure would "provide \$10.6 billion for the Interior agencies under the panel's jurisdiction, which is just about even with what Obama requested."

Also covering the story is [KDLG-AM](#) Dillingham, AK (8/4).

SECRETARY JEWELL HOSTS DIALOGUE ON COMBATING WILDLIFE TRAFFICKING. The [Daily News \(TZA\)](#) (8/4) reports on the USAfrican Leaders' Summit. Tanzania President Jakaya Kikwete was scheduled to "participate in a luncheon at the Centre for Global Development where he will share his vision on the future of Tanzania following the discoveries of oil and gas before attending a dialogue on combating wildlife trafficking to be hosted by the US Secretary of Interior, Sally Jewell."

SENATORS PUSH TO DESIGNATE CHIEF STANDING BEAR NATIONAL HISTORIC TRAIL. The [AP](#) (8/4) reports that Nebraska's senators have "joined the effort to seek federal recognition for the trail the Ponca Tribe took during a forced march more than 135 years ago." Sens. Mike Johanns and Deb Fischer "introduced legislation Thursday calling on the Interior Department to determine the feasibility of creating a Chief Standing Bear National Historic Trail."

US TEARING DOWN HUNDREDS OF DAMS TO RETURN RIVERS TO THEIR WILD STATE. The [Christian Science Monitor](#) (8/4, Struck, 566K) reported that in a "profound shift of priorities in the United States," dams "are gradually being torn down," in most cases "to restore rivers to a wild state." Over the past 25 years, nearly 900 dams have been removed. Conservationists "say they are surprised at how quickly nature recovers" after the dams are torn down.

ADDITIONAL COVERAGE OF NATIVE HAWAIIAN RELATIONS. Additional coverage of Native Hawaiian relations was provided by the [Hawaii Free Press](#) (8/4) and the [Hawaii Free Press](#) (8/4).

ADDITIONAL COVERAGE OF SUPPORT OF GREATER CANYONLANDS NATIONAL MONUMENT. Additional coverage of the "letter sent last week to President Barack Obama by 14 US senators asking him to use his power under the Antiquities Act to create a Greater Canyonlands National Monument in Utah" was provided by the [Deseret \(UT\) News](#) (8/4, 538K).

HISPANIC VOTERS SUPPORT CONSERVATION. In an op-ed for the [Pueblo \(CO\) Chieftain](#) (8/4, 79K), Rod Torrez, Director of HECHO, Hispanics Enjoying Camping, Hunting & Outdoors, writes that "a recent NBC/Manist poll confirmed what Latinos across Colorado already know from generations of enjoying the great outdoors — we are conservationists." He notes that "the poll showed that despite sampling more Republicans than Democrats (32 percent and 27 percent, respectively), the Democratic candidate for Senate in Colorado holds a 31-point edge in support among Latinos." According to Torrez, "views on conservation and pollution may very well play a role in that divergence." Also, "the findings of a different poll commissioned by Latino sportsmen of Hispanic registered voters in Colorado and New Mexico found that protecting public lands and clean air and water are fundamental values for our community."

SUPPORT URGED FOR LWCF. In an editorial, the [Everett \(WA\) Herald](#) (8/3, 131K) urges Congress to support the Land and Water Conservation Fund. The paper claims that "the windfall is substantial" and notes that "Washington's recreation economy is a \$8.5 billion industry sustaining 115,000 jobs."

America's Great Outdoors:

National Park Service:

NPS DEFENDS PLAN TO SHOOT DEER AT THREE CIVIL WAR BATTLEFIELDS. The [E&E Daily](#) (8/1) reports that the NPS has "completed its review of a white-tailed deer management plan for three Civil War battlefields that proposes using sharpshooters to kill roughly 2,800 deer over a five-year period." The agency on Friday "released a final environmental impact statement (EIS) and deer management plan that is designed to thin white-tailed deer herds that NPS says are damaging forests and vegetation at the Antietam and Monocacy national battlefields in Maryland and Manassas National Battlefield Park in Virginia." Jenny Anzelmo-Sarles, an NPS spokeswoman, said, "Right now, there are no contraceptives that have been proven effective in free-range deer populations. But the preferred alternative allows us to use both lethal and non-lethal methods if [effective] contraceptives for free-range deer become available."

Also covering the story are the [AP](#) (8/4), the [Washington Post](#) (8/1, 4.06M), the [Washington Post](#) (8/1, 4.06M), the [Cumberland \(MD\) Times-News](#) (8/4, 91K), and the [Sacramento \(CA\) Bee](#) (8/1, 582K).

STUDY REQUESTED ON INCLUDING JOHN P. PARKER HOUSE AND UNDERGROUND RAILROAD IN PARK SYSTEM. The [AP](#) (8/4) reports that "some members of Congress want the southern Ohio home of a former slave who helped other slaves to freedom brought into the national park system." Sen. Sherrod Brown and Rep. Joyce Beatty say "they have introduced legislation requesting a study of the feasibility of the John P. Parker House and

Underground Railroad stop becoming part of the park system.”

SAGUARO NATIONAL PARK BANS DRONES. The AP (8/4) reports that “officials at Saguaro National Park say all unmanned aircraft are barred from the southern Arizona park.” The park has “updated its written policy to address restrictions on aerial devices including drones within its boundaries.”

NPS TO DONATE TOP OF BROKEN 1895 MONUMENT, DESTROY REMAINDER. The Newport News (VA) Daily Press (8/3, 181K) reports that “it appears that only the top quarter of a 119-year-old statue will be loaned to the York County Historical Museum if a proposal from the National Park Service is accepted by the York Board of Supervisors Monday night.” The rest of the Shaw Monument “will be ground for use on roadways, according to a memorandum from County Administrator James McReynolds to the board.”

NPS CELEBRATES MABRY MILL RESTORATION. The Roanoke (VA) Times (8/4, 231K) reports that “the big wheel is turning again at Mabry Mill, thanks to a \$65,000 grant from the Blue Ridge Parkway Foundation.” According to the article, “several dozen fans of the popular parkway attraction turned out for Thursday morning’s celebration of the mill’s restored water wheel, which was rebuilt this past winter and spring.” The grant “covered repairs to the mill wheel and the flumes that supply water, as well as dredging of the mill pond.”

YELLOWSTONE GRIZZLY, PEOPLE RUN-INS SHOW DECLINE IN 2013. The AP (8/1, Press) reports that “conflicts between humans and grizzly bears in the region around Yellowstone National Park dropped last year, but that wasn’t enough to reverse a long-term trend of more potentially dangerous interactions as populations of both bruins and people increase.” A new report by the Interagency Grizzly Bear Study Team “shows 252 grizzly run-ins were documented last year.” According to study team leader Frank van Manen, “the number of conflicts decreased from the annual average of 270 for the prior three years.”

STUDY SUGGESTS FEE HIKE COULD OFFSET YELLOWSTONE BEAR COST. The AP (8/4) reports that “a new study says visitors to Yellowstone National Park want to see grizzly and black bears so much they would pay more than double park’s the current entry fee to be ensured of seeing one.” According to a report in the Journal of Environmental Management, “Yellowstone could raise its current entrance fee to offset the cost of bears that appear frequently along roadsides.” The study found that “visitors are willing to pay \$41 on top of the \$25 entrance fee to cover the cost of policing ‘bear jams.’”

YELLOWSTONE CREWS WORK TO REMOVE ILLEGAL TRAILS. The AP (8/4) reports Yellowstone National Park officials are “working on removing trails that were illegally constructed in the park’s southwestern corner.” According to park officials, “somebody deliberately built the trails they’re now trying to eliminate in the Bechler River area.”

SAND DUNES NATIONAL PARK TO BE FEATURED ON QUARTER. The AP (8/4) reports that Colorado’s Great Sand Dunes National Park and Preserve will “soon be featured on the quarter as part of a US Mint program aimed at honoring the country’s national parks and other famous landscapes.” According to the article, “the front of the coin will still feature the bust of George Washington, but the reverse side will depict a boy and his father playing in Medano Creek with the dunes and the Sangre de Cristo Mountains in the background.”

HOMESTEAD MONUMENT TO HOST ‘MUSICAL SMORGASBORD’. The AP (8/4) reports that the Homestead National Monument of America is “finishing this year’s campfire program series with a musical presentation.” The event will be held “on Saturday at 7 p.m. Musician Chris Sayre will present ‘Nebraska’s Musical Smorgasbord,’ with traditional folk music from Europe and North America.”

Bureau of Land Management:

SEN. WYDEN SEEKS NEW PATH FOR O&C LOGGING, WATER BILLS. The E&E Daily (8/1) reports that Sen. Ron Wyden on Thursday “sought a new legislative path for two of his signature bills aimed at revamping forestry in western Oregon and approving water agreements in Oregon’s thirsty Klamath Basin.” According to the article, “neither proposal had advanced in the Senate Energy and Natural Resources Committee before the August recess, so Wyden added tax provisions that allow the measures to be considered in his legislative home court.”

NEVADA RANCHER BUNDY INVOKES GOD IN DISPUTE WITH BLM. The AP (8/4) reports that "Nevada rancher Cliven Bundy claims the April confrontation between the federal government and his armed supporters was part of an age-old spiritual battle between good and evil." Bundy, "a Mormon, told an Independent American Party gathering in St. George, Utah, on Saturday that God provided him personal inspiration in the showdown over cattle in Bunkerville, Nevada, about 80 miles northeast of Las Vegas." He said, "The Lord told me ... if [the local sheriff doesn't] take away these arms from federal agents, we the people will have to face these arms in a civil war. He said, 'This is your chance to straighten this thing up.'"

TWO WILD HORSES DIE DURING ROUNDUP IN UTAH. The E&E Daily (8/1) reports that "one wild horse broke its neck and another was euthanized by the Bureau of Land Management during a roundup operation in western Utah on Wednesday, the agency said." According to BLM spokeswoman Lisa Reid, "the first animal was killed instantly after the agitated yearling charged headfirst into a side panel, and the agency had to euthanize a 7-year-old animal due to a severely deformed leg." The article note that "such deaths are unusual and occurred during the third day of the Blawn Wash roundup in Utah's Wah Wah Mountains, about 35 miles southwest of Milford."

Fish and Wildlife Service:

FWS BANS GMO FEED, BEE-KILLING CHEMICALS. The E&E Daily (8/1) reports that the FWS will "phase out genetically engineered crops to feed wildlife and neonicotinoid pesticides in all of its regions' wildlife refuges through 2016, according to a memorandum dated last week." Jim Kurth, FWS refuge chief, wrote in the document, "We have demonstrated our ability to successfully accomplish refuge purposes over the past two years without using genetically modified crops, therefore it is no longer possible to say that their use is essential to meet wildlife management objectives. We will no longer use genetically modified crops to meet wildlife management objectives system-wide."

BILL AIMS FOR CONSIDERATION OF CRITICAL HABITAT COSTS. The E&E Daily (8/1) reports that Sens. Mark Pryor (D) and John Boozman (R) "want to force the Fish and Wildlife Service to consider the costs of critical habitat designations on private landowners." The two introduced a bill on Thursday, S. 2729, that "would reverse a 2013 rule that requires FWS to only consider how much such designations will cost federal agencies." According to the article, "instead of that so-called incremental economic impact, the agency would have to consider costs to agriculture, businesses and local governments."

JUDGE HEARS ARGUMENTS ON LAWSUIT OVER OWL KILLINGS AT KENNEDY AIRPORT. The New York Times (8/1, Clifford, Subscription Publication, 9.79M) reports that on Friday, "a judge in Federal District Court in Brooklyn heard arguments over whether a lawsuit should go forward that was brought by the group, Friends of Animals, seeking to change policies of the federal agencies that oversee bird removal" at John F. Kennedy Airport. The lawsuit claims "the 'bird hazard reduction program' run by the Port Authority, which is not a subject of the suit, has killed tens of thousands of birds around Kennedy since 1994." Judge John Gleeson is "expected to issue a decision in the coming weeks over whether the lawsuit can proceed."

FWS TARGETS WILDLIFE SMUGGLERS AT MIAMI INTERNATIONAL. The AP (8/4) reports that "from live flying squirrels to rare jaguar pelts, wildlife inspectors at Miami International Airport say they are in a constant battle to keep illegal animal imports from entering the country." According to the FWS, "one in every three wildlife inspections at the busy airports leads to law enforcement involvement." David Pharo, resident agent in charge of law enforcement for the FWS in South Florida, said "many shipments have bogus permits for zoos and circuses." He added that "the federal agency's nine local inspectors are overwhelmed by the volume of illegal animal imports passing through Miami's main airport."

FWS CONSIDERING PROTECTIONS FOR NEW ENGLAND COTTONTAIL. USA Today (8/3, Hampson, 5.76M) reports that the New England cottontail has "become a candidate for the federal list of endangered species." According to the article, "with a federal endangerment determination looming in 2015, the goal is a stable New England cottontail population of around 28,000, which might be five times the current total."

MIDLAND INTERNATIONAL AIRPORT CLOSER TO OBTAINING SPACEPORT LICENSE. The KWES-TV Odessa, TX (8/3, 5K) website reported that the Midland International Airport is a "step closer" to obtaining its

spaceport license. Because of concerns that launches will affect the Lesser Prairie Chicken species, the US Fish and Wildlife Services and the Department of Airports have agreed to watch "the first five launches to make sure the Lesser Prairie Chicken will not be harmed."

ADDITIONAL COVERAGE: FWS FINALIZES PROTECTIONS FOR THREE FLOWERS. Additional coverage of the protections for the Short's bladderpod (*Physaria globosa*), whorled sunflower (*Helianthus verticillatus*) and fleshy-fruit gladecress (*Leavenworthia crassa*) was provided by [Reuters](#) (8/1, Gates), [The Chattanooga](#) (8/4, 12K), and the [Gadsden \(AL\) Times](#) (8/4, 43K).

ADDITIONAL COVERAGE: FWS CONSIDERING HABITATS FOR GRIZZLY BEARS. Additional coverage that the FWS is "weighing an environmental group's request to set aside 110,000 square miles for grizzly bears in California, Arizona, New Mexico, Utah and Colorado" was provided by the [Los Angeles Times](#) (8/2, Cart, 3.42M).

ADDITIONAL COVERAGE: FWS CONSIDERING STATUS OF MANATEES. Additional coverage that the FWS is reviewing the manatee's status was provided by the [Tampa Bay \(FL\) Times](#) (8/4, 75K).

US Geological Survey:

INCREASE IN INTERSEX FISH ALARMS BIOLOGISTS. The [Washington Post](#) (8/3, Fears, 4.06M) reports that the increase of intersex fish in the Chesapeake Bay watershed is alarming biologists. The article notes that "in the latest study, smallmouth bass and white sucker fish captured at 16 sites in the Delaware, Ohio and Susquehanna rivers in Pennsylvania had crossed over into a category called intersex, an organism with two genders." Vicki Blazer, a USGS biologist, said, "I did not expect to find it quite as widespread." Blazer supports stronger pesticide reporting, saying that the fish is "an indicator that something else is really wrong. What are these things doing to the natural environment? If we find these things in wild organisms, there's a good chance they're also affecting people."

Securing America's Energy Future:

Onshore Energy Development:

ADDITIONAL COVERAGE OF SENATE HEARING ON DRILLING PERMIT DELAYS. Additional coverage of the July 29 Senate Energy and Natural Resources Committee hearing on "the extent of oil and gas drilling permit delays" at BLM field offices was provided by the [Oil and Gas Journal](#) (8/4, 1K) and [Platts](#) (8/4, 2K).

DRILLING IN MOAB AREA OPPOSED. In an op-ed for the [Salt Lake \(UT\) Tribune](#) (8/4, 470K), Allan Muns, chairman and CEO of Republic Resources Ltd. and Muns Family Partnership, writes that the BLM has "the unenviable position of being the steward of nearly half of Utah's land while walking a very tight rope between the interests of energy and mineral companies while preserving pristine environments." He argues that "there is a time and a place for everything, including energy and mineral resource development." Muns claims that "delaying or eliminating development of oil and gas as well as potash mining is in the long-term interest of the public lands within the Moab MLP."

Offshore Energy Development:

COLUMNIST OPPOSES SEISMIC TESTING. In her column for the [Casper \(WY\) Star-Tribune](#) (8/4, 90K), Edith Cook opposes seismic testing in the Atlantic because she says it will disrupt marine life.

Tackling America's Water Challenges:

LAWMAKERS STRUGGLE TO REACH DROUGHT RELIEF DEAL. The [AP](#) (8/4) reports that "prospects for a drought relief bill to help California farmers appear as likely as the state being deluged by three straight days of rain." According to the article, "key lawmakers and staff are working to resolve differences in two bills that separately passed the House and Senate this year." The legislators "won't say where progress has occurred or what roadblocks remain, but time is running out for the current congressional session."

Additional coverage of the drought was provided by "Capital Weather Gang" blog of the Washington Post (8/1, Samenow, 4.06M).

PILOT PROJECT SEEKS TO CREATE WATER FROM TAINTED FARM DRAINAGE. The Fresno (CA) Bee (8/2, 322K) reports on "a \$22 million roadside experiment that turns dirty water into a chance for survival for west San Joaquin Valley farming." According to the article, a desalination plant, "a pilot project, started up this summer," is "doing what no similar plant has been able to do yet on the Valley's west side." Underwritten by the BOR, "the system could end a decades-old contamination problem, create a precious new stream of water and save a 97,000-acre piece of farming worth nearly \$500 million a year."

Empowering Native American Communities:

RULE WOULD ALLOW TRIBES TO COLLECT TREES FOR CULTURAL USE. The E&E Daily (8/1) reports that the Forest Service on Friday "unveiled a new rule to allow American Indian tribes to collect trees and other forest products for cultural or religious use." Forest Service Chief Tom Tidwell said, "The Forest Service works diligently to respect our government-to-government relationship with Indian Tribes. American Indians and Alaska Natives have been connected to these lands for thousands of years, and we want to facilitate continued access to these resources."

OFFICER INVOLVED IN TUESDAY'S FATAL SHOOTING IS ON ADMINISTRATIVE LEAVE. The County 10 (8/1) reports that the Interior Department has "confirmed that the officer involved in Tuesday evening's fatal shooting has been placed on administrative leave pending the investigation." Office of the Assistant Secretary for Indian Affairs Spokeswoman Nedra Darling said, "This is standard practice for an officer involved shooting." The FBI is "leading the investigation into a shooting in which a federal officer is believed to have fatally shot a suspect in a weapon offense call."

GOVERNMENT URGED TO GET OUT OF GAMBLING BUSINESS. In an op-ed for the Albuquerque (NM) Journal (8/4, 234K), Dr. Guy C. Clark, Chairman, Stop Predatory Gambling New Mexico, writes that "Pojoaque Pueblo, whose gambling compact expires in June of 2015, has had its proposed tribal gambling compact accepted by the Department of Interior." Clark claims that "if Interior and the Supreme Court approve the Pojoaque compact proposal with no revenue sharing, it will turn the whole system of tribal gambling upside down." He claims that "tribes across the US will take their states to court to get their revenue sharing thrown out and chaos will reign."

Top National News:

PFEIFFER: OBAMA HAS "NO CHOICE BUT TO ACT" ON IMMIGRATION. While the CDC's response to the Ebola outbreak dominated the Sunday morning political shows, a senior White House adviser and a number of key lawmakers weighed in on the border crisis and the broad immigration reform issue. The immigration story, however, was not covered by the evening network newscasts. On print and on the Sunday shows, lawmakers from both parties continued to weigh in on the steps ahead, and GOP Rep. Steve King – contradicting his party's message last week – put impeachment on the table if the President – as reported – moves to unilaterally grant work permits to undocumented immigrants.

On that matter, White House Senior Adviser Dan Pfeiffer warned on ABC's This Week (8/3, Stephanopoulos, 2.73M) that no final decisions have yet been made, saying, "The President has asked for recommendations by the end of the summer. Congress has not done that yet. Let's wait and see what those are before we make judgment. Whatever the President does in this space will not be a substitute for comprehensive immigration reform. Congress will still have to act." Pfeiffer added, "Congress' failure to fix the immigration system [has resulted in] a specific crisis on the border. The President has no choice but to act." The Daily Caller (8/3, Bordelon, 408K) noted that Pfeiffer said Obama's executive action will take place "at the end of the summer." The AP (8/4), National Review (8/4, Tuttle, 879K) and USA Today (8/4, Jackson, 5.76M) – the latter two in blog posts – also noted Pfeiffer's comments in brief reports.

The Hill (8/3, Mali, 237K) reports that Pfeiffer also "insisted he was taking the threat of President Obama being

impeached seriously despite Speaker Boehner...saying he is not considering such a move." Said Pfeiffer, "In the House of Representatives John Boehner may have the gavel, but [Sen.] Ted Cruz...has the power," and "it would be 'foolish to discount the possibility that this Republican Congress at some point in time would consider impeachment.'" Politico (8/3, Bradner, 637K) also noted those comments in a brief blog post.

House Judiciary Committee member Steve King said on Fox News Sunday (8/3, Wallace), "We've never seen anything in this country like a president who says, 'I'll make up immigration law as I choose and drive this regardless the resistance of the Congress.' ... It's unconstitutional. ... That's the message." The Washington Times (8/4, Chasmar, 465K) notes that King also said "Republicans should take a 'serious look' at impeaching...Obama if he moves ahead with an executive order to defer deportation for millions of illegal immigrants." The Daily Caller (8/3, Bordelon, 408K), Huffington Post (8/3, Wilkie, 11.54M), Politico (8/3, Prior, 637K) and The Hill (8/3, Devaney, 237K), among other news outlets, also noted King's comments.

The Washington Times (8/4, Richardson, Dinan, 465K) reports "analysts...have laid out several options available to Mr. Obama," including declaring "the border situation an emergency, which would allow immigration authorities to hold the illegal immigrant children rather than turn them over to relatives in the US." The Times adds that "analysts have also said the administration does not have to perform as much scrutiny of every child's legal situation, which could also speed up processing."

Senate Foreign Relations Committee Chairman Robert Menendez said on NBC's Meet the Press (8/3, Gregory, 3.08M), "The system as it exists today is broken. I believe the White House and Department of Homeland Security received a legal memorandum that outlines the powers they have [to tackle the border crisis]. I hope they will use those powers to try to get some elements of the system in order."

Rep. Joaquin Castro said on ABC's This Week (8/3, Stephanopoulos, 2.73M), "Somebody has to be working in Washington. The President is ready to act on immigration reform. Congress has now had several years to do something. Republicans have failed to move on it. President Obama will do everything within his power and within the law to fix immigration."

Politically, the AP (8/4, Babington) reports, "even if...Obama moves ahead with a proposal to give work permits to millions of immigrants living in the country illegally, removing the threat of deportation, Democratic strategists say Republicans won't reap much of a benefit." Democrats believe Republicans "have already squeezed as much as they can from voters angry at the president by hammering at his record on health care, the IRS, foreign policy and other issues." Said DCCC chair Steve Israel, "There's a ceiling, and nothing the president can do can get them above the ceiling. ... But swing voters and persuadable voters, they want solutions."

In his Washington Post (8/4, 4.06M) column, E.J. Dionne writes that "the single biggest change in Washington over the last five years has been a GOP shift to a more radical form of conservatism." Dionne concludes that "in balance, Washington gridlock has hurt Democrats more than Republicans by dispiriting moderate and progressive constituencies," and "the key to the election will be whether Democrats can persuade these voters that the radical right is the real culprit in their disappointment."

Charles M. Blow writes in the New York Times (8/4, Subscription Publication, 9.79M), "Congress is a joke. But the joke isn't funny — unless, of course, you're into dark humor." While "there is still time for this Congress to get more things done...t I'm not holding my breath. Legislating is only a hobby for members of this Congress. Their full-time job is raising hell, raising money and lowering the bar of acceptable behavior."

Rogers, Perry: Weak US-Mexico Border Could Be Exploited By Terrorists. House Intelligence Committee Chairman Mike Rogers said on CNN's State Of The Union (8/3, 420K), "We noticed a very dangerous trend a few years ago when the Iranian Quds force, their external terrorist group, was planning to use the Southern border to infiltrate the United States to kill the Saudi Ambassador. So, clearly our enemies and adversaries understand that the Mexico-Texas border is a weakness. ... A porous Southern border is now on the advertising list for those who want to conduct nefarious activities in the United States. ... It doesn't take a rocket science to know out that the Southern border is a weakness in our national security." The Washington Times (8/4, Richardson, 465K) notes Rogers' comments this morning.

The Huffington Post (8/3, Wilkie, 11.54M) reported that Texas Gov. Rick Perry, on CNN's State of the Union, said

yesterday that “undocumented immigration along the US-Mexico border constitutes a significant terrorist threat.” Perry said the US “is at ‘historic record highs with individuals being apprehended’ from countries ‘that have substantial terrorist ties,’ such as Pakistan, Afghanistan and Syria.” The HuffPost added that “in June, the fact-checking service Politifact.com deemed the statement ‘not accurate and makes a ridiculous claim.’”

Perry Says He May Deploy More Armed Personnel To Border. Perry also said on CNN's State Of The Union (8/3, 420K), “I’m prepared to [deploy] not just the National Guard [along the border], but also officials from the Department of Public Safety, Texas Ranger recon teams, and Parks and Wildlife wardens. ... We have a problem on our Southern border. We’re going to deal with it, and the President refuses to lead on this. ... My citizens’ safety is what is foremost here and it’s time to secure the border.”

Politico (8/3, Bradner, 637K) noted on its website that Perry went on to say that “the unaccompanied children who have streamed across the US-Mexico border in increasing numbers are a ‘side issue’ compared to the illegal immigrants who have committed crimes.” Said Perry, “What we are substantially more concerned about in the state of Texas, and I will suggest to you, across this country, are the 80-percent-plus individuals who don’t get talked about enough who are coming into the United States illegally and committing substantial crimes.”

The Hill (8/3, Bolton, 237K) reported that CNN anchor Candy Crowley “called Perry’s claim ‘wildly off,’” but Perry “returned to the issue of crime and insisted his statistics were correct,” saying, “I do stand by them, by the way, but what are the number of homicides that are acceptable to those individuals? How many sexual assaults do we have to have before the president of the United States and Washington, DC, acts to keep our citizens safe?”

Rubio Faces Questions That He “Flipped” On Immigration, Calls For Reform In Stages. The Daily Caller (8/3, Bordelon, 408K) reported Fox News host Chris Wallace “forced” Sen. Marco Rubio “into a tight spot on immigration Sunday, asking the Florida Republican why he flip-flopped on his support for amnesty – sending the senator into a convoluted explanation when Wallace refused to let up.” Wallace asked Rubio, “Why have you flipped?” Rubio “eventually explained that the three things he wants to see done on immigration – ‘security reform, modernizing the legal system and then address the people here’ – will only be politically possible if done piecemeal.” The Hill (8/3, Devaney, 237K) noted that Rubio predicted Congress “‘will never have the votes’ for a comprehensive immigration bill without first addressing border security, urging a step-by-step approach to the issue.”

Rubio said on Fox News Sunday (8/3, Wallace), “We have a serious situation on the border, an unsustainable situation that can’t continue. The only way to address it is to tackle the root causes, which are a combination of violence, instability, and poverty in Central America and, according to the President of Honduras, ambiguities in our laws. ... I continue to believe that we have to reform our immigration laws, but the issue [of the migration influx] is related to but separate from that.” Later, Rubio added on Fox News Sunday (8/3, Wallace), “[Congress is] not debating what to do, we’re debating how to do it. We’ll never have the votes necessary to pass one bill that addresses security, reform and modernization of the legal system, and the migration influx.”

AP Analysis: Immigration Issue Could Have “Modest Impact” On 10 Senate Races. The AP (8/4, Babington) reports that the GOP “still can’t figure out what to do about illegal immigration,” which “appears likely to have only a modest impact on the roughly 10 Senate races that will determine control of the chamber.” The AP adds that “the possible exception is the race between Democratic Sen. Mark Udall and GOP Rep. Cory Gardner in Colorado, where Hispanic voters made up 14 percent of the electorate in 2012.”

CSMonitor Mulls Questions About Bias In Coverage Of House, Senate Border Debates. The Christian Science Monitor (8/3, Sappenfield, 566K) pondered why the House – which actually passed a border bill – and not the Senate – which didn’t – is the brunt of much of the media criticism of Congress on the immigration issue. Asked the Monitor, “Is there a media double standard here? Does the Republican-led House get all the stick while the Democrat-led Senate gets off scot-free?” While “there does appear to be a prevailing narrative that focuses more on the House’s dysfunctions than on the Senate’s...there are reasons for the apparent double standard that also go well beyond a perceived liberal bias.” The House’s “failure...was, in many respects, politics as usual,” but Boehner “completely lost his” caucus – “and not for the first time. Though he was able to smooth things over the next day, the damage was done,” and “this is not politics as usual.”

USA Today Analysis: Detention Facility Signals Shift By Federal Government. USA Today (8/4, Jervis,

5.76M) reports on the Kames County Residential Center in Texas, which opened Friday "to help with the crush of unaccompanied minors and families crossing the Texas border recently." It "offers medical screenings, dorm-like bedrooms with flat-screen TVs, a cafeteria, a new soccer field, Internet access and refrigerators full of snacks." The center "signals a shift in immigration tactics by the federal government," where "instead of releasing women and children apprehended at the border and requiring them to return at a later date...more space to detain them could lead to increased deportations." ICE field office director Enrique Lucero, who "led a media tour of the facility," said, "The use of this facility is sending one very important message to families in Central America considering crossing into the United States: Do not risk the lives of your children. Do not risk your life. ... After your immediate detention and due process, there's every likelihood you'll be returned to your country."

WPost A1 Analysis: Mexico's Enforcement Of Its Southern Border Key To Situation In US. On its front page, the Washington Post (8/4, A1, Miroff, 4.06M) reports "analysts say Mexico's commitment to tougher, less corrupt and more humane immigration enforcement will be pivotal to the US effort to dissuade Central American families from rushing for the border or sending their kids northward." While Mexico points to steps it has taken to improve its enforcement along its southern border, "little has changed along the railway routes used by tens of thousands of migrants who can't afford to pay a smuggling guide to bribe their way north along the highways." The Post adds "some in Mexico say the government's spotty enforcement approach is the result of the view that Central American migration is a problem for the United States, not Mexico."

More Commentary From Lawmakers. Senate Intelligence Committee member Angus King said on CNN's State Of The Union (8/3, 420K), "The Border Patrol people are doing a great job dealing with these kids as they come across the border. ... They're handling the kids well, but when they get to the process where they need to determine whether or not the children are legitimate refugees, that's where it breaks down. ... The delay is inexcusable. I would recommend two things: Get the word out in Central America that the [migration influx] isn't going to work and process these kids through a refugee determination process a lot faster. That's going to take more judges, more courtrooms, more lawyers. But that's something we can do. I don't think it needs \$3.7 billion. I think it can be done for a lot less."

Sen. Tim Scott said on ABC's This Week (8/3, Stephanopoulos, 2.73M), "It's a hard question to wrestle with: How to be compassionate to people that you know are coming to your borders looking for a better way of life, and, at the same time, adhere to the laws of the country? ... It's not a crisis that occurred in the last two months. To show up in the 23rd hour saying, we need you to approve a \$4 billion package is not the way to do it."

Sen. John Thune said on NBC's Meet the Press (8/3, Gregory, 3.08M), "We have to deal with this immediate crisis on the border. It's important to deal with immigration and it's important for Republicans and Democrats to come together behind a plan. As Marco Rubio said, you can't fix legal immigration until you fix illegal immigration. That means border security. That means building a strategic fence, having an e-verify program and an entry-exit program that ensures our borders are secure. We're not going to have the trust and confidence of the American people if we don't fix illegal immigration."

Jeffries: Boehner Lawsuit "Baseless In Law And In Fact." Regarding Speaker Boehner's lawsuit over President Obama's executive actions, House Judiciary Committee member Hakeem Jeffries (D-NY) said on Fox News Sunday (8/3, Wallace), "This lawsuit is clearly baseless in law and in fact. ... The President has the clear discretion to administer, implement, and enforce the law as it relates to the Affordable Care Act. And that's clearly what he's done. He has not amended the law, he has not abolished the law. What he has done is delay the implementation of the employer mandate in stages, consistent with what other presidents have done throughout history." In response, House Judiciary Committee member Steve King stated, "Well, the President didn't simply do a little touch-up to ACA, from an administrative standpoint. He went in and changed the required implementation date. ... He does not get to make up law out of thin air. He doesn't get to amend it. The Constitution is very clear."

Amid "Talk Of Impeachment," Nixon Remembered. The New York Times (8/4, Baker, Subscription Publication, 9.79M) reports that with "talk of impeachment...in the air," events "have served as a reminder that 40 years after President Richard M. Nixon resigned in the face of impending impeachment, the nation he left behind is still struggling to define the contours of presidential power and the nature of political accountability." Elizabeth Drew, "one of the leading chroniclers of Watergate," said, "Democrats are just as bad as Republicans about this. They're raising money off the impeachment term just like the Republicans. This is disgusting. It's an awful

serious thing to talk about impeaching a president.”

The Washington Times (8/4, Wolfgang, 465K) refers to “the real six-year itch in American politics” of “talk of removing the commander in chief, with...Obama becoming the latest in a long line of leaders to face calls for impeachment during his later years in office.” President Clinton “was impeached in his sixth year, and the calls to oust President George W. Bush, while they never reached that far, also ramped up in his sixth year in office.” However, the Times adds “impeachment calls stretch deep into the 1800s, and everyone from Franklin D. Roosevelt and Harry Truman to Ronald Reagan and Richard Nixon faced them.”

The Washington Post (8/4, Stuever, 4.06M), meanwhile, reviews an HBO documentary on Nixon's resignation, which features tapes in which he “repeatedly told his closest confidants that Jews could never be trusted, that some Mexican Americans living in the United States were better than others (and he, especially, knew the difference), that women weren't ready to be on the Supreme Court, that homosexuality was perhaps understandable but a scourge nonetheless.”

OBAMA DISMISSES COMPLAINTS ABOUT HIS AGENDA FROM “CORPORATE COMMUNITY.” Reuters (8/3, Rampton) notes today that in an interview with The Economist published this weekend, President Obama said that the “corporate community” should stop complaining about regulations put in place by his Administration. Said Obama, “If you look at what's happened over the last four or five years, the folks who don't have a right to complain are the folks at the top. ... I would take the complaints of the corporate community with a grain of salt. ... They always complain about regulation. That's their job.” The President also said, “Oftentimes, you'll hear some hedge-fund manager say, ‘Oh, he's just trying to stir class resentment’. No. Feel free to keep your house in the Hamptons and your corporate jet, etcetera. I'm not concerned about how you're living. ... I am concerned about making sure that we have a system in which the ordinary person who is working hard and is being responsible can get ahead.”

Krugman: Dodd-Frank Is Working. In his column for the New York Times (8/4, Krugman, Subscription Publication, 9.79M) Paul Krugman argues that Dodd-Frank “is working a lot better than anyone listening to the news media would imagine.” Krugman writes that while the reform could have gone further, “Wall Street and its allies wouldn't be screaming so loudly, and spending so much money in an effort to gut the law, if it weren't an important step in the right direction.”

Business Groups Say They Will Challenge Obama Executive Order. The Hill (8/3, Goad, 237K) reports “business interests” say they plan “to fight” Obama's Friday “executive order imposing new restrictions on companies who want to do business with the federal government.” The order “would require firms seeking federal contracts to disclose labor law violations and create new compliance advisors at agencies to oversee decisions about which firms get the work.” Geoff Burr, vice president of government for Associated Builders and Contractors, said of the new rules, “We are concerned these sweeping changes threaten the due process rights of federal contractors and conflict with existing federal procurement and labor law. ... ABC and the federal contracting community across all industries are prepared to fight this order in the courts and in Congress.” The story also notes comments to that effect from the International Franchise Association.

ECONOMY NOW CREATING HIGHER-PAYING JOBS. USA Today (8/4, Davidson, 5.76M) reports that “over the past two months, mid- and high-wage industries have added 257,000 jobs, while those with lower pay added 210,000, according to the research firm's analysis of Labor Department data.” That “marks a shift from last year, when many economists and worker advocates lamented that payroll advances were concentrated in low-paying sectors, such as restaurants and home health care.”

Tech “Fueling An Urban Renaissance.” USA Today (8/4, Zuckerman, 5.76M) reports that “in cities across America, a sizzling tech sector is fueling an urban renaissance,” with tech emerging “as a mighty force creating jobs, spurring redevelopment of once-blighted urban cores, and giving cities an economic and cultural jolt.”

Call Center Jobs Coming Back To US. The Detroit Free Press (8/4, Witsil, 1.02M) reports that “after years of sending call center jobs to India, the Philippines, Mexico and other countries, companies are bringing them back to the US.” It is a “trend...driven by changes in technology, rising overseas labor costs – and customers demanding better service.”

Consumer Spending On The Rise, Boosting US Firms. The Wall Street Journal (8/4, Francis, Subscription Publication, 5.89M) reports that a growth in US consumer spending is boosting earnings for US companies, with revenue with the top 500 companies poised to be 4.3% higher for this quarter than it was last year.

Middle Class Drawn To Inland Cities By Affordable Housing Costs. The New York Times (8/4, A1, Dewan, Subscription Publication, 9.79M) reports in a front-page story that in “a decisive reversal from the early years of the millennium, when easy credit allowed cities to grow without regard to housing cost and when the fastest-growing cities had housing that was less affordable than the national average,” the fastest-growing cities in the nation “are now those where housing is more affordable than average.” Higher rents and trouble securing mortgages “on the coasts have proved a boon to inland cities that offer the middle class a firmer footing and an easier life.”

Editorial Wrap-Up:

NEW YORK TIMES. “The Custom-Made ‘Super PAC.’” A New York Times (8/4, Subscription Publication, 9.79M) editorial decries “family-financed super PACs” as “the latest and most outrageous examples of how super PACs are used in this campaign cycle to evade the limits on donations.” The Times argues that Congress could end these and other “super PACs dedicated to individual candidates” by passing the Empowering Citizens Act, “a bill introduced in the House that would put strict limits on these kinds of coordinated contributions.” The Times notes, however, that “the more members of Congress depend on these groups, the less chance they will want to put a stop to them.”

“Global Trade Talks Suffer Another Setback.” A New York Times (8/4, Subscription Publication, 9.79M) laments the collapse of the agreement on simplifying customs rules, noting that it will “make it much harder for the World Trade Organization to finish its much-delayed Doha round of negotiations.” The Times says it is “disappointing” that Indian Prime Minister Narendra Modi’s government, “which was elected in part because it promised to revive India’s economy, did not give the agreements reached in Bali a chance.” The Times also notes that WTO members “have a poor record of concluding trade deals,” and adds that this “latest failure will further erode confidence in the global trading system,” and “encourage officials in the United States, the European Union, China and Japan to pursue more regional and industry-specific trade deals.”

“Omar Khadr’s Untold Story.” The New York Times (8/4, Subscription Publication, 9.79M) editorializes that the Canadian government “has denied a request from a Toronto newspaper to conduct an on-camera interview with” Omar Khadr, “a former child soldier and detainee at Guantánamo Bay.” Khadr, “a 27-year-old Canadian, was captured in Afghanistan in 2002” when he was 15, “and accused of throwing a grenade during a firefight that killed an American soldier.” The Toronto Star “thinks he should be allowed to tell his side of the story and respond to questions from one of its reporters,” but the Canadian government “will not let him do so – a form of censorship that brings to mind the way in which both the Bush and Obama administrations have quashed all civil cases brought by victims of torture without allowing them to describe their experiences in court or hold those responsible accountable.” The Times argues that Canada “should allow the interview and let” Khadr “share his perspective on his ordeal.”

WASHINGTON POST. “Inverting Tax Policy.” An editorial in the Washington Post (8/4, 4.06M) argues that the best way to address corporate tax inversions “is to shift the focus of corporate taxation to the people who actually own a given company: shareholders.” It is more efficient, the Post argues “to tax their dividends than it is to chase corporate income streams around the globe.” The Post also argues for tax reform that would “make it cost-effective for U.S. firms to stay, not prohibit them from leaving.”

“The EPA’s Needed Action.” The Washington Post (8/4, 4.06M) in an editorial praises the EPA’s Clean Power Plan, contending that it is necessary because Congress “has failed to pass a plan tailored to cut U.S. greenhouse emissions over the next few decades.” Because of that, the EPA “has had to rely on the tools Congress gave it in the Clean Air Act to jury-rig a carbon-reduction system sufficiently ambitious to give the U.S. credibility to demand meaningful sacrifices from other nations.” The Post argues that unless and until “the EPA’s attackers get behind a real climate plan, the EPA has reason to fill Congress’s irresponsible policy void.”

“Marion Barry’s Ethics, Again.” The Washington Post (8/4, 4.06M) editorializes that an examination by

Washington City Paper columnist Will Sommer finds that there is "a convincing case" that LaToya Foster, an aide to DC City Councilman Marion Barry, helped write Barry's recently published autobiography "on government time." The Post notes that council ethics rules "bar staffers from using the business day for 'purposes other than official business or government-approved or sponsored activities,'" and urges the DC Board of Ethics and Accountability to investigate the matter, arguing that Barry "has long considered himself immune to the rules that guide the actions of public officials – as his history of smoking crack cocaine, not filing taxes, steering city contracts to an ex-girlfriend and taking money from a city contractor, among other offenses, richly shows."

WALL STREET JOURNAL. "Wreck Of Cards." An editorial in the Wall Street Journal (8/4, Subscription Publication, 5.89M) criticizes a plan by the Financial Industry Regulatory Authority (Finra) known as the Comprehensive Automated Risk Data System to gather account information from US brokerage firms, arguing that the agency wants to gather the data so it can later determine how to exploit it. The Journal calls on Finra's board to shut down the plan.

"Scandal Pays Off For The VA." An editorial in the Wall Street Journal (8/4, Subscription Publication, 5.89M) says the VA bill passed by Congress fails to implement meaningful reform and casts doubt on claims from Republicans that the measure is a first step toward broader reform.

"Modi's Trade Barricade." An editorial in the Wall Street Journal (8/4, Subscription Publication, 5.89M) criticizes Indian Prime Minister Narendra Modi's rejection of a trade facilitation agreement reached last December in Bali, saying Modi's move is bad for India's poor and for the WTO, which needed the deal to revive the Doha Round of talks. The Journal also notes that Modi's rejection of the deal, despite efforts by Secretary of State Kerry and Commerce Secretary Pritzker to convince him to accept it, speaks to America's decreased leadership on trade issues.

Washington Schedule:**TODAY'S EVENTS IN WASHINGTON.**

White House:

PRESIDENT OBAMA — Attends meetings at the White House on his birthday.

VICE PRESIDENT BIDEN — No scheduled events.

US Senate: Aug. 4 – Sept. 7. — Congress on break. Please note however that some committees are still scheduling hearings during this time both in Washington and in the field. Just a reminder to check the Capitol Hill takes daily during this period of "recess".

US House: Aug. 4 – Sept. 7. — Congress on break. Please note however that some committees are still scheduling hearings during this time both in Washington and in the field. Just a reminder to check the Capitol Hill takes daily during this period of "recess".

Other: Aug. 4 – 6. AFRICA LEADERS SUMMIT — The White House hosts the inaugural Africa Leaders Summit.

<http://www.whitehouse.gov/us-africa-leaders-summit> For full agenda: http://www.whitehouse.gov/sites/default/files/docs/us_africa_leaders_summit_schedule_6.pdf

2:15 p.m. – 3:45 p.m. Combating Wildlife Trafficking hosted by the National Academy of Sciences. 4 p.m. – 6 p.m. Congressional reception for African leaders. 325 Russell Senate Office Building. Capitol Hill. Location: Business Forum on the 5th: 1330 Maryland Ave. SW. White House Dinner on the 5th at the White House., National Academy of Sciences. Afternoon Congressional reception on Capitol Hill 325 Russell.

FUTURE OF AFRICAN ENERGY — 8:30 a.m. GE will host an event in Washington, DC, focused on the future of African energy told through the lenses of infrastructure, innovation and investment. Preceding President Obamas

U.S.-Africa Leaders Summit, the event – Africa Ascending: Powering Inclusive Growth. Speakers: Jeff Immelt, chairman & CEO, GE John Dramani Mahama, President of Ghana Rep. Karen Bass, U.S. Representative (D-CA), Ranking Member, Subcommittee on Africa, Global Health, Global Human Rights and International Organizations, House Committee on Foreign Affairs; Dr. Jim Yong Kim, President, World Bank Group; Aliaune “Akon” Thiam, Recording Artist and Philanthropist; Gift Nyikayaramba, Duke University; Spencer Horne, Harvard University; Sim Tshabalala, Co-CEO, Standard Bank; Ashish Thakkar, CEO & Founder, Mara Group; Dr. Mo Ibrahim, Founder, Mo Ibrahim Foundation. RSVP to Ali Howard at (202) 756-2439, Ali. Howard@edelman.com Location: Newseums Knight Conference Center, 555 Pennsylvania Ave. NW.

HAGEL – WORMUTH WELCOME CEREMONY — 1:30 p.m. Secretary of Defense Chuck Hagel hosts a welcome ceremony in honor of Under Secretary of Defense for Policy Christine Wormuth, Under Secretary of Defense (Comptroller) Michael McCord, Under Secretary of Defense for Personnel and Readiness Jessica Wright, and Director of Cost Assessment and Program Evaluation Jamie Morin. Location: Pentagon Auditorium, Room BH650, Arlington, Va.

PAN-AFRICAN LEADERS — Pan-African leaders honor Ambassador Andrew Young. Participants: Idriss Deby, president of the Republic of Chad; Goodluck Jonathan, president of the Republic of Nigeria; Paul Kagame, president of Rwanda; Uhuru Kenyatta, president of Kenya; Jakaya Kikwete, president of the United Republic of Tanzania; John Dramani Mahama, president of Ghana; Teodoro Obiang Nguema Mbasogo, president of Equatorial Guinea; Denis Sassou Nguesso, president of the Republic of Congo; Alassane Ouattara, president of Cote d'Ivoire; Macky Sall, president of the Republic of Senegal; Jacob Zuma, president of South Africa; Kenneth I. Chenault, CEO and chairman of American Express; Ralph De La Vega, president of AT&T Wireless; Robert Johnson, founder and chairman, RLJ Companies; Doug McMillon, president and CEO of Walmart Stores Inc.; Ambassador Ron Kirk, former U.S. trade representative; General Colin Powell, former U.S. secretary of state; Donald Kaberuka, president of the African Development Bank Group; Frits Van Paasschen, CEO of Starwood Hotels; Kenneth I. Frazier, chairman, president and CEO of Merck & Co.; Gregory Page, chairman of The Cargill Corp.; Dr. John Thornton, CEO of Barrick Gold Corp. and chairman of The Brookings Institute; Ann Fudge, director of General Electric and Unilever; Mark Mason, CEO of CITI Private Bank; Glenn Youngkin, managing director and co-CEO of The Carlyle Group; Franck Moison, chief operating officer of Colgate Palmolive Co.; Alexander Cummings, chief administrative officer of the Coca-Cola Co. and corporate director of S.C. Johnson & Son; Ronald Parker, president and CEO of The Executive Leadership Council; Mary K. Bush, chairman of Bush International LLC and member of the board of directors of Marriott International and T. Rowe Price Group; Dr. Darius Mans, president and CEO of Africare; Joshua DuBois, founder and CEO of Values Partnerships and former director of the White House Office of Faith-based and Neighborhood Partnerships; Rep. Chaka Fattah, chairman of the Congressional Black Caucus Foundation Inc.; A. Shuanise Washington, president and CEO of the Congressional Black Caucus Foundation Inc.; Stanley Washington, founder and CEO of Pantheon Business Consulting; Lucien Ebata, CEO of Orion Group SA and Publisher of Forbes Afrique; Gregory Nixon; others. Location: Mayflower Renaissance Hotel, 1127 Connecticut Ave., NW.

SMITHSONIAN – COLIN POWELL — 7 p.m. The Smithsonian Associates presents an evening with Colin Powell. Mr. Powell will talk about what he has learned along the way to now with Frank Sesno, director of the School of Media and Public Affairs at George Washington University. Location: George Washington University's Lisner Auditorium, 730 21st St. N.W. Powell.

Last Laughs:

LATE NIGHT POLITICAL HUMOR.

All late-night talk shows were in re-run.

Briefing Materials for Tuesday, August 5, 2014

Javaid, Zaina <zaina_javaaid@ios.doi.gov>

Mon, Aug 4, 2014 at 5:59 PM

To: Sally Jewell (b)(6)@ios.doi.gov, Tommy Beaudreau <tommy_beaudreau@ios.doi.gov>, Erin Walls <erin_walls@ios.doi.gov>, Katherine Rupp <katherine_rupp@ios.doi.gov>

Cc: Elizabeth Ossowski <elizabeth_olson@ios.doi.gov>

Sally,

Attached are your briefing materials for Tuesday, August 5, 2014. These are also uploaded to Google Drive.

We are still waiting on the memo for the Internal Greater Moose Tooth meeting from BLM– Janet Lin will email that to you directly tonight when it is completed, and we will have a hard copy printed for you in the morning.

Thank you,

Zaina

TELEPHONE CALL SHEET

PRESS CALL WITH BOB SEMPLE, ASSOCIATE EDITOR, THE NEW YORK TIMES

DATE: August 5, 2014
LOCATION: Secretary's Office, by Phone
TIME: 1:00PM – 1:45PM EDT
FROM: Jessica Kershaw, Press Secretary (202)208-5338

I. PURPOSE

The purpose of this conversation is to provide an update to Bob Semple, Associate Editor of the Editorial Page at the New York Times, on some of your key priorities heading into the August recess. Our goal is to:

II. BACKGROUND

Semple joined the Washington Bureau of the *Times* in the fall of 1963. He covered housing and civil rights during the Johnson administration, spent a year covering President Johnson himself, and served as White House correspondent during Richard Nixon's first term. He served thereafter as deputy national editor (1973-75), London bureau chief (1975-77), foreign editor (1977-82), editor of the Op-Ed Page (1982-88) and associate editor of the Editorial Page (1988 to present). He received the Pulitzer Prize in 1996 for his editorials on environmental issues.

III. PARTICIPANTS

- Bob Semple
- Jessica Kershaw

IV. ATTACHMENTS

- Editorials and Columns of Note (below)
- Talking Points on Fire (attached separately)

Editorials/Columns of Note

Saving Water in California By The Editorial Board July 9, 2014

California is in the third year of its worst drought in decades. But you wouldn't know it by looking at how much water the state's residents and businesses are using. According to a recent state survey, Californians cut the amount of water they used in the first five months of the year by just 5 percent, far short of the 20 percent reduction Gov. Jerry Brown called for in January. In some parts of the state, like the San Diego area, water use has actually increased from 2013.

Without much stronger conservation measures, the state, much of which is arid or semiarid, could face severe water shortages if the drought does not break next year. Los Angeles recently recorded its lowest rainfall for two consecutive years, and climate change will likely make drought a persistent condition, according to the National Climate Assessment report published in May.

Yet, even now, 70 percent of water districts have not imposed reasonable mandatory restrictions on watering lawns and keeping backyard pools filled. The State Water Resources Control Board is to consider placing restrictions on some outdoor water uses like washing paved surfaces at a meeting on July 15.

California's agriculture sector is the largest in the country, and it accounts for about 80 percent of the state's water use. Even a small percentage reduction in the fields could have a sizable effect on total water consumption.

A recent report by the Pacific Institute and the Natural Resources Defense Council estimates that agricultural water use could be reduced by up to 22 percent if farmers more carefully scheduled the watering of crops based on weather and soil conditions and if they used the drip irrigation systems that deliver water directly to the roots of plants. Some progress has been made. About 38 percent of California farmland was irrigated by more efficient systems in 2010, up from 15 percent in 1991. But far too many farmers still irrigate by flooding their fields.

In terms of urban conservation, the report shows that homes and businesses could reduce water use by up to 60 percent by using it more efficiently, recycling and reusing water and capturing more rainwater. Some efficiency improvements are simple and could be done quickly, like installing water meters at all homes and businesses. Currently, about 250,000 water-utility customers, most of them in the Central Valley, have no meters and are charged a flat monthly fee regardless of how much water they use — a practice that invites waste.

Other changes will take longer to carry out but could have a big impact. For instance, Santa Cruz's municipal water utility imposes water "budgeting" under which it determines how much water each home needs based on where it is and the number of people in the household. Customers who use

more than their budgeted amount must pay higher rates for extra water used. This approach has helped Santa Cruz cut water use by about 30 percent since 1987.

Other government programs have been effective, too, and deserve broader adoption. The Los Angeles Department of Water and Power last month began paying people \$3 for every square foot of grass they replace with landscaping that requires little or no water under a “cash in your lawn” program, up from \$2 previously; residents can claim up to \$6,000 under that program. The department says it has paid to have 8 million square feet of lawn removed since the program started in 2009.

Finally, state officials need to act with a much greater urgency. Earlier this year, the State Legislature set aside nearly \$700 million for emergency drought relief, but 90 percent of that money has yet to be spent. Mr. Brown’s administration should think a lot bigger than emergency aid aimed at a single drought. The state must focus on longer-term policies that encourage people to alter their lifestyles and businesses to change how they operate.

On Balance, a Good Ruling on Emissions (congress inaction)

By The Editorial Board

June 23, 2014

The Clean Air Act is a complex and often confusing piece of legislation, especially when it comes to confronting the challenges of global warming, which were not fully understood when the original law was passed in 1970.

At that time, the biggest risk to the environment and human health was believed to come from more “conventional” air pollutants, like sulfur dioxide and lead. But when the threat of greenhouse gases became clear, the Environmental Protection Agency needed the flexibility to combat it quickly and effectively.

That is what the E.P.A. has tried to do multiple times in the past several years, promulgating rules regulating the emissions of carbon dioxide — by far the most common greenhouse gas — from both automobiles and stationary sources like power plants. Those actions haven’t sat well with industries that will have to pay more in the short term as a result. They have challenged the agency’s authority repeatedly, but the Supreme Court ruled against them in 2007 and 2011.

Following another suit by a coalition of business interests and states, the court on Monday correctly affirmed the E.P.A.’s power and responsibility to regulate greenhouse gases under the act, even though five justices voted to disallow one of the agency’s regulatory tactics. The case, Utility Air Regulatory Group v. E.P.A., preserves the government’s ability to confront global warming while also demonstrating Congress’s persistent failure to update the law to meet modern needs.

In the absence of congressional action, the E.P.A. was left alone to deal with an impossible situation. The act targets “major sources” of pollution, initially defined as those that emitted more than 250 tons of pollutants each year. But carbon dioxide is emitted in vastly greater amounts. To keep the focus on the biggest polluters, like power plants and refineries, and avoid regulating millions of small sources, like hospitals and local businesses, the agency increased the threshold to 100,000 tons per year.

The point, as Justice Stephen Breyer argued in a partial dissent, was to adhere to the law's clear purpose and to allow the agency the flexibility to make decisions based on new information. Justice Antonin Scalia, writing for a 5-to-4 majority, rejected that position, arguing that "an agency may not rewrite clear statutory terms to suit its own sense of how the statute should operate." Still, seven justices agreed that the agency could continue to regulate significant greenhouse-gas emissions from power plants that were already being regulated for emitting conventional pollutants — in other words, almost all power plants.

The Obama administration has made commendable efforts to fight global warming, most recently by issuing a proposed rule that aims to reduce carbon pollution from existing power plants 30 percent from 2005 levels by 2030. (Monday's ruling does not directly affect the proposed power plant standards). There will always be companies that would just as soon avoid the necessary investments in cleaner energy. That's all the more reason for the E.P.A. to use the authority it has been granted under the law.

Climate Signals, Growing Louder (congress inaction)

By The Editorial Board

March 31, 2014

Perhaps now the deniers will cease their attacks on the science of climate change, and the American public will, at last, fully accept that global warming is a danger now and an even graver threat to future generations.

On Monday, the Intergovernmental Panel on Climate Change, a United Nations group that since 1990 has been issuing increasingly grim warnings about the consequences of a warming planet, released its most powerful and sobering assessment so far. Even now, it said, ice caps are melting, droughts and floods are getting worse, coral reefs are dying. And without swift and decisive action to limit greenhouse gas emissions from fossil fuels and other sources, the world will almost surely face centuries of climbing temperatures, rising seas, species loss and dwindling agricultural yields. The damage will be particularly acute in coastal communities and in low-lying poor countries — like Bangladesh — that are least able to protect themselves.

The report's conclusions mirrored those of a much shorter but no less disturbing report issued two weeks ago by the American Association for the Advancement of Science, the world's largest scientific society. Like the panel, the association declared that the world is already feeling the effects of global warming, that the ultimate consequences could be catastrophic, and that the window for effective action is swiftly closing.

The intergovernmental panel's report (a companion report later this month will discuss what governments should do) could carry considerable weight with delegates to next year's climate change summit meeting in Paris, at which the members of the United Nations will again try, after years of futility, to fashion a new global climate treaty. And together, the two reports could build public support for President Obama's efforts to use his executive authority to limit greenhouse gases, most recently with a plan issued on Friday to reduce methane emissions from landfills, agricultural operations and oil and gas production and distribution.

The methane strategy is one of several weapons in Mr. Obama's broader Climate Action Plan, announced last year, that seeks to reduce emissions by circumventing an obstructionist Congress by

aggressively using his executive authority under the Clean Air Act and other statutes. The most important of these are two rules from the Environmental Protection Agency — one already proposed, another in the works — that would regulate emissions from new and existing coal-fired power plants, the largest source of industrial carbon pollution. He has also promised to increase energy efficiency in appliances and buildings, and double renewable energy capacity on public lands by 2020.

The methane abatement plan is a welcome addition to that arsenal. Methane, a product of animal wastes and of decomposing material in landfills, and the main component in natural gas, contributes only about 9 percent of America's greenhouse gas emissions. And natural gas, as a fuel, is much cleaner than coal. But methane is a powerful atmospheric pollutant, 20 times more potent than carbon dioxide, and thus a major driver of global warming.

The burden for fulfilling the president's promise will fall on the E.P.A., which is charged with developing regulations to plug methane leaks in pipelines and in oil and gas production systems. Given everything we now know, public and congressional acceptance of these initiatives should be close to automatic. But, of course, it is not. Senator Mitch McConnell, the leader of the Senate Republicans, seeks to block the coal regulations. Industry groups are complaining in advance about methane regulations.

Some of this may be attributable to public misunderstanding. A poll last year found that one-third of Americans believed that scientists disagreed on whether global warming was happening. These studies suggest virtually no disagreement. The hope among advocates is that the latest show of scientific solidarity will clear up any confusion about the causes and consequences of climate change and the need for action.

To Save Fish and Birds
By the Editorial Board
February 15, 2014

One of the few bright spots in the struggle to protect the world's fragile oceans has been the rapidly increasing number of "marine-protected areas," places where fishing is limited or banned and where, presumably, depleted species can recover by simply being left to themselves. The benefits of hands-off environmental protection may seem self-evident. But creating a preserve and rebuilding a healthy ecosystem are not necessarily the same thing. A recent study published in Nature found that, more often than not, marine-protected areas don't work as well as they could.

Researchers with the University of Tasmania studied 87 marine-protected areas in 40 countries worldwide, and found that 59 percent of the areas were no better off than areas where fishing was allowed. The reasons for failure varied, but they boiled down to this: Not all marine-protected areas are alike. Some allow fishing; others forbid it. Some are managed well; others are managed badly. Some are relatively intact; others have been left barren by generations of overfishing.

The researchers identified five essential characteristics of the most successful marine-protected areas: These areas were designated "no take" (allowing no fishing whatsoever), their rules were well enforced, they were more than 10 years old, they were bigger than 100 square kilometers, and they were isolated by deep water or sand. Compared with regular fished areas, the areas that had

four or five of those attributes had a far richer variety of species, five times the biomass of large fish and 14 times the biomass of sharks, which are indicators of ecological health.

Most underachieving marine sanctuaries had only one or two of these magic factors, and thus “were not ecologically distinguishable from fished sites.” The four sanctuaries lucky enough to have all five characteristics were isolated areas in the oceans off Costa Rica, Colombia, New Zealand and Australia. The “coral triangle” of Southeast Asia also got high marks, but it did not have as great an array of large species as its more isolated counterparts.

You could say the scientists were simply discovering the obvious — that a “protected” area hardly deserves the name if it’s so small that fish swim out of it, or if poachers are allowed to plunder it. But it would be an overreaction to despair over this report.

Marine-protected areas are clearly a positive trend, a reflection of the growing awareness of governments across the globe that the oceans and their bounty are not limitless or indestructible. There is greater understanding of the urgent need to ease the commercial pressures on fragile, increasingly acidified, steadily warming and rising oceans, lest the reefs die and the birds and fish disappear.

The worst conclusion to reach from this eye-opening report would be to dismiss the value of marine-protected areas. It takes time for fish to grow and get bigger. Decades of damage can’t be undone overnight. Governments and scientists need to work together to better design, maintain, improve and protect “protected areas.” The creation of a marine-protected area is only the start of an effective conservation effort, not the end.

The Bloody Ivory Business
By The Editorial Board
February 7, 2014

The slaughter of the African elephant continues. Nearly 100 of these majestic animals are sacrificed every day for ivory trinkets — bracelets, statuettes and other baubles sold illegally around the world. Wildlife experts estimate the remaining African elephant population at 350,000 to 500,000, with poachers targeting 30,000 to 35,000 a year. Elizabeth Bennett of the Wildlife Conservation Society estimates that one subspecies, the African forest elephant, could become extinct in the next decade.

A few governments have begun destroying illegal ivory as a warning to poachers and traffickers. The United States crushed six tons of illegal tusks, jewelry and other items in November. France pulverized three tons of illegal ivory this week. Even China, the main destination for illicit ivory, which sells for as much as \$1,000 a pound on the streets of Beijing, has begun to act, destroying six tons last month.

New York State Assemblyman Robert Sweeney wants to prohibit all ivory sales in the state, including those that are now technically legal. Even though trafficking in African elephant ivory was outlawed worldwide in 1989 by the Convention on International Trade in Endangered Species, there are exemptions for ivory from elephants killed before 1989 to make allowances for antiques like scrimshaw, piano keys and older works of art.

The problem is determining when an animal has been killed; even expensive radioactive tests can't always get it right. Further, as Jim Dwyer recently wrote in The Times, ivory can be stained to look dark and old. And very often appraisers simply take the seller's word that the ivory qualifies for an exemption. Mr. Sweeney, the chairman of the Assembly's Committee on Environmental Conservation, offers a straightforward answer: State authorities, he says, should ban the sale of ivory altogether until African elephants get "the protections they need."

Mr. Sweeney notes further that the penalties for selling ivory illegally are minimal, and federal and state wildlife authorities are often overwhelmed. New York State's Department of Environmental Conservation is charged with issuing licenses to sell ivory, but Mr. Sweeney has said it is not being tough enough and often fails to challenge appraisals and sellers' documents rigorously. The department, he says, must simply stop issuing permits until there are ways to slow the killing. Little else seems to be working. The 1989 agreement slowed the killing for a while, but the black market for "white gold" is booming again, as demand in Asia has increased along with the rise in disposable income. A United Nations report in September noted that there have been mass slaughters of elephants by well-organized criminal gangs.

Mr. Sweeney cannot solve a global problem. But he and his fellow legislators can make a strong statement that until elephants in Africa are spared, New York's freewheeling ivory market, one of the largest in the country, is closed.

The Law That Saved the Bald Eagle

By BOB Semple

December 31, 2013 (most recent article written by Semple)

In this season of birthdays and holidays, on Saturday the environmental community rightly celebrated the 40th anniversary of the passage of one of the most ambitious of the Nixon era's landmark environmental statutes: the Endangered Species Act. The act is at once the noblest of those statutes — aimed, in President Nixon's words, at protecting "an irreplaceable part of our natural heritage — threatened wildlife"; and also the most controversial, detested by loggers, developers and other interests for elevating the needs of nature over the needs of commerce. Approved by huge margins in both chambers (the vote on the House was an astounding 355-4), the act would stand zero chance of passage in today's poisoned political climate.

Right-wing critics of the law like to point out that less than 2 per cent of the 1500 or so animal and plant species listed as endangered or threatened under the law have actually recovered to the point that they can be removed from list. But this is a nutty way of measuring success; most of those species, once headed for extinction, can hardly be expected to rebuild healthy, sustainable populations overnight. A much better measure is that only about 30 species have gone to their doom, 37 species have been or will soon be removed from the list, and well over half are deemed stable or on the road to recovery. The act is credited with saving the bald eagle, the peregrine falcon, the California condor, the American alligator, the Florida panther and the grey wolf.

Individual species aside, the act's provisions requiring the preservation of a threatened animal's habitat has resulted in enormous gains for the environment as a whole. A succession of tiny birds listed as endangered or threatened — the spotted owl, the marbled murrelet, the coastal California gnatcatcher — have, over the past 20 years, saved millions of acres of old growth forest and open space along the Pacific coast from logging and commercial development. Efforts to save the wood

stork and the Florida panther have helped nourish the Everglades. And given sufficient political will, the endangered salmon runs in the Pacific Northwest may yet lead to the removal of dams that impede fish passage and cause huge mortality rates on the Lower Snake River.

Presidents Clinton and Obama have improved the way the act is administered, encouraging governments, landowners and industry to collaborate on conservation plans *before* an animal is formally listed as endangered. The number of lawsuits from environmental groups has likewise declined. Since the act has widespread public support, it seems unthinkable that Congress would roll it back. But with this Congress you never know.

Some very tough and inevitably controversial decisions lie ahead for Sally Jewell, the Interior Secretary. The biggest of these will be whether to protect the Greater Sage Grouse, a pretty little creature whose habitat not only ranges over nearly a dozen western states but is also believed to contain considerable reserves of oil and natural gas. Thus the stage is set for either a knockdown fight between the forces of nature and commerce, or a negotiated solution that gives industry some access without threatening the bird. As long as a compromise achieves the latter, we're for it.

- + Headlines From Today's Front Pages.

WASHINGTON SCHEDULE:

- + Today's Events In Washington.

LAST LAUGHS:

- + Late Night Political Humor.

DOI in the News:

SECRETARY JEWELL TO PROMOTE CONSERVATION FUND. The Hill (8/5, Cama, 237K) reports that Interior Secretary Sally Jewell will "join lawmakers and local officials to tour the country this week to promote the Land and Water Conservation Fund and push for its reauthorization." On Monday, Jewell said in a statement, "President Johnson and a bipartisan Congress got it right when they established the Land and Water Conservation Fund, embracing the simple concept that when we take something from the earth — namely, oil and gas from public lands offshore — we should return something back to the earth by investing in our land, water and wildlife heritage." Jewell's "tour will bring her to North Carolina, Indiana, New Mexico and Arizona to speak at facilities that have received money through the fund."

Also covering the story is the National Journal (8/5, Subscription Publication, 561K).

LAWMAKERS ABANDON WILDFIRE BILL. The US News & World Report (8/4, 645K) reports that “after members of Congress left for their August recess, 186 wildfires burned across the US on Monday, according to the Coordination Center.” According to the article, “a bill to overhaul how Congress funds wildfire suppression appears to be dead in the House, abandoned by Rep. Mike Simpson – the Idaho Republican who introduced the measure – and dozens of GOP legislators listed among its co-sponsors, even as infernos raged across many of their districts.” The Interior and Agriculture departments say “they plan to continue pressing the issue when legislators return in September.”

SENATORS SEEKS PROTECTION FOR UTAH'S GREATER CANYONLANDS. The E&E Daily (8/4) reports that 14 Democratic senators “last week urged President Obama to permanently preserve 1.8 million acres of red rock lands surrounding Canyonlands National Park as a national monument.” According to the article, “the July 30 letter to Obama, which is sure to incite Utah’s delegation and rural counties, said designating a Greater Canyonlands National Monument would tarnish the president’s conservation legacy.” The 14 senators, only two of whom are from the West, wrote, “Greater Canyonlands is one of our nation’s most stunning, wild and unique landscapes. It should be protected permanently for the benefit and education of future generations.”

The Deseret (UT) News (8/4, 538K) notes that “Utah’s top political leaders and rural county officials across the state are vigorously fighting an effort led by environmentalists that calls for the creation of the Greater Canyonlands National Monument.”

SOUTHEAST ALASKA VILLAGE SUES OVER NONRURAL STATUS. The AP (8/5) reports that “the southeast Alaska village of Saxman has filed a lawsuit against federal officials over the Federal Subsistence Board’s 2007 decision to designate the Tlingit community as nonrural.” The complaint “calls the decision and criteria used to reach it ‘arbitrary and capricious.’” The plaintiffs are “seeking to have the decision reversed and declared invalid.”

Coverage was also picked up by the Fairbanks (AK) News-Miner (8/5, 44K).

SEN. MURKOWSKI'S PUBLIC LANDS AIDE DEPARTS ENERGY AND NATURAL RESOURCES. The E&E Daily (8/4) reports that “a senior aide to Senate Energy and Natural Resources ranking member Lisa Murkowski (R-Alaska) is leaving the panel tomorrow, the senator announced.” The article notes that “Kaleb Froehlich, the committee’s senior Republican counsel whose portfolio includes public lands, sportsmen’s issues, endangered species and environmental regulation, joined the committee in 2009 when Murkowski became its top Republican.” Froehlich is “joining the Washington, D.C.-based firm Cassidy & Associates to work on Alaska and Western natural resource issues, according to Nelson Freeman of Safari Club International, who has worked with Froehlich.”

COOPERATION BETWEEN US, MEXICO LEADS TO OPENING OF MORELOS DAM GATES. In his column for the Albuquerque (NM) Journal (8/5, 234K), John Fleck writes about how “Mexican and U.S. water managers had opened the gates of Morelos Dam.” He notes that “among the key players who made Colorado River flow happen is Mike Connor,” who “as head of the U.S. Bureau of Reclamation from 2009-14,” led “the U.S. team that negotiated the deal to provide the environmental flow for the Colorado River delta.”

America’s Great Outdoors:

National Park Service:

EISENHOWER MEMORIAL DESIGN BY GEHRY CRITICIZED BY HOUSE COMMITTEE. The Los Angeles Times (8/5, Ng, 3.42M) reports that “the design for the long-planned Dwight D. Eisenhower Memorial in Washington has been criticized in a newly issued congressional report that has called the project a ‘five-star folly.’” Members of the House Committee on Natural Resources said in “the report that architect Frank Gehry’s design ‘continues to fall short of the required design principles’ and that the process used to select Gehry for the project deviated substantially from protocol.” Members also “reported that \$41 million has been ‘spent or obligated so far’ – an amount that includes nearly \$16.4 million for the designer and more than \$13.3 million to the multiple parties managing the project.”

INVASIVE LIZARD POSES CHALLENGE IN FLORIDA. The New York Times (8/5, Nuwer, Subscription

Publication, 9.79M) reports on "what some biologists consider the most troublesome invasive species in the Everglades: not a Burmese python, but a 24-inch lizard, the Argentine black and white tegu." The article notes that "tegu populations are creeping east toward Turkey Point Nuclear Generating Station, where threatened American crocodiles nest; west into Everglades National Park, populated by protected Liguus tree snails and endangered Cape Sable seaside sparrows; and south to Crocodile Lake National Wildlife Refuge, the home of the endangered Key Largo wood rat and cotton mouse, and more crocodiles." However, "despite the threats to native wildlife...efforts to tackle the tegu problem are lagging," because "attention is still primarily focused on pythons, even though that species is already so well established that there is little hope of eliminating it."

NATIONAL PARKS RECEIVE "BEST IDEA" GRANTS. KTWO-AM Casper, WY (8/5, 576) reports that "Yellowstone National Park is one of 39 national parks selected to receive a 2014 America's Best Idea grant from the National Park Foundation." Yellowstone will "partner with Groundwork USA, a national network of non-profits working to transform community liabilities into quality neighborhood assets, and to engage residents in improving quality of life in their own neighborhoods." Judy Knuth Folts, Deputy Chief for the Division of Resource Education and Youth Programs for Yellowstone, said, "We were thrilled to receive a National Park Foundation grant this year. In addition to completing important work at Yellowstone, the youth will complete a Yellowstone inspired project when they return to their home communities, meaning more people will hear about the park and the National Park Service mission."

CITIZENS' GROUP FIGHTS PLANS FOR MUIR WOODS. The Courthouse News (8/4, 7K) reports that the NPS has "embarked on a reckless venture to transform Muir Woods [National Monument] into an amusement park," a citizens' group claims in court. The Mount Tam Task Force sued the Interior Department and the NPS on July 31 in Federal Court. The NPS "plans to build 110 valet parking spaces on a country road, two bus stops on Highway 1 near the redwood enclave, and a half-mile trail connecting the bus stops to Muir Beach." According to the complaint, "this will double the number of visitors to the area each year."

INDIANA DUNES NATIONAL LAKESHORE CLOSING BEACH FOR TWO DAYS. The AP (8/5) reports that the NPS will "close a beach at the Indiana Dunes National Lakeshore on Monday and Tuesday to clean up storm damage." Supervisory Park Ranger Bruce Rowe said that "waves up to 11 feet high battered Central Avenue Beach during recent storms and exposed large pieces of concrete, pipes and other debris." The NPS "expects to reopen Central Avenue Beach on Wednesday."

ADDITIONAL COVERAGE: NPS MOVES FORWARD WITH PLAN TO SHOOT DEER AT THREE CIVIL WAR BATTLEFIELDS. Additional coverage of the plan to shoot "more than 2,800 white-tailed deer at three Civil War battlefields in Maryland and Virginia over the next five years to curb damage to plants and trees" was provided by Fox News (8/4, 6.72M).

ADDITIONAL COVERAGE: SAGUARO NATIONAL PARK BANS DRONES. Additional coverage of the decision to ban drones in Saguaro National Park was provided by the Tucson (AZ) Sentinel (8/5, 1K) and KOLD-TV Tucson, AZ (8/5, 19K).

Bureau of Land Management:

TENSIONS RISE BETWEEN BLM, LOCAL LAW ENFORCEMENT IN THE WEST. The Los Angeles Times (8/5, Glionna, 3.42M) reports that "the relationship between local law enforcement and often heavily armed federal officers has always been tense, and now threatens to reach a breaking point." James Perkins, the sheriff of Garfield County, and "others attribute the deteriorating relations to what he calls BLM's culture of elitism, which provoked Garfield County to join two other Utah counties this year to pass a resolution restricting or banning federal law enforcement within their borders." BLM officials say "they're trying to manage a mammoth swath of the West as best they can while seeking common ground with local authorities." Perkins and others "recently addressed a House public lands subcommittee that was collecting testimony about concerns over the BLM, including claims about bullying ranchers and refusing to respond to emergency calls." However, "BLM officials in Washington call the claims 'vague and inaccurate.'" Bob Abbey, who led the BLM from 2009 until 2012, said, "The agency is not elitist. Everything the BLM does is based on public input or a direction from the courts, so it's frustrating to hear criticism like this. The way I see it, we have much more in common with local law enforcement than differences, but we've allowed those differences to block pursuing common goals."

Nevada Rancher Bundy Calls Dispute With BLM A Spiritual Battle. The E&E Daily (8/4) reports that Cliven Bundy said "the standoff in April between the Bureau of Land Management and his armed associates was part of a spiritual battle of good versus evil." Bundy said "God gave him inspiration in the battle over cattle on public land in Bunkerville, Nev." Bundy said, "The Lord told me ... if [the local sheriff doesn't] take away these arms from federal agents, we the people will have to face these arms in a civil war. He said, 'This is your chance to straighten this thing up.'"

Additional coverage was provided by the Raw Story (8/4, 71K) and the Chattanooga (TN) Times Free Press (8/3, 221K).

SENATE BILL REJECTS BLM CHARITABLE FOUNDATION, BUT AUTHORIZES NEW DRILLING FEES. The E&E Daily (8/4) reports that the Senate Appropriations Committee's "\$30.7 billion fiscal 2015 spending bill for the Interior Department and US EPA offers no funding for a newly proposed charitable foundation to promote the Bureau of Land Management, but it does authorize the agency to charge new inspection fees for oil and gas wells." The bill also "contains no funding for payment in lieu of taxes (PILT), a program critical to rural counties that is typically funded outside of the discretionary budget." The legislation also "would authorize President Obama's plan to reform wildfire budgeting; hike spending for land acquisition, national parks and collaborative forest restoration projects; authorize a new \$1 grazing fee on BLM and Forest Service lands; and extend a key recreation fee program for public lands."

GROUPS CHALLENGE WILD HORSE ROUNDUP IN WYOMING. The AP (8/5) reports that wild horse preservation groups are challenging the BLM's "plan to remove about 800 horses from areas in southern Wyoming." The bureau "recently announced plans to start removing the horses from lands within the Great Divide Basin, Adobe Town and Salt Wells Creek herd management areas later this month." Suzanne Roy, director of the American Wild Horse Preservation Campaign headquartered in North Carolina, said Monday "the groups intend to ask a federal judge to grant an injunction blocking the roundup." She said, "The current problem is that they're proposing this roundup in violation of the National Environmental Policy Act. They haven't done any analysis or allowed for any comment. They're going to bring these populations down below the established level, which is in conflict with their own land-use plans and the Wild Horse Act."

Coverage was also picked up by the Sacramento (CA) Bee (8/4, 582K).

Also reporting on the story is the North Country (NY) Gazette (8/4, 59) and the Colorado Springs (CO) Independent (8/4, 79K).

BLM ISSUES BURNING MAN PERMIT. The Reno (NV) Gazette-Journal (8/4, 166K) reports that the BLM announced Monday "it has issued a Special Recreation Permit for the Burning Man event for Aug. 24 through Sept. 1." The permit "requires the event maintain a maximum population of 68,000 participants." Gene Seidlitz, BLM Winnemucca District Manager, said, "Our chief priorities in administering this permit is the protection and conservation of natural, historical and cultural resources, as well as ensuring the safety of event participants and all staffs. I have the utmost confidence that the permit and its associated environmental analysis address these priorities."

Also reporting on the story is the Gardnerville (NV) Record Courier (8/5, 21K).

COBRA ROCK FORMATION NEAR MOAB TOPPLES. The Deseret (UT) News (8/4, 538K) reports that "the Cobra tower met an unfortunate fate when its head was detached over the weekend." According to Lisa Bryant, assistant field manager for the BLM's Moab office, "the head fell off the tower base sometime between Tuesday and Friday." Although "the incident is still under investigation, early reports indicate the decapitation may have been the result of inclement weather in the area."

Also reporting on the story is the Salt Lake (UT) Tribune (8/5, 470K).

CONSTRUCTION BEGINS ON PAROWAN GAP PROJECT. The Deseret (UT) News (8/4, 538K) reports that "construction has begun at the Parowan Gap visitor site improvement project," according to the BLM. The article notes that "once complete, the project will reduce recreation-caused degradation to cultural and paleontological

resources and threatened and endangered species habitat." The project will also "involve locating several new public parking areas away from cultural resources; installing a convenient vehicle turnaround; constructing a visitor trail off-limits to motorized vehicles that has a shade structure and restroom facility; and stabilizing areas to help prevent rockslides."

Fish and Wildlife Service:

BILL WOULD CAP ATTORNEYS' FEES FOR ENDANGERED SPECIES ACT LITIGATION. In a highly critical article, the Washington Examiner (8/5, 335K) reports that President Obama and environmental groups want lawyers engaged in Endangered Species Act litigation to "continue to get the \$300 to \$450 an hour they are typically paid now." Notably, the Interior Department "paid out more than \$21 million in attorneys' fees to outside groups engaged in ESA cases between 2001 and 2010, according to a 2012 Government Accountability Office study." However, "last week, the House passed a bill he sponsored called the 21st Century Endangered Species Transparency Act." The article notes that "most of its provisions relate to making public the data used in ESA policymaking, but the bill also caps attorneys' fees at rates specified by the Equal Access to Justice Act."

FWS FINALIZES PROTECTIONS FOR TWO RARE FISH SPECIES. The E&E Daily (8/4) reports that the FWS on Monday "finalized protections for two rare fish species found in Texas." According to a notice published in the Federal Register, "the sharpnose shiner (*Notropis oxyrhynchus*) and smalleye shiner (*N. buccula*) will both be given endangered status under federal law."

Also reporting on the story are KJTV-TV Lubbock, TX (8/5, 775) and KFYO-AM Lubbock, TX (8/5, 67).

EXPERTS SAY GRIZZLY'S REINTRODUCTION TO CALIFORNIA FACES CHALLENGES. The E&E Daily (8/4) reports that "as the Fish and Wildlife Service weighs a petition by environmental groups to reintroduce grizzly bears to some of their historical habitats in California, some experts are questioning whether the state's burgeoning human population can handle closer proximity to the large predators." Noah Greenwald, the Center for Biological Diversity's endangered species director, said "the sparsely populated southern Sierra Nevada region would be the best place to study putting the bears." However, "others worry that grizzlies, considered significantly more aggressive than the state's relatively docile black bears, would leave the area and come into conflict with humans."

SPACE X CHOOSES TEXAS FOR COMMERCIAL LAUNCH SITE. The AP (8/4) reports that SpaceX has decided to develop "the world's first" commercial orbital launch site in Texas, which is providing more incentives to the company for the site. Texas Gov. Rick Perry said, "Texas has been on the forefront of our nation's space exploration efforts for decades, so it is fitting that SpaceX has chosen our state as they expand the frontiers of commercial space flight." Rick Tumlinson, co-founder of Space Frontier Foundation and Texas Space Alliance, previously said that the launch site could one day be the location of manned flights to the ISS. Bryce Christensen, managing partner at The Tauri Group, also previously stated that this should give the company more "predictability." The New York Times (8/5, B2, Subscription Publication, 9.79M) reprints a version of the AP article.

The Wall Street Journal (8/5, Koppel, Subscription Publication, 5.89M) notes that the Federal government still has to approve the location. Meanwhile, according to the article, Micah Walter-Range, research director at the Space Foundation, said that while the launch site would make Texas a commercial spaceflight leader, it could be years before the location actually has a positive impact on the state because of potential delays and problems.

According to the Brownsville (TX) Herald (8/5, Martinez, 57K), SpaceX's decision comes "after months of speculation." Another Brownsville (TX) Herald (8/5, Doherty, 57K) article had reactions from politicians to the news.

Bloomberg News (8/5, Preston, 2.76M) local officials hope to make the region "as well known for space travel as Houston, home of NASA's Johnson Space Center."

Also covering the story are the Austin (TX) American Statesman (8/5, Copelin, 424K), Dallas Morning News (8/5, 1.11M), Reuters (8/5, Forsyth), KROI-FM Houston (8/5, De Hoyos, 725) website, KUT-FM Austin, TX (8/5, Shaar,

332) website, Fortune (8/4, Snyder, 2.51M), Business Insider (8/5, Rosen, 2M), Venture Beat (8/4, Cheredar, 67K), Houston Chronicle (8/5, Berger, 2.02M) "SciGuy" blog, and Examiner (8/5, Whittington, 1.54M) "Houston Space News Examiner."

AGREEMENT WOULD ALLOW TRIBE TO MANAGE PROGRAMS ON NATIONAL BISON RANGE COMPLEX.

KXLO-FM Lewiston, MT (8/5) reports that the FWS on Monday "announced publication of the draft Environmental Assessment (EA) for a proposed Annual Funding Agreement (AFA) that would allow the Confederated Salish and Kootenai Tribes (CSKT) to manage and implement the biological, maintenance, public use, and fire management programs on the National Bison Range Complex." Will Meeks, Mountain-Prairie Region assistant regional director for Refuges, said, "We always think that it's important to involve stakeholders in the process of deciding how to best manage our shared natural resources, in this case the locally- and nationally-known National Bison Range. Both citizens and Tribal members with an opinion on how the National Bison Range will be managed are invited to comment on the draft environmental assessment during the thirty-day comment period."

PLAN TO OPEN GARRETT ISLAND UP FOR MORE ACCESS STAYS STALLED. The Baltimore Sun (8/3, Hirsch, 841K) reports that the FWS wants to the Garrett Island "up for more access and started work on a trail a few years ago, but the project stalled amid a shortage of staff and money." Cindy Beemiller, an FWS refuge specialist, said, "It would be nice if people can use something that's practically in their backyards." According to Beemiller, "opening the island would 'teach people about public lands — in our case, about refuges.'"

4-H CAMPERS LEARN HOW TO IDENTIFY INVASIVE SPECIES. The AP (8/5, Edwards) reports that Lafarge North America partnered with FWS and Huron Pines Conservation Group to "bring 4-H Great Lakes and Natural Resources Campers to the Presque Isle Quarry to be introduced to identifying invasive species, the issues these plants present and how to map problem areas through firsthand experiences." According to the article, "the 13- to 15-year-old campers from Camp Chickagami visited the quarry in small groups last week." Heather Rawlings, an FWS biologist, "led the group effort in identifying non-native phragmites and other invasive species."

ARMY CORPS PROPOSES TO KILL BIRDS TO SAVE FISH. The E&E Daily (8/4) reports that the Army Corps of Engineers is "proposing to cull an oversized seabird population along the Columbia River in Oregon as part of its management plan to protect endangered fish." The article notes that "shooting 16,000 double-crested cormorants is the preferred choice among four options the corps put forward to reduce predation on young salmon and steelhead bound for the Pacific Ocean." The proposal, "which includes taking a limited number of cormorant eggs, would enlist the Wildlife Services agency of the Department of Agriculture to shoot the birds after the Fish and Wildlife Service granted permits."

FLORIDA INSTITUTES BAN ON LIONFISH IMPORTS. The E&E Daily (8/4) reports that "Florida on Friday became the first state to institute a ban on importing invasive lionfish with punishments of fines up to \$1,000 and a year in prison." The Florida Fish and Wildlife Conservation Commission also "removed license obstacles for fishermen or recreational divers who want to catch lionfish."

Securing America's Energy Future:

Renewable Energy:

VINEYARD POWER PREPARES TO MOVE FORWARD WITH PLAN TO BUILD WIND FARM. The Vineyard (MA) Gazette (8/4, 30K) reports that Vineyard Power, "the Island-owned energy cooperative, is entering the next phase of its plan to build a 40-kilowatt wind farm south of the Vineyard." According to the article, "at its fifth annual meeting on Saturday, president Richard Andre said the cooperative will bid on a portion of the federally-owned Massachusetts wind area, which covers about 1,200 square miles south of the Vineyard and was recently opened to commercial wind energy leases."

Onshore Energy Development:

GROUSE MEASURES DEFER DRILLING IN MUCH OF WYOMING. The AP (8/5) reports that BLM "figures show the total area of federal oil and gas leases currently deferred in Wyoming to protect the greater sage grouse exceeds the size of Yellowstone and Grand Teton national parks combined." The article notes that "the 3.5

million acres of deferred leases include 10,000 acres that otherwise would be offered at a BLM oil and gas lease sale Tuesday." BLM officials say "many deferred leases will become available in coming months, after they enact land-use regulations to protect the ground-dwelling bird in the Rocky Mountain region." Nevertheless, Kathleen Sgamma with the Western Energy Alliance says "the petroleum industry worries the regulations will overly restrict oil and gas development."

Coverage by the AP was also picked up by the Provo (UT) Daily Herald (8/5, 116K).

Ad Campaign Warns About Impacts Of Looming Sage Grouse Listing. The E&E Daily (8/4) reports that "an oil and gas industry group has launched an advertising campaign warning that a federal endangered listing for the greater sage grouse would have dramatic economic impacts across the West and undermine already effective state and local conservation programs." The ad campaign "orchestrated" by the Western Energy Alliance also "blames 'activist lawyers' representing environmental groups for a legal settlement that requires the Fish and Wildlife Service to decide whether to propose listing the grouse by September 2015, before state and local plans have had a chance to fully make a difference." The ad campaign will "feature online and radio advertisements running over the next three months in six Western states – Colorado, Montana, New Mexico, North Dakota, Utah and Wyoming – that attack the legal agreement and the science driving a possible listing decision."

Washoe County Commissioners Support Nevada Senators' Sage Grouse Plan. In an op-ed for the Reno (NV) Gazette-Journal (8/5, 166K), Washoe County commissioners David Humk and Kitty Jung write that "listing sage-grouse as an endangered species could potentially have wide-reaching effects in Washoe County and Nevada." They note that "it could have a negative impact on the mining industry if roads used to get metals from mine sites to markets are closed off to protect sage grouse habitat," and "it could also restrict grazing, which is a key part of the economy in northern Washoe County." They argue that "our community needs a plan to manage the sage grouse in a way that protects their habitat while also allowing economic planning for Nevada industries." They, "along with the rest of the Board of County Commissioners, support a plan from Sen. Harry Reid and Sen. Dean Heller to protect our sage-grouse habitat."

COLORADO GOVERNOR, POLIS MOVE TO TAKE FRACKING INITIATIVES OFF NOVEMBER BALLOT. The Fort Collins (CO) Coloradoan (8/5, Handy, 59K) reports that "at the eleventh hour on Monday," Gov. John Hickenlooper "abruptly interceded into Colorado's battle to control oil and gas development by creating a special task force to tackle issues surrounding regulation of the industry." Hickenlooper "called for four proposed ballot initiatives – all of which planned to turn in signatures Monday to the Secretary of State's office – to be dropped," and "asked that the Colorado Oil and Gas Conservation Commission stand down from an ongoing lawsuit against the city of Longmont, launched in 2012 after the city passed a ban on hydraulic fracturing."

The Hill (8/4, Barron-Lopez, Joseph, 237K) notes that the two "controversial initiatives....sought to restrict fracking for natural gas in the state," creating "a rift among Colorado Democrats in recent months and threatened to hurt Sen. Mark Udall and Gov. John Hickenlooper in their reelection bids."

Colorado Public Radio (8/5) noted that Hickenlooper "was joined by US Rep. Jared Polis when he issued the call on Monday." Polis "had backed two of the measures seeking limits on drilling." Sen. Mark Udall, "who opposed the ballot measures, released a statement Monday congratulating Hickenlooper and Polis." Said Udall, "This deal – which averts a divisive and counterproductive ballot fight over one-size-fits-all restrictions – is welcome news and underscores how all of Colorado benefits when we find common ground."

The New York Times (8/5, Healy, Subscription Publication, 9.79M) casts Hickenlooper as "seeking to head off a costly election-year fight over oil and gas drilling that could threaten vulnerable Colorado Democrats," as "the fight over fracking in a swing state that prizes its natural beauty and relies on its energy resources for jobs and tax revenues has become a months-long headache for Democratic leaders, opening fissures within the party and between pro-energy moderates and environmental groups."

Bloomberg News (8/5, Olson, Oldham, 2.76M) reports that Polis said yesterday, "Today's announcement is a victory for the people of Colorado and the movement to enact sensible fracking regulations. ... I know for many today's announcement will not go far enough, but I believe it's just the beginning of next chapter." Meanwhile, "environmental groups said they were disappointed the ballot measures wouldn't get a vote."

The Wall Street Journal (8/5, Harder, Frosch, Subscription Publication, 5.89M) reports the API's Jack Gerard said he backed the formation of the task force, saying he hoped it would lead to a "more balanced and inclusive" debate on fracking. Reuters (8/5), among other news outlets, also reports the story this morning.

COURT HALTS DRILLING PROJECT NEAR PINNACLES NATIONAL PARK. The E&E Daily (8/4) reports that "San Benito County, Calif., officials unlawfully approved an oil-development project near Pinnacles National Park when they allowed developers to proceed without preparing an environmental impact report, a judge has ruled." The Center for Biological Diversity said that "the project, involving 15 exploratory wells to be drilled by Citadel Exploration, risks polluting the watershed that drains into the Salinas River and also threatens the area's condor habitat." However, "the drilling company said county officials acted prudently in green-lighting the project, noting that other state agencies reviewed the plans even though an environmental impact report was not developed."

Offshore Energy Development:

MARYLAND LAWMAKERS OPPOSE SEISMIC TESTING. The Baltimore Sun (8/4, Wheeler, 841K) reports that "eight Democratic members of Maryland's congressional delegation wrote President Obama Monday urging him to reconsider his administration's plan to allow seismic testing for oil and gas off the mid-Atlantic coast." In a jointly signed letter, they "called seismic testing the first major step toward opening the Atlantic Ocean to offshore drilling, which carries the risk of oil spills." However, "they warned that the tests themselves would be 'incredibly harmful to marine mammals and fisheries in the region,' generating 'dynamite-like' blasts of compressed air underwater that could hurt whales, dolphins and fish."

NEW TECHNOLOGY SPURS SHALLOW WATER DRILLING IN THE GULF OF MEXICO. Reuters (8/4) reports that new technology, such as seismic surveying and horizontal drilling, have enabled oil companies to access shallow-water reserves in the Gulf of Mexico. The technology has been effective in locating oil and gas reserves that were previously hidden in shallow-water, as well as in re-evaluating older deposits. Furthermore, shallow-water wells are cheaper, and can be installed for about \$10 million versus deep-water wells, which can cost up to \$50 million.

CALIFORNIA SEN. JACKSON PUSHES BILL TO CLOSE OFFSHORE DRILLING LOOPHOLE. The Los Angeles Times (8/5, Lifsher, 3.42M) reports that California Sen. Hannah-Beth Jackson (D-Santa Barbara) is pushing to close a loophole that would allow Sunset Exploration Inc. and its partner Exxon Mobil to conduct offshore drilling by drilling horizontally under the ocean from land on Air Force property. The California Coastal Sanctuary Act bans the approval of new oil and gas production leases in state waters, however, one exemption allows the State Lands Commission to approve a new drilling lease. State Sen. Jackson says she is in a rush to pass her bill, in order to "end the conversation once and for all" about offshore drilling, "whether on land or off land."

Tackling America's Water Challenges:

CENTRAL SAN JOAQUIN WATER CONSERVATION DISTRICT WINS DAMAGE SUIT AGAINST BOR. McClatchy (8/5, Doyle, Subscription Publication, 23K) reports that "a federal appeals court has delivered a big victory to a small water district in California's parched San Joaquin Valley." Judges found that "the government owes additional damages for the Bureau of Reclamation's failure to deliver enough water to the Stockton-based Central San Joaquin Water Conservation District. Potentially, the district could collect millions of dollars." Writing on behalf of a unanimous three-judge panel, Judge S. Jay Plager "rejected the government's argument that Central undercut its damage claims by its own actions."

Coverage was also picked up by the Sacramento (CA) Bee (8/4, 582K), the Fresno (CA) Bee (8/4, 322K), and the Raleigh (NC) News & Observer (8/4, 456K).

COLORADO RIVER SYSTEM CONSERVATION PROGRAM CRITICIZED. In an op-ed for the Sterling (CO) Journal-Advocate (8/5, 20K), Colorado state Representatives Don Coram and Jerry Sonnenberg criticize the drought management pilot program for the Upper Colorado River System forged between Denver Water and the respective water districts from Arizona, California and Nevada for its negative impact on Colorado's agriculture industry. They argue that "asking Colorado farmers to plant less, reduce their yield and even switch crops will

have devastating impacts on our agriculture industry and ultimately our state's economy."

Additional coverage of the program was provided by the High Country (CO) News (8/5, 74K).

LATIMES: CALIFORNIA LAWMAKERS SHOULD ADDRESS GROUNDWATER MANAGEMENT. An editorial in the Los Angeles Times (8/5, Board, 3.42M) faults California lawmakers for failing to heed Gov. Jerry Brown's call for groundwater management legislation, arguing that "without change, California's groundwater could be pumped to depletion, causing aquifers to draw their water from lakes and wetlands, which would in turn damage sensitive habitats and reduce surface water available for human use, or destroying the aquifers themselves by drawing in saltwater or contaminants."

Empowering Native American Communities:

BIA CHIEF WASHBURN HEARS OPPOSITION TO THIRD PARTY FEDERAL RECOGNITION VETO. The Indian Country Today Media Network (8/4, 45K) reports that "around 100 people attending a public session on the Bureau of Indian Affairs' proposed new rules for federal recognition broke into spontaneous applause when Eastern Pequot Tribal Nation Chairman Dennis Jenkins spoke against a controversial provision that would allow certain third parties to veto a tribe's ability to re-petition for federal status." According to the article, "opposition to the third party veto provision, which was included in the proposed new rules under pressure from Connecticut politicians, turned out to be the hot topic of the day, dominating discussion during the BIA's three-and-a-half hour public session held at the Mashpee Wampanoag's new government offices and community center during the morning of July 29 (a closed formal consultation with leaders of federally recognized tribes took place in the afternoon)." Assistant Secretary – Indian Affairs (ASIA) Kevin K. Washburn attended and ran the session.

In an editorial, the Hartford Business Journal (8/4, 27K) notes that "last week, the state received a bit of good news when the Bureau of Indian Affairs decided to extend a comment period deadline for 60 days on a proposal that could potentially recognize three more tribes in the state: the Eastern Pequot, the Golden Hill Paugussett of Colchester and Trumbull, and the Schaghticoke Tribal Nation of Kent." According to the paper, Gov. Dannel P. Malloy and Attorney General George Jepsen are "leading the fight in opposition to further tribal recognition, but there is no guarantee they will succeed." It hopes "they put forth a winning argument, because Connecticut can't afford more casinos or a further shrinkage of its tax base."

OBAMA ADMINISTRATION URGED TO NOT PARTICIPATE IN NNALEA EVENT. In an open letter to US Attorney General Eric Holder published by the Indian Country Today Media Network (8/4, 45K), Ted Quasula, a founding member of the National Native American Law Enforcement Association, supports his stance against "the Washington pro football team's use of 'redskins.'" He notes that Gary Edwards is currently the CEO of National Native American Law Enforcement, and "several months ago team owner Dan Snyder hired Mr. Edwards to be CEO of his newly created Original Americans Foundation or more appropriately called OAF." Quasula finds it "a shame that a once proud Native American law enforcement group be associated with the racist name, 'redskins.'" He notes that "the NNALEA website is promoting its annual Las Vegas meeting/training session in August," and he asks Holder to "take action to ensure that no taxpayer money is used for federal employees to attend."

Top National News:

AS AFRICA SUMMIT OPENS, BIDEN AND KERRY CALL FOR ANTI-CORRUPTION EFFORT. While coverage of the US-Africa Leaders Summit, largely limited to print outlets last night and this morning, casts it as a positive step for the Administration, a number of reports also describe it as a reaction to perceptions that the President has not focused on Africa as much as his predecessor.

The AP (8/5, Pace), for example, says Obama's "unprecedented summit" is "aimed in part at building his legacy on a continent where his commitment has been questioned." Obama visited sub-Saharan Africa in 2009, but "it would be four years before Obama returned to Africa, a yawning gap that raised questions." Moreover, "unlike his predecessor George W. Bush, who launched a \$15 billion program to address HIV and AIDS, Obama seemed to be lacking a signature Africa initiative."

Obama, says Bloomberg News (8/5, Talev, 2.76M) along similar lines, "is working to overcome perceptions that sub-Saharan Africa has been a low priority his administration. ... By contrast," Bush "won praise for his initiatives in sub-Saharan Africa, including from Obama." Bloomberg adds that Ugandan ambassador to the US Oliver Wonekha and Ambassador Steve Materije of Malawi, "both Obama fans, said in interviews last week that Africans expect more from Obama."

The Washington Times (8/5, Wolfgang, 465K) says "the Obama White House hasn't launched a signature African program similar to the HIV/AIDS program began and championed by...Bush."

As the summit opened, Bloomberg News (8/5, Talev, 2.76M) reports, Vice President Biden yesterday pressed "African leaders to tackle corruption and give greater recognition to the rights of women as the first US-Africa Leaders Summit opens in Washington." Said Biden, "No democracy can survive without the active, intense participation of its people."

The Washington Times (8/5, Wolfgang, 465K) quotes Biden as saying, "Corruption is not unique to Africa. But it's a cancer in Africa, as it is around the world." Biden's comments, adds the Times, "are part of the Obama administration's broader strategy of fostering economic growth and stability on the African continent, which, despite significant progress in some countries, still faces greater rates of poverty, disease and violence than other parts of the globe."

The Washington Post (8/5, Gearan, 4.06M) quotes Biden as saying, "Widespread corruption is an affront to the dignity of your people and a direct threat to each of your nations. ... It stifles economic growth and scares away investment and siphons off resources that should be used to lift people out of poverty." The Post notes that also addressing the summit, Secretary of State Kerry said, "We want and we will work hard to get more American companies to invest in Africa. ... We also want more African companies to invest here in the United States, and there's no reason that they shouldn't." Kerry also said, "Transparency and accountability attract greater investment. ... Transparency and accountability create a more competitive marketplace, one where ideas and products are judged by the market and by their merits, and not by a backroom deal or a bribe." Reuters (8/5, Nawaguna) notes that Kerry also said, "Fighting corruption lifts more than a country's balance sheets. The market always works better with transparency, with the sunshine of accountability."

The Hill (8/4, Cirilli, 237K) quotes Kerry as saying, "Civil society is the lifeblood of democracy ... This is not hyperbole, but no democracy can survive without the active and intense participation and its people. ... You the leaders of civil society — you empower your societies to succeed. ... You are the lifeblood."

Voice of America (8/5, 21K) reports that "at an earlier forum on economic opportunity," Kerry "outlined some of the U.S. goals for the three-day summit," saying, "It's also why we're determined to deepen our partnership and deliver on remarkable opportunities for peace, for security, for economic growth, and perhaps for most important in the context of what brings us here today, the empowerment of people through their government, through their civil society."

The Atlanta Black Star (8/4, Chiles, 64K) reported that "analysts were busy listing all the objectives the US hopes to accomplish during the next three days," but "in the background hovered China, which in 2009 surpassed the US as Africa's largest trading partner." Adds the Star, "The economies of the sub-Saharan African nations have exploded in recent years while much of the Western world has regressed or remained flat, making Africa an extremely attractive place for foreign investment."

David Brooks writes in the New York Times (8/5, Brooks, Subscription Publication, 9.79M) that "China's aggressive role in Africa is helping to support authoritarian tendencies across the Continent, at least among the governing elites." Despite the summit, "US influence on the Continent is now pathetically small compared with the Chinese and Europeans. The joke among the attendees is that China invests money; America holds receptions."

Writing for the New Pittsburgh Courier (8/5, Chavis, 58K), Benjamin F. Chavis, Jr., touts the summit as an event whose "importance...should not be underestimated." It is a "historic event for all Americans, but especially for 45 million Black Americans who all are direct or indirect descendants from Africa," meeting a muted reception because in "whatever initiative that...Obama attempts to launch is met with the usual conservative or racially-

forced by her parents to marry a man she did not love.”

US Officials Discuss Ebola Outbreak With African Leaders; US Hospitals On Lookout For Cases. The Ebola outbreak overshadowed coverage of the summit on the network newscasts, all of which led with the story and devoted a combined 13 minutes to it. TV coverage largely focused on the outbreak's potential risks for the US mainland.

The Hill (8/5, Viebeck, 237K), meanwhile, reports “senior members of the Obama administration,” including HHS Secretary Burwell and CDC Director Dr. Tom Frieden “met Monday with Guinean President Alpha Condé and other African leaders about the widening outbreak of Ebola virus.” The Hill adds that “the group discussed strategies for US assistance in countering the outbreak, according to the State Department, which alerted the meeting.”

USA Today (8/5, Painter, 5.76M) reports that according to a WHO update, “the toll from the Ebola virus outbreak spreading in West Africa has risen to 1,603 cases and 887 deaths.” Scott Pelley reported in the lead story for the CBS Evening News (8/4, lead story, 3:05, Pelley, 5.08M) that US officials “are downplaying the threat here in the United States.” Meanwhile, “delegates to the Africa summit in Washington arriving from at-risk countries are being screened at the airport.” Pelley added that the World Bank announced Monday that “as much as 200 million dollars in aid will be provided to the affected countries.”

Asked on CNN's Situation Room with Wolf Blitzer (8/4, 554K) if the White House is watching the Ebola outbreak closely, deputy national security adviser Tony Blinken said, “We're doing more than watching. We're surging support to the countries affected by this in West Africa, expertise, equipment, protective gear. Here at home, we're taking every precaution with the protections, protocols you've heard about, to make sure there's no problem here. It's more than watching. It's acting.” Asked if the outbreak will be on the agenda at the summit of African leaders being hosted by the President this week, Blinken said, “It will be on the agenda. With regard to that, we've taken every precaution. There's every protocol in place for that. But this summit is a very, very significant thing. This is the largest engagement of an American president with Africa in history.”

The Hill (8/5, Viebeck, 237K) also reports that White House press secretary John Earnest said yesterday the US “will not turn back flights from West Africa over concerns about the Ebola virus.” Said Earnest, “There are in place a lot of precautions to ensure the safety of the American public and the traveling public.”

The New York Times (8/5, Nossiter, Subscription Publication, 9.79M) reports from Sierra Leone that “enforcement of the government's tough new measures to contain Ebola” is “light,” coupling a “tough stance” with “loose enforcement that is deeply worrying to doctors and health care workers trying to stem the rapid spread of the virus.”

The Los Angeles Times (8/5, Board, 3.42M) editorializes, “West Africans must be persuaded to stop the burial custom that involves washing bodies. ... It's a matter of convincing desperately scared people – some ill, some not ill yet – that health workers who show up at their doors and sometimes take away loved ones are not angels of death but, in fact, the only chance they have of staying alive.”

David Muir reported in the lead story for ABC World News (8/4, lead story, 3:25, Muir) that there is “extreme caution across the country tonight” as doctors and emergency rooms are “on the look out for Ebola.” According to the CDC, “since the outbreak began, about a half dozen patients were tested right here in America.” Steve Osunsami added that “administrators at Mount Sinai in New York saying that they, too, might have a patient sick with Ebola. A male patient walked into their emergency room with a fever and gastrointestinal symptoms.”

The New York Times (8/5, Grady, Santora, Subscription Publication, 9.79M) reports hospital spokeswoman Dorie Klissas said that “to protect the patient's privacy the hospital was not making public his occupation, which country he had been in, whether he had been exposed to a patient with Ebola there, or whether he had close contacts like family members, friends or co-workers who were also at risk.”

Brian Williams reported in the lead story for NBC Nightly News (8/4, lead story, 3:15, Williams, 7.86M) that the man “had recently traveled to West Africa.” While officials “say Ebola is unlikely in this case,” this is “the kind of thing that's going to keep happening in this country. The New York incident one of nearly two dozen cases of

suspicion of Ebola symptoms in emergency rooms in this country in just the past week.”

Dr. Nancy Snyderman reported on NBC Nightly News (8/4, story 2, 2:05, Williams, 7.86M) that the New York case “highlights how much the American healthcare system and hospitals across the country are on heightened alert. ... The CDC chasing down 22 reports of possible Ebola cases in the United States, deemed four worth testing. The three results so far, false alarms. But the biggest concern remains West Africa. Ebola has been ravaging West Africa since March and shocked disease specialists when it hopped a border by plane. ... Dr. Negar Aliabadi is one of the CDC disease detectives deploying to the region.” Aliabadi: “It is a scary problem but that you know we are doing our best to get it under control over there, and to keep informed.”

Dr. Jon Lapook reported in the lead story for the CBS Evening News (8/4, lead story, 3:05, Pelley, 5.08M) that the NIH said Monday that Dr. Kent Brantly and Nancy Writebol “received an experimental serum called Z-Mapp, only previously tested in monkeys. ... The serum contains antibodies that prevents the virus from entering the cells in the body.” Lapook noted, however, that if Brantly “is improving, it’s unclear whether that’s from the serum, his own body fighting the infection or a combination.”

David Muir reported in the lead story for ABC World News (8/4, lead story, 3:25, Muir) that after being treated with the “experimental drug,” Brantly is “showing signs of improvement, communicating with his wife through a glass window.” Steve Osunsami added that the drug is said to be “working wonders after he was on the brink of death. Today we learned his fever is lower.”

Kate Snow reported in the lead story for NBC Nightly News (8/4, lead story, 3:15, Williams, 7.86M) that Brantly “received a second dose just yesterday.” In Africa, Nancy Writebol, who is due to arrive in the US on Tuesday, “was getting her second dose yesterday, too.” Both patients “patients will each have a room inside a special isolation unit at Emory. All the air in that unit is filtered and contained. Lab tests are done inside and any contaminated materials are cleaned of virus and incinerated.”

Dr. Richard Besser reported on ABC World News (8/4, story 2, 1:10, Muir) that the experimental serum given to Brantly and Writebol “contains three factors that go right after Ebola. It’s never been tested in humans.”

The Washington Post (8/5, Phillip, 4.06M) reports “a second American infected with the Ebola virus,” missionary Nancy Writebol, “will leave Liberia for the United States in the early morning hours on Tuesday.” The AP (8/5) also reports the story.

On its front page, the Washington Post (8/5, A1, Dennis, Bemstein, 4.06M) reports “there is no approved cure for Ebola and no proven vaccine to prevent the disease.” The Post adds that “part of the problem, beyond the difficulty in developing reliable treatments, has been a lack of interest from drug companies, given that Ebola has affected relatively few people compared with many other diseases.”

White House Video Omitted Jill Biden’s Statement On Ebola. The Washington Times (8/5, Swoyer, 465K) reports the White House yesterday released a video “documenting Vice President Biden’s wife, Jill, on her travels through Africa, particularly her latest stops in the Democratic Republic of Congo, Zambia and Sierra Leone, where the widespread Ebola virus has taken 273 lives.” In the video, Biden “talks about her meetings with African leaders to promote education and empowering women,” but “the video failed to include Mrs. Biden’s statement on the rising death toll of 887 from ‘the worst recorded outbreak of Ebola’ according to the World Health Organization, as reported by The Associated Press.”

EARNEST: OBAMA COULD ACT ON IMMIGRATION BY EARLY SEPTEMBER. The Daily Caller (8/4, Munro, 408K) reports that White House press secretary John Earnest “suggested” yesterday that President Obama “could announce executive action on immigration, including a possible amnesty-like distribution of work permits to several million illegal immigrants by early September.” Said Earnest, “Even if the president does take some executive action prior to Congress’ return, the president would be happy to have those executive actions superseded by passing the commonsense Senate immigration reform bill that passed more than a year ago.”

Democrats Launch Spanish-Language Web Ads Against Six Republicans. McClatchy (8/4, Lightman, Subscription Publication, 23K) reports Democrats “began running ads” on immigration “against six House of Representatives Republicans who represent districts where the issue appears to be crucial.” The GOP

lawmakers targeted are "Reps. Jeff Denham and David Valadao of California, Joe Heck of Nevada, Michael Grimm of New York, Steve Pearce of New Mexico and Mike Coffman of Colorado."

The Washington Times (8/5, Miller, 465K) also reports on the "Spanish-language web ad attacking Republicans." Said DCCC spokesman Josh Schwerin, "There's no question that if voters want comprehensive, bipartisan immigration reform, they need to send House Republicans home and elect Democrats who will make sure that we fix our broken system. ... At this point, the only obstacle to reform is Speaker John Boehner and the Republicans in Congress who keep supporting him."

With Surge Of Minors Apparently Slowing, US To Close Three Shelters. Scott Pelley reported on the CBS Evening News (8/4, story 9, 0:25, Pelley, 5.08M) that as the "surge of unaccompanied children from Central America entering the US illegally appears to be slowing down," and the Administration announced Monday that "it will close three emergency shelters, set up at military bases." The New York Times (8/5, Shear, Subscription Publication, 9.79M) notes HHS "officials...said the emergency shelters at the military bases were no longer needed." HHS said in a statement, "We are able to take this step because we have proactively expanded capacity to care for children in standard shelters, which are significantly less costly facilities. ... At the same time, we have seen a decrease in the number of children crossing the southwest border."

The AP (8/5, Caldwell) reports HHS spokesman Kenneth Wolfe said "a shelter in Oklahoma at Fort Sill is expected to close as early as Friday," while "shelters in Texas at Joint Base San Antonio-Lackland and in California at Naval Base Ventura County-Port Hueneme will wrap up operations in the next two to eight weeks." The Washington Times (8/5, Dinan, 465K) runs a similar report.

"Special Court Procedures" To Expedite Deportation Procedures. The New York Times (8/5, Semple, Subscription Publication, 9.79M) reports "immigrant advocacy groups were rushing on Monday to prepare for special new court procedures in New York City next week that will accelerate deportation hearings for newly arrived unaccompanied children from Central America." The Times adds that "under the new procedures, unaccompanied minors and families with children who entered the United States in recent months...will be moved to the front of the line to go before immigration judges," and "could be deported in a matter of months rather than years." The Times also reports that "in an email on Monday, a spokeswoman for the Justice Department's executive office for immigration review, or EOIR, which oversees the immigration courts, said: 'These steps include making docket adjustments, re-prioritizing certain case types and refocusing EOIR immigration court resources.'"

Kirk Urges Faith-Based Counseling For Young Immigrants Housed In Chicago. The Chicago Tribune (8/5, Perez, 2.19M) reports Sen. Mark Kirk said yesterday "his office launched an effort to connect young immigrants in the Chicago area with religious organizations and community groups on Monday, about a month after the Republican drew fire for demanding that children who've recently crossed the southern US border undergo criminal background checks." Said Kirk, "I want to make sure that these kids have the widest possible, faith-based network to fall back on while they're in detention."

IN STRATEGY SHIFT, PRESIDENT TAKING MORE QUESTIONS FROM MEDIA. Politico (8/4, Dove, Brown, 637K) reported that while the White House was once "so obsessed with message control that the president could go months without talking with the press corps," in the past seven weeks, the President "has taken questions an average of once a week." The change in media strategy "is part of a new White House effort to jolt its communications operation." Politico noted that the President "has been feeling isolated, aware that he's not breaking through to the public," and senior advisers "have noticed their message gets lost when the president holds what has amounted to quarterly formal press conferences." The White House "is going the other way." The President "isn't likely to hold any more open-ended, hour-long news conferences than he has in the past." Instead, "the pattern is for Obama to speak for 10 or so minutes and then take a few questions."

Cherlin Examines President's "Messy Relationship With The Press." In a piece for Rolling Stone (8/5, 6.27M), former White House speechwriter Reid Cherlin examines the President's "messy relationship with the press," noting that during his two presidential campaigns, the President "made a point of going over the heads of the media...and communicating directly with voters," and reported have complained that as President, "the approach has sometimes bordered on pathology." At the same time, the press corps, "under immense financial and technological pressure, is in the process of remaking itself to fit a polarized country where users increasingly

choose opinionated news sources that suit their own tastes." As a result, "the administration and the press are in essence tweeting past each other, even as each decries its treatment at the hands of the other." Cherlin notes that the White House "suspects that reporters intentionally sensationalize their stories; reporters suspect that the White House plays with the facts to get its message out. Both suspicions are correct."

Editorial Wrap-Up:

WASHINGTON POST. "Movement On Medicare." An editorial in the Washington Post (8/5, 4.06M) calls the slowing growth of Medicare "unexpected and unexplained good news," and argues that now is the time to address the program's sustainability. The Post notes that the CBO, the Simpson-Bowles deficit commission and others "have outlined incremental reforms that would make federal health programs more efficient and save tens of billions of dollars without radical systemic change."

"Unfinished Business In Burma." In an editorial, the Washington Post (8/5, 4.06M) urges Secretary of State Kerry, when he visits Burma next month, not to "treat the Southeast Asian nation as a democratic success story, which it emphatically is not." Despite "stirrings of reform,," adds the Post, "movement has been in the wrong direction," and "most worrying is that there has been no progress in rewriting Burma's constitution, which enshrines military control." Kerry "must make clear that relations cannot stay good unless reforms advance and citizens of every religion and ethnicity can live with dignity."

"Equality For Charter Schools." A Washington Post (8/5, 4.06M) editorial notes that study by the DC government found that "there were great disparities" in "how public money is appropriated to students in the city's traditional and charter schools." The Post argues that city officials "should be devising ways to make charters whole without hurting students in traditional schools," and, noting a lawsuit filed US District Court on behalf of DC public charter schools which says that the city "is in violation of a requirement that charter and traditional schools be funded by a uniform per-student amount annually," adds that "the time and resources that will be expended by both sides in court would be better directed at finding a solution that ensures fair treatment for every student."

NEW YORK TIMES. "Rule For The Marijuana Market." In a signed editorial for the New York Times (8/5, Subscription Publication, 9.79M), Vikas Bajaj considers how governments should "regulate the production and sale of" marijuana, noting that in addition to ensuring that minors do not have access to marijuana, a "good regulatory system" should "protect consumers from both dangerous and counterfeit products," and "undermine and eventually eliminate the black market for marijuana, which has done great damage to society." Bajaj adds that many state that legalize will adopt the Washington and Colorado model of "imposing strict rules and high taxes" on businesses that are licensed to grow, process, and sell marijuana. Bajaj argues that states must "stand ready to modify policies as legal marijuana markets evolve."

WALL STREET JOURNAL. "Abandoning The Kurds." In an editorial, the Wall Street Journal (8/5, Subscription Publication, 5.89M) calls for US military support for the Kurds, reports, longtime US allies. The Journal argues that if he does provide such support, President Obama will be sending a message that the US does not stand by its friends.

"Los Angeles Water-Gate." An editorial in the Wall Street Journal (8/5, Subscription Publication, 5.89M) notes the deterioration of Los Angeles' aging water system, and argues that if Mayor Eric Garcetti intends to keep his promise to fix the city's economy, he will have to repair its plumbing. The Journal suggests privatizing government services like water.

"Another Lousy Bank Bailout." In an editorial, the Wall Street Journal (8/5, Subscription Publication, 5.89M) criticizes the Banco Espirito Santo bailout, arguing that the arrangement unfairly spared senior bondholders, and that it reveals Europe has not yet done enough to reform its banking sector.

Mikulski (D-MD), Chairwoman of the Senate Appropriations Committee, will participate in a ribbon cutting to dedicate the new expansion of the Dr. Edward J. Poziomek Advanced Chemistry Laboratory at Aberdeen Proving Ground. With Suzanne Milchling, Director of Program Integration, Edgewood Chemical Biological Center Dale Ormond, Director, U.S. Army Research, Development and Engineering Command; Colonel J. Richard Jordan, Commander, U.S. Army Corps of Engineers Baltimore District . Location: The Dr. Edward J. Poziomek Advanced Chemistry Laboratory, 3400 Ricketts Point Road, APG Edgewood Area, Aberdeen Proving Ground, MD.

REP. VEASEY – IMMIGRATION – VICTIMS OF FRAUD — 11 a.m. Congressman Marc Veasey, national experts, and local activists will discuss H.R. 5228, the “Notario Victim Relief Act,” making the case for proposed legislation that will give victims of immigration fraud an unlimited time to refile their immigration related paperwork, permitting them to have an opportunity to reopen their cases and immigrate lawfully. Speaker: U.S. Representative Marc Veasey, TX-33; Laura Maristany, Director of Policy and Legislative Affairs, National Association of Latino Elected and Appointed Officials (NALEO) Educational Fund; Douglas Interiano, Executive Director, Proyecto Inmigrante, ICS, Inc.; Furqan Sunny Azhar, 2012-14 American Immigration Lawyers Association (AILA) TX/OK/NM Chapter Consumer Protection/UPL Coordinator; Maura Ramirez, Notario Fraud Victim (name has been changed to protect identity).

Last Laughs:

LATE NIGHT POLITICAL HUMOR.

Jimmy Fallon: “President Obama turned 53 years old today. So, happy birthday, Mr. President. Obama blew out his candles and made a wish. But when he opened his eyes, he was still president.”

Jimmy Fallon: “Some more news from the White House here. I heard that Joe Biden’s personal aide is leaving after eight years with the Vice President. When he heard his assistant was leaving, Biden said, ‘Guess I got to ditch the laces and switch to Velcro.’”

- + Late Night Political Humor.

DOI in the News:

SECRETARY JEWELL VISITS CARMEL TO SUPPORT LWCF. [WTHR-TV](#) Indianapolis (8/7, 218K) reports that Interior Sally Jewel visited Carmel on Thursday to help promote renewal of the Land and Water Conservation Fund. Jewell toured the Flowing Well Park with Carmel Mayor Jim Brainard. Speaking of the fund, she said, "We need it to be reauthorized, otherwise someone will take that money and spend it on their own pet project. This fund has helped communities across the country. Nearly every single county has benefited."

[WRTV-TV](#) Indianapolis (8/8, 209K) reports that Jewell said, "I appreciate Mayor Brainard's support for this innovative program that not only improves the quality of life for Indiana but also strengthens local economies like those in Carmel. As we look to the next 50 years, we need to fulfill the promise to the American people by fully and permanently funding the Land and Water Conservation Fund."

Also reporting on the story are the [AP](#) (8/6), the [Current In Carmel \(IN\)](#) (8/8, 39K), [WTIU-TV](#) Bloomington, IN (8/8, 3K), and [WDRB-TV](#) Louisville, KY (8/8, 167K).

Secretary Jewell To Visit New Mexico, Arizona. The [AP](#) (8/8, 234K) reports that Jewell's next stops will be in New Mexico and Arizona. She is scheduled to tour the Valle de Oro National Wildlife Refuge on Friday. On Saturday, Jewell will visit the South Mountain Park Visitor Center.

Coverage by the AP was also picked up by [KPHO-TV](#) Phoenix (8/8, 113K), [KRQE-TV](#) Albuquerque, NM (8/7, 14K), and [KTAR-FM](#) Glendale, AZ (8/8, 19K).

Advocates Call On Louisiana Lawmakers To Support Fund. The [Monroe \(LA\) News Star](#) (8/6, 107K) reports that "projects throughout Louisiana's Sportsman's Paradise — from Black Bayou Lake National Wildlife Refuge to Bemstein Park in Monroe — have benefited from financial support through the federal Land and Water Conservation Fund for 50 years." Advocates met with The News-Star's Editorial Board on Wednesday to discuss the fund. Doug Daigle of the Louisiana Hypoxia Working Group was joined by West Monroe environmentalist Dr. Michael Caire, Black Bayou and D'Arbonne refuge manager Brett Hortman, Black Bayou volunteer Bob Eisenstadt and Paul Davidson, director of the Black Bear Conservation Coalition. According to the article, "all of those who attended the meeting said they have been disappointed in the overall support from the state's congressional delegation, although they noted US Sen. Mary Landrieu, D-La., and US Rep. Cedric Richmond, D-La., as exceptions."

Outdoor Businesses Call For Funding. The [Salt Lake \(UT\) Tribune](#) (8/8, 470K) reports that the Outdoor Industry Association is "now calling on Congress to reauthorize the fund and invest a full \$900 million toward its mission of providing recreational access and acquiring land for conservation." According to the article, "some 85 businesses have so far signed a letter, which will be submitted to Congress on Sept. 3, the 50th anniversary of President Lyndon Johnson's signature on the enabling legislation."

Additional Coverage. Additional coverage was provided by the [Hendersonville \(NC\) Times-News](#) (8/8, 34K), the [Raleigh \(NC\) News & Observer](#) (8/6, 456K) and the [Carolina Public Press](#) (8/8).

FEDERAL OFFICIALS STILL WARY, DESPITE MILD FIRE SEASON. The [E&E Daily](#) (8/7) reports that "against the odds, this year's wildfire season has been the quietest in at least a decade." According to the article, "the relative calm has kept the Forest Service on sound fiscal footing compared with past years, when it quickly burned through all its wildfire funding and had to siphon money from nonfire programs." However, "agency officials warned that the situation could deteriorate rapidly, with dozens of fires currently burning uncontained on the West Coast and in Idaho and the potential for many more new blazes over the next few weeks."

Man Charged With Starting Rim Fire. The [AP](#) (8/7) reports that "a California man was charged Thursday with starting the state's third-largest wildfire, a 2013 blaze that charred hundreds of square miles of land in Yosemite National Park and the Stanislaus National Forest." According to the article, "a grand jury returned a four-count indictment against Keith Matthew Emerald, 32, alleging he started a campfire Aug. 17, 2013, in an area where fires were prohibited, and it spread beyond his control and turned into the massive Rim Fire."

Also reporting on the story are the [Los Angeles Times](#) (8/8, Mather, 3.42M) and [USA Today](#) (8/7, Welch, 5.76M).

Coverage by the AP as also picked up by the [Sacramento \(CA\) Bee](#) (8/7, 582K), [Fox News](#) (8/7, 6.72M), and the [US News & World Report](#) (8/7, 645K).

UTAH LAWMAKERS BLAST ENVIRONMENTALISTS PUSHING FOR DESIGNATION NEAR CANYONLANDS.

The [E&E Daily](#) (8/7) reports that "Utah's congressional delegation amped up its opposition to a national monument designation for 1.8 million acres of land surrounding Canyonlands National Park." According to the article, "the five Republicans of the delegation – Sens. Orrin Hatch and Mike Lee, as well as Reps. Rob Bishop, Jason Chaffetz and Chris Stewart – asked that President Obama ignore calls for him to use his power under the Antiquities Act to preserve the lands." They "contend that this effort is being led by 'fringe' environmental groups."

Also, the [Deseret \(UT\) News](#) (8/8, 538K) reports Sen. Orrin Hatch said Thursday that "his fellow senators who are

urging President Barack Obama to designate a new Greater Canyonlands National Monument should stop playing politics and 'keep their mitts off Utah.'" Hatch said "the 14 senators who signed the letter to the president are 'very ultra-liberal,' and while he considers them friends, they're getting involved in an issue that should be left up to Utahns." He said, "It all comes down to money. It's a good way to raise money from the environmental community. They should keep their mitts off Utah. They shouldn't be interfering with our state."

Also covering the story is the [Moab \(UT\) Times-Independent](#) (8/8).

Obama Urged To Ignore Calls For New Monument. The [Deseret \(UT\) News](#) (8/8, 538K) editorializes that the call "by some liberal senators in Washington to urge President Obama to summarily declare another wide swath of Utah as a monument" would "scuttle a collaborative process underway and deepen the gulf dividing many in Utah from the federal government." However, "only time will tell whether the president is wise enough to shun the path President Bill Clinton took in creating the Grand Staircase-Escalante Monument." It concludes that "such things may play well among some in Washington, but they have profoundly negative effects on the very meaning of representative government in this end of the country."

REPUBLICAN SENATORS PRESS INTERIOR TO OPEN ATLANTIC, ARCTIC TO DRILLING. [The Hill](#) (8/8, Barron-Lopez, 237K) reports that "a coalition of 21 Republican senators is urging the Interior Department to open up the Atlantic and areas of the Arctic to oil and gas development in its next five-year lease plan." The letter sent to Interior Secretary Sally Jewell states, "With our allies under threat, our friends under attack, and our enemies on the move, continued exploration and production of energy from federal lands in the United States is absolutely vital. Our offshore resources, which the Outer Continental Shelf Lands Act of 1953 declares 'should be made available for expeditious and orderly development,' are critical to this effort." The letter states "the new program should include the Arctic, Alaska's Atlantic and Cook Inlet, on top of areas that are currently open." On the other hand, "a group of 45 House Dems pressed Jewell to exclude parts of the Arctic off Alaska's coast from the five-year plan."

Also covering the story is the [National Journal](#) (8/8, Subscription Publication, 561K).

SENATORS QUESTION EFFORT TO EXPLORE NATIVE HAWAIIAN RELATIONSHIP. The [Hawaii Free Press](#) (8/8) reports that "a group of US Senators has sent a letter to the Secretary of the Department of the Interior (DOI), criticizing the recent Advanced Notice of Proposed Rulemaking (ANPRM) that explored the creation of a government-to-government relationship with the Native Hawaiian community." The letter, signed by Sens. Jeff Flake (R-AZ), Lamar Alexander (R-TN), Tom Coburn (R-OK), and Mike Lee (R-UT), "objects strongly to the Department's ANPRM on legal as well as prudential grounds." In the letter, they "reiterate the concerns about the constitutionality of a race-based government," and "then go on to question the DOI's authority to act in this matter and raise the issue of whether this is more properly the domain of the Congress."

MTV SHOWS COMMERCIAL FEATURING INTERIOR'S INSTAGRAM ACCOUNT. [Roll Call](#) (8/8, Subscription Publication, 76K) reports that MTV advertised the Instagram account belonging to the Interior Department, but "the only problem" was that "the department was completely in the dark about the commercial, until HOH tipped them off." The Interior Department tweeted, "You saw our Instagram on a commercial? We are not running TV ads anywhere in the US to our knowledge. Do you have more info?" According to the article, "the brief commercial — which flashes serene nature shots plucked from Interior's Instagram account while featuring a soothing, female voice — appears to have been created by MTV, since it ends with the station's logo in the corner."

INTERIOR AWARDS GRANT FOR IMPROVEMENTS TO ZEMURRAY PARK. The [Hammond \(LA\) Daily Star](#) (8/8, 30K) reports that "the City of Hammond has secured a \$250,000 grant from the Department of the Interior for more improvements to Zemurray Park." According to City Grants Administration Lacy Landrum, "the grant, plus a \$250,000 match from the city, will allow for a splash park, toddler playground, two family-sized picnic tables, an aeration system and a fishing station to be added to the park."

US URGED TO CRACK DOWN ON WILDLIFE TRAFFICKING. For the [National Geographic](#) (8/6, 42.25M), David J. Hayes, a Distinguished Visiting Lecturer in Law at Stanford Law School, writes that "leaders from both sides of the Atlantic gathered to discuss the major challenges and areas of current success in the fight against illegal wildlife trafficking and trade in Africa and beyond" during the US-Africa Leaders Summit in Washington, D.C. Hayes lists "the key issues and opportunities in this critical issue for people, the environment, and Africa's

future." He concludes that "the United States must tackle the wildlife trafficking crisis that is devastating elephant and rhino populations, while threatening other wildlife species and fueling insecurity and corruption throughout Africa and Asia."

America's Great Outdoors:

National Park Service:

LAWMAKERS HAVE COMPETING IDEAS ABOUT EXPANDING YOSEMITE. The [Sacramento \(CA\) Bee](#) (8/7, 582K) reports that Rep. Tom McClintock and Rep. Jim Costa are "at loggerheads over how to expand Yosemite National Park." They have competing bills, and "share some ideas," but "differ...on key questions, including whether to offset the park's growth by the sale of federal land elsewhere." According to the article, "the explicit differences, now that they are spelled out in legislative text, could theoretically accelerate negotiations toward a final deal," or, "they could yield stalemate, over mountainous land both sides agree meets Yosemite's high standards."

Coverage was also picked up by the [Merced \(CA\) Sun-Star](#) (8/7, 99K), the [Fresno \(CA\) Bee](#) (8/7, 322K), the [Charlotte \(NC\) Observer](#) (8/7, 544K), and the [Fort Worth \(TX\) Star-Telegram](#) (8/7, 550K).

BISCAYNE NATIONAL PARK MAY BAN FISH HARVESTS. The [AP](#) (8/8) reports that due to declining fish numbers, the NPS "wants to phase out commercial fishing" at Biscayne National Park. Officials say "ending commercial fishing there will improve the numbers and sizes of snappers, groupers, wahoo, mackerel and hogfish." However, "critics say federal officials are punishing fishermen for polluted runoff from the land that reduces water quality," and "they say closing off the park would devastate South Florida's commercial fishing industry, putting people out of work and putting more pressure on fisheries elsewhere."

Coverage by the AP was also picked up by the [Washington Post](#) (8/7, 4.06M), the [Sacramento \(CA\) Bee](#) (8/7, 582K), and the [Fort Worth \(TX\) Star-Telegram](#) (8/7, 550K).

PLAINTIFFS IN DRAKES BAY SUIT RAISES STATE'S RIGHTS ISSUE. The [Point Reyes \(CA\) Light](#) (8/8) reports that "the coalition of food purveyors suing the Department of the Interior over the ouster of Drakes Bay Oyster Company from the Point Reyes National Seashore is now alleging that the federal government had no right to kick the oyster farm out of Drakes Estero because of the state's property rights." The article notes that "a new business has also joined the plaintiff's ranks: Dixon Marine Services, an oceanographic and wetland restoration firm located in Inverness, which says it heavily relied on shell from Drakes"

TOURIST CRASHES DRONE AT YELLOWSTONE NATIONAL PARK. The [E&E Daily](#) (8/7) reports that "a tourist crashed a drone into a hot spring at Yellowstone National Park, officials said." According to park officials, "the drone's operator flew the unmanned aircraft into the Grand Prismatic Spring last weekend, where it remains submerged in 160-degree water." Officials said "they are working to remove the drone from the hot spring."

Also covering the story are the [Washington Post](#) (8/7, Berman, 4.06M), [USA Today](#) (8/7, Hughes, 5.76M), and [Reuters](#) (8/8).

GRAND CANYON SQUIRREL KICKER STIRS UP PUBLIC ANGER. The [E&E Daily](#) (8/7) reports that "authorities believe the chances of catching a scantily clad man who kicked a squirrel off the edge of the Grand Canyon are slim, but the man who caught the act on a video that stirred up public anger said he is hopeful." The article notes that "the video, which YouTube has since taken down under its policy prohibiting videos depicting animal abuse, prompted many outraged emails and phone calls to park rangers." And "with the squirrel kicker facing up to six months in jail and a \$5,000 fine," animal rights group People for the Ethical Treatment of Animals on Wednesday "offered a \$15,000 reward for information leading to an arrest and conviction."

NPS SELECTS RECIPIENT OF CONCESSIONS CONTRACT AT GRAND CANYON. [KCSG-TV](#) St. George, UT (8/8, 43) reports that the NPS has "selected DNC Parks & Resorts at Grand Canyon, Inc., a subsidiary of Delaware North Companies, Inc., to provide a variety of visitor services at Grand Canyon National Park for the next 15 years." Park Superintendent Dave Uberuaga said, "Delaware North Companies has successfully operated

the Grand Canyon Village Market providing grocery, food service and retail operations to park visitors and the Grand Canyon Community for 15 years."

1914 RELIEF MAPS SHOWS "PANORAMIC VIEWS" OF SIX NATIONAL PARKS. Slate Magazine (8/7, 14.77M) shows USGS relief maps, "published circa 1914 by the Department of the Interior," which "offer 'panoramic views' of several of the young national parks."

Bureau of Land Management:

EXCAVATORS WORKING IN WYOMING CAVE. The AP (8/7) reports on the work to excavate Natural Trap Cave. Brent Breithaupt, a paleontologist for the BLM, said, "It's an incredible site. It definitely is one of the most significant sites that BLM manages and it will provide very, very important information." The article notes that "scientists hope the cave's high humidity and temperatures that never top the 40s might even preserve genetic material of extinct animals from the days when massive ice sheets last frosted over much of the North American landscape."

Coverage by the AP was also picked up by the Washington Post (8/7, 4.06M), the US News & World Report (8/7, 645K), WFMJ-TV Youngstown, OH (8/8, 30K), WTVT-TV Tampa, FL (8/8, 50K), and CKTB-AM Niagara, CAN (8/8).

PROGRAM ALLOWS AT-RISK YOUNG ADULTS TO LEARN JOB SKILLS, HELP SAGE GROUSE. The Reno (NV) Gazette-Journal (8/7, 166K) reports that "the Nevada desert near Austin has become a classroom this week for at-risk young adults who are learning job skills while helping that state's fragile sage grouse population." The youths are members of this year's crew in the Bootstraps Program. According to the article, "now in its 10th year, the award-winning program pays men and women ages 18-25 to work for six months removing pinyon pine and juniper trees to support more favorable habitat for sage grouse as well as a mule deer and other wildlife." The program was started by the Cooperative Extension and the BLM's Battle Mountain District Office, and was "one of only 20 programs nationwide to receive the 2013 Partners in Conservation Award from the US Department of the Interior for achievements in conservation of natural resources."

Fish and Wildlife Service:

SENATORS QUESTION IVORY BAN. The E&E Daily (8/7) reports that Sens. David Vitter and Kirsten Gillibrand on Wednesday "joined the ranks of lawmakers questioning the scope of a ban on ivory sales with a letter asking the Fish and Wildlife Service to outline its decision-making process." Vitter and Gillibrand, in their letter to FWS Director Dan Ashe, ask to "work with you to find a path forward that advances the protection of the species without unintended consequences." They write, "We fully support strong efforts by the United States government to stop the ivory poaching crisis and prevent the importation of poached ivory into the country. However, there are questions that remain with regard to how the Director's Order and the new regulations that are being developed will affect interested parties in our states."

Also providing coverage is The Hill (8/8, Devaney, 237K).

Study Suggests All Ivory Markets Must Close. The Science Daily (8/8, 104K) reports that "to save elephants, all ivory markets must close and all ivory stockpiles must be destroyed, according to a new peer-reviewed paper by the Wildlife Conservation Society." The study says that "corruption, organized crime, and a lack of enforcement make any legal trade of ivory a major factor contributing to the demise of Africa's elephants."

FWS AIMS TO GIVE TRIBES MORE CONTROL OF NATIONAL BISON RANGE COMPLEX. The E&E Daily (8/7) reports that the FWS is "moving forward with plans to give local tribes more control of Montana's National Bison Range Complex, despite misgivings from environmentalists and some of its own employees." The agency has "tried for more than a decade to hammer out a workable agreement with the Confederated Salish and Kootenai Tribes (CSKT)." This week, the FWS "released the draft environmental assessment for its third attempt – a proposed Annual Funding Agreement that would hand over most of the range's day-to-day responsibilities to the tribes, with oversight from the agency's refuge manager."

COLORADO, UTAH GOVERNORS SUPPORT SAGE GROUSE LISTING DELAY. The E&E Daily (8/7) reports that the governors of Utah and Colorado on Wednesday “signaled support for delaying the Obama administration’s decision on whether to protect the greater sage grouse, a move they argued would buy time for states to implement conservation plans that could preclude the need for federal protections.” Colorado Gov. John Hickenlooper and Utah Gov. Gary Herbert discussed the FWS’ pending September 2015 listing decision at the Colorado Oil and Gas Association’s annual energy summit. Hickenlooper said, “It’s quite possible another year would make a huge difference.” Herbert “expressed frustration that the federal government had rejected Utah’s plan for preserving the bird, which he insisted would shield 94 percent of sage grouse from development while allowing reasonable oil and gas activity.”

PLANTS TO BE ADDED TO ENDANGERED LIST. The Tennessean (8/8, 363K) reports that “two rare wildflowers in Tennessee long considered at risk for extinction will be added to the federal endangered species list.” The FWS announced that “Short’s bladderpod, a yellow flower that grows on steep and rocky glades along rivers in Middle Tennessee, is set to be added to the list in September.” The article notes that “the other Tennessee species is the whorled sunflower, a long-stemmed yellow flower that grows along roadsides and near train tracks in Madison and McNairy counties.” In addition, “a flower native to Alabama — the fleshy-fruit gladecress with yellow-orange or white-yellow flowers — will also be listed.”

WILDLIFE TROPHIES SEIZED BY US CUSTOMS AGENTS. KNTV-TV San Jose, CA (8/8, 114K) reports that “a menagerie of confiscated wildlife game trophies headed overseas from the Port of Los Angeles were shown Wednesday before being distributed to schools, zoos and university collections.” According to the article, “when US Customs agents opened a shipping container headed for the Philippines on July 23, they were greeted by a whole host of creatures, including a mounted baboon, bobcat and African antelope head.” Customs officials then contacted the FWS “who took control of the haul, which is worth thousands.”

SEN. MORAN WARNS THAT LISTING LESSER PRAIRIE CHICKEN WILL IMPACT KANSAS INDUSTRIES. In an op-ed for the Hutchinson (KS) News (8/8, 2K), Sen. Jerry Moran writes that listing the lesser prairie chicken has “real consequences for a number of Kansas industries.” In order “to avoid the lesser prairie chicken’s threatened species designation,” Moran has been “working with colleagues across the aisle over the past two years.” Moran remains committed to working with FWS and the Kansas Department of Wildlife, Parks and Tourism to “make certain the measures implemented are based on sound science and common sense, as well as represent the best interest of producers.”

US Geological Survey:

USGS TO BEGIN DRILLING “SENTINEL” WELLS NEAR NEW MEXICO AIR FORCE BASE. The WaterWorld (8/8, 96) reports that starting Thursday, scientists from the USGS will be “drilling ‘sentinel’ wells at the first of three locations in the Trumbull Village neighborhood in the city of Albuquerque, N.M., to provide early alerts for groundwater contamination.” According to the article, “these new sentinel wells will provide early warning if there is a northeastward movement of the Kirtland Air Force Base Bulk Fuels Facility plume and would provide Albuquerque Bernalillo County Water Utility Authority (ABCWUA) and Air Force officials lead time to implement plans to protect nearby groundwater drinking water supply wells.”

Securing America’s Energy Future:

Renewable Energy:

OBAMA ADMINISTRATION PUSHES FOR SOLAR POWER. The New Yorker (8/8, 5.3M) reports on the efforts of the Obama Administration “to develop solar-energy plants on public lands.” The BLM “couldn’t change the high cost of solar energy, but officials thought that they could address two other big hurdles to solar development: the potential environmental damage and the financial risk for investors.” The article notes that “in 2012, it came up with what it called the Western Solar Plan.” Now, in 2014, “solar power has grown faster than any other energy source except natural gas (which has experienced a fracking boom).” Obama has directed the BLM “to approve enough renewable-energy projects to power four million homes by 2020.”

BIRD GROUP PROPOSES REVISIONS TO EAGLE “TAKE” RULE. The E&E Daily (8/7) reports that “a leading

bird conservancy group has submitted a detailed plan to the Fish and Wildlife Service that includes revisions to its hotly debated eagle 'take' rule that allows wind and other energy projects to injure, kill or disturb bald eagles for up to 30 years." The American Bird Conservancy's "18-point plan, outlined in a formal comment letter sent" Wednesday to FWS, "also calls for adopting mandatory conditions for siting wind projects instead of the current voluntary guidelines that the group says in the letter are 'hindering FWS' ability to do its important job of protecting our nation's public trust resources, including its ecologically-important native birds and bats." The group's "recommended plan also calls on the service to require an independent third party to conduct environmental assessments of proposed wind projects, and for the service to devise and implement an independent 'monitoring system' to document 'post-construction' bird and bat deaths."

OFFICIALS CELEBRATE FEDERAL GRANT FOR WIND FARM OFF ATLANTIC CITY. The Press of Atlantic City (NJ) (8/8, 200K) reports that "a wind farm off Atlantic City is \$47 million closer to reality as local and state officials celebrated a federal loan for the long-gestating project." In an appearance Thursday at Steel Pier, Sen. Robert Menendez, said, "The Fishermen's Energy Atlantic City wind farm has the potential to become the first ... wind project in the United States. And that could potentially make Atlantic City the birthplace of offshore wind in America."

Onshore Energy Development:

REPORT: INCREASING BLM ONSHORE RENTAL RATES WOULD GENERATE \$56 MILLION ANNUALLY.

The E&E Daily (8/7) reports that "a new report by a nonpartisan government watchdog group concludes that increasing the rental fee that oil and natural gas companies pay to hold onto non-producing leases on public lands would generate tens of millions of dollars for taxpayers – a finding the industry strongly rebukes as misleading." The Center for Western Priorities report, titled "A Renter's Market: Outdated Oil and Gas Rental Rates Fail Taxpayers," says that "modernizing" the BLM's "oil and gas rental rates, which at \$1.50 per acre have not been updated since 1987, would generate about \$56 million annually." The report also states that "increasing the fee would discourage companies from stockpiling unused oil and gas leases, which according to BLM currently total nearly 7,000 idle drilling permits."

Democrats Favor Higher Royalties For Oil And Gas On Public Lands. The Hill (8/8, Cama, 237K) reports that Democrats in the US House are urging the Interior Department "to prioritize increasing royalty rates for oil and gas development on federal land." In a letter signed by 43 Democrats to the Interior Department's assistant secretary for lands and minerals management Janice Schneider, they wrote, "Appropriate rental and royalty rates for onshore oil and gas leases help ensure that states, the U.S. Treasury and all American taxpayers receive their fair share from the nation's oil and gas boom."

Additional Coverage. Also covering the story are Politico (8/8, Guillén, 637K) and the Pagosa (CO) Daily Post (8/8).

TRIBES EARNED ALMOST \$1 BILLION IN ROYALTIES FOR ENERGY DEVELOPMENT IN 2013. The Nation Sun News (8/8) reports that "tribes and individual Indians earned \$971 million in royalties for energy development on their lands in fiscal year 2013, according to data from the Interior Department." According to the Office of Natural Resources Revenue, "oil development makes up the bulk of the revenues – \$677 million." Meanwhile, "gas brought in more than \$130.2 million while coal brought in \$78.1 million."

Tribe Proposes Fee On "Flaring" Natural Gas. The AP (8/7) reports that "tribal leaders on an American Indian reservation in the heart of North Dakota's booming oil patch are proposing fees for companies that burn and waste natural gas." The Three Affiliated Tribes "outlined its plan to impose fees in a six-page document sent to oil companies." In the plan, the tribe said "companies would be required to pay royalties for 'flaring' natural gas to compensate for lost revenue when the gas isn't brought to market and sold."

GROUP LAUNCHES NEW GREATER SAGE GROUSE PUBLIC INFORMATION CAMPAIGN. The Oil and Gas Journal (8/8, 1K) reports that "listing the greater sage grouse as an endangered species under the federal Endangered Species Act would discourage effective local and state conservation efforts while stifling economic growth and job creation, the Western Energy Alliance said in a new public education campaign." Jack R. Ekstrom, WEA chairman, said, "We are running this ad campaign to educate westerners about the greater sage

grouse and the threats on the horizon to local economies." The article notes that "the campaign consists of online and radio ads running from August through October across the West including Colorado, Montana, New Mexico, North Dakota, Utah, and Wyoming."

ARCH COAL SUBSIDIARY WINS ENVIRONMENTAL AWARD. The World Coal (8/8) reports that Arch Coal has announced that Vindex Energy Corp. has "received the 2013 Excellence in Reforestation regional award from the Appalachian Regional Reforestation Initiative (ARRI)." Thomas Shope, regional director of the Interior Department's Office of Surface Mining, said, "Vindex's efforts truly represent the best of the best in using the Forestry Reclamation Approach."

OKLAHOMA DRILLERS SUED FOR 2011 QUAKE SWARM. The E&E Daily (8/7) reports that "almost three years after earthquakes rocked Sandra Ladra's living room in central Oklahoma, she's taking two energy companies to court." Ladra this week "filed a complaint in Oklahoma state court against New Dominion LLC and Spess Oil Co., both based in Oklahoma, for using wastewater injection wells that may have caused a cluster of earthquakes in late 2011." Ladra was "injured when rocks fell from her fireplace during the quakes and is now suing the drillers for personal injury and punitive damages." The article notes that "the lawsuit is the first to follow the 2011 earthquake swarm, which scientists and government officials have linked to nearby wells used to store wastewater after oil and gas production."

COLORADO GOV. HICKENLOOPER AVOIDS POSITION ON KEYSTONE XL PIPELINE. The E&E Daily (8/7) reports that Colorado Gov. John Hickenlooper's "unscripted comments" Wednesday "on the Keystone XL pipeline sparked a firestorm on social media and drew heavy criticism from his Republican gubernatorial opponent." Hickenlooper told a group of oil and gas executives at an energy summit in Denver, "I've avoided taking a position [on Keystone] because it's just going to p*ss off a lot of people in Washington that I don't need to piss off." He added, "My opinion is not going to change anybody's opinion" in Washington, D.C. The comments were "posted on Twitter and quickly caught the attention of former US Rep. Bob Beauprez, the GOP nominee for governor and a supporter of the controversial pipeline project." Hickenlooper is "far too concerned with what other people think," Beauprez told The Durango Herald. He continued, "What Coloradans want to know is this: Where do you stand, and will you stand up for us?"

Offshore Energy Development:

NEW TECHNOLOGY OPENS THE WAY FOR OFFSHORE FRACKING. The Hill (8/8, Barron-Lopez, 237K) reports that only recently has new technology enabled large-scale offshore fracking projects to become possible. Oil services companies are expected to profit from their expertise in the difficult process, and major companies such as Chevron, Shell and BP could "make billions in extra revenue because of greater crude oil output."

Tackling America's Water Challenges:

PRICE OF WATER JUMPS DUE TO CALIFORNIA'S DROUGHT. Bloomberg News (8/8, Vekshin, 2.76M) reports that water for farmers in California's Central Valley is "now going for as much as \$2,200 an acre-foot, an increase of more than 800 percent" from last year. According to the article, "in times of drought, the system creates winners—the heirs of the miners and ranchers who built the state—and losers, including farmers without rights, who find their place in the state's \$44.7 billion agricultural industry threatened by deals for natural resources cut more than 100 years ago." The California Department of Water Resources, "which manages water in the state's rivers, says it expects to deliver only 5 percent of the almost 4 million acre-feet requested this year by public water agencies," and the BOR, "citing critically dry reservoirs, announced that senior rights holders would still get 65 percent to 75 percent of the water they requested."

BOR WILL WAIT TO EVALUATE BEFORE REMOVING SEDIMENT FROM LAKE ESTES. The Estes Park (CO) Trail-Gazette (8/8, 13K) reports that the BOR "sent a letter to the Town of Estes Park on Wednesday essentially saying that it does not plan to remove any sediment from Lake Estes caused by last September's flood until it has thoroughly assessed the situation." To that end, BOR Area Manager Jacklynn Gould is "suggesting that a technical meeting be held in a few weeks with the Town of Estes Park, the Upper Thompson Sanitation District, the Estes Valley Recreation and Parks District, and the Colorado Department of Public Health and Environment to identify issues and discuss ways to collaboratively mitigate flood effects in Lake Estes." Estes Park Town

Administrator Frank Lancaster on Thursday said, "We're pleased to hear the Bureau of Reclamation will be reaching out to the community partners to discuss the Lake Estes issues. Evaluating recovery options together to determine the best solution for the community and all agencies involved is a logical first step."

ADDITIONAL COVERAGE OF BAY DELTA CONSERVATION PLAN. Additional coverage of the Bay Delta Conservation Plan was provided by the Camarillo (CA) Acorn (8/8, 79K) and the Moorpark (CA) Acom (8/7, 33K).

INTERIOR'S DECISION TO NOT PREVENTIVELY RELEASE TRINITY RIVER WATER CRITICIZED. In an op-ed for the Eureka (CA) Times Standard (8/8, 76K), Regina Chichizola, an advocate for the Klamath River, writes that "last week federal officials at the Department of the Interior announced that, unlike in previous years, they will not preventively release Trinity River water from Lewiston Dam to avoid a Klamath River fish kill." According to Chichizola, "this unscientific process will take at least four days and will likely lead to a large-scale salmon die off." She argues that "it is unacceptable that junior water right holders hundreds of miles away are getting water while the salmon die."

Empowering Native American Communities:

ONE DEAD IN CRASH ON UTE RESERVATION. The Salt Lake (UT) Tribune (8/8, 470K) reports that "public safety dispatchers confirm the fiery crash of a car early Thursday morning on eastern Utah's Ute Indian Reservation claimed one life." According to the article, "the crash, near Whiterocks in Uintah County, occurred just after midnight when the car reportedly crashed into a tree outside a home." The sheriff's office, tribal police and the BIA were "jointly investigating the crash, but no other details — including the identity of the victim — were immediately available."

Additional coverage was provided by the Deseret (UT) News (8/8, 538K), the Ogden (UT) Standard-Examiner (8/7, 86K), and KSL-TV Salt Lake City (8/8, 1.07M).

Top National News:

OBAMA AUTHORIZES "TARGETED AIRSTRIKES" TO PROTECT US PERSONNEL, AVOID "GENOCIDE" IN IRAQ. President Obama's announcement that he had authorized "targeted strikes" and a campaign of humanitarian aid in Iraq, received largely positive media reviews. Obama's televised remarks came too late to be noted on the network newscasts — all three of which had led with stories about the President weighing the US reaction to the alarming developments in Iraq. Noted in virtually all reports on Obama's televised address are his strict qualifications for any US military involvement in Iraq this time around: Reuters (8/8, Spetalnick) reports Obama said he had authorized airstrikes only "if necessary," and the AP (8/8, Pace, Burns) notes the US will use force "if Islamic militants advance toward American personnel," or to prevent "genocide" against defenseless Iraqi minorities.

USA Today (8/8, Jackson, Michaels, 5.76M) reports that while "the president's announcement Thursday amounts to a significant escalation of involvement in the growing Iraqi crisis...Obama attempted to assure the American public that it would not lead to US involvement in a ground war there." The New York Times (8/8, Cooper, Subscription Publication, 9.79M) notes that Obama "declared that he had run for the presidency in part to end America's involvement in the Iraq war, and he repeated his promise that the United States would not send ground troops back to that country." Said the President, "I will not allow the United States to be dragged into fighting another war in Iraq." As the Washington Post (8/7, A1, DeYoung, Morris, 4.06M) reports on its front page, Obama then added categorically, "American combat troops will not be returning to fight in Iraq."

However, USA Today (8/8, Jackson, Michaels, 5.76M) reports the President said to Iraqis facing prosecution from ISIL forces, "Today, America is coming to help." Obama explained he was acting because "innocent families face the prospect of 'genocide'" and the US "cannot turn a blind eye." McClatchy (8/8, Kumar, Subscription Publication, 23K) notes that Obama "said he is consulting with the United Nations and other countries" on the situation in Iraq, where "people" fleeing ISIL's atrocities "are starving and children are dying of thirst," while the National Journal (8/8, Koren, Subscription Publication, 561K) says that tonight, "White House officials are making the rounds by phone, informing members of Congress about their plans on the crisis." Meanwhile, the AP (8/7) reports the White House "was in contact throughout Thursday with some lawmakers, including House Speaker

John Boehner...and Senate Minority Leader Mitch McConnell.”

The Washington Times (8/8, 465K) and the Daily Caller (8/8, Bordelon, 408K), which reported Obama authorized the airstrikes “reluctantly,” run similar accounts of the President’s remarks.

In an analysis piece, the New York Times (8/8, Baker, Subscription Publication, 9.79M) reports that “to longtime opponents of the Iraq war, the president’s decision represented a step back down a dangerous path.” Phyllis Bennis, “a scholar at the Institute for Policy Studies,” said last night, “This is a slippery slope if I ever saw one.” But Rep. Adam Smith disagreed, saying, “I don’t think this is a slippery slope; this is an isolated circumstance.” Former ambassador to Iraq Ryan Crocker defended Obama’s decision, “This is about America’s national security. ... We don’t understand real evil, organized evil, very well. This is evil incarnate.”

Politico (8/7, Ewing, 637K) reports “Administration officials made clear that Thursday’s actions hadn’t changed the basic outlook on Iraq, which must form an inclusive government in order to bring the crisis to a final end.” Defense Secretary Hagel said in a statement, “An enduring solution to the persistent threat posed by ISIL will require further reconciliation among Iraqi communities and strengthened Iraqi security forces.”

The Los Angeles Times (8/8, Cloud, Parsons, 3.42M) notes that “in a statement issued shortly before Obama spoke, Pentagon officials said that US planes had” already “dropped ‘critical meals and water for thousands of Iraq citizens threatened’ by the fighters in a mountainous area near the Iraqi town of Sinjar.” On its website, TIME (8/7, Miller, 24.1M) quotes an unnamed “senior defense official” who said the humanitarian mission “was conducted by a number of US military aircraft under the direction of US Central Command.”

The CBS Evening News (8/7, lead story, 3:00, Pelley, 5.08M) reported in its lead story that the President had “ordered the US military it to begin flying in humanitarian aid.” CBS (Martin) added Obama was weighing “calls for airstrikes to halt the advance of militants who are reported to be just 25 miles from the Kurdish city of Erbil, where some 150 American military advisers, plus an unknown number of diplomats, have been operating.”

NBC Nightly News (8/7, lead story, 3:30, Miklaszewski, 7.86M), meanwhile, noted that with ISIL forces “poised just outside of Erbil...one senior US military official” told NBC, “We’re not going to let them take it.” ABC World News (8/7, lead story, 3:15, Muir, 5.84M) similarly reported that “ABC News has learned the US military is poised and ready to strike against militants in Iraq.” ABC World News (8/7, story 2, 0:55, Karl, 5.84M) later reported that “the thing weighing most heavily on the President...as he met with his national security team...at the White House is the terrorist threat to that city of Erbil, and that’s because...there are Americans there.”

Yesterday afternoon, as the President pondered his options, the Los Angeles Times (8/7, Lauter, 3.42M) noted that White House press secretary Josh Earnest said the President “will not be sending combat troops back” to Iraq. Reuters (8/8, Coles) noted Earnest also said a potential US military intervention would be “very limited in scope,” because “there are no American military solutions to the problems in Iraq.” The AP (8/8, Pace, Burns), Bloomberg News (8/8, Alwan, Nasser, Fam, 2.76M), USA Today (8/8, Jackson, Michaels, 5.76M), Politico (8/7, Ewing, 637K), The Hill (8/8, Wong, 237K) and Washington Times (8/8, Wolfgang, Taylor, 465K), among other news outlets, posted similar reports on Obama’s deliberations.

The Los Angeles Times (8/8, Cloud, Parsons, 3.42M) reports that “in recent days, more than 100,000 members of the Yazidi sect fled towns in the north that were taken over by fighters from the Islamic State.” The Yazidis, “as well as many Christians, moved north into Kurdish-held areas of Iraq to escape the militants,” but “about 40,000 remain trapped on Mt. Sinjar and are in extremely dire circumstances, according to Kurdish officials and international relief groups.” The US “airdrops are designed to deliver emergency supplies to those refugees.” The Wall Street Journal (8/7, Barnes, Malas, Subscription Publication, 5.89M) notes that Earnest said of the refugees, “They are unable to access food and water. ... They don’t have any access to shelter. They have fled persecution, and efforts to leave the mountain are blocked by ISIL [Islamic State] forces who are threatening to kill them. This is a terrible humanitarian situation.”

The CBS Evening News (8/7, story 2, 2:25, Pelley, 5.08M) reported that operating under their “vicious military version” of Islam, ISIL is “committing mass murder among Shiite Muslims and other faiths as the march towards their goal of overthrowing the Iraqi government.” Bloomberg News (8/8, Alwan, Nasser, Fam, 2.76M) notes ISIL “has used beheadings to intimidate people in its advance across Iraq and Syria and has terrorized religious

minorities." The group considers the Yazidis "apostates under its fundamentalist interpretation of Islam."

NBC Nightly News (8/7, story 2, 2:05, Engel, 7.86M) reported that instead of pushing toward Baghdad, ISIL forces have "entered into a part of Iraq that is its cultural heartland – where a lot of Christians are, where a lot of Yazidis are, and they have been terrorizing people."

AFP (8/8, Ibrahim) reports ISIL fighters yesterday "moved into Qaraqosh, Iraq's largest Christian town, and surrounding areas on Wednesday night after the withdrawal of Kurdish peshmerga troops." AFP notes that "Tal Kayf, the home of a significant Christian community as well as members of the Shabak Shiite minority, also emptied overnight."

ISIL, says the Washington Times (8/8, Chumley, 465K) reports, has "taken over churches in northern Iraq, yanked down crosses, burned manuscripts and sent thousands of Christians fleeing with little more than the clothes on their backs." Pope Francis "has called on the international community to help the Christians in Iraq."

Afternoon NYTimes Report Led To DOD Denial. As the Huffington Post (8/7, Gordts, 11.54M) reported, in a story on Thursday afternoon – which was subsequently updated to note DOD's denial – the NYTimes had reported on its website that US forces had already "bombed targets in Iraq." In an updated report, the New York Times (8/8, Cooper, Subscription Publication, 9.79M) later said that "airstrikes on towns in northern Iraq seized by Islamist militants" did indeed begin "late Thursday," though the Pentagon "firmly denied that" US forces were behind them. Echoing the Times' reporting that some sort of bombing was underway, McClatchy (8/7, Prothero, Subscription Publication, 23K) also said "jet aircraft attacked Islamic State positions outside the town of Kalak, 25 miles northwest of Irbil." McClatchy cites "a resident of Kalak" as its source, and suggests the strikes may have been carried out by Iraqi forces.

Reuters (8/8, Ryan) noted that Rear Admiral John Kirby, a DOD spokesman, said on Twitter, "Press reports that US has conducted airstrikes in Iraq completely false. ... No such action taken." AFP (8/7) reported that Iraq's UN ambassador, Ali Al-Hakim, also "denied" the story, saying, "There is no strike being done yet."

ISIL Takes Control Of Mosul Dam. Adding to the panic in Iraq, the Washington Post (8/8, A1, Morris, 4.06M) reports that in a statement yesterday, "the Islamic State listed more than a dozen military gains it had made over five days, and claimed to have taken control of the Mosul Dam, the largest hydroelectric dam in the country." The New York Times (8/8, Rubin, Arango, Subscription Publication, 9.79M) cites "residents near the dam and officials in the region" who confirmed ISIL is now in control of it. The AP (8/8, Yacoub, Salama) also confirms the development, adding that control over the Mosul dam gives ISIL "control of enormous power and water resources and leverage over the Tigris River that runs through the heart of Baghdad." The Los Angeles Times (8/8, McDonnell, 3.42M) runs a similar story.

Former US ambassador to Iraq and to the UN Zalmay Khalilzad, writing in the Washington Post (8/6, 4.06M), says of ISIL's progress, "Should it capture and control the Mosul dam – Iraq's largest – the Islamic State would hold hostage the precious water supply of millions of Iraqis. If it decided to destroy the dam, it could put people as far south as Baghdad at risk of deadly flooding. Just the threat of doing so would give the extremists much leverage." The Kurdish and the Iraqi governments "urgently need more substantial assistance," and "the situation...is extraordinarily urgent."

US Intelligence Concerned About ISIL Threat To US Homeland. Brian Todd reported on CNN's Situation Room (8/7, 554K) that US intelligence officials say they have "growing concern the Islamic State, also known as ISIS, will expand its capability, expand what it's doing in the territory it holds right now and possibly direct attacks towards the West possibly, eventually towards US interests. ... The more immediate concern is about the ISIS threat to Europe and what that might mean for what one official called a threat to the US homeland." Todd noted that there are "urgent calls tonight for the US to help contain the ISIS threat. ... US officials acknowledge they are sharing intelligence with Kurdish force but they insist any US military assistance would be channeled through the Iraqi government in Baghdad."

Sen. Lindsey Graham said on CNN's Situation Room (8/7, 554K) that "we have to do something. The time has passed just to do nothing. About three weeks ago, I asked General Dempsey a very pointed question: is there any force within the region that could contain or defeat ISIS that represents a direct threat our homeland without

American air power assistance and he said no. So that's the dilemma we have. If you believe these people are a threat to our homeland, which I do, there's no way to deal with them without American air power. There's nobody in the region that can do that without American air power. That's where we find ourselves."

Security Council Calls For Aid To Iraq. Reuters (8/8, Nichols) reports the UN Security Council yesterday condemned ISIL's violence yesterday. AFP (8/8) notes that in a statement, the council urged "the international community to support the government and the people of Iraq and to do all it can to help alleviate the suffering of the population."

The Christian Science Monitor (8/7, Arraf, 566K) reports that in an interview, Gyorgy Busztin, the deputy special representative in Iraq of the UN secretary general, said ISIL militants "are hunting down and killing large numbers of minority Yazidis, acts which amount to genocide." Said Busztin, "We believe that what they have done may be classified as genocide and a crime against humanity."

NYTimes, WSJournal Weigh In. In an editorial written before the President's televised address, the New York Times (8/8, Board, Subscription Publication, 9.79M) urges Obama to seek "a broader strategy that involves Saudi Arabia, the Arab League and the United Nations, just to start," but also says "it became impossible for" the US "and other civilized nations to ignore" the "catastrophe" in Iraq, and that "it was not surprising to see reports that the United States was dropping food supplies in northeast Iraq and that...Obama also was considering carefully targeted airstrikes against ISIS targets."

In its editorial, the Wall Street Journal (8/8, Subscription Publication, 5.89M) puts the blame for the humanitarian crisis in Iraq on Obama and what it sees as his disastrous decision to withdraw all US troops from the country. Beyond that, the Journal calls for US strikes and casts Obama's decision as inevitable.

NO DEAL YET ON EXTENDING GAZA CEASE-FIRE AS DEADLINE LOOMS. The CBS Evening News (8/7, story 5, 1:45, Pelley, 5.08M) reported that the "three-day cease-fire in Gaza expires in two hours," and with no agreement to extend the truce in place, Hamas has threatened "to resume firing rockets as soon as the deadline passes. Israel says it will fire back."

The Wall Street Journal (8/8, Jones, Fitch, Mitnick, Subscription Publication, 5.89M) reports Israeli and Palestinian negotiators held a second day of talks in Cairo Thursday to reach a deal extending three-day cease-fire that expires Friday morning. Israel has expressed a willingness to prolong the truce, but Hamas hasn't yet agreed.

AFP (8/8, Little) reports that "fears rose" Thursday that fighting could resume as the talks "entered a final nine-hour stretch and Palestinians accused Israel of stalling." According to the AP (8/8, Hendawi, Michael), Hamas has "rejected Israeli demands it disarm and threatened to resume its rocket attacks if its demands" to lift the blockade of Gaza were not met. The "hard-line stance" voiced by "a senior Hamas official at the group's first rally" since the cease-fire took effect Tuesday, "signaled" the Cairo talks are "not making headway."

The Washington Post (8/8, Raghavan, 4.06M) reports Hamas officials rallying in Gaza "vowed Thursday to never give up arms and to reignite war if Israel does not accept its demands to lift an economic blockade of the Gaza Strip." While talks are still ongoing in Cairo, "little headway has been made, according to diplomats."

Bloomberg News (8/8, Ben-David, Ramadan, 2.76M) reports that a "spokesman for Hamas' armed wing told al-Jazeera there would be no truce extension unless Israel lifts an eight-year blockade of its land crossings and port." According to the AP (8/8, Casert), a European proposal is "gaining traction: Develop Gaza's port to reopen the besieged territory to the rest of the world...with international monitors assuring that no weapons get through."

REUTERS/IPSONS POLL: 63% BELIEVE ILLEGAL IMMIGRANTS ARE AN ECONOMIC BURDEN. The Christian Science Monitor (8/7, Swan, 566K) notes that a Reuters/Ipsos (8/8, Bell) poll released on Thursday found that "some 70 percent of Americans and 86 percent of Republicans believe that undocumented immigrants threaten traditional US beliefs and customs," while "nearly two-thirds of respondents – 63 percent – said that undocumented immigrants place undue burden on the US economy." The Monitor also notes that 45% said "the number of immigrants allowed to legally enter the country should be reduced," while "only 17 percent said they thought that number should increase."

DHS Announces Steep Drop In Border Apprehensions Last Month. The Washington Times (8/8, Dinan, 465K) reports that the Department of Homeland Security has announced that while “more than 10,600 unaccompanied children were apprehended at the border in June,” in July “that dropped to 5,508” – and while “16,330 adults with children” were “caught in June” that “dropped to 7,410” last month. According to the Times, those numbers are “significant turnarounds that put the rate closer to what it was in the late spring — still on target for a record year, but not as much as was once feared.” According to the Times, Homeland Security Secretary Jeh Johnson “said outreach by” President Obama and Vice President Biden “may have helped,” although others attribute the drop to the summer heat.

Paul Set To Travel To Guatemala; Christie Will Visit Mexico Next Month. The New York Times (8/7, Barbaro, Subscription Publication, 9.79M) reports that some “likely contenders for the 2016 Republican presidential nomination are...delivering pointed and personal overtures to the native countries from which millions of Hispanic Americans have immigrated.” According to the Times, Sen. Rand Paul is “about to set off for Guatemala, where he will put his ophthalmology training to use by treating local patients with eye disorders,” and “meet with President Otto Pérez Molina” regarding the “conditions that have prompted thousands of Guatemalan children to flee.” The Times also reports that in September, New Jersey Gov. Chris Christie will travel to Mexico “to meet with the country’s new president, court its corporate titans and mingle with its cultural leaders.” The Times notes that Christie’s trip was “organized by two prominent, well-connected Republican hands — Clifford M. Sobel, a former United States ambassador to Brazil and major Republican campaign donor, and Robert E. Grady, a former Bush administration official.”

Krauthammer Notes Liberal Critics Of Potential “Amnesty-By-Fiat.” Charles Krauthammer, in his column for the Washington Post (8/7, Krauthammer, 4.06M) notes the speculation that President Obama might issue “an executive order essentially legalizing an enormous new class of illegal immigrants, perhaps up to 5 million people.” According to Krauthammer, “this is an idea so bad and so persistently peddled by the White House that it has already been preemptively criticized by such unusual suspects as (liberal) constitutional law professor Jonathan Turley, concerned about yet another usurpation of legislative power by the ‘uber presidency,’ and The Post editorial page, which warned that such a move would ‘tear up the Constitution.’” Krauthammer contends that the President is considering “amnesty-by-fiat to deliberately court impeachment.”

Editorial Wrap-Up:

NEW YORK TIMES. “Preventing A Slaughter In Iraq.” In an editorial written before the President’s televised address, the New York Times (8/8, Board, Subscription Publication, 9.79M) urges Obama to seek “a broader strategy that involves Saudi Arabia, the Arab League and the United Nations, just to start,” but also says “it became impossible for” the US “and other civilized nations to ignore” the “catastrophe” in Iraq, and that “it was not surprising to see reports that the United States was dropping food supplies in northeast Iraq and that...Obama also was considering carefully targeted airstrikes against ISIS targets.”

“Russia Sanctions Itself.” The New York Times (8/8, Subscription Publication, 9.79M) argues in an editorial that the “tit-for-tat sanctions that Russia has imposed against the West” will “hurt Russians far more than they will hurt Westerners.” While “many producers in these countries will feel the loss of \$30 billion in food exports to Russia,” the “overall effect on their large and diversified economies will be marginal.” On the other hand, Russia “imports about 40 percent of its food needs in terms of value, and the Russian agriculture minister has acknowledged that the sanctions would cause a spike in inflation.”

“The N.C.A.A.’s Nod To Reality.”

WASHINGTON POST. “A Wave Of Cybercrime.” The Washington Post (8/7, 4.06M), in an editorial, says Congress “has been wrestling with legislation to bolster the private sector’s cyberdefenses in collaboration...without much to show for it” although “promising legislation is on offer in both the House and Senate.” The Post encourages members of Congress to make progress on the legislation when they “return after the summer recess.”

“Libya Is Collapsing.” In an editorial, the Washington Post (8/8, 4.06M) says it is “not hard to foresee eastern

Libya becoming a launching pad for terrorist attacks against nearby Europe or even the U.S. homeland," and argues that the US and the West bear responsibility for the situation. The Post argues that the Administration "has done its best to ignore Libya's collapse," as Administration officials "continue to peddle the empty line that 'Libya's challenges can really only be solved by the Libyans themselves,' as Secretary of State John F. Kerry put it this week."

"Open Governance At UVA."

WALL STREET JOURNAL. *"The Jihadist March In Iraq."* In an editorial, the Wall Street Journal (8/8, Subscription Publication, 5.89M) puts the blame for the humanitarian crisis in Iraq on Obama and what it sees as his disastrous decision to withdraw all US troops from the country. Beyond that, the Journal calls for US strikes and casts Obama's decision as inevitable.

"Safe In Putin's Arms." In an editorial, the Wall Street Journal (8/8, Subscription Publication, 5.89M) notes that Russia this week ordered American Jennifer Gaspar, the wife of prominent Russian human rights lawyer Ivan Pavlov, and their five-year-old daughter to leave the country, but yet allowed Edward Snowden to stay in the country.

"No Good Rescue Goes Unpunished." The Wall Street Journal (8/8, Subscription Publication, 5.89M) editorializes that the recently announced settlement between the Justice Department and Bank of America, which could see the bank paying as much as \$17 billion, is an unfair penalty for the bank, which the Journal argues was only taking responsibility for problems that Federal officials should have dealt with in 2008 during the nation's financial crisis. The Journal notes that the bank has already paid out about \$60 million in mortgage settlements, more than any other bank, and is now being punished by Federal officials for taking over failing financial institutions during the crisis and assuming responsibility for their debts.

U.S. Department of the Interior Weekly Cabinet Report
August 8, 2014

Direct Message to the President

Dear Mr. President –

The visit by African leaders this week provided a great opportunity for bilateral meetings and a robust session on the devastating impact of illegal wildlife trafficking in elephants, rhinos and other endangered animals from Africa. Universally, there was respect and appreciation for your Executive Order and the cross-agency, NGO and stakeholder effort to work collectively to address both the demand and supply sides of this complicated issue. It was clear from the discussion that our African friends are becoming increasingly aware of the importance of conserving these species to their long term economic and cultural prosperity. It was also clear that, like us, they had political challenges making the case for resources to combat poaching that are often competing with critical human service needs. I am particularly proud of my colleagues at the US Fish and Wildlife Service for their direct engagement, grants and technical assistance to support efforts on the ground to reduce the supply and catch and prosecute those perpetuating the market. Our partners at State and Justice have been critical in these efforts.

Warmly,

Sally

Announcements - Presidential Priorities

Climate/Energy: Next week, BOEM and BSEE expect to send a joint proposed rule to OIRA that addresses offshore oil and gas activities on the Alaska Outer Continental Shelf. The rule will promote safe, responsible, and effective drilling activities and include requirements related to oil spill response plans and operating in the challenging Arctic environment. [This was in last week's report]

On August 12, BSEE Director Salerno will deliver opening remarks at the Ocean Energy Safety Institute (OESI) Forum on Data Sharing in Houston, TX. Director Salerno's remarks will focus on the need for companies to overcome barriers to sharing information they collect regarding equipment reliability and performance across the industry and with BSEE. The OESI forum will include participation from offshore oil and gas companies, industry trade associations, federal government representatives and academia. This is the second forum to be hosted by the OESI.

On August 14, USGS will release 2010 estimated California water use data that will be made available through an interactive website.

Jobs/Economy: On August 11, construction of employee short-term housing in Dickinson, ND, will commence. Housing is for both BLM and USFS employees and is located on 10-acres of BLM land transferred from the BOR. The U.S. Air Force will undertake construction of the access roads, utilities, pads, and infrastructure needed for up to 10 mobile housing units.

ACA Implementation:

Immigration:

My Brother's Keeper:

VA Backlog:

Principals' Schedules

On August 11, Secretary Jewell will cohost a Quadrennial Energy Review (QER) roundtable with Secretary Moniz in Santa Fe, NM. This is part of a series of listening sessions Energy Secretary Moniz kicked off related to the QER to discuss and receive public feedback on issues related to the development of a comprehensive strategy for the infrastructure needed to transport, transmit and deliver energy to consumers.

On August 12, the Secretary is tentatively scheduled to participate in a wildfire event in Redding, California.

On August 13, Secretary Jewell and FWS Director Ashe will announce the first ever Urban Refuge Challenge funding recipient. The funding from FWS (\$1 million per year) will enhance their plans to more fully engage people from culturally diverse backgrounds in conservation and outdoor recreation. The announcement may be combined with the announcement of six new urban wildlife partnerships around the country.

On August 15, the Secretary is scheduled to meet with the Board of the National Park Foundation in Acadia National Park in Maine. While in the park, she will also tape a short segment in recognition of the 50th Anniversary of the Wilderness Act with ABC's *Sunday Show* program.

On August 11, Director Jarvis will participate in an event in Chelmsford, MA to highlight a \$248,000 stateside LWCF grant for improvements to the town's Varney Playground.

On August 11, FWS Pacific Regional Director Robyn Thorson will attend a public meeting on the proposed expansion of the Pacific Remote Islands Marine National Monument on Oahu, HI.

Items of Note

On August 11 and 13, FWS will hold public hearings in Pinetop, AZ and Truth or Consequences, NM (respectively), on proposed changes to the Mexican wolf recovery program 10(j) rule and the associated draft Environmental Impact Statement.

On August 12, FWS will announce it is withdrawing the proposed rule to list the population of the North American wolverine that occurs within the contiguous U.S. as a threatened species under the ESA. The associated 4(d) and 10(j) rules for the wolverine will also be withdrawn. [This was in last week's report]

On August 14, FWS will propose to designate critical habitat for the yellow-billed cuckoo across nine states (Arizona, California, Colorado, Idaho, Nevada, New Mexico, Texas, Utah, and Wyoming) as well as publish a notice of availability of a draft economic analysis of the designation. This rule may garner attention due to the

size of the designation and perceived impacts to water use. FWS proposed to list the cuckoo as threatened in October 2013. [This was in last week's report]

Next week, USDA, FWS, and EPA may announce that USDA Agricultural Research Service (ARS) has developed a bacterial suppressant to combat cheatgrass, the most pervasive threat to the sage-grouse in the Great Basin. Research indicates the strain of bacteria, known as ACK55 and patented as "Battalion Pro," is effective and safe, but it won't be through the approval process for an estimated 12-17 months. A *Bloomberg News* report discussing ACK55 is expected soon. FWS is coordinating with USDA-ARS on outreach.

30-60 Day Look-Ahead

On August 18, Secretaries Jewell and Duncan will travel to the Passamaquoddy Reservation near Bangor, ME and tour Beatrice Rafferty School.

On August 19 Secretary Jewell will travel to Minnesota to tour the Bug-O-Nay-Ge-Shig School.

August 19-21, the Deputy Secretary is tentatively scheduled to travel to New Orleans. While there he would attend the BOEM's oil and gas lease sale, have a tour of an offshore oil platform, and participate in a conservation event with Senator Landrieu. The lease sale will offer 21 million acres offshore Texas for oil and gas exploration and development that will include all available unleased areas in the Western Gulf of Mexico Planning Area.

On August 19, BOEM will offer nearly 80,000 acres offshore Maryland for commercial wind energy development in a competitive lease sale. Sixteen companies have qualified to participate in the auction for the Maryland Wind Energy Area. According to analysis prepared by the Department of Energy's National Renewable Energy Laboratory, if fully developed, the Maryland Wind Energy Area could support between 850 and 1450 megawatts of commercial wind generation, enough electricity to power 300,000 homes.

The week of August 18, the National Park Service will announce 9 new National Historic Landmark designations, 1 boundary revision and 2 withdrawal designations. Properties are located in MA, LA, ME, NJ, FL, MI, IN and VT.

On August 20, the Department may issue a Secretarial Order identifying key guiding principles that bureaus and the Department should follow to ensure that we are fulfilling our trust responsibility to Indian tribes and Indian beneficiaries. At that time, the Department will also respond to recommendations provided by the National Commission on Indian Trust Administration and Reform on the Department's management and administration of trust assets. The Secretary is tentatively scheduled to travel to Indian country to make these announcements along with Vince Logan, the newly confirmed Special Trustee. The Secretary would also use this event to mark a milestone on the Department's priority goal to take 500,000 acres of land-into-trust in Indian Country. This is a key priority to advance self-determination and promote economic development.

August 24-27, the Deputy Secretary is tentatively scheduled to travel to Arizona and Boise, ID. While there he would participate in an event with former Secretary Kempthorne to celebrate the conclusions of the Snake River Basin Adjudication in Idaho, and celebrate the signing of another Western Watersheds Enhancement Project MOU in Arizona.

In August, Interior may announce that it will provide new work and training opportunities for youth across the country by funding approximately 21 new youth corps projects on federal lands. Funding for these projects comes from more than \$2M that has been raised to date by DOI from the private sector—donated by companies like American Eagle Outfitters, CamelBak, and the Campion Foundation. Many of these corps projects will hire and train boys and young men of color and each project will teach job skills and increase connections to nature, so that young people and veterans can not only accomplish meaningful work and gain important professional skills, but they can also build a lifelong connection to the outdoors. These projects are varied and diverse—from restoration efforts on the Los Angeles River and Gateway National Recreation Area in New York City, to creating conservation crews at Navajo High School in Arizona and supporting Veterans Green Corps in Sangre de Cristo Mountains, Colorado. These 21 new projects are in addition to the more than 450 projects happening in National Parks, on urban refuges, and throughout tribal lands—projects that will offer work experiences to more than 14,000 young people this year.

In August, Reclamation may release a West-Wide Climate Impact Assessment Report for the Sacramento-San Joaquin Basins. The Impact Assessment Report will describe future projections of water supply and demand under climate change, and potential impacts to existing water and power operations and infrastructure in the basin. The Report's conclusions will inform ongoing planning efforts, including the Sacramento-San Joaquin Basin Study, which was initiated in 2013 and is focused on identifying strategies to adapt to or mitigate climate change impacts to basin water supplies.

In August, the National Park Service may receive an application for a right-of-way from the Alaska Industrial Development and Export Authority for a new 220 mile "road to resources" development in northwest Alaska. This new road includes a 20 mile section that will cross the Preserve portion of Gates of the Arctic National Park and Preserve. The park's enabling legislation (ANILCA) clearly states the NPS shall grant a right of way for such a road upon receipt of an application.

In August, Reclamation will post two funding opportunity announcements (FOA) for the Desert and Southern Rockies Landscape Conservation Cooperatives (LCC). The FOAs will fund studies and projects in the two LCCs to study and mitigate the effects of climate change, drought, and wildfires.

In August, the Office of Surface Mining and Reclamation and Enforcement expects to promulgate a final rule to provide limited liability protection from lawsuits for certified states and tribes carrying out approved abandoned mine reclamation. Certified states and tribes are those that have completed reclamation of all known coal-related abandoned mine problems within their jurisdictions (currently Louisiana, Montana, Texas, Wyoming, the Crow Tribe, the Hopi Tribe, and the Navajo Nation).

In August, the NPS intends to publish a proposed gathering rule, which would provide the authority for permitting the gathering of plant resources within units of the National Park System by members of federally recognized Indian tribes, as defined in the rule. The proposed rule would apply to Indian tribes with traditional associations to specific park units. It would be implemented through agreements between NPS and Indian tribes and subject to permits which would be issued annually. This rule change would provide reasonable, resource protection based use of park resources while assisting to support the continued lifeways of American Indian tribes. Consultation with Indian tribes nationwide indicates that the approach in the proposed rule would be constructive and respectful of tribal sovereignty while continuing to respect the NPS mission to protect and conserve park resources.

In August, the Secretary will announce the first ever Urban Refuge Challenge funding recipient, which will receive \$1 million-a-year funding from FWS. The funding will enhance their plans to more fully engage people from culturally diverse backgrounds in conservation and outdoor recreation.

In August, FWS may publish a proposal to list the African lion as threatened throughout its range under the ESA. FWS will also publish a special rule for African lions requiring that imports of lion trophies receive prior authorization or permits under the ESA. This action may be controversial and attract attention from the animal rights community and the sport-hunting community.

In August, the BLM expects to publish the Proposed Rule on Wind and Solar ROWs. The rule establishes competitive leasing processes for ROWs in order to receive fair market value and promote the use of preferred areas for solar and wind energy development on public lands. The BLM published an Advance Notice of Proposed Rulemaking in Dec. 2011; the 60-day comment period ended in Feb. 2012. OMB is reviewing the proposed rule.

In August, BOEM will hold several scoping meetings for the Five Year Program.

In August, BOEM will initiate a rulemaking process, through the issuance of an Advanced Notice of Proposed Rulemaking, aimed at ensuring the financial integrity of lessees and operators on the OCS, and reducing the risk of taxpayers bearing the costs of decommissioning OCS facilities.

In mid-August, Kenai NWR will propose a temporary closure of sport hunting of brown bears on the refuge to extend through the fall 2014 and spring 2015 seasons. The refuge is considering this action in response to recent changes in Alaska's state sport hunting regulations that have resulted in significant reductions in the Kenai Peninsula's brown bear population. FWS and the state are working to reconcile the differences in management objectives but are unable to reach agreement in the short term, thus the need for the temporary closure. Opportunities will be provided for the public to comment on this proposed closure. This action will most likely attract media attention.

In August, FWS anticipates proposing to designate critical habitat and draft economic analysis for the Rufa red-knot, a migratory bird that travels from the arctic to the coasts of southern Chile and Argentina through 37 states, Puerto Rico and the Virgin Islands. FWS expects the proposal to garner attention due to its size and perceived impacts to the horseshoe crab harvest and coastal land use. The Rufa red knot was proposed to be listed as threatened in September 2013 with climate change identified as a threat to its survival.

In the next several months, BSEE expects to have its blowout preventer proposed rule ready for review by OIRA. Interest from industry, other nongovernment organizations, and the media is expected.

On September 3, Sec. Jewell will celebrate the 50th Anniversary of the Wilderness Act. Location and details of the event are still being worked out.

On September 5, Sec. Jewell has been invited to speak to the Society for Environmental Journalists annual conference, which is being held this year in New Orleans, LA. The theme of the conference is risk and resilience, with a heavy emphasis on disaster response.

WEEK-AHEAD REPORT: Office of the Deputy Secretary
August 4 - 8, 2014

Highlights of Travel, Meetings, and other Public Events

Buy-Back Program for Indian Lands. In mid-June, the Buy-Back Program issued a third set of offers (“Wave 3”) to individuals who own fractional interests on the Pine Ridge Reservation. Offers were sent to 3,124 landowners. The Program also extended the time period of offers previously sent to landowners on the Pine Ridge Reservation. To date 33,615 offers have sent to landowners at the Pine Ridge, Rosebud, Makah and Fort Belknap Reservations. Since the inception of the Program, nearly 10,900 landowners have accepted offers. The total number of sales have reached nearly \$91 million and nearly 252,000 acres purchased.

US Army Corps of Engineers Strategic Leaders Conference. On Wednesday, August 6, I will speak at the USACE Strategic Leaders Conference. The conference is focusing on how we can get the best value out of our strategic engagement. I will be speaking to them about the current relationship between DOI and USACE and how we can facilitate a better one in the future.

Indian Water Settlement Study Recommendations. On Thursday, August 7, I will meet with the working group on the Indian Water Settlement study recommendations. LETTY??

Puget Sound Tribal Treating Fishing Rights: Letty will be joining others from SOL and DOJ in meeting next Monday, August 11, with the four tribes (sequentially – not all together) that have requested that we file litigation to enforce their treaty-based fishing rights in rivers that feed into Puget Sound (Squaxin Island, Swinomish, Lummi, and Nooksack). We will be updating the tribes on our investigation of legal avenues for enforcing their fishing rights. Letty and SOL folks will also be meeting with scientists at USGS regarding their work on Puget Sound fisheries.

Hualapai-Freeport Water Settlement legislation: Letty and the Secretary's Indian Water Rights Office are working closely with DOJ, Freeport Mining Company, the Hualapai Tribe, and Senator Flake's office to reach a final agreement on a bill enacting this partial Indian water settlement (S. 2503) during the August recess. Since this legislation requires no appropriations, it could advance this fall.

Public Announcements

Tuesday, August 5

A Buy Back Program media notice will be issued as a reminder to landowners on the Rosebud Reservation.

Friday, August 8

An initial set of offers from the Buy Back Program for Quapaw Tribe will be issued to landowners.

MEMORANDUM

August 5, 2014

TO: Secretary Jewell
FR: Interior Communications
RE: Media Report

I. Personal Message to the Secretary

Sally,

We are gearing up for another busy few weeks on the road and it has been a full team effort to coordinate the upcoming LWCF push. After the four-state swing on LWCF, we are highlighting three other priorities with events on energy, fire and youth in New Mexico and California.

Unbeknownst to either of us when we planned it, Jessica and I are then both off to Alaska with our mothers later this month. We are both very much looking forward to some down time without cell reception.

-Blake

II. Highlights of Travel, Meeting, Speeches, and other Public Events:**Wednesday, August 6**

- NORTH CAROLINA: LWCF Event in Asheville with Senator Burr to discuss the LWCF's contribution to preserving working lands, ranches and forests

Thursday, August 7

- INDIANA: LWCF Event in Carmel with Mayor James Brainard to discuss LWCF's contribution to urban parks, clean water, outdoor recreation and healthy economies
- BOEM: NORTH CAROLINA: Area Identification Offshore Wind note to stakeholders

Friday, August 8

- NEW MEXICO: LWCF Event in Albuquerque with Senators Heinrich and Udall to celebrate the final land acquisition for the Valle de Oro National Wildlife Refuge
- FYI: Assistant Secretary Schneider to QER meeting in North Dakota

Saturday, August 9

- ARIZONA: LWCF Event in Phoenix with Mayor Greg Stanton to discuss the LWCF's contribution to urban parks, outdoor recreation and healthy economies

Monday, August 11

- NEW MEXICO: QER meeting in Santa Fe with Secretary Moniz
- NPS: LWCF event with Director Jarvis in Chelmsford, Massachusetts

Tuesday, August 12

- CALIFORNIA: Redding fire visit
- FYI: NPS: National Historic Landmark announcements; Dir. Jarvis in Maine

Wednesday, August 13

- CALIFORNIA: \$1 Million grant announcement to SoCal Refuge Complex

Friday, August 15

- MAINE: Remarks at Schoodic Institute
- INTERVIEW: *This Week with George Stephanopoulos* on the Wilderness Act

III. Digital Strategy Report

- Recorded two videos with the Secretary: one in support of the Department's Multi-cultural Day event later this month and one for The Wilderness Society's dinner celebrating the 50th Anniversary of the Wilderness Act.
- Passed 300,000 followers on Instagram, 206,000 on Twitter, and 52,000 on Facebook.

Federal officials, lawmakers to tour to promote conservation fund

The Hill // Timothy Cama // August 4, 2014

Interior Secretary Sally Jewell will join lawmakers and local officials to tour the country this week to promote the Land and Water Conservation Fund and push for its reauthorization.

50 years of a law that works

Everett (WA) Herald // August 3, 2014

Inspired legislation — like airline cuisine, a laugh-test flunker — found expression a half century ago. 2014 marks the 50th anniversaries of the Civil Rights Act and the National Wilderness Act. It's also the anniversary of a little-known funding tool, the Land and Water Conservation Fund, which has boosted outdoor recreation, preserved cultural resources and conserved wild places for this generation and generations yet unborn.

SECRETARY JEWELL PRAISES PARTNERSHIPS IN PENNSYLVANIA MINE-TO-GARDEN PROJECT

Pittsburgh Botanic Garden opens, aims to showcase region's national history

Pittsburgh Post-Gazette // Stephanie McFeeters // August 2, 2014

Hills ravaged by strip mining now stand adorned with more than 500 dogwood trees, a Bookworm Glen and veteran-built birdhouses. A cornfield that once fed work mules, then grew wild with weeds and brambles, has been converted into a rolling meadow, thick with butterflies. Acid mine drainage seeps beneath the ground, then flows through a limestone water treatment facility into a lotus pond.

Pittsburgh Botanic Garden celebrates grand opening after 2 decades of work

Pittsburgh Business Times // Justine Coyne // August 1, 2014

Greg Nace said he came to Pittsburgh to open a botanic garden, but he found himself in the coal business. Sitting on abandoned mining land, the location of the Pittsburgh Botanic Garden faced challenges related to acid-mine drainage and mine subsidence, but the founders also saw opportunity.

SECRETARY JEWELL HOSTS DIALOGUE ON COMBATING WILDLIFE TRAFFICKING

[US, African leaders turn to business at summit](#)

New Vision // August 5, 2014

WASHINGTON - US and African political leaders and corporate chiefs will get down to business Tuesday as Washington hopes an historic summit will trigger a surge in trade and investment between the two sides.

[Kikwete arrives in US for leaders' Summit](#)

Daily News (TZA) // August 2, 2014

President Jakaya Kikwete arrived on Friday for the USA African Leaders' Summit which is expected to bring together more than 40 Heads of State and governments from across the continent.

DEAL ANNOUNCED FOR COLORADO RIVER BASIN CONSERVATION

[Deal inked to save Colorado Water](#)

Las Vegas Review Journal // Henry Brean // August 1, 2014

Water suppliers from the four largest communities served by the Colorado River have finalized an agreement to prop up the drought-stricken river by paying cities, farms and industrial operations to cut their use.

WEEK-AHEAD REPORT: CONGRESSIONAL AND LEGISLATIVE AFFAIRS

August 11 – August 15

Personal Message to the Secretary

The House will not be in session next week for the August recess.

The Senate will not be in session next week for the August recess.

Highlights of Travel, Meetings, and other Public Events

This week, Stephenne met with Senator Wyden's staff and the BLM regarding the Oregon Resource Management Plan (RMP). This was a follow up to the last conversation on the O&C bill with the Senate Energy and Natural Resources Staff.

Items of Note/Expected Legislative, Legal, Policy Issues

WEEK-AHEAD REPORT: OFFICE OF INTERGOVERNMENTAL & EXTERNAL AFFAIRS (OIEA)

August 4 - August 15, 2014

Highlights of Travel, Meetings, and other Public Events

On Monday, Aug. 4, Francisco and Steven participated in an interagency Affordable Care Act meeting hosted by Cabinet Affairs to discuss the 2015 enrollment period beginning this November.

Starting Tuesday, Aug. 5, John is staffing you for your LWCF events across the country.

On Saturday, Aug. 9, Francisco will be advancing your trip to Phoenix with Mayor Stanton for site visits of Steele Indian School Park and Encanto Park.

WEEK-AHEAD REPORT: SPECIAL ASSISTANT FOR ALASKA AFFAIRS

Aug. 5-15, 2014

Message to the Secretary

August is bringing the usual amount of DC travelers to AK. We are assisting our Budget Office in making arrangements for travel for Senate and House Approps staffers which include tours of the proposed oil developments in NPR-A. We are expecting AS Schneider the last week of Aug.

I have also been working with Tommy and SOL on (b) (5)

Highlights of Travel, Meetings, and other Public Events

Wednesday, August 6. I travel to North Slope with House Appropriation Committee staffers.

Thursday, August 7. I travel to Seward for Kenai Fjords NP tour with House staffers.

Public Announcements

None.

Major Press Inquiries

None.

Items of Note/Expected Legislative, Legal, Policy Issues

Wainwright DEW line station legislation. Rep. Young has introduced legislation authorizing the sale of an abandoned DEW line station near Wainwright, AK to the Wainwright village corporation, Olgoonik. There is a potential hearing on the bill in September. Meanwhile our SOL is providing drafting service to Senator Begich on a similar bill. The site is in the process of being cleaned-up by the Air Force, and BLM has no objections to the transference.

Court lets CD-5 wetlands permit stand. The District Court refused to vacate the Corps permit for the CD-5 development within the NPR-A but has asked to the Corps to respond by August 27 as to whether or not a supplemental EIS is needed. Construction is well underway for the CD-5 project to which Conoco's proposed Greater Mooses Tooth (GMT1) project is linked. An SEIS is currently underway on GMT1 by BLM.

Cape Wind Litigation

Pursuant to the court's order of July 29, NMFS and FWS filed on August 1 a notice of filing Administrative Record/Certifications related to their actions on remand. On the same day, the PEER plaintiffs filed their notice of violations of the ESA.

Regulation of Firearms in DC

On July 29, the court stayed until October 22 its ruling that the District of Columbia's total ban on the carrying of handguns in public was unconstitutional. Because the possession of firearms in NPS units in DC incorporates DC law, the Solicitor's Office is carefully monitoring developments in the district court litigation striking down DC's ban on carrying openly and concealed pistols or other dangerous weapons in public.

WEEK-AHEAD REPORT: FISH AND WILDLIFE AND PARKS

August 5, 2014

Optional Message to the Secretary

This is my last weekly report. We are completing transition materials with points of contact on each matter, and we have put in place an extensive filing system with all the back up documents for reference. We have also provided briefings to senior leadership on several matters, including Gulf restoration. On top of that, our office moved last week, so we've been busy.

Today I chaired my last meeting with the historic preservation officers from each of the DOI bureaus. We talked about the links between historic preservation and the new initiatives on enhancing Indian education. We will invite Monty to the next meeting to explore opportunities.

I'm making one last trip to the Gulf this week to tie up "loose ends" -- with the understanding that we still have years, if not decades, of work ahead.

All in all, my experience at Interior has been nothing short of extraordinary. I have learned a great deal, and I leave with renewed admiration and respect for the front line professionals who dedicate their careers to responsible resource stewardship.

I wish you the very best as you continue to lead this wonderful institution into the 21st Century. Please let me know if I can ever be of assistance to you while I'm at DOD or otherwise.

All the best,

Rachel Jacobson

Highlights of Travel, Meetings, and other Public Events

July 29: The Senate Commerce Committee held an oversight hearing on the RESTORE Act and its implementation. Senators Landrieu, Vitter, Nelson, Boxer, Rubio and Wicker all expressed concern with ongoing delay, including the lack of Treasury regulations governing the expenditures from the Gulf Coast Trust Fund, as well as the RESTORE Council's failure to develop a funded priority list. Deputy Secretary of Commerce Bruce Andrews testified for the Administration and noted that the RESTORE Council would begin soliciting project proposals next month with a goal of getting an initial suite of projects funded in 2015.

Michael Bean provided the initial draft of what became the Statement of Administration Policy on HR 4315, a bill to amend the Endangered Species Act in a variety of ways, including by designating any scientific information submitted by a state or county government as the "best available" information. Despite the Administration's opposition, the House is expected to pass the measure this week.

Michael Bean and others met with Senate ENR Committee staff and Senator Wyden's staff to discuss proposed legislation relating to the management of BLM's O & C lands.

Major Press Inquiries

USA Today is working with parks on developing a National Park Experience website. It will highlight activities in parks, ranger programs, and special events.

The first two installments of a weekly series in USA Today entitled *Ken Burns: Secrets of the National Parks* have been released, featuring Yellowstone and Yosemite National Parks. Future installments will feature Great Smoky Mountains, Glacier, Shenandoah, Arches, Hawaii Volcanoes, Sequoia, Redwoods, Grand Canyon, and Rocky Mountain National Parks.

Within the next two weeks, the AP is expected to release a feature story on the Biscayne National Park (FL) Fishery Management Plan Record of Decision. The completed Fishery Management Plan recommends phasing out commercial fishing in the park, and making changes to recreational fishing regulations. The recommendations will be codified through Federal and State rule making procedures with requisite public engagement. The AP has interviewed principal park staff and key stakeholders.

CNN's *Morgan Spurlock: Inside Man* plans to film an episode focusing on a national park, probably Denali. The host will work closely with rangers to learn about their jobs, the park, and larger issues like climate change and youth engagement that all parks are dealing with. The goal is an educational hour of TV that highlights everything the NPS does and gets the public engaged and excited.

The new CW television series, *Rock the Park*, is currently filming in several national parks with its hosts Jack Steward and Colton Smith. It is geared to get young people and families out to see and experience the parks for themselves. The series premieres on October 4. They are producing 26 half hour episodes, and each will repeat once, so it will be on the air weekly for 52 weeks, with plans already in place for a second season.

NPR is working on a story about efforts to engage more diverse audiences at national parks. The story focuses on the challenges faced attracting young and diverse audiences to parks and the budget breakdown between urban and non-urban parks. The reporter requested recommendations on parks she could visit that are engaging in new outreach efforts to attract younger and more diverse audiences. The NPS is responding, but story's timing is unclear.

The Los Angeles Times is working on a story about the 150th anniversary of the Yosemite land grant. In a chat with Director Jarvis, they discussed the challenges of setting aside land for parks and other conservation purposes in the current political climate, compared to the time when the Yosemite Grant was made. The publication date for the article is unclear.

The New York Times is working on a story about the role of the NPS in the proposed renovation of Wrigley Field (IL). The NPS provided information about the historic tax credit program (which the Cubs are proposing to use to pay for the project) and the National Register of Historic Places and National Historic Landmark (NHL) designations (National Register listing is required to qualify for tax credits). The NPS conditionally approved the Cubs application for the renovation work in March, but the Cubs have since filed an amended application, which is awaiting NPS review. Wrigley Field was been determined eligible for as a NHL in 1987, but the then-owners objected to designation. The Chicago Cubs, the current owners, will need to withdraw the prior objection so that the ballpark can be designated with its accompanying listing on the National Register, and, therefore, be eligible for the program.

Items of Note/Expected Legislative, Legal, Policy Issues

Intermountain Regional Office (CO) – NPS “Cooperating Agency” Status on BLM Riley Ridge to Natrona CO2 Pipeline Project EIS (WY). In response to NPS scoping comments on the BLM High Desert District on a Notice of Intent (NOI) to prepare an Environmental Impact Statement (EIS) for the Proposed Riley Ridge to Natrona CO2 Pipeline Project, the BLM has invited the NPS to participate in the planning process as a “cooperating agency.” The project will entail construction of 245 miles of pipeline through four counties and a sweetening plant 12 miles north of LaBarge, WY. The NPS’s primary issue of concern is possible impacts to designated high potential sites and segments of the Oregon, California, Pony Express, and Mormon Pioneer national historic trails, and potential indirect impacts to trail setting.

Chesapeake and Ohio Canal National Historical Park, Rock Creek Park, National Mall and Memorial Parks (MD/DC) – Potomac River Tunnel. On July 2, the NPS along with DC Water published in the Federal Register a Notice of Intent (NOI) to prepare an Environmental Impact Statement (EIS) for the Potomac River Tunnel. Comments on this proposal will be accepted through September 2, 2014. This planning effort is needed because combined sewer overflows (CSOs) cause or contribute to water quality degradation in the Potomac River. In addition, the project is required by a Federal Consent Decree entered into by DC Water, the United States Environmental Protection Agency, the United States Department of Justice and the District of Columbia.

Mesa Verde National Park (CO) – Local Horse Advocates Hold Demonstration. On July 29 and 30, local horse advocates, who believe that the horses are dying because the NPS is fencing off, or otherwise restricting them access to water sources, held a small demonstration outside of the Mesa Verde Visitor and Research Center. Reporters from the local *Cortez Journal* newspaper were also present and interviewed demonstrators, visitors and park staff. Articles have appeared in both the *Cortez Journal* and the *Durango Herald*. Approximately 75-100 horses live in numerous bands throughout the park. Horses in the park have unrestricted access to the same water sources used by bear, deer, elk, mountain lions, bobcats, coyotes, and other animals. Years of drought have impacted springs and seeps in the park, resulting in increased competition for water. Within the past six weeks, six horses have died on Wetherill Mesa from the effects of malnutrition and dehydration. The park is working to confirm to causes of death. The protests were uneventful and things have

quieted down for now. However, this topic remains a sensitive issue and can easily develop into a contentious matter.

Congaree National Park (SC) – Foundation Document. The 30-day public comment period for the foundation document for Congaree National Park began August 1. The foundation document will guide planning and management of the park.

Great Sand Dunes National Park and Preserve (CO) – Public Scoping for Preliminary Draft Alternatives for Ungulate Management Plan/EIS. In September, the NPS will initiate a second public comment period to engage and inform the public and partners on preliminary draft alternatives for the Great Sand Dunes National Park & Preserve Ungulate Management Plan/EIS. This plan/EIS will determine the appropriate future management of elk and bison within the park and preserve. In preparation, the NPS staff will brief the Colorado Department of Agriculture and the Colorado Parks & Wildlife Commission in early August. This planning effort is of significant interest to other Federal and State bureaus (e.g., US Fish and Wildlife Service which manages the Baca National Wildlife Refuge on the park's west boundary; Colorado Department of Agriculture which has an interest in decisions related to bison; and Colorado Parks & Wildlife which has concerns about the management of elk). All three entities have been involved in planning efforts thus far and have been invited to become cooperating agencies.

Fort Frederica National Monument (GA) – Release of Boundary Study and Environmental Assessment (EA). On August 8, the park will release a boundary study and EA for a 30-day public comment period. The boundary study includes a positive recommendation to expand the boundary to include a number of important properties for preservation related to the purpose and significance of Fort Frederica. Local congressional interest in this project is high.

Petroglyph National Monument (NM) – Response to Flood Damage. On August 14, the City of Albuquerque will have a public meeting to present its proposal for a drainage structure. This is in response to unusually heavy rains in and near Petroglyph National Monument in September 2013 that resulted in flooding that deposited large amounts of mud and debris onto private properties adjacent to the monument. Drainage easements granted by the City of Albuquerque along the monument boundary had not been maintained by the landowners. NPS geomorphologists and civil engineers visited the site and produced a report stating it is likely that sediment-laden water will again flow during future rainfalls. Additionally, the geomorphologists and civil engineers maintain that because the City of Albuquerque approved the subdivision, the City and the property owners bear liability. They recommend re-establishing private drainage easements. They also acknowledged an engineered mitigation measure could include a drainage structure behind the homes. The City is considering such a drainage structure. The structure would have to be built and maintained by the City and would require a land exchange or easement with the monument. The NM Congressional delegation has been asked about the availability of Federal funds to accomplish these goals.

Little Bighorn Battlefield National Monument (MT) – Hands-On Preservation Experience (HOPE) Project. Continuing through August 8, the park will partner with the National Trust for Historic Preservation's Hands-On Preservation Experience (HOPE) program and the Historic Preservation Training Center in a new preservation program. The project will introduce young people and military veterans to historic preservation trade skills while conducting necessary cleaning and preservation work on five nationally significant monuments within the Battlefield. The program will also begin a systematic headstone cleaning and alignment program within Custer National Cemetery to bring the appearance to National Cemetery Standards.

Assateague Island National Seashore (VA/MD) – Comprehensive Conservation Plan (CCP) for Chincoteague National Wildlife Refuge. The NPS has prepared its comments, due August 15, since the refuge is entirely within the boundaries of Assateague Island National Seashore. The refuge has jurisdiction to the mean low water mark; the NPS has jurisdiction over the ocean and bay waters out ½ mile. The draft CCP would stop the fishing for horseshoe crabs in the Toms Cove area of the park/refuge. Such fishing is illegal

within the seashore because park legislation allows shell-fishing only (horseshoe crabs are arachnids, not shellfish). The fishing community and town/county governments see this as a big government versus small fishing interests. Local Members of Congress have expressed concern and are contemplating action to protect the local watermen. The State of Virginia is also concerned that this ban will have unintended harvest intensity effects on the Delaware Bay stock of horseshoe crabs, which is crucial to migratory birds.

Zion National Park (UT) – Proposed BIA Land Trust Acquisition Bordering Park Wilderness. On August 22, the public scoping period ends for a BIA proposal to convert 174 acres of fee simple land, currently within Springdale, into Indian trust land. The parcel borders Zion National Park Wilderness on two sides. The BIA is determining if it is appropriate to move ahead with this proposed application.

Lake Clark National Park and Preserve (AK) – Finding of No Significant Impact (FONSI). In August, the Alaska Regional Director will sign the Lake Clark National Park and Preserve General Management Plan Amendment / Environmental Assessment. The plan updates the park's 1984 GMP, and includes direction on wilderness, coastal, and backcountry management, commercial services, and visitor opportunities. The project included multiple phases of public involvement, open houses, and ongoing tribal consultation and state engagement per Section 1301 of ANILCA. Public meetings held in February and March at several cities and villages near the park were lightly attended.

Hotel Florence, Florence (SC) – Historic Tax Credit. The remedial work proposed by the applicant for two of the three buildings that comprise the project was approved, which will allow them to be certified for tax credit purposes once the work is completed. The rehabilitation of the third building was certified as completed based on new submitted information.

Richardson Olmsted Complex (originally the Buffalo State Asylum for the Insane), Buffalo (NY) – Historic Tax Credit. The Part 2 application (description of proposed work) proposes several problematic treatments that do not meet preservation standards or for which there is a lack of information. The application was put on hold, and the NPS has contacted the SHPO to offer to meet with that office and the applicant. The NPS is confident that these issues can be successfully resolved.

Trico Plant, Buffalo (NY) – Historic Tax Credit. Review of the Part 2 application (description of proposed work) for this long-vacant industrial complex in downtown Buffalo, proposed to be converted into hotel and residential uses, was put on hold due to several problematic treatments and a lack of information. The applicant proposes to demolish the oldest portion of the complex, which is in poor condition, but will impact the historic character and integrity of the property. Given that the complex was threatened with demolition, and its prominent location, the NPS may get inquiries from the New York Congressional delegation or media about the project. This project was not shared with NPS on a preliminary basis before its submission.

FWS SECRETARIAL WEEK-AHEAD REPORT

Aug. 6, 2014

Message to the Secretary

None

Highlights of Travel, Meetings and other Public Events

Aug. 8: The Secretary will announce the final land acquisition for the Valle de Oro National Urban Wildlife Refuge in Albuquerque. A dedication ceremony is planned with the Secretary; members of the New Mexico congressional delegation (Senators Tom Udall and Martin Heinrich and Rep. Michelle Lujan Grisham likely to attend); dignitaries from the city of Albuquerque, Bernalillo County and the state of New Mexico; and key partners. Targeted outreach is planned the week prior to the event. A public celebration of the refuge's final land acquisition will be held in conjunction with Public Lands Day Sept. 27. R2

Aug. 11: FWS Pacific Regional Director Robyn Thorson will attend a public meeting on the proposed expansion of the Marine National Monument on Oahu, Hawaii. R1

Aug. 11 & 13: FWS will conduct public hearings on proposed changes to the Mexican wolf recovery program 10(j) rule and draft Environmental Impact Statement in Pinetop, Ariz., and Truth or Consequences, N.M. Outreach done. R2

Aug. 12: Rep. Peter DeFazio is planning a visit to Bandon Marsh NWR to view the progress of its mosquito control program. The control measures have yielded great results, and reaction from the local community is positive. R1

Aug. 13: The Secretary and Director Ashe will announce the first-ever Urban Refuge Challenge funding recipient. The funding from FWS (\$1 million per year) will enhance plans to more fully engage people from culturally diverse backgrounds in conservation and outdoor recreation. Outreach is planned with the Department of the Interior. HQ

Aug. 14: The Cooperative Alliance for Refuge Enhancement (CARE) will present an award to Sen. Jack Reed for his leadership and support for refuges in Rhode Island and the entire National Wildlife Refuge System. The award will be presented at Sachuest Point National Wildlife Refuge. Outreach is planned, and the press will be invited. R5

Aug. 15: Office of Management and Budget (OMB) personnel will visit James Campbell NWR on Oahu, Hawaii. FWS representatives from Ecological Services, Refuges and Pacific Islands Climate Change Cooperative will be involved. R1

Aug. 15: Director Ashe will join Rep. Jaime Herrera Beutler on a site visit to Gifford Pinchot National Forest in Washington to discuss ecological forestry. R1

Public Announcements

Thursday, August 7

The week of Aug. 4, FWS will send the status review for the Warton's cave meshweaver to the *Federal Register*. FWS concluded it does not warrant protection under the ESA. FWS' determination is based on

scientific information and review indicating Warton's cave meshweaver is not a distinct species. Not controversial. . Outreach in the form of a news release is planned. R2

Friday, August 8

Scheduled release of FWS' Greater Sage-Grouse Range-Wide Mitigation Guidance. The document will communicate some of the factors FWS is likely to consider in evaluating mitigation practices and programs in reducing threats to sage-grouse. This announcement may be delayed a few days. Potentially controversial. R1

Monday, August 11

FWS' Fish and Aquatic Conservation Program will release the program's new draft Strategic Plan to stakeholders and other members of the public. There will be a month-long comment period for both internal staff and external stakeholders. HQ

Tuesday, August 12

FWS will announce the withdrawal of the proposed rule to list the DPS of the North American wolverine that occurs within the contiguous United States as a threatened species. FWS will also withdraw the 4(d) and 10(j) rules for the wolverine. The withdrawal was sent to the Federal Register on Aug. 4. Outreach will occur the morning of Aug. 12, when the withdrawal will appear in the FR reading room. R6

Wednesday, August 13

FWS Midwest Regional Director Tom Melius will host a call for Native American Tribes in the 38-state range of the northern long-eared bat to update them on the status of the listing proposal. R3

Thursday August 14

FWS is proposing to designate critical habitat for the yellow-billed cuckoo (western U.S. DPS). In total, approximately 563,194 acres are being proposed for designation across nine states: Arizona, California, Colorado, Idaho, Nevada, New Mexico, Texas, Utah and Wyoming. Approximately 193,691 acres of the proposed designation have been identified for potential exclusion under section 4(b)(2) of the ESA. This action is expected to be controversial. FWS expects this rule to garner attention because FWS is designating critical habitat over such a large area, and HCP permittees that have not covered yellow-billed cuckoos in their HCP may oppose the proposed designation of critical habitat on their land. Announcement expected to appear in the FR reading room Aug. 14 with a publication date Aug. 15. R8

Friday, August 15

Through Aug. 15, FWS will gather approximately 420 feral horses on Sheldon NWR as part of its ongoing management actions to protect native wildlife and habitat on the refuge. Members of the public and media who have RSVPd will be allowed to observe with a FWS escort. Controversial. R1

TBD

FWS will finalize listing of the Oregon spotted frog as a threatened species under the ESA. The Oregon spotted frog occurs in extreme southern British Columbia, Canada, into the Puget Trough and in the Cascades Range in Washington State, south to the Klamath Basin, Ore. Local property rights advocates expressed concern about the potential for private land takings related to restrictions on riparian and water management and land use. Target to the *Federal Register* is Aug. 15. Outreach planned day before FR publication. R1

FWS is publishing a final rule revising critical habitat for the Canada lynx distinct population segment. This rule would designate 41,502 square miles in five units in Maine, Minnesota, Montana, Idaho, Washington and Wyoming. In addition, FWS will revise the boundary of the lynx DPS to comply with current policy and to

extend the protections of the ESA to lynx anywhere they occur within the contiguous United States. Non-profit environmental groups who sued the FWS over the 2009 designation will likely be disappointed that FWS again will not designate in the Southern Rockies or in the six National Forests that were the focus of the Montana court case. The Washington State Snowmobile Association will likely be displeased that FWS will designate in north central Washington. The target to the *Federal Register* is Aug. 15. Outreach planned.

FWS is proposing to designate critical habitat for the yellow-billed cuckoo (western U.S. DPS). In total, approximately 563,194 acres are being proposed for designation across nine states: Arizona, California, Colorado, Idaho, Nevada, New Mexico, Texas, Utah and Wyoming. Approximately 193,691 acres of the proposed designation have been identified for potential exclusion under section 4(b)(2) of the ESA. This action is expected to be controversial. FWS expects this rule to garner attention because FWS is designating critical habitat over such a large area, and HCP permittees that have not covered yellow-billed cuckoos in their HCP may oppose the proposed designation of critical habitat on their land. The target to the *Federal Register* is Aug. 15. Outreach planned day before FR publication. R8

In the next few weeks, FWS will announce grant awards to 30 states totaling almost \$1.3 million to support research, monitor bat populations, and detect and respond to white-nose syndrome disease. Funding for the grants is from the Endangered Species Recovery and Science Applications programs. Outreach is planned. R5

FWS is expected to reopen the comment period on proposals to list the Poweshiek skipperling as endangered, the Dakota skipper as threatened, critical habitat for both species, and a special 4(d) rule for the Dakota skipper. The reopening will allow FWS to release its draft economic analysis for proposed critical habitat and to receive public comment on the draft, as well as further comment on the proposed rules. This proposal has generated concern, especially in the Dakotas, among ranchers whose livestock grazing may result in take and whose property may be included in critical habitat. R3

In mid-August, Kenai NWR will propose a temporary closure of sport hunting of brown bears on the refuge to extend through the fall 2014 and spring 2015 seasons. The refuge is considering this action in response to recent changes in Alaska's state sport hunting regulations that have resulted in significant reductions in the Kenai Peninsula's brown bear population. FWS and the state are working to reconcile the differences in management objectives but are unable to reach agreement in the short term, thus the need for the temporary closure. Opportunities will be provided for the public to comment on this proposed closure. This action will most likely attract media attention. R7

In mid-August, Alaska Maritime NWR is planning to release for public review and comment a draft environmental assessment regarding control of non-native caribou on Kagalaska Island in the Aleutian Islands to prevent damage to refuge resources. Over all, little controversy is expected, though some concern may be raised by Alaska Department of Fish and Game regarding meat salvage. R7

In mid-August, FWS will open a 45-day comment period to collect additional information as part of a review of the status of the Sierra Nevada red fox to determine whether ESA protections are warranted for the species. FWS is opening this public comment period in light of new information that suggests the fox is present in more locations in its historic range than previously thought. Outreach planned. R8

Major Press Inquiries

Jessica Estepa (E&E News) has requested a tour of a fish hatchery and an interview about the hatchery system and future plans. HQ

There is continued high media interest in the Mexican wolf recovery program, lesser prairie-chicken and the New Mexico meadow jumping mouse. R2

Outdoor Life is pursuing the lead exposure study at Upper Mississippi River National Wildlife and Fish Refuge, with loaded questions including whether this study was part of a growing trend against lead. R3

Bloomberg BNA reporter interested in the impact of Asian carp to endangered species. R3

FWS has been working with USDA Agricultural Research Service to develop a bacterial suppressant to combat cheatgrass. Research indicates the strain of bacteria, known as ACK55 and patented as "Battalion Pro," is effective and safe. It is a promising tool for arresting the most pervasive threat to the sage-grouse in the Great Basin but it won't be through the approval process for an estimated 12-17 months. Awareness/interest among partners is high, so FWS will tailor outreach to maintain interest and support while tempering expectations about it being a silver bullet. A Bloomberg news report discussing ACK55 is expected soon. FWS will coordinate with USDA-ARS on outreach.

Items of Note/Expected Legislative, Legal, Policy Issues

The U.S. Senate passed S.231 to reauthorize the Save Vanishing Species Stamp. HQ

Senator Michael Bennett and Rep. Scott Tipton of Colorado have requested tours of Leadville National Fish Hatchery during the week of Aug. 4. The tours are being jointly coordinated and planned by Office of External Affairs and the Fish and Aquatic Conservation Program in the Mountain-Prairie Region. R6

Sept. 30 will mark the start of the one-year countdown to FWS' listing decision deadline for greater sage-grouse. Expect media interest to be elevated. Region 6 and Region 1 will coordinate on the strategy of proactive outreach to the media to highlight the remarkable conservation campaign that has emerged since the 2010 listing. R6

As FWS initiates its status review of the greater sage-grouse, the new online Conservation Efforts Database will capture plans and projects that benefit greater sage-grouse. A data call requests information on population and habitat status and trends, along with other relevant information on topics like hunting, disease and predation. R6

The Department of the Interior was contacted by Senator Heitkamp asking what FWS is doing to delineate wetlands easements that appear to be unmapped yet subject to criminal enforcement in North Dakota. The Region 6 Easement Coordinator provided the response, which included an offer to demonstrate the mapping work being conducted by the Habitat and Population Evaluation Team in Bismarck. This may spur additional inquiries and potentially meeting with the senator. Senator Heitkamp has professional history with wetland easements related to her time as North Dakota's Attorney General. R6

The Ballville Dam (Fremont, Ohio), has been a locally controversial fish passage project. Public distrust about a separate project that is creating a new reservoir has led to members of the city council examining the potential of rehabilitating the dam as a backup. In the Final Environmental Impact Statement (EIS), FWS has selected Incremental Dam Removal with Ice Control Structure as the preferred alternative. The final EIS will be available for public review through August. R3

**WEEK-AHEAD REPORT: ASSISTANT SECRETARY FOR
LAND AND MINERALS MANAGEMENT
August 5 – August 15, 2014**

Message to the Secretary

Secretary Jewell,

ASLM completed its review of the Arctic Standards rule on Thursday, July 31. BOEM and BSEE are responding to minor comments before sending the document forward to Exec Sec.

I signed the ROD for the Blythe solar energy project last Friday, August 1. Blythe is a 485 MW photovoltaic project located in California.

I have started what I'm sure will be a busy and productive week of travel. I look forward to meeting with key constituencies and our dedicated employees in Louisiana, North Dakota and Idaho (details listed below in Highlights of Travel, Meetings and other Public Events section).

BLM is reviewing the economic analysis and the environmental assessment in coordination with the Solicitor's Office, to ensure consistency with the revised hydraulic fracturing regulatory text. The current plan is to surname and submit the rule package to Exec Sec by the end of the week, with submission to OMB to follow shortly after.

We continue to work with the ASLM bureaus to obtain and review action plans for high priority matters, particularly in-process regulatory efforts and other initiatives. These plans are excellent tools and will help us allocate our time, energy, and resources as we work to usher these projects through the process to completion. One of my goals in requesting these plans is to aid in addressing challenges and resolving policy disagreements as efficiently as possible.

Janice

Highlights of Travel, Meetings, and other Public Events

August 5: Weather permitting, Brian Salerno and I will visit an offshore drilling rig and production facility in the Gulf of Mexico.

August 5 – 6: Jim Lyons will participate in a review of the BLM and FS Great Basin Greater Sage-Grouse Resource Management Plan Amendments with senior staff from BLM, FS, and FWS in advance of a scheduled roll-up of these plans involving BLM, FS, and FWS leadership in Portland, OR on August 19-21.

August 6: I will deliver the keynote speech at the Deepwater Technical Symposium in New Orleans, LA. After that, I will conduct an all-hands meeting with BOEM and BSEE staff in the Gulf of Mexico Region.

August 6: Brandi will participate in the bi-weekly offshore renewables meeting.

August 7: Brandi will participate in a working group meeting with representatives from SOL, BOR, AS-IA/BIA and the Department's budget office to discuss Indian Water Settlement study recommendations.

August 7: Lauren Bogard will meet with the other agency leads for the White House Council on Rural Affairs to discuss lessons learned from the recent Rural Opportunity Investment Conference.

August 8: I will attend the DOE's Quadrennial Energy Review seminar in Bismark, North Dakota and will be joined by ASLM DAS David Haines. We will also meet with industry representatives and visit the Bakken region to see the oil and gas operations (including venting and flaring) up there.

August 9: David and I will travel to Boise, ID to visit the National Interagency Fire Center.

August 11: Brandi will participate in the bi-weekly resilience council Working Group meeting.

August 11: Brandi will participate in the Climate Change Working Group meeting.

August 11: I will interview a candidate for the BOEM Director position. I will also interview a candidate for the BLM senior advisor position.

August 12: Brandi, David, Lauren and I will attend a mock auction hosted by BOEM.

August 12: I will attend a meeting hosted by Tommy Beaudreau with representatives from the State of AK, ExxonMobil, BP, Conoco Phillips and TransCanada to discuss a liquefied natural gas (LNG) project in Alaska.

August 12: The ASLM senior leadership team will receive a briefing on BLM's conveyance program.

August 15: The comment period closes for the Request for Information and Comments on the Preparation of the 2017-2022 Outer Continental Shelf Oil and Gas Leasing Program. The original comment period closed on July 31, 2014, but was extended for 15 days to August 15.

Aug 18 - 22, Jim will be meeting with BLM, FS, FWS, and NRCS leadership in Portland, OR to review the Great Basin GrSG plans. The roll-up will assess individual plans and the cumulative conservation effort by BLM and FS to assess the adequacy of the effort to conserve the GrSG and avoid a listing as threatened or endangered.

August 18: I will participate in the monthly Energy and Climate Change Task Force Meeting with Assistant Secretaries and Bureau Directors.

August 19: I am tentatively scheduled to attend the National Ocean Industries Association (NOIA) Legislative meeting per Randall Luthi's invitation.

August 19: I will attend a meeting with conservation leaders hosted by Bill Meadows.

August 19: BOEM will hold its third offshore commercial lease sale an area offshore Maryland. Two leases will be competitively offered.

August 20: BOEM will hold Lease Sale 238 for leases in the Western Planning Area of the Gulf of Mexico.

August 20-22: Brandi and I will travel to Wyoming for the DOE Quadrennial Energy Review.

Aug 25: Jim will participate in a meeting on landscape-level mitigation hosted by The Nature Conservancy, The Wilderness Society, and other partners in Washington, D.C.

Major Press Inquiries

Director Salerno will be in Houston August 12-13 to attend the Ocean Energy Safety Institute's forum on data sharing. The forum will include representatives from industry, academia, and the public. BSEE is setting up interviews for Director Salerno in Houston with *Reuters*, *Oil and Gas Journal* and freelance reporter Bruce Nichols regarding BSEE's new Houston-based Technology Center.

Multiple media outlets have begun to cover the number of SMCRA violations that have accrued in the last three to four years at coal mine operations owned by James Justice II. At present, Justice mines in five states (AL, KY, TN, VA, and WV) have been cited for 281 violations listed in OSMRE's Applicant Violator System (AVS) database. *E&E Daily/Greenwire*, *the Roanoke Times*, *the Charleston (WV) Gazette*, and a series of business-news services have each inquired about the number of AVS-listed violations. OSMRE's Office of Communications continues to work with AVS staff to provide media with an accurate accounting of the violations and context as to the severity and number of violations issued to the Justice Companies relative to similar companies.

Items of Note/Expected Legislative, Legal, Policy Issues

WEEK-AHEAD REPORT: BUREAU OF LAND MANAGEMENT
August 10 - 16, 2014

Highlights of Travel, Meetings, and other Public Events

BLM Director Neil Kornze will return to the office Aug. 12; Linda Lance and Steve Ellis will be in Washington, D.C.

Public Announcements

Very Soon

The BLM will release **Draft Guidance for Developing Solar Regional Mitigation Strategies** for a 30-day public review period. The guidance will help BLM managers write mitigation strategies for Solar Energy Zones, as called for in the BLM Western Solar Plan. It is informed by the Regional Mitigation Strategy for the Dry Lake Solar Energy Zone released in March.

Monday, August 11

Nothing to Report.

Tuesday, August 12

The BLM anticipates release of the **Middle Rockies and Northwestern Plains Rapid Ecological Assessments (REAs)**. The REA is the BLM's first step toward a broader initiative to systematically develop and incorporate landscape-scale information into the evaluation and eventual management of public land resources.

Wyoming Mustang Days, an annual horse adoption and training demonstration, will take place Aug. 12-16 at the WY State Fair. Twenty gentled horses will be available for adoption. Media are invited and expected to attend.

Wednesday, August 13

Nothing to report.

Thursday, August 14

BLM-MT/DK staff will present at the United Property Owners of MT **Property Rights Conference in Billings**. The presentation will highlight the State Director's priority to increase public access to public lands, and the mechanisms and processes available to secure access. The target audience is members and interested agencies; press is invited.

4-H groups in Idaho will highlight the results of their work with **BLM wild horses** at the Madison County Fair. They selected the weanlings in June. An adoption will follow Aug. 16. This follows the successful Extreme Mustang Makeover, held in ID for the first time July 26.

Friday, August 15

Nothing to report.

Major Press Inquiries

Associated Press reporter Mead Gruver is wrapping up his story on the number of oil and gas lease parcels that have been deferred while waiting for sage-grouse RMP decisions. The story will include information on the Lander RMP and the BLM WY Greater Sage-grouse 9-plan Land Use Plan Amendment EIS. Conversations

with the reporter have taken place over the course of two weeks, concluding July 30. The story is expected next week and to have a neutral tone.

Lori A. Montgomery of the *Washington Post* interviewed the BLM-AK staff about use of mapping resources in the recovery of a downed F-22 Raptor jet in 2010. The interview focused on the importance of elevation data in mitigating risks to aviation safety. The tone was cordial; the reporter plans to visit AK in late August. Publication date and tone are unknown.

Associated Press reporter in Reno, NV, Martin Griffith contacted BLM about the BLM's long- and short-term holding solicitation for wild horses and burros, existing long-term pastures, costs, and how many pastures and short-term corrals are needed. The BLM reported substantial interest in the May 2014 short term solicitation for facilities in 17 Western and Midwestern states. Holding accounted for 64 percent of BLM's FY 2013 program budget.

Boston Globe reporter Michael Kranish contacted DOI and BLM Communications about Interior's policy on coal leases on public lands, including a recent case in which a judge said Interior did not take into account climate when leasing. A June 27th decision by U.S. District Court in Colorado ("West Elk II") enjoined a BLM coal lease expansion, in part because Social Cost of Coal (SCC) estimates included in the draft EIS were removed in the final EIS without adequate explanation. A federal interagency panel has established SCC estimates, primarily for use in regulatory decisions. Kranish attended the CO Federal Coal lease sale Wednesday, interviewing protesters there. The article will be negative toward the Administration and will run in the coming weeks.

Items of Note/Expected Legislative, Legal, Policy Issues

On July 28th the BLM Rio Puerco Office issued an impoundment notice to deal with the presence of unauthorized, **estrays horses** on public land adjacent to the **Village of Placitas**. The BLM is actively searching for good homes for these stray animals. The horses are the property of the State of New Mexico and the BLM is coordinating efforts with the NM Livestock Board.

The BLM will soon issue policy that could affect existing and proposed activities authorized under the **General Railroad Right-of-Way Act** of March 3, 1875. The IM contains guidance about how to evaluate activities in railroad ROWs to see if they relate to a railroad purpose covered by the 1875 Act. It implements a 2011 Solicitor's opinion and replaces interim guidance that has been in place since that time. The policy in the IM will be used to assess the proposed Cadiz water pipeline, a controversial project in California.

Twelve members were appointed to the BLM's newly-established **Advisory Committee for the San Juan Islands National Monument**, in Washington State. The appointment letters signed by the Secretary may attract local press.

The **Fort Berthold Federal Partners meeting** will be August 12 – 13 in Bismarck, ND. Federal agencies (including BLM) will discuss oil & gas issues related to Fort Berthold and western ND.

Rep. Amodei (R-2-NV) plans to meet with BLM-NV Battle Mountain District Manager Doug Furtado Aug. 13. Among the issues that will likely be discussed will be drought and the decision to remove of cattle from the Argenta Allotment. This decision has been highly controversial and led to the recent Grass March through northern NV.

Sen. Tom Udall (D-NM) plans to meet with NM-State Director Jesse Juen Aug. 13 at the BLM's Carlsbad office to discuss the BLM's oil and gas pilot offices.

Rep. Kristi Noem (R-At-Large-SD) will visit the BLM's SD Field Office Aug. 15 for a briefing on the BLM-funded "Firewise Veterans Program" fuels reduction projects, which focus on wildland-urban interface zones near Sturgis, Lead, and Rapid City in the Black Hills of SD.

The BLM-WY High Plains District Manager and Casper Field Manager will meet with field representatives of the WY Congressional Delegation Aug. 14 to provide updates on current projects, including progress on processing APDs, the Converse County Oil and Gas Project, and the Wyoming Greater Sage-Grouse RMP/LRMP (BLM- Resource Management Plan and FS - Land and Resource Management Plan) Amendments.

Rep. Horsford (D-4-NV) tentatively plans to visit a BLM fuels management project near Ely, NV, Aug. 16.

The BLM-ID Salmon Field Office is reviewing a Special Recreation Permit application from "Idaho for Wildlife" to conduct a **competitive 3-day predator hunt derby on public lands** January 2-4, 2015. Interest is broad and polarized, from local to international, including the general public, recreation interests, environmental groups, congressional staff, federal and state agencies, Tribal and local government officials and local media.

The Government Accountability Office (GAO) will visit the BLM-OR Burns District August 11-13 to review the North Steens Ecosystem Restoration Project. The GAO is engaging on this following a request from the Chairman of the Senate Committee on Energy and Natural Resources. The visit is in response to the Dec. 2013 GAO letter on landscape-scale forest restoration efforts, how they are defined, planned, implemented and evaluated; and successes, challenges and barriers, if any, on efforts to streamline implementation of the NEPA.

WEEK-AHEAD REPORT: BUREAU OF SAFETY AND ENVIRONMENTAL ENFORCEMENT
August 6 – 15, 2014

Message to the Secretary

This past week, staff from BSEE, BOEM and DOI Executive Secretariat met with representatives from the Office of Management and Budget (OMB) to discuss the Arctic Standards proposed rule, which is undergoing review within DOI. OMB's primary concern is economics. We informed them that an economic analysis will be included in the document and asked that we defer discussion of economics until they have had a chance to read the analysis. They were okay with that approach. A specific date for submitting the document was not discussed.

I will be traveling to New Orleans this week, Houston next week, and possibly back to New Orleans on August 20.

Highlights of Travel, Meetings, and other Public Events

August 4-8, Deputy Director Schneider is scheduled to visit the BSEE Pacific Region Office in Camarillo, CA, for meetings with BSEE personnel.

On August 5, Director Salerno is scheduled to accompany Assistant Secretary Schneider on an offshore visit to a drilling rig and a production platform in the Gulf of Mexico.

On August 6, Director Salerno is scheduled to attend the Annual Deepwater Symposium in New Orleans. Assistant Secretary Schneider is scheduled to deliver the keynote address.

On August 12-13, the Ocean Energy Safety Institute is scheduled to convene a forum on Data Sharing in Houston, TX. The forum will involve representatives from industry, academia, and the public. Director Salerno is scheduled to deliver opening remarks. He is also planning to visit the Helix Well Control Group storage and staging area near Houston during the trip.

On August 21, Deputy Secretary Conner is scheduled to visit an offshore drilling rig and a production platform in the Gulf of Mexico. Director Salerno may accompany him for the trip.

Public Announcements:

August 12-13, BSEE is setting up interviews for Director Salerno in Houston with Reuters, Oil and Gas Journal and freelance reporter Bruce Nichols regarding BSEE's new Houston based Technology Center.

Items of Note/Expected Legislative, Legal, Policy Issues

Proposed Rule for Arctic Standards: This proposed rule will contain standards for oil and gas development and production in the Arctic environment. An announcement will be published in the *Federal Register* at a date to be determined to solicit public comment on the rule following inter-agency review through OMB.

Proposed Well Control Rule (AKA Blowout Preventer Rule): A proposed rule to establish standards for blowout preventers is undergoing Departmental surnaming review as a draft document. It incorporates industry standards and revises existing regulations. The proposed rule also includes critical reforms in the areas of well design, well-control, casing, cementing, real-time well monitoring, and subsea containment.

WEEK-AHEAD REPORT: BUREAU OF OCEAN ENERGY MANAGEMENT
August 5, 2014 – August 16, 2014

Message to the Secretary

Secretary Jewell,

Thank you for your support for BOEM in the FY 2016 budget planning process. (b)(5)

(b)(5)

Walter

Highlights of Travel, Meetings, and other Public Events

On August 6, the BOEM and BSEE Gulf of Mexico Regional Offices will host Janice Schneider. During her visit, she will meet with senior leadership from both bureaus and conduct an all-hands meeting with staff.

On August 6, BOEM will host an offshore wind auction public seminar in Mercerville, New Jersey. BOEM will provide an overview of the proposed auction format, explain the auction rules, and demonstrate the auction process through meaningful examples at the auction seminar. Throughout the auction seminar, there will be an opportunity for comments and questions regarding the proposed sale notice, which was published on July 21.

On August 7 – 13, BOEM staff will hold outreach meetings with the six Mid- and South Atlantic State coastal management programs to discuss Coastal Zone Management Act issues and the geological and geophysical permitting process. Meetings are scheduled with North Carolina (August 7); Delaware and Maryland (August 11); Virginia (August 12); and South Carolina and Georgia (August 13). BOEM is also initiating interagency coordination on the permit applications this week.

On August 11, BOEM-Pacific will host a coordination meeting in Portland, Oregon with various Federal, state and local government entities that have direct or indirect permitting responsibilities for the WindFloat Pacific project. WindFloat Pacific is a proposed 30 MW floating offshore wind farm to be sited approximately 15 miles off the coast of Coos Bay, Oregon.

Public Announcements

Thursday, August 7

BOEM will announce the North Carolina Area Identification for offshore wind.

Week of August 4

BOEM will announce cooperative agreements with North Carolina and South Carolina on sand resources.

August

In the coming weeks, BOEM will publish an Advanced Notice of Proposed Rulemaking on Financial Assurance and Risk Management.

Major Press Inquiries

N/A

Items of Note/Expected Legislative, Legal, Policy Issues

North Carolina Offshore Wind Area Identification (Area ID): BOEM has completed the Area ID offshore North Carolina and identified three individual areas as the North Carolina Wind Energy Areas (WEAs). These include Kitty Hawk, Wilmington West, and Wilmington East. The WEAs represent modifications from the three areas identified in December 2012 as a part of the call for information. Since then, BOEM has worked with the U.S. Coast Guard, NPS, and others to address concerns related to navigational safety and visual impacts. The next step in the process will be to prepare an environmental assessment for the areas.

Arctic Standards Proposed Rule: BOEM and BSEE have developed proposed Arctic OCS Standards rules governing exploration drilling for oil and gas in the Chukchi and Beaufort Seas. These standards codify and further develop the standards previously established for Shell's 2012 Arctic exploration program, and are intended to strengthen safety and environmental protection for Arctic OCS exploratory operations. BOEM and BSEE are preparing the rule for ASLM's final signature and plan to have it ready for OMB review by Friday, August 11.

Advanced Notice of Proposed Rulemaking (ANPR) on Financial Assurance and Risk Management: BOEM is initiating a rulemaking process aimed at ensuring the financial integrity of lessees and operators on the OCS, and reducing the risk of taxpayers bearing the costs of decommissioning OCS facilities. BOEM expects to publish the ANPR, which asks questions of the public to inform the rulemaking, in early August. OMB was briefed on the rule on June 23 and BOEM made minor changes to the draft based on their comments.

Auction for Wind Energy Leases Offshore Maryland: BOEM will conduct an on-line auction for two wind energy leases offshore Maryland on August 19. The Maryland Wind Energy Area includes more than 80,000 acres. BOEM identified the Maryland Wind Energy Area in consultation with members of the Maryland Intergovernmental Task Force, which includes Federal, State, tribal and local government partners. The part of the wind energy area closest to shore is located about 10 nautical miles off of Ocean City.

Western Gulf Of Mexico Oil and Gas Lease Sale: On August 20, BOEM will hold Western Planning Area Lease Sale 238 in New Orleans and will offer more than 21 million acres offshore Texas for oil and gas exploration and development. BOEM estimates the proposed sale could result in production of 116 to 200 million barrels of oil and 538 to 938 billion cubic feet of natural gas. This is the sixth offshore lease sale under the Administration's Five Year Program; the previous five sales have offered more than 60 million acres and netted nearly \$2.3 billion.

2017 – 2022 Offshore Oil and Gas Five Year Program: BOEM continues to receive comments on the Request for Information from an array of stakeholders and elected officials. Last week, BOEM extended the public comment period for the Request for Information, which now closes on August 15, 2014. Once the comment period closes, BOEM will analyze the comments and continue its analysis for development of the Program. In September, BOEM will be prepared to provide DOI and the Secretary with an overview of comments received and have an initial discussion on the scope of the Program. The next public step is the release of the Draft Proposed Program, scheduled for the end of this year.

WEEK-AHEAD REPORT: AS Water & Science
August 6 – August 15, 2014

Optional Message to the Secretary

You will see at the end of this week's report that Reclamation intends to release several new basin studies and climate change impact assessments in the coming weeks. (b)(5)

(b)(5)

Highlights of Travel, Meetings, and other Public Events

Anne Castle: Aug 7-8 will travel to LaCrosse, WI for briefings at the Upper Midwest Environmental Sciences Center on Asian Carp and other invasive species topics, then to Madison, WI for discussions with leadership and staff of the USGS WI Water Science Center and the Center for Integrated Data Analytics (CIDA) and with an OSTP representative on the Open Water Data Initiative. All hands meetings will occur at all locations. Aug 22 meeting with the NPS Colorado River Steering Committee in Denver, CO. Aug 25-28 to Flagstaff, AZ to chair the Glen Canyon Dam Adaptive Management Work Group and related federal and tribal meetings; Aug 29 to provide keynote remarks at the Business of Water 2.0 summit in Las Vegas.

Lori Caramanian: Aug 7-8 in WI for meetings at CIDA with ASWS and OSTP; Aug 19 in Denver for Glen Canyon Dam LTEMP meeting.

Tom Iseman will participate in a US Army Corps of Engineers Senior Leader Conference on Aug 6.

Camille Calimlim Touton will be in WI Aug 7-8 with ASWS and OSTP.

Public Announcements

Wednesday, August 6 – Thursday, August 7

Nothing to report.

Friday, August 8

News Release—Historic Walrus Population Decline: On August 8, USGS will brief local FWS officials in Anchorage, Alaska, and distribute a press release on an analysis of Pacific walrus population data circa 1981 to 1999. The population declined over that period, though the decline moderated in the 1990s. The press release will elaborate on some of the possible causes for this pattern and explains that the USGS is working to collect and analyze population data since 1999. The FWS is under a court mandate to make a listing determination for Pacific walrus by 2017. A press release will follow the briefing.

Saturday, August 9 - Friday August 15

Nothing to report.

TBD

Reclamation Research Grants: In early-to-mid August, Reclamation's Desalination and Water Purification Research Program will announce grants for research and laboratory studies and pilot scale projects. Reclamation will provide up to \$150,000 for the research and laboratory studies and \$400,000 for the pilot scale projects. The DWPR Program is helping Reclamation and its partners confront widening imbalances between supply and demand in basins throughout the west through testing and development of new advanced water treatment technologies.

UOG resource assessment for northeast Mexico: In the coming weeks, the USGS plans to release the assessment of unconventional oil and gas resources in northeast Mexico. This assessment is part of the USGS project that is assessing the undiscovered, technically recoverable unconventional oil and gas resources (including shale oil and shale gas) of the world. The recent exponential development and production of oil and gas from many U.S. and Canadian unconventional accumulations has escalated geopolitical interest in accumulations occurring outside the U.S. Previously published USGS assessments of unconventional resources have included areas in Poland, India, China, Denmark, and several countries in South America. The northeast Mexico assessment is notable because there are substantial unconventional oil and gas resources in Texas and it is reasonable to ask what unconventional resources might exist in adjacent areas of Mexico. The report will be available online but no news release is planned. [REPORTED IN LAST WEEK'S REPORT]

Major Press Inquiries

Nothing to report.

Items of Note/Expected Legislative, Legal, Policy Issues

Department of Energy 2014 Award for Great Plains Area Office (OK): Reclamation's Oklahoma-Texas Area Office (OTAO) was selected to receive the U.S. Department of Energy 2014 Federal Energy and Water Management Award. The Program Award recognizes outstanding achievements in energy and water. In FY 2013, Reclamation's Tom Steed Reservoir (Mountain Park Project) which serves as the primary water supply for the Oklahoma cities of Altus, Snyder, and Frederick, and for Altus Air Force Base was in its third year of exceptional drought with reservoirs at record low levels. OTAO staff used their firm yield reservoir model to visualize various drought scenarios and estimate future water availability under continuing drought conditions. They met with municipalities to allow them to visualize the impacts to their water supply as a result of the drought and predict what could happen if the drought continued. Through these actions, significant water conservation measures were implemented and a 30% reduction in deliveries, approximately 3500 acre-feet, was realized. Ancillary benefits included energy savings resulting from reduced pumping requirements, and improved recreation and fish and wildlife conditions due to higher reservoir levels.

WEEK-AHEAD REPORT: BUREAU OF RECLAMATION
August 6 – August 15, 2014

Optional Message to the Secretary

Nothing to report.

Highlights of Travel, Meetings, and other Public Events: *I have no planned stakeholder meetings Aug 6-15. I will be traveling to Boise, ID and Salt Lake City, UT, August 13-15 for regional meetings.*

Public Announcements

Tuesday, August 5

Nothing to report.

Wednesday, August 6

Ribbon Cutting for New Berryessa Resort Improvement District Board Facility at Lake Berryessa (CA): Reclamation and Congressman Mike Thompson (D-CA) will participate in a ribbon cutting ceremony hosted by the Napa Berryessa Resort Improvement District Board for their new facility at Reclamation's Steele Canyon Recreation Area in Napa, California. The ceremony will celebrate the completion of NBRID's new wastewater treatment facilities.

Thursday, August 7

Nothing to report.

Friday, August 8

Nothing to report.

Saturday, August 9

C.A.S.T. for Kids Fishing Event at Strawberry Reservoir (UT): Reclamation will host a C.A.S.T. for Kids/Let's Move Outside fishing event at Strawberry Reservoir for special needs and disabled youth, supported by over 25 sponsors and approximately 100 volunteers.

Sunday, August 10

Nothing to report.

Monday, August 11

Congressional Representatives to Tour at Grand Coulee Dam (WA): Legislative Director Melanie Steele and Agricultural and Resource Policy Director Mike Poulson, staffers of Congresswoman McMorris Rodgers (R-WA), will tour Grand Coulee Dam.

Tuesday, August 12

Nothing to report.

Wednesday, August 13

Nothing to report.

Thursday, August 14

Navajo Generating Station Project Open House (AZ): Reclamation will hold an open house meeting in Kykotsmovi, Arizona, on the proposed Navajo Generating Station and Kayenta Line Complex Project. The public comment period will be reopened and extended until August 31. These actions are in response to a request by the Hopi tribe.

Friday, August 15

Congressional Representatives to Tour Lewiston Orchards Project (ID): On August 15, Senator Mike Crapo (R-ID) and staff; Representative Raul Labrador (R-ID) and staff; and staff from Senator Jim Risch (R-ID) will attend a Lewiston Orchards Project update and construction site tour along with regional, state and local officials. This is presented by the local Lower Clearwater Exchange Project stakeholder group.

Major Press Inquiries

Boca Dam Flows (CA): Reclamation reports that flows to the Little Truckee River below Boca Dam were reduced from 250 cubic feet per second on July 29 to 0 cfs on July 30. Boca Dam, owned by Reclamation, is located near Truckee, California. *KCRA Channel 3* (Sacramento) did a report from the dam on July 30 showing a fly fisherman rescuing some stranded fish; however, the overall effect on native fish is limited by the short river distance impacted by the lack of flows.

Items of Note/Expected Legislative, Legal, Policy Issues

Pilot System Conservation Funding Agreement: During the past 15 years, drought conditions in the Colorado River Basin are among the very worst in over 1,200 years. As a result, Lakes Powell and Mead have experienced a substantial decrease in storage and elevation. Given declining reservoir levels, Reclamation, the Colorado River Basin States, and water users have shared ideas on how to mitigate the impacts of the ongoing drought. One idea that has received support is funding projects that will conserve Colorado River water and allowing the conserved water to remain in storage to help offset the declining reservoir levels. On July 30, 2014, the United States of America, through the Department of the Interior, Bureau of Reclamation (both Upper and Lower Colorado Region), and four municipal entities including the Central Arizona Water Conservation District, the Metropolitan Water District of Southern California, Denver Water, and the Southern Nevada Water Authority entered into an agreement called the Colorado River System Conservation Program. The Program is a pilot for funding the creation of Colorado River System water through voluntary water conservation and reductions in use. The pilot program also aims to reduce salinity in the Colorado River System as a complementary benefit to the ongoing water management programs in the Colorado River Basin.

Quantification Settlement Agreement (QSA): In October 2003, the QSA became effective, providing a means for Colorado River water transfers within the state of California. In 2009 California's Imperial County (County) and the Imperial County Air Pollution Control District (Air District) filed a complaint in U.S. District Court, Southern District of California, challenging the Secretary's 2003 execution of the CRWDA. The complaint alleged that the Secretary's Environmental Impact Statement (EIS) failed to comply with the National Environmental Policy Act (NEPA) and also violated the Clean Air Act (CAA) by not making a "conformity determination" for the water transfer. In 2012, the District Court ruled in favor of the United States, concluding that the Plaintiff's claims failed for a lack of standing. The case was appealed to the Ninth Circuit Court, which affirmed the judgment of the lower court, ruling that the Secretary did not violate NEPA or CAA in preparing the Implementation Agreement EIS analyzing the effects of the CRWDA on the Salton Sea.

Plaintiffs filed a petition for panel rehearing and a petition for rehearing *en banc*, which was denied on August 1, 2014.

Klamath Project Curtailments (OR/CA) - Due to this year's extremely dry hydrologic conditions in the Upper Klamath Basin, Reclamation has determined that, to remain in compliance with the 2013 Biological Opinion for operation of the Klamath Project (Project), all Project Warren Act Contract water supplies had to be curtailed by the end of July. Warren Act contractors make up approximately 50,000 acres of the Klamath Project served by Upper Klamath Lake and the Klamath River. Reclamation has coordinated with Oregon Water Resources Department (OWRD) on available options to control Klamath Drainage District's (KDD) unauthorized diversions through the privately owned North Canal. Unauthorized diversions to-date by KDD totaled approximately 9,000 acre-feet, reducing the amount of supply available to all Project water users. On July 25, Reclamation requested that under Oregon Revised Statutes, OWRD close the North Canal. OWRD confirmed notification to KDD to cease deliveries on July 30. As of August 1, KDD ceased diverting through the North Canal.

Flash Flood at Anderson Ranch Dam (ID): Reclamation's Pacific Northwest Region reports that on July 31, there was a flash flood at Anderson Ranch Dam and Power plant located approximately 28 miles northeast of Mountain Home, Idaho. The damage to the facility from the flash flood consists of a few broken windows and some mud and debris in the power plant. Mud and debris was also deposited in the switchyard area. Everything appears to be operational.

Department of Energy 2014 Award for Great Plains Area Office (OK): Reclamation's Oklahoma-Texas Area Office (OTAO) was selected to receive the U.S. Department of Energy 2014 Federal Energy and Water Management Award. The Program Award recognizes outstanding achievements in energy and water. In FY 2013, Reclamation's Tom Steed Reservoir (Mountain Park Project) which serves as the primary water supply for the Oklahoma cities of Altus, Snyder, and Frederick, and for Altus Air Force Base was in its third year of exceptional drought with reservoirs at record low levels. OTAO staff used their firm yield reservoir model to visualize various drought scenarios and estimate future water availability under continuing drought conditions. They met with municipalities to allow them to visualize the impacts to their water supply as a result of the drought and predict what could happen if the drought continued. Through these actions, significant water conservation measures were implemented and a 30% reduction in deliveries, approximately 3500 acre-feet, was realized. Ancillary benefits included energy savings resulting from reduced pumping requirements, and improved recreation and fish and wildlife conditions due to higher reservoir levels.

Klamath Water Supply Meeting (OR/CA): On August 4, Reclamation, U.S. Geological Survey, U.S. Fish and Wildlife Service, and National Marine Fisheries Service regional management met in Klamath Falls, Oregon, to discuss the Klamath Basin's current water conditions and met with stakeholders to discuss water supply needs for the remainder of the 2014 water year. Frequent meetings and communications continue.

Aamodt Indian Water Rights Settlement Activities (NM): Reclamation and the Pueblo de San Ildefonso have both signed the Contributed Funds Agreement, which provides for environmental analysis and design work for additional water-related infrastructure projects requested by the Pueblo as authorized by the Aamodt Indian Water Rights Settlement. The Pueblo would like to transfer the funding as soon as possible. Reclamation also recently entered into a funding agreement, which allows the state of New Mexico to contribute its share of non-federal funding for the Pojoaque Basin Regional Water System under the Aamodt Settlement. The state plans to send some initial funding soon to assist with planning and design activities.

WEEK-AHEAD REPORT: U.S. GEOLOGICAL SURVEY

August 5 - 15, 2014

Message to the Secretary

Nothing to report.

Highlights of Travel, Meetings, and other Public Events

On **August 6**, Acting USGS Director Suzette Kimball will participate in the commissioning of the USGS research vessel Kaho in Oswego, N.Y. The R/V Kaho, built in 2011, operates on Lake Ontario participating in long-term data collections including population studies of prey fish and stocked lake trout, fish and environmental sampling for contaminants monitoring.

From **August 18 - September 2**, Acting Director Kimball will be on annual leave.

Public Announcements

Wednesday, August 6

News Release—Chloride Contamination of Wichita’s Water Supply Inevitable Unless Actions Taken: On **August 6**, USGS will release a new model, developed in cooperation with the city of Wichita, Kansas, showing that chloride contamination of Wichita’s primary water-supply source is inevitable unless actions are taken. Past oil and gas activities near Burrton, Kansas resulted in a plume of high-chloride groundwater northwest of the Wichita well field, which is an area that encompasses all of the groundwater wells within the city of Wichita. The chloride plume is currently moving toward that well field, threatening the part of the Equus Beds aquifer that supplies water to the city. A press release is planned to announce the report and groundwater animations detailing study results which will be available online.

Media Event & Advisory: Christening and commissioning of R/V Kaho: On **August 6**, USGS will celebrate the newest addition to its Great Lakes fleet of large research vessels, the R/V Kaho, with a christening and commissioning ceremony in Oswego, New York. The new research vessel will enable USGS to explore fish health and water-quality in Lake Ontario. USGS Acting Director, Suzette Kimball, will christen the vessel and others in attendance will include local and state elected officials, research partners from the State of New York, the Great Lakes Fishery Commission, the Mohawk Tribe and First Nation representatives, and Canadian partners. A local media advisory will be distributed on **August 4**.

Thursday, August 7

Nothing to report.

Friday, August 8

Saturday & Sunday, August 9 & 10

Nothing to report.

Monday, August 11

Nothing to report.

Tuesday, August 12

Nothing to report.

Wednesday, August 13

Demonstration of Asian Carp controls: On **August 13**, USGS, in collaboration with the Illinois DNR, will demonstrate to Congressional staff a variety of Asian carp control techniques at our field site in Morris, Illinois. There will also be a tour of the Brandon Road Lock and Dam near Joliet, Illinois, led by the U.S. Army Corps

of Engineers, and discussion of potential application of USGS Asian carp control tools at this location. A similar demonstration will be held for States and other partners on **August 14**.

Thursday, August 14

California water use data website goes live: On **August 14**, USGS will release 2010 estimated California water use data that will be made available through an interactive website. *[THIS IS UPDATED FROM LAST WEEK'S REPORT]*

Friday, August 15

Nothing to report.

TBD

Contributions of Landfill Leachate to the Environment: This week, a new USGS study to be published in the journal *Environmental Science: Processes & Impacts* provides a synopsis of contaminants of emerging concern (CEC) and other chemicals sampled from leachate – water that has percolated through a solid and leached out some of the constituents – at 19 landfills across the U.S. The study provides the first comprehensive characterization of CECs, including pharmaceuticals and personal care products, in U.S. landfills to date, and is the first step to quantify the contribution of leachate from active landfills on the environment. The findings are intended to inform current policies for chemical disposal. A news release is planned. *[THIS IS UPDATED FROM LAST WEEK'S REPORT]*

News Release–Urban development and nutrients: This week, the USGS will announce a new study that indicates urban development, turf in particular, is a major source of the nutrients nitrogen and phosphorus entering the watershed that flows into Barnegat Bay, New Jersey. *[THIS WAS IN LAST WEEK'S REPORT]*

News Release–Mapping Methane Gas Plumes in the Atlantic: In the **coming weeks**, a new study to be published in the journal *Nature Geoscience* maps methane plumes in the Atlantic Ocean. Researchers from the USGS Gas Hydrate and Geohazards Projects, along with colleagues from Mississippi State University and other institutions mapped approximately 570 methane gas plumes originating at seafloor cold seeps on the US Atlantic margin between Cape Hatteras and Georges Bank. Prior to this study, only three seep areas had been recognized beyond the shelf-break (nominal 180 m water depth) between Florida and Maine. Ocean warming on intra-annual, decadal, and millennial timescales may drive the breakdown of gas hydrate and release of methane at these depths, the first time this phenomenon has been recognized outside the Arctic. The upper slope methane plumes do not reach the ocean's surface, but plumes from shallow-water seeps, which were only partially mapped, can inject methane into the atmosphere, increasing the concentration of this greenhouse gas. A news release is planned.

News Release–Historic Walrus Population Decline: On August 8, USGS will brief local FWS officials in Anchorage, Alaska, and distribute a press release on an analysis of Pacific walrus population data circa 1981 to 1999. The population declined over that period, though the decline moderated in the 1990s. The press release will elaborate on some of the possible causes for this pattern and explains that the USGS is working to collect and analyze population data since 1999. The FWS is under a court mandate to make a listing determination for Pacific walrus by 2017. A press release will follow the briefing.

UOG resource assessment for northeast Mexico: In the **coming weeks**, the USGS plans to release the assessment of unconventional oil and gas resources in northeast Mexico. This assessment is part of the USGS project that is assessing the undiscovered, technically recoverable unconventional oil and gas resources (including shale oil and shale gas) of the world. The recent exponential development and production of oil and gas from many U.S. and Canadian unconventional accumulations has escalated geopolitical interest in accumulations occurring outside the U.S. Previously published USGS assessments of unconventional resources have included areas in Poland, India, China, Denmark, and several countries in South America. The northeast Mexico assessment is notable because there are substantial unconventional oil and gas resources in Texas and it

is reasonable to ask what unconventional resources might exist in adjacent areas of Mexico. The report will be available online but no news release is planned. *[THIS WAS IN LAST WEEK'S REPORT]*

News Release–Requiem for the Santa Cruz: In the **coming weeks**, USGS will announce the recently published book, *Requiem for the Santa Cruz: An Environmental History of an Arizona River* (University of Arizona Press). The new book examines and explains the ecological consequences of human-caused landscape change and unsustainable water use in a western watershed. This book was funded through USGS.

News Release–New Findings on amount of oil dispersed from DWH: In the **coming weeks**, a new USGS paper will be published in the journal *Organic Geochemistry* that describes the approach of using asphaltene content and composition to estimate original oil losses from the spilled oils during the first 80 days of the Deepwater Horizon (DWH) oil spill and provides new estimates of the amount of spilled surface oil lost by evaporation and photo-oxidation. The paper is in press and available online. *[THIS WAS IN LAST WEEK'S REPORT]*

News Release–The impact of road salt on watersheds: In the **coming weeks**, the USGS plans to announce new research about increasing chloride concentrations in streams associated with the use of road salt. The paper is pending journal approval, but approval is expected within the next week or two. A news release will be coordinated with the publication date. *[THIS WAS IN LAST WEEK'S REPORT]*

News Release–Upper Klamath ET Maps: At the **end of September**, USGS will distribute a press release or upcoming evapotranspiration maps of the upper Klamath Basin. The announcement will be coordinated with other local activities in the Klamath area.

Major Press Inquiries

National Geographic to feature USGS water data: USGS scientists Eric Evenson and Nancy Barber have provided extensive historical and current water data in Western states for a major article on Western drought in the October issue of *National Geographic* (mid-September release).

USA Today Interview on Induced Earthquakes: USGS scientist William Ellsworth has been coordinating with *USA Today* regarding a story on injection-induced earthquakes and a potential visit to a well near Greeley, CO, within the next week.

Items of Note/Expected Legislative, Legal, Policy Issues

**WEEK-AHEAD REPORT:
ASSISTANT SECRETARY – POLICY, MANAGEMENT AND BUDGET
August 17 – August 26, 2014**

Message to the Secretary

Nothing to report

Highlights of Travel, Meetings, and other Public Events

A/S Rhea Suh will travel to San Francisco and Los Angeles to participate in informational community meetings with mainland Native Hawaiians regarding the Department's Native Hawaiian ANPRM.

Public Announcements

Wednesday, August 6

Major Press Inquiries

Nothing to report.

Items of Note/Expected Legislative, Legal, Policy Issues

ONRR will provide an RIK background briefing to Senate Energy Committee staffers at their request. The invitation stems from the proposed House legislation entitled the "American Helium Security Act of 2014," which would authorize the Secretary to take helium in-kind. The proposed act's RIK language bears great similarity to the RIK language embodied in the Energy Policy Act of 2005.

**WEEK-AHEAD REPORT: ASSISTANT SECRETARY – INDIAN AFFAIRS
AND THE BUREAUS OF INDIAN AFFAIRS AND INDIAN EDUCATION
August 5 to 15, 2014**

Optional Message to the Secretary

From ASIA: Nothing to report. Note: (b)(6)

(b)(6)

From Director BIA: Nothing to report.

From Director BIE: Thank you for the Indian Education discussion during your meeting with leadership of sister agencies. It was important for our leadership to hear Mr. Washburn's historical overview. That said, we now start the first school year under the new Bureau of Indian Education (BIE). We are working hard to make it as smooth as possible, but we would be kidding ourselves if it wasn't difficult. Finally, on July 31, the BIE submitted its fourth quarter corrective action plan as required by the U.S. Department of Education. The period covered by the report was April 1 to June 30, 2014.

Highlights of Travel, Meetings, and other Public Events

On August 5 and 6 Indian Affairs and BIA staff will make presentations at the BIA Midwest Region Partners in Action Conference in Minnesota. Staff will describe the proposed Gogebic Taconite Iron Mine which would be six miles upstream from the Bad River Indian Reservation in Wisconsin. The large open pit mine could have profound economic and environmental impacts in the area. Also, staff will present the Indian Child Welfare Act Guidelines for State Courts to share comment themes and hear from BIA social workers.

On August 6, the Indian Affairs' Office of Self-Governance will meet with the Sault Sainte Marie Tribe of Chippewa Indians for negotiations regarding a 2015 Funding Agreement.

On August 7, the Southwest Indian Polytechnic Institute (SIPI) will host the American Indian College Fund Research Conference on its campus in Albuquerque, NM.

On August 7 and 8, the National Indian Education Study Technical Review Panel will meet in Bethesda, MD. The BIE Director will provide an update on recent changes in the BIE.

On August 7, COS Harris and leadership from PMB and SOL will conduct a tribal consultation regarding the proposed ANPRM on Native Hawaiian reorganization on the Mohegan Reservation in Connecticut. Following the consultation, the same group will lead a public meeting on the same topic.

On August 8, the BIE Director Roessel will provide an update on BIE activities to the Gila River Indian Community's Education Department during their Reservation Wide Teacher In-Service meeting in Phoenix, AZ. The meeting's theme is "Decade of Difference."

On August 8, the Principal Deputy Assistant Secretary will discuss with the Turtle Mountain Band of Chippewa Indians law enforcement and education funding needs.

On August 11, Indian Affairs' Office of Self-Governance will present on self-governance policy to the Department of Justice – Office of Justice Programs. The presentation is part of the Justice Programs' Council on Native American Affairs

From August 11 to 16 Principal Deputy Assistant Secretary Roberts will travel to Geneva, Switzerland to participate in a State Department delegation at the United Nations. The delegation will testify at a hearing on the US periodic report on compliance with the Convention on the Elimination of All Forms of Racial Discrimination. State and local delegation members include the Arkansas Attorney General and the Mayor of Birmingham, Alabama.

On August 13, the Southwest Indian Polytechnic Institute will participate in the quarterly meeting with New Mexico Tribal Colleges and New Mexico Higher Education Department, Institute of American Indian Arts.

Public Announcements

Tuesday, August 5

A Federal Register notice proclaiming certain lands as Reservation for the Stillaguamish Tribe of Indians of Washington is proposed for publication today.

Indian Affairs will begin consulting on a proposed Rights-of-Way (25 CFR 169) rule which was published on Tuesday, June 17. AS-IA leadership will consult with tribes in Bismarck, ND.

Consultations continue in Scottsdale, AZ, on the Advanced Notice of Proposed Rulemaking to implement the special political and trust relationship between the Federal government and the Native Hawaiian community.

Wednesday, August 6

Indian Affairs will continue consulting on a proposed Rights-of-Way rule (25 CFR 169) with tribes Scottsdale, AZ.

In Prior Lake, MN, the BIA and the Indian Health Service will hold a regional consultation session with Indian tribes to identify long-term solutions concerning contract support costs.

Thursday, August 7

Notice of Approved Tribal-State Class III Gaming Compact (between the Cowlitz Indian Tribe and the State of Washington) is proposed for publication today in the Federal Registrar.

Indian Affairs will conclude consultation on a proposed Rights-of-Way (25 CFR 169) rule with a national teleconference consultation session.

Consultations on the Advanced Notice of Proposed Rulemaking to implement the special political and trust relationship between the Federal government and the Native Hawaiian community will conclude in Uncasville, CT.

Friday, August 8

Consultations continue in Seattle, WA on the Advanced Notice of Proposed Rulemaking to implement the special political and trust relationship between the Federal government and the Native Hawaiian community.

Saturday & Sunday August 9 & 10

Nothing to report

Monday, August 11

The Director for the Bureau of Indian Affairs will travel to Seattle, WA to meet on the Puget Sound water rights settlement. The meeting will involve five tribes in the Northwest Region.

Tuesday, August 12

Major Press Inquiries

Oregon Public Radio is asking how DOI's Blueprint for Reform for Indian education will affect BIE-operated schools in the Pacific Northwest, particularly Chemawa Indian School, and to talk with a BIE rep about it.

Futuro Media Group (www.futuromediagroup.org), an independent multimedia nonprofit organization that produces stories about the overlooked and underrepresented, is seeking the latest DUI statistics on Native Americans for a PBS public affairs series it's producing on the Three Affiliated Tribes and the impact of the recent oil boom on the tribe's lands.

County10.com, a local news site, is asking about an officer-involved shooting in Lander, WY, on the Wind River Reservation that occurred earlier this week.

Items of Note/Expected Legislative, Legal, Policy Issues

Federal Acknowledgment: The comment deadline on the rule on federal acknowledgement (25 CFR 83) and the companion rule (43 CFR 4, Subpart K) has been extended to September 30.

GAO visit to Indian Affairs offices & BIE facilities: The week of August 18, 2014, GAO will visit the Office of Facilities Management and Construction (which is located within Indian Affairs, Deputy Assistant Secretary – Management), BIA and BIE Albuquerque offices as part of the GAO review of BIE school facilities, including dormitories and staff housing (code 131310). GAO also plans to visit nearby BIE owned/operated and grant schools.

SIPI Personnel Matter: Southwest Indian Polytechnic Institute (SIPI) students who are displeased with the recent release of an instructor established a Facebook page for "character" letters that support the instructor. These same students will inform the media and a possible protest may occur in the future. The SIPI president informed the Board of Regents.

Marijuana and Detention Centers: The BIA's Office of Justice Services will follow up on two issues during the coming weeks. First, in late July the Office participated in a briefing for Representative Huffman regarding Law Enforcement Agencies on marijuana enforcement, particularly against large, outdoor, and environmentally harmful cultivators. Representative Huffman's interest is with the Yurok Reservation in California. Second, the Office is collaborating with the Department of Justice on Tribal Justice Construction and Renovation projects. Prior interagency conversations explored ways that Interior can better coordinate the funding and project management of the Department of Justice's Tribal Justice Infrastructure program.

Energy and Mineral Grant: Indian Affairs' Office of Indian Energy and Economic Development continue to encourage tribes to participate in an Energy and Mineral Development Program grant opportunity. The deadline for the grant application is August 25. The Office recently visited six Pueblo communities in New Mexico to explain the grant opportunity.

IBIA Timeline on Loan Decision: The Interior Board of Indian Appeals recently approved September 30, 2014, as the deadline for filing an administrative record in the Great American Life Insurance Company (Lower Brule) appeal. On June 27, 2014, the Board of Indian Appeals received a notice of appeal from the appellant, who seeks review of a June 17, 2014, adopting and affirming a December 23, 2013, decision to deny appellant's claim for loss under a loan guaranty issued by the Office of Indian Energy and Economic Development.

St. Croix River Watershed: Department offices are preparing internally for a meeting with Passamaquoddy tribe on the Alewife Fishery Management on the St. Croix River Watershed. The meeting with the tribe is to be determined. The State of Maine, the Passamaquoddy and the Province of New Brunswick are impacted by the watershed's management. The Tribe would like the Department's assurance that the US will not allow Maine to curtail fish passage in the future. The Tribe has also requested reassurance that the International Joint Commission (IJC) is responsible for overseeing the management of the alewife fishery in the St. Croix River watershed. The US and Canada acknowledged IJC responsibility in 1925 as evidenced by diplomatic communications from the Secretary of State to the British Ambassador to the US. Nevertheless, the State of Maine has unilaterally closed alewife fish passage without IJC supervision, resulting in damage to the international ecosystem and Indian trust resources. Generally speaking, the IJC has two main responsibilities: regulating shared water uses and investigating solutions for transboundary issues

WEEK-AHEAD REPORT: OFFICE OF THE SPECIAL TRUSTEE FOR AMERICAN INDIANS (OST)
August 5th -August 15th, 2014

Message to the Secretary

Dear Secretary Jewell,

This Monday, the newly established OST Employee Programs coordinated a “meet and greet” reception for me to interact with the staff located at OST Headquarters-West in Albuquerque, New Mexico. This was a great opportunity for me to meet face-to-face with my staff and to fully engage with the organization.

(b)(5)

I look forward to our visit to Indian Country in mid-August. I intend to spend 20%-30% of my time, per quarter, meeting with beneficiaries and OST field staff. These outreach events will focus on educating beneficiaries about enhancing their understandings of how to best utilize OST services. Laying the foundation for developing new opportunities to further improve financial literacy is also going to be a key component of these meetings.

Vincent G. Logan
Special Trustee for American Indians (ST)

Highlights of Travel, Meetings, and other Public Events

None to report.

Public Announcements

Tuesday, August 5

None to report.

Wednesday, August 6

On August 6-9, the Anadarko and Concho Fiduciary Trust Officers (FTO) will participate in the 81st Annual American Indian Exposition at the Caddo County Fairgrounds in Anadarko, Oklahoma. OST will provide an informational booth, in partnership with Bureau of Indian Affairs (BIA); Office of Natural Resources Revenue (ONRR); Bureau of Land Management (BLM); and Bureau of Ocean Energy Management (BOEM). Information regarding OST special projects, whereabouts unknown (WAU), direct deposit, Wills Project and the Land Buy-Back Program (LBBP) will be provided.

Thursday, August 7

On August 7-10, 2014, the Winnebago Agency staff will attend and staff an information table at the 210th Umonhon Hedewachi, also known as the Omaha Tribe Harvest Festival Powwow in Macy, Nebraska. OST will distribute information regarding OST trust services and the Land Buy-Back Program (LBBP).

Friday, August 8

On August 8-9, the Tulsa Fiduciary Trust Officer (FTO) will participate in the 37th Annual Powwow of Champions at The Mabee Center in Tulsa, Oklahoma. Information on OST services, LBBP, financial literacy educational services, and credit counseling will be provided.

Monday, August 11

On August 11, the Cherokee and Eastern Oklahoma Fiduciary Trust Officers (FTO) will attend the Cherokee Nation Tribal Council Meeting scheduled to be held in Tahlequah, Oklahoma. The FTOs regularly attend these monthly meetings to maintain accountability to tribal leaders and beneficiaries.

Tuesday, August 12-Friday, August 15

WEEK-AHEAD REPORT: OFFICE of INSULAR AFFAIRS
August 6-15, 2014

Highlights (Chronologically) of Travel (AS-IN), Meetings and other Public Events

Nothing to report.

Public Announcements

August 6-15: nothing to report.

Major Press Inquiries

August 6-15: nothing to report.

Items of Note/Expected Legislative, Legal, Policy Issues

Official Travel to Guam, the Commonwealth of the Northern Mariana Islands and Palau – The Director of OIA and OIA's Deputy Budget Director are accompanying OMB's Interior Branch Chief and DOI's Director of Budget August 2-16 for:

- meetings with the Governors of Guam and the CNMI, the President of Palau, the leadership of the Palau National Congress and the Commander of the Naval Forces Marianas and
- site visits to public high schools, universities, hospitals and utilities systems; the Brown Tree Snake Control Program; FWS and NPS facilities and the International Coral Reef Institute

Insular Developments on Capitol Hill –

- On August 7 the HHS Centers for Medicare and Medicaid Services (CMS) will host a tele-conference on the applicability of the Affordable Care Act (ACA) to the territories. The purpose of the tele-conference is to explain further the July 16 CMS letters to the territorial governments stating that the lack of inclusion in the definition of *state* precludes territories from ACA insurance provisions. Territorial administrators and representatives from the Members' offices have been invited to participate.
- On July 31 Congresswoman Madeleine Z. Bordallo (Dem.-Guam) introduced with Congressman Eni Hunkin Faleomavaega (Dem.-Am. Samoa) as an original co-sponsor legislation that would allow Government of Guam and American Samoa Government employees to participate in Social Security and Medicare. Congresswoman Bordallo's move was in response to a request of the Guam Legislature.

Fatal Flash Floods in American Samoa – On July 30 the American Samoa Department of Homeland Security confirmed the death of a sixteen-year-old girl who was swept out to sea on July 29, when the Faga'alu stream overflowed in the Village of Faga'alu in the Eastern District of Tutuila, American Samoa's principal island. In addition, landslides in the Gataivai section of the Village of Utulei (Eastern District of Tutuila) have demolished two houses and damaged a church. There was considerable water damage in the areas surrounding Pago Pago Bay. American Samoa Government offices re-opened on July 31. Estimated losses top \$4,000,000. FEMA has reported that since July 29 American Samoa has received approximately fifteen inches of rainfall across Tutuila. According to FEMA there have been three unconfirmed fatalities and ten to twenty houses destroyed.

Mandatory evacuations remain in effect for fifty families. The American Samoa Government's Emergency Operations Center has been partially activated, and two shelters are open with eighty occupants.

Over Eight Million Dollars in July Through OIA to the Marshall Islands – Last month the Marshall Islands Ministry of Finance received Compact-funded payments through OIA totaling \$8,003,293:

- July Education Sector Grant and the College of the Marshall Islands – \$1,085,000
- July Health Sector Grant – \$525,000
- July Kwajalein Atoll Environmental Impact Grant – \$20,000
- July Ebeye Island Special Needs Education Grant – \$160,000
- July Ebeye Island Special Needs Health Grant – \$165,000
- July Environment Grant (Majuro Atoll Waste Company) – \$79,000
- Majuro Atoll Solid Waste Infrastructure Grant – \$545,900
- Fiscal Year 2014 Fourth-Quarter Kwajalein Atoll Landowner Payment – \$3,000,000
- Enewetak Atoll Food and Agriculture Program – \$270,000
- Fiscal Year 2013 Supplemental Education Grant – \$1,174,563
- Four-Atoll Health Care Program – \$879,004
- Technical Assistance Grant for Auditor General's Office – \$14,006
- Technical Assistance Grant for Ministry of Public Works' Storm Sewer Project – \$85,820

OIA Grant of \$125,000 to American Samoa – With funds from OIA's Technical Assistance Program the American Samoa Power Authority (ASPA) has signed apprenticeship agreements with three students to study at the Manukau Institute of Technology in Auckland, New Zealand. The students will undergo a rigorous two-year program in electrical engineering followed by three years of field work. Upon completion of their certification program, the students will be required to work for ASPA for five years.

DOI in the News:

SECRETARY JEWELL VISITS REDDING AND DISCUSSES WILDFIRE PREVENTION. The [Redding \(CA\) Record-Searchlight](#) (8/13, 92K) reports that Interior Secretary Sally Jewell "visited Redding on Tuesday and touted a new way to pay for fire prevention, which she said annually is looted to pay for fire suppression." Jewell "met with firefighters battling the thousands of acres burning across the North State and toured facilities at the Northern California Geographic Area Coordination Center in Redding." During her tour, Jewell said "federal officials

are caught in a downward spiral of taking money from fire prevention and using it for fire suppression." According to Jewell, "two bills in Congress, which the Obama administration supports, would change how firefighting is funded and prevent taking money from prevention."

Also covering the story is KFBK-AM Sacramento, CA (8/13).

Lightning Sparks Dozens Of New Fires In Northwest. The [AP](#) (8/13) reports that "lightning has started dozens of new wildfires in the Northwest, forcing incident commanders to juggle crews and equipment Tuesday as a new round of storms approached." President Barack Obama "signed a disaster declaration Monday for Washington state, where hundreds of homes have burned in wildfires in the past month." It "orders federal aid to supplement state, tribal and local recovery efforts in Okanogan County and the Confederated Tribes of Colville Reservation, and says federal funding also is available for hazard mitigation."

Coverage by the AP was also picked up by the [Bellingham \(WA\) Herald](#) (8/12, 143K), the Clark County (WA) [Columbian](#) (8/12, 109K), and the [York \(SC\) Enquirer-Herald](#) (8/12, 18K). Additional coverage was provided by the [Washington Post](#) (8/13, 4.06M), the [Denver Post](#) (8/13, 923K), the [Sacramento \(CA\) Bee](#) (8/13, 582K), and [Fox News](#) (8/13, 6.72M).

Man Pleads Not Guilty To 2013 Wildfire. The [AP](#) (8/12) reports that "a Northern California man accused of starting one of the state's largest wildfires when he lost control of his campfire last year can leave jail while the criminal case plays out in court, a federal judge said Tuesday." US District Magistrate Judge Gary Austin said Keith Matthew Emerald, 32, "can post a \$60,000 property bond if he wants to go free." Austin also "set a list of conditions, including one that prohibits Emerald from lighting any campfires."

Also reporting on the story is the [Los Angeles Times](#) (8/13, Rocha, Mather, 3.42M).

SECRETARY JEWELL AGREES TO MEET WITH KLAMATH SALMON ADVOCATES. The [AP](#) (8/13) reports that Jewell "agreed to an impromptu meeting with salmon advocates demanding more water for salmon in Northern California's Klamath and Trinity rivers." After the Tuesday meeting in Redding, California, salmon advocate Regina Chichizola said Jewell "agreed to send someone to assess the situation, but made no promises." The article notes that "members of the Hoopa Valley Tribe and others have been pressing the Obama administration to release more water from Lewiston Dam on the Trinity."

Coverage by the AP was also picked up by the [Sacramento \(CA\) Bee](#) (8/12, 582K), The [Oregonian](#) (8/13, 827K), [KFMB-TV San Diego](#) (8/13, 15K), [KTVN-TV Reno, NV](#) (8/13, 1K), and [KTVZ-TV Bend, OR](#) (8/13, 1K).

Also reporting on the story are the [Eureka \(CA\) Times Standard](#) (8/13, 76K) and [KIEM-TV Eureka, CA](#) (8/13, 428).

Secretary Jewell Urged To Consider Releasing Water From Trinity Lake. The [Willits \(CA\) News](#) (8/13, 10K) reports that "the Humboldt County Board of Supervisors took further action on the ongoing statewide drought during its Tuesday meeting by extending the local state of emergency and sending a letter to the federal government asking it to approve fish-kill preventative releases on the Klamath and Trinity rivers." The letter to the Jewell "urges her to consider releasing water from Trinity Lake into the Trinity and Klamath rivers to address low flows and warm temperatures that could lead to a potential fish kill."

The story also appears at the [Eureka \(CA\) Times Standard](#) (8/13, 76K).

SECRETARIES JEWELL, MONIZ DISCUSS ENERGY DEVELOPMENT. The [E&E Daily](#) (8/12) reports that "the Southwest needs a lot of work before it can overcome the challenges of exporting energy to markets, according to two officials in the Obama administration." Interior Secretary Sally Jewell and Energy Secretary Ernest Moniz met with dozens of tribal and state authorities on Monday "in Santa Fe, N.M., in an effort to develop recommendations on transmitting, storing and distributing energy." The two officials said "one of the biggest problems in tapping the region's great traditional and renewable energy potential was working across state lines and Native American jurisdictions to build pipeline and transmission projects."

Additional coverage was provided by the [AP](#) (8/13). Coverage by the AP was also picked up by the [Worcester](#)

(MA) [Telegram & Gazette](#) (8/11, 208K) and [KOB-TV](#) Albuquerque, NM (8/13, 59K).

Tribes Discuss Concerns At Energy Review Meeting. The [Nation Sun News](#) (8/13) reports that "tribal leaders took part in a day-long meeting hosted by the Department of Energy on Monday." Tribal officials "discussed jurisdictional issues at two panels during the meeting." They also offered comments to Energy Secretary Ernest Moniz and Interior Secretary Sally Jewell.

NATIONAL REGISTER OF HISTORIC VEHICLES PUSHED DURING DREAM CRUISE WEEK. The [Detroit News](#) (8/13, Abdel-Razzaq, 495K) reports that the National Historic Vehicle Register Act of 2014 was "introduced at the end of July by U.S. Rep. Gary Peters, D-Bloomfield Township, and U.S. Rep. John Campbell, R-Calif." The measure would allow the Interior Department "to work with the Historic Vehicle Association, the world's largest historic vehicle owners group, to document and preserve the most significant automobiles around today." The article notes that "the announcement comes during the week of the Woodward Dream Cruise, which regularly draws tens of thousands of classic cars and hot rods to Metro Detroit."

ADDITIONAL COVERAGE: INTERIOR DESIGNATES PARCELS OFF NORTH CAROLINA COAST FOR WIND DEVELOPMENT. Additional coverage that the BOEM has designated three areas off the coast of North Carolina for the potential development of offshore wind power was provided by the [AP](#) (8/13).

Coverage by the AP as also picked up by the [Columbus \(IN\) Republic](#) (8/13, 81K), the [Washington Times](#) (8/12, 465K), the [Seattle Post-Intelligencer](#) (8/13, 857K), the [Lakeland \(FL\) Ledger](#) (8/12, 140K), [WCTI-TV](#) Greenville, NC (8/13, 52K), [WHNS-TV](#) Greenville, SC (8/13, 106K), and [WITN-TV](#) Washington, NC (8/13, 52K).

Also reporting on the story are the [Raleigh \(NC\) News & Observer](#) (8/11, 456K), the [Burlington \(NC\) Times-News](#) (8/13, 57K), the [Hampton Roads \(VA\) Virginian-Pilot](#) (8/13, 405K), the [North American Windpower](#) (8/13, 43K), the [Fierce Energy](#) (8/13), the [Clean Energy](#) (8/12), and [WUNC-FM](#) Chapel Hill, NC (8/13, 15K).

ADDITIONAL COVERAGE OF NATIVE HAWAIIAN RELATIONS. Additional coverage of Native Hawaiian relations was provided by the [Government Executive](#) (8/13, 28K).

UTAH DEPARTMENT OF TRANSPORTATION URGED TO GIVE UP ON WEST DAVIS CORRIDOR. The [Salt Lake \(UT\) Tribune](#) (8/13, 470K) editorializes that the Utah Department of Transportation has "made a wise decision by delaying, again, moves toward building the planned West Davis Corridor freeway." But, according to the editorial, "it would be wiser still for UDOT to just come out and admit that the plan has so many deserved enemies, and so many serious flaws, that it should be shelved altogether, once and for all." The paper notes that "the official reason for yet another delay in the planning process, announced Monday, is that the state needs more time to fully examine an alternative, promoted by environmental groups, the US Interior Department and Corps of Engineers and some local elected officials, including those who run the city of Farmington."

America's Great Outdoors:

National Park Service:

NEW ROAD TO GRAND CANYON SKYWALK CELEBRATED. The [AP](#) (8/12) reports that "officials from the Hualapai Tribe gathered Tuesday for a ceremonial grand opening of a road that had been a major headache for tourists headed to the Grand Canyon Skywalk." According to the article, "crews recently paved the final 9-mile stretch of dirt and gravel road that had four operators complaining of broken windows, flat tires, missing hubcaps and dust."

Coverage by the AP was also picked up by [Fox Business](#) (8/12, 333K), [Yahoo!](#) (8/13, Fonseca, 10.35M), the [Sacramento \(CA\) Bee](#) (8/12, 582K), the [Kansas City \(MO\) Star](#) (8/13, 1.39M), and the [Durango \(CO\) Herald](#) (8/12, 28K).

THREE BODIES FOUND ON MOUNT RAINIER NEAR WHERE CLIMBERS VANISHED. The [Los Angeles Times](#) (8/13, Queally, 3.42M) reports that "bodies of three people who may have been among six climbers killed in a fall on Mt. Rainier in late May were discovered last week, officials with the National Park Service said Tuesday." Patti

Wold, a spokeswoman for the NPS, said that "the three bodies were found last week during an aerial search of Carbon Glacier." According to the article, "though rescue crews were unable to identify the gender or ages of the victims, Wold said their bodies came to rest in the area where parks officials had been searching for the missing climbers." She said, "We're trying to figure out if there's a safe way to get in there so we can remove the remains and try to give their family some closure."

Also reporting on the story is [Reuters](#) (8/13, Cavaliere).

NUDISTS FIGHT NUDE BEACH BAN ON FIRE ISLAND. The [New York Post](#) (8/13, 2.52M) reports that "after Hurricane Sandy destroyed a large part of Fire Island's considerable dunes — essentially the curtain separating the lighthouse from the beach — park officials unceremoniously announced a ban on the clothing-optional section that comprised two 500-foot stretches." That has sparked a "grassroots movement against the ban on naked discrimination called 'Save Lighthouse Beach,' which is backed by the Naturist Action Committee, a national organization." The article notes that "last Saturday, hundreds of nudists turned out on the shore — some in semi-private camps partitioned off by makeshift curtains, others completely nude or in barely-there bottoms."

ROCKY MOUNTAIN NATIONAL PARK CONSIDERS CLOSING CRATER TRAIL. The [Sky-Hi Daily News \(CO\)](#) (8/13, 728) reports that "due to excessive erosion and damage to sensitive natural and cultural resources, the Crater Trail, a short trail located on the west side of Rocky Mountain National Park, will remain closed to use for the remainder of this year, according to the National Park Service." Moreover, "park staff are considering closing the Crater Trail permanently." Park personnel say "the trail is not sustainable in its current location and is subject to erosion, which is damaging cultural and natural resources, including alpine tundra," and "improving the trail in its current location is not desirable because the cost of long term maintenance would be excessive, according to park officials."

GREENS BAYOU COALITION WORKS TO MAKE IMPROVEMENTS. The [Houston Chronicle](#) (8/13, Meeks, 2.02M) reports that "since 2007, the Greens Bayou Corridor Coalition has been working to make improvements along the way." The article notes that "most recently, it completed a strategic plan for a 27.5-mile bayou paddle trail, the creation of the Ida Gaye Park for seniors in north Houston and a master plan that outlines parks and trail projects for the entire span of the bayou." The coalition developed its master plan in partnership with the National Park Service's Rivers, Trails and Conservation Assistance Program.

WOMAN ACCUSED OF STEALING \$42,000 FROM YOSEMITE CHILD CARE CENTER. The [Sacramento \(CA\) Bee](#) (8/12, 582K) reports that "a 40-year-old Sonora woman is accused of embezzling more than \$42,000 from the Yosemite National Park Child Care Center, US Attorney Benjamin B. Wagner announced Tuesday." Charity Brocchini was "served a summons to appear Tuesday in the case, according to a press release from Wagner's office." According to the article, "a federal grand jury in Fresno on Thursday returned with an indictment, charging her with two counts of wire fraud and one count of embezzlement concerning a program receiving federal funds."

NEW SUPERVISOR OF FOUR NPS SITES ANNOUNCED. The [Rock Hill \(SC\) Herald](#) (8/12, 112K) reports that John Slaughter, "a 13-year veteran of the National Park Service and supervisor of two US parks in South Carolina, has been named supervisor of a newly formed federal park group." Slaughter will "supervise Kings Mountain National Military Park, Cowpens National Battlefield, Ninety Six National Historic Site and the Overmountain Victory National Historical Trail." Slaughter said, "These four National Park sites play a significant role in preserving and making relevant the history of a fledgling nation, especially that of American Revolutionary War battles in the Southern states."

Also reporting on the story is the [Charlotte \(NC\) Observer](#) (8/12, 544K).

NPS URGED TO CONSIDER CHANGES TO DEAL WITH GROWING DENALI NATIONAL PARK CROWDS. For the [Anchorage \(AK\) Dispatch News](#) (8/12, 251K), John Schandelmeier writes that as visitors to Denali National Park grows, the NPS "may need to consider some changes." According to Schandelmeier, "wildlife viewing opportunities remain excellent, especially for grizzlies and caribou," but, "the quality of the experience is steadily declining due to crowds of people everywhere." He concludes that "now is the time to solve the congestion that is beginning to defeat the basic premise of the park."

Bureau of Land Management:

NEW BLM CHIEF FOR COLORADO VISITS DURANGO. The [Durango \(CO\) Herald](#) (8/12, 28K) reports that "the new director of the Bureau of Land Management for Colorado arrived in Durango on Tuesday for a four-day orientation tour of Southwest Colorado." Ruth Welch will "visit Silverton; the ghost town of Animas Forks; BLM holdings around Durango, including the Perins Peak State Wildlife Area and Grandview; the Tres Rios field office in Dolores; and the Spring Creek area." Welch said, "A major goal will be to balance development and conservation. I have the collaborative skills to bring diverse elements to the table."

BLM DELAYS WYOMING WILD HORSE ROUNDUP. The [County 10](#) (8/12) reports that the BLM has "agreed to delay the proposed roundup of more than 800 wild horses in Wyoming to allow the court time to rule on a motion for a temporary restraining order and/or preliminary injunction filed late Friday by the American Wild Horse Preservation Campaign (AWHPC), The Cloud Foundation, Return to Freedom, and wild horse photographers Carol Walker, Wild Horse Freedom Federation Board Member, and Kimerlee Curyl." The bureau has "agreed to postpone the roundup until at least September 1, in order to give the court time to rule on the motion."

Film Aims To Save Wild Horses. The [Chicago Sun-Times](#) (8/12, 1.03M) reports that "Jennifer Gage, a South Barrington resident who's been involved in animal rescue efforts for most of her adult life, is hosting a special screening" of "American Mustang" at "the AMC South Barrington 30 on Aug. 20, in an effort to promote an awareness of the troubling circumstances the US Bureau of Land Management has imposed on the American mustang."

BLM PLANS TO SELL 40 PARCELS OF PUBLIC LAND IN CLARK COUNTY. [KSNV-TV Las Vegas](#) (8/13, 12K) reports that the BLM "plans to sell 40 parcels of public land in Clark County totaling 516.8 acres, the agency announced Monday." The article notes that "the funds from the sale of the land will be used throughout Nevada for projects including the development of parks, trails and natural areas, capital improvements on federal lands, acquisition of environmentally sensitive land and landscape restoration projects."

Also reporting on the story is the [Las Vegas Review-Journal](#) (8/13, 386K).

Fish and Wildlife Service:

FWS WITHDRAWS PROPOSED PROTECTIONS FOR WOLVERINES. The [E&E Daily](#) (8/12) reports that the FWS announced Tuesday that "it would not list the American wolverine as a threatened species, against the advice of its own biologists." The article notes that "the decision is sure to spark outrage among environmentalists who say climate change will drastically reduce the wolverine's snowy habitat in the next few decades." However, "predicting the effect of global warming on a specific species is difficult, and states have argued that such predictions are premature." In a statement, FWS Director Dan Ashe "emphasized that while climate change has real consequences, its effect on wolverines is uncertain."

The [E&E Daily](#) (8/12) reports that Ashe said that "he was 'proud' of his agency's decision to not list the American wolverine as a threatened species, even as environmental groups announced their plans to challenge it in court." Environmental groups said that the FWS was "ignoring the 'best available science' on climate change as well as other threats to wolverines, such as their low numbers and limited genetic diversity." A coalition of nine groups said "they would sue FWS for refusal to protect wolverines under the Endangered Species Act."

The [AP](#) (8/13) notes that "the decision carries potential ramifications for other species affected by climate change — including Alaska's bearded seals, the Pacific walrus and dozens of species of corals — as scientists and regulators grapple with limits on computer climate models."

Coverage by the AP was also picked up by the [Sacramento \(CA\) Bee](#) (8/12, 582K), the [San Francisco Chronicle](#) (8/13, 2.87M), the [St. Paul \(MN\) Pioneer Press](#) (8/13, 558K), the [Fort Wayne \(IN\) Journal-Gazette](#) (8/13, 172K), the [Casper \(WY\) Star-Tribune](#) (8/13, 90K), the [US News & World Report](#) (8/12, 645K), [Yahoo!](#) (8/13, Brown, 10.35M), and [WJBK-TV Detroit](#) (8/13, 216K). Earlier coverage by the AP was provided by the [Washington Times](#) (8/12, 465K), the [Spokane \(WA\) Spokesman-Review](#) (8/12, 170K), the [Guardian \(UK\)](#) (8/12, 1.96M), [Yahoo!](#) (8/13, Brown, 10.35M), [NWCN-TV Seattle](#) (8/13, 48K), and [KING-TV Seattle](#) (8/13, 191K).

Also reporting on the story are [The Hill](#) (8/13, Cama, 237K), [Reuters](#) (8/13, Zuckerman), the Los Angeles Times (8/13, Sahagun, 3.42M), the [Salt Lake \(UT\) Tribune](#) (8/13, 470K), the [Denver Post](#) (8/13, Finley, 923K), the [Summit County \(CO\) Citizens Voice](#) (8/12, 506), the [Idaho Statesman](#) (8/12, 222K), the Lexington (KY) Herald-Leader (8/12, 353K), the Prairie (MT) Star (8/13), the [Boise State \(ID\) Public Radio](#) (8/13), the [Oregon Public Broadcasting](#) (8/13, 4K), [NBC News](#) (8/13, 7.5M), [KCSG-TV](#) St. George, UT (8/13, 43), [KWYB-TV](#) Butte, MT (8/13), [KCET-TV](#) Los Angeles (8/13, 15K), [KECI-TV](#) Missoula, MT (8/13, 2K), and [KTVZ-TV](#) Bend, OR (8/13, 1K).

FWS WANTS BLM, STATES TO SHOW LOCAL SAGE GROUSE EFFORTS ARE WORKING. The [E&E Daily](#) (8/12) reports that "if state land-management programs and partnerships are as successful in protecting the greater sage grouse as Western leaders argue they are, the Fish and Wildlife Service wants to see the proof." The agency has "alerted state governors, local leaders and private groups, as well as the Bureau of Land Management and American Indian tribes, that it wants information on these efforts as part of its ongoing review of the sage grouse and whether the bird should be proposed for listing under the Endangered Species Act by a September 2015 deadline." Specifically, the FWS "wants detailed data on the regulations, plans and projects that have been implemented, or that are expected to be implemented, to protect the greater sage grouse and its dwindling sagebrush steppe habitat."

Also covering the story are the [Deseret \(UT\) News](#) (8/13, 538K) and [KXLO-FM](#) Lewiston, MT (8/13).

FWS DECIDES NOT TO ISSUE NEW PROTECTIONS FOR WARTON'S CAVE MESH WEAVER. [The Hill](#) (8/13, Devaney, 237K) reports that the FWS "announced Tuesday it will not issue new protections for a small species of spiders without eyes, known as Warton's cave mesh weaver or *Cicurina wartoni*." According to the article, "animal conservation groups had petitioned the FWS to add the eyeless spider to the Endangered Species List, but the agency determined it is not distinct enough from other types of spiders to warrant its own protections."

WILD HORSES ON OUTER BANKS FACE THREATS. [McClatchy](#) (8/13, Cockerham, Subscription Publication, 23K) reports that the wild horses on North Carolina's Outer Banks "now face serious threats, say those who manage the herd: a boom in McMansion-style vacation homes on this once-pristine stretch of coast and federal policies that are leaving the mustangs severely inbred and starting to suffer from genetic deformities." The government has "described the herd, some of the last remaining wild horses in the Eastern United States, as pests that compete for resources with federally protected birds." Rep. Walter Jones "unanimously passed his bill in 2012 and 2013 to allow the herd to grow to 130 horses and to let the Corolla Wild Horse Fund bring a few horses from the Shackleford Banks, on another island at the far southern tip of the Outer Banks, in order to infuse some fresh genes into the herd." However, "the bill has been opposed by the US Fish and Wildlife Service, and it goes nowhere in the Senate."

NEW YORK PASSES LAW AGAINST IVORY TRADE. The [New York Times](#) (8/12, 9.79M) reports that "New York's Governor Andrew Cuomo on Tuesday signed one of the toughest laws in the nation banning the sale of elephant ivory and rhinoceros horns as a 'stand against a dangerous and cruel industry.'" New York will "not allow trade in anything but 100-year-old antiques with small amounts of ivory (and documented proof of provenance), musical instruments made before 1975, pieces used for education or scientific purposes such as museums and items handed down through estates." According to the article, "if it works as intended, the flow of ivory into New York — often ranked the number one importer of ivory in the United States — should soon slow to virtually nothing."

Additional coverage of ivory regulations was provided by the [International Business Times](#) (8/13, 697K).

OHIO AIRPORT PLANTS TALL GRASS TO AVOID BIRD-PLANE COLLISIONS. The [E&E Daily](#) (8/12) reports that "one Ohio airport is experimenting with a natural remedy to prevent bird-plane collisions, which cost the aviation industry an estimated \$950 million a year and countless birds their lives." Dayton International Airport, "a small 56-commercial-flight-a-day airport, saw 218 wildlife strikes between 2001 and 2013, but instead of shooting or poisoning the birds as other airports have, officials teamed up with the nearby Aullwood Audubon Center and Farm to convert 300 acres of buffer zones around runways to tall prairie grass." Officials "hope the grass will ward off birds that like to land in the open areas surrounding airports."

MAN SENTENCED FOR TRAFFICKING IN LOBSTERS. The [E&E Daily](#) (8/12) reports that a Florida man on

Monday "pleaded guilty and was sentenced for trafficking spiny lobsters." US District Judge James Lawrence King sentenced Eric Burman, "60, to three years of probation and a \$250,000 fine."

FWS DIRECTOR ASHE: NO PLANS TO BRING GRIZZLIES BACK TO CALIFORNIA. In a letter to the Los Angeles Times (8/12, 3.42M), FWS Director Dan Ashe asserts that the FWS has "absolutely no intention of reintroducing grizzlies" to California.

US Geological Survey:

USGS MONITORING LANDSLIDE RISK IN COLORADO. KUSA-TV Denver (8/12, 226K) reports that the USGS have "been keeping an eye on Colorado" for landslides and mudslides. The USGS "recently completed a study of landslides that occurred during the September 2013 floods."

Securing America's Energy Future:

Renewable Energy:

WIND INDUSTRY FACES UNCERTAIN POLITICAL LANDSCAPE. The E&E Daily (8/12) reports that "the wind industry is touting increased construction activity and power purchases from some of the country's largest companies to argue for an extension of its key federal incentive – amid an uncertain political landscape that could be heavily influenced by the outcome of November's election for control of the Senate." The article notes that "gridlock on Capitol Hill has so far prevented a renewal of the production tax credit, which expired last year alongside dozens of ostensibly temporary 'tax extenders.'" According to the article, "while the credit enjoys bipartisan backing, Democrats are more unified in support of the PTC and other clean energy incentives, while resistance has grown among Republicans, fueled partly by critiques leveled from outside conservative groups." The article notes that "the industry has been working to boost its allies in both parties, but an analysis of Senate contributions from the American Wind Energy Association's political action committee and some of its leading companies shows an emphasis on giving to Democrats up for re-election and far less to Republicans in tough races, according to an analysis of contributions that have been reported so far this cycle."

BLM ADVANCING CHOKECHERRY AND SIERRA MADRE WIND ENERGY PROJECT TOWARD CONSTRUCTION PHASE. The E&E Daily (8/12) reports that the Obama Administration "continues to move a massive wind farm project that proposes to string together 1,000 turbines across nearly 220,000 acres of public and private lands in southeast Wyoming closer to construction." The BLM this week "issued a preliminary environmental assessment (EA) of some of the infrastructure projects needed to build the massive Chokecherry and Sierra Madre Wind Energy Project, which would have the capacity to produce up to 3,000 megawatts of electricity, making it the biggest power-producing wind farm in North America." In addition to the EA, the bureau "this week also released a draft finding of no significant impact (FONSI) concluding that the project would not cause any significant additional impacts beyond what was analyzed in the final EIS and ROD nearly two years ago."

MEETINGS ON OFFSHORE WIND POSTPONED. The Cape Cod (MA) Times (8/12, 97K) reports that "a series of meetings planned by the federal agency for permitting offshore wind energy projects to show what turbines in areas off Martha's Vineyard and Rhode Island might look like and to answer questions have been postponed." According to a notice from the BOEM, "the meetings, including a session on Nantucket originally scheduled for later today, were postponed due to 'unforeseen scheduling conflicts.'" Officials "hope to reschedule the meetings, which were planned for Nantucket, Vineyard Haven, Block Island in Rhode Island and at the University of Rhode Island over the next two weeks, next year."

Onshore Energy Development:

SETTLEMENT OBTAINES YEARS OF LITIGATION OVER COLORADO DRILLING. The AP (8/12, 582K) reports that a settlement between the Federal and local governments in Colorado will end "several years of litigation" over drilling on the Roan Plateau. Under the settlement, Bill Barrett Corp. will be reimbursed \$28 million to relinquish Federal oil and gas leases in controversial areas of the plateau, but will be allowed to drill in less

disputed areas.

The Glenwood Springs (CO) Post Independent (8/13, 27K) reports that "the Hickenlooper administration believes a settlement that allows some energy development to proceed while protecting other areas of the Roan Plateau is in the interest of all parties," according to Henry Sobanet, director of Hickenlooper's Office of State Planning and Budgeting. The proposed settlement has been lauded by Barrett Corp., environmental groups, and the Federal government as a "win-win," although some local governments have expressed uncertainty.

TRIBES URGED TO BAN FRACKING ON RESERVATIONS. The Nation Sun News (8/13) reports that "Last Real Indians (LRI) and Honor the Earth are among Native American organizations calling for pressure on tribal councils to approve anti-fracking resolutions, as efforts increase to drill for fossil fuel in treaty territory." LRI's Matt Remle said, "This relatively new form of extracting oil and natural gas is generating serious environmental impacts, depletion of aquifers and negatively impacting human health." Honor the Earth "contends that wastewater produced 'is polluted with hazardous fracking chemicals, oil and hydrocarbons, radioactive radon, and biocides, and there is no process or technique for treating this water.'"

TEXAS' DRILLING INDUSTRY MAKES PROGRESS ON WASTEWATER RECYCLING. The E&E Daily (8/12) reports that "under pressure during a drought, Texas' drilling industry is making progress in wastewater recycling." According to Marcus Gay, a former water analyst at HIS, "in Texas' Eagle Ford and Permian Basin, 10 to 20 percent of water used in hydraulic fracturing comes from recycling now, and that figure will double in the next 10 years." However, "despite growing pressure, wastewater recycling remains a costly process that not all companies can afford, making buying fresh water the go-to option even as the state's aquifers drain."

TEXAS RAILROAD COMMISSION PROPOSES NEW RULES TO ADDRESS INCREASED SEISMIC ACTIVITY. The Fort Worth (TX) Star-Telegram (8/12, Baker, 550K) reports that the Texas Railroad Commission proposed new rules today in an attempt to address the increase in earthquakes. The new rules would require drillers to provide additional information before drilling in areas where there has been seismic activity and would allow the commission to suspend or terminate a permit if a problem with the injection well does occur. The commission had faced criticism "for not acting more quickly to determine if wastewater injections wells" are linked to the increase in seismic activity.

FRACKING OCCURS AT SHALLOWER DEPTHS THAN PREVIOUSLY THOUGHT, NEW RESEARCH SHOWS. The Los Angeles Times (8/13, Banerjee, 3.42M) reports that new research shows that fracking is occurring at far shallow depths than was previously thought. The industry "has long held that it does not hydraulically fracture into underground sources of drinking water" because oil and gas deposits sit far deeper than aquifers, however, the study shows drilling occurring at 700 to 750 feet. The study's authors say that "any fracking within a thousand feet of the surface should be more clearly documented and face greater scrutiny" because the effects on groundwater resources at this level are not known.

Offshore Energy Development:

BOEM FUNDS PROJECT TO CATALOG GEORGIA'S SAND. The Savannah (GA) Morning News (8/12, 226K) reports that "as Tybee Island prepares for its latest beach renourishment, scheduled to begin in November, a Skidaway researcher is cataloging Georgia's sand resources." UGA Skidaway Institute professor Clark Alexander is "heading up the effort to describe what's known about the sand off the Peach State and identify where data gaps exist." According to the article, "the \$200,000 project, funded by the federal Bureau of Ocean Energy Management, focuses on the area 3-8 miles offshore, but Alexander will catalog inshore areas as well."

OYSTER HARVESTS DECLINE AFTER GULF SPILL. The E&E Daily (8/12) reports that "oyster harvests in the Gulf of Mexico have dramatically declined in the four years since BP PLC's Deepwater Horizon oil spill, raising concerns among fishermen." According to the article, "oyster beds where oil once washed ashore are producing less than a third of their pre-spill harvest." Meanwhile, "BP contends it is not to blame for the oyster downturn."

The AP (8/12) reports that BP senior vice president Geoff Morrell argues that "data from government studies have indicated it is likely due to other condition." Regardless of the cause, "the harvest is way down, and prices are way up as a result."

ADDITIONAL COVERAGE: INVESTIGATION URGES NEW OFFSHORE WELL BOLT STANDARDS. Additional coverage of the review of "bolting/connector performance in subsea marine applications" was provided by the [Rigzone](#) (8/13, 8K).

Tackling America's Water Challenges:

DROPPING LAKE MEAD WATER LEVELS RAISES CONCERNS. The [AP](#) (8/13, Ritter) reports that "the receding shoreline" at Lake Mead, "one of the main reservoirs in the vast Colorado River water system is raising concerns about the future of a network serving a perennially parched region home to 40 million people and 4 million acres of farmland." According to the article, "marina operators, water managers and farmers who for decades have chased every drop of water across the booming Southwest and part of Mexico are closely tracking the reservoir water level already at its lowest point since it was first filled in the 1930s." the article notes that "last week, officials announced an \$11 million pilot program involving the federal government and water agencies in Denver, Los Angeles, Las Vegas and Phoenix to pay farmers, cities and industries to reduce river water use." This week, an update from the BOR will "help set the course for water deliveries for the next two years."

Coverage by the AP was also picked up by the [Washington Post](#) (8/12, 4.06M), the [Arizona Republic](#) (8/12, 1.26M), the [Sacramento \(CA\) Bee](#) (8/12, 582K), the [US News & World Report](#) (8/12, 645K), and [KSL-TV Salt Lake City](#) (8/13, 1.07M).

Also providing coverage is the [Gant \(PA\) Daily](#) (8/12, 3K).

RECYCLED WATER PIPELINE TO COOMBSVILLE CELEBRATED. The [Napa Valley \(CA\) Register](#) (8/13, 50K) reports that "after 15 years of planning and fundraising, crews are preparing to break ground on a pipeline that will deliver 700 acre feet of recycled water annually from Napa Sanitation District to the groundwater-deficient area that drains Milliken, Sarco and Tulocay creeks east of the city Napa." According to the article, "with that major milestone looming, elected officials from the city of Napa and Napa County were in a mood to celebrate Tuesday afternoon at the Napa Valley Country Club, the eventual destination of the 5-mile pipeline and a major source of funding for the \$13.3 million project." The article notes that "a series of kudos were directed Tuesday at a citizens group that pushed for the pipeline in 1999, Napa County Supervisor Keith Caldwell, who helped give the project momentum after being elected in 2008, and the US Bureau of Reclamation, which provided grants that cover 25 percent of the cost."

Empowering Native American Communities:

PROPOSED RULES COULD LEAD TO MORE RECOGNIZED TRIBES, MORE CASINOS. McClatchy (8/12, Hotakainen, Subscription Publication, 23K) reports that new rules proposed by the Obama Administration "would give more tribes a faster track at joining the ranks of the recognized by making it easier for them to prove their legitimacy." This recognition "recognition makes a tribe eligible for more federal benefits and is a prerequisite to apply for the biggest prize of all: the right to run a casino." The rules "have won backing from large tribal groups," but are "generating lots of controversy." The Bureau of Indian Affairs has set a September 30 deadline for public comment and "will then decide whether to adopt the rules." Opponents of gambling argue that the proposed rules are too lenient and should be abandoned, while some smaller tribes contend that the rules "are too onerous, fearing they'll still be denied the recognition they've sought for decades."

TRIBES PRAY FOR RETURN OF SALMON TO COLUMBIA RIVER. The [E&E Daily](#) (8/12) reports that "from the mouth of the Columbia River near Portland, Ore., to its Canadian headwaters, American Indian tribes, Canadian First Nations, religious leaders and local residents have been praying for the return of salmon to the river's upper reaches." The article notes that "their 16 days of vigils, which will wrap up this weekend in remote British Columbia, come as the United States and Canada are preparing to renegotiate a treaty that could alter the future of the largest North American river to empty into the Pacific Ocean." The article notes that "the salmon issue has divided both the US and Canadian regional bodies charged with advising their respective federal governments about the river's management, but their reports indicate neither country is ready to end the treaty relationship that regulates the Columbia River for flood protection and power generation."

Top National News:

VIOLENT PROTESTS CONTINUE IN MISSOURI AS OBAMA PLEADS FOR "REFLECTION AND UNDERSTANDING." Last night and this morning, the violence sparked by the fatal shooting over the weekend in Ferguson, Missouri continued to generate a great deal of media coverage – although less so than a day earlier when all three network newscasts led with reports on the shooting and the subsequent violent protests. On Tuesday, all three networks mentioned that President Obama had released a statement offering condolences to the victim's family and urging restraint on the part of those angered by the circumstances of the shooting. However, the President's statement is not the focus of much of the print and online reporting on the ongoing controversy.

The three Tuesday evening network newscasts devoted about six and a half minutes combined to the ongoing controversy in Ferguson, which was slightly less air time than they gave to reports on floods and the situation in Iraq – and all three of those topics combined only barely beat out the nearly 20 minutes the networks gave to remembrances of Robin Williams.

On NBC Nightly News (8/12, story 3, 2:05, Williams, 7.86M), Brian Williams reported that on Monday night, "suburban St. Louis...looked like a police state" as "police...once again had to put down and head off violence in the streets." John Yang went on to report that President Obama has "issued a statement from his Martha's Vineyard vacation saying, 'we should comfort each other and talk with one another in a way that heals, not in a way that wounds.'"

The St. Louis Post-Dispatch (8/13, 938K) reported on Tuesday afternoon that the President had "just issued a statement calling for 'reflection and understanding' in the wake of the police shooting death of Michael Brown on Saturday."

The Chicago Tribune (8/13, 2.19M) notes that Tuesday's statement was the President's "first comment on the death of...Brown," which "touched off clashes between demonstrators and police in the racially divided city." The Washington Times (8/13, Boyer, 465K) describes Ferguson as "predominantly black," while USA Today (8/13, Alcindor, Piper, Bacon, 5.76M) reports that Ferguson is "nearly 70% black." According to the Wall Street Journal (8/13, Kesling, Peters, Subscription Publication, 5.89M), just three of Ferguson's 53 police officers are African-American.

On ABC World News (8/12, story 5, 2:05, Muir, 5.84M), Steve Osunsami reported that on Monday night, "young people on the streets clashed with police who used tear gas and rubber bullets." On the CBS Evening News (8/12, story 10, 2:25, Pelley, 5.08M), Scott Pelley briefly noted the President's statement, and then correspondent Dean Reynolds reported that on Monday night, "young people" in Ferguson "threw rocks" at the police, who "responded with rubber bullets and tear gas." Reynolds went on to interview a Ferguson resident who said that in addition to throwing rocks, some protesters were firing guns.

USA Today (8/13, Alcindor, Piper, Bacon, 5.76M) reports that Ferguson Police Chief Thomas Jackson "said protesters Monday night threw rocks at police, and that gunfire came from the crowd, so officers used tear gas and shot 'beanbag rounds' meant to stun them." The Los Angeles Times (8/13, Pearce, 3.42M) reports that "St. Louis' predominantly black northern quarter has teetered toward chaos the last four days" as "stores have been looted" and "teens have hurled rocks at cops."

The Washington Post (8/13, Lowery, Zezima, Berman, 4.06M) reports that the President said his Administration will "continue to direct resources to the case as needed," and that Attorney General Holder "has said the Department of Justice is investigating the shooting." The Post also notes that "not long after Obama's statement, the Federal Aviation Administration said that it had banned flights from operating below 3,000 feet over Ferguson, at the request of" the St. Louis County Police Department, which had a helicopter "shot at 'multiple times on Sunday night,'" according to a police spokesman.

According to the Washington Times (8/13, Boyer, 465K), on Monday night, Ferguson's police officers "fired tear gas into a crowd of protesters...after a second day of unrest that included looting, arson, vandalized vehicles and people throwing rocks at police." Politico (8/12, Mccalmont, 637K) reported that in the statement he released on

Tuesday, the President "acknowledged" the continuing violence in Ferguson when he wrote: "I know the events of the past few days have prompted strong passions."

The Huffington Post (8/12, Terkel, 11.54M) reported that the Ferguson Police Department says Brown "assaulted the officer" who subsequently shot him in self defense, but "eyewitnesses...have disputed that claim and said Brown was killed while attempting to surrender or flee." The Huffington Post also reported that in the ensuing protests, "at least four people have been injured and 47 people have been arrested so far," as "looting and vandalism have been reported in the area." The New York Times (8/13, Storey, Subscription Publication, 9.79M) reported that "most of the protesters" in Ferguson on Monday night "[do] not live in the area."

CBC Seeks DOJ Investigation Of Ferguson Police. The Hill (8/12, Swanson, Sink, 237K) reported that the Congressional Black Caucus is urging the Justice Department to probe "any pattern or practice of police misconduct by the Ferguson Police Department." Roll Call (8/12, Dumain, Subscription Publication, 76K) reported that CBC chair Rep. Marcia Fudge (D-OH) "co-signed a letter Monday evening addressed to" Attorney General Holder, along with Reps. John Conyers (D-MI) and William Lacy Clay (D-MO), "who represents the Ferguson area."

According to the New York Times (8/13, Vega, Subscription Publication, 9.79M), "The speed with which the shooting...has resonated on social media has helped propel and transform a local shooting into a national cause, as African-American commenters draw attention to continued incidents of blacks being shot by police and the media portrayals of young black men."

The Belleville (IL) News-Democrat (8/13, 152K) reports that Tracy Martin, the mother of Trayvon Martin, who was "was fatally shot by...George Zimmerman, on Feb. 26, 2012," has "called for peaceful protests in the wake of" Brown's death.

The Daily Caller (8/12, Ross, 408K) reported that MSNBC's Al Sharpton "traveled to Ferguson on Tuesday" and "urged local citizens to avoid violence while calling for the federal government to take over the investigation into Brown's death." Author Joseph Epstein, in an op-ed for the Wall Street Journal (8/13, Epstein, Subscription Publication, 5.89M), cites the aftermath of the shooting as evidence that the African-American community lacks leaders of the stature of those who led the fight for civil rights in the 1950s and '60s.

DOJ Is Already Conducting National Review Of Some Police Tactics. According to USA Today (8/13, Johnson, 5.76M), the Justice Department is already "leading a broad review of police tactics, including the kind of deadly force that prompted recent protests in Missouri and New York." USA Today adds that "in addition to deadly force, the review is expected to examine law enforcement's increasing encounters with the mentally ill, the application of emerging technologies such as body cameras, and police agencies' expanding role in homeland security efforts since 9/11."

Ferguson Police Decline To Identify Officer Who Shot Brown. The Huffington Post (8/13, Cadet, 11.54M) reported that on Tuesday, the Ferguson police department announced that it "will not release the name of the officer involved in the fatal shooting," which was "an apparent shift after Chief Thomas Jackson initially said that the name would be released by 12 p.m. on Tuesday." According to the Huffington Post, the Ferguson police "reportedly chose to delay releasing the name out of fear for the officer's safety." The New York Times (8/13, Bosman, Williams, Subscription Publication, 9.79M) reports that Chief Thomas Jackson said on Tuesday that "the value of releasing the name is far outweighed by the risk of harm to the officer and his family."

NYTimes: "White Power Structure Dominates" Ferguson's Government And Police Dept. The New York Times (8/13, Subscription Publication, 9.79M), in an editorial, contends that a "history of racial segregation, economic inequality and overbearing law enforcement...produced so much of the tension now evident on the streets." According to the Times, St. Louis "has long been one of the nation's most segregated metropolitan areas," which the Times says has a "white power structure that dominates City Councils and police departments like the ones in Ferguson."

OMB NOW ALLOWS LOBBYISTS TO SERVE ON GOVERNMENT ADVISORY BOARDS. USA Today (8/13, Schouten, 5.76M) reports that the Administration has "dropped its blanket ban on federal lobbyists serving on advisory panels after losing a court battle on the issue earlier this year." According to USA Today, "Under the

new rules, the ban no longer applies when federal lobbyists represent trade associations, unions, companies, state or local governments and other groups," including "environmental organizations." USA Today adds that OMB says "federal lobbyists still cannot serve on commissions solely as private citizens."

The New York Times (8/13, Davis, Subscription Publication, 9.79M) says the announcement is "the latest example of the limits of the president's effort to rein in the influence of special interests in government." The Times notes that the President "signed an order on his first day in office in 2009 prohibiting" lobbyists "from serving in his administration," but has since "made a number of exceptions to that rule and has hired lobbyists for several important jobs." The Times also notes that "critics argue that the president's position has led to unintended consequences, prompting some operatives to refrain from registering as lobbyists merely to preserve the option of working with the administration," although "they are essentially doing the same thing as a lobbyist."

Bloomberg News (8/13, Talev, 2.76M) reported that OMB communications director Melanie Russell says "the purpose of the prohibition is 'to restrict the undue influence of lobbyists on the federal government' and was 'not designed to prevent lobbyists or others from petitioning their government.'" However, The Hill (8/12, Wilson, 237K) reported that "the policy change...chips away at one of the main firewalls that President Obama had erected between K Street and government." Reuters (8/13, Felsenthal) covered the announcement from OMB in article titled, "White House Loosens Restrictions On Lobbyists."

Politico Analysis: Obama Administration Has Hired "About 70" Lobbyists. In an article published early Tuesday morning, Politico (8/12, Tau, 637K) reported that the Administration "has hired about 70 previously registered corporate, trade association and for-hire lobbyists," including "well-known Democratic lobbyist" Broderick Johnson, "a top aide to Obama as a liaison between federal agencies and the White House," who was employed as a "consultant" for Microsoft, Pearson, Globalstar, Comcast and FedEx "right up until he started to work at the White House." According to Politico, "Johnson's trip from registered lobbyist to...White House staffer violates the spirit of Obama's pledge to keep special interests out of his White House."

CLINTON CALLS OBAMA IN WAKE OF CONTROVERSIAL FOREIGN POLICY COMMENTS. Media coverage on Hillary Clinton's call to President Obama highlights both camps' efforts to minimize any talk of serious discrepancies between the President and his erstwhile secretary of state. Virtually all print accounts include language from a statement put out by a Clinton spokesman which stated that Clinton "looks forward to hugging it out" with Obama when they meet. Coverage of the call also overshadowed Obama adviser David Axelrod's comments earlier Tuesday, in which he had responded to Clinton's criticism of Obama. The story was not covered by the network newscasts, but was mentioned on some cable news shows.

Wolf Blitzer reported on CNN's Situation Room (8/12, 554K) that Hillary Clinton placed a call to the President "in the aftermath of an interview she did in which she seemed to suggest she was distancing herself from him on a key foreign policy issue." Brianna Keilar added that the White House is "really trying to downplay the differences here after...Clinton called the President to smooth things over." A Clinton spokesman said in a statement that she called the President to "make sure that he knows nothing she said was an attempt to attack him, his policies, or his leadership." However, Clinton's "hawkish comments here really getting not under the skin of the Obama camp, but a lot of liberal activists, who are very upset with her."

The AP (8/13, Pickler) notes "the call came on the eve of a party on Martha's Vineyard that Clinton and Obama planned to attend." Clinton "is on the Massachusetts island for a memoir-signing session at a bookstore, while Obama is in the midst of a two-week vacation." Reuters (8/13, Mason) reports that White House spokesman Eric Schultz said, "The president and first lady have accepted an offer to attend a social gathering at the home of Vernon Jordan on Wednesday evening. ... (They) are very much looking forward to the occasion and seeing former Secretary Clinton."

USA Today (8/13, Jackson, 5.76M) quotes Clinton spokesman Nick Merrill as saying, "Secretary Clinton was proud to serve with President Obama. ... She was proud to be his partner in the project of restoring American leadership and advancing America's interests and values in a fast changing world. ... Like any two friends who have to deal with the public eye, she looks forward to hugging it out when she they see each other tomorrow night."

Bloomberg News (8/13, Allen, 2.76M) reports that Clinton's "efforts to distance herself from Obama could hurt her

with Democratic primary voters should she run for president," while helping her "with independents and national security-minded Republicans in a general election." The AP adds that "the anti-war base of the Democratic Party has long distrusted Clinton's support for a muscular foreign policy." Iya Sheyman, executive director of the political action arm of MoveOn, said in a statement, "Secretary Clinton, and any other person thinking about seeking the Democratic nomination in 2016, should think long and hard before embracing the same policies advocated by right-wing war hawks that got America into Iraq in the first place and helped set the stage for Iraq's troubles today."

Under the headline "Hillary Clinton To Barack Obama: Let's Hug It Out," Politico (8/12, Haberman, 637K) reports that "several Clinton supporters have stressed that she is entitled to her own views, and that she is in a bind – either criticized as overly calculating if she stays silent or faulted for being candid about what she thinks." But "one of the criticisms about her interview relates to its timing: It comes as Obama is attempting to get his arms around a number of overseas crises, from Ukraine to Gaza to Syria." The Daily Caller (8/12, Stoltzfoos, 408K) headlined its story on Clinton's call "Hillary Kisses - The Ring, Begs Obama For Forgiveness."

Politico (8/12, Haberman, Brown, 637K) says "a split between...Clinton and...Obama was inevitable. Now that they've made peace, keeping it will be the challenge." While "Obama aides and some Clinton allies downplayed the 72-hour episode with dismissive complaints about a voracious media...the maneuvering nonetheless demonstrated how the Obama-Clinton alliance, long viewed as mutually beneficial, will be tested repeatedly." Politico notes that asked to comment, "longtime Clinton ally James Carville, normally a chatty political observer, dodged by cheerfully saying, 'There's a town in Texas called El Paso. And I'm gonna El Paso' on this one."

The Washington Times (8/13, Boyer, 465K) reports Republicans "have noted that Mrs. Clinton was in charge of foreign policy until she quit her post in early 2013," and "many observers believe her interview was calculated to separate herself from Mr. Obama's policies in preparation for a presidential bid in 2016."

In an analysis piece, Juliet Eilperin writes in the Washington Post (8/13, Eilperin, 4.06M) that the controversy has "highlighted a little-noticed aspect of the president's tenure: He has devoted almost no effort to grooming a successor." That fact "has left an opening for Clinton, who has stepped firmly into the vacuum this summer, asserting herself as the next Democrat in line to lead the country."

Deputy National Security Adviser Ben Rhodes on Fox News' Special Report (8/12, 2.15M) said that the President and Clinton "are in broad agreement on so many of the issues around the world and has been a great partner. On this particular question, this is something she's written about in her book. She did support providing military assistance earlier than the President moved forward with that plan, but the reason that the President was deliberate in his decision making there is, one, we wanted to make sure we're providing assistance to people who we knew so it wouldn't fall into the wrong hands. Two, we didn't see a plan to decisively tip the balance against [Syrian President Bashar] Assad."

In an analysis for the Washington Times (8/13, 465K), Ben Wolfgang writes that Clinton's comment this week that the President's failure to contain ISIL in Syria enabled the group to spread "its brand of violence and Islamic law into Iraq," underscores "the heated criticism of the president's policy in regard to Iraq and Syria" from "Republicans, many foreign policy analysts and other critics." Wolfgang notes that the President "has indicated that the U.S. will not make a broader commitment to take out the Islamic State," which means that the responsibility to defeat ISIL "apparently will lie primarily with the new Iraqi government and the Kurdish regional authority, which the U.S. and Britain are now arming directly."

Axelrod Responds To Clinton Interview. Largely absent from the coverage of Clinton's call to the President is Axelrod's criticism of the former secretary of state earlier Tuesday. Reports did not speculate about a cause-and-effect chronology between Axelrod's tweets and Clinton's subsequent call.

Politico (8/12, Haberman, 637K) reported that Axelrod had "taken to Twitter to slam...Clinton in the wake of her comments rejecting the core of the Obama administration's self-described foreign policy principle." After Clinton told The Atlantic that "the White House doctrine of 'Don't do stupid stuff' is 'not an organizing principle,'" Axelrod retorted, "Just to clarify: 'Don't do stupid stuff' means stuff like occupying Iraq in the first place, which was a tragically bad decision." Clinton, notes Politico, "voted to authorize the use of force in Iraq," and that "Clinton aides would not immediately respond to emails for comment Tuesday."

The New York Daily News (8/13, Friedman, 4.15M) reported on its website, "They're fighting like it's 2008." Axelrod "no longer works in the White House," but "he remains close to his former boss and colleagues," and "his shot at Clinton suggests Obama allies are simmering at" her comments.

On its website, TIME (8/13, Miller, 24.1M) also referred to "a flashback to 2008 campaign."

In the last sentence of its account of Clinton's call to Obama, the New York Times (8/13, Chozick, Subscription Publication, 9.79M) notes Axelrod "was quick to defend the president this week, in a flashback to the 2008 campaign."

Dowd: "Cheap Shot" Was Typical Of The Clintons. In a column titled "It's The Loyalty, Stupid," Maureen Dowd writes in the New York Times (8/13, Dowd, Subscription Publication, 9.79M) that Clinton's "cheap shot" at Obama in The Atlantic was "a calculated attempt to be tough and show that, as a Democratic woman, she's not afraid to use power." Adds Dowd, "As one Democrat noted, citing the callous Clintonian principle that unpopular things make foolish investments: 'If Obama was at 63 instead of 36, she'd be happy to be Robin to his Batman.'" Dowd concludes that "after buoying Hillary, Obama is learning the truth of another unofficial slogan in politics: 'The Clintons will be there when they need you.'"

Editorial Wrap-Up:

NEW YORK TIMES. "The Death Of Michael Brown." The New York Times (8/13, Subscription Publication, 9.79M), in an editorial, contends that a "history of racial segregation, economic inequality and overbearing law enforcement...produced so much of the tension now evident on the streets." According to the Times, St. Louis "has long been one of the nation's most segregated metropolitan areas," which the Times says has a "white power structure that dominates City Councils and police departments like the ones in Ferguson."

"Making The Case For High-Speed Rail." The New York Times (8/13, Subscription Publication, 9.79M), in an editorial, says, "High-speed rail can play an important role in the nation's transportation system by reducing congestion," and "can also provide a big economic boost." The Times notes that President Obama "gave it an important place in the 2009 stimulus bill," and "since then, the federal government has spent about \$11 billion on high-speed rail, with only a few visible improvements in American passenger rail service."

"Battle On The Brooklyn Waterfront."

WASHINGTON POST. "Cairo's Crimes Against Humanity" The Washington Post (8/13, 4.06M) editorializes that while the President and Secretary of State Kerry have highlighted Egypt's crucial role in US diplomacy, "the reality check provided by Human Rights Watch this week is particularly worthy of attention." According to the group's report, "more people died on Aug. 14 in Rabaa Square than in Beijing's Tiananmen Square in 1989 or in any mass killing of protesters since then." Yet the Administration "treats" Sissi, "the architect of the slaughter," as "a valued partner rather than the pariah he should be."

"The Auto-Loan Bubble." In an editorial, the Washington Post (8/13, 4.06M) says there is "increasing evidence suggest[ing] that the Federal Reserve's ultra-low interest rate policy is goosing car sales, both new and used, beyond the level that economic fundamentals can sustain," although, according to the Post, "the systemic risks to the U.S. economy from an overheated car-loan market are...modest." The Post adds that while "a subprime auto-lending bubble probably can't and won't cripple the U.S. economy," it "would be better...to tap the brakes now than to risk a crash later on."

"Tax Holiday's Aren't Worth It." The Washington Post (8/13, 4.06M), in an editorial, criticizes those states, "including Maryland and Virginia" that "offer sales tax holidays during the August back-to-school shopping season." The Post says the holidays are "policy gimmicks...popular among consumers and a certain set of retailers," but "aren't in the public interest."

WALL STREET JOURNAL. "Medtronic's Tax Lesson." The Wall Street Journal (8/13, Subscription Publication, 5.89M), in an editorial, points out that following an inversion, formerly US-domiciled corporations have an incentive

to invest in the US because repatriating their foreign profits no longer triggers a tax bill as it did when they were based in the US.

"Government+." The Wall Street Journal (8/13, Subscription Publication, 5.89M), in an editorial, dismisses Monday's announcement that former Google engineer Mikey Dickerson has been appointed to lead a task force dedicated to improving the Federal government's IT infrastructure. The Journal notes that Dickerson was credited for improving HealthCare.gov after its initial failures, and suggests that the Administration seems intent on treating the symptoms rather than the underlying problems associated with government initiatives like the Affordable Care Act.

"Turkey's New Sultan." The Wall Street Journal (8/13, Subscription Publication, 5.89M) editorializes on Turkish Prime Minister Tayyip Erdogan's election win, casting him as an enemy of democracy. The Journal adds the US and EU cannot be blamed for Erdogan's ascent to power, but urges both to call on the Turkish leader to curb his assault on basic democratic freedoms.

"Google On The Run." An editorial in the Wall Street Journal (8/13, Subscription Publication, 5.89M) decries a ruling by Hong Kong's High Court, which said that tycoon Albert Yeung, who was convicted of illegal bookmaking and obstruction of justice in the 1980s, can sue Google for defamation because when users type in his name, it offers terms related to Hong Kong organized crime, arguing that the ruling is a blow to free speech.

Washington Schedule:

TODAY'S EVENTS IN WASHINGTON.

White House:

PRESIDENT OBAMA — Vacations in Martha's Vineyard.

VICE PRESIDENT BIDEN — No scheduled events.

US Senate: 10 a.m. AGING – FIELD HEARING — Montana Field Hearing. Location: Billings, MT.

US House: Aug. 4 – Sept. 7. — The House stands adjourned until 2 p.m. on Monday, Sept. 8. Please note however that some committees are still scheduling hearings during this time both in Washington and in the field. Just a reminder to check the Capitol Hill takes daily during this period of "Recess."

Other: MERITALK – FEDERAL FORUM — "How can agencies change the network conversation? The 2014 Federal Forum examines new network architectures, new financial approaches, and new technologies."

<http://www.federalforum2014.com/> 9 a.m. Richard McKinney, Chief Information Officer, U.S. Department of Transportation, delivers the morning keynote. 1 p.m. Acting Department of Defense Chief Information Officer Terry A. Halvorsen delivers the keynote luncheon address. Location: Ronald Reagan Building and International Trade Center, 1300 Pennsylvania Ave. NW.

NHTSA – DRIVE SOBER EVENT — 10:30 a.m. National Highway Traffic Safety Acting Administrator David Friedman joins law enforcement officers to kick-off the annual national "Drive Sober or Get Pulled Over" enforcement crackdown. The campaign includes more than 10,000 police departments and law enforcement agencies across the country. Location: U.S. Department of Transportation Headquarters, Courtyard (Intersection of 3rd and M Streets SE).

UNITED NATIONS – DISCRIMINATION – PRESS CALL — 1:30 p.m. Civil and human rights advocates host a press call from Geneva during the United Nations review of the United States progress on its obligations to reduce racial discrimination and disparities under the Convention on the Elimination of All Forms of Racial Discrimination (CERD). The call will take place immediately following the first half of the U.S. governments presentation to the U.N. committee. The second half of the governments presentation will conclude on Thursday.

INSA LEADERSHIP DINNER – ADMIRAL ROGERS — 6 p.m. The Intelligence and National Security Alliance (INSA) Leadership Dinner with Admiral Michael S. Rogers: Director, National Security Agency; Commander, U.S. Cyber Command; Chief, Central Security Service. <http://www.insonline.org/AdmiralRogers>

Last Laughs:

LATE NIGHT POLITICAL HUMOR.

Jimmy Fallon: "Well, here's what people are talking about. I saw that President Obama went to the beach yesterday while he's vacationing on Martha's Vineyard. Which got weird when he took out his metal detector to search for \$16 trillion in quarters."

Jimmy Fallon: "A lot of people are upset that President Obama went to the beach yesterday with everything that's going on in the world. You know times are tough for Obama, because even the sharks were like, 'I'm not going near that guy.' I mean, it's just bad."

Jimmy Fallon: "Also, during a fundraiser last night, President Obama suggested that one or more Supreme Court justices may retire soon. Which got awkward when Ruth Bader Ginsburg said, 'You can have this gavel when you pry it out of my even colder, deader fingers. Why would you say that?'"

Jimmy Fallon: "And finally, we have 'Personal Motto.' Hillary's is, '2016 can't get here fast enough.' Obama's is, 'Ditto.' So, I guess that maybe they're not that different after all. They're kind of the same."

- + Today's Events In Washington.

LAST LAUGHS:

- + Late Night Political Humor.

DOI in the News:

SECRETARY JEWELL SENDS LETTER DENYING KING COVE ROAD DENIAL APPEAL. The [E&E Daily](#) (8/14) reports that Interior Secretary Sally Jewell has told Alaska's lawmakers and the leaders of an Alaskan village that she will not revisit her decision of last year denying the construction of a road through the Izembek National Wildlife Refuge that locals say is needed to improve public safety. Jewell on Wednesday sent three letters to Sen. Lisa Murkowski, Gov. Sean Parnell and the city of King Cove and surrounding borough, "stating in each that while she has heard 'passionate and forceful advocacy for approval of a road through the Izembek National Wildlife Refuge,' the Interior Department 'stands by the decision' to reject the road and 'will not reopen the Record of Decision.'" Jewell added, "I continue to be interested in discussing with you potential transportation alternatives to a road." However, she wrote in the three letters that a federal lawsuit filed in June by the city of King Cove and Alaska Natives challenging Interior's decision on the road "complicates efforts to find a workable solution that can be endorsed by all sides."

The Hill (8/15, Cama, 237K) reports that in response, Murkowski said she's "appalled" at the Interior Department's "continued refusal to permit the road." Murkowski said, "Secretary Jewell promised to help the people of King Cove last December, then went silent for months. As of yesterday, we know that she and her team have done almost nothing to protect the health and safety of King Cove families, yet remain unwilling to reconsider what is by far the best solution — a road."

The Alaska Business Monthly (8/15) reports that Della Trumble, spokeswoman for the Agdaagux Tribe and the King Cove Corporation said, "Once again Secretary Jewell is brushing us off. We wholeheartedly agree with Senator Murkowski's assessment. It's truly shocking that after months of waiting to hear from the Secretary, all we get is a disingenuous response completely lacking in substance."

Also covering the story are Politico (8/15, Guillén, 637K), the Ketchikan (AK) SitNews (8/15), and KDLG-AM Dillingham, AK (8/15).

FORMER SECRETARY SALAZAR LEADS EFFORT TO OPPOSE STATES' ATTEMPTS TO ACQUIRE FEDERAL LAND. The E&E Daily (8/14) reports that former Interior Secretary Ken Salazar is "helping lead an effort with dozens of conservation groups and business leaders to beat back recent attempts by Western states to acquire millions of acres of federal land." Salazar said Thursday in a statement that "public lands should remain public, and that contrary to the suggestions of some lawmakers, they are huge economic drivers in local communities across the West." He said, "The nation's public lands are the birthright and priceless heritage of all Americans. Our policymakers and elected leaders should be working to preserve and enhance these multiple use economic engines."

Also reporting on the story are the Deseret (UT) News (8/15, 538K) and the Grand Junction (CO) Daily Sentinel (8/15, 73K).

PITTSBURGH BOTANIC GARDEN AT SETTLERS CABIN PARK OPENS FOR TOURS. The Pittsburgh Post-Gazette (8/15, Podurgiel, 590K) reports that the Pittsburgh Botanic Garden at Settlers Cabin Park "opened for tours with a grand opening celebration Aug. 1 that included a visit from US Secretary of the Interior Sally Jewell, who called the garden a great example of public-private cooperation." According to the article, "eventually, the botanic garden will encompass 460 acres in the park, which straddles North Fayette, Collier and Robinson."

DEPUTY SECRETARY CONNOR TO PARTICIPATE IN WATER CONFERENCE. The Idaho Statesman (8/14, 222K) reports that Deputy Interior Secretary Mike Connor, will provide "perspective of the current administration on water management issues" during a "conference marking the end of the 27-year Snake River Basin Adjudication sponsored by the Idaho Supreme Court, the Kempthorne Institute and the University of Idaho College of Law" on August 25 and 26.

CONSERVATIONISTS SEEK MONUMENT STATUS FOR BOULDER-WHITE CLOUDS. The Idaho Mountain Express (8/15, 36K) reports that "though establishment of the Sawtooth National Recreation Area in 1972 provided permanent protection against most types of development in the White Cloud Mountains, some conservationists contend that the job is not yet finished." According to the article, "with continued stagnation in Congress of Rep. Mike Simpson's proposed CIEDRA wilderness bill, creation of a national monument through presidential proclamation is being viewed as the next best alternative." But "debate over the issue has indicated that many people are baffled by the claim that legal protection is needed for an area already protected."

CONGRESS URGED TO ACT ON WILDFIRE DISASTER FUNDING ACT. The Salt Lake (UT) Tribune (8/15, 470K) editorializes that "the US Forest Service and the Department of the Interior have been spending ever larger portions of their ever-tightening budgets on fighting fires that occur in the forests and range lands they are responsible for." However, "the firefighting budget not kept up with the need, and for the past couple of decades those agencies have had to borrow from — and never repay — accounts that were supposed to pay for all kinds of other operations and projects — just to keep everything from burning up." Congress is criticized for not acting on the Wildfire Disaster Funding Act of 2014, "a bipartisan bill that would have created for firefighting the same kind of emergency fund that exists to cover the costs of other natural disasters, such as earthquakes and hurricanes."

Additional coverage of wildfires was provided by the Sacramento (CA) Bee (8/14, 582K) and Fox News (8/13,

6.72M).

America's Great Outdoors:

National Park Service:

DEVELOPMENT HINDERING CALIFORNIA'S COUGAR POPULATION. The E&E Daily (8/14) reports that "human development is hindering the genetic diversity of mountain lions." A new study shows that "a population of the large cats hemmed into the Santa Monica Mountains near Los Angeles by surrounding highways is seeing inbreeding and a high mortality rate among young mountain lion males." Seth Riley, a biologist at the University of California, Los Angeles, and the lead author of the study, released today in *Current Biology*, said, "We still do have mountain lions in Los Angeles, which is amazing." However, Riley, who also works for the NPS, said that "the population in the Santa Monica Mountains has a very low genetic diversity – the lowest in the United States among mountain lions after Florida panthers."

Also covering the story are the Los Angeles Times (8/15, Cart, 3.42M), the Southern California Public Radio (8/14, 85K), and the Southern California Public Radio (8/14, 85K).

ENCHANTED VALLEY CHALET IN OLYMPIC NATIONAL PARK TO BE RELOCATED IN SEPTEMBER. The Oregonian (8/15, 827K) reports that "a contract to temporarily relocate the Enchanted Valley Chalet has been awarded to Monroe House Moving, Inc. of Sequim, Wash." the article notes that "the award amount is \$124,000." The relocation is "tentatively set to occur during the first two weeks of September, as long as weather, visibility and trail conditions allow."

SCIENTISTS STUDYING MOUNT BALDY FIND ANOTHER HOLE. WRTV-TV Indianapolis (8/15, 209K) reports that "scientists are still confounded 13 months after a then-6-year-old boy was nearly buried alive in a popular sand dune in northwest Indiana, saying they found a sixth hole this week as they moved high tech gear into place to try to conduct further testing on what is causing the holes." Bruce Rowe, spokesman for the Indiana Dunes National Lakeshore, said Mount Baldy will remain closed until more is known. Rowe said, "We want to let the science do the talking before we do any management decisions as to whether to open Mount Baldy. We have a great desire to reopen it. It's one of the most popular areas in the lakeshore. But we want to make sure we understand what's going on from a geological standpoint so we can make the proper decisions."

NPS SEEKS COMMENTS ON EXPANSION OF FORT FREDERICA NATIONAL MONUMENT. The Florida Times-Union (8/14, 435K) reports that the NPS is "conducting a study on adding 173 acres to Fort Frederica National Monument." The article notes that "the expansion includes land and marsh fronting the Frederica River to the north and south of the existing park boundaries and would protect 'important cultural and natural resources,'" the NPS said in a release. The 30-day comment period is underway and ends Sept. 9.

NPS TO TEST GOATS AT POINT REYES SEASHORE TO COMBAT INVASIVE SPECIES. The Point Reyes (CA) Light (8/15) reports that the NPS will "experiment with a possible remedy for invasive plant species in the seashore by introducing goats onto a small section of the historic D Ranch that is overgrown with wild radish, poison hemlock and a variety of thistles to the detriment of 'historic structures and the cultural landscape,' a statement to potential bidders said." The agency "posted a solicitation for quotes from contractors last Thursday and will hold a site visit at the 16-acre section of land this morning."

Bureau of Land Management:

VANDALS PAINT SHOOTING TARGETS BY ANCIENT NATIVE AMERICAN ROCK ART IN UTAH. The Salt Lake (UT) Tribune (8/15, 470K) reports that the BLM is "offering a reward of up to \$500 to help catch the vandals who spray-painted shooting targets onto rocks near ancient Native American art in Utah County." The BLM's Salt Lake Field Office "received a report July 31 that someone had spray-painted at least a dozen targets onto rocks in the Lake Mountains area, west of Utah Lake." According to the article, "evidence found at the scene indicated the targets were shot with large-caliber weapons, the BLM said in a news release."

Also reporting on the story are the AP (8/15, 116K), the Deseret (UT) News (8/15, 538K), the Provo (UT) Daily

Herald (8/15, 116K), and KSTU-TV Salt Lake City (8/14, 78K).

FIGHT BREWING OVER PLACITAS HORSES. The E&E Daily (8/14) reports that "a notice of 48 horse roundups this year posted in a New Mexico post office has the Bureau of Land Management and advocates for wild horses worried about the potential for another standoff like the one between federal officials and Cliven Bundy in southeastern Nevada earlier this year." John Brenna, active field manager for BLM, said, "We're not saying when we will go out there because we want to prevent a Bundy-type situation." The bureau's decision "follows state officials' announcement of their own roundup of around 125 animals as dusty conditions around the mountain village of Placitas, north of Albuquerque, have been attributed to free-ranging horses that have roamed the area for decades."

GROUP SEEKS PERMIT FROM BLM FOR ANNUAL HUNTING CONTEST. Reuters (8/15, Zuckerman) reports that a group called Idaho for Wildlife is seeking a special recreation permit from the BLM to hold contests each January for five years that would see as many as 500 hunters targeting wildlife. Steve Alder, executive director of Idaho for Wildlife, said, "We're not going to stand by and allow the feds and environmentalists to try to take away our legal rights."

AFTER BUNDY STANDOFF, RANCHERS CONTINUE TO DEFY FEDERAL GOVERNMENT WITHOUT CONSEQUENCE. For "The Blog" of the Huffington Post (8/15, Bruner, 11.54M), Travis Bruner, Executive Director of Western Watersheds Project, writes that while the BLM is "required by federal law to protect wildlife habitat on our public lands, the agency has been woefully lax in addressing the combined impacts of livestock grazing and drought on habitat essential to sage-grouse, antelope, mule deer and countless other species." He notes that "this February, one local Nevada office of the Bureau of Land Management finally took a small step to address this issue, and recommended closing an area of priority sage-grouse habitat to grazing in order to protect the remaining habitat." But "then the Cliven Bundy debacle unfolded, and public lands ranchers saw that those who refuse to follow the rule of law face, well, no consequence," and "the ranchers who graze the Argenta allotment for less than 10 percent of fair market value refused to rest the land."

Fish and Wildlife Service:

FWS PROPOSES CRITICAL HABITAT DESIGNATION FOR CUCKOOS. The E&E Daily (8/14) reports that the FWS is "proposing designating 546,335 acres of land across nine states as critical habitat for the Western yellow-billed cuckoo." The article notes that "the designation would include 80 separate areas in Arizona, California, Colorado, Idaho, Nevada, New Mexico, Texas, Utah and Wyoming." Jennifer Norris, field supervisor for FWS's Sacramento office, said, "The designation of critical habitat is an important step in recovering the western yellow-billed cuckoo. Critical habitat identifies areas with essential nesting and fledgling sites where conservation actions are needed to protect and recover this imperiled songbird."

Also reporting on the story are The Hill (8/15, Devaney, 237K) and the Prairie (MT) Star (8/15).

FWS OFFERS ONLINE INFORMATION SESSIONS ON PROPOSAL TO LIST NORTHERN LONG-EARED BAT. The Chattanooga (8/15, 12K) reports that the FWS will "hold three public information webcasts in August to provide information and answer questions about our proposal to list the northern long-eared bat as endangered under the Endangered Species Act."

Additional coverage was provided by WFXP-TV Erie, PA (8/15).

ENDANGERED MINNOW REBOUNDING IN NEVADA. The E&E Daily (8/14) reports that "a tiny endangered fish is making a comeback as populations of the Moapa dace are increasing in thermal Nevada waterways 60 miles north of Las Vegas." The article notes that "the head count taken in a survey conducted this month showed a count of 2,248 dace – an increase of 521 fish compared with last year and almost double the number counted from August 2012."

EPA FINALIZES AGREEMENT SETTING "BUFFER ZONES" AROUND SALMON STREAMS. The E&E Daily (8/14) reports that the EPA finalized a settlement Wednesday that "prohibits the use of five pesticides in 'buffer zones' around endangered salmon habitat in a win for environmental groups that had sued the agency." The

settlement "stipulates buffers for five insecticides: diazinon, chlorpyrifos, malathion, carbaryl and methomyl." The article notes that "for aerial spraying, the chemicals will be prohibited within 300 feet of salmon habitat; for ground-based applications, buffers will shrink to 60 feet."

ADDITIONAL COVERAGE: HUNTERS SET TO CONVERGE ON LOXAHATCHEE NATIONAL WILDLIFE REFUGE FOR ALLIGATOR HUNT. Additional coverage of the alligator hunt at Loxahatchee National Wildlife Refuge was provided by [Reuters](#) (8/15, Fagenson).

FWS DECISION ON WOLVERINES PRAISED. For the [Port Huron \(MI\) Times Herald](#) (8/14, 75K), Michael Eckert supports the decision by the FWS to withdraw its proposal to list the wolverine as threatened under the Endangered Species Act. According to Eckert, "the decision was a victory both for science and for flat-earth anti-science." He writes that "it wasn't wrong about climate change. It just didn't have any evidence to back up its proposal."

Additional coverage of the decision was provided by [The Hill](#) (8/15, Barron-Lopez, 237K), the [Seymour \(IN\) Times Tribune](#) (8/15, 31K), the [Durango \(CO\) Herald](#) (8/13, 28K), the [Ashland \(OR\) Jefferson Public Radio](#) (8/15), and the [AllGov](#) (8/15, 1K).

Securing America's Energy Future:

Renewable Energy:

HOUSE REPUBLICANS CALL FOR END TO WIND PRODUCTION TAX CREDIT. The "Floor Action" blog of [The Hill](#) (8/15, Cox, 237K) reports Rep. Mike Pompeo is "calling on House GOP leadership to end the Wind Production Tax Credit (PTC)." He "and 54 other House members wrote to Speaker John Boehner (R-Ohio) and House Majority Leader Kevin McCarthy (R-Calif.) on Wednesday calling on them to let the 'crony' tax subsidy for energy companies to expire." The letter said, "We offer our full support of the current process undertaken by the House Committee on Ways and Means that will allow the most anti-competitive and economically harmful tax provisions, specifically the wind energy production tax credit (PTC), to expire."

GUAM PLANS TO TAP WIND ENERGY. The [Marianas Variety](#) (8/15) reports that the Guam Power Authority is "anticipating a mid-July 2015 completion date for its wind turbine pilot project." The article notes that "the \$1.65 million project is being funded by US Department of the Interior, Office of Insular Affairs grants amounting to \$1.5 million plus an additional \$200,000 budgeted by the power authority under its capital improvement funds."

DEADLINE FOR COMMENTS ON BOEM'S PROPOSED OFFSHORE WIND LEASE SALE NEARS. The [Surf City \(NJ\) Sandpaper](#) (8/15) reports that "there are 37 days left to comment on the US Department of the Interior, Bureau of Ocean Energy Management proposed sale of leases for offshore wind farms that includes nearly 344,000 acres offshore New Jersey, with some lots just four nautical miles from Ship Bottom and continuing south along Long Beach Island and 45 miles to Avalon, Cape May County."

Onshore Energy Development:

SECOND LAWSUIT FILED TO BLOCK MONTANA COAL MINE EXPANSION. The [AP](#) (8/14) reports that "two environmental groups are suing to block expansion of the Spring Creek coal mine in Montana." Northern Plains Resource Council and the Western Organization of Resource Councils "filed the lawsuit Thursday in federal court, naming Interior Secretary Sally Jewell and the US Office of Surface Mining as defendants." The groups claim the Interior Department "did not seek public input through an environmental review before approving the expansion."

Coverage by the AP was also picked up by the [Missoulian \(MT\)](#) (8/15, 122K) and the [Great Falls \(MT\) Tribune](#) (8/14, 90K).

Also reporting on the story is [KTVQ-TV](#) Billings, MT (8/15, 2K).

JUDGE SIDES WITH BLM IN NEVADA MINE APPROVAL. The [E&E Daily](#) (8/14) reports that "a federal judge is backing" the BLM's decision "in 2012 to approve a large molybdenum open pit mine in central Nevada." Great

Basin Resource Watch and the Western Shoshone Defense Project, "a group affiliated with the Western Shoshone tribes, sued BLM last year, seeking to overturn the agency's approval of Colorado-based General Moly Inc.'s Mount Hope project near Eureka, Nev." But Nevada US District Court Judge Robert Jones "last month found the groups' grievances 'without merit.'"

ENVIRONMENTAL GROUP SAYS DIESEL STILL USED IN FRACK FLUID. The [E&E Daily](#) (8/14) reports that "oil and gas companies have 'fracked' wells with fluids including diesel fuel at least 351 times in 12 states since 2010," according to a study released Wednesday by an environmental group. Mary Greene, managing attorney of the Environmental Integrity Project and author of the report, said, "We thought this problem was a thing of the past. Companies that inject diesel without permits should be fined for ignoring the law." Greene added that "many companies changed the reports they had made to the FracFocus disclosure website, in some cases after US EPA stepped up its scrutiny of diesel."

Offshore Energy Development:

JUDGE APPROVES BP'S SUBPOENA OF FEDERAL DOCUMENTS. The [FuelFix](#) (8/14, 7K) reports that "a federal judge is allowing BP to negotiate the scope of a massive subpoena aimed at gathering government documents related to the temporary moratorium on deep-water drilling that followed the 2010 Gulf of Mexico oil spill." According to the article, "the order this week by US Magistrate Judge Sally Shushan sets aside a legal bout over BP's right to blame the government for other companies' financial losses in the wake of the spill that resulted from the blowout of a BP well." Shushan is "keeping BP's subpoena alive while parties negotiate the range of dates, search terms and other restrictions on its request."

Also providing coverage is the [Law 360](#) (8/15, 18K).

CAROLINAS TO RECEIVE \$400,000 TO GAUGE OFFSHORE SAND. The [Hampton Roads \(VA\) Virginian-Pilot](#) (8/15, 405K) reports that "in the wake of superstorm Sandy, the Carolinas are getting \$400,000 to evaluate offshore sand deposits that could be used to routinely rebuild beaches or help the coast recover if another severe storm hits." The funds from the BOEM are "part of \$13.6 million Congress allocated to the agency after the destructive October 2012 storm smashed into New Jersey." According to Connie Gillette, a spokeswoman for the federal agency, "similar projects to gauge sand resources in federal waters 3 nautical miles and farther offshore are planned along the entire Eastern Seaboard."

ADDITIONAL COVERAGE: INDUSTRY URGES INTERIOR TO ADD NEW OFFSHORE ACREAGE TO NEXT AUCTION SCHEDULE. Additional coverage was provided by the [National Journal](#) (8/14, Subscription Publication, 561K) and the [Natural Gas Intelligence](#) (8/14).

Tackling America's Water Challenges:

LAKE MEAD TO GET MORE WATER. The [E&E Daily](#) (8/14) reports that federal officials on Wednesday said Lake Mead will "get extra water this year from upriver storage as the reservoir behind Hoover Dam already sits at its lowest level since being filled in the 1930s." The BOR will "release 8.23 million acre-feet of water from Lake Powell, 10 percent more than last year, to try to keep Lake Mead from dropping below levels that would trigger cuts in water deliveries to Arizona and Nevada." However, "despite the added water that comes thanks to near-normal runoff in Lake Powell, demand will continue to outstrip supply, keeping Lake Mead hovering around the record low logged in January."

Additional coverage was picked up by the [Durango \(CO\) Herald](#) (8/13, 28K), [WHLT-TV Hattiesburg, MS](#) (8/15, 137), [KVVU-TV Las Vegas](#) (8/15, 66K), and [KXNT-AM Las Vegas](#) (8/14, 44K).

In an op-ed for the [Pagosa \(CO\) Daily Post](#) (8/15), Aaron Citron writes that "with the recent news that Lake Mead is at its lowest level in history, it's impossible to ignore the trajectory of America's hardest-working river." He notes that "in the Colorado River Basin, we are already using more water annually than is being supplied by snowpack and other precipitation." Citron asserts that "it has become clear that, over time, our water uses are going to have to change." He argues that "in thinking about where — in what sectors — this change should take place, we must also consider the environmental, cultural and economic services that each sector provides."

Citron concludes that "as we consider all of our options to address the growing water supply and demand gap in the Colorado River Basin, cities must remain at the leading edge of water conservation and reuse practices so that we can avoid large-scale, permanent reductions in irrigated acreage, stream flows, and the economic impacts these will create."

BOR MEETS WITH HOOPA TRIBAL OFFICIALS TO TOUR TRINITY RIVER. KIEM-TV Eureka, CA (8/15, 428) reports that on Thursday, officials from the BOR "met with Hoopa Tribal officials to tour the conditions along the Trinity River." The BOR said Interior Secretary Sally Jewell "sent staff members to assess the conditions of the river in person." The article notes that "tribal members hope this will force the Bureau to release additional water into the Trinity."

Also providing coverage are the Eureka (CA) Times Standard (8/15, 76K) and the Willits (CA) News (8/15, 10K).

BOR FUNDING TO AID LAKE CACHUMA. The Santa Barbara (CA) Edhat (8/15, 961) reports that Rep. Lois Capps announced Thursday that the Cachuma Operation and Maintenance Board received \$300,000 from the BOR for an emergency drought relief project. The Cachuma Operation and Maintenance Board will "use the funding to support its effort to pump water from Lake Cachuma into the North Portal Intake Structure and maintain water flow to the South Coast communities of Santa Barbara County." Capps said, "This drought crisis is the most urgent problem facing our state and the Central Coast, and it requires a collaborative effort by many. I am glad to hear that Lake Cachuma received this federal support, and I will continue to work with federal agencies to ensure farmers, businesses, consumers, and municipalities have the resources they need to get through these difficult times."

BOR TO HOST CAST FOR KIDS FISHING EVENT. The Red Bluff (CA) Daily News (8/15, 20K) reports that the BOR, Central California Area Office, "in partnership with the CAST — Catch a Special Thrill — for Kids Foundation and Pleasure Cove Marina, will host a CAST for Kids fishing event at Lake Berryessa on Saturday, Sept. 13." The bureau is "seeking boaters and anglers who wish to volunteer their time and use of their boat."

SALT RIVER PROJECT TO CONTINUE DROPPING WATER LEVELS IN BLUE RIDGE RESERVOIR. The Payson (AZ) Roundup (8/14, 21K) reports that the Salt River project will "continue to lower water levels in the Blue Ridge Reservoir to undertake a series of projects, including work on intake tunnels normally underwater."

RESEARCHERS SUGGEST DUST COULD BE IMPACTING CALIFORNIA'S DROUGHT. The E&E Daily (8/14) reports that "new research presented in San Francisco" on Wednesday suggests that "dusty air blown across the Pacific Ocean from Asia and Africa could be influencing precipitation" in California. In a presentation at a national meeting of the American Chemical Society, Kim Prather from the University of California, San Diego, "described research she is leading into the dust swept westward by the jet stream." According to Prather, "the dust — and the tiny bacteria and molecules it carries with it across the Pacific Ocean — is then mixing with other airborne particles like sea spray and smoke to have distinct and variable impacts on clouds and precipitation."

ADDITIONAL COVERAGE: CALIFORNIA LEADERS AGREE ON \$7 BILLION REPLACEMENT WATER BOND LANGUAGE. Additional coverage that "a ballot measure that will ask voters in November to approve \$7.5 billion in borrowing for water projects sailed through the Legislature on Wednesday" was provided by the Los Angeles Times (8/14, Mason, 3.42M), the San Francisco Chronicle (8/14, Gutierrez, 2.87M), the Fresno (CA) Bee (8/13, 322K), the Bakersfield Californian (8/15, 127K), the Antioch (CA) Herald (8/15, 81K), the Central Valley (CA) Business Times (8/15, 206), the AllGov (8/15, 1K), KCRA-TV Sacramento, CA (8/15, 122K), and KQED-FM San Francisco (8/14, 15K).

Empowering Native American Communities:

PAYMENTS FROM INDIAN TRUST SETTLEMENT COMING SOON. The Native American Times (8/15, 337) reports that "payments for the Trust Administration Class in the Indian Trust Settlement are expected to be mailed in the early Fall, the Settlement Administrator," according to The Garden City Group, Inc. GCG will "hold two meetings in Montana for Class Members, their families and heirs to answer questions, take updates for address and contact information, and to obtain probate documents for estate distributions."

INTERIOR, COURTS URGED TO UPHOLD LIMITS ON INDIAN CASINOS. In an editorial, the Detroit News (8/15, 495K) argues that "unchecked expansion of tribal gaming houses would exacerbate saturation of gambling market." It notes that the Sault Ste. Marie Tribe of Chippewa Indians wants to build two new casinos in southeast Michigan and the Bay Mills Indian Tribe wants to "reopen its closed facility near Vanderbilt in northern Michigan's Otsego County and establish new casinos near Flint and Port Huron." It concludes that "the Department of the Interior and the courts should see the inherent dangers and reject the efforts to build these off-reservation casinos."

Top National News:

OBAMA CALLS ON FERGUSON PROTESTERS TO BE PEACEFUL, POLICE TO SHOW RESTRAINT. The already heavy coverage of the protests following the police shooting in Ferguson, Missouri last weekend increased remarkably from Wednesday to Thursday. The three network newscasts devoted more than 20 minutes, or about a third of their combined airtime, to various aspects of the Ferguson story, which was three times what they gave any of the rest of the day's news, including the situation in Iraq.

The spike in media attention was sparked by photos, video, and first-hand accounts of what was perceived as an unduly militaristic response to the sometimes violent behavior of crowds on the streets of Ferguson. President Obama's Thursday remarks on the protests were widely noted and generally cast as a successful effort on the part of the White House to be evenhanded – even as the President acknowledged the growing concern about the Ferguson police tactics. Notably, the Wall Street Journal (8/15, Subscription Publication, 5.89M), in an editorial, praises the President's remarks, including his request for "peace and calm on the streets."

The Washington Post (8/14, Markon, Branigan, 4.06M) says that on Thursday, "in a sudden burst of interest fueled by images of heavily armed police...politicians from both sides of the aisle rushed...to condemn the tactics of the nearly all-white police force in the predominantly African American town." According to the Post, "The reactions were remarkably similar from political opposites across the spectrum," as Sen. Claire McCaskill "called for authorities to 'de-militarize this situation,'" and Sen. Rand Paul "condemned 'the militarization of our law enforcement' in a Time (8/15, Paul, 24.1M) magazine essay."

At the opening of NBC Nightly News (8/14, lead story, 3:45, Holt, 7.86M), Lester Holt said, "Last night's jarring images of police clad in military gear and firing tear gas and rubber bullets at protesters on the streets of an American suburb has reverberated across this country, including to the Obamas' vacation residence where the President called for peace and calm and lashed out at both violence against police and excessive force by police." McCaskill was shown saying, "I think that it's very important that we demilitarize the response to what have been, by and large, very peaceful protests."

In the first segment for the CBS Evening News (8/14, lead story, 1:05, Pelley, 5.08M), Scott Pelley reported that "after four nights of violence in Ferguson...and with no end in sight, the President and the governor today took action." Pelley said Missouri Gov. Jay Nixon "put state police in charge of security in the St. Louis suburb," while the President "interrupted his vacation to call for calm," and "said there is blame for the violence on both sides." Lester Holt, on NBC Nightly News (8/14, story 3, 0:35, Holt, 7.86M), said the President was "asking everyone involved to take a step back."

In the lead story for ABC World News (8/14, lead story, 3:25, Muir, 5.84M), David Muir said the President had issued "an urgent plea to both sides – the police and the protesters." ABC's Steve Osunsami went on to report from Ferguson that the President "condemn[ed] the looting and thieving that took place earlier this week, but call[ed] for an end to the police state." According to Osunsami: on Thursday, "there was a clear turn in the reaction to Michael Brown's killing." Also on ABC World News (8/14, story 2, 2:05, Muir, 5.84M), correspondent Ryan Smith paraphrased the President as saying, "There is never an excuse for violence against the police and no excuse for police to use excessive force against peaceful protests."

In a front-page article, the New York Times (8/14, A1, Bosman, Shear, Williams, Subscription Publication, 9.79M) reports that the President "called for an end to the violence here, denouncing actions both by the police and by protesters," but, according to the Times, "to many," Obama "seemed less emotional and personal than he had been two years ago, when he called for 'soul searching' after the fatal shooting of Trayvon Martin." The Times

says the President spoke as "alarm had been rising across the country at images of a mostly white police force, in a predominantly African-American community, aiming military-style weapons at protesters and firing tear gas and rubber bullets."

The Los Angeles Times (8/14, Hennessey, 3.42M) reported that on Thursday, the President made a "brief statement from Martha's Vineyard, where he is on vacation," as he "sought to calm the increasingly tense situation in Ferguson...saying there was 'no excuse' for 'excessive force' by police or for looting or violence aimed at law enforcement." The Times says the President said the police "have a responsibility to be 'open and transparent' about the events that led up to the shooting," and "criticized police for their tactics" in the aftermath of the shooting.

Under the headline, "Obama: No Excuse For Violence, Excessive Force In Missouri," the Wall Street Journal (8/14, Nelson, Subscription Publication, 5.89M) reports that on Thursday, the President said, "There are going to be different accounts of how this tragedy occurred. ... Now's the time for an open and transparent process to see that justice is done." Reuters (8/14, Mason, Lovering) quotes the President as saying, "When something like this happens, the local authorities, including the police, have a responsibility to be open and transparent about how they are investigating that death and how they are protecting the people in their communities."

The Huffington Post (8/14, Bendery, 11.54M) noted that in addition to criticizing the Ferguson police for employing "excessive force against peaceful protests," the President also said, "There is never an excuse for violence against police or for those who would use this tragedy as a cover for vandalism and looting." Likewise, the Washington Times (8/14, Boyer, 465K) reported that the President "said protesters should not attack police officers."

Politico (8/14, Brown, 637K) reported that while the President "did not specifically mention the arrests of two reporters" in Ferguson, he "did speak to the aggressive law enforcement tactics" when he said, "Here in the United States of America, police should not be bullying or arresting journalists who are just trying to do their jobs and report to the American people on what they are seeing on the ground."

Holder "Concerned" That Police Use Of "Military Equipment" Sends A "Conflicting Message." The CBS Evening News (8/14, story 3, 2:00, Pelley, 5.08M) reported that on Thursday, Attorney General Holder said he is "concerned about the message that police send when they use military equipment to deal with protesters." Correspondent Jan Crawford went on to report that "law enforcement in St. Louis County have gotten more than half a million dollars' worth of military equipment from the Pentagon, including seven Humvees and a dozen M-16s."

The Washington Post (8/14, Markon, Branigan, 4.06M) notes that just after the President said he is "'deeply disturbed' by images of clashes between police and protesters," Holder "issued a statement saying he was 'deeply concerned' about 'the deployment of military equipment and vehicles' to combat protesters in Ferguson."

The AP (8/14) reported that on Thursday, Holder said he is "concerned that the use of military equipment by police in Ferguson...is sending a 'conflicting message,'" and "said the response by law enforcement...'must seek to reduce tensions, not heighten them.'"

Politico (8/14, Mccalmont, 637K) quoted Holder as saying, "I am deeply concerned that the deployment of military equipment and vehicles sends a conflicting message." Politico also noted that Holder added that "while the vast majority of protests have been peaceful, acts of violence by members of the public cannot be condoned."

The Christian Science Monitor (8/14, Jonsson, 566K) also notes that "critics say that the scenes in recent days from Ferguson are offering Americans an unvarnished look at one consequence of federal programs that supply even tiny towns and small cities with heavy military equipment." According to the Washington Post (8/15, Gibbons-Neff, 4.06M), some US combat veterans contend that "the police response has appeared to be not only heavy-handed but out of step with the most effective ways for both law enforcement and military personnel to respond to demonstrations."

The Washington Times (8/14, Chasmar, 465K) reported that Rep. Hank Johnson (D-GA) "plans to introduce legislation that would 'end the free transfers' of military equipment to local law enforcement agencies." Johnson is

quoted as saying, "Unfortunately, due to a Department of Defense (DOD) Program that transfers surplus DOD equipment to state and local law enforcement, our local police are quickly beginning to resemble paramilitary forces." Politico (8/14, Palmer, Sherman, 637K) reported that other Democrats, "including Judiciary Ranking Member John Conyers of Michigan, called for a hearing into the controversial police tactics in the St. Louis suburbs."

In an op-ed for the New York Times (8/15, Beavers, Shank, Subscription Publication, 9.79M) titled, "Ferguson Shows The Risks Of Militarized Policing," Elizabeth Beavers and Michael Shank of the Friends Committee on National Legislation notes that the Pentagon "provides military-grade weapons and equipment to local law enforcement agencies through the 1033 program, enacted by Congress in 1997 to expand the practice of dispensing extra military gear." According to Beavers and Shank, "Due to the defense industry's bloated contracts, there is a huge surplus," and so the Pentagon "has donated military equipment worth more than \$4 billion to local law enforcement agencies."

AP Analysis: Obama More Reticent Since Having To Retract Criticism Of Cambridge Police In 2009. The AP (8/14, Pace) notes that the President "avoided mentioning race in his statement, and he called on people to 'remember that we're all part of one American family.'" The AP also says that the President's statement "stood in contrast to his initial handling of the 2009 arrest of his friend Harvard Professor Henry Louis Gates" when he "declared...that a white police officer had acted 'stupidly' in arresting Gates." The AP says that the President "conceded days later that his own remarks had inflamed the situation and that Gates had probably overreacted in the moment, contributing to his arrest."

In a piece titled, "How Race Undermines Obama's Bully Pulpit On Ferguson" for the New York Times' (8/14, Subscription Publication, 9.79M) TheUpshot blog, Dartmouth's Brendan Nyhan says the President's statement on Thursday "seemed intended instead to alleviate concerns that he was not taking what had happened seriously enough." But Nyhan adds that "many who have called on" the President to "speak up may not realize that it could be counterproductive for him to be visibly involved in the debate." According to Nyhan, "The Ferguson controversy may end up being as divisive as the Trayvon Martin case and the arrest of...Gates – two racially charged controversies that became...arguably more polarized after Mr. Obama addressed them."

Roll Call (8/14, Lesniewski, Subscription Publication, 76K) notes that Debo P. Adegbile, President Obama's nominee to be assistant attorney general for the Civil Rights Division, "was rejected by a group of Senate Democrats who viewed him as insufficiently pro-law enforcement." Roll Call suggests that in the wake of the violence in Ferguson, the President "could make a personal push for Adegbile's confirmation," but Roll Call adds that "there's no reason to believe that the Democratic senators who voted against advancing the nomination would reverse themselves."

Eugene Robinson, in his column for the Washington Post (8/14, Robinson, 4.06M), notes that in 2012, according to the FBI statistics, "2,614 whites were killed by white offenders and 2,412 blacks were killed by black offenders — similar numbers" — although the "white population is almost five times as large as the African American population, meaning the homicide rate in black communities is staggeringly higher."

Missouri Highway Patrol Takes Responsibility For Ferguson Security. USA Today (8/14, Alcindor, Madhani, Stanglin, 5.76M) reports that on Thursday, Missouri Gov. Jay Nixon "announced...that the Missouri Highway Patrol will take control of security in Ferguson and that the unit in the embattled town would be overseen by a native son, Capt. Ron Johnson." According to the AP (8/14), Johnson, "who is black, said he grew up in the community and 'it means a lot to me personally that we break this cycle of violence.'" The Los Angeles Times (8/14, Pearce, Raab, Srikrishnan, 3.42M) reports that on Thursday, Nixon pledged to "change the tone in the St. Louis suburb," and "assured [a] crowd gathered at a community meeting that 'you will see a much better and much different tone' in the city."

The Los Angeles Times (8/15, Pearce, Hennessy-Fiske, 3.42M) reports that on Thursday Ferguson was "under the lower-key supervision of police in standard uniforms," meaning that "there were no assault rifles, riot gear or armored personnel vehicles that had inflamed tensions over the last week." According to the Times, "Shortly before 8 p.m., protesters outside a burned convenience store approached police cars and began yelling," but "several representatives of the Black Panthers stepped in and urged the crowd to move back — and Johnson emerged to mingle with the crowd."

The St. Louis Post-Dispatch (8/15, 938K) reports that St. Louis County Prosecuting Attorney Robert McCulloch "blasted" Nixon's "decision...to replace St. Louis County Police control of the Ferguson situation with the Missouri State Highway Patrol." McCulloch is quoted as saying, "It's shameful what he did today, he had no legal authority to do that." McCulloch added, "I hope I'm wrong, but I think what Nixon did may put a lot of people in danger."

The Politico (8/15, Glueck, 637K) notes that Nixon "waited five days...to visit" Ferguson, and "by then, protesters had been marching for days, police had rolled in military-grade equipment, the president was calling for calm and the national media were all over the story." According to Politico, "Some observers, including fellow Democrats, said Nixon had dealt a significant blow to his career." In a profile of Nixon, the New York Times (8/15, Blinder, Eligon, Subscription Publication, 9.79M) says the "Democrat in a solidly Republican state" has "constantly sought a middle ground."

The New York Times (8/15, Board, Subscription Publication, 9.79M), in an editorial, says Nixon, "after keeping a low profile for too long," was right to give "an order that should have been given over the weekend: Let protesters who are angry about the shooting protest peacefully, without aggressive demands to disperse, as is their constitutional right."

McCaskill: Police "Response...Has Become The Problem Instead Of The Solution." The Washington Times (8/14, Klimas, 465K) reported that on Thursday, Sen. Claire McCaskill released a statement saying, "This kind of response by the police has become the problem instead of the solution." McCaskill added, "My constituents are allowed to have peaceful protests, and the police need to respect that right and protect that right." The Wall Street Journal (8/14, Peters, Kesling, Subscription Publication, 5.89M) reports that on Thursday, McCaskill tweeted: "Continuing to work the phones to de escalate the tense and unacceptable situation in Ferguson."

Lewis: Obama Should "Federalize The Missouri National Guard To Protect" Protestors. The Daily Caller (8/14, Stoltzfoos, 408K) reported that in an appearance on MSNBC on Thursday, Rep. John Lewis (D-GA) said, "President Obama should use the authority of his office to declare martial law," and "federalize the Missouri National Guard to protect people as they protest." The Huffington Post (8/14, Lazar, 11.54M) also notes Lewis's recommendations for the President.

Ferguson Police Chief: "We Have To Respond To Deadly Force." In a segment for ABC World News (8/14, story 2, 2:05, Muir, 5.84M) on how "peaceful protests in the afternoon suddenly turned into a violent clash at night," Ferguson Police Department Chief Thomas Jackson was shown saying, "If fire bombs are getting thrown, property is getting destroyed, people are being shot at, we have to respond to deadly force."

On NBC Nightly News (8/14, lead story, 3:45, Holt, 7.86M), correspondent Ron Allen said he was "with the marchers" on Wednesday night and "things were calm, winding down," until "the police seemed to run out of patience and tried to clear the streets." Allen added that the police say they used tear gas "because bottles and Molotov cocktails rained down on them." On the CBS Evening News (8/14, story 2, 3:00, Pelley, 5.08M), Mark Strassman reported from Ferguson that "most of the protesters are outsiders, not from Ferguson, and more are showing up every day."

Chief Jackson, in an op-ed for USA Today (8/14, Jackson, 5.76M), says that as for the investigation of the shooting of Mike Brown, "there's lots of physical evidence, there's lots of witness testimony and there's a lot of information that can be pulled together." According to Jackson, "There are so many witnesses that are coming forward and we're trying to get them to come in and be interviewed," which is "really what is holding things up."

Michael Gerson, in his column for the Washington Post (8/14, 4.06M), writes, "When an unarmed man is killed by a police officer, it is the police who have the burden to demonstrate that" the officer's actions were "somehow justified." USA Today (8/14, 5.76M), in an editorial, says Ferguson police department's "heavy handed, unprofessional tactics since the shooting raise grave doubts about both its competence and its credibility." According to USA Today, the Ferguson police "certainly cannot be trusted to investigate itself or, for that matter, to protect the community." The Washington Post (8/14, Board, 4.06M) editorializes that "nothing justifies looting or assaulting police," but the Ferguson police "did not need to respond to mostly peaceful protests by deploying armored vehicles, pointing sniper rifles at civilians and tossing tear gas and shooting rubber bullets liberally into

crowds."

FOP Executive Director: Obama's Criticism Of Police "Is Not Helpful." USA Today (8/14, Jackson, 5.76M) reported that Jim Pasco, the executive director of the Fraternal Order of Police, "criticiz[ed] President Obama for some of his comments Thursday about the protests over the police shooting in Ferguson, Mo." Pasco is quoted as saying, "I would contend that discussing police tactics from Martha's Vineyard is not helpful to ultimately calming the situation." The Hill (8/14, Trujillo, 237K) first reported Pasco's critique of the President's response to the shooting. The Hill reported that Pasco said, "Right now, I haven't seen anything from afar — and maybe the president has — that would lead me to believe the police are doing anything except to restore order."

Paul Decries "Racial Disparities In Our Criminal Justice System," "Rising Militarization Of Law Enforcement." McClatchy (8/14, Cockerham, Subscription Publication, 23K) reports that in an essay for Time (8/15, Paul, 24.1M). Sen. Rand Paul "call[s] for demilitarization of America's local police forces." McClatchy notes that Paul "has been reaching out to minorities as he explores a run for president in 2016," and notes that in the wake of the shooting of Mike Brown, Paul has written: "Given the racial disparities in our criminal justice system, it is impossible for African-Americans not to feel like their government is particularly targeting them."

Dan Balz, in a front-page analysis for the Washington Post (8/14, A1, Balz, 4.06M) titled, "Libertarians Make Their Voices Heard On Police In Ferguson, Mo.," describes the "rare and surprisingly unified response across the ideological spectrum" to the situation in Ferguson, "with Republicans and Democrats joining to decry the tactics of the city's police force in the face of escalating protests." According to Balz, "the changing reaction on the right is clear evidence of a rising and more vocal libertarian wing within the Republican Party," and there was "no better sign of that" than Paul's essay for Time. Balz goes on to say that "in Ferguson," Paul "has found circumstances almost tailor-made to advance his worldview," and, "in doing so, he continues to set himself apart from others in the Republican Party with the hope of expanding the party's coalition."

Mark Barabak of the Los Angeles Times (8/15, Barabak, 3.42M) says "what was striking was the angry tone and underlying sympathies of Paul's essay, a condemnation of the 'rising militarization of law enforcement' in the country and assertion that equal justice under law is more a pleasing bromide than reality on the streets of 2014 America." According to Barabak, "Paul's rhetoric is not just a break with others in the embryonic Republican presidential field; it challenges GOP political orthodoxy going back several decades."

Politico (8/14, Everett, 637K) also notes Paul's op-ed, as well as "more measured" remarks from Sen. Ted Cruz, who wrote: "Police officers risk their lives every day to keep us safe, and any time a young man loses his life in a confrontation with law enforcement, it is tragic."

The New York Times (8/15, Peters, Subscription Publication, 9.79M) reports that "many conservatives were unsettled by the militaristic response from law enforcement officials in Ferguson." According to the Times, Red State's Erik Erickson says "many" on the right "see an increasingly disproportionate response to crime as a sign of a larger problem that should rattle the consciences of conservatives who are wary of centralized authority."

Scarborough: Reporters Ought To Have Followed Ferguson Police's Directions. In a post for Politico (8/14, Gold, 637K), Hadas Gold reported that on Thursday, MSNBC's Joe Scarborough said the Washington Post's Wesley Lowery and Huffington Post's Ryan Reilly "should have more closely followed police instructions" before they were briefly detained by police in Ferguson Wednesday night. On Thursday's Morning Joe, Scarborough said, "I've been in places where police officers said, 'all right you know what, this is cordoned off, you guys need to move along.' You know what I do? I go, 'yes, sir, or yes, ma'am.' I don't sit there and have a debate and film the police officer unless I want to get on TV and have people talk about me the next day."

Obama's Daily Golf Rounds Continue To Draw Scrutiny. The last sentence of the Los Angeles Times' (8/14, Hennessey, 3.42M) report on the President's remarks regarding the situation in Ferguson is: "Immediately after the brief statement, he continued his vacation and headed to the golf course."

Under the headline, "Obama Calls For Calm, Then Golfs," The Hill (8/14, Kurtz, 237K) reported that "shortly after making remarks on the situation in northern Iraq and the escalating tensions in Ferguson," the President "headed to the Vineyard Golf Club." The Hill notes that the President "has hit the links nearly every day since arriving in the ritzy enclave on Saturday."

Under the headline "Obama's 'Vacation From Hell,'" Politico (8/14, Brown, 637K) reports Obama "really wanted to take a vacation. But then the world intervened." However, according to Politico, the President is "managing to squeeze in quite a bit of leisure time." Politico says that on Thursday, the President "went from the podium where he delivered the statement on Ferguson to the Vineyard Golf Club faster than a ball driven by a 3-wood."

SENATE DEMOCRATS HESITANT TO PUSH OBAMA ON IMMIGRATION AHEAD OF MIDTERMS. Politico (8/14, Raju, Kim, 637K) reported that Democratic leaders in the Senate are weighing "how far to push" President Obama "on immigration before the crucial midterm elections." There is "palpable fear that Obama could cause trouble for the Senate's most vulnerable Democrats if he decides to circumvent Congress before the elections to make immigration changes through executive action." As a result, Democratic leaders are "in a jam." While Majority Leader Reid, Majority Whip Durbin and others have "called for executive action to halt deportations," they are now "coy," and representatives for each "refused to say this week whether their bosses want the president to move before November or wait until after the elections."

Texas Deploys National Guard Troops Along Mexican Border. The Chicago Tribune (8/14, 2.19M) reports that according to law enforcement officials, Texas has begun deploying National Guard troops along the US-Mexico border. A deputy with the Hidalgo County Sheriff's office said Thursday that border sheriffs "have been informed about the deployment and the first Texas National Guard troops have taken positions in places such as towers used for monitoring."

Immigrant Children Said To Get "First-Class Treatment" From Federal Government. Under the headline, "Illegal Immigrant Children Get First-class Treatment At Taxpayers' Expense," the Washington Times (8/14, 465K) reports that "the organizations the federal government is paying to house and care for the children who have surged across the border illegally are taking pains to make sure they are as comfortable as possible," providing, among other things Spanish-language life skills classes, intensive English training, and dietitians, who "scrutinize the menus each day to make sure they include enough whole grains but not whole milk." The Times notes that the effort to house and care for the children "is eating up an ever-larger portion of the Health and Human Services Department's budget, jumping from \$305.9 million last year to \$671.3 million so far in fiscal year 2014."

Administration Implements Accelerated Court Process To Deal With Immigrant Children. The New York Times (8/15, Semple, Subscription Publication, 9.79M) reports that a "cornerstone of the Obama Administration strategy to deal with the surge of unaccompanied minors from Central America," is "a new accelerated court process," under which the Justice Department "is moving children who recently arrived to the head of the line to see immigration judges, possibly leading to deportation within months rather than years."

Eleven-Year-Old US Citizen Held in Immigration Detention Facility For More Than A Month. The Los Angeles Times (8/15, Carcamo, 3.42M) reports on the case of an 11-year-old boy who was released from an immigration detention facility this week "after it was discovered that he is a U.S. citizen." After spending "more than a month at the detention center in Artesia, N.M.," an immigration attorney "who happened to be visiting the facility discovered his status last week." The boy, "whose father is a U.S. citizen, had migrated from Central America with his mother before both were detained."

CLINTON, OBAMA DANCE AT PARTY DAYS AFTER HER CRITICISM OF PRESIDENT. The New York Times (8/14, Chozick, Subscription Publication, 9.79M) reports that the White House on Thursday "declined to say whether President Obama and Hillary Rodham Clinton actually hugged at a party the night before on Martha's Vineyard. But they did dance." The Times quotes an unnamed "person who attended the party" as saying, "It was huge smiles and total abandon on the dance floor. You'd never know there was any discord." The Times notes that Clinton on Tuesday phoned the President "to assure him that critical remarks she had made about his foreign policy in an interview with The Atlantic were not intended 'to attack him, his policies or his leadership.'"

Progressives Unhappy With Clinton's "Harsh Critique" Of Obama's Foreign Policy. The Washington Times (8/14, Wolfgang, 465K) reports that in the wake of the "harsh critique of Mr. Obama's foreign policy" by Clinton, "disenchanted liberals" worry that the Democrats' "2016 front-runner is acting more like a thinly veiled neoconservative." Roger Hickey, founder of the "liberal" group Campaign for America's Future, is quoted as saying, "I thought the Democratic party was fairly unified on foreign policy these days. But when she goes

insulting Obama for his foreign policy weaknesses, suddenly people realize there needs to be a debate about foreign policy as well."

Clintons Said To Be Forging Relationship With Julián Castro, A Potential 2016 Running Mate. The Washington Post (8/14, O'Keefe, Rucker, 4.06M) reports that as the former secretary of state mulls a potential 2016 White House run, Hillary Clinton and former President Bill Clinton "have been cultivating an important ally who some believe could become her vice presidential running mate": ex-San Antonio Mayor Julián Castro, who President Obama has tapped to serve as his next HUD secretary. The Post says, for example, that Bill Clinton "invited" the 39-year old Castro "to the Clintons' home in Washington last week for a private dinner that friends described as" an opportunity for them "to become better acquainted." The Post also says that Castro joined Hillary Clinton last month at an event at "the Bronx Children's Museum."

Krauthammer: Clinton "Right" In Her Assessment Of Obama's Foreign Policy. In his Washington Post (8/14, 4.06M), Charles Krauthammer quotes Hillary Clinton as saying of President Obama's foreign policy in her recent interview with The Atlantic, "Great nations need organizing principles, and 'Don't do stupid stuff' is not an organizing principle." Krauthammer adds that in that interview, Clinton "acknowledge[d] the fatal flaw of" Obama's "foreign policy: a total absence of strategic thinking." Krauthammer adds that while Clinton's remarks come as she's "positioning" herself for a 2016 presidential run, "it doesn't matter. She's right."

Zakaria: Clinton's Strategic Talk Relating To Middle East Moderates A "Naive Fantasy." In his Washington Post (8/15, 4.06M) column, Fareed Zakaria writes that in her interview with The Atlantic, Clinton expressed "what has become Washington's new conventional wisdom," implying "that 'moderates' might have prevented the rise of the Islamic State" in the Middle East. However, writes Zakaria, the US "has provided massive and sustained aid to the moderates in the region" for some time, with little positive effect. Zakaria says, "The problem is that there are actually very few" moderates in countries such as "Iraq, Syria, Egypt, Libya and the Palestinian territories." Zakaria adds, "Asserting that the moderates in Syria could win is not tough foreign policy talk, it is a naive fantasy with dangerous consequences."

Poll Shows Clinton's Lead Over Potential 2016 GOP Foes Narrowing. McClatchy (8/14, Douglas, Subscription Publication, 23K) reports that a new McClatchy-Marist poll shows that Hillary Clinton's "lead over" potential GOP presidential rivals in hypothetical 2016 match-ups "has narrowed and her support has slipped below 50 percent" amid "recent gaffes by the former secretary of state." In the poll, Clinton leads Gov. Chris Christie 47%-41%, down from a 53%-42% lead she held in a similar poll taken in April and a 58%-37% edge in February. In the new poll, Clinton leads Jeb Bush 48%-41%, down from a 55%-39% lead in April. And the new poll shows Clinton leading Sen. Rand Paul 48%-42%, down from a 54%-40% edge in April. The report does not say when the new poll was in the field or how many voters were surveyed.

Noonan: After Criticizing Obama, Clinton Likely To Face Tough 2016 Challenge From The Left. In her Wall Street Journal (8/15, Subscription Publication, 5.89M) column, Peggy Noonan writes that with her criticism of Obama's foreign policy in the interview with The Atlantic, Hillary Clinton – if she runs for president – likely increased the odds that she will face a serious challenge from the left in the Democratic presidential primary. Noonan adds that though Sen. Elizabeth Warren has said she won't run for president, the Massachusetts Democrat, should she change her mind, would likely pose the biggest threat to Clinton winning the Democratic nomination.

Clinton Ally Brock Takes Over Formerly Non-Partisan Watchdog Group CREW. Politico (8/14, Vogel, 637K) reported that "in a major power play that aligns liberal muscle more fully behind the Democratic Party — and Hillary Clinton," Media Matters' David Brock "is taking over a leading watchdog group, Citizens for Responsibility and Ethics in Washington" after proposing "a multifaceted expansion intended to turn the group into a more muscular — and likely partisan — attack dog." According to Politico, "The reconfigured CREW...will add a more politically oriented arm, expand its focus into state politics and donor targeting and will operate in close coordination with Brock's growing fleet of aggressive Democrat-backing nonprofits and super PACs." Politico notes that while CREW was established by liberal Democrats, under executive director Melanie Sloan it "went out of its way to demonstrate that it would not pull punches when it came to Democratic corruption."

Editorial Wrap-Up:

NEW YORK TIMES. "The Search For Calm In Missouri." The New York Times (8/15, Board, Subscription Publication, 9.79M), in an editorial, says Missouri Gov. Jay Nixon, "after keeping a low profile for too long," was right to give "an order that should have been given over the weekend: Let protesters who are angry about the shooting protest peacefully, without aggressive demands to disperse, as is their constitutional right."

"Maliki And The Futility Of Regime Change." The New York Times (8/15, Subscription Publication, 9.79M) editorializes that "there should be no illusion that" Iraqi Prime Minister Nouri al-Maliki's "successor...will quickly end Iraq's crises," and that Obama "is right to be very cautious about plunging into foreign adventures." However, "he should be equally clear that there is often no choice, and that the most tempting action is hardly ever the best."

"Elmo's World." The New York Times (8/15, Board, Subscription Publication, 9.79M) editorializes that the "forces of civic order that drove the pimps, hustlers and drug dealers from Times Square never anticipated the Elmos." In "the tourist-choked, franchise-cheesy, pedestrian-mall version of the Crossroads of the World, adults in character costumes – a lot of Elmos, but also Cookie Monsters, Mickey and Minnie Mice, SpongeBobs, Batman, Statues of Liberty and others – are a fixture, practically an emblem." They are "fee-for-service entrepreneurs" that "deliver smiles for cheap" and are "thus appreciated by out-of-towners in a way no squeegee man ever was." New York City Mayor Bill de Blasio and members of the City Council "have said the Elmos are a problem that needs solving, through licensing or some other regulatory arrangement," but the Times argues that they "should be careful" in "a city that values eccentric expression and an entrepreneurial street life, to avoid cures that are worse than the disease."

WASHINGTON POST. "Ferguson's Fumbled Response." The Washington Post (8/14, Board, 4.06M) editorializes that "nothing justifies looting or assaulting police," but the Ferguson police "did not need to respond to mostly peaceful protests by deploying armored vehicles, pointing sniper rifles at civilians and tossing tear gas and shooting rubber bullets liberally into crowds."

"Defeating Extremists" The Washington Post (8/15, 4.06M) editorializes that "the limits Mr. Obama has placed on US action make little sense in the context of" ISIL's "extremist entity and the interconnected conflicts across the region." The President "lacks an integrated policy for Iraq and Syria, though the Islamic State cannot be defeated unless it is attacked in both countries. ... The idea that Iraqis will somehow solve these problems independently of Syria and with minimal U.S. support is a convenient but dangerous illusion."

"The GOP's War On Voters." In an editorial, the Washington Post (8/14, Board, 4.06M) criticizes Virginia Republicans for enacting voter ID laws and argues that a push "to tighten voter ID rules has accelerated for several years under GOP auspices, mainly in Southern states." The effort, the Post notes, "calls attention to the party's increasing identification with and reliance on older and whiter portions of the nation's electorate, which are shrinking." The Post argues that in their attempt "to negate the electoral effects of demographic change, Republicans are digging themselves deeper into a hole of their own making."

WALL STREET JOURNAL. "The Ferguson Exception." The Wall Street Journal (8/15, Subscription Publication, 5.89M), in an editorial, praises the President's remarks on Thursday, and notes that he sought "peace and calm on the streets."

"No Maliki, No More US Excuses." In an editorial, the Wall Street Journal (8/15, Subscription Publication, 5.89M) hails Iraqi Prime Minister Nouri al-Maliki's decision to give way to his successor, and expresses hope that the President will now craft a policy to stem ISIL's advance – something the Journal blames on Obama's lack of action in Syria and on his decisions to withdraw US forces from Iraq.

"Beijing vs. Foreign Capitalist Roaders." An editorial in the Wall Street Journal (8/15, Subscription Publication, 5.89M) criticizes Chinese President Xi Jinping's increased regulatory actions against foreign businesses including Microsoft and GM, among others, arguing that Xi is trying to create world-leading Chinese companies by crippling their competitors.

Washington Schedule:

TODAY'S EVENTS IN WASHINGTON.

White House:

PRESIDENT OBAMA — President Obama is vacationing on Martha's Vineyard. No public events are scheduled.

VICE PRESIDENT BIDEN — The vice president and Dr. Jill Biden visit Long Island, New York. There are no public events scheduled.

US Senate: No Scheduled Events.

US House: Aug. 4 – Sept. 7. — The House stands adjourned until 2 p.m. on Monday, Sept. 8. Please note however that some committees are still scheduling hearings during this time both in Washington and in the field. Just a reminder to check the Capitol Hill takes daily during this period of "Recess."

Other: **BULLYING PREVENTION SUMMIT** — 8 a.m. – 5:30 p.m. US Department of Education hosts fourth Federal Partners in Bullying Prevention Summit, with opening remarks by Deputy Assistant to the President Roberto Rodriguez and U.S. Department of Education Assistant Secretary Deb Delisle. Location: Bamard Auditorium, US Department of Education, 400 Maryland Ave. SW. Contacts: Press Office (press@ed.gov), 202-401-1576.

Last Laughs:

LATE NIGHT POLITICAL HUMOR.

Jimmy Fallon: "And during all of this [referring to a host of current national and international events], President Obama has decided to go on vacation, of course. And he's gotten a lot of criticism for that. And now, Obama is facing criticism for coming back to work for a couple days, because they say it wastes taxpayer money. Or as Obama put it, '28 more months, two weeks, four days and 16 hours. Get through this. We can't win. Just get through this.'"

Jimmy Fallon: "Actually, the White House says that President Obama won't make any major announcements during his brief trip back to D.C. this weekend. The reporters were like, 'Well, isn't that an announcement?'"

Jimmy Fallon: "The White House says that Obama won't make any major announcements during his trip back to D.C., but the White House did say that Obama would be making some minor announcements, like, 'Just mixed a bowl of Fruity Pebbles with Cocoa Pebbles, 'cause I'm the President and I can do whatever I want.'"

Seth Meyers: "I'm glad you're doing well, because some bad news for the President. President Obama's approval rating this week reached an all-time low. An all-time low. Apparently, it's all the way down to 'some of the people, some of the time.'"

Conan O'Brien: "Everyone's talking about a possible feud between President Obama and Hillary Clinton. ... At a

book signing, Hillary Clinton denied any friction with President Obama. Bill Clinton heard this and said, 'That's not the first time she's denied friction with the President.'"

DOI in the News:

SECRETARY JEWELL, SECRETARY DUNCAN VISIT PASSAMAQUODDY TRIBAL SCHOOL. The [AP](#) (8/18) reports that Interior Secretary Sally Jewell and Education Secretary Arne Duncan and "took a firsthand look at a tribal school as they promoted President Obama's goals for education reform." On Monday, they visited the Beatrice Rafferty School, located on the Passamaquoddy Pleasant Point reservation. They were joined by BIA Director Monty Roessel, along with Pleasant Point Chief Clayton Cleaves and Principal Mike Chadwick.

The [Bangor \(ME\) Daily News](#) (8/18, 166K) reports that Jewell and Duncan "asked a range of questions about the school facility as well as the staff and services the students receive." Jewell "wanted to know what effects the high rates of joblessness on the reservation have on students."

Also providing coverage are [WCSH-TV](#) Portland, ME (8/18, 30K) and [WMTW-TV](#) Portland, ME (8/19, 21K).

Also covering the story is the AP (8/19). Coverage by the AP was also picked up by KIMT-TV Rochester, MN (8/19, 1K), KTTC-TV Rochester, MN (8/19, 2K), and WQOW-TV Eau Claire, WI (8/19, 1K).

SECRETARY JEWELL TO VISIT BUG-O-NAY-GE-SHIG SCHOOL IN MINNESOTA. The [Bemidji \(MN\) Pioneer](#) (8/19, 35K) reports that Interior Secretary Sally Jewell will "visit the Bug-O-Nay-Ge-Shig School on the Leech Lake Band of Ojibwe reservation in Bena, Minn., on Tuesday." Jewell, along with Kevin Washburn, assistant secretary for Indian Affairs, will "tour the school to see first-hand the need for additional funding for replacement school construction as well as meet with school officials, teachers and students."

JUSTICE DEPARTMENT ASKS JUDGE TO TOSS MOST OF IZEMBEK ROAD LAWSUIT. [Politico](#) (8/19, Guillén, 637K) reports that "the Justice Department on Friday urged a federal judge to toss out most of a lawsuit over the contentious emergency access road proposed to run through the Izembek National Wildlife Refuge in Alaska." According to the filing, "a number of the complaints brought by Native groups and the state of Alaska 'are premised upon an alleged obligation to approve the road if it provided more reliable transportation between the two communities and an erroneous assertion that the Secretary could not adopt a 'no action' alternative." It adds, "Neither supposed requirement is found in the statutes and other sources of law Plaintiffs cite."

UTAH OFFICIALS FEAR USE OF ANTIQUITIES ACT. [Fox News](#) (8/18, 6.72M) reports that "Utah officials are scrambling to prevent the Obama administration from locking down thousands of acres of land in their backyard, as federal officials consider up to a dozen possible national monument designations – all in western states." Critics "feel the Antiquities Act has been misused in recent decades by presidents of both parties and, in Utah, they're seeking a compromise that would allow some land to become designated as 'wilderness' instead." Rep. Rob Bishop said, "The original Antiquities Act passed as a way of conserving land. It's no longer used that way. Now it's used as a political purpose to make a political statement on land that is not endangered in any way."

SECRETARY JEWELL DELIVERS KEYNOTE AT EVENT IN ACADIA NATIONAL PARK. The [Georgetown \(DC\) Dish](#) (8/19) reports that "Georgetowners led by National Park Foundation President & CEO Neil Mulholland trekked to one of Mother Nature's most beautiful outposts near Bar Harbor, Maine, to celebrate the Rockefeller-supported Schoodic Institute at Acadia National Park Thursday in an event featuring Interior Secretary Sally Jewell and some of the nation's leading philanthropists." Jewell was the keynote speaker, "telling of her first foray to Acadia on a trip in 1977 that changed her life." She recounted a story of her trip with "her then boyfriend Warren." They "fell in love with Acadia – and each other: they married one year later."

CONSERVATION GROUPS CRITICIZE BLM SAGE GROUSE PLAN FOR CENTRAL WYOMING. The [E&E Daily](#) (8/18) reports that a coalition of conservation groups on Monday "urged the Interior and Agriculture departments to revise a plan for managing greater sage grouse in central Wyoming, arguing that the plan unveiled in June fails to follow the best available science." According to the article, "the coalition, led by the Center for Biological Diversity, the American Bird Conservancy and WildEarth Guardians, among others, sent a letter to Interior Secretary Sally Jewell and Agriculture Secretary Tom Vilsack urging them to revise the plan to follow the recommendations of a team of sage grouse experts that in 2011 laid out specific steps to save the imperiled bird." They also "released a scorecard grading the Bureau of Land Management's amended Lander resource management plan (RMP) against the recommendations outlined by BLM's National Technical Team of sage

grouse experts and its influential 2011 grouse management report that suggested, among other things, prohibiting surface disturbance activity within 4 miles of grouse breeding grounds, called leks." The groups "concluded in the scorecard that the Lander plan fails to follow the NTT report and thus does not adopt adequate measures needed to prevent the greater sage grouse from being listed under the Endangered Species Act."

Environmental Groups Call For Cooperation On Sage Grouse. The Longview (TX) News-Journal (8/19, 69K) reports that "the best way to protect the greater sage grouse while keeping drill bits turning in Western states is for environmentalists and oil companies to work together on safeguarding the bird's habitat, conservationists said Monday." According to the article, "ten conservation groups made the plea for 'collaboration and compromise' in a letter to the Western Energy Alliance, which recently launched an advertising campaign blaming environmental activists and lawyers for exploiting 'bad science and the courts to stop responsible energy development.'"

DEBATE BURNS OVER STANISLAUS NATIONAL FOREST RECOVERY. NPR (8/18, Sommer, 519K) reports that one year after the Rim Fire burned in California, "controversy has broken out over how to help" the Stanislaus National Forest "recover — whether dead trees should be cut down and new trees should be planted." The Forest Service has proposed allowing logging companies to harvest downed logs on 44,000 acres. However, "several environmental groups are determined to stop it."

Additional Coverage. Additional coverage of wildfires was provided by the AP (8/19) and the Los Angeles Times (8/19, Lopez, 3.42M).

ADDITIONAL COVERAGE OF NATIVE HAWAIIAN RELATIONS. Additional coverage of Native Hawaiian relations was provided by the [Heritage Foundation](#) (8/19, 90K).

America's Great Outdoors:

National Park Service:

DRONES BANNED IN ARCHES, CANYONLANDS NATIONAL PARKS. The AP (8/19) reports that "drones are now officially banned in Arches and Canyonlands national parks in southeastern Utah." According to Kevin Moore, acting chief ranger for the two parks, "the unmanned aircrafts disrupt wildlife and are an intrusion on visitors looking for tranquility. They have seen an increase in use of drones in the last two years." The ban also "extends to Hovenweep and Natural Bridges national monuments."

Coverage by the AP was also picked up by the [Washington Post](#) (8/18, 4.06M), the [Washington Times](#) (8/18, 465K), the [Sacramento \(CA\) Bee](#) (8/18, 582K), and [KYTV-TV Springfield, MO](#) (8/19, 144K).

NPS COMPLETES STUDY ON SHEPHERDSTOWN BATTLEFIELD. The AP (8/18) reports that the NPS has "completed a study of the Shepherdstown Battlefield and related resources." According to the article, "Congress ordered the study to determine whether the Civil War battlefield should be added to the national park system." Tammy Stidham with the NPS said that "the study looked at historical significance, natural resources and economic uses."

Coverage by the AP was also picked up by the [Washington Post](#) (8/18, 4.06M), the [West Virginia Public Broadcasting](#) (8/19), and [WOWK-TV Charleston, WV](#) (8/19, 9K).

PRESIDIO TRUST ANNOUNCES NEW RULES FOR DOG WALKERS. [The Hill](#) (8/19, Devaney, 237K) reports that "federal regulators are moving forward with new rules for dog walkers at a San Francisco park managed by the National Park Service." The Presidio Trust announced Monday that "dog walkers will be required to obtain permits, which will allow them to walk no more than six dogs at a time in the park." Also, they will "be required to hold liability insurance and go through dog-handling training."

OLYMPIC NATIONAL PARK DETECTS BAT WITH RABIES. [The Oregonian](#) (8/19, 827K) reports that "a 59-year old Port Angeles area man is undergoing rabies prevention treatment after being scratched by a bat in front of Lake Crescent Lodge in Olympic National Park on Tuesday, Aug. 12." Park staff "packaged and transported the bat to the Clallam County Environmental Health Department for rabies testing and the visitor began preventative

treatment for the rabies virus." On Saturday, Aug. 16, test results confirmed the bat had the rabies virus.

SAGUARO NATIONAL PARK PLANS SPRAYING TO KILL BUFFELGRASS. The [AP](#) (8/18) reports that Saguaro National Park "plans herbicide spraying this week on parts of the park where invasive buffelgrass has become established." According to the article, "a helicopter will be used to spray the non-native plants in parts of the park that are too dangerous or too remote to reach by foot."

YELLOWSTONE NATIONAL PARK PLANS ROAD WORK THIS FALL. The [AP](#) (8/18) reports that Yellowstone National Park is "giving visitors to the park this fall a heads up on some significant road construction work that will result in long detours." According to the NPS, "the road work involves two sections of Yellowstone's Grand Loop Road that will be closed due to construction after the Labor Day holiday weekend."

NPS TO CELEBRATE AVIATION DAY. The [Outer Banks \(NC\) Voice](#) (8/18) reports that the NPS and First Flight Society, a park partner, will "celebrate National Aviation Day at Wright Brothers National Memorial, the birthplace of modern aviation."

YOUNG GIRL DIES IN FALL AT YELLOWSTONE NATIONAL PARK. The [AP](#) (8/18) reports that "an 8-year-old girl has died after falling about 550 feet while hiking in Yellowstone National Park." The NPS says "the accident occurred Sunday morning in the Grand Canyon of the Yellowstone." Her body was retrieved around noon Sunday.

Coverage by the AP was also picked up by the [Washington Post](#) (8/18, 4.06M), the [Sacramento \(CA\) Bee](#) (8/18, 582K), and [CBS News](#) (8/19, 5.21M). Also reporting on the story is the [Los Angeles Times](#) (8/19, Lopez, 3.42M).

RESCUERS RECOVER BODY OF YELLOWSTONE EMPLOYEE SWEEPED DOWNRIVER. The [E&E Daily](#) (8/18) reports that "rescue crews on Saturday pulled the body of a Georgia man missing for more than a week from a Yellowstone National Park river." According to the article, "the body of Darien Latty, who was working at the park for the summer, was found pinned to a large rock in a dangerous section of white water on the Yellowstone River." Latty had been "illegally floating on inner tubes with two co-workers, who exited the water near the confluence of the Lamar and Yellowstone rivers."

MARINE'S WIFE DISCOVERED DEAD IN CALIFORNIA MINE SHAFT ON FEDERAL LAND. The [AP](#) (8/19, Taxin, Flaccus) reports that "deep in a mine shaft in the California desert, the body of a pregnant wife of a U.S. Marine was discovered after a search of nearly two months," and "far off in Alaska, a man alleged to have been her lover was arrested on suspicion of homicide." Officials on Monday "outlined the discovery of 19-year-old Erin Corwin and the arrest of 24-year-old Christopher Brandon Lee, who until recently was also a Marine." According to San Bernardino County Sheriff John McMahon, "the search for Corwin ended Saturday when her body was spotted with a video camera 140 feet down a mine shaft on federal land near her home in Twentynine Palms, where her husband was stationed."

Bureau of Land Management:

BLM ISSUES GUIDANCE ON USES OF RAILROADS RIGHTS-OF-WAY LAND. The [Rapid City \(SD\) Journal](#) (8/19, 141K) reports that the BLM has "issued guidance to its state and field offices on how to evaluate activities on thousands of miles of public land that was granted to railroad companies as rights-of-way under a 19th century law." The bureau's "land managers will use the guidance to determine whether the lands are being properly used under the law." Steve Ellis, BLM Deputy Director of Operations, said, "These evaluations are important because the BLM has the responsibility as a land steward to ensure that public lands are managed in a responsible way. And because each activity has a unique situation, the evaluations will be done on a case-by-case basis."

OWL ENTERS APARTMENT, KILLS CANARY. The [AP](#) (8/18) reports that "an owl flew into a 10th story apartment in Coeur d'Alene, apparently opened a bird cage and killed one of two canaries inside, the residents said." Beth Paragamian, wildlife education specialist with for Idaho Fish and Game and the BLM, said "it's strange that an owl would be flying so high in an area without many tall trees and surprising that it would enter a residence, much less open a bird cage."

Coverage by the AP was also picked up by the Detroit Free Press (8/19, 1.02M), the Sacramento (CA) Bee (8/18, 582K), and Newsday (8/19, 1.35M).

Fish and Wildlife Service:

FWS TO REVIEW STATUS OF BUTTERFLY IN WASHINGTON. The E&E Daily (8/18) reports that the FWS has "decided that protection might be needed for a butterfly in Washington state and plans to begin the 12-month review of a possible Endangered Species Act listing when 'resources become available.'" In a notice set for publication in tomorrow's Federal Register, the agency said "a petition to list the island marble butterfly, *Euchloe ausonides insulanus*, may be warranted." The service has "requested that groups seeking a listing for the butterfly submit material by the end of December 2016."

Also reporting on the story is The Hill (8/19, Devaney, 237K).

FWS TO HOLD PUBLIC INFORMATION SESSIONS ON PROPOSAL TO PROTECT BAT. The Georgia Public Broadcasting (8/18) reports that the FWS "wants to declare the northern long eared bat an endangered species." On Tuesday, the service will "host the first of three webcasts to provide more information about the proposal."

The Minneapolis Star Tribune (8/19, Belz, 1.32M) also notes the proposal, with a focus on its impact on Minnesota's timber industry. Protections would "trigger a blanket prohibition against killing the bats, even accidentally," and "that would halt logging in much of the country during warm months, when the little animals roost in the forest and raise their vulnerable young in trees."

ENDANGERED DESERT TORTOISES BEING STERILIZED. The Nature World News (8/18) reports that "in a sort of paradoxical situation, wildlife officials are taking the unusual step of sterilizing endangered desert tortoises, a species that they are in fact trying to protect." FWS officials say "the action is necessary to save this species from captive backyard tortoises, which are diverting resources from efforts to preserve the species in the wild." According to the article, "tortoises in captivity threaten native populations because they can carry diseases with them when they escape or are released illegally in the desert."

HOCKING COLLEGE PARTNERS WITH FWS ON WETLANDS. The Perry County (OH) Tribune (8/19) reports that the Hocking College School of Natural Resources partnered with the FWS "to bring wetlands back." Students in Heavy Equipment Management, GeoEnvironmental Science and Wildlife Resources Management programs "worked together to complete Phase I of the riparian wetland project located in the floodplain on Hocking College campus in Nelsonville." The FWS "provided funds and materials for construction of the wetland, as well as on-site supervision in order to complete the first phase."

SCIENTISTS CALL FOR BALANCED APPROACH TO ROAD DEVELOPMENT IN SENSITIVE AREAS. The E&E Daily (8/18) reports that "scientists are urging governments and industry to compromise more as they balance development of roads and bridges through sensitive wildlife areas in tropical and subtropical countries." In a study published Monday in *Current Biology*, "researchers wrote that while governments often prioritize development over wildlife, the decisions can have long-term consequences." Tim Caro, a conservation ecologist at the University of California, Davis, and a lead author on the paper, said in a statement, "Roads are increasingly being built and upgraded through protected areas, especially in the tropics and subtropics, where there are so many species needing protection."

BIOLOGISTS CONCERNED OVER RISE IN ILLEGAL IVORY TRADE. NPR (8/18, Joyce, 519K) reports that "the illegal trade in ivory from African elephants has tripled in the past 15 years, to the extent that biologists fear for the creatures' future existence." The article notes that "for the better part of a century, from 1840 to around 1940, the US was the world's biggest buyer of ivory," and "most of that ivory went to a tiny town in Connecticut — a town that's now grappling with this dark part of its past." The article focuses on the residents of Deep River, and their efforts to "take their history seriously."

US Geological Survey:

USGS EXPANDS WATER MONITORING SYSTEM. Newsday (8/19, 1.35M) reports that "Long Island's

emergency officials will be able to access real-time information about water conditions during the next severe storm, thanks to an expanded US Geological Survey monitoring system being installed this summer." The USGS' Surge, Wave and Tide Hydrodynamic Network will "stretch from Virginia to Maine, with about 60 to 70 permanent sites on Long Island, in New York City and in Westchester, agency officials said." William Capurso, a hydrologic technician with USGS, said, "It helps create flood-inundation maps that can determine the best evacuation routes – who needs to evacuate when and where."

Securing America's Energy Future:

Renewable Energy:

NUMEROUS BIRDS DEATHS AT IVANPAH SOLAR PLANT RAISE CONCERNS. The E&E Daily (8/18) reports that "one bird is scorched while flying above BrightSource Energy Inc.'s Ivanpah solar power plant in the California desert about every two minutes, and Fish and Wildlife Service investigators are pushing state regulators to slow the company's expansion plans until they can learn more about what is killing the birds." FWS officials fear the facility "may act as a 'mega-trap' for wildlife – with the bright light attracting them to the area, only to scorch them to death." However, "BrightSource contends some of the puffs of smoke detected are from insects and bits of airborne trash rather than wildlife."

Also reporting on the story are the AP (8/19) and the National Review (8/19, 879K).

Coverage by the AP was also picked up by the Las Vegas Sun (8/18, 148K), the Christian Science Monitor (8/18, 566K), CBS News (8/19, 5.21M), Fox News (8/18, 6.72M), and Fox Business (8/18, 333K).

BLM APPROVES PERMIT FOR CHOKECHERRY-SIERRA MADRE WIND FARM. The AP (8/19) reports that "a preliminary finding by the Bureau of Land Management says a proposed southern Wyoming wind farm would have no significant impact on the human environment." The article notes that "the conclusion was one of two environmental analyses to be done on the \$5 billion Chokecherry and Sierra Madre project." The other is a study of a transmission line.

Coverage by the AP was also picked up by the Washington Times (8/18, 465K), the Denver Post (8/19, 923K), and the Sacramento (CA) Bee (8/18, 582K).

BAT DEATHS PROMPT CHANGE AT SPRING VALLEY WIND ENERGY PROJECT. The E&E Daily (8/18) reports that "a Nevada wind farm has been forced to make changes after killing more bats than allowed under a deal with the federal government." The 152-megawatt Spring Valley Wind Energy project has "adjusted its turbine operations at night to factor in bat migrations through the region." According to the article, "on nights with heavy bat activity, the turbines now kick in when wind speeds reach 11 mph, instead of about 7 mph, the facility's owner said."

FWS CORRECTS NUMBER OF EAGLE DEATHS AT WIND FARMS. The Palm Springs (CA) Desert Sun (8/18, 116K) reports that "more than a month after the US Fish and Wildlife Service said it had reports of 15 golden eagles killed at wind farms in the area, the agency has retracted that number and said most of the eagle deaths actually occurred elsewhere in California." Eric Davis, the agency's Sacramento-based assistant regional director for migratory birds and state programs, "originally provided the number during a July interview with The Desert Sun, saying the golden eagle deaths had been documented at wind farms in the Palm Springs/San Geronio Pass area," but "the Desert Wind Energy Association, a consortium of wind energy companies, challenged that number." And so "the Fish and Wildlife Service — responding to Freedom of Information Act requests from The Desert Sun and a lawyer for the association — reviewed its records." On Monday, federal officials said "most of the eagle deaths actually occurred at Altamont Pass in Alameda County and were incorrectly classified in a database as having occurred in the San Geronio Pass area."

BOEM TO HOLD OFFSHORE WIND LEASE AUCTION. The reNews (8/19) reports that "the United States will hold its third competitive lease auction 19 August for a 1.45GW offshore wind energy site in federal waters off Maryland." The article notes that "a 32,737-acre north lease area and a 46,970-acre south area, located about 10 miles off the coast of Ocean City, will be auctioned simultaneously in the online sale." The BOEM said "16

companies have qualified to participate however, based on previous auctions, many are expected not to take part."

KEENE: GOVERNMENT SUBSIDIES FAVOR RENEWABLES, KILL BIRDS. In a column in the Washington Times, (8/18, Keene, 465K) David Keene criticizes what he believes is a hypocritical approach by environmentalists and government subsidies that favors renewable energy sources no matter what the costs. In this case, he cites the "massive loss of bird life," estimated in the hundreds of thousands each year, that results from wind farms and solar-energy facilities. Keene claims that the Obama administration "thinks wind farms should be allowed to kill with impunity by promulgating regulations to exempt them from the penalties" others would face for killing avian wildlife. Keene concludes that environmentalists are convinced such "bird genocide... will be worth it to cripple the fossil-fuel industry."

Onshore Energy Development:

USGS STUDY FINDS MAN-MADE QUAKES CAUSE LESS SHAKING. The Washington Post (8/18, Press, 4.06M) reports that a USGS study issued Monday found that man-made quakes, including those thought to be spurred by fracking, "cause less shaking and in general are about 16 times weaker than natural earthquakes with the same magnitude." The study examined moderate quakes in the eastern and central US from 2011 to 2013, comparing reported magnitude with eyewitness accounts on the USGS' electronic "Did You Feel It" survey.

The Wall Street Journal (8/19, Audi, Subscription Publication, 5.89M) notes that there is debate over whether or not fracking leads to seismic activity. The American Petroleum Institute says there is insufficient data to conclude there is a connection between quakes and fracking, the Journal notes.

Also reporting on the story is the AP (8/18). Coverage by the AP was also picked up by the Sacramento (CA) Bee (8/18, 582K), the US News & World Report (8/18, 645K), and Yahoo! (8/19, Borenstein, 10.35M).

STATE BLM UPHOLDS THOMPSON DIVIDE GAS LEASE EXTENSIONS. The Glenwood Springs (CO) Post Independent (8/19, 27K) reports that the state office of the BLM on Monday "upheld a local BLM decision made in March to allow more than two dozen oil and gas leases in the Thompson Divide area to be extended for a second straight year beyond their original 2013 expiration date." However, "the decision just sets up a likely appeal to the U.S. Interior Board of Land Appeals in Washington, D.C.," according to "Chris Seldin, the assistant Pitkin County attorney who is arguing the case on behalf of three area governments, including the city of Glenwood Springs."

KANSAS OIL DRILLERS WEIGH OPTIONS UNDER LESSER PRAIRIE CHICKEN RULES. The Wichita (KS) Eagle (8/19, 313K) reports that "the lesser prairie chicken – and the federal plan instituted for its protection – has soured the mood of the whole oil and gas industry." Speakers at the annual meeting of the Kansas Independent Oil & Gas Association on Monday, "told oil and gas producers that they face a decision: Keep doing what they're doing and hope they don't commit a violation – or enroll in a voluntary mitigation plan that eliminates the possibility of fines but requires following government rules on operating, as well as substantial enrollment and mitigation fees."

BLM CONSTRUCTING MOBILE HOMES TO BOLSTER BAKKEN STAFF. The E&E Daily (8/18) reports that the BLM "this week is beginning construction of new mobile homes to help bolster its oil and gas staff in North Dakota's booming Bakken Shale region." The bureau's North Dakota field office in Dickinson "plans to build 10 mobile housing units on a 10-acre plot recently transferred from the Bureau of Reclamation." According to the BLM, "the units will provide temporary homes for newly arrived BLM and Forest Service employees until more permanent housing can be found."

Also reporting on the story is the AP (8/19).

TENSIONS RISE OVER PROPOSED COLLECTOR NATURAL GAS LINES IN MOAB AREA. The Deseret (UT) News (8/19, 538K) reports that "a proposed 25-mile network of gathering lines to carry the captured natural gas from existing or new oil wells is up for public review in what promises to be another controversy between environmentalists and industry." The article notes that "tension has continued to dominate the interplay among Grand County officials, Fidelity Exploration and Production Co., and environmental groups over the uptick in

industry activity on lands adjacent to prime red rock recreation spots outside Moab." A draft environmental analysis has been prepared and released by the BLM "on the network of proposed collector lines, of which 22.5 miles will be buried and the remainder above ground."

CIRCUIT COURT PROTECTS SURFACE ACCESS FOR DRILLERS. The E&E Daily (8/18) reports that in a ruling handed down last week, the 10th US Circuit Court of Appeals "found that an Entek Energy Ltd. subsidiary was entitled to cross private land in Colorado to reach an oil and gas well on neighboring land." The holding "comes down against surface owner Stull Ranches, which argued that the traffic and industrial activity would disturb grouse used in an on-site hunting business." The article notes that "last week's circuit court ruling expands a 2012 decision from the US District Court for the District of Colorado, which found that Entek could use the Stull surface only to access oil and gas directly under that estate." However, "the circuit court pointed to a federal arrangement that bundles all the oil and gas rights under Stull Ranches and adjacent land."

DEUTCH: ADMINISTRATION SHOULD DO MORE TO PROMOTE DEVELOPMENT OF US OIL AND NATURAL GAS. In the Wall Street Journal (8/19, Subscription Publication, 5.89M), John Deutch – a professor of chemistry at the Massachusetts Institute of Technology, a former director of energy research and undersecretary at the Department of Energy, and a director of Cheniere Energy Inc., a Houston-based liquefied natural gas company – writes that while the President's second-term energy strategy of reducing CO2 emissions via regulation appears to be working, his Administration should be doing more to encourage the development and exportation of US oil and natural gas.

ANALYST TOUTS FRACKING'S POTENTIAL TO AID IN WATER CONSERVATION. Forbes (8/18, 11.38M) contributor Brigham McCown reports that "technology to help curb water shortage" may be found "in a very unexpected industry," fracking. Though the industry is criticized for its water use, technology used to recycle water "may hold the solution of water conservation." Each well saves between \$70,000 and \$300,000 annually by using recycled water, McCown notes.

Offshore Energy Development:

INTERIOR SENDS OFFSHORE DRILLING PROPOSAL TO WHITE HOUSE. The E&E Daily (8/18) reports that the Interior Department "last week advanced long-awaited draft regulations that will dictate how companies may explore for oil and gas in the remote waters north of Alaska." The article notes that "the proposed rule, which was submitted to the White House Office of Management and Budget for review, comes as Royal Dutch Shell PLC is considering resuming drilling in the Arctic next summer following its failed 2012 bid." The joint rules from the BOEM and BSEE will "promote safe, responsible, and effective drilling activities on the Arctic Outer Continental Shelf, while also ensuring the protection of Alaska's coastal communities and the marine environment," according to a brief summary on the OMB website.

Also covering the story are The Hill (8/19, Barron-Lopez, 237K), the Washington Examiner (8/19, 335K), the Anchorage (AK) Dispatch News (8/18, 251K), the National Journal (8/19, Subscription Publication, 561K), the National Journal (8/19, Subscription Publication, 561K), and the Law 360 (8/19, 18K).

BOEM TO UPDATE BONDING REGULATIONS. The E&E Daily (8/18) reports that the Interior Department "late last week announced plans to update 20-year-old regulations that ensure taxpayers are not left on the hook for the cost of tearing down abandoned offshore oil and gas facilities." The BOEM said "its existing bonding regulations for oil and gas development have not kept pace with new facilities designed to drill in deeper waters and the growing cost to decommission them." The bureau is "giving the public until Oct. 20 to comment on best practices for mitigating financial risks and whether current bonding requirements are adequate." BOEM acting Director Walter Cruickshank said in a statement, "We would like to work with industry and others to determine how to improve our regulatory regime to better align with the realities of aging offshore infrastructure, hazard risks and increasing costs of decommissioning."

Also providing coverage are the Upstream Online (8/19, 20K) and the Fierce Energy (8/19).

INDUSTRY GROUPS URGE FOR MORE OFFSHORE LEASE ACCESS. The Oil and Gas Journal (8/19, 1K) reports that in public comments submitted last week to the BOEM, the American Petroleum Institute, America's

Natural Gas Alliance, Independent Petroleum Association of America, and other groups urged the Interior Department to "consider all parts of the US Outer Continental Shelf for leasing" in its 2017-2022 OCS lease program. API senior policy adviser Andy Radford argued, "Expanding opportunities for US offshore energy production would create hundreds of thousands of new jobs, raise billions of dollars for the government, and strengthen America's international diplomacy and national security." He warned, "This is not an issue to be considered lightly. Decisions the government makes now will impact our economy and our ability to exert diplomatic influence for decades."

Also covering the story is [The Hill](#) (8/19, Cama, 237K).

BP, NOBLE PLUG FAILED DEEPWATER GULF OF MEXICO WELL. The [New Orleans Times-Picayune](#) (8/18, Larino, 527K) reports that BP and Noble Energy have closed and left a deepwater Gulf of Mexico well they were jointly exploring after it failed "to reach targeted oil and gas deposits." Noble said the companies are reexamining data to "determine future exploration plans" in the Atwater Valley area. The Bright well was located in 5,600 feet of water and drilled to a depth of 13,500 feet before being plugged.

BIOLOGIST DECRIES SEISMIC TESTING'S IMPACT ON MARINE LIFE. For "The Blog" of the [Huffington Post](#) (8/19, Halter, 11.54M), Dr. Reese Halter writes that "on July 16, the Obama administration approved the use of sonic cannons in the Western Atlantic Ocean." Halter claims that "millions of sea creatures will be senselessly killed by incessant sonic booms along the eastern US seaboard as Big Oil scavenges for more heat-trapping gases." Moreover, Halter finds it "infuriating and heartbreaking" that the BOEM "predicts the collateral deaths (and/or harm) of millions of sea creatures as an incidental outcome."

Tackling America's Water Challenges:

PROBE SOUGHT INTO POSSIBLE WATER DIVERSION. The [AP](#) (8/18) reports that "state and federal water agencies are seeking an investigation into whether some California farmers are taking water released from upstream dams intended for consumers in other regions of the state." The BOR and the California Department of Water Resources are "calling on the state board that oversees water rights to investigate possible water diversion by farmers in the Sacramento-San Joaquin Delta." Meanwhile, the California Sportfishing Protection Alliance, "a group allied with Delta landowners, has countered by filing a formal complaint alleging that DWR and Reclamation are illegally diverting water from rivers that flow into the Delta."

Coverage by the AP was also picked up by the [Sacramento \(CA\) Bee](#) (8/18, 582K) and [KFSN-TV Fresno, CA](#) (8/19, 2K).

Also reporting on the story are the [Fresno \(CA\) Bee](#) (8/18, 322K), the [Central Valley \(CA\) Business Times](#) (8/19, 206) and [KFBK-AM Sacramento, CA](#) (8/19).

COMPROMISE NEARS ON WATER SUPPLY LEGISLATION. The [Bloomberg BNA](#) (8/19, 7K) reports that "negotiations are making progress in the US Congress on a bill to address water supply problems in California, according to congressional staff." According to the article, "compromise language has been drafted and redrafted by staffers working for the congressional delegation from California—or more specifically for House Republicans from the state and Sens. Dianne Feinstein (D-Calif.) and Barbara Boxer (D-Calif.)."

FLOWS IN SOUTH FORK OF BOISE RIVER INCREASED. The [Idaho Statesman](#) (8/18, 222K) reports that water managers with the BOR "increased flows in the South Fork of the Boise River on Monday to restore fish habitat damaged by last year's wildfires." The BOR is "increasing the river volume from Anderson Ranch Reservoir by 400 cfs (cubic feet per second) and again Tuesday by another 300 cfs." According to the bureau, "this window of high water will help recover fish habitat in the South Fork of the Boise River, one of Southwest Idaho's most important trout streams."

WATER BOND COMPROMISE LAUDED. In an op-ed for the [Sacramento \(CA\) Bee](#) (8/19, 582K), state Sen. Lois Wolk supports the new \$7.5 billion water bond that will be on the November ballot. Wolk argues that "if approved by the voters, it will be a victory for all of California and produce important benefits for decades to come." Wolk urges "all voters, especially those in the Delta region, to finish this work in November and vote yes on Proposition

1."

Empowering Native American Communities:

AUTHORITIES INVESTIGATE CHILD'S DEATH ON SPIRIT LAKE RESERVATION. KFYR-TV Bismarck, ND (8/19, 1K) reports that "police are investigating the death of a one-year-old child following an accident on a North Dakota Indian Reservation." According to the FBI, "the toddler was hit by a vehicle on Saturday on the Spirit Lake Reservation near Devils Lake." The FBI is consulting with the Spirit Lake Tribal police and the BIA, and "reports will be submitted to the US Attorney's Office."

US NAVAJO COMMUNITIES ADOPTING SMOKING BANS, CASINOS EXPRESS CONCERN. NPR (8/18, Jung, 519K) reports that "dozens of Navajo Nation communities passed local clean air resolutions this year" which "ban tobacco use in government buildings and work places." The National Native Network has worked "to reduce commercial tobacco use among Native Americans with funding from the Centers for Disease Control," but "others are concerned that the policies could affect tribal businesses like casinos." Navajo Nation Gaming Enterprise CEO Derek Watchman says "there are studies out there that suggest that smoking bans really, really impact revenue," and that "with limited revenue, you can only employ so [many people]."

Top National News:

OBAMA AGAIN URGES FERGUSON PROTESTERS TO ESCHEW VIOLENCE AND POLICE TO SHOW RESTRAINT. The ongoing violent protests in Ferguson, Missouri continued to dominate the news cycle on Monday. The three network newscasts devoted more than 23 minutes to reports from Ferguson, more than three times the air time they gave to the day's next most prominent story, the US airstrikes in Iraq. President Obama's comments on the protests and the investigation into the shooting of Michael Brown during his press conference on Monday were seen as another attempt to show the White House's evenhanded approach to the situation.

The New York Times (8/19, A12, Davis, Subscription Publication, 9.79M) report that on Monday, the President "called for calm and healing...even as he acknowledged the deep racial divisions that continue to plague not only Ferguson, "but cities across the United States." The Times notes that the President said, "In too many communities, too many young men of color are left behind and seen only as objects of fear." According to the Times, the President "took pains to make clear that he was not issuing a blanket indictment of either the protesting crowds or the law enforcement officers responding to the demonstrations."

According to a front-page article in the New York Times (8/19, A1, Eligon, Davis, Subscription Publication, 9.79M), the President "seemed less than enthusiastic about" Missouri Gov. Jay Nixon's "decision to call in the National Guard" following several nights of escalating violence targeting the police in Ferguson. USA Today (8/19, Alcindor, Copeland, Hampson, 5.76M) also reports that the President "sounded skeptical about the Guard's use."

In the lead story for the CBS Evening News (8/18, lead story, 3:35, Pelley, 5.08M), Scott Pelley noted that President Obama "took a break from his Martha's Vineyard vacation to get a briefing on Ferguson and other issues." CBS showed a brief clip of the President speaking before returning to reports from on the ground in Ferguson. On NBC Nightly News (8/18, story 3, 2:50, Williams, 7.86M), Brian Williams also briefly that on Monday, the President "return[ed] to the White House for two days from his working vacation on Martha's Vineyard."

On Fox News' Special Report (8/19, 1.53M), Wendell Goler reported that the President said "the violence...was being caused by a small minority, many of them who might not even be from Ferguson." Goler went on to say that the President's appearance on Monday "seemed aimed at showing the President engaged...more convincingly than the two statements to the press he made...while on Martha's Vineyard."

While the President's remarks were widely noted in the media, they were not the focus of many reports. Instead, as has been the case for the last several days, coverage emphasizes that the violence in Ferguson has only escalated as police there have tried various tactics to calm angry crowds and identify the criminals in their midst. The St. Louis Post-Dispatch (8/19, 938K) is reporting that "protests escalated again late Monday night as police fired tear gas at protesters who defied police by refusing orders to disperse." Several outlets reported that again

on Monday night, the police responded to reports of gunfire.

As of early Tuesday morning, CNN (8/19, McLaughlin, Kastenbaum, Yan, 10.19M) was reporting that on Monday, "an evening of peaceful protests devolved into another night of chaos as gunfire, tear gas and Molotov cocktails flew." According to CNN, "Some believe those causing trouble are from outside Ferguson."

The AP (8/19, Kuhnhehn) reports that on Monday, the President said "the vast majority of protesters...were peaceful, but warned that a small minority was undermining justice," and made the case that "giving in to that anger through looting and attacks on police only stirs tensions and leads to further chaos." The AP notes that the President "said he also had told" Nixon that he "wanted to ensure the use the National Guard" was "limited in scope," and that he "would be monitoring that operation in the coming days to see whether the guard's involvement was helping or hurting." According to the AP, "Shortly before speaking to reporters," the President "received an update from top advisers including" Holder and White House Counsel Neil Eggleston.

In an online post, David Jackson of USA Today (8/19, 5.76M) reported that the President "announced he is dispatching Attorney General Eric Holder to monitor the unrest" in Ferguson, and "said people there should push back on 'a small minority' that is undermining peaceful protest by fomenting violence." According to Jackson, the President said "while there are legitimate concerns raised by the shooting...the solution does not involve looting and attacking police with Molotov cocktails." Jackson noted that the President also "said police should re-examine the use of heavy military equipment in dealing with protests."

On ABC World News (8/18, lead story, 3:20, Sawyer, 5.84M), correspondent Steve Osunsami said "the militarized police state that seems so un-American to so many is returning to" Ferguson, and President Obama is "saying he hopes the troops don't make things worse." President Obama: "I'll be watching to assess whether, in fact, it's helping rather than hindering progress in Ferguson."

Sam Stein of the Huffington Post (8/18, 11.54M) reported that the President's "most noteworthy remarks came when asked about the machinery being deployed by those police...which has been criticized for instead inciting tensions and further alienating the local community." Stein quotes the President as saying, "I think one of the great things about the United States has been our ability to maintain a distinction between our military and domestic law enforcement." The Washington Times (8/19, Sherfinski, 465K) reports that the President was "chastising both protesters and law enforcement."

In an analysis titled, "Obama Shuns Emotional Rescue On Race," Edward-Isaac Dove of Politico (8/18, 637K) said while the President, when "speaking about Trayvon Martin, was connected, heartfelt, deeply personal," on Monday, "he was guarded, reserved and deeply clinical." Dove goes on to note that the President "didn't reflect on how if he had a son, that son would look like Michael Brown," and "didn't, as he did just over a year ago, call for a new chapter in a national conversation on race." According to Dove, "despite speaking at length about Ferguson, as Obama exited the White House briefing room half an hour later, many were left still wanting to hear more."

Appearing on Fox News' Special Report (8/19, 1.53M), the Wall Street Journal editorial board's Jason Riley praised the President for having "talked about black crime a little bit" on Monday, but objected to the President "attribut[ing] that black criminality" to "poverty or a racist criminal justice system." Riley said that explanation is "nonsense," and pointed out that "the black crime rate was lower in 1960 than it is today." Riley asked rhetorically: "Was there less racism or less poverty in 1960?" Riley went on to dispute the "false narrative being pushed out there...by Sharpton and the rest of the hustlers that black men live in fear of being shot by cops." Riley said, "I know something about growing up black and male in the inner city," and it is "not cops," but "other black people shooting black people."

Neil Munro of the Daily Caller (8/18, 408K) reported that author Pat Buchanan, who worked for President Nixon "during the late 1960s race riots," predicted that the President's "passive response to the riots and arson in Ferguson" could hurt Democratic candidates in November. Buchanan is quoted as saying, "The riots and the violence and the looting are going to cause a lot of folks to recoil from those who appear to be condoning those sorts of act... there is no question about it."

National Guard Deployed Following Coordinated Violence Targeting Police Officers. On the CBS Evening

News (8/18, lead story, 3:35, Pelley, 5.08M), Scott Pelley reported that "the curfew in Ferguson, Missouri did not stop the violence, so Gov. Jay Nixon lifted it today and is sending in national guardsman to help keep order after another night of violence." Pelley noted that in his press conference on Monday, the President "said he asked" Nixon "to make sure the National Guard is used only in what he called a 'limited and appropriate' way." Correspondent Vladimir Duthiers went on to report from Ferguson that the National Guard "will be under the command of the State Highway Patrol, the same agency now directing security here, but the Guard's mission will be limited to protecting the police command center," which was the target of "a coordinated attack of Molotov cocktails and gunfire" on Sunday night.

At the opening of NBC Nightly News (8/18, lead story, 3:45, Williams, 7.86M), Brian Williams reported from Ferguson that on Sunday night, "the violence was the most intense so far," and "some of the worst urban violence in this country in recent years." NBC's Ron Allen went on report that on Sunday night, the Police "chronicled a relentless barrage – 8:25 P.M., first reports of gunfire; then 8:28 P.M., reports of eight armed men; 8:56 P.M., hundreds trying to attack the police command center throwing Molotov cocktails." According to Allen, "Several businesses were looted." Also on NBC Nightly News (8/18, story 2, 2:50, Williams, 7.86M), Mark Potter reported that on Sunday, police "form[ed] security lines after hearing reports of nearby gunfire, Molotov cocktails and an angry crowd heading their way."

The Washington Post (8/19, Wax-Thibodeaux, Brown, Markon, 4.06M) reports that on Monday, Captain Ronald Johnson of the Missouri Highway Patrol said the protests on Sunday "'took a very different turn after dark,' as police deployed tear gas when protesters threw molotov cocktails and gunshots were fired at officers." According to the Christian Science Monitor (8/19, Slattery, 566K), "police say protesters fired at least 30 gunshots and threw Molotov cocktails" on Sunday night before officers responded, and then "in the ensuing turmoil, intense looting erupted as did shootings and other acts of violence."

The Los Angeles Times (8/19, Hennessy-Fiske, Pearce, 3.42M) notes that on Sunday night in Ferguson, "at least two people were shot...and police were fired upon." The Times also reports that police "said there were signs of a planned and coordinated attempt" to "launch an advance on the police command post not far from the scene of Brown's death." The Times notes that on Monday, Nixon "condemned 'the firing upon law enforcement officers, the shooting of a civilian, the throwing of Molotov cocktails, looting and a coordinated attempt to overrun the unified Command Center.'"

The Wall Street Journal (8/19, Dolan, Shallwani, Subscription Publication, 5.89M) quotes Nixon as saying, "Last night, Ferguson, Mo., experienced a very difficult and dangerous night as a result of a violent criminal element intent upon terrorizing the community. As long as there are vandals and looters and threats to the people and property of Ferguson, we must take action to protect our citizens."

Nevertheless, according to the Washington Post (8/19, Wax-Thibodeaux, Brown, Markon, 4.06M), on Monday, the President "appeared to offer only lukewarm support to Nixon's decision to call in the Missouri National Guard." In an interview for NBC Nightly News (8/18, story 3, 2:50, Williams, 7.86M), Brian Williams asked Gov. Nixon about "the militarized look of the police force" in Ferguson. Nixon said that last week, "when we saw that militaristic look and the reaction of folks that night, we called...in" the Missouri State Highway Patrol, and "Captain Johnson and his team did peace marches...and that night was peaceful." But Nixon added, "Unfortunately, the next morning there was a release of" the videotape showing the shooting victim, Michael Brown, robbing a store and assaulting its owner, which "lighted up a tinderbox here."

The New York Times (8/19, Eligon, Davis, Subscription Publication, 9.79M) also reports that Johnson's "less confrontational approach seemed to calm the crowds for one night, but tensions between the police and protesters have since surpassed levels seen earlier." The Times reports that "on Sunday night...police officers came under assault from gunfire and firebombs and responded with their largest show of force so far." The Times notes that Johnson said "some demonstrators...had opened fire on the police," and "hurled firebombs," which he called "premeditated criminal acts." Johnson is quoted as saying, "We had to act to protect lives and property."

Reuters (8/19, Wulfhorst) also covers Nixon's decision to deploy the National Guard. The Washington Post (8/19, Farhi, 4.06M) has a report on the experiences of reporters in Ferguson. The Los Angeles Times (8/19, 3.42M), in an editorial, says it "seems that Missouri officials have refused to learn the lessons of Los Angeles' experience" in 1992, when riots swept the city following the Rodney King verdict. According to the Times, "the LAPD's

reputation for restraint in crowd control is generally deserved." The Times adds that "by contrast, authorities in Ferguson responded to initial protests with heavy arms," and "the situation escalated rapidly."

Holder To Travel To Ferguson After Criticizing Law Enforcement There. The Washington Post (8/19, Wax-Thibodeaux, Brown, Markon, 4.06M) reports that on Wednesday, Attorney General Holder will go to Ferguson "to meet with FBI agents and prosecutors investigating the fatal police shooting," which the Post says is "the latest sign of an expanding federal role" in Ferguson. According to the Post, "Dozens of FBI agents are going door to door...to interview anybody with information about the shooting," although "federal officials said last week that they were deferring, for now, to state officials."

Politico (8/18, Topaz, McCalmont, 637K) reports that in a statement released on Monday, Holder "took aim at the process so far," saying, "The selective release of sensitive information that we have seen in this case so far is troubling to me." The Washington Post (8/19, Berman, 4.06M) also reports that Holder "criticized the way information regarding Michael Brown's death has been released." The Hill (8/18, Pames, 237K) notes that on Monday, the President said he "was trying to be neutral with his remarks," and said Holder "would have to be 'careful not to prejudice an investigation' that is ongoing."

On the CBS Evening News (8/18, story 2, 1:05, Pelley, 5.08M), correspondent Bob Orr said, "Ultimately it's up to local prosecutors to determine whether or not to bring charges against the police officer who shot Brown, but...the Justice Department is also pressing ahead on a civil rights investigation." On ABC World News (8/18, story 2, 2:35, Sawyer, 5.84M), Alex Perez reported that Officer Darren Wilson "remains in hiding and the grand jury is expected to decide soon whether" he "could have to defend his actions in a court room."

According to the New York Times (8/19, Wines, Goode, Subscription Publication, 9.79M), "Critics say officials in Ferguson have added to tensions by making contradictory statements" and "declining to release details about the shooting." In an editorial titled, "Ferguson, Mo., Police Are Doing Little To Instill Confidence," the Washington Post (8/19, 4.06M) says "if there were any doubt that the citizens of Ferguson...had good reason to question the professionalism of their police force, it has been erased by several days of revelations."

Private Autopsy Concludes That Brown Was Shot Six Times. The New York Times (8/19, Southall, Subscription Publication, 9.79M) reports on the results of an autopsy conducted by Dr. Michael Baden on the request of the Brown family. Baden concluded that Michael Brown "was shot at least six times, all from the front and at a distance, including two shots that struck him in the head."

The Wall Street Journal (8/19, Shallwani, Subscription Publication, 5.89M) reports that Benjamin Crump, the Brown family's lawyer, said the autopsy "verifies that the witness accounts were true." DeWayne Wickham, in his column for USA Today (8/19, 5.76M), writes that Crump says, "Several witnesses are telling federal investigators amazingly consistent stories of how Brown was shot as he held his hands in the air." The Huffington Post (8/18, Siddiqui, 11.54M) reported that following the release of the autopsy, Brown's mother, Lesley McSpadden, asked, "What else do we need to give them to arrest the killer of my child?"

The Daily Caller (8/18, Ross, 408K) reported that "a woman claiming to be a friend of Darren Wilson" called into a St. Louis radio station, and "gave Wilson's side," which "CNN and other mainstream outlets" subsequently "picked up...after verifying that [her] claims match what Wilson told Ferguson police." The caller claims that Wilson was aware that there had just been "a strong-arm robbery," and thought Brown fit the description of the perpetrator. The caller, "Josie," is quoted as saying Brown "bum-rushe[d] Wilson," "punch[ed] him in the face" and "grabbed for [Wilson's] gun."

CBS News: Ferguson Residents Concerned About Outsiders Joining Protests To Commit Crimes. On the CBS Evening News (8/18, story 3, 2:05, Pelley, 5.08M), Scott Pelley reported that "night after night, many of the protesters are not from Ferguson, but have come from far and wide with many motives." Mark Strassman interviewed Tony Davis, a "21-year-old [who] lives in Mike Brown's apartment complex," who is "frustrated with...with outsiders who have come here to do more than shout." Davis was shown saying, "Those are the people who are just coming...to steal - they are taking advantage of the situation and that's not right." According to Strassman, "The crowds get bigger as time goes on."

The Washington Post (8/19, A1, Wax-Thibodeaux, Brown, 4.06M) describes "young men" in Ferguson who "pull

dark scarves up over their mouths and lob molotov cocktails at police." According to the Post, these "militants" include "online organizers and opportunistic looters — and their numbers have been growing." The Post says "some of the men are from the area," but "many others...have arrived by bus and by car from Chicago, Detroit, Brooklyn and elsewhere."

The New York Times (8/19, Blinder, Subscription Publication, 9.79M) profiles Ferguson resident Dellena Jones, "who runs a hair salon" that "demonstrators had tossed concrete slabs into" on Sunday night "as [her] two children prepared for what had been scheduled as the first day of school."

Bret Stephens, in his column for the Wall Street Journal (8/19, Subscription Publication, 5.89M), notes that statistics show there are 190 crimes in Ferguson per square mile, whereas the national average is 39. Eugene Robinson, in his column for the Washington Post (8/19, 4.06M), gives his take on the racial and socioeconomic dynamics behind the situation in Ferguson.

Pew Survey Finds Divergent Responses To Shooting From Whites, African-Americans. McClatchy (8/18, Lightman, Subscription Publication, 23K) reported that according to the Pew Research Center, "blacks and whites are starkly divided over reactions to the shooting of Michael Brown." According to McClatchy, "By a 4 to 1 margin, blacks said the incident 'raises important issues about race that merit discussion,'" while "whites, by a 47 to 37 percent margin, said 'the issue of race is getting more attention that it deserves.'"

The Wall Street Journal (8/19, Gallo, Subscription Publication, 5.89M) noted that in the same Pew survey, 65% of black respondents were critical of the police's handling of the case, while only 33% of white respondents criticized the police.

"LOBBYISTS" REPORTEDLY CRAFTING OBAMA IMMIGRATION POLICY "OUT OF PUBLIC VIEW."

According to the New York Times (8/19, A14, Davis, Subscription Publication, 9.79M), the "drafting" of "what will likely be...significant immigration changes" to be implemented by President Obama "has been conducted almost entirely behind closed doors, where lobbyists and interest groups invited to the White House are making their case out of public view." The Times reports that an unidentified "White House official" acknowledged that "Administration officials have convened more than 20 so-called listening sessions this summer alone on executive options for revising immigration policy," which the Times says is an instance of Obama's "go-it-alone approach...essentially making policy from the White House, replacing congressional hearings...with closed meetings for invited constituencies." The Times says that as "businesses...flock to the administration with their policy wish lists," his recourse to executive action "has opened the president, already facing charges of executive overreach, to criticism that he is presiding over opaque policy-making, with the potential to reward political backers."

In an article titled, "White House Meets With Big Biz On Immigration," Politico (8/18, Palmer, Brown, 637K) says the President "was initially expected to focus only on slowing deportations of potentially millions of undocumented immigrants," but "now top aides are talking with...big companies like Cisco, Intel and Accenture, hoping to add more changes that would get them on board." However, according to Politico, "the White House fears a backlash in November, particularly among independent voters in battleground Senate races where Republicans are seizing on" reports that the President is contemplating a sweeping "amnesty" order. Politico also reports that while the President "has pledged to act by the end of the summer...the timing is a growing concern to Senate Democrats, who fear that" potentially unpopular executive actions easing immigration law enforcement "will further endanger their chances of maintaining control of the chamber."

Under the headline, "Obama Weighing Business-Friendly Immigration Actions," the Wall Street Journal (8/19, Meckler, Subscription Publication, 5.89M) reports that the President is expected to unveil his executive actions on immigration sometime next month. According to the Journal, following meeting with corporate lobbyists, the President is considering steps that would allow US firms to double the number of visas they can provide foreign nationals. The Journal notes that the potential change to policy via executive order has already elicited condemnations from member of Congress, including Sen. Jeff Sessions, who is quoted as saying big business is "scheming with the White House to extract by executive fiat what was denied to them by the American people and Congress."

David Rogers, in another piece for Politico (8/18, 637K), says "speculation abounds that the president will resort

to executive orders to get what he wants," but, according to Rogers, "there are still serious doubts in the administration that Obama has that authority in the case of the child migrants" from Central America entering the US illegally who benefit from a 2008 law barring their immediate deportation. Author Oliver Thomas, in an op-ed for USA Today (8/19, Thomas, 5.76M), suggests that if the US enforces its current immigration laws in regards to the Central American children in the US illegally, "we could wind up betraying...our reputation as a haven for asylum seekers."

Farmers Complain They Can't Find Enough Immigrants To Employ, "Legal Or Illegal." McClatchy (8/14, Watkins, Subscription Publication, 23K) reports that "agricultural powerhouses near the border, such as Florida and California, employ tens of thousands of seasonal immigrant laborers every year," but "deeper in the homeland...farmers confront a blue-collar labor vacuum." Chalmers Carr, "owner of the East Coast's largest peach grower, South Carolina's Titan Farms," is quoted as saying, "Because we're not a border state, it's definitely harder to get people over this far from the border to work," so "there's truly not enough farmworkers now, legal or illegal." McClatchy goes on to report that many farmers claim it is impossible to persuade those legally in the US to work for them.

Border Patrol Official Claims Officers Are Guilty Of Using "Excessive Force." On the CBS Evening News (8/18, story 8, 3:20, Pelley, 5.08M), Scott Pelley reported that "an insider in US Customs and Border Protection" says "many deaths from the hands of agents are highly suspect." Anna Werner went on to report that "since 2010, 28 people have died at the hands of Border Patrol agents." According to Werner, "Reviewing those fail force case was part of Jim Tomscheck's job as head of internal affairs at the Border Patrol" until he was "reassigned in June." Tomscheck: "I'm familiar with several incidents where the persons appeared to be fleeing and were shot in the back. ... There were certainly many cases where border patrol agents or CBP officers engaged in excessive use of force or abuse of migrants at the border that should have resulted in discipline where it did not."

McClatchy Analysis: Nicaragua's Low Level Of Migration To US Tied To Lower Crime Rate. McClatchy (8/18, Johnson, Subscription Publication, 23K) reports that although Nicaragua is "the second poorest country in the Western Hemisphere and...a transshipment point for cocaine headed to" the US, "unlike El Salvador, Honduras and Guatemala...Nicaragua hasn't sent a wave of children and teenagers fleeing north." According to the Times, that is partly "because while Nicaragua is poor, it's also the safest country in Central America," and "vicious transnational street gangs that have overwhelmed police forces" in other Latin American countries "have no presence in Nicaragua."

JOB CREATION UP IN 30 STATES, WITH TEXAS LEADING JOB GROWTH. Bloomberg News (8/19, Smialek, 2.76M) reports "payrolls climbed in 36 US states in July, showing labor-market strength was broad-based." Texas "led the nation with a 46,600 increase in payrolls, followed by California with 27,700 more jobs, figures from the Labor Department showed." Overall, "the jobless rate increased in 30 states."

Bloomberg Analysis: High Underemployment "Warning Light Blinking" In Fed's Dashboard. Bloomberg News (8/19, Keams, Smialek, 2.76M) reports Federal Reserve Chair Janet Yellen "has a stubborn warning light blinking on her labor market dashboard: A group of Americans larger than Washington state's population can find only part-time work." As the Fed chair "heads to this week's Fed symposium in Jackson Hole, Wyoming, where the focus will be on the labor market, those 7.5 million part-time workers who want full-time jobs are inflating the broad measure of underemployment she watches to gauge job market health."

Editorial Wrap-Up:

NEW YORK TIMES. "It's Time To Overhaul Clemency." The New York Times (8/19, Subscription Publication, 9.79M) editorializes that judging "by the numbers," President Obama, "who has, so far, granted just 62 clemency petitions, is the least merciful president in modern history." The Obama Administration "took a stab at remedying the situation in April when it replaced its feckless pardon attorney and announced that it would consider granting clemency to thousands of low-level drug offenders serving what Mr. Obama called 'unjust' sentences," but the Times argues that even if this effort succeeds, "it is a one-time fix that fails to address the core reasons behind the decades-long abandonment of the presidential power of mercy." The Times urges "a complete overhaul of the clemency process," which means "taking it out of the hands of the Justice Department, where federal prosecutors with an inevitable conflict of interest recommend the denial of virtually all applications."

"New Threats To Democracy In Turkey." The New York Times (8/19, Subscription Publication, 9.79M) editorializes that Recep Tayyip Erdogan's victory in Turkey's presidential race has "created new uncertainties for his country and the United States and other NATO members who depend on Turkey to be the bulwark of the alliance's eastern front." Erdogan's "authoritarian ways have strained relations with Abdullah Gul, the current president," but "whether he would challenge Mr. Erdogan directly is unclear, and there are no other credible political rivals in sight." As a result, "if Mr. Erdogan succeeds in solidifying power, the future of Turkey's already shaky democracy is more in doubt than ever."

"Is Gov. Perry's Bad Judgment Really A Crime." The New York Times (8/19, Subscription Publication, 9.79M) editorializes that Texas Gov. Rick Perry "is one of the least thoughtful and most damaging state leaders in America, having done great harm to immigrants, abortion clinics and people without health insurance during his 14 years in office," but "bad political judgment is not necessarily a felony, and the indictment handed up against him on Friday – given the facts so far – appears to be the product of an overzealous prosecution." The Times argues that governors and presidents "threaten vetoes and engage in horse-trading all the time to get what they want, but for that kind of political activity to become criminal requires far more evidence than has been revealed in the Perry case so far."

WASHINGTON POST. "The Ferguson Fiasco Continues." In an editorial, the Washington Post (8/19, 4.06M) says "if there were any doubt that the citizens of Ferguson...had good reason to question the professionalism of their police force, it has been erased by several days of revelations."

"A Shaky Case Against Perry." The Washington Post (8/19, 4.06M) editorializes that there are "many fair grounds on which to criticize Rick Perry's performance as governor of Texas," but "the list does not include the charges newly levied against him by an Austin grand jury." The Post adds that "this particular kerfuffle fell within the bounds of partisan politics," and "criminal prosecution is not always the appropriate remedy for dubious or despicable behavior by those in power, especially not where the relevant law is not clearly applicable." The Post argues that perhaps "some of those in Texas who back his indictment hope to derail his reported plans for another run at the presidency in 2016," but if so, "they are going about it the wrong way."

"Downgrading Virginia Schools." An editorial in the Washington Post (8/19, 4.06M) notes that when new ratings are released in September, about one-third of Virginia's public schools "are expected to lack 'full accreditation' status — compared with less than 1 percent of schools five years ago," and argues that the drop in accredited schools "should serve as an impetus for Virginia's leaders to act."

WALL STREET JOURNAL. "Beltway 'Strip' Club." The Wall Street Journal (8/19, Subscription Publication, 5.89M), in an editorial, argues that the only constructive way to reduce incentives for US firms to relocate is to lower US corporate tax rates.

"A Small Victory In Iraq." In an editorial, the Wall Street Journal (8/19, Subscription Publication, 5.89M) agrees with the President that US strikes played a key role in helping Kurdish fighters reclaim the Mosul Dam, but argues that he will eventually need to send 5,000 to 10,000 US troops to help both the Kurds and Baghdad defeat ISIL.

"The Salt Libel." A Wall Street Journal (8/19, A14, Subscription Publication, 5.89M) editorial cites new research suggesting that salt is not as dangerous as the medical establishment has said and notes that despite this growing body of evidence, the USDA's food pyramid still relies on a low-salt model and the FDA continues to pressure food manufacturers and restaurants to remove salt from their recipes. The Journal argues that this is an example of how government regulation can establish bad practices and does not change as quickly as the evidence.

Washington Schedule:

TODAY'S EVENTS IN WASHINGTON.

White House:

PRESIDENT OBAMA — Receives the Presidential Daily Briefing; meets with members of the President's economic team and senior advisors, Roosevelt Room, closed press; departs the White House; arrives at Cape Cod, Massachusetts; arrives at Martha's Vineyard, Massachusetts.

VICE PRESIDENT BIDEN — Attends a meeting with Iraqi Young Leaders Exchange Program participants.
US Senate: Aug. 8 – Sept. 8. — The Senate stands adjourned until 2 p.m. on Monday, Sept. 8.

10 a.m. VETERANS' AFFAIRS – FIELD HEARING — "The State of VA Health Care in Hawaii." Location: Oahu Veterans Center, 1298 Kukila Street, Honolulu, HI.

US House: Aug. 4 – Sept. 7. — The House stands adjourned until 2 p.m. on Monday, Sept. 8. Please note however that some committees are still scheduling hearings during this time both in Washington and in the field. Just a reminder to check the Capitol Hill takes daily during this period of "Recess."

Other: Aug. 17 – 19. **ALCOHOL INTERLOCK SYMPOSIUM** — The Traffic Injury Research Foundation (TIRF) hosts the 14th Alcohol Interlock Symposium. The theme of this year's event is Alcohol Interlocks: Managing Risk and Behavior Change. Sessions will involve a mixture of panel presentations and discussion groups. Attendees include practitioners and vendors from North America, the European Union, South Africa, the Philippines and Japan. 3:35 p.m. – 4:05 p.m. Closing remarks by Jonathon Passmore, technical lead for Violence, Injury Prevention and Road Safety for the World Health Organization (WHO) in the Western Pacific. Location: Dupont Circle Hotel, 1500 New Hampshire Ave. NW.

NHTSA WEBINAR – RECALLS — 3:30 p.m. the National Highway Traffic Safety Administrations Deputy Administrator David Friedman will host a webinar to unveil the free, online VIN search tool during a live demo. Q&A to follow.

Last Laughs:

LATE NIGHT POLITICAL HUMOR.

Jimmy Fallon: "Here's what everyone's talking about. Big trouble for Texas governor Rick Perry. Yeah, he's been indicted on two felony charges after he threatened to veto funding for a district attorney's office unless she stepped down. Yeah, he's now the most controversial governor in the country, which is why today he got a gift basket from Chris Christie."

Jimmy Fallon: "Actually, because of the scandal, it looks like [Perry's] chances in 2016 might be in trouble. Or as Hillary put it, 'One down, four more to go.'"

Jimmy Fallon: "WikiLeaks founder Julian Assange, he's in the news. He is leaving the Ecuadorian embassy in London, where he's been hiding from criminal charges, apparently, because he's suffering from a vitamin D deficiency from spending two years trapped indoors."

David Letterman: "[President Obama] had to cut his vacation short two days to go back to Washington. You know why? Vice President Joe Biden had locked himself out of the White House."

DOI in the News:

SECRETARY JEWELL VISITS BUG-O-NAY-GE-SHIG SCHOOL. The [Minneapolis Star Tribune](#) (8/20, Brooks,

1.32M) reports that with tribal schools across the nation "crumbling," Interior Secretary Jewell visited Minnesota Tuesday to tour "a converted garage that has served as the high school for the Leech Lake Band of Ojibwe for almost four decades." Jewell said, "Indian education is in trouble in a lot of ways," adding, "Bug-O-Nay-Ge-Shig school is not serving its students' needs in a lot of ways. It is very clear in touring the facility that it is one that needs to be replaced." While doing so "would cost an estimated \$25 million — almost half the [Bureau of Indian Education's] \$55 million budget," Jewell, "who has been approached by Minnesota's House and Senate delegations with pleas for help, said she would work to find funding, both from Congress and other agencies, to address the dilapidated school."

The [Bemidji \(MN\) Pioneer](#) (8/20, 35K) reports that Jewell and Assistant Secretary for Indian Affairs Kevin K. Washburn are "touring Bureau of Indian Education schools to help bring awareness to Washington." Washburn said "the visit to the Bug-O-Nay-Ge-Shig School was part of a fact-finding mission to see the facilities in person." He said, "This one's pretty bad. Probably the worst we have in Minnesota."

Additional coverage of Jewell's visit to Passamaquoddy Tribal School and Bug-O-Nay-Ge-Shig School was provided by the [AP](#) (8/18), the [AP](#) (8/19), [Politico](#) (8/20, Sevems, 637K), the [Washington Times](#) (8/19, 465K), the [Washington Times](#) (8/19, 465K), the [Bangor \(ME\) Daily News](#) (8/18, 166K), the [Brainerd \(MN\) Daily Dispatch](#) (8/20, 4K), the [Forum of Fargo-Moorhead \(ND\)](#) (8/20, 10K), the [Minneapolis Star Tribune](#) (8/20, 1.32M), the [Bemidji \(MN\) Pioneer](#) (8/20, 35K), the [Bangor \(ME\) Daily News](#) (8/20, 166K), the [Portland \(ME\) Press Herald](#) (8/15, 352K), the [Brunswick \(ME\) Times Record](#) (8/19, 27K), the [York County \(ME\) Journal-Tribune](#) (8/20, 26K), the [Greenfield \(IN\) Daily Reporter](#) (8/20, 31K), the [Nation Sun News](#) (8/20), [WCSH-TV](#) Portland, ME (8/18, 30K), [WMTW-TV](#) Portland, ME (8/20, 21K), [WKBT-TV](#) La Crosse, WI (8/20, 2K), [KTTC-TV](#) Rochester, MN (8/20, 2K), [KARE-TV](#) Minneapolis (8/19, 121K), [KARE-TV](#) Minneapolis (8/19, 121K), [WQOW-TV](#) Eau Claire, WI (8/20, 1K), [WDIO-TV](#) Duluth, MN (8/20, 2K), and [WCCO-AM](#) Minneapolis (8/19, 70K).

BOEM HOLDS MARYLAND OFFSHORE WIND LEASE SALE. In an earlier story, the [E&E Daily](#) (8/19) reports that "energy companies so far have bid more than \$10 million for the right to build wind farms in waters off the coast of Ocean City, Md., far eclipsing the highest bids in the Interior Department's two previous offshore wind auctions held in 2013 off Rhode Island, Massachusetts and Virginia." The article notes that "the online auction has shattered records for the fledgling industry."

The [AP](#) (8/19) reports that the Interior Department "says it has auctioned some 80,000 acres off Maryland for wind energy development." US Wind Inc. submitted the winning bid of \$8.7 million.

[Bloomberg News](#) (8/20, Doom, 2.76M) reports that "Renexia SpA, an Italian renewable energy developer, agreed to pay \$8.7 million for two leases off the Maryland coast to build commercial-scale wind farms." Interior Secretary Sally Jewell said that the auction results "are a major achievement and reflect industry confidence as we strengthen our nation's foothold in this new energy frontier." The story also appears at [Bloomberg BusinessWeek](#) (8/19, 4.91M).

Coverage by the AP was also picked up by the [Washington Post](#) (8/19, 4.06M), the [Washington Examiner](#) (8/20, 335K), the [Bismarck \(ND\) Tribune](#) (8/20, 64K), the [Missoulian \(MT\)](#) (8/20, 122K), and [WBOC-TV](#) Salisbury, MD (8/20, 21K).

Also reporting on the story The [Baltimore Sun](#) (8/19, Wheeler, 841K), the [Maryland Coast Dispatch](#) (8/19, 52K), the [reNews](#) (8/20), and WYPR-FM Baltimore (8/20).

SECRETARY JEWELL SEES SEVERAL CHALLENGES FOR NATIONAL PARKS. The [Fence Viewer](#) (8/20) reports that Interior Secretary Sally Jewell said "major challenges facing national parks are climate change, preparing younger generations to be stewards of the park system and a reduced federal budget." At the Schoodic Institute at Acadia National Park on Friday, Jewell said, "We're operating under a time of constrained resources. We're getting less for less." Jewell was at the Schoodic Institute to "encourage citizen science and other initiatives at the NPS research center — one of 20 nationwide."

PRESIDENT OBAMA URGED NOT TO EXPAND PACIFIC MARINE MONUMENT. The [Saipan \(MNP\) Tribune](#) (8/20, 641) reports that "Gov. Eloy S. Inos asked President Barack Obama not to expand the Pacific Remote Islands Marine National Monument which the governor believes is 'the first step in expanding other marine

national monuments in the western Pacific,' while at the same time lamenting that most of the promises made leading to the creation of the Marianas Trench Marine National Monument in 2009 were 'broken and remain unfulfilled.'" In an Aug. 15 letter to Obama, Inos said, "On behalf of the affected communities in the western Pacific who believe in the sustainable use of marine resources, I urge you to reconsider your proposal to expand the boundaries of the PRIMNM or any other marine monument." The article notes that "Aug. 15 was the last day for comment submissions to the president's proposal to expand the Pacific Remote Islands Marine National Monument seaward to the 200-nautical mile boundary of the exclusive economic zone."

WESTERN GOVERNORS' ASSOCIATION CALLS TO END "WILDFIRE BORROWING". The [Denver Post](#) (8/20, Paul, 923K) reports that the Western Governors' Association in a letter last week urged Senate and congressional leadership, and President Barack Obama, to boost federal wildfire budgets so agencies can stop using fire prevention funds for fire suppression. Kevin Klein, Director of the Colorado Division of Homeland Security and Emergency Management, said, "We end up robbing from the land managers. We end up stealing from those [prevention] programs to fight the fire. Treating wildfires like we do with our other programs makes sense to me."

Additional Coverage Of Wildfires. Additional coverage of wildfires was provided by the [AP](#) (8/20), the [AP](#) (8/19, Smith), the [AP](#) (8/18), the [Los Angeles Times](#) (8/20, Serna, 3.42M), and the [Los Angeles Times](#) (8/20, Serna, 3.42M).

STEYER PAC HITS REP. GARDNER ON CLIMATE SCIENCE. The [E&E Daily](#) (8/19) reports that "billionaire environmentalist Tom Steyer's political action committee launched its first television attack against Colorado Rep. Cory Gardner today, criticizing the Republican as a climate science skeptic as he challenges Sen. Mark Udall (D) for his seat." In the 30-second spot sponsored by NextGen Climate Action, "a series of doors and windows are shown being closed as a narrator disparages Gardner." The narrator says, "He thinks he knows better than the scientists, NASA and the US military on climate change; and [he] thinks government should decide who can and cannot marry. He led an eight-year crusade that would outlaw birth control and make abortion a felony crime. He's Congressman Cory Gardner, and he thinks he should decide for us because he thinks he knows better. Don't let him."

REPORT LINKS CLIMATE CHANGE TO RUNAWAY PEST PROBLEMS. The [E&E Daily](#) (8/19) reports that "climate change is behind the proliferation of a host of nasties – from backyard ticks to poison ivy to garden-munching brown marmorated stink bugs, a new report by the National Wildlife Federation says." The paper argues that "man-made emissions are already making the outdoor experience less enjoyable by aiding the spread of...pests and invasive species." According to the report, "warmer winters are leading to the expansion and longevity of deer ticks and winter ticks, which threaten humans with Lyme disease and animals with death."

SISKIYOU COUNTY BOARD OF SUPERVISORS OPPOSES PROPOSALS TO REMOVE DAMS ON KLAMATH RIVER. In an op-ed for the [Siskiyou \(CA\) Daily News](#) (8/19, 16K), the Siskiyou County Board of Supervisors writes that they "optimistic" to see "strong congressional opposition" to "the proposals to remove the four dams on the Klamath River." Siskiyou County and Klamath County have both "invited Interior Secretary Sally Jewell to visit our region." They wait for "a visit by her to become informed of the concerns of Siskiyou County and our constituents."

America's Great Outdoors:

National Park Service:

NPS SETTLES WHISTLEBLOWER APPEAL. The [AP](#) (8/20) reports that the NPS has "reached a settlement with an employee who said she was unfairly fired over the 1990 removal of ancient human remains from the Effigy Mounds National Monument that were only returned three years ago, newly released records show." The NPS "settled in April, agreeing to reinstate" Sharon Greener "with back pay, reimburse her attorneys' fees, and allow her to retire early."

Coverage by the AP was also picked up by the [Washington Times](#) (8/19), the [Des Moines \(IA\) Register](#) (8/19, 408K), the [Oklahoman](#) (8/20, 503K), [KWQC-TV](#) Davenport, IA (8/20, 42K), [KCCI-TV](#) Des Moines, IA (8/20, 239K),

and [WXOW-TV](#) LaCrosse, WI (8/20, 2K).

DRONES BANNED IN ARCHES, CANYONLANDS NATIONAL PARKS. The [E&E Daily](#) (8/19) reports that Superintendent Kate Cannon on Monday "banned the use of drones in Arches and Canyonlands national parks and Hovenweep and Natural Bridges national monuments to protect public safety, minimize visitor-user conflicts, and prevent damage to 'scenic values, natural soundscapes and wildlife.'" The article notes that "the decision comes after an incident in Utah's Zion National Park last May when a high-tech miniature aircraft, which can be used to take aerial photos, chased desert bighorn sheep across the park." Zion spokeswoman Aly Baltrus said, "It seems to have exploded recently. They are getting more affordable, and now that you can put a camera on them, they are more purposed."

Also reporting on the story is the [AP](#) (8/19).

Drone Ban Deadline in National Parks Nears. [KCNC-TV](#) Denver (8/19, 26K) reports that "Wednesday is the deadline for all national parks and monuments to prohibit unmanned aircraft, or drones, so the National Park Service can study their use." According to the article, "the policy examination will happen over the next 18 months and will involve public comment."

NPS SEEKS BIDS FOR LUCRATIVE GRAND CANYON CONTRACT. The [AP](#) (8/19) reports that "a lucrative contract to operate some of the most iconic lodging and food locations at the Grand Canyon has been reopened for bidding in a process that will bring changes affecting the millions of people who visit the landmark each year." The contract "first went out for bid a year ago," but Grand Canyon Superintendent Dave Uberuaga said "the park didn't receive any bids adhering to the conditions called for in the 15-year pact." The article notes that "the new contract requires that the winning bidder operate food trucks on the South Rim and expand patio dining at the historic El Tovar lodge to accommodate crowds during the busy summer months."

Coverage by the AP was also picked up by the [Washington Post](#) (8/19, 4.06M), the [Sacramento \(CA\) Bee](#) (8/19, 582K), [Yahoo!](#) (8/20, Fonseca, 10.35M), and [Fox Business](#) (8/19, 333K).

NPS SEEKS CONCESSIONER FOR DELAWARE WATER GAP NATIONAL RECREATION AREA. The [Pocono \(PA\) Record](#) (8/19, 46K) reports that the NPS has "issued a prospectus for proposals to provide a concession-operated campground within the Delaware Water Gap National Recreation Area." The article notes that "the concessioner is required to provide kayak/canoe livery service." Also, "the concessioner will operate a group camping facility at the Valley View camping area."

PENOBSCOT COUNTY COMMISSIONERS DIVIDED ON NATIONAL PARK PROPOSAL. The [Bangor \(ME\) Daily News](#) (8/19, 166K) reports that Penobscot County's commissioners are "divided on a proposal to establish a 150,000-acre national park and recreation area in the Katahdin region." Lucas St. Clair, "the park's leading proponent and the son of environmentalist and entrepreneur Roxanne Quimby, pitched the idea to the commissioners during a meeting in Bangor on Tuesday morning." St. Clair said "the region should 'capitalize on its natural resources in a new way,' using them to draw more and new visitors to Maine's vast wilderness."

GREAT BASIN NATIONAL PARK WORKING ON TELESCOPE. The [Las Vegas Review-Journal](#) (8/20, 386K) reports that Great Basin National Park is working with the University of Nevada, Reno, and Western Nevada College to build the Great Basin Observatory. First, supporters of the plan must raise about \$700,000 to buy and put up the 28-inch telescope and establish a foundation to keep it operating.

OLYMPIC NATIONAL PARK DETECTS BAT WITH RABIES. The [E&E Daily](#) (8/19) reports that "a Washington man is receiving treatment for rabies prevention after he was scratched by a bat at Olympic National Park last week." Olympic National Park Superintendent Sarah Creachbaum said "only two known cases of rabies in bats have been reported at the park in nearly 30 years." Although "rabies exposure is rare, Creachbaum said the man would receive treatment out of an abundance of caution."

NPS SEEKS PUBLIC COMMENTS ON REPLACEMENT OF DENALI BRIDGES. The [AP](#) (8/19) reports that NPS officials say "the agency is considering whether to replace two pedestrian bridges at Alaska's Denali National Park and Preserve." The NPS is "taking public comments through Sept. 17 for an environmental assessment for the possible project, which would take place next summer at Hotel Creek."

YOUNG GIRL DIES IN FALL AT YELLOWSTONE NATIONAL PARK. The [E&E Daily](#) (8/19) reports that Yellowstone National Park officials have "identified an 8-year-old girl who died in the park Sunday." According to the article, "Zahra Allahyari, of Poway, Calif., was hiking with her family when she slipped and fell 550 feet into the park's Grand Canyon." Her body was recovered hours later.

Also reporting on the story is the [AP](#) (8/19).

ROCK CLIMBER FALLS TO DEATH IN YOSEMITE AFTER PROPOSING TO GIRLFRIEND. The [E&E Daily](#) (8/19) reports that "an experienced rock climber fell to his death on a free climb only a few hours after proposing to his girlfriend on a different climb in Yosemite National Park on Saturday, officials said." Brad Parker "proposed marriage to girlfriend Jaineed Dial after the couple finished climbing the Cathedral Peak." Later the same day, Parker "went on a solo climb without ropes on an established route of Matthes Crest and fell, according to park ranger Kari Cobb."

Also providing coverage are the [Los Angeles Times](#) (8/20, Serna, 3.42M) and the [Sacramento \(CA\) Bee](#) (8/19, 582K).

MONTANA WILDLIFE AGENCY CONSIDERING PLAN TO POISON BROOK TROUT NEAR YELLOWSTONE. The [E&E Daily](#) (8/19) reports that Montana wildlife officials are "considering a plan to poison brook trout to remove them from a creek near Yellowstone National Park." State Fish, Wildlife and Parks authorities have "fought the spread of the invasive species for a decade and are considering poisoning 12 miles of the Soda Butte Creek as a possible solution." Ken Frazer, the FWP manager of fisheries in Billings, said, "Brook trout are spreading farther and farther into the park. We can't keep doing what we've been doing. It's a losing battle."

Also reporting on the story is the [Billings \(MT\) Gazette](#) (8/20, 174K).

REP. KELLY SUPPORTS NATIONAL PARK DESIGNATION FOR PULLMAN. In an op-ed for the [Chicago Sun-Times](#) (8/20, 1.03M), Rep. Robin Kelly writes that "to declare Chicago's Pullman neighborhood a national park would be to cement its role in our country's labor movement." Kelly argues that "creating the Chicago area's first national park would be a boon to the region and the state." Kelly also notes that on Thursday, NPS Director Jonathan B. Jarvis will "visit Pullman to meet with local residents and leaders to determine if they, too, support designating the historic South Side enclave as America's newest national park."

Bureau of Land Management:

BLM INVESTIGATING RELEASE OF OIL INTO SAN JUAN RIVER. The [Deseret \(UT\) News](#) (8/20, 538K) reports that "a suspected rock slide damaged an oil well pipeline and sent at least five barrels of crude oil into a wash that is a tributary of the San Juan River." According to a Utah Department of Environmental Quality incident report, "the oil migrated 1.75 miles down an unnamed wash before reaching the river, where a sheen was observed." The article notes that "the spill occurred on land owned by the Bureau of Land Management, which sent representatives to the site to investigate."

The story also appears at [KSL-TV Salt Lake City](#) (8/20, 1.07M).

BLM REJECTS BULLWHACKER LAND SWAP. The [Havre \(MT\) Daily News](#) (8/19, 11K) reports that the BLM announced Monday that "it was no longer considering the swap proposed by brothers Dan and Farris Wilks, wealthy Texas businessmen with large amounts of land in central and north-central Montana." In a press release, the BLM said, "The Bureau's preliminary assessment of a (variety) of land exchange options found no viable option that would garner substantial public support or be in the best interest of the American people who have entrusted the BLM to manage their public lands for them."

Wilks Brothers Launches Website Promoting Land Exchange. The [Billings \(MT\) Gazette](#) (8/20, 174K) reports that "in an unusual tactic, Montana's largest private landowners have taken their proposal for a land exchange with the Bureau of Land Management directly to the public via a website." Billionaire Texas brothers Dan and Farris Wilks "launched the site — [MontanaPublicAccess.com](#) — late last week in anticipation that the BLM

would reject their latest offer."

BLM WORKING TO AVERT SAGE GROUSE LISTING. The Durango (CO) Herald (8/19, 28K) reports that "residents of Dolores County showed up in force during meeting with federal land managers to resist listing the beleaguered Gunnison sage-grouse under the Endangered Species Act." Leigh Espy, a BLM manager, told the crowd, "We're not the Fish and Wildlife Service. Listing is not our call. But 42 percent of (sage-grouse) habitat falls on BLM, so we're working to give them a reason not to list by showing we have adequate protection measures in place." According to the article, "a range-wide amendment to land plans benefiting the sage-grouse is being drafted and is required for 11 of the BLM districts in southeast Utah and Southwest Colorado that have potential habitat."

WILD HORSE GROUPS OPPOSE WYOMING INTERVENTION IN LAWSUIT TO STOP BLM ROUNDUP. KCSG-TV St. George, UT (8/20, 43) reports that "the American Wild Horse Preservation Campaign, The Cloud Foundation, Return to Freedom, Carol Walker and Kimerlee Curyl today filed an opposition to the State of Wyoming's motion to intervene as of right in a lawsuit they brought against the Bureau of Land Management (BLM) and its plan to roundup over 800 wild horses from the Adobe Town, Salt Wells and Great Divide Basin Herd Management Areas (HMAs)."

Also, KCSG-TV St. George, UT (8/20, 43) reports that "the Cloud Foundation, American Wild Horse Preservation Campaign, Wild Horse Freedom Federation, Friends of Animals and Respect 4 Horses will hold a press conference and rally at the BLM's National Wild Horse and Burro Advisory Board Meeting, August 25 in Riverton, Wyoming." According to the article, "the purpose of the press conference and rally are to better inform the public of the costs and risks of ongoing wild horse roundups which have already eliminated wild horses from 20 million acres designated for their use."

Fish and Wildlife Service:

FWS REJECTS PROTECTIONS TO ARCTIC GRAYLING FISH IN MONTANA. The AP (8/20) reports that "the Arctic grayling fish does not need special protections under the Endangered Species Act following years of conservation efforts by landowners and federal and state agencies to protect the fish in the upper Missouri River, US wildlife officials said Tuesday." According to FWS Director Dan Ashe, "habitat quality, numbers of fish and genetic diversity are stable and increasing for most Arctic grayling populations in Montana." Noah Greenwald, endangered species director for the Center for Biological Diversity, said, "We're very disappointed. US Fish and Wildlife Service has twice recognized that the grayling is in danger of extinction and that remains true today. The grayling is one of the most endangered fish in the United States."

The Prairie (MT) Star (8/20) reports that Ashe said, "This is a prime example of what a CCAA can do, not only for wildlife, but also for sustaining the way of life in rural ranching community. The conservation progress for Arctic grayling would not have been possible without the amazing support we have received from willing landowners and other partners in the Big Hole River and Centennial valleys."

Coverage by the AP was also picked up by the Washington Times (8/19, 465K), the San Francisco Chronicle (8/20, Baumann, 2.87M), and the Albany (NY) Times Union (8/20, 457K).

Also reporting on the story is the Helena (MT) Independent Record (8/20, 45K), KTVH-TV Helena, MT (8/20, 279), and KPAX-TV Missoula, MT (8/20, 1K).

FWS STUDIES ANACOSTIA RIVER FISHING. The Indian Country Today Media Network (8/19, 45K) reports that "approximately 17,000 people, many African American or Hispanic, eat fish they catch out of the Anacostia River each year, and often share their fish with hungry people, according to a study commissioned by the Anacostia Watershed Society." However, "the watershed contains toxic hotspots caused by pollution such as PCBs, PAHs, metals and other compounds for local facilities." The FWS "partnered with Anacostia Watershed Society, University of Maryland College Park and the Anacostia Community Museum to study the patterns of urban anglers (subsistence, recreational and cultural) and fish contaminants in the Anacostia River region."

LOGGERS CONCERNED THAT BAT LISTING COULD HURT INDUSTRY. The E&E Daily (8/19) reports that

"Minnesota has only 5,000 northern long-eared bats spread across a wide area, but businesses reliant on logging are worried that nationwide regulations to prevent the demise of the species could jeopardize their industries." To save the northern long-eared bat population from extinction caused by white-nose syndrome, the FWS will "decide next April whether to add it to the endangered species list." Businesses such as "timber mills and road builders are worried federal regulations designed to protect vital maternity colonies located in trees during the warm summer months, which coincide with their busy seasons, will affect their bottom line."

CHATHAM TO FIGHT MONOMOY NATIONAL WILDLIFE REFUGE'S PLANS. The [Cape Cod \(MA\) Day](#) (8/16, Leggett) reports that Chatham officials are seeking "to fund three, maybe four, firms at a cost of \$300,000 to develop scientific and legal arguments showing that current fishing practices in the Monomoy National Wildlife Refuge and the current border of the refuge need to remain as is." The article notes that "the new draft comprehensive conservation plans put out by refuge staff this spring all curtail some forms of fishing – including mussel harvesting – and also expand the refuge to include 771 acres that is now South Beach."

MOLLICY BAYOU TO FLOW AGAIN. The [AP](#) (8/19) reports on the work by the FWS and The Nature Conservancy on "the largest floodplain reconnection project in North America." According to the article, "scientists and engineers with The Nature Conservancy and the US Fish and Wildlife Service painstakingly excavated the stream to its natural path, complete with meandering curves, sloped banks and varying depths."

STUDY: CLIMATE CHANGE TO AFFECT NATIVE FISH SPECIES IN ARIZONA. The [E&E Daily](#) (8/19) reports that "water is a limited resource for every living thing in the US Southwest, and native fish are no exception." According to the article, "partially due to ever-increasing human demand on the region's rivers and groundwater, a large percentage of these species are now endangered, from the tiny Gila topminnow to the bright-blue desert pupfish." And "barring significant human intervention, global warming is set to make the survival of these species even more unlikely," according to a new study, published Monday in the journal *Proceedings of the National Academy of Sciences*.

REWARD OFFER INCREASED IN DEATH OF BALD EAGLE. The [AP](#) (8/19) reports that "a reward offered in the shooting that led to the death of a bald eagle in a park has been increased to \$7,500." The Humane Society of the United States and the Humane Society Wildlife Land Trust announced Tuesday that "the organizations are offering \$5,000 for information leading to the conviction of those responsible for shooting a bald eagle in Bridgeton on May 20." The article notes that the "reward adds to the \$2,500 reward already being offered by the US Fish and Wildlife Service and New Jersey Division of Fish and Wildlife."

ATTORNEY WARNS OF PESTICIDES' IMPACT ON WILDLIFE. For "The Blog" of the [Huffington Post](#) (8/20, Giese, 11.54M), Collette Adkins Giese, Reptile and Amphibian Senior Attorney, Center for Biological Diversity, writes that "the Environmental Protection Agency, which is charged with protecting us and the environment from the risks of pesticide use, has failed to assess the impact of literally hundreds of pesticides on our nation's endangered species despite a clear legal requirement to do so." Giese is "participating in the most comprehensive legal action ever brought under the Endangered Species Act to protect endangered animals from pesticides." If successful, "the EPA will be forced to do its legal duty and consult with the US Fish and Wildlife Service over the impacts of dozens of pesticides on 119 endangered and threatened species throughout the United States."

US Geological Survey:

USGS REPORT: CLIMATE CHANGE REFLECTED IN ALTERED MISSOURI RIVER FLOW. The [E&E Daily](#) (8/19) reports that "the flow of the Missouri River has significantly changed over the past 50 years and climate change is likely to blame," according to a report published by the USGS last month. The article notes that "the changing water flow could have wide-reaching effects in the region," since "the 2,300-mile river is a water source for agriculture, energy, recreation and municipalities across several states." Parker Norton, a USGS hydrologist and lead author of the report, said, "Understanding stream flow throughout the watershed can help guide management of these critical water resources."

Securing America's Energy Future:

Onshore Energy Development:

USGS STUDY FINDS MAN-MADE QUAKES CAUSE LESS SHAKING. The E&E Daily (8/19) reports that "the shaking from man-made earthquakes linked to oil and gas drilling activities is more concentrated and confined than natural earthquakes," according to a study released Monday. As a result, "the damage from a man-made earthquake would not be as widespread as it would be from a natural quake of the same magnitude." Susan Hough, a geophysicist with the USGS, author of the study, said, "Once you get to 10 kilometers, they're down a notch compared to natural earthquakes."

BLM UPHOLDS THOMPSON DIVIDE GAS LEASE EXTENSIONS. The E&E Daily (8/19) reports that the BLM's Colorado state office has "rejected administrative challenges by a conservation group and several local governments that argued against BLM extending the life of 25 contested oil and gas leases in the pristine Thompson Divide." The article notes that "the conclusions in the State Director's Review uphold the decision of BLM's Colorado River Valley Field Office last spring to temporarily suspend the expiration of the 25 leases by two years, until April 2016, while the agency conducts an environmental impact statement (EIS) to correct what it acknowledges are 'deficiencies' in the original environmental review of the leases." Steven Hall, a BLM spokesman, said, "The BLM has as a matter of course suspended leases in the past when the agency needed to correct deficiencies in its National Environmental Policy Act analysis. In other words, the leases should not expire while the BLM is conducting additional NEPA analysis."

Also reporting on the story is the AP (8/19). Coverage by the AP was also picked up by the Washington Examiner (8/20, 335K).

ENVIRONMENTAL GROUPS CALL FOR COOPERATION ON SAGE GROUSE. The E&E Daily (8/19) reports that "a coalition of leading conservation groups is extending an olive branch to an oil and gas trade group that recently launched an extensive advertising campaign blaming 'activist lawyers' representing environmental groups for pushing the greater sage grouse toward a federal endangered species listing." The conservation groups "sent a brief letter to the Denver-based Western Energy Alliance noting that they share WEA's desire to avoid an Endangered Species Act listing for the greater sage grouse." The groups wrote, "While we clearly do not agree on everything, it seems we find common ground in seeking federal and state-level plans that strike a balance between needed energy development and lasting conservation of [sage grouse] and its habitat in a concerted effort to prevent the need to list the bird under the Endangered Species Act."

Also reporting on the story is The Hill (8/20, Devaney, 237K).

OBAMA ADMINISTRATION SEEN AS MORE LENIENT THAN OREGON AND WASHINGTON ON COAL EXPORTS. The Washington Examiner (8/20, 335K) reports that the Obama Administration has "signaled that it might be more willing than Oregon and Washington to allow coal exports from the states, giving the energy industry hope after Oregon nixed a crucial permit needed to ship the fuel abroad." According to the article, "without export potential from the West Coast, the Powder River Basin's low-sulfur coal could remain locked in the U.S." The article notes that "whether knowingly or not, federal government policies have undervalued that coal, according to a June 2013 report by the Interior Department's internal watchdog." However, "Tommy Beaudreau, then the acting assistant secretary of land and minerals management with Interior, downplayed the inspector general report's findings on exports, saying it made it appear that the US exported a considerable amount from the Powder River Basin." Still, Beaudreau said "the BLM would consider making changes to how it valued the coal."

SWEEPING DEAL REACHED ON JUSTICE MINES. The Louisville (KY) Courier-Journal (8/19, 375K) reports that "billionaire coal operator Jim Justice has reached a sweeping settlement with state regulators to resolve the largest number of mine reclamation violations Eastern Kentucky has seen in more than a decade." According to the article, "in an agreed order reached Friday, Justice admits to hundreds of violations, promises to post \$10.5 million in bonding and puts up his personal assets to guarantee the vast land reclamation that is required." However, "the deal also reduces from \$4.5 million to \$1.5 million the amount in fines that Justice must pay, and it allows Justice to resume mining at three locations where the state ordered that work be stopped because of environmental problems."

LANDOWNERS SUE BIA, ENERGY COMPANIES. The Bartlesville (OK) Examiner-Enterprise (8/20, 602) reports that "a pair of Osage County landowners have filed a federal class action lawsuit against the US Department of the Interior and the Bureau of Indian Affairs, as well as multiple energy companies 'seeking declaratory and injunctive relief for the failure of the BIA to comply with the National Environmental Policy Act of 1969.'" The lawsuit, "filed last week in the US District Court for the Northern District of Oklahoma, seeks to represent not only the two named plaintiffs, but also all 'similarly situated' surface land owners in Osage County." The article notes that "a favorable injunction ruling by the court on behalf of the landowners could potentially shut down all oil and gas drilling operations within the Osage Mineral Estate until the BIA and the involved energy companies fulfill the requirements of the NEPA Act."

PG&E PLEADS NOT GUILTY TO NEW CHARGES IN 2010 PIPELINE BLAST. The E&E Daily (8/19) reports that Pacific Gas & Electric Co. on Monday "pleaded not guilty to charges in a new 28-count indictment stemming from the utility's deadly pipeline blast in 2010." Federal prosecutors claim PG&E "tried to mislead investigators about the safety procedures it had in place when a natural gas pipeline exploded in San Bruno, Calif., killing eight people and destroying 38 homes." According to the article, "the new charges, which include obstruction of justice, were filed last month and replace a previous 12-count indictment."

Offshore Energy Development:

US TO OPEN SALE ON OFFSHORE DRILLING AREAS. The New Orleans Times-Picayune (8/20, 527K) reports that the Federal government will open roughly 21 million acres off the Texas coast to gas and oil drilling on Wednesday, including areas along the US-Mexico nautical border. According to the article, the Bureau of Ocean Energy Management (BOEM) "accepted closed bids Tuesday" and said 93 bids on 81 tracts had been submitted by 14 companies; the bidding results will be released Wednesday. The Times-Picayune notes that 4,026 tracts will be offered in the sale, which is the first to open development in the area.

FuelFix (8/19, 7K) reports in its coverage that the concentration of bids on those 81 tracts "matches the trend" of auctions in the area. FuelFix also says the higher number of bids compared to the last auction of western Gulf territory "could be an indication of interest" in the area, although it was unclear whether any of the boundary tracts had been bid upon.

Penn Energy (8/20, 128) notes that the sale "offers all unleashed and non-protected areas in the Western Gulf of Mexico Planning Area," and BOEM estimates that the sale could produce between 116 and 200 million barrels of oil and 538-938 billion cubic feet of natural gas.

Marine Link (8/20, 1K) also reports.

CHAMBER EXPRESSES SUPPORT FOR OFFSHORE DRILLING. The Hill (8/19, Cama, 237K) reports that several U.S. business groups, including the American Petroleum Institute and America's Natural Gas Alliance, wrote to the U.S. Interior Department to encourage the Obama Administration to reconsider drilling permits for offshore oil and gas exploration. According to the Hill, the U.S. Chamber of Commerce said that the Atlantic Coast, Gulf of Mexico, and California should all be considered for drilling, and that the Interior should not exclude any area from consideration. "Such an action would be premature and given the long lead times necessary for offshore development, could undermine U.S. energy security for decades to come," the group said in a letter.

VIRGINIA LT. GOV. NORTHAM OPPOSES OFFSHORE DRILLING. The Delmarva (MD) Daily Times (8/19, 26K) reports that "the prospect of oil and gas exploration off the Virginia coast is cause for concern, Lt. Gov. Ralph Northam said." In a speech given at the Virginia Eastern Shorekeeper 7th Annual Clamboree, Northam said, "I don't want to stir up controversy, especially in my hometown, but it's something I do have concerns about." Northam "detailed five reasons for his concern — the first is the potential to adversely impact activities at NASA Wallops Flight Facility."

Tackling America's Water Challenges:

TRIBES RALLY TO DEMAND WATER FOR KLAMATH SALMON. The AP (8/19) reports that "members of three Northern California Indian tribes rallied outside a federal water agency office in Sacramento to demand more water

be released from reservoirs to prevent the spread of a parasite among salmon returning to the Klamath River to spawn." The BOR says Regional Director David Murillo "met for an hour Tuesday with members of the Hoopa Valley, Yurok and Karuk tribes." Although "there was no indication the bureau was changing its plans to hold off any water releases until significant numbers of salmon begin to die," Murillo said in a statement "they are closely watching the situation and meeting with interested parties."

Coverage by the AP was also picked up by the [Sacramento \(CA\) Bee](#) (8/19, 582K). Also reporting on the story are [KCRA-TV Sacramento, CA](#) (8/20, 122K) and [KTXL-TV Sacramento, CA](#) (8/19, 22K).

BOR HOLDS CAST FOR KIDS FISHING EVENT. The [Emmett \(ID\) Messenger-Index](#) (8/20, 22K) reports that the BOR's Snake River Area Office "held its annual CAST for Kids fishing event Aug. 16 at Black Canyon Park." According to the article, CAST, "which stands for 'Catch a Special Thrill,' offers children with a wide range of special needs an opportunity to enjoy a day of fishing and boating." Erika Lopez, event coordinator for the bureau's Snake River Area Office, said, "This is a fun event for the participants and volunteers. Happy memories are made on this special day."

STUDY: CALIFORNIA HAS ALLOCATED FIVE TIMES ITS AVAILABLE WATER. The [E&E Daily](#) (8/19) reports that "California has handed out far more water rights than it has surface water, vastly complicating efforts to manage the drought," according to a study released Tuesday by University of California scientists. The study by UC Davis and UC Merced researchers published today in *Environmental Research Letters* says that "regulators have allocated five times the state's available surface water in a soggy year." The article notes that "the allocations exceed actual surface water supplies by about 300 million acre-feet – enough to fill Lake Tahoe 2.5 times, the study says."

Also reporting on the story is the [Sacramento \(CA\) Bee](#) (8/19, 582K).

EPA CRITICIZED FOR FAILING TO CLEAN UP AIR FOR NAVAJO NATION. In an op-ed for the [Arizona Republic](#) (8/19, Horseherder, 1.26M), Nicole Horseherder, the co-founder of To Nizhone Ani, writes that "after years of delay, rather than holding the federal owners" of the Navajo Generating Station "to the requirements of the Clean Air Act, EPA Administrator Gina McCarthy caved." Horseherder argues that "compromising the health and cultural integrity of people whose homeland surrounds the power plant for the sake of coal jobs and cheap power to pump Colorado River water is not a just balance." Horseherder writes that "McCarthy should have required the federal operator, the US Bureau of Reclamation, to cut smog-forming nitrogen oxide spewing from the stacks by 85 percent by 2020."

Empowering Native American Communities:

OGLALA SIOUX OFFICER'S USE OF STUN GUN UNDER INVESTIGATION. The [AP](#) (8/20) reports that "federal investigators are looking into whether an Oglala Sioux police officer improperly used a stun gun on a man who was apparently passed-out on the ground." According to Tribal Public Safety Chief Ron Duke, "the officer probably used the stun gun on the drunk man between five and 10 times, trying to get him 'to wake up and stand up." Duke said that the man was "lying on the ground, probably passed out, clearly intoxicated."

Coverage by the AP was also picked up by the [Washington Times](#) (8/19) and the [San Antonio Express-News](#) (8/20, 642K).

Also reporting on the story are the [Rapid City \(SD\) Journal](#) (8/20, 141K) and [KELO-TV Sioux Falls, SD](#) (8/20, 8K).

Top National News:

WHITE HOUSE REACHING OUT TO CIVIL RIGHTS LEADERS AHEAD OF HOLDER TRIP TO FERGUSON.

The ongoing violent protests in Ferguson, Missouri and the controversy over the investigation into the shooting of Michael Brown continued to be the most heavily covered news story on Tuesday, but the volume of coverage was down substantially from where it was on Monday following President Obama's remarks on the situation. The three network newscasts devoted just under 12 minutes to reports from Ferguson, about half the air time they

gave to the story on Monday, but the unrest in Ferguson still got about twice as much air time as did the next most-covered topic, flooding in Arizona.

Several analyses this morning contend that the President's comments on Monday came across as too cautious for some of his supporters, even as other reports indicate that efforts by Attorney General Holder and White House senior adviser Valerie Jarrett are reassuring African-Americans that the local investigation of Brown's death will be watched closely by Federal authorities.

The Washington Post (8/20, Nakamura, Zezima, 4.06M), for example, reports that the White House is "working behind the scenes to assure leading civil rights groups that the administration is determined to see justice achieved," and, as part of that effort, Jarrett "personally briefed 1,000 African American leaders, community organizers and civil rights groups during private conference calls this week." The Post says Holder and Jarrett "have shielded the president from criticism from...prominent black leaders." According to the Post, on MSNBC Tuesday, Georgetown's Michael Eric Dyson and Charles Ogletree, "who has known Obama since his days at Harvard Law School," both made the case that the President "had not spoken forcefully enough to the personal pain of African Americans in Ferguson."

The AP (8/20, Cass, Holland), meanwhile, reports the President "is sending Holder to Ferguson to bring the full weight of the federal government into the investigation," and adds that Holder has already "led an unusually fast and aggressive Justice Department response to the local case, sending teams of prosecutors and dozens of FBI agents to investigate and arranging a federal autopsy on top of one by local authorities." On Fox News' Special Report (8/19, 1.53M), Bret Baier said "Holder's trip to Missouri represents unusual Federal involvement in a local situation."

Roger Simon, in his column for Politico (8/19, 637K), derides the President's remarks on the situation in Ferguson during his press conference on Monday, saying he "appeared in the White House briefing room...without a necktie to signal he technically was still on vacation," and delivered a statement that "seem[ed] to have been assembled by committee." Simon also notes that while the President's "entire statement, which included more on Iraq than Ferguson, and the few questions that followed, consumed exactly 27 minutes of his time," although later "that evening, he spent a five-hour dinner at the home of White House chef Sam Kass...the president's frequent golfing partner."

Likewise, a Bloomberg View (8/20) editorial titled, "Go To Ferguson, Mr. President," says that on Monday, the President "checked all the necessary boxes," and "then he hopped on Air Force One to resume his vacation." Bloomberg View says the President should travel to Ferguson, "if not tomorrow, then in the days or weeks ahead," but contends that the President is hesitant to further involve himself in the controversy because he understands that "many Democrats, with the midterm elections looming, are wary of his making a comment or gesture that could alienate some white voters." According to The Hill (8/19, Parnes, 237K), the White House "has weighed sending" the President "to Ferguson...and has not ruled out a visit in upcoming weeks," but "for now...believes a trip...would do more harm than good."

Josh Lederman, in an analysis for the AP (8/20) titled, "As Protests Rage, Obama Struggles To Find His Role," says the President is "struggling to determine what role – if any – the nation's first black president can play in defusing a crisis that has laid bare the profound sense of injustice felt by African-Americans across the country." Lederman notes that on Monday, "while Obama lamented the disproportional apprehension of young black men, he pointedly argued that's not solely the fault of overzealous cops," which Lederman says is a "delicate balance that's likely to leave no one fully satisfied."

Under the headline, "Obama Keeps Distance From Ferguson As Risking More Harm," meanwhile, Bloomberg News (8/20, Lerer, Runnigen, 2.76M) reports that the President "doesn't want to be seen as taking sides" as police in Ferguson deal with increasingly violent protests, and "has avoided personalizing Ferguson." However, Bloomberg noted that on Monday, the President "said young black men who commit crimes must be prosecuted because every community has 'an interest in public safety.'"

In a piece for Politico (8/19, 637K) defending the President's response to Michael Brown's death and the violence in Ferguson, Todd Purdum says Jarrett told him, "The circumstances determine the reaction, and it isn't appropriate for the president to speak up emotionally in the midst of an ongoing investigation by the Justice

Department." Purdum goes on to quote Jarrett as saying that the President's "goal is...to send a message to the government officials on the ground about what his expectations are in terms of freedom to assemble, freedom of speech and freedom of the press – and also to signal to the people who have been looting and shooting that that's not an acceptable way to honor the death of a young man."

USA Today (8/20, Johnson, 5.76M) reported that "in advance of his trip to restive Ferguson," Holder, in an op-ed for the St. Louis Post-Dispatch titled "A Message To The People Of Ferguson," pledged "a 'fair and thorough' investigation in to the fatal shooting of Michael Brown." Holder wrote: "At a time when so much may seem uncertain, the people of Ferguson can have confidence that the Justice Department intends to learn – in a fair and thorough manner – exactly what happened." The Hill (8/19, Sink, 237K) says Holder "address[ed] some of the complaints raised by protesters," when he wrote: "Enforcement priorities and arrest patterns must not lead to disparate treatment under the law, even if such treatment is unintended." Holder added, "And police forces should reflect the diversity of the communities they serve."

In a front-page analysis, the New York Times (8/20, A1, Baker, Apuzzo, Subscription Publication, 9.79M) contrasts the responses to the unrest in Ferguson from the President and Holder, and ties each man's behavior to their respective upbringings and temperament. According to the Times, Holder is "a child of the civil rights era," who "joined sit-ins at Columbia University where protesters renamed an office after Malcolm X," while the President, a decade younger than Holder, "was too young and removed to experience the turmoil of the 1960s." The Times says "some African-Americans praise Mr. Holder for his outspokenness and lament or even denounce Mr. Obama for his caution." The Times notes that Georgetown's Dyson "called the president's public statement on Monday a 'stunning epic failure' that seemed to blame black men rather than armed police," but lauded Holder as "an up and down race man who understands the moral consequences of the law on the lives of black people."

Appearing on Fox News' Special Report (8/20, 1.53M), the Wall Street Journal editorial page's Jason Riley said, "I think the responsible role of the President is to condemn [protestors'] bad behavior – full stop." Riley went on to say that "these looters and rioters do not need to hear from the Attorney General that criticism of Obama is race-based," and, instead, "what they need to hear from" Holder is that "they need to stay out of trouble with the law...pull up their pants, finish school and take care of their kids."

Likewise, Fox News' Juan Williams, in an op-ed for the Wall Street Journal (8/20, Williams, Subscription Publication, 5.89M), notes that statistics show that more than 9 out of 10 of African-American males killed in gun homicides are killed by other African-American males, and points out that Jesse Jackson once said, "There is nothing more painful to me...than to walk down the street and hear footsteps and start thinking about robbery," but "then look around and see somebody white and feel relieved."

On the other hand, PBS's Tavis Smiley, in an op-ed for USA Today (8/20, Smiley, 5.76M), asks, "Do we really think it's right that a town like Ferguson which is 67 percent black should be under white political rule?"

Protests in Ferguson Again Turned Violent On Monday Night. The St. Louis Post-Dispatch (8/20, 938K) is reporting that as of late Tuesday night, "protesters continued marching and chanting without any major incidents." But the New York Times (8/20, Davey, Eligon, Blinder, Subscription Publication, 9.79M) reports that on Monday night, "peaceful protests devolved into sporadic violence, including gunshots," and "two men were shot in the crowd," while "31 people – some from New York and California – were arrested." The Times reports that on Monday, "the police were shot at...but did not fire their weapons." According to the Times, Missouri Highway Patrol Captain Ronald Johnson, "near a table that held two guns and a Molotov cocktail that had been seized," said, "We can't have this. We do not want to lose another life."

On the CBS Evening News (8/19, lead story, 2:50, Pelley, 5.08M), Scott Pelley reported that Captain Johnson has "pleaded with residents to hold their protests only in the daytime," and "said let the criminals come tonight, so we can take them away and they can't hide behind peaceful protesters." Vladimir Duthiers went on to report from Ferguson that, night after night, "the pattern of violence is the same – a small number of demonstrators disrupt the peaceful protests."

At the opening of NBC Nightly News (8/19, lead story, 3:05, Williams, 7.86M), Brian Williams said that on Monday night, Ferguson had been the scene of "urban warfare." Correspondent Ron Allen went on to report that police in Ferguson "say they were targeted by what they call a 'criminal element' using the protests and the night

as cover." Asked, "Can you really distinguish between the protesters and the criminals?" Captain Johnson replied, "Yes, I think we can. We've got a pretty good eye on that. We have been compiling addresses, and there's a low number of people that have a Ferguson address."

According to Mike Emanuel on Fox News' Special Report (8/19, 1.53M), of the 78 people arrested Monday night, only four are from Ferguson, and 18 are not even from Missouri. Reuters (8/20, Malone) reports that while most of those arrested were from elsewhere, the two protesters facing weapons charges are both from Ferguson. On ABC World News (8/19, story 5, 2:20, Sawyer, 5.84M), Alex Perez said the 78 arrests were "the most" since the violent protests began more than a week ago.

On the CBS Evening News (8/19, story 2, 2:45, Pelley, 5.08M), Scott Pelley noted that "in 10 days of street battles" there have been "at least five...shooting victims but no one has been shot by the police." Pelley added that "at least 147 people have been arrested, some from as far away as New York, San Francisco, and Dallas. And at least 60 businesses have been looted or vandalized."

The Huffington Post (8/19, Belenky, 11.54M) reported that Johnson "has walked side by side with the protesters, giving out hugs and kisses." According to the Huffington Post, Johnson, "a Ferguson native," has been "credited with sharply changing the tone of the relationship between the police and the protesters." The Los Angeles Times (8/20, Serrano, Hennessy-Fiske, Susman, 3.42M) reports that Anthony Gray, one of the lawyers for Michael Brown's family, "was out with protesters on...Monday," but "did not fault police," and "praised Johnson." Gray is quoted as saying, "If we maintained the course we were on before Ron got involved, it would probably be 10 times worse than it is now."

The Wall Street Journal (8/20, Dolan, Shallwani, Kesling, Subscription Publication, 5.89M) notes that on Monday, Missouri Gov. Jay Nixon (D) defended his decision to deploy the National Guard, saying, "as long as there are vandals and looters and threats to the people and property of Ferguson, we must take action to protect our citizens."

Military Autopsy Confirms That Brown Was Shot Six Times. The Los Angeles Times (8/20, Serrano, Hennessy-Fiske, Susman, 3.42M) reports that anonymous "federal law enforcement officials said a U.S. military medical examiner has concluded a federal autopsy of Brown and it will show six gunshot wounds." The Washington Times (8/20, Sherfinski, 465K) notes that the Justice Department "took the extraordinary step of conducting its own autopsy after an initial one performed by the local medical examiner and a private one performed at the request of Mr. Brown's family."

In a front-page article, the New York Times (8/20, A1, Robles, Schmidt, Subscription Publication, 9.79M) reports that "witnesses have given investigators sharply conflicting accounts of the killing," and while "many witnesses...agreed" that Officer Darren Wilson's gun "went off inside the car," and then Brown "ran away" before Wilson "got out of his car and began firing toward Mr. Brown." However, the Times says that as for "the crucial moments that followed, the accounts differ sharply," with "some witnesses" claiming Brown "moved toward Officer Wilson, possibly in a threatening manner," while "others say that Mr. Brown was not moving and may even have had his hands up when he was killed."

Bloomberg News (8/20, Bross, Feeley, 2.76M) reported that "a grand jury will begin hearing evidence" on Wednesday. According to the AP (8/20, Anderson), the ACLU and National Bar Association, among others, "have filed lawsuits seeking the incident report in the shooting." USA Today (8/20, Copeland, Johnson, 5.76M) reports that Edward Magee, a spokesman for St. Louis County Prosecuting Attorney Robert McCulloch, said Wilson "will be 'offered the opportunity' to testify" before the grand jury.

On ABC World News (8/19, story 5, 2:20, Sawyer, 5.84M), Alex Perez reported that Wilson "has already spoken to investigators." The Washington Post (8/20, Wax-Thibodeaux, Thompson, Farenthold, 4.06M) reports that Wilson "has told investigators that he struggled with Brown in his police cruiser and opened fire out of fear for his life after Brown charged at him."

Prosecutor's Father Was A Police Officer Murdered By African-American Man. According to the Washington Post (8/20, Wax-Thibodeaux, Thompson, Farenthold, 4.06M), "St. Louis County's chief executive and other local black leaders have said they believe" prosecutor Robert McCulloch "is not fit to handle the case,"

in part, "because McCulloch's father, a police officer, was killed in the line of duty," and "the man who shot his father was black." The Post notes that Missouri Gov. Jay Nixon (D) has said he "has not asked McCulloch to recuse himself from the case."

Officer's Supporters Raise Money For His Family Online. USA Today (8/20, Toppo, 5.76M) reports that "a small, quiet counterprotest, mostly online, has arisen far from the angry, noisy nightly protests roiling Ferguson." According to USA Today, Officer Darren Wilson's "supporters...created a GoFundMe...group to raise \$100,000 for Wilson's family," and, "as of Tuesday...about 1,300 donors had pledged more than \$50,000."

African-American Ferguson Police Officer Has Faced Abuse Claims In the Past. The Huffington Post (8/19, Sledge, 11.54M) reported that Eddie Boyd, one of Ferguson's three African-American police officers, has been investigated several times for allegedly using unnecessary force against teenagers, both while he worked for the St. Louis Police Department and in Ferguson. The only incident cited since Boyd joined the Ferguson police in 2010 followed a high-speed car chase involving a 16-year-old who shot a gun at police chasing him.

Pentagon Defends Program Supplying Military Gear To Police, Including Ferguson. The Washington Post (8/19, Lamothe, 4.06M) reports Pentagon press secretary Navy Rear Adm. John Kirby on Tuesday defended the Defense Department's Excess Property Program under which military equipment has been sent to police departments across the country, including Ferguson, Missouri. Although the program's use there "has come under scrutiny by civil rights advocates," Kirby said "the program also has assisted police across the United States in counter-narcotics and counter-terrorism operations that 'get right to the protection of the homeland.'" He went on to assure that "there's a lot of due diligence" regarding which police departments receive the equipment, but noted that "he wasn't sure if the federal government could take it back materiel if it wasn't happy with the way it was being used."

While "strongly" defending the program, Politico (8/19, Ewing, 637K) reports, Kirby said that while he has requested more information about the equipment transfers, Defense Secretary Chuck Hagel and the Pentagon "stand behind the overall principle of transferring gear the military no longer needs to local police departments who can use it." Kirby also pointed out that "the Pentagon does not 'push' equipment on local departments," and "it discriminates about what gear seems 'appropriate' for which agencies."

Knife-Wielding Robber Shot And Killed By Police In St. Louis. The CBS Evening News (8/19, story 3, 0:55, Pelley, 5.08M) reported that on Tuesday in St. Louis, police shot and killed a man armed with a knife who had just "robbed a store and appeared deranged when he confronted officers." The New York Times (8/20, Blinder, Santora, Subscription Publication, 9.79M) reports that after "officers repeatedly warned, 'Stop, drop the knife,'" the man who was subsequently shot "refused," and, instead "approached the officers, knife raised" until he "came within three or four feet" of the police officers.

Nixon Reportedly Has National Political Ambitions. The Washington Post (8/20, Kane, Costa, 4.06M) reports that Nixon recently "stoked rumors that he wants to be considered for the 2016 national ticket with a visit to Iowa and a trip to Colorado to huddle with major Democratic donors." The Post says Nixon has "a record and a reputation some regard as too moderate for the base of the Democratic Party," but is also "an appealing if staid Midwestern figure in a party full of telegenic upstarts from the coasts." However, according to the Post, some critics "have cited Nixon's delayed response to the Ferguson crisis as evidence of a lack of leadership and urgency by the governor."

FBI Has Not Reported A Substantial Increase In "Justified Homicides" By Police. The Washington Times (8/20, 465K) reports that according to the FBI, in 2012, "the last year available for full statistics, law enforcement ruled a total of 410 deaths as justified homicides," and that "has been steady for much of the past few decades."

Majority Of Race-Based Hate Crime Victims In DC Are White. In an article titled, "Race-based Hate Crimes Spike In D.C." that was promoted by the Drudge Report, the Washington Times (8/20, 465K) reports that according to the Washington DC police, "of the 18 race-based hate crimes in 2013, the majority of victims were white and the majority of suspects black."

NYTimes' Upshot: African-Americans Have Not Made Much Economic Progress In Last 50 Years. The New York Times' (8/20, Irwin, Miller, Sanger-Katz, Subscription Publication, 9.79M) "The Upshot" blog provides a

series of graphs and statistics backing up the claim that "across a broad range of economic and demographic indicators," a "chasm remains between black and white Americans – and in some important respects it's as wide as ever." According to The Upshot, "The unemployment gap is virtually unchanged over the last 40 years," while the "income and wealth gaps have actually widened."

In his online column for the New York Times (8/20, Subscription Publication, 9.79M), Thomas Edsall says the "rioting this past week in Ferguson...follows more than a decade of economic stagnation and worse for many black Americans, a trend that appears unlikely to be reversed in the foreseeable future."

China, Russia, Iran: Ferguson Unrest Shows Widespread Instability, Racism In The US. On Fox News' Special Report (8/20, 1.53M), Bret Baier noted that foreign governments in countries where democracy is either deeply infringed upon or non-existent, have played up the situation in Ferguson in recent days. Baier noted that "China's state-run news service" offered this advice: "What the United States needs to do is to concentrate on solving its own problems rather than always pointing fingers at others." Likewise, according to Baier, "Russia's Foreign Ministry urged its American partners 'pay more attention to restoring order in their own country before imposing their dubious experience on other nations.'" Baier added that Iran's deputy foreign minister claimed, "We are still witness thing the phenomenon of racism in the Western societies, and it is regrettable that those who claim to be advocates of human rights are pursuing such an approach."

According to McClatchy (8/19, Leavenworth, Subscription Publication, 23K), China's state-controlled media "has stepped up coverage of the Ferguson violence and protests" in recent days. The Daily Caller (8/19, Bloom, 408K) reported that "Islamic State supporters have taken to social media to encourage protesters in Ferguson to embrace radical Islam."

The New York Times (8/20, Mackey, Subscription Publication, 9.79M) notes that "RT's main English-language channel featured regular updates from the 'war zone' by its correspondent Anastasia Churkina – a daughter of Russia's United Nations ambassador, Vitaly I. Churkin." Another piece from the New York Times (8/20, Herszenhom, Subscription Publication, 9.79M) points out that "Russia paid similarly close attention, for instance, when demonstrators from the Occupy Wall Street movement were arrested in New York in 2011, and government-controlled news media outlets have often rebroadcast video of those arrests to make the same point as their coverage of Ferguson."

ADVOCATES URGE OBAMA TO DELAY DEPORTATION OF MILLIONS. The New York Times (8/20, Preston, Subscription Publication, 9.79M) reports that as part of an effort "to pressure President Obama to include any millions of immigrants in any executive action to reduce deportations," 11 people living in the US illegally, including well-known immigrants rights movement leader Jose Antonio Varga, "plan to apply for deportation deferrals on Wednesday." The group wants the White House "to halt deportations for most of the estimated 11 million immigrants here illegally by vastly expanding a 2012 program of deferrals for young people who came when they were children." With their deferral applications Wednesday, they will include "a legal memorandum arguing that the president has 'broad legal authority to provide temporary status' to those immigrants and by extension to millions of others like them."

Honduran Family Separated From Daughter During Journey To US. The Washington Post (8/20, A1, Partlow, 4.06M) reports in a front-page story on Maby Caceres, a Honduran mother who was separated from her 10-year-old daughter, Cindy Noemi Rodriguez Caceres, in Mexico during their journey to the US. After placing her daughter in a van with their neighbors, Maby and the rest of her family boarded a second van, which was stopped by police. The family was deported back to Honduras without Caceres and her husband knowing whether Cindy made it to the Rio Grande or "was lost and alone in Mexico." Finally, the girl was found in an immigration shelter in Mazatlán and deported back to her family in Honduras.

CONSUMER PRICE INDEX UP 0.1%; HOUSING STARTS RALLY WITH 15.7% GROWTH. McClatchy (8/20, Hall, Subscription Publication, 23K) reports "headline inflation, as measured by the Labor Department's Consumer Price Index, rose by 0.1 percent in July and 2 percent year-over-year from July 2013." Also yesterday, the Commerce Department noted "stronger-than-expected housing starts in July, rising by a strong 15.7 percent to 1.09 million starts from June's 945,000."

Bloomberg News (8/20, Woellert, 2.76M) says "a strengthening job market and cheaper borrowing costs are

helping revive residential real-estate after a lull in construction at the start of the year." The Wall Street Journal (8/20, Mitchell, Subscription Publication, 5.89M) runs a similar report under the headline "Renewed Strength in Housing Market Could Boost Economy." Further underscoring the improvement in the housing market, the New York Times (8/20, Searcey, Harris, Subscription Publication, 9.79M) reports, Home Depot said an "uptick in demand gave second-quarter earnings a lift," while "big-ticket purchases, like appliances, windows and water heaters, increased." Home Depot also "reported strong growth among its high-spending professional clients – which indicates that they have work." USA Today (8/20, Carroll, 5.76M) runs a similar report.

Focusing on the inflation numbers, Reuters (8/20) reports that they could give the Fed more reason to extend its monetary policy. Bloomberg News (8/20, Stilwell, 2.76M) says that "even the muted increase in prices is damping wages, which remain tepid." According to other Commerce data, "hourly earnings were unchanged on average last month after adjusting for inflation."

McClatchy Analysis: Consumer Spending On The Rise. McClatchy (8/20, Hall, Subscription Publication, 23K) reports, "Written off in the aftermath of the Great Recession, the US consumer is back. Not quite with a vengeance, but definitely back." While "spending by the rich never tailed off...across the broad middle of the income spectrum, a bevy of indicators shows that ordinary Americans feel better about the economy and are loosening the purse strings." McClatchy adds that "the most obvious example is car sales, on pace to exceed 16.3 million this year."

Stocks Finish Higher. The Wall Street Journal (8/20, Vaishampayan, Subscription Publication, 5.89M) reports the Dow added 86 points yesterday, to close at 16920, while the Nasdaq rose 19 points to 4528 and the S&P added 10 points to 1982.

Editorial Wrap-Up:

NEW YORK TIMES. "Better Governing Through Data." In an editorial, the New York Times (8/20, Subscription Publication, 9.79M) says that ClaimStat, "a new initiative by the New York City comptroller, Scott Stringer, to use copious amounts of data to save money and solve problems, makes...intuitive sense." The initiative "seeks to collect and analyze information on the thousands of lawsuits and claims filed each year against the city," and by "identifying patterns in payouts and trouble-prone agencies and neighborhoods...reduce the cost of claims." Noting that the effort has received only "mild praise" from the Administration of Mayor Bill de Blasio, whose aides "point out that the city's payouts have remained flat over the last 12 years," the Times argues that "the aspiration of a well-run city should not be to hold claims even but to shrink them," and "the more actual information, independently examined and publicly available, the better."

"Prime Minister Modi Fumbles On Pakistan." A New York Times (8/20, Subscription Publication, 9.79M) editorial argues that Indian Prime Minister Narendra Modi "fumbled an early test of leadership this week when he canceled a high-level meeting with Pakistan," even though the two nations "need to talk, and talk regularly." The Times says leaders of the two nations must "establish a continuing dialogue," and a meeting of the UN General Assembly next month "offers a good venue."

"The Right To Cheat And Maim?" A New York Times (8/20, Subscription Publication, 9.79M) notes the pushback from the Associated Builders and Contractors and the International Franchise Association to the President's executive order "requiring bidders for federal contracts to disclose their labor-law violations going back three years," and argues that it is "outlandish for industry groups to argue that procurement officials and the public do not have the right to know about a contractor's compliance with federal labor laws or defend practices that hurt workers." The Times adds that contractors opposing the President's order "seem to have forgotten that they are bidding for taxpayer dollars," and "are not entitled to contracts; they must qualify."

WASHINGTON POST. "A Pension Smoothing Trick." An editorial in the Washington Post (8/19, 4.06M) blasts the Highway and Transportation Funding Act of 2014, which "provides \$10.8 billion for infrastructure projects around the country, with more than half of the money supplied not by any real increase in revenue or reduction in spending but by an egregious budgetary gimmick known as 'pension smoothing,'" which "allows companies to put off otherwise mandatory contributions to their defined-benefit employee pension funds, which increases tax revenue for the Treasury, since those contributions would have been tax-deductible." The Post calls

this "a new low in fiscal irresponsibility," noting that the Federal government has been "reduced to running one of its major infrastructure programs on a year-to-year basis, held together with the budgetary equivalent of chewing gum and bailing wire."

"Virginia's 'Asia Experts.'" A Washington Post (8/20, 4.06M) editorial criticizes Republican state Del. Barbara Comstock and Democratic Fairfax County Supervisor John Foust, the candidates in Virginia's 10th Congressional District, for pandering to Northern Virginia's growing Korean community by promising to "attempt to insert Congress into a dispute between South Korea and Japan" over "the name of the Sea of Japan, which many Koreans insist should be called the East Sea." The Post questions whether the candidates "should be poking their noses in a bitter dispute between two U.S. allies," and expresses similar concern "about the precedent set by Fairfax County in dedicating a memorial garden, just behind the County Government Center, to women forced into sex slavery by Japan during World War II." The Post expresses doubt that the county seat of government is "the right place to memorialize historical tragedies," and that "Congress should be attempting to arbitrate the nomenclature of the sea that separates Japan and the Korean Peninsula."

"Thailand's Trafficking Scourge." The Washington Post (8/20, 4.06M) editorializes on the State Department's annual Trafficking in Persons Report, which "found that Thailand does not comply with the minimum standards for the elimination of trafficking." The report "downgraded" the country "to the lowest possible level, Tier 3, which could lead to sanctions and cutoff of aid other than humanitarian aid." While "Thailand received a US waiver based on a written plan for improvement....the report declares that" its "is not making enough progress toward the minimum standards."

WALL STREET JOURNAL. "The Medical Innovation Threat." An editorial in the Wall Street Journal (8/20, Subscription Publication, 5.89M) calls attacks from the insurance industry and liberals on the price of the Hepatitis C drug Sovaldi a precursor to price controls on drugs that will serve to stifle innovation by drug makers.

"Syria's Disarmament Mirage." In an editorial, the Wall Street Journal (8/20, Subscription Publication, 5.89M) throws cold water on Administration assertions that the Assad regime has turned over its entire chemical weapons stockpile, citing unnamed sources that indicate there is no evidence that Syria has declared its entire weapons cache.

"Modi Revs Up Reform." In an editorial, the Wall Street Journal (8/20, Subscription Publication, 5.89M) praises Indian Prime Minister Narendra Modi for challenging the Indian government's old ways with economic reforms that welcome foreign companies to invest in the country.

Washington Schedule:

TODAY'S EVENTS IN WASHINGTON.

White House:

PRESIDENT OBAMA — Vacations at Martha's Vineyard.

VICE PRESIDENT BIDEN — Travels to Connecticut; visits Goodwin College for a roundtable discussion on workforce development and skills training; attends an event at a private residence in Greenwich, Connecticut for the Democratic Governors Association; attends an event for the Democratic Party of Connecticut at a private residence in Stamford, Connecticut.

US Senate: Aug. 8 – Sept. 8. — The Senate stands adjourned until 2 p.m. on Monday, Sept. 8.

US House: Aug. 4 – Sept. 7. — The House stands adjourned until 2 p.m. on Monday, Sept. 8. Please note however that some committees are still scheduling hearings during this time both in Washington and in the field. Just a reminder to check the Capitol Hill takes daily during this period of "Recess."

2 p.m. TRANSPORTATION AND INFRASTRUCTURE ROUNDTABLE — Roundtable policy discussion on "FEMA's Fracking Ban: How Anti-Fracking Policies are Putting People and Property at Risk." Location: The

Wyoming County 911 Center, 3880 SR6E, Tunkhannock, PA.

Other: Aug. 19 – 23. COMMUNITY ACTION PARTNERSHIP CONVENTION — The Community Action Partnership holds its 50th anniversary annual convention, with the theme “Community Action: 50 Years of Moving Forward.” It coincides with the 50th anniversary of President Lyndon B. Johnson signing the Economic Opportunity Act on Aug. 20, 1964, which created Community Action Agencies (CAAs) and other programs as part of the War on Poverty. The convention will highlight CAAs’ role helping low-income people achieve economic stability over the past five decades. Washington’s CAA, United Planning Organization (UPO), is the host of the convention. Location: Washington Marriott Wardman Park Hotel, 2660 Woodley Rd. NW.

HIGHER EDUCATION DISCUSSION — 9:30 a.m. “Governance for a New Era” Discussion featuring Benno Schmidt, board chairman of CUNY and former president of Yale University. The focus is on “finding innovative solutions to the many challenges at our colleges and universities.” Schmidt will be joined by former Governor of Michigan and President of the Business Roundtable John Engler, Georgia Tech Professor and Director of the Center for 21st Century Universities initiative Richard DeMillo; and former U.S. Congressman and Regent of the University of Maryland System Tom McMillen. Location: National Press Club, 529 14th Street NW.

WILDFIRES – SECRETARY VILSACK — 1:30 p.m. Agriculture Secretary Tom Vilsack will host a media conference call to discuss a new report on the rapid rise in firefighting costs which often exceeds the total Forest Service budget.

NASA – ANCIENT EARTH AND HABITABLE PLANETS — 5:30 p.m. – 6:30 p.m. NASA presents a panel discussion by leading science experts describing what is known about the ancient Earth and how that information can guide the search for habitable planets orbiting other stars. Participants: Phoebe Cohen, professor of geosciences, Williams College, Massachusetts; Shawn Domagal-Goldman, research space scientist, NASA Goddard Space Flight Center, Greenbelt, Maryland; Christopher House, professor of geosciences, Pennsylvania State University; Timothy Lyons, professor of biogeochemistry, UC Riverside, California; Dawn Sumner, professor of geology, UC Davis, California; David Grinspoon, senior scientist, Planetary Science Institute, Tucson, Arizona, former Blumberg NASA-Library of Congress Chair in Astrobiology. Questions can be asked during the event by attendees or via Twitter using the hashtag AskNASA. Location: Webb Auditorium, NASA Headquarters, 300 E St. SW.

Last Laughs:

LATE NIGHT POLITICAL HUMOR.

Jimmy Fallon: “Hillary Clinton is returning to Iowa next month for the first time since her failed presidential run in 2008. Hillary denies just being there for politics. She was like, ‘I love Iowa for their...okay, I’m running for president.’”

Jimmy Fallon: “Of course, the big story continues to be the situation in Ferguson. And it just came out that the Missouri Governor, Jay Nixon, apparently sent the National Guard to Ferguson without letting the White House know first. When he heard that he was left out of such an important decision, Obama said, ‘Holy crap, I’ve been Bidened.’”

Dan Ashe was in MT (Helena) yesterday and stood with the Governor to announce FWS has decided not to list the Arctic Grayling (fish). One story below. I can talk to you about this and the other recent MT ESA decision later this morning, but passing along for awareness.

Helena Independent Record: No endangered species listing for Arctic grayling

Top of Form

Bottom of Form

The upper Missouri River Arctic grayling, a candidate for listing under the Endangered Species Act starting 20 years ago, will not receive federal protections in Montana, Gov. Steve Bullock and U.S. Fish and Wildlife Service Director Dan Ashe announced at the Capitol Tuesday, along with other federal and state officials.

Montana is the only state in the lower 48 where Arctic grayling are native. Officials Tuesday pointed to restoration work between ranchers, government agencies and conservation organizations in the Big Hole Valley, one of the fish's remaining strongholds, as the chief reason for the decision not to list.

"Too often these days when we hear about the Endangered Species Act, it's a center of controversy," Bullock said. "Here in the West these issues have become higher profile in recent years, raising concerns for states' rights, local economies, litigation and federal intrusion. What's clear is when we work together we do find solutions, and today we're here to celebrate an ESA success story."

For the last decade, landowners through the Big Hole Watershed Committee worked with Montana Fish, Wildlife and Parks, the Montana Department of Natural Resources and Conservation, USFWS and the Natural Resource Conservation Service to restore habitat along the river and its tributaries and to increase in-stream flows during important times of year for the Arctic grayling.

Known for their iridescent silver coloring and large sail-like dorsal fin, the Arctic grayling thrives in the colder waters of northern Canada and all of Alaska, and its closest relatives are trout, salmon and char.

Cold water fish are particularly sensitive to warming waters due to climate change, Ashe said. While climate change was considered in the decision, the conservation efforts taken before listing were much the same as those that would have occurred after listing to make the watershed more resilient to a changing climate, he said.

The decision will include 20 of the 26 known Arctic grayling populations in Montana that are self-sustaining and in wild and natural habitat, including river and several mountain lake populations, said Jim Boyd of the USFWS.

The efforts in the Big Hole and other areas such as the Ruby and Centennial valleys were enough to keep the fish from listing.

"The reasons are simple: habitat quality, population trends and genetic diversity are stable or increasing for most Montana Arctic grayling populations," Ashe said. "The voluntary conservation measures and commitment to conservation in the Big Hole, Centennial, and Ruby valleys have tipped the balance for the Arctic grayling in Montana."

Convincing landowners to work for conservation to stave off listing was not an easy process, according to some members of the collaborative.

"The challenge wasn't simply the fish, the challenge was building trust between government employees and some very suspicious ranchers," said Joyce Swartzendruber, state conservationist for NRCS.

Big Hole Valley rancher Don Reese applauded the trust between private landowners and government officials and offered a toast to the Arctic grayling.

"We were worried because we don't know what else we can do," Reese said of area landowners. "The sacrifices they made have made a difference, and this decision makes that foundation of trust even stronger."

While Tuesday was for celebration, the decision was not the end but the beginning of a brighter future for the fish in Montana, he said.

Some conservation groups took a dim view of USFWS's decision not to list.

"I think they made a mistake," said Mike Garrity, executive director for the Alliance for the Wild Rockies.

Garrity submitted extensive comments on the proposed listing, and still has concerns about long-range viability of Arctic grayling, he said. Garrity had not seen the decision, and declined to speculate on what his organization planned to do in response.

The Arctic grayling was originally a candidate for listing from 1994 until 2004. From 2003 to 2005, USFWS was litigated by the Center for Biological Diversity and the Western Watershed Project over failing to act, and the agency agreed to make a final determination by 2007. In 2007, the agency declined to list the upper Missouri population because it decided the grayling was not a separate or distinct population.

The 2007 decision not to list was again challenged, with USFWS agreeing to reassess the population. In 2010, the agency again listed the upper Missouri population as warranted but precluded.

FWP director Jeff Hagener called Tuesday's decision "landmark" after the years of uncertainty.

"This is a model for showing how to work together," he said, adding that the collaborative approach can work for other species listed or warranted for listing, such as bull trout, grizzly bears and sage grouse.

CONFIDENTIAL AND PRIVILEGED

**U.S. Department of the Interior Weekly Cabinet Report
August 1, 2014**

Direct Message to the President

Dear Mr. President -

This week also marked the signing of a terrific MOU with the AFL-CIO's Union Sportsmen's Alliance, whereby volunteers with deep experience in the trades will work alongside youth and veterans in support of public lands on projects like trail and footbridge construction, interpretive kiosks and historic preservation.

Warmly,

Sally

Announcements - Presidential Priorities

Climate/Energy: Next week, BLM anticipates signing a ROD for the 485-MW Blythe Solar project in southern CA.

Jobs/Economy:

ACA Implementation:

Immigration:

My Brother's Keeper:

VA Backlog:

Principals' Schedules

On August 4, Secretary Jewell will deliver remarks at the U.S.-Africa Leaders Summit Wildlife Trafficking Side Event in Washington, D.C.

During the week of August 4, the Department of the Interior will continue its efforts to raise awareness of and support for the Land and Water Conservation Fund. Secretaries Jewell and Vilsack will kick off the week with a joint blog post. On August 6, Secretary Jewell will participate in an event with Sen. Burr in North Carolina. On August 7, the Secretary will join Mayor Brainard at an event in Carmel, Indiana. Mayor Brainard is a member of Mayors for Parks, a bipartisan coalition of mayors from across the country who have called for the renewal and full funding of the program that has allowed urban and metropolitan parks to flourish – and helps keep local economies and our families healthy. On August 8, Secretary Jewell will join Sens. Heinrich and Udall in Albuquerque, NM to celebrate the final land acquisition for the Valle del Oro National Wildlife Refuge. This urban refuge in Albuquerque, NM was established in 2012 through the acquisition of 390 acres of Valley Gold Farms, a former dairy and hay farm. Finally, Secretary Jewell will join with Mayor Stanton, also a member of Mayors for Parks, for an event in Phoenix, AZ on Saturday, August 9.

Items of Note

Next week, FWS will announce it is withdrawing the proposed rule to list the population of the North American wolverine that occurs within the contiguous U.S. as a threatened species under the ESA. The associated 4(d) and 10(j) rules for the wolverine will also be withdrawn. [This was in last week's report] (Sarah/Kate/Terri/Stephene)

30-60 Day Look-Ahead

August 19-21, the Deputy Secretary is tentatively scheduled to travel to New Orleans. While there he would attend the BOEM lease sale, have a tour of an offshore oil platform, and participate in a conservation event with Senator Landrieu.

August 24–27, the Deputy Secretary is tentatively scheduled to travel to Arizona and Boise, ID. While there he would participate in an event with former Secretary Kempthorne to celebrate the conclusions of the Snake River Basin Adjudication in Idaho, and celebrate the signing of another Western Watersheds Enhancement Project MOU in Arizona.

In August, Secretary Jewell may hold an event to mark a milestone on the Department's priority goal to take 500,000 acres of land-into-trust in Indian Country. This is a key priority to advance self-determination and promote economic development.

In August, Interior may announce that it will provide new work and training opportunities for youth across the country by funding approximately 21 new youth corps projects on federal lands. Funding for these projects comes from more than \$2M that has been raised to date by DOI from the private sector—donated by companies like American Eagle Outfitters, CamelBak, and the Campion Foundation. Many of these corps projects will hire and train boys and young men of color and each project will teach job skills and increase connections to nature, so that young people and veterans can not only accomplish meaningful work and gain important professional skills, but they can also build a lifelong connection to the outdoors. These projects are varied and diverse—from restoration efforts on the Los Angeles River and Gateway National Recreation Area in New York City, to creating conservation crews at Navajo High School in Arizona and supporting Veterans Green Corps in Sangre de Cristo Mountains, Colorado. These 21 new projects are in addition to the more than 450 projects happening in National Parks, on urban refuges, and throughout tribal lands—projects that will offer work experiences to more than 14,000 young people this year. **(Nikki/?/Francisco/Jeremy)**

In August, Reclamation may release a West-Wide Climate Impact Assessment Report for the Sacramento-San Joaquin Basins. The Impact Assessment Report will describe future projections of water supply and demand under climate change, and potential impacts to existing water and power operations and infrastructure in the basin. The Report's conclusions will inform ongoing planning efforts, including the Sacramento-San Joaquin Basin Study, which was initiated in 2013 and is focused on identifying strategies to adapt to or mitigate climate change impacts to basin water supplies. **(Sarah/Blake/Terri/Jeremy)**

In August, the National Park Service may receive an application for a right-of-way from the Alaska Industrial Development and Export Authority for a new 220 mile "road to resources" development in northwest Alaska. This new road includes a 20 mile section that will cross the Preserve portion of Gates of the Arctic National Park and Preserve. The park's enabling legislation (ANILCA) clearly states the NPS shall grant a right of way for such a road upon receipt of an application.

In August, Reclamation will post two funding opportunity announcements (FOA) for the Desert and Southern Rockies Landscape Conservation Cooperatives (LCC). The FOAs will fund studies and projects in the two LCCs to study and mitigate the effects of climate change, drought, and wildfires.

In August, the Office of Surface Mining and Reclamation and Enforcement expects to promulgate a final rule to provide limited liability protection from lawsuits for certified states and tribes carrying out approved abandoned mine reclamation. Certified states and tribes are those that have completed reclamation of all known coal-related abandoned mine problems within their jurisdictions (currently Louisiana, Montana, Texas, Wyoming, the Crow Tribe, the Hopi Tribe, and the Navajo Nation).

In August, the NPS intends to publish a proposed gathering rule, which would provide the authority for permitting the gathering of plant resources within units of the National Park System by members of federally recognized Indian tribes, as defined in the rule. The proposed rule would apply to Indian tribes with traditional associations to specific park units. It would be implemented through agreements between NPS and Indian tribes and subject to permits which would be issued annually. This rule change would provide reasonable, resource protection based use of park resources while assisting to support the continued lifeways of American Indian tribes. Consultation with Indian tribes nationwide indicates that the approach in the proposed rule would be constructive and respectful of tribal sovereignty while continuing to respect the NPS mission to protect and conserve park resources.

In August, the Secretary will announce the first ever Urban Refuge Challenge funding recipient, which will receive \$1 million-a-year funding from FWS. The funding will enhance their plans to more fully engage people from culturally diverse backgrounds in conservation and outdoor recreation.

In August, FWS may publish a proposal to list the African lion as threatened throughout its range under the ESA. FWS will also publish a special rule for African lions requiring that imports of lion trophies receive prior authorization or permits under the ESA. This action may be controversial and attract attention from the animal rights community and the sport-hunting community.

In August, BOEM will initiate a rulemaking process, through the issuance of an Advanced Notice of Proposed Rulemaking, aimed at ensuring the financial integrity of lessees and operators on the OCS, and reducing the risk of taxpayers bearing the costs of decommissioning OCS facilities.

In August, FWS anticipates proposing to designate critical habitat for the yellow-billed cuckoo across nine states (Arizona, California, Colorado, Idaho, Nevada, New Mexico, Texas, Utah, and Wyoming) as well as publish a notice of availability of a draft economic analysis of the designation. FWS expects this rule to garner attention due to the anticipated size of the designation and perceived impacts to water use. FWS proposed to list the cuckoo as threatened in October 2013.

In August, FWS anticipates proposing to designate critical habitat and draft economic analysis for the Rufa red-knot, a migratory bird that travels from the arctic to the coasts of southern Chile and Argentina through 37 states, Puerto Rico and the Virgin Islands. FWS expects the proposal to garner attention due to its size and perceived impacts to the horseshoe crab harvest and coastal land use. The Rufa red knot was proposed to be listed as threatened in September 2013 with climate change identified as a threat to its survival.

In the next several months, BSEE expects to have its blowout preventer proposed rule ready for review by OIRA. Interest from industry, other nongovernment organizations, and the media is expected.

Hi Sally,

Here is the first draft of the White House weekly report. Please send us your message to the President.

Thank you,
Erin

 **Weekly Report August 8.docx**
22K

CONFIDENTIAL AND PRIVILEGED

**U.S. Department of the Interior Weekly Cabinet Report
August 8, 2014**

Direct Message to the President

Dear Mr. President –

Warmly,

Sally

Announcements - Presidential Priorities

Climate/Energy: Next week, BOEM and BSEE expect to send a joint proposed rule to OIRA that addresses offshore oil and gas activities on the Alaska Outer Continental Shelf. The rule will promote safe, responsible, and effective drilling activities and include requirements related to oil spill response plans and operating in the challenging Arctic environment. [This was in last week's report]

August 12, Salerno at OESI in Houston, TX.

August 13, BOR water forecast.

BLM: De Tilla Gulch Solar Energy Zone Auction - BA

Jobs/Economy: On August 11, construction of employee short-term housing in Dickinson, ND, will commence. Housing is for both BLM and USFS employees and is located on 10-acres of BLM land transferred from the BOR. The U.S. Air Force will undertake construction of the access roads, utilities, pads, and infrastructure needed for up to 10 mobile housing units.

ACA Implementation:

Immigration:

My Brother's Keeper: On August 13, Secretary Jewell and FWS Director Ashe will announce the first ever Urban Refuge Challenge funding recipient. The funding from FWS (\$1 million per year) will enhance their plans to more fully engage people from culturally diverse backgrounds in conservation and outdoor recreation. The announcement may be combined with the announcement of six new urban wildlife partnerships around the country.

VA Backlog:

Principals' Schedules

On August 11, Secretary Jewell will cohost a Quadrennial Energy Review (QER) roundtable with Secretary Moniz in Santa Fe, NM. This is part of a series of listening sessions Energy Secretary Moniz kicked off related to the QER to discuss and receive public feedback on issues related to the development of a comprehensive strategy for the infrastructure needed to transport, transmit and deliver energy to consumers.

August 12, the Secretary is tentatively scheduled to participate in a wildfire event in Redding, California.

August 15, the Secretary is scheduled to meet with the Board of the National Park Foundation in Acadia National Park in Maine. While in the park, she will also tape a short segment in recognition of the 50th Anniversary of the Wilderness Act with ABC's *Sunday Show* program.

August 11 – Jarvis LWCF event

August 11 – Robin T leading PRI hearing

Items of Note

On August 11 and 13, FWS will hold public hearings in Pinetop, AZ and Truth or Consequences, NM (respectively), on proposed changes to the Mexican wolf recovery program 10(j) rule and the associated draft Environmental Impact Statement.

On August 12, the National Park Service will announce 9 new National Historic Landmark designations, 1 boundary revision and 2 withdrawal designations. Properties are located in MA, LA, ME, NJ, FL, MI, IN and VT.

On August 14, FWS will propose to designate critical habitat for the yellow-billed cuckoo across nine states (Arizona, California, Colorado, Idaho, Nevada, New Mexico, Texas, Utah, and Wyoming) as well as publish a notice of availability of a draft economic analysis of the designation. This rule may garner attention due to the size of the designation and perceived impacts to water use. FWS proposed to list the cuckoo as threatened in October 2013. [This was in last week's report]

On August 12, FWS will announce it is withdrawing the proposed rule to list the population of the North American wolverine that occurs within the contiguous U.S. as a threatened species

under the ESA. The associated 4(d) and 10(j) rules for the wolverine will also be withdrawn.
[This was in last week's report]

Next week, FWS/USDA/EPA: Cheatgrass proposal - KK

30-60 Day Look-Ahead

On August 18, Secretaries Jewell and Duncan will travel to the Passamaquoddy Reservation near Bangor, ME and tour Beatrice Rafferty School.

On August 19 Secretary Jewell will travel to Minnesota to tour the Bug-O-Nay-Ge-Shig School. Rep. Franken may also attend. Both visits are open press.

August 19-21, the Deputy Secretary is tentatively scheduled to travel to New Orleans. While there he would attend the BOEM lease sale, have a tour of an offshore oil platform, and participate in a conservation event with Senator Landrieu.

On August 19, BOEM will offer nearly 80,000 acres offshore Maryland for commercial wind energy development in a competitive lease sale. Sixteen companies have qualified to participate in the auction for the Maryland Wind Energy Area. According to analysis prepared by the Department of Energy's National Renewable Energy Laboratory, if fully developed, the Maryland Wind Energy Area could support between 850 and 1450 megawatts of commercial wind generation, enough electricity to power 300,000 homes.

On August 20, Deputy Secretary Connor is expected to attend BOEM's oil and gas lease sale in New Orleans that will offer 21 million acres offshore Texas for oil and gas exploration and development that will include all available unleased areas in the Western Gulf of Mexico Planning Area.

On August 20, the Department may issue a Secretarial Order identifying key guiding principles that bureaus and the Department should follow to ensure that we are fulfilling our trust responsibility to Indian tribes and Indian beneficiaries. At that time, the Department will also respond to recommendations provided by the National Commission on Indian Trust Administration and Reform on the Department's management and administration of trust assets. The Secretary is tentatively scheduled to travel to Indian country to make these announcements along with Vince Logan, the newly confirmed Special Trustee

August 24-27, the Deputy Secretary is tentatively scheduled to travel to Arizona and Boise, ID. While there he would participate in an event with former Secretary Kempthorne to celebrate the conclusions of the Snake River Basin Adjudication in Idaho, and celebrate the signing of another Western Watersheds Enhancement Project MOU in Arizona.

In August, Secretary Jewell may hold an event to mark a milestone on the Department's priority goal to take 500,000 acres of land-into-trust in Indian Country. This is a key priority to advance self-determination and promote economic development.

In August, Interior may announce that it will provide new work and training opportunities for youth across the country by funding approximately 21 new youth corps projects on federal lands. Funding for these projects comes from more than \$2M that has been raised to date by DOI from the private sector—donated by companies like American Eagle Outfitters, CamelBak, and the Champion Foundation. The park's enabling legislation (ANILCA) clearly states the NPS shall grant a right of way for such a road upon receipt of an application.

In August, Reclamation will post two funding opportunity announcements (FOA) for the Desert and Southern Rockies Landscape Conservation Cooperatives (LCC). The FOAs will fund studies and projects in the two LCCs to study and mitigate the effects of climate change, drought, and wildfires.

In August, the Office of Surface Mining and Reclamation and Enforcement expects to promulgate a final rule to provide limited liability protection from lawsuits for certified states and tribes carrying out approved abandoned mine reclamation. Certified states and tribes are those that have completed reclamation of all known coal-related abandoned mine problems within their jurisdictions (currently Louisiana, Montana, Texas, Wyoming, the Crow Tribe, the Hopi Tribe, and the Navajo Nation).

In August, the NPS intends to publish a proposed gathering rule, which would provide the authority for permitting the gathering of plant resources within units of the National Park System by members of federally recognized Indian tribes, as defined in the rule. The proposed rule would apply to Indian tribes with traditional associations to specific park units. It would be implemented through agreements between NPS and Indian tribes and subject to permits which would be issued annually. This rule change would provide reasonable, resource protection based use of park resources while assisting to support the continued lifeways of American Indian tribes. Consultation with Indian tribes nationwide indicates that the approach in the proposed rule would be constructive and respectful of tribal sovereignty while continuing to respect the NPS mission to protect and conserve park resources.

In August, the Secretary will announce the first ever Urban Refuge Challenge funding recipient, which will receive \$1 million-a-year funding from FWS. The funding will enhance their plans to more fully engage people from culturally diverse backgrounds in conservation and outdoor recreation.

In August, FWS may publish a proposal to list the African lion as threatened throughout its range under the ESA. FWS will also publish a special rule for African lions requiring that imports of lion trophies receive prior authorization or permits under the ESA. This action may be controversial and attract attention from the animal rights community and the sport-hunting community.

In August, the BLM expects to publish the Proposed Rule on Wind and Solar ROWs. The rule establishes competitive leasing processes for ROWs in order to receive fair market value and promote the use of preferred areas for solar and wind energy development on public lands. The BLM published an Advance Notice of Proposed Rulemaking in Dec. 2011; the 60-day comment period ended in Feb. 2012. OMB is reviewing the proposed rule.

In August, BOEM will hold several scoping meetings for the Five Year Program.

In August, BOEM will initiate a rulemaking process, through the issuance of an Advanced Notice of Proposed Rulemaking, aimed at ensuring the financial integrity of lessees and operators on the OCS, and reducing the risk of taxpayers bearing the costs of decommissioning OCS facilities.

In August, FWS anticipates proposing to designate critical habitat and draft economic analysis for the Rufa red-knot, a migratory bird that travels from the arctic to the coasts of southern Chile and Argentina through 37 states, Puerto Rico and the Virgin Islands. FWS expects the proposal to garner attention due to its size and perceived impacts to the horseshoe crab harvest and coastal land use. The Rufa red knot was proposed to be listed as threatened in September 2013 with climate change identified as a threat to its survival.

In the next several months, BSEE expects to have its blowout preventer proposed rule ready for review by OIRA. Interest from industry, other nongovernment organizations, and the media is expected.

On September 3, Sec. Jewell will celebrate the 50th Anniversary of the Wilderness Act. Location and details of the event are still being worked out.

On September 5, Sec. Jewell has been invited to speak to the Society for Environmental Journalists annual conference, which is being held this year in New Orleans, LA. The theme of the conference is risk and resilience, with a heavy emphasis on disaster response.

CONFIDENTIAL AND PRIVILEGED

**U.S. Department of the Interior Weekly Cabinet Report
June 13, 2013**

Direct Message to the President

Dear Mr. President –

I know my team has been working hard through the interagency process Rob has been leading, to develop a strategy and content for your speech on climate and energy in the coming weeks. We have many ideas and existing programs that can be reshaped and launched—from a new 20,000MW goal for permitting renewable energy on public lands, to leading mitigation efforts to build green infrastructure along our coasts that will protect us from future storms. We hope to work even more closely with the White House team as the public document is being drafted and these ideas are being fleshed out. Everyone with an interest in these issues, from oil executives to the NGOs, will welcome increased leadership and direction from you on this important issue. We need to keep focused and marshal the whole of federal government to tackle this enormous challenge.

Warmly,

Sally

Announcements - Presidential Priorities

Climate/Energy

On June 20, a House Natural Resources subcommittee will hold an oversight hearing on “Mining in America: Powder River Basin Coal Mining the Benefits and Challenges.” HNR has yet to formally requested a witness from BLM.

Next week, BLM will issue an information memorandum (IM) providing guidance to field staff on approving applications for commingling of oil and gas. The IM is designed to respond to external recommendations that BLM clarify its commingling policy as a step toward improving the accuracy and verifiability of oil and gas production. The IM only impacts new commingling applications, however, industry is expected to oppose changes to the commingling policy.

Announcements - Department Priorities

Next week, Interior will release the annual State of the Birds Report. The report is a product of the State of the Birds working committee formed under the North American Bird Conservation Initiative. This report will focus on the important role that private lands and their land owners play in the health and welfare of America’s birds. Private lands support a huge number of birds at some stage of their life.

Principal Schedules

On June 17, Secretary Jewell (b)(6)

On June 18, Secretary Jewell will meet with CEOs from the conservation community to discuss an urban parks strategy. [Does anyone have more on this one?]

On June 19, Secretary Jewell, Deputy Secretary Hayes, and other senior officials will meet with Reps. Thompson, McNerney, Miller, Matsui, Garamendi, Spier, Eshoo, and Bera to discuss the California Bay Delta Conservation Plan. Later that day, Secretary Jewell will host a goodbye party for Deputy Secretary Hayes who will be leaving the Department at the end of the month.

On June 22, Secretary Jewell will participate in an event commemorating the Battle at Antietam with other Administration officials. Later that day, tentatively, the Secretary will participate in the Great American Backyard Campout. The Campout is designed to remind the public that the outdoors can be found in your own backyard.

Other Announcements

On June 19, Deputy Secretary Hayes and CEQ Chair Sutley will co-host a workshop on mitigation for large infrastructure projects. Sufficiently mitigating for the unavoidable environmental and cultural impacts of large infrastructure projects is a key component of the Administration's effort to make the federal permitting process for these projects smarter, more efficient, and more responsive to the American people with better outcomes for communities and the environment. The workshop will be an opportunity to hear from key partners about how to better plan for mitigation, include mitigation measures early in project development, and ensure that mitigation is effective over the long term.

On June 18, the Washington Monument will be decorated and lit in an evening lighting ceremony on the National Mall. Jon Jarvis, Director of the National Park Service, and David Rubenstein, the businessman who gave \$7.5 million to fund half the repairs on the monument, will be in attendance. The decoration and lighting will be similar to those put in place during a restoration project in 1999, the scaffolding will have an architectural scrim lit from behind a stone-like grid.

On June 18, Deputy Secretary Hayes will hold a press call with Indian Country beat reporters to provide an update on the Land Buy-Back Program for Tribal Nations. The Buy-Back program was created to implement the land consolidation component of the *Cobell* Settlement, which provided a \$1.9 billion fund to purchase fractionated interests in trust or restricted land from willing sellers, at fair market value, within a 10 year period. Hayes will outline next steps and note that Interior is launching pilot projects in the coming months to establish flexible and transparent agreements with several tribal nations to purchase individual interests in highly fractionated trust lands, consolidating ownership of these acres for the beneficial use of the communities.

On June 20, the Senate Committee on Energy and Natural Resources will hold a full committee hearing on “Water Resource Issues in the Klamath River Basin.” Mike Connor will testify on behalf of the Department.

30-60 Day Look-Ahead

The last week of June and first week of July, Secretary Jewell will travel to Nevada and Utah to participate in a variety of events, including: the National Conference on American Indians mid-year conference, the Western Governors Association conference, meetings on the sage grouse, a renewable energy event with Sen. Reid, and an immigration roundtable.

For Great Outdoors America week (the last week of June), Secretary Jewell is planning to participate in two events: on Tuesday, June 25, she will participate in a “conservation conversation” at the Center for American Progress with Richard Louv, author of *‘Last Child in the Woods: Saving our Children from Nature-Deficit Disorder’* that will focus on connecting youth to the great outdoors. On Wednesday, June 26, she will participate in the Great Outdoors Festival on the National Mall that is sponsored by the Outdoors Alliance for Kids.

During the last week in June, USGS will release a national assessment of carbon sequestration potential in the U.S. The USGS assessment team developed geologic models for more than 35 sedimentary basins across the U.S. for which assessments have been completed. The resource that is assessed is the mass of carbon dioxide that can be stored in the technically accessible pore volume of a storage formation. As with all Energy Resources Program energy assessment methodologies, the report was then sent to a panel of experts for external review.

At the end of June, an Executive Order may be issued that addresses the wildlife trafficking crisis that has caused wide-spread slaughter of elephants, rhinos, and other iconic animals in Africa. The goal is to finalize the E.O. so that it is available for a potential Presidential announcement during his upcoming trip to Africa. Deputy Secretary David Hayes has been working with NSS, OMB, the White House, and many Departments to obtain government-wide approval for the EO.

In early June, the FWS anticipates sending to OIRA for review a final rule to list four non-native constrictor snakes as injurious wildlife under the Lacey Act. These species include: reticulated python, DeSchauensee’s anaconda, green anaconda, and the Beni anaconda. In this final rule, the Service will decline to list the boa constrictor under the Lacey Act as initially proposed in 2010. A listing as injurious wildlife will prevent the importation and interstate trade of these four species which threaten the Everglades and other sensitive ecosystems across the United States. DOI has received a letter from the Florida congressional delegation asking FWS to take this action.

In June, the FWS anticipates issuing a final rule to implement the February 28, 2012, Presidential Memorandum that directs the Service to take prompt steps to revise its regulations with regard to the timing of economic analyses for critical habitat designations under the Endangered Species Act.

In June, BLM anticipates issuing the Record of Decision on its proposed land use plan amendments for the West Chocolate Mountains in California to promote development of solar and geothermal energy in the area.

In June, the BLM anticipates sending to OIRA for review a proposed rule to establish a competitive process for leasing public lands for solar and wind energy development.

In June, the Department plans to release a report, "In America's Great Outdoors: An Urban Agenda for the 21st Century." The report will describe the Department's programs and activities impacting metropolitan areas and recommendations for how DOI can advance urban parks, outdoor recreation, and restoring natural systems in cities.

In June, BOEM plans to issue a call for information for Lease Sale 237 in the Chukchi Sea Planning Area, which is scheduled for 2016 under the new Five Year Plan. This is the first step in implementing the new "targeted leasing" model that BOEM is pursuing in the Arctic, and in developing information about whether, and if so under what configuration, to offer leases in the Chukchi Sea in 2016.

In mid to late June, BLM anticipates issuing decisions on two additional renewable projects – a 180 MW solar project in Nevada (FONSI) and a 425 MW wind project in Arizona (ROD).

On July 4, Sec. Jewell is planning to participate in a ceremony in New York City to celebrate the re-opening of the Statue of Liberty.

CONFIDENTIAL AND PRIVILEGED

**U.S. Department of the Interior Weekly Cabinet Report
July 11, 2013**

Direct Message to the President

Dear Mr. President -

(b) (5)

(b)(5)

Warmly,

Sally

Announcements - Presidential Priorities

Climate/Energy

On July 16, the Interior Department expects to join several other key NGS stakeholders (Navajo Nation, Gila River Indian Community, Salt River Project, Central Arizona Water Conservation District, and Environmental Defense Fund) in announcing submission to EPA of an agreement regarding the future of the NGS that includes a proposed rule applying the "Best Available Retrofit Technology" requirements of the Clean Air Act's Regional Haze Rule to NGS. A centerpiece of this agreement is Interior's commitment to carry out the President's 2011 Blueprint for the Secure Energy Future and 2013 Climate Action Plan at NGS. Key elements of the Agreement include: (a) a proposed Reasonable Progress Alternative to BART at NGS (b) an agreement by the Interior Department to study options for replacing the federal share of energy from NGS with Low-emitting Energy; (c) Interior's commitment to secure 24 million tons of CO2 Offset credits no later than December 31, 2035, including the commitment to identify, prioritize and pursue Low-emitting Energy projects to benefit Indian tribes affected by NGS; (d) Interior's commitment to study clean energy options for the future of NGS; (e) a Local Benefit Fund for community improvement projects within 100 miles of NGS or the associated coal mine.

On June 17, USDA and DOI may announce their Western Watershed Enhancement Partnership, a pilot effort in five western states to reduce wildfire risk by removing extra brush and other flammable vegetation around critical areas such as water reservoirs. This Partnership was highlighted in the President's Climate Action Plan.

Principal Schedules

On July 17, Sally Jewell will testify in front of the House Natural Resources Committee. Later that day, the Secretary may tentatively travel to Denver, CO for an event with Secretary Vilsack on the Western Watershed Enhancement Partnership. While in CO, Jewell may also meet with employees and an editorial board.

On July 18 or 19, Secretary Jewell may deliver a speech in San Francisco, CA announcing the Department's new Call to Action Supporting America's Youth. The call to action will be a national effort to enlist millions of young people to play, serve, learn, and work in America's great outdoors.

On July 20 or 21, Secretary Jewell may participate in an Outdoor Nation event in Seattle, WA. Outdoor Nation (ON) is a non-profit founded to reconnect millennials with the outdoors. They host Summits around the country, award grants for outstanding project ideas, lead outdoor

outings, and work with youth all in an effort to mobilize a movement to get our generation outside.

Other Announcements

Next week, Dan Ashe will travel to Gunnison, CO to participate in meetings on the management of the Gunnison sage grouse. While in Colorado, FWS will publish in the Federal Register a six month delay on the final listing and critical habitat determinations for the Gunnison sage-grouse. The FWS has proposed to protect the Gunnison sage-grouse as endangered and is also proposing to designate 1.7 million acres of critical habitat for the species. The ESA allows for one year between proposed and final listing determinations unless there are areas of substantial scientific disagreement, in which case a six month delay is allowed. Based on comments submitted during the comment period, the FWS has determined that a six month delay is warranted. The Gunnison sage-grouse is a species of sage-grouse found south of the Colorado River in Colorado and Utah. The delay will be widely welcomed.

Next week, pending OIRA clearance, FWS may issue a final rule to implement the February 28, 2012 Presidential Memorandum that directs the Service to take prompt steps to revise its regulations with regard to the timing of economic analyses for critical habitat designations under the Endangered Species Act. At the same time, FWS also expects to issue proposed changes to ESA regulations regarding incidental take statements that are aimed at providing increased clarity and consistency in the ESA Section 7 consultation process. Those proposed changes are also currently under review at OIRA.

Next Thursday, the FWS will publish a Federal Register Notice announcing the availability of the Final Environmental Impact Statement on the Experimental Removal of Barred Owls to Benefit Threatened Northern Spotted Owls. The selected alternative involves barred owl removal experiments on four study areas spanning the range of the northern spotted owl in Washington, Oregon, and California. This will be followed with a Record of Decision 30 days later. Barred owl removal would first occur in Fall 2013 on the Hoopa Valley Indian Reservation in California, where extensive barred owl surveys have already been conducted. The earliest date for removal on Federal lands in the other study areas would be Fall 2014. Minimal controversy is expected. The Service received only 75 comments on the DEIS, and it appears that the animal rights community has decided not to engage in this experimental effort.

30-60 Day Look-Ahead

On July 22, the Department may publish a final sale notice for the Virginia offshore wind lease sale in the Federal Register. The auction is planned for September 4 and the notice must be published several weeks before the auction.

On July 26, Secretary Jewell may participate in a groundbreaking event at the St. Louis Arch with Sen. McCaskill.

On July 29, DOI may tentatively host the first meeting of the White House Council on Native American affairs.

On July 31, DOI will auction leases for wind farms of the coast of Rhode Island and Massachusetts. This auction will be the first time offshore wind leases have been competitively sold on the outer continental shelf.

At the end of July, the Secretary will sign the \$300 million White Mountain Apache Water Settlement. The settlement was one of the four Indian water settlements enacted in the 2010 Claims Resolution Act. The agreement provides funding for design and construction of a domestic water delivery system on the Reservation and provides water certainty for the City of Phoenix, the Salt River Project, and other downstream water users.

In July, Interior may release a report on the Department's economic impact that finds Interior's activities supported over 2.3 million American jobs and contributed about \$211 billion in value added and about \$371 billion in economic contributions in fiscal year 2012.

In July, the FWS anticipates sending to OIRA for review a final rule to list four non-native constrictor snakes as injurious wildlife under the Lacey Act. These species include: reticulated python, DeSchaunsee's anaconda, green anaconda, and the Beni anaconda. In this final rule, the Service will decline to list the boa constrictor under the Lacey Act as initially proposed in 2010. A listing as injurious wildlife will prevent the importation and interstate trade of these four species which threaten the Everglades and other sensitive ecosystems across the United States. DOI has received a letter from the congressional delegation asking FWS to take this action.

In July, BLM anticipates issuing the Record of Decision on its proposed land use plan amendments for the West Chocolate Mountains in California to promote development of solar and geothermal energy in the area.

In July, the BLM anticipates sending to OIRA for review a proposed rule to establish a competitive process for leasing public lands for solar and wind energy development.

In July, BOEM plans to issue a call for information for Lease Sale 237 in the Chukchi Sea Planning Area, which is scheduled for 2016 under the new Five Year Plan. This is the first step in implementing the new "targeted leasing" model that BOEM is pursuing in the Arctic, and in developing information about whether, and if so under what configuration, to offer leases in the Chukchi Sea in 2016.

During the week of August 5, Interior plans to participate in the rollout of the Hurricane Sandy Recovery Task Force report, including by opening the \$100 million competition -- mentioned in the President's Climate Action Plan -- for projects that build resilience through the use of natural defense systems.

On August 28, Interior will hold lease sale 233 in New Orleans, LA. The lease sale will offer more than 21 million acres offshore Texas for oil and gas exploration and development and include all available unleased areas in the Western Gulf of Mexico Planning Area.

On August 28, the National Park Service will host the culmination of a 5-day commemoration of the historic 1963 March on Washington and Dr. King's historic address. The Park has issued a permit to the 50th Anniversary Coalition for a ceremony on the National Mall.

CONFIDENTIAL AND PRIVILEGED

**U.S. Department of the Interior Weekly Cabinet Report
August 29, 2013**

Direct Message to the President

Announcements - Presidential Priorities

Climate/Energy

On September 4, Interior will hold the second-ever competitive lease sale for offshore wind. The auction will offer nearly 112,800 acres offshore Virginia for commercial wind energy leasing. DOI's first competitive sale, for areas offshore in Rhode Island and Massachusetts, took place in July and consisted of 11 rounds before determining the provisional winner. That sale received \$3.8M in high bids.

On September 4, Secretary Jewell will visit the Pacific Islands Climate Science Center, one of eight regional Climate Science Centers run by DOI. These centers provide fundamental scientific information, tools, and techniques that land, water, wildlife, and cultural resource managers and other interested parties can apply to anticipate, monitor, and adapt to climate change impacts.

Principal Schedules

On September 2, Secretary Jewell will explore the Arctic National Wildlife Refuge and stay overnight in the refuge with FWS staff.

September 3, Secretary Jewell will hold a press conference in Anchorage, AK.

On September 4, Secretary Jewell will travel to Honolulu, HI where she will meet with Gov. Abercrombie, Sen. Schatz, and Rep. Hanabusa. Later that day, she will deliver the keynote at the Annual Conference of Native Hawaiians. She will also host a town hall meeting with DOI employees working on the island.

On September 5, Secretary Jewell will travel to the Marshall Islands where she will lead the U.S. government delegation to the Pacific Islands Forum (PIF) Post Forum Dialogue to highlight and build upon our historic relations with the peoples and nations of the Pacific. Secretary Jewell's participation in the Dialogue and meetings with Pacific leaders will address a range of issues with Pacific Island nations, including global climate change and natural resource management, sustainable development, economic growth and security. Senior officials from the, U.S. Coast Guard, Departments of State, Defense (United States Pacific Command), Interior, Energy, Health and Human Services, the White House and USAID, will also be present.

On September 6, Secretary Jewell will participate in a wreath laying ceremony at the USS Arizona Memorial in Honolulu, HI and visit the Honouliuli Internment Camp.

Other Announcements

Next week, pending final clearance by OIRA, FWS may issue a notice of availability (NOA) for the draft economic analysis assessing the impact of the proposed critical habitat designation for the Gunnison sage grouse. On January 11, 2013, the FWS has proposed to list the Gunnison sage grouse population as endangered and also proposed a critical habitat designation in southwestern Colorado and southeastern Utah. On July 19, 2013, FWS announced that it would extend the timeline to make final listing and critical habitat determinations until March 31, 2014 and extended the comment period. With this NOA on the draft economic analysis, FWS will again extend the comment period on the proposed listing and critical habitat rules in order to give the public time to consider the draft economic analysis. [ALI – THIS WAS IN LAST WEEK’S REPORT]

30-60 Day Look-Ahead

On September 9 - 11, Interior expects to participate in 9/11 events. In particular, there will be a groundbreaking for the Flight 93 Visitor Center in Shanksville, PA, as well as a remembrance ceremony with Families of Flight 93. A funding announcement may also be made.

On September 9, Secretary Jewell and former Secretary Clinton will host a wildlife trafficking event at the White House.

On September 13, BLM will tentatively issue the final EIS for the 250MW Silver State South solar project in Nevada.

On September 28, Interior will celebrate National Public Lands Day.

In September, NPS will begin drafting a supplemental EIS (tentatively scheduled to be released in March 2013) for its dog management plan for Golden Gate National Recreation Area (GGNRA). The SEIS considers six alternatives for dog management in 22 areas of GGNRA.

In September, BLM will release its final legacy well strategic plan. BLM released a draft strategic plan in May 2013, outlining priorities and actions it will take in the near-term to plug and clean up legacy wells in the National Petroleum Reserve in Alaska (NPR-A).

In September, the FWS anticipates sending to OIRA for review a final rule to list four non-native constrictor snakes as injurious wildlife under the Lacey Act. These species include: reticulated python, DeSchauensee’s anaconda, green anaconda, and the Beni anaconda. In this final rule, the Service will decline to list the boa constrictor under the Lacey Act as initially proposed in 2010. A listing as injurious wildlife will prevent the importation and interstate trade of these four species which threaten the Everglades and other sensitive ecosystems across the United States. DOI has received a letter from the congressional delegation asking FWS to take this action.

In September, the BLM anticipates sending to OIRA for review a proposed rule to establish a competitive process for leasing public lands for solar and wind energy development.

In September, BOEM plans to issue a call for information for Lease Sale 237 in the Chukchi Sea Planning Area, which is scheduled for 2016 under the new Five Year Plan. This is the first step in implementing the new “targeted leasing” model that BOEM is pursuing in the Arctic, and in developing information about whether, and if so under what configuration, to offer leases in the Chukchi Sea in 2016.

In September, DOI may announce its Land Buy-Back program. The Buy-Back Program was created to implement the land consolidation component of the Cobell Settlement, which provided a \$1.9 billion fund to purchase fractionated interests in trust or restricted land from willing sellers, at fair market value, within a 10-year period.

In September, the Secretary may determine that she agrees with USFWS’s determination that nationals of Iceland are engaging in trade of fin and minke whale meat and products that diminishes the effectiveness of CITES. If the Secretary agrees with the Service’s determination, she must certify that fact to the President under the Pelly Amendment. The Pelly Amendment authorizes the President to prohibit imports from any country when the Secretary of the Interior or the Secretary of Commerce has certified that nationals of that country are engaging in trade or taking that diminishes any international program to protect endangered or threatened species. On July 19, 2011, Secretary of Commerce Locke certified to President Obama that nationals of Iceland are conducting whaling activities that diminish the effectiveness of the conservation program of the IWC. This is a similar action.

In September, the FWS will make a few proposed listing and critical habitat determinations that are likely to get attention from the public, Congress and media: the Bi-state population of sage grouse in Nevada and California, the lynx and the Yellow-billed Cuckoo.

In late September, the Department expects to open its \$100M Competitive Coastal Resiliency Grant program and award up to \$200M in Hurricane Sandy Coastal Resilience funding to its internal bureaus for projects.

In late September, the USGS will issue an assessment of the biological carbon sequestration potential of landscapes in the eastern United States.

Subject: Memo on Administration conservation priorities

Laura --

As the Secretary spoke on Thursday morning in the "politicals" meeting about her plan to announce her priorities at DOI, I was reminded of a memo that Jen asked me to put together for her some months ago with thoughts on how the POTUS could develop a plan for advancing a conservation agenda for the second term.

I wanted to share this memo with you. Hopefully it can be helpful as you and the Secretary finalize her priorities for the Department.

Of course, if I can be of any assistance in this regard, please let me know.

Best,

Jim

CONFIDENTIAL AND PRIVILEGED

**U.S. Department of the Interior Weekly Cabinet Report
May 16, 2013**

Direct Message to the President

Dear Mr. President –

Proposed new rules to oversee hydraulic fracturing activities on federally and tribally owned lands were released this week. Based on my previous industry experience and additional research into current technologies and techniques, I am confident these rules strike the right balance between environmental protections and industry interests to economically tap natural gas and oil reserves.

On the hot topic of wildland fire, you have an incredible, cross-cutting resource in the National Interagency Fire Center in Boise, ID. In visiting the facility with Tom Vilsak this week, it is clear that just as fire knows no bounds, your federal agencies also know no boundaries as they work cooperatively to deal with the increasing fire risk that we have, particularly in the West. That said, we do not account for fires as emergencies, unlike hurricanes, floods, earthquakes and the like. This means that when we have a need to fight fires that exceeds our budget (which is based on 10 year averages), it comes directly out of bureau operating budgets. In addition, with growing fire risk, increasing amounts have been directed to fighting fires rather than removing hazardous fuels and remediating burned areas to make them more resilient for the future – this carries high risk for future years and is something we will be working with Congress to correct.

Warmly,

Sally

Announcements - Presidential Priorities

Climate/Energy

On May 20, Deputy Secretary David Hayes will provide remarks via video to a conference jointly hosted by UC-Davis and the Nature Conservancy – *Natural Systems & Climate Change: Strategies for our Future*. During his remarks, he will outline the Department's climate change adaptation initiative and our efforts to identify landscape scale adaptive strategies working with our stakeholders across the country.

On May 21, BSEE is planning to announce steps to establish an independent Ocean Energy Safety Institute to further enhance safe and responsible operations across the offshore oil and gas industry. The Institute will provide a forum for dialogue, shared learning and cooperative research among academia, government, industry and other non-government organizations in offshore-related technologies and activities that ensure safe operations with limited impact to the environment.

Announcements - Department Priorities

Next week, the Bureau of Indian Affairs will issue a draft procedural rule to address recent changes in the law affecting the statute of limitations for claims disputing BIA land-into-trust decisions. The new rule eliminates a 30-day waiting period between the time of BIA's decision and the act of taking land into trust that had been provided to allow administrative appeals of land-into-trust decisions. A recent Supreme Court decision affirmed that parties seeking to dispute these decisions can seek judicial claims for up to six years, eliminating the need for the 30-day waiting period. OIRA has determined the rule is not significant and has declined to review it, but it may get attention from stakeholders who follow land-into-trust issues closely.

Principal Schedules

On May 20, Secretary Jewell will meet with Gov. Herbert, Chair of the Western Governors' Association, in Washington, D.C. They will discuss issues important to the Western Governors' Association, the Governor and the State of Utah including sage grouse conservation and cuts in mineral royalty payments to states due to sequestration.

On May 21, Secretary Jewell will be in meetings in Washington, D.C.

On May 22, Secretary Jewell will meet with Natural Gas CEOs at the Department.

On May 23, Secretary Jewell will travel to Oregon to meet with employees and become familiar with bureaus' activities in the state.

On May 24, Secretary Jewell will meet with Governor Kitzhaber and participate in a kick-off meeting to launch a pilot Pacific Northwest Regional Infrastructure Team, as part of the Department's implementation of the President's Executive Order on facilitating infrastructure projects. The Secretary will then give remarks to the Ducks Unlimited National Convention.

30-60 Day Look-Ahead

In May, the FWS anticipates sending to OIRA for review a final rule to list four non-native constrictor snakes as injurious wildlife under the Lacey Act. These species include: reticulated python, DeSchauensee's anaconda, green anaconda, and the Beni anaconda. In this final rule, the Service will decline to list the boa constrictor under the Lacey Act as initially proposed in 2010. A listing as injurious wildlife will prevent the importation and interstate trade of these four species which threaten the Everglades and other sensitive ecosystems across the United States.

In May, the FWS anticipates sending to OIRA for review a final rule to implement the February 28, 2012, Presidential Memorandum that directs the Service to take prompt steps to revise its regulations with regard to the timing of economic analyses for critical habitat designations under the Endangered Species Act.

In late May, BLM anticipates issuing the Record of Decision on its proposed land use plan amendments for the West Chocolate Mountains in California to promote development of solar and geothermal energy in the area.

In late May, BLM anticipates issuing two Records of Decision for renewable energy projects – a 100 megawatt (MW) solar facility in Arizona and a 300 MW wind project in California as well as two Findings of No Significant Impact (FONSI) for a 350 MW solar project in Nevada and a geothermal project in Nevada.

In late May, the FWS anticipates submitting to the Federal Register two Endangered Species Act findings related to listing of captive-bred species separate from the wild populations. In each, the Service will find that a separate listing-status is not legally allowed under the Act. The first is a 12-month finding under the Endangered Species Act on a petition to delist captive-bred populations of three African antelope raised for hunting on game ranches primarily in Texas. The Service will find that the petition to delist these captive-bred populations separate from the species as a whole is not warranted because a separate listing is not legally allowed under the Act. This decision must be issued by May 31 to comply with a court deadline. In the second, the Service will find that a petition to list all chimpanzees as endangered is warranted as it is not legally allowed for the captive-bred population to have a separate status from the wild population. Currently, chimpanzees found in the wild are listed as endangered while chimpanzees found in captivity are listed as threatened.

In late May, the Department will issue the Final Sale Notice for the first offshore wind development competitive lease sale. This first notice is for a Rhode Island/Massachusetts lease area and will be followed by an auction in late July.

In June, the BLM will issue a Final Environmental Impact Statement (FEIS) evaluating potential impacts of a proposed high voltage transmission line running from east central New Mexico to south of Phoenix, Arizona that will support increased renewable energy development, particularly wind, in the region. The Sunzia project is identified as a high priority project of Administration's Interagency Rapid Response Team for Transmission. A Record of Decision would be issued this fall.

In June, the BLM anticipates sending to OIRA for review a proposed rule to establish a competitive process for leasing public lands for solar and wind energy development.

In June, the Department plans to release a report, "In America's Great Outdoors: An Urban Agenda for the 21st Century". The report will describe the Department's programs and activities impacting metropolitan areas and recommendations for how DOI can advance urban parks, outdoor recreation, and restoring natural systems in cities.

In June, BOEM plans to issue a call for information for Lease Sale 237 in the Chukchi Sea Planning Area, which is scheduled for 2016 under the new Five Year Plan. This is the first step in implementing the new "targeted leasing" model that BOEM is pursuing in the Arctic, and in developing information about whether, and if so under what configuration, to offer leases in the Chukchi Sea in 2016.

Re: White House Weekly report

CONFIDENTIAL AND PRIVILEGED

**U.S. Department of the Interior Weekly Cabinet Report
November 21, 2013**

Direct Message to the President

Dear Mr. President –

Warmly,

Sally

Announcements - Presidential Priorities

Climate/Energy: On November 29, the draft Supplemental EIS for Alpine Satellite for Greater Mooses Tooth Unit No. 1 Development in the NPR-A may be released for public comment.

On December 4, BLM anticipates issuing a Record of Decision for the Ocotillo Sol Solar Project, an 18MW solar project near El Centro, CA. The project would generate enough electricity to power 5,400 homes.

Jobs/Economy:

ACA Implementation:

Immigration:

Principal Schedules

On November 25, Secretary Jewell may travel to Oklahoma to visit the Citizen Band of Potawatomi. In Oklahoma, the Secretary may announce that several more tribes will utilize new authority granted to them through the Helping Expedite and Advance Responsible Tribal Homeownership Act (HEARTH Act). The law restores the authority of Indian tribes to control the leasing of tribal lands by allowing tribal governments to enact their own regulations. DOI must still approve tribal regulations; however, tribes no longer need the approval of the Bureau of Indian Affairs (BIA) to execute a lease of tribal lands. Three tribes are already utilizing this new authority.

On December 2-4, BOEM Director Tommy Beaudreau is an invited keynote speaker at the Latin Oil & Gas Conference in Mexico. The conference will be focused on deepwater issues. He has tentatively accepted the invitation to speak, but is not confirmed. Additional meetings would be held with Mexican government officials. [Ben – do you know if Tommy is going?]

On December 5, the Secretary may travel to a Gulf of Mexico state to announce that the Department, in concert with Administration and State partners, has issued a draft project list allocating up to \$600 million to Gulf of Mexico restoration projects along with an accompanying draft restoration plan and DEIS. The project list and associated documents are expected to be final by next summer. Under an unprecedented agreement with the Administration and affected states, on April 21, 2011, BP agreed to provide up to \$1 billion toward early restoration projects in the Gulf of Mexico to address impacts to natural resources caused by the Deepwater BP oil spill. An initial \$70 million was allocated to fund twelve restoration projects that are nearing completion. The \$600 million will fund projects that have been approved by the 5 affected states and 4 federal agencies and vetted through public meetings in the region. By supporting unprecedented restoration of coastal landscapes and resources, including barrier islands, dunes and coastal marshes, the announcement will make progress on the Administration's promise to make the Gulf whole and the commitment in the Climate Action Plan to improve coastal resilience.

On December 6, the National Christmas Tree lighting ceremony will take place on the Ellipse.

Items of Note

DOI is continuing negotiations with the Oglala Sioux Nation of the Pine Ridge Reservation – the tribe with the greatest amount of fractionated lands in the country— to finalize a cooperative agreement to implement the land consolidation component of the Cobell Settlement, which made \$1.9 billion available to purchase fractionated interests in trust or restricted land from willing sellers within 10 years. Upon purchase, interests will be held in trust for tribal governments for their beneficial use. Finalizing the agreement has been delayed by discussions over contract support costs, but as soon as we are able to complete the agreement, we hope to conduct a signing ceremony or otherwise publicly announce this milestone.

During the week of November 25, FWS expects to issue a final rule under the Bald and Golden Eagle Protection Act (BGEPA) to, among other things, extend permit tenures from 5 to 30 years. A number of improvements have been made to the final rule to improve the FWS eagle program, including monitoring and adaptive management requirements, greater transparency in FWS permit reviews, and commitments to undertake some of the conservation planning that the NGO community would like to see. The final rule is still under review at OIRA, but we expect completion of that review soon. Once issued, we expect mixed reactions from stakeholders – industry will be supportive while NGOs will likely continue to criticize the rule as not stringent enough. We are continuing to reach out to the NGO community to identify ways outside of this particular rule to improve the eagle program.

During the week of November 25, the Bureau of Reclamation may release the completed Santa Ana River Watershed Basin Study. Through the Basin Studies, Reclamation works with States, Indian tribes, non-governmental organizations, other Federal agencies, and local partners to develop a common scientific understanding of water supply challenges and to identify strategies to adapt to and mitigate current or future water supply and demand imbalances, including the impacts of climate change and other stressors on water and power facilities. Funding is provided for comprehensive water studies that define options for meeting future water demands in river

basins in the western United States where imbalances in water supply and demand exist or are projected.

During the next two weeks, NPS will announce the award of \$13 million from the Historic Preservation Fund in grants to States, Territories, and the District of Columbia.

During the next two weeks, the NPS may award \$7.6 million from the Historic Preservation Fund to the state historic preservation offices in Delaware, Maryland, Massachusetts, New Hampshire, Ohio, Pennsylvania, Virginia, and West Virginia.

During the next two weeks, the NPS will conduct the fourth year of the lethal reduction of the white-tailed deer herd in Valley Forge National Historical Park from November 2013 through March 2014. The action addresses the browsing of tree and shrub seedlings by a deer population that had increased over the last two decades and which had prevented native forests regeneration and reduced habitat for a range of native wildlife species.

During the week of December 2, the NPS may release a final EIS on controlling brucellosis in bison in Yellowstone.

On December 2, DOI anticipates that the State of California's Draft BDCP and the associated Draft BDCP Environmental Impact Report/Environmental Impact Statement will be released to the public for formal comment. [is there more to add here on CA's plans?]

On December 3, FWS will publish a revised proposed 4(d) special rule for the Lesser Prairie-Chicken to more specifically exempt take incidental to implementing the range-wide conservation plan recently completed by the five range states. FWS expects high interest from States, Congressional, and locals. [SG – is this still slated to go?]

In early December, the Albuquerque Urban Waters Federal Partnership pilot will hold its first kick-off meeting with local, state, tribal, and federal officials and interest groups, city leaders. The partnership will have poster presentations by senior class High School students about their work on the Valle de Oro National Wildlife Refuge. At this meeting, FWS will also announce the following major milestones: (1) acquisition of 46 more acres for Valle de Oro urban refuge through \$1.14 million from the State of New Mexico; (2) Urban Migratory Bird Treaty City designation for Albuquerque; and (3) Albuquerque is one of 8 new Urban Wildlife Refuge Partnerships. The Secretary may attend the kick-off meeting.

30-60 Day Look-Ahead

On December 11, BLM may issue a Record of Decision for the First Solar Silver State South Project, a 250MW solar project in Nevada.

In the coming weeks, FWS hopes to issue a set of ESA regulatory and policy changes, mostly related to how the agency implements the critical habitat requirements for the statute. OIRA has completed review of 4 out of 5 changes, and discussions about the remaining policy document are ongoing.

In mid-December, BOEM and BSEE expect to send a joint proposed rule to OIRA that addresses offshore oil and gas activities on the Alaska Outer Continental Shelf. The rule will promote safe, responsible, and effective drilling activities and include requirements related to oil spill response plans and operating in the challenging Arctic environment. We expect to set up a detailed pre-briefing for OIRA in the near future.

In mid-December, or perhaps earlier, BOEM expects to issue a Proposed Sale Notice for its next offshore wind competitive lease sale. This auction would be for an area offshore Maryland. The Governor has been very supportive of moving ahead with the lease sale, and we expect positive support in response to the issuance of this notice. We had hoped to announce this sale at the American Wind Energy Association offshore wind conference being held October 21-22, but due to the shutdown, finalizing the notice for release was delayed.

In December, the FWS anticipates sending to OIRA for review a final rule to list four non-native constrictor snakes as injurious wildlife under the Lacey Act. These species include: reticulated python, DeSchauensee's anaconda, green anaconda, and the Beni anaconda. In this final rule, the Service will decline to list the boa constrictor as initially proposed in 2010. A listing as injurious wildlife will prevent the importation and interstate trade of these four species which threaten the Everglades and other sensitive ecosystems in the United States. DOI has received a letter from the Florida congressional delegation asking FWS to take this action.

In December, the Secretary may determine that she agrees with USFWS's determination that nationals of Iceland are engaging in trade of fin and minke whale meat and products that diminishes the effectiveness of CITES. If the Secretary agrees with the Service's determination, she must certify that fact to the President under the Pelly Amendment. The Pelly Amendment authorizes the President to prohibit imports from any country when the Secretary of the Interior or the Secretary of Commerce has certified that nationals of that country are engaging in trade or taking that diminishes any international program to protect endangered or threatened species. On July 19, 2011, Secretary of Commerce Locke certified to President Obama that nationals of Iceland are conducting whaling activities that diminish the effectiveness of the conservation program of the IWC. This is a similar action.

On December 10th, The Secretary has been invited to speak to the Senate Climate Clearinghouse.

By December 16, the FWS is required under a settlement agreement to publish a final critical habitat determination for jaguar. FWS published a proposal to designate critical habitat on August 20, 2012 and a revised proposal on July 1, 2013 incorporating new information. FWS expects the listing to garner local attention.

In January, FWS anticipates proposing to designate critical habitat for the yellow-billed cuckoo across nine states (Arizona, California, Colorado, Idaho, Nevada, New Mexico, Texas, Utah, and Wyoming) as well as publish a notice of availability of a draft economic analysis of the designation. FWS expects this rule to garner attention due to the anticipated size of the designation and perceived impacts to water use.

In December, BOEM could deem the Shell 2014 Exploration Plan (EP) for Arctic activities complete. BOEM received a draft EP from the company in mid-November that it is currently reviewing, and the agency is likely to ask for additional information before deeming the application complete. Once the application is complete, BOEM will release the completed EP to the public for a 30-day public comment period.

In December, the Secretarial Commission on Indian Trust Administration and Reform will host its final meeting. The commission was created by the \$3.4 billion *Cobell* settlement and was charged with evaluating trust reform efforts at the Interior Department. At the meeting, the Commission will release their recommendations to the Secretary.

In December, BLM expects to have a draft rule to establish a competitive process for leasing public lands for solar and wind energy development ready for OIRA review. The rule would establish competitive bidding procedures for lands within designated solar and wind energy development leasing areas, define qualifications for potential bidders, and structure financial arrangements necessary for the process. We expect that renewable energy stakeholders will be very interested in the process that BLM proposes, with industry interested in ensuring that development within solar energy zones is expedited.

In December, BSEE expects to have its blowout preventer proposed rule ready for review by OIRA. We expect interest from industry, other nongovernment organizations, and the media.

In December, Reclamation will release the Upper Rio Grande Western Water Climate Risk Assessment (WWCRAs). WWCRAs, an element of WaterSMART, assess impacts to water supplies and demands on a reconnaissance level and include a baseline risk and impact assessment.

Also in December, Reclamation will release the Lower Rio Grande Basin Study. Reclamation and the Rio Grande Regional Water Authority (RGRWA) and its 53 member entities, in collaboration with the Texas Region M Planning Group, Texas Water Development Board, Texas Commission on Environmental Quality (TCEQ), and International Boundary and Water Commission, are conducting a Basin Study to evaluate the impacts of climate change on water supply and demand imbalances within an eight county region along the U.S./Mexico border in south Texas. Basin Studies, an element of WaterSMART, address basin-wide efforts to evaluate and address the impacts of climate change. Funding is provided for comprehensive water studies that define options for meeting future water demands in river basins in the western United States where imbalances in water supply and demand exist or are projected.

On December 11, Secretary Jewell may visit the Organ Mountains to host a public listening session and hear from the community about their vision to conserve a scenic and significant area of New Mexico.

On December 11-13, the Colorado River Water Users Association will conduct its annual conference in Las Vegas, NV. Secretary Jewell and/or other senior Interior officials will deliver keynote and other remarks. Reclamation will attend and participate in several meetings during the conference.

On December 12, Secretary Jewell plans to attend the Western Governors Association meeting in Nevada, and convene a meeting of the Sage Grouse Task Force which is co-chaired by Governors Mead and Hickenlooper.

In January, Indian Affairs expects to have a draft regulation to reform the federal acknowledgement process for Indian tribes available for OIRA review. The revisions to the existing process are expected to improve transparency, timeliness, efficiency, and flexibility. Tribes and tribal groups have been very supportive of our efforts to reform the process, while some have expressed concerns about reforms making the process 'too easy.'

In December, the Reconnaissance Study for Natural Bridge in Virginia may be released. The study recommends protecting of this historic natural feature in Virginia from potential planned development.

On January 16-17, Secretary Jewell has been invited to lead the U.S. delegation and address the Ministerial Summit of the Group on Earth Observations (GEO) in Geneva, Switzerland. At the 2014 Ministerial Summit, a recommendation will be considered for renewing the charter of GEO for its second decade. There may also be an opportunity to hold an event in Geneva (in coordination with the U.S. Mission) with the International Union for the Conservation of Nature that would provide a global platform for disseminating her landscape conservation vision.

In mid-January, the USGS is planning to release the Eastern Land (Biological) Carbon Sequestration report during a DC-area press conference. With this report, USGS will have completed its assessment of the biological carbon sequestration capacity of the lower 48 states.

In mid-January, the USGS plans to rollout the first-ever interactive map of wind turbine locations in the U.S. and accompanying report, with a possible press event.

In January, NPS expects to issue a revised regulation on collection of natural products for traditional/cultural purposes: The rule would clarify a park superintendent's authority to permit American Indians and Alaska Natives to collect limited quantities of plant and mineral resources in parks for traditional cultural uses, practices, and activities.

In late January (or possibly early February), BOEM is expected to announce an offshore wind PSN for New Jersey. This will be followed by a PSN announcement for the wind energy area offshore Massachusetts that is likely to occur in February.

BOEM will co-host the Alaska Marine Science Symposium on January 20-24 in Anchorage, AK. The mission of this Symposium is to bring together scientists, policymakers, students, educators, media and the public to share research findings focused on Alaska's marine fisheries and ecosystems. It is an important opportunity for BOEM to share results from studies funded under the bureau's Environmental Studies Program.

In January, FWS plans to announce an incidental take permit under the ESA to NiSource in association with a multi-state, multi-species Habitat Conservation Plan (HCP) for the company's

operation and maintenance of its natural gas pipeline in 14 states. The NiSource HCP represents one of the country's most comprehensive endangered species planning efforts by a corporate entity. The plan addresses the conservation needs of 43 federally endangered, threatened or candidate species in 14 eastern and southern states. It was developed with the involvement of state agencies in 14 states, along with federal agencies, tribes, non-governmental organizations, and industry. The incidental take permit will be signed at the end of August and will become effective on January 1, 2014. The NiSource HCP is a model of the flexibility of the Endangered Species Act. It highlights the effectiveness of partnerships and cooperation among public, private and non-governmental interests. The plan demonstrates the potential under the ESA to achieve energy goals and solutions while making science-based management decisions for imperiled species.

In mid-January, BLM is likely to release a Record of Decision for the Stateline Solar project, a proposed 30 megawatt solar project in San Bernadino County, California.

White House weekly report

Walls, Erin <erin_walls@ios.doi.gov>

Wed, Dec 4, 2013 at 4:19 PM

To: **Sally Jewell (b)(7)** <[REDACTED]@ios.doi.gov>

Cc: Laura Davis <laura_davis@ios.doi.gov>, Nicole Buffa <nicole_buffa@ios.doi.gov>, Katherine Rupp <katherine_rupp@ios.doi.gov>

Hi Sally,

Here is a draft of the White House weekly report. Please send us your message to the President.

Thank you,
Erin

 **WH Report 12 5 13.docx**
49K

CONFIDENTIAL AND PRIVILEGED

**U.S. Department of the Interior Weekly Cabinet Report
December 5, 2013**

Direct Message to the President

Dear Mr. President –

Warmly,

Sally

Announcements - Presidential Priorities

Climate/Energy: On December 13, BLM may publish a DEIS analyzing a proposal to drill up to 5,750 new oil and gas wells over a period of 16 years in an existing oil and gas producing area in Duchesne and Uintah counties in UT, known as Monument Butte. The project would encompass nearly 120,000 acres south of Myton, Utah, and would result in approximately 170 miles of new roads accompanied by a similar amount of new pipelines and additional infrastructure. The total new surface disturbance would be approximately 16,129 acres.

On December 11, Reclamation will release the Upper Rio Grande Western Water Climate Risk Assessment (WWCRA). The assessment includes an evaluation of the climate, hydrology and water operations of the upper Rio Grande basin of Colorado and New Mexico and potential impacts associated with climate change. Assistant Secretary Anne Castle will conduct a small media conference in Albuquerque, NM, to release the assessment, and a news release will follow. WWCRA, an element of WaterSMART, assess impacts to water supplies and demands on a reconnaissance level and include a baseline risk and impact assessment.

On December 10, the BLM Nevada State Office will hold a competitive sale of federal lands in the State of Nevada for oil and gas leasing. The sale will include a total of 178 parcels for auction located in the Ely District, containing over 300,000 acres

On December 12, the BLM Eastern States Office will hold a competitive sale of federal lands in AL, LA, MI, and MS for oil and gas leasing. The sale will include a total of 18 parcels for auction, containing over 1,400 acres

Next week, Reclamation may also release the Lower Rio Grande Basin Study. Reclamation and the Rio Grande Regional Water Authority (RGRWA) and its 53 member entities, in collaboration with the Texas Region M Planning Group, Texas Water Development Board, Texas Commission on Environmental Quality (TCEQ), and International Boundary and Water Commission, conducted the Basin Study to evaluate the impacts of climate change on water supply and demand imbalances within an eight county region along the U.S./Mexico border in south Texas. Basin Studies, an element of WaterSMART, address basin-wide efforts to evaluate and address the impacts of climate change. Funding is provided for comprehensive water studies

that define options for meeting future water demands in river basins in the western United States where imbalances in water supply and demand exist or are projected.

Jobs/Economy: On December 10, NPS staff will participate in the “All in for Belle Isle” initial partnership event in Detroit, MI. The event will bring together city, state, and federal partners to discuss efforts to begin a new Belle Isle revitalization plan.

ACA Implementation:

Immigration:

Principal Schedules

On December 11, Secretary Jewell will visit Laguna Elementary School near Albuquerque, NM. The school is located on the Laguna Pueblo reservation and is operated through grants from BIE. The Secretary’s visit will help inform the work of DOI’s Native American Education Study Group, which has been assessing the scope of challenges in Indian education in partnership with the Department of Education, and will soon submit recommendations for improving educational outcomes for all American Indian students.

On December 12, Secretary Jewell will deliver remarks at the Western Governors Association (WGA) meeting in Nevada. Also at WGA, the Secretary will convene a meeting of the Sage Grouse Task Force which is co-chaired by Governors Mead and Hickenlooper.

On December 13, Secretary Jewell will deliver keynote remarks at the Colorado River Water Users Association annual conference in Las Vegas, NV. Other senior officials from DOI will attend the three day conference.

On December 11, Vince Logan will have his confirmation hearing in front of the Senate Indian Affairs Committee. Logan is the nominee for Special Trustee for American Indians.

[OCL – I am hearing there are hearings on buy back?. Hearing on trust commission and report?]

Items of Note

Next week, NPS will announce the award of \$13 million from the Historic Preservation Fund in grants to States, Territories, and the District of Columbia. The NPS may also award \$7.6 million from the Historic Preservation Fund to the state historic preservation offices in Delaware, Maryland, Massachusetts, New Hampshire, Ohio, Pennsylvania, Virginia, and West Virginia. [This was in last week’s weekly]

Next week, DOI will announce a new Bureau of Indian Education Director.

On December 9, the draft EIS/EIR for the Bay Delta Conservation Plan will likely be released by the State of California and the federal family for formal public comment. [more here about expected reactions?]

On December 9, the Albuquerque Urban Waters Federal Partnership pilot will hold its first kick-off meeting with local, state, tribal, and federal officials and interest groups, city leaders. The partnership will have poster presentations by senior class High School students about their work on the Valle de Oro National Wildlife Refuge. At this meeting, FWS will also announce the following major milestones: (1) acquisition of 46 more acres for Valle de Oro urban refuge through \$1.14 million from the State of New Mexico; (2) Urban Migratory Bird Treaty City designation for Albuquerque; and (3) Albuquerque is one of 8 new Urban Wildlife Refuge Partnerships. Assistant Secretary for Water and Science Anne Castle will attend the kick-off meeting.

Next week, pending OIRA review, FWS will publish a revised proposed 4(d) special rule for the Lesser Prairie-Chicken to more specifically exempt take incidental to implementing the range-wide conservation plan recently completed by the five range states. FWS expects high interest from States, Congressional, and locals. [This was in last week's weekly]

30-60 Day Look-Ahead

In December, Rhea Suh may have her confirmation hearing in front of the Senate Environment and Public Works Committee for the Assistant Secretary of Fish, Wildlife, and Parks. This will be the first of two hearings during her nomination process.

On December 16-18, the North American Committee on Cooperation for Wilderness and Protected Areas Conservation (NAWPA) will be holding its annual meeting at the Okefenokee National Wildlife Refuge in Georgia. The Committee is composed of the Heads of 6 land management agencies (FWS, BLM, NPS, USFS, Parks Canada, and the National Commission for Protected Areas (CONANP) of Mexico) and the Office of Environmental Markets, USDA. Dan Ashe and Jon Jarvis will both attend the annual meeting.

In the coming weeks, FWS hopes to issue a set of ESA regulatory and policy changes, mostly related to how the agency implements the critical habitat requirements for the statute. OIRA has completed review of 4 out of 5 changes, and discussions about the remaining policy document are ongoing.

DOI is continuing negotiations with the Oglala Sioux Nation of the Pine Ridge Reservation – the tribe with the greatest amount of fractionated lands in the country— to finalize a cooperative agreement to implement the land consolidation component of the *Cobell* Settlement, which made \$1.9 billion available to purchase fractionated interests in trust or restricted land from willing sellers within 10 years. Upon purchase, interests will be held in trust for tribal governments for their beneficial use. Finalizing the agreement has been delayed by discussions over contract support costs, but as soon as we are able to complete the agreement, we hope to conduct a signing ceremony or otherwise publicly announce this milestone on December 18.

In mid-December, the Bureau of Reclamation may release the completed Santa Ana River Watershed Basin Study. Through the Basin Studies, Reclamation works with States, Indian tribes, non-governmental organizations, other Federal agencies, and local partners to develop a

common scientific understanding of water supply challenges and to identify strategies to adapt to and mitigate current or future water supply and demand imbalances, including the impacts of climate change and other stressors on water and power facilities. Funding is provided for comprehensive water studies that define options for meeting future water demands in river basins in the western United States where imbalances in water supply and demand exist or are projected.

In mid-December, BOEM and BSEE expect to send a joint proposed rule to OIRA that addresses offshore oil and gas activities on the Alaska Outer Continental Shelf. The rule will promote safe, responsible, and effective drilling activities and include requirements related to oil spill response plans and operating in the challenging Arctic environment. We expect to set up a detailed pre-briefing for OIRA in the near future.

On December 17, BOEM expects to issue a Proposed Sale Notice for its next offshore wind competitive lease sale. This auction would be for an area offshore Maryland. The Governor has been very supportive of moving ahead with the lease sale, and we expect positive support in response to the issuance of this notice. We had hoped to announce this sale at the American Wind Energy Association offshore wind conference being held October 21-22, but due to the shutdown, finalizing the notice for release was delayed.

In December, the FWS anticipates sending to OIRA for review a final rule to list four non-native constrictor snakes as injurious wildlife under the Lacey Act. These species include: reticulated python, DeSchaunsee's anaconda, green anaconda, and the Beni anaconda. In this final rule, the Service will decline to list the boa constrictor as initially proposed in 2010. A listing as injurious wildlife will prevent the importation and interstate trade of these four species which threaten the Everglades and other sensitive ecosystems in the United States. DOI has received a letter from the Florida congressional delegation asking FWS to take this action.

In December, the Secretary may determine that she agrees with USFWS's determination that nationals of Iceland are engaging in trade of fin and minke whale meat and products that diminishes the effectiveness of CITES. If the Secretary agrees with the Service's determination, she must certify that fact to the President under the Pelly Amendment. The Pelly Amendment authorizes the President to prohibit imports from any country when the Secretary of the Interior or the Secretary of Commerce has certified that nationals of that country are engaging in trade or taking that diminishes any international program to protect endangered or threatened species. On July 19, 2011, Secretary of Commerce Locke certified to President Obama that nationals of Iceland are conducting whaling activities that diminish the effectiveness of the conservation program of the IWC. This is a similar action.

On December 28, the Endangered Species Act will celebrate its 40th birthday. Associated events may be held to honor the day.

In December, BOEM could deem the Shell 2014 Exploration Plan (EP) for Arctic activities complete. BOEM received a draft EP from the company in mid-November that it is currently reviewing, and the agency is likely to ask for additional information before deeming the

application complete. Once the application is complete, BOEM will release the completed EP to the public for a 30-day public comment period.

In December, the Secretarial Commission on Indian Trust Administration and Reform will host its final meeting. The commission was created by the \$3.4 billion *Cobell* settlement and was charged with evaluating trust reform efforts at the Interior Department. At the meeting, the Commission will release their recommendations to the Secretary.

In December, BLM expects to have a draft rule to establish a competitive process for leasing public lands for solar and wind energy development ready for OIRA review. The rule would establish competitive bidding procedures for lands within designated solar and wind energy development leasing areas, define qualifications for potential bidders, and structure financial arrangements necessary for the process. We expect that renewable energy stakeholders will be very interested in the process that BLM proposes, with industry interested in ensuring that development within solar energy zones is expedited.

In December, BSEE expects to have its blowout preventer proposed rule ready for review by OIRA. We expect interest from industry, other nongovernment organizations, and the media.

In December, Secretary Jewell may visit the Organ Mountains to host a public listening session and hear from the community about their vision to conserve a scenic and significant area of New Mexico.

In December, the Reconnaissance Study for Natural Bridge in Virginia may be released and transmitted to Congress. The study recommends protecting of this historic natural feature in Virginia from potential planned development.

In January, Indian Affairs expects to have a draft regulation to reform the federal acknowledgement process for Indian tribes available for OIRA review. The revisions to the existing process are expected to improve transparency, timeliness, efficiency, and flexibility. Tribes and tribal groups have been very supportive of our efforts to reform the process, while some have expressed concerns about reforms making the process 'too easy.'

On January 16-17, Secretary Jewell has been invited to lead the U.S. delegation and address the Ministerial Summit of the Group on Earth Observations (GEO) in Geneva, Switzerland. At the 2014 Ministerial Summit, a recommendation will be considered for renewing the charter of GEO for its second decade. There may also be an opportunity to hold an event in Geneva (in coordination with the U.S. Mission) with the International Union for the Conservation of Nature that would provide a global platform for disseminating her landscape conservation vision.

In mid-January, the USGS is planning to release the Eastern Land (Biological) Carbon Sequestration report during a DC-area press conference. With this report, USGS will have completed its assessment of the biological carbon sequestration capacity of the lower 48 states.

In mid-January, the USGS plans to rollout the first-ever interactive map of wind turbine locations in the U.S. and accompanying report, with a possible press event.

In January, NPS expects to issue a revised regulation on collection of natural products for traditional/cultural purposes: The rule would clarify a park superintendent's authority to permit American Indians and Alaska Natives to collect limited quantities of plant and mineral resources in parks for traditional cultural uses, practices, and activities.

In late January (or possibly early February), BOEM is expected to announce an offshore wind PSN for New Jersey. This will be followed by a PSN announcement for the wind energy area offshore Massachusetts that is likely to occur in February.

BOEM will co-host the Alaska Marine Science Symposium on January 20-24 in Anchorage, AK. The mission of this Symposium is to bring together scientists, policymakers, students, educators, media and the public to share research findings focused on Alaska's marine fisheries and ecosystems. It is an important opportunity for BOEM to share results from studies funded under the bureau's Environmental Studies Program.

In January, FWS plans to announce an incidental take permit under the ESA to NiSource in association with a multi-state, multi-species Habitat Conservation Plan (HCP) for the company's operation and maintenance of its natural gas pipeline in 14 states. The NiSource HCP represents one of the country's most comprehensive endangered species planning efforts by a corporate entity. The plan addresses the conservation needs of 43 federally endangered, threatened or candidate species in 14 eastern and southern states. It was developed with the involvement of state agencies in 14 states, along with federal agencies, tribes, non-governmental organizations, and industry. The incidental take permit will be signed at the end of August and will become effective on January 1, 2014. The NiSource HCP is a model of the flexibility of the Endangered Species Act. It highlights the effectiveness of partnerships and cooperation among public, private and non-governmental interests. The plan demonstrates the potential under the ESA to achieve energy goals and solutions while making science-based management decisions for imperiled species.

In January (or possibly sooner pending finalization of relevant documents), BLM expects to issue Records of Decision on three solar projects: (1) First Solar Silver State South Project, a 250MW solar project in Nevada; (2) Stateline Solar project, a proposed 30 megawatt solar project in San Bernadino County, California; and (3) Ocotillo Sol Solar Project, an 18MW solar project near El Centro, CA.

In February, the FWS is required under a settlement agreement to publish a final critical habitat determination for the jaguar. FWS published a proposal to designate critical habitat on August 20, 2012 and a revised proposal on July 1, 2013 incorporating new information. FWS expects the designation to garner local attention.

In January, the draft Supplemental EIS for Alpine Satellite for Greater Mooses Tooth Unit No. 1 Development in the NPR-A may be released for public comment.

In January, FWS anticipates proposing to designate critical habitat for the yellow-billed cuckoo across nine states (Arizona, California, Colorado, Idaho, Nevada, New Mexico, Texas, Utah, and

Wyoming) as well as publish a notice of availability of a draft economic analysis of the designation. FWS expects this rule to garner attention due to the anticipated size of the designation and perceived impacts to water use.

(b) (5)

Sec. 3. Outreach. In order to gather information and recommendations and to provide for a transparent process in developing the Quadrennial Energy Review Report, the Task Force shall engage with State and local governments, tribes, large and small businesses, universities, national laboratories, nongovernmental and labor organizations, and other stakeholders and interested parties. The Task Force shall develop an integrated outreach strategy that relies on both traditional meetings and the use of information technology.

Sec. 4. General Provisions. (a) This memorandum shall be implemented consistent with applicable law and subject to the availability of appropriations.

(b) Nothing in this memorandum shall be construed to impair or otherwise affect:

(i) the authority granted by law to any agency, or the head thereof; or

(ii) the functions of the Director of the Office of Management and Budget relating to budgetary, administrative, or legislative proposals.

(c) Nothing in this memorandum shall be construed to require the disclosure of confidential business information or trade secrets, classified information, law enforcement sensitive information, or other information that must be protected in the interest of national security or public safety.

(d) This memorandum is not intended to, and does not, create any right or benefit, substantive or procedural, enforceable at law or in equity by any party against the United States, its departments, agencies, or entities, its officers, employees, or agents, or any other person.

(e) The Director of the Office of Science and Technology Policy is authorized and directed to publish this memorandum in the *Federal Register*.

ACA Implementation:

Immigration:

Principals' Schedules

Next week, Secretary Jewell will participate in a variety of meetings in conjunction with the National Governors Association (WGA) Meeting in Washington, D.C., including: the WGA Breakfast at EPA, a meeting with Gov. Inslee, and a meeting at the White House on the California drought.

On February 24, Secretary Jewell will meet with AFL-CIO President Richard Trumka.

On February 25, Secretary Jewell will meet with Simon Bridges, New Zealand Minister of Energy and Resources.

On February 27, Secretary Jewell will have a working lunch with Leader Pelosi and Sen. Feinstein.

On February 28, Secretary Jewell will host the second official meeting of the White House Council on Native American Affairs. High-level cabinet participation is expected.

On February 25, Bureau of Ocean Energy Management (BOEM) Director Tommy Beaudreau will deliver keynote remarks, along with DOE Deputy Secretary Dan Poneman, at the Fifth Annual Green Power Conference in Boston, MA. Beaudreau will highlight BOEM's offshore wind permitting activities including steps taken to permit the first offshore wind project of the West Coast and recent permitting activities offshore Virginia and Maryland.

On February 24, Fish and Wildlife Service Director Dan Ashe, Director of the National Park Service Jon Jarvis, and Chief of the U.S. Forest Service Tom Tidwell will host a stakeholder meeting to discuss the latest science associated with the Yellowstone grizzly bear. The Interagency Grizzly Bear Committee has sought to reverse a court decision that had overturned a previous attempt to de-list the grizzly under the ESA. The Committee recommended a new de-listing in December 2012.

On February 25, [Dan Ashe Climate Change hearing]

On February 26, [Dan Ashe wildlife trafficking hearing]

On February 27, [M Bean oversight on ESA maybe 316b]

[Ned testifying on management challenges]

Items of Note

Next week, Deputy Secretary Nominee Mike Connor may be scheduled for a confirmation vote on the Senate floor.

Next week, Secretary Jewell may sign a Memorandum of Understanding (MOU) between the National Park Service and the Boys and Girls Clubs of America (BGCA). Collaboration between the NPS and BGCA through this MOU is envisioned to accomplish broad objectives, including: connecting young people and their families to national parks through in-park and virtual programs; creating service-learning opportunities for local BGCA Club members that extend outside of the classroom; and developing an urban, suburban and rural youth outreach strategy that exposes youth to environmental and preservation issues. In 2011, there were nearly 4,000 chartered club facilities serving 2 million registered members.

30-60 Day Look-Ahead

In March, Interior will release an annual economic report on the benefits of National Parks, which is expected to be comparable to previous years. Last year's report indicated that National Parks continued to be important economic engines for local communities, with visitors generating \$30.1 billion in economic activity and supporting 252,000 jobs nationwide in 2011.

In March, NPS expects to issue a revised regulation on collection of natural products for traditional/cultural purposes: The rule would clarify a park superintendent's authority to permit American Indians and Alaska Natives to collect limited quantities of plant and mineral resources in parks for traditional cultural uses, practices, and activities.

In March, FWS plans to announce an incidental take permit under the ESA to NiSource in association with a multi-state, multi-species Habitat Conservation Plan (HCP) for the company's operation and maintenance of its natural gas pipeline in 14 states. The NiSource HCP represents one of the country's most comprehensive endangered species planning efforts by a corporate entity. The plan addresses the conservation needs of 43 federally endangered, threatened or candidate species in 14 eastern and southern states. It was developed with the involvement of state agencies in 14 states, along with federal agencies, tribes, non-governmental organizations, and industry. The incidental take permit will be signed at the end of August and will become effective on January 1, 2014. The NiSource HCP is a model of the flexibility of the Endangered Species Act. It highlights the effectiveness of partnerships and cooperation among public, private and non-governmental interests. The plan demonstrates the potential under the ESA to achieve energy goals and solutions while making science-based management decisions for imperiled species.

In March, the FWS anticipates sending to OIRA for review a final rule to list four non-native constrictor snakes as injurious wildlife under the Lacey Act. These species include: reticulated python, DeSchauensee's anaconda, green anaconda, and the Beni anaconda. In this final rule, the Service will decline to list the boa constrictor as initially proposed in 2010. A listing as injurious wildlife will prevent the importation and interstate trade of these four species which threaten the Everglades and other sensitive ecosystems in the United States. DOI has received two letters from the Florida congressional delegation asking FWS to take this action.

In March, BOEM and BSEE expect to send a joint proposed rule to OIRA that addresses offshore oil and gas activities on the Alaska Outer Continental Shelf. The rule will promote safe, responsible, and effective drilling activities and include requirements related to oil spill response plans and operating in the challenging Arctic environment.

In March, FWS hopes to issue two ESA regulatory and policy changes, mostly related to how the agency implements the critical habitat requirements for the statute.

In March, BSEE expects to have its blowout preventer proposed rule ready for review by OIRA. We expect interest from industry, other nongovernment organizations, and the media.

In March, FWS will publish a proposal to list the African lion as threatened throughout its range under the ESA. FWS will also publish a special rule for African lions requiring that imports of lion trophies receive prior authorization or permits under the ESA. This action may be controversial and attract attention from the animal rights community and the sport-hunting community. Target to the *Federal Register* is Feb. 21, 2014. In March, FWS anticipates proposing to designate critical habitat for the yellow-billed cuckoo across nine states (Arizona, California, Colorado, Idaho, Nevada, New Mexico, Texas, Utah, and Wyoming) as well as publish a notice of availability of a draft economic analysis of the designation. FWS expects this rule to garner attention due to the anticipated size of the designation and perceived impacts to water use. FWS proposed to list the cuckoo as threatened in October 2013.

In March, the FWS must issue a final listing determination for the Lesser Prairie Chicken, the habitat for which spans Texas, Oklahoma, Colorado, New Mexico and Kansas. The Service has proposed a 4(d) rule that when finalized would exempt take that is consistent with a five state conservation plan. Significant attention is anticipated regarding the listing decision.

On March 4, Interior will participate in the roll-out of the Fiscal Year 2015 proposed budget.

On March 6, Secretary Jewell is expected to give remarks at the Intermountain Sustainability Summit at Weber State University in Ogden, UT.

During the week of March 17, BLM will conduct tribal consultation on two proposed rules—the fracking rule and BLM Onshore Order Number 9—in Denver, CO.

On March 18, Secretary Jewell will participate in a Champions of Change Event hosted at the White House to celebrate local leaders across the country who are working to get young people to play, learn, serve and work outdoors in their communities.

On March 19, the Bureau of Ocean Energy Management will hold the Eastern and Central Gulf Lease Sales. The auction will take place at the Superdome in New Orleans, LA. Secretary Jewell is tentatively scheduled to attend.

In April, BOEM is expected to announce an offshore wind Proposed Sale Notice (PSN) for New Jersey. This will be followed by a PSN announcement for the wind energy area offshore Massachusetts that is likely to occur in March.

In April, FWS anticipates proposing to designate critical habitat and draft economic analysis for the Rufa red-knot, a migratory bird that travels from the arctic to the coasts of southern Chile and Argentina through 37 states, Puerto RMarchico and the Virgin Islands. FWS expects the proposal to garner attention due to its size and perceived impacts to the horseshoe crab harvest and coastal land use. The Rufa red knot was proposed to be listed as threatened in September 2013 with climate change identified as a threat to its survival.

EVENT MEMORANDUM FOR THE SECRETARY

PRINCIPALS' MEETING ON QUADRENNIAL ENERGY REVIEW

DATE: February 7, 2014
LOCATION: White House, Room TBD
TIME: 5:00PM – 6:00PM
FROM: Elizabeth Klein, Associate Deputy Secretary (202)513-0561

I. PURPOSE

You will attend the first kick-off meeting of the Quadrennial Energy Review Task Force. The Task Force was established by a Presidential Memorandum issued on Thursday, January 9, 2014. The PM directs the Task Force to prepare a Quadrennial Energy Review that will establish integrated guidance to the Executive Branch to strengthen U.S. energy policy.

II. PARTICIPANTS

- Dan Utech, Special Assistant to the President for Energy and Climate Change
- John Holdren, Director, Office of Science & Technology Policy
- Principal level representatives from the following agencies and offices, which are to be included on the Task Force:
 - Departments of State, Treasury, Defense, Agriculture, Commerce, Labor, Health and Human Services, Housing and Urban Development, Transportation, Energy, Veterans Affairs, and Homeland Security
 - OMB, National Economic Council, National Security Staff, CEQ, EPA, SBA, Army Corps of Engineers, and the National Science Foundation

III. BACKGROUND

On January 9, 2014, the President issued a Presidential Memorandum (PM) directing the preparation of a Quadrennial Energy Review (QER) to help the Federal Government better meet its responsibilities to facilitate affordable, clean, and secure energy and energy services. The initial focus of the QER will be the Nation's infrastructure for transporting, transmitting, and delivering energy, which faces a number of challenges, such as age and capacity, climate change impacts, changing energy technologies, and cyber and physical threats. The QER, which is due to the President by January 15, 2015, and every four years thereafter, is meant to serve as a "roadmap" to help address these challenges.

The PM creates a QER Task Force to be chaired by the Director of the Office of Science and Technology Policy and the Special Assistant to the President for Energy and Climate Change. The Task Force, which will include heads of the agencies and offices listed above (or their designees), is responsible for preparing the QER, which must be informed by input from state and local governments, tribes, industry, NGOs, and other stakeholders. DOE will have primary responsibility for the actual preparation of the QER.

The primary components of the QER are to include: (1) recommendations for Federal energy policy, with the focus of the first report on the Nation's energy infrastructure; (2) actions the Executive Branch can take with respect to energy policy; (3) priorities for research, development, and demonstration programs; and (4) analytical tools and data needed to support further policy development and implementation.

We expect that the first principals' meeting regarding the QER will be to discuss organizing the QER Task Force, how the effort will be staffed primarily from DOE, and the expected involvement of the agencies represented on the Task Force. The White House recently issued an information memo to all of the listed agencies outlining the expected scope of the QER and its emphasis on the nation's energy transmission and distribution systems. The memo also provides some detail about the next steps in the process, including data collection, outreach, and report preparation.

Each agency was also asked to prepare an initial document summarizing how the agency's activities intersect with the energy transmission and distribution focus of the QER. We compiled responses from each of our Assistant Secretary hallways and provided a response to the White House late last week. Both the background memo and our response are attached.

THE WHITE HOUSE

Washington

January 21, 2014

INFORMATIONAL MEMORANDUM TO AGENCIES

FROM: DAN UTECH
JOHN HOLDREN

SUBJECT: QUADRENNIAL ENERGY REVIEW

On January 9, 2014 the President signed a Memorandum directing his Administration to conduct a Quadrennial Energy Review (QER) that leverages robust interagency dialogue and active engagement of external stakeholders in order to build on the Nation's progress toward greater energy and climate security. This first QER will focus on the development of a comprehensive and integrated strategy for the infrastructure involved in transporting, transmitting, and delivering energy (T&D).

Building on the foundation provided in the *President's Blueprint for a Secure Energy Future and Climate Action Plan*, this QER will study the opportunities and challenges that our energy infrastructure faces as a result of transformations in energy supply, markets, and use; issues of aging and capacity; impacts of climate change; and cyber and physical threats. The QER will provide a focused, actionable document with unbiased data and rigorous analysis for policymakers across all sectors.

This memo provides an (I) overview of the QER process and purpose, (II) rationale for why energy T&D is the focus of the first QER, (III) definition of T&D for the purposes of the QER, and (IV) next steps.

I. OVERVIEW OF PROCESS AND PURPOSE

The QER follows a successful approach employed by federal government in integrated planning for other policy areas (e.g., defense policy and the Quadrennial Defense Review) – essentially, laying out an integrated view of the short-, intermediate-, and long-term objectives and providing a strong analytical base for decision-making. In the past, the President's Council of Advisors on Science and Technology (PCAST) and stakeholders, including a bipartisan coalition of Senators, have advocated for adopting this rhythm of multi-year planning for energy policy.

The development of the QER will include broad outreach, including to private sector, state and local governments, labor, non-governmental organizations, and the academic community. The QER will be conducted by an interagency task force that is co-chaired by the heads of the Domestic Policy Council and Office of Science and Technology Policy, and includes all relevant agencies. Although the Department of Energy (DOE) will play a key role in providing analytical support to the QER, each agency with energy infrastructure equities will need to dedicate staff

time to the interagency process to ensure the final report to the President is a whole-of-government product.

As the Presidential Memorandum outlines, the QER will provide an integrated view of, and recommendations for, federal energy policy in the context of economic, environmental, occupational, security, and health and safety priorities; review the adequacy of existing executive and legislative actions, and recommend additional executive and legislative actions as appropriate; assess and recommend priorities for research, development, and demonstration programs to support key goals; and identify analytical tools and data needed to support further policy development and implementation.

Although the first installment of the QER is focused on energy T&D and due to the President by January 2014, future installments of the QER will focus on other key components of the energy value chain. It is currently envisioned that the second installment of the QER will examine end use and supply infrastructures, and the third installment will focus on an entirely different, non-infrastructure related aspect of energy systems (e.g., energy supplies or energy demand).

Between now and the deadline, we anticipate four, overlapping phases of QER development:

Phase 1, Kick-off (2 months: January 2014 – February 2014): Involves establishing the goals, boundaries and other parameters of the QER and setting up the organizational infrastructure for the QER both within DOE and for the interagency process.

Phase 2, Infrastructure Analysis and Engagement (6 months: March 2014 – August 2014): Begins the analysis component of the QER, with a focus on infrastructure, and the formal stakeholder engagement process starts.

Phase 3, Policy Analysis and Engagement (6 months: May 2014 – October, 2014): Continues the analysis period of the QER, with the focus shifting to evaluation of policy alternatives.

Phase 4, Clearance (2 months: November 2014 – December 2014): Includes the interagency review and OMB clearance process and concludes on December 1, 2014, with the release of the final QER document.

II. RATIONALE FOR A FIRST FOCUS ON T&D

Since President Obama took office, domestic oil production has increased more than 50 percent and natural gas production is now the highest it has ever been. Today, America is not just leading the world in energy production but it is also leading the world in energy innovation: Investments in research, development, and deployment have doubled the renewable electricity that we generate, even as the prices of those technologies continue to drop, and advances in energy efficiency are making our energy system cleaner, cheaper, and more reliable. All this change tests an old infrastructure that must keep pace both with issues of aging and the transformations in energy supply, including the need to accommodate inputs from the growing number of alternative sources; climate change; and security. *[Additional background appended.]*

Because of these dramatic changes and significant challenges, the focus of this first QER will be energy infrastructure. In addition, because of the longevity and high costs of energy infrastructure, the sort of multi-year, many-time-horizon view that the QER takes is particularly salient and necessary. After all, the decisions and commitments we make today will strongly influence our energy mix (at a minimum the economics of that mix) for much of the 21st century; in many ways, energy infrastructure is the physical manifestation of the energy options and policy pathways we choose.

Of course, we must be clear-eyed about how difficult it is to transform our energy infrastructure: Even though a modernized, robust, resilient infrastructure is in the public interest, most of the nation’s energy infrastructure assets are owned and operated by the private sector. Much of the related legal, regulatory and policy development, and implementation occurs at state and local levels. And, today, large capital costs and sheer scale of our energy enterprises perpetuate the role of incumbent providers of energy goods and services. Ultimately, however, these factors cut in favor of a QER focused on energy infrastructure – they show why an integrated view that leverages robust interagency dialogue and active engagement of external stakeholders is particularly important in this space.

III. DEFINING T&D

This first QER will specifically focus on the energy T&D – or infrastructure that links energy supplies, carriers, or by-products to intermediate and end users or disposal sites. These vast T&D networks – complex pipeline systems, long-distance power transmission lines, railroads, storage facilities, oil refineries, gas processing facilities, import and export terminals, roads, barges and local distribution networks – help deliver electricity, transportation fuels, and heat to American industry and 300 million consumers every day and provide feedstocks for a large range of products. Some of these supply chains extend far beyond our borders and engage the United States with the rest of the world, both guiding and constraining our foreign policy. Importantly, these networks can strongly influence aspects of energy supply and end use patterns, policies, investments and practices in place for years if not decades.

Fuel/Energy Carrier/Other	T&D Infrastructure Element/System
Electricity	High-voltage transmission lines and substations
	Distribution lines
	All electric grid-related infrastructure, ancillary services, “smart-grid” and metering technologies
	Distributed generation technologies
	Transformer supply chain
	Electricity storage
	Vehicle fueling
Natural Gas	Natural gas gathering lines (production-stage or processing-stage)
	Interstate pipelines
	Natural gas storage facilities
	Processing facilities (including processing at production sites)
	Local distribution systems

	LNG production/storage facilities (including export terminals)
	Vehicle fueling
	LPG distribution
Coal transport	Rail, truck, barge transport
	Export terminals
Oil/Petroleum Products	Crude oil pipelines
	Crude oil and products import and export terminals
	Truck and rail systems that transport crude oil from production sites to ports or refineries
	Oil refineries
	Oil and fuel storage facilities
	Strategic Petroleum Reserve
	Home Heating Oil Reserve
	Regional Product Reserves
	Rail, truck ,barge, pipelines systems to transport refined product to consumers
	Fuel terminals and vehicle fueling stations
Nuclear	Uranium Processing Facilities
	Road/Ship/Rail Transport of Fuel
	Nuclear Waste Transport and Disposal
Solar	Grid Interconnection
	Distributed Infrastructure
Wind	Grid Interconnection
Biomass	Transport of Raw Feedstock
	Feedstock Processing
	Derived Product Transport
	Derived Product Distribution
Biofuel	Vehicle fueling
Hydrogen	Pipelines
	Distribution systems and vehicle fueling stations
Carbon dioxide	Pipelines
	Compressors
	Storage

IV. NEXT STEPS

A principals-level meeting will be convened in early February to discuss the QER. To help prepare for that meeting, we are asking that by February 3rd, each agency to designate a principal staff-level representative for the QER interagency process and submit a document that summarizes how their agency's activities intersect with the energy T&D focus of the first QER. More specifically, this summary should include:

- 1) A description of issues of interest and key agency authorities, programs and activities that are related to the T&D issues and assets described above;
- 2) A description of existing studies, data, and other information that the agency has that might be considered in the initial analysis phase of the QER;
- 3) An description of analytical capabilities that the agency may be able to provide to support analysis of issues of interest;
- 4) A summary of any key stakeholder relationships and outreach opportunities for consideration in development of the QER outreach strategy.

DOE, through its Energy Policy and Systems Analysis Office (EPSA), is in the process of reviewing key statistics for 2008-2012 and analyzing where current energy-related trends and drivers could take the United States. The energy infrastructure baselines are intended to serve as initial snapshots of selected aspects of the national energy infrastructure, related infrastructures, and the suite of policies, programs and investments that affect or are available to support energy infrastructure. DOE will use these baselines to document the status of existing infrastructure, identify relevant trends, important metrics, areas of concern, and potential findings for further investigation. At the first meeting of agency leads meeting, in February, DOE staff will present proposed scenarios and plan of analysis.

APPENDIX: Additional Background on Energy Infrastructure Changes and Challenges

Our energy T&D infrastructure that links energy supplies, carriers, or by-products to intermediate and end users or disposal sites faces a range of challenges in the context of a changing energy landscape. According to the Energy Information Administration, weather related power outages have increased from 5-20 each year in the mid-1990s to 50-100 per year in the last five years.ⁱ Hurricane strength is increasing, posing threats to the nation's 4,000 offshore oil and gas rigs and the hundreds of refineries and power plants located on the Gulf Coast. Demand for water to cool thermoelectric plants is expected to increase at the same time severe drought in the US, particularly in the southwest region, threatens water supplies to meet this need. Truck and train transport, essential for coal, biofuels, and increasingly oil, is greatly impacted by related needs for highway and bridge improvements. Climate change impacts associated with our energy systems contribute to many of these threats to their reliability and resilience.

Cyber-security challenges also pose a threat to energy T & D infrastructure. According to ICS-CERT at the Department of Homeland Security, 53% of all cyber-attacks from October 2012 to May 2013 were on energy installations.ⁱⁱ These threats are growing, enabled by growing corporate connections, standardized communication and operating system protocols, reliance on public telecommunications systems such as the internet, and increased capabilities in demand response communications.

In addition, there are physical threats to energy infrastructure. These include the threat of malevolent attacks, as evidenced by attacks on power substations in California and Arkansas, as well as threats from forces such as electromagnetic pulses and geomagnetic disturbances.

Energy infrastructures (oil, natural gas, biofuels) and other critical infrastructures (telecommunications, water, transportation, emergency services) are increasingly reliant on

electricity. Other critical infrastructures – ports, harbors, and rail – are also essential for the delivery of energy supplies to consumers. The interdependencies of the electric and fuel infrastructures seen in Superstorm Sandy greatly complicated the response and recovery, for example. These interdependencies need to be more fully understood in order to develop comprehensive emergency and prevention protocols.

In addition, changing trends in supplies of energy – such as new sources of renewable energy and unconventional oil and gas supplies – are testing our energy T&D infrastructures. For example, the lack of gas pipeline infrastructures from the Bakken for associated gas has resulted in large-scale flaring of this gas.

Finally, an energy system capable of meeting cost, environmental, reliability, and other goals will depend heavily on a range of new technologies. Inventing, designing, installing, and maintaining these technologies will require a workforce with a wide range of sophisticated skills. Further, over 60 percent of the workers in areas like electric and gas utilities are likely to retire or leave the industry within a decade while the number of young people entering the field is declining. With the right policies in place, however, these problems can be turned into opportunities since the energy industry can create large numbers of well paid jobs for people in many different occupations.

AGENCY INPUT FOR QUADRENNIAL ENERGY REVIEW

Please complete and return to **RSanchez (b)(6)** by February 3, 2014.

AGENCY: Department of the Interior

AGENCY LEAD: Elizabeth Klein, Associate Deputy Secretary

AGENCY QER INPUT:

5) Issues of interest and key agency authorities, programs and activities that are related to the T&D assets described in the QER informational memo above and listed below:

The Department of the Interior (DOI) has significant authorities, programs, and activities that are related to the T&D assets described in the informational memo and listed below. DOI has management responsibility for approximately 20 percent of the Nation's lands, oversees the responsible exploration and development of a variety of energy sources onshore and offshore, is the largest supplier and manager of water in the 17 western states, maintains relationships with over 560 federally recognized tribes, and provides services to more than 1.7 million American Indian and Alaska Native peoples.

Through its bureaus and offices, Interior manages over 400 units of the National Park system, over 560 national wildlife refuges, more than 245 million acres of land in the National System of Public Lands, and reclamation of nearly 322,000 acres of abandoned coal mine sites. Interior also has significant management responsibilities over the nation's natural, cultural, and historic resources through, for example, the U.S. Fish and Wildlife Service and its implementation of the Endangered Species Act and other statutes.

The following provides a (non-exhaustive) overview by individual DOI bureau/office of some of the authorities and activities that are related to the T&D assets.

Bureau of Land Management (BLM):

- BLM administers over 245 million surface acres and 700 million acres of sub-surface mineral estate throughout the nation.
- The agency's land use planning requirements are established by Sections 201 and 202 of the Federal Land Policy and Management Act (FLPMA) of 1976. BLM's Resource Management Plans (RMPs) form the basis for every action and approved use on the public lands and are one of the primary mechanisms for guiding BLM activities.
- BLM has an extensive right-of-way (ROW) program that includes authorizations for pipeline systems, long-distance power transmission and distribution lines, railroads, storage facilities, gas processing facilities, roads and local distribution networks on public lands. BLM administers over 105,000 ROWs for a wide variety of land uses. Each year BLM processes over 2,000 applications for new authorizations, renewals, amendments and assignments.

- Title V of FLPMA (43 U.S.C 1761-1771) and its associated regulations (43 CFR 2800) provide primary authority for approval/administration of roads, energy pipelines (excluding oil and gas), electric transmission lines and substations.
- Section 28 of the Mineral Leasing Act (30 U.S.C 185) and its regulations (43 CFR 2880) provide primary authority for approval/administration of oil and gas pipelines.
- Sections of the Energy Policy Act of 2005 pertain to many programs within the BLM including renewable energy, hydropower, oil and gas leasing, right-of-ways, oil shale, and others.

Bureau of Ocean Energy Management

- BOEM promotes energy independence, environmental protection and economic development through responsible, science-based management of offshore conventional and renewable energy resources on the Outer Continental Shelf (OCS).
- BOEM responsibility most directly related to this complex energy transmission and delivery system includes:
 - The Office of Strategic Resources, responsible for the development of the Five Year OCS Oil and Natural Gas Leasing Program (Five Year Program), oversees assessments of the oil, gas and other mineral resource potential of the OCS; inventories oil and gas reserves and develops production projections; and conducts economic evaluations that ensure the receipt of fair market value by U.S. taxpayers for OCS leases.
 - BOEM issues and administers oil and gas leases, which govern gathering pipelines for transporting product to larger transmission systems, and permits offshore rights of way and use of easements for structures and pipelines associated with larger transmission systems.
 - The Renewable Energy Programs grants leases, easements, and rights-of-way for orderly, safe, and environmentally responsible renewable energy development activities on the OCS, including offshore wind energy, ocean wave energy, and ocean current energy.
- Key regulatory authority for offshore leasing activity is derived from the Outer Continental Shelf Lands Act. In its role in this process, BOEM is required to consult with numerous other Federal and state agencies throughout the process. This includes, but is not limited to BSEE, ONRR, EPA, FWS, NMFS, DOD, FERC, and numerous coastal states, local governments, tribal governments, environmental groups, academic groups, scientific groups and many other mineral development stakeholders.

Bureau of Safety and Environmental Enforcement

- BSEE works to promote safety, protect the environment, and conserve resources offshore through vigorous regulatory oversight and enforcement. The agency's key functions include (1) an Offshore Regulatory Program that develops standards and regulations to enhance operational safety and environmental protection for the exploration and development of offshore oil and natural gas on the OCS; (2) an Oil Spill Response Division that is responsible for developing standards and guidelines for offshore operators' Oil Spill Response Plans for energy development activities on the OCS; and (3) an Environmental Enforcement Division, which provides sustained regulatory oversight focused on compliance by operators with all applicable requirements.

- BSEE's regulatory responsibility includes the review and approval of design and installation plans for DOI pipelines, which are those that are either lease term or ROW pipelines that assist in the production of OCS O&G wells (DOT jurisdictional pipelines are those pipelines that transport hydrocarbons by DOT transporters (such as a pipeline company rather than an oil and gas company)). Any repair or modification plans must also be reviewed and approved by BSEE. The decommissioning of OCS pipelines is also regulated by BSEE.

Office of Surface Mining Reclamation and Enforcement

- OSM is responsible for establishing a nationwide program to protect society and the environment from the adverse effects of surface coal mining operations. OSM works with State and Indian Tribes to assure that citizens and the environment are protected during coal mining and that the land is restored to beneficial use when mining is finished. OSM and its partners are also responsible for reclaiming and restoring lands and water degraded by mining operations before 1977.
- In its beginning, OSM directly enforced mining laws and arranged cleanup of abandoned mine lands. Today, most coal States have developed their own regulatory programs, and OSM's role is oversight and technical support.
- The authority of OSM and the state regulatory authorities arises from the Surface Mining Control and Reclamation Act of 1977 (SMCRA) and the implementing regulations in 30 CFR. State authority also arises from state laws and regulations that meet or exceed the federal standards.
- Some of the larger coal producing mines include within the mine permit boundaries coal load out facilities (truck or rail) which could be part of the coal T&D. These small portions of the coal T&D are covered by environmental protection standards and reclamation bonds to ensure the facility is removed and the land restored after coal mining concludes.

Bureau of Reclamation

- BOR is the largest wholesaler of water in the country, bringing water to more than 31 million people and providing one out of five Western farmers (140,000) with irrigation water for 10 million acres of farmland. The agency is also the second largest producer of hydroelectric power in the western U.S. Its 53 powerplants annually provide more than 40 billion kilowatt hours generating nearly a billion dollars in power revenues and produce enough electricity to serve 3.5 million homes.
- BOR is working on a variety of issues that fall under the elements described in the QER background memo, related to its hydropower operations, including Ancillary Services, Distributed Generation, and Electricity Storage

U.S. Fish and Wildlife Service & the National Park Service

- FWS and NPS have a substantial interest in the siting, review and approval processes, and ongoing operations of energy transmission and distribution infrastructure all across the country. These systems generally have the potential to negatively impact the public lands and resources for which the two agencies are responsible (e.g., National Parks, National Seashores, National Wildlife Refuges, National Historic Parks, Wild and Scenic

Rivers, the National Trails System, endangered species, migratory birds, marine mammals, etc.).

- The principal related authorities of these two agencies include:
 - *National Environmental Policy Act (NEPA)* - 42 U.S.C. § 4371 et seq. FWS and NPS frequently engage in NEPA processes for T&D systems when there are resources under their management responsibility that could be affected.
 - *Endangered Species Act of 1973 (ESA)* - 16 U.S.C. § 1531 et seq. FWS is the principal federal partner responsible for administering the ESA, which aims to protect threatened and endangered species and pursue their recovery as well as identify species at risk in order to prevent ESA listing. As part of that responsibility, FWS has obligations to consult on the potential impacts of a variety of energy T&D related projects on species and their habitat.
 - *Fish and Wildlife Coordination Act (FWCA)* - 16 USC § 661-667e. The FWCA establishes fish and wildlife conservation as a coequal objective of all federally-funded, permitted, or licensed water-related development projects. Under the FWCA, Federal agencies developing such projects must consult with FWS (and NMFS in some instances) and the States regarding fish and wildlife impacts.
 - *National Historic Preservation Act (NHPA)* - 16 U.S.C. § 470 et seq. The NHPA is a procedural statute that requires Federal agencies to take into account the effects of their undertakings on historic properties, particularly those listed or eligible for listing on the National Register of Historic Places, which is administered by NPS.
 - *Clean Water Act (CWA)* - 33 U.S.C. § 1251 et seq. FWS has specific authority under section 404(m) of the CWA to secure mitigation for impacts to aquatic resources nationwide.
 - *NPS Organic Act of 1916 and General Authorities Act of 1970, as amended* - 16 U.S.C. §1, et seq. Under the Organic Act, NPS is charged with managing the units of the National Park System so as to “conserve the scenery and the national and historic objects and the wild life therein and to provide for the enjoyment of the same in such manner and by such means as will leave them unimpaired for the enjoyment of future generations.”
 - *Clean Air Act (CAA)*- §7401, et seq. The statute calls for the prevention and control of air pollution across the country and includes a national goal to “to preserve, protect and enhance the air quality in national parks, national wilderness areas, national monuments, national seashores, and other areas of special national or regional natural, recreational, scenic or historic value” (42 U.S.C. §7470(2)). *National Trails System Act of 1968, as amended* - 16 U.S.C. §§ 1241-1251. The national scenic and historic trails of the Nation are established under this act and managed by NPS. Many of the nation’s scenic and historic trails are negatively impacted by linear energy T&D systems in particular.
 - *Wild and Scenic Rivers Act (WSRA)* - 16 U.S.C. § 1271 et seq. The WSRA establishes a national policy to preserve certain rivers with outstanding scenic, recreational, geologic, fish and wildlife, historic, cultural, or other similar values in a free-flowing condition for the enjoyment of present and future generations. Section 7 prohibits the Federal Energy Regulatory Commission from licensing the construction of hydroelectric facilities on rivers that have been designated as

components of the National Wild and Scenic Rivers System, or which have been authorized by Congress for study as potential additions. Further, the WSRA prohibits other federal agencies from assisting in the construction of any water resources project that would have a direct and adverse effect on a designated river or congressionally authorized study river.

Bureau of Indian Affairs

- BIA provides services directly or through contracts, grants, or compacts to the 566 Federally recognized tribes with a service population of about 1.9 million American Indian and Alaska Natives.
- Programs administered through BIA include natural resource management on trust lands representing 55 million surface acres and 57 million acres of subsurface minerals estates as well as a variety of infrastructure-related responsibilities including road and bridge maintenance and repair, repair of high hazard dams, management of a series of irrigation systems, and the provision of electricity to rural parts of Arizona.
- Given its involvement in energy development on Indian lands, BIA has an important role to play in the development of the QER.

U.S. Geological Survey

- USGS is the nation's largest water, earth, and biological science and civilian mapping agency. It collects, monitors, analyzes, and provides scientific understanding about natural resource conditions, issues, and problems. The diversity of the agency's scientific expertise allows them to carry out large-scale, multi-disciplinary investigations and provide impartial scientific information to resource managers, planners, and customers.
- The agency organizes itself into seven key mission areas: Climate and Land Use Change, Core Science Systems, Ecosystems, Energy & Minerals, Environmental Health, Natural Hazards, and Water.
- Given the breadth of its work and expertise, USGS has a keen interest in multiple facets of the energy T&D issues outlined in the QER informational memo.

6) Existing studies, data, and other information that the agency has that might be considered in the initial analysis phase of the QER:

Bureau of Land Management

- West Wide Energy Corridors – Final Programmatic EIS (PEIS): <http://corridoreis.anl.gov/>
- Rapid Ecoregional Assessments: http://www.blm.gov/wo/st/en/prog/more/Landscape_Approach/reas.html
- Wind Energy Development Final PEIS: http://www.blm.gov/wo/st/en/prog/energy/wind_energy.html
- Solar Energy Development Final PEIS: <http://solareis.anl.gov/>
- Geothermal Energy Development Final PEIS: http://www.blm.gov/wo/st/en/prog/energy/geothermal/geothermal_nationwide.html
- Greater Sage Grouse Plans: <http://www.blm.gov/wo/st/en/prog/more/sagegrouse.html>

Bureau of Ocean Energy Management

- BOEM routinely accesses and/or maintains geographic and owner/operator information related to offshore oil and gas pipeline infrastructure and other related facilities. From the environmental information perspective, BOEM has acquired and maintains information through its environmental studies program. This environmental information specifically addresses such issues as coastal land loss and the impact and/or vulnerability of OCS pipelines related thereto.
- Examples include:
 - The Five Year Program analysis touches on energy transmission and distribution (T&D) issues. In particular, the exploration and development (E&D) scenarios contain estimates of infrastructure requirements to support the leases expected as a result of the Five Year Program. These include estimates upstream pipelines and processing facilities for both oil and gas. The scenarios are used to analyze the cost, economic impact, and environmental impact of that infrastructure.
 - BOEM's Environmental Studies program has pioneered ocean research along the entire Pacific Coast, which includes a multi-agency monitoring program and recently initiated studies to support renewable energy. In Hawaii, BOEM has conducted studies, including the effects of electromagnetic fields from undersea power cables on marine species, which can be used directly related to undersea transmission cables.

Bureau of Safety and Environmental Enforcement

- BSEE's Technical Assessment & Research Program is developing a methodology for assessing the safety of existing pipelines as well as the design and installation of future pipeline systems. Studies and research date back to 1985 and cover a wide range of topics ranging from riser fatigue and damage from hurricanes to the most recent study completed in 2013 that focused on seabed scour due to ice ridges. The study database is available here: <http://www.bsee.gov/Research-and-Training/Technology-Assessment-and-Research/tarprojectcategories/Pipeline-Research/>

Office of Surface Mining Reclamation and Enforcement

- OSM has been developing a pilot phase of geospatial information data system related to current and past coal mining for Kentucky, Tennessee, Virginia and West Virginia.

Bureau of Reclamation

- BOR is exploring opportunities to increase its hydropower capacity and to identify potential to integrate other forms of renewable energy such as wind and solar generation. Pump storage facilities have the potential to contribute to both increased capacity and serve as energy storage for variable renewable energy integration. Reclamation recognizes that there may be potential to develop additional pump storage projects within our existing Federal footprint provided there is both technical and economic feasibility.
- Some investigation has been done into the potential of developing pump storage projects on BOR sites, however none have moved past the assessment study phase and there are no active projects at this time. Reclamation just completed the study *Pumped Storage Evaluation Special Study: Yellowtail, Seminoe, and Trinity Sites Phase 2 Report* (Special Study) and now intends to conduct a larger pumped storage screening study analysis at 60 additional Reclamation reservoirs; this study will be completed in FY 2014.

- As a component of the MOU for Hydropower¹, and recognizing the current national emphasis on renewable energy and its extensive existing water infrastructure systems, Reclamation has produced the *Hydropower Resource Assessment at Existing Reclamation Facilities* (Resource Assessment), and the *Site Inventory and Hydropower Energy Assessment of Reclamation Owned Conduits* to assess hydropower development at existing facilities to contribute to nationwide renewable energy strategies. Both of these studies highlight the potential for small distributed hydropower development.
- Hydropower is a generation resource that is capable of providing ancillary services to support grid stability. Beginning in 2014, Reclamation, the U.S. Army Corps of Engineers (Corps), and the Department of Energy (DOE) will begin working on quantifying the capability of a subset of Reclamation and Corps hydropower and pumped storage hydropower plants to provide ancillary services for a specified range of hydrologic conditions

U.S. Geological Survey

- Unconventional oil and gas development has transformed the country's energy posture in the last decade, sometimes resulting in petroleum infrastructure development, such as pipelines, compressor stations, and treatment plants in regions where none existed before. USGS assessments of undiscovered petroleum resources provide policy makers, land owners and managers, and others with a means to understand where the potential for such infrastructure might be needed in the future.

7) An description of analytical capabilities that the agency may are able to provide to support analysis of issues of interest:

Bureau of Land Management

- BLM has expertise in land use planning for competing land uses, including authorizations for pipeline systems, long-distance power transmission and distribution lines, railroads, storage facilities, gas processing facilities, roads and local distribution networks. Additionally, the agency has broad expertise in environmental reviews and processing applications for land use authorizations.
- BLM is geographically disbursed across 11 western states. Technical experts with longstanding working relationships with regional and local stakeholders involved in planning and permitting use authorizations.

Bureau of Ocean Energy Management

- BOEM has Geographic Information System (GIS) data and expertise that can provide useful spatial analysis and product for any effort to more fully understand offshore oil and gas transportation systems. BOEM also has information and expertise useful to the identification of related offshore oil and gas transportation system owners/operators and financial assurances available from them to cover operational liabilities.
- BOEM could potentially leverage data used for its Five Year Plan (see description above) to support the QER. BOEM has also developed contacts with industry on oil and gas infrastructure that could be helpful on specific T&D issues.

¹ <http://www.usbr.gov/power/SignedHydropowerMOU.pdf>

- Finally, BOEM has environmental data and scientists who can assist in any analysis of environmental impacts or vulnerability related to offshore oil and gas transmission systems.

Bureau of Safety and Environmental Enforcement

- BSEE has specific information on existing pipelines and expertise in appropriate siting and operations issues related to offshore energy T&D systems.

U.S. Fish & Wildlife Service and the National Park Service

- The two Services have substantial analytical capacity to assess the impact of energy transmission and distribution infrastructure on the above-described environmental, historical, and cultural resources.

U.S. Geological Survey

- USGS has extensive capability to model regional petroleum systems, coal fields, uranium, and geothermal resources to predict the amount of resource yet to be found, which relates directly to the future capacity needs of the nation's energy T&D infrastructure.
- USGS also has analytical capabilities to examine the development viability of energy resources under various future economic scenarios, based upon the underlying geologic models. These capabilities are applied to problems such as natural gas stranded on the North Slope of Alaska for lack of transmission pipelines.

8) A summary of any key stakeholder relationships and outreach opportunities for consideration in development of the QER outreach strategy:

Bureau of Land Management

- BLM Resource Advisory Councils, Western Governors Association, Western Electricity Coordinating Council, Western States Lands Commissioners Association, National Association of County Organizations, Edison Electric Institute, Interstate Natural Gas Association of America, American Wind Energy Association, Solar Energy Industries Association, Geothermal Energy Association (GEA), National Rural Electric Power Cooperative, Interwest Energy Alliance, WIRES, National Association of Regulatory Utility Commissioners

Bureau of Ocean Energy Management

- BOEM maintains relations with an extensive list of Federal/state/local/private stakeholders involved in or concerned with the proper management of offshore oil and gas transmission systems. BOEM's past experience and relationship with many of these entities might be a useful component to the future development of the QER outreach strategy.

Office of Surface Mining Reclamation and Enforcement

- OSM's related key stakeholders and partners include the state regulatory authorities in the coal mining states, coal industry, and groups such as the National Mining Association.

Bureau of Reclamation

- BOR's key related stakeholders include reclamation power customers

U.S. Fish & Wildlife Service and the National Park Service

- Environmental, sportsmen, other outdoor recreation interests and historic preservation constituencies are among the stakeholders with which the two Services have longstanding relationships. These constituencies take a strong interest in the effects of energy development, transmission, and distribution infrastructure on the resources and values that the Services are charged with protecting.
- One example of note – FWS has worked closely with the Edison Electric Institute and the its Avian-Powerline Interaction Committee (APLIC) to develop guidelines for how to avoid and minimize negative impacts of power lines on birds and bats, such as collisions and habitat fragmentation.

U.S. Geological Survey

- USGS has strong ties with state geological surveys, recognizing that local knowledge is key to robust assessments of energy resources.

THE WHITE HOUSE

Office of the Press Secretary

For Immediate Release

January 9, 2014

January 9, 2014

MEMORANDUM FOR THE HEADS OF EXECUTIVE DEPARTMENTS AND AGENCIES

SUBJECT: Establishing a Quadrennial Energy Review

Affordable, clean, and secure energy and energy services are essential for improving U.S. economic productivity, enhancing our quality of life, protecting our environment, and ensuring our Nation's security. Achieving these goals requires a comprehensive and integrated energy strategy resulting from interagency dialogue and active engagement of external stakeholders. To help the Federal Government better meet this responsibility, I am directing the undertaking of a Quadrennial Energy Review.

The initial focus for the Quadrennial Energy Review will be our Nation's infrastructure for transporting, transmitting, and delivering energy. Our current infrastructure is increasingly challenged by transformations in energy supply, markets, and patterns of end use; issues of aging and capacity; impacts of climate change; and cyber and physical threats. Any vulnerability in this infrastructure may be exacerbated by the increasing interdependencies of energy systems with water, telecommunications, transportation, and emergency response systems. The first Quadrennial Energy Review Report will serve as a roadmap to help address these challenges.

The Department of Energy has a broad role in energy policy development and the largest role in implementing the Federal Government's energy research and development portfolio. Many other executive departments and agencies also play key roles in developing and implementing policies governing energy resources and consumption, as well as associated environmental impacts. In addition, non-Federal actors are crucial contributors to energy policies. Because most energy and related infrastructure is owned by private entities, investment by and engagement of the private sector is necessary to develop and implement effective policies. State and local policies; the views of nongovernmental, environmental, faith-based, labor, and other social organizations; and contributions from the academic and non-profit sectors are also critical to the development and implementation of effective energy policies.

An interagency Quadrennial Energy Review Task Force, which includes members from all relevant executive departments and agencies (agencies), will develop an integrated review of energy policy that integrates all of these perspectives. It will build on the foundation provided in my Administration's *Blueprint for*

a *Secure Energy Future* of March 30, 2011, and *Climate Action Plan* released on June 25, 2013. The Task Force will offer recommendations on what additional actions it believes would be appropriate. These may include recommendations on additional executive or legislative actions to address the energy challenges and opportunities facing the Nation.

Therefore, by the authority vested in me as President by the Constitution and the laws of the United States of America, I hereby direct the following:

Section 1. Establishing the Quadrennial Energy Review Task Force. (a) There is established the Quadrennial Energy Review Task Force (Task Force), to be co-chaired by the Director of the Office of Science and Technology Policy and the Director of the Domestic Policy Council, which shall include the heads of each of the following, or their designated representatives:

- (i) the Department of State;
- (ii) the Department of the Treasury;
- (iii) the Department of Defense;
- (iv) the Department of the Interior;
- (v) the Department of Agriculture;
- (vi) the Department of Commerce;
- (vii) the Department of Labor;
- (viii) the Department of Health and Human Services;
- (ix) the Department of Housing and Urban Development;
- (x) the Department of Transportation;
- (xi) the Department of Energy;
- (xii) the Department of Veterans Affairs;
- (xiii) the Department of Homeland Security;
- (xiv) the Office of Management and Budget;
- (xv) the National Economic Council;
- (xvi) the National Security Staff;
- (xvii) the Council on Environmental Quality;
- (xviii) the Council of Economic Advisers;
- (xix) the Environmental Protection Agency;
- (xx) the Small Business Administration;
- (xxi) the Army Corps of Engineers;

(xxii) the National Science Foundation; and

(xxiii) such agencies and offices as the President may designate.

(b) The Co-Chairs may invite independent regulatory agencies with energy-related responsibilities, including the Federal Energy Regulatory Commission and the Nuclear Regulatory Commission, to participate in the Task Force, as determined to be appropriate by those agencies.

(c) The Co-Chairs shall regularly convene and preside at meetings of the Task Force and shall determine its agenda. Under the direction of the Co-Chairs, the Task Force shall:

(i) gather ideas and advice from State and local governments, tribes, large and small businesses, universities, national laboratories, nongovernmental and labor organizations, consumers, and other stakeholders and interested parties; and

(ii) coordinate the efforts of agencies and offices related to the development of the Quadrennial Energy Review Report, as described in sections 1 and 2 of this memorandum.

(d) The Secretary of Energy shall provide support to the Task Force, including support for coordination activities related to the preparation of the Quadrennial Energy Review Report, policy analysis and modeling, and stakeholder engagement.

(e) The Task Force shall submit a Quadrennial Energy Review Report to the President every 4 years beginning with a report delivered by January 31, 2015. Intermediate reports and other material may be prepared by the Task Force as required by the President.

Sec. 2. The Quadrennial Energy Review Report. The Task Force shall establish integrated guidance to strengthen U.S. energy policy. Building on the *Blueprint for a Secure Energy Future* and the *Climate Action Plan*, and taking into consideration applicable laws and regulations, the Task Force shall prepare a Quadrennial Energy Review Report that:

(a) provides an integrated view of, and recommendations for, Federal energy policy in the context of economic, environmental, occupational, security, and health and safety priorities, with attention in the first report given to the challenges facing the Nation's energy infrastructures;

(b) reviews the adequacy, with respect to energy policy, of existing executive and legislative actions, and recommends additional executive and legislative actions as appropriate;

(c) assesses and recommends priorities for research, development, and demonstration programs to support key energy-innovation goals; and

(d) identifies analytical tools and data needed to support further policy development and implementation.

Jewell, Sally (b) (6) <rsullivan@ios.doi.gov>

UPDATE ON POTUS/WGA FIRE BRIEFING

1 message

Suh, Rhea <rhea_suh@ios.doi.gov> Thu, Jun 5, 2014 at 7:56 PM
 To: Sally Jewell (b) (6) <rsullivan@ios.doi.gov>, Michael Connor <michael_connor@ios.doi.gov>, Tommy Beaudreau <tommy_beaudreau@ios.doi.gov>
 Cc: Nicole Buffa <nicole_buffa@ios.doi.gov>, James Douglas <James_Douglas@ios.doi.gov>, Kim Thorsen <Kim_Thorsen@ios.doi.gov>, Elizabeth Ossowski <elizabeth_olson@ios.doi.gov>

Sally (and Mike and Tommy):

There have been some edits to the ppt deck for the fire briefing. In an attempt to try to streamline the presentation portion and to maximize the discussion time, the WH has taken Dr. Sullivan out, given those slides to Dr. Holdren, and substituted you and Sec. Vilsack in for the slide Chief Tidwell (USFS) was going to do. There are now 20 mins for presentation and 40 mins for discussion. The reworked run of show in brief is:

2:30pm ET - Opening / Welcome, bringing room to order - Agnew
 2:40pm - President joins and briefing begins
 2:40pm - Fire season and long-term fire projections - Holdren
 2:45pm - Fire response and management - Jewell and Vilsack
 2:55pm - fire fix - Deese
 3-3:40pm - Discussion/Q&A

What is important to note about this is that you now have a little more speaking time, specifically to transition from the preparedness slide and you have to actually queue up the next slide in the transition (meaning within your TPs you have to say, "NEXT SLIDE"). This is all embedded in the script. The good news is the bulk of your comments are unchanged from the version you worked on before you left.

We have been working with CEQ, et al this afternoon and then USDA later to figure out the new script for the preparedness side and it is attached here both as embedded in the ppt and as a separate script doc.

WGA has also gotten back to the WH with a list of items they want to discuss and we have assigned role for responders as indicated below. This list is not comprehensive, but we do suspect that there will be a number of questions about sage grouse habitat and fire, as well as fuels management and capacity.

- 1 - fire borrowing (PRESENTATION COVERS)
- 2 - Federal aerial assets available (including DoD) (PRESENTATION)
- 3 - Staging of aerial assets in West (VILSACK/TIDWELL)
- 4 - States expected to be hardest hit (PRESENTATION)
- 5 - Timing of getting boots on the ground for new insect disease program (TIDWELL)
- 6 - Status of expanding Good Neighbor (VILSACK/TIDWELL)
- 7 - Strategy for developing new stewardship contracts with private sector (VILSACK/TIDWELL)
- 8 - Process/timing of Presidential disaster declarations post-fire (FEMA)
- 9 - Funding and other resources for post-fire recovery to avoid erosion, flooding and impacts to drinking water (JEWELL/KORNZE)

In addition to the new PPT deck (with script imbedded in notes) and the script separately, this email is transmitting briefs on:

- Comparison tables for bi-partisan legislation and the FY 15 Budget.
- * High level talking points on fuels management & historical figures

- Background/status and map for the Funny River AK fire
- Q/A on the suppression budget cap proposal – addresses issues raised by various Senators and Members of Congress
- Comparison table of the fire budget cap legislative proposals

It's a lot of information, so sorry to overload.

We need to submit final edits/changes to CEQ by **10 am tomorrow to meet POTUS's deadlines**. Please let me know if you want to discuss or have any questions, concerns or edits before that point?

Thanks much,
Rhea

REVISED SCRIPT FOR SLIDES 6/7

2:45pm ET - 10 MIN. (2 slides)

Secretary Vilsack (from the Situation Room)

Thank-you, Dr. Holdren

- We are ready for the fire season. As you know, wildland firefighting is a partnership among federal agencies, state agencies and local fire departments. The federal government works closely with your state forestry, tribes, and local governments to responding to fire.
- Federal resources are available to assist with fires across the country whether those fires are on federal, state, tribal or private lands. During the season, we are constantly repositioning resources so that they are available in regions where we expect significant fire activity. Our National Interagency Fire Center is constantly reviewing fire conditions in order to position our resources so that we can respond quickly.
- We are able to catch 98% of all fires before they become large fires. This high success rate protects lives, property and natural resources. Because large fires are very destructive and very expensive, our high rate of success is critically important.
- The chart you see illustrates the resources we are able to supply this season. Our incident management teams are comprised of highly trained and experienced individuals. In addition, we have over 100 hot shot crews that are our elite firefighters. We can provide about 14,000 firefighters, but can add to this number if needed. Last summer, we had nearly 20,000 firefighters on the job during the height of the season.
- Airtankers are an important resource in catching fires while they are still small. This allows us time to get fire crews to the site to put the fire out completely. The Forest Service has made substantial progress over the last year in modernizing our large airtanker fleet. Since last fall, we have added 6 next generation aircraft, (b)(5) we expect to bring on two additional next generation aircraft. (b)(5) (b)(5). We also have 8 C-130 aircraft – or MAFFS – that are provided by the Department of Defense. Early next year, we expect to bring on the first of seven C-130Hs transferred from DoD to the Forest Service. We can also bring on additional aircraft from Canada and Alaska on a call when needed basis.
- We have supplemented our aircraft with over 100 large helicopters that are very effective in delivering retardant to fires as well.
- So far this season, we've responded to almost 23,000 fires across about 750,000 acres. These figures are below the 10 year average though we expect the season to pick up in the coming days and weeks.

- At this point I want to turn to Secretary Jewell for additional thoughts on our preparedness and our joint work to reduce the risks of fires.

[STAY ON SLIDE 6]

Secretary Jewell (from Colorado)

- Thank you, Secretary Vilsack

- NEXT SLIDE

[MOVE TO SLIDE 7]

(b)(5)

(b)(5)

- And with that, I'll turn this back to Secretary Vilsack...

[STAY ON SLIDE 7]

Secretary Vilsack—from the Situation Room

- The top priority of Forest Service is to increase the pace and scale of restoration across our National Forests and other public lands in order to make our forests more resilient to fire, insects and disease, to protect watersheds and wildlife habitat, and to create economic opportunities for rural communities.
- The Forest Service is focusing its efforts on collaborative, large landscape projects that bring together forest industry, environmentalists, and local communities.
 - For example, in Arizona, Forest Service is finalizing a 600,000 acre effort to restore pine forests by treating over 30,000 acres a year with support of diverse stakeholders.
 - In South Dakota, we've launched a project over 200,000 acres.
 - Through our Collaborative Forest Restoration Landscape Program we are supporting nearly two dozen such projects across the country – all with support from conservation groups, forest industry and local communities.
 - Since 2010, these projects have treated hazardous fuels on over 1 million acres and have produced over 800 million board feet of timber and nearly 2 million green tons of woody biomass.
 - Across the National Forest System, we treated over 2.5 million acres last year to improve and sustain watershed health, including removing hazardous fuels. Since 2009, we've increased the sale of forest products and have set ambitious goals to continue that upward trend.
- We're also working across ownership boundaries. In our Joint Chief's Project, NRCS and Forest Service are working together to restore forests across public and private lands using \$30 million this year drawn from both agencies. We're going to expand this work in coming years. We're also working with the Bureau of Reclamation to do the same through the Western Watershed Enhancement Program. We've also enlisted water utilities and other private companies to extend our reach further.
- Enhancing markets for low value timber is critical to bolster restoration efforts. USDA's Rural Development mission area is supporting wood to energy – including nearly \$1 billion in loans since 2009. Forest Service is also supporting these markets.

- USDA has also recently announced that we will target our BCAP program to assist in forest restoration by supporting the harvest and transportation of low value timber from federal and other lands.
- The White House Rural Council the administration has been working to expand the use of wood building materials to support income and employment opportunities in rural America, reduce greenhouse gas emissions and create markets for forest management. A \$2 million prize competition will be launched this summer to demonstrate tall wood building construction using advanced wood products as alternatives to steel and concrete.
- We're also taking advantage of new programs in the Farm Bill. We have worked with many Governors to designate 46 million acres of forests impacted by insects and disease. In these areas, we have new authorities to expedite projects that have broad stakeholder support and that meet environmental safeguards.
 - The Farm Bill also provides permanent authority for stewardship contracting which will allow us to undertake broad restoration projects that benefit watersheds and reduce fire hazard. We believe the new good neighbor authority provided in the Farm Bill will bolster our ability to work with states to restore forests.
- We have been able to increase the amount of work we're getting done in the woods. However, our biggest challenge to further expanding this work is the way we budget for fire. The long term impacts of firefighting expenditures on our budget and the on-going challenge of fire borrowing have hamstrung the Forest Service. Indeed, if there was one thing Congress could do to increase forest restoration on the National Forests, it would be to change the way we pay for firefighting.
- At this point I turn to the Deputy Director of OMB, Brian Deese, to discuss the financial implications of our wildfire situation.

Here's my take on your points:

Jim Douglas
Director, Office of Wildland Fire
US Department of the Interior
202-603-4413 (cell)
202-208-7754 (desk)

On Jun 5, 2014, at 10:14 PM, Sally Jewell (b) (6)@ios.doi.gov wrote:

Rhea -

I did finally get the download before losing signal. Thanks to you and the team for the hard work on this, and to you, in particular, for streamlining the program. Only item 1 below pertains to the presentation, and it is a minor suggestion in Vilsack's remarks.

Here are a few thoughts/questions:

Many thanks!

Sally

Sent from my iPad

On Jun 5, 2014, at 7:56 PM, "Suh, Rhea" <rhea_suh@ios.doi.gov> wrote:

Sally (and Mike and Tommy):

There have been some edits to the ppt deck for the fire briefing. In an attempt to try to streamline the presentation portion and to maximize the discussion time, (b) (5) given those slides to Dr. Holdren, and substituted you and Sec. Vilsack in for the slide Chief Tidwell (USFS) was going to do. There are now 20 mins for presentation and 40 mins for discussion. The reworked run of show in brief is:

2:30pm ET - Opening / Welcome, bringing room to order - Agnew
2:40pm - President joins and briefing begins
2:40pm - Fire season and long-term fire projections - Holdren
2:45pm - Fire response and management - Jewell and Vilsack
2:55pm - fire fix - Deese
3-3:40pm - Discussion/Q&A

What is important to note about this is that you now have a little more speaking time, specifically to transition from the preparedness slide and you have to actually queue up the next slide in the transition (meaning within your TPs you have to say, "NEXT SLIDE"). This is all embedded in the script. The good news is the bulk of your comments are unchanged from the version you worked on before you left.

We have been working with CEQ, et al this afternoon and then USDA later to figure out the new script for the preparedness side and it is attached here both as embedded in the ppt and as a separate script doc.

WGA has also gotten back to the WH with a list of items they want to discuss and we have assigned role for responders as indicated below. This list is not comprehensive, but we do suspect that there will be a number of questions about sage grouse habitat and fire, as well as fuels management and capacity.

- 1 - fire borrowing (PRESENTATION COVERS)
- 2 - Federal aerial assets available (including DoD) (PRESENTATION)
- 3- Staging of aerial assets in West (VILSACK/TIDWELL)
- 4 - States expected to be hardest hit (PRESENTATION)
- 5 - Timing of getting boots on the ground for new insect disease program (TIDWELL)
- 6 - Status of expanding Good Neighbor (VILSACK/TIDWELL)
- 7 - Strategy for developing new stewardship contracts with private sector (VILSACK/TIDWELL)
- 8 - Process/timing of Presidential disaster declarations post-fire (FEMA)
- 9 - Funding and other resources for post-fire recovery to avoid erosion, flooding and impacts to drinking water (JEWELL/KORNZE)

In addition to the new PPT deck (with script imbedded in notes) and the script separately, this email is transmitting briefs on:

- Comparison tables for bi-partisan legislation and the FY 15 Budget.
- * High level talking points on fuels management & historical figures
- Background/status and map for the Funny River AK fire
- Q/A on the suppression budget cap proposal – addresses issues raised by various Senators and Members of Congress
- Comparison table of the fire budget cap legislative proposals

It's a lot of information, so sorry to overload.

We need to submit final edits/changes to CEQ by **10 am tomorrow to meet POTUS's deadlines**. Please let me know if you want to discuss or have any questions, concerns or edits before that point?

Thanks much,
Rhea

REVISED SCRIPT FOR SLIDES - SJ bullets.docx

22K

REVISED SCRIPT FOR SLIDES 6/7

2:45pm ET - 10 MIN. (2 slides)

Secretary Vilsack (from the Situation Room)

Thank-you, Dr. Holdren

- We are ready for the fire season. As you know, wildland firefighting is a partnership among federal agencies, state agencies and local fire departments. The federal government works closely with your state forestry, tribes, and local governments to responding to fire.
- Federal resources are available to assist with fires across the country whether those fires are on federal, state, tribal or private lands. During the season, we are constantly repositioning resources so that they are available in regions where we expect significant fire activity. Our National Interagency Fire Center is constantly reviewing fire conditions in order to position our resources so that we can respond quickly.
- We are able to catch 98% of all fires before they become large fires. This high success rate protects lives, property and natural resources. Because large fires are very destructive and very expensive, our high rate of success is critically important.
- The chart you see illustrates the resources we are able to supply this season. Our incident management teams are comprised of highly trained and experienced individuals. In addition, we have over 100 hot shot crews that are our elite firefighters. We can provide about 14,000 firefighters, but can add to this number if needed. Last summer, we had nearly 20,000 firefighters on the job during the height of the season.
- Airtankers are an important resource in catching fires while they are still small. This allows us time to get fire crews to the site to put the fire out completely. The Forest Service has made substantial progress over the last year in modernizing our large airtanker fleet. Since last fall, we have added 6 next generation aircraft (b)(5) we expect to bring on two additional next generation aircraft. (b)(5) (b)(5). We also have 8 C-130 aircraft – or MAFFS – that are provided by the Department of Defense. Early next year, we expect to bring on the first of seven C-130Hs transferred from DoD to the Forest Service. We can also bring on additional aircraft from Canada and Alaska on a call when needed basis.
- We have supplemented our aircraft with over 100 large helicopters that are very effective in delivering retardant to fires as well.
- So far this season, we've responded to almost 23,000 fires across about 750,000 acres. These figures are below the 10 year average though we expect the season to pick up in the coming days and weeks.

- At this point I want to turn to Secretary Jewell for additional thoughts on our preparedness and our joint work to reduce the risks of fires.

[STAY ON SLIDE 6]

Secretary Jewell (from Colorado)

Thank you, Secretary Vilsack

Underscore importance of intergovernmental capability:

- 52 national interagency management teams
 - Not just federal teams, includes state, local, tribal as well
 - Trained to the same standards
 - Interoperable equipment
 - Fully integrated response organizations
- Critical to have high degree of cooperation/coordination to respond effectively to wildland fires.
- NEXT SLIDE

[MOVE TO SLIDE 7]

- Like wildfire suppression, managing lands to reduce risks of fires is a common and coordinated effort.
- Challenge driven by three principal factors:
 - Changing climate
 - Excessive fuels build-up
 - Increasing settlement in and around fire prone areas - WUI
- National Cohesive Wildland Fire Management Strategy = collaborative framework for addressing challenges, focused on three major goals:
 - Restore and maintain landscapes
 - Fire-adapted communities
 - Wildfire response
- Proactively treating fuels is fundamental to reducing risk
 - Reduces size and severity of fires, improves safety of firefighters, and protects communities and their values
 - Continued investment critical for long term success
 - Much more cost effective than suppression
- Example: Funny River fire still burning on the Kenai Peninsula in Alaska:
 - Previous investment in 6 miles of fuel breaks kept fire out of nearby communities
- Continued investments in fuels management activities critical:
 - Reduce risks to communities,
 - Increase resilience and health of forests and rangelands, not only for people, but for wildlife
 - Protect tribal homelands, cultural and natural resources
 - Support safety of the public and firefighters
- This is a paramount component of our Nation's collective approach to wildfire.
- DOI has spent \$1.9 billion over the last 10 years, treating over 11.6 million acres. Treatments spread across highest priority areas across the country.

- Examples:
 - BLM spending > \$28 million, 62% of their total program, to treat approximately 240,000 acres in sage grouse habitat conservation projects.
 - President's 2015 budget proposal includes new resources for fire management in Indian Country, including \$10 million to support landscape restoration, fulfilling trust responsibility on reserved treaty rights lands.
- Stable and sufficient funding for fuels management means:
 - Steady jobs in rural and tribal communities
 - A good return on investment
- And with that, I'll turn this back to Secretary Vilsack...

[STAY ON SLIDE 7]

Secretary Vilsack—from the Situation Room

- The top priority of Forest Service is to increase the pace and scale of restoration across our National Forests and other public lands in order to make our forests more resilient to fire, insects and disease, to protect watersheds and wildlife habitat, and to create economic opportunities for rural communities.
- The Forest Service is focusing its efforts on collaborative, large landscape projects that bring together forest industry, environmentalists, and local communities.
 - For example, in Arizona, Forest Service is finalizing a 600,000 acre effort to restore pine forests by treating over 30,000 acres a year with support of diverse stakeholders.
 - In South Dakota, we've launched a project over 200,000 acres.
 - Through our Collaborative Forest Restoration Landscape Program we are supporting nearly two dozen such projects across the country – all with support from conservation groups, forest industry and local communities.
 - Since 2010, these projects have treated hazardous fuels on over 1 million acres and have produced over 800 million board feet of timber and nearly 2 million green tons of woody biomass.
 - Across the National Forest System, we treated over 2.5 million acres last year to improve and sustain watershed health, including removing hazardous fuels. Since 2009, we've increased the sale of forest products and have set ambitious goals to continue that upward trend.

- We're also working across ownership boundaries. In our Joint Chief's Project, NRCS and Forest Service are working together to restore forests across public and private lands using \$30 million this year drawn from both agencies. We're going to expand this work in coming years. We're also working with the Bureau of Reclamation to do the same through the Western Watershed Enhancement Program. We've also enlisted water utilities and other private companies to extend our reach further.
- Enhancing markets for low value timber is critical to bolster restoration efforts. USDA's Rural Development mission area is supporting wood to energy – including nearly \$1 billion in loans since 2009. Forest Service is also supporting these markets.
 - USDA has also recently announced that we will target our BCAP program to assist in forest restoration by supporting the harvest and transportation of low value timber from federal and other lands.
 - The White House Rural Council the administration has been working to expand the use of wood building materials to support income and employment opportunities in rural America, reduce greenhouse gas emissions and create markets for forest management. A \$2 million prize competition will be launched this summer to demonstrate tall wood building construction using advanced wood products as alternatives to steel and concrete.
- We're also taking advantage of new programs in the Farm Bill. We have worked with many Governors to designate 46 million acres of forests impacted by insects and disease. In these areas, we have new authorities to expedite projects that have broad stakeholder support and that meet environmental safeguards.
 - The Farm Bill also provides permanent authority for stewardship contracting which will allow us to undertake broad restoration projects that benefit watersheds and reduce fire hazard. We believe the new good neighbor authority provided in the Farm Bill will bolster our ability to work with states to restore forests.
- We have been able to increase the amount of work we're getting done in the woods. However, our biggest challenge to further expanding this work is the way we budget for fire. The long term impacts of firefighting expenditures on our budget and the on-going challenge of fire borrowing have hamstrung the Forest Service. Indeed, if there was one thing Congress could do to increase forest restoration on the National Forests, it would be to change the way we pay for firefighting.
- At this point I turn to the Deputy Director of OMB, Brian Deese, to discuss the financial implications of our wildfire situation.

EVENT MEMORANDUM FOR THE SECRETARY

FIRE BRIEFING

DATE: June 9, 2014
LOCATION: The Broadmoor – West Terrace/West Ballroom B
TIME: 12:30PM MDT – 1:30PM MDT
FROM: Rhea Suh, AS-PMB (202) 208-1927; Amy Holley, COS PMB, (202) 208-6011

I. PURPOSE

You will brief the President, White House officials, and Governors on 2014 fire season preparedness, outlook, impacts on climate change, and fire budget proposal.

II. PARTICIPANTS

Colorado:

- Butch Otter, Governor (ID)
- Jack Dalrymple, Governor (ND)
- Steve Bullock, Governor (MT)
- Matthew Mead, Governor (WY)
- John Hickenlooper, Governor (CO)
- Jan Brewer, Governor (AZ)
- Dennis Daugaard, Governor (SD)
- Gary Herbert, Governor (UT)
- Brian Sandoval, Governor (NV)
- Christy Clark, Premier, Province of British Columbia
- Robert Bonnie, Undersecretary, USDA
- Kathryn Sullivan, Under Secretary, Commerce/NOAA

VTC:

- Secretary Tom Vilsack, USDA
- Director Fugate, FEMA
- Secretary Hagel, DoD
- Dr. Kathy Sullivan, NOAA
- John Podesta
- David Agnew, IGA
- Mike Boots, CEQ
- Dr. John Holdren, OSTP
- Sally Ericsson, OMB
- McKalip, DPC
- Rhea Suh, DOI

III. AGENDA

- 12:30pm – AGNEW (VTC) - Welcome Remarks and Introductions in the Situation Room.
- 12:35pm – HICKENLOOPER Introductions in Colorado
- 12:40pm – POTUS arrives in Situation Room and gives introductory remarks
- 12:45pm – AGNEW prompts HOLDREN to begin briefing
- 12:45pm – HOLDREN (VTC) presents slides on fire season outlook and climate links
- 12:50pm – VILSACK (VTC) briefs on USDA fire response capabilities
- 12:55pm – **You** brief on DOI fire response, and with VILSACK discuss Federal efforts to manage fire potential.
- 1:00pm – DEESE (VTC) presents budget slide
- 1:05pm – Presentation Concludes / POTUS offers brief remarks and opens discussion
- 1:10pm – POTUS hands off to HICKENLOOPER in Colorado
- 1:15pm – HICKENLOOPER gives brief remarks
- 1:20pm – AGNEW moderates Question and Answer from the Situation Room
- 1:40pm – Wildfire Briefing Concludes

IV. ATTACHMENT

- Briefing Slides
- Comparison Table
- Fuels Management Talking Points
- Funny River Fire Background
- Funny River Map
- Information Cover Memo
- Q&A on Suppression
- Revised Script for Slides (*below and uploaded separately to Google Drive*)

REVISED SCRIPT FOR SLIDES 6/7

2:45pm ET - 10 MIN. (2 slides)

Secretary Vilsack (from the Situation Room)

Thank-you, Dr. Holdren

- We are ready for the fire season. As you know, wildland firefighting is a partnership among federal agencies, state agencies and local fire departments. The federal government works closely with your state forestry, tribes, and local governments to responding to fire.
- Federal resources are available to assist with fires across the country whether those fires are on federal, state, tribal or private lands. During the season, we are constantly repositioning resources so that they are available in regions where we expect significant fire activity. Our National Interagency Fire Center is constantly reviewing fire conditions in order to position our resources so that we can respond quickly.
- We are able to catch 98% of all fires before they become large fires. This high success rate protects lives, property and natural resources. Because large fires are very destructive and very expensive, our high rate of success is critically important.
- The chart you see illustrates the resources we are able to supply this season. Our incident management teams are comprised of highly trained and experienced individuals. In addition, we have over 100 hot shot crews that are our elite firefighters. We can provide about 14,000 firefighters, but can add to this number if needed. Last summer, we had nearly 20,000 firefighters on the job during the height of the season.
- Airtankers are an important resource in catching fires while they are still small. This allows us time to get fire crews to the site to put the fire out completely. The Forest Service has made substantial progress over the last year in modernizing our large airtanker fleet. Since last fall, we have added 6 next generation aircraft, (b)(5) (b)(5) we expect to bring on two additional next generation aircraft. (b)(5) (b)(5). We also have 8 C-130 aircraft – or MAFFS – that are provided by the Department of Defense. Early next year, we expect to bring on the first of seven C-130Hs transferred from DoD to the Forest Service. We can also bring on additional aircraft from Canada and Alaska on a call when needed basis.
- We have supplemented our aircraft with over 100 large helicopters that are very effective in delivering retardant to fires as well.
- So far this season, we've responded to almost 23,000 fires across about 750,000 acres. These figures are below the 10 year average though we expect the season to pick up in the coming days and weeks.

- At this point I want to turn to Secretary Jewell for additional thoughts on our preparedness and our joint work to reduce the risks of fires.

[STAY ON SLIDE 6]

Secretary Jewell (from Colorado)

Thank you, Secretary Vilsack

Underscore importance of intergovernmental capability:

- 52 national interagency management teams
 - Not just federal teams, includes state, local, tribal as well
 - Trained to the same standards
 - Interoperable equipment
 - Fully integrated response organizations
- Critical to have high degree of cooperation/coordination to respond effectively to wildland fires.
- NEXT SLIDE

[MOVE TO SLIDE 7]

- Like wildfire suppression, managing lands to reduce risks of fires is a common and coordinated effort.
- Challenge driven by three principal factors:
 - Changing climate
 - Excessive fuels build-up
 - Increasing settlement in and around fire prone areas - WUI
- National Cohesive Wildland Fire Management Strategy = collaborative framework for addressing challenges, focused on three major goals:
 - Restore and maintain landscapes
 - Fire-adapted communities
 - Wildfire response
- Proactively treating fuels is fundamental to reducing risk

- Reduces size and severity of fires, improves safety of firefighters, and protects communities and their values
- Continued investment critical for long term success
- Much more cost effective than suppression
- Example: Funny River fire still burning on the Kenai Peninsula in Alaska:
 - Previous investment in 6 miles of fuel breaks kept fire out of nearby communities
- Continued investments in fuels management activities critical:
 - Reduce risks to communities,
 - Increase resilience and health of forests and rangelands, not only for people, but for wildlife
 - Protect tribal homelands, cultural and natural resources
 - Support safety of the public and firefighters
- This is a paramount component of our Nation's collective approach to wildfire.
- DOI has spent \$1.9 billion over the last 10 years, treating over 11.6 million acres. Treatments spread across highest priority areas across the country.
- Examples:
 - BLM spending > \$28 million, 62% of their total program, to treat approximately 240,000 acres in sage grouse habitat conservation projects.
 - President's 2015 budget proposal includes new resources for fire management in Indian Country, including \$10 million to support landscape restoration, fulfilling trust responsibility on reserved treaty rights lands.
- Stable and sufficient funding for fuels management means:
 - Steady jobs in rural and tribal communities
 - A good return on investment
- And with that, I'll turn this back to Secretary Vilsack...

[STAY ON SLIDE 7]

Secretary Vilsack—from the Situation Room

- The top priority of Forest Service is to increase the pace and scale of restoration across our National Forests and other public lands in order to make our forests more resilient to

fire, insects and disease, to protect watersheds and wildlife habitat, and to create economic opportunities for rural communities.

- The Forest Service is focusing its efforts on collaborative, large landscape projects that bring together forest industry, environmentalists, and local communities.
 - For example, in Arizona, Forest Service is finalizing a 600,000 acre effort to restore pine forests by treating over 30,000 acres a year with support of diverse stakeholders.
 - In South Dakota, we've launched a project over 200,000 acres.
 - Through our Collaborative Forest Restoration Landscape Program we are supporting nearly two dozen such projects across the country – all with support from conservation groups, forest industry and local communities.
 - Since 2010, these projects have treated hazardous fuels on over 1 million acres and have produced over 800 million board feet of timber and nearly 2 million green tons of woody biomass.
 - Across the National Forest System, we treated over 2.5 million acres last year to improve and sustain watershed health, including removing hazardous fuels. Since 2009, we've increased the sale of forest products and have set ambitious goals to continue that upward trend.
- We're also working across ownership boundaries. In our Joint Chief's Project, NRCS and Forest Service are working together to restore forests across public and private lands using \$30 million this year drawn from both agencies. We're going to expand this work in coming years. We're also working with the Bureau of Reclamation to do the same through the Western Watershed Enhancement Program. We've also enlisted water utilities and other private companies to extend our reach further.
- Enhancing markets for low value timber is critical to bolster restoration efforts. USDA's Rural Development mission area is supporting wood to energy – including nearly \$1 billion in loans since 2009. Forest Service is also supporting these markets.
 - USDA has also recently announced that we will target our BCAP program to assist in forest restoration by supporting the harvest and transportation of low value timber from federal and other lands.
 - The White House Rural Council the administration has been working to expand the use of wood building materials to support income and employment opportunities in rural America, reduce greenhouse gas emissions and create markets for forest management. A \$2 million prize competition will be launched

this summer to demonstrate tall wood building construction using advanced wood products as alternatives to steel and concrete.

- We're also taking advantage of new programs in the Farm Bill. We have worked with many Governors to designate 46 million acres of forests impacted by insects and disease. In these areas, we have new authorities to expedite projects that have broad stakeholder support and that meet environmental safeguards.
 - The Farm Bill also provides permanent authority for stewardship contracting which will allow us to undertake broad restoration projects that benefit watersheds and reduce fire hazard. We believe the new good neighbor authority provided in the Farm Bill will bolster our ability to work with states to restore forests.
- We have been able to increase the amount of work we're getting done in the woods. However, our biggest challenge to further expanding this work is the way we budget for fire. The long term impacts of firefighting expenditures on our budget and the on-going challenge of fire borrowing have hamstrung the Forest Service as well as the Department of the Interior. Indeed, if there was one thing Congress could do to increase forest restoration on the National Forests and throughout of both of our Departments it would be to change the way we pay for firefighting.
- At this point I turn to the Deputy Director of OMB, Brian Deese, to discuss the financial implications of our wildfire situation.

Sally--

At last we have some final products. Nothing you have worked on has changed at all. We are still waiting for the latest fire weather so that slide will be updated on Sunday. Other than that, here are all the materials for Monday afternoon's briefing with POTUS. Zaina has also uploaded everything so you can access it that way as well.

- 1) Slide deck
- 2) Presentation outline
- 3) Resource sheet "leave behind"
- 4) Agenda
- 5) Run of Show script

Thanks and as always, let us know if you have any questions.

Rhea

President & Western Governors Wildfire Briefing

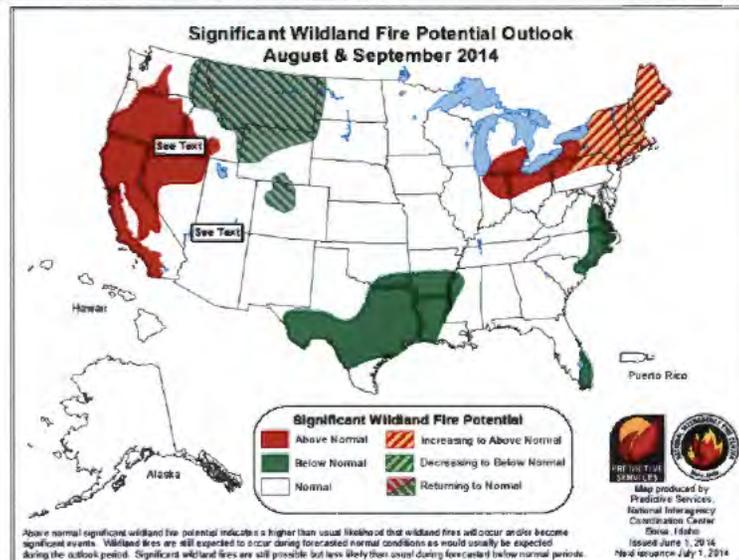

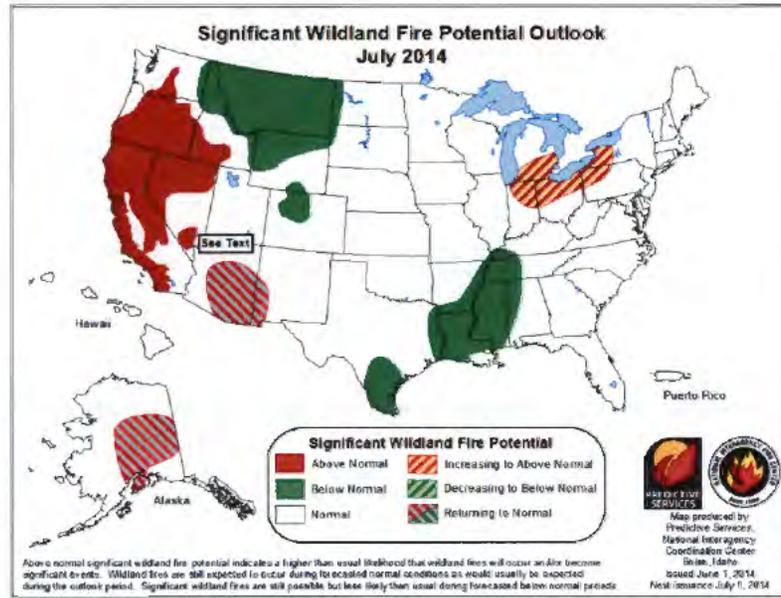

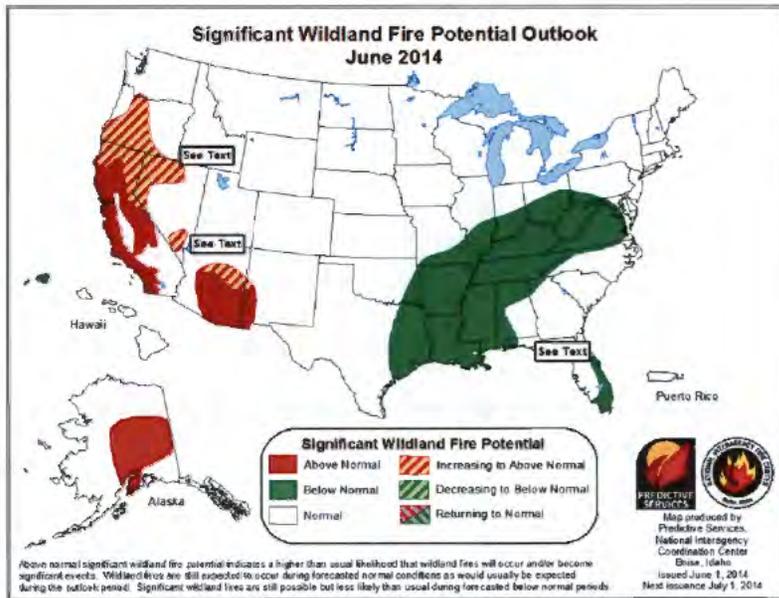

June 9, 2014
2:30PM EST

- I. Current and Long-term Predictions
- II. Wildfire Response and Managing Resilience
- III. Wildfire Budgeting

Drought Conditions and Outlook

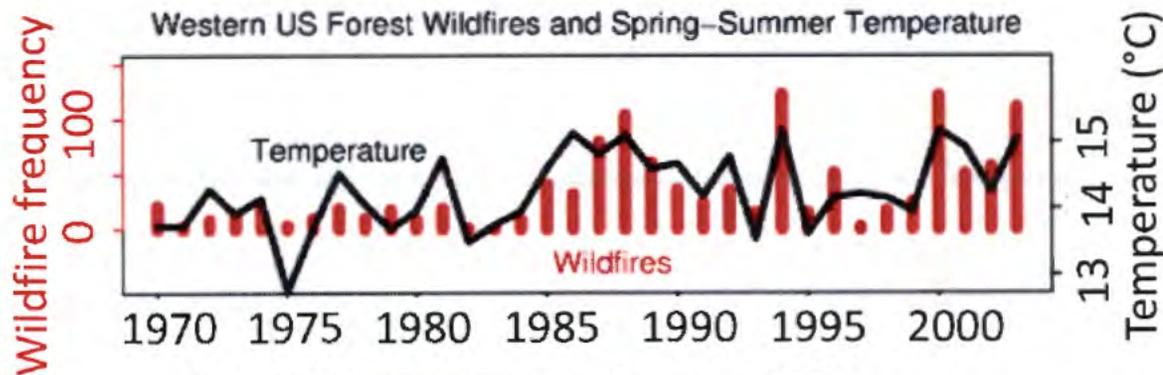

Fire Potential Outlook

(b)(5)

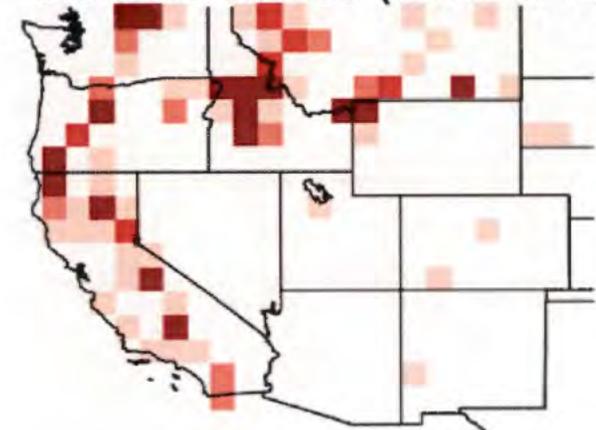

Long-term Wildfire Trends

Observed wildfire frequency is tied to spring-summer temperatures

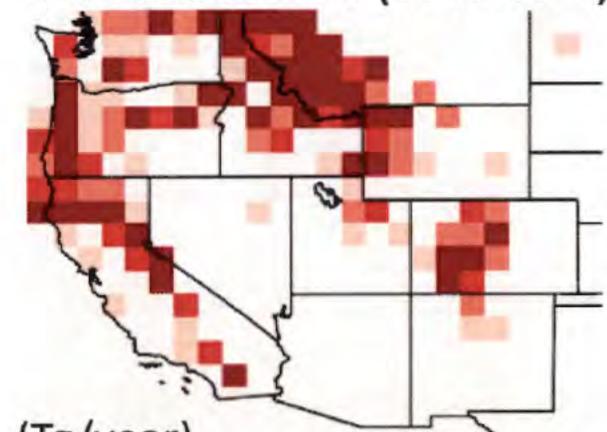

Source: Westerling *et al.* Science. 2006.

Observed average annual biomass burned (1980-2004)

Projected average annual biomass burned (2046-2065)

(Tg/year)

Source: Yue *et al.* Atmospheric Environment. 2013.

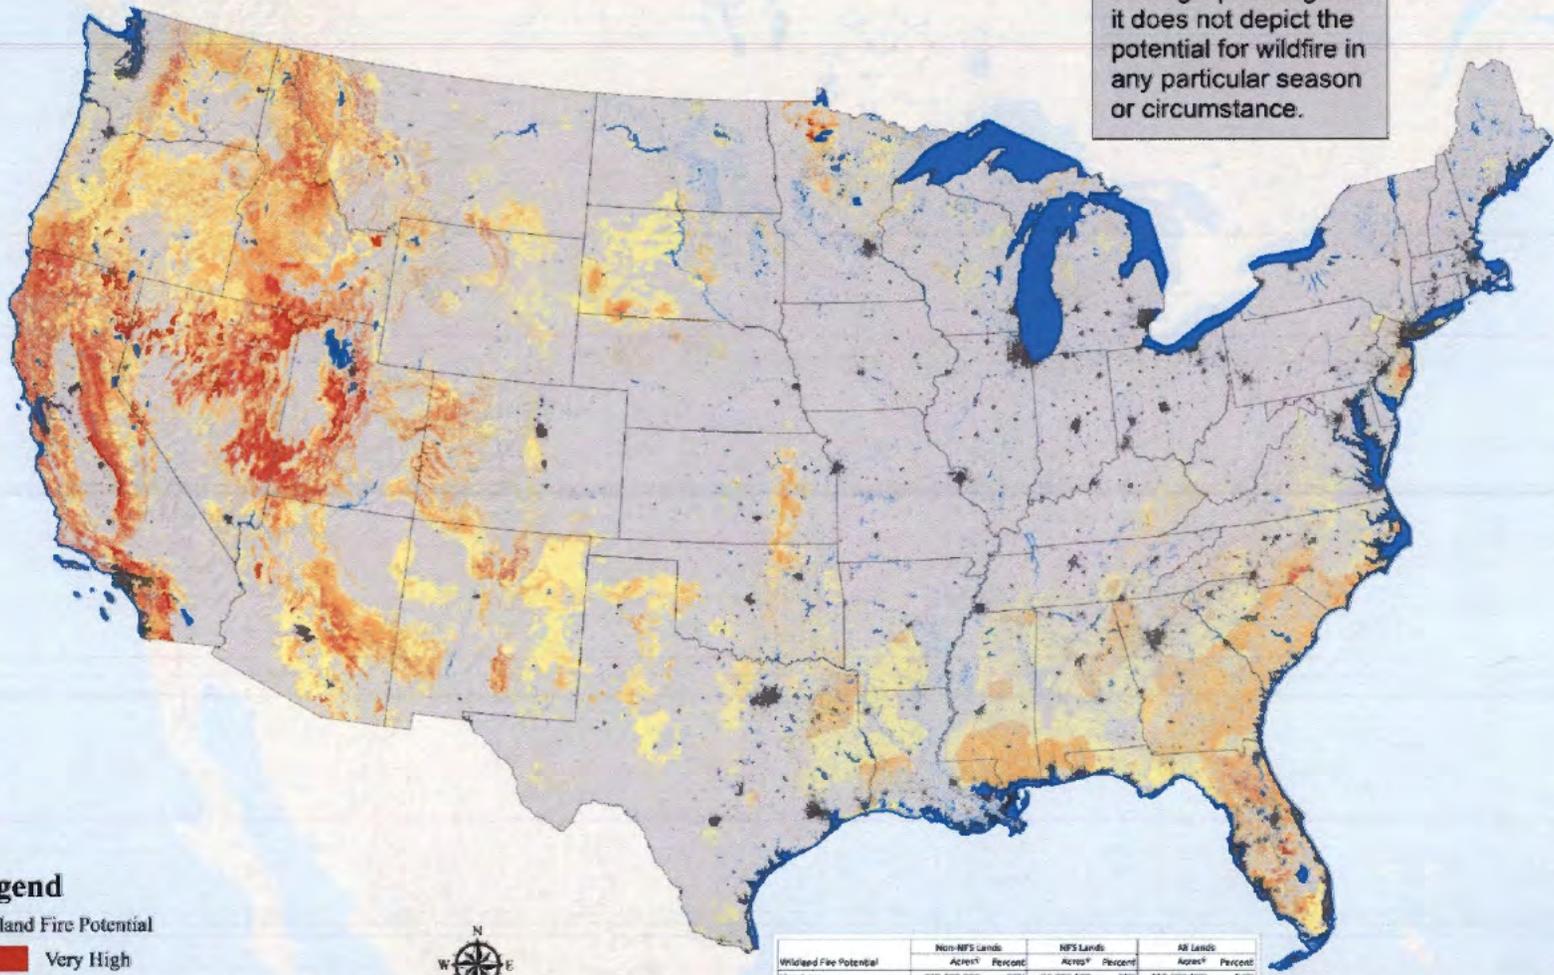

Projected Combined Federal Resources

Incident Management Teams	
Type 1 IMTs	16 National Teams, 4 Full-Time NIMO Teams
Type 2 IMTs	36 Interagency Teams
Firefighting Crews	
Type 1 Interagency Hotshot Crews	110
Type 2 Crews	350
Smokejumpers	463
Firefighting Personnel	
Estimated Total	13,947
Aircraft	
Single Engine Airtankers (SEATS)	72 (34 Exclusive Use--EU; 38 Call When Needed--CWN)
Large Airtankers (LATs)	15
MAFFS	8
Water Scoopers	3
Helicopters	
Type 1	52 (34 EU; 18 CWN)
Type 2	80 (36 EU; 44 CWN)
Type 3	536 (83 EU; 453 CWN) (May not include all AK helicopters)
Estimated Maximum Total	668
Heavy Equipment	
Engines	1,645 (900 USFS; 745 DOI)
Dozers, Water Tenders, etc.	416 (210 USFS; 206 DOI)

Wildland Fire Potential

Version 2012

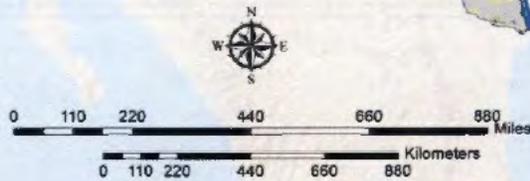

This map is useful for strategic planning but it does not depict the potential for wildfire in any particular season or circumstance.

Legend

Wildland Fire Potential

- Very High
- High
- Moderate
- Developed Lands
- Water

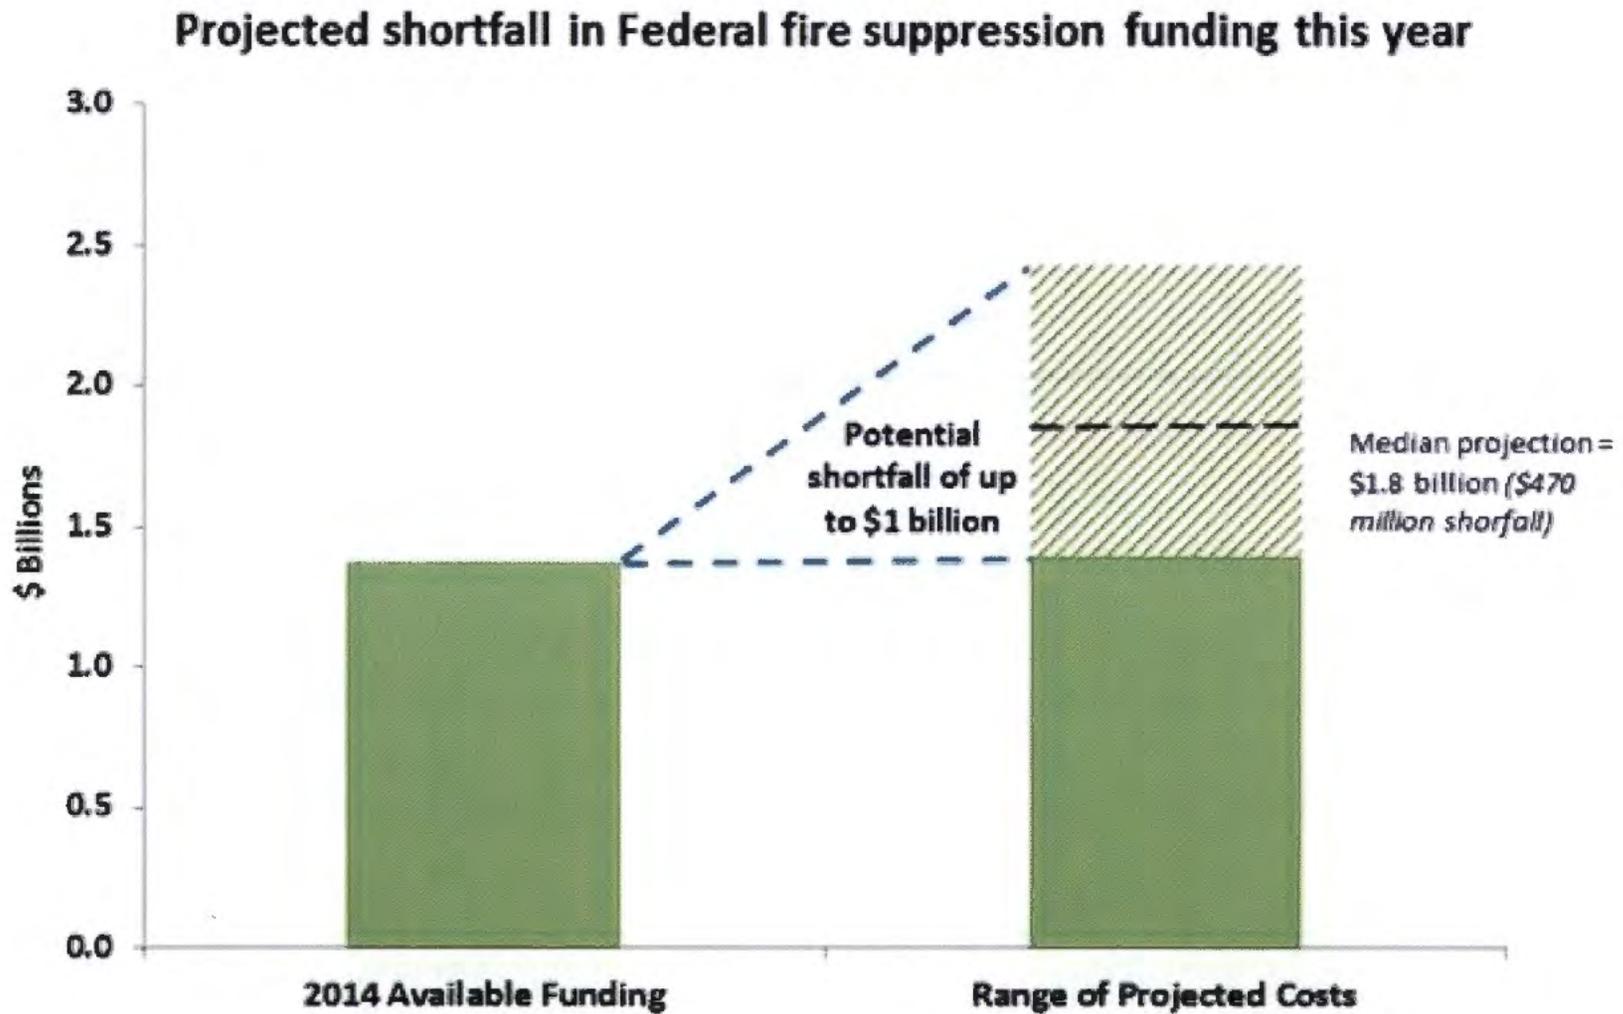

Wildland Fire Potential	Non-NFS Lands		NFS Lands		All Lands	
	Acres*	Percent	Acres*	Percent	Acres*	Percent
Very Low	625,880,000	86%	34,600,000	10%	659,880,000	34%
Low	299,390,000	17%	30,500,000	18%	823,780,000	17%
Moderate	156,430,000	11%	41,530,000	24%	237,560,000	12%
High	119,540,000	7%	35,270,000	21%	154,810,000	8%
Very High	47,970,000	3%	22,990,000	13%	70,960,000	4%
Sum of High and Very High	187,510,000	10%	58,260,000	9%	223,770,000	12%
Non-burnable Lands	456,150,000	25%	2,870,000	8%	461,630,000	23%
Water	33,060,000	2%	750,000	0%	34,310,000	2%
Grand Total	2,792,740,000		170,690,000		1,923,270,000	

Greg Miller, USDA Forest Service, Fire Planning Institute, June 1, 2014

"The Wildfire Potential map (2012) depicts the relative potential for wildfires that would be difficult for suppression resources to contain. It is based on past wildfire occurrence, fuels data, and computer simulations of wildfire likelihood and intensity."

Tommy -

Thanks - this is helpful. I assume the quarterly meeting is with the President? Do we have a date scheduled for ours yet? It would be good to get a jump on the homework assignment and think through how best to engage with the AS team. Mike's work with them should set us up well for this opportunity.

(b)(5)

If you hear otherwise, let me know. I will fill you and Mike in after the meeting tomorrow.

Have a good weekend!

Tommy and Mike -

Thanks for pulling these together. Looks like you engaged in a bit of "bundling" to make multiple points - they are a good reflection of what we are doing.

Do you have more info on what tomorrow is about? If each cabinet member has a similar list, it will be pretty long. I am just trying to figure out what the purpose of the meeting might be so I can prep appropriately.

Good event today!

Sally

Sally,

In anticipation of Saturday's meeting, we were asked to submit a set of problem statements/action items relating to some of the most challenging issues

currently facing DOI. Ordinarily, Mike and I would have run these by you before forwarding to Broderick, but unfortunately we were under the gun - we were supposed to have had these in to Cabinet Affairs last night, but with everything going on the tasker slipped both of our minds until yesterday afternoon. At any rate, I think this a very good, and responsive, set of issues for you to work from.
