Panel II: Arvind Ganesan, Director for Business and Human Rights, Human Rights Watch; Nadejda Ataeva, President, Association for Human Rights in Central Asia; Yoni Rivas, Secretary General of the Movement of Unified Campesinos in Aguan and member of the Plataforma Agraria, Honduras; Delphine Djiraibe, Human Rights Attorney, Chadian Association for the Promotion and Defense of Human Rights. Contact: 202-225-3599 or tlhrc@mail.house.gov Location: HVC-210.

3 p.m. **FOREIGN AFFAIRS** — Subcommittee on the Middle East and North Africa hearing on U.S. Policy Toward

Morocco. Witnesses: William Roebuck, Deputy Assistant Secretary of State for Egypt and Maghreb Affairs, Bureau of Near Eastern Affairs, U.S. Department of State; Alina Romanowski, Deputy Assistant Administrator, Bureau for the Middle East, U.S. Agency for International Development. <http://foreignaffairs.house.gov/hearing/subcommittee-hearing-us-policy-towards-morocco> Location: 2167 Rayburn.

4 p.m. ENERGY AND COMMERCE — The Subcommittee on Communications and Technology holds opening statements on markup of H.R. 4342, the Domain Openness Through Continued Oversight Matters (DOTCOM) Act of 2014. <http://docs.house.gov/Committee/Calendar/ByEvent.aspx?EventID=102134> Location: 2123 Rayburn. Other: April 5 – 10. NATIONAL 4-H CONFERENCE — Billed as the premier civic engagement opportunity for 4-H members (15-19 yrs.) who are actively engaged in 4-H programs across the U.S. and its territories. <http://www.4-h.org/4-h-conference/> 8:30 a.m. – 9:30 a.m. Congressman Chris Van Hollen (D-MD), Senator Saxby Chambliss (R-GA), Congressman Tom Latham (R-IA), and Senator Debbie Stabenow (D-MI) will host the first 4-H Congressional Breakfast to spotlight “the importance of positive youth development programs in addressing urgent challenges facing America’s youth.” Dirksen Senate Office Building. Contact: Kinetra Joseph at kjoseph@4-h.org or (240) 380-0781 (mobile). Location: National 4-H Youth Conference Center, 7100 Connecticut Avenue, Chevy Chase, MD.

April 7 – 9. SEA-AIR-SPACE EXPOSITION — Hosted by The Navy League, the event is billed as “the largest maritime exposition in the U.S.” 7:45 a.m. Deputy Assistant Secretary of the Navy for Ships Allison Stiller delivers remarks on “Shipbuilding” at the Congressional Breakfast. 12 p.m. Assistant Secretary of the Navy for Research, Development and Acquisition Sean J. Stackley delivers remarks at the “Secretary of the Navy” luncheon. 1:45 p.m. U.S. Coast Guard Rear Admiral Robert Day will participate in a panel discussion on “Information Dominance, Security and the Sea Services.” 2:30 p.m. Naval Surface Forces Commander/U.S. Pacific Fleet Naval Surface Force Commander Vice Adm. Thomas H. Copeman III and Air Warfare Division Director Rear Adm. Michael Manazir deliver remarks at the Sea-Air-Space Convention “Ready to Fight and Win Today” roundtable. 2:30 p.m. Assistant Deputy Chief of Naval Operations for Information Dominance Mark D. Andress delivers remarks at the “Information Dominance, Security and the Sea Services” roundtable. Location: Gaylord National Hotel & Conference Center, 201 Waterfront Street, National Harbor, MD.

April 8 – 9. SAVE THE CHILDREN ADVOCACY SUMMIT — Youth from across the country will be gathering in Washington, D.C. to advocate for children’s issues. Speakers include Secretary Arne Duncan (4:30 p.m. 8th); Disney Channel star and singer Bridgit Mendler, Sen. John Boozman (R-AR), Sen. Tim Kaine (D-VA), Congressman Richard Hanna (R-NY), MSNBC’s Andrea Mitchell, CNN’s Stephanie Cutter, others. Location: Hyatt Regency on Capitol Hill, 400 New Jersey Ave. NW.

FAST FOR FAMILIES – NATIONAL MALL — “Fast for Families Across America national bus tour completes journey at the National Mall. Closing rally, procession to Capitol, media availability. Contacts: Beatriz Lopez, Fast for Families – beatriz.lopez@seiu.org, 202-412-7396 Tyler Prell, SEIU – tyler.prell@seiu.org, 202-701-5796 Diana Ip, We Belong Together – dianaip@yahoo.com, 510-858-3302 10 a.m. “Fast for Families Across America buses arrive at 4th Street rally. 10:15 a.m. – 11:15 a.m. Rally speaking program begins on National Mall. 11:20 a.m. Delegation proceeds to Capitol Hill for meetings with members, deliver letter to Speaker Boehner, meet with Senator Reid. 1:15 p.m. Delegation holds media availability with Senate Majority Leader Reid

April 9 – 10. MINSKY CONFERENCE — 23rd Annual Hyman P. Minsky Conference on the State of the U.S. and World Economies – “Stabilizing Financial Systems for Growth and Full Employment,” is being organized by the Levy Institute with support from the Ford Foundation. Participants include Jason Furman, chairman, Council of Economic Advisers, Executive Office of the President; Daniel K. Tarullo, member, Board of Governors of the Federal Reserve System; Charles L. Evans, president and chief executive officer, Federal Reserve Bank of Chicago; Vitor Constancio, vice president, European Central Bank; Peter Praet, executive board member, European Central Bank; U.S. Senator Sherrod Brown (D-OH); U.S. Representative Carolyn B. Maloney (D-NY, 12); Richard Berner, director, Office of Financial Research, U.S. Department of the Treasury; Willem H. Buiter, global chief economist, Citi; Bruce Kasman, chief economist and managing director of global research, J. P. Morgan; Anat Admati, professor of finance and economics, Stanford University; Denis MacShane, European Policy Counsel, and former U.K. minister for Europe; Mercedes Marcs del Pont, former president, Central Bank of Argentina; Frank N. Newman, chairman, Promontory Financial Group China, and former deputy secretary, U.S. Department of the Treasury; Tom Redburn, economics editor, The New York Times; Jon E. Hilsenrath, chief economics correspondent, The Wall Street Journal; Binyamin Appelbaum, business and economics reporter, The

New York Times; Deborah Solomon, news editor, The Wall Street Journal; and James Politi, U.S. economics and trade correspondent, Financial Times. Location: National Press Club, 529 14th St. NW.

FARM FOUNDATION FORUM — 9 a.m. – 11 a.m. “Geopolitical Uncertainty in Agriculture and Energy Markets.” Moderating this Forum will be Dan Glickman of the Aspen Institute, a former U.S. Secretary of Agriculture. Panelists will include: Vincent Smith, professor of agricultural economics at Montana State University, and a visiting scholar at the American Enterprise Institute; Gary Blumenthal, President of World Perspectives, Inc.; Brian Oleson, professor of economics at the University of Manitoba; and Charles Doran, Andrew Mellon Professor of International Relations at the Johns Hopkins School of Advanced International Studies. Location: National Press Club, 529 14th Street NW.

WATER AND TOILETS — 9:30 a.m. WaterAid hosts a coffee and discussion event to learn how aid for water and toilets changes lives and improves US national security. Invited speakers include Congressman Judge Ted Poe (R-TX), original co-sponsor of the Water for the World Act; Lisa Schechtman, Director of Policy & Advocacy for WaterAid America, and Barbara Frost, Chief Executive of WaterAid International. Location: National Press Club, Zenger room, 529 14th Street NW.

CAP – SEN. LEVIN – TPP — 12 p.m. – 1 p.m. Rep. Sander Levin (D-MI), Ranking Member on the Committee on Ways of Means, will discuss his views on the outstanding issues involved in the negotiations over a Trans-Pacific Partnership Agreement (TPP) and how intensive Congressional involvement at this stage can “strengthen the hand of U.S. negotiators to address the opportunities and challenges presented by the largest multi-party negotiation in 20 years”. Contact: Katie Peters, 202.741.6285, kpeters@americanprogressaction.org RSVP: <http://www.americanprogressaction.org/events/2014/04/01/86888/remarks-by-rep-sander-levin-on-trade/?evlcrsvp> Location: Center for American Progress, 1333 H St. NW, 10th Floor.

CSIS – GLOBAL FOOD SECURITY — 2 p.m. – 3:30 p.m. The CSIS Project on Prosperity and Development hosts forum on Global Food Security and the American Interest: An Address by Senator Mike Johanns. Keynote Remarks: Mike Johanns, United States Senator, R-NE. Panel Discussion: Margaret Zeigler, Executive Director, Global Harvest Initiative; Peter McPherson, Former Administrator, U.S. Agency for International Development; Jonathan Shrier, Acting Special Representative for Global Food Security, U.S. Department of State. Moderator: Daniel F. Runde, Director, Project on Prosperity and Development and William A. Schreyer Chair in Global Analysis, CSIS. Location: CSIS 2nd Floor Conference Center, 1616 Rhode Island Avenue, NW.

Last Laughs:

LATE NIGHT POLITICAL HUMOR.

Seth Meyers: “The Tourism Minister of Crimea announced that foreign tourists can visit the country this year without a visa. And just when you thought visiting Crimea couldn’t get any more enticing – no visas!”

Seth Meyers: “Today, more than 100 advocates came to Washington to lobby for the legalization of marijuana for medicinal purposes. While another 10,000 marijuana advocates thought it was next Tuesday.”

Stephen Colbert: “Nation, it’s been three weeks since Vladimir Putin annexed Crimea, and President Obama still refuses to intervene. We have got to invade before Putin’s slave army vanquishes all of Europe on his way to Westeros. Full disclosure – I may have been flipping between Fox News and ‘Game of Thrones’ the other night, but I still say Putin has dragons!”

LAST LAUGHS:

- + Late Night Political Humor.

DOI in the News:

INTERIOR UNVEILS PLAN TO IMPROVE MITIGATION PRACTICES. The [Environment & Energy Publishing](#) (4/11, 705) reports that Interior Secretary Sally Jewell unveiled a strategy for improving mitigation policies and practices on Thursday. The mitigation strategy, outlines in a report developed by Interior's Energy and Climate Change Task Force, "includes four key objectives the department will work to implement in the coming months in an effort to take a broader approach to managing public lands." Jewell said, "This strategy outlines the key principles and actions we need to take to successfully shift from a reactive, project-by-project approach to more predictable and effective management of the lands and resources that we manage on behalf of the American public."

In its "E2 Wire" blog, [The Hill](#) (4/11, Cama, 237K) reports that the strategy "emphasizes siting and design features in development to mitigate the impacts to federal lands, while seeking to protect or restore resources that must be harmed." Interior said "its policies with development will focus on four areas to determine the impacts to resources: geospatial assessments, landscape-level strategies, mitigation programs that compensate for impacts; and monitoring and evaluating projects as they proceed."

The [Natural Gas Intelligence](#) (4/11) reports that the American Gas Association said it supported the new plan "on the grounds that it would improve the permitting process for gas drilling and associated projects." AGA CEO Dave McCurdy said, "These reforms will give natural gas utilities more regulatory certainty as they plan infrastructure upgrades, reduce agency costs associated with project reviews and increase landscape-level habitat mitigation techniques that measurably improve environmental protection. These reforms will also help natural gas utilities

receive timely permits for projects that must be completed in a specific season to minimize environmental impacts, and projects that are time-sensitive for reliability and safety reasons. We look forward to working with the relevant agencies to implement these changes."

The Salem-News (OR) (4/11, 1K) reports that Steve Holmer, Senior Policy Advisor with American Bird Conservancy, said, "Though ABC supports individual project reviews, we're encouraged by these initiatives to avoid and minimize project impacts through advance planning. This is the best and, in some the cases, the only way to address cumulative impacts and to conserve declining populations of wide-ranging species such as the Greater Sage-Grouse and Marbled Murrelet."

Also reporting on the story are the Law 360 (4/11, 18K), the Energy Daily (4/11, 835), and KCSG-TV St. George, UT (4/11, 43).

SECRETARY JEWELL'S FIRST YEAR MARKED BY CHALLENGES. The Huffington Post (4/10, Sheppard, 11.54M) reports that Interior Secretary Sally Jewell entered office with an "ambitious agenda," but "much of her first year has been spent dealing with more basic problems – like how to pay for these ambitious projects." Jewell noted that "the biggest challenge of her new job has been so far" the budget. Jewell explained, "People expect us to do things for the long term. This is the longest-term focused job that I've had, and yet it's the shortest-term focused budget that I've ever operated under. That makes no sense." Besides the budget situation, "other challenges, such as the struggle to get the Senate to confirm her deputies and a House effort to cut off the administration's best tool for granting new protections for public lands, have been less visible, but no less significant."

REPORT QUESTIONS VIABILITY OF MARINE ALTERNATIVE TO ROAD THROUGH IZEMBEK NATIONAL WILDLIFE REFUGE. The Environment & Energy Publishing (4/11, 705) reports that "a marine landing craft would be a poor way to ferry sick or injured passengers from a remote Alaska city to medical help, according to a Seattle-based marine consultant." Glostern Associates Inc., said "such vessels struggle to perform in heavy waves such as those that separate the cities of King Cove and Cold Bay." The company's "independent assessment undercuts a key talking point Interior Secretary Sally Jewell used in her decision last December to reject a proposed road through the Izembek National Wildlife Refuge."

OBAMA ADMINISTRATION TO KEEP PRESSURING ICELAND ON WHALE HUNTING. The IceNews (ISL) (4/10) reports that President Barack Obama has "instructed officials to continue applying pressure on Iceland to comply with the whaling moratorium introduced by the International Whaling Commission (IWC) in 1986." Obama, "in a note to his cabinet officers, said senior delegations and officials meeting with the Icelandic government's representatives should remind them that if the North Atlantic nation wants to cooperate with the US then it must change its policy on whaling."

ADDITIONAL COVERAGE OF NATIONAL COHESIVE WILDLAND FIRE MANAGEMENT STRATEGY. Additional coverage of the National Cohesive Wildland Fire Management Strategy was provided by the Salem (OR) Capital Press (4/10, 113K) and KWYB-TV Butte, MT (4/11).

America's Great Outdoors:

National Park Service:

CHERRY BLOSSOMS REACH PEAK BLOOM. The Washington Post (4/11, Ruane, 4.22M) reports that the NPS on Thursday "declared Washington's famous Japanese cherry trees at peak bloom." The article notes that "this season's bloom is peaking at just the right moment for the culmination of the year's National Cherry Blossom Festival."

Also covering the story are the AP (4/11, Press, 4.22M), the AP (4/10, 687K), WRC-TV Washington (4/11, 312K), WBAL-TV Baltimore (4/11, 114K), and WTTG-TV Washington (4/11, 169K).

FUNDING FOR CENTRAL EVERGLADES PLAN RECEIVES KEY APPROVAL. The South Florida Sun Sentinel (4/10, 779K) reports that "a nearly \$2 billion plan to help the Everglades and ease coastal pollution stayed alive

Thursday when the South Florida Water Management District agreed to potentially pay half of the steep cost." The Central Everglades plan "calls for getting more Lake Okeechobee water flowing south to the Everglades — like it used to before development and farming got in the way — instead of draining lake water out to sea and hurting coastal fishing grounds." According to the article, "the next tricky step involves persuading Congress to pay for the other half of the project so that a final deal can be OK'd by the district."

Everglades Foundation CEO Presses For More Funding. The Tampa Bay (FL) Times (4/11, 75K) reports that Eric Eikenberg, CEO of the Everglades Foundation, testifying before the House Appropriations Interior Subcommittee, declared that "Everglades restoration is working" while "pressing \$62.4 million in additional funding." Eikenberg said, "All authorized projects are underway. Several significant projects are in the final stages and we are seeing success. The endangered Florida Panther is returning to the Picayune Strand. Scientists report that the C-111 Western Project is already exceeding expectations — restoring freshwater prey fish and habitat for the American Crocodile and Roseate Spoonbill — just one year into operations."

GREAT SMOKY MOUNTAINS NATIONAL PARK RECEIVES \$2.2 MILLION FROM ANONYMOUS DONOR. The Knoxville (TN) News Sentinel (4/11, Simmons, 382K) reports that the Great Smoky Mountains National Park has "received one of its largest cash donations ever in the form of \$2.2 million provided by an anonymous donor." The funds will be directed through the Great Smoky Mountains Association. According to a memorandum of understanding between the donor and the GSMA, the money will be "used to pay off an existing construction loan taken out by the GSMA for the Oconaluftee Visitor Center, which opened in 2011, and toward a new loan secured by the organization to help construct the 13,000-square-foot Collections Preservation Center scheduled for completion in the fall 2015."

NPS TO SIFT THROUGH COMMENTS ON GUADALUPE MOUNTAINS PLAN. The Albuquerque (NM) Journal (4/11, 282K) reports that officials at the NPS will be "sifting through comments from hikers, campers and other adventurers to shape the future of one of southeastern New Mexico's historic trails." The article notes that "the comment period ended this week on proposed changes at the Guadalupe Mountains National Park that lies south of Carlsbad and straddles the Texas-New Mexico border." Karl Pierce, spokesman for Guadalupe Mountains National Park, said, "At this point we have not determined the preferred alternative. It may turn out that we choose one alternative or some combination (of the four), or there may be some new ideas from the public scoping process that may be added as well, so we really don't know the outcome yet."

PROTECTION OF YOSEMITE NATIONAL PARK URGED. In an op-ed for the Modesto (CA) Bee (4/10, 210K), Pam Clemensen, a former Bee visiting editor, notes that Yosemite National Park celebrates its anniversary this year. Clemensen reflects on how Yosemite "belongs to the ages" and argues that "we must continue to preserve it for ages to come."

Bureau of Land Management:

FEDERAL CATTLE SEIZURES SPARK CLASHES. The AP (4/11, 455K) reports that "tensions have escalated between protesters and federal police who used a stun gun on a son of a Nevada rancher fighting a roundup of cattle that he claims have historical grazing rights northeast of Las Vegas." According to the article, "no serious injuries were reported and no arrests were made," but family members said that rancher Cliven Bundy's "57-year-old sister also was knocked to the ground during a confrontation Wednesday involving dozens of protesters and several US Bureau of Land Management rangers." The son, Ammon Bundy, said that "he was hit with stun charges twice." He "acknowledged that he climbed on a dump truck, suspecting that it contained cattle that had been killed during the roundup."

CNN (4/11, Martinez, Cnn, 77.95M) reports that during a confrontation Wednesday, "a police dog was kicked and officers were assaulted," according to federal officials. The article notes that "the profanity-laced tussle was captured on a video posted on YouTube."

The Las Vegas Review-Journal (4/11, 437K) reports that the BLM dismantled its "First Amendment areas" in northeastern Clark County on Thursday. Meanwhile, state lawmakers from Arizona to Washington are headed for Nevada to rally alongside the Bundy family and its supporters. Several of the officials said they were drawn into the issue by video footage of Wednesday's clash between protesters and BLM rangers.

Utah's Congressional Delegation Urges BLM To Keep Cattle Out Of Utah. The Deseret (UT) News (4/11, 610K) reports that "Utah's congressional delegation weighed in Thursday on the Bureau of Land Management's shelved proposal to bring cattle seized from a Nevada rancher to the Beehive State for auction." In a joint statement, Sens. Orrin Hatch and Mike Lee joined Reps. Rob Bishop, Jason Chaffetz and Chris Stewart in urging BLM director Neil Komze to keep the cattle out of Utah. The statement said, "We strongly support Gov. (Gary) Herbert and echo his concerns expressed in his April 2 letter. Going forward with the plan to transport the Nevada cattle to Utah may endanger the health of Utah herds and place Utah state employees and other Utah residents in danger."

Also covering the story is KSL-TV Salt Lake City (4/11, 242K).

Federal Government Accused Of Violating First Amendment. In an editorial, the Las Vegas Review-Journal (4/11, 437K) accuses the Interior Department of violating the Constitution. The paper argues that the First Amendment should allow for public protest, but denying a forum for expression allows pressure to build, making an explosion more likely.

Additional Coverage. Also covering the story are the Wall Street Journal (4/11, Phillips, Subscription Publication, 5.51M), FOX News (4/7, 74.23M), FOX News (4/10, 74.23M), FOX News (4/10, 74.23M), FOX News (4/10, 74.23M), USA Today (4/11, Durando, 5.82M), Reuters (4/11, Zuckerman), the Daily Caller (4/11, Bastasch, 408K), the Daily Caller (4/11, Soave, 408K), the Lebanon (PA) Daily News (4/11, 39K), The Inquisitr (4/11, 50K), the Examiner (4/11, 1.56M), KSAZ-TV Phoenix (4/10, 70K), KTNV-TV Las Vegas (4/11, 19K), KLTV-TV Tyler, TX (4/11, 36K), WTVR-TV Richmond, VA (4/10, 47K), KPTV-TV Portland, OR (4/11, 57K), KRNV-TV Reno, NV (4/11, 2K), and WNYW-TV New York (4/11, 68K).

Fish and Wildlife Service:

GROUPS CLAIM FEDS' PLAN WON'T KEEP LESSER PRAIRIE CHICKEN SAFE. The AP (4/11, 3.33M) reports that the federal government is not doing enough to protect the lesser prairie chicken, three environmental groups said Thursday. Defenders of Wildlife, the Center for Biological Diversity and WildEarth Guardians notified the FWS and the Interior Department on Friday that they intended to sue. The three wildlife groups said in their letter that science supports a determination that the prairie chicken "is currently threatened with extinction and should be listed as an endangered species."

Coverage by the AP was also picked up by the Washington Examiner (4/11, 335K), the Sacramento (CA) Bee (4/10, 687K), the Merced (CA) Sun-Star (4/10, 81K), the York (SC) Enquirer-Herald (4/10, 18K), KOAA-TV Colorado Springs, CO (4/11, 6K), and KMGH-TV Denver (4/11, 30K).

Also reporting on the story are the Lawrence (KS) Journal World (4/10, 82K) and the Houston Chronicle (4/11, 2.23M).

Paper Argues Lesser Prairie Chicken Range-Wide Conservation Plan Should Have Been Given More Time. In an editorial, the Lubbock (TX) Avalanche-Journal (4/10, 176K) argues that the Lesser Prairie Chicken Range-Wide Conservation Plan should have been given a chance to succeed "before declaring a status for the bird." It claims that "the opportunity to accept a committed compromise is always preferable to heavy-handed federal bureaucracy. And state and local control is likely to produce circumstances that will be more effective at protecting wildlife."

GROUP THREATENS LAWSUIT OVER SAN BERNARDINO FLYING SQUIRREL. The Riverside (CA) Press Enterprise (4/10, 435K) reports that "an environmental group has filed notice that it plans to sue the US Fish and Wildlife Service for failing to protect the dwindling population of the San Bernardino flying squirrel, a 5-ounce tree-dweller that uses flaps of skin to glide between trees." The Center for Biological Diversity says the FWS is "more than 2 1/2 years late issuing a decision on whether to list the animal under the Endangered Species Act."

FWS FINDS SPACEX LAUNCH SITE WILL NOT JEOPARDIZE WILDLIFE. The Rio Grande Valley (TX) Morning Star (4/11, Perez, 66K) reports that SpaceX is now closer to developing a private launch site in Cameron County

after the FWS found that the launch site "is not likely to jeopardize" local flora and fauna. It states, "We concur and understand that in order to protect these species, FAA will ensure precautions and education outreach efforts will be enforced." Cameron County Administrator Pete Sepulveda said the positive ruling is "great news" for the project and the region.

FWS EXTENDS PUBLIC COMMENT PERIOD FOR CUCKOO. The AP (4/10, 687K) reports that the FWS is "giving the public more time to comment on a proposal to list the Western population of the yellow-billed cuckoo as threatened." The service "now is accepting comments through April 25."

Also reporting on the story is the Denver Post (4/11, Finley, 940K).

FWS EXTENDS PUBLIC COMMENT PERIOD FOR RED KNOT. The Shore (NJ) News Today (4/11) reports that on April 1, the FWS "reopened the public comment period for the rufa red knot threatened species listing proposal, after the agency received three requests last year to hold public hearings." Krishna Gifford, a biologist with the FWS, said, "We're reopening the public comment period until May 19. We're on schedule to make final decision on the listing of the red knot on Sept. 30, 2014."

SEN. HELLER SAYS NEVADA MUST STAY PROACTIVE ON SAGE GROUSE. The Elko (NV) Daily Free Press (4/11, 22K) reports that Sen. Dean Heller "reiterated his stance Wednesday that the state had to be proactive if it hoped to keep sage grouse off the endangered species list." Heller said "he didn't think litigation after the fact would be successful — an idea that the Elko County Commissioners have discussed — because the US Fish and Wildlife Service is under a court order to make a determination regarding sage grouses' status." He said, "I have a hard time believing we'd be successful suing the courts."

DEADLY BAT DISEASE SPREADS. The AP (4/10, 76K) reports that "a fungal disease that has killed millions of North American bats is spreading and now has been detected in half of the United States, officials said Thursday." Wildlife agencies in Michigan and Wisconsin said "they had confirmed diagnoses of white-nose syndrome in tested bats, further evidence of the ailment's rapid expansion since it first was documented in a cave near Albany, N.Y., in 2006." The article notes that "cases have tumbled up in most states east of the Mississippi River, with Georgia and Alabama joining the list in March, and as far west as Missouri and Arkansas."

US Geological Survey:

USGS RELEASES SIMULATION ON WASHINGTON LANDSLIDE. PBS (4/11, 1.22M) reports that a USGS "simulation shows how quickly the Washington landslide liquefied." The agency "released a computer simulation Thursday of the mile-wide Washington state mudslide, which left dozens dead and devastated at least 30 houses in March." According to the article, "for more on the Oso mudslide In USGS' simulation, an entire hillside near the town of Oso, Wash. collapses as about 10 million cubic yards of mud, trees and other debris slide down the slope and cover a neighborhood and parts of State Route 530 in 60 seconds."

Securing America's Energy Future:

Renewable Energy:

LACK OF ACTION ON WIND POWER SUBSIDY SLOWING INDUSTRY'S GROWTH. USA Today (4/11, Koch, 5.82M) reports that while it was once "a booming industry," domestic wind power "saw its growth plummet 92% last year as it wrestled with tax uncertainties and cheap natural gas." A report out Thursday from the American Wind Energy Association says that while the industry is still growing, it is much slower. US wind producers "added a record 13,131 megawatts of power in 2012 but the growth fell to only 1,087 MW last year — the lowest level since 2004." USA Today says that one reason "was investors' uncertainty that Congress would renew a federal wind tax subsidy." An extension of the subsidy, which expired in January, is "pending in the Senate."

Onshore Energy Development:

BLM SEEKS FEEDBACK ON SAN JUAN ENERGY CONNECT PROJECT. The Durango (CO) Herald (4/8, 28K)

reports that the BLM "held an open house at the Sky Ute Event Center in Ignacio Tuesday afternoon to get public feedback on the San Juan Energy Connect project." The BLM is accepting public comments until April 28.

Offshore Energy Development:

OBAMA ADMINISTRATION ASKS TO REVISE EIS FOR 2008 CHUKCHI LEASE SALE. The Environment & Energy Publishing (4/11, 705) reports that the Obama Administration is "asking a federal court judge to let the Interior Department rewrite a flawed environmental impact statement that regulators used to support the 2008 sale of oil leases in the Chukchi Sea." According to the article, "in a status report filed last week with the US District Court for the District of Alaska, the Justice Department proposed that the court remand the issue to the Bureau of Ocean Energy Management for further analysis." The article notes that the "request was backed by a separate plea from Royal Dutch Shell PLC, which said it would 'provide the best approach for a thorough, yet expeditious remand process that would preserve the possibility of a 2015 drilling season.'"

Also reporting on the story is the Natural Gas Intelligence (4/11).

BSEE DIRECTOR SALERNO: MANY COMPANIES HOLDING BACK INFO IN SAFETY AUDITS. The FuelFix (4/10, 7K) reports that "the first round of offshore safety audits under new federal regulations proved 'a mixed bag,' with some deep-water operators giving authorities few insights into how they handle vessel deficiencies and other issues," BSEE Director Brian Salerno said on Thursday. At the second annual Center for Offshore Safety Forum in Houston, Salerno said, "There are some companies that clearly get it. But we also found quite a few of the audits where information was quite limited. We really wondered if we got what we needed out of that in many cases." Salerno added, "But the net result of all that is we had limited information that allows us to establish a baseline of where we are in the safety culture of the industry. The next round, I think, will be a little bit more rigorous. But overall, the agency has to look at how it can make the program more effective."

COAST GUARD ADMIRAL: "WE'RE NOT WHERE WE NEED TO BE" ON OFFSHORE RIG SAFETY. On its website, FuelFix (4/11, Eaton, 7K) reports that at his keynote address at the second annual Center for Offshore Safety Forum in Houston, TX, US Coast Guard Rear Admiral Joseph Servido addressed continued safety issues on deep-water offshore drilling rigs. "We're not where we need to be" on safety implementation FuelFix reports Servido said. FuelFix reports that offline emergency generators, inoperable fire-detection systems and cracked rescue boats are some of the issues discovered on rigs, "even after oil companies have complied with rules for years and have anticipated inspections for months." Additionally, FuelFix reports that 60 percent of offshore supply vessels and half of mobile offshore drilling units do not have a safety management system in place.

BP CEO SAYS COMPANY HAS A "STRONG FUTURE" IN GULF. The Houston Business Journal (4/11, Blum, Subscription Publication, 91K) reports that as the fourth anniversary of the 2010 BP oil spill approaches, BP CEO Bob Dudley said at the company's annual general meeting in London that BP has "a strong future" in the Gulf of Mexico and the US shale boom. Additionally, the Journal reports that Dudley said he is "very aware" of the upcoming anniversary, noting that "we have looked to do the right thing by those who were affected by the accident and spill," while also doing "the right thing by our investors when it became clear that the system for compensating claimants was subject to a considerable number of unfounded claims." The Journal notes that Dudley's comments come as litigation over BP's civil penalties, which "could be as much as \$18 billion," is still pending.

2010 OIL SPILL STUDY TO GIVE UPDATE DURING CONFERENCE CALL ON FRIDAY. The New Orleans Times-Picayune (4/11, Larino, 678K) reports that on Friday April 11 principle investigator with the National Institute of Environmental Health Sciences Dale Sandler, who has led a study on the effects of the 2010 Gulf oil spill on the 33,000 clean up workers and volunteers, will give an update on the status of the research and discuss early findings during a noon conference call, according to a statement. Sandler will also urge the study's participants to continue to stay involved in the research, which, the Times-Picayune reports, is expected to continue for more than another decade.

Tackling America's Water Challenges:

SEN. FEINSTEIN DROPS \$300 MILLION IN EMERGENCY SPENDING FROM DROUGHT-RELIEF

LEGISLATION. The [AP](#) (4/11, 51K) reports that Sen. Dianne Feinstein said Thursday “she has dropped \$300 million in emergency spending from drought-relief legislation to try to improve prospects for getting the bill passed.” The new bill will “continue a focus on regulatory relief.” The legislation “mandates that federal agencies open channel gates on the Sacramento River as long as possible without endangering salmon populations.”

Bill Calls For Expanding Los Vaqueros Reservoir. The [San Jose \(CA\) Mercury News](#) (4/11, 696K) reports that Los Vaqueros Reservoir would “be tripled in size to provide Californians with more insurance against water shortages and drought, under a federal bill introduced Thursday.” Reps. George Miller, D-Martinez, and Jim Costa “sponsored the bill for the expansion of the reservoir that the Contra Costa Water District just expanded in 2012 to meet local water quality and supply needs.” The legislation “calls for a phased approach toward expansion with the help of the federal Bureau of Reclamation.”

Additional Coverage. Additional coverage of the drought and the water supply in California was provided by the [Los Angeles Daily News](#) (4/10, 347K), the [Central Valley \(CA\) Business Times](#) (4/11, 206), the [Santa Barbara \(CA\) Independent](#) (4/10, 119K), the [Southern California Public Radio](#) (4/10, 85K), the [Grist](#) (4/11, 18K), [KCET-TV Los Angeles](#) (4/11, 15K), [KNBC-TV Los Angeles](#) (4/11, 174K), and [KESQ-TV Palm Springs, CA](#) (4/11, 32K).

BOR WON'T ALLOW IRRIGATION WATER FOR MARIJUANA FARMS IN WASHINGTON AS LONG AS DRUG ILLEGAL. The [AP](#) (4/11) reports that the Kittitas Reclamation District has “been told it can’t supply water to marijuana farms.” The district’s lawyer told commissioners the BOR “won’t permit the water to be used while growing the drug remains a federal crime.”

Also covering the story is the [Yakima \(WA\) Herald-Republic](#) (4/11, 86K).

Empowering Native American Communities:

BIA CHIEF WASHBURN APPROVES HEARTH ACT APPLICATIONS. The [Native American Times](#) (4/11, 337) reports that Assistant Secretary – Indian Affairs Kevin K. Washburn has “approved leasing regulations submitted by four federally recognized tribes” to control the leasing of their trust lands and promoting their self-determination and economic development. Washburn said, “Thanks to the HEARTH Act, more tribes have been empowered to take over leasing on their lands. Tribal governments are the drivers of economic self-sufficiency and prosperity on their reservations and in their communities. The HEARTH Act restores their ability to directly control how their lands can and should be used for the good of their people, now and in the future.” The article notes that “the four tribes, submitted requests for Secretarial approval of their leasing regulations, are: Dry Creek Rancheria Band of Pomo Indians in California, Jamestown S’Klallam Tribe in Washington State, Mohegan Indian Tribe of Connecticut, and Wichita and Affiliated Tribes in Oklahoma.”

Also reporting on the story is the [Pechanga](#) (4/11).

Top National News:

OBAMA CHAMPIONS AN EXPANSIVE FEDERAL GOVERNMENT AS HE HONORS LBJ. President Obama’s speech at the Lyndon Baines Johnson Library in Austin on Thursday generated a modest amount of national media coverage, including segments on NBC Nightly News (4/10, story 4, 2:00, 7.86M) and the CBS Evening News (4/10, story 10, 0:50, 5.08M). Most analysts cast the President’s remarks as an effort to spotlight the good that can be done when the power of the Federal government is expanded, as it was during Johnson’s Administration.

For instance, under the headline “Obama Pays Tribute To LBJ, Hails Power Of Government To Effect Change,” McClatchy (4/11, Wise, Subscription Publication, 23K) says the President’s speech on Thursday “celebrated the power of government to effect change – and linked his own election to Johnson’s legislative legacy.” McClatchy says the President “said he rejects cynicism about government ‘because I have lived out the promise of LBJ’s efforts.’” McClatchy goes on to report that the President “took on the critics of that landmark Civil Rights Act and other ‘big government’ social programs championed by Johnson, including Medicare, Medicaid, the Voting Rights Act, the Immigration Act and the Fair Housing Act.”

On NBC Nightly News (4/10, story 4, 2:00, 7.86M), Brian Williams said the President "paid tribute to [LBJ's] legacy...saying he himself lived out the promise of the Civil Rights Act passed by" Johnson. Chuck Todd went on to report that "the three-day celebration at the LBJ library brought together presidents, past and present, and a pantheon of civil rights heroes including Congressman John Lewis who still bears the scars of that struggle." Rep. John Lewis (D-GA): "President Obama would not be president if Lyndon Johnson didn't pass the Civil Rights Act of '64 and the Voting Rights Act of '65. He created the climate and made it possible for man of color to be elected president."

On the CBS Evening News (4/10, story 10, 0:50, 5.08M), Scott Pelley reported that the President and First Lady "went to the LBJ Library...to mark the 50th anniversary this year of the Civil Rights Bill of 1964." President Obama was shown saying, "Because of the civil right movement, because of the laws President Johnson signed, new doors of opportunity and education swung open for everybody. They swung open for you and they swung open for me. That's why I'm standing here today because of those efforts, because of that legacy." Pelley noted that former Presidents Carter and Clinton "addressed the Civil Rights Summit earlier this week," and former president George W. Bush was scheduled to speak Thursday night.

USA Today (4/11, Jackson, 5.82M) reports that on Thursday, the President said "Americans live in a world forged largely by predecessor Lyndon Johnson – not just in terms of civil rights, but the whole ongoing argument about government itself." According to USA Today, the President noted "that attacks on another LBJ program, Medicare, anticipated those made on" the Affordable Care Act. The Hill (4/10, Sink, 237K) also reported that the President claimed that "Johnson's Great Society program, including Medicare, had been criticized as socialist," which The Hill says was "an acknowledgment of claims about his own ObamaCare program."

Likewise, the AP (4/11, Lederman) says the President "lauded his Democratic predecessor's ability to grasp like few others the power of government to bring about change and swing open the doors of opportunity for millions of Americans." The AP adds that "against the backdrop of Obama's own troubled relationship with Congress, there have also been fresh bouts of nostalgia for Johnson's mastery of congressional deal-making."

The Dallas Morning News (4/11, Hoppe, 1.18M) notes that on Wednesday night "at a fundraiser in Houston," the President "criticized Voter ID laws passed in Texas and other states as a way to disenfranchise poor and elderly voters," but on Thursday, "he shied away from using...[the LBJ] event to address challenges to the Voter Rights Act." The Morning News adds, "Neither did he discuss issues such as gay marriage and immigration," although those were "billed at the summit as current civil rights battles."

Politico (4/10, Epstein, 73K) said that in his introduction before the President spoke, Lewis "also credited" the Civil Rights Act "for making possible Obama's presidency." Bloomberg News (4/11, Runnigen, 2.76M) reports that Lewis said "while the Civil Rights Act and the Voting Rights Act helped take down the unholy 'order' of segregation," President Obama "knows there is 'much more work to do to redeem the soul of America.'" Bloomberg News notes that last year, "a divided U.S. Supreme Court threw out a core part of the 1965 Voting Rights Act...which opened the polls to millions of Southern blacks."

The San Antonio Express-News (4/11, Rauf, 718K) reports that Thursday's "crowd included many of the civil rights leaders of the 1960s...other U.S. civil rights figures in the decades since and most of Texas' minority lawmakers who have come into power, in part, because of Johnson's legislative achievements." Linda Feldmann, in a piece for the Christian Science Monitor (4/11, 566K), says the President "expanded the definition of civil rights in a way that Johnson...surely never imagined."

Peter Baker, in a piece for the New York Times (4/11, Subscription Publication, 9.65M), says the President "used most of Thursday's address to extol Johnson in what could be the most generous speech by any sitting president about the Texan since his funeral, one that all but ignored the Vietnam War." Baker also says the President "offered little of his own personal journey on race, which might not have connected to some in the room given that the president...was a child growing up in Hawaii and Indonesia during the civil rights movement."

According to the Huffington Post (4/10, Gentilviso, 11.54M), the President maintained that "Johnson's civil rights work showed he never forgot growing up in the face of poverty and racial hatred." The Wall Street Journal (4/11, Nelson, Subscription Publication, 5.51M) quotes the President as saying, "If there's one lesson I hope that Malia and Sasha and young people everywhere learn from this day, it's that with enough effort and enough empathy and

enough perseverance and enough courage, people who love their country can change it.”

According to the Washington Times (4/11, Boyer, 455K), “Some blacks have criticized Mr. Obama for doing too little to help minorities,” and “there’s some evidence in polls of disillusionment among minorities for Mr. Obama’s policies.” Reuters (4/11, Holland, Brooks) covers the President’s speech in an article titled “Obama Wraps Himself In Civil Rights Legacy Of President Lyndon Johnson.”

Bush Calls Education Reform “One Of The Unfinished Goals Of The Civil Rights Movement.” The Washington Post (4/11, Tumulty, 4.22M) reports that in his address on Thursday night, ex-President George W. Bush made the case that “one of the unfinished goals of the civil rights movement is assuring that all children achieve in school.” The Post reports that Bush said, “On the issue of education, we’re dealing with the meaning of America, and the extent of its promise, and in this cause the passion and energy of Lyndon Baines Johnson still guides us forward.”

The Austin (TX) American Statesman (4/11, 495K) notes that Bush “said there is a continued need for a federal role in education, ‘not to dictate methods but to help educate poor, minority and special-education children.’” The Houston Chronicle (4/11, Fikac, 2.23M) also covers Bush’s remarks.

Obama “Met Briefly” With Texas Democratic Gubernatorial Candidate Davis. The AP (4/11, Lederman) reports that on Thursday, President Obama “met briefly...with” Texas state Sen. Wendy Davis, who is running for governor this year, at the LBJ Library.

White House Correspondents Association Honors African-American Reporter It Once Discriminated Against. McClatchy (4/11, Clark, Subscription Publication, 23K) reports that Harry S. McAlpin “made history in February 1944 when he became the first black reporter to cover a presidential news conference at the White House,” despite the White House Correspondents’ Association “doing all it could to block black reporters.” McClatchy says the WHCA “is looking to make amends, dedicating a scholarship for journalism students in McAlpin’s name.”

SEBELIUS TO ANNOUNCE RESIGNATION; OBAMA WILL NOMINATE OMB’S BURWELL AS SUCCESSOR.

The news that HHS Secretary Sebelius will announce her resignation Friday received only brief mention on the three broadcast network newscasts, since it was breaking news at the time of the shows, but all three called the introduction of the Affordable Care Act under her tenure “rocky.” ABC World News (4/10, story 6, 0:15, Sawyer) said “she led the rocky introduction of Obamacare,” the CBS Evening News (4/10, story 3, 0:15, Pelley, 5.08M) said she “has been under fire over the rocky roll-out,” and NBC Nightly News (4/10, story 5, 0:30, Williams, 7.86M) said she is leaving “after five years on the job and following the rocky roll-out of President Obama’s healthcare law.”

Print, wire, and online coverage also focuses on the challenges with the roll-out. USA Today (4/11, A1, Schouten, Kennedy, Madhani, 5.82M) reports President Obama accepted Sebelius’ resignation earlier this week, and “officials suggested Sebelius made the decision on her own to resign and was not forced out.” USA Today says she is going out on a high note, telling the Senate Finance Committee Thursday “that 7.5 million people had enrolled in private health insurance plans – 500,000 more people more than Congressional Budget Office’s initial projections.” Reuters (4/11, Morgan) reports Sebelius told the committee, “We expect that to continue to grow.”

The New York Times (4/11, Shear, Subscription Publication, 9.65M) says Sebelius is departing after “a stormy five-year tenure marred by the disastrous rollout” of the Affordable Care Act. The Times says the timing of the exit comes “as the Obama administration tries to move beyond its early stumbles in carrying out the law, persuade a still-skeptical public of its lasting benefits, and help Democratic incumbents” this fall.

The Washington Post (4/11, A1, Eilperin, Goldstein, 4.22M) says Sebelius had a “tumultuous” tenure, and faced calls for her resignation during the ACA roll-out problems late last year. But she “remained a tireless promoter of the health-care law over the past six months.” The Post says a White House official said Sebelius “notified Obama in early March that she planned to leave.” The Wall Street Journal (4/11, Radnofsky, Lee, Subscription Publication, 5.51M) reports HHS spokeswoman Dori Salcido said in a statement, “As she closes this chapter, Secretary Sebelius is extremely thankful to President Obama and very proud of the historic accomplishments of this administration.”

The Los Angeles Times (4/11, Parsons, 3.46M) says Sebelius, "once considered a rising star in the Democratic Party, oversaw the deeply flawed debut" of the healthcare exchanges. The Washington Times (4/11, Boyer, 455K) similarly says she "bore much of the criticism for the flawed Obamacare website's rollout." But Ezra Klein writes at Vox (4/11) that Sebelius can leave because "Obamacare has won." While the demands last year "that Sebelius to step down – or be fired – were as deafening inside" the White House as outside it, the enrollment successes reported this month have vindicated the law and Sebelius.

Bloomberg News (4/11, Wayne, Goldman, Armstrong, 2.76M) and The Hill (4/11, Viebeck, Sink, 237K) "Healthwatch" blog also have reports.

Obama To Nominate OMB's Burwell To Succeed Sebelius. The New York Times (4/11, Shear, Subscription Publication, 9.65M) reports President Obama will name OMB Director Burwell as Sebelius' successor. She "has spent much of the past year mired in Washington's fiscal fights, including the standoff that led to a 15-day government shutdown in early October," and if confirmed would "take over one of the largest and most unwieldy parts of the federal bureaucracy."

The Wall Street Journal (4/11, Paletta, Subscription Publication, 5.51M) says that a senior Administration official said Burwell was the only candidate the President considered, seeing her strong management skills as essential in a new HHS chief. Her 96-0 confirmation as OMB director last April, during a time when many nomination fights were contentious, was also a factor.

Politico (4/11, White, Epstein, 73K) says "the theory among senior Democrats is that Burwell will be both hard for Republicans in the Senate to reject...and hard for them to demonize once she's in the job." They say her "relationships with Republicans on the Hill should help ease her confirmation, though administration officials are aware that Republicans will use the hearings as an opportunity to score points" on the ACA.

Republicans Use Resignation News To Again Slam ACA. The Wall Street Journal (4/11, Peterson, Subscription Publication, 5.51M) says Republicans used the announcement as an opportunity to again criticize the ACA. Senate Minority Leader McConnell said, "Regardless of the Administration's public explanation for the secretary's exit, Obamacare has been a rolling disaster and her resignation is cold comfort to the millions of Americans who were deceived about what it would mean for them and their families." Sen. Charles Grassley said, "Anybody put in charge of Obamacare would be set up to fail."

Gerald Seib writes in his Wall Street Journal (4/11, Subscription Publication, 5.51M) column that though Sebelius has become the public face of the ACA, her departure will not end the debate over the law. The problems with the law's introduction, he argues, were due to its complexity and a series of tight deadlines, and until its success or failure can be seen over the longer term, the arguing will continue.

Paul Krugman writes in his New York Times (4/11, Subscription Publication, 9.65M) column, "When it comes to health reform, Republicans suffer from delusions of disaster. They know, just know, that the Affordable Care Act is doomed to utter failure, so failure is what they see, never mind the facts on the ground." The Times says it is "clear that the number of uninsured Americans has already dropped significantly."

HOUSE PASSES RYAN BUDGET PLAN. In a largely party-line vote on Thursday, the House passed Budget Chairman Paul Ryan's budget plan, which includes an overhaul of safety net programs like Medicare and Medicaid, reduces spending by \$5.1 trillion over 10 years, and repeals some parts of Affordable Care Act. Print coverage this morning focuses on the fact that while the plan will serve as a campaign manifesto for Republicans going into the midterm elections, it stands no chance of passage in the Senate.

The Wall Street Journal (4/11, Peterson, Subscription Publication, 5.51M) notes that the 219-205 vote was almost entirely along party lines, as every Democrat and 12 Republicans voted against it. The Journal calls the vote a strategic win for Republican leaders, but notes that it is largely symbolic since the measure has almost no chance of being passed or even considered in the Democrat-controlled Senate.

The AP (4/11, Taylor) reports that the GOP budget "takes a mostly symbolic swipe at the government's chronic deficits," as follow-up legislation "to actually implement the cuts isn't in the offing." The AP notes that the three

days of debate that preceded Thursday's vote "again exposed the hugely varying visions of the rival parties for the nation's fiscal future." The AP adds that the plan paints "a picture of what Republicans would attempt if they claim the Senate this fall and the White House in 2016."

Reuters (4/11, Lawder) reports that while the Senate is unlikely to take up the plan, Thursday's vote will help frame the debate going into the midterm elections. Reuters notes that while the plan will serve as a campaign document for Republicans as they seek to underscore their desire to reduce the Federal debt, it will also prove an opportunity for Democrats to attack them over its proposed spending cuts.

Similarly, the New York Times (4/11, Weisman, Subscription Publication, 9.65M) notes that the plan "will go nowhere in the Senate," but will "become a central theme of this year's midterm campaigns, as Republicans use the vote to prove they are tough on fiscal matters," and Democrats "will pin on their opponents the deep cuts to education, food stamps and transportation, the transformation of Medicare and the tax rate cuts for the rich."

McClatchy (4/11, Lightman, Subscription Publication, 23K) reports that alternative budgets, including the President's budget plan, a Democratic plan, a conservative Republican plan, a Congressional Progressive Caucus budget, and a budget plan from the Congressional Black Caucus were all rejected by the House. McClatchy also notes that the Ryan budget is unlikely to win approval in the Senate, where Democrats "are not expected to offer their own plan this year."

Roll Call (4/10, Newhauser, 76K), in its "218" blog, examined the 12 Republican votes against the plan, breaking them down into several categories: the Georgia Senate Hopefuls, which include Reps. Paul Broun, Phil Gingrey, and Jack Kingston; the Committee Exiles, including Reps. Justin Amash and Walter Jones; the Conservative "Hell No" Caucus, which includes Reps. Rick Crawford, Thomas Massie, and Austin Scott; the Vulnerable Incumbents, including Reps. Chris Gibson and Ralph Hall; the Newbies, including Reps. Vance McAllister and Jon Runyan, who did not vote; and the Moderates, including Reps. David McKinley and Frank LoBiondo.

Van Hollen: Ryan Plan "Takes A Meat Axe To Federal Employees." The Washington Post (4/11, Davidson, 4.22M) reports in its "Federal Diary" column that the Ryan plan "would effectively cut the pay of federal workers and end their student loan reimbursement program, among other elements." The plan "would make the majority of federal employees pay 5.5 percentage points more toward their retirement program with no increase in benefits." Rep. Chris Van Hollen (D-MD), ranking Democrat on the Budget Committee, "called this 'a straight-out 5 percent pay cut.'" The plan would also "cut the federal workforce by hiring one new employee for every three who leave." Van Hollen said, "They come after federal employees with a vengeance in this budget. ... This House Republican budget takes a meat axe to federal employees."

With Budget Vote Behind Him, Ryan Must Decide On His Next Move. The Washington Post (4/11, Kane, 4.22M) reports that Thursday's vote brought to a close a "key chapter" in Ryan's "still-young career," setting up "several critical months in which he must decide his next political move." Ryan's term as chairman of the Budget Committee is set to expire and he must now "choose between running for president in 2016 or seeking to chair the Ways and Means Committee." The Post notes that Ryan "has kept his thinking private, making enough moves in each direction to keep even his close allies guessing about his plans." During the House recess, Ryan will visit Iowa. Meanwhile, Ryan "has been quietly attending events across the country to raise money for their campaigns," which could draw the attention of lawmakers "who will vote for the next Ways and Means chairman."

More Commentary. An editorial in the Wall Street Journal (4/11, Subscription Publication, 5.51M) argues that with House passage of the Ryan plan, Republicans have provided specific proof of their priorities. The Journal contrasts this with Democrats, who do not plan to offer a proposal and will not lay out their tax and spending plans until after the election, if ever.

In a piece for the Washington Times (4/11, Delay, 455K), former House Majority Leader Tom DeLay argues that "big government must be stopped and why a sense of individual responsibility and morality must be revived," and the Ryan budget plan "would be a major first step in that process."

Editorial Wrap-Up:

NEW YORK TIMES. "Abusing Both Medicare And Politics." The New York Times (4/11, Subscription Publication, 9.65M) says in an editorial that the case of Salomon Melgen, the Florida ophthalmologist who received \$21 million in Medicare reimbursements in 2012 and who gave \$700,000 to the Democratic-linked Majority PAC that same year, is at the intersection of political and Medicare malfeasance. Melgen's funds went mainly to help re-elect Sen. Robert Menendez, "a crony of Dr. Melgen," and the Times says there can be little doubt that "there is a quid pro quo in these payments? Yet it remains invisible to those tearing down campaign finance limits."

"For Greece, A Sign Of Stability." The New York Times (4/11, Subscription Publication, 9.65M) editorializes the "face that [Greece] can again borrow independently...is a sign of confidence" at a time when "political stability is critical for Greece and Europe as they emerge from the euro-zone crisis." The Times says despite the improvement, "a long and painful road lies ahead," but "even a modest sign of stability is welcome."

"Keeping Track: April 11, 2014." In the latest edition of the New York Times' (4/11, Subscription Publication, 9.65M) "Keeping Track" feature on its editorial page, the Times examines the United States Sentencing Commission's vote to reduce the guideline ranges for drug trafficking offenses and the SEC's proposed rules on crowdfunding.

"Mr. Cuomo's Gift To The Cynics."

WASHINGTON POST. "No Pass For The Military." An editorial in the Washington Post (4/11, 4.22M) argues that while Secretary of State Kerry is "eager to certify that the Egyptian regime of Gen. Abdel Fatah al-Sissi is 'taking steps to govern democratically,'" the government continues its efforts to restrict protesters and persecute journalists. Noting that an Egyptian court this week "upheld three-year sentences for three of the country's best-known political prisoners," the Post argues that this should not be "tolerated by Congress." The Post quotes Sen. Patrick Leahy, who said, "If the military continues its repressive tactics, arresting democracy activists, and does not hold free and fair elections, the certifications will not be possible and U.S. aid will be cut off," and says Kerry and Sissi "must be held to that standard."

"Fast Stocks, High Stakes." In an editorial, the Washington Post (4/11, 4.22M) says that high-speed trading is a questionable practice, and needs to be "examined." The Post says that it hopes that "investigations now underway will not only determine whether high-frequency trading has stepped over a legal line but also shed light on what, exactly, is happening in this black box of our economy." The Post concludes, "We can't slow down technology, but we should insist on rules to keep markets free, open and fair."

"Half A Hit." The Washington Post (4/11, 4.22M) says in an editorial that "Maryland's marijuana laws remain a work in progress." But the state is moving in the right direction, and "wisely, lawmakers demurred" from outright legalization. Allowing retail outlets "to sell the drug may turn out to be harmless, though we have our doubts. ... Better to watch the results from Colorado and Washington before following them blindly."

WALL STREET JOURNAL. "Live Free Or ObamaCare." The Wall Street Journal (4/11, Subscription Publication, 5.51M) says in an editorial that though Sen. Jeanne Shaheen has been a vocal supporter of the Affordable Care Act, she is now seeking help from HHS in its implementation as she seeks re-election in New Hampshire. Just one insurer, Anthem Blue Cross and Blue Shield, has opted to participate in the state's exchange, creating a potential monopoly in a state that used to have a competitive insurance industry. HHS has since granted Massachusetts-based Minuteman Health, a non-profit, nearly \$67 million to begin operations in New Hampshire. The Journal says HHS should instead deregulate.

"Ryan's Right Symbol." An editorial in the Wall Street Journal (4/11, Subscription Publication, 5.51M) argues that with House passage of Budget Committee Chairman Paul Ryan's budget plan, Republicans have provided specific proof of their priorities. The Journal contrasts this with Democrats who do not plan to offer a proposal and will not lay out their tax and spending plans until after the election, if ever.

"A Partial Victory For Taxpayers." In an editorial, the Wall Street Journal (4/11, A12, Subscription Publication, 5.51M) praises the move by Federal financial regulators to require the largest banks to hold more capital to protect against losses. The Journal says that this is a win for taxpayers, as they would have to pay out less and the shareholders more if one of these institutions collapses. However, the Journal expresses concern over the

FDIC's finalization of the Basel bank standards, which give regulators leeway to determine which banks are considered risky and which are safe, and therefore set their capital requirements.

Notes: Media Reply by: 12:00 p.m., Thursday, April 10, 2014 Reply to: dcpresrsvp@cfr.org Camera pre-set 10a.m. – 12p.m.

Last Laughs:

LATE NIGHT POLITICAL HUMOR.

Jimmy Fallon: "Guys, pay wages are a big issue right now and during a town hall yesterday, Chris Christie... said that he vetoed a higher minimum wage in New Jersey because it raised the rate by too much, too soon. Incidentally, 'too much, too soon' was also the weight on Christie's birth certificate."

Seth Meyers: "I'm going to start off tonight with some good news. This is good news for Hillary Clinton supporters. ... A super PAC urging Hillary Clinton to run for president says it raised \$1.7 million in the first three months of the year. Said President Obama, 'I'll kick in another million if she is willing to start early.'"

DOI in the News:

FEDERAL OFFICIALS WORKING TO RESOLVE MATTER WITH NEVADA RANCHER. The [AP](#) (4/15, Sonner) reports that Nevada rancher Cliven Bundy said Monday "he's trying to determine if federal agents damaged his cattle when the animals were rounded up then released in a showdown with angry protesters over a decades-long dispute about rangeland rights." BLM spokesman Craig Leff said the bureau "will work to resolve the matter 'administratively and judicially' but planned no further public comment on Bundy's case." Meanwhile, the BLM's National Wild Horse and Burro Advisory Board was "meeting in Sacramento on Monday on the broader issue fueling the conflict over how to divide the scarce forage on mostly dry lands across the West between livestock, wild horses and wildlife."

The [Las Vegas Review-Journal](#) (4/15, 437K) reports that Leff noted that the BLM did not participate in the negotiation moderated by Clark County Sheriff Doug Gillespie that de-escalated tensions on Saturday. Leff said, "The BLM and National Park Service did not cut any deal and negotiate anything." He added, "The door isn't closed. We'll figure out how to move forward with this."

Sen. Reid Vows Ranch Confrontation "Not Over." In its "E2 Wire" blog, [The Hill](#) (4/15, 237K) reports that Senate Majority Leader Harry Reid weighed in Monday on the Nevada ranch standoff, warning that even though federal agents retreated over the weekend, "it's not over." Reid said, "We can't have an American people that violate the law and then just walk away from it. So it's not over."

The [Washington Times](#) (4/15, Richardson, 455K) reports that Reid has been "accused of attempting to shut down the ranch in order to move ahead with two nearby solar energy projects, an accusation denied Monday by the senator's press aide." Reid spokeswoman Kristen Orthman said that "there is no truth to the conspiracy theories that are being pushed by right-wing media outlets."

In an op-ed for the [Washington Times](#) (4/15, Phillips, 455K), Judson Phillips, the founder of Tea Party Nation,

raises questions about Reid's connection to the dispute. Phillips acknowledges that it is a "circumstantial, case," but "it is a case that merits investigation."

Also reporting on the story are USA Today (4/14, 5.82M), FOX News (4/14, 74.23M), the Reno (NV) Gazette-Journal (4/15, 166K), the Examiner (4/15, 1.56M), and the New American (4/15, 9K).

Bundy Wants Sheriffs To "Disarm" BLM. Politico (4/15, Kopan, 73K) reports that Bundy said Monday that "his standoff with the feds isn't just about cattle: It's about an 'overpowering' bureaucracy in the US that needs to be disarmed." On Glenn Beck's radio show on TheBlaze on Monday, Bundy said, "I only want to talk to one person in each county across the United States, and here's what I want to say: County sheriffs, disarm US bureaucracy. County sheriffs, disarm US bureaucrats." He added, "My Clark County sheriff, Doug Gillespie, didn't finish his job. What the mandate from we the people was, Saturday was to disarm the park service and BLM. And when he didn't do that, and his time was up, then we the people took it into our hands and had to do the sheriff's job and the governor of Nevada's job."

Reuters (4/15, Shurmur) reports that at a press conference on Monday, Bundy said, "Every sheriff across the United States of America, take away the guns from the United States bureaucrats." Also, Nevada state Assemblywoman Michele Fiore, said, "Understand it is because of each and every one of you standing here and each and every one of our Americans watching us and protecting us with our firearms why this did not turn into Waco massacre or a Ruby Ridge."

FOX News (4/14, 74.23M) reports that on Monday, Bundy's daughter, Bailey Logue, went On The Record to discuss the conflict between her father and agents from the BLM. Logue said, "It's about our freedom, it's about our state's sovereignty, and it's about people standing up for what's right."

Also reporting on the story are the Las Vegas Sun (4/14, 148K) and KTNV-TV Las Vegas (4/15, 19K).

Additional Commentary. The Las Vegas Review-Journal (4/15, 437K) editorializes that the BLM's decision to back off has made the situation worse. The paper argues that the decision does not resolve the issue, and emboldens Bundy and his supporters. Rob Mrowka, senior scientist with the Center for Biological Diversity, said, "The BLM is setting a dangerous precedent in announcing that it will pick and choose who has to follow federal laws and who it will reward for violating them."

Free speech, assembly are the right tools to balance powerful government.

In an op-ed for USA Today (4/15, Federman, 5.82M), Eli Federman, an executive at an e-commerce company, writes that "regardless of who may be right, citizens and media spotlighting this conflict represents much needed oversight over government." Federman argues that "the lesson is about caring citizens standing up for a cause, while openly criticizing and scrutinizing the government." He asserts that "freedom of speech and assembly are the central pillars of our democracy that have historically been instrumental in exposing wrongs and bringing about positive social change."

Additional Coverage. Additional coverage of the dispute was provided by the Las Vegas Review-Journal (4/15, 437K), USA Today (4/15, Loomis, 5.82M), FOX News (4/14, 74.23M), NPR (4/15, Robbins, 519K), the Atlantic (4/15, Ford, 8.78M), MSNBC (4/15, 45.1M), the Canada Free Press (4/15, 1.14M), the New American (4/15, 9K), The Week (4/15, 1.85M), and the Examiner (4/15, 1.56M).

DRAKES BAY OYSTER CO. APPEALS TO SUPREME COURT. The San Francisco Chronicle (4/15, 3.33M) reports that the Drakes Bay Oyster Co. filed a petition Monday to take its fight to stay open to the US Supreme Court.

The Marin (CA) Independent Journal (4/15, 88K) reports that Kevin Lunny, owner of Drakes Bay Oyster Co., said in a statement, "If this judgment is not overturned, government agencies will have the power to deny a permit to any individual or business for any reason, without judicial review. Citizens must have recourse in the face of an arbitrary and capricious decision."

The Petaluma (CA) Argus Courier (4/14, 1K) reports that "the high court, which hears about 1 percent of the

10,000 cases it receives each year, is likely to decide on the oyster company's request in October," according to Peter Prows, a San Francisco attorney representing farm operator Kevin Lunny.

Also providing coverage are the [Santa Rosa \(CA\) Press Democrat](#) (4/14, 148K) and [KQED-FM San Francisco](#) (4/14, 13K).

Executive Director Of Environmental Action Committee Criticizes Drakes Bay Oyster Company. In an op-ed for the [East Bay Express](#) (4/14, 5K), Amy Trainer, the executive director of the Environmental Action Committee of West Marin, claims that "the oyster company's petition is full of false statements of fact and exaggerations." Trainer concludes that the Supreme Court would "serve the American people well by rejecting this specious petition and returning our only West Coast marine wilderness to all of us and future generations to enjoy."

OP-ED: "POLITICS" COULD RUIN ALASKA'S ENERGY FUTURE. In an op-ed for the [Washington Examiner](#) (4/15, 335K), Anthony J. Sadar, a certified consulting meteorologist, claims that the "US has the rich resources and the sophisticated and ethical ability to do right by the planet and its people." However, he notes that "politics" has proved to be an obstacle. Sadar notes that Royal Dutch Shell postpone its plans in the Chukchi Sea off Alaska's northwest coast because of a decision by the Ninth Circuit Court of Appeals. Also, the Interior Department has rejected "Alaska's plan for oil and gas exploration in a portion of the Arctic National Wildlife Refuge."

America's Great Outdoors:

National Park Service:

TRASH LEFT BEHIND AT CHERRY BLOSSOM FESTIVAL. The [Washington Post](#) (4/15, Rosenwald, 4.22M) reports that the NPS, "responding to criticism of its cleanup work at the Cherry Blossom Festival, said a confluence of factors — gorgeous weather, peak blossom blooms and not being ready enough for mammoth crowds — led to the mounds of trash on the Mall this past weekend." Carol Johnson, a spokeswoman for the NPS, said Monday that "it was clear that 'in retrospect, we wish we had brought on more staff.'" Robert Vogel, superintendent of the National Mall and Memorial Parks, "conceded Sunday evening that 'we did drop the ball a little bit.'"

D.C. ARTSHOW SPOTLIGHTS OLD NATIONAL PARK POSTERS. The [Los Angeles Times](#) (4/15, Reynolds, 3.46M) reports that "a new art show in Washington, D.C., spotlights national park posters from the Depression years, including the frothy falls of Yellowstone, the jagged mountains of Glacier and the native ruins of Bandelier National Monument." Titled "Posterity," the show at the US Department of the Interior Museum is "built around six original posters that date to the Depression years." The "Posterity" show, which opened April 8, is scheduled to run through spring 2015.

NPS RELEASES TAGGED RAZORBACK SUCKERS IN GRAND CANYON. [KCSG-TV](#) St. George, UT (4/15, 43) reports that on March 16th, NPS biologists "successfully released nine adult endangered razorback suckers (*Xyrauchen texanus*) in the Colorado River downstream of Lava Falls (River Mile 180)." According to the article, "by tracking the sonic-tagged fish that were released, biologists may be able to detect groups of other spawning razorback suckers, and assess their movements and habitat use." Grand Canyon National Park Superintendent David Uberuaga said, "We're extremely excited to release one of the Colorado River's iconic native fish species back into Grand Canyon. It is an important part of our efforts to protect the park's native fish species."

NPS WORKING TO STAFF CAPE HATTERAS SEASHORE WITH LIFEGUARDS. [WUNC-FM](#) Chapel Hill, NC (4/15, 15K) reports that the NPS is "trying to keep at least a few lifeguards on the Cape Hatteras Seashore this summer." Federal officials "cut the \$200,000 program that staffed three beaches seven days a week during the summer." Now, Outer Banks Group Superintendent Barclay Trimble said "he wants lifeguard service contractors to offer bids that can accommodate a tighter budget."

SIX TENNESSEE SITES ADDED TO NATIONAL REGISTER OF HISTORIC PLACES. The [AP](#) (4/15) reports that six Tennessee sites have been added to the National Register of Historic Places. The new sites in

Tennessee are: the Grand Guitar in Bristol, the Tennessee Supreme Court Building in Nashville, Mead and Ross Marble Quarries in Knox County, the Martin-Dobyns House in Kingsport and the Blountville Historic District.

Bureau of Land Management:

BLM, IRON COUNTY COMMISSIONERS AGREE ON WILD HORSE SOLUTION. The St. George (UT) Spectrum (4/14, 48K) reports that the Iron County Commissioners signed an agreement with the BLM "on Monday during their bi-weekly commission meeting promising to combine efforts to trap feral horses on private property located on the western range." The agreement "authorizes the two agencies to work together to water and bait trap the feral horses on the range adjacent to the Bible Springs Horse Management Area Complex where the BLM has identified horse herds 'interfering with private land operations.'" The article notes that "the agreement between the two agencies lays out several responsibilities each side will have in this effort, including the expected treatment of the horses and procedures for appropriately handling them."

ENVIRONMENTAL GROUP DONATES COAST DAIRIES PROPERTY TO BLM. The San Jose (CA) Mercury News (4/15, 696K) reports that the Trust for Public Land, a San Francisco environmental group, on Monday donated to the BLM "the Coast Dairies property – a pastoral expanse of rolling meadows, redwood forests and panoramic ocean views north of Santa Cruz." Rick Cooper, field manager with the BLM office in Hollister, said, "This property has redwood forests and creeks. It's a spectacular area for the public to get a true recreational experience, hiking up the terraces. And looking back over the ocean, it's a great view." According to Cooper, "by the end of this year, two trails should be open to the public for hiking."

BLM TO CLOSE STEAMBOAT MOUNTAIN TO VEHICLES. The AP (4/15) reports that the BLM says "it will temporarily prohibit vehicles on a mountain northeast of Rock Springs this spring." The objective is "to protect elk and deer while they're calving." Steamboat Mountain will be closed to vehicles between May 1 and June 30.

Fish and Wildlife Service:

WHITE HOUSE PRESSED TO PROTECT MONARCH BUTTERFLIES. For the "Dot Earth" blog of the New York Times (4/15, Revkin, 9.65M), Andrew C. Revkin writes that "a letter sent on Monday to President Obama and relevant cabinet members by a group of scientists, educators, farmers, and other concerned citizens organized by the Xerces Society and other conservation groups" presses for a "rescue" of monarch butterflies. The letter "describes policies the administration could pursue on both public and private land along the butterfly's migratory path."

WHITE BLUFFS BLADDERPOD SUBPOENA COULD SHED LIGHT ON FWS DECISION-MAKING. The Yakima (WA) Herald-Republic (4/15, 86K) reports that the White Bluffs Bladderpod has "become a symbol" for Rep. Doc Hastings and "his allies in Congress for much of what they believe is wrong with the Endangered Species Act." According to the article, "the underlying issue is really how" the FWS "can separate science from politics when it makes listing decisions." Hasting's subpoena "may shed some more light on how the agency weights and balances evidence, or it may find evidence of bias. For now, we will just have to wait and see."

WHITEFISH SHORTAGE CAUSING PASSOVER MEAL PROBLEMS. The AP (4/15, Flesher) reports that "a shortage of whitefish in the Great Lakes region resulting partly from the winter deep freeze is coming at an inconvenient time for Jewish families: the Passover holiday, when demand is high because it's a key ingredient in a traditional recipe." The article notes that "the whitefish shortfall is yet another ripple effect of the bitterly cold winter, which caused more than 90 percent of the Great Lakes surface area to freeze over." Chuck Bronte, senior fishery biologist with the FWS in Green Bay, Wis., said, "You have a lot of boats that can't get out to fish, even now."

REP. PEARCE HOSTS PRAIRIE CHICKEN MEETINGS. The AP (4/15) reports that Rep. Steve Pearce is "hosting a series of town halls to discuss the effects of the federal government's decision to list the lesser prairie chicken as a threatened species." Pearce says officials with the FWS, the BLM, and the Department of Agriculture have been invited to the meetings.

SNOWY OWLS SPOTTED IN NEW ENGLAND. The Newsmax (4/14, 486K) reports that "snowy owls normally

found in the arctic have been spotted much further south across New England this spring, causing speculation about what's attracting them." According to the article, "the record number of snowy owls has delighted many nature lovers, while at the same time irritated native birds who see the new predators as competition." Donald Freiday with the FWS said, "We had about 2,000 cars come through so far in December, and that's two times the number we usually have for this same period." He continued, "It's actually pretty special to have snow owls in New Jersey. We normally in a given winter will have between none and three. This year, the whole state there are as many as 30."

WYOMING'S SAGE GROUSE PROTECTION STRATEGY LAUDED. In an editorial, the Casper (WY) Star-Tribune (4/15, 90K) calls the \$7.9 million Wyoming has spent "on its efforts to protect the greater sage grouse population since 2005" as "well spent." According to the paper, "those millions protected sage grouse, warded away the restrictive federal endangered species protection and allowed abundant energy development in the state worth millions more that likely would've been shut out if not for responsible management of the species." The paper dubs the strategy of allowing "the state to take ownership of a problem and forge its own solutions" as "the Wyoming way."

Securing America's Energy Future:

Renewable Energy:

GOGGIN: WIND PRODUCT TAX CREDIT ESSENTIAL TO RECENT WIND INDUSTRY SUCCESS. In an op-ed for Roll Call (4/15, Subscription Publication, 76K) responding to another Roll Call op-ed titled "A Warning to Congress: Renewal of Wind Energy Subsidies Will Lead to a Big Boost in Carbon Emissions," American Wind Energy Association senior electric industry analyst Michael Goggin writes that the previous column "deploys three myths to obfuscate wind energy's pollution savings and strikes out on all three." Refuting the previous article's claims, Goggin argues that the wind production tax credit is essential to wind's recent success, and that "changing course will reverse those gains by shutting down wind's domestic supply chain," costing "about 80,000 American jobs and 550 wind energy manufacturing facilities spread across 44 states."

Onshore Energy Development:

BLM EXTENDS SCOPING PERIOD FOR GAS LEASE REVIEW. The Glenwood Springs (CO) Post Independent (4/15, 27K) reports that "a public scoping period that begins with a series of meetings in Glenwood Springs, Carbondale and Aspen this week as the U.S. Bureau of Land Management starts its review of 65 existing oil and gas leases on the White River National Forest has been extended until May 16." The BLM is "conducting an Environmental Impact Statement to address deficiencies that were identified by the Interior Board of Land Appeals in a 1993 Forest Service EIS that was used as the basis for issuing the leases across an area extending from the embattled Thompson Divide region southwest of Glenwood Springs to an area just east of De Beque."

EXPERTS: UPTICK IN QUAKES SEEMS RELATED TO WASTEWATER, BUT MORE RESEARCH NEEDED. CNBC (4/15, David, 31.28M) reports that although experts have indicated that "the overall uptick in earthquakes in the continent seems to be related to" fracking wastewater injection wells, "even staunch fracking opponents have stopped short of drawing an outright connection," saying that there is a need for more research and data on the subject. "We have a need for energy, and if we are going to get it, we need to do it safely," CNBC reports Cornell University geophysicist Katie Keranen said in an interview, noting that "rather than putting a damper on the boom, it will force a drive for new technology and operations and practices."

"WASTEFUL" GOVERNMENT SPENDING CRITICIZED. In an editorial blasting "wasteful" government spending, the Washington Times (4/15, 455K) notes that "six Colorado-based Office of Natural Resources Revenue employees were tasked with preventing waste and fraud of tax dollars." But "they used taxpayer largesse to finance new scams, including a \$13,000 vacation in Las Vegas." According to the paper, "rather than attend a fraud investigators conference in Denver like they were assigned to do, federal bureaucrats headed to Las Vegas and stayed there for an extra party day after the conference ended, at public expense."

Offshore Energy Development:

BOEM TO START WORKING ON NEXT FIVE-YEAR OFFSHORE LEASING PLAN. The National Journal (4/15, Subscription Publication, 561K) reports that BOEM Tommy Beaudreau said that the agency will “soon start constructing its next five-year offshore leasing plan, which will cover 2017-2022.” Beaudreau said, “The new five-year planning process for the period 2017-2022 will actually start this summer. One of the areas that we will be considering are those mid- and south-Atlantic planning areas.”

Tackling America's Water Challenges:

ARIZONA'S RIGHTS TO COLORADO RIVER COULD SUFFER IF INTERIOR DECLARES SHORTAGE. The Tucson (AZ) Sentinel (4/15, 1K) reports that “if the Colorado River’s flow continues to suffer,” the Interior Department could “declare a shortage as early as 2017.” The article notes that “under the agreement that established the CAP, Arizona’s rights to the Colorado would take a hit before California loses a drop, triggering conservation steps that include reducing delivery to irrigated farms that use the majority of Arizona’s water supply.” However, “a 2011 report by Arizona State University’s Morrison Institute for Public Policy said policymakers have avoided the topic because of the fear that it could create negative perceptions that could hinder growth.”

WATER MANAGERS SAY DROUGHT STRENGTHENS ARGUMENT FOR LAKE POWELL PIPELINE. The St. George (UT) Spectrum (4/13, 48K) reports that “another year of drought shouldn’t be enough to force any water restrictions this year for Washington County residents, but state managers say it is enough to make a case for tapping into the Colorado River by building the 140-mile Lake Powell Pipeline.” Eric Millis, director of the Utah Division of Water Resources, said, “The pipeline makes it possible for surpluses on the Colorado River to compensate for drastic shortages in the Virgin River during extreme years such as this one.” On the other hand, LeAnn Skrzyński, executive director of Citizens for Dixie’s Future, “an advocacy group opposed to the pipeline, has argued that the ongoing drought is not a sign that the pipeline is needed but a sign that people should be learning to conserve more.”

FULL-SCALE SECURITY EXERCISE PLANNED AT FOLSOM DAM. The Central Valley (CA) Business Times (4/15, 206) reports that “a full-scale security ‘exercise’ is planned for Folsom Dam on Wednesday, April 23,” by the BOR, the Sacramento County Sheriff’s Department/Folsom Dam Security Bureau, city of Folsom police and fire departments, California State Parks, Sacramento Office of Emergency Services, the US Army Corps of Engineers and the Sacramento County Department of Technology. The exercise will simulate emergency response activities at Folsom Dam.

Empowering Native American Communities:

NEW MEXICO HIGH COURT ORDERS RECOGNITION OF FORT SILL APACHE. The AP (4/15, Massey) reports that “New Mexico’s highest court on Monday ordered Gov. Susana Martinez to recognize the Fort Sill Apache as a New Mexico tribe.” The decision by the Supreme Court will “force Martinez to invite the tribe to annual tribal-state summits called for under a 2009 law that requires sovereign government-to-government cooperation.”

Top National News:

OBAMA PLEADS FOR AN END TO “INTOLERANCE” FOLLOWING TRIPLE MURDER BY WHITE SUPREMACIST. All three network newscasts led with reports on a triple murder that took place near Kansas City on Sunday. At the opening of NBC Nightly News (4/14, lead story, 4:10, Williams, 7.86M), Brian Williams said, “There’s been another terrible outburst of violence, this time a shooting at a Jewish community center in a suburb of Kansas City.” According to Williams, a “73-year-old man identified as a veteran of the Ku Klux Klan is accused of the shooting death of three people on the eve of Passover.”

The AP (4/14, 783K) reports that on Monday, “during an Easter prayer breakfast at the White House,” President Obama “vowed that the government would provide whatever is needed to support the investigation” and “urged Americans to stand united against ‘religious-based’ violence,” saying, “No one should ever have to fear for their safety when they go to pray.”

The Washington Times (4/15, Boyer, 455K) quotes the President as saying, "We see what happens around the world when this kind of religious-based or tinged violence can rear its ugly head." McClatchy (4/14, Wise, Subscription Publication, 23K) says the President "called on Americans to unite against intolerance." The President is quoted as saying, "We have to keep coming together across faiths to combat the ignorance and intolerance, including anti-Semitism, that can lead to hatred and to violence, because we are all children of God, all made in his image."

The Los Angeles Times (4/15, Hennessey, 3.46M) reports that on Monday, President Obama "noted that he had a connection to two of the victims," a "teenager and his grandfather...[who] attended the United Methodist Church of the Resurrection." According to the Times, "That church's pastor, Rev. Adam Hamilton, delivered the sermon at the prayer service...marking Obama's second inauguration and attended last year's prayer breakfast at the White House." The Topeka (KS) Capital-Journal (4/15, 177K) and Reuters (4/15, Felsenthal) also cover the President's remarks touching on this weekend's tragedy.

Linda Feldmann, in a piece for the Christian Science Monitor (4/15, Feldmann, 566K), notes that Reat Underwood, and his grandfather, William Corporon, were at the Jewish Community Center "for a singing competition." Feldmann reports that the third victim, Terri LeManno, "was an occupational therapist and mother of two."

USA Today (4/15, Bacon, 5.82M) provides a profile of Reat Underwood, "an Eagle Scout who enjoyed 'spending time camping and hunting with his grandfather, father and brother.'" According to Mindy Corporon, "Reat's mother and the daughter of William Corporon." USA Today also reports that Terri LaManno's family "are long-time parishioners at St. Peter's Catholic Church in Kansas City, where a rosary was said for LaManno after Monday morning Mass."

The New York Daily News (4/14, Larson, 4.36M) reports that on Monday, the President "welcomed 150 Christian leaders to the White House East Room for the fifth annual Easter Prayer Breakfast." The Daily News notes that Rev. Otis Moss, "who replaced the controversial Rev. Jeremiah Wright at Chicago's Trinity United Church of Christ, delivered the sermon," and President Obama "asked Gene Robinson, the first openly gay Episcopal bishop, to deliver the closing prayer." The Daily News notes that MSNBC's Al Sharpton was in attendance.

USA Today (4/15, Jackson, 5.82M) reports that Obama, "like many of his predecessors, is very serious about reaching out to faith groups," and following the "Easter prayer service on Monday," he will "host...a now-annual Passover seder with family, aides and friends on Tuesday."

Murderer Founded His Own KKK Chapter, Was Imprisoned For "Stockpiling Illegal Weapons." On ABC World News (4/14, lead story, 2:45, Sawyer), it was reported that the murderer, "Frazier Glenn Cross, who goes by the last name 'Miller,'" is "a former grand dragon of the Ku Klux Klan and lifelong and raging anti-Semite." On the CBS Evening News (4/14, lead story, 2:25, Pelley, 5.08M), Scott Pelley noted that "all of the victims...were Christian."

Also on the CBS Evening News (4/14, story 2, 2:25, Pelley, 5.08M), Bob Orr reported that "for nearly 40 years, the suspect, Frazier Glenn Miller, has pursued an agenda of intolerance and racism." Orr added that according to the Southern Poverty Law Center, Miller "founded his own chapter of the Ku Klux Klan." Orr went on to report that in 1987, "Miller and four other klansmen were arrested for stockpiling illegal weapons," and Miller "spent three years in prison" before "getting out early in exchange for testifying against fellow white supremacists."

The Los Angeles Times (4/15, Hennessey-fiske, Muskal, 3.46M) reports that Overland Park Police Chief John Douglass "confirmed that the evidence gathered in Sunday's shootings supports a hate crime presentation to a federal grand jury." The New York Times (4/15, Williams, Fitzsimmons, Subscription Publication, 9.65M) quotes Douglass as saying, "We believe this to be a hate crime. ... We believe his motivation was to attack a Jewish facility." USA Today (4/15, Johnson, Bacon, 5.82M) reports Barry Grissom, the U.S. Attorney for the district of Kansas, said on Monday, "We will be filing hate crime charges."

The Huffington Post (4/14, Walker, 11.54M) reported that in "video...taken by Kansas City news station KMBC," Miller can be heard, "after he was taken into custody...shout[ing] what sounded like 'Heil Hitler!'"

The Washington Post (4/15, Phillip, 4.22M) reports that in the 1980s, the Southern Poverty Law Center sued Miller "for operating an illegal paramilitary organization and using intimidation tactics against African Americans." According to the Post, Miller "later founded...the White Patriot Party, which put him in violation of the terms that settled the suit brought by the SPLC," and he was "found in criminal contempt in 1986 and served six months in prison."

According to the New York Times (4/15, Williams, Fitzsimmons, Subscription Publication, 9.65M), Miller "served three years in federal prison for weapons charges and for plotting robberies and the assassination of [Southern Poverty Law Center] founder, Morris Dees." The Times also notes that Miller "made several unsuccessful runs for public office, including a bid for the Senate in 2010."

USA Today (4/15, Jervis, 5.82M) reports that Mark Pitcavage, director of investigative research at the Anti-Defamation League, warns that "as groups like the Ku Klux Klan are aging and splintering, their former members often act as 'lone wolves' – willing to carry out violent attacks despite their age."

CBO: 2014 US DEFICIT ON TRACK TO BE JUST 2.8% OF GDP. Bloomberg News (4/15, Wallbank, 2.76M) reports that on Monday, the Congressional Budget Office announced that "the U.S. government's deficit will fall to \$492 billion this year...a steeper drop than originally predicted from \$680 billion in fiscal year 2013." Bloomberg notes that if the trends continue, this year's deficit "will be 2.8 percent of the economy," or "almost 32 percent below fiscal year 2013, when it was 4.1 percent." According to Bloomberg, President Obama "has often pointed to the declining deficit in making the case for his economic program, including greater spending on infrastructure and other items," while Republicans "have called for deeper cuts to balance the budget."

The Wall Street Journal (4/15, Paletta, Subscription Publication, 5.51M) reports that the CBO's forecast that the Federal spending in 2014 will total \$3.523 trillion, which is 20.4% of GDP. The Journal also notes the CBO anticipates that the deficit will begin to grow again as soon as 2016 as a result of increased entitlement spending.

Under the headline, "Obama's Shrinking Budget Deficits Silence Foreign Fiscal Critics," Bloomberg News (4/15, Katz, 2.76M) reported that just "six months ago, global finance officials," including the IMF's Christine Lagarde, "berated the U.S. for failing to put its fiscal house in order," but now they are "silent" as the CBO "is projecting the 2014 deficit will be the lowest in six years and down more than 60 percent from the record \$1.4 trillion in 2009."

RETAIL SALES UP 1.1% IN MARCH. The Wall Street Journal (4/15, Morath, Subscription Publication, 5.51M) reports the Commerce Department announced that retail sales were up 1.1 percent in March over February, which is being presented as evidence of a recovering economy, though the first quarter was up only slightly over the fourth quarter of 2013. In addition to sales, hiring was also up in March as was factory production, and consumer sentiment was at its highest since July. In addition, sales were up across the board, with auto sales up 3.1 percent in March, though some analysts argue that March sales were the result of abnormally depressed sales earlier in the winter due to bad weather.

Bloomberg News (4/15, Timberlake, Townsend, 2.76M) reports that despite the growth in March, Moody's "cut its forecast for 2014 sales," and analysts reduced "estimates for retailers' first-quarter profits."

Stocks Rise On Retail Sales, Citigroup Earnings Report. The Wall Street Journal (4/15, Strumpf, Subscription Publication, 5.51M) reports that stocks rose on Monday which was attributed to higher retail sales as well as Citigroup Inc.'s better-than-expected earnings report. The Dow Jones Industrial Average rose 146.49 points (0.9%) to 16173.24, while the Nasdaq Composite Index also gained 22.96 points (0.6%) to 4022.69, and the S&P 500 index was up 14.92 points (0.8%) to 1830.61. Despite Monday's gains, the averages are still down for the year with the Dow at -2.4%, the S&P 500 at -1%, and the Nasdaq Composite at -3.7%.

Editorial Wrap-Up:

NEW YORK TIMES. "*In The Middle East, Time To Move On.*" An editorial in the New York Times (4/15, Subscription Publication, 9.65M) argues that the time has come for the Obama Administration "to lay down the

principles it believes must undergird a two-state solution, should Israelis and Palestinians ever decide to make peace," and the President and Secretary of State Kerry "should move on and devote their attention to other major international challenges like Ukraine." While the President "made the right decision to give it a second try last summer, with Mr. Kerry bringing energy and determination to the negotiations," after "nine months, it is apparent that the two sides are still unwilling to move on the core issues of the borders of a Palestinian state, the future of Jerusalem, the fate of Palestinian refugees and guarantees for Israel's security."

"Unmet Promise On Discrimination." The New York Times (4/15, Subscription Publication, 9.65M) in an editorial praises President Obama for signing "two orders requiring modest but important steps by federal contractors to narrow the wage gap between female and male employees." The paper then faults him for "his failure to honor a 2008 campaign pledge to ban discrimination by federal contractors based on sexual orientation or gender identity." The paper urges him to issue executive orders to do that.

"A Deadline For Grandfathered Weapons." The New York Times (4/15, Subscription Publication, 9.65M) carries an editorial on gun laws noting that New York's SAFE Act requires owners of "semiautomatic assault weapons" to register them "with State Police by midnight Tuesday." The Times says the requirement "should not be a big deal" comparing it to existing registration requirements for pistols.

"Preventing Painkiller Overdoses." An editorial in the New York Times (4/15, Board, Subscription Publication, 9.65M) notes that broader use of a "a hand-held device that can quickly reverse the effects of an overdose and prevent deaths from opioid painkillers and heroin," which was recently approved by the FDA "could save some lives." The Times notes that the FDA announcement "was made in part to shift the focus of discussion" from its decision "to approve a prescription painkiller, Zohydro ER, which contains pure hydrocodone and is released over an extended period to relieve chronic pain." Noting that two state governors have moved to ban, or make it more difficult for doctor to prescribe Zohydro ER, the Times argues that they are "surely justified in taking steps to protect the public from a painkiller that could lead to more overdose deaths."

WASHINGTON POST. "A Permanent Fix." An editorial in the Washington Post (4/15, 4.22M) notes that the CBO's prediction that "the national debt will grow by \$286 billion less during the next decade" than had been projected "does not account for dozens of temporary tax breaks that expired at the end of 2013, but some or all of which Congress is likely to reenact as it has in the past." The Post argues that if Congress does adopt a "tax extender" bill, it should offset those costs in other tax policies. The Post adds that a "real solution" must "make sound policy permanent, discard special-interest fluff, end log-rolling and uncertainty and fully offset the budgetary costs."

"Watch Comcast-Time Warner." The Washington Post (4/15, Board, 4.22M) runs an editorial on the Comcast-Time Warner merger, saying that there are two common views of the matter: one, that it will give the new company more control of the market and subject customers to higher rates; or two, that without the merger the individual companies will be unable to compete with "online video services, wireless Internet providers and a cash-flush Google." The Post says it is "foggier" than that, and urges "regulatory caution" suggesting that the government allow the merger, but "make clear that regulators will respond if big industry players begin to violate basic principles of market fairness."

"The At-Large Race." The Washington Post (4/15, 4.22M) carries an editorial critical of the arrangement in the District of Columbia under which "two at-large seats on the 13-member council are reserved for non-majority party members." The Post says it has led to a charade in which Democrats shed their party label to seek the seats. The Post recommends adopting a different system, suggesting all party primaries or non-partisan elections as superior measures.

WALL STREET JOURNAL. "What's The Matter With Illinois?" The Wall Street Journal (4/15, Subscription Publication, 5.51M) in an editorial argues that states in the Great Lakes region offer instructive comparisons based on their different policy models of late with respect to taxes and union regulation. Illinois has adopted higher taxes while other states in the region have reduced taxes and in some cases changed laws governing unions. The paper notes that Illinois has higher unemployment than do Michigan, Ohio, Indiana, and Wisconsin, as well as a shrinking labor force, and lower income growth. It also notes several companies that are moving from Illinois to neighboring states.

"Putin Acts, Obama Assesses." In an editorial, the Wall Street Journal (4/15, Subscription Publication, 5.51M) criticizes President Obama's perceived diffidence and inaction in the face of Russian aggression towards Ukraine.

"El Presidente Tweets The Journal." An editorial in the Wall Street Journal (4/15, Subscription Publication, 5.51M) notes that Panamanian President Ricardo Martinelli responded directly, via Twitter, to columnist Mary O'Grady's column concerning his plans to circumvent the law and retain power for another five-year term. The Journal notes that Martinelli attacked O'Grady's motives, claiming that she is a friend of an adviser to Juan Carlos Varela, who is running to succeed him. The Journal denies the claim, and, noting that Martinelli is seeking to evade the constitution, which says he can't run again, by running his wife as a vice-presidential candidate, argues that if he wants to be a dictator, he should say so instead of hiding behind his wife's illegal candidacy.

Briefing Materials for NM, OR, WA, and MN Trips

Ossowski, Elizabeth <elizabeth_ossowski@ios.doi.gov>

Wed, Apr 16, 2014 at 3:40 PM

To: **Sally Jewell (B)(6)** <[REDACTED]@ios.doi.gov>, Laura Davis <laura_davis@ios.doi.gov>, Nicole Buffa <nicole_buffa@ios.doi.gov>, Katherine Rupp <katherine_rupp@ios.doi.gov>, Erin Walls <erin_walls@ios.doi.gov>
Cc: Zaina Javaid <zaina_javaid@ios.doi.gov>

Secretary Jewell,

Attached are additional briefing materials for your trips to NM and OR, as well as materials for your trips to WA and MN. These have been uploaded to Google Drive in their respective trip folders for you to make them available offline on your ipad. Additional hard copy trip binders have been delivered to you.

Thank you,

Elizabeth

April 2014**

Resource Management Plans for Western Oregon

In March of 2012, the BLM in Oregon initiated resource management plans (RMP) revisions that will provide goals, objectives, and direction for the management of approximately 2.5 million acres of BLM-administered lands in western Oregon. The revisions to the existing RMPs will determine how the BLM will actively manage BLM-administered lands in western Oregon to further recovery of threatened and endangered species, to provide clean water, to restore fire adapted ecosystems, to produce a sustained yield of timber products, and provide for recreation opportunities.

The Planning Criteria document was released in February 2014 with a comment period to collect input and insight to improve our analysis and methodology. In March 2014, a series of public meetings were held regarding the items to be considered in the full range of preliminary alternatives. Oregon/Washington BLM will now begin conducting the effects analysis for the Draft Environmental Impact Statement (EIS).

Sage-grouse

On November 22, as part of a joint effort with the U.S. Forest Service to conserve the Greater Sage-Grouse and its habitat across 10 western states, the Bureau of Land Management (BLM) issued a draft Environmental Impact Statement (EIS) for a 90-day public comment period.

The draft Oregon Sub-Regional Greater Sage-Grouse Resource Management Plan (RMP) Amendment/EIS would amend the BLM land management plans covering the Andrews, Baker, Lakeview, Steens, Three Rivers, Brothers LaPine (east), Southeastern Oregon, and Upper Deschutes RMPs in Oregon. It considers six possible management alternatives for maintaining and increasing habitat for Greater Sage-Grouse on BLM-administered lands in Oregon.

Approximately 10 million acres of Oregon's Greater Sage-Grouse habitat is on BLM-administered lands. The decisions in this RMP Amendment apply only to BLM-administered lands in Oregon. Five counties, Oregon Department of Fish & Wildlife, and US Fish & Wildlife Service are cooperating agencies on this project which will amend existing land use plans.

Greater Sage-Grouse Conservation

In 2010, the Oregon Cattlemen's Association approached the US Fish & Wildlife Service and the BLM requesting they develop a Candidate Conservation Agreement (CCA) for livestock grazing management on BLM lands in Oregon. The voluntary agreement will provide a mechanism for selecting, implementing, and monitoring conservation measures for the sage-grouse on BLM grazing allotments. This provides participating permittees a level of predictability regarding the rangeland management practices that are likely to be implemented on BLM allotments if sage-grouse become listed.

Maintaining and restoring sagebrush landscapes on public lands is the BLM's primary means of conserving sage-grouse populations and one of its most important current programs. The BLM is working in partnership with its sister agencies and the Western states to develop new or revised approaches to sage-grouse conservation through land-use plans. Working with our partners, we will use these land use plans to implement actions range-wide so we can conserve and restore the Greater Sage-Grouse and its habitat on BLM lands over the short term and the long term. Scoping is complete and the draft EIS will be published Nov. 22.

Five counties, Oregon Department of Fish & Wildlife, and US Fish & Wildlife Service are cooperating agencies on this project which will amend existing land use plans.

Simultaneous with development of the CCA, the Harney County Soil and Water Conservation District and U. S. Fish and Wildlife Service are preparing a Programmatic Candidate Conservation Agreement with Assurances (CCAA) for Private Lands in Harney County, Oregon. While the BLM is not a signatory to the CCAA, it is participating in its development at the request of Harney County. Ongoing collaboration between the parties working on these agreements seeks to have the CCA and CCAA working together in concert. The CCA will likely be signed prior to signing the CCAA.

Ruby Pipeline

In November 2013, the BLM announced the availability of the Record of Decision (ROD) and Final Supplemental Environmental Impact Statement (Final SEIS) for the Ruby Pipeline Project.

The BLM received 31 submissions from the public, agencies, tribes, organizations, and businesses during the comment period. Comments on the Draft SEIS received from the public and resulting from internal BLM review were considered and incorporated as appropriate into the Final EIS. Public comments resulted in the addition of clarifying text, but did not significantly change the analysis or the proposed decisions.

The pipeline has been constructed and is currently operational. It includes an approximately 678-mile long, 42-inch diameter interstate natural gas pipeline that crosses 368 miles of federal land beginning near Opal, Wyoming, extends through northern Utah and northern Nevada, and terminates near Malin, Oregon.

Wind Energy

In Oregon, as of June 30, 2013, there were four authorized (44,960 acres) plus one pending (15,826 acres) wind testing ROWs in Oregon, for a total of 60,786 acres. This represents a 45% wind testing acreage decrease from February 2013. There were also three pending wind farm development ROWs (34,208 acres). This represents a 265% pending wind farm development acreage increase in Oregon from February 2013. There is also one authorized wind farm (108 acres) in Oregon, Lime Wind, which began operation in 2011.

In Washington there was one authorized wind testing ROW and one pending wind farm development ROW occupying the same project area, Saddle Mountain West (22,096 acres). So the net acreage change for wind testing and development between February 2013 and June 2013 in Washington is essentially zero.

North Steens Transmission Line

On March 16, 2012, the BLM issued a ROW (under Title V of the Federal Land Policy Management Act) to Echanis, LLC (the project proponent) for the North Steens Transmission Line Project. The BLM and Echanis, LLC then worked together to ensure the 10 plans necessary for the next step in the process—a Notice to Proceed authority given by the BLM—met the intent of the project's Record of Decision. The project is a 29-mile, 230-kilovolt (kV) transmission line that would convey power generated from wind farms proposed for development on private land on the north side of Steens Mountain. The planned transmission line would cross BLM and private lands.

On April 5, 2012, the Oregon Natural Desert Association (ONDA) filed a complaint in the United States District Court for the District of Oregon alleging that Secretary Salazar's decision to authorize a ROW over BLM land for the North Steens Transmission Line project in southeastern Oregon violated the Steens Mountain Cooperative Management and Protection Act of 2000, FLPMA, and NEPA. On May 21, 2012, the BLM issued a limited Notice to Proceed that allows the project proponent to move forward with non-ground-breaking activities in preparation for construction.

On September 12, 2013, District Judge Michael W. Mosman found that BLM's decision was not arbitrary and capricious. BLM prevailed on this case which would provide transmission for an anticipated wind farm on private lands in the Steens Mountains. However, due to the delay caused by the litigation, the uncertainty of an appeal being filed, and changes in wind energy tax incentives, the project is on hold and the proponent is looking for a buyer.

Pacific Connector Gas Pipeline

The Jordan Cove Energy and Pacific Connector Gas Pipeline Project was originally proposed as a LNG import facility and pipeline in 2006. That project was Certificated (authorized) by FERC December 17, 2009. BLM did not grant a right-of-way (ROW) for the proposed pipeline at that time and consultation with U.S. Fish and Wildlife Service and NOAA Fisheries was not completed for the proposed import project. With the change to an export facility, the FERC vacated its Certificate on April 16, 2012 and required the project proponent to re-apply. A new Environmental Impact Statement process was initiated. With the exception of the South Dunes Power Plant, the footprint of the current project is substantially the same as the previously proposed project

The Malin natural gas hub is where Pacific Connector Gas Pipeline would connect with the Gas Transmission Northwest (GTN) pipeline, the major north-south pipeline carrying natural gas from Canada to California. It is also the end point of the Ruby Pipeline carrying natural gas from the Rocky Mountains.

The official Federal Energy Regulatory Commission (FERC) schedule has a release date of April 4, 2014. FERC and the participating agencies recognize that an extension of the schedule is required. FERC has not yet released a revised schedule. However, a Draft Environmental Impact Statement (DEIS) release date in early summer 2014 is widely anticipated. Projected release of the DEIS will likely generate significant public interest, concern and controversy. The current Project analyzed in Draft EIS includes:

- Construction of a natural gas liquefaction and export facility located in Coos Bay, Oregon (Jordan Cove Energy). Peak capacity rated at 6 million metric tons per annum of liquefied natural gas (LNG).
- Construction of an access channel and marine berth.
- Construction of a 420-megawatt natural gas-fired electric generating system (South Dunes Power Plant) in Coos Bay, Oregon. This generating system will provide electricity to the LNG facility.
- Construction of a 232-mile-long, 36 inch diameter underground welded steel pipeline. Rated at 1,060,000 dekatherms per day of natural gas from the existing hub in Malin, Oregon to the Jordan Cove Energy facility.
- Construction of ancillary LNG storage, transport, pipeline compression stations, and communications systems.

Approximately 40 miles of BLM-administered land is crossed by the proposed pipeline and 31 miles of USFS-administered lands is crossed by the proposed pipeline. Less than one mile of Bureau of Reclamation administered lands are crossed by the proposed pipeline. However easements and facilities associated with the Klamath Basin Project are crossed by the proposed pipeline.

The proposed ROW does not conform to the existing applicable land and resource management plans of the BLM and the USFS. Thus the DEIS contains proposals for amendment of these plans necessary to make provision for the proposed pipeline ROW grant. These proposed amendments to allow project-specific exceptions to the application of the core components of the Northwest Forest Plan could be controversial and potentially precedent setting.

Klamath Basin Restoration Agreement

Representatives of the Klamath Tribes, Upper Basin irrigators, the State of Oregon, and the United States have developed a Comprehensive Agreement for water management and restoration in the Upper Klamath Basin. Each party is currently reviewing the agreement, and will decide whether to sign it over the next thirty days.

In July of 2013, the Klamath Basin Task Force was convened "...to resolve the water, power and other resource management issues in the Klamath River Basin." The letter directed the Task Force to develop a settlement of water use and habitat restoration issues in the Upper Klamath Basin that results in:

- At least 30,000 acre feet of increased water inflows into Upper Klamath Lake through a voluntary program to reduce water usage;
 - Permanent resolution and protection of significant riparian areas in the Wood River Valley and the Sprague, Sycan, and Williamson river basins sufficient to produce the habitat improvement needed for fisheries; and
 - Regulatory assurances for water and land uses in the Upper Basin, including compliance with the Federal Endangered Species Act (ESA).
- In December of 2013, the parties reached an Agreement in Principle. On February 28, 2014 the parties completed work on the Proposed Agreement.

In addition, on February 14, 2014, Governor Kitzhaber declared a drought emergency in Klamath County. The drought declaration provides additional tools for managing limited water supplies. The Oregon Watershed Enhancement Board has approved \$750,000 in state funding for water use reduction, and federal agencies are contributing additional funds. The Governor's office is also working with state and federal agencies to bring additional assistance to the community.

One other data point is that we are not envisioning Brandi taking over Jim's existing portfolio (so sage grouse and landscape mitigation, for example, would stay with Jim). Rather, she is proposed to be taking over the counselor FTE.

Best, J.

Sally,

I have attached Brandi Colander's resume for your review. She comes highly recommended from CEQ as well as Jim Lyons and we were all very impressed with her during the interview process. Please let me know if you have any additional questions.

Sally,

This group - the Laura D., Laura M., Ben, Janice and I - is in agreement and alignment on each of these moves. I

agree it would be beneficial to talk through the key considerations with you when you have a moment. In the meantime, Laura M - can you send the Secretary Brandi's resume?

Thanks,

TPB

Hi Laura -

There is a lot in this message that I would like to discuss, at least with Tommy, as I presume he has been central to the decisions. (b)(6)

(b)(6)

On the DAS positions, I am supportive. I know nothing about Brandi and we have some really important initiatives in process, from renewables to sage grouse to our conventional energy and mitigation strategies that Jim has been involved with. You say that she "will" backfill Jim's position, which suggests that an offer has been made and accepted. I have not seen a resume and have no sense of her background. It would be helpful to know more about that decision and her qualifications, and also some reassurance that both Tommy and Janice are aligned on this direction.

Please fill me in on the process when you have a minute.

Thanks,

Sally

On a positive note, the ASLM front office team is shaping up very nicely. David Haines, the other BOEM candidate, has accepted a conditional offer to serve as a Deputy Assistant Secretary for ASLM. We are also planning to move Jim Lyons into the other DAS role and we will backfill his position with Brandi Colander, former Deputy General Counsel for CEQ. As the candidates get closer to finishing the vetting process, we will develop a rollout plan to announce the new team.

Please let me know if you have any questions.

DOI in the News:

SECRETARY JEWELL MEETS WITH TRIBES IN SUQUAMISH . The [Kitsap \(WA\) Sun](#) (4/24, 91K) reports that nine tribes met with Interior Secretary Sally Jewell and Rep. Derek Kilmer for a tribal leadership summit in Suquamish on Thursday. Jewell said, "My goal is to take 500,000 acres of fee lands into trust, and I encourage the tribes to continue to submit their applications and emphasize this administration's commitment to processing these applications." According to Larry Roberts, an official with the BIA, "while it can sometimes take years for the federal government to move land into trust for tribes, the Bureau of Indian Affairs is trying to speed up the process." Roberts said, "We have made it a high priority for our regional directors to prioritize fee to trust acquisitions. And in situations where there is a question or challenge to an application, we have put in a process where larger parcels are reviewed more quickly."

The [Tacoma \(WA\) News Tribune](#) (4/24, Carson, 338K) reports that the tribes told Jewell that "consequences of climate change are threatening their economies and cultures and that they need federal help to deal with intensifying climate-related problems." Jewell said the BIA is "helping prepare climate action plans that will include climate considerations in all federal Indian programs." The bureau "funded 19 tribal grants related to climate change in fiscal year 2013, she said, including several for tribes at the summit."

The [Peninsula \(WA\) Daily News](#) (4/25, 41K) reports that Jewell also "stressed the need to solidify the tribes' economic base." Jewell noted that "opportunities exist for Native students to graduate into industries that can protect the environments of reservations while strengthening the tribes' abilities to be self-sufficient."

CONSERVATION GROUPS URGE SECRETARY JEWELL TO CRAFT NATIONAL SITING PLAN FOR WIND-POWER PLANTS. The [Environment & Energy Publishing](#) (4/25, 705) reports that conservation groups are asking Interior Secretary Sally Jewell to craft "a national plan for siting commercial-scale wind-power plants in locations

that cause the least amount of impacts to birds, bats and other sensitive wildlife." The coalition of "more than 70 groups...sent a four-page letter to Jewell arguing that a detailed plan is needed to highlight areas best suited for large-scale wind development and, perhaps more importantly, to identify areas where such development would cause too many natural resource conflicts." They ask Jewell to "follow the path the Interior Department forged several years ago for commercial-scale solar development on federal land in the Southwest."

INTERIOR'S MITIGATION PROPOSAL WORRIES REP. TIPTON. The Grand Junction Daily Sentinel (4/25, 73K) reports that Interior Secretary Sally Jewell's "proposal for a 'landscape-scale mitigation' approach to environmental issues on federal land in the West has yet to take shape, and that could undermine its merits," Rep. Scott Tipton said Thursday. During a meeting with municipal and county leaders from northwest Colorado, Tipton "asked whether they had been consulted by Interior Department officials about the management of the public lands that surround them," but "no hands went up among the 20 or more members of the Associated Governments of Northwest Colorado meeting in the Mesa County Workforce Center." the article notes that Tipton's office also "wasn't consulted on Jewell's plan to visit Moffat County in February to learn about federal, state, local and private efforts to conserve the greater sage-grouse." Tipton said that "the lack of detail about the plan is troubling."

INTERIOR'S YOUTH INITIATIVE SEEKS TO GET KIDS OUTDOORS. For his blog at the [Emmett \(ID\) Messenger-Index](#) (4/25, 22K), Ken Lewy writes that the Interior Department's Youth Initiative seeks "to get youngsters to play, learn and prepare for careers, and spend a little less face time with electronic devices." Interior Secretary Sally Jewell said "this generation of kids is becoming less connected to nature than any other generation while getting more and more connected to technology." Interior "wants to balance this trend and keep kids interested in nature and the outdoors."

TEXAS TECH CLIMATE SCIENTIST ON TIME'S 100 INFLUENTIAL PEOPLE LIST. The [Lubbock \(TX\) Avalanche-Journal](#) (4/24, 176K) reports, Katharine Hayhoe, a climate scientist at Texas Tech has been named to the TIME 100, Time Magazine's list of influential people for 2014. At Texas Tech, Hayhoe serves as director of the Climate Science Center. The center, along with others under the banner of the Interior Department's South-Central Climate Science Center, "provides natural resource managers with tools to address the impacts of climate change." Hayhoe said "she feels she was chosen to represent a group that some may find paradoxical: Christian climate scientists."

Also covering the story is the [Amarillo \(TX\) Globe News](#) (4/24, 133K).

SPORTSMEN'S GROUPS URGE SUPPORT OF LAND AND WATER CONSERVATION FUND. The [Deseret \(UT\) News](#) (4/25, 610K) reports that "a coalition of more than 100 sportsmen's organizations is reminding Congress it needs to direct dollars to critical fish and wildlife habitats and preserve access on public lands." Groups from 11 states signed off on a letter Thursday urging support of the Land and Water Conservation Fund.

CONTINUING COVERAGE OF KING COVE ROAD. [KTVA-TV](#) Anchorage, AK (4/25, 1K) continues its series with a second part on the issues surrounding the Izembek National Wildlife Refuge.

America's Great Outdoors:

National Park Service:

FEDERAL STUDY FINDS MERCURY FISH AT NATIONAL PARKS. The [Sacramento \(CA\) Bee](#) (4/24, 687K) reports that "a federal study found small levels of the contaminant in rainbow trout and brown trout at three Grand Canyon creeks – Bright Angel, Havasu and Shinumo – as well as in fish at 20 other parks." While none of the levels found by the NPS and USGS "exceeded standards for mercury set by the Environmental Protection Agency, Colin Eagles-Smith, the lead author, said the findings provide the first comprehensive look at mercury levels in western national parks." Eagles-Smith said, "We often hear the negative side of the story with things like mercury. The positives from this study were that we studied a lot of parks and a lot of lakes and in the majority of those systems, mercury concentrations were low."

NPS CELEBRATES CHACO CANYON'S DESIGNATION AS AN INTERNATIONAL DARK SKY PARK. The [AP](#)

(4/25) reports that the NPS is celebrating Chaco Canyon's designation as an International Dark Sky Park. According to the article, "the dark sky designation was made last fall, but the National Park Service had to put off the celebration until now due to the government shutdown."

Also covering Dark Sky Places recognized by the Dark Sky Association are [USA Today](#) (4/25, Loew, 5.82M) and the [High Country \(CO\) News](#) (4/25, 74K).

NPS PROVIDES ADVICE TO ARUBA'S ARIKOK PARK. The [Curaçao \(ANT\) Chronicle](#) (4/25) reports that a team from the NPS "traveled to Aruba March 24 – 29 to provide technical advice on the management of Aruba's Arikok National Park and a proposed system of more than a dozen smaller protected areas." NPS Chief of Planning Patrick Gregerson, Superintendent Pat Kenney with the Cape Lookout National Seashore, and Jon Putnam of the Office of International Affairs met with high-level Aruban governmental officials and management and board of Arikok National Park Foundation (FNPA) during their visit. The NPS is "preparing initial recommendations for FNPA, and there are plans for a follow-up workshop to help Arikok staff develop a management planning document."

PUBLIC-PRIVATE PARTNERSHIP AIMS TO HELP YOSEMITE SEQUOIAS. The [New York Times](#) (4/25, Pogash, Subscription Publication, 9.65M) reports on efforts to improve the health and protection of sequoias in Yosemite National Park, and details some aspects of a \$36 million undertaking to do so. The National Park Service and Federal Highway Administration are each spending about \$8 million, while the nonprofit Yosemite Conservancy will cover \$20 million of the cost. Among the steps being taken are the rerouting of roads and parking lots, removal of additions like a tourist tram and gift shop, and the addition of elevated walkways. The Times highlights the importance of public-private partnerships in protecting national parks and natural treasures, especially in the wake of "the new fiscal reality."

NPS EXPANDS PARTNERSHIP WITH CONFLUENCE PROJECT AT FORT VANCOUVER. The [Hispanic Business](#) (4/25, 110K) reports that the NPS and Confluence Project have "entered into a new, innovative partnership to enhance programming at Fort Vancouver National Historic Site." The agreement will "create educational events annually at the Fort, including Confluence's Gifts from Our Ancestors program." Tracy Fortmann, Superintendent, Fort Vancouver National Historic Site, said, "We are ecstatic with our newly expanded partnership with the Confluence Project. Through this partnership, our community, as well as the visitors who come from across the nation and around the world, will have the opportunity to experience more educational programs, exhibits, and tours right here in our national park."

MOUNT BALDY AT INDIANA DUNES TO REMAIN CLOSED INDEFINITELY. The [Chicago Tribune](#) (4/25, Lourgos, 2.3M) reports that Mount Baldy in Indiana Dunes National Lakeshore will "remain closed indefinitely as scientists investigate holes discovered in the terrain less than a year after a Sterling, Ill. boy was nearly killed in a sinkhole at the popular landmark." According to the article, "Mount Baldy, its parking lot, trail and beach will remain closed to vehicles and pedestrians as the investigation continues this summer and perhaps even into the fall." Acting Superintendent Garry Traynham said, "Mount Baldy is one of the most visited sites in the national lakeshore, attracting thousands of visitors each year. But the continued development of these holes in the dune surface poses a serious risk to the public. Our first obligation must be to the welfare of our visitors who are here for an enjoyable outing."

MAINE GUBERNATORIAL CANDIDATE DOESN'T RULE OUT A NATIONAL PARK. The [Bangor \(ME\) Daily News](#) (4/24, 166K) reports that "independent gubernatorial candidate Eliot Cutler promised Thursday to personally lead an effort to revitalize the northern Maine economy as governor that could include a Katahdin-region national park." After an informal afternoon meeting with the Katahdin Area Chamber of Commerce, Cutler said, "The real issue is not are we for or against the national park. The real issue is what is the best way to capitalize on this area's tourism and recreation." He added, "I believe a national park and national recreation area could easily be among the components of a plan to develop the recreational and tourism potential of this area, and I would lead a process that would create that plan. But it is really important to me and the people of this region that the plan be one that they are closely involved in and support."

EVENTS SCHEDULED FOR JAMESTOWN'S 407TH ANNIVERSARY. The [AP](#) (4/24) reports that "a celebration of the 407th anniversary of the founding of Jamestown, America's first permanent English settlement, is set for May 10." Jamestown Day will "feature a variety of entertainment and educational programs at two local

attractions.”

NPS CANCELS SCOPING MEETINGS RELATED TO INTRODUCTION OF BISON AT BADLANDS NATIONAL PARK. The Rapid City (SD) Journal (4/25, 141K) reports that the NPS has “canceled all scoping and environmental assessment meetings related to the introduction of bison on the South Unit of Badlands National Park.” Instead of the meetings, the agency will “accept comments on the proposed bison reintroduction plan online at go.nps.gov/bisoncomments.”

Bureau of Land Management:

GOP, CONSERVATIVE SUPPORTERS DISTANCE THEMSELVES FROM BUNDY. Coverage of the controversy over Nevada rancher Cliven Bundy’s disagreement with the BLM shifted after the New York Times ran comments from Bundy on race and slavery. On Thursday, many of the Republican politicians and conservative media personalities who had been backing Bundy distanced themselves from him, though Bundy himself defended his remarks. The political shift over the issue was summarized by Andrew Kaczynski of Buzzfeed, who noted on Twitter that while Fox News had mentioned Bundy 458 times in April before Thursday, by 4:00 p.m. EDT Fox had mentioned Bundy just twice – while MSNBC had mentioned Bundy 26 times.

Of the three broadcast networks, only the CBS Evening News (4/24, story 6, 2:15, Pelley, 5.08M) covered the story Thursday evening, saying that “high-profile supporters” of Bundy “are stampeding away from him” after his comments. Bundy “became a celebrity among some conservatives this month.” CBS (Cordes) said Sen. Rand Paul “called Bundy’s comments ‘offensive.’ Nevada Sen. Dean Heller, who had praised Bundy as a patriot, called the comments ‘appalling and racist.’” But on Thursday afternoon, “Bundy defended his remarks.” Bundy: “These people, they’re not slaves no more. They seem to be slaves to the welfare system and this type of thing, but they have opportunity.”

The Washington Post (4/25, Lowery, Blake, 4.22M) says Bundy’s “GOP defenders...rapidly abandoned him on Thursday following reports of incendiary remarks that the white rancher made about minorities.” The New York Times (4/25, Subscription Publication, 9.65M) reports Paul said, “His remarks on race are offensive, and I wholeheartedly disagree with him.”

The Washington Times (4/25, Richardson, 455K) reports that Rep. Rob Bishop said that Bundy’s “remarks damaged his cause.” Bishop said, “His comments are inaccurate and degrading, and I think they are sad. Unless I am missing something, I don’t think it had any relevance to the situation he has, but the fact that he said them does not help his situation, does not help his case, does not help his credibility.”

The New York Times (4/25, Curtis, Nagourney, Subscription Publication, 9.65M) reports that “commentators on Fox News, which had championed Mr. Bundy’s cause, also expressed distress at his remarks.” Fox News’ Greta Van Susteren said on her website, “Let me make this plain: I condemn what Cliven Bundy said about African-Americans.” Meanwhile, commentator Sean Hannity “reiterated his distress about government overreach — ‘armed agents, sharpshooters, snipers, dogs, stun guns’ — even as he denounced the leader of the standoff for his remarks.”

On the other hand, Politico (4/25, Topaz, 73K) reports that “conservative radio host Dana Loesch said that the flare-up over Cliven Bundy’s comments on race is missing the point.” Loesch, who has “defended the Nevada rancher on her website and on Fox News, on Thursday suggested that The New York Times coaxed an unseasoned public figure into a tangential discussion about race.”

Also covering the story are the Washington Post (4/24, 4.22M), the “Post Politics” blog of the Washington Post (4/24, 4.22M), the “E2 Wire” blog of The Hill (4/25, 237K), the US News & World Report (4/24, 645K), TIME (4/25, 24.1M), Reuters (4/25, Dobner, Gorman), the New York Daily News (4/25, 4.36M), and the Detroit Free Press (4/25, Camia, 1.02M).

Bundy Stands By Comments. The AP (4/25) reports that “on Thursday during an outdoor news conference near his ranch 80 miles from Las Vegas, he echoed the same sentiment: ‘Are they slaves to charities and government subsidized homes? And are they slaves when their daughters are having abortions and their sons are in the

prisons? This thought goes back a long time.”

Also reporting on the story is the “E2 Wire” blog of [The Hill](#) (4/25, 237K).

Reid Calls Bundy “A Hateful Racist.” [Politico](#) (4/24, Topaz, 73K) reports that Senate Majority Leader Reid, who is from Bundy’s state of Nevada, said in a statement, “Today, Bundy revealed himself to be a hateful racist. ... It is the height of irresponsibility for any individual or entity in a position of power or influence to glorify or romanticize such a dangerous individual, and anyone who has done so should come to their senses and immediately condemn Bundy.”

The [Huffington Post](#) (4/24, Lavender, 11.54M) also reported on Reid’s remarks.

Rep. Amodei Praises BLM Director Kornze. The [Reno \(NV\) Gazette-Journal](#) (4/24, 166K) reports that Rep. Mark Amodei has “praised” BLM Director Neil Kornze’s “leadership in the Bundy-BLM crisis, noting Kornze’s prudent behavior stopped the confrontation from getting out of hand.” Amodei said, “I think I know the decisions on how to proceed and how this (standoff with Bundy) got started were probably made at the state-director level and not at the national director level. I can tell you that when I got a call from him (Kornze) that Saturday, saying we’re going to suspend the operation, that shows me some leadership.”

Utah Gov. Bundy Is Not “The Face For Public Lands Issues.” The [Salt Lake \(UT\) Tribune](#) (4/25, 470K) reports that Utah Gov. Gary Herbert said Thursday that “national attention on the armed brinkmanship by Nevada rancher Cliven Bundy with federal land managers could make Utah’s fight to take control of federal public lands tougher.” Herbert said, “Cliven Bundy should not be the face for public lands issues in Utah. Anytime you’ve got Americans lined up on one side and other Americans on the other side with guns pointed at each other, you’ve got a problem.” Herbert does “not want such conflict to become the image in Americans’ minds symbolizing fights over public lands, nor for Westerners to make him a hero.” Instead he “calls for rational leaders to sit down to work through issues.”

Also, the [Salt Lake \(UT\) Tribune](#) (4/25, 470K) reports that the “anger...now spilling out in Nevada and Utah... could possibly extend further as the long-simmering debate over public-land use has flared into armed conflicts and ultimatums — including the tense standoff between Nevada rancher Cliven Bundy, backed by militia members, and Bureau of Land Management officers.” According to the article, “western leaders are afraid Bundy could become the image in Americans’ minds symbolizing the fight over public lands.”

Also covering the story are the [AP](#) (4/25, Knox) and the [Deseret \(UT\) News](#) (4/25, 610K).

More Commentary. [USA Today](#) (4/25, 5.82M) editorializes, “Wouldn’t it be nice if we could all make up our own laws?” Bundy “has been doing that for 20 years, running his cattle on federal lands and refusing to pay the grazing fees that thousands of other ranchers do because he refuses to recognize the federal government’s ownership. ... It’s not hard to understand the frustration of a cattle rancher who is told – as Bundy was – that he can no longer run his cattle on federal grazing land because of harm to the protected desert tortoise. That decision deserves re-evaluation. But not at the point of a gun.”

In a [USA Today](#) (4/25, 5.82M) op-ed, Bundy’s son Ammon Bundy writes, “After over a hundred years of creating a pre-emptive right to the property through beneficial use of forage, water, access and range improvements, as recognized and protected by the state, the federal government claims that the land is not state land but US territory and theirs for the taking or charging of fees. ... Why did the federal government retain almost 90% of Nevada land after statehood?”

Additional commentary was provided by the [New York Times](#) (4/25, Barro, Subscription Publication, 9.65M), the [Arizona Republic](#) (4/24, 1.45M), [Politico](#) (4/25, Nather, 73K), the [Christian Science Monitor](#) (4/25, Jonsson, 566K), the [US News & World Report](#) (4/24, 645K), the [National Journal](#) (4/25, Subscription Publication, 561K), [Slate Magazine](#) (4/24, 14.77M), the [New American](#) (4/25, 9K), and [PolitiFact](#) (4/24, 9K).

Additional Coverage Of Red River Dispute. Additional coverage of the Red River dispute was provided by the AP (4/25, Weissert, Blaney), the Washington Times (4/25, Chumley, 455K), FOX News (4/24, 74.23M), and FOX News (4/23, 74.23M).

BLM SEEKS INPUT ON STEPS TO REDUCE METHANE FROM MINING OPERATIONS ON PUBLIC LANDS. KCSG-TV St. George, UT (4/25, 43) reports that the BLM is seeking public comment on "a possible rulemaking that could reduce the waste of methane from mining operations on public lands." BLM Director Neil Komze said, "We welcome public input on ways in which we can both increase mine safety and improve the health of our environment. We will work with federal, state and local officials as well as with industry and nongovernmental organizations to explore ways to responsibly reduce methane emissions."

BLM TRYING TO REMOVE GEOCACHES FROM WILD PARTS OF CENTRAL OREGON. The AP (4/25) reports that the BLM is "trying to get geocaches removed from wilderness and environmentally sensitive areas in Central Oregon." The BLM's policy is "nationwide, and local bureau officials are working with geocachers to remove 84 of the containers, some seasonal." The point is "to keep man-made objects out of wild areas and avoid unplanned paths beaten to popular caching sites."

Fish and Wildlife Service:

GROUPS FILE SUIT TO COMPEL FWS TO SUBMIT KLAMATH REFUGE PLANS. The AP (4/25) reports that "conservation groups want a court to order a federal agency to submit overdue plans for wildlife refuges in the Klamath Basin." The suit filed Thursday says "most of the nation's refuges complied with a 1997 law that required each to develop a 'comprehensive conservation plan' by October 2012, but the Klamath system has not." FWS spokesman Matt Baun said "tight budgets delayed the plans, but a draft is being readied for release."

GROUP FILES LAWSUIT TO CHALLENGE ELEPHANT BAN. The NewsDay (ZWE) (4/24, 289) reports that conservation organization SAFARI Club International has filed a lawsuit to challenge FWS' "reported abrupt and unwarranted ban on the importation of sport-hunted African elephants from Zimbabwe and Tanzania." The group "attacked the inadequacy of the information on which the USFWS based its decision and the department's failure to consider the beneficial impacts that US hunters and sport hunting have on African elephant conservation, including the economic deterrent to poaching that was funded by hunters."

LAWSUIT FILED TO STOP CENTRAL IDAHO GOLD-MINE EXPLORATION PROJECT. The AP (4/25, Ridler) reports that "a conservation group and the Nez Perce Tribe have filed a lawsuit against three federal agencies seeking to stop a central Idaho gold-mine exploration project by a Canadian company." The tribe and the Idaho Conservation League filed the lawsuit Tuesday in US District Court in Idaho against the US Forest Service, US Fish and Wildlife Service and the National Oceanic and Atmospheric Administration's National Marine Fisheries Service. The lawsuit claims "the agencies didn't adhere to federal environmental laws in approving the three-year Golden Meadows Exploration Project proposed by Midas Gold Inc."

DEADLY BAT DISEASE ON THE MOVE. The AP (4/25, Sanz) reports that "white-nose syndrome is on the move, and wildlife biologists are worried." Wildlife biologists say "the threat is real, and no one knows how to stop the spread." Biologists said the "biggest impact of the disease – besides decimating entire colonies of bats in some caves – may be its impact on the agriculture industry."

FWS PLANS SEA LAMPREY CONTROL. The Midland (MI) Daily News (4/25, 28K) reports that FWS "personnel will apply lampricides to the Chippewa River, Pine River and Carroll Creek systems in Isabella, Gratiot and Midland counties to kill sea lamprey larvae burrowed in the stream bottom." The applications will be conducted between May 6 and May 15.

US Geological Survey:

USGS, CALTECH SELECT LONG BEACH AS TEST SITE FOR EARTHQUAKE EARLY WARNING SYSTEM. The Long Beach (CA) Press-Telegram (4/24, 194K) reports that "the city of Long Beach was selected by Caltech and the US Geological Survey to serve as a test site for an earthquake early warning system, officials announced today." The California Integrated Seismic Network Earthquake Early Warning System uses "existing seismic

networks to detect temblors in order to send out a warning before destructive seismic waves reach areas outside of the epicenter." Deputy City Manager Reginald Hamison said, "The earthquake early warning system provides the city with another tool, in addition to CERT classes to prepare residents and all-hazards training to prepare staff, in the event of a disaster or major emergency. Once fully developed, this technology could literally save lives."

Securing America's Energy Future:

Onshore Energy Development:

OSMRE HOSTING PUBLIC MEETINGS ON FOUR CORNERS POWER PLANT AND NAVAJO MINE ENERGY PROJECT. The [Indian Country Today Media Network](#) (4/24, 45K) reports that the OSMRE's Western Region is "hosting nine public meetings to address environmental impacts of" the Four Corners Power Plant and Navajo Mine Energy Project. Diné Citizens Against Ruining Our Environment, or Diné CARE, is "encouraging all Navajo citizens to attend a meeting." Colleen Cooley, Diné CARE's Four Corners energy outreach organizer, said, "We were trying to say wait to purchase the mine until this document came out. We were saying they should have waited and assessed what the potential impacts might have been. Instead, they rushed into it."

LEADING FRACKING FIRM WILL DISCLOSE CHEMICALS IT USES. USA Today (4/25, Winter, 5.82M) reports that "in a major shift quietly announced Thursday," Baker Hughes, a "leading hydraulic fracturing supplier," said it would begin "disclosing all of the chemicals used in so-called fracking without regard to trade secrets." The move comes a month after an Energy Department task force "recommended changes to improve transparency at FracFocus, where companies can voluntarily report the chemicals they use."

THREE AFFILIATED TRIBES OIL TAX REVENUE \$184 MILLION SINCE JULY 1. The St. Paul (MN) Pioneer Press (4/25, Dalrymple, 656K) reports that North Dakota's Three Affiliated Tribes have collected \$184 million in oil tax revenue since July 1, 2013 primarily as a result of increasing shale oil production at Fort Berthold. The Pioneer Press reports that the tribes plan to use the increasing funds to spend \$100 million rebuilding truck-worn roads, another \$100 million on a bridge project and \$65 million in housing for medical staff "as its clinic expands to a 24-hour ambulance service in response to an increased number of accidents."

Offshore Energy Development:

JUDGE'S DECISION IN AK ARCTIC DRILLING CASE SEEN AS "GOOD NEWS." The Los Angeles Times (4/25, Dave, 3.46M) reports US District Judge Ralph Beistline "adopted almost completely" a deal brokered by Sen. Mark Begich (D-AK) and Earth Justice attorney Erik Grafe to "redo an environmental impact study that underestimated the amount of recoverable oil and, potentially, the risks to delicate Arctic habitat" off the coast of Alaska. The Times reports Sen. Begich called the judge's ruling "good news," and Grafe "also hailed the decision" as a "good outcome." Once the new analysis has been completed, the Times writes, "the Bureau of Ocean Energy Management will have to decide whether to move forward with or cancel the agreed-upon leases with Royal Dutch Shell, ConocoPhillips and other companies."

Also reporting on the story is the Alaska Dispatch (4/24, 7K).

RAVALLI COUNTY COMMISSION REVIEWS OPPOSITION TO PLACING MEDICINE TREE IN TRUST. The [Ravalli \(MT\) Republic](#) (4/25, 19K) reports that the Ravalli County Commission "took no further action Thursday on the Confederated Salish and Kootenai Tribes' request to place a parcel of sacred land into trust." Instead, county officials will wait for the Interior Department "to make a decision on the request to transfer title of the 58-acre parcel to the Bureau of Indian Affairs."

Also covering the story is [The Missoulian](#) (4/25, 122K).

Top National News:

OBAMA SAYS US WILL RETALIATE AGAINST CHINA IF IT SEIZES JAPANESE TERRITORY. Apart from passing mentions in segments on the Ukraine crisis, President Obama's trip to Japan was ignored by all three network newscasts Thursday evening. Print and online analysis focuses on the President's reiteration of US commitments to Japan in the context of its dispute with China over a group of islands. Several reports this morning, meanwhile – including a front-page article in the New York Times (4/25, A1, Landler, Rudoren, Subscription Publication, 9.65M) – indicate that a breakthrough on the Trans-Pacific Partnership is not likely to happen anytime soon, although that had been near the top of the President's agenda for his stay in Japan.

On Fox News' Special Report (4/24, 2.15M), Bret Baier reported that on Thursday, Obama "again warned Vladimir Putin that a new set of sanctions is 'teed up' if Russia does not live up to the Ukraine peace deal," but Baier added, "that deal took another hit today, and, with it, the President's quickly eroding standing among anxious Asian leaders." Correspondent Ed Henry reported that the President "quickly went from diplomacy to defense, growing agitated when a reporter pressed on whether his promises...to rush to Japan's defense if China makes an aggressive move for territory is merely another Syrian-style 'red line.'" Obama was shown saying, "First of all, the treaty between the United States and Japan preceded my birth, so, obviously, this isn't a 'red line' that I'm drawing." Henry added, "With...Obama's credibility on the world stage on the line, Japanese Prime Minister Shinzo Abe stressed he believes the US will back him up with military support if necessary." According to Henry, "questions about that trust have overshadowed...this trip."

Under the headline "Obama: US Would Defend Japan In Islands Dispute," the AP (4/25, Correspondent) reports that on Thursday, the President "show[ed] solidarity with Japan" when he "affirmed...that the US would be obligated to defend Tokyo in a confrontation with Beijing over a set of disputed islands." The AP says the President was "wading cautiously into a diplomatic minefield" when he "insisted the US takes no position on whether the islands in the East China Sea are ultimately in the dominion of China or Japan." According to the AP, "the dispute over the islands, called Senkaku by Japan and Diaoyu by China, has badly strained relations between" Japan and China, and "other US allies see the disputes through the broader lens of China's growing influence in Asia."

McClatchy (4/25, Clark, Subscription Publication, 23K) also reports that the President "made it clear that the US isn't taking sides in the eventual resolution of the sovereignty of the islands." Nevertheless, McClatchy says Abe, "standing next to Obama...called the alliance between the two countries 'unwavering and indispensable' and said Obama has displayed 'tremendous enthusiasm' in the relationship." However, according to McClatchy, "Asian allies" of the US "who share the region with an increasingly assertive China were said to be rattled by U.S. reluctance to intervene deeply in Syria and Ukraine."

Likewise, Voice of America (4/24, Ramirez, 21K) said on its website that the President's trip to Asia "comes at a time when confidence is shaky among many Japanese who see the United States' failure to make good on its threats to attack Syria and its reluctance to provide lethal aid to Ukraine as signs that the US may not come to Japan's aid against China."

The Japan Times (4/25, Aoki, 16K) reports that "faced with the difficult task of reassuring Japan about America's military commitment in the region without inflaming Beijing," the President "stressed that this is the 'standard interpretation' of the treaty that past US administrations have maintained, and the position stands."

Reuters (4/25, Felsenthal, Sieg) reports that the President said, "We don't take a position on final sovereignty determinations with respect to Senkaku, but historically they have been administered by Japan and we do not believe that they should be subject to change unilaterally and what is a consistent part of the alliance is that the treaty covers all territories administered by Japan." Reuters also reports that, in response to the President's remarks, Chinese Foreign Ministry spokesman Qin Gang said, "The so-called US-Japan security treaty is a product of the Cold War era and it cannot be aimed at a third party and ought not to harm China's territorial sovereignty." In an analysis for the Japan Times (4/25, Yoshida, 16K), Reiji Yoshida calls the President's reiteration of US policy "significant."

The Wall Street Journal (4/25, Subscription Publication, 5.51M), in an editorial, praises the President's comments on US obligations to defend Japan in the event of territorial aggression from China. The Journal also applauds the President for having told a Japanese newspaper, "I commend Prime Minister Abe for his efforts to

strengthen Japan's defense forces and to deepen the coordination between our militaries, including by reviewing existing limits on the exercise of collective self-defense."

Trade Deal Breakthrough Continues To Elude Obama. According to the New York Times (4/25, A1, Landler, Rudoren, Subscription Publication, 9.65M), the President "encountered [a] setback...to" on of his "most cherished foreign-policy projects...as he failed to achieve a trade deal that undergirds his strategic pivot to Asia." The Times says the President "had hoped to use his visit" to Japan "to announce an agreement under which Japan would open its markets in rice, beef, poultry and pork, a critical step toward the trade pact," but Abe "was not able to overcome entrenched resistance from Japan's farmers in time for the president's visit." But the Times goes on to report that "the trade talks with Japan still hold some hope of yielding a landmark deal, since it is in the interests of both Mr. Abe and Mr. Obama."

The Washington Post (4/25, Eilperin, 4.22M) reports that as the President "called for 'bold steps' to reach an accord, he noted that both he and his Japanese counterpart faced domestic resistance to such a deal," saying, "I've been very clear and honest that American manufacturers and farmers need to have meaningful access to markets that are included under TPP, including here in Japan." The Post says that despite the persistent roadblocks, American and Japanese "negotiators worked into the night in an effort to make progress on the trade deal."

The AP (4/25, Superville) reports that "the top Japanese negotiator said Thursday that talks had come to a stop only to have a US official later say that discussions would continue."

According to the Japan Times (4/25, Aoki, 16K), the Us and Japan "have been at odds on Japan's tariffs on five agricultural product categories – rice, wheat, beef and pork, dairy products and sugar."

The Japan Times (4/25, Yoshida, 16K) reports that Akira Amari, Japan's fiscal and economic policy minister, and USTR Michael Froman "have engaged in marathon negotiations in the past weeks, but failed to show tangible results before the Obama-Abe summit." The Times notes that Amari, who "said he and Froman have already had talks totaling as long as 40 hours this month," on Thursday acknowledged that "if I was asked to serve a minister in charge of (the TPP talks) again, now I would say I don't want to take it."

According to Politico (4/24, Bradner, 73K), "The AFL-CIO, the Sierra Club, consumer advocates – most of the liberal groups that typically align with Obama – are ready to do battle with the president over the Trans-Pacific Partnership." Politico adds that "congressional sources say there are at most 60 or so Democrats who might support the pact."

The Wall Street Journal (4/25, Nelson, Hayashi, Subscription Publication, 5.51M) reports that on Thursday, the President said, "Prime Minister Abe has got to deal with his politics; I've got to deal with min. All of us have to move out of our comfort zones and not just expect that we're going to get access to somebody else's market without providing access to our own."

Fareed Zakaria, in his column for the Washington Post (4/25, 4.22M), says, "It's fair to say that Obama has not given enough attention and energy to his own 'pivot' strategy." According to Zakaria, the President's "second-term team is conspicuously lacking in Asia experts." Zakaria also writes that in a "sad shift," the President's fellow Democrats have "long tumbled [their] back on the TPP."

Ahead Of Seoul Visit, Obama Calls Attention To China's Role In Containing North Korea. Justin McCurry, in a piece for the Christian Science Monitor (4/25, McCurry, 566K), says that on Thursday, "in an attempt to placate Beijing," the President "described China as a 'critical country not just to the region but to the world,'" before adding, "We want to encourage the continued peaceful rise of China."

AFP (4/25) notes on Thursday, the President also "described as 'critically important' China's role in keeping" North Korea, "its wayward ally in check after South Korea said heightened activity at the North's main nuclear test site could point to an imminent test – its fourth." AFP quotes the President as saying, "China's participation in pushing the DPRK (North Korea) in a different direction is critically important."

Bloomberg News (4/25, Kim, 2.76M) reports that "South Korean Defense Ministry officials said this week that

activity at North Korea's underground test site at Punggye-ri signaled it may soon detonate a fourth device," but left "open the possibility it may be a bluff."

The Korea Herald (4/25, 441K) says the "nuclear threats from North Korea, including the possibility of an additional nuclear test, will be a key topic when President Park Geun-hye holds talks with" President Obama "later this week." The Herald notes that the President "is scheduled to arrive in Seoul on Friday for a two-day visit amid growing concerns that Pyongyang could conduct its fourth nuclear test."

According to the New York Times (4/25, Sanger, Subscription Publication, 9.65M), "Almost everything American intelligence agencies...thought they understood two years ago about Kim Jong-un, the North's young leader, turns out to have been wrong." The Times adds that "the briefings given to President Obama after Mr. Kim inherited leadership said it was almost certain he would be kept in check by his more experienced uncle," but, "instead," Kim "had his uncle and dozens of others executed." The Times says that "as a result," while in South Korea, the President "will be confronting the question of whether his strategy of 'strategic patience' with the North has been overtaken by reality."

According to Yonhap (4/25, Lee, 441), President Obama "will inform" Park "of Washington's decision to 'reconsider' the current plan to hand over wartime operational control (OPCON) of South Korean troops to Seoul in 2015," which will "mark Washington's clearest signal yet that it's in favor of Seoul's request for another delay in the OPCON transfer."

North Korea May Be Planning Imminent Nuclear Test. AFP (4/25) reports President Obama arrived in Seoul Friday "to growing signs North Korea was defiantly readying another nuclear test. ... Satellite photos taken just two days ago showed additional activity at North Korea's Punggye-ri test site that is 'probably related to preparations for a detonation,'" the US-Korea Institute at Johns Hopkins University said. CNN (4/25, Brumfield, Acosta, Liptak, 77.95M) says on its website that while North Korea's "heightened activity at its nuclear test site was already known," a South Korean official said Thursday that the North "has closed off the entrance to the tunnel" at the site, the "final step needed" before an underground detonation can be performed.

Obama Meets With Relatives Of Japanese Abducted By North Korea. Japan Today (4/25, 4K) reports that on Thursday, President Obama "met with the three relatives of two Japanese citizens who were abducted by North Korea."

Obama Meets Japan's Emperor, Attends State Dinner. McClatchy (4/25, Clark, Subscription Publication, 23K) reports that on Thursday at a state dinner, the President "toasted what he said was a strengthened alliance with Japan." McClatchy notes that Emperor Akihito and Empress Michiko "received Obama at Japan's Imperial Palace," and that the President said he had "very fond memories" of his last visit four years ago when he "didn't have any gray hair." McClatchy says the emperor replied, "You have a very hard job."

Under the headline "In Japan, Obama Plays Soccer With A Robot And Warns Students Of Climate Change," the Washington Times (4/25, Wolfgang, 455K) report that "before addressing a group of 30 Japanese students – and warning them about the looming devastation of climate change – the president toured Tokyo's National Museum of Emerging Science and Innovation and viewed a demonstration of an award-winning robot that can...kick a soccer ball."

Obama Visiting South Korea As It Grapples With Aftermath Of Ferry Disaster. The AP (4/25, Pace) reports that South Korea "is reeling from the ferry disaster that has left more than 300 dead or missing." The AP says "the tragedy has consumed South Korean President Park Geun-hye in the lead-up to Obama's visit and could distract from the security and economic agenda she had been expected to highlight during her meetings with the U.S. president." According to the AP, the President "probably will balance his expected statements – warnings against North Korean nuclear provocations and calls to lower tensions in regional territorial disputes – with words of condolence for the ferry victims and the people of South Korea."

The Korea Times (4/25, Kim, 165K) also reports that the President "is expected to express his condolences to the victims." According to NBC Nightly News (4/24, story 5, 0:25, Williams, 7.86M), "Divers have now recovered 175 victims."

US Seeks Part Of Proceeds From Sale Of House Owned By Former South Korean President. The Los Angeles Times (4/25, Kim, 3.46M) reports that on Thursday, "the U.S. government...filed a civil forfeiture claim in Los Angeles to seize more than \$700,000 in alleged corruption proceeds from former South Korean President Chun Doo-hwan."

China Accused Of Making Grab For Indonesian Territory. Gen. Moeldoko, commander in chief of Indonesia's armed forces, in an op-ed for the Wall Street Journal (4/25, Moeldoko, Subscription Publication, 5.51M), says that as a result of its claims in the South China Sea, China has effectively made the case that islands belonging to Indonesia are within their territory. Moeldoko says the Chinese claims have forced Indonesia to increase its military presence in the region.

Malaysian PM Says His Country Must Cooperate With Both US And China. Under the headline "Malaysia Prime Minister Aims To Set Fresh Diplomatic Course During Obama Visit," the Wall Street Journal (4/25, Hookway, Subscription Publication, 5.51M) reports that ahead of President Obama's visit to Malaysia on Saturday, Prime Minister Najib Razak says he intends to tout his country's growing influence in the region. Najib is quoted as saying, "We are poised to play a bigger role." Najib goes on to say that "the key to the future stability and prosperity for the whole region" is "how to manage that relationship between the United States and China. ... We don't want to be in a position where we have to choose one over the other."

ADMINISTRATION EXPECTED TO PURSUE TWO-STEP DEPORTATION REFORM. Reuters (4/25, Edwards, Cowan) reports that the Administration may split the changes it plans for deportation policy into two separate parts, with several small steps in the near term followed by a second round of significantly stronger measures later this year. In the short term, DHS is expected to limit the deportations of illegal immigrants who have not committed serious crimes. Immigration advocates who have been in communication with the White House expect the Administration to act on issues such as work permits for some immigrants or government issued IDs.

GOP Senators Push Back. Meanwhile, USA Today (4/25, Gomez, 5.82M) reports that a group of 22 GOP senators sent a letter to the President on Thursday "urging him to abandon a review he ordered to find a way to conduct deportations 'more humanely.'" The Republicans "say that any proposals to weaken the deportation system in the U.S. would represent 'an astonishing disregard for the Constitution, the rule of law, and the rights of American citizens and legal residents.'"

The AP (4/25, Werner) reports that the letter also says that the changes the Administration is reportedly considering would amount to "near complete abandonment of basic immigration enforcement."

Politico (4/24, Kim, 73K) said that the letter "underscores the delicate political dynamics that major executive action on deportations – like the kind that is demanded from liberal activists and the Latino community – could have on Capitol Hill, as well as on immigration reform."

The Daily Caller (4/24, May, 408K) reported that the letter points out that, "according to the LA Times, since 2009 there has been a 40 percent decline in interior removals" In addition, based on ICE data, "essentially all the aliens removed from the United States were either convicted criminals or repeat border crossers – in fact, in 2013 ICE ended up releasing some 68,000 deportable criminal aliens back into the U.S."

MIXED ECONOMIC NEWS OVERSHADOWED BY HOUSING MARKET WEAKNESS. Thursday's economic news was fairly mixed, with durable goods orders rising, along with consumer confidence, but jobless claims up more than expected. However, overshadowing this were concerns that housing market weakness, demonstrated in several recent reports, was holding back the economy.

The New York Times (4/25, Irwin, Subscription Publication, 9.65M) reports that the while the housing market is "booming" in some major urban areas, outside of them "housing is nowhere close to pulling its economic weight." The Times says that investment in residential property "remains a smaller share of the overall economy than at any time since World War II, contributing less to growth than it did even in previous steep downturns," while building activity also remains far below its postwar average. The piece looks at the causes, such as a lack of new buyers despite population growth and a rise in the popularity of rented apartments.

In a similar piece looking at the issue, McClatchy (4/25, Hall, Subscription Publication, 23K) reports that recent

economic reports suggest that "a speedier recovery of the housing market does not appear in the cards this year." Housing experts "are dialing back rosier projections in favor of another ho-hum year, where home sales are flat and prices climb to make ownership less affordable."

The AP (4/25) reports that durable goods orders rose 2.6 percent in March, up from a 2.1 percent increase in February, according to Commerce Department data released on Thursday. The two months of increases offset significant declines in December and January. The AP adds that demand for "core capital goods, considered a good guide for business investment plans, rose 2.2 percent in March after a 1.1 percent drop in February."

Bloomberg News (4/25, Chandra, 2.76M) reports that the increase points to "faster production that will help spur the economy." Economists surveyed by Bloomberg had expected overall orders to rise at 2.0 percent. The largest rise "in computers and electronics orders since November 2010 highlighted a broad-based pickup in demand that will help the economy rebound after a weather-plagued first quarter."

Reuters (4/25, Mutikani) says that combined with other reports, the durable goods data suggests that the economy began to accelerate at the end of the first quarter as the harsh winter weather receded.

Bloomberg News (4/25, Smialek, 2.76M) reports that first-time claims for jobless benefits rose 24,000 last week to 329,000 "as the Easter holiday period made it more difficult to adjust the data for seasonal variations." Economists surveyed by Bloomberg News expected claims to come in at 315,000. The four-week moving average, which irons out week-to-week volatility, rose 4,750 to 316,750.

Mortgage Lending At Lowest Level In 14 Years. The Wall Street Journal (4/25, A1, Timiraos, Subscription Publication, 5.51M) reports that during the first quarter of this year, mortgage lending fell to its lowest level in 14 years, bedeviled by rising interest rates. According to Inside Mortgage Finance, lenders originated \$235 billion in mortgages during the first quarter, down 23% from the fourth quarter of 2013 and 58% over the first quarter of 2013. The Journal says that the drop in mortgage activity was almost all caused by a sharp drop in refinancing activity, which has become less attractive as rates have risen.

Consumer Comfort Hits Highest Level In Eight Months. Bloomberg News (4/25, Jamrisko, 2.76M) reports that its Consumer Comfort Index rose to minus 25.4 for the period ending April 20, the "the second-strongest level since January 2008, from minus 29.1 the prior week." Bloomberg says that market increases are "bolstering sentiment among wealthier Americans while an improving labor market boosts prospects for a broader swath of earners." However, further wage increases "may be needed to strengthen household budgets and keep a floor under confidence as the world's largest economy regains its footing."

Editorial Wrap-Up:

NEW YORK TIMES. "Creating A Two-Speed Internet." The New York Times (4/25, board, Subscription Publication, 9.65M) says in an editorial that "dividing traffic on the Internet into fast and slow lanes is exactly what" the FCC "would do with its proposed regulations, unveiled this week. And no amount of reassurances about keeping competition alive will change that fact. ... Figuring out what is reasonable will be very difficult, and the commission will struggle to enforce that standard."

"A Questionable Decision On Egypt." An editorial in the New York Times (4/25, Subscription Publication, 9.65M) blasts the US decision to resume some military aid to Egypt, saying it "will come across as a vote of confidence in a military-dominated government with an authoritarian agenda and a track record of violent crackdowns on dissenters and political opponents." The Times argues that the Obama Administration must "be more honest about the unsavory choices it is making, including whether any support for a repressive army will ever bring stability and democracy."

"The Regeneration Of 'Degenerate Art.'"

WASHINGTON POST. "The High Cost Of Secrecy." In an editorial, the Washington Post (4/25, 4.22M) criticizes Saudi Arabia's lack of transparency about the outbreak of the coronavirus known as MERS, arguing that reports about infections "have lacked details, and the kingdom does not encourage a free press to poke

around." Noting that "uncertainties about the MERS virus persist, including how it spreads, whether it has efficiently begun human-to-human transmission and whether its genetic makeup has evolved," the Post argues that "there must be a move to clarity, cooperation and transparency" from Saudi Arabia.

"Virginia Edges Toward The Abyss." In an editorial, the Washington Post (4/25, 4.22M) discusses Virginia Gov. Terry McAuliffe's plan to expand Medicaid in the face of increasing intransigence by state GOP lawmakers and the threat of a shutdown. The Post calls McAuliffe "long on determination but short on strategies," and details the possible effects of a state shutdown if the stalemate continues. However, the editorial also criticizes Republicans for their actions, and says that "It's time for Republicans to negotiate in good faith," concluding that a shutdown would cause real harm to the state's citizens and "must be avoided."

"Clearing The Air." In an editorial, the Washington Post (4/25, 4.22M) discusses the FDA's decision to start evaluating the risk from e-cigarettes and other tobacco products, calling it a "welcome, if overdue" move. The Post argues that the risk from e-cigarettes especially needs to be evaluated, given the rising rates of youths using them as well as adult smokers consuming more nicotine. The regulation of e-cigarettes, the editorial says, will require the FDA to "determine how to keep e-cigarettes available to those who might benefit from them while minimizing their capacity to hook young people or encourage continued smoking."

WALL STREET JOURNAL. "Detroit's Bankruptcy Revival." The Wall Street Journal (4/25, Subscription Publication, 5.51M) editorializes on the bankruptcy deal in Detroit, saying that the actions of Michigan Gov. Rick Snyder and emergency manager Kewyn Orr, while often criticized, have been successful in advancing Detroit toward recovery. The Journal details the actions of Orr especially, noting the resistance he has encountered with each step as well as the improvements Orr's decisions have brought. The editorial also argues that although Treasury Secretary Lew will visit Detroit to underscore the Obama Administration's commitment to the city's recovery, Federal aid from Washington has only delayed the city's inevitable collapse, and it was Snyder and Orr's decision to declare bankruptcy which has had the most positive impact.

"Uncover Oregon." An editorial in the Wall Street Journal (4/25, Subscription Publication, 5.51M) blasts the failure of the Oregon health insurance exchange website, saying it wasted \$303 million in ACA grants. The Journal argues that the Federal takeover of the Oregon exchange is an effort to save the career of Sen. Jeff Merkley who may be in danger as a result of the growing scandal and his vote in favor of the ACA.

"Obama Stands With Abe." The Wall Street Journal (4/25, Subscription Publication, 5.51M), in an editorial, praises the President's comments on US obligations to defend Japan in the event of territorial aggression from China. The Journal also applauds the President for having told a Japanese newspaper, "I commend Prime Minister Abe for his efforts to strengthen Japan's defense forces and to deepen the coordination between our militaries, including by reviewing existing limits on the exercise of collective self-defense."

Washington Schedule:

TODAY'S EVENTS IN WASHINGTON.

White House:

PRESIDENT OBAMA – Meets and greets with Embassy personnel, Okura Hotel, Tokyo, Japan, closed press; participates in the farewell greet with the Emperor and Empress of Japan, limited pool spray at the top; departs Tokyo, Japan en route Seoul, Republic of Korea, open press; arrives Seoul, Republic of Korea, open press; participates in a naturalization ceremony, National War Memorial, Seoul, Republic of Korea, travel pool coverage; participates in a wreath laying ceremony, National War Memorial, Seoul, Republic of Korea, travel pool coverage; tours the Gyeongbok Palace, Seoul, Republic of Korea, travel pool coverage; participates in the official arrival Ceremony with President Park of the Republic of South Korea, Blue House Seoul, Republic of Korea, pre-set pool coverage; participates in the guest book signing and official photo with President Park of the Republic of South Korea, travel pool coverage; holds a bilateral meeting with President Park of the Republic of South Korea, travel pool spray at the top; delivers brief remarks with President Park on the return of cultural artifacts, travel pool coverage; holds a joint press conference with President Park of the Republic of South Korea, pooled for cameras and open to limited correspondents; participates in a working dinner with President Park of the Republic of South Korea, closed press.

VICE PRESIDENT BIDEN – No public schedule.

US Senate: Not in session.

US House: Not in session.

VAN HOLLEN, CASTRO CONFERENCE CALL – 11 a.m. Budget Committee Ranking Member Chris Van Hollen, D-Md., and Rep. Joaquin Castro, D-Texas, hold a press conference call to discuss the impact of the Ryan Republican Budget on young Americans. Notes: RSVP to Jorge.aguilar@mail.house.gov to receive call-in information.

Other: NASA – EARTH DAY EVENTS – April 21 – 27. NASA celebrates the 44th anniversary of Earth Day with a variety of activities. Location: Various. Contacts: Steve Cole (stephen.e.cole@nasa.gov), 202-358-0918.

STEM LEADERSHIP CONFERENCE – April 23 – 25. U.S. News STEM Solutions hosts The National Leadership Conference. Theme: "Where Employers and Educators Meet." Speakers include: Norm Augustine, former Chairman and CEO, Lockheed Martin; Nate Ball, Host, PBS Kids "Design Squad"; Kimberly Bryant, Founder, Black Girls Code; Mitchell Chester, Ed.D., Commissioner, Massachusetts Department of Elementary and Secondary Education; Glenn DuBois, Ph.D., Chancellor, Virginia Community College; System; Joan Femini-Mundy, Ph.D., Assistant Director, National Science Foundation; Michael Gallagher, President and CEO, Entertainment Software Association; Linda Gojak, President, National Council of Teachers of Mathematics; Wendy Hawkins, Executive Director, Intel Foundation; Gwenne Henricks, Chief Technology Officer, Caterpillar; Freeman Hrabowski III, Ph.D., President, University of Maryland-Baltimore County Cheryl Hyman, Chancellor, City Colleges of Chicago; Shirley Ann Jackson, Ph.D., President, Rensselaer Polytechnic Institute; Xiaochun Luo, Ph.D., Chief Scientific Officer, Avon; Col. Rich Morales, Executive Director, Joining Forces, The White House; Eduardo Padrón, Ph.D., President, Miami Dade College; Hadi Partovi, Co-Founder and CEO, code.org; Kim Reynolds, Iowa Lieutenant Governor; Dara Richardson-Heron, M.D., CEO, YWCA USA; James Shelton, Deputy Secretary, U.S. Department of Education (4:15 p.m.); William Swanson, Chairman, Raytheon Company. Location: Walter Washington Convention Center, 801 Mt. Vernon Place, NW. Contacts: Lucy Lyons llyons@usnews.com

EXPORT-IMPORT BANK ANNUAL CONFERENCE – April 24 – 25. The conference will focus on the global business environment and prospects for growth. Business and government leaders will address export opportunities and challenges for American companies, the role of emerging markets, and the U.S. Trade Agenda. The Bank will also celebrate “80 years of promoting American jobs and exports.” Highlights: U.S. Secretary of Commerce Penny Pritzker will speak on a panel moderated by John Podesta at the 2014 Ex-Im Bank Annual Conference in Washington, DC. She will discuss the Administrations trade agenda and the Commerce Department’s “Open for Business Agenda.” Secretary of Agriculture Tom Vilsack and Secretary of Energy Ernest Moniz will also participate in the conversation. Location: Omni Shoreham Hotel, 2500 Calvert St. NW. Contacts: Matt Bevens, matthew.bevens@exim.gov. Notes: To RSVP, please email your name and media organization to meetings@cmpinc.net. On-site registration may be limited. For coverage of morning sessions, all cameras are asked to arrive by 8:00 a.m. Kerry’s remarks corrected to Thursday.

ABI’S 32ND ANNUAL SPRING MEETING – April 24 – 27. Highlights: 10:15 a.m. – 11:45 a.m. “Large Complex Trusts: A General Motors Case Study” Panel Discussion on General Motors bankruptcy case with an in-depth discussion about the issuance of public units in a major bankruptcy. The session will also include the challenges addressed by the trust such as liability claims. 12 p.m. – 2 p.m. Keynote by Detroit Emergency Manager Kewyn Orr. Contacts: John Hartgen jhartgen@abiworld.org (703-894-5935)

USA SCIENCE & ENGINEERING FESTIVAL FINALE EXPO – April 25 – 27. The USA Science & Engineering Festival. Highlights: 8 a.m. NASA Administrator Charles Bolden will join Marilyn Hewson, president and CEO of Lockheed Martin, NASA astronaut Rex Walheim, and members of the agency’s Orion Program to announce the winning high school team in the Exploration Design Challenge. The winning team’s radiation shield design will fly on the Orion spacecraft’s first flight test, which is targeted for December. 8:30 a.m. – 3 p.m. Media Sneak Peek Friday festival preview for press, school children and invited military families. 2 p.m. Google+ Hangout featuring a “Mars Virtual Field Trip” will be hosted by NASA and the U.S. Department of State in partnership with Google via NASAs Distant Learning Network (DLN). The collaborative, science based program will engage students from the U.S., Argentina and Nicaragua to help them better understand the need for strong skills in science, technology, engineering and math (STEM). Location: Walter Washington Convention Center, 801 Mt. Vernon Place, NW. Contacts: Shawn Flaherty, 703-554-3609. Media: Marc Schulman marc@usasciencefestival.org. Notes: Festival Expo is open to the public April 26-27 from 9 a.m.-6 p.m.

USA SCIENCE AND ENGINEERING FESTIVAL – April 25 – 27. 9 a.m. – 6 p.m. USA Science and Engineering Festival, which hosts student teams from colleges and universities across the country who exhibit sustainable projects and compete for EPAs People, Prosperity and the Planet (P3) Award. Awardees will be recommended for a grant of up to \$90,000 to further develop their projects and take them to the marketplace. This years P3 Competition and National Sustainable Design Expo is co-located with the USA Science and Engineering Festival at the Walter E. Washington Convention Center. The USA Science and Engineering Festival is the largest science festival in the United States and will feature a Sustainability Pavilion where EPAs P3 student teams will display their innovative projects alongside exhibitors from other organizations and businesses showcasing their work in sustainability. EPA Speakers at 12:30p. VIP media availability at 3p. Speakers: Bob Perciasepe, Deputy Administrator, U.S. Environmental Protection Agency; Lek Kadeli, Acting Assistant Administrator for EPAs Office of Research and Development; Bob Kavlock, Deputy Assistant Administrator for Science for EPAs Office of Research and Development; Jim Johnson, Director of the National Center for Environmental Research, EPA Office of Research and Development. Sunday 27th – 4:00-5:30 PM EDT: Lek Kadelis presentation of the P3 Awards Ceremony, with remarks by Bob Perciasepe. Location: Sustainability Pavilion, located in Hall E of the Walter E. Washington Convention Center, 801 Mount Vernon Place (between 9th and 7th Streets NW on L Street NW)

USIP – CHINA’S ROLES – 9:30 a.m. – 4:30 p.m. The U.S. Institute of Peace and the Georgetown University’s School of Foreign Service present “China’s Roles in the World,” a daylong conference designed to explore China’s growing role in the global economic, military and political realms and implications for regional security and U.S. policy. Highlights: 12:15 p.m. – 1:15 p.m. Lunchtime address on China and the Wider West with Sir Peter Westmacott, British Ambassador to the United States. Location: 2301 Constitution Ave. NW. Notes: Journalists should contact Allison Sturma at interviews@usip.org.

NASA – LOCKHEED MARTIN – DESIGN CHALLENGE WINNER – 8 a.m. NASA and Lockheed Martin announce the winning radiation shielding experiment for the Orion Exploration Design Challenge. The winners design will be

built and flown on Orion's upcoming Exploration Flight Test-1. Following the announcement, the students and subject matter experts from Lockheed Martin and NASA will be available for interviews. Location: USA Science and Engineering Festival, Lockheed Martin Booth, Washington Convention Center. Contacts: Al Black (ablack@qorvis.com), 202-683-3130

USCC – CLEAN ENERGY – 9 a.m. – 1:15 p.m. The U.S.-China Economic and Security Review Commission holds a public hearing on "U.S.-China Clean Energy Cooperation: Status, Challenges, and Opportunities." This hearing will examine, among other things, China's energy needs and clean energy policies, the recent developments in the U.S.-China clean energy cooperation, and the implications of such cooperation for the United States. Location: 608 Dirksen.

ELECTRONIC COMMUNICATIONS PRIVACY – 12 p.m. – 1:15 p.m. The Congressional Internet Caucus Advisory Committee hosts a panel discussion on "Revising The Electronic Communications Privacy Act (ECPA): Should Congress Require a Warrant?" Speakers: James X. Dempsey, Center for Democracy & Technology; Richard W. Downing, Principal Deputy Chief, Computer Crime and Intellectual Property Section (CCIPS), United States Department of Justice; Nancy Libin, Partner, Wilkinson Barker Knauer, LLP; Katie McAuliffe, Executive Director of Digital Liberty, Federal Affairs Manager for Americans for Tax Reform. Location: 2226 Rayburn.

WASHINGTON INSTITUTE – ISLAMISTS IN GOVERNMENT – 12 p.m. – 2 p.m. The Washington Institute hosts a Policy Forum exploring "Islamists in Government: Do They Moderate Once in Power?" with State Department official Haroon Ullah, who will be joined by Institute fellows Eric Trager and Vish Sakthivel. Location: Stern Library and Conference Room, The Washington Institute, 1828 L St. NW, Suite 1050. Contacts: Brittany Parker (Bparker@washingttoninstitute.org), 202-452-0650. Notes: RSVP to press@washingttoninstitute.org. Members of the media wishing to cover the event with cameras should call 202-230-9550.

ARLINGTON – ACTIVE DUTY BURIAL – 12:30 p.m. Burial service for U.S. Navy Master-at-Arms 2nd Class Mark A. Mayo, who was shot aboard the USS Mahan in March. Open for media coverage. Meet on Memorial Avenue by 12:30 p.m. All media intending to cover the service must contact Melissa Bohan, Arlington National Cemetery public affairs, for an escort: melissa.bohan@us.army.mil or (703) 614-1091. Location: Arlington National Cemetery, Arlington, Va. 22211.

WILSON CENTER – SOUTH ASIA NUCLEAR – 12:30 p.m. – 2 p.m. The Asia Program and the Los Alamos National Laboratory present a meeting of the Wilson Center's Nonproliferation Forum on "South Asia's Nuclear Competition in the New Era of Extremism, Militancy, and Terrorism." Speaker: Peter Lavoy, Partner, Monitor 360, former acting assistant secretary of defense and deputy director of national intelligence. Location: Woodrow Wilson Center, Ronald Reagan Building, 1300 Pennsylvania Ave. NW.

EDUCATION TOWN HALL – 1 p.m. Education Secretary Arne Duncan and White House Director of Policy Cecilia Munoz take part in a town hall discussion with educators and teacher preparation experts on the importance of supporting high-quality teachers. Location: Paul Lawrence Dunbar High School, 101 N St. NW. Contacts: press@ed.gov, 202-401-1576.

Last Laughs:

LATE NIGHT POLITICAL HUMOR.

Jimmy Kimmel: "The President is in Japan today. They invited him to the National Museum of Science and Innovation to show him, among other things, the robot that Honda developed. You may have seen incarnations of this. Now the thing can kick a soccer ball. It's cute watching the President interact with a prototype which will one day enslave us all, isn't it?"

David Letterman: "And today is bring your sons and daughters to work day. ... But if you think about it, take your kid to work day, that's how we ended up with George W. Bush, isn't it?"

Stephen Colbert: [Referring to the Supreme Court's decision to uphold Michigan's ban on the use of race in deciding college admissions.] "Finally, this decision ends the unfair practice of admitting students based on their

race and allows more students to be admitted based on if their parents went there.”

Jimmy Fallon: “While he was in Japan today, President Obama visited a science museum, where he actually played soccer with a robot. Yeah. Biden is negotiating with the prime minister in Ukraine and Obama is playing soccer with a robot. It’s like the White House version of ‘Freaky Friday.’”

Jimmy Fallon: “Of course, the situation in Ukraine still has a lot of people worried, and now the FAA is banning US airlines from flying near Crimea. So, if you were planning on a summer vacation to a place where families are torn apart by conflict, you’ll have to stick with Disney World.”

Seth Myers: “Chicago Mayor Rahm Emanuel announced plans to build the Barack Obama College Preparatory High School, which will open in 2017. The Obama school is expected to be very popular at first. And then, who knows?”

INFORMATION MEMORANDUM TO THE SECRETARY

INTERNAL DISCUSSION WITH ANNE CASTLE, SUZETTE KIMBALL, TOMMY BEAUDREAU AND LAURA DAVIS

DATE: April 29, 2014
LOCATION: Anne Castle's Office – Room 6657
TIME: 2:00PM – 2:30PM
FROM: Anne Castle, A/S for Water and Science, 202-208-7211; Suzette Kimball, Acting
Director, USGS, 703-648-4454

I. PURPOSE

The purpose of the memorandum is to provide you with background information regarding USGS biological research support to the Department and, particularly, the USFWS.

II. BACKGROUND

In 1993, then Secretary of the Interior Bruce Babbitt made a fundamental change in management of DOI biological research and monitoring programs by transferring capabilities from seven DOI bureaus into a new bureau, the National Biological Survey (NBS). Secretary Babbitt's vision was that creation of NBS would strengthen the credibility of science in DOI by separating the conduct of science from decision-makers it supports. This decision, effected by Secretarial Order, followed a series of adverse judicial rulings in which courts criticized a number of Interior's decisions, finding that the science underpinning ESA analyses lacked credibility. Secretary Babbitt's goal was to create science capacity to tackle complex, cross-jurisdictional ecological problems, to increase the credibility of and respect for that science, and to ensure that unbiased data would be provided to decisionmakers.

From the outset, NBS as a separate entity met opposition on multiple fronts, and after three years Congress eliminated funding for NBS in the FY1997 Interior budget and transferred its functions, personnel, and facilities to the USGS at a funding level of \$137.0M; \$42.4M (-24%) below the original FY1994 enacted level of \$179.4M.

USGS Biological Research Capabilities: Since consolidation within the USGS seventeen years ago, DOI biological science has thrived with its original mission intact to deliver proactive, independent, and policy-neutral science for management of DOI trust resources. The USGS currently maintains a national network of 17 major science centers, 61 associated field stations, 40 Cooperative Fish and Wildlife Research Units co-hosted with universities, and 5 major research vessels operating on the Great Lakes. Total replacement value of USGS owned facilities dedicated to biological research is approximately \$169M with annual operating costs of \$28M. The USGS maintains and continuously upgrades a full breadth of research capabilities at these facilities, including fish and wildlife species biology and ecology, aquatic and terrestrial ecology, wildlife disease, genetics and genomics, invasive species detection and control, landscape, fire, climate change, and coastal and wetlands ecology, advanced technology, adaptive management, and structured decision-making for natural resource management.

Biological science is leveraged in the USGS through integration with the physical and natural sciences expertise in the bureau, making the interdisciplinary, often landscape-scale, approach required by today's complex natural resource issues readily available. This integrated approach allows for far greater understanding of the dependencies and relationships within landscapes, resulting in more robust science that can support sustainable resource management decisions. One recent example is the USGS response to Hurricane Sandy, in which expertise in wetlands ecology, migratory waterfowl, remote sensing, coastal and marine geology, hydrology, contaminants, toxics, and natural hazards were integrated to assess damage to eastern National Parks, Seashores, and Wildlife Refuges and to build the scientific basis for understanding resiliency of DOI coastal assets to future extreme events and supporting the recovery effort.

USGS Fundamental Science, Scientific Integrity, and Peer Review Policies: USGS maintains a rigorous peer review process to ensure scientific integrity and objectivity, which is invaluable to the Department in making tough decisions. USGS is recognized for leadership in developing and implementing DOI's flagship scientific integrity policy, which was largely modeled on previously existing USGS policy. Through strict adherence to these institutional policies and practices, USGS has garnered public trust and is more readily perceived as unbiased by a wide variety of stakeholder groups including Congress, other federal and state agencies, non-governmental institutions, and private industry. Without at all undervaluing the expertise and independence of other scientists within the Department of the Interior, USGS's lack of regulatory or management responsibility provides a degree of *perceived* independence that cannot be replicated in bureaus with those responsibilities. USGS' reputation for independence gives the Department enhanced credibility when it makes difficult decisions and reduces the risk that opponents will challenge the scientific basis for the decision.

Research in Support of DOI Management Needs: The vast majority of the portfolio of the USGS Ecosystems Mission Area, the primary USGS biology program, is focused on science support for DOI land management and regulatory responsibilities. This approach not only provides financial savings over a model that distributes research assets across multiple bureaus, but ensures a more harmonized Departmental approach to the most challenging natural resource issues of our time. This has been a significant advantage to DOI at a time when so many issues cross organizational boundaries.

In FY2014, the Ecosystems Mission Area is allocating its appropriated science funds into the following lines of work (% of funding, \$158M total):

Imperiled Species	17.6%
Ecological Stressors	17.1%
Ecosystem Ecology	15.2%
Landscape Science	13.7%
Species of Management Concern	10.4%
Application of Advanced Technologies	9.1%
Invasive Species	8.4%
Restoration Science	7.3%

These lines of work directly support the DOI Mission. In FY2013, the USGS Ecosystems Mission Area leveraged its Congressional appropriations of \$155 million with an additional \$93M in reimbursable funds from a diversity of Federal, State, and NGO partners to support these lines of work. This significant leveraging – increasing the total budget by 60 percent – enables USGS to greatly increase its ability to address high priority research topics.

As evidenced by the examples provided in the attached appendix, several of the DOI bureaus share common science needs that can best be addressed through one DOI science bureau rather than duplication and fragmentation of effort across multiple bureaus.

USGS Support for FWS: The primary mission of the USGS Ecosystems Mission Area is to provide research, monitoring, data, and tools for management of DOI trust lands and species. The Ecosystems Mission Area evolved out of the USGS Biological Resources Division, which evolved out of the NBS. The NBS was formed by transfer of \$141M, 1,522 FTE, and facilities from seven DOI bureaus, with an addition of \$38M and 77 FTE in new appropriations. The largest portion of NBS assets came from the FWS.

Since creation of USGS Biological Resources Division in 1996, service to DOI bureaus from the Ecosystems Mission Area has remained roughly proportional to the original funding contribution, based on the most recent comprehensive inventory conducted with FY2011 data. This comparison, however, does not include science support to DOI bureaus including FWS from other USGS Mission Areas, such as Core Science Systems, Environmental Health, Water, and Climate and Land Change. Because these Mission Areas have all contributed expertise to ecosystem science in support of DOI bureaus, the benefits provided to the bureaus is greater than a simple comparison to the funding for the Ecosystems Mission Area. In FY2014, these Mission Areas are anticipated to contribute \$17 million to DOI ecosystem science, of which over \$12 million was directly for FWS projects.

The largest change to research design since the creation of NBS has been the evolution of projects that serve multiple bureaus, as resource management issues have become more complicated and affect a larger number of Federal, State, Tribal, and private landowners. Thus, to provide the science needed to protect DOI trust resources, particularly at a landscape level, the USGS now consults with an ever increasing and more complicated mix of interests. The USGS works very closely with partners to plan and prioritize research to help address the most pressing, visible, and controversial DOI management issues, such as energy development, grizzly bear, sage grouse, polar bear, Asian carp, and White Nose Syndrome in bats. These issues, by nature, span the interests of more than one DOI bureau or stakeholder.

USGS Overhead: USGS collects overhead on all externally funded projects as part of the full cost recovery requirements for federal agencies. For science centers conducting ecosystems work, the current composite rate – which includes overhead costs at the science center and bureau plus facilities -- ranges from 26 to 46 percent. In recognition of our role as science provider for the Department, USGS applies a reduced overhead rate of 15% plus facilities charges for DOI bureaus. USGS is currently analyzing and evaluating a number of innovative options that balance the need to pay for our laboratories and scientists with the recognition of our unique role in supporting Departmental science needs by further reducing rates to our sister

bureaus. USGS has presented some of these options to the DAS-Budget and had favorable discussion about ways to achieve this goal along a realistic glide path.

Research Coordination within DOI: Science in USGS has yielded many returns to the DOI family, but the existing model sometimes creates a challenge for coordination to ensure priorities of all bureaus are addressed within a limited funding environment. The limitation on meeting all science needs is the dollars available, not bureau affiliation. The best approach in these challenging environments is a dynamic, collaborative model in which bureaus plan and work together to meet science needs, drawing upon investments in the scientific capabilities of the whole of the USGS, the management and regulatory bureaus, and other partners and producing respected peer reviewed science to support management decisions that will withstand challenges. USGS has recently worked with FWS to develop a more effective model for multi-bureau science. Characteristic examples include: (a) planning to meet energy and wildlife research and funding needs for bats and eagles; (b) provision of models and tools to support the upcoming FWS sage grouse listing decision; and (c) joint research on White Nose Syndrome in bats . The key elements of these efforts were parallel management and science processes that included a critical steps to jointly negotiate and reach consensus on what would be implemented. Led by senior advisers in both Bureaus, managers across the country identified a list of short and long term critical decisions, deadlines for these decisions, and science gaps to making those decisions. Consensus was then reached on what research to conduct given available technology, capabilities, state of science, priority, and financially feasible in that 3-5 year time frame. A funding plan was then developed with assets from both Bureaus to implement the priority research.

USGS strongly supports these efforts to strengthen the use of science in decision-making and believes any action to reverse the separation between independent science and regulatory function would be unwise and a disservice to the Nation, the Department, and its bureaus. USGS maintains a significant commitment of financial resources to maintain core facilities, scientists, and administrative support that enables work to happen.

Appendix 1. Examples of Science to Support DOI.

- **Sage-grouse:** USGS has a broad research program focused on the ecology and conservation of sage-grouse and sagebrush habitats to support the FWS 2015 listing determination. Focus is on life history and population trends, sagebrush ecosystem function, threats of landscape change, restoration and rehabilitation techniques, and adaptive management strategies. Beyond the broad research program, USGS provides structured decision support and is developing the conservation effects database.
- **Energy and Wildlife:** USGS commits considerable resources to provide research and tools for science-based decisions related to conventional, non-conventional, and alternate energy development, with recent emphasis on effects of wind and solar development on eagles, bats, endangered species, and birds protected under the Migratory Bird Treaty Act. Research priorities are developed in close coordination with FWS regionally and nationally.
- **Asian Carp:** USGS supports FWS science needs for carp management through the Administration's Asian Carp Regional Coordinating Committee (ACRCC). Research focus is on improved eDNA sampling design and analysis with the new FWS Whitney Genetics Laboratory, improved sampling gears and methods, integrated pest management, and development of a toxin to selectively kill Asian carp, for which FWS has preliminarily agreed to be the registrant and will likely coordinate Federal use of the formulation.
- **Grizzly Bears:** USGS conducts research on genetics, habitat, population structure, and feeding ecology of grizzly bears to support FWS conservation efforts in the Greater Yellowstone, Northern Continental Divide, and Cabinet-Yaak ecosystems. The USGS recently completed a comprehensive analysis Yellowstone grizzly bear diet that will be used by FWS in their threats analysis for a proposed delisting rule, to be completed by the fall 2014.
- **Arctic:** USGS provides significant research support to FWS for management issues in the Arctic. Coordination occurs through the DOI Alaska Cooperative Planning Group, the Alaska Climate Change Executive Roundtable, and the Alaska North Slope Science Initiative. Current focus is on information needs related to an anticipated walrus listing decision in 2017, and monitoring impacts of climate change on polar bear populations.
- * **Golden Eagles:** USGS provides long-term research to FWS for management of golden eagles. Current focus is on migration and occurrence maps relative to proposed wind development corridors, wintering information, and mortality estimation tools and monitoring design to estimate take associated with wind energy projects.
- **Bats:** USGS provides research support to FWS to establish guidelines for wildlife-friendly wind energy development. Wind energy is one of the fastest-growing energy industries in the world, and wind turbines are killing increasing numbers of bats in both North America and Europe. Current focus is on causes of bat collisions with turbines and assessment of potential consequences of turbines on susceptible bat populations.
- **Klamath Basin:** USGS supports FWS and other DOI bureaus in long term monitoring of federally listed suckers in the Klamath basin to determine reasons and pathways for failed recruitment over the past two decades. This information has contributed to the Klamath Basin Restoration Agreement and the Biological Opinion for recovery of endangered suckers. The USGS will be active in adaptive management through the dam removal process.

- * ***Desert Tortoise:*** USGS conducts research and monitoring to support FWS recovery plans for the desert tortoise. Current focus is on habitat modeling, genetic connectivity analysis, and threats assessments to guide tortoise translocations during alternative energy development. The BLM Rapid Ecological Assessments also used the USGS tortoise habitat and connectivity models for the basis of ecoregional assessments for the Mojave and Sonoran deserts.
- * ***Wildlife Disease:*** USGS provides national leadership for wildlife disease through surveillance and monitoring, outbreak investigations, emergency response, applied research and education, training and outreach. Current research focus is on avian influenza, chronic wasting disease, Brucellosis, sylvatic plague, white nose syndrome, and West Nile virus. Findings are provided to management agencies, such as FWS, to make timely, sound, science based wildlife management decisions.
- * ***Fish Disease:*** USGS provides research and technical assistance to FWS National Fish Hatcheries and fisheries restoration programs for diseases affecting salmonids and other threatened, endangered, and sensitive species. Current focus is on development of diagnostic and treatment methods, novel pathogens, susceptibility of Pallid sturgeon to viral hemorrhagic septicemia, Ichthyophonous infections in Yukon River Chinook salmon, disease in suckers and salmon in the Klamath Basin, infectious salmon anemia virus on the west coast, and emergence of infectious hematopoietic necrosis among steelhead on the Olympic Peninsula.
- * ***Northern Spotted Owl:*** USGS works with FWS on competitive interactions between invasive barred owls and threatened northern spotted owls in the Pacific Northwest. This effort contributes to understanding of the effectiveness of barred owl removal on spotted owls' recovery, and is also relevant to a FWS critical habitat proposal for northern spotted owls. In addition, USGS research on genetics, population monitoring, and habitat requirements has been used in recovery planning for at least a decade.
- ***Invasive Snakes:*** USGS conducts research to support FWS, NPS, and the Office of Insular Affairs in efforts to detect and control invasive snakes. Examples include brown tree snakes in Guam and giant constrictor snakes in Florida. USGS assesses potential environmental and economic impact of various snake species to help inform FWS Lacey Act decisions.
- * ***Black-footed ferrets:*** USGS is helping to develop a vaccine to protect black-footed ferrets and prairie dogs from sylvatic plague. The black-footed ferret is commonly regarded as the most endangered mammal in North America, and sylvatic plague is a major impediment to recovery. Controlling plague is considered critical in FWS recovery programs and conservation efforts for both prairie dogs and ferrets.
- * ***Great Lakes:*** USGS provides scientific support to the FWS in the Great Lakes on a variety of high priority projects, including status and trends of lake trout populations, restoration of wetland functions in National Wildlife Refuges, restoration of lake sturgeon in the Huron-Erie Corridor, and recovery of the endangered Karner Blue Butterfly the Indiana Dunes National Lakeshore. USGS maintains significant investment in deepwater fisheries monitoring that provides foundational assessments for management of Great Lakes fishery by FWS and state and Tribal management agencies.
- * ***Southeastern US Adaptive Management:*** USGS works closely with the FWS to provide science to determine recovery status, population trends, and conservation strategies for T&E species in the southeast, including Gulf Sturgeon, Florida Manatee, Okaloosa Darter, and

American Crocodile. USGS also collaborates with FWS managers to evaluate reintroduction of endangered mussels, resolve taxonomic identities, and map genetic relatedness for mussel species throughout the Southeast.

* ***Joint Web Development Team:*** The USGS and FWS collaboratively staff a web applications development team to support the FWS Environmental Conservation Online System (ECOS); a gateway website that provides access to data systems in the FWS Endangered Species and Fisheries and Habitat Conservation program areas, and LC-MAP, a collaborative workspace and tools allowing partners in a Landscape Conservation Cooperative to securely share, access, and analyze common datasets and information to further coordinated research, management, and resource conservation regardless of their agency affiliation.

* ***National Phenology Network:*** The USA National Phenology Network (NPN) hosted by the USGS is a national science and monitoring initiative focused on understanding how plants, animals, and landscapes respond to climatic variability and change. The NPN provides important capacity to DOI Bureaus through development of databases and user interfaces, standardized protocols, decision support tools, and education and outreach activities related to phenology and climate change. A key role of the NPN is to leverage DOI activities to other local, regional, and national partners.

U.S. Department of the Interior News Briefing for Tuesday, April 29, 2014

Bulletin Intelligence <Interior@bulletinintelligence.com>
To: Interior@bulletinintelligence.com

Tue, Apr 29, 2014 at 7:02 AM

U.S. DEPARTMENT OF THE INTERIOR NEWS BRIEFING

Mobile version and searchable archives available at interior.bulletinintelligence.com.

DATE: TUESDAY, APRIL 29, 2014 7:00 AM EDT

TODAY'S TABLE OF CONTENTS

DOI IN THE NEWS:

- + Interior To Partner With Cities, YMCA On Youth Initiative.
- + New Mexico Gov. Martinez Increases Pressure On SunZia.
- + St. Clair County Seeks National Status For Cahokia Mounds.
- + Additional Coverage Of Newest Historic Landmarks.
- + Protection Of Public Lands Urged.
- + Klamath Basin Water Pact Praised.

AMERICA'S GREAT OUTDOORS:

National Park Service:

- + Continuing Coverage: Searchers Combing Congaree National Park For Missing Father, Two Kids.
- + Court Rules Against Utah In Off Roads Fight.
- + Teton Road Construction Delays During Park Season.
- + NYTimes Opposes Plan For LG Tower In New Jersey.
- + Corps Criticized For Delaying Approval Of Central Everglades Planning Project.

Bureau of Land Management:

- + Capitol Police Investigate Threats Against Sen. Reid.
- + BLM Seeks To Speed Land-use Planning, Address Larger Landscapes.
- + Mount St. Helens Area Drilling Plan Still Stalled By Lawsuit.
- + BLM Facing Questions About Inaction In Carson City.
- + Additional Coverage Of Red River Property.

Fish and Wildlife Service:

- + FWS Partners With Phi Beta Sigma To Engage Urban Youth In Outdoor Recreation.
- + FWS Approves \$3.6 Million to Conserve Migratory Birds.
- + FWS Postpones Meetings On Bistate Sage Grouse.
- + FWS Leads Effort To Eradicate Nutria From Wicomico River.
- + Additional Coverage: Yurok Tribe Works To Protect California Condor.
- + Call For "God Squad" Review Of Endangered Species Act Welcomed.

SECURING AMERICA'S ENERGY FUTURE:

Onshore Energy Development:

- + Public Encouraged To Participate In Hearings On Four Corners Power Plant And The Navajo Mine.
- + Pitkin County Commissioner Argues For Cancellation Of Existing Leases.

Offshore Energy Development:

- + BOEM Director Beaudreau: Atlantic Drilling Decision Will Not Hinge On Output Estimates.
- + BSEE Conducts Unannounced Oil Spill Response Drill.
- + DOJ Argues Court Should Reject Transocean Challenge To Subpoena.

TACKLING AMERICA'S WATER CHALLENGES:

- + California Drought Spurs Bonds For Delta Tunnels.
- + Benefits Of Proposed San Joaquin River Dam Questioned.

EMPOWERING NATIVE AMERICAN COMMUNITIES:

- + BIA Director Black To Keynote 23rd Annual Indian Country Law Enforcement Officers Memorial Service.
- + Dispute Closes Cayuga Nation Businesses In New York.
- + Tribes' New Negotiating Power Costs Utilities.

TOP NATIONAL NEWS:

- + US, Philippines Sign 10-Year Defense Agreement.
- + Obama Defends Foreign Policy Record, Contrasts It With "Disastrous" Previous Decade.
- + Obama Announces Expanded Sanctions Against Russia.

EDITORIAL WRAP-UP:

- + New York Times.
- + Washington Post.
- + Wall Street Journal.

BIG PICTURE:

- + Headlines From Today's Front Pages.

WASHINGTON SCHEDULE:

- + Today's Events In Washington.

LAST LAUGHS:

- + Late Night Political Humor.

DOI in the News:

INTERIOR TO PARTNER WITH CITIES, YMCA ON YOUTH INITIATIVE. The [Environment & Energy Publishing](#) (4/29, Estepa, 705) reports that the Interior Department announced plans on Monday to work with the National League of Cities and the YMCA of the USA to "get young people more involved with the outdoors." Department agencies will be "encouraged under the agreement to form relationships with NLC member cities and YMCAs to provide opportunities for local programs on federal lands." Interior Secretary Sally Jewell "emphasized the need for collaborations, especially with partners that have histories with working with communities and young people." In a statement, Jewell said, "With this trifecta, I'm excited about the possibilities to leverage our existing resources and our collective expertise to inspire millions of young Americans to play, learn, serve and work in the great outdoors."

The [St. Paul \(MN\) Pioneer Press](#) (4/29, 656K) reports that Jewell, St. Paul Mayor Chris Coleman, the president of the National League of Cities, and YMCA of America CEO Neil Nicoll "signed a three-way 'memorandum of understanding' at Harriet Island's Wington Pavilion." The agreement "builds on a youth initiative created by Jewell's federal order in March." At the signing ceremony, Jewell "told the crowd that the current generation of tech-sawy young people is growing up highly scheduled and micromanaged by parents, leaving them limited opportunities to explore nature." Jewell said, "We have an opportunity to reconnect young people to the natural world, so they feel comfortable and safe there, and also competent and secure. My favorite classroom is the one that has no walls."

Also providing similar coverage is [KSTP-TV Minneapolis-St.Paul, MN](#) (4/29, 107K).

NEW MEXICO GOV. MARTINEZ INCREASES PRESSURE ON SUNZIA. The [Albuquerque \(NM\) Journal](#) (4/29, 282K) reports that New Mexico Gov. Susana Martinez is appealing directly to President Barack Obama and Interior Secretary Sally Jewell "to develop an alternative plan for the proposed SunZia transmission line to avoid impacting White Sands Missile Range." Martinez wants the Interior Department "to either push the line farther north outside the extension area or bury sections of it." The article notes that "in a separate letter this month to Jewell and DOD Secretary Chuck Hagel, Martinez warned that the currently proposed route 'poses an unacceptable negative impact to critical test and evaluation missions.'" Martinez "implored Jewell to find another route or require the project proponents to bury sections of the line."

ST. CLAIR COUNTY SEEKS NATIONAL STATUS FOR CAHOKIA MOUNDS. The [Belleville \(IL\) News-Democrat](#) (4/28, 190K) reports that "the St. Clair County Board is calling on Congress to name Cahokia Mounds America's newest national park." According to a resolution unanimously approved Monday, Cahokia Mounds would become known as the Mississippian Culture National Historical Park. The measure also asks President Barack Obama to designate the site a National Monument under the Antiquities Act.

ADDITIONAL COVERAGE OF NEWEST HISTORIC LANDMARKS. Additional coverage of the designation of the four new national historic landmarks was provided by [PBS](#) (4/29, 1.22M), the [Albany \(NY\) Times Union](#) (4/29, 522K), and [Government Executive](#) (4/29, 28K).

PROTECTION OF PUBLIC LANDS URGED. In an op-ed for the [Denver Post](#) (4/29, Metcalf, Morgan, 940K), Peter Metcalf, the CEO and president of Black Diamond Inc., and Ann Morgan, is the executive director of the National Wildlife Federation's Rocky Mountain Regional Center, criticize a proposal by Republicans to turn over control of public lands to states. They point out that surveys, economic reports, and public sentiment weigh against this idea. In conclusion, the authors call on the Republican National Committee to support public lands.

KLAMATH BASIN WATER PACT PRAISED. In an editorial, the [Tri-City Herald \(WA\)](#) (4/28, 115K) praises cattle ranchers and Native American tribes in Oregon's Upper Klamath Basin for "reaching an agreement last week to share access to rivers and cooperate on restoring habitat for endangered fish." The paper says that "if the tribes and ranchers want to put the lawsuits behind them and agree to share the water, the federal government ought to let them."

America's Great Outdoors:

National Park Service:

CONTINUING COVERAGE: SEARCHERS COMBING CONGAREE NATIONAL PARK FOR MISSING FATHER, TWO KIDS. The [AP](#) (4/29) reports that searchers are still looking for a father and his two children who said they were lost in the Congaree National Park. Park spokeswoman Dana Sohen said search crews have checked about one-third of the 27,000 acres in the park east of Columbia. The family was last seen around 9:30 p.m. Saturday. The search will pause at dark but will continue Tuesday. Sohen says officials have closed the park until the family is found.

Providing similar coverage are [NBC News](#) (4/29, 7.5M), the [Charleston \(SC\) Post and Courier](#) (4/28, 317K), the [Columbia \(SC\) Daily](#) (4/28), the [State \(SC\)](#) (4/28, 299K), the [Charlotte \(NC\) Observer](#) (4/27, 585K), and [WACH-TV Columbia, SC](#) (4/29, 1K).

COURT RULES AGAINST UTAH IN OFF ROADS FIGHT. The [Deseret \(UT\) News](#) (4/29, 610K) reports that "the state of Utah and San Juan County may have lost a key fight over access to a road in Canyonlands National Park, but the roads war being waged against the US government is far from over." On Friday, the 10th Circuit Court of Appeals held that "Utah and San Juan County failed to prove that Salt Creek Canyon Road was a 'public thoroughfare,' meaning the road remains off-limits to their rights-of-way claims under a Civil War-era statute." In their decision, justices "rejected the state's argument that uninterrupted periodic use over a 10-year period was sufficient to establish a claim to the dirt road — and therefore access by motorized vehicles." The Southern Utah Wilderness Alliance lauded "the ruling as key to protecting valuable natural resources within Canyonlands."

TETON ROAD CONSTRUCTION DELAYS DURING PARK SEASON. The [AP](#) (4/29) reports that "several major

road projects will be under way during this travel season that will result in traffic delays in Grand Teton National Park and the John D. Rockefeller, Jr. Memorial Parkway." According to the NPS, "some projects will begin in early May and last through October or November."

NYTIMES OPPOSES PLAN FOR LG TOWER IN NEW JERSEY. In an editorial, the New York Times (4/29, Subscription Publication, 9.65M) expresses its opposition to LG's plans to build "a vastly oversized tower" on the Palisades along the Hudson River, and calls the rule change by officials in Englewood Cliffs, NJ to allow its construction "a shameful dismissal of the greater public good" which defies decades of protection for the cliffs. Despite the considerable public protest, the editorial says that LG is digging in its heels and going forward on the building, and argues that a better option for the company "would be to appreciate the public outcry for what it is: a protest against the potential degradation of a historic vista and corporate insensitivity by a remote multinational giant."

CORPS CRITICIZED FOR DELAYING APPROVAL OF CENTRAL EVERGLADES PLANNING PROJECT. In his column for the Miami Herald (4/28, Hiaasen, 822K), Carl Hiaasen criticizes the US Army Corps of Engineers for its delay of the approval of the Central Everglades Planning Project. According to Hiaasen, "because of the board's surprising decision not to act (which, naturally, happened on Earth Day), CEPP could be left out of the public water bill pending in Congress." He notes that "at immediate risk are the Indian River Lagoon, the St. Lucie estuary at the mouth of the Atlantic and the Caloosahatchee River emptying into the Gulf of Mexico."

Additional coverage was provided by the Bradenton (FL) Herald (4/29, 161K).

Bureau of Land Management:

CAPITOL POLICE INVESTIGATE THREATS AGAINST SEN. REID. Politico (4/28, Raju, 73K) reports that the US Capitol Police are "investigating threats made against Senate Majority Leader Harry Reid" for having called Cliven Bundy's supporters "domestic terrorists" and Bundy a "hateful racist." Capitol Police spokesman Shennell Antrobus said, "We are currently looking into threatening statements made against Sen. Reid as part of an ongoing investigation."

Also reporting on the story is the Las Vegas Review-Journal (4/29, 437K).

Rep. Amodei Praises BLM Chief Kornze. The Las Vegas Sun (4/28, 148K) reports that Rep. Mark Amodei has "praised new BLM chief Neil Kornze, saying his decision to abruptly halt the removal of Bundy's cattle from the range prevented a standoff from escalating into violence." Amodei also "chided two fellow members of Nevada's congressional delegation for their descriptions of Nevada rancher Cliven Bundy's supporters." Amodei "took issue with Democratic Senate Majority Leader Harry Reid's branding of them as 'domestic terrorists' and Republican Sen. Dean Heller's labeling of them as 'patriots.'"

Bundy Says He's "Just Like Rosa Parks". The Huffington Post (4/29, Mosbergen, 11.54M) reports that Bundy says he's actually 'just like' Rosa Parks. In a press release Friday, Bundy said "his fight against the government is similar to Parks' stand against segregation." Bundy's release stated, "I am standing up against [the federal government's] bad and unconstitutional laws, just like Rosa Parks did when she refused to sit in the back of the bus. She started a revolution in America, the civil rights movement, which freed the black people from much of the oppression they were suffering. ... I am doing the same thing Rosa Parks did - I am standing up against bad laws which dehumanize us and destroy our freedom."

Rep. Horsford Urges Sheriff Gillespie To Investigate Militia. KVVU-TV Las Vegas (4/29, 23K) reports that Rep. Steven Horsford, D-NV, on Monday sent a letter to Clark County Sheriff Doug Gillespie "concerning militia members who remain in Bunkerville following a standoff with the Bureau of Land Management earlier this month." Horsford said, "I am greatly concerned about the safety and well-being of my constituents after meeting with local community members this past week. I urge Sheriff Gillespie to investigate these reports, as this sort of intimidation cannot be tolerated."

Meanwhile, the St. George (UT) News (4/28, 3K) reports that the Mesquite Police Department have been "asked repeatedly about the safety of residents and visitors to the area." The Mesquite Police Department said in a

statement, "We too, have heard the reports, rumors, and innuendos, which have been circulating about our community and potential incidents taking place in Mesquite. Therefore, the Mesquite Police Department, would like to take this opportunity to put any concerns to rest."

Additional Commentary. In an editorial, the Washington Post (4/29, 4.22M) comments on recent remarks by Nevada rancher Cliven Bundy and Los Angeles Clippers owner Donald Sterling, the "loathsome racism" of which reflects the work that yet remains for the US to improve race relations. The Post cites comments by Supreme Court Justice Sandra Day O'Connor, who in arguing for affirmative action said "the use of racial preferences... will no longer be necessary." The editorial argues that remarks like those by Bundy and Sterling highlight the "the rationale for diversity that Justice O'Connor was defending," saying that "the country needs younger people of all races interacting, including in law schools" in order to end racism like that of Bundy.

For Politico Magazine (4/29, Ralston, 633K), Jon Ralston writes that he's "never heard so many loony conspiracy theories, or seen so many politicians pander to an obviously flawed lawbreaker despite the danger to civilians that they might be exacerbating and the awful precedent they might be enabling."

In an op-ed for The Hill (4/29, 237K), Bill Press, host of "The Bill Press Show," writes that "nothing demonstrates the ignorance and danger of the Tea Party movement more than its leaders' immediate, knee-jerk embrace of Nevada rancher Cliven Bundy."

For the New York Daily News (4/29, 4.36M) Stanley Crouch writes that "those who'd made a hero of this sort of man had good reason to examine their consciences well before he spewed his mouthful of red meat."

For the New York Post (4/29, 2.77M) Robert A. George writes that Bundy's comments "make him a confused clown who shouldn't have been given a national platform in the first place."

Additional coverage was provided by the Sacramento (CA) Bee (4/28, 687K), the Topeka (KS) Capital-Journal (4/28, 177K), the Reno (NV) News & Review (4/29, 75K), the Black Hills (SD) Pioneer (4/29, 11K), the Gustine (CA) Press-Standard (4/28, 4K), the Daily Caller (4/29, Butler, 408K), and the Vox (4/29).

BLM SEEKS TO SPEED LAND-USE PLANNING, ADDRESS LARGER LANDSCAPES. The E&E Daily (4/24) reports that the BLM is "looking for ways to revamp the land-use plans that govern energy development, wildlife protections and recreation on the agency's roughly 250 million acres of public lands." The initiative, called "Planning 2.0," could "mark a major shift in how BLM revises and maintains roughly 160 resource management plans (RMPs) that dictate nearly every decision the agency makes in the West." BLM spokeswoman Celia Boddington said, "We are starting a conversation about how to best move our planning towards a landscape-scale approach while making it a faster and more durable process."

MOUNT ST. HELENS AREA DRILLING PLAN STILL STALLED BY LAWSUIT. The Clark County (WA) Columbian (4/28, 95K) reports that "almost a year and a half after it was approved, a controversial mineral prospecting operation near Mount St. Helens remains stalled as opponents and the agencies who endorsed the plan continue to tangle in federal court." A federal judge is "set to hear oral arguments during a hearing in Portland on May 19." BLM spokesman Michael Campbell said, "We're just kind of in a holding pattern right now."

BLM FACING QUESTIONS ABOUT INACTION IN CARSON CITY. KRNV-TV Reno, NV (4/29, 2K) reports that the BLM is "at the center of controversy again in Nevada" over "a Carson City recreation spot." Neighbors surrounding the Prison Hill Recreation Center are "frustrated over what they say are the BLM's non-enforcement of issues plaguing the area." For instance, they claim "there is lots of illegal dumping." Another issue are motorized vehicles in unauthorized areas.

ADDITIONAL COVERAGE OF RED RIVER PROPERTY. Additional coverage of the Red River Management area was provided by the Gainesville (TX) Daily Register (4/29, 466), the Texas Tribune (4/28, 12K), and KFDX-TV Wichita Falls, TX (4/29, 2K).

Fish and Wildlife Service:

FWS PARTNERS WITH PHI BETA SIGMA TO ENGAGE URBAN YOUTH IN OUTDOOR RECREATION. The New Pittsburgh Courier (4/28, 58K) reports that the FWS and leading African-American fraternity Phi Beta Sigma Fraternity, Inc. signed an historic memorandum of understanding on Monday in Washington, DC, "establishing a partnership that will provide new opportunities for urban youth to experience the natural world and promote interest in conservation and the biological sciences." FWS Director Dan Ashe said, "Many Americans find it difficult to experience nature in an increasingly urban America. This has profound implications for the health and well-being of our citizens and the future of our nation. Sigma – with its rich history of community leadership and deep connection to the legacy of Dr. Carver – is the ideal partner for the Service as we work to create meaningful connections between young people and the great outdoors."

FWS APPROVES \$3.6 MILLION TO CONSERVE MIGRATORY BIRDS. The Bloomberg BusinessWeek (4/29, 4.91M) reports that "migratory birds throughout the Western Hemisphere will benefit from \$3.6 million in grants for 29 collaborative conservation projects across the Americas," the FWS announced. The Neotropical Migratory Bird Conservation Act grants will leverage the FWS' "investment with nearly \$12.1 million in additional private funds" at "more than 3-to-1 match." The article notes that "the projects will conserve migratory bird habitat, stimulate critical research into declining bird populations, and strengthen international relations, raising awareness of the importance of bird conservation."

FWS POSTPONES MEETINGS ON BISTATE SAGE GROUSE. The AP (4/29) reports that the FWS has postponed "two public hearings on its proposal to list a distinct species of sage grouse found along the Nevada-California line as threatened." According to agency officials, "hearings that were scheduled Tuesday in Minden and Wednesday in Bishop, Calif., will be rescheduled." New dates were announced.

FWS LEADS EFFORT TO ERADICATE NUTRIA FROM WICOMICO RIVER. The Sacramento (CA) Bee (4/28, 687K) reports on the effort to eradicate nutria from the Wicomico River in Maryland. The project, administered by the FWS and implemented by the US Department of Agriculture Wildlife Services, has "cleared marshes up and down the Delmarva Peninsula over the last 12 years." The last surviving colony exists on the Wicomico River.

ADDITIONAL COVERAGE: YUOK TRIBE WORKS TO PROTECT CALIFORNIA CONDOR. Additional coverage of the Yurok tribe's effort to restore the California condor to the northern Redwood Coast was provided by the Los Angeles Times (4/29, Romney, 3.46M).

CALL FOR "GOD SQUAD" REVIEW OF ENDANGERED SPECIES ACT WELCOMED. The Bellingham (WA) Herald (4/27, 113K) editorializes that the Columbia-Snake River Irrigators Association "recently asked Northwest governors to launch a little-used clause in the Endangered Species Act that could force the federal government to recognize improvements to salmon and steelhead populations in the Columbia and Snake rivers." According to a letter that irrigators sent last week to the governors of Washington, Oregon, Idaho and Montana, "the so-called 'God Squad' review by an Endangered Species Act committee could conclude that reasonable mitigation already has been completed, and it could exempt the rivers from any more mitigation." The paper argues that "a God Squad review is clearly justified by the expense to taxpayers of additional mitigation and evidence that efforts are already working."

Securing America's Energy Future:

Onshore Energy Development:

PUBLIC ENCOURAGED TO PARTICIPATE IN HEARINGS ON FOUR CORNERS POWER PLANT AND THE NAVAJO MINE. In an editorial, the Durango (CO) Herald (4/28, 28K) encourages the public to participate in public hearings being held by OSMRE, the Navajo Nation, the Hopi Tribe and other federal agencies "to discuss and take public input on the draft Environmental Impact Statement concerning the Four Corners Power Plant and the Navajo Mine." According to the paper, "above all, and most especially for residents of Southwest Colorado, the issue is air quality and the power plant's effect on the region's environment and quality of life."

PITKIN COUNTY COMMISSIONER ARGUES FOR CANCELLATION OF EXISTING LEASES. In an op-ed for the Aspen (CO) Daily News (4/29, 36K), Pitkin County Commissioner George Newman thanks the BLM for "proceeding with the EIS and the public forum you have convened throughout the Valley." He writes that "in the

case of illegal leases let, expiration of those leases suspended, and the consequences of future leases in the Thompson Divide, I join with the citizens who have spoken loud and clear, again and again and again, to the US Forest Service in comments to their draft EIS regarding land management in the Thompson Divide, and to you, the BLM, in regards to these leases and now your EIS scoping." Newman argues that "the only possible conclusion is to cancel the existing leases in the Pitkin County portions of the Thompson Divide."

Offshore Energy Development:

BOEM DIRECTOR BEAUDREAU: ATLANTIC DRILLING DECISION WILL NOT HINGE ON OUTPUT

ESTIMATES. Platts (4/29, Scheid, 2K) reports that an Obama Administration decision on "future drilling in Atlantic waters will not hinge on how much oil upcoming seismic tests estimate may be recoverable off the US East Coast," the outgoing director of the BOEM said. BOEM Director Tommy Beaudreau said in an interview, "There's no sort of tipping point or threshold we're looking for in terms of resource potential. It's one factor you look at to say 'Would this even be attractive to industry?' But there are lots of other factors as well." Beaudreau said the Administration will "not put more weight into the production potential of Atlantic waters than it will for other factors, particularly whether states support oil and gas leasing off their coasts, opposition from environmental groups and infrastructure and response capacity issues."

BSEE CONDUCTS UNANNOUNCED OIL SPILL RESPONSE DRILL. The Offshore Energy Today (4/29) reports that the BSEE "last week participated in a day-long Government Initiated Unannounced Exercise" involving Occidental Petroleum Corporation. According to the article, "the table top exercise, held in Huntington Beach, Calif., tested OXY's ability to respond to a simulated spill event in accordance with its Oil Spill Response Plan (OSRP)."

DOJ ARGUES COURT SHOULD REJECT TRANSOCEAN CHALLENGE TO SUBPOENA. FuelFix (4/29, Eaton, 7K) reports that US Attorney Adam Goldman has asked a Federal appeals court to "reject Transocean's challenge to subpoenas for documents linked to the 2010 Gulf of Mexico oil spill." Transocean argues that the US Chemical Safety Board does not have the authority to investigate offshore accidents, and FuelFix notes that those are normally investigated by the NTSB. CSB said that they "look forward to presenting this vital information to the public, industry, Congress, and all others interested in fostering safety in the offshore drilling and production industry."

Tackling America's Water Challenges:

CALIFORNIA DROUGHT SPURS BONDS FOR DELTA TUNNELS. Bloomberg News (4/29, Nash, 2.76M) reports that California water agencies "plan to sell the first \$200 million in bonds toward a \$25 billion project to bolster supplies for about 25 million people as the worst drought in a century threatens farms and cities." According to the article, "proceeds will be used to plan two tunnels, 40 feet wide and 30 miles (48 kilometers) long, to carry Sacramento River water to Southern California, home to about two-thirds of the state's population." The article notes that "voters haven't approved a water bond in California since 2006."

BENEFITS OF PROPOSED SAN JOAQUIN RIVER DAM QUESTIONED. In his column for the Stockton (CA) Record (4/27, 123K), Michael Fitzgerald questions the benefits of the Temperance Flat Dam, proposed for the San Joaquin River upstream of Friant Dam, would put a 665-foot-high cork in a Sierra river gorge. He notes that Louis Moore, a spokesman for the BOR, said, "We need additional water. This is one perspective for adding additional water to the system to support the growth of our population, the demands put on water for use in agriculture and for endangered species." However, Fitzgerald claims that the BOR is "ginning up the dam's supposed broad public benefits so the public will pay for it, not the politically powerful water hogs – excuse me, the beneficiaries."

Empowering Native American Communities:

BIA DIRECTOR BLACK TO KEYNOTE 23RD ANNUAL INDIAN COUNTRY LAW ENFORCEMENT OFFICERS MEMORIAL SERVICE. The National Journal (4/29, Subscription Publication, 561K) reports that BIA Director Michael S. Black will "deliver the keynote address at the 23rd Annual Indian Country Law Enforcement Officers Memorial Service on Thursday, May 1, 2014, at the BIA Indian Police Academy in Artesia, N.M." The event is

also an "occasion for formally announcing the names of officers who will be added to the Indian Country Law Enforcement Officers Memorial monument at the academy." The article notes that "this year, two individuals will be added, bringing the total number of officers listed on the memorial to 103: Alaska State Trooper and Village Public Safety Officer Thomas O. Madole who on March 19, 2013, succumbed to bullet wounds while handling an altercation incident in the community of Manokotak, Alaska;" and "Sergeant Robert W. Baron of the Sandoval County, N.M., Sheriff's Office who on Dec. 6, 2013, succumbed to injuries he sustained the previous day after being struck by a vehicle on Interstate 25 near the Pueblo of San Felipe."

DISPUTE CLOSES CAYUGA NATION BUSINESSES IN NEW YORK. The Syracuse (NY) Post-Standard (4/29, 859K) reports that "Cayuga Nation businesses in Union Springs and Seneca Falls were closed after a confrontation Monday by opposing sides in a dispute over nation leadership." According to Joe Heath, a lawyer representing the Unity Council, the group "took over nation-owned gas stations in Union Springs and Seneca Falls." Heath said that "currently the nation's facilities are closed and there is an agreement for the two sides to sit down later this week to talk about the situation."

The Syracuse (NY) Post-Standard (4/29, 859K) reports that "the confrontations Monday at businesses owned by the Cayuga Nation stem from a dispute over leadership that has festered for a decade." The article notes that "the dispute came to a head in January when the Interior Board of Indian Appeals said that the Eastern Regional Director for the Bureau of Indian Affairs had intruded in nation affairs when he ruled that Clint Halftown was no longer the nation's federal representative."

TRIBES' NEW NEGOTIATING POWER COSTS UTILITIES. The Wall Street Journal (4/29, Frosch, Subscription Publication, 5.51M) reports that tribes across the West are negotiating substantial payments from utilities and energy companies to renew right-of-way agreements. The article cites a federal law that prohibits the use of eminent domain to access Indian trust land for the tribes' increased bargaining power. According to the article, for years, the BIA negotiated such deals on behalf of tribes, which saw little in return. But now, tribes are leaving energy companies little choice but to pay the fees they request because rerouting power lines, pipelines and other infrastructure around reservations is prohibitively expensive.

Top National News:

US, PHILIPPINES SIGN 10-YEAR DEFENSE AGREEMENT. In a deal which media reports are casting as the most significant achievement of the President's Asia trip, the US and the Philippines have signed a 10-year defense agreement. Media reports almost universally note that the pact, known as the Enhanced Defense Cooperation Agreement, is likely to increase tensions with China despite the President's assurances that it is not an effort to contain China.

The Washington Times (4/29, Wolfgang, 455K) reports that the agreement "represents one of the most tangible accomplishments of his week-long Asia trip." The agreement "will provide for bilateral training exercises between the two nations," and will "involve sending more American planes and ships to the nation and will see more US service members rotating through the Philippines." The Times notes that "by boosting America's military presence in the Pacific even further," the agreement "may raise tensions with China."

The Washington Post (4/29, Eilperin, 4.22M) calls the agreement "the biggest policy achievement" of the President's Asia trip and "one of the clearest signs yet of renewed American engagement in the region at a time when tensions between China and its neighbors have been rising." While the pact "is likely to generate criticism from Chinese officials," it "may reassure several Asian countries embroiled in territorial disputes with China, especially in the South China Sea."

McClatchy (4/29, Leavenworth, Subscription Publication, 23K) reports that the President "was careful to note it will not mean new US bases in the Philippines," saying, "I want to be absolutely clear – the new defense cooperation agreement that we are negotiating is not about trying to reclaim old bases or build new bases. Rather, any new agreement would give American service members greater access to Filipino facilities, airfields and ports, which would remain under the control of the Philippines."

USA Today (4/29, Maresca, 5.82M) reports that the President and Philippine President Benigno Aquino III said

that the goal of the agreement "is not to prevent China from expanding its influence but to ensure the region's disputes are handled fairly." The President said, "Our goal is not to counter China. Our goal is not to contain China. ... Our goal is to make sure that international rules and norms are respected. And that includes in the area of maritime disputes." USA Today notes that throughout the press conference, both leaders "frequently returned to the idea of engaging China constructively."

The Wall Street Journal (4/29, Nelson, Larano, Subscription Publication, 5.51M) reports that while the President and Aquino said the deal would promote greater stability in the region, they were quick to note that it was not intended as a response to China. Chinese Foreign Ministry spokesman Qin Gang told reporters, "Whether or not this trip is to contain China depends on what the US says and what it does. ... Both US President Obama and other officials said on different occasions that they have no intention of containing China. ... We believe China and the US have broad common interest in the Asia Pacific."

The Christian Science Monitor (4/29, Kirk, 566K) reported that the President "called the agreement an 'important new chapter' in the two countries' relationship and sought to counter criticism that it might add tension in the South China Sea, which China claims in its entirety." Obama and Aquino "were careful not to attribute the agreement directly to concerns about China's territorial claims." Likewise, they did not mention "the Philippines' claims to the Paracel islands, some of which are held by China, or China's takeover of the Scarborough shoal west of Subic Bay, a rich fishing ground that the Philippine says is within its territorial limits."

A blog post on the TIME (4/29, Rauhala, 24.1M) website noted that while, "this is not about China," has been the theme of the President's trip, China "loomed large over stops in Japan, South Korea and Malaysia," and in the Philippines, "China was front and center." While the President "insisted the deal was not about thwarting China's rise," China "begs to differ," seeing "US involvement in East Asia as unwelcome interference."

Reuters (4/29, Francisco, Felsenthal) reports that despite the President's comments, China sees the deal as an effort to contain it and to contain it and encourage Manila in its long-running territorial dispute with Beijing.

An editorial in the Wall Street Journal (4/29, Subscription Publication, 5.51M) notes that China's growing aggression drove the Philippines to strengthen its alliance with the US, and argues that the development should demonstrate to Chinese leaders that rather than causing nations in the region to knuckle under to Beijing, their aggression has those nations turning to the US for stronger military partnerships.

The Philippine paper Balita Pinoy (4/29, 38) reports that the President said that "the goal of the new defense cooperation agreement is wide-ranging," noting that "both countries have maintained strong alliance for many decades and Monday's signing is an update on that partnership." He said the goal of the pact "is to build Philippine capacity in training and in coordination," adding that it "not only concentrates on maritime security, but also on enhancing the two countries' capabilities in responding to natural disasters." Noting that the agreement "is similar to the pact that the US signed with Australia," the President said, "I think this is going to be a terrific opportunity for us to work with the Philippines to make sure that our navies, our air force are coordinated; to make sure that there is information-sharing; to allow us to respond to new threats and to work with other countries – ASEAN countries, Australia, Japan."

The Philippine Daily Inquirer (4/29, Lee, 800K) reports that some "3,000 militants roared in anger as they protested the American head's visit to the Philippines." Bayan Muna Representative Neri Colmenares argued that "the US will merely replace China as the Philippines' 'bully,'" adding that the agreement "will justify the establishment of military bases of US troops in the country."

Other Philippine print media barely mention the agreement in their coverage of the President's visit. For example, BusinessWorld (4/29, 158K) notes the agreement, but focuses almost entirely on the President's efforts to get the Philippines to sign on to the Trans Pacific Partnership, which it describes as "part of a push to widen America's engagement in the region." The story notes that the TPP "has met with snags during Mr. Obama's Asia visit," as the President "failed to reach an agreement with Japanese Prime Minister Shinzo Abe last week on the deal," and Malaysian Prime Minister Najib Razak saying that "his country was far from ready to sign given 'sensitivities.'" For his part, Aquino "said the Philippines 'is working to ascertain how participation in TPP can be realized.'" Similarly, a report in the Philippine paper the People's Journal (4/29, Dizon, 1.09M) describes the President's visit to Manila and makes only passing reference to the agreement.

McClatchy Analysis: Obama's Trip "Partly Successful." McClatchy (4/29, Leavenworth, Subscription Publication, 23K) notes that the President went to Asia with several goals, including advancing US trade interests, reassuring allies that "he'd back them in any serious confrontation with China," and rebutting "critics who dismissed his 'pivot to Asia' strategy as being less than pivotal," and he will return to Washington "partly successful," but it "remains to be seen whether Obama's good-will trip through Asia will do much to help him at home."

Chinese Media Cast Deal, Obama Trip In Negative Terms. Chinese media reports cast the deal and the President's Asia trip in general in largely negative terms. For example, the South China Morning Post (4/29, 8K) noted that amid tensions "over territorial disputes in the South China Sea, many analysts see the agreement as a form of US military backing to deter what Manila sees as China's coercion and intimidation in the area." The Post notes a Xinhua commentary which argued that "the move could embolden Manila in its dealings with Beijing."

A Xinhua (4/29, 29K) report on the agreement highlighted the President's assertion that the US "is not attempting to build military bases in the Philippines" and noted that the President told Aquino "that the US supports the Philippines' decision to pursue international arbitration in resolving the dispute over South China Sea."

An editorial in the People's Daily (4/29, 7.02M) focused on the President's visit to Japan, noting that the "US-Japan alliance targeted at China has been strengthened" as a result of the visit. The editorial argues that "the US is easing limits on Japan so that it can play a bigger role in constraining China, especially military roles," adding that the US's "pursuit of its own private interests at the expense of postwar peace is encouraging Japan's excesses." The editorial adds that Japan is "an American puppet" and "knows that if it does not perform in constraining China, it will gain no prestige with the America." It concludes that the US and Japan "will benefit nothing from stirring up trouble here."

OBAMA DEFENDS FOREIGN POLICY RECORD, CONTRASTS IT WITH "DISASTROUS" PREVIOUS DECADE. As his week-long trip to Asia comes to a close, the President on Monday defended his foreign policy record during a press conference in the Philippines. Print reports this morning describe the President's defense of his foreign policy record with adjectives such as "vigorous" and "full-throated." Several note that the President and his aides are growing increasingly frustrated by critics who link his decision not to intervene militarily in Syria with other foreign policy challenges.

The AP (4/29, Pace) reports that the President "vigorously" defended his record, "arguing that his cautious approach to global problems has avoided the type of missteps that contributed to a 'disastrous' decade of war for the United States." The AP notes that the Asia trip "exposed growing White House frustration with critics who cast the president as weak and ineffectual on the world stage," adding that the President and his aides "get particularly irked by those who seize on Obama's decision to pull back from a military strike in Syria and link it with virtually every other foreign policy challenge, from Russia's threatening moves in Ukraine to China's increasing assertiveness in Asia's territorial disputes."

The Washington Post (4/29, Eilperin, 4.22M) reports that the President "laid out an incremental, dogged approach to foreign relations that relies on the United States deploying every possible economic and institutional lever before resorting to armed force." The President said, "That may not always be sexy. That may not always attract a lot of attention, and it doesn't make for good argument on Sunday morning shows. ... But it avoids errors. You hit singles, you hit doubles; every once in a while we may be able to hit a home run. But we steadily advance the interests of the American people and our partnership with folks around the world." The Post notes that the White House is growing "frustrated with critics on Capitol Hill and in the media who have questioned why the president has been so reluctant to intervene abroad."

The Los Angeles Times (4/29, Parsons, Hennessey, Richter, 3.46M) reports that the President responded to the question of whether he has "gone too far in reducing America's historical role in global security," with "a challenge of his own: Haven't people heard of Iraq and Afghanistan?" The President said, "Why is it that everybody is so eager to use military force after we've just gone through a decade of war at enormous costs? ... And what is it exactly that these critics think would have been accomplished?" The Times notes that the President increasingly argues that "his foreign policy record will have to be judged historically," and during a news conference Friday in Seoul, "he repeatedly appealed for people to take the long view."

The Hill (4/28, Sink, 237K) reported that the President delivered "a full-throated defense of his foreign policy," and accused critics "who argue that he has not been aggressive enough on the world stage of failing to learn the lessons of the Iraq War." The Hill noted that his comments "appeared to be a direct rebuke to Republican lawmakers like Sen. John McCain (R-Ariz.), who has repeatedly criticized the president over his handling of the crisis in Ukraine." In what The Hill called "some of his most expansive comments on his foreign policy views in recent months, Obama argued that his job as commander in chief was 'to deploy military force as a last resort, and to deploy it wisely,'" adding, "Frankly, most of the foreign policy commentators that have questioned our policies would go headlong into a bunch of military adventures that the American people had no interest in participating in and would not advance our core security interests."

The New York Times (4/29, Landler, Subscription Publication, 9.65M) reports that the President, has been "stung by criticism of his response to turmoil from Eastern Europe to the Middle East," and calls his comments "a rare insight into a second-term president already sizing up his legacy as a statesman." According to the President's advisers, when he returns to Washington on Tuesday, "he wants to regain the offensive with several speeches, most notably a graduation address at the United States Military Academy at West Point, N.Y., next month, in which he will try to place his decisions on Syria, Ukraine and other crises into a broader context."

FOX News' Special Report (4/28, Baier, 2.15M) that the President's critics say the Administration's foreign policy is "barely surviving." Fox (Henry) noted that the President "took a shot at Fox and said more positive stories are not getting attention." Obama was shown saying, "I doubt that I'm going to have time to lay out my entire foreign policy doctrine. And there are actually some complimentary pieces as well about my foreign policy, but I'm not sure you ran them." Fox added that the President added that "conservatives who pushed for war in Iraq are hitting him now because he does not back knee-jerk military action in hot spots such as Syria." Obama: "Many are proponents of what I consider to be a disastrous decision to go into Iraq. They haven't really learned the lesson of the last decade."

OBAMA ANNOUNCES EXPANDED SANCTIONS AGAINST RUSSIA. Monday's announcement of another round of sanctions against a number of Russians and more than a dozen Russian companies is receiving widespread media attention. All three networks covered the story – though a string of deadly tornadoes in the southeastern United States led each network. As was the case when the initial round was announced, media reports cast doubt whether the sanctions will be effective in persuading Russian President Vladimir Putin to halt his interference in Ukraine.

Scott Pelley reported on the CBS Evening News (4/28, story 3, 3:10, Pelley, 5.08M) that the US "imposed new sanctions to punish Russia for stirring up trouble in Ukraine." The new sanctions include banning seven Russian officials from traveling to the US, and freezing their US assets. In addition, the assets of 17 Russian companies were frozen. Pelley noted that the President "made the announcement during his trip to the Philippines." President Obama was shown saying: "Russia has not yet chosen to move forward and these sanctions represent the next stage in a calibrated effort to change Russia's behavior. We don't yet know whether it's going to work."

The AP (4/29, Lee, Berry) says the latest measures "affect people close to the Kremlin," but "stopped short of targeting Russia's broader economy and it remained unclear if they would work." And in Moscow on Monday, "there was relief that the sanctions were not as far-ranging as feared." But officials in both the US and EU argued that they would "significantly boost the cost to Moscow of ignoring" an agreement signed earlier this month in Geneva to ease tensions in Ukraine.

Andrea Mitchell reported on NBC Nightly News (4/28, story 3, 2:05, Williams, 7.86M) that Putin "remains defiant. Critics say that's because the US and Europe hit 17 officials and 17 companies, but not the biggest banks and energy companies after pressure from BP and other companies with huge investments" in Russia. Mitchell added that the President "says he does not want to target Putin himself." President Obama was shown saying: "The goal here is not to go after Mr. Putin personally. The goal is to change his calculus." Mitchell added, "I asked the Treasury Secretary what happens next. What is the trigger point that would trigger tougher sanctions and would the US move without European ally if Russia invades?" Treasury Secretary Lew was shown saying: "The actions taken today says the situation has gotten considerably more worry some and trouble some even though we haven't seen an invasion. We've taken more and more action. We have more steps to take, we're prepared to take the steps."

The Washington Post (4/29, DeYoung, Birnbaum, 4.22M) says the Administration "ratcheted up its punishment of Russia...even as it acknowledged that a new round of economic sanctions is unlikely to bring an immediate change in Russian behavior." Some US lawmakers and Ukrainian politicians also "decided the actions as too weak and called for immediate, full-scale sanctions against the Russian banking and energy sectors." But a "senior Administration official" said the goal is to gradually increase pressure until "Russia sees the dead end that it's going down in Ukraine," and the President called the sanctions a "calibrated" response.

Reuters (4/29, Tsvetkova, Grove) reports the White House said Monday that in addition to the sanctions, the US will also deny export licenses for high-technology items to the Russian military and revoke any existing export licenses .

However, CNN's Situation Room (4/28, 554K) said the existing sanctions have "done little to slow the path of violence."

ABC World News (4/28, story 3, 1:45, Sawyer) reported that the sanctions "stopped short of hitting Putin's wealth, estimated in the tens of billions of dollars," and the New York Times (4/29, Landler, Baker, Subscription Publication, 9.65M) reports that although the measures "do not explicitly target" Putin, US officials indicated that the choice of targets, including long-time Putin confidantes Igor I. Sechin and Sergei V. Chemezov, "was intended to send a message to him that any hidden assets he might have could ultimately be affected."

The Wall Street Journal (4/29, Solomon, Mauldin, Nelson, Subscription Publication, 5.51M) reports that the sanctions fell short of the wide-reaching moves Ukrainian officials had hoped for. The Journal notes that while the US sanctioned Sechin and Chemezov, the EU did not amid fears of broader economic impact. State Department spokeswoman Jen Psaki said the US and EU have "been working in lock step from the beginning of this crisis," and noted that "our sanctions have not exactly matched before. We don't expect they will exactly match now. But they are complementary."

Another Wall Street Journal (4/29, Williams, Subscription Publication, 5.51M) report say the sanctions against Sechin, head of state-controlled oil firm Rosneft, could have implications for the UK-based BP, which holds a 19.75% stake in Rosneft. The New York Times (4/29, Kramer, Subscription Publication, 9.65M) says Sechin is the "most prominent businessman targeted to date," and the list announced Monday is "creating headaches for compliance departments of Western companies." But the Times notes that the US did not sanction Rosneft, and Sechin "does not own a majority of the company, so American companies can still work with Rosneft."

Howard LaFranchi writes in the Christian Science Monitor that "critics of US policy argue that Washington should take the lead on imposing broader sanctions on whole sectors of the Russian economy," even amid reluctance in the EU.

Sen. Bob Corker, Reuters (4/29, Zengerle) reports, criticized the actions as "just a slap on the wrist," and said he plans to introduce legislation this week to strengthen NATO and impose "significant" additional sanctions on Russia.

Deputy national security adviser Tony Blinken was asked on CNN's Situation Room (4/28, 554K) about criticism that the "ratcheted-up sanctions are really sanctions-lite." Blinken said that the sanctions "taken even before today have had a significant impact on Russia and its economy. ... This has had an impact and it's going to have a greater impact." Asked when there will be sanctions on Putin himself, Blinken said that "the point is not to go after President Putin. It's to try to get him to change what he's doing." Putin's "compact with his people has been to deliver economic growth and in return they would remain politically compliant. That growth is drying up and the only answer for him is to integrate his economy with the world markets and to diversify it away from oil and gas and what he's doing now and what we've done in reaction is making it difficult for him to do that."

But the Washington Times (4/29, Boyer, 455K) reports that "even Mr. Obama expressed uncertainty about the effectiveness" of the sanctions on Monday, saying, "We don't yet know whether it's going to work."

Charles Krauthammer said on FOX News' Special Report (4/28, 2.15M) that the President "seems to think and he creates this straw man that the only alternative to the policy of total weakness he's been showing in Ukraine

is to land troops somewhere in Ukraine. There is nobody advocating that. He thinks all has to do is say the word Iraq and he's made an argument." Krauthammer added, "If he wants an example of how weapons have influenced Russian encroachment. In 1946, when the Turks and Greeks were losing the guerilla wars against Soviet communists in their countries, what Truman did, with the Truman doctrine, he supplied arms and support, not American troops, and succeeded in containing the Soviet Union. That's the essence of containment which he thinks he's doing. His idea of containment is to let Russia swallow Ukraine after which he will think of containment."

Juan Williams said on FOX News' Special Report (4/28, 2.15M), "With regard to Russia...I think that the President has done exactly what's right. ... I think the Russian economy has suffered tremendously as a result of the sanctions already put in place not only on individuals but on one bank and the further sanctions now. You've seen capital flee that stock market. The reason it bumped up a little bit because it's down so low."

Russian Weapons Exporter Bypassed in Latest Round Of Sanctions. The Washington Times (4/28, Taylor, 455K) reports that Russia's main state-owned weapons exporter Rosoboronexport, was bypassed in the latest round of sanctions. The Times notes that the company is "currently being paid by the Pentagon to support US efforts in Afghanistan." Still, the Pentagon's relationship with Rosoboronexport is "prompting mounting frustration among a bipartisan" group of lawmakers, "who say the White House is giving an inexplicable pass to the company despite Moscow's land grab in Ukraine and its ongoing dealing with such US adversaries as Syrian President Bashar Assad."

Blinken: Ukraine Doesn't Need Weapons From US. Deputy national security adviser Tony Blinken was asked on CNN's Situation Room (4/28, 554K) if the Administration is prepared to provide weapons to Ukraine. Blinken said, "We've already provided a significant amount of nonlethal security assistance to Ukraine over the past few weeks. ... Second, they don't need more weapons. The fact of the matter is that as the President said today, even if we provided more weapons, it wouldn't make a difference in terms of standing up to the Russians. They need to professionalize their military. What we can do most effectively to deter and dissuade Russia is exactly what we're doing. That's to increase the economic pressure on Russia, working in coordination with our allies. The other thing that we can do is lead the international effort to support Ukraine, to support its economy."

Seib: Kerry Blames Putin Personally For Ukraine Crisis. In his column for the Wall Street Journal (4/29, Subscription Publication, 5.51M), Gerald Seib writes that in an interview Monday after the President announced the latest round of sanctions against Russia, Secretary of State Kerry did not seem to believe the latest sanctions will be the last. Asked why the Administration is punishing individuals and single companies rather than entire sectors of the Russian economy, Kerry said, "We're inches away from that now. And if they continue on this path, that's where it's heading." Seib adds that Kerry blames Putin personally for the Ukraine crisis, saying that it is "obviously very personally driven in ways that I think are uniquely inappropriate to 21st century leadership. ... It's so divorced that it leaves you feeling badly for the consequences. I think the Russian people are going to pay a price for this."

Poll: Americans Support Sanctions, Not Arms For Ukraine. USA Today (4/29, Page, Breitman, 5.82M) reports that a USA TODAY/Pew Research Center Poll finds Americans support tighter economic sanctions on Moscow, but oppose "by more than 2-1 the idea of sending arms or military supplies" to Ukraine. The poll released Monday found that a "majority support across party lines" for sanctions, by 53%-36%. But "there is also strong bipartisan opposition to sending weapons, 62%-30%."

WPost, WSJournal See Sanctions As Inadequate. The Washington Post (4/29, 4.22M) in an editorial says that "Vladimir Putin's assault on Ukraine has been relentless and increasingly reckless," while "President Obama's response has been slow and excruciatingly measured." The Post asks why the US would not be seeking "an immediate change in Russian behavior" and pursuing policies that are likely to produce that. The Post faults President Obama for not recognizing the situation for what it is and acting accordingly.

The Wall Street Journal (4/29, Subscription Publication, 5.51M), in an editorial, says sanctions against Russia imposed by the US and the EU indicate that neither is serious in its efforts to prevent Russia from further aggression in Ukraine and that market response indicates investors are pleased with the lack of strong action.

Editorial Wrap-Up:

NEW YORK TIMES. "Political Executions In Egypt." In an editorial, the New York Times (4/29, Subscription Publication, 9.65M) condemns the death sentences by an "out-of-control" Egyptian government, calling them "part of an organized state effort not just to crush its political opponents but to eliminate them." The Times calls the Administration's response "shockingly weak," adding that there "was no indication that the administration would reconsider last week's decision to provide the Egyptians with 10 Apache helicopters and more than \$650 million in aid." The Times says that an Egyptian government "that persecutes its political opponents and denies them justice and any political role in society will produce only instability and violence."

"Troubling Student Loans" The New York Times (4/29, Editorial for the New York (NY), Times, Subscription Publication, 9.65M) editorializes on the need of Federal financial regulators to address borrowing terms for private student loans which can force borrowers into default. The Times examines some of the risks borrowers face from private loans, including variable interest rates which lead to higher-than-expected debt, few consumer protections, and sudden defaults due to the death of a co-signer. The editorial argues in favor of regulators implementing clearer terms for loans, greater consumer protection, and notification of risks of default, so that "in no case should a borrower in good standing be shoved into default."

"LG's Plan To Deface The Palisades." In an editorial, the New York Times (4/29, Subscription Publication, 9.65M) expresses its opposition to LG's plans to build "a vastly oversized tower" on the Palisades along the Hudson River, and calls the rule change by officials in Englewood Cliffs, NJ to allow its construction "a shameful dismissal of the greater public good" which defies decades of protection for the cliffs. Despite the considerable public protest, the editorial says that LG is digging in its heels and going forward on the building, and argues that a better option for the company "would be to appreciate the public outcry for what it is: a protest against the potential degradation of a historic vista and corporate insensitivity by a remote multinational giant."

"Why Did The N.B.A. Long Tolerate Sterling?" In an editorial, the New York Times (4/29, Subscription Publication, 9.65M) says that the lack of surprise over Clippers owner Donald Sterling's remarks is "perhaps the most disturbing aspect" of the scandal, noting that many have observed "that Mr. Sterling has a history of bigotry." The Times argues that given some of Sterling's past comments, the NBA ought to express its disapproval and sanction him. In addition to sending a message on such remarks, the editorial says "The league's top leadership tolerated and sheltered Mr. Sterling for much too long," and a sanction from commissioner Adam Silver would "make clear that there's no place in the league for owners with plantation attitudes," regardless of their context.

WASHINGTON POST. "Stuck In The Past On Race." In an editorial, the Washington Post (4/29, 4.22M) comments on recent remarks by Nevada rancher Cliven Bundy and Los Angeles Clippers owner Donald Sterling, the "loathsome racism" of which reflects the work that yet remains for the US to improve race relations. The Post cites comments by Supreme Court Justice Sandra Day O'Connor, who in arguing for affirmative action said "the use of racial preferences... will no longer be necessary." The editorial argues that remarks like those by Bundy and Sterling highlight the "the rationale for diversity that Justice O'Connor was defending," saying that "the country needs younger people of all races interacting, including in law schools" in order to end racism like that of Bundy.

"Secure In Their Phones." The Washington Post (4/29, 4.22M) editorializes on a case pending before the Supreme court, which will involve authorities' ability to search the contents of mobile phones on or near a person during an arrest without a warrant. Although the state of California is asking the Court "to refrain from a sweeping ruling," the Post says that given the access to Americans' information provided by smartphones, "the justices can and should provide updated guidelines to police, lawyers and defendants." The editorial examines how changing technologies often require changing interpretations of the Fourth Amendment, and the Court "must sort out how the Fourth Amendment applies to digital information now."

"More Half-Measures." The Washington Post (4/29, 4.22M) in an editorial says that "Vladimir Putin's assault on Ukraine has been relentless and increasingly reckless," while "President Obama's response has been slow and excruciatingly measured." The Post asks while the US would not be seeking "an immediate change in Russian behavior" and pursuing policies that are likely to produce that. The Post faults President Obama for not

recognizing the situation for what it is and acting accordingly.

WALL STREET JOURNAL. "Pfizer's Tax Takeover." In an editorial, the Wall Street Journal (4/29, Subscription Publication, 5.51M) discusses Pfizer's plan to buy the British AstraZeneca, noting that paying \$100 billion to invest overseas would make more financial sense for the company, given the almost 40% business tax rate in the US. The Journal defends Pfizer's plan to buy the company and put its money into the UK rather than pay such high taxes, and argues that the aim of American tax policy should be to spur domestic investment rather than seeking refuge overseas.

"Russia's Obama Rally." The Wall Street Journal (4/29, Subscription Publication, 5.51M) in an editorial says sanctions against Russia imposed by the US and the EU indicate that neither is serious in its efforts to prevent Russia from further aggression in Ukraine and that market response indicates investors are pleased with the lack of strong action.

"U.S. Return To The Philippines." An editorial in the Wall Street Journal (4/29, Subscription Publication, 5.51M) notes that China's growing aggression drove the Philippines to strengthen its alliance with the US, and argues that the 10-year defense agreement between the US and the Philippines should demonstrate to Chinese leaders that rather than causing nations in the region to knuckle under to Beijing, their aggression has those nations turning to the US for stronger military partnerships.

Location: Grand Ballroom. 12 p.m. When Hate Speech Goes Viral: Dealing with Bigotry Online. Panelists: Monika Bickert, Head of Global Policy Management, Facebook; Jeffrey Rosen, President and CEO, National Constitution Center; Jennifer Hanley, Director, Legal & Policy, Family Online Safety Institute; Steven Freeman, ADL Associate Director of Civil Rights, Director of Legal Affairs. Location: Grand Ballroom. 1:30 p.m. Presentation of ADL William & Naomi Gorowitz Institute Service Award to Cathy L. Lanier, Chief, Washington, D.C. Metropolitan Police Department. Location: Grand Ballroom. Location: Mayflower Hotel, 1127 Connecticut Ave. NW.

2014 HOMELAND SECURITY CONGRESS — Institute for Defense & Government Advancements 2014 Homeland Security Congress. 9:40 a.m. DHS Acting Chief Financial Officer Chris Fulghum will deliver remarks on managing the Department of Homeland Security budget, the process for allocating resources, and shared services. Location: Hilton Crystal City, 2399 Jefferson Davis Highway, Arlington, Va.

April 29 – 30. ATLANTIC COUNCIL CONFERENCE – EUROPE — Atlantic Council Conference: “Toward a Europe Whole and Free.” Speakers include Vice President Joe Biden, Secretary of State John Kerry, European Commission President Jose Manuel Durao Barroso, former Secretary of State Madeleine Albright; former national security advisers Zbigniew Brzezinski, Stephen Hadley and Brent Scowcroft; and other prominent leaders and lawmakers. Conference agenda: <http://www.atlanticcouncil.org/toward-a-europe-whole-and-free-april-29-30>. 1:30 p.m. Keynote by Secretary of State John Kerry. Location: Atlantic Council, 1030 15th Street, NW, 12th Floor.

April 29 – 30. 8:30 a.m. – 5:30 p.m. LOW INCOME KIDS – SAVING FOR COLLEGE — Children’s Savings Conference: From Aspirations to Achievement, sponsored by the Corporation for Enterprise Development (CFED). Participants include Ray Boshara, Senior Adviser and Assistant Vice President, Federal Reserve Bank of St. Louis; Reid Cramer, Director of the Asset Building Program, New America Foundation; Josi Cisneros, Treasurer, City and County of San Francisco; William Elliott, Director of the Assets and Education Initiative, University of Kansas; Ed FitzGerald, County Executive, Cuyahoga County, Ohio; Martha Kanter, former Under Secretary of Education, U.S. Department of Education; Andrea Levere, President, CFED; Michael Sherraden, Founder and Director of the Center for Social Development, Washington University; and Lauran Tuck, who founded Tuck’s R.U.S.H. for Literacy with her husband Justin Tuck of the Oakland Raiders. <http://cfed.org/programs/csa/conference/> for full agenda: http://cfed.org/assets/pdfs/Conference_Agenda_External_On_Letterhead.pdf Location: Omni Shoreham Hotel, 2500 Calvert Street, NW.

DATA TRANSPARENCY SUMMIT — The Data Transparency Summit will include sponsors of the Digital Accountability and Transparency Act (DATA Act), alongside tech industry leaders and administration officials in building a shared vision for implementing the landmark open government legislation. The DATA Act passed the United States Senate earlier this month via unanimous consent and is expected to earn swift approval in the House of Representatives following the congressional recess. Senators Mark Warner (D-VA) and Rob Portman (R-OH) will join with Representative Darrell Issa (R-CA) to discuss how they intend to ensure that the DATA Act delivers on its promise of transforming federal spending information into open data. 8:45 a.m. Welcome: Hudson Hollister, Executive Director, Data Transparency Coalition Don McCrory, Partner, PwC. 9 a.m. Legislative Panel: A Mandate for Data Transparency Transformation; Dean Garfield, President and CEO, Information Technology Industry Council (moderator); Rep. Darrell Issa; Sen. Mark Warner; Sen. Rob Portman. 10 a.m. Keynote: An Efficient, Effective, and Affordable Government; Jason Miller, Federal News Radio (host); Richard Ginman, Chair, Government Accountability and Transparency Board. 10:15 a.m. Industry Panel: Industry Implements the Data Transparency Transformation; Jason Miller, Federal News Radio (moderator); Dan Chenok, Executive Vice Chair, Industry Advisory Council (invited); Dan Mintz, President and Executive Director, Advanced Mobility Academic Research Center; Trey Hodgkins, Senior Vice President, Public Sector, Information Technology Alliance for Public Sector (invited). 11:30 a.m. Plenary Panel: Benefits of the Data Transparency Transformation; Don McCrory, Partner, PwC (moderator); Kathy Tighe, Chair, Recovery Accountability and Transparency Board; Robert Shea, former Associate Director for Administration and Government Performance, White House Office of Management and Budget; Amy Haseltine, Associate Deputy Assistant Secretary, Division of Grants, Department of Health and Human Services. 1:30 p.m. Track Discussions: Data-Driven Accountability, sponsored by WebFilings: Mike Starr, Director of Strategic Initiatives, WebFilings (moderator); David Williams, Inspector General, U.S. Postal Service; Dr. Shannon Sohl, Northern Illinois University; Dr. Hussein Issa, Rutgers Business School; Sean Moulton, Director, Open Government Policy, Center for Effective Government. Data-Driven Management: Pat Fiorenza, Senior Research Analyst (moderator); Christina Ho, Executive Director for Data Transparency, Treasury Department; Jonathan Kraden, Counsel, Senate Homeland Security and Governmental Affairs Committee; Bill Beach, Chief Economist, Senate Budget Committee (invited). Data-Driven Compliance, sponsored by StreamLink Software: Adam Roth, CEO, StreamLink Software (moderator); Ramesh Advani, Director of Grants Management, Commonwealth of Massachusetts; Comelia Chebinou, Washington Director, National Association of State Auditors, Comptrollers, and Treasurers; Janet Schmidt, Fiscal/Operations Manager, ServeNebraska; Christopher Connor, Wisconsin Division of Budget and Finance. 3 p.m. Plenary Address: No Labels, Problem Solving, and the Data Transparency Transformation: Steve Goodrich, Vice Chairman, Government Transformation Initiative (host); Rep. Chen Bustos. 3:30 p.m. Closing: Next Steps for the Data Transparency Transformation: Joe Kull, Director, Washington Federal Practice, PwC, Hudson Hollister,

Executive Director, Data Transparency Coalition. Location: Union Market, 1309 5th St NE.

INSURANCE REGULATORY MODERNIZATION – MCRAITH, ROYCE — 8 a.m. – 10:30 a.m. National Journal LIVE's "Insurance Regulatory Modernization: A Discussion Home and Abroad". Speakers: Michael McRaith, Director, Federal Insurance Policy; Representative Ed Royce (R-CA); Robert Detlefsen, Vice President of Public Policy, National Association of Mutual Insurance Companies; Tony Fratto, Partner, Hamilton Place Strategies; Aaron Klein, Director, Financial Regulatory Initiative, Bipartisan Policy Center; Barb Sulzenko-Laurie, Vice President, Policy & Senior Advisory, Policy Development, Insurance Bureau of Canada; Ethan Sonnichsen, Director, Government Relations, National Association of Insurance Commissioners; Peter Wallison, Arthur F. Burns Fellow in Financial Policy Studies, American Enterprise Institute; Nancy Cook, Economic and Domestic Policy Correspondent, National Journal. RSVP: [NJInsuranceModernization.eventbrite.com](http://www.nationaljournal.com/events/insurance-regulatory-modernization-a-discussion-home-and-abroad-20140429) For more information: <http://www.nationaljournal.com/events/insurance-regulatory-modernization-a-discussion-home-and-abroad-20140429> Location: The Hamilton, 600 14th Street, NW.

HUMAN SEX TRAFFICKING IN AMERICA — 10 a.m. Human Sex Trafficking in America: New Survey Details Extent of Problem Panel to discuss federal and county response focused on protecting children. Panelists: Rep. Ted Poe (R-Texas), author, Justice for Victims of Trafficking Act(H.R.3530); Supervisor Don Knabe, Chair, Los Angeles County (Calif.) Board of Supervisors; Jessica M. Trafficking Survivor, Leader. Contacts: Patti Giglio, NPC Newsmakers Co-Chair, 202-903-7869, patti@psgcom.net; Herb Perone, NPC Newsmakers Chair, 301-512-7636, herb@peronecomm.com <http://press.org/events/human-sex-trafficking-america> Location: National Press Club, Zenger Room, National Press Building, 529 14th St. NW,

SECRETARY PEREZ, SEN. BOOKER – MINIMUM WAGE – PRESS CALL — 11:45 a.m. Teleconference on raising the minimum wage with Secretary Thomas Perez, Sen. Cory Booker and national faith leaders. Speakers: Thomas Perez, United States Secretary of Labor; U.S. Senator Cory Booker, D-NJ; Fr. Larry Snyder, President, Catholic Charities USA; John Schmitt, Senior Economist, Center for Economic and Policy Research; Kim Bobo, Executive Director, Interfaith Worker Justice; Rev. Dr. James C. Perkins, Vice President, Progressive National Baptist Convention; Pastor, Greater Christ Baptist Church in Detroit, MI.

PENTAGON – CZECH REPUBLIC — Secretary of Defense Chuck Hagel hosts an honor cordon to welcome the Czech Republic's Minister of Defense Martin Stropnický to the Pentagon.

GW – JAPAN, S. KOREAN LEGISLATORS —4 p.m. – 6 p.m. Legislators from Japan, South Korea and US Congress Discuss Contemporary Issues Michael Turner, Congressman, Ohio 10th (tentative) Jim McDermott, Congressman, Washington 7th, Co-Chair, US Delegation (tentative) Kuniko Inoguchi, House of Counsellors, Liberal Democratic Party Co-Chair, Japanese Delegation Masaharu Nakagawa, House of Representatives, Democratic Party of Japan, Co-Chair, Japanese Delegation Jin Ha Hwang, Saenuri Party, Co-Chair, South Korean Delegation, Korean National Assembly Soon Ok Chun, New Politics Alliance for Democracy Party Moderators Henry R. Nau, Co-Director of the U.S.-Japan-South Korea Legislative Exchange Program, Professor of Political Science and International Relations, GW Mike M. Mochizuki, Co-Director of the U.S.-Japan-South Korea Legislative Exchange Program, Associate Dean for Academic Programs. RSVP: <http://go.gwu.edu/LEP> Location: 1957 E Street NW.

Last Laughs:

LATE NIGHT POLITICAL HUMOR.

Jimmy Fallon: "Even President Obama is calling [Los Angeles Clippers owner] Donald Sterling's racist remarks incredibly offensive. And you know it's sad when even [Russian President Vladimir] Putin is like, 'I hate to say it, but I am with Obama on this one.'"

Jimmy Fallon: "Well, here is some international news. With the US considering new sanctions against Russia, there are reports that Vladimir Putin has canceled any further communication with the White House. And the Republicans are like, 'Big deal. We did that years ago.'"

Jimmy Kimmel: "A six-year-old Russian girl asked Vladimir Putin this question. She asked, 'If you were

drowning, do you think President Obama would save you?' Putin said, 'Yes, I think Obama would save me.' So, on Friday, Jon Karl of ABC News asked President Obama, 'Would you save him?' And Obama said, 'Yeah, I would save Putin if he was drowning.' He said, 'I would save anyone except Donald Sterling if they were drowning.'"

Fwd: Secretary's House Questions for the Record

Haze, Pam <pam_haze@ios.doi.gov>

Fri, May 2, 2014 at 3:27 PM

To: "Jewell, Sally" (b)(6) <[REDACTED]@ios.doi.gov>

Cc: Rhea Suh <Rhea_Suh@ios.doi.gov>, Amy Holley <Amy_Holley@ios.doi.gov>, Tommy Beaudreau <tommy.beaudreau@boem.gov>, Sarah Neimeyer <sarah_neimeyer@ios.doi.gov>, Erin Walls <erin_walls@ios.doi.gov>

Dear Secretary: I understand that you want to see questions and answers that we are submitting to Congress as part of your hearing record. Attached to this email are the questions and answers from the House Interior Appropriations Subcommittee hearing.

In the interest of giving you as much time as possible, I am sending them without having read and reviewed them. They do incorporate review by OMB and the Budget Office. I plan to do my review this weekend. In addition to any changes I would make we also need to make final formatting changes and general cleanup.

Please do not feel that you have to read them. We need your comments/changes back by Wednesday morning so we can clean them up and get them to the Subcommittee within a very constrained timeframe.

Please let me know if you have questions. thank you

 **FY 2015 IERA Subcommittee DOI QFRs MASTER.docx**

U.S. House of Representatives
Committee on Appropriations
Subcommittee on Interior, Environment, and Related Agencies
Budget Hearing: U.S. Department of the Interior
March 25, 2014
2359 Rayburn HOB

Questions for the Record -- Secretary of the Interior

Questions from Mr. Calvert

Wildland Fire Management/Budget Cap Adjustment Proposal

Historically, this subcommittee has funded wildland fire suppression accounts at the 10-year average level. Based on the severity of recent fire seasons, this methodology has proven insufficient to fully address annual fire needs. This has led to the need to transfer funding from non-fire accounts to cover shortfalls in suppression funding. The total shortfall in fiscal year 2013 was about \$28 million for your Department and \$600 million for the Forest Service—and there is likely to be a similar shortfall for fiscal year 2014. Clearly, there is a need to develop a better model for providing wildland fire funding.

The FY 2015 budget proposes to establish a new budget framework for the Wildland Fire Management program. Within the Department's proposed budget, \$268.6 million in discretionary funds (70 percent of the 10-year average for suppression costs) is requested for suppression. An additional \$240.4 million is requested through a budget cap adjustment.

Calvert Q1: Can you explain in some detail how the budget cap adjustment funding level of \$240.4 million is determined? Do you believe this calculation for determining fire suppression costs is more accurate than continuing to use the 10-year average?

Answer: The Administration routinely supports the use of 10-year averages as a viable method to determine funding needs, and other items, for programs with variable activity, such as wildfire suppression. To fund a variable item, like fire, within a budget, the 10-year average is the most reasonable method for developing funding needs. However, using the 10-year average is not a reasonable method for determining and budgeting for the total funding needs likely in a worst case scenario. Furthermore, using any method to determine the total funding needs likely in a worst case scenario is not a reasonable method for budgeting.

By contrast, the cap adjustment foresees budgeting for the likely worst case scenario, with the amount requested for the cap adjustment and the base suppression request combined representing the likely highest level of suppression spending in a worst case scenario. This amount was derived utilizing a methodology that provides a scientifically based 90 percent upper confidence level for the likely highest level of spending.

It is based on the work of Forest Service researchers who issued a paper in 2009 that provided forecast models for various timeframes, including 2 years out (ABT, K.L., J.P. Prestemon, and

K. Gebert "Wildfire suppression cost forecasts for the US Forest Service" Journal of Forestry 107(4): 173-178). The Budget uses this method to determine the upper limit of funding. Below is a short description of the model.

The 2-year out forecast is a time series regression model using historical expenditure data from 1977-2012. The variables in the model are time and expenditure lagged by three years (a statistical method to factor in the relationship between expenditures in a given year and three years prior). The costs and the time trend variable are assumed to also proxy for patterns in climate, fuels and management, for the years (the ones that are being forecasted) in which there are no forecasted values.

The DOI total estimated amount of \$509 million is considered the "High 90" confidence interval for the anticipated expenditures for the year 2015. The \$240.4 million is the difference between the estimated expenditures developed by Forest Service researchers and 70% of the 10-year average of inflation-adjusted suppression expenditures.

For comparison purposes, the average DOI obligations in excess of the requested 10-year average is \$126.5 million with the highest being \$210 million. The Budget requests \$125 million above the 10-year average for DOI.

The 10-year average calculation will continue to be calculated each year and 70% of that 10-year average will be the level of funding requested in the Wildland Fire Management account for Suppression operations.

Calvert Q2: Is this calculation likely to change throughout the year, possibly before the Interior bill is enacted into law? If there is a change in the overall projected suppression costs necessary for FY 2015, will the Administration submit a budget amendment?

Answer: DOI will update its estimates of the amount needed in a cap adjustment periodically throughout the year so Congress can use the most up-to-date estimate in making appropriations decisions. Also note that the upper limit of the proposed cap adjustment would be set to allow for updated estimates.

Calvert Q3: There are, I believe, seven bipartisan members of this subcommittee who have signed onto Congressman Simpson's cap adjustment bill. Short of passing the Simpson bill, the only way we're able to be successful in adopting the budget cap adjustment proposal is to have the House and Senate Budget Committees (Paul Ryan and Patty Murray respectively) amend the Budget Control Act. Thus far, they don't seem inclined to support this effort.

Do you have any plans to meet personally with the Chairman of the House Budget Committee, Paul Ryan, or the Chairwoman of the Senate Budget Committee, Patty Murray, to press the case for amending the Budget Control Act?

Answer: It is our understanding that the Office of Management and Budget met with Paul Ryan and the House Budget Committee staff and with Patty Murray and the Senate Budget Committee staff to inform them about the budget cap proposal. The Department of the Interior and

USDA/Forest Service, in conjunction with the Office of Management and Budget (OMB), are meeting with appropriations and authorizing committees and other stakeholders to inform them about the proposal.

Calvert Q4: Practically speaking, if the proposal for this budget cap adjustment is agreed to, there must be set criteria for the Department to access these funds. For instance, in order for FEMA to access its portion of the disaster cap adjustment funding, there must first be a disaster declaration from the President.

Has the Department developed similar criteria for accessing the \$240.4 million and how were those criteria developed? Who will make the decision about accessing this funding? Since timely decisions must often be made relating to fire suppression activities, how quickly would funding be able to be accessed and distributed under the cap adjustment?

Answer: Yes. Authorizing language will include specific triggers for accessing funding and Secretarial designations/ notifications that would be necessary prior to accessing the cap adjustment funds. To maintain transparency, the agencies would also be required to report on their use of cap adjustment funds after the end of the fire season.

A declaration by the Secretary concerned may be issued only if—

- an individual wildfire incident meets objective indicators of an extraordinary fire situation, to include:
 - the Secretary concerned determines that the fire requires an emergency Federal response based on the significant complexity, severity, or threat posed by the fire to human life, property, or resource; or
 - the fire covers 1,000 or more acres; or
 - the fire is within 10 miles of a major urban area (50,000 or more inhabitants); or,
- the cumulative costs of wildfire suppression operations, for the Secretary concerned will exceed, within 30 days, all of the amounts previously appropriated to the Secretary concerned for wildfire suppression operations.

The DOI Wildland Fire Management Program is committed to continue to frequently assess the suppression funding availability throughout the year, with increased scrutiny in the Department during the height of the wildfire activity. This monitoring and reporting will allow decision makers ample time to anticipate needs to access and distribute the funds available under the cap adjustment.

Drought, Delta Smelt, and the ESA

The 9th U.S. Circuit Court of Appeals recently upheld a 2008 biological opinion by the U.S. Fish and Wildlife Service that concluded that the Central Valley and State Water Projects - which provide water for more than 20 million people and seven million acres of agriculture - jeopardized the continued existence of the delta smelt and its habitat. The court acknowledged the “enormous practical implications” of its decision, but that it was prohibited by the Endangered Species Act “from making ‘such fine utilitarian calculations’ to balance the smelt’s interests against the interests of the citizens of California.” Resolution of that question, the court

said, falls to Congress, the agencies to which Congress has delegated authority, and the State of California.

Calvert Q5: While Congress wrestles with solutions, what flexibilities are you afforded under your authority to provide water for more than 20 million people in California and the hundreds of millions elsewhere who depend on California's produce, while at the same time meeting your ESA mandate to prevent the extinction of delta smelt?

Answer: Relative to providing more water while meeting ESA requirements, Reclamation has been engaging with both U.S. Fish and Wildlife Service (FWS) and National Marine Fisheries Service (NMFS) to exercise flexibility to operate while maintaining compliance with the Biological Opinions. The agencies will continue to work together to operate in a manner that protects species while delivering as much water as possible to meet our customers' needs.

Reclamation has been working with other Federal agencies and the State of California in developing a plan to optimize our limited water supply to meet the needs of our contractors and assure we are in a position to take advantage of any hydrologic events that might occur. In collaboration with our various stakeholders, we had previously developed over the past year a Central Valley Project Water Plan 2014 which will be useful should the hydrology improve.

Calvert Q6: How are your flexibilities limited by the resources at your disposal?

Answer: Reclamation has sufficient resources to continue to engage with all parties involved to exercise flexibility to operate while maintaining compliance with the Biological Opinions.

Calvert Q7: Much has been written about the inherent weaknesses of the ESA's single-species approach after so much has been learned in the past few decades about ecosystem science. In 2010, former Interior Deputy Secretary Lynn Scarlett wrote specifically about such weakness when applied to the Bay Delta.

In your opinion, should Congress and the Administration take up the issue of improving and modernizing the ESA?

Answer: Since 1973, the Service has demonstrated a clear record of success in preventing the probable extinction of hundreds of species across the Nation while working collaboratively with Federal agencies and other partners to balance the diverse impacts of their development actions with conservation actions that contribute towards species' survival and often to their recovery. The ESA contains a suite of tools that provide the flexibility needed to guide land development and aid species recovery. Working in partnership with other agencies and organizations is foundational for the Ecological Services program as the conservation of the Nation's biological heritage cannot be achieved by a single agency or organization.

The Service is committed to improving the implementation of the ESA. In response to Executive Order 13563 on "Improving Regulation and Regulatory Review," the Department of the Interior prepared a Plan for Retrospective Regulatory Review in 2011. As part of that Plan, the Department (in cooperation with NOAA) committed to "revise and update ... ESA implementing

regulations and policies to improve conservation effectiveness, reduce administrative burden, enhance clarity and consistency ... and encourage partnerships, innovation, and cooperation.” Several specific regulatory improvement proposals have already been published and more will soon be ready for publication, including actions clarifying the scope and content of incidental take statements; clarifying the scope, purpose, and criteria for designating critical habitat; revising the definition of adverse modification of critical habitat; and clarifying critical habitat exclusions. These proposals, once finalized, will improve clarity and consistency in implementing the ESA which will be a benefit to proactive land use planning and conservation.

The Service would support constructive, broadly bipartisan legislative efforts to improve and update the ESA if a shared objective for that reform could be agreed upon.

Calvert Q8: Does our changing climate add a level of urgency to the issue?

Answer: The Service is exercising the administrative flexibility inherent in the Act to accommodate consideration of the effects of climate change in the legal and policy framework. We do expect that the effects of climate change will contribute to the risk of extinction for more species in the future.

Calvert Q9: Given ESA’s documented weaknesses, why should Congress direct funding toward more listings when we could direct resources to recovery actions?

Answer: Both listing and recovery actions are important funding needs of the Service. Recovering species to the point at which they are no longer endangered or threatened is the ultimate goal of the Endangered Species Act, and it is a goal toward which we are making progress. In the last two months the Fish and Wildlife Service has delisted a fish species in Oregon and proposed to delist two California plants and another fish, all due to recovery. Altogether there are nine pending proposals to delist species due to recovery. When the Obama Administration began, there had been fewer than 20 delistings due to recovery; now there are 30 and, if all pending delisting proposals are finalized, this administration will have published more delisting rules on the basis of recovery than all prior administrations combined.

Important as they are, however, delistings tell only part of the story. We have made the future vastly more secure for California condors, Black-footed ferrets, Florida manatees, and Whooping cranes among many others. Although still endangered, these species all have a real shot at recovery, despite having once faced almost certain extinction. And that is success that should be acknowledged and celebrated. The funding increase requested for Conservation and Restoration activities is important, but will only provide the same buying power as our funding levels in 2010-2012, before sequestration and other budget cuts of the last few years. If we want to see continued progress toward recovery and delisting, we need to continue funding this program.

Listing a species is required under the ESA for species that meet the definition of threatened or endangered. The law allows citizens to petition to list a species, and there are very tight deadlines for making these decisions. Our inability to meet those statutory deadlines led to multiple lawsuits and eventually to a comprehensive settlement agreement that set an orderly schedule for making the overdue determinations. Information sought and compiled through the rule-making

process associated with the Listing program informs and streamlines conservation and recovery activities. In many ways, the Listing process sets the stage for recovery needs and objectives, which facilitates early response and implementation to stabilize and then recover species.

Greater Sage-grouse

In December, 2011, then-Secretary of the Interior Ken Salazar met with leaders of eight western States and forged an agreement to work closely together to conserve greater sage-grouse so that an ESA listing is unnecessary. As it should be, States have significantly increased their efforts and investments and have been leading the way in the conservation of greater sage-grouse. They committed in 2011 to support "all reasonable management efforts necessary." But the conundrum is that so much of greater sage-grouse habitat resides on Interior lands. Lately we've been hearing from the western States that Interior is moving away from commitments made by former Secretary Salazar: that Interior is saying that conservation plans developed by States and Interior bureaus are not "good enough" to ensure that greater sage-grouse are conserved.

Calvert Q10: Madam Secretary, are you truly committed to working with the States to conserve greater sage-grouse so that an ESA listing is unnecessary?

Answer: Yes. The Department of the Interior is committed to the conservation of the greater sage grouse range-wide. The FWS, BLM and USGS are all contributing significant resources to address the threats identified in the 2010 warranted finding and achieve conservation. We have been reviewing and providing advice on State planning efforts as well as working closely with the Western Association of Fish and Wildlife Agencies. In addition, we continue to work closely with the Task Force that was established by former Secretary Salazar and the respective western Governors.

Calvert Q11: I'm told that the Wyoming BLM office has completed sage-grouse management plans for Wyoming BLM lands, but that approval to implement these plans is being held up in the BLM headquarters office.

Is this true, and, if so, what is the rationale?

Answer: The BLM is currently working on a number of Greater Sage-Grouse management plans in Wyoming, which include the Buffalo Resource Management Plan (RMP) revision, Bighorn Basin RMP revision, Lander RMP revision, and the Wyoming 9-Plan Greater Sage-Grouse RMP Amendment. The Wyoming management plans are in varying stages of completion, but are on schedule to be completed by the end of 2014. Coordination on these plans is vitally important.

The BLM remains active in conserving sagebrush landscapes in Wyoming and across the West while the land use planning process is underway. In 2011, the State of Wyoming's "core area" strategy was formally approved by the U.S. Fish and Wildlife Service (FWS) and officially adopted by the BLM to provide interim guidance and immediate direction for conserving sage grouse habitat in Wyoming until the National Planning process is completed. We look forward to continuing our unprecedented collaboration with public stakeholders, industry, other Federal agencies, and the State of Wyoming as we finish amending our land use plans.

Calvert Q12: How can you tell States that it's worth their time and resources to do everything they can, while BLM, which holds the lion share of the lands where greater sage-grouse reside, is delaying the implementation of plans?

Answer: To ensure pragmatic sage grouse conservation strategies are implemented while the Greater Sage-Grouse National Planning Strategy is underway, in 2011, the BLM formally adopted interim sage grouse management policies to guide land use authorizations. These measures help the BLM and Forest Service (USFS) to determine whether to authorize or continue certain activities in Greater Sage-Grouse habitat, and to ensure that Greater Sage-Grouse populations and habitats are maintained or improved with minimized habitat loss. Conservation efforts are also occurring across the BLM's many programs, including wildland fire management, vegetation restoration, and conventional and renewable energy development.

The BLM will continue to conserve sage grouse habitat under its interim guidance while the National Planning process is completed with the full involvement of State agencies and stakeholders across the West. All 15 Environmental Impact Statement drafts have been released to the public, and the BLM expects to sign Records of Decision by the end of this calendar year.

Calvert Q13: For every square inch of greater sage-grouse historic and current range, is there a conservation plan—State, Federal, or otherwise—that, if fully implemented, creates sufficient guarantees that a greater sage-grouse listing isn't necessary? If not, then please identify the specific part or parts of the range with insufficient conservation plans; and if not, please also identify specific changes that must be made to any insufficient plan in order for it to be sufficient.

Answer: All sage-grouse habitat under the BLM's jurisdiction is covered by a land-use plan, and as noted above, the BLM is revising or amending these plans to provide improved regulatory mechanisms which ensure the conservation of the Greater Sage-Grouse and its habitat. The plans rely on conservation objectives identified by the Federal and State partners, including FWS, in the Conservation Objectives Team Report, as well as robust mitigation, monitoring, and adaptive management components. The goal of the BLM through this planning process is to provide sufficient regulatory certainty to conserve sage-grouse habitat. Ultimately, the FWS will make the determination whether the plans are sufficient and whether to list the species under the Endangered Species Act.

Calvert Q14: More than half of all remaining sage-grouse habitat in the U.S. is found on BLM public lands, so it is fair to say that successful conservation on these lands will factor heavily in the imminent decision of whether or not to list sage-grouse under the Endangered Species Act (ESA). This subcommittee has invested \$30 million in fiscal years 2013 and 2014 in the BLM's National Greater Sage-Grouse Planning Strategy. The fiscal year 2015 budget proposes another \$15 million to begin to implement those plans. If the decision is made to list the greater sage-grouse, I do not want to find out later that the BLM could have done more to improve and implement those plans.

When is FWS going to agree to the BLM plans that the two agencies have worked together produce? If FWS doesn't agree, then what was the point of spending so much time and money to collaborate?

Answer: BLM is scheduled to have administrative draft plans available by summer 2014 and final Records of Decision and Environmental Impact Statements completed by the end of 2014. The FWS continues to work closely with BLM to provide technical assistance and guidance to ensure the plans address the threats to the species and provide for conservation of the species habitat into the future. These plans will be valuable in guiding adaptive management of sage steppe habitat, which is critical to greater sage grouse conservation.

Calvert Q15: Does the \$15 million proposed in fiscal year 2015 fully implement these plans? If not, what percentage of this plan does it fund? What percent of the improvement actions documented in these plans won't produce results until 2016 or beyond?

Answer: The \$15 million proposed in the President's Fiscal Year 2015 budget request is designed to support the BLM's ongoing implementation of the National Planning Strategy process, as well as continued large-scale sage-grouse habitat assessment and improvement. Currently, no Decision Records have been signed for the 15 plan amendments and revisions. The BLM cannot project what funding will be needed to fully implement the conservation measures that will be adopted in the plans until the plans have been finalized, which will not occur until early in fiscal year 2015. Under its National Planning Strategy timeline, BLM intends to address these funding needs in its 2016 budget, to the extent that they cannot be fully implemented at the 2015 base funding level. Likewise, prior to signing Decision Records, it is unclear what percentage of the conservation measures will not produce results until 2016 or beyond.

A commitment to fund the plans is critical to providing certainty to the FWS that the conservation measures identified by the BLM in its land use plans will be implemented.

Calvert Q16: Are recent State and Federal efforts to conserve greater sage-grouse working? If so, provide a few examples of success stories and tell us how you're leveraging lessons, techniques, plans with others.

Answer: In December 2009, then Secretary Salazar convened a Sage-Grouse Task Force (SGTF) chaired by Governors Mead and Hickenlooper and the BLM Director. The SGTF's strategic mission is to identify and implement high priority conservation actions and integrate ongoing actions necessary to preclude the need to list the Greater Sage-Grouse under the Endangered Species Act in 2015. Members of the SGTF include Governor's Office representatives from the 11 States within the range of the Greater Sage-Grouse, along with the Department, the BLM, the USFS, the FWS, and Natural Resources Conservation Service representatives. This unprecedented Task Force has provided a venue for improved cooperation and collaboration around the shared goal of sage-grouse conservation.

Many successful conservation measures are also being implemented on the ground with our Federal, State, and private partners. One exciting effort recently documented the combined efforts of the Nevada Department of Wildlife, the Squaw Valley Ranch and the BLM to restore

areas burned in 2005 by the 97,000 acre Esmeralda wildfire in the BLM's Elko District, Nevada. The area affected by the fire provided habitat for one of the highest documented sage-grouse population densities in Nevada. Greater Sage-Grouse were documented using the restored areas within 3 years of reseeded. By 2012, sage-grouse population levels were near pre-fire levels. These types of cooperative treatments and management of activities in sage-grouse habitat are occurring across the landscape and are an integral part of the BLM's plan revisions and amendments to meet the needs of Greater Sage-Grouse.

Calvert Q17: If State and Federal conservation efforts continue at current levels, will an ESA listing be necessary?

Answer: The FWS partnered with the States to define the conservation objectives for greater sage-grouse that, if met, would conserve the species into the future. This report is referred to as the Conservation Objectives Team report (<http://www.fws.gov/mountain-prairie/species/birds/sagegrouse/COT/COT-Report-with-Dear-Interested-Reader-Letter.pdf>). The BLM and U.S. Forest Service planning efforts will not be completed until this fall. The FWS continues to provide guidance to Federal and State agency efforts consistent with the objectives identified in this report. The FWS will consider these efforts in the current status review and will make an ESA determination by September 30, 2015, on whether an ESA listing proposal is still warranted.

Calvert Q18: What scientific basis is there for making a decision about whether or not to propose an ESA listing by September, 2015?

Answer: The FWS made a finding in 2010 that the greater sage grouse was warranted for listing, but that a listing determination was precluded by other higher priority listing actions. Based on the FWS listing priority guidance, the greater sage grouse was assigned a listing priority number (LPN) of 8 (out of 12; with 1 being the highest priority and 12 the lowest) based on the moderate imminency and moderate magnitude of the threats. The LPN for greater sage grouse has remained at eight in the Candidate Notice of Reviews published annually. Subsequent to the 2010 finding, the FWS finalized two settlement agreements in response to court-ordered petition deadlines and other lawsuits. The schedule for the agreements generally follows the species LPN, with listing determinations being made for species facing the highest degree of threats earlier than species facing a lesser degree of threats. These settlement agreements also resulted in the FWS prevailing in a separate lawsuit filed in September 2011, seeking to have FWS make a listing determination on greater sage grouse within 90 days. A finding of not warranted or a proposed rule to list the greater sage grouse is due by September 30, 2015.

The settlement agreements require FWS to make listing determinations under the ESA for 251 species on a workable and publicly available schedule. Between 2008 and 2010, FWS was engaged in litigation for missed deadlines on petition findings for approximately 895 species. Since the settlement agreements were approved and FWS made its work plan public, FWS's Listing Program has seen an almost 96 percent reduction in species subject to lawsuits filed for missed deadlines on petition findings.

The settlement agreements have accomplished our objectives of making our listing activities

more certain and predictable, and allowing the FWS to focus limited resources on actions that provide the most conservation benefit to the species that are most in need of help.

Calvert Q19: If Interior had more time, could it make a more informed scientific decision about whether or not an ESA listing is necessary?

Answer: The ESA directs FWS to make expeditious progress in completing listing determinations for candidate species and to use the best scientific and commercial data available to make a decision whether a species warrants listing under the Act. This determination will be based on the information that is available at the time a decision is or needs to be made.

The settlement agreements have given FWS an additional four years to work on conserving the greater sage grouse prior to a listing decision. We believe there will be able information on which to base a well-informed scientific decision regarding listing in 2015.

Calvert Q20: Does Interior's FY15 budget propose funding for enough staffing to fully engage in partnership programs with State agencies and private land owners to implement conservation plans?

Answer: Yes. This request supports additional capacity across three regions of the FWS and 11 States. The majority of these positions will provide on-the-ground support for conservation on private lands, and to provide technical assistance for State and Federal conservation planning and implementation.

Calvert Q21: Does Interior's FY15 budget propose funding for enough staffing to efficiently process necessary permits for landscape restoration projects on public lands that benefit the Greater Sage-grouse? How does Interior measure efficiency in this case?

Answer: The \$15 million proposed in the President's Fiscal Year 2015 budget request is designed to support the BLM's ongoing implementation of the National Planning Strategy process, as well as continued large-scale sage-grouse habitat assessment and improvement. Currently, no Decision Records have been signed for the 15 plan amendments and revisions. The BLM cannot project what funding will be needed to fully implement the conservation measures that will be adopted in the plans until the plans have been finalized, which will not occur until early in fiscal year 2015. Under its National Planning Strategy timeline, BLM intends to address these funding needs in its 2016 budget, to the extent that they cannot be fully implemented at the 2015 base funding level. Likewise, prior to signing Decision Records, it is unclear what percentage of the conservation measures will not produce results until 2016 or beyond.

The BLM plans will include strategies for identifying priority areas for conservation and restoration within the range of the Greater Sage-Grouse. These priority areas will be identified through a collaborative process with Federal, State, and private partners, and will look at an "all lands approach." This approach will create opportunities to improve efficiencies by targeting priority areas that will provide the greatest benefit to the species and allow partners to leverage resources, thereby increasing the amount of conservation benefit that can occur on the ground.

Calvert Q22: Wildfire is a major threat to the Greater Sage-grouse and habitat. Are federal agencies prioritizing budgets for pre-suppression, suppression and post-fire rehabilitation in priority Sage-grouse habitat areas?

Answer: The DOI Wildland Fire Management program is highly aware of the important role that fire plays in sagebrush ecosystems. While firefighter and public safety is the top fire management priority, resource priorities are also a program consideration. In the BLM, for example, protecting, conserving and restoring sage-grouse habitat is one of their highest resource priorities and the Wildland Fire Management program contributes to that priority. The BLM issued policy several years ago reiterating each fire season that the BLM will continue to reposition fire suppression resources so that they can rapidly respond to fires in sage-grouse habitat, and provide fire crews access to sage-grouse habitat maps so that priority habitat can be emphasized during suppression. As an example, the BLM will emphasize the use of fire breaks, pinyon-juniper treatments, and non-native weed treatments to conserve and rehabilitate sagebrush habitat.

The DOI Burned Area Rehabilitation prioritization process ensures the highest priority needs are being met first and that funds are used in a consistent manner across all bureaus. The Department uses a rigorous process to rank BAR project proposals and allocate funds. One of the criteria includes: action is necessary to protect or enhance habitat for federally or tribally listed Threatened and Endangered (T&E) or candidate species. The U.S. Fish and Wildlife Service has until 2015 to make a final determination on listing the Greater Sage-Grouse under the Endangered Species Act (ESA).

Calvert Q23: Do feral horses and burros on the range have a negative impact on sage-grouse habitat, and, if so, why aren't more feral horses and burros being taken off the range?

Answer: Broadly, the BLM has seen no data that indicate feral horses have any greater or lesser effect on sage grouse habitat than other large herbivores, such as cattle. In some areas the impacts of grazing have been identified as having a negative impact on sage-grouse habitat. In response to the National Academy of Sciences (NAS) report, the BLM is exploring research and protocols for differentiating wild horse and burro environmental impacts from those of livestock and wildlife. In the meantime, the BLM will continue to aggressively monitor the range and utilization rates and make adjustments based on sound rangeland management practices and the best available science.

Calvert Q24: What budget investments are being made to control wild horse and burro populations to a level that is not detrimental to sage-grouse habitat?

Answer: In March, the BLM published a Request for Applications targeting the development of new and more effective fertility control methods. The BLM has increased the number of population inventory flights utilizing the methods developed by the U.S. Geological Survey and recommended by the NAS. The BLM is also developing partnerships with various non-profit organizations and prisons to train and adopt mustangs to well-qualified homes. The BLM has almost completed its review of the NAS recommendations that were part of a BLM requested

review of its Wild Horse and Burro Program and will implement the recommendations as funding permits.

Calvert Q25: What monitoring investment is being made to provide sufficient information as to the population trends of the species as well as habitat conditions?

Answer: In coordination with our State and Federal partners, the BLM is incorporating a robust monitoring strategy into its plans that will provide sufficient information to determine the status of the species populations and condition of its habitat. To help facilitate this monitoring effort, a Memorandum of Understanding is currently in development with the Western Association of Fish and Wildlife Agencies that will facilitate the sharing of Greater Sage-Grouse population data gathered by the States with the Federal agencies.

Calvert Q26: Nevada is 87% managed by the Federal government, and 84% of greater sage-grouse habitat in Nevada is located on Federal lands. Therefore, the responsibility for sage-grouse habitat management in Nevada is almost entirely the Federal government's.

Does the President's FY15 budget request include sufficient sage-grouse habitat management appropriations and regulatory mechanisms for BLM lands in Nevada?

Answer: The \$15 million proposed in the President's Fiscal Year 2015 budget request is designed to support the BLM's ongoing implementation of the National Planning Strategy process, as well as continued large-scale sage-grouse habitat assessment and improvement. Currently, no Decision Records have been signed for the 15 plan amendments and revisions. The BLM cannot project what funding will be needed in Nevada or elsewhere to fully implement the conservation measures that will be adopted in the plans until the plans have been finalized, which will not occur until early in fiscal 2015. Under its National Planning Strategy timeline, BLM intends to address these funding needs in its 2016 budget, to the extent that they cannot be fully implemented at the 2015 base funding level. It is the intent of the revision process that all BLM plans will provide improved regulatory certainty and conservation measures for the Greater Sage-Grouse and its habitat.

Calvert Q27: On November 29, 2013, Fish & Wildlife Pacific Southwest Regional Director, Ren Lohofener, wrote to Governor Sandoval of Nevada stating, "while I appreciate your efforts and the State's efforts to conserve sagebrush ecosystems in Nevada, I am concerned that the efforts will not achieve the desired outcome."

Do you believe the Department of Interior is adequately managing habitat on federal lands to the expectations of the Fish and Wildlife Service to avoid a listing?

Answer: The BLM is taking every step possible to revise and amend land-use plans to protect, conserve, and restore the Greater Sage-Grouse and its habitat. All efforts have been and continue to be developed in close coordination with the FWS and other partner agencies and stakeholders. The BLM expects that implementation of the updated plans will protect and conserve Greater Sage-Grouse and its habitat. Ultimately, the FWS will make its determination whether to list the Greater Sage-Grouse based on the cumulative sum of all the conservation

efforts across the range of the species.

Calvert Q28: Would you agree the vast majority of sage-grouse habitat management in Nevada is the responsibility of the federal government?

Answer: Yes. The land under Federal ownership in Nevada is the responsibility of the Federal government to manage. This responsibility also requires close coordination with the State of Nevada and other stakeholders and partners with interest in the management of our public lands.

LWCF FY15 Budget Request

The President's budget request for fiscal year 2015 includes \$350 million in discretionary funding for projects through the Land and Water Conservation Fund (LWCF) and \$550 million in permanent funding, for the total authorized level of \$900 million for the Department of the Interior and the Department of Agriculture. According to the Administration, starting in fiscal year 2016, the President will propose the fully authorized level of \$900 million annually in permanent, mandatory funding. The legislative proposal supporting the \$550 million in permanent funding has not yet been transmitted to Congress. The administration had a similar request in the fiscal year 2014 budget, but the legislative proposal for permanent funding was never transmitted to Congress.

Calvert Q29: When will the Administration submit a legislative proposal for \$550 million in permanent funding to Congress? What is the proposed funding mechanism, or offset, to support the permanent request? What are the consequences of not providing permanent funding for LWCF?

Answer: The 2015 budget includes 14 DOI-related legislative proposals affecting spending and/or revenues that require action by the authorizing committees in Congress. These mandatory proposals address a range of Administration priorities, from investing in high-priority conservation and recreation programs to achieving a fair return to the American taxpayer from the sale of Federal resources and reducing unnecessary spending. The 2015 budget includes four DOI mandatory spending proposals, of which the largest is the Administration's proposal to provide full mandatory funding for DOI and USDA Land and Water Conservation Fund programs. In total, estimated outlays for these DOI spending proposals total \$9.9 billion over the next decade. This spending is partially offset by DOI revenue and savings proposals that are estimated to reduce outlays from the Treasury by roughly \$2.7 billion over the next decade.

The President's Budget includes a variety of other revenue and savings proposals that could be used to offset the cost of providing full mandatory funding for LWCF. The Administration looks forward to working with Congress on the details of legislation that would advance our LWCF proposal, including the necessary offsets for this new spending.

Consequences of Not Providing Permanent Funding

- Uncertainty about annual discretionary appropriations makes it more difficult for the agencies—and local and State partners – to engage in the multi-year planning that landscape conservation and effective collaboration with local communities requires.

Land available for acquisition from willing sellers far outstrips available LWCF funding, leaving many landowners, who wish to sell their properties to the government for the public's enjoyment, in limbo, sometimes for years.

- The lack of certainty and irregularity of annually appropriated funding also impacts the partner groups that work with agencies. The chronic uncertainty and funding LWCF at less than the fully authorized level has made it increasingly challenging for Federal, State and local managers to use this tool to deal with the development threats facing the lands and waters that provide communities with recreational access and preserve our history.
- The Administration proposes to address these challenges by pursuing full and mandatory funding for LWCF programs. Mandatory funding would increase financial certainty needed to build local and community partnerships in conservation and optimize valuable investments by leveraging other Federal and non-Federal funds. Ramping up to reaching the fully authorized level in mandatory funding beginning in 2016, as we propose in the President's Budget, also provides an opportunity to enhance existing administrative structures to maximize transparency, efficiency and effectiveness.
- Mandatory funding will also finally achieve the original intent of the LWCF Act: to dedicate a meaningful portion (\$900 million) of the royalties private companies pay to access the Nation's offshore oil and gas reserves to preserving the Nation's lands and waters for the benefit of all Americans and future generations.

Energy Exploration & Development

Last month, DOI released the final Programmatic Environmental Impact Statement, or "PEIS", for the Atlantic Outer Continental Shelf which is an important step in the determination of whether to open up new areas of the Atlantic OCS to oil and natural gas exploration. This release has been a long time in the making, and it is a vital next step.

Calvert Q30: Since this is your first budget hearing before our subcommittee, can you speak to your vision for additional energy exploration and development. I think we all agree that it's important to "get it right" but what are your goals for accessing known oil and gas reserves and for additional expansion and energy independence?

Answer: The Outer Continental Shelf (OCS) Lands Act, the National Environmental Policy Act, and other applicable laws set forth the careful process we follow in scheduling lease sales that will meet national energy needs in an environmentally responsible manner. The 2012-2017 Five Year Program supports the Administration's efforts to expand safe and responsible domestic oil and natural gas production as part of a comprehensive national energy policy.

The 2012-2017 Five Year Program includes 15 potential lease sales in six OCS planning areas – the Western and Central Gulf of Mexico (GOM), the portion of the Eastern GOM not currently under Congressional moratorium, and the Chukchi Sea, Beaufort Sea, and Cook Inlet planning areas offshore Alaska. These planning areas include the richest and most promising areas for oil and gas exploration and development on the OCS, and together they include more than 75 percent of the total undiscovered, technically recoverable oil and natural gas resources estimated

for the entire OCS.

Since approval of the Five Year Program, BOEM has held five lease sales. The first three lease sales in the Central and Western GOM resulted in over \$1.4 billion in accepted bonus bid revenue on over 2.6 million leased acres. The most recent two sales in the Central and Eastern GOM, held on March 19, 2014, resulted in an additional \$850 million in high bonus bids on 1.7 million acres, which are now undergoing review to ensure fair value for the American people prior to award of those leases.

BOEM will initiate the planning process for developing the next Five Year Program, for 2017-2022, this summer. The first steps in developing the next Program will be publishing a Request for Information and holding public scoping meetings. This will initiate the process of deciding how, when and where it is appropriate to offer oil and gas leases on the OCS. It is a detailed, carefully executed, and public process that is based on sound scientific analysis. A key part of safe and responsible development of our offshore oil and gas resources is tailoring consideration of leasing to specific regions and environments, engaging with States and local communities as well as industry, NGOs and other stakeholders, and addressing potential conflicts.

The energy policy outlined by the Administration includes support for conventional energy resources including exploration and development in the Arctic. It's an area rich with potential.

Calvert Q31: The energy policy outlined by the Administration includes support for conventional energy resources including exploration and development in the Arctic. It's an area rich with potential.

What specific actions has the Department taken to streamline Arctic energy development? Given the very short drilling season in the Arctic (approximately three months) and increased funding by industry to develop Arctic oil and gas resources, has any consideration been given to extending the terms of leases from 10 to 15 -- or 20 -- years?

Answer: The Department is committed to supporting safe and responsible offshore oil and gas exploration in the Arctic. The Arctic holds substantial oil and gas potential, but also presents unique environmental and operational challenges. Offshore exploration in the Arctic must proceed in a way that is safe, prepared for the unique challenging Arctic environment, and respectful of the Alaska Native communities that depend on the ocean for subsistence. The Interagency Working Group on Coordination of Domestic Energy Development and Planning in Alaska, established by Executive Order in July 2011 and chaired by the Department's Deputy Secretary, has taken the lead in coordinating the permitting of energy projects across the relevant federal agencies, which will lead to greater efficiency in the regulatory process.

BOEM and BSEE are developing new rules to govern exploratory drilling on the Arctic OCS. This rulemaking is designed to ensure safe, effective, and responsible exploration of Arctic OCS oil and gas resources, while protecting the marine, coastal, and human environments, and Alaska Natives' cultural traditions and access to subsistence resources. The new rules are expected to codify and further develop key standards for operating offshore on the Arctic OCS.

The Outer Continental Shelf Lands Act limits an oil and gas lease to an initial lease period not to exceed 10 years, and as long after such initial period as oil or gas is produced from the area in paying quantities, or drilling or well reworking operations are occurring. The initial lease period is a key component for ensuring that companies diligently develop their leases. Under appropriate circumstances defined by regulation, a lessee may qualify to have the expiration of a lease suspended beyond the original lease period.

U.S. Geological Survey (USGS)

The USGS provides research and scientific information to support the mission of the Department of the Interior and its science requirements. The USGS also works in collaboration with other Federal, State, and tribal cooperators to conduct research and provide scientific data and information concerning natural hazards and environmental issues. The USGS budget continues critical science programs that generate relevant, objective information for natural resource managers and for communities throughout the Nation. It also engages in partnerships with universities, research institutions, and major public and private laboratories.

The FY 2014 Omnibus bill included language supporting USGS' efforts to continue developing an earthquake early warning prototype system on the West Coast. The UC Berkeley Seismological Laboratory, the California Institute of Technology, and the University of Washington, funded by the USGS and a grant from the Gordon and Betty Moore Foundation, have been developing an earthquake early warning system since 2005.

Calvert Q32: What is the current status of this earthquake early warning system? Where are we after nine years of development?

Answer: Since January of 2012, a demonstration version of the earthquake early warning system, called *ShakeAlert*, has been sending test notifications to a small number of test users, including California emergency response organizations, utility providers, rail operators and a number of private companies. The demonstration system has successfully sent notifications for hundreds of quakes in California. Recently it proved itself by sending alerts in less than 5 seconds for the earthquakes in Encino (M4.4) and La Habra (M5.1). However, before public warnings can be issued, the system must meet quality, speed and reliability standards. The USGS completed a cost estimate and an implementation plan for a West Coast public warning system for use by Federal, State, and local governments and private entities that may wish to move forward with such a system.

Calvert Q33: How much funding has USGS contributed on an annual basis to the earthquake early warning system? What level of funding is in the base budget?

Answer: USGS began funding earthquake early warning (EEW) research and system development in 2003. Since this time, the annual base funding amount has varied considerably, with the USGS contributing a total of nearly \$10 million in base funds since 2003, or an average of \$1.0 million per year. This funding total includes \$3.67 million to support EEW R&D activities at universities and \$1.75 million through the USGS Multi-hazards project. Base funds were augmented with \$4.4 million in American Recovery and Reinvestment Act (ARRA)

funding which was used to upgrade antiquated earthquake sensor equipment on the West Coast between 2009 and 2011 to support EEW. The 2014 Omnibus appropriation provided \$850,000 for earthquake early warning development, which increased the base budget for EEW in 2014 to \$1.45 million. These totals do not include an additional \$600,000 in funding provided to the USGS between 2012 and 2014 by the Gordon and Betty Moore Foundation for coordination of university R&D efforts contributing to EEW; this funding will end in late 2014. The budget request for EEW in 2015 is \$1.45 million.

Calvert Q34: What more is needed, in terms of research, testing and/or funding, in order to move from the developmental phase to the operational phase?

Answer: The system has several components. To provide fast and reliable alerts for the West Coast, EEW plans call for adding 400 sensors to the Advanced National Seismic System in California and 250 in Washington and Oregon. Data communications from those sensors to processing centers must be upgraded to survive large damaging quakes and power failures. The processing center computers and software were developed in an academic R&D setting and must be engineered, implemented, and tested for fail-safe, public-facing operation. Finally, reliable delivery of alert messages via all available paths, both public and private, must be established and tested. These components can be completed within three to five years at a cost of \$16 million per year.

Calvert Q35: Do you have any estimates on what it would cost to fully fund a public earthquake early warning system for the West Coast, operating the system continuously on a 24-hour, seven day a week basis?

Answer: According to the USGS implementation plan for earthquake early warning, the cost to construct and operate a fully implemented system on the West Coast is estimated to be \$16 million per year.

Calvert Q36: Realizing that earthquakes take place all across the country, not just on the West Coast, what would it cost to operate a nation-wide earthquake early warning system?

Answer: FEMA has estimated that three-quarters of the national earthquake risk is on the West Coast. A strategy to extend EEW to the entire U.S. would need to evaluate the cost/benefit in lower risk areas, and focus first on those population centers with highest risk; which include New York City, Salt Lake City/Provo, Anchorage, San Juan PR, Memphis, St. Louis, Boston and Washington, D.C. This cost estimate has not yet been made. All of the development work for a West Coast system is transferrable at minimal cost to the ANSS regional seismic networks that now provides enhanced reporting of earthquakes in the intermountain west and the central and eastern U.S.

Calvert Q37: Grant funding from the Gordon and Betty Moore Foundation will not last forever, so has USGS investigated other potential partnerships with private organizations or industries that might be helpful in bringing the earthquake early warning system to the general public?

Answer: Moore Foundation funding to the universities for EEW research ends in late 2014 and

will not be renewed. The USGS already partners with many organizations, both public and private, to monitor earthquakes; e.g. utility providers, transit companies, telecommunication companies, and equipment manufacturers. Interest in EEW is opening new opportunities for public/private partnerships.

Based on the experience of the Japanese system, we anticipate the private sector will play a significant role in distributing alerts to the public. USGS and its university partners are working to establish partnerships with mass notification, telecommunications, social media, and other companies to maximize alert distribution and create new business opportunities based on EEW technology.

Calvert Q38: Within the Climate and Land Use Change mission area, there is a \$17.1 million increase for FY 2015, of which, \$3 million is requested for drought impacts and adaptive management. You know of my great concern about drought in California, so I'm eager to hear more about what type of actionable scientific research USGS is conducting in this area.

Can you explain in some detail the work being done with regard to drought impacts and adaptive management. How specifically would this proposed \$3 million be used?

Answer: The USGS would use the proposed \$3.0 million to develop a science-based decision process for understanding and managing the impacts of drought on various parts of the Central and Western United States, including California. Much research is available on the effects of drought on human systems, notably agriculture, but the ecological effects are not as well studied. As research continues to indicate that the future will hold more and longer droughts, it is critical to understand thresholds and tipping points and provide managers with early action options. USGS scientists are just now starting to understand how multi-year drought impacts ecosystems and associated services. There are potential surprises with possible wholesale changes to major ecosystems and managers have little information to prepare for it due to lack of data and lack of ecological definition. The USGS's goal is to use one or two drought stricken regions as examples to understand the impacts and then develop a decisionmaking process for managing limited water supplies in places like central California and/or the South Central United States. The USGS would develop working groups, consisting of USGS scientists, partners, and regional stakeholder networks from places impacted by drought to identify the science needs. Scientists attached to these working groups will develop models that integrate the social and economic impacts from drought and the USGS will use our visualization facility (located in the Fort Collins Science Center) to allow the working groups to work through scenarios using different decision points. Results from this project would provide actionable information on the likely ecological impacts from drought, create a tool or process to address competing concerns, and inform resource managers' decisionmaking. By focusing on the ecological impacts of drought, this project complements ongoing activities focused on water availability/supply and the agricultural and municipal effects of drought such as those under the National Integrated Drought Information Systems, U.S. Bureau of Reclamation basin studies, and other partners.

National Park Service Centennial

The National Park Service marks its 100th anniversary, or centennial, in 2016. I understand that a national celebration of what historical filmmaker Ken Burns described as “America’s best idea” is now in the early stages of development. The subcommittee will have a more in-depth conversation about the Centennial Initiative with Director Jarvis at the Park Service hearing next week. I understand that your budget request proposes a multi-dimensional approach to funding the Centennial Initiative, with \$40 million in discretionary funding requested from our subcommittee and additional funds requested through legislative proposals before the authorizing committees of jurisdiction.

Calvert Q39: Can you provide us with a brief description of the Centennial Initiative—how the proposed funds would be used, the Department’s plans to leverage Federal funding with non-Federal partners, and your overall specific goals for this 100th anniversary celebration?

Answer: The President’s request includes a discretionary increase of \$40.0 million to prepare for and celebrate the Centennial, comprised of \$30.0 million for operations to support an expected influx of visitors and volunteers during the 2016 Centennial celebrations and to provide a stronger foundation for visitor services and infrastructure investments in its second century of preserving the parks for on-going usage and the future enjoyment of visitors. Of the \$30.0 million increase for operations, \$4.0 million would support 21st Century Conservation Service Corps youth work opportunities to educate and engage the next generation; \$2.0 million would support volunteer opportunities for young people to expand the capacity of the NPS to manage volunteers in parks; \$8.0 million in competitively managed funds would support enhanced visitor services in the areas of interpretation and education, law enforcement and protection, and facility operations; and \$16.0 million would support improvement in the condition of high-priority park assets, such as visitor use facilities, historic structures, and trails. Across these Centennial increases, the budget provides an \$8.0 million increase for youth engagement and employment opportunities, and continues the NPS’ efforts to attract qualified veteran candidates to fill Federal positions.

Also, \$10.0 million of the \$40.0 million discretionary request is for the Centennial Challenge program, which would leverage federal funds with partner donations for signature projects and programs at national parks. Preference would be given to projects that have a clear and immediate visitor benefit as well as a higher partner match. The Challenge will require at least a one for one match from non-federal entities, with some projects leveraging more. This proposal reinvigorates the Centennial Challenge program, which received federal funds of \$39.6 million between FY 2008 and FY 2010; the NPS leveraged those federal funds into more than \$48.9 million in private donations, for a total benefit of \$88.4 million.

Additionally, the Centennial Initiative includes a legislative proposal for mandatory funding of \$400.0 million a year for three years, including \$100.0 million a year for three years for Centennial Challenge projects to engage partners in leveraging Federal funds, \$200.0 million a year for three years to support Second Century Infrastructure Investment projects which would make a meaningful and lasting impact on the NPS’ deferred maintenance backlog by restoring priority park assets to good condition, and \$100.0 million a year for three years to support a

multi-agency competitive Centennial Land Management Investment Fund. Multi-agency funding will be awarded competitively to Interior's public lands bureaus and the U.S. Forest service for conservation and maintenance projects.

The Administration's proposal for the government-wide Opportunity, Growth, and Security Initiative supports the Centennial Initiative, proposing an additional \$100.0 million for the Second Century Infrastructure Investment, and \$100.0 million for the multi-agency Centennial Land Management Investment Fund.

The NPS Centennial Initiative, including funding proposed through discretionary appropriations, the mandatory proposal, and the President's Opportunity, Growth, and Security Initiative, will allow NPS to restore 1,700 or 20 percent of priority park assets to good condition. The effort will create thousands of jobs for youth, veterans, and others on projects to upgrade and restore national parks, will provide more than 10,000 work and training opportunities for young people, and will engage more than 265,000 volunteers in support of public lands.

The NPS also is engaging in a broad public campaign to reintroduce national parks and the work of the NPS to a new generation of Americans, supported by private funds from the National Park Foundation (NPF), the official nonprofit partner of the National Park Service. The two-year effort will begin in 2015 and run throughout the National Park Service's 100th anniversary year in 2016. Plans for the campaign, entitled "Find Your Park," are underway in collaboration with the NPF.

The National Park Service and the National Park Foundation will team up with partners to produce programs, events, and activities that will drive broad awareness, deepen engagement, and increase support for America's national parks, the work of the National Park Service, and its partners. In addition to making all 401 national parks go-to destinations, the campaign will highlight the historic preservation and outdoor recreation work the National Park Service does with communities across the country and the value it brings to Americans every day.

Calvert Q40: I appreciate that the president's proposed operations investment for National Parks includes covers fixed costs, and that the appropriated portion of the request includes a matching Centennial Challenge program that can leverage private dollars. But I'm also concerned about the deferred maintenance backlog which continues to grow each year. While the budget request includes a significant investment to address the maintenance backlog, it requires legislation in the authorizing committees of jurisdiction.

When will the administration be submitting its proposed legislation addressing the maintenance backlog to Congress?

Answer: We are working on the proposal and look forward to working with Congress on the Centennial Initiative.

Calvert Q41: Can you give me some specific examples of how the National Park operations shortfall has been impacting resource protection and visitor services?

Answer: The fundamental purpose of the National Park Service is to conserve park resources while providing a safe and enjoyable visitor experience for present and future generations. While every effort is made to provide the best possible care for America's unique resources and the best possible safety, convenience, and opportunity to millions of national park visitors, fiscal realities in 2013 required the NPS to employ various strategies to operate within constrained budgets. Many parks reduced operating hours and limited use of certain areas, such as campgrounds and facilities during times of lower visitation, decreased the level of interpretation and education services provided, and deferred maintenance projects, further contributing to the backlog. Additionally, parks reduced the number of seasonal employees that are historically hired during peak visitation season. Reductions in seasonal hiring affect the frequency that NPS rangers are able to make contact with visitors, give general park information, maintain grounds and high-use facilities such as restrooms, and many other duties. The 2014 appropriation and the 2015 request allow park operations to operate more efficiently. The NPS remains dedicated to its mission, and will continue to prioritize the protection of America's natural and cultural resources and the safety of the millions of visitors seeking to enjoy them.

Stream Buffer Zone Rule

In February, the US DC District Court struck down the 2008 stream buffer zone rule on a technical point that the Office of Surface Mining failed to sufficiently consult with the Fish and Wildlife Service on impacts to endangered species.

Calvert Q42: Does the Department agree with the court's ruling that the Office of Surface Mining failed to properly consult with the Fish and Wildlife Service?

Answer: I understand that the Department does not agree with the court's ruling that the Office of Surface Mining Reclamation and Enforcement (OSMRE) failed to properly consult with the Fish and Wildlife Service.

Calvert Q43: To develop the 2008 rule, the Office of Surface Mining relied upon the Fish and Wildlife's biological determination from 1996. The court did not strike down the 1996 determination. Rather the court stated that it was 'arbitrary and capricious' for the Office of Surface Mining to assume that the 1996 determination was protective absent interagency consultations.

Does the Department feel that the Fish and Wildlife Service's 1996 determination is flawed or inadequate? If so, please explain.

Answer: No. The 1996 Biological Opinion only applies to the review and approval of individual coal mine permit applications. The Opinion does not apply to the other federal actions, such as rulemakings.

Consequently, for the actions it covers, the Opinion adequately protects not only threatened and endangered species listed at the time of signature in 1996, but it also protects species listed after the date of signature and species that may be listed in the future. Moreover, it creates an efficient

process. There is no need to reinitiate consultation for the actions covered by the Opinion, nor would there be any benefit from doing so.

Calvert Q44: If OSM were to consult the Fish and Wildlife Service in a manner that would meet the procedural deficiencies identified by the court, would the 1996 determination continue to serve as the basis for a rule? Could OSM reissue the 2008 rule after checking the appropriate interagency procedural boxes?

Answer: To be clear, the 1996 Biological Opinion applies only to the review and approval of coal mining permit applications under State and Federal regulatory programs adopted pursuant to SMCRA. The Opinion does not apply to rulemaking or any other actions under SMCRA. As a result, the Office of Surface Mining Reclamation and Enforcement (OSMRE) must initiate consultation with the Fish and Wildlife Service (FWS) under Section 7 of the Endangered Species Act (ESA) for any new rule that may affect threatened and endangered species or critical habitat. The 1996 Biological Opinion is not to be used for rulemakings.

Reissuance of the 2008 Stream Buffer Zone (SBZ) Rule would require a new rulemaking effort, which would include the publication of a proposed rule and the receipt and evaluation of public comments. Such a new rulemaking effort would also include, but is not limited to, the appropriate consultation with the FWS and concurrence from the Environmental Protection Agency. In addition, because of the time that has passed since 2008, OSMRE would need to update its National Environmental Policy Act (NEPA) documents to reflect the current environmental and socioeconomic impacts and determine whether changes in the energy market over the last six years would necessitate the preparation of a Regulatory Impact Analysis.

While some may categorize these steps as procedural, substantive changes to the 2008 SBZ Rule may result from the updated analysis. For example, the consultation process under Section 7 of the ESA is more than a matter of checking procedural boxes. It requires consideration of the effects of the proposed action, the 2008 SBZ Rule, on threatened and endangered species and designated critical habitats. Depending on the nature of those effects, it may be necessary to modify the 2008 SBZ Rule to avoid or minimize adverse effects. Likewise, the updated NEPA analysis, regulatory impact analysis, or comments received from the public that would be received during a new rulemaking process may necessitate changes to what was proposed in 2008.

Calvert Q45: How does the Court decision impact OSM's work to re-write the 2008 rule?

Answer: OSMRE continues to develop its draft proposed Stream Protection Rule (SPR) and preamble. OSMRE will review and revise, as necessary, to reflect the Court's decision. In addition, all supporting documents related to the SPR, including the Draft Environmental Impact Statement (DEIS) and the Regulatory Impact Analysis, will be reviewed and revised as necessary to conform with the Court's decision. Specifically, because the Court vacated the 2008 SBZ Rule and reinstated the pre-2008 regulations, OSMRE will need to ensure that the alternatives analyzed in the DEIS, including the no action alternative, and, ultimately, the proposed rule reflect this change. OSMRE is working collaboratively with its contractor to ensure these changes are properly incorporated into the environmental and socioeconomic effects analysis of

the DEIS and other supporting documents.

Prior to the Court's ruling, OSMRE had made the decision that it would initiate consultation with the FWS pursuant to Section 7 of the ESA. The Court's ruling has not changed this decision.

American Indian Education

Madam Secretary, you testified last year before the Senate Indian Affairs Committee that "Indian Education is an embarrassment." This subcommittee was encouraged by that statement because we felt we had a partner leading Interior who was as committed to this issue as we are.

Calvert Q46: Please tell us specifically how your FY15 budget begins to turn the Indian Education system around. How are you going to measure success during your tenure?

Answer: I have collaborated with the Secretary of Education, Arne Duncan, in establishing an American Indian Education Study Group to visit schools, classrooms, Tribal Governments, and Indian Affairs employees to hear their concerns and look at ways to improve American Indian Education. The Study Group is charged with looking at improvements to the classroom and the learning environment for students attending BIE-funded school facilities. Foundational issues the group is evaluating include the creation of a relevant curriculum; the need for retention and recruitment of effective teachers; the application of appropriate teaching practices; and addressing the student achievement gap.

The Group has traveled the Country to listen to BIE and tribal school employees, parents, students, and Tribal leaders directly impacted by the BIE system. The Group, with the support of Tribal leaders, has encouraged a dialogue which supports tribal sovereignty. It is necessary to provide appropriate oversight to shape the education provided to students attending BIE-funded schools. This allows Tribes greater local control and flexibility in delivering educational programs for their children. The group will conduct official tribal consultations to gather tribal views and input on recommendations for improving educational outcomes in schools. The Agency will then start to work to implement the consensus recommendations as determined through tribal consultation.

My measures of success will be in providing a learning environment that facilitates Indian student achievement attending classes in BIE-funded schools, the students attending these schools graduate, and they are prepared to start careers or are accepted in college to earn a higher education degree. The Administration is committed to ensuring Indian communities benefit from academically rigorous, culturally appropriate education that will prepare them to be productive citizens and leaders in their communities and help build safer, stronger, healthier, and more prosperous Indian communities and economies.

Calvert Q47: As you know, there are only two federal school systems in the nation: one for American Indian children, and one for military children. Both systems contain more than 60 schools in poor condition or worse. However, whereas the Department of Defense is in the middle of a five-year, \$3.7 billion effort to replace their schools, Interior, for four years in a row now, has proposed not to start any school replacement projects and funding for school

maintenance remains essentially flat.

When will we see Interior prioritize Indian schools and propose investments in these Indian children and their families the way DoD has?

Answer: Since 2000, BIA has spent over \$2.4 billion, including \$300 million in American Recovery and Reinvestment Act funding, on school construction, improvement, and repair. In that time, BIA has completed or has under-construction 42 school replacements and 62 major renovations of BIE facilities. There are three schools on the BIE school replacement list that await funding. The FY 15 budget includes \$3.2 million for site development at the Beatrice Rafferty School in Maine after receiving \$1.0 million in FY 14 for planning and design. The two remaining schools on the list are the Little Singer Community School and the Cove Day School, both located in Arizona.

A new prioritized list of schools for replacement or renovation will be established after the conclusion of validation of the inventory and deferred maintenance needs for all 182 school campuses serving 183 BIE-funded schools, anticipated to be completed end of FY 2014. A listing of schools eligible to apply for the New School Replacement and Renovation Program is scheduled to be established by December 2014. Schools are eligible to be ranked for replacement or renovation if the school has an overall ranking of "poor" and/or are both 50 years old or older and educating 75 percent or more of students in portables as identified in the BIA facilities database. Eligibility is also based on criteria such as crowding, declining or constrained enrollment associated with facilities in "poor" condition, inappropriate education space, accreditation risk, and cultural space need, data which would be provided by the schools. Once designated as eligible, a school must make an application for replacement or renovation to be included in the prioritization process. A timeline for the next steps after December 2014 has not been determined at this time. During this process, schools will continue to receive Operations and Maintenance funding as well as Minor Improvement and Repair funding, based on established processes.

Calvert Q48: I know that you personally are interested in investing in America's youth and there are aspects of your budget request that reflect this priority. However, when it comes to investing in Native American youth, particularly with regard to education, I believe the Administration's budget request falls far short.

Is it right to spend \$50 million to encourage children to get outside and pursue careers in science and conservation, as your budget proposes, while denying some of those same children a safe environment to learn basic reading, writing, and arithmetic?

Answer: One of the key priorities for this administration is the engagement of the public in Interior's mission, particularly America's young people. The future of the public lands depends upon young people becoming active stewards of the environment throughout their lives. Interior has a unique opportunity to harness the strong spirit of community service and volunteerism alive within the Nation's youth, and encourage them to use their time, energy, and talent to enjoy and conserve natural and cultural treasures.

When we spark a fire of passion for the outdoors in our children, we give them a lifelong gift of being able to enjoy nature and live healthier lives. We also lay the foundation for the next generation of conservationists, scientists, business leaders, teachers, and beyond that will understand the key role that national parks and public lands play in local communities, drawing visitors and boosting the economy.

The Administration is also committed to ensuring that Native American youth who attend Bureau of Indian Education-funded schools benefit from academically rigorous, culturally appropriate education that will prepare Indian students to be successful citizens and future leaders in their communities and help build safer, stronger, healthier, and more prosperous Indian communities and economies. Improving education and literacy in tribal nations is essential to vitalizing community life, stimulating economic development, increasing employment opportunities, and improving standards of living for future generations of Native Americans. A thriving educational system for American Indian students is a critical component of the broader initiative to strengthen tribal communities.

Indian Affairs owns or provides funding for a significant inventory of buildings and other facilities across the Nation, including education facilities in Indian Country. Currently, Indian Affairs funds facility programs at academic and resident-only campuses that serve the 183 BIE-funded units. From 2002 through 2014, over \$2.0 billion, including \$300 million of funding made available in the American Recovery and Reinvestment Act, has been provided for construction, improvement, and repair projects that have reduced the number of schools in “poor condition” from more than 120 of the 183 schools to 63 today. Appropriations for education construction over the last 15 years has funded 42 complete school replacements and 62 major renovations, which are either completed, funded or under construction.

There are still BIE schools that need major improvement and repair and many that need complete replacement. The budget supports progress in completing the 2004 Replacement School Construction priority list, on which three schools remain. The 2015 budget proposes \$55.5 million for education facility construction including \$3.2 million to fund site development at the Beatrice Rafferty School for which design funding was provided in the 2014 budget, and \$52.3 million for facilities improvement and repair projects at education facilities and school employee housing.

Wildlife Trafficking / Ivory

Without exception we are all alarmed by the rapid increase in wildlife trafficking—in particular elephant ivory. In fact, this subcommittee recently increased funding for overseas efforts to stop it. Recently the Fish and Wildlife Service proposed a ban on all U.S. commercial trade of ivory—including ivory that has been in the lawful possession of U.S. citizens for generations. There are those who feel that banning the trade of ivory already in the U.S. amounts to an unlawful taking and will only increase demand for ivory on the black market.

Calvert Q49: Why do you feel that banning all U.S. commercial trade of ivory will save elephants?

Answer: The U.S. is one of the world's largest retail markets for products with elephant ivory with a large and generally unregulated domestic trade. A substantial amount of elephant ivory is illegally imported and enters the domestic market. It is extremely difficult to differentiate legally acquired ivory from ivory derived from elephant poaching. Our criminal investigations and anti-smuggling efforts have clearly shown that legal ivory trade can serve as a cover for illegal trade. As just one example, Service and State officers seized one ton of illegal elephant ivory from two New York City retail stores in 2012.

By imposing a near total ban on the domestic ivory trade, FWS can more effectively address the ongoing U.S. role in this trade. In addition, these actions better position the U.S. to work with other key ivory consumer countries to more strictly control other markets. These actions are just one component in the broader national strategy for combating wildlife trafficking. That strategy also includes working with the international community to protect wildlife populations; increased, coordinated law enforcement activity focused on the criminal syndicates that are increasingly responsible for wildlife trafficking around the world; and efforts to educate the public and reduce demand for ivory and other illegal wildlife products in consumer countries.

Questions from Mr. Joyce

LWCF and O&M Costs

Madame Secretary, I agree with you that the Land and Water Conservation Fund is essential to providing critical recreational access and sustaining the economies and the character of our communities. LWCF greatly benefits my home state, including the Cuyahoga Valley National Park which is located in my northeast Ohio district.

I support robust funding for LWCF, but am concerned that we continue to hear the argument that securing more conservation land would add unduly to federal land management and maintenance costs. A major share of LWCF goes to state and local grants programs, with the remainder being used for federal land easements that don't require additional management expenses.

Joyce Q1: Can you please provide us with a fuller understanding of the ways that land conservation through LWCF improves management and reduces operating expenses, including specific project examples where LWCF spending has reduced O&M costs, as well as the broader positive impacts of LWCF on O&M budgets?

Answer: The Department of the Interior LWCF programs work in cooperation with local communities, rely on willing sellers, and maximize opportunities to partner with private landowners on conservation easements where conservation and management objectives can be achieved without fee-simple acquisition. Proposed Federal land acquisition projects are developed with the support of local landowners, elected officials, and community groups. Acquisition of inholdings does not generally require additional operating costs as no new staff or equipment are required to manage new lands within existing boundaries. Occasionally, agencies may incur up-front costs to remove existing improvements (fences, buildings, etc.) from an acquired property. By removing unwanted structures on newly acquired land, agencies avoid adding to ongoing O&M requirements.

In fact, acquisition of inholdings can greatly simplify land management for federal managers and neighboring landowners. Eliminating checkerboard ownership within federal units simplifies nearly every aspect of land management:

- Wildland fire managers can apply appropriate fuels reduction, planned burns, and fire suppression treatments more easily across an unfragmented landscape; fire management is more challenging and costly when private inholdings and developed properties are intermixed with federally-managed forests and public lands.
- Law enforcement and public safety personnel can more easily patrol and respond to emergencies when public ownership is consolidated. An unfragmented unit allows unified signage, road networks, and other infrastructure that will best enable safe public access and allow for the efficient movement of emergency personnel and vehicles to locations frequented by visitors.
- Recreation managers can more easily provide access for the public to enjoy their public lands. In some cases checkerboard ownership can cause confusion among the public about acceptable land uses, and can restrict the public's ability to access some areas of public land.

- Natural resource management is simplified in an unfragmented landscape. When checkerboard ownership is eliminated, biologists, geologists and other natural resource professionals can move freely across the land that they are responsible for surveying, and natural resource management actions can be applied more efficiently across a landscape in single ownership.

Examples of enhanced management resulting from land acquisition:

St. Vincent National Wildlife Refuge (NWR)

St. Vincent NWR is an island off the panhandle coast of Florida in Apalachicola Bay, off the Gulf of Mexico. Acquisition of the 5-acre tract on the mainland of Apalachicola Bay provides permanent deep water mooring with launch site, secure parking and equipment storage. An important point is that dredging and channel maintenance are allowed in Apalachicola Bay, activities that are prohibited in other nearby areas. The lease at Indian Pass, the current deep water mooring and launch site, was ending and would not be renewed as the owners were looking to develop the mainland at the launch site. In addition, the upland portion of the leased Indian Pass site had been significantly reduced due to severe, continuing, and progressive erosion that the landowner failed to address.

As the refuge is only accessible by water, the new deep water mooring and launch site reduces staff travel time from the refuge office to transfer supplies and heavy equipment. Daily boat access for St. Vincent NWR staff is required 24/7 for all island management activities, such as sea turtle nest monitoring and protection, habitat management, prescribed burning, hunting and fishing management and protection, and response to visitor emergencies.

With the acquisition of the mainland deep water boat mooring and launch site, the Fish and Wildlife Service eliminates the annual \$12,000 lease and has significant savings in fuel for vehicles. Staff traveling to and from the work site and hauling equipment to Apalachicola Bay from the refuge office had to travel 20 miles to Indian Pass, then travel by watercraft to St. Vincent Island. At the end of each day, traveling was reversed back to the refuge office. Adequate parking for heavy equipment and vehicles is available at the new site.

Prior to the acquisition of the deep water mooring and launch site, the Service conducted a critical review and analysis of deep water mooring and access options in the general vicinity of the refuge. Only two or three options were possible, with the acquisition of the acquired site being the most cost effective and safest for staff. The other sites involved longer nautical travel distances at nine miles, were more costly as public boat launch sites, and did not offer the security needed for refuge equipment.

Yukon Flats NWR

The Service acquired five tracts totaling 480 acres within the Yukon Flats National Wildlife Refuge in Alaska. One tract contains prime river frontage along the Porcupine River with cliffs containing important nesting habitat for peregrine falcon. The other tracts contain frontage along Beaver Creek, Rock Slough, and the Black River. Most of these properties contain high quality wetland complexes and were isolated inholdings surrounded by Refuge land. Acquisition of

these parcels greatly benefits Refuge wildlife management and provides a cost savings to the government due to decreased fire management expenses.

San Joaquin NWR, CA

In 2006, the FWS acquired a 371-acre tract at San Joaquin NWR, including riparian water rights. Along with other acreage acquired within the Refuge, 2,700 acres have been restored to riparian woodland habitat. After three years, irrigations for the riparian restoration ceased. The land acquired was cropland that used approximately 24,000 acre-feet of water every year. With the land restored to riparian woodland habitat, the 24,000 acre-feet of water is not used for irrigation on the Refuge; the water stays in the San Joaquin River and benefits in-stream flow, aquatic species, and downstream users. The use of riparian water rights via lift pump on the Stanislaus River has saved the refuge approximately \$140,000 in the past seven years (\$20,000 annually). Previously, water was acquired by paying for expensive pumped well water.

A majority of the riparian habitat was lost over the past century to cropland. With the riparian forest rehabilitation within the Refuge, the riparian brush rabbit population has returned from the brink of extinction due to habitat loss and degradation.

Questions from Mr. Serrano

Urban Waters Federal Partnership

Your department is a lead agency for the Urban Waters Federal Partnership. Your predecessor came to the Harlem River in the Bronx to kick off the Urban Waters Federal Partnership several years ago. He said, and I agree with him, that reclaiming our urban waterways for the people couldn't be a more important use of our federal dollars and agency efforts. The reclaimed and restored Bronx River has been a transformative project in my community.

Serrano Q1: Would you please share how Interior is supporting--both in terms of staff and financial commitments--the Urban Waters Federal Partnership? Will Interior continue to be one of the four lead agencies on this effort?

Answer: The Urban Waters Federal Partnership (UWFP) initiative is an interagency effort to revitalize urban waters in communities where waterway revitalization is needed most. The goals of the initiative are to improve coordination among Federal agencies and collaboration with community-led revitalization partners to improve our Nation's water systems and promote their economic, environmental, and social benefits.

The Bronx and Harlem River Watersheds are one of these UWFP pilots, and the Department of the Interior continues to be the Federal lead. Recently, the Department identified David Russ, USGS Northeast Regional Director, as the Departmental lead on this effort. Dr. Russ is planning a site visit this spring.

The Bronx and Harlem Rivers pilot stands uniquely apart from the other UWFP pilots because it encompasses two disparate water bodies with two distinct constituencies. This adds to the complexity of implementing the initiative and to the challenges of responding to local needs and balancing resources between the two watersheds. The Department has been working closely with community groups, including the Bronx River Alliance and Harlem River Working Group, city and State agencies, and the Federal partners to identify funding and opportunities to target collaborative efforts toward restoring waterways and water quality, increasing public access, and creating parks and greenways along the rivers.

Bronx River

The effort to revitalize the Bronx River has been underway for over two decades. These efforts have been supported through significant Federal investments such as NPS' Rivers, Trails, and Conservation Assistance (RTCA) program via technical assistance as well as other Federal, State and city agencies' assistance for greenway construction, fish passage, stream restoration, and park creation. The Bronx River Alliance has been the coordinating force behind the success. They are a mature organization with the capacity to coordinate complex projects and partnerships. The Department has been able to work with their staff to identify opportunities they felt could benefit from a Federal partnership. For example, the Alliance's highest priority was dealing with an impasse between the New York State Department of Transportation (NYSDOT) and Amtrak on building a pedestrian overpass as part of the Bronx River Greenway. Through the UWFP, former Deputy Secretary David Hayes subsequently convened numerous

meetings between Amtrak and NYSDOT and great progress has been made. The two parties have worked to eliminate the obstacles and now work is underway to secure funding for the project. Planning, design, and permitting have been completed and the project is “shovel ready” pending the availability of funds. The NPS and partners are developing an application for a U.S. Department of Transportation TIGER grant for approximately \$12 million and the City of New York has committed \$12 million. Additionally, the Bronx River Alliance, with assistance from the NPS, developed a water trail for human powered boating that incorporates best management practices and design features that are an example for urban waterways. The Alliance also received Challenge Cost Share funding from NPS to expand their public canoe and kayak programming targeted at youth and their families. In recognition of these and many other efforts, Secretary Salazar designated the Bronx River Blueway as one of the first National Water Trails in 2012.

Harlem River

The effort to revitalize the Harlem River is an emerging effort and has not yet been the beneficiary of significant Federal investment. The Harlem River Working Group (HRWG), formed in 2009, is a coalition of approximately fifty organizations and is staffed by an all-volunteer staff. However, it does not yet have the same capacity to coordinate complex projects and partnerships as the Bronx River Alliance. The HRWG has identified its top three priorities as: developing a continuous waterfront greenway, increasing public access to the waterfront and out onto the river, and improving water quality in the river. The Department, through the USGS and NPS’ RTCA program, has been working with the HRWG on a number of projects to address those priorities. For example, the USGS contributed funding in 2012 to support the HRWG’s Watershed Protection and Partnership Action Plan and led the effort to collect, analyze, and report on available data of the current water quality status and condition of the Harlem River watershed. One of the activities engaging youth and the community included a partnership effort among the NPS, USGS, and Wilderness Inquiry where these three entities participated in an educational event on water quality during Harlem River Week in both October 2012 and 2013 which attracted hundreds of children and their teachers.

Urban Park & Recreation Recovery

Urban Park & Recreation Recovery was a very important tool that ceased to be funded in 2002. The Obama Administration has again asked for funding for the UPARR program – in the amount of \$25 million for FY2015. Within the budget justification it says: “This proposal is also part of a broader, renewed focus by Interior to develop strategies to improve the integration of agency programs and park units to impact urban economies and the quality of life for urban residents through expanding opportunities for all.” As a Member from a very urban district, this is a very important initiative.

Serrano Q2: Could elaborate for the committee your department’s vision for urban parks and green spaces beyond what is in the budget justifications, and how this proposal would further that goal. Please detail staffing levels and criteria for distribution of resources.

Answer: Today, roughly 250 million Americans live in or near cities, and U.S. metropolitan areas are projected to grow in population by 32 percent or nearly 84 million people over the next three decades. Increasing urbanization has left millions of people without easy access to open spaces. As part of the America's Great Outdoors initiative, Interior is focusing on two major goals; creating easily accessible outdoor areas in urban settings, and restoring natural systems and greenspaces in cities.

Interior is embarking on an internal effort to inventory all of its programs, projects, and funding opportunities that are already or may impact metropolitan areas. As part of that process, Interior also is seeking to identify best practices in supporting urban recreation and greenspace preservation. For example, Interior is a signatory to the Urban Waters Federal Partnership, which is working in 19 pilot cities across the country to restore urban rivers and the communities that surround them. A major emphasis of the partnership is to ensure communities are connected to their urban rivers through a network of trails, parks and greenspace. Through this partnership, Interior and 13 other Federal agencies are working to align and better leverage resources to meet these community priorities.

With regard to the President's budget request, urban programs will significantly benefit from the Administration's proposal for \$900.0 million in discretionary and mandatory funding for the Land and Water Conservation Fund in FY 2015, building toward permanently authorizing \$900.0 million in annual funding for LWCF programs beginning in FY 2016.

The FY 2015 budget request for NPS highlights several requests that support the Department's vision for urban parks and green spaces. The \$25.0 million in mandatory authority requested for the NPS Urban Park Recreation and Recovery (UPARR) program via the LWCF proposal would revitalize a program that has not been funded since 2002, and would support 40-50 projects to improve existing recreational opportunities in economically distressed urban communities in 2015. Grants are intended to rehabilitate indoor and outdoor recreation facilities; demonstrate innovative ways to enhance park and recreation opportunities; and develop local Recovery Action Program Plans to identify needs, priorities, and strategies for revitalization of the total recreation system. Requests from eligible communities for grant funding would be rated by a national panel using established criteria that consider factors such as project cost and leveraging; the affected community; existing condition of an anticipated improvements in recreation services; new employment opportunities created; community and partner involvement; and long-term commitment to the projects. The administration of this program will require an estimated five full time equivalent positions.

The NPS LWCF State Conservation Grants program complements the UPARR program. The State Conservation Grants program uses funds to help bolster States' capacity to leverage other Federal and non-Federal investments in land and water conservation. Funds are also used for acquisition and development of the highest priority lands and waters for conservation and recreation purposes. This program directly supports partnerships with State and local agencies through grant funds for projects that help create and protect a nationwide system of parks, open space, rivers and trails. The FY 2015 budget requests \$48.1 million in discretionary funds for this program, level with 2014. Of this amount, \$3.1 million is to administer the program, \$42.0 million is to be awarded via the traditional formula allocation which is based on the LWCF Act

itself, and \$3.0 million is for competitive grants, which could include grants to enhance recreation in urban areas. In 2015, the program will require an estimated 24 full time equivalent positions. The competitive component will be administered in conjunction with our long-term State partners, and an evaluation panel will score and rank proposals. In addition, the mandatory LWCF proposal includes an additional \$52.0 million for the State Conservation Grants program in 2015.

Questions from Mr. Valadao

California Drought Crisis

Earlier this year, 2014 was on track to be the driest year on record, but some storms in February and March brought enough precipitation to make 2014 only the second driest ever, behind 1977. Unfortunately, those storms did almost nothing to help the farmers of the San Joaquin Valley. Most of the water from those storms – more than 700,000 acre-feet -- went to the sea because the U.S. Fish and Wildlife Service and the National Marine Fisheries Service insisted that the water was necessary to meet ESA requirements for the delta smelt and the salmon.

It seems fishery agencies are continuing to continue to adhere to delta outflow requirements that clearly are inappropriate for the current drought situation. I'm told by water managers in my district that somewhere between 200,000 and 450,000 acre feet of water that could have been pumped to farms and cities of the San Joaquin Valley without harm to the smelt or salmon had your department exercised the flexibility granted to it under ESA. Instead, it seems hundreds of thousands of acre-feet of water have been WASTED while farms and livelihoods in the San Joaquin Valley dry up.

Valadao Q1: Madam Secretary, I know you have talked with irrigation district managers and farmers in the Valley and know the pain many of my constituents are feeling right now. The ESA gives you and the Secretary of Commerce the power to apply the ESA with flexibility and common sense during a drought emergency like this. Why haven't you used that power to its fullest extent?

Answer: Reclamation has been engaging with both the U.S. Fish and Wildlife Service (FWS) and National Marine Fisheries Service (NMFS) to exercise flexibility to operate while maintaining compliance with the Biological Opinions (BiOps). Reclamation and California Department of Water Resources (DWR), via drought contingency planning efforts, modified operations as allowed within the BiOps and the State Water Resources Control Board (State Water Board) requirements to capture runoff from storm events in early 2014. On April 8, 2014, the 2014 Drought Operations Plan was transmitted to FWS and NMFS. The Plan describes the proposed drought response measures for April 2014 through November 15, 2014. The Plan is a result of collaboration and cooperation between DWR, Reclamation, FWS, NMFS, California Department of Fish and Wildlife (DFW), and the State Water Board. The agencies will continue to work together to operate in a manner that protects species while delivering as much water as possible to meet our customers' needs.

In FY 2015, Reclamation will use \$1.5 million to implement Drought Response and Comprehensive Drought Plans (Drought Response Program), a comprehensive new approach to drought planning and implementation actions to address water shortages. The new Drought Response Program will be based on a reformulation of the existing Drought Program. Funding for the Drought Response Program will be allocated through a competitive process using an empirical approach that emphasizes involvement from multiple stakeholders and the incorporation of climate change information.

Valadao Q2: At the time of this hearing, more rain is predicted for northern California this week. Will you use the power and implement the maximum flexibility ESA gives you to ensure that water isn't wasted from these storms too?

Answer: Senior technical staff from the 5 Federal and State agencies (NMFS, FWS, DFW, DWR, and Reclamation) worked together to develop the biological review of the overall 2014 Drought Operations Plan, released on April 8, 2014. Through these discussions, senior technical staff determined increasing exports to capture flow resulting from this storm event was consistent with the underlying analyses of the NMFS Biological Opinion and its reasonable and prudent alternatives.

San Joaquin River Restoration Settlement

Valadao Q3: I understand that some now estimate the San Joaquin River Restoration Program will now cost close to \$2 billion to complete. At the current rate of appropriations and obligations by the program, how long will it take to complete the needed channel improvements and other restoration activities? Does the program's current authorization meet its projected costs?

Answer: In June 2012, Reclamation completed the *Working Draft Framework for Implementation* for the Restoration Program. The June 2012 Framework provided an updated schedule and budget for the Program's core projects assuming funding would be available when the individual projects were ready for implementation. The Program's funding needs are identified in Table 1 of the June 2012 Framework, which is available on the Program's website: http://restoresjr.net/program_library/02-Program_Docs/20120619_SJRRP_Framework_for_ImplDRAFT.pdf. The core projects to achieve the goals of the Stipulation of Settlement in *NRDC, et al., v. Rodgers, et al.* will cost an estimated \$892 million.

Reclamation is currently working with the parties to the Settlement to revise the Framework to reflect an anticipated rate of future appropriations for the Program. This update is in progress and is anticipated to be completed this year. This revised Framework will address how long it will take to complete the needed channel improvements, other restoration activities, and water management actions at the current level of appropriations and an anticipated rate of future appropriations.

Based on the June 2012 Framework, the Program's current authorization will meet its projected costs.

Valadao Q4: In light of the substantial increases in projected costs, which are now almost 10 times the amount that proponents of the San Joaquin River Restoration Settlement estimated the project could be completed for, what do you see as the path for success for this program? How do you see the program achieving success under its current authorization?

Answer: As part of the June 2012 Framework, the parties to the Stipulation of Settlement in *NRDC, et al., v. Rodgers, et al.* identified a set of core activities that would achieve the goals of

the Settlement. The core projects are estimated to cost \$892 million. Achievement of these core activities is expected to result in a successful Restoration Program and meet the requirements and obligations of the Stipulation of Settlement in *NRDC, et al., v. Rodgers, et al.*, and Title X, Subtitle A of Public Law 111-11 (the San Joaquin River Restoration Settlement Act).

Valadao Q5: At the time the San Joaquin River Restoration program was developed, it was believed that the required channel improvement projects would be completed by 2014 and that there would be fish starting to migrate up and down the San Joaquin River. Currently, the channel improvements have not been completed and the fish aren't migrating. In fact, taxpayers are sending millions to truck salmon up and down the San Joaquin River. If the trap and haul program that is currently underway continues for the indefinite future, wouldn't that suggest that the Restoration plan isn't working? Is it time to take a second look at the financial and water costs associated with the project?

Answer: Continuation of the annual trap and haul program that is currently underway for the indefinite future would not be consistent with the Restoration Goal in the Stipulation of Settlement in *NRDC, et al., v. Rodgers, et al.*, that calls for naturally-reproducing and self-sustaining populations of salmon and other fish. As part of the revisions to the June 2012 Framework that are underway and will be completed this year, we will identify a target date for ending the current annual trap and haul program. However, we expect that some infrequent and limited trap and haul actions may be necessary in future very dry year conditions.

It should be noted that the dates in the Settlement were based on a series of assumptions that were agreed to by the parties to the Settlement. Some of the key assumptions, such as expeditious passage of the authorizing legislation and immediate access to lands, have taken longer than expected and delayed certain activities. In addition, Reclamation has taken a broad and inclusive approach to implementing the Settlement, working to engage both the parties to the Settlement, but also those potentially affected by the Settlement, including the downstream landowners and water districts. This more extensive outreach effort is intended to find creative solutions to implement the Settlement in a way that also considers the needs of landowners and water districts adjacent to the river. Overall, implementation was behind from the onset due to delays in the passage of legislation and approvals for land access and adjustments are and will continue to occur to provide for an open, transparent, and inclusive process.

Valadao Q6: When the San Joaquin River Restoration Program was developed, it was agreed there would be no involuntary impacts on third parties. In 2009, when California was going through its last drought, Regional Director Donald Glaser told the Exchange Contractors that Reclamation would honor the Exchange Contract by releasing water from Friant Dam ahead of making water available to the Restoration Program. Specifically, Director Glaser stated: "...[i]f. A situation were to occur where settlement flows conflicted with Reclamation making necessary deliveries under the contract with the Exchange Contractors, which as we discussed below is highly unlikely, Reclamation would make water available to meet the contractual requirements, consistent with the Contract."

On May 7, 2012, Reclamation filed its application to the State Water Resources Control Board to divert and release water for the Restoration Program and represented that there would be no

harm to the Exchange Contractors' water supply from the Restoration Program because, "Reclamation will ensure that sufficient Millerton Reservoir storage is maintained, and that available San Joaquin River channel capacity is not impeded by the presence of Interim or Restoration flows, in order to make releases of available storage from Millerton Reservoir in lieu of deliveries from the Delta Mendota Canal if such releases become necessary under the terms and conditions of the Exchange Contract and various water right and settlement adjustment contracts."

Do you agree that, if water is not available from the Delta or San Luis Reservoir, Reclamation must deliver San Joaquin River water to the Exchange Contractors ahead of the Restoration Program in order to avoid harm and remain consistent with the statements made by the Bureau of Reclamation in its 2009 letter and in the 2012 application to the Water Board? Has the Department's position changed in any way since it made those statements in 2009 and 2012?

Answer: Reclamation's position has not changed. Consistent with Public Law 111-11, Section 10004(j), nothing in the San Joaquin River Restoration Settlement Act modifies or amends the rights and obligations under the Purchase Contract between Miller and Lux and the United States and the Second Amended Exchange Contract between the United States and the Central California Irrigation District, San Luis Canal Company, Firebaugh Canal Water District, and Columbia Canal Company.

Energy Development

Valadao Q7: BLM has been criticized for the delays on permitting, sometimes taking up to a year to approve a permit to develop oil and gas resources on public lands. The average, according to GAO, is 229 days. I understand that you are now in the process of finalizing rules related to hydraulic fracturing, which many believe will cause even more delays. Why are these rules needed given that States already regulate hydraulic fracturing and are doing a good job at it? What is the problem your Department is trying to solve? How much more delay do you anticipate if these rules go into effect? What are you planning to do to prevent fracking rules from causing additional permitting delays?

Answer: The BLM is continuing to make improvements and streamline the permitting process. At the end of fiscal year 2013 there were 6,711 Applications for Permit to Drill (APD) that had been approved and not yet utilized by industry. The average APD approval time in 2013 was 194 days nationwide, down from 228 days in 2012. Approximately 50% of APD approval time is spent working with operators to ensure that their applications are complete, and 50% is attributable to BLM processing. To further improve APD processing time, the BLM is developing an automated permit system which will improve the flow of data and enable operators to see what data may be missing from an application, as well as view the progress.

With regard to the proposed rule on hydraulic fracturing, the BLM has an important role to play in ensuring safe and effective use of hydraulic fracturing techniques on Federal and Tribal lands. The current rules covering these operations are 30 years old. The proposed rule would create a common set of minimum standards for operations on these lands across the country, including in States and on Indian reservations that are not regulating hydraulic fracturing. The BLM is

working with the State regulatory agencies and Tribes on an ongoing basis to eliminate duplication and promote efficiency. The BLM has entered into Memoranda of Understanding with many States to work together to enforce regulations in an efficient way, as they currently do in administering existing regulations covering oil and gas development. We do not expect the hydraulic fracturing rule to create any significant delays.

Valadao Q8: I understand that BLM held a meeting in Denver on venting and flaring of natural gas last week. Natural gas is a valuable commodity and it is in the best interest of energy producers to capture the gas and sell it. However, that is not always possible and a small percentage of it must either be vented or flared. What are the department's plans related to this activity? Are you planning to regulate venting and flaring?

Answer: The BLM is considering various options for addressing the venting and flaring of gas and the loss of gas through fugitive emissions from onshore Federal and Indian oil and gas leases. This includes preventing the waste of hydrocarbons, while promoting the conservation of produced oil and gas to also ensure a fair return to the American taxpayer.

The BLM operates a robust onshore oil and gas leasing program covering about 37 million acres of public lands with about 12.5 million of those acres producing 11 percent of the natural gas and 5 percent of the oil used in the U.S. The Government Accountability Office and DOI's Office of the Inspector General have identified the current venting and flaring rules, found in the Notice to Lessee and Operators No. 4A, as deficient and outdated. These regulations were written in 1979, and the industry and the technology it uses have changed a great deal since then.

The Department of the Interior and the BLM are undertaking this outreach to begin dialogue with Tribal and State governments and a large group of other stakeholders about the best ways to prevent loss of gas and maximize return to the taxpayers. The Denver outreach was the first of four sessions. Similar sessions will be conducted in Albuquerque, NM on May 7, Dickinson, ND on May 9, and in Washington D.C. on May 15.

Valadao Q9: Please describe what is different about the discussion of a proposed rule on venting and flaring, or what BLM is now considering with respect to the proposed rule, and EPA's "Quad O (OOOO) Rule" to reduce emissions from exploration and production operations for crude oil and natural gas. How do the Department and BLM plan to avoid duplicative regulation in this area? Do the Department and BLM plan an economic analysis to ascertain the effects of new regulations of venting and flaring on the administrative costs borne by the Department and by the companies that are seeking to produce energy resources from public lands?

Answer: The Department of the Interior and the BLM are aware of the Environmental Protection Agency's (EPA) "Quad O" regulations, published August 16, 2012. The scope of our rules differ -- EPA established national standards, while BLM's requirements would address operations on lands and resources that we are directly responsible for managing on behalf of the American public. Based on these land management responsibilities, BLM needs to consider reasonable options for reducing flaring and venting from both ongoing and new operations. As part of our regulatory process, we will consider EPA's requirements and processes to see if there

are ways to conform certain BLM oversight requirements and processes to improve effectiveness and minimize operator compliance burdens. With regard to an economic analysis, it is a standard component of any rulemaking, and any rulemaking the BLM does in this area will include such an analysis.

Valadao Q10: What can you say about the timing for the development of new or revised BLM regulations on the measurement of oil and gas production from federal lands now covered under BLM Onshore Orders 3, 4 and 5? Can you describe the Department's objectives in pursuing changes to the current set of rules?

Answer: Recent audits have identified the need to update these Onshore Orders, which were originally written in the 1980s. The BLM response to those audits agreed with this finding, and to the need to update these Orders. These updates will address changes in technology and industry practices and the BLM anticipates publishing a draft rule for public comments in 2015.

Onshore Order 3 establishes minimum standards for ensuring that oil and gas produced from Federal and Indian (except the Osage Tribe) oil and gas leases are properly and securely handled, to prevent theft and loss, and to enable accurate measurement and production accountability. In revising the Order, the BLM expects to address the use of seals, by-passes around meters, documentation, reporting of incidents of unauthorized removal or mishandling of oil and condensate, facility diagrams, recordkeeping, facility measurement points, commingling, and off-lease measurement by operators, purchasers, and transporters.

Onshore Orders 4 and 5 establish minimum standards for accurate measurement and proper reporting of all oil and gas produced from Federal and Indian leases. These Orders include requirements for the measurement equipment and procedures needed to ensure accurate and verifiable measurement on which royalty is based. Industry measurement specialists and field technicians would primarily use these Orders, as well as BLM inspectors and engineers. The revisions will include consideration of current technology.

Valadao Q11: Please describe the Department's resource goals and objectives with respect to development of the Monterey Shale resources that are likely to be found on BLM lands in California. The existing goal for energy development in the Resource Management Plan for BLM's Hollister, California District "*balances resource conservation and ecosystem health with the production of commodities and with public use of the land.*" From a policy standpoint and in view of the language BLM uses to describe its multiple use mission in the discussion of Federal Land Policy and Management Act, how does the Department plan to achieve this balance in a manner that allows development of the Monterey as one of the multiple use goals?

Answer: In order to balance "resource conservation and ecosystem health with the production of commodities and with public use of the land", the Resource Management Plan for the BLM Hollister Field Office defines which public lands are suitable and open for leasing. Some of these lands that are open for leasing include areas of the "Monterey Shale". If companies nominate lands for leasing that encompass the "Monterey Shale", the BLM will evaluate those nominations for possible auction at lease sale. To further inform these processes and decisions, the BLM has chartered a peer-reviewed science report that is specific to California to assure the

BLM has a good, science-based foundation as it moves ahead.

Earthquake Early Warning

Valadao Q12: Secretary Jewell, you are no doubt familiar with the March 17 earthquake that struck the Los Angeles area. It is my understanding that this 4.4 magnitude earthquake is one of the strongest earthquakes to hit Southern California in recent years. I firmly believe that it is a matter of when, and not if, our next significant earthquake event will occur. Given the millions of lives and billions of dollars on the line, can you give me an update on the status of developing an earthquake early warning system for the West Coast?

Answer: Since January of 2012, a demonstration version of the earthquake early warning system, called *ShakeAlert*, has been sending test notifications to a small number of test users, including California emergency response organizations, utility providers, rail operators and a number of private companies. The demonstration system has successfully sent notifications for hundreds of quakes in California. Recently it proved itself by sending alerts in less than 5 seconds for the earthquakes in Encino (M4.4) and La Habra (M5.1). However, before public warnings can be issued, the system must meet quality, speed and reliability standards. The USGS completed a cost estimate and an implementation plan for a West Coast public warning system for use by Federal, State, and local governments and private entities that may wish to move forward with such a system.

Questions from Ms. McCollum

Land and Water Conservation Fund

The Land and Water Conservation Fund (LWCF) is used to provide critical recreational access, conserve natural and historic lands, and support our economies and the character of our communities. I am glad to see the President's commitment to fully fund LWCF in FY15. I look forward to working with you to end the diversion of LWCF revenues and to secure funding for the program into the future.

I am concerned with the argument that obtaining more conservation land would add burden to Federal land management and maintenance costs.

McCollum Q1: Can you please provide a fuller understanding of the ways that land conservation through LWCF improves management and reduces operating expenses, including specific project examples where LWCF spending has reduced operations and maintenance (O&M) costs, as well as the broader positive impacts of LWCF on O&M budgets?

Answer: The Department of the Interior LWCF programs work in cooperation with local communities, rely on willing sellers, and maximize opportunities to partner with private landowners on conservation easements where conservation and management objectives can be achieved without fee-simple acquisition. Proposed Federal land acquisition projects are developed with the support of local landowners, elected officials, and community groups.

Acquisition of inholdings does not generally require additional operating costs as no new staff or equipment are required to manage new lands within existing boundaries. Occasionally, agencies may incur up-front costs to remove existing improvements (fences, buildings, etc.) from an acquired property. By removing unwanted structures on newly acquired land, agencies avoid adding to ongoing O&M requirements.

In fact, acquisition of inholdings can greatly simplify land management for federal managers and neighboring landowners. Eliminating checkerboard ownership within federal units simplifies nearly every aspect of land management:

- Wildland fire managers can apply appropriate fuels reduction, planned burns, and fire suppression treatments more easily across an unfragmented landscape; fire management is more challenging and costly when private inholdings and developed properties are intermixed with federally-managed forests and public lands.
- Law enforcement and public safety personnel can more easily patrol and respond to emergencies when public ownership is consolidated. An unfragmented unit allows unified signage, road networks, and other infrastructure that will best enable safe public access and allow for the efficient movement of emergency personnel and vehicles to locations frequented by visitors.
- Recreation managers can more easily provide access for the public to enjoy their public lands. In some cases checkerboard ownership can cause confusion among the public about acceptable land uses, and can restrict the public's ability to access some areas of public land.

- Natural resource management is simplified in an unfragmented landscape. When checkerboard ownership is eliminated, biologists, geologists and other natural resource professionals can move freely across the land that they are responsible for surveying, and natural resource management actions can be applied more efficiently across a landscape in single ownership.

Examples of enhanced management resulting from land acquisition:

St. Vincent National Wildlife Refuge (NWR)

St. Vincent NWR is an island off the panhandle coast of Florida in Apalachicola Bay, off the Gulf of Mexico. Acquisition of the 5-acre tract on the mainland of Apalachicola Bay provides permanent deep water mooring with launch site, secure parking and equipment storage. An important point is that dredging and channel maintenance are allowed in Apalachicola Bay, activities that are prohibited in other nearby areas. The lease at Indian Pass, the current deep water mooring and launch site, was ending and would not be renewed as the owners were looking to develop the mainland at the launch site. In addition, the upland portion of the leased Indian Pass site had been significantly reduced due to severe, continuing, and progressive erosion that the landowner failed to address.

As the refuge is only accessible by water, the new deep water mooring and launch site reduces staff travel time from the refuge office to transfer supplies and heavy equipment. Daily boat access for St. Vincent NWR staff is required 24/7 for all island management activities, such as sea turtle nest monitoring and protection, habitat management, prescribed burning, hunting and fishing management and protection, and response to visitor emergencies.

With the acquisition of the mainland deep water boat mooring and launch site, the Fish and Wildlife Service eliminates the annual \$12,000 lease and has significant savings in fuel for vehicles. Staff traveling to and from the work site and hauling equipment to Apalachicola Bay from the refuge office had to travel 20 miles to Indian Pass, then travel by watercraft to St. Vincent Island. At the end of each day, traveling was reversed back to the refuge office. Adequate parking for heavy equipment and vehicles is available at the new site.

Prior to the acquisition of the deep water mooring and launch site, the Service conducted a critical review and analysis of deep water mooring and access options in the general vicinity of the refuge. Only two or three options were possible, with the acquisition of the acquired site being the most cost effective and safest for staff. The other sites involved longer nautical travel distances at nine miles, were more costly as public boat launch sites, and did not offer the security needed for refuge equipment.

Yukon Flats NWR

The Service acquired five tracts totaling 480 acres within the Yukon Flats National Wildlife Refuge in Alaska. One tract contains prime river frontage along the Porcupine River with cliffs containing important nesting habitat for peregrine falcon. The other tracts contain frontage along Beaver Creek, Rock Slough, and the Black River. Most of these properties contain high quality wetland complexes and were isolated inholdings surrounded by Refuge land. Acquisition of

these parcels greatly benefits Refuge wildlife management and provides a cost savings to the government due to decreased fire management expenses.

San Joaquin NWR, CA

In 2006, the FWS acquired a 371-acre tract at San Joaquin NWR, including riparian water rights. Along with other acreage acquired within the Refuge, 2,700 acres have been restored to riparian woodland habitat. After three years, irrigations for the riparian restoration ceased. The land acquired was cropland that used approximately 24,000 acre-feet of water every year. With the land restored to riparian woodland habitat, the 24,000 acre-feet of water is not used for irrigation on the Refuge; the water stays in the San Joaquin River and benefits in-stream flow, aquatic species, and downstream users. The use of riparian water rights via lift pump on the Stanislaus River has saved the refuge approximately \$140,000 in the past seven years (\$20,000 annually). Previously, water was acquired by paying for expensive pumped well water.

A majority of the riparian habitat was lost over the past century to cropland. With the riparian forest rehabilitation within the Refuge, the riparian brush rabbit population has returned from the brink of extinction due to habitat loss and degradation.

United States Geological Survey Groundwater

Groundwater is a valuable resource for Minnesota and the nation. When parts of the country are experiencing drought, groundwater may be considered a part of the solution.

McCollum Q2: What can Congress do to support the USGS and States in their efforts to implement a national groundwater monitoring network to ensure we have the necessary data to understand the status and trends of this strategic resource?

Answer: The USGS appreciates the leadership that Representative McCollum has shown on this issue.

Groundwater is indeed a strategic resource important to every State. It is the source of drinking water for about half the Nation, nearly all of our rural population, and many urban residents. Groundwater is a critical resource for many industries, and irrigation from groundwater supports our Nation's agriculture. Groundwater also sustains flow in most rivers, streams, and wetlands and, as such, is important to many ecosystems. A resource of that importance must be monitored to be managed effectively. Current groundwater monitoring has many gaps and does not meet national needs. To address these national needs, a framework was developed for a National Groundwater Monitoring Network (NGWMN) in response to the SECURE Water Act (P.L. 111-11) Section 9507(b) to provide a systematic groundwater monitoring program for each major aquifer system in the United States. The proposed NGWMN is expected to fill these monitoring gaps.

The SECURE Act requires the USGS to develop the NGWMN in coordination with the Advisory Committee on Water Information (ACWI) Subcommittee on Groundwater (SOGW), and State and local water resources agencies. The SOGW--including more than 70 people from 54 organizations--designed the NGWMN, and volunteer State pilot projects in Illinois, Indiana,

Minnesota, Montana, New Jersey, and Texas successfully demonstrated the feasibility of the network design. USGS developed and delivered a pilot data portal open to the public that demonstrates the value of the NGWMN by allowing data users to view the pilot NGWMN and to query Network groundwater data. The NGWMN is poised for successful implementation when funding is available. Congressional support for the FY 2015 budget request will allow the USGS to begin implementation of a collaborative NGWMN using the proposed national framework and taking advantage of existing monitoring done by Federal, State, tribal and local agencies.

McCollum Q3: The federal government and the nation look to USGS for basic scientific data, including groundwater level and quality data. How does the FY 2015 budget request for USGS address moving forward a national groundwater monitoring network?

Answer: The FY 2015 budget request will allow the USGS to begin implementation of the NGWMN as outlined in the SOGW report, "A National Framework for Ground-Water Monitoring in the United States". This report recommends that the USGS operate and manage the NGWMN through strong collaboration with the States. In 2015, the USGS will bring 10-15 States into the NGWMN, select an advisory board, solicit additional Federal, State and local data providers, and fund operation of data portal and collection at NGWMN backbone sites managed by Federal and non-Federal NGWMN partners.

When fully implemented, the NGWMN will support Federal and State interests and allow the USGS to meet the goals outlined in the USGS National Water Census. National water availability and use have not been comprehensively assessed in more than 30 years.

The FY 2015 budget request also will allow the USGS to begin to meet our obligations under the SECURE Water Act to "expand the Climate Response Network (CRN) to each climate division in order to improve the understanding of the effects of global climate change on groundwater recharge and availability." The CRN is designed to provide long term records from aquifers that are not affected by pumping or other outside influences so the water levels reflect climatic variability and not human influences.

Bureau of Indian Affairs—Johnson O'Malley

The Johnson O'Malley Indian Education (JOM) program provides valuable support for the academic, social, and cultural needs of Native American students outside of BIE schools. However, I have questions about the Department's management of the JOM program, and I am deeply concerned that the lack of an updated student count is undermining the program's effectiveness.

McCollum Q4: What plans have BIA/BIE developed to conduct a full, updated student count and report back to Congress, as directed in *FY2014 Consolidated Appropriations Act* (P.L. 113-76)? Please include details on the anticipated timeline with benchmarks, the proposed methodology, and who will be conducting the count.

Answer: Indian Affairs plans to publish a Federal Register Notice and issue a Dear Tribal Leader letter this spring announcing that the Bureau of Indian Education (BIE) will conduct a Johnson O'Malley student count in fiscal year 2014. The announcement will be distributed to

the current JOM contractors, public schools, national tribal organizations, Alaska Native corporations and State Departments of Education, as well as being posted on the BIE's web page. To promote an accurate and timely count, BIE will provide technical assistance to aid tribes, tribal organizations, public schools and State Departments of Education during the student count process. Currently, BIE plans to have an early September deadline for submittal of self certified student counts. This will allow BIE time to review all data and prepare the final report. The report will be sent to Congress by September 30, 2014.

McCollum Q5: How does BIA/BIE plan on reaching out to those tribes and school districts that have eligible students but are not yet under contract? Will the contract application process be opened in conjunction with conducting a new student count?

Answer: The two primary outreach methods announcing the count will be a Federal Register Notice and a Dear Tribal Leader letter. Indian Affairs has found that Dear Tribal Leader letters are very effective in communicating with Tribal leaders. The announcement will also be distributed to the current JOM contractors, public schools, national tribal organizations, Alaska Native corporations and State Departments of Education. The BIE plans to begin issuing notices to these entities soon after the Federal Register Notice and Dear Tribal Leader letters are published. To promote an accurate and timely count, BIE will provide technical assistance to aid the various entities that have questions during the application process, with follow-up assistance as needed when the student counts are received.

It should be noted that the submission of the student count is voluntary. The contract application process will proceed once the student count process is completed. Additional information on the JOM student count and the contracting process can be found at 25 CFR 273.

Bureau of Indian Affairs—Domestic Violence

This budget represents the first opportunity for the Administration to support tribal courts in exercising the special jurisdiction over domestic violence that was established in the *Violence Against Women Reauthorization Act of 2013* (P.L. 113-322). While funding in the act was primarily designated to come from the Attorney General's office, I am interested to hear how the BIA is supporting tribal nations as they take on this new law enforcement challenge, as well as the ongoing work to prevent abuse and assault, and support Native women and families.

McCollum Q6: What resources and tools do tribal justice systems need as they prepare to take on their new domestic violence special authority?

Answer: The recent re-authorization of the Violence against Women Reauthorization Act of 2013 (VAWA) expands Tribal court jurisdictional requirements and will have a significant impact on tribal justice systems and social service programs. The law amends, among other statutes, the Indian Civil Rights Act, 25 U.S.C. 1301; and the Federal Assault provisions under 18 U.S.C. 113, the Domestic Violence and Stalking Chapter, specifically addressing the full faith and credit given to tribal protection orders, under 18 U.S.C. 2265. Furthermore, the tribal court systems, through new provisions in the Tribal Law and Order Act, have increased sentencing authority as well as requirements to comply with a cadre of other mandates under the TLOA.

Tribal court systems are evolving to meet the demands of tribal communities, including the increasing demands pursuant to the enhancement provisions of the TLOA, as well as the newly re-authorized VAWA. These judicial systems address everything from violent crimes and drug use, to domestic and family issues, to all types of civil claims. Recent increases in appropriations have augmented the courts' capacity through increased staffing, acquisition of computers and software, training, and equipment. The appropriations proposed in FY 2015 will be used to continue the courts' capability to reduce caseloads, address the backlog of criminal cases, tort claims, tribal probate claims, and family law issues pursuant to the Indian Child Welfare Act.

Has BIA planned for the additional training and support that tribal law enforcement officers and tribal courts will now need?

Answer: As a result of provisions contained in the reauthorized VAWA, the Bureau of Indian Affairs will develop and implement training for direct service program staff in the areas of law enforcement, social services, victim services, and courts. While nothing in the law requires Tribes to "opt in", the BIA will provide technical assistance and training to Tribes operating these programs under self-determination contracts and compacts which choose to adapt policies and procedures and rewrite codes to reflect provisions in the VAWA reauthorization. In addition, BIA is in the process of expanding tribal court advocacy training sessions to include assistance in jury selection with challenges for cause and preemptory challenges and how to submit a jury charge to the court.

The BIA is in the process of creating two public defender clinics for tribal courts. The focus of these clinics will be to train public defenders on how to meet with their client, discuss the case with client and prosecutor, and continue with the evidence-based training presently in the tribal court advocacy training sessions. The BIA is also in the process of developing training for judges to understand the mental health issues affecting domestic violence issues, along with training specific to victim responses to violence. Finally, training will be provided to tribal court personnel, including judges, on the services available for both the defendant and victim so that probation conditions can properly address the problem.

Additionally, the BIA expects to have webinars available for tribal judges in the near future, and expects to advertise additional trainings which will include Indian Country jurisdiction in general and VAWA, as well as the jurisdictional issues which focus on tribal protection orders and full faith and credit between State and tribal governments.

McCollum Q7: How will the BIA be working with the DOJ to make sure that all tribal courts can benefit from the experiences of those currently under the pilot project and those working toward taking on the special jurisdiction?

Answer: The BIA is presently working with DOJ on all VAWA issues and expects to continue to work on issues affecting tribal courts through the next several years. Presently, DOI meets at least once a week with DOJ to discuss VAWA pilot project applications and provide a progress

report on the three tribal courts with DOJ approval to exercise the special domestic violence jurisdiction. The BIA conducts round table discussions regarding tribal concerns with VAWA implementation and shares the reports with DOJ and will continue to do so. The BIA is also working with DOJ to provide additional assistance to Tribes in the form of additional victim specialists and training for tribal victim specialists.

The BIA is working with the DOJ-Office of Tribal Justice and with the Deputy Assistant Attorney General's Office regarding the pilot project applications. BIA will coordinate with DOJ to provide VAWA information to as many Tribes as possible regarding the VAWA application process. BIA is providing training and technical assistance and additional funding to those two Tribes presently in the queue awaiting approval of their VAWA application.

DOI/BIA works alongside DOJ in creating and coordinating a comprehensive training and technical assistance resource list which will include DOJ opportunities and opportunities provided by State, local, and non-profit groups focusing on VAWA matters. The BIA also works with the DOJ-Access to Justice (ATJ) Initiative for Public Defense. ATJ is a part of the tribal court trial advocacy training sessions, where over 300 tribal court personnel have been trained in trial skills. Another six sessions will be forthcoming in 2014 and 2015.

McCollum Q8: How will the \$3.0 million in increased funding proposed in Social Services be used to help tribal nations and Indian families to address the crisis of violence against Native women?

Answer: The FY 2015 budget request proposed a \$10.0 million increase to launch a new initiative to combat increasing rates of domestic and family violence in Indian Country. The BIA will develop a comprehensive plan for addressing the needs of Indian communities with high rates of domestic and family violence. The BIA Human Services program will partner with the BIA Law Enforcement program to create the comprehensive plan. The goals of the initiative are to address domestic and family violence in Indian Country to include: 1) expanded family services related to domestic and family violence; 2) improved teamwork between law enforcement and social services to more rapidly address instances of domestic and family violence; and 3) better coordination of services with other related domestic and family violence partners in Indian Country.

Tribal and BIA case workers are the first responders for child and family services on reservations and in Indian Country. In order for Tribes to effectively administer social services programs and mitigate risks associated with domestic and family violence, Tribes need capacity for their case workers to focus their skills and expertise on the development of comprehensive response systems. The \$3.0 million in additional funding provided in FY 2014 supports 26 case worker positions (6 BIA; 20 tribal) which will decrease the client to staff ratios at the tribal level. The increase in case workers will provide Tribes with new resources to focus on the quality of services being provided to women, children, and families. The increase will allow case workers to shift their primary focus from crisis mode intervention to services that strengthen the family through prevention and reunification. In addition, this shift will also allow workers to begin developing service strategies that address the impact of domestic and family violence on the breakup of families.

Bureau of Indian Affairs—School Construction

My colleagues on the Interior subcommittee and I have been noting the backlog within Bureau of Indian Education school construction with this Department for years. I have visited dilapidated BIE schools that are certainly not a conducive learning environment, but, more importantly, they pose significant safety, fire and health risks for students, teachers and administrators.

McCollum Q9: Why has the Department chosen again to ignore the urgent need for replacement school construction funds within this budget? Why was funding not requested to finish out all the remaining schools on the 2004 list?

Answer: There are three schools remaining on the 2004 Replacement School Construction Priority List: Beatrice Rafferty in Maine, and the Little Singer Community and Cove Day schools, both in Arizona. The 2015 budget includes \$3.2 million for site development at Beatrice Rafferty. Planning is concluding for the three schools remaining on the list and design funding was provided for Beatrice Rafferty in 2014. In addition, Indian Affairs has six major education projects in the construction phase which include academic and dormitory facilities. These six projects are funded through the Facilities Improvement and Repair program under the Education Construction activity.

While not all school facilities are in “good” condition, all schools provide students, teachers, and administrators with a school environment that is safe. The Indian Affairs IA construction program supports the education goals of providing an environment conducive to quality educational achievement and improved opportunities for Indian students.

Since 2000, BIA has spent over \$2.4 billion, including \$300 million in American Recovery and Reinvestment Act funding, on school construction, improvement, and repair. In that time, BIA has completed or has under construction 42 school replacements and 62 major renovations.

McCollum Q10: What plans have BIA/BIE developed to issue a new BIA Education Facilities Replacement Construction Priority List? Please include details on the anticipated timeline with benchmarks, the consultation with tribal nations, the proposed methodology, and the factors that will be used to determine which schools are priorities for replacement.

Answer: In response to a No Child Left Behind Act requirement, Indian affairs convened a Negotiated Rulemaking Committee, consistent with 25 U.S.C. 2018(b), to develop and recommend a New School Replacement and Renovation priority ranking formula. The NRC committee was comprised of 22 tribal and four federal representatives. Participants included tribal members whose children attend Bureau-funded schools and to the extent possible, reflected the proportionate share of students from Tribes served by the Bureau-funded school system according to geographical location, size, and type of school and facility, and who represented the interests of parents, teachers, administrators, and school board members as well. The Federal participants included representatives of the Bureau of Indian Education, BIA Office of Facilities Construction and Management, BIA Office of Regulatory Affairs and Collaborative Action, and the DOI Office of the Solicitor – Division of Indian Affairs.

In 2010, the NRC held seven multi-day meetings, during which they visited five Bureau-funded schools and received public comments from 12 tribal and school officials. The Committee also conducted five regional consultation sessions around the country, which were attended by more than 200 participants, and 16 Tribes, schools, or tribal organizations submitted written comments. The Committee reviewed extensive data from federal agencies and also submitted two data calls to Bureau-funded schools. The School Facilities and Construction NRC Final Report transmitted to Congress on December 13, 2012 includes recommendations for both a process and a formula for generating a prioritized list of schools.

Based on the recommendations developed by the NRC, schools are eligible to be ranked for replacement or renovation if the school has an overall ranking of "poor" and/or are both 50 years old or older and educating 75 percent or more of students in portables as identified in the BIA facilities database. Eligibility is also based on criteria such as crowding, declining or constrained enrollment associated with facilities in "poor" condition, inappropriate education space, accreditation risk, and cultural space need, data which would be provided by the schools.

After the conclusion of validation of the inventory and deferred maintenance needs for all 182 campuses serving 183 schools, anticipated to be completed by end of FY 2014, and additional data is provided by the schools, a list of schools eligible to apply for the new School Replacement and Renovation Program is scheduled to be established by December 2014.

A timeline for initiating the application and prioritization processes to establish a new prioritized list of schools for replacement or renovation has not been determined at this time. Schools which are ranked as eligible must make an application for replacement or renovation to be included in the prioritization process. Once the application process is complete, regional project evaluation committees will be formed and public meetings will be held to provide input into the prioritization of projects. During the development of the new ranking, schools will continue to receive Operations and Maintenance funding as well as minor improvement and repair funding, based on established criteria.

- + USGS: Fracking Contributing To Increase In Oklahoma Earthquakes.
- + Court Denies Mining Company Payout For Expected Profits.
- + Additional Coverage Of Open Houses On Four Corners Power Plant And Navajo Mine.

Offshore Energy Development:

- + Study Estimates Total Bird Deaths From Deepwater Horizon At Around 800,000.
- + BP's Minge Talks Gulf Drilling, US Shale Gas.
- + Energy Industry Conference Covers Public Perception, Technical Challenges.

TACKLING AMERICA'S WATER CHALLENGES:

- + Spring Runoff Begins To Flow Into Big Thompson Canyon.
- + Rio Grande To Receive Extra Water For Silvery Minnows.
- + BOR Forecasts Lower Water Release From Lake Powell To Lake Mead For 2014.
- + Former Alcoa Superintendent Sues Natrona County For Defrauding BOR.

EMPOWERING NATIVE AMERICAN COMMUNITIES:

- + Tribal Rights Pioneer Billy Frank Jr. Dies.
- + Judge Promises Quick Decision In Cherokee Freedmen Case.

TOP NATIONAL NEWS:

- + Obama, Biden Urge House Republicans To Pass Immigration Reform.
- + Administration, Democrats Undecided About Taking Part In Select Benghazi Committee.
- + Pew, CNN Polls Show GOP Positioned For Big Gains In November.

EDITORIAL WRAP-UP:

- + New York Times.
- + Washington Post.
- + Wall Street Journal.

BIG PICTURE:

- + Headlines From Today's Front Pages.

WASHINGTON SCHEDULE:

- + Today's Events In Washington.

LAST LAUGHS:

- + Late Night Political Humor.

DOI in the News:

SECRETARY JEWELL TOURS KREIGER PEAK IN CALIFORNIA. The [Contra Costa \(CA\) Times](#) (5/6, Bugarino, 319K) reports that "making her second visit to East Contra Costa in less than two months," Interior Secretary Sally Jewell toured Kreiger Peak in Contra Costa County, Calif., on Monday. Jewell is visiting the lands preserved by the East Contra Costa County Habitat Conservation Plan, "which was launched more than a decade ago to preserve wetlands, endangered species and open space while standardizing the collection of fees from developers." Jewell also commented on the East Bay Regional Park District's efforts to hold several programs for youths and creativity in its land use. The story also appears at the [Inside Bay Area \(CA\)](#) (5/6, 20K).

The [San Jose \(CA\) Mercury News](#) (5/5, 696K) reports that Jewell also "hosted a roundtable discussion with Rep. Jerry McNerney and local leaders from the conservation and development communities who spearheaded the successful conservation plan."

SECRETARY JEWELL BLAMES "POLITICAL REALITIES" FOR REPUBLICANS' STANCE ON CLIMATE CHANGE. The [Environment & Energy Publishing](#) (5/6, 705) reports that Interior Secretary Sally Jewell last Friday said that "'political realities,' not denial of human-caused climate change, have prevented Sen. John McCain

(Ariz.) and many other Republican lawmakers from taking a stand on the issue.” During a question-and-answer session with attendees of the National Wildlife Federation’s annual meeting, Jewell said, “As I talk to individual members of Congress from both sides of the political aisle, I would say that there is less debate on climate change, but we have a circumstance where it’s not a popular topic in some parts of the country for people to bring up.” According to Jewell, “today’s Republicans are worried about being ‘primaried’ – or challenged by conservative members of their own party.”

PRESIDENT SET TO PUT CLIMATE CHANGE AT TOP OF HIS AGENDA. The Wall Street Journal (5/6, Nelson, Mundy, Subscription Publication, 5.51M) reports that President Obama will use a new climate assessment report to be released tomorrow to argue that action to combat climate change must be taken now. The Journal says that the move is part of the effort by the President to turn the focus of the national debate towards the issue. The Journal says that the problem for Obama is that global warming is low among the public’s priorities and is a potential problem for Democrats with ties to the energy industry.

Politico (5/6, Goode, 73K) reports that the President “will be meeting with some of television’s most popular celebrities — weather forecasters — to ratchet up the volume on the administration’s latest scientific assessment of climate change.” Among those present will be the Today Show’s Al Roker, who “tweeted Monday that he was one of the local and national meteorologists to score a one-on-one interview with the president.” Politico notes that the push comes “about a month before EPA is scheduled to issue its most ambitious climate regulation yet — a rule aimed at reducing greenhouse gas pollution from the nation’s thousands of existing power plants.”

South Florida Expected To Be Hit Hard By Climate Change. The Miami Herald (5/6, Staletovich, 822K) reports that according to the report to be released by the White House, South Florida “is getting hotter, stormier and saltier.” The National Climate Assessment “carves the nation into 11 regions, with the Southeast, as well as the Caribbean, sitting squarely in the crosshairs of climate change.” In the draft report, the scientists “call the area ‘exceptionally vulnerable’ to risks from man-made climate change including rising seas, more extreme heat and dropping water supplies.”

America’s Great Outdoors:

National Park Service:

NPS AWARDS \$400,000 TO PROTECT THREE CIVIL WAR BATTLEFIELDS. The National Journal (5/6, Subscription Publication, 561K) reports that NPS Director Jonathan B. Jarvis on Monday “announced more than \$400,000 in grants from the Land and Water Conservation Fund to help preserve more than 300 acres of land at three of America’s Civil War battlefields threatened with damage or destruction by urban and suburban development.” The grant projects are at the Mansfield (La.), Glorieta Pass (N.M.) and Bentonville (N.C.) battlefields. Jarvis said, “These grants help safeguard our nation’s Civil War battlefields and allow Americans the opportunity to learn about democracy, sacrifice, heroism and hope in the very places where those concepts shaped our history. Preserving these sites for future generations is an important way to honor the courage and service of our nation’s military, especially as we commemorate the 150th anniversary of the Civil War.”

Also covering the story is KTVE-TV El Dorado, AR (5/6, 1K).

ZION NATIONAL PARK SAYS DRONES POSE PROBLEMS. The Salt Lake (UT) Tribune (5/6, 470K) reports that “wildlife paparazzi” are “illegally harassing the sheep, Utah’s first possible condor chick — and other visitors — by using drones” in Zion National Park. The article notes that “law enforcement rangers in Zion average up to four drone cases each week and there are other reports.” Zion National Park spokesperson Aly Baltrus said, “It seems to have exploded recently. They are getting more affordable and now that you can put a camera on them they are more purposed. We have had visitor complaints from Angel’s Landing and Canyon Overlook. Drones kept buzzing them.”

NPS’ Ban On Drones Criticized. For Forbes (5/5, 6.28M), Gregory S. McNeal, a professor specializing in law and public policy, criticizes the NPS’ ban on drones as an “absurd interpretation of their regulations.” He claims that the NPS is “threatening park visitors with jail time and substantial fines, but the agency hasn’t written any

rules to make it clear to park visitors what is prohibited." According to McNeal, "the situation is so muddled that different parks within the National Park Service are issuing different statements, leaving park visitors confused as to what counts as a drone."

Additional coverage of the ban was provided by "The Switch" blog of the Washington Post (5/5, 4.22M), the Washington Times (5/6, Chumley, 455K), The Hill (5/6, Hattem, 237K), NPR (5/6, Staff, 519K), Salon (5/5, 688K), and Yahoo! Finance (5/6, 9.7M).

ENVIRONMENTAL GROUPS SUE OVER CATTLE GRAZING IN CAPITOL REEF NATIONAL PARK. KXLY-TV Spokane, WA (5/6, 32K) reports that two environmental groups are suing the NPS over cattle grazing in Capitol Reef National Park in Utah. The Western Watersheds Project of Hailey and the Cottonwood Environmental Law Center want the NPS "to study the impact grazing is having on two cactus plants listed under the Endangered Species Act." The lawsuit accuses the agency of "breaking environmental law by failing to consider the impacts of cattle grazing on the threatened Winkler's pincushion and endangered Wright fishhook cactus."

NATIONAL PARK'S THURSDAY LECTURE TO FOCUS ON SALT RIVER. The Virgin Islands Daily News (5/6, 49K) reports that the Salt River will "be the focus as the National Park Service-St. Croix Lecture Series continues on Thursday." David Goldstein, chief of interpretation and education at the National Park Service sites on St. Croix, said, "The most striking feature of Salt River Bay is that human beings have been wanting to be living there, arguing and fighting over that site, that place, that bay, for hundreds of years. People have just wanted to be there, because it is a really important conjunction between freshwater and saltwater, because it offers a set of resources, of vistas, of landscape features that for human beings happen to be irresistible." The article notes that "Thursday's lecture by Joshua Torres, cultural resources manager for the National Park Service sites on St. Croix, is titled 'Hidden in Plain Sight: The Archaeological Resources of Salt River Bay National Historic Site and Ecological Preserve.'"

Bureau of Land Management:

CONTINUING COVERAGE OF BUNDY RANCH STANDOFF. The Washington Times (5/6, Richardson, 455K) reports that "behind the hoopla surrounding Nevada rancher Cliven Bundy's standoff with the Bureau of Land Management is a growing resentment over the federal government's status as the largest landowner in the West." According to the article, "although Nevada has received most of the national attention since Mr. Bundy's clash last month with BLM agents, the heaviest push to wrest control of federal lands is coming from Utah." State officials argue that the federal agency is "herding rural Westerners off the land by tightening restrictions, many of them driven by the Endangered Species Act, as well as lax management."

Additional Coverage: Rep. Horsford Calls For Ejection Of Militia Members. Additional coverage of Rep. Steven Horsford's call on elected officials in the state to rid a town in his district of militia members who have rallied around rancher Cliven Bundy was provided by the Washington Times (5/6, Chumley, 455K), the New York Daily News (5/6, 4.36M), and Yahoo! (5/5, Morrison, 17.91M).

BLM TO REVIEW ITS PLANNING PROCESS. The Billings (MT) Gazette (5/6, 174K) reports that "after using the same basic planning approach for 38 years," the BLM has announced "it will review how it develops its Resource Management Plans." BLM Director Neil Komze said in a statement, "As I've met with elected leaders and citizens from across the West on BLM issues, I've consistently heard two things: first, the BLM needs to more effectively address landscape-level management challenges; and second, planning takes too long." The decision was praised by the Theodore Roosevelt Conservation Partnership as a way to "modernize this approach and remedy its shortcomings."

BLM, IRON COUNTY BRING IN FIRST HERD OF WILD HORSES. The St. George (UT) Spectrum (5/5, 48K) reports that Iron County Commissioners "finally got an opportunity to see the fruits of their threats the last two months" when the BLM "brought the first bunch of wild horses — eight to be exact — off the range into Cedar City Monday." However, "with an estimated 1,500 to 2,000 wild horses overpopulating Iron County, eight horses aren't enough to stop the Iron County Commissioners from joining a recent lawsuit filed by local ranchers against the BLM." Iron County Commissioner Dave Miller said, "It is absolutely not enough for us to not continue with our plans to attach the county to the lawsuit. While we appreciate the BLM's efforts trapping horses, reducing the

numbers to the tune of 10 at a time will not get the job done.”

BLM OFFERING 40 WILD HORSES FOR ADOPTION. KFVS-TV Cape Girardeau, MO (5/6, 28K) reports that the BLM will “offer approximately 40 wild horses ranging from yearling to five years old to potential adopters on May 17-18” in Ewing, Illinois. BLM-Eastern States Acting State Director, John Ruhs said, “While the adoption process is simple and straightforward, anyone considering adoption of a wild horse should remember that the animals are wild and require gentling and training.”

BLM REISSUES CALL FOR WESTERN MONTANA RESOURCE ADVISORY COUNCIL NOMINATIONS. The Helena (MT) Independent Record (5/6, 45K) reports that the BLM in Montana has “reissued the call for nominations for five open positions on its Western Montana Resource Advisory Council.” The BLM will consider the nominations until May 23.

WESTERN WATERSHEDS PROJECT COORDINATOR: NO “RIGHT” TO GRAZE ON FEDERAL LANDS. in an op-ed for the Helena (MT) Independent Record (5/6, 45K), Josh Osher, the Montana coordinator for the Western Watersheds Project in Missoula, argues that there is no “right” to grazing on federal public land. Rather, Osher asserts, ranchers “enjoy a privilege to graze livestock according to applicable federal laws, conformance to the terms and conditions in their grazing permit and payment of grazing fees.”

Fish and Wildlife Service:

FWS CELEBRATES INTERNATIONAL MIGRATORY BIRD DAY. KXLO-FM Lewiston, MT (5/6) reports that the FWS is “once again a proud sponsor of International Migratory Bird Day (IMBD) and invites people to celebrate and support migratory bird conservation in their local communities and beyond.” Clint Riley, Mountain-Prairie Assistant Regional Director for Migratory Birds and Special Programs, said, “We are proud to be celebrating International Migratory Bird Day with our partners and encourage everyone to participate in the festivities or simply bird watch. National Wildlife Refuges, most of which were established to protect wild places for birds, are great places for people to observe the diversity of migratory bird species.”

PROVIDENCE RECEIVES \$50,000 FOR YOUTH URBAN PARKS PROGRAMS. The Providence (RI) Journal (5/5, 415K) reports that on Monday, “officials gathered at Riverside Park to announce that \$50,000 had been awarded to the National Wildlife Refuge Service in Rhode Island for the ‘Providence Parks Urban Wildlife Refuge Partnership.’” Sen. Jack Reed said, “I am pleased Rhode Island’s application was chosen for this competitive award and I applaud the Fish and Wildlife Service for its commitment to connecting more kids to nature. Providence is a bustling city with a diverse population and a diverse park system. This federal Urban Wildlife Refuge Partnership Project funding will help boost recreation and environmental education opportunities for residents, particularly young people.”

FWS DROPS PLANS TO SPRAY CHEMICAL PESTICIDES AT BANDON MARSH NATIONAL WILDLIFE REFUGE. The AP (5/6, Barnard) reports that “pressed by advocacy groups,” the FWS has “dropped plans to spray chemical pesticides to kill mosquitoes breeding” on Bandon Marsh National Wildlife Refuge. Instead, the service will “use a biological pesticide that poses less risk to the crabs, crawfish and worms that fish and wildlife depend on for food.” The FWS said in a statement, “After evaluating public comments ... and discussion with mosquito experts, the Service determined that using Bti will effectively control mosquitoes on the Ni-les’tun Unit while posing a low risk to wildlife, their habitats, and the human environment.”

The Ashland (OR) Jefferson Public Radio (5/6) reports that George Kimbrell, senior attorney with the Center for Food Safety, said, “We’re pleased the Fish and Wildlife Service has done the right thing here and not gone forward with its previous plan which was to spray these toxic pesticides on the wildlife refuge. Better late than never, but it’s too bad we had to explain to them that their proposed action was unlawful and hazardous.”

Additional coverage was provided by the Oregon Public Broadcasting (5/6, 4K).

FWS RECONSIDERING PROPOSAL TO LIST GUNNISON SAGE-GROUSE AS ENDANGERED. The Grand Junction Daily Sentinel (5/6, 73K) reports that the FWS is “reconsidering its proposal to list the Gunnison sage-grouse as endangered, weighing instead a threatened species designation that would provide greater flexibility in

how the bird is managed." In addition, the BLM has "agreed to update its resource management plans within the range occupied by the species 'to beef up protections,'" according to Erik Molvar, a wildlife biologist with the conservation group WildEarth Guardians.

FWS LISTS KENTUCKY GLADE CRESS AS THREATENED. The AP (5/6) reports that "the small plant Kentucky glade cress is being listed as threatened under the Endangered Species Act," and the FWS is "designating about 2,000 acres as critical habitat for the plant." The agency says "residential and commercial development and associated activities have destroyed or degraded the plant's natural glade habitats."

HIGH SCHOOL TEACHER WINS NATIONAL HONOR. The Los Angeles Daily Breeze (5/5, 220K) reports that San Pedro High science teacher Jennifer Cheng has been chosen "as a faculty fellow to the 2014 Student Climate & Conservation Congress, a program of the Green Schools Alliance in cooperation with the US Fish and Wildlife Service." The article notes that "Cheng is among about 20 faculty fellows selected from across the United States to represent San Pedro High and California at Sc3 2014, hosted by the National Conservation Training Center of the US Department of the Interior, the nation's premier conservation training facility."

Securing America's Energy Future:

Renewable Energy:

BOEM DIRECTOR TOMMY BEAUDREAU INTERVIEWED. In an interview with Recharge News (5/6, 633), BOEM Director Tommy Beaudreau discussed the future of offshore wind energy. Beaudreau noted that "there is demand around trying to find clean energy resources, especially along the east coast. Unlike the west, you don't have huge swathes of land to stand up a solar or wind project. You have to look offshore. I think that's what is underlying our process."

HAWAII'S WINDMILLS IMPACTING ENDANGERED ANIMALS. KITV-TV Honolulu (5/6, 13K) reports that "Hawaii's push toward green energy is having an impact on flying creatures who live next to wind farms or traverse the spinning turbines, some of which stand 493 feet tall at the highest blade tips." According to data provided by the FWS, "195 birds and bats and one moth were killed by five of the largest wind farms on Maui and Oahu since August 2007."

GENESIS SOLAR ENERGY PROJECT GOES ONLINE. KCET-TV Los Angeles (5/5, Clarke, 15K) reports that the Genesis Solar Energy Project has "gone online in the eastern desert of Riverside County." The project, approved by the Interior Department and the California Energy Commission in 2010, "hit speedbumps ranging from lawsuits to wildlife illnesses to unanticipated archaeological discoveries on the path to Thursday's figurative ribbon-cutting." The article notes that "unlike the Ivanpah Solar Electric Generating System that formally went online in February, which uses thousands of huge flat mirrors to focus sunlight on boilers atop power towers, Genesis uses a far more thoroughly tested technology: parabolic trough-shaped mirrors that focus sunlight on a pipe running through each trough." As a result, Genesis "avoids causing the wildlife damage from concentrated solar flux increasingly seen at Ivanpah."

OBAMA ADMINISTRATION'S "DOUBLE STANDARDS" ON ENFORCEMENT OF WILDLIFE LAWS CRITICIZED. For the National Review (5/6, 879K), Robert Bryce, a senior fellow at the Manhattan Institute, notes that the American Bird Conservancy, "on Thursday announced its intent to sue the Interior Department and the Fish and Wildlife Service over the agencies' plan to grant wind-energy companies permits to kill eagles for up to 30 years." Bryce writes that the lawsuit "exposes, yet again, the legal double standard that exists with regard to enforcement of two of America's oldest wildlife-protection laws, the Migratory Bird Treaty Act (enacted in 1918) and the Bald and Golden Eagle Protection Act (enacted in 1940)." According to Bryce, "over the past few decades, the Interior Department and the Fish and Wildlife Service have brought hundreds of suits against the oil and gas industry, as well as the electric-utility sector, for unauthorized bird kills," but "despite widespread evidence of bird kills by wind turbines, those agencies have brought only one enforcement action against the wind industry."

Onshore Energy Development:

PODESTA TOUTS ADMINISTRATION ENERGY ACHIEVEMENTS. The Washington Times (5/6, Wolfgang, 455K) reports that GOP critics and "some in the energy industry" have "often" accused President Obama of being "hostile to fossil fuels," but the White House on Monday "issued a strong endorsement of the domestic oil and gas boom and the controversial drilling technique that has made it possible." At a White House press briefing, John Podesta "said massive increases in U.S. oil and gas extraction — made possible by fracking — are helping to reduce carbon emissions and have had clear economic benefits." Podesta said that fracking and natural gas offers a "bridge, if you will, from a world in which there are still needs for fossil fuels to power our economy to a world in which we can get more from zero-carbon sources of energy. We think it's a practical and viable way to reduce emissions in the short run."

The "Post Politics" blog of the Washington Post (5/5, Eilperin, 4.22M) reports that Podesta said that "Democrats can run this fall on the fact they have bolstered the nation's oil and gas industry while tackling global warming." At the press briefing, Podesta stated, "In 2012 and 2013, it accounted for .22 and .24 percent of growth, which is the highest on record. ... We've added 133,000 jobs in the last three years in the oil and natural gas extraction sector, and those numbers are projected to continue to grow."

Politico (5/6, Goode, 73K) reports Podesta believes that "congressional attempts to trump EPA's climate rules will fail." He stated, "They'll find various ways, particularly in the House, to try to stop us from using the authority we have under the Clean Air Act. ... All I would say is that those have zero percent chance of working," he said. "We're committed to moving forward with those rules." The Washington Examiner (5/6, 335K) reports Podesta stated, "We're committed to maintaining the authority and the president's authority to ensure that the Clean Air Act is fully implemented." Roll Call (5/6, Dennis, 76K) reports Podesta said that "climate change is clear, and 'we need all hands on deck' to fight it to avoid the most catastrophic effects."

During the press briefing, The Hill (5/6, Barron-Lopez, 237K) reports, Podesta "indicated that President Obama would veto an energy efficiency bill set to be debated in the Senate this week if it is approved with 'unacceptable riders.'" He stated, "We hope that it passes, but if it passes with unacceptable riders, then it will be headed to the watery depths."

USGS: FRACKING CONTRIBUTING TO INCREASE IN OKLAHOMA EARTHQUAKES. NPR (5/6, Neuman, 519K) reports in its "The Two Way" blog that the USGS says "a dramatic spike" in Oklahoma earthquakes "is due in part to fracking and that it has increased the danger of a damaging quake in the central part of the state." A USGS report says, "The recent earthquake rate changes are not due to typical, random fluctuations in natural seismicity rates."

Also reporting on the story is the AP (5/6, Mcbride).

COURT DENIES MINING COMPANY PAYOUT FOR EXPECTED PROFITS. The AP (5/6) reports that "a federal court says a company's arguments that it lost out on up to \$123 million in uranium mining revenue in northern Arizona are premature." VANE Minerals LLC filed the complaint after the Interior Department "instituted a 20-year ban on new mining claims around the Grand Canyon." The firm claimed that the ban is "an unconstitutional taking of property and that it's entitled to compensation for expected profit loss." But because VANE hasn't proved "sufficient quantity and quality of uranium ore" for "any of its 678 unpatented claims," the court "dismissed the complaint last week at the request of the federal government."

ADDITIONAL COVERAGE OF OPEN HOUSES ON FOUR CORNERS POWER PLANT AND NAVAJO MINE. Additional coverage of the open houses being held to discuss the Four Corners Power Plant and Navajo Mine was provided by the Cortez (CO) Journal (5/5, 646).

Offshore Energy Development:

STUDY ESTIMATES TOTAL BIRD DEATHS FROM DEEPWATER HORIZON AT AROUND 800,000. The New York Times (5/6, Schrope, Subscription Publication, 9.65M) reports on a new study of bird deaths caused by the Deepwater Horizon oil spill produced for a law firm representing clients with claims against BP. While about 3,000 bird carcasses were found at the time, the study estimates total bird deaths of about 800,000 and an uncertainty range of 160,000 to 1.9 million. The study used two modeling techniques, one of which made use of

"daily winds and currents," and another that focused on the daily "locations of oil slicks," connected to "numbers and habits" of offshore birds. The study's authors explained that so few carcasses were found because winds and currents carried them away from the coast.

BP'S MINGE TALKS GULF DRILLING, US SHALE GAS. Platts (5/6, 2K) reports BP America CEO John Minge said yesterday that "four years after the Macondo oil spill, BP has 11 operated rigs running in the US Gulf of Mexico, the most the company has ever had there at one time." He added that the company plans to "spend \$10 billion over the next five years in the deepwater US Gulf, which amounts to about 10% of its worldwide exploration and production budget and makes the company the largest investor in that arena." Minge stated, "Our business is back; it's strong and it's gaining momentum. ... It wasn't long ago when the common belief was that the region was played out, that deepwater wasn't going to work and it was better to head off to other places. But we had [employees] who said there's more there, and convinced the leadership to invest further."

The FuelFix (5/5, 7K) reports that it is difficult "for BP to compete in U.S. shale because it's a market unlike any other that Big Oil knows well." Minge said yesterday that "international oil companies are trying to make gains on private equity and smaller independent producers that can move rapidly." At the Offshore Technology Conference, Minge said, "I think the market is really different. ... It's very dynamic, lower-margin, lean business that's better suited for the independent style. It's hard for a super major to compete with that."

Also at the conference, the FuelFix (5/5, 7K) reports BP's head of technology and research David Eyton said that "most of the world's future oil and gas reserves won't come from new discoveries, but by finding ways to get more oil from regions the industry already has already developed." He stated, "We've probably reached the time, amazingly, when there's as much to be got extra out of the oil fields we have discovered as there is to be found in new fields."

Minge Expresses BP's Commitment To America. In a commentary for FuelFix (5/5, 7K), BP America CEO John Minge writes that "BP estimates that by 2035, the world will need around 40 percent more energy than it uses today" and "that is good news" because "energy means jobs, a higher standard of living, and fewer people living in poverty." As a company, Minge says "We've become a smaller, simpler, more focused company, playing to our strengths by returning to our roots as explorers and drillers, and emphasizing value over volume." Minge concludes, "Many challenges lie ahead, but BP is committed to America and is committed to the Gulf of Mexico. That combination is vital to helping meet the world's energy challenge."

ENERGY INDUSTRY CONFERENCE COVERS PUBLIC PERCEPTION, TECHNICAL CHALLENGES. The Houston Chronicle (5/6, Dlouhy, Eaton, Holeywell, 2.23M) reports on the Offshore Technology Conference. Former Assistant Energy Secretary James Slutz of Global Energy Strategies said that Federal policymakers often don't distinguish between "deep-water development, shallow-water drilling and hydraulic fracturing in unconventional plays," so issues in one area can affect other parts of the industry. Meanwhile, executives said that "oil and gas development presents big public perception challenges" and suggested "the industry needs to step up its game in minimizing risks and in communicating that work to the public." Meanwhile, technical challenges, such as recovering more oil from existing wells, "are the central topic at this week's conference."

Tackling America's Water Challenges:

SPRING RUNOFF BEGINS TO FLOW INTO BIG THOMPSON CANYON. The Estes Park (CO) Trail-Gazette (5/6, 13K) reports that "with runoff starting to increase in the Big Thompson Basin," the BOR increased "outflow from Olympus Dam, at the east side of Estes Park, into the river Monday morning." Kara Lamb, public information officer for the bureau, said "the flow was gradually increased through the day from 40 cubic feet per second to about 140 cfs." Lamb said, "The heat over the next few days will likely increase nightly runoff inflows to Lake Estes, which will pass on through Olympus Dam to the canyon. So far, runoff inflows have been typical for this time of year."

Also covering the story are the Fort Collins (CO) Coloradoan (5/5, 59K) and KMGH-TV Denver (5/6, 30K).

RIO GRANDE TO RECEIVE EXTRA WATER FOR SILVERY MINNOWS. The Albuquerque (NM) Journal (5/6, 282K) reports that beginning Wednesday, the Rio Grande, "parched by drought, will get a shot of extra water, a

simulated spring runoff peak, to try to nurse along the dwindling population of endangered Rio Grande silvery minnows." The article notes that "river managers began releasing water Monday from Abiquiu Reservoir on the Rio Chama," and "by sometime late Wednesday night, the Rio Grande through Albuquerque is expected to be more than twice its current size." According to Mike Hamman, head of the BOR's Albuquerque office, "water managers hope the artificial runoff pulse will encourage whatever fish remain in the river to spawn."

BOR FORECASTS LOWER WATER RELEASE FROM LAKE POWELL TO LAKE MEAD FOR 2014. The Lake Powell (AZ) Chronicle (5/6, 7K) reports that "as part of its ongoing management of Colorado River reservoirs," the BOR has "determined that, based on the best available data projections of Lake Powell and Lake Mead reservoir elevations, under the 2007 Colorado River Interim Guidelines for Lower Basin Shortages and Coordinated Operations for Lake Powell and Lake Mead (2007 Interim Guidelines) a release of 7.48 million acre-feet (maf) from Lake Powell is required in water year 2014 (Oct. 1, 2013 – Sept. 30, 2014)." According to the article, "an annual release of 7.48 maf is the lowest release since the filling of Lake Powell in the 1960s. Lake Mead is projected to decline an additional eight feet during 2014 as a result of the lower Lake Powell annual release; however, Lake Mead will operate under normal conditions in calendar year 2014, with water users in the Lower Colorado River Basin and Mexico receiving their full water orders in accordance with the 2007 Interim Guidelines and the 1944 Treaty with Mexico." Upper Colorado Regional Director Larry Walkoviak said, "This is the worst 14-year drought period in the last hundred years. Reclamation's collaboration with the seven Colorado River Basin states on the 2007 Interim Guidelines is proving to be invaluable in coordinating the operations of the reservoirs and helping protect future availability of Colorado River water supplies."

FORMER ALCOVA SUPERINTENDENT SUES NATRONA COUNTY FOR DEFRAUDING BOR. KTWO-AM Casper, WY (5/6, 576) reports that "the former superintendent of Alcova Reservoir claims in a federal lawsuit that Natrona County's Road and Bridge Department filed false financial reports about Alcova, Pathfinder and Gray Reef reservoirs amounting to more than \$1 million to the US Bureau of Reclamation, according to court records." According to Charles Loraas and the Wyoming US Attorney's office, "While creating the appearance that it was operating the Reservoirs at a loss, the County has for the most part actually operated the Reservoirs at a profit and has diverted those profits to county uses other than Reservoir maintenance and operation." The lawsuit was filed on Oct. 18, 2013, and US District Court Judge Alan Johnson unsealed the complaint on May 1.

Empowering Native American Communities:

TRIBAL RIGHTS PIONEER BILLY FRANK JR. DIES. The Kitsap (WA) Sun (5/5, 91K) reports that Billy Frank Jr., "a tribal fisherman who led the 'fish wars' that restored fishing rights and helped preserve a way of life for American Indians in the Northwest four decades ago, died Monday." In a statement released by the White House, President Barack Obama said, "Billy never stopped fighting to make sure future generations would be able to enjoy the outdoors as he did, and his passion on the issue of climate change should serve as an inspiration to us all."

Also reporting on the story is the Seattle Post-Intelligencer (5/5, 857K).

JUDGE PROMISES QUICK DECISION IN CHEROKEE FREEDMEN CASE. The Oklahoman (5/6, 530K) reports that "after 11 years of sometimes contentious litigation, a federal judge said here Monday that he will soon decide whether the Cherokee Nation can bar citizenship to descendants of slaves who had been owned by tribal members." Senior U.S. District Judge Thomas F. Hogan "made the announcement after a hearing on the core issue in the case: whether an 1866 treaty between the tribe and the US government means Cherokee freedmen descendants must always have the same rights as native Cherokees." Hogan "voiced skepticism on Monday that the treaty allows the tribe to change its constitution to require tribal blood for citizenship."

Top National News:

OBAMA, BIDEN URGE HOUSE REPUBLICANS TO PASS IMMIGRATION REFORM. Remarks by the President and Vice President yesterday at Cinco de Mayo celebrations received little attention from English-language national media outlets. The comments were not covered by the network newscasts or mentioned on the top-rated cable news shows. Print coverage, meanwhile, highlighted the continued partisan split on the issue, and cast chances of an immigration package passing Congress this year as remote.

The AP (5/6) reported that at a gathering with "Latino lawmakers and Hispanic advocates," Obama urged them to "press House Republicans to act on a broad overhaul of immigration laws," saying, "Tell them to get on board." Justin Sink, in a blog entry for The Hill (5/6, 237K), notes that the President also "said he was 'convinced that America's prosperity and security' depended on passing an immigration bill, and accused House Republicans of refusing 'to allow meaningful immigration reform to move forward at all.'" Said Obama, "It's time for members of Congress and Republicans in the House to catch up to the rest of the country."

MSNBC's News Nation (5/5, 503K), meanwhile, showed Biden saying earlier in the day at a White House event, "When we pass immigration reform...we'll be saying: 'Hey, all these folks we treat with respect, view them as citizens, and they are as competent and capable and welcome as anybody else.'" In his comments, notes McClatchy (5/5, Clark, Subscription Publication, 23K), Biden defended "his remarks that 11 million undocumented immigrants are 'already American citizens.'" Said Biden, "They are Americans. ... They may not be citizens, but they are Americans. In the definition of Teddy Roosevelt, he said Americanism is not a question of birthplace or creed or line of descent, it's a question of principles, idealism, and character. And I would argue that those 11 million folks who have been here breaking their neck, working hard, they are Americans." In a blog entry for The Hill (5/6, 237K), Julian Sink similarly said Biden "defended his comments in Miami earlier this year," while the Washington Times (5/6, Dinan, 455K) says he "backed away from his claim earlier this year that illegal immigrants 'are already American citizens.'"

TIME (5/6, Miller, 24.1M) reports on its website that Biden also "demanded...that House Speaker John Boehner 'stand up' to those in his party who oppose immigration reform," saying, "It's time for John – he's a good man, John Boehner – to stand up and other Republicans to stand up. ... Not for us to stand up. We've already stood up. We've been right there. We stood up. It's time for him to stand up, stand up at not let the minority – I think it's a minority – of the Republican Party in the House keep us from moving in a way that will change the circumstances for millions and millions of lives."

The Daily Caller (5/5, Bordelon, 408K) noted that Biden also "promised...the Obama administration would stop all deportations of illegal immigrants, telling a heckling" activist, "We'll do that too, kid, but let me get finished [sic] my speech."

Roll Call (5/5, Eldridge, 76K) reports that "among those in attendance at the Biden breakfast, according to pool reports, were Jill Biden, Secretary of Labor Thomas E. Perez, Girl Scouts CEO Anna Maria Chavez, Democratic Reps. Rubén Hinjosa of Texas and Xavier Becerra of California and the Small Business Administration's María Contreras-Sweet." House Minority leader Nancy Pelosi, meanwhile, issued a statement Monday saying, "Whether on Cinco de Mayo or on any other day, the time is now for comprehensive immigration reform. ... And the time is now for House Republicans to emulate the bravery demonstrated in the Battle of Puebla...and give us a vote."

In the National Journal (5/6, Johnson, Subscription Publication, 561K), Fawn Johnson writes that immigration reform "was once a real thing on Capitol Hill," but "the groups lobbying for" it "have failed to gain traction with their strategy of shaming Republicans into action, leaving advocates confused and conflicted about where to go next." Johnson adds that "for the next Congress, the advocacy strategy, such as it is, will depend almost entirely on the results of the midterms," and on whether "Latino voters can show they can swing at least a few elections."

Reporting on the GOP, McClatchy (5/6, Ordonez, Lightman, Subscription Publication, 23K) ties the House caucus' "struggle" with the immigration issue as a sign of the party's "identity crisis," as "the party's establishment wing is hinting it wants to vote on some aspect of the issue before the midterm elections" and "hardcore conservatives, angry with" Boehner "for mocking their tactics in a speech last month, have vowed to be vigilant against letting any kind of distasteful legislation slip through to the floor." Adds McClatchy, "The GOP's uncertainty over immigration reflects the mood of a party continuing to grapple with who it is and what it wants to become."

In an analysis piece, the Washington Times (5/6, Dinan, 455K) calls Boehner "the key figure of immigration reform legislation this year," and "he has sent dramatically mixed signals about whether Congress will approve a bill." As a result, "advocates and opponents of immigration reform now say they don't know where the House speaker stands on the issue."

The Washington Times (5/5, McLaughlin, 455K) also reports that "the GOP's Senate candidates are generally focusing on the enforcement side, calling for a crackdown," whereas "Republican presidential candidates have generally been to the left of their party on immigration, with George W. Bush and Sen. John McCain leading the pack."

On MSNBC's Martin Bashir (5/5, 615K), Brian Beutler of the New Republic said, "Republicans don't really have much substance to run on. They've returned to other scandals and are trying to goad the White House into overreaching on immigration reform, so they can turn that into an example of an unruly Obama administration. I think that is what's going on."

Reid: Immigration Reform Will Boost Tourism Industry. McClatchy (5/5, Lightman, Subscription Publication, 23K) notes the Senate "returned Monday for what could be a week of considering energy efficiency legislation," though "Senate Majority Leader Harry Reid wanted to talk about immigration." Said Reid, "The Senate immigration bill would make it easier for tourists to come to America by increasing the number of customs and border control agents who process international visitors."

Longoria, DNC Launch Latino Outreach Program. USA Today (5/6, Gomez, 5.82M) reports that yesterday, "a high-profile group led by actress Eva Longoria and Democratic National Committee finance chairman Henry Munoz III launched the Latino Victory Project to do just that," while "across the country, smaller groups are organizing citizenship and voter registration seminars to walk Hispanics through the complicated application process." However, some Latinos "simply aren't sure they want to stay in the USA," and "others can't afford the price of admission" with UCIS charging high fees to apply for citizenship. Moreover, "the biggest deterrent...is fear of the unknown," with some immigrants apprehensive about "what would happen if" an application for citizenship is rejected.

Supreme Court Rejects Challenge To Nebraska City's Immigration Ordinance. The AP (5/6) reported that the Supreme Court on Monday "rejected a challenge to a Nebraska city ordinance that bans renting homes to immigrants living in the country illegally," letting stand "an appeals court ruling that found the ordinance doesn't discriminate against Latinos or interfere with federal immigration laws."

Report Alleges Lack Of Discipline At CPB. The New York Times (5/6, Cave, Subscription Publication, 9.65M) reports that according to an American Immigration Council review "of 809 abuse complaints" regarding agents of Customs and Border Protection near the Southwest border from 2009 to 2012, "only 13 led to disciplinary action," which was usually "counseling." The story also points out the lack of a "unified system for reporting complaints." Acting deputy commissioner Kevin McAleenan is quoted saying that the agency "is committed to" doing its work "while preserving the human rights and dignity of those with whom we come in contact." The story explains that in the cases reported, "at least 60" included "kicking or stomping on detainees," while another 45 included being hit "with objects," six alleged "sexual abuse and 14 of improper searches or touching." It suggests that CPB and the Department of Homeland Security suffer from a lack of training and discipline.

ADMINISTRATION, DEMOCRATS UNDECIDED ABOUT TAKING PART IN SELECT BENGHAZI COMMITTEE. Television coverage of the Benghazi investigation was much lighter Monday evening than it was at the end of last week. Fox News was the only outlet to cover the story, as neither CNN nor the network news broadcasts mentioned it.

Bret Baier reported on FOX News' Special Report (5/5, 2.15M) that as the House select committee to investigate the attacks takes shape, Democrats are left "with a dilemma: whether to cooperate or whether to essentially boycott the effort completely." Catherine Herridge noted that the Administration and Democrats in the House say they are "undecided about the select committee and whether they should get involved. Part of the calculus is that boycotting the panel would limit their ability to respond to Republican allegations in the run-up to mid-term elections."

The Hill (5/5, Sink, 237K) reported that the White House indicated Monday that it may not cooperate with the select committee. White House Press Secretary Jay Carney said that while "the White House has 'always cooperated with legitimate oversight,'" the new probe is a "highly partisan effort to politicize" the attack. Carney said, "If you look at even what some Republicans have said, it certainly casts doubt on the legitimacy of an effort

that is so partisan in nature. ... I don't think there are many people, including some Republicans... who believe that this is necessary after seven congressional committees and multiple investigations."

Jonah Goldberg said on FOX News' Special Report (5/5, 2.15M) that while there has been "an unlimited number of investigations," there have also been "a very limited number of answers from the White House." Goldberg added, "If they have got nothing to hide and this is all just sort of spinning wheels, why haven't they released that information to get the Republicans to call off the dogs?"

The Washington Times (5/6, Wolfgang, 455K) reports that the White House "bashed" the select committee and "hinted it won't cooperate with the effort." The Times notes that Carney "dodged questions on whether the administration will fully cooperate with the investigation and said Republicans' motivation is clearly political."

The Huffington Post (5/5, Bendery, 11.54M) reported that State Department spokeswoman Marie Harf described the select committee as a "waste of time and taxpayer dollars," adding, "It's not necessary."

USA Today (5/6, Davis, 5.82M) reports that House Minority Whip Steny Hoyer said Monday that he will oppose creation of the select committee. Hoyer said, "We will urge members to vote 'no' on it." Nonetheless, "Republicans are expected to overcome Democratic opposition and approve its creation." Hoyer said "that Democratic leaders have not been contacted to discuss the panel, but he said it should have an equal number of members from both parties."

The Daily Caller (5/5, Pappas, 408K) reported that "some liberals don't want any Democrats to take part in the hearings." Liberal radio host Bill Press wrote on Twitter Monday, "Member of Congress told me she will urge Nancy Pelosi to appoint NO Democrats to Special Benghazi Committee. ... She's right!"

George Will said on FOX News' Special Report (5/5, 2.15M) that if Democrats "are clear thinking, they won't participate" in the select committee, adding, "I don't see what's in it for them and it will reduce the committee to being apparently a partisan enterprise. It will give the media an excuse not to cover it and again they will have the advantage of being able to say to the public we don't need a ninth committee hearing on this."

In an op-ed for USA Today (5/6, Rabin-havt, 5.82M), Ari Rabin-Havt, host of The Agenda on SiriusXM Progress 127 and author of The Benghazi Hoax, blasts Boehner's decision to form the select committee, calling the effort "nothing short of an in kind expenditure on behalf of the Republican National Committee, hoping to weaken Democrat's electoral chances." Similarly, Juan Williams said on FOX News' Special Report (5/5, 2.15M) that "this is a political issue" aimed at derailing Hillary Clinton's presidential aspirations.

The Hill (5/5, Berman, 237K) reported that the select committee is "shaping up to be an election-year spectacle that carries risks for both Republicans and Democrats heading into November." The "sudden shift to Benghazi threatens to take Republicans off what they said would be a laser-like focus on the economy and jobs, an issue central to the 2014 midterm election." Meanwhile, Democrats "say that most voters, with the exception of conservative activists, have moved on from the Benghazi debate." However, Julian Zelizer, a political analyst at Princeton University, said that if they decide to boycott the committee entirely, Democrats "would be giving up their seat at the table and would allow Republicans to make accusations without rebuttal in hearings that are likely to generate significant media attention."

Gowdy To Lead Select Committee Investigation. Reuters (5/6, Zengerle) reports that House Speaker Boehner has tapped Rep. Trey Gowdy to lead the select committee investigation, saying in a statement, "I know he shares my commitment to get to the bottom of this tragedy and will not tolerate any stonewalling from the Obama administration."

The Washington Times (5/6, Klimas, Dinan, 455K) describes Gowdy as an "up-and-coming member of the House GOP," who has "already gained a reputation as a relentless investigator."

Roll Call (5/5, Hawkings, Subscription Publication, 76K) reported that before his election to Congress, Gowdy "spent a decade as the district attorney in his home town of Spartanburg, and for six years before that he went after federal crimes as an assistant U.S. attorney." In Congress, "he has developed a relatively unusual reputation for a Republican propelled into office by the tea party wave," winning praise "from many Democrats for his

lawyerly, principled and evenhanded approach to both legislating and investigations of the executive branch.”

USA Today (5/6, Dorell, 5.82M) notes, however, that some Democrats say that Gowdy “may be far too partisan to chair a select committee in which he must handle the investigation with even-handedness.”

Catherine Herdige reported on FOX News’ Special Report (5/5, 2.15M) that documents reviewed by Fox News “show there may be other problems. Two emails from September 14th, 2012 were released as a result of a Federal lawsuit by the conservative group Judicial Watch. While most of the document was redacted, the names were not. But the same email sent to Capitol Hill had the names dropped.” Herdige added that “the same pattern is found in the September 12th email. The Judicial Watch document has fewer redactions.” Herdige added that “as part of its defense, the State Department cited the release of this September 2012 White House email that tried to shape the public opinion.” State Department spokeswoman Marie Harf was shown saying: “Nothing was redacted from it when it was released to the Hill. I think actually there was been some inaccurate reporting.”

In his column for the Washington Post (5/6, Thiessen, 4.22M), Marc A. Thiessen writes that if the President’s claim that he was “only repeating what the intelligence community told him when his administration asserted that the attack in Benghazi began with a spontaneous protest inspired by an Internet video,” the Administration should give the select committee “his daily intelligence briefings that show exactly what he was told.” Congress, Thiessen writes, “should ask the president to follow precedent and release the PDBs he received in the days after the Benghazi attack.”

Commentators Accuse Administration Of Secrecy On Benghazi. A pair of commentators cite what they see as the Administration’s secrecy with regard to the Benghazi attacks as the reason for the ongoing Republican investigation.

Fox News senior political analyst Brit Hume said on FOX News’ Special Report (5/5, 2.15M) that White House spokesman Jay Carney was correct when he said the facts will not change, but “the problem is we still don’t know the facts,” including “where Susan Rice came up with her assertion” that the attack “stemmed from a protest that got out of hand in reaction to an Internet video.” Hume noted that video claim “did not fit the known facts, but it certainly fit the political needs of a President up for reelection and a Secretary of State hoping eventually to succeed him.”

In his column for the Washington Post (5/6, Milbank, 4.22M), Dana Milbank is more critical of the investigation, but notes that if Republicans are able to gain traction from it, “the Obama White House can blame its own secrecy and obsessive control over information.” Milbank argues that the Administration “unwittingly gave the matter new life by disobeying the first rule of crisis management: Get all information out there, quickly.” Milbank writes that “Carney and his colleagues’ opacity made their Benghazi problem worse.”

WPost: Investigation Distracts From Administration’s “Actual Failings In Libya.” An editorial in the Washington Post (5/6, 4.22M) argued that while Republicans “have a potentially strong case to make against the Obama administration’s handling of Libya,” to the extent that the select committee probe “zeroes in on the behavior of White House aides and other U.S. officials in Washington following the Benghazi attack — as it appears likely to do,” it will “address the least substantial and blameworthy aspect of the Libya record.” The Post argues that while Republicans “may calculate that scandal-mongering about a Benghazi cover-up may rally the base before the fall’s elections,” their efforts will not “hold the Obama administration accountable for its actual failings in Libya.”

Brock Urges CBS News To Reopen Probe Of Discredited “60 Minutes” Benghazi Report. The Huffington Post (5/5, Calderone, 11.54M) reported that David Brock, chairman of the progressive media watchdog Media Matters, is urging CBS News to reopen its “internal investigation over its discredited ‘60 Minutes’ report on the Benghazi attack.” In a letter to CBS News chairman and “60 Minutes” executive producer Jeff Fager and CBS News President David Rhodes, Brock wrote a New York magazine story “raises critical questions about the validity of CBS’ investigation,” adding, “Re-opening the investigation is warranted as it now appears that CBS’ internal investigation was not thorough, was wrong on critical points, and omitted key facts – facts that would have revealed that Logan’s report was tainted by partisanship and unprofessional conduct.”

PEW, CNN POLLS SHOW GOP POSITIONED FOR BIG GAINS IN NOVEMBER. The Los Angeles Times (5/6,

Lauter, 3.46M) reports that a new Pew Research Center/USA Today poll released on Monday shows that Republicans "have a strong advantage which, if it holds up, would likely translate into significant gains in Congress." The poll shows that 47% of registered voters said they will vote for the GOP candidate or lean towards voting for the Republican, while 43% said the same of the Democrats. The Times adds that the GOP has "a particularly strong lead with groups of voters who tend to turn out in midterm elections," for example, leading 55%-37% among men 50 and older. In addition the GOP has a 50%-39% lead in the South, "where several of the most hotly contested US Senate races are taking place this year."

Politico (5/5, Topaz, 73K) reports that among independent voters, the GOP holds a 49%-33% lead in the generic ballot. Two months ago, a similar poll showed the Democrats with a 46%-44% lead on the overall generic ballot. The poll also suggests, Politico says, that the President "will likely be more of a liability for Democrats than he was in 2010." Meanwhile, a CNN poll released on Monday showed Republicans leading the generic ballot 46%-45% among registered voters. The Pew poll surveyed 1,501 adults from April 23-27 (the number of registered voters was not reported), while the CNN poll surveyed 911 registered voters from May 2-4.

The Christian Science Monitor (5/6, Feldmann, 566K) considers if the midterms are "really a referendum" on the President, and says that the Pew poll "suggests not." The Monitor adds that the poll shows that 54% of registered voters "say that Obama will not be a factor in their vote this fall," while 26% "do see their vote as a vote against him," and "only" 16% "see it as a vote for the president." The Monitor looks at the generic ballot and several other questions in the Pew survey, and says, "The real issue for Democrats is whether they can motivate their voters to show up at the polls."

Manchin Wouldn't Campaign With Obama If He Were Up This Year. Politico (5/5, Topaz, 73K) reports that West Virginia Sen. Joe Manchin (D) isn't up for reelection this year, "but he sure knows that he wouldn't campaign with President Barack Obama if he were." On MSNBC's Morning Joe on Monday, Manchin "flatly said 'no' when asked if he would appear with the president at campaign rallies in his home state if he were in a race this year."

Warren Says President Chose Wall Street Over Ordinary Americans. The Huffington Post (5/5, Carter, 11.54M) reports that Massachusetts Sen. Elizabeth Warren (D) "discussed her relationship" with President Obama in an interview with HuffPost Live on Monday, "faulting his administration for being too close to big banks, but praising his support for Warren's brainchild, the Consumer Financial Protection Bureau." Warren said, "I've made no secret about my disagreements with the administration's policies, particularly as they relate to the largest financial institutions. Like I say in the book, the president chose his economic team, and when there was only so much time and so much money to go around, his economic team chose Wall Street instead of American families who were in trouble."

Robinson Urges Democrats To Highlight Successes. In his column for the Washington Post (5/6, 4.22M), Eugene Robinson writes that Democrats should focus on the latest round of positive economic news, such as the drop in the unemployment rate, the strong job creation in April, and the rising stock market. Robinson says that "numbers prove that Obama is, in fact, a skillful capitalist who guided the economy out of its worst slump since the Great Depression." Robinson says that the ACA "is clearly a success and may soon be seen as a triumph." Because of Obama's policies, Robinson says, Democrats "now have a positive story they can tell in their campaign ads and speeches."

Editorial Wrap-Up:

NEW YORK TIMES. "Mr. De Blasio's Moon Shot." The New York Times (5/6, Subscription Publication, 9.65M) editorializes on New York City Mayor Bill de Blasio's affordable housing plan, noting that "the mayor and local pols exulted over the plan's breadth and ambition." It praises the plan for a number of ideas but says it still leaves many questions, particularly about what effects the plan for greater housing density would have on the feel of the city and the infrastructure of roads, subways, and schools. The Times sees the plan as big and ambitious and focuses on the "hard and fast number: 200,000 or bust."

"A Defeat For Religious Neutrality." In an editorial that calls the Supreme Court's ruling on prayer "lamentable," and says it "brushed past...core" Constitutional "values," the New York Times (5/6, Subscription Publication,

9.65M) states, "It was disappointing that the Justice Department urged the justices to uphold the prayer practice in the town hall meetings, which skirted the constitutional principle of religious neutrality and caused some residents to feel like outsiders."

"Protectionism Will Only Hurt France" An editorial in the New York Times (5/6, Subscription Publication, 9.65M) decries efforts by French President François Hollande's economy minister, Arnaud Montebourg, "to thwart General Electric's proposed acquisition of an energy business from the French industrial company Alstom," on the grounds that "it would be better for France if the Alstom division was owned and managed by another European company, Siemens." The Times says that GE should not be excluded "simply because it's based in Connecticut." Noting that GE "has been doing business in France for more than 40 years," the Times argues that "discriminating against it on grounds of national origin will only hurt France" because protectionism will "discourage non-European businesses from investing in France, further damaging a sluggish economy that already suffers from a 10.4 percent unemployment rate."

"Republicans Have A Grimm Problem." In an editorial, the New York Times (5/6, Subscription Publication, 9.65M) notes that the filing deadline in New York has passed for Republicans to replace Rep. Michael Grimm on the primary ballot, and the only way the party could legally have "a new candidate...placed on the ballot" would be if "the existing candidate dies or decides to seek another office." In this instance, "Grimm would first have to agree to step aside, then announce his intention to run for, say, a judicial position in the Bronx." Under New York law, a candidate "can't run for two offices simultaneously," so Grimm "would have to withdraw from the congressional race and" the GOP then "would choose another candidate to run in his place." The Times adds, "The law should be amended to make it far easier for candidates to remove themselves from the ballot on their own initiative."

WASHINGTON POST. "Obama's Real Libya Failure." An editorial in the Washington Post (5/6, 4.22M) argued that while Republicans "have a potentially strong case to make against the Obama administration's handling of Libya," to the extent that the House select committee probe "zeroes in on the behavior of White House aides and other U.S. officials in Washington following the Benghazi attack — as it appears likely to do," it will "address the least substantial and blameworthy aspect of the Libya record." The Post argues that while Republicans "may calculate that scandal-mongering about a Benghazi cover-up may rally the base before the fall's elections," their efforts will not "hold the Obama administration accountable for its actual failings in Libya."

"Fix The Voting Rights Act Now." The Washington Post (5/6, 4.22M) editorializes on the Voting Rights Act, urging the Congress to act before the November elections in the wake of the Supreme Court's ruling last year that "hollowed out one of the most powerful parts of the law." It endorses a proposal by Rep. F. James Sensenbrenner Jr. (R-WI) and urges quick action to approve it.

"The Bugs Are Coming." The Washington Post (5/6, 4.22M) editorializes in response to the World Health Organization report that antibiotic resistance portends a world without effective antibiotics. The paper says past warnings have been "followed by silence and inaction." It hopes the forthcoming report by the President's Council of Advisors on Science and Technology will be followed by "a serious effort to address the problem."

WALL STREET JOURNAL. "The Feds Target Money Managers." The Wall Street Journal (5/6, Subscription Publication, 5.51M) in an editorial criticizes the Federal Financial Stability Oversight Council for its proposal to list large asset managers Blackrock and Fidelity as systemically important financial institutions. The move, says the Journal, would make them officially too big to fail. The Journal argues that this is inappropriate to the case as the firms do not hold deposits but only manage investments. The investors bear the risk of their investments, and other firms actually hold the money and financial instruments. The paper also argues that the move would increase risk to the financial system.

"Electoral Upset In Panama." An editorial in the Wall Street Journal (5/6, Subscription Publication, 5.51M) lauds the upset victory by Juan Carols Varela in Panama's presidential election, noting that Panama's burgeoning democracy is the real winner. The Journal notes outgoing President Ricardo Martinelli's decision to add his wife to his party candidate José Domingo Arias' ticket and praises Panamanian voters for rejecting the tactic.

"Prayer In The Public Square." In an editorial, the Wall Street Journal (5/6, Subscription Publication, 5.51M)

backs the Supreme Court's ruling on prayer, though it expresses dismay that it was backed by just five justices. In conclusion, the Journal accuses the dissenting justices of seeking to overturn long-standing precedent.

Last Laughs:

LATE NIGHT POLITICAL HUMOR.

Jimmy Fallon: "Of course, this weekend was the White House Correspondent's Dinner, and during his speech on Saturday, President Obama made fun of his low poll numbers, the botched Obamacare rollout, and Governor Chris Christie. If he's gonna do my job – ruined my whole weekend."

Jimmy Fallon: "Today, though, it was back to business for the President. And apparently, this morning he met with the President of the country Djibouti. Then Biden was like, 'Kim Kardashian's here?'"

David Letterman: "Let me be the first on behalf of the staff and crew here at CBS and 'The Late Show' to wish you a happy Cinco de Mayo, ladies and gentlemen. Earlier today, Joe Biden pardoned a burrito."

Judge granted 6-month ext on Gunnison

Greenberger, Sarah <sarah_greenberger@ios.doi.gov>

Tue, May 6, 2014 at 1:43 PM

To: Sally Jewell (b)(6)@ios.doi.gov

Cc: Tommy Beaudreau <tommy_beaudreau@ios.doi.gov>, Nicole Buffa <nicole_buffa@ios.doi.gov>

Sally - wanted to be sure you know that the judge granted the FWS motion for a 6-month extension to make a final listing decision on the Gunnison sage-grouse. New date is Nov. 12.

Gives FWS the time they need to address new information in the record as well as propose and take comment on a 4(d) rule.

Sarah

DOI in the News:

SECRETARY JEWELL ANNOUNCES ENERGY DEVELOPMENTS IN INDIAN COUNTRY. The [Nation Sun News](#) (5/8) reports that Interior Secretary Sally Jewell made announcements regarding energy development in Indian Country on Wednesday in Arizona.

Secretary Jewell Announces \$700,000 In Tribal Energy Grants. The [AP](#) (5/8, Tang) reports that Jewell announced Wednesday \$700,000 in grant funding for nine tribes to spur renewable energy development in Indian Country. The grants will "be awarded to federally recognized tribes and will pay for efforts to build their capacity

for energy and mineral resource development." The funds would also "enable tribes to develop their own regulations in working with power purchase agreements with utilities." Jewell said, "The objective of this administration is to make sure that we support a clean energy future. Part of that is working closely with Indian tribes where tremendous amount of energy potential exists, which drives economic opportunity for tribes."

Coverage by the AP was also picked up by the Fresno (CA) Bee (5/7, 352K), the Sacramento (CA) Bee (5/7, 687K), the Arizona Daily Star (5/8, 389K), the Arizona Daily Sun (5/8, 33K), KTVN-TV Reno, NV (5/8, 1K), and KTAR-FM Glendale, AZ (5/8, 17K).

Also reporting on the story are the Arizona Public Media (5/8, 2K) and KJZZ-FM Phoenix (5/8, 10K).

Secretary Jewell Announces Solar Project. The Arizona Republic (5/8, Randazzo, 1.45M) reports that Jewell also announced the approval of the 200-megawatt Moapa Solar Energy Center Project. Jewell said "it will generate about 500 construction jobs and about 10 permanent jobs."

The Las Vegas Review-Journal (5/8, Brean, 437K) reports that Kevin Washburn, the Interior Department's assistant secretary for Indian affairs, said, "This solar project is a tribute to the vision and determination of the Moapa Band of Paiute Indians as well as a great day for Indian Country as a whole."

Also reporting on the story is the KCET-TV Los Angeles (5/8, 15K).

INTERIOR WORKING WITH GSA TO RESOLVE CONCERNS ABOUT FEDERAL TRAVEL SYSTEM. The Federal Times (5/7, 120K) reports that the General Services Administration has "issued a 'notice of concern' about the stability and responsiveness of the Concur federal travel electronic booking system for federal agencies." The Interior Department, which is "experiencing problems with the implementation of the system, is working with GSA to make urgent system changes and fix current issues," according to Pam Haze, interior Department deputy assistant secretary. The Interior Department is also "reviewing obtaining compensation for costs incurred by problems in the system."

US BECOMES "CANDIDATE COUNTRY" FOR EXTRACTIVE INDUSTRIES TRANSPARENCY INITIATIVE. The World Bank (5/7, 11K) announces that the United States has decided to "become a 'candidate country' seeking to adhere formally to the Extractive Industries Transparency Initiative (EITI)." Interior Secretary Sally Jewell said, "US EITI implementation underscores President Obama's continued and unwavering commitment to leading by example in promoting transparency, accountability, and good governance, both domestically and globally. As stewards of the natural resources owned by every American citizen, the US Department of the Interior is proud to lead the USEITI effort to build on the existing transparency and accountability reforms to our natural resource management."

ADDITIONAL COVERAGE: SECRETARY JEWELL WARNS SAN DIEGO TO PREPARE FOR "TOUGH" FIRE SEASON. Additional coverage of Interior Secretary Sally Jewell's visit to San Diego to tout Wildfire Awareness Week was provided by the Christian Science Monitor (5/8, Goodale, 566K), the Sierra (CA) Sun Times (5/8), and KPBS-TV San Diego (5/6, 14K).

SEN. MURKOWSKI PRAISED FOR PUSHING FOR ROAD THROUGH THE IZEMBEK NATIONAL WILDLIFE REFUGE. Anchorage (AK) Daily News (5/7, 251K), John MacKinnon, executive director of the Associated General Contractors of Alaska, writes that Alaskans should thank Sen. Lisa Murkowski for "standing up for Alaskans and challenging Interior Secretary Sally Jewell's ill-informed decision rejecting a road in the Izembek National Wildlife Refuge." MacKinnon doesn't understand "how the 40 miles of World War II road throughout the refuge haven't had an irreversible effect but 11 miles of new road would be environmentally devastating."

America's Great Outdoors:

National Park Service:

BIOBLITZ BENEFITS NPS, KIDS. The National Geographic (5/7, 42.25M) reports on a recent BioBlitz event, which was "able to identify a record number of species in Golden Gate National Recreation Area." NPS Director

Jon Jarvis said, "We know that when you get a kid into the outdoors, this spark is ignited. And that spark can change their lives." However, Jarvis "acknowledges that, as much as BioBlitz is about the kids, the National Parks Service benefits from all of their eager eyes and ears absorbing everything around them." He said, "About 15 years ago, the National Parks Service launched the Natural Resource Challenge. And it was about, we need the baseline inventory of the natural resources that we're charged to manage. And then we need a routine monitoring program of those resources."

POACHERS CUTTING DOWN REDWOODS IN CALIFORNIA FORESTS. NBC Nightly News (5/7, story 10, 0:45, Williams, 7.86M) reported, "While we have a more extensive report on this next story in the days to come, we wanted to alert you to a nauseating sight in one of the most beautiful places, most breathe-taking places in our country. Someone sadly is poaching the giant redwoods in California, cutting into them with chainsaws, hacking into them for the burrowed sections of the wood, the out growths similar to large barnacles. They are prized for their wood-grain patterns. It's believed some of the poachers are meth addicts. The wood can sell for thousands of dollars. Our national treasures have paid a high price. These are thousand-year-old trees. Already, one has been killed and many of them have been permanently harmed."

COMMEMORATION TO MARK ANNIVERSARY OF WWII'S END TO BE HELD AT MEMORIAL ON THE MALL. The Washington Post (5/8, Ruane, 4.22M) reports that "Susan Eisenhower, the granddaughter of President Dwight D. Eisenhower, who served as the top allied commander in Europe during World War II, is set to lead a commemoration Thursday marking the 69th anniversary of the end of the war in Europe." The ceremony will be held at 11 a.m. at the World War II Memorial on the Mall. It is sponsored by the NPS and the Friends of the National World War II Memorial.

NPS TO ADOPT NEW SERVICE ANIMAL RULE. The Knoxville (TN) News Sentinel (5/7, 382K) reports that the NPS "plans to update its rules regarding service animals, starting with a more concise definition of what is, and what isn't, a legitimate service animal."

RUNNER LOSES FIGHT OVER PARKING DURING SHUTDOWN. The AP (5/8) reports that "a runner ticketed for parking at Pennsylvania's Valley Forge National Historical Park during the federal government shutdown has been told to pay up." John Bell's "\$100 ticket prompted supporters to hold a Patriot Run last fall on the public roads that cut through the park near Philadelphia." Bell's attorney says Bell will appeal Wednesday's decision by a federal judge.

NPS ACCEPTING APPLICATIONS FOR SMOKIES SUPERINTENDENT. The Knoxville (TN) News Sentinel (5/8, Collins, 382K) reports that the NPS is accepting applications through May 17 for a new superintendent for the Great Smoky Mountains National Park. NPS spokeswoman April Slayton said, "The selection of a superintendent for Great Smoky Mountains National Park is an important and complex process. The National Park Service is actively seeking the right candidate, who has the experience and leadership needed to lead one of the special and busiest parks in the nation and who can understand and embrace its communities, partners and important relationships." The new park superintendent will replace Dale Ditmanson, who retired in January.

ADDITIONAL COVERAGE OF NPS BAN ON DRONES. Additional coverage of drones in national parks was provided by the National Journal (5/8, Subscription Publication, 561K).

Bureau of Land Management:

HOUSE DEMOCRAT SAYS RESIDENTS WANT ARMED MILITIAMEN TO LEAVE BUNDY RANCH. The Los Angeles Times (5/8, Simon, Glionna, 3.46M) reports that Rep. Steven Horsford (D-NV), "whose district includes the ranch of a cattleman battling the federal government over grazing rights on public land...wants the rancher's armed supporters to leave." According to the Times, "armed militiamen, some openly brandishing semi-automatic rifles, have been posted outside the Bunkersville ranch of Cliven Bundy for weeks." Horsford is quoted as saying, "The community wants them to go."

ATV RIDERS WANT BLM TO OPEN UTAH TRAIL TO VEHICLES. USA Today (5/8, Hughes, 5.82M) reports that "a narrow trail snaking through a remote southeastern Utah canyon dotted with cottonwood trees and Indian ruins is the latest battleground in a long-running dispute between Western residents and the federal government

over public use of land." Led by San Juan County Commissioner Phil Lyman, "dozens of ATV riders are planning to rumble through Recapture Canyon near Blanding, Utah, on Saturday to protest the continuing closure of the trail to vehicles." The BLM "closed the trail to motorized use in 2007, and declined to reopen it despite repeated requests and protests from local government officials." But now, "invoking the name of Nevada rancher Cliven Bundy who fought with the BLM over cattle grazing, the ATV riders are planning a show of force." In a statement, BLM officials "reiterated the ATV protest is illegal, but declined to discuss how they planned to respond."

For the Daily Beast (5/6, 1.18M), Doug Peacock writes that San Juan County has "no special rights." As for "the laws closing those few wild areas to motor vehicle or ATV use," Peacock claims that "most public lands are far too open to vehicular use." He suggests that Recapture Canyon should be one of the "only several, mostly small areas where we have to walk the old-fashioned way."

BLM SEEKS FACILITIES TO CARE FOR WILD HORSES, DONKEYS. The Forum of Fargo-Moorhead (ND) (5/8, 10K) reports that the BLM is "soliciting bids for short-term hold facilities to house wild horses and donkeys." The bureau "needs to accommodate at least 200 animals for a one-year period, with a renewal option for four extensions." The BLM is looking for facilities in 17 states.

Also covering the story is KIFI-TV Idaho Falls, ID (5/8, 23K) and KTVN-TV Reno, NV (5/8, 1K).

BLM SEEK INPUT ON STEPS TOWARD HORSE ROUNDUP. The AP (5/8) reports that the BLM is "asking Utah residents and others to weigh in on a proposed wild horse roundup in Iron and Beaver counties." Officials say "they are studying how the potential roundup could affect plants and wildlife at the Bible Spring Complex."

CENTRAL ELECTRIC CEO CRITICIZES BLM POLICIES AT HOUSE HEARING. KTVZ-TV Bend, OR (5/8, 1K) reports that Dave Markham, CEO of Central Electric Cooperative in Redmond, "voiced criticism" of BLM policies in testimony on Capitol Hill Wednesday. Markham spoke at a House Natural Resources Committee hearing entitled "Keeping the Lights On and Reducing Catastrophic Forest Fire Risk: Proper Management of Electricity Rights of Way on Federal Lands." Markham "discussed examples of burdensome BLM delays on electricity rights of way and cited the agency's sage grouse proposal that could bankrupt utilities in Eastern Oregon."

ADDITIONAL COVERAGE OF RED RIVER DISPUTE. Additional coverage of the dispute over Red River property was provided by the Houston Chronicle (5/8, 2.23M).

Fish and Wildlife Service:

FWS ANNOUNCES MORE THAN \$16 MILLION IN GRANTS TO BOOST RECREATIONAL BOATING. The Scuttlebutt Sailing News (5/7) reports that the FWS announced on Wednesday "more than \$14.27 million in Boating Infrastructure Grant (BIG) program competitive grants to 10 states and the District of Columbia." The agency also will "provide approximately \$2.48 million to 27 states, commonwealths and territories willing to match smaller, non-competitive grants dedicated to boating infrastructure projects." FWS Director Dan Ashe, said, "Anglers and boaters make these grants possible, helping communities build and enhance facilities that provide recreational opportunities while supporting jobs and economic growth. These funds pay for floating docks, fixed piers, mooring buoys, sewage pump-out stations and other infrastructure that benefits fish and wildlife habitat while providing access for outdoor recreation."

Also providing coverage are the AP (5/8) and the Asbury Park (NJ) Press (5/7, 372K).

US REACHES AGREEMENT WITH PHILIPPINES ON GLOBAL WILDLIFE TRAFFICKING PREVENTION. The National Journal (5/8, Subscription Publication, 561K) reports that "a decade-long partnership between" the Interior Department and the Republic of the Philippines "began a new phase today with the signing of an agreement to help that country combat wildlife trafficking." FWS Director Dan Ashe "signed a Memorandum of Understanding with Philippine Department of Environment and Natural Resources Undersecretary, Analiza Teh, and the Director of the Bureau for Fisheries and Aquatic Resources, Asis Perez, to provide the Philippines Government with access to and use of the National Wildlife Forensics Laboratory." Under this agreement, "samples of wildlife and biota collected by Philippine law enforcement officials can be tested at the lab – results of which will be considered admissible evidence in Philippine courts – leading to greater success in the

prosecution of wildlife traffickers.”

FWS REVISES MOUNTAIN CARIBOU STATUS TO THREATENED. The AP (5/8, Geranios) reports that the FWS on Wednesday “downgraded the protected status of the last remaining herd of mountain caribou in the Lower 48 states from endangered to threatened.” Environmental groups “hailed the decision as good for the animals.” The Center for Biological Diversity said the decision “means the animals will continue to get the protection they need.”

Also covering the story are the Spokane (WA) Spokesman-Review (5/7, 210K) and the Oregon Public Broadcasting (5/8, 4K).

CONSERVATIONISTS CRITICIZE DESERT FLOWER PLAN. The AP (5/8) reports that “conservationists are condemning a proposed deal between” the FWS and state and county officials in Utah “intended to keep two rare species of desert flowers off the federal list of endangered species.” Environmentalists have been “trying for more than 30 years to win Endangered Species Act protection for the Graham’s and White River beardtongue species of penstemon.” The FWS “formally proposed listing of the plants last August,” but the service “issued a draft conservation agreement on Monday in conjunction with the Bureau of Land Management and others who say the deal would better protect the plants without the economic consequences a listing could have for oil exploration in northeast Utah and northwest Colorado.”

CONSERVATION GROUP SEEKS PROTECTION FOR RARE SALAMANDERS, FROG. The AP (5/8) reports that the Center for Biological Diversity is threatening to sue the FWS to “force action on petitions to give Endangered Species Act protection to four kinds of salamanders and a frog found in the Northwest.” The group filed a notice Wednesday of intent to sue. The notice says the FWS is “more than a year late in deciding on petitions to protect the Cascades frog, the Oregon slender salamander and three species of torrent salamander.”

FEDERAL COURT GRANTS REPRIEVE IN GUNNISON SAGE GROUSE LISTING. The Deseret (UT) News (5/8, 610K) reports that “opponents of a potential listing of the Gunnison sage grouse in western Colorado and southeastern Utah are celebrating a brief reprieve granted by a federal court to delay a decision for six months.” The extension, announced by the FWS, will “provide more time for the agency to assess the level of action necessary for the conservation of the species, which mostly lives on private land.” The additional time will also “allow the public to weigh in on a special rule regarding the ‘take’ provisions that would accompany an endangered species listing.”

FWS TO HOLD ENDANGERED SPECIES OPEN HOUSE MEETINGS ON SAIPAN AND GUAM. The Pacific News Center (5/8) reports that the FWS is holding open houses on Saipan and Guam. The meetings will “provide an opportunity for interested parties to learn about the process for proposing new threatened or endangered species under the US Endangered Species Act and proposing critical habitat.” The FWS is “considering whether certain species in Guam and the CNMI warrant protection under the Endangered Species Act through listing and critical habitat.”

STATES CONSIDER CONSTITUTIONAL AMENDMENTS TO PROTECT HUNTING, FISHING RIGHTS. The Sacramento (CA) Bee (5/7, 687K) reports that eight states – Alabama, Indiana, Michigan, Missouri, New Jersey, New York, Pennsylvania and West Virginia – “considering constitutional amendments to protect hunting and fishing rights.” The Humane Society opposes all the amendments. However, “it concentrates on fighting those, such as the one under consideration in Missouri, that are worded so broadly it would be difficult for lawmakers or voters to approve any hunting restrictions.”

OFFICIALS INVESTIGATE AFTER CALIFORNIA TREE TRIMMERS INJURE FIVE YOUNG BIRDS. The Sacramento (CA) Bee (5/7, 687K) reports that federal and state officials are investigating “after a contractor hired by the US Postal Service cut back trees in Oakland that are home to an endangered bird species, injuring five young birds – a possible violation of a federal law.” The Postal Service “ordered the contractor to trim four trees on Saturday surrounding a parking lot at the downtown Oakland post office, where black-crowned night herons and snowy egrets have nested for years and defecate on mail trucks parked below.” According to the article, “five black-crowned herons, an endangered species, had injuries consistent with falling from the tree and were taken to an International Bird Rescue in Fairfield.”

FWS RESEARCHERS INVESTIGATING DROP IN HERRING POPULATION. WGGB-TV Springfield, MA (5/7, 3K) reports that FWS researchers are "trying to figure out what's causing a massive drop in the local blueback herring population." According to the article, "using a special boat that sends out electrical currents," the team "stunned the fish swimming near the boat, allowing them to float to the surface and into their nets." Jennifer Lapis, public relations for FWS, said, "It's a win-win situation for both of us because what we're doing is helping to keep the Connecticut River, as a watershed, clean and bring back fish. Also for people to enjoy it."

Securing America's Energy Future:

Renewable Energy:

DOE AWARDS OFFSHORE WIND DEVELOPMENT GRANTS. The New York Times (5/8, Cardwell, Wald, Subscription Publication, 9.65M) reports that "the long-promised potential of offshore wind development along" the coastlines of the US "took a step toward fruition on Wednesday as the Department of Energy pledged up to \$47 million each to three projects it previously supported." The grants are designed "to help the projects, off the coasts of New Jersey, Oregon and Virginia, begin delivering electricity by 2017." In a statement Energy Secretary Ernest Moniz said, "Offshore wind offers a large, untapped energy resource for the United States that can create thousands of manufacturing, construction and supply chain jobs across the country and drive billions of dollars in local economic investment."

The Hill (5/8, Cama, 237K) notes that Moniz also stated, "The Energy Department is working with public and private partners to harness this untapped resource in a sustainable and economic manner." While Bloomberg BusinessWeek (5/7, Doom, 4.91M) notes that "the funding is aimed at 'bringing more clean, renewable energy to our homes and businesses, diversifying our energy portfolio and reducing costs through innovation.'"

The Washington Times (5/8, Ernst, 455K) reports that New Jersey state regulators "ejected a Chinese-backed windmill project twice, but that didn't stop the Department of Energy." The Federal government "has awarded \$47 million to sweeten the deal for a \$188 million project the Garden State has deemed too risky for ratepayers." Fishermen's Energy is seeking to install five wind towers off the coast of Atlantic City, and its "leadership hopes the infusion of cash will sway the New Jersey Board of Public Utilities, which up until this point has not been receptive to the project."

The AP (5/8, Parry) notes that the announcement by Moniz "did not mention that the New Jersey Board of Public Utilities has twice rejected the proposal, most recently in a vote last month." According to the board, Xiangtan Electric Manufacturing Group, the "Chinese company that would own 70 percent of the project" didn't "demonstrate financial integrity."

The Seattle Times (5/7, Song, 1.22M) reports that Principle Power of Seattle "will receive up to \$47 million in federal grants for its proposed floating wind farm in Coos Bay, Ore., pushing it closer to generating the nation's first utility-scale electricity from West Coast winds." The project "would use novel, triangular floating platforms to anchor turbines in the deep waters off the West Coast." Gov. Jay Inslee "said Principle's federal grants could help the Pacific Northwest take the lead on a pioneering technology."

The AP (5/8, Szkotak) reports that Dominion Virginia Power "will receive \$47 million over the next four years" from the Energy Department "to construct two wind turbines 26 miles off the coast for testing in ocean waters subject to hurricanes." The two 6-megawatt turbines will be adjacent to a lease area of 113,000 offshore acres Dominion successfully bid on in September. The AP notes that the turbines "use a U.S.-designed twisted jacket foundation to ensure that offshore turbines can withstand a harsh ocean environment," and Mary C. Doswell, senior vice president for retail and alternative energy solutions, said the turbines will use "innovative designs that will both lower the cost and lower the risk of future commercial scale offshore wind projects located in hurricane-prone regions."

The Richmond (VA) Times-Dispatch (5/8, 333K) quotes Doswell as saying, "This was a highly competitive process and we thank DOE for recognizing this demonstration project is using innovative designs that will both lower the cost and lower the risk of future commercial scale offshore wind projects located in hurricane-prone regions." The Times-Dispatch notes that the selection of Dominion Virginia Power's project drew praise from the

INDUSTRY ROLLING OUT NEW EMERGENCY WELL CONTROL DEVICES. FuelFix (5/7, 7K) reports that “four years after the Deepwater Horizon disaster spotlighted shortcomings in the blowout preventers intended to safeguard offshore wells, government regulators are still drafting long-promised regulations meant to boost the reliability of those critical emergency devices.” However, “the oil industry isn’t waiting for the mandates, first promised just months after the April 2010 blowout of BP’s Macondo well in the Gulf.” According to the article, “manufacturers are rolling out new blowout preventer designs that can withstand bone-crushing forces at the bottom of the sea and promise to contain crude blasting out of high-pressure reservoirs, as oil companies march into deeper, more treacherous offshore terrain.”

COMPANIES FOCUSING ON SAFETY, COST FOR NEW TECHNOLOGY TO REMOVE RIGS. FuelFix (5/7, 7K) reports that “the recent push to dismantle abandoned oil and gas infrastructure in the Gulf of Mexico has created a \$2.5-billion market for companies that supply the heavy lift boats and other salvage or demolition equipment.” The article notes that “with the sharp rise in the number of removals is a new focus on safety and cost.”

INDUSTRY RECOMMENDS FIXES IN BOEM’S SEISMIC SURVEYING ANALYSIS. EIN News (5/8, 1K) reports that API “objected to unnecessary restrictions on seismic surveys in comments submitted” to the BOEM on the “agency’s final programmatic environmental impact statement for proposed surveys in the Atlantic Outer Continental Shelf.” Erik Milito, API director of upstream and industry operations, said, “Seismic surveys are safe, highly regulated, and an essential step for exploring for oil and natural gas offshore. We support BOEM’s plan to authorize seismic surveys to explore the Atlantic OCS but have serious concerns about the restrictions proposed.”

ATTORNEY: GOVERNMENT HAS STEPPED UP OVERSIGHT OF OFFSHORE ENERGY. In an op-ed for the FuelFix (5/7, 7K), attorney Glenn Legge notes that “there’s been a lot of debate lately about whether the federal government has gone far enough to prevent another disastrous oil spill in the Gulf of Mexico.” According to Legge, “from an industry perspective, exploration and production in the Gulf now is more challenging than ever, and it’s safer than it was at the time of the Deepwater Horizon spill four years ago.” He writes that “the government has dramatically stepped up oversight with a significant increase in the amount of fines and penalties,” and “the number of regulatory investigations is rising, too.”

Tackling America’s Water Challenges:

CALIFORNIA LAWMAKERS WORKING ON ANTI-DROUGHT BILL. McClatchy (5/8, Doyle, Subscription Publication, 23K) reports that “beneath a placid surface, California lawmakers are furiously churning to keep an anti-drought bill afloat.” According to the article, “for an hour Wednesday morning, half-a-dozen House Democrats convened privately with Sen. Dianne Feinstein, D-Calif., to discuss her anti-drought legislation.” Feinstein’s “immediate balancing act now is to modify her 28-page bill enough to secure the five Republican Senate votes probably needed to reach the 60-vote threshold for ending a filibuster, all while not alienating Democrats.”

SETTLEMENT REACHED ON TRINITY RIVER FISH HATCHERY OPERATIONS. The Weaverville (CA) Trinity Journal (5/8, 12K) reports that the Environmental Protection Information Center and Western Environmental Law Center have settled a lawsuit with the BOR to “change the way the Trinity River Fish Hatchery will be run in the future.” The article notes that “the hatchery will reduce the number of coho salmon and steelhead it raises and releases.”

BOR HOLDING INFORMATIONAL MEETING ON JACKSON LAKE DAM. The Casper (WY) Star-Tribune (5/8, 90K) reports that the BOR is “holding an informational meeting to talk about streamflow forecasts and projected reservoir operations for Jackson Lake Dam and other Snake River Reservoirs.”

MANY US DAMS SAID TO HAVE OUTLASTED THEIR USEFULNESS. Patagonia founder Yvon Chouinard, executive producer of the new documentary “DamNation,” writes in a New York Times (5/8, Subscription Publication, 9.65M) op-ed that “of the more than 80,000 dams listed by the federal government, more than 26,000 pose high or significant safety hazards. Many no longer serve any real purpose” and “only about 1,750 produce hydropower. ... Put simply, many dams have high environmental costs that outweigh their value.”

Empowering Native American Communities:

INTERIOR ASKS SENATE TO OVERTURN SUPREME COURT'S TRIBAL RULINGS. The Law 360 (5/8, 18K) reports that Kevin K. Washburn, assistant secretary of Indian Affairs, on Wednesday asked the Senate Committee on Indian Affairs "to pass a pair of bills that would effectively overturn US Supreme Court decisions limiting the government's ability to put land into trust for a tribe and allowing more litigation attacking a casino property deal."

Top National News:

OBAMA SURVEYS DAMAGE CAUSED BY DEADLY TORNADOES IN ARKANSAS. Much of the coverage of President Obama's stop in Vilonia, Arkansas on Wednesday to tour the damage from fatal tornadoes last month consists of relatively straightforward accounts of the President's comments and pledges of Federal assistance. But some reports suggest that there were inevitable political overtones on Wednesday as the President appeared with Sen. Mark Pryor (D-AR), who is in a close race in a state where the President's approval numbers are exceptionally low.

With few exceptions, the coverage does not tie the President's survey of tornado damage to his efforts earlier this week to draw attention to the Administration's proposals regarding climate change. However, following a report on extreme weather conditions threatening crops in Kansas and Oklahoma, Brian Williams, on NBC Nightly News (5/7, story 5, 0:25, 7.86M), said he had "one more note on all the severe weather we have been seeing," which was that on Wednesday, the President "was in Arkansas...taking a look at the destruction from the tornadoes that ripped through that state ten days ago now, killing 15." Williams said the President "pledg[ed] that the Federal government will be there until these communities are all rebuilt." In a similarly brief item for the CBS Evening News (5/7, story 10, 0:25, 5.08M), Scott Pelley also said the President "promised" those affected by the tornadoes "that the Federal government will help them rebuild."

The Hill (5/7, Trujillo, 237K) noted that although "the trip came a day after the White House released a report that found climate change is raising temperatures and contributing to" natural disasters, the President "did not address the report in his brief remarks Wednesday." On Wednesday evening, ABC World News (5/7, lead story, 2:30, Sawyer) led with a segment on the "wild shift in the nation's weather underway right now," but did not mention the President's trip to Arkansas, nor the Administration's renewed focus on combating climate change.

USA Today (5/8, Jackson, 5.82M) reports that on Wednesday, the President "met with affected families and first responders, and toured gutted neighborhoods on foot." USA Today notes that the President was accompanied by Gov. Mike Beebe (D), Pryor, and Rep. Tim Griffin (R-AR). The AP (5/8, Kuhnhen) reports from Vilonia that the President "said he wanted to visit this small city...to make sure those grieving the loss of loved ones, their homes and treasured possessions know that they will not be forgotten." According to the AP, "After meeting privately with grieving families, emergency workers and local officials, Obama set out on foot through a section of Vilonia."

The Washington Post (5/8, Goldfarb, 4.22M) reports from Vilonia that "before beginning a three-day fundraising trip to California," the President "peered out the windows of Marine One at the wreckage inflicted on this Little Rock exurb, perhaps best known for being hit by a deadly hurricane three years ago." The Post also reports that FEMA Administrator Fugate, DHS Secretary Johnson, and ex-President Clinton "have all visited since the tornadoes hit."

The New York Times (5/8, Schmidt, Subscription Publication, 9.65M) says the President's "visit...was in many respects just like the many others he has made to disaster-ravaged communities across the country, but this one came with a bit of political intrigue." The Times points out that "among those greeting Mr. Obama when he landed in Little Rock was" Pryor, who is facing a challenge from Rep. Tom Cotton (R-AK), and "has tried, until recently, to distance himself from Mr. Obama and other Democrats." The Times says that in Vilonia, the President "made sure to point out the senator's leadership role in the tornado recovery efforts."

The Arkansas News (5/8, 1K) reports that Pryor "invited Obama to come to Arkansas." Max Brantley, in a post for the Arkansas Times (5/7, 105K), said that on Wednesday, Cotton "was in Washington...giving a slashing condemnation of the president as virtually un-American, on the very day Obama was getting an enthusiastic

welcome in Arkansas." Reuters (5/8, Holland) covers the President's stop in Arkansas under the headline "Obama Tours Arkansas Tornado Damage With Key Senate Democrat."

The Christian Science Monitor (5/8, Huynh, 566K) reports that while the President Obama "has never fared well on Election Day in the central Arkansas community of Vilonia...residents expressed gratitude Wednesday when Obama toured the damage and spoke to those affected by last week's deadly tomado." According to the Monitor, in 2012, the President "lost the Faulkner County vote by a 2-1 margin." The Arkansas Democrat Gazette (5/8, Lesnick, 438K) covers the President's reception by Vilonia residents under the headline "Feelings Mixed On Obama Visit To Hard-hit Vilonia."

Sam Hall, in a post for the Jackson (MS) Clarion Ledger (5/7, 206K) titled "Tomado Damage Not The Only Draw For Obama In Arkansas," said Mississippi lost the same number of residents to last month's tornadoes, but the President did not visit the state, and suggests the reason is that Mississippi does not have "a Democratic US Senator locked in a tight re-election fight."

Bloomberg News (5/8, Keane, 4.91M) notes that President Obama had not previously visited Arkansas as president and that Wednesdays' stop "comes at the start of a trip mostly focused on the midterm congressional elections." Bloomberg News says the President "added Arkansas to a previously planned three-day trip to California dominated by fundraising for Democratic House and Senate campaign committees and the national party." Among the other outlets with reports on the President's stop in Arkansas on Wednesday are the Los Angeles Times (5/8, Hennessey, 3.46M), the Washington Times (5/8, Wolfgang, 455K), TIME (5/7, Rhodan, 24.1M) and Voice of America (5/7, 21K).

HOUSE VOTES TO HOLD EX-IRS OFFICIAL LERNER IN CONTEMPT OF CONGRESS. While most major national newspapers covered the House vote to hold former IRS official Lois Lerner in contempt of Congress, television coverage was limited. The three broadcast networks ignored the vote, while MSNBC mentioned it only briefly during news updates and CNN not at all. Fox News and Fox Business gave the story more attention, with Fox News' Special Report leading with the story. Print and wire coverage generally focuses on the partisan divide over the contempt vote, as well as on what may come next.

Fox News' Special Report (5/7, Baier, 2.15M) opened by reporting that the House was voting "to hold a former IRS official in contempt of Congress and to push the Attorney General to get special help to investigate the IRS. ... Republicans say after a year of trying to get [Lerner] to talk about the targeting of conservative groups, she's now in contempt of Congress. Some Democrats say Lerner hasn't waived her Fifth Amendment right and opposed the measure."

The AP (5/8, Ohlemacher) reports the House voted 231-187 to hold Lerner in contempt and "also passed a nonbinding resolution calling on the Justice Department to appoint a special counsel to investigate the IRS." House Speaker Boehner said, "Who's been fired over the targeting of conservative groups by the IRS? No one that I'm aware of. Who's gone to jail for violating the law? When is the administration going to tell the American people the truth?" But Democrats called the vote "little more than an election-year ploy to fire up the GOP base."

USA Today (5/8, Korte, 5.82M) says that while just six Democrats backed the contempt measure, the nonbinding resolution passed 250-168. The Los Angeles Times (5/8, Memoli, 3.46M) says the six Democrats who voted for the contempt resolution are among "the most politically vulnerable" this year.

The Washington Post (5/8, Hicks, O'Keefe, 4.22M) reports that the contempt resolution means the US attorney for the District of Columbia can now "consider referring the matter to a grand jury for further review. It is unclear how the Justice Department will proceed." But the Wall Street Journal (5/8, McKinnon, Subscription Publication, 5.51M) says the next steps are unclear, since even bringing the matter before a grand jury would not ensure an indictment. The Christian Science Monitor (5/8, Kiefer, 566K) writes that while "legally, the point of filing a contempt charge is to compel someone to testify," if a judge finds Lerner in contempt, "she could face a fine of up to \$100,000 and jail time of up to 12 months."

Politico (5/7, Bade, 73K) reported that "House Republicans are daring the White House to ignore" the contempt vote. Some legal experts think the Justice Department "will refuse to take the citation to court," but others say that would be unprecedented and establish "a new tone that undermines Congress's contempt authority for

generations.”

The New York Times (5/8, Peters, Subscription Publication, 9.65M) calls the Lerner votes “the first in a series of steps intended to spotlight what they are convinced is a pattern of cover-up and political whitewashing” by the Obama Administration, to be followed by a likely vote Thursday “to establish a select committee to investigate the 2012 attack on American facilities in Benghazi.”

The Daily Caller (5/7, Howley, 408K) wrote that the Lerner votes “came just three days before the one-year anniversary of the IRS scandal” and “followed a highly divisive and emotional House floor session in which Republican lawmakers read stories of constituents who had been harassed, intimidated, and audited by the IRS and Democrats cited the McCarthy hearings to rail against their opponents in the House majority.” David Weigel, also noting in his Slate Magazine (5/7, 14.77M) blog that “the start of the scandal” was one year ago this week, said, “It took an awfully long time to get to here.”

Also reporting the story are Bloomberg News (5/8, Rubin, 2.76M), Reuters (5/8, Temple-West), McClatchy (5/8, Douglas, Subscription Publication, 23K), and the Washington Times (5/8, Dinan, 455K).

Rubio: “This Is A Legitimate Issue.” Sen. Marco Rubio (R-FL) said on Fox News’ Your World (5/7, Cavuto, 1.3M), “I think that, as a public official in such an important post, she has an obligation to share the truth with Congress and her role that she’s played. And the bottom line is that she’s refused to comply. In fact, the entire Administration has stonewalled this. This is a legitimate issue.”

Desjarlais Says Holder “Has Not Been Forthcoming.” House Oversight and Government Reform Committee member Rep. Scott Desjarlais (R-TN) said on Fox Business’ Lou Dobbs Tonight (5/7, Dobbs, 49K), “We’re asking for a special prosecutor because the Attorney General himself has not been forthcoming with documents in past hearings. ... I don’t think the American people have much confidence that this Administration is going to be forthcoming and that the Attorney General, who’s supposed to be the highest authority for law enforcement in the land, has also not been forthcoming.”

JUDICIAL WATCH SAYS ADMINISTRATION IS WITHHOLDING BENGHAZI DOCUMENTS. USA Today (5/8, Dorell, 5.82M) reports that the conservative watchdog group Judicial Watch claims that the Administration “continues to withhold documents that could shed light on how US officials produced its false narrative that the attack on the US Consulate in Benghazi arose from a non-existent protest over a video.” The group said in a statement that the documents “reveal ‘that the Obama administration is still refusing to provide the full details of how top officials arrived at the now-discredited talking points released to the public following the deadly assault on the US Mission in Benghazi, Libya,’” adding, “Though the State Department document repeatedly describes the material as ‘Unclassified’ or ‘Sensitive But Unclassified,’ it nonetheless justifies scores of extensive redactions and exemptions.”

Clinton Suggests There Is A Political Motive Behind Benghazi Investigation. ABC World News (5/7, story 2, 2:45) reported that in an interview, former Secretary of State Clinton was asked about the House select committee investigating the Benghazi attack and said that “she sees no reason for another investigation because there have been several investigations.” Robin Roberts of ABC News was shown saying: “Are you satisfied with the answers and are you content with what you know what happened?” Clinton: “Absolutely. I mean, of course, there are a lot of reasons why, despite all of the hearings, all of the information that’s been provided, some choose not to be satisfied and choose to continue to move forward. But they get to call the shots in the Congress.”

Investigators Likely To Examine Obama’s Actions On Night Of Benghazi Attack. The Washington Times (5/8, Boyer, 455K) reports that House investigators are likely to examine what the President “did or didn’t do on the night that the terrorist attack was unfolding 20 months ago.” The White House “has largely ducked questions about Mr. Obama’s actions during the crucial hours when US officials were debating how, or whether, to rescue the Americans under attack at US consulate in Libya.” Questions about the President’s actions “gained fresh prominence when a former White House national security aide, Tommy Vietor, said in a TV interview last week that Mr. Obama was not in the White House Situation Room around 10 p.m. on the night of the attack, when the president spoke by phone” to Clinton.

Gowdy: Investigation Could Continue Into 2016 Campaign. The Daily Caller (5/7, Treacher, 408K) cited a report from The Hill which noted that Rep. Trey Gowdy (R-SC), who will chair the select committee, told MSNBC's "Morning Joe" that the investigation "could continue into the 2016 campaign, when Hillary Clinton might be running for the White House." Gowdy said that "the length of his work would depend on the administration's level of cooperation," noting, "It would be shame on us if we intentionally dragged this out for political expediency. ... On the other hand, if an administration is slow-walking document production I can't end a trial simply because the defense won't cooperate."

In his column for the Washington Post (5/8, 4.22M), Dana Milbank notes Gowdy's comment that he "can't end a trial simply because the defense won't cooperate," and opines that Gowdy "intends to play prosecutor, proving the administration's guilt to the jury – in this case, the public." Milbank argues that Gowdy's assent in the GOP Caucus "is a key example of how the Republican Party has blunted the tea party threat in large part by co-opting the movement."

Democrats Are Reportedly Considering A Boycott Of Select Committee. Fox News' Special Report (5/7, Baier, 2.15M) reported that Democrats "are said to be considering a boycott of the committee after GOP leaders announced the makeup will be seven Republicans and five Democrats."

The Hill (5/7, Lillis, 237K) reported that Democratic Congressional Campaign Committee Chairman Rep. Steve Israel (D-NY) "made the case for such a boycott at a closed-door meeting of the Democratic Caucus in the Capitol Wednesday morning, a DCCC spokesperson said." Rep. James Clyburn (D-SC), the third-ranking House Democrat, has urged his party "not to back a special committee unless Republicans and Democrats were equally represented, as they are on the Ethics Committee." The Hill noted that House Minority Leader Pelosi and House Minority Whip Hoyer "have not said whether they'd support a boycott of the panel." On Tuesday, Pelosi and Hoyer sent a letter to House Speaker Boehner "urging changes to the proposed committee, including equal representation between the parties."

Politico (5/7, Sherman, Palmer, 73K) reported that Pelosi told colleagues that she is "leaning toward boycotting" the panel. According to sources who attended Wednesday's meeting, while Pelosi "said she would listen to as many of her Democratic colleagues as possible before a decision is made," it was "was clear to several participants in the meeting that she was leaning against tapping Democrats to sit on the panel." Politico noted that Rep. Henry Waxman (D-CA) disagreed, arguing that "Democrats should sit on the Republican-controlled committee to combat Republicans."

Roll Call (5/7, Newhauser, Fuller, Subscription Publication, 76K) also noted the divisions within the Democratic caucus, reporting that "leaders and party members [are] vacillating between a symbolic boycott or begrudging participation." Roll Call notes that Democrats are unanimous in their belief that "the investigation is a political sham."

Meanwhile, the AP (5/8, Klapper) reports that Republicans brushed aside "Democratic concerns over the panel's scope and composition." Ahead of Thursday's vote to establish the panel, Boehner "vowed that the examination would be 'all about getting to the truth,'" adding, "This is a serious investigation." The AP notes that while the establishment of the committee "is assured in the GOP-run House," Republicans "expressed an interest in securing Democratic participation," as an "inquiry that can be presented as bipartisan would have greater credibility with voters beyond the conservative base."

Gowdy Disagrees With NRCC Using Benghazi Probe To Raise Funds. McClatchy (5/8, Douglas, Subscription Publication, 23K) reports that Gowdy appears to be "at odds with the National Republican Congressional Committee over using the attack and the committee's formation as a fund-raising tool." A post on the NRCC website titled "You Can Become a Benghazi Watchdog Right Now," urges viewers to make a "contribution to 'stop Democrats from controlling all of Washington.'" However, when Gowdy was asked on MSNBC's "Morning Joe" Wednesday "whether Republicans should pass on using the attack for fund-raising purposes, the former prosecutor said 'yes.'" Gowdy added, "Even (in) a culture of hyper-partisanship, certain things...ought to be above politics, like the murder of our four fellow Americans, and like whether you can trust what any administration, Republican or Democrat, tells you in the aftermath of a tragedy. That, to me transcends politics."

Reuters (5/8) reports that the NRCC did not indicate whether it would end the fundraising appeals. Reuters also

notes that White House spokesman Josh Earnest told reporters, "I think that the fact that the National Republican Congressional Committee is raising money off the creation of this committee is a pretty good indication of the political motivation that's at work here."

The Huffington Post (5/7, Stein, 11.54M) reported that Gowdy "called on the NRCC to stop fundraising off of the Benghazi select committee," telling CNN, "I cannot and will not raise money on Benghazi. ... I also advise my colleagues to follow suit." The Post noted that the disagreement between Gowdy and the NRCC "points to a problem that Republican leadership will likely encounter" during the investigation. The "temptation to rev up the base and raise money from it too could end up damaging the investigation's credibility even before it starts." Politico (5/7, Sherman, 73K) also reported on the NRCC fundraising appeal.

Capitol Police Investigating Threats Against Gowdy. The Washington Times (5/8, Chumley, 455K) reports that the Capitol Police are investigating email threats to Gowdy after reporters from Politico and other news outlets said they "received at least two emails that threaten harm to Mr. Gowdy due directly to his leading role on the panel." While Capitol Police "refused to comment on the actual threats," they said that there is "an active, open investigation."

State Department Says Kerry Unavailable To Testify Before House Oversight Committee. The AP (5/8, Klapper) reports that the State Department said Wednesday that Secretary of State Kerry "would travel to Mexico later this month, making him unavailable to satisfy a subpoena for him to testify May 21 before the House Oversight Committee on its ongoing investigation into Benghazi."

Editorial Wrap-Up:

NEW YORK TIMES. "Climate Disruptions, Close To Home." The New York Times (5/8, Subscription Publication, 9.65M) editorializes that "the main reason neither Congress nor much of the American public cares about global warming is that, as problems go, it seems remote. Anyone who reads the latest National Climate Assessment, released on Tuesday, cannot possibly think that way any longer. ... The climate-change deniers in Congress and industry allies like Senator Mitch McConnell, who hails from a coal-producing state, will be ferocious. ... The surest antidotes are continued presidential resolve, backed by voters sensitized to climate warming's dangers."

"Amid Tensions, A Gesture From Putin." The New York Times (5/8, Subscription Publication, 9.65M) says in an editorial that if Russian President Vladimir Putin "means what he said on Wednesday, the dangerous standoff over Ukraine could be moving toward a resolution. ... As of Wednesday evening, however, NATO officials said they saw no pullback of the 40,000 Russian troops who have been threateningly massed on the Ukrainian border for several weeks now. Yet there was reason to hope that, at this stage in the crisis, Mr. Putin does have compelling reasons to step back from confrontation and make room for negotiations. ... If this road to a federated structure is what the O.S.C.E., Ukraine, Russia, the United States and the European Union are discussing, the crisis may be nearing an end."

"The Lawyer Behind The Drone Policy." An editorial in the New York Times (5/8, Subscription Publication, 9.65M) argues that while the Administration's decision to allow senators to see memos authored by David Barron, the President's nominee for the US First Circuit Court of Appeals, justifying killing US citizens overseas with drone strikes "behind closed doors," will "probably be enough to ensure Mr. Barron's confirmation on a majority vote," it is "not enough for the public, which also has the right to evaluate one of the Obama administration's most important national security decisions, and the qualities of the people it is nominating to the bench."

WASHINGTON POST. "A Bad Report Card." In an editorial, the Washington Post (5/8, 4.22M) criticizes the District of Columbia for its third straight negative annual assessment of children's mental health programs by the Children's Law Center. While "there is no question that the District has made progress in mental health treatment since the era when dysfunctional agencies were placed under court control," the Post says there is a long way to go.

"Pfizer's Bitter Bill." In an editorial, the Washington Post (5/8, 4.22M) cites Pfizer's "\$106 billion offer for

Britain's AstraZeneca, which could enable Pfizer to flag itself as a British company and pay taxes at Britain's 20 percent rate rather than this country's 35 percent," as proof of the need for corporate tax reform. noting that the President's solution and a plan from House Ways and Means Chairman Dave Camp share "common elements: an effort to close loopholes so that the government raises the same revenue even at a lower tax rate, an attempt to harmonize U.S. and foreign tax rules to discourage international rate-shopping and a sense that tax policy should support job-creating investment," the Post argues that there is "more common ground on corporate tax reform than many people realize," and adds that the proposed Pfizer deal should "be the wake-up call Washington needs to push for bipartisan tax reform."

"Venezuela In Free Fall." An editorial in the Washington Post (5/8, 4.22M) calls on the Obama Administration to impose sanctions on the government of Venezuelan President Nicolás Maduro to pressure Maduro "to agree to reforms that could break Venezuela's free fall." The Post argues that placing "a clear price on those officials who direct repression would be useful leverage."

WALL STREET JOURNAL. "Political Speech Wins In Wisconsin." An editorial in the Wall Street Journal (5/8, Subscription Publication, 5.51M) praises Federal Judge Rudolph Randa's preliminary injunction to end an investigation into possible campaign finance violations involving conservative groups in Wisconsin and Gov. Scott Walker's campaign, arguing that liberals were using it as a weapon to silence their opponents.

"Disconnected In Massachusetts." The Wall Street Journal (5/8, Subscription Publication, 5.51M) says in an editorial that the Affordable Care Act's new mandates led to the collapse of the Massachusetts "Connector" insurance exchange that had worked under then-Gov. Mitt Romney, even though the ACA was modeled on the state's program.

"Thailand's Aristocratic Dead-Enders." The Wall Street Journal (5/8, Subscription Publication, 5.51M) says in an editorial only a negotiated settlement will resolve the Thai political crisis, because new elections will likely reelect Prime Minister Yingluck Shinawatra's party.

Participants: Congressman Michael McCaul (Tx.) (whose father served as a B-17 Bombardier Navigator in the Army Air Corps during WWII.); Robert Vogel, Superintendent, National Mall & Memorial Parks; Mick Kicklighter, Chairman of the Board, Friends; Susan Eisenhower, granddaughter of President Dwight D. Eisenhower; MG Buster Howes, British Embassy; 16 WWII veterans with Old Glory Honor Flight of Wisconsin. Contact: Jenny Anzelmo-Sarles jenny_anzelmo-sarles@nps.gov 202-619-7177. Location: World War II Memorial.

VILSACK – LOCAL FOOD SYSTEMS – 1:15 a.m. USDA Secretary Vilsack to host press call to announce "historic" USDA support for local and regional food systems. DIAL IN: 1-888-831-2982. Passcode (given verbally): RFA. Troubleshooting number: 202 720 8560. Contacts: USDA Office of Communications (202) 720-4623

CSIS – DOD UNMANNED SYSTEMS – 10 a.m. – 12 p.m. Sustaining the U.S. Lead in DoD Unmanned Systems. Speakers: Colonel Kenneth Callahan, USAF, Director, Air Force RPA Capabilities Division; Captain Chris Corgnati, USN, Deputy Director, ISR Capabilities, OPNAV N2/N6. Location: 2nd Floor Conference Center, CSIS 1616 Rhode Island Avenue NW.

HUDSON INSTITUTE – LATIN AMERICA – 12 p.m. – 2 p.m. "Challenges to Democracy in Latin America" panel discussion. Hudson Institute's Center for Latin American Studies and the Institute for Foreign Policy Analysis will host a discussion of the challenges to democracy in Latin America featuring Kevin Casas-Zamora, Secretary for Political Affairs at the Organization of American States and former Vice President of Costa Rica, Rene Leon, former Ambassador of El Salvador to the United States, and Hector Schamis, adjunct professor at Georgetown University and columnist for El Pais. Location: Hudson Institute, Betsy and Walter Stern Conference Center, 1015 15th Street, NW – 6th Floor.

BROADBAND COALITION FORUM – CULATTA – 1 p.m. Richard Culatta, director of the U.S. Education Departments Office of Educational Technology remarks to the annual conference of the Schools, Health and Libraries Broadband Coalition. Location: Marriott Marquis Hotel, 901 Massachusetts Ave., N.W. Contacts: Press Office press@ed.gov ((202) 401-1576)

CSIS – ELECTRICITY – 1 p.m. – 4 p.m. Electricity in Transition. Speaker: Melanie Kenderdine, Director of the Office of Energy Policy and Systems Analysis, U.S. Department of Energy. Location: 2nd Floor Conference Room, Center for Strategic and International Studies, 1616 Rhode Island Avenue, NW.

C2ES WATER – ENERGY WEBINAR – 2 p.m. – 3 p.m. The Center for Climate and Energy Solutions hosts a webinar: An overview of water/energy issues from national and Federal perspectives. Dr. Craig Zamuda from the Department of Energy will present key findings from DOE's recently released water/energy nexus report. Dr. Kristen Averyt, Director of the Western Water Assessment at the University of Colorado, will present her research regarding water-energy challenges now and in the future. Contacts: Laura Rehmann, rehrrmann@c2es.org, 703-516-0621.

ATLANTIC COUNCIL – IRAQ – POST ELECTIONS – 2 p.m. – 3:30 p.m. Iraqs Post-Election Environment: A Preliminary Assessment – A discussion with; Amb. Feisal Istrabadi, Director, Center for Middle East Studies at

Indiana University, Former Iraqi Ambassador to the United Nations; Amb. James F. Jeffrey, Distinguished Visiting Fellow, Washington Institute for Near East Policy, Former US Ambassador to Iraq. Moderated by Damon Wilson, Executive Vice President, Atlantic Council. RSVP to press@AtlanticCouncil.org. Location: Atlantic Council, 1030 15th Street, NW, 12th Floor.

Last Laughs:

LATE NIGHT POLITICAL HUMOR.

Craig Ferguson: "Another thing Russia's doing is they've got a new blogger law. It forces people who write blogs to register with the government. Putting bloggers in jail? Maybe [Russian President Vladimir] Putin isn't so bad."

Craig Ferguson: [Referring to Russia's law banning curse words in arts and media] "For now, Putin is only banning four swear words. These four words will be banned from theater, concerts, and movies. So Russians, say *dasvidaniya* [good bye in Russian] to the works of Quentin Tarantino and to YouTube out-takes from 'Jeopardy.'"

Seth Meyers: "The Obama Administration announced new guidelines today that would require schools to provide equal education to all children, regardless of their immigration status. So, sorry illegal immigrants, you're getting an American education."

DATE: FRIDAY, MAY 9, 2014 7:00 AM EDT

TODAY'S TABLE OF CONTENTS

DOI IN THE NEWS:

- + USGS Launches Web Tool To Track Impact Of Climate Change On Watersheds.
- + Secretary Jewell Praised For Landscape-scale Mitigation Strategy.
- + Industry Leaders Participate In Oil Cleanup Exercise.
- + Interior's Use Of Social Media Wins Followers.
- + "Wild And Scenic" Designation Considered For Housatonic River.
- + Decision To Defer Approval Of Report Central Everglades Planning Project Defended.

AMERICA'S GREAT OUTDOORS:

National Park Service:

- + NPS Proposes To Make Honouliuli Internment Camp A Monument Or Historic Site.
- + Bill Would Allow Private Organizations To More Easily Partner With NPS To Support Parks.
- + Nine Injured In Multi-vehicle Crash At Grand Canyon.
- + Scientists Studying Mount Baldy.
- + New Sewage Spill Location Investigated By NPS, DC Water.
- + Voyageurs Park Moose Population Stays Steady.
- + Shuttle Service Resumes Between Grand Canyon, Tusayan.
- + Two Zion National Park Rangers Receive Valor Awards.

Bureau of Land Management:

- + BLM Worker Threatened On Utah Highway.
- + Nevada Sheriff Says FBI Investigating Bundy Ranch Standoff.
- + Officials Sign Utah Land Swap At First Outdoors Summit.
- + BLM Unlikely To Complete Fergus County Land Swap.
- + BLM Extends Application Deadline For Submitting Wild Horse Research Proposals.
- + New Manager For Arizona Strip District Announced.
- + Additional Coverage: San Juan County Commissioner Plans ATV Ride To Protest BLM Trail Closure.

Fish and Wildlife Service:

- + Ranchers Highlight Efforts To Improve Sage Grouse Habitat To Sway FWS.
- + Future Of North Dakota's Fish Hatcheries Remains Uncertain.
- + Guam To Discuss Potential Partial Refuge Closure.
- + FWS Completes Beach Restoration Project In Time For Crab Spawn, Red Knot Migration.
- + Grizzly Bear Population In Yellowstone National Park Rebounds.
- + Groups Criticize Proposal To Delist Beetle.

SECURING AMERICA'S ENERGY FUTURE:

Renewable Energy:

- + Coverage Continues Of DOE Wind Grants.
- + Block Island Wind Farm Receives First Major Project Permits.

Onshore Energy Development:

- + Indian Rights Attorneys Contend Treaties Give Them A Say On Pipeline Route.

Offshore Energy Development:

- + Beaudreau Praises Industry On Post-Macondo Improvement.
- + Offshore Regulators Vow To Keep Watch On Safety Infractions.
- + Industry Raises Concerns In Atlantic OCS G&G Comments.
- + Op-Ed: Offshore Rules Cause Some Uncertainty.
- + Study Says Oil Industry Could Waste Over A Trillion Dollars On Unnecessary Drilling Projects.

TACKLING AMERICA'S WATER CHALLENGES:

- + Rep. McClintock Criticizes Releases From Dams On American, Stanislaus Rivers.

EMPOWERING NATIVE AMERICAN COMMUNITIES:

- + Interior Opposes Bill To End Office Of Special Trustee.

TOP NATIONAL NEWS:

- + Obama Appears At A Series Of Fundraisers Hosted By Tech Execs In California.
- + House Panels Subpoenas Shinseki Over Cover-Up Of Delays At VA Clinics.
- + House Approves Resolution To Form Select Committee On Benghazi.

EDITORIAL WRAP-UP:

- + New York Times.
- + Washington Post.
- + Wall Street Journal.

BIG PICTURE:

- + Headlines From Today's Front Pages.

WASHINGTON SCHEDULE:

- + Today's Events In Washington.

LAST LAUGHS:

- + Late Night Political Humor.

DOI in the News:

USGS LAUNCHES WEB TOOL TO TRACK IMPACT OF CLIMATE CHANGE ON WATERSHEDS. The [E&E Daily](#) reports that the USGS on Thursday launched a new Web tool to assist communities and individuals map the impacts of climate change on their watersheds. The updated National Climate Change Viewer "maps changes in snowpack, soil moisture, runoff and evaporation across US watersheds." Interior Secretary Sally Jewell said, "This information will be valuable to the work of scientists, water and land managers, farmers and ranchers – as well as all interested citizens."

SECRETARY JEWELL PRAISED FOR LANDSCAPE-SCALE MITIGATION STRATEGY. The [Freestone County \(OR\) Times](#) (5/9, Crabtree) reports that the Center for Rural Affairs praised Interior Secretary Sally Jewell for the release a report on April 10, "outlining a landscape-scale mitigation strategy to encourage smarter development on public lands." According to the article, "strengthening Interior's commitment to science-based, landscape level planning will help avoid the gravest development impacts on our land, air and water."

INDUSTRY LEADERS PARTICIPATE IN OIL CLEANUP EXERCISE. [WTOC-TV](#) Savannah, GA (5/9, 18K)

reports that industry leaders are training on Hutchinson Island for an emergency spill on the Savannah River. The exercise is "to show industry leaders how to communicate better in the event of a spill." Glenn Degnitz, of the Interior Department said, "You've got different companies. You've got different technologies. So we've brought in some of the smarter guys available, and they've shown other people how to integrate all that so it's seamless."

The Savannah (GA) Morning News (5/7, Coleman, 226K) reports on a "dog food spill" in the Savannah River cleaned up by "trailing boom, an underwater robot hooked to a rope and even an aerial drone" in a demonstration of oil spill cleanup capacities. Coast Guard Capt. Claudia Gelzer said about the conference, "It enables our folks to join together with industry and the other agencies and NGOs to share best practices and talk about new ways of responding to oil spills."

INTERIOR'S USE OF SOCIAL MEDIA WINS FOLLOWERS. The Skift (5/8) reports that the use of social media during last October's government shutdown was "a rare, yet welcome turn by a government agency." The article also notes that Interior "actively uses social media to promote destinations and activities with an enthusiasm rarely seen in government agencies." According to the article, the agency's "content strategy seeks to motivate and inform the nature lover and adventure traveler with awe-inspiring photos and noteworthy news clips."

"WILD AND SCENIC" DESIGNATION CONSIDERED FOR HOUSATONIC RIVER. The Litchfield County (CT) Times (5/8, 15K) reports that "veterans of river management met with residents of the Northwest Corner at Housatonic Valley Regional High School Tuesday night" to explain the National Wild and Scenic River program and the benefits it provides. According to the article, "despite some sharp questioning from a healthy crowd" of supporters of the designation for the Housatonic River, the "potential benefits of the federal designation seem to far outweigh any deficits."

DECISION TO DEFER APPROVAL OF REPORT CENTRAL EVERGLADES PLANNING PROJECT DEFENDED. In an op-ed for the Key West (FL) Keynoter (5/7, 34K), Col. Alan Dodd, commander of the Jacksonville district of the US Army Corps of Engineers, defends the decision by the US Army Corps of Engineers Civil Works Review Board to "defer approval of an implementation report on the Central Everglades Planning Project." According to Dodd, the decision was made to "enable the Corps to complete a full review of the almost 8,000-page document to ensure it complies with all applicable federal laws, regulations and policies." Dodd notes that failure to complete a review could "result in significant delays if problems or issues are identified later on that could have been discovered prior to releasing the report."

America's Great Outdoors:

National Park Service:

NPS PROPOSES TO MAKE HONOULIULI INTERNMENT CAMP A MONUMENT OR HISTORIC SITE. The AP (5/9) reports that the NPS on Thursday "proposed making the former Honouliuli Internment Camp on Oahu either a monument or historic site." The agency "plans to hold meetings this month and next to get the public's feedback."

The Honolulu Civil Beat (5/9, 41) reports that "political leaders praised the report for recognizing the importance of the internment camps in US history." Sen. Colleen Hanabusa said, "We cannot forget Honouliuli and sites like it in Hawaii. We have a responsibility to remember and preserve our history. The internment of Japanese Americans in World War II was a dark time for our nation, but one that should serve as a reminder and a warning of what we are capable of when we fall victim to suspicion, hate, and intolerance." Gov. Neil Abercrombie also issued a press release in support of the plan.

BILL WOULD ALLOW PRIVATE ORGANIZATIONS TO MORE EASILY PARTNER WITH NPS TO SUPPORT PARKS. The Hill (5/9, Barron-Lopez, Cama, 237K) reports that Reps. Jared Huffman and Cynthia Lummis "introduced a bill Thursday that they said would make it easier for private organizations to partner with the National Park Service to support parks." They said their legislation would clarify NPS "rules for working with educational, philanthropic and volunteer organizations that want to help with parks."

NINE INJURED IN MULTI-VEHICLE CRASH AT GRAND CANYON. The AP (5/9) reports that "nine people are

hurt after a tour bus, a minivan and a sedan collided at the Grand Canyon," according to authorities. NPS officials say the tour bus had "a dozen people onboard when the crash occurred around 2 p.m. Thursday." The cause of the crash is under investigation.

Also providing similar coverage is the Arizona Republic (5/8, 1.45M).

SCIENTISTS STUDYING MOUNT BALDY. NPR (5/9, Smith, 519K) reports that Mount Baldy is closed for the summer while scientists "use ground-penetrating radar and GPS devices to peer beneath the surface." The NPS will also "plant new grass where it grew until the last century to try to stabilize the dune and prevent new holes."

NEW SEWAGE SPILL LOCATION INVESTIGATED BY NPS, DC WATER. WTOP-FM Washington (5/9, 172K) reports that "it might be another week or two until the Capital Crescent trail is open" according to the NPS, which says "yet another sewage spill from last week's storms is being investigated Thursday." NPS and D.C. Water staff are "investigating the third spill location, a man hole a quarter mile north of the previously reported lock 6 spill." Meanwhile, "crews are still working to clean a section of the Capital Crescent Trail where some of the sewage spilled over the trail and into the nearby woods and canal."

VOYAGEURS PARK MOOSE POPULATION STAYS STEADY. The AP (5/9) reports that the moose population at Voyageurs National Park remains steady. According to the article, "an annual winter aerial survey estimates the moose population on the Kabetogema Peninsula at 40."

Also providing coverage is the Minneapolis Star Tribune (5/9, Smith, 1.48M).

SHUTTLE SERVICE RESUMES BETWEEN GRAND CANYON, TUSAYAN. The AP (5/9) reports that free shuttle service between the Grand Canyon and the neighboring town of Tusayan will resume Saturday. The service started as a pilot project years ago. The NPS says "it will continue as funding allows."

TWO ZION NATIONAL PARK RANGERS RECEIVE VALOR AWARDS. KCSG-TV St. George, UT (5/9, 43) reports that Zion National Park Rangers Craig Thexton and Therese Picard are receiving Department of Interior Valor Awards. According to the article, "the incident that is being recognized took place on the evening of April 30, 2010, after Zion National Park dispatch received a report that a canyoneer was in distress on the final rappel of Pine Creek."

Bureau of Land Management:

BLM WORKER THREATENED ON UTAH HIGHWAY. The AP (5/9, McCombs) reports that the BLM is "warning its workers in Utah to be on alert after two men threatened an agency wrangler on the state's main highway by pulling out a weapon and holding up a sign that read, "You need to die." According to BLM spokeswoman Megan Crandall, "the incident occurred Tuesday morning on Interstate 15 about 90 miles south of Salt Lake City." An investigation is underway, but there are no suspects.

Also reporting on the story are the Las Vegas Review-Journal (5/9, 437K) and Reuters (5/9).

Coverage by the AP was also provided by the Washington Post (5/9, 4.22M), the Sacramento (CA) Bee (5/8, 687K), the Minneapolis Star Tribune (5/9, McCombs, 1.48M), the Quincy (IL) Herald-Whig (5/9, 85K), the Seymour (IN) Times Tribune (5/9, 31K), Yahoo! (5/9, McCombs, 17.91M), the Epoch Times (5/9, 486K), KRNVTV Reno, NV (5/9, 2K), WJBK-TV Detroit (5/9, 83K), and WRAL-TV Raleigh, NC (5/9, 117K).

NEVADA SHERIFF SAYS FBI INVESTIGATING BUNDY RANCH STANDOFF. The AP (5/9) reports in brief coverage that Assistant Sheriff Joe Lombardo of Clark County said the FBI has been investigating the conduct of rancher Cliven Bundy's armed supporters during an April 12 standoff.

The Las Vegas Review-Journal (5/9, German, 437K) reports that Sheriff Doug Gillespie on Thursday said the FBI has opened a criminal probe of the April 12 showdown between Bundy and his supporters and law enforcement, and claimed the agency interviewed him on April 28. According to the article, Gillespie said the FBI is looking into alleged assaults and threats against law enforcement at the scene, and the probe is just beginning.

In its coverage, KLAS-TV Las Vegas (5/9, Knapp, 36K) reports that that agency has also spoken with several Metro Police officers who were on the scene at Bundy's ranch, and notes that the FBI "does not confirm or deny the existence of any investigation."

OFFICIALS SIGN UTAH LAND SWAP AT FIRST OUTDOORS SUMMIT. The AP (5/8) reports that Utah Gov. Gary Herbert "kicked off his first Outdoor Recreation Summit on Thursday by finalizing a long-awaited swap of state and federal lands in eastern Utah." Herbert, BLM state director Juan Palma and state trust lands director Kevin Carter "signed the agreement in front of more than 400 attendees at the daylong summit in Salt Lake City." The transaction "gives the federal government about 25,000 acres of wilderness mostly in Grand County for conservation and recreation," and "in return, Utah receives about 35,000 acres of energy-rich land, mostly in Uintah County."

Also covering the story is KCSG-TV St. George, UT (5/9, 43).

BLM UNLIKELY TO COMPLETE FERGUS COUNTY LAND SWAP. The AP (5/9) reports that BLM officials say they "likely won't complete a proposed land exchange between the federal agency and owners of a Fergus County ranch." The bureau had "planned to swap 12 parcels totaling 4,900 acres within the Wilks Ranch Montana Ltd. property in exchange for 5,200 acres," but "1,600 residents signed a petition opposing the deal." According to the article, "hunters want continued access to 2,700 acres in the Durfee Hills area that would have become private property under the swap."

BLM EXTENDS APPLICATION DEADLINE FOR SUBMITTING WILD HORSE RESEARCH PROPOSALS. KCSG-TV St. George, UT (5/9, 43) reports that the BLM announced on Thursday that it is "extending to May 28, 2014, its application deadline for research proposals aimed at controlling the population growth of wild horses and burros that roam public lands in the West." Joan Guilfoyle, Division Chief of the Wild Horse and Burro Program, said, "We are looking for breakthrough methods of controlling population growth rates, which will lessen the need to remove animals from the range while saving taxpayers money."

NEW MANAGER FOR ARIZONA STRIP DISTRICT ANNOUNCED. KCSG-TV St. George, UT (5/9, 43) reports that the BLM has named Timothy J. Burke as the new district manager for the Arizona Strip District. Ray Suazo, BLM Arizona State Director, said, "Tim is a veteran land manager who has demonstrated the ability to deal with challenging issues. We are lucky to have him in Arizona and welcome him to our leadership team."

ADDITIONAL COVERAGE: SAN JUAN COUNTY COMMISSIONER PLANS ATV RIDE TO PROTEST BLM TRAIL CLOSURE. Additional coverage of San Juan County Commissioner Phil Lyman plans to lead a group of residents during an ATV ride to protest the BLM jurisdiction was provided by the Deseret (UT) News (5/9, 610K) and KSL-TV Salt Lake City (5/9, 242K).

Fish and Wildlife Service:

RANCHERS HIGHLIGHT EFFORTS TO IMPROVE SAGE GROUSE HABITAT TO SWAY FWS. The Environment & Energy Publishing (5/9, 705) reports that ranchers in northwest Colorado are highlighting their efforts to improve the sagebrush habitat of sage grouse. According to the article, "to a large extent," their efforts will "determine whether the bird receives protection under the federal Endangered Species Act." The article notes that while the FWS' "decision whether to propose listing the greater sage grouse next year is a scientific one, it will undoubtedly have social consequences that could deter landowners from continuing to conserve the bird."

FUTURE OF NORTH DAKOTA'S FISH HATCHERIES REMAINS UNCERTAIN. The Bismarck (ND) Tribune (5/9, 64K) reports that Rob Holm, manager at the Gamison Dam National Fish Hatchery near Riverdale, and "his crews have been fighting what seems to be an upstream battle for funding at a time when the popularity of sportfishing is at an all-time high in North Dakota." Nationally, the FWS has "been on a push to close what it considers 'lower priority facilities.'" According to Holm, "with funding a big question from year to year, it's been a real juggling act to plan for the long term."

GUAM TO DISCUSS POTENTIAL PARTIAL REFUGE CLOSURE. The AP (5/9) reports that "Guam's nonvoting

delegate in US Congress is moving to give the territory's community members a chance to weigh in on whether the Navy should close part of a wildlife refuge as part of a military buildup." Del. Madeleine Bordallo has "decided against attaching the proposed plan as an amendment to a larger defense spending bill, which passed a key House committee." Bordallo said, "I agree that our community should have the opportunity to discuss this issue and other concerns regarding the buildup."

Also covering the story is the [Pacific \(GUM\) Daily News](#) (5/9, 61K).

FWS COMPLETES BEACH RESTORATION PROJECT IN TIME FOR CRAB SPAWN, RED KNOT

MIGRATION. The [Philly](#) (5/9, 1.64M) reports that "in time for the spawning season of the horseshoe crab and the subsequent spring migration of shorebirds like the ruddy turnstone and the red knot," the FWS has "completed a \$1.65 million restoration project along five Cape May County bay beaches." Eric Schrader, a field supervisor for the service's New Jersey field office, notes that "it is the first of 31 such 'coastal resilience' projects focusing on rebuilding natural areas after Hurricane Sandy." Schrader said, "We're very happy that this project was completed so quickly. This is an important restoration project, not just for the horseshoe crab spawning but also for shorebirds foraging."

GRIZZLY BEAR POPULATION IN YELLOWSTONE NATIONAL PARK REBOUNDS. [KPAX-TV](#) Missoula, MT (5/9, 1K) reports that "estimates show the Yellowstone ecosystem grizzly population at more than 700 – nearly a four-fold increase in just the past 40 years." Yellowstone National Park Superintendent Dan Wenk said, "There were times in the past where the population because of the way the park was managed and because of decisions we made the grizzly bear was a threatened species. We are very pleased with where that species is now not only in terms of Yellowstone National Park but the ecosystem overall." The article notes that the FWS is "conducting a threat assessment to see if the Yellowstone grizzly can be removed from the Threatened and Endangered Species List – something that shows how successful the work has been – and how adaptable the grizzly bear population is."

GROUPS CRITICIZE PROPOSAL TO DELIST BEETLE. [KCET-TV](#) Los Angeles (5/9, 15K) reports that the FWS is proposing to take the Valley elderberry longhorn beetle off the Endangered Species Act's Threatened list, but two leading environmental groups are charging that the move is based on politics rather than science. The Center for Biological Diversity and the Xerces Society for Invertebrate Conservation on Tuesday urged the FWS to "abandon its move to delist" the beetle. The groups claim that "the scientific justification for the proposal to remove the beetle from ESA protection is flawed, based on shoddy and unsubstantiated records of the beetle's presence, as well as factually inaccurate statements from real estate developers in beetle habitat."

Securing America's Energy Future:

Renewable Energy:

COVERAGE CONTINUES OF DOE WIND GRANTS. In continuing coverage, the Philadelphia Inquirer (5/9, Bauers, 1.64M) reports that "a proposal to build an offshore wind farm about three miles east of Atlantic City could be back in the race to become the nation's first." The Energy Department on Wednesday "announced that the New Jersey project would receive up to \$47 million in funding over the next four years – a quarter of the \$188 million plan." The Inquirer notes "financial feasibility had been the main issue when, in March, the state Board of Public Utilities rejected the plan. Fishermen's Energy asked for a reconsideration, which was rejected" last month. Energy Secretary Ernest Moniz said, "Offshore wind offers a large, untapped energy resource for the United States that can create thousands of manufacturing, construction, and supply-chain jobs across the country, and drive billions of dollars in local economic investment."

The New Orleans Times-Picayune (5/9, Larino, 678K) notes that "Keystone Engineering will design and build the wind turbine foundations for two of the projects selected, the Fisherman's Energy project offshore Atlantic City, N.J. and the Dominion Virginia Power project offshore Virginia Beach, Va." According to a DOE statement, "both the New Jersey and Virginia projects were chosen because of the unique and inexpensive foundations they intended to use."

FuelFix (5/8, Tresaugue, 7K) also provides coverage of this story.

BLOCK ISLAND WIND FARM RECEIVES FIRST MAJOR PROJECT PERMITS. The Block Island (RI) Times (5/9) reports that Deepwater Wind has received important environmental approvals for the Block Island offshore wind pilot project. The Rhode Island Department of Environmental Management issued Deepwater Wind Water Quality Certificates, “deeming the Block Island Wind Farm and Transmission System in compliance with state water quality regulations and the Clean Water Act.” Also, RIDEM issued the project “a Freshwater Wetland permit for certain onshore construction activities.”

Also reporting on the story is reNews (5/9).

Onshore Energy Development:

INDIAN RIGHTS ATTORNEYS CONTEND TREATIES GIVE THEM A SAY ON PIPELINE ROUTE. The Minneapolis Star Tribune (5/9, Shaffer, 1.48M) reports that “in a new battlefield over energy policy, American Indian rights attorneys” made the case on Wednesday “before a Minnesota judge that historic treaties give tribes a say in where to build crude oil pipelines across land ceded by the Chippewa in the 19th century.” Attorney for the group Honor the Earth, Frank Bibeau said, “Everybody has kind of forgotten what our rights are, and that is why we are here.” The group “says the proposed \$2.6 billion Sandpiper crude oil pipeline across northern Minnesota will produce ‘inevitable oil spills and environmental degradation’ on ceded lands” and that “spills could endanger Rice Lake near McGregor and Sandy Lake in Aitkin County where Indians gather wild rice.” The “attorneys are arguing” for the first time in the state “that the state Public Utilities Commission (PUC) lacks unilateral authority to approve pipelines.”

Offshore Energy Development:

BEAUDREAU PRAISES INDUSTRY ON POST-MACONDO IMPROVEMENT. The Offshore Energy Today (5/9) reports that Tommy Beaudreau looked “back on the post-Macondo years during a talk titled ‘The Latest Offshore Policy Developments in the Department of the Interior.’” When asked if Macondo is “now in the past,” Beaudreau responded, “We carry the lessons with us every day. There is a need for constant vigilance to avoid complacency.” Looking forward, Beaudreau “outlined several areas of continued development.” He said, “The Gulf of Mexico will always be the centerpiece of the US offshore energy portfolio. It’s one of the most mature basins in the world in terms of infrastructure and one of the most robust in terms of industry performance. Its here to stay and will be here for a long time.”

Companies Say Collaboration On The Rise On Offshore Gulf Safety Issues. Platts (5/9, 2K) reports that “oil and natural gas producers operating in challenging offshore environments have learned to work more closely together to improve safety in the wake of the fatal 2010 Deepwater Horizon accident in the Gulf of Mexico, executives said on the sidelines of the Offshore Technology Conference in Houston on Thursday.” The article notes that “in response to the disaster, the US reformed its offshore regulatory regime,” creating the BSEE to police the industry, and “the accident also resulted in the creation of the industry-led Center for Offshore Safety, which opened in Houston in October 2011.” Also, “offshore operators themselves are working more closely together than had been the case before the accident and in its immediate aftermath.”

OFFSHORE REGULATORS VOW TO KEEP WATCH ON SAFETY INFRACTIONS. The FuelFix (5/8, 7K) reports that maritime and drilling regulators pledged Thursday to keep a closer eye on oil firms and contractors they say are “consistently cutting corners on safety offshore.” Brian Salerno, director of the BSEE, and the Coast Guard’s assistant commandant for prevention policy, Rear Adm. Joseph Servidio, “delivered that message directly to oil industry representatives on the final day of the Offshore Technology Conference.” Salerno said, “There are companies we have encountered that think they can cut corners or regard SEMS as just a plan on a shelf. In some tragic cases, lives have been lost — needlessly — for failure to follow established safety processes.”

Also covering the discussion are the Marine Link (5/9, 1K) and the Rigzone (5/9, 8K).

INDUSTRY RAISES CONCERNS IN ATLANTIC OCS G&G COMMENTS. The Oil and Gas Journal (5/9, Snow, 1K) reports that the BOEM’s “preferred alternative for new geologic and geophysical (G&G) activity on the

South and Mid-Atlantic Outer Continental Shelf contains arbitrary and unnecessary restrictions, three national oil and gas associations said on May 7." The American Petroleum Institute, National Ocean Industries Association, and International Association of Drilling Contractors "raised the objection in comments they jointly submitted on BOEM's final programmatic environmental impact statement for what would be the first G&G surveys on the Atlantic OCS since the 1980s." The associations said, "Because G&G activities have little documented impact on marine mammals, the mitigation measures endorsed by Alternative B employ speculation to impose potentially substantial operation and economic burdens on future G&G activities that undermine Congress's clear policy mandate that the Department of the Interior facilitate expeditious development of the OCS."

OP-ED: OFFSHORE RULES CAUSE SOME UNCERTAINTY. For the FuelFix (5/8, 7K), attorney George O. Wilkinson writes that as the BSEE "moves increasingly toward performance-based rules and policies for oil and gas exploration and production operators in the Gulf of Mexico, uncertainty is emerging." Wilkinson claims that "the standards are so broad and their expectations not yet fully defined, which leaves much unknown about what is required." According to Wilkinson, "while BSEE's expectations for operators under the new standards remain unclear at times," BSEE's "ultimate objective" is that Gulf of Mexico operators "implement internal policies, procedures and work practices so that work is conducted without safety or environmental incidents."

STUDY SAYS OIL INDUSTRY COULD WASTE OVER A TRILLION DOLLARS ON UNNECESSARY DRILLING PROJECTS. The Hill (5/9, Cama, 237K) reports that according to a new study by Carbon Tracker Initiative, "the oil industry could waste up to \$1.1 trillion in the next decade on unnecessarily expensive drilling projects, such as those in the Arctic and deep water." According to Bloomberg News, "that's the total that oil explorers would have to spend through 2025 on projects that would require oil prices of at least \$95 a barrel just to break even." The study says that oil companies don't "need to spend that money, because the amount of oil that the world could consume without warming the planet to dangerous levels is available from less expensive places that can be developed for \$75 a barrel."

Tackling America's Water Challenges:

REP. MCCLINTOCK CRITICIZES RELEASES FROM DAMS ON AMERICAN, STANISLAUS RIVERS. For Breitbart (5/8, 356K), Rep. Tom McClintock writes that on the House floor the release by the BOR of "more than 70,000 acre feet of water from dams on the American and Stanislaus rivers in Northern California was highlighted." According to McClintock, "the water releases were made to meet environmental demands that place fish above people." He claims that "these releases were made in spite of a devastating drought and dwindling water supply where the water will be desperately needed this summer."

Empowering Native American Communities:

INTERIOR OPPOSES BILL TO END OFFICE OF SPECIAL TRUSTEE. The Nation Sun News (5/9) reports that the Interior Department "opposes a bill to eliminate the Office of Special Trustee for American Indians, an official said on Thursday." The article notes that "OST has gone without a leader for five and a half years." However, "getting rid of the agency will hinder trust reform efforts at the Interior Department, the administration said in testimony to the House Subcommittee on Indian and Alaska Native Affairs."

Top National News:

OBAMA APPEARS AT A SERIES OF FUNDRAISERS HOSTED BY TECH EXECS IN CALIFORNIA. President Obama's appearances in California on Thursday generated relatively little national media coverage, and were not mentioned during any of the three network newscasts Thursday evening. Coverage this morning focuses on the President's relationship with tech executives in Silicon Valley and provides a preview of a speech the President will give today on climate change.

The San Francisco Chronicle (5/9, Marinucci, Williams, 3.33M) reports that on Thursday, President Obama "came to Silicon Valley in full campaign mode...warning guests at a downtown San Jose fundraiser that a Republican victory in the November midterm elections would be a disaster for the country."

The San Jose (CA) Mercury News (5/9, Richman, 696K) reports that the President attended two fundraisers on

Thursday, including one at the Los Altos home of Google's Sergey Brin and his wife, Anne Wojcicki, "who is CEO of her own company, 23andMe, which sold genetic testing kits until barred from doing so by the Food and Drug Administration." According to the Mercury News, Wojcicki "hosted an exclusive tech round table for 20 – at \$32,400 per head, a total haul of \$648,000 for the Democratic National Committee --" but "the White House declined to even identify the high-rollers who sat around Wojcicki's table with the president." The Hill (5/8, Sink, 237K) reported that Wojcicki's 23andMe "recently stopped selling its \$99 home DNA testing kit after" the FDA "issued a public warning letter cautioning false results could prompt users into taking unnecessary medical actions."

The San Jose (CA) Mercury News (5/9, Richman, 696K) reports that the President appeared later at a "bigger gathering" in San Jose "co-hosted by Yahoo CEO Marissa Mayer and Y Combinator president Sam Altman."

Reuters (5/9, Holland) covers the President's appearances in California on Thursday under the headline "Obama Turns To Tech Leaders For Cash For Democrats." In an analysis for the AP (5/9) titled "Obama Popular In Tech World, Policies Less So," Jim Kuhnhenn writes, "Silicon Valley recoils at the government's cyber data-gathering" and "bristles at new potential Internet rules," but President Obama "remains a popular political figure in Silicon Valley, and the wealthy tech entrepreneurs appear willing to part with their money to support the Democratic Party, especially if the president is making the pitch." Kuhnhenn notes that "Silicon Valley executives...have been pushing for an overhaul of immigration laws, partly to secure more H1B visas for high-tech workers."

Bloomberg News (5/9, Keane, 2.76M) reports that when "asked about fundraising...from technology industry executives who are seeking regulatory action from the Obama administration," Deputy White House Press Secretary Josh Earnest "defended the practice," saying, "There's no reason to think that that policymaking process is affected by the political activities of those involved."

U-T San Diego (5/9, Hall, 648K) reports that the President "visited La Jolla for a few hours Thursday for a lunchtime fundraiser at Qualcomm co-founder Irwin Jacobs' house." Bloomberg News (5/9, Keane, 2.76M) reports that at the La Jolla fundraiser, "guests paid as much as \$32,400 per couple to hear Obama" and House Minority Leader Pelosi.

The Washington Post (5/9, Goldfarb, 4.22M) reports that in La Jolla on Thursday, the President "acknowledged that the executive actions he has been taking to work around an uncooperative Congress will only go so far in achieving his agenda, and said he needs to win control of the legislative branch." According to the Post, the President's "remarks...were striking because" he "has released high-profile executive actions every few weeks under a self-declared 'Year of Action,' meant to bypass" House Republicans.

The Los Angeles Times (5/9, Olivier, 3.46M) reports that on Wednesday, the USC Shoah Foundation "honored President Obama for his commitment to human rights." Director Steven Spielberg, the foundation's chairman, said, "In the face of acts of inhumanity, President Obama has not stood by. He has staked our claim on shaping a better world. He has said that as long as America can do something, be it military, economic through moral example or even grass-roots inspiration, we will do what we can."

The New York Times (5/9, Schmidt, Subscription Publication, 9.65M) reports that on Wednesday evening, the President "spoke of the abductions of hundreds of girls by a terrorist group in Nigeria, and he mentioned the civil war in Syria and the suffering imposed on its people," but also "acknowledged that it was not clear how far he should go in using American power to respond to such atrocities." The President is quoted as saying, "Every day when I wake up, and I think about young girls in Nigeria or children caught up in the conflict in Syria – when there are times in which I want to reach out and save those kids – and having to think through what levers, what power do we have at any given moment." The Times says that was "an unusual confession for a president, and Mr. Obama made it at an event where he was receiving an award...for his efforts in fighting genocide around the world."

Obama To Give Speech On Climate Change At A Walmart In California Today. McClatchy (5/9, Cockerham, Clark, Subscription Publication, 23K) reports that on Friday, President Obama "will seek to make the case...for the urgency of fighting climate change with a speech at a California Walmart, but he's faced with apathy among the public and hostility from congressional Republicans." According to McClatchy, "Just 29 percent...said in a Pew Research poll earlier this year that dealing with global warming is a top priority, ranking it second to last

among 20 issues polled." Nevertheless, McClatchy notes that the White House "expended considerable effort on the subject this week."

The New York Times (5/9, Davenport, Subscription Publication, 9.65M) reports that in his speech on Friday, the President is expected to "announce...a handful of executive actions," which "will not amount to much in terms of energy policy or their impact on global warming." The Times says they are "part of a broader campaign to build public support for an Environmental Protection Agency rule that the White House will unveil in June," which would "limit carbon pollution from coal-fired power plants" and "create a major new market for zero-carbon energy from sources like wind and solar."

Eugene Robinson, in his column for the Washington Post (5/9, 4.22M), says the President "can still have transformational impact" by "working through" the EPA to take "major steps to limit carbon emissions." However, in an op-ed for USA Today (5/9, 5.82M), Sen. John Barrasso (R-WY) writes that "in 2009, the American people made it clear that they didn't support the president's plan for more extreme regulations" to address climate change. Barrasso notes that Democrats "held 60 seats in the Senate, but the administration could not pass its climate agenda."

In an op-ed for the Wall Street Journal (5/9, Subscription Publication, 5.51M), Steven Hayward of the University of Colorado at Boulder and Pepperdine University's Graduate School of Public Policy, dismisses the National Climate Assessment released by the Administration in Tuesday and touted by President Obama as proof that Americans are already suffering as a result of man-made climate change. Likewise, in an editorial, the Wall Street Journal (5/9, Subscription Publication, 5.51M) contends that the NCA was crafted to manipulate public opinion rather than present the science on the subject straightforwardly.

USA Today Blames GOP Voters For Inaction On Climate Change. USA Today (5/9, 5.82M), in an editorial, says while "not all that long ago, leading Republicans took strong positions on climate change," today "it's difficult to find a Republican candidate willing to speak out in favor of doing something" because "anyone who does so risks defeat in GOP primaries, where ardent climate change skeptics hold sway."

White House Plans Messaging To Appeal To Democrats' Base. The Wall Street Journal (5/9, Lee, Nelson, Subscription Publication, 5.51M) reports that the White House plans for the President to assist Democratic candidates in the months leading up to November's midterm election by targeting demographic constituencies that backed the Obama campaign in 2012, including minorities, younger voters and women.

HOUSE PANELS SUBPOENAS SHINSEKI OVER COVER-UP OF DELAYS AT VA CLINICS. The New York Times (5/9, Oppel, Subscription Publication, 9.65M) reports that on Thursday, the House Committee on Veterans' Affairs "voted...to subpoena the head of the Department of Veterans Affairs, Eric Shinseki, and other top officials, stepping up scrutiny of the agency amid accusations that secret waiting lists were used to cover up long delays that veterans faced to see doctors." The Times says the panel "asked for all emails from April 9 to May 8 sent to or from Mr. Shinseki; Dr. Robert A. Petzel, the department's undersecretary for health; Will A. Gunn, the department's general counsel; and five other senior officials." According to the Times, "The accusations in Phoenix – and similar claims that have surfaced in Colorado and Texas – have snowballed into a new test for" Shinseki, and this week, the American Legion "called for Mr. Shinseki's resignation."

At the opening of the CBS Evening News (5/8, lead story, 2:25, 5.08M), Jeff Glor reported that Shinseki vowed that all of the "more than 1,700 veterans' medical centers across the country...will be visited and reviewed" in the wake of "claims [that] up to 40 veterans died waiting for care at a clinic in Phoenix." According to Glor, "Critics say backlogs are spread across the country, and the VA has been covering up the problem." Shinseki was shown saying, "I have directed the undersecretary for health to do a system-wide survey of scheduling practices to ensure we understand what's going on here."

In the lead segment for NBC Nightly News (5/8, lead story, 3:40, 7.86M), Brian Williams reported that "there are calls for [Shinseki] to resign," but "he's trying to hang on and keep his job." Williams said Shinseki faces "charges of a shameful record of medical care for some of our returning vets including neglect and mistreatment – and in some cases veteran have died as a result." Correspondent Jim Miklaszewski reported that Dr. Samuel Foote, who "works for the VA...was the first to allege that in an effort to improve records, hospital officials kept a secret unofficial list of veterans who sought medical care." Foote: "This was basically an elaborate scheme to

cover up patient wait times and cover up patients that we didn't have providers for. Again, the main problem was we had a huge demand and we had relatively limited supply of service."

On ABC World News (5/8, story 2, 2:05), Diane Sawyer also reported on "the growing national outrage about what has happened to American veterans inside VA hospitals." Correspondent Jim Avila went on to report that "it's not just Phoenix," and that the VA is "investigating 23 other deaths at 13 other VA hospitals nationwide."

The Washington Post (5/9, 4.22M) reports that on Thursday, House Veterans Affairs Chairman Jeff Miller "demanded to know why the VA took eight days to order the preservation of all potential electronic and paper evidence of the alleged cover-up after he requested the action at an April 9 hearing."

Reuters (5/9, Lawder) reports that on Thursday, Miller said, "The last few weeks have been a model of VA stonewalling, which precipitated the need for a subpoena." Reuters notes that Senate Minority Whip Comyn and Sen. Jerry Moran (R-KS) have also urged Shinseki to resign.

But the AP (5/9, Jelinek) reports that Shinseki "brushed aside calls for his resignation and got an unexpected political lifeline" from House Speaker Boehner, who said, "I'm not ready to join the chorus of people calling on him to step down." The AP says the controversy stems from the VA's "seemingly endless backlog and exceedingly long delays for treatment."

The Wall Street Journal (5/9, Kesling, Subscription Publication, 5.51M) reports that the Senate's Veterans Affairs Committee has scheduled a hearing on the controversy for next Thursday.

USA Today (5/9, Zoroya, 5.82M) notes that it "reported this week that an internal Veterans Affairs investigation uncovered how employees at a VA outpatient clinic in Fort Collins, Colo., had been trained to falsify records so that wait times for patients appeared to fall within the department's standard of 14 days."

The Christian Science Monitor (5/9, Mulrine, 566K) also points out that there have been "reports that...VA offices around the country falsified reports about how long patients are waiting to get appointments to see physicians."

HOUSE APPROVES RESOLUTION TO FORM SELECT COMMITTEE ON BENGHAZI. Two of the three network news broadcasts, which have been largely silent on the House's inquiry into the attacks on the US Consulate in Benghazi, reported on the House vote late Thursday to form a select committee to investigate the attacks. While NBC's report was brief, CBS's report was longer and focused largely on Democratic objections to the probe and the NRCC's efforts to use the investigation as a fundraising tool. Much of the print coverage this morning focuses on Democrats' consideration of whether to boycott the panel.

Brian Williams reported on NBC Nightly News (5/8, story 6, 0:30, 7.86M) that the House has "voted to establish a select committee on Benghazi." The vote "was 232 to 186 along party lines. Republicans overwhelmingly supported it. Most Democrats were opposed."

Nancy Cordes reported on the CBS Evening News (5/8, story 4, 2:20, Glor, 5.08M) that even before the vote, "Democrats were threatening to boycott the new Benghazi committee." While Republicans "insist they are only trying to obtain information they believe is being withheld by the White House," that argument "is being complicated by a fund-raising plea on the website of the National Republican Congressional Committee. 'You can become a Benghazi watchdog right now,' it says for a minimum suggested donation of \$25." Cordes noted that House Speaker Boehner "sidestepped a trio of questions about the fund-raising effort." Fox News' Special Report (5/8, 2.15M) also briefly reported on the House vote.

The Wall Street Journal (5/9, Crittenden, Subscription Publication, 5.51M) reports that the House vote has opened another front in the partisan fight over Benghazi.

In its "Floor Action" blog, The Hill (5/8, Marcos, Berman, 237K) reported that the vote set the stage "for what will likely be a contentious investigation this summer." The Hill also noted that the seven Democrats who voted in favor of the committee – Reps. Ron Barber (D-AZ), John Barrow (D-GA), Mike McIntyre (D-NC), Patrick Murphy (D-FL), Collin Peterson (D-MD), Nick Rahall (D-WV), and Kyrsten Sinema (D-AZ) – all "serve in districts that lean Republican, and six are facing tough reelection races."

Similarly, Politico (5/9, French, 73K) reported that the “sharply partisan vote,” set the stage “for a contentious summer full of hearings,” adding that it “marks a comeback for an issue that Republicans have resurrected in recent weeks, further polarizing Congress ahead of the midterm elections.”

Roll Call (5/9, Newhauser, 76K) reported that observers believe creation of the select committee “will keep the issue in the public eye well into next year.”

The Washington Times (5/9, Sherfinski, McLaughlin, 455K) reports that the panel will “put the issue back into the headlines as lawmakers gear up for midterm elections,” and notes that Democrats say “election politics was part of the Republicans’ motivation and accused them of using the issue to raise campaign funds.”

USA Today (5/9, Davis, 5.82M) reports that while Republicans accuse the Administration of “purposefully obfuscating the circumstances surrounding the attack because it occurred in the final weeks of President Obama’s reelection campaign,” Democrats argue that Republicans “are using the select committee to gin up their base ahead of the 2014 midterm elections,” and cite an email solicitation sent Wednesday by the NRCC “that invoked the Benghazi attacks,” as evidence of the GOP’s “political motivations.” USA Today notes that Boehner “avoided repeated questions by reporters on Thursday on whether the campaign operation was acting appropriately.”

McClatchy (5/9, Lightman, Subscription Publication, 23K) reports that while members of both parties “have been critical” of the NRCC fundraising effort, Boehner “wouldn’t give a direct answer Thursday when asked whether it’s appropriate.” The piece provides a transcript of Thursday’s news conference during which Boehner replied to three separate questions about the appropriateness of the NRCC fundraising by saying the focus on the probe is getting answers for the families of those who were killed in the attack and for the American people.

The Huffington Post (5/8, McAuliff, 11.54M) noted that several Democrats “pointed out that GOP candidates and committees were already raising money off the probe.” Republicans replied “that Democrats were already raising money off the probe, too, and disparaged them for criticizing the GOP.”

The AP (5/9, Klapper, Cassata) reports that Democrats are “weighing a boycott,” but are “divided” over the issue. While they are “concerned that their participation would grant legitimacy to what they believe will be a partisan forum,” they “worry that if they avoid it they won’t have the chance to counter GOP claims and defend potential witnesses – including [former Secretary of State] Clinton, a possible 2016 presidential candidate.”

The Washington Post (5/9, Lowery, 4.22M) reports that Democratic Congressional Campaign Committee Chairman Rep. Steve Israel (D-NY) “has privately advised Democrats that it would be wise to boycott the committee, prompting calls from several prominent Democrats for the party to boycott the panel altogether.” However, Democrats’ “public rhetoric” has “softened as the week has progressed, with several prominent Democrats saying Thursday that they are open to participating on the panel, at least partly.” Meanwhile, Republican aides, “who say that GOP House leaders want the committee to be perceived as legitimate and not overtly political, have continually insisted that they think the Democrats will take part in some way.”

Politico (5/9, Sherman, 73K) reported that Democrats will meet Friday to discuss whether to participate on the committee. Politico noted that while House Minority Leader Pelosi “was thinking of boycotting the panel,” in “Democratic circles – in private meetings, and conversations throughout the Capitol – the tide has turned,” as Democrats “want to be there to respond to Republicans, and stand up for the administration.” Democrats know Republicans are “certain to call” Clinton, and “if there are no Democrats present,” she “would be walking into a minefield.”

More Commentary. An editorial in the Wall Street Journal (5/9, Subscription Publication, 5.51M) argues that the creation of the select committee would not have been necessary if the Administration had been truthful about the attack from the start.

In an editorial, the New York Times (5/9, Subscription Publication, 9.65M) blasts the select committee, calling it an effort by Republicans to expose “nonexistent malfeasance on the part of the Obama administration,” in an attempt to “rouse the most fervent anti-Obama wing of the party and keep it angry enough to deliver its donations

and votes to Republicans in the November elections." The Times argues that Democrats "shouldn't hesitate to skip" the committee, as their presence "would only lend legitimacy to a farce."

In a piece for Politico Magazine (5/9, 633K), Rich Lowry writes that Democrats "are in the grips of Benghazi denial," believing that "the Republican notion of a scandal is a complete hoax."

In an op-ed for USA Today (5/9, 5.82M), Richard Benedetto, who teaches politics and journalism at American University and in The Fund for American Studies program at George Mason University, says Democrats need a Howard Baker-type figure who is "willing to stand up and ask, 'What did the president know, and when did he know it?'" Benedetto adds that while Republicans have repeatedly asked what the President knew, "the question cannot step from behind the shadows of political partisanship until a Democrat also asks." Without such a figure, Benedetto argues, "the major news media – except for Fox News – will continue to play the story that Obama and fellow Democrats are spinning."

In her column for the Wall Street Journal (5/9, Subscription Publication, 5.51M), Peggy Noonan decries the media's argument that they are not covering the Benghazi probe because it is not a scandal like Iran-Contra. Noonan agrees that the scandals are not the same, and to make her case, compares the Reagan Administration's handling of Iran-Contra to the Obama Administration's handling of Benghazi.

In his column for the Washington Post (5/9, 4.22M), Charles Krauthammer writes that the select committee hearings "are a big political risk for Republicans" ahead of the midterm elections. Republicans "stand to benefit from the major issues – Obamacare, the economy, chronic unemployment – from which Benghazi hearings can only distract." On the other hand "botched" hearings "could backfire against the GOP." Nonetheless, "the country deserves the truth," and they will get it "if the GOP can keep the proceedings clean, factual and dispassionate."

Editorial Wrap-Up:

NEW YORK TIMES. "Center Ring At The Republican Circus." In an editorial, the New York Times (5/9, Subscription Publication, 9.65M) blasts the House select committee on Benghazi, calling it an effort by Republicans to expose "nonexistent malfeasance on the part of the Obama administration," in an attempt to "rouse the most fervent anti-Obama wing of the party and keep it angry enough to deliver its donations and votes to Republicans in the November elections." The Times argues that Democrats "shouldn't hesitate to skip" the committee as their presence "would only lend legitimacy to a farce."

"How To Fix The Mortgage Market." The New York Times (5/9, New York (NY), Times, Subscription Publication, 9.65M) says in an editorial that "for all of its positive attributes," the Senate bill to replace Fannie Mae and Freddie Mac "is fatally marred by two provisions buried in the text." One "could shield most mortgage-market participants from liability for a broad range of transgressions," and another, "ostensibly aimed at preventing the government from meddling in the decisions of mortgage-market participants as to which loans to include in various mortgage securities," could lead to lending discrimination.

"A Coup By Another Name In Thailand." The New York Times (5/9, Subscription Publication, 9.65M) editorializes that the removal of Thailand's Prime Minister Yingluck Shinawatra from office by that nation's Constitutional Court "is almost sure to send the country deeper into crisis" and marks the third removal of the head of government by the court "using dubious legal reasoning" in the last six years. While "many of Ms. Shinawatra's troubles are of her own making," the Times says the removal only deepens and further politicizes divisions, and that what Thailand "needs now is compromise and reconciliation."

WASHINGTON POST. "Betting On Alibaba's IPO." The Washington Post (5/9, 4.22M) says in an editorial that Chinese Internet giant Alibaba's future "depends on continued warm relations" with a Beijing government that has favored it and made it "impossible for competitors such as Facebook, YouTube and Twitter to operate freely and that, at times, mandate unfriendly regulatory treatment of U.S. firms." The Post says Alibaba's US IPO, "like the U.S.-China relationship more generally...poses a conflict between Americans' democratic values and their economic ambitions."

"On The Alert For Polio." The Washington Post (5/9, 4.22M) says in an editorial that even though "the polio

situation this year has been promising in some places," the World Health Organization has issued its second-ever declaration of an international public health emergency over the spread of wild poliovirus. The Post says WHO took the step due to "the fear that travelers are spreading the wild poliovirus, threatening to export it to nations where it does not now exist. ... The threat of polio spreading is very real and poses a danger not only for their own populations but also for peoples far beyond."

"Mr. Frosh For Attorney General." The Washington Post (5/9, 4.22M) editorial board endorses Maryland state Sen. Brian E. Frosh for the Democratic nomination as Maryland Attorney General, calling Frosh "among the most admired, intelligent, civil and hardworking lawmakers in Annapolis." The Post argues that his primary opponents, Dels. Jon S. Cardin and Aisha N. Braveboy, "are not in Mr. Frosh's league," but notes that Frosh "is not the heavy favorite" in the race, citing "the unpredictability of tiny-turnout elections, as the June 24 primary is expected to be," and noting that "one of his opponents," Cardin, a "lackluster lawmaker" whose uncle is Sen. Benjamin Cardin (D-MD), "happens to possess a famous name." The Post concludes that only Frosh "has the political savvy, command of policy and stature to be a superb attorney general."

WALL STREET JOURNAL. "Obama's Climate Bomb." In an editorial, the Wall Street Journal (5/9, Subscription Publication, 5.51M) contends that the National Climate Assessment released by the Administration this week was crafted to manipulate public opinion rather than present the science on the subject straightforwardly.

"Democrats Doth Protest Benghazi." An editorial in the Wall Street Journal (5/9, Subscription Publication, 5.51M) argues that the House's creation of a select committee to investigate the Benghazi attack would not have been necessary if the Administration had been truthful about the attack from the start.

"China Answers Obama." The Wall Street Journal (5/9, Subscription Publication, 5.51M) says in an editorial that China's aggressive actions in the South China Sea near Vietnam this week are a clear response to President Obama's Asia tour, a sign from Beijing that China will continue to assert itself regardless of American opinion.

Washington Schedule:

TODAY'S EVENTS IN WASHINGTON.

White House:

PRESIDENT OBAMA – The President delivers remarks, Walmart, Mountain View, CA, open to pre-credentialed media; departs California en route Washington, DC, open to pre-credentialed media; arrives Joint Base Andrews, out-of-town travel pool coverage; arrives the White House, South Lawn, open press. Notes: Deputy Press Secretary Eric Schultz will gaggle aboard Air Force One.

VICE PRESIDENT BIDEN – The Vice President will attend an event for the South Carolina Democratic Party at the Capital City Club. This event is closed press. The Vice President will deliver the commencement address at the University of South Carolina. The Vice President's remarks at this event are open press.

US Senate: Not in session.

US House: 9 a.m. – House will meet for legislative business.

COMMITTEE MEETINGS

OVERSIGHT AND GOVERNMENT REFORM – 9:30 a.m. Subcommittee on Government Operations, "Mixed Signals: The Administration's Policy on Marijuana, Part Three." Location: 2154 Rayburn. Notes: Rescheduled

from May 8.

FOREIGN AFFAIRS – Markup: H.R. 4586, H.R. 4587, H.R. 4573, H. Res. 573. Location: 2172 Rayburn.

SCIENCE, SPACE, AND TECHNOLOGY – 10 a.m. “Space Traffic Management: How to Prevent a Real Life Gravity.” Witnesses: Lt Gen. John “Jay” Raymond, Commander, 14th Air Force, Air Force Space Command; and Commander, Joint Functional Component Command for Space, U.S. Strategic Command; George Zamka, Deputy Associate Administrator, Office of Commercial Space Transportation, Federal Aviation Administration; Robert Nelson, Chief Engineer, International Bureau, Federal Communications Commission; P.J. Blount, Adjunct Professor, Air and Space Law, University of Mississippi School of Law; Brian Weeden, Technical Advisor, Secure World Foundation. Location: 2318 Rayburn.

Other: **ROCKET CONTEST – May 9 – 10.** Hundreds of middle and high school students from across the country travel to the nation’s capital for the championship round of the Team America Rocketry Challenge. Highlights: 9 a.m. – 10 a.m. Students will showcase their rockets on Capitol Hill during “Rockets on the Hill,” TARC’s third annual pre-event reception that brings teams together with STEM advocates and their elected representatives in Congress. 902 Hart. Notes: Day-of media contact: Ashley Gudzak, 904-651-2364 (cell), ashley.gudzak@aia-aerospace.org; Michal Miller, 703-963-6842 (cell), aiarockets@gmail.com

STRATEGIC COMMUNICATIONS SUMMIT – May 8 – 9. Some of the country’s top communications and public affairs officers are scheduled to speak at the 5th National Summit on Strategic Communications. Location: Washington Plaza Hotel, 10 Thomas Circle.

U.S. CHAMBER – GLOBAL INFRASTRUCTURE – 8 a.m. – 9:30 a.m. The U.S. Chamber of Commerce along with the International Finance Corporation (IFC), the private sector arm of the World Bank Group; Rio Tinto; and the ONE Campaign will host, “Infrastructure Week Goes Global,” an event that will explore ways in which infrastructure investment in developing countries can spur economic growth. Speakers: Sam Walsh AO, Chief Executive, Rio Tinto; Jin-Yong Cai, Executive Vice President and CEO, International Finance Corporation; Fred Hochberg, Chairman, U.S. Export-Import Bank; Mary Andringa, CEO, Vermeer; Michael Elliott, President and CEO, ONE Campaign. Credentialed media registration: email press@uschamber.com or call 202-463-5682. Location: IFC Auditorium, 2121 Pennsylvania Avenue, NW. Notes: The event is part of Infrastructure Week 2014, a series of events focusing on the critical need to modernize the country’s aging infrastructure.

FORUM ON DIGITAL INNOVATION – 8 a.m. – 10 a.m. D.C. “How USDA’s Risk Management Agency has applied sophisticated data analytics to help produce a billion dollars in cost-avoidance after Congress mandated the use of a data warehouse and data-mining to improve crop insurance program compliance and integrity.” Keynote speakers: David A. Lebyrk, commissioner, U.S. Department of the Treasury’s Bureau of the Fiscal Service; Tom Dohmann, director, McKinsey Center for Government. Location: Ronald Reagan Building and International Trade Center. Contacts: Greg Muraski, gmuraski@rhsmith.umd.edu, 301-892-0972

U.S. CHAMBER – HEALTHCARE VALUE – 9:30 a.m. – 12:30 p.m. U.S. Chamber to highlight private sector efforts to realize greater value in healthcare. The second in a four-part series, this event will explore healthcare solutions proposed in the second chapter of the Chamber’s Healthcare Solutions Council report, which was released in June of last year. Location: 1615 H Street, NW. Notes: Credentialed members of the media are invited to attend. To register, email press@uschamber.com or call 202-463-5682.

LABOR HALL OF HONOR – 11:15 a.m. – 12:30 p.m. U.S. Secretary of Labor Thomas E. Perez will formally induct into the Labor Hall of Honor approximately 12,000 Chinese immigrant laborers who worked on the Central Pacific Railroad between 1865 and 1869. The Chinese Railroad Workers are the first Asian Americans to receive such a tribute since the establishment of the Hall of Honor in 1988. Location: U.S. Department of Labor, Cesar E. Chavez Memorial Auditorium, 200 Constitution Ave. NW. Contacts: Jason Kuruvilla, kuruvilla.jason@dol.gov, 202-693-6587. Notes: Media should arrive by 11 a.m. at the guest entrance at Third and C St. NW and sign in at the press table.

PETERSON INSTITUTE – IMF OFFICIAL – 12 p.m. The Peterson Institute for International Economics will host the first public speech by Dr. Changyong Rhee, the new Director of the Asia and Pacific Department of the International Monetary Fund (IMF). Dr. Rhee will present over luncheon the IMF’s Spring Asia and Pacific Regional Economic Outlook. Location: 1750 Massachusetts Avenue, NW. Notes: RSVP to Yvonne Priestley by

replying to meetings@piie.com.

FUTURE OF GLOBAL HEALTH – 8:30 p.m. – 11:30 p.m. Interactive Reception & Discussion Forum. Global Health Council and the Global Health Fellows Program-II host an evening of discussion (“and dancing!”) designed to foster communication and partnership between new and established members of the global health community. Location: The Hamilton, 600 14th St. NW. Contacts: Caitlin Holbrook, 716-225-0502.

Last Laughs:

LATE NIGHT POLITICAL HUMOR.

Stephen Colbert: “Folks, in here, out there, all around the world – nation, if you are watching the news you know that we are in the middle of the 2014 midterm primaries, where candidates are fighting for voters’ approval so they can go to Congress and lose it immediately.”

Stephen Colbert: “The first primary elections were this last Tuesday, and in Ohio, Indiana and North Carolina, tea party candidates lost to establishment Republicans. Folks, it looks like the country club Republicans are going to run everything. They certainly do in my country club.”

Jimmy Fallon: “During his speech last night, President Obama said it’s important for Democrats to win the midterm elections, because the GOP says ‘no’ to everything. Republican says, ‘No, we . . . good one.’”

Jimmy Fallon: “Speaking of Obama, a new report shows that the President has visited 45 states during his time in office. When he heard that, Biden was like, ‘Wow. He’s been to all of them?’”

Seth Meyers: “For the second time in three days, the White House has gone into lock-down after somebody threw an object over the fence. And finally today, President Obama took away Joe Biden’s Frisbee.”

Seth Meyers: “The situation in Ukraine continues and now NATO is disputing Russian President Vladimir Putin’s claims that he withdrew forces from the Ukraine border, while Putin is disputing claims that Ukraine’s border actually exists. ‘All I see is Russia, baby.’”

Re: the rest of the answer to the question the Secretary asked on Kreiger Peak

Dan Ashe <d_m_ashe@fws.gov>
To: Sally Jewell (b)(6) os.doi.gov>
Cc: Tommy Beaudreau <tommy.beaudreau@boern.gov>

Fri, May 9, 2014 at 7:27 AM

Hello Sally. (b)(5)

(b)(5)

A good topic for extended discussion sometime.

Dan,

Dan Ashe
Director, U.S. Fish and Wildlife Service

On May 8, 2014, at 4:52 PM, Sally Jewell <(b)(6)ios.doi.gov> wrote:

Dan –

Please read the message below from John Kopchik, leader of the local HCP effort in Contra Costa County. As noted, he feels it has been a great model, but is concerned about FWS backing away from these as a concept. I'd appreciate your thoughts.

Thanks,

Sally

Subject: Fwd: the rest of the answer to the question the Secretary asked on Kreiger Peak

Hi Sally,

John Kopchik sent a follow up message for you.

Thanks,

Erin

On Wed, May 7, 2014 at 7:59 AM, John Kopchik <John.Kopchik@dcd.cccounty.us> wrote:

Hi Jessica and Booch—

The Secretary asked what we thought US Fish and Wildlife Service was doing well with respect to HCPs and what we thought they were not doing so well. Our answer was a little muddled and careful. The full answer is probably worthy of a white paper (and our California HCP Coalition is working on one—though FWS participates in some Coalition activities so the written materials will also be politic). But there is one overall point that I should have made better while hiking back down. FWS was visionary in terms of inventing and promoting regional land use HCPs with local governments, realizing that the landscape approach was best for conservation and permitting and that partnering with locals to implement ESA on the ground was an effective way to leverage thin federal resources (and beat back attacks on ESA in Congress). I am not sure that regional land use HCPs remain a priority at levels higher than Jen's. Part of the problem is tight budget and that is obviously a Congressional issue. But regional HCPs no longer seem to be a high priority for staffing, grant funding and policy leadership. My perspective is admittedly narrow, but I think the HCP program is one of the most powerful tools we have for resolving conflicts between conservation and development and I hope FWS can renew its focus on it.

If you think it appropriate to pass this thought on to the Secretary I would appreciate it. Thank you.

—John

LAST LAUGHS:

- + Late Night Political Humor.

DOI in the News:

WASHINGTON MONUMENT TO REOPEN MONDAY. The Washington Post (5/11, Ruane, 4.22M) reports that on Monday, the Washington Monument will reopen to the public, 994 days after it was damaged by an earthquake. Tours will resume at 1:00 p.m.

CBS News (5/12, 5.21M) reports that “the biggest challenge was money,” and “billionaire investor David Rubenstein gave it.” Rubenstein “donated \$7.5 million – half of the project’s cost – to get the work done – and done right.”

The AFP (5/12) reports that Interior Secretary Sally Jewell said, “This enduring spirit of public-private partnerships has made it possible for visitors to once again enjoy the Monument and its unmatched view of Washington.” Jewell will “attend a reopening ceremony attended by US celebrities, with accompaniment by the United States Navy Band.”

Also covering the story are the AP (5/12), the Washington Times (5/12, Somers, 455K), the Los Angeles Times (5/12, Clozel, 3.46M), Reuters (5/12), the Orlando (FL) Sentinel (5/9, 850K), the DCist (5/11, 21K), and WJZ-TV Baltimore (5/9, 36K).

SECRETARY JEWELL VISITING ST. LOUIS TO VIEW ARCH PROJECT WORK. The AP (5/12) reports that Interior Secretary Sally Jewell is scheduled to visit St. Louis with Vice President Joe Biden. The two will be in St. Louis on Tuesday and will visit the CityArchRiver project at the Gateway Arch.

AP coverage was also picked up by the St. Louis Post-Dispatch (5/11, 1.02M), the Fort Mill (SC) Times (5/10, 54K), KMOV-TV St. Louis (5/11, 91K), and KMOX-TV St. Louis (5/10, 15K).

Also reporting on the story is the St. Louis Public Radio (5/12) and KPLR-TV St. Louis (5/10, 2K).

SECRETARY JEWELL HANDS OUT DEPARTMENT OF INTERIOR VALOR AWARDS. At an honors ceremony, Interior Secretary Sally Jewell handed out awards to 17 NPS employees and three private citizens for bravery. Coverage was provide by the Las Vegas Review-Journal (5/12, 437K), the Tacoma (WA) News Tribune (5/9, 338K), and the Deseret (UT) News (5/11, 610K).

SENATE ENERGY AND NATURAL RESOURCES COMMITTEE TO VET INTERIOR NOMINATIONS. The National Journal (5/12, Subscription Publication, 561K) reports that the Senate Energy and Natural Resources Committee will wade into confirmation hearings Tuesday. The panel will “convene to vet” the nominations of Suzette Kimball to become the director of the USGS and Estevan Lopez as commissioner of the BOR.

POVERTY POINT’S NOMINATION AS WORLD HERITAGE SITE IN DOUBT. The Monroe (LA) News Star (5/10, 107K) reports that Poverty Point Historic Site’s nomination as a World Heritage Site has “suffered a serious blow following a recommendation that it be deferred, although state and federal officials believe they can overcome the recommendation.” Sen. Mary Landrieu, who has “been lobbying for Poverty Point, didn’t address the recommendation to defer, but did issue” a statement, saying: “I will continue to advocate aggressively on Poverty Point’s behalf. I have asked the Department of Interior to send a high level government official to the World Heritage Convention ... so that Poverty Point gets the fair consideration it deserves. Poverty Point is a historic jewel for our state and nation, and I am very appreciative of all that local, state and our federal officials are doing on its behalf.”

REP. BISHOP NEARS RELEASE OF “FRAMEWORK” FOR PUBLIC LANDS IN UTAH. The Environment & Energy Publishing (5/11, 705) reports that Utah Rep. Rob Bishop said last Thursday that “he plans to release a ‘legislative framework’ by late summer for a bill that would designate new wilderness and recreation areas, open new lands to drilling and swap federal and state lands in eastern Utah.” Bishop said he “remains optimistic that conservationists, ATV and bicycle riders, energy companies, Utah, its counties and the Navajo Nation can agree on how to settle protracted land disputes in the region.” In an interview, he said, “It surprises me that they’re still optimistic and positive and willing to talk. I actually still think we’re on the path to get something amazing accomplished.”

SCOTUS ASKED TO RULE ON RELIGIOUS SIGNIFICANCE OF MEMORIAL CROSS. In his “The High Court” blog for the Washington Post (5/12, 4.22M), Robert Barnes writes that the Supreme Court ruled last week that

"nonbelievers and those of other religions had no reason to be unduly disturbed if a government meeting opened with a Christian prayer," but Barnes adds that the court has been asked to rule on the religious significance of crosses, noting that some residents of San Diego "look to the hills of Mount Soledad and see a giant lighted cross that has been adopted by Congress as a national war memorial," while others "see it as a poke at their faith, or lack thereof, in direct conflict with the constitution's prohibition against government establishment of religion." Defenders of the cross, built in 1954 "and the subject of 25 years of litigation, have asked the Supreme Court to review a district court's decision that it must be dismantled."

Legal Group Celebrates Religious Court Victories. The New York Times (5/12, Eckholm, Subscription Publication, 9.65M) reports from Scottsdale, AZ about the Alliance Defending Freedom, with a \$40 million annual budget, 40-plus staff attorneys, "and hundreds of affiliated lawyers," which "has emerged as the largest legal force of the religious right, arguing hundreds of pro bono cases across the country." The Alliance "has helped shift the emphasis of religious freedom enshrined in the Constitution." The Times notes that for decades, "courts leaned toward keeping religion out of public spaces," but now, "thanks to cases won by the alliance and other legal teams focused on Christian causes, the momentum has tilted toward allowing religious practices with fewer restrictions." Last week the Alliance "celebrated a major victory in the Supreme Court, where a client, the Town of Greece, N.Y., won the right to open council meetings with mainly Christian prayers."

DROUGHT EXTENDS FIRE SEASON IN CALIFORNIA. The CBS Evening News (5/11, story 2, 1:35, Glor, 5.08M) reported that the "chronic drought" in California has lead "officials to declare the start of the fire season in all but three counties this weekend." CBS (Evans) says that California's "fire season usually begins in July, but for southern California it never ended. In January, a wildfire destroyed five homes east of Los Angeles during what was supposed to be the rainy season. So far, California has seen 1,355 fires, nearly double a typical year and the forecast is bleak."

ADDITIONAL COVERAGE OF NATIONAL CLIMATE CHANGE VIEWER. Additional coverage of the National Climate Change Viewer was provided by the [Imperial Valley \(CA\) News](#) (5/11, 1K).

PROFESSOR LOOKS FORWARD TO SECRETARY JEWELL'S ADDRESS AT WHITMAN COLLEGE COMMENCEMENT. In an op-ed for the [Walla Walla \(WA\) Union-Bulletin](#) (5/10, 38K), Bob Carson, who teaches geology and environmental studies at Whitman College, agrees with the choice of Interior Secretary Sally Jewell to be the speaker for Whitman College's 2014 Commencement on May 25. Carson lists how the agencies under Jewell's leadership impact the Northwest. He writes that "the land area is huge; the mineral and wildlife resources are critical; and these federal agencies are led by someone who could be anyone's hero: Sally Jewell." Carson concludes that "the greater Walla Walla community, especially Whitman seniors and their families, are fortunate to have her visit."

CONGRESS URGED TO REGAIN SENSE OF STEWARDSHIP. For "The Blog" of the [Huffington Post](#) (5/11, Clark, 11.54M), Jamie Rappaport Clark, President & CEO, Defenders of Wildlife, claims that "stewardship of our natural heritage has gone missing in Congress." According to Clark, "instead of conserving and protecting America's natural resources, many members in Congress seem primarily focused on short term economic gain, regardless of the environmental consequences." Clark concludes that "instead of tired politicking, it would be refreshing to see conservation stewardship once again become the hallmark of our broken and dysfunctional Congress."

America's Great Outdoors:

National Park Service:

DOCUMENTS SHOW ILLEGAL NPS PROJECTS DAMAGE SACRED SITE. The [AP](#) (5/11, Foley) reports that NPS officials "approved \$3 million in illegal construction projects over a decade that damaged one of the nation's most sacred American Indian burial sites, but few have been punished for the bureaucratic failure, records show." According to investigation documents posted this week on the park service's website, "Phyllis Ewing, the former superintendent of Effigy Mounds National Monument, and subordinate Tom Sinclair repeatedly ignored laws that required archaeological studies and input from tribes before building boardwalks, trails and a maintenance shed at the federally protected site in northeast Iowa." NPS employees "blamed Ewing and Sinclair for pursuing the

illegal developments in a misguided effort to make the site more accessible to those with disabilities.”

Coverage by the AP was also picked up by the Washington Post (5/11, 4.22M), the Denver Post (5/12, 940K), FOX News (5/10, 74.23M), and the US News & World Report (5/10, 645K). Also providing coverage is the Cedar Rapids (IA) Gazette (5/12, 147K).

NPS ESTABLISHES STRICT RULES FOR NATIONAL MALL TURF. The New York Times (5/12, Corasaniti, Subscription Publication, 9.65M) reports that “with the installation of exquisite, expensive new turf on a little less than half” of the National Mall, the NPS has “established strict rules that include limits on festivals and concerts, and even restrictions on when pickup softball and Frisbee games may be played.” The article notes that “the requirements have created an identity crisis for the mall and set off a deeper debate.” Bob Vogel, the mall’s superintendent, said, “It should be used, and it should be heavily used. It’s a place where democracy is in action. But change is difficult on everyone, including us.”

OPPOSITION GROWS AGAINST LG HEADQUARTERS BESIDE THE PALISADES. In its “ArtsBeat” blog, the New York Times (5/12, Kimmelman, 9.65M) reports that “opposition keeps growing to a proposed new American headquarters for LG Electronics USA, the tech giant, beside Palisades Park in Englewood Cliffs, N.J.” The National Trust for Historic Preservation will announce Monday that it has designated the Palisades as a National Treasure. The article notes that “LG has resisted pleas from, among others, four former New Jersey governors; an alliance of neighboring mayors; Governor Andrew Cuomo and other New York officials; national environmental agencies; and the director of the National Park Service, which administers the Palisades as a National Natural Landmark.”

SURVEY FINDS VISITORS TO NATIONAL PARKS DON’T LIKE NOISE. The Los Angeles Times (5/10, Cart, 3.46M) reports that “visitors to remote areas in national parks consider noise from helicopters or planes an unpleasant intrusion,” according to a study conducted jointly by the NPS, the Department of Transportation, and the Federal Aviation Administration, presented at the national meeting of the Acoustical Society of America in Providence, R.I. The NPS is “well aware of the impacts of noise on visitor experience.” The service has “a mandate to maintain a natural soundscape and in 2000 established a program that considers sound in all of its forms: the natural acoustic environment that includes sounds generated by wind and water as well as sound from battle reenactments or Native American ceremonies.”

BICYCLISTS ANGERED OVER ROSSYLN’S “INTERSECTION OF DOOM”. The Washington Post (5/11, Weiner, 4.22M) reports that an accident has “revived anger in Rosslyn over what cyclists call ‘the intersection of doom’ — the point where Lee Highway meets North Lynn Street, and bicyclists coming off the Custis Trail face off against two lanes of cars turning right off Interstate 66 onto the Key Bridge.” According to the article, “redesigning the intersection is difficult for the same reason that crossing it is — a highway meets a local road and a national park trail.” The article notes that “the Virginia Department of Transportation, the National Park Service and Arlington County all have to agree on a remedy.”

RANCHERS WEIGH POINT REYES NATIONAL SEASHORE RANCH PLAN. The Marin (CA) Independent Journal (5/11, 88K) reports that many West Marin ranchers who operate within the Point Reyes National Seashore view the “Ranch Comprehensive Management Plan/Environmental Assessment” as “the preservation of a way of life.” The article notes that “longer leases for ranchers is the cornerstone of the plan.” According to the article, “among the goals of the plan for the roughly two dozen ranches on 28,000 acres of land: articulate a clear vision for ranching; address concerns related to tule elk impacts; provide a streamlined process for review of proposed ranching activities; and define a process for maintaining ranching if a rancher decides to cease operations, among other issues.”

POWER LINE THROUGH DELAWARE WATER GAP NEARLY COMPLETE. The Allentown (PA) Morning Call (5/11, 339K) reports that “construction of the controversial high-power transmission line through the Delaware Water Gap National Recreation Area is just about finished, but hard feelings still linger.” The NPS’ Kathleen Sandt, a spokeswoman for the Delaware Water Gap, said, “It has gone pretty well. They worked through one heck of a winter.” However, New Jersey Sierra Club Director Jeff Tittel said, “It’s everything we were concerned it would be — an ugly scar cut through [the park].”

DEDICATION SCHEDULED FOR ISLAND LOOP WATER TRAIL. The AP (5/12) reports that Sen. Debbie

Stabenow is "scheduled to speak during the dedication of the Island Loop National Water Trail in Michigan's Thumb region." The ceremony will be held at 9:30 a.m. Saturday at Bakers Field Park in Port Huron. Interior Department officials "announced last fall that St. Clair County's 10.2-mile-long Island Loop Water Trail had been selected as the first National Water Trail in the state."

GREAT SMOKY MOUNTAINS NATIONAL PARK OFFICIALS SEE GRAFFITI INCREASING. The AP (5/12) reports that "officials in the Great Smoky Mountains National Park say they are seeing an unprecedented increase in graffiti." The article notes that "the problem used to be concentrated along easily accessible trail sections," but trail managers said that "they are now seeing more graffiti in the backcountry including at shelters." Christine Hoyer, backcountry specialist for the Smokies, said, "We have a consistent issue with graffiti at historical structures throughout the park, especially in Cades Cove. What we've seen recently is a rise of graffiti along the Appalachian Trail. The challenge is how to deal with it. If we remove it, are we just providing another canvas?"

NPS TO OFFER TOURS OF CHARLES TOWN. The AP (5/12) reports that the NPS will soon "offer guided tours of sites in Charles Town related to abolitionist John Brown." The walking tours, provided by rangers from Harpers Ferry National Historical Park, will begin Memorial Day weekend.

CAPITAL CRESCENT TRAIL REOPENS AFTER SEWAGE SPILL. WRC-TV Washington (5/12, 312K) reports that "after five millions of gallons of raw sewage and rain water spilled into the C&O Canal last week, the Capital Crescent Trail has reopened." The article notes that "the trail was closed after last week's storms caused untreated sewer waste to overflow a manhole and enter the canal." The NPS says "the spill actually affected a larger portion of canal, reaching all the way to Sycamore Island above Lock 7."

Also reporting on the story are WUSA-TV Washington (5/9, 95K) and WJLA-TV Washington (5/12, 118K).

GREAT SMOKY MOUNTAINS NATIONAL PARK FIREFIGHTERS BATTLE WILDFIRE. The Asheville (NC) Citizen-Times (5/9, 58K) reports that the Great Smoky Mountains National Park firefighters are "managing a low-intensity, 10-acre wildfire, located just above Rainbow Falls along Rainbow Falls Trail, on the Tennessee side of the park." According to the article, "the fire is slowly spreading, with flame lengths less than 3 feet high, through a pine-oak forest including a fire-dependent Table Mountain Pine stand." However, "firefighters anticipate that the fire will stay confined to the Rocky Spur area due to non-receptive fire fuels across the ridge along with predicted rain."

CLIMBER DIES ON MOUNT MCKINLEY. The AP (5/12, Joling, Le) reports that "a Washington state climber has died descending Mount McKinley after falling down a hard-packed stretch of mountain that has claimed 11 other lives." According to the article, "the body of Sylvia Montag, 39, of Tacoma, was spotted Wednesday night by a helicopter crew after strong winds subsided and allowed flights."

Coverage by the AP was also picked up by the Washington Post (5/12, 4.22M), USA Today (5/12, 5.82M), and Yahoo! (5/12, Joling, 17.91M). Also providing coverage is Reuters (5/12, Kaminsky).

ADDITIONAL COVERAGE OF NAVAJO WOMAN'S RIGHT TO LIVE ON WUPATKI NATIONAL MONUMENT. Additional coverage of a Navajo woman's right to live at Wupatki National Monument was provided by NPR (5/12, Morales, 519K).

DECISION TO BAN DRONES AT YOSEMITE SUPPORTED. In an editorial, the Boston Globe (5/11, 1.62M) supports the decision to ban drones at Yosemite National Park. The paper argues that "technology doesn't change the rules of basic etiquette, and cluttering the park's airspace, not to mention its views, is no better than littering." According to the editorial, "this action should be understood in the same spirit as existing rules meant to preserve the park's natural character, not as mere resistance to new technology."

"CRUSADE" AGAINST DRAKES BAY OYSTER CO. CRITICIZED. In his column for the Orange County (CA) Register (5/11, 642K), Carl M. Cannon criticizes the "crusade" against the Drakes Bay Oyster Co. Cannon claims that "the problem is that one side rigged the game and is employing guilt-by-association, one of the most despicable (and least authentically liberal) methods of argumentation in the public policy arena." He claims that "if the preservationists prevail they will have done so by Machiavellian motives and tactics (i.e., that the ends

justified the means), and they are not likely to stop at Point Reyes National Seashore.”

Bureau of Land Management:

DOZENS OF PROTESTERS RIDE VEHICLES ON FEDERAL LAND IN UTAH YESTERDAY. The AP (5/11) reports that the San Juan County, Utah Sheriff is saying that between 40 and 50 people “rode their ATVs and motorcycles on an off-limits trail in southern Utah” on Saturday as part of a protest over the way the Federal government manages public lands. San Juan County Sheriff Rick Eldredge commented that “It was peaceful, and there were no problems whatsoever,” and there were BLM officials present with other local authorities observing the protests.

The Los Angeles Times (5/11, Glionna, 3.46M) reports, “This was the latest challenge by citizens saying they are defending state and local rights against an increasingly arrogant federal government that has overstepped its role in small communities.”

The Los Angeles Times (5/12, Glionna, 3.46M) reports that San Juan County Commissioner Phil Lyman said, “It feels great. That line I crossed was a pretty arbitrary thing.” Lyman and “his supporters want the BLM to act more quickly on a years-old request for a public right-of-way through the area.”

The Deseret (UT) News (5/11, 610K) reports that BLM Utah director Juan Palma said, “We know from the archaeological record left behind in Recapture Canyon that the area was previously occupied for at least 2,000 years. Illegal ATV use within Recapture Canyon may have damaged many of these archaeological resources — all of which hold the history and tell the story of the first farmers in the Four Corners region.”

The Denver Post (5/12, Maffly, 940K) reports that Palma said, “As always, our first and most important priority is the safety of the public and our employees, and our actions today reflect that.”

Coverage by the AP was also picked up by the Washington Post (5/12, 4.22M), the Washington Times (5/12, Griffith, McCombs, 455K), the Sacramento (CA) Bee (5/11, 687K), the Denver Post (5/12, 940K), the Las Vegas Review-Journal (5/12, 437K), the Arizona Republic (5/10, 1.45M), ABC News (5/12, 3.58M), the US News & World Report (5/10, 645K), and WJBK-TV Detroit (5/12, 83K).

Utah Gov. Herbert, Sen. Hatch Urge Protesters To Follow Laws During ATV Protest. The AP (5/12, McCombs) reports that Utah Gov. Gary Herbert said “he understands frustration around the issue, but urged people to uphold the law and not disrupt public safety during the protest.”

The St. George (UT) News (5/9, 3K) reports that Sen. Orrin Hatch urged “that when the public uses the public land to strive to do so in a peaceful manner.” He also encouraged the BLM to “make timely decisions regarding disputes in order to show elected officials and citizens that they are willing to work cooperatively with the public.”

Also reporting on the story is the Salt Lake (UT) Tribune (5/11, 470K).

Coverage by the AP was also picked up by the Washington Post (5/12, 4.22M), the Sacramento (CA) Bee (5/9, 687K), the Christian Science Monitor (5/12, McCombs, 566K), the US News & World Report (5/9, 645K), and WJBK-TV Detroit (5/12, 83K).

Additional Coverage. Also providing coverage are the Los Angeles Times (5/12, Glionna, 3.46M), the Christian Science Monitor (5/12, Jonsson, 566K), FOX News (5/10, 74.23M), FOX News (5/10, 74.23M), USA Today (5/12, Hughes, 5.82M), and Reuters (5/12).

Commentary. In his column for the Denver Post (5/12, Willoughby, 940K), Scott Willoughby criticizes the protest.

ELKO COUNTY DECIDES TO INVITE BLM DIRECTOR KORNZE TO COMMISSION MEETING. The Elko (NV) Daily Free Press (5/11, 22K) reports that “in light of ongoing land conflicts, county commissioners want newly confirmed Bureau of Land Management Director Neil Kornze, who grew up in Elko, back for a visit.” However,

"members of the board seemed to disagree Wednesday with the tone the county should take in its invitation." Commissioner Grant Gerber "wrote a draft resolution that listed a number of contentious problems on public land and placed fault at the BLM," and "at the conclusion of the document, it invited and pleaded for Komze's participation at a future commission meeting."

BLM RELEASES WILD HORSE GATHER ENVIRONMENTAL ASSESSMENT. The St. George (UT) News (5/10, 3K) reports that the BLM has "released an environmental assessment for public comment pertaining to a wild horse gather in Southern Utah." If approved, the plan will "consist of wild horse gather, removal and fertility treatment in the Bible Spring Complex area over a 10-year period." Megan Crandall, Utah BLM spokesperson said, "It acknowledges that we do have wild horse populations that need adjustment. If we get to the point that the environmental assessment is signed and there's a decision record, that gives us the ability to act quickly when we receive approval to begin making some of those adjustments."

BLM SEEKS BIDS FOR NEW CORRALS FOR WILD HORSES. The AP (5/12, Griffith) reports that the BLM is "soliciting bids for new, short-term holding facilities for wild horses removed from Western rangelands under its ongoing program to thin what it calls overpopulated herds." According to the article, "bids will be accepted until June 2 from contractors interested in operating the corrals in 17 Western and Midwestern states."

BLM APPROVES MINE PROJECT IN NEVADA. The AP (5/12) reports that the BLM has "given final approval to plans for a major mine project in northeastern Nevada." The bureau "announced Friday it has issued a record of decision on the final environmental impact statement for Barick-Dee Mining Venture's proposed Arturo Mine Project."

BLM TRUCK LIKELY CAUSE OF SAN DIEGO COUNTY FIRE. The AP (5/12) reports that "authorities suspect they've found the cause of a wildfire that burned nearly 150 buildings last summer in San Diego County." According to the article, "a state Cal Fire report concludes that the Chariot fire most likely started when a federal Bureau of Land Management Jeep ignited brush."

BLM, AUDUBON SHOWCASE RESCUED BIRDS. The AP (5/12, Heilman) reports that the Coeur d'Alene Audubon Society and the BLM presented the second Migratory Bird Day event at the Blackwell Island Boat Launch on Saturday. According to the article, "the free event included several stations where people could learn about birds and discover them in their habitats along the Spokane River."

COMPROMISE REACHED IN DISPUTE BETWEEN MARINES, OFF-ROADERS. The AP (5/12) reports that the Marine Corps and "off-road vehicle enthusiasts will share a rugged patch of desert near the military base at Twentynine Palms under a compromise brokered by Congress." The article notes that "neither side got all it wanted in the nearly decadelong dispute over 200,000 acres of Johnson Valley adjacent to the Marine Corps Air Ground Combat Center in the Mojave Desert."

ADDITIONAL COVERAGE OF BUNDY RANCH SHOWDOWN. Additional coverage of the Bundy ranch showdown was provided by the Las Vegas Review-Journal (5/12, 437K), Forbes (5/9, 6.28M), and ABC News (5/11, 3.58M).

Fish and Wildlife Service:

WESTERN STATES WORRY ABOUT DECISION ON SAGE GROUSE. In its "Govbeat" blog, the Washington Post (5/12, 4.22M) reports on the "years-long battle that pits environmentalists who want the sage grouse protected under the Endangered Species Act against ranchers, gold miners, energy producers and Western state governments that stand to lose billions of dollars in tax revenue and economic activity if tens of millions of acres are blocked off from development, exploration or use." The article notes that "the tension between the federal government and Westerners who want to use government-owned land garnered new attention last month, when the Bureau of Land Management moved to round up cattle owned by Nevada rancher Cliven Bundy over more than \$1 million in unpaid grazing fees." According to the article, "some state officials fear a decision to list the sage grouse, which would severely limit everything from grazing to energy development on a huge swath of land, could create a slew of new Bundys all over the rural West."

JUDGE ORDERS FWS OFFICIALS TO ACT ON LYNX. The AP (5/12, Brown) reports that “it could take two years or more to finish a long-delayed recovery plan for Canada lynx after a judge ordered the federal government to move forward with the work, a US Fish and Wildlife Service official said Friday.” Agreeing with the plaintiffs, US District Judge Donald Molloy on Thursday “gave officials 30 days to propose a schedule for completing the recovery plan.” Molloy said “the history of the case raised skepticism about the agency’s ability to get the work done without court intervention.”

Coverage by the AP was also picked up by the Seattle Post-Intelligencer (5/12, 857K) and the Yakima (WA) Herald-Republic (5/12, 86K). Additional coverage was provided by The Missoulian (5/12, 122K) and the Ravalli (MT) Republic (5/12, 19K).

KANSAS GOV. BROWNBACK SIGNS BILL AIMED TO PREVENT FEDERAL REGULATION OF LESSER PRAIRIE CHICKEN. The AP (5/12, Hanna) reports that Kansas Gov. Sam Brownback has signed a bill meant to prevent Federal regulation of the lesser prairie chicken. The “State Sovereignty over Non-migratory Wildlife Act” says Kansas has “the sole power to regulate the lesser prairie chicken — along with the larger, darker and more abundant greater prairie chicken — and their habitats within Kansas.” The law “authorizes the attorney general or county prosecutors to sue over federal attempts to impose conservation measures.”

Coverage by the AP was also picked up by the Topeka (KS) Capital-Journal (5/10, 177K). Also reporting on the story is the Kansas City (MO) Star (5/10, 1.48M).

AGREEMENT REACHED TO PROTECT PURPLE ASTER. The AP (5/12, Henry) reports that “a threatened flower called the Georgia aster that once flourished across the Southeast may find better protection now that a utility company, highway crews and local governments are promising steps to protect it.” Federal officials reached a deal with groups including utility company Georgia Power, state highway officials and local government and landholders to agree to steps meant to help save the purple aster. Under the agreement, “those signing the agreement promise not to blanket areas with herbicides, which can kill the aster, and instead spray chemicals only where needed.”

KENAI NATIONAL WILDLIFE REFUGE HOSTS YOUTH GAME WARDEN CAMP. The AP (5/12, Mcchesney) reports that forty-two kids went to the Kenai National Wildlife Refuge headquarters in Soldotna for the first Youth Game Warden camp. Representatives from the FWS, Alaska Wildlife Troopers, Alaska Department of Fish and Game, the US Forest Service, Alaska State Parks and the National Oceanic and Atmospheric Administration “took the weekend to teach students about everything from anatomy, archery, boating safety and wildlife forensics to enforcement, conservation and fisheries management.”

US Geological Survey:

USGS INSTALLS NEW SEISMOMETERS IN KANSAS. KWCH-TV Wichita, KS (5/11, 23K) reports that Steve Walter, a geologist with the USGS and geophysicist Jem Erdem “flew out from California May 5th to set up seismometers in Southeast Kansas.” Walter said, “We’re installing one of seven seismometers that we’ve put in the area. Earthquakes have seemed to follow the oil development in Kansas as the oil companies have come in and started producing, the earthquakes seemed to come with them from Oklahoma. So we are trying to pin down the relationship, are the earthquakes related to the oil production and if they are what part of it? Also, trying to figure out where these earthquakes are occurring.”

Securing America’s Energy Future:

Renewable Energy:

CHANGES TO WIND TURBINES SEEN AS NECESSARY TO SAVE BATS. In an op-ed for the New York Times (5/12, Subscription Publication, 9.65M), Rodrigo Medellín, Don Melnick and Mary Pearl, professors of biology at various universities, write that disease and “heedless management of wind turbines” are harming North American bats, “with potentially devastating consequences for agriculture and human health.” They write that across the US, wind turbines are “estimated to kill between 600,000 and 900,000 bats a year, according to a recent study in the journal *BioScience*.” They argue that bats are a vital part of the ecosystem, and argue for better management

of wind turbines to reduce deaths.

Onshore Energy Development:

DEPUTY SECRETARY CONNOR VISITS NORTH DAKOTA TO DISCUSS FLARING. The AP (5/11) reports that Interior Deputy Secretary Michael Connor visited Dickinson, North Dakota on Friday to “discuss venting and flaring on public lands with government, tribal and oil and gas officials.” Connor’s visit is a part of President Barack Obama’s Climate Action Plan to create jobs and cut carbon pollution. Connor said “his goal is to have proposed new regulations passed by the end of this year.”

The Jamestown (ND) Sun (5/11, 850) reports that Connor and BLM Deputy Director Linda Lance “repeatedly said the BLM will take into account existing regulations, on a federal level with the Environmental Protection Agency, and on a state level, including rules that will soon take effect to reduce flaring.”

Also providing coverage is the Grand Forks (ND) Herald (5/11, 87K).

GAO REPORT FINDS THAT BLM FAILED TO INSPECT HIGHER-RISK OIL WELLS. The AP (5/12, Yen) reports that, according to a new GAO report, the BLM “has failed to inspect thousands of oil and gas wells it considers potentially high risks for water contamination and other environmental damage.” The report “highlights substantial gaps in oversight by the agency that manages oil and gas development on federal and Indian lands.” The GAO audit “also said the BLM did not coordinate effectively with state regulators in New Mexico, North Dakota, Oklahoma and Utah.”

Coverage by the AP was also picked up by the Washington Post (5/12, 4.22M), Yahoo! (5/12, Yen, 17.91M), PBS (5/12, 1.22M), the Las Vegas Sun (5/11, 148K), and the Elko (NV) Daily Free Press (5/12, 22K).

EPA SEEKS PUBLIC COMMENT ON POTENTIAL FRACKING RULES. The AP (5/10, 455K) reports that the EPA is seeking public comment on methods to disclose information about the chemicals used in fracking. The AP notes that the comment period is “an advanced notice of proposed new rules, but is no guarantee that the regulations will become law,” adding that “the EPA could also propose voluntary steps for energy companies to take.”

Reuters (5/10, Volcovici) reports that the advanced notice of proposed rulemaking was a response to environmental group Earthjustice’s petition for the EPA to require chemical manufacturers to publish detailed information about the content of the fluids used in fracking and for companies to submit all available health and safety studies on those mixtures.

The Wall Street Journal (5/10, Mundy, Subscription Publication, 5.51M) reports that the EPA said that it was open to a voluntarily system of disclosure and will consider keeping some information from reaching the public in order to protect companies’ formulas. This story is also reported by Bloomberg News (5/10, Drajem, 2.76M) and The Hill (5/9, Goad, 237K).

Professors: EPA Underestimates Fracking’s Impact On Climate Change. Bloomberg News (5/10, Childers, 2.76M) reports that Cornell University Professors Robert Howarth and Anthony Ingraffea said that the EPA has “significantly underestimates the amount and potency of methane emissions, which understates the climate impact of hydraulic fracturing.” Ingraffea argues that “the global warming potential of methane is much higher than we thought it was, and the actual emission rates were much higher than we thought they were.”

DRILLING NEAR EVERGLADES RAISES CONCERNS. The Orlando (FL) Sentinel (5/10, 850K) reports that “a Texas company has been caught using fracking-like blasting methods to drill for oil near the Everglades, raising alarms from state officials and inflaming a long-simmering controversy over energy exploration in the midst of a cherished ecosystem.” Sen. Bill Nelson has “urged federal officials to investigate.” Also, Florida has fined the firm and “demanded a temporary halt to five new exploratory wells.” Meanwhile, “the fracking-like episode drew widespread attention to an emerging oil rush at the western edge of the Everglades, rousing opposition from environmentalists across the state who worry about the impact on water quality and wildlife.”

BLM SEEKS COMMENT ON OIL, GAS LEASING PLANS IN NEVADA. The AP (5/11) reports that the BLM is "seeking public comment on their proposal to nominate 193 parcels of public land for potential oil and gas leasing in eastern Nevada." The BLM's Ely District is "analyzing the parcels totaling 406,600 acres to identify potential impacts for an environment assessment." The public has until May 27 to comment.

SOUTH JERSEY INDUSTRIES TO SUBMIT REVISED PIPELINE PROPOSAL TO NEW JERSEY PINELANDS COMMISSION. The Philadelphia Inquirer (5/10, Maykuth, 1.64M) reports that Edward J. Graham, CEO of South Jersey Industries Inc., said on Friday that the company's "\$90 million Pinelands natural gas pipeline project" may be revived despite being rejected by the New Jersey Pinelands Commission (7-7) in January. Graham said that the firm would submit a revised proposal, adding that he hoped the pipeline would be operating by 2016.

ADDITIONAL COVERAGE OF FOUR CORNERS POWER PLANT AND NAVAJO MINE DRAFT ENVIRONMENTAL IMPACT STATEMENT MEETINGS. Additional coverage of the meetings on the Four Corners Power Plant and Navajo Mine energy project was provided by the Farmington (NM) Daily Times (5/12, 46K).

Offshore Energy Development:

OIL COMPANIES SEEKING ENGINEERS FOR OFFSHORE WORK. The Houston Chronicle (5/10, Adams, 2.23M) reports on employment opportunities for engineers in the field of offshore petroleum, involving exploration and development. Mentioned are engineers "who design the operation and then supervise drilling activities," as well as "environmental engineers, mechanical engineers, electrical and industrial engineers." The oil and gas industry is said to suffer from "critical shortages of engineers."

ADDITIONAL COVERAGE OF BEAUDREAU'S LEADERSHIP OF BOEM. Additional coverage of Tommy Beaudreau 's leadership of the BOEM was provided by the Houston Chronicle (5/12, 2.23M).

ADDITIONAL COVERAGE OF BSEE DIRECTOR SALERNO'S ADDRESS TO OFFSHORE TECHNOLOGY CONFERENCE. Additional coverage of BSEE Director Salerno's remarks at the Offshore Technology Conference was provided by the Marine Link (5/11, 1K).

Tackling America's Water Challenges:

CALIFORNIA MOVES AHEAD WITH BUILDING TWIN TUNNELS. The Central Valley (CA) Business Times (5/12, 206) reports that the California Department of Water Resources is "plunging ahead with setting up a design and construction office to oversee building two massive twin water tunnels to suck fresh water from the Sacramento River before it can flow naturally into the Sacramento-San Joaquin Delta and divert it to the State Water Project and the federal Central Valley Project." According to the article, "the decision is revealed in a memo to DWR employees from department Director Mark Cowin, a copy of which was obtained by CVBT." The decision by DWR was criticized by the environmental group Restore the Delta.

BOR TO PERFORM ROAD GRADING AT BELLE FOURCHE RESERVOIR. The Rapid City (SD) Journal (5/12, 141K) reports that the BOR will be "performing road grading on gravel roads around the Belle Fourche Reservoir this summer." Jeff Nettleton, chief of facility operation and maintenance and engineering services for the BOR's Dakotas Area Office, said, "Each blading is estimated to take approximately a week and should improve the roads around the reservoir for recreation."

ARIZONA URGED TO ACT ON WATER ISSUES. In an op-ed for the Arizona Republic (5/10, Kyl, Morrison, 1.45M), former Sen. Jon Kyl and Richard Morrison, chairman of the Morrison Institute for Public Policy board of advisers, write that "the economic and social disruption caused by the extreme drought in California has prompted increasing questions about the water future of the West." According to the two, "while there are still some conservation and management methods that can extend our current supplies, in the long run, Arizona is going to need additional water sources." They recommend that "a first order of business is for the state government to fully support the state stream adjudication process, ongoing now for 40 years." Also, they suggest that "the state and local governments, private parties, environmental groups and the federal government can work more closely and constructively on watershed management, including managing our state and national forests as recommended by the Ecological Restoration Institute at Northern Arizona University."

Empowering Native American Communities:

INTERIOR EXTENDS BUYBACK OFFERS FOR MAKAH NATION LANDOWNERS. The Nation Sun News (5/11) reports that the Interior Department has made "\$1.6 million in buy-back offers to nearly 600 landowners on the Makah Nation in Washington." The offers were extended under the Land Buy-Back Program for Tribal Nations. Landowners have until May 30 to respond.

Meanwhile, KGOU-FM Norman, OK (5/12) reports on the "ongoing delays in payments." According to the article, "the same poor record keeping that prompted Eloise Cobell's initial lawsuit appears to be key in explaining" the delays.

ASSISTANT SECRETARY WASHBURN THINKS WASHINGTON REDSKINS SHOULD CHANGE NAME. The Albuquerque (NM) Journal (5/11, 282K) reports that Kevin Washburn, the Interior Department's assistant secretary of Indian affairs, has spoken out against the Washington Redskins' name. Washburn said "the name of the professional football team based in the nation's capital is an affront to American Indians." In an interview, he said, "I think they should change the name. Football shouldn't be something that hurts people's feelings. If the Redskins' name is bothering people, there is just no reason to retain it."

PROFESSOR SUPPORTS TRUST RULE CHANGE FOR ALASKA TRIBES. For the Anchorage (AK) Daily News (5/9, 251K), Alan Boraas, a professor of anthropology at Kenai Peninsula College, writes that the BIA is "prepared to remove regulatory language that has prevented Alaska tribes from putting their lands into BIA trust." He notes that "the Parnell administration has objected to the concept of Indian Country in Alaska, in part because, if enacted, it would erode state authority and create a dual legal system on the small amount of tribal (vs. corporate) lands that would become Indian Country." However, Boraas believes "Indian Country in Alaska will give extra tools for villages to deal with abusers, rein in bootleggers and run bullies out of their villages."

Top National News:

REPUBLICANS AND DEMOCRATS OFFER PREVIEW OF UPCOMING BENGHAZI HEARINGS. The formation of a House select committee to probe the September 11, 2012 Benghazi terrorist attacks was the subject of a great deal of discussion on the Sunday morning news shows. That debate generated several print and online reports on the two parties' strategies for that panel's hearings. Democrats on Sunday repeatedly asserted that the attacks were being politicized by Republicans to motivate their base, while Republicans insisted that many important questions about the attacks and the Administration's initial erroneous characterization of them remain unanswered. The New York Times (5/12, A12, Huetteman, Subscription Publication, 9.65M) reports that on Sunday, "House Democrats...made it clear that they do not expect fair proceedings from the Republican-led panel newly tasked with investigating the 2012 attack in Benghazi, Libya." The Times notes that on CNN's State Of The Union, Rep. Debbie Wasserman Schultz (D-FL), who also serves as chair of the DCCC, maintained that "the panel's findings had been 'predetermined' by Republicans."

The Washington Post (5/12, 4.22M) reported that on CNN's State Of The Union, Wasserman Schultz and Rep. Michele Bachmann (R-MN) "traded barbs about the new House select committee." The Post says Wasserman Schultz claimed Republicans "clearly" established the panel in to "drive their turnout." According to the Post, Bachmann objected, saying, "What this committee is doing is taking a very careful look at a very deliberate pace to go through depositions of people on the ground to find out the truth of what's happened." The Daily Caller (5/11, Bordelon, 408K) noted that Bachmann alleged "it's really clear that the Democrats have tried to sabotage this process from the very beginning."

The Washington Post (5/12, 4.22M) reports that on Fox News Sunday, Rep. Trey Gowdy (R-SC), who is the chairman of the select committee, distanced himself from NRCC "fundraising appeals" that mention the controversy over Benghazi. According to the Post, Gowdy "said he thought the appeals were a bad idea," but added, "It would be helpful if our colleagues on the other side of the aisle did not have selective amnesia when it comes to what's appropriate to raise money off of and what's not." Gowdy said Democrats "raised money on Sandy Hook; they raised money on Katrina; they raised money on Iraq and Afghanistan."

According to The Hill (5/11, Berman, 237K), Democrats "have slammed the National Republican Congressional Committee for sending out a fundraising appeal mentioning the Benghazi panel," and "have argued it supports their claims that the select committee is politically motivated." Politico (5/11, Tau, 73K) reported that "some Republican organizations have moved full speed ahead with fundraising pleas off the attacks, accusing the Obama administration of a cover-up."

The Hill (5/11, Berman, 237K) reports that in an interview that aired on Fox News on Sunday, Speaker Boehner said he "has 'no idea' if the Benghazi select committee he created will subpoena former Secretary of State Hillary Clinton," and also said "there is 'no timeline' for the committee to report its findings." The AP (5/12, Thomas) mentions the renewed interest in Benghazi in an article titled, "For Hillary Clinton, A Re-airing Of Past Episodes."

In an article for the Huffington Post (5/12, Stein, 11.54M) titled, "Hillary Clinton Already Answered The Benghazi Question Trey Gowdy Has For Her," Sam Stein notes that on Sunday, Gowdy said he wants to ask former Secretary Clinton "Why were we still in Benghazi [in September 2012]?" Gowdy noted that in the preceding months, "the British ambassador was almost assassinated" and "our facility was attacked twice." Gowdy is quoted as saying, "We were the last flag flying in Benghazi, and I would like to know why." According to Stein, Clinton answered that question in her January 2013 Senate testimony on Benghazi when she said: "Our team, led by security professionals, but also including intelligence professionals and others, did not recommend, based on those incidents, abandoning Benghazi."

Reuters (5/12) notes Gowdy's questions about why Ambassador Chris Stevens was in Benghazi in September of 2012 under the headline: "New Benghazi Panel Head Asks Why Americans Were In Dangerous Libyan City."

The Washington Times (5/12, Wolfgang, 455K) reports that on Fox News Sunday, Rep. Xavier Becerra (D-CA), the chairman of the House Democratic Caucus, indicated that House Democrats "will take part in the latest investigation into the Sept. 11, 2012, Benghazi attack." According to the Times, Becerra said, "We've always said we're ready to participate ... based on a fair, balanced and open process. We'll call it the 'Fox standard.'"

The Hill (5/11, Berman, 237K) reported that House Minority Leader Nancy Pelosi "left for the weekend without naming any Democrats to the panel," after having "told reporters the caucus is split on whether to participate, with some lawmakers urging a boycott on the grounds that the committee is politically motivated and unnecessary."

Mark Sappenfield, in a piece for the Christian Science Monitor (5/12, 566K) says House Democrats' "biggest incentive to join would be to prevent...Clinton from getting trampled if she's called to testify." However, according to Sappenfield, "the vast majority of Democrats feel no pressure to join the investigation."

The Wall Street Journal (5/12, Hughes, 5.51M) reported on its "Washington Wire" blog that in an appearance on Fox News Sunday Morning Futures, Boehner said, "This is a serious investigation. I don't want theater; I don't want a sideshow. I want the members of this committee to find the facts for the four families who lost their loved ones, and the facts for the American people." The Wall Street Journal (5/12, Crittenden, Subscription Publication, 5.51M) also covers the House Republicans' decision to establish the select committee under the headline, "Benghazi Panel Shows House GOP Flexing Power Of The Probe."

Politico (5/11, French, 73K) reports that Rep. Patrick Meehan, described as "a moderate Pennsylvania Republican," is "still wondering about Clinton's role" in the events leading up to the terrorist attack. Meehan is quoted as saying, "[Clinton] very deliberately moved away the assets that were military and encouraged the ambassador to make a move toward Benghazi during a time that all of the information was showing that it was a very dangerous area and it was very likely American assets, including our own embassy could be a target." Politico goes on to report that Rep. Louis Gohmert (R-TX) says, "I had a private meeting with them Libyans who were initially involved in the ouster of [Qaddafi], and they said 'You Americans keep wanting to know who killed your ambassador, but you should be wanting to know why was he killed.'"

Jay Parini, in a piece for the Daily Beast (5/11, 1.18M) titled, "GOP Hypocrisy: Outraged Over Benghazi, Silent On Iraq," says that "in our fury over Benghazi we've almost forgotten a recent war that destroyed so many families, nearly bankrupted this country (and may yet), and led to a hugely destabilized Iraq that no longer serves as a buffer to Iran." Bloomberg View's Al Hunt, in an op-ed for the International New York Times (5/12,

Subscription Publication, 9.65M), says "the real lesson of Benghazi is how dangerous the aftermath of the overthrow of a foreign dictator can be."

Mickey Kaus, in a post for the Daily Caller (5/11, 408K), warns Republicans that they could undermine their chances to retake the Senate if they focus too much on Benghazi and compares the situation to 1998 when "the GOP seemed poised to make huge gains in the mid-terms," but instead "actually lost 5 seats in the House" because "enough voters...thought Republicans had gone overboard in pursuing" the scandals surrounding the Clinton Administration at the time. Kaus says he is "suggesting the White House is intentionally provoking Republicans over Benghazi," and adds, "the technical term for this maneuver...is 'gaslighting.'"

HAGEL BACKS SHINSEKI, BUT SAYS ACCOUNTABILITY VITAL FOR VA. The AP (5/12) reports that on ABC's This Week on Sunday, Defense Secretary Hagel said that he backs "beleaguered" VA Secretary Shinseki, but that the care from the VA is "not good enough." Hagel "acknowledges that problems with the VA began well before Shinseki took over the agency, but adds that if the allegations in Phoenix are true, 'accountability is going to have to be upheld.'"

In a story that quoted more fully from Hagel's interview, Politico (5/11, McCalmont, 73K) reports in its "Politico Live" blog Hagel also said that "the backlog is an issue that should have been looked at 'years ago.'" Asked about "the reported five-month average wait time for veterans," Hagel said, "It's not good enough; obviously, it has to be better." Still, Hagel supported Shinseki, saying, "no one understands accountability more than Shinseki. But there is no margin here. If this, in fact, or any variation of this, occurred all the way along the chain, accountability is going to have to be upheld here, because we can never let this kind of outrage, if all of this is true, stand in this country."

Reuters (5/12, Dunham) reports on Hagel's comments, and also notes that Rep. Mike Rogers (R), chair of the House Intelligence Committee, said on CBS' Face The Nation that the President is "going to have to make a decision on Mr. Shinseki." Rogers added, "If Mr. Shinseki can't come here and tell Congress how exactly he's going to change that culture there, I think we need to find somebody who's willing to go in and shake up the Veteran's Affairs so that their number one, two and third priority is taking care of the men and women who serve this country."

In a much more negative story vis-à-vis the Administration, the Washington Times (5/12, Wolfgang, 455K) reports that Hagel "admitted Sunday that the Obama administration and its predecessors 'missed' the warning signs around troubling delays for care and other problems at veterans' hospitals across the country."

On CNN's State Of The Union (5/11, Crowley, 862K), former Senator Rick Santorum claimed that the situation with the VA is "a structural problem and a leadership problem." Regarding whether Shinseki should step down, he stated: "I'm not going to make any comments about appointments. I think he should have to face the music. If he's proven to not have performed admirably, I think the Administration should do what's appropriate."

DEMOCRATS STRUGGLING TO MAKE ACA AN ADVANTAGE IN MID-TERM CONTESTS. Reuters (5/12, Comwell) reports that while President Obama and Democrats in Congress are growing more confident that the ACA will be a political advantage rather than liability in the mid-terms, the piece uses the New Hampshire Senate contest as an example of the challenges of actually implementing that strategy. In that contest, challenger Scott Brown (R) is making the ACA a major issue, and polls show the law remains unpopular in the state.

Merits Of Repealing ACA Discussed. On CNN's State Of The Union (5/11, Crowley, 862K), Reps. Debbie Wasserman Schultz, the chair of the DNC, and Michele Bachmann (R) discussed a recent poll, in which 61% of respondents claimed that Congress should keep the Affordable Act, while 38% urged lawmakers to repeal the law. The lawmakers briefly debated the popularity of the Affordable Care Act and the merits of repealing the law.

On CNN's State Of The Union (5/11, Crowley, 862K), former Senator Rick Santorum weighed in on the poll, stating: "I think it's important that we focus on developing a health care system that works. This one isn't working." In contrast, Sen. Elizabeth Warren touts ACA on CBS' Face The Nation (5/11, Schieffer, 2.64M) and decried efforts by the House to repeal the law.

Last Laughs:

LATE NIGHT POLITICAL HUMOR.

Jimmy Fallon: "This is kind of scary – the White House went on lockdown yesterday for the second time in three days after someone threw something over the fence. Security was like, 'Sorry, Hillary, you're going to have to wait two-and-a-half more years to move your stuff in. You can't just toss it over the fence.'"

EVENT MEMORANDUM FOR THE SECRETARY

INTERNAL PREP FOR TASK FORCE ON CLIMATE PREPAREDNESS AND RESILIENCE MEETING

DATE: May 12, 2014
LOCATION: Office of the Secretary
TIME: 3:30PM – 4:00PM

THIRD MEETING OF THE STATE, LOCAL AND TRIBAL LEADERS TASK FORCE ON CLIMATE PREPAREDNESS AND RESILIENCE – VERSION 4

DATE: May 14, 2014
LOCATION: World Food Prize Building, 100 Locust St., Des Moines, IA
TIME: 11:00AM – 12:00PM CDT
FROM: Sarah Greenberger, Counselor to the Secretary, 202-219-2140
Joel Clement, Director, Office of Policy Analysis, 202-208-3295

Note: Edits are highlighted below in yellow.

I. PURPOSE

This meeting of the State, Local and Tribal Leaders Task Force on Climate Preparedness and Resilience will focus on resilience to climate impacts in two of four areas of work for the Task Force: (1) natural resources, agriculture and (2) human health and community development.

You are there with other Administration leaders to discuss areas of focus for the Administration in natural resources and identify the Task Force priorities for Federal action in this area.

The Task Force will also discuss more broad “near term actions” that, in collaboration with the Administration, agencies could commit to by the next Task Force meeting in July, and do not need to wait for final Task Force recommendations to the President in the fall. You will arrive during this discussion.

II. AGENDA

(Earlier in the morning)

9:30am – 9:45am Open Meeting

Welcome Remarks, review meeting goals, agenda, set expectations, review Task Force progress since February meeting

9:45am - 11:00am Near-term Action Discussion

Discussion of near-term actions to support state and local climate preparedness.

(You arrive)

11:00am – 12:15pm Workshop on Natural Resources & Agriculture Recommendations

15 Min

Task Force Subgroup presentation (Karen Diver & Collin O’Mara)

- 15 Min Remarks from Administration Officials (4 min each)
 - **You**
 - Administrator Kathryn Sullivan, NOAA
 - Assistant Secretary Jo-Ellen Darcy, Army (Civil Works)
 - Undersecretary Robert Bonnie, Department of Agriculture
- 45 min Discussion (facilitated by co-chairs Boots and Agnew)

12:15pm – 1:00pm Break for Lunch & Press Conference

You will participate in a brief media availability before your departure. Press Conference participants meet at 12:25pm.

- Mayor Cownie will open and welcome Co-Chairs of the Task Force (Boots and Agnew)
- CEQ Acting Chair Boots (will name all principals present)
- David Agnew
- You
- Dr. Holdren will speak about NCA
- Gov. Quinn will wrap it up and then open it up for questions.

(After your departure)

1:00pm – 2:15pm Workshop on Communities: Human Health & Community Development Recommendations

- 15 Min *Subgroup presentation (Governor Brown's staff)*
- 15 Min *Remarks from Administration Officials (4 min each)*
 - *Deputy Secretary Bob Perciasepe, Environmental Protection Agency*
 - *Harriet Tregoning, Director of Economic Resilience, Department of Housing and Urban Development*
 - *Stephene Moore, Region VII Director, Department of Health & Human Services*
 - *George Luber, Center for Disease Control*
- 45 min *Discussion (facilitated by co-chairs Boots and Agnew)*
- 2:15pm – 2:45pm *Briefing on National Climate Assessment*
 - *Dr. John Holdren*
- 3:00pm *Close meeting*

III. KEY MESSAGES

Talking points are attached as a separate document.

- Conservation of our natural resources is a critical climate strategy that helps absorb harmful greenhouse gas pollution and builds community resilience to the effects of climate change.
- The natural resources that we manage, if kept healthy, can protect communities' water supply in times of increased drought, shorelines in the face of larger and more frequent storms, and infrastructure during longer more intense fire seasons.
- The President has charged federal agencies to develop a priority policy agenda that can best maintain the resilience of these landscapes.
- I hope that today we can get a clear sense of your priorities for our work.

IV. BACKGROUND

Executive Order 13653 – Preparing the United States for the Impacts of Climate Change

Executive Order 13653 addresses climate change adaptation, which is one of three primary strategies of the Climate Action Plan and the primary focus of the Department's current climate change efforts. The Department of the Interior has a number of activities underway to implement the President's Executive Order 13653.

State, Local and Tribal Leaders Task Force (and TF Subgroups)

The President's November 2013 Preparedness and Resilience Executive Order 13653 establishes the State, Local and Tribal Leaders Task Force to inform Federal efforts to support climate preparedness and resilience. The Task Force is co-chaired by Mike Boots, Acting Chair of CEQ, and David Agnew, White House Director of Intergovernmental Affairs and Deputy Assistant to the President. Members include State, local, and tribal leaders from around the Nation. The Task Force will prepare recommendations to the President and the Resilience Council on ways to improve climate resilience that are due to the President no later than November 1, 2014.

The Task Force will provide recommendations to the President on removing barriers to resilient investments, modernizing Federal grant and loan programs to better support local efforts, and developing the information and tools they need to prepare, among other measures. The Des Moines meeting is the third meeting of the Task Force and the first to focus on natural resources.

The Task Force consists of the following four subgroups:

- Disaster Recovery and Resilience;
- Built Systems: Transportation, Water, Energy, and Facilities Infrastructure;
- Natural Resources and Agriculture; and
- Communities: Human Health and Community Development.

Council on Climate Resilience and Preparedness (and Administration Working Groups)

Executive Order 13653 established the Council on Climate Preparedness and Resilience to lead Federal agency climate change adaptation coordination and to coordinate involvement with State, local and Tribal governments and other partners. The Council, which consists of senior officials (Deputy Secretary or equivalent officer) from several agencies, oversees four Working Groups charged with implementing key requirements of the Executive Order. DOI is the Co-Chair of one group – the Climate and Natural Resources Working Group – and is actively involved in all four

Working Groups. An organizational chart of the Executive Order's implementation is attached to this memorandum.

Climate and Natural Resources Working Group: The Climate and Natural Resources Working Group is co-chaired by Interior (Sarah Greenberger) and NOAA (Mark Schaefer) with additional members from agencies with land and water management responsibilities. A working committee, which was created to staff the Working Group, is also co-chaired by Interior (Joel Clement). Section three of Executive Order 13653 directs the agencies to complete an inventory and assessment of proposed and completed changes to agency land- and water-related policies, programs, and regulations necessary to make the Nation's watersheds, natural resources, and ecosystems, and the communities and economies that depend on them, more resilient in the face of a changing climate. *The Working Group is charged with developing a priority agenda of ten or so actions the Federal government should take to improve natural resources resilience to climate change.*

The Working Group has completed an initial inventory of proposed and completed changes to agency land- and water-related policies, programs, and regulations and is now in the process of refining a list of priority agenda items. The final Working Group report is due August 1.

Priority areas identified by the Working Group and supporting technical experts from the Agency align with the Local Leaders Task Force priorities and include:

1. Improved Water Resource Management
2. Landscape Conservation to support ecosystems, forests, wildlife
3. Natural/Green Infrastructure
4. Delivering Community Support (training, science, information, etc)
5. Unlocking private investment
6. Coastal Resilience

Climate Data and Tools Working Group: The Climate Data and Tools Working Group is co-chaired by NASA, NOAA, and OSTP. Section 4 of Executive Order 13653 directs the Working Group to develop and provide authoritative, easily accessible, usable, and timely data, information, and decision-support tools on climate preparedness and resilience to be available on "Data.gov". Implementation will occur in three phases extending into 2015.

The Working Group consists of six subgroups representing the following thematic areas, with DOI as the lead for one of them:

- Coastal Flooding Risks to Communities (NOAA Lead);
- Ecosystem Vulnerability (DOI Lead (USGS - Olivia Ferriter));
- Climate Change and Human Health Risk (HHS Lead);
- Transportation and Supply Chain Risks (DOT Lead);
- Food Production/Supply Vulnerability (USDA Lead); and
- Energy Supply Vulnerability (DOE Lead).

Agency Adaptation Working Group: The Agency Adaptation Working Group is chaired by the Environmental Protection Agency and is responsible for coordinating information sharing and communications for the development of agency climate change adaptation plans which are due to CEQ on June 30.

Resilient Infrastructure Working Group: The Resilient Infrastructure Working Group is co-chaired by the Department of Energy, the Department of Homeland Security and the National Security Council. The general purpose of the Working Group is to develop, recommend, and coordinate interagency efforts on actions related to climate preparedness and resilience for the Nation's infrastructure, and to track implementation of interagency actions, including those described in Executive Order 13653.

Some Early Natural Resource Management Suggestions from the Local Leaders

The State, Local and Tribal Leaders Task Force, Natural Resources and Agriculture Subgroup, is developing recommendations for federal agencies. Although the final recommendations will likely evolve over the coming months, the following recommendations are currently being proposed as near term actions and could be discussed at the Des Moines meeting:

- Standard Collection, Provision of, and Access to Federal Data and Tools (inter-agency)
 - Standardizing collection, provision of, and access to Federal data and tools
 - Improving baseline data available for natural resources
 - Improving down-scaled climate models and tools to complete local vulnerability assessments
- Requiring Climate Considerations in Hazard Mitigation Planning (FEMA)
- Incorporating Climate Change into the NEPA Process (CEQ)
- Disaster Preparedness and Relief Funds for Natural Resources (FEMA)
- Incorporating incentives for Climate-Based Natural Resource and Agriculture Management into grant and other programs (inter-agency)
- Begin Piloting and Implementing the National Fish, Wildlife, and Plants Adaptation Strategy (inter-agency, DOI/NOAA lead)
- Finalize Promulgation of Federal Wetland and Stormwater Regulations (EPA)

Background on Notable Interior Efforts

Department Climate Adaptation Policy: In January and September of 2009, Secretary Salazar issued Secretarial Orders on climate change that required bureaus incorporate climate science into land management planning and decisions among other more specific directives and created the system of USGS Climate Science Centers and Landscape Conservation Cooperatives. Those orders were institutionalized in the Departmental Manual in 2012 as the Department's Adaptation Policy.

Official Policy: It is the policy of the Department to effectively and efficiently adapt to the challenges posed by climate change to its mission, programs, operations, and personnel. The Department will use the best available science to increase understanding of climate change impacts, inform decision making, and coordinate an appropriate response to impacts on land, water, wildlife, cultural and tribal resources, and other assets. The Department will integrate climate change adaptation strategies into its policies, planning, programs, and operations, including, but not limited to, park, refuge, and public land management; habitat restoration; conservation of species and ecosystems; services and support for tribes and Alaska Natives; protection and restoration of cultural, archeological and tribal resources; water management; scientific research and data collection; land acquisition; management of employees and volunteers; visitor services; construction; use authorizations; and facilities maintenance.

National Drought Resilience Partnership: On November 15, 2013, as part of the Climate Action Plan, the Obama Administration announced the National Drought Resilience Partnership (NDRP), a new partnership between seven Federal agencies that will help communities better prepare for droughts and reduce the impact of drought events on families and businesses. Given the extreme drought affecting much of the Western US, the NDRP is already working with communities, businesses and farmers and ranchers to build on-the-ground drought resilience. For example, in California, BOR and the Natural Resources Conservation Service have committed \$14M to water efficiency in drought-stricken areas, and the White House, Federal agencies and CA state agencies are coordinating in real time to stretch water supplies and mitigate the economic impacts of the drought. Lessons learned in California will inform Federal assistance for other drought-impacted communities nationwide.

Western Watersheds Enhancement Partnership: Mentioned in the Climate Action Plan, this federal, local and private partnership was brought to life by an MOU that you signed with Secretary Vilsack in Colorado in July 2013. It is intended to reduce the risks of wildfire to America's water supply in western states by working with local water users to identify and mitigate risks of wildfire to parts of our nation's water supply, irrigation and hydroelectric facilities. Flows of sediment, debris and ash into streams and rivers after wildfires can damage water quality and often require millions of dollars to repair damage to habitat, reservoirs and facilities. The partnership started with a pilot in the Upper Colorado Headwaters and Big Thompson watershed in Northern Colorado. The partnership includes the Northern Colorado Water Conservancy District and Colorado State Forest Service and builds off of past agreements between the Forest Service and municipal water suppliers, such as Denver Water's Forest to Faucets partnership. Additional pilots were initiated in:

- Salt River-CC Cragin project in Arizona;
- Boise River Reservoir in Idaho;
- Mid-Pacific Reclamation Region in California;
- Yakima Basin in Washington State; and
- Horsethief Reservoir/Flathead River in Montana

WaterSMART Initiative (West-wide Climate Risk Assessments, Basin Studies, LCCs): Reclamation's WaterSMART program is focused on improving water conservation and helping water and resource managers make wise decisions about water use. Reclamation's portion of the WaterSMART program is achieved through administration of **grants, scientific studies, technical assistance, and scientific expertise.**

The West-wide Climate Risk Assessments will assess impacts to water supplies and demands on a reconnaissance level and include a baseline risk and impact assessment. The assessments establish a foundation for more in-depth analyses and the development of adaptation options through Basin Studies, operations planning, or any other activity that can benefit from the assessments.

The Basin Studies develop adaptation options by partnering with basin stakeholders to conduct comprehensive studies to define options for meeting future water demands in river basins in the West. The desired outcomes are basin-specific plans recommending collaboratively developed solutions that will help meet water demands and foster sustainable development.

The Landscape Conservation Cooperatives, meanwhile, are focused on the development and communication of science at the landscape scale to inform resource conservation within a partnership

(federal, state, tribal, and local) framework. Along with Reclamation's Science and Technology Program, working with the USGS Climate Science Centers, the LCCs represent the primary source and communications avenue for climate change science to support climate change adaptation.

WaterSMART Grants: Reclamation administers a series of grant programs to support water efficiency and conservation efforts.

Hurricane Sandy \$100 million Competition: Of the \$340 million appropriated in the Sandy Supplemental to build storm resilience, the Department set aside \$100 million for an external competition open to state, local and tribal governments as well as NGOs and universities to pursue resilience projects that make use of natural defense systems and green infrastructure. The request for proposals closed January 31, 2014. The Department received 378 applications requesting \$568 million. The Department has developed resilience criteria based on the work of Departmental scientists and a landscape level conservation plan to focus projects in those areas where they can most impact communities and the important infrastructure. Interior will also invest in a comprehensive assessment of its internal and external Sandy resilience investments to ensure we can glean lessons on which approaches truly build community resilience and be in a position to broadly share that information. **Awards are expected in early June.**

Klamath Agreements: The Klamath Basin has been ground zero for disputes over water resources between farmers, fishermen, Indian Tribes, environmentalists, and a power company for over a decade. Since 2001 the Klamath Basin has seen water supplies shut off during an irrigation season and curtailed supplies during other years, a die-off of salmonids, the closure of a commercial fishery one year and the curtailment of that fishery in other years, and the ongoing closure of a tribal fishery. All of these diverse interests have looked at each other and decided that negotiation where everybody gets what they need instead of what they want is far better than ongoing litigation. Because of this commitment to share resources, these communities are on a path to rebuild their economies, restore their resources, and establish a strong social fabric.

This was done with the help of NOAA colleagues who have been instrumental in finding creative solutions to providing certainty for water supplies while also meeting our legal obligations to recover and restore the salmon fishery.

The Department of Agriculture has pledged funding support necessary (\$11 million over 5 years) to see the basin through the next few critical years while we work with Congress to implement the Klamath Agreements (you can thank Robert Bonnie). Senator Wyden is likely to introduce his legislation the week of May 12.

Tribal Climate Adaptation Grants: BIA has nearly \$10 million in its budget to provide grants that will support tribal communities prepare for climate change including: capacity building through partnerships and training; supporting tribal participation in climate communities like LCCs; developing climate science and tools; engage in youth outreach and support internships; fund assessments, planning efforts, monitoring and pilot projects. The first awards will be made later this summer.

Fish Wildlife and Plant Climate Adaptation Strategy: In 2009, the United States Congress called for the development of a national, government-wide strategy to safeguard fish, wildlife, plants, and the natural systems upon which they depend. The FWS, NOAA and the New York Division of Fish,

Wildlife and Marine Resources co-chaired the strategy's development. The National Fish, Wildlife, and Plants Climate Adaptation Strategy was developed with input from a broad range of federal, state, and tribal partners, with active engagement with non-government organizations, industry groups, and private landowners. The strategy was released in March 2013. The FWS and NOAA are now chairing a group to develop an implementation plan. The Local Leaders Task Force staff identified implementation of this strategy as a priority.

Pacific Islands: Building Regional Capacity for Natural Resource Disaster Recovery and Restoration in the Pacific Islands: Several agencies and organizations (including NOAA, USGS, and USFWS) are currently working together in the Pacific Islands Region to address challenges associated with managing natural resources in the context of extreme events. This issue is of increasing importance to jurisdictions that are impacted by major and minor disasters as climate changes are expected to change the frequency and intensity of events. These agencies and organizations are working together through regional partnership efforts **to develop a regional handbook to document recent policy and capacity developments and lessons learned** for natural resource and emergency managers in the U.S. Pacific Islands.

Invasive Species: DOI bureaus address a variety of invasive species through prevention, early detection and rapid response (EDRR), control and management, restoration, research, and education and public awareness. This includes working closely with states, territories and the National Invasive Species Council (NISC) (you are co-chair) to enhance coordination and partnerships to reduce the impacts of invasive species.

In early January 2014, DOI finalized the U.S. Department of the Interior's Invasive Species Action Plan to better address and elevate invasive species within the Department. The Action Plan includes the following:

- The development of a multi-year strategy with annual operations plans.
- The development of a departmental policy in support of invasive species prevention, detection, rapid response, and control.
- Coordination of a departmental information management effort on invasive species to create efficiencies and eliminate duplication.
- The development of an EDRR framework for invasive species that outlines protocols and guidance for the allocation of resources.

NOTE: On March 8, 2014 Governor Abercrombie who sits on the Task Force wrote Chair Sutley a letter regarding Hawaii's work to control invasive species. The response has been tasked to DOI and is in the clearance process.

Integrated Arctic Management (IAM)/Native Alaskans: In April 2013, an interagency working group chaired by DOI released a report that calls for an integrated management strategy for the rapidly changing Arctic. IAM is the federal government's integrated approach to stewarding natural resources in the US Arctic at the landscape scale rather than project-by-project efforts that often fail to account for a changing climate and the cumulative impacts of these projects over time. A Report to the President in April, 2013 described the fundamentals of IAM, and DOI is committed to advancing these principles as we implement the National Strategy for the Arctic Region. **One of the major principles of Integrated Arctic Management is improving the integration of Alaska Native values and viewpoints into government processes.**

Working Lands for Wildlife: Working Lands for Wildlife is a partnership between USDA's National Resource Conservation Service (NRCS) and FWS to use agency technical expertise combined with over \$30 million in financial assistance from the Wildlife Habitat Incentive Program to combat the decline of seven specific wildlife species (including Lesser Prairie Chicken and Greater sage-grouse) whose decline can be reversed and will benefit other species with similar habitat needs.

Through Working Lands for Wildlife landowners can voluntarily participate in an incentive-based efforts to:

- Restore populations of declining wildlife species.
- Provide farmers, ranchers, and forest managers with regulatory certainty that conservation investments they make today help sustain their operations over the long term.
- Strengthen and sustain rural economies by restoring and protecting the productive capacity of working lands.

This initiative is one of several USDA landscape initiatives which include separate initiatives to support sage grouse and lesser prairie chicken conservation.

Sentinal Landscapes Partnership: FWS, DOD and USDA are partnering to identify working lands near military installations where conservation can prevent development from encroaching installations impeding the training mission while conserving important wildlife habitat. Like the Working Lands for Wildlife partnership, through voluntary conservation measures paid for through Farm Bill and Defense Bill programs, ranchers and farmers gain certainty under the ESA. The first pilot was in Washington near Joint-Base McChord.

USGS Tools:

Climate Change Viewer (http://www.usgs.gov/climate_landuse/clu_rd/apps/nccv_viewer.asp) – used to access down-scaled historical and future climate for two carbon emission scenarios. The viewer provides a number of useful tools for characterizing climate change including maps, climographs (plots of monthly averages), and histograms that show the distribution or spread of the model simulations. (Publically available)

National Land Cover Database Evaluation Visualization and Analysis (<http://www.mrlc.gov/eva/>) – used to access and analyze land cover data of the US. NLCD EVA eliminates the need for desktop geographic information system software, or advanced technical expertise, by processing NLCD data for the user and providing easy access to that information. It also summarizes general land change trends as well as providing users with the option to specify and explore specific land change classes of interest (e.g., forest to urban). (Publically available)

LandCarbon Atlas (<http://landcarbon.org/>) – Used to access and analyze biological carbon sequestration data from the USGS Landcarbon project. Data available include the amounts of carbon currently sequestered, possible future amounts and the data used to develop these estimates. Products include maps, charts, and statistical analyses that summarize the results of the USGS assessment. (Completed but not yet released to the public – coming soon!)

NWF Climate Smart Adaptation Guide: On May 14, The National Wildlife Federation is releasing a new guide, *Climate-Smart Conservation*, on climate adaptation that was prepared in conjunction with USGS, NPS, FWS, and others (www.nwf.org/ClimateSmartGuide). The guide offers conservation practitioners and natural resource managers guidance on carrying out conservation in a changing climate. The 272-page guide is organized around a stepwise framework for adaptation planning and implementation, and addresses topics like:

- Assessing climate change vulnerability
- Reconsidering conservation goals in light of climate change
- Identifying, evaluating, and selecting adaptation strategies
- Tracking the effectiveness of adaptation actions
- Dealing with uncertainty

Colin O'Mara, their incoming President effective July 7, will be presenting on behalf of the states at your session Wednesday morning. He is currently the Secretary for Environment and Energy for Delaware.

V. ATTACHMENTS

- 1) Confirmed Administration and DOI Participants (+Topics Other Panelists Will Cover)
- 2) State, Local and Tribal Leaders Task Force Members
- 3) Fact Sheet – E.O. on Climate Preparedness
- 4) Background on Workshop on Natural Resources and Ag Recommendations and Subgroup
- 5) Media Advisory (attached separately)
- 6) Iowa Climate Change Fact Sheet (attached separately)

ATTACHMENT 1 – Administration and DOI Participants (plus topics we understand those on your panel - Sullivan, Darcy, Bonnie – will cover)

Administration Officials

DOI - Sally Jewell, Secretary of the Interior

NOAA - Dr. Kathy Sullivan, Administrator

(staff say she will focus on Coastal Resilience, Green Infrastructure; Carbon Sequestration Potential in Wetlands, and Drought Preparedness)

USACE - JoEllen Darcy, Assistant Secretary, Civil Works

(staff say she will focus also on Coastal Resilience and a North Atlantic Study being conducted with Sandy funding, and the National Drought Resilience Partnership)

USDA – Robert Bonnie, Undersecretary

(staff say he'll discuss the fire budget fix, drought/fire nexus, USDA Climate Hubs providing information to farmers)

EPA - Bob Perciasepe, Deputy Administrator

HHS - TBD

HUD - Harriet Tragoning, Director, Sustainable Housing and Communities

OSTP - Dr. John Holdren, Director, White House Office of Science and Technology Policy

IGA - David Agnew, Director, Intergovernmental Affairs

CEQ - Michael Boots, Acting Chair

DOI Participants

Sarah Greenberger, Counselor (Co-Chair of the Climate Natural Resource Working Group)

Joel Clement, Director, Office of Policy Analysis

ATTACHMENT 2 -- State, Local and Tribal Leaders Task Force Members

State Officials:

Governor Neil Abercrombie (HI)
Governor Jerry Brown (CA)
Governor Eddie Calvo (GU)
Governor Jay Inslee (WA)
Governor Jack Markell (DE)
Governor Martin O'Malley (MD)
Governor Pat Quinn (IL)
Governor Peter Shumlin (VT)

Local Officials:

Mayor Ralph Becker (Salt Lake City, UT)
Mayor James Brainard (Carmel, IN)
Commissioner Paula Brooks (Franklin County, OH)
Supervisor Salud Carbajal (Santa Barbara County, CA)
Mayor Frank Cownie (Des Moines, IA)
Mayor Bob Dixson (Greensburg, KS)
Mayor Eric Garcetti (Los Angeles, CA)
Mayor George Heartwell (Grand Rapids, MI)
Mayor Kristin Jacobs (Broward County, FL)
Mayor Kevin Johnson (Sacramento, CA)
Mayor Michael Nutter (Philadelphia, PA)
Mayor Annise Parker (Houston, TX)
Mayor Patsy Parker (Perdido Beach, AL)
Mayor Madeline Rogero (Knoxville, TN)
Mayor Karen Weitkunat (Fort Collins, CO)
Mayor Dawn Zimmer (Hoboken, NJ)

Tribal Officials:

Karen Diver, Chairwoman, Fond du Lac Band of Lake Superior Chippewa (MN)
Reggie Joule, Mayor, Northwest Arctic Borough (AK)

President Obama Establishes a Task Force on Climate

"We're going to need to get prepared. And that's why this plan will also protect critical sectors of our economy and prepare the United States for the impacts of climate change that we cannot avoid. States and cities across the country are already taking it upon themselves to get ready... And we'll partner with communities seeking help to prepare for droughts and floods, reduce the risk of wildfires, protect the dunes and wetlands that pull double duty as green space and as natural storm barriers." – President Barack Obama, June 25, 2013

Today, President Obama established a Task Force on Climate Preparedness and Resilience to advise the Administration on how the Federal Government can respond to the needs of communities nationwide that are dealing with the impacts of climate change. The Task Force members include state, local and tribal leaders from across the country who will use their first-hand experiences in building climate preparedness and resilience in their communities to inform their recommendations to the Administration.

The President also signed an Executive Order that directs Federal agencies to take a series of steps to make it easier for American communities to strengthen their resilience to extreme weather and prepare for other impacts of climate change.

President Obama has said that we have a moral obligation to our children and future generations to leave them a planet that is not polluted or damaged. That is why in June, the President launched a Climate Action Plan to cut carbon pollution, prepare communities for the impacts of climate change, and lead international efforts to address this global challenge. The Climate Action Plan recognizes that even as we act to curb the carbon pollution that is driving climate change, we must also improve our ability to prepare for the climate impacts we are already seeing across the country. Across America, states, cities, and communities are taking steps to protect themselves from extreme weather and other climate impacts by updating building codes, adjusting the way they manage natural resources, investing in more resilient infrastructure, and planning for rapid recovery from damages that nonetheless occur.

The Federal Government has an important role to play in supporting community-based preparedness and resilience efforts by establishing policies and prioritizing investments that promote preparedness, protecting critical infrastructure and public resources, supporting science and research needed to prepare for climate impacts, and ensuring that Federal operations and facilities continue to protect and serve citizens in a changing climate.

State, Local and Tribal Leaders Task Force on Climate Preparedness and Resilience

State, local and tribal leaders across the country are already contending with more frequent or severe heat waves, droughts, wildfires, storms and floods, and other impacts of climate change. The Task Force will provide recommendations to the President on removing barriers to resilient investments, modernizing Federal grant and loan programs to better support local efforts, and developing the information and tools they need to prepare.

Task Force members comprise governors, mayors, county officials and tribal leaders, representing a diverse range of communities. The members of the Task Force include:

State Officials:

Governor Neil Abercrombie (HI)
Governor Jerry Brown (CA)
Governor Eddie Calvo (GU)
Governor Jay Inslee (WA)
Governor Jack Markell (DE)
Governor Martin O'Malley (MD)
Governor Pat Quinn (IL)
Governor Peter Shumlin (VT)

Local Officials:

Mayor Ralph Becker (Salt Lake City, UT)
Mayor James Brainard (Carmel, IN)
Commissioner Paula Brooks (Franklin County, OH)
Supervisor Salud Carbajal (Santa Barbara County, CA)
Mayor Frank Cownie (Des Moines, IA)
Mayor Bob Dixson (Greensburg, KS)
Mayor Eric Garcetti (Los Angeles, CA)
Mayor George Heartwell (Grand Rapids, MI)
Mayor Kristin Jacobs (Broward County, FL)
Mayor Kevin Johnson (Sacramento, CA)
Mayor Michael Nutter (Philadelphia, PA)
Mayor Annise Parker (Houston, TX)
Mayor Patsy Parker (Perdido Beach, AL)
Mayor Madeline Rogero (Knoxville, TN)
Mayor Karen Weitkunat (Fort Collins, CO)
Mayor Dawn Zimmer (Hoboken, NJ)

Tribal Officials:

Karen Diver, Chairwoman, Fond du Lac Band of Lake Superior Chippewa (MN)
Reggie Joule, Mayor, Northwest Arctic Borough (AK)

An Executive Order to Protect Our Communities

The Obama Administration has taken significant steps to strengthen the climate resilience of America's communities and economy. More than 30 Federal agencies developed their first-ever Climate Change Adaptation Plans, outlining strategies to protect their operations, programs, and investments to better serve communities and safeguard our public resources in the face of climate change. In the wake of Hurricane Sandy, the Administration has provided resources to rebuild the affected area to be more resilient than before, including support for more climate-resilient roads and infrastructure, and projects that protect drinking water and buffer communities from flooding. In addition, Federal agencies have partnered with states, cities, tribes, and the private sector to develop strategies to address the impacts of climate change on our freshwater resources, oceans and coasts, and wildlife. Agencies have also built new, data-driven tools to help decision makers and resource managers map and plan for future sea level rise. From Florida to Minnesota, and from Alaska to New

York, Federal agencies have partnered with communities to provide funding and technical assistance to address local climate impacts such as sea level rise, flooding, and water scarcity.

To build on this progress, the Executive Order (E.O.) "Preparing the United States for the Impacts of Climate Change," signed today directs Federal agencies to:

- **Modernize Federal programs to support climate-resilient investments:** Agencies will examine their policies and programs and find ways to make it easier for cities and towns to build smarter and stronger. Agencies will identify and remove any barriers to resilience-focused actions and investments— for example, policies that encourage communities to rebuild to past standards after disasters instead of to stronger standards – including through agency grants, technical assistance, and other programs in sectors from transportation and water management to conservation and disaster relief.
- **Manage lands and waters for climate preparedness and resilience:** America's natural resources are critical to our Nation's economy, health and quality of life. The E.O. directs agencies to identify changes that must be made to land- and water-related policies, programs, and regulations to strengthen the climate resilience of our watersheds, natural resources, and ecosystems, and the communities and economies that depend on them. Federal agencies will also evaluate how to better promote natural storm barriers such as dunes and wetlands, as well as how to protect the carbon sequestration benefits of forests and lands to help reduce the carbon pollution that causes climate change.
- **Provide information, data and tools for climate change preparedness and resilience:** Scientific data and insights are essential to help communities and businesses better understand and manage the risks associated with extreme weather and other impacts of climate change. The E.O. instructs Federal agencies to work together and with information users to develop new climate preparedness tools and information that state, local, and private-sector leaders need to make smart decisions. In keeping with the President's Open Data initiative, agencies will also make extensive Federal climate data accessible to the public through an easy-to-use online portal.
- **Plan for climate change related risk:** Recognizing the threat that climate change poses to Federal facilities, operations and programs, the E.O. builds on the first-ever set of Federal agency adaptation plans released earlier this year and directs Federal agencies to develop and implement strategies to evaluate and address their most significant climate change related risks.

To implement these actions, the E.O. establishes an interagency Council on Climate Preparedness and Resilience, chaired by the White House and composed of more than 25 agencies. To assist in achieving the goals of the E.O., these agencies are directed to consider the recommendations of the State, Local, and Tribal Leaders Task Force on Climate Preparedness and Resilience.

Overview

This discussion will provide an opportunity for Natural Resources & Agriculture Subgroup to outline and receive input on its current areas of focus and for all participants to engage directly on key questions related to improving the resilience and longevity of our Nation's natural resources and agricultural lands in the face of extreme weather, sea-level rise, extreme temperatures, drought and other impacts of climate change.

The Natural Resources and Agriculture Subgroup has identified five broad thematic areas where federal actions and investments can better support State, local, and Tribal efforts to build resilience within natural resource and agricultural systems. These areas include: Landscape Scale Conservation; Food System Security and Sustainability; Protecting Water Quality and Supply; Oceans and Coasts; and Green Infrastructure. Four additional themes spanning all of the Task Force subgroups have also been central components of related discussions and include: Data and Tools; Fully Integrating Tribal, Alaska Native, and Island Communities into Decision-Making Processes, Partnerships and Collaborative Initiatives Involving Shared Interests; Public Education; and International Collaboration and Partnerships. Recommendations are being developed in each of these areas.

Following the subgroup's presentation, Administration officials will provide remarks on their Department or Agency efforts to support climate change preparedness and resilience. Finally, there will be a discussion for all participants to allow for better understanding of the themes, recommendations and key questions being considered to improve preparedness and resilience in these areas.

Administration Participants

- David Agnew, Director, White House Office of Intergovernmental Affairs
- Mike Boots, Acting Chair, White House Council on Environmental Quality
- Secretary Sally Jewell, Department of Interior
- Administrator Kathryn Sullivan, National Oceanic and Atmospheric Administration
- Assistant Secretary Jo-Ellen Darcy, Army (Civil Works)
- Under Secretary Robert Bonnie, Department of Agriculture

Discussion Questions

- What federal programs do you view as most critical for supporting how best to address the impacts of climate change on natural resources?
- Which existing programs are most critical for addressing the needs of the agricultural community, and how should those programs be modified to address a changing climate?
- What guidance, tools, or programs other assistance would best support efforts to enhance climate preparedness and resilience from the perspective of natural resources and agriculture?

Subgroup Themes

NATURAL RESOURCES & AGRICULTURE

The purpose of the Natural Resources and Agriculture Subgroup is to address the required outcomes by considering water resources, agriculture, forests, ecosystems, biodiversity, and ecosystem services, as well as the impacts to human communities of changes in these systems. Participants should cover all aspects of natural resources and agriculture, especially the interactions and connectivity between these systems and among these systems and human communities and the built environment. Participants in this Subgroup should also consider long-term strategies to protect and restore natural resources and

systems and the ecosystem services they provide and to enhance overall resilience in the face of a changing climate.

Landscape Scale Conservation

The conversion or development of existing natural and agricultural lands vastly increases GHG emissions, weakens buffers against natural disasters, especially in coastal zones and floodplains, and is fragmenting continuous landscapes that wildlife call home. Such land-use changes often harm local and regional cultures and economies by impairing the ability of ecosystems to recover from climate-related impacts, while reducing their ability to provide the ecosystem services both natural and human systems rely on for necessities like clean air and water. Conservation of these lands is a cost-effective investment for both climate adaptation and mitigation.

These impacts will require updated and collaborative conservation plans and actions at all levels. Natural and working lands should be preserved and restored to be resilient to the impacts of climate change, so they can continue to provide the valuable goods and services neighboring communities rely on for robust economies and healthy citizens. Existing Federal land conservation programs should assist States, communities and Tribal nations with planning and preparing for the impacts of climate change.

Food System Security/Sustainability

The nation's food system is just as important as its transportation or energy infrastructure. Climate-related food shortages can result in price spikes, impact quality, and decrease supply due to impacts on production, transportation, and storage, especially to remote communities. Ensuring food security – access by all people, at all times to enough safe and nutritious food for an active, healthy life – is critical to building prosperous and sustainable communities. Many of the most vulnerable communities are not currently able to produce enough food locally to feed their communities, but local and regional food production can build more resilient communities less dependent on imported food with a co-benefit of improved local economies and public health.

Conserving existing agricultural lands while protecting them from the increased pressures of invasive plants, pests, and disease; extreme heat, precipitation, and droughts; as well as flooding, will be necessary in order to feed an expanding global population, while promoting local access to fresh, healthy food. Crop diversification will ensure that the food system is more resilient to climate change impacts by interrupting pest and weed lifecycles, reducing the amount of herbicides and pesticides entering the environment, and by encouraging diverse soil biota.

The Federal government can assist local communities in building food system security by helping farmers and other stakeholders understand climate impacts and adaptation strategies and by providing resources and funding to support local and healthy food production in both rural and urban areas. This is particularly true for Tribal, Alaska Native, island and other place-based communities, whose food security is inextricably linked to resilient and sustainable ecosystems that produce the fish, wildlife and plants they rely on for both subsistence and cultural preservation.

Protecting Water Quality and Supply

Longer periods of drought, more evaporation due to higher temperatures, and variable precipitation patterns may impact a consistent supply of source water for drinking and irrigation purposes. Prolonged drought impacts have increased the use of drinking water for non-potable uses such as irrigation. Water recycling and reuse can be expanded in many sectors, including agriculture, residential, and commercial landscaping, as well as industry, as part of a comprehensive water conservation strategy.

Groundwater recharge and banking has the potential to supply a much needed reservoir for use when surface water is not available, especially in areas that, otherwise, do not have the ability to store excess

water. Increases in extreme precipitation events also create a serious concern for water quality as much of the nation's existing infrastructure is not designed to accommodate short duration, high intensity rain events. Design standards for stormwater and water infrastructure should take into account projected climatic changes, including sea-level rise and changes in precipitation patterns.

Oceans and Coasts

Sea-level rise, higher storm surges, and coastal erosion will cause many harmful economic, ecological, physical and social impacts that could threaten coastal ecosystems, water supplies, and both public and private coastal infrastructure. Consideration of projected sea-level rise and coastal flood impacts during project siting and design can lessen the damage to these critical systems. Additionally, increasing water temperatures along coasts and within estuarine systems, coupled with changes in salinity, are growing concerns among fisheries and resource managers.

The climate-related phenomena of ocean acidification and hypoxia also threaten ocean health and the communities that depend on them. The Federal government should work with State, Tribal, and local governments to synthesize information about impacts of climate change and ocean acidification on coastal and marine resources, and coordinate the development of a set of practical steps that can be taken now to plan for and adaptively manage fishery and marine resources as these changes occur.

Green Infrastructure

Natural defenses, also called natural or green infrastructure can provide risk reduction to life and property while meeting multiple needs of communities, public agencies, and private industry better than traditional "gray" infrastructure. Combining natural and gray infrastructure solutions for risk reduction can improve the bottom line of social, economic, and environmental benefits. Negative impacts to natural infrastructure should be avoided and green infrastructure investments should be evaluated and supported where they offer environmental benefits and cost-effective solutions.

Data and Tools

State, Tribal, and local communities must understand and assess their risk of exposure to varied hazards and potential impacts to local resources such as infrastructure, property, natural resources, and human populations. Local officials must have access to spatially explicit, accurate data, useful models and scenarios, and transparent depictions of uncertainties to analyze vulnerability and choose from a suite of risk reduction strategies for their specific location and threats.

This is an opportunity for federal agencies to provide the relevant data and tools, presented in an appropriate format and scale, to assist state and local agencies in those endeavors. Climate change adaptation based on accurate data can limit the government's fiscal exposure to risk by making it possible to implement proactive policies that prevent future damage to infrastructure. Applicable agencies should develop common data standards to ensure compatibility of data being collected on agriculture and natural resources and habitats by Federal agencies.

There have been numerous isolated studies and vulnerability assessments that identify the regional vulnerabilities of our national and regional forests and watersheds. However, there is no effort to review all of these studies to determine overlaps and gaps between the metrics, indicators, scale and affected habitats and species. There is an opportunity to review the existing and future studies to pull together these isolated studies to identify convergences and gaps in findings.

Fully Integrate Tribal, Alaska Native, and Island Communities into Decision-Making Processes, Partnerships and Collaborative Initiatives Involving Shared Interests

Tribal, Alaska Native and Island communities are experiencing the effects of a changing climate like other communities, as well as in ways unique to their specific circumstances, rights, interests and lifestyles. Extreme weather events, changing terrestrial landscapes and aquatic habitats, and increasing

threats to clean water and air all affect these communities through costly recovery and restoration efforts, especially Tribal governments that do not have access to a significant tax base, by burdening a relatively small infrastructure and personnel base, and by diminishing or degrading ecosystems that produce fish, wildlife and plants upon which they rely to meet subsistence, cultural, spiritual, medicinal and economic needs.

The natural resource and agricultural interests of these communities can only be protected by fully supporting self-governance and integrating them into all decision-making processes, partnerships and collaborative initiatives that involve jurisdictional overlap or shared interests with other governments or communities. This would include supporting and accepting the unique knowledge that these communities have, incorporating traditional ecological knowledge (TEK) into plans and policy, and recognizing TEK's role in understanding the changing climate and its effects.

Public Education

An educated populace is essential to obtain the public support necessary for effective actions to occur and be sustained. When discussing the challenges and opportunities associated with climate preparedness it is important to understand there are several ways to achieve the same goals. Challenges posed by climate change can be addressed through a well thought-out, cooperative, and conscientious plan or design strategy. Concerted education efforts for all ages can help to bridge the gap between what is happening in the climate and how it impacts the daily lives of all Americans.

International Collaboration and Partnerships

The experiences of communities and countries already experiencing both the acute and long-term impacts of climate change offer good lessons and examples for how to build secure and sustainable systems of food supply, distribution, and storage, as well as natural resource and agriculture management, while combatting ocean acidification and other important issues of concern, as the impacts of climate change are increasingly felt throughout the world.

Washington Post: Western states worry decision on bird's fate could cost billions in development

By Reid Wilson, Published: SUNDAY, MAY 11, 5:09 PM ET

HANDOUT PHOTO: A pair of sage grouse at Tobar Flats in Clover Valley on March 24, 2014. (Photo by Joe Williams)

MINERAL COUNTY, Nev. – In the frozen chill of a high-desert morning, Tony Wasley, the director of the Nevada Department of Wildlife, peers through a range finder down a dirt path and points out a group of birds strutting and preening among a low scrub brush. It's mating season for the sage grouse, and dozens of males are descending upon breeding grounds, called leks, to show off their plumage to the hens.

The 40 or so grouse at this lek near the Nevada-California border look ridiculous. They waddle around, occasionally heaving their bodies into flight, sometimes chasing off younger males and always trying to one-up each other. They are the avian equivalent of a club-goer showing off his shiny new coat.

They are also at the center of a years-long battle that pits environmentalists who want the sage grouse protected under the Endangered Species Act against ranchers, gold miners, energy producers and Western state governments that stand to lose billions of dollars in tax revenue and economic activity if tens of millions of acres are blocked off from development, exploration or use.

The tension between the federal government and Westerners who want to use government-owned land garnered new attention last month, when the Bureau of Land Management moved to round up cattle owned by Nevada rancher Cliven Bundy over more than \$1 million in unpaid grazing fees. Some state officials fear a decision to list the sage grouse, which would severely limit everything from grazing to energy development on a huge swath of land, could create a slew of new Bundys all over the rural West.

"Western states never welcome outsiders coming in and telling them how to do something," said Colorado Gov. John Hickenlooper (D), who co-chairs a bipartisan task force working to conserve sage-grouse habitats and prevent its inclusion on a list of threatened animals.

The fight over the sage grouse is similar in many respects to the debate over the Northern spotted owl, which in 1990 was listed as threatened. That decision shut down timber operations across more than 24 million acres in Northern California, Oregon, Washington and British Columbia, contributing to the industry's precipitous decline.

The difference is that the sage grouse covers about 165 million acres, almost seven times the range of the spotted owl. The economic impact of virtually shutting down development in sage-grouse habitats could be orders of magnitude greater than what happened in the Pacific Northwest.

Environmentalists want the sage grouse protected under the Endangered Species Act. But rural ranchers, gold miners and energy producers argue that doing so would unnecessarily lock tens of millions of acres off from development, exploration or use.

Much of the sage-brush range already is being drilled for oil and natural gas, while thousands of new wells wait for permits. Renewable energy sources, such as solar and wind farms, dot the sage-brush range. Even a gold mine in rural eastern Nevada would be affected.

"It's going to affect agriculture, oil and gas, wind, all kinds of different industries," said Kathleen Sgamma, vice

president of government and public affairs at the Denver-based Western Energy Alliance. "We're talking about such a wide-ranging impact."

The sage grouse has a long history in the American imagination. They are represented in Native American traditional dance and artwork. Lewis and Clark brought back drawings of a bird they called the spiny-tailed pheasant. Conservationist Rachel Carson warned in her seminal work, "Silent Spring," that sage-brush habitat was being converted to grassland for livestock.

Sage grouse populations have "been declining significantly in numbers, and it's very susceptible to development," Interior Secretary Sally Jewell said in a December interview with The Washington Post. "When you look at the Western landscapes and you look at what's happening, there isn't a state where there's this habitat that's not in some form of trouble."

The federal Fish and Wildlife Service, which ultimately is responsible for deciding whether to include an animal on the endangered-species list, has been considering the several subspecies of sage grouse for about 15 years. In 2005, the agency decided it would not list the grouse as threatened. Environmental groups filed a lawsuit, and a federal judge overturned the finding two years later. In 2010, the agency said the bird warranted protection.

Under an agreement between Fish and Wildlife and the environmental groups, the agency has until the end of September 2015 to propose rules governing the bird's habitat or to decide to change its mind.

Environmentalists say protecting the sage grouse and its habitat is crucial to saving many more species, such as the pronghorn and the pygmy rabbit, that call the high desert home.

"The sage grouse is an umbrella species, so it's sort of the canary in the coal mine," said Randi Spivak, the public-lands program director at the Center for Biological Diversity, one of the groups that initially sued the Interior Department to force it to recognize the sage grouse as threatened.

It's not just industry that wants to keep the sage grouse off the endangered-species list. States are working desperately to convince the federal government to decline to list the bird. The 11 affected states set up a bipartisan task force in 2011, co-chaired by Hickenlooper and Wyoming Gov. Matt Mead (R), aimed at working with Fish and Wildlife, the Bureau of Land Management and other federal agencies to coordinate conservation strategies and resource-management plans.

"The focus of all this is, how do we demonstrate that we're going to do a better job of creating a proactive strategy?" Hickenlooper said. "We can probably do a better job with our local programs and partnerships than Fish and Wildlife can, trying to regulate from afar."

The stakes involved in Fish and Wildlife's decision are huge. The bird's historic range covers 160 million acres across the Mountain West region, including huge swaths of Montana, Idaho, Wyoming, Oregon and Nevada, along with smaller parts of Washington, California, Utah, Colorado, South Dakota and North Dakota.

"The Fish and Wildlife Service . . . must follow the best available science, and it must make sure that whatever's being done is proven to be effective. And so we're trying to keep all governors at the table," Jewell said. "If one state doesn't play, it could impact all of them."

A listing decision could harm state conservation efforts, some officials said. Putting the sage grouse on threatened status "will be an incredible disincentive for states to develop voluntary conservation strategies," said Shawn Reese, Mead's policy director in Wyoming.

Estimates of the total economic impact depend on which conservation plans the government chooses. Plans calling for the strictest conservation measures could cost up to 31,000 jobs, up to \$5.6 billion in annual economic activity and more than \$262 million in lost state and local revenue every year, according to a **widely cited study** conducted by lawyer Lowell Baier that is accepted by interests on both sides of the debate.

Several members of Congress have urged the Interior Department to hold off on making a final determination. Last July, Sens. Michael F. Bennet (D-Colo.) and Mark Udall (D-Colo.) invited Jewell and Agriculture Secretary Tom Vilsack to their state to see the progress Colorado had made in protecting the Gunnison sage grouse. Senate Majority Leader Harry M. Reid (D-Nev.) and Sen. Dean Heller (R-Nev.) have released a discussion draft of a bill that would address sage-grouse conservation. In February, 10 governors met with Jewell and Fish and Wildlife Service Director Daniel M. Ashe.

State land and wildlife managers almost uniformly believe the Fish and Wildlife Service will rule against them and list the sage grouse as threatened.

"They're leaning toward listing it as threatened," said John Harja, head of Utah's Public Lands Policy Coordination Office and a member of the multi-state Sage Grouse Task Force. "We have great concerns."

If the greater sage grouse is listed as threatened, the 11 states could be on the hook for as much as \$1 billion in conservation costs. Adding to that burden, most states fund land programs through user fees, rather than out of general funds; declaring a species threatened makes it harder to generate those fees.

"If the hunters can't hunt, if the miners can't mine, if you don't have that capital, then you lose," said Leo Drozdoff, director of the Nevada Department of Conservation and Natural Resources. A billion-dollar tab to save greater sage-grouse habitat, he added, "is almost insurmountable."

NY Times: In Washington, Walk on the Grass, but Step Gently

WASHINGTON — It has played host to civil rights marches, presidential inaugurations, fireworks displays and decades of picnics. But in recent years the National Mall, envisioned more than a century ago as a lush carpet of green connecting the nation's most treasured monuments, has looked more like a West Texas dust bowl.

Now National Park Service officials are trying to teach the nearly 30 million people who gather here each year a difficult lesson: Tread softly or keep off the grass.

With the installation of exquisite, expensive new turf on a little less than half the mall, the Park Service has established strict rules that include limits on festivals and concerts, and even restrictions on when pickup softball and Frisbee games may be played. The requirements have created an identity crisis for the mall and set off a deeper debate.

Should the National Mall remain a utilitarian gathering place, rough and resilient and

welcoming to all? Or should it be a more pristine landscape, a monument to the nation's commitment to parks and preservation?

"It should be used, and it should be heavily used," said Bob Vogel, the mall's superintendent. "It's a place where democracy is in action. But change is difficult on everyone, including us."

The new lawn, on the portion of the mall closest to the Capitol, is part of a continuing \$40 million restoration project that will eventually transform the entire length of the mall from its longtime state of weedy disrepair. The Park Service is enforcing the rules for the new portion of grass and, with exceptions, to the part of the mall that is not yet refurbished.

Festival organizers must pay for turf-friendly panels to protect the grass, event tents are subject to time limits, and stages and media towers have to meet strict weight-distribution restrictions.

A flag system similar to one used in New York's Central Park — a red flag indicates that a field is closed for maintenance or weather — determines whether pickup softball and Frisbee games may be played. Cleats are discouraged.

Members of Congress in both parties have sent letters to Jonathan B. Jarvis, the National Park Service director, expressing concerns and raising the potential for a turf war.

"While it is important to preserve the grounds of this national treasure, we must ensure that its spirit is not diminished," Representative Tom Latham, Republican of Iowa, wrote to Mr. Jarvis in April.

The Smithsonian Folklife Festival, for one, says the restrictions might jeopardize its celebration, which has been held on the mall since 1967. "We feel very strongly that after 47 years, the N.P.S. should consider us a cultural resource, deserving the same protection as the

grass and the trees,” said Michael Atwood Mason, the director of the Center for Folklife and Cultural Heritage, which produces the festival.

The National Book Festival, on the mall for a decade, has picked up its stalls and is moving to the Walter E. Washington Convention Center because event organizers could not afford the staging costs caused by the regulations.

But for many of the softball and Frisbee players who dominate the mall on spring and summer weeknights, the new rules are a small price to pay for grass fields that are soft on the knees.

“The new turf is a dream; it’s wonderful to lay out on,” said Patrick Wolfe, 29, referring to diving horizontally for a Frisbee, with little regard for the landing. “You just slide right across — it’s like a carpet.”

The Mall’s trustees, who like to say the expanse has been “loved to death,” are hoping the public will adjust. “The turf was designed for heavy use, but we have to treat it differently,” said Caroline Cunningham, president of the Trust for the National Mall.

The Park Service-administered National Mall and Memorial Parks encompass more than 1,000 acres between the Lincoln Memorial and the United States Capitol, along with West Potomac Park and Constitution Gardens. The mall itself is the mile-long stretch running from Third Street at the foot of the Capitol to 14th Street in front of the Washington Monument. The restoration plan calls for the eight panels of grass that make up this mile — each panel is a bit larger than a city block — to be replaced and a new irrigation system installed.

In the initial phase, three panels of grass — a combination of turf, bluegrass and fescue atop a

custom blend of sand and soil — have been installed between Third and Seventh Streets, on the east side of the mall near the Capitol. The five panels in the downtrodden, more heavily trafficked west end of the mall, between Seventh and 14th Streets, will be installed in two phases starting in August. The renovation is to take at least two years.

Before the restoration, the Park Service was lenient about how events were conducted on the mall. “You have a hard time saying, ‘Get off my lawn,’ when it looks like dust,” said Michael Stachowicz, the mall’s turf management specialist.

This is not the first time that the mall’s identity as the nation’s premier gathering place has been tested. In the early 1980s, James G. Watt, then the Interior secretary, banned an Independence Day concert by the Beach Boys, arguing that they attracted the “wrong crowd.” After an uproar and an endorsement of the band by Vice President George Bush, Mr. Watt relented and let the Beach Boys sing to 200,000 people in 1984.

But the new lawn rules will require a rethinking of how the mall is used.

Among the events most affected is the Folklife Festival, which stages its extravaganza on the mall for two weeks. This year’s festival in late June and early July will be held on its usual site, the dusty, western expanse of the mall. But to allow for extensive renovations next year, the 2015 festival has been reduced to a smaller area near the National Museum of the American Indian. After that, the festival’s plans and location are up in the air.

“We are certainly exploring a variety of other options working with the National Park Service,” Mr. Mason said.

The mall’s trustees are exploring ways to help the organizers of all events reduce some of the new costs. The trustees talked to the Washington Nationals of Major League Baseball about

how to make the protective panels more affordable. (The Nationals use the panels to shield their stadium's grass during concerts and other events.)

Amanda Hall, a softball player who frequents the west part of the mall, said she welcomed the new grass. "It's pretty awful out there," she said, adding, "There's one particular hole that they had to put cones around so that people running from second to third base didn't fall into the hole."

Ms. Hall said she had not fallen in, yet.

--

NY Times: In Washington, Walk on the Grass, but Step Gently

WASHINGTON — It has played host to civil rights marches, presidential inaugurations, fireworks displays and decades of picnics. But in recent years the National Mall, envisioned more than a century ago as a lush carpet of green connecting the nation's most treasured monuments, has looked more like a West Texas dust bowl.

Now National Park Service officials are trying to teach the nearly 30 million people who gather here each year a difficult lesson: Tread softly or keep off the grass.

With the installation of exquisite, expensive new turf on a little less than half the mall, the Park Service has established strict rules that include limits on festivals and concerts, and even restrictions on when pickup softball and Frisbee games may be played. The requirements have created an identity crisis for the mall and set off a deeper debate.

Should the National Mall remain a utilitarian gathering place, rough and resilient and welcoming to all? Or should it be a more pristine landscape, a monument to the nation's commitment to parks and preservation?

"It should be used, and it should be heavily used," said Bob Vogel, the mall's superintendent. "It's a place where democracy is in action. But change is difficult on everyone, including us."

The new lawn, on the portion of the mall closest to the Capitol, is part of a continuing \$40 million restoration project that will eventually transform the entire length of the mall from its longtime state of weedy disrepair. The Park Service is enforcing the rules for the new portion of grass and, with exceptions, to the part of the mall that is not yet refurbished.

Festival organizers must pay for turf-friendly panels to protect the grass, event tents are subject to time limits, and stages and media towers have to meet strict weight-distribution restrictions.

A flag system similar to one used in New York's Central Park — a red flag indicates that a field is closed for maintenance or weather — determines whether pickup softball and Frisbee games may be played. Cleats are discouraged.

Members of Congress in both parties have sent letters to Jonathan B. Jarvis, the National Park Service director, expressing concerns and raising the potential for a turf war.

“While it is important to preserve the grounds of this national treasure, we must ensure that its spirit is not diminished,” Representative Tom Latham, Republican of Iowa, wrote to Mr. Jarvis in April.

The Smithsonian Folklife Festival, for one, says the restrictions might jeopardize its celebration, which has been held on the mall since 1967. “We feel very strongly that after 47 years, the N.P.S. should consider us a cultural resource, deserving the same protection as the grass and the trees,” said Michael Atwood Mason, the director of the Center for Folklife and Cultural Heritage, which produces the

festival.

The National Book Festival, on the mall for a decade, has picked up its stalls and is moving to the Walter E. Washington Convention Center because event organizers could not afford the staging costs caused by the regulations.

But for many of the softball and Frisbee players who dominate the mall on spring and summer weeknights, the new rules are a small price to pay for grass fields that are soft on the knees.

“The new turf is a dream; it’s wonderful to lay out on,” said Patrick Wolfe, 29, referring to diving horizontally for a Frisbee, with little regard for the landing. “You just slide right across — it’s like a carpet.”

The Mall's trustees, who like to say the expanse has been “loved to death,” are hoping the public will adjust. “The turf was designed for heavy use, but we have to treat it differently,” said Caroline Cunningham, president of the Trust for the National Mall.

The Park Service-administered National Mall and Memorial Parks encompass more than 1,000 acres between the Lincoln Memorial and the United States Capitol, along with West Potomac Park and Constitution Gardens. The mall itself is the mile-long stretch running from Third Street at the foot of the Capitol to 14th Street in front of the Washington Monument. The restoration plan calls for the eight panels of grass that make up this mile — each panel is a bit larger than a city block — to be replaced and a new irrigation system installed.

In the initial phase, three panels of grass — a combination of turf, bluegrass and

fescue atop a custom blend of sand and soil — have been installed between Third and Seventh Streets, on the east side of the mall near the Capitol. The five panels in the downtrodden, more heavily trafficked west end of the mall, between Seventh and 14th Streets, will be installed in two phases starting in August. The renovation is to take at least two years.

Before the restoration, the Park Service was lenient about how events were conducted on the mall. “You have a hard time saying, ‘Get off my lawn,’ when it looks like dust,” said Michael Stachowicz, the mall’s turf management specialist.

This is not the first time that the mall’s identity as the nation’s premier gathering place has been tested. In the early 1980s, James G. Watt, then the Interior secretary, banned an Independence Day concert by the Beach Boys, arguing that they attracted the “wrong crowd.” After an uproar and an endorsement of the band by Vice President George Bush, Mr. Watt relented and let the Beach Boys sing to 200,000 people in 1984.

But the new lawn rules will require a rethinking of how the mall is used.

Among the events most affected is the Folklife Festival, which stages its extravaganza on the mall for two weeks. This year’s festival in late June and early July will be held on its usual site, the dusty, western expanse of the mall. But to allow for extensive renovations next year, the 2015 festival has been reduced to a smaller area near the National Museum of the American Indian. After that, the festival’s plans and location are up in the air.

“We are certainly exploring a variety of other options working with the National

Park Service,” Mr. Mason said.

The mall’s trustees are exploring ways to help the organizers of all events reduce some of the new costs. The trustees talked to the Washington Nationals of Major League Baseball about how to make the protective panels more affordable. (The Nationals use the panels to shield their stadium’s grass during concerts and other events.)

Amanda Hall, a softball player who frequents the west part of the mall, said she welcomed the new grass. “It’s pretty awful out there,” she said, adding, “There’s one particular hole that they had to put cones around so that people running from second to third base didn’t fall into the hole.”

Ms. Hall said she had not fallen in, yet.

DOI in the News:

CLIMATE CHANGE TASK FORCE FINISHES IOWA MEETING. The AP (5/15) reports that State, Local and Tribal Leaders Task Force on Climate Preparedness and Resilience wrapped up a two-day meeting in Des Moines Wednesday as it works toward creating recommendations on ways the federal government can assist communities prepare for natural disasters. The State, Local and Tribal Leaders Task Force on Climate Preparedness and Resilience is expected to deliver final recommendations to President Obama by November. Several Obama advisers, including Interior Secretary Sally Jewell, were "among the officials to discuss the group's progress at a news conference held as the task force concluded its Iowa meeting." Jewell said "it's important to find ways to 'walk softer on the planet.'"

WHO-AM Des Moines, IA (5/15) reports that Jewell said, "Sustainability and addressing climate change is a team sport, so that's what this is all about. It's about sharing the knowledge and wisdom that we've all gained on the ground. It's about sharing the science we have, so that we have a single version of the truth, and its available to everyone. It's about listening to the perspective of those who are managing these lands, and in some cases

have been managing these lands in harmony with the environment for thousands of years.”

KCCI-TV Des Moines, IA (5/15, 191K) reports that Jewell said, “No company, no individual can go it alone. If we are going to chart a course for our planet that is better than the one that we have giving, we must act now and must act as a team.”

Coverage by the AP was also picked up by the Franklin (IN) Daily Journal (5/15, 51K) and the Sioux City (IA) Journal (5/15, 15K).

Gov. Quinn To Appear On Climate Change Panel In Iowa. In an earlier story, the Chicago Tribune (5/15, Byrne, 2.3M) reports Gov. Pat Quinn will be in Iowa “to appear on a climate change panel he was appointed to by President Barack Obama.” The governor will join Interior Secretary Sally Jewell and others in Des Moines for a meeting of the Task Force on Climate Preparedness and Resilience. According to Quinn’s office, “the climate task force is part of Obama’s federal efforts to address disasters caused by climate change.”

BLM ACKNOWLEDGES NEED FOR INCREASED WELL INSPECTIONS. The AP (5/15, 455K) reports that on Wednesday the BLM admitted the need to improve drilling oversight. Spokesman Jeff Krauss said the BLM “has worked hard to keep up with the nation’s energy boom, which has included the increased use of hydraulic fracturing.” Krauss said the BLM hopes Congress will approve a budget request that would let it use \$10 million from fees charged to gas and oil companies to pay for inspections. The article notes that this week Sen. Ed Markey in a letter asked Interior Secretary Sally Jewell to detail the department’s efforts to boost well inspections. Wednesday the Interior Department said it was reviewing Markey’s letter.

Also covering the story is Politico (5/15, Guillén, 73K). Coverage by the AP was also picked up by the Atlanta Journal-Constitution (5/15, 1.36M), the Sacramento (CA) Bee (5/14, 687K), the Toledo (OH) Blade (5/14, 241K), the FuelFix (5/14, 7K), the US News & World Report (5/14, 645K), the Huffington Post (5/15, Visser, 11.54M), and MinnPost (5/15, 5K).

INTERIOR TO ANNOUNCE NEXT STEPS FOR COBELL LAND BUY-BACK PROGRAM. The Nation Sun News (5/15) reports that the Obama Administration is “holding a media call tomorrow to discuss the next steps for the Land Buy-Back Program for Tribal Nations.” Deputy Secretary Michael Connor and Assistant Secretary Kevin Washburn, the head of the BIA, will participate in the call. They will “discuss the implementation plan from now through the end of calendar year 2015.”

REP. GRIJALVA SEEKS REVIEW OF PIPELINE SERVICE ROADS THROUGH WILDLIFE REFUGE. The Arizona Daily Star (5/15, 389K) reports that Rep. Raúl Grijalva has asked the Interior Department “to intervene in a controversial pipeline project that would carry natural gas from Tucson to Sasabe and into Mexico.” Grijalva sent a letter to Interior Secretary Sally Jewell on Monday “asking the department to challenge findings from a draft report released by the U.S. Fish and Wildlife Service regarding the use of access roads in the Buenos Aires National Wildlife Refuge for the Kinder Morgan Siemita Pipeline project.” Grijalva “questioned why the agency would let Kinder Morgan use roads in the refuge after it refused to let the company build its pipeline through the refuge in an existing corridor near Arizona 286.”

OFFICE OF HAWAIIAN AFFAIRS SEEKS LEGAL OPINION ON STATUS OF HAWAII. The Hawaii Star Advertiser (5/11, 402K) reports that the Native Hawaiian Roll Commission has “all but completed its work,” and the Office of Hawaiian Affairs, “immersed in its Native Hawaiian nation-building efforts, erupted late last week in a dramatic conflagration.” On Friday, OHA released on its website a letter, dated May 5, that Chief Executive Officer Kamana’o Crabbe sent to Secretary of State John Kerry, “seeking a legal opinion on the status of Hawaii under international law.” According to the article, “citing recent presentations by pro-independence advocates that characterized federal and Hawaii state governments as ‘illegal regimes,’ Crabbe wrote that he would ask the trustees to delay further nationhood projects until OHA gets a reading from the US State Department on the legal status.”

OPEN SOURCE SOFTWARE DISCUSSED AT FOSE CONFERENCE. In its “Pulse” blog, Government Computer News (5/15, 848) reports that during FOSE’s three-day conference and expo, an Interior Department employee asked the panelists, “What do you do when your agency is just hell bent on using [commercial off-the-shelf] software?” He said “his superiors seem hostile to the very idea of open-source solutions, even after he and his

team produced a cost/benefit analysis comparing in-house development to COTS integration.”

WILDFIRES EXPLODE ACROSS CALIFORNIA. The extensive wildfires in southern California drew significant coverage on Wednesday’s evening newscasts, which all lead with the story and covered the situation at length.

In its lead story, NBC Nightly News (5/14, lead story, 3:20, Williams, 7.86M) reported on “an emergency in the West,” noting “100-degree temperatures, three percent humidity, give or take, and 50-mile an hour winds.” Fires “have exploded” in Southern California “galloping across the land, jumping across canyons faster than firefighters can run and fueled by some of the worst possible conditions. Tonight entire neighborhoods and lives have been put on hold, traffic’s been diverted and the Marines landed on the beach in hovercraft to fight a fire on their base.”

In its lead story, ABC World News (5/14, lead story, 3:35, Sawyer) reported that “17 million people in two states have been given an urgent red flag warning about the risk of fire where they live. Some families are taking stock of the wreckage. Others fighting the fire with the garden hoses.” ABC (Vega) provides extensive details on the efforts of locals to combat fires.

In its lead story, the CBS Evening News (5/14, lead story, 3:05, Pelley, 5.08M) reported, “A drought, a heat wave and strong winds are the elements for the disaster unfolding tonight in Southern California.” CBS says that wildfires “are burning out of control in San Diego County.” The piece focuses on the fire in Carlsbad, which has destroyed “at least” 30 homes.

The CBS Evening News (5/14, story 2, 1:15, Pelley, 5.08M) ran a second story. After receiving input from a local reporter detailing conditions, CBS (Pelley) adds, “Heat and drought have brought an early start to the wildfire season this year. Nearly all of the counties in California have now officially declared that fire season has begun, which allows them to hire more firefighters.”

PRESIDENT OBAMA ENCOURAGED TO PROTECT PUBLIC LANDS. For the “Congress Blog” of The Hill (5/15, Nelson, 237K), Ryland Nelson, Southern Rockies Program Manager for Canadian nonprofit, Wildsight, argues that “Obama’s environmental legacy does not hinge at all on what he decides about Keystone,” but that “his real environmental legacy will be what he does to protect the United States’ hugely popular national parks and monuments.” As evidence, he points to “the strong negative reactions to park closures during the shutdown.” In conclusion, Nelson urges Obama to “seize a great opportunity to cement a truly lasting legacy for the generations that come after us.”

SEN. BLUNT TOUTS PUBLIC-PRIVATE PARTNERSHIPS FOR NATIONAL PARKS. In an op-ed for the St. Louis Post-Dispatch (5/15, 1.02M), Sen. Roy Blunt writes that “it was good to learn that Vice President Joe Biden and Interior Secretary Sally Jewell would be visiting the Arch.” Blunt believes in “the use of public-private partnerships in the operation of land management agencies,” including the NPS. He argues that “the CityArchRiver project can be a prototype for the next 100 years of how the national park system should work — through partners that have more invested than the government does.”

America’s Great Outdoors:

National Park Service:

DATA SHOW DECLINE IN CAMPING IN NATIONAL PARKS. The AP (5/15) reports that “the number of overnight camping stays in national parks has declined in the past 15 years.” The article notes that “more than 9.2 million overnight camping stays were recorded in the national parks 15 years ago in 1998,” but “the number dropped to 8.54 million five years later in 2003; 7.99 million five years after that in 2008, and 7.91 million last year, in 2013.” NPS spokesman Jeffrey Olson said “the decline began in the mid-1990s but began to level out around 2004.”

Coverage by the AP was also picked up by ABC News (5/15, 3.58M) and the Anderson (SC) Independent-Mail (5/14, 78K).

In a piece for the AP (5/14), Solvej Schou writes about camping.

ELEVATOR HALTS AT REOPENED WASHINGTON MONUMENT. The Washington Post (5/15, Ruane, 4.22M) reports that “two days after the gala reopening of the Washington Monument, the elevator in the monument stopped working on Wednesday.” The NPS said the elevator in the obelisk temporarily halted at 10:53 a.m. Then, “around 5 p.m., the operator was unable to get the elevator to leave the ground floor with a load of passengers.”

Also reporting on the story is Reuters (5/15).

NPS DONATES DEER MEAT TO HELP HOMELESS. The New York Times (5/15, Huetteman, Subscription Publication, 9.65M) reports that the government sharpshooters in Rock Creek Park shot 106 white-tailed deer by the end of this year’s short killing season. According to the article, “to help the homeless and to make sure that the dead deer are not simply discarded — an action that would further outrage local residents — the National Park Service has the meat inspected and processed and then gives it to D.C. Central Kitchen.” And “despite local protesters who say the killings are cruel, the goal remains culling the deer population down to no more than 20 deer per square mile, from 77 per square mile counted last fall.”

SEN. MURKOWSKI WELCOMES APPROVAL OF SUBSISTENCE ACTIVITIES ON NPS LANDS IN ALASKA. The National Journal (5/15, Subscription Publication, 561K) reports that Sen. Lisa Murkowski welcomed the NPS’ “decision to develop regulations recognizing the rights of subsistence users to collect wild berries, birch bark, seaweed, beach grass, and other renewable traditional foods and handcraft material in Alaska’s national parks.” Murkowski said, “This decision — while long overdue — is a small step in the right direction. It finally brings the National Park Service’s rules into alignment with the Alaska National Interest Lands Conservation Act’s goal of ensuring Alaskans can continue to live a subsistence lifestyle despite the prevalence of federally managed land in the state. The truth is that rural residents have been carrying out these activities on their traditional lands for generations, but it’s important that federal regulations reflect and respect that reality. I thank the National Park Service for listening to me on this issue.”

NPS TO MAP LAKE SUPERIOR’S FLOOR. The Spoooner (WI) Advocate (5/15, 13K) reports that “Lake Superior’s bottom will be scanned by sonar and laser beams around national parks this summer, as part of a US National Park Service project to map the lake floor.” The NPS has been “doing a methodical grid scan of Lake Superior’s floor for four summers.” Project director Jay Glase in Ashland says the NPS is “mapping the lake’s floor to help restore fish habitats and see the effects that artificial structures are having on things like spawning reefs.”

NPS DEVELOPING BUFFALO RIVER LONG RANGE INTERPRETIVE PLAN. The Branson (MO) Daily News (5/15) reports that the NPS is embarking on a new Long Range Interpretive Plan for the Buffalo National River, and is seeking comments from the public. Spokesperson Caven Clark says the NPS “welcomes stories and experiences that people believe are key to the appreciation and understanding of the Buffalo River.” The agency is “hosting a series of public meetings on the Long Range Interpretive Plan beginning May 20th.”

CHESTNUT TREES TO BE PLANTED AT LINCOLN BIRTHPLACE. The AP (5/15) reports that “volunteers are being sought to help plant potentially blight-resistant American chestnut trees at the Abraham Lincoln Birthplace National Historic Park.” According to the article, “20 trees will be planted Saturday at the park’s picnic area.”

MAN FACES CHARGES IN CONNECTION WITH BURL POACHING. The North Coast Journal (5/14) reports that “an Orick man was arrested recently on suspicion of hacking burl out of redwood trees on public land a year ago and selling them to a nearby burl souvenir shop.” Danny E. Garcia is “facing charges of grand theft, vandalism and receiving stolen property stemming from the discovery of a badly damaged tree in Redwood National and State Parks in April 2013.”

OLYMPIC PARK CABIN ADDED TO STATE LIST OF MOST ENDANGERED HISTORICAL PROPERTIES. The AP (5/15) reports that “an 83-year-old log cabin teetering on the eroding bank of the Quinault River in Olympic National Park was added this week to the state list of most endangered historical properties.” The Enchanted Valley Chalet is included in the Washington Trust for Historic Preservation’s annual list.

GROUPS HOPE STATE DESIGNATION WILL HELP ASTRODOME. The AP (5/15) reports that “preservation groups and others said Wednesday that they’re hopeful a pending application to designate the famed Houston

Astrodome as a 'state antiquities landmark' will help revitalize efforts to revamp the stadium and save it from potential demolition." The article notes that "the pending state antiquities designation comes after the National Park Service added the Astrodome to its National Register of Historic Places."

Bureau of Land Management:

OPERATION AMERICAN SPRING TO HOLD EVENT IN SUPPORT OF BUNDY. The Washington Times (5/15, Chumley, 455K) reports that the Operation American Spring, "a group of self-described revolutionary-style patriots with a million mobilized militia members," is holding an event on Friday in Bunkerville, Nev., "near cattle rancher Cliven Bundy's property and in support of his stand-off with the Bureau of Land Management over grazing fees."

Former Deputy Secretary Babbitt Defends BLM. In an op-ed for the Summit (CO) Daily News (5/15, 37K), former Interior Department secretary Bruce Babbitt defends the employees of the BLM. He writes that "BLM staffers are dedicated public servants who struggle with the unenviable task of juggling the conflicting demands of ranchers, miners, oil and gas companies, sportsmen and conservationists." Babbitt asserts that "they deserve our respect and our gratitude." Babbitt believes that "the whole sorry Bundy episode has given us an opportunity to renew our commitment to conservation." He suggests that "we can do that by calling on President Obama to take action to protect more of the special places on our public lands."

Professor Criticizes BLM. In an op-ed for the Washington Times (5/15, Codevilla, 455K), Angelo M. Codevilla, professor emeritus of international relations at Boston University, writes, that the Bundy dispute is an example that shows that "ordinary Americans have more reason to fear the US government than do our foreign enemies."

Additional Coverage. Providing continuing coverage of the dispute is the Washington Times (5/15, Chumley, 455K).

ADDITIONAL COVERAGE OF THE RECAPTURE CANYON PROTEST. Additional coverage of the Recapture Canyon protest was provided by the Daily Beast (5/14, 1.18M).

Fish and Wildlife Service:

US, PHILIPPINES SIGN ACCORD ON WILDLIFE TRAFFICKING. The Philippine Daily Inquirer (5/15, 800K) reports that the United States and the Philippines have signed a deal to boost Manila's capacity to combat trafficking and other crimes against wildlife. The Memorandum of Understanding was signed by Director Dan Ashe of the US Fish and Wildlife Service, DENR Undersecretary Analiza Teh and the DA-BFAR Director Asis Perez. The agreement will "provide the Philippines with access to and use of the US National Wildlife Forensics Laboratory in Oregon, considered to be the only laboratory in the world that is dedicated to crimes against wildlife," according to Ambassador Jose L. Cuisia, Jr.

The ABS-CBN News (PHL) (5/15, 65K) reports that Ashe said, "The fight to prevent wildlife trafficking and halt its devastating impact on some of the world's most well-known and well-loved wild animals is going to take a global effort."

The Business Mirror (PHL) (5/15, 390) reports that Ashe added, "This [MOU] between our two countries exemplifies the sort of international cooperation that will help us win this fight and save species such as the African elephant and rhino."

Also providing similar coverage are the People's Journal (PHL) (5/15, 1.09M) and the Manila Standard Today (5/15, 20K).

MUSIC INDUSTRY CONCERNED ABOUT IVORY REGULATION. The Hill (5/15, Devaney, 237K) reports that "the music industry is concerned about a 'crippling' new regulation from the Obama administration that it says could end the careers of musicians and reduce the quality of performances around the world." Musicians claim the "order could keep them from traveling overseas, because they often perform with expensive antique instruments that contain ivory." The article notes that "the policy is particularly worrisome for orchestras, because many older stringed instruments such as violins and cellos contain small amounts of ivory, as do the bows used

to play them." The FWS says "it never intended to single out musicians with the rule, which is intended to discourage poachers from killing African elephants for their tusks."

For the [National Geographic](#) (5/14, 42.25M), Andrew Wyatt, a government affairs consultant, and Doug Bandow, a Senior Fellow at the Cato Institute, argue that the Obama Administration is "playing the politics of deception, or at least deliberate misinformation." They claim that FWS Director Dan Ashe and "others have been circulating misleading information on elephant deaths, poaching, and the illegal ivory trade to advance an ideological agenda rather than to protect elephants." The authors argue that their "proposals reflect a desperate misunderstanding of the illegal market and will only accelerate the slaughter of African elephants."

ENDANGERED SPECIES DAY TO BE CELEBRATED. [The Chattanooga](#) (5/15, 12K) reports that "the 9th annual national Endangered Species Day will be celebrated on Friday with special events and programs that recognize the nation's efforts to conserve and protect America's most imperiled species." FWS Director Dan Ashe said, "Endangered Species Day offers us an opportunity to recognize the uncertain future faced by many of our nation's most iconic species and to work together to preserve our priceless natural heritage. For over 40 years, the Endangered Species Act has played an integral role in wildlife conservation and has ensured that future generations can continue to enjoy the species that surround us today."

WESTERN GROUSE COALITION LOBBIES HOUSE APPROPRIATORS TO DELAY LISTING. [The Environment & Energy Publishing](#) (5/15, 705) reports that "a group headquartered in Utah whose president is a D.C. lobbyist is pushing House lawmakers to include language in an upcoming spending bill that would force a one-year delay of the Interior Department's listing decision for the greater sage grouse." The Western Grouse Coalition, "led by a former Natural Resources Committee Republican aide turned lobbyist, said Western states need more time to implement conservation plans within their borders." The group said "it is also working with lawmakers on a bill to be introduced 'in the very near future' that would postpone the Fish and Wildlife Service's listing decision for an additional 10 years."

FWS TO WORK QUEBEC TOWN ON SEA LAMPREY BARRIER. The AP (5/15) reports that the FWS is "working with a town in Quebec to prevent sea lamprey from traveling up a tributary of Lake Champlain just north of the Vermont border." Sen. Patrick Leahy says the "barrier is on the Mopron Cree, a tributary of the Pike River in Notre-Dame-de-Stanbridge, which flows into Lake Champlain's Missisquoi Bay." Leahy "worked to secure nearly \$1.3 million for the barrier through the Great Lakes Fishery Commission."

FWS HISTORIAN PROFILED. [The Environment & Energy Publishing](#) (5/15, 705) profiles Mark Madison, the FWS historian, and "the only historian the agency has ever had." According to the article, "most of the illegal goods retained by FWS are shipped out to a repository near Denver, but Madison and his co-workers keep some in the basement archive for display in the training center museum upstairs." Madison "does the interpretation while the curator preserves all the objects and maintains the archive."

FOIA REQUEST SEEKS INFORMATION ON RELATIONSHIP BETWEEN FWS AND ISLAND

CONSERVATION. For "The Blog" of the [Huffington Post](#) (5/15, Sergio, 11.54M), conservationist Maggie Sergio writes that a Freedom of Information Act request has been filed to seek "information and details surrounding the business relationship between USFWS and the Santa Cruz based nonprofit, Island Conservation." According to Sergio, "since 2008, Island Conservation has been awarded lucrative, tax-free government contracts to conduct pest control on remote islands without any formal bid process, minimal regulatory oversight, and no accountability for past violations of the Migratory Bird Treaty Act, the Bald and Golden Eagle Protection Act or EPA law." She notes that "Island Conservation's federal contracts to carry out highly controversial island eradication projects also include payment to write the environmental impact statements and/or assessments for the very projects they will carry out."

US Geological Survey:

SCIENTISTS SAY DEPLETION OF CENTRAL VALLEY'S GROUNDWATER COULD BE CAUSING

EARTHQUAKES. The [Los Angeles Times](#) (5/15, Lin, 3.46M) reports that on Wednesday, "a group of scientists offered a new, intriguing theory" that the increase in the number of earthquakes in one part of Central California are "triggered in part by the pumping of groundwater in the Central Valley, which produces crops that feed the

nation." USGS seismologist Susan Hough, "who was not affiliated with the study, said the idea that groundwater depletion can trigger earthquakes is very plausible." Hough also "went a step further than the researchers, saying it's possible that smaller earthquakes in the Parkfield area could eventually trigger larger earthquakes that head south toward Los Angeles."

Securing America's Energy Future:

Renewable Energy:

WIND ENERGY TAX CREDIT BEING DEBATED BY SENATE. The "Floor Action" blog of The Hill (5/15, Cox, 237K) reports Sens. Jeff Flake and Lamar Alexander said yesterday "that it's long past time the government stopped subsidizing wind energy." Flake stated on the Senate floor, "Neither of us is saying there is no place for wind energy. There is an important place for it ... but it's time for the federal subsidy to end." The legislative body "is debating a bill to renew a set of expired tax breaks commonly called 'tax extenders,' the EXPIRE Act" which "would continue more than 50 tax credits for two years, including the wind production tax credit."

FuelFix (5/14, Dlouhy, 7K) reports that the bill's "path out of the chamber is far from clear, complicated by some Republicans' hopes to make changes, such as doing away with an existing medical device tax or dropping the renewable energy production credit altogether." Supporters of the bill "are hoping that the broad array of interests represented in the bill — from teachers to race track owners — will help it get past critics with objections to individual provisions."

USGS RELEASES PUBLICLY AVAILABLE WIND TURBINE MAP. The Midwest Producer (5/15) reports that the USGS has "created a publicly available national dataset and interactive mapping application of wind turbines." According to officials, "knowing the location of individual turbines, as well as information such as the make, model, height, area of the turbine blades, and capacity creates new opportunities for research, and important information for land and resource management."

Onshore Energy Development:

GROUPS APPEAL INTERIOR'S APPROVAL OF PEABODY MINE PLAN FOR NORTH ANTELOPE ROCHELLE. The SNL Financial (5/15, 21K) reports that "a pair of environmental groups on May 13 said they filed a petition for review of the US Department of the Interior's approval of a Peabody Energy Corp. mine plan authorizing the coal producer to mine the North Porcupine and South Porcupine federal leases in the Powder River Basin." In a filing in US District Court for the District of Wyoming, the Powder River Basin Resource Council and the Western Organization of Resource Councils claimed the Interior Department "did not properly consider reclamation status at the North Antelope Rochelle mine when issuing its approval March 14." The groups also said that Peabody has "failed to reclaim lands contemporaneously with mining operations, which is a requirement of the federal surface mining law."

DROUGHT GIVING NEW AMMO TO ANTI-FRACKING FORCES IN CALIFORNIA. The New York Times (5/15, Onishi, Subscription Publication, 9.65M) reports that fracking opponents are arguing that California's current drought is a reason to end the water-intensive method of drilling for oil. The Times says that fracking a single well in California last year "took 87 percent of the water consumed in a year by a family of four." The drought "has provided the momentum for about a dozen local governments across California, the third-largest oil producing state, to vote to restrict or prohibit fracking in their jurisdictions, as concerns over environmental effects and water usage have grown." In addition, legislation that "would declare a statewide moratorium on fracking has been gathering support in the State Senate, a year after a similar effort failed."

OHIO RESEARCHERS LINKING FRACKING TO EARTHQUAKES. CBS News (5/15, 5.21M) reports that scientists in Ohio have drawn links between increased seismic activity and fracking. Researchers have documented "more than 100 mild quakes" in the state since they first started looking at a potential link between drilling and earthquakes 15 years ago. The state is now working on tougher regulations for new wells, however those won't affect wells currently operating. Still, the new regulations include a mandate that new drilling sites in the state within three miles of known fault lines will have to feature "seismic-monitoring equipment." ProPublica (5/15, Sadasivam, 6K) also details current fracking regulatory efforts in Ohio.

FRACKING-LIKE DRILLING NEAR EVERGLADES FOCUSES ATTENTION ON FLORIDA REGULATIONS. The Orlando (FL) Sentinel (5/14, Gibson, 850K) reports that attention has been focused on drilling regulations in Florida after a Texas company was “caught using fracking-like blasting methods to drill for oil near the Everglades.” Sen. Bill Nelson (D-FL) has called for a Federal investigation, while the state has enacted a temporary ban on “five new exploratory wells” in addition to fining the Dan A. Hughes Co. Last year the company had asked the state “for permission to use high-pressure injection of dissolving acids at a production well in Collier County.” Although environmental officials told the company not to proceed, they recently discovered that the method was used on the well anyway.

INTERIOR CRITICIZED FOR IGNORING PUBLIC ON FOUR CORNERS POWER PLANT/NAVAJO MINE ENERGY COMPLEX. For the Durango (CO) Herald (5/14, 28K), Dan Olson writes that the public’s voice should be heard on the Four Corners Power Plant/Navajo Mine Energy Complex. He argues that the Interior Department has “a legal responsibility to engage the public as it prepares its analysis of the FCPP Complex,” but “in the case of the FCPP Complex meetings, the DOI was overtly uninterested in recording and responding to public input.” According to Olson, “rather than hosting a public meeting where comments can be aired publicly and recorded – a meeting in which community members can hear one another’s concerns – the DOI put on a finely honed dog-and-pony show.”

Tackling America’s Water Challenges:

BOR NOMINEE SUPPORTS YAKIMA BASIN WATER PROJECTS. The Yakima (WA) Herald-Republic (5/15, 86K) reports that President Obama’s pick “to take the helm” of the BOR “expressed support for funding the Yakima Basin’s Integrated Plan for water management.” The nominee, Estevan Lopez, is currently the director of the New Mexico Interstate Stream Commission. At a nomination hearing at the Senate Committee on Energy and Natural Resources on Tuesday, Sen. Maria Cantwell, asked Lopez if “he would work to get more federal money committed to the plan, which includes projects ranging from fish passage to new storage reservoirs.” Lopez said that “he saw the Yakima Basin plan as an ‘outstanding example’ of how collaboration can solve difficult water management problems and that he recognized that ‘funding on the federal side has been insufficient.’” Lopez said, “I do commit that we would work with you if confirmed to try to assure that the federal government can contribute its fair share.”

RIO GRANDE SILVERY MINNOWS SPAWNING. The Albuquerque (NM) Journal (5/15, 282K) reports that endangered Rio Grande silvery minnows are “spawning in response to an increased flow in the river over the last few weeks, and cooperative weather means the environmental experiment can continue for a few extra days.” According to BOR spokeswoman Mary Carlson, “with weather cooperating, the experiment has been extended a day.” The article notes that “flows will be slowly reduced through the Albuquerque stretch of the river beginning tomorrow, but the gradual reductions mean the change will not likely be noticeable until early next week.”

REP. GARAMENDI TO SPEAK AGAINST DELTA TUNNELS AT WATER SUMMIT. The Central Valley (CA) Business Times (5/15, 206) reports that Rep. John Garamendi, “an outspoken opponent of the Bay Delta Conservation Plan’s twin water tunnels, will make the case against Gov. Jerry Brown’s project at the 7th annual O.C. Water Summit on Friday.” Garamendi will “present his plan, which he says is more affordable, effective, and comprehensive.” The plan, called “A Water Plan for All California,” would “create additional water for the entire state through water storage, conservation, and recycling, while relying on the best science and protecting water rights.”

CITIES ENCOURAGED TO FIND WAYS TO REUSE WATER. The Dallas Morning News (5/15, 1.18M) editorializes that “it’s smart water policy for additional cities to find more mentally acceptable reuses for the water that flows from our homes.” The paper notes that Dallas is working with the Interior Department on “a reclaimed water feasibility study.” It notes that “one aspect of a changing climate is less rain and longer droughts for Texas.” The editorial argues that “conserving this resource is important, but conservation alone isn’t enough. Smarter use — and reuse — of water is essential, too.”

Empowering Native American Communities:

COBELL CHECKS COULD BE DELAYED TO DECEMBER. The Nation Sun News (5/15) reports that “the seemingly endless wait for the release of the second Cobell payments to tribal beneficiaries seems to be getting longer as the courts sort through appeals and lawyers for the plaintiffs scramble to provide answers for the delay.” In a response to the inquiry of a Sisseton Wahpeton Tribal member, Joe Bums, a Paralegal for Kilpatrick Townsend & Stockton LLP, said, “Our current expectation is that the Trust Administration Class payments will be sent sometime between June and December of this year, after final court approval of those payments.”

Top National News:

OBAMA URGES CONGRESS TO BACK NEW SPENDING ON INFRASTRUCTURE PROJECTS. President Obama’s remarks regarding the need to spend more on the nation’s aging roads and bridges generated a modest amount of national media coverage, including a segment on the CBS Evening News (5/14, story 4, 2:20, 5.08M). Most of the coverage emphasizes the President’s touting of moves made by his Administration to ease the Federal regulatory burden on infrastructure projects as well as his criticism of Congressional Republicans for opposing tax hikes to pay for transportation spending.

On the CBS Evening News (5/14, story 4, 2:20, 5.08M), Scott Pelley reported that the President “challenged Congress to rebuild America’s crumbling bridges and roadways.” Correspondent Jeff Pegues went on to report the CBO has warned that the Federal Highway Trust Fund, which is “financed by revenue from the gas tax,” is being rapidly depleted because “spending from the fund has exceeded that revenue for more than a decade.” Pegues added, “That couldn’t come at a worse time” considering that “more than one in nine bridges are rated as structurally deficient, and 32% of America’s major roads are in poor or mediocre condition.” Pegues also noted that the Administration “has proposed a \$300 billion transportation bill” paid for by tax hikes, but, according to Pegues, “in an election year, a tax increase of any kind is tough to swallow for Republicans and Democrats.”

The AP (5/15) reports that “with New York’s aging Tappan Zee Bridge looming behind him,” the President “challenged congressional Republicans to spend more money on the nation’s crumbling roads, see-through bridges and outdated ports or face losing businesses to other countries.” According to the AP, the President “used the major Hudson River crossing point north of New York City and its \$3.9 billion replacement project to illustrate a fast-track system he initiated that he said cut the permitting time from five years to 1 1/2 years.” The AP also notes that the President “blamed Republicans for not authorizing more money for construction and repairs,” and “accused Republicans of voting against additional spending even as they gladly show up at ribbon cutting ceremonies for projects they refused to finance.”

Reuters (5/15, Rampton) quotes the President as saying, “If you want to tell them what you think about that, don’t worry because usually they show up at ribbon cuttings of projects they refuse to fund.”

According to the Washington Post (5/15, Wilson, 4.22M), the President’s “remarks are the most public in a series of appearances that senior administration officials are making this week to highlight the need for new spending on languishing projects for highways, airports and more.” But the Post goes on to report that Michael Steel, a spokesman for House Speaker Boehner, “questioned Obama’s commitment to public works spending and job creation and cited the administration’s more than five-year deliberation over whether to build” the Keystone XL pipeline.

Reuters (5/15, Rampton) reports that Senate Minority Leader McConnell released a statement on Wednesday reading: “It’s a real challenge to listen to the president talk about reforming the permitting system when he’s been sitting on the permit for the country’s largest shovel-ready infrastructure program.” The Wall Street Journal (5/15, Sparshott, Subscription Publication, 5.51M) also notes Republican objections to the President’s characterization of their position on infrastructure projects.

Bloomberg News (5/15, Runnigen, 4.91M) reports that the President warned that the US “risks its economic supremacy by neglecting...its transportation system,” while “economic competitors such as European nations and China have been investing heavily.” Bloomberg News notes that also on Wednesday, Vice President Biden “was delivering a similar message at a rail center in Cleveland.” According to Bloomberg News, “business groups and labor unions” also “favor a boost in the gasoline tax to finance a long-term highway bill, even though lawmakers in both chambers say that can’t clear Congress in an election year.”

Newsday (5/15, Figueroa, 1.5M) reports that the President's trip to New York "include[d] two Democratic fundraisers Wednesday night and a speech at the Sept. 11 memorial Museum dedication in lower Manhattan Thursday." Newsday notes that on Wednesday, Gov. Andrew Cuomo (D) introduced the President, "who said Cuomo's work in getting funding for the Tappan Zee project showed a 'can-do spirit.'"

The Los Angeles Times (5/15, Hennessey, 3.46M) reports that "in December, federal officials awarded the project a \$1.6 billion-low-interest loan, the largest-ever award through the Transportation Infrastructure Finance and Innovation Act program."

The Hill (5/14, Sink, 237K) reported that "under the new permitting guidelines, departments within the administration will be required to...reduce the amount of time the government takes to resolve interagency disputes," and urged to "undertake synchronized, simultaneous reviews of projects." According to the Christian Science Monitor (5/15, Swan, 566K), the President "proposes to expand a 'dashboard' to coordinate permit schedules and department reviews of proposed projects, including wind farms, ports, and pipelines." But the Monitor notes that the Keystone XL pipeline "would not be included in the dashboard, an exemption that Republican leaders have cited as a deal breaker."

The Washington Times (5/15, Boyer, 455K) reports that Sen. Rob Portman (R-OH) "said executive action to reform the federal permit process is 'a step in the right direction,' but added that legislation is needed to increase certainty in the system." According to the Times, Portman said he is "sponsoring a bill to do just that."

According to the Lower Hudson Valley (NY) Journal News (5/15, Saeed, Juva-Brown, 339K), since Cuomo became governor, "the state approved a process that allows infrastructure project to be designed while construction begins," and Cuomo "has been praised for reviving the project, which had been stagnating for nearly a decade." The Journal News notes that "also in attendance, seated to the back, was Westchester County Executive Rob Astorino," who is expected to be Cuomo's Republican challenger in November.

The New York Times (5/15, A24, Berger, Baker, Subscription Publication, 9.65M) reports that the President's visit "appears to have been...planned on short notice." The Times notes that Drew Fixell, "the Democratic mayor of Tarrytown, did not learn about the trip until late last week."

The New York Daily News (5/15, Fermino, 4.36M) notes that the President "pointed out that Europe spends double what America does on roads and bridges, while China spends four times the US amount on its public works." The Daily News also reports that the President said his Administration's streamlining of the approval process "will help speed up mega-projects at Boston's South Station, the Pensacola Bay Bridge, and light-rail construction north and south of Seattle." According to the Daily News, the President "insisted that infrastructure expansion should be bipartisan, but took a few shots at Republicans...for pushing tax cuts on the wealthy instead of 'rebuilding America.'" The New York Observer (5/15, Barkan, 328K) covers the President's speech under the headline "Barack Obama Slams Republicans In Infrastructure Speech."

The Somers (NY) Daily Voice (5/15, LoPriore) reports that the President "thanked Cuomo for making the bridge project a reality and Democrat Congresswoman Nita Lowey for expediting the federal financing." The Daily Voice reports that Rep. Sean Patrick Maloney (D-NY) said on Wednesday that "it's time to get serious about investing in our country again and fight back against ideologues in Congress who want to hold our economy hostage by refusing to repair our crumbling infrastructure."

The Poughkeepsie (NY) Journal (5/15, Rauch, 149K) reports that on Wednesday, "several dozen construction workers, claiming that minorities were being systematically excluded from working on the new Tappan Zee Bridge, lined a nearby overpass, chanting, 'Obama, help us! We need jobs!'" Vinnie Torres, a member of the Laborers' International Union, is quoted as saying, "We're excited about the project, we're excited about the visit, but we want President Obama to know that we're not being recognized, that we're being shut out."

FOX POLL: 51% BELIEVE ADMINISTRATION LIED ABOUT BENGHAZI ATTACKS. Bret Baier reported on Fox News' Special Report (5/14, 2.15M) that more than half the respondents in a Fox News poll "believe President Obama and his aides purposely deceived the public about the Benghazi terror attacks." According to the poll, 51% believe that "the Administration knowingly lied in order to help the President get re-elected." However, Baier

also noted that “two-thirds say the Republican-led investigation into Benghazi is motivated by politics more than a desire to find the truth.”

Pelosi Undecided Regarding Democratic Participation On Benghazi Select Committee. Asked on CNN's Situation Room (5/14, 554K) if Democrats will participate in the House select committee on Benghazi, House Minority Leader Pelosi said, “We’ll see.” Pelosi continued, “The point is, we want to show the public how unfair this process is – it should be evenly divided; they don’t want it evenly divided.” Pelosi also described the select committee as “unnecessary” because there have already been “six congressional hearings, one independent hearing at the State Department and the rest.”

Rice Defends The Administration’s Cooperation With Benghazi Investigations. The Daily Caller (5/14, Bordelon, 408K) reported that when asked by PBS’s Judy Woodruff on Wednesday, in regards to the 2012 Benghazi terrorist attacks, “What more is there that the administration has done or said that we’re not aware of?” NSA Rice replied, “Dang if I know.” According to the Daily Caller, Rice added, “We – the administration has produced, I think, 25,000 pages of documents or 25,000 individual documents. They have supported, participated in, contributed to the investigation of seven, I think, different committees.”

According to the Washington Times (5/15, Sherfinski, 455K), “Wednesday’s remarks were [Rice’s] first extended comments following the decision by the House Republican leadership last week to create the select committee.” Fox News’ Special Report (5/14, 2.15M) also reported on Rice’s remarks concerning Benghazi.

Progressive Group Sends Solicitation Letter Referencing Benghazi. The Daily Caller (5/14, Pappas, 408K) reported that People for the American Way, a “prominent left-wing organization...sent a fundraising email to donors on Wednesday about the 2012 attacks in Benghazi.” According to the Daily Caller, “the fundraising letter from the organization’s president, Michael Keegan,” read: “The House GOP’s latest Benghazi investigation is nothing more than the exploitation of the death of four Americans for political gain.” The Daily Caller notes that the “solicitation comes as Democrats are busy accusing Republicans of inappropriately fundraising on the issue ahead of this year’s elections.”

VA REPORTEDLY KNEW OF WAIT-TIME FALSIFICATIONS AT LOCAL CLINICS IN 2010. On NBC Nightly News (5/14, story 4, 2:00, 7.86M), Brian Williams said, “We are learning a lot more...about a growing scandal involving patient waiting lists at this nation’s VA hospitals.” Williams noted that VA Secretary Shinseki will testify about the scandal on Thursday. Correspondent Kelly O’Donnell went on to report that “in a new development, NBC News reviewed a 2010 internal memo where VA officials ordered immediate action to stop local VA hospital staffers from falsifying appointment dates to make patient wait times seem shorter.” According to O’Donnell, “The memo shows that senior officials knew of a number of schemes used by local VAs to report dramatically shorter wait times.”

The New York Times (5/15, Oppel, Subscription Publication, 9.65M) says that “with new reports of alleged waiting-list manipulation emerging almost daily, some Republicans in Congress have joined the American Legion in calling for” Shinseki “to resign.” The Times also reports that “in a move that underscored the political risks the administration could face from the waiting-list controversy, President Obama late on Wednesday assigned a top White House adviser, the deputy chief of staff Rob Nabors, to work with” the VA as it deals with the controversy. According to the Times, Shinseki’s prepared testimony for Thursday’s hearing “suggests that he may not respond in any detail to questions” and will instead say the VA IG “has advised VA against providing information that could potentially compromise’ the office’s inquiry.”

GAO: VA Has “Made Minimal Progress At Best.” Under the headline “Little Progress At VA On Eve Of Shinseki’s Testimony,” the Wall Street Journal (5/15, Kesling, Subscription Publication, 5.51M) reports the GAO says the VA has not made sufficient reforms in the wake of reports documenting the persistence of extended wait times for veterans seeking care.

VA IG Finds Veterans Are Routinely Overmedicated. On the CBS Evening News (5/14, story 8, 2:50, 5.08M), Scott Pelley reported that a “Federal investigation confirmed what we reported on this broadcast last year, that many veterans are being overmedicated in VA hospitals and some of the overdoses have been fatal.”

COMMITTEE MEETINGS

USCC HEARING: STABILITY IN CHINA — 8:45 a.m. – 3:15 p.m. Public Hearing on “Stability in China: Lessons from Tiananmen and Implications for the United States.” 9:00a – 9:30a Congressional Perspectives, Representative Frank Wolf (VA-10); 9:30a – 11:00a Panel I: Tiananmen and Contemporary Economic, Political, and Social Challenges in China; Dr. Joseph Fewsmith, Professor of International Relations and Political Science, Boston University, Boston, MA; Xiao Qiang, Adjunct Professor at the University of California-Berkeley, Founder and Editor of China Digital Times, Berkeley, CA; Dr. Stephen Hess, Assistant Professor of Political Science, Bridgeport University, Bridgeport, CT. 11:15a – 12:45p Panel II: Expression of Dissent in China Today with Dr. Murray Scot Tanner, Senior Research Scientist, CNA, Alexandria, VA; Dr. Sophie Richardson, China Director, Human Rights Watch; Carl Minzner, Associate Professor of Law, Fordham University, New York, NY. 1:45p – 3:15p Panel III: Freedom of Expression and Media Control: Implications for the United States; Sarah Cook, Senior Research Analyst for East Asia, Freedom House, New York, NY; Delphine Halgand, U.S. Director, Reporters Without Borders; David Wertime, Senior Editor, Foreign Policy. <http://www.uscc.gov/Hearings/hearing-stability-china-lessons-tiananmen-and-implications-united-states>. Location: 608 Dirksen. On the Net: <http://www.uscc.gov/>

ENVIRONMENT AND PUBLIC WORKS — 9:30 a.m. Business meeting to consider S.2322, to reauthorize Federal-aid highway and highway safety construction programs. <http://www.epw.senate.gov/public/?CFID=128271676&CFTOKEN=69017020>. Location: 406 Dirksen.

HOMELAND SECURITY AND GOVERNMENTAL AFFAIRS — 9:30 a.m. Permanent Subcommittee on Investigations Online Advertising and Hidden Hazards to Consumer Security and Data Privacy. Witnesses: PANEL ONE: Alex Stamos, Chief Information Security Officer, Yahoo! Inc., Sunnyvale, CA; George Salem, Senior Product Manager, Google Inc., Mountain View, CA; Craig Spiezle, Executive Director, Founder and President, Online Trust Alliance. PANEL TWO: Maneesha Mithal, Associate Director, Division of Privacy and Identity Protection, Federal Trade Commission; Lou Mastria, Managing Director, Digital Advertising Alliance, New York, NY. <http://www.hsgac.senate.gov/hearings/online-advertising-and-hidden-hazards-to-consumer-security-and-data-privacy>. Location: 342 Dirksen.

BANKING, HOUSING, AND URBAN AFFAIRS — 10 a.m. Business meeting to resume consideration of S.1217, to provide secondary mortgage market reform. http://www.banking.senate.gov/public/index.cfm?FuseAction=Hearings.Hearing&Hearing_ID=7b130307-6a0d-405e-a29e-3524c7605286. Location: 538 Dirksen.

FOREIGN RELATIONS — 10 a.m. Senate Foreign Relations Subcommittee on African Affairs hearing, “BringBackOurGirls: Addressing the Threat of Boko Haram.” Witnesses: Ambassador Robert P. Jackson, Principal Deputy Secretary of State for African Affairs, Department of State; Earl Gast, Assistant Administrator for African Affairs, USAID; Alice Friend, Principal Director for African Affairs, Department of Defense.; Special Guest: Lantana Abdullahis comments will include: “Her perspectives about the kidnapping of the girls as a Nigerian woman and mother; The fact that the tragedy of the kidnappings can become an opportunity to unite Nigerians and international partners to solve the long-running crisis in northeastern Nigeria; What it will take to help the girls and their communities to recover (i.e. trauma healing)”. <http://www.foreign.senate.gov/hearings/bringbackourgirls-addressing-the-threat-of-boko-haram/051514>. Location: 419 Dirksen. Notes: The

Subcommittee previously looked at the threat of Boko Haram to Nigerias stability and security in March 2012. More on that hearing is available here: <http://1.usa.gov/117aSX2> and <http://1.usa.gov/1gfZ40m>

VETERANS AFFAIRS — 10 a.m. Hearing, "The State of VA Health Care." Department of Veterans Affairs Secretary Eric Shinseki will be among the witnesses. WITNESS LIST: PANEL I: Eric K. Shinseki, secretary of the Department of Veterans Affairs, accompanied by Dr. Robert A. Petzel, under secretary for health. PANEL II: Daniel M. Dellinger, national commander, The American Legion; Joseph A. Violante, national legislative director, Disabled American Veterans; Tom Tarantino, chief policy officer, Iraq and Afghanistan Veterans of America; Carl Blake, national legislative director, Paralyzed Veterans of America; D. Wayne Robinson, president and CEO, Student Veterans of America; Ryan Gallucci, deputy director, National Legislative Service, Veterans of Foreign Wars of the United States; Rick Weidman, executive director for policy and government affairs, Vietnam Veterans of America. PANEL III: Richard Griffin, acting inspector general, Department of Veterans Affairs – accompanied by Dr. John D. Daigh, Jr., assistant inspector general for healthcare inspections; Rear Admiral W. Clyde Marsh, USN, retired, president, National Association of State Directors of Veterans Affairs; Debra A. Draper, director, Health Care, Government Accountability Office, Phillip Longman, senior research fellow, New America Foundation. <http://www.veterans.senate.gov/hearings/the-state-of-va-health-care-051514>. Location: 106 Dirksen.

FOREIGN RELATIONS — 2:15 p.m. Nominations: Ambassador to the Czech Republic & U.S. ASEAN Rep. Witnesses: Andrew H. Schapiro of Illinois, to be Ambassador of the United States of America to the Czech Republic; Nina Hachigian of California, to be Representative of the United States of America to the Association of Southeast Asian Nations, with the rank and status of Ambassador. <http://www.foreign.senate.gov/hearings/nominations/051514>. Location: 419 Dirksen.

COMMERCE, SCIENCE, AND TRANSPORTATION — 2:30 p.m. Subcommittee on Surface Transportation, and Merchant Marine Infrastructure, Safety, and Security, "Surface Transportation Reauthorization: Local Perspectives on Moving America." http://www.commerce.senate.gov/public/index.cfm?p=Hearings&ContentRecord_id=90c86d62-f87f-458d-8397-693ec528c68c&ContentType_id=14f995b9-dfa5-407a-9d35-56cc7152a7ed&Group_idb06c39af-e033-4cba-9221-de668ca1978a. Location: 253 Russell.

HEALTH, EDUCATION, LABOR, AND PENSIONS — 2:30 p.m. Full Committee Hearing – Progress and Challenges: The State of Tobacco Use and Regulation in the U.S. Witnesses: Tim McAfee, MD, MPH, Director, Office on Smoking and Health, Centers for Disease Control and Prevention, Atlanta, GA; Mitch Zeller, JD, Director, Center for Tobacco Products, US Food and Drug Administration, Silver Spring, MD. <http://www.help.senate.gov/hearings/hearing/?id=a0a14829-5056-a032-526d-3bc1bfd96586>. Location: 430 Dirksen.

INTELLIGENCE — 2:30 p.m. Closed hearings to examine certain intelligence matters. <http://www.intelligence.senate.gov/hearings.cfm?hearingId=0cb5dc5497c5ffb2985cb30c4735ae42>. Location: 219 Hart.

US House: May 12 – 16. — The House is in District work period for the week.

2 p.m. — The House meets in pro forma session.

Other: NATIONAL POLICE WEEK EVENT — Deputy Secretary Mayorkas, joined by U.S. Secret Service Director Pierson, ICE Principal Deputy Assistant Secretary Winkowski, CBP Commissioner Kerlikowske and Deputy Commissioner Kevin McAleenan, will participate in the National Peace Officers Memorial Service at the U.S. Capitol. Contacts: DHS Press office (202) 282-8010. Notes: Call DHS for coverage details.

NATIONAL POLICE WEEK — May 11 – 17. The National Law Enforcement Officers Memorial Fund's National Police Week, paying special recognition to those law enforcement officers who have lost their lives in the line of duty for the safety and protection of others. <http://www.nleomf.org/programs/policeweek/> Contacts: Steve Groeninger, steve@nleomf.org, 202-737-7135

SMALL BUSINESS WEEK – WEB EVENTS — May 12 – 16. National small business organization, Small Business Majority, is hosting a variety of events and educational seminars in honor of National Small Business Week (May 12 – 16). CONTACT: Allison Abney 5/8 Media Relations Manager, (202) 289-0957, aabney@smallbusinessmajority.org. Highlights: 12:00pm EDT – Small Business Week Spotlight: Whats The Future of Healthcare Reform. 12:00 pm EDT – What the New Healthcare Law Means For Your New Jersey Small Business. 2:00 pm EDT – Small Business Week Spotlight: What the New Healthcare Law Means for Your Small

Business. 3:00 pm MDT -What the New Healthcare Law Means for Your Colorado Small Business. 2:00 pm EDT
– Small Business Week Spotlight: Patent Reform and your Small Business.

2014 GOVERNMENT SECURITY CONFERENCE & EXPO — May 13 – 15. GovSec for Government, Homeland Security, and Law Enforcement professionals looking for strategies and cost effective technology.
<http://govsecinfo.com/Home.aspx>. Location: Walter E. Washington Convention Center, 801 Mount Vernon Place, NW.

CICAD OF THE OAS MEETING — May 14 – 16. Group of Experts in Demand Reduction of the CICAD of the OAS Meets in Washington The fifteenth meeting of the Group of Experts in Demand Reduction of the Inter-American Drug Abuse Commission (CICAD) of the Organization of American States (OAS) will be held in Washington, DC from May 14 to 16, chaired by the National Anti-Drug Secretariat (SENAD) in representation of the Government of Brasil. Location: Organization of American States, 1889 F Street, NW. Contacts: 202-3705437 (www.oas.org)

HEALTH INSURANCE EXCHANGE SUMMIT — May 14 – 16. 2014 National Health Insurance Exchange Summit. [www. HealthInsuranceExchangeSummit.com](http://www.HealthInsuranceExchangeSummit.com). Contacts: registration@hcconferences.com (800-503-9528). On the Net: www. HealthInsuranceExchangeSummit.com

LAST LAUGHS:

- + Late Night Political Humor.

DOI in the News:

INTERIOR TO FOCUS ON 21 RESERVATIONS IN CONSOLIDATION PROGRAM. The [AP](#) (5/16, Volz) reports that the Interior Department announced on Thursday that twenty-one American Indian reservations will be the focus of the next phase of a \$1.9 billion program to buy fractionated land parcels. Rep. Steve Daines said he welcomed Thursday's announcement, but he raised concerns that it "may not provide tribes with the necessary tools to ensure the Land Buy-Back program is properly implemented." Daines said the Interior Department should "use its authority to give tribes more flexibility, and it should move swiftly to address consolidation problems on other reservations not included in the announcement." Assistant Secretary for Indian Affairs Kevin Washburn said that the BIA has "entered into or is negotiating cooperative agreements with many tribes in the buyback program, though others say they want the federal government to run the program."

In a separate story, the [AP](#) (5/16) lists the twenty-one American Indian reservations.

Coverage by the AP was also picked up by [Yahoo!](#) (5/16, Volz, 17.91M), the [Franklin \(IN\) Daily Journal](#) (5/16, 51K), the [Montana Standard](#) (5/16, 41K), the [Flathead \(MT\) Beacon](#) (5/16, 15K), the [Great Falls \(MT\) Tribune](#) (5/15, 90K), and the [Seattle Times](#) (5/16, 1.22M).

Similar coverage was provided by the [Rapid City \(SD\) Journal](#) (5/16, 141K) and the [Ravalli \(MT\) Republic](#) (5/16, 19K).

LAWSUIT CLAIMS KENTUCKY ISSUES SURFACE-MINING PERMITS IN VIOLATION OF FEDERAL LAW.

The [Lexington \(KY\) Herald-Leader](#) (5/15, 395K) reports that "Kentucky has had a longstanding practice of issuing surface-mining permits that don't square with federal law, several people have claimed in a lawsuit." The lawsuit claims that "the state ran afoul of federal law by approving a permit application that did not list the names and addresses of all the owners." It "seeks an order for Premier Elkhorn to stop mining at the site" and asks that Interior Secretary Sally Jewell be "ordered to put a new system in place for issuing surface-mining permits in Kentucky, stripping the state of authority it has had for more than 30 years over such permits."

CONGRESS URGED TO SUPPORT OBAMA'S PROPOSED WILDFIRE BUDGET REFORMS. In an op-ed for

the Tucson (AZ) Sentinel (5/16, 1K), Nidhi Thakar of the Center for American Progress supports the proposal by the President Barack Obama "to overhaul how the United States pays the costs of responding to the most catastrophic wildfires." Thakar argues that "this common-sense proposal will have far-reaching benefits for American communities, parks, and public lands." Thakar concludes that "the president's proposal will free up dire funding needed for fire prevention on our public lands, national parks, and other pristine lands that cover threatened sage grouse habitat."

Additional coverage of wildfires was provided by the Christian Science Monitor (5/15, Wood, 566K) and CNBC (5/16, 31.28M).

PROS AND CONS OF PROPOSED SAN GABRIEL NATIONAL RECREATION AREA ANALYZED. In an op-ed for the Chico (CA) Enterprise-Record (5/16, 90K), Judy Nelson, mayor of Glendora, weighs the pros and cons of creating a San Gabriel National Recreation Area. Nelson notes that the "legislation will impact a large number of people and a vast area of land," and she argues that "deciding whether it is beneficial for the San Gabriel Valley now and for the future should not be rushed or taken lightly." Nelson concludes that "it is not a partisan issue, and ultimately should be decided by the citizens."

America's Great Outdoors:

National Park Service:

FIRST LADY SHAPED BY SCHOOL DESEGREGATION RULING. The New York Times (5/16, Stolberg, Subscription Publication, 9.65M) reports that while President Obama on Friday evening "will meet privately at the White House with the families of the plaintiffs in the Brown lawsuit and two of the lead lawyers," Michelle Obama "will take center stage in Topeka, where she will visit the Brown v. Board of Education National Historic Site and address graduating seniors at the Kansas Expo centre." Brown v. Board of Education "had more of a direct impact on Mrs. Obama than on her husband and shaped her life in ways she does not always openly discuss. 'She saw firsthand the impact of Brown v. Board of Education in her own life,' said Valerie Jarrett, a senior White House adviser and close friend of Mrs. Obama."

OLDEST NATIONAL PARK RANGER PROFILED. NPR (5/16, Staff, 519K) reports on Betty Reid Soskin, 92, "the oldest active full-time National Park Service ranger in the United States." Soskin and "her colleagues at the Rosie the Riveter World War II Home Front National Historical Park are preparing to unveil new permanent exhibits at the park on May 24."

CONCERNS RAISED OVER FINAL GATEWAY NATIONAL RECREATIONAL AREA PLAN. The Forum (NY) (5/15) reports residents have raised concerns that the NPS is "proposing expanded public use" of the Gateway National Recreational Area, "in part because they said NPS does not adequately care for land it owns that is now open to the public." Still, Gateway National Recreation Area Superintendent Jennifer Nersesian "wrote in a letter to the community that NPS hopes to see much, if not all, of the plan become a reality, sooner or later."

ADDITIONAL COVERAGE OF WASHINGTON MONUMENT ELEVATOR BREAKDOWN. Additional coverage of the elevator breakdown at the Washington Monument was provided by Roll Call (5/16, 76K).

ADDITIONAL COVERAGE OF DELAWARE WATER GAP NATIONAL PARK EXPANSION. Additional coverage of the expansion of the Delaware Water Gap National Recreation Area as a result of "land donated under the agreement with utility companies to allow construction of a new power line through the park" was provided by the Lehigh Valley (PA) Express Times (5/16, 189K).

Bureau of Land Management:

BLM TO CLEAR WILD HORSES FROM UTAH'S WEST DESERT. The Salt Lake (UT) Tribune (5/16, 470K) reports that the BLM will "likely clear most if not all the wild horses from a West Desert block of state land in July as part of a newly approved plan to remove 200 wild horses from Utah rangelands this year." The Interior Department this week approved Utah BLM's request to "gather these horses in the face of mounting pressure from state and local officials concerned that overpopulation of wild horses is damaging a parched range and could

force ranchers to reduce cattle grazing levels." The bureau's "plan calls for rounding up 140 horses on the Blawn Wash herd area that overlies 26,000 acres overseen by the School and Institutional Trust Lands Administration (SITLA) west of Milford."

BLM ASKS PUBLIC NOT TO LOOK FOR DINOSAUR TRACKS AT RED ROCK CANYON. The AP (5/16, Brean) reports that researchers and Red Rock Canyon staff are trying to keep sites with dinosaur tracks "secret, at least until they can be cataloged and studied." However, "word may be leaking out, much to the dismay of those seeking to preserve the prehistoric prints." BLM officials would "prefer visitors not look for the secret sites." According to Mark Spencer, BLM field manager for Red Rock and Sloan Canyon National Conservation Areas, "for one thing, most of them are not on designated trails, and 'some of them are in very unsafe locations.'"

NEVADA RANCHERS FACE "STRONG-ARM TACTIC" BY BLM. For the Elko (NV) Daily Free Press (5/16, 22K), Randy Witte, a former publisher of Western Horseman Magazine, writes that the BLM is using "a strong-arm tactic to remove" the livestock of Nevada ranchers from the land. Witte notes that "many ranchers in Nevada have been told their grazing permits have been greatly reduced, but this spring the numbers were cut even more drastically, sometimes down to no grazing at all on certain BLM parcels." According to Witte, "three reasons were given: Ongoing recovery from drought, protection of the desert tortoise, and protection of the sage hen."

Fish and Wildlife Service:

FWS EASES TRAVEL RULES FOR INSTRUMENTS WITH IVORY. The New York Times (5/16, Mashberg, 9.65M) reports that "after weeks of pressure from musicians," the Obama Administration announced Thursday that "it has relaxed rules that would have made it extremely difficult for performers and orchestras to travel abroad with instruments that contained ivory parts." The revised regulation "allows musicians to travel with instruments containing ivory as long as they were lawfully acquired before Feb. 25, 2014, and were not obtained for sale." FWS officials said "the change came in response to industry criticism."

The Hill (5/16, Devaney, 237K) reports that FWS Director Dan Ashe said, "We know that for musicians their instruments are their livelihood." He said, "These revisions will make it easier for musicians to transport certain musical instruments internationally." Ashe added, "Our goal is to ease the burden on musicians traveling with instruments that contain ivory without diminishing the protection for African elephants."

Also reporting on the story are Bloomberg BusinessWeek (5/16, 4.91M), TIME (5/16, 24.1M), Reuters (5/16, Dunham), and the Lone Star Outdoor News (TX) (5/16).

FWS CONSIDERS REPEAL OF GRIZZLY PROTECTIONS. The AP (5/16, Baumann) reports that Montana Fish, Wildlife and Parks director Jeff Hagener said Thursday FWS officials will "seek to lift federal protections from some threatened grizzly bears in the Northern Rockies in the next two years." Hagener told lawmakers he expects the FWS to "propose rules that could remove two populations of grizzlies from the Endangered Species list." According to Hagener, "one rule could lift protections for bears in and around Yellowstone Park in 2015," and "the other rule ending protections would be for grizzlies in the Northern Continental Divide region by 2016."

Coverage by the AP was also picked up by the Washington Post (5/16, 4.22M), ABC News (5/16, 3.58M), the Sacramento (CA) Bee (5/15, 687K), Yahoo! (5/16, Baumann, 17.91M), and KAAL-TV Austin, MN (5/16, 1K).

FWS TO SURVEY ST. CLAIR RIVER FOR SEA LAMPREYS. The Detroit Free Press (5/16, Gross, 1.02M) reports that the FWS will be "surveying the St. Clair River from May 20 to June 26 to estimate the sea lamprey population in the river." Mike Twohey, a supervisory fish biologist at FWS offices in Marquette and Ludington, said, "We use a bottom toxicant called bayluscide. It's a chemical that we use in various forms to kill lampreys. In this formulation, it's a very small amount on a clay pellet that drops to the bottom of the river and does a very slow release." He added, "That irritates the larvae, and they swim up. We have boats on the surface, and when those lampreys reach the surface they collect them. That gives us an indication of how many and how old they are."

FWS TO HOLD HEARING ON PROPOSAL TO PROTECT RUFA RED KNOT. The Outer Banks (NC) Voice (5/15) reports that the FWS will "hold a third information session and public hearing — the second in North

Carolina — on a proposal to categorize the rufa red knot shorebird as 'threatened' under the federal Endangered Species Act." Rep. Walter B. Jones "had called for the additional hearing, which is scheduled for June 5 at the Alligator National Wildlife Refuge Visitor Center, 100 Conservation Way in Manteo."

OKLAHOMA ATTORNEY GENERAL DECRIES "SUE AND SETTLE" TACTICS. In an op-ed for the Washington Examiner (5/16, 335K), Scott Pruitt, Oklahoma's Attorney General, writes that "federal agencies are turning to a new scheme — 'sue and settle' — to further expand their reach and authority." He claims that "the sue and settle consent decrees usually bind the affected parties — states and industry — to stricter regulations and shorter timelines than those originally imposed by congressional laws." As a result, Oklahoma has filed a lawsuit against the Interior Department and FWS for "engaging in sue and settle tactics in reaching the consent decree." Pruitt asserts that his office, "along with the other state AGs involved in the lawsuit, will continue our vigorous pursuit of this lawsuit to hold the FWS and other federal agencies accountable for such unlawful tactics."

Securing America's Energy Future:

Onshore Energy Development:

BLM URGED TO ADOPT TOUGH RULE ON VENTING, FLARING. Politico (5/16, Guillén, 73K) reports that the BLM should "adopt a strong rule to scale back the venting and flaring of natural gas from activity on public lands, says a report out today from the Western Values Project, a relatively new group supported by the New Venture Fund." According to the article, "flared methane is becoming a major issue as gas development expands on and off public lands — and the WVP says that, besides the lost value of the gas flared off, taxpayers are missing out on tens of millions of dollars in royalties."

LAWSUIT ASKS COURT TO VOID MONTANA COAL LEASE. The AP (5/16) reports that "a conservation group is asking a federal judge to void a coal lease awarded to a central Montana mine" by the BLM. An attorney for the Northern Plains Resource Council claimed in Wednesday's lawsuit that "federal officials failed to consider the damage the underground mine is causing to surface landowners." According to the article, "ranchers operating above the mine have seen large fissures in the ground that they say is caused by coal removal."

COMMERCE OFFICIAL URGES FEDERAL GOVERNMENT TO CHANGE POLICY ON ENERGY DEVELOPMENT. The FuelFix (5/15, Eaton, 7K) reports that on Thursday at the Mayer Brown Global Energy Conference, Karen Harbert, CEO of the US Chamber of Commerce Institute for 21st Century Energy, said that the US will "need to produce as much oil and gas as it can muster to prepare for massive global demand growth over the next four decades." Harbert said "that's why the US government should stay out of the way of shale gas development and change its policies on federal land, where natural gas production has fallen 33 percent in recent years amid a nationwide boom on private and state lands."

Offshore Energy Development:

SEARCH BEGINS TO FIND SAND FOR NEW JERSEY BEACHES. The Shore (NJ) News Today (5/16) reports that New Jersey has signed an agreement with the BOEM "for a \$400,000 federally funded study to find sand resources offshore that can be tapped for future beach restoration and resiliency projects, a state official said in a statement on Monday, May 12." According to the article, "the research effort will analyze the state's existing data to locate sand resources in federal waters in the Outer Continental Shelf that can be used for coastal restoration projects in New Jersey." The article notes that "the effort includes a series of projects to be done over the next two years by the Army Corps of Engineers to help coastal communities recover from Hurricane Sandy, restore habitat, and contribute to long-term coastal resiliency."

Also reporting on the story is the Camden (NJ) Courier Post (5/15, 176K).

Tackling America's Water Challenges:

FRIANT WATER AUTHORITY UPSET OVER MILLERTON WATER RELEASES. The Fresno (CA) Business Journal (5/16, 160K) reports that the Friant Water Authority says "its getting the short end of the stick" as the

BOR "announced plans to release water from Millerton Lake to benefit wildlife refuges and junior contractors farther west instead of serving growers in the Fresno area." The Friant Water Authority, "which is still set at a zero water allocation, said the move doesn't make sense as the CVP has 200,000 acre-feet of water in San Luis Reservoir and increased storage in Shasta in which to substitute to the Exchange Contractors." Ronald Jacobsma, Friant Water Authority General Manager, said, "This doesn't need to happen. Despite the dry conditions, enough water is stored to meet the Exchange Contractors' supply needs, which in turn would make available a small amount of water for Friant's Class 1 contractors and prevent at least \$3 billion in economic losses from occurring in the citrus industry alone."

Also reporting on the story is the [Fresno \(CA\) Bee](#) (5/15, 352K).

COLORADO SENATORS PUSH FOR OPENING OF LAKE NIGHTHORSE. The [Durango \(CO\) Herald](#) (5/15, 28K) reports that "the frustration surrounding Lake Nighthorse found a fresh voice Thursday" as Sens. Mark Udall and Michael Bennet wrote to the BOR asking the bureau to "issue a plan for opening the reservoir for recreation soon." In the letter, they noted that "recreation on Lake Nighthorse could bring in up to \$12 million each year to local economy." BOR spokeswoman Justyn Hock said "they seem to be close to finalizing the agreements." The bureau "plans a public meeting in June to update residents on the negotiations."

HOUSE, SENATE TEAM RELEASES COMPROMISE WATER PROJECT BILL. The AP (5/16, Jackson) reports that on Thursday, House and Senate negotiators revealed "a compromise bill that authorizes billions of dollars for water projects over the next decade." The Water Resources Reform and Development Act was released a week after lawmakers "announced a tentative agreement on legislation that blends House and Senate versions of the bill." The bill "will authorize 34 projects in virtually every region of the country" which lawmakers "say it provides important investment in the nation's water infrastructure."

Empowering Native American Communities:

YAKAMA TRIBAL LEADER SAYS MORE FORESTRY FUNDING NEEDED ON INDIAN LANDS. The [Yakima \(WA\) Herald-Republic](#) (5/16, 86K) reports that "federal funding cuts pose dire consequence for the ability of tribes to manage their land and reduce wildfire risks," Phil Rigdon, the director of the Yakamas' natural resources program and president of the Intertribal Timber Council, told the Senate Committee on Indian Affairs Wednesday. Rigdon said that "programs that once kept tribal forests healthy are now 'running on fumes.'" Rigdon told the committee, "The consequences of chronic underfunding and understaffing are materializing. The situation is now reaching crisis proportions and it's placing our forests in great peril."

Top National News:

OBAMA SPEAKS AT DEDICATION OF NATIONAL SEPTEMBER 11 MEMORIAL AND MUSEUM. President Obama's remarks at the dedication of the National September 11 Memorial and Museum in Manhattan received a great deal of national media attention, including mentions on all three network newscasts Thursday evening. On NBC Nightly News (5/15, story 7, 3:20, 7.86M), Brian Williams reported that it had been "an emotional day in lower Manhattan as President Obama dedicated the National September 11 Museum, almost 13 years after the attacks that changed this country." Williams added that "after getting a private tour," the President "called it a place for all Americans alive today and generations yet to be born to learn the story of those lost and those who tried to save them."

Scott Pelley, on the CBS Evening News (5/15, story 7, 2:05, 5.08M), also reported that the President "helped open" the new museum, and showed him saying, "Those we lost live on in us, in the families who love them still, in the friends who remember them always, and in a nation that will honor them now and forever." On ABC World News (5/15, story 3, 2:10), Diane Sawyer said the President "reminded the nation that not even an act of terror can break us."

According to the New York Times (5/16, A22, Baker, Farrell, Subscription Publication, 9.65M), the President's speech "highlighted a somber ceremony at the new institution marking the worst foreign attack on American soil, one that shocked the world and ushered in a new era of fear, war, determination and clashes of values while redefining America's place in the world." The Times says the President did not "talk about the events that

followed that day, the wars he has tried to end and the policies he has reshaped but continued," and "instead...focused on the victims...and those who tried to save them."

The AP (5/16) reports that "victims' friends and relatives, rescue workers and 9/11 survivors descended into the space where the World Trade Center once stood and revisited the tragedy as" the President "dedicated" the museum "as a symbol that says of America: 'Nothing can ever break us.'" The AP notes that the President "retold the story of Welles Crowther, a 24-year-old World Trade Center worker who became known as 'the man in the red bandanna' after he led others to safety from one of the towers" before dying "in the tower's collapse."

The Washington Post (5/16, Wilson, 4.22M) says the President "delivered a parable about self-sacrifice." The Wall Street Journal (5/16, Maloney, Subscription Publication, 5.51M) quotes the President as saying, "I think all who come here will find it to be a profound, moving experience." In a post for the TIME (5/15, 24.1M) website, Zeke Miller writes that as the President spoke he was "flanked by the 'Last Column,' the makeshift memorial that was the final piece of rubble removed from the site and now stands in the museum alongside thousands of other artifacts."

Politico (5/15, Epstein, 73K) noted that the President "mentioned the visit he made to the site in May 2011, just days after Navy SEALs killed Osama bin Laden in Pakistan." Reuters (5/16, Rampton) reports that in reference to the raid, the President said, "our SEALs made sure that justice was done."

The New York Times (5/16, Subscription Publication, 9.65M), in an editorial, praises the President for having "wisely avoided the temptation to use the occasion to make political points or engage in overblown rhetoric, focusing instead on the stories of heroism and survival that are told throughout the cavernous underground museum."

The New York Daily News (5/16, Sandoval, Siemaszko, 4.36M) reports that former New York mayor Rudy Giuliani "introduc[ed] – to great applause – a group of firefighters and Port Authority officers who got trapped in the wreckage and somehow made it out alive." The Daily News also reports that former mayor Michael Bloomberg, "the memorial foundation's chairman, likened the museum to the Pearl Harbor Memorial and the battlefield at Gettysburg." According to Bloomberg News (5/16, Goldman, Runningen, 2.76M), Bloomberg "helped raise about \$450 million of the \$700 million combined cost of the memorial and museum from private sources."

The Long Island (NY) Press (5/16, Mian, 146K) reports that in addition to Giuliani and Bloomberg, the President "was also joined by Gov. Andrew Cuomo, New Jersey Gov. Chris Christie...plus other dignitaries." According to the AP (5/16, Lemire, Peltz), Gov. Christie was scheduled to speak before a performance of the song "Bridge Over Troubled Waters," but "a last-minute change avoided what could have been an uncomfortable moment," although, according to the AP, a "spokesman said the change had nothing to do with Christie or the song."

The Newark (NJ) Star-Ledger (5/16, Strunsky, 653K) reports that former President Clinton and former Secretary of State Hillary Clinton "attended the ceremony but did not speak," while "one of the dedication's last speakers was Donald DiFrancesco, whose brief tenure as New Jersey's acting governor was marked by the trade center attack."

According to Newsday (5/16, Chayes, Ngo, 1.5M), the museum, "with a cost that exceeds a billion dollars, is opening after years of delays fueled by disputes over funding, the final resting place of the unidentified remains, admission fees and which entity should maintain control." The Los Angeles Times (5/16, Susman, Hennessey, 3.46M) says the development of the museum "was slowed by disputes that underscored the challenge of bringing together victims' families, politicians, civil leaders, and developers in a project that seeks to combine solemn remembrance with a harsh history lesson."

The Christian Science Monitor (5/16, Bruinius, 566K) reports that following Thursday's ceremony there is "a week-long 'dedication period' for all 9/11 families, including survivors, rescue and recovery workers, and lower Manhattan residents and business owners – who will never have to pay a fee."

SHINSEKI FACES TOUGH QUESTIONS FROM SENATE PANEL OVER VA HEALTHCARE. Coverage of the four-hour Senate Veterans' Affairs Committee hearing on the state of healthcare at VA facilities is widespread and largely negative toward VA Secretary Shinseki, who is portrayed as on the defensive against angry questions

from both Republicans and Democrats. All three broadcast networks covered the hearing with a combined 7 1/2 minutes of coverage. While Senate Veterans' Affairs Chairman Bernie Sanders warned against a "rush to judgment," several senators asked Shinseki why he and other top VA officials should remain on the job.

ABC World News (5/15, story 4, 1:40, Sawyer) reported on what it called "the outrageous treatment of veterans at some VA hospitals." Shinseki "appeared before Congress fighting to keep his job, telling a Senate panel he is, quote, 'mad as hell.'" ABC (Avila) added, "Gen. Eric Shinseki, a wounded Vietnam veteran himself, has been under fire before but today on Capitol Hill it was his reputation, not his life on the line." Sen. Dean Heller: "Would you explain to me why you should not resign?"

The CBS Evening News (5/15, story 3, 2:25, Pelley, 5.08M) called it an "important story." CBS (Andrews) added that Shinseki "faced dozens of tough questions, but his answers came down to this one: There are two formal investigations under way, he said, and no one wants the results more than he does." Shinseki: "Any adverse incident like this makes me mad as hell. I am committed to taking all actions necessary and to strengthen veterans' trusts in VA healthcare." Andrews: "The VA is facing multiple allegations that local officials are covered up reports of veterans waiting months for healthcare."

NBC Nightly News (5/15, story 4, 3:30, Williams, 7.86M) called Shinseki "a decorated combat veteran, a retired four-star army general who has faced hostile enemy fire in his lifetime," who on Thursday faced "hostile questions from Congress" over "a scandal having to do with how we treat our returning veterans and what appears to have been preventable deaths at this nation's VA hospitals." NBC (Miklaszewski) added that "Shinseki suggested again today that he has no intention of resigning, but political pressure is building here for serious changes at the VA. ... Shinseki played down the scope of the scandal." Sanders: "Are people quote, unquote, cooking the books?" Shinseki: "I'm not aware, other than a number of isolated cases where there is evidence of that."

The New York Times (5/16, A16, Oppel, Williams, Subscription Publication, 9.65M) says Shinseki said he was "aware of only isolated evidence that faked or off-the-books lists were created to cloak long delays that some veterans have faced to see doctors." In his opening remarks, Sanders "said the allegations were very serious. But he added, 'If we are going to do our jobs in a proper and responsible way, we need to get the facts and not rush to judgment.'" But ranking Republican Sen. Richard Burr "told Mr. Shinseki that 'VA leadership either failed to connect the dots, or failed to address this ongoing crisis.'"

Roll Call (5/15, Lesniewski, Subscription Publication, 76K) said Shinseki "faced a barrage of bipartisan outrage." In the Washington Post (5/16, 4.22M) "Federal Diary," Joe Davidson writes that Sen. Patty Murray's "anger could be heard in her voice." She said, "I am very frustrated to be here, once again, talking about some deeply disturbing issues and allegations. It's extremely disappointing that the department has repeatedly failed to address wait times for healthcare."

The Washington Post (5/16, Jaffe, Hicks, 4.22M) reports Shinseki "vowed to remain in office until he meets his goals for improving the department's performance or until President Obama tells him it is time to go," and said the VA inspector general must be allowed to complete a review. The Wall Street Journal (5/16, Kesling, Subscription Publication, 5.51M) reports Shinseki also said VA healthcare is "a good system" and that it has improved during his tenure.

The Los Angeles Times (5/16, Mascaro, 3.46M) says the inquiry into whether a VA facility in Phoenix "falsified government records to hide excessive wait times has broadened to include several other veterans centers nationwide." The VA's acting inspector general "testified that a preliminary review of 17 patient deaths associated with the Arizona center had not shown they were caused by delays in receiving treatment." Josh Hicks writes a question-and-answer piece on the issues involved for the Washington Post (5/16, 4.22M), saying that Sanders said "similar scandals have surfaced in at least 10 states, based on evidence provided by the American Legion," and that Shinseki "has placed three of the Phoenix hospital's executives on administrative leave."

Reuters (5/16, Lawder) also has a report.

CNN's Tapper Asked McDonough: "How Many Dead Veterans Do You Need?" The Washington Times (5/16, Ernst, 455K) reports that after White House Chief of Staff McDonough told him that the Obama Administration has increased funding for the VA each year, CNN's Jake Tapper asked him, "How many dead veterans do you

need before somebody asks the question within the White House, 'Maybe this isn't the best steward of these veterans?'" McDonough replied, "The question Jake, is, are we doing everything we can every day to get the veterans the care and opportunities they deserve?" Tapper replied, "But you're not!" Politico (5/15, Topaz, 73K) reported that the "testy exchange took place hours after" Shinseki testified.

More Commentary. USA Today (5/16, 5.82M) editorializes, "For VA leaders – including Shinseki, who has been on the job since 2009 – these problems should come as no shock. In April 2010, an internal VA inquiry found systematic "gaming strategies" at regional clinics to hide delays. The report cited about two dozen gaming techniques, some involving falsifying records. ... To save his job," Shinseki will "need to act more decisively than he has if the needless parade of negligence and death is to be stopped."

In a USA Today (5/16, 5.82M) op-ed, VA Under Secretary for Health Robert Petzel writes, "We take any allegations about patient care or employee misconduct very seriously, and I am personally saddened by any adverse consequence that a veteran might experience while in, or as a result of, our care." Shinseki "has directed VA to complete a nationwide audit of patient access, in order to ensure the integrity of our scheduling practices and management of patient access to care."

Darin Selnick, a member of the Concerned Veterans for America's organizing committee and a special assistant to the VA secretary during the Bush Administration, writes in a USA Today (5/16, 5.82M) op-ed that though Shinseki "says he has no intention of resigning," if he stays, he "needs to do much more to alleviate the growing concerns about the VA's ability to serve veterans." Selnick suggests a visit to the Phoenix VA center, a restoration of "integrity to VA recordkeeping," an investigation of VA hospitals using an outside special counsel, and pressing for passage of the VA Management Accountability Act. Selnick also says Shinseki should "order" Petzel to resign.

KERRY SUBPOENAED TO TESTIFY ABOUT STATE'S COOPERATION WITH BENGHAZI PROBE. The AP (5/16, Cassata) reports that House Oversight and Government Reform Chairman Darrell Issa "issued a new subpoena" for Secretary of State Kerry "to testify about the deadly 2012 attack in Benghazi in an escalating fight with the Obama administration over its cooperation with Congress." Kerry is to testify before Issa's panel on May 29. According to the AP, Issa "said he had no choice as the State Department had failed to negotiate in good faith on an appropriate date for Kerry to testify" after Issa "lifted a subpoena for a May 21 appearance amid ongoing discussions between the panel and the department."

Reuters (5/16, Comwell) reports that State Department spokeswoman Marie Harf said, "This is not the way legitimate and responsible oversight is conducted," but, in a statement released on Thursday Issa stated flatly that "absent an assertion of executive privilege, the State Department has a legal obligation to fully and completely comply."

Politico (5/15, French, 73K) said Rep. Elijah Cummings, the Oversight Committee's top Democrat, "dismissed the subpoena is irrelevant." The Washington Times (5/16, Sherfinski, 455K) reports that House Minority Leader Pelosi said the new subpoena for Kerry "calls into question Republicans' stated purpose of the select committee" that was recently established to probe the Administration's handling of the terror attacks, "and signifies a mutual lack of confidence between the committee and Mr. Issa."

Gowdy Picks Staff Director For Benghazi Select Committee. Politico (5/15, French, Sherman, 73K) reported that also on Thursday, Rep. Trey Gowdy, the Benghazi select committee's chairman, "selected Smith-Free Group vice chairman Phil Kiko to be the majority staff director for the committee."

GOP Senators Ask Reid To Establish Benghazi Select Committee. Politico (5/15, French, 73K) reported that 37 Senate Republicans are urging Senate Majority Leader Reid to create a Benghazi select committee, although Reid "has previously said he has no plans to establish a select committee in the Senate – noting that the Senate Select Committee on Intelligence completed an investigation that was largely hailed as bipartisan."

Condoleezza Rice: "There Are Still Unanswered Questions About Benghazi." The Daily Caller (5/15, Weinstein, 408K) reported that former Secretary of State Condoleezza Rice "is among those who believe that there are legitimate questions that have not yet been answered about the 2012 Benghazi attack." The Daily Caller quotes Rice as saying, during a radio interview, "I think there are still unanswered questions about Benghazi. ... I

don't think people feel that we know fully what happened in that period during the attack. I don't think people know fully what the security situation was on the ground prior to the attack."

Editorial Wrap-Up:

NEW YORK TIMES. "Searching For Fairness On The Internet." In an editorial, the New York Times (5/16, Board, Subscription Publication, 9.65M) criticizes FCC Chairman Tom Wheeler's net neutrality proposal. It says that while it is "more balanced" than an earlier approach, the FCC "still seems to be leaning toward creating a two-tiered system that could discriminate against smaller companies and restrict consumer choice."

"A Once-A-Day Pill To Prevent AIDS." The New York Times (5/16, Subscription Publication, 9.65M) says in an editorial that while the antiviral drug Truvada "could help reduce the stubbornly high number of infections" linked to AIDS, the pill also "carries risks." But "the potential benefits of preventing infections outweigh" them. The Times says the proper introduction of Truvada, "if carried out with care, could be a big step forward in curbing the toll from AIDS."

"Force Feedings At Guantanamo." The New York Times (5/16, Subscription Publication, 9.65M) editorializes that a lawsuit brought by a Guantánamo detainee "produced news that the military has apparently been videotaping its force-feedings of prisoners who have been attempting a hunger strike to protest their confinement and treatment." The disclosure "is important because a federal appeals court in the District of Columbia decided in February that while it would not initially block the force-feedings (in which prisoners are restrained and fed by a tube through the nose), it would retain jurisdiction and hear prisoners' complaints of inhumane treatment as part of a habeas corpus lawsuit." The Times argues that this "could prove to be one of the more promising avenues in the struggle to expose the woeful situation at Guantánamo to greater public attention." The Times urges the court to "issue an emergency order to prevent the government from destroying any existing video recordings of the force-feedings."

"The Man In A Red Bandanna." The New York Times (5/16, Subscription Publication, 9.65M), in an editorial, praises the President for having "wisely avoided the temptation to use" the dedication of the National September 11 Memorial and Museum "to make political points or engage in overblown rhetoric, focusing instead on the stories of heroism and survival that are told throughout the cavernous underground museum."

WASHINGTON POST. "Mr. Obama's Inaction On Syria." The Washington Post (5/16, 4.22M) editorializes that the Obama Administration's "principal achievement" in an overall "failed response" to the Syrian civil war "is eroding." According to the Post, despite the upcoming deadline for the Syrian government to surrender its chemical weapons, "the regime not only retains a substantial stockpile but also has returned to" using the weapons on civilians. The Post says Assad is "being allowed to disregard" his pledge to give up the chemicals, because President Obama "chooses to do nothing."

"Forcing Google To 'Forget'." In an editorial, the Washington Post (5/16, 4.22M) argues that the European Court of Justice's ruling that individuals can demand that Google remove certain links "could easily damage the flow of information on which the Internet depends." Noting that it is "dangerous when any government demands that legitimately published material on the public record be obscured, whether to protect individuals' feelings or the reputations of those in high office," the Post says European governments implementing the decision "should give more weight to the public's interest in the free flow of information than the judges did."

"Voyage Of Despair." An editorial in the Washington Post (5/16, 4.22M) cites a Reuters investigation which found that the Thai navy has played a role in handing over Rohingya Muslims "fleeing persecution and economic deprivation in Burma," to human smugglers, "who demand money from families for onward passage." The Post criticizes Thailand because instead of "seeking to rectify the situation, the Royal Navy has denied mistreating the refugees and decided to intimidate the messenger." The Post calls it "a sad case of Thailand's navy attempting to extinguish reporting rather than the misery that the reporting exposed," which is "doubly wrong because it attempts to hide the shameful treatment of a people, the Rohingya, who are already suffering far too much."

WALL STREET JOURNAL. "The Internet's 51 New Regulators." In an editorial, the Wall Street Journal (5/16, Subscription Publication, 5.51M) writes that one of the GOP FCC commissioners argues that the biggest flaw

with the commission's net neutrality plan is that it will allow each state to make its own rules. The Journal also takes issue with consumer advocates that seek to have the FCC regulate ISPs like telecommunications firms, saying that such a move would result in far fewer Internet networks and a harder time for startups.

"Putin's European Enablers." The Wall Street Journal (5/16, Subscription Publication, 5.51M) editorializes that while the US is rightly objecting to France's intentions to sell Russia's navy amphibious assault ships, other European countries also want to conduct regular business with Russia.

"Free Speech Movement." The Wall Street Journal (5/16, Subscription Publication, 5.51M) editorializes in support of a Federal court ruling this week that found much of Wisconsin's campaign finance law unconstitutional.

Washington Schedule:

TODAY'S EVENTS IN WASHINGTON.

White House:

PRESIDENT OBAMA – With the Vice President, receives the Presidential Daily Briefing, Oval Office, closed press; with the Vice President, meets with Secretary of the Treasury Lew, Oval Office, closed press. Notes: Press Briefing by Press Secretary Jay Carney.

VICE PRESIDENT BIDEN – The Vice President will deliver remarks on the Administrations job-driven training agenda at the National STEM Summit of Change the Equation, a non-profit dedicated to mobilizing the business community to improve K-12 education in Science, Technology, Engineering, and Mathematics (STEM). The Vice President's remarks at this event are open press. In the afternoon, the President and the Vice President will meet with Secretary of the Treasury Lew in the Oval Office. The Vice President will ceremonially swear-in Terrell McSweeney as a Commissioner of the Federal Trade Commission at the White House. This event is closed press.

MICHELLE OBAMA – The First Lady will deliver remarks at a "Senior Recognition Day" to celebrate seniors from high schools in the Topeka, KS Public School District. This will take place the day before each high school holds their official graduation ceremony. Highlights: First Lady Michelle Obama will travel to Topeka, KS, where she will meet with high school students participating in the Wichita State University GEAR UP program as part of her Reach Higher initiative. First Lady Michelle Obama will deliver remarks at a "Senior Recognition Day" to celebrate seniors from high schools in the Topeka, KS Public School District.

DR. JILL BIDEN – Dr. Biden will address graduates at Villanova University's 171st commencement.

US Senate: No Scheduled Events.

US House: May 12 – 16. – The House is in District work period for the week.

Other: **NATIONAL POLICE WEEK** – May 11 – 17. The National Law Enforcement Officers Memorial Fund's National Police Week, paying special recognition to those law enforcement officers who have lost their lives in the line of duty for the safety and protection of others. Contacts: Steve Groeninger, steve@nleomf.org, 202-737-7135

CICAD OF THE OAS MEETING – May 14 – 16. Group of Experts in Demand Reduction of the CICAD of the OAS Meets in Washington The fifteenth meeting of the Group of Experts in Demand Reduction of the Inter-American Drug Abuse Commission (CICAD) of the Organization of American States (OAS) will be held in Washington, DC from May 14 to 16, chaired by the National Anti-Drug Secretariat (SENAD) in representation of the Government of Brasil. Location: Organization of American States, 1889 F Street, NW. Contacts: 202-370-5437

HEALTH INSURANCE EXCHANGE SUMMIT – May 14 – 16. 2014 National Health Insurance Exchange Summit. Contacts: registration@hcconferences.com (800-503-9528).

U.S. BLACK CHAMBERS – NATIONAL SMALL BUSINESS WEEK – May 15 – 16. Small business match making meeting are being held around the country in honor of National Small Business Week. D.C. meetings are May 15th, 16th. Contacts: aditi.dussault@sba.gov.

U.S. CHAMBER, SBA – SMALL BUSINESS WEEK – May 15 – 16. Open events. MEDIA RSVP: By 4 p.m. Wednesday, May 14 please provide name of organization, list of attendees, email, phone number, and date(s) you plan to attend and time of arrival to Terrence. Sutherland@sba.gov. Please ensure you have your media credentials at check-in. Highlights: 1:30 p.m. – 1:35 p.m. Exporter of the Year Award. Location: FRIDAY: FHI 360 Conference Center, 1825 Connecticut Ave., NW, 8(th) Floor., THURSDAY: U.S. Chamber of Commerce, 1615 H St NW. Contacts: Terrence.sutherland@sba.gov.

GEORGETOWN COMMENCEMENT – LEW, GATES – May 15 – 18. Former Secretary of Defense Robert Gates and Secretary of the Treasury Jacob J. Lew are among those scheduled to speak at Georgetown University's 2014 Commencement May 15-18. Georgetown holds individual graduation ceremonies for each undergraduate and professional school as well as award celebrations on campus, beginning with Senior Convocation and the McCourt School of Public Policy commencement ceremony on May 15. The Georgetown College Commencement Ceremony is the largest undergraduate ceremony, with more than 800 students graduating at 9:00am on Saturday, May 17 on Healy Lawn. Guy Consolmagno, S.J., astronomer for the Vatican, is the speaker for the ceremony and will receive a Doctor of Humane Letters, honoris causa. All ceremonies will be webcast live at georgetown.edu/hoyas2014. Contacts: Maggie Moore mem95@georgetown.edu (202.687.4328, 202.687.8992). Notes: Media interested in attending must RSVP to Maggie Moore at mem95@georgetown.edu. Press will need to present valid credentials on campus.

TEA PARTY – OPERATION AMERICAN SPRING – The Tea Party and Col. Harry Riley have announced they are hosting an Operation American Spring in Washington, DC Friday, May 16th to "oust Obama, Biden, Boehner, Holder". Press releases indicate "millions" of militias will "descend" upon Washington. No further details were given. Information is listed as an FYI should an event occur. One press release also indicated there were would be a "fax" blast of members on Capitol Hill. There have been no further response to email or phone queries. Target. Washington. DC. Location: Tea Party Headquarters: Ronald Reagan Building, 1300 Pennsylvania Avenue 190. Contacts: 714-796-1776 (contact@teaparty.org). Notes: NOTE – THIS IS LISTED ONLY AS AN FYI. NO TIME, LOCATION OR PERSON OF CONTACT HAVE BEEN GIVEN BY "ORGANIZERS".

TODAY IS BIKE TO WORK DAY – FOXX, LUSHNIAK, TANGHERLINI – National Bike to Work day. Events include a bike to work ride with the Secretary of Transportation Anthony Foxx, U.S. Department of Transportation Secretary, Anthony Foxx; Rear Admiral and Acting U.S. Surgeon General, Boris Lushniak; U.S. General Services Administration Administrator, Dan Tangherlini; D.C. Mayor, Vincent Gray; others at numerous pit stops. In addition: AAA Mid-Atlantic will be staffing a table at Friendship Heights. On May 16, cyclists can stop by the location at the intersection of Wisconsin & Western Avenues, between 6:30 a.m. and 9 a.m. Contacts: Jeanette de Gomez 202-481-6820. John Townsend 202-481-6820. Lon Anderson 202-481-6820. Matt Kroneberger (202-962-3209, 310-525-6530).

HUMAN RIGHTS VIOLATIONS IN SYRIA – 10 a.m. – 3:30 p.m. The Center for Victims of Torture hosts a group of experts to discuss the short and long term consequences of the egregious violations of human rights being committed in Syria, as well as steps that can be taken to document, account for and eventually seek justice for crimes committed on all sides of the conflict.. Panel I: Human Rights Violations and Their Consequences (10:00AM – 12:00PM); Simone van der Kaaden, Jordan Country Director, The Center for Victims of Torture; Erin Gallagher, Director of Emergency Investigations and Response, Physicians for Human Rights; Mark Engman, Director, Public Policy and Advocacy, U.S. Fund for UNICEF; Michelle Strucke, Public Affairs Manager, Islamic Relief USA (moderator). Lunch & Keynote: Stephen J. Rapp, Ambassador-at-Large for War Crimes Issues, U.S. Department of State (invited) (12:15 – 1:30PM). Panel II: Documentation and Accountability (1:45 – 3:30PM) – Jeff S. Howell Jr., Chief of Staff, Syrian Accountability Project; Elizabeth "Barry" White, Research Director of the Center for the Prevention of Genocide, U.S. Holocaust Memorial Museum; Mohammad Al Abdallah, Executive Director, Syrian Justice and Accountability Centre; Joe Stork, Deputy Director Middle East and North Africa Division, Human Rights Watch (moderator). Location: 1730 Pennsylvania Avenue, NW, 7th Floor. Contacts: Brad

Robideau 612.436.4886 (.651.808.7178 cell). Notes: To join via conference call, dial: 1-800-747-5150 Access code: 7215682

U.S. CHAMBER – IFC, RIO TINTO, ONE CAMPAIGN – 8 a.m. – 9:30 a.m. The U.S. Chamber of Commerce along with the International Finance Corporation (IFC), the private sector arm of the World Bank Group; Rio Tinto; and the ONE Campaign will host, "Infrastructure Week Goes Global" to explore ways in which infrastructure investment in developing countries can spur economic growth. The event is part of Infrastructure Week 2014, a series of events focusing on the critical need to modernize the country's aging infrastructure. Speakers: Sam Walsh AO, Chief Executive, Rio Tinto; Jin-Yong Cai, Executive Vice President and CEO, International Finance Corporation; Fred Hochberg, Chairman, U.S. Export-Import Bank; Mary Andringa, CEO, Vermeer; Michael Elliott, President and CEO, ONE Campaign. Location: IFC Auditorium, 2121 Pennsylvania Avenue, NW. Notes: Credentialed members of the media must register by e-mailing press@uschamber.com or calling 202-463-5682.

CAP – SECURITY THREATS – CHINA – 10 a.m. – 11:30 a.m. Climate Change, Migration, and Nontraditional Security Threats in China. Speakers: Dr. Markus Ederer, State Secretary, German Foreign Ministry and former Ambassador of the European Union in Beijing; Sherm W. Goodman, Senior Vice President and Executive Director, CNA Military Advisory Board, CNA Corporation; Lauren Reed, Government Affairs Senior Analyst, Qualcomm, Inc. Moderator: Michael Werz, Senior Fellow, Center for American Progress. Location: Center for American Progress, 1333 H St. NW, 10th Floor.

AICPA PARTNERSHIP TAX PANEL MEETING – 11 a.m. – 4:30 p.m. Three U.S. Department of Treasury and Internal Revenue Service (IRS) officials are scheduled to speak at a meeting of the American Institute of CPAs (AICPA) Partnership Tax Technical Resource Panel. Speakers: 11 – 11:45 a.m.: Curt G. Wilson, Associate Chief Counsel, Passthroughs and Special Industries, IRS; Donna Young, Deputy Associate Chief Counsel, Passthroughs and Special Industries, IRS. 4 – 4:30 p.m.: Craig Gerson, Attorney-Advisor, Office of Tax Policy, Department of the Treasury. Location: AICPA office at 1455 Pennsylvania Avenue, N.W. Contacts: Shirley Twillman stwillman@aicpa.org (202.434.9220)

BROWN V. BOARD OF EDUCATION – HOLDER – 11:30 a.m. NAACP Legal Defense and Educational Fund, Inc. (LDF) hosts luncheon commemorating the 60th anniversary of Brown v. Board of Education with remarks by the Honorable Eric H. Holder, JR. Attorney General of the United States. The lecture will also feature a conversation with the Honorable Deval Patrick, Governor of Massachusetts and the Honorable L. Douglas Wilder Former Governor of Virginia, moderated by award winning journalist, Charalayne Hunter-Gault. NOTE: All media must present government-issued photo I.D. (such as a drivers license) as well as valid media credentials. Press inquiries regarding logistics should be directed to the Office of Public Affairs at 202-514-2007. Location: National Press Club, 529 14th Street, N.W. Contacts: RSVP to abraham@sunshinesachs.com

AMBASSADORS LUNCHEON FORUM – 12 p.m. – 2 p.m. Potomac Institute for Policy hosts Ambassadors Luncheon Forum "Diplomacy and Force: Rewards, Costs, and Lessons." Opening Remarks: Professor Robert F. Turner Associate Director, Center for National Security Law, University of Virginia School of Law. Moderator: Professor Yonah Alexander Director, Inter-University Center for Terrorism Studies, and Senior Fellow, Potomac Institute for Policy Studies. Forum: Ambassador (Ret.) Temuri Yakobashvili, Former Ambassador of Georgia to the United States and currently Senior Transatlantic Fellow at the German Marshall Fund of the United States; Ambassador (Ret.) Al Maamoun Baba Lamine Keita, Former Ambassador of the Republic of Mali to the United States. Closing Remarks: Lieutenant-Colonel Sebastien Chenebeau The French Liaison Officer at Joint Staff J7; Colonel (Ret.) Timothy G. Murphy, Former Senior staff member USAF and State Department and currently President of En Avant Consulting. Location: The Potomac Institute for Policy Studies, 901 N. Stuart Street, Suite 200, Arlington, VA 22203. Contacts: 703-562-4522 (icts@potomacinstitute.org)

ALLIANCE FOR HEALTH REFORM – 12:15 p.m. Briefing: Health Centers at the Launch of the Coverage Expansion. This briefing will reveal new findings from The Commonwealth Fund's 2013 Survey of Federally Qualified Health Centers, examine perceptions and realities of health center capacity to ensure access to newly-insured and still-uninsured patients, and highlight "system improvements health centers have made to improve outcomes and efficiency at lower costs". Speakers: Leighton Ku, director of the Center for Health Policy Research at George Washington University, will discuss health center capacity in light of recent coverage expansions and highlight lessons learned about the capacity and fiscal health of health centers after the

Massachusetts coverage expansion; Vernita Todd, chief executive officer of Heart City Health Center in Elkhart, Indiana, will share an on-the-ground perspective on the center's efforts to leverage Federal investments and implement delivery system innovations to improve patient access to high-quality care; Brooks Miller, president of the Jordan Valley Health Center in Springfield, Missouri, will discuss the status of the coverage expansion with respect to Missouri health centers and highlight strategies to forge new partnerships with health systems and payers; Michelle Proser, director of research at the National Association for Community Health Centers, will highlight national research and data analysis that will answer critical questions on health centers and the populations they serve. Ed Howard of the Alliance and Melinda Abrams of Commonwealth will co-moderate. Contact: Sarah Dash (202)789-2300 sarahdash@allhealth.org. Location: G50 Dirksen. Contacts: (202) 789-2300 (info@allhealth.org).

Last Laughs:

LATE NIGHT POLITICAL HUMOR.

David Letterman: "President Obama was here yesterday, ladies and gentlemen. ... He was touring New York sites in desperate need of repair. You know, he wants to spend money on the infrastructure of the United States. So he was going around New York City showing people – well this needs fixing. For example, Port Authority needs fixing. Where the buses and the trains and everything – that needs fixing. Penn Station, same thing. That needs a little help over there. Also in big, big structural trouble, the Knicks. He wants to fix them."

David Letterman: "He went up to the Hudson, up to the Tappan Zee Bridge, which is beautiful. ... And the Tappan Zee Bridge – the renovation is finishing up way ahead of schedule, like Obama's second term."

Stephen Colbert: [Referring to news of Vladimir Putin playing hockey] "Ladies and gentlemen, I have to say right off the bat, I know this is not going to come to any surprise to all you heroes out there, but I've had it up to here with Russia. Vladimir Putin has been out-masculating Barack Obama at every turn. It's like Obama is playing checkers, and Putin is also playing checkers, but is doing it shirtless while riding a horse."

Stephen Colbert: [Referring to news of Russia cutting off US access to the International Space Station] "Russia – our space boyfriends – broke up with us. And, of course, the worst part of every breakup is canceling the trip you had planned for six years from now. This is so awkward, because right now Russian and American astronauts are up there together. We're still living together in the same place. Now it's going to be all weird bumping into each other when we need to use the waste vent."

Stephen Colbert: [Referring to Karl Rove's comments on Hillary Clinton] "Nation, this is a serious scandal because Rove's conjecture is based on soiled facts. Hillary Clinton did go to the hospital after a concussion in 2012, and she later exhibited some very strange behavior in her Benghazi testimony. She had a mastery of the facts and an unshakable confidence, all while wearing those stupid glasses. I mean, they're like – these things are like orthopedic shoes for your face. You'd have to be brain damaged to wear those, or nearsighted, which I believe is caused by brain damage."

Stephen Colbert: "All Karl Rove is saying, is that Hillary is a public figure and we should be worried about her brain. Folks, there is another public figure who worries me even more – Karl Rove. Because he said that Hillary spent 30 days in the hospital when in fact she was there for only three days. Has Karl Rove lost track of time because he has a serious brain injury? I'm just asking the question. I mean, for some reason, he is protecting his skull with a thick cushion of meat."

Jimmy Fallon: "Yesterday, Chris Christie said that he thinks it would be fun to run against Jeb Bush for the Republican presidential nomination. While Jeb Bush said it would be fun just to watch Chris Christie run."

Seth Meyers: "Today, President Obama took his 1,001st flight aboard Air Force One and they still made him take his shoes off at security. Why? What's he going to have in his shoes? He's the President."

Subject: Greater Sage Grouse -- 2013 Montana Survey

This is a bit discouraging. Not the hunting closure, because not that many people hunt sage grouse, but the population data that led to the decision. Particularly, the long-term trend, and the trend since our 2010 "warranted" finding.

FWP To Seek Sage Grouse Hunt Closure Due To Continued Population Decline

With preliminary results from Montana's spring surveys showing a continued population decline of the state's largest native upland game bird, wildlife officials will seek to close sage grouse hunting for the 2014 season.

Montana Fish, Wildlife & Parks will propose the season closure at the Fish & Wildlife Commission meeting in Fort Peck, Thursday, May 22.

Jeff Hagener, FWP director in Helena, said state biologists counted an average of 14.9 males per sage grouse strutting ground, or lek, last year and noted that preliminary indications show little or no improvement this year. Last year's count was the lowest recorded since 1980. Montana's long term lek-count trend is about 30 males per lek on about 90 pre-selected sage grouse strutting grounds.

"Last year's counts dropped to 48 percent below the long term average," Hagener said. "Our preliminary 2014 numbers show no improvement across all three of Montana's sage grouse management zones."

Here's a rundown on Montana's sage grouse lek surveys as they compare to the long term average since 2008:

- 2013: 14.9 males per lek; or a 48 percent below long term average
- 2012: 19.1 males per lek; or a 34 percent below LTA
- 2011: 19.2 males per lek; or a 34 percent below LTA

- 2010: 20.5 males per lek; or a 31 percent below LTA
- 2009: 23.3 males per lek; or a 23 percent below LTA
- 2008: 22.9 males per lek; or a 24 percent below LTA

Similar declines are being recorded in North Dakota where sage grouse hunting has been closed for the past several seasons. Final Montana counts for 2014 will be complete by the end of May and will be available for commission review at its July meeting.

For the past 10 years, the "Management Plan and Conservation Strategies for Sage Grouse in Montana" has guided sage grouse management decisions. The plan requires a hunting season closure when lek counts are at least 45 percent below the long term average for three consecutive years.

Based on this spring's field observations, however, FWP will seek to close the sage grouse season for 2014 due to the uninterrupted downward trend in sage grouse populations that began in 2010 and the broad range wide scale of low numbers.

"Based on the declines FWP biologists are documenting on the ground, FWP recommends that the most responsible course of action at this time, which is consistent with FWP's management plan, is to remove hunter-harvest mortality," Hager said.

The sage grouse, North America's largest grouse, is best known for its distinctive spring mating rituals on breeding grounds called 'leks.' Sage grouse are a long-lived species with low reproductive yields, which makes population recovery slow. Biologists estimate that sage grouse once could be found in 13 western states and three Canadian provinces. Today, sage grouse are found in 11 states and in southern Alberta and Saskatchewan. The native prairie bird's remaining strongholds are in Montana, Wyoming, Idaho, Nevada, and Oregon.

Subject: Fwd: "What's good for the bird is good for the herd."

Okay, yesterday, I sent the rather disheartening population survey news from Montana. Well, now some good news. The story below relates to a county-wide CCAA, for Harney County, OR, in the heart of one of the remaining sage grouse strongholds. 39 ranchers, controlling more than 250,000 acres have committed to sign up, and more are expected.

It's heartening to hear a rancher talking about "agency folks" (FWS employees) who "get it." Our Oregon field office ROCKS!! And of course, this is all outgrowth of our partnership with USDA/NRCS, and their Sage Grouse Initiative. It would not be possible without their commitment and leadership. Similar efforts are underway in all of the Oregon Counties within the GSG range.

And you gotta love the punch line: **"What's good for the bird is good for the herd!"**

Dan Ashe

Director, U.S. Fish and Wildlife Service

Capital Press

Ranchers agree to conserve sage grouse habitat

Harney County cattle ranchers, working through the local Soil and Water Conservation District, will sign an agreement this week that protects greater sage grouse habitat on up to 1 million acres of private rangeland.

In return for agreeing to make some management changes, landowners will be safe from further federal regulation for 30 years, even if the bird is listed as an endangered species next year.

Ranchers, federal regulators and the local soil and water district acknowledge the voluntary agreement, which will be signed Wednesday at Hotel Diamond south of Burns, is a leap of faith. The greater sage grouse, now a "candidate" for protection under the Endangered Species Act, has been called "farmers' and ranchers' spotted owl" because its listing potentially would have tremendous impact on cattle grazing and other operations in 11 western states.

Faced with that, rural producers have turned to collaborative efforts that provide habitat protection for the bird while giving them assurance they'll be able to continue operating as usual. Similar agreements have been signed recently in Idaho and Wyoming.

The Harney County agreement followed three years of negotiations, and ranchers entered the discussions with a "natural skepticism," said Burns rancher Tom Sharp, who chaired the local committee.

"We began the dance very slowly," Sharp said.

Within a few months, however, a sense of trust and common purpose emerged, he said.

"What we found as we engaged, we found the agency folks — they got it," Sharp said. "They realized the stakes were high on this."

Marty Suter-Goold, manager of the Harney County Soil and Water Conservation District, called the agreement "monumental." She said 39 ranchers representing 250,000 acres have already indicated they want to take part, and half a dozen other Eastern Oregon counties have asked for information about the project.

"Landowners wanted this to happen and stayed with us all the way through the process," she said.

Under the agreement, formally called a Candidate Conservation Agreement with Assurances (CCAA), ranchers agree to manage their lands to reduce threats to greater sage grouse. The work will include such things as removing juniper or invasive grasses, putting reflective material on the top strand of fences to reduce bird strikes, and putting "escape ladders" in water troughs so birds can get out if they fly into one. Ranchers who have a ritual breeding ground on their land, called a lek, will avoid grazing cattle in those areas during the key mating season.

Sharp, the Burns rancher, said the requirements are not onerous. "What's good for the bird is good for the herd," he said.

The conservation district will be the permit holder under the agreement, and the USFW will issue "enhancement of survival" and "incidental take" permits to the district. Landowners who sign on will be sheltered under the district's permit, and the district will develop site-specific management plans for ranches.

Landowners who carry out the plans in good faith will be exempted from additional regulatory requirements if greater sage grouse are listed as endangered.

BLM Colorado Hot Topics May 2014

What is the status of the Tres Rios Resource Management Plan?

The protest period for the San Juan National Forest and BLM Tres Rios Proposed RMP closed Nov. 7, 2013. The plan was protested by La Plata, San Miguel, Montezuma and Dolores counties, as well as the State of Colorado, among others. Rep. Scott Tipton and Sen. Michael Bennet are critical of the plan. The BLM will review the protests and determine the best path forward.

How is the BLM responding to the potential Gunnison Sage-Grouse listing?

The BLM Gunnison Field Office, a lead partner in developing a Candidate Conservation Agreement for Gunnison Sage-Grouse within the Gunnison Basin, is working to implement the agreement. BLM Colorado is in the planning stages of incorporating these conservation agreements into Resource Management Plans, possibly through a regional Environmental Impact Statement similar to the Greater Sage Grouse model.

What is the status of coal in southwest Colorado?

Oxbow's Elk Creek Mine employed 335 employees in 2012. Oxbow reduced that staff to 20-70 miners following an underground fire. Bowie Resources, LLC submitted a federal competitive coal lease-by-application to the BLM on Oct. 12, 2012, covering approximately 1,332 acres of National Forest land, 88 acres of BLM land and 368 acres of private surface with federal minerals. The application area contains an estimated 8 million tons of recoverable coal. Oxbow Mining, LLC submitted a federal coal lease modification to the BLM on Jan. 11, 2013. The proposed modification tract covers approximately 350 acres of USFS land and BLM federal minerals. Ark Land Company submitted a coal exploration plan for West Elk Mine in the Sunset Trail Area on April 3, 2013, based on rights granted in their lease agreements to drill for coal deposits in the lease. High Country Citizens Alliance and WildEarth Guardians appealed the FONSI and Decision Record in early July. The appeal is expected to be in federal court through the first half of 2014.

What is the status of various Northwest District Resource Management Plans?

- The **Colorado River Valley Field Office** released its Proposed RMP/Final EIS will be released in early 2014.
- The **White River Field Office** anticipates releasing its Proposed RMP Amendment/Final EIS in 2014. The BLM received more than 19,000 comment submissions during the comment period on the draft.
- The **Kremmling Field Office** released a Proposed RMP/Final EIS in early 2014.
- The **Grand Junction Field Office** anticipates its Proposed RMP/Final EIS will be released in summer 2014. Major issues include travel management, energy and socioeconomic concerns.
- The **Dominguez-Escalante National Conservation Area** anticipates its Proposed RMP/Final EIS will be released in fall 2014.

What is BLM Colorado doing for the Greater Sage-Grouse Planning Strategy?

The BLM is writing an EIS to analyze incorporating new Greater Sage-Grouse conservation measures into its RMPs for the five field offices in the Northwest Colorado District. The BLM's 90-day public comment period on the draft EIS was extended 16 days and ended on Dec. 2, 2013. The BLM is working with the State of Colorado to address their concerns.

What is the status of Thompson Divide and White River National Forest Oil and Gas leasing?

The Thompson Divide is 221,500 acres of primarily National Forest land west of Carbondale, Colo. Two companies – SG Interests and Ursa Resources – submitted separate development proposals in this area. On April 9, 2013, the BLM approved the companies' request to suspend the leases, which were set to expire May 31, 2013. In granting the request for lease suspensions, the BLM identified the need to remedy a defect when the leases were issued – the lack of a BLM National Environmental Policy Act (NEPA) analysis – and decided to undertake additional NEPA analysis to determine whether the leases should be reaffirmed, voided or subject to additional mitigation measures. The BLM will prepare an EIS to analyze up to 65 existing leases in the White River National Forest. The Notice of Intent published in early 2014. BLM Colorado hosted public scoping meetings in Glenwood Springs, Carbondale, Aspen and Debeque, drawing large crowds in the Roaring Fork Valley who opposed oil and gas leasing, and large supporters of oil and gas development in Mesa County.

What is the status of the Roan Plateau Supplemental Environmental Impact Statement?

The BLM completed the public scoping period for the Roan Plateau Supplemental EIS in spring 2013. When the BLM announced this scoping period, it stated it would consider a full range of alternatives for oil and gas development in the Roan Plateau planning area, including a no leasing option. The BLM received more than 24,000 comments. A draft is scheduled for release in late 2014.

What is the status of the Sutey Ranch Land Exchange?

The Colorado River Valley Field Office anticipates publishing a Notice of Decision for the Sutey Ranch Land Exchange in early 2014, which will initiate a 45-day protest period. Under the proposal, the BLM would acquire the 557-acre Sutey Ranch adjacent to the popular Red Hill Special Recreation Area in Garfield County, including the historic water rights from the ranch. The BLM would also receive 112 acres in Pitkin County. The BLM would exchange three parcels totaling 1,268 acres in Pitkin County south of Carbondale that are mostly surrounded by private land and are difficult for the public to access. The land exchange proponents would also contribute a \$1.1-million donation. An announcement on the exchange is imminent.

What is the status of the Over the River project on the Arkansas River?

The applicants proposed to install approximately 5.9 miles of fabric panels suspended above the Arkansas River in eight sections along a 42-mile stretch of the Arkansas River between the towns of Cañon City and Salida, Colo. The group Rags Over the Arkansas River (ROAR) has filed several lawsuits in an attempt to stop the project. The IBLA upheld BLM's approval on June 28, 2013. Opponents sued to stop the project in federal court.

U.S. Department of the Interior News Briefing for Friday, May 23, 2014

DATE: FRIDAY, MAY 23, 2014 7:00 AM EDT

TODAY'S TABLE OF CONTENTS

DOI IN THE NEWS:

- + Secretary Jewell Announces Funding For Youth Initiative.
- + Secretary Jewell To Visit New Mexico To Celebrate Newest Monument.
- + Rep. Stewart Prepares Bill To Defund Law Enforcement Units Of Agencies.
- + Senate May Vote On Sportsman Bill.

AMERICA'S GREAT OUTDOORS:

National Park Service:

- + Obama Promotes US Tourism.
- + House Bill Would Make B Reactor Part Of National Park.
- + NPS Encourages Saguaro Wilderness Movement.
- + Brooklyn Navy Yard Added To National Register of Historic Places.
- + Additional Coverage: Washington Monument Elevator Problem Examined.

Bureau of Land Management:

- + BLM Sells \$18 Million Worth Of Land In Nevada.
- + Rally To Be Held Over Red River Property.

Fish and Wildlife Service:

- + Ocelot Sighting Might Delay Rosemont Permitting.
- + Montana Curtails Sage Grouse Hunt.
- + Additional Coverage Of Changes To Ivory Regulations.

SECURING AMERICA'S ENERGY FUTURE:

Renewable Energy:

- + Researchers Map Atlantic Seabed.

Onshore Energy Development:

- + Flaring Costs US Millions In Revenue.
- + BLM Sells \$4.5 Million In Leases During Oil, Gas Auction.
- + Better Tools Urged To Regulate Oil Drilling In Florida.

Offshore Energy Development:

- + Recreational Fishing Alliance Opposes Seismic Testing.
- + Texas Lawmakers Discover \$5 Million In Deepwater Horizon Spill Funds From BP.

TACKLING AMERICA'S WATER CHALLENGES:

- + Senate Passes California Drought-Relief Bill.
- + Video Simulation Shows Scale Of Delta Tunnel Project.
- + Busy Memorial Weekend Expected At Lake Berryessa.
- + BOR Plans Public Meeting On Lake Nighthorse.
- + Irrigation Season To Start In New Mexico.
- + WaterSMART Grant Helps To Fund Loving County's Desalination Project .

EMPOWERING NATIVE AMERICAN COMMUNITIES:

- + Interior Proposes Changes To Tribal Recognition Rules.
- + Editorial: BIE Schools Suffer From Federal Neglect.

TOP NATIONAL NEWS:

- + Shinseki Defends His Record, But Calls For Resignation Continue.
- + House Passes "Watered Down" NSA Reform Bill 303-121.
- + Obama Promotes Foreign Tourism At Baseball Hall Of Fame And Museum.

EDITORIAL WRAP-UP:

- + New York Times.
- + Washington Post.
- + Wall Street Journal.

BIG PICTURE:

- + Headlines From Today's Front Pages.

WASHINGTON SCHEDULE:

- + Today's Events In Washington.

LAST LAUGHS:

- + Late Night Political Humor.

Holiday Message. In observance of the federal Memorial Day holiday, we will not publish on Monday, May 26, 2014. Service will resume on Tuesday, May 27, 2014. We wish our readers a safe holiday.

DOI in the News:

SECRETARY JEWELL ANNOUNCES FUNDING FOR YOUTH INITIATIVE. The [AP](#) (5/23) reports that Interior Secretary Sally Jewell on Thursday to announced the Obama Administration's plan to spend \$6.7 million to hire young adults and veterans to work on public lands. The government is "putting in \$1.9 million of the \$6.7 million for the project," and "most of the rest is coming from Wells Fargo & Co.," according to Greg Knadle of the National Fish and Wildlife Foundation. Speaking at the Rocky Mountain Arsenal Wildlife Refuge, Jewell said the grant will help fund 43 projects around the country as part of the 21st Century Conservation Service Corps Initiative.

The [Alaska Native News](#) (5/23, 245) reports that Jewell said, "We have a shared responsibility to protect and promote public lands that belong to all Americans so our children and their children can enjoy them for generations to come. The 21st Century Conservation Service Corps is built through strong public-private partnerships that not only provide employment opportunities to young adults but also provide powerful connections to nature that will last a lifetime."

The [Denver Post](#) (5/23, 940K) reports that Jewell said, "Through our partnership with Groundwork Denver and other organizations in communities across the country, we can leverage our federal investments with private support to help young adults learn new skills and gain great job experience while giving back to the community."

[KCSG-TV](#) St. George, UT (5/23, 43) reports that on Thursday, Jewell "announced seven winning projects that were selected for 2014 program funding."

Also reporting on the story are [KARNV-TV Reno, NV](#) (5/23, 2K),

Coverage by the AP was picked up by [FOX News](#) (5/22, 6.72M), the [Huffington Post](#) (5/22, 11.54M), [Yahoo!](#) (5/23, Bryson, 17.91M), the [Fort Collins \(CO\) Coloradoan](#) (5/22, 59K), the [Sacramento \(CA\) Bee](#) (5/22, 687K), and the [San Jose \(CA\) Mercury News](#) (5/23, 696K).

SECRETARY JEWELL TO VISIT NEW MEXICO TO CELEBRATE NEWEST MONUMENT. The [AP](#) (5/23) reports that Interior Secretary Sally Jewell will be in Las Cruces, New Mexico on Friday to celebrate the designation of the Organ Mountains-Desert Peaks National Monument. The article notes that "legislation that would have established the monument along with several wilderness areas repeatedly stalled in Congress." New Mexico Sens. Tom Udall and Martin Heinrich say "they will continue to push legislation that would set aside the wilderness areas."

The [Las Cruces \(NM\) Sun-News](#) (5/23, 59K) reports that "a group of opponents to the newly created Organ Mountains-Desert Peaks National Monument are planning to demonstrate against the measure." Opponents say "they're worried about the possible impacts to ranching and border security."

Coverage by the AP was also picked up by the [San Francisco Chronicle](#) (5/23, 3.33M), the [Las Cruces \(NM\) Sun-News](#) (5/23, 59K), and [KRWG-FM Las Cruces, NM](#) (5/23, 5K).

Also reporting on the story are the [Silver City \(NM\) Sun-News](#) (5/23, 24K), the [Albuquerque \(NM\) Business First](#) (5/23), and the [Nation Sun News](#) (5/23).

Designation Criticized. In his column for the [Washington Times](#) (5/23, Humphries, 455K), Rusty Humphries writes that President Obama's decision to bypass Congress to designate the monument is "another act of imperial power." He notes that "Congress has asked the president to hold off on creating the Organ Mountains monument area until local land-use and law enforcement concerns can be studied more carefully." Humphries argues that the designation is "an assault on state's rights and the 10th Amendment to the Constitution."

For the [Daily Caller](#) (5/23, Lugo, 408K), Karen Lugo, Director of the Center for Tenth Amendment Action at the Texas Public Policy Foundation, writes, that "if Americans are feeling helpless in the face of breathtaking conversions of land and access to federal control, there is something they can do." She notes that "six of the states that are still waiting for multi-use land to be returned by the feds are looking at contract-based strategies to pursue restoration of their public lands." She argues that "return of these public lands would deny the BLM jurisdiction over hundreds of thousands of acres in the West while returning decision-making and resource allocation to local and more accountable control."

REP. STEWART PREPARES BILL TO DEFUND LAW ENFORCEMENT UNITS OF AGENCIES. The [Newsmax](#) (5/22, 486K) reports that Rep. Chris Stewart is "preparing legislation to defund the law enforcement units of agencies, such as the Bureau of Land Management and the Environmental Protection Agency, whose primary purpose is regulatory." Stewart said, "The fundamental challenge is that people like me simply do not trust the federal government any longer. We see examples of non-law enforcement agencies taking a very heavy hand, using armed SWAT teams against citizens, and that leads to an even deeper mistrust." The article notes that "one of the first obstacles to any effort to defund the units is determining the exact number of federal agents who have authority to execute search warrants and carry weapons," and "part of the challenge is that various agencies define their law enforcement officers with different terms, making a computer data search more difficult, and some agencies and departments bristle at the assertion they even have SWAT or paramilitary units."

SENATE MAY VOTE ON SPORTSMAN BILL. [Politico](#) (5/23, Everett, 73K) reports that Senate Democratic leaders are "mulling expeditiously voting on a hunting and fishing bill that could pay big dividends to red-state Democrats this election year." The sportsmen's legislation, written by Sens. Kay Hagan and Lisa Murkowski, "would expand the reach of shooting ranges on federal lands, exempt lead bullets and fishing tackle from federal regulations, expedite duck hunting permits, reauthorize conservation programs and require federal officials to consider how land management affects the activities of hunting, fishing and shooting." According to the article, "depending on how negotiations over a stalled tax extenders bill proceed, the bill could come to the Senate floor after next week's Memorial Day recess."

America's Great Outdoors:

National Park Service:

OBAMA PROMOTES US TOURISM. The [Washington Post](#) (5/22, Eilperin, 4.22M) reports that President Obama "undertook a couple of executive actions Tuesday aimed at bringing more visitors to the United States." However, the article notes that budget cuts in recent years have affected many of sites tourists come to see, including national parks. John Gardner, director of budget and appropriations for the National Parks Conservation Association, "noted that 20 percent of foreign visitors come to national parks, and those tourists stay longer and are more likely to return to the US than other visitors." Gardner said, "It's ironic that while we're seeking to drive more international visitors to our national parks there's an important question about what sort of message it sends, particularly as we prepare to celebrate the National Park Service's 100th anniversary in 2016, when those visitors will arrive to crumbling park roads and trails."

HOUSE BILL WOULD MAKE B REACTOR PART OF NATIONAL PARK. The [Tri-City Herald \(WA\)](#) (5/22, 115K) reports that "making B Reactor part of a national park and effectively barring plutonium shipments to Hanford are among provisions of the 2015 House National Defense Authorization Act passed Thursday." Rep. Doc Hastings "added those provisions in the bill and other language to require public access to Rattlesnake Mountain, to transfer unneeded Hanford land for industrial development and to clear the way to restore some environmental cleanup funding." The legislation "requires that a Manhattan Project National Historical Park, which would include Hanford's historic B Reactor, be created within a year of passage of the legislation."

NPS ENCOURAGES SAGUARO WILDERNESS MOVEMENT. The [Tucson \(AZ\) Weekly](#) (5/22, 122K) reports that the NPS Harpers Ferry Center has published a "Youtube video encouraging Tucsonans to join the revolution ... a stewardship revolution." The clip "includes narrations by the late, great Mardy 'Grandmother of the Conservation Movement' Murie."

BROOKLYN NAVY YARD ADDED TO NATIONAL REGISTER OF HISTORIC PLACES. The [New York Daily News](#) (5/23, 4.36M) reports that the Brooklyn Navy Yard has been added to the National Register of Historic Places.

ADDITIONAL COVERAGE: WASHINGTON MONUMENT ELEVATOR PROBLEM EXAMINED. Additional coverage of the Washington Monument's elevator issues was provided by the [AP](#) (5/23) and [WJLA-TV](#) Washington (5/23, 118K).

Bureau of Land Management:

BLM SELLS \$18 MILLION WORTH OF LAND IN NEVADA. The [Las Vegas Review-Journal](#) (5/23, 437K) reports that the BLM sold more than \$18 million in public land in Nevada on Thursday. The BLM said 10 percent of the proceeds will go to the Southern Nevada Water Authority and 5 percent — more than \$900,000 — will go to the Nevada State General Education Fund.

RALLY TO BE HELD OVER RED RIVER PROPERTY. [KFDX-TV](#) Wichita Falls, TX (5/23, 2K) reports that a rally will be held on Saturday to protest the BLM's alleged "plans to take land from property owners along the Texas side of the Red River." The rally is "being organized by a gun rights group and is called 'Gathering of the American Patriot Red River Rally.'"

Fish and Wildlife Service:

OCELOT SIGHTING MIGHT DELAY ROSEMONT PERMITTING. The [Mining Weekly](#) (5/23, 2K) reports that the sighting of an ocelot close to the boundaries of Augusta Resource Corp's proposed Rosemont copper project, near Tucson, Arizona, contributed to the FWS "saying it might not be able to give the company an environmental green light to start building the project, saying more consultation might be needed." Augusta on Thursday said that it was aware of an FWS letter that were submitted to the US Forest Service USFS summarizing "its rationale

for restarting consultations regarding the project's permitting." According to the article, "a remote camera south of the project site photographed the wild cat, prompting the USFS to evaluate the issues raised in the letter and, as the action agency, to decide whether further consultation would be necessary."

Also covering the story are the [Arizona Daily Star](#) (5/23, 389K) and the [Tucson \(AZ\) Weekly](#) (5/22, 122K).

MONTANA CURTAILS SAGE GROUSE HUNT. The [AP](#) (5/23, Brown) reports that "Montana on Thursday joined North Dakota and South Dakota as states that are moving to curtail the hunting of sage grouse in response to a continued decline in the game bird's population." State wildlife commissioners "gave tentative approval to a proposal to cancel or scale back Montana's two-month hunting season, which is slated to open in September."

ADDITIONAL COVERAGE OF CHANGES TO IVORY REGULATIONS. Additional coverage of the changes to federal ivory regulations was provided by the [Cleveland Plain Dealer](#) (5/23, 1.06M).

Securing America's Energy Future:

Renewable Energy:

RESEARCHERS MAP ATLANTIC SEABED. The [reNews](#) (5/23) reports that "researchers have wrapped up a 10-day voyage to map the ocean floor in the North Carolina offshore wind energy call area." The University of North Carolina Institute of Marine Sciences in partnership with the BOEM and the National Oceanic and Atmospheric Administration are "conducting extensive seabed mapping and a baseline biological assessment in the Wilmington-East call area." Researchers "used high-resolution hydrographic sonars to characterize reef structures and detail the topography of the ocean floor." The data will "help determine where offshore wind energy development could occur with minimal impacts to sensitive fish habitats and ocean resources."

Onshore Energy Development:

FLARING COSTS US MILLIONS IN REVENUE. The [National Geographic](#) (5/23, 42.25M) reports that "the cost of flaring—in lost energy resources and potential revenue from federal land in North Dakota and other western states—is increasingly drawing the attention of government officials and interest groups." Data from the Office of Natural Resources Revenue "show that the amount of gas lost to unauthorized flaring and venting increased more than 20-fold from 2010 through 2013." According to the article, "flaring is likely to continue...at least until US regulations and infrastructure catch up to the runaway production."

BLM SELLS \$4.5 MILLION IN LEASES DURING OIL, GAS AUCTION. The [Forum of Fargo-Moorhead \(ND\)](#) (5/23, 10K) reports that the BLM "auctioned oil and gas leases on federal land totaling about \$2.9 million in three southwest North Dakota counties." The BLM "sold about \$4.5 million in leases Wednesday – 14,620 acres in all."

BETTER TOOLS URGED TO REGULATE OIL DRILLING IN FLORIDA. The [South Florida Sun Sentinel](#) (5/22, 779K) editorializes that "a Texas-based firm stands accused of exceeding its permit and engaging" in fracking, a "practice the state has specifically prohibited" near the Everglades. According to the paper, "given that the Everglades is South Florida's water lifeline, the danger is clear." The paper notes that "while no one disputes the need for further energy exploration to achieve our nation's goal of energy independence, the Hughes Co. case shows the need to proceed with care."

Offshore Energy Development:

RECREATIONAL FISHING ALLIANCE OPPOSES SEISMIC TESTING. The [Cape May County \(NJ\) Herald](#) (5/23, 15K) reports that the Recreational Fishing Alliance sent a nationwide email alert earlier this month "related to the scheduling of a seismic testing program just 15 miles off the New Jersey coast scheduled to begin on June 3." According to the article, "members of the recreational for-hire fleet, as well as local commercial fishermen and a host of environmental organizations including Clean Ocean Action are fearful of the potential impacts on local marine life posed by the seismic airgun blasts." The Recreational Fishing Alliance is "urging all saltwater anglers and concerned citizens to take time from their schedule on May 23, 2014, to send a fax to Secretary of the

Interior, Ms. Sally Jewell, urging her assistance in postponing the study.”

Marine Scientist Warns Whales Threatened By Seismic Testing. For [Yahoo!](#) (5/23, Young, 17.91M) , Sara Young, a marine scientist at Oceana, writes that whales are threatened by “a proposal to use seismic airguns off the US Atlantic coast to search for oil and gas deposits beneath the ocean floor.” According to Young, the sound waves are generated by seismic airguns “can occur every 10 minutes, for days to weeks on end, and may result in temporary or permanent hearing loss for the whales, along with habitat abandonment, disruption of mating and feeding, beaching events and even death.” Young urges the Obama Administration to “reconsider its plans to allow the use of seismic airguns, and listen to the 14 coastal communities; the more than 150 national, state, and local elected officials; and 160 environmental and welfare organizations who have taken clear stances opposing such seismic testing.”

TEXAS LAWMAKERS DISCOVER \$5 MILLION IN DEEPWATER HORIZON SPILL FUNDS FROM BP. NPR (5/22, Henry, 519K) reports that Texas state lawmakers this week held a hearing to examine how the state will manage funds from the 2010 Deepwater Horizon spill. The hearing came after it was discovered that in September 2010, BP gave \$5 million to Gov. Rick Perry’s office to cover Deepwater Horizon spill costs. About \$20,000 in interest has been made on the funds in the interim.

Tackling America’s Water Challenges:

SENATE PASSES CALIFORNIA DROUGHT-RELIEF BILL. [McClatchy](#) (5/23, Doyle, Subscription Publication, 23K) reports that the Senate on Thursday “passed a California drought-relief bill that sets up serious negotiations with the House over water storage, river protection, irrigation deliveries and more.” Sen. Dianne Feinstein said, “My hope is that this process can proceed quickly and bypass many of the controversial issues that have been raised in the past. While we do need long-term solutions to the state’s water problems, the bill the Senate passed today authorizes immediate actions to help California.” According to the article, “using a lickety-split procedure that required getting a green light from all 100 senators, Feinstein pushed her 16-page Emergency Drought Relief Act through the Senate without public debate or a committee hearing.”

VIDEO SIMULATION SHOWS SCALE OF DELTA TUNNEL PROJECT. The [Sacramento \(CA\) Bee](#) (5/22, 687K) reports that the Delta Protection Commission “hired a computer artist to prepare a video simulation of the three intakes on the Sacramento River that would feed” the proposed Delta tunnels. According to the article, “the result is a 46-second animation on YouTube that gives the impression of a helicopter ride above the intakes and the region near Courtland, in Sacramento County, where they are proposed.” The article notes that “among other things, the video illustrates that the middle of the three intakes would dwarf the town of Clarksburg, which lies directly across the Sacramento River on the Yolo County side,” and “it also depicts how roads and levees will be reconfigured, and the scale and nature of changes to the riverfront at each intake.”

BUSY MEMORIAL WEEKEND EXPECTED AT LAKE BERRYESSA. The [Napa Valley \(CA\) Register](#) (5/23, 36K) reports that “California’s ongoing drought may encourage more people to visit Lake Berryessa, where the lake level remains high enough to encourage recreation, officials said.” Warren Kasper, supervisory park ranger for the BOR, said, “Memorial Day will be a very busy weekend.” Officials noted that “all of the lake’s camping spots are already full.”

BOR PLANS PUBLIC MEETING ON LAKE NIGHORSE. The [Durango \(CO\) Herald](#) (5/22, 28K) reports that the BOR “plans to hold a public meeting June 18 to update residents on progress toward opening Lake Nighthorse for recreational use.” According to a news release from Ed Warner, Western Colorado area manager, “the agency believed it was near an agreement with partners and stakeholders of the Animas-La Plata Project to integrate recreation.” Sens. Mark Udall and Michael Bennet wrote to the BOR “last week asking it to issue a plan for opening the reservoir for recreation quickly.”

IRRIGATION SEASON TO START IN NEW MEXICO. The [AP](#) (5/23) reports that “the irrigation season in southern New Mexico’s Rio Grande Valley will begin this weekend.” According to the BOR, “an initial release of water from Caballo Reservoir is scheduled for Sunday.” The article notes that “releases from Elephant Butte Reservoir will begin Tuesday and are expected to continue at least through August.”

WATERSMART GRANT HELPS TO FUND LOVING COUNTY'S DESALINATION PROJECT . The Odessa (TX) American (5/23, 50K) reports that "Loving County officials are turning to a desalination project that represents the first of its kind in the United States." According to the article, "the project includes an evaporative desalination unit and a solar power plant that will be able to treat brackish water." The article notes that "the total \$3.5 million project is funded by the county and a \$600,000 grant from the Bureau of Reclamation through a WaterSMART initiative promoting water treatment programs incorporating renewable technology."

Empowering Native American Communities:

INTERIOR PROPOSES CHANGES TO TRIBAL RECOGNITION RULES. The AP (5/23, Melia) reports that the Interior Department on Thursday announced "proposed changes to the rules for granting federal recognition to American Indian tribes, revisions that could make it easier for some groups to achieve status that brings increased benefits as well as opportunities for commercial development." The BIA says "it overhauled the rules to make tribal acknowledgment more transparent and efficient." Kevin Washburn, assistant secretary with Indian Affairs, said, "The proposed rule would slightly modify criteria to make it more consistent with the way we've been applying the criteria in the past."

The National Journal (5/23, Subscription Publication, 561K) reports that Interior Secretary Sally Jewell said, "President Obama believes that reforming the federal acknowledgment process will strengthen our important trust relationship with Indian tribes." However, "the fear from some lawmakers and state and local politicians was that the new language devised by Bureau of Indian Affairs could result in federal recognition for literally hundreds of tribes that for years have struggled and failed to receive that status—and could give them all the privileges that come with that."

Coverage by the AP was also picked up by the Washington Post (5/23, 4.22M), the Minneapolis Star Tribune (5/23, Melia, 1.48M), the Sacramento (CA) Bee (5/22, 687K), Yahoo! (5/23, Melia, 17.91M), ABC News (5/23, 3.58M), the Huffington Post (5/22, 11.54M), the Great Falls (MT) Tribune (5/22, 90K), the New Haven (CT) Register (5/22, 215K), the Quincy (IL) Herald-Whig (5/23, 85K), The Missoulian (5/23, 122K), and the Olympian (WA) (5/22, 119K),

Also reporting on the story are the New London (CT) Day (5/22, 76K), the Hartford (CT) Courant (5/22, 599K), the Nation Sun News (5/23), and WTIC-TV Hartford, CT (5/22, 28K).

EDITORIAL: BIE SCHOOLS SUFFER FROM FEDERAL NEGLECT. The Minneapolis Star Tribune (5/23, 1.48M) editorializes that the two K-12 school systems, "one for Department of Defense employees and service members and the other for Native American children," run by the federal government is "far from equal." According to the editorial, "there's no better, or appalling, illustration of the resource gap than the contrast between the Bug-O-Nay-Ge-Shig high school on northern Minnesota's Leech Lake Reservation and the shiny new school proposed for 275 children at the Guantanamo Bay installation in Cuba." The paper argues that if Congress can "find adequate funding for one federal education system, there's a moral imperative to do the same for another system serving children with well-known educational and economic challenges."

Top National News:

SHINSEKI DEFENDS HIS RECORD, BUT CALLS FOR RESIGNATION CONTINUE. While President Obama traveled to upstate New York and Chicago Thursday, the allegations of misconduct at Veterans Affairs hospitals continued to capture the focus of Washington and the media. While coverage is lighter than yesterday, all three broadcast networks and most major national newspapers carry reports. VA Secretary Shinseki's defense of his record and his vow to fix the problems was one focus, but there are also reports on growing calls for his resignation, including those from Democratic Senate contenders in traditionally Republican states. In addition, both a Wall Street Journal editorial and Washington Post columnist Michael Gerson link the VA problems to the sort of government-managed healthcare that they say Obama has championed.

Coverage of the scandal varied markedly between the three broadcast networks. While none led with it, CBS and NBC both aired reports near the top of their programs, devoting about three minutes each to it, while ABC ran just a brief update late in its newscast. NBC Nightly News (5/22, story 3, 2:50, Williams, 7.86M) reported that "both

the White House and Congress were dealing with" the issue again Thursday. NBC's Kelly O'Donnell said she got "just a glimpse of the beleaguered" Shinseki as he arrived for a meeting with Senate Majority Whip Durbin. Meanwhile, the VA's "new top health administrator said he believes VA failures are not system-wide." VA Principal Deputy Under Secretary for Health Robert Jesse: "I'm not going to say it's systemic. We know there may be issues in certain areas and we'll get to the bottom of that." O'Donnell added that "three VA officials failed to show up" for a House hearing Thursday.

The CBS Evening News (5/22, story 4, 1:40, Pelley, 5.08M) reported that a new CBS News poll shows 45% of Americans think Shinseki should resign, while 31% do not. CBS's Nancy Cordes said she asked Shinseki Thursday "whether he believes that he has the full confidence of President Obama and he said yes, he thinks he does. He also told us that he did not offer his resignation to the President when the two met yesterday."

ABC World News (5/22, story 9, 0:25, Muir) said there were "two major developments" in the story Thursday, with Shinseki "speaking out, saying he will not resign," and in Phoenix, Rob Nabors, "the man President Obama tapped as his troubleshooter, on the ground there investigating how this could have happened." The CBS Evening News (5/22, story 5, 2:05, Pelley, 5.08M) said in a second report that Nabors "said nothing as he entered the troubled VA hospital in Phoenix. An email from the acting director, Steve Young, told the staff, 'If you should have the opportunity to talk to Mr. Nabors I encourage you to be open and honest. That's why he is here.'"

The Arizona Republic (5/23, 1.45M) says Nabors "conferred with VA medical-center administrators, staffers and patients during a daylong series of briefings and meetings" and "only briefly addressed reporters." After "eight hours of discussions," Nabors called the meetings "productive, but he didn't elaborate."

The Washington Post (5/22, Hicks, 4.22M) reported in its "Federal Eye" blog that members of both parties on the House Veterans Affairs Committee said the VA "is responding too slowly to its requests for information" and "vented their frustration" about the absences at Thursday's hearing, approving "a motion to subpoena the employees if they do not testify by May 30." The VA said the officials could not attend due to short notice, but said the three will appear on May 28. The Los Angeles Times (5/23, Simon, 3.46M) reports that a VA spokesman said the agency "was working with the committee, having provided more than 3,000 pages of documents. But a committee staffer noted the documents arrived at 2:30 a.m. Thursday."

USA Today (5/23, Zoroya, 5.82M) reports Shinseki "is resisting calls for his resignation" and issued a message to veterans on the VA website Thursday night "defending his leadership and promising to fix delays in care." Shinseki wrote "that the 'reports of veterans' negative experiences while seeking VA care are of great personal concern to me."

The Washington Post (5/22, O'Keefe, 4.22M) reported in its "Post Politics" blog that "in a brief interview Thursday with a small group of reporters," Shinseki said, "I came here to do one thing: Which is to take care of veterans and families. We've run hard for five years, I think we have good things to show for it, there's more to be done."

The Chicago Sun-Times (5/23, 1.1M) reports that Shinseki and Durbin met for about half an hour. Durbin "has not called for Shenseki's resignation." He said, "He has proven his love of this country and veterans, regardless of the political outcome. ... I heard from him what I wanted to hear."

The Los Angeles Times (5/23, Muskal, 3.46M) runs a question-and-answer piece on the "continuing scandal," noting that it is coming to the fore "as the nation heads into the Memorial Day weekend, ready to honor the men and women who died serving in its armed forces."

Administration Official Says White House Backs Goals Of VA Firing Authority Legislation. The Washington Post (5/22, Hicks, 4.22M) reported in its "Federal Eye" blog that an Obama Administration official said that while the White House "wants to tweak some of the language" in a bill that easily passed the House Wednesday that would give the VA secretary greater authority to fire top executives, it "supports the general goals behind the legislation." The Wall Street Journal (5/23, Crittenden, Peterson, Subscription Publication, 5.51M) reports there is strong Democratic support in the Senate for the legislation.

Politico (5/22, Dove, 73K) reported that while President Obama would like to be talking "about flexing his administrative and executive power to do more," he must instead confront "a clear administrative and executive

failure that, at least so far, he hasn't done much about," and that "may have left hundreds of thousands of veterans waiting for care, and 40 of them dead." Politico says the failure may be a reminder of the problems with HealthCare.gov, and "that's exactly what Republicans have been hoping for."

Joe Davidson writes in the Washington Post (5/23, 4.22M) "Federal Diary" that while "the bill could mean a hasty exit for some employees, the real message of the strong Democratic support is that Congress will not tolerate shoddy treatment of veterans. It's a clear message to the VA's management to get its shop in order and a stark warning to individual employees whose actions have damaged the department's reputation."

McCarthy Calls For Shinseki Resignation, Boehner "Getting Closer" To Doing Same. McClatchy (5/23, Lightman, Subscription Publication, 23K) reports House Speaker Boehner said at his weekly news conference Thursday, "I've not called for Gen. Shinseki to resign, although I have to admit I'm getting a little closer. But here's the point: This isn't about one person. This isn't about the Secretary. It's about the entire system underneath him." Politico (5/22, Sherman, 73K) reported, however, that House Majority Whip McCarthy did call on Shineski to resign Thursday, becoming "the first House Republican leader" to do so.

Pelosi Says Alleged VA Misconduct May Be Criminal. The Hill (5/22, Lillis, 237K) reported that House Minority Leader Pelosi said Thursday that "allegations of cooked books" at the VA "could rise to the level of criminal misconduct." Pelosi "emphasized the importance of having an 'evidence-based' process, but vowed that 'there must and will be accountability' for anyone found of wrongdoing."

Democratic Senate Hopefuls Grimes, Weiland Seek Shinseki Exit. The AP (5/23, Daly) reports that "the growing furor over veterans' health care moved to the political campaigns Thursday" as two Democratic Senate nominees, Kentucky's Alison Lundergan Grimes and South Dakota's Rick Weiland, called for Shinseki's resignation. USA Today (5/22, Camia, 5.82M) reported in its "On Politics" blog that Grimes said in a statement, "We owe a solemn obligation to our veterans, and our government defaulted on that contract. I don't see how that breach of trust with our veterans can be repaired if the current leadership stays in place." The Hill (5/22, Jaffe, 237K) reported in its "Ballot Box" blog that Weiland, the underdog in the open-seat South Dakota race, said, "A single scalp is not nearly enough."

Dole Says Shinseki May Need To Go, But Not Yet. USA Today (5/23, Page, 5.82M) reports that ex-Sen. Bob Dole "spoke with apparent anguish" during an interview, saying that while the situation at the VA is "a 'disaster,'" he is not sure if Shinseki should go, Dole said, "He should stay until the White House gets this investigative report that they're doing, until we get the facts, and you see what you can lay at his feet and what his response has been. If the facts reveal that he neglected his duties, then he should go."

More Commentary. The Wall Street Journal (5/23, A14, Subscription Publication, 5.51M) says in an editorial that the problems with VA healthcare are representative with the flaws of government-run healthcare as a whole, noting Paul Krugman's 2011 assertion that the VA successfully maintains the sort of "socialized medicine" he wanted for the nation.

Michael Gerson writes in his Washington Post (5/23, 4.22M) column that while the Benghazi and IRS affairs have failed to capture public attention, "President Obama's VA scandal is the most serious and damaging of his presidency. It is the Obama administration in sum and in miniature: incompetent management of a health system, defended by crude media manipulation." It is "not only the result of weak leadership; it is typical of government-managed systems."

HOUSE PASSES "WATERED DOWN" NSA REFORM BILL 303-121. The AP (5/23, Dilanian) reports that on Thursday, in an "overwhelming" 303-121 vote, the House "moved the US closer to ending the National Security Agency's bulk collection of Americans' phone records." The AP calls the vote "the most significant demonstration to date of leaker Edward Snowden's impact on the debate over privacy versus security." Nevertheless, according to the AP, advocates of NSA reform complained that the "final version of the legislation" had been "severely weakened to mollify US intelligence agencies, which insisted that the surveillance programs that shocked many Americans are a critical bulwark against terror plots."

The New York Times (5/23, Weisman, Savage, Subscription Publication, 9.65M) also reports that the U.S.A. Freedom Act "was overhauled in negotiations with the administration this week," and "House leaders allowed no

amendments." According to the Times, "Administration officials, led by Robert S. Litt, the general counsel of the director of national intelligence, negotiated a flurry of last-minute alterations...focusing on a change to how the bill purports to stop the government from collecting records about Americans in bulk."

The Washington Post (5/23, Nakashima, Peterson, 4.22M) reports that as a result of the changes sought by the Administration, the bill "lost the support of dozens of co-sponsors who were upset that the reforms were scaled back." The Post says "privacy advocates" warn that the legislation "could still enable the collection of large amounts of data that, for instance, originate from a single Zip code."

According to McClatchy (5/23, Lightman, Taylor, Subscription Publication, 23K), "an influential chorus of critics warned the bill was little more than a watered-down feel-good exercise." McClatchy notes that Senate Judiciary Chairman Patrick Leahy "said he was disappointed the changes didn't go far enough," while Sen. Ron Wyden said, "I am gravely concerned that the changes that have been made to the House version of this bill have watered it down so far that it fails to protect Americans from suspicion-less mass surveillance." According to McClatchy, the 121 House members who voted against the bill "were largely a collection of libertarian Republicans and liberal Democrats."

USA Today (5/22, Davis, 5.82M) reports that of the 121, "51 were Republicans and 70 were Democrats." USA Today reports that Rep. Tulsi Gabbard, a co-sponsor of the original bill who voted against the amended version, said, "We still have yet to hear of a single example of how national security has been strengthened by allowing bulk data collection." USA Today also notes that on Wednesday, "a group of influential tech companies including Google, Facebook and Twitter withdrew their original support from the bill...citing weakened language that they said creates a loophole for the surveillance of personal Internet data."

The Hill (5/22, Hattem, 237K) reported that Senate Intelligence Chairwoman Dianne Feinstein released a statement on Thursday reading: "I have spoken with the president who is urging the Senate to pass the bill as well, and I am open to considering the legislation when the Senate returns to Washington." According to The Hill, Feinstein's "willingness to consider the version of the USA Freedom Act passed by the House, may confirm privacy advocates' fears that the bill had been watered down beyond recognition."

The Wall Street Journal (5/23, Gorman, Peterson, Subscription Publication, 5.51M) reports that Rep. Zoe Lofgren said, "Changes were made without the knowledge of the committee members, and the result is a bill that actually will not end bulk collections, regretfully."

The Los Angeles Times (5/23, Mascaro, 3.46M) reports that the ACLU reluctantly backed the bill. Laura Murphy, director of the ACLU's Legislative Office, is quoted as saying, "While we share the concerns of many – including members of both parties who rightly believe the bill does not go far enough – without it we would be left with no reform at all." The Hill (5/22, Hattem, 237K) reported that the bill requires the NSA to "tell Congress about any new policy changes within a day, and then...inform the public within 45 days."

The New York Times (5/23, Board, Subscription Publication, 9.65M), in an editorial, says, "Because of last-minute pressure from a recalcitrant Obama administration," the bill lacks "the strong restrictions in an earlier version, potentially allowing the spy agencies to continue much of their phone-data collection." However, the Times adds that the bill does "finally begin...to reverse the trend of reducing civil liberties in the name of fighting terrorism."

OBAMA PROMOTES FOREIGN TOURISM AT BASEBALL HALL OF FAME AND MUSEUM. The AP (5/23, Superville) reports President Obama visited the Baseball Hall of Fame and Museum in Cooperstown, New York Thursday to make a case "for attracting more foreign visitors" to the US to help "a sector of the economy that has increasingly brought more money into the United States but still faces competition from abroad." It was the first visit to Cooperstown by a sitting president, and Obama, "an avid ESPN watcher and sports fan, was clearly in his element." The New York Times (5/23, Shear, Subscription Publication, 9.65M) says the trip was clearly one of the "perks of office" for Obama, who "had an extra bounce in his step as he quickly perused some of the artifacts, including a few from his favorite team, the Chicago White Sox."

USA Today (5/23, Campbell, 5.82M) says the President also "signed a memorandum directing members of his administration to develop a plan to cut wait times for customs processing at the 15 largest US airports." He told

his audience, "We want to bring in more visitors faster and more jobs faster. If they come into JFK faster, they come into LaGuardia faster, then they can get to Cooperstown faster."

The Washington Times (5/23, Wolfgang, 455K) reports the President also said he had donated the jacket he wore when he threw out the first pitch at the 2009 All Star Game to the museum, adding, "I hear that with all the media attention about it, there was also some interest in the jeans I wore that night. But Michelle retired those jeans quite a while back."

The Utica (NY) Observer Dispatch (5/23, Cooper, 11K) says "it was a whirlwind visit," with the President speaking "for all of 15 minutes before he sprinted off to his next engagement." The Cooperstown (NY) Crier (5/23, Dunau) reports that former Chicago Cub Andre Dawson, inducted into the Hall of Fame in 2010, joined Obama for the tour.

The Washington Post (5/23, Eilperin, 4.22M) reports that while the speech "was greeted with an enthusiastic response, there were protesters gathered outside the gate to the museum" calling for a ban on hydraulic fracturing. The Wall Street Journal (5/23, Nelson, Subscription Publication, 5.51M) and Oneonta (NY) Daily Star (5/23, Mahoney, 46K) also report on the visit.

Editorial Wrap-Up:

NEW YORK TIMES. "A Surveillance Bill That Falls Short." The New York Times (5/23, Board, Subscription Publication, 9.65M), in an editorial, says, "Because of last-minute pressure from a recalcitrant Obama administration," the NSA reform bill passed by the House lacks "the strong restrictions in an earlier version, potentially allowing the spy agencies to continue much of their phone-data collection." However, the Times adds that the bill does "finally begin...to reverse the trend of reducing civil liberties in the name of fighting terrorism."

"The Secret Shame Of The Death Penalty." The New York Times (5/23, Subscription Publication, 9.65M) editorializes that Russell Bucklew "challenged the state's plan to put him to death by lethal injection on the grounds that a condition called cavernous hemangioma – which has led to expanding vascular tumors in his head and neck – would expose him to 'unique risks,' including 'a substantial likelihood of hemorrhaging, choking, airway obstruction and suffocation.'" The Times argues that "it is clear that lethal injection is no less problematic than" other methods of execution, "and that there is no reason to continue using it," but "capital punishment does not operate in the land of reason or logic; it operates in a perpetual state of secrecy and shame."

"Keeping Track." In the latest edition of its "Keeping Track" feature on its editorial page, the New York Times (5/23, Subscription Publication, 9.65M) examines this week's ruling by a Federal judge striking down Pennsylvania's ban on same-sex marriage, Sen. Patrick Leahy's delay of patent lawsuit reform legislation, and an agreement between New York Attorney General Eric Schneiderman, and Airbnb concerning the investigation of individuals suspected of operating illegal hotels in New York City.

"No Gap To Mind."

WASHINGTON POST. "Which State Next?" The Washington Post (5/23, 4.22M) editorializes that "we have been struck by the relative lack of commotion, even in some very conservative states," surrounding Federal judges' rulings striking down same-sex marriage bans. The Post argues that it "would be a victory in and of itself – in some ways, more significant than a district court ruling here or there – if American society proved itself ready to stop treating same-sex marriage as unusual, instead regarding it as an everyday practice that requires no special scrutiny." Same-sex marriage "is becoming normal, and that is as it should be."

"Prelude To Civil War." An editorial in the Washington Post (5/23, 4.22M) says Thai army chief Gen. Prayuth Chan-Ocha has disrupted "the constitutional order in one of Southeast Asia's most successful societies, and that's something the United States and its allies cannot tolerate." The Post notes that Secretary of State Kerry called "the coup by its true name," and said in a written statement that officials are "reviewing our military and other assistance and engagements, consistent with U.S. law," calling the response "an improvement over the administration's glaring failure to call out Egypt's military coup." The Post argues that the Thai army "was not acting as an honest broker between factions," and adds that "this latest coup may yet prove the prelude to a civil

war that its authors say they want to prevent.”

“Going Negative.” In an editorial, the Washington Post (5/23, 4.22M) criticizes District of Columbia Councilmember David Catania, an independent candidate for mayor, for criticizing his Democratic Council colleague and mayoral rival Muriel Bowser “as a puppet.” The Post says it implies “that a woman can’t think for herself,” and also portends a deeply negative campaign over the next five months. Bowser “makes no secret of her links” to ex-mayor Adrian Fenty, but it is a “curious” attack since Catania “also was a staunch ally of Mr. Fenty during his mayoral term.” The Post says Catania should switch to a less negative message.

WALL STREET JOURNAL. “The Government Health-Care Model.” The Wall Street Journal (5/23, A14, Subscription Publication, 5.51M) says in an editorial that the problems with VA healthcare are representative of the flaws of government-run healthcare as a whole, noting Paul Krugman’s 2011 assertion that the VA successfully maintains the sort of “socialized medicine” he wanted for the nation.

“Good News In The Proxy Wars.” In an editorial, the Wall Street Journal (5/23, Subscription Publication, 5.51M) opines that is good news that shareholders are rejecting proposals being pushed by Bruce Freed of the Center for Political Accountability to require companies to disclose their political spending.

Washington Schedule:

TODAY'S EVENTS IN WASHINGTON.

White House:

PRESIDENT OBAMA – The President departs Chicago, Illinois, open press; arrives Joint Base Andrews, out-of-town travel pool coverage; arrives the White House, South Lawn, open press; signs H.R. 1209 and H.R. 685, Oval Office, stills only pool spray. Notes: Press Secretary Jay Carney will gaggle aboard Air Force One en route Washington, DC.

VICE PRESIDENT BIDEN – The Vice President and Dr. Jill Biden will travel to Romania and Cyprus from May 20-23, 2014. In Bucharest, the Vice President will meet with Romanian President Băsescu and Prime Minister Ponta. He will also deliver remarks to Romanian civil society and youth leaders, and will meet with American and Romanian troops conducting a joint capacity-building exercise. The Vice President will underscore the United States "ironclad commitment" to the collective defense of NATO under Article 5, and express appreciation for Romania's contributions to regional and global security. At the invitation of President Anastasiades, the Vice President will visit Cyprus, where he will meet with political leaders from the Greek Cypriot and Turkish Cypriot communities, civil society representatives, and faith leaders.

US Senate: 10 a.m. – The Senate convenes for a pro forma session.

COMMITTEE MEETINGS

ARMED SERVICES – 9:30 a.m. Full committee CLOSED markup on the National Defense Authorization Act for Fiscal year 2015. Location: 222 Russell. Notes: Will occur if markup on the 22nd is not completed.

US House: 3 p.m. – The House meets in pro forma session.

Other: OAS – MONEY LAUNDERING – May 22 – 23. The Inter-American Drug Abuse Control Commission (CICAD) of the Organization of American States (OAS) will hold the XXXVIII Meeting of the Group of Experts for the Control of Money Laundering. Location: Ruben Dario Room, Organization of American States, 1889 F St, NW. Contacts: n/a, 202-370-5437

WORLD BANK – GENDER BASED VIOLENCE – May 22 – 23. World Bank President Jim Yong Kim, Nollywood Star Stella Damasus and other Global Artists Against Gender Based Violence among speakers at events for the Global Artists Against Gender Base Violence. Location: World Bank, 18th Street & Pennsylvania Ave., NW.

Contacts: RSVP to specialevents@worldbank.org

UNIVERSITY OF MARYLAND – COMMENCEMENT – HOYER – 9 a.m. University of Maryland School of Public Policy Commencement Ceremony with an address by U.S. House Democratic Whip Steny H. Hoyer (MD).

Location: DeKelboun Concert Hall, Clarice Smith, Performing Arts Center, University of Maryland, College Park, MD. Contacts: Mariel Saez 202-225-3130

SECRETARY HAGEL – U.S. NAVAL ACADEMY – 10 a.m. Secretary of Defense Chuck Hagel will give the commencement address at the graduation and commissioning ceremony at the United States Naval Academy.

Contacts: Department of Defense, 703-697-5131

U.S. TRADE REPRESENTATIVE – ENFORCEMENT ANNOUNCEMENT – 10 a.m. U.S. Trade Representative Ambassador Michael Froman will make a “major enforcement announcement” concerning the World Trade Organization and China. Ambassador Froman will be joined by Sen. Debbie Stabenow and House Ways and Means Committee Ranking Member Rep. Sandy Levin. Following remarks by Ambassador Froman, USTR General Counsel Tim Reif will hold a background briefing to answer questions about the announcement. Location: USTR Annex, Rooms 1-2, 1724 F St. NW. Contacts: Andrew Bates, ABates@ustr.eop.gov. Notes: Working media must RSVP to Roya Stephens at RStephens@ustr.eop.gov by 8:30 a.m. on Friday, May 23. Please provide the name and media outlet of the person(s) attending.

ICAS – KOREAN PENINSULA – 1:15 p.m. – 4:30 p.m. The Institute for Corean-American Studies, Inc. (ICAS) Spring Symposium discussion on The Korean Peninsula Issues and US National Security. Chair: Synja P Kim (ICAS Fellow, President and Chairman) Moderator: Sang Joo Kim (ICAS Sr Fellow & Executive Vice President). Speakers: Wallace C. Gregson (Lieutenant General US Marine Corps Retired; Assistant Secretary of Defense for Asia and Pacific Security 2009-2011; Chair Banyan Analytics), Seoul-Tokyo-Washington Security Partnership; Seung Jo Jung (General ROK Army Retired; 37th Chair Joint Chiefs of Staff; ICAS Liberty Foundation Distinguished Fellow; Distinguished Senior Associate CSIS), North Korea’s Military Threat and ROK-US Alliance. Location: Cannon Caucus Room

OAS PERMANENT COUNCIL – 2 p.m. The Permanent Council of the Organization of American States will hold a regular meeting. Location: Simon Bolivar Hall, 17th Street & Constitution Avenue, NW. Contacts: n/a, 202-370-5437

Last Laughs:

LATE NIGHT POLITICAL HUMOR.

Stephen Colbert: “Nation, I got to tell you, folks, I am furious at Barack Obama and I am vice-furious at Joe Biden. It seems like every day, another Federal agency reveals their lack of leadership. Case in point – the Bureau of Engraving and Printing has just produced a portrait of Chief Justice Roberts that in no way captures the elfin twinkle in his eye. This kind of work and I’m supposed to spend the money these people print? No thanks.”

Stephen Colbert: [Referring to the Veterans Affairs scandal involving alleged secret waiting lists and falsified records.] “There are now similar claims in 12 states and the American Legion has called for the Secretary of Veterans Affairs, Eric Shinseki, to resign. So far he has refused. Probably because he knows once he retires,

he'll have to use healthcare from the VA."

Stephen Colbert: "Now, get this – the Obama people now say the President first learned of these new allegations from CNN. He had no clue what's going on in his own Administration. Here's an idea – get the NSA to start spying on Wolf Blitzer."

Conan O'Brien: "This week, 'Price Is Right' fans were upset when the show was interrupted by a speech by President Obama, which is why today it was reported that Obama's approval rating has come on down."

Conan O'Brien: "Speaking of the White House, the White House website has a new feature where you can go on a virtual tour of the White House. ... So far, the most popular destinations are the Lincoln Bedroom, the Bill Clinton bedroom, and the Hillary Clinton bedroom. They sleep separately."

DOI in the News:

SECRETARY JEWELL HIKES AT ORGAN MOUNTAINS-DESERT PEAKS NATIONAL MONUMENT. The [Albuquerque \(NM\) Journal](#) (5/27, 282K) reports that last Friday, Interior Secretary Sally Jewell "arrived from Washington, D.C., to hike a small slice of the 496,000 acres of Doña Ana County now officially known as the Organ Mountains-Desert Peaks National Monument." Later, Jewell "celebrated the new monument designation with local leaders and residents at a high school." Jewell said, "To be able to protect something like this as a monument is the sort of thing I knew happened on occasion. It's just a real blessing to have this happen while I'm in this job. It's pretty major."

The [Las Cruces \(NM\) Sun-News](#) (5/27, 59K) reports that Jewell was joined by BLM Director Neil Komze, White House Council on Environmental Quality Acting Chair Mike Boots, Sens. Tom Udall and Martin Heinrich, and community and business leaders in Las Cruces and Mesilla. Jewell said, "Today is the culmination of a community-led effort to conserve, protect and promote these public lands, but it's the beginning of a new chapter for the businesses that will benefit from the tourism and recreation, and the wildlife that rely on this unique habitat. The Organ Mountains and surrounding desert peaks are steeped in culture, history, wildlife and opportunities to enjoy the great outdoors — from hunting to hiking to gazing at ancient petroglyphs and fossils — and the president's action ensures that these cherished landscapes are celebrated and passed on to the generations of New Mexicans and Americans to come." The story also appears at the [Silver City \(NM\) Sun-News](#) (5/27, 24K).

The Fronteras (5/27) reports that "supporters say the monument will bring new jobs and tourism to the region." However, "not everyone is convinced." The article notes that some are "concerned with a portion of the monument that comes within five miles of the US-Mexico border."

Also providing coverage are the Los Angeles Times (5/27, Glionna, 3.46M), the Las Cruces (NM) Sun-News (5/27, 59K), the Silver City (NM) Sun-News (5/27, 24K), the Indian Country Today Media Network (5/23, 45K), KDBC-TV El Paso, TX (5/27, 139), and KTSM-TV El Paso, TX (5/27, 970).

Veteran Supports Designation. In an op-ed for the Las Cruces (NM) Sun-News (5/27, 59K), Bernie Digma is a Las Cruces resident and US Army veteran, writes that "as a veteran who understands and appreciates the military contribution to our country, the Organ Mountains Desert-Peaks also is home to some more recent pieces of history that are particularly important to veterans." He notes that "another reason why the new Organ Mountains-Desert Peaks National Monument is so important is that, despite what we already know about the regions' historical artifacts, there is still so much yet to be discovered."

Idaho Conservation League Calls New Monument A Good Sign. The Idaho Mountain Express (5/27, 36K) reports that "the Idaho Conservation League is calling President Barack Obama's designation of a new national monument in New Mexico a sign of a willingness to do the same for the Boulder-White Cloud Mountains in Idaho." ICL Central Idaho Associate Dani Mazzotta said, "The Organ Mountains effort is similar to the Boulder-White Clouds in many ways. Both places have collaboratively built legislative wilderness bills. Both bills have met Congress' gridlock. The Organ Mountains deserved to be honored for the spectacular place they are. We hope the Boulder-White Clouds are next."

SECRETARY JEWELL DELIVERS COMMENCEMENT SPEECH AT WHITMAN COLLEGE. The Walla Walla (WA) Union-Bulletin (5/26, 38K) reports that "with soon-to-be graduates, parents, faculty and alumni splayed out on the South Memorial Lawn on Sunday at Whitman College before her, commencement speaker Sally Jewell urged the Class of 2014 to 'make your strand count.'" Jewell urged "the approximately 390 graduates to stay involved in their communities." She said, "Once you leave Whitman, stay involved, stay engaged. Be part of your community, whatever community means to you. It might be a little harder to volunteer, or it might require more effort to find a compost club, but I guarantee it's going to lead to some of your most rewarding experiences and take you places you never expect."

RULE AIMS AT RECOGNITION FOR NATIVE HAWAIIANS. The Hawaii Free Press (5/27) reports that the Obama Administration is "considering an end-run around Congress and the voters by creating a Native Hawaiian governing entity via executive action." The Interior Department has "issued an advance notice of proposed rule-making (ANPR) in order to, 'solicit public comments on whether and how the Department of the Interior should facilitate the reestablishment of a government-to-government relationship with the Native Hawaiian community.'" The article notes that "the move was not unexpected, given the stated intention of the Office of Hawaiian Affairs that it would follow up the Native Hawaiian Roll, election, and Constitutional Convention with an effort to seek federal recognition."

For the Washington Examiner (5/27, 335K), Michael Barone, a political analyst, criticizes "the proposal to treat Native Hawaiians like an Indian tribe." He argues that "if the Interior Department pushes ahead on this, it will be violating the Constitution by usurping Congress' power to make laws and by imposing a system of racial discrimination."

Also providing coverage are the Honolulu Star-Advertiser (5/27, 402K) and the Hawaii Free Press (5/27).

INTERIOR DEPUTY SECRETARY TO PARTICIPATE IN MEETING ON ENERGY INFRASTRUCTURE. The Houma (LA) Courier (5/26, 48K) reports that Interior Deputy Secretary Mike Connor will be in New Orleans for a meeting that will focus on petroleum energy infrastructure.

INTERIOR HONORS HISTORIC PRESERVATION WORK. The AP (5/27) reports that the Interior Department has "honored a retired city of Okmulgee employee for her work in historic preservation." Dana Sigmon was "one of four government employees from across the nation awarded the Secretary of the Interior Historic Preservation Award." In addition to Sigmon, employees from the FWS, the Idaho State Historic Preservation Office and the Navajo Nation's Historic Preservation Office were honored.

OBAMA ADMINISTRATION TO COUNT GUNS. The Hill (5/27, Devaney, 237K) reports that the Justice Department is "updating a report on how many guns the federal government has." The article notes that "it will be the first time Justice has addressed the topic in six years, and it comes as conservative and libertarian complaints about an excessively gun-happy government have intensified." The issue was "central to the recent controversy generated by a stand-off between right-wing rancher Cliven Bundy and agents from the Bureau of Land Management in Nevada."

America's Great Outdoors:

National Park Service:

INDIAN SITE IN VIRGINIA COULD BE ADDED TO NPS. The AP (5/27) reports that "land along the York River that archaeologists believe was the center of a vast Indian empire before the first Europeans settled in Virginia is gaining White House attention as a possible addition to the National Park System." President Barack Obama has "set aside \$6 million to acquire more than 250 acres of the former Indian village in Gloucester to achieve that goal." Congress "must approve the funding in the 2015 funding proposal."

NPS SEEKS TO EASE TENSIONS WITH POINT REYES FARMERS. The Los Angeles Times (5/27, Cart, 3.46M) reports that farmers and ranchers at Point Reyes National Seashore have "a list of grievances against a federal government they say burdens their operations with needless red tape." The article notes that "aware of those concerns, in 2012 then-Interior Secretary Ken Salazar issued an order spelling out the park's intention to continue hosting the cattle ranches and dairy farms," but "it did little to calm the fears." So as part of park Supt. Cicely Muldoon's "outreach, she and other parks officials are working to formalize Salazar's order and craft new 20-year leases for dairy and cattle operators."

WORKS PROGRESS ADMINISTRATION POSTERS CELEBRATE NATIONAL PARKS. NPR (5/27, Naylor, 519K) reports that "silk screen printed posters — known as serigraph — were done by Works Progress Administration artists for the NPS from 1938 to 1941" According to the article, some of those prints are "currently on display in an exhibit called 'Posterity' at the US Department of the Interior in Washington, D.C." The exhibit will be on view until spring 2015.

FUNGUS KILLS TREES IN FLORIDA EVERGLADES. The Sacramento (CA) Bee (5/25, 687K) reports that "a plant disease blazing through South Florida is killing off swamp bay trees, an important part of the architecture of the Everglades that provides food for a vast range of wildlife and traditional medicine for the Seminole Tribe." Laurel wilt disease, "a fungus carried by a beetle the size of a grain of rice, has been detected across more than 500 square miles of the Everglades, according to a forthcoming paper by state and federal scientists." The article notes that "since first being detected east of Everglades National Park in 2011, the disease has spread across about one-sixth of the Everglades."

NPS PROPOSE FEES FOR MINUTEMAN MISSILE SITE. The AP (5/27) reports that the NPS has proposed a fee for the guided tours at Minuteman Missile National Historic Site. The agency has "proposed a \$6 fee for adults and \$4 for children ages 13 to 16." Christopher Wilkinson, the park's spokesman, said "the fees would allow the park to offer more ranger-led tours."

Bureau of Land Management:

RANCHER RIDES ACROSS NEVADA IN PROTEST OF BLM. The AP (5/27) reports that Elko County Commissioner Grant Gerber "saddled up his horse before sunrise on Memorial Day and set out on a 70-mile trek across northern Nevada to protest livestock grazing reductions on federal land." Gerber's "destination is Carson City by week's end to present a petition to Gov. Brian Sandoval urging the removal of Doug Furtado as head of the US Bureau of Land Management's Battle Mountain District." According to the article, "the multiday ride is modeled after the 'Salt March' led by the Indian independence leader, Gandhi, that protested the British colonial monopoly on salt in 1930."

In a separate story, the AP (5/27, Sonner) reports that Gerber said Battle Mountain "became the destination

because it's the county seat in Lander County, where he said some of the most dramatic livestock grazing reductions are occurring." Gerber said the BLM has "ordered the closure of the Argenta allotment covering about 540 square miles in the county, about half of which is on federal land." BLM spokeswoman Erica Szlosek said "that's 'not accurate' and the fate of the allotment remained uncertain." Szlosek said, "We could issue a decision to close it – a full force and effect decision – but that has not occurred. We've been meeting with the permittees on the Argenta allotment, but they still are talking back and forth. No final decision has been made."

Also providing coverage is the [Elko \(NV\) Daily Free Press](#) (5/27, 22K).

BLM, Ranchers Reach Temporary Agreement. The [Elko \(NV\) Daily Free Press](#) (5/27, 22K) reports that Lander County ranchers "reached a temporary agreement Friday with the Bureau of Land Management to graze the Mount Lewis pasture of the Argenta Allotment." The bureau "issued two-week licenses to the families and promised a formal decision within that time." However, "the agreement did not shake the resolve of Elko County Commissioner Grant Gerber to begin his Grass March to Battle Mountain."

BLM TALKING TO RED RIVER LANDOWNERS ON TUESDAY. [KFDX-TV](#) Wichita Falls, TX (5/27, 2K) reports that on Tuesday the BLM will "be at the Clay County commissioners meeting to discuss their planning efforts and answer any questions or concerns" Red River land owners may have. The article notes that "one key topic will be a legal tool called 'recreation and public purpose' which allows the BLM to lease or convey public land to a state or city."

Fish and Wildlife Service:

REPUBLICANS WANTS TO BLOCK SAGE GROUSE ENDANGERED SPECIES LISTING. [The Hill](#) (5/26, Cama, 237K) reports that "five Republican lawmakers have introduced a bill that would block the federal government from listing the sage grouse as an endangered species, instead relying on state conservation efforts to protect the bird." Sen. Mike Enzi, and Reps. Cory Gardner, Rob Bishop, Steve Daines and Scott Tipton said "their bill, the Sage Grouse Protection Conservation Act, encourages states to work with the Interior and Agriculture departments to protect both the greater sage grouse and the smaller Gunnison grouse."

Also covering the story is [Politico](#) (5/27, Evich, 637K).

FWS RESTARTING REVIEWS ON PROPOSED ROSEMONT MINE'S IMPACT. The [Arizona Daily Star](#) (5/27, 389K) reports that the FWS "formally announced Friday that it will restart reviews of the proposed Rosemont Mine's impacts on eight endangered species including the ocelot." The article notes that "the reviews guarantee another delay for the mine after seven years of permitting efforts."

LAWMAKERS URGES FWS TO REEVALUATE NORTHERN LONG-EARED BAT PROPOSAL. The [Wellsboro \(PA\) Gazette](#) (5/27, 19K) reports that Rep. Glenn 'GT' Thompson, "joined by eight members of the Pennsylvania delegation to the US House of Representatives, sent a letter to the US Department of the Interior (DOI) and the US Fish and Wildlife Service (FWS) urging the agencies to reevaluate their proposal to list the Northern Long-Eared Bat as an endangered species." The members cite "the scientific data used by FWS as the basis for the designation as inadequate and caution that moving forward with the listing would constitute a 'fundamentally ineffective' approach to species restoration, while imposing an unnecessary and harmful impact upon Pennsylvania's economy."

FWS WOULD PAY FLORIDA LANDOWNERS FOR PANTHER HABITAT. The [AP](#) (5/27) reports that "federal wildlife officials want to pay Florida landowners to maintain their property as habitat for endangered panthers." Under a pilot program announced Thursday by the FWS, "the government would spend \$500,000 a year to pay landowners to preserve about 26,000 acres for about 10 years."

FWS WORKING TO RESTORE RIVER HERRING. The [Springfield \(MA\) Republican](#) (5/27, 307K) reports that the FWS is "actively working with state and local partners to restore river herring to historical populations in Massachusetts and Connecticut." According to the article, "agency employees, who started the work this year in early April, plan to continue efforts well into the spring, after river herring populations plummeted in recent years."

EXPERIMENT SEEKS TO HELP MEXICAN GRAY WOLF PUPS. The Albuquerque (NM) Journal (5/27, 282K) reports that "with threats of disease, malnutrition and even inbreeding, the deck can be stacked against a Mexican gray wolf pup." Federal wildlife managers have "long been troubled by the survival rates of wild-born pups, so they've started experimenting in an effort to boost the population as they reintroduce the endangered predator to the American Southwest." EBiologists earlier this month, biologists "transplanted a pair of 2-week-old pups born in a large litter to another pack of wolves with a smaller litter and more rearing experience."

ADDITIONAL COVERAGE OF FUNDING FOR FISH HATCHERIES. Additional coverage of the possible closures of national fish hatcheries because of budget issues was provided by the Oklahoman (5/27, 530K).

Securing America's Energy Future:

Onshore Energy Development:

MURKOWSKI INTRODUCES BILLS TO BOOST ARCTIC DRILLING. The AP (5/27, 455K) reported that Sen. Lisa Murkowski "has introduced legislation that would allow for drilling in the Arctic National Wildlife Refuge." According to the AP, "one would allow for oil and gas drilling on the coastal plain of the refuge; the other would allow for directional drilling from outside the refuge to tap oil and gas." Rep. Don Young has introduced "similar legislation" in the House.

The "Floor Action" blog of The Hill (5/27, Cox, 237K) reported Murkowski stated, "I am introducing these bills because new production in northern Alaska is vital to my state's future and global energy security. ... As we continue to struggle with high long-term unemployment and unsustainable national debt, we need to pursue development opportunities more than ever."

FWS Mulls Managing Private Refuge Development. The AP (5/27, Bohrer) reports that the FWS is "considering new rules for managing the development of private, state or tribally owned mineral interests within the national refuge system, prompting concerns from officials in Alaska who say it flies in the face of existing laws." The article notes that "the effort follows reports from the Government Accountability Office in 2003 and 2007, calling on the agency to improve oversight and management of oil and gas activities." However, "state officials point to the Alaska National Interest Land Conservation Act, or ANILCA, and the Alaska Native Claims Settlement Act, which they say apply unique provisions for nonfederal oil and gas development to lands in Alaska within refuge boundaries."

OIL COMPANIES SAY NEW FEDERAL REGULATIONS ON LESSER-PRAIRIE CHICKEN HAVE HALTED DRILLING IN KANSAS. FOX News (5/24, 6.72M) reports that "oil companies say a weeks-old Obama administration ruling that protects" the lesser-prairie chicken has "already halted oil-drilling operations in Kansas and is costing the US economy tens of millions of dollars, as a GOP congressmen suggests the move is another job-killing attack on fossil fuel." The decision by the FWS that was "announced in late March and took effect May 1 includes a provision that should allow federal officials and landowners in the five impacted states – Colorado, Kansas, New Mexico, Oklahoma and Texas – to manage conservation efforts." However, "oil producers say the interim weeks was too little time for them to digest the regulations and figure out how to avoid the potential criminal and civil penalties."

Meanwhile, the AP (5/27, Marso) reports that "leaders of the Kansas Legislature and Gov. Sam Brownback recently passed a law barring the US Fish and Wildlife Service from protecting the lesser prairie chicken in Kansas." However, "experts on both coasts said that when birds were listed as threatened in other states, it had some impact on economic development but wasn't entirely prohibitive."

LAWSUIT SEEKS TO BLOCK EXPANSION OF COLORADO COAL MINE. The Summit County (CO) Citizens Voice (5/25, 506) reports that "federal officials may have failed to adequately assess the environmental impacts of more coal mining in northwestern Colorado, according a conservation group that's suing the Bureau of Land Management over an expansion permit for the Deserado coal mine, located in Rio Blanco County in northwestern Colorado directly south of Dinosaur National Monument." According to WildEarth Guardians, the bureau "failed to address air quality impacts from fossil fuel combustion from the Bonanza facility." Jeremy Nichols, WildEarth Guardians' Climate and Energy Program Director, said, "The Interior Department is sacrificing the west to dirty

energy. More coal mining means more carbon pollution, more air contamination, and no clean energy. At a time when climate change is wreaking havoc on the west, the last thing Interior should be approving is more coal."

Also reporting on the story is the [Law 360](#) (5/27, 18K).

BLM SAYS SOUTHWEST UTAH OIL LEAK CONTAINED. The [AP](#) (5/27) reports that BLM officials say "an oil leak in a southeast Utah field has been contained." BLM field manager Beth Ransel says "officials do not believe oil reached the Green River and are still trying to determine how much was leaked."

Offshore Energy Development:

INTERIOR RELEASES TIMELINE FOR ARCTIC LEASE REVIEW. The [AP](#) (5/27) reports that the Interior Department has "laid out a timeline for completion of a new environmental review surrounding leases in the Arctic waters off Alaska." The government, in filings with the trial court Friday, said that the BOEM is "undertaking a new review to correct the problems." Also providing coverage are the [Alaska Public Radio Network](#) (5/26, 2K) and the [Alaska Native News](#) (5/27, 245).

ACTOR TO PARTICIPATE IN CONGRESSIONAL BRIEFING ON OFFSHORE SEISMIC RESEARCH. FuelFix (5/23, 7K) reported that the conservation group Oceana "is hoping a little star power will draw more attention to its concerns about seismic oil and gas research proposed in Atlantic waters." When the group "holds a congressional briefing on the subject Thursday, the event's moderator will be Reid Scott, an actor best known for his portrayal of communication director Dan Eagan on HBO's 'Veep.'" In addition "less high-profile speakers" will speak at the hearing including "East Coast lawmakers and a seismic researcher from Duke University."

Meanwhile, the [New Jersey](#) (5/27, 653K) reports that "both recreational and commercial fishing representatives joined environmentalists at a Point Pleasant Beach rally Friday morning in an effort to postpone the Rutgers University project approved by the Obama Administration as a climate change study designed to access deep sea sediments." The article notes that "it's set to begin off the coast on June 3, and will utilize high energy seismic blasting that could disturb fish and marine mammal populations."

Tackling America's Water Challenges:

BOR INVESTS \$20 MILLION IN CALIFORNIA WATER PROJECTS. The [Inland Valley \(CA\) Daily Bulletin](#) (5/23, 120K) reports that the BOR is "investing \$20 million in federal funding for nine California projects, including two in the Inland Empire: the Chino Basin Desalination project and the Southern California Desert Region Integrated Water and Economic Sustainability Plan." The article notes that "the projects are funded under a federally funded initiative called the WaterSMART program, which provides funding for projects that reclaim and reuse wastewater."

The [Napa Valley \(CA\) Register](#) (5/27, 36K) reports that "the Napa Sanitation District is getting \$1.5 million in federal funding to help expand its recycled water treatment program, as well as to help pay for a recycled water pipeline to the Coombsville area." The article notes that "it's the fourth year in a row the sanitation district has received federal funding through a US Bureau of Reclamation program known as Water-SMART." According to the article, "this year, the district will receive money to help pay for filters, pump stations and construction of the pipeline, which will deliver reclaimed water to irrigators, residents and owners of the Napa Valley Country Club, helping wean them off groundwater usage."

BOR DIVERTING WATER FROM HORSETOOTH RESERVOIR. The [Loveland \(CO\) Reporter-Herald](#) (5/27, 52K) reports that "water is being diverted from Horsetooth Reservoir back into the Big Thompson River at the canyon mouth as of Sunday evening." According to public information officer Kara Lamb with BOR, "550 cubic feet per second of snowmelt and rain runoff was being diverted over the weekend from Olympus tunnel through the Pole Hill and Flatiron power plants to Charles Hansen Feeder Canal 13 miles away into Horsetooth Reservoir." And "another 500 cfs of water was coming through Olympus Dam down the canyon."

Also reporting on the story is the [Estes Park \(CO\) Trail-Gazette](#) (5/27, 13K).

BOR CONSIDERING PLANS TO PROTECT POWER GENERATION AT LAKE POWELL. KUTV-TV Salt Lake City (5/27, 7K) reports that "the prolonged drought on the Colorado River Basin has the US Bureau of Reclamation considering contingency plans to protect power generation at Lake Powell's Glen Canyon Dam." According to the article, "even though this year's spring runoff is boosting water levels behind the dam, observers say it's not enough to reverse the effects of a decade-long drought."

BOR TO OPEN DELTA CROSS CHANNEL GATES. The Central Valley (CA) Business Times (5/27, 206) reports that the BOR said "it will open the Delta Cross Channel Gates on Friday, May 23, at approximately 10 a.m., to allow for recreational boating through the Memorial Day weekend."

Empowering Native American Communities:

INTERIOR PROPOSES RULES TO MAKE IT EASIER FOR TRIBES TO GAIN RECOGNITION. The Washington Post (5/26, Melia, 4.22M) reports that the Interior Department on Thursday announced "proposed changes to the rules for granting federal recognition to American Indian tribes," which "could make it easier for some groups to achieve status that brings increased benefits as well as opportunities for commercial development." The BIA "said it overhauled the rules to make tribal acknowledgment more transparent and efficient."

Also providing coverage are the Hartford (CT) Courant (5/27, 599K), the Ridgefield (CT) Press (5/27, 20K), the Waterbury (CT) Republican-American (5/27, 145K), the Cherokee (OK) Phoenix (5/27, 442), the National Journal (5/27, Subscription Publication, 561K), the Nation Sun News (5/27), and the Latin Post (5/26).

The Hartford (CT) Courant (5/22, 599K) editorializes that Interior Secretary Sally Jewell "ought to scrap the whole exercise." According to the paper, "there was nothing wrong with the criteria for recognition that have been in place for the past 35 years; they are fair and sensible." It argues that "tribes that didn't win recognition under that process should be subject to more scrutiny, not less."

The Norwich (CT) Bulletin (5/24, 47K) editorializes that the decision "raises some interesting legal questions for state and tribal officials." It notes that "the less stringent criteria to achieve recognition is expected to make it easier for three state-recognized tribes – the Eastern Pequots in North Stonington, the Golden Hill Paugussetts in Colchester and the Schaghticokes in Kent – to have their applications for federal recognition viewed more favorably." The concern is "that could lead to three new Indian-run casinos in the state."

OBAMA TO VISIT AMERICAN INDIAN RESERVATION IN NORTH DAKOTA NEXT MONTH. The Washington Post (5/24, Horwitz, 4.22M) reports that President Obama plans "to travel to a Native American reservation in North Dakota in June, a rare visit by a sitting U.S. president to Indian country," according to "officials familiar with the plans." It is not clear what reservation Obama will visit, but "his senior policy adviser for Native American affairs, Jodi Gillette, is a member of the Standing Rock Sioux Tribe in North Dakota, where her brother is the chairman." The Hill (5/23, Sink, 237K) reported that "during a speech at last year's White House Tribal Nations Conference, Obama pledged that he would make his first visit to Indian Country sometime in 2014."

In related news, the Wall Street Journal (5/24, Frosch, Subscription Publication, 5.51M) has a feature on members of the Eastern Shoshone and Northern Arapaho tribes who recently received settlement checks from the Federal government over a mineral royalties suit.

SETTLEMENT ENRICHES TWO WYOMING TRIBES. The Wall Street Journal (5/27, Frosch, Subscription Publication, 5.51M) reports on the payments received by members of the Eastern Shoshone and Northern Arapaho tribes after a \$157 million settlement was reached that ended a long-running dispute with the US over unpaid mineral royalties. The article notes that during the past several years, the Obama Administration has settled lawsuits filed by dozens of tribes, who have long claimed the government mismanaged tribal trust land. The settlements have resulted in payouts of more than \$1 billion.

BLACKFEET BIA VICTIM SPECIALIST WORKS FOR PUBLIC SAFETY. The Great Falls (MT) Tribune (5/24, 90K) reports on the work of Wendy Bremner, a BIA victim specialist. In March, Bremner was "honored by the state US Attorney's Office for her contribution to public safety in Indian Country."

Top National News:

VA SCANDAL OVERSHADOWS OBAMA'S MEMORIAL DAY COMMEMORATION. Although President Obama only briefly alluded to the VA scandal in his Memorial Day remarks at Arlington National Cemetery on Monday, most of coverage of his appearance, including two of the three network newscast segments on the topic, put it in the context of the growing outrage over the VA's treatment of sick veterans.

On NBC Nightly News (5/26, story 2, 2:15, McFadden, 7.86M), Cynthia McFadden said that on Monday, the President "took time to address the growing VA scandal." Correspondent Peter Alexander went on to report from the White House that the President "alluded to the scandal," and that the President himself is "facing tough scrutiny over how the US has served its veterans." Alexander said that "in a clear reference to that growing VA scandal," the President "emphasized that American veterans must get the care and benefits that he says they have earned and deserve." Alexander added that earlier on Monday morning, Vice President Biden "was more blunt." Biden was shown saying: "We're behind right now. The VA is having problems, and we have got to get to the bottom of it."

On the CBS Evening News (5/26, story 3, 0:50, Axelrod, 5.08M), Jim Axelrod reported that on Monday, the President "led the nation...in honoring all who have served America in uniform," and "also mentioned the VA scandal in which veterans allegedly died waiting for treatment at VA hospitals." ABC World News (5/26, story 7, 1:40, Muir) covered the President's tribute to America's fallen veterans without reference to the VA scandal.

USA Today (5/27, Jackson, 5.82M) reported that Memorial Day took place "amid news about long wait times for patients at Veterans Affairs hospitals, delays that may have led to deaths." USA Today says that on Monday, the President "did not specifically mention the VA controversy...but did note the obligation that the nation owes its veterans."

The AP (5/27, Yost) says the President "made a fleeting reference to the widening scandal involving reports of poor performance by" the VA. The AP notes that VA Secretary Shinseki was at Arlington as the President spoke on Monday.

Under the headline, "At Arlington, Obama Pledges To Care For Veterans," the Washington Times (5/27, Boyer, 455K) says the President was "seeking to reassure military families that his administration hasn't forgotten them." The Times notes that on Monday, the President "didn't single out" Shinseki "by name as he did at the same ceremony one year ago." The Times also reports that on NBC's Today Show on Monday, Paul Rieckhoff, executive director of Iraq and Afghanistan Veterans of America, said his fellow veterans have "lost faith in the VA, in Secretary Shinseki and in the president."

In the lead story for Fox News' Special Report (5/26, 2.15M), Shannon Bream said, "Many of those who survived their military service continue to receive substandard care or no care at all." Correspondent Wendell Goler went on to report from the White House that "the VA scandal cast a cloud over this day of remembrance." According to Goler, "Almost everything [Obama] does now as commander in chief is seen through the lens of the VA scandal" although the White House insists his "surprise trip to Afghanistan" on Sunday "had nothing to do with the controversy."

The Los Angeles Times (5/27, Stewart, 3.46M) says that on Monday, the President "alluded to the controversy, in which some VA hospitals allegedly falsified documents to hide the fact that some veterans had to wait months or even years for care – contrary to VA policy that requires an appointment within 14 days."

Reuters (5/27, Mason) covers the President's remarks in an article titled, "With Nod To Veterans' Scandal, Obama Pays Memorial Day Tribute." Reuters quotes the President as saying, "As we've been reminded in recent days, we must do more to keep faith with our veterans and their families, and ensure they get the care and benefits and opportunities that they've earned and that they deserve." The Wall Street Journal (5/27, Tracy, 5.51M) reports on the President's Memorial Day tribute to veterans under the headline, "Obama Addresses Veteran Care In Memorial Day Speech." The Hill (5/26, Hattem, 237K) reported that the President "briefly addressed the growing crisis" on Monday.

The Washington Post (5/27, Fahrenthold, Olivo, 4.22M) reports that at Arlington on Monday, "a large number of people were turned away from the cemetery's entrances by security personnel who said that the event was at capacity." According to the Post, an Arlington spokeswoman "said afterward that the gates had been closed only briefly to secure the area for Obama's arrival." On the CBS Evening News (5/26, story 10, 3:00, Axelrod, 5.08M), Jim Axelrod reported that "new management has done much to restore order at America's premier military cemetery four years after revelations of misplaced remains and misidentified graves."

WPost A1: Shinseki Facing Pressure From Groups Representing Younger Veterans. In a front-page article titled, "In VA Crisis, A General's Deliberate Style Clashes With Impatience Of Young Veterans," the Washington Post (5/27, A1, Jaffe, 4.22M) reports that "the question facing President Obama as he seeks to contain yet another widening VA scandal is whether" Secretary Shinseki's "quiet and resolute professionalism still works in an age of noisy disputation." According to the Post, Shinseki "has had to balance the demands of traditionally staid, old-line veterans groups...with a new generation of digitally savvy and increasingly vocal veterans of the wars in Iraq and Afghanistan." The Post goes on to report that "no group exemplifies this shift more clearly than Iraq and Afghanistan Veterans of America," which has "been a relentless presence on Capitol Hill, online and in the national media, criticizing Shinseki's leadership," and has "drawn the ire of VA officials."

The University of Virginia's Larry Sabato, in a piece for Politico Magazine (5/27, 633K), says it would be "out of character" for the President to demand that Shinseki resign. According to Sabato, "Except for Gen. Stanley McChrystal, it is hard to think of any significant appointee shown the door during Obama's first five years." The Washington Post (5/27, 4.22M), in an editorial, says the VA scandal is not "a Shinseki problem," but, instead, "a President Obama problem" and "a Congress problem."

VA Accused Of Neglecting Older Veterans As It Focuses On New Claims. USA Today (5/27, Kennedy, 5.82M) reports that "cases involving the appeal of veterans benefits rulings take almost 19 months to resolve...and advocates say the crush of new claims is hurting older veterans." According to USA Today, "at least 350,000 veterans of wars before those in Iraq and Afghanistan have outstanding appeals of benefits decisions." USA Today says the VA has "touted how much it has cut the backlog of benefits claims that have taken longer than 125 days to resolve" but Glenn Bergmann, "a former VA attorney who now fights veterans' appeals cases," contends that "progress in resolving initial benefits claims has come at the expense of settling older claims." Bergmann is quoted as saying, "These veterans have been abandoned again. ... They're dying while they're waiting."

Veterans Groups Blast Burr For Suggesting They Have Been Too Easy On Shinseki. The New York Times (5/27, A11, Weisman, Subscription Publication, 9.65M) reports that Sen. Richard Burr's "open letter...to the nation's veterans in which he castigates the leadership of veterans organizations has prompted a brutal war of words." According to the Times, Burr, "angry that only the American Legion has called for the resignation of" Secretary Shinseki, "accused the groups of being 'more interested in defending the status quo within the V.A., protecting their relationships with the agency, and securing access to the secretary and his inner circle,' than helping members." The Times reports that in a representative response, Joseph Johnston, national commander of the Disabled American Veterans, wrote: "Regrettably, Senator Burr shows no interest in pursuing policy solutions, preferring instead to launch cheap political attacks on the integrity of leaders of veterans organizations that do not agree with him."

Veterans Bodies Remained At Morgue For 18 Months. The Washington Times (5/27, Chumley, 455K) reports that "the bodies of 28 US veterans that have been lying in a Southern California morgue for the last 18 months or so waiting for someone to claim them will finally receive proper burials." According to the Times, the VA and "morgue officials accused each other for the delayed burials."

Top VA Official Reportedly Lied About Obtaining Masters Degree. The Washington Times (5/27, McElhatton, 455K) reports that the VA has retained Sheila Cullen as "a high-ranking senior executive in charge of a more than \$1 billion network of hospitals and clinics despite learning she had falsely claimed to have a master's degree in official records for years." According to the Times, Cullen "remains on the job" despite the fact that the VA was "informed about the falsifications in 2009."

At Event With Vets, Biden Riffs On Much-Noted 2010 ACA Signing Ceremony Commentary. Hadas Gold, in a post for Politico (5/26, 637K), reported that before Vice President Biden spoke at "the kickoff of the Road 2

Recovery Memorial Challenge in which cyclists, including injured veterans, ride from Washington to Virginia Beach," an unidentified man "introducing Biden...said the ride was also a 'big f—ing deal,'" a reference to the comment Biden made to President Obama as he signed the affordable Care Act in 2010. Gold reports that in his remarks on Monday, Biden said, "Thank God my mother was gone or I'd have been one dead vice president."

De Blasio Remembers His WWII Veteran Father. The New York Times (5/27, Correal, Subscription Publication, 9.65M) reports that in remarks on Monday, New York Mayor Bill de Blasio "drew on memories of his own father, a World War II veteran who lost part of his leg in combat."

ADMINISTRATION TO UNVEIL CLIMATE CHANGE PROPOSALS NEXT WEEK. In a front-page story, the Wall Street Journal (5/27, A1, Harder, Subscription Publication, 5.51M) reports that the Administration next week will release key climate-change regulations, including a rule designed to allow states to implement a cap-and-trade system, and renewable energy proposals, among other things. For companies likely to be impacted, the key issue will be details, though the Administration appears to be favoring flexibility.

The New York Times (5/27, Davenport, Subscription Publication, 9.65M) reports that foreign governments are watching the President's expected announcement of the new EPA regulations of the 600 existing coal-fire plants with interest. Government analysts "will scrutinize to determine how serious the president is about fighting global warming."

WMO Says CO2 Levels Topped 400 PPM In Northern Hemisphere Last Month. Reuters (5/27, Visser) reports that the World Meteorological Organization announced on Monday that CO2 levels throughout the northern hemisphere topped 400 PPM for the first time in April. That's up 40% since the start of the industrial revolution. The WMO expects the average CO2 concentration to top 400 PPM globally in the next several years. WMO Secretary-General Michel Jarraud said in a statement, "This should serve as yet another wake-up call about the constantly rising levels of greenhouse gases which are driving climate change. If we are to preserve our planet for future generations, we need urgent action to curb new emissions of these heat-trapping gases."

WTimes Analysis: Potential Conflict Of Interest In DOD Climate Study. The Washington Times (5/27, Scarborough, 455K) reports that retired military officers "deeply involved in the climate change movement" led an "alarmist global warming report this month that calls on the Defense Department to ramp up spending on what it calls a man-made problem." The study was conducted by the Center for Naval Analyses, a non-profit whose parent is CNA Corp., "was funded by a climate change group that is also one of the think tank's main customers."

HOUSE, SENATE LEADERS UNDECIDED ON ENLIST ACT. The Wall Street Journal (5/27, Peterson, Meckler, Subscription Publication, 5.51M) reports that both the House and the Senate are considering the fallout that would result from bringing to a floor vote legislation that would grant green cards to illegal immigrants brought to the US as children who then serve in the military. GOP leaders are concerned that Rep. Jeff Denham's Enlist Act could inflame anti-immigration forces while simultaneously doing little to win them credit from immigration proponents. In the Senate, Democratic leaders generally like the issue, but don't want to limit any chance of the House passing broader legislation.

Activists Seek To Bar Immigration Officials From Courthouses. The New York Times (5/27, Semple, Subscription Publication, 9.65M) reports that for years, "immigration agents have generally refrained from questioning or detaining immigrants in and around locations deemed 'sensitive,' including schools, houses of worship, hospitals and public demonstrations." Now, immigration activists are seeking to add courthouses to that category. They argue "that the use of courthouses by immigration officials deters undocumented immigrants from exercising their constitutional rights of due process."

Editorial Wrap-Up:

NEW YORK TIMES. "A Cable Merger Too Far." The New York Times (5/27, Subscription Publication, 9.65M) editorializes that there are "good reasons the Justice Department and the Federal Communications Commission should block Comcast's \$45 billion acquisition of Time Warner Cable," as the merger would "concentrate too much market power in the hands of one company, creating a telecommunications colossus the likes of which the

country has not seen since 1984 when the government forced the breakup of the original AT&T telephone monopoly." The Times argues that the merger "would fundamentally change the structure of this important industry and give one company too much control over what information, shows, movies and sports Americans can access on TVs and the Internet."

"Leadership On Transgender Civil Rights." An editorial in the New York Times (5/27, Board, Subscription Publication, 9.65M) says a Maryland law extending civil rights protections to transgender people "sets a good example for New York, which fails on this issue of fairness." The Times urges lawmakers in Albany to "approve long-stalled legislation — the Gender Expression Non-Discrimination Act — to outlaw discrimination based on gender identity or expression," and calls on Gov. Andrew Cuomo to "wage a strong and visible fight on this bill, as he did in his successful effort to push through same-sex marriage three years ago."

"Super Secure, Super Late." In an editorial, the New York Times (5/27, Subscription Publication, 9.65M) criticizes the process used to construct a new DHS headquarters, which is suffering from vast delays and massive budget overruns. The Times says that both the Administration and Congress have underfunded the project, and suggests that its value in the end is likely to be limited, as homeland security "still gets done," even without the new facility.

"The C.I.A.'s Deadly Ruse In Pakistan." An editorial in the New York Times (5/27, Subscription Publication, 9.65M) says the CIA's use of a fake vaccination program in its hunt for Osama bin Laden "has produced a lethal backlash in Pakistan where dozens of public health workers have been murdered and fearful parents are shunning polio vaccine for their children." The Times argues that the program "should never have been used in a world where hardworking health care agencies depend on the trust of local communities."

WASHINGTON POST. "The Civil Service Morass." The Washington Post (5/27, 4.22M), in an editorial, says the VA scandal is not "a Shinseki problem," but, instead, "a President Obama problem" and "a Congress problem."

"For Montgomery County Council."

WALL STREET JOURNAL. "Ukraine Chooses The West." In an editorial, the Wall Street Journal (5/27, Subscription Publication, 5.51M) says that the Ukraine voted on Sunday to, effectively, side with the West by selecting Petro Poroshenko as their next president. Still, the Journal says that the result likely does not mean an end to Russian interference.

"The Constitution And The Ferry." The Wall Street Journal (5/27, Subscription Publication, 5.51M) editorializes about a legal case involving Federal regulation of a ferry service in Washington state. The Journal examines the case as evidence of over-reaching Federal regulation, and urges the Supreme Court to take up the case as a way to curb over-regulation.

"A Warning To Europe." An editorial in the Wall Street Journal (5/27, Subscription Publication, 5.51M) argues that the results of the election for the European Parliament should serve as a warning to centrist European politicians that Europe's current economic policy will give rise to political extremism.

"Thailand's 1950s Coup." In an editorial, the Wall Street Journal (5/27, Subscription Publication, 5.51M) says that the old-style coup in Thailand isn't up to dealing with recent developments, such as social media as an organizing tool, and is already showing cracks.

"Beijing's Xinjiang Problem." In an editorial, the Wall Street Journal (5/27, Subscription Publication, 5.51M) says that last Thursday's terrorist attack in China's Xinjiang region is a sign that the country is struggling to deal with Uighur unrest in the region. The Journal says that increasing repression won't solve the problem; only increased self-government and respect for local beliefs will calm the situation.

DOI in the News:

NPS LAUNCHING INITIATIVE TO IDENTIFY, PROMOTE HISTORIC LGBT SITES. The [AP](#) (5/29) reports that the NPS is "launching an initiative to make places and people of significance to the history of lesbian, gay, transgender and bisexual Americans part of the national narrative." Interior Secretary Sally Jewell is "convening a panel of 18 scholars next month that will be charged with exploring the LGBT movement's story in areas such as law, religion, media, civil rights and the arts." According to NPS Director Jonathan Jarvis, "the committee will identify relevant sites and its work will be used to evaluate them for inclusion on the National Register of Historic Places, designation as National Historic Landmarks, or consideration as national monuments."

[Yahoo!](#) (5/29, Ohlheiser, 17.91M) reports that Jewell will announce the panel on Friday. [MSNBC](#) (5/29, 7.96M) reports that "Friday's event will take place at New York City's Stonewall Inn, the historic Greenwich Village bar often considered the birthplace of the modern gay rights movement." The article notes that the initiative is "being supported with a \$250,000 pledged donation from The Gill Foundation, an LGBT organization that funds equality

initiatives.”

The [Pinknews \(UK\)](#) (5/28, 13K) reports that philanthropist Tim Gill said, “While we take this important step to recognize the courageous contributions of LGBT Americans, we need to unite together in the days ahead to ensure we leave none of our fellow Americans behind.”

Coverage by the AP was also picked up by the [Washington Times](#) (5/29, Leff, 455K), the [Minneapolis Star Tribune](#) (5/29, Leff, 1.48M), the [Kingston \(NY\) Daily Freeman](#) (5/28, 73K), the [Sacramento \(CA\) Bee](#) (5/28, 687K), and [Yahoo!](#) (5/29, Leff, 17.91M).

Also reporting on the story is the [Washington Post](#) (5/29, 4.22M).

US MAY PURSUE RELATIONSHIP WITH NATIVE HAWAIIANS. The [Washington Times](#) (5/29, Richardson, 455K) reports that the Obama Administration is “quietly moving again to bypass Congress on yet another policy issue, this time by enacting the much-disputed bill that would grant tribal sovereignty to Native Hawaiians.” The Interior Department “issued a notice of proposed rule-making Friday, before the holiday weekend, to solicit comments on how to ‘facilitate the re-establishment of a government-to-government relationship with the Native Hawaiian community.’”

[WNEM-TV](#) Flint-Saginaw, MI (5/29, 58K) reports that Jessica Kershaw, press secretary for the Interior Department said, “The Department of the Interior is considering publishing an Advanced Notice of Proposed Rulemaking (ANPRM) to help determine whether the Department should develop a formal, administrative process to reestablish a government-to-government relationship with a future Native Hawaiian governing entity.”

In a separate story, the [AP](#) (5/29, Bussewitz) reports that Mark Lawyer, deputy director of policy and regulatory affairs, said Wednesday, “We’re not committed to anything at this point. We just want to hear from the public.” Meanwhile, the Office of Hawaiian Affairs said “it applauds President Barack Obama’s administration for reaffirming the special political relationship between the federal government and Native Hawaiians.” However, critics said the move by the Interior Department “could undermine recent efforts by Native Hawaiians to create an independent government.”

Also reporting on the story are [KITV-TV](#) Honolulu (5/29, 13K) and the [Nation Sun News](#) (5/29).

OIL, MINING RULES DELAYED. The [National Journal](#) (5/29, Subscription Publication, 561K) reports that “on Friday the White House Office of Information and Regulatory Affairs quietly released its Unified Agenda of Regulatory and Deregulatory Actions, a twice-yearly tally of planned federal regulations.” The report “shows that the schedule for” a “long-planned draft rule to set blowout-preventer standards has apparently slipped,” a “plan dating back to President Obama’s first year in office to protect Appalachian streams from mountaintop coal mining is lagging,” and “a separate Interior Department rule that would set safety and chemical disclosure standards for fracking on federal lands has been pushed back too.” According to the article, “for environmentalists, it may be time to worry” because “if delays were to keep piling up, the rules could become more vulnerable.”

OBAMA ADMINISTRATION OFFICIALS TOUR LOUISIANA COAST. [WWNO-FM](#) New Orleans (5/29, 5K) reports that Energy Secretary Ernest Moniz and Deputy Interior Secretary Mike Connor have “gotten their first look at the oil production facilities along the Louisiana coast.” The two “got a bird’s eye view of the energy facilities at work, and the threat they face from coastal erosion.” Connor said that “coastal restoration has national attention.” He said, “We’ve got to do that right, because I think the rest of the country is depending on the lessons that we have learned here in the Gulf. So it’s a very important part of our portfolio at the Interior Department and, overall, I think for the federal government.”

ARMY CORPS TO RECOMMEND LOS ANGELES RIVER PROJECT. The [Los Angeles Times](#) (5/29, Sahagun, 3.46M) reports that “federal officials gave a major boost Wednesday to the city’s plans to turn the Los Angeles River into an urban oasis for recreation and a hub for new commercial and residential development.” The US Army Corps of Engineers said “it has decided to recommend approval of an ambitious, \$1-billion proposal to restore habitat, widen the river, create wetlands and provide access points and bike trails along an 11-mile stretch north of downtown through Elysian Park.” Mayor Eric Garcetti said that “the bulk of the federal money would come from

the Army Corps, with the Department of the Interior and the US Environmental Protection Agency 'looking to aggressively bring money to the table as well.'

ELDER COUNTY COMMISSION PROPOSE CONTROLLING RAVEN POPULATION. The Ogden (UT) Standard-Examiner (5/29, 147K) reports that "the ravens have apparently grown in number in Box Elder County to the point they are picking on the sage grouse and provoking the County Commission." In a letter, commissioners have asked Interior Secretary Sally Jewell to "let federal wildlife officials go after the ravens." The commissioners "propose the use of poisoned eggs that impact only ravens as part of an overall raven control program."

ADDITIONAL COVERAGE OF SUNZIA LINE COMPROMISE. Additional coverage of the compromise proposed for the SunZia Line was provided by the National Journal (5/29, Subscription Publication, 561K), the Albuquerque (NM) Business First (5/29), the NextGov (5/29, 2K), and the CleanTechnica (5/28, 12K),

WSJ CLIMATE DENIAL OP-ED CRITICIZED. For Salon (5/28, 688K), assistant editor Lindsay Abrams criticizes an op-ed in the Wall Street Journal by Joseph Bast, the president of the Heartland Institute and Roy Spencer, a principal research scientist for the University of Alabama in Huntsville and the US Science Team Leader for the Advanced Microwave Scanning Radiometer on NASA's Aqua satellite, for asserting that the figure that "97 percent of scientists agree that man-made climate change is happening" is a "myth." Abrams claims that Bast and Spencer are "motivated to debunk the 97 percent 'myth' because they have a vested interest, via their affiliation with Heartland, in getting the public to believe that the scientists are a lot less certain about the reality of man-made climate change than they actually are." Also, Abrams notes that Bast and Spencer are what "really" are "trying to do is keep us from moving on to the actual debate, which is no longer about whether scientists agree that climate change is happening: it's about whether the world should continue to barrel down the highway at breakneck speeds without the benefit of seat belts."

US Chamber Says President's Climate Plan Has Significant Economic Downside. Bloomberg News (5/29, Drajem, 2.76M) reports that the US Chamber of Commerce released a report arguing that the President's climate change plan could cost the national economy "\$50 billion per a year" and the "elimination of 224,000 jobs." The release of the Chamber report, along with another expected from the Natural Resources Defense Council, signals "that the political battle over the president's plan will be fought over dollars and cents." Bloomberg says that for the President, the risk is the plan "gets labeled a job-killer just as campaigns heat up for an election that could determine control" of the Senate.

In a piece that also mentions the Chamber report but doesn't focus on it, Reuters (5/28, Rampton) reports that the new rules are expected to generate a strong push-back from the nation's industry. As part of that, opponents of the plan are expected to raise the issue in key Senate races in an attempt to raise voter ire.

PROTECTION OF ORGAN MOUNTAINS-DESERT PEAKS REGION LAUDED. In an op-ed for the Albuquerque (NM) Journal (5/29, 282K), Mark Magaña, a board member of the League of Conservation Voters, writes that "this past week, President Obama protected 496,000 acres of New Mexico's Organ Mountains-Desert Peaks region as a national monument, a victory for the Latino community and our heritage." He notes that "this is the third such designation by Obama that celebrates the contributions Hispanics have made to the culture and history of the United States, joining the César E. Chávez and the Rio Grande del Norte National Monuments." According to Magaña, "now that the area has been formally protected and recognized nationally, the area's unique historical and cultural points of interest, along with its spectacular natural beauty, will bring tourism dollars and boost quality of life to the region." Magaña argues that "this designation is also another reminder that Republican leaders in Congress should stop trying to pass legislation to limit the president's ability to designate these historic sites."

America's Great Outdoors:

National Park Service:

NPS INVESTIGATING WASHINGTON MONUMENT ELEVATOR PROBLEMS. Roll Call (5/29, 76K) reports that "after two weeks of sporadic glitches with the Washington Monument's lone elevator," NPS "leaders are dispelling rumors of elevator 'free falls' and reassuring employees that the machinery is safe to operate." In a May 23 memo

to his staff, National Mall and Memorial Parks Superintendent Robert Vogel "acknowledged recurring problems throughout the month of May and said NPS contractor Quality Elevator is continuing to monitor the elevator." Meanwhile, Carol Johnson, spokeswoman for the National Mall and Memorial Parks, "did not respond to inquiries about the cost of replacing the elevator."

RECORDS SHOW NPS REJECTED OFFER TO KEEP OPEN MT. RUSHMORE DURING SHUTDOWN. For the National Review (5/28, 879K), Jillian Kay Melchior, a Thomas L. Rhodes Fellow for the Franklin Center for Government and Public Integrity, writes that "in the early days of last October's government shutdown, South Dakota governor Dennis Daugaard, a Republican, wanted to use state and private funds to keep Mount Rushmore open — an offer the Department of the Interior quickly rebuffed, even as its high-ranking staff circulated accounts of the shutdown's harmful effects on would-be visitors and private-sector park workers." According to Melchior, "evidently the Department of the Interior didn't want the media to know it had so bluntly turned down the governor's detailed proposal, which was accompanied by a logistical addendum that outlined how Daugaard would keep Mount Rushmore equipped with security, parking, concessions, gift shops, and lighting." Melchior notes that records show that the NPS was "well aware of the costs to both visitors and non-governmental workers at Mount Rushmore."

EVERGLADES NATIONAL PARK TAKES CLIMATE CHANGE INITIATIVE. The Miami Today (5/28, 47K) reports that "in order to get the message out, Everglades National Park has instructed staff to approach climate change in conversation with visitors and community members." Larry Perez, science communications liaison for Everglades National Park, said, "We were encouraged by our top brass in Washington for everyone in our organization to communicate internally... [and] to communicate outside the park to our visitor groups and to where our stakeholders are located."

CORMORANT CONTROL POLICY EXTENDED AT SLEEPING BEAR DUNES NATIONAL LAKESHORE. The AP (5/29) reports that Sleeping Bear Dunes National Lakeshore has "received federal permission to continue killing some double-crested cormorants to prevent the fish-gobbling shorebirds from damaging trees with their highly acidic droppings, officials said." Karen Cleveland, a biologist with the Michigan Department of Natural Resources, said, "It doesn't allow you to go 'willy-nilly' with indiscriminate killing. It protects the viability of the species in the state while providing wide latitude for management actions."

ROCKY MOUNTAIN NATIONAL PARK CELEBRATES COMPLETION OF BEAR LAKE ROAD. The Estes Park (CO) Trail-Gazette (5/29, 13K) reports that on Wednesday, Rocky Mountain National Park celebrated the "completion of 12 years of major road construction in the park." The ceremony was scheduled to take place at 11 a.m. at the Moraine Park Discovery Center. The report notes that that a ribbon-cutting ceremony was also scheduled to take place on Bear Lake Road. It adds that the "final phase of construction on" the road "completed the paving of all primary roads in the park." According to the article, officials from the FHWA and the Central Federal Lands Division were expected to attend the ceremony.

HOMESTEAD NATIONAL MONUMENT DONATES GRANT FOR RADIO SYSTEM. KWBE-AM Beatrice, NB (5/28) reports that the Homestead National Monument has "formally donated a grant it has received, to help Gage County update the law enforcement radios to a VHF system." The Gage County Board "accepted a \$50,000 grant from the National Park Service and the monument, for the system." Superintendent of the Homestead National Monument of America, Mark Engler, said "the system has benefits to both the park and the county."

TRIAL STARTS IN LAKE ROOSEVELT ASSAULT. The AP (5/29) reports that "trial is underway in the case of a Kettle Falls man charged with assaulting a National Park Service ranger in the Lake Roosevelt National Recreation Area." According to the article, "a federal court jury was selected Tuesday to hear the case of Michael Sublie, who was arrested in September at the Kettle River Campground." NPS rangers are "expected to testify that Sublie was drunk and disobeyed requests to turn down loud music before shoving a ranger off a ramp."

RESCUERS SAVE HIKER STRANDED ON ROCKY MOUNTAIN PEAK. The AP (5/29) reports that "a 19-year-old Canadian hiker who was stuck on a ledge of the tallest mountain in Rocky Mountain National Park in Colorado has been rescued." According to park officials, "Samuel Frappier of Quebec was flown to a landing zone in the park and taken by ambulance to a hospital Wednesday evening." Frappier was "stranded Tuesday on the east side of Longs Peak while descending from the top of the 14,255-foot precipice."

Additional coverage was provided by the Denver Post (5/29, Nicholson, Gibbons, 940K), the Denver Post (5/29, Kuta, 940K), and ABC News (5/29, 3.58M).

Bureau of Land Management:

CHIEF OF BLM'S COLORADO OPERATION BALANCES MANY INTERESTS. The E&E Daily (5/28) reports on the responsibilities of Ruth Welch, the chief executive of BLM's Colorado operations, who oversees "600 employees and a roughly \$97 million annual budget." In an interview, Welch said noted that she must strike "a fine balance" among the various interest groups because there are "some really outspoken groups on both sides of the fence." Welch "steers" the BLM "along the politically fraught tightrope known as 'multiple use' – its congressional mandate to share the land among ranchers, drillers, off-highway vehicle thrill seekers, wildemess advocates, horses and endangered species."

BLM PURSUING POSSIBLE CONFESSION IN ROCK ART PANEL VANDALISM. The AP (5/29) reports that "authorities investigating the vandalism of a popular rock art panel northeast of Price say they're pursuing a possible confession to the damage." Ahmed Mohsen, the acting field manager for the BLM's Price office, "an individual confessed to a local property owner and authorities are following up on the lead."

Fish and Wildlife Service:

FWS DIRECTOR TO CELEBRATE ANNIVERSARY OF WASHINGTON'S FIRST WILDLIFE AREA The Wenatchee (WA) World (5/28, 60K) reports that FWS Director Dan Ashe will attend a kickoff on June 7 to celebrate the anniversary of Washington's first wildlife area.

REP. ISSA HITS FWS FOR TARGETING TREE TRIMMER. The Washington Times (5/29, McElhatton, 455K) reports that House Oversight and Government Reform Committee Chairman Darrell Issa on Wednesday said that the FWS' decision "to pursue criminal charges against a tree-trimmer for accidentally disturbing bird nests in California highlights a troubling disparity in how private citizens and misbehaving government workers are treated." Issa said that the tree-cutter's accidental moves "pale in comparison to some of the misdeeds of federal employees who spend hours a day looking at pornography at work, or who otherwise bilk taxpayers."

Also reporting on the story is the San Jose (CA) Mercury News (5/29, 696K).

FUNDING SOLUTION FOR ERWIN FISH HATCHERY STILL IN QUESTION. In continuing coverage, the Johnson City (TN) Press (5/29, Hicks, 76K) reported that TVA, the US Fish and Wildlife Service, the Tennessee Wildlife Resources Agency, and the Georgia Department of Natural Resources "hosted a public meeting at TVA headquarters in Knoxville on Tuesday to present" a working group's recommendations for a long-term funding solution to continue trout stocking programs in some TVA tailwaters and reservoirs, as well as gather input and answer questions regarding the recommendations. At the meeting, TVA's Terry Creek stated, "Absent a funding solution, the Fish and Wildlife Service has indicated that they will terminate trout production and stocking at TVA projects." The TVA, TWRA, USFWS and GDNr formed the Trout Hatchery Funding Stakeholder Working Group, which has recommended that the USFW continue the funding, that TVA and the USFW team up to arrange funding, that involved states team up with TVA and the USFW to arrange funding, or that TVA ratepayers do the funding.

BURLINGTON WINS GRANT FOR MARINA UPGRADE. The Burlington (VT) Free Press (5/28, 116K) reports that Burlington's Perkins Pier Marina is "in line for a major upgrade with the help of a \$1.5 million federal grant, the city and the Vermont Fish and Wildlife Department announced Tuesday." According to Jesse Bridges, director of the Department of Parks and Recreation, "the city plans to build a new wave attenuator, which is a floating wall that would protect the south harbor, add more spaces for boats and enable future development." The article notes that "the \$1.5 million grant is one of 16 awards nationally from the US Fish and Wildlife Service's Boating Infrastructure Grant program, which came to Burlington in partnership with the state Fish and Wildlife Department."

FWS SEEKS TO ACQUIRE GALLIPOLIS ISLAND. The Point Pleasant (WV) Register (5/29, 11K) reports that "the Gallipolis Island may soon be under new ownership as the US Fish and Wildlife Service is attempting to

acquire the island and restore this rapidly deteriorating refuge for fish and various wildlife." Approximately two years ago, the FWS "approached the city of Gallipolis, the owners of a portion of the island, but were unsuccessful because a portion of the island is under private ownership and negotiations to purchase this portion of the island failed." Recently, the FWS "once again approached the Gallipolis City Commission to discuss acquiring the city's portion of the island as the private owner now would like to donate his portion of the island to help maintain this habitat for local wildlife."

FWS SEEKS COMMENTS ON CRITICAL HABITAT DESIGNATIONS FOR THREE SOUTHERN PLANTS. The Chattanooga (5/29, 12K) reports that the FWS seeks "additional public comment on proposed critical habitat for three plants found in Alabama, Georgia, Indiana, Kentucky and Tennessee." Also, the agency "seeks comment on a draft economic analysis that considers the cost of the critical habitat designation to federal, state and local governments." The plants are the Short's bladderpod, the whorled sunflower, and the fleshy-fruit gladeceess.

FWS TO HOLD HEARING ON RED KNOT LISTING. The Island Free Press (NC) (5/29) reports that the FWS will have "an informational session and public hearing on listing the rufa red knot as a threatened species on Thursday, June 5 from 5 until 8 p.m. at the Alligator National Wildlife Refuge Headquarters in Manteo."

US Geological Survey:

USGS STUDY: SUPERSTORM SANDY'S FIRE ISLAND BREACHES NOT TO BLAME FOR COASTAL FLOODING. Newsday (5/29, 1.5M) reports that the Fire Island "breaches created by Sandy were not to blame for flooding in surrounding coastal communities in the months after the superstorm hit," according to a USGS study. The study by three USGS researchers, "published earlier this month, determined that post-Sandy flooding along the South Shore was instead caused by a series of harsh winter storms that hit the battered area." The study concluded, "The high water levels that occurred in five months following Hurricane Sandy in these back-barrier bays were caused by winter storms, not by barrier island breaching or geomorphic changes in the bays caused by Sandy."

USGS SCIENTIST RECOGNIZED FOR DEDICATION TO COASTAL PRAIRIE CONSERVATION. KATC-TV Lafayette, LA (5/29, 16K) reports that USGS National Wetlands Research Center Botanist Larry Allain will "receive the 2014 Prairie Excellence Award in recognition of his 'tireless dedication to coastal prairie conservation through both his professional and volunteer work' according to Jaime Gonzales, President of the Coastal Prairie Partnership (CPP)." According to the article, "Allain's award-winning publication, *Paradise Lost: The Coastal Prairie of Texas and Louisiana*, has introduced thousands of people to the wonder and plight of the highly imperiled coastal prairie ecosystem and has inspired many community members to get and stay involved in efforts to protect these special grasslands." Gonzales said, "Each generation of conservationists produces a handful of professionals whose work and wisdom far extends past their careers – we are certain that Larry Allain will be one of those select few."

Securing America's Energy Future:

Renewable Energy:

SEN. TESTER PROMOTES BILL FOR WILDLIFE-FRIENDLY RENEWABLE ENERGY PROJECTS ON PUBLIC LANDS. The Missoulian (MT) (5/29, 122K) reports that "a bill to allow wildlife-friendly renewable energy leasing on public lands languishes in Congress," but Sen. Jon Tester "hopes local support might get it moving this summer." Tester "pitched the bill to about 40 people at the Missoula Public Library on Wednesday." The Public Land Renewable Energy Development Act would "make it easier for wind and solar energy developers to lease public land for their installations," and "it would provide money for agencies like the US Forest Service and Bureau of Land Management to inventory acreage that doesn't have wildlife conflicts or work on ways to reduce those problems."

Onshore Energy Development:

OBAMA ADMINISTRATION TAKING STEPS TO REVISE WESTERN "ENERGY CORRIDOR". The E&E Daily

(5/28) reports that the Obama Administration is "slowly taking the first steps to revise potentially large sections of a congressionally designated 6,000-mile-long energy corridor as mandated by a nearly 2-year-old legal settlement with environmental groups that claimed the original corridor unnecessarily tore through sensitive landscapes and fails to advance renewable energy development." However, "it could be years before any substantive revisions are made to dozens of contested sections of the 'West-wide Energy Corridor' that stretches across 11 Western states and nearly 3 million acres of public land, including federal wildlife refuges and key habitat for greater sage grouse." According to the article, "that's due mostly to a lack of federal funding that has prevented the Bureau of Land Management, Forest Service and the Department of Energy from even starting a base-line corridor study that was supposed to be completed in July."

FOUR CORNERS POWER PLANT, NAVAJO MINE RECEIVES SUPPORT FROM FARMINGTON, SAN JUAN.

The Farmington (NM) Daily Times (5/29, 46K) reports that Farmington City Council "approved a resolution expressing the city's support for continuing the operation of the Four Corners Power Plant and nearby Navajo Mine." Mayor Tommy Roberts "proposed the city's resolution to the council because he is concerned with the potential impacts to the local economy if both operations cease." Also, San Juan County commissioners "unanimously passed a similar resolution to support the renewal of the power plant lease with the tribe."

OIL SPILL IN POWDER RIVER BASIN SUBSTANTIALLY CLEANED UP. The AP (5/29) reports that "a significant oil spill in the Powder River Basin has been substantially cleaned up after a burning operation, but more work remains to be done, federal officials said." The pipeline's owner, Belle Fourche Pipeline, "burned off the oil because other cleanup options weren't practical." BLM officials "plan to meet again Friday with Belle Fourche Pipeline to discuss further cleanup."

API ARGUES AGAINST RESTRICTIONS ON ARCTIC NATIONAL WILDLIFE REFUGE DRILLING. In an op-ed in the Anchorage (AK) Daily News (5/28, 251K) American Petroleum Institute president and CEO Jack Gerard argues that Alaska's "ability to develop its vast energy resources is often stifled by restrictive federal policies." Gerard said that if the Arctic National Wildlife Refuge were open to drilling without "interference from Washington," it could produce 1 million bpd of crude and 160 billion cubic feet of natural gas annually, "enough to fuel South Carolina for a year." Gerard urges the Federal government to "remove barriers to responsible energy development."

Alaska Supports Oil And Natural Gas Production. Energy Global (5/29) reported that according to a new poll issued by the American Petroleum Institute, a majority of Alaska voters supports boosting US oil and natural gas production. API president and CEO Jack Gerard said the poll results indicate that "Alaska understands the connection between access to energy resources and good public policy. Alaskans recognize the possibilities for America's economic future. While the availability of affordable and reliable domestic energy creates opportunity, success depends on the policies created today."

Offshore Energy Development:

FIFTH CIRCUIT PANEL WILL NOT STOP BP OIL SPILL CLAIMS PAYMENTS. The AP (5/29) reports from New Orleans that a three-judge panel of the 5th Circuit Court of Appeals on Wednesday ruled that BP PLC "must resume paying claims while it asks the U.S. Supreme Court to review its settlement with businesses over the 2010 Gulf of Mexico oil spill." The 2-1 ruling said the court "will not put a stop to payments while BP appeals the court's earlier ruling that businesses, under the settlement, don't have to prove they were directly harmed by the spill to collect money." BP asked the Supreme Court to review the ruling, "saying that otherwise 'countless awards totaling potentially hundreds of millions of dollars will be irretrievably scattered to claimants that suffered no injury traceable to BP's conduct.'"

Bloomberg News (5/29, Fisk, Calkins, 2.76M) reports that the court "rejected the U.K.-based energy company's request to maintain a temporary halt on payments to businesses that can't prove they were directly damaged by the spill." US District Judge Carl Barbier on Wednesday "ordered the settlement's administrator to resume making the stalled payments."

Tackling America's Water Challenges:

AGENCIES THAT PLAYED ROLE IN COLORADO RIVER DELTA PULSE FLOW LAUDED. For the "Water Currents" blog of the [National Geographic](#) (5/28, 42.25M), Jennifer Pitt lauds the agencies that "played an important role in lifting the gates at Morelos Dam" as "among the heroes of the pulse flow." She notes that "in the United States, it included the Bureau of Reclamation, the Department of the Interior (whose Secretary serves as 'watermaster' in the lower Colorado River Basin), and the State Department." Pitt concludes that "if we can maintain the spirit of cooperation and trust most recently illustrated by the pulse flow, we can set an example for how to manage limited resources across various jurisdictions worldwide."

Empowering Native American Communities:

PINE RIDGE DEALS WITH POVERTY, VIOLENCE. [MSNBC](#) (5/29, 7.96M) reports on the Pine Ridge Indian Reservation, "where a well-documented plague of poverty and violence has festered since the Oglala Sioux were forced onto the reservation more than a century ago." However, "the government is starting to own up to its failures." According to the article, "in a startling new draft report released in April by the federal Bureau of Indian Education, which oversees 183 schools on 64 reservations in 23 states, the agency draws attention to its own inability to deliver a quality education to Native students."

ADDITIONAL COVERAGE OF PROPOSED CHANGES TO FEDERAL RECOGNITION RULES. Additional coverage of the proposed changes to federal recognition rules was provided by the [Danbury \(CT\) News Times](#) (5/29, 137K).

Top National News:

OBAMA LAYS OUT FOREIGN POLICY VISION, HITS BACK AT CRITICS. Media assessments of President Obama's Wednesday speech largely mirrored those of his previous day's remarks on Afghanistan. As was the case Tuesday night, Obama's address at West Point was well-received by the network newscasts, which cast it as an attempt to articulate a policy for a non-militaristic but leading US role in the world. In a brief report, for example, Diane Sawyer said on ABC World News (5/28, story 4, 0:45, Sawyer) that the President "announced a major change in foreign policy," and added that the President's plan "relies less on the US military and creates an international partnership to help nations fight extremists within their borders." Print media accounts, meanwhile, almost universally indicate that the speech appeared to be designed as a rebuttal to critics of Obama's foreign policy, and generally cast it as a defense of his decisions rather than a new paradigm for a future course.

The speech, meanwhile, received scathing criticism from Republicans, cable commentators on Fox News and the editorial boards of the Washington Post (5/29, 4.22M), New York Times (5/29, Subscription Publication, 9.65M) and Wall Street Journal (5/29, Subscription Publication, 5.51M). Of note, using very similar imagery, both the Washington Post editorial board and columnist Doyle McManus today accuse the President of setting up "straw men" in order to argue his points: While the Post accuses Obama of marshaling "a virtual corps of straw men," McManus refers to "a whole battalion of straw men." Sen. John McCain had previously accused the President of setting up "straw men" in a radio interview. Some conservative outlets, meanwhile, highlight what they describe as a rather subdued response to the President by his West Point audience, an element largely absent from the rest of the coverage.

Norah O'Donnell reported on the CBS Evening News (5/28, story 4, 2:35, O'Donnell, 5.08M) that the President "said isolation is not an option but not every problem has a military solution." Obama was shown saying, "I believe we must shift our counter-terrorism strategy to more effectively partner with countries where terrorist networks seek a foothold." David Martin noted, "Sending American soldiers to train local troops has one major hitch – countries in which terrorist groups take root are frequently run by corrupt, unpopular, weak, or incompetent governments. ... Still, it puts fewer American lives at risk, is much less expensive is frequently done in secret, all of which makes it easier to sell politically."

Peter Alexander reported on NBC Nightly News (5/28, story 6, 2:20, Williams, 7.86M) that the President "argued for restraint before the US commits to any future military action." Obama was shown saying, "Just because we have the best hammer does not mean that every problem is a nail." The President also said that "the number one threat to America is no longer confined within any country's borders," and "announced that he is asking for \$5

billion to fund a counterterrorism partnership to help partners in the Middle East and Africa...to carry out operations against extremists." The Wall Street Journal (5/28, Lee, Subscription Publication, 5.51M) quotes Obama as saying, "A strategy that involves invading every country that harbors terrorist networks is naïve and unsustainable. ... I believe we must shift our counter-terrorism strategy – drawing on the successes and shortcomings of our experience in Iraq and Afghanistan – to more effectively partner with countries where terrorist networks seek a foothold." Reuters (5/28, Holland) notes that Obama also said, "Tough talk often draws headlines, but war rarely conforms to slogans."

CNN's Situation Room (5/28, 554K) led its broadcast with a story that also cast the speech in a positive light. Jim Acosta reported that the President made the case that "caution in the 21st century can be muscular too," as he delivered a "45-minute lecture on the Obama doctrine." The President "fired back at accusations he's been too hesitant on the global stage, reminding his critics of the lessons of going it alone."

Bret Baier reported on FOX News' Special Report (5/28, 2.15M) that the President used the speech "to counterpunch at critics who say his particular brand of leadership has led to a weaker, less respected America." Ed Henry added that the President was "on defense, insisting he does believe in American exceptionalism and lashing out at critics who call him weak."

Along those lines, and in a report typical of much of the print media coverage, the AP (5/28, Pace, Kuhnhenh) calls the speech "a concerted effort by the White House to push back against...critics...who contend that the president's approach to global problems has been too cautious and has emboldened adversaries in Syria, Russia and China." Adds the AP, "It's a criticism that deeply frustrates the president and his advisers." The New York Times (5/29, Landler, Subscription Publication, 9.65M) says Obama "tried to regain his statesman's mantle" with his address, "a wide-ranging rebuttal to critics who say he has yielded American leadership in a world tossed by storms." Like the AP, the Times describes Obama as "deeply frustrated by the criticism of his foreign policy, which during his first term was generally perceived as his strong suit."

Obama, says Bloomberg News (5/29, Mattingly, Talev, 2.76M), "sought to give a clearer vision of his policy as he faces critics at home and abroad who have cast the president as weak and ineffective," and "much of" his address "took the form of a rebuttal to critics." Similarly, the Christian Science Monitor (5/29, Lafranchi, 566K) reports "the speech was devoid of initiatives or proposals and instead seemed aimed at refuting mounting criticism both domestically and among some worried international partners that his foreign policy is weak and rudderless."

The Washington Post (5/29, A1, Nakamura, 4.22M) also notes Obama's "defense of his administration's handling of foreign crises and" his "suggestion that some critics are out of step with a nation weary after 13 years of war." USA Today (5/29, Jackson, 5.82M) notes that "in apparent references to Vietnam and Iraq, Obama said that 'since World War II, some of our most costly mistakes came not from our restraint, but from our willingness to rush into military adventures without thinking through the consequences.'" Along those lines, McClatchy (5/29, Clark, Subscription Publication, 23K) reports, Obama "said he'd be betraying his duty...if he rushed into conflict 'because I was worried about critics who think military intervention is the only way for America to avoid looking weak.'" That comment, The Hill (5/28, Sink, 237K) reports, "appeared to be a direct rebuke to critics who have charged that the president's foreign policy is faltering because he is unwilling to intervene," with Obama "and aides" looking "to push back against that narrative."

In an analysis piece, the New York Times (5/29, Baker, Subscription Publication, 9.65M) also reports that as "Obama listens to assessments of his foreign policy these days, he grows deeply frustrated. Syria? Ukraine? Afghanistan? What more do his critics want him to do? Get into another war? Keep fighting one that has already become America's longest?" The Times adds that "at times during his Wednesday speech, Mr. Obama seemed to be responding directly to one critic, Robert Kagan, whose long cover story in The New Republic titled 'Superpowers Don't Get to Retire' argued against a retreat from America's post-World War II leadership." In a phone interview, Kagan said Obama's speech was "about the clearest statement of this position that Obama's ever made."

Obama, says the New York Post (5/29, Earle, 2.77M), spoke "with his foreign policy under fire," and "taking on skeptics on the right who have fretted about failures to counter expansionist efforts by Russia and China, and ongoing turmoil in the Middle East, Obama called America 'the one indispensable nation.'" The Post adds that "it's a phrase attributed to former Secretary of State Madeleine Albright that Obama has used before." Politico

(5/28, Epstein, 637K) reports that his speech, Obama "laid out the latest iteration of his foreign policy vision – and hinted at what he hopes his global legacy will be." USA Today (5/29, Madhani, 5.82M) likewise states in an analysis piece that it is "clear" that "as Obama looks to establishing a foreign policy legacy, he's more certain than ever in his long-established belief that the post-9/11 world is too complicated for the US to play policeman for the world."

The Washington Times (5/29, Wolfgang, Boyer, 455K) headlines its report "Obama Defends Troubled Foreign Policy At West Point Commencement," and says that "despite the" speech's "strong words, some critics and analysts say the president lacks a guiding doctrine on foreign policy, leaving the rest of the world guessing about U.S. interests and when they might count on American action."

In one of the most positive assessments of the speech in this morning's newspapers, the Los Angeles Times (5/28, Parsons, 3.46M) calls it "sweeping," and credits it with "laying out a new definition of" US global leadership. The story does not include the reaction of Obama critics or refer (as other print accounts) to the President being forced to defend his foreign policy record. Also markedly positive was the story in Stars And Stripes (5/28, Harper, 25K), which reports that "in a time of budget constraints and war-weariness among the American people, Obama wants to shift more of the security burden to America's allies." Likewise, National Journal (5/28, Waddell, Subscription Publication, 561K) remarks on Obama's "hopeful" tone, "seeking to frame his new foreign policy direction as a continuation of American leadership on the world stage."

The Lower Hudson Valley (NY) Journal News (5/28, Nicosia, 339K) reports "thousands of visitors listened to the president's speech in a damp and chilly Michie Stadium," and notes that "before his address, a small group of anti-drone protestors flanked the entrance gates at West Point as families of the graduating cadets arrived."

National Security Adviser Susan Rice said on CNN's Situation Room (5/28, 554K) that the President's speech "was a broad explication of US interests in the world and US foreign policy. What it said was that the United States must – what must be and will remain in every instance the world's number one leader. And we'll do what it takes to defend and advance our interests including where it is necessary to defend our core interests to use force unilaterally, if necessary, but that when it is not something that affects our fundamental national security, our economic well-being or the security of our allies, that we want to work cooperatively with other nations to the greatest extent possible, to tackle global problems."

After the President's address, NPR (5/28, 519K) interviewed Michele Flourmoy, who said, "I think it was a very strong speech as speeches go, in that it reasserted the importance of American leadership and engagement. On counterterrorism specifically, the President laid out a vision for a shift in our counterterrorism policy from an emphasis on direct action, where we are actually striking our enemies directly, to an emphasis on building the capacity of our partners in Yemen, in Somalia, in Mali and elsewhere to be able to deal with the terrorist threat on their soil."

Reports: Obama's West Point Audience Less Than Enthusiastic. The UK's Daily Mail (5/29, Martosko, 2.97M) reports that Obama received "tepid applause and a short standing ovation from less than one-quarter of the audience upon his introduction," before arguing "for a contradictory foreign policy that relies on NATO and the United Nations while insisting that 'America must always lead on the world stage.'" The Washington Times (5/28, Ernst, 455K) references the Daily Mail story, while the Daily Caller (5/28, Bordelon, 408K) reported that CNN reporter Jim Clancy said Obama "was met with an 'icy reception' from the future Army officers."

WPost, WSJournal, NYTimes Among Critics Of Obama's Speech. The Washington Post editorial board, columnist Doyle McManus, Sen. John McCain and Karl Rove all accused the President of setting up "straw men" in order to argue his points. Amid largely negative reactions from news analysts and GOP politicians, the speech was praised by former Bush official Nicholas Burns and columnists Joe Klein and E.J. Dionne, among others.

In an editorial, the Washington Post (5/29, 4.22M) criticizes the speech, saying that Obama, "as he has so often in his political career, Mr. Obama has elected to respond to the critical consensus not by adjusting policy but rather by delivering a big speech." Yesterday, he "marshaled a virtual corps of straw men," such as "those who 'say that every problem has a military solution.'" The Post also accuses Obama of shaking "the confidence of many US allies" and encouraging "some adversaries," and adds "that conclusion can be heard not just from Republican hawks but also...more quietly, from some leading congressional Democrats."

Doyle McManus, in the Los Angeles Times (5/29, 3.46M), calls the speech's "core message...familiar and entirely reasonable," but goes on to criticize Obama for taking "aim at a whole battalion of straw men," and argues that "no one has argued that military action" is the answer to every problem, "not even George W. Bush, who took the nation to war in Iraq and Afghanistan."

Voice of America (5/28, Bowman, 21K) reports that Sen. John McCain "seemed to take personal umbrage at the president's assertion that his critics are overly eager to see US troops deployed around the world." Interviewed on Phoenix radio station KFYI, the Barry Young Show, the senator said, "None of us want to send troops to Syria, and for him [Obama] to continue to set up this straw man that all 'interventionists' want to send American troops everywhere – that is patently false." Noting McCain's comments, Politico (5/28, Dove, 637K) wrote, "Six years in, the fight between...Obama and...McCain continues."

Politico (5/28, Breitman, 637K) also reported that appearing on Fox News, Karl Rove said Obama's speech "sounded like an 'argument with himself,'" adding, "The president, today, engaged in straw men and tossed them out there every few moments."

In an editorial titled "President Obama Misses A Chance On Foreign Affairs," the New York Times (5/29, Subscription Publication, 9.65M) writes "the address did not match the hype, was largely uninspiring, lacked strategic sweep and is unlikely to quiet his detractors, on the right or the left." Obama "provided little new insight into how he plans to lead in the next two years, and many still doubt that he fully appreciates the leverage the United States has even in a changing world."

In a highly critical editorial, the Wall Street Journal (5/29, Subscription Publication, 5.51M) also accuses Obama of setting up a false choice between isolationism and using the military to solve every foreign policy problem, and argues that the speech sidestepped the President's foreign policy failures, not mentioning the reset with Russia, the Asia pivot, the red line in Syria or the Israeli-Palestinian conflict.

David Ignatius, in the Washington Post (5/29, 4.22M), says Obama "made many cogent points to rebut critics," but "also showed that he hasn't digested some of the crucial lessons of his presidency. ... Surely he can see that al-Qaeda regained control of Fallujah this year in part because America walked away from Iraq in 2010," that "terrorism has a deadly new face in Syria" and that "Afghanistan could become a haven once more for al-Qaeda." Ignatius later argues, however, that "if Obama can craft his partnerships to contain al-Qaeda, he will have created an important legacy."

John Bolton, in the Wall Street Journal (5/29, Subscription Publication, 5.51M), blasts both the speech and the President's foreign policy as muddled and contradictory, and argues that under the present Administration the US has steadily lost global influence.

Elise Labott said on CNN's Situation Room (5/28, 554K) that US allies believe the US is "unfocused and take their eye off the ball. ... While the US reduced the military footprint," in countries like Iraq and Libya, "it hasn't accompanied that with the high level intense and sustained political engagement necessary to make sure these countries don't remain in conflict. I think that's where the President gave short shrift looking at countries through a counterterrorism lens." Peter Bergen added that President "was trying to lay out something that made the best" of interventionism and isolationism, "ignoring some of the weaknesses in both approaches." Fareed Zakaria noted that the President "follows in Dwight Eisenhower's mode. He is very restrained and disciplined about the use of force." Peter Beinart noted that the President "is not interested in creating a heroic foreign policy. Barack Obama is interested in a hippocratic foreign policy and the hippocratic oath, first, do no harm. There's a lot to be said for that."

Mara Liasson said on FOX News' Special Report (5/28, 2.15M), "What jumped out at me was how familiar it was. He pretty much reiterated his foreign policy approach which is to set up two extremes, kind of cartoonish extremes, one isolationism and the other boots on the ground everywhere, and say, 'hey, I'm not for either of those. We have to be strong. We have to lead, but we don't always have to take military action.'"

Charles Krauthammer said on FOX News' Special Report (5/28, 2.15M), "I think his speech was literally pointless. He didn't have a point. It was a defensive speech. It was an answer to the chorus of criticism, even

from his side of the aisle, that it's been a weak, leaderless, rudderless license foreign policy, which it has been."

Steve Hayes said on FOX News' Special Report (5/28, 2.15M), "The problem of this speech was it was an attempt to retroactively impose some kind of doctrine on the chaos we've all lived through over the last five and a half years. It has been an inconsistent, incoherent, sloppy foreign policy for five and half years, with no apparent vision from the Commander in Chief, from the President of the United States."

In his "Political MoJo" blog for Mother Jones (5/28, 756K), David Corn writes that "for years, Obama has been trying to form and sell a balanced approach that justifies certain military interventions and limits others," but "the world is not a balanced place," and "given the global challenges of this era, a grand plan may not be realistic."

The New York Times (5/29, Subscription Publication, 9.65M) offers a digest of other reactions to the speech. The CFR's Richard Haass said "it was more clear what" that speech "was against, than what it was actually for." Rep. Ed Royce said Obama's policies have led to "a general loss of US credibility, making successful foreign policy nearly impossible," and Rep. Michael McFaul criticized the President, arguing that "America's leadership, not its withdrawal, is more crucial than ever." Former State official Nicholas Burns, meanwhile, said on Twitter, "Clear, effective #Obama speech at #West Point. Call for US leadership as 'indispensable' and 'exceptional.' And more focus on diplomacy."

The AP (5/29, Katz) reports from London that "many experts" said Obama's speech "was an inevitable – and welcome – evolution of U.S. foreign policy." David Livingstone, "an expert in international security at London's Chatham House," said "Obama's words went against the 'American instinct to go in hard with the military first' when crisis erupts." In Qatar, "Brookings Center director Salman Shaikh saw the speech as a boost for consensus," adding, "He talked about partnerships, working multilaterally, which is all to be welcomed." Meanwhile, "Obama's speech was not broadcast on Chinese television," and "there was no immediate reaction from the government, state media or government-backed scholars."

US News & World Report (5/28, Welsh, 645K) notes that Joe Klein called the speech "'realist' because Obama 'made no threats or promises that he couldn't carry out, which was a relief.'" E.J. Dionne Jr. also praises the speech in the Washington Post (5/29, 4.22M), concluding that "in calling for restraint and realism – and by insisting on raising the threshold for wars of choice – Obama may yet prove himself to be the best friend American internationalists have."

INTERIM IG REPORT SPARKS NEW BIPARTISAN CALLS FOR SHINSEKI'S RESIGNATION. An interim report released Wednesday by the VA's Inspector General, which found systemic problems at VA hospitals across the nation and that more than 1,000 veterans seeking care at a VA hospital in Phoenix were never put on a list, has sparked new calls for Secretary Shinseki's resignation. The report was covered by all three network news broadcasts and led two of them, edging out the President's commencement address at West Point. In addition, the report receives extensive print coverage this morning, most of which focuses on lawmakers' calls for Shinseki's ouster.

In its lead story, ABC World News (5/28, lead story, 2:30, Sawyer) said the "scathing report...makes it clear the breakdown of care goes further than we knew." ABC (Avila) added that the IG found that "the corruption is 'systematic throughout veterans hospitals,'" and "because of the long wait to see VA doctors, veterans are at 'risk of being lost or forgotten' and 'may never obtain their requested or required primary care,' putting those who served America in danger just like survivors claimed." ABC added that some in Congress are "calling for a criminal investigation, for the FBI to enter the probe, which has now spread to 42 VA medical facilities across the country."

The CBS Evening News (5/28, lead story, 3:00, O'Donnell, 5.08M) reported in its lead story that the President called the revelations "extremely troubling." CBS (Cordes) noted that Shinseki announced, "I am directing that the Phoenix VA healthcare system immediately triage each of the 1,700 veterans to bring them timely care," but his statement "wasn't enough for Republican Senator John McCain, who represents Arizona." McCain: "This issue has reached a level that requires the Justice Department involvement. These allegations are not just administrative problems. These are criminal problems." McCain "wants Shinseki to step down, and today for the first time, some Senate Democrats agreed."

NBC Nightly News (5/28, story 5, 2:25, Williams, 7.86M) called the IG report a "bombshell," which is "triggering bipartisan demands" for Shinseki's resignation. NBC (O'Donnell) added that the President "now considers Secretary Shinseki to be on probation."

The AP (5/29, Bobic) reports that the IG "says veterans at the Phoenix VA hospital waited on average 115 days for their first medical appointment," which is "91 days, on average, longer than the hospital had reported." The report "says investigators have 'substantiated serious conditions' at the hospital, including 1,700 veterans who were waiting for an medical care but were not on an official waiting list."

The Washington Post (5/29, Lowery, Hicks, 4.22M) reports that the IG's report sparked "a wave of outrage and prompting new calls for VA Secretary Eric Shinseki to resign." The Post notes that according to White House officials, the President "had been briefed on the Inspector General's interim report and he found it 'extremely troubling.'"

The Hill (5/28, Sink, 237K) reported in its "Blog Briefing Room" blog that White House press secretary Jay Carney said in a statement, "As the President said last week, the VA must not wait for current investigations of VA operations to conclude before taking steps to improve care. ... It should take immediate steps to reach out to veterans who are currently waiting to schedule appointments and make sure that they are getting better access to care now." The Hill noted that the statement "did not mention the status of Shinseki, though, who has faced a growing number of high-profile calls from lawmakers to resign in the wake of the VA report."

Politico (5/29, Dovere, Brown, 637K) reported that while the President "hasn't decided to fire" Shinseki, he has "reached the point where he doesn't know if Shinseki will be able to fix the problems at the VA, White House aides said Wednesday." According to the aides, the President is "waiting to make a final decision until he has more information: a report from Shinseki himself due to the White House this week and one from Rob Nabors, the deputy chief of staff he put in charge of a separate review, which is due in June."

Reuters (5/28, Rampton) also notes the White House's statement on the President's reaction to the report.

The Wall Street Journal (5/29, A1, Kesling, Subscription Publication, 5.51M) reports that following the release of the interim report, Shinseki issued a statement saying, "I respect the independent review and recommendations of the Office of Inspector General regarding systemic issues with patient scheduling and access. ... I have reviewed the interim report, and the findings are reprehensible to me, to this Department, and to Veterans."

The Washington Times (5/29, Klimas, 455K) reports that Shinseki "said that he has already placed the leaders of the Phoenix facility on administrative leave and that he will quickly act on the report's other recommendations to get veterans the care they need as soon as possible."

In an op-ed for USA Today (5/29, 5.82M), Shinseki calls the findings in the interim report "reprehensible to me and to this department," and adds that "we are not waiting to set things straight." Shinseki writes that he has "challenged our leadership to ensure we are doing everything possible to schedule veterans for their appointments," and adds that he remains "committed to providing the high-quality care and benefits that veterans have earned and deserve." An accompanying editorial in USA Today (5/29, 5.82M) is critical of Shinseki, noting that "why he needed a new report to tell him all this after nearly six years in charge is a mystery — one that both he and the president need to explain."

The New York Times (5/28, A1, Oppel, Shear, Subscription Publication, 9.65M) says the release of the report "is certain to increase the pressure on Mr. Shinseki to step down."

Similarly, Politico (5/28, Herb, 637K) reported that while Shinseki "has vowed to stay on and fix the VA's problems and has ordered an internal review of VA's scheduling practices," the interim report "is likely to fuel Shinseki's critics, who have argued that new leadership is needed to fix the problems."

USA Today (5/28, Zoroya, 5.82M) reports that there was "swift" reaction to the report from Capitol Hill as Sen. John McCain and House Veterans Affairs Committee chairman Jeff Miller called for Shinseki's resignation.

Roll Call (5/28, Lesniewski, Subscription Publication, 76K) reported in its "#WGDB" blog that Sen. Jeff Flake also

called for Shinseki's resignation. Roll Call also noted that McCain went "as far as to say he should be 'fired' by President Barack Obama." Both McCain and Flake "want a criminal investigation by the Department of Justice and the FBI."

The Los Angeles Times (5/29, Simon, 3.46M) reports that with the IG's report "drawing fresh bipartisan outrage from Capitol Hill, it is becoming tougher for the retired four-star general to save his job." In addition to McCain, Flake, and Miller, Sen. Mark Udall said that the "systemic problems at the Department of Veterans Affairs are 'so entrenched that they require new leadership to be fixed.'" The AP (5/29) reports that Udall is the first Democratic senator to call for Shinseki to resign.

Politico (5/28, Everett, Herb, 637K) reported that Udall and Sen. John Walsh, both of whom are "facing difficult reelection campaigns," both issued statements saying Shinseki "must go, reflecting pressure to break ranks with the Obama administration during an election year." Democratic Rep. Scott Peters also called for Shinseki's removal and Sen. Mark Begich who is facing "a tough road to reelection," has scheduled a press conference on the VA for Thursday. Meanwhile, Sen. Mary Landrieu's campaign "issued a statement highlighting the Louisianan's support for a House-passed bill that would allow the VA to fire those involved in the scandal."

The Minneapolis Star Tribune (5/29, Mitchell, 1.48M) reported in its "Hot Dish Politics" blog that Sen. Al Franken and Reps. Tim Walz and Collin Peterson have joined the "growing number of Democratic lawmakers" calling for Shinseki's resignation.

The Los Angeles Times (5/29, Simon, 3.46M) reports that VA officials received "a bipartisan tongue-lashing" from the House Veterans' Affairs Committee Wednesday evening. During the "contentious" hearing which followed the release of the interim IG report, lawmakers accused the VA of "'stonewalling' requests for documents pertinent to the investigation into long wait times for healthcare." Chairman Jeff Miller "accused the agency of stonewalling the panel and failing to produce all of the documents it has sought." He warned the officials at the hearing, "Until VA understands that we're deadly serious, you can expect us to be over your shoulder every single day."

Burr Stands By Attack On Veterans Groups. Politico (5/28, Topaz, 637K) reported that in an email Wednesday, Sen. Richard Burr said that he is not "backing down from his recent attack on veterans' groups and even stepped up his assault, charging the organizations are more upset by his comments than they are by the scandal at the Department of Veterans' Affairs." Burr wrote, "I absolutely stand by my statement," referring to "his controversial open letter blasting some of the organizations for not pressing for the ouster of Secretary Eric Shinseki in the wake of the VA scandal." Burr added, "In fact, the reaction from some of the Veterans Service Organizations —VFW, DAV, and PVA — seems to prove my point: their national leadership are far more outraged by my words than they have been about the VA scandal or Secretary [Eric] Shinseki's mismanagement of the agency."

DEMOCRATS COULD MOVE TO ATTACH ASSAULT WEAPONS RESTRICTIONS TO SPENDING BILL. USA Today (5/28, Davis, 5.82M) reports that while Democrats "may offer gun-related amendments to an annual spending bill under consideration" in the House this week, Minority Whip Steny Hoyer "acknowledged the effort is unlikely to be successful." Still, Democrats "have a rare opportunity to offer amendments this week to the Commerce, Justice, Science spending bill because the annual spending bills are generally debated under a process that affords the minority party more flexibility to offer amendments."

McClatchy (5/28, Douglas, Subscription Publication, 23K) reports that Hoyer told reporters on Wednesday that Democrats "are discussing adding a gun amendment that would likely attempt to strike the 'prohibition on requiring gun sellers to report on multiple sales on assault-type weapons.'" The piece notes that Elliott Rodger "used three pistols in his attacks, rather than the high-powered rifles the bill presumably would target."

Politico (5/28, French, 637K) reports that Democrats "have repeatedly called for tougher enforcement on guns after mass shootings...but no legislation has gained significant momentum." The piece also adds that Hoyer "said he was not hopeful Congress would ultimately act."

Administration "Squeezing" Finances Of Gun Stores. The Washington Times (5/29, Riddell, 455K) reports that Powderhorn Outfitters, which sells firearms among other things, "says it's the latest victim of a federal multiagency task force that is squeezing financing sources for industries deemed 'high-risk' by the Obama

administration, such as porn stores, drug paraphernalia shops and gun merchants." The company was dumped by TD Bank of Maine. The Times says it has previously reported on "gun retailers' complaints that the administration is bypassing Congress and is using increased scrutiny by financial regulators to choke off their lines of credit and squeeze them out of business."

House Bill Would Expand Ability To Force Mentally Ill Into Treatment. The Wall Street Journal (5/29, A6, Hughes, Subscription Publication, 5.51M) reports that legislation proposed by Rep. Tim Murphy, trained as a psychologist, is getting new attention in the wake of the California shootings. The legislation would make it easier for authorities or family members to force a mentally ill individual into treatment. However, it has drawn concern from those worried it violates the rights of the mentally ill.

California Also Considering Legislation Limiting Access Of Mentally Ill To Guns. The New York Times (5/29, A18, Medina, Subscription Publication, 9.65M) reports that in the wake of the Santa Barbara shooting, California lawmakers are "championing legislation that would permit law enforcement officials and private individuals to seek a restraining order from a judge that would keep people with a potential propensity for violence from buying or owning a gun," a process similar to one currently covering cases of domestic violence. However, "even in California, with an overwhelmingly Democratic majority in both houses of the Legislature, it could prove difficult to get the bill passed" due to both gun-rights opposition and concerns about "limiting civil liberties of those dealing with mental illness."

Emanuel Proposes New Gun Restrictions. The New York Times (5/28, Bosman, Subscription Publication, 9.65M) reports that on Tuesday, Mayor Rahm Emanuel called gun violence Chicago's "most urgent problem," and "outlined a proposal on Tuesday that would make it harder to buy firearms in the city." The plan "would restrict gun purchases for individuals to one a month and would mandate that all gun sales be videotaped, an effort to deter buyers from using false identification." In addition, gun store employees "would be required to undergo background checks and complete training to help them spot the common signs of gun traffickers."

The Chicago Sun-Times (5/29, Spielman, 1.1M) reports in its "Early & Often" politics blog that Emanuel "insisted Wednesday that he's trying to prevent 'straw purchases' — not intimidate licensed gun owners — by requiring the owners of Chicago gun stores to videotape every weapons sale." Emanuel said, "We think it's enforceable. We think it's smart. We think it's tough. . . . We think it meets the standards set out, but does it in a way that's consistent with the direction the court set forth, but also with the direction that the people of Chicago set forth. They want their streets safe."

Editorial Wrap-Up:

NEW YORK TIMES. "Adding Delay To Immigration Failure." In an editorial, the New York Times (5/29, Subscription Publication, 9.65M) criticizes President Obama for asking DHS Secretary Johnson to delay his review of ways to reduce deportations. The Times said that Obama "has deported more people more quickly than any other president," and has asked for the delay to give the House GOP time to act, but the Times doesn't see that as likely. The Times concludes that the Administration "keeps on deporting people, figuring that after two million deportations, give or take, what's a few thousand more?"

"President Obama Misses A Chance On Foreign Affairs." In an editorial, the New York Times (5/29, Subscription Publication, 9.65M) writes that the President's West Point speech "did not match the hype, was largely uninspiring, lacked strategic sweep and is unlikely to quiet his detractors, on the right or the left." Obama "provided little new insight into how he plans to lead in the next two years, and many still doubt that he fully appreciates the leverage the United States has even in a changing world."

"The Fringe Gets Bigger." The New York Times (5/29, Subscription Publication, 9.65M) editorializes that the success of "fringe parties" in the European Parliament elections "does not mean the European project...is in any immediate danger of being voted out of existence." According to the Times, it is necessary for Europe's leaders to engage in a "serious discussion on issues like immigration" and whether the EU has "become too intrusive and controlling."

WASHINGTON POST. "Tying America's Hands." In an editorial, the Washington Post (5/29, 4.22M) criticizes

the President's West Point speech, saying that Obama, "as he has so often in his political career, Mr. Obama has elected to respond to the critical consensus not by adjusting policy but rather by delivering a big speech." Yesterday, he "marshaled a virtual corps of straw men," such as "those who 'say that every problem has a military solution.'" The Post also accuses Obama of shaking "the confidence of many US allies" and encouraging "some adversaries," and adds "that conclusion can be heard not just from Republican hawks but also...more quietly, from some leading congressional Democrats."

"General Discontent." The Washington Post (5/29, Board, 4.22M) editorializes the "disastrously low" turnout in Egypt's election showed the "relentless propaganda" of Sisi, "which claimed he enjoyed overwhelming support...was proved false." The Post says Sisi will likely "propel Egypt toward increasing disorder," and warns that if the Obama Administration ignores "warning signs" such as the election, it will "find itself hanging onto another weak and despised Arab dictator."

"For Montgomery School Board."

WALL STREET JOURNAL. "Harry Potter And The Prisoner Of Amazon." An editorial in the Wall Street Journal (5/29, Subscription Publication, 5.51M) says that the Justice Department's pursuit of Apple and five major publishers on allegations that they colluded against Amazon and the buyers of electronic books has enabled the strong-arm tactics Amazon employs against publishers.

"Obama At West Point." In a highly critical editorial, the Wall Street Journal (5/29, Subscription Publication, 5.51M) also accuses Obama of setting up a false choice between isolationism and using the military to solve every foreign policy problem, and argues that the speech sidestepped the President's foreign policy failures, not mentioning the reset with Russia, the Asia pivot, the red line in Syria or the Israeli-Palestinian conflict.

"IRS Judgment Day." An editorial in the Wall Street Journal (5/29, Subscription Publication, 5.51M) praises a Federal judge's ruling that the IRS must defend its slow handling of the application of a Pennsylvania group for tax exempt status, saying the ruling will force the agency to make public and be accountable for the procedures it used in deciding on tax exempt status applications for conservative groups.

Washington Schedule:**TODAY'S EVENTS IN WASHINGTON.**

White House:

PRESIDENT OBAMA — The President delivers remarks at the White House Healthy Kids & Safe Sports Concussion Summit, East Room, open press; participates in a clinic as part of the White House Healthy Kids & Safe Sports Concussion Summit, South Lawn, pooled press. Notes: Press Briefing by Press Secretary Jay Carney.

VICE PRESIDENT BIDEN — The Vice President and Dr. Jill Biden will depart San Francisco, California, en route Seattle, Washington. Afterwards, the Vice President and Dr. Biden will return to Wilmington, Delaware. Highlights: The Vice President will attend a reception for the Democratic National Committee at a private residence. This event is closed press. Dr. Biden and Secretary of the Interior Sally Jewell will host a discussion with Seattle-area business leaders to spotlight best practices that will help strengthen and build 21st century workplaces. The panel discussion at the Seattle Center will be open to pre-credentialed members of the media.
US Senate: May 26 – June 2. — Senate on break until the week of June 2nd.
US House: 10 a.m. — the House will meet for Morning Hour debate and 12:00 p.m. for legislative business.

CONGRESSIONAL PROGRESSIVE CAUCUS – IMMIGRATION — 9:30 a.m. CPC will hold a public forum titled "The Impact of Current Immigration Policy on Women and Children." The forum will precede Homeland Security Secretary Jeh Johnson's testimony in the Judiciary Committee later that morning. Speakers: Rep. Razi M. Grijalva (D-AZ), CPC Co-Chair; Rep. Keith Ellison (D-MN), CPC Co-Chair; Rep. Judy Chu (D-CA); Rep. Sheila Jackson Lee (D-TX); Rep. Barbara Lee (D-CA); Rep. Mark Pocan (D-WI); Rep. Jan Schakowsky (D-IL), Members of the Congressional Progressive Caucus; Two impacted children; Two impacted women; Experts on immigration and family separation. Location: 2226 Rayburn. Contacts: Amy Emerick Clerkin (Rep. Grijalva), 202-225-2435. Mike Casca (Rep. Ellison), 202-225-4755

REPUBLICAN LEADERSHIP STAKEOUT — 10 a.m. Speaker John Boehner (R-OH); Majority Leader Eric Cantor (R-VA); Majority Whip Kevin McCarthy (R-CA); Conference Chair Cathy McMorris Rodgers (R-WA); Conference Vice Chair Lynn Jenkins (R-KS); Rep. Susan Brooks (R-IN). Location: HC-8. Contacts: Conference Communications Ofc, conferencepress@mail.house.gov, 202-225-5107

TIANANMEN SQUARE REMEMBRANCE — 11:30 a.m. House Speaker John Boehner (R-OH) and House Democratic Leader Nancy Pelosi (D-CA) will join Congressman Chris Smith (R-NJ), and other Members of Congress to hold a event in remembrance of the Tiananmen Square Massacre of 1989. Location: Rayburn Room (H-207). Contacts: Kevin Smith, Michael Steel, 202-225-0600. Notes: Coverage Details: All camera crew gear must be in place by 10:00 a.m. for the security sweep. All media must be credentialed through the appropriate media gallery. Carts and gear must be stored in H-320

'RESPECT ACT' — 12 p.m. Congressman George Holding (R-N.C.) and House Judiciary Committee Ranking Member John Conyers (D-Mich.) will hold a press conference to introduce bipartisan legislation, the "Respecting Senior Performers as Essential Cultural Treasures" or the "RESPECT" Act. The RESPECT Act is intended to ensure that older artists receive fair pay from the digital radio services that use their work. Participants include: Martha Reeves, of Martha & the Vandellas; Roger McGuinn, of The Byrds; Sam Moore, of Sam & Dave; Richie Furay, of Buffalo Springfield and Poco; Dickey Betts, of The Allman Brothers Band; Al Jardine, of The Beach Boys; Mark Famer, of Grand Funk Railroad; Gene Chandler, "The Duke of Earl"; Karla Redding, daughter of Otis Redding. Location: 2237 Rayburn. Contacts: Andrew Schreiber (Rep. Conyers), 202-225-6906

CBC – EDUCATION — 2 p.m. – 4 p.m. Members of the Congressional Black Caucus (CBC) will host "Educational Success for Black Men and Boys in a Post Brown v. Board of Education Era," to discuss policies and priorities that will help eliminate systemic barriers for educational success. (The panel discussion is open to the public and will be streamed live at cbc.fudge.house.gov.) Hosted by Rep. Frederica S. Wilson; Rep. Alcee L. Hastings; Rep. Chaka Fattah; Rep. Robert C. "Bobby" Scott; Rep. Danny K. Davis. Moderator: Jonathan Capehart, Columnist, Washington Post and Contributor, MSNBC. Panelists: Judith Browne-Dianis, Co-Director, Advancement Project; Dr. Roy Jones, Executive Director, Call Me Mister; Dr. Leticia Smith-Evans, Interim Director of Education Practice, NAACP Legal Defense and Educational Fund, Inc.; Dr. Ivory Toldson, and Deputy Director, White House Initiative on HBCUs. Location: 2226 Rayburn. Notes: For more information, please contact Keenan Austin at Keenan.Austin@mail.house.gov or (202) 225-4506.

FOR-PROFIT SCHOOLS — 3 p.m. Congressman Mark Takano, Congresswoman Susan Davis and Congressman Raul Grijalva, along with Young Invincibles, will hold a press conference to urge the Department of Education to strengthen accountability standards of for-profit schools and put stronger protections in place for for-profit college students. Location: House Triangle. Contacts: Brett Morrow (Rep. Takano), 202-225-2305.

TECHAMERICA – CLOUD SERVICES – REP. CONNOLLY — 3 p.m. TechAmerica Foundation will release a new report, Cloud Buyers Guide for the Federal Government, to assist departments and agencies with their transition to cloud-based service models, a strategic priority under the Cloud First initiative. Representative Gerry Connolly, co-chair of the House Cloud Computing Caucus, will discuss recommendations on how government departments and agencies can successfully transition to cloud-based model services. Panelists: Greg Capella, Department of Homeland Security; Patrick Dwyer, CGI; Matthew Goodrich, General Services Administration; Yogesh Khana, CSC; Keith Trippie, Trippie Group. CONTACT: Audrey Chang, (202) 295-8779 or audrey.chang@harbourgrp.com. Location: B-339 Rayburn.

NED – 2014 DEMOCRACY AWARD — 5 p.m. – 7 p.m. Imprisoned Chinese activists Liu Xiaobo and Xu Zhiyong honored for their work with the 2014 Democracy awards. Accepting the Award on behalf of Liu Xiaobo will be House Democratic Leader Nancy Pelosi. For a full biography of Rep. Pelosi. Representative Frank Wolf (R-VA) will be receiving the 2014 Democracy Service Medal. <http://www.ned.org/events/2014-democracy-award>. Location: B-338 Rayburn. Contacts: info@ned.org ((202) 378-9700)

ISRAELI PARLIAMENTARIANS — 5:30 p.m. An eleven-member delegation from Israel's Parliament (Knesset), including seven Knesset Members from a variety of political parties and the Director-General of the Knesset, will be hosted by Members of Congress on Capitol Hill Thursday in commemoration of Jerusalem Day. Contact: Jordanna McMillan (202) 697-1540 jordanna.mcmillan@iiacf.org. Location: Rayburn Gold Room. On the Net: <http://www.israelallies.org/>

COMMITTEE MEETINGS

APPROPRIATIONS — 9 a.m. Full Committee Mark Up – FY 2015 Agriculture Appropriations Bill. <http://appropriations.house.gov/calendar/eventsingle.aspx?EventID=381018>. Location: 2359 Rayburn.

BRIEFING MEMORANDUM FOR THE SECRETARY

INTERNAL GREATER SAGE GROUSE UPDATE

DATE: June 2, 2014
LOCATION: Office of the Secretary
TIME: 2:00PM – 3:00PM
FROM: James Lyons, Counselor to the A/S LM (202)208-6734; Michael Bean, Counselor to the A/S FWP; Sarah Greenberger, Counselor to the Secretary

I. PURPOSE

The purpose of Monday's meeting is to provide you with an update on Greater Sage Grouse and a few other ESA issues that may be raised during the upcoming meeting of the Western Governors Association.

II. DISCUSSION

Although there is no scheduled discussion of sage grouse matters on the agenda of the upcoming WGA meeting, the subject is likely to come up

- At your Monday lunch with several Governors,
- In questions following your remarks to the plenary session,
- In the press conference following the announcement of the travel and tourism MOU, or
- Informally in conversations with individual governors. You have a meeting set with Governor Sandoval who may raise sage grouse issues.

We are planning the following actions leading up to the WGA meeting:

- OpEd in your name in a regional paper laying out the case for staying the course on Sage Grouse conservation planning
- Outreach at senior staff level to key Governor's Offices (WY, NV, OR, ID, MT) to preview messages around the process for finalizing plans and including states.
- Recommend you call Governor Hickenlooper and possibly Mead
- Action on Lander (for discussion on Monday)

This memorandum briefly recounts the current procedural posture of sage-grouse conservation planning and then suggests several key points you may wish to convey to the Governors. Your materials for WGA will include refined talking points as well as Q&A on specific greater sage grouse and other ESA issues. We will provide call sheets for Governor calls.

Where we are in the process:

In terms of process, the public comment periods have closed on the 15 Draft EISs for the 98 BLM and Forest Service plans being revised or amended. BLM is analyzing the comments received and preparing draft Administrative Proposed Plans (APPs). The draft APPs, which are

to be completed in June, will then be “rolled up” in July so as to evaluate their aggregate impact on each sage-grouse “primary area for conservation” (PAC) and sage-grouse population identified in the Conservation Objectives Team (COT) report. The purpose of the roll-up exercise is to evaluate the extent to which the key threats to each PAC and population have been ameliorated by the plans. The roll-up exercise, in which the states will be invited to participate, will enable whatever fine-tuning of federal and state plans may be needed to adequately address key threats.

Key points to emphasize

- (1) **The Fish and Wildlife Service has made no decision and has no “leaning” with respect to whether or not the sage-grouse should be proposed for listing.** It will make that determination in 2015 on the basis of all the information available to it then, including the state and federal plans now being completed. It will be guided by the recommendations of the COT report, which was a joint product of state and federal scientists.
- (2) Through the collective efforts of state and federal agencies, **avoiding the need to list the species under the ESA is an achievable goal.** The degree of cooperation that has characterized the work of the federal and state agencies over the last three years is unprecedented. If we continue to work together constructively, it is within our power to remove or adequately reduce the threats to the sage-grouse.
- (3) **“What is good for the bird is good for the herd.”** This recent remark by an Oregon rancher underscores the point that conserving the sage-grouse will have much broader benefits than simply helping that single species. Valued game species, such as mule deer, share many of the sage-grouse’s habitat needs and thus will benefit from efforts to conserve the grouse. Indeed, **the PACs that will be the primary focus of conservation efforts for the sage-grouse are generally congruent with the highest priority “crucial habitat” areas in the CHATs that WGA and the Western states have recently produced.**
- (4) **The states will be invited and encouraged to take part in the forthcoming “roll up”** of BLM and Forest Service plans, to ensure a comprehensive look at the extent to which key threats have been ameliorated in the PACs. This is essential since state and private land comprises a significant fraction of most of the PACs and a majority of the land in several PACs.
- (5) While all the states have been working hard through the Sage Grouse Task Force and other means, **several states have made unique contributions.**
 - Wyoming’s core area strategy both led the way in building a conservation effort around the most important places, but also made effective use of the state’s many regulatory authorities to conserve those places;
 - Nevada is in the forefront of efforts to design a comprehensive and thoughtful approach to mitigation;
 - Oregon is considering a novel approach to disturbance caps that allows the opportunity to learn from gradual increases in disturbance before reaching established caps; and
 - Idaho has embraced adaptive management in a rigorous way.
- (6) Through the work of the Task Force, **many good ideas have emerged regarding how we can better prevent fires and more effectively target our post-fire restoration**

efforts. Our ability to implement those ideas will be greatly aided if together we can persuade Congress to enact bipartisan legislation that changes the way we budget for fire. The help of the Western Governors in securing that legislation is needed.

- (7) **Now is not the time to kick the can down the road**, as some have suggested. The chance we have this year and next to put in place meaningful conservation measures is the best chance to arrest and reverse the decline of an iconic game bird of the West and the habitat upon which it and much other wildlife depends.
- (8) **Release of the Lander Plan.** [We will discuss recent developments and options regarding the Lander plan when we meet.]

SECRETARY JEWELL ANNOUNCES INITIATIVE TO IDENTIFY, PROMOTE HISTORIC LGBT SITES. The [AP](#) (6/2) reports that Interior Secretary Sally Jewell announced Friday at the Stonewall Inn, scene of the riots widely credited with starting the modern gay rights movement, that the NPS will begin marking places of significance to the history of lesbian, gay, bisexual and transgender Americans. The NPS is "convening a panel of 18 scholars who will be charged with exploring the LGBT movement's story in areas such as law, religion, media, civil rights and the arts." It will "identify relevant sites and its work will be used to evaluate them for inclusion on the National Register of Historic Places, designation as National Historic Landmarks or consideration as national monuments." Coverage by the AP was also picked up by the [US News & World Report](#) (5/30, 645K), the [Olympian \(WA\)](#) (5/29, 119K), the [Bristol \(TN/VA\) Herald Courier](#) (6/2, 81K), [WJBK-TV Detroit](#) (6/2, 83K), and [KTVU-TV San Francisco](#) (6/2, 128K).

The Washington Post (5/29, 4.22M) reports that "Friday's announcement is a continuation of the administration's efforts signaling the president's commitment to LGBT rights." The Washington Times (6/2, Emst, 455K) reports that Jewell said, "Part of the job of the National Park Service is to tell this story."

The Hill (6/1, Cama, 237K) reports that "the effort is being partially funded by the pro-gay-rights Gill Foundation, the Interior Department said."

Additional AP coverage was provided by the AP (5/30), the AP (5/29), the Washington Times (5/29, Leff, 455K), the Huffington Post (5/29, Wong, 11.54M), the Minneapolis Star Tribune (5/29, Leff, 1.48M), the Kingston (NY) Daily Freeman (5/28, 73K), the Sacramento (CA) Bee (5/28, 687K), Yahoo! (5/29, Leff, 17.91M), WCBS-TV New York (5/30, 190K), and WJLA-TV Washington (5/30, 118K).

Coverage by the AP was also picked up by the Omaha (NE) World-Herald (6/1, 530K), the Houston Chronicle (6/1, Matthews, 2.23M), the Charlotte (NC) Observer (5/30, 585K), the Minneapolis Star Tribune (6/1, Matthews, 1.48M), and KTVU-TV San Francisco (6/1, 128K).

Also reporting on the story are Also reporting on the story are the Washington Post (5/30, 4.22M), the Wall Street Journal (6/2, Subscription Publication, 5.51M), the US News & World Report (6/2, 645K), the AllGov (6/2, 1K), the Raw Story (5/31, 71K), Slate Magazine (5/30, 14.77M), the UPI (5/30), The Wire (6/1), the Daily Beast (5/28, 1.18M), Government Executive (5/30, 28K), Think Progress (5/30, 124K), InTheCapital (DC) (5/30), the Gay Star News (5/30), the PJ Tatler (5/30, 6K), OUT (5/29, 762K), the WND (5/30, 193K), the WND (6/1, 193K), the Pinknews (UK) (5/28, 13K), the Washington Blade (5/27, 89K), GLAAD (6/1, 2K), the Towleroad (6/1, 86K), Joe. INTERIOR AWARDS FIRST LEASES ALONG US-MEXICO BOUNDARY IN GULF. The E&E Daily (5/30) reports that the Interior Department on Friday announced "it has awarded the first three oil and gas leases in the Gulf of Mexico that are subject to a US-Mexico transboundary agreement approved by Congress last December." The BOEM "issued the leases to Exxon Mobil Corp., which had bid \$21 million for the tracts 170 miles east of Port Isabel, Texas, at the agency's August 2013 lease sale." Interior Secretary Sally Jewell said in a statement, "With the agreement now in full force, we can make additional oil and gas along the resource-rich boundary between the United States and Mexico available and we have a clear process by which both governments can provide the necessary oversight to ensure exploration and development activities are conducted safely and responsibly. These leases represent a significant step forward in US-Mexico cooperation in energy production and pave the way for future energy and environmental collaboration."

Also reporting on the story are the Rigzone (6/2, 8K), the Oil and Gas Journal (6/2, 1K), and the Offshore Engineer (6/2).

INTERIOR, UMATILLA TRIBES REACH AGREEMENT FOR LAND BUYBACK. The Tri-City Herald (WA) (5/30, 115K) reports that "the federal government and the Umatilla tribes have reached an agreement to use money from a class-action settlement to buy back trust lands with many owners and consolidate ownership with the tribes." Gary Burke, chairman of the Umatillas board, said, "We lost over 130,000 acres of land once held in common for the benefit of our tribes." Also, "much of the remaining allotted lands on the Umatillas reservation are owned by Indians who are not members of the Umatilla tribes, he said."

OFFICE OF HAWAIIAN AFFAIRS ASKED TO DELAY NATION-BUILDING PLAN. The Hawaii Tribune-Herald (6/2, 63K) reports that officials at the Office of Hawaiian Affairs are "asking for a six to nine month postponement of a Native Hawaiian convention to determine self-governance in order to educate the public and construct a parallel roll for those who refuse to sign onto a roll ordered by state government." The OHA board of trustees, "faced with 63 people wanting to testify," on Thursday "postponed a decision until its June 5 meeting." The article notes that "testifiers, many of whom flew to Oahu from Hawaii Island and other neighbor islands, were mixed on the best course of action," but "most of those speaking during a daylong meeting frequently punctuated by audience outbursts and applause called for a return to a true Hawaiian kingdom, rather than seek federal recognition or a government-within-a-government status."

Additional coverage of the issue was provided by the Hawaii Free Press (6/2).

CREATION OF NATIONAL MONUMENT IN NEW MEXICO SPARKS INTEREST IN IDAHO. The Twin Falls (ID) Times-News (6/2, 56K) reports that "Idaho conservationists took note during last week's creation of the Organ Mountains-Desert Peaks National Monument in New Mexico." Supporters "of the 592,000 Boulder-White Clouds monument hope Obama's move in New Mexico is sign of things to come in Idaho." The article notes that "a trend has emerged between the two national monuments Obama has designated with the help of Interior Secretary Sally Jewell." In both instances, Jewell "came for a 'listening session' five months before those monuments were designated."

SECRETARY JEWELL'S UK COUSIN CONGRATULATED HER ON DECORATING JOB. The Salt Lake (UT) Tribune (6/2, 470K) reports that "when President Barack Obama nominated Sally Jewell to head the Interior Department last year, a British cousin was excited to dash off a celebratory email to the then-head of REI Inc." Jewell's cousin wrote, "The Waddesdon-Washington lines of communication are a bit hazy but it seems congratulations are in order. We hear you've landed the interior decorating job at the White House." Jewell, "a British native who was then preparing for her confirmation before the Senate, forwarded the note to the Interior Department sherpas guiding her through the process." She wrote, "I thought you might get a chuckle out of this message from one of my cousins in the UK. I can always count on family (from both sides of the 'pond') to keep me down to earth."

OBAMA CALLS CLIMATE CHANGE A PUBLIC HEALTH ISSUE IN WEEKLY ADDRESS. The AP (6/1, Lederman) reports President Obama previewed his announcement of new rules on carbon emissions in his weekly address Saturday, "casting his unprecedented effort to curb greenhouse gases as essential to protect the health and wellbeing of children." The President said, "I refuse to condemn our children to a planet that's beyond fixing." The President recorded the address at Children's National Medical Center, "where medical equipment and white lab coats formed the backdrop." Bloomberg News (6/1, Lerer, 2.76M) reports the President said, "We don't have to choose between the health of our economy and the health of our children." The Voice of America (5/31, 21K) website also reported on Obama's remarks.

Meanwhile, The Hill (5/31, Schroeder, 237K) reported on its website that in the Republican weekly address, Sen. Mike Enzi "accused the administration of trying to kill the coal industry via 'death by regulation,' and slow-walking approvals of domestic oil and gas production, and the Keystone XL pipeline." Enzi said, "The Administration has set out to kill coal and its 800,000 jobs. If it succeeds in death by regulation, we'll all be paying a lot more money for electricity – if we can get it."

EPA To Announce Proposed Rules To Limit Carbon Emissions. Coverage of the planned announcement of the EPA's proposed rules to limit carbon emissions from existing power plants continued on Sunday. The AP (6/1, Lederman, 687K) reports that the rules "form the cornerstone" of Obama's "campaign to combat climate change and a key element of his legacy," while the Los Angeles Times (6/1, Hennessey, 3.46M) notes that the fact that the rules will not be announced by President Obama directly "shows just how far the president has shifted his strategy" on climate change. The story was also covered by the New York Times (6/1, Baker, Davenport, Subscription Publication, 9.65M).

White House Turns Blind Eye To Democratic Attacks On EPA Rules. Reuters (6/1, Mason) reports that, despite the importance of the EPA's new proposed climate rules, the White House has indicated that it does not have a problem with Democratic opposition to the rules in states where Democratic candidates may need to fight the rules in order to maintain a majority in the US Senate.

Green Groups Mount Climate Change Campaign. The New York Times (6/1, Wines, Subscription Publication, 9.65M) reports, that environmental groups "are mounting their own climate-change campaign" by encouraging "in-your-face-activism" and making "global warming an issue in some of this fall's hardest-fought political campaigns." The Times notes that an example of this "retooled strategy" will occur on Monday, when environmental groups hope to rally support for the new proposed EPA regulations by launching a comment-drive "backed by millions in advertising on cable television and online."

No Obvious Solution To Rising Tides In Norfolk, Virginia. In a front-page article headlined "In Norfolk, Evidence Of Climate Change Is In The Streets At High Tide," the Washington Post (6/1, Montgomery, 4.22M) reports that tides in Norfolk, Virginia "have risen 11 / 2 feet over the past century," noting that "the White House

has offered few answers” on what to do about the problem. Norfolk hired a Dutch consulting firm to develop an action plan, the final result of which would cost over \$1 billion and only protect the city from about a foot of additional water, while the Virginia Institute of Marine Science estimates that “by the end of the century, the sea in Norfolk would rise by 51 / 2 feet or more.”

LATIMES PRAISES ARMY CORP OF ENGINEERS PLAN TO REMAKE PART OF LOS ANGELES RIVER. An editorial in the Los Angeles Times (6/2, 3.46M) praises the Army Corps Of Engineers’ decision to “proceed with a more expansive remake of a stretch of Los Angeles River,” saying it presents a “historic opportunity: It allows the city to reorient itself away from 20th century development patterns and toward a greener and more habitable urban future.” The Times says the project “will bind green space and urban life, the San Fernando Valley and the Central City, the past and the future,” adding that while “there will need to be a serious discussion” about how the local portion of the funding for the project will be raised, for now “some celebration is in order.”

America’s Great Outdoors:

National Park Service:

MOUNT RAINIER CLIMBERS MISSING. The CBS Evening News (5/31, story 7, 0:20, Axelrod, 5.08M) reported, “Eight climbers are missing tonight on Washington’s Mt. Rainier. The last time they were heard from was Wednesday and at that point they were 12,800 feet up Liberty Ridge on the mountain’s north face. They had been expected back yesterday.”

ABC World News (5/31, story 6, 0:20, Muir) reported, “Tonight here there is a search under way in the west for six climbers missing on Washington’s Mt. Rainier. The helicopter search is now focused on the mountain’s northwest shoulder – what’s called the Liberty Ridge area. The last contact from the group was a phone call on a satellite phone. That was on Wednesday. Included in that group consists are two tour guides.”

The AP (6/2) reports that “citing dangerous conditions, Mount Rainier National Park officials said there are no immediate plans to recover the bodies of six climbers who likely fell thousands of feet to their deaths in the worst alpine accident on the mountain in decades.”

Also providing coverage are the Washington Post (6/2, 4.22M), the New York Times (6/2, Johnson, Subscription Publication, 9.65M), the Los Angeles Times (6/2, Dave, 3.46M), the Los Angeles Times (6/2, Ganga, Dave, 3.46M), CNN (6/2, Capelouto, Digiaco, 12.15M), USA Today (6/2, 5.82M), Bloomberg News (6/2, Polson, 2.76M), the Seattle Times (6/2, 1.22M), the Sacramento (CA) Bee (6/1, 687K), the Minneapolis Star Tribune (6/2, 1.48M), and the Minneapolis Star Tribune (6/2, Anderson, 1.48M).

DESIGNATION OF SLEEPING BEAR LAND CELEBRATED. The AP (6/2) reports that “a 13-year struggle to protect fragile characteristics of Sleeping Bear Dunes National Lakeshore was celebrated Friday, as 32,500 acres were dedicated as wilderness.” The designation was “contained in legislation approved by Congress and signed by President Barack Obama in March.” Sen. Debbie Stabenow said, “Today’s designation will go a long way to preserving and promoting one of our state’s top tourist attractions. Sleeping Bear Dunes is one of Michigan’s indispensable treasures, and should be protected for future generations to enjoy.”

RAT POISON MAKER AGREES TO STOP SELLING FORMULA THAT HARMED KIDS, PETS. The Los Angeles Times (6/2, Groves, 3.46M) reports that “after years of challenges to federal environmental officials, the maker of d-Con rat traps has agreed to discontinue a consumer line of poison-laced baits that have accidentally harmed children, wildlife and pets.” The poison will be “replaced next year with a new line of baits that the federal Environmental Protection Agency has approved for use in every state.” The article notes that “during nearly two decades of research in and around the Santa Monica Mountains National Recreation Area, National Park Service scientists have documented widespread exposure in carnivores to common household poisons.”

Also reporting on the story is the Los Angeles Times (6/2, Groves, 3.46M).

JOSHUA TREES DYING DUE TO GLOBAL WARMING. The Palm Springs (CA) Desert Sun (5/31, 111K) reports that the “iconic trees” in Joshua Tree National Park are “gradually dying out.” According to the article, “the knee-

high young trees that normally would sprout here have largely vanished from some areas of the national park as the climate has grown hotter and drier in recent decades." And "the remaining mature trees are slowly dying, their gnarled branches collapsing to the ground."

PLAN TO REBUILD ERODED BEACH ALONG CAPE HATTERAS NATIONAL SEASHORE APPROVED. The Sacramento (CA) Bee (5/31, 687K) reports that "federal officials have approved the North Carolina Department of Transportation's plan to rebuild an eroded beach along the Cape Hatteras National Seashore and a nearby wildlife refuge, to protect the Outer Banks highway." According to the article, "federal park and wildlife officials usually are cool to the idea of scooping up sand to rebuild eroded beaches along the Dare County Outer Banks, but they warmed up last year after North Carolina Gov. Pat McCrory said it was an emergency." The state Department of Transportation "plans a beach nourishment project this summer to shore up a perennially washed-out section of N.C. 12 at the Hatteras Island village of Rodanthe, after winning cautious approval from the National Park Service and US Fish and Wildlife Service."

TOURISTS COMPLAIN FINDING KING HISTORIC SITE IS DIFFICULT. The Atlanta Journal-Constitution (6/2, 1.36M) reports that Martin Luther King Jr. National Historic Site officials are asking the Georgia Department of Transportation "to rework signage on the Downtown Connector to help drivers more easily find the neighborhood that nurtured America's greatest civil rights hero." Judy Forte, the National Park Service superintendent of the site, said, "Tourists complain all the time that they can't find us off I-75/85. Or they miss the exit completely."

Bureau of Land Management:

NEVADA RANCHERS DELIVER PETITIONS AGAINST BLM OVER GRAZING. The AP (6/2, Chereb) reports that "about 40 riders on horseback blocked traffic on the main highway of Nevada's capital city Friday to deliver petitions to Gov. Brian Sandoval against the US Bureau of Land Management over grazing rights on federal land." The gathering "ended a weeklong, 300-mile Pony Express-style odyssey orchestrated by Elko County Commissioner Grant Gerber that began on Memorial Day in northeast Nevada." Sandoval "assured them he would take their concerns over grazing allotments in Battle Mountain to the highest officials in the federal agency."

Also reporting on the story is Reuters (6/2, Dobner).

WILD HORSE ADVOCATES FIGHTING ROUNDUPS TO CULL OVERPOPULATED HERDS. The AP (6/2, Sonner) reports that "wild-horse advocates fighting government roundups across the West are citing past rulings that shot down their own legal challenges in urging a US judge to throw out a lawsuit by livestock interests seeking the removal of thousands of more mustangs from the range." The American Wild Horse Preservation filed a motion in Reno Thursday to dismiss the suit by the Nevada Farm Bureau Federation and Nevada Association of Counties. According to the article, "the rural groups argue more roundups are needed to cull overpopulated herds competing with livestock for water and forage."

Also providing coverage are KMGH-TV Denver (6/2, 30K) and WCPO-TV Cincinnati (6/2, 96K).

BLM WON'T CITE TRESPASSERS IN ILLEGAL ATV RIDE. The E&E Daily (5/30) reports that the BLM will not "issue citations to the dozens who rode all-terrain vehicles into an off-limits area of Utah's Recapture Canyon, deferring instead to the US attorney's office in Salt Lake City to take further action." BLM Utah is "still completing its investigation into who violated the agency's 2007 closure order, which banned motorized vehicles in 1,871 acres of the canyon east of Blanding in order to protect Anasazi and Pueblo sites dating back more than 2,000 years." The bureau is also "assessing whether those who participated in the May 10 protest ride damaged any of the canyon's ceramic hearths, storage cisterns, ceremonial kivas and other American Indian sites, which is a separate and potentially more severe federal offense."

CONTINUING COVERAGE OF DISPUTE WITH NEVADA RANCHER BUNDY. In continuing coverage of the dispute with Nevada rancher Cliven Bundy Reuters (6/2, Allen) reports that interviews with some of Bundy's former rancher neighbors and ex-BLM officials suggest that in Clark County, at least, the BLM no longer wanted the ranchers' fees. Rather, the bureau wanted them off the range to fulfill its legal obligation to protect the tortoises living on its land.

Fish and Wildlife Service:

SUPPORTERS OF D.C. BOOTH HISTORIC NATIONAL FISH HATCHERY SEEKING INFORMATION. The AP (6/2) reports that supporters of the D.C. Booth Historic National Fish Hatchery and Archives are “trying to find out whether the Spearfish facility is again on the chopping block.” Officials with the nonprofit Booth Society have “filed a Freedom of Information Act request with the US Fish and Wildlife Service’s regional office in Denver and the national office in Washington, D.C.” according to the article, “the request is for documents that describe, detail, implement or reference any plans to reorganize, repurpose, or close D.C. Booth in the present, near or distant future.”

Also reporting on the story is the Black Hills (SD) Pioneer (6/2, 11K).

CONNECTICUT GOV. MALLOY VETOES BILL ALLOWING EEL FISHING. The AP (6/2, Collins) reports that Connecticut Gov. Dannel P. Malloy on Friday “vetoed a bill that would have opened Connecticut waters to the multimillion-dollar eel industry, saying it would be premature because federal officials are reviewing whether the American eel is a threatened species.” The article notes that “state lawmakers overwhelmingly approved the bill in the final minutes of this year’s legislative session, which ended May 7.” In his veto message to Secretary of the State Denise Merrill, Malloy said, “Protecting vulnerable species is of the utmost importance. Until and unless it is determined that the American eel will not be on the brink of extinction in the near future, I cannot approve a bill that would prematurely move towards lifting our state restriction on fishing for the young life stages of this species.”

In a separate story, the AP (6/2) reports that “twenty-four lawmakers,” led by Rep. Mary Mushinsky, urged Malloy to veto the bill, saying the FWS is “currently reviewing whether the American eel is a threatened species.”

SOME CONSERVATIONISTS DON'T AGREE ON SAGE GROUSE LISTING. The National Journal (6/2, Subscription Publication, 561K) reports that as the federal government is weighing whether to list the sage grouse under the Endangered Species Act, “not all conservationists want to see the US Fish and Wildlife Service add the grouse to the rolls.” Instead, “conservation organizations across 11 states argue that by working with miners, ranchers, state governments, and others who care about the bird—and the implications of listing it as endangered—they can preserve sagebrush habitat and help the sage grouse recover.” The article notes that “another reason for avoiding a listing: If the government goes forward, it’s unclear what might happen and what approach federal officials might take to conserve the bird and its habitat.”

FWS CRITICIZED FOR GOING AFTER CALIFORNIA TREE TRIMMER FOR HURTING HERONS. FOX News (5/30, 6.72M) reports that “in what’s being described as a bird-brained prosecution, federal authorities are going after a California tree trimmer for accidentally injuring five birds while trying to remove limbs from a tree earlier this month.” The FWS is reportedly seeking a \$1,500 fine against Ernesto Pulido for a misdemeanor violation. Rep. Darrell Issa, chairman of the House Oversight and Government Reform Committee, calls it “nothing short of bureaucratic bullying.” Issa “sent a letter to the head of the federal wildlife agency earlier this week questioning the decision to go after Pulido, noting that charges are expected next week.”

NEW MEXICO COUNTY TO FIGHT RARE GROUSE LISTING. The AP (6/2) reports that “an eastern New Mexico county is suing the federal government in an effort to stop the listing of a rare grouse as a threatened species.” The Roosevelt County Commission will meet in special session Tuesday to give notice of intent to file a suit against the FWS. Also, the county is “joining an Arizona/New Mexico coalition in combating the lesser prairie chicken listing.”

GROUP SAYS CALIFORNIA MINING OPERATION THREATENS SNAIL. The AP (6/2) reports that “an environmental group says a mining company’s plan to extract more than a billion dollars’ worth of gold and silver from a mountain near the desert town of Mojave threatens a snail’s existence and must be halted.” The Center For Biological Diversity claims the proposed operation by the Golden Queen Mining Company would “threaten as much as 40 percent of the habitat available to the Mohave shoulderband snail.” Lutz Klingmann of Golden Queen Mining said that “the project has already undergone two environmental reviews.”

QUIVIRA NATIONAL WILDLIFE REFUGE TO REMAIN CLOSED WHEN WHOOPERS ARRIVE. The AP (6/2)

reports that the Quivira National Wildlife Refuge will "remain closed to hunting when endangered whooping cranes are migrating through, but hunters will get a new chance to go after deer and turkey in the refuge under a plan recently approved by the U.S Fish and Wildlife Service." The Comprehensive Conservation Plan the FWS approved for the refuge "requires officials to continue closing Quivira to hunting when whooping cranes arrive." The plan "also calls for adding limited, controlled deer and turkey hunts, which had previously been prohibited in the refuge," according to Mike Oldham, refuge manager.

RESEARCHERS SAY ABRUPT REMOVAL COULD HARM NATIVE PLANTS, ANIMALS. The E&E Daily (5/30) reports that "the practice of eradicating invasive species from ecosystems as quickly as possible has the potential to harm native endangered species, researchers say." Adam Lampert, an author on a study released yesterday in the journal *Science*, said "a more flexible funding process that takes into account a slower and more careful removal focusing on the way invasive species interact with endangered or rare species in the area would be better." Lampert's study "examines a case in the San Francisco Bay in which an invasive plant species called *Spartina*, common along parts of the Atlantic Coast of the United States, took over from a *Spartina* species native to the area."

Securing America's Energy Future:

Onshore Energy Development:

PROTESTERS URGE ADDITIONAL POLLUTION CONTROLS AT NAVAJO GENERATING STATION. The Arizona Republic (5/31, Randazzo, 1.45M) reported that protesters gathered outside the Salt River Project headquarters on Friday to urge environmental regulators to impose additional pollution controls on the Navajo Generating Station. The EPA previously proposed to mitigate haze from the power plant by implementing new pollution controls in 2018, but "SRP and the other plant owners said the plan would cost \$1 billion and was unworkable because of the complex ownership structure." The SRP and plant owners are also currently waiting for the EPA's decision on a proposal to close one of three units in 2019 and add pollution controls to others by 2030.

Pollution Controls For Navajo Generating Station Supported. In an op-ed for the Arizona Republic (5/30, 1.45M), Rep. Chad Campbell supports the plan by the EPA to force the Navajo Generating Station to "clean its air to protect the Grand Canyon." He argues that "we should not accept a lesser plan that will prolong cleanup efforts or omit pollution controls" Campbell also argues that "considering that the federal government — the Bureau of Reclamation — has a majority interest in Navajo Generating Station, it should be doing even more to set an example and begin cleanup of the plant — not in 10, 20 or 30 years, but now."

OSMRE HALTS WEST VIRGINIA PROJECT FUNDING OVER POTENTIAL "IRREGULARITIES". The E&E Daily (5/30) reports that the OSMRE is "halting funding for six water supply projects in West Virginia, citing potential legal 'irregularities' in the application process." According to the article, "the projects at issue are meant to address problems stemming from abandoned coal mines." However, OSMRE says "officials in the state have yet to prove that they qualify for Abandoned Mine Land (AML) funding under the Surface Mining Control and Reclamation Act."

Also reporting on the story are the AP (6/2) and the Bluefield (WV) Daily Telegraph (6/2, 47K).

BLM WORKING ON UINTA BASIN AIR QUALITY ISSUE. The Deseret (UT) News (6/2, 610K) reports that the BLM and Utah State University have "agreed to share resources and scientific data to address air quality issues in the Uinta Basin." Utah BLM director Juan Palma and USU vice president for commercialization and regional development Rob Behunin "signed a memorandum of understanding Friday, formalizing the relationship between the federal agency and the university." Palma said, "I think it's good to remember the Uinta Basin is really critical to the BLM as it relates to oil and gas. In order to for us to keep that focus on (issuing) permits to drill, we need to address air quality."

OIL, GAS LEASE SALE IN NEVADA CHALLENGED. The AP (6/2, Griffith) reports that "a rural county has joined an environmental group in challenging an oil and gas lease sale in central Nevada that could open 270 square miles of public land to hydraulic fracturing, better known as fracking." Lander County and the Center for Biological

Diversity have "filed formal administrative protests over" the BLM's "July 17 sale of leases in 102 parcels around Big Smokey Valley between Austin and Tonopah." Both parties argue "fracking involves an enormous amount of water and they're concerned about its effect on the nation's most arid state at a time of severe drought."

HOUSE PANEL APPROVES NORTHERN CHEYENNE RESOURCE SWAP. The E&E Daily (5/30) reports that the House Natural Resources Committee has "approved legislation meant to rectify a 100-year-old surveying error, which deprived the Northern Cheyenne Tribe of valuable coal resources within tribal land." Montana Republican Rep. Steve Daines' H.R. 4350 would "give the tribe control of roughly 5,000 acres of subsurface coal rights in the southeastern part of the state." According to the article, "the current owner, Great Northern Properties LP, would then receive roughly 10,000 acres of federal coal reserves outside Northern Cheyenne lands as compensation."

NORTH CAROLINA LEGISLATURE SENDS FRACKING BILL TO GOVERNOR. The E&E Daily (5/30) reports that North Carolina legislators "pushed through a bill intended to speed up the approval of natural gas drilling in the state, while imposing criminal penalties on people who disclose the chemicals used in hydraulic fracturing." The "Energy Modernization Act" would originally "have made it a felony to disclose fracking chemicals." The state Senate had "already reduced that to a misdemeanor before sending the bill to the House of Representatives."

BID FOR CALIFORNIA FRACKING MORATORIUM FAILS ON STATE SENATE FLOOR. The E&E Daily (5/30) reports that "California legislation that would have established a moratorium on hydraulic fracturing and other forms of petroleum-well stimulation failed in the state Senate yesterday." S.B. 1132, by state Sen. Holly Mitchell, would "have banned all well-stimulation treatments until the state completes a study on their environmental effects." The article notes that "the final Senate vote was 16-16, short of the 21 votes needed to send the bill to the Assembly."

SOME BLAME FRACKING WELLS FOR SPATE OF TEXAS EARTHQUAKES. USA Today (6/2, Jervis, 5.82M) reports that some Texans are blaming a rash of recent earthquakes on fracking, though energy companies "deny a direct link between the earthquakes and the wells, citing a lack of evidence." The "vast majority of the 35,000 disposal wells throughout Texas have reported no seismic activity, said Bill Stevens of the Texas Alliance of Energy Producers," though his group has created a task force to examine the issue.

Offshore Energy Development:

INTERIOR URGED TO HALT PLANNED SEISMIC AIRGUN SURVEYS. The E&E Daily (5/30) reports that "critics of the Interior Department's plan to allow the use of seismic air guns to search for oil and gas beneath the Atlantic seafloor enlisted a bit of star power yesterday from actor Reid Scott of the HBO comedy show "Veep." At a briefing held by Oceana, Scott said, "The federal government wants to turn the Atlantic Ocean into a blast zone. This has the potential to harm everything in its path, including fisheries and marine life such as dolphins, sea turtles and the already endangered North Atlantic right whale."

Additional coverage of seismic testing was provided by KNOM-FM Nome, AK (5/30).

Tackling America's Water Challenges:

GROUPS CRITICIZE BAY DELTA CONSERVATION PLAN. The Stockton (CA) Record (5/30, 123K) reports that the Bay Delta Conservation Plan is "available only in English, despite the high prevalence of other tongues in diverse Delta communities such as Stockton." California has "published broad overviews of the project in Spanish, but those overviews do not dive into complex environmental impacts, such as the possibility of degraded water quality or increased air pollution." Critics of the plan "voiced their objections Thursday, claiming that the lack of translated documents violates the law by leaving uninformed the very people who stand to be impacted the most – such as Stockton's large Southeast Asian community, which is culturally connected to the Delta and eats large quantities of fish."

Also reporting on the story is the Central Valley (CA) Business Times (6/2, 206)

Comments Period Extended. The Stockton (CA) Record (5/31, 123K) reports that "the public has more time to

comment on the governor's twin tunnels plan after officials Friday released a legal document that contains more details about how the \$25 billion plan would be implemented." The article notes that "the six-month public comment period was due to end on June 13. Instead, it will now continue until July 29."

Also reporting on the story is the [Los Angeles Daily News](#) (5/30, 347K).

BOR PARTNERS WITH NATIONAL GUARD AT BELLE FOURCHE RESERVOIR. The [Rapid City \(SD\) Journal](#) (6/2, 141K) reports that the BOR and the South Dakota Army National Guard have "entered into an agreement permitting the SDARNG access to federal Reclamation lands at Belle Fourche Reservoir at Orman Dam to conduct military training." Joe Hall, Division Manager of Environment and Resources with Reclamation's Dakotas Area Office, said, "The planned projects will provide valuable on-the-job training to troops, while benefiting Reclamation, the Belle Fourche Irrigation District and the recreating public."

BOR SEEKING TO BUILD CONSENSUS AROUND LAKE NIGHORSE. In an op-ed for the [Durango \(CO\) Herald](#) (5/31, 28K), Ed Warner, Western Colorado area manager for the BOR, writes that the BOR would "like to provide an update to the community regarding recreation at Lake Nighthorse as part of the Animas-La Plata Project." He notes that "currently, we are working with all Animas-La Plata Project partners and stakeholders to reach consensus regarding development and management of recreation at Lake Nighthorse." He continues, "We believe that we are nearing an agreement to integrate recreation into the project while ensuring compatibility with the primary purposes of the project for municipal and industrial water supply."

FEINSTEIN WATER LEGISLATION CRITICIZED. In an op-ed for the [San Jose \(CA\) Mercury News](#) (6/2, 696K), Hamison 'Hap' Dunning, a member of the board of The Bay Institute and professor of law emeritus at the UC-Davis School of Law, and Steve Machtinger, the chairman of the board of The Bay Institute and an attorney in San Francisco, criticize Sen. Dianne Feinstein for appearing "to blame the conservation community for the state's failed water management practices." They claim that "the restoration program created by Feinstein's legislation has minimized water supply impacts to the Friant water districts and provided water supply benefits to other parts of the San Joaquin Valley." In conclusion, they urge Feinstein "to preserve the legacy of her commitment to balancing agricultural water supply needs with protection of the environment."

Empowering Native American Communities:

INTERIOR SEND NOTICE THAT THEY WILL BEGIN TAKING LAND INTO TRUST. The [Oneida \(NY\) Dispatch](#) (5/31, 32K) reports that the Interior Department has "filed a notice that it will begin taking 13,003.89 acres of land into trust on behalf of the Oneida Indian Nation as of June 30." According to the notice filed by Department of Justice Attorney Steven Miskinis, "the current cases raised by Upstate Citizens for Equality, Verona and the Central New York Fair Business Association have no bearing on the DOI's 2008 decision to take land into trust for the OIN." The Interior Department "goes on to state in the notice that they will give no further notice of taking land into trust on behalf of the Nation."

Also reporting in the story is the [Utica \(NY\) Observer Dispatch](#) (5/31, Cooper, 11K).

INTERIOR APPROVES NAVAJO NATION'S NEW LAND LEASING REGULATIONS. The [Farmington \(NM\) Daily Times](#) (6/2, 46K) reports that the Interior Department has "approved the Navajo Nation's new regulations for streamlining residential and business site leasing on the reservation." The Navajo Nation General Leasing Regulations of 2013 "grant the tribe the authority to approve such leases without involvement from the Bureau of Indian Affairs." In a press release issued by the Navajo Nation Washington Office, Navajo Nation President Ben Shelly called the Interior Department's approval "a great step forward."

ADDITIONAL COVERAGE OF PROPOSED CHANGES TO FEDERAL RECOGNITION RULES. Additional coverage of the proposed changes to federal recognition rules was provided by the [Seattle Times](#) (6/2, 1.22M).

Top National News:

CRITICS QUESTION LEGALITY OF SWAP THAT FREED AMERICAN POW BERGDAHL. The culmination of a deal reached by the Administration to secure the release of Sergeant Bowe Bergdahl in return for the freeing of

five Taliban leaders who had been held at Guantanamo Bay dominated the news cycle on Sunday, and was the lead story on all three network newscasts, which devoted almost 19 minutes of airtime to the story – more than all the rest of the day’s news combined. Media reports cast Bergdahl’s release as an unambiguously positive development for his family and his community, but also as a controversial move on the part of the Administration given the crimes allegedly perpetrated by the Taliban leaders swapped for Bergdahl and the potential precedent that the deal sets.

On the CBS Evening News (6/1, story 2, 2:10, Glor, 5.08M), Mark Albert reported that the five Taliban leaders who were released are “among a group of 48 prisoners the Pentagon previously deemed too dangerous to release.” Albert noted that on Sunday, Sen. John McCain “said although he is relieved Sergeant Bergdahl is coming home, the circumstances of the exchange disturb him.” McCain: “They are big, high-level people, possibly responsible for the deaths of thousands.”

In a front-page article, the New York Times (6/2, A1, Rosenberg, Gall, Subscription Publication, 9.65M) reports that “for the Obama administration...the exchange was an important achievement” that “also set up a new conflict between President Obama and Republican lawmakers, who argued that the administration should not have set the prisoners free...without congressional approval, and that the released men would strengthen” the Taliban. The Times also says the swap “risked conferring the kind of legitimacy on the Taliban leadership that American officials have sought to avoid.”

On the CBS Evening News (6/1, lead story, 2:45, Glor, 5.08M), Jeff Glor noted that on Sunday in Qatar, “the five members of the Taliban the US traded arrived at an airport to hugs and smiles.” In the lead story for NBC Nightly News (6/1, lead story, 4:15, Holt, 7.86M), Lester Holt reported that “Taliban leader Mullah Omar himself...is calling the release by the US of five Taliban commanders from Guantanamo Bay, ‘a great victory.’” Holt added, “By keeping its promise to not leave any American behind on the battlefield, the Obama Administration says it has kept the faith with our troops, but a growing chorus of lawmakers is...asking, ‘at what cost?’”

David Muir, on ABC World News (6/1, lead story, 3:00, Muir), mentioned “the images of the five Taliban detainees hugged upon their arrival in Qatar,” and then said there has been a “backlash to their release.” Muir added that the Administration is “very pleased with how this played out” although correspondent Jim Avila went on to report that “the happy day talking point has not spread to all quarters of Washington.” ABC World News (6/1, story 3, 1:10, Muir) also had a short segment focused on the reception in Qatar for the Taliban leaders released this weekend.

The Hill (6/1, Cirilli, 237K) reported that the news of the prisoner swap “dominated the Sunday talk shows, pushing Friday’s resignation of Veterans Affairs Secretary Eric Shinseki from the headlines.” According to The Hill, “The Sunday shows were packed with Republicans launching into political attacks against President Obama and the administration.” The New York Times (6/2, Knowlton, Subscription Publication, 9.65M) reports that in response, “top Obama administration officials pushed back...against Republican” arguments that the deal “could allow dangerous Taliban leaders to return to the fight, might encourage terrorist groups to seize American hostages and possibly violated a law requiring notification of Congress.”

McClatchy (6/1, Allam, Rosen, Subscription Publication, 23K) reports that the “unprecedented prisoner exchange...sparked both jubilation and controversy.” McClatchy notes that the Administration “failed to notify Congress 30 days in advance, as U.S. law requires, that it was transferring the five Taliban detainees from Guantanamo,” and, according to McClatchy, “officials explained their decision to notify Congress only after the detainees were being turned over to Qatari diplomats by saying Obama was acting in his capacity as commander in chief.” An anonymous “official” is quoted as saying, “This is a case of the commander in chief exercising his prerogative to get one of his soldiers back.”

The AP (6/2, Baldor, Woodward) reports that on Sunday, Republicans contended that the swap “could place U.S. troops in danger, especially if the freed detainees return to the fight.” AFP (6/2, Mojaddidi) reported that in an appearance on NBC’s Meet The Press, Defense Secretary Hagel “staunchly defended the trade as an effort to save Bergdahl’s life and said it could provide a breakthrough for” the ongoing negotiations with the Taliban regarding the future of Afghanistan.

The Wall Street Journal (6/2, Nicholas, Subscription Publication, 5.51M) reported that on CBS’ Face The Nation,

McCain said, "It is disturbing that these individuals would have the ability to reenter the fight. And they are big, high-level people, possibly responsible for the deaths of thousands." The Journal also reports that on ABC's This Week, Sen. Ted Cruz asked, "How many soldiers lost their lives to capture those five Taliban terrorists that we just released?" Cruz added, "What does this tell terrorists? – that if you capture a U.S. soldier, you can trade that soldier for five terrorists we've gone after." According to the Journal, Rep. Mike Rogers (R-MI), the chairman of the House Intelligence Committee, acknowledged that members of Congress had been told that a deal such as the one that took place was being considered, but Rogers said the proposal "didn't get a very warm reception from either party in the national security committees."

The Hill (6/1, Cirilli, 237K) noted that Sen. John McCain also said that when the Administration "previously told Congress about the possibility of transferring the Taliban members for the release of Bergdahl," the plan was met with "bipartisan opposition." Reuters (6/2, Strobel) reports that on NBC's Meet the Press, Rep. Adam Kinzinger (R-IL) said, "The release of five mid- to high-level Taliban is shocking to me, especially without coming to Congress" because "it says in the law you have to notify Congress."

The Wall Street Journal (6/2, Subscription Publication, 5.51M), in an editorial that is otherwise critical of the Administration and the President's decision to release top-level Taliban commanders before a final peace deal has been reached, maintains that, contrary to the opinions of many Republicans, the President had the authority to release the detainees.

Former senator and secretary of the navy Jim Webb weighed in on the controversy on CNN's State Of The Union (6/1, Crowley, 862K), stating: "We're going to have to see a much more vigorous discussion from Congress on presidential authority. What we've seen in the past is that Republicans don't particularly want this discussion because they're more aggressive in terms of this use of force in that part of the world. The Democrats don't want it because they don't want to be disloyal to the presidency, but we have to have that discussion."

During a roundtable on ABC's This Week (6/1, Stephanopoulos, 2.73M), the Weekly Standard's Bill Kristol stated: "I'm impressed by the courage of Republicans willing to criticize ... the unfortunate deal made by the President of the United States. Everybody is happy to have Sergeant Bergdahl back, but it takes some political courage to say, 'wait a second, let's look at the long-term national interest of the country.'"

Pentagon: Freed Taliban Tied To War Crimes, Terrorist Training, Opium Dealing And Attacks On US Forces. The Los Angeles Times (6/2, Cloud, 3.46M) provides some background information from Pentagon documents on each of the Taliban leaders released. According to the Times, Muhammad Fazl, the former deputy defense minister, "was wanted by the United Nations for 'possible war crimes, including the murder of thousands of Shiites,'" and Khairullah Khairkhwa, who served as interior minister, "was associated' with a military training camp run by Abu Musab Zarqawi, a notorious Al Qaeda-linked leader later killed by U.S. forces in Iraq," and "was 'probably one of the major opium drug lords in western Afghanistan.'" The Times adds that Mullah Norullah Noori was also "wanted by the U.N. for possible war crimes, including the deaths of thousands of Shiite Muslims," while Abdul Haq Wasiq, "was involved in recruiting other militant groups to fight against the U.S.," and Mohammed Nabi "was part of a militant cell...that attacked U.S. troops."

The Washington Times (6/2, Sherfinski, 455K) reports that Sen. Saxby Chambliss, the ranking Republican on the Senate Intelligence Committee, "said the administration assure him six months ago they would not consider the release of the leaders without consulting Congress." Chambliss is quoted as saying, "These men are not soldiers; they are dangerous terrorists and President Obama should be treating them as such."

Regarding the shift in policy, New York Times columnist David Sanger stated during a roundtable on CBS' Face The Nation (6/1, Schieffer, 2.64M), "Four years ago there was the thought that this would be a confidence building measure that would be on the way to a more comprehensive deal with the Taliban," but "it was not only Republicans who...had concerns at that time about releasing these five members of the Taliban; there was some prominent Democrats who similarly had concerns."

Dan Murphy, in an analysis for the Christian Science Monitor (6/2, Murphy, 566K) titled, "Five Taliban Released For Sgt. Bergdahl? This Is How Wars End," says that "with the US set for full withdrawal from Afghanistan at the end of 2016, the prospect of a crushing defeat for the Taliban is pretty much nil." According to Murphy, "Four of the five men released into Qatar's custody...were indeed senior members of the Taliban movement." However,

Murphy adds that based on currently available evidence, "none of the released men were ever directly involved in efforts to mount terrorist attacks on the US or any other foreign country."

Hagel, Rice: US Did Not "Negotiate With Terrorists" To Secure Bergdahl's Release. The Huffington Post (6/1, Sheppard, 11.54M) reported that on CNN's State Of The Union, Rep. Mike Rogers (R-MI), the chairman of the House Intelligence Committee, warned that when "you negotiate" for hostages "you've sent a message to every al Qaeda group in the world – by the way, some who are holding U.S. hostages today – that there is some value now in that hostage in a way that they didn't have before." According to Rogers, "The No. 1 way that al Qaeda raises money is by ransom – kidnapping and ransom."

USA Today (6/2, Gomez, 5.82M) reports that in a statement released on Sunday, Sen. Marco Rubio said, "I fear that the administration's decision to negotiate with the Taliban for Sgt. Bergdahl's release could encourage future terrorist kidnappings of Americans." According to the Washington Times (6/2, Sherfinski, 455K), "the handover followed secret and indirect negotiations between the U.S. and the Taliban."

However, Reuters (6/2, Strobel) notes that on NBC's Meet The Press, Hagel insisted that the Administration "didn't negotiate with terrorists" to secure Bergdahl's release. Reuters reports that Hagel said, "As I said and explained before, Sergeant Bergdahl was a prisoner of war. That's a normal process in getting your prisoners back."

The Huffington Post (6/1, Sheppard, 11.54M) reported that on ABC's This Week, National Security Adviser Susan Rice "defended the negotiation and release," saying Bergdahl "wasn't simply a hostage, he was an American prisoner of war, captured on the battlefield." The Daily Caller (6/1, Bordelon, 408K) noted that on CNN's State Of The Union, host Candy Crowley asked Rice, "point blank, did the US negotiate with terrorists for his release?" According to the Daily Caller, Rice answered, "What we did was ensure that, as always, the United States doesn't leave a man or woman on the battlefield."

NBC's Miklaszewski Challenges Rice's Claim About Bergdahl's Health. The New York Times (6/2, A1, Landler, Subscription Publication, 9.65M) reports that the Administration "cited Sergeant Bergdahl's deteriorating health as the reason it moved so quickly to obtain his release, even at the price of trading five veteran Taliban fighters." The Wall Street Journal (6/2, A1, Entous, Barnes, Subscription Publication, 5.51M) also reports that Administration officials said Bergdahl's physical condition was the impetus for completing the deal.

On CNN's State Of The Union (6/1, Crowley, 862K), National Security Adviser Susan Rice said, "Given the acute urgency of the health condition of Sergeant Bergdahl and given the President's constitutional responsibilities, it was determined that it was necessary and appropriate not to adhere to the 30-day notification requirement because it would have potentially meant that the opportunity to get Sergeant Bergdahl would have been lost."

On NBC Nightly News (6/1, lead story, 4:15, Holt, 7.86M), correspondent Jim Miklaszewski reported that "critics also claim President Obama broke the law by not notifying Congress 30 days before the Taliban prisoners were released." Miklaszewski added that Rice "claims Congress was informed once Bergdahl was released, but that his failing health required immediate action." However, according to Miklaszewski, "By all accounts, Bergdahl was in good physical condition when turned over to US special operations forces."

The Los Angeles Times (6/2, Pearce, 3.46M) notes that Secretary Hagel also "told reporters traveling with him on a visit to Afghanistan" that Bergdahl's "safety and health were both in jeopardy," and described Bergdahl's health as "deteriorating." Likewise, USA Today (6/2, Brook, 5.82M) reports that Hagel said "the urgency to make the move was made in part because Bergdahl's health had been deteriorating after five years as a Taliban prisoner," meaning the "decision to secure his release now was made... 'essentially to save his life,'" according to Hagel.

Sen. Claire McCaskill, on Fox News Sunday (6/1, Wallace, 586K), "We saved this man's life. The commander in chief acted within his constitutional authority.. [to] get that man after five years of captivity."

Circumstances Surrounding Bergdahl's Capture Draw Scrutiny. Persistent unanswered questions about how Bergdahl ended up separated from his unit are said to have muted the reaction to news of his release from members of the military. Under the headline, "Mixed Reaction To Bergdahl's Recovery By Service Members Who Consider Him A Deserter," The Washington Post (6/2, A1, Lamothe, Sieff, 4.22M) reports that Bergdahl "is

believed to have slipped away from his platoon...after growing disillusioned with the U.S. military's war effort." The Post adds that "an entire U.S. military division and thousands of Afghan soldiers and police officers devoted weeks to searching for him, and some soldiers resented risking their lives for someone they considered a deserter."

The New York Post (6/2, 2.77M) is reporting that "in an e-mail to his parents three days before he went missing," Bergdahl wrote: "These people need help, yet what they get is the most conceited country in the world telling them that they are nothing and that they are stupid. ... I am ashamed to be an American. And the title of US soldier is just the lie of fools. ... The horror that is America is disgusting."

On NBC Nightly News (6/1, lead story, 4:15, Holt, 7.86M), correspondent Jim Miklaszewski reported that US officials "still want to know why Bergdahl walked off his base...in Afghanistan." On the CBS Evening News (6/1, lead story, 2:45, Glor, 5.08M), Bigad Shaban reported that "behind the applause and the embrace the Bergdahls got from the President in the Rose Garden...is the lingering question of how and why Sergeant Bergdahl separated from his unit, only to be caught by the Taliban." According to Shaban, "US officials refuse to comment on reports over the past few years that Bergdahl may have tried to desert his post when he walked off base unarmed." On ABC World News (6/1, story 2, 2:30, Muir), Jim Avila said, "the murky details of sergeant Bergdahl's original capture in 2009 were not divulged" this weekend.

According to the AP (6/2, Baldor, Woodward), Defense Secretary Hagel, at Bagram Air Field in Afghanistan, "thank[ed] the special operations forces who retrieved Bergdahl," but "was met with silence" from the troops assembled there after declaring: "This is a happy day. We got one of our own back." The AP says it is "unclear whether the absence of cheers and applause came from a reluctance to display emotion in front of" Hagel "or from any doubts among the troops about Bergdahl." The AP notes that it has been reported that before he ended up in the Taliban's custody, Bergdahl was "considering desertion" because he was "ashamed to even be American."

The New York Times (6/2, Cooper, Subscription Publication, 9.65M) reports that "there was some ambivalence among the troops waiting in a hangar at Bagram to hear from" Hagel. The Times also reports that on Sunday, an unidentified "senior Defense Department official indicated...that the Army would probably not be punishing the sergeant for any violations of rules," saying, "Whatever he may have done, I think he's more than paid for it."

The Hill (6/1, Cirilli, 237K) reported that "some critics allege that Bergdahl walked off his base...in 2007." The Hill noted that National Security Adviser Susan Rice was asked by George Stephanopoulos on ABC's This Week, "If it is found that he did, will he be disciplined or has he already paid the price?" According to The Hill, Rice replied, "Certainly, anybody who has been held in those conditions in captivity for five years has paid an extraordinary price, but that is really not the point." Rice said Bergdahl "served the United States with honor and distinction."

The New York Times (6/2, Knowlton, Subscription Publication, 9.65M) reports that when "asked whether the sergeant, who by some reports was captured after leaving his base without authorization, might be subject to military discipline... Hagel replied, 'This is a guy who probably went through hell for the last five years, and let's focus on getting him well.'"

The Los Angeles Times (6/2, Pearce, 3.46M) reports that on Sunday, Bob Bergdahl said, "I'm so proud of your cultural abilities to adapt, your language skills. ... But most of all, I'm proud of how much you wanted to help the Afghan people, and what you were willing to do to go to that length."

Afghan Officials Protest Release Of Taliban Commanders Without Their Input. The Wall Street Journal (6/2, Abi-Habib, Hodge, Subscription Publication, 5.51M), in an article titled, "Afghanistan Raises Objections To Swap Of Taliban Prisoners For American," reports that some Afghan officials are angry because they think they could have wrested substantial concessions from the Taliban in return for the five US detainees, and now they have lost their bargaining power without ever having been informed by the US that such a deal was imminent.

Detainee Advocates Hope Bergdahl Swap Could Be A Harbinger Of Gitmo's Closure. The AP (6/2, Fox) reports that "some who have criticized the government for moving too slowly on transfers say the exchange for Bergdahl...shows the Obama administration can act more forcefully to close Guantanamo." Wells Dixon, "an attorney with the New York-based Center for Constitutional Rights who has represented prisoners at

Guantanamo," is quoted as saying, "This illustrates that the U.S. government can transfer prisoners when it is motivated to do so."

Special Operations Mission To Retrieve Bergdahl Detailed. According to the Washington Post (6/2, A1, Hamburger, Sieff, 4.22M), "The commander of the U.S. Special Operations team that retrieved...Bergdahl on Saturday was in direct contact with his Taliban counterpart as the two sides arranged and approached their rendezvous near Afghanistan's border with Pakistan." The Post adds that "officials said 'dozens' of Special Operations troops went to the site in helicopters for the meeting with 18 Taliban...while additional militants waited in the distance." The Post also reports that while Bergdahl "had been held in western Pakistan for nearly five years by the Taliban-allied Haqqani network," US officials "insisted...that it was the Taliban, and not the Haqqanis, who turned him over."

Absence Of Koran Quote In White House Transcript Noted. Neil Munro, in a piece for the Daily Caller (6/1, 408K) titled, "Obama Submits To Taliban Demands, Allows Praise For Allah," notes that appearing alongside President Obama, Bob Bergdahl, Sgt. Bergdahl's father said, "Bismillah ir-Rahman ir-Rahim," which Munro translates as "In the name of Allah, most Gracious, most Compassionate." According to Munro, "Although Bergdahl quoted the Quran verse, the White House transcript did not translate it or even include" mention of it having been recited. Munro notes that the transcript "simply said Bergdahl spoke in the Pasho language, which is the language of the Pushtun tribe, which forms the vast majority of the Taliban force," although, "in fact, 'Bismillah ir-Rahman ir-Rahim' is Arabic."

The New York Times (6/2, Furber, Subscription Publication, 9.65M), in an article on the planned celebrations in Bergdahl's hometown of Hailey, Idaho, reports that Bob Bergdahl learned Pasho, "the language common to the Taliban," as part of his years-long effort to convince his son's captors to release him.

SANDERS PROPOSES BROAD VA REFORM BILL. USA Today (6/2, Davis, 5.82M) reports that on Sunday, Senate Veterans Affairs Committee Chairman Bernie Sanders released a "broad proposal" to "revamp health care for 6.5 million veterans as the department faces an expanding investigation into the way care is provided at VA medical facilities." On CBS' Face The Nation, Sanders said, "The truth is that when people get into the VA, the quality of care is good. The problem that we have to address is access to the system and waiting lines." A hearing on the proposal will be held on Thursday, and Senate Majority Leader Harry Reid said the Senate "could move quickly to vote on it."

The AP (6/2, Cappiello) reports that the legislation "would allow veterans facing long delays to seek care outside the VA, at private doctors' offices, military bases or community health centers." In addition, it "also authorizes emergency funding to hire new doctors and nurses and would provide scholarships or forgive college loans for doctors and nurses who go to work at the VA." Finally, it "would give the department authority to fire poor-performing executives, but not as broadly as a bill passed in the House and defeated in the Senate last month."

Reuters (6/2, Trott) reports that Sanders said, "We are going to introduce legislation either tomorrow or Tuesday which addresses the short-term need to make sure that any veteran who is on a long waiting line will be able to get the care that he or she needs, either at a private facility or a community health center or Department of Defense base."

The Washington Post (6/2, O'Keefe, 4.22M) reports that in addition to Sanders, several Republicans, including Sens. John McCain and Richard Burr, "have announced plans to introduce a series of proposals as soon as Tuesday but have not specified what they might include." Looking at Sander's legislation, it also covers a number of issues not raised by the current VA scandal. It would "authorize expanded dental care for veterans, restore full cost-of-living adjustments for military retirement pensions, provide assistance to veterans who were sexually assaulted or raped while serving and require advance, multi-year appropriations for VA operations."

In his column for the Washington Post (6/2, 4.22M), E.J. Dionne Jr. writes that the response to the VA scandal is a "prime example of what's wrong with our politics." Dionne says that Shinseki "is a true Patriot," and it is now time for Congress to "account for their own mistakes." He argues that Sanders is one the right track with his legislation.

In an editorial, USA Today (6/2, 5.82M) says that the "Washington ritual part" of the VA scandal has ended, and

now begins "the daunting and difficult task of fixing the VA's deep-seated and systemic problems." USA Today says that "one good place to start is brutal honesty," adding that all involved "should drop the charade that any of this was a surprise." The Administration "will need to find new leaders who have experience in the private sector, who are proven managers, who know how to run hospitals or huge academic institutions."

Veterans Groups Seek Better Management, Not Additional Funding. The Washington Times (6/2, Klimas, 455K) reports that the President and "some of his supporters in Congress" have "signaled that their next goal may be a boost in funding for the troubled department's health care services." However, veterans groups argue that the VA's problems are "with management and leadership, which can't be fixed with cash."

Speculation Surrounding Shinseki's Successor Mounts. The VA scandal was a top story on the Sunday news shows, with much of the focus being on the departure of Secretary Shinseki, the needs of the department, and the qualifications for a successor.

Regarding Shinseki's successor, former senator and secretary of the navy Jim Webb said on CNN's State Of The Union (6/1, Crowley, 862K), "You need someone who knows how to run institutions and who understands the nature of government bureaucracies. When I was in the Pentagon years ago, we saw a lot of people come from the corporate world thinking that they were going to apply the corporate standard involving weapons systems, for instance. You need to have both. You need to have someone who knows how to get to the heart of these problems."

Sen. John McCain on CBS' Face The Nation (6/1, Schieffer, 2.64M) said: "This is a situation in that the President needs to call together the best people he can find. I'd ask General Petraeus, Tom Colbert, anybody in Congress who knows more about healthcare, should be the next Secretary of the Veterans Administration in my view."

Rep. Adam Kinzinger (R-IL) said on NBC's Meet the Press (6/1, Gregory, 3.08M), "A good leader knows what his subordinates are doing and if he doesn't have control over his subordinates, he really gets in there and figures it out. Look, I don't want to impugn the reputation of General Shinseki... but I thought it was time for him to go to get new blood in there. ... I want to see people fired. I want to see people prosecuted [for their roles] in creating this secret waiting list. ... We have to get dead serious of this. This is the beginning of taking control."

House Veterans Affairs Committee member Rep. Mike Coffman said on Fox' News Sunday Morning Futures (6/1, Bartiromo), "I think the turning point in why the President made the decision that he could no longer defend Gen. Shinseki is there was a vote in the House Veterans Affairs Committee to subpoena all written communications to and from General Shinseki regarding the destruction of the documents, the so-called secret list at the Phoenix VA hospital. And that was a unanimous vote in the House Veterans Committee, Republicans and Democrats standing together."

House Veterans Affairs Committee Chairman Jeff Miller said on Fox News Sunday (6/1, Wallace, 586K), "VA does a great job when you're dealing with battlefield injuries, traumatic brain injuries, spinal cord injuries. Those are the things that are the core mission of the VA. ... The vast majority of the new veterans that are being enrolled in the system are, in fact, older veterans from Korea and Vietnam with aging issues. They don't necessarily have to be treated at a VA hospital."

Regarding whether he is optimistic that the VA will experience a "serious cultural change" as a result of the scandal, Phoenix VA whistleblower Dr. Sam Foote stated on Fox News Sunday (6/1, Wallace, 586K); "Yeah, I'm extremely hopeful. [The VA is] great at chronic care, diabetes, [but the agency] falls down at urgent and emergency room type care and when hospitalization is needed, especially out West where the distances are great and population is sparse."

On NBC's Meet The Press (6/1, Gregory, 3.08M), Defense Secretary Hagel added: "We work very closely with the Veterans Administration. We'll continue to do that. We'll continue to offer everything we can offer in order to assist them, but we have no higher responsibility in our country than to take care of these men and women whose selfless service we depended on and continue to depend on to this day, and we'll fix it."

During a roundtable on ABC's This Week (6/1, Stephanopoulos, 2.73M), Wall Street Journal columnist Peggy Noonan stated: "I was very struck by Mr. Shinseki questioning the integrity of the information he had been given

as the head of the VA. I think that tells you there are cultural problem with regards of what you tell the boss." Remnick added: "Eric Shinseki has won a purple heart, lost most of his foot in battle, his integrity and devotion to this country is not in question, but what's in question is his ruling over the VA. It has done a terrible job and it has ruled in a way that's completely ineffective. It's an outrage to the veterans themselves. A change was needed. But it's a tragic thing to see a guy like Eric Shinseki have to walk out the door with a degree of shame."

During a CNN's State Of The Union (6/1, Crowley, 862K) roundtable, House Intelligence Chairman Mike Rogers and former national security adviser Jim Jones weighed in on the VA scandal. Rogers stated: "[Shinseki's] service to his country is unparalleled, no one should question that. But the management of the VA in the last five years has not been good. ... Something is rotten at the VA, and we need to get to the bottom of it. I would bring somebody from the outside to get a handle on this thing. It should be quick. It should be severe."

Politico Analysis: Hagel Leans On Reviews When Problems Arise. Politico (6/1, Ewing, 637K) reports Defense Secretary Hagel's "go-to weapon system is not found on any base, in any hangar or aboard any ship. It's a review." And while the reviews are underway, Hagel "cannot comment" on the issue. Hagel "issued the marching orders for his latest review on Thursday, this time to help him decide what, if anything, to do about DOD's health system."

EPA TO CALL FOR 30% CUT IN POWER PLANT EMISSIONS BY 2030. The first details of the EPA's new rules for cutting emissions by existing coal plants were widely covered in the latest news cycle. The coverage generally portrays the proposals as the President's largest step toward battling climate change, but they are also seen as likely to be the source of a contentious battle in coming months. Most reports also note that the EPA has declined to confirm the early reports of the details prior to Monday's formal announcement.

The Washington Post (6/2, A1, Eilperin, Mufson, 4.22M) reports that the EPA will propose cutting carbon dioxide emissions from existing power plants by "30 percent by 2030, according to individuals who have been briefed on the plan and asked for anonymity because it has not been formally announced." The Post says that rule "represents one of the most significant steps" the Federal government has ever taken to fight climate change, and are "sure to spark a major political and legal battle."

USA Today (6/2, A1, Koch, 5.82M) reports that the rule is a "major plank" of the President's initiative to battle climate change, and "will require states to develop and implement plans" to cut emissions. States will have "different reduction targets," but "will seek a national average – from 2005 levels – of 25% by 2020 and 30% by 2030, say those familiar with the plan." However, the rules are not expected to be put into effect "for at least another two years."

On its front page, the New York Times (6/2, A1, Davenport, Subscription Publication, 9.65M) says that rule "could trigger a fundamental transformation of the nation's energy systems – if it withstands an expected onslaught of legal and legislative attacks."

The Wall Street Journal (6/2, A1, Harder, Subscription Publication, 5.51M) reports the details on its front page and adds that states need to submit compliance plans to the EPA by June 2016.

The Washington Times (6/2, Wolfgang, 455K) reports that critics argue that the proposal "is designed to accelerate the end of coal as a power source" in the US, but the President and his backers "in the environmental community dispute that characterization and say the plan won't tank the economy and will allow states ample time and leeway to meet the new targets."

The Los Angeles Times (6/2, Banerjee, Halper, Memoli, 3.46M) calls the rules the "linchpin" of the President's "climate-change campaign" and a "key part of his legacy." The Times says that opponents of the rules, "such as the U.S. Chamber of Commerce, congressional Republicans and Democrats from coal states," have "already lined up to oppose it as government overreach that would do little to address climate change while imperiling the economy."

The Huffington Post (6/1, Sheppard, 11.54M) reports that across the economy, US emissions "already declined 10 percent between 2005 and 2012, due in large part to increased use of natural gas and lower overall energy consumption." The US has "committed to a 17 percent overall cut by 2020."

In an analysis piece, the New York Times (6/2, Gillis, Fountain, Subscription Publication, 9.65M) says that "it is clear" that the President's "immediate goal is not to solve the emissions problem, but to get the country moving faster in the right direction." The rule alone "offers little hope that the United States and other nations can achieve cuts on a scale required to meet the internationally agreed limit on global warming." However, it would likely allow the President to claim that he hit the targets set out in Copenhagen in 2009.

Cuts Less Than Hoped For By Green Groups. Politico (6/1, Martinson, 637K) says that if the numbers, first reported in the Wall Street Journal, are accurate, "they could mean that the reductions may be somewhat less ambitious than some environmental groups had been hoping for." Politico says that some green groups "had pushed for the cuts to be based on a more recent year like 2010 or 2012," when carbon emissions had already begun to fall. The 30 percent goal "would be equivalent to cutting 17 percent from the carbon emissions produced in 2012."

Rules Divide Democrats. The Washington Post (6/2, Wilson, 4.22M) reports that when the President announces the new rules on Monday, "some of the loudest cries of opposition are likely to come from members of his party." While "major donors" to the Democrats are likely to hail them, candidates whose "fates will decide control of the Senate and who hail from energy-producing states" are likely to oppose them. Candidates such as Sens. Mary Landrieu, Mark Pryor, Mark Begich, Kay Hagan, and "to a lesser extent," Mark Udall, are likely to see the new rules emerge as a serious issue in their race.

Bloomberg Analysis: Move Insufficient Without Matching Action Overseas. Bloomberg News (6/2, Drajem, Efstathiou, 2.76M) calls the rules the "boldest step to halt the rise of the oceans and stop the warming of the planet," but adds that it "won't be enough unless the rest of the world follows." Cutting power plant emissions by 25 percent "would be more than overwhelmed by increases in China and India where coal-fired power plants are springing up and new cars are rolling out of showrooms." In addition, the emissions cuts "will not come close to meeting the global reduction scientists say is necessary to reverse warming."

NYTimes Analysis: Americans Agree Climate Change Is Real. The New York Times (6/2, Kopicki, Subscription Publication, 9.65M) reports that "a majority of Americans say that global warming is indeed happening and the numbers have held relatively steady since the mid-2000s." That number varies slightly with temperature, the Times says, but remains generally consistent. The Times says that there is "reason to think that global temperatures, after having been somewhat steady in recent years, are likely to begin rising again," and if so, "belief in global warming may soon rise again, too."

Climate Reports Have Pentagon Shifting Money To Green Concerns. The Washington Times (6/2, Scarborough, 455K) reports that a decade ago, the Pentagon "paid for a climate study that put forth many scary scenarios" that didn't pan out. However, the report, and others like it, according to "critics," are "causing the Pentagon to shift money that could be used for weapons and readiness. It is making big investments in biofuels, for example, and is working climate change into high-level strategic planning."

Editorial Wrap-Up:

NEW YORK TIMES. "The Vanishing Cry Of 'Repeal It.'" An editorial in the New York Times (6/2, Subscription Publication, 9.65M) says that Republican plans to "coast into office" amid cries of "repeal Obamacare!" are not working out as planned as "a large majority now says it wants the law improved rather than repealed." Republican leaders are "suddenly trying to rewrite" their playbook and the result "has been an incoherent mishmash of positions, as candidates try to straddle a widening gap between blind hatred of health reform and the public's growing recognition that much of it is working." Noting that some Democrats, "sensing the same change in the weather, are beginning to campaign on the law's benefits," the Times argues that improving "access to health care was the right thing for the country, and supporting it may turn out to be good politics, too."

"A Vote On Medical Marijuana." In an editorial, the New York Times (6/2, A20, Subscription Publication, 9.65M) praises the New York State Assembly for approving a measure legalizing medical marijuana and, noting that there appear to be enough votes to pass it in the State Senate, calls on that body to do so before the legislative session ends on June 19. Noting that the measure "has wide support from medical groups and patient

advocates, and polls show that a large majority of New Yorkers support medical marijuana," the Times says it "time for Senate leaders to allow a vote."

"Encouragement (Sort Of) About Press Freedom." In an editorial, the New York Times (6/2, Subscription Publication, 9.65M) notes that Attorney General Holder's claim last week that, "As long as I'm attorney general, no reporter who is doing his job is going to go to jail," was seen as a sign that the Justice Department would not jail Times reporter James Risen for defying a subpoena ordering him to reveal his sources in the trial of former CIA official Jeffrey Sterling. That Times expresses hope that this reading of Holder's comment is correct, adding, however, that there are "reasons to be wary," because Holder did not "rule out imposing steep fines, or otherwise inflicting harm on Mr. Risen and press freedom," the Times argues that simply "ruling out jail time won't do," and calls on Holder to "drop the demand that Mr. Risen testify about his sources."

"Bad Food In School Cafeterias." An editorial in the New York Times (6/2, A20, Subscription Publication, 9.65M) calls the First Lady's "rebuke" of House Republicans, who "balked at requiring all schools to serve healthy lunches" in the next school year "well-deserved" and express hope that the Senate "holds out against such inanity." Noting that a House panel approved waivers for any school district that "verifies a net loss from operating a food service program" for a six-month period, the Times calls on states to "guard against a district's use of accounting tricks designed to create losses," and Congress to "resist any push to make the waivers permanent or to weaken the guidelines."

WASHINGTON POST. "Feeding The World." In an editorial, the Washington Post (6/2, 4.22M) defends the uses of genetically modified crops, saying they have "increased the productivity and improved the lives of farmers — and the people who depend on them — all over the world." Noting that they are now banned in two Oregon counties, the Post says that there is "no mainstream scientific evidence showing that foods containing GMOs are any more or less harmful for people to consume than anything else in the supermarket, despite decades of development and use." The Post says that there is "no need for the government to stigmatize products with a label that suggests the potential for harm."

"Picks In Prince George's."

WALL STREET JOURNAL. "Trading With The Taliban." The Wall Street Journal (6/2, Subscription Publication, 5.51M), in an editorial that is otherwise critical of the Administration and the President's decision to release top-level Taliban commanders before a final peace deal has been reached, maintains that, contrary to the opinions of many Republicans, the President had the authority to release the detainees.

"Europe's Syria-Trained Jihadist." In an editorial, the Wall Street Journal (6/2, Subscription Publication, 5.51M) casts the arrest of Mehdi Nemmouche for the shooting deaths of three people at a Jewish museum in Belgium as confirmation of US and European security officials' fear that Syria is becoming a training ground for domestic jihadis and says the export of radical jihadis from Syria is an argument for Western aid to Syria's nonradical opposition.

"Fraudulent Government Accounting." In an editorial, the Wall Street Journal (6/2, Subscription Publication, 5.51M) argues that despite Federal government claims to the contrary, the government actually loses money on student loan programs, single-family home mortgages guaranteed by the Federal Housing Administration, and the long-term guarantees provided by the Ex-Im Bank. The Journal says that a CBO study shows that, under fair-value accounting rules, all programs lose money.

"Discord In Shangri-La." An editorial in the Wall Street Journal (6/2, Subscription Publication, 5.51M) that the rhetoric from Chinese officials at last weekend's annual Shangri-La Dialogue in Singapore bolstered fears that Beijing and the US are on a collision course.

Washington Schedule:

TODAY'S EVENTS IN WASHINGTON.

White House:

PRESIDENT OBAMA — Travels to Warsaw, Poland.

VICE PRESIDENT BIDEN — Travels to Kiawah Island, South Carolina.

FIRST LADY MICHELLE OBAMA — Delivers remarks at the keel-laying ceremony for the future USS Illinois, the 13th Virginia Class submarine at North Kingstown, Rhode Island.

US Senate: 2 p.m. — The Senate will convene. Following any leader remarks, the Senate will be in a period of morning business until 5:30 p.m. with senators permitted to speak therein for up to 10 minutes each.

At 5:30 p.m., the Senate will proceed to Executive Session to consider Executive Calendar 633, the nomination of Keith M. Harper, of Maryland, for the rank of Ambassador during his tenure of service as United States Representative to the UN Human Rights Council. There will be 2 minutes of debate prior a roll call vote on the motion to invoke cloture on the Harper nomination.

US House: 12 p.m. — The House will meet in a pro forma session.

Other: NATIONAL SECURITY, FOREIGN POLICY – LEW — 8:30 a.m. U.S. Treasury Secretary Jacob J. Lew and U.S. Treasury Under Secretary David Cohen delivers remarks on the 10th anniversary of Treasury's Office of Terrorism and Financial Intelligence. Location: Center for Strategic and International Studies (CSIS), 1616 Rhode Island Ave. NW.

VILSACK – FEDS FEEDING FAMILIES CAMPAIGN — 10 a.m. – 11 a.m. Agriculture Secretary Tom Vilsack will kick off the 2014 Feds Feed Families Campaign. In the past five years, Federal employees have donated over 24 million pounds of food through Feds Feed Families. All Federal agencies across the country participate in the campaign and Federal employees are asked to donate non-perishable food items throughout the summer.

Speakers: Agriculture Secretary Tom Vilsack; Agriculture Assistant Secretary for Administration Dr. Gregory Parham; Karen T. Comfort, National Program Manager for Feds Feed Families; U.S. Representative Eleanor Holmes Norton; Nancy E. Roman, CAFB President and CEO. Location: U.S. Department of Agriculture, Corner of 12th and Independence Ave. SW. Location: U.S. Department of Agriculture, Corner of 12th and Independence Ave. SW.

WORKERS – FALL SAFETY – PEREZ — 1 p.m. Press teleconference to kick-off of National Safety Stand-Down to Prevent Falls in Construction with U.S. Secretary of Labor Thomas E. Perez; Assistant Secretary of Labor for Occupational Safety and Health Dr. David Michaels. DIAL IN: 800-619-2534, Passcode: OSHA . Media contact: Kimberly Darby at darby.kimberly@dol.gov or Mary Brandenberger at brandenberger.mary@dol.gov or by calling 202-693-1892. <https://www.osha.gov/StopFallsStandDown/>**Last Laughs:****LATE NIGHT POLITICAL HUMOR.**

Subject: Fwd: Extension Agreement

Sally, we have successfully negotiated an extension agreement with Wild Earth Guardians. Tomorrow, DOJ will file the request with Judge Sullivan. Cross your fingers!

If you have a moment, please shoot a note to Ed Roberson at BLM. He is a hero in this effort. If not for his effort, it would not have happened.

Dan.

Subject: Re: Extension Agreement

Dan,

Your notes reflect my understanding of our discussion as well. Thank you. Have a good week.

On May 4, 2014, at 9:06 AM, Dan Ashe <d_m_ashe@fws.gov> wrote:

John, below are notes from our conversation today, incorporated into your message from yesterday. Call if you have questions or concerns. DOJ wants to get the motion filed by tomorrow, noon, so they will need to contact your attorney early tomorrow morning.

Thanks again for the patience and cooperative spirit.

Dan.

Dan Ashe

Director, U.S. Fish and Wildlife Service

Dan,

My apologies for not getting back to you this afternoon.

(b)(6)

When I texted just before I needed to attend to other matters I wanted to let you know that we'd reached internal agreement that BLM's revisions were largely satisfactory. However, there are still a few items that need resolution.

1) The U.S. Fish and Wildlife Service (FWS) will issue a final listing determination for Gunnison sage grouse, including a final critical habitat determination, and publish it in the Federal Register on or before November 12, 2014. *Agreed that FWS will make a final listing determination and, if listing remains warranted, a final critical habitat designation and deliver those findings to the Federal Register by Nov 12, 2014 (unless Guardians calls later today with agreement to push that date out into December.)*

2) The Service will not seek any additional delays in the listing process for the Gunnison sage grouse. We'd like the motion to reflect this commitment. *Agreed that FWS will not seek any additional delays, unless the necessity of an event(s) beyond our control, like a government shutdown, that prevents us from meeting this deadline; and agreed, we will incorporate that commitment into the motion, if possible.*

3) The Bureau of Land Management (BLM) will revise the current Instruction Memorandum (IM) No. CO-2013-033 to include 4 mile lek buffer language, a deferring all coal and fluid minerals leasing, and will

review current Best Available Science in consultation with the Service regarding grazing and other adverse impacts to Gunnison sage grouse, by May 12, 2014 (see attached for details on the revisions). The revised IM will remain in effect until the Resource Management Plan (RMP) amendment process is completed with the issuance of a single Record of Decision (ROD). This is anticipated to take approximately 18 months.

Everything the BLM has offered is satisfactory-- the only exceptions to the BLM's document are the reference to engaging CPW and the State of Colorado and some of the language that expresses uncertainty about the BLM's commitment to make these revisions. I would also like to have a commitment that the IM is revised by May 12. We're already uncomfortable as it is that the BLM won't be making these changes until after the motion will be filed. Hopefully on Monday (See attached document which has our revisions) *Agreed, including removal of explicit reference to engaging CPW and State of Colorado, with exception that the IM revisions will be completed by May 30, 2014, and acknowledgement that CPW will be consulted for field and scientific expertise.*

4) BLM will publish a Notice of Intent initiating scoping on a Programmatic RMP amendment process for Gunnison sage grouse in the Federal Register on or before May 31, 2014. I'd like to have a letter from the Director, State Director or the Secretary expressing this commitment. *Agreed to deliver Notice of Intent to the FR by June 30, 2014, and to reflect the commitment to do this and revise the current IM in a memo from BLM HQ to the State*

Director to be issued tomorrow.

DOJ will submit the proposed motion for Guardians' review before it is submitted to the Court. *Agreed.*

I have a (b)(6) all day tomorrow but could talk between 8 and 8:30. Between 12 and 1 or after 6. Let me know if you'd like to talk. Notwithstanding my absence this afternoon I would like to get this resolved asap. I hope you're enjoying your time in Detroit.

DOI in the News:

EPA POWER PLANT RULE WILL AIM FOR 30% REDUCTIONS. The E&E Daily (6/2) reports that the EPA will "seek to cut up to 30 percent of carbon dioxide from existing power plants before 2030." EPA Administrator Gina McCarthy will propose "the first-ever limits on greenhouse gases from the nation's power plants under Section 111(d) of the Clean Air Act, the most significant move to date in the Obama administration's effort to curb climate change." The article notes that "the proposal will generate \$90 billion in climate and health benefits."

The E&E Daily (6/2) reports that "coal production and mine employment would decline under the Obama administration's rule proposal for controlling greenhouse gases from existing power plants, according to US EPA's analysis." The article notes that "the regulatory impact analysis that accompanies the landmark proposal released today outlines scenarios where coal would take a hit at the expense of natural gas and other energy sources." According to the analysis, "The EPA projects coal production for use by the power sector, a large component of total coal production, will decline by roughly 25 to 27 percent in 2020 from base case levels," and "the use of coal by the power sector will decrease by roughly 30 to 32 percent in 2030."

The Examiner (6/3, 1.56M) reports that Interior Secretary Sally Jewell "joined the White House today on the

announcement, saying President Obama understands the moral obligation to future generations to leave the nation's land, water, and wildlife better off than otherwise would be the case if power generators, who have burned coal for scores of years, are permitted to continue to produce electricity by burning coal."

The National Journal (6/3, Subscription Publication, 561K) reports that Jewell said, "The President understands that we have a moral obligation to future generations to leave our land, water, and wildlife better than we found it. From standing up homegrown renewable energy and transmission infrastructure, to reducing methane emissions while supporting safe and responsible energy development, to making lands and waters more resilient in the face of climate change, the Interior Department is committed to being a strong partner in cutting carbon pollution and creating American jobs. The common sense steps being taken by the Environmental Protection Agency will protect public health while providing states with the flexibility they need to make informed decisions about the mix of energy sources that works best for them."

ADDITIONAL COVERAGE OF ANNOUNCEMENT ON LGBT HISTORY INITIATIVE. Additional coverage of the announcement that the NPS will "begin installing markers at places of importance to the history of lesbian, gay, bisexual and transgender Americans" as provided by the AP (6/3, Wong), the National Review (6/3, 879K), and the Los Angeles Times (6/3, Forgione, 3.46M).

OBAMA URGED TO FOLLOW THROUGH ON CONSERVATION PROMISES. In an op-ed for the Bristol (TN/VA) Herald Courier (6/3, 81K), Marsha Mercer writes that "when signing the order designating Organ Mountains a national monument," President Obama said "he understands 'our obligation to be good stewards to the next generation — to make sure that our children's children get the same chance to experience all of these natural wonders.'" Mercer asserts that Obama "needs to follow" Theodore Roosevelt's "lead, keep his hand on the lever and follow through on his conservation promises."

America's Great Outdoors:

National Park Service:

NO PLANS TO RECOVER SIX CLIMBERS KILLED ON MOUNT RAINIER. The E&E Daily (6/2) reports that Mount Rainier National Park officials said "there's no certainty" it will "be possible to recover the bodies of six climbers likely killed climbing the peak in Washington state." According to park spokeswoman Patti Wold, "the area will be checked periodically by air in the coming weeks and months, but melting conditions and the potential for unstable rock and snow make it too treacherous for rescuers."

Also providing coverage are the AP (6/3), the AP (6/3, Corte), and CNN (6/2, 12.15M).

EVERGLADES RESTORATION PLAN STUCK IN LIMBO. The E&E Daily (6/2) reports that "a \$2 billion plan to restore the central Everglades could be stuck in limbo for years." The project would "channel water around Lake Okeechobee to the rest of the wetlands, which are facing a water shortage crisis and threats from climate change." The Army Corps of Engineers "approved the plan last month, a day after the Senate passed the first comprehensive water bill in seven years," but "the law didn't include funding for the central Everglades restoration, causing environmentalists to fear it could be placed on hold until Congress authorizes more money, which could take several years."

HISTORIC LANDMARK STATUS RECOMMENDED FOR S.S. BADGER. The Manitowoc (WI) Herald Times Reporter (6/2, 34K) reports that "the S.S. Badger car ferry has once again been recommended for designation as a National Historic Landmark, according to Patty Henry of the National Historic Landmarks Program." The article notes that "this time the recommendation is on its way to the office of Secretary of the Interior, Sally Jewell, who has final say." According to the article, "that could be months coming, if further checks of the nomination must go through don't stall or thwart the nomination."

74 STUDENTS GRADUATE FROM NPS PROGRAM. The Hanover (PA) Evening Sun (6/3, 66K) reports that Randall Hill, Acting Chief of Maintenance at Gettysburg National Military Park and Eisenhower National Historic Site, "graduated from a six-month National Park Service (NPS) program called the GOAL Leadership Academy, which stands for Generating Organizational Advancement & Leadership recently." Hill was "one of 74 students in

the program which included training and assignments at the Grand Canyon, Philadelphia, Golden Gate Recreational Area in San Francisco, and the NPS Washington Office." The article notes that "to demonstrate his leadership skills, Hill and a team of NPS employees completed a project to utilize goats for managing vegetation in the NPS Northeast region, which includes parks from Virginia to Maine."

NPS CRITICIZES AUCTION OF CIVIL WAR SOLDIER'S SKULL. The Hanover (PA) Evening Sun (6/3, 66K) reports that "the auction of a Civil War soldier's skull, set to begin at 1 p.m. Tuesday in Hagerstown, Md., is seen as a 'spectacle' by" the NPS in Gettysburg. Katie Lawhon, spokeswoman with the Gettysburg National Military Park, said, "Our goal is to respect the memory of those who fought and died here. These human remains should be buried with honors in the Soldier's National Cemetery." According to Lawhon, "the sale of a Civil War soldier's skull illustrates the need to preserve places such as Gettysburg, Lawhon."

ARIZONA MEMORIAL OFFICIAL: TICKETS SALES IMPROPER. The AP (6/3) reports that "it was a mistake to sell to tour operators what are supposed to be free tickets for the USS Arizona Memorial, its superintendent said." Paul DePrey last week said "that selling the tickets was proper and legal, but he later said he was mistaken." DePrey said, "We stopped the program because I learned I made a mistake."

NPS SEEKS PUBLIC COMMENTS ON CLINTON BIRTHPLACE SITE. The AP (6/3) reports that the NPS is accepting public input "on possible changes or improvements to the Clinton Birthplace National Historic Site in Hope." The public comment period opened last week and runs through June 30. The NPS "hopes to identify projects that can document the historic character of the neighborhood as experienced by former president Bill Clinton."

BID RECEIVED FOR WEST CORINTH ELEMENTARY PROPERTY. The AP (6/3) reports that the Siege and Battle of Corinth Commission was "the sole bidder at \$1,499 for the former West Corinth Elementary School." The Corinth Board of Aldermen is expected to accept the bid Tuesday. The NPS "wants the land to become part of the Corinth Unit of Shiloh National Military Park."

STONES RIVER NATIONAL CEMETERY OFFERS FREE TOURS. The AP (6/3) reports that the NPS is "offering free tours of the Stones River National Cemetery this summer."

Bureau of Land Management:

WILD HORSE ADVOCATES URGE BLM NOT TO "APPEASE" RANCHERS ON ROUNDUPS. The Salt Lake (UT) Tribune (6/3, 470K) reports that "wild horse advocates say 35,000 people have filed comments with the Bureau of Land Management, urging the agency not to 'appease' ranchers by rounding up wild horses in Utah's Iron and Beaver counties." Advocates "charged Monday that the BLM 'plans to spend tens of millions of tax dollars to round up federally protected wild horses in order to give a handful of ranchers cheap, below-market grazing on our public lands.'" Suzanne Roy, director of the American Wild Horse Preservation Campaign, said, "The problem is too many cows on our public lands, not too many wild horses."

Also reporting on the story is KCSG-TV St. George, UT (6/3, 43).

BLM FIGHTING WILDFIRE FUEL WITH GOATS. The Ruidoso (NM) News (6/3, 40K) reports that BLM officials "fighting wildfire fuel with goat power." The bureau "launched a goat grazing project on 16 acres in the historic settlement of Lincoln behind the State Historic Site off US 380 in the Rio Bonito Acquired Lands Tract 3." The objective of "the grazing is to reduce the amount of vegetation available to wildfire, decrease the risk of loss to adjacent property and to improve watershed conditions."

BLM-UTAH EMPLOYEE RECEIVES MAKING A DIFFERENCE AWARD. The Deseret (UT) News (6/3, 610K) reports that a BLM Utah employee has received a national BLM award. Rob Sweeten, landscape architect with the BLM-Utah State Office in Salt Lake City, was chosen to receive the national BLM employee Making a Difference Award. According to the article, "since 2009, Sweeten has mentored six student interns, most of whom began as BLM volunteers," and "he worked to convert the students to Student Temporary Employment Program status or to a conservation corps intern with the American Conservation Experience youth organization."

Fish and Wildlife Service:

SENATE PANEL TO EXAMINE CLIMATE IMPACTS TO FORESTRY, SPORTSMEN. The E&E Daily (6/2) reports that a Senate panel will “delve into how climate change is affecting farming, forestry, hunting and fishing.” The Environment and Public Works Subcommittee on Green Jobs and the New Economy will “hear from a top Obama administration official, a fishing industry executive, renewable energy advocates and scientists on how those sectors can adapt and create jobs.” FWS Director Dan Ashe will “focus much of his testimony on how climate change has caused harm to species prized by sportsmen.”

MEASURE WOULD DELAY SAGE-GROUSE PROTECTION TEN YEARS. The Durango (CO) Herald (6/2, 28K) reports that “with six months until an administrative rule on whether the Gunnison sage-grouse will be protected under the Endangered Species Act, a new piece of legislation is ramping up efforts to delay a listing for 10 years.” Rep. Cory Gardner “introduced the Sage Grouse Protection and Conservation Act on May 22.” The legislation would “keep both the Gunnison and greater sage-grouse from becoming listed as an endangered species for 10 years, while states implement state-based conservation plans.”

COMMISSIONER SAYS HE PLANS TO ASK CURRY COUNTY TO JOIN LESSER PRAIRIE CHICKEN LAWSUIT. The Clovis (NM) News Journal (6/2, 21K) reports that Commissioner Wendell Bostwick said “he plans to ask that Curry County join Roosevelt County in a lawsuit seeking to kill the Fish and Wildlife Service’s decision to designate the lesser prairie chicken a threatened species.” Bostwick said “he has asked the request be placed on the Curry County Commission’s agenda at a special meeting scheduled for 1:30 p.m. Friday at the courthouse.” The article notes that “it isn’t clear, however, if Bostwick has enough support on the five-member commission to approve the move.”

FWS TO FINALIZE PROTECTIONS FOR WEBBER’S IVERSIA . The E&E Daily (6/2) reports that the FWS will “finalize protections for a ground-hugging rose found in California and Nevada.” The FWS will “list the Webber’s iversia (*Ivesia webberi*) as threatened under the Endangered Species Act, according to a final rule set to be published in tomorrow’s Federal Register.” The service “determined that the plant is most threatened by invasive plant species encroaching on its limited habitat.”

Also reporting on the story are KCET-TV Los Angeles (6/3, 15K) and the Nevada Appeal (6/3, 49K).

PIPING PLOVER LAWS GENERATE DEBATE ALONG ATLANTIC COAST. The E&E Daily (6/2) reports that “protections for a threatened shorebird species are roiling beach towns up and down the East Coast.” According to the article, “communities from Maine to North Carolina are struggling to maintain beach access for residents and protect the piping plover, which the federal government listed as threatened in 1986 after a steep population decline.” The article notes that “wildlife officials fined the town of Scarborough, Maine, \$12,000 for the death of a piping plover chick last year but reduced the penalty to \$500 after locals mounted a vigorous protest.”

CALIFORNIA BROWN PELICAN BREEDING POPULATION DROPS. The AP (6/3) reports that “California brown pelicans, which were driven to the brink of extinction in the last century, are in trouble again.” The article notes that “an annual survey completed last month found a drastic plunge in the population of breeding pairs, according to a statement released Friday by the University of California, Davis.” The “survey in Mexico’s Gulf of California — where about 90 percent of the pelicans typically breed and raise their chicks — found that areas that typically host hundreds or thousands of nesting pairs held far fewer, and a few places were completely empty, the statement said.”

RAT POISON MAKER AGREES TO STOP SELLING HARMFUL PRODUCT. The E&E Daily (6/2) reports that “the maker of a controversial rat poison has agreed to stop selling a product that poses risks to children, wildlife and pets, the company said last week.” Reckitt Benckiser Group PLC, the producer of “the line of poison-laced bait pellets called d-Con, had previously sued California seeking to overturn a ban on its product.” According to the article, “while the company will continue to sell the items until the end of the year, it will then replace them with a new line of rat poisons in block form, which are more difficult to remove and which US EPA has approved for use in all states.”

ABU DHABI PRINCE, OTHER DONORS PLEDGE \$80 MILLION TO HELP WILD CATS. The E&E Daily (6/2)

reports that "Abu Dhabi's crown prince joined with other international donors yesterday to pledge a total of \$80 million to protect at-risk wild cats like tigers." They "announced the partnership with New York-based feline conservation group Panthera after a private signing ceremony in the United Arab Emirates' capital city." The article notes that "also donating were Jho Low, CEO of Hong Kong-based investment firm Jynwel Capital Ltd.; Hemendra Kothari, chairman of DSP BlackRock India and India's Wildlife Conservation Trust; and Kaplan and his wife, Daphne Recanati Kaplan."

ADDITIONAL COVERAGE OF FEDERAL INQUIRY IN HERON-INJURY CASE. Additional coverage of the inquiry into the case of a tree trimmer who is expected to face federal criminal charges for allegedly injuring baby night herons last month while pruning ficus trees outside an Oakland post office was provided by the New York Times (6/3, Pogash, Subscription Publication, 9.65M) and the San Francisco Chronicle (6/3, Jones, 3.33M).

Securing America's Energy Future:

Renewable Energy:

BOEM SEEKS PUBLIC COMMENT ON OREGON PROJECT IMPACTS. The Recharge News (6/3, 633) reports that the BOEM is "seeking public comment through 28 July as it prepares an environmental assessment (EA) to analyze potential impacts of Principle Power's proposed 30MW demonstration wind project off the coast of Oregon." The bureau will "also hold two public meetings in Coos Bay, Oregon on 17 June to solicit comments on the scope of the EA."

Onshore Energy Development:

REPORT CRITICIZES COAL ASH STORAGE AT FOUR CORNERS POWER PLANT. The Cortez (CO) Journal (6/2, 646) reports that "a new report released by the Sierra Club is critical of coal-ash storage facilities and expansion plans at the Four Corners Power Plant, located on the Navajo Nation in New Mexico." The report, titled "Disaster Waiting to Happen" states that "the plant's operator, Arizona Public Service, has stored 50 to 55 million tons of coal ash in unlined pits near the San Juan River." Lori Goodman, coordinator for Diné Citizens Against Ruining our Environment, said, "The major concerns for Navajo tribal members are the health impacts and financial burden of health care due to coal ash."

CLEANUP OF OIL LEAK IN DELTA WILDLIFE REFUGE TO BEGIN. The Baton Rouge (LA) Advocate (6/3, 22K) reports that "federal and state officials will burn an area of the Delta National Wildlife Refuge Tuesday that was contaminated by a 2,100 gallon crude oil leak discovered Wednesday." The article notes that "about 10 acres of freshwater marsh in the Delta National Wildlife Refuge, located southeast of Venice in Plaquemines Parish, was impacted by the oil." According to the article, "access to the site is limited to flat-bottom boats," so the FWS "agreed with a decision to burn the area to remove the oil."

SEN. UDALL BALANCES ENERGY, CLIMATE ISSUES. The E&E Daily (6/2) reports that over the past 18 months, Sen. Mark Udall has "traveled the Centennial State touring the state's various energy producers, from coal mines to wind farms, and it became clear at a forum here last week that the exact route he had taken and that lies before him is a very fine line." During a "Colorado Energy Forum" at the Colorado School of Mines, Udall "emphasized the need for 'collaboration' between industry and local communities, while also touting a need to continue to utilize the state's abundant fossil fuel resources." Udall asserted that "Colorado's energy policies could serve as an example for the nation."

SOME SPECULATE INCREASED LOS ANGELES-AREA QUAKES RESULT OF FRACKING. The Los Angeles Times (6/3, Lin, 3.46M) reports that the Los Angeles area has experienced a rise in earthquakes this year. In the past five months there have been five earthquakes registering more than 4.0, something that hasn't happened since 1994, the year of the Northridge earthquake. Experts are unsure if the increase in activity means a larger quake is looming, or why the increase is occurring. The Times notes that USGS studies indicate "the increased number of earthquakes coincides with the injection of wastewater deep underground" during the fracking process. Three members of Los Angeles' City Council have asked city, state and Federal groups to investigate whether fracking played a role in one of this year's stronger quakes, occurring March 17.

Offshore Energy Development:

EX-SENATOR SEEKS EXCEPTION TO CUBAN EMBARGO. The E&E Daily (6/2) reports that “a retired Democratic senator from Florida is pushing for an exception to the US trade embargo against Cuba – all in the name of safety.” Former Sen. Bob Graham, who “co-chaired the 2010 national commission that investigated BP PLC’s Deepwater Horizon oil spill, says Cuba should be allowed to buy oil drilling safety equipment from US companies to cut down on the risk of a well blowout.” Graham said, “We’re not doing the Cubans a favor. We are protecting ourselves by decreasing the chances of an event which would be extremely damaging to the United States and, in particular, South Florida.”

Tackling America’s Water Challenges:

SENATE HEARING TO FOCUS ON KLAMATH RIVER BASIN AGREEMENTS. The E&E Daily (6/2) reports that “a yearslong effort to reach an agreement for dividing up water in Oregon’s Klamath River Basin arrives on Capitol Hill this week as Sen. Ron Wyden (D-Ore.) pushes for federal sign-off on stakeholders’ deals.” The article notes that “tension has run high among water users in the basin for generations, but it came to a head when the region suffered a severe drought in 2001 and then experienced a massive die-off in its salmon fishery the following year.” Almost “a decade after those disasters, most stakeholders signed off on the Klamath Basin Restoration Agreement and the Klamath Hydroelectric Settlement Agreement, which lay the path for removal of four hydroelectric dams along the river and establish a number of restoration activities.”

STUDY: MEDICAL POT GROWERS DRAINING, CONTAMINATING WATERWAYS. The E&E Daily (6/2) reports that “medical marijuana farms are draining and polluting drought-stricken rivers and streams in Northern California, according to state wildlife officials.” Fish and wildlife authorities also noted that “much of the pot being grown is sold illegally in states that prohibit its medical use and in California to people who don’t have legal licenses for it.” According to the article, “wildlife biologists had noticed streams, some of which harbor endangered salmon and other animals, running dry since the state approved medical marijuana use 18 years ago.”

BOR RECEIVES PROPOSALS FOR DESALINATION, WATER PURIFICATION RESEARCH. The Water Technology Online (6/3) reports that the BOR’s Desalination and Water Purification Research and Development Program has “received proposals from universities, water utilities, private industry and others for a total of up to \$1.5 million in funding for desalination and water purification research in the past few months.” Yuliana Porras, advanced water treatment research coordinator the BOR, discussed “the history of the program, projects it has funded, the program’s goals and successes and why desalination and water reuse are important for the United States.”

NEW LEADER OF BOR’S TECHNICAL SERVICE CENTER NAMED. The Hydroworld (6/3, 151) reports that BOR Acting Commissioner Lowell Pimley has named Tom Luebke, P.E., as Director of Reclamation’s Technical Service Center. Luebke will start his new position on June 1, 2014. Pimley said. “The TSC is a critical component of Reclamation, providing the necessary technical expertise to inform and implement decisions by Reclamation and our partners to provide a sustainable water and power future for the West. Tom is the perfect person to provide the operational and strategic leadership needed to ensure the TSC continues to meet the evolving needs of Reclamation and the West.”

BOR WORKING TO MANAGE RIO GRANDE RUNOFF. The Albuquerque (NM) Journal (6/3, 282K) reports that “warm weather and a big burst of late May snowmelt in Colorado means the Rio Grande in central New Mexico will be rising this week.” According to Carolyn Donnelly of the BOR, “water managers are working to manage the runoff, coming simultaneously from the Rio Grande and Rio Chama, to create a second ‘spawning pulse’ for the endangered Rio Grande silvery minnow.”

Empowering Native American Communities:

UTES AWARDED EPA FUNDS FOR LANDFILL CLEANUP. The Cortez (CO) Journal (6/2, 646) reports that the EPA “announced last week that the Ute Mountain Ute Tribe has been awarded \$200,000 grant to clean up an abandoned landfill on the outskirts of Towaoc.” According to the article, “once environmentally and structurally

stable, the tribe plans to install solar panels at the site, which could provide electricity needs for the nearby farm and ranch operation." Priscilla Bancroft, superintendent for the BIA in Towaoc, said, "It is good to get it cleaned up and managed better because of the toxins. A permanent solution there is good for our future."

Top National News:

EPA UNVEILS RULES INTENDED TO CUT POWER PLANT EMISSIONS 30% BY 2030. On Monday, all three network newscasts had segments on the unveiling of new EPA regulations meant to combat climate change by cutting the carbon emissions from US power plants 30% by 2030. Although Administration officials contend that the cost of electricity will actually decrease as a result of the new rules, most of the coverage presents higher energy bills and the loss of jobs at coal-powered plants as an inevitable trade-off if the proposed regulations are implemented. In addition, most reports and analyses predict that the EPA's announcement will undermine the candidacies of vulnerable Senate Democrats and Democratic challengers in states that rely on coal for power, including, most notably, Kentucky, where Senate Minority Leader Mitch McConnell's opponent, Alison Case Lundergan Grimes, vowed to "fiercely oppose the president's attack on Kentucky's coal industry."

On ABC World News (6/2, story 4, 0:50, Sawyer), Diane Sawyer reported that the "proposed new rules" are "the most significant step on climate change in the Obama presidency." According to Sawyer, "Environmental groups call it a historic move," but "industry groups call it a job-killer that will increase the price of energy."

Ann Curry, on NBC Nightly News (6/2, story 4, 1:55, Curry, 7.86M), reported that the Administration had "unveiled its most ambitious plan yet to reduce carbon pollution from power plants...and it was immediately denounced by politicians and others in coal-producing states." However, correspondent Ann Thompson noted that EPA Administrator McCarthy "says states will choose how to meet the goal." McCarthy was shown saying: "We project that coal will still be a very large part of the energy supply in 2030." But Thompson went on to report that power plant operators "predict...customer bills will go up" and that jobs will be lost. Sen. McConnell: "This was the single worst blow to Kentucky's economy in modern times."

Likewise, on the CBS Evening News (6/2, story 7, 2:15, Dubois, 5.08M), Maurice Dubois reported that while "environmental groups applauded" the EPA's plan, "critics say it comes with a hefty price tag." Mike Duncan of the American Coalition for Clean Coal Electricity was shown saying, "The majority of states we believe would see a double-digit increase in electricity price." Correspondent Chip Reid went on to report that "more than 500 coal-fired power plants in the US produce about 40 percent of the nation's electricity, but those plants are also the nation's largest emitters of greenhouse gases." McCarthy: "If we do nothing and our grandkids' life sometimes, temperatures could rise 10 degrees, and sea levels rise by four feet."

The Huffington Post (6/2, Sheppard, 11.54M) reported that the EPA's goal is "a 30 percent cut in carbon emissions from power plants by 2030." The Huffington Post points out that while "the regulations are the first of their kind for the fleet of existing power plants, which currently produce 39 percent of US emissions," they also "giv[e] states flexibility" by allowing them to "cut emissions directly, either by switching to a fuel source with lower carbon emissions, such as natural gas, or by making upgrades to equipment or efficiency."

Politico (6/2, Martinson, 637K) reported that "after getting whoops and cheers from a roomful of supporters," McCarthy also said, "The good news is states, cities, and businesses have already blazed the trail. Our clean energy revolution is unfolding in front of us." Dana Milbank, in his column for the Washington Post (6/3, 4.22M), says that "after a career as an environmental adviser to Democratic and Republican governors alike," on Monday, McCarthy "sounded more like a politician herself than a regulator, savoring a standing ovation from the crowd and pointing and waving at people in the audience."

On Fox News' Special Report (6/3, 2.15M), McCarthy was shown saying on Monday: "Critics claim that your energy bills will skyrocket – well, they are wrong. Should I say that again? They are wrong." But correspondent Shannon Bream went on to report that in 2008, President Obama himself acknowledged that "under my plan of a cap and trade system, electricity rates would necessarily skyrocket."

The Wall Street Journal (6/3, Harder, Subscription Publication, 5.51M) reports that McCarthy said the forecast emissions reduction total is "like canceling out annual carbon pollution from two thirds of all cars and trucks in

America." McCarthy went on to say, "And if you add up what we'll avoid between now and 2030 – it's more than double the carbon pollution from every power plant in America in 2012."

According to McClatchy (6/2, Adams, Clark, Subscription Publication, 23K), "In many states, the move away from carbon-heavy coal to cleaner sources of energy is already under way, and those states could have an easier time adapting to new rules," but "other states...still are heavily dependent on coal to produce electricity" and therefore "might struggle" with the new rules. McClatchy notes that on Monday, President Obama "touted the regulations as a 'sensible state-based plan' that gives states a 'wide, wide range of options' to achieve their goals."

The Los Angeles Times (6/3, Parsons, 3.46M) reports that on Monday, the President "began a campaign for his newly proposed climate change proposal with an appeal...to parents and grandparents worried about 'the health of our kids and the health of our planet.'" The Times notes that in a "conference call with the American Lung Assn. and other public health groups," the President "argued that restrictions on power plant emissions would help children with asthma and other health problems exacerbated by carbon pollution."

The New York Times (6/3, Grady, Subscription Publication, 9.65M) reports that the President is "mindful of the intense political resistance to his plan," and is therefore "emphasizing its health benefits." The Times says Administration "contends that its new plan...will also quickly improve public health, preventing up to 100,000 asthma attacks and 2,100 heart attacks in the first year the rules take effect," and, according to the Times, "public health experts" agreed "that if the president could make the new rules stick, reductions in air pollution would be likely to pay off in better health."

The Los Angeles Times (6/3, Parsons, 3.46M) reports that the President "brushed off complaints from critics that 'these guidelines will kill jobs or crush the economy.'" However, the Times notes that even "before the rule was unveiled," the US Chamber of Commerce "estimated it would cost the economy \$50 billion" a year.

Politico (6/2, Martinson, 637K) reported that former Vice President Al Gore "called the rule 'the most important step taken to combat the climate crisis in our country's history,'" and Sen. Ed Markey, "who co-sponsored the cap-and-trade bill that died in Congress during Obama's first term," said, "This is the beginning of the end of America's long, dirty power plant era."

Peter Grier, in an analysis for the Christian Science Monitor (6/3, Grier, 566K), says "it's important to note that this is not a signed-and-sealed deal," but, instead, just "the first public step in a regulatory process that provides lots of time and opportunity for critics to make themselves heard." Reuters (6/3, Hurley) reports that the US Court of Appeals for the District of Columbia Circuit, which is likely to hear any challenges to the EPA's rules, currently has 11 judges, and seven of them were appointed by Democrats.

Some Democrats Criticize EPA's Proposal. The Washington Post (6/3, A1, Eilperin, Mufson, Wilson, 4.22M) reports that the Administration's "proposal to cut carbon dioxide emissions from existing power plants prompted an immediate backlash from Democrats in conservative-leaning states," and the NRSC "was quick to say it would use the decision against vulnerable Democrats...in Virginia, Louisiana, Colorado and Alaska." The Post goes on to report that while "the balance between acting on environmental issues that are high priorities for Obama and left-leaning big donors and creating jobs in energy-producing states represented by Democrats has come up several times in recent years," some "strategists close to those big donors say they are less concerned with" particular issues, such as expanded oil drilling or the Keystone XL pipeline, "than the larger goal of salvaging the Democratic majority in the Senate."

Politico (6/2, Goode, 637K) also reported that the "EPA's proposed climate regulation quickly became campaign fodder...for some of the year's most closely watched races, underscoring the peril for some Democratic candidates as the Obama administration takes another step in its so-called 'War on Coal.'" According to Politico, Sen. Mary Landrieu "offered...mild criticism," while Sen. Mark Udall, "whose state gets almost two-thirds of its electricity from coal, welcomed the rule as a 'good start' that can build on conservation efforts there."

Under the headline, "Democrats' New Coal Headache," The Hill (6/2, Jaffe, 237K) reported that "Democratic candidates in coal-rich West Virginia and Kentucky were among the first to try to distance themselves from the president." However, The Hill noted that Sen. Kay Hagan "has actually attacked her GOP opponent Thom Tillis for

rolling back protections for the environment while state House speaker.”

On its front page, the New York Times (6/3, A1, Gabriel, Subscription Publication, 9.65M) reports that “it took little time for” Grimes “to distance herself from the Obama administration’s proposal.” The Times says Grimes “pledged to ‘fiercely oppose the president’s attack on Kentucky’s coal industry because protecting our jobs will be my No. 1 priority.’” The Times adds that, likewise, Natalie Tennant, “a Democrat running for an open seat in West Virginia, instantly went on the attack,” saying, “I will stand up to President Obama, [EPA Administrator] Gina McCarthy and anyone else who tries to undermine our coal jobs.”

The Hill (6/2, Jaffe, 237K) reported that the McConnell’s campaign issued a statement reading: “Alison Lundergan Grimes was recruited by President Obama, who said he would ‘bankrupt’ the coal industry, and Harry Reid, who said ‘coal makes us sick.’ ... She is being funded by liberals nationwide who know that a vote for her is a vote to ensure further implementation of their anti-coal agenda in the U.S. Senate.”

The Louisville (KY) Courier-Journal (6/3, Gerth, 468K) reports that Stephen Voss, a political science professor at the University of Kentucky, said “the new regulations couldn’t have come at a worse time for Grimes.” Voss is quoted as saying that “until these regulations came out, it wasn’t necessarily clear that” the McConnell campaign’s “emphasis on” coal regulation “would be justified” because “there really wasn’t a coal issue that could become the focal point of the campaign.” However, according to Voss, “the issuance of new regs allows it to be that focal point.”

Nate Cohn, in a piece for the New York Times’ (6/3, Subscription Publication, 9.65M) “Upshot” blog, acknowledges that Democrats “have lost considerable ground in coal-producing areas in recent years.” However, Cohn adds that “because Democrats have already suffered significantly over the issue, the worst is just about over — and at the national level, it is no longer even that painful.”

Barrasso And Heitkamp Blast The EPA’s “New Anti-Coal Rules.” Sens. John Barrasso and Heidi Heitkamp, in an op-ed for the Wall Street Journal (6/3, Subscription Publication, 5.51M) titled, “The New Anti-Coal Rules Will Cut Jobs And Hurt The Economy,” criticize the new EPA plan, and predict that it will lead to the loss of jobs and cause power plants to close. They also predict higher rates for consumers as utilities turn to more expensive means of energy production.

NYTimes Analysis: EPA Plan Could Create “Patchwork” Of State Rules. In an article titled, “Taking Page from Health Care Act, Obama Climate Plan Relies on States,” the New York Times (6/3, Davenport, Baker, Subscription Publication, 9.65M) reports that the President’s “new plan to fight climate change depends heavily on states devising individual approaches to meeting goals set” by the EPA, “a strategy similar to the one he used to expand health care, often with rocky results.” According to the Times, “as with health care, the policy could lead to a patchwork of rules that frustrate businesses and invite resistance from states that oppose the policy.” The Times goes on to report that “the plan generated a torrent of criticism from industry, coal-state lawmakers from both parties and Republican leaders who called it a job-killer that would raise utility costs.”

According to the Washington Times (6/3, Wolfgang, 455K), “By giving some level of power to states,” the Administration hopes to “blunt criticism that it’s using the heavy hand of the federal government to reshape the American energy landscape.” Politico (6/2, Martinson, 637K) noted that states “will have until as late as June 2018 to submit their final plans for complying with the rule, an unexpected detail that means some crucial decisions will take place after Obama leaves office.”

Bloomberg News: EPA Rules Favor Nuclear Industry Over “Coal-Dependent Power Companies.” Bloomberg News (6/3, Chediak, Polson, 2.76M) reports that “coal-dependent power companies from American Electric Power to Duke Energy face billions of dollars in added costs from the Obama administration’s proposed climate rules,” while “renewable-energy backers and nuclear generators like Exelon stand to gain from the effort.” According to Bloomberg News, American Electric “is the biggest carbon emitter among US power producers, followed by Duke and Southern.” Christopher Knittel, director of MIT’s Center for Energy & Environmental Policy Research, is quoted as saying, “The rule is going to speed the transition away from coal into natural gas and renewables and potentially increase the role nuclear electricity plays in the US.”

New Rules’ Likely Impact On Michigan’s Economy Debated. Under the headline, “New Coal Rules: Good

News On Michigan Jobs, Or Bad News On Electricity Rates?" the Detroit Free Press (6/3, Matheny, 1.02M) reports that the Administration's "proposal to slash carbon dioxide emissions from US power plants is prompting fierce debate in coal-heavy Michigan, with proponents of the new regulations saying they will open the way to thousands of greener-energy jobs and others fearful of rising electricity rates and reduced competitiveness."

The Detroit News (6/3, Lynch, Heinlein, 643K) reports that "Michigan consumers can expect higher electricity prices under [the] Obama administration proposal unveiled Monday to reduce carbon emissions in the name of fighting global warming." DTE Energy spokesman Alejandro Bodipo-Memba is quoted as saying, "It's clear that requirements like what are being proposed would result in higher costs for customers." The News also report that Rep. Fred Upton (R-MI), the chairman of the House Energy Committee, asked on Monday: "Why in the world is the president pushing regulations that will serve to increase utility rates for consumers, send manufacturing jobs overseas, and hamstringing our economic recovery?"

WPost, NYTimes, LATimes Praise Proposal; WSJournal Among Critics. The Washington Post (6/3, 4.22M), in an editorial, says, "This plan is a down payment on a comprehensive climate plan, not the most efficient policy nor a suitably ambitious response to climate change." In another editorial on the EPA's plan, the New York Times (6/3, Subscription Publication, 9.65M) says the "proposed rule on power plants will not get the world to where it has to go to avert the worst consequences of climate change." But the Times adds that the rules are "likely to be enormously beneficial: good for the nation's health, good for technological innovation, good for President Obama's credibility abroad, and, in time, good for the planet and future generations."

The Los Angeles Times (6/3, 3.46M) calls the EPA plan "smart, pragmatic and overdue," while the Wall Street Journal (6/3, Subscription Publication, 5.51M), in an editorial, warns that consumers will inevitably pay more for electricity as a result of the new rules.

USA Today (6/3, 5.82M), praises the EPA's proposal but warns that "even if America meets the administration's goal of a 30% reduction from 2005 levels by 2030, the US reductions will be swamped by increases elsewhere if other big polluters don't follow suit." Hal Quinn of the National Mining Association, in an accompanying op-ed for USA Today (6/3, 5.82M), says the US can meet "our environmental goals without raising electricity costs, eliminating thousands of jobs and jeopardizing the reliability of the electric grid" as Quinn claims the EPA's "new, overzealous greenhouse gas regulations" would do. According to Quinn, "The model EPA touts is California, where electricity costs are 45% higher than the national average."

Eugene Robinson, in his column for the Washington Post (6/3, 4.22M), says the "proposed new rule for existing power plants...is ambitious enough to get anyone's attention," and "necessary in the context of seeking international consensus on solutions."

BERGDAHL'S UNIT BLAMES HIM FOR DEATHS OF US SOLDIERS KILLED WHILE LOOKING FOR HIM. The controversy over the swap of American POW Bowe Bergdahl in return for five Taliban commanders was once again the dominant story of the news cycle on Monday. The three networks, for example, devoted more than 22 minutes of airtime to the controversy surrounding the Bergdahl swap, more than all the rest of the day's news combined. More so than was the case over the weekend, reports tend to emphasize criticism of the Administration and questions about Bergdahl's motivations for leaving his post in 2009. Many outlets are reporting as fact that at least six US servicemembers were killed during the initial extensive search for Bergdahl after he went missing.

In the lead story for NBC Nightly News (6/2, lead story, 3:45, Curry, 7.86M), Jim Miklaszewski reported that "all the early joy and celebration over Bergdahl's release is clouded over several growing controversies." According to Miklaszewski, "serious questions have been raised about how Bergdahl fell into the hands of the Taliban," but "US military officials confirm that Bergdahl walked away without his weapon with a compass and water." Miklaszewski went on to report that "for 90 days...the US military conducted a massive search mission" for Bergdahl, and "during the mission, six American soldiers were killed, including two from Bergdahl's platoon."

At the opening of the CBS Evening News (6/2, lead story, 2:10, Dubois, 5.08M), Maurice Dubois reported that "the joy and relief that usually accompany the release of an American POW are being overshadowed tonight by criticism of the deal that won his freedom and questions about how he was captured in the first place." Correspondent David Martin went on to report that "former members of [Bergdahl's] unit have taken to the

airwaves and social media calling him a 'deserter,' and alleging other soldiers were actually killed searching for him." Josh Quarder, a former sergeant in Bergdahl's unit: "He pretty much voluntarily walked away and in turn caused...the actions that may have killed them."

In the lead story for ABC World News (6/2, lead story, 3:35, Sawyer), Martha Raddatz said, "we are hearing stunning accusations from those who risked their lives to save" Bergdahl, "with even a former senior defense official calling Bergdahl 'a deserter.'" Former army sergeant Evan Buetow, who was "Bergdahl's team leader," was shown saying, "People calling him a hero and this great soldier, it's a spit in the face to, one, all the soldiers who were there, and, more importantly, it's a spit in the face to the soldiers who died as a direct result to him leaving."

Jake Tapper, in an online piece for CNN (6/3, Tapper, 12.15M), reported that "many of those who served with" Bergdahl "call him a deserter whose 'selfish act' ended up costing the lives of better men." Tapper says that "at least six soldiers were killed in...searches for Bergdahl." Former Sgt. Matt Vierkant, "a member of Bergdahl's platoon when he went missing," is quoted as saying, "Bowe Bergdahl deserted during a time of war, and his fellow Americans lost their lives searching for him." According to Tapper, Vierkant says Bergdahl "needs to not only acknowledge his actions publicly but face a military trial for desertion under the Uniform Code of Military Justice."

The Washington Times (6/3, Chumley, 455K) identifies the six soldiers killed searching for Bergdahl as "Staff Sgt. Clayton Bowen; Pfc. Morris Walker; Staff Sgt. Kurt Curtiss; 2nd Lt. Darryn Andrews; Pfc. Matthew Michael Martinek; and Staff Sgt. Michael Murphrey."

USA Today (6/3, Michaels, 5.82M) reports that Pentagon official "confirmed [Bergdahl] walked off his post without authorization before he was captured." USA Today also reports that on Monday on Facebook, Sarah Palin, addressing President Obama, wrote: "Please use your White House Rose Garden to praise the truly honorable service of our good U.S. troops who were killed in their search for Sgt. Bergdahl."

The Wall Street Journal (6/3, Nissenbaum, Barnes, Entous, Subscription Publication, 5.51M) covers the controversy surrounding the deal in an article titled, "Backlash Grows On Release Of Sgt. Bowe Bergdahl In Taliban Prisoner Swap." According to the Journal, Pentagon officials did not anticipate the level of criticism directed at the Administration over Bergdahl's release. Pentagon press secretary Rear Adm. John Kirby is quoted as saying, "It doesn't matter under what circumstances he left. It doesn't matter what his persuasions were, political or otherwise."

The Washington Times (6/3, Taylor, 455K) reports that "on several occasions" the US military "had ground-level intelligence on where...Bergdahl was being held captive...down to how many gunmen were guarding him — but special operations commanders repeatedly shelved rescue missions because they didn't want to risk casualties for a man they believed to be a 'deserter.'"

In his column for the Wall Street Journal (6/3, Subscription Publication, 5.51M), Bret Stephens focuses on the anger among veterans over the effort made to secure the release of Bergdahl, whom many of them consider a deserter. The Wall Street Journal (6/3, Subscription Publication, 5.51M), in an editorial, says it is now Bergdahl's responsibility to describe how and why he left his base without authorization.

The Washington Post (6/3, A1, McCrummen, 4.22M) has a front-page article on the attitudes about Bergdahl in his home town of Hailey, Idaho.

White House Pushes Back Against Criticism Of Bergdahl Swap As GOP Demands Hearings. On NBC Nightly News (6/2, story 2, 2:25, Curry, 7.86M), Andrea Mitchell reported that on Monday, the White House was "trying to put out the firestorm over the release of the Taliban detainees" as the Administration "fac[ed] criticism from Congress and allies who say they paid too high a price, and reverse decades-old policy of not negotiating with terrorists." Rep. Jason Chaffetz (R-UT): "We gave the Taliban their starting team back. We put the five guys that led this organization and allegedly killed thousands of people...back on the battlefield."

However, on the CBS Evening News (6/2, story 2, 2:20, Dubois, 5.08M), Major Garrett reported that while White House officials "don't deny the five detainees traded for Bowe Bergdahl were not hardened Taliban killers," White House Press Secretary Jay Carney "said there were sufficient safeguards in place."

The AP (6/3, Dilanian, Riechmann) reports that the swap "stirred debate over a possibly heightened risk other Americans being snatched as bargaining chips," while Congressional Republicans "complained about not having been consulted, citing a law that requires Congress to be given 30 days notice before a prisoner is released from Guantanamo." The AP goes on to report that on Monday, White House chief of staff Denis McDonough "pushed back," saying, "We did not have 30 days to wait to get this done. And when you're commander in chief, you have to act when there is an opportunity for action." According to the AP, Administration officials "said they had to act quickly because Bergdahl's health and safety appeared in jeopardy, but declined to explain how."

McClatchy (6/3, Wise, Subscription Publication, 23K) reports that on Monday, White House press secretary Jay Comey also "pushed back against the criticism" after President Obama "sidestepped the law by authorizing a prisoner swap of Guantanamo detainees without notifying Congress." According to McClatchy, Comey maintained that Congress had been "repeatedly" informed about the President's "concerns with the requirement to give Congress 30-days notice of any release of Guantanamo detainees, as stipulated in the National Defense Authorization Act, a bill Obama signed last year." McClatchy adds that "amid growing questions about the deal," Comey argued that the President "didn't have to notify Congress in advance because he had added a 'signing statement' to the law that said the 30-day requirement infringed on the president's constitutional authority as commander in chief."

Politico (6/2, Everett, 637K) reported that Senate Republicans "are demanding an open hearing on the negotiated release of Sgt. Bowe Bergdahl in return for five Taliban prisoners, arguing the classified hearing set for next week doesn't go far enough." According to Politico, Republicans have "questions about...what Obama's motivations were in making the deal to release Bergdahl and perhaps most notably, why senior congressional leaders were not given advance notice about the swap that led to the release of five prisoners from Guantanamo Bay." Politico quoted Sen. Saxby Chambliss as saying, "The law says they ought to give us 30 days' notice; if the president thought that was unconstitutional or an invalid law he shouldn't have signed the bill."

Francine Kiefer, in an analysis for the Christian Science Monitor (6/3, 566K), writes, "So far, Democrats aren't complaining about the handling of the case, which raises the question: Are the concerns valid, or...just election-year politics?" Kiefer notes that on Monday in an appearance on MSNBC, Rep. Buck McKeon (R-CA), the chairman of the House Armed Services Committee, said, "I'm sorry that this is being portrayed as a Republican issue. ... This is not a partisan issue."

The New York Times (6/3, Subscription Publication, 9.65M), in an editorial, says, "Bergdahl's release raises significant concerns, starting with President Obama's decision to ignore a law that required him to notify Congress in advance about the bargain that secured the soldier's freedom, and about how trading five high-value Taliban prisoners...could affect America's antiterrorism policy."

NYTimes Report: Obama Initially Sought Peace Deal In Exchange For Taliban Commanders' Freedom.

The New York Times (6/3, Sanger, Parker, Subscription Publication, 9.65M) reports that "for two and a half years," the Administration "maneuvered to make a deal" that would mark the "start of a larger peace process for Afghanistan" and "ease the American exit from the country," but "by the time President Obama called the emir of Qatar last Tuesday to obtain a personal assurance from the Arab leader that the five Taliban detainees...would not be able to conduct operations from" Doha, "the president's objectives were vastly reduced." The Times adds that "instead of a broad peace accord," the President "decided to go ahead with a straight prisoner swap, something the Taliban had proposed secretly last fall."

Politico's Gerstein: Obama Poised To Close Gitmo Using Executive Power. Under the headline, "President Obama Goes Rogue On Gitmo," Josh Gerstein of Politico (6/2, 637K) says the President "took a real risk" and "defied Congress" in order to "get [the] process moving" for closing down the prison camp at Guantanamo Bay. According to Gerstein, the President's decision not to notify Congress "sends a clear message" that he "is now willing to wield his executive powers to get the job done."

Politico (6/2, Everett, 637K) also reported that on Monday, Sen. Jim Inhofe said, "The whole motive here is that the president wants to continue to try to shut [Guantanamo] down. He knows he doesn't have the support of Congress and that's part of the motivation." Inhofe added, "It fits right in to what the president's been trying to do with Gitmo since before he was president of the United States. And it's kind of scary."

The Miami Herald (6/3, Rosenberg, 822K) reports that officials from the International Committee of the Red Cross "said the Pentagon, unusually, did not invite delegates to" Guantanamo Bay "in advance to interview the five Afghans on their willingness to leave, or conduct medical checkups."

Administration Decried Release Of Taliban Prisoners In February. The Washington Times (6/3, Scarborough, 455K) notes that in February, the Administration "condemned Afghan President Hamid Karzai's release of 65 hardened Taliban fighters," calling them "a danger to American troops and Afghans."

Graham: "Last Week Was A Great Week For The Taliban." Reuters (6/3, Zengerle, Alexander) reports that in Monday, Sen. Lindsey Graham said, "With President Obama's announcement of a total withdrawal (of US forces) from Afghanistan by 2016...and now releasing five Taliban leaders, it's safe to say last week was a great week for the Taliban."

On NBC Nightly News (6/2, story 3, 2:15, Curry, 7.86M), Richard Engel reported that the five Taliban leaders released by the US include "accused war criminals, an associate of Osama bin Laden." Engel added that "all five were high-level figures in the Taliban's fight against US forces in Afghanistan," and were "considered 'dangerous, not recommended for release.'"

Afghan Government Reportedly Upset Over Release Of Taliban Commanders. According to the Washington Times (6/3, Chumley, 455K), it has been reported that the Afghan government "wasn't included in the decision-making process and was largely unaware of the swap until the deal was done."

In an article titled, "Afghan President Fumes At Prisoner Deal Made Behind His Back: Source," Reuters (6/3, Shalizi, Donati) reports that Afghan President Hamid Karzai is said to be angry about not being consulted before the five Taliban commanders were released over the weekend, and believes that the swap for Bergdahl will not benefit the ongoing peace talks between his government and the Taliban. Reuters also notes that on Sunday, Taliban spokesman Zabihullah Mujahidsaid, "It won't help the peace process in any way, because we don't believe in the peace process."

ABC's Ross: Taliban Commanders Are "Living In The Midst Of Luxury." In a segment on the released Taliban commanders for ABC World News (6/2, story 2, 2:05, Sawyer), Brian Ross reported that "the five freed detainees are living in the midst of luxury...in a Taliban villa in the West Bay Lagoon neighborhood of the capital city of Doha." According to Ross, "There was no sign they were in custody or under guard." Ross added that "their families were flown in to be with them and the only known condition imposed by the US was that they not travel outside Qatar for at least a year."

The Los Angeles Times (6/3, 3.46M), in an editorial, defends the decision to release the Taliban commanders. According to the Times, "Unless the US were to assert the right to hold the detainees forever...they would have been released at some point."

WPost: Obama Seems To Lack Concern For Well-Being Of Afghans. The Washington Post (6/3, 4.22M), in an editorial, says "the impression reinforced by the deal is of a president anxious to disengage from Afghanistan as rapidly and as thoroughly as possible, with minimal regard for the consequences for Afghans." The Post adds, "Now that Mr. Obama has committed to withdrawing all U.S. forces from Afghanistan by the end of 2016, the Taliban have scant incentive to negotiate."

Obama's Use Of Signing Statements Seen As Similar To Bush. The Washington Post (6/3, Tumulty, 4.22M) reports that President Obama in seeking the presidency criticized President Bush for using "signing statements" calling them a "clear abuse" of presidential authority. Now President Obama is being accused of doing the same, though less often. With respect to "Obama's decision over the weekend to trade the release of Army Sgt. Bowe Bergdahl," the Post notes that the law "stipulates that the defense secretary must notify relevant congressional committees at least 30 days before transferring anyone from Guantanamo Bay." President Obama in signing the law had issued a statement declaring that "the requirement was potentially unconstitutional." He has been criticized for violating the law by House Armed Services Committee Chairman Howard P. "Buck" McKeon, Senate Intelligence Committee Chairman Dianne Feinstein, and Sen. James M. Inhofe, ranking Republican on the Senate Armed Services Committee.

Bergdahl Deal Sparks Renewed Scrutiny Of Detainees Who Return To Terror After Release. The Washington Post (6/3, Lamothe, 4.22M) reports that in the wake of the release of five Taliban detainees in exchange for Sgt. Bower Bergdahl, the question of how many detainees transferred out of Gitmo have returned to the fight is getting renewed scrutiny. According to the more recent report from the Office of the Director of National Intelligence, since Gitmo's opening in 2002, about 614 detainees "have been sent home or resettled in third countries by the George W. Bush and Obama administrations." Of those, "104 — about 16.9 percent — are confirmed to have returned to terrorist activity of some kind, the report says." Another 74, or 12.1 percent, "are suspected of engaging in terrorist activities after their release, defense officials say."

OBAMA ORDERS EMERGENCY AID TO MINORS CROSSING US-MEXICO BORDER. The issue of unaccompanied minors crossing the US southern border has been garnering sporadic coverage in the media in recent weeks, but the Administration's announcement of action designed to deal with the growing flow drew coverage on print media — though not on the network newscasts. While there was significant focus on the Administration's response, a common refrain was the sharp growth in the number of minors crossing the border.

McClatchy (6/3, Johnson, Subscription Publication, 23K) reports that on Monday, President Obama ordered Federal departments to coordinate on caring for the "flood of unaccompanied migrant children" crossing into the US from Mexico. McClatchy says that experts "are at a loss to provide an explanation for the surge, which has seen the number of unaccompanied minors skyrocket from 13,625 in 2012 to 24,668 last year." Those numbers are expected to skyrocket in the coming years.

The AP (6/3, Caldwell, Sherman) reports the White House also "asked Congress for an extra \$1.4 billion in federal money to cope." The President "said the US will temporarily house the children at two military bases." He also appointed FEMA chief Craig Fugate to take charge of the situation.

USA Today (6/3, Gomez, 5.82M) reports Cecilia Muñoz, "Obama's domestic policy adviser, said border officials have caught 90% more unaccompanied minors this year than they did last year." She said that the minors coming across the border this year tend to be younger and "they're more often girls," with many coming from Central America.

The Wall Street Journal (6/3, Meckler, Sparshott, Subscription Publication, 5.51M) quotes Munoz saying, "The scale and the humanitarian nature of this situation is what's causing us to ramp up."

The Washington Post (6/3, Zezima, O'Keefe, 4.22M) reports Muñoz "also said there are rumors and suggestions that the increase may be in response to false gossip that children are allowed to stay in the United States despite immigration law or that immigration reform may benefit minors."

The Washington Times (6/3, Dinan, 455K) reports that the White House "signaled that, at least for now, it sees the flow of children — which it predicts will more than double in 2015 — as an issue to be managed rather than a problem to be fought."

The New York Times (6/3, Preston, Subscription Publication, 9.65M) reports that officials "said the youths would begin to be transferred on Friday from holding cells along the border to the new shelter at Naval Base Ventura County in Oxnard, Calif., which will house up to 600 children." Last month, Federal authorities, "overwhelmed by the numbers of unaccompanied young people crossing the border illegally, began sending them to a special shelter at Lackland Air Force Base in San Antonio." The shelter, run by HHS, "can handle up to 1,200 minors, federal officials said, and has already received 1,000."

Meanwhile, Reuters (6/3, Cowan) reports that House Judiciary Chair Bob Goodlatte said that his committee will be looking into the issue. He said, "The recent surge of children and teenagers from Central America showing up at our southern border is an administration-made disaster and now President Obama is calling in FEMA to mitigate the damage."

White House Urges Pentagon To Avoid Enacting Immigrant Enlistment Change. Politico (6/2, Kim, 637K) reported that a White House official "confirmed" on Monday that the Administration has asked the Pentagon "to hold off on releasing a new policy that would allow some young immigrants who came to the US illegally to enlist

in the military." The objective, the Administration says, is "to avoid any unilateral actions from President Barack Obama on immigration that could disrupt the narrow chances of reform on Capitol Hill."

Editorial Wrap-Up:

NEW YORK TIMES. "Nearing A Climate Legacy." In an editorial on the EPA's emissions plan, the New York Times (6/3, Subscription Publication, 9.65M) says the "proposed rule on power plants will not get the world to where it has to go to avert the worst consequences of climate change." But the Times adds that the rules are "likely to be enormously beneficial: good for the nation's health, good for technological innovation, good for President Obama's credibility abroad, and, in time, good for the planet and future generations."

"Freedom For Sgt. Bergdahl, At A Price." The New York Times (6/3, Subscription Publication, 9.65M), in an editorial, says, "Bergdahl's release raises significant concerns, starting with President Obama's decision to ignore a law that required him to notify Congress in advance about the bargain that secured the soldier's freedom, and about how trading five high-value Taliban prisoners...could affect America's antiterrorism policy."

"Keeping Track." In the latest edition of its "Keeping Track" feature on its editorial page, the New York Times (6/3, Subscription Publication, 9.65M) considers the Supreme Court's refusal to hear an appeal from Times reporter James Risen, who is facing possible jail time for refusing to identify a confidential source, a California judge's rejection of McDonald's bid to dismiss an employee lawsuit alleging wage theft at more than 100 company-owned and operated restaurants, and a settlement between attorneys for college athletes and EA Sports and the Collegiate Licensing Company over the companies' use of players' likenesses in videogames.

WASHINGTON POST. "The EPA's Emissions Plan." The Washington Post (6/3, 4.22M), in an editorial, says, the EPA's emissions plan "is a down payment on a comprehensive climate plan, not the most efficient policy nor a suitably ambitious response to climate change."

"Was Bergdahl's Price Too High?" The Washington Post (6/3, 4.22M), in an editorial, says "the impression reinforced by the deal is of a president anxious to disengage from Afghanistan as rapidly and as thoroughly as possible, with minimal regard for the consequences for Afghans." The Post adds, "Now that Mr. Obama has committed to withdrawing all U.S. forces from Afghanistan by the end of 2016, the Taliban have scant incentive to negotiate."

"An Embarrassment To Pr. George's."

WALL STREET JOURNAL. "Carbon Income Inequality." The Wall Street Journal (6/3, Subscription Publication, 5.51M), in an editorial, warns that consumers will inevitably pay more for electricity as a result of the new emissions rules.

"Sergeant Bergdahl's Duty." The Wall Street Journal (6/3, Subscription Publication, 5.51M), in an editorial, says it is now Bergdahl's responsibility to describe how and why he left his base without authorization.

"The Roberts Method." In an editorial, the Wall Street Journal (6/3, Subscription Publication, 5.51M) says that when the Roberts Court overturned Federal prosecutors' efforts to use the chemical weapons treaty in a simple assault case, it rules correctly. However, the WSJ argues that the Court should have gone farther in limiting the ability of Congress to abuse its power with regards to treaties.

Washington Schedule:**TODAY'S EVENTS IN WASHINGTON.**

White House:

PRESIDENT OBAMA — Arrives in Warsaw, Poland; meets with US and Polish Airmen with President Bronislaw Komorowski of Poland; arrives at Belweder Palace, Warsaw Poland; participates in a bilateral meeting with President Bronislaw Komorowski; holds a joint press conference with President Bronislaw Komorowski; arrives at the Chancellery of the Prime Minister; participates in a bilateral meeting with Polish Prime Minister Donald Tusk; delivers statements to the press with Polish Prime Minister Donald Tusk; greets participants of the meeting with Central and Eastern European leaders; hosts a meeting with Central and Eastern European leaders; joins the Central and Eastern European Leaders for a photo opportunity; attends a Solidarity Dinner.

VICE PRESIDENT BIDEN — Stays in Kiawah Island, South Carolina.

US Senate: 1:45 p.m. VETERANS CHOICE ACT — U.S. Senators John McCain (R-AZ), Tom Coburn (R-OK), Richard Burr (R-NC), and Jeff Flake (R-AZ) will hold a press conference to introduce the Veterans Choice Act, designed to provide veterans with “greater flexibility and choice in health care providers and increasing accountability and transparency at the VA.” Location: Senate Radio/Television Gallery.

10 a.m. — The Senate convenes and begins a period of morning business. At 11:00 a.m., Senators proceed to Executive Session to consider nominations.

9:30 a.m. COMMERCE, SCIENCE, AND TRANSPORTATION — Subcommittee on Surface Transportation and Merchant Marine Infrastructure, Safety, and Security

Hearings to examine surface transportation reauthorization, focusing on examining the safety and effectiveness of our transportation systems. http://www.commerce.senate.gov/public/index.cfm?p=Hearings&ContentRecord_id=68242b3c-22dc-40f9-9565-26e29c237497&ContentType_id14f995b9-dfa5-407a-9d35-56cc7152a7ed&Group_idb06c39af-e033-4cba-9221-de668ca1978a Location: 253 Russell.

10 a.m. ENVIRONMENT AND PUBLIC WORKS — Hearing on Farming, Fishing, Forestry, and Hunting in an Era of Changing Climate. Panel I: Dan Ashe, Director, US Fish and Wildlife Service. Panel II: James Walls, Executive Director, Lake County Resources Initiative; Clay Pope, State Association Executive Director, Oklahoma Association of Conservation Districts; Daniel Cohen, Owner, Atlantic Capes Fisheries; Dr. David R. Legates, PhD, CCM, Professor, Department of Geography, University of Delaware; Dr. David South, PhD, Emeritus Professor, School of Forestry and Wildlife Sciences, Auburn University. Location: 406 Dirksen.

10:30 a.m. APPROPRIATIONS — Transportation, Housing and Urban Development Subcommittee Markup of the Fiscal Year 2015 Transportation, Housing and Urban Development, and Related Agencies Appropriations bill. Location: 124 Dirksen.

10:30 a.m. JUDICIARY — Full Committee hearing entitled “Examining a Constitutional Amendment to Restore Democracy to the American People.” Witnesses: Panel I: Harry Reid, Majority Leader, United States Senate, State of Nevada; Mitch McConnell, Minority Leader, United States Senate, State of Kentucky. Panel II: Floyd B. McKissick, Jr., State Senator, North Carolina General Assembly, Raleigh, NC; Floyd Abrams, Partner, Cahill Gordon & Reindel LLP, New York, NY; Jamie Raskin, Professor of Law and Director of the Law and Government Program, American University, Washington College of Law, Washington, DC. <http://www.judiciary.senate.gov/meetings/examining-a-constitutional-amendment-to-restore-democracy-to-the-american-people> Location: ROOM CHANGE – NOW 216 Hart.

11 a.m. APPROPRIATIONS — Commerce, Justice, Science Subcommittee Markup of the Fiscal Year 2015 Commerce, Justice, Science, and Related Agencies Appropriations bill. Location: 192 Dirksen.

2:30 p.m. ENERGY AND NATURAL RESOURCES — Subcommittee on Water and Power

Hearings to examine S.2379, to approve and implement the Klamath Basin agreements, to improve natural resource management, support economic development, and sustain agricultural production in the Klamath River Basin in the public interest and the interest of the United States. <http://www.energy.senate.gov/public/index.cfm/hearings-and-business-meetings?ID8d5191fa-0a81-465d-bb3c-80f4fc4c9982> Location: 366 Dirksen.

US House: No Scheduled Events.

Other: BGOV CYBER SUMMIT – NSA DIRECTOR, DHS — 9 a.m. Bloomberg Government Cybersecurity Summit on the business implications of the evolving cybersecurity threat. Speakers include: Admiral Mike Rogers, Commander, U.S. Cyber Command; Director, National Security Agency; Chief, Central Security (TV Embargo until 5:00 PM); John Carlin, Assistant Attorney General for National Security, The Department of Justice (3:45p); Deputy Secretary Alejandro Mayorkas, U.S. Department of Homeland Security; Senator Saxby Chambliss, Vice Chairman, Senate Select Committee on Intelligence; Michael Howell, Deputy Program Manager, Information Sharing Environment, Office of the Director of National Intelligence; Ari Baranoff, Special Agent in Charge, United States Secret Service; Robert Mueller, Fmr. FBI Director; Governor Tim Pawlenty, CEO, Financial Services Roundtable; Paul Wood, Chief Risk Officer, Bloomberg LP; Rich Baich, Chief Information Security Officer, Wells Fargo & Company; Steve Chabinsky, Chief Risk Officer, CrowdStrike; Mike Leiter, Counselor to the CEO, Palantir Technologies; Wade Baker, Managing Principal, Research and Intelligence, Verizon; Lou von Thær, President, National Security Sector, Leidos; Michael Allen, Founder and Managing Director, Beacon Global Strategies; Peter Dixon, CEO SecondFront; Jeff Greene, Senior Policy Counsel, Symantec; Sandy Kennedy, President, Retail Industry Leaders Association; Ben Powell, Partner, WilmerHale; David Fagan, Partner, Covington & Burling LLP; Stewart Baker, Partner, Steptoe & Johnson LLP; Bob Butler, CNAS Adjunct Senior Fellow with the Technology and National Security Program; Sanford Reback, Senior Technology Analyst, Bloomberg Government; Michael Riley, Bloomberg News and Contributor to Bloomberg BusinessWeek; Anurag Rana, Bloomberg Industries; Dune Lawrence, Bloomberg News; Alex Barinka, Bloomberg News. INTERNATIONAL ROADCHECK KICKOFF — 10 a.m. News Conference and Safety Inspections (conducted by Maryland State Police) to kick off this years International Roadcheck (June 3-5, 2014) which spotlights the critical role of comprehensive driver, truck and bus inspections to prevent roadway tragedies. The 27th annual International Roadcheck will emphasize commercial motor vehicle compliance with all safety regulations with a focus on hazardous materials/dangerous goods regulatory compliance. Maryland State Police will pull commercial motor vehicles off the inner loop of I-95 (Capital Beltway) for safety screenings or inspections. Sponsored by the Commercial Vehicle Safety Alliance (www.cvsa.org), International Roadcheck is an annual 72-hour enforcement effort when 10,000 federal, state, provincial and local inspectors at thousands locations across the continent conduct comprehensive commercial vehicle and driver inspections aimed at saving lives on North American roadways. Speakers: Sgt. Thomas Fuller, President, Commercial Vehicle Safety Alliance, New York State Police; Bill Bronrott, Deputy Administrator, Federal Motor Carrier Safety Administration, U.S. Department of Transportation; David Czorapinski, Chief, Motor Carrier Division, Maryland State Highway Administration; Capt. N.W. Dofflemeyer, Commercial Vehicle Enforcement Division, Maryland State Police. Location: FedEx Field Parking Lot G2, 1600 FedEx Way, Landover, Maryland.

USIP – SHERMAN – SOMALIA — 11 a.m. U.S. Foreign Policy in Somalia remarks by Under Secretary of State for Political Affairs Wendy Sherman. Ambassador Johnnie Carson, Moderator, Senior Advisor to the President, U.S. Institute of Peace. <http://www.usip.org/events/us-foreign-policy-in-somalia> Location: United States Institute of Peace, 2301 Constitution Ave NW.

SCHOOL DISCIPLINE — 12 p.m. – 1 p.m. Media conference call marking release of School Discipline Consensus Report. Speakers: Michael D. Thompson, the director of the Council of State Governments Justice Center; Randi Weingarten, president of the American Federation of Teachers; Darrel Stephens, executive director of Major Cities Chiefs; Texas State Senator John Whitmire (D), chair of the Texas Senate Criminal Justice Committee, and Tennessee State Senate Majority Leader Mark Norris (R), chair of the Council of State Governments. Contact Michael Clark, (646) 383-5723; Amy Saltzman, (301) 656-0348, <http://img.constantcontact.com/letters/images/1101093164665/S.gif>

Last Laughs:

LATE NIGHT POLITICAL HUMOR.

Jimmy Fallon: "In a new interview, President Obama revealed that his daughter Malia recently went to her first prom. Yep, she wore a corsage on her wrist, while her date wore a red-laser dot on his head."

Jimmy Fallon: "In the same interview, President Obama said that Hillary Clinton would be very effective if she ran for president. And then Joe Biden said, 'Thank you very – wait, what?'"

Seth Meyers: "This morning, President Obama announced a new 600-page proposal to lower carbon emissions and help stop global warming. Step one: stop printing 600-page proposals."

Briefing Materials for June 4, 2014

Javaid, Zaina <zaina_javaid@ios.doi.gov>

Tue, Jun 3, 2014 at 7:39 PM

To: Sally Jewell <(b)(6)@ios.doi.gov>, Tommy Beaudreau <tommy_beaudreau@ios.doi.gov>, Nicole Buffa <nicole_buffa@ios.doi.gov>, Erin Walls <erin_walls@ios.doi.gov>, Katherine Rupp <katherine_rupp@ios.doi.gov>

Sally-

Attached are your briefing materials for Wednesday, June 4, 2014. These have also been uploaded into Google Drive. I just received the memo on Gov. Otter and will upload. This is not included in your briefing book, and Erin will print a hard copy for you tomorrow.

Additionally, I have uploaded material for your visit to Historic Jamestowne, and Norm Dicks. WGA materials are uploaded for your internal prep tomorrow, but are in draft form, so we may have updates to them in the coming days.

Thank you,

Zaina

INFORMATION MEMORANDUM FOR THE SECRETARY

WESTERN GOVERNORS' ASSOCIATION

DATE: June 4, 2014
FROM: Sarah Greenberger, OS, (202)208-6726; Michael Bean, AS-FWP office (202) 208-7400; Letty Belin, Counselor to the D/S (202) 208-6291; John Blair, Director, OIEA (202) 208-1923; James Lyons, Counselor, ASLM (202) 208- 4318; Neil Kornze, BLM; Mike Conner, BOR; Libby Washburn, BOR; Dionne Thompson, BOR (202)513-0570; Anne J. Castle, A/S W&S; Neil Kornze, BLM; Maureen Foster, NPS (202) 208-5970; Kevin Washburn (202) 208-7163; Jennifer Goldblatt (202) 513-0604
SUBJECT: Western Governors' Association (WGA) Issues of Interest

In preparation for the upcoming June 2014 Western Governors' Association meeting, below are western issues of interest to the Governors planning to attend.

SAGE-GROUSE

Status of BLM Great Sage-Grouse State Plans

BLM received comments from the public and from the U.S. Fish and Wildlife Service (FWS) on our 15 Environmental Impact Statements (EIS) for Greater Sage-grouse (GRSG). To improve coordination, clarity and consistency as the planning teams begin development of proposed plans, the BLM held two Federal family meetings to discuss land management allocations, disturbance calculations and other topics.

Issues/concerns that were not resolved at these meetings were presented to the National Policy Team (NPT) - which consists of members from FWS, FS, and BLM - for resolution. Key pieces of guidance were developed over a series of NPT meetings, and that guidance was issued on April 30, 2014 to the State Directors. This included guidance intended to ensure clarity and consistency related to the Land Use Plan Allocations and Disturbance thresholds; and, overall guidance related to Adaptive Management, Mitigation and Monitoring that will be incorporated into all 15 EISs. While the final NPT guidance was being developed, the State Directors were cooperating with their Governor's Offices, collectively working on these proposed plans and developing solutions from the ground up. This new guidance, which the NPT feels provides clarity for the public and the FWS, has created some conflict in specific states as some now feel that this has limited the ability to develop locally driven Proposed Plans.

BLM is analyzing the comments received and preparing draft Administrative Proposed Plans (APPs). The draft APPs, which are to be completed in June, will then be "rolled up" in July so as to evaluate their aggregate impact on each sage-grouse "primary area for conservation" (PAC) and sage-grouse population identified in the Conservation Objectives Team (COT) report. The purpose of the roll-up exercise is to evaluate the extent to which the key threats to each PAC and population have been ameliorated by the plans and will enable any fine-tuning of federal and state plans needed to adequately address key threats.

On May 12, 2014, AD-200 issued a memo to the State Directors on the new 12-Step Roll-up Strategy that addresses how the BLM will move forward with the Roll-up through the publication of the Proposed Plan EISs. The NPT guidance does provide some flexibility and if the State Director feels that their current approach is biologically beneficial to sage-grouse and better protects their habitat they can provide AD-200 a memo to support their rationale as addressed in the 12-Step Strategy. Based on this 12-Step process an updated planning schedule has been developed.

Positions of Interested Parties

Colorado – In 2008, the State of Colorado developed a statewide Conservation Plan for GRSG. In 2013, Colorado prepared and published a status report on implementation of the Conservation Plan. The status report, called the Colorado Package, was submitted to both BLM/FS and the FWS in January 2014. It is a compendium of GRSG conservation commitments and efforts underway in Colorado, including conservation planning and implementation, land protection, population and habitat monitoring, habitat treatments, restoration, research and communications. Although not memorialized in an Executive Order, it represents the State's GRSG Plan according to Governor Hickenlooper. The State of Colorado has coordinated actively and closely with BLM/FS in development of the Northwest Colorado Administrative Draft Proposed Plan (ADPP) and provided detailed comments and information for consideration, though the Governor's Office feels that BLM's ADPP is too restrictive.

Idaho/SW Montana –Based on the recent NPT guidance, BLM-ID believes the foundational elements of the State Plan are no longer applicable (i.e., three management areas and associated management, the robust adaptive management strategy, and lands and minerals activities avoidance criteria). The Governor's Office does not agree with the NPT guidance that there be "no unmitigated loss" within General Habitat. Of the three management areas (Priority, Medial, and General), Medial Habitat includes both Priority and General. The FWS concern is that the Priority Habitat in Medial Habitat should be treated and managed as Priority Habitat.

Montana – Currently working on an Executive Order from the Governor which, when in place, will provide regulatory mechanisms for sage-grouse conservation through state approved actions. The adoption of a state plan may influence the state opinions about the BLM plans in MT. The draft state plan (which applies to private and state lands) provides a process by which the state would assess disturbance at the project level to limit discretionary (those activities requiring a state or federal decision) disturbance at the landscape level.

Nevada/NE California – Nevada is in the process of revising the 2012 Nevada Sage-grouse Plan. The agencies (BLM, FS, and FWS) have been working with the State's Sagebrush Ecosystem Council and their Technical Team to make the Proposed Plan and the State Plan, where possible, consistent. To date, most of the sections that would go into the agencies' Proposed Plan have been revised and for the most part are consistent. The overarching concern from the State is the legality of the significant land use restrictions and prohibitions encompassed in the alternatives. The Nevada State Sage-grouse Plan does not make direct allocations. Their goal is to limit development based on the amount of credit that would have to be acquired for a disturbance. We expect pushback on any allocations that exclude or close areas to development.

North Dakota/South Dakota – Both the North Dakota Game and Fish and the South Dakota Game, Fish and Parks have been supportive of the BLM LUP efforts and decisions. North Dakota Game and Fish has produced a draft updated Greater Sage-grouse Management Plan and a final plan is expected soon. South Dakota is in the process of producing a draft updated Greater Sage-grouse Management Plan. Neither plan includes regulatory mechanisms for state approved actions.

Utah – The Conservation Plan for GRSG was approved for implementation by Governor Herbert in April 2013. The measures in the plan are being applied and habitat improvement projects implemented. In May 2013, the FWS submitted a comment letter raising concerns with Utah's Conservation Plan that have yet to be resolved. The state has concerns with BLM direction within Preliminary General Management Areas as it relates to "no net loss" and the three percent disturbance cap. The State also believes there is too much emphasis on land use restrictions in the BLM-FS plan and not enough emphasis on increasing habitat through treatments.

Wyoming – The State of Wyoming Core Area Strategy was established in 2011 by Executive Order. The Core Area Strategy is implemented by the Governor’s Greater Sage-Grouse Implementation Team (SGIT); it applies to private and state lands whenever a state authorization is required and is largely consistent with BLM/FS ADPP. Governor Mead is intent on getting the Lander Record of Decision approved to demonstrate successful sage-grouse conservation partnerships and has emphasized the need for BLM/FS plans to be consistent with the Wyoming Core Area Strategy. Governor Mead has emphasized that GRSG conservation should move forward while maintaining economic and social benefits derived from public land uses.

Key Points to Emphasize

- (1) **The Fish and Wildlife Service has made no decision and has no “leaning” with respect to whether or not the sage-grouse should be proposed for listing.** It will make that determination in 2015 on the basis of all the information available to it then, including the state and federal plans now being completed. It will be guided by the recommendations of the COT report, which was a joint product of state and federal scientists.
- (2) Through the collective efforts of state and federal agencies, **avoiding the need to list the species under the ESA is an achievable goal.** The degree of cooperation that has characterized the work of the federal and state agencies over the last three years is unprecedented. If we continue to work together constructively, it is within our power to remove or adequately reduce the threats to the sage-grouse.
- (3) **“What is good for the bird is good for the herd.”** This recent remark by an Oregon rancher underscores the point that conserving the sage-grouse will have much broader benefits than simply helping that single species. Valued game species, such as mule deer, share many of the sage-grouse’s habitat needs and thus will benefit from efforts to conserve the grouse. Indeed, **the PACs that will be the primary focus of conservation efforts for the sage-grouse are generally congruent with the highest priority “crucial habitat” areas in the CHATs that WGA and the Western states have recently produced.**
- (4) **The states will be invited and encouraged to take part in the forthcoming “roll up”** of BLM and Forest Service plans, to ensure a comprehensive look at the extent to which key threats have been ameliorated in the PACs. This is essential since state and private land comprises a significant fraction of most PACs and a majority of the land in several PACs.
- (5) While all the states have been working hard through the Sage-Grouse Task Force and other means, **several states have made unique contributions.**
 - **Wyoming’s** core area strategy both led the way in building a conservation effort around the most important places, but also made effective use of the state’s many regulatory authorities to conserve those places;
 - **Nevada** is in the forefront of efforts to design a comprehensive and thoughtful approach to mitigation;
 - **Idaho** has embraced adaptive management in a rigorous way.
- (6) Through the work of the Task Force, **many good ideas have emerged regarding how we can better prevent fires and more effectively target our post-fire restoration efforts.** Our ability to implement those ideas will be greatly aided if together we can persuade Congress to enact bipartisan legislation that changes the way we budget for fire. The help of the Western Governors in securing that legislation is needed.
- (7) **Now is not the time to kick the can down the road,** as some have suggested. The chance we have this year and next to put in place meaningful conservation measures is the best chance to arrest and reverse the decline of an iconic game bird of the West and the habitat upon which it and much other wildlife depends.

ADDITIONAL Q & A

Q: What do you have to say about legislative proposals that would give the States more time to develop and implement their own solutions to sage-grouse conservation?

A: I disagree with those who suggest kicking the can down the road is the best approach to facing the challenges before us. The ESA has forced all of us to sit down together and work to solve a problem that is much bigger than sage-grouse. The disappearing sage brush and explosion of invasive species that fuel the fire cycle also threaten sage-grouse. They also threaten other iconic species like mule deer, elk and pronghorn as well as ranching and other activities that fuel western tradition and economic growth. Wyoming has shown that we best preserve our heritage and generate economic potential when we act boldly and decisively to make smarter, more strategic land management decisions that provide all land users with certainty. That is the example we are working together to emulate.

Q: Montana recently closed their greater sage-grouse hunting season because of declining population levels. What does this mean about the prospects for avoiding the need to list the sage-grouse? Are we now in the same position we were in for Lesser Prairie Chicken, Gunnison and Bi-state sage-grouse where population drives the outcome and no amount of conservation will suffice?

A: FWS will make its listing determination based on the sum total of the status of the bird, and the threats to the species and its habitat, across the entire range of the species. Greater sage-grouse populations appear to have declined in some portions of the range due to the recent drought and other factors, and Montana took this precautionary management step as a result. That said, there is no indication that the population is crashing, as was seen with the lesser prairie-chicken. Our focus for conservation continues to be on protecting the remaining large, high quality areas of habitat, i.e., the Priority Areas for Conservation (PACs), so that populations of the bird large enough to be resilient to drought and other natural stressors can be maintained across the range.

Q: Director Ashe keeps discussing a 4(d) rule. That makes us think he's already made up his mind about listing the bird. What is our incentive to keep working at this?

A: The Fish and Wildlife Service has made no decision and has no "leaning" on whether to propose the sage-grouse for listing. It will make that determination in 2015 on the basis of all the information available to it then, including the state and federal plans now being completed. It will be guided by the recommendations of the COT report, which was a joint product of state and federal scientists.

What Dan wants to make clear is that there is no downside to bold action with regard to a listing. If the federal government and all governors act to develop strong, science-based plans that serve to avoid the need to list, then we're all happy. But if some governors act and some don't, and the Service ultimately has to list the bird, a 4(d) rule can allow states with a sound conservation plan in place to continue to have the lead for managing the species.

Q: Fox News recently reported that the Service decision to list the Lesser Prairie Chicken has shut down oil and gas production in Western Kansas despite the rhetoric from the Service regarding flexibility and states' retention of authority. How do you respond to that?

A: Companies have a responsibility to prepare for changes in their business environment, too. The most recent statistics we have from WAFWA show that 117 different oil and gas companies have assessed the situation and made the business decision to participate in the Range-wide Conservation Plan, committing to carry out the conservation measures of the plan on 6.2 million acres of land that they manage or lease. That same avenue is readily available for any company operating in western Kansas.

Fire and Sage-Grouse Habitat Protection Measures

- The safety of firefighters and the public will always be our top priority, but the protection of Sage-Grouse and its habitat where they exist is the top resource priority. The BLM is and has been taking immediate, direct and measurable steps to reduce fire and invasive species threats to Sage-Grouse habitat.
- In core habitat areas with a history of large fires, we will aggressively seek to compartmentalize prime areas through strategic fuels management and creating firebreaks to minimize fire spread into those critical habitat areas. For 2015 we intend to increase the fuels treatment allocation percentage and amount of investment in core habitat.
- To stem the effects of changes in the fuels and fire regime, quick and aggressive post-fire stabilization and fuels treatments will provide a path to enhanced habitat conservation. Although sagebrush and preferred grasses are difficult to get established with more frequent fires, we will use competitive plant species, including non-native grasses and forbs, where necessary as a proven transition to a longer-term desired plant community.
- In 2014 we are directing 62 percent of our Fuels Program project capacity to Sage-grouse habitat conservation projects. This amounts to \$28 million in funding and approximately 240,000 acres of treatment. In 2014 we are investing 58 percent of our Healthy Lands Initiative funds to sagebrush ecosystems and landscapes. This amounts to over \$4.5 million. These funds are distributed between the Greater, the Gunnison, and Bi State population areas of habitat.
- To boost rural response capacity in Sage-Grouse habitat, and west-wide, managers and fire organizations will be encouraged to integrate Rural Fire Protection Associations and traditional Rural Volunteer Departments into their daily operations to the highest degree possible. We are committed to training support and coordination at a minimum. Where possible we will provide more material support.

High-Voltage Transmission Lines and Greater Sage-Grouse

- BLM is taking significant steps to address transmission project impacts to Greater Sage-Grouse and their habitats while land use plans are being amended or revised as part of an ongoing National Greater Sage-grouse Planning Strategy.
- BLM is also ensuring project developers comply with interim management guidance for sage-grouse that was issued in December 2011. This guidance specifies: Consideration of reasonable siting alternatives outside priority habitat or within designated corridors; identification of technically feasible best management practices; and consideration of regional mitigation opportunities.
- Thorough, project-specific environmental reviews are ongoing with input from the public, Tribes, and Federal, state and local cooperators.
- Project developers are preparing Habitat Equivalency Analysis (HEA) based mitigation in collaboration with BLM, Fish and Wildlife Service and state game and fish agencies.
- BLM is working with project developers to co-locate facilities within previously disturbed areas and designated corridors.
- BLM is working with project developers to identify routes that minimize impacts to Priority Areas for Conservation (PACs) for the Greater Sage-Grouse.
- For approved projects, BLM is enforcing strict timing controls on construction activities during sensitive periods (i.e. breeding, nesting, winter).

HIGH-VOLTAGE TRANSMISSION LINES AND ENERGY ISSUES

This topic is of particular interest to Governor Butch Otter (ID), Governor Brian Sandoval (NV), and Governor Gary Herbert (UT). During the WGA breakfast in February, Governor Herbert mentioned the need for certainty in Interior's resource management plans to encourage energy development in his state.

Governor Sandoval discussed transmission lines in his state at the February WGA breakfast. Governor Otter plans to discuss Gateway West and Boardman to Hemmingway transmission lines.

As the largest Federal land manager in the west, the BLM plays a significant role in planning energy corridors and siting transmission facilities. BLM administers over 107,000 rights-of-way for a variety of uses including transmission lines and pipelines. BLM is employing a “smart from the start” approach to identify areas of conflict and opportunity during planning to allow BLM managers to select the best areas for siting transmission facilities.

Since 2009, BLM has permitted 42 high-voltage transmission projects spanning over 2,300 miles on public lands. These projects provide capacity for renewable energy, improve grid reliability and support job growth. Since 2011, BLM has participated as a member of the Rapid Response Team for Transmission (RRTT) with the goal of improving coordination, expediting permitting and identifying lessons learned from seven priority pilot projects identified by the President. BLM is lead or co-lead agency on four of the priority projects. BLM currently has approximately 20 pending high-voltage transmission projects in several western states. Some projects are in sagebrush habitat.

Energy Corridors

The BLM, DOE, and USFS Work Group are collaborating to identify regions in the west to conduct reviews of corridors. The federal partners are focused on doing this right, including close coordination with states, tribes, local communities, and outside partners. This new approach is the right way to conduct corridor assessments, but it is also very resource intensive. With limited funds, the federal partners are currently consulting with WGA and various states in considering which regions to prioritize. Interest from states and commitments to work collaboratively on a corridor process will be key to successfully reviewing corridors of concern.

Transmission Project Summaries

- Gateway West Transmission Line (Idaho segments 8 & 9) * *RRTT Priority Project* - The project will address load growth in Idaho, Oregon, Utah, and Wyoming, improve the reliability and efficiency of utility systems, and tap renewable energy resources in Idaho and Wyoming. The project sponsors estimate 1,100 to 1,200 jobs will be created.
 - Challenges: Routes proposed across the BLM administered Morley Nelson Snake River Birds of Prey NCA in southern Idaho; finalizing Greater Sage-Grouse mitigation; finalizing Migratory Bird Conservation Plan
- TransWest Express Line * *RRTT Priority Project* - The project is designed to increase capacity for renewable energy generation consisting primarily of wind energy, including the Choke-Cherry, Sierra Madre Wind Farm near Rawlins, WY. The project sponsor estimates 1,035 to 1,550 jobs will be created.
 - Challenges: Finalizing Greater Sage-Grouse mitigation; potential crossing inventoried road less areas in National Forests; proximity to Nellis Air Force Base in southern Nevada; crossing Tuttle Ranch and proposed conservation easements in Colorado; co-locating project adjacent to existing projects and the Energy Gateway South project
- Boardman to Hemmingway Project **RRTT and PNWRIT Priority Project* - The Project would relieve pressure on the existing transmission system, improve electric reliability, provide additional energy capacity to meet demand in Oregon and Idaho, and provide service to wholesale customers. The project sponsor estimates 500 jobs to be created.

- Challenges: Project schedule being delayed due to inadequate Administrative DEIS; untimely and insufficient cultural, biological and visual resource data from environmental contractors; delays due to project developer financial commitments to support NEPA analysis and contractors; routes affecting Greater Sage-Grouse and habitat; limited flexibility in Oregon state siting policy for sage-grouse habitat; potential routes crossing irrigated agricultural lands and other private lands
- Energy Gateway South Transmission Project - The project is designed to provide redundancy to existing infrastructure and improve ability to provide reliable service to customers; support future load growth in Wyoming, Colorado, and Utah; provide increased transmission capacity for third-party transmission users.
 - Challenges: Proposed routes affecting Greater Sage-Grouse and habitat; finalizing Greater Sage-Grouse mitigation; crossing Tuttle Ranch and proposed conservation easements in Colorado; co-locating project adjacent to existing projects and the TransWest Express project; routes impacting private lands
- Vantage Pomona Transmission Project * *PNWRIT Priority Project* - The project is designed to eliminate redistributed loads and overloading of the adjacent transmission system; ensure continued reliable and efficient service to Yakima Valley and address potential reliability issues within the Mid-Columbia Transmission System.
 - Challenges: Potential visual impacts; private landowners desire to minimize routes on private lands; proposed route across Joint Base Lewis McChord Yakima Training center (JBLM-YTC) which is designated as a Priority Area of Conservation (PAC) for sage-grouse; minimizing impacts to cultural resources and properties for route crossing JBLM-YTC; analysis of a buried transmission line as a design alternative

FIRE

The Bureau of Land Management is working with local, state, and federal cooperators to ensure that we stop the majority of wildland fires in the first burning period. Areas of focus include: Using science-based decision support tools to anticipate the next problem areas; positioning fire suppression resources to where they will next be needed; approving severity funding allocations to temporarily increase fire suppression staffing; and conducting fire prevention activities including using education and fire restrictions where necessary.

This fire season is anticipated to be a challenging one due to overall drought conditions. Yet through the use of forecasting support tools, positioning resources where they're needed the most and efficient use of severity funding, BLM has contained about 96% of its fires during initial attack.

The combined efforts of local, state and federal agencies will continue to emphasize the safety of the public and firefighters, while also containing a high percentage of wildfires during initial attack without incurring unneeded risk. Below are several questions that you may encounter based on recent interest from several of our state partners:

Idaho:

Q. What kinds of relief can you provide for ranchers that have had to displace livestock based on the loss of forage in the 2012 fire season? Are there opportunities for forage banks or vacated allotments that can be a temporary source of forage?

A. All of the allotments in Idaho are currently under existing grazing permits and authorizations; at this time there are no opportunities for forage banks and there are no vacant allotments.

Utah:

Q. What are you doing to ensure that the collaborative landscape restoration efforts in Utah continue, especially in light of the BLM's new seed management process?

A. We are committed to our legacy of partnerships in Utah. Although the BLM has made some logistical modifications in the seed management process, we are going to continue to invest heavily in collaborative landscape restoration in Utah.

Special Mention:

- We are recognizing and remembering that this is the 20th anniversary of the Storm King Mountain burn over on the South Canyon Fire in Colorado where we lost 14 firefighters on July 6, 1994. Several commemorative events will be hosted in Colorado in the next month.
- We further remember that we are approaching the one year anniversary of the Yarnell Hill burn over in which 19 firefighters died. This was the single largest loss of life on a wildland fire since the 1930s. While we are still learning from both of these tragedies, the loss in both cases is fresh in our minds.
- Both of these fire entrapments have formed the foundation of this year's wildland firefighter refresher.

MITIGATION

In April, the Department's Energy and Climate Change Task Force provided the Secretary with a report summarizing a coordinated Department-wide evaluation and a strategy for implementing improvements in the Department's mitigation practices and policies. Based on the report's findings, various offices and bureaus of the Department have begun to implement policy and programs aimed at strengthening mitigation practices.

- FWS is in the process of revising its mitigation policies;
- BLM is implementing a draft Regional Mitigation Policy that will be updated and finalized consistent with the guidance contained in the Departmental report;
- BLM released its first regional mitigation plan for the Dry Lake solar energy zone (SEZ) and will conduct additional outreach to aid in designing future SEZ regional mitigation plans;
- BLM, FS, and FWS are working together to develop a mitigation strategy as a part of the larger Greater Sage-Grouse conservation initiative;
- USGS is leading efforts to develop geospatial data tools for landscape-scale mitigation and will be convening a workshop of partners later this year;
- The NPS is convening a workshop to develop guidance for mitigating impacts to cultural resources under Section 106 of NHPA and will also be convening experts to develop guidance for landscape-scale mitigation for preserving scenic values.

Q. How does this strategy impact work to conserve the Greater Sage-Grouse?

A. The BLM is nearing the final stages of amending 98 Resource Management Plans to account for conservation of the Greater Sage-Grouse. The bureau is already working closely with the FWS and states wildlife agencies to ensure that these final plan amendments contain robust provisions for mitigating impacts to Greater Sage-Grouse habitat. The BLM anticipates working closely with states to plan for and execute mitigation in these areas.

Q. How does this strategy relate to ongoing work by states, including state wildlife action plans and the Western Governors Association's (WGA's) Critical Habitat Assessment Tool (CHAT)?

A. State wildlife action plans, WGA's CHAT, and similar plans and strategies are useful in identifying the most ecologically important areas in a state, thus informing effective decisions regarding the

avoidance or minimization of impacts as well as the siting of compensatory mitigation measures. The statewide perspective that such plans provide will help facilitate the landscape-scale approach to mitigation that the strategy seeks to accomplish.

Q. What role will states have in determining the location and breadth of specific compensatory mitigation?

A. As noted above, State judgments about the relative ecological importance of particular areas, as reflected in their CHATs or state wildlife action plans, are expected to be important considerations in determining the location of compensatory mitigation measures. In addition, by becoming formal cooperating agencies in the NEPA process, states can help implement the Strategy with respect to all aspects of mitigation.

Q. How will this mitigation strategy be implemented in the field? Will staff be trained on how to implement the proposed mitigation strategies?

A. The principles outlined in this mitigation strategy will be incorporated into formal Departmental and bureau policy that will guide decision-making in the field. The strategy also calls for clear and consistent training for field staff based on these policy changes. Field staff have been closely engaged in drafting the strategy and will continue to be relied upon as the Department and bureaus develop these manuals, handbooks, and training modules.

Q. How does this mitigation strategy fit with Presidential initiatives to modernize the Federal review of infrastructure projects and to adapt to the impacts of climate change?

A. The Department believes that its Mitigation Strategy and the various actions planned to carry out the Mitigation Strategy are necessary components to the Department's ability to effectively implement the President's various initiatives relating to permitting efficiencies, large infrastructure project reviews, and climate change adaptation. All of these initiatives require federal agencies to take a landscape-scale approach to planning, permitting, and conservation, which is the fundamental purpose of Secretarial Order No. 3330 and the Department's Mitigation Strategy.

HYDRAULIC FRACTURING

Formal rulemaking to revise BLM regulations related to hydraulic fracturing on federal and Indian lands was initiated in May 2012 with publication of a proposed rule. A revised proposed rule was published in May 2013. During the most recent formal comment period, which closed on August 23, 2013, the BLM received more than 1.35 million comments.

Based on analysis of these comments, the BLM staff have suggested some modifications to the regulatory text and the preamble of the final rule for consideration, all of which are viewed by the Solicitor's office as logical outgrowths of the proposed rule. We expect to have a draft of a final rule, preamble, and accompanying analyses available to begin Departmental review within ten days.

The proposed rules have focused on addressing public disclosure, wellbore integrity and flowback fluid management as the key issues for sound hydraulic fracturing development. Most of these issues are not adequately addressed in the BLM's existing, 30-year-old regulations.

During the time this rule has been in development a number of states and tribes have issued or begun work on their own rules related to hydraulic fracturing. BLM has worked closely with the relevant regulatory officials as well as EPA to utilize their expertise on these issues. States with federal oil and gas development that have issued rules in this area are: California, Colorado, Montana, New Mexico, North Dakota, Texas, Utah and Wyoming. The rules vary considerably from state to state. Below are several key issues that may be discussed:

Well integrity - The issue is determining the best means of ensuring zonal isolation and competent cementing in the wellbore. Experts and commenters differ on various aspects of this issue, including the value of cement bond logs or cement evaluation logs as compared to other tests; testing necessary for surface casing as opposed to production and intermediate casing; and the utility of an individual “type well” in a formation in ensuring comprehensive well integrity.

Requiring the use of tanks for recovered water - The 2013 proposed rule would have required recovered water from HF operations to be stored in either lined pits or tanks. The current thinking is to strengthen that requirement by mandating storage in tanks in all instances unless an exception is specifically approved based on a robust set of criteria. This revised proposal may increase operational costs.

Definition of the term usable water - This definition is the trigger for determining which zones to be drilled require isolation. The current thinking is to clarify this definition and to utilize as much as possible the determinations about usable water developed by States and Indian tribes governing the water zones in their areas.

Public Disclosure - The rule intends to improve public access to information about the chemicals used during hydraulic fracturing of particular wells as well as locations of existing and proposed wells and information about other activities affecting the community.

Positions of Interested Parties

- **Government:** State Governors’ offices generally question the need for the rule and some question BLM’s authority. Some states believe hydraulic fracturing is already effectively regulated at the state level and that Federal regulations add an unnecessary layer of duplicate regulations. BLM officials met with state officials most recently on March 20, 2014, and had a productive exchange of views about the various state regulations and the BLM proposal, and about entering into MOUs that will efficiently administer these rules. The proposed rule provides that any state or tribal regulation that is equal to or more protective than the Federal rule will be applicable.
- **Private Citizens:** The public expressed a number of concerns and positions, which ranged from the request to ban hydraulic fracturing altogether (this view accounted for 95% of the 1.35 million comments received), to suggestions for ensuring the protection of groundwater, providing additional transparency for fracturing operations, and providing for prior disclosure of chemicals.

DROUGHT AND WATER ISSUES

Red River Valley Water Supply Project - In March 2014, Governor Dalrymple sent a letter to Deputy Secretary of the Interior Mike Connor regarding the Red River Valley Water Supply Project, and requested a Plan of Study put forth by the International Souris River Board (ISRB) to initiate a review of the water supply and flood operating plan contained in the 1989 Canada-United States Agreement for Water Supply and Flood Control in the Souris River Basin. A periodic review of the operating plan is required under the 1989 agreement. However, due to unprecedented flooding in the Souris River basin in 2011, basin residents have asked that additional flood protection measures be evaluated beyond what is currently provided under the 1989 agreement.

In order to move forward the Plan of Study requires approximately \$2.1 million in funding from the governments of Canada and the United States. The State Department is currently working with Canada in regard to funding and has been for some time with little movement. The Governor and Senator Hoeven are both strong supporters of moving forward with the Plan of Study and have requested Secretary of State Kerry’s support.

Colorado River Basin Drought - Throughout history, there has never been a shortage condition determined in the Lower Basin (Nevada, Arizona and California). A shortage is deemed to occur when Lake Mead reaches elevation 1,075 feet. The elevation is currently around 1,089 feet, but is forecast to reach 1,081 feet by October. Reclamation met all water orders from U.S. water users in the Lower Basin and Mexico in 2013, and all delivery orders in the Lower Basin will be met in 2014. However, over the next 5 years, the potential for a shortage condition exists, with probabilities ranging from 22% in 2016, 51% in 2017, and 62% in 2018.

In water year 2014, snowpack in the Upper Basin peaked at 111% of average on April 7. Runoff is well underway and approximately 40% of the snowpack has melted. The probable forecast for water year inflow into Lake Powell is currently 100% of average. The current projected total Basin storage is approximately 51% of capacity for end of water year 2014.

Although the Basin States remain committed to continuing discussions, there does not yet appear to be a consensus on which actions should be pursued at this time. The Upper Basin States are pursuing a plan with 3 major components: operational adjustments, voluntary demand management (e.g. fallowing or deficit irrigation), and augmentation (primarily weather modification). The Lower Basin States are pursuing a 5-year plan consisting of “no regrets” actions beginning this year and voluntary reductions or other efforts to protect low Lake Mead elevations (somewhere between 1,000 and 1,020 ft). The Lower Basin States view a Federal commitment to decrease operational inefficiencies in the Yuma area as a key component to the plan. The Lower Basin States would also like Reclamation to fully engage in the process to develop the plan in more of a co-lead or full-partnership role.

Minute 319 - On May 15, the downstream edge of the environmental pulse flow of Colorado River water - released under Minute 319 - reached the tidal delta of the Pacific Ocean connecting the River with the Gulf of California for the first time in history as a purposeful environmental flow. This is considered a major achievement among the NGOs and scientists that have worked on Colorado River Delta issues over the past two decades. Delivery of the pulse flow began on March 23 from Morelos Dam, the last diversion dam on the Colorado River located at the U.S./Mexico border, and was completed on May 18th. Approximately 105,000 acre-feet were delivered in the form of a pulse flow to the Colorado River riparian corridor. Negotiating an extension of Minute 319 by December 2016 is a high priority, and we believe the pulse flow success will help pave the path to reaching an agreement.

Glen Canyon Dam - Drought conditions upstream of Lake Powell over the past two years have significantly reduced the elevation of Lake Powell. The declining elevation has reduced generation efficiency by approximately 10 percent. Generation at Glen Canyon Dam accounts for about 80 percent of the Salt Lake City Area/Integrated Projects (SLCA/IP). Reductions in generation at Glen Canyon Dam have a significant impact on SLCA/IP generation revenues available in the Upper Colorado River Basin Fund which fund operation and maintenance, salinity control, security, environmental related costs, and repayment obligations. Based on design criteria for the Glen Canyon generators, when Lake Powell drops below elevation 3,490 feet, power can no longer be generated. As of May 20, 2014, Lake Powell is currently 117 feet below full elevation of 3,700 feet and is 93 feet above minimum power pool (3,490 feet). Latest projections indicate that the first probability of reaching minimum power pool is water year 2018 (4 percent chance). Reclamation is actively partnering with the seven Colorado River Basin States to identify proactive steps to avoid reaching critical elevations at Lakes Powell and Mead.

Great Plains and Drought - Mountain snowpack in Colorado, Montana, and Wyoming remains well above average for this time of year. Cool temperatures have moderated the rate of snow melt, but the runoff is beginning with warmer temperatures. Precipitation in the Dakotas has been near normal this spring; however, with the large precipitation events in the fall and winter, spring runoff conditions are average, and normal for this time of year. In the climate outlook for June for this northern section of the Great

Plains Region, temperature is predicted to be below normal with above average possibility for higher precipitation occurring.

Northwest Area Water Supply (NAWS) Project - NAWS is a municipal and rural water project authorized by the Garrison Diversion Reformulation Act of 1986 and the Dakota Water Resources Act of 2000, and construction of project features began in April 2002. When complete, the project would deliver water from the Missouri River to communities and rural water systems in North Dakota located in the Hudson Bay Basin.

Construction continues on the Minot Water Treatment Plant Improvement Project. On March 1, 2013, Judge Collyer issued a ruling on the issue of whether to allow further work to be bid for continued construction of distribution facilities. The ruling will allow completion of the upgrades at the Minot Water Treatment Plant. However, the modified injunction “will not permit new pipeline construction or new pipeline construction contracts.” Progress continues on the preparation of the draft SEIS, and Reclamation plans to release the draft SEIS for a 45-day public review starting in late-June or early-July 2014. Public hearings will be hosted in Minot, ND, during the public review period.

Rural Water Projects – (ND and SD)

Since 1980, Congress has directed Reclamation to construct 13 individual rural water supply projects at a combined cost of more than \$2.3 billion. Projects have been authorized with varying local cost-share ranging between 0 and 25 percent. Federal law directs Reclamation to operate, maintain, and replace (OM&R) two projects authorized to benefit Tribes; including Garrison Diversion Unit in North Dakota and Mni Wiconi Rural Water System in South Dakota. Indian Rural Water Supply Project O&M costs rise as new project features are constructed – consuming an increasing share of Reclamation’s overall budget allocated to rural water projects.

Mni Wiconi Rural Water System (SD) – As of September 30, 2013, the Federal Government has committed 100 percent of its cost share toward completing the Project. The Core line and Lower Brule distribution system are complete. The West River/ Lyman-Jones distribution system, Rosebud distribution system and Oglala distribution system are nearing completion and construction is anticipated to be substantially complete in FY 2015.

Garrison Diversion Unit (ND) – As of September 30, 2013, the project was approximately 72 percent complete (as financially determined). The federally-funded portion of the project was approximately 69 percent complete. Work continues on (1) the State municipal, rural and industrial (MR&I) water supply program administered by the State of North Dakota, and (2) the Indian MR&I water supply program for the construction of five reservation-wide systems, including Standing Rock, Fort Berthold, Fort Totten, Turtle Mountain, and Trenton Indian Service Area.

Reclamation is preparing a Supplemental Environmental Impact Statement (SEIS) for the Northwest Area Water Supply Project as a means of complying with the U.S. District Court order issued in March 2010. The Garrison Diversion Unit is located within and affected by the Northwest Area Water Supply Project. Reclamation is planning to release a draft SEIS on NAWS in 2014.

Lewis & Clark Regional Water System (SD, MN, IA) – As of September 30, 2013, the Federal portion of the project was approximately 55 percent complete (as financially determined). The Water Treatment Plant, funded by the American Recovery and Reinvestment Act, was placed into service on July 30, 2012, and is delivering treated water to 11 of the 20 member entities. Due to limited Federal appropriations, the project is exploring options to accelerate construction with grants/loans from the Minnesota, Iowa, and South Dakota State governments. South Dakota and Minnesota passed legislation authorizing \$1 and 22 million grants respectively, and Minnesota enacted a \$45 million bonding authority for in-state project

beneficiaries. Lewis & Clark intends on using any future Federal appropriations to reimburse construction cost by repaying the entities that provide funding in excess of the non-Federal cost-share required in the authorizing legislation.

Next Steps - Continuing to evaluate OM&R budgets for Tribal Rural Water Projects to assure the reliable delivery of quality drinking water; continuing to prioritize federal funding for construction consistent with the Interim Final Funding Criteria for Rural Water Projects; continuing to work with Lewis & Clark Rural Water System to address questions/issues that need to be resolved to enable the project to proceed with construction with non-Federal funding.

LAND EXCHANGE VALUATION PROCESS

Governor Gary Herbert (UT) may want to discuss land exchange, particularly the appraisal process.

Governor Herbert could raise an issue with the length of time it takes to complete land exchanges between the Bureau of Land Management (BLM) and the State of Utah. The BLM and the State of Utah recently completed the Utah Recreational Land Exchange (URLEA), which was mandated by legislation.

The URLEA land exchange involved over eighty tracts of land totaling about 80,000 acres with values that included consideration of the potential for oil, gas, coal, tar sands, potash, and flagstone. The Office of Valuation Services, together with SITLA experts in Utah, developed a scope of work encompassing surface and sub-surface valuations, designed appraisal contract specifications, evaluated potential appraisers, and conducted joint mineral valuation and appraisal reviews. This valuation process stands as a model for how collaborative effort can successfully help achieve large-scale exchanges that benefit the land management goals of both the State and Federal governments.

There are a number of procedures that BLM must follow to ensure that land exchanges are in the public interest. The BLM is also required to follow the Uniform Standards for appraisals, to ensure that we obtain the fair value for the lands we exchange out of public ownership. The Department has had a long-standing position that the Uniform Standards for appraisals be used when Congress mandates a land exchange. The Governor may express the opinion that these processes are too time consuming. The BLM's position is that these processes are necessary to protect the public interest.

UNITED STATES EXTRACTIVE INDUSTRIES TRANSPARENCY INITIATIVE (USEITI)

Governor Matt Mead (WY) has expressed interest in discussing USEITI with you at this meeting.

You may want to mention your participation in the upcoming USEITI Multi-Stakeholder Group (MSG) meeting on June 10, 2014, regarding the EITI International Board's approval of the USEITI Candidacy Application. Since achieving Candidate Country status on March 19, 2014, the USEITI MSG convened its first meeting of 2014 on April 23-24, and began working on the details of domestic implementation. As a candidate country, the U.S. has three years to fully implement the international EITI standards and achieve "compliant" status.

It is anticipated that during this public meeting, the USEITI MSG will review options for a State and Tribal "opt-in" process. The development of this process is critical to addressing USEITI implementation concerns raised to Assistant Secretary Rhea Suh by the Western Governors' Association and the Interstate Mining Compact Commission, as well as an essential part of fulfilling the Department of the Interior's Indian Trust responsibility. The MSG is likely to discuss a plan to implement other key EITI requirements, such as project level reporting and the inclusion of income tax revenue and payments in USEITI reporting.

You may also wish to mention that on April 7, 2014, you appointed Mr. Michael D. Mathews upon recommendation by Governor Mead as an alternate member on the USEITI Advisory Committee. His term lasts until December 21, 2015.

MOUNT RUSHMORE

Governor Dennis Daugaard (SD) expressed interest in discussing with you the opportunity for a long-standing contract that would allow Mount Rushmore National Memorial to remain open in the event of a future government shutdown. NPS assumes the proposed contract would allow South Dakota to operate the park with State funds in the event of a cessation of Federal appropriations, as it did for four days during the course of the Federal shutdown in October 2013.

On October 1, 2013, the Federal government shut down for 17 days. Beginning on October 11, 2013, the National Park Service (NPS) entered into agreements with six States including South Dakota, to re-open national parks with State funds. States were required to fund the park or parks for no fewer than two days, to re-open with NPS employees, and to sign an agreement stipulating that no expended funds would be returned to the State unless Congress explicitly appropriated funding for that purpose. South Dakota signed an agreement with the NPS and transferred ten days worth of funding to operate Mount Rushmore on October 14, 2013. The park re-opened and operated with State funds for three days until Federal operations resumed on October 17, 2013. The NPS returned seven days' worth of unused funds to the State.

We appreciate the Governor's enthusiasm for ensuring that all visitors who arrive to visit Mount Rushmore National Monument have access to this spectacular site. However, we cannot support a long-standing agreement with a non-Federal entity to continue to fund a national park in the event of a future shutdown. In the case of a lapse in Federal appropriations, all policy decisions governing operations will be made during the event by the Administration in charge at the time (Similarly, we imagine a State governor cannot bind the financial or policy decisions of a future Governor). Such policy decisions are made under very specific circumstances that may not be repeated should we be unfortunate enough to encounter another shutdown.

We are also uncomfortable codifying an approach that would allow certain parks to re-open only because they are fortunate enough to reside in a State with the resources and political will to fund them. Further, had the shutdown lingered, the costs associated with reopening certain parks would have had to be revisited, as it is nearly impossible to divorce one park's operations from the regional and national offices that support that park unit with numerous administrative functions.

WILD HORSES AND BURROS

Governor Matt Mead (WY) may wish to discuss this issue with you.

In order to protect our public lands' natural resources and comply with the Act, the BLM has been conducting gathers to remove excess animals from the range as well as to administer various population growth suppressions methods, including fertility control vaccines. Prior to the economic slowdown that started about a decade ago, the BLM's Wild Horse and Burro Program (Program) was able to successfully adopt the majority of the animals removed from the range. However, adoptions have decreased markedly. It is increasingly difficult to find willing and qualified adopters and buyers.

On-range populations are nearly double Appropriate Management Levels (AML) and the BLM currently cares for nearly 48,000 animals off-range, costing \$46 million in FY 2013. This expense is limiting the

application of population growth suppression methods and the number of animals that can be removed, resulting in increasing overpopulation on drought stricken western rangelands.

The June 2013 National Academy of Sciences (NAS) Report provided BLM with multiple recommendations for program improvements. BLM has drafted a report that identifies how BLM will implement the recommendations and is also developing a long-term strategy for the achievement and maintenance of AML. Budgets have progressively increased from \$19 million in 2000 to \$77 million in FY 2014. Rising costs for holding increasing numbers of unadopted animals are the primary reason for budget increases.

Rock Springs Grazing Association

- Rock Springs Grazing Association (RSGA) owns and leases 48 percent of private land across four checkerboard Herd Management Areas (HMAs) in southern Wyoming.
- In October 2010, RSGA requested that BLM remove all wild horses on these private lands.
- In April 2013, BLM and RSGA entered Consent Decree requiring that BLM:
 - Remove all wild horses on private RSGA lands (except in White Mountain HMA);
 - Remove to low appropriate management level (AML) (251 in Salt Wells Creek HMA and 610 in Adobe Town HMA) and use fertility control to reduce population growth;
 - Gather and remove wild horses in Salt Wells Creek/Adobe Town Complex in 2013, Divide Basin HMA in 2014, and White Mountain HMA in 2015; and
 - Report population census by November 30 annually.
- In December 2013, the BLM finished the Adobe Town and Salt Wells Creek removals. The BLM has tentatively scheduled the Divide Basin removal for summer or fall 2014.
- The State of Wyoming is monitoring the results of Consent Decree; Governor's Office has informally requested AML information over the last several months.
- In 2003, BLM and State of Wyoming entered into a separate Consent Decree mandating removals within one year of population exceeding AML in each HMA.

GRIZZLY BEAR DELISTING

Governor Matt Mead (WY) sent a letter in May 2014 asking that the grizzly bear be delisted, and may wish to discuss this further at the meeting.

Q: What are your plans regarding the Grizzly Bear?

A: FWS is completing a threats analysis for the Yellowstone distinct population of grizzly bears. They expect to make a decision on whether to proposed to delist this population by late 2014 and, if so, to make a final delisting determination in 2015. FWS is also working with tribal, state and federal partners to complete a conservation strategy for grizzly bears in the Northern Continental Divide Ecosystem. Once this conservation strategy is complete, the Service will conduct a threats analysis and determine whether a delisting proposal is warranted for this population. If so, they would likely publish a proposed delisting.

Q: Is the FWS working on delisting of grizzly bears in the Northern Continental Divide Ecosystem (NCDE) in Montana?

A: The FWS is working with state, Tribal, and federal partners to complete the NCDE Conservation Strategy, which is the post delisting management plan. Completion of the Conservation Strategy is a Recovery Plan task. This document, once completed, will demonstrate the adequacy of regulatory mechanisms in order to address ESA Factor 4 for delisting. Upon completion of the Conservation Strategy, the FWS will complete a threats analysis for this population and make a determination as to if the threats to this population have been addressed. If the result of this threats analysis is that the threats to this population have been addressed, the Service will publish a proposed rule to delist this population.

Such a proposed rule could be published in late 2015, pending timely completion of the NCDE Conservation Strategy and a favorable threats analysis.

Q: Can the Cabinet/Yaak and Selkirk grizzly recovery zones be combined with the NCDE recovery zone so that all of them can be delisted together?

A: The conservation status of the Cabinet/Yaak and Selkirk grizzly recovery zones is much different than that of the NCDE recovery zone. These two populations are warranted for endangered status. A recent Wildlife Monograph concluded that the US recovery zones are not currently functionally connected demographically in such a way as to affect the internal population growth or vital rates through inter-population connectivity. Based on this information, these recovery zones cannot be considered a single population unit and recovered as one population unit at this time.

FEDERAL PERMIT STREAMLINING PROJECT

Governor John Hickenlooper (CO) and Governor Brian Sandoval (NV) sent a letter in April 2014 asking for reauthorization of the Federal Permit Streamlining Pilot Project.

Section 365 of the 2005 Energy Policy Act established a federal permit streamlining pilot project (Pilot Project) to increase coordination, reduce the time to issue APDs and improve environmental stewardship as a means to meet the nation's energy needs. The Act also established a funding mechanism/source that diverted 50 percent of the federal share of onshore lease rental receipts from the U.S. Treasury to the BLM.

It has been very successful in improving interagency coordination and reducing the time to process federal O&G APDs and ROWs. Without extension, the pilot project and the associated funding authority will expire in August of 2015. The BLM's FY 2015 President's Budget does not propose an extension of the funding mechanism for the pilot office fund; the BLM is currently evaluating options for addressing this situation in the FY 2016 budget.

In December 2013, Congress passed and the President signed H.R. 767, expanding the scope of the Pilot Project and providing additional discretion to the BLM. However, H.R. 767 did not include an extension of the funding.

On April 3, 2014, Governor Hickenlooper and Governor Sandoval sent Secretary Jewell a letter on behalf of the Western Governors' Association (WGA) requesting the Department's support for the reauthorization of the Pilot Project. The Secretary responded to WGA in a letter dated April 17, 2014, stating that the 10-year Pilot Project had been a success that allowed the BLM and its Pilot Project partner bureaus and agencies to more efficiently process oil and gas drilling permits and streamline associated environmental reviews, it provided BLM's oil and gas inspection and enforcement program with resources necessary to allow more thorough oversight of oil and gas operations, and the Department would work with Congress to provide additional flexibility nationwide to utilize the pilot office authority as permitting demands shift over time.

MASTER LEASING PLANS – OIL AND GAS

Master Leasing Plans (MLP) involve preplanning and intensive analysis of distinct geographical areas to avoid and minimize conflicts between oil and gas activity and recreation, water, air, cultural, and wildlife values. Some areas with high value resources need additional planning and analysis prior to issuing new or additional oil and gas leasing. The MLP process enables the BLM to take a focused landscape-level look at the decisions in Resource Management Plans (RMP) pertaining to leasing and post-leasing development of the area. This tool provides a vision for how future development will occur. The BLM is

developing MLPs both as part of the development of new RMPs, and as amendments to existing RMPs. Attached is a list of the MLPs currently under development in Western States.

Table 1. Status of the BLM's Master Leasing Plans

State	Resource Management Plan/Amendment	Status
CO	1 External Proposal	
	○ Shale Ridges and Canyons – part of the Grand Junction RMP Revision	Draft RMP published in January 2013; a Proposed RMP expected in FY14
	2 Internal Proposals	
	○ North Park – part of the Kremmling RMP-A	Proposed RMP published in March 2014. ROD expected September 2014. .
	○ South Park – part of the Royal Gorge RMP Revision	Draft RMP expected in December 2015. Proposed RMP expected in February 2017.
	1 Modified External Proposal	
○ Dinosaur Trail – part of the White River RMP-A	BLM modified the boundaries of the original Dinosaur Lowlands proposal to create the Dinosaur Trail proposal; Draft RMP-A published in September 2012; a Proposed RMP-A expected in early summer of FY14	
MT	1 Internal Proposal	
	○ Carter MLP – part of the Miles City RMP Revision	Draft RMP published in March 2013; Proposed RMPA is expected in FY14.
UT	4 Modified External Proposal	
	○ Book Cliffs Divide - Grand Valley - Cisco Desert MLP	Have not been initiated.
	○ Glen Canyon - San Juan River MLP	Have not been initiated.
	○ San Rafael River MLP	Have not been initiated.
	○ Vernal MLP - stand-alone analysis	A MLP in the Vernal Field Office appears to be likely for enhanced analysis related to the MLP process for fluid minerals, mainly oil development.
	1 Internal Proposal	
○ Moab MLP – stand-alone analysis	NOI for the RMP-A was published in March 2012; open house to update the public on draft alternatives was on May 14, 2014. Draft MLP in development; anticipate 90-day public comment period to begin February 2015. Publish NOA for Final MLP/EIS in November 2015. Issue ROD in February 2016.	
WY	5 External Proposals	
	○ Absoraka-Beartooth Front – part of the Bighorn Basin (Cody and Worland) RMP Revision	The Draft Final RMP is being prepared.
	○ Fifteen Mile Area (Worland) – part of the Bighorn Basin RMP Revision	
	○ Bighorn Front – part of the Bighorn Basin (Cody and Worland) RMP	

State	Resource Management Plan/Amendment	Status
	Revision	
	<ul style="list-style-type: none"> ○ Beaver Rim – part of the Lander RMP revision 	The ROD has been drafted but is on hold for signature at WO direction. The Final EIS was published last year.
	<ul style="list-style-type: none"> ○ Little Mountain – part of the Rock Springs RMP revision 	Draft MLP in development.

FY – Fiscal Year

NOA – Notice of Availability

ROD – Record of Decision

RMP – Resource Management Plan

RMP-A – Resource Management Plan Amendment

TRIBES

Governor Steve Bullock (MT) sent a letter in October 2013 regarding federal recognition for the Little Shell of the Chippewa Tribe. During the WGA breakfast in February, Governor Bullock mentioned law enforcement challenges in Indian country.

Little Shell Tribe of Chippewa Indians of Montana

The Little Shell Tribe of Chippewa Indians of Montana (Little Shell) is made up of the descendants of Métis Indians (mixed-blood, or half-blood, Indians and often the offspring of French fur trappers and Indian mothers), and was historically treated different than other Pembina Indians by the US because of their mixed-blood heritage. The US government refused to deal with Métis Indians because it viewed them as having Indian ancestry, but not being Indian, which in turn forced the Métis ancestors of the Little Shell tribe to seek other Métis settlements on the outskirts of towns like Helena, Great Falls, and Butte, MT.

In 1978, Little Shell first submitted its intent to petition the Federal government for acknowledgment as an Indian tribe under Federal law. In 1995, their petition was complete, beginning a long review process by the Office of Federal Acknowledgment. Earlier this year, AS-IA agreed to suspend reconsideration of the issues referred from the IBIA until after the promulgation of newly revised regulations on the Federal acknowledgment process, which is currently underway.

The Department recently published a Proposed Rule in the Federal Register, which revises the Part 83 regulations on Federal acknowledgment. After all public comments are received a final rule may be drafted. The Office of the AS-IA has asked that Little Shell request within 90 days of publication of the final rule for us to begin reconsideration of its petition under the grounds referred to the Department by the IBIA, and any new grounds which may result from changes in the regulations. The Little Shell tribe's petition for Federal acknowledgment has the support of its sister tribes in Montana, the Governor's office and the State of Montana, which recognized the Tribe in 2000.

Law Enforcement Issues

On July 29, 2010 the President signed the Tribal Law and Order Act of 2010 into law. There are several requirements specific to the United States Department of the Interior (DOI) or the Bureau of Indian Affairs, Office of Justice Services (OJS). One such requirement is that the OJS submit to the appropriate committees of Congress, for each fiscal year, a detailed spending and unmet needs report regarding tribal public safety and justice programs.

State of Montana funding (FY 2012)

	<i>Actuals</i>	<i>BIA Estimate of Unmet Need</i>
<i>Criminal Investigation & Police</i>	\$15,553,374	\$8,748,209 = 34% unmet
<i>Detention</i>	\$9,388,285	\$7,254,249 = 38% unmet

Montana Tribes

- Crow Agency - Tribal leadership feels the agency is not adequately staffed for the amount of acreage and population. They have requested that our allocated funded positions be increased to meet the demands on the Crow Reservation. They are also concerned with the length of time it takes to hire police officers and get them on board.
- Northern Cheyenne Agency - Tribal leadership is concerned with the recent turnover in employees, as well as the length of time it takes to hire and train new officers.
- Blackfeet - The current and ongoing conflict at this agency has consumed most of their time. They are also concerned with funding.
- Funding is the primary concern for the following: Fort Belknap, Fort Peck, Rocky Boy.

ABANDONED MINE LAND (AML) FUNDING

Governor Matt Mead (WY) may wish to discuss this with you. He sent a letter in May 2014 regarding the review and reversal of OSM's decision on AML funding to Wyoming.

Governor Mead's letter requested reconsideration of our estimate that Wyoming will be allocated approximately \$53.8 million in AML funding in Fiscal Year 2015. After review and consultation with the Office of the Solicitor at the Department of the Interior, we conclude that OSMRE's interpretation of the Surface Mining Control and Reclamation Act of 1977 (SMCRA), as amended, is correct. There is a response letter currently making its way through the surname process at Interior.

INVASIVE SPECIES

WGA Chairman John Hickenlooper's (CO) staff indicated that Governors may ask you about invasive species efforts.

A number of western states have expressed dissatisfaction with the federal level of support and coordination to control and prevent the spread of invasive species. The WGA has called invasive species "... one of our country's biggest environmental problems" in a recent WGA resolution that expresses concerns over the continued introduction and spread of invasive species in Western states, including:

- the perceived lack of coordination among federal agencies;
- the need to prioritize resources to focus on those species with the greatest potential to cause economic harm;
- the importance of linking invasive species management to broader Departmental and Administration goals.

Invasive Species Examples

Global damage from invasive species is estimated at upwards of \$1.4 trillion or about 5 percent of the global economy. Examples for the western US:

- Cheatgrass is estimated to infest over 56 million acres across 17 western states impacting rangelands, changing the native plant community, and increasing fire frequency. This grass can produce more than 10,000 plants per square yard leaving behind thick dry fuels and creating

extreme wildfire hazards. With each new fire, cheatgrass reseeds to further change the native plant community and increase fire threats.

- Quagga and zebra mussels have spread from the Great Lakes to much of the U.S., clogging water intake and delivery pipes, infesting hydropower infrastructure, and negatively impacting native species. An annual loss of \$22 million is estimated for the Lake Tahoe region if quagga or zebra mussels become established there. Funding for quagga and zebra mussel prevention and coordination has been included within the FY 14 President's Budget.

Ongoing Initiatives at Interior

Interior agencies are working to cooperate and coordinate more closely to enhance invasive species prevention and control programs through existing agency programs as well as working on a multi-agency and multi-departmental basis through the National Invasive Species Council (NISC) - which you co-chair - and the Aquatic Nuisance Species Task Force (ANSTF) co-chaired by the FWS and NOAA. NISC and ANSTF have established a federal working group to strengthen and harmonize policies and regulations to stop the introduction of invasive species onto or off of DOI lands - especially invasive zebra and quagga mussels in western states. The Pulling Together Initiative, administered by the National Fish and Wildlife Foundation with funding from the Bureau of Land Management, the US Fish and Wildlife Service and the Forest Service, fosters local cooperative weed coalitions to improve the effectiveness of local invasive plant programs.

Interior recently approved the Invasive Species Action Plan to target limited resources more effectively and efficiently. This approved Action Plan includes 5 recommendation areas and 25 action items that will help Interior get our house in order on this important issue. Some topline items include:

- The development of a multi-year strategy with annual operations plans to guide improved alignment of invasive species programs and to provide regular briefings for the Department's senior leadership.
- The development of a Departmental policy providing guidance to more effectively align and execute resources in support of invasive species prevention, detection, rapid response, and control.
- Coordination of a departmental informational management effort on invasive species to create efficiencies and eliminate duplication. This would include an effort to better standardize data collection and increase transparency. And;
- The development of an EDRR framework for invasive species that outlines protocols and guidance for the allocation of resources.

Next Steps

- Streamline the FWS injurious species listing process to keep harmful species out of the nation.
- Partner with NFWF to support actions to address early those invasive species not yet widely established through Early Detection and Rapid Response.
- Strengthen existing regional coordination efforts (e.g. the Pacific Islands and Everglades) and build new regional efforts (e.g. the Arctic and Great Lakes) as appropriate to enhance our ability to address invasive species threats and damages.
- Early in 2014, the WGA wrote to the co-chairs of NISC (including you) expressing interest in working with NISC on the revision of the National Invasive Species Management Plan. NISC and WGA staff held a conference call in late March 2014 to discuss this issue. NISC looks forward to working with WGA on the management plan update this summer or in early fall.

BRIEFING MEMORANDUM FOR THE SECRETARY

MEETING WITH GOVERNOR OTTER - DRAFT

DATE: June 9, 2014
LOCATION: The Broadmoor Hotel, Colorado Springs, CO
TIME: 10:30AM – 11:00AM
FROM: Francisco Carrillo, Deputy Director of Intergovernmental Affairs, (202) 412-8846; Steve Ellis, Dep Director of BLM, (202) 208-3801

I. PURPOSE

You are meeting with Idaho Governor Butch Otter prior to the WGA annual meeting. Gov. Otter would like to discuss Sage Grouse issues, particularly the impact that the National Policy Team guidance will have on the Idaho alternative. He would also like to discuss the Gateway West Transmission Line.

II. PARTICIPANTS

- Gov. Butch Otter (ID)
- Deputy Secretary Mike Connor

III. HOT TOPICS

Gateway West Transmission Line (Idaho segments 8 & 9) * Priority Project of Rapid Response Team for Transmission (RRTT)

Next Milestone: Resource Advisory Council meeting June 5, 2014 (to be followed either by BLM ROD based on existing FEIS or NOI initiating supplemental EIS)

Project Description: Sponsored by Idaho Power and Rocky Mountain Power, the Gateway West Transmission Project consists of nine 500 kV AC segments and one 230 kV AC segment spanning 990 miles across southern Wyoming and southern Idaho. The project will address load growth in Idaho, Oregon, Utah, and Wyoming, improve the reliability and efficiency of utility systems, and tap renewable energy resources in Idaho and Wyoming. A Record of Decision for project segments 1-7 and 10 was issued November 2013. BLM deferred a decision on segments 8 and 9 in Idaho to allow additional time to address unresolved siting challenges. BLM is the lead federal agency. The project sponsors estimate 1,100 to 1,200 jobs to be created.

Project Challenges:

- (b) (5)
- Finalizing Greater Sage Grouse mitigation
- Finalizing Migratory Bird Conservation Plan

Gov Otter's Concern: (b) (5)

Suggested Response: (b) (5)

Sage Grouse

The Final Idaho State Plan was completed and incorporated as Alternative E into the Draft EIS. The State Plan currently only applies to Federal lands with the exception of the creation of the Rural Fire Protection Associations, which are being implemented and funded by the State. BLM has been working collectively with the State of Idaho and FWS to develop a 'Proposed Final Plan' that incorporates the State Plan, including additional changes the State wanted to include into their state strategy (e.g., Core, Important, and General Management Zones). These components have been agreed to and developed in collaboration with the State.

The National Policy Team recently issued range-wide guidance that takes a different approach to management than the agreed to approach in the "Proposed Final Plan". That guidance set out an exception process for state directors to explain why an alternative approach is warranted. The Idaho BLM State Director has submitted information to the BLM Washington Office explaining why the Idaho approach achieves similar or better outcomes for Sage Grouse. That memo is under review.

Governor Otter's Concern: The Governor's office is especially concerned with the manner in which the general National Policy Team guidance requires General Habitat (versus Priority Habitat) be managed relative to the "no net unmitigated loss of sage grouse habitat." In addition, Idaho has three tiers of habitat protection (Core, Important, and General zones) and not two like other states. Ninety five percent of breeding males are protected by the Core Zone (73% of breeding males) and Important Zone (22%), and the Important Zone is a fundamental component of the adaptive management strategy. This approach lays the foundation to potentially manage state and as appropriate, private lands, within this framework.

Suggested Response:

- Governor Otter, I know that your team has worked very hard with ours to come up with a strong approach to sage grouse management on public lands in Idaho.

- The National Policy Team guidance was only guidance not policy and invited State Directors to explain why alternative approaches can work given the specific facts at play in different states.
- We believe we need this step to ensure a strong record that supports similar or better outcomes from the standards set out in the NTT and COT reports.
- My understanding is that the ID BLM director is working with our Washington Office on that record. The door is not shut to the Idaho approach and we look forward to continuing to work with you.

RE: Fire TPs

Sally—

Pls see the revised slide. We've added the tps within the context setter you suggested earlier.

Will pass along our suggested edits to OMB/Deese.

Thanks,
Rhea**From:** Sally Jewell [mailto:(b)(6)@ios.doi.gov]**Sent:** Wednesday, June 04, 2014 1:48 PM**To:** James Douglas**Cc:** Rhea Suh; Kimberly Thorsen; Tommy Beaudreau**Subject:** RE: Fire TPs

Jim—

I will hold for the final version. (b)(5)

A large black rectangular redaction box covers the majority of the text in this section. The text '(b)(5)' is printed in large, bold, red font over the redaction.

I don't have a soft copy of these TPs to work from. If the team could send me your latest version with edits incorporated, that would be helpful. I leave to catch a flight at 4 pm.

Thanks,

Sally

All –

I made some relatively minor edits to the latest version of your TPs which are attached. Let me know if any of these give you concern. They are mainly to tighten it a bit, and to make some of the sentences less long. In reality, I'll probably condense these into highlights and speak more naturally. If you have yet to send the others to the WH, please substitute my section with these. If they have gone, the meaning is essentially the same, so I wouldn't sweat it.

Thanks,

Sally

6-9-14 Jewell fire briefing TPs.docx

18K

Secretary Jewell –from WGA meeting in CO

- The challenge of wildfires is driven by three principal factors: a changing climate, an excessive amount of fuels build-up, and increasing settlement in and around fire prone areas.
- The National Cohesive Wildland Fire Management Strategy provides us with a framework for addressing these. Through a collaborative response to these wildland fire risks facing it focuses on three major goals:
 - Restore and maintain landscapes
 - Fire-adapted communities
 - Wildfire response
- Reducing risk by proactively treating fuels is a key part of our approach
- Fuels treatments reduce the size and severity of fires, reduce risks to our firefighters, and protect communities and their values
- Continued investment in reducing fuels is critical for long term success in living with fire
- For example, on the recent Funny River fire on the Kenai Peninsula in Alaska:
 - Fuel breaks provided the opportunity for firefighters to stop the fire; fire was stopped along approximately 6 miles of the fuel break.
 - From the Incident Commander: fuels work by the State, the Cook Inlet Corporation, and FWS are the reason we aren't chasing fire through communities
- Continued investments in fuels management activities will reduce risks to communities, increase the resilience and health of our forests and rangelands, and support safety of the public and our firefighters. This is a paramount component of the federal government's, and the Nation's, approach to wildfire. Stable funding for fuels management also would provide much needed, steady jobs in rural and tribal communities.
- Tribes are an important part of our partnership to manage wildland fire and resilient landscapes. We are working closely with them to protect their communities and to reduce fire risk to important cultural and natural resources.
- In the Department of the Interior over the last ten years we have spent \$1.9 billion to treat over 11.6 million acres. These treatments are located across the country and reflect our highest priorities in reducing wildfire risk.
- For example, this year the BLM is spending over \$28 million, 62% of their total program, to treat approximately 240,000 acres in sage grouse habitat conservation projects. The 2015 budget proposal includes new resources for fire management in Indian Country, including \$10 million to

support landscape restoration, which focused on fulfilling trust responsibilities on reserved treaty rights lands.

- Stable funding for fuels management would provide much needed, steady jobs in rural and tribal communities.
- And with that, I'll turn this over to Secretary Vilsack...

BRIEFING MEMORANDUM FOR THE SECRETARY

WESTERN GOVERNORS ASSOCIATION (WGA): WESTERN STATES TOURISM POLICY COUNCIL (WSTPC), MOU SIGNING, AND OPENING CEREMONY – VERSION 2

**Note: Updates are highlighted in yellow.*

WSTPC MEETING AND PRESS CONFERENCE

DATE: Monday, June 9, 2014
LOCATION: The Broadmoor Hotel, Colorado Springs, CO
TIME: 8:30AM- WSTPC Meeting; 10:00AM - WSTPC MOU Signing and Press event
FROM: Francisco Carrillo, Deputy Director of Intergovernmental Affairs, 412-8846

WGA ANNUAL MEETING

DATE: Monday, June 9, 2014
LOCATION: The Broadmoor Hotel, Colorado Springs, CO
TIME: 11:30AM – 1:30PM
FROM: Francisco Carrillo, Deputy Director of Intergovernmental Affairs, 412-8846

REMARKS AT WGA OPENING CEREMONY

DATE: Monday, June 9, 2014
LOCATION: The Broadmoor Hotel, Colorado Springs, CO
TIME: 1:00PM – 1:30PM
FROM: Francisco Carrillo, Deputy Director of Intergovernmental Affairs, 412-8846

I. PURPOSE

You are meeting with the Directors of the Western States Tourism Policy Council (WSTPC) and participating in a signing ceremony to renew the MOU between WSTPC and the federal agency partners. The WSTPC submitted a request to WGA to include the MOU signing in conjunction with their annual meeting.

Immediately following the signing ceremony, you will attend a private lunch with the Governors, the WGA Opening Ceremony, and give keynote remarks at the WGA Annual Meeting.

II. AGENDA

8:30AM-9:00AM: Meeting with WSTPC Directors (*casual meet and greet – no formal agenda*)
9:00AM-9:30AM: Meeting with NV Governor Sandoval (*see separate memo*)
10:00AM-10:30AM: WSTPC MOU Signing and Press event

- Chairwoman Shober welcomes and introduces Governor Hickenlooper (5 minutes)
- Gov Hickenlooper will offer remarks; introduces you (5 minutes)
- You will offer remarks; you will then invite participants to stand around you and Chairwoman Shober as they sign the MOU (5 minutes)
- After signing, you will head back to podium to take questions from media

10:30AM-11:00AM: Meeting with ID Governor Otter (*see separate memo*)

11:30AM-12:45PM: Governors and Premiers Private Lunch and Roundtable discussion

1:00PM-1:20PM: WGA Opening Ceremony

- Presentation of colors (Colorado National Guard)
- Nathan Anthem (Colorado Springs Children's Chorale)
- Opening Remarks by Governor Hickenlooper; he will introduce you

1:20PM-1:30PM: You give keynote remarks (10 minutes); Governor will have 5 minutes to respond with comments or questions

III. PARTICIPANTS

WSTPC Meeting:

- Diane Shober, Chairman, WSTPC; Director, Wyoming Office of Travel and
- Brian Wright, Senior Director, Visit California
- Al White, Director, Colorado Office of Tourism
- Claudia Vecchio, Director, Nevada Commission on Tourism
- Todd Davidson, CEO, Travel Oregon; Past Chairman, Travel and Tourism Advisory Board (You met Todd during your April visit to Crater Lake)
- Vicki Varela, Director, Utah Office of Travel and Tourism
- Doug Mitchell, Deputy Director, Montana Department of Commerce
- RJ Lyerly, WSTPC Washington Representative
- David Wetmore, WSTPC Washington Representative

WSTPC MOU Signing Ceremony and Press Event:

- Governor John Hickenlooper (CO)
- Governor Brian Sandoval (NV)
- Governor Matt Mead (WY)
- Governor Jan Brewer (AZ)
- Governor Steve Bullock (MT)
- Governor Gary Herbert (UT)
- Jo Ellen Darcy, Assistant Secretary of the Army for Civil Works
- Dr. Kathryn Sullivan, Under Secretary of Commerce for Oceans and Atmosphere and NOAA Administrator
- Robert Bonnie, Under Secretary for Natural Resources and Environment

- Jim Hubbard, Deputy Chief, Forest Service
- Ed Hall, Bureau of Indian Affairs. Representing the interagency travel and tourism team who works directly with the WSTPC.

WGA Luncheon and Annual Meeting & Opening Ceremony:

- Governor John Hickenlooper (CO) WGA Chairman
- Governor Brian Sandoval (NV) WGA Vice Chairman
- Governor Butch Otter (ID)
- Governor Steve Bullock (MT)
- Governor Dennis Daugaard (SD)
- Governor Matt Mead (WY)
- Governor Gary Herbert (UT)
- Governor Jan Brewer (AZ)
- Governor Jack Dalrymple (ND)
- Premier Christy Clark (British Columbia, Canada)
- Ambassador Gary Doer, Canada's 23rd representative to the U.S.

IV. KEY FACTS

Summary of Travel Economic Impact 2012 - Domestic and International	Travel Spending	Travel Generated Employment	Travel Generated Payroll	Travel Generated Tax		Travel Rank of State Private Industry Employment	Travel Share of State Private Industry Employment
							(%)
	(\$ Million)	(Thousand)	(\$ Million)	(\$ Million)			
Alaska	2,362.3	27.1	839.9	357.3		3	10.9%

V. TALKING POINTS

Talking points are forthcoming from O/S Communications and will be attached separately.

VI. BACKGROUND

**Note: In-depth background and key facts/hot topics on issues that may be raised throughout the conference will be in your WGA Information Memo.*

WSTPC:

The Western States Tourism Policy Council (WSTPC) is a consortium of twelve western state tourism offices, including Arizona, California, Colorado, Idaho, Hawaii, Montana, Nevada, New Mexico, Oregon, Utah, Washington and Wyoming. Inspired by the 1995 White House Conference on Travel and Tourism, which urged greater regional attention to the interrelationships between Federal lands, the environment and tourism, eight western states in 1996 formed the WSTPC. Since its establishment, the mission of the WSTPC has remained: *To advance understanding and increase support for public policies that enhance the positive impact of travel and tourism on the economies and environments of states and communities in the West.*

In September 1997, a Memorandum of Understanding was signed between the then eight states of the WSTPC and nine Federal agencies, including the National Park Service, the Bureau of Land Management, the Bureau of Reclamation, the Fish & Wildlife Service, the Bureau of Indian Affairs, the USDA Forest Service, the U.S. Army Corps of Engineers, the Environmental Protection Agency and the Federal Highway Administration. This is the fourth renewal of the MOU.

The purpose of this MOU is to establish a general framework for cooperation between the Federal agencies and the WSTPC. The Agencies and the WSTPC desire to work together to achieve the common goals of advancing the domestic and international public's awareness of travel and tourism on federal lands, waters and shores and to encourage use of these travel and tourism opportunities in an environmentally and culturally sensitive manner, using natural resources to produce long-term economic, business development, educational and recreational benefits, especially in rural areas.

WGA:

The Western Governors' Association represents the Governors of 19 Western states and 3 U.S.-flag islands. The association is an instrument of the Governors for bipartisan policy development, information exchange and collective action on issues of critical importance to the Western United States.

Western states worry decision on bird's fate could cost billions in development

By Reid Wilson Updated: May 11 at 5:09 pm

MINERAL COUNTY, Nev. – In the frozen chill of a high-desert morning, Tony Wasley, the director of the Nevada Department of Wildlife, peers through a range finder down a dirt path and points out a group of birds strutting and preening among a low scrub brush. It's mating season for the sage grouse, and dozens of males are descending upon breeding grounds, called leks, to show off their plumage to the hens.

The 40 or so grouse at this lek near the Nevada-California border look ridiculous. They waddle around, occasionally heaving their bodies into flight, sometimes chasing off younger males and always trying to one-up each other. They are the avian equivalent of a club-goer showing off his shiny new coat.

They are also at the center of a years-long battle that pits environmentalists who want the sage grouse protected under the Endangered Species Act against ranchers, gold miners, energy producers and Western state governments that stand to lose billions of dollars in tax revenue and economic activity if tens of millions of acres are blocked off from development, exploration or use.

The tension between the federal government and Westerners who want to use government-owned land garnered new attention last month, when the Bureau of Land Management moved to round up cattle owned by Nevada rancher Cliven Bundy over more than \$1 million in unpaid grazing fees. Some state officials fear a decision to list the sage grouse, which would severely limit everything from grazing to energy development on a huge swath of land, could create a slew of new Bundys all over the rural West.

“Western states never welcome outsiders coming in and telling them how to do something,” said Colorado Gov. John Hickenlooper (D), who co-chairs a bipartisan task force working to conserve sage-grouse habitats and prevent its inclusion on a list of threatened animals.

The fight over the sage grouse is similar in many respects to the debate over the Northern spotted owl, which in 1990 was listed as threatened. That decision shut down timber operations across more than 24 million acres in Northern California, Oregon, Washington and British Columbia, contributing to the industry's precipitous decline.

The difference is that the sage grouse covers about 165 million acres, almost seven times the range of the spotted owl. The economic impact of virtually shutting down development in sage-grouse habitats could be orders of magnitude greater than what happened in the Pacific Northwest.

Much of the sage-brush range already is being drilled for oil and natural gas, while thousands of new wells wait for permits. Renewable energy sources, such as solar and wind farms, dot the sage-brush range. Even a gold mine in rural eastern Nevada would be affected.

“It’s going to affect agriculture, oil and gas, wind, all kinds of different industries,” said Kathleen Sgamma, vice president of government and public affairs at the Denver-based Western Energy Alliance. “We’re talking about such a wide-ranging impact.”

The sage grouse has a long history in the American imagination. They are represented in Native American traditional dance and artwork. Lewis and Clark brought back drawings of a bird they called the spiny-tailed pheasant. Conservationist Rachel Carson warned in her seminal work, “Silent Spring,” that sage-brush habitat was being converted to grassland for livestock.

Sage grouse populations have “been declining significantly in numbers, and it’s very susceptible to development,” Interior Secretary Sally Jewell said in a December interview with The Washington Post. “When you look at the Western landscapes and you look at what’s happening, there isn’t a state where there’s this habitat that’s not in some form of trouble.”

The federal Fish and Wildlife Service, which ultimately is responsible for deciding whether to include an animal on the endangered-species list, has been considering the several subspecies of sage grouse for about 15 years. In 2005, the agency decided it would not list the grouse as threatened. Environmental groups filed a lawsuit, and a federal judge overturned the finding two years later. In 2010, the agency said the bird warranted protection.

Under an agreement between Fish and Wildlife and the environmental groups, the agency has until the end of September 2015 to propose rules governing the bird’s habitat or to decide to change its mind.

Environmentalists say protecting the sage grouse and its habitat is crucial to saving many more species, such as the pronghorn and the pygmy rabbit, that call the high desert home.

“The sage grouse is an umbrella species, so it’s sort of the canary in the coal mine,” said Randi Spivak, the public-lands program director at the Center for Biological Diversity, one of the groups that initially sued the Interior Department to force it to recognize the sage grouse as threatened.

It’s not just industry that wants to keep the sage grouse off the endangered-species list. States are working desperately to convince the federal government to decline to list the bird. The 11 affected states set up a bipartisan task force in 2011, co-chaired by Hickenlooper and Wyoming

Gov. Matt Mead (R), aimed at working with Fish and Wildlife, the Bureau of Land Management and other federal agencies to coordinate conservation strategies and resource-management plans.

“The focus of all this is, how do we demonstrate that we’re going to do a better job of creating a proactive strategy?” Hickenlooper said. “We can probably do a better job with our local programs and partnerships than Fish and Wildlife can, trying to regulate from afar.”

The stakes involved in Fish and Wildlife’s decision are huge. The bird’s historic range covers 160 million acres across the Mountain West region, including huge swaths of Montana, Idaho, Wyoming, Oregon and Nevada, along with smaller parts of Washington, California, Utah, Colorado, South Dakota and North Dakota.

“The Fish and Wildlife Service . . . must follow the best available science, and it must make sure that whatever’s being done is proven to be effective. And so we’re trying to keep all governors at the table,” Jewell said. “If one state doesn’t play, it could impact all of them.”

A listing decision could harm state conservation efforts, some officials said. Putting the sage grouse on threatened status “will be an incredible disincentive for states to develop voluntary conservation strategies,” said Shawn Reese, Mead’s policy director in Wyoming.

Estimates of the total economic impact depend on which conservation plans the government chooses. Plans calling for the strictest conservation measures could cost up to 31,000 jobs, up to \$5.6 billion in annual economic activity and more than \$262 million in lost state and local revenue every year, according to a widely cited study conducted by lawyer Lowell Baier that is accepted by interests on both sides of the debate.

Several members of Congress have urged the Interior Department to hold off on making a final determination. Last July, Sens. Michael F. Bennet (D-Colo.) and Mark Udall (D-Colo.) invited Jewell and Agriculture Secretary Tom Vilsack to their state to see the progress Colorado had made in protecting the Gunnison sage grouse. Senate Majority Leader Harry M. Reid (D-Nev.) and Sen. Dean Heller (R-Nev.) have released a discussion draft of a bill that would address sage-grouse conservation. In February, 10 governors met with Jewell and Fish and Wildlife Service Director Daniel M. Ashe.

State land and wildlife managers almost uniformly believe the Fish and Wildlife Service will rule against them and list the sage grouse as threatened.

“They’re leaning toward listing it as threatened,” said John Harja, head of Utah’s Public Lands Policy Coordination Office and a member of the multi-state Sage Grouse Task Force. “We have great concerns.”

If the greater sage grouse is listed as threatened, the 11 states could be on the hook for as much as \$1 billion in conservation costs. Adding to that burden, most states fund land programs

through user fees, rather than out of general funds; declaring a species threatened makes it harder to generate those fees.

“If the hunters can’t hunt, if the miners can’t mine, if you don’t have that capital, then you lose,” said Leo Drozdoff, director of the Nevada Department of Conservation and Natural Resources. A billion-dollar tab to save greater sage-grouse habitat, he added, “is almost insurmountable.”

© The Washington Post Company

Huffington Post: Republicans Gear up for the Great Grouse War of 2014

WASHINGTON -- Congressional Republicans are working to block federal protection of several species of grouse, arguing that listing the birds as endangered will hurt energy development and agriculture in Western states.

Rep. Cory Gardner (R-Colo.) and four other House Republicans, along with Sens. Mike Enzi and John Barrasso of Wyoming, on Thursday introduced the Sage Grouse Protection and Conservation Act, which would prevent the U.S. Fish and Wildlife Service from listing the greater sage grouse and Gunnison sage grouse under the Endangered Species Act for 10 years. The Fish and Wildlife Service proposed the Gunnison sage grouse as endangered in January 2013, but hasn't finalized the decision. The agency is also considering whether to add the greater sage grouse, which lives in 11 Western states, to the endangered species list. A decision on that is expected next year.

The Republicans sponsoring the legislation said they're concerned that new grouse protections may impede economic development.

"The last thing states need are more one-size-fits-all regulations from Washington that won't help species and will devastate local economies," Barrasso said in a press release. "By forcing Washington to stay out of the way, this bill puts Americans who live in these communities and know what works best in charge of managing the land and wildlife. It also gives states the tools they need to develop a sound conservation plan and ultimately prevent the sage grouse from being listed -- a win-win for wildlife and our economy."

Environmental groups said federal protections for the birds are imperative for their survival. The population of the greater sage grouse has "declined roughly 90 percent from its historic numbers," less than a century ago, said Mark Salvo, the director of federal lands conservation at Defenders of Wildlife. The birds "are experiencing death by a thousand cuts," Salvo said, because they are "highly sensitive to landscape disturbances, human activities like oil and gas drilling or livestock grazing, construction of energy facilities and mining."

Salvo said he hoped a federal and state conservation plan already underway will help to preserve sage grouse and their habitats. But legislation "prioritizing the state strategies over other federal alternatives" could make things worse, he said. He said the Gunnison sage grouse's total population is fewer than 5,000, making it "arguably the most imperiled of all the grouse species that are under consideration for protection under the Endangered Species Act."

Meanwhile, Rep. Tim Huelskamp (R-Kan.) is leading an effort to block Fish and Wildlife's decision to list another type of grouse, the lesser prairie chicken, as "threatened." Fish and Wildlife in May listed the lesser prairie chicken as threatened, after its population fell by nearly half in one year to roughly 17,000. The bird's range covers primarily private land in the southern Great Plains.

Huelskamp told HuffPost this week that he has submitted an amendment to the Interior and Environment appropriations bill that would bar the agency from using any funds in support of the listing. He said he may offer another amendment to "defund Fish and Wildlife Service," though he didn't make clear whether that would be a whole or partial cut. He said he is also working on separate legislation that would delay enforcement of the lesser prairie chicken listing for at least a year, which he said would provide time to demonstrate the effectiveness of a voluntary, five-state conservation plan.

Farmers, ranchers, oil and gas developers and rural electrical cooperatives all fear the lesser prairie chicken's listing will hurt their business, said Huelskamp. Renewable energy development also may be affected, he said. "It was the number one issue on the mind of folks in western Kansas for many months now. We're already hearing real-life examples of economic activity not taking place," he said.

Ya-Wei Li, director of endangered species conservation at Defenders of Wildlife, said the concern about enforcement is overblown. "Oftentimes, we hear this fear that Fish and Wildlife is going to drive around and start issuing citations to ranchers for violating the Endangered Species Act, and the reality is that just doesn't happen," he said.

Defenders of Wildlife and WildEarth Guardians have argued the lesser prairie chicken's listing as "threatened" is far too lenient, and that bird should be considered "endangered." An endangered listing comes with more stringent rules governing the protection of the animals and their habitat.

"Its decline has been catastrophic, its populations are on the verge of extinction," said Erik Molvar, a wildlife biologist with WildEarth Guardians based in Laramie, Wyoming. "Endangered species status is what is legally required when a species gets this scarce."

Huelskamp said he believes the lesser prairie chicken population is struggling primarily due to drought, not development. "As long as it doesn't rain, we're not going to have any more birds," he told HuffPost.

Molvar and Li acknowledged that drought has had some impact, but they said droughts occur frequently in the high plains.

"Drought or no drought, the extinction risk is very high for the lesser prairie chicken right now," said Li. He said that the legislative efforts to block protections for the bird are "really part of a larger legislative effort to gut the Endangered Species Act."

There have also been state efforts to block federal protections for the grouses. Kansas Gov. Sam Brownback (R) signed a bill two weeks ago that claims state sovereignty over non-migratory wildlife, including both the lesser and greater prairie chicken. That bill gives the state attorney general the power to block any federal protections for the birds. The state has also joined a

federal lawsuit that Oklahoma filed against Fish and Wildlife seeking to block protection of the lesser prairie chicken.

Huelskamp said there can be no peaceful coexistence between development and protections for the birds.

"There's no living together," said Huelskamp. "If you're going to shut down an oil well, it's picking ... You're picking the lesser prairie chicken over oil wells. Or else, why would they be out issuing those regulations?"

An E&E Publishing Service

ENDANGERED SPECIES: Industry embraces voluntary measures to help lesser prairie chicken (Tuesday, June 3, 2014)

Scott Streater, E&E reporter

The threatened listing of the lesser prairie chicken two months ago has sparked energy industry participation in voluntary conservation programs designed to restore the bird across its five-state range despite concerns that a federal listing would slow such participation.

Oil and natural gas, wind, pipeline, and transmission companies have nearly tripled the amount of land they've enrolled in a voluntary conservation plan since the Fish and Wildlife Service announced in late March that it would designate the ground-dwelling bird as a threatened species, according to the Western Association of Fish and Wildlife Agencies (WAFWA), which administers the plan.

Just days before Fish and Wildlife announced the listing decision, those industries had enrolled about 3.6 million acres in the Lesser Prairie Chicken Range-wide Conservation Plan, committing to spend nearly \$21 million over the next three years for habitat conservation (*E&ENews PM*, March 25).

But since the FWS announcement, that number has surged to a total of 160 companies that have enrolled about 9 million acres in the rangewide conservation plan, committing more than \$43 million for habitat conservation over the next three years.

"The oil and gas industry has demonstrated overwhelming support for the Lesser Prairie Chicken Range-wide Conservation Plan," said Ben Shepperd, president of the Permian Basin Petroleum Association, in a statement. "The industry should be lauded for doing their part in this important initiative and we appreciate the leadership of the Western Association of Fish and Wildlife Agencies in developing a plan that works for industry, landowners and the prairie chicken."

The new numbers, released today by WAFWA, would seem to soothe concerns among some Western government and industry leaders, including Shepperd, who feared a federal listing decision would drive away voluntary cooperation in the

conservation programs that were initially designed to convince FWS not to list the bird.

The formal listing decision included an accompanying special rule designed to allow regulatory flexibility for oil and gas firms, farmers and ranchers who enrolled in approved conservation plans (*E&ENews PM*, March 27).

FWS decided to list the prairie chicken mostly because farming, grazing, energy development and other land uses have significantly reduced the bird's population numbers and habitat, which includes parts of Colorado, Kansas, New Mexico, Oklahoma and Texas.

Leaders in the five states and the energy industry sector worked out the rangewide conservation plan in an effort to avoid a listing. The energy companies that agreed to enroll in the conservation plan -- including American Electric Power Company Inc., ConocoPhillips Co., Devon Energy Corp. and Marathon Oil Corp. -- paid enrollment fees to sign up, agreed to follow a list of guidelines to minimize impacts on the bird and committed to pay for impacts they could not avoid. The money goes to farmers, ranchers and landowners to protect and restore habitat for the bird.

Shepperd said in March, a day before FWS announced its decision, that a federal listing would be a "tragedy" to those companies that had signed up for the voluntary program (*Greenwire*, March 26).

"People have really spent a lot of blood, sweat and tears trying to put meaningful conservation on the ground. A federal listing throws all that work into the garbage," he said.

But Fish and Wildlife has worked with the states to provide flexibility under the Endangered Species Act, and that has encouraged voluntary participation in the conservation programs, said Bill Van Pelt, grasslands coordinator for WAFWA, which crafted the rangewide conservation plan in the bird's five-state range.

"Despite the concerns with the federal listing, what the service has done by working with their state partners is to identify the flexibility inherent in the Endangered Species Act that allows for credit to be given to voluntary programs to conserve a species," Van Pelt said. "A lot of folks said of the listing decision, 'Oh, it's going to drive people away, it's going to drive people away.' But the [ESA] itself has some inherent flexibility that has not been used in the past like it could have been."

It's not just the energy industry sector that's benefiting, but also private ranchers

and other landowners, he said.

More than 3 million acres of private land in Texas, Oklahoma and New Mexico have been enrolled in voluntary conservation agreements. And the nonprofit Center of Excellence for Hazardous Materials Management in New Mexico has enrolled an additional 1.9 million acres of oil and gas leases in the state under separate conservation agreements.

In total, nearly 14 million acres has been enrolled in some sort of public-private conservation agreement designed to restore the lesser prairie chicken and its habitat in the five states, according to WAFWA.

"The enrollment of nearly 14 million acres in these various conservation agreements to benefit the Lesser Prairie Chicken is an extraordinary achievement," Carter Smith, president of WAFWA and executive director of the Texas Parks and Wildlife Department, said in a statement. "Our focus now is to continue implementing the plan, recover the species, and facilitate the bird's removal from the federal threatened species list. In that regard, we appreciate [FWS's] commitment to and support for using the rangewide plan as a blueprint for recovery."

BRIEFING MEMORANDUM FOR THE SECRETARY

MEETING WITH GOVERNOR OTTER (R-ID)

DATE: June 9, 2014
LOCATION: The Broadmoor Hotel, Colorado Springs, CO
TIME: 10:30AM – 11:00AM
FROM: Francisco Carrillo, Deputy Director of Intergovernmental Affairs, (202) 412-8846; Steve Ellis, Dep Director of BLM, (202) 208-3801

I. PURPOSE

You are meeting with Idaho Governor Butch Otter prior to the WGA annual meeting. Governor Otter would like to discuss Sage Grouse issues, particularly the impact that the National Policy Team guidance will have on the Idaho alternative. He would also like to discuss the Gateway West Transmission Line, particularly proposed segments 8 and 9.

II. PARTICIPANTS

- Governor Butch Otter (R-ID)
- Deputy Secretary Mike Connor

III. HOT TOPICS

Gateway West Transmission Line (Idaho segments 8 & 9) * Priority Project of Rapid Response Team for Transmission (RRTT)

Next Milestone: The Boise District Resource Advisory Council (RAC) meeting June 5, 2014 (to be followed by BLM's re-initiation of public scoping and additional analysis under NEPA before a final decision is made).

Project Description: Proposed by Idaho Power and Rocky Mountain Power, the Gateway West Transmission Project consists of nine 500 kV AC segments and one 230 kV AC segment spanning 990 miles across southern Wyoming and southern Idaho. The project will address load growth in Idaho, Oregon, Utah, and Wyoming, improve the reliability and efficiency of utility systems, and tap renewable energy resources in Idaho and Wyoming. A Record of Decision for project segments 1-7 and 10 was issued November 2013. The BLM deferred a decision on segments 8 and 9 in Idaho to allow additional time to address unresolved siting challenges centered primarily around the BLM's Snake River Birds of Prey National Conservation Area. The project sponsors estimate 1,100 to 1,200 jobs to be created.

Project Challenges for Segments 8 and 9

- Due to geographic constraints and existing military training ranges, all alternative routes cross at least a portion of the BLM administered Morley Nelson Snake River Birds of Prey NCA (NCA) in southern Idaho.

- To comply with the NCA's enabling legislation (PL 103-64) and BLM policy, the segments of the project that cross the NCA must conserve, protect, and enhance the values for which the NCA was created.
- The BLM worked with the project proponents on a mitigation and enhancement strategy focused on issues within the NCA, but this strategy was not submitted by the proponents in time to be included in the 2013 FEIS and the public has not had an opportunity to review and comment on the strategy.
- Finalizing Greater Sage Grouse mitigation.
- Finalizing Migratory Bird Conservation Plan

Governor Otter's Concern: The Governor is concerned that BLM's Preferred Alternative route for segments 8 and 9 in the 2013 FEIS was located primarily on private land adjacent to communities, outside of the NCA. The Governor has maintained that a transmission line is inconsistent with city comprehensive plans. The Governor prefers to have the transmission line placed on public land within the NCA using or paralleling existing transmission line routes.

Suggested Response: The BLM in Idaho is working closely with the Boise District Resource RAC to identify optional routes and considerations for segments 8 and 9. We appreciate the Administrator of Idaho's Office of Energy Resources serving on the RAC subcommittee and contributing to this process. Based on the RAC report, BLM Idaho will determine what level of additional NEPA analysis is necessary. BLM Idaho will re-initiate public scoping and conduct further analysis prior to identifying a preferred alternative and reaching a final decision. BLM Idaho looks forward to close coordination with the Governor and his staff.

Sage Grouse

The Final Idaho State Plan was completed and incorporated as Alternative E into the Draft EIS. The State Plan currently only applies to Federal lands with the exception of the creation of the Rural Fire Protection Associations, which are being implemented and funded by the State. BLM has been working collectively with the State of Idaho and FWS to develop a 'Proposed Final Plan' that incorporates the State Plan, including additional changes the State wanted to include into their state strategy (e.g., Core, Important, and General Management Zones). These components have been agreed to and developed in collaboration with the State.

The National Policy Team recently issued range-wide guidance that takes a different approach to management than the agreed to approach in the "Proposed Final Plan". That guidance set out an exception process for State Directors to explain why an alternative approach is warranted. The Idaho BLM State Director has submitted information to the BLM Washington Office explaining why the Idaho approach achieves similar or better outcomes for Sage Grouse. That memo is under review.

Governor Otter's Concern: The Governor's office is especially concerned with the manner in which the general National Policy Team guidance requires General Habitat (versus Priority

Habitat) be managed relative to the “no net unmitigated loss of sage grouse habitat.” In addition, Idaho has three tiers of habitat protection (Core, Important, and General management zones) and not two like other states. Ninety five percent of breeding males are protected by the Core Zone (73% of breeding males) and Important Zone (22% of breeding males). This approach lays the foundation to potentially manage State and as appropriate, private lands, within this framework.

Suggested Response:

- Governor Otter, I know that your team has worked very hard with ours to come up with a strong approach to sage grouse management on public lands in Idaho.
- The National Policy Team guidance was only guidance not policy and invited State Directors to explain why alternative approaches can work given the specific facts at play in different states.
- We believe we need this step to ensure a strong record that supports similar or better outcomes from the standards set out in the NTT and COT reports.
- My understanding is that the ID BLM director is working with our Washington Office on that record. The door is not shut to the Idaho approach and we look forward to continuing to work with you.

IV. BIOGRAPHY

C.L. "Butch" Otter was re-elected Governor on November 2, 2010. He was first elected Governor of Idaho on November 7, 2006. He previously served three terms in Congress representing Idaho's 1st District from 2001 through 2006. Governor Otter is a father of four and grandfather of six. He is married to the former Lori Easley of Kimberly. They live on their ranch near Star.

Governor Otter was born in Caldwell on May 3, 1942. He graduated from St. Teresa's Academy (now Bishop Kelly High School) in Boise, attended Boise Junior College (now Boise State University), and received a bachelor of arts degree in political science from the College of Idaho in 1967.

He served honorably in the Idaho Army National Guard's 116th Armored Cavalry from 1968 to 1973, and later was awarded honorary doctorates from the University of the Philippines and the College of Idaho in Caldwell.

Governor Otter's 30-year career in business included membership on the Board of Directors of the J.R. Simplot Company. He also served as Director of the Food Products Division, President of Simplot Livestock, and President of Simplot International. He retired in 1993.

When he was elected to Congress, Governor Otter was serving his fourth term as Idaho's Lieutenant Governor. He served in that office longer than anyone in Idaho history. He previously represented the people of Canyon County in the Idaho House of Representatives for two terms

from 1973 to 1976, was on the Idaho Republican Party Central Committee and was chairman of the Canyon County Republican Party.

Governor Otter is a member of the Roman Catholic Church, the National Rifle Association, the Maple Grove State Grange, the Idaho Cowboys Association, and the Idaho 4-H Million Dollar Club. He is a Grand Slam member of Ducks Unlimited, a lifetime member of Safari Club International, was elected to the National Cowboy Hall of Fame Board of Directors in Oklahoma City in 1991, and is a lifetime member of American Legion Post 113 in Meridian.

INFORMATION MEMORANDUM FOR THE SECRETARY

WESTERN GOVERNORS' ASSOCIATION – VERSION 2

DATE: June 4, 2014
FROM: Sarah Greenberger, OS, (202)208-6726; Michael Bean, AS-FWP office (202) 208-7400; Letty Belin, Counselor to the D/S (202) 208-6291; John Blair, Director, OIEA (202) 208-1923; James Lyons, Counselor, ASLM (202) 208- 4318; Neil Kornze, BLM; Mike Conner, BOR; Libby Washburn, BOR; Dionne Thompson, BOR (202)513-0570; Anne J. Castle, A/S W&S; Neil Kornze, BLM; Maureen Foster, NPS (202) 208-5970; Kevin Washburn (202) 208-7163; Jennifer Goldblatt (202) 513-0604
SUBJECT: Western Governors' Association (WGA) Issues of Interest

In preparation for the upcoming June 2014 Western Governors' Association meeting, below are western issues of interest to the Governors planning to attend.

SAGE-GROUSE

Status of BLM Great Sage-Grouse State Plans

BLM received comments from the public and from the U.S. Fish and Wildlife Service (FWS) on our 15 Environmental Impact Statements (EIS) for Greater Sage-grouse (GRSG). To improve coordination, clarity and consistency as the planning teams begin development of proposed plans, the BLM held two Federal family meetings to discuss land management allocations, disturbance calculations and other topics.

Issues/concerns that were not resolved at these meetings were presented to the National Policy Team (NPT) - which consists of members from FWS, FS, and BLM - for resolution. Key pieces of guidance were developed over a series of NPT meetings, and that guidance was issued on April 30, 2014 to the State Directors. This included guidance intended to ensure clarity and consistency related to the Land Use Plan Allocations and Disturbance thresholds; and, overall guidance related to Adaptive Management, Mitigation and Monitoring that will be incorporated into all 15 EISs. While the final NPT guidance was being developed, the State Directors were cooperating with their Governor's Offices, collectively working on these proposed plans and developing solutions from the ground up. This new guidance, which the NPT feels provides clarity for the public and the FWS, has created some conflict in specific states as some now feel that this has limited the ability to develop locally driven Proposed Plans.

BLM is analyzing the comments received and preparing draft Administrative Proposed Plans (APPs). The draft APPs, which are to be completed in June, will then be "rolled up" in July so as to evaluate their aggregate impact on each sage-grouse "primary area for conservation" (PAC) and sage-grouse population identified in the Conservation Objectives Team (COT) report. The purpose of the roll-up exercise is to evaluate the extent to which the key threats to each PAC and population have been ameliorated by the plans and will enable any fine-tuning of federal and state plans needed to adequately address key threats.

On May 12, 2014, AD-200 issued a memo to the State Directors on the new 12-Step Roll-up Strategy that addresses how the BLM will move forward with the Roll-up through the publication of the Proposed Plan EISs. The NPT guidance does provide some flexibility and if the State Director feels that their current approach is biologically beneficial to sage-grouse and better protects their habitat they can provide AD-200 a memo to support their rationale as addressed in the 12-Step Strategy. Based on this 12-Step process an updated planning schedule has been developed.

Positions of Interested Parties

Colorado – In 2008, the State of Colorado developed a statewide Conservation Plan for GRSG. In 2013, Colorado prepared and published a status report on implementation of the Conservation Plan. The status report, called the Colorado Package, was submitted to both BLM/FS and the FWS in January 2014. It is a compendium of GRSG conservation commitments and efforts underway in Colorado, including conservation planning and implementation, land protection, population and habitat monitoring, habitat treatments, restoration, research and communications. Although not memorialized in an Executive Order, it represents the State's GRSG Plan according to Governor Hickenlooper. The State of Colorado has coordinated actively and closely with BLM/FS in development of the Northwest Colorado Administrative Draft Proposed Plan (ADPP) and provided detailed comments and information for consideration, though the Governor's Office feels that BLM's ADPP is too restrictive.

Idaho/SW Montana –Based on the recent NPT guidance, BLM-ID believes the foundational elements of the State Plan are no longer applicable (i.e., three management areas and associated management, the robust adaptive management strategy, and lands and minerals activities avoidance criteria). The Governor's Office does not agree with the NPT guidance that there be "no unmitigated loss" within General Habitat. Of the three management areas (Priority, Medial, and General), Medial Habitat includes both Priority and General. The FWS concern is that the Priority Habitat in Medial Habitat should be treated and managed as Priority Habitat.

Montana – Currently working on an Executive Order from the Governor which, when in place, will provide regulatory mechanisms for sage-grouse conservation through state approved actions. The adoption of a state plan may influence the state opinions about the BLM plans in MT. The draft state plan (which applies to private and state lands) provides a process by which the state would assess disturbance at the project level to limit discretionary (those activities requiring a state or federal decision) disturbance at the landscape level.

Nevada/NE California – Nevada is in the process of revising the 2012 Nevada Sage-grouse Plan. The agencies (BLM, FS, and FWS) have been working with the State's Sagebrush Ecosystem Council and their Technical Team to make the Proposed Plan and the State Plan, where possible, consistent. To date, most of the sections that would go into the agencies' Proposed Plan have been revised and for the most part are consistent. The overarching concern from the State is the legality of the significant land use restrictions and prohibitions encompassed in the alternatives. The Nevada State Sage-grouse Plan does not make direct allocations. Their goal is to limit development based on the amount of credit that would have to be acquired for a disturbance. We expect pushback on any allocations that exclude or close areas to development.

North Dakota/South Dakota – Both the North Dakota Game and Fish and the South Dakota Game, Fish and Parks have been supportive of the BLM LUP efforts and decisions. North Dakota Game and Fish has produced a draft updated Greater Sage-grouse Management Plan and a final plan is expected soon. South Dakota is in the process of producing a draft updated Greater Sage-grouse Management Plan. Neither plan includes regulatory mechanisms for state approved actions.

Utah – The Conservation Plan for GRSG was approved for implementation by Governor Herbert in April 2013. The measures in the plan are being applied and habitat improvement projects implemented. In May 2013, the FWS submitted a comment letter raising concerns with Utah's Conservation Plan that have yet to be resolved. The state has concerns with BLM direction within Preliminary General Management Areas as it relates to "no net loss" and the three percent disturbance cap. The State also believes there is too much emphasis on land use restrictions in the BLM-FS plan and not enough emphasis on increasing habitat through treatments.

Wyoming – The State of Wyoming Core Area Strategy was established in 2011 by Executive Order. The Core Area Strategy is implemented by the Governor’s Greater Sage-Grouse Implementation Team (SGIT); it applies to private and state lands whenever a state authorization is required and is largely consistent with BLM/FS ADPP. Governor Mead is intent on getting the Lander Record of Decision approved to demonstrate successful sage-grouse conservation partnerships and has emphasized the need for BLM/FS plans to be consistent with the Wyoming Core Area Strategy. Governor Mead has emphasized that GRSG conservation should move forward while maintaining economic and social benefits derived from public land uses.

Key Points to Emphasize

- (1) **The Fish and Wildlife Service has made no decision and has no “leaning” with respect to whether or not the sage-grouse should be proposed for listing.** It will make that determination in 2015 on the basis of all the information available to it then, including the state and federal plans now being completed. It will be guided by the recommendations of the COT report, which was a joint product of state and federal scientists.
- (2) Through the collective efforts of state and federal agencies, **avoiding the need to list the species under the ESA is an achievable goal.** The degree of cooperation that has characterized the work of the federal and state agencies over the last three years is unprecedented. If we continue to work together constructively, it is within our power to remove or adequately reduce the threats to the sage-grouse.
- (3) **“What is good for the bird is good for the herd.”** This recent remark by an Oregon rancher underscores the point that conserving the sage-grouse will have much broader benefits than simply helping that single species. Valued game species, such as mule deer, share many of the sage-grouse’s habitat needs and thus will benefit from efforts to conserve the grouse. Indeed, **the PACs that will be the primary focus of conservation efforts for the sage-grouse are generally congruent with the highest priority “crucial habitat” areas in the CHATs that WGA and the Western states have recently produced.**
- (4) **The states will be invited and encouraged to take part in the forthcoming “roll up”** of BLM and Forest Service plans, to ensure a comprehensive look at the extent to which key threats have been ameliorated in the PACs. This is essential since state and private land comprises a significant fraction of most PACs and a majority of the land in several PACs.
- (5) While all the states have been working hard through the Sage-Grouse Task Force and other means, **several states have made unique contributions.**
 - **Wyoming’s** core area strategy both led the way in building a conservation effort around the most important places, but also made effective use of the state’s many regulatory authorities to conserve those places;
 - **Nevada** is in the forefront of efforts to design a comprehensive and thoughtful approach to mitigation;
 - **Idaho** has embraced adaptive management in a rigorous way.
- (6) Through the work of the Task Force, **many good ideas have emerged regarding how we can better prevent fires and more effectively target our post-fire restoration efforts.** Our ability to implement those ideas will be greatly aided if together we can persuade Congress to enact bipartisan legislation that changes the way we budget for fire. The help of the Western Governors in securing that legislation is needed.
- (7) **Now is not the time to kick the can down the road,** as some have suggested. The chance we have this year and next to put in place meaningful conservation measures is the best chance to arrest and reverse the decline of an iconic game bird of the West and the habitat upon which it and much other wildlife depends.

ADDITIONAL Q & A

Q: What do you have to say about legislative proposals that would give the States more time to develop and implement their own solutions to sage-grouse conservation?

A: I disagree with those who suggest kicking the can down the road is the best approach to facing the challenges before us. The ESA has forced all of us to sit down together and work to solve a problem that is much bigger than sage-grouse. The disappearing sage brush and explosion of invasive species that fuel the fire cycle also threaten sage-grouse. They also threaten other iconic species like mule deer, elk and pronghorn as well as ranching and other activities that fuel western tradition and economic growth. Wyoming has shown that we best preserve our heritage and generate economic potential when we act boldly and decisively to make smarter, more strategic land management decisions that provide all land users with certainty. That is the example we are working together to emulate.

Q: Montana recently closed their greater sage-grouse hunting season because of declining population levels. What does this mean about the prospects for avoiding the need to list the sage-grouse? Are we now in the same position we were in for Lesser Prairie Chicken, Gunnison and Bi-state sage-grouse where population drives the outcome and no amount of conservation will suffice?

A: FWS will make its listing determination based on the sum total of the status of the bird, and the threats to the species and its habitat, across the entire range of the species. Greater sage-grouse populations appear to have declined in some portions of the range due to the recent drought and other factors, and Montana took this precautionary management step as a result. That said, there is no indication that the population is crashing, as was seen with the lesser prairie-chicken. Our focus for conservation continues to be on protecting the remaining large, high quality areas of habitat, i.e., the Priority Areas for Conservation (PACs), so that populations of the bird large enough to be resilient to drought and other natural stressors can be maintained across the range.

Q: Director Ashe keeps discussing a 4(d) rule. That makes us think he's already made up his mind about listing the bird. What is our incentive to keep working at this?

A: The Fish and Wildlife Service has made no decision and has no "leaning" on whether to propose the sage-grouse for listing. It will make that determination in 2015 on the basis of all the information available to it then, including the state and federal plans now being completed. It will be guided by the recommendations of the COT report, which was a joint product of state and federal scientists.

What Dan wants to make clear is that there is no downside to bold action with regard to a listing. If the federal government and all governors act to develop strong, science-based plans that serve to avoid the need to list, then we're all happy. But if some governors act and some don't, and the Service ultimately has to list the bird, a 4(d) rule can allow states with a sound conservation plan in place to continue to have the lead for managing the species.

Q: Fox News recently reported that the Service decision to list the Lesser Prairie Chicken has shut down oil and gas production in Western Kansas despite the rhetoric from the Service regarding flexibility and states' retention of authority. How do you respond to that?

A: Companies have a responsibility to prepare for changes in their business environment, too. The most recent statistics we have from WAFWA show that 117 different oil and gas companies have assessed the situation and made the business decision to participate in the Range-wide Conservation Plan, committing to carry out the conservation measures of the plan on 6.2 million acres of land that they manage or lease. That same avenue is readily available for any company operating in western Kansas.

Fire and Sage-Grouse Habitat Protection Measures

- The safety of firefighters and the public will always be our top priority, but the protection of Sage-Grouse and its habitat where they exist is the top resource priority. The BLM is and has been taking immediate, direct and measurable steps to reduce fire and invasive species threats to Sage-Grouse habitat.
- In core habitat areas with a history of large fires, we will aggressively seek to compartmentalize prime areas through strategic fuels management and creating firebreaks to minimize fire spread into those critical habitat areas. For 2015 we intend to increase the fuels treatment allocation percentage and amount of investment in core habitat.
- To stem the effects of changes in the fuels and fire regime, quick and aggressive post-fire stabilization and fuels treatments will provide a path to enhanced habitat conservation. Although sagebrush and preferred grasses are difficult to get established with more frequent fires, we will use competitive plant species, including non-native grasses and forbs, where necessary as a proven transition to a longer-term desired plant community.
- In 2014 we are directing 62 percent of our Fuels Program project capacity to Sage-grouse habitat conservation projects. This amounts to \$28 million in funding and approximately 240,000 acres of treatment. In 2014 we are investing 58 percent of our Healthy Lands Initiative funds to sagebrush ecosystems and landscapes. This amounts to over \$4.5 million. These funds are distributed between the Greater, the Gunnison, and Bi State population areas of habitat.
- To boost rural response capacity in Sage-Grouse habitat, and west-wide, managers and fire organizations will be encouraged to integrate Rural Fire Protection Associations and traditional Rural Volunteer Departments into their daily operations to the highest degree possible. We are committed to training support and coordination at a minimum. Where possible we will provide more material support.

High-Voltage Transmission Lines and Greater Sage-Grouse

- BLM is taking significant steps to address transmission project impacts to Greater Sage-Grouse and their habitats while land use plans are being amended or revised as part of an ongoing National Greater Sage-grouse Planning Strategy.
- BLM is also ensuring project developers comply with interim management guidance for sage-grouse that was issued in December 2011. This guidance specifies: Consideration of reasonable siting alternatives outside priority habitat or within designated corridors; identification of technically feasible best management practices; and consideration of regional mitigation opportunities.
- Thorough, project-specific environmental reviews are ongoing with input from the public, Tribes, and Federal, state and local cooperators.
- Project developers are preparing Habitat Equivalency Analysis (HEA) based mitigation in collaboration with BLM, Fish and Wildlife Service and state game and fish agencies.
- BLM is working with project developers to co-locate facilities within previously disturbed areas and designated corridors.
- BLM is working with project developers to identify routes that minimize impacts to Priority Areas for Conservation (PACs) for the Greater Sage-Grouse.
- For approved projects, BLM is enforcing strict timing controls on construction activities during sensitive periods (i.e. breeding, nesting, winter).

HIGH-VOLTAGE TRANSMISSION LINES AND ENERGY ISSUES

This topic is of particular interest to Governor Butch Otter (ID), Governor Brian Sandoval (NV), and Governor Gary Herbert (UT). During the WGA breakfast in February, Governor Herbert mentioned the need for certainty in Interior's resource management plans to encourage energy development in his state.

Governor Sandoval discussed transmission lines in his state at the February WGA breakfast. Governor Otter plans to discuss Gateway West and Boardman to Hemmingway transmission lines.

As the largest Federal land manager in the west, the BLM plays a significant role in planning energy corridors and siting transmission facilities. BLM administers over 107,000 rights-of-way for a variety of uses including transmission lines and pipelines. BLM is employing a “smart from the start” approach to identify areas of conflict and opportunity during planning to allow BLM managers to select the best areas for siting transmission facilities.

Since 2009, BLM has permitted 42 high-voltage transmission projects spanning over 2,300 miles on public lands. These projects provide capacity for renewable energy, improve grid reliability and support job growth. Since 2011, BLM has participated as a member of the Rapid Response Team for Transmission (RRTT) with the goal of improving coordination, expediting permitting and identifying lessons learned from seven priority pilot projects identified by the President. BLM is lead or co-lead agency on four of the priority projects. BLM currently has approximately 20 pending high-voltage transmission projects in several western states. Some projects are in sagebrush habitat.

Energy Corridors

The BLM, DOE, and USFS Work Group are collaborating to identify regions in the west to conduct reviews of corridors. The federal partners are focused on doing this right, including close coordination with states, tribes, local communities, and outside partners. This new approach is the right way to conduct corridor assessments, but it is also very resource intensive. With limited funds, the federal partners are currently consulting with WGA and various states in considering which regions to prioritize. Interest from states and commitments to work collaboratively on a corridor process will be key to successfully reviewing corridors of concern.

Transmission Project Summaries

- Gateway West Transmission Line (Idaho segments 8 & 9) * *RRTT Priority Project* - The project will address load growth in Idaho, Oregon, Utah, and Wyoming, improve the reliability and efficiency of utility systems, and tap renewable energy resources in Idaho and Wyoming. The project sponsors estimate 1,100 to 1,200 jobs will be created.
 - Challenges: Routes proposed across the BLM administered Morley Nelson Snake River Birds of Prey NCA in southern Idaho; finalizing Greater Sage-Grouse mitigation; finalizing Migratory Bird Conservation Plan
- TransWest Express Line * *RRTT Priority Project* - The project is designed to increase capacity for renewable energy generation consisting primarily of wind energy, including the Choke-Cherry, Sierra Madre Wind Farm near Rawlins, WY. The project sponsor estimates 1,035 to 1,550 jobs will be created.
 - Challenges: Finalizing Greater Sage-Grouse mitigation; potential crossing inventoried road less areas in National Forests; proximity to Nellis Air Force Base in southern Nevada; crossing Tuttle Ranch and proposed conservation easements in Colorado; co-locating project adjacent to existing projects and the Energy Gateway South project
- Boardman to Hemmingway Project **RRTT and PNWRIT Priority Project* - The Project would relieve pressure on the existing transmission system, improve electric reliability, provide additional energy capacity to meet demand in Oregon and Idaho, and provide service to wholesale customers. The project sponsor estimates 500 jobs to be created.

- Challenges: Project schedule being delayed due to inadequate Administrative DEIS; untimely and insufficient cultural, biological and visual resource data from environmental contractors; delays due to project developer financial commitments to support NEPA analysis and contractors; routes affecting Greater Sage-Grouse and habitat; limited flexibility in Oregon state siting policy for sage-grouse habitat; potential routes crossing irrigated agricultural lands and other private lands
- Energy Gateway South Transmission Project - The project is designed to provide redundancy to existing infrastructure and improve ability to provide reliable service to customers; support future load growth in Wyoming, Colorado, and Utah; provide increased transmission capacity for third-party transmission users.
 - Challenges: Proposed routes affecting Greater Sage-Grouse and habitat; finalizing Greater Sage-Grouse mitigation; crossing Tuttle Ranch and proposed conservation easements in Colorado; co-locating project adjacent to existing projects and the TransWest Express project; routes impacting private lands
- Vantage Pomona Transmission Project * *PNWRIT Priority Project* - The project is designed to eliminate redistributed loads and overloading of the adjacent transmission system; ensure continued reliable and efficient service to Yakima Valley and address potential reliability issues within the Mid-Columbia Transmission System.
 - Challenges: Potential visual impacts; private landowners desire to minimize routes on private lands; proposed route across Joint Base Lewis McChord Yakima Training center (JBLM-YTC) which is designated as a Priority Area of Conservation (PAC) for sage-grouse; minimizing impacts to cultural resources and properties for route crossing JBLM-YTC; analysis of a buried transmission line as a design alternative

FIRE

The Bureau of Land Management is working with local, state, and federal cooperators to ensure that we stop the majority of wildland fires in the first burning period. Areas of focus include: Using science-based decision support tools to anticipate the next problem areas; positioning fire suppression resources to where they will next be needed; approving severity funding allocations to temporarily increase fire suppression staffing; and conducting fire prevention activities including using education and fire restrictions where necessary.

This fire season is anticipated to be a challenging one due to overall drought conditions. Yet through the use of forecasting support tools, positioning resources where they're needed the most and efficient use of severity funding, BLM has contained about 96% of its fires during initial attack.

The combined efforts of local, state and federal agencies will continue to emphasize the safety of the public and firefighters, while also containing a high percentage of wildfires during initial attack without incurring unneeded risk. Below are several questions that you may encounter based on recent interest from several of our state partners:

Idaho:

Q. What kinds of relief can you provide for ranchers that have had to displace livestock based on the loss of forage in the 2012 fire season? Are there opportunities for forage banks or vacated allotments that can be a temporary source of forage?

A. All of the allotments in Idaho are currently under existing grazing permits and authorizations; at this time there are no opportunities for forage banks and there are no vacant allotments.

Utah:

Q. What are you doing to ensure that the collaborative landscape restoration efforts in Utah continue, especially in light of the BLM's new seed management process?

A. We are committed to our legacy of partnerships in Utah. Although the BLM has made some logistical modifications in the seed management process, we are going to continue to invest heavily in collaborative landscape restoration in Utah.

Special Mention:

- We are recognizing and remembering that this is the 20th anniversary of the Storm King Mountain burn over on the South Canyon Fire in Colorado where we lost 14 firefighters on July 6, 1994. Several commemorative events will be hosted in Colorado in the next month.
- We further remember that we are approaching the one year anniversary of the Yarnell Hill burn over in which 19 firefighters died. This was the single largest loss of life on a wildland fire since the 1930s. While we are still learning from both of these tragedies, the loss in both cases is fresh in our minds.
- Both of these fire entrapments have formed the foundation of this year's wildland firefighter refresher.

MITIGATION

In April, the Department's Energy and Climate Change Task Force provided the Secretary with a report summarizing a coordinated Department-wide evaluation and a strategy for implementing improvements in the Department's mitigation practices and policies. Based on the report's findings, various offices and bureaus of the Department have begun to implement policy and programs aimed at strengthening mitigation practices.

- FWS is in the process of revising its mitigation policies;
- BLM is implementing a draft Regional Mitigation Policy that will be updated and finalized consistent with the guidance contained in the Departmental report;
- BLM released its first regional mitigation plan for the Dry Lake solar energy zone (SEZ) and will conduct additional outreach to aid in designing future SEZ regional mitigation plans;
- BLM, FS, and FWS are working together to develop a mitigation strategy as a part of the larger Greater Sage-Grouse conservation initiative;
- USGS is leading efforts to develop geospatial data tools for landscape-scale mitigation and will be convening a workshop of partners later this year;
- The NPS is convening a workshop to develop guidance for mitigating impacts to cultural resources under Section 106 of NHPA and will also be convening experts to develop guidance for landscape-scale mitigation for preserving scenic values.

Q. How does this strategy impact work to conserve the Greater Sage-Grouse?

A. The BLM is nearing the final stages of amending 98 Resource Management Plans to account for conservation of the Greater Sage-Grouse. The bureau is already working closely with the FWS and states wildlife agencies to ensure that these final plan amendments contain robust provisions for mitigating impacts to Greater Sage-Grouse habitat. The BLM anticipates working closely with states to plan for and execute mitigation in these areas.

Q. How does this strategy relate to ongoing work by states, including state wildlife action plans and the Western Governors Association's (WGA's) Critical Habitat Assessment Tool (CHAT)?

A. State wildlife action plans, WGA's CHAT, and similar plans and strategies are useful in identifying the most ecologically important areas in a state, thus informing effective decisions regarding the

avoidance or minimization of impacts as well as the siting of compensatory mitigation measures. The statewide perspective that such plans provide will help facilitate the landscape-scale approach to mitigation that the strategy seeks to accomplish.

Q. What role will states have in determining the location and breadth of specific compensatory mitigation?

A. As noted above, State judgments about the relative ecological importance of particular areas, as reflected in their CHATs or state wildlife action plans, are expected to be important considerations in determining the location of compensatory mitigation measures. In addition, by becoming formal cooperating agencies in the NEPA process, states can help implement the Strategy with respect to all aspects of mitigation.

Q. How will this mitigation strategy be implemented in the field? Will staff be trained on how to implement the proposed mitigation strategies?

A. The principles outlined in this mitigation strategy will be incorporated into formal Departmental and bureau policy that will guide decision-making in the field. The strategy also calls for clear and consistent training for field staff based on these policy changes. Field staff have been closely engaged in drafting the strategy and will continue to be relied upon as the Department and bureaus develop these manuals, handbooks, and training modules.

Q. How does this mitigation strategy fit with Presidential initiatives to modernize the Federal review of infrastructure projects and to adapt to the impacts of climate change?

A. The Department believes that its Mitigation Strategy and the various actions planned to carry out the Mitigation Strategy are necessary components to the Department's ability to effectively implement the President's various initiatives relating to permitting efficiencies, large infrastructure project reviews, and climate change adaptation. All of these initiatives require federal agencies to take a landscape-scale approach to planning, permitting, and conservation, which is the fundamental purpose of Secretarial Order No. 3330 and the Department's Mitigation Strategy.

HYDRAULIC FRACTURING

Formal rulemaking to revise BLM regulations related to hydraulic fracturing on federal and Indian lands was initiated in May 2012 with publication of a proposed rule. A revised proposed rule was published in May 2013. During the most recent formal comment period, which closed on August 23, 2013, the BLM received more than 1.35 million comments.

Based on analysis of these comments, the BLM staff have suggested some modifications to the regulatory text and the preamble of the final rule for consideration, all of which are viewed by the Solicitor's office as logical outgrowths of the proposed rule. We expect to have a draft of a final rule, preamble, and accompanying analyses available to begin Departmental review within ten days.

The proposed rules have focused on addressing public disclosure, wellbore integrity and flowback fluid management as the key issues for sound hydraulic fracturing development. Most of these issues are not adequately addressed in the BLM's existing, 30-year-old regulations.

During the time this rule has been in development a number of states and tribes have issued or begun work on their own rules related to hydraulic fracturing. BLM has worked closely with the relevant regulatory officials as well as EPA to utilize their expertise on these issues. States with federal oil and gas development that have issued rules in this area are: California, Colorado, Montana, New Mexico, North Dakota, Texas, Utah and Wyoming. The rules vary considerably from state to state. Below are several key issues that may be discussed:

Well integrity - The issue is determining the best means of ensuring zonal isolation and competent cementing in the wellbore. Experts and commenters differ on various aspects of this issue, including the value of cement bond logs or cement evaluation logs as compared to other tests; testing necessary for surface casing as opposed to production and intermediate casing; and the utility of an individual "type well" in a formation in ensuring comprehensive well integrity.

Requiring the use of tanks for recovered water - The 2013 proposed rule would have required recovered water from HF operations to be stored in either lined pits or tanks. The current thinking is to strengthen that requirement by mandating storage in tanks in all instances unless an exception is specifically approved based on a robust set of criteria. This revised proposal may increase operational costs.

Definition of the term usable water - This definition is the trigger for determining which zones to be drilled require isolation. The current thinking is to clarify this definition and to utilize as much as possible the determinations about usable water developed by States and Indian tribes governing the water zones in their areas.

Public Disclosure - The rule intends to improve public access to information about the chemicals used during hydraulic fracturing of particular wells as well as locations of existing and proposed wells and information about other activities affecting the community.

Positions of Interested Parties

- **Government:** State Governors' offices generally question the need for the rule and some question BLM's authority. Some states believe hydraulic fracturing is already effectively regulated at the state level and that Federal regulations add an unnecessary layer of duplicate regulations. BLM officials met with state officials most recently on March 20, 2014, and had a productive exchange of views about the various state regulations and the BLM proposal, and about entering into MOUs that will efficiently administer these rules. The proposed rule provides that any state or tribal regulation that is equal to or more protective than the Federal rule will be applicable.
- **Private Citizens:** The public expressed a number of concerns and positions, which ranged from the request to ban hydraulic fracturing altogether (this view accounted for 95% of the 1.35 million comments received), to suggestions for ensuring the protection of groundwater, providing additional transparency for fracturing operations, and providing for prior disclosure of chemicals.

DROUGHT AND WATER ISSUES

Red River Valley Water Supply Project - In March 2014, Governor Dalrymple sent a letter to Deputy Secretary of the Interior Mike Connor regarding the Red River Valley Water Supply Project, and requested a Plan of Study put forth by the International Souris River Board (ISRB) to initiate a review of the water supply and flood operating plan contained in the 1989 Canada-United States Agreement for Water Supply and Flood Control in the Souris River Basin. A periodic review of the operating plan is required under the 1989 agreement. However, due to unprecedented flooding in the Souris River basin in 2011, basin residents have asked that additional flood protection measures be evaluated beyond what is currently provided under the 1989 agreement.

In order to move forward the Plan of Study requires approximately \$2.1 million in funding from the governments of Canada and the United States. The State Department is currently working with Canada in regard to funding and has been for some time with little movement. The Governor and Senator Hoeven are both strong supporters of moving forward with the Plan of Study and have requested Secretary of State Kerry's support.

Colorado River Basin Drought - Throughout history, there has never been a shortage condition determined in the Lower Basin (Nevada, Arizona and California). A shortage is deemed to occur when Lake Mead reaches elevation 1,075 feet. The elevation is currently around 1,089 feet, but is forecast to reach 1,081 feet by October. Reclamation met all water orders from U.S. water users in the Lower Basin and Mexico in 2013, and all delivery orders in the Lower Basin will be met in 2014. However, over the next 5 years, the potential for a shortage condition exists, with probabilities ranging from 22% in 2016, 51% in 2017, and 62% in 2018.

In water year 2014, snowpack in the Upper Basin peaked at 111% of average on April 7. Runoff is well underway and approximately 40% of the snowpack has melted. The probable forecast for water year inflow into Lake Powell is currently 100% of average. The current projected total Basin storage is approximately 51% of capacity for end of water year 2014.

Although the Basin States remain committed to continuing discussions, there does not yet appear to be a consensus on which actions should be pursued at this time. The Upper Basin States are pursuing a plan with 3 major components: operational adjustments, voluntary demand management (e.g. fallowing or deficit irrigation), and augmentation (primarily weather modification). The Lower Basin States are pursuing a 5-year plan consisting of "no regrets" actions beginning this year and voluntary reductions or other efforts to protect low Lake Mead elevations (somewhere between 1,000 and 1,020 ft). The Lower Basin States view a Federal commitment to decrease operational inefficiencies in the Yuma area as a key component to the plan. The Lower Basin States would also like Reclamation to fully engage in the process to develop the plan in more of a co-lead or full-partnership role.

Minute 319 - On May 15, the downstream edge of the environmental pulse flow of Colorado River water - released under Minute 319 - reached the tidal delta of the Pacific Ocean connecting the River with the Gulf of California for the first time in history as a purposeful environmental flow. This is considered a major achievement among the NGOs and scientists that have worked on Colorado River Delta issues over the past two decades. Delivery of the pulse flow began on March 23 from Morelos Dam, the last diversion dam on the Colorado River located at the U.S./Mexico border, and was completed on May 18th. Approximately 105,000 acre-feet were delivered in the form of a pulse flow to the Colorado River riparian corridor. Negotiating an extension of Minute 319 by December 2016 is a high priority, and we believe the pulse flow success will help pave the path to reaching an agreement.

Glen Canyon Dam - Drought conditions upstream of Lake Powell over the past two years have significantly reduced the elevation of Lake Powell. The declining elevation has reduced generation efficiency by approximately 10 percent. Generation at Glen Canyon Dam accounts for about 80 percent of the Salt Lake City Area/Integrated Projects (SLCA/IP). Reductions in generation at Glen Canyon Dam have a significant impact on SLCA/IP generation revenues available in the Upper Colorado River Basin Fund which fund operation and maintenance, salinity control, security, environmental related costs, and repayment obligations. Based on design criteria for the Glen Canyon generators, when Lake Powell drops below elevation 3,490 feet, power can no longer be generated. As of May 20, 2014, Lake Powell is currently 117 feet below full elevation of 3,700 feet and is 93 feet above minimum power pool (3,490 feet). Latest projections indicate that the first probability of reaching minimum power pool is water year 2018 (4 percent chance). Reclamation is actively partnering with the seven Colorado River Basin States to identify proactive steps to avoid reaching critical elevations at Lakes Powell and Mead.

Great Plains and Drought - Mountain snowpack in Colorado, Montana, and Wyoming remains well above average for this time of year. Cool temperatures have moderated the rate of snow melt, but the runoff is beginning with warmer temperatures. Precipitation in the Dakotas has been near normal this spring; however, with the large precipitation events in the fall and winter, spring runoff conditions are average, and normal for this time of year. In the climate outlook for June for this northern section of the Great

Plains Region, temperature is predicted to be below normal with above average possibility for higher precipitation occurring.

Northwest Area Water Supply (NAWS) Project - NAWS is a municipal and rural water project authorized by the Garrison Diversion Reformulation Act of 1986 and the Dakota Water Resources Act of 2000, and construction of project features began in April 2002. When complete, the project would deliver water from the Missouri River to communities and rural water systems in North Dakota located in the Hudson Bay Basin.

Construction continues on the Minot Water Treatment Plant Improvement Project. On March 1, 2013, Judge Collyer issued a ruling on the issue of whether to allow further work to be bid for continued construction of distribution facilities. The ruling will allow completion of the upgrades at the Minot Water Treatment Plant. However, the modified injunction “will not permit new pipeline construction or new pipeline construction contracts.” Progress continues on the preparation of the draft SEIS, and Reclamation plans to release the draft SEIS for a 45-day public review starting in late-June or early-July 2014. Public hearings will be hosted in Minot, ND, during the public review period.

Rural Water Projects – (ND and SD)

Since 1980, Congress has directed Reclamation to construct 13 individual rural water supply projects at a combined cost of more than \$2.3 billion. Projects have been authorized with varying local cost-share ranging between 0 and 25 percent. Federal law directs Reclamation to operate, maintain, and replace (OM&R) two projects authorized to benefit Tribes; including Garrison Diversion Unit in North Dakota and Mni Wiconi Rural Water System in South Dakota. Indian Rural Water Supply Project O&M costs rise as new project features are constructed – consuming an increasing share of Reclamation’s overall budget allocated to rural water projects.

Mni Wiconi Rural Water System (SD) – As of September 30, 2013, the Federal Government has committed 100 percent of its cost share toward completing the Project. The Core line and Lower Brule distribution system are complete. The West River/ Lyman-Jones distribution system, Rosebud distribution system and Oglala distribution system are nearing completion and construction is anticipated to be substantially complete in FY 2015.

Garrison Diversion Unit (ND) – As of September 30, 2013, the project was approximately 72 percent complete (as financially determined). The federally-funded portion of the project was approximately 69 percent complete. Work continues on (1) the State municipal, rural and industrial (MR&I) water supply program administered by the State of North Dakota, and (2) the Indian MR&I water supply program for the construction of five reservation-wide systems, including Standing Rock, Fort Berthold, Fort Totten, Turtle Mountain, and Trenton Indian Service Area.

Reclamation is preparing a Supplemental Environmental Impact Statement (SEIS) for the Northwest Area Water Supply Project as a means of complying with the U.S. District Court order issued in March 2010. The Garrison Diversion Unit is located within and affected by the Northwest Area Water Supply Project. Reclamation is planning to release a draft SEIS on NAWS in 2014.

Lewis & Clark Regional Water System (SD, MN, IA) – As of September 30, 2013, the Federal portion of the project was approximately 55 percent complete (as financially determined). The Water Treatment Plant, funded by the American Recovery and Reinvestment Act, was placed into service on July 30, 2012, and is delivering treated water to 11 of the 20 member entities. Due to limited Federal appropriations, the project is exploring options to accelerate construction with grants/loans from the Minnesota, Iowa, and South Dakota State governments. South Dakota and Minnesota passed legislation authorizing \$1 and 22 million grants respectively, and Minnesota enacted a \$45 million bonding authority for in-state project

beneficiaries. Lewis & Clark intends on using any future Federal appropriations to reimburse construction cost by repaying the entities that provide funding in excess of the non-Federal cost-share required in the authorizing legislation.

Next Steps - Continuing to evaluate OM&R budgets for Tribal Rural Water Projects to assure the reliable delivery of quality drinking water; continuing to prioritize federal funding for construction consistent with the Interim Final Funding Criteria for Rural Water Projects; continuing to work with Lewis & Clark Rural Water System to address questions/issues that need to be resolved to enable the project to proceed with construction with non-Federal funding.

LAND EXCHANGE VALUATION PROCESS

Governor Gary Herbert (UT) may want to discuss land exchange, particularly the appraisal process.

Governor Herbert could raise an issue with the length of time it takes to complete land exchanges between the Bureau of Land Management (BLM) and the State of Utah. The BLM and the State of Utah recently completed the Utah Recreational Land Exchange (URLEA), which was mandated by legislation.

The URLEA land exchange involved over eighty tracts of land totaling about 80,000 acres with values that included consideration of the potential for oil, gas, coal, tar sands, potash, and flagstone. The Office of Valuation Services, together with SITLA experts in Utah, developed a scope of work encompassing surface and sub-surface valuations, designed appraisal contract specifications, evaluated potential appraisers, and conducted joint mineral valuation and appraisal reviews. This valuation process stands as a model for how collaborative effort can successfully help achieve large-scale exchanges that benefit the land management goals of both the State and Federal governments.

There are a number of procedures that BLM must follow to ensure that land exchanges are in the public interest. The BLM is also required to follow the Uniform Standards for appraisals, to ensure that we obtain the fair value for the lands we exchange out of public ownership. The Department has had a long-standing position that the Uniform Standards for appraisals be used when Congress mandates a land exchange. The Governor may express the opinion that these processes are too time consuming. The BLM's position is that these processes are necessary to protect the public interest.

UNITED STATES EXTRACTIVE INDUSTRIES TRANSPARENCY INITIATIVE (USEITI)

Governor Matt Mead (WY) has expressed interest in discussing USEITI with you at this meeting.

You may want to mention your participation in the upcoming USEITI Multi-Stakeholder Group (MSG) meeting on June 10, 2014, regarding the EITI International Board's approval of the USEITI Candidacy Application. Since achieving Candidate Country status on March 19, 2014, the USEITI MSG convened its first meeting of 2014 on April 23-24, and began working on the details of domestic implementation. As a candidate country, the U.S. has three years to fully implement the international EITI standards and achieve "compliant" status.

It is anticipated that during this public meeting, the USEITI MSG will review options for a State and Tribal "opt-in" process. The development of this process is critical to addressing USEITI implementation concerns raised to Assistant Secretary Rhea Suh by the Western Governors' Association and the Interstate Mining Compact Commission, as well as an essential part of fulfilling the Department of the Interior's Indian Trust responsibility. The MSG is likely to discuss a plan to implement other key EITI requirements, such as project level reporting and the inclusion of income tax revenue and payments in USEITI reporting.

You may also wish to mention that on April 7, 2014, you appointed Mr. Michael D. Mathews upon recommendation by Governor Mead as an alternate member on the USEITI Advisory Committee. His term lasts until December 21, 2015.

MOUNT RUSHMORE

Governor Dennis Daugaard (SD) expressed interest in discussing with you the opportunity for a long-standing contract that would allow Mount Rushmore National Memorial to remain open in the event of a future government shutdown. NPS assumes the proposed contract would allow South Dakota to operate the park with State funds in the event of a cessation of Federal appropriations, as it did for four days during the course of the Federal shutdown in October 2013.

On October 1, 2013, the Federal government shut down for 17 days. Beginning on October 11, 2013, the National Park Service (NPS) entered into agreements with six States including South Dakota, to re-open national parks with State funds. States were required to fund the park or parks for no fewer than two days, to re-open with NPS employees, and to sign an agreement stipulating that no expended funds would be returned to the State unless Congress explicitly appropriated funding for that purpose. South Dakota signed an agreement with the NPS and transferred ten days worth of funding to operate Mount Rushmore on October 14, 2013. The park re-opened and operated with State funds for three days until Federal operations resumed on October 17, 2013. The NPS returned seven days' worth of unused funds to the State.

We appreciate the Governor's enthusiasm for ensuring that all visitors who arrive to visit Mount Rushmore National Monument have access to this spectacular site. However, we cannot support a long-standing agreement with a non-Federal entity to continue to fund a national park in the event of a future shutdown. In the case of a lapse in Federal appropriations, all policy decisions governing operations will be made during the event by the Administration in charge at the time (Similarly, we imagine a State governor cannot bind the financial or policy decisions of a future Governor). Such policy decisions are made under very specific circumstances that may not be repeated should we be unfortunate enough to encounter another shutdown.

We are also uncomfortable codifying an approach that would allow certain parks to re-open only because they are fortunate enough to reside in a State with the resources and political will to fund them. Further, had the shutdown lingered, the costs associated with reopening certain parks would have had to be revisited, as it is nearly impossible to divorce one park's operations from the regional and national offices that support that park unit with numerous administrative functions.

WILD HORSES AND BURROS

Governor Matt Mead (WY) may wish to discuss this issue with you.

In order to protect our public lands' natural resources and comply with the Act, the BLM has been conducting gathers to remove excess animals from the range as well as to administer various population growth suppressions methods, including fertility control vaccines. Prior to the economic slowdown that started about a decade ago, the BLM's Wild Horse and Burro Program (Program) was able to successfully adopt the majority of the animals removed from the range. However, adoptions have decreased markedly. It is increasingly difficult to find willing and qualified adopters and buyers.

On-range populations are nearly double Appropriate Management Levels (AML) and the BLM currently cares for nearly 48,000 animals off-range, costing \$46 million in FY 2013. This expense is limiting the

application of population growth suppression methods and the number of animals that can be removed, resulting in increasing overpopulation on drought stricken western rangelands.

The June 2013 National Academy of Sciences (NAS) Report provided BLM with multiple recommendations for program improvements. BLM has drafted a report that identifies how BLM will implement the recommendations and is also developing a long-term strategy for the achievement and maintenance of AML. Budgets have progressively increased from \$19 million in 2000 to \$77 million in FY 2014. Rising costs for holding increasing numbers of unadopted animals are the primary reason for budget increases.

Rock Springs Grazing Association

- Rock Springs Grazing Association (RSGA) owns and leases 48 percent of private land across four checkerboard Herd Management Areas (HMAs) in southern Wyoming.
- In October 2010, RSGA requested that BLM remove all wild horses on these private lands.
- In April 2013, BLM and RSGA entered Consent Decree requiring that BLM:
 - Remove all wild horses on private RSGA lands (except in White Mountain HMA);
 - Remove to low appropriate management level (AML) (251 in Salt Wells Creek HMA and 610 in Adobe Town HMA) and use fertility control to reduce population growth;
 - Gather and remove wild horses in Salt Wells Creek/Adobe Town Complex in 2013, Divide Basin HMA in 2014, and White Mountain HMA in 2015; and
 - Report population census by November 30 annually.
- In December 2013, the BLM finished the Adobe Town and Salt Wells Creek removals. The BLM has tentatively scheduled the Divide Basin removal for summer or fall 2014.
- The State of Wyoming is monitoring the results of Consent Decree; Governor's Office has informally requested AML information over the last several months.
- In 2003, BLM and State of Wyoming entered into a separate Consent Decree mandating removals within one year of population exceeding AML in each HMA.

GRIZZLY BEAR DELISTING

Governor Matt Mead (WY) sent a letter in May 2014 asking that the grizzly bear be delisted, and may wish to discuss this further at the meeting.

Q: What are your plans regarding the Grizzly Bear?

A: FWS is completing a threats analysis for the Yellowstone distinct population of grizzly bears. They expect to make a decision on whether to proposed to delist this population by late 2014 and, if so, to make a final delisting determination in 2015. FWS is also working with tribal, state and federal partners to complete a conservation strategy for grizzly bears in the Northern Continental Divide Ecosystem. Once this conservation strategy is complete, the Service will conduct a threats analysis and determine whether a delisting proposal is warranted for this population. If so, they would likely publish a proposed delisting.

Q: Is the FWS working on delisting of grizzly bears in the Northern Continental Divide Ecosystem (NCDE) in Montana?

A: The FWS is working with state, Tribal, and federal partners to complete the NCDE Conservation Strategy, which is the post delisting management plan. Completion of the Conservation Strategy is a Recovery Plan task. This document, once completed, will demonstrate the adequacy of regulatory mechanisms in order to address ESA Factor 4 for delisting. Upon completion of the Conservation Strategy, the FWS will complete a threats analysis for this population and make a determination as to if the threats to this population have been addressed. If the result of this threats analysis is that the threats to this population have been addressed, the Service will publish a proposed rule to delist this population.

Such a proposed rule could be published in late 2015, pending timely completion of the NCDE Conservation Strategy and a favorable threats analysis.

Q: Can the Cabinet/Yaak and Selkirk grizzly recovery zones be combined with the NCDE recovery zone so that all of them can be delisted together?

A: The conservation status of the Cabinet/Yaak and Selkirk grizzly recovery zones is much different than that of the NCDE recovery zone. These two populations are warranted for endangered status. A recent Wildlife Monograph concluded that the US recovery zones are not currently functionally connected demographically in such a way as to affect the internal population growth or vital rates through inter-population connectivity. Based on this information, these recovery zones cannot be considered a single population unit and recovered as one population unit at this time.

FEDERAL PERMIT STREAMLINING PROJECT

Governor John Hickenlooper (CO) and Governor Brian Sandoval (NV) sent a letter in April 2014 asking for reauthorization of the Federal Permit Streamlining Pilot Project.

Section 365 of the 2005 Energy Policy Act established a federal permit streamlining pilot project (Pilot Project) to increase coordination, reduce the time to issue APDs and improve environmental stewardship as a means to meet the nation's energy needs. The Act also established a funding mechanism/source that diverted 50 percent of the federal share of onshore lease rental receipts from the U.S. Treasury to the BLM.

It has been very successful in improving interagency coordination and reducing the time to process federal O&G APDs and ROWs. Without extension, the pilot project and the associated funding authority will expire in August of 2015. The BLM's FY 2015 President's Budget does not propose an extension of the funding mechanism for the pilot office fund; the BLM is currently evaluating options for addressing this situation in the FY 2016 budget.

In December 2013, Congress passed and the President signed H.R. 767, expanding the scope of the Pilot Project and providing additional discretion to the BLM. However, H.R. 767 did not include an extension of the funding.

On April 3, 2014, Governor Hickenlooper and Governor Sandoval sent Secretary Jewell a letter on behalf of the Western Governors' Association (WGA) requesting the Department's support for the reauthorization of the Pilot Project. The Secretary responded to WGA in a letter dated April 17, 2014, stating that the 10-year Pilot Project had been a success that allowed the BLM and its Pilot Project partner bureaus and agencies to more efficiently process oil and gas drilling permits and streamline associated environmental reviews, it provided BLM's oil and gas inspection and enforcement program with resources necessary to allow more thorough oversight of oil and gas operations, and the Department would work with Congress to provide additional flexibility nationwide to utilize the pilot office authority as permitting demands shift over time.

MASTER LEASING PLANS – OIL AND GAS

Master Leasing Plans (MLP) involve preplanning and intensive analysis of distinct geographical areas to avoid and minimize conflicts between oil and gas activity and recreation, water, air, cultural, and wildlife values. Some areas with high value resources need additional planning and analysis prior to issuing new or additional oil and gas leasing. The MLP process enables the BLM to take a focused landscape-level look at the decisions in Resource Management Plans (RMP) pertaining to leasing and post-leasing development of the area. This tool provides a vision for how future development will occur. The BLM is

developing MLPs both as part of the development of new RMPs, and as amendments to existing RMPs. Attached is a list of the MLPs currently under development in Western States.

Table 1. Status of the BLM's Master Leasing Plans

State	Resource Management Plan/Amendment	Status
CO	1 External Proposal	
	○ Shale Ridges and Canyons – part of the Grand Junction RMP Revision	Draft RMP published in January 2013; a Proposed RMP expected in FY14
	2 Internal Proposals	
	○ North Park – part of the Kremmling RMP-A	Proposed RMP published in March 2014. ROD expected September 2014. .
	○ South Park – part of the Royal Gorge RMP Revision	Draft RMP expected in December 2015. Proposed RMP expected in February 2017.
	1 Modified External Proposal	
○ Dinosaur Trail – part of the White River RMP-A	BLM modified the boundaries of the original Dinosaur Lowlands proposal to create the Dinosaur Trail proposal; Draft RMP-A published in September 2012; a Proposed RMP-A expected in early summer of FY14	
MT	1 Internal Proposal	
	○ Carter MLP – part of the Miles City RMP Revision	Draft RMP published in March 2013; Proposed RMPA is expected in FY14.
UT	4 Modified External Proposal	
	○ Book Cliffs Divide - Grand Valley - Cisco Desert MLP	Have not been initiated.
	○ Glen Canyon - San Juan River MLP	Have not been initiated.
	○ San Rafael River MLP	Have not been initiated.
	○ Vernal MLP - stand-alone analysis	A MLP in the Vernal Field Office appears to be likely for enhanced analysis related to the MLP process for fluid minerals, mainly oil development.
	1 Internal Proposal	
○ Moab MLP – stand-alone analysis	NOI for the RMP-A was published in March 2012; open house to update the public on draft alternatives was on May 14, 2014. Draft MLP in development; anticipate 90-day public comment period to begin February 2015. Publish NOA for Final MLP/EIS in November 2015. Issue ROD in February 2016.	
WY	5 External Proposals	
	○ Absoraka-Beartooth Front – part of the Bighorn Basin (Cody and Worland) RMP Revision	The Draft Final RMP is being prepared.
	○ Fifteen Mile Area (Worland) – part of the Bighorn Basin RMP Revision	
	○ Bighorn Front – part of the Bighorn Basin (Cody and Worland) RMP	

State	Resource Management Plan/Amendment	Status
	Revision	
	<ul style="list-style-type: none"> ○ Beaver Rim – part of the Lander RMP revision 	The ROD has been drafted but is on hold for signature at WO direction. The Final EIS was published last year.
	<ul style="list-style-type: none"> ○ Little Mountain – part of the Rock Springs RMP revision 	Draft MLP in development.

FY – Fiscal Year

NOA – Notice of Availability

ROD – Record of Decision

RMP – Resource Management Plan

RMP-A – Resource Management Plan Amendment

TRIBES

Governor Steve Bullock (MT) sent a letter in October 2013 regarding federal recognition for the Little Shell of the Chippewa Tribe. During the WGA breakfast in February, Governor Bullock mentioned law enforcement challenges in Indian country.

Little Shell Tribe of Chippewa Indians of Montana

The Little Shell Tribe of Chippewa Indians of Montana (Little Shell) is made up of the descendants of Métis Indians (mixed-blood, or half-blood, Indians and often the offspring of French fur trappers and Indian mothers), and was historically treated different than other Pembina Indians by the US because of their mixed-blood heritage. The US government refused to deal with Métis Indians because it viewed them as having Indian ancestry, but not being Indian, which in turn forced the Métis ancestors of the Little Shell tribe to seek other Métis settlements on the outskirts of towns like Helena, Great Falls, and Butte, MT.

In 1978, Little Shell first submitted its intent to petition the Federal government for acknowledgment as an Indian tribe under Federal law. In 1995, their petition was complete, beginning a long review process by the Office of Federal Acknowledgment. Earlier this year, AS-IA agreed to suspend reconsideration of the issues referred from the IBIA until after the promulgation of newly revised regulations on the Federal acknowledgment process, which is currently underway.

The Department recently published a Proposed Rule in the Federal Register, which revises the Part 83 regulations on Federal acknowledgment. After all public comments are received a final rule may be drafted. The Office of the AS-IA has asked that Little Shell request within 90 days of publication of the final rule for us to begin reconsideration of its petition under the grounds referred to the Department by the IBIA, and any new grounds which may result from changes in the regulations. The Little Shell tribe's petition for Federal acknowledgment has the support of its sister tribes in Montana, the Governor's office and the State of Montana, which recognized the Tribe in 2000.

Law Enforcement Issues

On July 29, 2010 the President signed the Tribal Law and Order Act of 2010 into law. There are several requirements specific to the United States Department of the Interior (DOI) or the Bureau of Indian Affairs, Office of Justice Services (OJS). One such requirement is that the OJS submit to the appropriate committees of Congress, for each fiscal year, a detailed spending and unmet needs report regarding tribal public safety and justice programs.

State of Montana funding (FY 2012)

	<i>Actuals</i>	<i>BIA Estimate of Unmet Need</i>
<i>Criminal Investigation & Police</i>	\$15,553,374	\$8,748,209 = 34% unmet
<i>Detention</i>	\$9,388,285	\$7,254,249 = 38% unmet

Montana Tribes

- Crow Agency - Tribal leadership feels the agency is not adequately staffed for the amount of acreage and population. They have requested that our allocated funded positions be increased to meet the demands on the Crow Reservation. They are also concerned with the length of time it takes to hire police officers and get them on board.
- Northern Cheyenne Agency - Tribal leadership is concerned with the recent turnover in employees, as well as the length of time it takes to hire and train new officers.
- Blackfeet - The current and ongoing conflict at this agency has consumed most of their time. They are also concerned with funding.
- Funding is the primary concern for the following: Fort Belknap, Fort Peck, Rocky Boy.

ABANDONED MINE LAND (AML) FUNDING

Governor Matt Mead (WY) may wish to discuss this with you. He sent a letter in May 2014 regarding the review and reversal of OSM's decision on AML funding to Wyoming.

Governor Mead's letter requested reconsideration of our estimate that Wyoming will be allocated approximately \$53.8 million in AML funding in Fiscal Year 2015. After review and consultation with the Office of the Solicitor at the Department of the Interior, we conclude that OSMRE's interpretation of the Surface Mining Control and Reclamation Act of 1977 (SMCRA), as amended, is correct. There is a response letter currently making its way through the surname process at Interior.

INVASIVE SPECIES

WGA Chairman John Hickenlooper's (CO) staff indicated that Governors may ask you about invasive species efforts.

A number of western states have expressed dissatisfaction with the federal level of support and coordination to control and prevent the spread of invasive species. The WGA has called invasive species "... one of our country's biggest environmental problems" in a recent WGA resolution that expresses concerns over the continued introduction and spread of invasive species in Western states, including:

- the perceived lack of coordination among federal agencies;
- the need to prioritize resources to focus on those species with the greatest potential to cause economic harm;
- the importance of linking invasive species management to broader Departmental and Administration goals.

Invasive Species Examples

Global damage from invasive species is estimated at upwards of \$1.4 trillion or about 5 percent of the global economy. Examples for the western US:

- Cheatgrass is estimated to infest over 56 million acres across 17 western states impacting rangelands, changing the native plant community, and increasing fire frequency. This grass can produce more than 10,000 plants per square yard leaving behind thick dry fuels and creating

extreme wildfire hazards. With each new fire, cheatgrass reseeds to further change the native plant community and increase fire threats.

- Quagga and zebra mussels have spread from the Great Lakes to much of the U.S., clogging water intake and delivery pipes, infesting hydropower infrastructure, and negatively impacting native species. An annual loss of \$22 million is estimated for the Lake Tahoe region if quagga or zebra mussels become established there. Funding for quagga and zebra mussel prevention and coordination has been included within the FY 14 President's Budget.

Ongoing Initiatives at Interior

Interior agencies are working to cooperate and coordinate more closely to enhance invasive species prevention and control programs through existing agency programs as well as working on a multi-agency and multi-departmental basis through the National Invasive Species Council (NISC) - which you co-chair - and the Aquatic Nuisance Species Task Force (ANSTF) co-chaired by the FWS and NOAA. NISC and ANSTF have established a federal working group to strengthen and harmonize policies and regulations to stop the introduction of invasive species onto or off of DOI lands - especially invasive zebra and quagga mussels in western states. The Pulling Together Initiative, administered by the National Fish and Wildlife Foundation with funding from the Bureau of Land Management, the US Fish and Wildlife Service and the Forest Service, fosters local cooperative weed coalitions to improve the effectiveness of local invasive plant programs.

Interior recently approved the Invasive Species Action Plan to target limited resources more effectively and efficiently. This approved Action Plan includes 5 recommendation areas and 25 action items that will help Interior get our house in order on this important issue. Some topline items include:

- The development of a multi-year strategy with annual operations plans to guide improved alignment of invasive species programs and to provide regular briefings for the Department's senior leadership.
- The development of a Departmental policy providing guidance to more effectively align and execute resources in support of invasive species prevention, detection, rapid response, and control.
- Coordination of a departmental informational management effort on invasive species to create efficiencies and eliminate duplication. This would include an effort to better standardize data collection and increase transparency. And;
- The development of an EDRR framework for invasive species that outlines protocols and guidance for the allocation of resources.

Next Steps

- Streamline the FWS injurious species listing process to keep harmful species out of the nation.
- Partner with NFWF to support actions to address early those invasive species not yet widely established through Early Detection and Rapid Response.
- Strengthen existing regional coordination efforts (e.g. the Pacific Islands and Everglades) and build new regional efforts (e.g. the Arctic and Great Lakes) as appropriate to enhance our ability to address invasive species threats and damages.
- Early in 2014, the WGA wrote to the co-chairs of NISC (including you) expressing interest in working with NISC on the revision of the National Invasive Species Management Plan. NISC and WGA staff held a conference call in late March 2014 to discuss this issue. NISC looks forward to working with WGA on the management plan update this summer or in early fall.

MARIJUANA

Background

Cultivating marijuana is illegal under the Federal Controlled Substances Act of 1970 (CSA). Several Western states have decriminalized production/use of marijuana. Reclamation recently issued a Temporary Reclamation Manual Policy to address the potential use of Reclamation water (or facilities to convey other entities' water) used to irrigate marijuana.

Discussion

After consulting with the DOI Solicitor's Office and the Department of Justice, Reclamation has concluded it has an obligation to operate its facilities in a manner consistent with the CSA. The application of the CSA to Reclamation projects is founded in Section 8 of the 1902 Reclamation Act which requires the federal government follow state law when acquiring water rights for Federal reclamation projects and distributing project water, unless the relevant state law conflicts with an express congressional enactment (such as the CSA).

Policy

Reclamation will: (1) not approve requests for use of its facilities or water to cultivate marijuana; (2) report such uses to DOJ if they become known to Reclamation; and (3) compile/maintain records of all activities/communications regarding known or potential prohibited uses of its water or facilities. *Note:* Commingling of Reclamation and non-Reclamation water in non-Federal facilities does not subject the non-Reclamation water to the restrictions on Reclamation water and facilities addressed in the Policy.

DOI in the News:

GROUPS SUE TO FORCE APPROVAL OF IZEMBEK ROAD. The E&E Daily (6/4) reports that "Alaska Natives, the city of King Cove and its surrounding borough today filed a complaint in the US District Court for the District of Alaska claiming" the Interior Department "violated a handful of federal laws last December when it rejected a proposed one-lane gravel road through the Izembek National Wildlife Refuge." They are "asking a judge to force Interior to take some action to ensure the safety of King Cove residents, who without a land route through the refuge must often take risky plane or boat rides for emergency medical help." The lawsuit "accuses Interior of violating the Administrative Procedure Act, National Environmental Policy Act, Alaska National Interest Lands Conservation Act, and Interior's trust responsibility to American Indians and Alaska Natives." It also claims Interior "violated the omnibus public lands bill Congress passed in 2009 requiring an evaluation of the road and an associated land swap."

Also reporting on the story is the AP (6/5, Joling), which was picked up by the Minneapolis Star Tribune (6/5, Joling, 1.48M), the Sacramento (CA) Bee (6/4, 687K), the Olympian (WA) (6/4, 119K), ABC News (6/5, 3.58M),

and KTVA-TV Anchorage, AK (6/5, 1K).

Additional coverage was provided by the Washington Post (6/4, 4.22M), the Washington Times (6/5, Richardson, 455K), Reuters (6/5, Quinn), the Anchorage (AK) Daily News (6/4, 251K), the Alaska Business Monthly (6/5), the Alaska Public Radio Network (6/4, 2K), and KUCB-FM Unalaska, AK (6/5).

SECRETARY JEWELL TO TOUR JAMESTOWN. The AP (6/5) reports that Interior Secretary Sally Jewell is "heading to Jamestown to highlight climate change's threat to the first permanent European settlement in America." Jewell is "scheduled to tour the island Thursday then participate in a discussion of rising seas and Jamestown's future." Her "tour of the 1,600-acre island on the James River will include areas that have experienced flooding or are threatened by rising seas."

Coverage was also picked up by WSET-TV Lynchburg (VA) Lynchburg, VA (6/5, 17K), WWBT-TV Richmond (VA) Richmond, VA (6/5, 48K), WTOP-FM Washington (DC) Washington (6/5, 172K), and WDBJ-TV Roanoke (VA) Roanoke, VA (6/5, 24K).

LACK OF OPEN SPACE FOR BISON HURTS RESTORATION EFFORTS. The Denver Post (6/5, Finley, 940K) reports that the lack of open space for bison to roam is hurting federal efforts to restore herds, forcing refuge managers to kill hundreds of bison and look for land links between protected areas. However, the bison on fenced preserves continue to multiply. Interior Secretary Sally Jewell says she is working on ensuring large landscapes nationwide, increasingly by collaborating with private property owners. In an interview, Jewell said, "One of our biggest challenges across the entire country is habitat fragmentation. It certainly has impacted the bison."

INVESTIGATORS FIND "INAPPROPRIATE" BEHAVIOR BY FORMER ASSISTANT INTERIOR SECRETARY BABAUTA. McClatchy (6/5, Doyle, Subscription Publication, 23K) reports that former Assistant Interior Secretary Anthony Babauta "acted 'unprofessionally' and engaged in some 'inappropriate' behavior, Interior Department investigators conclude in a newly released report." According to the article, "in a 32-page report, the Interior Department's Office of Inspector General detail the myriad allegations and findings concerning Babauta, who formerly oversaw the Interior Department's Insular Affairs operations." Investigators stated, "Interviews with current and former (Office of Insular Affairs) employees support that Babauta made inappropriate comments to employees and conducted himself unprofessionally at times."

The Pacific News Center (6/5) reports that "in response to a critical report" from the Department of Interior's Inspector General, former Assistant Secretary for Insular Affairs Tony Babauta released a statement. Babauta said, "I have reviewed the final investigation report conducted by the Department of the Interior's Office of Inspector General and I am satisfied it reaffirms that my official acts and decisions as Assistant Secretary of the Interior for Insular Areas were legitimate endeavors to improve the quality of life for areas under my responsibility."

Also reporting on the story are the Pacific (GUM) Daily News (6/5, 61K) and the Pacific News Center (6/5).

WESTERN REGULATORS JOIN BATTLE OVER EPA'S PROPOSED CARBON REGULATIONS. The E&E Daily (6/4) reports that "Western utility commissioners in coal-heavy states joined the fray yesterday over US EPA's proposed carbon regulations for existing power plants." The article notes that "Montana regulators, in particular, piled onto the proposal at the Western Conference of Public Service Commissioners meeting here, saying it would increase electricity costs and regulatory complexity." However, Ralph Cavanagh, senior attorney at the Natural Resources Defense Council, "sprang to the rule's defense." He said, "The notion that someone can look at this and say it's a job-killer or the end of the quality of life we've all enjoyed together ... is just crazy."

Meanwhile, the E&E Daily (6/4) reports that "even as environmentalists lined up this week to cheer for US EPA's proposed carbon limits on power plants, some outside-the-Beltway green groups that have taken leading roles in the fight against Keystone XL are raising concerns that the Obama administration did not go far enough." According to the article, "the hesitance among some climate activists to fully embrace EPA's plan is tempered by their hopes to push for a stronger target than the envisioned 30 percent emissions cut from existing power plants by 2030 before the rule is finalized next year." The article notes that "smaller green groups are liberated from the need for pragmatism as they push the administration to act more aggressively, on both coal and KXL, but their leaders are reluctant to be too harsh on EPA."

UTAH WILL LET DEADLINE FOR ACTION ON FEDERAL LAND TAKEOVER PASS BY. The E&E Daily (6/4) reports that Utah "set a Dec. 31 deadline for the federal government to relinquish millions of acres of public land to the state, but it will watch that date fly by without a lawsuit or solid plan of action." Utah's Assistant Attorney General Tony Rampton told the state Commission on Federalism on Tuesday that "it wouldn't be wise to file a lawsuit or push a specific plan because some of the facts aren't clear and more coalition-building needs to be done."

Also reporting on the story are the AP (6/5) and the Salt Lake (UT) Tribune (6/5, 470K).

REPUBLICANS WANT MORE NATIVE CONTROL OF COBELL BUYBACK PROGRAM. The Indian Country Today Media Network (6/4, 45K) reports that ten Republican members of Congress have sent Interior Secretary Sally Jewell "a new letter saying that they want her department to strengthen the land buyback portion of the Cobell settlement in ways that would give tribes more control." The lawmakers wrote, "As was aired during an April 3, 2014 Subcommittee on Indian and Alaska Native Affairs hearing, a major criticism of the roll-out of the program is the Department's insistence that it is without authority to permit the tribes to carry out what are in reality the most important functions relative to the program. These functions include making final offers to willing sellers, rendering payment for interests sold, and others."

KACHEMAK BAY WATER TRAIL TO BE CELEBRATED. The Homer (AK) News (6/4, 9K) reports that on Friday, dignitaries from the Interior Department, the NPS, the National Oceanic and Atmospheric Administration, and Alaska State Parks will visit Seldovia and Homer for official ribbon-cutting ceremonies for the Kachemak Bay Water Trail

FEDERAL RECOGNITION OF NATIVE HAWAIIAN GOVERNMENT CRITICIZED. For the Daily Caller (6/5, Akina, 408K), Keli'i Akina, President, Grassroot Institute of Hawaii, writes that the Interior Department's advance notice of proposed rulemaking in "its process of paving the way for federal recognition of a race-based government" of Native Hawaiians "represents an egregious overreach of executive power." Akina claims that "the executive branch is using the construct of a native tribe to attempt an end-run around both the Supreme Court and Congress." In conclusion, Akina argues that "not only would this open the door to other groups to petition for special legal status based on their standing as a racial community, but it would force a reconsideration of how far the equal protection of the Constitution can actually reach."

The piece also appears at the Hawaii Free Press (6/5).

America's Great Outdoors:

National Park Service:

NPS SEEKS TO REPAIR RELATIONSHIP WITH RANCHERS IN POINT REYES NATIONAL SEASHORE. The E&E Daily (6/4) reports that the NPS is "hoping to repair its relationship with ranchers in a California park, after the agency's fight with a local oyster farm fueled tension and government mistrust." NPS officials "plan to set things right with a 20-year ranch management plan" for the Point Reyes National Seashore that "will lay the groundwork for long-term leases and consistent agricultural policy." The article notes that "when it's complete, NPS will offer 20-year leases to the half-dozen historical ranches and dairies that occupy the park's 'pastoral zone.'"

CUYAHOGA VALLEY NATIONAL PARK SEEKS INFORMATION ON HAZMAT DUMPING. The Cleveland Plain Dealer (6/5, 1.06M) reports that the NPS and Ohio Environmental Protection Agency are "asking for help from the public to track down who dumped containers of hazardous materials along Ira Road in the Cuyahoga Valley National Park last October." According to the article, "we've 55-gallon drums and 30 smaller containers were found in a ditch Oct. 30." Mary Pat Doorley, a spokeswoman for the national park, said "authorities are reaching out seven months after the incident because an unspecified reward is now available."

BOY BECOMES YOSEMITE PARK RANGER FOR DAY THROUGH MAKE-A-WISH FOUNDATION. TIME (6/5, 24.1M) reports that eight-year-old Gabriel LaVon-Ying became Yosemite National Park's Honorary National Park Ranger on Tuesday through the Make-a-Wish Foundation. LaVon-Ying "put out a fire and participated in a mock

search-and-rescue for an injured hiker, all as part of an experience organized by the Make-A-Wish chapter of Central and Northern Florida.”

Also reporting on the story are the New York Daily News (6/5, 4.36M) and WRC-TV Washington (6/5, 312K).

KIOSK DEDICATED AT NEW PHILADELPHIA TOWN SITE. The AP (6/5) reports that “a western Illinois site that was the first town founded by an African-American has a new informational kiosk, and a lawmaker hopes a national park designation soon follows.” Rep. Aaron Schock “attended Tuesday’s dedication of the kiosk at the New Philadelphia Town Site near Barry in Pike County.” Shock “sponsored federal legislation calling for a study to find out the area’s national significance has passed the House and is being considered by the Senate.”

WYOMING PAYS FOR EDUCATION OF YELLOWSTONE STUDENTS. The AP (6/5) reports that Wyoming will “pay a Montana school district nearly \$500,000 for educating students who live in Yellowstone National Park.” Gov. Matt Mead said “state emergency funds will be used to pay the 2013-14 tuition of about 40 students living in Mammoth Hot Springs, which is inside Yellowstone on the Wyoming side.” The NPS had been “paying Gardiner to educate these students, but those payments were recently stopped.”

ADDITIONAL COVERAGE OF CIVIL WAR SKULL AUCTION. Additional coverage of the controversy over the planned auction of a Civil War veteran’s skull was provided by ABC News (6/5, 3.58M), the Los Angeles Times (6/5, Dave, 3.46M), the Alabama Live (6/5, 75K), and the Latin Post (6/4).

Bureau of Land Management:

BLM DATA: NEVADA RANCHER BUNDY OWES MORE THAN ALL OTHER RANCHERS COMBINED. The E&E Daily (6/4) reports that Nevada rancher Cliven Bundy “owes more money to the federal government than what all other ranchers owe collectively in late grazing fees, according to new data obtained from the Bureau of Land Management.” According to the numbers, “of the roughly 16,000 ranchers who graze cattle on BLM lands, 458 have late grazing bills totaling \$237,000.” But Bundy owes more than \$1 million “for refusing to pay grazing fees on his Bunkerville, Nev., allotment beginning in 1993 and for trespassing fees he has been accruing since 1998.”

BLM COMPLETES LAND TRANSFER FOR ALASKA VILLAGE. The AP (6/5) reports that the BLM says “it has completed a land transfer for an Alaska Native village.” The bureau announced Wednesday that “the signing of the final patent for more than 8,780 acres fulfills the land entitlement for Chuathbaluk under the 1971 Alaska Native Claims Settlement Act.” The land transfer was made to the Kuskokwim Corp.

SAN JUAN COUNTY TO SUE BLM OVER LACK OF ACTION ON RECAPTURE CANYON. The San Juan (UT) Record (6/5, 1K) reports that “seven years after the emergency closure of Recapture Canyon by the Bureau of Land Management (BLM), the San Juan County Commission has decided to pursue legal action.” On June 2, the Commission “voted 2-1 to sue the BLM for the lack of decision regarding Off-Highway Vehicle (OHV) access in the canyon.”

ENVIRONMENTAL GROUPS UPSET OVER OFF-ROAD PLAN IN ARIZONA. The E&E Daily (6/4) reports that “a coalition of environmental groups say they’re upset that the Forest Service has proposed formally establishing more than 3,500 miles of off-road trails in the massive Tonto National Forest just north of Phoenix.” However, the Forest Service “states in a recently released draft environmental impact statement (EIS) that the proposed motorized travel management plan is necessary to keep off-highway vehicles (OHV) on designated roads and trails, away from natural and cultural resources across the nearly 3-million-acre forest.” The article notes that “the issue over the first-ever forestwide motorized plan at Tonto National Forest has once again sparked debate over the multiuse mandate governing national forestland and the need to balance resource protections with public access.”

Fish and Wildlife Service:

SENATE PANEL HEARS TESTIMONY ON JOBS IMPACT FROM CLIMATE CHANGE. The E&E Daily (6/4) reports that Senate Environment and Public Works subcommittee heard about the impact the changing climate on fishermen, farmers, ranchers, foresters, and sportsmen. FWS Director Dan Ashe said “climate change is

already stressing waterfowl, fish and big-game species and is 'darkening the prospects for hunters and anglers tomorrow.'"

FWS CONSIDERING RELOCATING D.C. BOOTH HISTORIC NATIONAL FISH HATCHERY AND ARCHIVES.

The AP (6/5) reports that "federal officials say the D.C. Booth Historic National Fish Hatchery and Archives in South Dakota is again on the chopping block." The FWS says "it is considering relocating the archives from the Spearfish facility out of state because of budget priorities."

Also reporting on the story is the Black Hills (SD) Pioneer (6/5, 11K).

TRADE GROUPS CRITICIZE PROPOSED IVORY REGULATIONS. The McPherson (KS) Sentinel (6/4, 12K) reports that "new federal regulations to block the sale of ivory to protect endangered elephants" will affect "musicians, antiques collectors and dealers, gun collectors and others whose ability to sell, repair or travel with legally acquired ivory objects." The article notes that "trade groups opposing the regulations include the National Association of Music Makers, the Art and Antiques Dealers League of America and the National Rifle Association." The critics claim the "rules are confusing, unfair and should be rewritten to account for ivory that came into the country long ago."

KANSAS SEEKS FEDERAL HELP TO PAY FOR LESSER PRAIRIE CHICKEN PROTECTIONS. The E&E Daily (6/4) reports that Kansas is "pushing back against new protections for the lesser prairie chicken." Gov. Sam Brownback said "he is asking the federal government to help pay for the costs of protecting the prairie chicken by expanding a conservation program that pays farmers not to cultivate land where the birds live." Brownback also said "Kansas and three other states will return to federal court this week to request more time for farmers, energy producers and others to respond to the government's decision to list the species as threatened."

RAVENS EXAMINED IN BATTLE TO SAVE SAGE GROUSE. The E&E Daily (6/4) reports that "in the race to save the greater sage grouse from becoming a threatened or endangered species, state and local officials are increasingly turning their attention to a lesser-known culprit: the common raven." The article notes that "Idaho and counties in northwest Utah and northeast Nevada have proposed shooting or poisoning ravens to prevent the omnivorous opportunists from devouring sage grouse eggs, which may be nudging the ground-dwelling birds closer to extinction." However, "environmental groups have loudly opposed those plans, arguing there's little evidence that controlling ravens is a viable or cost-effective way to bolster sage grouse."

CLIMATE CHANGE HELPS RED SPRUCE RECOVERY. The E&E Daily (6/4) reports that "climate change is fueling a red spruce comeback in the northeastern United States after decades of acid rain was thought to have devastated the species beyond recovery." According to the article, "more carbon dioxide in the atmosphere, higher temperatures and longer growing seasons are all helping the species grow faster up and down the East Coast."

ENVIRONMENTALISTS SUE EPA FOR PESTICIDE APPROVAL. The E&E Daily (6/4) reports that environmentalists have "filed suit against US EPA for approving a pesticide that could potentially harm nearly 1,400 threatened and endangered species." In January, the EPA's Office of Pesticides "gave its final approval for the insecticide cyantraniliprole to be used as an active ingredient." The lawsuit claims that "though EPA had determined that the pesticide could affect up to 1,377 federally protected species, it failed to consult with biologists from the Fish and Wildlife Service and the National Marine Fisheries Service prior to its approval."

DRUG SMUGGLERS' VEHICLE MADE TO RESEMBLE FWS TRUCK. The AP (6/5) reports that a truck made to resemble a Fish and Wildlife Service vehicle that contained \$1.6 million worth of marijuana has been seized by Border Patrol agents in Arizona near the Mexican border, authorities said on Wednesday. Agents spotted the white truck with FWS "decals along a boundary fence in Douglas, Arizona, on Monday, while responding to reports of possible drug smuggling."

Reuters (6/5, Schwartz) quotes Border Patrol spokesman Peter Bidegain saying that "cloned" vehicles are not unusual, but that the level of detail in this particular example was of exceptional quality.

Also reporting on the story are the Arizona Daily Star (6/5, 389K) "Police Beat" blog and The Inquisitr (6/5, 50K).

WANDERING OREGON WOLF FATHERS PUPS. The AP (6/5, Bamard) reports that "Oregon's famous wandering wolf has fathered pups with a mate in the southern Cascade Range – the first confirmed wolf pack in those mountains since the 1940s, officials said Wednesday." Biologists "made the determination after traveling Monday to a site in the Rogue River-Siskiyou National Forest east of Medford, where photos and a GPS tracking collar showed the wolf known as OR-7 has been living with a mate." Scientists "saw two pups peering out from a pile of logs and may have heard more, the US Fish and Wildlife Service and Oregon Department of Fish and Wildlife said."

Also reporting on the story are the Spokane (WA) Spokesman-Review (6/4, 210K), the Salem (OR) Statesman Journal (6/4, 20K), and Reuters (6/5, Sebens).

CALIFORNIA'S BROWN PELICANS SUFFER POPULATION DROP. The E&E Daily (6/4) reports that "only five years off the endangered species list, California's brown pelicans have biologists worried again." According to the article, "returning from his 46th year counting breeding pairs of the birds on islands in Mexico's Gulf of California, wildlife biologist Daniel Anderson of the University of California, Davis, said he had found fewer pelicans than ever before." Anderson said, "It's a complete failure to breed; it's a bust; the bottom dropped out. But those birds will be back again, I'm sure. We've seen cycles like this before, although nothing as drastic as this breeding season."

Securing America's Energy Future:

Renewable Energy:

BOEM ISSUES FIRST LEASE TO DRAW POWER FROM CURRENTS OFF FLORIDA COAST. The E&E Daily (6/4) reports that the BOEM "issued a lease to Florida Atlantic University yesterday for a first-of-its-kind facility to test devices powered by the ocean's currents." According to the bureau, "the new test site is part of the Obama administration's Climate Action Plan to develop domestic clean energy sources and reduce greenhouse gas pollution." Walter Cruickshank, BOEM's acting director, in a statement, said, "This is the first time a lease has been issued to test ocean current energy equipment in Federal waters. The Gulf Stream contains a tremendous amount of energy, and this technology offers exciting potential to expand the nation's renewable energy portfolio."

Also reporting on the story are the Penn Energy (6/5, 128), the National Geographic (6/4, 42.25M), the UPI (6/5), and the Green Energy News (6/5).

RUIDOSO COUNCIL HEARS SUNZIA PRESENTATION. The Alamogordo (NM) Daily News (6/5, 19K) reports that Lance Grace, who is considered an expert on the White Sands Missile Range, "laid out the reasons for military objections to the proposed route of the SunZia wind power transmission line for Ruidoso village councilors last week." Councilors "requested the background information, but did not take an official position on the issue, because the item was not listed on the regular agenda for action." According to the article, "while Grace said he favors the SunZia project, he opposes the route through the missile range."

Onshore Energy Development:

BLM RELEASES FINAL REPORT ON ESCALANTE OIL SPILL. The E&E Daily (6/4) reports that the BLM "won't punish a well operator and doesn't immediately plan to clean up oil spilled at Utah's Grand Staircase-Escalante National Monument, according to a report the agency." Larry Crutchfield, spokesman for the monument, said, "It doesn't represent a threat to the watershed or wildlife at this point, but the report does recommend continual monitoring." Federal authorities won't "pursue sanctions against Citation Oil and Gas Corp., which possibly didn't own the Upper Valley oil field when the oldest pair of spills occurred into the Little Valley and other waterways upstream of what later became a national monument."

Also reporting on the story is the AP (6/5).

Offshore Energy Development:

APPEALS COURT RULES BP, ANADARKO MUST PAY CLEAN WATER ACT FINES. The AP (6/4) reports that a three-judge panel of the 5th US Circuit Court of Appeals yesterday ruled that BP and Anadarko Petroleum Corp. "cannot avoid Clean Water Act fines for the 2010 oil spill by blaming" Transocean. The judges found that whoever owns the well is responsible for the oil. Transocean has already agreed to a \$1 billion Clean Water Act fine.

Bloomberg News (6/5, Fisk, 2.76M) reports the companies "could face billions of dollars in fines" because of the ruling. Anadarko was a 25 percent owner of the well. US Justice Department spokesman Wyn Hornbuckle said, "We're pleased with the court's decision."

Tackling America's Water Challenges:

KLAMATH BASIN AGREEMENT LAUDED AT SENATE HEARING. The E&E Daily (6/4) reports that "with Western states gripped by an entrenched drought and farmers, environmentalists, cities and other interests battling over rights to the ever-diminishing flows, the Senate heard something unusual yesterday: a success story." At a Senate Energy and Natural Resources Subcommittee on Water and Power hearing, Sen. Ron Wyden "credited the Klamath Tribes and their chairman, Don Gentry, for coming to the negotiating table at a time when they did not need to." Wyden said, "Certainly, after the court decisions, you didn't have to take that path, so we're very appreciative of your effort to be part of, as I describe it, the Oregon way – bringing people together, people who everybody thought couldn't possibly agree."

EL NIÑO COULD BRING SEVERE FLOODING TO THE WEST. The E&E Daily (6/4) reports that "drought-stricken states in the western United States could face severe flash flooding later in the year due to the combination of an intense wildfire season in the summer and a strong El Niño event the following winter." According to the article, "for Western states currently mired in devastating drought and likely to be beset by wildfires through the summer, rainfall intensified by El Niño may not bring relief." Instead of "canceling each other out, the two extreme seasons could dovetail with major implications for people living near scorched areas."

GROUP FILES INTENT TO SUE OVER STEELHEAD TROUT. The Santa Barbara (CA) Edhat (6/5, 961) reports that on behalf of California Trout, the Environmental Defense Center has sent a 60-day Notice of Violations and Intent to Sue to the BOR alleging violations of the Endangered Species Act. The letter puts the BOR "on notice for its actions causing deaths of endangered Southern California steelhead trout."

Empowering Native American Communities:

NAVAJO NATION TO HOLD SIGNING CEREMONY FOR TRUST FUND SETTLEMENT. The Nation Sun News (6/5) reports that "leaders of the Navajo Nation will hold a signing ceremony for a \$554 million trust fund settlement today." The article notes that "the settlement is the largest single tribal payout so far."

NARRAGANSETT INDIAN TRIBE SEEKS SURPLUS NAVY LAND ON AQUIDNECK ISLAND. The Providence (RI) Journal (6/4, 415K) reports that the Narragansett Indian tribe has "asked the federal government to transfer to its possession surplus Navy land — including the US Naval Hospital — on Aquidneck Island." The request, made in April through the BIA, "threatens to derail years of planning by the island communities of Newport, Middletown and Portsmouth, to redevelop some of the acreage once actively used by the Navy."

Top National News:

TALIBAN RELEASES VIDEO OF BERGDAHL AS WHITE HOUSE CONFRONTS GROWING CONTROVERSY. As has been the case all week, the controversy surrounding the deal that freed Sergeant Bowe Bergdahl in exchange for five Taliban commanders once again dominated the news cycle on Wednesday, and was the lead story on all three network newscasts. The networks focused most of their coverage on a video reportedly released by the Taliban of the moment last weekend when Bergdahl was handed over to US forces.

Many outlets continue to report that the criticism of the Administration's handling of the deal is bipartisan. USA Today (6/5, 5.82M) reports that the swap has "angered...some top Democrats," while Politico (6/4, Everett, Raju, 637K) noted that "the criticism is hardly limited to the GOP." The Los Angeles Times (6/5, Memoli, Mascaro,

3.46M) also reports that "the fury in Congress was bipartisan, with some senior Democrats firing broadsides as the White House sent emissaries to apologize." The AP (6/4, Klapper, Cassata) reports that at the same time, President Obama's "goal of closing the Guantanamo Bay prison is facing re-energized opposition from Republicans and increased questioning from fellow Democrats."

According to the New York Times (6/5, A11, Shear, Peters, Subscription Publication, 9.65M), "White House officials failed Wednesday night to quell rising anger and frustration in both parties on Capitol Hill after a senators-only classified briefing." The Times goes on to report that both "Republican and Democratic senators emerged...saying that officials did not provide further evidence that Sergeant Bergdahl's health had deteriorated recently or that his life was in immediate danger." The Times says Sen. Joe Manchin "exited the briefing visibly angry." The Washington Times (6/5, Taylor, Dinan, 455K) quotes the Democrat from West Virginia as saying, "This is something that is extremely disturbing...and I came out of there with more questions than I got answers."

The AP (6/4, Faiez, Dilanian) reports that "the weekend handover in the dusty desert was documented in a 17-minute video emailed to news organizations Wednesday by the Taliban, which touted the exchange of Bergdahl for five Guantanamo detainees as a victory, while debate raged in the U.S. over the deal and whether" Bergdahl "should be punished as a deserter."

In its lead segment, the CBS Evening News (6/4, lead story, 2:25, Dubois, 5.08M) featured clips from the video. Correspondent Bob Orr said the Taliban "clearly views this as a victory and is now trying to use it to win more supporters." In another lead story on the newly released video, on NBC Nightly News (6/4, lead story, 3:25, Curry, 7.86M), correspondent Jim Miklaszewski reported that Bergdahl "appears disoriented but surprisingly in good physical condition." On ABC World News (6/4, lead story, 3:30, Muir), David Muir noted that in the video of the exchange provided by the Taliban, "you can see a member of the American team reaching out to shake a member of the Taliban's hand before Bergdahl is turned over, then patting down Bergdahl, presumably looking for explosives."

The New York Times (6/5, Rosenberg, Subscription Publication, 9.65M) says the "viral video...with music, commentary and context" represents the Taliban's "biggest hit yet after years of effort to improve their publicity machine — one bent on portraying them as the legitimate government of Afghanistan in exile." According to the Times, "the Taliban's message rang clear in their video," which was: "They saw the Americans come meet them on equal footing, on insurgent turf, and found them wanting."

The Washington Post (6/5, Sieff, 4.22M) notes that "the same video also includes footage of the Taliban detainees upon their arrival in Qatar." According to the Post, on Wednesday, White House deputy national security adviser Ben Rhodes was "asked whether President Obama has seen the video of Bergdahl's transfer," and Rhodes replied, "Not that I'm aware of."

On CNN's Situation Room (6/4, 554K), Jim Sciutto described the video as "a massive propaganda exercise for the Taliban...sold by a media-savvy insurgency as a 'victory' over the United States." Sciutto added, "And there are signs it is working to some extent." McClatchy (6/4, Allam, Subscription Publication, 23K), the Wall Street Journal (6/5, Abi-Habib, Subscription Publication, 5.51M) and Reuters (6/4) all have reports on the Taliban video.

Politico (6/4, Everett, Raju, 637K) reported that on Wednesday, the White House "moved quickly to quell bipartisan concern" from members of Congress who were "kept in the dark about the controversial deal," and in "a rare private meeting in a secure facility that every senator was allowed to attend," senators "heard from James Dobbins, a State Department specialist on Afghanistan and Pakistan, Deputy Secretary of Defense Robert Work, Adm. James Winnefeld, vice chairman of the Joint Chiefs of Staff, and Robert Cardillo, deputy director of national intelligence." Afterwards, Sen. Marco Rubio said, "I'm not satisfied with the justification given with regards to not notifying Congress, and I'm deeply unsatisfied by the calculus that was used to determine that this was in the best national interest." Politico notes that that Sen. Jerry Moran said, "I didn't learn anything new that hadn't been reported."

In a brief segment for NBC Nightly News (6/4, story 2, 0:35, Curry, 7.86M), Chuck Todd reported from Brussels that "White House aides continue to do damage control with members of Congress who are upset about not being consulted before the prisoner swap," and "are finally briefing the entire Senate." The CBS Evening News (6/4, story 4, 1:05, Dubois, 5.08M) also had a segment on the Senate meeting. Nancy Cordes reported that after

viewing a video of Bergdahl "in captivity looking gaunt" and "having trouble speaking," Sen. Mark Kirk "said...he could understand why it might have moved the President to act."

Politico (6/4, Breitman, 637K) noted that on Wednesday, Sen. Lindsey Graham speculated that President Obama "thought everybody would be cheering" after Bergdahl's release was announced because he underestimated Americans' hatred for the Taliban and is "disconnected from the fact that radical Islam is a threat to our way of life."

USA Today (6/4, Korte, Brook, 5.82M) notes that also on Wednesday, Senate Majority Leader Harry Reid "weighed in...on the side of the administration," and "accused Republicans of politicizing the deal."

USA Today (6/4, 5.82M) reported that Sen. Thad Cochran "is the latest lawmaker to delete tweets and statements...that celebrated the now-controversial return of Bergdahl." Cochran's Twitter account is now missing the tweet: "Welcome home, Sgt. Bowe Bergdahl. A grateful America thanks you for your service."

NBC's Todd: Multiple Obama "Aides" Claim Bergdahl Has Been "Swift-Boated." The Washington Times (6/5, Ernst, 455K) reports that on NBC's Today on Wednesday, NBC's Chuck Todd reported that "Obama administration's aides are accusing Sgt. Bowe Bergdahl's fellow platoon members and other veterans of giving the former captive the 'swift boat' treatment." Todd is quoted as saying, "They did not expect this backlash on Bergdahl himself. I've had a few aides describe it to me as 'we didn't know that they were going to swift boat Bergdahl'...of course, that's a reference to that political fight back in 2004 over John Kerry's military service."

On MSNBC's Hardball (6/4, 689K), Todd repeated his reporting about the White House's failure to anticipate the outpouring of criticism from Bergdahl's fellow soldiers. Todd said the White House "knew the backstory" about Bergdahl leaving his base without permission, "but there was an assumption they had...that there wouldn't be this public outcry against" Bergdahl. According to Todd, White House officials "obviously didn't do their homework" because they expected that some who "served with Bergdahl...would stand up for him," and "have been surprised that basically nobody that served with him is standing up for him." Todd added, "I've had a few aides" say "they didn't expect the 'swift-boating of Bergdahl.'" Chris Matthews shot back: "'Swift-boating' is totally misused here. 'Swift-boating is when you make up stories. ... Where's the dishonesty in the portrayal of Bergdahl so far? I haven't seen it."

Echoing Todd's analysis, Politico (6/5, Dove, Brown, 637K) reports that before last weekend, "White House aides were aware...Bergdahl had been tagged a deserter, and that they would be grilled over not keeping Congress in the loop," but "figured people would be most outraged over the national security implications." According to Politico, "Obama aides" have concluded that the criticism this week is "a proxy for the hatred toward the president," and have taken a "new approach," which is to "frame the criticism as another example of Republicans complaining about something just because Obama was the one to do it."

Charles Lane, in his column for the Washington Post (6/5, 4.22M), says the President "made a bit of a fool of himself by treating Bergdahl's impending return as appropriate for Rose Garden celebration, complete with grateful parents, even though he knew, or easily should have known, that Bergdahl is hardly a hero." Lane says the White House's "attempt to gin up an election-year feel-good story fell flat, as did national security advisor Susan Rice's clueless depiction of Bergdahl's Army career as one of 'honor and distinction.'"

AP: Obama Willing To Free Detainees In Return For Taliban "Public Declaration Of The Wish For Peace." The AP (6/5, Gannon) reports that "for the U.S...getting Bergdahl back was hardly the main aim when the Obama administration first opened the door to negotiations with the Taliban" regarding its top commanders held at Guantanamo Bay. According to the AP, "In those early talks, the U.S. was seeking gestures of goodwill from the Taliban, such as a public declaration of the wish for peace."

According to the Washington Post (6/5, Wilson, Gearan, 4.22M), "negotiations for Bergdahl's release took shape in the early months of 2011," and "when the talks began as part of what U.S. officials hoped would be a broader Afghan peace effort." The Post says "U.S. envoys were forbidden to offer any detainees...as part of a trade for Bergdahl," but "were allowed to include...Taliban fighters held at the detention center at Bagram air base, outside of Kabul."

In a front-page article, the New York Times (6/5, A1, Mazzetti, Schmitt, Sanger, Cooper, Subscription Publication, 9.65M) reports that after it was concluded that Bergdahl's health was failing, "Issues that had bitterly divided the Obama administration — about the wisdom of the prisoner swap and the risks of releasing a group of aging Taliban commanders...were swept aside in the rush to secure...Bergdahl's release." According to the Times, President Obama "spoke by telephone with the emir of Qatar to finalize the terms of the deal, and delegates from Qatar were quietly sent to Guantánamo Bay in late May — their presence a surprise to those who saw them in the dining facility."

Afghans Dread Return Of Taliban Commanders Released By The US. Under the headline, "Release Of Taliban Detainees Rattles Afghan Villagers," the Wall Street Journal (6/5, Hodge, Subscription Publication, 5.51M) reports that Afghans who witnessed atrocities committed by some of the Taliban commanders released by the US over the weekend are outraged that their adversaries are now likely to return once again to Afghanistan, perhaps in positions of power. The Washington Times (6/5, Taylor, Dinan, 455K) reports that Sen. John McCain has said, "I promise you, in a year from now, if not before, they will be back in Afghanistan and in the fight."

The Washington Post (6/5, Sieff, 4.22M) reports that for "Afghan military officials," the release of the Taliban commanders "was a coup for the enemy." Abdul Hakim Mujahid, described by the Post as formerly a "Taliban diplomat" who is "now the deputy director of the government's High Peace Council," said the Taliban commanders released from Gitmo are "some of the most important men in the Taliban's ranks, who he expects will wield influence immediately."

Former US Attorney General Michael Mukasey, in an op-ed for the Washington Post (6/5, 4.22M), says "every one of the five detainees released from Guantanamo...is not only a senior Taliban official, but also someone who has trained with and coordinated fighting with al-Qaeda before 9/11." According to Mukasey, that means that "at precisely the time when his administration is trying to withdraw troops from Afghanistan in a way that at least will not threaten the safety of those who remain behind," the President "has provided skilled strategic planners to the Taliban."

According to Anna Mulrine of the Christian Science Monitor (6/4, Mulrine, 566K), "defense officials and analysts are defending the negotiations, saying the release of the Taliban leaders is not so dire for US armed forces."

Afghan Villagers Recall Bergdahl Deliberately Setting Out To Make Contact With The Taliban. Kevin Sieff, in an online piece for the Washington Post (6/5, Sieff, 4.22M), reported that "Afghan villagers who spotted Bergdahl shortly after he slipped away from his base" say he "seemed to be deliberately heading for Taliban strongholds." Ibrahim Manikhel, identified as "the district's intelligence chief," is quoted as saying, "We think he probably was high after smoking hashish. Why would an American want to find the Taliban?" Manikhel is also quoted as saying: "I hope the U.S. can re-arrest the Talibs that they released."

Graham: Obama Could Be Impeached If He Unilaterally Closes Gitmo. The Hill (6/4, Bolton, 237K) reported that on Wednesday, Sen. Lindsey Graham "warned...that Republican lawmakers would call for President Obama's impeachment if he released more prisoners from Guantanamo Bay without congressional approval." Graham is quoted as saying, "It's going to be impossible for them to flow prisoners out of Gitmo now without a huge backlash. There will be people on our side calling for his impeachment if he did that."

In an analysis titled, "Bergdahl Swap May Make Closing Guantanamo Harder," the AP (6/4, Klapper, Cassata) reports that President Obama's "goal of closing the Guantanamo Bay prison is facing re-energized opposition from Republicans and increased questioning from fellow Democrats amid widespread anger in Congress over" the release of five Taliban detainees. According to the AP, "Members of Congress say the...trade almost surely will end with the Taliban commanders returning to the battlefield."

USA Today Analysis: White House Mishandling Of Bergdahl Swap Parallels Benghazi Controversy. Susan Page, in an analysis for USA Today (6/5, 5.82M) titled, "How The Bergdahl Celebration Became A Mess," says the deal for Bergdahl "has fueled a debate about the wisdom of President Obama's decision-making on national security," and "revived questions about whether a top official, dispatched to make the administration's case on Sunday morning talk shows, was straight with the American public." According to Page, "The list of complaints...sound a lot like" the criticism of the Administration's behavior following the 2012 terrorist attack in

Benghazi, Libya.

Dana Milbank, in a column for the Washington Post (6/5, 4.22M) in which he mocks those who see parallels in the Administration's handling of the Bergdahl swap and the aftermath of the Benghazi attacks, notes that Sen. Lindsey Graham "was one of many to find a link in Obama's claim that 'we don't leave our men or women in uniform behind.'" Graham, is quoted as saying, "It really bothers me when he embraces a military concept called 'We don't leave our people behind' and he won't tell us what he did in Benghazi."

Hagel Says He Has No Reason To Believe Soldiers Were Killed While Looking For Bergdahl. On the CBS Evening News (6/4, story 2, 2:20, Dubois, 5.08M) Margaret Brennan reported that an unidentified "retired army commander" says that "in the weeks that followed" Bergdahl's disappearance "military operations in the area dramatically increased," which "led to the loss of some US soldiers." However, Brennan went on to report that on Wednesday, Defense Secretary Hagel "said he had not seen any evidence that soldiers had died because of...Bergdahl's disappearance."

The AP (6/5, Ashtari) reports that when asked on Wednesday "whether men had died in the efforts to rescue Bergdahl," Hagel answered, "I don't know of any circumstances or details of U.S. soldiers dying as a result of efforts to get Bergdahl." However, the AP notes that members of "Bergdahl's unit have said that some did die in the efforts, even if indirectly." Evan Buetow, identified as a "sergeant in Bergdahl's unit at the time," is quoted as saying, "Those soldiers who died on those missions, they would not have been where they were...if Bergdahl had never walked away."

The Chicago Tribune (6/5, Mccoppin, Walberg, Ziezulewicz, 2.3M) reports that the parents of Pfc. Matthew Martinek claim he was "killed while searching for" Bergdahl and "are demanding an investigation into whether Bergdahl deserted and how his release was engineered."

McChrystal Defends Search For Bergdahl, Which "Put A Lot Of People At Risk." Yahoo News (6/4, Knox, 10.98M) reports that retired Gen. Stanley McChrystal, "who commanded the war effort in Afghanistan at the time of Bergdahl's June 2009 vanishing," has "sharply defended the extensive and risky search efforts that claimed the lives of some of his fellow soldiers." McChrystal is quoted as saying, "We did a huge number of operations to try to stop the Taliban from being able to move him across the border into Pakistan. And we made a great effort and put a lot of people at risk in doing that, but that's what you should do. That's what soldiers do for each other."

The Daily Caller (6/4, Ross, 408K) reported that "an internal [Army] investigation conducted in the wake of" the Battle of Kamdesh, in which eight US soldiers were killed, "found that 'priorities shifted' from [the] outpost attacked by 300 Taliban, in part, because of the search for Bergdahl."

Hagel To Appear Before House Panel Probing Bergdahl Swap Next Week. The Washington Times (6/5, Gertz, 455K) reports that next Wednesday, Defense Secretary Hagel will appear before the House Armed Services Committee to answer questions about Bergdahl and the deal that led to his release. Rep. Buck McKeon (R-CA), the panel's chair, is quoted as saying, "I am particularly troubled by the release of five senior Taliban leaders, men with the blood of many on their hands, and the implications for our deployed forces." McKeon added, "I am no less concerned that the Obama administration broke a national security law, passed with bipartisan support and signed by the president, in transferring these detainees."

George Will, in a column for the Washington Post (6/5, 4.22M), writes, "If the military stalls on turning over files to Congress pertaining to...Bergdahl's absence, we will at least know that there is no national institution remaining to be corrupted."

Under the headline, "The Bergdahl Fiasco," the Wall Street Journal (6/5, Subscription Publication, 5.51M) says there is reason to be skeptical of the claims made by the Administration about Bergdahl's health, and suggests that the swap was engineered with political motives in mind for the White House.

US Officials Reportedly Have Not Denied Paying A Bounty To The Haqqani Network. In a piece for the Daily Caller (6/4, Munro, 408K), Neil Munro notes that Bergdahl "was...held by the Haqqani network, not by the Taliban's jihadi army," but the US "released five Taliban people — not Haqqani people — in exchange for Bergdahl." Munro asks, "So what price persuaded the Haqqani network to give away their prized prisoner to

benefit the Taliban?" Munro goes on to note that the Haqqani network "was formally declared a terror organization in a 2012 decision approved by Obama, so any deal where they had a role means that Obama was trading with terrorists."

Likewise, on Fox News' *On The Record* (6/4, 1.65M), Greta Van Susteren asked, "Why would the Haqqani network give [Bergdahl] back to the Taliban so the Taliban get the bounty...if the Haqqani probably wanted money to begin with?" Van Susteren added, "Is there any reason to be confident that we didn't do both," meaning pay a bounty to the Haqqani network in addition to releasing the Taliban commanders. Correspondent Catherine Heridge responded, "It's entirely possible – that's the one thing the Administration has not ruled out...that money was exchanged in this deal as well."

Bergdahl's Home Town Cancels Celebration In His Honor. On the CBS Evening News (6/4, story 3, 0:20, Dubois, 5.08M), it was reported that Bowe Bergdahl's hometown, Hailey, Idaho "canceled a welcome home rally planned for him for later this month."

The AP (6/4) reports that "organizers released a statement...saying that because of national media attention on Bergdahl's story, they expect a significant increase in the number of people planning to attend the event — some to protest, and others to support the Bergdahl family."

Bergdahl's Father Draws Scrutiny. The Los Angeles Times (6/4, Glionna, 3.46M) profiles Bowe Bergdahl's father, Robert, who, according to the Times, "many say, was waging his own undeclared war at home." The Times notes that the elder Bergdahl has "give[n] lengthy interviews in which he criticized the U.S. strategy in Afghanistan."

Video Shows American Woman And Her Husband Missing In Afghanistan Since 2012. Maurice DuBois reported on the CBS Evening News (6/4, story 5, 0:20, Dubois, 5.08M) that in the wake of Bowe Bergdahl's release, "an American family has gone public with their own story, releasing a video showing a couple missing in Afghanistan since 2012." According to CBS, "The videos appear to show Caitlin Coleman and her Canadian husband, Joshua Boyle, in captivity."

Brian Ross reported on ABC World News (6/4, story 2, 2:25, Muir) that the family's "plight had received little attention until today when two videos were made public by the family of the missing American woman," who was "pregnant when the couple went missing almost two years ago in Afghanistan as they hiked through the region controlled by the Taliban. In the video, which her family received last year, she talks of the child she apparently gave birth to in Taliban captivity."

Elise Labott reported on CNN's Situation Room (6/4, 554K) that Coleman's family "gave the videos to the Associated Press, hoping the publicity surrounding Bowe Bergdahl's release could bring their daughter home." In the video, a then-pregnant Coleman "makes a direct plea" to the President to free her and her husband, Joshua Boyle from the Taliban. Bret Baier reported on FOX News' Special Report (6/4, 2.15M) that the couple's family say they "are disappointed that they were not freed as part of the deal that freed Bowe Bergdahl."

REID BLOCKS MCCONNELL EFFORT TO DERAIL NEW EPA RULES. The Washington Times (6/5, Miller, 455K) reports Senate Majority Leader Reid "blocked the first legislative attempt by Republicans to derail" the proposed new EPA emission rules Wednesday, issuing a voice objection to a bill by Senate Minority Leader McConnell. The exchange "marked the first shot in a likely protracted battle in Congress and on the campaign trail" over the measure.

At Least Eight States Have Voted For ALEC-Based Anti-EPA Resolutions. Politico (6/4, Restuccia, 637K) reported that in at least eight states, legislators "have approved symbolic anti-EPA resolutions based on a model approved by the American Legislative Exchange Council." Politico says the state-level resistance "is a preemptive strike for conservatives" against President Obama's proposed EPA rule.

WSJournal: China's Climate Steps Unlikely To Be Adopted Soon. The Wall Street Journal (6/5, Subscription Publication, 5.51M) says in an editorial that while some American liberals have taken pleasure in signs that China may be limiting its emissions, viewing the move as a response to the EPA's new emissions rules, Beijing is merely studying a cap that is unlikely to be adopted quickly.

Temperatures Rising Fastest in Northeast, Southwest. The AP (6/5, Visser) reports that an analysis of temperature records shows that the US "is warming fastest at two of its corners, in the Northeast and the Southwest." Maine and Vermont have gained 2.5 degrees on average since 1984, while "Southwestern states have heated up the most in the hottest months: The average New Mexico summer is 3.4 degrees warmer now than in 1984; in Texas, the dog days are 2.8 degrees hotter." Overall, the contiguous 48 states' average temperature has warmed by 1.2 degrees during that period.

MEDIA ANALYSES SEE GOOD TIDINGS IN MIXED ECONOMIC DATA. While the economic data released on Wednesday was decidedly mixed, with disappointing trade and jobs reports, the media is with few exceptions treating it as a sign that the economy has rallied since it contracted during the first quarter.

Trade Gap Widens Sharply, But Media Not In Accord On Impact. The New York Times (6/4, Searcey, Subscription Publication, 9.65M) reports that the US trade deficit rose to a "two-year high in April," but the "new data, along with a variety of other recent statistics, signal the economy is getting back on a moderate growth path after a setback in the first quarter." The Department of Commerce reported on Wednesday that the trade deficit rose from \$44.2 billion in March to \$47.2 billion in April. Exports fell 0.2 percent to \$193.3 billion, while imports rose 1.2 percent to \$240.6 billion. The Times adds that the numbers "indicate an upswing in business activity and expectations for greater spending in the months ahead, economists said."

The Wall Street Journal (6/4, Mitchell, Subscription Publication, 5.51M) is far more negative on the numbers, focusing on the potential for the drop in exports to slow the second quarter's expected growth rebound. The Journal notes that it was the fourth consecutive monthly drop in exports.

Several other sources split the difference. The AP (6/5, Crutsinger) reports that a "wider trade deficit can act as a drag on growth because it means U.S. companies are earning less from their overseas markets." However, it can "also indicate rising U.S. demand." Economists, the AP says, "were likely to see the big jump in imports as a good sign that the country is shaking off the effects of a harsh winter."

Bloomberg News (6/5, Jamrisko, 2.76M), for its part, says that a "rebound in U.S. growth after a harsh winter is likely to be driven by gains in consumer spending and business investment that will bolster imports." However, "slower expansions abroad will probably check gains in exports, keeping the trade gap elevated."

Service Sector Activity Accelerated Last Month. Bloomberg News (6/4, Smialek, 2.76M) reports that the Institute for Supply Management announced on Wednesday that its Non-Manufacturing Index, a measure of service sector economic activity, rose to 56.3 in May from 55.2 in April. That's the highest reading since last August. A reading above 50.0 indicates that the sector is expanding. Bloomberg says that the numbers signal "a broad-based rebound in the U.S. economy after a dismal first quarter."

The Wall Street Journal (6/4, Madigan, Subscription Publication, 5.51M) says that economists its surveyed expected the index to come in at 55.2. The Journal says that economists view the report as another sign that growth accelerated after the harsh winter.

ADP Private Sector Report Disappoints With 179,000 Jobs Added Last Month. Reuters (6/4, Mutikani) reports that the ADP private sector jobs report for May, released on Wednesday, showed that non-governmental employers added 179,000 jobs last month, well below the 210,000 expected by economists. Reuters says that while the report was disappointing, it still shows that the economy is accelerating.

USA Today (6/5, Davidson, 5.82M) reports on the ADP report and says that the "high-flying job market may have drifted back to Earth last month." Looking forward, USA Today said that the Labor Department's report for the full economy, due out Friday morning, "could show a marked slowdown in job growth after a private survey on business hiring missed estimates."

Beige Book Sees Economic Expansion Resuming. Bloomberg News (6/5, Matthews, 2.76M) reports that in its Beige Book business survey, the Fed "said the economy expanded at a modest to moderate pace last month as auto sales led household spending and the labor market improved." The report, released on Thursday, said, "Consumer spending expanded across almost all districts," adding that "labor market conditions generally

strengthened" with "hiring activity steady to stronger" in most of the nation.

The Wall Street Journal (6/5, Portlock, Subscription Publication, 5.51M) says that the Beige Book also suggested that some businesses were struggling to find qualified workers.

In his column for the Washington Post (6/5, 4.22M), Robert J. Samuelson says that the economy may be returning to a "Great Moderation." The term "refers to the period from the mid-1980s (1983 or 1984 are common starting points) to 2007 when the economy enjoyed relatively stable growth and prosperity." However, he says that post-2009, the moderation is represented by weaker growth, and "The Great Moderation 2.0 might be nothing more than a fluke," as it is still relatively early.

Stocks Up On Wednesday, With S&P Hitting New High. The Wall Street Journal (6/5, Scaggs, Subscription Publication, 5.51M) reports that despite the mixed collection of economic news, stocks advanced modestly on Wednesday. The S&P 500 rose 3.64 points to 1927.88, a new record high. The Dow Jones Industrial Average rose 15.19 points to 16737.53, while the Nasdaq Composite Index was up 17.56 to 4251.64.

Editorial Wrap-Up:

NEW YORK TIMES. "Children On The Run." The New York Times (6/5, Subscription Publication, 9.65M) editorializes that Obama Administration officials "deserve credit" for recognizing that the influx "of young unauthorized migrants crossing the border...is not a border-security crisis but a humanitarian one, fueled by growing violence and instability" in El Salvador, Guatemala, Honduras, and Mexico. The Times says "the view from the Republicans' America – locked down, in a gated country, hands washed of the migrant problem – is a fantasy about law and order. But it is not a solution."

"Standing Up To Mr. Putin." The New York Times (6/5, Subscription Publication, 9.65M) editorializes that President Obama's "decision to commit \$1 billion" in defense aid to Europe "sends important messages to both NATO" and Russian President Vladimir Putin. The Times says the G7 should also "keep pressure" on Putin to convince Ukraine's separatists to "end the violence and intimidation."

"Clarifying, And Tightening, Patent Law." The New York Times (6/5, Subscription Publication, 9.65M) editorializes that "two recent unanimous Supreme Court decisions should reduce abusive and frivolous patent litigation by raising the standards by which judges decide such cases." The court found that "for a patent to be valid, its creators had to describe the essential elements of their invention and how it can be used clearly enough that a person skilled in the field could understand it with 'reasonable certainty,'" and that "a patent that covered a series of steps was not infringed if no one person or business carried out all the steps." The Times says the rulings bring "much-needed clarification and discipline to American patent law."

WASHINGTON POST. "Will The West Defend Freedom?" The Washington Post (6/5, 4.22M) editorializes the "West's wobbly response" to Russia's actions in Ukraine are emboldening Russian President Vladimir Putin. The Post says Putin "has not given up his strategy of using force to undermine Ukraine's stability," and has no reason to do so given the failure of the West to follow through on threats of punishment.

"Detour From Common Sense." In an editorial, the Washington Post (6/5, 4.22M) says that Congress's efforts so far to shore up the Federal Highway Trust Fund have not been far from "legislative malfeasance." The Post argues that the best way to fund transportation spending is a "higher gas tax or a vehicle-miles tax," but lawmakers have instead resorted to "budgetary gimmickry and short-term patches to fill holes in the fund." The Post adds that if lawmakers "are too cowardly to make obvious policy choices this year, they will have to develop some backbone before the next self-imposed transportation funding crisis."

"Perilous Parental Visits."

WALL STREET JOURNAL. "The Bergdahl Fiasco." An editorial in the Wall Street Journal (6/5, Subscription Publication, 5.51M) says there is reason to be skeptical of the claims made by the Administration about Bergdahl's health, and suggests that the swap was engineered with political motives in mind for the White House.

"Obama's Five-Year Plan." The Wall Street Journal (6/5, Subscription Publication, 5.51M) says in an editorial that while some American liberals have taken pleasure in signs that China may be limiting its emissions, viewing the move as a response to the EPA's new emissions rules, Beijing is merely studying a cap that is unlikely to be adopted quickly.

"California's GOP Outbreak." An editorial in the Wall Street Journal (6/5, Subscription Publication, 5.51M) says that while California Republicans have been moving toward insignificance for twenty years, the results of Tuesday's primary elections provided an indication of the party's potential for growth. The Journal notes promising Republican candidates in several legislative races and adds that Republicans have a chance to deny Democrats a supermajority in the legislature.

Contact: Benjamin Gerdes: (703) 328.0360 ben@congwomensoftball.org. Notes: Congressional Womens Softball Games Receives Spirit Award: 3:00pm First Pitch: 4:05 pm. Philadelphia Phillies @ Washington Nationals

U.S. CHAMBER – EDUCATION AND IMMIGRATION – SCREENING — 3:30 p.m. – 6:30 p.m. The U.S. Chamber will host a screening of Underwater Dreams, a new documentary that examines the intersection of education and immigration in the United States. The story is about children of undocumented Mexican immigrants who forged a legacy by building an underwater robot and challenging MIT in the process. The event will include a panel discussion with the films writer and director, Mary Mazzio, founder and CEO of 50 Eggs, Inc, and remarks from the Chambers Senior Vice President of Labor, Immigration, and Employee Benefits Randy Johnson, and the U.S. Chamber Foundations Executive Vice President Al Martinez-Fonts Jr. Location: U.S. Chamber Headquarters, 1615 H St. NW. Contacts: Blair Latoff Holmes bholmes@uschamber.com

NATIONAL ARCHIVES – ROLE OF CONGRESS – CRISIS — 7 p.m. The National Archives and the U.S. Association of Former Members of Congress host a program exploring The Role of Congress in International Crises. A panel moderated by Clinton White House Press Secretary Mike McCurry, and including former Speaker of the House Dennis Hastert, former Members of Congress Chris Shays and John Tanner, and author

and investigative journalist Bob Woodward, will examine how this division of powers and responsibilities has been interpreted in the past, how military action was taken without congressional authorization, and how the legislative branch plays a significant role when our nation is faced by international crises. Register at <http://www.archivesfoundation.org/events>. Location: William G. McGowan , National Archives Building. Attendees should use the Special Events entrance, located on Constitution Avenue at 7th Street, NW. Contacts: 202-357-6814. On the Net: <http://archivesfoundation.org>

Last Laughs:

LATE NIGHT POLITICAL HUMOR.

David Letterman: "The world's going crazy. We bring back a POW from Afghanistan and...to get him back, we traded five Taliban thugs in return for the American POW. And now everybody's gone crazy. ... Should we not have done it? Nobody knows anymore. People say it's the most controversial trade that has taken place since NBC traded me here to CBS."

Jimmy Fallon: [Referring to the Stanley Cup Final series between the Los Angeles Kings and New York Rangers] "Governors always like to make these fun little bets when their teams are playing each other. So get this – California Governor Jerry Brown said that if the Rangers win, he's going to give the New York Governor Andrew Cuomo a book about California and a package of rice cakes. ... Seriously? It sounds like Christmas presents I would get from my grandma."

Jimmy Fallon: "French President Francois Hollande...is going to host two dinners tomorrow night. The first one for President Obama, followed by one for Vladimir Putin. Yep, Hollande was pretty worried about keeping them separate. Then his girlfriend and his mistress were like, 'Well, you'll figure it out.'"

Jimmy Fallon: "A Republican candidate for Congress in Arizona, who is white, recently changed his name to the Cesar Chavez to appeal to Latino voters. Well it really backfired when Arizona's governor immediately deported him."

Seth Myers: "President Obama is expected to meet with Vladimir Putin this Friday at a celebration for the 70th anniversary of D-Day. That's right. Obama is celebrating D-Day by meeting with the world's biggest 'D.'"

UPDATED MEMOS - Not In Briefing Book

Javaid, Zaina <zaina_javaid@ios.doi.gov>

Thu, Jun 5, 2014 at 4:23 PM

To: Sally Jewell (b)(6)@ios.doi.gov

Cc: Nicole Buffa <nicole_buffa@ios.doi.gov>, Erin Walls <erin_walls@ios.doi.gov>

Hi Sally,

I wanted to flag for you that the WGA Information Memo, WGA Event Memo, and Meeting with Gov Otter Memo have been updated and added to Google Drive. I have also uploaded the MOU.

Additionally, in the June 11th folder, I have added draft remarks for the Capitol Hill Oceans Week Remarks. They are also attached here.

Thank you,

Zaina

INFORMATION MEMORANDUM FOR THE SECRETARY

WESTERN GOVERNORS' ASSOCIATION – VERSION 3

DATE: June 4, 2014
FROM: Sarah Greenberger, OS, (202)208-6726; Michael Bean, AS-FWP office (202) 208-7400; Letty Belin, Counselor to the D/S (202) 208-6291; John Blair, Director, OIEA (202) 208-1923; James Lyons, Counselor, ASLM (202) 208- 4318; Neil Kornze, BLM; Mike Conner, BOR; Libby Washburn, BOR; Dionne Thompson, BOR (202)513-0570; Anne J. Castle, A/S W&S; Neil Kornze, BLM; Maureen Foster, NPS (202) 208-5970; Kevin Washburn (202) 208-7163; Jennifer Goldblatt (202) 513-0604
SUBJECT: Western Governors' Association (WGA) Issues of Interest

**Note: Updates are highlighted in yellow.*

In preparation for the upcoming June 2014 Western Governors' Association meeting, below are western issues of interest to the Governors planning to attend.

SAGE-GROUSE

Status of BLM Great Sage-Grouse State Plans

BLM received comments from the public and from the U.S. Fish and Wildlife Service (FWS) on our 15 Environmental Impact Statements (EIS) for Greater Sage-grouse (GRSG). To improve coordination, clarity and consistency as the planning teams begin development of proposed plans, the BLM held two Federal family meetings to discuss land management allocations, disturbance calculations and other topics.

Issues/concerns that were not resolved at these meetings were presented to the National Policy Team (NPT) - which consists of members from FWS, FS, and BLM - for resolution. Key pieces of guidance were developed over a series of NPT meetings, and that guidance was issued on April 30, 2014 to the State Directors. This included guidance intended to ensure clarity and consistency related to the Land Use Plan Allocations and Disturbance thresholds; and, overall guidance related to Adaptive Management, Mitigation and Monitoring that will be incorporated into all 15 EISs. While the final NPT guidance was being developed, the State Directors were cooperating with their Governor's Offices, collectively working on these proposed plans and developing solutions from the ground up. This new guidance, which the NPT feels provides clarity for the public and the FWS, has created some conflict in specific states as some now feel that this has limited the ability to develop locally driven Proposed Plans.

BLM is analyzing the comments received and preparing draft Administrative Proposed Plans (APPs). The draft APPs, which are to be completed in June, will then be "rolled up" in July so as to evaluate their aggregate impact on each sage-grouse "primary area for conservation" (PAC) and sage-grouse population identified in the Conservation Objectives Team (COT) report. The purpose of the roll-up exercise is to evaluate the extent to which the key threats to each PAC and population have been ameliorated by the plans and will enable any fine-tuning of federal and state plans needed to adequately address key threats.

On May 12, 2014, AD-200 issued a memo to the State Directors on the new 12-Step Roll-up Strategy that addresses how the BLM will move forward with the Roll-up through the publication of the Proposed Plan EISs. The NPT guidance does provide some flexibility and if the State Director feels that their current approach is biologically beneficial to sage-grouse and better protects their habitat they can provide AD-200 a memo to support their rationale as addressed in the 12-Step Strategy. Based on this 12-Step process an updated planning schedule has been developed.

Positions of Interested Parties

Colorado – In 2008, the State of Colorado developed a statewide Conservation Plan for GRSG. In 2013, Colorado prepared and published a status report on implementation of the Conservation Plan. The status report, called the Colorado Package, was submitted to both BLM/FS and the FWS in January 2014. It is a compendium of GRSG conservation commitments and efforts underway in Colorado, including conservation planning and implementation, land protection, population and habitat monitoring, habitat treatments, restoration, research and communications. Although not memorialized in an Executive Order, it represents the State's GRSG Plan according to Governor Hickenlooper. The State of Colorado has coordinated actively and closely with BLM/FS in development of the Northwest Colorado Administrative Draft Proposed Plan (ADPP) and provided detailed comments and information for consideration, though the Governor's Office feels that BLM's ADPP is too restrictive.

Idaho/SW Montana –Based on the recent NPT guidance, BLM-ID believes the foundational elements of the State Plan are no longer applicable (i.e., three management areas and associated management, the robust adaptive management strategy, and lands and minerals activities avoidance criteria). The Governor's Office does not agree with the NPT guidance that there be "no unmitigated loss" within General Habitat. Of the three management areas (Priority, Medial, and General), Medial Habitat includes both Priority and General. The FWS concern is that the Priority Habitat in Medial Habitat should be treated and managed as Priority Habitat.

Montana – Currently working on an Executive Order from the Governor which, when in place, will provide regulatory mechanisms for sage-grouse conservation through state approved actions. The adoption of a state plan may influence the state opinions about the BLM plans in MT. The draft state plan (which applies to private and state lands) provides a process by which the state would assess disturbance at the project level to limit discretionary (those activities requiring a state or federal decision) disturbance at the landscape level.

Nevada/NE California – Nevada is in the process of revising the 2012 Nevada Sage-grouse Plan. The agencies (BLM, FS, and FWS) have been working with the State's Sagebrush Ecosystem Council and their Technical Team to make the Proposed Plan and the State Plan, where possible, consistent. To date, most of the sections that would go into the agencies' Proposed Plan have been revised and for the most part are consistent. The overarching concern from the State is the legality of the significant land use restrictions and prohibitions encompassed in the alternatives. The Nevada State Sage-grouse Plan does not make direct allocations. Their goal is to limit development based on the amount of credit that would have to be acquired for a disturbance. We expect pushback on any allocations that exclude or close areas to development.

North Dakota/South Dakota – Both the North Dakota Game and Fish and the South Dakota Game, Fish and Parks have been supportive of the BLM LUP efforts and decisions. North Dakota Game and Fish has produced a draft updated Greater Sage-grouse Management Plan and a final plan is expected soon. South Dakota is in the process of producing a draft updated Greater Sage-grouse Management Plan. Neither plan includes regulatory mechanisms for state approved actions.

Utah – The Conservation Plan for GRSG was approved for implementation by Governor Herbert in April 2013. The measures in the plan are being applied and habitat improvement projects implemented. In May 2013, the FWS submitted a comment letter raising concerns with Utah's Conservation Plan that have yet to be resolved. The state has concerns with BLM direction within Preliminary General Management Areas as it relates to "no net loss" and the three percent disturbance cap. The State also believes there is too much emphasis on land use restrictions in the BLM-FS plan and not enough emphasis on increasing habitat through treatments.

Wyoming – The State of Wyoming Core Area Strategy was established in 2011 by Executive Order. The Core Area Strategy is implemented by the Governor’s Greater Sage-Grouse Implementation Team (SGIT); it applies to private and state lands whenever a state authorization is required and is largely consistent with BLM/FS ADPP. Governor Mead is intent on getting the Lander Record of Decision approved to demonstrate successful sage-grouse conservation partnerships and has emphasized the need for BLM/FS plans to be consistent with the Wyoming Core Area Strategy. Governor Mead has emphasized that GRSG conservation should move forward while maintaining economic and social benefits derived from public land uses.

Key Points to Emphasize

- (1) **The Fish and Wildlife Service has made no decision and has no “leaning” with respect to whether or not the sage-grouse should be proposed for listing.** It will make that determination in 2015 on the basis of all the information available to it then, including the state and federal plans now being completed. It will be guided by the recommendations of the COT report, which was a joint product of state and federal scientists.
- (2) Through the collective efforts of state and federal agencies, **avoiding the need to list the species under the ESA is an achievable goal.** The degree of cooperation that has characterized the work of the federal and state agencies over the last three years is unprecedented. If we continue to work together constructively, it is within our power to remove or adequately reduce the threats to the sage-grouse.
- (3) **“What is good for the bird is good for the herd.”** This recent remark by an Oregon rancher underscores the point that conserving the sage-grouse will have much broader benefits than simply helping that single species. Valued game species, such as mule deer, share many of the sage-grouse’s habitat needs and thus will benefit from efforts to conserve the grouse. Indeed, **the PACs that will be the primary focus of conservation efforts for the sage-grouse are generally congruent with the highest priority “crucial habitat” areas in the CHATs that WGA and the Western states have recently produced.**
- (4) **The states will be invited and encouraged to take part in the forthcoming “roll up”** of BLM and Forest Service plans, to ensure a comprehensive look at the extent to which key threats have been ameliorated in the PACs. This is essential since state and private land comprises a significant fraction of most PACs and a majority of the land in several PACs.
- (5) While all the states have been working hard through the Sage-Grouse Task Force and other means, **several states have made unique contributions.**
 - **Wyoming’s** core area strategy both led the way in building a conservation effort around the most important places, but also made effective use of the state’s many regulatory authorities to conserve those places;
 -
 - **Idaho** has embraced adaptive management in a rigorous way.
- (6) Through the work of the Task Force, **many good ideas have emerged regarding how we can better prevent fires and more effectively target our post-fire restoration efforts.** Our ability to implement those ideas will be greatly aided if together we can persuade Congress to enact bipartisan legislation that changes the way we budget for fire. The help of the Western Governors in securing that legislation is needed.
- (7) **Now is not the time to kick the can down the road,** as some have suggested. The chance we have this year and next to put in place meaningful conservation measures is the best chance to arrest and reverse the decline of an iconic game bird of the West and the habitat upon which it and much other wildlife depends.

ADDITIONAL Q & A

Q: What do you have to say about legislative proposals that would give the States more time to develop and implement their own solutions to sage-grouse conservation?

A: I disagree with those who suggest kicking the can down the road is the best approach to facing the challenges before us. All of us are at the table together and work to solve a problem that is much bigger than sage-grouse. The disappearing sage brush and explosion of invasive species that fuel the fire cycle also threaten sage-grouse. They also threaten other iconic species like mule deer, elk and pronghorn as well as ranching and other activities that are a foundation for western tradition and economic growth. Wyoming has shown that we best preserve our heritage and generate economic potential when we act boldly and decisively to make smarter, more strategic land management decisions that provide all land users with certainty. That is the example we are working together to emulate.

Q: A study quoted in the Washington Post suggests that BLM's own analysis predicts implementing its plans could cost up to 31,000 jobs, up to \$5.6 billion in annual economic activity and more than \$262 million in lost state and local revenue every year. On top of EPA's power plant rule, how can the Administration claim to support economic growth and job creation?

A: The analysis you are referring to added up rough estimates from 15 different BLM plans but does not represent a credible range-wide economic analysis sophisticated enough to predict the impacts of sage grouse conservation. Nor does that analysis quantify the benefits of the effort. What is known is that Wyoming has continued strong economic growth and development six years into its conservation efforts. The BLM has had strong interim sage grouse protection measures in place since 2011 while the planning effort is underway. The economies of the West have not ground to a halt. Our most recent analysis of energy potential suggests most of the high potential areas lie outside of priority sage grouse habitat. We can conserve sage grouse and other important wildlife and continue economic growth. We just have to approach our land management decisions in a more strategic manner and we have to act before so much habitat is gone our options are limited.

Q: You have repeatedly promised that Interior would not take the once-size fits all approach of the NTT Report but allow for state-driven solutions. Yet last month, the Washington BLM Headquarters sent out strict direction that slammed the door on state plans, all except for Wyoming whose plan does not meet the criteria set out. Why does Wyoming get a free pass on the strict one-size fits all standards BLM has imposed on the rest of us? This change in course is unacceptable.

A: The National Policy Team guidance was guidance not policy and invited State Directors to explain why alternative approaches can work given the specific facts at play in different states. We need this step to ensure a strong record that supports similar or better outcomes that address the threats set out in the NTT and COT reports. The door is not shut to State approaches but they must be science-driven and you will need to help make that case. We look forward to continuing conversations on these plans over the summer months as we examine how they add up across the landscape.

Q: Montana recently closed their greater sage-grouse hunting season because of declining population levels. What does this mean about the prospects for avoiding the need to list the sage-grouse? Are we now in the same position we were in for Lesser Prairie Chicken, Gunnison and Bi-state sage-grouse where population drives the outcome and no amount of conservation will suffice?

A: FWS will make its listing determination based on the sum total of the status of the bird, and the threats to the species and its habitat, across the entire range of the species. Greater sage-grouse populations appear to have declined in some portions of the range due to the recent drought and other factors, and Montana took this precautionary management step as a result. That said, there is no indication that the population is crashing, as was seen with the lesser prairie-chicken. Our focus for conservation continues to be on protecting the remaining large, high quality areas of habitat, i.e., the Priority Areas for

Conservation (PACs), so that populations of the bird large enough to be resilient to drought and other natural stressors can be maintained across the range.

Q: Director Ashe keeps discussing a 4(d) rule. That makes us think he's already made up his mind about listing the bird. What is our incentive to keep working at this?

A: The Fish and Wildlife Service has made no decision and has no "leaning" on whether to propose the sage-grouse for listing. It will make that determination in 2015 on the basis of all the information available to it then, including the state and federal plans now being completed. It will be guided by the recommendations of the COT report, which was a joint product of state and federal scientists.

What Dan wants to make clear is that there is no downside to bold action with regard to a listing. If the federal government and all governors act to develop strong, science-based plans that serve to avoid the need to list, then we're all happy. But if some states act and some don't, and the Service ultimately has to list the bird, a 4(d) rule can allow states with a sound conservation plan in place to continue to have the lead for managing the species.

Q: Fox News recently reported that the Service decision to list the Lesser Prairie Chicken has shut down oil and gas production in Western Kansas despite the rhetoric from the Service regarding flexibility and states' retention of authority. How do you respond to that?

A: Companies have a responsibility to prepare for changes in their business environment, too. The most recent statistics we have from WAFWA show that 160 different oil and gas companies have assessed the situation and made the business decision to participate in the Range-wide Conservation Plan, committing to carry out the conservation measures of the plan on 9 million acres of land that they manage or lease. That same avenue is readily available for any company operating in western Kansas.

Fire and Sage-Grouse Habitat Protection Measures

- The safety of firefighters and the public will always be our top priority, but the protection of Sage-Grouse and its habitat where they exist is the top resource priority. The BLM is and has been taking immediate, direct and measurable steps to reduce fire and invasive species threats to Sage-Grouse habitat.
- In core habitat areas with a history of large fires, we will aggressively seek to compartmentalize prime areas through strategic fuels management and creating firebreaks to minimize fire spread into those critical habitat areas. For 2015 we intend to increase the fuels treatment allocation percentage and amount of investment in core habitat.
- To stem the effects of changes in the fuels and fire regime, quick and aggressive post-fire stabilization and fuels treatments will provide a path to enhanced habitat conservation. Although sagebrush and preferred grasses are difficult to get established with more frequent fires, we will use competitive plant species, including non-native grasses and forbs, where necessary as a proven transition to a longer-term desired plant community.
- In 2014 we are directing 62 percent of our Fuels Program project capacity to Sage-grouse habitat conservation projects. This amounts to \$28 million in funding and approximately 240,000 acres of treatment. In 2014 we are investing 58 percent of our Healthy Lands Initiative funds to sagebrush ecosystems and landscapes. This amounts to over \$4.5 million. These funds are distributed between the Greater, the Gunnison, and Bi State population areas of habitat.
- To boost rural response capacity in Sage-Grouse habitat, and west-wide, managers and fire organizations will be encouraged to integrate Rural Fire Protection Associations and traditional Rural Volunteer Departments into their daily operations to the highest degree possible. We are committed to training support and coordination at a minimum. Where possible we will provide more material support.

High-Voltage Transmission Lines and Greater Sage-Grouse

- BLM is taking significant steps to address transmission project impacts to Greater Sage-Grouse and their habitats while land use plans are being amended or revised as part of an ongoing National Greater Sage-grouse Planning Strategy.
- BLM is also ensuring project developers comply with interim management guidance for sage-grouse that was issued in December 2011. This guidance specifies: Consideration of reasonable siting alternatives outside priority habitat or within designated corridors; identification of technically feasible best management practices; and consideration of regional mitigation opportunities.
- Thorough, project-specific environmental reviews are ongoing with input from the public, Tribes, and Federal, state and local cooperators.
- Project developers are preparing Habitat Equivalency Analysis (HEA) based mitigation in collaboration with BLM, Fish and Wildlife Service and state game and fish agencies.
- BLM is working with project developers to co-locate facilities within previously disturbed areas and designated corridors.
- BLM is working with project developers to identify routes that minimize impacts to Priority Areas for Conservation (PACs) for the Greater Sage-Grouse.
- For approved projects, BLM is enforcing strict timing controls on construction activities during sensitive periods (i.e. breeding, nesting, winter).

HIGH-VOLTAGE TRANSMISSION LINES AND ENERGY ISSUES

This topic is of particular interest to Governor Butch Otter (ID), Governor Brian Sandoval (NV), and Governor Gary Herbert (UT). During the WGA breakfast in February, Governor Herbert mentioned the need for certainty in Interior's resource management plans to encourage energy development in his state. Governor Sandoval discussed transmission lines in his state at the February WGA breakfast. Governor Otter plans to discuss Gateway West and Boardman to Hemmingway transmission lines.

As the largest Federal land manager in the west, the BLM plays a significant role in planning energy corridors and siting transmission facilities. BLM administers over 107,000 rights-of-way for a variety of uses including transmission lines and pipelines. BLM is employing a "smart from the start" approach to identify areas of conflict and opportunity during planning to allow BLM managers to select the best areas for siting transmission facilities.

Since 2009, BLM has permitted 42 high-voltage transmission projects spanning over 2,300 miles on public lands. These projects provide capacity for renewable energy, improve grid reliability and support job growth. Since 2011, BLM has participated as a member of the Rapid Response Team for Transmission (RRTT) with the goal of improving coordination, expediting permitting and identifying lessons learned from seven priority pilot projects identified by the President. BLM is lead or co-lead agency on four of the priority projects. BLM currently has approximately 20 pending high-voltage transmission projects in several western states. Some projects are in sagebrush habitat.

Energy Corridors

The BLM, DOE, and USFS Work Group are collaborating to identify regions in the west to conduct reviews of corridors. The federal partners are focused on doing this right, including close coordination with states, tribes, local communities, and outside partners. This new approach is the right way to conduct corridor assessments, but it is also very resource intensive. With limited funds, the federal partners are currently consulting with WGA and various states in considering which regions to prioritize. Interest from

states and commitments to work collaboratively on a corridor process will be key to successfully reviewing corridors of concern.

Transmission Project Summaries

- Gateway West Transmission Line (Idaho segments 8 & 9) * *RRIT Priority Project* - The project will address load growth in Idaho, Oregon, Utah, and Wyoming, improve the reliability and efficiency of utility systems, and tap renewable energy resources in Idaho and Wyoming. The project sponsors estimate 1,100 to 1,200 jobs will be created.
 - Challenges: Routes proposed across the BLM administered Morley Nelson Snake River Birds of Prey NCA in southern Idaho; finalizing Greater Sage-Grouse mitigation; finalizing Migratory Bird Conservation Plan
- TransWest Express Line * *RRIT Priority Project* - The project is designed to increase capacity for renewable energy generation consisting primarily of wind energy, including the Choke-Cherry, Sierra Madre Wind Farm near Rawlins, WY. The project sponsor estimates 1,035 to 1,550 jobs will be created.
 - Challenges: Finalizing Greater Sage-Grouse mitigation; potential crossing inventoried road less areas in National Forests; proximity to Nellis Air Force Base in southern Nevada; crossing Tuttle Ranch and proposed conservation easements in Colorado; co-locating project adjacent to existing projects and the Energy Gateway South project
- Boardman to Hemingway Project * *RRIT and PNWRIT Priority Project* - The Project would relieve pressure on the existing transmission system, improve electric reliability, provide additional energy capacity to meet demand in Oregon and Idaho, and provide service to wholesale customers. The project sponsor estimates 500 jobs to be created.
 - Challenges: Project schedule being delayed due to inadequate Administrative DEIS; untimely and insufficient cultural, biological and visual resource data from environmental contractors; delays due to project developer financial commitments to support NEPA analysis and contractors; routes affecting Greater Sage-Grouse and habitat; limited flexibility in Oregon state siting policy for sage-grouse habitat; potential routes crossing irrigated agricultural lands and other private lands
- Energy Gateway South Transmission Project - The project is designed to provide redundancy to existing infrastructure and improve ability to provide reliable service to customers; support future load growth in Wyoming, Colorado, and Utah; provide increased transmission capacity for third-party transmission users.
 - Challenges: Proposed routes affecting Greater Sage-Grouse and habitat; finalizing Greater Sage-Grouse mitigation; crossing Tuttle Ranch and proposed conservation easements in Colorado; co-locating project adjacent to existing projects and the TransWest Express project; routes impacting private lands
- Vantage Pomona Transmission Project * *PNWRIT Priority Project* - The project is designed to eliminate redistributed loads and overloading of the adjacent transmission system; ensure continued reliable and efficient service to Yakima Valley and address potential reliability issues within the Mid-Columbia Transmission System.
 - Challenges: Potential visual impacts; private landowners desire to minimize routes on private lands; proposed route across Joint Base Lewis McChord Yakima Training center (JBLM-YTC) which is designated as a Priority Area of Conservation (PAC) for sage-

grouse; minimizing impacts to cultural resources and properties for route crossing JBLM-YTC; analysis of a buried transmission line as a design alternative

FIRE

The Bureau of Land Management is working with local, state, and federal cooperators to ensure that we stop the majority of wildland fires in the first burning period. Areas of focus include: Using science-based decision support tools to anticipate the next problem areas; positioning fire suppression resources to where they will next be needed; approving severity funding allocations to temporarily increase fire suppression staffing; and conducting fire prevention activities including using education and fire restrictions where necessary.

This fire season is anticipated to be a challenging one due to overall drought conditions. Yet through the use of forecasting support tools, positioning resources where they're needed the most and efficient use of severity funding, BLM has contained about 96% of its fires during initial attack.

The combined efforts of local, state and federal agencies will continue to emphasize the safety of the public and firefighters, while also containing a high percentage of wildfires during initial attack without incurring unneeded risk. Below are several questions that you may encounter based on recent interest from several of our state partners:

Idaho:

Q. What kinds of relief can you provide for ranchers that have had to displace livestock based on the loss of forage in the 2012 fire season? Are there opportunities for forage banks or vacated allotments that can be a temporary source of forage?

A. All of the allotments in Idaho are currently under existing grazing permits and authorizations; at this time there are no opportunities for forage banks and there are no vacant allotments.

Utah:

Q. What are you doing to ensure that the collaborative landscape restoration efforts in Utah continue, especially in light of the BLM's new seed management process?

A. We are committed to our legacy of partnerships in Utah. Although the BLM has made some logistical modifications in the seed management process, we are going to continue to invest heavily in collaborative landscape restoration in Utah.

Special Mention:

- We are recognizing and remembering that this is the 20th anniversary of the Storm King Mountain burn over on the South Canyon Fire in Colorado where we lost 14 firefighters on July 6, 1994. Several commemorative events will be hosted in Colorado in the next month.
- We further remember that we are approaching the one year anniversary of the Yarnell Hill burn over in which 19 firefighters died. This was the single largest loss of life on a wildland fire since the 1930s. While we are still learning from both of these tragedies, the loss in both cases is fresh in our minds.
- Both of these fire entrapments have formed the foundation of this year's wildland firefighter refresher.

MITIGATION

In April, the Department's Energy and Climate Change Task Force provided the Secretary with a report summarizing a coordinated Department-wide evaluation and a strategy for implementing improvements in the Department's mitigation practices and policies. Based on the report's findings, various offices and

bureaus of the Department have begun to implement policy and programs aimed at strengthening mitigation practices.

- FWS is in the process of revising its mitigation policies;
- BLM is implementing a draft Regional Mitigation Policy that will be updated and finalized consistent with the guidance contained in the Departmental report;
- BLM released its first regional mitigation plan for the Dry Lake solar energy zone (SEZ) and will conduct additional outreach to aid in designing future SEZ regional mitigation plans;
- BLM, FS, and FWS are working together to develop a mitigation strategy as a part of the larger Greater Sage-Grouse conservation initiative;
- USGS is leading efforts to develop geospatial data tools for landscape-scale mitigation and will be convening a workshop of partners later this year;
- The NPS is convening a workshop to develop guidance for mitigating impacts to cultural resources under Section 106 of NHPA and will also be convening experts to develop guidance for landscape-scale mitigation for preserving scenic values.

Q. How does this strategy impact work to conserve the Greater Sage-Grouse?

A. The BLM is nearing the final stages of amending 98 Resource Management Plans to account for conservation of the Greater Sage-Grouse. The bureau is already working closely with the FWS and states wildlife agencies to ensure that these final plan amendments contain robust provisions for mitigating impacts to Greater Sage-Grouse habitat. The BLM anticipates working closely with states to plan for and execute mitigation in these areas.

Q. How does this strategy relate to ongoing work by states, including state wildlife action plans and the Western Governors Association's (WGA's) Critical Habitat Assessment Tool (CHAT)?

A. State wildlife action plans, WGA's CHAT, and similar plans and strategies are useful in identifying the most ecologically important areas in a state, thus informing effective decisions regarding the avoidance or minimization of impacts as well as the siting of compensatory mitigation measures. The statewide perspective that such plans provide will help facilitate the landscape-scale approach to mitigation that the strategy seeks to accomplish.

Q. What role will states have in determining the location and breadth of specific compensatory mitigation?

A. As noted above, State judgments about the relative ecological importance of particular areas, as reflected in their CHATs or state wildlife action plans, are expected to be important considerations in determining the location of compensatory mitigation measures. In addition, by becoming formal cooperating agencies in the NEPA process, states can help implement the Strategy with respect to all aspects of mitigation.

Q. How will this mitigation strategy be implemented in the field? Will staff be trained on how to implement the proposed mitigation strategies?

A. The principles outlined in this mitigation strategy will be incorporated into formal Departmental and bureau policy that will guide decision-making in the field. The strategy also calls for clear and consistent training for field staff based on these policy changes. Field staff have been closely engaged in drafting the strategy and will continue to be relied upon as the Department and bureaus develop these manuals, handbooks, and training modules.

Q. How does this mitigation strategy fit with Presidential initiatives to modernize the Federal review of infrastructure projects and to adapt to the impacts of climate change?

A. The Department believes that its Mitigation Strategy and the various actions planned to carry out the Mitigation Strategy are necessary components to the Department's ability to effectively implement the

President's various initiatives relating to permitting efficiencies, large infrastructure project reviews, and climate change adaptation. All of these initiatives require federal agencies to take a landscape-scale approach to planning, permitting, and conservation, which is the fundamental purpose of Secretarial Order No. 3330 and the Department's Mitigation Strategy.

HYDRAULIC FRACTURING

Formal rulemaking to revise BLM regulations related to hydraulic fracturing on federal and Indian lands was initiated in May 2012 with publication of a proposed rule. A revised proposed rule was published in May 2013. During the most recent formal comment period, which closed on August 23, 2013, the BLM received more than 1.35 million comments.

Based on analysis of these comments, the BLM staff have suggested some modifications to the regulatory text and the preamble of the final rule for consideration, all of which are viewed by the Solicitor's office as logical outgrowths of the proposed rule. We expect to have a draft of a final rule, preamble, and accompanying analyses available to begin Departmental review within ten days.

The proposed rules have focused on addressing public disclosure, wellbore integrity and flowback fluid management as the key issues for sound hydraulic fracturing development. Most of these issues are not adequately addressed in the BLM's existing, 30-year-old regulations.

During the time this rule has been in development a number of states and tribes have issued or begun work on their own rules related to hydraulic fracturing. BLM has worked closely with the relevant regulatory officials as well as EPA to utilize their expertise on these issues. States with federal oil and gas development that have issued rules in this area are: California, Colorado, Montana, New Mexico, North Dakota, Texas, Utah and Wyoming. The rules vary considerably from state to state. Below are several key issues that may be discussed:

Well integrity - The issue is determining the best means of ensuring zonal isolation and competent cementing in the wellbore. Experts and commenters differ on various aspects of this issue, including the value of cement bond logs or cement evaluation logs as compared to other tests; testing necessary for surface casing as opposed to production and intermediate casing; and the utility of an individual "type well" in a formation in ensuring comprehensive well integrity.

Requiring the use of tanks for recovered water - The 2013 proposed rule would have required recovered water from HF operations to be stored in either lined pits or tanks. The current thinking is to strengthen that requirement by mandating storage in tanks in all instances unless an exception is specifically approved based on a robust set of criteria. This revised proposal may increase operational costs.

Definition of the term usable water - This definition is the trigger for determining which zones to be drilled require isolation. The current thinking is to clarify this definition and to utilize as much as possible the determinations about usable water developed by States and Indian tribes governing the water zones in their areas.

Public Disclosure - The rule intends to improve public access to information about the chemicals used during hydraulic fracturing of particular wells as well as locations of existing and proposed wells and information about other activities affecting the community.

Positions of Interested Parties

- **Government:** State Governors' offices generally question the need for the rule and some question BLM's authority. Some states believe hydraulic fracturing is already effectively regulated at the state level and that Federal regulations add an unnecessary layer of duplicate regulations. BLM officials

met with state officials most recently on March 20, 2014, and had a productive exchange of views about the various state regulations and the BLM proposal, and about entering into MOUs that will efficiently administer these rules. The proposed rule provides that any state or tribal regulation that is equal to or more protective than the Federal rule will be applicable.

- Private Citizens: The public expressed a number of concerns and positions, which ranged from the request to ban hydraulic fracturing altogether (this view accounted for 95% of the 1.35 million comments received), to suggestions for ensuring the protection of groundwater, providing additional transparency for fracturing operations, and providing for prior disclosure of chemicals.

DROUGHT AND WATER ISSUES

Red River Valley Water Supply Project - In March 2014, Governor Dalrymple sent a letter to Deputy Secretary of the Interior Mike Connor regarding the Red River Valley Water Supply Project, and requested a Plan of Study put forth by the International Souris River Board (ISRB) to initiate a review of the water supply and flood operating plan contained in the 1989 Canada-United States Agreement for Water Supply and Flood Control in the Souris River Basin. A periodic review of the operating plan is required under the 1989 agreement. However, due to unprecedented flooding in the Souris River basin in 2011, basin residents have asked that additional flood protection measures be evaluated beyond what is currently provided under the 1989 agreement.

In order to move forward the Plan of Study requires approximately \$2.1 million in funding from the governments of Canada and the United States. The State Department is currently working with Canada in regard to funding and has been for some time with little movement. The Governor and Senator Hoeven are both strong supporters of moving forward with the Plan of Study and have requested Secretary of State Kerry's support.

Colorado River Basin Drought - Throughout history, there has never been a shortage condition determined in the Lower Basin (Nevada, Arizona and California). A shortage is deemed to occur when Lake Mead reaches elevation 1,075 feet. The elevation is currently around 1,089 feet, but is forecast to reach 1,081 feet by October. Reclamation met all water orders from U.S. water users in the Lower Basin and Mexico in 2013, and all delivery orders in the Lower Basin will be met in 2014. However, over the next 5 years, the potential for a shortage condition exists, with probabilities ranging from 22% in 2016, 51% in 2017, and 62% in 2018.

In water year 2014, snowpack in the Upper Basin peaked at 111% of average on April 7. Runoff is well underway and approximately 40% of the snowpack has melted. The probable forecast for water year inflow into Lake Powell is currently 100% of average. The current projected total Basin storage is approximately 51% of capacity for end of water year 2014.

Although the Basin States remain committed to continuing discussions, there does not yet appear to be a consensus on which actions should be pursued at this time. The Upper Basin States are pursuing a plan with 3 major components: operational adjustments, voluntary demand management (e.g. fallowing or deficit irrigation), and augmentation (primarily weather modification). The Lower Basin States are pursuing a 5-year plan consisting of "no regrets" actions beginning this year and voluntary reductions or other efforts to protect low Lake Mead elevations (somewhere between 1,000 and 1,020 ft). The Lower Basin States view a Federal commitment to decrease operational inefficiencies in the Yuma area as a key component to the plan. The Lower Basin States would also like Reclamation to fully engage in the process to develop the plan in more of a co-lead or full-partnership role.

Minute 319 - On May 15, the downstream edge of the environmental pulse flow of Colorado River water - released under Minute 319 - reached the tidal delta of the Pacific Ocean connecting the River with the

Gulf of California for the first time in history as a purposeful environmental flow. This is considered a major achievement among the NGOs and scientists that have worked on Colorado River Delta issues over the past two decades. Delivery of the pulse flow began on March 23 from Morelos Dam, the last diversion dam on the Colorado River located at the U.S./Mexico border, and was completed on May 18th. Approximately 105,000 acre-feet were delivered in the form of a pulse flow to the Colorado River riparian corridor. Negotiating an extension of Minute 319 by December 2016 is a high priority, and we believe the pulse flow success will help pave the path to reaching an agreement.

Glen Canyon Dam - Drought conditions upstream of Lake Powell over the past two years have significantly reduced the elevation of Lake Powell. The declining elevation has reduced generation efficiency by approximately 10 percent. Generation at Glen Canyon Dam accounts for about 80 percent of the Salt Lake City Area/Integrated Projects (SLCA/IP). Reductions in generation at Glen Canyon Dam have a significant impact on SLCA/IP generation revenues available in the Upper Colorado River Basin Fund which fund operation and maintenance, salinity control, security, environmental related costs, and repayment obligations. Based on design criteria for the Glen Canyon generators, when Lake Powell drops below elevation 3,490 feet, power can no longer be generated. As of May 20, 2014, Lake Powell is currently 117 feet below full elevation of 3,700 feet and is 93 feet above minimum power pool (3,490 feet). Latest projections indicate that the first probability of reaching minimum power pool is water year 2018 (4 percent chance). Reclamation is actively partnering with the seven Colorado River Basin States to identify proactive steps to avoid reaching critical elevations at Lakes Powell and Mead.

Great Plains and Drought - Mountain snowpack in Colorado, Montana, and Wyoming remains well above average for this time of year. Cool temperatures have moderated the rate of snow melt, but the runoff is beginning with warmer temperatures. Precipitation in the Dakotas has been near normal this spring; however, with the large precipitation events in the fall and winter, spring runoff conditions are average, and normal for this time of year. In the climate outlook for June for this northern section of the Great Plains Region, temperature is predicted to be below normal with above average possibility for higher precipitation occurring.

Northwest Area Water Supply (NAWS) Project - NAWS is a municipal and rural water project authorized by the Garrison Diversion Reformulation Act of 1986 and the Dakota Water Resources Act of 2000, and construction of project features began in April 2002. When complete, the project would deliver water from the Missouri River to communities and rural water systems in North Dakota located in the Hudson Bay Basin.

Construction continues on the Minot Water Treatment Plant Improvement Project. On March 1, 2013, Judge Collyer issued a ruling on the issue of whether to allow further work to be bid for continued construction of distribution facilities. The ruling will allow completion of the upgrades at the Minot Water Treatment Plant. However, the modified injunction "will not permit new pipeline construction or new pipeline construction contracts." Progress continues on the preparation of the draft SEIS, and Reclamation plans to release the draft SEIS for a 45-day public review starting in late-June or early-July 2014. Public hearings will be hosted in Minot, ND, during the public review period.

Rural Water Projects – (ND and SD)

Since 1980, Congress has directed Reclamation to construct 13 individual rural water supply projects at a combined cost of more than \$2.3 billion. Projects have been authorized with varying local cost-share ranging between 0 and 25 percent. Federal law directs Reclamation to operate, maintain, and replace (OM&R) two projects authorized to benefit Tribes; including Garrison Diversion Unit in North Dakota and Mni Wiconi Rural Water System in South Dakota. Indian Rural Water Supply Project O&M costs rise as new project features are constructed – consuming an increasing share of Reclamation's overall budget allocated to rural water projects.

Mni Wiconi Rural Water System (SD) – As of September 30, 2013, the Federal Government has committed 100 percent of its cost share toward completing the Project. The Core line and Lower Brule distribution system are complete. The West River/ Lyman-Jones distribution system, Rosebud distribution system and Oglala distribution system are nearing completion and construction is anticipated to be substantially complete in FY 2015.

Garrison Diversion Unit (ND) – As of September 30, 2013, the project was approximately 72 percent complete (as financially determined). The federally-funded portion of the project was approximately 69 percent complete. Work continues on (1) the State municipal, rural and industrial (MR&I) water supply program administered by the State of North Dakota, and (2) the Indian MR&I water supply program for the construction of five reservation-wide systems, including Standing Rock, Fort Berthold, Fort Totten, Turtle Mountain, and Trenton Indian Service Area.

Reclamation is preparing a Supplemental Environmental Impact Statement (SEIS) for the Northwest Area Water Supply Project as a means of complying with the U.S. District Court order issued in March 2010. The Garrison Diversion Unit is located within and affected by the Northwest Area Water Supply Project. Reclamation is planning to release a draft SEIS on NAWs in 2014.

Lewis & Clark Regional Water System (SD, MN, IA) – As of September 30, 2013, the Federal portion of the project was approximately 55 percent complete (as financially determined). The Water Treatment Plant, funded by the American Recovery and Reinvestment Act, was placed into service on July 30, 2012, and is delivering treated water to 11 of the 20 member entities. Due to limited Federal appropriations, the project is exploring options to accelerate construction with grants/loans from the Minnesota, Iowa, and South Dakota State governments. South Dakota and Minnesota passed legislation authorizing \$1 and 22 million grants respectively, and Minnesota enacted a \$45 million bonding authority for in-state project beneficiaries. Lewis & Clark intends on using any future Federal appropriations to reimburse construction cost by repaying the entities that provide funding in excess of the non-Federal cost-share required in the authorizing legislation.

Next Steps - Continuing to evaluate OM&R budgets for Tribal Rural Water Projects to assure the reliable delivery of quality drinking water; continuing to prioritize federal funding for construction consistent with the Interim Final Funding Criteria for Rural Water Projects; continuing to work with Lewis & Clark Rural Water System to address questions/issues that need to be resolved to enable the project to proceed with construction with non-Federal funding.

LAND EXCHANGE VALUATION PROCESS

Governor Gary Herbert (UT) may want to discuss land exchange, particularly the appraisal process.

Governor Herbert could raise an issue with the length of time it takes to complete land exchanges between the Bureau of Land Management (BLM) and the State of Utah. The BLM and the State of Utah recently completed the Utah Recreational Land Exchange (URLEA), which was mandated by legislation.

The URLEA land exchange involved over eighty tracts of land totaling about 80,000 acres with values that included consideration of the potential for oil, gas, coal, tar sands, potash, and flagstone. The Office of Valuation Services, together with SITLA experts in Utah, developed a scope of work encompassing surface and sub-surface valuations, designed appraisal contract specifications, evaluated potential appraisers, and conducted joint mineral valuation and appraisal reviews. This valuation process stands as a model for how collaborative effort can successfully help achieve large-scale exchanges that benefit the land management goals of both the State and Federal governments.

There are a number of procedures that BLM must follow to ensure that land exchanges are in the public interest. The BLM is also required to follow the Uniform Standards for appraisals, to ensure that we obtain the fair value for the lands we exchange out of public ownership. The Department has had a long-standing position that the Uniform Standards for appraisals be used when Congress mandates a land exchange. The Governor may express the opinion that these processes are too time consuming. The BLM's position is that these processes are necessary to protect the public interest.

UNITED STATES EXTRACTIVE INDUSTRIES TRANSPARENCY INITIATIVE (USEITI)

Governor Matt Mead (WY) has expressed interest in discussing USEITI with you at this meeting.

You may want to mention your participation in the upcoming USEITI Multi-Stakeholder Group (MSG) meeting on June 10, 2014, regarding the EITI International Board's approval of the USEITI Candidacy Application. Since achieving Candidate Country status on March 19, 2014, the USEITI MSG convened its first meeting of 2014 on April 23-24, and began working on the details of domestic implementation. As a candidate country, the U.S. has three years to fully implement the international EITI standards and achieve "compliant" status.

It is anticipated that during this public meeting, the USEITI MSG will review options for a State and Tribal "opt-in" process. The development of this process is critical to addressing USEITI implementation concerns raised to Assistant Secretary Rhea Suh by the Western Governors' Association and the Interstate Mining Compact Commission, as well as an essential part of fulfilling the Department of the Interior's Indian Trust responsibility. The MSG is likely to discuss a plan to implement other key EITI requirements, such as project level reporting and the inclusion of income tax revenue and payments in USEITI reporting.

You may also wish to mention that on April 7, 2014, you appointed Mr. Michael D. Mathews upon recommendation by Governor Mead as an alternate member on the USEITI Advisory Committee. His term lasts until December 21, 2015.

MOUNT RUSHMORE

Governor Dennis Daugaard (SD) expressed interest in discussing with you the opportunity for a long-standing contract that would allow Mount Rushmore National Memorial to remain open in the event of a future government shutdown. NPS assumes the proposed contract would allow South Dakota to operate the park with State funds in the event of a cessation of Federal appropriations, as it did for four days during the course of the Federal shutdown in October 2013.

On October 1, 2013, the Federal government shut down for 17 days. Beginning on October 11, 2013, the National Park Service (NPS) entered into agreements with six States including South Dakota, to re-open national parks with State funds. States were required to fund the park or parks for no fewer than two days, to re-open with NPS employees, and to sign an agreement stipulating that no expended funds would be returned to the State unless Congress explicitly appropriated funding for that purpose. South Dakota signed an agreement with the NPS and transferred ten days worth of funding to operate Mount Rushmore on October 14, 2013. The park re-opened and operated with State funds for three days until Federal operations resumed on October 17, 2013. The NPS returned seven days' worth of unused funds to the State.

We appreciate the Governor's enthusiasm for ensuring that all visitors who arrive to visit Mount Rushmore National Monument have access to this spectacular site. However, we cannot support a long-

standing agreement with a non-Federal entity to continue to fund a national park in the event of a future shutdown. In the case of a lapse in Federal appropriations, all policy decisions governing operations will be made during the event by the Administration in charge at the time (Similarly, we imagine a State governor cannot bind the financial or policy decisions of a future Governor). Such policy decisions are made under very specific circumstances that may not be repeated should we be unfortunate enough to encounter another shutdown.

We are also uncomfortable codifying an approach that would allow certain parks to re-open only because they are fortunate enough to reside in a State with the resources and political will to fund them. Further, had the shutdown lingered, the costs associated with reopening certain parks would have had to be revisited, as it is nearly impossible to divorce one park's operations from the regional and national offices that support that park unit with numerous administrative functions.

WILD HORSES AND BURROS

Governor Matt Mead (WY) may wish to discuss this issue with you.

In order to protect our public lands' natural resources and comply with the Act, the BLM has been conducting gathers to remove excess animals from the range as well as to administer various population growth suppressions methods, including fertility control vaccines. Prior to the economic slowdown that started about a decade ago, the BLM's Wild Horse and Burro Program (Program) was able to successfully adopt the majority of the animals removed from the range. However, adoptions have decreased markedly. It is increasingly difficult to find willing and qualified adopters and buyers.

On-range populations are nearly double Appropriate Management Levels (AML) and the BLM currently cares for nearly 48,000 animals off-range, costing \$46 million in FY 2013. This expense is limiting the application of population growth suppression methods and the number of animals that can be removed, resulting in increasing overpopulation on drought stricken western rangelands.

The June 2013 National Academy of Sciences (NAS) Report provided BLM with multiple recommendations for program improvements. BLM has drafted a report that identifies how BLM will implement the recommendations and is also developing a long-term strategy for the achievement and maintenance of AML. Budgets have progressively increased from \$19 million in 2000 to \$77 million in FY 2014. Rising costs for holding increasing numbers of unadopted animals are the primary reason for budget increases.

Rock Springs Grazing Association

- Rock Springs Grazing Association (RSGA) owns and leases 48 percent of private land across four checkerboard Herd Management Areas (HMAs) in southern Wyoming.
- In October 2010, RSGA requested that BLM remove all wild horses on these private lands.
- In April 2013, BLM and RSGA entered Consent Decree requiring that BLM:
 - Remove all wild horses on private RSGA lands (except in White Mountain HMA);
 - Remove to low appropriate management level (AML) (251 in Salt Wells Creek HMA and 610 in Adobe Town HMA) and use fertility control to reduce population growth;
 - Gather and remove wild horses in Salt Wells Creek/Adobe Town Complex in 2013, Divide Basin HMA in 2014, and White Mountain HMA in 2015; and
 - Report population census by November 30 annually.
- In December 2013, the BLM finished the Adobe Town and Salt Wells Creek removals. The BLM has tentatively scheduled the Divide Basin removal for summer or fall 2014.
- The State of Wyoming is monitoring the results of Consent Decree; Governor's Office has informally requested AML information over the last several months.

- In 2003, BLM and State of Wyoming entered into a separate Consent Decree mandating removals within one year of population exceeding AML in each HMA.

GRIZZLY BEAR DELISTING

Governor Matt Mead (WY) sent a letter in May 2014 asking that the grizzly bear be delisted, and may wish to discuss this further at the meeting.

Q: What are your plans regarding the Grizzly Bear?

A: FWS is completing a threats analysis for the Yellowstone distinct population of grizzly bears. They expect to make a decision on whether to proposed to delist this population by late 2014 and, if so, to make a final delisting determination in 2015. FWS is also working with tribal, state and federal partners to complete a conservation strategy for grizzly bears in the Northern Continental Divide Ecosystem. Once this conservation strategy is complete, the Service will conduct a threats analysis and determine whether a delisting proposal is warranted for this population. If so, they would likely publish a proposed delisting.

Q: Is the FWS working on delisting of grizzly bears in the Northern Continental Divide Ecosystem (NCDE) in Montana?

A: The FWS is working with state, Tribal, and federal partners to complete the NCDE Conservation Strategy, which is the post delisting management plan. Completion of the Conservation Strategy is a Recovery Plan task. This document, once completed, will demonstrate the adequacy of regulatory mechanisms in order to address ESA Factor 4 for delisting. Upon completion of the Conservation Strategy, the FWS will complete a threats analysis for this population and make a determination as to if the threats to this population have been addressed. If the result of this threats analysis is that the threats to this population have been addressed, the Service will publish a proposed rule to delist this population. Such a proposed rule could be published in late 2015, pending timely completion of the NCDE Conservation Strategy and a favorable threats analysis.

Q: Can the Cabinet/Yaak and Selkirk grizzly recovery zones be combined with the NCDE recovery zone so that all of them can be delisted together?

A: The conservation status of the Cabinet/Yaak and Selkirk grizzly recovery zones is much different than that of the NCDE recovery zone. These two populations are warranted for endangered status. A recent Wildlife Monograph concluded that the US recovery zones are not currently functionally connected demographically in such a way as to affect the internal population growth or vital rates through inter-population connectivity. Based on this information, these recovery zones cannot be considered a single population unit and recovered as one population unit at this time.

FEDERAL PERMIT STREAMLINING PROJECT

Governor John Hickenlooper (CO) and Governor Brian Sandoval (NV) sent a letter in April 2014 asking for reauthorization of the Federal Permit Streamlining Pilot Project.

Section 365 of the 2005 Energy Policy Act established a federal permit streamlining pilot project (Pilot Project) to increase coordination, reduce the time to issue APDs and improve environmental stewardship as a means to meet the nation's energy needs. The Act also established a funding mechanism/source that diverted 50 percent of the federal share of onshore lease rental receipts from the U.S. Treasury to the BLM.

It has been very successful in improving interagency coordination and reducing the time to process federal O&G APDs and ROWs. Without extension, the pilot project and the associated funding authority will expire in August of 2015. The BLM's FY 2015 President's Budget does not propose an extension of

the funding mechanism for the pilot office fund; the BLM is currently evaluating options for addressing this situation in the FY 2016 budget.

In December 2013, Congress passed and the President signed H.R. 767, expanding the scope of the Pilot Project and providing additional discretion to the BLM. However, H.R. 767 did not include an extension of the funding.

On April 3, 2014, Governor Hickenlooper and Governor Sandoval sent Secretary Jewell a letter on behalf of the Western Governors' Association (WGA) requesting the Department's support for the reauthorization of the Pilot Project. The Secretary responded to WGA in a letter dated April 17, 2014, stating that the 10-year Pilot Project had been a success that allowed the BLM and its Pilot Project partner bureaus and agencies to more efficiently process oil and gas drilling permits and streamline associated environmental reviews, it provided BLM's oil and gas inspection and enforcement program with resources necessary to allow more thorough oversight of oil and gas operations, and the Department would work with Congress to provide additional flexibility nationwide to utilize the pilot office authority as permitting demands shift over time.

MASTER LEASING PLANS – OIL AND GAS

Master Leasing Plans (MLP) involve preplanning and intensive analysis of distinct geographical areas to avoid and minimize conflicts between oil and gas activity and recreation, water, air, cultural, and wildlife values. Some areas with high value resources need additional planning and analysis prior to issuing new or additional oil and gas leasing. The MLP process enables the BLM to take a focused landscape-level look at the decisions in Resource Management Plans (RMP) pertaining to leasing and post-leasing development of the area. This tool provides a vision for how future development will occur. The BLM is developing MLPs both as part of the development of new RMPs, and as amendments to existing RMPs. Attached is a list of the MLPs currently under development in Western States.

Table 1. Status of the BLM's Master Leasing Plans

State	Resource Management Plan/Amendment	Status
CO	1 External Proposal	
	o Shale Ridges and Canyons – part of the Grand Junction RMP Revision	Draft RMP published in January 2013; a Proposed RMP expected in FY14
	2 Internal Proposals	
	o North Park – part of the Kremmling RMP-A	Proposed RMP published in March 2014. ROD expected September 2014. .
	o South Park – part of the Royal Gorge RMP Revision	Draft RMP expected in December 2015. Proposed RMP expected in February 2017.
	1 Modified External Proposal	
o Dinosaur Trail – part of the White River RMP-A	BLM modified the boundaries of the original Dinosaur Lowlands proposal to create the Dinosaur Trail proposal; Draft RMP-A published in September 2012; a Proposed RMP-A expected in early summer of FY14	
MT	1 Internal Proposal	
	o Carter MLP – part of the Miles City	Draft RMP published in March 2013; Proposed RMPA is

State	Resource Management Plan/Amendment	Status
	RMP Revision	expected in FY14.
UT	4 Modified External Proposal	
	o Book Cliffs Divide - Grand Valley - Cisco Desert MLP	Have not been initiated.
	o Glen Canyon - San Juan River MLP	Have not been initiated.
	o San Rafael River MLP	Have not been initiated.
	o Vernal MLP - stand-alone analysis	A MLP in the Vernal Field Office appears to be likely for enhanced analysis related to the MLP process for fluid minerals, mainly oil development.
	1 Internal Proposal	
o Moab MLP – stand-alone analysis	NOI for the RMP-A was published in March 2012; open house to update the public on draft alternatives was on May 14, 2014. Draft MLP in development; anticipate 90-day public comment period to begin February 2015. Publish NOA for Final MLP/EIS in November 2015. Issue ROD in February 2016.	
WY	5 External Proposals	
	o Absoraka-Beartooth Front – part of the Bighorn Basin (Cody and Worland) RMP Revision	The Draft Final RMP is being prepared.
	o Fifteen Mile Area (Worland) – part of the Bighorn Basin RMP Revision	
	o Bighorn Front – part of the Bighorn Basin (Cody and Worland) RMP Revision	
	o Beaver Rim – part of the Lander RMP revision	The ROD has been drafted but is on hold for signature at WO direction. The Final EIS was published last year.
o Little Mountain – part of the Rock Springs RMP revision	Draft MLP in development.	

FY – Fiscal Year

NOA – Notice of Availability

ROD – Record of Decision

RMP – Resource Management Plan

RMP-A – Resource Management Plan Amendment

TRIBES

Governor Steve Bullock (MT) sent a letter in October 2013 regarding federal recognition for the Little Shell of the Chippewa Tribe. During the WGA breakfast in February, Governor Bullock mentioned law enforcement challenges in Indian country.

Little Shell Tribe of Chippewa Indians of Montana

The Little Shell Tribe of Chippewa Indians of Montana (Little Shell) is made up of the descendants of Métis Indians (mixed-blood, or half-blood, Indians and often the offspring of French fur trappers and

Indian mothers), and was historically treated different than other Pembina Indians by the US because of their mixed-blood heritage. The US government refused to deal with Métis Indians because it viewed them as having Indian ancestry, but not being Indian, which in turn forced the Métis ancestors of the Little Shell tribe to seek other Métis settlements on the outskirts of towns like Helena, Great Falls, and Butte, MT.

In 1978, Little Shell first submitted its intent to petition the Federal government for acknowledgment as an Indian tribe under Federal law. In 1995, their petition was complete, beginning a long review process by the Office of Federal Acknowledgment. Earlier this year, AS-IA agreed to suspend reconsideration of the issues referred from the IBIA until after the promulgation of newly revised regulations on the Federal acknowledgment process, which is currently underway.

The Department recently published a Proposed Rule in the Federal Register, which revises the Part 83 regulations on Federal acknowledgment. After all public comments are received a final rule may be drafted. The Office of the AS-IA has asked that Little Shell request within 90 days of publication of the final rule for us to begin reconsideration of its petition under the grounds referred to the Department by the IBIA, and any new grounds which may result from changes in the regulations. The Little Shell tribe's petition for Federal acknowledgment has the support of its sister tribes in Montana, the Governor's office and the State of Montana, which recognized the Tribe in 2000.

Law Enforcement Issues

On July 29, 2010 the President signed the Tribal Law and Order Act of 2010 into law. There are several requirements specific to the United States Department of the Interior (DOI) or the Bureau of Indian Affairs, Office of Justice Services (OJS). One such requirement is that the OJS submit to the appropriate committees of Congress, for each fiscal year, a detailed spending and unmet needs report regarding tribal public safety and justice programs.

State of Montana funding (FY 2012)

	<i>Actuals</i>	<i>BIA Estimate of Unmet Need</i>
<i>Criminal Investigation & Police</i>	\$15,553,374	\$8,748,209 = 34% unmet
<i>Detention</i>	\$9,388,285	\$7,254,249 = 38% unmet

Montana Tribes

- Crow Agency - Tribal leadership feels the agency is not adequately staffed for the amount of acreage and population. They have requested that our allocated funded positions be increased to meet the demands on the Crow Reservation. They are also concerned with the length of time it takes to hire police officers and get them on board.
- Northern Cheyenne Agency - Tribal leadership is concerned with the recent turnover in employees, as well as the length of time it takes to hire and train new officers.
- Blackfeet - The current and ongoing conflict at this agency has consumed most of their time. They are also concerned with funding.
- Funding is the primary concern for the following: Fort Belknap, Fort Peck, Rocky Boy.

ABANDONED MINE LAND (AML) FUNDING

Governor Matt Mead (WY) may wish to discuss this with you. He sent a letter in May 2014 regarding the review and reversal of OSM's decision on AML funding to Wyoming.

Governor Mead's letter requested reconsideration of our estimate that Wyoming will be allocated approximately \$53.8 million in AML funding in Fiscal Year 2015. After review and consultation with the Office of the Solicitor at the Department of the Interior, we conclude that OSMRE's interpretation of the Surface Mining Control and Reclamation Act of 1977 (SMCRA), as amended, is correct. There is a response letter currently making its way through the surname process at Interior.

INVASIVE SPECIES

WGA Chairman John Hickenlooper's (CO) staff indicated that Governors may ask you about invasive species efforts.

A number of western states have expressed dissatisfaction with the federal level of support and coordination to control and prevent the spread of invasive species. The WGA has called invasive species "... one of our country's biggest environmental problems" in a recent WGA resolution that expresses concerns over the continued introduction and spread of invasive species in Western states, including:

- the perceived lack of coordination among federal agencies;
- the need to prioritize resources to focus on those species with the greatest potential to cause economic harm;
- the importance of linking invasive species management to broader Departmental and Administration goals.

Invasive Species Examples

Global damage from invasive species is estimated at upwards of \$1.4 trillion or about 5 percent of the global economy. Examples for the western US:

- Cheatgrass is estimated to infest over 56 million acres across 17 western states impacting rangelands, changing the native plant community, and increasing fire frequency. This grass can produce more than 10,000 plants per square yard leaving behind thick dry fuels and creating extreme wildfire hazards. With each new fire, cheatgrass reseeds to further change the native plant community and increase fire threats.
- Quagga and zebra mussels have spread from the Great Lakes to much of the U.S., clogging water intake and delivery pipes, infesting hydropower infrastructure, and negatively impacting native species. An annual loss of \$22 million is estimated for the Lake Tahoe region if quagga or zebra mussels become established there. Funding for quagga and zebra mussel prevention and coordination has been included within the FY 14 President's Budget.

Ongoing Initiatives at Interior

Interior agencies are working to cooperate and coordinate more closely to enhance invasive species prevention and control programs through existing agency programs as well as working on a multi-agency and multi-departmental basis through the National Invasive Species Council (NISC) - which you co-chair - and the Aquatic Nuisance Species Task Force (ANSTF) co-chaired by the FWS and NOAA. NISC and ANSTF have established a federal working group to strengthen and harmonize policies and regulations to stop the introduction of invasive species onto or off of DOI lands - especially invasive zebra and quagga mussels in western states. The Pulling Together Initiative, administered by the National Fish and Wildlife Foundation with funding from the Bureau of Land Management, the US Fish and Wildlife Service and the Forest Service, fosters local cooperative weed coalitions to improve the effectiveness of local invasive plant programs.

Interior recently approved the Invasive Species Action Plan to target limited resources more effectively and efficiently. This approved Action Plan includes 5 recommendation areas and 25 action items that will help Interior get our house in order on this important issue. Some topline items include:

- The development of a multi-year strategy with annual operations plans to guide improved alignment of invasive species programs and to provide regular briefings for the Department's senior leadership.
- The development of a Departmental policy providing guidance to more effectively align and execute resources in support of invasive species prevention, detection, rapid response, and control.
- Coordination of a departmental informational management effort on invasive species to create efficiencies and eliminate duplication. This would include an effort to better standardize data collection and increase transparency. And;
- The development of an EDRR framework for invasive species that outlines protocols and guidance for the allocation of resources.

Next Steps

- Streamline the FWS injurious species listing process to keep harmful species out of the nation.
- Partner with NFWF to support actions to address early those invasive species not yet widely established through Early Detection and Rapid Response.
- Strengthen existing regional coordination efforts (e.g. the Pacific Islands and Everglades) and build new regional efforts (e.g. the Arctic and Great Lakes) as appropriate to enhance our ability to address invasive species threats and damages.
- Early in 2014, the WGA wrote to the co-chairs of NISC (including you) expressing interest in working with NISC on the revision of the National Invasive Species Management Plan. NISC and WGA staff held a conference call in late March 2014 to discuss this issue. NISC looks forward to working with WGA on the management plan update this summer or in early fall.

MARIJUANA

Background

Cultivating marijuana is illegal under the Federal Controlled Substances Act of 1970 (CSA). Several Western states have decriminalized production/use of marijuana. Reclamation recently issued a Temporary Reclamation Manual Policy to address the potential use of Reclamation water (or facilities to convey other entities' water) used to irrigate marijuana.

Discussion

After consulting with the DOI Solicitor's Office and the Department of Justice, Reclamation has concluded it has an obligation to operate its facilities in a manner consistent with the CSA. The application of the CSA to Reclamation projects is founded in Section 8 of the 1902 Reclamation Act which requires the federal government follow state law when acquiring water rights for Federal reclamation projects and distributing project water, unless the relevant state law conflicts with an express congressional enactment (such as the CSA).

Policy

Reclamation will: (1) not approve requests for use of its facilities or water to cultivate marijuana; (2) report such uses to DOJ if they become known to Reclamation; and (3) compile/maintain records of all activities/communications regarding known or potential prohibited uses of its water or facilities. *Note:* Commingling of Reclamation and non-Reclamation water in non-Federal facilities does not subject the non-Reclamation water to the restrictions on Reclamation water and facilities addressed in the Policy.

U.S. DEPARTMENT OF THE INTERIOR NEWS BRIEFING

Mobile version and searchable archives available at interior.bulletinintelligence.com.

DATE: FRIDAY, JUNE 6, 2014 7:00 AM EDT

TODAY'S TABLE OF CONTENTS

DOI IN THE NEWS:

- + Secretary Jewell Tours Jamestown.
- + Nisqually Wildlife Refuge Center To Be Named For Norm Dicks.
- + Investigators Find "Inappropriate" Behavior By Former Assistant Interior Secretary Babauata.
- + Report Finds Interior's Website Outage Aggravated By Miscommunication, Poor Planning.
- + Western Utility Regulators Mull Regional Cooperation On EPA Rule.
- + Op-Ed: Izembek Road Would Threaten Food Supply Of Alaska Natives.
- + Constitutional Expert: Secretary Jewell Helps Shape Expand Civil Rights.

AMERICA'S GREAT OUTDOORS:

National Park Service:

- + Yellowstone National Park Begins Project To Replace Grand Loop Road.
- + Researchers Find Evidence Of First-Ever Hatching Of Condor Chick In Utah.
- + Contractor Admits To Directing Illegal Dumping Into Potomac River.
- + Ceremony To Mark D-Day Anniversary.
- + NPS Announces New Interim Superintendent For Everglades National Park.
- + Five Arkansas Properties Added To National Register of Historic Places.
- + Two Historic Sites In Virginia Added To National Register of Historic Places.

Bureau of Land Management:

- + BLM Identifies Problems In Plan For New Monument.
- + BLM Releases Report On Red River Land.
- + Ranchers Deliver Petitions To Nevada Gov. Sandoval.

Fish and Wildlife Service:

- + FWS Drops Criminal Charges Over Damaged Bird Nest.
- + Sportsmen Want Governors To Follow Wyoming On Sage Grouse Protection.
- + California Board Lists Gray Wolf After OR-7 Rears Pups In Oregon.
- + "Antiques Roadshow" Bans Tusks.
- + Fishing Organizations Join To Form National Lobbying Coalition.
- + Reward Offered For Information On Shooting Of Bald Eagle.
- + FWS Restores Blueback Herring To Connecticut River.
- + Campaign Launched To Save Endangered Hawaiian Duck.

SECURING AMERICA'S ENERGY FUTURE:

Renewable Energy:

- + Additional Coverage Of BOEM's Leasing Of Test Site For Ocean Current Turbines.

Onshore Energy Development:

- + Industry Analysts: No Signs Of Drilling Slowdown This Decade.

Offshore Energy Development:

- + Chemical Safety And Hazard Investigation Board Says Gulf Operations Still Unsafe.

TACKLING AMERICA'S WATER CHALLENGES:

- + Bill Would Speed Construction Of Water Storage Projects.
- + Snake River Flows Being Increased To Benefit Trout.

EMPOWERING NATIVE AMERICAN COMMUNITIES:

- + President Highlights Commitment To Native Americans.
- + Sen. Tester Calls For Speedy Distribution Of Cobell Settlement.
- + BIA Review Finds Major Problems In Blackfeet Court System.
- + Alaska Natives Feeling Effects Of Climate Change.
- + New Regulations Streamlining Site Leasing On Navajo Nation Supported.

TOP NATIONAL NEWS:

- + Obama Forcefully Defends His Decision To Swap Taliban Leaders For Bergdahl.
- + Flood Of Children Across Border Sparks Fears Border Patrol Could Be Overwhelmed.
- + OMB Report Argues Regulations Have Massive Net Financial Advantages.

EDITORIAL WRAP-UP:

- + New York Times.
- + Washington Post.
- + Wall Street Journal.

BIG PICTURE:

- + Headlines From Today's Front Pages.

WASHINGTON SCHEDULE:

- + Today's Events In Washington.

LAST LAUGHS:

- + Late Night Political Humor.

DOI in the News:

SECRETARY JEWELL TOURS JAMESTOWN. The AP (6/6, Szkotak) reports that Interior Secretary Sally Jewell toured Jamestown on Thursday to highlight climate change's threat to the first permanent European settlement in America. Guided by NPS rangers, Jewell hiked around the island, including Black Point, which is threatened by erosion. In an interview Jewell said, "I know enough now having been in this job looking at vulnerable sites that this is a highly vulnerable site. We don't have very many places in the United States that talk about the super-early history of settlers connecting with the native people of the land, so this is a really an important place."

The Newport News (VA) Daily Press (6/5, 206K) reports that that after the tour, Jewell met with representatives of the NPS, state and local officials, municipal engineers and scientists. During the roundtable discussion, "they discussed market forces such as higher property insurance premiums that could drive development away from eroding coasts, business owners as a resource for innovative ideas, and regional cooperation to adapt to a changing landscape."

Also reporting on the story are the Newport News (VA) Daily Press (6/5, 206K), the South Florida Sun Sentinel (6/5, 779K), and the Mail Online (UK) (6/6, 2.97M).

Coverage by the AP was also picked up by the Washington Post (6/6, 4.22M), Yahoo! (6/6, Szkotak, 17.91M), FOX News (6/5, 6.72M), the Richmond (VA) Times-Dispatch (6/6, 333K), the Hampton Roads (VA) Virginian-Pilot (6/6, 422K), the Lynchburg (VA) News & Advance (6/6, 77K), the Myrtle Beach (SC) Online (6/5, 52K), the Sacramento (CA) Bee (6/5, 687K), the Youngstown (OH) Vindicator (6/5, 149K), the Fairfield (CT) Citizen (6/6, 18K), and WJBK-TV Detroit (6/6, 83K).

Local TV coverage was provided by WAVY-TV (6/6).

NISQUALLY WILDLIFE REFUGE CENTER TO BE NAMED FOR NORM DICKS. The Olympian (WA) (6/5, 119K) reports that former Congressman Norm Dicks will be honored Friday at the Nisqually National Wildlife Refuge with "a ceremony to name of the visitor center after him." Interior Secretary Sally Jewell and FWS Director Dan Ashe are "scheduled to attend the 11 a.m. event that also includes remarks" from Sen. Maria Cantwell, Reps. Derek Kilmer and Denny Heck, and Nisqually Indian Tribe members.

Also covering the story are the Bellingham (WA) Herald (6/5, 163K) and the Tacoma (WA) News Tribune (6/5, 338K).

INVESTIGATORS FIND "INAPPROPRIATE" BEHAVIOR BY FORMER ASSISTANT INTERIOR SECRETARY BABAUTA. The E&E Daily (6/5) reports that Anthony Babauta, the assistant secretary for insular affairs until January 2013, "directed federal money to friends, complimented an employee on her 'hot ass' and stayed rent-free with another subordinate, according to the agency's inspector general." His "transgressions are detailed in a 33-page report."

Also reporting on the story are Politico (6/6, Guillén, 637K), USA Today (6/5, 5.82M), the Pacific (GUM) Daily News (6/6, 61K), the Pacific (GUM) Daily News (6/6, 61K), the Pacific News Center (6/6), the Pacific News Center (6/6), and the Marianas Variety (6/6).

REPORT FINDS INTERIOR'S WEBSITE OUTAGE AGGRAVATED BY MISCOMMUNICATION, POOR PLANNING. The E&E Daily (6/5) reports that the NPS has "hosted the Interior Department's website for five years – but no one has ever put that in writing." Instead, "the arrangement was made verbally, between two people who no longer work at Interior, according to a new report from the agency's inspector general." The report "recounts the IG's inspection of an outage in January that shut down both Interior's main website and the IG's website for seven days." In the report, IG auditors "detail 'several concerns with DOI's web hosting services,' such as insufficient contingency planning, incomplete documentation and confusion over who was responsible for what."

Also reporting on the story is the Washington Times (6/6, Swarts, 455K).

WESTERN UTILITY REGULATORS MULL REGIONAL COOPERATION ON EPA RULE. The E&E Daily (6/5) reports that "Western state utility regulators may have to work together to comply with US EPA's proposal to cut greenhouse gas emissions from power plants, but they're warning it's much easier said than done." At a conference of Western public service commissioners, "one of the issues that quickly emerged was the question of what to do if a coal-fired plant in one state shuts down while still having a contract with a utility in another state, a common situation in the West." EPA's senior counsel for air and radiation, Joe Goffman, "told attendees that working across state lines was an option."

Industry Criticizes EPA Proposed CO2 Emissions Rule. The Hill (6/6, Cama, 237K) reports that the American Petroleum Institute is arguing that the EPA's proposal to reduce CO2 emissions from power plants is counter to the industry. Gerard said, "The administration recognizes this success and has been vocal in its support for natural gas. But the administration's public commitment to natural gas and embrace of our industry's economic and environmental benefits stands in stark contrast to their broader energy policy." He cited a Congressional Research Service report from April 2014 that found that from 2009 to 2013, "oil production on federal land fell 6 percent, while gas production dropped 28 percent."

OP-ED: IZEMBEK ROAD WOULD THREATEN FOOD SUPPLY OF ALASKA NATIVES. In an op-ed for the Anchorage (AK) Daily News (6/5, 251K), Myron Naneng, president of the Association of Village Council Presidents, writes that "after decades of restoration work, it would be a step backward to allow a road through

important habitat of black brant and other subsistence waterfowl in Izembek National Wildlife Refuge." Naneng notes that "the Pacific black brant and emperor geese that rest and feed at Izembek National Wildlife Refuge during their spring and fall migrations are an important food source for villages throughout the Yukon-Kuskokwim Delta, and the proposed road would harm the refuge and destroy habitat that is vital for these and other species that feed Alaska Native families." Naneng argues that "by rejecting the proposed land exchange and road," Interior Secretary Sally Jewell and the Interior "fulfilled their legal obligation to protect subsistence and supported years of waterfowl restoration work."

Also providing coverage are [The Hill](#) (6/6, Cama, 237K), [FOX News](#) (6/5, 6.72M), the [Ketchikan \(AK\) SitNews](#) (6/6), the [Kenai \(AK\) Peninsula Clarion](#) (6/4, 17K), the [Nation Sun News](#) (6/6), and [KTOO-FM](#) Juneau, AK (6/5).

CONSTITUTIONAL EXPERT: SECRETARY JEWELL HELPS SHAPE EXPAND CIVIL RIGHTS. For the [Constitution Daily](#) (6/6), Lyle Denniston, the National Constitution Center's adviser on constitutional literacy, writes that Interior Secretary Sally Jewell's role in shaping the meaning of the Constitution. He notes that "in an appearance May 30 at a historic site in New York City's Greenwich Village, Jewell announced a new National Park Service program to identify places and events that have figured prominently in the history of the gay rights movement in America." According to Denniston, "that movement is the latest of a series of constitutional revolutions to expand civil rights."

Additional coverage of the announcement that the NPS is "launching a study to identify and commemorate sites and events important to the history of lesbian, gay, bisexual and transgender (LGBT) Americans" was provided by [Yahoo!](#) (6/5, Lim, Writer, 17.91M) .

America's Great Outdoors:

National Park Service:

YELLOWSTONE NATIONAL PARK BEGINS PROJECT TO REPLACE GRAND LOOP ROAD. The [E&E Daily](#) (6/5) reports that Yellowstone National Park "this week began a new project to widen a 16-mile stretch of road between Norris Geyser Basin and the Golden Gate area with the first phase costing \$20 million." According to parks advocates, "replacement of the Grand Loop, which began in 1987, will end up costing more than \$1 billion." The article notes that the "money won't come out of NPS's appropriated budget, which only covers minor maintenance like snowplowing, patching and restriping," but rather, will "come out of the federal highway bill."

RESEARCHERS FIND EVIDENCE OF FIRST-EVER HATCHING OF CONDOR CHICK IN UTAH. The [E&E Daily](#) (6/5) reports that "the decades-long effort to recover the endangered California condor appears to have reached a major milestone, with researchers announcing they have evidence of the first-ever hatching of a condor chick in the wild in Utah." The article notes that "the news is significant, researchers say, because it's clear evidence that the iconic bird, which was on the brink of extinction three decades ago, is expanding its habitat range, giving it a much better chance of survival." Wildlife biologists say "they must still visually confirm that the California condor chick has hatched in a nest built about 1,000 feet above the floor of Kolob Canyons in southwest Utah's Zion National Park."

Also reporting on the story is the [AP](#) (6/6).

CONTRACTOR ADMITS TO DIRECTING ILLEGAL DUMPING INTO POTOMAC RIVER. The [Washington Post](#) (6/6, Zapotosky, 4.22M) reports that "a government contractor tasked with cleaning out the Mall's storm water sewer system admitted Thursday that he often had employees dump waste into the Potomac River — a federal crime that could land him in prison for about four years, authorities said." Patrick Brightwell "pleaded guilty in US District Court in D.C. to one count of violating the Clean Water Act by knowingly discharging a pollutant without a permit and one count of presenting false claims to the United States, authorities said."

CEREMONY TO MARK D-DAY ANNIVERSARY. The [AP](#) (6/6) reports that the NPS and the Friends of the World War II Memorial will commemorate the 70th anniversary of the D-Day landings of Allied troops in Normandy on Friday with "a ceremony and wreath laying at the World War II Memorial in Washington." The article notes that "D-Day veterans, along with representatives from the Allied Nations that participated in the Normandy Campaign,

will take part in laying wreaths along the Memorial's Freedom Wall."

NPS ANNOUNCES NEW INTERIM SUPERINTENDENT FOR EVERGLADES NATIONAL PARK. The Miami Herald (6/6, Staletovich, 822K) reports that the NPS announced Thursday that Bob Krumenaker will take over as the new acting superintendent for Everglades National Park as well as Dry Tortugas National Park for the next three months.

FIVE ARKANSAS PROPERTIES ADDED TO NATIONAL REGISTER OF HISTORIC PLACES. The AP (6/6) reports that "five more Arkansas properties have been added to the National Register of Historic Places." The article notes that "the newly listed properties include the Morilton Colored School, which served black students in Conway County from the 1930s until 1965; the V.C. Kays House on the Arkansas State University campus in Jonesboro; and the Northern Ohio School in Parkin in Cross County." The register also "added the Hankins Store in Oil Trough and the Mary H. Matthews Lustron House in Little Rock."

TWO HISTORIC SITES IN VIRGINIA ADDED TO NATIONAL REGISTER OF HISTORIC PLACES. The AP (6/6) reports that Plains Mill and the Melrose Caverns and Harrison Farmstead in Rockingham County have been added to the National Register of Historic Places.

Bureau of Land Management:

BLM IDENTIFIES PROBLEMS IN PLAN FOR NEW MONUMENT. The Pueblo (CO) Chieftain (6/6, 94K) reports that the BLM has "identified some recurring issues and some new ones it hopes to resolve in the plan for the new national monument that will sit on the San Luis Valley's doorstep." The article notes that "President Barack Obama created the 243,000-acre monument by proclamation last year and the BLM has issued a 98-page scoping report that summarizes public comment and lays out what is within the agency's authority to hash out in the management plan."

BLM RELEASES REPORT ON RED RIVER LAND. The San Antonio Express-News (6/6, 718K) reports that the BLM has published a "scoping report" of how North Texans viewed a disputed 116-mile stretch along the Red River. The article notes that "of its 160 pages laying out why the review must be undertaken, how the bureau involved interested parties and how the public reacted, more than one-third is public comment that ranges from the mildly concerned or instructive to the downright damning."

Also reporting on the story is KAMR-TV Amarillo, TX (6/6, 428).

RANCHERS DELIVER PETITIONS TO NEVADA GOV. SANDOVAL. In an op-ed for the Elko (NV) Daily Free Press (6/6, 22K), Randy Witte, a retired publisher of Western Horseman magazine, writes that "the Nevada Grass March Pony Express including ranchers, cowboys, and livestock supporters from across the state of Nevada rode horseback from Elko to the state capital in Carson City in support of the Pete Tomera family, the Filippini families and other ranchers permitted in the Argenta Allotment." The riders and supporters delivered petitions on May 30 to Gov. Brian Sandoval, which "included over a thousand signatures requesting that BLM Battle Mountain District Manager Doug Furtado be replaced because of his refusal to work with the livestock permittees in his district." According to Witte, "no one expects the petition to make any difference in Furtado's job security, but the ride represents a groundswell of interest in combating a bureaucracy that has become 'anti-cow' on public lands."

Fish and Wildlife Service:

FWS DROPS CRIMINAL CHARGES OVER DAMAGED BIRD NEST. The San Francisco Chronicle (6/6, Jones, Semoffsky, 3.33M) reports that the FWS "dropped its criminal case Thursday against a Bay Point tree trimmer who injured baby night herons outside an Oakland post office last month." The article notes that "the move comes after" Rep. Darrell Issa, chair of the House Committee on Oversight and Government Reform, "described the criminal probe as 'bureaucratic bullying' and ordered a congressional inquiry." FWS officials did not "elaborate on why they decided to drop the case."

The Washington Times (6/5, Mcelhatton, 455K) reports that in a statement Thursday released by his office, Issa

said, "I'm glad to hear that in the case of Mr. Pulido, the bureaucratic bullies have backed down. The decision to press charges in the first place seems to have been based more on public outcry from outside groups and less on common sense. Mr. Pulido made a mistake, but took responsibility and made substantial efforts to make amends."

For FOX News (6/5, 6.72M), William La Jeunesse writes that "the federal government is not shy about prosecuting those who violate threatened and endangered species laws," citing cases against Pulido, marine biologist Nancy Black, and New York City birdwatcher Lincoln Karim. The article notes that their cases "contrast their treatment to that of the wind industry." Under a new Obama Administration policy, wind farm operators are getting 30-year permits to kill protected species.

SPORTSMEN WANT GOVERNORS TO FOLLOW WYOMING ON SAGE GROUSE PROTECTION. The E&E Daily (6/5) reports that "a leading hunting and angling group is urging Western governors to adopt Wyoming's groundbreaking approach to greater sage grouse protection, asserting the strategy offers the best chance to balance grouse conservation and ongoing energy development." Backcountry Hunters & Anglers on Thursday "released a new report concluding that the strategy implemented in 2008 that has mapped core grouse habitat statewide and limited development activity there may offer the best chance to keep the bird off the endangered species list." The article notes that "the Wyoming strategy designated roughly 15 million acres of core sage grouse areas, including breeding grounds called leks, which are critical to the grouse's survival."

CALIFORNIA BOARD LISTS GRAY WOLF AFTER OR-7 REARS PUPS IN OREGON. The E&E Daily (6/5) reports that the California Fish and Game Commission has "voted to include gray wolves on the state's endangered list after biologists announced that a wolf famous for visiting from Oregon has fathered pups 50 miles from the border." According to FWS biologist John Stephenson, "OR-7, the gray wolf equipped with a satellite tracking collar, became the first known to have raised pups so far to the south and west since the animals were reintroduced to the Northern Rockies in the 1990s." the article notes that "the presence of pups so close to the border indicates it won't be long before the wolves begin making more frequent visits to California."

"ANTIQUES ROADSHOW" BANS TUSKS. The E&E Daily (6/5) reports that "as African elephant poaching surges a world away, visitors to 'Antiques Roadshow' will no longer be able to have their ivory tusks assessed." PBS announced on Wednesday that "no new or existing segments containing tusks will be aired on the popular series featuring professional valuations of a wide variety of items." The article notes that "antique musical instruments and other items that include ivory will continue to be appraised, but viewers will be informed on what PBS called 'the larger issues at hand.'"

FISHING ORGANIZATIONS JOIN TO FORM NATIONAL LOBBYING COALITION. The E&E Daily (6/5) reports that "commercial fishermen from around the country have come together to form the Seafood Harvesters of America, a new national organization designed to represent their interests in the policy arena in Washington, D.C." the article notes that "fourteen fishing organizations representing areas ranging from the New England coast to Alaska's Bering Sea have signed on to the group." The objective is "to have their views represented as lawmakers and federal agencies move forward with laws and policy that affect their businesses."

REWARD OFFERED FOR INFORMATION ON SHOOTING OF BALD EAGLE. The AP (6/6) reports that the FWS is "offering a reward for information in a shooting that led to the death of a bald eagle in Montgomery." FWS spokesman Tom MacKenzie said in a statement Thursday that "a total of \$7,500 in reward money from several agencies is being offered for information leading to the arrest and conviction of those responsible for the eagle's death."

Also reporting on the story is the Alabama Live (6/6, 75K).

FWS RESTORES BLUEBACK HERRING TO CONNECTICUT RIVER. The Daily Hampshire (MA) Gazette (6/6, 54K) reports that due to the efforts of the FWS and other conservation groups "there are now thousands more fish in the Valley than there were just over a month ago." During the month of May, biologists with the FWS in Sunderland "transferred over 4,000 blueback herring from Wethersfield Cove, Connecticut, to parts of the Connecticut River once blocked by dams but which now are accessible by the fish passageways that have been built."

CAMPAIGN LAUNCHED TO SAVE ENDANGERED HAWAIIAN DUCK. The AP (6/6) reports that “wildlife officials are starting a campaign to save the endangered Hawaiian duck, or koloa.” The FWS has “recommended removing feral mallard ducks to help prevent the koloa from becoming extinct.”

Securing America's Energy Future:

Renewable Energy:

ADDITIONAL COVERAGE OF BOEM'S LEASING OF TEST SITE FOR OCEAN CURRENT TURBINES.

Additional coverage of BOEM's leasing of a test site to evaluate underwater turbines powered by ocean currents was provided by Reuters (6/6, Fagenson), the Broward Palm Beach (FL) New Times (6/6, 126K), the South Florida Sun Sentinel (6/8, 779K), the Power Engineering (6/6), and the Penn Energy (6/6, 128).

Onshore Energy Development:

INDUSTRY ANALYSTS: NO SIGNS OF DRILLING SLOWDOWN THIS DECADE. The E&E Daily (6/5) reports that “defying warnings of an inevitable price decline and talk of an unsustainable bubble, the shale oil boom underway in the United States should continue unabated for at least until the end of the decade, industry analysts are saying.” According to the article, “arguing that there is little reason to expect a decline in the price of crude much below \$100 per barrel for the foreseeable future, oil and gas market watchers say the US can expect production to continue to grow, with or without California's Monterey Shale, where the estimate of recoverable oil has been drastically reduced.”

Offshore Energy Development:

CHEMICAL SAFETY AND HAZARD INVESTIGATION BOARD SAYS GULF OPERATIONS STILL UNSAFE.

The E&E Daily (6/5) reports that “four years after the deadly Macondo offshore well blowout and explosion, oil drilling in the Gulf of Mexico remains unsafe despite scores of reform efforts, an independent federal investigative team warns in a report.” The article notes that “the accident at the Deepwater Horizon rig that killed 11 workers and seriously injured 17 sparked a wide-reaching reform initiative for offshore drilling regulations with authorities dissolving one federal agency and creating three new ones in its place.” However, “in a new investigation of the 2010 oil spill that could spark fresh debate over offshore oil and gas exploration in the Gulf of Mexico and beyond, the US Chemical Safety and Hazard Investigation Board concludes that all these changes aren't enough.”

Bloomberg News (6/6, Polson, 2.76M) reports that according to a report by the US Chemical Safety and Hazard Investigation Board made public on Thursday, there are still “flaws in safety equipment and procedures used on Gulf of Mexico rigs” four years after the Deepwater Horizon spill. The report found that regulators and drillers aren't understanding blowout preventer limits, and current safety rules “may not prevent another catastrophic spill.”

The New York Times (6/6, Subscription Publication, 9.65M) reports that on Thursday a report by the US Chemical Safety Board warned that “another disastrous offshore oil well blowout could happen despite regulatory improvements in the four years” following the Deepwater Horizon spill. The report detailed similar findings as other government reports following the disaster. However, this latest report focused on the Macondo well's blowout preventer, which malfunctioned prior to the explosion. CSB official Cheryl MacKenzie in a statement said, “Although there have been regulatory improvements since the accident, the effective management of safety-critical elements has yet to be established. This results in potential safety gaps in U.S. offshore operations and leaves open the possibility of another similar catastrophic accident.”

The Washington Post (6/6, Mufson, 4.22M) reports that according to a statement from the American Petroleum Institute Thursday's report “appears to omit significant facts and ignores the tremendous strides made to enhance the safety of offshore operations” since the Deepwater Horizon spill. The statement also said, “There is nothing here that hasn't already been exhaustively addressed by regulators and the industry.”

FuelFix (6/5, 7K) reports that the report's conclusions aren't considered final and will serve “only to help

determine the agency's potential recommendations to the Bureau of Safety and Environmental Enforcement and the American Petroleum Institute, two key bodies that oversee and influence the U.S. offshore industry." API spokesman Brian Straessle said, "There is nothing here that hasn't already been exhaustively addressed by regulators and the industry. The report appears to omit significant facts and ignores the tremendous strides made to enhance the safety of offshore operations. Offshore drilling is safer today because industry and the government have enhanced spill prevention, containment and response, implemented new standards and rules, and focused on strong safety culture."

The AP (6/6) reports the American Petroleum Institute on Thursday in a statement said the report "ignores the tremendous strides made to enhance the safety of offshore operations."

Reuters (6/6) reports that a BP spokesman indicated that the findings were consonant with other probes into the accident, including a Coast Guard probe.

Also providing coverage are the Wall Street Journal, (6/6, Gold, Subscription Publication, 5.51M) The Hill (6/6, Cama, 237K), McClatchy (6/6, Banerjee, Subscription Publication, 23K), the Alabama Live (6/6, 75K), Platts (6/6, 2K), the Oil and Gas Journal (6/6, 1K), the Oil and Gas Journal (6/6, 1K), the Upstream Online (6/6, 20K), and WWL-TV New Orleans (6/6, 107K).

Tackling America's Water Challenges:

BILL WOULD SPEED CONSTRUCTION OF WATER STORAGE PROJECTS. The E&E Daily (6/5) reports that "with much of the western United States gripped by drought," Sen. John Barrasso is floating legislation "aimed at speeding the construction of new water storage projects." The legislation would make the BOR "responsible for coordinating all analyses, opinions, permits and other aspects of project reviews for new water storage projects." The measure would also set a timeline for agency decisions.

SNAKE RIVER FLOWS BEING INCREASED TO BENEFIT TROUT. KIFI-TV Idaho Falls, ID (6/6, 23K) reports that "Snake River water flows below Palisades Dam are being increased to benefit native fisheries." The BOR said "flows would reach 18,500 cubic feet per second by Sunday." Michael Beus, Water Operations Manager for BOR's Upper Snake Field Office, said, "The objective of this operation is to disrupt non-native rainbow trout spawning to benefit native cutthroat trout. A flow of 18,500 cfs below the dam will result in about 20,000 cfs at the Snake River near Heise gage, approximately 48 river miles downstream."

Empowering Native American Communities:

PRESIDENT HIGHLIGHTS COMMITMENT TO NATIVE AMERICANS. In an op-ed for the Indian Country Today Media Network (6/5, 45K), President Obama wrote that next week, he will travel to "Indian country," visiting the Standing Rock Sioux in North Dakota. Obama added that while there, "I'll announce the next steps my Administration will take to support jobs, education, and self-determination in Indian country." After highlighting his Administration's efforts to aid Native Americans, the President wrote, "I believe that during my Administration, we've turned a corner together. We're writing a new chapter in our history—one in which agreements are upheld, tribal sovereignty is respected, and every American Indian and Alaskan Native who works hard has the chance to get ahead. That's the promise of the American Dream. And that's what I'm working for every day—in every village, every city, every reservation—for every single American."

Holder Meets With Native American Teens in North Dakota. The Washington Post (6/6, Horwitz, 4.22M) reports Attorney General Holder spoke with a dozen "Native American teenage boys" in North Dakota Thursday, urging them "to dream big, work hard and, as they make their way growing up in Indian country – where sexual violence, rape and abuse of women is rampant – treat women like they would want their mothers and sisters to be treated." Holder said, "If you mistreat women, you're not a man. You're a punk." The Post says the meeting was part of a Justice Department effort "to create a dialogue between law enforcement and young Native American men about their day-to-day experiences on the reservation and their interactions with the criminal justice system."

Also reporting on the story is the AP (6/6).

SEN. TESTER CALLS FOR SPEEDY DISTRIBUTION OF COBELL SETTLEMENT. The Nation Sun News (6/6) reports that Sen. Jon Tester “urged the administrator of the \$3.4 billion Cobell settlement to distribute checks to Indian beneficiaries as soon as possible.” The article notes that the payment for the Trust Administration Class, has been “tied up for a number of reasons,” but Judge Thomas F. Hogan “approved distribution of the payment while the appeals process continues.” Tester said, “This ruling clears the way for hundreds of thousands of Native Americans to receive their long-delayed payments. I encourage the Garden City Group to quickly get these payments out the door for Indian families who have been asking for justice.”

BIA REVIEW FINDS MAJOR PROBLEMS IN BLACKFEET COURT SYSTEM. The AP (6/6, Volz) reports that “federal officials have threatened to cut off funding to the Blackfeet courts after finding unqualified and unvetted judges, prosecutors and staff running an unstable system that denies due process to those who appear before it and is overly influenced by tribal leaders.” A BIA review “sent to tribal leaders Wednesday gave the court system failing marks in complying with its federal contract and identified 18 problems needing immediate action.” The review also said “the tribe needs to grant the judicial system greater independence from the ruling Blackfeet Tribal Business Council, which exerts significant influence that affects the courts’ ability to operate fairly and impartially.”

ALASKA NATIVES FEELING EFFECTS OF CLIMATE CHANGE. The E&E Daily (6/5) reports that Alaska Natives are “already feeling the effects of climate change and stand to be one of the most impacted populations in the country.” The article notes that “rising temperatures and oceans in the north are not only impacting the salmon runs, but also eroding the coastline near villages.”

NEW REGULATIONS STREAMLINING SITE LEASING ON NAVAJO NATION SUPPORTED. In an editorial, the Farmington (NM) Daily Times (6/6, 46K) supports the Interior Department’s “approval of new regulations that streamline residential and business site leasing on the Navajo Nation.” The paper notes that “it is expected the move will support economic development on the reservation.” Also, the regulations “can protect natural and cultural treasures on Nation land.”

Top National News:

OBAMA FORCEFULLY DEFENDS HIS DECISION TO SWAP TALIBAN LEADERS FOR BERGDAHL. Despite President Obama speaking out in defense of the deal that secured the release of Sgt. Bowe Bergdahl, coverage of the controversy over the swap diminished somewhat on Thursday. However, it was still the lead story on NBC Nightly News (6/5, lead story, 3:20, 7.86M), which featured reports suggesting that the White House is “changing its story” about the circumstances surrounding the deal after its initial justification was questioned by both Democrats and Republicans. While widely noted, the President’s comments in Brussels about the deal for Bergdahl are not the central focus of most reports.

At the opening of NBC Nightly News (6/5, lead story, 3:20, 7.86M), Brian Williams reported that “when Americans first heard that...Bergdahl was being released...it was greeted as good news, plain and simple,” but “the story has become a lot more complicated since then,” and “it now appears the White House is changing its story.” Jim Miklaszewski added that the Administration has claimed that Bergdahl’s poor health drove them to complete the deal as soon as possible, but “medical teams that reviewed” the most recent video of Bergdahl supplied by his captors “determined that Bergdahl did not appear in grave condition or in danger of dying.” Following that determination, “the White House...came up with still another story line – that President Obama could not tell key members of Congress about the prisoner swap in advance because, if it leaked out, the Taliban would kill Bergdahl.” However, Miklaszewski pointed out that the White House nevertheless told Senate Majority Leader Reid about the pending swap “the day before Bergdahl was freed.”

Also on NBC Nightly News (6/5, story 3, 1:30, Williams, 7.86M), Chuck Todd reported from Paris that “we still haven’t heard a clear explanation from aides traveling with the President about why the White House’s story changed today, other than chalking it up to media leaks.” Likewise, on the CBS Evening News (6/5, story 2, 1:55, Dubois, 5.08M), Bill Plante reported that “Bergdahl’s health was the Administration’s original reason for expediting the mission and not telling Congress,” but now the White House says it “had to move quickly because of death threats from the Taliban if word of the deal got out.”

Politico (6/5, Everett, 637K) reported that Sen. Jay Rockefeller, "a former Intelligence Committee chairman and current committee member, said the White House 'didn't give us any information' of such a threat, even after the fact or at the Wednesday classified briefing." Rockefeller is quoted as saying, "They said they briefed us, which took me back to the days of the previous administration, when we were always said to be briefed and we weren't at all."

On the CBS Evening News (6/5, story 2, 1:55, Dubois, 5.08M), Bill Plante reported that in Brussels on Thursday, the President "doubled down in defense of his decision to swap Taliban prisoners for...Bergdahl without telling Congress." Plante also reported that on Thursday, White House officials insisted that they "would make the prisoner swap in a heartbeat." On NBC Nightly News (6/5, story 3, 1:30, Williams, 7.86M), Chuck Todd said the President is "standing firm behind every part of his decision, including keeping Congress out of the loop."

McClatchy (6/6, Clark, Subscription Publication, 23K) reports that the President "defended his administration's handling of the prisoner exchange with the Taliban, saying he makes 'absolutely no apologies for making sure that we get back a young man to his parents.'" McClatchy also notes that the President "said his administration 'had discussed with Congress the possibility that something like this might occur.'"

Reuters (6/5, Mason) quotes the President as saying, "I make absolutely no apologies for making sure that we get back a young man to his parents and that the American people understand that this is somebody's child. This is not some abstraction, this is not some political football. As Commander in Chief of the Armed Forces, I am responsible for those kids."

Neil Munro, in a piece for the Daily Caller (6/5, Munro, 408K), said that on Thursday, the President "portrayed U.S. soldiers as pitiable 'children' and 'kids' sent off to war, not as troops who made the decision to join the military as adults." Munro points out that on Friday, the President "will visit the beaches in Normandy, where in 1944 American soldiers as young as 16 assaulted German machine-gun sites."

Politico (6/5, Epstein, 637K) reported that the President "also said he wasn't surprised by the backlash coming from both parties," but "argued that it's important to put the whole episode in perspective and to keep in mind that regardless of Bergdahl's behavior or views leading up to his capture by the Taliban, he is still an American soldier for whom the commander-in-chief felt an obligation to bring home."

Under the headline "U.S. Undeterred From Closing Guantanamo," the Wall Street Journal (6/6, Bravin, Subscription Publication, 5.51M) reports that Administration officials insist that the political furor over the release of five high-level Taliban detainees from Guantanamo Bay will not slow the President's push to close the detention facility.

McCain: Administration Claim That Bergdahl's Life Was In Danger "Very Unlikely." The AP (6/5, Dilanian, Riechmann) reports that Administration officials have told members of Congress that the President did not consult with them about the release of the five Taliban commanders from Guantanamo Bay, as he was required to by law, because the Taliban "had threatened to kill [Bergdahl] if the deal was made public before it happened." According to the AP, that "threat had been transmitted by Qatari officials."

The New York Times (6/6, Shear, Baker, Subscription Publication, 9.65M) reports that an unidentified "senior administration official" released a statement on Thursday reading: "The Senators were told...that we had both specific and general indications that Sgt. Bergdahl's recovery – and potentially his life – could be jeopardized if the detainee exchange proceedings were disclosed or derailed." However, according to the Times, "Several lawmakers expressed skepticism that disclosure of the operation...would have jeopardized...Bergdahl's life," while "many Republicans said they doubted the threat at all." Sen. John McCain is quoted as saying, "This flies in the face of everything we know about the value of prisoners. Threatening to kill him is a very unlikely scenario."

McCain, Chambliss Say They Would Have Opposed Swap If They Had Been Asked. Politico (6/5, Everett, 637K) reported that after "CNN's Jake Tapper airing clips on Tuesday of McCain telling Anderson Cooper in February that the United States should 'seriously consider' a prisoner swap for the release of Bergdahl," McCain spokesman Brian Rogers said, "Had Cooper asked if Senator McCain would support a deal that freed five hard-core Taliban leaders, two of whom are wanted by the U.N. for war crimes for slaughtering thousands of Shiite

Muslims, under terms that allowed them to potentially return to the battlefield against America in a year, the answer would have been 'Hell no.'"

Politico (6/5, Everett, 637K) also reported that Sen. Saxby Chambliss says he "absolutely" would have raised 'holy Hell' publicly had he gotten wind of the proposed release of five Taliban officials in a prisoner swap." According to Politico, Chambliss "said he would have gone public in opposition – just as he did two years ago when rumors of the release of Taliban fighters from Guantanamo rippled through Washington."

Fellow Democrats Reportedly Upset Over Obama's Perceived Mishandling Of Bergdahl Deal. Under the headline "Bergdahl Case Shakes Democrats' Confidence In Administration," the New York Times (6/6, Hulse, Subscription Publication, 9.65M) reports the President's "handling of the Bergdahl prisoner exchange has renewed frustration among congressional Democrats about the administration's relations with its allies on Capitol Hill, and prompted criticism that the White House failed to prepare the lawmakers for the politically explosive case." The Times says "some Democrats" are "questioning the effectiveness of the administration's team," and one anonymous Senate Democrat is quoted as saying, "We have to quit putting out fires."

According to Politico (6/6, Nather, 637K), "For Democratic candidates...the Bergdahl case has been yet another reason to put a healthy distance between themselves" and the President. Politico notes that Sen. Jeanne Shaheen released a statement on Thursday reading: "I continue to have concerns about the Administration's failure to consult Congress."

WPost Analysis: Obama Is Already "Talking About Afghanistan In The Past Tense." According to the Washington Post (6/6, Goldfarb, Eilperin, 4.22M), the President's "aides" say the swap for Bergdahl was "a relatively easy choice" for him to make, although he is now "learning that many in the military are leaving Afghanistan still searching for clarity on what has been accomplished, and whether the fight was worth it." The Post says the President, "by contrast, is now talking about Afghanistan in the past tense." The Post adds that, in addition, "some military officials...are especially furious that the White House greeted the release of someone suspected of desertion with the trappings of celebration." The Post notes that Ralph Peters, a retired lieutenant colonel and intelligence officer, has written, "Both President Obama and [National Security Adviser Susan] Rice seem to think that the crime of desertion in wartime is kind of like skipping class," and "have no idea of how great a sin desertion in the face of the enemy is to those in our military."

Fox News: Bergdahl Described Himself As A "Warrior For Islam" And Carried A Gun While In Pakistan. In an online article titled "Bergdahl Declared Jihad In Captivity, Secret Documents Show," James Rosen of Fox News (6/5, 6.72M) reports that "according to secret documents prepared on the basis of a purported eyewitness account," Bergdahl "converted to Islam, fraternized openly with his captors and declared himself a 'mujahid,' or warrior for Islam." According to Rosen, at one point, Bergdahl was "reported to be happily playing soccer with the Haqqani fighters, taking part in AK-47 target practice and" was "permitted to carry a firearm of his own." However, Rosen also reports that Bergdahl was treated more like a captive at other points in the last four and a half years, including after failed escape attempts.

TIME (6/6, Baker, 24.1M) reported online that according to an anonymous "senior Taliban commander affiliated with the Haqqani network," Bergdahl "made several friends among his Taliban captors." The Washington Times (6/5, Emst, 455K) reports that former Navy SEAL Marcus Luttrell, who was "hunted by the Taliban for five days," has questioned why Bergdahl was held captive rather than killed immediately, which Luttrell claims would have been his fate had he been caught by the Taliban.

Bergdahl Reportedly "Wandered Away" From His Post Repeatedly. The New York Times (6/6, Savage, Schmitt, Subscription Publication, 9.65M) reports that "a classified military report detailing the Army's investigation into the disappearance of...Bergdahl in June 2009 says that he had wandered away from assigned areas before – both at a training range in California and at his remote outpost in Afghanistan – and then returned, according to people briefed on it." According to the Times, "The report is also said to cite members of his platoon as saying that he may have taken a shorter unauthorized walk outside the concertina wire of his combat outpost...before he left for good, in an incident that was apparently not reported up the chain of command."

The New York Times (6/6, Subscription Publication, 9.65M), in an editorial, says, "If anything, the report suggests that the army unit's lack of security and discipline was as much to blame for the disappearance, given

the sergeant's history." The Los Angeles Times (6/6, 3.46M) editorializes that "Bergdahl's conduct five years ago have been shamelessly exploited by Republicans."

The New York Times (6/6, Furber, Subscription Publication, 9.65M) reports on the evolving reaction to news about Bergdahl's capture and captivity in his home town of Hailey, Idaho.

Senators Have Different Reactions To Most Recent Video Of Bergdahl In Captivity. The Huffington Post (6/5, Bobic, 11.54M) reported that following "a closed-door, classified briefing on Wednesday," during which senators "viewed a 'proof of life' video taken of Bergdahl" earlier this year, "some senators...said Bergdahl appeared sickly," but Sen. Joe Manchin said, "That did not sell me at all."

David Martin, also on the CBS Evening News (6/5, story 3, 2:05, Dubois, 5.08M), reported that "medical analysis of a proof-of-life video the US received in January found that Bergdahl" was "in declining health," and did not mention that there were contrary assessments.

HUD Official Suggests Bergdahl Served With "Psychopaths." In an online article, Fox News (6/5, 6.72M) reports that Brandon Friedman, HUD's deputy assistant secretary for public affairs, has "apologized...after suggesting on Twitter that Sgt. Bowe Bergdahl's platoon might have been filled with 'psychopaths.'" On Wednesday, Friedman tweeted: "Here's the thing about Bergdahl and the Jump-to-Conclusions mats: What if his platoon was long on psychopaths and short on leadership?" On Thursday, Friedman issued a statement reading: "While I just wanted to make the point that the public should wait before passing judgment, I unfortunately used my own poor judgment in choosing inappropriate language that many view as disparaging to U.S. service members."

MSNBC's Scarborough Blasts Obama For Embracing Bergdahl's Father. Mediaite (6/6, McMurry, 238K) reported that on MSNBC's Morning Joe, Chuck Todd scolded host Joe Scarborough for criticizing Bergdahl's father, Robert, for reportedly encouraging his son to desert and then reaching out to the Taliban while his son was in their custody. Scarborough criticized the President for putting "his arm around a man who is reaching out to pro-Taliban forces, talking about killing Americans." Scarborough continued, "I have a 26-year-old son, and if my son is out on the wire and he is out there with fellow troops and he writes me up and says he hates America and he's thinking about deserting...I'd say, 'Joey, you stay the hell right there.' ... I would not say 'Follow your conscience, son.' I would not reach out to the voice of jihad." According to Mediaite, Todd then asked, "So he's a bad father?" And Scarborough replied, "Yes! Yes, he is!"

Politico (6/5, Gold, 637K) reported that later on Thursday, Scarborough tweeted: "My criticism of White House staff was having a father in the Rose Garden who'd made highly questionable statements. Not in POTUS's interest."

The Hill (6/5, Sink, 237K) reported that on Thursday, the President "defended the decision to appear alongside Bergdahl's parents during an announcement of the deal on Saturday" although "some have argued that decision elevated the soldier's profile." The President is quoted as saying, "I think it was important to understand this is not some abstraction, not some political football."

David Brooks, in his column for the New York Times (6/6, Subscription Publication, 9.65M), endorses the deal made for Bergdahl, and says the President "made the right call." However, Brooks adds, "If he is to be faulted, it would be...for turning the release into an Oprah-esque photo-op, a political stunt filled with inaccurate rhetoric and unworthy grandstanding."

Taliban Celebrate Release Of Their Leaders, "Victory" Over The US. On NBC Nightly News (6/5, lead story, 3:20, 7.86M), correspondent Jim Miklaszewski reported that the Taliban "claims handing over Bergdahl in exchange for five Taliban prisoners has handed them a victory over America," while analysts contend that it also "provides an incentive to kidnap more Americans."

Likewise, on ABC World News (6/5, story 3, 2:10, Muir), correspondent Martha Raddatz reported that the Taliban is "celebrating," and "a senior Taliban commander" says "the deal for Bergdahl would 'definitely' encourage them to try to kidnap others," adding, "Now everybody will work hard to capture such an important bird like Bergdahl."

According to an online report from TIME (6/6, Baker, 24.1M), the Taliban “see the exchange as an unmitigated victory.” Time says a “senior Taliban commander who is close to the senior Taliban leadership...describes scenes of intense jubilation among the Taliban leadership and their supporters.” The “senior Taliban commander” is quoted as saying, “This is a historic moment for us. Today our enemy for the first time officially recognized our status.”

State Department Defends Taliban Leaders' Freedom Of Movement Within Qatar. The Washington Post (6/6, A1, Gearan, 4.22M) reports that “people familiar with the negotiations” say that while they are in Qatar, the “five senior Taliban leaders...are subject to strict bans on militant incitement or fundraising that might pose a danger to the United States,” and are “also under a one-year travel ban insisted upon by Washington despite a Taliban request that the men be allowed to make the hajj, Muslims’ annual pilgrimage to nearby Saudi Arabia.” Nevertheless, the Post says the Taliban leaders’ “relative freedom of movement...has angered administration critics,” who, “based partly on Qatar’s past record with transferred Guantanamo detainees...fear that the five will be not be subject to the kind of strict monitoring that can prevent them from having a role in the Taliban insurgency.” State Department spokeswoman Marie Harf is quoted as saying, “It’s possible someone will see them on the streets of Qatar, but those types of activities don’t threaten our national security interests, and that’s the standard here about substantially mitigating the threat that they will pose.”

On the CBS Evening News (6/5, story 4, 2:25, Dubois, 5.08M), Holly Williams reported that while the Taliban commanders are “not allowed to leave Qatar for 12 months...when the year is up, they’ll be free to go wherever they choose.”

Taliban Commander Released This Week Has Been Accused Of Having “Massacred Hundreds Of Civilians.” The Los Angeles Times (6/5, Bengali, 3.46M) reports that Kate Clark of the Afghanistan Analysts Network, “a Kabul-based research group,” claims that “a closer look at the former prisoners...indicates that not all were hard-core militants,” but “one, Mohammed Fazl, appears to have a documented history as a military leader and dangerous extremist.” According to the Times, Fazl, who served as chief of staff of the Taliban army, “is accused of commanding forces that massacred hundreds of civilians.” Clark says Fazl “is the only one of the five to face accusations of explicit war crimes and they are, indeed, extremely serious.”

Charles Krauthammer, in his column for the Washington Post (6/6, 4.22M), says the “five released detainees are unrepentant, militant and dangerous” – and are “likely to go back into the field and resume their war against local and foreign infidels, especially us.”

However, in another column for the Washington Post (6/6, 4.22M), Eugene Robinson says, “The five Taliban commanders released...should properly be described as one-time Taliban commanders.” According to Robinson, “It defies credulity that any of them could emerge after such a long absence and regain command.”

WSJournal A1: US Officials Told The Taliban Congressional Approval Was Needed Before Detainees Could Be Released. In a front-page article titled “Taliban Held Fast To Their Demands In Sgt. Bowe Bergdahl Swap Talks,” the Wall Street Journal (6/6, A1, Entous, Subscription Publication, 5.51M) reports that throughout the several years of negotiations preceding last weekend’s swap, the Taliban had insisted that they would not trade Bergdahl for anything less than the six Taliban leaders held at Guantanamo Bay, one of whom subsequently died. According to the Journal, the Administration’s representatives told the Taliban that President Obama could not make such a deal without the approval of Congress and even showed them the legislation limiting the President’s ability to release detainees.

In an op-ed for the Wall Street Journal (6/6, Subscription Publication, 5.51M) titled “Obama’s Executive-Power Roller Coaster,” Max Boot, a senior fellow at the Council on Foreign Relations, accuses President Obama of claiming to be constrained by the limits of executive power when it suits him, such as when he sought Congressional approval for US involvement in Syria’s civil war last year, but ignoring those constraints in other cases, such as this week’s release of the Taliban leaders from Guantanamo Bay.

Pentagon Reportedly Explored Trading Taliban Leaders For US Civilian Hostages, As Well As Bergdahl. USA Today (6/6, Dorell, 5.82M) reports that according to Joe Kasper, chief of staff to Rep. Duncan Hunter, a member of the House Armed Services Committee, the Pentagon had been hoping to trade more Americans held in Afghanistan and Pakistan for the five Taliban commanders, “including Caitlan Coleman of York, Pa., her baby

who was born in captivity and her Canadian husband, Joshua Boyle," and "Warren Weinstein, a contractor from Rockville, Md., who was abducted in 2011 in Pakistan and is detained by al-Qaeda militants aligned with the Taliban." However, according to USA Today, State Department spokeswoman Marie Harf "said Thursday the idea of negotiating for the release of civilian hostages was never seriously discussed."

Hunter Likens Kerry To Bergdahl. Politico (6/5, Breitman, 637K) reported that in an appearance on Fox News, Hunter said, "As John Kerry threw his medals over the White House fence and turned his back on all of his Vietnam brothers and sisters, that's what Bergdahl did."

FLOOD OF CHILDREN ACROSS BORDER SPARKS FEARS BORDER PATROL COULD BE OVERWHELMED. The Washington Times (6/6, Dinan, 455K) reports that the "flood of young children" crossing into the US from Mexico is "worse than the administration has previously acknowledged" and efforts to cope are "overwhelming" the Border Patrol, "according to an internal draft memo from the agency." The memo, written by Deputy Border Patrol Chief Ronald Vitello and dated May 30, "contradicts the administration's argument that the border is secure enough to begin legalizing current illegal aliens already in the U.S." Vitello "paints a picture of a government struggling to cope, leaving the children suffering poor conditions, agents unable to focus on major security threats and little sense that it will get better."

The New York Times (6/6, A12, Fausset, Belson, Subscription Publication, 9.65M) reports on the wave of women and unaccompanied minors that have arrived in the US in recent months, in particular focusing negatively on the fact that since Memorial Day weekend, "about 1,000 women and children" have been "dumped unceremoniously, wear and hungry" in Phoenix, set free to find their families around the nation. Overall, the piece portrays an immigration system totally overwhelmed by the flow of migrants.

More Than 1,000 Migrant Youths Held At Lackland AFB Shelter. The Los Angeles Times (6/6, Hennessy-Fiske, 3.46M) reports that 1,015 migrant youths are being held at an emergency shelter at Lackland Air Force Base in Texas that reopened just "two weeks ago in response to a new surge and is already approaching its capacity of 1,200 youths, ages 12 to 17." HHS officials led reporters "on a one-time, 40-minute tour of the facility" Thursday, but "did not allow interviews with youths, caseworkers or other staff."

Goodlatte Blasts DHS Changers To DREAMER Program. Roll Call (6/5, Dumain, Subscription Publication, 76K) reports that House Judiciary Chairman Robert Goodlatte on Thursday "blasted" the DHS' announcement "about the program helping certain undocumented immigrants to avoid deportation." In a statement, Goodlatte accused the Administration of "having 'quietly made several changes' to the Deferred Action for Childhood Arrivals program." Goodlatte says that the Administration has "loosened the educational requirements to allow those who are enrolled in an 'alternative program' (without defining what this means) to benefit from the program." He also "took issue" with a change that "would not explicitly require the administration to verify 'documentary evidence' that an applicant submits to prove that he or she meets the standards for a stay of deportation."

Cantor Explains Backing For "Amnesty" For Children Of Illegal Immigrants. The Washington Times (6/5, Chumley, 455K) reports that House Majority Leader Cantor "said granting amnesty to children of illegal immigrants is a biblically-based notion and that's why he supports it." Cantor said, "I've always said that there's a biblical root and a tradition in this country that says we don't hold children liable for their parents' acts, and when you have kids who may have been brought here, let's say, at 2 months old, unbeknownst to them, and they've been here all their lives and they want to serve in our military, my position has been I agree with that principle."

OMB REPORT ARGUES REGULATIONS HAVE MASSIVE NET FINANCIAL ADVANTAGES. The Hill (6/5, Goad, 237K) reports that the "major regulations reviewed by the White House over the last decade have resulted in as much as \$863 billion in economic benefits, with costs amounting to a fraction of that total," according to the draft of an annual report that OMB presents to Congress. The report "analyzed the estimated economic impact of scores of rules enacted between 2003 and last year, concluding that rules subject to economic analysis yielded overall benefits between \$217 billion and \$863 billion," and costs of between \$57 billion and \$84 billion.

SEC Proposes Broad Slate Of New Rules. The New York Times (6/5, Alden, Subscription Publication, 9.65M) says that the stock market, over the past decade, has "transformed over the past decade into a place dominated by high-speed traders zapping orders to numerous exchanges, while regulators have been slow to react." Now, the SEC is looking to update the rules. On Thursday, SEC Chair Mary Jo White "unveiled a sweeping package of

recommendations for new rules and other changes aimed at strengthening the structure of the market and improving disclosures for investors." The changes "would touch virtually every corner of the market, including exchanges, private trading venues, brokerage firms and high-frequency traders."

Fish & Wildlife Drops Charges Against Worker Who Damaged Birds Nest. The Washington Times (6/5, Mcelhatton, 455K) reports that the US Fish & Wildlife Service "has dropped plans to pursue criminal charges against a California tree trimmer who accidentally injured some baby birds." The Times says that Ernesto Pulido said that the agency told him it had decided to drop the case, "an abrupt about-face just days after Rep. Darrell Issa, California Republican, called for a congressional inquiry."

Editorial Wrap-Up:

NEW YORK TIMES. "***The Rush To Demonize Sgt. Bergdahl.***" The New York Times (6/6, Subscription Publication, 9.65M), in an editorial, says that if anything, a classified military report which shows that Bowe Bergdahl "had walked away from assigned areas at least twice before," suggests "that the army unit's lack of security and discipline was as much to blame for the disappearance, given the sergeant's history."

"Belatedly, Europe Takes On Low Inflation." The New York Times (6/6, Subscription Publication, 9.65M) editorializes the ECB announcements follows "months of doing too little," and earlier action could have resulted in "a bigger impact." The Times says the "weaker euro economies desperately need more help," and their governments should "provide stimulus with increased spending on public services," and until they halt cuts in spending and increasing taxes, "there is little hope for a vigorous economic recovery."

"After Heartbreak, Time For Results."

WASHINGTON POST. "***Israel Is Wrong To Reject The New Palestine***" The Washington Post (6/6, 4.22M) editorializes that while the new Palestinian coalition "very well may" fail, the "unity movement offers at least the possibility of change and renovation." The Post says the Obama Administration is "right to give it a chance."

"No Place For Sexual Abuse In Our Justice System." The Washington Post (6/6, Editorial Staff, 4.22M) says in an editorial that 11 years after Congress unanimously passed the Prison Rape Elimination Act, only two states are in full compliance, "and prison rape is still a disgusting and pervasive problem across the country." The Post says the Justice Department must pressure states to comply, using the threat of Federal funding cuts if necessary.

"Just Call The Election Already." The Washington Post (6/6, 4.22M) says in an editorial that now that the District of Columbia Court of Appeals has ruled that the District Council did not have the authority to postpone the first-ever election of a District attorney general, the election should be promptly scheduled.

WALL STREET JOURNAL. "***Once More Unto The Breach, Dear Draghi.***" The Wall Street Journal (6/6, Subscription Publication, 5.51M) editorializes that Europe's struggling economy requires more than monetary policy changes by the central bank. The Journal says Europe requires broad and liberalizing economic reform.

"Putin Retakes Normandy." The Wall Street Journal (6/6, Subscription Publication, 5.51M) editorializes that Russian President Vladimir Putin's interaction with Western leaders this week contradicts the narrative that Russia's removal from the G-8 meeting is a significant punishment.

"Rakoff vs. The Racket." The Wall Street Journal (6/6, Subscription Publication, 5.51M) says in an editorial that US District Court Judge Jed Rakoff was correct in refusing to sign off on a 2011 settlement between the Securities and Exchange Commission and Citigroup, saying that the agency was using the power of the courts to strong-arm Citigroup.

TODAY'S EVENTS IN WASHINGTON.

White House:

PRESIDENT OBAMA —The President departs Paris, pooled press; arrives Normandy region, open press; meets with WWII and post-9/11 U.S. veterans, Omaha Beach, Normandy, France, closed press; attends the 70th French-American Commemoration D-Day Ceremony and delivers remarks, Normandy American Cemetery and Memorial, open press; attends the 70th French-American Commemoration D-Day Ceremony and delivers remarks, open press; tours observation deck with President Hollande, pooled press; arrives Chateau de Benouville, pre-set pool coverage; participates in a Leaders Family Photo, Benouville, Normandy, France, pre-set pool coverage; participates in Heads of State Lunch, Benouville, Normandy, France, closed press; arrives Sword Beach, open press; attends the Ouistreham International Ceremony at Sword Beach, open press; departs Normandy region, open press; arrives in Paris, pooled press; meets with embassy staff and family members, closed press; departs France, pooled press; arrives Joint Base Andrews, out-of-town travel pool coverage; arrives the White House. South Lawn, open press.

VICE PRESIDENT BIDEN — In the morning, the Vice President will attend meetings at the White House. Later in the afternoon, the Vice President will depart Washington, DC en route Kyiv, Ukraine. Highlights: The Vice President will meet with Hellenic-American and Cypriot-American groups to discuss his recent visit to Cyprus. This meeting is closed press.

US Senate: No Scheduled Events.

US House: No committee meetings scheduled.

Other: AAAS – CLIMATE CHANGE — June 5 – 6. Retired Rear Adm. David Titley, director of the Center for Solutions to Weather and Climate Risk at Pennsylvania State University, and Helen Kanovsky, Acting Deputy Secretary of the U.S. Department of Housing and Urban Development, are featured speakers at a two-day conference at AAAS on climate change resilience. Highlights: 9:20 a.m. Helen Kanovsky will speak about perspectives on resilience and change. HUD has been involved in recovery efforts after Hurricane Sandy and in federal planning efforts for long term disaster recovery. Location: AAAS Auditorium, 12th and H Sts. NW. Contacts: Kat Zambon, kzambon@aaas.org, 202-326-6434. Notes: Reporters planning to attend are asked to RSVP to kzambon@aaas.org.

WOMEN'S LEADERSHIP CONFERENCE — June 5 – 7. Chelsea Clinton, vice chair of the Clinton Foundation, will be a featured speaker at this year's National Conference for College Women Student Leaders (NCCWSL) at the University of Maryland, College Park. Contacts: Katie Broendel, broendelk@aauw.org, 202-785-7761. Lisa Goodnight, goodnightl@aauw.org, 202-785-7738. On the Net: <http://www.nccwsl.org/> Notes: All press must be pre-credentialed.

NATIONAL ARCHIVES – GI BILL OF RIGHTS — Document display of GI Bill of Rights. Signed into law by President Franklin D. Roosevelt on June 22, 1944, the Servicemans Readjustment Act, also known as the GI Bill of Rights, provided World War II veterans with funds for college education, unemployment insurance, and housing. Runs June 6th – 14th. Location: East Rotunda Gallery. Contacts: Public Affairs 202-357-5300

VHP D-DAY, WWII REUNION — The Library of Congress Veterans History Project (VHP) is sponsoring a series of exhibits and a special event to commemorate the 70th anniversary of the turning point of World War II in Europe on June 6, 1944 – also known as D-Day – and the 10th anniversary of the National World War II Reunion, one of the events for the dedication of the National World War II Memorial. The exhibits and event will educate the public on the significance of D-Day and reunite volunteers who gathered nearly 3,000 World War II veterans

collections over Memorial Day Weekend in 2004. Contact: Monica Mohindra (202) 707-1071; Lisa A. Taylor (202) 707-2333 Request ADA accommodations five business days in advance at (202) 707-6362 or ada@loc.gov. On the Net: www.loc.gov/vets/ www.loc.gov/vets/wwii-photos-mallinterviews.html

HAITI BUSINESS INVESTMENT CONFERENCE — June 6 – 7. Haiti Business and Investment Expo and Conference will focus on the importance facts related to the sector of business as well as finance. Latest strategies and techniques which will help in the growth of a business organization or enterprise will also be highlighted in this expo and will attract a large number of industry leaders and business owners from all over the world. <http://10times.com/haiti-business-investment>. Highlights: 9 a.m. U.S. Chamber Vice President for the Americas Jodi Bond will speak at the Haiti Renewal Alliances 5th annual Business Investment Expo and Conference, titled "The Caribbean: Beyond Sun, Sand, and Sea." Chamber press contact: Tyler Hernandez – thernandez@uschamber.com

WILSON CENTER TELECONFERENCE – SYRIA — 8:30 a.m. – 9:30 a.m. "What's To Become of Syria? U.S Policy, the Opposition and the Regime." Intro: Jane Harman, Director, President and CEO, The Wilson Center. Participants: Hadi Al Bahra, Secretary of the Political Committee, National Coalition of Syrian Revolution and Opposition Forces; Ambassador Robert Ford, Former U.S Ambassador to Syria (2010-2014); Joshua Landis, Director of the Center for Middle East Studies and Associate Professor, University of Oklahoma. Moderator: Aaron David Miller, VP, New Initiatives, The Wilson Center. Notes: Toll-Free Conference Line: 888-947-9018. Conference Line: 1-517-308-9006. Passcode: 13304.

CSIS – TUTAP — 9 a.m. – 11 a.m. The TUTAP Interconnection Concept and CASA-1000. Presentations by: Rune Stroem, Director, Energy Division, Central and West Asia Department, The Asian Development Bank; Ranjit Lamech, Sector Manager, Energy, Europe and Central Asia Region, The World Bank. Discussants: Fatema Z. Sumar, Deputy Assistant Secretary of State, Bureau of South and Central Asian Affairs, U.S. Department of State. Moderator: Andrew C. Kuchins, Director and Senior Fellow, Russia and Eurasia Program, CSIS. <http://csis.org/event/tutap-interconnection-concept-and-casa-1000>. Location: 2nd Floor Conference Center, Center for Strategic and International Studies, 1616 Rhode Island Avenue, NW.

USDA FARMERS MARKET OPENING — 9:30 a.m. Agricultural Marketing Service (AMS) Administrator Anne Alonzo will ring the opening bell for the 19th season of the USDA Farmer Market. This year, USDA is honoring American military service members and veterans with a barbeque battle featuring military chefs from all branches of service (Army, Air Force, Navy and Marine Corps). There will be several celebrity judges including Chef Eric Ziebold, Executive Chef at DC's CityZen and Chef Art Smith, Executive Chef of DC's Art and Soul. Location: 12th and Independence Ave. SW. Contacts: Peter Wood, 202-720-6179. Notes: In case of inclement weather, the opening ceremony will be rescheduled. The notice of cancellation will be posted on the USDA AMS Farmers Market website by 7 a.m. Friday June 6th.

NEW AMERICA FOUNDATION – AFGHANISTAN — 10 a.m. – 11:30 a.m. "Limited Horizons: The United States, Afghanistan, and the 2016 Zero Option." Featured Speakers: Chris Kolenda, Colonel, U.S. Army (Retired) Former Senior Advisor on Afghanistan and Pakistan, U.S. Department of Defense; Clare Lockhart, President, the Institute for State Effectiveness; Ambassador Ronald Neumann, President, American Academy of Diplomacy, Former U.S. Ambassador to Afghanistan. Moderator: Omar Samad, Senior Central Asia Fellow, New America Foundation Former Afghan Ambassador to France and Canada. Location: New America Foundation, 1899 L Street NW, Suite 400. Contacts: Liana Simonds, simonds@newamerica.org, 202-735-2829

GOLD STANDARD ACT OF 1984 — 10 a.m. – 12 p.m. The Jack Kemp Foundation and American Principles in Action will co-host the Kemp Forum on Growth event in Washington, D.C. to celebrate the 30th anniversary of the introduction of the Gold Standard Act of 1984. Speakers include: Jimmy Kemp, President of The Jack Kemp Foundation; Dave Hoppe, Chief of Staff to Rep. Jack Kemp; John Mueller, economic counsel to the House Republican Conference under the chairmanship of Rep. Jack Kemp; Jeffrey Bell, national co-chairman of Kemp for President; and Ralph Benko, founder of the Prosperity Caucus, will moderate the event. RSVP with Kate Bryan at kbryan@americanprinciplesproject.org. Location: Capitol Visitors Center, Room SVC 203-02. Contacts: Kevin McVicker kmcvicker@sbpublicaffairs.com (703-739-5920/800-536-5920)

ELLSBERG – RIBBON-CUTTING — 11 a.m. Former State Department official Matthew Hoh and Ann Wright will president over ribbon-cutting for new billboard featuring "Pentagon Papers" leaker Daniel Ellsberg that encourages

whistleblowing. Location: Bus shelter half a block south of the State Department on 23rd Street NW, north of Constitution Avenue. Contacts: Sam Hussein, samhousseini@gmail.com, 202-421-6858

TORTURE AWARENESS MONTH EVENT — 6 p.m. – 8:30 p.m. June is Torture Awareness Month, and the National Religious Campaign Against Torture is providing local congregations and faith organizations resources and activities to honor survivors of torture, "Exposing the Truth of U.S. Torture: Restoring Human Dignity." Witnesses: Imam Mohamed Magid, Imam, ADAMS Center; Dr. Azizah al-Hibri, Founder & Chair, KARAMAH: Muslim Women Lawyers for Human Rights; member, The Constitution Projects Task Force on Detainee Treatment; Ambassador Thomas R. Pickering, former U.S. Under Secretary of State for Political Affairs; member, The Constitution Projects Task Force on Detainee Treatment; Rev. Ron Stief, Executive Director, National Religious Campaign Against Torture. **CONTACT:** Samantha Friedman, West End Strategy Team Office: (202) 776-7700; cell: (202) 215-9260 or Samantha@westendstrategy.com. Location: ADAMS Center, 46903 Sugarland Road, Sterling, Va. Notes: This event will also be held on June 26th 6p.m. 1420 16th Street, NW

30TH ANNUAL WILLIAM OLIVER BAKER AWARD DINNER — 8 p.m. INSA will present Secretary Leon Panetta with the 30th Annual William Oliver Baker Award. Secretary Panetta is being honored in recognition of his long and distinguished public service to the people of the United States. <http://www.insaonline.org/Baker>. Location: Washington Hilton, 1919 Connecticut Avenue, NW. Notes: Reception begins at 6p.m.

Last Laughs:

LATE NIGHT POLITICAL HUMOR.

David Letterman: "I just saw it backstage. CBS is trading me for five Taliban prisoners. Is that right?"

David Letterman: "President Obama, and you got to admire him for this, says that the United States never leaves soldiers behind, and that's because we never leave."

David Letterman: [Referring to Bowe Bergdahl's release] "And you know the guy was in a prison, Taliban prison, for five years...now recovering in a hospital in Germany. The reason he is recovering in a hospital in Germany is because he couldn't get into a VA hospital until 2020. That's why."

David Letterman: "You know who resigned – Jay Carney, White House Press Secretary. What a grueling job that is. He had it two-and-a-half, almost three years. And it really is tough, because you have to go out there every day and lie to the press. ... You have got to make stuff up on your feet like I'm doing here tonight."

Jimmy Fallon: "Did you see this? It's a video that was just leaked that shows President Obama lifting weights, doing lunges, and using an elliptical machine at his hotel gym this week. Yeah. When he saw it, Chris Christie was like, 'This would never happen if I were President.'"

Seth Meyers: "This week, Vladimir Putin told reporters that he thinks Hillary Clinton is weak, and went on say, 'Maybe weakness is not the worst quality for a woman.' Which I guess answers the question, 'Why is Vladimir Putin single?'"

Conan O'Brien: "When asked about criticism from former Secretary of State Hillary Clinton, Russian President Vladimir Putin said he doesn't like to argue with women. Yeah. Putin is either being a misogynist or, ladies, he's the perfect catch."

THE DENVER POST

Sage-grouse bill kicks the can down the road

By Edward B. Arnett

Guest Commentary

POSTED: 06/06/2014 12:33:30 PM MDTADD A COMMENT| UPDATED: 100 MIN. AGO

"The costs of conservation measures to reverse declining greater sage-grouse populations no doubt will be high and require changes and sacrifices," writes Edward B. Arnett. (Denver Post file)

The forthcoming decision regarding listing the greater sage-grouse under the Endangered Species Act has sparked controversy, fear and anger among Westerners. As expected, legislators are politicizing the issue — and not necessarily for the greater good.

Reps. Cory Gardner of Colorado and Rob Bishop of Utah recently joined other members of

Congress to introduce legislation that would delay the listing for 10 years. In Utah, legislators decided to use taxpayer money to fight a listing, paying lobbyists to advocate for the decade-long delay to the tune of \$2 million.

Why?

Lawmakers claim that a delay will allow "adequate time for local actions to develop and document results." On the other hand, Utah's move to pay for lobbyist support leaves one wondering whether the intent is to obstruct conservation or actually protect the bird. So much for the goal of allowing time for conservation plans to bear fruit. Utah lawmakers assert that the listing would hamper development, grazing and other activities, costing the state between \$20 billion and \$40 billion. What would those costs be to the state in 10 years if the bird gets listed?

Is the delay really needed? What does it accomplish? Do we really need to kick the proverbial can down the road? Why not just implement solid conservation plans right now that would alleviate the need to list the bird — in one year or 10 years?

A bit of history is in order. In 2005, the U.S. Fish and Wildlife Service determined that an ESA listing for the greater sage-grouse was warranted but "precluded," meaning other species had higher priority. The result? Proactive efforts to address the issue and conserve sage-grouse all but ceased. Why? No urgency — threat averted — at least temporarily. That was nearly a decade ago. Why do we think another long delay will achieve different results?

And why waste \$2 million of Utah taxpayer dollars on lawyers and lobbyists? That amount, matched with available federal money, could have covered easements for 20,000 acres, paid for clearing 80,000 acres of encroaching juniper known to deter grouse, or ensure that conservation measures actually turn into "grouse on the ground."

Proponents of kicking the can down the road should realize that they can "pay now, or pay later" for the conservation activities needed to avoid a listing. Wasting time and money to fight — rather than simply implementing good practices now — will cost far more in the end.

The costs of conservation measures to reverse declining greater sage-grouse populations no doubt will be high and require changes and sacrifices. But long delays and lining the pockets of high-paid lawyers and lobbyists only adds to the costs at the expense of conservation.

Time is tight as the September 2015 deadline looms, but time is available for state and federal agencies to develop strong plans, which can recover sage-grouse numbers and avoid a listing. Incidentally, those plans also will help mule deer, pronghorn and about 350 other species that rely on sagebrush ecosystems. But this will require states with populations of the bird to develop conservation plans that reduce or eliminate threats and pass muster with the Fish and Wildlife Service.

A greater sage-grouse ESA listing is not a foregone conclusion, and avoiding it will require extensive collaboration and solid conservation plans from the states and federal government. Bolstering the health of sagebrush ecosystems and sage-grouse numbers will produce benefits from which industry, recreationists, sportsmen and local economies all will gain.

The question remains: Do state and federal legislators have the political will to do what is necessary to avoid a greater sage-grouse listing?

Ed Arnett is a wildlife biologist and director of the Center for Responsible Energy Development of the Theodore Roosevelt Conservation Partnership.

Hi Secretary,

I'm attaching a list and PDF of all the correspondence we've received and responded to from the Western Governors. We will upload these for you but I wanted to be sure you received them prior to WGA, per your request. Many thanks to Fay and Rob in Exec Sec for helping us compile these letters.

In addition, please find a PDF of the President's and Western Gov's proclamations for Great Outdoors Month that Vicki Dixon in our office compiled for you.

Thank you and see you in CO.

June 2, 2014

Honorable Sally Jewell
Secretary
U.S. Department of the Interior
1849 C Street, N.W.
Washington DC 20240

Honorable Tom Vilsack
Secretary
U.S. Department of Agriculture
1400 Independence Avenue, S.W.
Washington, DC 20250

Dear Secretaries Jewell and Vilsack:

The listing of the Lesser Prairie Chicken by the U.S. Fish and Wildlife Service as a threatened species has created significant and wide-ranging impacts on Kansans. This listing will create hardships and unintended consequences for our citizens, with little long-range improvement to the population of the Lesser Prairie Chicken because of the listing.

Historical studies have shown annual population fluctuation of the Lesser Prairie Chicken (LPC) and the strong correlation between drought and declining LPC numbers. At least three consecutive years of drought have exacerbated regional populations of LPC, along with other wildlife, and domestic livestock herds.

Kansans and wildlife/range management specialists working in Kansas in partnership with other states have developed appropriate plans that were being implemented prior to the listing. The USFWS decision to promote the NRCS Conservation Plan and the WAFWA Range-Wide Conservation Plan without adequate consideration of other quality, regional and statewide plans is short-sighted and damaging. There are reasonable alternatives, and other proposed conservation plans submitted by other state and regional conservation groups that should be fully considered. In the wake of the listing, Kansans should not be asked to enter any agreements until all conservation plans can be appropriately considered.

The "threatened" listing of the LPC has jeopardized the strongest habitat tool available in the occupied range. The voluntary incentive-based Conservation Reserve Program (CRP) has provided significant acreage of habitat for the Lesser Prairie Chicken and other wildlife species.

I am calling on USDA to pursue enhanced incentives for voluntary Conservation Reserve Program (CRP) measures in the LPC habitat areas. Since 2008, total CRP acreage in Kansas has declined by 25%, thus reducing habitat for the LPC and other wildlife species.

The agreement between the Department of the Interior and the Department of Agriculture to allow voluntary practices designed to protect and increase LPC populations overlaps regulatory controls with voluntary incentive based programs. Guidelines developed for USDA voluntary programs should not be used as the only standard. The USFWS should recognize all science-based practice standards, in addition to the NRCS Field Office Technical Guide.

Mandatory mitigation plans like the Range-Wide Plan add significant cost to any new development. A farmer wanting to establish a new five acre farmstead could see mitigation costs approaching or exceeding \$200,000. The installation of an oil well on range land could cost the oil producer as much as \$100,000. A single wind turbine could require a mitigation cost of \$1,000,000, and transmission lines almost \$200,000 per mile. The bottom line is that mandatory mitigation could slow or halt capital and energy development in many areas of Western Kansas, in addition to creating disincentives for growth in agriculture, the combination of which will significantly impact the Kansas economy

Creating additional rules, regulations and financial hardships for landowners and energy producers will not have a positive response or improve the habitat for the LPC. We do not believe it will efficiently and effectively increase the population of the LPC in Kansas, the state with the single largest occupied range. We already have appropriate tools, and this issue is best addressed at the state and regional level as opposed to a federally directed initiative.

In summary, action is needed in these areas:

1. Suspend current regulatory actions concerning the LPC until all proposed plans have been reviewed and thoughtfully considered for their attributes of species recovery.
2. Challenge USFWS to reconvene with USDA/NRCS to address the current program opportunities through CRP or Environmental Quality Incentives Program to show good faith that species recovery is the mission.
3. USFWS and all applicable federal agencies must recognize the significance of drought as the greatest limiting factor on the effectiveness of all protection efforts and persistent drought conditions must be understood as limiting the ability of any efforts to increase LPC populations.

Thank you for your consideration.

Sincerely,

A handwritten signature in black ink, appearing to read "Sam Brownback". The signature is fluid and cursive, with a large initial "S" and "B".

Sam Brownback
Governor of Kansas

May 30, 2014

Honorable Sally Jewell
Secretary
United States Department of Interior
1849 C Street, N.W.
Washington, D.C. 20240

Dear Secretary Jewell:

Shortly after its release Western Governors received a copy of the report, *A Strategy for Improving the Mitigation Policies and Practices of the Department of Interior* (the Report) produced by members of Department of Interior's (DOI) Energy and Climate Change Task Force. The Report outlines challenges and opportunities that may arise with respect to implementation of your Secretarial Order 3330: *Improving Mitigation Policies and Practices of the Department of the Interior* (the Order). The Report identifies specific guiding principles to be considered by DOI and its agencies in reaching landscape-scale mitigation decisions, along with strategies and tools DOI will employ in this effort.

As discussed at the Western Governors' Association (WGA) Winter Meeting in December 2013, the landscape-scale approach described in the Order presents certain legal and regulatory complexities for both federal and state agencies. Recognizing this, on January 21, 2014, the WGA submitted to you a letter and list of questions regarding the Order. For your reference we have attached to this letter both the January 21 letter and list of questions that accompanied that letter.

Since submission of the letter and questions, WGA staff has had several discussions with DOI representatives regarding the Order. Those conversations, however, have not yielded sufficient and direct responses -- from either DOI or BLM -- to the many questions raised in our January letter.

Governors remain unclear on exactly how DOI will seek to engage our states in the development and implementation of this new landscape-scale mitigation regime. We would appreciate a detailed and expedited response to our questions regarding how the Order will be operationalized.

The Report reflects DOI's appreciation for the need to collaborate with state agencies and the expertise states can add to the landscape-scale mitigation discussion. Indeed, such collaboration is listed as a *guiding principle* in the Report's Executive Summary.

Honorable Sally Jewell

May 30, 2014

Page 2

Western Governors share the responsibility of properly managing land and resources within their state borders and recognize that landscape-scale mitigation efforts can play an important role in project development, resource conservation, and land use planning. State agencies house a wealth of knowledge and scientific expertise that would be beneficial -- indeed vital -- to DOI in achieving the goals and deliverables set forth in the Report.

To achieve a mutually beneficial level of collaboration, we respectfully request that DOI and its representatives actively engage with state agencies now -- while the landscape-scale mitigation plan is being developed -- so that the goals set forth in the Report may be achievable in the near-term and our partnership durable in the long-term.

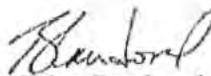

One point of clarification: among the tools discussed in the Report are geospatial assessments, including WGA's Crucial Habitat Assessment Tool (CHAT). DOI's enthusiasm for CHAT is greatly appreciated and we are confident in CHAT's value for project pre-planning. Western Governors, however, continue to underscore that CHAT is a non-regulatory tool intended to give project planners -- be they public or private -- a "30,000-foot" view of states' wildlife assets. That "first look" then can guide project planners to relevant state agencies for a deeper dive. While CHAT can be extremely helpful for project-specific pre-planning, it is not intended to be a landscape-based regulatory planning tool.

We look forward to your expedited response to the questions we have posed.

Sincerely,

John Hickenlooper
Governor, State of Colorado
WGA Chairman

Brian Sandoval
Governor, State of Nevada

Honorable Sally Jewell
Secretary
U.S. Department of the Interior
1849 C Street, N.W.
Washington, D.C. 20240

Dear Secretary Jewell:

Western Governors are dedicated to ensuring the health of our grasslands and forests. When there is damage to a natural area in the West -- whether caused by wildfire, invasive species, flooding, or other factors -- federal agencies often play an important role in the area's stabilization and rehabilitation. It appears, however, that there is a lack of consensus among federal agencies about how to best balance competing missions and effectively implement important restoration functions, such as reseeding, in a timely fashion. We urge federal agencies to develop shared criteria for selection of seed mixes to improve response times, limit further damage (such as that caused by encroachment of non-native species), and help build a basis for a stable seed production and storage system.

To our knowledge, there are divergent policies among federal agencies regarding such issues as: use of native seed; permissible seed sourcing; what seed mixes are deemed acceptable for use; responsibility among federal agencies for seed banking, etc. These inconsistencies make it difficult for seed suppliers to effectively meet federal needs. In addition, overly restrictive sourcing criteria can substantially increase costs, a critically important issue in these times of constrained budgets.

Western states intend to do their part and want to improve coordination with federal agencies. Proactive landscape-scale land management necessitates shared and targeted management planning for fire, drought, flooding, and other threats to grasslands and forests.

Accordingly, we would like to work with federal agencies to establish clear and consistent disaster rehabilitation approaches that restore landscapes without creating monocultures or checkerboards. Increased state-federal collaboration on long-term restoration and research would be mutually beneficial.

Western Governors would appreciate answers from your Department to the following questions, which are offered in a spirit of cooperation:

Honorable Sally Jewell

May 30, 2014

Page 2

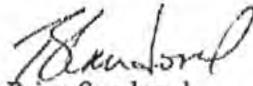

1. How do the federal agencies under the Department of Interior (DOI) establish seeding goals and objectives? To what extent are your agencies working together to set shared goals and objectives? How are you coordinating with USDA, NRCS and other departments and agencies?
2. How are DOI agencies planning for natural disasters or other circumstances that could lead to spikes in seed demand, decreasing supply and increasing cost?
3. Is the policy guidance of DOI agencies on the use of local and native seed backed up by best available science? If local and native seed are required by DOI policies, what are your agencies doing to ensure adequate supply?
4. How does DOI acquire input on seeding practices from the states?
5. How does DOI acquire input from external stakeholders such as the seed industry, private landowners, sportsman groups, conservation groups, etc.?
6. What monitoring and evaluation do DOI agencies perform to verify achievement of goals and objectives and to refine and improve seeding practices?

Western Governors acknowledge that harmonizing seeding policies and approaches will take time and effort, but we stand ready to work with you to achieve that goal. We believe doing so will help realize our shared objective of ensuring that we are equipped to expeditiously and effectively restore the Western landscapes we all depend upon and cherish.

Chairman, Western Governors' Association
1600 Broadway Suite 1700
Denver, CO 80202

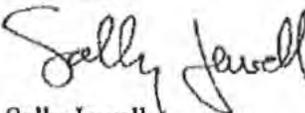

Dear Governor Hickenlooper:

Thank you for your letter dated May 30, 2014, regarding the role Federal land management agencies play in re-seeding damaged landscapes from events such as wildfires, flooding, invasive species, and other factors.

The Department of the Interior's focus on landscape scale conservation and restoration makes coordination on re-seeding efforts crucial to those efforts. We agree that coordination among Federal agencies and with states is vitally important. To that end, Bureau of Land Management Director Neil Kornze is convening a seed meeting of Federal agencies and the WGA to develop a strategy that will address many of the points you raise in your letter. The questions you raise will provide an excellent starting point to begin discussions in this area. By working together, we can improve on the success of our restoration efforts and decrease the time needed to reach our restoration goals.

Thank you for your interest in this issue. If you would like additional information regarding the Department's progress in this area, please contact Director Kornze at (202) 208-3801. A similar letter is being sent to Governor Brian Sandoval.

Sincerely,

Sally Jewell

Main Interior Building
1849 C Street, NW
Washington, DC 20240

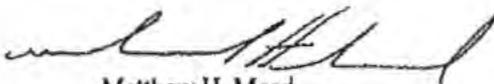

Dear Secretary Jewell:

The recovery of grizzly bears in the Yellowstone Ecosystem is a conservation success story of our time. Wyoming has worked with the U.S. Fish and Wildlife Service (FWS) and other state and federal agencies to compile and evaluate food sources data and the effect of those food sources on grizzly bear populations in the Yellowstone Ecosystem. This work substantiates that grizzly bears forage on a broad variety of food. Science demonstrates grizzly bears are expanding – in population and geography – beyond recovery criteria established by FWS and the State of Wyoming.

Both the Interagency Grizzly Bear Committee and the Yellowstone Ecosystem Subcommittee have reviewed the data and both recommend FWS delist the grizzly bears. All regulatory requirements and biological objectives have been met or exceeded. It is appropriate to publish a delisting proposal and return management of the grizzly bear to the State of Wyoming and other states in the Yellowstone Ecosystem.

Based on your September 2013 letter, I had expected to see a delisting decision in early 2014. There is no reason to wait. I encourage the FWS to work with Wyoming Game and Fish Department to develop and publish a proposed delisting rule expeditiously.

Sincerely,

Matthew H. Mead
Governor

Sam Brownback, Governor

OFFICE OF THE
EXECUTIVE SECRETARY

Honorable Sally Jewell
Secretary
United States Department of the Interior
1849 C Street NW
Washington, DC 20240

Dear Secretary Jewell:

The State of Kansas previously has expressed opposition to the listing of the Lesser Prairie Chicken as a threatened species. Since the March 27 announcement by the Fish & Wildlife Service that the listing would occur, Kansans have been dealing with the implications of that decision and the impending deadlines for participation in the Range-Wide Conservation Plan.

Kansas continues to maintain that the listing of the Lesser Prairie Chicken was not justified, and that the listing will negatively impact the state's agriculture and energy sectors in ways that can be avoided consistent with the interests of conservation and protection of the species. As a consequence, Kansas has filed a legal action to seek judicial review of the listing decision.

In the meantime, however, I am concerned that Kansans have not been allowed sufficient time to evaluate their options and prepare applications under the Range-Wide Conservation Plan. In particular, the Kansas oil & gas industry has a large proportion of small independent producers - unlike other states in the range of the Lesser Prairie Chicken, where larger producers are more dominant and have the resources to respond more rapidly. Those affected parties require more time than the standard thirty days to review their options and make vital economic decisions relating to their participation in the Range-Wide Plan. Accordingly, I am requesting that you take the necessary steps to allow an additional ninety days for those affected by the listing to opt-in to the protections provided by the federal rule.

Finally, I must note my concern that insufficient attention is being given to the important role of the Conservation Reserve Program in connection with the Lesser Prairie Chicken, and I urge greater inter-agency cooperation toward that end. The listing explicitly states that: "Lands enrolled in CRP encompass a significant portion of estimated occupied range in several lesser prairie-chicken states, but particularly in Kansas where an increase in the lesser prairie-chicken population is directly related to the amount of land that was enrolled in the CRP and planted to mixtures of native grasses." 79 Fed. Reg. 20027 (Apr. 10, 2014). I am particularly concerned that federal policies regarding expiration and/or re-enrollment of CRP land could work against the goals embodied in the listing, thereby creating conflicting federal policies that further exacerbate the effect of the listing on Kansans.

Thank you for your consideration.

Sincerely,

Sam Brownback
Governor of Kansas

MATTHEW H. MEAD
GOVERNOR

THE STATE OF WYOMING 643590

RECEIVED
STATE CAPITAL
CHEYENNE, WY 82002
2014 MAY -7 AM 9:

OFFICE OF THE
EXECUTIVE SECRETARY

Office of the Governor

May 6, 2014

The Honorable Sally Jewell
Secretary of the Interior
U.S. Department of the Interior
1849 C Street, NW, Room 5665
Washington, D.C. 20240

Dear Secretary Jewell,

In a letter dated March 11, 2014, Director Joe Pizarchek of the Office of Surface Mining (OSM) informed the Wyoming Department of Environmental Quality (DEQ) that \$21.2 million of Abandoned Mine Land (AML) funds – approved by Congress under the Helium Stewardship Act of 2013 (the Act) – would not be sent to Wyoming. The Act directed \$75 million of AML funds to Wyoming in FY 2015. OSM has interpreted, or misinterpreted, the Act as restricting Wyoming to only an estimated \$53.8 million. The OSM determination is incorrect and I ask that you review and reverse this determination.

The Surface Mining Control and Reclamation Act (SMCRA), as amended in 2006, requires eligible States and Indian tribes receive AML funding in two ways. First, eligible states and Indian tribes receive 50% of funds collected on state or tribal lands for reclamation (as a certified program, Wyoming does not receive the actual 50% state share but instead receives an equivalent share as in lieu Treasury funds). Second, funds known as "prior balance funds" are paid. Prior to 2007, States and Tribes did not receive a full 50% share of SMCRA funds. Amendments in 2006 corrected this underfunding, requiring "*the Secretary . . . make payments to States or Indian tribes for the amount due for the aggregate unappropriated amount allocated to the State or Indian tribe . . .*" These amendments were passed to ensure that Wyoming (and other eligible states) were paid amounts allocated and due to them under SMCRA prior to 2007.

In 2012, the Transportation Bill amended SMCRA adding a provision limiting the "*total annual payment*" (emphasis added) to \$15 million. While the payment was modified, the balance due to Wyoming was not modified by the Transportation Bill. SMCRA also required the prior balance be repaid "*in 7 equal annual installments, beginning with fiscal year 2008.*" Wyoming is owed \$165.4 million in prior balance funds.

The Wyoming Congressional delegation worked to ensure that Wyoming was paid. The Helium Stewardship Act raised Wyoming's cap to \$28 million for FY 2014 and \$75 million for FY 2015. It clearly states these funds first be applied to in lieu payments (traditional reclamation) and funds over the in lieu payments be applied to the remaining prior balance funding owed to Wyoming.

OSM released a new table titled "*Hypothetical AML Funding Projections from FY 2014 through FY 2024*". This table reflects Wyoming will receive \$53.8 million instead of the \$75 million set forth in the

Secretary Sally Jewell
May 6, 2014
Page 2

Act. Wyoming DEQ Director Todd Parfitt wrote to Director Pizarchek and requested the table be corrected. (DEQ letter attached.) Director Pizarchek did not honor this request. (March 11, 2014 letter attached.)

Director Pizarchek's interpretation is inconsistent with the Act on prior balance payments. SMCRA clearly delineates that Wyoming is still owed \$165.4 million (stipulated in the 2006 Amendments). Under Helium Stewardship Act, Wyoming should receive the \$21.2 million prior balance funds (\$75 million minus the estimated \$53.8 million in lieu payment). When this payment is made, Wyoming will still be owed a substantial prior balance amount (\$165.4 million minus \$21.2 million). If a debtor can avoid his debt by missing a payment – every lender in the country would be broke. I am sure that OSM did not intend to suggest this was the position of the United States.

Please review this matter at your earliest convenience.

Sincerely,

Matthew H. Mead
Governor

DEPARTMENT
OF

MAR 17 2014

ENVIRONMENTAL
QUALITY

Mr. Todd Parfitt
Director
Wyoming Department of Environmental Quality
122 West 25th Street
Cheyenne, WY 82002

Dear Mr. Parfitt:

Thank you for your letter dated February 4, 2014, which expressed concern that a mistake may have been made in the Abandoned Mine Land (AML) funding projections prepared by the Office of Surface Mining Reclamation and Enforcement (OSMRE). In response to your letter, we have reviewed our projections and have determined that they are correct and consistent with the Surface Mining Control and Reclamation Act of 1977 (SMCRA), as amended.

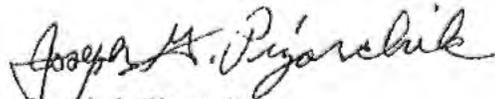

As you note, the Helium Stewardship Act of 2013, which was signed into law on October 2, 2013, contained an amendment to SMCRA that increased the cap for two years on annual AML distributions provided to certified states and tribes. In summary, the law raised the cap from \$15 million to \$28 million for Fiscal Year 2014 and to \$75 million in Fiscal Year 2015. This amendment also specified that if the cap were reached, OSMRE should distribute a state's or tribe's certified in lieu funds under section 411(h)(2) of SMCRA first, then distribute state or tribal prior balance replacement funds under section 411(h)(1) of SMCRA.

In calculating the AML funding projections, we first determined a state's or tribe's certified in lieu funds by multiplying the annual coal production estimates provided by the Department of Energy with the reclamation fee rate set forth in section 402(a) of SMCRA. Using this methodology, we estimate that just over \$107.6 million in reclamation fees will be collected in Wyoming in Fiscal Year 2014. Pursuant to section 411(h)(2) of SMCRA, certified in lieu funds are normally distributed in an amount equivalent to 50 percent of the reclamation fees collected in their states. In Wyoming's case, that would amount to approximately \$53.8 million. As you may be aware, prior balance replacement funds were authorized for seven fiscal years only, from Fiscal Year 2008 to Fiscal Year 2014 pursuant to section 411 (h)(1)(C) of SMCRA. Therefore, prior balance replacement funds will not be included in AML funding provided to states and tribes for Fiscal Year 2015 and thereafter. Since certified states such as Wyoming will receive certified in lieu funds only in Fiscal Year 2015, our projection that Wyoming's distribution will be \$53.8 million is accurate.

Please note that the \$53.8 million projection is only an estimate. Once we finalize actual fee collections received during Fiscal Year 2014 and make any required reductions due to sequestration, the actual AML funding distributed to Wyoming may be different.

Please let us know if you need additional information.

Sincerely,

Joseph G. Pizarchik

1849 C Street, NW
Washington, D.C. 20240

Re: 25 C.F.R. § 83 Rulemaking and the Little Shell Tribe of Chippewa Indians

Dear Secretary Jewell & Assistant Secretary Washburn:

I support the Department of the Interior's ("Department") rulemaking to revise 25 C.F.R. § 83, "Procedures for Establishing that an American Indian Group exists as an Indian Tribe" ("Part 83 Process"). I urge you to continue forward with this work and publish the proposed rule as soon as possible.

This rule revision is important because I believe that the Part 83 Process was not properly administered when the Department of the Interior issued a Final Determination against the Little Shell Tribe of Chippewa Indians of Montana ("Little Shell Tribe") in November of 2009. This Final Determination overturned the Proposed Finding in Favor of Acknowledging the Little Shell Tribe. The Part 83 Process should have determined that the Little Shell Tribe is an Indian tribe of Montana—a designation which is more than 100 years overdue.

Montanans, Montana tribes and the State of Montana all recognize that the Little Shell Tribe is a part of our state's rich culture and history. I support their efforts to become federally recognized and it is time for the Federal Government to finally grant the Little Shell Tribe the recognition they are owed. Federal recognition will enhance their ability to provide additional services to tribal members and strengthen their tribal government. I am encouraged that the Department has seen the need to fix this issue through the Part 83 rulemaking process.

I trust the Department will move swiftly to publish its proposed Part 83 rule and complete the rulemaking process. The Department has my full support in this effort.

Sincerely,

STEVE BULLOCK
Governor

United States Department of the Interior

202-219-4152

Interior Proposes Reform of Federal Acknowledgment Regulations *Proposed rule would address "broken" process*

Washington, D.C. --- Secretary of the Interior Sally Jewell and Assistant Secretary-Indian Affairs Kevin K. Washburn today announced publication of proposed regulations that would reform the 35-year old process by which the Department of the Interior officially recognizes Indian tribes. Federal acknowledgment establishes the U.S. Government as the trustee for Tribal lands and resources and makes Tribal members and governments eligible for federal budget assistance and program services.

"President Obama believes that reforming the federal acknowledgment process will strengthen our important trust relationship with Indian tribes. Acknowledgment by the Department of the Interior confirms the existence of a nation-to-nation relationship between an Indian Tribe and the United States," said Secretary Jewell. "Through this Administration's outreach initiatives, tribal leaders have told us that the current process can be inconsistent, cost millions of dollars and take decades to complete. Our proposed rule maintains the rigorous integrity needed, but allows that process to be conducted in a timely, efficient and transparent manner."

The existing regulations, known as "the Part 83 process", were originally adopted in 1978 and were updated only once 20 years ago. Prior to that, Interior had addressed requests for Tribal acknowledgment on a case-by-case basis. While the 1978 regulations established a structured process for federal acknowledgment, these regulations have been widely criticized as being too time-consuming, sometimes arbitrary and generally "broken."

"Reform of the process is long-overdue," said Assistant Secretary Washburn. "One of my first assignments at the Department was to search for ways to improve the federal recognition process and address long-standing criticisms of those regulations. This initiative is the product of substantial Tribal consultation and public comment and we are grateful for the broad public interest in this reform effort and the helpful guidance we have received from Tribes and the public."

-Continued-

Page 2 - Reform of Federal Acknowledgment Regulations

Key features of the proposed rule would promote transparency by updating the Part 83 criteria to include objective standards; promote efficiency by requiring a petitioner to show community and political influence/authority from 1934 to the present rather than from as early as 1789; and eliminate the need for a petitioner to demonstrate that third parties identified the petitioner as a tribe from 1900 to the present. The proposed rule would make changes to the petitioning process that facilitate the timely issuance of proposed findings and final determinations. It would also allow an administrative judge to conduct a comprehensive hearing and review of a negative proposed finding.

In recognition of the high level of interest in the acknowledgement process, the Department used a transparent approach and significant outreach effort. Before beginning the formal rulemaking initiative, Interior issued a discussion draft last summer to facilitate public input on how to improve the process. Through the discussion draft and ensuing tribal consultations and public meetings, the Department obtained substantial feedback. In total, more than 2,800 commenters providing input on the discussion draft.

The proposed rule reflects current federal policy embodied in the Indian Reorganization Act and seeks to codify the Department's past practice under the Part 83 process to promote consistency and transparency. With the issuance of this proposed rule, the Department is again seeking input from tribes, petitioners seeking acknowledgment, and interested members of the public so that any reforms to the process are fair, timely and transparent.

Of the 566 federally recognized tribes, 17 have been recognized through the Part 83 process under Title 25 of the Code of Federal Regulations, *Procedures for Establishing that an American Indian Group Exists as an Indian Tribe*. Though far more tribes have been recognized through Congressional action, the Part 83 process is an important mechanism because it allows deliberative consideration of petitions by a staff of federal experts in anthropology, genealogy and history and ultimately allows for a decision by an objective decision-maker. When petitioning groups that meet the several criteria are officially "acknowledged" as Indian tribes, the U.S. Government accepts trusteeship of Tribal lands and natural resources and Tribal governments and members become eligible to receive federal health, education, housing and other program and technical assistance services.

Interior will be conducting tribal consultations and public meetings on the proposed rule in July 2014. Tribal consultations are generally open only to representatives of federally recognized Indian tribes. Public meetings are open to everyone. The tribal consultations will be held on the following dates and locations:

Dear Secretary Jewell and Secretary Hagel:

I am writing to you concerning the Department of Interior (DOI) and the Department of Defense (DOD) review of the proposed SunZia Southwest Transmission Project. As you are aware, this project has been under consideration by the Bureau of Land Management (BLM) for several years, and they completed their Final Environmental Impact Statement (FEIS) in June, 2013. Prior to the publication of the FEIS, there had been several multi-agency meetings regarding proposed routing for the transmission lines (two AC lines, or one AC line and one DC line), though the meetings seemed to fall short of National Environmental Policy Act (NEPA) requirements pertaining to cooperating agency involvement.

The objective of the project is to pull wind energy from Central New Mexico and move the energy to a site in Arizona. The BLM Preferred Alternate Route is planned across the Northern Extension Area of White Sands Missile Range (WSMR). This planned route poses an unacceptable negative impact to critical test and evaluation missions at WSMR. As I understand it, there are two good alternatives which would both support the project's objectives and WSMR's mission—the DOD preferred route north of the Northern Extension Area, or burying the line for approximately 35 miles along the BLM preferred route. I strongly support either one of these alternatives.

The Honorable Sally Jewell and the Honorable Chuck Hagel
April 22, 2014
Page 2

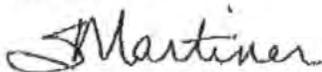

I was briefed recently on the Massachusetts Institute of Technology Lincoln Laboratory Review of the BLM Preferred Alternative Route, and I understand the review validates DOD concerns. My Administration fully supports our national goals regarding development of renewable energy, but not at the expense of military missions. We have followed closely the evolution of our National Security Strategy—White Sands Missile Range will continue to play a significant role as the Defense Department continues development of long-range capability against emerging threats, particularly those that might arise in the Asia-Pacific Theater.

With respect to the FEIS, and as provided for in 43 CFR 1010, I provided a Consistency Review statement to BLM on August 16, 2013. I have not received a response. This statement fully described several inconsistencies between the FEIS and our state's plans, policies, and programs with regards to our support for military missions in New Mexico.

Secretary Jewell, I urgently ask for your support of an alternative which avoids a negative impact to WSMR. Secretary Hagel, please let me know how we can further demonstrate our support for WSMR—it is an invaluable resource to our nation and to our great State of New Mexico.

My staff point of contact for this issue is Hanson Scott, hanson.scott@state.nm.us. Please let us know if we can provide additional information.

Sincerely,

Susana Martinez

RECEIVED

2014 APR 23 AM

OFFICE OF THE
EXECUTIVE SECRETARY

John W. Hickenlooper
Governor

April 14, 2014

The Honorable Sally Jewell
Secretary
United States of the Interior
1849 C Street NW
Washington, DC 20240

Dear Secretary Jewell,

We are writing today to offer my support of the proposal to provide \$1 million per year of funding to connect urban youth with the Rocky Mountain Arsenal National Wildlife Refuge ("Refuge") and fulfill our mutual goal of exposing the future stewards of our natural resources to the environment and wildlife.

Located in a fast growing urban area, part of which is economically disadvantaged, use of the Refuge exploded in 2013 to over 300,000 visitors, from 23,000 visitors in the prior year, and is expected to increase each year. In addition to its ideal location in close proximity to over 141,000 school children, the Refuge boasts a 16,000-acre reserve including bison, eagles and a restored native prairie ecosystem.

This proposal will allow for immediate implementation of the following:

- Removal of physical barriers from residential areas to the Refuge.
- Investment into partnerships, initially with Environmental Learning for Kids, a non-profit organization focused on providing outdoor education and experiences to underserved youth. In addition, the Refuge will continue to expand partnerships with local school districts, the Colorado Parks and Recreation Association and a new and emerging metropolitan green space alliance.
- Increased investment into youth employment opportunities with Mile High Youth Corps and Ground Work Denver to create a future conservation constituency.
- Finance one special project each year in support of the National Wildlife Refuge System's urban refuge initiative. This will allow the Refuge to support and encourage further innovation and local grassroots efforts as they develop across the region.

We share your commitment to youth in the outdoors and hope you will agree with me that the Refuge is best positioned to bridge many of the existing divides between youth and nature.

Sincerely,

A handwritten signature in black ink, appearing to read "John W. Hickenlooper".

The Honorable John W. Hickenlooper
Governor of Colorado
136 State Capitol
Denver, Colorado 80203

Dear Governor Hickenlooper:

Thank you for your April 14, 2014 letter of support of the proposal to provide \$1 million per year of funding for connecting urban youth to Rocky Mountain Arsenal National Wildlife Refuge. Your support for this effort harmonizes with the Secretary's recently announced Secretarial Order to significantly expand recreational, educational, volunteer and career opportunities for millions of youth and veterans on the nation's public lands, including partnerships with businesses and youth organizations, in an effort to bridge the growing disconnect between young citizens and the great outdoors.

At this time, the proposal selected to receive these funds has not been determined. An announcement of the selectee is anticipated for July, 2014.

Thank you for your active engagement and commitment to bridging the growing gap between youth and nature.

Sincerely,

DIRECTOR

April 10, 2014

The Honorable Sally Jewell
Secretary, U.S. Department of Interior
1849 C Street, N.W., Room 6151
Washington, DC 20240

Dear Secretary Jewell:

I am deeply concerned by the actions of Bureau of Land Management (BLM) officials engaged in the impoundment of livestock in Clark County, Nevada. The conduct of BLM officials, including use of aggressive canines, SWAT teams and equipment, snipers with long rifles, a military helicopter, and over 200 heavily-armed law enforcement officials, has the appearance of a paramilitary operation rather than a round-up of cattle.

As a result, there is a toxic atmosphere of intimidation, turbulence, and anxiety in this quiet community that has left many locals in fear of even leaving their homes. To complicate matters more, the Clark County Fair, which is scheduled to begin today in Logandale, Nevada and close on Sunday, will bring thousands of children, families and exhibitors to the area.

Based on the aggressive behavior that has been displayed already, which is well documented in the mainstream media and social media sites, I am concerned that this matter may continue to escalate to a tragic and unnecessary outcome.

Indeed, so-called militias from other states have raised a call to arms to come to Nevada to confront federal authorities. <https://m.youtube.com/watch?v=e8O-o5OPsA&feature=youtu.be>

To further exacerbate the situation, the BLM has closed important public roads and established "First Amendment Zones" to limit where members of the public can express their views of this event. Moreover, the BLM has limited media access and required private landowners and right-of-way holders to obtain prior approval before accessing their lands or visiting their utility lines.

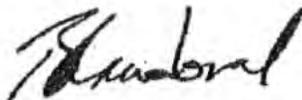

Over the past week, my office has received hundreds of phone calls and emails, overwhelmingly decrying the actions of BLM officials. I have met with state and local government officials, who fear tragedy is imminent. I have spoken with BLM Director Neil Kornze to insist that he take action, including dismantling the offensive "First Amendment Zones." To date, the only response I have received from federal officials is that there is no consideration for suspending or changing the character of the operation.

Arrests, public road-closures, the creation of an overly-restrictive "First Amendment Zone," use of tasers and police dogs, and generally heavy-handed behavior have created a dangerous situation in this community and our state. Local residents are living in fear and are upset and frustrated by BLM's actions. National militia groups are descending upon Clark County.

As Governor of the State of Nevada, I respectfully call on you, as Secretary of the United State Department of Interior, to suspend this enforcement activity immediately and order the BLM and all involved federal agencies to stand down. It is not my intent to question the Orders of the court or the merits of the legal dispute. I ask you to withdraw from this poorly planned and executed endeavor and put an end to this now to avoid what could become a horrible tragedy.

I look forward to speaking with you today and implore you to give this matter your utmost attention.

Sincere regards,

BRIAN SANDOVAL
Governor

CC: The White House

545827

THE SECRETARY OF THE INTERIOR
WASHINGTON

APR 11 2014

The Honorable Brian Sandoval
Governor of Nevada
Carson City, Nevada 89701

Dear Governor Sandoval:

I am in receipt of your letter expressing concern about the cattle impoundment being undertaken by the Bureau of Land Management in Clark County, Nevada. As I assured you in our conversation of yesterday, our highest priority is the safety of the public, as well as the local, State, and Federal employees and contractors who are involved in carrying out and supporting this lawful impoundment in furtherance of two recent Federal court orders. I ask that you join with us to publicly emphasize the need for demonstrators to remain lawful, peaceful, and not to place themselves or others in danger by impeding the Federal employees and contractors conducting the impoundment.

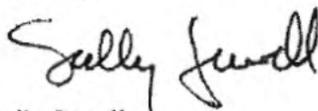

I am dismayed by the tone of your letter and by the factual misstatements it contains. Rest assured that there are no military helicopters, no Federal snipers, no paramilitary operation by the Federal Government, and no curtailment of First Amendment rights of those who disagree with our decision to implement Federal court orders to remove trespassing cattle. The BLM is conducting this operation consistent with established procedures and protocols.

The reported presence of out-of-state militia members underscores the need for your support and for the involvement of State law enforcement personnel to maintain public safety during this impoundment. The public statements of the protest participants, while showing flagrant disregard for Federal authority, indicate that they respect the exercise of State police powers. As public officials, we share the responsibility to ensure compliance with all laws without exception. In your role as Governor, you can reinforce that message.

Our goal in this action is to remove trespassing cattle that unlawfully remain on public lands, including lands managed by the National Park Service, as a result of their owner's refusal to comply with Federal law and three Federal court orders. He has also rejected our many efforts over the years to resolve this situation. For more than 20 years, the owner of these cattle has been trespassing on publicly owned resources for his own use and profit, unfairly impacting other potential uses of these public lands and without complying with the same laws as 16,000 law-abiding public lands ranchers nationwide. To allow this illegal activity to continue is unfair to lawful users of the public lands.

As we discussed yesterday and as I also relayed to Clark County Sheriff Doug Gillespie, I ask you to stand with us and to commit the resources to help us resolve this trespass situation peacefully.

Sincerely,

A handwritten signature in cursive script that reads "Sally Jewell". The signature is written in dark ink and is positioned above the printed name.

MATTHEW H. MEAD
GOVERNOR

STATE CAPITOL
CHEYENNE, WY 82002

Office of the Governor

642771

April 9, 2014

The Honorable Sally Jewell, Secretary
U. S. Department of the Interior
1849 C Street, N.W.
Washington, DC 20240

Dear Secretary Jewell,

I performed a consistency review of the Proposed Resource Management Plan for the Lander Field Office (Lander RMP) in April 2013. Nearly a year later, there is still no Record of Decision (ROD). This delay has consequences. Please help bring the Lander RMP to finality.

RECEIVED
2014 APR 10 PM 3:09
OFFICE OF THE
EXECUTIVE SECRETARY

The Lander RMP covers a total of 6.6 million acres in five counties. For more than seven years, dozens of cooperators reviewed and commented on thousands of pages of data and information while maintaining a tight schedule for the Lander RMP process outlined by the BLM. In addition to the cooperators, there was a high degree of public participation. The participation reflects the plan's importance to the lives of people who live, work, and visit the five counties covered by the planning area. The public process for developing resource management plans is as important as the final product. The citizenry has done its job; it is now up the Department of Interior to do its part.

The Lander RMP will guide land use decisions for 20 years—including grazing, habitat protection, mineral development, recreation and other uses. The uncertainty of the Lander RMP's ROD affects the private sector's ability to plan and to make long term business decisions. This jeopardizes economic prosperity and creates unnecessary tension and uncertainty. It prevents implementation of conservation initiatives and actions addressing natural resource issues such as trails, recreation, energy development, wildlife, not to mention public health and safety.

In its March 2010 status determination for the Greater Sage-Grouse, the U.S. Fish and Wildlife Service endorsed Wyoming's strategy, stating: "the core area strategy...if implemented by all landowners via regulatory mechanisms, *would* provide adequate protection for sage-grouse and their habitats in the State." [Emphasis added.] Wyoming's strategy is being implemented on non-federal lands. Without a final Lander RMP, Wyoming's ability to demonstrate and document Greater Sage-Grouse conservation efforts is curtailed. The U.S. Fish and Wildlife

The Honorable Sally Jewell

April 9, 2014

Page 2

Services' decision on the listing is less than 18 months away. Wyoming and its partners have expended considerable resources to develop an effective, enduring model for sage-grouse conservation that will be implemented through the Lander RMP. The Lander RMP will serve as a template for other resource management plans revision efforts in Wyoming and across the west—but only after it is signed.

Please help resolve the delay of the Lander RMP. I hope you will be able to sign the decision at your earliest convenience. It would be wonderful if the signing would take place in Wyoming, but that is secondary to the real need to have the Lander RMP signed expeditiously.

Sincerely,

Matthew H. Mead
Governor

THE SECRETARY OF THE INTERIOR
WASHINGTON

JUN 04 2014

The Honorable Matthew H. Mead
Governor of Wyoming
Cheyenne, Wyoming 82002

Dear Governor Mead:

Thank you for your letter of April 9, 2014, regarding your interest in the Bureau of Land Management (BLM) issuing the Record of Decision (ROD) for the Lander Resource Management Plan (RMP). I share your desire to provide the public with management certainty to this area.

The Department must balance releasing the Lander ROD with a landscape approach to Greater sage-grouse conservation. While the U.S. Fish and Wildlife Service has expressed its support of the Wyoming strategy, the Lander RMP is only one component of the larger, multi-state planning initiative with broad national implications. I recognize the years of effort by the State of Wyoming and members of the public working with the BLM to arrive at fair and balanced management for the Lander area. I appreciate your leadership and that of your predecessor, Governor Freudenthal, in developing a plan to both conserve the Greater sage-grouse and sustain responsible natural resource development. As your letter indicates, the Lander RMP will guide the use of public lands for at least the next two decades.

The Department is on target to complete its review of the proposed plan amendments and revisions. This has required extensive coordination with the USDA Forest Service as well as states throughout the West in what has been one of the most extensive land-use planning efforts ever, all within a very short timeframe. As you can appreciate, the first Greater sage-grouse plan needs to be fully vetted as it will set the stage for all the plans that follow. We have nearly completed our review of the Lander plan and are very close to finalizing our decision.

Thank you for your leadership in Wyoming and as co-chair of the Sage-grouse Task Force in advancing the State-Federal collaboration that is critical to our success in conserving the sage-grouse. I look forward to seeing you at the Western Governors' Association's meeting and our continued work together on this pioneering effort.

Sincerely,

A handwritten signature in cursive script that reads "Sally Jewell".

Honorable Sally Jewell
Secretary of the Interior
Department of the Interior
United States Government
Washington D.C. 20240

Dear Madame Secretary:

The Legislature of American Samoa has transmitted to me, the approved Senate Joint Resolution No. 33-3 amending Article II, Section 9 and Article II Section 19 of the Revised Constitution of American Samoa to provide for a "Legislative Override of Executive Veto without action by the Secretary of the Interior". Moreover, it has been decreed by the Legislature of American Samoa, to place this resolution on the ballot for the next election on November 4, 2014 to be voted on by the people of American Samoa.

While I don't object to the subject of the resolution, I am very concerned that legal issues connected with the Presidential Delegated Oversight Authority to DOI over the Territory of American Samoa, along with former Congressman Fofu Sunia 1984 amendment shifting the review of amendments of our Constitution to the Congress of the United States have not been clearly addressed. These legal issues might invalidate the proposed Constitutional amendments as prescribed by Senate Concurrent Resolution No. 33-3.

Based on the foregoing, I am requesting your assistance if it would be possible to have the Solicitor General review the referenced resolution and determine if there are legal impediments which require resolution before the matter is placed in a referendum in the next general election. It is important for me to ensure that the people of American Samoa are well informed of all the issues associated with the proposed constitutional amendments.

As time is of the essence, your usual prompt attention is appreciated and humbly requested to ensure that sufficient time is spent to create full awareness among the people of American Samoa so they can make informed choices. Thank you very much for your consideration of this request.

Sincerely,

Lolo M. Moliga

Rhea Suh
Assistant Secretary
U.S. Department of the Interior
1849 C Street, N.W.
Washington, D.C. 20240

Dear Assistant Secretary Suh:

It has come to my attention that the U.S. application for candidacy in the Extractive Industries Transparency Initiative (EITI) was approved by the EITI Board at its March 18-19 meeting in Oslo, Norway. I understand and appreciate that the application included an opt-in provision for states, as requested in WGA's letter to you last July. I further understand that the Multi-Stakeholder Group (MSG) that is providing input to the Extractive Industries Transparency Initiative plans to gather, collate, and analyze publicly available state revenue data for inclusion in the U.S. EITI report, regardless of whether a state has opted in.

I strongly recommend that the MSG and the Interior Department (as the primary federal government representative to EITI) clarify the proposed use of state data and propose a formal opt-in process for interested states. To better inform state consideration of EITI participation, WGA recommends that our federal partners develop and distribute an explanation of the initiative that describes:

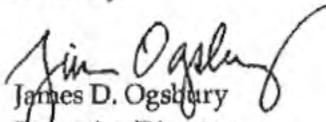

- the rationale for state participation and identifies the costs and benefits for a state opting in to EITI reporting;
- the process by which a state can opt-in to formally participate in U.S. EITI reporting; and
- how state data will be gathered and used for states which do not opt in.

While Governors support the goal of revenue transparency and recognize that the U.S. system of transparency can be a model for the rest of the world, they will react unfavorably to efforts by EITI that create an unfunded federal mandate. Unless states have opted in, DOI, EITI or the "Independent Administrator" contracted to gather and "repackage" existing state data should not expect state agency staff to take time away from their duties to help gather, collect, analyze or interpret data requested by EITI.

Rhea Suh
April 4, 2014
Page Two

We look forward to receiving more information about the proposed use of state data and a formal opt-in process for interested states.

Sincerely,

James D. Ogsbury
Executive Director

OFFICE OF THE SECRETARY
Washington, D.C. 20240

APR 17 2014

Mr. James D. Ogsbury
Executive Director
Western Governors' Association
1600 Broadway, Suite 1700
Denver, Colorado 80202

Dear Mr. Ogsbury:

Thank you for your letter dated April 4, 2014, on behalf of the Western Governors' Association (WGA) concerning U.S implementation of the Extractive Industries Transparency Initiative (USEITI). You requested further clarification of how extractive revenues collected by states may be affected as USEITI implementation continues, and I appreciate the opportunity to share this information with you.

As you know, the USEITI candidacy application was approved at the March 2014 EITI International Board Meeting. Consistent with our previous communications, the candidacy application sought and successfully obtained a waiver of the EITI requirement to include reconciliation of state extractive revenues in EITI reporting. Publicly available information about state extractive revenues will be in the USEITI Report as part of the contextual data describing the U.S. extractive sector.

Moving forward, a working group will be formed to engage states in the joint design of a state "opt-in" procedure for USEITI reporting. The USEITI Multi-Stakeholder Group (MSG), which includes representatives from the States of California and Wyoming, will lead this effort. The rationale for seeking the waiver and proposing to instead develop an "opt-in" procedure recognizes not only the complex and varied nature of the state extractive landscape, but also the need to first obtain meaningful guidance from states on an approach that will be mutually beneficial. As a result, the approval of the USEITI candidacy application marks a starting point for more detailed discussion, not a destination with defined outcomes for state participation.

We welcome the opportunity for more active WGA involvement in designing a state "opt-in" procedure and identifying the benefits to state residents, especially in those areas where substantial energy development occurs. We would like to invite WGA representatives to begin attending the USEITI MSG open meetings, starting with the next one on April 23rd, and/or to

participate in the state "opt-in" working group. We will continue to keep you informed and seek your input as the state "opt-in" procedure is designed, and look forward to WGA's continued engagement on behalf of states.

Please let me know if there is any additional information that would be helpful.

Sincerely,

Rhea Suh
Assistant Secretary
Policy, Management and Budget

April 3, 2014

Honorable Sally Jewell
Secretary of the Interior
U.S. Department of the Interior
1849 C Street, NW
Washington, D.C. 20240-10148

Dear Secretary Jewell,

Thank you for your continued engagement with Western Governors and the Western Governors' Association. We are writing to ask the Department of Interior's support for reauthorization of the Federal Permit Streamlining Pilot Project (Pilot Project).

In accordance with Section 365 of the Energy Policy Act of 2005, then-Secretary of the Interior Gale Norton structured the Pilot Project through a memorandum of understanding with the Secretary of Agriculture, Administrator of the Environmental Protection Agency, and Chief of the U.S. Army Corps of Engineers.

The Pilot Project established seven regional Bureau of Land Management (BLM) offices as Pilot Project offices for a period of 10 years. The Western states where these offices are located collectively process the vast majority of the applications for permit to drill (APD) filed with the BLM.

A key aspect of the Pilot Project is that these offices are eligible to receive a portion of rental fees paid by oil and gas development companies in connection with their leases on BLM land. The Pilot Project offices utilize the additional funding to add staff and other resources to increase office efficiency and streamline processing of APDs. Further, this additional funding has been used by the Pilot Project offices to support BLM resource conservation efforts.

Since enactment of the Energy Policy Act of 2005, demand for natural gas has increased dramatically. In order to continue the development of domestic resources, efficient and streamlined regulatory permitting processes are ever more important. The Pilot Project is an important tool in this regard.

The Energy Policy Act of 2005 dictates that the Pilot Project's 10-year term will expire in 2015. Given its success, we support reauthorization of the Pilot Project.

Honorable Sally Jewell

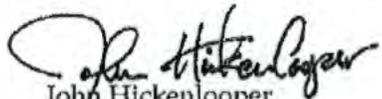

April 3, 2014

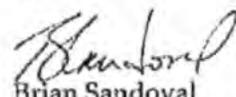

Page 2

Bipartisan support for the Pilot Project was seen when, in Dec. 2013, Congress passed and the President signed H.R. 767, expanding the scope of the Pilot Project and providing additional discretion to BLM. Ongoing bipartisan support is further evidenced by the Feb. 5, 2014 letter sent to you by Senator Tom Udall and Congressman Rob Bishop.

We join interested Members of Congress in asking the Department of Interior to support extension of the Pilot Project. We look forward to working collaboratively with you to ensure the continued success of this program, so important to a number of Western states.

Respectfully,

John Hickenlooper
Governor, State of Colorado
WGA Chairman

Brian Sandoval
